# Washington As It Is Today

**W**ASHINGTON is the most cosmopolitan city in the United States. Here one will meet people from every State in the Union and every country on the globe. It is unlike any other city in the world. It is not a city of manufactories or commerce, yet it is a hive of industry. Its business quarters occupy a restricted section, and its residential area is large.

It is singularly quiet for a city of its size. The first impression that one gets of the Capital is that everything has come to a standstill. The streets stretch out—wide, tree-lined and seemingly deserted. There is an atmosphere of serenity about Washington that is restful to the visitor. It is as if the people of Washington, close to the heart of our government, realize that great accomplishments require calm and deliberation.

The first thing to greet the expectant sightseer as he alights from his train is the stupendous Union Railway Station—a structure of huge proportions and surpassing magnificence, erected at a cost of more than \$18,000,000. It is one of the finest railway stations in the world, and a most fitting and dignified entrance to the Capital of the United States. All railways entering Washington come into this station.

Emerging from the bustle of the station into broad Delaware Avenue, one catches his first glimpse of the great dome, the crowning glory of the Capitol, "hanging like a great brooding bubble against the pale morning sky."

The beauties and magnificence of the Capitol building beggar description. It stands upon the brow of a hill, in a parkage of sixty acres. It is the most imposing public building on earth. Passing through the bronze doors, one finds himself standing beneath the mighty and world-famous dome. This is Uncle Sam's "reception room" where all of the guests of the Republic come.

Entering the vast circular hall of the rotunda, one is struck by the glorious columned corridors spread out before him. The walls are hung with a bewildering array of paintings and decorated with many marvelous

Baltimore and Ohio Railroad (Union) Station  
Washington, D. C.

sculptures and frescoes. One hundred and eighty feet overhead the vaulted canopy of the dome is aglow with color. It is a huge painted copper bowl, 65 feet in diameter, with a concavity of 21 feet.

A staff of licensed guides are stationed in the rotunda. They charge a nominal price for their services in showing the visitors through the building.

The paintings of Colonel John Trumbull in the rotunda, depicting various historic events, represent the actual scenes as they occurred. Among them is "The Signing of the Declaration of Independence," which was sketched by the painter himself at the time this great document was signed.

The tour of inspection takes one through Statuary Hall (or Hall of Fame), House of Representatives, the Law Library of the Supreme Court, Senate Restaurant, Senate Post Office, Public Reception Room of the Senate, Senate Lobby, Senate Chamber, the Marble Room (the private reception room of Senators), the President's Room (the most beautifully decorated office in the world), and the Supreme Court Room.

If one is present at the time the law-making bodies are in session, he is privileged to see and hear just how the will of the people is made articulate.

The building is open from 9.00 a. m. until 4.30 p. m., daily, except Sundays and holidays. During the session of Congress the forenoon is the best time to inspect the building. Congress goes into session at noon, and when in session flags are displayed on the building, over both the Senate and House of Representatives.

The Capitol is situated only four blocks from the Baltimore and Ohio (Union) Station, and a stop-over of two hours between trains will enable the sightseer ample time to visit this most beautiful and impressive of Washington's public buildings.

Though the Capitol is but one of many places that the sightseer may visit, if this were all that could be seen in Washington, one would reasonably feel well repaid for having traveled a long distance to see it.

THE CAPITOL  
America's most beautiful public building

## The Best Railroad

No matter how hard we try, we cannot make the Baltimore and Ohio Railroad the greatest railroad in the world, or the straightest or the richest railroad. But we can, if we will only try hard enough, create for it the reputation of being the best railroad in the world in point of service. I cannot do it alone. You cannot do it alone. But all of us working together can do it, and I earnestly desire your cooperation in this way.

*President*

### THE READER AND ADVERTISING

Circulation of the Baltimore and Ohio Magazine is over 41,000 copies per issue, our aim being to place it in the hands and in the homes of practically all English speaking employes of the Railroad. An examination of our advertising will show that it conforms to the highest standards. We do not guarantee it, but we believe that it means exactly what it says, and for that reason feel free to urge our readers to patronize our advertisers whenever they consistently can.

Made Him Tired

The Colonel had a colored hired man who was absent from the farm on Sunday and Monday and finally appeared on Tuesday in a rather dilapidated condition.

"How's this, Sam?" he inquired. "What's been happening to you?"

"Well, suh, you know Sat'dy was pay-dray, and after supper we gets into a big crap game. 'Long come 'bout two o'clock in de a. m. me and Napoleon Sims gets into a li'l friendly argument. Cunnel, befoh I know it he hits me in de mouf and he knocks out fo' teef, and he hits me in de eyes and blacks dem, and he blame near busts mah nose and mah jaw. Den he gets me down on de ground and stomps on me and cracks three ribs. Fo' God, Cunnel, Ah never got so tiahd of a man in all mah life."—*Railroad Red Book.*

She Knew Better

Micky Flanigan came home one day sniffing. "Ye got licked!" cried his mother with conviction.

"Naw, I didn't neither, maw," Micky retorted. "But the doctor was at our school today, tryin' to find out if there was anything the matter with any of us, an' he says I got ad'noids."

"Ad'noids? What's them?" Mrs. Flanigan demanded.

"They're things in your head, maw, what has to be took out," said Mickey in a doleful tone.

"He's a liar," Mrs. Flanigan cried hotly, "an' it's me that isn't afraid to tell 'im so. I fine-comb your head iv'ry Sattaday night, an' it's niver a ad'noid kin I find!"

The Cover Picture of This Issue

"Oh yes, I'm quite sure that I've seen them both somewhere in the movies!" someone will exclaim on seeing the fishing picture on the cover of this issue of the Magazine. Oh, but you have not, for this is a real Baltimore and Ohio picture, taken on the Casselman River, and the girls are really, truly Baltimore and Ohio girls. Allow us to present Miss Leah Radcliffe (right) and Miss Lenore Grace (left), who so graciously posed amid this tempting bit of Baltimore and Ohio scenery.

The "fishing party" included Miss Radcliffe, of the Auditor of Passenger Receipts Office, Baltimore, C. H. Dickson, our art editor, who took the picture, and "Aunt Mary" as chaperon, and set out from Baltimore on the night of April 23. Arriving in Connellsville the next morning they met Miss Lenore Grace, of the Division Accountant's Office, Connellsville. Then the party, escorted by Trainmaster M. L. McElheny, boarded No. 6 and rode the observation to Rockwood, selecting the spots along the Casselman River. Through the kindness of Superintendent Brown, they were met at Rockwood by Assistant Superintendent Wolfersberger with his "F-100," otherwise known as the Ford which has been fitted up to travel on the railroad. Boarding this, the party set out merrily to the beauty spots up the river. Here a number of pictures were made, from which the one which appears on the cover was chosen.

40,000  
Opportunities  
in Hotels

YOU can have one of these well-paid, pleasant executive positions—40,000 of them in the big hotels of the United States—now America's Fourth Largest Industry. Statistics show that ONE IN EVERY TEN HOTELS WILL HAVE AN OPENING FOR A MANAGER THIS YEAR. Thousands of other positions are also open to those who qualify through training.

The Lewis School guarantees to give you the valuable knowledge that it has taken some of the most successful hotel men years to obtain—men who are now making \$5,000 to \$50,000 a year. All of your training will be under the personal direction of Clifford Lewis—a hotel expert of national reputation. A few spare-time hours a week given to the simple, clear lessons of the course will give you the training for a good position, a fine living, and a handsome salary. The training will in no way interfere with your present work or recreation.

Send to-day for Free Book, "YOUR BIG OPPORTUNITY." Don't wait a minute—you may lose the opportunity of a lifetime. Mail the coupon NOW. Your whole future may depend on it.

# BALTIMORE AND OHIO MAGAZINE

*Published monthly at Baltimore, Maryland, by the Baltimore and Ohio Railroad, to improve its service to the public and to promote efficiency and community of interest among its employes*

VOLUME 10

BALTIMORE, MAY, 1922

NUMBER 1

*"It is our desire that the people living along our lines should feel that the Baltimore and Ohio Railroad is a good neighbor. For instance, if they are visited by fire, flood or epidemic, etc., they should instinctively call upon us first for assistance, because of our potential strength and our willingness to help them."*

## What the Baltimore and Ohio Means by "Being a Good Neighbor"

*Following the statement on Public Policy made by President Willard at the Deer Park business meeting of 1916, a part of which is quoted in the italicized paragraph above, he and others of our officers have had occasion to restate and affirm it before public assemblages. At a recent meeting of this kind, the chairman, one of the leading business men of the city, suggested to President Willard in a good-natured way that if he really meant that the Baltimore and Ohio should be a good neighbor, he could show it to the citizens of the city in no more satisfactory way than by building a new passenger station. President Willard explained that the Baltimore and Ohio would like to do this but that its financial position at this time would not permit it; however, that some day we hope to be able to provide satisfactory stations, wherever needed. He said further that there are other things that the citizens along our lines would like to have us do and that we would like to do, but that we cannot do; that notwithstanding this, there are many neighborly acts, outside of those called for by our strictly business relations, that we can perform for our friends along the line, and that it is his wish that they be performed to the fullest extent.*

*Even, almost, as he was talking, there were employes at various points on the System who were giving convincing evidence that they had caught and were following the "Good Neighbor Idea," as illustrated by the several stories which follow.—Ed.*

### At College Park, Maryland, Where, During the February Blizzard, the Baltimore and Ohio Was the Only Transport "Muddling Through"

**I**T was only grim determination, ceaseless vigilance and extremely hard work on the part of both the officers and men of the Baltimore Terminal and Baltimore Divisions that enabled the Baltimore and Ohio to operate the only trains that were giving service between Baltimore and Washington during the worst of the blizzard of February last. The complicated electric switching system in the Washington Terminal was put out of business completely. There were other big problems to overcome,

too, but they yielded to superior organization and fine support on the part of our employes, with the result that we were able to give service—and comparatively good service—to all those who sought it between the two cities, and who otherwise would have been unable to make the trip.

An interesting sidelight on this situation, which is a splendid illustration of following the Baltimore and Ohio way of being a good neighbor, is supplied in the following letter:

College Park, Md.,  
February 24, 1922.

Mr. William E. Lowes,  
General Passenger Agent,  
Baltimore and Ohio Railroad,  
Baltimore, Md.

My Dear Mr. Lowes:—

At its February meeting the College Park Home and School Association, which concerns itself with the welfare of this vicinity, unanimously resolved to express the appreciation of the people of College Park for the very generous and efficient service afforded by the Baltimore and Ohio Railroad during the recent heavy storm.

It was observed that nearly all express trains were stopped at this station for several days, doubtless putting the railroad to considerable expense and inconvenience, but enabling our people to continue their work almost without interruption. The Association particularly desires to have you know that many of our people who for various reasons are not regular commuters on the Baltimore and Ohio but use the electric cars for transportation between here and Washington and intermediate points, have enthusiastically expressed their gratitude for this service and their appreciation of the kindness extended by all the employes of the Company concerned.

Yours very truly,  
(Signed) W. E. Claflin  
Secretary

(Signed) Paul S. Bueckley  
President

In his address at the Deer Park Convention of officers of the Railroad in 1916 Mr. Willard said that

we should be good neighbors "because of our potential strength and willingness to help." This is the unselfish side of the proposition—the part imposed on us because we are a public service organization—and the case of our College Park friends is a good one in point. Those commuters referred to as for various reasons not using the Baltimore and Ohio, probably patronize the Railroad most infrequently. But they are our neighbors and towards

them we are glad to show the neighborly spirit.

The other side of this proposition of neighborliness—the selfish interest of the Railroad—may some day be given practical application by our friends at this little station. Perhaps circumstances will later suggest to them that they would like a more regular association with their neighbors of the Baltimore and Ohio, and we may find that they have become our daily passengers and guests.

## At Chester, Pa., Where President Willard Illustrated the "Good Neighbor" Idea

ON April 24 the Baltimore and Ohio had the honor of being host to Marshall Joffre of France, the victor of the first battle of the Marne, who has been on a world tour. He was going from Washington to New York, his car being on the rear of No. 8. Official car 99, with President Willard aboard, was next to it. At Camden Station hundreds of employes greeted the distinguished Frenchman, and his enjoyment of their gift of flowers may be seen from the accompanying

picture. At Mt. Royal Station members of the Baltimore and Ohio Post of the American Legion had also arranged a reception, a great bunch of lilacs being presented to the Marshall by Miss Emily Scott, of the Multi-graph Department, while the back platform on which he stood was flanked by beautiful silk French and American flags. As a send off he was given three old fashioned Yankee cheers.

When Chester, Pa., was reached, the regiment of the Chester Military

Academy was drawn up for review, but the long stops that had already been made, had so delayed the train that it was not deemed advisable to hold it up further for this purpose. When, however, the earnest request of the cadets that the Marshall review them, was made known to Mr. Willard, he, recognizing what a memorable event it would be in their lives, consented to hold the train and himself obtained the compliance of the Marshall in their request.

When the trap door on the observation platform was opened and the Marshall started down the steps, the lameness with which he was suffering was quite noticeable. It was then that President Willard, in the absence of a porter, quickly moved across the station platform, picked up a stepping box, placed it at the bottom of the platform steps and thus assisted the Marshall in alighting in comfort.

The appropriateness of this courtesy on the part of the chief executive of the Railroad to so distinguished a guest, is apparent. The appropriateness of the same or a similar courtesy to *any* guest of the Railroad should be equally apparent to *any* officer or employe, when occasion demands it.

LEFT TO RIGHT: MISS ESTHER AULD, STENOGRAPHER, SUPERINTENDENT'S OFFICE; MISS JUSTA MONTGILLION, CLERK, AGENT'S OFFICE; MISS FLORENCE GOODMAN, STENOGRAPHER, DIVISION ENGINEER'S OFFICE; MISS MAY McCURRY, CLERK, DIVISION ACCOUNTANT'S OFFICE; ALL OF CAMDEN STATION: MARSHALL JOFFRE OF FRANCE

When Marshall Joffre stood on a rear car of No. 8 in Camden Station on the morning of April 24, these young ladies almost swamped him with flowers. The train bearing him from Washington to Philadelphia on his journey home from Japan, stopped for only a few minutes and went on to Mount Royal. A crowd of several hundred persons thronged the platform at Camden Station to welcome the Marshall. Long before the train bearing him came in sight his arrival was heralded by the whistles of all the locomotives in the Baltimore and Ohio yards. As the special car stopped alongside the platform the crowd caught sight of the Marshall seated by a window and cheered him. He came out on the platform and remained only long enough to smile at a battery of cameras and to accept the flowers. The crowd, although disappointed that the Marshall did not make even a short speech, cheered and waved as the train left the station

## At Willard, Ohio, Where a Baltimore and Ohio Locomotive Kept the Municipal Power and Water Plant Going for Five Days

EDWARD F. MOLZ, traveling car agent of our Transportation Department, recently sent to the MAGAZINE office a clipping from the *Toledo Daily Blade* which contained the accompanying picture and an interesting little story about our Chicago Division's idea of what being a good neighbor means. We wanted more detail and it was supplied by M. S. Kopp, assistant superintendent of this division, as follows:

On April 11, flue sheet of one of the boilers, Willard Municipal Power and Water Plant, sprung a leak. The remaining boiler was not sufficient to maintain steam to supply the city with light and water. The Baltimore and Ohio Railroad was appealed to for assistance, and engine 2221 was placed at the power plant to supply steam to take care of this emergency.

The engine was in service from the 11th to the 15th, during which time repairs were being made to the boiler. It consumed 30 tons of coal and supplied ample power to maintain standard for light and water pressure. This enabled the city to feel free from any possible danger of fire, or loss of light.

*Toledo Daily Blade*

Mayor Perry I. Immel, President of the Council C. J. Robinson, and Chairman of the Board of Public Affairs W. F. Jump have expressed their appreciation for the prompt action on the part of the Baltimore and Ohio in coming to their assistance in the emergency.

That the good effect of the Railroad's performing such a service as this is not confined to the locality affected, is shown by the story which got such big circulation in the *Toledo* paper. This is inexpensive advertising, to say the least. Usually it is the kind that can't be bought at any figure—except the price of the neighborly service which is more and more becoming "the Baltimore and Ohio Way."

## At Departure of Special Train, Pan-American Delegates, Baltimore to Washington

ONE of the finest trains of coaches ever operated as a special by the Baltimore and Ohio, was provided for the women delegates to the Pan-American Conference, held in Baltimore during the week of April 22-29, for their excursion to Washington and return on April 28. Thoroughly cleaned inside and out, these coaches were of uniform design, looked as if they had just come from the builder's shop, and made a pretty picture as they were being loaded at Mt. Royal Station.

It had been expected that most of the 800 women who left from Mt. Royal at the scheduled time of 9.55 a. m., would carry only brief cases or light hand bags with them. Many, however, apparently expected to go

direct to their homes from Washington without coming back to Baltimore, and, as a result, had heavy suit cases and valises with them which swamped the small force of porters at the station. Sensing this situation at about 9.30, when he had occasion to go through the already crowded station, S. I. O'Neill, storekeeper in the Timber Preservation Department, rounded up about ten employes on the second floor of the stations (and among them three or four women who did valiant service) who, for the next half hour had plenty of experience as porters for one day, but withal a lot of fun helping some of the overburdened delegates with their luggage.

Even before these had gotten to work, General Superintendent White,

Superintendent Shriver, Assistant Trainmaster McCabe and General Car Foreman Keenc, who were supervising the movement of the train, and Ticket Clerk McClintock, with several other employes, had been "smashing baggage" and helping relieve the pressing emergency.

If some of the delegates were surprised at having their tips politely declined by attractively attired and smiling young women baggage porters, and by railroad officers and men employes who were also acting a double role, most of them appreciated the unusual courtesy in the same degree as did one of the delegates, who said: "Well, the Baltimore and Ohio was hospitable when it brought us here and is continuing to be so until the end of the convention."

### Why the Sleeping Car Surcharge?

THERE has been considerable adverse criticism levelled against the surcharge—perhaps more criticism than any other traveling expense has brought forth.

As railroad employes we all understand that the principle on which the surcharge is based is reasonable. The traveling public, however, does not. If they understood the principle on which the surcharge is collected there would be less complaint against it. Result—end of wrongful criticism.

Employes can do a lot toward ending this unjust criticism. Train and traffic employes coming into direct contact with the traveler are in a position to end this unjust criticism. How can they perform such a duty?—by making proper and courteous explanation of the surcharge principle.

Sleeping cars are like box seats at a theatre—they provide greater comfort and pleasure while traveling. The average capacity of a sleeping car is 27 passengers. The average capacity of a coach is 80 passengers. Railroad rates should be based on cost price in at least some measure. Statistics show that for each coach passenger the average dead weight is one ton, while it is four tons per sleeping car passenger.

It costs just four times as much to haul a sleeping car passenger as it does a coach patron.

The regular charge for a Pullman merely takes care of the actual Pullman accommodations, bed, washing facilities, porter. The extra expense—the surcharge—is paid to the railroad company to meet the additional cost of hauling the passenger. That's all there is to it.

## With President Harding and Party, Washington to Cincinnati and Return, April 26-28

*Officers and Employes Congratulated by Vice President Galloway  
for Splendid Handling of Train*

ON April 27, on the occasion of the centennial celebration in honor of the birth of former President Ulysses S. Grant, President Warren G. Harding unveiled the memorial in the town of Pleasant Plain, Ohio. President Harding and his party used a special train over the Baltimore and Ohio for this event, leaving Washington on April 26, arriving in Cincinnati the next day, leaving there the same day and arriving in Washington on April 28.

Whenever a president of the United States travels over the Baltimore and Ohio, a standard set of instructions, worked out with great detail and care, is put into effect for the operation of his train. The Baltimore and Ohio holds an enviable place among the railroads for the safe operation of its trains, and the speed limits which are so carefully maintained, are widely recognized as being conducive both

tained to the minute, every detail working out as had been planned in the original instructions. When President Harding returned to the station

President Harding's special arriving in Cumberland

in Cincinnati for his departure on the night of April 27, the throng which met him was so great that he and his party were unable to get to their cars

General Managers Begien and Scheer:

I want to congratulate all of you on the splendid execution of the arrangements for handling the special train of President Harding from Washington to Cincinnati and return and express my personal and official gratification for the excellent manner in which the crews handled the train, particularly for the regularity in running time, the smooth handling by engineers and for the clean, almost smokeless firing.

It reflects additional credit on employes of the Baltimore and Ohio for handling passenger trains the Baltimore and Ohio way.

An especially even run was made on the return trip. The train ran from Grafton, W. Va., over the

Changing engines on President Harding's special at Cumberland

to safety and to smooth riding. Yet the safety of the president of the United States is of such paramount importance to the country that the railroad having the proud distinction of his patronage gladly arranges every detail that can possibly contribute to his comfort, convenience and well-being.

President Harding's "special" consisted of six cars: a combination car which was used by the train crew and for baggage; two twelve-section sleepers for newspaper men, Secret Service men and others; the private car "Patriot," occupied by Mr. E. D. McLean and party, and the private car "Idcal," in which were Mr. and Mrs. Harding and their special guests. A dining car, with a picked crew, remained with the train the entire trip.

Schedule time or better was main-

in time to allow his train to depart on schedule. Even with this delay, however, the train reached Washington three minutes ahead of the time set for its arrival.

Engine 5227, Engineer W. B. Tayman and Fireman T. F. Campbell, just prior to taking President Harding's special east

mountains and to Washington with only one stop, at Cumberland. The distance from Grafton to Washington is 253 miles. The first leg, Grafton to Cumberland, 101 miles, was made in 3 hours, 19 minutes; and the second leg, Cumberland to Washington, 152 miles, in 3 hours, 38 minutes.

An opportunity was afforded the

President and his party of viewing the beautiful scenery as the train passed over the crest of the Allegheny mountains, and the smooth riding of the train and consequent comfort of its distinguished passengers, bore eloquent testimony to the splendid condition of our track and equipment and the skill of our engineers.

tives of the majority of the largest manufacturers and shippers of the country, and the work of the club in bringing such men in close touch with the representatives of the carriers, certainly tends to bring closer cooperation and harmony of each interest, to the mutual benefit of both.

## Traffic Clubs Are Helping Reduce Claims

By C. C. Glessner, General Freight Claim Agent

**M**ANY of the traffic clubs are doing good work in educating shippers in Claim Handling and Claim Prevention, and of them the New York Traffic Club is a leader.

In the early part of March last, I received through our assistant freight traffic manager at New York, W. F. Richardson, an invitation from Mr. T. T. Harkrader, president, New York Traffic Club, to attend their meeting and "Freight Claim Agents' Night," held March 28, 1922.

At 9.45 a. m., over forty freight claim agents and freight claim officials representing various carriers, met at the New York Athletic Club, and made an automobile tour of the various industries and terminals around New York City and Brooklyn.

Among the points of interest visited was the gigantic plant of the Bush Terminal. This covers 250 acres of developed properties, housing some three hundred manufacturers and distributors, and has pier capacity for forty two vessels to load or unload at one time. There are numerous storage warehouses, cold storage plant, a United States Post Office for mail and parcel post, express and railroad office and other railroad facilities. The Bush Terminal Company is said to represent a community equal to 50,000 people.

In the evening we were requested to attend the regular monthly meeting of the Club, Mr. William C. Fitch of the Southern Pacific Company, having been selected as the principal speaker of the evening. Mr. Fitch made an excellent address, couched in such clear and concise terms that he left nothing to be misunderstood or inferred. The keynote of his speech was "Cooperation of Shippers with Carriers," and it is easy to understand what a far reaching effect this speech will have. The views he expressed on Claims, Claim Prevention and Causes from which Loss and Damage Claims arise, are those generally taken by carriers. His answers to the twelve questions contained in the Questionnaire of the Traffic Club previously submitted

to him, were apt and enlightening to those present.

The membership of the New York Traffic Club consists of representa-

### New Equipment

**T**WO new dining cars have been added to the present equipment operated by the Baltimore and Ohio between New York and Pittsburgh in both directions, on Trains 5 and 6, the premier through trains of the road.

## Why Work Overtime?

Mt. Royal Station, Baltimore, Md.,

April 21, 1922.

Dear Everybody:

A trainman with whom I am well acquainted has a habit of wearing a face full of frowns. No matter whether the day be stormy or clear, whether he is feeling fine or otherwise, he seems to go to work with a frown and keep it on all day long. His expression would make a person think of how pleasant(?) it must be to get up with a grouch and to keep it on all day. So when, yesterday, one of our girls sent me a little clipping which is guaranteed to put a new wrinkle into your brain and to take fifty-two wrinkles out of your face, I decided to try it upon my friend, the trainman. And this morning when I saw him come into the baggage room at Mt. Royal Station I knew that this was the time.

He came in as usual, with a frown on his forehead and a dozen or so wrinkles on each side of his jaw, and an expression in his eyes that made me feel as though he would like to bite my ears off. I thought of Emmy's little clipping and gathered up my courage.

"Good morning, Mr. Blank," I said politely, "I've a message for you."

"Good morning, Miss Magazine," he said, still frowning, "A message, you say?"

"Yes, but first of all, tell me what you are frowning about."

"Oh, I don't know, nothing in particular, I guess."

"Then here's the message: Emmy says that it takes sixty-five muscles of the face to make a frown and only thirteen to make a smile. Why work overtime?"

He looked at me quizzically for a minute. Then he began to smile. In a few seconds his mouth was open in a wide "Ha! Ha!," and I knew the medicine had taken effect.

"Well, Miss Magazine, I reckon you're right about that. My wife just said to me this morning, 'Why, Ed, are you going on a train and take up the tickets with that scowl on your face?'"

"I tell you," he continued, "it's only a habit. Oh, yes, and my glasses need changing too; it's a little difficult for me to read, and maybe that's got something to do with it. But I'll try to think about that. How many muscles did you say it takes?" I told him.

"So long!" he called, "here's my train. I'm going to tell that tale to the first crusty brakeman I can find." And when he had gone I wondered if the commuters on his train would notice the difference that day.

Do you frown unconsciously? So do I. Let's get our glasses changed and memorize the little prescription: It takes sixty-five muscles of the face to make a frown and only thirteen to make a smile. Why work overtime?

Yours Sincerely,

*Margaret Talbot Stevens*

Associate Editor

## Teamwork Wins on the Railroad as It Does on the Baseball Field

*When the Manager orders a bunt, don't try to smash the ball on the nose!*

*By a Division Superintendent*

THE resemblance between a division of railroad, efficiently operated, and a baseball team well and successfully handled, is remarkable. It is the punch that counts; the ability to get a hit at the time most needed. No baseball team was ever successful, regardless of how many stars made it up, unless their work was coordinated into a smooth, easy-working machine that functioned properly and smoothly. This is equally true on a railroad and the work of the successful baseball manager and the successful superintendent are almost identical.

A baseball team, or a division of railroad, may win one game by sharp practices or crooked methods, but at the end of the season the well organized and well balanced team or division will stand many points ahead of the team made up of stars who are not working together and who stoop to sharp practices.

Many years ago, at a deciding game between two rival teams in the cities of St. Paul and Minneapolis, at which the pennant of the Western League was at stake, and the score in the ninth inning was 3 to 3, St. Paul had a man on second and a man on first. The St. Paul batter hammered out a Texas leaguer and the little player on second started home and got there. The umpire declared him safe, and the Minneapolis players started a riot, claiming that he had not touched third base in coming home. During the discussion it became apparent that the umpire had not seen the play and was at a loss to make a decision. The matter was put squarely up to the runner, and despite the fact that it meant the loss of the game and the pennant to his team, he came out and stated that he had failed to touch third base. That man is now the manager of one of the biggest major league teams in the United States.

The man who is crooked in his sports is bound to develop into a crook in his business. Conversely, the man who is clean and upright in his sports will be the same in his business.

The writer has heard the president of the Baltimore and Ohio Railroad say many things in the last ten years, but of all of them the one that made the greatest impression is the remark

made at Deer Park some years ago, when, in outlining the policy of the Company, he stated that it would be the policy of the Baltimore and Ohio Railroad to be a good neighbor in the communities which it served. The writer has used this in numerous talks that he has made before various civic bodies, not as the utterance of our president but as if it was his own, and in each instance it was easy to see that it made a deep impression on the audience. "A good neighbor" means a lot. It carries with it the idea of a clean man who is fair in his dealings. The community regrets when he leaves—it hates to lose a good neighbor.

### Every Player Should Know Purpose and Policy

The great thing in managing a baseball team or a railroad is to let the players in either game know what you are trying to do and what the general policy is to accomplish this end. I have worked on several of the large trunk lines of this country, and I believe that the Baltimore and

Ohio Company is so organized by its general officers that the least important player in the ranks can easily find out what the objective is and what the policy is to accomplish the objective.

In days gone by, when the writer was actively engaged in playing baseball, if he had any good points as a ball player it was his ability to hit, or, in baseball lingo, to "poke her on the nose." In one of the critical games of the university which I attended, despite the fact that I had a batting average close to 400, I was called upon to bunt by the manager of the team. It was exactly what I did not want to do, but having been disciplined to obey without question, I carried out his instructions and bunted the ball. The result was that we defeated our opponents, the first time, by the way, in seven years.

The lesson to be drawn from all of this is, first—Whether you are playing baseball or railroading, conduct your business on the high grade that will give you the respect of the people that you come in contact with. Second and most important—Learn to bunt when directed to do so by your manager, regardless of your desire to make a home run. On this basis only can we function properly and secure the results that the manager of our big Baltimore and Ohio baseball team desires.

## Senior Vice-President George M. Shriver Elected a Member of the Board of Directors of the Baltimore and Ohio on April 26

GEORGE McLEAN SHRIVER, senior vice-president, was elected a member of the Board of Directors of the Baltimore and Ohio Railroad Company at a meeting in New York on April 26, to take the place made vacant by the death of H. L. Bond, Jr. Mr. Shriver has been identified with the Company for 36 years, nearly all of which he has spent in the executive department during the regimes of Presidents Mayer, Cowen, Loree, Murray and the present chief executive, Mr. Willard.

Mr. Shriver was born in Hightstown, N. J., in 1868, the son of the late Samuel S. Shriver, a Presbyterian minister, and Caroline McCluskey Shriver. He started with the Baltimore and Ohio in 1886 as a clerk in the Accounting Department, shortly thereafter going with the United States Express Company, but in 1888 becoming private secretary to Charles

F. Mayer, who was then president of the Consolidation Coal Company. In the fall of that year, when Mr. Mayer was elected president of the Baltimore and Ohio, Mr. Shriver continued with him as private secretary. In 1896 John K. Cowen became president of the Company and Mr. Shriver remained as his secretary, likewise serving with the next president, L. F. Loree. In 1901, Mr. Loree promoted Mr. Shriver to assistant to president and in that capacity he continued during the remainder of Mr. Loree's tenure and throughout the presidency of the late Oscar G. Murray from 1904 to 1910.

In 1911, just one year after Mr. Willard became president, Mr. Shriver was elected second vice-president of the Company and placed in charge of the financial and accounting departments. In 1916 the Board of Directors abandoned the numerical

designations of the vice-presidents, there being four at that time, and on March 1, 1920 Mr. Shriver was elected senior vice-president, which office he still holds.

During the administration of John K. Cowen from the early 90's, Mr. Shriver was in constant touch with the reorganization of the property, and since, particularly during Mr. Willard's administration, has looked after the great financial problems that have made possible the vast improvements necessary for the development and maintenance of the Baltimore and Ohio, now one of the

important trunk line systems of the country. During Federal control, when the railroads were taken over by the Government as a war measure, Mr. Shriver was the corporation's only vice-president, the others having become Federal officers.

At important rate hearings in the past decade before the Interstate Commerce Commission, Mr. Shriver has represented not only the Baltimore and Ohio Company, but the railroads generally, in their efforts to demonstrate the necessity for increased rates. Last winter when the railroad rate inquiry under the Trans-

portation Act was in progress, Mr. Shriver was general chairman of the Accounting Committees, appearing before the Commission for the Class 1 Railroads of the country as a whole and for the carriers in the Eastern District particularly. Mr. Shriver has also appeared before the Senate and House Committees on several occasions during investigations of the railroad situation, particularly when the question of the return of the carriers to their owners was under consideration, the investigation which resulted in the Transportation Act of 1920.

### Some of the Officers of the New Akron Division

*Cut kindly loaned by the Akron Press*

Reading from left to right, top to bottom: Donald F. Stevens, superintendent; C. P. Angell trainmaster; J. L. Shriver, road foreman of engines; C. F. Farmer division freight agent; E. J. Correll, division engineer; J. A. Tschuor, master mechanic; M. E. Tuttle, division operator

# Increased Forces Now Employed on Railroad as Result of Better Business

*"Bring more furloughed men back to their jobs by getting more business," is slogan which the Management has already put into practical effect*

THE series of "appreciation" meetings conducted with many of our chapters of Veterans by H. O. Hartzell, manager Commercial Development, and G. W. Sturmer, grand president of the Veterans, during March and April, was closed with a meeting at Philadelphia on April 19. It had been the wish of President Willard that he might express in person his appreciation to the Veterans and other employes, who made such a splendid showing during our business getting campaign, but his other engagements made this impossible. He was deeply gratified at the response made to his request that our employes solicit business, ex-officio, for the Road. But he was more deeply gratified because this showing was a notable indication of the loyalty of Baltimore and Ohio men.

Mr. Hartzell, bearing the message of appreciation from Mr. Willard, reported many interesting things which occurred on his trip. On several occasions, for instance, upon hearing the message delivered by Mr. Hartzell, the Veterans moved a rising vote of thanks to be taken back to the president in Baltimore. All along the line it was made most ap-

parent that the tabulation of results accruing from the soliciting campaign, as given in the MAGAZINE, did not represent nearly all of the business secured. It is a safe guess, indeed, to say that instead of the nearly 2500 cars of freight reported on the postcards, there were at least five thousand cars brought to our rails by the interest and work of the Veterans and other employes. Time and again an officer would tell Mr. Hartzell of a movement of considerable size secured by our men outside of the Traffic Department, but never formally reported.

Mr. Hartzell made it clear at the meetings that the Company has done its part in bringing back to work as many men as our increased business would permit, a larger proportion of them, he believed, that that returned to work by any other railroad. And it will be remembered that while he was on the road, in addition to the large number of train service employes called back to work to handle our increased business, our shops at most points on the System were being operated at capacity. Unfortunately, the situation in the coal business since that time has again made it necessary to reduce forces at certain

points. But notwithstanding this the Baltimore and Ohio is still keeping comparatively large numbers of men at repair work.

Increased business is still badly needed on the Baltimore and Ohio, particularly because coal normally bulks so large in our car loadings and because our business in this commodity has been so reduced by the coal strike. But much as we need business from the standpoint of increasing our revenues, we are especially anxious to increase our daily carloads to the extent that more and more men can be put back at regular work. The underlying factors which provide smooth and efficient transportation on the Baltimore and Ohio, track, structures and equipment, are in good shape today and we could handle a much larger volume of business than we now are. But indications that business in general is improving, point to the necessity of complete preparation on the part of the railroads to handle an increasing volume of traffic. Our volunteer solicitors can, therefore, bring many of our employes now furloughed back to their jobs by continuing to get their friends and acquaintances to ship and ride via the Baltimore and

Ohio. For the larger our revenues, the more money will be available to put men back at work.

Interesting as it has been to see in the MAGAZINE reports of business secured by individual employes, it has been decided to discontinue the reports of individual solicitation for the time being. Many of the employes have been adverse to sending in the report postcards because of undue modesty. Others have said that the shippers whom they approached were willing to give us the business asked for but did not wish to put themselves on record in writing to that effect. Finally, Mr. Hartzell found that so much business was secured during the soliciting campaign, but had not been reported, that it made it appear that the MAGAZINE lists were not fairly representative of the work done by employes in all branches of the service and all over the System.

## Being Called a "Street Hound" by One's Sister Isn't so Bad When it Means New Business

*"As much as I hate to do it, I will give this information to you if it will do you any good. However, when any of the railroad street hounds come in this office, they surely do get a cold reception, especially when I am busy. And, believe me, every little old jerk water road in the east has a street hound out here during the shipping season. I did not know if consignees out of Columbus would be of benefit to you or not.*

*Grace."*

THE quoted italics above contain the last paragraph of a letter sent by Miss Grace Smith, traffic manager of the Vegetable Exchange of California, to her brother, Yardmaster L. E. Smith, of Columbus, Ohio. Pretty hard words for a sister to write to her brother, don't you think? But they take on an entirely new complexion to us Baltimore and Ohio folks when we read what preceded them in the letter. Here it is:

Out of Antioch, November 13, SFRD 15148, celery, consigned to Stevens Brothers, Baltimore, Santa Fe, Baltimore and Ohio.

Out of Walnut Grove, November 17, PFE 648, celery, consigned to Bender Streibig Co., Cincinnati, SP E. P. S. W., C. R. I. & P., Baltimore and Ohio.

Out of Antioch, November 15, S. F. R. D. 12768, celery, consigned to J. J. Castellini, Cincinnati, Santa Fe, Wab., Baltimore and Ohio.

Almost every month sees more railroads striving to get their employes interested in the individual soliciting idea started by President Willard on the Baltimore and Ohio. Several of these roads have written to our Management and asked how we did it. It is no secret among Baltimore and Ohio folks that our Veterans have been the backbone of the movement and it is confidently hoped that they will continue to lead the way and even improve upon the good results already achieved.

It should also be remembered that business secured can only be held where good service is provided. This gives many employes, who for one reason or another cannot do as much as many of our Veterans have done in the actual solicitation of business, a chance to do their bit.

Read the interesting business getting article which follows—it is certainly an unusual one.

Out of Antioch, November 14, SFRD 12082, celery, consigned to Louis Meyer, Cincinnati, Santa Fe, Wab., Baltimore and Ohio.

Out of Antioch, November 16, SFRD 8592, celery, consigned to Louis Meyer, Cincinnati, Santa Fe, Wab., Baltimore and Ohio.

All of which means that Yardmaster Smith (who is described in a letter from M. H. Broughton, train master and chief dispatcher of our line between Columbus and Newark, as a "quiet and unassuming fellow, who has, however, succeeded in get-

ting much business and making good friends for our Company") has a sister, Miss Grace Smith, the traffic manager of the Vegetable Exchange of California. And "Brother" Smith, becoming imbued with the business-getting spirit of Baltimore and Ohio folks, wrote "Sister" Smith and asked her to favor us in routing via our line the many carloads of fine vegetables that her company ships across the continent to the fastidious markets of the east. The result is a stack of postcards which have been sent to the MAGAZINE office by Superintendent Kruse and Mr. Broughton, on each one of which is the good news that Miss Grace has remembered her brother's request and forwarded another car or two or three for partial routing, and usually delivery via Baltimore and Ohio.

The first letter on this case left the office of Mr. Broughton on December 4. In the next month or so post cards reached the MAGAZINE office in such numbers that we now have quite a respectable pile of them. And the last letter that Mr. Broughton sent us on March 22, was concluded, "It is gratifying to know that the carloads of vegetables sent by Miss Smith, at her brother's request over the Baltimore and Ohio, continue to move over our line."

Now, Miss Smith, when you get tired of poking fun at your brother for playing the role of "street hound" ex-officio, you can start calling any number of appreciative Baltimore and Ohio folks in the east any names you wish, just so long as you continue to be the really splendid sister and business woman you must be, and place on your routing orders the magical "Baltimore and Ohio" that means so much to us. Here's to you!

L. E. Smith, general night yardmaster, Columbus, Ohio, and his sister, Miss Grace Smith

# "This Ice Cream Was Never Made with Cream —It Was Made with Brains," Said Lady Astor, at Lunch on the Baltimore and Ohio

On April 22 Miss Stevens, associate editor of the Magazine, was in Philadelphia on business. It was pure good fortune that she had the opportunity to meet Lady Astor at lunch on our train No. 1, returning to Baltimore. On the day following she wrote her father of her experience and in no better way could we tell the little part that the Baltimore and Ohio has played in the wonderful greeting and hospitality that Americans have shown this distinguished Anglo-American woman, than by reprinting Miss Stevens' letter verbatim.

The Baltimore and Ohio can, by the way, claim a sort of kinship with Lady Astor, for her father, Colonel Langhorne of Virginia, and known among railroad men as "Chilly" Langhorne, was a contractor who had charge of the building of quite a considerable part of our right of way. Famous in her 'teens as one of three beautiful sisters, Nancy Langhorne is now the titled mother of six children, the first woman who was ever elected to the oldest representative political body in the world, the British House of Commons, and since her recent arrival in this country has delighted thousands of Americans not less with her rare good sense and wit than with her beauty and charm of manner.

Miss Stevens' letter to her father follows:

Mt. Royal Station,  
Sunday Afternoon,  
April 23, 1922.

*Mon chere Pere:*

You know I use that title only when I want to tell you some 'special' good news. I can hardly wait to tell you this. Oh, if you only knew how excited I am after the adventures of yesterday! I can almost hear you laughing and saying that you bet that I had a visit from Lady Astor. Well, old guesser, you may bet your last collar button that you're not far off the track.

On my way home from Philadelphia yesterday I purchased a reservation for the chair car, and the big surprise came when I found myself right in the midst of the Astor party. You may know that I pinched myself because of the good luck that I had to fall into a thing that I probably could not have hit upon had I tried my best to arrange for it. "Here's luck," said I to myself, "and a chance to get something for the MAGAZINE, so go to it." I went.

No, I did not interview her. There were enough reporters on hand already, and I knew that what she was saying was only what she had already given out to the reporters in New York. Moreover, I thought that since she had shown her excellent judgment in riding on the Baltimore and Ohio, we ought not to bother her any more than we could help. However, I felt in my bones that there was something more than the

ordinary coming to me, so I just sank down into the big chair and waited, with one eye out of the window, and the other everywhere. I tried to figure out which one of the women in the car was Lady Astor. No one of them looked particularly like the pictures that I had seen of her, but I had just decided on a very good looking woman with light hair, when I heard a voice saying,

"Oh, dear Lord Astor, won't you please let me get a peep at Lady Astor—just a tiny peep?"

Then I looked up just in time to see a tall man in a gray suit and cap, with a mustache and brown eyes, laughing at the little lady who was a reporter for one of the Baltimore newspapers.

"No," said my lord, as he kept his hand on the knob of the door which led to the compartment, "for you see, if I should let you get your head inside I should not be able to close the door without breaking your neck—and that would certainly be a catastrophe."

Then I knew that I had not yet seen Lady Astor. Pretty soon her secretary arose from her chair and started for the compartment, followed by an army of reporters.

"Don't follow me," she was begging them, "Don't, I say I don't want you to follow me!" and she stamped her foot to emphasize her displeasure. But on they came, like the valiant Six Hundred, and it was only after she had ducked behind Lord

Astor and a tall man from Massachusetts that she managed to get into Lady Astor's compartment.

The excitement died down, and I buried myself in my newspaper, becoming so engrossed in it that I did not even notice the people who were passing by on their way to the diner. It was perhaps ten minutes later when I began to feel the pangs of hunger "stirring my innards," as old "Bill" Foote used to say, and I remembered that the Baltimore and Ohio carried on its trains such appendages as dining cars—"business getters" I call them. You'd say that, too, if you came up this way very often. Anyway I walked back there, only to find the diner filled. I pulled my belt a little tighter and started back, when the steward called me.

"Here's a seat, Miss," he said, and escorted me to the other end of the diner, where I sat with three others—a lady and gentleman on the side opposite me, and an elderly lady on my right. From their English accent I knew them to be members of the Astor party, and I casually raised my eyes to meet the laughing eyes of a woman who held one of our famous corn muffins in her hand.

"Nancy," said the one who sat at my right, (but she pronounced it Noncy) "do you call those cakes or biscuits?" The merry-eyed woman laughed, and in a mellow voice found only in the South, replied,

"Well, I suppose they call them cawn (corn) pones—but oh, they are such polite little cawn pones. They ought to see the cawn pones, the real ones, that we have in Virginia—made of real yellow cawn meal. But I rather like these little polite ones, don't you?"

Mon Pere, I laid down my fork, and in true Baltimore and Ohio form, I STOPPED, LOOKED AND LISTENED!

Of all things. The man was Lord Astor, and the lady of the "cawn pones" was none other than the famous Nancy Langhorne, Southern beauty, now Lady Astor, Member of Parliament! Such luck, and to me who only expected to catch a glimpse of "my lady passin' by," and she sitting opposite me with only a tiny dining car table between us! I've been trying to figure it all out ever

since I got back. Uncle Joe says it was because the Lord was with me—I guess he means Lord Astor.

We were getting into Newark, Delaware. "Oh, see the boys playing at cricket!" said the lady at my right, who was a member of the party.

"No," replied his lordship; then turning to me he asked, "That's baseball, isn't it?"

"The great American game," I told him. And then they wanted to know more about Delaware University, baseball, the town of Newark, the elm trees, and several other things which I was so glad that I was able to tell them.

"Yes, yes," said Lady Astor, "I remember Delaware College as it used to be, but oh, I love Hopkins." And as she gazed out of the window, I could fancy that she was thinking of the pranks that she used to play at school.

"What small houses!" quoth his lordship. "They look as though one might pick them up and carry them down the street."

"They did that once," I told him. "I saw some inhabitants of the town set a house on rollers and roll it down

College Avenue and through the main street of Newark." He laughed heartily as he swallowed the last crumb of his planked shad. At this moment our woman passenger representative, Miss Gessner, came forward and gave me the proper introduction to the three.

"An editor!" exclaimed Lady Astor "An editor, did you say? Heavens, and you'll have me in your paper, won't you? I had no idea I was talking to an editor. Why you're the worst people! We don't mind reporters, they usually get things straight, but deliver me from you editors. You're the ones who always twist things up and change what the poor reporters have written. You're the ones who let us down! What *have* I said that you shouldn't hear?" Then seeing the expression on my face, she continued, "Oh, I have no doubt but that you'll get it straight, but I'm afraid only that you'll tell too much. Only one time that I remember, an editor got something straight, but even then he didn't tell it all. He told a yarn about me, picturing me as a brilliant, dashing young woman, riding a fiery steed

named Badger, a horse that nobody else would dare to ride. Ha! Ha! If he only could have seen that horse! Why, the only reason that nobody else would ride him was that his knees were so old and wobbly that they looked like this." Here she spread out her hands to represent a circle of the size of a dinner plate.

Lord Astor had left the table for a moment. The waiter came in with the ice cream.

"Didn't de gentleman want no ice cream?" he asked anxiously.

"You bet he wants it," declared my lady, "Why he'd kill you if you cheated him out of it, the way that man loves ice cream. This looks delicious, too." When her husband returned, the waiter came with the cream and coffee.

"Ah," said his lordship, beaming down upon the ice cream in a manner that reminded me of some nice, big, house cat getting his back scratched, "isn't this great?"

"Ice cream!" exclaimed Lady Astor, after the first spoonful, "Such ice cream! Oh, but you will love this! Why it is positively the *best* ice cream I have ever tasted. Why,

THE ARRIVAL OF LADY ASTOR AT MT. ROYAL STATION, BALTIMORE

Left to right: Mrs. Sydney M. Cone, secretary of the Pan-American Conference of Women; Lady Astor; Mrs. John J. Garrett, her host in Baltimore; Miss Mabel Gessner, passenger representative; Lord Astor. Lady Astor graciously said that the pictures of her taken by George B. Luckey, official photographer of the Baltimore and Ohio, and of which this is one, are the best that she has had made since her arrival in America. She ordered a dozen of them

this was never made with cream, it was made with *brains*. How did they ever make it?"

"Nancy," said Mrs. Littleton, the lady on my right, "you should have gone down to the East Side of New York with me yesterday. It was certainly interesting—and pathetic, too, to think of all of those thousands of little foreigners, having come here from Europe—all learning to be Americans."

"Yes, I am sorry that I did not," returned Lady Astor. "Oh, but you must tell this editor about your little Italian boy. It will make a good story."

"A friend went with me to East Side, New York," said Mrs. Littleton. "We came across a bright looking youngster, an Italian boy, and stopped to talk with him. His father came up.

"I suppose you're proud of this boy!" said my friend, "he's a bright boy. What is his name? Antonio?"

"Oh, no, no," replied the father, "heem a good 'Merican, heem name SECOND LIBERTY LOAN Toretto."

Lady Astor laughed. "That's as bad as the old colored woman down in Virginia who named her boy 'Chesapeake and Ohio,' after the Chesapeake and Ohio Railroad."

"By the way," asked her companion, "do you remember Miss Blank?"

"Yes, whatever became of her?"

"Why, she is down in the South. She's doing some literary work and she wanted to study the southern negro."

"Study them!" exclaimed Lady Astor, "study them, did you say? My dear child, she ought to know that you can't *study* those people. Why you've got to *grow up* with them!"

Here the waiter came with the finger bowls and the mints.

"Oh, what is this?" she asked, fairly pouncing upon the little package of mints.

"That," explained Lord Astor, "is a little gift from the Baltimore and Ohio. Read on the outside of the package." But Lady Astor already had one in her mouth.

"How lovely!" she exclaimed, "I'm going to eat only one and I'll take the rest along with me. Oh, I do love a gift, I don't care if it is only a package of mints."

\* \* \* \*

Now, Mon Pere, if you can beat that, go ahead. If you haven't grown tired of reading this, let me know, and the very next time that I dine with English nobility I'll send the letter C.O.D., for I am quite sure

that I can never send this one for two cents. By the way, if you haven't been cured of that grouch of yours about women not being able to take a hand in the affairs of the Government, you ought to take a run up here and see what the National League of Women Voters is doing in Baltimore this week. One more week like this, and you may see your daughter making stump speeches down in Anne Arundel. Never mind,

Old Hoss, maybe the next president will be a democrat and eggs will be selling at ten cents per dozen.

I'm off to Connellsville, Pa., tonight. I've a lot more to tell you, but must stop and go to work now.

I hope that your rheumatism is better and that you are all feeling fine and fit.

With much love to all, I am  
(Signed)

Your Militant Margaret

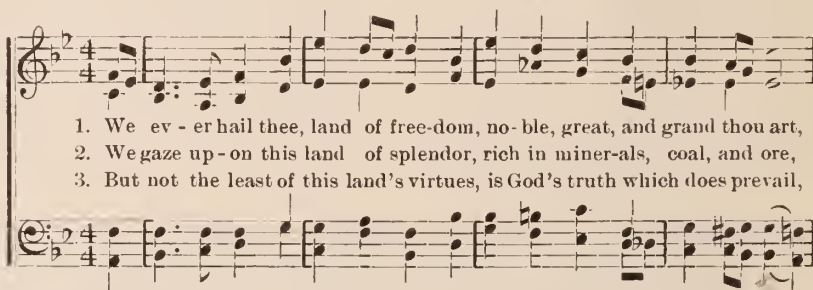

### A Beautiful Hymn of Patriotism

We print below as being appropriate to the celebration of Memorial Day and Independence Day, now near us, this new patriotic hymn. The words are by Charles H. Minnich, correspondent of the Magazine at East Side, Philadelphia, and the composer is Raymond Maxson, well known organist of Philadelphia. The hymn is beautifully harmonized and can be used to advantage at meetings of our employes, and particularly at patriotic and memorial services. A limited number of copies is available and may be had without charge upon application to the Editor of the Magazine.

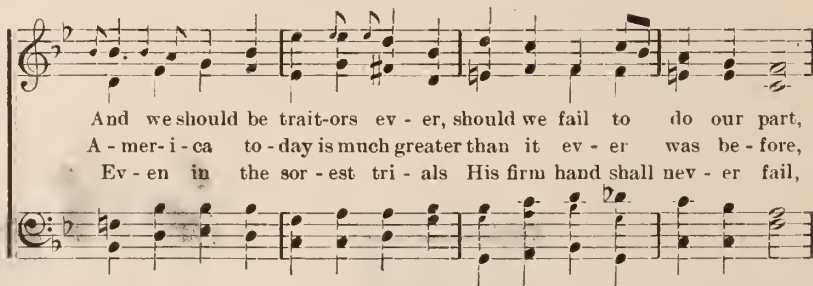

### Our Glorious Country.

Words by CHAS. H. MINNICH.

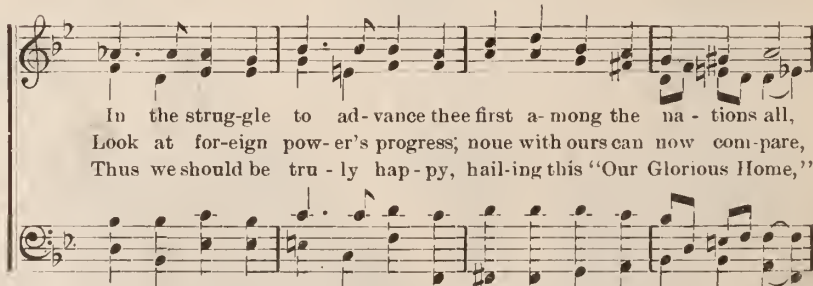

Music by RAYMOND MAXSON.

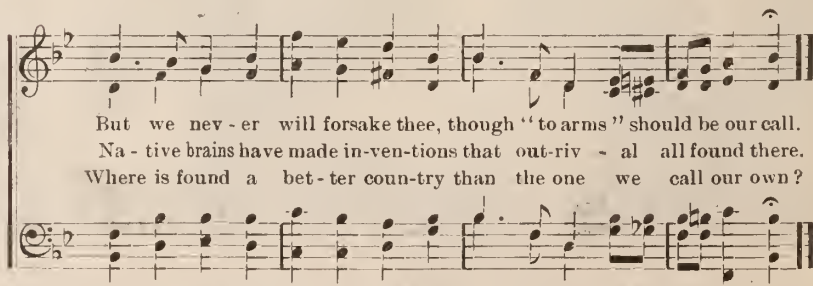

1. We ev - er hail thee, land of free-dom, no-ble, great, and grand thou art,  
2. We gaze up-on this land of splendor, rich in miner-als, coal, and ore,  
3. But not the least of this land's virtues, is God's truth which does prevail,

And we should be trait-ors ev - er, should we fail to do our part,  
A - mer - i - ca to - day is much greater than it ev - er was be - fore,  
Ev - en in the sor - est tri - als His firm hand shall nev - er fail,

In the strug-ple to ad-vance thee first a-mong the na - tions all,  
Look at for-ign pow-er's progress; none with ours can now com-pare,  
Thus we should be tru - ly hap - py, hail-ing this "Our Glorious Home,"

But we nev - er will forsake thee, though "to arms" should be our call.  
Na - tive brains have made in-ven-tions that out-riv - al all found there.  
Where is found a bet - ter coun - try than the one we call our own?

# Cumberland and Baltimore Division Engineers and Firemen Making Good Fuel Records

By L. Cramblitt,

Road Foreman of Engines, Cumberland Division

ON April 4, eastbound trip, Cumberland to Philadelphia, No. 14, engine 5227, with Engineer J. R. French and Fireman H. A. Giffin (Cumberland to Washington), and Engineer A. W. Ecker and Fireman H. E. Burgee (Washington to Philadelphia), in charge, made a splendid fuel record. No record was kept of the number of shovels of coal required to keep fire alive from the time the engine left shop until the train left the station. On the road the following performance was made:

The capacity of the tank is 16 tons. On arrival at Philadelphia, the engineer, fireman and Master Mechanic Hines estimated there were five tons of coal on the tank.

On April 5, westbound trip, Philadelphia to Cumberland on No. 13, engine 5227, with Engineer A.

McGarr and Fireman C. F. Schlutter (Philadelphia to Washington), and Engineer J. R. French and Fireman H. A. Giffin (Washington to Cumberland), in charge, another good record was made, as shown in table below. Fifty three shovels of coal were consumed from the time the crew took charge of the engine at the shop until the train left the station, to keep fire alive.

The cause for using such a large number of shovels of coal on west-bound trip, was due to one row of arch brick falling in on right side, on the Washington Branch, which caused fire to clinker on that side.

Shop to station.....	53	shovels coal;
Philadelphia to Baltimore....	18	cars; 405
Baltimore to Washington....	19	" " 3.5 lbs. per car mile
Washington to Cumberland....	14	" " 4.0 " " " "
		" " 6.2 " " " "
Philadelphia to Cumberland.....	1528	" " No. 3 shovel: 15 lbs. per shovel

Cumberland to Washington..	21	cars, 692	shovels coal, 3.2	pounds per car mile
Washington to Philadelphia..	19	" 606	" " 3.0	" " " "
Cumberland to Philadelphia..	1298	"	"	" No. 3 shovel, 15 lbs. per shovel.

It was necessary to break clinkers and pull them, with the arch-brick, to the back part of fire-box. This caused engine to burn more coal. Fireman Giffin did not use a full shovel of coal, which also contributed to the greater number of shovels west of Washington. On arrival at Cumberland it was estimated that there were five tons of coal on the tank. No coal was taken on the trip

## Samuel H. Jewett Promoted to Division Accountant, Akron Division

SAMUEL H. JEWETT entered the Baltimore and Ohio service on June 15, 1902, as a clerk, and was advanced successively to the positions of timekeeper, assistant shop clerk, shop clerk and division accountant.

The new division accounting office which he will head ranks in size and importance with those of first grade.

Division Accountant S. H. Jewett

One Gross Ton hauled One Mile makes One Gross Ton Mile (G.T.M.)

A Train of 2000 Gross Tons hauled 100 miles makes 200,000 G.T.M. If it takes 20 tons or 40,000 lbs of coal, the fuel performance is 200 lbs coal per 1000 G.T.M.

If 15 fewer scoops (200 lbs less coal) were used to make the 200,000 G.T.M., or a total of 39,800 lbs. coal, the fuel performance would be 199 lbs coal per 1000 G.T.M. and an average fuel saving of this amount (1 lb per 1000 G.T.M.) on the business of a year like 1921, would mean a saving of \$46,500 to our Company. This is equal to the interest on \$775,000 at 6 per cent.

If we had this saving we could buy 400 new freight cars or employ 200 more skilled mechanics for a year.

It is estimated that with the help of EVERYBODY, and it is EVERYBODY'S job, the fuel saving in freight service for the year 1922 will be 5 times 1 lb per 1000 G.T.M. LET'S GO!

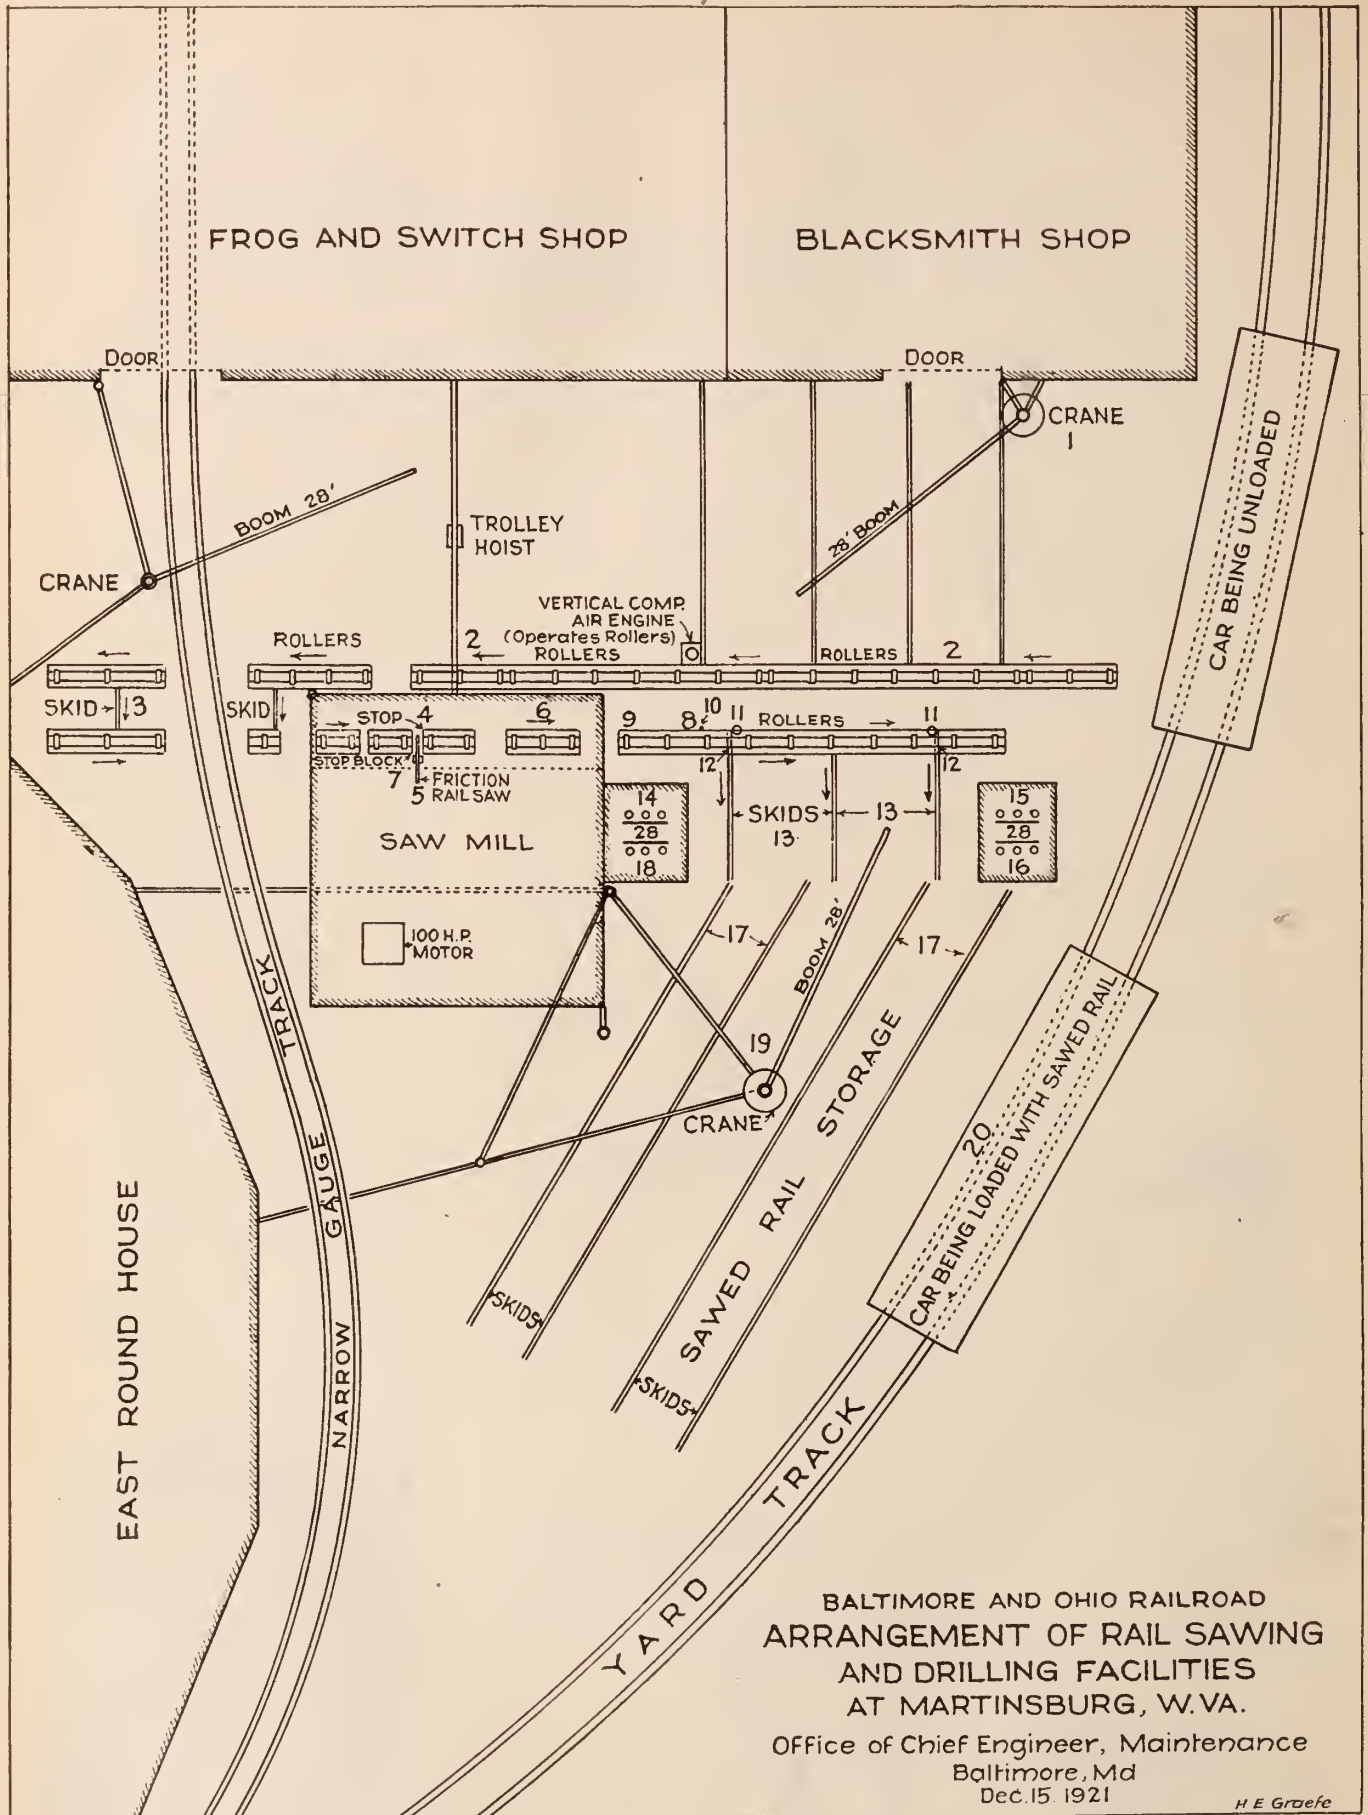

P.S. Next Month "the coal bill and the Passenger Car Mile."

# Reclaiming Rail at Martinsburg Shop

*A Compact, Efficient Plant Which is Doing its Bit of Sawing and Saving*

By S. C. Tanner, Superintendent Shops, Martinsburg, W. Va.

AT the Maintenance of Way Reclamation Shops located at Martinsburg, W. Va., a plant has been installed to reclaim worn and damaged end rail from line of road where it has been replaced by new rail. The detail of procedure in reclaiming such rail is as follows:

After loading the rail on line of road into gondolas or flat cars, it is shipped to Martinsburg. It is then placed under crane No. 1 which lifts the rails from the car and places them one at a time on line of rollers No. 2. These rollers operate by pneumatic power and the rails pass to the far end of the line of rollers automatically. At that point the rails are transferred on declining skids across onto line of rollers No. 3, which are operated the same as rollers No. 2, but in reverse movement.

The rail is then moved automatically until the end strikes stop No. 4 when a 54" friction saw No. 5, electrically driven, moves up and cuts one end of the rail off in 14 seconds. The saw is then moved back in the clear. No. 4 stop is turned back, permitting the rail to pass the saw and from No. 3 rollers onto No. 6 rollers, which move the rail past stop block No. 7. Roller No. 8 is then forced up against the rail by a lever on an eccentric shaft and the rail is moved back on this roller until the end of the rail strikes against stop No. 7, at which time friction saw No. 5 moves up and cuts off the other end of the rail.

Roller No. 8 is then dropped and roller No. 9 is forced up against base of rail, which moves the rail on rollers No. 6 to an equal distance between drill presses. Compressed air is then turned on by the four-way valve No. 10 into small cylinders No. 11, under skids No. 12, hinged at one end. The air cylinders force the free end of these skids upward and dump the rail off onto skids No. 13.

The rail is then moved by man power into drill press No. 14, and the other end of next rail into drill press No. 15 after one end of rail has been drilled in drill press No. 14. The rail is then moved to drill press No. 16 and the other end drilled; then dumped off onto skids No. 17. After one end of rail has been drilled in drill press No. 15, it is moved to drill press No. 18 and, when drilled, it is dumped off onto skids No. 17. This arrange-

ment provides for the drilling of one end of four rails at one time. The actual time required to drill three 1 $\frac{3}{8}$ " holes in one end of 100 RB rail is an average of 37 seconds.

After the rails have been sawed and drilled and dumped off onto skids No. 17, as explained above, they are picked up by crane No. 19 and loaded into car No. 20 ready for shipment. It is, therefore, a continuous movement of the rail from the time it is unloaded by crane No. 1 until it has been reloaded by crane No. 19 and is ready to go back on line of road. The largest number of rails so handled in one eight hour day was on August 27, 1921, when the total was 310.

The saw and drill presses are operated electrically in separate units. The cranes, hoists and rollers are operated with compressed air of 95 pounds pressure. It will be noted in the photographs that the cranes are of the jib crane construction with a 12" "I" beam boom 28' long, which is arranged to swing 180 degrees. On the boom is mounted a pneumatic trolley which supports a one ton pneumatic hoist. At the heel of the boom is a small platform for the crane operator to stand on, which is so arranged as to place the operator out of danger should an accident to the hoist occur, and to permit him to be in a position at all times to have a clear, unobstructed view of the operation of the crane.

Small closed link chain No. 21 is used to operate the valve of the hoist and No. 22 to operate the valve of the trolley. By the use of small pulleys these are so arranged as to form an endless chain passing the operator's platform, one to his right and one to his left. By a slight pull downward on the hoist chain, the load will lower, and by a slight pull upward on the same chain, the load will rise. The chain on the trolley is operated in the same manner—by pulling down on the chain the trolley will move rapidly on the boom in the direction of the mast. In pulling up on the chain the trolley will move out on the boom from the mast.

Hose No. 23, which supplies air to the hoist and trolley, passes over a fixed sheave wheel at the heel of boom, with a loose sheave wheel No. 24 counterweighted on the hose and so arranged as to automatically

keep the hose in proper position at all times, regardless of the location of the trolley and hoist on the boom.

An air cylinder, No. 25, is securely fastened to one of the stiff legs of the crane and is equipped with a rack extension on the end of the piston rod of the air cylinder. This rack engages in the teeth of a 36" gear wheel No. 26, which is made fast to the mast of the crane. An air line connects each end of the cylinder with a four way valve No. 27, which is located directly in front of the crane operator. By operating this valve the crane will turn around in either direction at the will of the operator.

The drill presses are protected by small steel buildings No. 28, with sides and ends made of a double hinged door, so arranged as to be folded up as shown in photograph No. 29, and providing an awning over workmen when plant is in operation. When the day's work has been finished the folding doors are closed down and hooked across the corners on inside and provide a strong fireproof building over the machines.

When new, the friction saw used for sawing rail at this plant is 3 $\frac{3}{8}$ " thick and 54 $\frac{1}{4}$ " diameter. A test was made of the saw starting July 23 and ending October 7, and it was then removed on account of a defect. But during the time it was in service between these dates the saw made 21,190 square cuts on reclaimed or short end rail, and 2,220 cuts of various angles on rails for use in constructing frogs, crossings and switches, or a total of 23,410 cuts, most of which was 100 pound RB rail. On removing the saw from the machine, the diameter was again measured and found to be 53 $\frac{1}{2}$ ", a reduction of  $\frac{3}{4}$ " in diameter of the saw after making 23,410 cuts.

I attribute the small amount of wear of the saw to the large volume of water used on it when cutting rail, as will be noted in photograph. The power used to feed the saw into the rail is hydraulic pressure and is therefore gradual and uniform. This, without doubt, is of much value in the life of the saw.

The force employed to operate this plant is as follows:

- 1 rail saw supervisor
- 1 sawyer
- 4 drill pressmen
- 1 drill grinder
- 2 men operating hoist, 1 at each crane
- 4 men, 2 at each crane to hitch on and handle rail
- 4 men on skids to place rail in drill presses
- 4 men, 2 on each side of saw to handle rail.

The largest amount handled in any one day, was on August 7, 1921, when in eight hours 310 rails were unloaded,

sawed, drilled and loaded at a cost of \$0.67 per ton. During the month of August, 1921 a total of 17,332 lineal

feet of rail was sawed and handled at the plant at a cost of \$1.01 per ton, including all overhead charges.

## The Need for Sanity in Exercise

*One of a Series by Life Extension Institute Containing the Latest and the Most Scientific Information on Healthful Living and the Prevention of Disease*

RECENT press reports have stated that Clemenceau, the Tiger of France, had reduced his weight 30 pounds by exercise. We have not verified these reports, but we are prompted to comment on the discussion that followed their publication. It was stated that this news had aroused many elderly heavyweights in New York City to a consciousness of their surplus stores of fat and that there was a rush to the gymnasiums for relief.

This would indeed be very terrible news, if true. An epidemic of strenuous exercise among puffing, perspiring fat men would undoubtedly contribute materially to the death rate. Exercise is indispensable to good health. Even a sick man, prostrated and bedridden by heart disease, requires a certain amount of exercise; all that his circulation can bear. Otherwise the heart muscle will become still further enfeebled, just as the other muscles of the body become flabby and lose their power through disuse. Exercise, properly directed, cannot be left out of a sane health program.

It is a very different matter, however, to rush off to a gymnasium with a fierce determination to fight fat by strenuous exercise. In these days when many people are nervous about restrictions of personal liberty, we hesitate to suggest any legal restraint in this matter, but there is quite as much reason for requiring that any gymnasium director or physical trainer should be forbidden to exercise any individual with a view to remedying any abnormal condition, unless a physician's certificate is presented indicating the scope of exercise that is safe in a given case, as there is to restrict the prescription of drugs by a layman. A number of conservative trainers and gymnasium managers

require such a certificate, and we have no hesitation in urging that any one contemplating an exercise course or gymnasium work should have a thorough physical overhauling before undertaking such a program. This applies to everybody, regardless of apparent physical condition. In the case of elderly stout men it would be about as safe to drink water suspected of typhoid contamination as to plunge into strenuous gymnasium or athletic work without first securing an expert opinion as to the condition of the circulation, of the kidneys, the arteries, blood vessels, etc. Even a careful medical examination of an elderly person cannot give absolute assurance that there is not some latent weakness or arterial change that would render heavy exercise dangerous. Hence, even if given a good medical report on the physical condition, it is very wise not to seek out these weak spots by means of exercise pushed to extremes which are wholly unnecessary.

The first thought of the middle aged or elderly heavyweight should be as to his diet. It is usually such a simple matter to adjust the diet for a gradual reduction of weight, that these strenuous campaigns, apart from their dangers, involve a wholly unnecessary penance in the matter of time and money. If the weight comes down through the judicious concentration of dietetic indulgence on low caloric foods, such as green vegetables and fruits, and a conservative attitude toward fat-forming foods, such as bread and butter, pastries, sugar, and the like, the exercise can be gradually increased to a point where it is fairly vigorous, and will materially aid not only in keeping the weight down, but the spirits up.

It is far from our wish to decry ex-

ercise as a helpful measure in weight reduction and in keeping the whole life in equilibrium. There must, however, be a reasonable sense of proportion in this matter, or exercise will do more harm than good, especially among elderly heavyweights.

There is no single track road to health and long life. Each phase of hygiene must be practiced in a rational way or the program may be a failure. For example, a man may by very strenuous gymnasium work succeed in getting his weight down. If he follows some magic system of exercise to a point that brings about any material reduction in weight, and does not regulate his diet, he will simply exhaust himself fighting enemies of his own creation. Let the young man beware that he does not accumulate this overweight which presents such an embarrassing problem at middle life and later. It is easy by the formation of proper dietetic habits in youth and reasonable attention to exercise, to prevent the accumulation of weight. This is one of the simplest ways in which young people can protect their future.

Coming back to the elderly heavyweight, there are so many possibilities of physical impairment of various kinds at middle life and later that, apart from the possibility of overstraining the heart in asking it to respond not only to heavy exercise but to the extra work involved in pumping the blood around for a fat man, that exercise in these subjects should be planned only after a critical overhauling of the whole body. There may be infection, or poisoning, or physical defects which place a very definite limit on the exercise excursions of such an individual.

These simple principles hold good for every phase of hygiene, whether it relates to diet, exercise, mental hygiene or to special lines of medical treatment; in fact, any plan or measure that is proposed for the prevention or cure of human ills. The whole body and the whole life must be considered and the campaign for health planned just like a military campaign, with as complete information as possible regarding the position of the enemy and in accordance with sound strategic principles of warfare. Brilliant side skirmishes may only invite disaster if the whole battle is not well planned.

We could name some statesmen in this country who have taken off a great deal more than 30 pounds in weight, adjusting mind and body to meet tremendous responsibilities by these sound and rational measures, without resort to any extreme or spectacular methods.

### Traditions Broken at Unveiling of Statue of Joan of Arc

*Beautiful Ceremony Focuses Attention of Two Continents on Capitol City and the Woman it Honors*

ON January 6, last, in Meridian Hill Park, Washington, D. C., the statue of Joan of Arc was unveiled. It is a replica of the masterpiece of Paul Dubois, the celebrated French sculptor, which stands before the Rheims Cathedral and which came unscathed through the fire of German guns for more than four years.

*Le Lyceum Societe des Femmes de France a New York*, through the untiring efforts of its distinguished founder and president, Mme. Carlo Polifeme, was instrumental in bringing into being this new mark of friendship between France and the United States.

By his presence President Harding honored the ceremonies incident to the unveiling, and Mrs. Harding and Mme. Jusserand, wife of the French Ambassador, drew the silken cords which released the large French and American flags concealing the statue, while a salute of 17 guns was fired by a battery of U. S. artillery from Fort Myer. This salute is one accorded only to field marshals, but through a special Act of Congress it was given on this occasion for the first time in history to a woman.

The church bells of the city lent their voices in ringing harmony while the Marseillaise and the Star Spangled Banner were being played. American soldiers and sailors formed a guard of honor, the French and American colors fluttered in the breeze on all sides, and standard bearers carrying the Joan of Arc and Cross of Lorraine banners, were grouped about the statue, a brilliant picture in the afternoon sunshine of a perfect day.

Mme. Carlo Polifeme presented the statue, and said in part: "For liberty and peace Lafayette brought you his sword; for peace and justice Jeanne D'Arc brings you the inspiration of her undaunted courage and love of country."

The Honorable John Weeks, secretary of war, accepted the statue for the Government and the City of Washington. He compared the deeds of Joan of Arc with those of Washington and Lincoln and called the event

another evidence of the lasting friendship between the peoples of the two great republics.

Dedicated to the women of America by the women of France, in a spirit of love and understanding, the statue was accepted in their behalf by Mrs. George Maynard, minor president-general of the Daughters of the American Revolution. Then the French Ambassador, Mr. Jules Jusse-

rand, told the fascinating history of Jeanne D'Arc, one day a peasant girl and the next the liberator of France, greater than generals in her simple faith, her career unique in the history of the world.

A special car attached to the train leaving New York via the Baltimore and Ohio Railroad, at 2.25 p. m. on January 5, conveyed the delegation of *Le Lyceum* to Washington. The trip was a most enjoyable one. The Baltimore and Ohio had also transported the statue of Joan of Arc, and *Le Lyceum* was highly gratified at the special care given it.

While in Washington *Le Lyceum* paid an official visit to the Lafayette Statue and there placed a wreath. They also went to Mt. Vernon and laid a wreath on the tomb of Washington. They paid their respects at the Lincoln Memorial and at the tomb of the Unknown Soldier.

This Dubois replica of the famous statue of Joan of Arc was placed in Meridian Hill Park, Washington, D. C. on January 6. The original stands in front of Rheims Cathedral in France and came unscathed through the four year bombardment of the cathedral by the Germans

Members of the Oxford-Cambridge Lacrosse Team who are touring the country. 1. Lord Wansborough. 2. F. L. Neylan. 3. Captain H. O. Hopkins, Oxford, England. The party was escorted from Philadelphia to Baltimore by City Passenger Agent G. P. Clifton, Philadelphia. Mr. Clifton stands fourth from the right

## John E. Warner, Dean of Theatrical Managers, Recalls the Courtesy of Railroad Men of Past Generations

*Veterans of Baltimore and Ohio May Remember Him*

THE quips on the "B. & O." that used to be so common in stage raillery are so pointless in the face of our present splendid service, as hardly to get a laugh out of an audience. Even in the old days they were often misunderstood. The "B. & O." was the road best known to the theatrical profession and the time worn jokes were usually told merely in the spirit of friendly banter.

For many years Mr. John E. Warner was considered the dean of theatrical managers. He was associated with the strongest firms who took "long chances" in theatrical productions, and was the manager for all of the noted stars of his day.

As far back as the Centennial Exposition, held at Philadelphia in 1876, Mr. Warner was manager of "Around the World in Eighty Days," which had a phenomenal run at the Walnut Street Theatre. During the World's Fair at Chicago Mr. Warner was associated with Messrs. Abbey, Schoefel and Grau as manager of "America," which was put on at the Auditorium Theatre, and the house was sold out to capacity for two performances each day during the exposition. He was also manager for Edwin Booth, Henry Irving, Ellen Terry, Lillian Russell, Richard Mansfield, Fanny Davenport and many others who have made the history of the American stage.

The many railroad friends of Mr. Warner will be interested in reading the following excerpts from a letter received from him at Alameda, California, a short while ago:

"A decided thrill of pleasure passed through my anatomy as I read your delightful missive of the twentieth ultimo.

"Living here in quiet seclusion the past five years I had become reconciled to the idea that I 'was out of sight and out of mind' to the remaining few who had known me in the years agone. Nearly all of the old familiar faces have

Gone before,

To that unknown and silent shore.'

"I think there are not more than two or three of my early professional acquaintances still gracing the earth. Several of a later date still linger, but nearly all of those who are now directing or announcing coming theatrical events are new comers since my day, who never dreamed that this swirling sphere ever held such a creature as me.

"In July I shall be seventy-five years old, a period of life when one, in spite of his disposition, in hours of silence and solitude often harks backward betimes:

'O, there are voices of the past,

Links in the broken chain.

Wings that can bear me back to times

Which cannot come again;

Yet God forbid that I should lose

The echoes that remain.'

"You and the other railroad boys I knew I hold in near and dear remembrance. There were a goodly number of them about the country whom I dearly loved to meet from time to time, and your invariable courtesy and kindness revive memories to be revered 'while the lamp holds out to burn.'

"I doubt if I shall ever get East again. I never want to see any more ice; nay, nor the 'beautiful snow.' I crave warmth and sunshine, and only find comfort when basking in the latter. Still, no one can tell what a day may be forth, for, as you know,

'This world  
Is full of change, change, change—  
Nothing but change'

"It rejoiced me that you said in your letter you would be glad to meet and hold communion with me. Alone, as it were, here, far away from those gone glimmering, and the few still left, though I know not where, I rally anew over kind words from friends of yesterday."

### Bouquets for Courtesy

"Just a few lines of praise for your wonderful service rendered to the Billy Watson Company while travelling on The Baltimore and Ohio Railroad. I will state that I got everything that was promised to me on giving you the movements from Brooklyn, Philadelphia, Baltimore, Washington and Pittsburgh. We were offered every convenience by the different train crews and must say that we were treated like human beings.

"Hope you get all the Companies that make this move with continued success for your Railroad."

\* \* \* \*

"I beg to hereby express my profound thanks for the minute attention and warm courtesy extended by you to Vice Admiral H. Saito and his suite of the Imperial Japanese Training Squadron on the occasion of their trip made on the lines of The Baltimore and Ohio and Lehigh Valley Railroads.

"Permit me to add that their Imperial Highnesses, Prince Kacho and Prince Kuni, who travelled with the Admiral, enjoyed the journey immensely."

Have you gotten YOUR passenger?

# Safety Section

## Fifty Seven Years of Hazardous Work in Safety

*Lineman William Henry Miller Is Robust and Hearty on His Pension Day*

ONE of the most remarkable service records that has ever been made on the Baltimore and Ohio or any other railroad, is that recently concluded by William Henry Miller of the Telegraph Department. For 57 long years Mr. Miller did a man's job, day in and day out, and seeing him now makes one feel that he is good for another quarter century of active life, though retired on a pension. Superintendent Plumly of the Telegraph Department, has always regarded Mr. Miller as a model example of the efficient and faithful employe.

Mr. Miller was born on November 14, 1850 at Woodstock, Howard County, Md., and was first employed when but a lad of 14 as a water boy by the Baltimore and Ohio. Later he entered the Telegraph Department as a lineman and continued as such until he was retired on February 1, last. In 1883 he and Miss Mary Francis Bodka of Lonaconing, Maryland, were married, and they have eight children, five sons and three daughters.

Mr. Miller must have been one of the original Safety men, and this,

years before the active Safety propaganda that we know, had gotten under way. For the work of lineman in the Telegraph Department is known to be hazardous work for a man who is willing to take the slightest chance. The regular tasks of repairing broken lines and placing new poles, with the necessary climbing and making fast of wires when high above the ground, were in themselves fraught with danger. Then

came also the fierce storms, when the wires came down and with the difficulties brought by inclement weather, high winds and driving sleet and snow, came the extra hazard of icy lines and poles, enough to give pause to the most courageous man.

But Mr. Miller has given ample proof that even this dangerous work can be performed in Safety by the Safe man, for he has never had a serious accident. Our picture gives but an inadequate idea of the robust and hearty man that he is. It is the writer's pleasure to meet him frequently on our trains. He always has a cheery smile and a cordial greeting for his Railroad associates, and with a complexion that might be the envy of a debutante, one feels confident that his active years have ended in name only. Here is hoping that the sunset of his life may be long and beautiful, that he may live in complete comfort and happiness, reaping the reward that his long and faithful service has so amply earned.

## Bunk or the Girl— or Both

*(From the Oregon Safety News)*

AS the chairman of the Safety Committee walked away, old "Bill" Walters shuffled up to the new man, "Jack" Williams, and said, "Just new on the job?"

"Yes," replied the young fellow, "my first day."

"Where'd you work before?"

"Nowhere," "Jack" answered, blushing slightly, "I'm just out of college. Had no practical experience, but want a few months of it before

I take my examination for a seagoing certificate."

"Humph! And I reckon that guy was tellin' you about the dangers around here and what to do not to get hurt."

"Yes, and I call it pretty decent of him."

"Say, sonny, don't you listen to nothin' that gink says. Tell him to go chase himself. That safety business is all bunk. I've worked here twenty years on these machines, and I've still got all my fingers and toes."

William Henry Miller

## Safety First

By C. Edgar Wooden, Jr.

Engineer, Norfolk and Western Railway

"Safety First" means everything that those two words imply;  
They don't mean stand between the rails to watch the train go by,  
Nor try to light a cigar with a stick of dynamite,  
Or kick a lion in the ribs to see if he will fight.

Some men take such chances at their work most every day,  
Forgetting for the moment those depending on their pay.  
"Safety First" means happiness to kiddies and the wife;  
'Tis better to be careful than be crippled all your life.

The massive wheels of industry need men to make them turn,  
Keep them going steady and your place in life you'll earn.  
With broken spokes and bent ones a wheel cannot run true,  
Think "Safety First" and act it. There's much depends on you.

# "Yes, I Am the Semaphore!"

By H. Irving Martin

Now, old "Bill" had two joys in life, a daughter, Bessie, and checkers. Bessie used to bring his lunch to him every day. One day "Jack" was talking to the old man when she came up. Within a week "Jack" developed a remarkable passion for checkers. Pretty soon he was having the time of his life being beaten by the old man every night.

Meanwhile "Jack" was not acquiring good working habits. If old "Bill" saw him wearing goggles when grinding or using a safety dog on a lathe, he would call him down for being yellow. One day he said: "'Jack,' let's get this straight between you and me. You like my girl, I can see that. But let me tell you this, my girl don't marry nobody but a he-man. The man that marries into my family has got to have guts. I've told you lots of times I ain't got no use for this safety stuff, but you're still hangin' on to some of it. Now, which is it, safety bunk or the girl?"

"All right," replied "Jack." "good-bye goggles and all the rest of it."

Two weeks later "Jack" was changing a belt. He had carelessly left his jumper sleeve unbuttoned and the lathe dog caught the loose end of it and took "Jack's" arm around the spindle. The committee-man, who was working alongside him, tripped the breaker and knocked off the power. Old "Bill" came up just as they were carrying "Jack" to the hospital. After they had gone "Bill" moped around awhile and then went to the foreman and knocked off work.

At home, he tried several times to tell Bessie about it, and every time his words stuck in his throat. Finally Bessie said: "Dad, what on earth ails you? Are you sick?"

"No, I ain't sick—not to say sick, but I come dad-burned near bein'." Bessie, girl, I've been givin' "Jack" a bum steer on this safety business, and now he's got hurt."

"Hurt!" she cried, her face white. "Hurt bad?"

"Well—" began "Bill."

"No, not bad," said a voice behind them.

"Jack!" cried Bessie. "Thank God you're not killed!"

"Somewhat disfigured," said "Jack," pointing to his arm in a sling, "but the doctor says it won't be more than six weeks before I'll be able bodied enough to support a fami'y."

"Jack," said old "Bill," placing his hand on "Jack's" sound shoulder, "I—I—well, I'm just a plain damned old fool' I'm off that hardboiled stuff for life."

I AM the fellow who stands by the track, and I beckoned to you to stop a moment ago as you went rattling by. You think that I am but the dummy of that operator over in the tower yonder who pulls the levers, but I have an eye (often red or bloodshot), and I can hear, think and remember. I heard that local passenger go by just before you did, and my partner in the tower pulled a wire to me to tell you that the passenger had not cleared the block.

Last night, when you brought that western express along, the local was on time and you didn't have to wait. Tonight, when the local was late, you thought you would chance one on me. It is a bad night for a chance, as my arm, instead of hanging at my side, was pointed straight out and I warned you. What is your chance worth if you hit that passenger at 50 miles an hour? I can hear the call for the wrecking train going in, and it seems to come by me from the next block operator. I see them taking out the dead from the local and putting them on the cushions yanked from your Pullmans.

When you telescoped those last coaches, what happened to you? The division superintendent completed your record when he filled up the accident report—"William Smith, engineman, killed in a rear end collision. Ran into local pass-

enger at station. Passed danger signal at full speed, disregarding it."

I saw your wife as they told her, and I won't tell you what happened to her.

The Relief Department passed the voueher for accidental death benefits, and the boys of the Veterans and the B. of L. E. put you away all right, but the wife and children didn't want to swap you for these things.

The general manager said, "Bill was a good engineer and he must have had an off moment." No, "Bill" took a chance, and the chance caught "Bill" and his fireman. "Bill" was like me; he was hard, tough, weatherbeaten, and had muscles of wire, like mine.

On that local passenger they didn't want "Bill" to take a chance, but "Bill" was late and took it. The undertakers got most of them for you were hitting up a good gait when you went by—not less than 50 miles.

\*\*\*\*\*

Ugh! "Bill." Asleep? I'll say I was! Dreaming? Yea, Bo, and w'at a rotten dream!

You say you stopped before you reached the "red," like you always do? Glory be, "Bill," you're right. I see that observation car platform backing, and here comes that brakeman of yours with his flag. He, at least is "on the job."

Learn how to give first aid to the injured.

#### Holding Their Jobs by Real and Unusual Teamwork

One of the most interesting illustrations of teamwork by railroad employes that has ever come to our notice, appeared in the April issue of "Service," a magazine published in the interests of the Western Lines of the Grand Trunk Railway System and its employes.

This magazine, by the way, is about as much like our own MAGAZINE in appearance as is a typical issue of the "Podunk Prophet" like, let us say, the *New York Tribune*. But it gets there—big—just the same! It is mimeographed in rough and ready style, is only about five pages long, but carries "the goods."

The article to which we refer is called "Boosting Home Industries." It tells of the action taken by the employes of the Grand Trunk and Pere Marquette, at Holly, a small town in Michigan at which these two roads cross. They had noticed that with the increasing competition of motor truck transportation, both passenger and freight, the business of their railroads at Holly had decreased. And with the decrease in business went a consequent decrease in the number of railroad positions and the size of the payroll. So the employes got together and developed a plan for winning the support of the business interests and the citizens of Holly, which took shape in the form of the following advertisement, occupying a quarter page in the local newspaper, "The Holly Advertiser:"

#### BOOSTING HOME INDUSTRIES

We are old established concerns. We have been in business in Holly for over forty years. We employ from twenty to thirty men all the time. Our average monthly payroll is \$3600.00.

Our employes are tax payers in Holly. Our employes spend their money in Holly. They contribute their bit for the support of the Board of Commerce. They are affiliated with the Holly churches. They are boosters of all civic improvements.

We own our right of way buildings and equipment in Holly. We pay taxes to the village. We purchase our water supply from our village and it amounts to several thousand dollars annually. We were assessed our proportion of Boulevard light and paving.

#### WE SELL TRANSPORTATION OF FREIGHT

We have direct lines to Flint, Pontiac, Saginaw, Bay City, Toledo, Lansing, Grand Rapids, Battle Creek and Chicago. Holly is served with four merchandise trains daily, north, east, south and west. In routing your shipments we ask you to remember that we are a Holly concern. We maintain our right of way at our own expense and Holly reaps the benefit of our wages.

#### WE SELL TRANSPORTATION OF PASSENGERS

Eighteen passenger trains stop daily at Holly except Sunday. Twelve locals and six fast trains.

This advertisement is NOT a "hand me down" from the Railroad management, but is contributed and paid for by local railroad employes (station staff, maintenance of way, crossing men, interlocker tenders and car inspectors). Every one of these men feels that as one of the oldest industries in continual operation, WITHOUT A SHUTDOWN, the railroads serving Holly should have the support of the Board of Commerce, the business men, the newspapers and the community at large.

MORE BUSINESS MEANS MORE EMPLOYES AND ADDITIONAL SERVICE.

LESS BUSINESS MEANS FEWER EMPLOYES AND CURTAILED SERVICE.

Following the publication of the advertisement, Mr. C. E. Wagner, Grand Trunk local agent at Holly and chairman of the Railroads' Employes' organization of Holly, addressed the following letter to each of the Holly business men:—

Dear Mr.—:

When you note a decrease in your business, as a good business man we believe the first action you take is to advertise.

We have done it.

After you have increased your advertising, the next thing to do is to follow up your effort with a personal letter.

We have done it.

If you have competitors, instead of knocking them, you endeavor to show the buying public where it will be to their interest to patronize your business.

So have we.

More business for the railroads from you, means more railroad employes. More railroad employes means more business for you.

Protect your business.

Railroad employes spend twenty-five thousand dollars per year in Holly for groceries and clothing alone. Decrease in business means reduction in staff at Holly and consequent loss to you of your share of this business.

Think it over

The employes of these two railroads at Holly seem to have gone the employes of the Baltimore and Ohio one better. While many of us individually and collectively have, ex-officio, been soliciting business for our Railroad during the past 18 months, we have not yet combined to advertise the service of our Railroad and to pay for such advertising.

But—and here is the important point—the railroad men of Holly and of the Baltimore and Ohio have actually been striving for the very same results. For if their propaganda is successful, as we have little doubt it will be, the eventual result to them as individuals will be an increase in railroad business and a consequent increase in the number of positions and the size of the payrolls in their town. Likewise with us, a continuation of our successful business soliciting campaign will mean more business for the Railroad, more work to be done, more positions and a bigger Baltimore and Ohio payroll.

#### Nature's Lesson

Just now the poets, would-be and real, are raving about the beauty of Nature. It is, in truth, a proper and fitting time to marvel at the miracles of Mother Earth as we go a-Maying.

Just a handful of dirt multiplied times without number and we have the greatest manufacturing plant in existence. By the productiveness of this old globe of ours we are fed, clothed and given the raw materials necessary to the enjoyment of life. Then, a bit of sunshine, a

little rain, the changing of the seasons, our God-given minds to guide our actions, and we are masters of our destiny, limited only by circumstances and our individual ability.

Sometimes we encounter men and women who are unable to grasp the proportionate "bigness" of things. They are narrow, prejudiced and personal. They think their way is the only way, though it may have brought them only mediocre success. This attitude is fostered by association with lesser mentalities. Such a man or woman will gain much by getting out into the country with Nature, and by standing off, physically and mentally, and obtaining a view of things in their proper perspective. The results will be as different as are the results of viewing a small building with the nose pressed to the wall and viewing the same building from the roof of a nearby skyscraper. The real proportion of things will appear if the person in question is big enough to realize the truth.

There is much food for thought in the casual phrase "communing with nature."

George Dobbin, Clerk,  
Office of General Freight Claim Agent

### Successful People Help Others

This line appears in print: "Success must always be achieved at the expense of some other individual or state."

This is not true.

A burglar obtains his loot at the expense of someone else. The spoils of war are won at the expense of the loser. In peaceful, everyday life ninety-five per cent. of all men who achieve success not only do not injure others, but in the process of helping themselves they help others.

James J. Hill built a railroad through the northwest, and made millions. To make money for himself he had to induce people to emigrate to the northwest and plant wheat, build elevators and establish cities and towns.

Newspaper men went into those towns and printed weekly publications on second-hand presses held together with rope. Gradually they developed their publications into prosperous daily newspapers. They made money by serving their readers and their advertisers—by giving value for money received.

Peddlers, with packs on their backs, went through this new country, offering their wares to the farmers' wives. As business increased they opened stores at crossroads, and as the population grew these crossroads spread out into towns, and these one-story shacks became department stores. The merchants prospered because they performed a service which their customers needed and could profitably use.

So we might trace the growth of a new country, decade by decade, and show how individuals and business prospered without injuring anyone in the process.

The notion that a man climbs to success on the backs of others is a relic of the days when men wore silk tights and lace cuffs and honed their swords before they left the house in the morning.

We make no plea for the successful man or the successful business, because they can take care of themselves. But to argue that the success of one implies the failure of others is to miss the significance of the modern idea of mutual service and mutual profit.

—*Brenneman's Fine Biscuit Magazine*

Have you tried the "Good Neighbor" idea in handling your job? It is the Baltimore and Ohio way!

### Sportsmanship

In the Passenger Department section of this issue is a picture of the Oxford-Cambridge Lacrosse Team which used the Baltimore and Ohio to come to Baltimore to play with Hopkins and Mt. Washington. One of the leading members of the team is the chap with a cigarette in his hand—a sight which will cause the believers in the American idea of strict training to gasp with astonishment.

The English the world over have a fine reputation for being the best of sportsmen, one of their tenets being that there is more in the game than in the name. It is a worth while idea for Americans to cultivate and in part responsible for the fact that sports are participated in much more universally in England than they are in our country. Though keen fighters, as their history from the Battle of Hastings in 1066 to their stubborn fight in Flanders in 1917 eloquently proves, the English seem to be lovers of sport for sport's sake to a greater extent than any other people.

An interesting sidelight on this was given in an account of the Oxford-Cambridge, Princeton-Cornell track meet at Oxford last summer by a graduate athlete from Princeton. He was invited to lunch with Rudd, the great miler and captain of the Oxford team, on the day of the meet. Rudd enjoyed a smoke after his lunch and then calmly walked across the green, donned his running suit and went out and won the mile in near-record time.

Whose system is best from the standpoint of winning may be best judged from the record of American victories in English-American athletic competition of recent years. But which system fosters the best sporting instinct and gives the greatest benefit to the greatest number, is another question.

Incidentally we have enough athletic competition on the Railroad now-a-days to make it desirable that the best sportsmanship, and that only, obtain. One or two of the games played in the last few years, and seen by the writer, have been conspicuous for their bully ragging, umpire baiting and unwarranted managerial interference. These have been the exceptions, but should never be countenanced in our friendly and good natured competition. A game won at any cost is a questionable and badly besmirched victory and does more harm than good to the members of the winning team and its supporters, because it develops in them a false idea of true sportsmanship.

### The Creative Brain

To create, manage, and comprehend relationships demands something more than raw brains; that is why ten per cent. think, plan, and manage the industrial life of our nation today—for the other ninety per cent. And because they do, they are paid proportionately.—ALBERT SIDNEY GREGG, in *Trained Men*.

by G.H. Pryor  
Auditor of Disbursements

*Note:*

All puzzles published in this department will be defined, as far as possible, from the *New Standard Dictionary*, edition of 1920. It is permissible to use both geographical and biographical words in the construction of puzzles, but when such words are taken from any authority other than the *New Standard Dictionary*, the name of such authority must be stated at the end of the definition, in parenthesis. Obsolete words will be marked at the end of the definition thus—"obs". Variant spellings of a word must be marked at the end of the definition thus—"var". Address all communications concerning this department to G. H. Pryor, Room 800, Baltimore and Ohio Building, Baltimore, Maryland, and mark the envelope "Puzzles."

It faded and ripped and was pretty far gone,  
So Sandy was "tattered and torn."  
He called on the seller and made a great  
kick  
For the price he had TWO was enough  
Said he to the dealer, "You think you are  
slick,  
But your treatment of me is quite tough.  
I have TWO you good siller for this faded  
old ONE  
And a mighty bad bargain I find it,  
So after this time, I will let you alone  
For your shop has the devil behind it."  
Baltimore, Md. *The Major*

NEW PUZZLES

1. SQUARE

1—A keepsake.

2—An evergreen tree much cultivated in southern Europe.

3—Birds of the Falcon family.

4—An incident.

5—Place or beds formed and used by birds.

Baltimore, Md.

*Guy F. Biggs*

2. TRANSDELETION (6)

What help to man is this device,  
This signal by the switch's side?  
It aids the trainman in a trice  
To tell if he doth safely ride.

Decapitate this worthy word—  
And everybody use his brains;  
Transpose what's left—'tis not absurd—  
And this is what you see remains:

'Tis found within the engine's parts—  
Look well below the fire-box glow;  
There burning coal much heat imparts—  
This iron frame you surely know.

Baltimore, Md.

*Primrose*

3. DIAMOND

1—A letter.  
2—To strike lightly.  
3—A doctrine held or maintained.  
4—A dwarf.  
5—The capital of China.  
6—A silver-white soft malleable and fusible metal.  
7—A letter.

Baltimore, Md.

*Grace M. Manning*

4. DIAMOND

1—A letter.  
2—To drink in small quantities.  
3—A trap.  
4—A famous American water fall.  
5—To prattle vaguely.  
6—Before.  
7—A letter.

Roland Park, Md.

*Richard K. Thompson*

5. DELETION (5)

Sandy McGregor had bought a new ONE  
And when it was TWO for and worn,

6. RHOMBOID

Across:

1—The juice of apples expressed and used as a beverage.  
2—Subject of discourse.  
3—A large marine duck, the down of which is an article of commercial value.  
4—The name of an Evergreen tree having wood of great durability and fragrance.  
5—To make new again.

Down:

1—A letter.  
2—The personal pronoun of the third person, singular number and neuter gender.  
3—The female deer.  
4—A narrative poem of some heroic deed or event.  
5—One who rides.  
6—To give up.  
7—In Norse mythology, the goddess of the sea.  
8—In music, the name given to the second of the syllables used in the scale.

9—A letter.  
Baltimore, Md. *W. E. Madden*

7. TRANSPOSITION (6)

Some hints for ONE health now are due:  
Don't whine; don't fret; don't growl;  
don't TWO  
That man is happiest, I'm sure,  
Who keeps his spirits high and pure.  
Hawley, Minn. *Kappa Kappa*

8. PYRAMID

Across:

1—A letter.  
2—A tame, fondled animal.  
3—Relating to the Dorian race  
4—To surpass in growth.  
5—Affected with strabismus.

Down:

1—A letter.  
2—Either.  
3—A duet.

- 4—Round vessels made of earthenware or metal.
  - 5—Icebergs.
  - 6—To fatigue.
  - 7—Reserved.
  - 8—Plural of 1.
  - 9—A letter.
- Baltimore, Md. *Red Crow*

9. INVERTED PYRAMID

- Across:
- 1—A Russian lumber vessel of 100 tons burden and upwards.
  - 2—In mechanics, a block on or in which a journal rotates.
  - 3—Like an old woman.
  - 4—An apodal fish without ventral fins and of elongated snake-like form.
  - 5—A letter.

- Down:
- 1—A letter.
  - 2—The fifth month of the Jewish year.
  - 3—A grassy field or plain.
  - 4—A narrow way or path, confined between fences, walls, etc.
  - 5—In astronomy, the inner satellite of Uranus.
  - 6—To cultivate the ground.
  - 7—The smallest cardinal numeral.
  - 8—In Biblical history, the King of Bashan.
  - 9—A letter.
- Baltimore, Md. *Pat Tapsco*

10. CHARADE (6)

More west than where the "big horns"  
TWO,  
On a tree that's not so tall.  
In the land for me and for you,  
You'll just say, ONE! then eat ALL.  
New York, N. Y. *Joaquin*

11. SQUARE

- 1—To leave a camping ground.
  - 2—To inspire with ardent love.
  - 3—In Greek mythology, divinities of Oriental origin.
  - 4—A compound derived from acid amids through substitution of carbonyl oxygen by the imid group.
  - 5—Obsolete spelling of Morisco.
  - 6—Dresses or adorns ostentatiously.
- New Florence, Pa. *Dan D. Lyon*

12. DIAMOND

- 1—A letter.
  - 2—A covering for the head.
  - 3—One that files.
  - 4—An actor (rare word).
  - 5—A city, headquarters of the Baltimore and Ohio.
  - 6—A white ant.
  - 7—Tumults.
  - 8—Metal, especially precious.
  - 9—A letter.
- Holyoke, Mass. *O'Kay*

13. SQUARE

- 1—Having a light complexion, color or shade.
- 2—A long-necked and long-legged heron-like wading bird.

- 3—Moved to anger.
  - 4—A natural object, usually an animal, assumed among savages as the emblem of an individual or clan, etc., and regarded as an object of worship.
  - 5—One of a hostile army or nation.
- Baltimore, Md. *L. E. Phant*

14. RHOMBOID REVERSED

- Across:
- 1—The landed estate of a nobleman.
  - 2—In music, the highest adult male voice.
  - 3—The ritual of the thirteen functions of the Jewish festival of the Passover.
  - 4—In Geology, a formation comprised in the Upper Cretaceous series of Strata in Alabama and Mississippi.
  - 5—In Law, the official list of persons summoned for jury duty.

- Down:
- 1—A letter.
  - 2—In Babylonian mythology, one of the three supreme deities.
  - 3—The heavenly body that is most conspicuous from the earth.
  - 4—A head-dress.
  - 5—A piece of metal engraved with a figure, scene or allegorical group.
  - 6—Again.
  - 7—Likewise not.
  - 8—Either.
  - 9—A letter.
- Baltimore, Md. *Mon. U. Mental*

The lists of solutions must be in my hands by July 15. The answers, with the list of solvers, will appear in the August issue.

\*\*\*\*\*

Beginning with this month's issue we are going to have a regular puzzle department, as we feel the responses received to our first effort in the March issue warrant this determination. If we are going to have a regular department we must have some rules to guide us; but all that I feel are necessary at this time are embodied in the notice at

Prizes for Best Answers

A copy of the standard book on puzzles, "Key to Puzzledom," will be given to each of the five employes submitting the best answers to the puzzles given in this issue of the Magazine, and having them in the hands of Mr. Pryor by July 15.

Only new puzzlers will qualify for this competition, it being felt that the old puzzlers will be glad to leave the field open to the beginners.

As it is unquestionably true that many employes will solve all of the puzzles given in this issue correctly, it will probably be necessary for those competing for these prizes to work out an original puzzle, to put him or her in the running. The names of the successful competitors will appear in the August issue.

the head of this column, which will permanently stand, from month to month, for your information and guidance.

In the March issue I showed you the form of a rhomboid. This form is susceptible to a variation called "rhomboid reversed" and it looks just as its name would imply, like a rhomboid running to the left instead of to the right, thus:

You define the five words from left to right beginning, of course, with the top word and then define the "up and down" words beginning at the left hand lower corner which would make your first definition "a letter," your second definition a two letter word, your third definition a three letter word, etc.

The pyramid is another pretty puzzle and very much in favor with puzzlers. Like the rhomboid there are two kinds of pyramids, one designated simply as "a pyramid" and the other "inverted pyramid." The straight pyramid is shaped like this:

and again, like the rhomboid, it is defined two ways, first, from left to right where your first definition would be "a letter," your second definition a three letter word, your third definition a five letter word and so on for as large a base as you care to build on. It is also defined "up and down;" beginning at the left hand lower corner, your first definition being "a letter," your second definition a two letter word, your third definition a three letter word and so on until you come to the right hand side of the base where your definition is again "a letter." The "inverted pyramid" is shaped like this:

and is defined just like the regular pyramid except that from left to right your base, or largest word, is defined first, as that appears on top in the inverted pyramid, and in your "up and down" definitions you begin at the top left hand side and your first definition will be "a letter," your second definition a two letter word, etc.

In constructing pyramids you may use base words as small as seven letters and you may go from that as far as you like. Fifteen letter pyramids are no longer unusual among the experts, but the beginner can get a lot of fun out of building and solving the seven and nine letter varieties until he gets his hand well in, when no doubt he will want, and will have, something bigger.

(Continued on page 34)

## Splendid Meeting at Grafton Closes a Successful Winter Season

THE joint meeting and social of the Baltimore and Ohio Veterans' Association and the Ladies' Auxiliary held on April 3 at Pythian Hall, Grafton, was one of the most delightful affairs of the series held by these organizations during the past winter. The hall was filled by a large and interested audience and to say that everyone present thoroughly enjoyed the delightful program of entertainment provided, is putting the fact most mildly. The music supplied by the Rosier orchestra was one of the pleasant features.

The exercises were opened by the singing of "America" by the audience, and a prayer by the chaplain. Then the Veterans' Association conducted a brief business session. The Ladies' Auxiliary, in turn, held its business session. With the disposal of these matters the program was resumed by the singing of "Maryland, My Maryland." After another orchestra number, Mr. Gans, of the Safety Department, Baltimore, ran a number of reels of most interesting moving pictures. He showed various lessons of Safety and in addition the construction or building of a modern railroad, ending with

a historic picture of the building and development of the Baltimore and Ohio, the country's most historic railroad.

This was followed by the singing of "Life's Railway to Heaven," by the music committee, and then Mrs. French Helms read most effectively an interesting story, entitled "The Old Woman's Railway Signal."

After another orchestra selection Mr. Gans gave a clever little exhibition of sleight-of-hand work that proved most entertaining and amusing. This was followed by a duet by Mrs. Thos. Beall and daughter, Miss Ada May. Then Rev. P. T. Crickenberger pronounced the benediction and the meeting was turned over to the ladies of the auxiliary, who served the whole assembly with a delightful luncheon. The meeting was then turned into a pleasant social affair and it was well on toward midnight before the last of the crowd reluctantly departed for their homes.

Since the meeting of the Grand Lodge in Baltimore, the Grafton Chapter of the Auxiliary has taken in more than 30 new members. This is fine work.

## Cumberland Veterans Honored by Visit From Officers

SEVERAL hundred people were present at the last meeting of the Ladies' Auxiliary and the Veterans, at Cumberland, Md. Following the regular business session, T. J. Lucas was elected president of the organization. Addresses were made by the following officers of the Railroad: E. W. Scheer, general manager; H. O. Hartzell, manager Commercial Development; George Sturmer, grand president, Baltimore and Ohio Veterans; H. R. Gibson, division engineer, Connellsville division; Thomas K. Faherty, assistant superintendent, Cumberland Division; C. W. Van Horn, superintendent, Cumberland Division; P. Phoenix, division freight agent,

and R. W. Brown, superintendent, Connellsville Division.

J. A. Carnes, engineer, Rowlesburg, W. Va., was presented with a service button in acknowledgment of his fifty years of loyal service. The addresses were followed by an old fashioned square dance which was greatly enjoyed by the old folks as well as the young. The following program was given: Selections by the Peerless Orchestra; violin solo, Virginia Shults, accompanist, Mrs. R. W. Trevaskis; reading, Mrs. E. T. Pritchard; Spanish dance, Evelyn Coffee; vocal solo, Mrs. Chester Spring, accompanist, Miss Eleanor Utt; reading, Mrs. Elizabeth R. Menafee; selections by quar-

ter composed of Cleveland E. Taylor, Howard Johnson, Florian Wilson and George Davis; piano solo, Miss Reba Driscoll; reading, Miss Mary N. Barnett; vocal solos by Mrs. R. H. Compton and by "Ed" Warner.

Mrs. Barnett, president of the Ladies' Auxiliary, was instrumental in arranging the splendid program which was greatly enjoyed by all.

Refreshments were served as a happy conclusion to an enjoyable evening.

## In Memoriam— Conductor John T. Severns

By M. W. Jones

ONE year ago Conductor John T. Severns received the last orders to run to the Great Beyond, and it seems fitting that a few words about this old time loyal Baltimore and Ohio man should appear in our MAGAZINE.

Born near Sykesville, Carroll County, Maryland, January 4, 1854, Mr. Severns was raised on a farm. Tiring of farm life, however, he accepted a position as brakeman on the P. & C. Railroad at Connellsville, Pa. After serving four years, he returned to Maryland, and went to work in what is now known as the Maintenance of Way Department, in Foreman Barrett's camp. He was transferred to the train service as freight brakeman at Baltimore, Md., July 1, 1879, and promoted to freight conductor July 1, 1883. He remained continuously in the service of the Company from that date as a conductor until the day of his death, March 20, 1921.

Captain John was one of the old type of employes, noted for his intense loyalty to the Baltimore and Ohio, and for his attention to duty. He did not question "Who should do it?" but always did well what his hand found to do. His family came from Bucks Co., Pa., to Maryland in the year 1791, where they have since remained. Captain John was married to Margaret E. Brandenburg of Woodbine, Carroll Co., Md., October 18, 1883. She died on October 9, 1915. Of a family of nine children, seven are still living, four of whom are in the employ of the Baltimore and Ohio, namely: Walter E., division accountant, Weston; Albert E., store clerk, Riverside; John W., car repairman, Locust Point; and Edwin F., machinist, Riverside. The other children living are Mrs. A. Lanier, Miss Myrtle E. and Robert E., all of Baltimore. Mabel and Bertha died in 1912 and 1893 respectively.

Captain John Severns and Engineer H. B. Lockhart were probably the first men examined for promotion on the Baltimore and Ohio, as prior to the examinations of these men, promotions were made simply on the recommendation of an engineer or conductor.

Captain John was a loyal American, who worked during the entire period of the war.

when men were badly needed, without losing a day. Although he had a remarkable constitution, it is clear that he overworked himself during this severe period, and this was the cause of his untimely and sudden death, at the age of 67 years. He was taken ill on his train in Brunswick yard, the latter part of December, 1920, was taken home and grew steadily worse until his death. He was a member of the Order of Conductors, P. O. S. of A., and P. O. of A., and was buried by Collins Division No. 5 of the O. R. C. at Morgan Chapel, Woodbine, Md., on March 23, 1921.

The Baltimore and Ohio lost a loyal worker, the family an affectionate father, and hundreds of Railroad men a firm and tried friend. Of him it may truly be said, "Well done thou good and faithful servant—Enter now into thy rest."

### Connellsville Welcomes Grand Officers

THE Connellsville Division Veterans, together with the Ladies' Auxiliary, entertained Mr. and Mrs. J. M. Garvey, the former grand vice-president of the Veterans and the latter holding the same office in the auxiliary, at a social and business meeting in the Y. M. C. A. on April 11.

Addresses were made by Mr. and Mrs. Garvey, President P. J. Harrigan and F. T. Irwin, Mrs. William Pearson, president of the local auxiliary, and Mrs. Edward Marsh, treasurer. Mrs. James Cowgill entertained with a number of readings. Motion pictures also added to the evening's pleasure. Following the social and business session, the ladies served a lunch.

### News from Martinsburg Auxiliary

Mrs. C. Virginia Taylor

Press Correspondent, Ladies' Auxiliary

WE extend our sympathy to Sister Anna Burkhart, whose husband died suddenly. His death was due to heart trouble. We also extend our heartfelt sympathy to Mr. Burkhart's mother, Mrs. W. A. Burkhart, our esteemed president.

We also regret to learn of the death of Sister Jeadie Airhart, widow of the late Harry Airhart. Five children are left to mourn the deaths of father and mother.

Mother. Death has never changed you,  
You are nearer than we think,  
We shall meet, for still we love you,  
And unbroken is the link.

### Brunswick Honors Secretary Compton

By R. L. Much, Conductor

THE Veterans' Association held its business and social meeting in the auditorium of the Y. M. C. A. at Brunswick, on March 3.

Brother Ray Smith, president, presented Secretary W. C. Compton with a handsome

gold chain and charm in recognition of his faithful services.

On one side of the charm there is the insignia of the Veterans, and on the other side, an inscription telling of the gratitude of the members for Mr. Compton's services.

Mr. Compton accepted the gift with a short speech of appreciation. Refreshments were served, and everybody had a good time. Several new members were taken in, as is generally the case at our meetings, and the meeting as a whole was declared a great success.

### Mr. Hartzell Addresses Ohio Division Veterans

By A. E. Erich, Correspondent

ABOUT 200 members of the Veterans' Association, their families and other employes, gathered at the Eastern Star Temple, Chillicothe, on April 5 for a social session. G. W. Plumly, division operator and president of the Ohio Division Association, introduced the various speakers. H. O. Hartzell, manager, Commercial Development, conveyed President Willard's message to the employes. He said that President Willard was well pleased with the Veterans' Association and extended his thanks to them for their hearty cooperation last year in securing new business for the Road and stated that if they will continue to do this, it will mean the returning to work of the furloughed men. He also mentioned that the number of furloughed men has been reduced just one-

half in the past six months.

G. W. Sturmer, grand president of the Veterans, gave encouraging reports of the growth of the organization, stating that the membership is now 11,000.

The Snyder Brothers' quartette, all employes, rendered several numbers. Edwin Rutherford, accompanied on the piano by Miss Mildred Curtis, both of the Accounting Department, gave several violin selections. All these numbers were well received. The rest of the evening was spent in dancing. Refreshments were served at a late hour, and everybody had a good time. Credit is given the entertainment committee for the pleasing manner in which they had the program arranged; also to the Ladies' Auxiliary of the Association, who were responsible for the refreshments.

When out into the world sometimes we must go,  
A pass is God's blessing through our grand B. & O.

By Estella Hellyer Pennington,

Wife of Philip M. Pennington, Crossing Watchman, Cumberland, Md.

GRAND OFFICERS OF THE LADIES' AUXILIARY

1. Mrs. J. M. Garvey, Wheeling, W. Va., grand vice president. 2. Mrs. Frank M. Howard, Newark, Ohio, grand president. 3. Mrs. Otto Wallburg, Lima, Ohio, grand secretary. 4. Mrs. Anna Hopper, Garrett, Indiana, grand outer guard. 5. Mrs. W. E. Hodel, Grafton, W. Va., grand chaplain. 6. Mrs. G. A. Bowers, Baltimore, Md., grand treasurer. Mrs. H. C. Allgire, Brunswick, is grand inner guard

# Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—  
Retreat from care that ever must be thine;  
How blest is he who crowns, in shades like these,  
A youth of labor with an age of ease.*

OLIVER GOLDSMITH—"The Deserted Village"

## George W. Collins

George W. Collins, pensioned trackman, was born in 1851. In 1868 he entered the service of the Baltimore and Ohio as trackman, Sykesville, Maryland. Here he worked continuously for 53 years, a faithful service, worthy of the highest commendation.

## John W. Walsh

John W. Walsh, pensioned passenger conductor, was born on April 1, 1857. He entered the service of the Baltimore and Ohio as water boy on the Valley Division, at Winchester, Va., at the age of twelve. In 1872 he went to work in the Baltimore and Ohio Rolling Mill, Cumberland, remaining in this service until the mill was closed. From here he went to Connellsville, where he entered the service as freight brakeman, Cumberland Division. In 1879 he was promoted to freight conductor, and in 1893

to passenger conductor. He remained in this service until he was pensioned, this year.

## Henry Constantine

Henry Constantine, pensioned passenger conductor, was born in Baltimore, and was educated in the Academy of Bladensburg. He entered the service of the Baltimore and Ohio on May 15, 1881, as passenger brakeman, Baltimore. In 1885 he was made train baggageman, and in 1889 he was promoted to passenger conductor. Mr. Constantine is well known among his fellows, who claim that his popularity is accounted for in part by the fact that Mr. Constantine has managed to keep out of accidents and law suits.

Mr. Constantine has a fine family, consisting of his wife, three daughters and a son.

## Michael Gallagher

Michael Gallagher, pensioned foreman, St. Louis Division, was born in Jefferson

County, Indiana on March 17, 1853. At the age of twelve years he entered the service of the Railroad as water carrier on the old Ohio and Mississippi. A few months later he took the job of trackman. On November 1, 1877 he was made foreman. He served in this capacity until November 1, 1921 when he was retired on pension. All of his time was spent on the Holton section of the Road, and it has been at Holton that he has lived for the past 44 years.

## Charles Molter

Charles Molter, retired hostler, was born on February 23, 1851 in Muskingum County, Ohio. He entered the service of the Baltimore and Ohio as laborer, at Newark, Ohio, on April 6, 1880. On October 12, 1892 he was made hostler and continued in this service until he was retired on pension on February 28, this year. Mr. and Mrs. Molter reside on Buena Vista Street, Newark, Ohio.

## Jacob Hassman

Jacob Hassman, pensioned car repairman, Cumberland Division, was born at Kriegbaum, Maryland, on August 20, 1854. He attended school here and helped his father on the farm until he reached the age of 20. He then went to Lonaconing, where, for a few years, he was employed around the mines. On October 1, 1874 he moved to Cumberland and entered the service of the

THEY HAVE FINISHED THEIR WORK—NOW FOR A REAL VACATION!

Here is a bran new list of pensioners. They are, left to right, upper row: Charles Molter, George W. McDermott, John W. Walsh, Michael Gallagher. Lower row: Jacob Hassman, Joseph V. McCrisaken, George W. Collins and Henry Constantine

Baltimore and Ohio as a car oiler. In 1901 he became car repairman, and in 1910, freight car builder. He has worked continuously in the service since he began, until he was pensioned, this year.

Mr. Hassman has a family of eight children, four of whom are married.

### George W. McDermott

George W. McDermott, pensioned painter, Cumberland Division, was born on September 23 at Cumberland, Maryland. When he was three years old his family moved to Frederick, Maryland, where the boy attended school for several years. Later the family returned to Cumberland where he also attended school. However, at the age of 16 he gave up school to enter the service of the Railroad as laborer at the Rolling Mill. For 19 years he worked here, and was then transferred to the Maintenance of Way Department as painter. Here he worked until January 30, this year when he was retired on pension.

Mr. McDermott married in 1899. He has nine children, all of whom are living. His father died when he was quite young but his mother lived to be 93 years old. She died in August of last year. Mr. McDermott and his family live at 46 Frederick Street, Cumberland, Maryland.

### Joseph V. McCrisaken

Joseph V. McCrisaken, pensioned oil distributor, Stores Department, Indiana, was born at Loogootee, Indiana, on September 4, 1856. His parents were William and Mary A. (Hammond) McCrisaken. After attending school in Loogootee until he was 14 years old, Mr. McCrisaken went to work on a nearby farm until he was of age. In 1877 he went to work for the Government as dredger on the Mississippi River. Here he remained for four years.

In 1880 he returned to Indiana and obtained employment as coal miner. In 1884 he went to work for the M. K. & T. Railroad as trackman. Four years later he returned to Washington, Indiana, where he went to work for the old Ohio and Mississippi—now a part of the Baltimore and Ohio—in the Stores Department. This position he held until the time of his retirement, this year.

Mr. McCrisaken was married to Miss Phoebe Loretta Bramble, in 1899. To this union seven children were born, all of whom are living, save one son who lost his life in France.

### New Equipment

The Company recently placed an order for 50 new cars for use in passenger train service, including forty coaches, two dining cars, three combination baggage and mail cars, and five postal cars. This equipment will be constructed by the Pullman Company, of Chicago, for delivery late in August or early September, at an approximate cost of \$1,200,000.

## In the Realm of the Riddle

(Continued from page 29)

Among the flat puzzles not previously described, the "transposition," "deletion" and "transdeletion" are rated very popular. The *Key to Puzzledom* describes a transposition as follows: "A transposition of the letters of a word, by which another single word is obtained." Another way of expressing it is to say that you take a word, describe it in verse, then mix the letters up to form another word which you also describe in verse.

A deletion is a puzzle in which you take a letter from a word, preferably other than the first or last letters, the remaining letters forming another word, the clue to each being given in the description, usually in verse. For instance, take the word *noise*, delete the *I* and you have the word *nose* without disturbing any of the other letters.

A transdeletion is described in the *Key* as follows: "A deletion in which the *first* is obtained by transposition of the letters remaining after deleting *whole*." It might be plainer to say that in a transdeletion you take a word which is your *first* or *primal*, then take out one letter and shuffle the remaining letters around to form an entirely new word which would be your *final*, *second* or *last*.

Here is an example of a transposition taken from the *Key*:

With eyes suffused, her dear old face aglow,  
With pleasant memories of long ago,  
Grandma, in cosiest of easy chairs,  
Sits ONE the TWO she usually wears.

The answer is "patching" and "nightcap." ONE is "patching" and the letters are then transposed to make TWO which is "nightcap." This transposition was written by Hercules.

The following, by Cinders, is a good example of the deletion:

In a LAST of magic potion,  
Of a liquor charmed and rare,  
Thou canst drown thine old emotion  
And secure surcease from care.  
'Tis a drink to soothe the fretful,  
Make the restless spirit calm,  
Of each sorrow be forgetful  
In the sweetness of the balm.

Of Lethean waters drinking  
Trouble dies within the breast,  
And from every memory shrinking,  
Thou canst find at last a rest.  
TOTAL questions may betide thee,  
Friendship pass in deep regret,  
This nepenthe stands beside thee,  
Drink its measure and—forget.

The answer is "vital" for TOTAL from which the *T* is deleted making LAST "vial." Substitute "vital" for TOTAL and "vial" for LAST and you will have a very pretty little poem.

As a sample for a transdeletion the following by Tranza is offered:

While cruelty to animals I always deprecate,  
Yet just this once I quite insist that we  
decapitate  
A beautiful and spirited wild horse of  
Africa,  
That is—if we can capture it before it runs  
away.

The race is won; the deed is done; the head-  
less trunk remains;  
But little good it is to us unless we use our  
brains,  
And with a dextrous turn or two the letters  
rearrange,  
To form a fierce and clumsy beast, no bet-  
ter for the change.

The answer is "Zebra" and "Bear." The "spirited wild horse of Africa" described in the first stanza is "zebra" from which the "Z" is deleted and the remaining letters transposed to form the word "bear," described in the second stanza. You will note the author did not use the words *first* or *second*, *primal* or *final*, as this was not necessary because of the manner in which he describes the two words in separate stanzas.

It occurs to me to suggest right here that you carefully preserve your copies of the *MAGAZINE*, as you may want, from time to time, to refer to them for a description or an explanation of some puzzle that will appear in a later issue.

I would like to see many of you take up the work of building new puzzles with the assurance that if they are constructed according to our simple little rules and explanations they will be published over their makers' names. It is fine fun, besides being highly educational, to solve puzzles, but when you build them you are carried into many fields of knowledge that you would not reach by solving alone. So, while I would like to have a very large solvers' list, I also want a lot of new puzzles and I hope many of you will get busy right away and find how interesting is the work of construction.

Guy F. Biggs of the Telegraph Office, Baltimore and Ohio Building, Baltimore, is the first to send in some new puzzles and as they are very nice examples of their kind, I have given one of them the place of honor among the new puzzles published this month. We want a whole lot more like Guy Biggs and then we shall be sure to make this department a success.

If you cannot solve all the puzzles each month send in a list of those you do solve, even though it be only one, and your name will be published in the solvers' list.

You will notice No. 11 is a six-letter square and No. 12 a nine-letter diamond, which mark a little advance over our first efforts. However, there is an axiom among puzzlers that "the larger the form the easier to solve" because the more words used the more apt the solver is to guess one or more of them as a starter, and usually given one or two words you can work out the rest with patient effort.

# An Interesting Industry along the Line of the Baltimore and Ohio

Mr. Wm. F. Stifel,  
President,  
J. L. Stifel & Sons  
Wheeling, W. Va.

Bird's Eye View of J. L. Stifel & Sons' Plant Today

Lower right: The corner building is where this industry was started in 1835

## "Stifel Indigo"

A Business Founded on the Rock of Friendship and Integrity

**I**N a pleasant interview with the members of the firm of J. L. STIFEL & SONS OF WHEELING, W. Va., we were given a sketch of the wonderful industry which they have built up at Wheeling, W. Va. Starting in probably the smallest way that a business could be started, it is now one of the largest of its kind in the country, and is known not only in the United States but all over the world.

In describing this growth, Wm. F. Stifel, the president, said: "This business was established on the basis of FRIENDSHIP with the customers, and our main principle has always been HONESTY of purpose in manufacturing a fabric of value and dealing with all our trade on that basis. In my opinion this is the main factor in any business that is to succeed.

I do not believe any business will endure that is not founded on INTEGRITY.

Our business was started as a small enterprise and has grown to an enormous one because our policy has always been to consider each customer as a personal friend, entitled to the best we can give him. It has not invariably seemed to our interest to do this but the rule has been rigidly adhered to and in the long run, it has brought us prosperity, and we feel we have established an industry to be proud of. No matter where you turn now-a-days, railroads, factories, shipyards, machine shops, farms, throughout the world, you will find a large number of the workmen and working girls dressed in the cloth we manufacture. It is an ideal fabric for them. Tough fibred, practically indestructible in color and weave, soft finished, easily laundered, made in a variety of weights and patterns, STIFEL'S INDIGO CLOTH has never been successfully imitated.

I am proud of our product and the policy that was originated by my father in 1835 when he founded the firm of J. L. STIFEL & SONS. These will never be changed as long as I am president and as long as the business remains the property of the family, for these same ideas are heartily believed in by the other members of the firm, the two sons of my brother and my own son. So you will see that the big Indigo Cloth with the Little Boot Trade Mark on the back, has in reality been established on a solid rock foundation. It is so well known as a good, honest fabric and the business is so well established and protected that it is my prediction that it will continue to live under the same principles for many, many years and in its growth become better established each year in the minds of the people as an honest fabric that gives the people their money's worth."

## Readers—Please Note!

*It will be seen that most of the items on this and the opposite page, are dated months back. Limited space alone has prevented their previous publication. There are many more to come and we hope that conditions will warrant their more seasonable appearance in the Magazine, even to an increase in the number of our pages.*

## Swedish American Line's Party for Sweden

THE members of this party left Minneapolis via the Chicago Great Western Railroad on the evening of November 29, under the personal supervision of H. C. Strohm, our northwestern passenger agent, and Mr. Nils Nilson, general northwestern passenger agent of the Swedish American Line, through to New York.

The party numbered 170 passengers, from Minnesota, North and South Dakota, Montana and Wisconsin. Practically all of them were sons and daughters of Sweden, intent on spending Christmas among relatives and old friends, to return to the United States again in the spring. The party comprised people from various walks of life, farmers, contractors, physicians, lawyers, etc.

The party left Chicago on No. 10 on the morning of November 30, and arrived at Washington, D. C., on December 1. Advance arrangements were made to have the entire party photographed on the steps of the Capitol, a picture of some of the passengers being shown on this page. Five hours were spent sight-seeing in Washington, the party leaving for New York at 1.00 P. M.

When crossing the Delaware river Mr. Nilson reminded the passengers of the fact that it is now more than 283 years since the first party of Swedish emigrants left Sweden for America in two small sailing vessels, named "Kalmar Nyckel" and "Fogel Grip." They landed at Delaware Bay, and there started the first Swedish colony in America. Other Swedish immigrants arrived here even earlier, but the two vessels above named sailed from Sweden direct to Delaware Bay. They were more than six months on the way across the Atlantic and arrived at Delaware Bay in the spring of 1638.

Since then Swedes have reached our shores in ever increasing numbers, thus necessitating the establishment of a direct line of large, comfortable, steady and modern steamers between Gothenburg and New York.

Mr. Strohm, our northwestern passenger agent, accompanied Mr. Nilson on board the "DROTTNINGHOLM," on the sailing date, December 3, and had an opportunity to thoroughly inspect the ship, as well as to confirm by his own experience the excellence of its cuisine.

Promptly at two o'clock the whistle blew for departure, and the steamer left

Baltimore and Ohio Cleveland to Washington Tcuring Par

for far away Sweden, arriving at Gothenburg the afternoon of December 13, thus making the journey in about nine days and 19 hours.

J. J. Doyle

JONES & LAUGHLIN STEEL CO.

Woodlawn, Pa.

February 27, 1922.

Mr. J. J. Doyle, C. P. A.,  
Baltimore and Ohio R. R. Co.,  
Pittsburgh, Pa.,

Dear Sir:—

I recently received a letter from my mother, who went to De Land, Florida, in part over the Baltimore and Ohio, and in it she spoke of the courtesy and kindness extended her by you when securing her reservations and tickets.

She has asked me to thank you for her. This I am doing and at the same time wish to include my own thanks. It is always a pleasure to do business with people who are kind and courteous and who do not deem it a hardship to go out of their way to do a favor. This is all the more appreciated by me because the recipient of these courtesies was my own mother.

And as we all love our mothers, so do we all appreciate any help or kindness shown them by others.

That you may be happy and enjoy success and prosperity is the sincere wish of my mother and myself.

Cratefully yours,

(Signe) Joseph E. Cochran

Swedish and American Line Special Party for S. S. "Drottningholm,"

Received by Mrs. Harding at the White House on March 30

### The Agent at Dawson, Pa.

WASHINGTON COAL AND COKE CO.  
Dawson, Pa., December 8, 1921.  
Superintendent,  
Baltimore and Ohio Railroad Co.,  
Pittsburgh, Pa.

ATTENTION, MR. DURANT:

Dear Sir:—I presume it is rather unusual to have a patron of your railroad write you concerning your agents, more especially when they have no criticism to make, but I feel that in justice to your agent and clerk at Dawson, a word of commendation is due them.

I had occasion to observe the courtesy and efficiency of your agent and clerk here on Monday evening, especially. I was acting as pall bearer when the body of Mr. J. H. Price, our secretary and treasurer, was put on Train No. 15 for Milwaukee, Wis. Mr. Muirhead showed rare courtesy and efficiency on this occasion and I determined at that time that I would bring the matter to your attention.

Another thing which to me is very pleasing is their habit of a pleasant "thank you" when you pay a freight bill or purchase a ticket.

My personal opinion is that your patrons at Dawson, Pa., are being more efficiently and courteously treated right now than they have ever been in the past.

I am writing this letter, of course, without their knowledge or solicitation, because I feel it is due them.

Yours truly,  
(Signed) GEO. L. WHIPKEY

### Train Porter Wilson to the Fore

INTELLIGENCER  
PUBLISHING COMPANY,  
Publishers and Proprietors  
Daily and Weekly Intelligencer,  
Job Printers and Book Binding,  
Wheeling, W. Va.

August 25, 1921.

MR. C. W. GALLOWAY, V. P.,  
Baltimore & Ohio R. R. Co.,  
Baltimore, Md.

Dear Sir—I am writing you this letter to recommend to your good graces one James P. Wilson, train porter on No. 15 out of Baltimore.

Three weeks ago I lost a ticket from Baltimore to Clarksburg, and Mr. Wilson found it on the platform of the train and promptly returned it.

He would not accept any money for his honesty, and I feel that such employes should be commended to their superiors.

Believe me to be,  
Yours very truly,  
(Signed) JOHN W. KIRK

### Service Brought This Encouraging Letter

Washington, D. C., October 13, 1921  
MR. W. G. BROWN,  
General Passenger Agent,  
Baltimore and Ohio Railroad,  
Chicago, Ill.

Dear Sir—I desire to express my appreciation of the excellent service we received on a recent trip over your road, from

Chicago, Illinois, to Washington, D. C. Uniformity in speed and care exercised in starting and stopping were noticeable features. The Pullman porter service was of an exceptionally high character. I have never traveled with a porter who, for efficiency in every respect, excelled the one on this run. I traveled on train No. 10, Pullman No. 60 (Sidor), leaving Chicago at 9.30 a. m., on October 10. As usual, we arrived on schedule time.

Yours very truly,  
(Signed) W. G. HOUCK,  
U. S. Bureau of Animal Industry.

### Commends Service to Station Agent

UNITED STATES DEPARTMENT OF AGRICULTURE  
Beltsville, Md. October 24, 1921

MR. E. W. PEARRE, Station Agent,  
Beltsville, Md.

Dear Sir—On my recent trip to St. Paul Minn., I was pleased to note that the Baltimore and Ohio was right on the job and after business. A representative of the Baltimore and Ohio was on hand to fix up transportation both in going from Washington to St. Paul and also for the return trip.

Personally I like to travel on your railroad because of the good meals served in the dining cars and because of the provision made for the comfort of the passengers in the way of observation cars.

Very truly yours,  
(Signed) V. E. WOODWARD

## The Working Man's Dinner Pail

By Lillian Betony

Daughter of Section Foreman, Cadell, W. Va.

*Note: Among the entries sent in for our women's Dinner Pail Contest last summer was one from Lillian Betony, youngest of the contributors, being a girl of fourteen. Her paper, while it did not exactly fill the requirements of the contest rules, contains some excellent ideas and special study and much preparation. We are glad to present this essay to our women readers, and we hope to hear from Lillian again. We prophesy that she will be, if she is not already, a good housekeeper—Associate Editor.*

THE working man always has an inspiration according to whether his dinner is well packed or not. The better his dinner is made up, the more inspiration, energy and thought he has in his work. The meal or lunch which has to be made up has to be judged according to whether it is breakfast, dinner, or supper, also according to the season, the weather; whether the man is strong, healthy, and a good eater; whether he has a light or heavy job. But we need most to calculate the output of energy.

The next thing to be considered is the function of the foods. The foods provide (1) material for the growth of the body as well as for the repair of worn out tissues. (2) They furnish the necessary energy for muscular work and for the maintaining of heat in the body. The value of energy in foods is another important thing. The heat of the body as well as the energy used in muscular work results from the oxidation of food materials.

### The Amount and Nature of Foods Necessary for Health

It is pretty hard to find out just how much and what kind of food is best adapted for the preservation of health; evidently many conditions enter into the problem, such as one's age, weight, and occupation, also the climate in which one lives.

Since the fats and carbohydrates have nearly the same function, to state the food requirements for a period of say 24 hours, it is sufficient to give simply the weight of proteins necessary.

The following dietary standards, proposed by Atwater, are generally accepted. They give the food requirements for a period of 24 hours:

### Preparation

We will now discuss how a good many meals are prepared and the points to be emphasized. In my opinion, Honorable Judges, I think there are some women who really don't care what they put into the dinner pail, while there are others who really care. There are some women who have no pride in their husband's meals; who do not get up in time; who let the husband cram a few things into the dinner pail, maybe dirty, maybe clean, by luck. This is not right, for dirtiness will develop disease, etc.

There are some women who are spenders, and who just get sweets and such foods that have small food values.

The main part to be emphasized in this problem is the *COST* of food as related to the *NUTRITIVE VALUE*. The food should be carefully selected and well adapted to the needs of the individual who is to eat it. I think that it is sometimes well that the husband should sometimes lend a hint to wifey as to what he likes best in his dinner pail. And another thing: Even if the food is selected and has good food values, if it is not cooked right, there will be no appreciation of the food; if it is not fit to eat by the time for the meal, that will be worse yet. But I think this danger can be lessened by the use of carefulness and the utility of the wife's hands to make a perfect meal for her husband, who will appreciate it and have more admiration for her cooking, making for happiness.

If a meal is not well prepared, the individual, if he is a hard worker, will soon be worn out, as he will not get enough food to build up the tissues of the body. In my opinion, this is what makes him cross and surly. Take care of the bread winner of

the family, and life will be smiles clear through.

### How Shall We Prepare the Lunch?

Now, let us see what we would fix for the dinner pail, how we would fix it, in pail, basket, or box.

I think a dinner pail with a thermos bottle in which to keep anything warm or cold, is best adapted for the hard working railroad man, but as the excuse generally comes up, "They are too expensive," etc., we will make the best we can of just the dinner pail. What kind? An aluminum one, clean and shiny, or a dirty, rusty one? Well, I prefer the aluminum dinner pail, one that the consumer of the meal may be proud of eating from. For whom? Well, let's say a track foreman. What meal? Let's say dinner.

I would have a salad, sandwiches, fruit, cake, meat, strong coffee (cream and sugar). Well, we don't want too much; enough of these and he'll be satisfied.

Now that we've named the different things needed, how are you going to fix them?

I would fix five sandwiches, say either ham, cheese, or some salad with meat. The bread is to be fresh, and sandwiches should be wrapped in clean wax paper to keep them fresh and clean.

As for salad, I think chicken with salad dressing would be appropriate. Pimento and cheese salad is also good for this purpose; other "make-ups" can be gotten from any good recipe books. The fruit can be either raw, such as banana, orange, or grapes, or it can be canned peaches or other canned fruits. Cake will always be more appreciated if made by wifey's hand than if bought at stores, or home-made pies may take the place of this. Pies must be well made, however, without hard tack for crust. As to the meat, use steak, Chile Con Carne, or any other compounds of meat. These should have little relishes to go with them. Some men like onions or celery; it will not hurt to put these in extra. Coffee should be prepared pretty strong; if the weather is warm, the milk should be boiled so as to kill all of the living micro-organisms so as to keep the milk from spoiling. Sugar should be added. Everything in the pail must be put in in order. Salad should be put in an individual casserole and a teaspoon and small fork should be laid on top carefully. Everything should be put so as not to muss up. Then the lid goes on—a little shining on the outside—and the meal is packed!

(Fuel values of any of the principal foods may be had by writing the associate editor.)

### Fried Tomatoes

Slice as many tomatoes as needed. Sprinkle with pepper, salt and sugar; dip in cracker dust or cornmeal, and fry in hot fat. If preferred, they may be fried without the addition of either cornmeal or cracker dust, and served with milk sauce.

### Character of Individual

Character of Individual	Protein Required	Fuel Value
Man with very hard muscular work	175g	5500 calories
Man with moderately active muscular work	125g	3400 calories
Man with light to moderate muscular work	112g	3050 calories
Man with sedentary work	100g	2700 calories
Man with light work (leisure)	90g	2450 calories

## Ginger

(A Dialogue that really took place)

**Time:** Saturday afternoon.

**Place:** Day coach in New York train.

**Persons:** Little Girl and Big Conductor.

(Conductor enters and starts down aisle. Little Girl catches him by the sleeve.)

Little Girl: Mister Conductor, when are you going to get us to New York?

Big Conductor (stopping and taking hold of her hand): What's this? And why are you so anxious to get there?

Little Girl: Because my Grandmamma lives there and she has a kitty cat for me, an I want to see it, 'deed I do.

Big Conductor: Well, well! Didn't you ever have a kitty cat of your own?

Little Girl: Oh, yes, Sir, but he went away. He ran away one night, and never came back. He was gray and his name was Ginger. That's what I'm going to name my new kitty cat when I get him.

Big Conductor: Well, now, isn't that funny? Did Old Ginger have red eyes?

Little Girl (laughing): Oh, no, Sir, he had—

Big Conductor: Lavender eyes?

Little Girl: Oh, no, he had—

Big Conductor: Yellow eyes?

Little Girl: No, Sir, I'll tell you, I know, for he was *my* cat. He had gray, greenish eyes.

Big Conductor: Well, what do you think of that? I had a cat named Ginger, too. Let me tell you about him. He lived with us for many years. At last he got a bad tooth. Then he went blind. Finally, he died and went to cat heaven.

Little Girl: Did your cat say his prayers before he went to sleep? My Ginger used to put his paws over his eyes and say his prayers.

Big Conductor: I don't know about saying his prayers, but, believe me, he knew how to ask for something to eat.

(Train pulls into Bound Brook, New Jersey.)

Good by, Little Girl, give my love to Ginger.

Little Girl: Yes, Sir, Good by.

## Helpful Hints

By Marie Slatterick,

Division Engineer's Office, Wheeling, W. Va.

WHEN using confectioner's sugar for making cake icing, always mix it with hot water or milk, as the case may be. The hot liquid dissolves the sugar more completely and takes away that "sugary" taste.

Lemon juice is excellent for manicuring your nails. It removes the stains and leaves the nails pretty and pink.

"Knickers" are much handier than skirts when you run a car; they don't get in the way of the handling mechanism.

When you have your photograph taken, please don't use rouge. It always photographs dark or black and makes shadows on the face in the picture.

## Apple Sauce Cake

As baked by Mrs. George D. Crone, wife of retired usher, Camden Station, Balto., Md.

Now here's Sister Crone with an apple sauce cake!

Her folks all can tell you she knows how to bake.

'Twill do for a birthday, for Sunday, or when

You've company for supper, (and they'll come again).

You do not need eggs—now isn't that nice?

And it tastes like a fruit cake all loaded with spice.

Take two cups of sugar, two of stewed apples, too—

The latter unsweetened, for the two cups will do—

Of good, yellow butter a full quarter pound,

Beat well together and stir 'round and 'round.

Two teaspoons of soda, dissolved in some milk—

A quarter of a cupful, and beat smooth as silk.

Now four cups of flour, seeded raisins one pound,

Half a teaspoon of salt, half a nutmeg so round;

Half a teaspoon of cloves and of cinnamon, too,

Now you're ready to bake it—you'll know what to do.

If you want it for Christmas, 'twill make your soul glad

If some citron and 16 fine walnuts you add

## Dear Women Readers:

Every morning, just before the time for my alarm clock to ring, I am awakened by the voice of a little boy. Rain or shine, it is all the same. Down on the street just below my window he walks. He doesn't even know that I am listening to his singing, but as sure as morning comes, he is there. He lives in a little side street. His father goes to work very early in the morning, and the little fellow gets up when daddy does, so that he can go for the bread for daddy's breakfast. I have never been able to find out anything about him. I only know that he is about five years old, and as ragged and as dirty as a little tramp.

One morning I arose a little earlier than usual and came out of the house just as he was going by. He had on the same clothes that I had seen from my window day after day—a little blue striped jacket with torn sleeves, showing soiled underclothing, and a pair of little straight pants of no particular color. It was a cold morning and he had no coat, but he did not seem to mind. He swung along at exactly the same gait as he has walked on every other morning for more than a year, his little hands stuck into his pockets, his head up, his chest thrown out, and his mouth open, for he was singing. No matter whether the words were right or not, he had the tune.

"Good morning," I called to him. He stopped singing, but kept walking.

"Hello," he said. I caught up with him and began walking beside him.

"You're a great little singer," I told him, "Do you know what you remind me of?"

"What?"

"A man once wrote a poem about a robin singing in the rain, and how beautiful his song was. I think that you're my little robin."

"Was the robin singing in the rain?"

"Yes."

"Was he up in a tree?"

"Yes."

"Wasn't he going after something to eat for breakfast?"

"No."

"Lazy thing!" he said scornfully, "Why didn't he go hunting for something to eat?"

"I suppose the man threw him some crumbs and he didn't have 'em."

"Huh! Well, he was a robin. I'm a man and I work for my living."

"You do," I assured him as he entered the store, "and you sing while you work."

Some folks can sing and some can work, but blessed is he who feels like singing while he is at work, for he it is who loves his job.

Yours sincerely,

Margaret Talbot Stevens

# The New Modes Feature the Charm of Simplicity

By Maude Hall

HAVING definitely decided upon the downward trend for waists and skirts as the new note to be emphasized this season, Fashion will continue to preach the vogue of the straight line dress and to laud the charm of simplicity.

Particularly becoming to the slender and youthful-appearing, is a dress of organdy embroidered all over with a scattered floral pattern. The long-waisted blouse closes at the left side, narrow plaits being taken into the underarm seams at the front. Draped over the straight, gathered skirt are panels of self-material which dip in points below the hem and have the edges finished with picot points in Irish crochet. Two-color satin ribbon forms the very narrow girdle, or belt, as you will. This is finished with a quaint little rosette and repeats the leading colors in the organdy. Finishing the elbow sleeves are cuffs of fine white batiste, while the neck is edged with a plaited ruffle of very dainty French net.

Quite unusual is a frock of unbleached linen, embroidered in the bold colors which characterize peasant embroidery. The trimming forms a border about the lower edge of the skirt and on the sleeves, which show their greatest fulness below the elbows. A round collar of self-material, edged with a very fine accordion plaited frill, finishes the neck.

According to the highest authorities, black has been abandoned for evening wear and its supremacy is seriously threatened for daytime use. Brown, which is shown in so many delightful shades, is black's most dangerous rival. It is lovely not only in the cottons, but

in woolens, such as the flannels de luxe, piquettes, twillcords, cashmeres and a new plain fabric called haska natte, because the cashmere wool is woven in a square weave, as are all the natte materials.

The plaids and checks are favored for frocks of the jumper variety. Practical and smart is a design in brown and tan check, trimmed with tan flannel. The dress is cut in a pronounced V back and front, the armholes being as large as the neck is deep and rather inclined toward the same shape as the neck. There are shirrings at the sides, held in place by the aid of elastic bands inserted on the reverse side of the dress. Tan flannel forms the blouse and band at the lower edge of the skirt

The cape fills such an important place in the season's wardrobe, that more time than ever is spent upon its design. For very late Spring and early Summer there is a new model, fashioned of soft silk crepe or crepe satin. It has a round yoke, to which the cape proper is gathered. Deep tucks trim the cape, starting at the yoke and continuing to the lower edge. They extend only around the sides, leaving the back always in panel effect and the front forming a panel when the cape is closed.

## Sizes of Patterns

DRESS No. 1030. Sizes 34 to 48 inches bust.

DRESS No. 9997. Sizes 34 to 46 inches bust and 16 to 20 years.

DRESS No. 9995. Sizes 34 to 44 inches bust.

GIRLS' DRESS No. 1039. Sizes 6, 8, 10, 12, 13, 14, 15, 16, and 17 years.

DRESS No. 1017. Sizes 34 to 48 inches bust.

DRESS No. 1013. Sizes 34 to 46 inches bust and 16 to 20 years.

## Introducing New Children's Modes

SIMPLICITY and careful attention to lines are emphasized in the new styles for children. Take, for example, the little model to the left, carried out in figured pique. It is ornamented only with collar and cuffs of white organdy, yet is exceedingly pretty. Medium size requires  $2\frac{1}{4}$  yards 36-inch figured, and  $\frac{1}{4}$  yard plain material.

A chintz print with rust as the predominating color, is used for the second dress, which features a suspender arrangement. The blouse is of light tan batiste, while the tie is of two-tone satin ribbon, combining rust and navy blue. Medium size requires  $1\frac{3}{4}$  yard 36-inch material for the skirt and  $1\frac{3}{4}$  yard 36-inch batiste for the blouse.

FIRST MODEL: Pictorial Review GIRLS' DRESS No. 9908. Sizes, 2 to 6 years' Price, 30 cents.

SECOND MODEL: GIRLS' SKIRT No. 9909. Sizes, 6 to 18 years. Price, 20 cents.

BLOUSE No. 9930. Sizes, 6 to 18 years. Price, 20 cents.

## Lesson in Home Dressmaking

### Slip-On Blouse with Long-Waisted, Removable Blouse Suitable for Two Materials

#### Youthful Frocks Echo Grown-Up Styles

**W**EARING a dress that makes her consider herself first in importance, the little miss gives preference to straight lines and kimono sleeves. Plain and plaid gingham are used for its development, the quantity of material required being equally divided,  $1\frac{1}{4}$  yard of each, 36 inches wide, for medium size.

The straight-line frock of brown gingham which takes second place, is developed in copper color gingham trimmed with self-material in blue and copper plaid. A narrow belt, twice wound round the finger only emphasizes the length of the waist. The sleeves are gathered into narrow bands of the plain gingham. Medium size requires 4 yards 36-inch plain and 1 yard 36-inch plaid gingham.

FIRST MODEL: Pictorial Review DRESS No. 9902. Sizes, 4 to 10 years. Price, 30 cents.

SECOND MODEL: DRESS No. 9926. Sizes, 34 to 48 inches bust. Price, 35 cents.

#### Fruit Punch

(This recipe makes about three quarts.)

1 quart tea, prepared as for iced tea.

1 pineapple, shredded, or 1 large can preserved pineapple, shredded.

3 lemons (pulp and juice).

6 oranges (pulp and juice).

$3\frac{1}{2}$  cups sugar.

1 pint grape juice.

1 pint water.

1 small bottle maraschino cherries.

If preserved pineapple is used, add the juice also, for less sugar will then be required. If the lemons are boiled for a few minutes they become very soft and a greater amount of juice can be obtained from them; do not use the skins of the lemons. Cut the cherries in halves and add these last, also with their juice. Water can be used instead of the tea, but tea makes a fine basis for any kind of fruit punch. The grape juice may be omitted and water used instead, if preferred. Chill and serve in sherbet cups.

**T**WO-FABRIC blouses are as much in fashionable demand as two-fabric dresses. A pleasing model is this, which introduces an overblouse with deeply cut neck and large armholes. The blouse is gathered in front and back to a round collar, while the sleeves are slashed and gathered into narrow bands at the wrists. In medium size the model requires  $1\frac{1}{2}$  yard 36-inch material for the blouse and  $\frac{3}{4}$  yard 36-inch wide for the jumper.

The front and back of the jumper are cut on an open width of material, as shown in the cutting guide. The blouse, however, is cut from the folded goods, the front and back being laid with triple "TTT" perforations on the lengthwise fold. Sleeve and cuff have the large "O" perforations resting on a lengthwise thread.

To make the blouse, slash through the fold at center-front of front section, from upper edge as far down as the large "O" perforation and finish slashed edging for closing. Close underarm and shoulder seams, then hem the lower edge of the blouse, inserting a tape or elastic to regulate the fullness. For the round neck, adjust tape or a strip of material the length of the stays underneath the gathers at upper edge in front and back, and draw gathers in to fit the stays.

Slash sleeve up from lower edge along line of three single small "o" perforations and finish slashed edges. Close seam as notched. Gather sleeve at lower edge between "T" perforations and sew cuff to gathered edge. Lap end of cuff matching small "o" perforations and finish for closing. Sew sleeve in armhole as notched, with small "o" perforation at shoulder seam. Bring seam of sleeve to underarm seam, easing in any fullness between the

notches. Hold sleeve toward you when basting it in the armhole.

Then take the overblouse and close underarm and shoulder seams as notched. Leave left underarm edges free and finish for closing. The neck and armholes may be finished with braid or blanket stitch embroidery.

SLIP-ON BLOUSE No. 9914. Sizes, 34 to 40 inches bust. Price, 35 cents.

It was little Billie's first Christmas tree. How beautiful it was! And Santa Claus had trimmed it, too. Trimming it meant hanging lots of lovely balls and tinsel on it. It must be wonderful to trim a tree. "Billie" was thinking all about this when "Daddy" came in.

"I shall take little "Billie" over to the barber's to get his hair trimmed," said "Daddy" to mother.

"Oh, no, please don't!" begged "Billie" "it's all right to hang tinsel on Christmas trees, but 'ceel I don't want any on my head!"

## Here's Where You Get the Famous Deer Park Water

By Lena Reis, 14 years old, Daughter of Operator, Deer Park, Md.

Second Prize, Class A.

Deer Park, the town where I was born and raised, is a town of about three hundred and fifty inhabitants. It is situated on a tableland among the glades of Garrett County, Maryland, and lies about 2,448 feet above sea level. It is about six miles east of Oakland, the county seat of Garrett County, and is one mile square in size.

Deer Park was built up on the site of the former Penny Estate, known as "Peace and Plenty" tract, in the year 1865, by Col. T. B. Davis and a Mr. Emil F. Droge. Mr. Droge operated a large lumber mill at this time and owned a private herd of deer; hence the name of the town. Deer Park was incorporated in the year 1883.

Friendly Hall, which is used by residents for social gatherings of all kinds, is a gift of Mr. and Mrs. J. W. Williams. We also have another very large hall which is hired out for dancing, basketball and roller skating. There is also a stage for amateur theatricals and entertainments by schools and Sunday schools. This is known as Savedge's Hall.

The three general merchandise stores, where we can buy most anything that is wanted, are used by citizens and farmers in our neighborhood. There are two general blacksmith shops. There are Methodist, Lutheran, and Union churches, and a Roman Catholic chapel, which is located among the Deer Park Hotel cottages. Two pool parlors, a barber shop, drug store, and one resident physician are all located here. The physician is Dr. Sollars.

We have a number of boarding houses where people of small means may stop for a meal or spend a short time during the Summer. There is a post office, under the management of Postmaster L. D. Thrasher. There are two rural carriers. At present, Mr. Albert Thrasher is mayor of our town.

Here are the well known Deer Park Hotels, three very large buildings and ten cottages attached, also the following private cottages: Josias Pennington, Lord Cottage (which was built and occupied by former President C. K. Lord, of the Baltimore and Ohio), Col. Hyle Cottage, and the beautiful home of Col. John T. McGraw.

Mr. T. Harrison Garrett also built a fine cottage here. Mr. John W. Garrett, who built a fine cottage beside the Deer Park Hotel, had an artesian well drilled close to the Baltimore and Ohio tracks. This well is 2400 feet deep; it was drilled in 1873, but the flow of water has never ceased.

An 18 hole golf course is located on the Hotel grounds. Here a number of golf tournaments are held every season. There is also a large tennis court where a number of contests are held yearly. Lovely drives may be found in these grounds and in the vicinity of Deer Park.

The beautiful grounds and residence of A. T. Watson, purchasing agent for the Consolidation Coal Company, adjoin our town. These grounds, the cottages, and hotel buildings are all lit by their own private electric lighting plants.

Grover Cleveland and his bride, who was Miss Folsom, spent their honeymoon in Cottage No. 1. Any number of wealthy and prominent people throughout the world spend their summer vacations here.

The famous Boiling Spring, which is located two and a half miles from our town, supplies all of our Baltimore and Ohio dining cars with water, as well as the hotel at Deer Park.

The first cottage that was built at Deer Park is known as "Fair View Cottage."

The Man in the Moon

My reasons for liking my town are its healthful climate and its clean and sanitary conditions.

We have here a schoolhouse, where grades up to and including the seventh are taught. Miss Mary Pickrell is principal, and Miss Mary Holtschneider, assistant. For our higher education we go to Oakland, Maryland.

## The Man in the Moon

By Lena Hoppe, 10 years old,  
Baltimore, Md.

Dear Aunt Mary:

I read about the story that Mary Clarke wrote, so I thought it would be nice to write one myself. My teacher told us this story about the man in the moon, so I thought I'd like to tell it to you.

Sincerely yours,

(Signed) Lena Hoppe

One Sunday morning a wood cutter was in the woods gathering wood. After he had gathered a few sticks he started for home.

He had walked but a little way when he met a man going to church. "Do you not know that this is Sunday," the man asked, "Why do you gather sticks on Sunday? Put them down!"

"I cannot," replied the wood cutter, "because my wife needs them with which to cook dinner. I dare not go home without them."

"Then," said the stranger, "you shall rise to the moon, where there is Monday, or Moon's Day. And you shall be a warning to others who work on Sunday."

The stranger vanished, and the wood cutter felt himself rising. After a time he arose to the moon.

Now, on a clear night, when the stars are shining, you may see the man in the moon, bending under his bundle of sticks.

## At Last the Secret's Out

**G**IRLS and boys, here's a deep, dark secret that your poor old Aunt Mary thought that nobody knew about, when along comes Pearly Reimsnyder who "lets the cat out of the bag." Pearly

Lena Hoppe

## The Sun and the Rain

By Edna Akes, daughter of Foreman Kirby Akes, Xenia, Ill.

The sun came out on a rainy day  
And found the raindrops all at play,  
He drove the raindrops all away,  
And set the sunbeams all at play.

The sunbeams played and played so much  
Old Father Cloud declare I that such  
Nonsense he'd not have. He covered the  
sun,  
And they all stopped playing, every one.

And again the raindrops had their way—  
They all came down and went to play,  
But after the raindrops had gone that day,  
The sunbeams once more had their way.

## Springtime

By Amy E. Gatchell, White Marsh, Md.

Springtime!  
Beautiful Spring!  
When all the world is full of sun,  
When flower buds come undone!

We may not wish to bear  
The thought that the dear  
Sledding is gone,  
But oh, how sweet  
Is the bird's sweet song!

Some bright day  
When the world is gay,  
We'll have a feast, and oh, what fun  
Out in the open fields of sun!

With all these lovely thoughts of Spring,  
Glad Summer bells at our doors will ring,  
And though the sports of wintry days  
Are o'er, we welcome Summer's ways.

Drawn by Ella L., daughter of Freight Checker Beckman, Baltimore, Md.

## Dear Girls and Boys:

What a fine time we had with our contest! Now let's get busy and think of some other things you'd like to see on our Children's Page. For the benefit of the little folks who have never written to me, I would say that all you need to do to join our circle of little people, is to send a contribution for our page: poems—they must be your own, compositions, original stories, pictures of your pets, your own photographs, drawings, letters telling me how to make or to do some of the things that children like to do, games to play, etc.

That reminds me of something. Suppose you all write and tell me what kinds of games you like to play and how you play them. Then, as soon as I have enough to fill a page, we'll have a whole page of new games. Did you ever think that little people in different parts of the country play different kinds of games? Well, they do, and it everybody will tell how to play the game that he or she likes best, what a lot of new games we'll all have.

Write only on one side of the paper. If you have or can get some pictures showing little people playing these games, it will be great fun. Don't you think so?

Yours lovingly,

Aunt Mary

entered the Our Town Contest, and along with the entry she sent the following letter. Write and tell Aunt Mary how to punish Pearly for telling her secret.

DORSEY, MD., February 9, 1922.

Dear Girls and Boys:

Here is a true story about Dorsey that I am going to tell you. My mother told it to me.

One day there came to the school at Dorsey a young lady teacher. The boys and girls did not think that they would like her at all, for she pulled the boys' hair when they were naughty, washed their mouths out with soap when they said bad words, and used a ruler on everybody who needed it.

But by and by, she began to teach the children new games to play, new pieces to sing, and little plays. And so they began to love her. And though that was so many years ago, she still comes back sometimes to Dorsey School to see her old pupils and to get acquainted with the new ones.

Now, if you'll promise that you won't tell anyone, I'll tell you who she is. She is now an aunt of lots and lots of girls and boys, and her name is AUNT MARY.

Yours lovingly,

Pearl Marion Reimnsnider

Drawn by Anna Louise Hay, Baltimore, Md.

## Little Letters from Little People

YOU have seen the pictures of a number of our little people who entered the contest. Lots of them were brand-new contributors to the Children's Page. A number of others have written since then. One of them is little Ellen Scanlon, who is the daughter of a fire chief of the Baltimore and Ohio at Mahoningtown, Pa.

Lillian R. Reay, the daughter of Harry Reay, who has charge of the MAGAZINE, sent in a nice little story about her trip to St. Louis. This we hope to publish on the Children's Page before long.

You all remember Rosalie Swink, of Connellsville, Pa. Well, Rosalie has drawn us a picture of a doll. Here you see it with its cunning little eyes.

We have also a doll, drawn by Mildred Hadden.

Sylvia Fansler, a little friend of Gladys Shaw, Fairmont, W. Va., and a daughter of Adam Fansler, a Baltimore and Ohio policeman, asked Gladys if she might join our circle. Of course, she may. Send us a letter Sylvia, and tell us about the games you like to play.

Now comes Lucille Lavigne with a story about a little girl who did not mind her mother. Lucille's story will certainly find a welcome place on our page, as will the lovely little story of the old man up in the moon, which was sent us by Lena Hoppe. Lucille lives in McMechen, W. Va. Lena lives in Baltimore.

Another artist is Freda Brown Michaels, who was one of the prize winners of the contest. We were sorry not to get her own photograph to go with the others, but we do hope that she will send it to us soon. Freda has sent us a lovely Indian picture, which you will also have the pleasure of seeing.

If we can find the space on this page, we're going to let you read the Spring poem, written by Amy E. Gatchell, daughter of the agent at Cowenton, Md.

Edna Akers, little daughter of Foreman Kirby Akers, also has a poem of the sun and the rain. You may look for that, too.

Will Gladys Shaw please send Aunt Mary her address?

Congratulations to Sarah Pennington on her splendid school work.

We have a drawing by Harley Kight, of Keyser, W. Va. Look for it next month.

Emmeline and Irene, twin daughters of Switchman and Mrs. Slattery, Dayton, Ohio

## Summary of Points Awarded in "Our Home Town" Contest

CONTESTANT	POINT VALUES			TOTAL VALUES
	JUDGES:			
	MRS. DICKENS.	MR. LOWES.	MR. DICKSON.	
CLASS A.				
No. 10. Dorothy V. Cannon, daughter of engineer, Lexington, Va.....	75	75	.....	150 points, first prize (tie with Mary Clarke)
No. 35. Ethel Gardiner, daughter of electrician, Baltimore, Md.....	50	.....	.....	50 points, honorable mention
No. 44. Mary E. Clarke, daughter of general superintendent of Transportation, Baltimore, Md.....	100	.....	50	150 points, first prize (tie with Dorothy Cannon)
No. 11. Lena J. Reis, daughter of operator, Deer Park, Md.....	.....	100	.....	100 points, second prize (tie with Helen Leslie)
No. 25. Lenore Taylor, daughter of operator, Aiken, Md.....	.....	50	.....	50 points, honorable mention
No. 41. Helen May Leslie, daughter of fireman, Pittsburgh, Pa.....	.....	.....	100	100 points, second prize (tie with Lena Reis)
No. 21. Freda B. Michaels, daughter of engineer, Somerset, Pa.....	.....	.....	75	75 points, third prize

No. 34. Irving Walker, son of employe, Brunswick, Md.....	.....	100	.....	100 points, third prize (tie with William Keifer)
No. 43. William Keifer, son of machinist, Mt. Clare, Baltimore, Md.....	.....	.....	100	100 points, third prize (tie with Irving Walker)

# Safety Roll of Honor

## Baltimore Division

On February 20, Brakeman S. L. Lambert, with extra east engine 4447, while looking over train when rounding curve at Bay View, discovered a broken truck on Baltimore and Ohio 128927. He immediately applied the air from the caboose and stopped the train. Car with broken truck was set off. Brakeman Lambert has been commended for his close observation of equipment and good judgment displayed.

Brakeman H. W. Kennedy, while standing at telephone booth at east end of Clayton siding about 9.40 p. m., February 24, as extra east, engine 4042, passed, noticed brake rigging down on Baltimore and Ohio Car 149258, about middle of the train. He gave a shut-off signal to the conductor who was on the caboose. The train was stopped just east of Van Bibber, where the brake rigging was removed with slight delay. A commendatory notation has been placed on the record of Brakeman Kennedy.

On February 27, about 9.10 a. m., Brakeman O. M. Howe, with No. 52 on the Valley, while passing through the ladies' car, felt a jar as if passing over a broken rail. This occurred about three-quarters of a mile east of Summit Point Station. Brakeman Howe informed the track supervisor, who was on the train, and who went back and found a broken rail. Mr. Howe has been commended.

About 6.30 a. m., on March 2, when Trackman H. A. Budnick was cleaning snow and ice away from the westbound pull-out switch at Joppa Md., he noticed a broken truck under Baltimore and Ohio 223103 in train of extra east, engine 4514, which was passing. He called the operator at "CN" Tower (Clayton) and notified him to stop the train. This was done and the car set out of train.

On March 11, while Engineer H. C. Quarles was looking around engine 4209, extra east, which was on siding at Bay View for a fill-out, he noticed 14 inches of tread of right second tender wheel broken off and missing. Had this condition gone unnoticed, there is little doubt but that a derailment would have resulted.

On March 21, Crossing Watchman E. Zipprian, Cowenton, noticed broken arch bar on truck under car Baltimore and Ohio 224471, hopper, 19th car in train of extra east, engine 4446. The crew was notified and the conductor brought the train to a stop by applying air from the rear. Investigation developed that the truck was down on the rail but was not derailed.

About 3.30 a. m., on April 2, while extra west, engine 4441, was passing Gaither Tower, Operator H. D. Spurrier observed something dragging under car in train. Train was stopped at Woodbine for examination which developed brake rigging was down under first truck of Baltimore and Ohio 12938.

Previous to this, on March 26, at 3.55 a. m., Operator Spurrier, in handing up orders to first 94, which was using No. 1 Track, discovered marks in the center of No. 2 Track, indicating that something had been dragging. He followed these

marks up and found an ashpan slide with two heavy bars of iron attached, wedged in between the rails at switch. After some difficulty Operator Spurrier succeeded in removing the obstruction from the track.

Operator Spurrier has been unusually active in the discovery of track and equipment conditions.

"It has been brought to my attention that while you were inspecting No. 14, Monday morning, March 27, at Harrisonburg, you discovered loose wheel under Southern coach 1482, the wheel being so loose you could spin it around on the axle.

"This was certainly a dangerous defect and I want to congratulate you on your close inspection and discovery. I assure you I appreciate work of this kind and hope that you will continue to make close inspection of cars in the future and be on the lookout for such defects. Your careful lookout in this case, no doubt averted a serious accident."

The above letter was originated by J. J. Robinson, master mechanic, Southern Railroad, Washington Division, with headquarters at Alexandria, Va. It was to C. L. Yeakle, car inspector, Harrisonburg, Va., who is carried on Baltimore and Ohio pay rolls, but performs joint inspection for the Baltimore and Ohio and Southern Railway at that point.

## To Superintendents

From the number of honorable mention items that often reach us in one month from a single division, we are confident that there are many merit performances by our employes which are not reported to the Magazine and which, therefore, are not published in this department. We would like to recognize here as many men as we possibly can for their special regard for Safety, and will appreciate the cooperation of superintendents and other division officers in seeing that the Magazine correspondents get complete monthly reports of these commendable performances.

Statement of observances and corrections by operators, Cumberland Division, March, 1922:

x Indicates car set off.

## Cumberland Division

As second 97 was passing Newburg on the morning of April 8, Crew Dispatcher F. M. Gibson observed brake rigging down on Baltimore and Ohio 14054. He notified the operator at Hardman, where train was stopped and rigging removed. The prompt action on part of Mr. Gibson kept the dragging parts from getting into the interlocking switches at Hardman.

CUMBERLAND, MD.,  
March 31, 1922.

MR. FRANK SEEDERS,  
Track Walker,  
Green Spring, W. Va.

Dear Sir—It has just come to my knowledge that on March 22, you noticed train No. 8 stop at automatic signal west of Dans Run Station at about 6.00 a. m. You being familiar with these signals, proceeded to locate trouble and found broken rail on No. 4 track, made temporary repairs and notified foreman, thus preventing serious delay to train at a time when you were not on duty.

Your prompt action in this case is appreciated by myself as well as the Management.

Yours truly,  
(Signed) C. W. VAN HORN,  
Superintendent.

## Connellsville Division

On March 8, when train of extra east, engine 7146, Conductor Swarner, was pulling into Hyndman, Connellsville Division, it was overtaken by Track Foreman L. C. Burket on a motor car. Mr. Burket informed the conductor that he had found several pieces of flange in the vicinity of Williams; and that as the pieces indicated a new break and were still warm, he felt sure the broken wheel was in Conductor Swarner's train.

The train was stopped by the conductor applying the air from caboose. Upon examination the lead wheel on north side of west truck of Baltimore and Ohio 27785 was found to have thirty-two inches of flange broken out.

This car was set off at Hyndman and a new pair of wheels applied.

Commendatory entry has been placed on Mr. Burket's service record.

## Pittsburgh Division

While Flagman J. D. Garloch was looking over his train standing on No. 2 track, "A" yard, Glenwood (which was No. 81 called for 8.40 a. m. in charge of Conductor Fisher), he discovered 10 inches of broken flange on wheel of Baltimore and Ohio 238280, a car of pipe from McKeesport destined Macon, Ga., moving via our line to

Kenova for delivery to the N. & W. Flagman Garloch called the attention of Conductor Fisher to the broken flange, who, in turn, notified the yardmaster at Glenwood. The car was taken out of the train and placed in the shop.

On April 1, train No. 78, engines 2222 and 2032, in charge of Engineer John Connelly, Fireman G. E. Church, Engineer P. J. Griffin and Fireman C. W. Gordon, was stopped at Coffey's Crossing on the W. & P. Sub-division, where they found train No. 38 had tank derailed at sink on account of track badly out of line. The engine crews of No. 78, without any solicitation or question, used the tools they had available and with the assistance of their shovels and shaker bars, assisted the track men to put track in condition to move the train over.

This excellent spirit of cooperation proves their loyalty to the Baltimore and Ohio and is appreciated by Superintendent Beltz and the Management.

#### Monongah Division

GRAFTON, W. VA.,  
April 15, 1922.

MR. FRANK ANAGAN,  
Flemington, W. Va.

Dear Sir—I have report that on March 23, you discovered wing rail on switch at Flemington sprung open and being held in this position by a large nut; and that you immediately notified our section forces, who made repairs and restored safe condition. Your prompt action probably averted an accident, and I desire to extend to you our most sincere appreciation.

Yours truly,

(Signed) B. Z. HOLVERSTOTT

Superintendent

#### Charleston Division

Section Foreman T. H. Posey, Orlando; W. G. Smith, Copen; W. L. Quickle, Gassaway; O. P. McCord, Orlando; O. G. Mills, Cowen; J. E. Riffle, Crawford; A. L. Wilfong, Buckhannon; S. L. Queen, Horner; J. F. Woodell, Gillespie; E. L. Tyo, Frametown; S. M. Cochran, Flatwoods; Burley King, Otter; and W. L. Findley, Coger—have all been commended for their efforts in connection with GOOD HOUSEKEEPING, sending in old material found on line, etc., and thereby helping economize.

Conductor H. E. Bragg, Conductor Brake of the Elk Line, and Conductor B. E. Jeffries of the Gauley Line have been commended for interest in getting their trains safely over the road.

Frank Holt, agent at Strange Creek, has been commended for assistance rendered train crews.

Walter Sharp, son of our pumper at Otter, has been thanked by our superintendent for having observed brake rigging down on a passing freight, and calling train crew's attention to it.

Agent J. W. Sutherland, Midvale, has been commended for interest in conserving the lawful revenue of the Company.

Operator M. F. Hutson has been commended for noting and calling train crew's attention to brake rigging down on a freight train passing his station, Bower, W. Va.

#### Newark Division

On April 12, John Early, proprietor of a confectionery and lunch room located at the intersection of the Ohio Service street car line and the Baltimore and Ohio Railroad, East Cambridge, Ohio, discovered that a portion of a brake rigging had come loose from some freight train (presumably

No. 89 which had just passed, and had been driven into the ground between the ties of the main track with such force that it could not be removed by hand. Mr. Early realized that it would derail a westbound train if it was not removed, and, knowing that passenger train 33 was about due, called the operator at Mineral Siding, who reported that No. 33 was by his office. Mr. Early flagged No. 33 and the obstruction was removed by using a cable fastened to the engine. Train No. 33 was delayed less than ten minutes. Mr. Early's interest in public welfare and his prompt action in this emergency have been brought to the attention of Division Superintendent Kruse who has, by letter, commended and thanked him for his thoughtfulness, the omission of which might have resulted in a serious accident.

#### Akron Division

On March 21, while No. 14, engine 5016 was being inspected by Fireman J. O. Hardwick at Willard, Ohio, he discovered that one of the engine truck wheels was loose on the axle. The engine was immediately cut off the train and taken to the shops for repairs. Mr. Hardwick's close observance in this instance averted a serious accident. Superintendent Stevens has recognized his prompt action in the safe movement of trains by writing him a letter of appreciation.

Brakeman William Avery, on second 94, engine 4093, while at Ohio Junction on April 11, discovered car off center. He had car set off without being damaged. Brakeman Avery is commended for his close inspection of this car. His prompt action in this case no doubt averted a bad accident. Superintendent Stevens has written him a letter of appreciation.

On April 13 at 5.40 a. m., Section Foreman J. F. Keller, Section No. 24-A, noticed automatic signal standing red against traffic. He at once went to locate trouble and found a broken rail on No. 4 track, a quarter mile east of signal. He made temporary repairs until men could be secured to replace rail. This saved a delay to traffic and no doubt considerable damage to equipment. Foreman Keller is always on the job, whether during working hours or not.

#### Chicago Division

Crossing Watchman Stephen Kvaschitz, Columbus Avenue, Fostoria, has been commended for meritorious service. On the morning of April 3, a lady with two small children was crossing the tracks on Columbus Avenue. In some manner the lady's foot caught between the rail and crossing plank and was thrown violently to the walk. A train was rapidly approaching. Mr. Kvaschitz quickly ran to her assistance and succeeded in extricating her foot and placing her and the children in a safe position, just as the train passed.

But for the activity of this watchman, no doubt the lady (Miss Alvena Sorg) would have met with serious injury.

On April 17, H. Leighty, St. Joe, Ind., formerly Chicago brakeman, found broken rail near St. Joe bridge. He called the sectionmen to repair it and reported the condition to operator at HK Tower by telephone. The operator notified the train dispatcher.

#### Ohio Division

On March 17, E. C. Harper, agent—operator, Martinsville, discovered loose wheel and bent axle on fourth car from caboose of first No. 94. Train was stopped at New Vienna and car set out. Undoubtedly Mr.

Harper's close observance was the cause of averting an accident.

On March 14, C. A. Buckley, track foreman, Mineral, Ohio, noticed some gravel flying when No. 30 passed just east of Hope. He immediately called operator at Zaleski and it was arranged for train to be stopped at Mineral and inspected, where brakebeam was found down. The close attention of Track Foreman Buckley and his prompt action probably averted an accident.

#### St. Louis Division

On March 22, W. O. Guthrie, agent, Rivervale, Ind., while walking from his home at Tunnelton to Rivervale, found a badly broken rail at pole 119-20. He immediately reported it to dispatcher and section foreman.

Superintendent Stevens has commended him in a letter.

#### Toledo Division

Trackman Albert Tanner has received a commendatory letter from Division Engineer R. E. Chamberlain, for close observance and wise measures taken to avert an accident on March 24. Mr. Tanner discovered a broken arch bar on car N. & W. 45687. Through his efforts the conductor was notified and the car set off for repairs.

#### "It Is Better—"

Some poet, or probably poetess, sighing over "what might have been," is quoted to the effect that it is "better to have loved and lost than not to have loved at all." This "spinstorian" theory is of course debatable. Here is one that is not:—It is better to have struggled and lost, to have tried and failed, than never to have tried at all. To endeavor earnestly to attain or achieve, but fail, is not disgraceful. A man may lose his shirt in a fair scrap, but if he save his pants and his self respect he is a man for all that.

John Newman, New York

Joseph M. Knopp, pensioner, spent the winter at Sarasota, Florida

## Among Ourselves

### Baltimore and Ohio and Baltimore and Ohio Annex Buildings

#### Law Department

Correspondent, GEORGE W. HAULENBEEK

It is surprising to find the number of people of intelligence in our service who persist in addressing correspondence for General Solicitor Morison R. Waite, Baltimore and Ohio S. W. Railroad Company, to Baltimore, Maryland. Mr. Waite is not in Baltimore and never has been. His office is in the Carew Building, Cincinnati, Ohio.

It is also surprising to know the number of persons in New York (New York, mind you) who think that the headquarters of the Baltimore and Ohio Railroad are located in the little town of Baltimore, Ohio. We get a ton of mail nearly every day that the postmaster of Baltimore, Ohio, finds it necessary to ship back to Baltimore, Maryland. Where is the schoolmaster, that there should be so much ignorance? No wonder Mr. Edison prepared the famous questionnaire that so many people were unable to solve.

On page 17 of Form 6, Official List No. 22, under the head of Freight Traffic Department, there are 121 names, and on the following page under the head of Passenger Traffic Department, I find 76 names. It takes some time to pore over these names to find the person one is in search of. Why not have these lists prepared alphabetically? I am confident this will not be done, though my observation in a previous letter asking abstention from lighting cigarettes in crowded elevators, has been generally observed and I thank the young gentlemen who have thus abstained.

#### Something Practical

Now I wish to see if I cannot do something practical. I observe in papers passing through the office, where a bill is appended, that the right end of the form No. 244-T, special, containing the totals, always laps over and in a little while appears frayed and torn, leaving the figures quite illegible, while the other end of the form or bill, with a perfectly blank edge, is safe and secure from rough usage. Why not place the bill in the papers so that the right end containing the figures will receive no harm, letting the other end stick out, if necessary. Now, there!

While Magazine correspondents and Veterans are doing all they can to get business, passenger and freight, I have in mind a young gentleman, Mr. Oberender, in the

Philadelphia and Reading Passenger service, who gets all the business he can for our Company as well as his own. He frequently is instrumental in getting passengers coming into Philadelphia to change at Wayne Junction and take our trains for Washington and the west. I think this is worthy of note.

*"It matters not how long we live, but how."*

"He who loves a book will never want a faithful friend, a wholesome counsellor, a cheerful companion, an effectual comforter—as by reading, writing and thinking, one may innocently divert and pleasantly entertain himself in all weather, so in all fortunes."—*Barrow.*

It might be observed that this Law Department contribution is devoid of real Law Department topics. Well, the whole force is busily engaged all the time. There are no sinecures here. It is an office where one helps another. I have often experienced tangible evidence of this when hurrying to catch my favorite train No. 524 on Saturday to spend the week end with my sweetheart, Susan Anne Trageser, now approaching her sixth anniversary. Now I feel better.

#### Engineering Department

Correspondent, O. K. EDEN

We will know summer has arrived with all its heat and glory when Herr Graefe opens his window.

E. J. Norwood joined our ranks as junior clerk on April 11. He appears to be quite an industrious young man and should make good. I heard that he is a musician of no mean ability, playing a saxophone.

We are pleased to greet Walter Polih, who has recently been appointed to take charge of the files in the drafting room. He has been identified with the Valuation Department and some of the city departments.

Not content with working merely as a draftsman, W. M. Whaley, Engineer of Bridges' Office, dabbles with radio. In fact, he does more than dabble with it. I learned the other day that he has had a set for some time, and is able to hear from as far as Cape Cod or within a radius of 600 miles. If any radio fans read this, and would like to get information, as to procuring radio sets, etc., either write or come to see Mr. Whaley. He will be glad to help anyone.

Brother Roebuck has moved to his summer home on Bear Creek. We all hope to be invited down some hot day this summer to enjoy some water frolics.

"Empty" will become quite an actor if he keeps at it. When the Young People's Union of Immaculate Baptist Church gave a show on April 7, entitled "The Family Album," they called on him. From accounts received he made various poses worthy to be put in any family album.

"Velvet Joe" worked one Saturday afternoon recently, and we feel sure that it was done so that he could use the same excuse on the wife on succeeding Saturdays to visit certain country fairs which might be held during the summer at nearby villages.

The Engineering Department is contemplating having a tennis team. A call for candidates resulted in sixteen men applying; Messrs. G. E. Norris, C. G. Schanze, J. R. E. Hiltz, G. H. Dayett, C. E. Sloan, C. C. Kidd, C. W. Gabrio, J. V. Bromwell, J. R. Farrar, W. W. Johnson, W. W. Warren, J. W. Linnbaum, J. C. Hessenauer, H. T. Roebuck, H. F. Buffington and O. K. Eden. A committee of three, J. V. Bromwell, O. K. Eden and H. T. Roebuck, were appointed to take charge of affairs. After a round robin has been played, a team will be picked and matches will be scheduled with other departments and with outside teams.

We wonder why Miss George spends so much time taking photographs around the Homewood buildings of Johns Hopkins University?

One of the attractive ladies in our department was successful in a rummage sale in which she participated not so long ago. Her particular line was selling hats to dark-skinned beauties. From reports, if there had been more hats for sale, there would have been a greater income.

EXTRA! Harris Sparks got his new teeth—some more good "bridge" work!

Who left those violets on Miss Burnett's desk the Saturday before Easter?

Wife—George, is that you?

George—Why, certainly! Who else were you suspecting at this time night?

—*London Mail.*

#### Office of District Engineer, Pittsburgh, Pa.

Correspondent, J. M. WHEAL, Accountant

We were all deeply gratified to learn of the recovery of the body of M. C. Sparks, brother of the genial E. R. Sparks, chief clerk to Mr. Lane. Mr. Sparks, his mother and the family are deserving of a world of sympathy, which is hereby tendered from the Pittsburgh organization.

The Belgian Consulate is busy these days and Belgian accounts and bookkeeping, not to speak of Belgian correspondence, have made things rather interesting for some of us, to say the least. Inquirers are referred to the consulate secretary.

We are being favored by occasional visits from Mrs. Morrison, formerly Miss Pfendler, former stenographer in this department. Marcelle is looking better than ever, if such a thing is possible. Come in often, Mrs. Morrison.

We are glad to see that business has taken quite an upward trend in the Pittsburgh District, and the way in which the boys are taking hold is refreshing. We are all glad to see things opening up and we hope that the present rush is merely an eyeopener.

"Jim" Connelly has been rather sick for the past few days and has been compelled to remain at home. We hope that the trouble

is only temporary and that our janitor will be back soon.

We are sorry to announce the death of Mrs. C. H. Holtzworth, wife of our chief clerk, which occurred recently at her home in Huntington, W. Va. Mrs. Holtzworth's death was not unexpected, but it nevertheless comes as quite a shock. C. H. has the sympathy of us all.

J. M. Whealan, this Department, and J. A. Layman, Auditing Department, Baltimore, spent several days in Cumberland recently on Company business.

**Office of District Engineer, Baltimore, Md.**  
Correspondent, J. FORD COLLISON

Charles Llewellyn Righter was working on his farm recently when a little stick jumped up and broke his spectacles. Seems to me it would have been more economical to have employed a man to do the farming.

Mrs. H. C. Harrison recently applied for and received a license to drive the family "Lizzie." She's going to have a good time while the boss (?) is away.

"Dick" Mather was home for an Easter vacation, and "Oh Boy," how that kid has grown! We hardly knew him: he'll soon be able to lick his Dad.

C. P. Vogel is going to move his residence to Huntington. We all join in and sing—"We hate to lose you, we're so used to you now."

Field Engineer Joseph E. Burke has moved his office from Cumberland, Maryland, to Goff Building, Clarksburg, W. Va. Here's hoping he'll like his new quarters.

We are sorry to learn of the death of the father of H. W. Ramming, rodman with Field Engineer Burke. Mr. Ramming and his relatives have our sympathy.

**Office of General Freight Claim Agent**  
Correspondent, GEORGE DOBBIN

A. C. Keen, our ornithologist, recently expressed various opinions relative to the care of the canary bird. In the audience were Stage and Baldwin, who repeated two of the humane methods for killing a sick bird which we submit for the benefit of bird-lovers: A sick bird should have a hard boiled egg waved before him to the tune of "God Save the Irish Republic." Being of an ulster stripe, a fatal heart attack will result. Again: The telling of a "Bob Townsend joke," preferably the one about the man riding backward, would probably produce results much like those to be expected from permitting a pet bird to play with the house cat.

We wish to go on record as being strictly opposed to such cruel procedures as have come to our notice, viz: forcing a bird to listen to the music (?) of our Terrible Five; caging bird in vicinity of the Wilkens Avenue Hair Factory, or sending him to Halethorpe via the electric cars without extra supply of seed and water; allowing the fat pig to attend bird when ill, or killing aforesaid pet by suddenly applying an axe to the neck.

Sergeant Harris, the fruit distributor of the 313th, claims war is what Sherman said it was. But it has nothing on betting Mr. Brewer as to files being correctly filed. This, no doubt, is the result of a recent side bet which cost Brother Harris three dinners. The habit of betting with the files as a basis seems to be growing, as proven by the purchase of a dinner by friend Duval for the Squire of Overlea, our Mr. Travers.

Our own Hogshead Brown, having "perishables" on his mind and being some-

what 'peeved' by the lack of cheese on his portion of pie, recently suggested the following changes in the menu of a nearby lunch room: vinegar on ice cream, scales on fish, onions in coffee, and catsup on rice pudding. We trust the management of this hash-joint will endeavor to retain "Brownie" as a customer.

Mr. McShane has been scouting for a small wooden keg. Horrors, Mac! Has it come to this? (Don't forget us.)

Easter holidays, April showers, May flowers an' everything, have been "absolutely out lid" by the spring garb of some of our members of the fair sex. Go to it, girls! You are only young "onset."

The O. S. & D. Division celebrated Apple Day on March 29.

Our pencil is all sharpened and we have our paper handy in readiness for the making up of our annual list of June brides. The longer one girl waits, the more chance some other girl has. Let's go!

Our Mr. Wheeler, after a thorough probe into the mysteries of national history, expounds this conclusion: "The difference between an elephant and a microbe is merely the fact that the former carries a trunk while the latter carries the grippe."

#### Relief Department

Correspondent, H. IRVING MARTIN

Human nature is the same the whole world round. In the Philippines they eat their grandmothers and in America they kill them off on the opening day of the baseball season. "Johnny" Brooks, the Manager of the Relief Department team, hasn't given his men time to think much of their grandmas, even of their sweethearts and wives, for he has been keeping them on the jump with training for the opening game.

Some of the boys think that they'll be able to pass the scrutiny of the Diagnostic Unit and the X-ray man by the time they get through. It's all part of the game and they'll be 100 per cent. better physically when the season ends.

From what we hear of prospective attendance at the games, I believe "Prax." Boyd of the Park Board will have to put accordion pleats into old Druid Hill to accommodate the crowds.

When we read the schedule and see about the games to be played on "Back Shore" lot, it makes the veterans recall the games there and at Stowman's Park and Patterson Park. Some old-time big leaguers got their training and their first crooked-joint fingers on these grounds.

Some of the office "non-members" of the team will have to cut out movies and marketing on Saturday afternoons in order not to miss the thrills of double plays.

The opening game between the Relief Department and Car Service Department teams at Druid Hill Park, on Saturday, April 15, resulted in a victory for the car chaps by the score of 9-7. The Car Service nine put up a strong game and well earned their victory with quick, snappy fielding; and their batters had evidently learned to "hit 'em where they ain't."

The Relief Department made a creditable showing for their first game as an organized club, and the double play by which two of the car men died at first was well worth "the price of admission." Better luck, boys, when you get seasoned and better used to your positions.

The boys who have been studying their correspondence courses all winter may let up a little in the hot weather.

Those who attended the course on Railway Accounting at Johns Hopkins Univer-

sity, readily admit its value and its broadening effect.

Assistant Comptroller F. A. Deverell, who has been conducting this course, will derive a large part of his compensation from the realization that he is helping to turn out a class of men who will be better equipped to tackle the problems of real life.

#### Telegraph Department

Correspondent, MARY B. TANSILL

Superintendent of Telegraph Plumly has issued the following to members of his staff who travel. It is passed along as a suggestion of a way to secure business:

"On a recent trip from Richmond by boat, I met three gentlemen, and from their conversation learned that they were going from Baltimore to New York. I told them of the quick and excellent service of the Baltimore and Ohio Railroad, and fortunately had with me some copies of our small condensed schedules which I handed them. They used our line to New York, and remarked they would retain the schedules account of the information given, and also commented very favorably on the fact that on the back of each schedule there was a neat calendar for the current year.

Incidentally, I am attaching several copies of this schedule for your use in line with the above. In getting around over the road do not overlook any opportunities to secure business for the Baltimore and Ohio.

Several of the men in our department are fully convinced of the "reelness" of the movies. It had become very cold at a town where they were staying and they had gone into a moving picture house in the evening to pass the time away. One of the men, who had been shivering for want of the overcoat he left in Baltimore, went to sleep. A news reel was thrown on the screen, showing an ice filled, raging river. Suddenly, the man awoke and thinking himself on a train, exclaimed, "Where are we? What river is that?"

We are very glad to welcome Miss E. M. Bryan to our Department, and the best wish we can extend to her is that she will enjoy working in the Telegraph Department as much as we do!

This is the day of organization and the gangs of the Telegraph Department may well be placed with the leaders of this movement. Foreman C. I. Gay has installed a buzzer system in his camp outfit, and now, with the same facility and ease that is practiced in every well organized office, he can call any of his men from any part of the camp outfit. It is an experience to see him in his "transient office" touch a button and the man desired answer promptly. In this way he saves time—and time is money.

Along with organization comes cooperation and team work, and we have this also from Foreman Gay's camp, although in a different way. Lineman H. E. Youngblood, was recently married to Miss Ora Wright, daughter of the supervisor of the Wheeling Division. The sincere best wishes of his friends and fellow workers are extended to the new "partnership."

#### Transportation Department

Correspondent, L. K. BURNS

Baseball has been the outstanding subject of discussion for weeks. As these notes are being written, the eight Baltimore and Ohio League teams are on the eve of their opening games.

Manager Mansfield has quite an array of stars in readiness to uphold the good name of the Transportation Department. They

are: George J. Roth, William T. Laslo, R. R. Poole, James C. Smallwood, Carl Scharnagle, William J. Marley, James H. Carter, L. K. Burns, A. P. Wilson, P. S. Wood, R. L. Mansfield, Gilbert Hatton, H. Llewellyn, W. Wilkins, A. Applegate, Robert Hall, W. E. Wilkinson, George Seeds, Frank Mueller, W. Seibert, Harry Evans, A. R. Lehman, Leo Dumphy, Stanley Biscoe.

About 20 players reported for practice at Clifton Park on Saturday evening, April 8. Yes, even Messrs. Evans, Faustman and Seibert were out, but don't you think those married men can't play—you should see them!

Mr. McCracken and Mr. Dunn, Car Service Department, occasionally call and tell us they have a baseball team representing the tenth floor. They also seem glad to know that we have a good team, but somehow we can't convince them that ours is better. Guess all we can do is wait till May 20, and trim them—that is the best way we know to convince these people.

A great surprise came to us about a month ago when W. A. Kraft, supervisor of fast freight service, let us in on what some consider a secret. On Saturday evening April 22, Miss Anna Mary Beatty and he were married at Hampden Presbyterian Church. Hearty congratulations!

**Valuation Department**

Correspondent, G. B. SAUMENIG,  
Accountant

H. L. Phelps, this department, and Miss Marjorie E. Shauck of Sykesville, Md., were quietly married on March 18 at the parsonage of Sykesville M. E. Church by Rev. E. O. Pritchett. This piece of news was quite a surprise for us. After Coles, Gover, and the approaching catastrophe which will befall Taylor, we were prepared for almost any kind of a shock.

A number of our force having been furloughed, various fields of employment have been sought. Every now and then a familiar face makes its appearance as a stock broker, bond salesman or insurance collector. One of our former men, better known as "Ballast Joe," when asked how business was, said, "Well, the life insurance business is on the bum but the fire insurance is pretty good; I have sold about \$100,000.00 worth." Who was the man?

The Valuation Department, as usual, is abreast of the times and is talking Radio. The following conversation was reported to me the other day and is worth passing on to our readers:

Miss R.—Say, Mr. E., what is a radio-  
phone?

Mr. E.—(with a sixteen-inch stogie well  
fixed between his teeth). Well it is.....

Miss R.—Does it cost much? More than  
a telephone?

Mr. E.—Well, from \$35.00 to \$500.00—  
just a mere trifle.

Miss R.—That is too much.

Mr. E.—Well, after you pay for it there  
is no more charge each month as is the case  
with the telephone.

Miss R.—I hear it is like a telephone and  
thought about getting one.

Mr. E.—Well the radio-phone is only  
used for receiving messages and not for  
talking to your friends.

Miss R.—Nothing to it then. I would  
not have it unless you could talk over it.

The Summer Duck Pin League of the  
Valuation Department, composed of six  
three-men teams, has started. So far  
Stevens is high man for one game, having  
spilled 127 pins. Smythe holds high honor  
for three games—317 pins.

The uncertainty of life was never more  
vividly portrayed than in the death of the  
wife of W. T. Baggs, formerly with the  
Valuation Department, during April. To  
those who knew Mrs. Baggs personally, it  
means the loss of a true friend. All of us  
extend our heartfelt sympathy to Mr.  
Baggs in his loss.

Miss Coplan is lucky, especially on North  
Avenue. A five dollar bill unprotected on  
the street until she chaperoned it home! Ask  
Pugh and Nugent where they were.

The Limerickitis is in the office and we  
beg to submit the following for the readers  
of the MAGAZINE:

Out in old Vincennes, Indiana,  
"Bobbie" Slocumb could wear a bandana,  
But in Baltimore City,  
We think it's a pity,  
He puffs on his five cent Havana.

Our furniture man, Callahan,  
Gets his units as well as he can,  
He works up his price,  
Adds 10 per cent. twice.  
And that, in brief, is his plan.

We must not forget old Gus Spath,  
Whose feet are size ten and one-half.  
So enormous are they,  
He blocks the highway,  
While the traffic cops look down and laugh.

"Oo, lah, lah," remarks B. Evander,  
"I don't know a goose from a gander.  
But take it from me,  
When a chicken I see,  
Rest assured that I quite understand-her.

We have a lounge lizard named Dell,  
Young ladies all know him quite well,  
He wears buds of roses,  
And assumes languid poses,  
Though his purpose we can never tell.

Our lumber expert we call "Pete,"  
His statistics are quite hard to beat,  
He knows thousand board measure  
Like a miser knows treasure,  
Now, tell me, is not that a feat?.

We have an affliction named Doyle,  
Whose wife consumes pure olive oil,  
He thinks matrimony,  
Is a pathway quite stony,

\*.....  
NOTE—The author offers a prize of one  
plugged car check for the best last line for  
the last limerick.

One of our bright lights asks this question.  
"What's wrong with the composers of these  
limericks? Are they jealous of the indi-  
viduals at whom they seem to be driving?"

A poor fish named Doyle sure raised howls  
and kicks

By writing about us some sad limericks,  
Now we wouldn't be peeved nor would we  
raise Cain,

If they had been written by one who's more  
sane.

So all of those present, no matter what age  
Let's vote to put Doyle in a monkey house  
cage,

And when he gets ready to howl and kicks,  
We'll feed him some peanuts and sweet  
limericks.

On April 21, another move in the office  
was caused by the arrival of a new family in  
the office. The streets in the Valuation City  
are so close together that it was necessary  
for our construction forces, assisted by  
several from force from the Superintendent  
of Buildings, to make an alley for this new  
family. For those who are not acquainted  
with the office, it might be said that it has  
been called "Duncan Alley" in honor of the  
father of the family. The alley is separate  
from the other part of the city by a wall of  
lockers. The city authorities have dele-

gated Pilo Engineer Bolin as special watch-  
man over this alley and unless the dividing  
line is built to the ceiling, he will experience  
very little trouble in keeping peace without  
even going into the alley.

**Auditor Coal and Coke Receipts**

Correspondent, JOHN LIMEFERT

With only two more nights of play, the  
standing of teams in the office bowling  
league follows:

	Won	Lost	Total
Pullmen.....	45	21	652
Head Lights.....	43	26	623
Royal Blues.....	38	31	551
Bumpers.....	31	38	449
Wrecking Crew.....	20	40	420
Tail Lights.....	21	48	304

A mighty close race and the result is  
liable to be in doubt until the last game of  
the last night. May the best team win!

In the office bowling league, Head Lights  
went on a spree on the night of April 4,  
when they bumped the Royal Blues for  
three games, set up a new three game record  
of 1412 and came within one pin of tying  
the season's high single game score.

If King Solomon could have taken one  
little peep at our own W. H. Reichert,  
April 11 (Bowie bound), that gay old sport  
would have turned green with envy, for  
surely, in all his glory, Sol was never  
arrayed like William.

The secretary to the auditor is very busy  
these days looking at the furniture displays  
about town. Wonder if any significance  
can be attached to these symptoms.

Except there will be a lively tussle among  
the girls of Gassaway to see who finds favor  
in the sight of A. H. Spurrier, a recent addi-  
tion to the population of that enterprising  
town. Mr. Spurrier was employed in this  
office until recently, and we can state right  
here that the lucky girl will get a good  
young man. We also hope "Duke" likes  
his new position and wish him every success  
in his new field of endeavor.

Strange what a couple of warm days will  
do. The trees and flowers seem to grow  
while you look at them; likewise one of the  
girls leaves the office at five p. m. one day  
as a brunette, and returns the next day as  
a blonde. Then again, lots of the rings,  
wrist watches, chains, knives, etc., (Christ-  
mas gifts) are beginning to show the strain  
and many are trying to pass the buck by  
claiming this or that article to be "green  
gold."

**Office of Auditor Disbursements**

Correspondent, JOHN C. SVEK

I would like to call the attention of the  
readers of these columns to Mr. Pryor's  
word puzzles in the report of the MAGA-  
ZINE. Those solving the puzzles should  
send them in to Mr. Pryor. You will find  
the work interesting and it will be helpful  
because you run across words which may be  
used very rarely and would seem new to us.  
Another helpful feature of the puzzles is the  
definitions of the words. A few hours  
spent from time to time on this work will  
be well utilized.

The stork visited the home of Edward P.  
Reid and left a baby girl. We congratulate  
Mr. and Mrs. Reid.

The Auditor Disbursements Office base-  
ball team opened its season on April 15.  
They played the Transportation Depart-  
ment team at Westport grounds, winning  
by the score of 11 to 4. The following have  
been elected to manage the affairs of the  
team: G. H. Pryor, president; S. W. Hill,  
vice-president; H. C. Shipley, secretary and  
treasurer; J. F. Donovan, manager; and H.  
C. Shipley, assistant manager.

## Eastern Lines

Pier 22, North River, N. Y.

Correspondents, (FRANK A. J. MANTHEY  
JOHN NEWMAN

Miss Elinor McDermott, by a previous correspondent referred to as "The Belle of Staten Island" (and may it be said in parentheses that that correspondent was a connoisseur—look at her picture), has announced—no you didn't guess it—announced that she is going on a trip to Ireland, to visit the aboriginal Clan McDermott of Tralee, accompanied by only a girl friend. Spunky girls! They sail on the "Cedric," leaving here on May 20. As they have not been rocked in the cradle of the deep before, except on the park lake, they will no doubt enjoy the trip and the aboardship games, quots, spooning in the moonlight, etc., and maybe engage in that playful pastime of sea-novitiates, catering to the porpoises. This is slightly different from leeding the goldfish in the park reservoir; it is more interesting. However, Elinor, if the weather is very rough and the ship rears and plunges, as it will, all you have to do is to hold on to something, your girl-friend for instance (misery loves company—you will love one-another), and when the ship runs up-hill, *in-hale* and when she dives down into the trough, *ex-pel*, in unison. Or, if you don't enjoy that, you can call on the captain to turn back or put you off on some island. But if you get across, don't forget to kiss the Blarney stone, pet the Kilkenny cats, ring the Bells of Shandon and give our regards to Kathleen Mavourneen, Eileen Alanna and the McDermotts. Anyhow, may you have fair weather and a bully time. Bon voyage et au revoir!

Lo and behold! Here a star in process of formation! Still nebulous—only eight years old—but growing in splendor with the passing how. This little lady is Julia Gorman, daughter of T. F. Gorman, our popular agent at 26th Street freight station. She is a little wonder, both on the stage and on the screen. She has been engaged by the Famous Players and the Fox Pictures and is at present taking a part in a Fox production, soon to be released, named "Doctor Remo." Here's hoping that she may

Only eight years old and already a screen star, Julia, the daughter of T. F. Gorman, agent at 26th St., Freight Station, New York

attain first magnitude. Her talents she must have inherited from the maternal side, as Father T. F., though not a "bad actor," never shone in vaudeville except as a star-gazer. He shines where he is, in the 26th Street Freight Yard.

Miss T. Wilson has threatened ye scribe, your correspondent, with dire consequences if he ever "dares to put her in the MAGAZINE." Considering Miss W's avoirdupois it would be entirely beyond us—(there are two correspondents, as you will note, which explains the plural pronoun usually reserved for the *ipse dixit* of ye Editor) entirely beyond us, we say, to put her anywhere without a derrick. Now, having spilled the beans, as they say in Boston, I (singular) will add that I have repeatedly assured Miss W. that I am very partial to—ahem—avoirdupois in a lady (one of my ancestors was a Pasha or Rajah, I believe), and that I consider every ounce of—ahem!—avoirdupois, an ounce of beauty. I prefer spherical geometry to trigonometry, aesthetically.

Leo Van Horn, chief of staff to assistant terminal agent, is also getting, let us say, fat; the word is permissible in reference to a gentleman. He admits an addition of about forty pounds to normal. Pretty fair! Not at all bad, being a plus of about 20 per cent. Easy berth and se-lentary habits, we suspect.

Ralph Zunno met with an accident the other day that made him a half hour late in arriving. He was not hurt much, except his feelings. He had to go to a tailor's shop and—"sartor resartus."

Signs of Spring: Amateur baseball outdoors; yawns indoors; commuters carrying spades; free seed packages from Washington; sparrows rehearsing for nuptial; spring fever.

This attractive young couple, employed at our 26 Street Station, are familiarly known as "Hon and Dearie." Which one is "Hon" and which the "Dearie" does not matter. They are both pretty. So as not to embarrass them—as they are not posing for the MAGAZINE—we will not disclose their identities, but refer to them only as John Ryan, loading clerk, and Sara McGavin, stenographer to agent. They surely take a fine picture as a team.

Barney Jordan is away, sick, poor chap. He has been granted a furlough to bring him back to health. There is probably more virtue in a furlough than in mere wishes,

but wishes may help some, when sincere, by telepathic force, of which we have heard, and of which, as of spooks, we admit the possible existence based on the assumption that "there are many things between heaven and earth not contained in any philosophy." Therefore, we sincerely wish that he may soon return to us in such condition that Dr. Pence, on his next visit to this station, will call him a "Good risk."

Said the waiter to me in a French restaurant in 29th Street; "Pardonnez-moi, Monsieur,—je ne sais ce que vous voulez dire; repetez, s'il vous plait." That was because I attempted to give an order in French, to please the wife, who is French and who was with me. I only relate this in order to show the superiority of the idiom of this country to that of any other. A waiter in a downtown hashery will express exactly the same thing by a grunted "Huh?"

And so our "Bob" Riddell, too, is going to do it. Most of us will do it, once anyhow—getting married, hooked, spliced into holy bonds of matrimony. (Matrimony and patrimony should come together in order to make the honeymoon one sweet song.) Sunday after Easter was the day set for the beginning of the adventure, to be continued by a trip to Canada. If we would not know "Bob's" temperate habits, the destination might be taken to denote an ulterior motive, but "Bob" is not only temperate in this respect—he is abstemious, absolutely. A disciple of William Jennings, the talker, and Pussyfoot Johnson, the doer, he didn't even "look upon the wine when it is red" while he was in France; he stuck to Veuve Cliquot and Sauterne. He was over there with the 35th Engineers, 7th Grand Division, A. E. F., fourteen months and, incidentally, worked harder than he ever did, before or since. With the exception of the gap caused by his military experience he has been one of the Baltimore and Ohio family since 1911, having started in as a boy at the old "Bridge Pier" and working himself up to headclerk of the Eastbound at Pier 22.

Well, "Bob," there is no reason why a man can't be happy, even though married—if he is a philosopher or a fatalist. We don't know that "Bob" is either but he has "horse-sense," and that will help a man to keep his balance.

I am sure that we all wish him a full measure of "connubial bliss" to begin with and an even, happy "ever-afterwards."

### Mt. Clare

Correspondent, MISS MOLLIE ALBRECHT

#### Axle Shop

Foreman M. Kelly has been placed back at work. We take this occasion to wish him all kinds of good luck. Mr. Kelly is quite popular at Mt. Clare, especially in his own little community, the Axle Shop.

"Hon" and "Dearie"

Flagman R. S. Springer; Trains 21 and 68, Philadelphia Division; Signal Maintainer E. D. Shrede, Belt Line; Assistant Trainmaster E. R. B. McCabe, Camden and Bay View District; Janitor Frank Perticone, Camden Yard; Baggageman John W. Ault, Trains 21 and 68, Philadelphia Division

The picture to the right below is of Elmer E. Jones, oiler. Mr. Jones was slightly wounded at Argonne Forest during the World War. So you can see from this that we had some "Fighting Sons" at Mt. Clare.

How do you like this picture of our Veterans as they used to look? They are, left to right, top row: Henry McNulty, coremaker; H. Frome, blacksmith; J. Maynard, rigger; J. P. Rhinehardt, (now fire marshal). Bottom row: "Bob" Childs, moulder; T. Snyder, carpenter foreman; W. Burns, resigned; John Machen, blacksmith; F. T. Filipino, machine shop foreman, Riverside; "Ed." Hutchinson, resigned.

**Sparks from the Flue Plant**

By C. A. R.

Great calamity at the Raeuechele home! The pet cat has gone to Cat Heaven! Mrs. Raeuechele now advises us that she hasn't anyone to talk to, so we suppose "Charlie" will have to stay in more at nights.

"Bernie," the Elkridge wonder, announces that things are beginning to sprout out of Mother Earth, since these "dangone" hot days have arrived.

"Kid Cox" arises to elucidate that he is going to build out on the Belair Road! This is a sure sign of Spring. "J. J's" annual announcements are more certain than the blue-bird's whistle!

"Judge Duffy" Kuhl says the bootleggers won't let him alone. He wishes

that they would, as he does not care to associate with them. However, we have heard differently.

"John Edward" Kuhl, our sweet-voiced tenor, is the "singinest" youngster we ever

Oiler Elmer E. Jones, Mt. Clare

did see! He sure believes in giving his voice plenty of exercise!

**Iron Foundry**

Anybody who has been at Mt. Clare for

any length of time knows who this distinguished Veteran is. Let us present G. F. Heckwolf, Baltimore and Ohio Veteran, and one of Mt. Clare's oldest moulders—still in service.

**Agent's Office, Camden**

Correspondent, W. H. BULL

D. A. Gochnauer, Inbound Freight Department, who is away on a furlough on account of illness, is reported to be improving. We hope to welcome him back soon.

M. B. Freidel, also Inbound Freight Department, who is away on a furlough on account of illness, dropped in to see his old friends recently. We are very glad to note his improved appearance. We hope also to welcome him back to his desk soon.

**Baltimore Division**

Correspondent, W. H. TARR

The sympathy of the office force is extended to Chief Clerk J. W. Sparks, on the loss of his brother by drowning in the river at Pittsburgh.

G. F. Heckwolf, Iron Foundry, Mt. Clare

H. L. Goodman, secretary to the superintendent, is responsible for the following:

Introducing Misses Laura Hackett, Ester Auld and Thelma Thomas, Baltimore Division chorus girls, in "Jappvland," recently given in Baltimore for the benefit of the Boys' Home, Watch your step and pocketbooks, Boys."

Baseball Time: Fox, Mallery, Wiese, Higgs and the rest of the gang strutting around. would make someone think that we are going to have a real ball team. Well, we are!

When is "Bill" Devlin going to get that machine?

Bowie—You said a mouthful, Earl. Is the house paid for, or does the baby need a new pair of shoes?

You would think "Ed" Meyerly was division engineer or something when you hear him talk over the telephone. He may be some day!

Sayings of the Office Force:  
Nellie and Griff—"Nuise!"

Barney—"Aces Full."

Crocker—"Did you read the Radio news?"

Earl—"Beat out agam."

Wise—"I had him three ways."

Auld—"Bronzewick."

Lincoln—"Went to bed late agam last night."

Some Mt. Clare Veterans of bygone days. Do you remember them? If not, see the notes

If you are in doubt as to what to eat for lunch, the following menu is given by Miss May Schammel: 4 sandwiches (any kind), 2 apples, 2 oranges, 2 pieces of cake.

H. A. Lynch

Our photograph: H. A. Lynch, assistant division engineer, East End. Picture contributed by his lady friends in the office. Received shortly after the unusual hot wave during the month of April.

Miss Thelma Thomas has taken a two months' leave of absence because of ill health. We look forward to seeing Miss Thomas back with us again.

#### East Side, Philadelphia

Correspondent, CHARLES H. MINNICK

John Shields, clerk, East Side, Freight Agent's Office, is receiving congratulations upon a recent addition to his family. The baby boy was born on Thursday, April 6. Gee, it's great to be a real papa!

We thought there was something back of little "Herby" Held growing that heavy mustache. The facial scenery was being changed to meet the dignified requirements of his new position. We take pleasure in introducing to you Mr. Herbert Held, chief clerk to Division Storekeeper L. G. Kohler, East Side. Congratulations!

Your East Side correspondent wishes to express his appreciation of the courtesy and hospitality extended to him on his recent and first visit to Baltimore. He was more than pleased to be received and guided around the city in such a friendly manner, and feels well repaid for having made a close acquaintance of the editor and his staff.

Upper left: R. ("Tobias") Miggins, the East Side "Jazz King." Lower left: Dan Dolcin, clerk, getting a sermon from crew dispatcher, "Eddy" Reddington

Wus? Ga-zex-ta? Ask "Eddy" Reddington, crew dispatcher, what it means. He can tell you.

Ask "Charlie" Mahoney what became of the 3,200 bottles of home brew.

In the March MAGAZINE we omitted to mention the death of William Sinnott, who was at one time master mechanic at East Side, and who passed away in January. Mr. Sinnott had been in the Baltimore and Ohio service for many years and was well known by the veterans. I regret that I was not better acquainted with Mr. Sinnott, but this was due to the fact that in recent years he occupied a traveling position and we only got to see him occasionally. We all regret the passing of Mr. Sinnott and wish to assure our readers and his friends that the omission of an obituary notice in the March issue was not intentional, but an oversight occasioned by lack of proper information.

"Bobby" Wiggins, index clerk and better known as the "Jazz King of Ragtime Music," is about to leave the Yardmaster's Office for a position as clerk, Storekeeper's Office, East Side. If we keep on losing all our young men we'll have none left but old men like Minnich and "Charlie" Mahoney.

Readers: please co-operate! Send in pictures or news items to your correspondent. He isn't a mind reader. Don't ask what is going to be printed. Put something in the way of news to be printed. Take an interest. Help your correspondent. Give him photos of your families. Put him wise to Honor Roll notes, weddings, births, deaths, engagements—anything you think will interest the readers or will advance the interests of the Railroad. Safety suggestions are welcome. If each person gave me one picture or one news item or helpful idea, I would have enough to fill a page for East Side every month for a year! Kindly send to:

CHARLES H. MINNICK, Yard Clerk,  
East Side Yardmaster's Office,  
Care of J. D. Gallary, T. T. M.

#### Brunswick

Correspondent, R. L. MUCH, Conductor

Miss Cerelia Mills, the charming daughter of Engineer "Charlie" and Mrs. Mills, recently one of Agent Shannon's clerks in the Transfer Department, and Assistant Yardmaster G. W. Thomas, were quietly married by the Rev. J. T. Hart, M. E. Church here. After a brief honeymoon they started housekeeping in their own home on Brunswick Street. Good luck to both!

The Rev. J. T. Hart has been transferred to Ryland Church, Washington, D. C., after serving faithfully for seven years, the longest term ever held by any minister here. He will be greatly missed by his many friends who learned to love him for his arduous work while here. Mr. Hart is an admirer of our MAGAZINE.

Our grand representative, E. W. Burch, conductor and westbound car manipulator, is some busy man, always on the go, doing business for our boys all over the line. He is a skillful and energetic business man, as well as an all-around railroad man, faithful in all his efforts. He is respected by our officials and employes alike.

Our town has received an up-to-date fire truck costing \$12,500. Daily drills take place under the direction of our Mayor, E. C. Shaffer, and experienced fire fighters from the Baltimore and Ohio. Mr. Shaffer deserves great credit for his efforts in trying to put Brunswick on the map as a town. He

Thomas L. Cooper, East Side bandmaster and toolroom attendant, with his bashful little granddaughter, Ethel

mixes with the men and is a hard and conscientious worker. A picture of the fire truck will appear in our MAGAZINE in the near future.

Our town is badly in need of a laundry. Any reader of our MAGAZINE who can send in any suggestions concerning such an enterprise will be heartily thanked. Address all communications to our Mayor and City Council.

The Cowboy Band of Brunswick, Md., has been legally organized with the following line-up: C. W. Sigafoose, president; A. B. Haller, secretary and treasurer; R. L. Much, captain; C. O. Cooper, lieutenant. About 35 men are in the outfit, mostly all Baltimore and Ohio employes.

One of the best conductors on the Baltimore and Ohio System is "Joe" Cage, westbound yard. When the "yard-pot" "grabs" a caboose to finish a train make-up "Joe" "registers" the caboose so gently that an eggshell would not crack between the couplers. The Cumberland Division men appreciate this, "Joe." Keep up the good work.

Engineer Jesse Mann has been chosen grand marshal of the coming events to be held in Brunswick. He is a big man and can do the work all right, if he can only get a high hat.

C. H. Minnick, East Side correspondent, snapped on his recent visit to Baltimore

Bobby Joe Spriggs, first and only grandchild of Mrs. J. F. Barnett, President, Cumberland Chapter Ladies' Auxiliary

Miss Martha Meeks, sister of Conductor D. B. Meeks, died after a short illness of three days.

Engineer "Big Chief" Haller, has been laid up with a touch of rheumatism. We sincerely hope he will be on the job when we celebrate in honor of the Baltimore and Ohio Veterans, this month.

We are trying to put Brunswick on the map through our MAGAZINE, which we consider one of the best in the world.

Lacking cooperation, I would like to hear from our employes around Brunswick.

### Cumberland Division

Correspondent, J. J. SELL

The regular monthly meeting of the Veterans at Cumberland was addressed by Mr. Hartzell and Mr. Sturmer. We were also honored with the presence of E. W. Scheer, general manager, and R. B. White, general superintendent. After the regular business was disposed of, an enjoyable social evening was spent.

Agent H. R. Coole, Newburg, who was off sick for several days recently, is now back on the job.

The Cumberland Division, passing through one of the most picturesque parts of the Allegheny mountains, is more beautiful than ever at this time of the year, when the foliage is showing green, and flowers and trees are blossoming. The Romney—Petersburg branch is particularly colorful with the thousands of peach and apple trees in blossom, scenting the whole valley. A trip through this territory is extremely delightful at this season.

The new icing plant at Cumberland has been put into operation. It will add greatly to the handling of perishable traffic through this terminal and will be a big adjunct in the handling of fruit from this section. The cars are initially iced at Cumberland and distributed to the various fruit loading stations, the new facilities permitting of more prompt and economical handling.

Miss Ruth Chevront, secretary to the master mechanic, has accepted a position as stenographer in the Superintendent's Office. R. V. Coulehan has been made secretary to the master mechanic.

Miss Bessie Oglebie, stenographer, Superintendent's Office, has resigned. Harry T. Henry, night car distributor, knows why. Yes, they will be married soon. Details will appear in the next issue.

The newly organized Fire Brigade in the Queen City Station Building is holding regular drills and is fast becoming adept in the handling of fire apparatus. The brigade consists of clerks in the Superintendent's and Division Accountant's Offices.

Here is a good picture of Trace Clerk William E. Kornoff. In addition to being a good trace clerk, "Bill" is also a good bowler.

Charles Wigal, water station foreman, has been confined to his home for some time with rheumatism. He is rapidly improving and should be with us again in a few days.

Baseball fever has hit the boys hard. We have a fast team organized at Cumberland and will meet anything on the system. We also expect to organize several local teams among the different departments, and some fast games are anticipated. With Manager McGinn, and Field Scout Spearman in form, there is sure to be something doing.

William E. Kornoff, trace clerk, Cumberland

The blue print shows that the Cumberland Division is still holding its own in first place. Everybody is right on the job to see that it stays at the head of the list in division performance.

We have it on good authority that Harry "Count" McClintock, clerk to the trainmaster, is getting his fishing tackle in shape, so there will be need of the Potomac being restocked with fish after this season.

Our chief index clerk recently won a parlor lamp. What are you going to do with it, B.A. N.?

The Cumberland Baltimore and Ohio Basketball Team recently closed a winning season. As usual the boys took the pennant.

We are looking to "Tom" Grindell and "Jake" Brown to give us some good shop notes for the next issue, and we will see that they don't fall down on the job.

The Victrola has been working overtime during the past few weeks, but we believe we'll have some new records for next issue, eh, John?

### Martinsburg

Correspondent, W. L. STEPHENS

An employes' meeting was held in the local Veterans' Association hall, Baltimore and Ohio Building, on the evening of April

13. A large number of Veterans, friends and employes were present to hear the instructive addresses by prominent officials. The meeting was held under the auspices of the Martinsburg Association, President H. W. Fauver presiding.

H. O. Hartzell, manager Commercial Development, gave an interesting talk on getting business, speaking of the success of the campaign so far, and urged a continuance of this able effort on the part of the Veterans and employes in getting business for the Baltimore and Ohio. The pension feature was dwelt upon and a plan or suggestion outlined by which it might be possible to increase the pensions to retired employes. George W. Sturmer, grand president of the Veteran Employes' Association, addressed the meeting in his usual entertaining manner, complimenting the members upon their loyalty and services. T. K. Faherty, assistant superintendent, Cumberland Division; C. H. Norris, assistant road foreman of engines; J. C. Loury, assistant trainmaster, and President H. W. Fauver gave supplemental talks on the subjects under consideration.

Machinist R. H. Bowers was struck in the eye with a piece of steel cutting. Machinist Bowers was wearing the prescribed goggles. The flying chip struck with such force that the glass was smashed, filling the eye with chips. The glass was removed at the City Hospital without permanent injury to the eye, and after a few days' absence, Mr. Bowers returned to duty. If Mr. Bowers had failed to wear his goggles his eye would have been destroyed. It certainly paid this employe to use his goggles. Why not you?

Mrs. Jeadie Airhart, widow of Harry Airhart, died in the City Hospital, Wednesday, March 30, after an illness of several weeks. Mrs. Airhart was a prominent member of the Ladies' Auxiliary to the Baltimore and Ohio Veterans, and took an active part in its affairs. The five surviving children have the sympathy of the Association members and friends in the loss of their devoted mother.

Death claimed one of our local shopmen, Machinist Frederick S. Gettle, who passed away at his home here on March 30, aged 57 years. The deceased was taken ill in December with an attack of heart trouble, lingering over the intervening months in a more or less helpless condition. A widow, son and daughter survive. The deceased had been in the employ of the Baltimore and Ohio for a number of years. He was liked by his fellow employes and all who came in contact with him. He was a willing worker and did his duty gladly and thoroughly, making him a popular and efficient employe. A large number of the shopmen attended the obsequies, a last tribute of respect to their departed fellow worker.

Mr. and Mrs. George Kilmer, their son Mercer, and his children, Virginia Lee and Junior Martinsburg

### Keyser

Correspondent, HARRY B. KIGHT,  
Ticket Clerk

Assistant Yardmaster Neil O'Connell is evidently planning to enlarge the local yards as far as South Keyser. He is seen making daily special trips to this part of town. However, it may be that there is some other attraction there for him, eh, Neil?

Agent Howard Stuck, Oakland, has gone in for the radio "stuff."

We are sorry to report that West End Brakeman Minnear suffered the loss of his foot while on duty at Mountain Lake Park on April 8. He was rushed to the Hoffman Hospital, Keyser, where he received medical attention.

Telegraph offices at Rawlings, Big Curve, Deer Park, Rinard and McMillian have been closed. We hope that this is not for long, however.

Do you get the MAGAZINE regularly, fellows? And do you read it? Don't only read the items from your division, but read it all. It will give you an idea of what some of the rest of the members of our big family are doing and will help to draw each one of us closer to the other fellow. It will make us appreciate more than ever before, the big Company which employs us.

Footie Johnston, one of our old Keyser shoe boys, paid us a visit a few weeks ago. Footie is now located at Garrett.

An electric welder has been installed in the local blacksmith shop. This means an increase in efficiency and a greater output.

Heard on the station platform:

"Batch" alias Allen P., (looking for trespassers)—"Was he a bigger fellow than I?"

Weddle (a subordinate of Batch)—"He was a big one."

Both (in unison)—"Send for Shrout or Kerch."

Our genial supervisor, M. W. Laffey, is taking considerable interest in brightening up the road bed and vicinity these days. If the oil dividends continue to pour in, he is soon expected to be on a journey that has no kinks or low joints.

The local transportation yards and tracks were thoroughly cleaned during the first few weeks of the coal strike. Many cars of sand and spilled coal have been removed from the premises with a view to presenting the best working conditions possible. Section Foreman Cannistra and Carbaccio are using every effort to present a spotless town.

"Bob" Gray, the colored porter at the station, was frightened almost white a few days ago, when a suit case which he was handling gave evidences of life being within it. "Bob" dropped the case and called Ticket Clerk Kight, who, upon examining it, found it contained among other things, a perfectly good "Big Ben" clock that despite its imprisonment was ticking away the hours. Officer "Batch" was called to examine the case and ascertain the contents, but he was scared worse than "Bob," and no one could overtake him until after he had passed New Creek Bridge.

We were pleased to receive a visit a few days ago from our General Superintendent White and Superintendent Van Horn.

### Shop Notes

Miss Laidlow is having considerable trouble in keeping her hands clean after joining the "Shifters."

Car Clerk Avers and Power Clerk Sheetz are arranging for an extensive automobile

DEPOSITS \$1,055,260.26

**The First National Bank**

Keyser, W. Va.

SPECIAL SAVINGS DEPARTMENT

Interest paid every six months  
from date of deposit

trip during the coming summer, in "Sheeney's" new car.

"Red" Dorsey is busy cultivating the soil around the lawn at the Master Mechanic's Office. "Red" says any old thing will grow in the ground around the office.

Miss Lena Crabtree and Miss Feller, clerks, Master Mechanic's Office, who have been off duty sick, have finally recovered and have returned to their positions.

Be sure Master Mechanic Hodges is in good humor and then ask him, what is meant when you receive a communication containing the one word "WHY?"

This spring Miss Virt's fancy seems to be turning to Erie, Pa.

Murphy, the material man, says it is a poor man who does not lay off to celebrate his own birthday, even if it does fall on St. Patrick's Day.

Car Foreman Pownall is worried these days. "Bob" says he is in danger of losing the dog of which he has been the undisputed owner for a number of years. He states that things so seldom happen on the West Side that he is getting out of practise.

"Jimmie," the office messenger, says it is taking all his loose change buying postage stamps to make application for new positions as bulletined.

Painter Foreman Dunk, who has been quite ill, is improving. John is certainly missed around the shops.

"Dusty" says, "There is one consolation—if the fruit crop is a failure this year we can blame it on the Harding administration."

General Foreman Graney certainly got his edge increased by presenting each of the lady clerks in the M. of E. Department with his Easter Greeting of a handsome basket of chocolate eggs and candies. Boilermaker Foreman Spicer says if he thought they were cannibals he would go "Mike" one better and present them with live chickens.

"Dusty" told us he was going to give Ruth a wreath of "two lips" for Easter, with a white ribbon streamer monogrammed with the word "Peace."

### Paw Paw

Correspondent, M. L. SHARON,

### Pensioned Engineer

The weather is fine at this writing and the boys are hiking to the rivers with rod and line, but we haven't heard of any whales being caught. Just wait—your correspondent is going to take a stroll along the river, then there will be something doing among the fish.

We are sorry to note the accident which happened to our old friend, Engineer H. W. Fauver. We saw him a few days after the accident. We're glad to know that he fared as well as he did.

We are sorry to note that C. T. Beavans, at one time agent for the Baltimore and Ohio at Paw Paw, whose health has not permitted him to attend to these duties for several years, is being treated in Cumberland.

We notice that many shipments of fertilizer and sulphur lime and such as go to make up spraying fluids for trees are being made to this station.

Another sign of prosperity—there is being distributed quite a lot of new steel rail on the east end Cumberland Division.

### Timber Preservation Plant

Correspondent, E. E. ALEXANDER

### Our Superintendent

(A TRIBUTE)

On March 24, as the rosy hand of morning pushed aside the clouds of night, the soul of our late superintendent of Timber Preservation journeyed on across that Great Divide which separates mortality from immortality and which all mortals are destined to cross and from which none return. The work he had planned was left unfinished. As scores of telegrams flashed the news throughout the country, a gloom was cast, not only over his railroad associates and over the association of which he was president, but over the many others who had considered him a close friend and companion. Shocked beyond words, the writer, who has known and been associated with him almost a score of years, feels unequal to express in this tribute, his own feelings or those of others who really knew him. His was a life of service, a devotion to duty as he saw it. Staunch in his convictions, his duty to the Baltimore and Ohio Railroad was ever his paramount interest. Taken in the prime of life, at the very height of a career, his passing was the unexpected result of an operation for acute appendicitis a few days previous.

The business career of the late Franklin J. Angier was published in the April issue of our MAGAZINE. He was an ardent believer in timber preservation and made it his life's work; he was a strong conservationist and a forest economist. His enduring work in the preservation of railroad ties alone stands as a monument to his endeavor. His favorite hobby was photography, at which he was par excellent. His collection of cameras included every class from the smallest vest pocket to the latest graflex, with complete finishing and enlarging outfits. His vast collection of photographs was one any artist would be proud to possess. One of his masterpieces was the "Bucking Broncho," taken in 1904 and copyrighted. It was sold all over the country and used as a cover design by one of our leading magazines.

Of him it was said by one who knew him a lifetime: "He was generous to a fault," and by another: "He made his business his business."

Our Company has lost an executive whose place will be hard to fill. His record of service should be an inspiration to others who served under him.

We commend his loved ones to that Divine Master who, in the flesh, suffered as no mortal has suffered and who alone can sustain them, knowing that in that other world they shall meet again and there shall be no night there.

### Golden Wedding Anniversary

Mr. and Mrs. L. V. Twigg celebrated their golden wedding anniversary on April 4, at their home at Green Spring. A most delightful dinner was served to out-of-town guests. During the afternoon refreshments were served to all. Many beautiful and useful gifts were received.

Those present were Mr. and Mrs. C. T. Twigg, Mr. and Mrs. G. A. Storr, Master Billy and Miss Gracie Storr, Mrs. E. L. Kline and son, Mr. and Mrs. B. C. Flora, Mr. and Mrs. R. Montgomery, Mr. and Mrs.

L. F. Wolfe, Mr. and Mrs. R. D. Nixon, Mr. and Mrs. E. E. Alexander, Mr. and Mrs. E. M. Stottlemeyer, Mrs. J. W. Rees, Mrs. T. E. Allen, Mrs. G. P. Chesshire, Mrs. G. W. Robinson, Mrs. G. C. Conley, Mrs. J. M. Bean, Mr. and Mrs. Wm. A. Shannon, J. C. Alexander and Mr. and Mrs. W. G. Haines.

Mr. and Mrs. Twigg, (nee Mary Dolan), were married at Flintstone, Md., on April 4, 1872, and have since resided at Green Spring, where Mr. Twigg entered the service of the Baltimore and Ohio on July 16, 1873, as trackman. After eleven years of service on the main line he was promoted to foreman Section No. 58, Romney Branch, on July 23, 1884. This position he held until he was retired on August 1, 1917. Their son, C. T. Twigg, is a well known Cumberland Division conductor.

In the photograph, left to right, front row, are: Mesdames E. L. Kline, T. E. Allen, G. W. Robinson, E. M. Stottlemeyer, J. M. Bean, B. C. Flora, J. W. Rees and Master Billy Storrs. Center Row: B. C. Flora, R. D. Nixon, Mrs. C. T. Twigg, L. V. Twigg, Mrs. L. V. Twigg, C. T. Twigg, Mrs. L. F. Wolfe, R. Montgomery and Baby Storrs. Back Row: Mr. and Mrs. G. A. Storr, Mr. and Mrs. E. E. Alexander, Messrs. E. M. Stottlemeyer, L. F. Wolfe, Mrs. G. C. Conley, Mrs. G. P. Chesshire and Mrs. R. Montgomery.

With deep regret we report the death of Mrs. Abbie M. Harvey, 30 years old, wife of Boilermaker W. F. Harvey, Cumberland Shops, on April 13. Her death was caused by double pneumonia. She leaves, besides her husband, five small children, her father, five brothers and four sisters, to mourn her loss.

Mrs. Harvey was the daughter of Retortman B. F. Twigg and a sister of Treating Engineer J. W. Twigg. She was well known in this community. Funeral services were held Monday, April 17, from St. Mary's Catholic Church, Cumberland, Md.

Tieman Howard Adams has moved his family to the farm he recently purchased, and Tieman W. E. Landes has moved into the Adams house. No houses are allowed to stand empty at Green Spring.

Signal Foreman C. E. Lester, 46 years in service

We were recently able to furnish cuts of our Plant recently published in our MAGAZINE to our local paper, the Hampshire Review, which paper reproduced them and gave us a full page in a late issue.

R. W. Hamilton was appointed special apprentice at the Plant on April 1.

**C. E. Lester**

Foreman C. E. Lester, Signal Department, whose picture we are glad to include with our notes this month, is purely a Baltimore and Ohio man, having 46 years of continuous service to his credit and still going strong.

Mr. Lester entered the service of the Company at Mt. Clare Car Shops in 1876, under Car Foreman Miller, on the construction of new cars. He was transferred to the Philadelphia Division in 1880 as carpenter, under Supervisor of Bridges and Buildings Andrews and Division Engineer Pratt. In 1900 he was transferred to the Signal Department, under Signal Engineer F. P. Patenall. Later he was appointed signal inspector with headquarters at Wilmington, Delaware; then general foreman, with headquarters at Baltimore and Cumberland, Md. At present Mr. Lester's headquarters are at Cumberland, where he

has charge of signal stores at Green Spring, W. Va., Mountain Lake Park, Md., and Callery, Pa. During his long service with the Company he has been in charge of the installation of several important signal sections, among which are Sherwood, Benwood to Wheeling and Weverton to Cumberland. He also installed signals on the Philadelphia Division, being in charge of the mechanical plants and assisting on automatic work.

Mr. Lester assisted in the construction of the manual block between Cincinnati and North Vernon, Ind., during the World's Fair in St. Louis in 1904, and also in the construction of automatic signals from Loveland to Cincinnati, Ohio, and from Washington to Washington Jct., on the Metropolitan Branch.

His son, J. G. Lester, is signal supervisor on the Cumberland Division.

Mr. Lester is familiar with the history of signal development on our Railroad. His reminiscences of its progress are most interesting, his record of service one to be proud of.

**Connellsville Division**

**Office of Train Master**

Correspondent, C. E. Reynolds

We are glad to see Passenger Conductor H. C. Benford back on his run on the S. & C. Branch after being off several months because of a broken arm sustained when he fell on the icy sidewalk at Rockwood.

T. S. Woods, faithful janitor, Uniontown passenger station, has been off sick for the past month. We all hope for his early recovery. Mr. Woods is one of the three loyal employes who received the Veterans' gold button several months ago, after fifty years of service with the Baltimore and Ohio.

On April 3, Miss Kathryn J. Schmitz, daughter of Mr. and Mrs. E. B. Schmitz, and Locomotive Fireman Harry R. Dunston, son of Mr. and Mrs. A. G. Dunson, of Connellsville, were united in marriage in the parsonage of the United Brethren Church. Rev. J. S. Showers, the pastor, officiated. We extend our heartiest congratulations.

L. V. Twigg, Green Spring Employee, and Mrs. Twigg, surrounded by friends and relatives who gathered to celebrate their golden wedding anniversary

We are sorry to hear of the death of Mrs. W. J. Kempt at her home in Lorain, Ohio, on March 11. Mrs. Kempt is a sister of J. T. Griffin, agent, Johnstown, Pa.

We are also sorry to learn of the death at Stoyestown, Pa., on April 8, of Mr. W. H. Speicher, father of Yardmaster C. B. Speicher, Johnstown, Pa.

Miss Marie McCune, secretary to agent, Johnstown, is spending a short vacation with friends at Detroit, Mich.

The industrial outlook at Johnstown is bright. The Cambria Steel Company is now operating above 75 per cent. The Lorain Steel Company and other industries are showing improvement. Unless the coal strike hinders, we predict normal conditions in the steel mills by fall.

Note our picture of Carpenter Thomas J. Brennan, Connellsville, who on April 11, resigned from the position as fire chief of the Connellsville Fire Department, after serving in that capacity for 19 years, or since its organization in 1903. During that period Mr. Brennan has served the Company in a highly efficient manner, always ready and willing to do his duty and only resigns on account of his age and to give the Company the benefit of a younger man's services as chief.

Mr. Brennan was born on April 3, 1859, commenced work with the Company on May 17, 1883, and has been in continuous service since that time.

During Mr. Brennan's service as fire chief, the Fire Brigade was called on at different times by the authorities to render assistance in controlling several large and dangerous fires in the city, and it responded nobly, did efficient work and was highly commended by the citizens of Connellsville.

It is much regretted that Mr. Brennan leaves the Brigade, but we feel that he has done his duty nobly and the thanks of the entire Division are tendered him.

Here is a picture of one of the charming and husky young sons of Jesse V. Boyer, patrolman, Police Department, Connellsville Division. Mr. Boyer has been with the Company for several years, first working on the section and later taking up work in the Police Department.

Our congenial car foreman at Somerset, who signs "G. W. M.," went to Washington, D. C., on April 9, to see the "cherry blossoms"—so he claims. From the expression on his face these days, we think the old "bird" will pick the "cherry" about the time the roses bloom.

We were honored with the presence of Messrs. Willard, Galloway, Scheer, Peck and Brown, who attended the banquet given by the Chamber of Commerce, Somerset, Pa., on March 31. Mr. Willard's talk was interesting and highly appreciated. We wish all of the boys could have heard it as he threw the X-Ray on some of the obstacles he has to overcome.

The Home Builders Club of Somerset, which was active last summer in getting up-to-date homes, are getting busy this spring, and by fall we expect to see at least twenty-five or more of the boys owning their own homes. Let the good work go on. If you want any advice along this line, write to Yardmaster J. E. Dice, at Somerset, who is past master in telling you how it is done.

Chief Bill Clerk R. E. Swan, Coal Billing Agent's Office, has moved to his new domicile "Swanmount," on Wheeler Hill. One of the jokes in connection with his new house is that he forgot the chimney.

Edgar A. Evans, Coal Billing Agent's Office, Connellsville, announces the arrival of a new baby boy at his home, the first arrival in the family, and the name is David Russell. Cigars were passed around by the proud father in honor of the event.

James L. Marsteller, the well known chief yard clerk, Connellsville, has gone into the chicken raising business on a large scale. States his blooded Columbian Wyandotte's are doing wonders and if the incubator Harry Connery has arranged to purchase is a success, it will relieve his mind as to whether his hens are setting while he is on the job. Harry also tried to induce "Jimmy" to purchase a talking machine—perhaps the idea is to talk the chickens into laying.

James V. O'Hara, stenographer to the general yardmaster, Connellsville, is raising a mustache. From the manner in which he raves over a certain young thing in town, we take it the mustache is to make him look older. No doubt we will soon find him lined up with the benedicts.

See our picture of Miss Betty Eileen Craver, five years' old daughter of Shop Clerk and Mrs. Fred W. Craver, Somerset, Pa. Her winsome ways have won a host of admirers.

Passenger Conductor Charles Boyd returned to his home at Connellsville on April 5, after spending one month at Brooklyn, Florida, because of his health. Charles says he feels like another man. We're glad to hear it.

Brakeman M. Brant is of the same opinion as many others, that two can live as cheaply as one. We extend our best wishes to the newlyweds.

It is reported that "Bennie" Beal, the congenial car record clerk in the Superintendent's Office, has re-organized his baseball team at Poplar Grove. We will see some fast games out there this season. Now, isn't that so, "Bennie?"

We are sorry to hear of the illness of Mrs. G. M. Tipton, wife of our freight agent at Connellsville, and we hope for her speedy recovery.

We are glad to see "Joe" Fierschnaller back on the job as night clerk, Connellsville Freight House, after an illness of several weeks.

Here is a picture of Miss Cecilia Friel and Vincent P. Flynn, stenographers, Trainmaster's Office, Connellsville. It may be that Dan Cupid is working on the case. We'll await further announcements.

E. J. McCarthy, chief clerk to the road foreman of engines, is wearing a smile that won't come off these days. What's it all about, "Ed?" Have a cigar? Certainly!

## Pittsburgh District Notes

Correspondent, E. N. FAIRGRIEVE

J. A. Spielmann, assistant to General Superintendent Peck, Pittsburgh, left the South Side Hospital on Saturday, April 15, where he had been confined for a number of weeks after having been under the knife for a severe case of gall stones. At this writing he is improving nicely and we hope that by the time this notice reaches you he will again be restored to health and able to be with us again. Mr. Spielmann has been with the Baltimore and Ohio for a good many years, and is well known. We take this opportunity of acquainting his many friends with his affliction and giving them an opportunity to rejoice with us in his return to health and strength.

The Office of the District Master Mechanic, which, for a number of years, was located in the Passenger Station at Pittsburgh, had been moved to Glenwood and merged with the Superintendent of Shops Office. It is now nicely housed on the 5th floor of the Back Shop building. They took everything with them, even the davenport. Now, as we look into the vacant rooms, we cannot but miss the smiling countenance of "Bill" Mohler & Co., and we hope that they enjoyed the sensation of moving, and that their sojourn in their new quarters will be pleasant and enjoyable.

Easter has come and gone, and what a glorious day it was—just right for the annual stroll of Dame Fashion with her many followers! The bright sunshine and balmy spring atmosphere had just the desired effect, and brought them out by the thousands, gayly bedecked and primed for the occasion. There is one dame, however, of whom we know, who missed this gay and frivolous occasion because of a most serious blunder on the part of mere man, who has yet to be educated into the ways and moods of the gentle sex.

It happened thusly: Daughter, ruddy of complexion (all natural), of fair countenance and brim full of enthusiasm, with visions of participating in the glorious Easter promenade, sallied forth on the day before the big event in search of a new "lid" with which to enliven the proceedings. After an all day's vigil she finally procured the object of her search, ordered it sent to her home Saturday night without fail, and returned to her home exhausted.

'Long about 3 a. m. the next morning, the occupants of the home were aroused from their peaceful slumber by the violent ringing of the door bell. Father, after ridding his system of some descriptive adjectives appropriate to the occasion, proceeded to ascertain the cause of the alarm. When he opened the door a huge box resembling a floral emblem was pushed into his waiting arms with no explanation, and the intruder departed.

Father, still quite a bit frustrated, but somewhat cooled down, thinking some admirer of daughter was saying it with flowers, proceeded to the kitchen, filled the dishpan full of water and deposited the box gently therein, and went on up to bed, never suspecting the storm which was to break in the morning.

Daughter arose early, filled with the thoughts of what the day would bring forth, and can you, gentle reader, imagine the consternation when she discovered what "Pa" had done with her "creation?"

Poor "Pa" came down sooner, much sooner, than he expected, and was the innocent recipient of all the wrath that an irate maiden could distribute, and after it was all over "Pa" said he would never again put anything for daughter in the dishpan to

keep over night. This is the sad story of one whose intentions were good but his judgement faulty and of a girl who wanted to, but couldn't.

The married men working in the different offices at Pittsburgh are thinking of organizing a team and challenging the fellows who haven't yet had the nerve (or shall we say, the opportunity) of taking unto themselves wives, to a game or two of baseball during the coming summer. This used to be an annual affair which was thoroughly enjoyed by all. Why not revive it this year? Those of us who are benedicts can get in practice by cleaning wall paper, beating rugs, white-washing cellars and doing other household duties appropriate to this time of year.

#### Glenwood Round House

Correspondent, MARY A. BREEN

Sincere sympathy is extended Engineer A. L. Smiley in the loss of his wife, and to Engineer Wade Simmons in the loss of his only son, Harry Hampton, aged four and half years.

I am sorry that when noting in the March issue that Engineer Irwin had been injured at Pinkerton, I failed to mention that Fireman R. V. Reinhard had also been injured, and, as a matter of fact, rather more seriously. Reinhard is now able to be about and we hope that he will soon resume duty.

On April 8, Engineer H. J. DeBolt and Fireman W. C. Ritchey, No. 7, engine 5032, with eight cars from Cumberland to Glenwood, made a splendid performance on fuel, using only four tons over the entire trip. Compared with the usual seven to eight tons, this performance is certainly worthy of commendation and work of this character will surely tend to put Pittsburgh Division in first place on fuel consumption. Here is something for the rest of the engine crews to work on.

Brakeman E. C. Sites informs that another young lady has taken up a permanent residence at his home. Congratulations!

A form 1002 brought into the Round House office recently, among other items showed—"take up slack between engine and tank—" reported by engineer. The

honorable messenger, "Bananas" Carline on reading it, exclaimed—"Why does an engineer report that? The man on the washing machine can pick up that coal." There are other kinds of slack, "Bananas."

"Jim" Myers, genial clerk, Road Foreman's Office, wishes to announce for the benefit of all concerned that Hazelwood Avenue has been opened as a lover's lane. "J. M." however, wishes to have it understood that he knows this merely from observation and not from participation. That's good enough to tell us.

Found—another and more vital use for card passes. They come in mighty handy for identification purposes. Especially when—well I won't let the cat out of the bag but if you don't believe this, ask J. B. Lane, Storekeeper's Office.

Welcome to our city—this, to E. J. Eberle, recently transferred from Benwood to fill position of pipe and air gang foreman, Round House, vice J. E. Fahey, assigned position of air brake foreman, Back Shop. We wish both success in their new positions.

J. W. Tucker, our very wise and efficient storekeeper at Tenth Street, must be losing some of that far-famed wisdom, for we found him biting pretty hard on the anniversary of All Fools, when he called Hazel 2696 inquiring if there was a box there for him, only to be informed that he was talking to Calvary Cemetery. Looks as though he is after a little advance information.

On January 17 an eleven pound girl called at the home of H. J. Meinert, general foreman, Allegheny, and asked if she might stay. Henry looked at the many blessings that had already been given him, seven boys and a girl, then decided there is always room for one more and permitted the dear one to remain. With this number, Henry has a good start for a baseball nine. Other teams in the same class are requested to book games.

We are glad to note that H. J. Meinert, George Macorman and Julia Hart, Allegheny, and Leona Sample, Car Foreman's Office, Tenth Street, have all returned to duty after being absent because of illness.

What would you do if you were all ready for a full dress party and found that your

dancing shoes were nowhere in evidence? A gentleman from Allegheny, who is very, very fond of dancing, had this happen to him recently, and the poor fellow, rather than miss the party, had to go in his commonplace Sunday suit. Of course, he danced just as gracefully and used just as many good steps, but he wasn't quite so handsome without said suit and shoes. The shoes have not yet been uncovered. Boy, page Sir Arthur Conan Doyle, the Sherlock Holmes man, etc. We want those shoes for the next Welfare dance.

Mr. Schmoll's office has been transferred to Glenwood, consolidating with the Back Shop office. We are glad to see all our old friends and hope they will like Glenwood.

Assistant Road Foreman T. H. Robey is taking himself around town in a new machine. Well, Robey, we like machine riding, so let's go.

Messrs. Scheer, Carroll and Gill were at Glenwood recently, and from here went to the Northern District.

**The Shriner's Circus**

We know a very pleasant gentlemen named "Fat" Allen—  
Once, we observed him eating peanuts by the gallon—  
Pardon us, we're wrong, we mean by the peck,  
But he was getting away with them, just the same, by heck.  
Among others, there was a gent named "Skinny" Dean,  
Then too, a young lady in whose company he's often seen;  
Also, in his glory, was Brother Robert Hill,  
Who loosened up from many a dollar bill.  
Casting our eyes everywhere—behind us, before us,  
Whom did we observe but his honor, "Jimmie" Norris.  
There were Beltz, Martin, Durant and Day—  
Never did we see such a crowd so gay.  
There were fat ones, lean ones, short and tall,  
If I spoke forever, I couldn't name them all.  
My sense of poetry fails me at this stage,  
But it was the best time had in any age.

This big doggie will protect little Jean Ford

**Monongah Division**

Correspondent, CECIL B. BAKER

The accompanying picture is of Jean, the little 19 months old daughter of C. L. Ford, chief clerk to the Superintendent.

After an illness of only a week, James Carson Newham, local superintendent of the Western Union Telegraph Company, Grafton, W. Va., was claimed by death on April 15.

Mr. Newham was born in 1860 at Cumberland, Maryland. He was the son of James M. Newham, a masonry contractor, who was engaged in the construction of various sections of the Baltimore and Ohio in the vicinity of Cumberland. Mr. Newham learned the art of telegraphy at an early age, and was employed as operator at Relay about the year 1876. In 1881 he was transferred to Grafton, W. Va. Here he lived and worked until the time of his death.

Mr. Newham was an earnest Christian and an elder in the Presbyterian Church. He was a quiet man, but full of quaint humor and good cheer. His pleasant greeting when he met you on the street, in the office, or at his church was a thing long to be remembered. He is survived by three brothers and two sisters.

Any other division that thinks it has a baseball team can get itself thoroughly disillusioned by communicating with Machinist Thomas J. Moran and arranging for a

The late Thomas Deegan (see last month's notes)

game with the boys of the Monongah Division.

On April 16 Miss Georgia Ruth Duckworth and Eugene McWilliams, son of Assistant Trainmaster A. F. McWilliams, were married in Parkersburg. They will reside in Grafton.

Assistant Engineer W. C. Pembroke is the proud father of a son, Hall Compton, born on March 16.

Miss Gladys Harrison and Watchman Charles Newcome were married at Oakland, Maryland, on April 15. They are at home to their friends in Grafton.

Miss Dollie Pratt and Machinist Benjamin H. Plum were married on April 16, They, too, will make their home in Grafton.

We hear that Miss Agnes Gocke, stenographer, Division Engineer's Office, will be married in May. Congratulations are in order.

On April 14, while cutting crossing at Barnes Crossing, Clarksburg, W. Va., brakeman R. R. Cornell was caught between couplers and killed.

Brakeman Cornell was born on February 13, 1899. He entered the service of the Baltimore and Ohio as brakeman on September 16, 1918. He was a loyal employe and his untimely death will be mourned by his host of friends.

**Charleston Division**

Correspondent, M. W. JONES,  
Secretary to Superintendent

How do you tackle your work each day?  
Are you scared of the job you find?  
Do you grapple the task that comes your way,

With a confident, easy mind?  
Do you stand right up to the work ahead?  
Or fearfully pause to view it?  
Do you start to toil with a sense of dread?  
Or feel that you're going to do it?

How do you tackle your work each day?  
With confidence clear, or dread?  
What to yourself do you stop and say,  
When a new task lies ahead?  
What is the thought that is in your mind?  
Is fear ever running through it?  
If so, just tackle the next you find  
By THINKING you're going to do it.

Edgar Guest

Cecil Kalbaugh has his troubles at Glenwood

The month of March was one of the best from a business standpoint that we have seen on the Charleston Division for some time. While, considering the existing conditions, April is holding up fairly well, we are not going to make any such showing as we did in March.

We extend our sincere sympathy to Miss Bernadine Tierney of the Superintendent's Office on the death of her mother; to L. A. Tesky, operator, Weston, on the death of his 14 months old baby boy; and to Carl and Hazel Griggs of the Division Accountant's and the Freight Offices, at Weston, on the death of their father.

Today, while strolling down the street, one of our amateur sleuths noted Car Distributor Dixon busily engaged in standing before a shop window reading something. Close observation developed it to be the Weston Democrat, our town's live *weekly* newspaper, price five cents. Of course only one side was on view, and so our Sherlock Holmes went in and asked the young lady if she would not turn it round, to the other side—(Curtain).

Check L. C. L. and C. L. Freight Weights, and so Get All Revenue Due Us.

On the Charleston Division for March, our stations showed up additional revenue gained in check weighing and checking classification, as follows:

Charleston, \$6.74; Clendennin, \$1.00; Gassaway, \$25.55; Buckhannon, \$51.77; Burnsville, \$6.62; Weston, \$52.47; Midvale, \$3.00; total, \$147.15. The Western Lines divisions are doing better, and we hope to see the Charleston Division leading in the east before long. There is plenty of opportunity to correct these errors, and it means LEGITIMATE revenue due your Company. Do you know that this amount would buy a good many tons of coal, or that it would pay several men for a week's work?

This reminds us that recent visitors at Weston were Mr. Hamilton of the General Manager's Office, and W. A. Kraft of Mr. Curren's office; both were welcome.

We are glad to see "Charlie" Criswell around again after a severe attack of flu; F. Cutright, Division Accountant's Office, after a trip to the hospital; Lineman Ray Hewitt, after the flu; and Agent K. O. Wade, Heaters, after a rather severe illness which leaves him looking pretty shaky. We all send our good wishes for prompt recovery. To Agent Orrahood of Flatwoods, we extend our sincere sympathy in the recent loss of his wife.

To D. L. Cutright and his wife we extend congratulations on the birth of a daughter.

"When a yard engine shifts a string of coal hoppers to wear off the rust, some Republican editor announces that there is a big decrease in the number of idle cars."

So sayeth our friend the Clarksburg exponent. Maybe so, but we hope before long to see the idle cars actually reduced without the necessity of such schemes as a yard engine moving them to keep the wheels from getting flat.

*Service Is the Best Advertisement—and the Cheapest.*

The writer had occasion to use trains 57 and 58 recently on a business trip, and had the pleasure of having a meal on car 1064 under the care of Steward J. A. Crouse, and on car 1060 under the care of Steward J. A. McNamara. COURTESY is certainly their middle name, and the service and food were both up to the usual Baltimore and Ohio standard. We cannot wonder, after such an experience, that the School Teacher found it possible to write the complimentary things he did recently in "Printers Ink" about our Dining Car Service.

Trainmaster J. D. Nicholas, Charleston Division

again warned that they will be up against the "School Teacher" for further examination at each future meeting. "A word to the wise is sufficient." Mr. Safety Committeeman, carry your little book in your pocket and read it up, and what is more important still, LIVE UP TO WHAT IT SAYS and see that your pals do, too.

Bill Jones is on the repair track; He fancied he could do A little work beneath the car without his FLAG OF BLUE; Well, yes, he did it many times, in spite of rule or warning, One day the engine hit the car—Bill's wife is now in mourning.

"Jim" was a nimble kid, he lived nearby the track. He jumped each train as it went up, and off as it came back. You couldn't warn "Jim" anyway, "Jim" thought that he knew best. Said he was in no danger—his tombstone reads "AT REST."

We learn with sincere regret that J. H. Bowen, for some time past general secretary of the Y. M. C. A., at Gassaway, has resigned his position to accept another as secretary of the Railroad Y. M. C. A. in Hamlin, N. C. on the Seaboard Air Line. That's the second man they have taken from us. Mr. and Mrs. Bowen have endeared themselves to all of us by their many quiet kindly acts, and it is with the sincerest sorrow we see them leave, but—our loss is their gain, and we wish them God-speed and all possible good luck in their new home.

Mrs. W. H. Longwell, Gassaway, has returned from a visit to Mrs. C. E. Shepard in Wauchula, Florida. C. E. Shepard, who recently had a severe attack of flu, has also returned from Florida, where he recuperated and has resumed his duty as general foreman. We congratulate him on his recovery. Mrs. J. M. Davis, wife of the relief agent (and by the way, J. M., she says she's nearly forgotten what you look like), has returned from a trip to Baltimore. H. H. Boggess, Gassaway, has left on a trip to Florida.

"Billy" Sunday has been in Charleston, W. Va. for a few weeks. A large number of Railroad people from Gassaway have taken the opportunity given them to go and hear him.

"You've got to be a go-getter or a do-with-outer."

John F. Severns at the age of 24

Overheard recently on a Baltimore and Ohio train, between Weston and Clarksburg.

A. What's this here \$50,000,000 bond issue they are talking about?

B. Why, that's to make good roads between the county seats in the State of West Virginia.

A. \$50,000,000? They won't spend anywhere near that; they'll put the county seats close together and then they won't have to build so much road.

The regular safety meeting was held in Weston on March 31, all members being present except two who were detained by Company's business elsewhere and therefore excused. A novel scheme has been evolved by the chairman, Superintendent Trapnell. After fair warning, he took out his safety book of rules and examined all those present as to their knowledge of them. We are glad to say most of our members came out 100 per cent. which is the Charleston Division standard—or at least what we are aiming for, and all members are

Virginia, "Peggy," Grace and Martha Lee, children of Shopman Lantz, Gassaway, W. Va.

Special attention is called to the MAGAZINES. They can be secured at the Superintendent's Office, Shop Office and Trainmaster's Office, Weston, and at the Shop Office and Assistant Superintendent's Office in Gassaway. Drop us a card if you don't get one, and we will see that you do. Printing costs money and we don't want a surplus. We have sufficient on the Division for you all. See that you get YOUR copy. The same condition obtains with SAFETY FLASHES. This is an interesting little pamphlet, and can be secured at the same place as the MAGAZINES. See the last issue, and heed the good advice given by General Car Foreman F. M. Garber, of Gassaway, and read our Superintendent's bulletin on the back.

Our "Mirrors of the Charleston Division" this month are occupied by our old friend, Trainmaster J. D. Nicholas. He needs no introduction. Mr. Nicholas was born in Harrisville, West Virginia, and entered the service of the old Coal and Coke as freight brakeman in 1906. He was promoted to conductor in 1907, and to assistant trainmaster in 1916, which position he still holds. Of a quiet, unassuming character, full of energy and loyalty to his employers, Mr. Nicholas has earned the sincere esteem and affection of all who know him. Mr. Nicholas has a nice home in Gassaway, is married and has two young Railroaders in his family. Mr. Nicholas bought his home through the Relief Department—a possibility, by the way, open to all—and has nothing but praise for that important part of the Baltimore and Ohio.

Great excitement in Weston recently. Office boy rushes up stairs into the Office of the Superintendent all out of breath. "Mr. Schide, there are 25 chickens downstairs waiting for you to come and look after them." General collapse of all the office force. After reviving the ladies with copious libations of water, it is discovered that the "chickens" are not of the female variety, but are some little ones with feathers which have just arrived by parcel post for the Lilly Brooke Hall farm in Shady Brook. Upon this discovery, the usual calm and quiet is restored, and the long distance call for the immediate appearance of Mrs. Schide is cancelled.

### Washington

Have you ever been there? If not, you have missed something. You have seen all over the division the Passenger Department's advertisements of the tours they are going to have this summer. As these notes will not reach you until May, we will only mention Monday, May 29, and June 15. As an example, the price from Weston, including Railroad ticket, sleeping car, meals and hotel expenses, together with side trips in Washington, for FOUR days, is only \$36.85; from Richwood, \$40.70; and from Gassaway, \$38.75. Looking over the schedule, we don't see how, if your friends made this trip alone, they could get what they will get on this tour for much under \$60. Washington is well worth seeing. Won't each one of you try to persuade ONE person to make this trip? If you do, it means just that much gain to your Company. The train runs anyway even if there is one passenger only. Agents can help this along especially by advertising it thoroughly in their towns. To all true red-blooded Americans, a trip to Washington must hold many delights, and now is the opportunity. Let's get busy and spread the news and get a crowd from our Division to take the trip. They can't regret it, and you won't—Baltimore and Ohio Dining car and train service, hotel expenses, side trips to points of interest such as the White House, Con-

gress, etc. Talk to your friends of all there is to see and the reasonable rates, and they will surely go.

Have you heard of any one who wants to go to Chicago? If so don't forget to tell them about the new service on Trains 5, 6, 7, and 8, the Baltimore and Ohio—New York—Chicago flyers. All the comforts of home. Passenger Traffic Manager Callo-way says "The aim of the passenger traffic officials is to surround the traveler with every comfort possible." An innovation has been started on these trains. Pullman passengers are furnished free with lap robes so that in the cool of the morning and evening they can sit out on the observation end of the car and enjoy the scenery. Don't forget to tell our patrons about it.

### Clean up! Spring is here

Good Housekeeping is again of vital interest. The snow has gone, and the old scrap, etc., dropped, is now visible. You clean up your own house every spring. Clean up the Company's house in which you work. A "good housekeeper" is an efficient railroader. Let's have everything in fine shape, when we have visitors. Lots accomplished so far, but there's plenty more to do.

Lady Fairfax, a thoroughbred collie owned by Miss Jean Pell, Wheeling Division

### Foreign Cars.

Cars are still with us. And they still cost \$1.00 per day. Keep 'em moving, and SAVE WASTE.

The March fuel performance sheet arrived today. We don't stand as high as we should. For details see the Fuel Bulletin. When are we going to get up to No. 1? No reason why we can't. Along this line, Engineer Powell and Fireman Bennett of the Elk Line flyers between Charleston and Elkins, have been commended for the interest they have taken in making a good fuel record.

Superintendent W. Trapnell spent two days in Baltimore recently attending the spring time-table meeting. We understand there will be few changes on this Division. Trainmaster Deegan also spent two days in Baltimore, getting out the proof, etc.

### Wheeling Division

#### Correspondents,

L. W. WETZEL and MARIE SLATTERICK

Charles McConkey, messenger boy, Wheeling, surprised us all when he appeared in his first long pants. He looks dignified indeed! (And he wears socks, too, if you please!)

J. H. Lindsay, rodman, Engineering Corps, Division Engineer's Office, was suddenly called to Chicago recently because of the illness of his father-in-law.

Miss Mary Marker, stenographer, General Superintendent's Office, knows for a

certainty that she won't give up her stenographic position this year. She fell up the steps one day last week, and of course we all know what that means.

The body of Lieut. A. J. Mountain was brought home and was buried on Tuesday April 18 with military funeral. Lieut. Mountain was a resident of McMechen and a former employe of this Company as clerk at Benwood. He was killed in battle five years ago.

The accompanying picture is of Lady Jean Fairfax, a thoroughbred Scotch collie, owned by our file clerk, Miss Jean Pell. Lady Jean is four years old. She has made her home with Miss Pell nearly all of her doggie's life.

Car Distributor Fred M. Powell is the proud father of a baby daughter, born on March 18. Mr. Powell says 18 years from now he'll show us the prettiest girl in the world. We don't doubt his word in the least.

Supervisor J. A. Roberts, Wheeling Division Short Line Sub-Division, also has an addition to his family. Triplets! And all girls!!! Congratulations, Mr. Roberts!

A sad bit of news is the death of A. J. Wells. Mr. Wells was signal maintainer on the Wheeling Division and was well liked by everyone. We wish to extend our sincere sympathy to the bereaved Mrs. Wells.

More congratulations! Mr. Stork visited the Kindelberger's on April 2. The next day "Ed" was passing around cigars. It's a boy! "Ed" is C. E. Kindelberger on the engineering corps, Division Engineer's Office, Wheeling.

Frank Ackerman is the proud and satisfied owner of a new Buick roadster! Sunday one could see him spinning around in his new car with a friend. Mr. Ackerman's smile was broad. Oh, ye friends in Baltimore, take notice!

### Holloway, Ohio

Correspondent, O. R. TELLE

Mr. and Mrs. F. W. Geer are the proud parents of a new baby girl. Mr. Geer was formerly employed as supplyman, third trick, at this station.

The position of general yardmaster, Holloway, is again made vacant by the promotion of former Yardmaster Booth to a new position at Fairmont, W. Va. We extend to Mr. Booth our best wishes for success.

We have with us now Mr. Pitcher who succeeds Mr. Booth as general yardmaster. Please accept our hand, Mr. Pitcher, in extending our hearty cooperation to you and wishing you success in your new position.

If you wish to be a successful farmer we would advise that you talk with our smiling roundhouse foreman, R. W. Livingston, who is managing a small ranch just across from the shops. "Livy" says if he had just raised one more hog and about one dozen more chickens he and his wife could be living a retired life at present.

All employes at the shop unite in expressing their sympathy to Mrs. Palmer and family in the loss of their beloved husband and father. Mr. Palmer's death came as a sad surprise to all who knew him. He was formerly employed at the shops as an electric welder and was an efficient workman.

The March issue of our MAGAZINE certainly contained an item of interest to E. D. Kirk. He was intently pouring over the last page of the MAGAZINE and,

FROM THE GENERAL MANAGER'S OFFICE, CINCINNATI

Left to right: Edwin W. Spille, pass clerk and Magazine correspondent; J. A. McCabe, stenographer; Walter K. Noe, assistant chief clerk; Mae Agen, comptometer operator; E. F. Medosh, stenographer; Charlotte Lauther, comptometer operator; Arthur Lauther, clerk; August Duesing, assistant file clerk; Joseph A. Barron, stenographer; Katharine Nock, file clerk; "Judge" Holmes, a visitor from the Baltimore Veterans' Association; John Gruhler, general clerk; George Lang, Jr., clerk; Ruth Murdock, stenographer

upon investigation it was found that he was reading an advertisement entitled "A New Way to End Your Roof Troubles." Say Kirk, we didn't know you were conscious of your ailments.

**Western Lines**

**General Offices, Cincinnati**

Correspondent, E. W. SPILLE

Emil G. Swepston

**Honor for Baltimore and Ohio Boy**

The accompanying photograph is that of Emil G. Swepston, former M. C. B. clerk and timekeeper, Storrs, Ohio. Mr. Swepston started to work for the Baltimore and

Ohio at Storrs as clerk, in 1908, during vacation, and has been with us every vacation until the present time. Having graduated from high school in 1912, he went to work for the Baltimore and Ohio and in 1916, entered University of Cincinnati as a Pre Medic. He is in the graduating class of this year. He, with four other seniors, has been admitted to membership in the Alpha Omega Alpha Fraternity at the College of Medicine. Membership in this fraternity is considered to be the highest scholastic honor obtainable by a member of the graduating class of a medical college. Mr. Swepston will be well remembered by all his associates in the Railroad for his pleasing and willing ways. He takes with him into his new field the best wishes of all who know him.

The accompanying photograph is that of Baltimore and Ohio Police Officer Clyde L. Cramer, who was killed April 16 by being hit by engine at Elmwood Place, Cincinnati, Ohio. Mr. Cramer was one of our efficient officers and was on duty at Elmwood Place when he stepped from behind a passing train in front of another coming down the opposite track. His death is keenly felt in the Police Department at Cincinnati, as Mr. Cramer was well liked by all his associates. He is survived by a widow and two small children, to whom we extend our sincere sympathy.

**Cincinnati Terminals**

Correspondent, JOSEPH BEEL

"Little Sunshine," the first trick crew dispatcher at Ivorydale, better known to his associates as "Henry," surprised the forces one day last week by smiling. The reason, we are told, is that Frank Witwer, the Beau Brummel train caller, came to work with a white collar attached to a blue

shirt. The wearing of the white collar in itself is not significant but the reason for the extra finery is what made Henry smile. It is understood that Frank has a thrill in the neighborhood of Winton Place.

Conductor F. J. Richter, Toledo Division, has proven to be one of Cincinnati Terminals most active workers for Safety. There is nothing that escapes the observant Fred, and his reports have added materially to correcting unsafe practices in the Terminal.

The Late Clyde L. Cramer

With the coming of Spring, a young man's fancy turns to love. So it is with Ralph Diamond, yard clerk at Elmwood

OFFICE FORCE OF SUPERINTENDENT OF TRANSPORTATION, CINCINNATI, OHIO

Left to right, front row: Miss Alice H. Conroy, stenographer; Miss Ruth L. Beitzer, statistical clerk; Miss Amanda M. Gaiser, secretary; Miss Phyllis Meiers, stenographer; Miss Rose Stutter, stenographer. Back Row: J. J. Flanagan, passenger clerk; Thos. J. Murphy, chief clerk; C. R. Elkins, assistant superintendent transportation; W. C. Morrison, assistant chief clerk; C. J. Armstrong, station service inspector; Robert P. Burns, stenographer; A. W. Knapp, statistical clerk; C. J. Moeves, assistant car distributor; G. M. Wilhelm, car distributor; Howard Pancoast, file clerk; Russell C. Kistner, assistant file clerk; George Lange, office boy; W. C. Andrews, clerk; O. H. Von Bion, statistical clerk; F. J. Hornbach, embargo clerk; C. A. Hornbach, statistical clerk

and it is apparent that the young lady of his dreams is some culinary artist. This is substantiated by the delicious fudge that Ralph passes around every Thursday and Monday mornings.

Joe Winterfeldt, the popular caller at Stock Yards, had the misfortune to sprain his ankle on March 21, while in the performance of his duties. However, we are glad to know that the injury is improving rapidly and "Mose" will be back on the job soon.

In speaking of the "Think and Act Drive," J. L. Flanagan, our chief clerk at Elmwood, said: "The real purpose of the drive was successful. We found that we not only had thinkers in the Cincinnati Terminal, but also actors. Arthur Tanner, quite a saxophone player, and Roy Sayferle, quite a singer, showed by their reports that they were in a class by themselves in the drive."

Harbingers of spring are all around us at this season of the year, but a sure sign of the time is the exasperating Coleman at Elmwood, chuckling to himself about the chances the "Reds" have this year—and the best he can figure is eighth in the row.

"Bill" McGinley is still wearing his Easter Togger!!!! Watch out, Girls!

"Tommy" Bowns, the little trainmaster of the Toledo Division, is back on the job, cutting 'em loose and keeping the Dayton boys busy taking 'em in. Incidentally it is not known whether "Tommy" is going to buy a new auto or another canary bird.

"Blue Moon"—not an opera, but a brand of treated Burley, is Kelly's new dish.

Not that the boys of the Ivorydale Shops crave any distinction, but they are sorry to hear that Colonel Brown and "Mike" Neal, composing the heaviest bull gang of the entire system, will soon accept a tempting offer to enter circus life. Colonel Brown tips the scales at exactly 404 $\frac{3}{4}$ , while Neal runs a close second at 403 $\frac{1}{2}$  wearing nothing but a smile.

MacNamara was overheard to say to one of his friends that he does not at all mind dying, but he surely would hate to lose his highly prized seniority.

One of the most popular men in the shop was married on February 28. What do you mean, "Bill?" There are more boiler-makers now than there are jobs. However, here are our congratulations!

**FOR SALE**—Twenty-year old horse, perfectly sound except for one stiff leg and one bad eye. The only reason for selling is the fact that the public drinking troughs have been removed. Liberty Bonds accepted as part payment. Apply George Roush, Elmwood Farm.

"Bob" Hopwood thought that he would like to have an 'a la rouge complexion, but forgot to figure the cost. How soon did you say you were going to bathe in the river again, "Bob?"

"Pansy" says the only difference between a rich man and a poor man is that the rich man owns a twin six and the poor man has six twins.

Since John Zureick repaired his car, we fail to see what use he will get out of his Klaxon.

We wish to extend our sympathy to Boilermaker "Jos." Speier, at Ivorydale, who recently lost his mother.

We also wish to extend to Robert Gabriel, clerk in General Foreman's Office, our sympathy in the death of his grandfather, Mr. Richard Gabriel. Mr. Gabriel was almost ninety-seven years of age at time

of his death and was one of our veterans, having worked for the Railroad for 56 years.

Hurrah for the boys in the boiler shop who have come forward with MAGAZINE news! We hope other departments will take notice and show their colors.

#### When you ride the Baltimore and Ohio

By G. B. S.

When you ride the Baltimore and Ohio  
With a river by its side,  
It will show you charms a plenty  
As around its curves you glide.

There's no use in getting worried,  
Take it easy while you can,  
For our Road is built on Safety  
From its chief to sectionman.

The trains are well inspected  
By a man they call "Car Jack"  
If he finds one in bad order  
It's sent to our shop track.

So you see it's always Safety  
When you're riding on our train,  
Section men are always watching  
For all defects on the main.

The trains are electric lighted  
There are fans to keep you cool,  
And at your destination  
There's the porter with his stool.

He will help you to the platform  
Beside the railroad's shiny track.  
And when your journey's ended,  
Our good Road will take you back.

Have you heard "Joe" Speier's latest song hit? It's called, "When the Rolls are Rolling in the Flues." Some hit!

Newlyweds desiring information as to how to greet their wives will be duly instructed by Coney Fey, who will gladly impart what knowledge he has on the subject, as well as his own personal experience.

"Dick" Haas says that the Oakland is right there when it comes to all around performance. He claims it makes all hills on high. Which way, "Dick," up or down?

Lost, blown away, or stolen: One khaki shirt—owner, "Sam" Brookes. Will finder kindly return shirt as soon as possible to avert the buying of another Sunday shirt, now being worn during the week?

Did you ever hear of a fellow entrusting a diamond ring to another? That was the story "Bill" Leonard tried to make us believe the other morning. Now to make the story complete, "Bill," tell us how she liked it.

Hickory, Dickory, Bill  
Works just like a still  
He chews his gum  
'Till his jaws are numb  
Hickory, Dickory, Bill.

### Newark Division

Correspondent, B. A. OATMAN

#### Newark, Ohio Station

Oh, look who's here! Most of you know the two young ladies on page 64, but for the benefit of our readers who are not yet acquainted with them, we present Miss Mary Gainey (left), labor distributor, Division Accountant's Office. Miss Gainey, as assistant correspondent in the depot offices, helps to make the Newark Division section of the MAGAZINE a success. The other is Miss Lavern Seymour, secretary to W. E. Laird, chief clerk to division superintendent, a busy little body, who turns out correspondence just like a printing press.

The photo in same group on page 64 shows engine 173 as it was standing at the turn-

table at Columbus, Ohio, just prior to its being sent west to Purdue University as a gift from the Baltimore and Ohio.

This type of locomotive was known as the "Camel Back" and will be remembered by our older employees. The fireman had to go down the stairs at the rear of the cab to the tender, then fired the engine from the tender which was on a line with the fire box door.

The cab is large and roomy, resembling a sun parlor in which the engineer and fireman had their quarters when engine was out on the road or in yard service. Engineer J. A. Shaw is seen in the cab at the front. He moved the engine from Newark to Columbus. His fireman is shown next, and just outside the cab is Edgar Kimes, hostler at Columbus, Ohio.

In our picture gallery we see Walter and Robert Board, sons of Rate Clerk Harvey Board, freight house.

Yardmaster James Varner has graduated from the Ford owner's class and is now the proud possessor of a Chevrolet. "Jim" and his family of six look very comfy in their new car.

Effective April 1, the Newark Division has standardized the power on the two main sub divisions, Newark to Benwood, and Newark to Willard, by adopting all Q-1-A engines. This will have a good effect in the despatching and moving of trains. You can always find Newark Division leading the others when it comes to bettering conditions or improving the service.

We are informed that our handsome and genial general yardmaster Charles Powers, Zanesville, Ohio, was recently married to one of Zanesville's charming young ladies. Not being fortunate enough to be personally acquainted with Mrs. Powers, we can only extend our congratulations. After knowing Charles as we do, we know that he exercised his usual good taste and judgment in choosing a wife. A toast to you both! May you enjoy a long life and a happy one!

The April issue of the *Hot Box Journal* carries the following:

"A journal box is a small and innocent appearing appliance. But when it gets hot, it disarranges the entire schedule of a whole division and causes untold trouble to train crews, untold difficulty to the despatchers and incalculable expense to the railroad."

We have just received a supply of Willson Industrial Safety Bulletin No. 115-S for our bulletin boards. This poster was put out by the Willson Goggles, Inc., Reading, Pa. It shows a pair of goggles in one hand and an artificial eye in the other hand and the words "TAKE YOUR CHOICE."

This bulletin is food for thought. Would you give up your good eyes when you could retain them by simply obeying the Safety rules of the Baltimore and Ohio, which state clearly that goggles must be used when handling any kind of work where the eye may be injured by flying particles? Mr. Head, Safety Department, follows this particular violation of the rules closely. If you are called on the carpet for not wearing goggles when you should have done so, do not get "wrathy" about it, but just think of the bulletin mentioned above. TAKE YOUR CHOICE—eyes or goggles.

#### An Up To Date File Room

To find a file room which you can say is positively up to date is a rare occurrence, but we happened to take a peep into the file room of the Freight Station, Columbus, Ohio, and were amazed to see such a systematic place, everything right up to date and records for past eight years right in front of you. You could locate any day's business in 1914 just as easily as you could

any day's in 1922. The file room is well lighted and ventilated, with plenty of room at the base of each set of shelving, so you can spread out your work and check with the file records. It is certainly a pleasure to look up file records in such a tidy and well kept place.

**Heavy Freight Facilities**

When shipments weighing 45,500 pounds are delivered to any freight house for unloading, you certainly must be equipped to lift and place such immense loads.

We noticed a shipment of a transformer for the Columbus Power and Light Co., standing in the Columbus Freight station yards. On inquiry we found that it was billed at 45,500 pounds and that the electric crane at the freight station would easily handle the immense piece of machinery. In order to see that we were being advised correctly we sauntered around and waited for the big crane to show us what it could do. The crane raised the transformer and set it on an eight wheel truck provided for its removal just as easily as you could imagine. We also found that the Baltimore and Ohio is the only road entering Columbus which has the facilities for handling material of this kind and it is necessary for competing lines at Columbus to set heavy material at this crane for unloading. The Baltimore and Ohio is well equipped to handle any kind of freight offered.

**Crosby's Plight**

By A. S. Wahl, Yard Clerk

Our friend Crosby is some sensation  
Dancing with the ladies! What exhilaration  
With swaying feet to Syncopation  
As graceful as the whole creation!  
With his friend down to the station  
Prancing gayly with elation,  
Smiling broadly in anticipation,  
Of the whirling gay gyration!

The slippery floor would not stay put  
Where Crosby had it under his foot  
His foot slipped up, his head came down—  
My goodness, Crosby, you'll break your crown.

Quickly recovering, he brushed his coat  
"No dance floor yet has got my goat,  
I'll finish this dance if it takes a year—  
What makes your face so red, my dear?"

"We'll finish this dance and eat our feed  
Then quickly home in my car we'll speed,  
There await another invitation  
To the realms of fox trot syncopation."

The "auto bug" seems to have been working overtime of late. We notice three new cars running around bearing the initials, "F. E. C.," "W. E. L.," and "D. S. G." We are expecting to receive an invitation soon to take a ride and pass on the good qualities of each individual car.

We are indeed grateful to Lee Moore, director of Public Works, Newark, Ohio, and a former employe of the Baltimore and Ohio as draftsman. Newark is to install a filtration plant costing approximately \$125,000. Mr. Moore has included in the contracts for the furnishings of all material for the plant, that the material must be routed to Newark via the Baltimore and Ohio. Many thanks, Lee!

**John S. Price**

Born on October 2, 1853. Died on April 11, 1922. John S. Price was born in Columbus, Ohio, October 2, 1853. On August 25, 1868 he entered the service of the Baltimore and Ohio at Bellaire, Ohio, as messenger boy. On October 1, 1869 he was made clerk, Bellaire Freight station. On October 1, 1871 he was promoted to assistant check clerk. On March 25, 1882 he moved to Zanesville, Ohio, and took the position of

THE MONITOR SADD IRON CO.  
484 FAY ST. BIG PRAIRIE, OHIO

Maintenance of Way clerk. On March 1, 1886 he was transferred to Newark in a similar position but returned to Zanesville on September 1, 1889. Here he was made chief clerk, Maintenance of Way Department. On January 1, 1902 the Maintenance of Way offices were moved from Zanesville to Newark, necessitating Mr. Price's return. On May 1, 1910 he was made account clerk for the division, and on December 16, accountant for the Columbus and Newark sub-division, handling the accounting for the joint tracks between Newark and Columbus.

Mr. Price was held in high esteem by everyone who came in contact with him. He was a loyal employe and always had the interests of the Baltimore and Ohio at heart. He was an active member of the Relief Department Advisory Committee for many years. He made continued efforts to better the conditions and increase the pension allowance of the Baltimore and Ohio Veterans. He was secretary of the Newark Chapter, where he was an earnest worker.

John Doyle and Mr. Price did everything in their power to secure for Newark the annual Veteran's picnic for the System; they succeeded, but both have been called from our midst just at a time when they would be able to enjoy this pleasure.

Mr. Price was married to Miss Amelia Hart, Zanesville, Ohio, on May 10, 1876. His wife died on May 15, 1918. To this union three sons were born, J. V. Price, chief clerk to freight agent, Columbus, Ohio; Franklin N. and George L., both of Youngstown, Ohio.

Mr. Price's untimely death was brought on by a stroke of apoplexy on January 26 while at his desk in the Division Accountant's office.

Funeral services, which were held in the First Presbyterian church on the afternoon of April 14, were largely attended, all departments of the Railroad being represented in person and by floral designs which accompanied the casket to its last resting place in the Cedar Hill Mausoleum.

The heartfelt sympathy of every department employe is extended to the three surviving sons and relatives.

George D. Kuhn, Sr.

Born on May 22, 1840. Died on March 28, 1922.

Howard Hombe's habitual habit of visiting hidden halibuts' habitations ends as usual—but ask Howard, he knows

Mr. Kuhn entered the service of the Railroad on November 23, 1879 as boiler-maker. He continued in this capacity until 1884, when he had his back injured by being caught between two boilers. His injury necessitated his retirement from active service for a period of ten years. He re-entered the service as watchman and continued for eight years in this position; he was then made boiler-maker helper, but his injury forced him to retire again, and he was pensioned on September 18, 1905. George, as he was known among the Newark shop employes, always had the interests of his fellow employes at heart, and often made visits to the shop to see the old comrades who will miss him.

Mr. Kuhn was married to Miss Julia Sanders on July 22, 1860. He leaves to mourn their loss, his widow and one son, Arthur, of California, five grand children and three great grand children. Newark shop employes extend their sympathy to the widow and family.

We are glad to present a picture of Lillian M. Gartner, age twelve, oldest daughter of Assistant Day Roundhouse Foreman Charles H. F. Gartner. It shows Miss Gartner as she appeared when confirmed on Palm Sunday, April 10, at the St. Paul Lutheran Church.

On March 13 Car Inspector H. Norman, Zanesville shops, was sent to Sonora, Ohio to make repairs to a Q. D. load which had broken an arch bar. On arrival Mr. Norman found that it was necessary to have a blacksmith make weld in the arch bars and that this would necessitate further delay to the car if arch bars had to be sent to shop for repairs. Mr. Norman moved the arch bars to the smith shop in the village at Sonora, had the work done, and paid for the repairs. He was later reimbursed by the Company for his expense. Such interest as this deserves credit and Master Mechanic Cooper commended Mr. Norman for his action.

Superintendent Kruse in his circular letter of April 8, has called attention to the importance of closely following up the Think and Act Drive at the various stations on the Division. Renewed and continued close

attention to these matters will undoubtedly be productive of great benefits in various ways, especially in a reduction in claim payments. The results to date have been satisfactory and this drive is certainly worthy of the best efforts of every employe whose duties bring him in touch with conditions which can be easily corrected by a little thinking and acting. Get out your Forms 1755-B and get busy.

#### "Getting Them Out On Time"

On March 5, engine 5091, Train 49, dispatched from Newark, made its run to Sandusky. When the engine was uncoupled from the train, it was found that the throttle had become disconnected. Foreman Honenberger, Sandusky, Ohio, had engine moved to the Round House, where he knocked the fire, blew steam off the engine, lifted dome cover, and by bending down over the throttle valve at dome opening, found that the throttle box had come loose from side of dome, falling over and stripping the nut off bottom of auxiliary throttle valve. It was necessary to work over flues with hot steam raising through dome opening, remove, repair and apply throttle box, auxiliary throttle and rigging.

Train 49 arrived at Sandusky at 1.20 p. m., engine was repaired, gotten hot, and left Sandusky on Train 48 at 4.05 p. m., an "ON TIME" dispatchment. Mr. Honenberger performed this work in less than two hours and forty-five minutes. Notation similar to the above has been made on Mr. Honenberger's service record, and Superintendent Kruse had commended him for his personal interest in handling the situation, which required speed as well as lots of grit.

#### Columbus, Ohio Station

Correspondent, MISS EDITH ROACH

On the evening of March 28, Mrs. E. J. Funke, wife of our freight house foreman, entertained the Baltimore and Ohio Girls' Sewing Club. The evening was enjoyed by all. Music was furnished by Miss Ruth Funke, daughter of the hostess. A surprise was handed to all in the form of two small hearts folded together. On opening them up, two pictures and a dear little verse announcing the engagement of Miss

Kathryn Funke and Ray Jones, appeared. Miss Funke is transfer clerk, Columbus Freight Office, and a sister of E. J. Funke. Mr. Jones was a former rate clerk in Columbus office but during the past year he has been with the Hocking Valley Railway at Columbus.

Several changes have been made in our office in the way of promotions. R. J. Kenney has been assigned to rate clerk, account promotion of D. H. Reese to rate clerk in Division Freight Office, Newark, Ohio. William Davis is promoted to correction clerk, Edward Dauer, to cash clerk.

Claim Clerk and Mrs. R. E. McCuen are the proud parents of a son, Robert Cameron, born April 7. Mr. McCuen will be remembered as an operator, who worked in that capacity for several years at points on the Newark Division.

Our sympathy is extended to our Chief Clerk J. V. Price in the loss of his father, John S. Price, of Newark, Ohio.

Miss Marie Brink entertained with a six o'clock dinner at her home in Grove City on April 7, in honor of Miss Kathryn Funke, bride to be. The guests were the six girls, Anna Browne, Hazel Cashner, Cecelia Carter, Dorothy Funke, Edith Roach and Kathryn Funke.

Miss Anna Browne and Hazel Cashner entertained at the latter's home with a miscellaneous shower in honor of Miss Funke on April 11. The guests were the members of the Sewing Club and a few of their friends. The evening was spent in playing games and jokes on the bride to be, ending up with the singing of some appropriate parodies written for the occasion by Mr. Ralph Dodds, a former clerk in our office, now with Senator Willis in Washington, D. C.

Miss Brink, Miss Cashner, Miss Funke and Miss Roach entertained Miss Anna Browne on her birthday, March 23, by taking her to dinner and to the theater. All Miss Browne wanted was FISH and that was what she got. Miss Browne certainly enjoyed the hospitality of her friends, and says that when pay day comes again she will take herself out to a dinner.

Miss Kathryn Clifford, who has been in poor health for some time, has taken a furlough. We hope that she will be able to be with us soon again.

The Misses Lillie and Bess Sites have moved to their new home at Grove City.

#### Mansfield, Ohio

Correspondent, C. R. STONE

E. N. Kendall, division freight agent, Newark Division, recently spent the day at Mansfield, calling on the various manufacturers of the city relative to traffic movement.

Traveling Passenger Agent G. R. Dugan, was in the city recently in the interests of passenger business. He spent the day with our local agent, G. F. Sellers.

Traveling Passenger Agent S. E. Corbin, Canadian Pacific Railroad, was in the city recently, calling on our local ticket agent relative to passenger business out of Mansfield.

On March 12 the new bill of lading was discussed at the traffic managers' meeting held at Mansfield. The new regulations went into effect on March 15, and there are a number of changes in which the shippers are interested. The new bill of lading was explained by Traffic Manager J. C. Custer, Barnes Manufacturing Co., as well as by E. C. Doudna, traveling freight agent, Newark, Ohio. The interests of the railroads were looked after by representatives of the Baltimore and Ohio, Erie, and the Pennsylvania Railroad Companies.

#### NEWARK OHIO FOLKS

Lower right: Little Walter and Robert Board. Lower left: Photograph of dining car steward, J. F. Holzhauser, which was included in this block in error

**The Ten Commandments of Business From Book of Impressions**

1. Handle the hardest job first each day: easy ones are pleasures.
2. Do not be afraid of criticism, criticize yourself often.
3. Be glad and rejoice in the other fellow's success; study his methods.
4. Do not be misled by dislikes; acid ruins the finest fabrics.
5. Be enthusiastic; it is contagious.
6. Do not have the notion that success means simply money making.
7. Be fair, and do at least one decent act every day in the year.
8. Honor the chief; there must be an executive to everything.
9. Have confidence in yourself and make yourself fit.
10. Harmonize your work; let sunshine radiate and penetrate.

**Sandusky, Ohio**

Correspondent, Miss I. C. MARTIN

Charles O. Abele, waybill clerk, treated the force on the first day of Spring. A fine baby daughter has arrived at his home.

Mrs. J. S. Kinney recently went to the Grand-Rapids, Michigan, hospital for an operation; we wish for her a speedy recovery.

Charles F. Doerflinger, a pensioned employe, died at the Good Samaritan Hospital, Sandusky, Ohio, on March 30.

**Akron Division**

Correspondent, J. A. JACKSON

The youngest and the biggest baby of the bunch—the new Akron Division. We welcome you, and wish you well!

With the consolidation of the Cleveland and New Castle Divisions into what is now known as the Akron Division, with headquarters at Akron, Ohio, comprising 694 miles of main track and 449 miles of side tracks, or a total of 1143 miles, the new division will rank among the largest of its kind in the United States. Superintendent D. F. Stevens is in charge, and has surrounded himself with an efficient staff of officers. The united efforts of all employes, if put forth in the channels of co-operation, will assure the officers of success in the operation of this, the "Baby Division" of the System.

The names of the officers of the new division follow:

- Superintendent—D. F. Stevens, Akron, Ohio.
- Trainmaster—C. P. Angell, . . . Akron, Ohio.
- Trainmaster—J. P. Dorsey, New Castle Jct., Pa.
- Trainmaster—J. E. Fahy, . . . Lorain, Ohio.
- Trainmaster—J. Fitzgerald, Massillon, Ohio.
- Master Mechanic—J. A. Tschuur, Akron, Ohio.
- Division Engineer—E. J. Correll, Akron, Ohio.
- Road Foreman of Engines—J. L. Shriver, Akron, Ohio.
- Road Foreman of Engines—W. E. Sample, New Castle Jct., Pa.
- Road Foreman of Engines—P. C. Loux, Lorain, Ohio.
- Division Operator—M. E. Tuttle, Akron, Ohio.
- Chief Train Dispatcher—C. M. Trussell, Akron, Ohio.
- Division Accountant—S. H. Jewett, Akron, Ohio.
- Division Claim Agent—G. W. Hesslau, Youngstown, Ohio.
- Division Storekeeper, H. A. Lockhart, New Castle Jct., Pa.
- Division Storekeeper—C. H. Rothgery, Lorain, Ohio.

Medical Examiner—Dr. F. Dorsey, New Castle Jct., Pa.

George Broadbeck, electric welder at New Castle Junction Shops, has been nicknamed "Daddy" as the result of the first visit from old Doctor "Stork," who arrived on Sunday, April 2 with a bouncing ten pound boy, George, Jr. George is just about the happiest man around the shops and is receiving the customary congratulations from a host of friends. Good luck, George, and many of them, but where's my cigar?

Chief Dispatcher J. A. Phelps, New Castle Junction, was called to Peoria, Ohio, by the death of his mother on Thursday, April 6. The sympathy of his fellow employes is extended to him in his great loss.

Rumors are flying thick and fast that Cupid's dart is shooting his little arrow from the Division Accountant's Office, aiming straight, and hitting the mark every time in the Freight Office. Hurry up, Walker, let's have the news for the next issue.

Congratulations are in order to Inspector of Accounts and Mrs. P. B. McDowell, on the arrival of a baby boy, on Sunday, April 2. The little fellow has been named Joseph. No cigars, please.

Employes of the Division Accountant's Office enjoyed a farewell dinner in the Elks Club, New Castle, on March 28. The dinner was given as a courtesy to various employes in this department who will be located in the new headquarters at Akron, Ohio. Special guests included Superintendent and Mrs. D. F. Stevens and W. R. Pitt of Baltimore. Chief Clerk W. J. Thatcher acted as toastmaster of the evening, and introduced Mr. Stevens as the first speaker. Mr. Stevens gave an interesting and instructive talk on the spirit of good fellowship and its relation to the successful operation of the Railroad. Mr. Pitt related some humorous tales of his railroad experiences and dwelt on the methods of modern railroading. Division Accountant P. H. Groscup was the last speaker on the program. His remarks were interspersed with expressions of the friendship in which he held the members of his office force. The Committee in charge of arrangements included W. J. Thatcher, chairman; Fred Ellis, Whan Poole, Ruth Dufford and Gladys Keelan.

**Cleveland**

Correspondent, A. F. BECKER

The last meeting of the School of Accounting was held as a surprise to S. H. Jewett and H. L. Vermilion, at the residence of Mr. Jewett. The guests of honor were Mr. and Mrs. J. E. Fahy. The meeting place was at the Public Square, and the crowd went out in a body to his residence, but they wore about a quarter of an inch of shoe-leather in finding his ranch. The night, a wet one, took all the shine and polish off everyone except Louie, the office boy, who brought his long pants with him.

You ought to have seen the expression on Samuel's face when he looked out the window and saw the gang coming toward the front door. I'll bet he thought the war wasn't over. Nevertheless he welcomed us all, and Mr. Vermilion (H. L. V.) was at the back door starting for Flora, when he heard the commotion.

We played games, danced and sang. The music was furnished by F. S. Scroggie and Miss M. Roberts. John Jewell brought along his fiddle case—he must have been going to carry home his lunch.

We played putting on the donkey's tail. Frank Hert got the booby prize. He thought the donkey was an elephant with two tails. He got his Easter Eggs, but he needs them.

J. M. LYON & Co.

Dept. 1 Maiden Lane  
405 New York City

Miss Winters won first prize, a handkerchief. "Mike" Walus is going to get a job in a tire shop blowing up tires; he now can blow out matches.

Our little flappers were there: Lena Beil and Mary Beggs, full of pep and ready to shake a shimmy. The party went along alright 'til someone said "Let's eat," and the music stopped short.

After our lunch a box of good cigars was brought out and all the men had a smoke, as we had a fund. After lunch, Miss A. Beaumont presented Mr. Jewett with a masonic watch charm, and Mr. Vermilion with a gold pencil as tokens of friendship between employes and officers. Miss Beaumont made a presentation speech which was a credit to her.

Listening to the Victrola 'til we all signed our names in the Guest Book, we departed for home, wishing the best to Mr. Jewett and Mr. Vermilion, as this was the last meeting of our school.

George J. Elford, local agent, Dover, was married at Warren, Ohio, on March 14 to Mrs. Nick Nigro. The bride is a graduate of Mt. Marie College, Canton, and an accomplished musician.

The enclosed picture is that of Arthur Marquard, assistant file clerk, Akron, Ohio, known as the "Jazz Hound."

Passenger Brakeman P. M. Carpenter was married on March 23 to Mrs. Murray of Massillon, Ohio.

**Massillon, Ohio**

Correspondent, W. E. BRUGH

"Joe" Yetzer, hostler, recently had much difficulty in getting engine 1140 hot, before being dispatched from Massillon engine house. Some one previously had placed a board over the stack to keep rain from running down into it while a flue was being put in boiler, and board was not noticed on top when fire was started; consequently, "Joe" had a fight on his hands to get engine hot. That is one on him.

Brakeman C. C. Heiser, who was recently furloughed on account of depression in business, has accepted a temporary posi-

tion as crossing watchman, Main Street, Massillon.

A general clean up was made on the Cleveland Division during the first part of April. Our Division is now in about the cleanest condition it has ever been, and all of us can take pride in our general surroundings and the right of way.

Track Walker J. Antonille, has resigned.

**BULLETIN**—Brakeman George H. Brugh shaved off his mustache. It is rumored that a petition was gotten up to have it removed.

#### Can You Imagine—

Chief Clerk Kent Spangler, Freight House, with a cigarette in his mouth?

Agent L. T. Kegler, without his prized mustache?

Repairman "Franz Joseph" Krizan and "John Bull" Appleby, Massillon Rip Track, being very peaceful?

Engineer M. H. Carpenter running a foot race?

Round House Foreman E. Polem driving his Ford at a speed of 20 miles per hour?

Fireman P. B. Hollinger and F. P. Arnold, Dover, Ohio, and L. R. Groff, Massillon, were examined on the Book of Operating Rules and time-table at Massillon, by Trainmaster J. Fitzgerald, on April 12; they are now full-fledged engineers. Good luck to you, boys!

Brakeman G. H. Brugh has taken a four months' leave of absence. Mr. Brugh intends to enter the paper hanging business. Be careful, and do not hang any star boarders (borders), George.

Boilermaker W. E. McGurren, has been off duty for some time because of several broken ribs. Here's hoping for his speedy recovery.

Yard Clerk T. O. Baker has resigned to accept a position at Mansfield as a crane-man in a rolling mill. Good luck to you, Tom!

L. W. "Governor" Myers has re-entered the service as yard clerk, vice T. O. Baker, resigned. We know that "Gov." can handle the work, and we are all glad to see him back with us again.

Austin Sanders, clerk, Freight House, has left the service to return to his home in Tiffin.

The accompanying picture shows Mr. and Mrs. Harry O'Neil and their happy family of eleven children, none of whom are twins, at their home in Cordova, Alaska. Mrs. O'Neil, who is just 37 years of age, is a niece of "Mart" Leahy, operator, New Castle Junction. "Mart" is very proud of this large and happy family of relatives. Mr. O'Neil is engaged in the mercantile business in Alaska.

File Clerk Arthur Marquard

On March 28, engine 5024 in charge of Engineer M. J. Garrett and Fireman J. R. Weller, succeeded in handling No. 13 with nine cars from Akron, Ohio to Willard, Ohio, —a total of 74 miles—on 231 shovels of coal or an average of 5.4 pounds of coal per passenger car mile.

This is an exceptionally good performance, being the lowest that we have any record of.

#### Dover, Ohio

On April 10, formal announcement was made of the marriage of George J. Elford, our local freight agent, and Miss Mary Nigro, of Dover, Ohio. The wedding took place at Warren, Ohio, on March 14. The bride is a graduate of Mt. Marie College, Canton, Ohio, and an accomplished musician. They will make their future home at Dover, and we wish them all success.

Section Foreman C. M. Goodie states that he has the best section on the System; his gang is composed of furloughed brakemen and firemen, and they know what good track means.

Yard Brakeman G. A. Dickey went to Cleveland on a business trip on April 3, and while in the fifth city, made a call on Division Accountant Jewett.

Section Foreman C. M. Goodie was given fair warning recently, when he was notified by the motor policeman to discontinue riding his bicycle on the side walk. He now takes the road. We thought that you knew better than that, Goodie.

Brakeman and Mrs. H. Jordan have returned from a visit with their friends in Wheeling, Washington and Pittsburgh. Mr. Jordan tells us an old story of going fishing while on his trip, but he failed to bring any home to show us. How large was the one that got away, "Monk?"

Brakeman H. W. Kaiser wishes to thank the Baltimore and Ohio employes for their kindness during the sickness and death of his mother, who passed away on April 3.

Coal Dock Foreman Charles Elbert, coming from his country home on the Brandywine Road, in his Sedan, picked up two aged colored women and took them safely to their home on Depot Street. "If you see a kindness done, pass it on."

Fireman R. M. Morrison, known as "Saw Mill Bob," who has been furloughed, has taken a contract to shear all of the sheep in Harrison County. This is a large contract, but "Saw Mill Bob" is the man for the job.

The mother of this big family of eleven children, way up in Alaska, is Mrs. Harry O'Neil, and her uncle, Operator "Mart" Leahy, is mighty proud of her

### Chicago Terminal

Correspondent, T. H. WILLIAMS

No, nothing further about the Anderson-Cordt event just now, but we hope to have something of interest next month.

The bowling season of our league closed on March 30, with close competition between the M. of W. (1921 "champs") and the Lincoln Street Supervisors. After hard fighting the M. of W. repeated, and are therefore considered the 1922 season "champs."

The following is the final League standing:

Team S'tanding

What was in the black box which Kilbourne was carrying? Those who know the secret know that summer is here. The black box contains all the latest fishing apparatus known to science. The new edition this year is a radio outfit, so connected that "Bill" will fish with a receiver to his ear. The fish will nibble at the hook and cause a short circuit, ringing bells and also giving "Bill" the busy signal, after which there is nothing to it but pull in the fish. Ask "Bill," he knows—lucky number 00606—Wisconsin Science.

A fashionable new color is to be called "Helen Pink." Lots of folks look that way in pink.

"All that I have accomplished or expect to accomplish has been and will be by that plodding, patient, persevering process of accretion which builds the ant heap particle by particle, thought by thought, fact by fact. If I was ever actuated by ambition, its highest and warmest aspiration reached no further than the hope to set before the young men of my country an example in employing those invaluable fragments of time called 'odd moments'."

Elihu Burrill

Sandy, not feeling well, had consulted a doctor.

Doctor: "Do you drink, Sandy?"

Sandy: "Yes sir."

Doctor: "Well, you must give that up. D'you smoke?"

Sandy: "Yes, sir."

Doctor: "You must give that up too."

As Sandy went quickly through the office door, the doctor exclaimed: "You have not paid me for my advice, Sandy!"

"I'm not taking it," replied Sandy.

Three Scotchmen went to church, each contributing tightly the penny he intended to contribute when the plate was passed. Consternation reigned when the minister announced that this particular Sunday an effort was to be made to raise the mortgage and asked every member of the congregation to make a substantial offering.

During the prayer the Scots held a whispered consultation as to the solution of their dilemma, and reached a satisfactory decision.

One fainted and the other two carried him out.

We regret very much to report that "Joe" Kennedy, chief clerk to master mechanic, Lincoln Street, is still confined to his home with rheumatism. We sincerely hope that he will be back in harness soon, as we all miss him.

We extend our deepest sympathy to Henry Berg, who lost his father during the first part of April.

### Chicago Division Garrett, Indiana

Correspondent, MARGARET A. GALLOWAY

Earl Shull, loc 1 patrolman, was found dead five miles west of Bremen, Ind., during the early morning of April 10. It is a mystery as to whether he met his death by accident or foul play.

Mr. Shull, whose duty it was to protect shipments against robbery, left Garrett on No. 97, about 6.30 p.m. on Sunday. Evidently his absence was not noted by the crew in charge of train No. 97, as his body was not discovered until 1.30 a. m. or about four hours after the train on which he was riding passed the point where his body was found by Conductor A. G. Beeber and Engineer J. M. Young, in charge of Train 294.

When found, Mr. Shull's body was lying between the two main tracks, with the face buried in the gravel of the road bed. His patrolman's club was strapped to his wrist, which is taken to indicate that he was experiencing trouble with train riders. There was a large hole in the back of his head and it is thought that this was caused in the fall from the train.

Mr. Shull was employed in the local shops but when forces were reduced a year or more ago was furloughed and then accepted position with Police Department. He is survived by the widow, three small children, and two brothers.

The body was taken to Bremen and prepared for burial, then it was brought to Garrett on No. 10 on the same date. Funeral services were conducted from the Christian Church at Auburn, with burial in Woodlawn.

Mr. Shull and family had been residents of this place but three weeks, formerly residing in Auburn.

Frank J. Weaver, formerly employed in the local shops as an electric welder, but who accepted a similar position with the Pennsylvania Railroad at Fort Wayne, has been promoted to supervisor of electric welding. In his new position Mr. Weaver will have charge of the electric welding in the shops at Fort Wayne, Logansport, Chicago and Crestline.

J. H. Lantz, shop clerk to master mechanic, has reported for duty after an absence because of an attack of the flu.

Engineer Mcville Ebersole sustained a broken leg when he fell on the icy pavement on March 1. Although still confined to Sacred Heart Hospital, he is improving nicely.

Miss Ruth Creviston, daughter of Engineer and Mrs. F. W. Creviston, who underwent an operation at Sacred Heart Hospital, is also improving nicely.

William Motson, former Chicago Division employe, and brother of Mrs. A. R. Moore, was recently killed in the yards of the Nickle Plate Railroad, at Bellvue, Ohio.

## Get on the right side of the Cab!

A LOCOMOTIVE FIREMAN'S promotion depends largely on the knowledge he shows of the locomotive and kindred subjects at the time he goes up for his examinations.

It behooves every fireman, therefore, to prepare himself as thoroughly as possible so that he will not be found wanting when his turn comes.

Failure to pass means a black mark against your name and the loss of valuable seniority rights.

The best way to make sure of passing that examination with a high mark is to study at home, in your spare time, with the International Correspondence Schools. In just an hour a day you can learn the things you need to know about boilers, their attachments, the best methods of firing and feeding, the construction and operation of cylinders and gears, the management of locomotives, and the construction and operation of engine and air-brake apparatus generally.

Just fill out the coupon printed below and, without obligation or a penny of cost, get the full story of what the I. C. S. can do for you.

### INTERNATIONAL CORRESPONDENCE SCHOOLS BOX 8509-B SCRANTON, PA.

Explain, without obligating me, how I can qualify for the position, or in the subject, before which I mark X.

His foot became caught in a switch, and although Mr. Motson made every effort to stop the onrush of the locomotive, he was caught under its wheels.

The following note appeared in a recent issue of the Garrett Clipper under the notes from Garrett Clipper of ten years ago: "W. L. Robinson, former roundhouse foreman here, has been appointed road foreman of engines of the Baltimore Division, with headquarters at Baltimore. The resignation of W. E. Trainer as traveling engineer was accepted and he is now pulling the throttle on his old run. Engineer George Wilson has been appointed to fill the vacancy and the name of the

office has been changed to Road Foreman of Engines." Both Mr. Trainer and Mr. Wilson are now deceased.

Mr. and Mrs. Frederick Nagel and son John have returned to their home in Pittsburgh, after a visit at the home of Mrs. Nagel's parents, Mr. and Mrs. F. W. Crevis-ton, of South Franklin St. Mr. Nagel is employed in the Accounting Department at Pittsburgh, and was formerly in that Department at this station.

Conductor and Mrs. B. A. Byers were called to Plymouth, Ind., because of the death of Mrs. Byers' father, the late S. J. Nicols. His death was due to shock caused when he sustained a broken hip in a fall recently. Mr. Nicols was well known to local employes as he has made his home with Mrs. Byers for sometime and formerly resided at Walkerton, Ind. He is also the father of E. D. Nicols, Superintendent of the C. M. & St. P. R'y at Eau Claire, Wis.

To all of the following we extend our heartfelt sympathy in their bereavements:

To Coppersmith and Mrs. H. H. Roan and family, in the loss of Mr. Roan's father.

To Car Builder and Mrs. Harrison Grogg and family in the death of their daughter and sister Lucille.

To Chief Dispatcher and Mrs. A. R. Moore in the loss of her brother, William Motson.

To Boilermaker and Mrs. Vern Wisner in the death of their only son.

To Fireman and Mrs. E. C. Ellison in the death of their son and brother.

To Mrs. Earl Shull and family in the death of their husband and father.

To Conductor F. Murphy in the loss of his wife.

To Conductor and Mrs. Byers and family in the loss of Mrs. Byer's father.

To Brakeman J. Davis and family in the death of the wife and mother.

Engineer Alfred Weirich, who for a number of years operated a yard engine in local yards, has been granted a pension and is now making his residence on a small tract of land in Sunny Florida. Mr. Weirich is now past seventy-two years of age and we trust that he will be permitted to enjoy a number of years in the pleasant surroundings of his new home.

Mrs. Kline, wife of Engineer S. T. Kline, who recently underwent an operation at the local hospital, is now improving nicely. Her many friends wish her a rapid recovery. Mrs. Kline is a sister of Engineer E. E. Richards, formerly of this place, but recently of Willard, Ohio.

Word has been received by local relatives of the critical illness of Mrs. Maud Brown, wife of former Machinist C. J. Brown, at her home in Danville, Ill. Mrs. Brown will be remembered as Miss Maud Galloway. She is a sister of Assistant General Foreman A. B. Galloway, and of Mrs. J. F. Gordon, Sr., and until the past few years made her home in Garrett. Mr. Brown is now employed by the C. & E. I. R. R. at Danville.

#### South Chicago

Correspondent, ESTHER SPREENBERG

We were all agreeably surprised when we learned of the marriage of Lieut. C. W. Geenen, Police Department, South Chicago, and "Fame" Hunter, daughter of Thomas Hunter, local electrician at this station. The couple were married at Crown Point, Indiana, on March 25, and are temporarily residing in South Chicago. Our sincere congratulations and best wishes to Mr. and Mrs. Geenen!

F. S. DeVeny, Superintendent of the Baltimore and Ohio Chicago Terminal,

and J. W. Melone, district freight agent at Chicago, paid us a visit the other day. It took a rainy day to bring them out. We hope it rains some more.

Edward Eckert, our messenger, paid a visit to Garrett, Indiana on Saturday, April 8. Did you like the town, "Eddie?"

#### Ohio Division

Correspondent, A. E. ERICH

SAVING COAL AT THE RATE OF A SHOVELFUL A TRIP, means that the Ohio Division will be in the "Saving Column" each month. Why not try it?

Conductor James E. Ford, at present on leave of absence, while in the station at Portland, Ind., overheard a conversation between a party of three and a ticket agent in regard to a trip to Washington, D. C. They had in mind a route over another road. Mr. Ford explained to them that they could go to Cincinnati and take the Baltimore and Ohio train direct to Washington. He also spoke of the different items of interest that could be seen by taking this route and gave them other information in regard to making the trip via Baltimore and Ohio. Mr. Ford's conversation with these people resulted in their purchasing tickets direct to Washington, D. C., via Cincinnati and Baltimore and Ohio. After having tried the Baltimore and Ohio way, of course these people will always want to go that way if possible. More friends and more BUSINESS, thanks to Mr. Ford!

It is with regret that we learned of the death of George W. Cutright, blacksmith, on March 28. Mr. Cutright has been ailing for over two years, and death came after a long, patient and unceasing struggle to regain his failing health. An employe for many years, he made many true and faithful friends, all of whom extend their sympathy to his wife.

We extend to Brakeman H. Bresnahan our sympathy in the death of his sister, Anna.

A. Rea, clerk in Division Accountant's office, is all smiles. "Yep," he says, "got another girl-up at our house." Congratulations!

We are glad to announce that Brakeman E. W. "Curly" Davis, who has been off duty since September because of illness, is again working.

Our sympathy is extended to the family of Train Baggage-master August Wagner, who died March 26, after an illness of several years from a complication of diseases. He was an employe for thirty-eight years.

Fireman F. L. Newton has just returned after being off duty because of illness. We are glad to see him back again.

#### Another "business booster"

Mrs. W. L. Allison, wife of district safety agent, learning that two friends were anticipating a trip to Los Angeles, California, immediately got in touch with the ticket agent in regard to route, etc., insisting that this route call for BALTIMORE AND OHIO from Chillicothe to St. Louis. The trip was taken as per route furnished by Mrs. Allison.

Because of the peace and quiet that reigns (?) around the desk of one of the clerks in the Division Accountants' Office, he has decided to rent one of the drawers in his desk to the mouse family. This family recently moved in and converted the drawer into quite a nice little home. Good luck, "Don."

#### SAFETY AGENT SEZ—

Trainmen and Switchmen: Take this "DON'T" to work with you every day. Don't go between moving cars or engine

Virginia Jean, little daughter of Agent F. C. Segale, Cozadale, Ohio

and car for ANY PURPOSE WHATEVER. The usual reason for going between moving cars is to turn the angle cock, lift pin when the lever does not work, or adjust coupler. Wait until the cars stop. The few seconds time required is a good investment. Many employes are injured and killed every year by failing to heed this caution. Study your schedule but don't forget that the Book of Safety Rules contains some mighty important reading matter.

Brakeman D. M. Jones is receiving congratulations over the arrival of a baby boy.

#### St. Louis Division

Correspondent, H. F. SMITH,

Secretary to Trainmaster, Florida, Ill.

Engines on Trains 53, 54, 55, 56, 57 and 58 are now handling trains from Lima, Ohio, to Louisville, Ky. P-3 type engines are being used to handle these trains on the Toledo and St. Louis Divisions. Effective March 12, through trains formerly operated between Detroit, Toledo and Cincinnati were extended to operate through in both directions between Detroit, Toledo, Cincinnati and Louisville. The using of the Central Union Station at Cincinnati instead of the Fifth and Baymiller Streets station, eliminates transfer across the city. We should not lose any opportunity to acquaint the traveling public with this new arrangement.

That the handling recently given the "Passing Show" Company, Louisville to St. Louis, was highly satisfactory in every way was the expression of Manager Early, who stated that it was his intention to write to Messrs. Shuberts of New York, informing them of our service. This train, consisting of seven cars, left 7th Street Station, Louisville, at 7:32 a. m., arriving Union Station, St. Louis, at 3:16 p. m., making the run in seven hours and forty-four minutes, or sixteen minutes shorter time than asked for by the Passing Show Company. The train was handled by Engineer Owens from Louisville to Washington, Engineer J. M. Berry, Washington to St. Louis and Conductor Cook. Road Foreman of Engines Creager, who rode the train the entire distance, states that handling of train by engineers was excellent, with smooth starts and stops.

The heavy and continuous spring rains have caused a great deal of high water over the division; although no serious trouble has been experienced it was necessary to place sand bags along track at Mill Shoals.

H. J. Ramsey, chief clerk to division freight agent, Florida, has resigned after 16

years of service to take a position with the State Highway Department at Springfield, Ill. C. N. Turns, local freight office, Louisville, has been appointed to fill the vacancy.

Conductor H. H. Bryan, Bridgeport run, has been placed on the pension list. We understand he has been failing for some time with rheumatism. We all regret to see our old friend retire from active service.

Born to Machinist and Mrs. B. A. Day, Flora, a fine baby boy. Eight and one-half pounds, but not the kind of pounds Bernard has been used to.

We had excitement galore and potential heroes everywhere on Sunday night, April 2, when crew of extra 2509, west, passing Aviston, reported doors open and lights burning in station. When the agent, who then was off duty, investigated, he found that the lamps in the waiting room had been lighted by passengers waiting for a train, and had not been extinguished. The excitement then subsided.

Signs of activity around Washington Shops when the Passenger Car Department re-opened under the management of our popular passenger car foreman Frank McLin. We have been getting an output of 25 cars per month. Back Shop forces have also been increased to handle re-conditioning repairs to locomotives.

No small part of the success of the Elk's Minstrel given at Washington, Indiana, during the latter part of February, was due to our employes who assisted. Among the participants from our forces were N. R. Martin, E. A. Dykins, Leonard Bartlett, Earl Harrington, T. J. McCarthy and the Misses Mildred Hemick and Dorothy Fitts.

Congratulations are being extended to Mr. and Mrs. Hubert C. Myron, who were married on April 1. Mr. Myron is third trick operator at Medora, Indiana, and has been in the service for the past six years. Mrs. Myron was formerly Miss Kathleen Schooley, daughter of O. D. Schooley, agent at Vallonia, Ind.

All members of the railroad circle, as well as patrons of our Springfield District, were glad when Conductor Charles Ireland was able again to resume duty, after an absence of several months from sickness. Mr. Ireland, as well as the Company, is extremely proud of his record, which after 49 years of continuous service is without a mark against it. A true exponent of Safety First, he is always watchful for conditions or practices that lead to personal injury. He bears no mark of injury, so common among the "old timers" of the days when Safety was made the butt of ridicule. Mr. Ireland, born in Chillicothe, Ohio, June 3, 1857, first entered the service as an apprentice machinist at Chillicothe, then the Marietta and Cincinnati R. R. (now the Ohio Division) on August 1, 1873. After seven years in the Motive Power Department, during which time he also worked at Vincennes, Ind., he entered train service in 1880, working as brakeman, baggageman and freight conductor. He was promoted to regular passenger conductor on November 8, 1883, and has been running passenger trains for 39 years. When passenger crews were run through from St. Louis to Cincinnati in 1885, Mr. Ireland was assigned to trains Nos. 2 and 3. Records kept by the then General Superintendent Brent showed that during one year on this run he was late only twice. Mr. Ireland vividly recalls both occasions, once twenty minutes and again forty minutes, due to engine trouble. On June 1, 1889, he was transferred to the Springfield District, where he has remained and where he now is conductor on Trains 49 and 40. He is widely known by railroad employes, officials and the public. His courteous and efficient manner of performing his duties, always accompanied by his cheerful smile, has become a standard. We all wish that it will be his fortune to continue in the future as he has in the past.

**Motive Power Department**

Here are "Sonny" and "Nigger." "Sonny" is the two year old son of our popular Machinist F. M. Ruess, Washington Shops.

Another son was born to Night Roundhouse Foreman and Mrs. Walter Mischler on April 8. The young man will be known as "Paul." Best wishes!

The Apprentice School re-opened at Shops on March 27, under the supervision of Walter W. Wagenman, recently transferred from Chillicothe, Ohio, vice J. R. Minter, transferred to Philadelphia.

We are glad to report that the wife of L. A. Smiley, chief clerk to master mechanic, is rapidly recovering after a surgical operation at Rochester, Minn.

Division Master Mechanic J. J. Herlihy has moved his family from Parkersburg, W. Va., to Washington.

The recent epidemic of flu caused the various offices to look like a holiday. We couldn't find anyone who would call it a pleasant vacation.

General Clerk H. A. McCrisaken, Car Department, has been made motive power time clerk, Division Accountant's Office; R. S. Isenogle, enginehouse clerk, has been made general clerk, Division Accountant's Office.

**Accounting Department**

Ask "Sam" when the next Saturday evening dinner comes off.

I. & C. Bill Clerk E. G. Arndt has resigned to accept position with the Missouri Pacific, at Wichita, Kan. We all wish "E. G." success in his new position.

**The Vose Grand**  
 has the incomparable Tone—the one quality above all others which makes a real piano. The exquisite tone of the Vose Grand distinguishes it from all other pianos.  
 We Challenge Comparisons  
 Write for our beautifully illustrated catalog and floor pattern of the Vose Grand, also our easy payment plan.  
**VOSE & SONS PIANO CO.**  
 165 Boylston St. Boston, Mass.

**VOSE**

About all of the force have now become settled at Washington. Even "Shorty" and "Put" finally got over.

When one gazes at our tonnage clerk the mystery of why girls leave home is solved. He surely has a way with the fair sex. (We got this information from one of the fair sex, but don't know how she knows anything about it.)

Understand Ruth traded her pay draft recently but conscientious scruples caused her to trade back. How about it, Ruth?

The spring season has been officially opened by the purchasing of new cars. Miss Bertha Feagans and Earl Harrington purchased coupes and it is whispered that Jesse Hoover will soon be wheeling 'em over the roads in a new sedan. We wonder if he will be alone. But they say that two musicians can never get along.

Messrs. Bier and Isenogle will attend the clerk's convention at Dallas, Texas, in May.

"Mush" is sporting a new diamond. Several have suggested "phoney," but "Mush" says "this is the real thing; believe me, if it is not I am sure out \$1.98."

Our inspector of accounts, W. J. Bassett, is still in Baltimore. "Peeny" won't be able to live in a little town like this when he comes back. We understand he is carrying a club to keep 'em off.

We now have a new man on our payrolls, Barney Google. If you don't believe it, ask "Sam" Newby. He can tell you all about it with the frills.

We had trouble with our clock for quite a while until one night Mr. Martin said he would fix it all right. He did and almost fixed himself. Climbing from the ladder to the safe, he was safe until he started down and found he could not tight-walk the side of a ladder. The clock still needs fixing.

With what esteem a man may be held in the minds of his fellowmen by his daily

Below: Conductor Charles Ireland  
 Above: The little son of Machinist Ruess, Washington Shops

Please mention our magazine when writing advertisers

conduct, was shown in the tribute paid to brakeman Charles McLain, who was fatally injured at Fritchton, Ind., on March 22. Interment was made at his home in Enfield, Illinois, where hundreds came to pay their final respects. Special services were also held at the residence of F. F. Kellums at Flora, Ill., where he had made his home for several years. At both places all business houses were closed during the funeral and a special train run from Flora to Enfield and return. At the cemetery extensive and impressive services were delivered by the officers of the I. O. O. F. lodge of Flora, then that of the B. of R. T. and finally by the American Legion. There were six posts represented, with 100 men in uniform. Commander Carl Montgomery was in charge, with Captain Elliott, of the Carmi Post, taking charge of the firing squad at the close of the services. The body of the deceased was conveyed to the cemetery in military style on a flag-draped caisson, drawn by four black horses. Through the death of "Mack," as he was known, noted for his cheerful disposition and clean code of living, an excellent employe and a valuable citizen has been lost and our sincere sympathy is offered.

### Toledo Division East Dayton, Ohio

Correspondent, EDWARD M. MANNIX

From Detroit, Michigan, straight through to Louisville, Kentucky, Pullman and dining car service are excellent. The most efficient service that railroad skill can produce, and an excellent ride over the Baltimore and Ohio. This will be glad news to the traveling public, especially to the ball players from the American Association; it will enable them to jump all around the circuit with a great saving of time and money.

A number of our honored Veterans are still talking about their meeting held at Dayton, Ohio. It is pleasing to hear the comments on the good will and the pleasant memories it brought back of years ago. Yes, they say it was the best ever.

Some talk of having a general re-union of the Baltimore and Ohio employes at Dayton. We hope that this materializes, as it will be a grand gathering of mothers, wives and sweethearts, and will mark an epoch in the lives of our employes. Think it over seriously, Fellows. Let's go!

#### Save the Pieces

Three Chinese laundry men they were,  
Who toiled the livelong day.  
Till one broke down from over-work,  
And went insane, they say.

**MEN FROM THE COACH SHOP, LIMA**

Left to right, upper row: F. Merkle, A. Berning, C. Koch, C. Baka, J. Cook, W. Martin, R. Stansbury, D. Hogan, R. Tice, W. Atts, W. Schafer, L. Leppla, F. Moran, J. Sellers, D. Hartzog, J. Callahan, J. Baker, L. Vermillion, H. Callahan, G. Schafer. Lower Row: J. Schnabel, D. Clum, R. Hunt, M. Kammerer, C. Boals, W. Martin, D. Bowers, F. Frey

His fellow brothers deemed it wise  
To take him down the track  
And put him in a mad house,  
Until his wits came back.

A fast express rolled by just then  
And through the trio cut—  
That evening on the tracks were found—  
Two washers and a nut.

Pleased indeed were the shop employes to see John W. Bellmyer made assistant night roundhouse foreman. They promise to bend every effort to help him retain the high standard that East Dayton is noted for. We think it a well deserved promotion. We congratulate Master Mechanic A. E. McMillan upon his wise selection.

James E. Osman, one of our veteran engineers, is now a resident of our city, having recently moved from Toledo, Ohio. We surely welcome you, Mr. and Mrs. Osman.

Now, then, Martindale, Mr. Osman has set an example. Shake off the dust of Carthage and Elmwood and follow his example. Everybody knows Mrs. Martindale likes Dayton and we are waiting to welcome both of you. Come ahead, "Ed.," get busy.

On April 6, Robert O'Neil, our venerable and honored car foreman, rounded out 41 years of faithful service on the Toledo Division. He holds a proud record, having been several times commended for his services. "Bob," as we call him, says he wants to round out 41 years more. We hope you do, old scout.

We don't get much news from the repair track. Nobody seems to get married, nobody dies. Jackson always too busy to talk, kinda leaves me in a quandary, so I'll say—"Well enough—Good bunch!"

I have been trying to gather up a little data on some of our veteran employes. While these men are comparatively young and active, yet their services range from 20 to 40 years. Just glance on the list: J. W. Riley, Robert Doudican, William Phares, Frank Proctor, Andrew Bean, William Finley, John H. Dixon, Frank Lebron, Patrick Lucid, James Smith, Michael Meyers, George Suman, Jacob Kelley and several more—all holding proud records for continuous service. East Dayton is proud of them!

Wonder why Eugene Lowry is making all the visits to Newark, Ohio! I understand the attraction is a most charming young lady. Come on, Gene, 'fess up!

With the permission of the Management, I am going to solicit a few advertisements for our MAGAZINE. I ask our employes to patronize those who decide to use our MAGAZINE.

On March 28 we received the sad news of the death of Thomas Windham, the venerable father of Boiler Inspector A. H. Windham. Mr. Windham died in Michigan and was buried at Bell Center, Ohio. The sympathy of the shop is extended to Mr. and Mrs. Windham in their sad loss.

Again the grim reaper has invaded our ranks. On Wednesday, April 12, Mrs. Clara Sifford, wife of veteran Engineer "Mack" Sifford, passed peacefully away. She was buried in the family lot at Woodland Cemetery. She was a lovable character and we extend to "Mack" our sympathy.

Please send me items of interest! I cannot be every place, but I will strive to please you, if you will assist. "Among Ourselves" is an all-employes' section, and if you will address me at the Roundhouse Office, I will do the rest. Fair enough, is it not?

The fashions of Easter had nothing on our girls in the Master Mechanic's Office: they were surely away out in front with their scenery, and held the pace with the best of them. We've got to hand it to them; they're right there!

#### Boosting the Booster

"Boost your city, boost your friend;  
Boost the church that you attend,  
Boost the street on which you're dwelling,  
Boost the goods that you are selling.  
Boost the people round about you,  
They can get along without you.  
But success will quicker find them,  
If they know that you're behind them.  
Boost for every forward movement;  
Boost for every new improvement.  
Boost the Road for which you labor.  
Boost the stranger and the neighbor.  
Cease to be a chronic knocker;  
Cease to be a progress blocker.  
And if you'd make your city better,  
Boost Baltimore and Ohio to the letter."

**FROM THE COACH SHOP, LIMA, OHIO**

Left to right, upper row: H. Snyder, L. Vermillion, R. Hunt, H. Schell, W. Schafer, B. Hyde, C. Koch, O. Overholtz, W. News, C. Burkholder, H. Maish, G. Leppla. Second Row: E. Baughman, R. Jewell, D. Drake, W. Arras, C. Neuell, S. Roth, F. Tilley, R. Binkley. Bottom Row: L. Lamb, J. Klapp, J. Goebel, R. Lamb, A. Winters, G. Schafer

The following letter is placed in the MAGAZINE upon the request of Superintendent Mann:

DAYTON, OHIO,  
March 18, 1922.

Mr. A. E. McMILLAN,  
Baltimore and Ohio Railroad,  
Dayton, Ohio.

Dear Sir—You will no doubt be surprised to receive this letter, but I wish to call your attention to engine 239, just out of East Dayton Shop and her performance on train 67, March 18, 1922. Left Chillicothe 34 minutes late, account of connection; delayed 4 minutes at Washington C. H., account of express, making a total of 38 minutes delay. Arrived at Dayton Union Station 5 minutes late, making up 33 minutes. A. J. Greenwood, fireman, has a small shovel which I would judge to hold about 13 pounds of coal. The engine consumed 220 shovels of coal, Chillicothe to Dayton. I called the attention of Mr. Gilmore to coal on tank on our arrival at East Dayton. He said about a ton and a half would fill it up. The engine is a nice easy steamer and had full boiler pressure all the way. I think this the best fuel performance on Wellston sub-division to date. I will also say that East Dayton shop deserves credit for turning out a very smooth job, all around.

They don't "make em" any better anywhere.

Respectfully yours,

(Signed) T. G. HOBAN

P. S.—"Flowers while they are living—Knock em' when they are dead."

**Lima, Ohio**

Correspondent, RAY GARRIGUS

Edwin Raeder, pipe fitter apprentice, is back at work after several weeks' absence because of a broken foot. Glad to see you back, "Mike."

Investing in safety is like investing in United States Government Bonds. Both pay an excellent rate of interest, one in gold, the other in health.

Several members of the local shop force are trying out for positions on league baseball teams. All success to you, fellows!

Play safe. A short cut may mean a long ride to the hospital.

We understand that several young ladies of the freight house office force are having their hair bobbed. Nothing like being in style, Edna and Ruth.

Do you throw matches, cigarette or cigar stubs away without making sure that they will not cause a blaze? Think it over.

Peat (left) and RE-peat (right)—otherwise the cook twins—Otto and Oscar, car repairmen, Lima

Why is a Veteran? Because he observed the safety rules!

Resulting from a challenge printed in a recent issue of the MAGAZINE, the Toledo Shops bowling team journeyed to Lima on March 26, disputing Lima's claim to the Division bowling championship. The games were close, Toledo being handicapped by the absence of one of their men. The first

Where SAFETY comes FIRST, sorrow comes last.

Our old friend, "Cappy" Wessels, base ball umpire, is back on the job again. "Cappy" turned down a promising league offer to stay with the local shops and he is organizing a base ball team that is going to clean up everything on the Division. (Now don't think I am given to boasting, I'm just quoting "Cappy.") But he has authorized us to challenge any team on the Division. Let's hear from you, Toledo, Dayton and Cincinnati.

"Safe, satisfactory service—" let's make that the motto of the BEST & ONLY.

The many friends of James Ewing, car inspector at Sidney and Troy, will be glad to know that "Jim" is improving rapidly from a severe illness and will be back to work before many days.

Eventually. Why not now? SAFETY FIRST!

Wonder why "Fat" Burkholder goes out on West Market street? "Fat" says he was going to church but excuses are getting so common that we only believe half what we see and nothing that we hear any more.

"Say it with flowers." We'll be doing just that if YOU step on the track once too often without first looking in both directions.

Swift as an arrow, without warning, without a sound—thus did death overtake Car Inspector Henry Fell at North Lima on March 18. Mr. Fell was inspecting a train when he was seen to fall to the ground. Fellow inspectors rushed to his side but life had gone in an instant. High blood pressure was given as the cause. Mr. Fell was in the service of the Baltimore and Ohio

IN THE LIM-A-LIGHT  
Left, left to right, upper: C. Buckholder and R. Binkley; lower: W. Martin and L. Vermillion. Right panel, left to right: Baggage Agent C. E. Nungester and Baggage Helper T. G. Thornburn

# Hamilton Watch

"The Railroad Timekeeper of America"

## Can you afford to have an inaccurate Watch?

Is it any economy to buy an undependable watch?

Or are you willing to accept the verdict of the thousands of American Railroad men and buy the watch that will render you year in and year out enduring, dependable, accurate time?

The Hamilton Watch for thirty years has been built to meet the Railroad man's requirements. Built to stand the hard usage to which railroad service puts it. Built with only one idea in mind—to serve the Railroad man for years by giving him true time all the time.

For time inspection service the most popular watch on American Railroads is the Hamilton No. 992—16-size, 21 jewels.

Send for "The Timekeeper," an interesting booklet about the manufacture and care of fine watches. The different Hamiltons are illustrated and prices given.

Prices range from \$40 to \$200; movements alone \$22 (in Canada \$25) and up.

HAMILTON WATCH COMPANY  
Lancaster, Penna., U. S. A.

The "Lackawanna Limited," crack train to New York City on the Delaware, Lackawanna & Western, is piloted by a veteran engineer and run on Hamilton time. Engineer Charles Stevenson has been at the throttle for nearly three decades, and for 19 years has relied upon his Hamilton Watch for the right time.

*Designed and printed by The Sales Printing Corp., N. Y. C.*

*The following is a copy of a letter from President Harding indorsing the CAREFUL CROSSING CAMPAIGN to be conducted under the auspices of the American Railway Association, beginning June 1, and continuing until September 30, 1922:*

My attention has been called to the fact that under the auspices of the American Railway Association, an intensive campaign is to be waged for eliminating accidents at railroad highway crossings.

The complete success of such an effort would mean the saving of thousands of lives, the prevention of many more thousands of injuries and incidentally the prevention of a great property loss. Of course, the ideal solution is elimination of grade crossings, to which all possible energy and means should be unceasingly directed. But the extent of our country and its railroad mileage make apparent that not for many years of utmost effort could this be effected. There should be constant pressure for elimination of these danger spots, particularly in the more populous areas; pending which there is need for just the kind of preventive effort that your Association is planning. Among these measures, the most effective would seem to be to arouse in the minds of drivers a sense of their personal responsibilities. When thoughtlessness is allowed to usurp the place of vigilance, as too often happens, the scene is set for tragedy. Reminders, and still more reminders, of the need for caution at railway crossings are needed.

Surely, the effort you are undertaking is appealing, and it ought to have the most generous and general support.

Very sincerely,

(Signed) WARREN G. HARDING

# What C.D. Gibson thought of Genius thirty years ago

The Girl he made famous -

By C. H. Dickson, Art Editor

A badly scared reporter was "Dick" when that prince of managing editors, John S. Irby of the old Richmond Times, picked him to have a talk with Charles Dana Gibson, the peer of illustrators, back in the days when the romance of the artist and the beautiful Miss Langhorne of Richmond, still stirred the nation's heart.

Ordinarily, "Dick" made strangers think they were looking at him through the wrong end of a telescope. But this was a choice assignment and he mustered a brave heart, looked as pleased as he could with the duty, brushed up his shoes on the backs of his pants-legs and started for the wonderful Langhorne home.

The fact was that Irby and Gibson were old friends and that Irby had probably apprised the artist by phone that "Mr. Charles H. Dickson, cub reporter of the 'Times' staff," was on his way to interview him. At all events, "Dick's" ring was answered by the pen and ink wizard himself.

He looked a "whale of a man" and his welcome was the beaming sort as he invited the flustered "Dick" into the drawing room. The reporter had missed the hat-rack in the hall and was trying to absorb the offending "lid" into his small person when the great artist eased it from him and then swept him by the arm into a window seat and grinned down at him.

"I know just what's the matter, old sport," commented the big fellow during a lull in the gulps and gurgles that the reporter was vainly trying to make into speech. "I've been that way lots of times. There's nothing to be worried about. Have a smoke."

And then began the most amazing interview that ever came "Dick's" way.

It was on "Genius," and the gentle inspiration of the artist's words still holds the stumbling little "Dick" to the rocky road that leads upward.

Gibson was a master of his craft in those raw days and still holds his head the highest of the black and white workers. A big magazine had just signed up to pay him thousands for exclusive right to print his pictures. And he sat jollyng a pale little reporter into an ecstatic mood, as he told his own humble beginning.

"The hardest fight in any boy's life," said the big man, "is when he grabs the thought of 'genius' by the throat and strangles it. If there is anything in this world that makes difficulty for those who have it, it is this same Genius. Only when it is knocked out does real work begin.

"My folks were much like all others and from the time I could hold a pencil I learned to consider myself as one set apart. All that had to be torn down and in the place of 'Genius' I had to write 'Work.'

"Oh, how I did work," he went on. "My young friends and playmates would have marveled had they seen me with a smoky oil lamp, drilling and drilling until nearly dawn—too many times to remember. And it is my best judgment that if hard work won't accomplish the big things in any man's life, 'Genius' hasn't a single chance."

The great hearted man paused.

Here he was offering the golden key to fulfillment to every heart that could hold a purpose—just the willingness to work.

And "Dick" has not forgot.

# A Message from Vice-President Galloway to Our Engineers

*The last issue of our Magazine contained an article on the fine run given President Harding and party on the trip they made during April from Washington to Cincinnati and return. A telegram of congratulations from Vice-President Galloway to the officers and employes of the railroad, was printed, in which he especially mentioned his "personal and official gratification for the excellent manner in which the crews handled the train, particularly for the regularity in running time, the smooth handling by engineers, and for the clean, almost smokeless firing."*

*These were picked crews that made this fine record, but it is hoped that before long all our passenger engineers and firemen will be in this class, because it is one of the best ways in which we can increase the prestige of the Baltimore and Ohio.*

*The following bulletin indicates the importance which the Management attaches to the smooth handling of trains:*

BALTIMORE, MD., May 10, 1922.

## *To Engineers Handling Passenger Trains and Others Connected with that Service:*

To maintain a high standard and to make its service more attractive to its patrons, the Baltimore and Ohio Railroad has spent large sums of money in recent years in the betterment of its track and for the purchase of passenger equipment and more powerful locomotives.

The full benefit will not be derived from these expenditures unless the individual locomotive engineer so handles his train as to make the passenger's trip agreeable and comfortable.

The successful engineer requires more than the ability to start and stop trains and maintain speed. We believe Baltimore and Ohio engineers are the equal of any and are interested in promoting the success and reputation of our Road and anxious for the very best results.

A passenger engineer is usually of long experience and mature judgment, and well qualified for the work assigned. His first duty is to see that his engine is in proper condition and fully prepared and equipped for the work. He should be ready to start on the exact schedule. Frequently the engineer is not looking for starting signal and time is thereby lost. He should be ready before signal is given.

Much depends upon the way a train is started and stopped. If provided with a locomotive of sufficient power, a train can ordinarily be started and stopped so easily that the passengers will feel no perceptible shock, and their knowledge that the train is under way or standing still will be gained by sight, rather than feeling. This is the perfect standard that every engineer should strive to attain, as it affords many opportunities to impress our patrons favorably.

The engineer who makes required time at minimum speed excels as a runner. To do this he must get his train quickly in motion after a stop, maintain required speed and reduce delays at stations to a minimum. The engineer should know the characteristics of the road over which he runs, and regulate speed to suit conditions. He should know how fast to run at uniform speed to make time required. The practice of running slow up hill and fast down grade is wrong, and causes criticism from passengers.

While it is desirable that uniform speed be maintained, there are times when and places where speed may properly be reduced, as during and after storms, in foggy weather, around sharp curves and at obscure places. In all cases the engineer should give first and constant consideration to safety and comfort of passengers, and to punctuality next.

While not so important as the matters previously mentioned, two things can be done by engineers which will add both to the comfort of passengers and public and result in economy, namely, reduction of black smoke and blowing off of steam at pop valves. With reasonable effort it should be possible to prevent three-fourths of the black smoke ordinarily made by engines using bituminous coal. An engine should not be permitted to blow off steam at pop valves, particularly at stations. It is wasteful and annoying, and frequently frightens animals, causing accidents. It is possible entirely to prevent this waste of fuel and steam by proper handling and the cooperation of engineer and fireman.

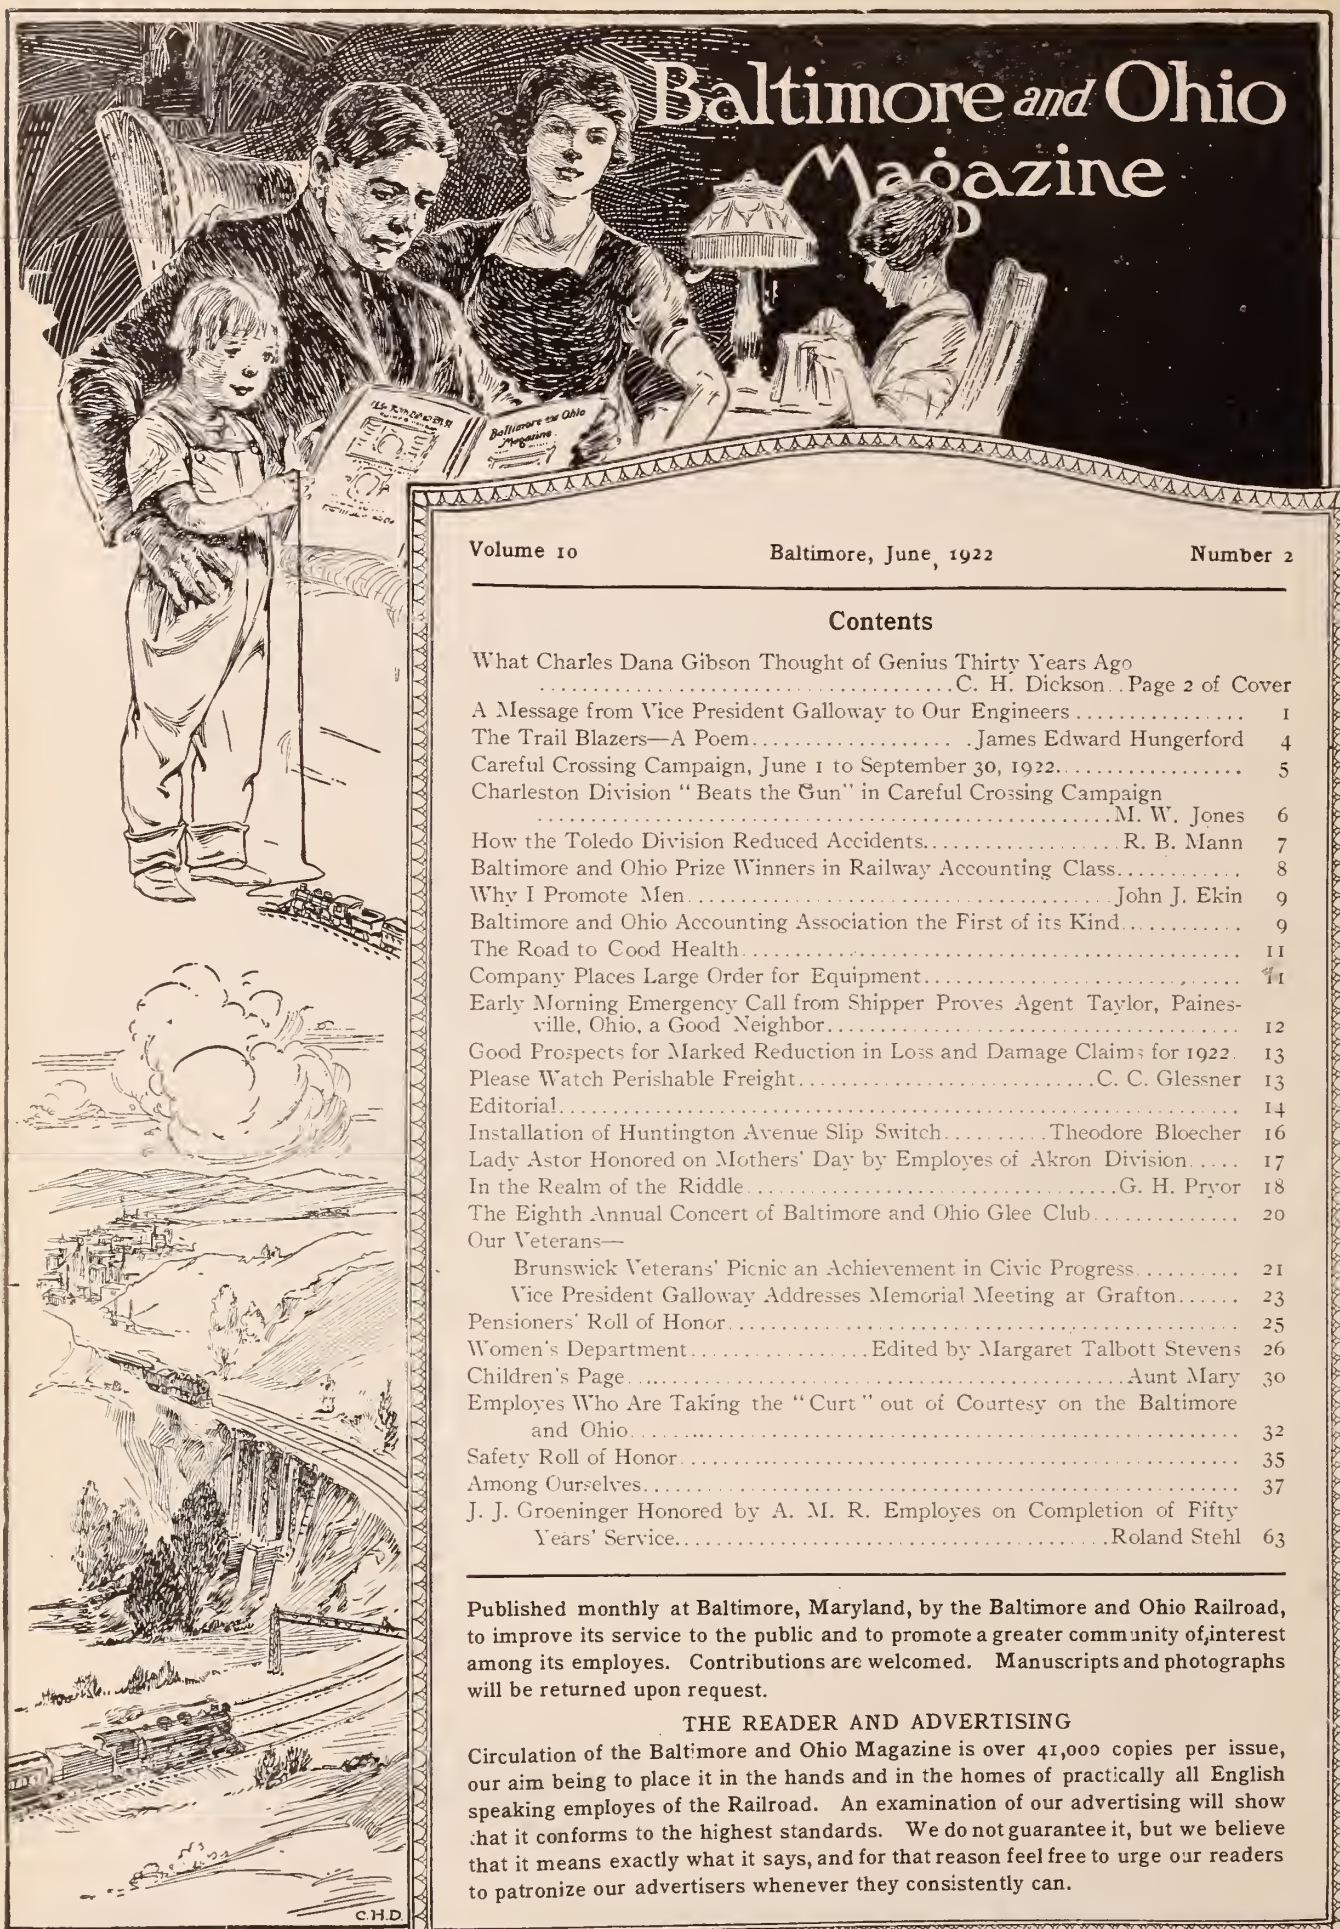

The impossible is not expected from men in charge of locomotives, and full consideration is given to the conditions under which they work, but unless the highest attainable standard is maintained, the things which the public and patrons of the railroads have a right to expect, will not be accomplished.

It is desired that all having to do with the passenger service, carefully consider the points brought out in this circular and exert every effort towards improvement.

  
Vice-President.

## Why Pat Was Happy

The Professor of sociology met Pat on the street one morning. The genial Irishman was whistling and singing by turns, apparently as happy as a lark. "Well, well, Pat, you seem to be happy. Would you mind telling me the reason for your happiness?" inquired the professor.

"Oi would not, sor," answered Pat. "Oi have just done three goods deeds, an' onny man who has performed three good deeds in less thin tin minutes has reason to be happy."

"Indeed he has!" commented the professor. "But, pray tell me, what three good deeds have you performed in such a short space of time?"

"Well, sor, as Oi was comin' past the cathedral this mornin' Oi saw a poor woman wid a wee bit infant in her arms, a-cryin' that hard 'twould melt a heart of stone. Oi asked her phat the matter be. She said that for the want of three dollars to pay the fees she could not git the baby baptised, an' it was a sickly baby at that, an' liable to die soon. Oi felt that bad for her Oi pulled out a tin dollar bill, all the money Oi had in the world, an' told her to git the poor child baptised and bring me back the change. She went inside rejoicin' an' soon returned, all smiles, give me back the change and went away heapin' blessin's on me head. Now isn't that enough to make anybody happy?"

"That's splendid," said the professor. "Now what were the other good deeds?" "Others!" ejaculated Pat. "Why, that's all."

"But I understood you to say you had performed three good deeds."

"An' so Oi did! Don't you see? Oi dried a widow's tears; that's wan. Oi saved a soul from purgatory; that's two. An' lastly, Oi got sivin good dollars for a bad tin."—*Railroad Red Book.*

## How He Could Tell

A Georgia "cracker" tells this story on his own people: He says a Northern man who had settled in Georgia was visited by a friend who asked him how he liked the place and the people.

"Oh, all right," replied the man. "Now tell me," asked the friend, "what is a 'Georgia cracker?' How can you tell him from another person?"

"Well," replied the Northern settler, "you see out in that field a black object?"

"Yes," said the friend.

"Now," said the man, "that may be either a 'Georgia cracker' or a stump. Watch it for half an hour, and if it moves, why it's a stump."—*Wroe's Writings.*

## What Man Is

He had to quote Kipling to hold his own with this bright young lady. So he lightly did so. "As Kipling says, my dear, Woman is a rag, a bone and hank of hair!"

"A man," she sweetly smiled, "is a jag, a drone and a tank of air." Which served very nicely to change the subject.

—Partners.

## Good Intentions

Workers in business organizations who kick, growl and make trouble for the management during these reconstruction days when managers of business everywhere have problems confronting them that require every bit of energy they possess, remind me of the green brakeman who was making his first trip up the Sierras.

The train was going up a very steep grade, and with unusual difficulty the engineer succeeded in reaching the top. At the station, looking out of his cab, the engineer saw the new brakeman and said with a sigh of relief: "I tell you what, my lad, we had a job to get up there, didn't we?"

"We certainly did," said the brakeman, "and if I hadn't put on the brakes, we'd have slipped back."

—*The Treasure Chest.*

"How is your daughter progressing at the conservatory, Mrs. Knowtall?"

"Fine. We have great hopes of her developing into a belladonna."

—*New York Sun.*

In France some American Negroes were sitting beside the road, away behind the battle lines, watching troops moving forward to the front. These Negroes were commenting on the names of the regiments which marched by. (Many of the regiments raised in England were named for the counties in which they were recruited as "Kentish Rifles," "Northumberland Lancers," "Third Yorkshire Infantry," and so forth.)

As these British troops marched by, one of the Negroes took delight in calling out the name or the number of the regiment. Suddenly down the road came a regiment of Highlanders in kilts. The Negroes had never before seen a "kiltie regiment" and one of them cried: "My, My! Look dere. Sam, what am dat? Dey is too big for women and they can't be men 'cause dey is wearing skirts: what you-all s'pose dey is?"

"Why," said Sam, "dat is dat Middlesex regiment, dat is what dey is."

Pittsburgh Freight Station

Let's start again to "Think and Act,"

To do things right, for it is a fact  
The railroads surely have their trials,  
Let's meet them all with pleasant smiles.

By putting our shoulders to the wheel,

By doing our bit in a way that's real,

We will correct each fault we find,

Be always ready to bear in mind  
That "Passing the buck" is but shifting the blame,

In the end it will ring us naught but shame.

Whenever a chance comes to your view,

To correct a fault, it's up to you

To set things right in a proper way.

Then your "super" will be proud to say,

"I have a force just full of pep,  
All of them help me watch my step."

### THE TRAIL BLAZERS

By James Edward Hungerford

Illustrated by Herbert D. Still

Well, ol' timer, transit's changed some,  
In this here ol' U. S. land!  
Ain't this railroad jest a wonder—  
Don't these coaches beat th' band!  
Ain't these cushion seats jest Heaven?  
Gee! that engine sure kin go!  
Gosh, ol' pardner, we're sure speedin'—  
On this here ol' B & O!

Yep, we climbed these same ol' mountains—  
Rolled acrost these same ol' vales,  
When our motive-power was oxen—  
An' we follered Injun trails!  
Kinda diff'rent this here "injun"—  
Belchin' smoke, an' spittin' steam—  
Makes us kinda feel, ol' pardner,  
Like we're livin' in a dream!

Kin you realize we're ridin'  
Through a land o' talkin' wires?  
An' this whizzin' monster's glidin',  
Where we built our campin' fires?  
Whew! there goes a town, ol' timer—  
Did you hear th' whistle shriek?  
Well, you must be hard o' hearin'—  
An' yore eyes is gittin' weak!

Now, we're crossin' that ol' river,  
Where we forded with our teams—  
Gosh! they've gone an' built steel bridges  
Over all our mountain streams!  
Well, I guess our "bunks" is ready—  
Let's turn in an' rest up some—  
Let's thank God we blazed th' trail, pard—  
Fer these railroad trains t' come!

VOLUME 10

BALTIMORE, JUNE, 1922

NUMBER 2

## Careful Crossing Campaign, June 1 to September 30, 1922

**W**ARMLY indorsed by President Harding, a campaign for the elimination of accidents at grade crossings began on June 1 on all the railroads of the United States and Canada and will continue for four months.

The campaign, which will be known as the CAREFUL CROSSING CAMPAIGN, is under the auspices of the American Railway Association, and the plans were arranged and will be carried through to a finish by the Safety Section of the association. When the campaign and its object were called to the attention of President Harding, he issued the strong endorsement which appears on the cover of this issue.

Cooperation in the plan has been assured by the United States Automobile Chamber of Commerce, the National Highway Traffic Association, National Safety Council and numerous other organizations.

### Alarming Increase in Crossing Accidents

Such a campaign is necessary and timely, as shown by the following facts: In thirty years our country's population increased 68 per cent. Crossing accidents increased 345 per cent. in fatal and 652 per cent. in injury cases. In 1920 automobiles were involved in 76 per cent. of all crossing accidents. During that year 1,791 persons were killed (death resulting in 24 hours) and 5,077 injured; of the latter number, 116 died subsequently from injuries sustained at railroad crossings within

the United States. In the year 1921, according to records kept by the Interstate Commerce Commission, there were 1,702 fatal accidents of this sort and 4,818 persons were injured.

### Elimination of Grade Crossings Impossible

There are two ways to reduce or entirely stop such accidents. The first in the public mind is elimination of the crossings. This is impossible. There are 251,939 highway crossings on Class I Railroads alone (revenue of over \$1,000,000 annually) in the United States. Of this number, 399 were eliminated during 1919. At the same rate of elimination it will take 629 years to dispose of these crossings if no more are added. All the men and money available would not be sufficient to remove these crossings in a life-time.

Conservative estimates of the average cost of elimination fixed the figure at approximately \$50,000 per crossing. This means \$12,500,000,000.

It is evident that the immediate question must be met by a method

other than the elimination of the crossings, which latter work will undoubtedly proceed as circumstances permit.

Apparently the solution of the problem can be found in education. This education should be joint upon the part of the railroads and the public. It is the duty of the railroads to keep the crossings in good condition for travel; give reasonable notice of the existence of such crossings; and see to it that the railroad employes do their full duty in warning of the approach of trains.

### Reductions in Fatalities to Employes Encouraging

The railroads have learned the value of organized effort for SAFETY, through the reduction of deaths of employes on duty from 4,354 in 1907 to 2,578 in 1920, notwithstanding a larger force of employes in service during the latter year. Railroad employes as a whole have unquestionably attained a higher degree of care in the performance of their duties.

As education in and discussion of safety matters are responsible for the gratifying results obtained in employe cases, it is logical to assume that education of the traveling public to the exercise of a high degree of care when approaching and passing over railroad crossings, will likewise have a good effect in reducing crossing accidents.

While it is true the railroads have a direct interest in checking these oft-times most distressing accidents, yet in the first and last

### How Can I Help?

Practically all railroad employes are sufficiently familiar with the operation of trains to know what a big problem faces their companies in the increase in grade crossing accidents—how impossible it is to avoid them while maintaining fast schedules in the public interest. They also know that the railroads have done everything in their power to protect the crossings, by the installation of gates, warning devices and signs, and the employment of thousands of crossing watchmen; further, that the reduction in the number of grade crossings is proceeding as rapidly as conditions permit.

The automobile owning railroad employe can be a most helpful agent in making this campaign a success. He knows that the automobile driver should be the one to make sure that the crossing is safe before he goes over, and not the engineer of the train. He knows that the car driver can stop in a fraction of the time and distance that it takes the engine and train to be brought to a stop. He knows that the only safe way for him as a car owner to act is to stop, look, listen, and then, in order to make doubly sure—to send someone ahead to see that the track is clear.

Furthermore, in addition to practicing this safety precaution himself, he can tell all his friends that it is the only safe way for them. Yes, there will be scoffers, as there always have been in an effort of this sort. But how much better to listen to the scoffing than to feel after a fatal and sorrowful accident, perhaps to a dear friend and his family, that a word to him—from you—might have prevented it!

## Charleston Division "Beats the Gun" in Careful Crossing Campaign

*Its Memorial Day Parade Float an Object Lesson in Crossing Accident Prevention*

By M. W. Jones, Secretary to Superintendent

UNDER the direction of Superintendent W. Trapnell, the Charleston Division, with headquarters at Weston, W. Va., got off to a good start in the Careful Crossing Campaign. A float, symbolic of the Campaign, and also of the Charleston Division slogans "THINK ABOUT

Careful Crossing Campaign, and immediately behind the cab was placed a standard Railroad Crossing sign. On the back of the truck was a sign "Warning—Stop—Look and Listen." The locomotive was perfect in its smallest details, there being classification signals on the front end, and markers on the rear.

There were many beautiful conceptions among the thirty floats in the parade, but many think the Charleston Division float outclassed them all. This was not alone from the perfection of its design, but because it had a very clear

appreciation to the following, who so kindly gave their time and money in the construction of the float:

Mr. M. B. Sprigg, who made the float possible by the loan of his truck; Messrs. R. Brooke, E. H. Nichols, H. T. Fanshaw, C. C. Doyle, who painted the signs; J. A. Fisher, R. D. Shoemaker, Jess Helmick, O. J. Kelly, P. T. Satterfield and the Misses Madge Hinzman and Bernice Borneman.

On the Sunday night following the opening of the Careful Crossing Campaign, Superintendent Trapnell addressed the congregation of the First M. E. Church in Weston, among whom were many of our employes at that point. He made effective use of the Safety work that has been accomplished by the Baltimore and Ohio, and asked for the support and cooperation of the church people in the effort being made to stop the slaughter at railroad crossings.

No trouble to see what this float stood for!

IT" and "SAFETY FIRST," was entered in the Memorial Day Parade at Weston on May 30. It was constructed around a lumber truck kindly loaned by the Sprigg Lumber Company.

The front end was made to look like the boiler and cab of a passenger locomotive. On the float itself were painted signs, urging the public to assist the railroads in boosting the

meaning, and was symbolic of what not only the Baltimore and Ohio, but every Railroad in our United States is trying to do, namely be of real service to humanity by abolishing grade crossing accidents, which are due entirely in so many cases to criminal carelessness on the part of drivers of automobiles.

The Baltimore and Ohio Charleston Division staff expresses its sincere

# How the Toledo Division Reduced Crossing Accidents

A Complete Plan, Vigorously Pushed, Gained Cooperation of All Classes, and Cut Down Accidents to Other than Employees, 75 Per cent. During Test Period

By R. B. Mann, Superintendent

**S**TATISTICS on Highway Grade Crossing Accidents for the year 1920, as prepared by the Interstate Commerce Commission and set forth in their Bulletin No. 78, show a total of 4287 such accidents during that year. Automobiles were involved in 3012 cases, which resulted in the death of 1273 persons and injury of 3977.

This bulletin further shows that while the State of Ohio ranks second in the number of registered automobiles, it ranks first in the number of grade crossing accidents and the number of persons killed and injured in such accidents.

With these facts before us it was apparent that some unusual method would have to be adopted to cut down such accidents in our territory. The Toledo Division is one of the busiest pieces of railroad in the state and for the most part serves a densely populated district. Hence a special campaign for the education of automobile drivers in the dangers of grade crossings, was determined upon. It was inaugurated on January 11, on which date I called a special staff meeting of all officers on the division, including, also, other supervisory forces such as Maintenance of Way supervisors, general foreman in the Motive Power Department, agents at the larger stations, members of the Safety Committee and the district safety agent. Plans were then made and a program formulated for carrying on the work in a systematic manner so that the maximum benefit might be derived.

#### Officers Responsible for Territories Assigned Them

A special territory was assigned to each officer, with instructions that he personally interview newspaper editors, school superintendents, principals and teachers, city managers, mayors, safety directors and other officers of cities and villages served by the Baltimore and Ohio. They were also requested to see secretaries of automobile clubs, boy scout masters and drivers of school auto buses or other public conveyances, in an effort to enlist their cooperation in the campaign.

#### Public Agencies Gladly Helped Campaign

The result was even greater than anticipated. Practically every newspaper in every city on the Toledo Division carried an article concerning the work we were doing, some of the larger papers also devoting considerable editorial space to the campaign. This was particularly true of the Dayton, Ohio, *Daily News*, its editorial being copied by the *Literary Digest*, which probably gave it wider circulation than any editorial on this subject has ever been given.

School superintendents, principals and teachers in every city and village gave our representatives their full cooperation, and willingly assisted in every way possible to help us get the message to the automobile drivers through their children. District Safety Agent W. L. Allison covered the entire division and talked to the pupils and students in practically every grade school, high school and parochial school, including the University of Dayton, at Dayton, Ohio. The work along this line extended over a period of two months, from January 24 until March 24, during which time Mr. Allison talked to approximately 40,000 school children. To each one also was given our literature, so that by this method alone it is estimated that we reached not less than 150,000 people.

In addition to this I personally appeared before various clubs and societies, Chambers of Commerce, etc., where short talks were given and the purpose of the campaign explained. Probably the message was delivered to another 50,000 through these sources.

On February 21 J. T. Broderick, superintendent of Safety Department, sent to this division, Arthur D. Gans, who brought with him stereoptican slides and an automatic transparency machine. A few days later he was followed by W. F. Braden, safety representative, and these two gentlemen greatly assisted in making a wonderful success of the campaign. With the addition of the pictures to the talks that were given before the schools, an additional interest was shown by the pupils, espe-

cially the younger ones, and without a doubt the pictures have made an impression upon their minds that will last throughout their lives and will tend at least to make safer drivers out of the next generation.

#### Window Display in Dry Goods Stores

Through the courtesy of the management of Bluems Drygoods Store at Lima, the automatic transparency machine was set up in one of their display windows. Here it was operated for several days and attracted the attention of hundreds of people. Later the machine was brought to Dayton, where it was set up in the display window of Oelman's Drygoods Store on one of the most prominent corners of the city, and its safety lessons were viewed by thousands of people.

#### Before Crossing, Drivers Asked to Stop, Look and Listen

During the campaign, practically every driver of a public conveyance of any kind, was personally appealed to, to "Stop, Look and Listen" before crossing over a railroad grade crossing. Suggestions were also made that when any unusual condition prevailed, some occupant of the machine precede the automobile over the track, except the driver, or that every occupant of the machine get out and walk over. In every case these suggestions were looked upon favorably and a number of drivers stated that they had been following this practice for a long time.

#### Will Public Respond to Railroad Appeals?

The Baltimore and Ohio is a pioneer in safety work and for several years the work of educating our employes along these lines has been carried on intensively, statistics showing that the number of casualties to employes has decreased approximately 30 per cent. in the past five or six years. Later the work was extended to the education of the public, and with the increased number of automobiles and the continued improvement of highways, this work is becoming more necessary. Regardless, however, of all of the educational propaganda and all of the

precaution the Railroad may take, in the final analysis it is the public that must save itself from the result of its own carelessness.

Officers of the Division make a certain number of observations at grade crossings each month and a compilation of their reports for the first three months of 1922, shows 1190 observations made of automobiles crossing railroad tracks, out of which 349, or 29.3 per cent., failed to take any precautions. It is this 29.3 per cent. of automobile drivers that we must reach in our educational work.

Figures available for the first two months of 1922 as compared with the same period of 1921 for the Toledo Division, show a 5 per cent. decrease in casualties to employes and a 75 per cent. decrease in casualties to persons other than employes. This period is included within the scope of the special drive mentioned in the first part of this article, and is illustrative of what may be accomplished when we succeed in fully awakening the public to the dangers of railroad crossings.

Although we have had a number of special campaigns in the education of employes and the public along the lines of safety, the work is being constantly carried on, not only by officers, but by a large number of employes who are interested in making the operation of the Railroad safer for themselves and for others. No time is lost in calling the attention of others to their unsafe practices.

Another intensive campaign began on June 1 and will continue until September 30. This is being conducted under the auspices of the American Railway Association, and is wide in its scope.

With the present tendency of the American people to speed up in every phase of social and industrial life, the railroads have seen the necessity of adopting unusual methods to awaken them to the dangers of grade crossings, and it is hoped that this campaign may succeed in reaching the other 29 per cent. of careless drivers and indelibly impress upon them the thought that "Stop, Look and Listen" may mean a minute lost but result in a life being saved.

### Careful Crossing Campaign, June 1 to September 30, 1922

(Continued from page 5)

analysis it is the public itself which suffers the pain, the mutilation, and the sorrow, in addition to bearing the financial burden.

The railroads feel warranted in expecting that right-thinking people throughout our land will lend their actual and moral support to this humane and laudable campaign.

The great majority of crossing accidents involve automobiles, the machines striking trains, or being struck by engines and cars. During the campaign efforts will be made to impress the drivers of automobiles especially with the necessity of caution when going over railroad tracks. The slogan will be "CROSS CROSSINGS CAUTIOUSLY."

Railroads all over the country and in Canada have posted all over their properties and in all cities where there is a railroad, the striking poster shown on the cover of this issue, but very much larger. More than a million and a quarter of the posters have been distributed and will be seen by automobilists every-

where. A small replica of the poster will be in the form of "stickers," which will be placed on mail.

The Safety Section, American Railway Association, which is in charge of the campaign, was organized about a year ago to promote safety, not only among employes of the transportation lines of the nation, but also among the public, and the CAREFUL CROSSING CAMPAIGN is its first effort. It is believed that by educational methods the automobile driver, the drivers of other vehicles and the pedestrian can be warned of the danger of carelessness at highway grade crossings and thus protect themselves. Railroad officers point to the fact that, as President Harding says, it would take many years to eliminate all highway grade crossings, the cost is prohibitive, and that something must be done in the meantime.

On the other hand, no crossing is essentially dangerous if the usual precautions are observed.

### Privilege to Call Home "Our Own"

Hildegarden Ave.  
Chillicothe, Ohio

April 15, 1922

Mr. W. J. Dudley  
Superintendent, Relief Department  
Baltimore, Md.

Dear Sir:

I wish to thank you for the loan of the money to buy my home. I can now say that I own my home. If it had not been for the help of the Relief Department we might not have had the privilege of calling it our own.

Yours truly,  
(Signed) Harvey Hertenstein,  
Sectionman

### Baltimore and Ohio Prize Winners, Class in Railway Accounting, Johns Hopkins University, 1921-22

Left to Right: J. E. Lee, Office of Auditor Freight Claims; M. H. Stout, Office of Auditor Merchandise Receipts; J. C. White, Office of Assistant Comptroller Deverell; J. V. Smythe, Valuation Department; R. D. Forgan, Relief Department; J. I. McManus, Office of Assistant Comptroller, Deverell. This year's class was the most successful of any to date. Twenty-nine lectures were given, the last on May 8, and Assistant Comptroller Deverell, in charge, reports that the students were exceptionally diligent and interested in their work, seven of them having a perfect attendance record. The total enrollment was thirty-five, twenty-four of whom were Baltimore and Ohio employes.

Some of you may feel that your chance of promotion is menaced by the youth or robust health of your ranking officers. Do not, on that account, surrender to discouragement. Having mastered the details of your own special duties, study their bearing on other branches of auditing. The valuable man in the world is the one who can do what the great army of men cannot do.

The man who makes himself useful in a broad sense is sure to be called, sooner or later, to take charge of more important work. Enthusiasm should not be confined to the head of an office. It should be catching. The employes should be infected.

You men have been selected as head clerks and chief clerks and others occupying official positions, and in accepting these positions you have assumed a trust, which, as a matter of honor, you should faithfully perform. It is your duty to do everything to better qualify you for your present position and for promotion. Equally it is my duty and the duty of each ranking officer to do everything in our power to assist you. Likewise it is your duty to enforce discipline and to see that everyone in your group or department renders honest and efficient service. *But, above all things, it is the duty of each one of you to deal fairly and justly with each employe in your group, to promote harmony, and to do everything possible to encourage individual advancement and create that friendly rivalry as to who best can serve.*

As I have expressed myself before, it is my duty to train assistant comptrollers and auditors to be comptrollers. It is the duty of the assistant comptrollers and auditors to train chief clerks to be auditors. It is the duty of chief clerks to train head clerks to be chief clerks. And finally, it is the duty of head clerks to train men in their group to be head clerks.

This brings to my mind an old, old story of an Arab who desired to test which of his three sons loved him best. He sent them out to see which would bring him the most valuable present. The three sons met in a distant city and compared the gifts they had found. The first had found a rug on which he could transport himself and others whithersoever he would. The second found a medicine which would cure any disease. The third found a glass in which he could see what was going on at any place in the world. The third used his glass and saw his father ill in bed. The first carried all three home on the rug, and the second administered his medicine and saved his father's life. Now the perplexity of the father, when he had to decide

which son's gift had been of most value to him, illustrates very fairly the difficulty in determining what particular group is the most essential to success in conducting the work of the Accounting Department.

Just as the old Arab's life could not have been saved without the cooperation of his three sons, just so, in my opinion, the success of the Accounting Department depends upon the cooperation of the three groups,—the ranking officers, the subordinate officers and the rank and file. You occupy the center group, are the connecting link, and are in a position to exert a powerful influence in promoting the welfare, not only of the Baltimore and Ohio, but of yourselves and of each and every employe of the department.

Knowing you as I do I feel sure you will prove worthy of the trust that has been reposed in you.

### Promotions and Changes in the Freight Traffic Department

**T**HE following changes were made in the Traffic Department of the Baltimore and Ohio during May.

C. H. Pumphrey, division freight agent at Youngstown, O., was made division freight agent at New York, succeeding M. J. Bevans, who has taken up the practice of law.

P. S. Phenix, division freight agent at Cumberland, Md., was trans-

ferred to New York in similar capacity. His appointment places two division freight agents at New York, where formerly there was but one.

C. F. Farmer, division freight agent at Akron, took Mr. Pumphrey's place as division freight agent at Youngstown, O.

R. J. Beggs, chief rate clerk in the General Freight Traffic Department at Baltimore, was promoted to division freight agent at Cumberland.

### Perishable Freight Protected by Modern Lighters in New York Harbor

**I**N keeping with its policy of giving the public a service unexcelled by any competitor, The Baltimore and Ohio has added to its New York Harbor marine equipment several refrigerator lighters, for the purpose of affording the same sort of protection while moving around the harbor as if the freight were in refrigerator cars.

The barges are used primarily in lightering import or export perishable freight between steamships or piers, and St. George, S. I., New York.

While the Company does not guarantee absolute protection, it makes every endeavor, through the purchase of modern equipment, to avoid, as far as practicable, loss of or damage to this particular class of traffic. This extra service is rendered gratuitously.

## From the Manager of an Important Chamber of Commerce

*On the Louisville-Detroit Through Service and the Skill of Our Engineers*

Note:

*The name of the writer of this letter is omitted for obvious reasons.*

April 20th, 1922.

Mr. Daniel Willard, President,  
The Baltimore & Ohio Railroad Company,  
Baltimore, Maryland.

My dear Mr. Willard:

Permit me to congratulate you people upon arranging to operate your Toledo Division passenger trains on into Louisville. This marks one of the most distinct improvements in passenger transportation made in the Middle West for some time.

I also wish to make mention of the excellence of your passenger service in general. I have come to favor it whenever possible.

For instance, I used your Cleveland-No. 8 sleeping car from Cleveland to Washington on Sunday night and had a most comfortable ride. The ease and gentleness with which your engineer drivers handle their sleeping car trains is a pleasant contrast to some experiences I have had on other lines.

With best wishes for the Baltimore and Ohio System, I am,  
Yours sincerely, etc.,

## Vegetables for Breakfast

*One of a series by Life Extension Institute containing the latest and the most scientific information on healthful living and the prevention of disease*

AS the garden vegetable season approaches it is well to consider the value of this type of food. It is remarkable to what extent our food habits are governed by tradition, by market conditions, transportation facilities, and matters wholly apart from the actual health value of the foods that we eat. This is well exemplified by the breakfast habits of the average individual: fruit, cereals, eggs, coffee, toast, ham, bacon, fried potatoes, and occasionally some relic of the mid-Victorian age will be found eating a beef-steak. This gives the range of the breakfast menu of average people.

There are many people who eat a light breakfast and therefore get very little bulk from it. There are other people who eat a hearty breakfast in one sense of the word but get little bulk, that is, they eat meat, chops, potatoes, and rely upon fruit and cereals for their bulk. By bulk we mean cellulose or fibrous material which stimulates the activity of the stomach and bowels. Not satisfied with pampering our voluntary muscles we follow digestive habits which are sedentary for our involuntary muscles. For the stomach is a muscular bag and the intestines a muscular tube, and these muscles are not subject to our conscious control. This lack of bulk, may, it is true, be made up later in the day by salads at luncheon and by salads and vegetables at dinner. But since food economy became necessary through the high cost of living, the average person cannot afford to order an unlimited number of dishes at any one meal.

We know that intestinal inactivity—not only well-marked constipation but latent unnoticed bowel sluggishness—is a very common condition. If, therefore, we can put an extra safe-

guard in our dietetic program to correct this condition alone, it would be worth while. But we also know that vegetables are valuable for their minerals and their vitamins. They may truly, therefore, be regarded as "safety-first" constituents of the diet, and there is no earthly reason why we should not eat them at breakfast as well as at luncheon and dinner. There is no physical or psychological

reason why salads should not be eaten at breakfast. It is just as sensible to eat creamed carrots for breakfast as to eat creamed potatoes. There is no vegetable in the list that cannot be prepared in an appetizing form for breakfast.

This has its economic aspect as well. People who crave a hearty breakfast can satisfy their appetites with bulky foods at a lower cost, and unless they are under weight and require to push their nutrition, with benefit to their health. Those who are under weight will find that the green vegetables, containing as they do appetite producing vitamins, will assist them to gain weight if they satisfy their appetites with fat-forming foods. It may seem contradictory to say that these foods are beneficial both for light-weights and over-weights, but the overweight who has his appetite stimulated will come to no harm if he satisfies it with bulky foods. The underweight can reverse the process and eat liberally of bread and butter, salad oil, cereals and cream.

Do not therefore ostracize garden vegetables from your breakfast table. Just experiment a little with vegetables for breakfast and see how it works.

## Company Places Large Orders for New Equipment

ANNOUNCEMENT was made at our general offices on June 5, that contracts for the building of 4,000 steel freight cars of the hopper and gondola types, and 1,000 box cars, have or will shortly be closed. The expenditure involved is in excess of \$6,000,000. These cars are partly in replacement of equipment retired and partly for additional equipment which, with the passenger equipment recently contracted for, will be covered by an equipment

trust. The contracts so far awarded are:

To the Pressed Steel Car Company, 1,000 steel hopper cars and 1,000 steel gondola cars, to be built at their plants in the Pittsburgh district.

To the Standard Steel Car Company, 1,000 steel hopper coke cars to be built at the Curtis Bay plant, Baltimore, Md.

To Cambria Steel Company, 1,000 70-ton steel 46-foot drop-end gondolas to be built at Johnstown, Pa.

The Wrong Way "Right"

## Early Morning Emergency Call from Shipper Proves Agent Taylor, Painesville, Ohio, a Good Neighbor

*Heavy Frost Warded Off Orchard by Fires Built with Fuel Oil Loaned by Railroad*

**B**ETWEEN one and two o'clock a. m., on April 22, Mr. Hiram Mantle of the firm of Mantle and Mantle, Painesville, Ohio, which operates a large farm and orchard, telephoned our agent at that point, G. W. Taylor. The unseasonable cold wave which hurt so much fruit throughout the country at that time, put Mr. Mantle in a bad emergency. He explained to Agent Taylor that his orchard was in full bloom, that the thermometer had dropped to 22 degrees, that he was endeavoring to ward off the frost by building fires around the trees and that his only salvation would be a supply of fuel oil which he was unable to obtain immediately in the vicinity.

Mr. Taylor quickly found that the Railroad had a sufficient supply of fuel oil at the roundhouse and he

requested the authorities there to let Mr. Mantle have about 150 gallons, he agreeing, of course, to pay for it at cost to the Railroad.

Our roundhouse people complied promptly, the oil was sufficient for the purpose and it is hoped and believed that Mr. Mantle's crop was saved.

In reporting his action to Superintendent Stevens, Mr. Taylor said:

"Ordinarily I seldom become involved in anything of this kind or in work handled by other departments. I don't like to take responsibility of this kind on my shoulders, but in this particular instance I knew just what Mr. Mantle's emergency was and I felt that it was my duty as representative of our Railroad to do him this neighborly act."

This is one of the most interesting

illustrations of the "good neighbor policy" of the Baltimore and Ohio that we have yet seen. If Mr. Taylor had been a man less in sympathy with the policy of the Railroad, less willing to assume responsibility, less able to size up a situation quickly and use excellent judgment in handling it, Mr. Mantle's crop would probably have been ruined, not only at large loss to him and his firm, but also with the probable result that the Baltimore and Ohio would have lost considerable revenue through lack of opportunity to handle his peach crop.

Whether the Baltimore and Ohio profits directly or indirectly, or not, however, is beside the question. Our policy has been clearly outlined by President Willard and it has no selfish strings attached to it. As a public service organization it is our duty to help the public whenever we reasonably can, and particularly in an emergency where, on account of our large organization and potential strength, the Baltimore and Ohio is the only agency which can supply the necessary assistance.

The names of men who have assumed obvious responsibilities and

Upper left: Agent G. W. Taylor, Painesville, Ohio. Right: Mr. Hiram Mantle and his two sons. Below: A part of their beautiful orchard

handled them for the welfare of the persons and causes affected, stand out in history. It is a creditable thing to do this, especially in an emergency which one has never faced before. Mr. Taylor has proved him-

self a good Baltimore and Ohio neighbor in the best sense of the word and other employes would do well to follow his good example and handle similar emergencies with the quickness, grasp and good judgment which he showed.

sociation is now being promoted, having for its object the study of locomotive history and development and the preservation of records pertaining thereto. In carrying out these aims there will be no restriction as to territory, and the cooperation of all those interested, wherever located, will be welcomed.

Information in regard to the activities of the Association will be made available to the members through the agency of a bulletin, in which articles of a suitable nature will also appear.

Further particulars and conditions of membership may be obtained on application to any member of the Organization Committee:

Arthur Curran, 16 Ballard Street, Newton Center, Mass.

Charles B. Chaney, 97 Lafayette Avenue, Brooklyn, N. Y.

Norman Thompson, Assoc. Mem. Am. Soc. M. E., 3406 Spence Street, Winnipeg, Manitoba, Canada.

## Good Prospects for Marked Reduction in Loss and Damage Claims for 1922

**T**HAT the railroads will probably save between forty and fifty million dollars in freight loss and damage claims this year, is indicated by recent figures compiled and announced by the freight claim division of the American Railway Association.

The total payments made by the railroads in 1920 for losses and damage to freight in transit were \$119,832,127, while in 1921 the total expenditures for loss and damage were approximately \$101,000,000, a decline of 16 per cent.

The number of claims presented to the railroads for payment in January, 1921, was 305,816. By January, 1922, the number of claims presented had dropped to 200,353, a decrease of 35 per cent.

In the same period the number of claims paid decreased 40 per cent. or from 314,178 in January, 1921, to 189,913 in January, 1922, and the number of claims on hand and unadjusted was reduced 54 per cent. or from 578,525 on January 1, 1921, to 264,653 on January 31, 1922.

In January, 1921, \$10,375,196 was paid to shippers who had incurred losses. By January of the following year the monthly payments had been reduced to \$5,070,566, a decline of 51 per cent.

Further, the handling of claims has been so expedited that the average time elapsing between the presentation of a claim and its settlement has been cut 60 to 90 days, to 30 days.

In 1917, just prior to Federal control, the actual loss and damage payments made by the railroads totalled \$35,079,757. Under government operation of the railroads these payments increased to \$104,587,174 for 1919. In 1920 the loss and damage payments reached a new high mark, totalling \$119,832,127, largely a result of operations during Federal control.

With the end of Federal control the railroads began an intensive campaign to reduce the number of their loss and damage claims and consequently the amount necessary to reimburse shippers for losses of and damages to freight while in the hands

of the carriers. This campaign is made in the interests of economy of operation and is directed by the freight claim division of the American Railway Association. The results of this campaign are shown in the 16 per cent. reduction in loss and damage expenditures in 1921 and in the decrease of 35 per cent. in the number of claims presented.

As 300,000 fewer claims were carried over into 1922 than were on the books of the carriers at the beginning of 1921, and taking into consideration the reduction of 35 per cent. in the number of claims presented, which are generally for lower amounts than claims filed in 1921, there is good prospect that the total loss and damage bill this year will not exceed \$60,000,000, and it may be cut to \$50,000,000.

### International Locomotive Association Organized

**W**HILE the era of the greatest increase in the size and weight of the steam locomotive may possibly be regarded as having reached its zenith, there has never been a time when the detailed design has received such a degree of intensive study with the view of obtaining increased efficiency with existing types, as now.

The International Locomotive As-

### Cheerfully Recommends Savings Feature

South Chicago, Ill.,  
April 5, 1922.

Mr. W. J. Dudley,  
Superintendent, Relief Department,  
Baltimore, Md.

Dear Sir:

I assure you I deeply appreciate the good offices of the Baltimore and Ohio Relief Department in helping me acquire a home here, also the courteous treatment of your office while I was paying loan. I can cheerfully recommend the Savings Feature to all employes interested in securing a home.

Very respectfully,  
(Signed) Lawrence McManus,  
Yard Conductor,  
South Chicago, Ill.

## Please Watch Perishable Freight!

Perishable vegetables and fruits are moving in large quantities over the Railroad at this season and will continue to move and constitute heavy shipments for weeks to come.

Claims resulting from damages to such commodities have been heavy in past years. They can be sharply reduced by an effort all along the line.

Particular attention should be given to refrigeration and prompt loading and unloading. A reduction in claims from perishables will be to the credit of all employes engaged in handling them, and will be greatly appreciated.

C. C. GLESSNER,  
General Freight Claim Agent.

### Opportunity

August first of this year marks the twentieth anniversary of the day that started as a messenger boy, "a runner," as we called it, for a downtown New York bank. Several days ago an advertisement appeared in the New York papers announcing the absorbing by this bank of another bank in the metropolis. The advertisement also contained the usual statement of the combined assets and liabilities and a list of the new officers, and it was in the latter that I was particularly interested.

The old Spartan who was president in my day is now the chairman of the board. (I best remember him for the enormous box of "three for five" stogies that he kept on his desk and made frequent use of.) In 1902 there was but one vice-president. Now there are seven, and the one first on the list (and I assume, the ranking one) was an assistant loan clerk in my time. Another of today's vice-presidents was chief clerk. The cashier and one assistant cashier of twenty years ago have grown into a cashier and ten assistants. Two of the assistant cashiers were just plain bank clerks when I was there and the other was the office boy for whom I used to substitute in the "front" office at lunch time.

So here in the official family of one of the largest banks in New York city, are five men who were punching a time clock with me, four times a day, just back in 1902. Not a single one of them had a "pull." They were ordinary American boys with high school or less education, of plain antecedents, but who have been faithful to their trusts, self-respecting, energetic and aspiring. There were others there in my day who were just as bright and had just as attractive personalities. But they made pleasure the main chance instead of business and I suppose that some of them are still answering the ring of the button from the front office, as they were in the days of yore, and perhaps wondering why.

### Special Ability

Special ability commands special pay.

When a person has both the theoretical knowledge and the practical experience that enable him to do certain things better than others, he can justly demand a good figure for his services.

He may be able to do the actual job in almost no time—but he had to spend years in work and study before he became an "expert."

A bank safe in a middle western town got locked and stuck.

Everybody who knew the combination tried to open it, and failed. In desperation they sent for an expert. He came, and in ten minutes opened the vault.

The expert sent in a bill for \$100. The bank president read it.

"That is very high," he said; "just have it itemized."

When it came back to the bank president, the bill read:

"For opening safe—\$5.00; for knowing how—\$95.00."

—*Brenneman's Fine Biscuit Magazine.*

### The World "Do" Move

In searching for railroad material in some old files in the library recently, we ran across a little booklet,

#### The Art

#### of Tying the Cravat

#### Demonstrated in

#### Sixteen Lessons with Thirty-two Plates

"Could it be true," was the conjecture, "that at any time in history mere man could have had enough time to spare to devote to the reading of such a treatise on personal adornment." Yet a hasty survey of its beautifully printed pages showed that it was only too true, that a species of the genus homo of the early nineteenth century was as elegant and particular about his dress as the proverbial peacock, that he was as fussy about his necktie as a mother hen is of her chicks.

The introduction to the treatise is a veritable commentary on the manners, in a sense, yea, even on the morals of the time. It is worth reading:

#### Introduction

It can be incontrovertibly asserted that this work, far from being an ephemeral production, will be found to contain a mass of useful information, and may be termed an "Encyclopedia of knowledge."

The Cravat should not be considered as a mere ornament, it is decidedly one of the greatest preservatives of health—it is a criterion by which the rank of the wearer may be at once distinguished, and is of itself "a letter of introduction."

In an age like the present, when a man of quality is so closely imitated by the pretender—when the amalgamation of all ranks seems to be the inevitable consequence of the "March of the Intellect" now making such rapid strides amongst us, we think a more signal service cannot be rendered to the higher ranks of society, than by the production of such a work as this; and, in the hope of being really useful, we offer to a discerning public, the "Art of Tying on the Cravat."

The work is divided into easy lessons—the first gives a solution of the celebrated problem known as the *Noeud*

ALFRED, COMTE d'ORSAY  
1798-1852

*From a portrait by Maclise*

"The Alcibiades of that age; as he delighted the parks in 'the thirties,' and, who with his whiskers, and his cabriolet horse, fairly took the town by storm."

Gordien, and is the key to all the others. The fifteenth lesson alone contains eighteen different methods of tying the Cravat: but lest any of our readers may be terrified at the idea of having so much to acquire at once, it may be necessary to observe that, as they are derivations from the fourteen first described, they are necessarily short and easy of attainment.

To render the work complete in every respect, plates, drawn from nature, are inserted; these will clearly explain any difficulty a beginner may experience in comprehending our directions, and will enable him to judge whether he has produced the proper effect on his own Cravat.

It is apparent that in those days the proverb, "fine feathers do not make fine birds," did not have much standing. But custom in man's dress, along with many other customs, has changed very much for the better in the last hundred years. The only trouble is that to some of us who foot the bills for women's clothes now-a-days, it may merely appear that the pendulum has swung from the overdressed male to the overdressed female, and that nothing has been accomplished thereby.

Yet man will not feel himself the loser, for he certainly plays fast and loose with style now a days, and enjoys his freedom from it, more so, perhaps, than at any time since personal adornment was limited to the fig leaf. Low shoes or high shoes, or storm boots, if you will; soft hat or derby, with a commendable preference on the part of most men for the former; rain coat or umbrella; stiff collar or soft; paddock, raglan or ulster in the overcoat;—it matters not what style he prefers and wears.

The reign of Beau Brummels and Berry Walls is happily a thing of the past. Today man is judged tonsorially, not on the strength of how much time and effort he puts on his personal appearance, but on how little it concerns him, so long as it marks him as a man of good taste and exemplifies the inward characteristics of cleanliness, neatness and orderliness.

### Where Neatness Counts

Passenger train men who keep their shoes shined, shave regularly, brush their teeth, and keep their clothes mended, attract the attention not only of the passengers, and leave a good impression that is valuable to the company, but are observed by officials who, it is almost useless to inform trainmen, are well worth impressing, favorably. Good looks—so far as cleanliness is concerned—is one of the essentials in making up a service record, though it may not be one of the items noted in it. A train employe who is polite and accommodating, looks pleasant, and who is tidy, enjoys a reputation among the traveling public and officials that is of great value to him. The slovenly man, whose beard and shoes are neglected, and who is as solemn in his looks and as short in his replies as he can be, and holds his job because he is competent in every other respect—safe, reliable and always on the job—lacks something he ought to have to make him perfect, or close to perfection.

—*Erie Railroad Magazine.*

### Wonder Savers

Tom Marrucci, Italian, with just enough cash to pass the immigration inspectors, landed at Ellis Island eight years ago. After a brief stay in New York, Tom showed up in Uniontown, Pa., penniless. He soon obtained employment as a street sweeper. His wages never have been more than \$2.50 a day.

Now he buys a home, paying \$10,000 for it. "This means 12 properties, I own," said Tom, between sweeps of his brush.

This is only another wonder worker by the little giant, Thrift. To get *Dollars and Cents*, you need *Dollars and Sense*.

### Before They Knew How to Multiply

It seems that some of the ancients—we are unable to state whether it was the Egyptians or some other ancient people—were unable to multiply numbers in the same way that we multiply numbers today. They were, however, able to get a correct answer when they wanted to find the result of taking a certain number a certain number of times. They were able to add, as we do, and, although they could not multiply in present day fashion—they could divide.

Let us take the two numbers 76 and 334, arranged as follows:

Line No.	Column No. 1	Column No. 2	Column No. 3
1	76	334	
2	38	668	
3	19	1336	1336
4	9	2672	2672
5	4	5344	
6	2	10688	
7	1	21376	21376

Total..... 25384

The above can be clearly understood if we, like the ancients, divide the numbers in Column 1 by 2 in each one of the seven lines indicated, carrying the quotient in each division down to the next line; hence  $76 \div 2 = 38$ , on the line below;  $38 \div 2 = 19$ , on the line below, and so on. And it will be noted that when one is left over after the division, it is thrown out of further consideration.

In Column No. 2 the first figure is added to itself to give the figure set below it on the second line of the demonstration; hence  $334 + 334 = 668$ , the figure appearing in Column No. 2 on the second line. And in like fashion 668 added to itself gives 1336, appearing in Column No. 2 on the third line.

To arrive at the result each number in Column No. 2 which stands opposite an uneven number in Column No. 1 is carried out into Column No. 3. Thus in the above demonstration the numbers 1336, 2672 and 21376, opposite, respectively, the uneven numbers 19, 9 and 1, which appear in Column No. 1, are added together, giving the result of 25384.

If you will multiply the two original figures, 334 and 76, you will find that this is the correct product.

There must be a theoretical explanation of this method of procuring the product of two numbers. We may have had it when we studied higher mathematics but if so, we have forgotten it.

Perhaps among our technically trained men on the Railroad there is someone who, without taxing his or our brains too much, can explain to us the mathematical theory of this demonstration.

Please don't crowd!

## Installation of the Huntington Avenue Slip Switch

By Theodore Bloecher, Jr.,

Division Engineer, Baltimore Terminal Division

ON SUNDAY, May 14, the new slip switch at Huntington Avenue Interlocking Tower was put into service and the old one which had been in service since 1908 was removed.

The new slip switch had been built adjacent to the tracks and immediately opposite the old one and work had been going on for some time fitting it up. Preparations for the installation were completed several days before May 14, and Sunday was selected as the time to do the work on account of the minimum number of train movements which would have to be contended with. The work was complicated by the fact that electric traction is used on this portion of the Belt Line and the third rail carrying the current required additional fittings and connections.

The general plan of renewal was first to

disconnect a portion of the third rail, in advance of all the other work. Then two wrecking cranes were spotted on the track adjacent to the old slip switch, with two flat cars between them. In the meantime signalmen were busy disconnecting the interlocking and trackmen were disconnecting the slip switch. The two cranes then lifted the old slip switch on to the flat cars, which were set in a spur siding out of the way. Trackmen then began loosening the dirty ballast while an engine moved four flat cars alongside to receive it. After this had been cleaned away, new, clean, ballast stone in a side dump hopper was brought alongside the location of the slip switch and the side doors opened, permitting it to run out. This new ballast was worked back and spread evenly over the ground. The ballast car was then moved away and the two wrecking cranes

lifted the new slip switch into place. When the cranes were taken away the slip switch was lined to position. After the lining was complete, the signalmen started their connections and the trackmen commenced connecting up the tracks.

A summary of the operations is as follows:

1. Third rail was clear at 6.28 a. m.
2. Wrecking cranes with flat cars were spotted at 7.34 a. m., and cutting loose of signal and track connections was begun.
3. Track and signal connections were cut loose 7.50 a. m.
4. Cranes had hitches made and ready to lift 8.00 a. m. but were held for Train 504.
5. Old slip switch lifted out 8.15 a. m. and moved away.
6. Four flat cars for handling dirt spotted at 8.28 a. m.; digging commenced.
7. Cars moved away at 10.28 a. m. to clear track and bulk of digging had been completed. The small remaining dirt was shovelled into ditch and this work completed 10.45 a. m. ready for ballast.
8. Work train returned and ballast cars spotted 11.10 a. m.
9. Ballast unloaded and spread 12.20 p. m.
10. New slip switch placed by cranes 12.37 p. m. and cranes released.
11. Slipswitch lined and ready to hook up 1.00 p. m.
12. No. 4 track ready for service 3.05 p. m.
13. No. 1 track ready for service 4.50 p. m.
14. Interlocking connected and signals operative 6.35 p. m.

## Traffic Class Closes Successful Season

By W. H. Orem

AFTER a successful and profitable winter and spring series of sessions, the Baltimore and Ohio Traffic Class has suspended its weekly Monday night meetings in the Central Building Assembly room, for the summer season. The next meeting will be on the first Monday night in October, 1922.

The meetings were originated by the General Freight Department, and the hearty cooperation not only of its officials, but of those of other departments, insured its success as an educational and cooperative asset to the Road.

The meetings were largely looked after by Vice President R. J. Beggs, formerly chief rate clerk, General Freight Department, and now division freight agent at Cumberland. Enlightening talks were given by officials of the Operating, Car Service, Law, Live Stock, Police, Accounting and Traffic Departments.

The members who participated in this educational opportunity, are indebted to the officials who so willingly gave their time and efforts to make the meetings a success. Many more able speakers, as well as interested members, are in sight for the sessions in the autumn.

Installation of the new slip switch at Huntington Avenue, Baltimore Terminal Division. Bottom: swinging new switch into position. Middle, left to right: Signal Foremen W. L. Nethkin and W. R. Wheats, Track Foreman J. Hargett, Track Supervisor J. Harrison, Signal Supervisor B. H. Prinn, Track Foreman A. Miles, Third Rail Foreman W. J. Bacon, Track Foreman A. Tallero. # Lady Astor Honored on Mothers' Day by Employes of Akron Division

THAT Lady Astor has many, many interesting charms, characteristics and possessions, was amply made known to the American people during her recent visit to the United States. Chances are, however, that in the average American mind, looming larger than the fact that she is a beautiful American girl who became a titled English lady, and that she is the first woman ever to have been elected to membership in the House of Commons, and that she is an outstanding leader in the women's movement, and that she is a woman of ready wit and uncommon good sense—bigger than all these things is the fact that with them she has had the time to be the admirable mother and companion of six children.

It was, therefore, with this idea in mind that the employes of the Akron Division, under the leadership of Superintendent Stevens, remembered her motherhood on Mothers' Day. She was proceeding on our No. 7 over the Akron Division, and was presented with a beautiful bouquet of flowers to which was attached a card and on it "With Compliments of the Employes of the Akron Division of the Baltimore and Ohio."

In the last issue of the MAGAZINE we mentioned the fact that Lady Astor's father, Colonel Langhorn of Virginia, was a contractor who had charge of the building of quite a considerable part of the right-of-way of our Railroad. Lady Astor goes us one better in her charming note of acknowledgment, a re-arranged and reduced fac-simile of which is shown herewith. She claims membership in our own Railroad family and it is certainly a rare pleasure to welcome her into our ranks even in an ex-officio capacity.

Lady Astor's letter reads as follows:

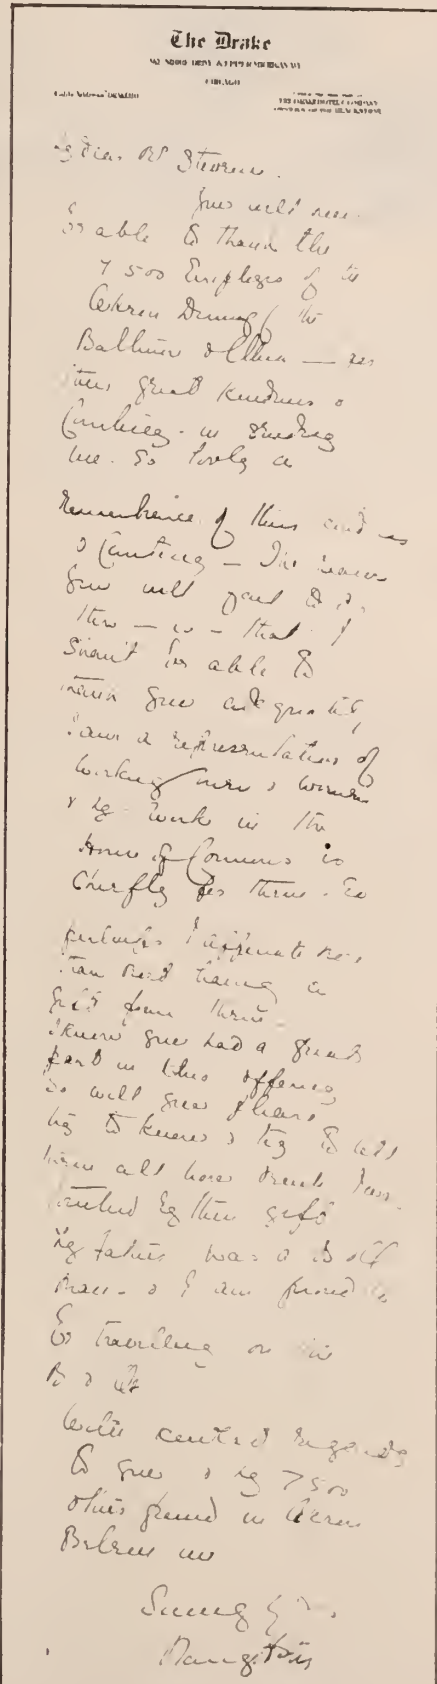

"You will never be able to thank the 7,500 employes of the Akron Division of the Baltimore and Ohio for their great kindness and courtesy in sending me so lovely a remembrance of their kindness and courtesy. The reason you will fail to do this is that I shan't be able to thank you adequately. I am a representative of working men and women and my work in the House of Commons is chiefly for them, so perhaps I appreciate more than ever having a gift from them.

I knew you had a great part in this offering, so will you please try to know and try to tell them how much I was touched by their gift. My father was a Baltimore and Ohio man, so I am please to be travelling on the Baltimore and Ohio.

With kindest regards to give to the 7,500 others on Akron Division, believe me,

Sincerely yours,

(Signed) NANCY ASTOR

Rearranged and reduced fac-simile of Lady Astor's letter

## Carnival Spirit at Pittsburgh Welfare Meeting

THE Pittsburgh Division Welfare Association provided fine hospitality at their annual reception and dance held on April 25 at the Rittenhouse, Pittsburgh. A large number of young folks were present to enjoy the excellent program the committee had planned. The fact is, there was no one present who could be classed as other than "young folk," for the stirring music, the kaleidoscopic array of costumes and the spirit combined to make the folks think that they were at the fountain of youth.

There was no interruption of the dancing program early in the evening and fox-trots stepped upon the toes of waltzes in rapid succession. Officials and employes had a chance to meet socially and the hours went by with the rapidity of No. 5 passing Broad Ford and the big buildings on the river bank. At intervals some of the dancers occupied tables for refreshments, but none lingered long there.

Finally the committee announced that there would be a grand promenade and everyone got in line and leisurely manoeuvred about the room. Each woman and man received a favor. Vari-colored carnival hats were passed out to each person. The ladies received, in addition, bright-hued parasols with which they kept the moonshine from freckling the faces of their escorts. It was a novel sight as the entire group marched about the room in their oddly shaped hats.

Unstinted praise was given the committee of arrangements for the successful carrying out of the program. The committee consisted of Messrs. C. J. Weaverling, chairman; J. W. Jennings, F. A. Nagle and E. C. Ringer.

## Commended for Fine Fuel Performance

The following letter is self explanatory:

Cumberland, Md.,  
April 28, 1922.

Mr. J. Norris  
Engineer

Mr. B. L. Mastin  
Fireman

Gentlemen:—It is with pleasure that I note the performance of Train 8, Engine 5210, Cumberland to Washington, on April 18. It was fired with only 371 shovels of coal, with a consumption of 5.2 tons per passenger car mile, it being particularly noticeable that there was no black smoke, nor was the pop valve open.

This is a highly commendable performance and I desire to express my highest appreciation of it.

Yours truly,

(Signed) C. W. Van Horn  
Superintendent

by G.H. Pryor  
Auditor of Disbursements

### Note:

All puzzles published in this department will be defined, as far as possible, from the *New Standard Dictionary*, edition of 1920. It is permissible to use both geographical and biographical words in the construction of puzzles, but when such words are taken from any authority other than the *New Standard Dictionary*, the name of such authority must be stated at the end of the definition, in parenthesis. Obsolete words will be marked at the end of the definition thus—("obs"). Variant spellings of a word must be marked at the end of the definition thus—("var"). Address all communications concerning this department to G. H. Pryor, Room 800, Baltimore and Ohio Building, Baltimore, Maryland, and mark the envelope "Puzzles."

**B**ELATED solutions of the puzzles in the March issue were received from the following: Margaret Smurdon, So. Chicago, Ill.; Philip M. Pennington, Cumberland, Md.; L. L. Grabill, Toronto, Ont.

### NEW PUZZLES

#### 1. CHARADE (8)

(In negro dialect)

Sam Johnson lived ONE Alabam'—  
His famby was pow'ful fond o' ham,  
So one night Sam he crept away  
To steal a ham TWO to eat nex' day.  
Now, dat smokehouse lock THREE guess  
'twas strong,

FOUR Sam wouldn't a-picked at it so long.  
Wow! Ole man Jones wid his rifle true  
Showed Sambo what rock salt kin do.  
Ah, we pause in sympathy fer Sam—  
He was peppered wid salt—in Alabam.

#### Moral:

When you wants ham fer to feed yer flock,  
Don't fool wid nothin' but a WHOLE lock.

Baltimore, Md. *Red Crow*

No. 11. DELETION (6)

A railroad man a-courting went,  
 And went he in full well;  
 It then was seen that he was bent  
 On winning hand of Nell,  
 A handsome maid and belle.

It soon transpired that he did win,  
 And now he had her fast;  
 Through solemn rite and noise and din  
 He won her for his LAST,  
 And thus their lot was cast.

Eftsoon they're off on wedding ride,  
 As suits a railroad man;  
 They sped along through countryside,  
 Or over TOTAL'S span,  
 And little risk they ran!

Baltimore, Md. *Primrose*

No. 12. SQUARE

- 1—A mark made by anything that has gone by.
- 2—A work with two parapets meeting at a salient angle.
- 3—A sun-dried brick.
- 4—A heavy rope or chain.
- 5—To make obeisance.

Baltimore, Md. *W. J. Ahrens*

No. 13. DIAMOND

- 1—A letter.
- 2—An opening.
- 3—A lively but dignified dance of the Minuet class.
- 4—A detached work with two embankments making the salient angle of a fort.
- 5—An extensive group of radiated animals.

- 6—A point or end of anything small.
- 8—A letter.

Baltimore, Md. *W. E. Mudden*

No. 14. DIAMOND

- 1—A letter.
  - 2—A malignant spirit which causes disease.
  - 3—Mothers.
  - 4—Same as Keratto.
  - 5—A signal-telegraph.
  - 6—A hole gnawed by a rat.
  - 7—Robbed.
  - 8—A natural substance containing one or more metals.
  - 9—A letter.
- Scranton, Pa. *Arly Ess*

\*\*\*\*\*

Among the new forms published this month are some that have not been described and I will now attempt to tell you what they look like. The half square is a form shaped like this:

The words read the same across, or horizontally, and up and down, or vertically, in their respective positions. The half square is not nearly so hard to construct as the square and therefore assumes much larger proportions than the latter. However, I think a seven letter half square is plenty large enough to begin with and the one published this month is a good example of its kind. The first definition is the top word of seven letters and so on down to the seventh definition which is "a letter."

The octagon is, as its name would indicate, a form puzzle with eight sides. It is shaped like this:

**Prizes for Best Answers**

A copy of the standard book on puzzles, "Key to Puzzledom," will be given to each of the five employes submitting the best answers to the puzzles given in this issue of the Magazine, and having them in the hands of Mr. Pryor by July 15.

Only new puzzlers will qualify for this competition, it being felt that the old puzzlers will be glad to leave the field open to the beginners.

As it is unquestionably true that many employes will solve all of the puzzles given in this issue correctly, it will probably be necessary for those competing for these prizes to work out an original puzzle, to put him or her in the running. The names of the successful competitors will appear in the August issue.

The words read the same both across and up and down and the first definition is a three letter word at the top and so on down to the seventh definition which is also a three letter word.

**Just between You and Me**

We are receiving some encouraging letters concerning this department and it makes us feel that there is going to be a real interest developed among a great many members of the Baltimore and Ohio family.

Mrs. Gertrude L. Kelly, Law Department, Baltimore, says: "I am sure we are going to enjoy this department very much."

Miss L. Mildred Hemmick, Division Accountant's Office, Washington, Ind., says she enjoyed the first number very much and trusts the department will be continued because it is educational as well as interesting.

Colston Trapnell of Weston, W. Va., among other things, says: "This is the first time that I have ever taken any interest in puzzles but I can agree with you that it is a beneficial and delightful game. I am waiting impatiently for the next issue."

John Newman, terminal timekeeper, New York, says: "I was never interested in puzzles until I read your exposition of the game in the MAGAZINE. Can now see how it can easily become an absorbing hobby." Mr. Newman contributes a very neat charade in this issue.

Don't be bashful about sending in your answers and also new puzzles and don't forget we like to know your opinion of the department and are always glad to receive constructive criticisms.

The prizes offered by the MAGAZINE are well worth striving for. The "Key to Puzzledom" is a wonderful little book and almost indispensable to those interested in puzzling.

Have you read No. 3, the curtailment by Martelia in this issue? Sounds very much like James Whitcomb Riley, doesn't it? Martelia is, in everyday life, C. Russell Taylor, one of the famous veterans of puzzling, and his verses are always delightful. He served the Baltimore and Ohio many years in different capacities, his last position being that of cashier, Camden Freight Station.

The National Puzzlers League will hold its semi-annual convention in New York City on July 4 at the Hotel McAlpin. If any of the Baltimore and Ohio Puzzler's Club happen to be in New York that day they are cordially invited to drop in and meet some of the brightest lights in the game.

(Continued on Page 64)

# The Eighth Annual Concert of Baltimore and Ohio Glee Club

*In All Respects a Noteworthy Advance over Previous Efforts*

THE Eighth Annual Concert of the Baltimore and Ohio Glee Club was held on the night of May 24 in the Academy of Music Concert Hall in Baltimore. About a thousand of the music loving associates and friends of the Club members on the Railroad attended, and in point of numbers made the concert the most successful the Club has ever given.

This year the Club was fortunate in having secured over seventy officers and employes of the Railroad as associate members, this privilege being open to anyone connected with the Baltimore and Ohio at a cost of \$5.00 per year. This year each associate member was sent five tickets without further cost and quite a number of them were present with their friends.

The program follows:

- The Sailors' Chorus..... Joseph Parry
- At Dawning..... Charles Wakefield Cadman
- The Drum..... S. Archer Gibson  
The Glee Club
- La Colomba (The Dove)..... Kurt Schindler
- Dinna Ask Me..... Sidney Homer
- Will o' the Wisp..... C. G. Spross  
Matie Leitch-Jones, Soprano

- Sylvia..... Oley Speaks
- Swing Along!..... Will Marion Cook  
The Glee Club
- Arabesques on Strauss' "Beautiful Blue Danube"..... Schultz-Euler  
Mr. Sylvan Levin, Pianist
- The Four Winds..... Franz C. Bornschein
- The Handorgan Man..... A. V. Othegraven  
The Glee Club
- La Campinera (The Wren)..... J. Benedict  
Flute obligato played by Mr. F. Gottlieb  
Matie Leitch-Jones, Soprano
- The Night of a Star..... Daniel Protheroe
- Unfold, Ye Portals..... Gounod  
The Glee Club

What the Baltimore music critics thought of the work of the Club is suggested in the following critique from the Baltimore News of the day following, headlined "Audience Pleased by Baltimore and Ohio Singers."

An important feature of the concert given by the Baltimore and Ohio Glee Club at its concert in the Academy of Music Concert Hall last night was the first local performance of "The Four Winds," the work with which Franz C. Bornschein of this city won first prize in the national competition conducted by Swift & Co. in Chicago.

The score is an interesting one and displays the distinctive creative gift of its composer more effectively than any work of his I have recently heard.

It has the initial advantage of a good "libretto," being written around an appealing poem by Charles Luders, that permits of a varied and contrasted musical expression. The spirit of the verse is admirably grasped and maintained and in addition to vivid descriptive passages there are beautifully melodic episodes.

### Can Sing Well

The Baltimore and Ohio Glee Club offers more than casual claim upon consideration. Its tonal quality is good and its singing is characterized generally by refinement and technical ability. It reflects abundant credit upon its leader, Hobart Smock, testifying to his careful training and understanding.

The soloists were Matie Leitch-Jones, soprano, and Sylvan Levin, pianist. Mrs. Jones was again successful and following her brilliant performance of Benedict's "The Wren,"

*(Continued on Page 23)*

The Glee Club as it appeared at its Eighth Annual Concert. The director, Mr. Hobart Smock, is on the extreme right

## Brunswick Veterans' Picnic an Achievement in Civic Progress

Spectacular Parade, and Fireman, Cowboy, and Indian Demonstrations, Make Brunswick Celebration Unique Among Veterans' Picnics

ON the morning of May 10, nearly 300 Baltimore Veterans arose, looked out of their respective windows, heard the patter of raindrops and saw the dripping trees and the wet pavements. Then, heaving 200 simultaneous sighs, they crawled back into their respective beds.

Up in Brunswick at the same time the whole population arose and did the same thing; that is they got as far as the sighs, but they didn't crawl back into bed. Instead, each citizen gritted his respective teeth—or tooth, as it happened to be—and made up his mind that, rain or shine, *the picnic must go on.*

Just at this point in the story, the women of Baltimore arose—Oh, no, the wives of the Veterans do not pack lunches and frizz their hair and make doughnuts and caramels for nothing. The day was set, and the children were ready. They called their husbands and the call was impressive. Simultaneously again the husbands rolled out of their respective beds and came rushing downstairs to eat the breakfasts which were ready and waiting for them. One hour later the families were on their way to Camden Station to take the train to Brunswick. The Brunswick Veterans had said that they were going to have a picnic, and when they say something they mean it.

Among those waiting at the station at Brunswick to greet the folks from Baltimore were W. Ray Smith, president of the Veterans, and Veteran John Martin, who entertained many of the Railroad officers and friends at his hospitable home on that day, as he has done for many years.

Some of the Veterans brought basket lunches, others purchased lunches on the grounds. Those who partook of the picnic lunch declared it the best of its kind that they had ever tasted. The Brunswick ladies presided at the tables where the dainties were to be had, and many "filled

themselves to bustin'" with the delicious punch and lemonade, ice cream and sandwiches.

Mingling with the Veterans and their families, greeting one and then another, and listening to and telling old yarns, were the officers from Baltimore: Vice President of Operation and Maintenance C. W. Galloway, General Manager of Eastern Lines E. W. Scheer, General Superintendent White, Superintendent Hoskins, Chief of Welfare W. W. Wool, Superintendent of Relief Department W. J. Dudley, General Superintendent of Transportation W. G. Curran and Master Mechanic A. K. Galloway. There was also our popular Dr. Hedges, Grand President of the Veterans G. W. Sturmer, President of the Baltimore Chapter and Mrs. Wall, Past President Bowers, Master Mechanic Fritchey, William J. Grove of the W. J. Grove Lime Company, and a host of old timers.

One of the notable visitors who enjoyed the ceremonies was Adam Kohlenberg, who has been agent at Adamstown for so long that he defied any of the others to tell the number of years. Hale and hearty and full of fun, he told a story of his grandfather, another Adam Kohlenberg, who, with his wife Evaline, lived at Adamstown. Quite naturally the inhabitants of the town spoke of the old couple as Adam and Eve. One day when an army of Rebels came through the town, they happened to notice the sign over the gate reading: ADAM KOHLENBERG. "Aha," quoth one of the officers, "here is Adam. Now where is Eve?" "There she is at the window," said his informant. The officer looked up. Sure enough, there stood Eve at an upper window. The officer drew a long breath, blew his nose, looked again and said: "Well, I'll be . . . hanged!" (P. S. "Hanged" is simply a substitute for a word which the modesty of our printers forbids our using.)

About 2.00 p. m., the rain ceased, the sun burst forth, and down the main street of Brunswick, in all their glory came the marshalls of the parade, on horseback—John Green, chief clerk, Transfer Shed, Brunswick, and Engineer Jesse Mann. Following these came the Brunswick Band. The Cumberland Shop Band was there, too, as was the band from St. Mary's Industrial School, Baltimore, and the Yellow Springs Band! There were about twenty or more men dressed as Indians, of whom the chief was Engineer A. B. Haller, who has seen 40 years of Baltimore and Ohio service; there were as many cowboys who tore up the place with their shots and whoops when they engaged with the re-skins in a spectacular sham battle; there were cars loaded with Veterans and the officers as their guests—all of these were important features in themselves, but the real representative character of the town of Brunswick was shown in the wonderful picture presented by her school children. West End School, under the guidance of its principal, Miss Wenner; East End School, with Miss Ella Krieg at its head, and St. Francis Catholic School, led by Father J. Donlan, gave perhaps the most spectacular display that has ever graced the streets of this or of any other town of its size.

There were little Health Crusaders, in red and white; little engineers, firemen, oilers, flagmen, and representatives of all of the industries of the town, including the "butcher, the baker and the candlestick maker." There were the hospital corps, the standard bearers, little girls bearing torches to light the way to Brunswick; there were groups of fairies and gay butterflies; there were the little bride and groom, children of Checker W. L. Burkholder and Brakeman C. L. Moats, who advertised the S. T. Little Jewelry Company; there were older girls who represented the Women's Council of 1942; the little folks who advocated clean streets for Brunswick, pure sweets for the kiddies, the Baltimore and Ohio Home-Maker; the future doctors and nurses of the town, the policemen, and the future mayor of the town, and certainly not the least among the "futurists" was the future president of the Baltimore and Ohio sitting astride of his pony with all of the dignity of a Baltimore and Ohio president. Is there any wonder that hats flew up in the air, that cheers went out and fireworks were sent up after the manner of a Fourth of July celebration? Then came the American flag, carried by Sam Sicura, of Knoxville, Md. This was the crowning feature of the parade, and it was only when the call to the speakers' stand came that the cheers subsided.

The school children sang the Star Spangled Banner and a prayer was made by John Wesley Peyton. There was music by the bands, and the addresses began. The speakers were introduced by Yardmaster John T. Martin, who holds a half-century service record with the Baltimore and Ohio.

Mayor Shaffer told of the close association of the town with the Baltimore and Ohio, reminding his hearers that the success of one depends upon the success of the other: how, through the liberality of Mr. Galloway the schools of Brunswick had secured the best equipped playgrounds of the State; of how the Baltimore and Ohio had helped them secure the splendid fire-fighting apparatus and the fine hard-surfaced road on North Hill. He extended a hearty welcome to Brunswick and offered the thanks of the town to the Baltimore and Ohio.

Mr. Martin then gave a talk on the growth of the town, after which he introduced O. P. Karn, president of the Chamber of Commerce. Dr. Hedges read the letters from President Willard and others of our officers who were not able to attend.

Vice President Galloway expressed his pleasure at being present and his appreciation of the splendid growth of Brunswick. He paid a fine tribute to the work of the schools and to the splendid showing of little men and women, the future railroaders. He said that it was the pleasure of the Baltimore and Ohio to help a good cause. "You may well be proud of what you have done," said Mr. Galloway, "and when you are ready to do more, the Baltimore and Ohio is here to help you." He told of the growth of the Veterans and their work for the general welfare of the Baltimore and

Ohio Family. He touched briefly upon the general railroad conditions.

W. G. Curren, general superintendent of Transportation, gave an inspiring talk on what more business means to the Baltimore and Ohio, comparing transportation costs from time to time, and spoke in general of the handling of cars.

Judge G. H. Worthington spoke with a touch of real humor of the growth of Brunswick, describing in detail the selling of Brunswick bonds and some of the trials of the early days in the town.

General Manager E. W. Scheer told the people how pleased he was with the wonderful sights which had greeted his eyes since that parade began, of his appreciation of the work of the Brunswick folks. He called their attention to the fact that as soon as the first speaker had opened his mouth to speak, all of the trains in Brunswick seemed to have begun to move. His jovial manner proclaimed to all his enjoyment of the day.

Superintendent R. B. White expressed himself as being glad of the opportunity to thank the people for their splendid work. Said he, "The men of Brunswick have been called upon to do many difficult things. . . but they have never been found wanting." W. W. Wood, chief of Welfare, in his able way, held the throng on the verge of laughter one minute and made their hearts go thumpity-thump the next. He paid a

glowing tribute to the women, and appealed to them to make real men of the masculine element in their respective families. "It is not whether or not you are descended from the monkey," said Mr. Wood, "but how much and in what direction."

Just as Superintendent Hoskins began to speak, there was a slight disturbance at the rear of the speakers' platform. Those who turned their heads in time saw a teacher seize upon an oil can and apply the container end of it in the proper spirit to a youngster who, evidently, had become a little too hilarious. This was only an example to show that Brunswick teachers are disciples of the old time training.

Mr. Hoskins extended his congratulations to the people, not only in their exhibition of the day, but in their daily work. He said that Brunswick is one of the best examples of a terminal on the Railroad. Grand President of the Veterans G. W. Sturmer, who was next in line, gave a short talk to the Veterans, congratulating them on their fine showing, and on their efficiency as Baltimore and Ohio men. Reverend E. E. Burgess, of the Episcopal Church, pronounced the benediction.

Fland! Dang! Boom-a-lang! This was the fire alarm! The people rushed hither and thither. Over in the grove there was a sham battle going on between the redskins and the cowboys, of whom Conductor R. L.

PICNIC DAY AT BRUNSWICK, MD.

1. St. Mary's Industrial School Band. 2. "Sam" Sicura, not yet a citizen of the United States, but loyal to the extent of paying \$25 for this splendid "Old Glory," which he carried in the parade. 3. Lighting the way to Brunswick, these little torch-bearers were among the throng of marchers. 4. The "big girls" carried a flag too. 5. Little oilers from St. Francis School. 6. Yes, dere wuz Cullud folks watchin' dat parade. 7. The old fire engine and crew; see Brunswick Among Ourselves notes for a picture of the up-to-date apparatus. 8. The "Future President of the Baltimore and Ohio" was Howard Mohler, on his pony. Pictures of more of our little school folks will be published later.

Much is the leader. In a few seconds it was over, and everybody began looking for the fire. On the other side of the road there stood a little shack in full blaze. Down the street at full speed came the spik and span new fire engine. Cowboys, Indians and policemen kept the people at a safe distance; and in a few seconds a huge stream of water was turned on, and in a jiffy the fire was out. They had never had a real fire in which to try out their new apparatus, so a

"put up job" served the purpose and furnished no little interest and amusement to the several thousands of spectators.

Refreshments and dancing ended the program for the day, and everybody went home with a vote of thanks on his lips for the lovely day and the fine time. One little fellow expressed the sentiment of the crowd when he said, "Gee, but I wish this would last a week!"

## Vice President Galloway Addresses Memorial Meeting at Grafton

ON Sunday, May 14, the Grafton chapter of the Baltimore and Ohio Veterans held its second annual memorial service in the high school auditorium.

The principal feature of the service was an impressive address by C. W. Galloway, vice president Maintenance and Operation. Commenting on it, the local paper stated that from a practical point of view, it was one of the best addresses ever made in the city of Grafton.

Mr. Galloway spoke of the loyalty that is necessary on the part of any man who is allowed to remain in the employ of any corporation for 20 years. He cited cases where some of the Baltimore and Ohio employes have service records of as many as 57 years. He paid tribute to the women, the wives of the Veterans, and to the mothers of Railroad men. He spoke of those in whose honor the memorial service was held and told of the work that these had done. The list is as follows:

### In Memoriam

NAME	Entered Service	Died
Robert Anderson	1884	Feb. 9, 1920
John H. Bennett	1889	Dec. 26, 1919
John M. Cassell	1879	July 25, 1920
James Flanagan	1857	June 27, 1919
P. J. Fahey	1869	Aug. 5, 1920
James W. Grinnan	1870	March 17, 1920
J. Patrick Judge	1867	Sept. 6, 1920
Albert P. E. Lucas	1873	Sept. 28, 1921
Chas. H. McCafferty	1871	Dec. 8, 1921
Samuel W. Ridenour	1874	Nov. 25, 1920
Bailey N. Yates	1890	July 24, 1921
John W. Deneen		Honorary Member
Mrs. S. W. Ridenour		Oct. 7, 1921.

The program which follows was printed in attractive pamphlets, on the backs of which were the words of the two hymns that

were sung. Frank Keane, president of the Grafton chapter, was in charge of the services.

- 1 Music Orchestra
- 2 Opening Exercises President
- 3 Hymn, "Come Thou Almighty King" Audience
- 4 Invocation Rev. T. E. Maness
- 5 Music Orchestra
- 6 Hymn, "Beautiful Isle of Somewhere" U. B. Quartet
- 7 Roll Call of Deceased Members
- 8 Duet, "O Morning Land"
- 9 Orchestra
- 10 Introduction B. Z. Holverstott
- 11 Memorial Address C. W. Galloway
- 12 Music—Selected Andrews Junior Choir
- 13 Hymn, "God Be With You 'Til We Meet Again," Audience
- 14 Benediction Rev. M. B. Miller
- 15 Orchestra

After the services were over, Mr. Galloway and the other officers of the Railroad and of the Veterans' Association were carried in the automobiles of Brothers Dattson, Peterfield, Osborn and Carter, to Prunty Town. Here they visited the Industrial School, and spent a pleasant hour with Superintendent and Mrs. Fletcher.

Rev. G. H. L. Beeman, in a letter to the editor of the Grafton paper, cited this meeting of the Veterans as a great opportunity to promote the "Grafton spirit," for, as he said, "Grafton is what it is today largely because of what the railroaders have done."

### The Death of Charles W. Thayer

CHARLES W. THAYER was born on March 11, 1857, at Terra Alta, W. Va., where his father was engaged in the hotel business. Several years later they moved to Walkers, W. Va., where Mr.

Thayer attended school for about ten years. His father owned and operated a small farm and Mr. Thayer worked it during his early boyhood. On September 1, 1880 he entered the service of the Baltimore and Ohio as brakeman. He continued in that capacity until 1885 when he was transferred to the Maintenance of Way Department. One year later he was transferred to Rowlesburg, W. Va., as a pumper. Here he worked for about nineteen years. About 1905 Mr. Thayer moved to Cumberland where he continued working for the Company as a pipeman until the time of his retirement. Mr. Thayer married Miss Ella Wheeler in 1886. They have three children, two sons and a daughter. One son is a clerk in the Post Office Department, Cumberland; the other is a truck driver, Washington. The daughter is a school teacher in Cumberland. Mr. and Mrs. Thayer now reside at 58 Baltimore Avenue, Cumberland, Md.

## Eighth Annual Concert of the Baltimore and Ohio Glee Club

*Continued from page 20*

the flute obligato of which was well played by Frederick H. Gottlieb, she sang the Norwegian echo all of the coloraturas are warbling these days—"Kom Kyra."

### Attracts Large Audience

Mr. Levin presented the Schultz-Euler "Arabesques on the Blue Danube Waltz" fluently and sympathetically, creating a far better effect with it than with the Rachmaninoff G-minor Prelude, which he played at much too rapid a tempo.

The concert, which attracted a large audience, was quite a "family" affair. The ushers were conductors of the Baltimore Division of the Baltimore and Ohio Railroad and the program boys were the messengers, all in uniform.

The soloists appearing with the Club made splendid impressions. Each had chosen numbers suitable for the occasion and their work was heartily enjoyed and applauded. The pianist, Mr. Sylvan Levin, has been the accompanist of the Glee Club during the past year and has had not a little to do with the success of the season's work.

To Mr. Hobart Smoek, the director of the Club, goes the largest share of praise for the way he handled the really difficult music which was sung this year. In this respect the program was far in advance of anything before attempted by this Club and shows a musical advance both in aspiration and accomplishment.

The club will resume its rehearsals in September and all men singers in the service who can attend regularly on Monday nights, are cordially invited to join.

## Hail! Hail! The Gang Will All Be There!

Make all your arrangements early for the Western Lines Picnic of the Baltimore and Ohio Veterans, Buckeye Lake, the Atlantic City of Ohio, August 17. Seven miles of water, bathing beaches, motor boats, sailing, large passenger boats, dancing pavilions and amusements of all kinds at your disposal. Come spend the day with us. The Western Lines expect to send a good delegation to the Eastern Lines Picnic to be held at Pittsburgh on July 20.

# Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—  
Retreat from care that ever must be thine;  
How blest is he who crowns, in shades like these,  
A youth of labor with an age of ease.*

OLIVER GOLDSMITH—"The Deserted village"

## John T. Miller

John T. Miller was born in Baltimore on January 12, 1856 and has lived here all his life. He entered the service of the Baltimore and Ohio on August 21, 1879 at Bailey's as engine cleaner. He worked here for ten years, then went to Riverside under Mr. White, where he worked 18 years. He was transferred to Mt. Clare on October 5, 1907 as carpenter, and on May 1, 1910 became a truck builder. On February 1, 1916 he was made a tender inspector, and worked in this capacity until he was pensioned.

## Plymon Wilson

Plymon Wilson was born at Shalersville, Portage County, Ohio, on May 8, 1855. He went to Burlington, Iowa with his mother and sister in 1867, his father having died the previous year. He entered the

service of the B. & O., now the C. B. & Q., as fireman in 1878, and was promoted to engineer in October, 1881. He came to Youngstown, Ohio, in 1889, and entered the service of the P. & W., now the Baltimore and Ohio, in April, 1889. Here he was in continuous service of the Company until April, 1917, when he took a severe cold which culminated in spinal trouble. This affected the optic nerve and he has never fully recovered.

## Joseph Acton

Joseph Acton, carpenter, Ohio Division, was born on May 24, 1857, in South Union Township, Ross County, Ohio.

Mr. Acton did not have a chance to attend school and as soon as he was large enough, worked on a farm.

At the age of 28 years he left the farm and secured a position in the Maintenance

of Way Department of the C. H. & D. Railroad where he worked until November, 1900.

On March 26, 1901 he secured a position as carpenter in the Motive Power Department, Chillicothe Shops, and continued there until about one year ago, when rheumatism crippled him to such an extent that he could no longer follow his occupation.

Mr. Acton was a faithful worker. He is much respected by his fellow men, and it is with reluctance that he gives up his activities with the Baltimore and Ohio.

Mr. Acton has a wife and one son living.

## I. N. Engle

I. N. Engle, pensioned baggageman, was born on August 23, 1847. He entered the service of the Baltimore and Ohio as brakeman on through freight from Pittsburgh to Cumberland.

He left the Baltimore and Ohio on April 29, 1880 and went to work on the P. & L. E. Railroad on May 5, 1880 as freight conductor. On March 17, 1884 he returned to the Baltimore and Ohio in the passenger service as brakeman and baggageman and served in these positions until January 27, 1892.

He was married in 1871 and his wife died in 1887. There were born to them four children, two of whom are living, I. N. Engle, Jr. and A. R. Engle.

## "Dear Sue—"

By *Katye M. Coplan*

Dear Sue:

I guess you've been wondering, Sue, what on earth's happened to me since the last time I took my pen in hand to write you an epistula. Guess where I been. Shucks, here I'm telling you to guess just like I never knowed what a punk guesser you always was. No harm meant, Sue; you know I wouldn't hurt your feelings for Rockefeller's income, but you know yourself that it wouldn't take Boob McNutt a hundred years to get wise to the fact that you never was able to sneak out of the infantile class in guessin' school.

My stars, Sue! Do you remember the time in our kiddhood days, a thousand years or thereabouts ago, when I held out my closed fist and told you to guess if a chestnut or a chocolate was in it, and you guessed "Fun pkin?" Well, Sue, I might as well upset the frijoles, otherwise known as spillin' the beans. Read this as follows: I'VE BEEN TO NEW YORK!

"What! At this time of the year?" I can hear you yell incredulous. Yes, Sue, sure. Every year I take my vacation as early as possibly, while that villan, Spring Fever, holds me in his grip; then, Sue, in Summer, when the rest of the bunch is away sending post cards with the "having-a-good-time, wish-you-were-here" messages, poor old Yours Truly is working like a peppless army mule. However, that's how I come to get to that city teething—no, I mean, seething—full of populations.

Say, Sue, did I tell you what road I went by? Why, I went on the Baltimore and Ohio, and if you ever travel on any other road, Sue, you'll be the biggest boob that ever shook a hoop and you'll deserve being knocked down for a row of ash cans. Say, Sue, it was the cleanest, fastest, comfortablest, altogether beatenist train I ever deigned (get that word?) to honor with my presence, as the authors warble. Believe me, Sue, if the people in this world all give the Baltimore and Ohio one trial, then every other railroad will have as many passengers as the used to be Kaiser Bill had friends among our boys in that summer of 1918.

Well, Sue, when I made my arrival in the Big Town, I immediately looked up my cousin, Prunella. You remember her, don't you? She's a real nice looking girl, Sue, all except for the fact that her eyes look at each other. I got Prunella to take me sight-seeing, for I'd made up my mind that I

was going to give New York the snappy once over, even if I had to make my return trip lying in state with a lily on my chest, owing to a broken neck, caused by too many lingering glances at the giants of buildings. Well, Sue, the next day Prunella showed me Broadway, and take it from me, Sue, I was holding tight to Prunella's arm. Say, have you ever been on Fifth Avenue? Well, say, if there's a sweller row of huts anywheres in this world, please send me a picture of them on a post card. The next few days she, Prunella I mean, showed me the rest of the town, the tall buildings and the statue of Liberty Long May She Wave. But you've been to New York, so I won't bother about telling you more about that. What I want to tell you now, Sue, is about the theater. Prunella and me went one day up a whole string of steps, so long that I thought 'twasn't no end to them. She called the place the peanut gallery. Well, I guess 'twas, but I can tell you I was scared almost stiff setting up next to them roofs. There I set, as near to Heaven as I'll ever get, I reckon, wondering what to do if the place caught afire or some other small accident. Presently I commenced wishing that I hadn't forgot to say my prayers the night before, but when you're in New York you know you don't know night time from daytime, and I had let prayers go by before I knew it. Just while all this was running through my head, the curtain went up.

Some show, Sue! Me and Prunella enjoyed it from the very minute it started to the thirteenth and last curtain call. You know, Sue, it was a little bit sad, and you couldn't help from crving with two men shot, three children dying and the heroing committing suicide, could you? We cried the whole time, and oh, it was grand!

After the show we walked through Central Park. I wish to goodness you could see how the boys flirt there nowadays. Why the fellows home who flirt are sort of shabby looking, but these was real nifty looking guys. One of them was dressed right up to the minute, you know, in a three-button coat that fit him like your last summer's evening dress fitted me when we went to Cousin Marie's ball. But what I started to say was that I couldn't pay any attention to him, because as you know, that old saying, "A bird in hand is worth two in the bush," comes sorter home to me, and when I thought about John, I recollected that I hadn't learnt it for nothing. I just felt like that being as I have John at home, he's worth two of them Charlie Chaplin looking objects in Central Park when you don't know whether they got train fare to come to see you or not.

Well, Sue, that trip ended my vacation, and here I am now, working like I know the definition of being born on Saturday. Please write to me soon.

Your loving friend,

*Kitty*

P. S. Don't forget what I said about the Baltimore and Ohio, Sue. It's got the best service in the world, the politest conductors, the nicest riding trains, and the shiniest faced waiters on their dining cars that you ever saw.

## Fashion Notes and Rhubarb Pie

By *Marie Slatterick*

Division Engineer's Office, Wheeling, W. Va.

### Hosiery and Brogues

**H**AVE you girls seen the latest thing in hosiery? Some call it "nude" and others call it camel. Really, from a distance you might think that one of these sweet young things is walking around in sandals and "birthday hose." But they're good looking anyway, and they're wearing with them those lovely brogues of kid and calk; and the kid matches the hose, you know. You can poke all the fun you want, but these certainly are dressy, and inasmuch as sports clothes are going to be popular this season, a pair of brogues should be added to Milady's wardrobe without delay. Oh, yes, one of the nice things about them is that they're not expensive.

### A Garden Hat that You Will Like to Wear with Your Light Summer Dresses

As garden hats are all the "go" this summer, here is an excellent opportunity to put your last year's (or the year's before) big hat in use. If you do have a big hat somewhere, even if it is a year or two old, get it out and clean it. If it is straw give it a coat or two of "Colorite" or some other good hat dye. For a limited amount of money you can buy all sorts of pretty flowers and fruits of all colors and shapes. Then get two yards of ribbon about an inch wide and preferably the color of your hat; or you can use some contrasting shade, like red on a black hat, or black on a white hat and many other clever combinations. Cut your ribbon in three lengths, 24 inches each

length, and lay each over the crown of the hat, putting one in the middle and the other two at angles, thus making them meet on the top of the crown, leaving about three inches on the brim of each length of ribbon on each side of the hat. In other words, you'll have six ends of ribbon on the brim of the hat. Tack the ribbon down here and there with silk thread the color of your ribbon. Then put your flowers and fruit around the crown, spreading them out—or, if you have oodles of them make the wreath thick, and behold! you have your garden hat! For a lining get handkerchief linen, which wears very well, and baste one side along the inside of the crown, then gather the other side, make a drawstring and tie. This style is very good and most everyone can wear a big hat. Just think how well it will go with your new Swiss organdy!

### "To Bob or Not to Bob"

*A bit of feminine history, dug up from the dark ages and dedicated to the bobbed-haired damsels at Pier 22, North River, New York*

By John Newman, Terminal Timekeeper

*Did ye ever see such a crop  
Such as this—(it's like the mop  
That the ladies wear in Fiji  
And in Greenwich Village)—did ye?*

*Barber got some of their hair  
For some hairless dame to wear.  
"Tresses" lost, yet small's the pity  
For without them, too, they're pretty.*

*And observe, please, that immense  
"Dingus" swinging in suspense  
From a point where once the dears  
Used to wear their conk-pink ears.*

TO "bob" or not to "bob," that is the question (begging the pardon of the person who discovered the difference between "to be" and "not to be"). The accompanying drawing, a composite portrait of Misses Goldberg and Kirschenbaum sketched from life, answers the question with "yes," "no," or "maybe," just as you like it. However, "tresses" gone, poets will have to abandon the rhyme "caresses" and look up something to fit "nimbus" or "halo." But, you should worry about the troubles of the poets. The telegram blank says: "Be brief," meaning, "cut it short." As long as that's the style, make the most of it. It is not new anyhow; nothing that you do is new. The English Parliament in the reign of Charles II, in the year 1670 passed the following act:

"That all women, of whatever age or rank, whether virgins, maids or widows, that shall, from and after the passing of this act, impose upon and betray into matrimony any of his Majesty's male subjects, by scents, paints, cosmetics, washes, artificial teeth, false hair, Spanish wool, iron stays, hoops, high-heeled shoes or bolstered hips, shall

### Rhubarb Pie

This is the season of the year when one's palate longs and longs for something not too sweet and not too sour. In other words, you want RHUBARB PIE. Nothing can compare with that delicious, tart, flavor. And if you will make it like Mrs. A. J. Penrod, wife of signal supervisor, Wheeling Division, told me to make it, you will find you haven't made enough and will have to make some more. She told me not to wash the rhubarb but simply to clean it off with a damp cloth and then to cut it in half-inch pieces. After you have put the bottom crust in the pan, put a good handful of flour and lots of sugar in. Then fill in the rhubarb and put more sugar, lots of it, on top of the rhubarb. Then put on your top crust and bake. That's a pie that's worth while waiting for! And it's not expensive either. You can buy four bunches of rhubarb for thirty cents, and this makes two pies. Of course, it's a matter of taste as to how rich to make your crust.

COMPOSITE PICTURE of TWO "BOBS".

incur the penalty of the laws now in force against witchcraft, sorcery and such like misdemeanors, and that the marriage, upon conviction, shall stand null and void."

So there you are, Fashions, like comets, travel in eccentric orbits and come again, sooner or later. So let the fashions change, —girls will always remain fascinating, in spite of the railings of reformers with defective olfactory nerves, to whom a rose with any name would smell—punk.

### Custard Pie

Contributed by Joseph L. Press

Chef to President Willard

Whip light the yolks of three eggs with four tablespoons of sugar. Pour upon them two cups of boiling milk, stirring this in slowly. Flavor with a teaspoon of vanilla. Line a pie plate with paste, brush the inside with the white of an egg, pour in the custard, and bake for 30 minutes.

### My Trip to St. Louis

By Lillian Reay

Daughter of Harry Reay, Composer,  
Baltimore and Ohio Print Shop,  
Baltimore, Md.

LAST Summer my mother and I took a trip to St. Louis. We left Baltimore on the 3.10 p. m. train on the Baltimore and Ohio. In a few hours we were in Cumberland, Maryland. After we left Cumberland we saw many mountains, some of which were so high that we could hardly see the tops of them.

We were in Pullman No. 1, and we had the nicest old porter; why, he was just grand. On the next morning, which was Sunday, we went into the dining car and had the nicest breakfast.

When we crossed the Ohio River, the scenery was just beautiful, although all of the scenery was wonderful. We arrived in St. Louis at 6.45 in the evening. The station there is one of the largest in the world. It has 32 tracks and gates. The lady whom we were visiting met us and took us to her home. We saw many things on the way.

On the next day we went sight-seeing, taking in Shaw's Garden. Here there are many plants obtained from many different parts of the world. Among them are palms, ferns, spices, fruit trees and a rose garden. In this garden there are about 11,000 plants, of which about 5,000 are distributed in outdoor collections; the remaining plants are inside of the different houses. This garden in all consists of 125 acres.

Shaw's garden was opened to the public by Mr. Henry Shaw in 1860.

We went later to Highland's Park, where the World's Fair was held in 1904. The "Alps," or racer dip, is the only thing that is left from the Fair.

We stayed for a few more days in St. Louis. On our way home we stopped over in Cincinnati.

The Baltimore and Ohio surely does give good service.

### Springtime Cheer

By A. B. McCoy, Operator,  
Taggarts Junction, W. Va.

SPRING comes with all its loveliness and the renewal of life is shown by the wonderful growth of every living creature. The grass springs up, the flowers bud and bloom and the trees in the forests put on their shady green coats of leaves; everywhere we look Spring is leaping forth, arrayed like a king in his majesty.

The honeysuckle puts out its petals to make merry the woodland paths, and intoxicates with its perfume. Could we live with Nature during the months of Springtime what vigor would be ours from the sweetness of flowers, trees and sunshine!

Were it possible, no doubt we would always want Spring, and when we think of the One Who is above all, and Who makes it possible for us to enjoy Spring, it is then we say, as did the apostle, "He doeth all things well."

## Of Indescribable Loveliness Are These Frocks

By Maude Hall

THE glory of the incoming season's cottons is their variety and novelty pattern. Women who do their own sewing are eagerly making selections from the designs so richly displayed upon the counters of smart shops, where many of the inexpensive voiles and other summery materials are to be found.

Beauty of color and grace of line are featured in silk mixture and tissue voiles which sell around fifty cents a yard. At this figure also it is possible to obtain imported English prints. Organdies of good quality begin at about seventy-five cents a yard, then go up, and up and up—the hand-embroidered effects costing as much as many of the loveliest silks. Dotted swiss, another material to be given great prominence during the summer is similarly priced as organdy.

Decidedly French, which means decidedly pleasing, is a frock of lemon color voile figured in Blue Boy blue. Combined with the voile is dainty blue organdy, which forms the underblouse. At the sides of the dress there are shirrings which extend only across the hips. There are also deep V-shaped neck and very large armholes. The sleeves of the blouse are open down the center almost from shoulder to wrist. They are also flowing and are trimmed with crochet buttons in the same shade as the organdy.

Some of the smartest of the new frocks are in combination of several fabrics. There is a one-piece model in periwinkle blue indestructible voile, satin and lace. The lace, mounted upon the satin, forms panels at the sides of the skirt and on the collar. Skirt and blouse are of the very fine voile, and there is a girdle of satin ribbon fastening at the front under a mosaic formed of hundreds of little buttons. A gilet of self-material fills in the front, cut in V-shape and rolled back to form revers.

Gingham is found in frocks with hip-length blouses to which are attached skirts of gingham and organdy, or gingham and

chambray. The jointure is so cleverly effected, though, that there is never other than the appearance of a one-piece dress.

A dainty little dimity in rather deep lavender tone is figure 1 with oblong designs outlined with hemstitching. The upper part of the skirt, corresponding with the underblouse, is of lavender mull, while the bodice casts its fortunes with the skirt proper. Muslin is used for the neck band and cuffs, but the girdle turns to faille silk and subtle expression and ends its career in bows at either side of the waist.

The knit silks and knit crepes respond to their popularity in a variety of soft color tones, and one-piece sports frocks of quiet tone are frequently brightened with the gayest of wool scarfs.

### Senior and Junior Smartness

Milady wears a charming frock of dark blue krep-knit stitched with bands of tan silk braid. It features the large armholes, long, flowing sleeves and lengthened waistline, not to mention the uneven hem. This soft, picturesque model lends itself to development in all of the smart fabrics of the season, 5 yards 36 inches wide being required. Her youthful companion disports a figured pongee frock, brown and green figures being scattered over a tan surface. The neck and neck band are of green gros-grain ribbon. Medium size requires 2 $\frac{3}{4}$  yards 36-inch material.

First Model: Pictorial Review DRESS No. 9927. Sizes, 34 to 44 inches bust. Price, 35 cents.

Second Model: DRESS No. 9819. Sizes, 6 to 14 years. Price, 35 cents.

### Picturesquely Draped

The season offers so many lovely braids and ribbons for trimming the fashionable fabrics that one must employ them where they will show to the best advantage. In combining plain crepe with satin figure 1 foulard, as in this model, a blue and gold braid asserts the place of prominence on foundation skirt and flowing sleeves, while the foulard contents itself with picturesque drapery. Medium size requires 2 $\frac{3}{4}$  yards of each material, 40 inches wide.

Pictorial Review DRESS No. 9927. Sizes, 34 to 44 inches bust. Price, 35 cents.

### The Incomparable Tailleur

This tailleur of daring simplicity comes forth to greet the new season in midnight blue kasha cloth. For the trimming, very narrow gilt braid is selected, but there is no other contrasting note, the buttons even being of dark blue braid. A very narrow belt defines the waist-line and there are box plaits at the side seams, which give a wider effect to the skirt. Distinctive are the large armholes and wide sleeves. Medium size requires 3 $\frac{1}{2}$  yards 54-inch material.

Pictorial Review DRESS No. 9955. Sizes, 34 to 44 inches bust. Price, 35 cents.

### For Sports Wear

This design serves the double purpose of a morning frock and a sports costume. It consists of a two-piece jumper skirt of check tweed and a simple blouse of knit silk. If preferred, the sleeves of the blouse may be worn short, with a slight flare below the elbows. Medium size requires 3 yards 48-inch material for the jumper skirt and 2 $\frac{1}{4}$  yards 36-inch silk for the blouse.

Pictorial Review BLOUSE No. 9646. Sizes, 34 to 50 inches bust. Price 30 cents.

JUMPER SKIRT No. 9763. Sizes, 24 to 36 inches bust. Price, 35 cents.

## Lesson in Home Dressmaking

One Piece, Slip-On Dress with Open Neck and Large Armholes, for Day-time or General Wear

JUMPER SKIRT NO. 9763. Sizes, 24 to 36 inches bust. Price, 35 cents.

### A Fellow's Mother

"A fellow's mother," said Fred the wise,  
 With his rosy cheeks and merry blue eyes,  
 "Knows what to do if a fellow gets hurt  
 By a thump or bruise, or a fall in the dirt.  
 A fellow's mother has bags and strings,  
 Rags and buttons and lots of things;  
 No matter how busy she is, she'll stop  
 To see how well you can spin your top.  
 She does not care—not much, I mean,  
 If a fellow's face is not quite clean;  
 And if your trousers are torn at the knee  
 She can put in a patch you'd never see!  
 A fellow's mother is never mad,  
 And only sorry, if you are bad;  
 And I'll tell you this, if you are only true,  
 She'll always forgive you, whatever you do.  
 A fellow's mean who would never try  
 To keep the tear from her loving eye,  
 And the fellow's worse who sees is not  
 That his mother's the truest friend he's got."

—Margaret E. Sangsler,  
 from "Glorious Mother."

**I**F PREFERRED, two different materials may be used to fashion this one-piece slip-on dress. The long-waisted blouse with oval-shaped neck is slashed and closed at the center-front. The one-piece sleeves are gathered into narrow bands of self-material. Elastic is inserted through a casing which is adjusted underneath the lower edge of the blouse and it holds the blouse and dress in closely to the figure. If made of contrasting materials, the dress requires 1 3/4 yard 40 inches wide, and the dress, 3 1/8 yards 30 inches wide.

The fabric for both the dress and blouse must be folded exactly in half, as shown in the cutting guide. Along the lengthwise fold of the dress material, place sections "G" and "F" of the tissue, so that the front and back will have no seams. Along the lengthwise fold of the blouse materials, place the front and back, then lay the sleeve sections with large "O" perforations along a lengthwise thread. Indicate all notches and perforations to save trouble in making.

Then, take the blouse and slash through the fold at center-front of front section, from upper edges as far down as the small "o" perforation. Bind the slashed edges and finish for closing. Close underarm and shoulder seam as notched. Close seam sleeve as notched, leaving edges free below the large "O" perforation and finish for closing. Gather sleeve at lower edge and sew to sleeveband as notched. Lap to small "o" perforations and finish for closing. Sew in armhole of blouse as notched, with small "o" perforations at shoulder seam, bringing seam of sleeve to underarm seam. Ease in any fullness between the notches. Hold the sleeve toward you when basting it in the armhole.

Take the dress next, and close underarm and shoulder seams as notched. For

9901

### New Version of Jumper Dress

trimming use bands of material, braid or ribbon one inch wide. Trim neck edges with the bands, extending the back band along the line of three small "o" perforations in front section at shoulder. Stitch bands to position around armhole and bring back edge of band, which is stitched to the back of the dress, along the lines of single small "o" perforations in front and back sections. Mitre the band at the corners and ease in any fullness. Slip the band around the armhole underneath the neck band. A band also may be added to the lower edge of the skirt, if desired. Arrange dress on blouse with corresponding seams and neck edges at back even. Bring cross-line of double small "oo" perforations (below the waist-line) to lower edge of blouse. Stitch along line of perforations. Arrange on an inch-wide casing on the inside of garment, stitching upper edge of casing along lower edge of blouse and stitch lower edge to the dress. Insert elastic through the casing to regulate the fullness. The belt may be arranged in any way desired or a novelty girdle may be used.

Pictorial Review DRESS NO. 9901. Sizes, 16 to 20 years and 34 to 44 inches bust. Price, 35 cents.

## As Staunch As the Hills and As True As Steel are the People of Pittsburgh

By Helen May Leslie, 11 year old daughter of fireman, Pittsburgh, Pa.

Second Prize, Class A

**P**ITTSBURGH has long been world famous, and has been justly denominated, "Pittsburgh, the Powerful."

In the latest census of Pittsburgh, a population of 584,605 is given, ranking Pittsburgh as eighth in population and fifth in commercial and industrial importance among the cities of the United States. According to estimates, Pittsburgh is gaining on Baltimore.

The government of Pittsburgh is operated by a charter, granted by the Commonwealth of Pennsylvania. This charter defines the power of a city and its officials. The mayor is the chief executive, and a salaried council of nine members. The mayor now is William Magee. Mr. Magee served once before, beginning the year of 1914.

Pittsburgh is a historic city and had much to do with the wars of the French and Indians, and the Revolutionary, and the War of 1812. The fame of Pittsburgh is due to manufactures, it is well remembered in the history of the United States.

Traders in Indian goods came into the region of the Monongahela and Allegheny Rivers—later known as the "Forks of the Ohio," as early as 1730, and in a few years the headquarters of the Ohio became the center of trading operations. The Indians thought that the Ohio and the Allegheny were the same stream, and called it Oyo. France and England often at war, claimed the region west of the Allegheny Mountains. On the side of the English, both Pennsylvania and Virginia claimed legal power. When the French surrendered Canada to the British in 1763, they received their right against that of the Iroquois to the Ohio country.

By virtue of the discovery of La Salle and the French resorting to it when no other Indians occupied it but the French Allies (the Shawnees) with whom the Iroquois were at war, but the Iroquois were finally victorious. The Iroquois claimed dominion by reason of this conquest, and the English claimed the country as having been ceded to them by the Iroquois at the treaty of Lancaster, Pa., in 1744. It is to be noted that the French never made any attempt at settlement on the Ohio as they did further West.

Pittsburgh consists of four parts—the Old City (which includes the East End District and comprises all of the territory between the Monongahela and Allegheny Rivers), a triangle section, beginning at the confluence of the two rivers where they form the Ohio, gradually widening. This is usually known as the "Point." The North Side, the former city of Allegheny, annexed to Pittsburgh in 1907, includes the territory between the Ohio and Allegheny Rivers. South Side—includes all of the territory south of the Monongahela and Ohio Rivers. That part below the point bridge is generally referred to as West End. The Old City Section—Peninsular Pittsburgh, as some call it—contains the main business district, except a street or two on the north Side.

The principal railroad stations are downtown and are almost in a line. The most prominent of these are: Baltimore and Ohio, Pennsylvania, and Pittsburgh and Lake Erie Railroads. There are also others of less importance. The Baltimore and Ohio Station is at Smithfield and Water Streets, which are two of the most prominent streets in Pittsburgh. The station stands by the Monongahela River at the end of Smithfield St. Bridge, and is a very artistic station. It is one of the most beautiful in Pittsburgh. The Pennsylvania has also a fine station.

There are many places of amusement in Pittsburgh. Some of these are: Forbes Fields, Ball Ground, Schenley Park, Carnegie Library and Museum, and Schenley Oval and Race Track. The amusement places are near Schenley Hotel. Other places of interest are: Memorial Halls, University of Pittsburgh, Masonic Temple, Syria Mosque, Nobles of the Mystic Shrine, Pittsburgh Athletic Club.

There are many large and magnificent hotels in Pittsburgh. Some of these are: William Penn Hotel—having 1000 rooms, each with bath—Fort Pitt, with 700 rooms; Hotel Schenley, Henry Hotel, Duquesne Hotel, Lincoln Hotel, Anderson Hotel, Colonial Hotel, and Seventh Avenue Hotel. There are also many smaller ones.

There are many beautiful buildings in Pittsburgh: The City-County Building, on

Grant Street; The Allegheny County Courthouse; Memorial Hall is another beautiful building. The Federal Building, or Post Office, lies on Smithfield Street. The most beautiful building is Carnegie Library and Museum. This is the most magnificent building in Pittsburgh.

Pittsburgh is noted for its universities and schools of technology, theological seminaries, and public schools. The University of Pittsburgh is a very fine University, and is one of the best in all of the states. Tech is also a very large school. There are also many smaller schools in our town.

There are many parks in Pittsburgh, such as Kennywood Park, West View Park, Schenley Park, Hiland Park, Allegheny Park, and Riverside Park.

Trinity Protestant Church lies in the business section of downtown. It is a very large and wealthy church. There are also other fine churches throughout the city of Pittsburgh. Trinity is often called a Gem inset in the heart of Pittsburgh.

Our town has many large stores, such as Joseph Horne Company, Boggs & Buhl, Kaufmann, Kaufmann and Baers; Rosenbaums, Cambells, McCreery's, and Frank and Sedar.

Pittsburgh is also well supplied with hospitals. Some of the best known are: Homeopathic, Mercy, West Penn, Allegheny General, and the Elizabeth Steel Magee Hospital.

Pittsburgh's axiom is "Her Rocks and Rills and Templed Hills." Her mighty people are staunch like the hills and true like steel.

WHAT CAN LITTLE GIRLS  
AND BOYS DO TO KEEP  
FROM GETTING HURT?

WRITE TO AUNT MARY AND  
TELL HER WHAT YOU CAN DO.

COLUMBUS' FLAGSHIP  
 Drawn by Harley H. Kight, Jr., Keyser, W. Va.

### The Sailor

By Freda Brown Michaels, Somerset, Pa.

A sailor's life is the best for me,  
 A sailor on the deep, blue sea,  
 Living on the boundless deep,  
 Keeping watch while others sleep.  
 One vast plain of white-capped blue  
 On which there rides a sailor true,  
 Seeing strange sights in fairer lands,  
 Lightly touching the foreign strands.  
 Oh, we're sailing many a weary mile,  
 But we face our lot with a jolly smile,  
 We laugh at the haughty storms we meet,  
 For King Sun still sits in his lofty seat.  
 Sometimes there spirit forms are seen,  
 Seeking jewels for the pirates' queen.  
 Oh, I'm always glad to reach the shore,  
 But I wish to travel all the more.

### Dear Girls and Boys:

One morning in winter when I was a little girl, I walked past the blacksmith shop on my way to school. The snow lay several inches deep on the ground, and a hard crust had formed on top. Just as I stepped over in the path to let a sleigh go by, my shoestring came untied. I took off my woolen gloves, laid down my books, and started to tie my shoe, when sticking right out of the snow was something black. I kicked it out. What do you suppose it was? A real pocketbook. I opened it quickly. There lay two two-dollar bills and one one-dollar bill—five dollars in all.

I held the money and the pocketbook tightly in my hand and ran all the way to school with it. There I told my teacher. She advised me to keep it until I heard who had lost it. She asked all of the girls and boys, but none of them knew of anybody who had lost a purse. Miss Maude, my teacher, kept it until the end of the week. Then she told me that the money was all mine.

Joyfully I ran home with my treasure, thinking of all the things that the money would buy. Just think, it would buy five hundred sticks of the red and white peppermint candy—my favorite kind—and I would have enough to last for a year if I ate a little more than one stick each day! I didn't think of how a peppermint diet might affect my tummy.

On reaching home, however, my mother talked to me so that I changed my mind. "You always have candy when you need it," she said. "Let me tell you of something much nicer. You shall go to town with me on Saturday and talk to the man at the bank. He will tell you how money grows if you leave it with him. You may then put your money into the bank and watch it grow and grow, and if you will save up all of your pennies and nickels and dimes, it will grow all the faster."

I had never heard about that, but on Saturday when we went to the Farmer's National, the big man at the window that says "RECEIVING TELLER" told me all about it. He said that in another year my five dollars would grow to five dollars and twenty-five cents, and that if I added more money to it during the year, that would grow, too. Then he opened up for me what he called a *bank account*. When I left my money with him he called that a *deposit* of five dollars. That was the first money

Drawn by Elsie Elizabeth Glanzer, Jessup, Md.

that I ever saved. My, but I was proud of it!

Mother bought me a little bank in which to save the small coins, and whenever it became full, I deposited them.

Years afterward, when I wanted to go away to school, that first five dollars, together with the money that I had deposited afterward, had grown so large that it helped me wonderfully in getting the thing that I wished for most in all the world—an education.

You, too, can have a bank account, if you haven't one already. If you have, I would like so much for you to tell me about it. If I can tell you anything about saving your pennies that will help you, just write to me and I'll be glad to answer. All "bank letters" will be published on our Children's Page.

Yours lovingly,

Address:

*Aunt Mary*

### You'd Better Mind Your Mother

By Lucille Lavigne  
 McMechen, W. Va.

THIS is a fairy tale. Once upon a time there was a little girl who wouldn't mind her mother. Her mother was very poor and grew poorer every day, and the little girl would do nothing to help her. At last the mother had nothing at all to eat. So she told the girl that she must either kill her or sell her before she died of starvation.

The little girl cried very hard. When the mother heard her crying she put the little girl to bed. Then the mother went into the forest in search of food and never came back.

When the little girl awoke, she thought of how naughty she had been. So she went to work and swept the floor and cleaned the whole house.

That evening an old man came to the door and asked for food. She asked him to come in. She gave him his supper, then sat down and told the old man the story of her life. He told her that he remembered her father and mother and that her mother was at his own home. Then he gave the little girl some money and took her home with him. They lived happily ever after.

### Emma's Little Chickens

By Elsie Elizabeth Glanzer  
 Jessup, Md.

LITTLE Emma lived 'way out in the country. She lived on a large farm with her parents. Her father raised chickens.

One day her father showed her an old cluck with little peeps. Emma said, "Father, may I tend to these peeps? Please, Father, dear."

"Yes, my daughter," replied her father, "you may, if you can."

Emma was so pleased that she ran and told her mother. "I shall water them and feed them and close them up in their coop at night," she said, "and in the morning I shall give them clear water and see that the rats do not get them."

So she tended her chickens until they grew to be hens. When the hens began to lay, her father gave her six of them for looking after them so nicely. These six

## Stewards Warde and Cook

*Service Superior to Any Other*  
BALTIMORE AND OHIO RAILROAD CHICAGO-  
WASHINGTON SERVICE

October 19, 1921

E. V. BAUGH  
Superintendent Dining Car Department  
Baltimore and Ohio Railroad  
Baltimore, Md.

Sir—I desire to compliment you and your Road on your general service. More especially I wish to express my thanks for the many courtesies extended me by your stewards, Mr. J. S. Warde and Mr. John Cook. I traveled over 60,000 miles last year and over nearly all U. S. railroads, but the service shown me and my clients on the Baltimore and Ohio is superior to any other.

Mr. Warde is an exceptional steward—his meals are splendid and his personal interest a source of delight.

Mr. Cook is ever ready to accommodate your travelers. May these men continue with you to enhance your growing reputation.

Sincerely yours,

(Signed) H. ARCHIBALD HARRIS,  
Care of Archibald Harris and Co., Certified  
Public Accountants, Chicago.

## Yard Clerk L. W. Dwyer, South Chicago, a Minute Man

THE following letter, written by Stuart A. Allen, freight traffic manager at Chicago, with copies to four of the officers of the Traffic Department, is self explanatory:

Chicago, Ill.

December 14, 1921

Mr. R. R. Huggins (So. Chicago)  
Mr. Maurice Altherr (So. Chicago)

I am sure you will be very much gratified to note the following from G. T. M. Blair,

of Wilson & Co., packers, just received:

"I want to confirm what I stated to you regarding the courtesy and intelligent attention given me by Mr. L. W. Dwyer, one of your yard clerks. I called up your office at South Chicago about 2.30 this morning, and the telephone was answered by Mr. Dwyer, who said he was the yard clerk. I told him I was trying to get in touch with your Trainmaster's Office, as we desired to have all of our New York livestock shipments held at Baltimore or Philadelphia; the former, if possible.

"Mr. Dwyer informed me he would take the matter up with your operator at Wolf Lake, and in about one-half hour telephoned back that the operator had reached their Train Dispatcher's Office at Garrett, Ind., who in turn had wired our request to Baltimore. I was informed about 5.30 by one of Mr. Huggins' assistants that two of the trains had departed from Philadelphia prior to advice, but this was no fault of your company, as very prompt action was taken through the activity of Mr. Dwyer and others, which I assure you was more than appreciated. It occurred to me your people would be interested in knowing that their employes were so anxious to give service in an emergency of this kind, and as stated to you, I would like to know more about Mr. Dwyer."

Mr. Blair called me up yesterday to express personally his thanks and appreciation of the courtesy, quick and intelligent action taken by Mr. Dwyer in response to his telephone call 2.30 Monday morning, urging him to assist him in getting through the wire in question.

I also want to add my own thanks and appreciation of Mr. Dwyer's action. It's such courtesy and attention as this on the part of our employes that's giving the Baltimore and Ohio the reputation as being the "Road of Courtesy" and the "Road of

Service." In this connection, I might also add that we are receiving from all of our Operating associates in the Chicago District, both on the Baltimore and Ohio and Baltimore and Ohio C. T., the closest and kindest co-operation, and we have them to thank for many cars of eastbound freight which might be lost to us except for their watchfulness and kindly spirit of co-operation and desire to help the Company.

(Signed) STUART A. ALLEN

## Steward Payne is a Credit to the Railroad

LAW OFFICES  
BAKER, HOLDER & SCHMIDT  
CHICAGO

March 14, 1921

MR. E. V. BAUGH,  
Superintendent Dining Car Service,  
Baltimore and Ohio Railroad,  
Baltimore, Maryland.

Dear Sir—Recently while enroute from Chicago to Washington I carelessly left my pocket book in the diner. It was found and returned to me by Mr. Payne, in charge of the car, after considerable trouble on his part.

Mr. Payne refused to accept any reward for the return of the purse, so I asked for your name and address, in order that I might express to you my appreciation of the courtesy extended to me by the Baltimore and Ohio through its employe, Mr. Payne.

Yours very truly,

L. W. HOLDER

## Nothing Too Good for the Baltimore and Ohio

By J. W. MALONE  
Supervisor, Baltimore Division

WHILE at Aberdeen recently I overheard a conversation between the agent, N. Correll, and a Mr. Arthur Triquet, a passenger who had just arrived

Girl Scout Troops from the Oranges and vicinity, in New Jersey, on their tour, New York to Washington,

# of "Courtesy" on the Baltimore and Ohio

from Monroe, Michigan, and it seemed to me to be so worth while that I want to pass it on to the readers of the MAGAZINE.

Mr. Triquet came to the agent to get him to arrange for his tickets back to Monroe, for he said that he had received such kind treatment and such good service on the Baltimore and Ohio that he would not think of going back any other way.

Thereupon I asked Mr. Triquet if he would object to my reporting his pleasant experience to our Magazine and he replied that he would be glad to have me do so if it would help other people to an appreciation of the kind of service that is given patrons of our road. He also said that he was in a business which called for the shipment of some freight and that he was going to see if he could not arrange to have a part of it, at least, routed over the Baltimore and Ohio.

## J. J. Bayer

### His Service Brought New Business

W. R. OLIVER, 136 Front Street  
NEW YORK, October 28, 1921  
Baltimore and Ohio Railroad  
295 Broadway, New York

ATTENTION MR. RICHARDSON  
Gentlemen:

I have been shipping a good many mixed cars from Pier 22 of your line, the last year; and I take this opportunity to compliment you on the men you have in charge of that pier. They have all made it very pleasant for me to do business with you, and I have bothered and worried your Mr. J. J. Bayer at that pier a great deal. He has done everything I have asked him very cheerfully, in fact, I think some times more than he is required to do. And to show my appreciation of his services, I am going to route in future, sugars via your line to Charleston.

I would be glad if you would let some of the head officials of your company see this letter, as Mr. Bayer deserves the little praise I am giving him, as do the rest of your force at that pier. I must not forget your foreman in this letter, who is also very clever to me at all times.

Yours very truly,  
(Signed) W. R. OLIVER,  
For Lewis Hubbard & Co., of Charleston,  
W. Va.

## Train Porter Chase

GRAFTON, W. VA., Nov. 10, 1921  
Editor, Baltimore and Ohio Magazine  
Baltimore, Md.

Dear Sir—On October 31, while riding on train No. 4 between Parkersburg and Clarksburg, W. Va., I noticed an example of the courtesy and consideration of employes of the Baltimore and Ohio in train service, and I bring the matter to your attention for favorable mention in the MAGAZINE:

A poorly dressed and crippled mother with four small, crying children, one a baby in arms, was leaving train at Clarksburg, and upon arrival at that station, Train Porter R. A. Chase went to this woman, picked up her two bulging suit cases and carried them from train. He then lifted the three children from steps to platform, and when the almost helpless mother started to alight, took the baby from her arms and gently assisted her to platform. After the other passengers were aided in leaving and entering train he carried the suit cases to station where the woman and her quartette of little ones were waiting.

This act of kindness impressed me very much and I feel that it should not go unnoted.

Yours very truly,  
(Signed) Miss \_\_\_\_\_  
Accounting Department Employee.

## "The Best Dinner"

STEWARD D. F. MORRIS was in charge of the car mentioned in the following letter—and let nobody think that the steward, his welcoming smile, attention to details and cleanliness, supervision of crew and diplomacy, is an inconsiderable item in a good meal:

TRAIN 9, BALTIMORE & OHIO  
October 4, 1921

Dear Mr. Baugh—I have just partaken of the best dinner I have ever eaten on any railroad in this country; and I have eaten on nearly every one of their dining cars. I don't know how you serve such a splendid meal for \$1.25, but it is a credit to you and your Road. The service is fine and your steward is courtesy itself. I write this without any solicitation, and simply because I feel you are to be congratulated upon having the best I have yet found in dining car service.

I shall use the Baltimore and Ohio as often as I can,

Yours,  
(Signed) J. M. SOMERNEIKE  
Superintendent of Missions,  
Presbyterian Board of Publication,  
Philadelphia, Pa.

## Rothschild's Golden Rules

The following maxims were found in the desk of Baron Rothschild, the banker, shortly after his death, in 1836, says London *Tit-Bits*:

- Carefully examine every detail of your business.
- Be prompt in everything.
- Take time to consider but decide promptly.
- Dare to go forward.
- Bear trouble patiently.
- Be brave in the struggle of life.
- Never tell business lies.
- Make no useless acquaintance.
- Never appear something more than you are.
- Pay your debt promptly.
- Shun strong liquor.
- Employ your time well.
- Do not reckon upon chance.
- Never be discouraged.
- Be polite to everybody.

April 20, 1922. The picture was taken at Mt. Vernon, the home of General Washington

## The Death of Charles Rollin Emery

**C**HARLES ROLLIN EMERY, second son of the late Dr. Andrew Barton and Julia Ann Weller Emery, was born on April 17, 1850, at Knightstown, Henry County, Indiana. He departed this life on April 23, after an illness of two weeks.

At an early age he removed with his parents to their former home at Loveland, Ohio, where he spent his early childhood and grew to manhood.

His first railroad experience was as a newsboy on the Marietta Railroad between Parkersburg, West Virginia and Cincinnati, Ohio. Later he served as a brakeman on the same road for several years. He then went to Illinois where he remained for about a year.

On December 24, 1872 he came to Seymour, Indiana, to visit with friends. On the following day he began work as a fireman on the Ohio and Mississippi Railroad, now a part of the Baltimore and Ohio. On November 22, 1878 he was promoted to the position of engineer and held this position continuously until his retirement from active service in July, 1914.

On June 20, 1880, he was united in marriage to Cornelia E. Walker, formerly of Hampton, Tennessee. They immediately came to their newly furnished home on West Tipton St., Seymour, where they spent their entire wedded life.

During the fifty years of his residence in this city he made many acquaintances and many friends and saw many changes in the railroad and business life of the community.

He was affiliated with Jackson Lodge No. 146 F. A. M. and the Brotherhood of Locomotive Engineers, in which organization he served as chief engineer for a period of more than thirteen years. With his retirement from active service he became a charter member of the Veterans' Association of the Baltimore and Ohio Railroad and served as a delegate to the First Convention of the Grand Lodge held at Baltimore, Md. in November, 1920.

He always took a keen interest in the welfare of the city and in the political issues of the day and served a term of four years as a councilman at large during the past administration.

He is survived by his widow, Mrs. C. R. Emery; two daughters, Ora Mae Emery, at home, and Mrs. Hattie A. Finke, and one

granddaughter, Dorothy Jean Finke. All are of Seymour, Indiana. These together with a host of friends, mourn his death.

Funeral services, held on April 27 at 2.30 p.m., from First Baptist Church, were conducted by the Rev. M. L. Banister, and were in charge of the local Masonic order. Interment took place in Riverview Cemetery.

Mr. Emery was always a kind, loving and devoted husband, and an indulgent father. In tribute to his dear memory we say, "Not our will but Thine be done."

## The Death of John C. Tudor

**J**OHAN C. TUDOR, a pensioner of the Company, well known through his connection with the Veterans' Association, died on March 29 of nephritis.

At the time of his death (and for some months previous) he had been handling the newspaper service in the corridors of the Baltimore and Ohio Building.

The late John C. Tudor

Mr. Tudor was born on August 23, 1848. He served the Baltimore and Ohio for 44 years, mostly as machinist, until he was retired on May 21, 1915.

During the World War he offered his services to the United States Government and was engaged in essential government work at Camp Holabird and at Aberdeen.

## Practical Welfare Work at Newark, Ohio

By B. A. Oatman

Newark Division Correspondent

**I**N LINE with the welfare work which is gaining headway all along the Baltimore and Ohio, the employes of the Company at Newark, Ohio, now receive assistance

from each other when away from home in their autos and find themselves in need of help. The plan as it now works is as follows:

Employes who are owners of automobiles are divided into groups of 15. Each member of the different groups is provided with a little book containing the name, address and 'phone number of each member of his group and the name of the owner's machine. When a member is out in the country and finds that he is out of gas, or has trouble of any kind and needs help, he opens his little book and telephones any member of his group. The member called is expected to start immediately with the assistance needed. In case the person called cannot go to his assistance, it is his duty to secure another member of the group and send him with aid. To join any of the groups it is only necessary to buy a tow line, which costs from \$1.50 to \$3.00.

This seems to be a good move toward genuine welfare work and we are placing this article in the MAGAZINE, thinking that it might be of use to the employes at other stations and on other divisions of the System.

## Paymaster Trounces Treasurer—at Baseball

The annual game of baseball between the forces of the Treasurer's and Pay Master's Offices, was played at Baltimore and Ohio oval on May 16. While only five innings were played, there were many good points to the game. The pitching of Miller batting of Carter, Henry, Wills, Haeffner, Hutchinson and Clark, and the catching of Gallagher and Hutchinson, all stood out. The score:

### Paymaster's Office

	AB	R	H	O	A	E
Fritzges, ss.....	2	1	0	0	1	0
Carter, 3b.....	2	2	2	2	0	0
Henry, 1b.....	1	0	1	1	0	1

## Pass It Along to the Passenger Department

If any of your friends or acquaintances are contemplating or planning a trip abroad, let the Passenger Department have the benefit of this information. They can use it to good advantage in encouraging exchange of business with various travel bureaus and agents of foreign steamship lines.

There is no easier medium of access for the passenger solicitor to an reciprocity. It affords him an entre to a field which might otherwise be difficult to approach.

# Safety Roll of Honor

## Staten Island

On the afternoon of April 27, H. C. Barry and Henry J. Goolie, while at Track Supervisor's Office, noticed flame coming out of Hose Cart House No. 2. They extinguished the fire before any great damage occurred. They are hereby thanked for their interest displayed in protecting Company's property.

## Baltimore Division

On April 2, Engine 1434, in hauling No. 68, broke the right main rod at Chester, Pa. Machinist J. L. Sentman and Clerk B. Goebner, Wilsmere, were riding this train. Mr. Sentman, with the assistance of Mr. Goebner disconnected the engine on the disabled side in about twenty minutes, so that the engine could bring the train to its destination. Messrs. Sentman and Goebner have been commended for their interest displayed in the movement of trains.

About 7.05 p. m., on April 8, Conductor W. E. Clarke, in charge of extra east engine 4449, while watching the running of train as it rounded curve east of Leslie, noticed fire flying near head end. He stopped the train by applying air on the eaboose. Examination developed cause of fire flying was due to a broken journal box on rear truck of Baltimore and Ohio 224266, 13th car in train. Car was then handled carefully and placed on siding without trailing.

On the morning of April 17, No. 94 (New York) was stopped on the Schuylkill River drawbridge to allow Third 98, which was ahead, to back into East Side Yard. Conductor Albert, who was on his way to work, discovered a bolt from a brake rigging wedged in a frog at Eastwick over which car in train was standing. He parted the air hose on the train, drawing the engineer's attention. The car was then backed off the frog and the bolt removed. The alertness

on the part of Conductor Hatfield averted a derailment of this train or some other train that would have passed over this frog.

When Operator C. E. Orndorff, "RG" Tower, Philadelphia, was going to work on April 21, he noticed considerable dry grass and paper scattered on the right-hand side of Bartram Park Bridge, West Philadelphia, on fire. Operator Orndorff put the fire out and removed the possibility of the bridge, which is of wood, catching fire.

On the morning of April 17, at East Side, Philadelphia, at 7.30 a. m., when No. 94 was standing on the draw bridge, Yard Conductor A. Hatfield and Engineer J. A. Staples, who were passing by on their way to work, discovered a bolt which had fallen from the brake rigging of one of the ears, and which was wedged fast in a frog just in front of the wheels of car C. & O. 9213.

Conductor Hatfield put the air on the train, then had the P. & R. engineer back up the train far enough to remove the bolt.

## Cumberland Division

About 8.35 p. m. on March 17, Mrs. Helen V. Cosner, wife of Trackman Randolph Cosner, living near Twenty-First Cut, a short distance East of Keyser, heard a noise which resembled rock falling. She awakened her husband, who had retired. He quickly dressed and hurried through the cut where he found a land slide blocking both main tracks. He quickly called Foreman David Clark and Trackman A. J. Lancaster. Mr. Clark sent Mr. Cosner west and Mr. Lancaster east to flag the approaching trains.

Mrs. Cosner's prompt action in calling her husband to investigate the noise she had heard, is highly commendable and fortunate, as train No. 1 was about due and her promptness in handling the situation enabled the train to be stopped before reaching the slide.

On April 14, as steel special Engine 4427 passed West Cumbo, Yard Brakeman J. L. Fultz noted broken tie bar on Baltimore and Ohio 228750. He informed operator at Cumbo and train was stopped at Martinsburg where car was set off for repairs.

While extra 7207 west was passing Newburg on April 19, Crew Dispatcher C. E. Childerson noted wheels sliding under fifth car from engine. He communicated with operator at Hardman, who informed the crew and had trouble corrected.

## Charleston Division

Conductor P. J. Condry has been commended for close inspection of his train. SAFETY FIRST!

The other day a ten year old boy came in and told the chief dispatcher that there was a slide blocking the track near Deanville, a mile or so away. His name was Bert Ferris, and the superintendent sent him a personal letter of thanks.

Relief Agent Davis has been commended for his activity in soliciting new business from friends and acquaintances.

Machinist C. D. Caruthers of Gassaway has been commended for close inspection of engines.

Mr. D. H. Cutright, Buekhannon, found a broken rail near Sago, and reported to the dispatcher by telephone. He has been thanked by the Superintendent.

Engineer J. C. Dougherty, Gassaway, has been commended for his activity in picking up and bringing in good material found on line.

Conductor Fansler has been commended for his interest in safety. Fireman E. W. Hall has also been commended for his interest in Safety work, on line of road. Agent M. T. Hutson, Bower, has been commended for noting and reporting brake rigging down.

Conductor Miles has been commended for his interest in conserving the Company's revenue.

Fireman J. W. Bailey has been especially commended for his interest in fuel conservation.

Mr. Rube Mathews has been thanked by the superintendent for reporting a large rock on the track near Halo.

Conductor Gunter has been commended for stopping and putting out a fire.

Agent F. R. Holt, Strange Creek, has been commended for his interest in the prompt movement of trains.

ON THE CUMBERLAND DIVISION HONOR ROLL

Left to right; Trackman A. J. Lancaster, Trackman and Mrs. Randolph Cosner, and Foreman J. David Clark

Agents Thomas, of Erbacon; Taylor, of Sutton, and Orrahood, of Flatwoods, have been commended for close interest in their work, and special attention paid to the conservation of the Company's revenue.

WESTON, W. VA.  
April 28, 1922

MR. JOSEPH GRANT  
Manager, Interstate Glass Plant  
Weston, W. Va.

Dear Sir—It has just been brought to my notice that on April 25, you were awakened about 5.00 a. m. by a noise on the Kitsonville Bridge of this Company. You took the trouble to get up and investigate, finding that a horse was fast in the bridge. You quickly advised our train dispatcher by telephone. We immediately arranged to get the horse up without injuring it. We had a light engine called to leave Weston at 5.45 a. m. and but for your timely warning, it is difficult to say what would have happened. In any event it is certain that the horse would have been killed.

I want to take this opportunity of expressing to you the sincere appreciation of the Railroad Company, and of the writer for your action in this case.

With kindest personal regards, I am,  
Very truly yours,  
(Signed) W. TRAPNELL,  
Superintendent

**Newark Division**

NEWARK, OHIO  
May 5, 1922

L. A. BOWMAN  
Operator BZ Tower  
Zanesville, Ohio

Dear Sir—It has come to my attention that on May 3, when No. 75 was pulling out of the siding at BZ Tower, you observed something wrong under train, took prompt action to notify flagman, and had the conductor notified through Zanesville office. A loose brake beam was found and removed before any accident occurred.

I want to thank you personally for your close observation and prompt action in this incident. The service rendered is fully appreciated.

Yours truly,  
(Signed) H. G. KRUSE,  
Superintendent

B. MULQUINN  
Operator  
North Siding, Ohio

Dear Sir—It has come to my attention when Train second 97 passed the tower on April 30, you discovered brake beam dragging under tank of engine and took prompt action to flag the train and have the beam removed before any damage resulted.

I beg to convey my personal appreciation as well as that of the Management for your vigilance and prompt action taken in this instance and to thank you for the service rendered.

Yours truly,  
(Signed) H. G. KRUSE,  
Superintendent

**Chicago Division**

On May 6, as Train 14 was passing LaPaz Junction, Operator E. A. Thornburg observed fire flying from under the train. He quickly called the coal chutes (one half mile eastward) and was fortunate to get the dock fireman, Charles Dame, who flagged the train. A serious defect was found and it was necessary to set off the express car at the coal chutes. No doubt the prompt action of Thornburg and Dame saved a derailment. The superintendent has written them suitable letters of commendation.

Agent Charles Middleton, Coburg, Ind., hearing an unusual noise as a westbound freight train was passing his office, rushed to the door in time to see heavy iron pipe falling from a car in the passing train. He succeeded in getting a stop signal to the rear of the train, which was stopped and proper attention given. Agent Middleton also notified the dispatcher so that protection could be arranged.

**Ohio Division**

At Washington Court House recently, Flagman E. R. Maple observed defective wheel on a car. He had train stopped. On examination it developed that fourteen inches was broken out in the base of the wheel. The vigilance displayed by Flagman Maple probably averted an accident.

**St. Louis Division**

As No. 97, Engine 2620, in charge of Conductor Reinhart, was passing Miami River Bridge at Lawrenceburg, Indiana, at 9.30 a. m. May 13, Patrolman E. L. Keith discovered smoke coming from a car in train. He signaled trainmen to stop, and they cut off C. N. E. 10701, which contained about \$10,000.00 worth of auto tires and auto accessories, for Fisk Rubber Co., St. Louis, Mo.

The car was fourth from engine and it was immediately taken to Lawrenceburg, Ind., where City Fire Department extinguished fire. The seals were removed from car by Patrolman Keith and he assisted the firemen in their work.

After checking it developed that approximately \$8,000.00 worth of tires had been saved. An investigation conducted revealed that one place in west end, and one on north side near west end, were burned. The roof was also burned from running board to eaves on north side for a distance of five feet from west end, on opposite side of running board a small hole was burned through roof. The side walls and car lining in west end were burned through.

On account of the mysterious manner in which fire was located in car, the origin was not determined, although an investigation was conducted by a Federal fire inspector.

Patrolman Keith has only been in the service a short time but has proved himself to be a good officer. He has been commended by division officers.

Machinist Bernard A. Day, Flora, Illinois, has been commended by Master Mechanic Herlihy for locating crack in main driving axle, engine 1418, while tightening left back and left forward eccentric on axle, on February 14.

On April 4, while a train was pulling by him at Flora, Conductor F. M. Dee noticed something wrong with brake beam rear end of mail car. He stopped train and found hanger on south side was broken and end of beam down over wheel.

On April 9, Lineman John Evans set his car off at Bridgeport Hill to let Extra 2670 pass. While watching train pull by he discovered wheel on Baltimore and Ohio 19474, fifth car from head end, pounding badly. On closer examination he found a part of flange of wheel gone. As the speed of the train was slow he boarded caboose and notified crew, who stopped train and on inspection discovered two feet and eight inches of flange broken out.

On May 3, as No. 80 was passing Delhi station, Operator Frank Vawter noticed brake beam dragging on Baltimore and Ohio 196400. Vawter ran out from the office, gave stop signal, and succeeded in getting train stopped.

**Toledo Division**

On the morning of April 13, Third Trick Operator Hammond, Kirkwood, as he was on his way home, discovered a broken rail and six inches of ball of rail gone. He went one mile farther north where sectionmen were working, notified them then proceeded to Piqua Crossing where he notified the train dispatcher.

DAYTON, OHIO  
April 25, 1922

T. J. GERIN—We learned through Supervisor Ledger that through your close observation and endeavor to protect the Company's interests, you discovered a bursted wheel on car P. G. X. 1061, Train #86, on April 18. The car was set off after you had notified the conductor of the condition.

It is certainly gratifying and pleasing to know that the employes in this department are making every effort possible to protect the Company's property and to prevent loss and damage to property as well as personal injury to fellow employees. I take this means of apprising you of how much your action in this respect is appreciated by the Company.

Yours truly,  
(Signed) R. E. CHAMBERLAIN,  
Division Engineer.

At 5.00 p. m. on April 17, while Extra 4048, south, was passing through Troy, Ohio, Conductor Charles Galvin, from the platform of his caboose, observed a car chain clogged between the points of switch leading to the Hayner Company Warehouse. He stopped his train, secured a hammer, went back to this main track switch (a northward facing point). He found that

## Among Ourselves

### Baltimore and Ohio and Baltimore and Ohio Annex Buildings

#### Law Department

Correspondent, GEORGE W. HAULENBECK

#### Our Passenger Department

I paid a visit to our Passenger Department on the fourth floor the other day. I am fond of that section of our service. Whenever I have the pleasure of taking the affidavit of W. B. Calloway, the head of the department I note his manner of expediting business. E. N. Thorn, the chief clerk, when he served as rate clerk, was often consulted by the Law Department and with much satisfaction and profit. One of the grandest pieces of work in the passenger service was accomplished by Miss Mabel T. Gesner in securing the consent of Lady Astor to accept Baltimore and Ohio service on her trip to Baltimore from New York. That was a real scoop, and I jumped up and down with delight when I heard of it. It shows what a woman can do when given an opportunity. Mr. McCarty and Mr. Lowes are part and parcel of the passenger department and have been for a long period.

#### An Aphorism

"A truth I've learned with passing years, significant, sublime; that all life's problems right themselves, if only given time."

#### "Thank you very much"

Why do we always say, "Thank you very much?" What is the "very much" for? To my notion it means nothing. In the good old fashioned days we always said, "thank you" and stopped there. It meant something. It was uttered with an earnestness, but now, in this new fashioned, silly and indiscreet era, we add this "very much" and it weakens it, besides being intensely ungrammatical.

Cervantes says, "It is the part of a wise man to keep himself today for tomorrow, and not to venture all his eggs in one basket."

#### Stephen F. Cadden

Stephen P. Cadden, our junior clerk, who made his advent in the Law Department on Friday, August 26, 1921, resigned on April 29. The Manufacturer's Finance Company, bankers, wanted a young man who was averse to watching the clock, and as Stephen fulfilled all the requisite requirements, he was accepted and appointed to a good position with that institution.

Stephen's successor, George Raymond Brennan, assumed his new duties on the first day of May. We are going to like

George. He has the modest requirements that are deemed essential. I do not hanker after a lad who is loquacious. I can fill that bill myself, much to my detriment.

#### Wealth

"Any man is wealthy, who has good health, a happy home life, a business or profession in which he is interested, and successful, a passion for growth, and the ambition to be of service to his fellow man. He could not get any more out of life if he had a million dollars."

#### Our Tax Office

William Randolph joined Frederick J. Griffith's tax office force on the first of May. With this narration it brings me to the point of observing that our tax office, presided over by Mr. Griffith and his first assistant, Hugh McNeil, Jr., is an important cog in the Baltimore and Ohio wheel. The tax reports submitted to the various states through which we pass, are sworn to by the different officials, and so I am quite conversant with the character of the work performed, and well performed, by the clerks in that office. I wish I had space to comment still further.

#### Our Mr. Webber

When the hearings before the Interstate Commerce Commission became frequent recently, our Charles R. Webber, after spending the day in Washington, would spend the evening at the office here, mapping out responses to much of his correspondence for Mr. Horsey to act upon during the day. There was, therefore, little accumulation of work while he was attending the I. C. C. hearings in Washington.

#### Office of Vice President, Operation and Maintenance

Correspondent, HARRY HARMAN HARTLOVE,  
Chief Graphic Clerk

#### Fair Warning

An attempt will be made in all notes in this issue to deduce from various historical events occurring daily under my eagle eye or reaching my keen ear—to deduce (as aforesaid mentioned) suitable moral lessons—so that in years to come your children, in glancing over the MAGAZINES in the attic and finding this issue, may glean educational values.

Moral: A mighty gust blew up the valley and a still wind rocketh no airship.

#### Home Again From A Foreign Shore

William Fowler has returned from his

honeymoon, which he spent in Bermuda and New York City.

"Bill" reports that the onion crop this year will be a bumper one. In New York he interested some financiers in a project to extract the juice from the larger and more fragrant "Bermudas"—which extract is to be used in intensifying and strengthening miscellaneous soft drinks.

One drop of "Fowler's On-Excelled Onion Juice" in a glass of Ginger Ale—and—bravo! hurrah! you will be singing grand opera. Such are its stimulating properties.

Moral: An onion by the river's brink would, under an assumed name, taste just as sweet.

#### A New Poet Enters The Arena—Wow!

Louis B. Beck—"Our darling Louy"—the Canoeist, as he is known to his more intimate associates, has been working vigorously on a suitable ode on the dedication of his Ford Yacht. Below are the resultant effusions—or might I say—effervescent emanations from his brainial cavity:

#### "BECKY'S ODE"

Roses are red,  
Violets are blue—  
I can row a boat,  
Canoe? Canoe?

Mr. Beck is to be hartlovely congratulated on the above par-excellent poem. It is hoped that it will appear on the front cover of our MAGAZINE.

Moral: People who live on the water all summer should not throw t.e Mexican Arena about their exploits.

#### Sing! Gentle Song Birds! Sing!!

Henry Fankhanel has on display at his warehouses, the beginnings of a National Glee Club ode—dedicated to Mr. Hobart Smock.

Your correspondent worked hard on the little ovoid notes—yet it is feared because of some of the notes were drawn lop-sided, the members of the aforesaid Glee Club were unable to harmonize their tonsil tones concordantly; so unanimously threw the music (or what appeared to be music) on the scrap pile.

Henry came to the rescue and now has the original on exhibition. All music lovers please note and see this air-loom at their earliest convenience.

Moral: Music charms the savage breast—but a rolling tone, out of gear, gathers moss, cabbages, eggs, and other miscellaneous equipment.

#### Hail To The Chief! Hurrah! Hurrah!

Milton Strevig recently spent a few days in York, Pa., with his boon companion, "Eph."

At a request from 25,000 citizens of York, Mr. Strevig was coronated "Pretzel King of the Eastern United States." Any one desiring the latest recipe on pretzels or wishing to place an order for one or more barrels of the twisted sphagetti, will please consult the Eastern Pretzel King. Ask him to tell you the story of the First Pretzel.

Moral: A pretzel a day keeps hunger away.

#### Attention! Lovers of Golf! Attention!

Paul Bradley Martin and Floyd Utterback will be amply introduced to the readers of this column at an early date. Order YOUR copy NOW.

Moral: Behold how mightily he swingeth his mashie—for a niblick shot measurcth but one fathom.

#### Car Service Department

Correspondent, H. V. OBERENDER

This office is again represented in the Baltimore and Ohio General Office Baseball League. Officers and players are as follows: Wilson Auld, manager and secretary;

Charles P. Bayn, assistant secretary; W. Norris Reider, captain; J. E. Peters, J. B. Piercé, A. Debes, J. D. Bryan, H. Hahn, C. E. Williams, A. G. Donald, N. A. Grafton, N. Grafton, Wm. Helm, R. I. Boteler, G. E. Crowell, R. O. Smith, A. F. Buettner, J. L. Strauch, L. C. Becker, J. V. Henry, W. McManus; Wilson Auld, Jr., Mascot.

Our friend and fellow clerk, J. T. Lean, recently resigned to accept a position in the office of assistant foreign freight agent. We expect "Jimmie" to join the ranks of Benedicts soon. Best wishes and good luck! Because of "Jimmie's" resignation, our Hartman Barber has been placed on the Trace Desk.

Our Misses H. E. Franklin and Laura Zenker, local record clerks, recently resigned from the service to be married. We also understand that Albert Mitchell, one of our fellow-clerks, was married recently. Heartiest congratulations and all good wishes to the happy brides and bridegrooms!

### Engineering Department

Correspondent, O. K. EDEN

#### It Is not Easy

To apologize,  
To begin over,  
To admit error,  
To be unselfish,  
To take advice,  
To be charitable,  
To be considerate,  
To keep on trying,  
To think and then act,  
To profit by mistakes,  
To forgive and forget,  
To shoulder a deserved blame.

But:

It always pays.

—Seen in *The Water Tower*.

On May 3 last, Chief Clerk Erwood R. Sparks celebrated his forty-ninth birthday. This is also the 33rd year of his service in the employ of the Company. He has served under nine of the twelve chief engineers since the Company organized: they being Messrs. Douglas, Manning, Graham, Carothers, Kinsman, Thompson, Stuart, Begien and Lane. The office celebrated the occasion by partaking of a birthday cake given to him. Thanks for the treat, Mr. Sparks, and many happy returns.

Superintendent of Insurance B. S. Mace has moved back to his old quarters on the 12th floor. When Mr. Mace moved out, the clerical force of District Engineer Mather moved in—Room 1310.

The accompanying photograph is of Miss Griselda S. Bromwell, four year old daughter of J. V. Bromwell, improvement clerk. A winsome lass is Miss Griselda, and when she gets older she'll have beaux by the score.

It is an interesting fact to know that during the recent drive held by the Baltimore Alliance, under the leadership of Real Estate Agent Moran, men of the Engineering Department collected over a thousand dollars. It is still more interesting to know that under the leadership of E. L. Gosnell, assistant to chief engineer, three men, Messrs. J. H. Adamson, T. E. Hilleary, and D. A. Riley, collected more than half the amount of money turned in by Mr. Moran.

It is "Professor" Gempp of the file room now. Since he has taken it upon himself to wear goggles, we have attached a new dignity to him. And he possesses the most vivid imagination.

When the Fresh Air Fund started their campaign, one of our demure stenographers was called into service. And oh! boy! say she didn't collect money! The office made an almost perfect score, lacking but a few subscriptions. I tell you, when a pretty girl starts selling something—no matter whether it is a house or a posy—if you don't want to part with the filthy lucre, it's best to go and hide.

It sounds bad when a fellow continually misses the last car from such a local (?) place as Rognel Heights. If I were, you, Howard, I would make arrangements to move out there—especially if I went as often as you do. But I forget, of course, it is only for your art!

Not content with merely dodging pedestrians, Mr. Gosnell has bought himself a Dodge sedan, and now enjoys the pleasure (?) of dodging the traffic cop, etc.

It must be great to leave the city where one works and arrive at your home five minutes before you left work. That is what Alf does. Where he lives they don't have Daylight Saving. Consequence is the above. But on the other hand, when he leaves Washington, it takes him two hours to reach Baltimore, where it only took him one before such is life in a big city.

R. G. Bewick, District Engineer Mather's force, was the winner of the ten dollar gold piece which we raffled off for the benefit of our baseball team. The lucky number, drawn by Chief Clerk E. R. Sparks, was No. 949.

The baseball team is rolling along—just about. They lost the first game 35 to 1 and won the second 9 to 8.

We are glad to welcome W. S. Bouton, formerly engineer of bridges, back once more. In 1919 he suffered a severe nervous breakdown and is just now returning to work. He will be located in Room 1308 and his title is Consulting Engineer.

On Friday, May 12, District Engineer Clarke journeyed down from Pittsburgh and gave an interesting lecture to the boys of McDonough School, McDonough, Md.

I believe that if one would consider the dangers of promiscuous expectorating, especially in crowded office buildings, or elevators, one would be a little more careful. Of course the excuse comes up that cuspidors are not placed in the elevators or on each floor. But if one has a bad cold or some nasal trouble that necessitates clearing the throat every few minutes, one should be well provided with handkerchiefs, which would not only prevent disease from spreading, but would also keep the place looking cleaner.

#### We Would Like to Know:

Where Miss George gets all the flowers to brighten up the office.

Who takes Miss Leanora to tea.

Where Wittie Warren gets his dope.

How Joe Kemp gets out at night. Does he?

Daddy and Baby Collison

What keeps Righter's hack together. When Baron "Spike" Schanze will lose his liberty and move to Ellicott City. When Mr. Hauser is going to build. When Alvie will distribute his Airedales. When some people we know will get their hair cut as soon as they need it.

The accompanying picture is of one of my genial fellow correspondents, J. Ford Collison, secretary to District Engineer Mather, and correspondent for that office, with his dear little daughter, Aileen, aged six months.

### Office of District Engineer, Baltimore, Md.

Correspondent, J. FORD COLLISON

The private office of District Engineer Mather and Assistant Engineer Hart has been moved from Room 1310 to Room 1312, and A. M. Kinsman, engineer of construction, has joined them. Our office force moved from Room 1301 to 1310.

I wish to announce the arrival of two bouncing babies, W. W. and Mrs. Gwathmey, Jr., being the proud possessors of a baby girl, and A. A. and Mrs. Boettger, happy over the arrival of a baby boy. Some class to the city of brotherly love, what?

Messrs. J. W. Jones and F. D. Broderick joined our forces the first part of May, for work at Philadelphia. Glad to have you with us, fellows!

### Office of District Engineer, Pittsburgh, Pa.

Correspondent, J. M. Whealan,

Field Accountant

The new quarters of this Department at 339 Second Avenue, were recently inspected by Chief Engineer H. A. Lane, who gave them his unqualified approval. The walls and ceilings are now being given a coat of paint and the result will be the most cheerful and best lighted offices in this territory.

Chief Clerk C. H. Holtzworth is at his desk again after fulfilling the sad duty of laying away the remains of his wife. It is difficult indeed to take up the thread of existence when it has been all but broken.

The young son of Field Accountant F. C. Eberly has been very ill for several days and his condition has been causing his parents much anxiety. He is somewhat better at this writing, and we hope that the improvement will continue.

Our offices have been greatly improved with window ventilators, through the self sacrificing efforts of some members of the force and the help of the storekeeper at Glenwood.

The repair department is without any

work at the present time, but the cafeteria has resumed operations after a short shut-down, due to some sort of misunderstanding, and is experiencing a full attendance.

C. H. Holtzworth and Mr. Whealan were in Baltimore recently on business for the Company.

We are glad to see the Baltimore and Ohio making a somewhat belated use of the natural advantages which the Founders of the Republic gave it in placing the Capitol of the Republic on its lines. Anyone who has not yet seen Washington has missed one of the all too few good things in life. There is a sense of calm serenity there (outside the Halls of Congress) which is not to be found anywhere else in our experience. It is fitting that the First and Best Railroad should thus call attention to the beauty and wholesomeness of the Capitol city of the First and Best Republic.

Mrs. Clarence H. Holtzworth, wife of chief clerk to district engineer, was called, by death on Monday morning, April 3, following a long illness.

Mrs. Holtzworth was born in Fallsburg, Kentucky, twenty-nine years ago. She became the wife of Mr. Holtzworth on June 25, 1919, at Huntington, W. Va.

She was a widely known young society matron of Huntington, but shortly after her marriage removed to Pittsburgh, where Mr. Holtzworth is employed by the Company. Mrs. Holtzworth made many friends while in Pittsburgh and also had a number of friends among the employes in Baltimore who will read of her death with profound sorrow.

**Freight Traffic Department**

Correspondent, DOROTHY RUBENSTEIN

Effective May 15, R. J. Beggs, former chief rate clerk, this office, was promoted to division freight agent, Cumberland, Md. Heartiest congratulations and sincere good wishes are extended. Although it is regretted that this office must lose such a pleasant and valuable associate, for we all know that "a good man is hard to find," we wish that he may continue to climb the ladder of Success, making more and more friends as he goes along the path of life.

The circus was in town on May 10 and 11, and the General Freight Office surely was well represented at both evening performances. We are inclined to believe this is the Fountain of Youth for which Ponce de Leon was in search. We seemed more like a group of school-children than grown-up people. All hail to the Circus!

"To the Zoo" was the slogan of a few in the General Offices during the week of May 1, but only the brave and courageous ventured to go. We regret that there were not more in our crowd. The next time an excursion into the wilds of Druid Hill Park is planned, we hope some of the stay-at-homes will profit by the fact that we returned to tell the tale, and join the party.

Best wishes, along with the set of silverware, was presented to Theodore Dent, who was married on Saturday, April 29.

Names is Names

By MARY TODD and H. L. LLEWELLYN

'Twas on a dark and stormy Knight that Brown and Green received a fright. The stars had vanished, they could not see well, though in the distance they heard a Campbell. Then came they to a house which they entered to appease their shivering constitutions before they'd a chance to Fries. They entered the cellar, which then was full of Booze, and drank and drank and drank, until they began to snooze.

Now in this house lived a man, who's rather stout; he quickly woke the snoozers with his long and hefty shout. They awoke with glad surprise then to gaze upon a Baker; although he kept so silent, he might have been a Quaker. He said he was the "village Smithy," tough and stern and strong, and Wood not have it any other way but that they must be gone. Then Brown he Beggs for mercy, pleads to let them stay, beseeching shelter from the storm, their Holmes were far away.

But Smithy, he got good and cross, began to make it Ruff, but Green and Brown had ne'er forgot they weren't in for such stuff. Hentz each one put his Hatton and departed in the rain, since, because of Smithy they were un-Able to remain.

Miss Lillian Burman, stenographer, was granted leave-of-absence because of ill health, and it is hoped it will not be long before she is again back at her old place, brightening the day for those around her.

The accompanying picture is of Betty, two-year old daughter of Trace Clerk W. W. Weller.

Betty, little daughter of Trace Clerk, W. W. Weller  
Office of General Freight Claim Agent  
Correspondent, GEORGE DOBBIN

Even as Mexico gained fame through the prowess of her toreadors and their magnificent exhibitions of skill in the bull fighting arena, so the average American is fast gaining a niche in the Hall of Fame for much the same reason. Now and then we are presented with an article or a book by some master word-painter, who clothes intricate ideas and deep sentiments in simple words. Some of us regard such a masterpiece in the sense of a forceful lesson while the vast majority attempt to ape such a performance by clothing clear and simple thoughts in sheer verbosity. In time this becomes a habit and many an unintentional "white lie" is told in an effort to obtain a seemingly impressive delivery.

Abraham Lincoln has been described as one of the 'clearest minds' of America. His lesson of brevity, simplicity and above all, SINCERITY, may be well copied by many of us who strive for effect through the "bull-throwing" medium. The truth is that we sometimes fool the young and the unsophisticated to a small degree, but such an exhibition always qualifies the principal actor for the title of "dunce."

Hearty and sincere congratulations to 'Papa' Rodin of Mr. Zenter's division. The stork has brought Mrs. Rodin a husky son.

pound gentleman to learn the intricacies of railroad accounting, matriculating on May 4, 1922. We trust the young man will start early training in an earnest attempt to succeed his father on our bowling team.

Several weeks ago our old friend Roberts, aided by his trusty "flivver," explored some of the beautiful scenery of Maryland. We would like to offer a humble suggestion, to wit, poison ivy is everything the name implies. Be careful, old timer!

Mishaps seem to be the order of the day. Herman, the Babe Ruth No. 2 of the File Division, recently explained two beautiful "shiners" as having been caused by contact with the National Pill. However and nevertheless—oh, well——!

At the dance held by our Musical Five on last Easter Monday night, Sidney, of the reception committee, was heard to announce: "Ladies and Gentleman, right this way for your 'chow' and refreshments." Then he is said to have dished up "hot dogs" which were mostly mustard—"and a pleasant time was had by all."

As usual, nearly everybody wanted to take his vacation so as to include that first week of July!

The romantic season generally brings out a crop of engagement and wedding rings. Last year the warm weather had the necessary effect on quite a few members of our department, we trust that our young ladies will not accept the Genoa Conference, or the Tariff or the Adjusted Compensation bills as valid excuses from their prospective "meal tickets" for "stalling off" the fatal day.

Not that we want to rush anybody, but, if you want a convincing argument, just talk to some of the one-year-old benedicts. Some are "for" and some (yep, sad but true) are decidedly "against." However, step right up, boys and girls; life itself is but a gamble after all.

Our own "Pop" Taylor, following his annual custom, is again taking issue with Jack Frost and Company in a strenuous effort to do a bit of "constructive" farming. Incidentally, his garden is just a bit more practical than the average product of the gentleman gardener. Mr. Taylor, since we accept your kind invitation to a boiled dinner.

We believe it a fact that this office is in excellent shape to establish a gardener's Aid Bureau, judging from the number of us who converse with great ease and fluency on the subject of raising good things to eat.

Some folks shave daily and others——at any rate, Ruben, you are a great, big boy now.

We can't all be comfortable in warm weather, can we, Mr. Keene?

At that, you sure have got plenty of company, "Skinny," old boy!

Our bowling team continues to wear a chesty appearance. Another season will be here before long. Make your slogan consist of only one word, and make the required effort to live up to it. "Winners" will do as a motto.

There are two kinds of men in our office. Those who buy their tobacco and those who carry matches and "have the habit."

**Relief Department**

Correspondent, H. IRVING MARTIN

On the afternoon of April 25, Miss Evelyn M. Waring, Relief Feature, was married to Gorman L. Sellers by the Rev. J. Truman Anderson. The ceremony took place at 125 South Maryland Bap. Church.

The bride was due at about 4.30 but came a little late, that she might dodge the "bad luck" hoodoo that haunts the too punctual bride.

Our society reporter records that the bride's hat was an artist's creation, that it matched her dress of rose-orchid satin and that she carried orchids and lilies-of-the-valley.

(How can a mere man do justice to such details?)

Before the bride entered the church on the arm of her father, by whom she was given in marriage, a fair young soloist sang "O Promise Me." The "I-Wills" are said to have been firm and distinct.

After the ceremony the couple successfully eluded the bride's former associates, who were waiting for her with a supply of rice and old shoes. After a honeymoon spent in Florida the young couple returned to Baltimore and are now residing at 226 East Montgomery Street.

The girlish bride possesses a happy, vivacious, sparkling temperament, and we predict that in her new relation she will retain all of her old friends and make many new and lasting friendships.

Before this reaches the eye of the reader, we will have finished congratulating Charles R. Curtis, Savings Feature, on his recovery from a severe illness, for we shall have seen his smiling face at his desk.

All that we ask, Friend Curtis, is that if another new disease seeks an experiment station, you insist that it choose some other fellow on which to make a demonstration. You had us guessing for a while, but now that you are back, we hope that each day will bring increased strength and more power to your good right arm.

#### Office of Superintendent Motive Power Correspondent, MAGDALENE LAUER

Now that spring is here and has brought everything pleasant and enjoyable with it, I presume that we can attribute to it our "coming to life." (I speak for the office in general—I am the only one of my kind here.) We have always enjoyed what others said and did, as noted in our MAGAZINE, but never came forth with our own, but like all other good things that come at this time, here we are!

On our first arrival we do not expect to hit you all very hard but that does not say we haven't other things in store. For instance, the "Snappers," representing the Motive Power Department, are under the watchful eye of G. T. MacMillen of this office (who, by the way, is a ball player of the old school).

The late James Newton Berrett Telegraph Department

They fully expect to repeat the performance of 1921, when they were returned champions of the General Office League. And let me give you a little information for the benefit of those concerned. What that team won't do to the many other "good-in-their-own-class" teams around this railroad is what Babe Ruth seldom does—miss them. They go after them and get them; but what they will do, Oh, goodness, it would never do for a little stenographer like me to say. I can pound a typewriter and punch on delayed correspondence, but I am here to admit it takes those boys to do the BEATING. In next month's issue we will tell you how the Riverside boys received the sobriquet of "Snappers."

We are all much pleased to say that Mr. McPherron, our general clerk, from out Washington, Indiana, way, and who is here for only a short time, has a healthy addition to his family. I did not think he'd like the East so well, but this being the case, you can't blame him. If he gets such a reward as that I am quite sure we will have a good many more visitors.

#### Tariff Bureau

Correspondents, FRANK W. RUPPERT and CASPER A. WAGNER

We regret very much the sudden death of Mr. Presgrave's father, at his home in Sterling, Va., on April 11. Mr. Presgrave had recently returned from a visit to his home and had found his father in apparent good health.

After a lingering illness, Mr. Joseph C. Wagner, father of Casper A. Wagner, correspondent, Tariff Bureau, passed away on April 8. The sympathy of the office was expressed by a beautiful floral design.

#### Telegraph Department

Correspondent, MARY B. TANSILL

It is with sincere regret and deepest sympathy that we learned of the death of James Newton Berrett, employed in this department for many years as telephone maintainer, Baltimore.

Mr. Berrett was born on January 24, 1883. He entered the employ of the Telegraph Department on December 1, 1900, serving the Company faithfully and well. With his unflinching good humor and his ever present willingness to help others, he gained many friends. His life was one of true service, for "Newt," as he was called, was never too busy to help someone else.

After a short illness he died at his home at Relay, Md., on April 23. He is survived by his widow and two children, James Newton, Jr., age four years, and Margaret, age 13 months.

It has been said that a life which is so spent that the world is richer for its existence, is a life well lived. We cannot speak a truer thought than that of "Newt," for while we will all miss him, we are comforted with the thought that his life was "well lived."

The accompanying picture is of Charles (Swampie) Thompson, "the life of the party" in Foreman Digman's gang. He is about 45 years old, but he doesn't look it, does he, girls? The boys in the gang are telling a good one on "Swampie." His hair was turning gray and someone told him to use peroxide. Instead of turning his hair white it made it a beautiful red.

"Swampie" doesn't wear his "Sunday-go-to-meeting" clothes in the picture. His delapidated appearance is due to the fact that the men became tired of seeing him wear the same clothes every day to work, so, thinking that "necessity is the mother of invention" they tore his working suit off,

"Keep Cool" is the motto of "Swampie" Thompson, Telegraph Department

thereby necessitating "Swampie's" buying a new pair.

All joking aside, "Swampie" is a real fellow, and underneath all his "funning" there lies a good heart, as many of his friends will testify.

#### Transportation Department

CORRESPONDENT, LUKE K. BURNS

On May 11, those who were unable to make their way to Druid Hill Park to witness the annual baseball duel between the married men and single men of the Transportation Office, certainly missed something more than a treat. The main trouble was that the single fellows ran themselves almost to death—they were on the long end of a 15 to 4 score. The line-up of each team was as follows:—

Single Men	Position	Married Men
Roth	2nd	Evans
Kaufman	Short	Guerke
Marley	1st	Faustman
Carter	Catcher	Seibert
Wilson	3rd	Dienhart
Brooks	l. f.	Persinger
Burns	c. f.	Jackson
Scharnagle	r. f.	Volk
Mansfield	Pitcher	Wood
Belt		
Smallwood	Utility	

Messrs. Wood and Guerke, who in previous years had sided with the single men, were eligible to the ranks of the married men this year and even though they proved to be a big re-inforcement, their efforts, combined with the other poor married fellows' were unable to stop the single men.

Before the game had progressed very far, Mr. Persinger received an official decoration, it seemed that he tried to examine one of the balls too closely. He left the field with a badly swollen eye, in fact, I believe it was black. "Phil" Wood pitched a right good game but not much can be said of the support he was given. Mansfield gave us a surprise by holding the married men to but four runs, but we think the reason for this was that early in the game he ate about three or four pounds of animal cakes, which probably meant added strength.

Some of the girls from the office were good to us in coming out to see the game and bringing the fruit and cakes which came in mighty handy. Few of us had eaten dinner. "Dieny" kicked about the decision of

Smallwood, who was "chief in charge of the indicator." Mr. Toomey, our special representative, happened to be in town and he went out with us to see the game. He was unanimously chosen as official score-keeper. I didn't notice, but someone told me he used up a couple of pencils. "Hank" Evans and "St. Paul" Faustman got a surprise when their team lost. I understand that before the game they remarked that we would be "easy picking."

George Loblein made a home run, quite unexpectedly, which netted him—how much was it, George? Our own Bab Ruth is quite a stunner when he swings his bat as his green tie floats on the breeze.

We have an addition to the Baltimore and Ohio family. Mr. Seibert informs us that her name is Vivian Edna. Congratulations!

**Valuation Department**

Correspondent, G. B. SAUMENIG  
Accountant

Great comfort comes from wearing rubber heels, not only to the person himself but also to those around him. Ask Rau who it is in the office whose thunderous tread can be heard everywhere. Sometimes one would think they were wooden heels.

The circus which came to our city in May took us back to our childhood days and a number of our force took in the sights. All of them managed to come back safe, although we were afraid some of them might be detained as curiosities. However, some of our boys must have been considered worth while, as a representative of the circus was in touch with our office for a certain party to act as a toreador. The Building Branch has Heinz skinned a mile when it comes to the 57 varieties.

Our friends, Nugent and Pugh, have a fondness for side shows. Possibly they are anxious to learn mental telepathy. Ask them.

The Summer Duck Pin League of the Valuation Department is still holding the interest of our boys. The fever has also spread to the opposite sex and Misses Fossett and Coplan are developing speed and accuracy. I believe they could be secured as substitutes on our teams and could give some of our boys a few pointers.

Cathcart, who is fast approaching the necessary service age for entrance into the Baltimore and Ohio Veterans, must have some interest in the sale of the evening papers in the building. He seems to be faithful in looking after the interests of Mr. Holmes.

Our friend Taylor continues to smile as the date approaches. He and Bowditch are friendly but one can never tell what it is all about. Taylor has carefully considered every hotel and resort and has written to them for rates, etc. Each mail brings in various kinds of information, some good, some bad. From the puzzled look on his face, his nerve may fail him at the last moment.

Miss Ritter is still much interested in her RAYdio.

Evander, Building Branch, is about ready to take the leap into the sea of matrimony. It must be contagious.

Rau strangely and secretly fondles numerous train schedules, making notations as to arrivals and departures of trains. Then he looks at his bank book and shakes his head in a doubtful way. We hope his nerve has not failed him.

Dell lately had the Order of Knight of the

Garter conferred upon him by one of his friends. Ask him who it was?

Vorwerk has been suffering with his teeth, brought on by either failure on his part to wear his fur cap (suggested by Miss Coplan) or continued chewing of tough tobacco.

Gumpman's love of colors and beauty was vividly portrayed by his latest silk shirt. It is a shame to take the glory away from Smythe.

We were mighty glad to note the recovery of Terrier, who paid a short visit to the office.

Our art critics are hard at work and contributions will be cheerfully received by either one of the "B's."

The annual concert given by the Baltimore and Ohio Glee Club was a success in every way. Aside from the success of the club and soloists there were several outstanding lights from our department, such as:

The youngest member of the club, who is from the Valuation department, had his troubles. His feet were always in the way and each time the club made its appearance on the stage, the audience looked for Charles to stumble. There were several reasons. Previous to this occasion, which was his first appearance before a city audience, he took small parts in church affairs and was very bashful. His dress suit added to his discomfort, in that he got the wrong trousers, which were intended for a very tall man, this made it necessary to wear the trousers close to his neck. This kept the audience from seeing his white vest. This is a fact.

Caruso, Equipment Branch, was afraid that his suit would not fit and in order to be sure he attired himself the night before and held an informal reception at his Irvington home. A pretty good suggestion for the future, when a fellow has a dress suit in the house for several days—to make the most of it.

City Councilman Kydd from Relay was there in all his glory but it nearly happened that he did not get there. The train failed to stop at Relay and the members of the club from that point had considerable difficulty in getting to Baltimore.

Pierce, formerly of this office, resembled a giant in his regalia. He lost his nerve and would not complete his make-up until arriving at the hall.

Bowditch, although not singing with the club, was there in all his glory and came all the way from Cleveland, so he says, to attend the concert. It may be true but there are some of us who feel that there were other reasons for such a long trip. Ask Min.

We certainly missed Wheatley and Roberts, formerly of this office. They were faithful and always had the interests of the club at heart.

Correspondent, J. LIMPERT

Charles A. Luken. Died May 31, 1922

Seldom has the inevitable been brought to our attention with more force than in the death of our fellow worker, C. A. Luken, notice of which was received in the office on June 1.

During the latter part of April, Charles was ordered to the hospital for an immedi-

ate operation, presumably for stomach trouble. However, after being placed on the table, conditions disclosed were of such an alarming nature that the doctors despaired of any hope and would not undertake an operation. Hoping against hope, we had been trying to make ourselves believe things would come around all right, but reports received during the last several days cast a deep gloom over the entire office and we felt that the end was not far off.

Mr. Luken was thirty-six years old. He entered the service of the Company in February, 1905; since this time he has been held in high esteem, both as a friend and an employe.

Of a kind and cheerful nature, a true friend, we of the office wish to extend to the family of our departed brother, our heartfelt sympathy in this, their terrible loss.

The final games in the office bowling league were rolled on April 25. The standing of teams at the end was:

	Won	Lost	
Pull Men.....	48	27	640
Head Lights.....	45	30	600
Royal Blues.....	41	34	547
Bumpers.....	36	39	480
Wrecking Crew.....	32	43	427
Tail Lights.....	23	52	307

Individual averages were as follows:

	Games	Pins	Average
Pritchard.....	69	6927	100-27
Spurrier.....	63	5992	95-7
Atwell.....	73	6907	94-45
Burr.....	58	5320	91-42
Ackler.....	75	6807	90-57
Lehman.....	69	6207	89-66
Limpert.....	72	6462	89-54
Shakespeare.....	69	6190	89-49
Reichert.....	71	6351	89-32
Johnson.....	57	5060	88-44
Cann.....	69	6114	88-42
Spedden.....	66	5822	88-14
Brauer.....	60	5286	88-6
Hartwig.....	75	6593	87-68
Lutz.....	72	6326	87-62
Poole.....	69	5986	86-52
Milnor.....	72	6186	85-66
Miller.....	72	6121	85-1
Moore.....	56	4759	84-55
A. Link.....	27	2279	84-11
Muth.....	60	5048	84-8
Downey.....	72	6055	84-7
Tucker.....	63	5244	83-15
Schuster.....	54	4494	83-12
Ritterbusch.....	69	5720	82-62
E. Link.....	75	6193	82-43
White.....	69	5608	81-19
Dudderar.....	60	4814	80-12
Liken.....	66	5231	79-17
Bickel.....	75	5880	78-30

All in all it was a good season of bowling. The result was in doubt until one week before the final games, when the runners up went down to three straight defeats. Royal Blues were eliminated about two weeks previous.

The winning team is composed of Messrs. Lehman (captain), Reichert, Hartwig, Moore and E. Link, who by consistent bowling managed to get into the lead about the middle of the season and stay there until the end, although at times the margin was only a game or two; therefore all credit is due these boys for their winning effort.

The individual single game record was not shattered this year but a new high individual three game mark was made by Pritchard, who got a count of 343. Pull Men set up a high team score with 494 for one game, while Head Lights rolled three games for a total of 1412. These scores may not compare favorably with those set up by our contemporaries, but as our teams are selected with the view of equalizing things, and one or two low average men placed on each team, these marks are pretty good.

Answers to the "bob tail" appearing in last issue of the MAGAZINE have so completely swamped the judge ("Joe" Heine), that the winner will not be announced until next issue. We believe the "Ed." stands a good chance to "cop" the cabbage.

**Office of Auditor of Freight Claims**

Correspondent, NELLIE F. COLLISON

Dear Office—I have been asked by our chief clerk to represent our department as correspondent to the MAGAZINE. I thank him, and with the cooperation of each one of you, I shall endeavor to bring before our readers the bits of interest from this, one of the most important departments of this big corporation.

For the nonce, lend me your eyesight, and later your assistance in bringing to my attention anything of interest that will illuminate our section.

Yours sincerely,

(Signed) N. F. COLLISON

What a big day for our Department. The auditor, after having told us that we were "wonderful" (that is the very word he used), sent broadcast among us the vacation program, with the flat ultimatum, one week only of meanderings through this old world of ours in a luxurious Baltimore and Ohio Pullman or otherwise, and then by days any additional time we are entitled to, according to the rules and regulations.

What expressions of pleasure and grimaces of disappointment as we turned to look at the selection that had been made for each one of us! Just in pure spite we are going to gallop gladly through our claims and other duties during the entire vacation period in order to inveigle our "Big Chief" into "keeping step" with us, because he will have to be pulling his dictionary off the shelf to find a more expressive word than "wonderful" to apply to his forward marching corps of office assistants.

The officials, chief clerks and head clerks of the Accounting Departments held a Good Fellowship Meeting in the Assembly Room at the Central Building on May 3. Comptroller J. J. Ekin presided and his address impressed most favorably some of us who had not had the pleasure of hearing him before, and the rest of us too. Besides many other things, he made us feel more at home in the Baltimore and Ohio.

We extend our sympathy for the continued trial of Mr. Carl Eger and his family, and with it our sincerest hopes for the complete recovery of his sister, who has made a brave fight through a most serious illness.

With such fortitude as her brother's for an incentive, we felt sure that she will yet win out.

The accident which overtook our ball team on Saturday, May 6, is much regretted and our sympathy is extended to the injured ones.

J. G. Brubaker was hailed with good cheer upon his safe arrival from the flooded district. Since his experiences in Beardstown, he has expressed violent opposition to any theory that a duck lives an enviable life.

Our Dictaphone Department has just passed through a winter full of handicaps, emerging into a spring with, seemingly, new vicissitudes to face. We would like to take this opportunity, however, to express our appreciation of the constancy and application of Miss Sara Miller and Miss Bessie Ellis.

The Daily Vaudeville Act given each day between 12.00 and 12.30 was much appreciated by one W. M. W. While no admission fee is charged, he moved forward and took one of the best seats. As a result, the entertainers are seriously contemplating making application to the legitimate stage.

The genuine bigness of the hearts of Baltimore and Ohio employes is always expressing itself. On a pay day not so very long ago, one of our young, married men had his pocket picked of his entire salary on his way from the bank to the Annex Building. Just as soon as this tragedy became generally known in the office, away down deep into each pocket went the hand of each one of this big sympathetic body of men and women and their unfortunate comrade was presented with a goodly sum to alleviate his misfortune.

A member of our force recently added another year to his already heavy possessions, and as a result is proudly smoking a brand of "High Life." We are confident the donor is not a student of psycho analysis. This is a strong invocation for his safety, lest the suggestion be too great and he loiter by the wayside.

**Auditor Merchandise Receipts**

Correspondent, P. HENRY STARKLAUF

A Welfare Association has been formed in the Interline Division for the benefit of the clerks and in order to abolish the miscellaneous collections which have been going the rounds for various reasons in the past. A representative from each group has been selected on the directorate. Harry Bransky,

president; P. H. Starklauf, secretary; H. D. Vohstedt, treasurer, and S. C. Robinson, chairman of committees, including J. H. Dollinger, E. W. Jones, Carl Mullinix, Miss J. K. Grob, James Spurrier, F. C. Caslin. Fruit for the sick, flowers for the deceased and gifts for the newly-weds will be handled, as well as relief for those of us who may be in need. This organization will not be active socially. With the lovely display of silverware seen in the office recently, it certainly is lending encouragement for some.

The Revision Division recently revived the Lecture Course, an idea which was in vogue several years ago. This is instruction to junior revision clerks as to rate construction and the intricacies of the rate problem.

We are reliably informed that one Harriet is flashing a French Ring. More power to you, sister!

Our sympathies go out to fellow clerks S. T. Newton, on the death of his wife, and J. J. French on the death of his father.

**Weddings**

Miss Gertrude I. Holbein, Machine Room, to Mr. James Garvey, St. Joseph's Church, by the Rev. Maurice, C. P., April 17.

Miss Marie J. Strasburg, Interline Division, to Mr. Eugene Bullinger, St. Bernard's Church, by the Rev. Houck, May 3.

Miss Bessie Barnes, Revision Division, to Mr. Charles M. Speicher, at her home, Stockton, Md., by the Rev. Zimmerman, June 3.

**Making the Best of It**

"Mary, were you entertaining a man in the kitchen last night?" "That's for him to say, mum. I was doing my best with the materials I could find."

—Steam Shovel and Dredge.

**Eastern Lines**

Pier 22, North River, N. Y.

Correspondent, JOHN NEWMAN

"Joe" Bayer, our agent at Pier 22, who—fortunate fellow—owns and occupies a fine house and plot of ground in Floral Park, L. I. (occupies the house and digs in the plot), speaks proudly, now, ("Pride goeth before a fall"), of his achievements as a truckgardener. "Radishes coming up," he reported one day in early spring. (No reports since then.) Well, Joseph, as to radishes, it is not so much what is coming up

**HELPING TO BRIGHTEN OLD MT. ROYAL STATION**

1. Miss Edith Crone, who shines in her new role as substitute matron. The rest-room has just had a new set of draperies, which make it particularly attractive to our women patrons. Those numbered 2 to 11, inclusive, are: Apprentice A. M. Kingsbury, Electricians A. R. Shipley, F. G. Smith, A. G. Mitchell and G. T. Evans, Apprentice W. C. Brown, General Foreman W. D. Burnham, Electricians W. F. Schillenber and J. W. Gardiner and Foreman H. K. Addison. This force has been busy installing new light posts, removing the old blue-print room and taxicab stand, and installing the "Standard Time" signs at the clocks. 12. T. Mulry, known by all station employes as "Tom," man of all work, who brightens Mt. Royal with his smile

**MORE OF OUR MT. CLAREITES**

Left to right: 1. Engineer J. S. Wells, Switchman A. Hart, Brakeman W. R. Lancaster and Brakeman J. R. Thrush. Fireman G. Gouldin standing on engine. 2. Yardmaster C. M. Gray and his two children, Mary and Ellsworth. 3. Conductor A. Day, Brakeman A. Buckingham, Brakeman W. H. Müller, Fireman R. Meyers and Engineer A. S. Hyde. 4. Engineer A. Richardson, Fireman J. S. Engle, Conductor J. P. Wolf, Brakeman B. J. Breitenbach and Brakeman J. F. Temple. 5. Trackman T. Steneada, Trackman A. Hutzler, Foreman J. H. Biden, Trackman P. Gugliette, Trackman J. H. Gready and Trackman J. Kick. 6. Wreckmen P. Hemberry and J. Dugan; Craneman C. Moran, Wreckmen F. Rogers, J. Agnes, K. Bennett and D. Fealey; Wreck Inspector J. T. Brennan, Wreckman J. Welsh, Fireman W. Parker, Wreckman M. Wagner and Wreckmaster T. Kelley

—Photographs by Brakeman L. C. Piper, B Yard

as what is staying down that counts. We had a truck garden once in a 20 by 40 back yard, and grew radishes two feet high above the ground, but without roots; our potato vines were climbing over the fence into our neighbors' yards, but nary a spud did the spade turn up in the fall; there was no room; the tomato plants had pre-empted all space below, showing naught above the ground except the hole into which we planted them some months previously. Let's have your report next fall. There is more profit in digging for the "root of all evil" at Pier 22 than for radishes at Floral Park.

In the previous issue of the MAGAZINE I spoke of the impending marriage of our "Bob" Riddell. It has happened. The following report in the proper and approved reportorial style has been submitted for publication by Edmond J. Levey, who was one of those present:

The marriage of Robert Riddell, head of the Eastbound Department, took place on April 23, at St. Agnes' Church, on East Forty-third Street.

The bride, wearing a white lace gown and hat to match, looked radiantly beautiful as she walked to the altar on the arm of the best man. A reception followed at the bride's residence. Among those of our folks who attended the ceremony at the church were: Mr. and Mrs. J. J. Boyer, Mr. and Mrs. E. Levey, Frank Manthey and his fiancée, Miss Anna Marshall; Misses Margaret Cronin, May McCaffrey, Margaret Gleason, and Dorothy Rekerdres.

(To this I want to "butt in" with a Hip! Hip! Hooray! for the brave groom and the radiant bride. Good luck!)

It is also reported to me, sub rosa, that Mr. Levey was arrayed like one of Solomon's lilies, or a Longchamps mannikin—light suit, boutonniere, goldheaded cane and so forth, etc., etc.

Coming events are not always forecast by shadows. Sometimes they radiate brilliance from symbolic insignia worn by ladies on the particular finger assigned to such purpose, a finger that gets trembly with anxiety at the age of 16, until it is adorned. We are advised that Miss M. G. has ob-

tained the coveted adornment. We are not advised as to who is the happy man; generally it is the girl's papa who is the happy man; we know, having had girls and gotten them married. Well this is the time when "a young man's fancy lightly turns to love," so now is the open season for the sweet young things to poke the unadorned finger at the poor game and speak the mystic password, "Open Sesame." It will work, in season. But, having strayed from the main line we apologize and herewith, Miss M. G., offer you our congratulations!

The Correspondent: Mr. Bayer, have you not something or somebody meriting 'Honorable Mention' in the MAGAZINE?

Mr. Bayer (agent): Well, yes, but—I don't like to blow my own horn.

Just then a violet on Miss Marshall's desk, who overheard this, "dropped" its eyes and sank to the bottom of the glass.

In the April issue of the MAGAZINE there appears a picture of John Bradley and his daughter Elizabeth, drawn by our cartoonist, Mr. Lynch. I understand that Mr. Lynch is not as yet a proud father but that he has acquired some real estate recently in the vicinity of Montclair, N. J., at which point Bradley resides. It is hoped that when he enters his new quarters he will be as fortunate as Mr. Bradley has been.

The following communication, signed "Wallabout," received for publication: "Al" Fox, chief delivery clerk, Pier 22, on his return from a recent trip to Kingston, N. Y., advertised Sloan's Liniment by charging the atmosphere surrounding him with its pungent odor. Confidential inquiries elicited the confidential reply that he was suffering from muscular soreness resulting from the strenuous welcome he received at Kingston. ("Al" weighs about 95 pounds—we wonder what her weight is—Corr.) However, like a game cock, "Al" doesn't know when he has had enough. He is applying for a yearly pass to Kingston. Evidence points to a strong attraction in that "burg." Give us details, Mr. Fox, for the MAGAZINE.

**Staten Island**

Correspondent, G. J. GOOLIC

J. V. C. to J. A. G.: "You ought to know that you can't drive a nail with a sponge, no matter how hard you soak it."

J. Catalano was recently employed as clerk to division agent, with headquarters at Pier 6, St. George. We all wish him the greatest success.

G. W., file clerk, Superintendent's Office, Pier 6, St. George, was going to elope, but was caught coming out of the window. We did not think this of you, G. W. What's the idea?

Division Operator and Chief Train Dispatcher and Mrs. J. F. McGowan are now touring through Ireland and England. They sailed on the "Aquitania" on May 2. We expect them to return on June 2.

The employes of the Staten Island Lines extend their heartfelt sympathy to the families of the following employes:

Patrolman Daniel Horrigan, who died at his home on May 6. Fred Rickhow, pensioner, former painter foreman, died at his home on May 2.

John F. Pettigrew, father of Assistant Division Engineer Walter E. Pettigrew, died on May 10.

On Saturday afternoon, May 6, the Staten Island Railroad Club played its first game of baseball of the season and easily defeated the Curtis Evening High School by a score of 12-7 at Emerson Field, Concord.

Batteries for the Railroad Club: J. Dobbyn and W. Steele.

John Kopko and Al Ryan, and Johnnie Goodski, steady and effective at all times, had the Curtis batters baffled. Kopko tripled in the seventh inning, scoring Johnnie Goodski. In the ninth inning Curtis had three men on base and none out but was smothered by a triple play. Johnnie Goodski, second base, to "Bob" Wilson, first base, to Johnnie Goodski.

The club team lined up as follows: R. Wilson, lb.; C. M. Ryan, r. f.; J. F. Lang-

ford, r. f.; S. Dougherty, 3b.; J. Larkin, s. s.; J. V. Ryan, 2b.; J. A. Goodski, 2b.; Geo. O'Regan, 1. f.; J. Bloom, 1. f.; Frank Rebhan, c. f.; W. Raburn, c. f.; Al Ryan, c.; J. Kopko, p.

The Club would like to arrange games with other Baltimore and Ohio teams in the vicinity of Philadelphia, Baltimore and Washington.

### Mt. Clare Shops

Correspondent, MOLLIE S. ALBRECHT  
Superintendent of Shops' Office

During the recent rains we had in Baltimore, we had quite a few experiences with umbrellas! Now Poole and Hankin have decided that the best way to keep *somebody* from playing a joke on them and taking their umbrellas is to keep a Yale lock on them. Never mind, Poole, the rain won't melt or shrink you, and it won't take the curl out of Hankin's hair.

Every day, about three o'clock, you can hear a long string of numbers and names being poured from the lips of our illustrious friend, Davis, into the ears of our young lawyer, Poole. Of course you can guess that this is the 1150 being checked up, but honestly, it sounds like a Victrola. They have a system all of their own, and our speediest locomotives haven't a thing on them. Some of these days we are afraid they'll have a derailment.

Everybody at Mt. Clare knows that a certain distinguished gentleman, all during the winter months, wore a disreputable looking straw hat, which was purchased last

year in Cuba. One night, during a cold spell, this handsome gentleman was seen going up Arlington Avenue with this same straw bonnet sitting jauntily on his head. The rain was pouring from the heavens in buckets, and although an umbrella covered the straw head-gear for a while, somebody came hastily up to our friend, and hinted of his error, saying he was probably trying to force the season! All the residents of Arlington Avenue can tell that the air was just a little blue for a few moments, and then they can also tell that this same illustrious gentleman made a hasty retreat, secured more appropriate headgear, and the old Cuban hat hasn't been seen resting on his noble forehead since.

Complaint has been made that the Shops a Mt. Clare do not receive notice in the notes of "Among Ourselves." I would like the employes of the various shops to know that there is a man in every shop who has been appointed to send in to me by the fifth day of each month, any notes of interest. When these notes are received by the correspondent, they are immediately sent to the editor of the MAGAZINE. If the man in your shop who has been appointed to help the correspondent, is asleep at the switch, your shop will *not* receive any notice in the MAGAZINE, as I am not in position to get all the little bits of gossip and notes of interest that are floating around. I am, therefore, sending out an appeal to all the parties I have asked for help, to please give me the notes of interest, so the shops will not complain about not receiving any notice. The Flue Plant is the only shop that has "come across" with any help. I wish to thank Mr. Raeuchle sincerely!

Here are little Thomas and Catharine, children of a rakerman T. A. Wiseley, East Side, Phila.

### Sparks From the Flue Plant

"Jack" Hawkins is the original "Book Lamin" guy of this shop! He will write anything for you from a love letter to your last will and testament.

Stickells stopped smoking on March 8. He doesn't say why, but we have an idea "Sticks" had too many friends who were afraid of the Indian in front of the cigar store!

If you want to know anything about baseball, just ask the Flue Plant experts, Judge Duffy Kuhl, John Edward Kuhl and Harry Tarun, the boy who plays the Flue Plant organ, commonly known as the "flue rattler."

### Just Remember

If you're happy, just remember that a lot of us are not;  
And the same if you are fortunate and strong.

There are many we've forgotten that should never be forgot,  
There are many need a bit of smile and song.

If you're merry, just remember there are others who are sad,  
And 'twould make your heart merrier the while

If you passed a bit of sunshine that the rest might know how glad  
Life has made you with its blessings and its smile.

If you're sunny, just remember there are lots who never see  
The sweetness of the sunshine as they go.

There's a lot of love and labor in this world for you and me

Just to scatter seeds of kindness as we go.

—The Baltimore American

This was handed me by the Flue Plant man. This surely is their motto. They are the happiest bunch in the world!

### Mechanical Engineer's Office

Both Mr. Lawson and Mr. Armstrong, of this office, boast a newcomer in their families. I don't suppose it will be long before they will be swapping little hints on how babies should be brought up, what helps them to teethe more easily, what's the best for little coughs, etc. However, we wish to extend to both Mr. Lawson's daughter, and Mr. Armstrong's son a cordial invitation to join our Mt. Clare cradle roll. We hope their daddies will soon favor us with a picture for the MAGAZINE.

Mr. Robert Morton has been sick for quite a while. We miss him lots! Here's

### MT. CLARE BABIES

1. Doris, aged 6, daughter of Machinist J. M. Hittel, Erecting Shop. 2. Jane Lee, one year o'd, daughter of Machinist S. L. Roth and Valletta Galloway Roth (formerly of the Car Service Department), and Ganddaughter of Erecting Shop Foreman Lawrence E. Galloway. 3. Richard W., aged 7 years, son of Car Inspector W. F. Dorsey. 4. Christian F. Jr., aged 2 years, son of Machinist Christian F. Bix, Erecting Shop. 5. Lillian M., aged two and one-half years, daughter of Car Inspector W. F. Dorsey. 6. Roland F., aged 2 years, son of Machinist E. A. Torbach, Erecting Shop

hoping that he will soon be well enough to come back to the office, so we can truthfully sing: "Hail! Hail! the Gang's all here!" (and the balance, which I won't say).

Every Saturday for the past few weeks, "Pop" Morningstar breezes out of the office, with a huge smile on his face! We are dying of curiosity. "Pop;" won't you let us into the secret? Are you "pulling" something over on the Missus, or is there something more interesting up your sleeve? They say that "murder will out," so I suppose, during the course of human events, we'll find out!

**Printing Department**

Correspondent, H. R. FOGLE

The Printing Department boys wish to announce that the baseball team is now ready to meet all comers. The manager, Mr. Handley, says that he is willing to stack his team up against anything that the other departments of the Baltimore and Ohio have to offer, and he is supported by all the boys. Come along, boys, and root for the team.

**Baltimore Terminal Division**

Agent's Office, Camden Station

Correspondent, W. H. BULL

In looking about for news items for the June Issue, I came in contact with Charles J. Gillespie, better known to his old friends as "Felix," who is clerk to the general foreman. He told me that he thought that he was the first stenographer at Camden Station, and when he told me his history, I quite agreed with him. He tells me that he entered the service in 1873 as a messenger boy in the Old Freight Office, which was then located on Eutaw Street opposite Conway and he well remembers the following employes: Chief Clerk John W. Chesley, Manifest Clerk Samuel Woodward, Manifest Clerk Arthur Spice, Manifest Clerk Theodore Dobler, Telegraph Operator Harry Menslage, Manifest Clerk William Ehlen.

Mr. Gillespie was later transferred to the office of Oliver Hoblitzel, general agent, whose office was then located at Camden and Eutaw Streets, where our Local Freight Office now stands. The office force at that time, as he remembers it, consisted of Messrs. John Gephart, John Henshaw and Frey Bailey, who is now in Auditor Merchandise Receipt's Office. When Mr. Hoblitzel resigned, he was succeeded as general agent by A. J. Fairbank, who previously had been in charge of both Mt. Clare and Camden Stations. When Mr. Gillespie took up the duties of secretary to the general agent, he found it necessary to take up shorthand. He acquired the Ben Pitman System and considers, therefore, that he was the first stenographer in the Local Freight Office, Camden Station. Mr. Gillespie entered the service under President John W. Garrett, with whom he was well acquainted. He also remembers Edwin Potts and A. B. Crane, who were Mr. Garrett's private secretaries. Mr. Gillespie has promised me a picture, which will appear in a later issue.

The stork is still paying periodical visits to our office force, this time leaving a ten and one half pound baby girl at the home of Mr. and Mrs. Louis C. Wode. We all extend congratulations!

**Baltimore Division**

Correspondent, W. H. TARR

Brakeman A. H. Beard, East End, called at the office in the interests of the "Get More Business Campaign." His effort will result in the Baltimore and Ohio getting a

longer haul. We are glad to see Mr. Beard interested in such work.

George Zimmerman, secretary to Superintendent C. M. Shriver, recently became the proud daddy of a bouncing boy. Congratulations, George! He is now inquiring concerning the medicinal qualities of Elixir of Catnip and Fennel.

Well, George, we suggest you consult with Division Engineer G. S. Crites, to whose home the stork has made an addition of a son. Congratulations, Mr. Crites!

He finally got it. We mean "Billy" Devlin. No more late hours at the office. Give her plenty of gas, Bill.

We are requested to insert the following: "What legal rights has a chicken on the Public Highways?" Address all answers to A. K. Galloway, district master mechanic, Baltimore, Maryland.

It is stated that Miss Esther Auld had to wring her handkerchief after seeing the photoplay, "Orphans of the Storm." Wonder what her escort did to comfort her.

Miss Elizabeth Carr has been sporting a new red sweater in the office. Six months to make it and one month to wear.

We often wondered what makes "Ed." Myerly yell so loud over the telephone. Now we know. He is so used to hearing the noise of his Lizzie that he thinks everyone yells when he speaks. All wrong "Ed." Say less in a quiet voice and mean more.

**Washington, D. C. Freight Station**

Correspondent, W. L. WHITING

The absence of notes from Washington in the May issue of the MAGAZINE is regretted more by your correspondent than by the readers, as it breaks an almost continuous record since the first publication; but the circumstances mentioned in the April number are accountable for the omission. However, as suggested, we are again on deck with both feet—such as they are—and promise to be more careful in the future.

April has not been behind its predecessors in business. We have had a heavy rush, both in and out bound. Our yard has been filled with cars and our sheds with less carload freight. In addition we have had two carnival shows parked on our tracks: The Rubin and Cherry Show, which exhibited on the grounds of the Camp Meigs under the auspices of the American Legion; and the Gloth's Greater Show, which displayed its marvels for the benefit of some of the Masonic bodies of this city. The former had thirty cars and the latter fifteen cars, so that our yard presented a lively sight to the visitors in this neighborhood.

The usual spring automobile trade is also fine. There is a continuous procession of machines being unloaded and run off our platforms. It is evident that not every one in Washington has yet secured an automobile.

Our Claim Department has also been in evidence as the following figures will show:

	Total Claims	Total Amount
April, 1921.....	118	\$411.13
April, 1922.....	102	\$1590.93

While this does not indicate a large reduction in the number of claims, yet the amount paid is so much less than in 1921 that it shows that close attention has been given to the details connected with the claims, and that the "blue pencil" has been busy. The increase in business in April, 1922, over April, 1921 will account for the small reduction of the number.

A number of the homes of our co-workers have been sad on account of deaths.

On March 22, Samuel O. White, father of General Yardmaster F. S. White, and 1 Night Yarlmaster F. O. White, passed to his long rest. Mr. White was a victim of high blood pressure, which caused a sudden heart failure, resulting in his demise at his home at Camp Meade Junction. The burial took place in Lincoln Cemetery. The impressive services of the Order of Eastern Star and the Brotherhood of Railroad Trainmen were performed at the grave by these bodies, of which Mr. White was a member.

Mr. White entered the service of the Baltimore and Ohio Railroad at the age of sixteen and filled many positions. He became Train Baggage-master, Baltimore Division, and was later transferred to the Philadelphia Division. He was honorably retired in December, 1921, and was granted a well earned pension. Mr. White was 68 years old.

Our messenger boy, Windsor B. Haga, is another of our force who is mourning the loss of a beloved sister. Miss Pauline Haga, age 18, was taken with a very heavy cold and was ordered by her physician to seek another climate. Her mother accompanied her to Albany, Mo., in the hope that the change would benefit her. But death overtook her on April 8, after a short illness. Miss Haga was employed at Woolward and Lothrop's Department store, this city. Her many friends in that establishment were grieved to hear of her passing away. Temporary burial took place at Albany.

And still another home of one of our fellow workers has in it a "vacant chair." Irving E. Catterton, our cash clerk, was called to the bedside of his father, Zachariah Catterton, whom he found suffering from a severe attack of acute indigestion. Mr. Catterton appeared to be improving, and hopes were entertained for his recovery, until April 25, when he suffered a heart attack, which proved fatal. Death took place at his home at Bristol, Md., and the burial was at Mt. Zion, Md. The deceased was a member of the Junior Order United American Mechanics, and the funeral was conducted by members of this Order. Mr. Catterton was 58 years of age.

Even as these notes are being penned, the sad news comes that death has visited the home of our esteemed fellow-employee, Ohio D. Boyle. Mr. Boyle and his family were taking a short ride in his automobile on Sunday, May 7. While in the Soldiers' Home Park he and his pretty, curly haired little son, Charles Edward, left the machine to obtain a drink of water at one of the park fountains. As they turned to go back to their automobile, the little boy stepped into the road. Just then an automobile, driven by another party, came by and struck the little fellow, knocking him down and inflicting very severe injuries, from which he died on the next morning. It is needless to say that the little fellow's toddling footsteps will be missed in the neighborhood.

Our deepest sympathies are extended to the sorrowing relatives and friends of all the bereaved ones in their hour of sadness.

A few changes have taken place in our force recently. Allan W. Kidd, record binder who has found a position that he thinks is more to his liking than railroading, is succeeded here by Theodore Selke, son of Agent D. L. Selke, Benning, D. C.

Waybill Clerk M. C. Mott has also left us to seek other fields of service. Elias W. Kidwiler, who was employed in this office before the war called him away, has returned to the fold as successor to M. C. Mott.

Michael F. Kelly, one of the veterans of the Baltimore and Ohio service, employed here as sealer, has been on the sick list for sometime. We hope that we shall soon see his happy, smiling face.

We are undergoing a thorough spring cleaning here. Everything is receiving a new coat of paint. Our lawn in front of the office has been much improved, and is now a thing of beauty and pleasing to the eye. Our yard is receiving the attention of a large force, placing new bumping posts at the end of every track, and we have all new window shades in the office. The visitors to Washington this coming summer, many of whom come in trains that park in our yard, cannot fail to be impressed with the beauty of our freight station.

### Brunswick

Correspondent, R. L. MICH, Conductor

In the accompanying picture we have J. T. Martin, Veteran father of yardmasters. The picture was snapped in front of east-bound passenger station, Brunswick. Mr. Martin is "headed east" on business. On all occasions he can be found giving good advice to our young men all over the road.

James Gletner, clerk to Terminal Trainmaster W. O. Shields, and Miss Thelma McCormick, a popular young lady of Brunswick, were married by the Rev. Donlin. A honeymoon to New York and back,

and James is back on the job. Good luck to both!

Miss Lela Davis, second turn cashier, Baltimore and Ohio Y. M. C. A. of Cumberland, Md., is considered to be one of the prettiest as well as the most popular young ladies on our road. Miss Davis attends school during the day and works her turn at night. She greets our boys with a cheerful smile and has a kind word for everyone.

Here we see also Mr. and Mrs. Mercer Davis, of Jacksonville, Florida. Mr. Davis is connected with the United States Shipping Board, and has interests in our Baltimore and Ohio Railroad. Mrs. Davis is a niece of your correspondent and is a great admirer of our MAGAZINE.

Behold Captain Joseph B. Much and family enjoying a rest, after a long drive through the beautiful parks and highways of Washington, D. C., and Virginia.

Lieut. W. Axline, Baltimore and Ohio officer, has been very busy keeping our yards clear of train riders. Mr. Axline deserves great credit for the manner in which he has controlled the situation here. Fewer robberies are reported in our territory, on account of the able manner in which he manages his staff.

Patrolman Davis Lewis, was presented with a handsome medal by the "Order of

Reindeers," for his earnest efforts in securing a home for the Order.

Engineer A. B. Haller, who has been suffering with rheumatism for some time, is back on the job. He made "some Injun" chief at the Brunswick celebration.

A great many of our railroad men here are contemplating a sight-seeing tour of Washington, Baltimore, Philadelphia and New York. Of course they will be accompanied by their wives and sweethearts. A visit to our officials, while in Baltimore, will be the main feature of the trip.

On account of the great mine strike, which has caused a depression of business all over the country, several hundred of our boys have been furloughed. An early settlement is hoped for in order that an agreement will soon be reached so we can resume normal conditions. Our "hump" riders are getting restless, as they like to change off from a box car to a "hopper."

Yard Brakeman "Ed" Moore who had both feet amputated some weeks ago, is "learning to walk" on his new feet.

Conductor "Sam" Moore, who naturally takes life easy, is suffering from rheumatism. We hope "Sam" will be back on the job again, as he is well liked by our boys all over the road.

Conductor "Preacher" Smith bought a new necktie last week (ask him about it). He is not only a good railroad man and "preacher," but is fond of neckties.

### Cumberland Division

Correspondent, JOHN SELL

The accompanying picture is a good likeness of William H. Gatehouse, M. P. clerk, Division Accountant's Office, Cumberland. Mr. Gatehouse is also a member of Baltimore and Ohio Queen City Fire Brigade, having had previous experience in this line with the Frostburg Fire Department, which is considered the "crack" organization of Western Maryland.

The night force around the Queen City Station could not understand why Night Messenger Henry Miles, who pilots messages around the building and city, made so many trips to the restaurant for coffee. He has been found out; we know also why he gets good measure.

Harpers Ferry, which is a Blue Line Station, has recently been given a thorough renovation. The building has been repainted and grounds put in condition for the summer. It now presents a beautiful appearance, set in nature's beautiful surrounding, the Potomac and Shenandoah in the background. Our patrons in passing always note the beautiful scenery, and the improvements are attracting widespread comment.

Harry T. Henry, night car distributor, and Miss Bessie Custer Oglebie, stenographer in the Superintendent's Office, were quietly married in Baltimore on Thursday, April 20. They are receiving congratulations of their many friends. The office force presented them with a beautiful silver tea set.

B. A. Noone has held the checker championship during the past season against all contenders.

Another early spring wedding was that of A. P. Connell, C. T. time clerk, Division Accountant's Office, and Miss Leatha Ambrose, stenographer, Agent's Office, Cumberland.

Our list of eligibles is gradually diminishing, and at the present rate, should be

### BRUNSWICK, FOLK

Left to right, upper pictures: Captain Joseph B. Much and family; Tonnage Inspector J. W. Martin. Center: the new fire-fighting apparatus at Brunswick. Lower: Mr. and Mrs. Mercer Davis and Miss Lela Davis, second turn cashier, Baltimore and Ohio Y. M. C. A.

exhausted by the last of June. We will see that our MAGAZINE readers are kept fully advised as they materialize.

Mrs. Elizabeth Jones, janitress, Queen City Station Building, was recently entered in a "Oucens" contest at a local church, and walked off with second honors among a large number of contenders.

Yard Clerk R. C. Miller was recently appointed to an important position in the Division Accountant's Office.

Assistant Chief Yard Clerk H. J. Minghini, has been appointed chief inventory clerk, East Yards, succeeding J. H. Penrod, who has been appointed chalker, Yard "E."

Yardmaster L. R. Madden recently spent some time touring New York and other eastern cities.

Yard Clerk Webb C. Kline who has been on the sick list for some time, is rapidly improving.

The late April frosts are reported to have done considerable damage to the fruit crops; it is estimated that the peach crop in particular will be small this season.

Crossing Watchman "Birdie" Warnick Harrison Street Crossing, is right on the job, having one of the busiest crossings in the city. By careful attention to duty he has not had an accident to occur on his crossing and he's right on the job at all times.

The Cumberland Baltimore and Ohio Baseball team is fast getting in form, having played several games recently with local and visiting teams, and come out victorious. They are ready to meet any contenders.

A number of readers want to know the joke about the "Victrola." John, can't you help them out in the next issue?

William H. Gatehouse, M. P. Clerk, Division Accountant's Office, Cumberland

Two engines of small type are being fitted out with apparatus for an economy test over the Cumberland Division. Engineer "Ed." Merckle has been chosen to run these engines. When it comes to economy, efficiency and general attention to duty, "Ed" is on the job.

The Ladies' Auxiliary of the Veterans' Association is increasing in numbers very rapidly, as they want to be near their men all the time. They feel like they are a part of the great Baltimore and Ohio, and deserve notice.

Flagman "Ed" Cain was held up at Sir Johns Run and robbed of seventeen dollars. "Ed" said when he looked into the muzzle

of the robber's gun, it looked like a barrel. We feel sorry for you "Ed;" leave your money at home next time.

The following resolutions were passed by the members of the Cumberland Shop Band on the death of Isaac K. Conway, who was killed in the accident at Fairhope, Pa.:

WHEREAS: The Almighty in His infinite wisdom has seen fit to remove from our midst, our friend and co-worker, Isaac K. Conway, and

WHEREAS: In the death of Isaac K. Conway, the Baltimore and Ohio Shop Band has lost an efficient and able member, and one who was esteemed by all—therefore be it

RESOLVED: That we extend to the bereaved family our condolence and sincere sympathy, and be it further

RESOLVED: That a copy of these resolutions be forwarded to the family of our esteemed late friend, Isaac K. Conway; that a copy be spread upon the minutes of our Band meetings, and that copies be forwarded to the Cumberland Daily News and the Baltimore and Ohio MAGAZINE for publication.

E. F. WARNER,  
P. D. HARVEY,

Committee.

**Master Mechanic's Office**

Correspondent, R. J. COULEHAN,

As this is the first contribution from the new correspondent, it is sincerely hoped that it will to some extent, appeal to everyone, particularly the employes of the Mechanical Department on the Cumberland Division, and that they in the future will "come across" and furnish some real good and interesting facts so that we may be on

Brakemen Charles Mouse and William Mitchell and Conductor Hill Carter, who manned the train on which President Harding traveled over the Cumberland Division during April. The train is shown in the lower picture

The Potomac Hose Company, the fire brigade at Green Spring

the "map" in our MAGAZINE. To get news is an easy matter, provided everyone will contribute.

Mr. Robert McVicar, a representative of the Galena Signal Oil Co., on a recent visit to Cumberland Shops, made an inspection of oilhouse located in east car yard and pronounced it to be one of the most up-to-date oilhouses in his territory; in fact, as he put it, it's 100 per cent.

In view of the various methods of soliciting business for the Baltimore and Ohio, we wonder if the employes located in Cumberland, appreciate that now is the time for them to secure business to and from this point. Just now Cumberland, like all other cities, has been unable to care for all who seek employment; in fact our Company at the present time is (and has always been) the main or most representative employer, and with this and other facts in mind, the Baltimore and Ohio is justly entitled to not less than 95 per cent. of the transportation that comes and goes. In other words, when purchasing any article, this should be impressed upon our merchants and we should expect them to make sort of a trade—to give our Company the business, as we do them.

"Jake" our assistant chief clerk, recently made a visit to Connellsville and Grafton on Company business. He reports that things were running smoothly, the same as at our shops.

W. V. Fairall, Car Department, recently secured his auto tag and license. The entire force has been promised a spin in his "gasoline buggy."

Now that the duck-pin amusement has been "put on the shelf" for the season, the boys have started on the war-path in the way of baseball. They already have had two victims to their credit, and from what can be learned, there is going to be no stopping 'em.

The ladies duck-pin team likewise has been laid aside and we understand that they are investing their idle moments in a "sewing circle." At a recent meeting held at the home of Twilla Willison, after the election of officers, the members were given a doughnut treat.

"Charley" Weiskettle, out on line of road, recently was invited to take a motor car ride. After making all arrangements, we understand he only traveled on it about a half mile and then had to push the car for the rest of the trip. This is tough luck, "Charley."

The pictures on page ahead are of President Harding's special train on the Cumberland Division on April 28. Here we have the train crew in charge from Cumberland

to Washington: Captain Hill Carter, Brake-men Charles Mouse and William Mitchell. Everything in connection with the preparation of the 5227 was personally supervised by Division Master Mechanic T. F. Perkinson, who certainly had her shined up like a bright new silver dollar, and the engine was good for as long a run as the silver piece mentioned.

#### Timber Treating Plant, Green Spring

Correspondent, E. E. ALEXANDER

Track foreman cannot keep the right of way clean while those living adjacent to it use it as a dumping ground.

DO NOT dump rubbish or refuse of any kind along the right of way. It is UNSIGHTLY, UNSANITARY, UNHEALTHY and UNCLEAN.

Burn all refuse that will burn.

Bury, haul or wheel away to some obscure place rubbish that will not burn.

If wheeled along the right of way it should have cinders put over it so that it will be buried and hidden.

Help us in keeping our right of way at Green Spring clean, both for looks and for health.

(The above is a copy of notice handed to employes living in Company houses and posted on our bulletin boards.)

Fireman J. R. House purchased the Dorsey property formerly occupied by Switchman D. H. Talley. Mr. House is remodeling this and greatly improving its appearance.

The photograph accompanying our notes this month is of the Potomac Hose Company, our fire brigade. Those shown in photograph are, kneeling, left to right: Hoseman R. D. Nixon, Nozzleman F. A. Sebold, Captain R. H. Corbin, Hydrantman B. F. Reed. Standing, left to right: Inspector G. C. Conley, Nozzleman James Shaw, Assistant Chief H. W. Gross, Nozzleman C. M. Lewis, Hoseman G. P. Chesshire, Hoseman R. G. Brown, Captain A. E. Irving, Hoseman H. S. Simpson, and at extreme right Assistant Chief E. M. Stottlemeyer, and Chief E. E. Alexander. Hoseman B. F. Twigg and Hosemen and Cartmen E. F. Bean and J. M. Bean were absent when picture was taken.

Mr. W. Buehler, engineer, Wood Preservation, Barrett Company, New York City was a visitor at the Plant on May 10.

#### Keyser, W. Va.

Correspondent, H. B. KIGHT

The accompanying picture is of Pensioned Conductor John T. Compton. He began his railroad career as a trackman 39

years ago, remaining as such for about one year, after which he secured a position as brakeman. He served in this capacity for seven years, when he was promoted to conductor on the East End of the Cumberland Division. He served as a freight conductor for 22 years and as a passenger conductor on the East End for 16 years. He was pensioned in January, 1921.

Mr. Compton was chairman for the O. R. C. from three different Lodges, Brunswick, Martinsburg and Keyser, and is at present chairman of the Legislative Board for West Virginia. He is active in church work and is a steward of the Davis Street M. E. Church of this city. He is now a Justice of the Peace of New Creek District, of Mineral County, and is aspiring to a higher goal, having announced his candidacy for the state senate in the coming election.

#### Keyser Shop Notes

Up to the present writing Car Foreman Pownall still has the dog, but is holding him by an eye lash. If "Bob" ever does loose the dog it will be a toss up if he goes to "Bill" Ravenscraft or "Pat" Naughton.

Car Foreman Stanley states that since the car forces have been reduced, he has worn out four pair of pants. No—but by his pedometer he carries in his pocket getting so hot, that it burns out the sides of his trousers.

J. T. Compton

DEPOSITS \$1,055,260.26

Keyser, W. Va.

SPECIAL SAVINGS DEPARTMENT

Interest paid every six months  
from date of deposit

We have it from good authority that Boiler Foreman Spicer has about completed his minstrel troupe that will represent the Loco Department at the Picnic to be held in Mill Meadow on July 4. Among the stars that he is slowly developing are Paxton, "Bill" Liller, "Ben" Kalbaugh and John Kenny as the end men; Jack Griffen, Tom Stewart, John Dorsey and "Bill" Kady as the premier quartette, while "Mike" Graney will, as usual, hold down the job as interlocutor.

Two of our old regulars will soon leave the service after spending the greater portion of their lives in the Loco Department at Piedmont and Keyser. Messrs. Henry Nau and Michael J. Dugan have made application to be retired. Both of these employes entered the service of the Company at Piedmont as engine cleaners, Mr. Dugan in 1869 and Mr. Nau in 1873.

Mr. Dugan later learned the trade of boilermaker, Mr. Nau of blacksmith. Having served the Company 50 years in their various capacities, the employes of the shop, while regretting their departure, wish them the best of luck and trust that they will be able to enjoy many years of the peace and comfort to which their long and faithful service entitles them.

I cannot complete the notes for the present month without writing a few words about Eleanor Davis Ravenscraft, whose photo accompanies this article. Eleanor is the one year old daughter of Mr. and Mrs. Ray Ravenscraft, Mr. Ravenscraft being the foreman of the Reclamation Plant at this station. While this young lady is not as yet able to tell by words where all are to head in, she is without a doubt boss of her home. Oscar, as she is more familiarly known to her friends, has her Papa so controlled that Roy is the model husband as far as staying at home at night is concerned.

Oscar Spotts, Machine Shop foreman, who has been quite ill at Hoffman Hospital, and J. H. Dunk, painter foreman, ill at his home in Piedmont, we are glad to say are much improved and will soon be able to resume their duties.

The accompanying photo showing a few of the Mallet engines we have stored at this station, gives one an idea of the falling off in business on the West End of the Cumberland Division, due to present coal strike. The engines are still in first class condition and estimated good for from 10 to 12 months service when placed on the road. This idle power is capable of moving 1500 loaded cars or 2250 empty cars daily over this mountainous division and represents the employment of 180 train and enginemen.

**Connellsville Division  
Office of Train Master**

Correspondent, C. E. REYNOLDS

Remember the time when you and I were just little fellows, and along came one of those bill posters and smeared paste all over the side of the barn and then covered it completely with one of those big lithographed posters announcing that Q. T. Barnings Great and Only Circus would exhibit both afternoon and evening on a certain date which to us then seemed an age to wait? Then, after having read the sign over and over every day until we could shut our eyes and see those animals go through their tricks and could repeat each word by heart, finally the great day arrived and with it the "Thrill that comes once in a lifetime?"

Well, our great day arrived April 24, and it fell on Monday too, just after having had a half holiday Saturday which was followed up by an all day's rest on Sunday; naturally we were well groomed for the glorious event. When we reached our dugouts on this particular morning, Dame Rumor had it that a very distinguished personage was about to pay us a visit. The party referred to had arrived in our city on No. 17. Finally some bug (as all bugs do) got a tip that said distinguished visitor was none other than Miss Margaret Talbot Stevens, so well known to all readers of the Baltimore and Ohio MAGAZINE. Then I will say our "queeriosity" got the best of us and our old hearts went pitter patter, but the only thing we could do was wait and, "Gosh all hemlocks" but the time did seem to drag!

Finally some "bird" began to hum softly the strains of "Maryland, my Maryland," and then we began to perk up our ears in earnest, for plainly heard were footsteps in the hall. At this juncture the door opened and in she came followed closely by Miss Leah Radcliffe, of the Auditor of Passenger Receipts Office, Baltimore. It was then that we began to think that our eyesight

was failing. It had been sort of frosty that morning and the mist had settled heavily on our eyeglasses, necessitating our having to take them off on arrival at our desk and give them the once over with our old bandana. But when Miss Radcliffe stepped inside we found it necessary to take off these same glasses and give them the twice over with that same old bandana. Well, it hardly seems right to keep this thing hanging fire so long. The fact is, we had read about 'em, seen 'em advertised a time or two and looked at 'em in the movies but "I'll be doggoned" if we had ever seen 'em on a living model before. Ye gods and little fishes! There right before our blinking eyes were the long heralded knickerbockers at last, and to tell the truth they looked pretty nifty, after all.

Well, we enjoyed the visit immensely and of course we could not all be as fortunate as Miss Lenora Grace of the Division Accountant's force, to whose envious lot it fell to accompany the party east on train No. 6 to Rockwood, where it was planned to secure some excellent photographs along the Caselman, one of which graced our good old magazine for May. "And thus endeth a perfect day."

The sketch above is of "Ed" Brinker, time clerk, Division Accountant's office, Connellsville, Pa. As others see you, "Ed."

Roundhouse Foreman and Mrs. L. H. Bowers are receiving congratulations upon the birth of a daughter, Mary Adeline, on Saturday, April 22. The little one is the first in the family and tipped the scales to seven and one half pounds. Congratulations!

On April 17, Martha Elizabeth Dye, age 15, daughter of Brakeman and Mrs. Edward Dye, of Connellsville, died at the Cottage State Hospital, following an operation for appendicitis. Our sympathies are extended to this bereaved family.

On May 8, James S. Parker returned to his run as passenger conductor on Trains 61 and 62, after being off duty for the last three months account of illness. "Jim," we are glad to see you back on the job and we hope you are feeling 100 per cent.

On Saturday May 6 the Baltimore and Ohio Baseball Team demonstrated in the opening game of the Connellsville City League that it will be a contender for honors in that organization, by decisively defeating the Fayette Bakers—Score 11-3. Keep it up boys—that's fine!

We regret to report the untimely deaths of Engineer I. K. Conway, Fireman O. E. Newcomer and Brakeman H. L. Parker, which occurred on May 2, when engine 7156 blew up at Fairhope, Pa.

Herewith cartoon of the Honorable Oliver P. Moser, the efficient C. T. time keeper, Division Accountant's Office. Notice he is sizing up the situation. Yes, that's right.

The accompanying photograph is of the late M. E. Martz, who was born at Hyndman, Pa., July 13, 1875.

Mr. Martz commenced his career with the Baltimore and Ohio Railroad on April 5, 1896 as a carpenter, Piedmont, W. Va. He resigned on January 28, 1897, but returned to the service again on April 1, 1900 at Hyndman as a crane operator. He was transferred to Meyersdale, Pa., on September 28, 1903 as machinist foreman, which position he held until he was transferred to Connellsville, Pa., as day enginehouse foreman, on January 1, 1913. He was again transferred to Somerset on May 15, 1913 as general foreman, which position he held until his health failed. When able to resume duty he was given the position of locomotive inspector at Somerset, on September 16, 1918. Later he was promoted to position of night foreman at that point. His health again failed him and he was compelled to give up his work. When able to return to work he accepted position of machinist at Somerset. On May 17, 1921 he was transferred to Johnstown as general foreman and held this position until his death, which occurred on April 21. His death resulted from a broken back, received when he fell from the tank of a locomotive in Johnstown yard on April 12.

Mr. Martz was a man who always took a great interest in his work, and was always working on some improvement to locomotives which he thought would benefit the Company for which he worked. In the loss of Mr. Martz we lose a valuable man and one whose place it will be hard to fill.

Mr. Martz was a great home man and of splendid personality. He was held in high esteem by all who knew him. He is survived by his widow, a son Paul, and a daughter, Mildred. He was a member of the Knights of Pythias Lodge, at Somerset, Pa.

Funeral services were conducted 8 p. m. on Saturday, April 22, at his late home, 642 Horner Street, Johnstown, services being in charge of Rev. H. W. Snyder, of the First Lutheran Church, and Rev. E. W. Rishel, of the Evangelical Church, Johnstown. The body was removed to the home of the deceased's mother, Mrs. Rebecca Marth, at Hyndman, where additional services were conducted by Rev. Dr. Bennett on Monday afternoon, April 24. Burial was made in Hyndman cemetery.

To the bereaved family we extend our tenderest sympathy.

Here is a picture of the Johnstown yard forces with engine 2677 as background. Reading from left to right: I. I. Kaufman, locomotive engineer; C. B. Speicher, general yardmaster; F. H. Deeter, machinist; Mrs. B. J. Barrett, Jr.; Thomas Atkinson, pit laborer; W. L. Gregory, crane man helper; E. G. Driscoll, conductor; E. Ober, brakeman; C. S. Gardner, locomotive fireman; A. J. Bowman, brakeman.

On March 18, Thomas Howell and Cecilia Breakiron were quietly united in marriage. After a honeymoon to eastern cities, they returned to Smithfield, Pa., where Mr. Howell is employed as section foreman. We extend to them our best wishes.

Readers, gaze upon "Gus" Princker, time keeper, Division Accountant's Office, and two of his lady friends. The picture was snapped while they were taking in the scenery at Breakneck several weeks ago.

Conductor J. R. Gerhard, Connellsville, has just returned from a fishing trip. It is reported that he indicates the measurements of the catch by the foot—Some fish story, eh?

Freight Agent G. M. Tipton, moved into his new home on Race Street on May 9. You have a nice place, George.

On May 1 the stork visited Brakeman and Mrs. G. D. Keffer, of Snydertown, Connellsville, Pa., leaving a daughter, Alice Elizabeth. The mother was Miss Ruey May Showman. Congratulations!

Yes, Beatrice Fornwalt, stenographer in the Superintendent's Office, went and done it. She got a Ford coupe. No, we haven't seen her pass Brimstone Corner yet, for the semaphore has been moved. Go to it "Beatty," but don't give it too much gas.

### Pittsburgh Division

Correspondent, E. N. FAIRGRIEVE

When you pass through the gate into the train shed of the Pittsburgh Passenger Station between the hours of 3 to 11, kindly notice the broad grin on the face of Gateman "Pete" Kramer. There is a reason for this grin and the reason is the recent visit of the stork with a bouncing baby boy. "Pete" is a proud and happy daddy and says the lad is able to sit up and talk to him now and will soon be able to come down and help him pass the crowds through the gate. Con-

gratulations and best wishes for the little fellow's future!

Those of you who remember Miss Irma Hoover, who, while she was at one time employed in the Terminal Superintendent's Office, succumbed to the wiles of Dan Cupid, will be pleased to learn of the recent arrival of a bouncing baby. O, you kid! Say "Da, Da!" Congratulations and best wishes. Needless to say this is a Price-less treasure.

The accompanying photo is that of Master "Jackie" Hicks, son of Mr. and Mrs. F. J. Hicks. His daddy is a Pittsburgh Division police officer. From the appearance of this husky youngster, he may become as formidable a "copper" as his daddy.

Coal Freight Agent W. L. Cromlish, Pittsburgh, who has been confined to a Pittsburgh hospital for a long period, has recovered sufficiently to leave that institution. He is now visiting relatives in Detroit, recuperating.

Friends of J. A. Spielmann, assistant to General Superintendent Peck, will also be glad to learn of his return to duty after a long illness which followed a serious operation.

One evening not long ago, after most of the employes had finished their day's labor and retired to their homes, weird sounds were heard in the vicinity of the Train Master's Office on the third floor of the General Offices at Pittsburgh. All was quiet and serene on the outside, but a glance through the keyhole of the door of the room from which the sound emanated revealed a small crowd gathered around one fair damsel who was enlivening the proceedings by tickling a ukelele, much to the amusement of her fair friends. We understand that Earl Tovey was present at this select gathering, together with Gertrude, Mary, and "Bud," and while Mildred made the uke talk, they all had a hard time keeping their feet still. Mildred is a player of rare ability and played one beautiful selection entitled "Nobody Knows His Address, Nobody Knows His Name, Nobody Knows Where He Gets His Clothes, But He Gets Them Just The Same."

Don't forget the Veterans' picnic at Olympia Park on July 20. Here an excellent opportunity will be given to all employes and their friends to get acquainted with each other and to make the occasion one long to be remembered. The entertainment features will include amusement for all, sports, games, etc., the chief of which, however, will be dancing. Let's get in trim for the big event. Don't forget the date, the time, nor the place.

### EVERYBODY GO BIG TIME HEAP MUCH FUN

Say, fellows, how about one of those old fashioned ball games between the benedicts and the unattached, which used to be so amusing a few years ago? Can't we stir up enough interest and start something along this line? All you need is to have some old fellow, the daddy of about steen kids, tell

Left: "Gus" Princker and ——— and ——— (Readers kindly supply the missing names). Center: Yard forces, Johnstown, and good lookers at that. Right: M. E. Martz, late general foreman, Johnstown

NEXT STOP IS CONNELLSVILLE!

# Hamilton Watch

"The Railroad Timekeeper of America"

## Long Term Watch Insurance

It is policy to buy a good watch.

The Railroad man who buys a Hamilton is insured against inaccurate time. He buys a watch that has to its credit the record of wonderful service under hard usage—a watch that will tell true time year after year.

The Hamilton Watch is preeminently the watch of successful Railroad men. They lean heavily on their timepieces and must have a watch sturdy enough to bear the responsibility imposed upon it.

We suggest the No. 992 Hamilton, 16-size, 21 Jewels, for the most exacting Railroad service.

Hamilton Watches range in price from \$40 to \$200; movements alone \$22 (in Canada \$25) and up.

Send for "The Timekeeper," an interesting booklet about the manufacture and care of fine watches. The different Hamiltons are illustrated and prices given.

HAMILTON WATCH COMPANY  
Lancaster, Penna., U. S. A.

Conductor J. County and Engineer E. T. Reed, together run an Erie train. They both carry Hamilton Watches. The accuracy of their Hamiltons has helped both men to a reputation for precise and punctual service.

### Glenwood

Correspondent, FRANK RUSH

Effective May 1, C. P. Kalbaugh was promoted to chief clerk to district Master Mechanic G. A. Schmoll, headquarters at Glenwood, vice W. E. Mohler, promoted. Mr. Kilbaugh has been at Glenwood for the past three years. He is well known and liked by all. We wish him success in his new position.

M. R. Powell, formerly assistant chief clerk to the district master mechanic, has been promoted to shop clerk, Glenwood, vice C. P. Kalbaugh. We wish him success in his new field.

F. W. Gettle, laborer foreman, Glenwood,

I'M READY FOR ALL COMERS—  
Yours truly, "Jackie" Hicks

has been transferred to Cumberland as material supervisor. Go to it, Fred; we wish you success in your new position.

### Glenwood Round House

Correspondent, MARY A. BREEN

Sincere sympathy is extended Boiler Inspector C. L. Davis in the loss of his daughter, who was struck by an auto. She died shortly thereafter; to Engineer D. A. McAninch in the loss of his infant son, Douglas A., and to the family of Engineer C. U. Reed. Mr. Reed had been in the service for 31 years and is sadly missed by his fellow employees.

"Bob" Schauers, that noted gentleman who may at any time be seen strolling up and down the deck—I mean the store room platform—thought to pull one over on us. He was quietly married on the evening of May 2 to Miss Olive Mateer, former clerk in the Storekeeper's Office, Glenwood. The many friends of both offer hearty congratulations.

Arrived: At Gibsonia, Pa., Robert Fulton, son of Night General Foreman J. F. Gibson. Anyway, "Gibbie," you've headed him towards being an inventor.

J. R. Kilroy, Division Accountant's Office, has been assigned position of boiler clerk in the Master Mechanic's Office, vice John Kocerhan, who has returned to General Foreman's Office.

Boiler Inspector S. J. Linn recently invested in a Baby Grand—oh, don't mistake me for he's not at all musically inclined—I mean a Chevrolet. Most any evening he and Roundhouse Foreman J. L. Porter may be seen most any place, but the first thing they undertook to do was to run down an ex-constable. Well, "Jim," if I were doing it, I would try to get the existing constable out of the way, then you would be at liberty to hit the high spots.

William Hays, formerly of Cincinnati, has been appointed general foreman, Glenwood Back Shop, vice J. J. Smith, resigned.

"Nick" Stinger, our old friend from Benwood, has accepted a position in the General Foreman's Office. Welcome "Nick," but it seems that you don't stay in town long enough to get acquainted. Then too, it is quite a long way to Cameron.

Please mention our magazine when writing advertisers

BABES IN THE WOOD—  
Mildred Nordman and Ella Blair

Why don't you buy the ring, marry the girl and then "can" the trips to West Virginia?

On Tuesday, April 18, Marshall Joffre was handled from Chicago to Washington on our No. 10. Pittsburgh Division officers are to be commended for their splendid efforts in putting the Marshall "over the top" (of Bakerstown Hill).

"Bill" Kane, fireman, Pittsburgh Yard, will be among the June brides—of course, I'm wrong again, but you know what I am driving at. Robert Vandergrift, Glenwood Roundhouse, will also be among 'em. Congratulations to both!

Shop Superintendent C. M. Newman is about the busiest man around just now, his mind being fixed on the drive which is to be inaugurated on May 15, and to continue for 30 days. At the end of that time, it is hoped that 40 Mikado engines will have been turned out of Glenwood Back Shop. This will be an exceptional performance and will be well worth the efforts of all our forces.

Score another for passenger service! David Flynn recently made a trip to Washington and while there met a friend of his just about ready to make a trip to Pittsburgh on another railroad, but after a little argument on the part of Flynn, decided to give us a trial. The trial has resulted in one more satisfied customer and at least one trip via Baltimore and Ohio, Washington to Pittsburgh and return.

How about a little MAGAZINE "dope?" I suppose everyone around is familiar with that phrase, but don't forget it! That's what we're always after.

W. F. Bonner has been appointed night foreman, Tenth Street. So far, so good, W. F., but don't let them kid you.

L. F. Peeples, assistant car foreman, Tenth Street, is seriously contemplating a trip to the mountains this summer. The work at Tenth is so strenuous, don't you know? Why not try Canada or Cuba, Louie? They say both are bracing.

The charming young ladies? Oh, they are Miss Mildred Nordman, efficient file clerk, Division Accountant's Office, and Ella Blair, the Titian haired beauty from Allegheny Shop. Scene? Schenley Park. Time? Easter Sunday! Action? Looking at flowers but for bows (beaux).

Whispers just before and after the wonderful dance held by the Welfare League on April 25. Yesterday—"Are you going to the dance?" "Why, certainly and I expect to have a wonderful time." Today—"Oh, I'm so tired, I could go to sleep standing up. I danced every dance and I'm so weary, but I met the nicest fellow. Anyway, it's hay for me at 6 p. m. this date."

# Can You Answer THESE QUESTIONS?

We are sorry to record two fatal accidents which occurred at Allegheny and 36th Street, taking the lives of two of our well known employes, Frank Russ, of Allison Park, and Anthony Chambers, of Millvale. Sincere sympathy is extended to both their wives and families.

Shoemaker (sometimes Engineer) "Jim" Grace is sailing for parts unknown and gives the date of his departure as June 3. Say, "Jim," how about that good looking girl who is sailing to the "Auld Sod" with you? You may as well tell us now as when you come back.

### Wedding Thoughts

The Bride—I wonder if Charley Van Wyck really does care? He looks awfully unhappy.

The Groom—I wonder if Syvilla McIntyre really does care? She looks darned unhappy.

The Best Man—This is my twelfth wedding since the first of the year. Wonder if there is any way to get out an injunction against the thirteenth.

The Maid of Honor—I wish the next wedding was going to be my own—with that good looking best man as groom.

The Ushers—And there's no kick in sight except the one we're making.

The Bridesmaids—These short skirts make us feel like ballet dancers. Wonder if we couldn't do a little kicking after a while?

The Organist—Half of 'em don't know whether I am playing a wedding march, a cradle song or a funeral march. What's the difference anyhow?

### Monongah Division

Correspondent, C. B. BAKER

Mrs. Margaret Bowman, clerk to the agent, Shipston, was compelled to be off duty for several days this month on account of an attack of the "flu," but is now able to return to work.

A. N. Peters has been appointed division operator, vice F. E. Fuqua, deceased. Pete is well known by practically every employe on the division and is well liked by every one who knows him. If good wishes will help any he should have no trouble handling the new work. We are only sad because he will have to spend a part of his time on the Wheeling Division.

Signal Supervisor and Mrs. W. S. Laswell were honored by a visit from the stork on April 16, who presented them with a second son. Laswell, not being a smoker himself, did not feel it incumbent upon him to pass around the cigars.

Operator Ellis Wilson, Chiefton, who has been sick for several months, is now able to return to duty.

The correspondent wishes to take this occasion to thank Agent T. M. Gillum, Shipston, for the items furnished for this issue of the MAGAZINE. If a few more of the employes and Veterans would follow his example, the Monongah Division would make a great deal better showing. We stand on the missionary motto; "All contributions cheerfully accepted."

On account of the slump in business, Dispatcher "Ed." Willey finds the time hanging heavily on his hands and has gone into training for a debate with W. J. Bryan on "The Descent of Man." He is also working out a very original theory on the transference of electrical energy from the sun to the earth.

We are pleased to note the return of Carpenter Foreman "Uncle John" Lieth, who has been off for several weeks with an injured foot. "Uncle John" is seventy-

- 1- What effect does thickness of fire, holes, banks or clinkers have on the admission of air through the fire?
- 2- Why are the dampers and netting provided in the ash-pan?
- 3- How is the steam end of an air compressor lubricated?
- 4- How does the handle of the angle cock stand when open? When closed?
- 5- About how many drops are there in a pint of valve oil when fed through a lubricator?
- 6- Does increasing the piston travel or brake cylinder leakage change the power of a car brake, and if so, in what way?

**SUPPOSE** you went up for your final Engineer's Examination today and they asked you these six questions?

Could you answer them? Perhaps not. But you certainly could if you had studied with the International Correspondence Schools.

You would not only be able to answer these six questions, but any others that happened to come in the examination.

For in just an hour a day, in your spare time at home, through the I. C. S., you can get a thorough working knowledge of boilers, their attachments, the best methods of firing and feeding, the construction and operation of cylinders and valve gears, the management of locomotives, and the construction and operation of engine and air-brake apparatus generally.

Don't wait until you have failed to pass your examination before turning to the I. C. S. for help, but start now and prepare yourself not only to pass, but to pass with a high average.

All it takes is an hour a day of study—an hour a day of the spare time that now goes to waste.

Just mark and mail the coupon printed on the right, and without obligation or

a penny of cost, get the full story of what the I. C. S. can do for you.

There's no better time than "right now." For to most men, "Tomorrow never comes."

four years young but handles his job like a youngster.

Engine crews on the Monongah Division have been making some enviable records in fuel performance. Engineer J. W. Hostler and Fireman R. Cullum handled No. 2, with engine 5107 and nine cars from Parkersburg to Grafton with a consumption of 7.7 pounds of coal per car mile, and made the return trip with No. 11 with six cars on 11.9 pounds per car mile. Engineer H. H. Hefner and Fireman L. Crane claims to have hung up the record for the G. & B. district on April 28, when they brought train No. 58 with three cars from Buck-

hamton to Grafton on 8.6 pounds per car mile. The following engineers made better than 90 per cent. in their fuel performance during the month of April: A. J. Brannon, F. Wilmoth, O. W. Hoffman, A. G. Ride-nour, W. M. Whelan, J. F. Tierney, C. R. Dotson, W. C. Eilers, H. F. Church, W. T. Eskey, W. G. Cross, E. Garvin and H. J. Meek.

Second Trick Chief Dispatcher and Mrs. Carl Theis are the proud parents of a new boy who arrive l on May 3.

Operator Ellis Wilson, Chiefton, and C. C. Mouser, Enterprise, who have been off sick, have both returned to duty.

The late Carson Newham, Monongah Division whose obituary appeared in the May issue

### Tygarts Junction, W. Va.

Correspondent, A. McCoy, operator

We are glad to note that R. E. McCutcheon has taken the matrimonial oath and settled down for a happy life. Accept our best wishes, Mr. "Bert."

E. F. Moats, Cove Run, bid in 2nd trick R. A., and is enjoying his spare time fishing. Joe is certainly some fisher, but enjoys seeing 'em jump in the frying pan much better than in the river.

### Charleston Division

Correspondent, M. W. JONES  
Secretary to Superintendent

"If you have ceased to smile, you have lost out in the game of life, no matter what your account may be."

Business on the Charleston Division during April took an upward turn. Even though coal, which represents a very large part of our business, naturally fell off to some extent, lumber and miscellaneous loading brought us up even with March. GOOD SERVICE is what does it, and with such service, there's no reason why we can't hold what we've got and get more.

It is with sadness that we record the death of the ten year old son of our friend, Conductor J. P. Reid. One Saturday not long ago, while playing with other lads of his own age, the ball they had fell into the river. In endeavoring to pick it out, young Reid fell into the West Fork, which at the time—due to heavy rains—was running high and swift, and though every effort was made to get him out, he sank and was drowned. His body was finally brought to the surface some nine days later, and he was laid to rest in the MacPelah Junction Cemetery. A large number of Railroad men and their families attended the funeral services. The sincere sympathy of every one on the division is extended to Mr. Reid in his great bereavement.

Recently one of our patrons had some important freight to ship from Richwood, W. Va. to Baltimore, for export, and made special request that an effort be made to get it to destination to catch a steamer. We put into Baltimore in four days. The following letter has just been shown to us:

RICHWOOD, W. VA.

April 22, 1922

Dear Sir—We have yours of the 21st., advising that Baltimore and Ohio 74736 arrived at destination on April 17, and 93228 on April 18. As these two cars left here the mornings of the 13th and 14th, we want to pay that it certainly is PRETTY WORK, and you are invited to have anything we possess. We would even go so far as to let you use our best FLY CASTING ROD if you would come and go fishing with us. McAdoo was DEAD WRONG to talk about the Railroads not functioning. Oh Boy—many thanks to you! Yours sincerely —"

Some letter we'll say, and SOME SERVICE too! There's more of the same kind where that came from for any one who wants it. BOOST the service.

Did you know we had a real live ACTOR in our midst? We didn't until suddenly the other day there burst upon our startled gaze the story of the grand success of Cash McOsker, chief clerk to the division accountant, in a real live play entitled "The Laughing Cure." "Mac" took the part of the leading man, his stage name being Dr. St. George Cary. Some name, some boy, some actor! "Mac" is a bashful sort, and we thought since he married he had settled down to a steady life. But, nay nay, Pauline! There he was—as large as life and twice as natural—all dressed up and mind you, no common every day part in the chorus, but a real live leading man. He was quiet about it, and did not even give any of us a chance to buy a ticket until it was all over but the applause. Well—the Division Accountant's Office has been named the Matrimonial Bureau, and every other kind of a bureau, and now it blossoms out as a real live theatrical agency. Rumor has it that Keith's manager was seen slinking in the by-ways of Weston, on the trail of a real good leading man, and we respectfully suggest to Mrs. McOsker that she "keep her eye peeled" or one of these days "hubby" may be listed with the missing. Of course our old friend Severns is proud of the success of his satellite and is basking in the reflected glory. Congratulations—no bouquets, please!

"The man who wins is the one whose head is a parking place for ideas and not a mere rendezvous for hair."

There—we did not notice until we had written it, that this is hardly the place for such a quotation. Nothing personal, "Mac" we assure you.

Our old pal, Yard Clerk W. C. Hefner, is attending the Clerk's Convention. In the meantime his garden is sadly neglected. Summer is coming, "Bill"—better hurry back. Two of our old Charleston Division standbys, Firemen E. P. Wood and H. A. Curtis, are attending the Firemen's Convention at Houston, Texas. Brakeman Fury and Safety First "Pat" Hickey are attending the Trainmen's Convention at Toronto, and Conductor Dav Curren is attending the O. R. C. Convention at St. Louis. Some stories we'll have to listen to when they come back, about what they saw in their travels. Your "inquiring Reporter" will make a special endeavor to see each one and to give you a real honest to goodness interview with them in our next. Which of them do you envy most? Bet you the vote would be strongly in favor of "Pat" and "Fury." Any objections? Ayes have it.

Fireman D. G. Stewart and his wife have been touring the eastern cities, and have returned home, after a fine time. Yard Clerk H. H. Cayton, Buckhannon, has just had his tonsils removed. We extend our

sympathy and hope for his prompt recovery. Inquiry today developed he was doing well.

We saw Brakeman R. D. Nicholson, Sutton, here a day or two ago. We also noted Engineer H. O. Bailey on his way to spend a vacation in Texas. Keep away from the border, H. O. The bull fighters might get you. We are told by a friend of ours down there that they are looking for real live engineers, or, as they call them there, "hog heads."

Weston news says "Sol" Fisher is back after a sick leave. We are glad he's better. We extend our sympathy to Engineer J. H. Stalnaker on the recent death of his small son. Brakeman C. A. Barrett, an old time member of the Freight Claim Prevention gang, has built a new house in Shady Brooke—not too far away from Schide's chicken farm. That really doesn't mean what it might be taken to indicate. But anyway—nuff said.

We heard the following dialogue the other day:

Mrs.—I'm going to Grafton this week.

Mr.—You are—like fun.

Mrs.—I have'n't been there for a week, and you know it.

Mr.—Well—who's boss around our house anyway?

Fearing to be in on the scene at the downfall of a fellow man, we faded quietly away, but next day when No. 65 left Weston we went down to see what was going on—and we found out who was boss in that house. Mrs.——was just kissing hubby goodbye, and getting on the train for Grafton.

Every day at 1.00 p. m. a touching scene is enacted on the Weston platform. *He* brings *her* down to the office, and waits until exactly 1.00 p. m. Then they have to tear themselves away. She goes upstairs to work—and dream—and he goes to work—and THINK. Some day if the soldiers' bonus bill passes—well who can tell what will happen?

Our friend in Gassaway fell down on us this month. We did not get anything from that side at all. That reminds us, won't the rest of you chip in and help? We would like very much to have more news from all over the Division. Our friends in the Charleston freight office remembered us for two months, and then apparently they got "weary of well doing" and didn't send any more. It's hard to make notes to cover the whole division, and make them snappy and interesting without a little help. Come across, girls and boys; notes and photos are thankfully received, and should reach me by the first of the month.

Gribbel says "The most successful men I have known have been those who have helped most men and women to better living and higher things. The most unsuccessful men I have known have been those who regarded wealth as the object of all endeavor. I have never known one of these, who, having succeeded in his ambition, was not a disappointed man."

The attention of all employes who are not already members, is called to our Relief Department. It's the finest thing of its kind you ever saw. This was brought home to the writer distinctly not long ago on a trip to the northern part of Pennsylvania. A fireman decided to build a home. He got it finished and moved in, then one day caught cold. He insisted on going out, caught pneumonia and died. His wife had a home. If he had'n't bought it through the Relief Department, where would she have been? There is no safer way or surer way to leave something for your loved ones than to get into the Relief Department. Try it.

Some one just handed us an old waybill "Clarksburg, Weston and Buckhannon Express," operated by the West Virginia and Pittsburgh Railroad Company," now the Charleston Division, dated March 5, 1895. "1 jug of ——— (don't dare write it in these prohibition days)—weight 10 lbs. express charges 25 cents, value C. O. D. \$1.65." Them were the good old days, weren't they? Of course nothing of the sort could possibly be shipped in West Virginia today.

"If you are on the Gloomy Linc. Get a transfer.

If you're inclined to fret and pine. Get a transfer.

Get off the track of doubt and Gloom. Get on a Sunshine train—there's lots of room.

Get a transfer."

Our Passenger Department is making a strong drive for business. The Charleston Division is doing its share to secure passengers for the Washington and other vacation tours this summer. We hope to make a showing.

Car Distributor Dixon is pretty busy these days. He's beginning to wear that worried look again. Know what that means? More orders for cars than he can fill. We hope to see those days coming again soon. Lumber business is booming, other shipments are picking up, and even at the risk of seeing those weary wrinkles in Charlie's fair brow—we'll say, Let's go!

Last Sunday, strolling with our wife and family, we met a young lady strolling also with a young man. She works for the Baltimore and Ohio in Weston, we'll not say where—and of course we stopped and were introduced to her brother. Funny, isn't it? We've known her all these years and had the impression she was the only one in the family. We've heard them called *cousins* often, but "*brothers?*" Oh, dear!

Supervisor "Mike" Harrington has just returned from Texas, where he went to attend to the winding up of the estate of his deceased brother. Forty-three years of service, isn't it "Mike?" Something to be proud of, and he's strong as ever, and still able to do a good deal better days work than you or I would—on the Gauley Line.

General Superintendent Scott, accompanied by Superintendent Trapnell, Division Engineer Brooke and other local

# BUY TODAY 10 MONTHS TO PAY

## Famous Bunn Special

Only \$7.50 puts a beautiful Bunn Special into your pocket. Small monthly payments of \$5.00 for ten months will do the rest. **Price \$57.50.** The Bunn Special is Lever Set, 21 Jewels, Adjusted to 6 positions. Montgomery R. R. Dial, Gold Filled Case, Guaranteed! Write Today for full particulars.

**L. W. SWEET, Inc., Dept. 842-L, 1650-1660 Broadway, N. Y. C.**

officers, is making a motor car trip of inspection over the Charleston Division. We hope they will find the effects of our recent campaign for GOOD HOUSEKEEPING entirely to their liking. Sure the boys have worked hard enough to make it a success, and we believe the Division is in pretty fair shape.

"It's no disgrace to be baldheaded unless the baldness is on the inside."

Now, Mr. . . . . we didn't mean that for you, so don't feel hurt about it.

The American Legion gave a dance in Weston not long ago. Everyone was there—that is, everyone of any account, although the number did *not* include us. Major R. Brooke—formerly of France, U. S. A., and Captain E. H. Nichols, also of France, U. S. A., were there, putting there best foot forward, and it is said a good time was had by all. Of course, both these gentlemen give the impression that they are very bashful in the presence of the fair sex, but to a looker on, they did not convey this impression. Look out, boys, you may think you're safe, but our reporters and informants are everywhere.

And now—if we write much more they

will have to print a special edition for the Charleston Division notes, and we will probably call down the wrath of the editor on our old grey head—so we'll stop. Thanking you for past favors, and hoping you won't forget—you boys and girls in Gassaway, Charleston, Elkins, Buckhannon, Richwood, etc., to give us some real "dope" from your stations for our next—we remain, etc.

Did you get a copy of the new G. S. T. circular 30-C that tells you all about how to handle foreign cars? And did you read it? If not, ask for one. Save all the dollars in WASTED per diem you can, and help along the good work, and BOOST the Baltimore and Ohio with your baker, shoemaker, grocer, and all your trades people, remembering that enough packages soon make a carload.

### Wheeling Division

Correspondents, MARIE SLATTERICK and L. W. WEITZEL

Miss Angela J. Applegate, correspondent, Benwood, W. Va., was recently the victim of a deplorable accident. In some manner she caught her left hand in a door at home and the first two fingers were crushed. The fingernail of the one had to be removed entirely. We are all sorry to hear this and sincerely hope the hand is soon well again.

Miss Olive Eskey, stenographer, Division Engineer's Office, attended the Musicians' Masked Ball on April 27, at the convention Hall, and won a prize of \$2.50 in gold. She was costumed as a harem girl!! We hope there were no Sheiks around!!!!

Fight fans will be interested to hear this: On Saturday, April 22, the first annual boxing tournament was staged at the Y. M. C. A. Auditorium. There were sixty entries. In the heavyweight class was our own Norman King Harrison, formerly of Parkersburg, but now of the Division Accountant's Office. In the semi-finals he was matched against Joe Cork from Martin's Ferry and outpointed him. In fact, he had everything his way from the first. Cork was quick on his feet but was unable to land telling blows. In the finals, the big surprise of the evening was sprung and King met and vanquished Charles Springer, from Bellaire, who has the reputation of being "it," and who has been meeting opponents for over a year. This was Harrison's first appearance in the ring, and he certainly

SO FAR—AND YET SO NEAR—

Please mention our magazine when writing advertisers

showed them all up. Maybe he isn't proud of the gold medal which was presented to him at the close of the tournament by Mayor Thomas Thoner.

John R. Padden, secretary to Superintendent Gorsuch, Wheeling, took part in the Knights of Columbus Minstrel Revue given in Wheeling on May 1 and 2. John was an end-man. He is clever on his feet besides being a good singer, too. Here's just one of the jokes he pulled: John to Interlocutor: You look kinda downhearted, Mr. Stauver, what's the matter?

Interlocutor: I've a good reason to look that way John. Y'see, I've a friend who had a serious accident. He swallowed a quarter and will now have to go to the hospital for an operation.

John: Well, can't the doctors see any change in him?

## Western Lines Cincinnati Terminal Eighth Street Station

Correspondent, ALLAN R. MONTJAR

Take a peep at Trainmaster R. B. Fitzpatrick, awaiting the arrival of President Harding's train, on Thursday, April 27.

Here also are four more of our employes at Eighth Street: Trainmaster C. J. Cleary, Division Engineer C. E. Herth of the Ohio Division; A. R. Montjar, chief clerk to trainmaster, and A. E. Busard, crew dispatcher. Three cheers for Fireman Carl H. Dreiver,

St. Louis Division side of Cincinnati Terminals. Mr. Dreiver, while in charge of engine 1584 with Engineer P. Schutz, working from 7.00 a. m. until 3.00 p. m. consumed 302 scoops of coal, an average of 14 pounds to the scoop or 4,228 pounds of coal, Lump coal from the "Lucy" mines was used on this trip, which was made on February 28. The temperature averaged 30 degrees during the entire day.

## Newark Division

CORRESPONDENT, B. A. OATMAN

We are fortunate indeed to be able to present herewith a picture of a trio of prize winning fox hounds, the property of Leon P. Stanford, skilled material man, Newark, Ohio, shops. Leon thinks the world of his high bred and privately trained fox hounds, and has spent many happy hours in the hills surrounding Newark, at nights, listening to their sweet music on the chase. Mr. Stanford divides his spare time between fox chases and baseball. For years he has been manager of the Newark shop ball team in the Industrial League of Newark, Ohio. He now is rounding up talent for the season of 1922 with the expectation of capturing the silver cup. Leon will have the full support of the Newark shop employes in making the season a successful one. Bow-wow-yo! yo! yo!

We were indeed sorry to hear of the sudden death of Mrs. Chas. H. Gartner, wife of our assistant roundhouse foreman,

After a heroic fight for life, she was rushed to the hospital for an operation and died before it was completed. She leaves her husband and family and host of friends, who, with the employes of the Baltimore and Ohio shops, extend to the bereaved their heartfelt sympathy.

J. A. Johns, Division Accountant's Office, attended the National Convention of the Railway Clerks, Dallas, Texas.

William Jacobs, passenger brakeman, Herbert U. Rine, chief clerk to division engineer, and William H. Dowden, C. T. timekeeper, Division Accountant's Office, have just returned from New Orleans, La., where they attended the Tri-annual conclave of the Knights Templar. The party left Newark on April 22 and arrived at New Orleans in time for the opening of the conclave April 24. After spending four days at New Orleans with, with other tourists, proceeded to Havana, Cuba, via the Louisville and Nashville and Seaboard Air Line, thence over the Florida East Coast line. Their trip was thoroughly enjoyed.

No publicity, no rice or old shoes, no tin cans or noise, but after scanning the columns of the daily newspaper dated April 25, we found that Miss Mary Ganey, Accounting Department, had quietly left for the city of Columbus and while in the Sacred Heart Church, had been married to Mr. J. C. Donaldson, who is connected with the advertising department of the Newark Advocate, one of our daily papers. All we can do now is to say, "we wish you both many years of happiness."

The following article found its way to the Newark Division correspondent's desk, unsigned, but worthy of presentation in the MAGAZINE, for it represents the efforts made by one of our Newark Division officers to make his property a model in the way of cleanliness:

Jack Quinn, D. D. (Doctor of Dirt.)

"Cleanliness next to Godliness." If this is true, our own Jack "Pete" Quinn is a near religious man, judging from the appearance of any surroundings over which he has charge. For years "Pete" was general car foreman at Newark, and a walk through the shop yards was a pleasure, a place for everything and everything in its place. Recently Jack was made superintendent of shops at Zanesville, Ohio, and to put it mildly, it looks as if someone had rubbed Alladin's lamp and made a fairy garden out of a desert. The plant at Zanesville was inspected recently by our general officers, and when the inspection was completed, Jack was given a cigar by the "Big Boss." Boys, you can all appreciate the difference between having that part over which you have charge, inspected, and being given a cigar at the conclusion of the inspection, and being criticised, as is so often the case. What is our loss, is some one else's gain. Jack, we feel our loss but we rejoice with you in your promotion.

Marietta, Ohio

Correspondent, S. B. HENDERSON, Agent

Our deepest sympathy is extended to our car record clerk, Charles Richardson, in the loss of his wife.

Our efficient cashier, Ralph Schantz, informed us the other morning that he has his hair trained to the point that he will say "Da Da!"

Marietta's veteran baggageman, Herman Henry, is whipping his garden into shape and expects to cross the tape ahead of all the rest with his cabbage and onions. Mr. Henry met with an amusing experience. During the showing of the Hagenback

ALL AROUND EIGHTH STREET, CINCINNATI  
Upper left: Trainmaster R. B. Fitzpatrick. Upper right: Yard Engineer Carl H. Dreiver. Lower picture, left to right: Trainmaster C. J. Cleary, Division Engineer C. E. Herth (Chillicothe); Chief Clerk A. R. Montjar, Crew Dispatcher A. E. Busard

NEWARK FOLKS

1. Miss M. E. Reid, our agent at Constitution. 2. Prize-winning fox hounds, the pride of their owner, Leon P. Stanford. 3. J. C. McWilliams and his trick dog, Joe. 4. The late Engineer and Mrs. Almer B. Preston. 5. Three heavyweights of the agent's staff at Sandusky. 6. Chief Clerk McKernon and Freight House Foreman Engles, Sandusky. 7. More of our Sandusky folk—pick 'em out

Wallace circus, he was presented with a complimentary ticket along with a reserved seat check. Upon presenting them at the main entrance he endeavored to pay War Tax on same and presumed the attached check was for that purpose. After the ticket collector removed his portion of the ticket, Mr. Henry was so pleased to think that the circus was not costing him anything, that he did not notice what the check was for and hurried in and took a seat in the bleachers. He did not discover his error until the next day while talking about the circus. When he found that he had cheated himself out of a reserved seat..... Well, the remaining part of the story must be omitted.

J. P. Kerwin, our demurrage clerk, has been spending several weeks in Charleston, W. Va. We are all wondering who she is.

Rate Clerk Walter Mellor is contemplating the purchase of a car in the near future. At present he is undecided as to the make; one day it is a Ford, next a Maxwell, Dodge, etc. We trust he will decide soon for the benefit of the office force.

Sandusky, Ohio

Correspondent, Miss I. C. MARTIN

Mr. C. H. Ronehouse, father of Yard Clerk H. R. Ronehouse, passed away in March at the advanced age of 72 years. We extend our sincere sympathy to the family.

Car Foreman E. L. Hannon has been promoted to the same position at Lima, Ohio.

Mr. Hannon has been at Sandusky for about three years. During that time he made many friends, who join with us in wishing him success.

Cedar Point, the wonderful inland summer resort, opened for the season on June 10. Indications are that this will be a successful season, judging from the booking already made to date for conventions, the largest to date being The International Bible Students. In 1919 this convention had an attendance of 5000; they expect 7000 or more this year.

Here is a picture of the group of employes at Sandusky, Ohio, who are responsible for the welfare of the Baltimore and Ohio at that point. Left to right: R. E. McKee, freight and passenger agent; Chief Clerk McKernon, Cashier Weingates, Ticket Clerk and Correspondent for the MAGAZINE, Miss I. C. Martin; Operator Walsh, Recording Clerk Stoffal, Way Bill Clerk Abele.

Here are the two oldest clerks on the Newark Division: Chief Clerk McKernon (left), Freight House Foreman Engles (right). Both entered the service of the Baltimore and Ohio in 1880, and have been in the service continuously since that date.

See our "THREE HEAVY WEIGHTS" located at Sandusky, Ohio, and members of Mr. McKee's staff. They are, left to right: Abele, Weingates, and Walsh. They line up just like a foot ball team for the pass. Abele is the man who starts off with the

way bill; Weingates gathers in the cash after the bill is made, and Walsh keeps the wires hot conveying the amount to the headquarters; or in short, Abele starts the play, Weingates secures the ball, and passes it to Walsh to complete the play. The positions in this team are known to railroad employes as follows: the waybill clerk, the cashier and the operator.

Annual Picnic—Baltimore and Ohio Veterans—Western Lines

It is officially announced that the annual picnic of the Baltimore and Ohio Veterans' Association, Western Lines, will be held at Buckeye Lake, Ohio, on August 17. All Veterans and their families are cordially invited to spend the day with the Western Lines Veterans at this beautiful place, the Atlantic City of Ohio.

It is also announced that the annual picnic of the Veterans' Associations, Eastern Lines, will be held at Pittsburgh, Pa., on July 20. All Western Line Veterans are cordially invited.

After a lingering illness covering several months, Mrs. G. E. Paul, mother of Trafford B. Paul, secretary to division master mechanic, Newark, Ohio, passed away on April 26. The husband G. E. Paul, is also employed in the Car Department, Newark. We extend to the husband and son, our heartfelt sympathy.

E. L. Hannon, car foreman at Sandusky, Ohio, since February 1, 1920, has been made freight car foreman, Lima, Ohio, shops,

effective May 1. We have learned to like Eddie, who has been with us on the Newark Division since February 1, 1919. Mr. Hannon entered the service of the Baltimore and Ohio at Zanesville, Ohio, on December 26, 1898 as clerk. He has steadily worked his way up through the Car Department in various capacities, both on the Newark and New Castle Divisions, and by supervising work under way at contract shops. We are sorry that we have to part with him but we wish to convey to him our best wishes for his success in his new position.

Effective April 16, A. R. Carver is appointed division engineer, with headquarters Newark, Ohio, vice R. C. Welch, who has been assigned to other duties. We welcome Mr. Carver to the Newark Division.

To R. C. Welch, who has been with us for the past two years, we are forced to say good bye, but we extend to him the best wishes of the Newark Division Staff officers and employes, all of whom have learned to like him.

We present herewith a good likeness of Miss M. E. Reid, agent, Constitution, Ohio. No wonder the Baltimore and Ohio does a successful business at this point.

#### Alfred B. Wheeler

Born December 9, 1860.

Died March 18, 1922.

Mr. Wheeler entered the service of the Baltimore and Ohio on August 1, 1883, working at the Newark freight house. He was transferred to the Yard Office as clerk on June 1, 1886; made yard brakeman on June 14, 1898, and while employed as brakeman had the misfortune to lose one of his hands. He was then made switch tender and filled this position until September 30, 1903, when he was transferred to Freight House, Newark, Ohio. On June 9, 1904 he was transferred to Newark shop, where he became turntable operator. On May 13, 1908, he was again transferred to yard as switch tender. This position he held until a short time prior to date of his death. Mr. Wheeler leaves to mourn their loss, his wife, a brother, who is Freight Conductor, O. K. Wheeler, and one sister. We extend our sympathy to the family.

Here is a picture of J. C. Williams, third trick round house clerk, Newark, Ohio, with his trick dog. Joe knows just now to teach him tricks. Besides training dogs for circuses and stage acts, Joe finds time to play ball, and for several years past has been the reliable back stop for the Baltimore and Ohio team at Newark.

#### Almer B. Preston

A deplorable accident occurred at Krigbaum road crossing, near Philo, Ohio, on the O. & L. K. branch of the Newark Division, on April 22. Passenger Engineer Almer B. Preston lost his life by being pinned between the tender and engine when Engine 889 left the tracks and turned completely over, falling down a fifty foot embankment. The accident was due to dirt being wedged in the track between the rails by men who had been working the road. When the front trucks of Engine 889 struck the crossing, the engine was raised from the track, and all the equipment following the engine.

Mr. Preston was born on December 16, 1867 and was a member of one of West Marietta's prominent families. He entered the service of the Zanesville and Ohio River Railroad Company over thirty years ago, soon after it was built, and advanced rapidly in the service.

Engineer Preston's service record shows that he was employed as locomotive hostler, Newark, Ohio, on October 1, 1890; he was promoted to fireman on January 16, 1891,

to freight engineer on December 4, 1894, and passenger engineer on December 16, 1904. This position he held continuously from that date until his untimely death.

Newspapers at both Marietta and Zanesville, the two terminals of Engineer Preston's run, devoted a large amount of space in their columns to comments on Mr. Preston as a man who was liked by all who knew him. We also have letter from Passenger Conductor E. T. Reynolds, who for over twenty years has been in charge of passenger trains hauled by Mr. Preston. We quote parts of the letter which show how closely the two men had become attached during their long period of service together:

"We were together for over twenty years and knew each other perfectly, no trouble, but always stood for each other. He was far above the average and stood for real things. I could say many things bearing out what the newspapers have said about him. We were friends and I will miss him. He was reliable; I never has to call his attention to things during the seasons when we were endangered by washouts or land slides; he knew where to look for them."

Mr. Preston is survived by his widow, formerly Miss Laura Bauer of Marietta, a daughter, Mrs. Walter H. Gerhart of Marietta, a son, Harry Preston of Parkersburg; three brothers, Calvin and Frank of Marietta, Edward of Canton, Ohio, and one sister, Mrs. Charles Steen, of Hamilton, Ohio.

We are indeed grieved to lose such a fellow as Engineer Preston. The Newark Division employes extend to those who are left to mourn, their heartfelt sympathy.

### Akron Division

Correspondent, J. A. JACKSON

Massillon, Ohio

Correspondent, WM. E. BRUGH

On May 2, Agent L. T. Keger had an accident. While in the act of pulling away the mail truck from train 48, the truck turned over, pinning him underneath. He injured his leg, but is back on duty again, none the worse for his experience. Safety First, Leo!

Brakeman W. S. Bourkel, Lorain, who has been working out of Massillon, had a slight paralytic stroke on May 6, we hope to see you improve quickly, "Bill."

June Maxine Howell, whose daddy is yard clerk, Dover, O.

Fireman L. R. Groff has taken a temporary vacancy as crossing watchman at Main Street, Massillon. Groff ought to make a success in that line of work.

We extend our sympathy to S. Domro, laborer, Roundhouse, whose mother died on May 8 after an attack of pneumonia.

A bouncing son, Robert, arrived at the home of Trainmaster and Mrs. J. Fitzgerald, on May 1. We all extend our hearty congratulations, and wish the greatest of success to the little fellow.

Brakeman G. R. Murrey has taken a leave of absence and has accepted a position hauling ice in Massillon. George is picking a cool job for the summer.

### Dover, Ohio

Conductor R. R. Ryan, working out of Dover, was up town looking the town over, when some one said, "Hello, Squakey." Ray said if he was in China, some one would call him "Squakey."

Conductor C. "Dutch" Stang brings the tale to Dover, that Lorain was dead, as all of the railroad men were working out of Dover now.

Operator J. A. Keifer, "GI" Tower, has moved his residence to the north end of the town. "Jim" said it was cheaper to move than to pay rent.

Engineer E. J. "Shotgun" Baker has purchased a new Buick. The first time Mr. Baker drove his car was from Massillon to Dover. Before leaving Massillon, he called Yardmaster Wilcoxon on the phone and wanted him to hold everything until he arrived at 13th Street, as he would probably need all of the road from Massillon to Dover.

Conductor D. Mathews has also purchased a new auto. Davy said he likes the car all right, except the brake. He has requested the car inspector to put a hand brake on it for him.

J. M. Sellers, formerly agent at Botzum, Ohio, has accepted the position of chief clerk at Dover, Ohio.

C. L. "Shotgun" Baker, ticket clerk, Dover, is making a great many trips to Martins Ferry, Ohio. What does his mean, "Shot?" We thought you were a confirmed batchelor.

A report is current that "Cy" Beller, warehouseman, Dover, is keeping the road hot between Dover and Canton. Expect to see cigars in order very shortly.

"Davy" Davis has bought a Nash roadster. They say a young lady has controlling interest in the car as far as touring goes.

Miss Mable Intermill, abstract clerk, Dover, looks forward to each Saturday afternoon so she can take her weekly trip in her Studebaker. Lately she has become an automobile (crank).

Miss Clara Haug, bill clerk, took a business trip to Cleveland recently. There must be something attractive there, as she has made several trips. We are afraid we will lose you, Clara, so be careful and don't make a mistake after waiting so long.

Our picture is of June Maxine Howell, daughter of Yard Clerk M. O. Howell. June likes to wear her daddy's Doky cap.

### Chicago Terminal

Correspondent, T. H. WILLIAMS

Who said it was'nt hot on May 9? If you think not, ask anyone who bowled in the Railroad Bowling Tournament, held in

Chicago on that date. Well, of course, its no use submitting the scores, as everybody knows that the Engineers were on top as usual.

It is with sad regret that we announce the death of Lars Thorstensen, painter foreman, which occurred very suddenly on Tuesday May 2. Mr. Thorstensen had been in the employ of this Company for about 25 years, and was regarded as one of our most faithful employes. He made a host of friends among the employes during his relationship with this Company.

We now have added another suburbanite to our list, in the person of our assistant engineer of Construction, R. L. Faithorn, who has purchased a beautiful home in Hinsdale, one of Chicago's choicest residential suburbs.

We would like to know why John Ahlgrim is so bashful when he comes into the office, he who is such a wonderful conversationalist over the 'phone.

Well, guess Lindeman will have to do all the gardening around Mt. Hope this summer. Why? Because of the new arrival at "Ted" Shea's place, which keeps him on the move all the time. No, it's not a grand baby, its a brand new Ford, and, believe me, "Ted" loves to tickle it to see how fast it can go.

Watching Maloney's Transportation All Star Bowling Team on St. Patrick's Eve, decorated with *green bow ties*.

Maloney the Captain, sent one down the line,

The ball went for a strike—fore it hit, it went blind.

For the pins all stuck fast 'stead of their usual falling,

And Maloney's face looked as tho it missed its calli'g.

Now Henning's the star on the Transportation Team,

The boy surely has 200E some transcontinental steam.

He sent poor old "Roller" sailing straight off for Home,

But Oh, the results! Like the burning of Rome.

Old Tanck came along with his "funeral ball,"

He needs all the space of Driscoll's dance hall.

"Bill," an old timer, took his time through the game,

And when the night was over, went home diked in fame.

Hajek, as usual, was chasing wild geese,

The ball slid the alley as though it was greased.

But 'twas a rabbit's foot, good-luck ring, and green tie,

That helped the old kid make the bowling pins fly.

Stuhl, known to all, as the real strike-out kid,

His ball takes a hook as around a stove lid.

He was made anchor man for one memorable night,

And Oh, Boy! he made the ball take a good healthy bite!

The following song entitled "The Fifteenth" is very popular around our office:

"'Twas the night before pay-day, and all through my jeans,

I looked in vain, for the price of some beans. Not a quarter was stirring, not even a jit.

The eagle had vanished, gilt edges had quit. Forward, turn forward, Oh, time in thy flight!

Oh make it pay-day, just for tonight.

### Chicago Division

Correspondent, F. N. SHULTZ

After an absence of five months in Southern California, Leroy Fowler and wife have returned, Fowler resuming duty as operator at Willard, Ohio. He says Ohio and the Baltimore and Ohio are good enough for him.

Word has just been received that M. S. Seeley died in Los Angles on May 12. Mr. Seeley was an agent on our Division for many years. He resigned two years ago while agent at Republic, Ohio, and moved with his family to California.

On June 1, Wawasee was opened for the season. Business will be good this year at this popular resort. Hotel accommodations have been increased and many new and beautiful cottages have been built during the past year. We understand contract has been let to build a large hotel on the site of the Inn that was destroyed by fire in 1920. The new hotel to cost \$175,000.

M. R. Gorsuch, second trick message operator at Willard, was recently called to Florida by the death of his sister, who was south on a visit and contracted typhoid-pneumonia.

Agent C. E. Shaffer, LaPaz, Ind., is seriously ill, and has not been able to work for several months. He has been a faithful employe and his many friends are hoping that he will soon be back in the harness.

M. W. McCormick, third trick man at Milford Junction Tower, received word on May 10 of the death of his mother at Minorton, Ohio. He was relieved and immediately left for his former home.

### South Chicago

Correspondent, ESTHER J. SPREENBERG

The name of Frank Bastl, reconsigning clerk, Chicago, now appears on the "Honor Roll" and he deserves much credit. By prevailing upon consignees, in the handling of two different cars, to accept delivery at another point, he saved the Baltimore and Ohio Railroad a total of \$142.70. Mr. Bastl is highly commended for his alertness. Keep up the good work.

Mr. Rosenthal, in handling a car of radiators in the same manner, saved the Company a matter of \$19.22. This is the fourth good mark Mr. Rosenthal has opposite his name. Mr. Rosenthal, by the way, is reconsigning clerk, South Chicago. We hope to have many more such good reports from both Mr. Rosenthal and Mr. Bastl.

Edward Eckert, our messenger, made another trip to Garrett, but this time it was not as exciting as the last trip. Perhaps Edward saw more of Garrett on his second trip. Tell us all about it, "Eddie."

Another wedding to report and still more eligibles. This time it is our interchange clerk, Miss Kathryn Pease, who was married to Mr. Elmer Moore, on Wednesday, May 3. They spent their honeymoon in the East. Kathryn was presented with a beautiful electric coffee urn by the office force at South Chicago. Our congratulations and best wishes are extended to Mr. and Mrs. Moore.

### Ohio Division

Correspondent, A. E. ERICH

The prophetic event finally came to pass, Charles Conner, Division Accountants' Office, has taken the final plunge and is now a married man, starting on this all-important undertaking on Thursday, April 27.

He and his bride received quite a "send off" from his fellow employes when leaving on the honeymoon trip. Each passenger on the Pullman, in which they embarked on this journey, was furnished with a letter of introduction, requesting that they give all consideration possible to the happy pair. From all reports, this request was complied with seven-fold. Of course, there was plenty of rice; in fact, after the train left, it looked as if a late snow storm had visited the depot platform. A beautiful set of silver was presented by the office for e. We congratulate "Charlie" and sympathize with the bride.

Brakeman Harold N. Graves joined the ranks of the benedicts on April 26. He received a nice "calf-wagon" ride on the following day, in honor of the event. Congratulations!

And still another. Roy Francis, carman apprentice, has been claimed as another victim of "Cupid." Best wishes!

G. W. Seffens, clerk, Division Accountants' Office, has left the "fold" to study and later become a chiropractor and neuropathist. We wish him success.

We cannot understand why it should be necessary for a certain young lady, employed in the Division Accountant's Office, who has always been considered able to take care of herself, to have the protection of a "policeman" when trying to locate a seat at a circus. However, being a good Baltimore and Ohio employe, we presume she felt that SAFETY FIRST must be practiced all the time. But, remember, Ruth, "policemen" are not always to be depended upon.

Cooperation is the—  
Foundation of FRIGHT CLAIM PREVENTION.  
Body of SAVING FUEL.  
Soul of SAFETY FIRST.

M. A. Fox, boiler washer, is smiling over the arrival of a second son. Congratulations.

James Hull, boilermaker, and F. M. Nichols, are both proud fathers of daughters. Congratulations!

Oliver Hedgepath, we are informed, has joined the married man class. Mr. Hedgepath is a shop laborer. Good luck!

Operator Harry Boblet, D. A. Tower, is learning "bee" keeping, he being an apt pupil of Instructors "Joe" Phillips and Littlejohn.

On April 22, Lillian Flynn, stenographer, Master Mechame's Office, was left to care for her little nephew, Jack Rigney, age about three years, during the absence of his parents. Shortly after, while she was engaged with other household duties, the little shaver suddenly decided that he wanted an ice cream cone, and went out of the door

and up the street about four squares to his father, who is employed in a drug store. When Lillie discovered that the little lad was missing, she became very excited, running out on the street saying over and over again, "I have lost my baby." Pedestrians, inquiring as to what was wrong, could obtain no information other than these few words. She continued up the street, dressed in a "bungalow" apron, finally going to the police station and reporting the missing child, and then to the drug store to her brother-in-law, where lo and behold, there sat little "Jack," contentedly eating the desired ice cream cone, entirely unaware of all the excitement he was causing.

We would suggest that "Lillie", in the future, when she is to take care of her nephew, have a supply of ice cream cones, also a nurses' uniform would do much better than a "bungalow" apron, in case it should be necessary to go after him.

The informant and correspondent both have been threatened with their lives if mention of this was made through the MAGAZINE, and in order to play safe both have taken out additional accident protection insurance. If there are no notes in the next issue, the readers will know the cause.

Conductor Phillips informs that we had a busy day on May 1, having hived three swarms of bees in three hours. He also states that this was done without a sting. We will take his word for that.

We are sorry to chronicle the serious illness of Engineer C. W. Ramsey, better known as "Buck."

Operator J. B. Baker and wife enjoyed a three weeks' sojourn in Kansas City. "Bake" said he would have come back sooner, but "doggone, my wife wouldn't come back, so I stayed as long as she did."

Can you imagine the "disappointment" of A. J. Saunier when he heard the dispatcher say, "Pleasant Plain, stay in for the block on extra east, Nos. 85 and 3," knowing he wanted to go fishing? Emphasize your closing hour next time, and maybe he will take the hint better.

Brakeman Cliff Griffith can tell a true "fish story" this time. "Cliff" went to O'Bannon on May 4, and caught twenty fish, mostly suckers, weighing about twenty-five pounds in all. The grand catch was exhibited in the office at Chillicothe, therefore the "verification" of the tale.

Operator W. J. Harris, "DO" Office, has an interest in a store at Chillicothe. He says he can sell "stuff" as cheap as any others, so why not patronize him.

Ask Dispatcher J. R. Neff where he can get cheese in Chillicothe for 19 cents a pound.

Miss Margaret Townsend, operator, Harpers, has purchased the Given's Store and residence at Harpers, and is selling groceries right and left. Dispatcher Pat Moriarity says, "She is all right and sells things cheap, but she lets the butter age just a little beyond my liking."

#### Things we would like to see:

Nester—chasing a ground hog.  
"Tommy" Stephenson—hopping off No. 3 on the west end.  
Doughman—making an explanation to his best girl.

Barrett—paying his wife the \$1000.00 bet. A little better explanation on this follows:

She—Mrs. Ed. Barrett (operator).  
He—Mr. Ed. Barrett (also an operator).

#### ACT 1

She—I bet you can't drive the Ford.  
He—I bet you \$1000.00 I can.  
She—I'll bet you.

#### ACT 2

He starts the Ford and travels at a high rate of speed into a deep ditch, turning completely over.

He—!!!!!! ??????

#### ACT 3

He jacks up the wheels and the jacks fall down, machine falling on the unlucky victim.

He—Oof—  
She—Oh!

#### ACT 4

Wrecking crew called to his rescue and he is released after a few hours of extreme fright.

Considerable said in the way of explanation.

She won the bet. Did he pay it?

Curtain.

#### The Safety Agent "SEZ"

##### Go Back and Flag

The danger of a rear end collision begins at the moment a train comes to a stop on the main line. The only safe protection against this danger is to do exactly what the rule says "GO BACK AND FLAG." It doesn't say "Flag when you think it is necessary, when there are curves or when the weather is such that you do not care to expose yourself." Don't allow yourself to say, or even think, that in certain cases it is not necessary. The experience of terrible accidents show that IT IS NECESSARY. You have promised to do it and you are paid for doing it, and your own sudden death should be the only reason for not doing it. GO BACK AND FLAG AND BE SURE THAT YOU GO BACK FAR ENOUGH.

Clifford Erich, Stores Department, is the proud father of a baby boy. Both mother and child are doing nicely and "Cliff" has the smile that won't come off.

E. W. Barrett, operator, Leesburg, has purchased a new home in that "Burg." He says he is tired of boarding in a hotel. He also purchased a cook book and his wife intends to cook the meals in the future.

I am very grateful for the help I have had with the news this month, particularly to W. E. Littlejohn, who contributed such a large number of items. It is hoped that the hint will be taken and others contribute. If you cannot send an item, send a photograph.

#### St. Louis Division

Correspondent, H. F. SMITH

A. A. Knox, Ivorydale Shops, has been appointed boiler foreman at Washington Shops.

J. P. Mangin, Washington, Indiana, has appointed boiler foreman at Storrs Roundhouse.

##### Some Things We Would Like To See

"Gib" without a list of material he needs.  
"Dot" with the boiler forms all signed.

Wagenman not calling 75 to ask if his paycheck is there.

"Billie" not arguing with the ladies.  
Somebody not wanting a force statement.  
Clay Creager with his house completed.

John Frederick, "Freddie" Fitts and "Billie" Donahue in vaudeville.

A GOOD ball team.

Trainmaster Smith has excellent qualifications for a trainmaster, but as a chauffeur he is not rated so high, especially since the other night when he ran his car into the ditch while taking friends out sight seeing. F. A. Conley, M. A. McCarthy and Jerry Odom were among the injured.

High water at Beman—Above, Trainmaster Pritchell; below, sand bags for high water

The Car Department, Washington Shops, has completed 25 new caboose cars and is now making preparations for the building of fifty-eight additional caboose cars. General Car Foreman Teed is making a nice showing on his output of both freight and passenger equipment.

The two accompanying pictures show the high water looking northeast from Beman, and the large number of sand bags which were filled from the banks along right of way and placed on track in the flood area between Beman and Vincennes. Through the constant and efficient work of men stationed at this point we were able to continue operation when the entire Wabash Valley was experiencing one of the highest flood stages ever known. The imposing figure in the foreground is Trainmaster Pritchell, the "Beman Operator." Service into Beardstown on the Springfield District was crippled because of the high waters of the Illinois River, it being necessary to detour over two foreign lines in order to reach this city.

At the recent annual banquet of the Commercial Club of Flora, addresses were made by Industrial Agent G. W. Arnold and Assistant General Freight Agent Galleher. These were well received and were favorably commented upon.

#### We Saw This "THE STENOG'S VACATION"

(Sung by her Boss to the Tune of "My Bonnie Lies Over the Ocean")

My tYpust is oi hor vacation,  
My trpist's awau fpr a week,  
My trpudt us in hwr vacarion,  
Wgile thse damu kewps pply hudge and seek.

Brung becj mu bOnnie ti my, tp mr;  
(Contd)  
B)ng bSxj, b6ng, bicx,  
Phing bozk in<sup>ce</sup> beinino-o mx; CH Helk?

One of our employes was mentioned in the Safety Flashes for the month of April. Let's keep our names out of this publication. The Charleston Division says "THINK ABOUT IT." Thinking twice about it wouldn't be such a bad idea.

With the additional passenger service now in effect, local Passenger Conductors McEvilly and Badollet bid in Trains 3 and 12, Conductor Ingraham, from No. 29 and 30, also bidding in Trains 3 and 12. Freight Conductors Thompson, Evans, and Swartz have risen from the ranks and are handling Trains 61 and 62 and Trains 67 and 68.

Promotions seem to be in the air and Brake-men S. A. Reed, E. A. Rahn, "Jim" Hart and Earl Milligan have been made full fledged conductors on the Illinois Sub-Division.

#### Accounting Department

Our first spring wedding took place on April 27, when Miss Josephine White of Seymour became the wife of Motive Power Accountant L. F. Isenogle. Mr. and Mrs. Isenogle went to Dallas, Texas to attend the Clerk's Convention, to which Mr. Isenogle was a delegate. After a four weeks' visit in the South, they will be at home to their friends in Washington, Indiana.

Fuel Clerk Earl Harrington is back on the job after undergoing an operation at Cincinnati. We missed him while he was gone and we are glad to see him back in his usual place.

Earl Dykins is filling the vacancy created by the attendance of Carl Bier at the convention in Dallas, Texas.

Quite a number of changes have been made in the personnel in the last week or two. John T. Connolley was with us for a short while on the messenger job, later as general clerk, but has now accepted a position with a local bank. "Tom" Kell is now performing the duties on the messenger job, with Arthur Phillips on the Income Tax position. Earl Dykins is to be granted a leave of absence shortly. He will be missed and we trust his health will permit his early return. "Dick" McCrisaken is on the job after a week's absence account sickness. Inspector of Accounts Bassett is back from a month's visit (?) in Baltimore. We'll get the force all straightened out about next December. Bert Ulm is wearing one of those "smiles that won't come off" well he is Daddy now—why should'nt he? Congratulations, "Yum!"

Saw Jess coming down the aisle one day and one of those wastebaskets flew up and hit him. Steps should be taken to see that they are muzzled. They are dangerous to the peace of the community.

Our idea of a wonderful surprise: To have someone send us a few notes.

#### Toledo Division

Correspondent, EDWARD M. MANNIX

#### East Dayton, Ohio

Announcement extraordinary! Mr. and Mrs. Normaley arrive in the United States after a prolonged visit somewhere. Such is the joyful news flashed to us by the Optimistic Club of America!

June is now with us and with it one of the most humane campaigns ever undertaken by the combined railroads of the United States, that of education for elimination of accidents at railroad crossings. Toledo Division is charged with its share of education in this matter. Every employe will be called upon, and we can give our Superintendent, R. B. Mann, the assurance that not one will be found wanting.

East Dayton again has "No-Accidents" to report. This is the proud record of our shops and roundhouse. Education pays big dividends in Safety stock, and every employe is a stock holder.

Hear about Frank G. Sehart, our Roundhouse Foreman? Yes, a New Maxwell. O, boys, and a beauty! Frank has a smile a mile long now when he comes rolling around the corners. Up to date all telegraph poles and water plugs are still standing.

Our road foremen of engines, M. P. Hoban, W. B. Kilgore and O. R. Stevens,

have been congratulated by Superintendent R. B. Mann, not only for the efficient manner in which our increased business is being handled, but for the record for fuel saving established by them, which sets a new mark and places the Toledo and Wellston Divisions in the lead over our entire system.

Nice work, fellows. Teamwork counts!

Harry C. Bullion, engineer, Wellston Division, and Thomas Conway, air inspector helper, recently got into a heated controversy over the relative merits of different pumps. As Bullion was leaving on his engine, Conway shouted, "I guess you're the guy that put the Bull in Bullion." "If I did, you must be the Guy, that put the Con in Conway," was the reply. And so it goes.

Are you reading Engineer Harry C. Franks' letters to his Brother John! Look them over carefully, they are the real stuff. More demands for MAGAZINES than we can furnish, so will have to ask our editor for a larger allotment at our point.

The Toledo Division established a car moving record that was never known in the history of this division before when we moved seven thousand one hundred and fifty-six loaded cars in one day, with no delays, no accidents, no failures of any kind whatever. I tell you boys, this is some Division, and we are all proud of it.

Again we have had the pleasure of a visit from our executive officers from Cincinnati, Messrs. Mitchell, Malthaner and Galloway, and again they leave with the same impression of East Dayton, living up to her reputation of excellence and proficiency, where one works for all, and all for one.

#### Division Accountant's Office

Correspondent, G. M. McBRIDE

The Toledo Division is breaking all past records on business. For instance, on May 6 a record of 113 trains was recorded—4006 loads and 1350 empties, a total of 7156 cars. Engines are being worked to their full capacity and more forces are being employed daily everywhere along the line to take care of this increased business. Toledo dock is dumping cars at the rate of one every one and one-half minutes.

This only means that each one will have to apply himself or herself just a little more to business. The old adage, "An idle brain is the devil's workshop," does not apply to the Toledo Division. This is a good indication that we are thinking business, talking business and acting businesslike.

Louis Roehm has been assigned to the position of stenographer to the chief clerk of the Dayton and Union Railroad. While we regret to lose so valued an employe, yet our good wishes follow him to his new position.

"Joe" Brown has accepted the position recently vacated by Mr. Roehm. We welcome him to our midst.

Cyclones seem to be playing havoc at Cridersville. Latest reports are that one family—man, wife and one year old infant—was picked up and carried across the country but not killed. All of the buildings were destroyed. Five houses in all were completely torn to pieces. The cyclone started two and one half miles west of the town and extended two miles northeast.

Miss Gertrude Hutzel, Division Accounting Office, and Miss Margaret O'Connor, Superintendent's Office, will soon leave on their vacations. Rumor says they are headed for "Cuba." Gertrude says it will be no use to trail her with tin cans or jugs as

### The Vose Grand

has the incomparable *Tone*—the one quality above all others which makes a real piano. The exquisite tone of the Vose Grand distinguishes it from all other pianos.

#### We Challenge Comparisons

Write for our beautifully illustrated catalog and floor pattern of the Vose Grand, also our easy payment plan.

## VOSE

she cannot be bothered with Customs officers.

There has recently been organized a physical class. Mary Myers is the prospective student. Mary can almost bend over and touch the floor—and "pep"! She's got it in both arms—learning rapidly. Perhaps she may be a pugilist some day, who knows?

Gertrude Hutzel has found a new way to avoid being bothered when busy. Gertrude says if you are busy and do not want to be bothered with people standing around talking to you, just give them something to eat and they will leave at once. It works—she tried it.

WANTED—Any old newspapers you may have. Can use them to good advantage on my chair.

—Vern Priser.

Eugene McKenna, material clerk, was instrumental in securing a shipment of two carloads of cattle from Sidney, Ohio, to Youngstown, Ohio, on April 17, via the Baltimore and Ohio, exclusively. Mr. C. M. Smith, the shipper, had been using a competitive line, but after his conversation with Mr. McKenna, he was convinced he could save considerable money by merely driving his cattle a few miles further to our line at Sidney, Ohio. The shipment was routed Baltimore and Ohio to P. & L. E. at New Castle, Pa., to Pulaski, Pa., which routing entitled the shipper to Pittsburgh rate which was considered less than he had been paying foreign lines previously. Mr. McKenna is highly commended for the interest and loyalty which he displayed.

He also holds the distinction of being in possession of a commendable letter from Mr. Heiland, our esteemed district passenger agent, for advance information which later resulted in our Company securing a party of 75 last July to Winona Lake, representing the Westminster Choir, of which Miss Clayton, another material clerk is a member.

Good Morning, Evelyn Jean Beringer!

We are anxiously waiting to learn which of the two material clerks will receive the honor of securing this party this year. No doubt other clerks in the Division Accounting Office will use their efforts in behalf of the Baltimore and Ohio. We would like to mention this in the columns of the MAGAZINE.

The accompanying picture is of Evelyn Jean, the daughter of Ed. Beringer, Maintenance of Way Bureau.

With the approach of warmer weather the noon day ball games have also made their appearance. The boys of the office evidently enjoy themselves immensely and claim the exercise is indispensable. Mr. Hartman, our fuel clerk, believes that a tailor could be used to more advantage than an umpire. For further particulars, refer to Hartman, Kinninger and Harker.

The saddest word of tongue or pen—"Eddy Snyder's late again."

We are told that Harold This recently acted as best man at a wedding but that he is inefficient as best man. He forgot to kiss the bride.

"How far is it around the world?"

In girlish innocence asked she.

"Oh! Let us measure it, my dear"

Her lover made reply, "and see."

And when he placed his strong right arm

Around her waist so small and trim,

He found it was not very far

For she was all the world to him.

—V. E. Priser.

We presume, of course, that the young lady mentioned is now Mr. Priser's wife.

Now that vacation period is here, we miss some familiar face almost every day. We are glad to note, however, that their smiles are just a bit brighter upon their return and there prevails that feeling that they are glad to get back in the Baltimore and Ohio circle.

#### Lima

CORRESPONDENT, R. A. GARRIGUS

Welcome! Sandusky's loss is Lima's gain.

On May 1, Car Foreman E. L. Hannon, Sandusky, Ohio, was appointed car foreman at Lima, vice W. E. Baker, assigned to other duties. Mr. Hannon has been a member of the Baltimore and Ohio family for 21 years. Welcome, Mr. Hannon, let's make 'em all look up to Lima, now.

A careless man is like a Bolshevik—he doesn't know any better. YOU SHOW HIM!

Clarence Ream, material distributor, is the proud father of a nine pound baby girl. Congratulations, Clarence!

Insurance can never pay for a lost arm or leg. DON'T TRY IT.

Mrs. Otto Walburg, president of the Ladies' Auxiliary of the Veterans' Association, attended the convention of the Auxiliary of the B. of R. T. at Toronto, Canada.

The careful man is an asset to the Company.

James Price, car repairer, who has been off duty for several weeks account of injuries, is back on the job again.

Read your Safety rules book today. It'll be worth while.

C. H. Garing and C. T. Robinson, Chicago Division, were visitors during the month. Incidentally, after seeing the amount of business being handled by the Toledo Division, Mr. Robinson was forced to admit that the Chicago Division is only a branch of ours. By the way, Mr. Robinson, did you ever get that box of El Versos?

Have you read Safety rules 56 and 68? DO IT TODAY!

At a recent meeting of the Toledo Division Auxiliary of the Veterans' Association, the name of the Auxiliary was changed to the "Lehey Division," in honor of Patrick Lehey, pensioned veteran car repairman.

#### North Lima Yards

By A. SWITCHMAN

Come boys, let me speak a few words,  
Just a little poem about North Lima  
Yards.

Right here I'll tell you it will be all true,  
So stamp your approval when I get  
through.

The yard is made up from all walks of life,  
Some men are single and some have a wife,  
Some men are talky, always hunting for  
news,

While others are quiet and pose in recluse.

Now I want to keep straight from the start  
to the end.

Who'll be the first to come under my pen?  
Now I have one in mind who is ever worthy  
It's the general yardmaster, Mr. Jim  
Murphy.

Now just a word with his kind permission,  
He is not surpassed on the whole division.  
The first to start and the last to stop,  
With his two able helpers, Jennings and  
Copp.

Now boys, watch me closely, I don't want  
to get wrong,  
But there's not a conductor who can beat  
old Grant Long.

Swift as a deer, he climbs cars like a spider,  
Keeping one eye on Saunders, the other  
on Snyder.

John Sweeney comes next upon our big list,  
With a goodly crew I think he is blessed.  
He's never afraid to go any where,  
For he always depends on Rube's hot air.

There's a host of conductors, that you all  
know,  
There's Shelly, Weaver, Stratton and  
Show,  
Blackstein and Conway, they all do just fine.  
While Dempster and Woods are always  
in line.

Now there are other trainmen who can take  
the runs,  
Clymer and Meeks, and also George  
Ponds.

They are all clever, we admit it is true,  
But this is the trouble—they know it, too.

Now the car inspectors stand out alone,  
Their master of ceremonies is Carrey  
Doan.  
No wheel gets by them when it is flattened,  
I can prove this by Windy, Stinebaugh  
and Patton.

The operators also we must not go past,  
The men who perform the most difficult  
tasks.

For the key is no place for a fake or a fluke  
And we'll stake our lives on our noble  
"Duke."

But the clerks, Oh! how I wish we could  
skip,  
They're always in trouble from the nose  
to the hip.

They put a car in a drag as slow as could be  
When the bill plainly showed it to be a  
Q. D.

Of course they're condemned though they  
try to make good.

Once in Train 94 they put a car of scrap  
wood.

And then to get right and make up with their  
bosses,

In a ninety car drag, they put a car of race  
horses.

#### What Made Her Go

While crossing the English Channel from  
St. Malo to Southampton I met an English-  
man from near Essex. The following is a  
portion of our conversation:

Essex: "Beautiful boat I say. Wondah  
what makes (h)'er go."

Yours Truly: "Screws, Sir."

Essex: "Aw, really?" (and after a  
pause) "Aw, I say—that cawnt be. You'r  
spooing. It's the screws that (h)'olds  
(h)'er togawther. They cawnt make (h)'er  
go."

G. K. Seiber.

Customer: "Have you frog legs?"  
Waitress: "No, I ain't, smarty. Me  
short skirt makes 'em look thata way"  
—Axident Ax

Left to right: L. E. Barrett, shop clerk; W. Wendler, assistant passenger shop foreman; H. W. Chew, passenger car foreman; R. A. Garrigus, Magazine correspondent

## Pensioners' Roll of Honor

(Continued from page 25)

### Simon Nicholson

Simon Nicholson was born on October 16, 1852 at Upper Turkeyfoot, Pennsylvania. Here he attended school up until the age of seventeen, when he left and went to work on his father's farm. He entered the service of the Baltimore and Ohio Railroad Company in 1868 and helped to build the road from Pinkerton to Casselman. From there he went to Brooks Tunnel and helped in the building of this tunnel. While this work was under construction, trains went over the top of the hill. The old grade is plainly discernible to-day and is quite a curiosity. Next, Mr. Nicholson was engaged in helping to build the present Berlin Branch. On the first day of March, 1872 he started to work on the section at Casselman, where he remained for five years. He then was transferred to the section at Pinkerton; on March 1, 1881 he was made foreman of the section at that point, where he remained until he was transferred to Meyersdale in 1882, as section foreman. In the latter part of 1883 he was transferred to the Berlin Branch as foreman. Here he faithfully served the Railroad Company until he was pensioned, on March 1, 1922.

Mr. and Mrs. Nicholson have raised a large family of sons and daughters, some of the sons being employed in positions of trust and responsibility with the Railroad. Mr. and Mrs. Nicholson reside in a comfortable home at Berlin. Here they are extremely happy in their declining years in the consciousness of a long and well spent life in the society of their friends, children and grand-children.

## Homer H. Bryan

Homer H. Bryan was born on November 23, 1855 at South Marion County, Indiana. His parents were John S. and Harriett Bryan. At the age of seven Mr. Bryan, with his parents, went to Xenia, Illinois, where he attended county school until he was eighteen years of age. He then worked in a woolen mill for some years and, at about the age of 23 entered a flour mill in Xenia. In January 1883 he obtained employment with the O. & M. R. R. as brakeman. He was promoted to conductor in 1886. In this position he remained until he was pensioned, this year.

In 1879 Mr. Bryan married Miss Rachael A. Friend. To this union there were born two children, Dr. C. S. Bryan of Vincennes, Indiana, and Fred E. Bryan of Chicago, Ill.

## New Shipping Platform at Wilmington

**F**REIGHT Agent A. D. White, Wilmington, Delaware, has asked us to call to the attention of our employes the fact that the Railroad has just completed in our Shipley Street Yard there, a platform which will take care of shipments to be loaded or unloaded in end door or side door, or on flat cars, and will greatly facilitate the handling of large commodities, especially automobiles.

Here is a golden opportunity for our employes in and around Wilmington, but especially in the city itself, to let their shipper friends know of the additional service offered by our Company, and thus to attract additional business to our lines.

## J. J. Groeninger Honored by A. M. R. Employes on Completion of Fifty Years Service

By Roland Stehl

Clerk, Revision Bureau

**O**N the afternoon of Thursday, May 18, an air of secrecy pervaded the whole sixth floor of the Annex Offices, where the Revision Bureau of the Auditor Merchandise Receipts Department has its headquarters. Outwardly everything appeared to be normal; typewriters were bang-banging all around us, clerks were busily bending over their desks, and the only commotion noticeable was in the Comptometer Group, from whence a burst of illy-repressed murmurings and gigglings would break forth ever and anon, causing the rest of us to ponder over the old question of "Why the hub-hub?"

The tension became greater and greater as the afternoon wore on until we were almost at the breaking point of asking questions. Then someone couldn't hold the secret any longer, and we learned that the day marked the fiftieth anniversary of service with the Baltimore and Ohio R. R. for J. J. Groeninger, head clerk. A celebration had been planned secretly and our comptometer operators were much excited over the prospect of being in charge of the culinary arrangements. From then on we watched

and awaited developments—not silently, I'm afraid, because everyone had suddenly lost all interest in everything but the big surprise.

The object of all this mirth and excitement was working at his desk as usual, totally unaware of the looks, giggles, and whisperings going on around him. At about four-thirty, Assistant Auditor H. S. Mac-cubbin sent for Mr. Groeninger and chatted with him until quarter of five, when he was spirited away to the seventh floor at the call of Assistant Auditor N. F. Davis. At that time things began to happen. The elevator doors flew open and in walked Comptroller J. J. Ekin, Assistant Comptrollers J. P. O'Malley, W. D. Owens, and F. A. Devereil. A minute or so later came Mr. Wood of the Welfare Department, C. W. "Charlie" Pledge, agent at Claremont, Md., L. A. Lambert, auditor Coal and Coke Receipts W. B. Dudderar, assistant auditor Coal and Coke Receipts, C. H. Pouhairat, Auditor, Passenger Receipts, L. M. Grice, assistant auditor, Passenger Receipts, J. L. Hayes, division freight agent and several of Mr. Groeninger's associates of the Traffic De-

**J. M. LYON & CO.**  
2-4 Maiden Lane New York

partment. These gentlemen gathered in Mr. Rittenhouse's private office, and after divesting themselves of their rain-soaked outer garments, chatted for a few minutes while Mr. Groeninger was sent for. To say that he was astonished upon seeing them would be putting it a trifle too mildly. He was literally smiles all over.

Then began the triumphal march to the chief clerk's platform while about one hundred of Mr. Groeninger's fellow employes seated themselves or stood nearby and waited for the festivities to commence.

Mr. Byrd, chief clerk of the Revision Bureau, arose and announced that in view of the fact that this was the fiftieth anniversary of Mr. Groeninger's service, it had been

thought fitting and proper that some recognition should be made of the event, and to that end a committee had been formed which had arranged a demonstration in his honor. After extending to him his personal congratulations, Mr. Byrd introduced W. E. Rittenhouse, auditor of Merchandise Receipts as the chairman of the committee.

Mr. O'Malley and a few others then delivered short speeches and congratulated Mr. Groeninger on the completion of his half century of service. The chairman next introduced Mr. Wood, who, after a beautiful talk, presented the already happy man with a gold watch and chain on behalf of the employes of the A. M. R. Department as a token of their high esteem.

In addition to this, Mr. Rittenhouse presented him with fifty dollars in gold from the Management. Then Mr. Groeninger, with a little tremor in his voice, and a suggestion of tears in his eyes, after a few preliminary remarks about his length of service, thanked all in the nicest way and returned to his place of honor to gaze first at one gift and then the other. Happy? That doesn't express it! There was one tremendous smile all over his face from ear to ear. It

fuls, and with Mr. Groeninger's beaming smile upon you, we'll leave you to dream in peace about Chicken Salad, and, Oh Yes! I nearly forgot—Ice Cream!

Just a word about Mr. Groeninger's record. Entering the service of the Baltimore and Ohio at Locust Point, Md., May 18, 1872 as warehouseman, he was transferred on July 3 of the same year to Chases' Wharf, Md., in the same capacity. Then he was promoted to various positions as lading clerk, billing clerk, and chief clerk. This covered a period of twenty-three years, and in September, 1899 he was transferred to the old Baltimore and Ohio Building as rate clerk. In this office his ability soon won him promotion to the position of chief clerk. Afterward, he served as soliciting and traveling freight agent up until the time of this country's entrance into the World War, when he was transferred to the Department of Auditor Merchandise Receipts.

Mr. Groeninger, with all the sincerity of our hearts, we wish for you, Happiness, Good Health, and Prosperity, and may there be many more years in which we may enjoy your wonderfully kind and gentlemanly association.

## Honor Roll

(Continued from page 36)

this train had dragged through the switch and forced the point open one and one half inches. Galvin got the chain out and spiked the switch. This chain evidently formed a direct circuit as this open switch point did not cause northward signal to go "Stop."

## In the Realm of the Riddle

(Continued from page 19)

We are short on verse puzzles. Get busy, you poets, and send us some beheadments, curtailments, deletions, charades and puzzles of that kind.

In order to give the solvers a fair opportunity, the answers to all puzzles will be published in the MAGAZINE for the third following month. For instance: The April answers will be published in the July issue, the May puzzles in the August issue and so on. This will allow solvers about forty-five days to work out the answers and get them in.

J. J. Groeninger and his railroad friends who honored him on his fifty years of service

was not necessary to say more. We understood, and were glad.

During all of this time we had paid not the slightest attention to the Comptometer Group, but as we turned away from the platform, Lo! and Behold! there was a table spread before us whereon rested heaping portions of that prince of gustatorial delights, Chicken Salad—and Rolls—and Cake—'N'ev'rything. But, "horrors of prohibition"! between us and the "eats" loomed the grim figure of a photographer. We were herded together just three desks away from the crowning event of the evening, while "Jimmie" Varina took lessons in holding burning matches for the camera's benefit. Of course, "Bill" Hutton had to make sure that he would be included, so he sat on top of a case where the lens was fully exposed to the peril of his face. "BOOM" said the flash, and "OH" screamed the girls as the smoke played hide and seek among the rafters.

Just then George Slack piped up with "Do We Eat?" In answer to which Mr. Groeninger was placed at the head of the table with the officials on each side. There was happy, jolly chattering, between mouth-

## Emma's Little Chickens

(Continued from page 31)

hens laid nice eggs all the winter. In the spring they stopped laying and went to sitting, all six of them. But Emma did not know until her father told her that hens must sit on the eggs for three weeks before they hatch.

When the little peeps came out Emma tended them as she had to her father's. When these grew to be big hens they laid so many eggs that Emma did not know what to do with them. She sold many of them to the stores and to some of her neighbors and gave a lot of them to her father and mother to sell along with their eggs. She also gave them the money that she received for her eggs, and her parents gave her all the spending money that she needed. She raised chickens for many years and they all lived happily ever after.

# Trains That Pass in The Night

By Robert L. Heiser

Down among the lowlands damp and out across the plain,  
Belching smoke and cinders, comes the rushing railroad train;  
Loaded down with quick dispatch—some fifty cars or more—  
See the red heat flashing from the open fire box door!  
Clattering over bridges, across rivers, streams and rills—  
Hear the whistle screaming and the echo in the hills!  
Crossing bells a'clanging in the lonesome village lane,  
Warning folks afar and near, "here comes the railroad train!"

Telegraph a'clicking as the signals change to clear,  
Hear the steely clatter as the train is drawing near!  
Crossing gates are lowered by the watchman in his tower—  
Ah, she's leaning in the curve, her brake shoes flashing fire!  
Pounding through the switches, rushing through the night,  
Markers gleam on cabin till they whisk 'em out of sight.  
Head man leaning out the cab to watch the high wheels roll,  
The engineer his orders scans—the fireman feeds her coal.

Hauling ores and metals to the far off city mills,  
Skirting rims of rivers on its way around the hills,  
Carrying tools to toilers and moving farmers' grain—  
Many fortunes wait upon the coming of the train.  
And many a baby lisps a prayer as mother sets the light,  
Where Daddy dear will see it as his train glides through the night.  
Go sing your songs of cruising round on ships across the sea—  
The job of handling quick dispatch is sport enough for me.

# Do You Want \$200 a Week?

The Amazing Story of Carl Rowe who rose from an  
Income of \$50.00 a Week to \$1,000 a Month

## These Men Are Making Big Money

Here are just three of the Comer Representatives who are making large profits and making them easily. They find that they can take an hour or so of spare time any day and make plenty of extra money. Or they can devote all their time to Comer work and make large and steady income. Read their records and hear what they have to say regarding the Comer Way of making big money.

Carl P. King, of Kentucky, a machinist, says: "Since I received my outfit the time I've spent calling on customers has paid me \$3.00 an hour profit."

F. E. Wright, South Carolina, railroad man, finds the Comer Agency a great profit maker. \$256.56 for one month's leisure hours' effort.

J. J. Maher, of Maine, finds the Comer Business a sure way to steady and large profits. He averages \$250 to \$350 a month and frequently goes over the \$500 mark.

\*\*\*

You can make profits like these just as easily as King, Wright and Maher. You don't need experience or previous training to start. The Comer Way shows you how to make big money from the first day, and how to keep right on making it.

My name is Rowe—Carl Rowe. I live in a small city in New York State.

I am going to tell you an amazing story about myself. It may seem too strange to believe, but you can easily verify everything I have to say.

Two years ago I was a baker. I was struggling along, trying to make the money in my pay envelope meet the increasing expenses of our family. There was no prospect for the future.

Today, just two years later, I am a successful business man. I have plenty of money for all the things we need and want. Last month I made \$876 during my spare time, and was able to put \$200 a week in my savings account.

I am going to tell you how it happened.

Please remember that two years ago I had no surplus cash. I was in the same fix as nine out of ten other men. Expenses were constantly mounting and my salary, although it had increased, could not keep pace with the cost of living. My wife had to do without things that I knew she ought to have. We wanted an automobile, but we couldn't afford it. We wanted to buy our home, but we couldn't afford that.

It made me desperate to think of what might happen if I became sick or lost my job. I worried about it, and so did my wife. We were living from hand to mouth, and we didn't know what calamity and hardships might be lurking just around the corner.

And yet—today—I own our nine-room house. I have an automobile. I have money for books, the theatre, or any other pleasures that I may want. I have the cash today to educate my son and send him through college.

Here is how it happened. One day in glancing through a magazine I read an advertisement. The advertisement said that any man could make from a hundred to three hundred dollars a month during his spare time.

I didn't believe it. I knew that I had worked hard eight hours a day for \$50.00 a week, and I figured that no man could make that much during a couple of hours a day spare time.

But as I read that ad I found that it pointed to men who had made that much and more. In the last paragraph the advertiser offered to send a book without cost. I still doubted. But I thought it was worth a two-cent stamp, so I tore out the coupon and put it in my pocket and next day on my way home from work I mailed it.

When I look back to that day and realize how close I came to passing up that ad, it sends cold chills down my spine. If the book had cost me a thousand dollars instead of a two-cent stamp, it would have still been cheap. All that I have today—an automobile, my home, an established business, a contented family—

all these are due to the things I learned by reading that little eight-page booklet.

There is no secret to my success, I have succeeded beyond any dream I may have had three years ago, and I consider myself an average man. I believe that I would be criminally selfish if I did not tell other people how I made my success.

All the work I have done has been pleasant and easy, and withal, amazingly simple. I am the representative in this territory for a raincoat manufacturer. The booklet that I read was one issued by that company. It tells any man or woman just what it told me. It offers to anyone the same opportunity that was offered to me. It will give to anyone the same success that it has brought to me.

The Comer Manufacturing Company are one of the largest manufacturers of high-grade raincoats on the market; but they do not sell through stores. They sell their coats through local representatives. The local representative does not have to buy a stock. All he does is to take orders for Comer raincoats and he gets his profit the same day the order is taken. Fully half my customers come to my house to give me their orders.

My business is growing bigger every month. I don't know how great it will grow, but there are very few business men in this city whose net profit is greater than mine, and I can see only unlimited opportunity in the future.

## A Special Offer To Railroad Men

If you are interested in increasing your income from \$100 to \$1,000 a month and can devote all your time or only an hour or so a day to this same proposition in your territory, write at once to The Comer Manufacturing Company, Dayton, Ohio. This is their special offer. They will send you, without any preliminary correspondence or red tape, a complete selling outfit with full instructions, samples, style book, order book and everything you need to get started. Sign and mail the coupon now and in less than a week you can be making more money than you ever believed possible.

## Mail This Coupon At Once

THE COMER MFG. CO.,  
Dept. X-61, Dayton, Ohio.

I am ready to start as a Comer Representative if you can show me how I can make from \$50.00 to \$200 a week. Please send me, without any expense or obligation to me, complete outfit and instructions.

## See It First—No Money Down

Our determination to this year double our sales of the world famous

**Santa Fe Special**  
and  
**Bunn Special Watches**  
prompts this matchless offer.

While other watch dealers are raising their prices, asking you for larger monthly payments, and making payment terms harder for you to meet, we are offering you our new model Santa Fe Special, no advance in price, no money down, easier terms and smaller monthly payments. WE realize the war is over and in order to double our business we MUST give you pre-war inducements, better prices, easier terms and smaller payments.

Without one penny of advance payment let us place in your hands to see, to examine, to inspect, to admire, to approve, a real masterpiece in watch creation.

A watch which passes the most rigid inspection and measures up to the exacting requirements of the great Santa Fe Railway System, and other great American trunk lines.

### Page Twelve of Our Watch Book Is of Special Interest to You!

Ask for our Watch Book free—then select the Watch you would like to see, either the famous Santa Fe Special or the 6 position Bunn Special, and let us explain our easy payment plan and send the watch express prepaid for you to examine. No money down.

**Remember---** No money down—easy payments buy a master timepiece—a 21 Jewel guaranteed for a lifetime at about half the price you pay for a similar watch of other makes. No money down—a wonderful offer.

SANTA FE WATCH CO.,  
825 Thomas Bldg., Topeka, Kans.

Please send prepaid and without obligation your Watch Book free, explaining your "No Money Down" Offer on the Santa Fe Special Watch.

# Can a Ticket Clerk Swing Big Freight Business to the Baltimore and Ohio? —Boy, Page Mr. A. W. Gienke of Cleveland, Ohio!

*"I was so impressed with the way this man took care of me that I cannot help writing you about it."*

*"You may also be interested in knowing that the next day I routed 30,000 pounds of freight over your road, and hereafter will see that you folks get all the business I can swing your way."*

This letter tells the whole story—

## THE ALLBRIGHT-NELL CO.

MANUFACTURERS OF

### PACKING HOUSE MACHINERY

OFFICE AND WORKS:

5323 SO. WESTERN BLVD.

CHICAGO, ILL., U. S. A., May 8, 1922.

Mr. J. G. Strickenburg  
Division Passenger Agent  
809 Park Building  
Cleveland, Ohio

Dear Sir:

I wish to call your attention to the fact that you have in your employ a man who surely deserves much consideration from the heads of his department. On Tuesday, May 2, I was called by wire suddenly to Baltimore, Md. I called up your station agent, a Mr. A. W. Gienke, and asked him if he would reserve a lower berth for me on the 7.45 train. He was very polite and said he would be glad to hold the berth until fifteen minutes before train time for me. I arrived about twenty minutes before train time and he had the berth and ticket all ready so I was not delayed.

I so seldom get any courtesy from the agents of any railroad these days that I want to let you know that you have at least one man who is trying his best to get business for his Company. Such good treatment is surely a thing unusual these days. I was so impressed with the way this man took care of me that I cannot help writing you about it. You may also be interested in knowing that the next day I routed over 30,000 pounds of freight over your road, and hereafter will see that you folks will get all the business I can swing your way.

Freight is a very important part of the railroads' work and few agents seem to think that the traveling salesman seems to count for anything but his railroad ticket. But in many cases the traveling man has it in his power to route many carloads of freight over the railroad he wishes to. In this case I have the power to ship on the road I want to and I will surely not forget to give the road which has extended me so nice a courtesy as did your Mr. Gienke, all the business I possibly can.

Last year I shipped over eight hundred cars of freight east, and I never paid much attention to what road got the business until I lately began to see what indifferent treatment I received at the hands of some of the ticket agents. In this little case your man has been the means of giving you a lot of freight business, just through courtesy. I hope this agent will have due consideration when possible, as I am sure that he has the stuff that good men are made of, and will prove to be a good asset to your company.

Yours very truly,

(Signed) JOHN P. MEYER.

HAVING BOUGHT a closed car, I will sell my fur coat, size 72 and my wife's fur coat, size 16. Bargain for quick sale before next installment on car is due—Address High Finance.

**The Sob Sister**

By MISS APHASIA FAIR

I knew a young woman,  
And wasn't it  
QUAINT?  
She spent a week's wages  
For powder and  
PAINT.  
But 'twasn't so silly  
As scoffers  
SUPPOSE,  
For to her face make up  
She added the  
CLOTHES.  
She landed a gink  
With a good  
COPPER MINE,  
Who figures his fortune  
In numerals  
NINE.  
So here is my moral:  
Use plenty of  
PAINT  
And hook some old geezer  
By beauty that  
Ain't.

—Exchange.

## The Wire-Stringin' Crew

By James Edward Hungerford

Illustrated by Robert L. Heiser

If you're lookin' for heroes, and anxious to praise 'em,  
Then take a good squint at the wire-stringin' crew;  
Just look the gang over, and keenly appraise 'em,  
And size up the things they have done, and can do!  
They're ready for any old kind of a venture—  
Heroic, all right, but their deeds are unsung—  
They're chock-full of grit, and dead keen for adventure,  
Wherever there's telegraph wires to be strung!

Just give them the word, and they're off in a twinkle;  
With pliers and climbers—alert, wide-awake;  
You don't have to show 'em—they know every wrinkle,  
And don't give a rap for the chances they take!  
Just point out the job to be done, and they'll do it—  
A job that takes deftness and courage and grit;  
They'll laugh at the hardships, and stick 'til they're through it,  
Or die on the job—for they never say "quit."

You'll find 'em up North, where the blizzards are raging;  
You'll find 'em down South, where it's hotter than sin;  
They're perched up on poles, where the clouds are rampaging—  
Good natured and cheerful, but drenched to the skin;  
Their job is to string up the wires, and they string 'em,  
Regardless of where they have got to be hung;  
The rain it can pelt 'em; the hailstones can sting 'em;  
But just the same, *hombre*, those wires'll be strung!

They're always on deck in a time of disaster,  
Repairing the damage of flood or of fire;  
They'll land on a job, and stick tighter than plaster,  
Until they've repaired every snapped or down wire!  
So take a good look at the gang, and appraise 'em,  
And size up the things they have done, and can do;  
You'll find 'em dead game, and that nothing can feaze 'em—  
You'll take off your hats to the wire-stringin' crew!

## Do Labor Saving Machines Reduce Employment? What Does History Prove?

By James N. Holsen

*The introduction of labor saving machines into any plant or industry naturally makes those employed therein feel that their chances for steady employment are reduced. This is, in fact, the usual immediate effect. But history proves that after the installation of literally thousands of labor saving machines, men are today (during normal times) decidedly better employed than ever before.*

*Sometimes the adjustment is slow and sometimes fast, depending largely on general economic conditions. As an illustration of quick adjustment we can cite the present situation on the railroads of this country. Their revenues being only sufficiently great to cover operating costs, including the most necessary maintenance of track and equipment, and to pay fixed charges, (and with many of them paying no dividends on common stock whatsoever) building programs are at a standstill, for there is no money with which to undertake them. But building is badly needed to keep railway facilities measurably up with the industrial growth of the country. The situation therefore demands that labor saved, not only by the installation of machines but also through all other operating economies, shall be applied on enlarged maintenance and building programs.*

*For instance it is well known that the number of bad order cars today largely exceeds the normal number. And if one engine can be made to do the work of two, the resulting saving can be applied to car repairs, meaning larger employment of car repairmen. It also means that when business increases cars will be available to handle the business, and more trains, more engines and more engine crews will be engaged in work, and the whole will be done more economically and with benefit to all concerned.*

*This article discusses the subject largely from an historical viewpoint, but also clarifies it in its present day aspect.—Ed.*

THE popular opinion that the introduction of labor saving machinery is directly opposed to the interests of the working man is centuries old. When, in the seventeenth century, an inventor placed a model of his machine before Colbert, the minister of Louis XIV, Colbert replied, "I am anxious that men should be able to live honestly by their work and you propose to me to take their work out of their hands. Take the invention, if you please, somewhere else."

When, in the last half of the eighteenth century, the Industrial Revolution was ushered in by the invention of the steam engine by Watt and the machines of Arkwright, Cartwright, and Hargreaves, the English spinners destroyed the spinning Jenny of Arkwright and smashed the loom of Cartwright. Many inventions that now seem indispensable were bitterly fought by the English laborers.

History gives to Elias Howe the honor of inventing the sewing machine in 1846. History also records that Walter Hunt had practically completed a working model of a

similar machine a decade earlier, but, when Mrs. Hunt protested that a sewing machine would throw many sewing women out of employment, Mr. Hunt, in the interests of humanity, destroyed his own invention.

Examples could be cited almost indefinitely as evidence of the suspicion and hostility with which new inventions are received. When, in the building trade, the hod-hoisting device rendered it unnecessary for men to make beasts of burden of themselves, a general alarm was created over the prospect of a great number of hod-carriers being thrown out of employment. The cigar makers, the glass blowers, the stone cutters and the typesetters represent only a few of the trades which have fought the introduction of labor saving machinery into their respective trades.

However, the attitude of trade unionists does not materially differ from the attitude of many others. The opinion is almost general that the amount of work to be done is fixed and definite. Since the amount of work is thought to be predeter-

mined, they reason that the machine is simply a competitor of the laborer, decreasing the opportunity for employment and thereby reducing wages. Economists refer to this as the "lump of labor" notion.

The destruction of property by fire or flood is often regarded with a sort of satisfaction by those not directly affected, upon the supposition that more work is thereby provided. Economists refer to this notion as the "mal work fallacy." The same fallacious reasoning causes the reckless spendthrift to be regarded as a greater asset to the community than the frugal man who husbands his resources, because the former "puts money into circulation" and "makes work."

The failure to distinguish between useful and useless work underlies the "make work fallacy." Useful work contributes to the general stock of commodities available for distribution, while useless work makes no such contribution. Although the broken pop bottles found under the baseball bleachers may represent additional work for the glass workers, it is obvious that the labor devoted

to their replacement represents a subtraction from the labor that would otherwise be available for the production of other commodities.

Modern industry is so complicated that many people who believe that the use of machinery must contribute to the well-being of society, the laborer included, are unable to see how the result is brought about. There is always the inclination to view a machine as displacing so much muscular labor with all the benefits accruing to the employer. However, when one stops to consider how meager were the rewards of labor, and how drab and dreary was the lot of the great mass of humanity prior to the Industrial Revolution, the contribution of machinery to man's progress is apparent. Nobody seriously holds that to dispense with all machinery, leaving only the simple hand tools, would promote our well-being. However, there is a feeling that we have too much machinery and accordingly every new machine encounters opposition. The confusion over the question of labor saving devices is increased by the dual position which a person occupies as producer and consumer. As a consumer, he benefits by every saving in the cost of production, while as a producer his present employment may be threatened. The journeymen tailor forced out of his particular employment by the sewing machine could hardly be expected to acknowledge this particular invention as a blessing to society. Neither could the keepers of thriving and hospitable inns along the old stage roads be expected to see the traffic diverted to other channels by the locomotive and acknowledge the railway as a boon to mankind.

It is regrettable that even a temporary disadvantage should fall upon some to the advantage of others. However, in the process of adjustment and readjustment which progress implies, it is inevitable that some have to be forced out of old grooves and made to fit into new ones. If society had to await the sanction of every person before a labor saving device could be used in industry, we would still be using only the primitive, hand made tools.

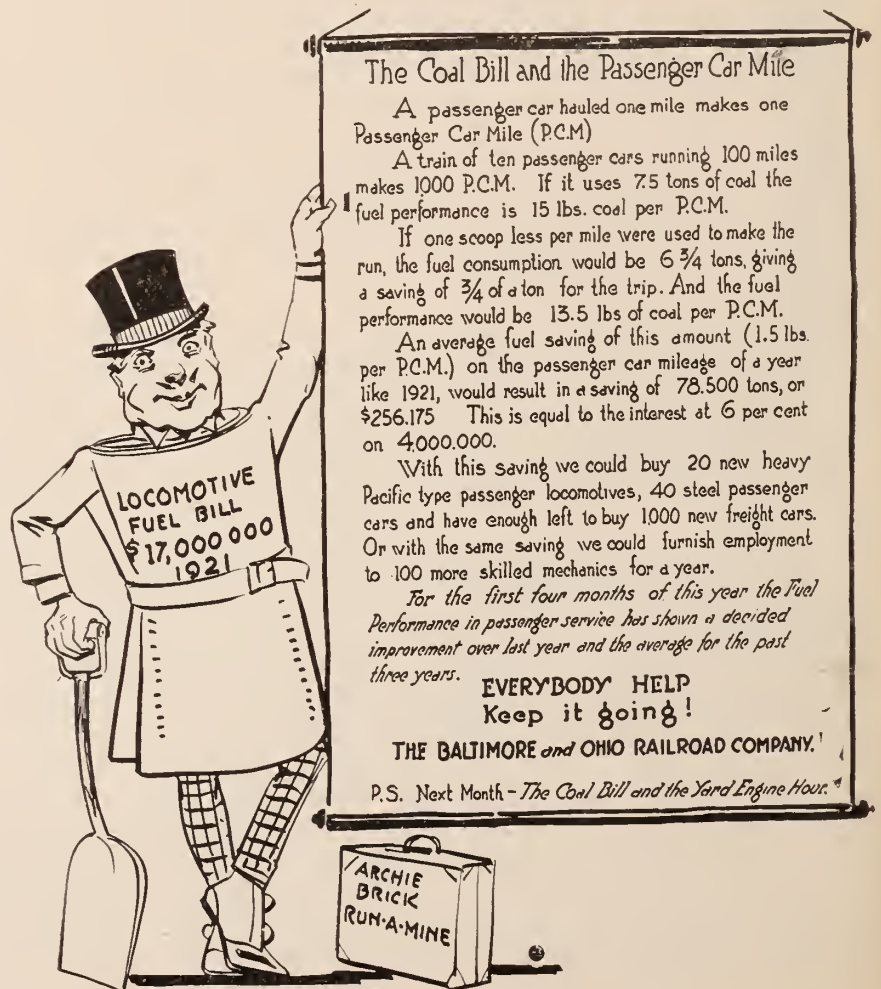

The expansion of industry which follows labor saving devices, the creation of new industries and the consequent replacing of those displaced is made intelligible by the understanding of a simple but fundamental economic principle. Economists speak of the insatiability of human wants. By this they mean that man's wants are never satisfied; desires for particular things may be

satisfied but no sooner is one want satisfied than men become conscious of another. As soon as the necessities of life are secured, the conveniences and comforts are desired, and if a man's strength is not exhausted in supplying himself with necessities and comforts, then he will devote himself to the work of obtaining luxuries. If because of an invention, the number of men employed in the production of a definite quantity of goods is decreased one half, it does not follow that one half of the men formerly employed in the production of the particular commodity will be left without employment. If society is able to supply its desires for this particular commodity with fewer men, the others will be employed in the satisfaction of some new want. The entire history of man has demonstrated this principle and our individual experience confirms it. Its recognition leaves no place for the "lump of labor" notion.

That the amount of work to be done is not fixed and definite as the "lump of labor" notion implies cannot be too strongly emphasized. To subtract the number of men now

necessary to accomplish a definite amount of work from the number that would be employed to do the same amount of work without the help of machines is the most fallacious of all reasoning. Allowances must be made for the enterprises which could not be carried on at all were it not for labor saving methods.

A slave could clean by hand only five or six pounds of cotton per day. To clean our average cotton crop of today would require the labor of 3,000,000 men working continuously throughout the year. However, it cannot be said that the cotton gin, invented by Eli Whitney in 1793, performs the work that would otherwise furnish employment to millions of men. The cheapness of the cleaning process was the conditioning factor in making cotton the great staple crop of the South. In 1792, we exported only 630 bales of lint. In the year following the invention, our exports increased to 7000 bales; and by 1800, the amount was 79,000 bales. In normal times, we export approximately 40 per cent. of a cotton crop of 12,000,000 bales. When we consider the great number

**The Coal Bill and the Passenger Car Mile**

A passenger car hauled one mile makes one Passenger Car Mile (P.C.M.)

A train of ten passenger cars running 100 miles makes 1000 P.C.M. If it uses 7.5 tons of coal the fuel performance is 15 lbs. coal per P.C.M.

If one scoop less per mile were used to make the run, the fuel consumption would be  $6\frac{3}{4}$  tons, giving a saving of  $\frac{3}{4}$  of a ton for the trip. And the fuel performance would be 13.5 lbs of coal per P.C.M.

An average fuel saving of this amount (1.5 lbs. per P.C.M.) on the passenger car mileage of a year like 1921, would result in a saving of 78,500 tons, or \$256,175. This is equal to the interest at 6 per cent on 4,000,000.

With this saving we could buy 20 new heavy Pacific type passenger locomotives, 40 steel passenger cars and have enough left to buy 1,000 new freight cars. Or with the same saving we could furnish employment to 100 more skilled mechanics for a year.

For the first four months of this year the fuel performance in passenger service has shown a decided improvement over last year and the average for the past three years.

ARCHIE BRICK RUN-A-MINE

employed in cultivating, transporting, and manufacturing cotton, it is evident that the invention of the cotton gin, instead of displacing labor, has greatly increased the field for its employment.

To transport 1,169,307,000 passengers and 1,998,917,000 tons of freight, the number and amount carried by the railways in 1919, by wagons and coaches, would require more labor than railway transportation necessitated. In fact it is inconceivable that this amount of traffic could have moved except for the railway. The development of our stupendous railway system, which is but a labor saving device on a

large scale as compared with the canal and turnpike, has not resulted in reducing the opportunity for employment, but, on the other hand, its greater efficiency has made possible the present day development of manufacturing, mining, et cetera. Thus the railways have, by a whole plexus of interactions, increased employment and, at the same time, made possible the satisfaction of wants heretofore impossible. Any saving in transportation costs will further stimulate the development of other industries, and the consequent expansion of other industries will increase the demand for transportation facilities and labor in them.

## The First Gasoline Rail Motor Car for Passengers on the Baltimore and Ohio

By *W. B. Whitsitt*

Chief Draughtsman, Office of Mechanical Engineer

**T**HE first test trip of the first Gasoline Motor Car of the Baltimore and Ohio on its own rails, was made on June 26.

The car left Camden Station at 8.15 a. m., stopped for a minute at Mt. Royal Station, and again on the division to watch the operation of the new automatic ballast cleaners for a few minutes, and after being turned on the "Y" at Elsmere Junction, arrived at Landenberg at the end of the Landenberg Branch at 12.10 p. m. Leaving there at 12.22 p. m., and retracing the morning route with other brief stops, the car arrived at Camden Station at 4.41 p. m.

The average running time on the main line was 29 miles per hour, the maximum, 39 miles per hour. The maximum speed allowed on the Landenberg Branch is 15 miles per hour, and the power of the car was such that it was necessary to run at second speed to keep inside this limit. The maximum grade on the branch was 1.44% and the car could have made this comfortably on high gear had the speed limit permitted.

The car carried what was perhaps an average load. All of the men appearing in the picture made the trip, and a few others besides. There was, however, no baggage or milk or other heavy commodities, as it is expected the car will have to carry when it is placed in operation on the Railroad.

The mechanical performance was good, several minor repairs only being necessary and those such as might be expected with a new car on one of its first trips.

Everybody who made the trip was impressed with the generally satis-

factory performance. There was much more comfort than is obtained in any interurban electric car that the writer has ever ridden on. At first this was attributed to the splendid roadbed of the main line, but the same easy riding qualities were also apparent on the Landenberg Branch, where the track is admittedly not a first class one. The explanation of this is not alone that the car seems to be well balanced from a mechanical standpoint but also that it has been built up to the rigid specifications of the Interstate Commerce Commission, with frame, parts, etc., that are considerably overstrong for a unit of its type.

The advantage of having no smoke from soft coal is apparent. It will not only cost less to keep the car clean but will also contribute to the comfort of passengers. The windows are wide and high, and afford an unobstructed range of vision for the passenger, something that will undoubtedly be greatly appreciated by those who have the opportunity to travel the beautiful country through which many of the branch lines of the Baltimore and Ohio run. The electric lights are well placed for reading and afford plenty of light for that purpose.

The principal reason for building the unit in two sections, the car with its trailer, instead of a single car with the same capacity, is because of the fact that the trailer can easily be disconnected from the motor car when the lightness of traffic warrants it, with consequent considerable saving in the cost of gasoline and oil for operation.

On the test trip the actual cost of operation, including gasoline, oil and wages of engineer and conductor, was 16 cents a mile. This does not include interest on investment, depreciation, overhead, etc., which, when taken into consideration, will probably bring the cost of operation up to about 25 cents a mile. The cost of operating an average typical branch line steam train is about a dollar a mile. It is seen therefore that considerable economy will probably be effected by the use of the gasoline rail car where it is practicable.

One of the most apparent economies in the use of this car comes from the fact that when it is going down grade the gasoline consumption can be reduced to practically nothing, while steam pressure in the locomotive has to be kept high by constant application of coal to the fire, even when running down hill. The most interesting feature of the car from a mechanical standpoint (and this will surprise most owners of automobiles) is the fact that the gears can be shifted from high to neutral and vice versa, without disengaging the clutch.

The general plan of the car is shown by the accompanying picture. It will be noted that the motor car is arranged for a baggage space in front and a rear passenger section, with capacity of 22 passengers, and the trailer is arranged for 34 passengers.

Interior woodwork finish of the car and trailer is mahogany color with the roof in white. The seats are covered with rattan. Both car and trailer are equipped with specially designed hot air heaters, manufactured principally of aluminum, in order to save weight. Both car and trailer are lighted by electricity.

The motor car is driven by a four cylinder gasoline engine, having a four and one half inch bore by six and one half inch stroke, and will develop at 1600 revolutions, 60 horse power.

The car is geared to operate at 35 miles per hour on straight level track, and at this speed the speed of the engine is 1330 revolutions per minute. The transmission has three speeds forward, and with a separate reversing gear, three speeds in reverse, so that the car can travel as fast in one direction as in the other. The car is controlled the same as an ordinary motor truck.

The front and back trucks are both four wheel, also the trucks on the trailer. All wheels on the motor car rear truck are driving wheels, and the front truck on the motor car and both trucks on the trailer are provided for easy curving.

Both car and trailer are equipped with semiautomatic air brakes controlled from the motor car. This air brake system has the emergency feature, so that if the cars break apart the brakes will be automatically set on both cars.

The trailer has an independent conductor's valve for setting the brakes, if necessary, and both car and trailer have hand brakes.

In designing this equipment special attention has been given to keep everything as light as possible, consistent with strength, in order to keep within the power that can be delivered by a truck type gasoline engine.

All wearing parts on both cars are of high grade alloy steel, carefully designed, in order to get the maximum strength with the minimum weight. The sides, roof and floor of the bodies are insulated.

The weight of the motor car without passengers is 17,200 pounds and trailer 9,350 pounds.

The designs and specifications for the car were prepared in this office and built by the Edwards Railway

Motor Car Company at Sanford, N. C. The chassis of the motor car was furnished by the Kelly-Springfield Motor Truck Company.

On runs at Sanford before the car was delivered, it averaged seven and a half miles per gallon of gasoline, without the trailer, and six and a half miles per gallon with the trailer. Approximately one quart of bearing

oil is used per 1,000 car trailer miles. The engine will use about one quart of oil for each 150 miles, and the transmission gear and differential on the motor car will each require about five pounds of grease per 10,000 miles.

It is expected that this car will be put into operation on the Romney Branch, running between Green Spring and Petersburg.

## E. T. Horn Appointed Chief of Yard and Terminal Operation—Other News of Personnel

ON June 1 Vice President C. W. Galloway announced the appointment, effective that date, of E. T. Horn as chief of yard and terminal operations. The position formerly held by Mr. Horn, general supervisor of terminals, was abolished.

Mr. Horn first came with the Baltimore and Ohio on September 11, 1912, as supervisor of terminals. He resigned in 1916 but returned to the service on August 1, 1917 in his previous capacity and continued in this

position until May 1, 1920, when he was made general supervisor of terminals.

Mr. Horn has been largely responsible for some of the most notable improvements in train operation that have ever been effected on the Baltimore and Ohio. Chief among these is the System, Divisional and Through Classification, on account of which great savings in time and money have been brought about in the operation of fast freight trains, with consequent better service for shippers. Mr. Horn

Above: The first gasoline rail motor car for passengers on the Baltimore and Ohio. Below, a few of those on the inspection party. Left to right: Chief of Motive Power Emerson; Superintendent of Motive Power Gill; General Manager Scheer; District Master Car Builder Calder; General Passenger Agent Lowes; Master Mechanic Hines; Division Engineer Speiden; District Master Mechanic Galloway; "Jack," son of General Superintendent Motive Power Carroll, standing next to him; Engineer Maintenance of Way Lane; Chief Draughtsman Whitsitt, Office of Mechanical Engineer, the author of this article; Mechanical Engineer Sandman

E. T. Horn,  
Chief of Yard and Terminal Operation

has for some months been engaged on a plan for increasing engine mileage per run. It is now past the experimental stage and bringing splendid results, a full account of which will be given in an early issue of the MAGAZINE.

**Other Changes**

On June 15 the following appoint-

## Columbus Merchant Compliments Our Service in His Advertising

*Max H. Rieser Shows Appreciation of Courtesy*

ONE of the most enterprising merchants of Columbus, Ohio, is Max H. Rieser, the proprietor of a large, progressive and well-known women's wear establishment.

Mr. Rieser is a large advertiser in the Columbus papers and as such well knows the considerable cost of this kind of publicity. It must have been with the most kindly feelings toward the Baltimore and Ohio and its employes, therefore, that in his half page advertisement in the Columbus Dispatch of Friday, May 19, he set aside space for an unsolicited compliment to the service of our Railroad. What he wrote may be seen in the fac-simile reproduction over his signature which appears on this page.

That Mr. Rieser is an ardent believer in the service idea which is contributing so much to the Baltimore and Ohio, will be noted from his letter. It will also be seen that Mr. Rieser, appreciating compliments which he receives about the service given by his store, believes in extending the same kind of compliments to those individuals and organizations from whom he personally gets good service.

ments were made in the Pittsburgh territory: W. F. Booth, assistant superintendent with headquarters at Glenwood; T. Masterson, assistant trainmaster with headquarters at 36th St.; C. D. Grow, assistant trainmaster with headquarters at Willow Grove.

In the Baltimore territory, Trainmasters E. L. Allnut and F. W. Stringer, with headquarters at Riverside.

At Fairmont, T. J. Ward, terminal trainmaster, vice W. F. Booth, promoted.

On July 1, C. B. Harveson was appointed division engineer, Baltimore Division, East End, Herring Run to Park Junction, headquarters Baltimore, Md., vice Theodore Speiden, Jr. Mr. Speiden will handle the important work of rebuilding a number of bridges on the P. & W., Pittsburgh Division, which are being strengthened for the use of Mallet engines.

On June 5, Philip H. Groscup, division accountant, former New Castle Division, was transferred to similar position, Connellsville Division, head quarters, Connellsville, Penna., vice Harland L. Cordrey, assigned to other duties.

us put a story about the incident in our MAGAZINE, along with his photograph. His reply amplifies in so interesting a way his views on how the employe should feel toward the organization for which he works, that we are quoting it in full, as follows:

COLUMBUS, OHIO,  
May 23, 1922

MR. M. H. BROUGHTON  
Columbus, Ohio

My dear Sir:

There was just as much satisfaction and pleasure derived by me in writing the article commending the Baltimore and Ohio Railroad as you and your associates had in reading it, as has already been proven by the letters received.

The communications and telephone messages assure me of as much interest and loyalty of each individual as if they personally owned or controlled the railroad, and in my judgment large and small corporations can only successfully survive by that whole-hearted spirit. In our institution, we like everyone to work and think the same as though the store belonged to them personally.

If the editorial in last week's Dispatch along with my photograph will add anything to your MAGAZINE, you have my permission to use them, as per your request.

Be assured of my pleasure in reading your favor of the 20th inst. With my best wishes for continued success, I am,

Sincerely yours,  
(Signed) MAX H. RIESER.

The point that we Baltimore and Ohio employes should get from this incident is that patrons of the Railroad appreciate real personal service on the part of our employes so much that they are willing to make almost any return within reason for it. It certainly is worth while to make such good friends as Mr. Rieser.

**On the B. & O.**

—Professional plays, amateur productions or minstrel shows a quarter of a century ago or less were incomplete without some unfavorable comment, song or joke on the Baltimore & Ohio railroad and perhaps at that time there was reason for it.

—Time has healed all wounds. Today that road is cured of every ailment ascribed to it in the years past. Who is responsible? we must ask. Perhaps the higher-ups prompted perfection but those in direct contact with the riding public have brought about public sentiment for reversals of opinion.

—J. J. Doty, Pullman conductor, and F. T. Bramlette, porter, on the B. & O. train arriving here from Cincinnati at 11:25 p. m., had much to do with my pleasant journey homeward recently. It marked the end of a perfect trip.

—I just could not help but indirectly ask their names and through this column extend appreciation for their courtesy, service and comfort extended.

—This store takes its share of pride in service and when the comparison is made from years past, we ourselves notice the advancement. Many letters of appreciation reach us during the year.

*Max H. Rieser*

—May 19, 1922

# Telegraph Department Assumes Direction of Time Inspection Service— W. C. Donnelly Made General Supervisor

ON June 26, C. A. Plumly, superintendent Telegraph, issued the following announcement to all time inspectors on the Baltimore and Ohio Railroad:

Effective July 1, 1922, the Baltimore and Ohio Railroad Company will take over the supervision of time service throughout the System, and effective the same date W. C. Donnelly will become General Supervisor Time Service, headquarters, Baltimore, Maryland, reporting to this office.

The present arrangement of inspection will be continued, and inspectors who are established jewelers, will be permitted to sell watches, chains and charms to any employe, whether in classified service requiring standard watches or not, the Railroad Company to make deductions on payrolls for such sales and subsequent expense of repairs thereof, but for no other jewelry or merchandise; remittances for such payroll deductions applying against orders executed on or after July 1, 1922, will be made by the Railroad Company direct to the local inspector. Remittances applying against orders executed prior to July 1, 1922, will be handled as heretofore until such accounts are closed.

An agreement is being prepared covering the appointment of local inspectors, which in due time will be presented for execution.

On behalf of the Railroad Company, we bespeak your hearty cooperation.

W. C. Donnelly, who is familiarly known to hundreds of employes as "Bill," came with the Baltimore and

Ohio on November 15, 1918. For twenty years preceding this he had been in charge of the watch and clock department of the J. S. MacDonald Jewelry Company of Baltimore. He is a practical watchmaker and since he has been connected with the time inspection service on our Railroad there has been a marked and gratifying improvement in the standard of this service, so much so in fact that it is now 100 per cent. over the entire Railroad.

In the new position, with its enlarged duties and opportunities, Mr.

W. C. Donnelly

Donnelly has the best wishes of the many friends he has made during his comparatively short career with us.

The jewelers who are acting as watch inspectors for the Baltimore and Ohio are:

- Mr. C. T. Rodgers,  
37 S. 17th Street,  
Philadelphia, Pa.
- Mr. D. W. Laubach,  
7038 Woodland Avenue,  
Philadelphia, Pa.
- George Walters Co.,  
7 W. Lexington Street,  
Baltimore, Md.
- Bank and Bryan,  
5th and Market Streets,  
Wilmington, Del.
- Mr. M. B. Korman,  
706 H. Street, N. E.,  
Washington, D. C.
- Mr. F. E. Alder,  
Brunswick, Md.
- Mr. G. M. Malone,  
Frederick, Md.
- Mr. E. B. Capper,  
Winchester, Va.
- Mr. D. Clint DeDier,  
Harrisonburg, Va.
- Mr. H. L. Lang,  
Staunton, Va.

## The Blue Bird Sings

An Elegiac Rondeau in Memory of Alfred O. Whitehorne, of  
Auditor Passenger Receipts' Office

By Louis M. Grice

Assistant Auditor Passenger Receipts

The bluebird sings thy dirge, nearby  
The brooks, antiphonal, reply:  
Awakened from their winter sleep,  
Across thy grave the blossoms creep  
To catch the glory of the sky.

Though buds that bloom may fade and die,  
Fruition pass, and dead leaves fly—  
Though winter waits o'er all to sweep,  
The bluebird sings.

And as in mother earth you lie,  
We grieve that men are born to die:  
Yet though the grave be cold and deep,  
Of life that shall resurgent leap,  
The bluebird sings.

# New Home Builders' Service for Baltimore and Ohio Employes

*Magazine Will Feature Descriptions of Homes for Railroad Men—  
Complete Plans May Be Secured at Nominal Cost*

**D**URING the next few months the Baltimore and Ohio MAGAZINE will contain pictures and floor plans of varying styles of homes, all of which will be adapted to the needs and the pocketbooks of railroad men. This information will be furnished through the cooperation of the Portland Cement Association and the American Wholesale Lumber Association, it being our purpose to show houses built both of cement and wood.

Since the Relief Department started to loan money to employes for the building or purchase of homes, 23,188 loans have been made for a grand total of \$27,933,650.03 up until March 31, 1922. It is difficult to conceive of the comfort, security and happiness which has been given to employes and their families through this service on the part of the Baltimore and Ohio. Now the series of articles featuring attractive home plans will be run with the idea of suggesting to employes examples of homes which they can make their own through the aid which is extended by the Relief Department.

Anybody who is familiar with home building operations knows that it costs from \$50.00 up to get complete working plans from an architect for a home of his own designing. The homes which we shall show in the MAGAZINE have been designed by a corps of the most capable architects in the country with all facilities possible at their disposal for careful study, looking to economy of space

and in the use of material, beauty, convenience and practicability. Complete working plans and blue

## The Holmwood House is an Ideal Home

**T**HIS five-room Holmwood house represents the maximum in comfort, space and beauty for a minimum cost. It was designed by The Housing Company of 248 Boylston Street, Boston, a well-known firm of architects and town planners, and is their answer to the demand for a commodious, low-cost home. The builder of this home gets as much accommodation per dollar spent as from any other plan that has been designed and withal, he gets a charming house, and one that is a little unusual too. The steep roof and the twin bay windows give the front a quaint English appearance. Entering the hall, we pass into a long living room lighted on three sides and with a fine fireplace. On the other side of the hall is a dining room, and leading from it, a good kitchen, designed primarily for step-saving work. The rear entrance and cellar steps lead from the kitchen.

Upstairs there are two good bedrooms lighted on two sides, both having fine closets.

There is absolutely no space wasted in this house; every stick of lumber and every nail in it performs some useful service.

It has been designed for the use of concrete block, covered with portland cement stucco; of all construction materials this has proved to be the most enduring, economical and permanent. The inside walls are furred, lathed and plastered in order to give maximum insulation from heat and cold and as

prints for the Holmwood house, which we are describing below, can be had from the Baltimore and Ohio MAGAZINE at the nominal price of \$10.00. Address the Editor, Mt. Royal Station, Baltimore, Md.

For information concerning the Relief Department's Loan Feature, address Division "S," Relief Department, Baltimore, Md.

the flues are all in the center of the house the coal consumption required for heating purposes will be exceptionally small.

This is one of the few houses that would look equally well on the wide suburban lot or on the narrow city street or as a country home in the woods. Its lines would harmonize in any environment.

A house like this would make a comfortable home for a family of three or four; it is a good investment that will not depreciate with age and can be readily sold any time.

Remember that complete plans and working blue prints of this house may be had at a cost of ten dollars from the editor of the Magazine.

### The Topic of the Day

First Maid (bragging about a party given the day before by her mistress)—"And they all came in limousines and had on the grandest clothes and wore the biggest diamonds."  
Neighbor's Maid—"And what did they talk about?"

First Maid—"Us."

—Steam Shovel and Dredge

SECOND FLOOR PLAN

FIRST FLOOR PLAN

The attractive Holmwood House may be built for from \$4000.00 to \$5000.00, depending upon the locality

# Disastrous Fire at Locust Point, July 2.

At 4.32 p. m., July 2, during a heavy electrical storm in Baltimore, while making his round at the water end of Elevator B at Locust Point, Watchman Frank M. McHugh heard a great crash and saw dust flying all around him. A lightning bolt had struck. Flames broke out immediately, preventing McHugh from using either his extinguisher or the hose nearby. He turned in the alarm and as he was rushing from the building met the Baltimore and Ohio fire patrol of 20 men, but the flames were already so fierce that they were unable to penetrate the building and had to play water on the outside at the land end.

At 4.45 the city fire force had arrived, a general alarm quickly bringing every piece of apparatus, land and water, on the scene. Pier 5 had in the meantime begun blazing, and it was thought and hoped that the damage could be confined to this and Elevator B. The wind suddenly began blowing hard out of the northeast, however, and the larger Elevator C and Pier 2 were soon ablaze and were destroyed. Other property was saved with difficulty.

Besides the elevators, piers, merchandise and grain destroyed, two cars were burned and four sunk on a lighter. Approximate loss in buildings was \$2,000,000; in goods \$1,000,000; all covered by insurance. The principal loss to the Baltimore and Ohio is in facilities, which will be made up in part, however, by kind offers of cooperation by the City of Baltimore, the Pennsylvania Railroad and the Western Maryland Railway.

The work of our own and the city's firemen was commendable. In recognition of the help of the city force, President Willard has announced a gift from the Railroad of \$1,000 to the Firemen's Pension Fund.

Opposite page, upper left: Watchman NcHugh. Lower. 1. What happened to the main power line. 2. Engine No. 15 and its hard fighting crew: Henry Wagner, fireman; Robert Miller, engineer. This engine bore the brunt of the fight in the southeast. 3. Part of the property saved by engine No. 15. 4. Main power stack. 5. Fireboat Deluge living up to its name. 6. One of the valuable machines saved. Traveling crane which stood 20 feet from hurned warehouse. 7. Fighting top of the Deluge. Above, Pier 5 at the height of the blaze. Below: 1. Acres of devastation. Part of tobacco and general merchandise pier with firemen still at work. 2. One of the giant streams that beat out the warehouse fire. 3. Fireboat Cataract after an all night struggle. 4. Hose crew of No. 6 Engine. Left to right, Pipemen Mike O'Dea, Thomas Gavin, Phil May, Carroll Hand. 5. Still fighting flames at noon next day. 6. Fireboat Torrent keeping up the battle. 7. ### That Message to Garcia

WAY back in 1899 Elbert Hubbard printed a story in the *Philistine Magazine*, which afterwards was reprinted in hundred thousand editions by the New York Central Railroad Company and spread broadcast. It was the story of a soldier who was given an order which he fulfilled to the letter, although it involved tremendous difficulties and required a balanced head. That story was known to the world as—"A Message to Garcia." There was something more in the story than a mere tale of bravery. It brought out vividly the point of a man attending to the business at hand.

The story is applicable to any walk of life and is particularly pertinent to the railroad man in whatever job he fills.

Every once in a while, and in recent months it has become very frequent, the patrons of the Baltimore and Ohio Railroad have taken their time to sit down and write letters of comment, not only on the careful fulfillment of the duties performed by some employe, but particularly commenting on the stick-to-it-iveness of seeing the job through to the comfort of the patron.

We are quoting from letters recently received concerning the attention to the details of duty that

prevented any embarrassment to patrons, who were en route on other lines besides our own. It is comforting to know that nearly every department of the railroad in which employes come in contact with the public, is receiving letters of this nature:—

"Just a line to tell you that we were very nicely treated by the Baltimore and Ohio Railroad on our recent trip to Chicago. The train service, the dining service, and everything connected with the trip, were so carefully provided for as to have made it a great joy to be patrons of your wonderful line.

"Wish to thank you also personally for the kind and hospitable individual attention which you bestowed upon us."

"Wife joins me in this letter of thanks to you for your many courtesies in making our trip to San Francisco such a success. I want to say to you personally that rarely have I had more pleasure in watching a young man "carry the message to Garcia" than I did in observing you overcome the obstacles and finally put our Pullmans on the great Santa Fe train. It was a fine piece of work, and was very creditable to you, as well as satisfying to the real estate men."

### Fifth District Rotary Tour to Los Angeles

ROTARIANS from the Fifth District who had the good fortune to make the tour from the Atlantic to the Pacific, report a most delightful trip. There were in all 267 persons making up the party from Allentown, Pa.; Annapolis, Md.; Atlantic City, N. J.; Baltimore, Md.; Berwick, Pa.; Bethlehem, Pa.; Bridgeton, N. J.; Camden, N. J.; Carlisle, Pa.; Chester, Pa.; Chambersburg, Pa.; Easton, Pa.; Easton, Md.; Edinburgh, Scotland; Frederick, Md.; Hagerstown, Md.; Harrisburg, Pa.; Lancaster, Pa.; Lehigh, Pa.; Lock Haven, Pa.; Norristown, Pa.; Philadelphia, Pa.; Pittston, Pa.; Pottstown, Pa.; Pottsville, Pa.; Reading, Pa.; Sayre, Pa.; Sunbury, Pa.; Shamo-

kin, Pa.; Scarborough, England; Trenton, N. J.; Vineland, N. J.; Washington, D. C.; Wilmington, Del.; West Chester, Pa.; Wilkes-Barre, Pa.; and Williamsport, Pa.

The entire arrangements in detail were left to the passenger representatives of the Baltimore and Ohio Railroad in Philadelphia and every possible comfort was provided for on the special train, which was composed of club car, drawing-room and compartment cars, dining car and observation car.

The tour started from Philadelphia on June 4, returning to that city on June 24, touching at Kansas City, Denver, Col., Colorado Springs, Albuquerque, Grand Canyon, Los An-

geles, San Diego, Santa Barbara, Del Monte, Big Trees, San Jose, Oakland, San Francisco, Shasta Springs, Portland, Spokane, Glacier National Park, Minot, Minneapolis, St. Paul, Chicago, Niagara Falls, Buffalo.

A picture of the Rotarians at Willard, Ohio, will be found on pages 36 and 37.

### Hot Weather Appetizers

FEATURING "a cold bite on a hot day," the Baltimore and Ohio Railroad put into effect on June 26 another innovation on its dining cars for the benefit of travelers and tourists with the introduction of a new menu in addition to those already in use. The card is uniquely illustrated, depicting an open refrigerator stocked with cold edibles. Standing at one side is a smiling chef and at the other a grinning waiter with a filled tray.

The new menu includes such summer-time dishes as cold consomme, salads, sandwiches, sliced tomatoes, ham, other meats, etc., and cold beverages, its use being confined to the summer months. This special card is carried in addition to the regular menus. An added accommodation is that these cold lunches may be secured even after the usual meal hour if desired, provided, of course, the dining car is still in the train. Under the heading, "A Little Suggestion," the steward has arranged a club luncheon, reasonably priced, for patrons who prefer this form.

The Baltimore and Ohio management has from time to time been adding special features to its dining car service, and the encouraging patronage of its guests prompts this further effort.

### Another Bouquet

"As president of the New York Division of the United Daughters of the Confederacy, I am writing to express my deep appreciation of the courtesy you extended to our organization on our recent trip to St. Louis.

"Every attention was received from you and the Baltimore and Ohio Railroad, and I want to congratulate the Company on your courteous attention, which is deeply appreciated by the members of our organization."

Get the best of life, or it will get the best of you.

J. S. Calvert.

## News from the Freight Department

### Good Freight Service Helps Increase Passenger Business

By W. R. McKee, Travelling Freight Agent

SEVERAL weeks ago I had occasion to call on the Letz Manufacturing Company of Crownpoint, Indiana. Their traffic manager Mr. M. J. Heintz, offered a car for Sykesville, Md., which our records show was forwarded on May 15, received by our line at Wheeling, W. Va., 7.00 a. m., May 20, and was delivered at destination on May 25.

On May 25 we received advice from this firm that they had shipped that day, P. R. R. car 549357, destined Philadelphia. This car was received by the Baltimore and Ohio at Wheeling, W. Va., on June 1, and had passed Brunswick in our Train 94, 5.45 p. m., June 2 for Philadelphia, which would indicate its arrival at Philadelphia on June 3.

The shipper was advised of the receipt of these cars at Wheeling and the passing at various junction points.

This service evidently pleased Mr. Heintz, for this office received a postal card from him asking for summer

passenger rates, as well as information concerning points of interest along the Baltimore and Ohio lines east. This request was referred to General Passenger Agent W. G. Brown of Chicago, who made adequate reply to Mr. Heintz, giving interesting and complete information, rates, etc., and stating that he would gladly assist him further if desired.

This is evidence that just a little attention given to shippers would not only secure additional tonnage from a freight standpoint, but will make friends for the Passenger Department as well. It is further evidence that good service will be of benefit to the carrier in general.

#### The Ten Per Cent. Rate Decrease

THE Interstate Commerce Commission has handed down its decision in the General Rate Investigation Case. They have in

effect decided that all freight rates not previously reduced by ten per cent. or more since August 26, 1920, should now be reduced by that amount.

The effect of this order will be very serious to the revenues of the Baltimore and Ohio, which are meager enough on the present freight rates (June, 1922). Nevertheless, it has been determined to be governed by the findings of the Commission in so far as the measure of the rates is concerned, without a formal order.

In order to overcome the effect of this order and increase our gross revenues to a point where the road may make the very necessary expenditures for its proper maintenance and growth, we must have an increased tonnage of at least twenty-five per cent. for the remainder of the year, and we should secure the maximum haul via a reasonably direct and expeditious route.

This is more than a job for the Traffic Department. It is a job for every employe of the Baltimore and Ohio.

Our employes never fall down on the job. You are counted on to do your part.

#### It Takes Everybody

Recently in Mt. Royal Station several passengers gathered around the "Cross Crossings Cautiously" placard. Several comments were passed on the expression on the faces of the party, and the fact that they seemed to be "out of luck." One lady ventured the assertion that the automobile party had just come down "a nasty incline."

No one else had noticed that. Had you? Possibly you have noticed some business that should be moving over Baltimore and Ohio but is not and no one else has discovered it. It takes a lot of eyes to see it all. If you can flag it and prevent the disaster of having it move some other way, "Go to It." Otherwise, see that the traffic official in your territory is promptly notified.

#### A Go-Getter

As indicative of the zeal of some of our local agents to increase the business of the Baltimore and Ohio, we cite George W. Johnson, agent at Collingdale, Pa., who has had a rubber stamp made reading:

DON'T SAY YOU CAN'T GET SERVICE—TRY THE BALTIMORE AND OHIO R. R.

An imprint of this appears on everything that goes out of his office to the public.

"The man who uses his head, gets ahead!"

## "An Outstanding Exception to This Criticism of Dining Car Service is That of the Baltimore and Ohio."

Note:

In a recent two page article "Observations of a Transcontinental Traveler," by William S. Wollner, general safety, fire prevention and welfare agent of the Northwestern Pacific Railroad, in *Railway Age*, the writer mentions a number of experiences that point to the need of improvements in the service of the railroads. But one railroad is mentioned by name in the article and that one the Baltimore and Ohio in this rather remarkable tribute:

The railroads could engender a kindlier feeling on the part of the general public by giving a more popular service in dining cars and, incidentally, they would find this type of service financially more profitable. \* \* \* \* \*

Some of the roads are trying to popularize their dining-car service by serving "plate meals," but the prices placed on these meals are too high to be partaken of by the tourist car and chair car traveler, and on some roads at least the proper equipment is not provided for efficient service. An outstanding exception to this criticism of dining car service is that of the Baltimore and Ohio whose seventy-five cent commercial traveler's club luncheon offers the opportunity for a person to secure an entire meal at this price. Food and service have been especially provided for this excellent luncheon. The dollar and a quarter dinner served on this road, insofar as the writer is aware, has its equal in no other dining car in the United States.

# Safety Section

## Supervising Employes Can Stop the Riding of Leading Footboards on Locomotives

*It is Unsafe, a Violation of Rules and Should be Reported*

*By J. J. Powers, Trainmaster, Lorain, Ohio*

**T**HE practice of employes riding the leading footboards of locomotives has been one of much concern to the railroads for a number of years.

A check of injuries to employes, particularly yard men, from this practice, has developed some of the most distressing accidents which have occurred in yards. These accidents have not only resulted in large losses to railroads, but in great personal suffering to the injured men and hardships to their dependents.

It has been the practice on our Railroad for a number of years, for the supervising force and safety committee members to endeavor to stop this practice by calling to the atten-

tion of the offenders, the risk incurred. This has been the means of discouraging this practice to a considerable extent, but it is a well known fact that officers and safety committee men alone cannot keep constant watch on all yard employes at all times. For instance, at a recent safety meeting about twenty five violations were reported.

I feel that a great deal more could be accomplished if it were possible to keep constant watch over the offenders, and that this could be done by holding the employes immediately over them responsible for seeing that the rules are carried out. Acting on this solution I called a meeting at Lorain and talked over the safety

rules with the men, and especially called their attention to this particular condition. Since the time of this meeting we have had no reports of this violation and we are doing all that we can to promote Safety in Lorain Yard. As new men are hired from time to time they will be instructed and cautioned in regard to unsafe practices.

## Take It from Me—Don't Ride Leading Footboards of Locomotives!

*By C. B. Omohundro  
Fireman, Chicago Division*

**M**EN who violate this rule should have the danger of such practice impressed upon them. Usually they act thoughtlessly and from force of habit, not realizing the risk to themselves and the hardships and sorrows that may possibly be visited on their families.

Many men, particularly the younger employes, do not seem to recognize the serious consequences that may develop from their foolhardy actions, advancing the argument, "men are not often killed riding the leading footboards." If they could understand that after the accident, there is no other chance to be careful, they would consider more carefully the terrible risk involved. It is but human to "take chances," yet why gamble with your life to save a few steps and a few seconds—a few seconds time against your life, especially when the rules forbid, and no man will be censured for practicing "Safety."

If reasoning fails to persuade a chance taker, the engine crews can do much to save life and limb by the engineers refusing to move the engine until the man gets off, and the fireman can inform the engineer when he observes a violation. Some men won't thank them for doing it, no matter how great a service is done them, but we should remember it is as true as ever that we are "Our Brother's Keeper."

### Trains Safer than Autos

Of the number of disability claims paid by the U. C. T. last year—5,169—1,746 were for automobile accidents, costing the Order \$168,517; 78 death claims were paid, 38 of the claims were caused by automobiles, which alone figure \$179,777 in the total of \$392,716.90.

Only one killed while riding on a passenger train. Vital statistics of interest.—*The Sample Bag* (Publication of the United Commercial Travelers).

## Fighting Hot Weather

*One of a series by Life Extension Institute containing the latest and most scientific information on healthful living and the prevention of disease*

WE use this title merely to denote it. At this time of the year the market is glutted with counsel on hot weather hygiene. The implication is often thrown out that there is something peculiarly menacing in hot weather, and that if we can manage to survive it and see the summer through without being injured by the heat, we are rather exceptionally fortunate.

This is altogether a wrong notion to encourage. Our general counsel with regard to summer heat is like the counsel we give for protection against winter cold, *i. e.*, put yourself in good physical trim and then don't worry about it. It is rather remarkable, when we consider the vast numbers of physically impaired and actually sick people we have in the population, that the heat prostrations are so few in number. Most of them are not really chargeable fundamentally to the weather. There has been a lowering of resistance from other causes, and the weather merely steps in and gives the final push.

Professor Huntington has written learnedly and interestingly on the influence of climate on health. He has endeavored to show that there is an optimal or "best ever" climate in which the human organism can thrive to the highest degree. He claims that the most healthful average temperature is 64 degrees and the best humidity 80 per cent. This appears to coincide with the point of lowest mortality for the United States, France, Belgium, Finland, Sweden, South Italy, Japan, Austria, Russia, Scotland and Germany.

Professor McCollum, however, in his recent work, "Newer Knowledge of Nutrition," takes issue to a certain extent with Professor Huntington and is inclined to relate racial stamina and progress to diet conditions. The late

General Gorgas, who was so familiar with the tropics and secured such spectacular results in reducing the death rate in the Canal Zone, was of the opinion that the tropical temperature was no bar to a healthy and vigorous existence. Scientists who have worked in the tropics thoroughly protected from the disease-bearing parasites and micro-organisms that infest these regions have maintained excellent health.

Without attempting to settle these biological problems, we may safely assume that the ranges of temperature experienced in most civilized countries do not carry any particular menace to us individually, if we adopt reasonable means to keep in sound health. This means that the best preparation for either a hot summer or cold winter is to have the body thoroughly examined, all physical defects corrected, diet and exercise properly regulated, extremes of any kind avoided, and then we can give an invitation to the weather to come on and do its worst.

While we do not need to fear hot weather, there is no reason why we should not consider how we can be most comfortable and happy during its continuance. The first requisite is to keep working along and not watching the thermometer. Skip the lurid newspaper accounts of broken heat records. Don't let the hot weather get on your nerves. Forget it in earnest work. A few simple measures will then see you through.

Thirst? How shall it be quenched? Preferably by water, taking a moderate quantity rather frequently. Cool water with a dash of lime or lemon is the best thirst quencher. All the sweet fizz drinks are thirst producers; such refreshment as they give is largely psychic. Start the day with a cool shower or hot and cold shower

alternately, in order to stir up the circulation and refresh the whole body. At night a tepid bath is more cooling and restful and promotes sound sleep.

Diet? There is no particular mystery about it. The foundation of a healthful diet is milk or milk products, green vegetables and fruit. Meat should be taken sparingly.

Bathing? Do not loaf around in the water. Have a refreshing swim and then seek the shade, and do not loll around in the sun accumulating a coat of tan that is not in itself any evidence of good health. Keep the head covered from the sun in intensely hot weather.

A good precaution is to be inoculated against typhoid fever, especially if one is inclined to travel or eat in strange places where there is doubt as to the absolute purity of food and water. The danger from typhoid carriers must also be remembered, people who are not ill with the disease but nevertheless carry the germ in their bodies.

People who show severe symptoms apparently due to the heat should be very carefully examined to find out what is the original cause of their lowered resistance. Mere prostration or faintness is best treated by reclining posture, hot water bag to the feet and aromatic ammonia ( $\frac{1}{2}$  teaspoonful to a wineglassful of cold water). Sunstroke accompanied by unconsciousness and high temperature is a serious condition and requires hospital treatment if this is possible. Attention: ice bags to the head and cold sponging of neck and chest. A doctor should be summoned without delay when any serious condition of this kind is present; and as already suggested, a yielding to heat which average people are able to endure without ill effects always calls for a complete overhauling.

### Are You always Glad to See Your Boss?

*Mr. Boss, are your men glad to see you?*

The diner was filled and the steward was busy, but not too busy to smile. As he moved here and there among his guests, he had a pleasant word for this one, adjusted the window shade for that one and to all he gave that pleasant "glad to serve you" welcome.

Someone, evidently a Baltimore and Ohio man, beckoned to him.

"Steward," he half-whispered, "did you know that your boss is on today?"

"Oh, is he?" asked the steward, his smile widening into a grin. "Well, that's fine. You know we're always glad to see our boss. He's a fine fellow. He pays us a visit once in a while, and there's nobody we'd rather have come to see us."

### Pick up the Knitting

A young woman at the church sewing society observed that she had completely forgotten how to knit, and that she supposed we had better have another war, so that she might learn again.

Bless her jolly little soul, she did not realize how well she had epitomized the main trouble of the postwar world. We have all forgotten how to knit. When the need was on us the needles flew swiftly and surely in and out. The minds and hearts and actions of all Americans were drawn together as was the yarn. In every Allied country it was the same.

Life in those days had a purpose, and every muscle and every thought was bent toward its accomplishment. Now there are almost as many conflicting purposes as there are people. The interests of no two nations are in agreement. Then men were heroes and most of those left at home self-sacrificing.

There was no unemployment, and for the time it seemed that poverty had been abolished. Railroads, mines, farms and factories were viewed as means to an end rather than the end itself. Flushed with new hope and filled with the conviction that the casualties overseas were not in vain, it was heard on every hand that the world would never slip back into the old petty ways. England, Lloyd George exclaimed, was to be a land fit for heroes to live in. The same thought was in every mind, on every tongue, in every ear.

The spirit of devotion is past. The world has forgotten how to knit and instead is unraveling. The gains of the war are being lost, and a world which might be richer,

is poorer, both in spirit and in goods. The failure is only in part that of the people, and in large measure is the fault of leadership. It is time for statesmen to attend once more to their knitting.

—From the *Omaha Bee*.

### A Prize Nuisance

Of all the nuisances which busy people have visited on them, the chain letter is the worst. For instance, take the following:

#### Good Luck

Copy this and send to nine people whom you wish good luck. The chain was started by an American Officer and should go around the world three times. Do not break the chain, for whosoever does will have bad luck. Do it within twenty-four hours and count nine days and you will have some great good fortune.

Let's all go "SMILING THROUGH" 1922.

A statistician of the *Baltimore Evening Sun* has figured out that if the instructions contained in this paragraph were literally carried out and run through just ten series, 4,013,632,450 persons, or nearly three times the total number in the entire world, would receive it.

The reason they don't all get it is because most people haven't the patience to constitute themselves effective links in the chain. One of the letters which reached this office had already traveled through 28 series of names and you can figure out yourself the approximate billions of individuals who would have been reached had each writer in each series sent out nine letters and achieved the impossible of not having any letter reach any person more than once.

But the fact is that some undeserving folks are spotted oftener than others, as witness two individuals in this office, one of whom has received this thing from six sources and the other from three. With all due respect to the good folks who have thought of us kindly in this connection, we beg to be excused from further participation—even on the receiving end.

The amount of time and materials wasted in sending out such letters is colossal. The individual does not realize it, but just a little dip into the figures will prove it, even if you make the cost of each letter as low as a cent, which is much less than it really is.

And as for the bad luck being visited on the persons who break the chain—well, the number who have already done this is so many that they may have no fear but that they are in an overwhelming and safe majority.

### The Man with a Head Gets Ahead

The man who simply works enough to hold his trade and who argues he is doing enough, shows lack of ambition. He is also stunting his own growth and power to expand. He does even worse; he breeds contempt for ambition. One may be able to "get away with it" for the time being but such luck is not of long duration.

Ideas rule the world of business. The man who plods over his work like an automaton has lost sight of one of the most firm foundations of success. The man with a head gets ahead. We were given a head but no one else can use it for us. No man is born a business man or an engineer or physician. He is placed on earth even as you and I and after that it depends upon himself what he shall be. Instead of doing as little as one can, it is well to try doing as much as possible for there are many bright milestones on the road of duty and many rewards for the man who gives overmeasure in the scale of service. The reward may not be immediate but the

world pays for services rendered. It costs nothing but energy to try the plan anyhow.

It's the set of the sail and not the direction of the wind that guides the ship.

—J. S. CALVERT  
Western Union Telegraph Company

### Creating Passenger Business

There are two ways of getting passenger business. The first is by taking it away from the other fellow. The second is by creating the desire to travel and hence making passenger revenue producing miles.

The railroads have been creating business all during their history. They have implanted in people the desire to travel and see things, and hence in a very special sense have done a big job in making the American people understand each other. And despite the fact that we are a united people, we still need this understanding because the problems in different parts of the country are different, and yet their solutions affect the welfare of the whole nation.

When the New York Central through its advertising brought thousands of people from all parts of the United States to see Niagara Falls, they accomplished a much greater mission than they ever dreamed of. People from the south and west got to know more about their north-eastern countrymen and probably found some uncomplimentary ideas about them quite unfounded. The Santa Fe did the same thing in popularizing the Grand Canyon and the Baltimore and Ohio is doing the same thing with our National Capitol at Washington. It is not only increasing its revenues through passenger travel to this principal shrine of all Americans, but it is sending them back to their respective localities with a broader vision of their country's greatness, a quickened interest in her history and a sublimer faith in her ideals.

At the Naval Academy in Annapolis several years ago the class was required to write an essay on "The three things that contributed most to the defeat of the Spanish Armada."

One daring young man turned in a sheet of paper on which only three words were written.

His "essay" was taken more seriously than he had figured on. In fact, the powers-that-were threatened him with court-martial. He was denounced and given the dickens in particular.

His papers, along with the papers turned in by the other members of the class, were sent to Washington. Word reached the officials there somehow that the young man who had written the ultra-brief essay had been threatened with dire things.

And then there was flashed from Washington this message to the authorities at Annapolis:

"Cancel the court-martial and keep your eye on that young man."

The writer of the essay that had offended the academic sensibilities of his instructors was a marked man after that. Today, says the man who told me this story, and who declares it is absolutely true, this young man is making his way to top rank in the navy.

These were his reasons for the defeat of the Armada: *Seamanship. Marksmanship. Comradeship.*

This little story is recommended to the consideration of men who aver that cooperation in business doesn't mean anything. The last reason especially.

—Jerome P. Fleishman in "Uncle Jerry Says"

### Courage

He was born in 1862 and entered the service of the Railroad in 1887. He has been a good friend of mine during my eight years with the Railroad, and a frequent and valuable contributor to the MAGAZINE. My opinion is that had he taken up the pen of a reporter instead of that of a railroad clerk thirty-five years ago he would have made a fine record as a newspaper man and perhaps a fortune.

Preaching appreciation in the MAGAZINE, we try to practice it and acknowledge with thanks all communications sent to the MAGAZINE office. And so when a few weeks ago an unusually clever and thoughtful paragraph or two reached me over his signature, the next mail took back to him my acknowledgement—a penciled note of the gratitude that I felt. And here is his reply:

My Dear Sir:

Your personal note of appreciation just received. Thank you for your kind encouragement. I would not be human if I did not like praise. Some pretend they are indifferent. Or maybe they are. Not me. For the next 10 days I will be too busy with routine work to send you anything. I have also other troubles—wife sick; must move before April 1; and am an even \$500.00 out on a real estate transaction—five hundred plunks representing five years savings. However I am young still, and equal to such bagatelles.

Yours with regards, etc.,

You can read every page of this or any other magazine and not find anything finer than that!

### The Best Business Policy

"The hardest thing any executive ever has to do," declares Frank R. Chambers, chairman of the board of the Rogers Peet Company, in *Forbes Magazine* (N. Y.), "is to get his people to carry out the policies established by the heads of the organization. Not because they are not willing to, or lack the desire to do what is asked of them, but because they often find it difficult to interpret that fine sense of good feeling which he wishes to pass on to the customer in his desire to render service. There is an intangible element in making people feel you want to do all you can for them, which is impossible to explain to a man in words. You can't *tell* him how to do it, but you can *show* him. If he lives in that atmosphere long enough he is bound to absorb it. He understands by actual experience just the part he is expected to play, and to act that way becomes second nature. We like to have every salesman put himself in the customer's position and frame of mind and then serve him just as he himself would like to be served under those conditions. We don't want to over-preach the golden rule, but the golden rule is good business."

by G.H. Pryor  
Auditor of Disbursements

**Note:**

All puzzles published in this department will be defined, as far as possible, from the *New Standard Dictionary*, edition of 1920. It is permissible to use both geographical and biographical words in the construction of puzzles, but when such words are taken from any authority other than the *New Standard Dictionary*, the name of such authority must be stated at the end of the definition, in parenthesis. ("obs"). Obsolete words will be marked at the end of the definition thus—("obs"). Variant spellings of a word must be marked at the end of the definition thus—("var"). Address all communications concerning this department to G. H. Pryor, Room 800, Baltimore and Ohio Building, Baltimore, Maryland, and mark the envelope "Puzzles."

THE answers to the puzzles published in the April issue are:

1. Thought
2. E-very
3. Handcar
4. Butterfly
5. G-rain
6. Ever-y

  - 5—Beleaguements.
  - 6—Any one of several astringent extracts rich in tannin.
 Down:

- 1—A letter in "Maryland."
  - 2—The three toed sloth.
  - 3—A decorative piece of plate for the table.
  - 4—Ewers (Prov. Brit.).
  - 5—South American bustards.
  - 6—Classic form of Eolic.
  - 7—A thread fish.
  - 8—(Dialectical U. S.) Stiepers.
  - 9—(Obs.) Negh (New International Dict.).
  - 10—At all events.
  - 11—A letter in "Baltimore."
- Brooklyn, N. Y. Gemini

7. BEHEADMENT (4)

When Princess smiles the skies grow bright  
And stars adorn the darkest night.

The low-hung clouds—so cold and gray—  
Glide quickly by and melt away.  
All worldly ONES TWO lost in flight  
When Princess smiles!

I see her now in fancy's sight—  
A lovely vision all in white—  
Mid flowers that nod their roundelay  
When Princess smiles!

My rhymes grow scarce! Ah what a plight!  
'Tis hard, indeed, for one to write  
A rondeau. Yet why so, I pray,  
When rhymes, in laughing ripples, play  
Within her eyes? The task is light  
When Princess smiles!

Baltimore, Md.

*Martelia*

8. PYRAMID

Across:

- 1—A letter.
- 2—To act as a cad.
- 3—In general, a small piece or part.
- 4—A metal, wooden or leather vessel, used for carrying water by soldiers on the march.
- 5—Dominion.

Down:

- 1—A letter.
- 2—Scotch variant of "call."
- 3—Right of precedence.
- 4—Singing.
- 5—Zante wood.
- 6—In a wide sense, any of the animals constituting the family Cervidae.

7—Brought or taken.

8—Not any.

9—A letter.

Hoboken, N. J.

*Lateo*

9. HEXAGON

- 1—A young woman.
- 2—A starwort.
- 3—Medical name for tin.
- 4—In old English law, a king's councilor.
- 5—In chemistry, same as caprate.
- 6—A sacred musical composition for several voices.

7—A network.

Baltimore, Md.

*Pat Tapsco*

10. SQUARE

- 1—Avoids by suddenly turning aside.
- 2—The East.
- 3—The principal meal of the day.
- 4—The plural of GENUS.
- 5—Force.
- 6—Wanders from the path.

Scranton, Pa.

*Arty Ess*

11. CHARADE (10)

TWO of the West he came  
Yes TWO of the Golden West,  
Though Legions know his name  
ONE his deeds he is known the best.  
At his death the people grieved  
WHOLE the great world wide,  
For freedom's cause he lived  
For freedom's cause he died.

Butler, Pa.

*E. W. Jones*

12. DIAMOND

- 1—A letter.
- 2—A hopping.
- 3—In England, the landed estate of a nobleman.
- 4—Adroit.
- 5—Concentrates.
- 6—Sharp.
- 7—Set again.
- 8—Having the color of red.
- 9—A letter.

Hoboken, N. J.

*Lateo*

13. RHOMBOID

Across:

- 1—To cook in an oven by subjecting to radiant heat or heated air.
- 2—A recessed space or hollow.
- 3—Full of sediment.
- 4—A river in N. W. Germany flowing into the North Sea.
- 5—Emitting an offensive odor.

Down:

- 1—A letter.
- 2—In or as if in contact with the upper surface of.
- 3—The atmosphere.
- 4—A boat with flat bottom and square ends without motive power.
- 5—One who steals.
- 6—In the place of.
- 7—Nevertheless.
- 8—Abbreviation for the smallest state in the Union.
- 9—A letter.

Weston, W. Va.

*Colston Trapnell*

14. CHARADE (7)

The PRIMAL of the flowers,  
Soon will be;  
For frost is painting,  
Each leaf and tree.

The river is burdened each day,  
With a horde of leaves,  
That are sailing away.

Prizes for Best Answers

A copy of the standard book on puzzles, "Key to Puzzledom," will be given to each of the five employees submitting the best answers to the puzzles given in this issue of this Magazine, and having them in the hands of Mr. Pryor by September 1. Only new puzzlers will qualify for this competition, it being felt that the old puzzlers will be glad to leave the field open to the beginners.

As it is unquestionably true that many employees will solve all the puzzles given in this issue correctly, it will probably be necessary for those competing for these prizes to work out an original puzzle, to put him or her in the running. The names of the successful competitors will appear in the October issue.

Grey clouds from the north,  
Are streaking,  
Dull and drear the day.  
Still the leaves go voyaging,  
On their silent way.

Keeping FINAL of spangled glory,  
As they are robbed at each delay.  
Many will be sinking,  
To mix with clay and sand,  
Those left on the COMPLETE voyage  
Shall beach in a distant land.

Wilmington, Del.

*Napoleon*

15—SQUARE

- 1—A famous Roman orator and writer.
- 2—Reflected.
- 3—A girl's name.
- 4—Departure.
- 5—Scotch word meaning dries or cures in the sun.
- 6—A Russian scaport.

Cincinnati, Ohio.

*Wick-o-cincy*

Just Between You and Me

This month we show two new kinds of puzzles, No. 5, the anagram, and No. 9, the hexagon, and a few words of explanation may be necessary to give our readers a hint as to the proper way to construct and solve them.

The "Key to Puzzledom" describes an anagram as: "A transposition of the letters of a word, name, phrase or sentence, by which new words or phrases are formed, having an apposite relation to the original. May be versified or not." In other words, you take a word, phrase or sentence and transpose the letters to make other words, phrases or sentences having the same relation to the original. A good anagram is a beautiful thing and many such have been constructed. On the other hand it is very easy to make a poor anagram and such is the bane of the average puzzle editor's life. Perhaps one of the very best anagrams ever constructed consisted of the two words "They see," the answer being "The eyes." Anonyme, now a famous New York lawyer, composed that anagram and nothing he has produced in his long and honorable career as a puzzler has reflected more credit upon him. A. Blokhed is the author of this one—"A free clan then decided one point," the answer being "The Declaration of Independence." Arty Fishel, a famous puzzle editor, composed this one: "Govern, clever lad," the answer being "Grover Cleveland." If you take the letters in these three examples you will find that by transposing them they make exactly the answers; and that the puzzles themselves have a decided relation to the answers. In our No. 5 in this issue it is quite evident, from the puzzle itself and from the verse that follows, that the answer has something to do with Ireland, and with that hint the solution should be easy.

A Hexagon, as its name implies, is a form puzzle with six sides. The hexagon is made

(Continued on page 23.)

## General Manager Scheer Addresses June Meeting of Baltimore Division Veterans

*General Superintendent Transportation Curren, Superintendent Hoskins and District Master Mechanic Galloway also Speak*

THE June meeting of the Baltimore Division Veterans was called to order by President J. A. Wall, who immediately asked that those present stand for thirty seconds in silent tribute to the memory of deceased Brother Kelly.

After a short business meeting which was participated in by a good many of the members and which evoked much enthusiasm, President Wall called on E. W. Scheer, general manager, Eastern Lines, for the address of the evening.

Mr. Scheer said laughingly that he felt that he had a special right to speak as a Veteran because of the fact that he had been sent a card as an honorary member for the year 1922 and later on had received a bill for dues as an active member, which he promptly paid. (All of which indicates the astuteness of the financial secretary of the chapter, Mr. Harrigan.)

Mr. Scheer spoke enthusiastically of the splendid growth made by the Veterans' Association in the last few years and said that it was the best school of loyalty on the Railroad, a school wherein the members, by the ability which they have demonstrated in various occupations, by their fidelity to the Railroad and by the friendships which they have formed, have become competent instructors in the ideals of loyalty to the Baltimore and Ohio.

He referred to the fact that the Veterans were the moving spirits in the business solicitation campaign inaugurated among them by President Willard during the forepart of 1918 and that it was their enthusiasm and initiative which made the campaign so contagious and so productive of good results to the Railroad.

Mr. Scheer then called attention to the good neighbor ideal which President Willard formulated for the Railroad back in 1916 and which has become more and more a

part of our policy since that time. He spoke of the feeling of pride which he had as superintendent of the Indiana Division when he was first able to give practical application of this Baltimore and Ohio ideal in his territory. He said further that it was his belief that no employe could ever truly say that the executive officers of the Baltimore and Ohio ever maintained other than an attitude of true neighborliness toward the employes of the Company.

Mr. Scheer then developed clearly the thought that the employes of the Railroad, if only from an efficiency standpoint, should have a deep interest in the financial success of the property. He said, for instance, that support and patronage are not given to organizations which are not successful and progressive, and that business and capital will come to the Baltimore and Ohio in proportion to the showing it makes as a prosperous organization. He mentioned further the fact that through the large holdings which life insurance companies, banks and other fiduciary organizations have in the securities of railroads in the United States, probably fifty million Americans have a direct financial interest in the success of the railroads and that for that reason the prosperity of the railroads is a matter of paramount importance to the citizenship of the country as a whole. If the railroads earn a reasonable return on their operations, they can pay fair dividends. These, in turn, go to the great fiduciary organizations of the country and are distributed in the form of interest on savings, sharings in participating policies, the lowering of premiums, etc., etc.

Mr. Scheer then pointed out a number of ways in which the employes of the Baltimore and Ohio could contribute to its prosperity; how, for instance, a saving of five cents a day on the part of each employe would mean the saving of a million dollars

a year on the whole railroad; how large sums can be saved by a very careful handling of trains with consequent cutting down in our loss and damage payments; how a two per cent. saving in coal consumption would result in an actual saving of \$334,000 a year.

He emphasized the fact that whereas by soliciting a dollar's worth of business an employe only puts about twenty cents into the treasury of the Company, because it costs eighty cents to handle that dollar's worth of business, he can by actual saving in the ways suggested, put into the treasury the full amount of money saved.

He said that the Baltimore and Ohio, in common with other railroads, is still behind in its maintenance program, that plans for many improvements are but awaiting the necessary funds to cover construction costs and that much of the money which is saved will be applied to these maintenance and construction purposes with the result that there will be more employes in the service, a bigger payroll and more and more opportunity for the men in the ranks.

President Wall then called on Superintendent Hoskins of the Baltimore Division.

Mr. Hoskins expressed his appreciation for the fine support being given him by the men under his supervision and especially because of the fact that the Baltimore Division occupied second place in freight train efficiency. He said that he knew the men working with him well enough to be sure that they could boost the division's standing another point and put it into first place.

He mentioned the fact that by their careful handling of locomotives in smooth stopping and clean firing, our engineers and firemen are contributing substantially to the increase in our passenger business; and that by the uniform courtesy which is being shown by our train service men, the Baltimore and Ohio is constantly attracting a larger patronage.

He made a special plea for intensive supervision of the little things, mentioning hot boxes as an example. Of these there were 41 in one week on the Baltimore Division, each one causing an average delay of 21 minutes. Such delays are extremely expensive; they can be largely cut down with resulting prosperity to everybody connected with the Railroad.

In concluding, he acknowledged gratefully his appreciation of the support and fidelity of the Veteran employes under his jurisdiction.

Mr. Hoskins was followed by W. G. Curren, general superintendent transportation, who said that he had been an honorary member of the Veterans for some time, that unlike Mr. Scheer he had never been called upon to pay any dues, and that in lieu of this fact he stood ready to hand over his check for \$25.00 to the treasurer of the chapter for whatever worthy purpose the Veterans wished to use it. Naturally this announcement created great enthusiasm.

Following Mr. Curren, District Master Mechanic A. K. Galloway thanked the Veterans for electing him an honorary member. He said that he was always glad to get an old timer into his department because of the stabilizing influence which he exerts and the enthusiasm and loyalty which he promotes. He said that he had come to Baltimore as a stranger several years ago and that few things had been more clearly impressed on his mind than the fidelity and ability of the Veterans.

It was then announced that the entertainment part of the program would be started immediately in the concert hall above and the Veterans adjourned to meet their wives and families and hear the following enjoyable numbers:

- Song and Dance ..... *Miss Elane Fladug* (aged 8)
- Sailors Horn Pipe.....
- Masters Vernon Batzel and Earl Gordon*
- Radium Dance..... *Miss Lucie Shugard*

- Songs.... *Miss Elizabeth and Vernon Batzel*
- Saxophone Solo..... *Mr. Fred'k Gempp*  
(Office of Chief Engineer)
- Duets..... *Misses Meryl and May Harris*
- Buck and Wing Dancing... *The Dancing Dolls*
- Baltimore "RAMBLERS" Orchestra:—  
*Prof. H. Roland Thorn*.....Violin  
(Office of Chief Engineer)
- LeRoy Hendricks*.....Pianist
- Frank Denninger*.....Drummer
- Roland Pumphrey*.....Cornet
- Fred'k Gempp*.....Saxophone

Among those present beside the speakers above mentioned, were: R. B. White, general superintendent; C. A. Mewshaw, passenger train master; J. W. Smith, assistant train master; J. J. McCabe, assistant train master; J. J. Swartzback, chief train dispatcher; J. P. Hines, master mechanic, Philadelphia, Pa.; F. W. Fritchey, master mechanic, Riverside; John W. Cavey, road foreman of engines.

of the living. And he quoted the inspired poem of Browning "Abou Ben Adhem," whose chaste beauty breathes forth the spirit that service to our fellow men is the best way to show Christian character.

One of the musical features was a trio sung by Miss Margaret Frischkon, Mrs. O. A. Wood and Clarence H. Bloom.

The railroaders were welcomed to the church on behalf of the congregation by C. H. Bloom. John F. Shafferman, supervisor and an active spirit in Baltimore and Ohio activities, led the singing.

After the services the officers of the Railroad, whose participation in the proceedings was much appreciated by the veterans were taken in automobiles to various points of interest in and near Fairmont.

### In the Realm of the Riddle

(Continued from Page 21)

in several shapes but our No. 9 in this issue is built in this form:

```

O O O O
O O O O O
O O O O O O
O O O O O O O
O O O O O O
O O O O

```

The first horizontal word of four letters reads exactly the same as the first up and down word, of course, of the same number of letters. The second horizontal word of five letters reads exactly the same as the second perpendicular word and so on with the 3rd, 4th, 5th, 6th and 7th.

E. W. Jones, cashier, Freight Station, Butler, Pa., sends in a complete list of answers and also contributes a neat charade.

Ray Montgomery, store helper, Wilmere, Del., who has adopted the *nomdeplume* of "Napoleon," also makes a contribution as well as submitting a complete list of answers.

P. M. Pennington, crossing watchman, Cumberland; Walter R. Hedeman, Mechanical Engineer's Office, Baltimore, Miss Mary B. Tansill, secretary to chief clerk to superintendent Telegraph, and Miss Charlotte Stibler of the Magazine office, all evince quite an interest in the department and are offering support that is very encouraging.

We need some flat puzzles, such as beheadments, curtailments, deletions, transpositions, etc. There certainly must be a number of good versifiers in the great big Baltimore and Ohio family who can write such puzzles and write them well and we would like to hear from these folks at an early date.

The copies of "Key to Puzzledom" offered as prizes by the editor of our MAGAZINE are well worth striving for and are bound to prove both interesting and helpful to any one interested in puzzling.

Wick-o-cincy, the author of No. 15 in this issue, is J. H. Wickham, secretary to the assistant superintendent of Dining Cars at

(Continued on page 26)

## Fairmont Auxiliary Named in Honor of General Superintendent J. M. Scott

By Mrs. Harry Fleming, Treasurer

ONE of the largest and best meetings in our history was held on May 20.

After a brief business session the 175 persons present turned their attention to the entertainment program, which started with the formal naming of the auxiliary, "The J. M. Scott Auxiliary," in honor of the general superintendent of the Wheeling District.

Mr. Scott responded in an appropriate address, expressing his appreciation of the honor, and telling the women veterans how they can help make their men folks happier and better members of the Baltimore and Ohio family. He also presented the auxiliary with a bit of paper which is going to enable the ladies to realize one of their hearts' desires, namely the purchase of a set of china for their repasts—and then some. Mr. Scott's generosity and his great interest in all that pertains to the welfare of the Veterans and their families are well known in his district.

Superintendent Holverstott of the Monongah Division, and A. F. Heffner of Fairmont also made interesting addresses, as did Mrs. F. M. Howard of Newark, Ohio, the grand president of the Auxiliaries, who was a welcome guest. The complete program follows:

- America by the audience.
- Placing the flag by Mrs. H. Fleming.
- Address by Mrs. F. M. Howard.
- Piano duet by Mrs. Warder Tutt and daughter.
- Presenting corsage bouquet to Mrs. F. M. Howard.
- Solo by Miss Lucile Stealey.
- Address by J. M. Scott.
- Address by Arnold Lloyd Heffner.
- Solos by Frank Jordon.
- Solos by Douglas Fleming.

Address by B. Z. Holverstott.

Trio by Don Adams, piano; Miss Louise Fletcher, violin; Gleen Thrash, mandolin.

Reading by Miss Ruth Baldwin.

Vocal duet by Miss Naomi Heffner and Miss Ruth Wilson.

We are glad that we can say that all the entertainers on our program are "Baltimore and Ohio." It is not necessary to go outside our organization for talent, no matter what we wish.

Because of the illness of Grand Vice President J. M. Garvey, Grand Vice President Mrs. Garvey was unable to be with us.

Our Veterans' Chapter and Ladies' Auxiliary are growing fast; all are loyal members of the Baltimore and Ohio family, and we expect to do still bigger things in the future.

### Memorial Service at Fairmont

THE Annual Memorial Service of the Fairmont Veterans was held in Grace Lutheran Church of their city on June 18. The sermon was preached by the pastor, Rev. Roy J. Meyer, who made a strong appeal for the upholding and following of Christian ideals in Railroad life.

The Railroad was represented by E. W. Scheer, general manager of our Eastern Lines. He said that it was a privilege for him to be present to honor the memory of the Veterans who have passed on, and mentioned the many fine friendships which he has had among the old guard in the Railroad family, men who are now gone, but whose counsel and inspiration he still cherishes. He said that there is no better way in which we can honor the memory of those who have finished their work in this life, than to do our utmost for the happiness, welfare and safety

## For a Diamond Ring and a Gold Watch

*Joseph Beel Says that Popularity Contest Was Crowning Feature of Cincinnati Employes' Picnic*

ON Saturday, May 27, 4756 Baltimore and Ohio employes, their families and friends gathered at Cincinnati's famous recreation center, Chester Park, and enjoyed the second Annual Outing given by the Cincinnati Terminal employes, General Manager Begien having granted a half holiday in order that all could attend.

Arrangements for the outing were made by a committee consisting of Messrs. Joseph Beel, chairman; J. J. O'Donnell, W. C. Fisher and W. J. Maloney. Much credit for the success of the picnic was due to their untiring efforts in arranging in detail the program for the day—first, a popularity contest, and second, an elaborate athletic program, followed by a grand euchre given under the auspices of the Veterans' Association.

A primary election was held prior to the outing and the employes selected by ballot, four men and four women candidates to compete in the popularity contest.

Results of the primary election showed the following names: Misses Edna Orr, Clara Schulte, Willa Mobberly and Bertha Goetz; Messrs. H. S. Stansbury, Phil Koth, E. J. McGinnis and J. D. Shoemaker. Through the courtesy of the management of Chester Park, arrangements were made to have tickets presented for each candidate, tickets to serve as an admission tender to the Park on the day of the outing; the lady and gentleman candidates receiving the largest number of votes to be awarded the popularity contest prizes.

Considerable enthusiasm was manifested in the election, which resulted in the selection of Miss Edna Orr, secretary to master mechanic at Ivorydale, and H. S. Stansbury, car foreman, Storrs, as the most popular employes. The final result was as follows: Miss Edna Orr 1151, Miss Clara Schulte 831, Miss Willa Mobberly 723, Miss Bertha Goetz 555; H. S. Stansbury 610, Phil Koth 545, E. J. McGinnis 309, J. D. Shoemaker 32.

The second important feature of the program for the day was the athletic program which developed the fact that there are some good athletes in the Cincinnati Terminals. Many humorous features were added such as Egg Rolling Contest, won by Mrs. E. Schmalz; Ladies Running Race, won by Miss Clara Schulte; Misses Running Race, won by Miss E. Allison; Peanut Rolling Race, won by Miss G. Wehage; Fat Men's Running Race, won by R. A. Seiler; Men's Running Race and Hop, Step and Jump, Standing and Running Start, won by W. McKenzie; Fat Men's Hop Race, won by D. E. Todd; Tug of War, won by H. Oldenburg and B. Marsand; Ladies' Marksmanship contest, won by Miss Margeret T. Stevens, of Baltimore; Gentlemen's Marksmanship Contest, won by W. W. Bybee.

The Prize Waltz was won by George Bohart and Miss Carrie Buns. The Baby Contest was won by Miss Ruth Dearwester.

A Penny Scramble, running races, sack races and three-legged races for boys and girls were arranged and participated in by the young hopefuls. Many other prizes were carried away by the Veterans, for whom a special program was arranged.

Invitations were extended to officers and employes of connecting divisions, but few were able to take advantage of this big day. We were especially glad to have General Manager Begien with us. He participated in the Men's Marksmanship Contest, which developed that Mr. Begien is a better railroad man than marksman.

Felicitations were received from C. W. Galloway, vice president Operation and Maintenance.

### Observations from the Gyroplane

Said Beel to Maloney, "I never did see Such a crowd as the one that's coming, did ye?"

Then up spoke O'Donnell, with double-quick action, "They can't help it, Joe, when you're the attraction."

"Who? Me?" asks Beel, blushing, "but I can't quite figger How to handle the prizes if the crowd gets much bigger."

Said Yardmaster Fisher, "Oh, Joe, you're a dandy!

Just hand the men cigars and give the girls candy."

Mr. and Mrs. J. H. Meyers and daughters, Helen and Margaret, and their friends, arrived in the evening to enjoy a good time. Come earlier next year "Jack," and let Margaret win the Baby Beauty Contest.

Miss Edna Orr, winner of handsome diamond ring in popularity contest

Terminal Agent and Mrs. C. E. Fish and their friends enjoyed a pleasant day.

Assistant Chief Clerk Frank Nock was there, in front of the club house promenade. Frank, the Ladies surely enjoyed your presence.

Brother West figgered in a skip, jump and hop,

He made such a start he was unable to stop; Then came Brother Allison, our Safety agent,

But when the girls tumbled, Bro. Allison had went.

C. J. Cleary, R. B. Fitzpatrick, J. M. Shay, W. P. Abbott, W. L. Morton, J. M. Burke, F. L. Hall and others were conspicuous by their absence. Don't forget to use your free tickets next time.

Timekeeper Eddie Schmalz, Superintendent's Office, and family were on hand early, partaking of scrambled eggs after Mrs. Schmalz had won the Egg Rolling Contest.

Chief Block Dispatcher D. E. Todd tried everything in the park, including the merry-go-round. Such a headache!!!!

Frank Ruwe, with Bill Bybee and Willie Richter, were caught at the back gate selling free tickets.

E. J. McGinnis fainted after the Running Race—his girl was there. Guess he knows how to play the sympathy act.

Misses Weber, Herron and Stevens started well in the Misses Running Race, but—no need to talk about it.

'Twas three by my Ingersoll when the ladies' race began,

You could hear the beating of their hearts, as only girls' hearts can,

But hardly had they started forth when three went sprawling out,

One was thin, and one was small; the third one was quite stout.

The doctor came a-running with a quart of iodine

And forty yards of bandaging. He dressed them up quite fine;

But Clara dear, who'd won the race, rocked in her acquisition,

Declaring that this fall of three quite changed her disposition.

"At any rate," quoth Allison, "'twas worth ten cents admission."

Mrs. Mabel Schatz clamored among the children following the free vaudeville performance. Mabel, this was a Baby Beauty Contest.

Jim Flanagan, as usual, came in the back gate, all smiles, saying he got a dime for the other ticket he had.

T. J. Murphy, chief clerk to superintendent transportation, was on hand but his candidate did not win. This is not Tom's fault; he did his best.

Miss Erma George, telephone operator, was there with bells on. Anybody needing a campaign manager, call Erma.

"Miss Weber," said someone, here's a nice can of lard,

Do you know why you won it? Now try to think hard."

"Don't know," quoth sweet Katharine, as her eyes drooped from sight, "But 'twill appease my dear mother when I get home late tonight."

E. B. Russell, assistant to general manager, and Mrs. Russell were on hand early and enjoyed themselves immensely.

L. A. Cordie, agent, was accompanied by a lady, probably his??? Larry you're way out there. Congratulations!

Why did E. J. McGinnis and Miss Clara Schulte find so much enjoyment in the Silvery Subway? It is no puzzle since they were caught holding hands a few days before the outing on a similar evening's enjoyment.

In perfect harmony with the big day the management at Chester Park had the

miniature railroad engine re-decorated and it bore the name of Baltimore and Ohio. In addition to this, the large poster advertising the coming "No Crossing Accident Campaign" was in a conspicuous place. John Longdon was in charge of engine.

Did you see Colonel Martin, who owns Chester Park?

He held a reception from noon until dark.

We took an excursion around the lake and before we whistled out we observed basking themselves in the sun, two couples—The P. S.'s, Miss K. E. Weber and W. S. McGinley intently absorbed in each other, unaware of the piercing rays of the afternoon sun. We also saw Miss C. P. Schulte and her friend apparently so interested in each other that they were unaware that they were receiving a coat of tan. No stop was made

at the Honeymoon Express station. When we slowed down for a 19 order, we saw Gertrude Wehage, Marie Hughes, Marie Oliver and Ruth Kittle, and four gentlemen, all making a quick exit from this rollicking concession. A stop was made at the Silvery Subway, and when our party was looking out over the "Bay of Biscay" a gondola passed and Oh!! what we thought we saw! But Juanita Bates and Ethyle Distler say that Eddie McGinnis and Francis Galvin—oh, well, since we are wrong, what's the use?

A free vaudeville was a feature quite fine, But give me the show of the babies for mine; There were Mary and Frances, and Louis and Pete,

And two dozen others, all dimpled and sweet.

At last Brother Fisher declared each a winner,

LOOK AT 'EM! THEY HAD A BIG TIME AT THE PICNIC

1. A group of babies who were entered in the "Baby Beauty Contest." 2. A group of girls from the Terminals: (standing) Juanita Bates, Ruth Kittle, Ethyle Distler, Clara Burke, Marie Oliver, Gertrude Wehage, Marie Hughes; (sitting) Bertha Goetz, Kathryn Weber, Clara Schulte and Helene Herron. 3. Winners in the "Baby Beauty Contest"—First prize, Ruth Dearwester; second prize, Louis Schooler, and third prize, Helen Feldkamp. 4. Contestants in the Men's Running Race—Eddie Schmalz, Stewart McKensie, Francis Galvin and Eddie McGinnis. 5. The Organizing Committee and the general manager; W. J. Maloney, Joseph O'Donnell, Joseph Fisher, R. N. Begien, general manager, and Joseph Beel. 6. Safety Agent W. L. Allison carried a carload of Cincinnati "peaches." Too bad the photo didn't show them. 7. Claim Investigator J. S. Barnet and Chief Train Dispatcher D. E. Todd (winner of Fat Men's Hop Race). 8. Group of future railroaders, who ran in the 3-legged race. 9. The Safety Bulletin played a prominent part, even on the little railroad train that ran around the lake. 10. Contestants in Hop, Step and Jump, running start: W. L. Allison, O. E. West and S. McKensie. 11. Contestants in Fat Men's Running Race: P. Marsland, H. Oldenburg, R. Siler, and S. L. Dearwester. 12. Contestants in the Tug of War: S. McKensie, James Riley and H. Oldenburg

As he, as a judge, became forty pounds thinner.

At the Dancing Pavilion we took coal and water and made a few observations—Frank Carner and his daughters, Miss Helen Herron, Miss Bertha Goetz, Lucille Baumgartner, Grace Walsh and many other exponents of the dance tripping lightly over the floor.

Then on with the euchre that the Veterans played, There were prizes galore, and none was dismayed; Give Miss McMorrow and Joe O'D. the glory, To tell how they managed would make a long story.

The regular stop was made at the "Bathing Beach" when the party was given a thrill—John Quinlan and Charles Layman, yardmasters, were doing a high diving stunt in five feet of water.

"Do you know, Brother Mannix," said Brother Hopkins that night, As the two slowly ambled by the lakeside so bright, "When I see these fast travellers, the racer and whip, I've a mind to give these old Veterans the slip; Some day, when I'm sure none of them can be found, I shall ride on the racer and the merry-go-round." "Oh, I don't know," quoth Mannix, they're such silly toys—

"But I have to ride them, to please my three boys."

The last stop was made at the Derby. Here we found Phil Koth, H. S. Stansbury, Bob Boyle, and several other "also rans," trying to bring a tin horse under the wire first—and win a box of candy. However, it took Jim Fallon to turn the trick and he was last seen pushing the hand car loaded with candy boxes in the direction of Oakley.

Did you see Mr. Begien, our famous crack shot?

He aimed at the bull's-eye and kept it quite hot,

Though he won not first place, he said with a smile,

For this box of cigars I'd walk half a mile. Said good Mrs. Beel as she proudly surveyed

Her card and then read of the record she'd made,

"Oh, I'm a crack shot; I'm practised, I guess.

I've been shooting the bulls' eyes all over my dress."

As we passed Hilarity Hall we saw Bob Jennings and the three little Jennings doing the "Wiggle Woggle," and from all appearances they had much trouble in maintaining their equilibrium. We pulled into the station on time. Many thanks to D. E. Todd, who was acting dispatcher, Bill Robinson, who was trainmaster pro tem, and, last but not least, our faithful conductor, Bill Fisher, who accepted only cash and refused passes on this trip.

has been an organized parish for over 200 years, and although the church building has been remodeled from time to time, the thought of antiquity clings to it still. Here on May 27 sorrowing relatives and fellow Veterans carried the mortal remains of Engineer Doyle and after a solemn burial service, reverently laid to rest this Veteran of so many years' service.

There on the mountain side, amid the flowers and green trees of summer and the frost and snow of winter, overlooking the beautiful Potomac Valley, lies this old cemetery. Headstones date back over 200 years, a fitting burial place for such a Veteran. There will not be a mighty granite shaft erected to mark the resting place of a great statesman, nor yet a marble tomb to mark the grave of a king of finance, but to the memory of "Eddie" Doyle, humble rail-roader that he was, there is a monument more wonderful than any of marble or granite.

Whenever a palatial passenger train swings through the Potomac Valley, a heavy freight train loaded with the world's commerce rolls east or west, or a long train of empties wends its way to factory, mill or mine—aye, so long as there is a wheel turning in this Potomac Valley there will be a monument to "Eddie" Doyle. Posterity cannot erect a greater monument than the Railroad whose growth marked the epoch through which he lived. The earthly temple has returned to dust but the immortal soul has returned to its Maker, there to enjoy the blessings of the Redeemed.

## Death of Edward B. Doyle

*Said to be the Oldest Employee of Baltimore and Ohio*

*By W. L. Stephens*

ON May 25 at his home at Orleans Cross Roads, W. Va., Pensioned Engineer Edward B. Doyle passed into the great beyond. He was the oldest Veteran enrolled in the Martinsburg Association, and probably the oldest on the Baltimore and Ohio. Born in the first quarter of the Nineteenth Century and living well into the first quarter of the Twentieth Century, his life reads like a romance.

Edward B. Doyle was born in Ferrybank, County Kilkenny, Ireland, March 21, 1824. At the age of seventeen he came to New Foundland and shipped on a fishing schooner, for five years following a seagoing life. Leaving the sea he went from New York to Baltimore to Boston and from there went cross country to Reading, Pa., and learning of the construction work on the Baltimore and Ohio, came to Orleans Roads and secured work as a trackman in 1854.

For thirteen years he continued as a trackman. In July, 1867 he was promoted to fireman on the division extending from Martinsburg to Piedmont, W. Va. Five years later he was promoted to engineer

and for 28 years ran an engine for the Baltimore and Ohio. Many are familiar with him, especially as the boss of old Camel Engine No. 112.

In 1900 he was placed upon the pension list and thereafter lived quietly at his home at Orleans Roads, W. Va.

When "Eddie" Doyle entered the service of the Baltimore and Ohio, railroading, not only on our system, but in the world, was in swaddling clothes. The tracks were wooden stringers with strap iron for rails. Engines and cars were diminutive in size and all facilities were in the pioneer stage of development. Contrast this with the world's mighty transportation systems of today and one can get a conception of what must have been the retrospection of Engineer Doyle as he looked back over the years of his long life.

He started his career on the water and after a long and eventful landsman's life, fate decreed that he should take his last earthly ride over the quiet waters of the Potomac River in a primitive skiff to the Catholic Church at Little Orleans, Md., of which he had long been a member. This

Edward B. Doyle

### In the Realm of the Riddle

*(Continued from Page 23)*

Cincinnati. He is to be congratulated on the neat piece of work he has turned out as a first effort. I have no doubt we will hear more from him in the future.

Lists of solutions to the puzzles published in this issue must be in my hands by September 15. The answers, together with a list of the solvers will be published in the October issue.

## New Prize Offerings by Baltimore and Ohio to Members of Boy and Girl Clubs for Club Extension Work

THIS year the Baltimore and Ohio is offering two premiums of \$100 each in each of the following States: Illinois, Indiana, Ohio, Pennsylvania, Maryland, West Virginia and Virginia. The premiums are available to the Boy and Girl Club members in those counties traversed by our lines.

These premiums will be awarded to the boy and girl in each state who, during the calendar year 1922, do the most efficient or outstanding work in Boys and Girls Club work, such as is comprised in corn, potato, poultry, pig, calf, sewing and canning clubs, in fact every kind of club project approved by the State Agricultural College, and carried on under their supervision. The judging will be done by members of the Extension Service of the respective State Agricultural Colleges, but the Baltimore and Ohio requires the following of the winners:

Each winner will supply the Baltimore and Ohio with a carefully prepared report of his or her Club work, giving both cost and production figures, the report to be illustrated with adequate photographs and accompanied with a picture of the winner.

The winner may use the \$100 premium for either of two purposes. It may be used for scholarship purposes at the State University, provided the winner can so use it within twelve months from the date the premium is awarded. The alternative is to use the \$100 to defray the expenses of a week's educational trip, which trip will be properly planned and chaperoned by representatives of the Company.

The winners from West Virginia, Virginia, Maryland and Pennsylvania who choose the educational trip, will be taken to Chicago during the first week of December to see the great International Livestock Show.

The winners from Illinois, Indiana and Ohio will be taken for a week's trip to Washington, D. C., the national capital, where it is planned that they will meet the Secretary of Agriculture, and see the many points of interest in and around Washington.

The poster announcement of this contest appears on the bulletin boards in our passenger stations, in the offices of the county agricultural agents, banks, chambers of commerce, rural high schools, and offices of the township trustees.

### Poultry Extension Campaign

In addition to the foregoing, the Baltimore and Ohio is actively engaged in a Poultry Campaign in southern Illinois. Poultry is one of the three factors, which have made farming profitable in southern Illinois, and the Railroad has adopted a plan in cooperation with the Agricultural Extension workers of the State University to stimulate greater interest in this industry.

O. K. Quivey, general agricultural agent, has held numerous conferences with the county agricultural agents of Illinois, with the director of extension, state club leader and representatives of the Poultry Extension Department, and the program agreed upon is being carried out in the fourteen Illinois counties traversed by our lines.

The state leader in Boys and Girls Club Work was authorized to announce that the Baltimore and Ohio would furnish three egg settings, or a total of 45 eggs, from purebred, registered hens, to each of ten boys or girls in each of the fourteen counties. Club members of each county were asked to make application to the county agent, and from those applying the county agent selected the ten, who by their work in the past, were best qualified in his opinion, to carry the project through successfully. It was then agreed that each Club member should offer an equal number of market eggs in exchange for the setting eggs. This was done on the theory that one does not appreciate that which he gets for nothing and that the Club members would have a deeper interest in the project if they felt that they had put up something tangible in order to secure the settings from purebred hens. White Rock was the breed selected, because it was desired to use a dual purpose breed, equally proficient in production of both meat and eggs.

The program further provides that a county poultry show will be held next fall, at which each contestant will be allowed to enter a pen of his best five birds, consisting of four pullets and one cockerel. Six county prizes have been offered by the Railroad to the participants in each county as follows:

first—\$5; second—\$4; third—\$3; fourth, fifth and sixth—each a copy of Lippincott's Poultry Husbandry.

At the conclusion of the county shows, General Agricultural Agent Quivey will arrange for a state show at some central point, probably Flora, Illinois, at which the winners of first and second place in each of the county shows will be eligible to enter their pens of poultry. The winner at the state show will be awarded a premium of \$100, which may be used in either of the ways above outlined for the other contest.

One of the first results of the Baltimore and Ohio Poultry Campaign was the enrollment of several times as many Club members in each county as the Baltimore and Ohio was able to furnish with egg settings, and in order that these children might not be unduly disappointed, the poultry producers in the various counties organized and duplicated the plan as outlined by the Baltimore and Ohio R. R., offering to furnish egg settings to those applicants not supplied by the Baltimore and Ohio and on the same basis as offered by this Company. The Baltimore and Ohio in turn agreed that the Club members provided locally with egg settings should be eligible to compete at the county shows and the state show with those Club members which the Railroad had furnished with egg settings.

This attractive campaign will be far reaching and lasting in its effects, and the cost is negligible in comparison to the returns to the Club members, to the poultry industry, to the community, and to the Baltimore and Ohio Railroad.

It will also be of interest to employes and friends of the Baltimore and Ohio to know that the encouragement which has been given Boy and Girl Club members by the scholarships, has since been duplicated by not less than five other great trunk lines.

## Why Place Rolling Equipment Near Fire Hazard from Adjoining Property!

During April, 1922 fires cost the Baltimore and Ohio an estimated amount of \$16,446.38. Seven-eighths of this damage—approximately \$14,000 worth—originated from adjoining property, their being three fires of \$3,000, \$7,000 and \$4,000, in round figures, from this cause. And about \$7,000 of this amount was damage done to rolling equipment.

It is possible that under certain conditions it is necessary to place rolling equipment on tracks where there is a fire hazard from adjoining property. But it is improbable.

The \$7,000 lost in these two fires to rolling equipment would have bought outright four of the latest type steel gondola cars, with enough left over to pay a car repairer for six months' service. And the money earned by these cars would mean the possibility of employment for other men now out of the service.

Fire prevention, like all other efforts on the Railroad to protect private property, is of mutual benefit. It helps the Railroad and it helps us employes.

Please keep rolling equipment away from the fire hazard of adjoining property.

# Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—  
Retreat from care that ever must be thine;  
How blest is he who crowns, in shades like these,  
A youth of labor with an age of ease.*

GOLDSMITH—"The Deserted Village"

## William H. Eckman

William H. Eckman, pensioned signalman, has had a variety of experiences since he began work with the Baltimore and Ohio.

Born on June 8, 1849, Mr. Eckman attended public school, high school and business college. In 1876 he secured a position with the Chesapeake and Ohio Railroad at Richmond, Va. He remained here until 1886, when he came to work with the Baltimore and Ohio as yardmaster, East Side, Philadelphia. Later he was transferred to Canton and Bay View as yardmaster and general yardmaster. Eighteen years later he entered the signal department, under Mr. Patenall, as blacksmith. Since that time he has held the following positions in that department: assistant foreman, foreman, laborer, assistant foreman, blacksmith, blacksmith helper, signalman. It was from the Signal Department that he was pensioned.

In his 36 years of service he has seen many changes and improvements. When he first went to Philadelphia, the rails were laid only to Wharton Street, and Mr. Eckman remembers when we went over the Schuylkill River only twice a day. Our freight from Philadelphia was barged from Point Breeze on the Schuylkill to various piers on the Delaware. He piloted the first passenger train out of 24th and Chestnut Streets. He and the late John Ed. Spurrier, together with John Clayton, took the first freight train through Fairmont Tunnel. Mr. Eckman says:

"It was a stormy night, and I don't think that I ever saw it snow harder.

"I served under five superintendents on the Philadelphia Division. Canton was the terminal of the Philadelphia Division, and all passenger and freight trains were sent to Locust Point by barges, and the barges sent from Locust Point to Canton. There were busy times in those days. You didn't see any loafing.

"I have a number of good letters from various officers, commenting on some of the work which I have handled.

"I have known of over 1500 being ferried between Canton and Locust Pier in 24 hours, not counting passenger trains. I was also among the first to take freight trains through the Belt Line Tunnel. The Grand Army movement to Washington was one of our busiest times; at that time we had passenger trains lined from Canton to Bay View, waiting to be ferried to Locust Point.

## John W. Underdonk

John W. Underdonk, pensioned trackman, was born in Jefferson County, W. Va., on January 8, 1851.

He entered the service of the Baltimore and Ohio on the east end of the Cumberland Division, Section No. 6, on May 1, 1881. Here he worked faithfully under five different foremen. In 1910 he was made trackman, in which capacity he worked until seven months before his retirement.

Mr. Underdonk was always willing, always on the job; his work was never too hard, he never complained. He regrets that he is unable to continue with the railroad which he loves—the Baltimore and Ohio. He is a faithful member of the Baltimore and Ohio Veterans' Association.

(Continued on page 72)

THREE CHEERS FOR THESE OLD TIMERS !

Their names have been placed on the retirement list. 1—Robert T. Harris. 2—John Hession. 3—William H. Eckman. 4—Jacob P. Jeffries. 5—Solomon B. Sponseller. 6—John W. Underdonk. 7—Michael J. Dugan. 8—George J. McKensie.

## Fairy Beautiful and Mischief Maker

An Outdoor Entertainment for a Midsummer Afternoon

**O**FTIMES it is the problem of our women folk to find something new in the form of an entertainment to vary the usual program of a church festival or a midsummer picnic. It is to fill such a need that the following little playlet has been written. Most of the costumes can be made of crepe paper. The characters are as follows:

**Heralds:** Two boys, dressed after the fashion of those seen in fairy tale books. Tight jackets or purple crepe paper capes; short, blousy, cambric bloomers, and long stockings reaching nearly to the hips (Mother's or Big Sister's will do nicely); yellow crepe paper caps with plumes made of purple tissue paper. They carry trumpets (long, tin horns), decorated in festoons of paper flowers.

**Fairy Beautiful:** Tall girl with long hair. Robe of chesecloth, wings of light blue tarletan and silver tinsel; flower girdle and flower wreath.

**Mischief Maker:** Boy. Puck costume of green. Pointed hat and pointed toe cambric shoes with little bells on ends. Carries a stick, which he flourishes with great show of authority.

**Sun:** Boy, carrying before him a large cardboard disc (about four feet in diameter), covered with gilt paper. Golden crown. Carries lighted lantern, flashlight, or electric bulb with concealed battery.

**Farmer:** Tall boy. Farmer's costume of overalls, shirt open at neck, big straw hat, red kerchief, beard. Carries hoe.

**Flower Plants:** Girls and boys, or just girls; as many as the "stage" will accommodate comfortably without crowding. Leave plenty of room for passing of principal characters. Each plant has brown dress and reversible cap (green on one side, brown on the other). Extra frills, caps and green crepe paper aprons, to represent various flowers, viz.: Red rose, white rose, pink rose, daisy, black-eyed-Susan, buttercup, morning glory, trumpet flower, violet, lily, marigold, etc.

For the daisy, cut about ten petals of white crepe paper, each about eighteen inches long, six inches wide at widest point. Sew these to a piece of white tape, to be tied about the neck of the child representing the plant. With this goes a yellow, tam o' shanter cap to simulate the center of the daisy. The morning glory's frill is made of lavender crepe paper in the trumpet shape

of the flower. This, of course, stands up instead of straight out like that of the daisy. Small wires will accomplish this nicely. The roses will need about fifteen petals, and so on.

**Rain:** Girl or boy. Gray cambric gown. Carries watering pot from which hang long gray streamers representing rain. Wears cap to which many of these streamers are also attached.

The "stage" is simply an oblong plot of grass, fenced in with small branches of laurel or other evergreen stuck into the ground to represent trees. Leave three openings, one on the rear of the left side, one at the rear of the right side, and a large entrance at the front. Over the last named is an archway of lattice-work and pink roses (paper). In the center of the background is the fairy queen's throne, made of a small step ladder with back and sides of twisted grapevines nailed securely in place. Pink roses also decorate this. On the steps of the ladder lay a strip of green carpet.

(Enter Heralds running. At gateway they stop short. Blow long blast on trumpets. Turn to audience.)

**Heralds:** What Ho! The farmer comes to plant his seeds!

(Enter farmer, from left, followed by his "flower plants" dressed in their brown suits with brown caps. Farmer carries hoe.)

**Farmer:** Yes, by gum, and there's some pesky weeds. (Pretends to chop weeds with hoe.)

**Heralds:** But when the flowers come, then oh, what fun!

**Farmer:** If they don't get too little rain and too much sun. (Takes each plant by the hand in turn, leading it to its place. Plants sit on ground where Farmer places them, bow their heads, draw their brown caps down, and remain as still as possible.)

**Farmer:** (Addressing plants as he places them, individually)

I'll plant *you* here; *you* there; *you* there; Drink in the raindrops, the sun, the air; Sweet and fragrant may *you* be, *You're* to bloom for the queen to see. May the old world be a brighter place Whene'er it looks upon *your* face. Live and grow, and ever smile, And spread *your* glory all the while. Lift *your* eyes to greet the sun And lower them not 'til the day is done. And now, my dears, I leave you in care Of Mother Nature and her helpers fair.

To seek my cattle, which afar have strayed; I go before the darkness fills the glade.

(Exit right.)

**Flower Plants:** (chanting) Fare-well, Fare-well, Fare-well.

(Enter Mischief Maker, from left.)

**Mischief Maker:**

Ah, ha! Ah, ha! Herc's fun for me!

This farmer makes me laugh, you see. (Extends hand to Lily).

Come, Lily Fair, pray take the place

Of this red rose; 'twill seem disgrace

(Changes places of several flowers).

When the farmer finds instead of you

The dewy petals of a violet blue.

Ha, ha! Ha.....

(Enter Sun quickly, from right).

**Sun:**

Ho, there, Mischief, and what think ye

The Queen would say if she might see

How naughty is her subject? Pray,

Can't you be good for a single day?

**Mischief Maker:**

Old fashioned Sun! 'Tis nought you know

What fun it is to make plants grow

In places where they should not be!

Come, shine your hardest now, and see

If you can't parch these dainty flowers—

Be quick, or I'll send for Clouds and Showers!

For lo, these buds are turning green,

(Flowers turn caps inside out showing green)

They're growing too fast for you, I ween.

**Sun:**

I do not wish to kill the dears.

**Mischief Maker:**

Be quick, or I'll drive you to tears!

I'll pinch your nose and bite your ears!

(Sun turns toward flowers, flashes his

light upon them in turn, and each changes his cap again to show the brown).

**Plants** (wailing mournfully):

Oo--oo---oo-----

**Mischief Maker:**

Now what under the sun is ailing you?

**Lily:**

I'm out of place; I cannot bear

The soil in which I'm planted here.

**Red Rose:**

I fear I'll be dried like an old brown bean—

Oh, how I wish we might see our Queen!

**Daisy:**

Oh, Sun, your rays will be our death,

Soon we'll not draw another breath.

**Buttercup:**

Oh, Mischief Maker, let him stop!

The farmer planted a lovely crop

Of flowers here and bade us grow—

'Twill all be spoiled. Pray bid him go!

**Mischief Maker:**

Do you think I'd dare to change my plan

For a silly dunce like the farmer man?

Where'er I go, I have my way,

And when I speak, all folks obey.

The sun, my servant, not the least,

Doth rise when I bid like a cake of yeast,

And shines whenever I command—

He knows I rule in Fairyland.

**Black-eyed Susan:**

But how about our lovely queen?

*Mischief Maker:*

When she's around I'm never seen,  
For like a man, I am quite human—  
I hate to argue with a woman.  
I'm king of all, naught do I fear. . . . .

*Sun:*

Hark! Whence come those tinkling bells I hear?

Enter Heralds from right and left, respectively, as before; stand at front entrance, blow bugles, and make announcement).

*Heralds* (in loud, distinct tones):

Our Fairy Beautiful arrives.

*Flower Plants:*

The Queen! The Queen, to save our lives!  
The Queen! The Queen! The Queen! The Queen!

*Sun:*

To think she'll look on such scene!

*Mischief Maker:*

Oh, 'tis the Queen! Where shall I hide?  
Her soldiers fill the forest wide! (trembles with fear.)

*Sun:*

Oh, Sir, should you, possessed with power,  
Fear this our Queen? This is her bower,  
And that her throne. Are you not wise?

(points to throne).

And strong? Why fear the good queen's eyes?

(Tingling of bells sounds nearer).

*Mischief Maker* (desperately):

No time to argue! Where shall I hide me?

*Sun:*

Here, come sit you here beside me,  
She will believe, unless you run,  
In this bright glow we two are one. (Mischief Maker sits on ground behind Sun's disc).

(Enter Queen majestically through front entrance. Heralds bow as she approaches, follow as soon as she passes, and assist her to the throne).

*Queen* (looking about her):

Methinks the sun is shining rather bright—  
But who are these strange figures at my right?

And at my left, and just before me, too?  
Speak quickly, weary ones, pray, who are you?

*Flower Plants:*

Oh, dear, good Queen, we're meant for flowers, the farmer—

*Queen:*

Yea, but whence have gone the showers?  
You look quite parched, as though for many a year

There had not been rain. Speak, someone here.

But first give heed to what I'd have you say—

Hath Mischief Maker passed this way today?

(Flower plants bow heads, Sun turns out his light, no one replies.)

Then I shall see. But first, oh Sun, Pray turn your back, your work is done;

I shall not wish to see you more  
Until the showers have come before,  
Refreshed these flowers and made them

grow. (Sun turns, revealing Mischief Maker trying to hide.)

Stop! Who is this? Ah, well I know,  
Perchance you thought you'd play a trick  
By killing these sweet plants. Now quick,  
My Heralds, seek the showers  
To rescue these, the farmer's flowers!

(Heralds exit right.)

Now, Culprit, speak!

*Mischief Maker* (approaches Queen):

Most gracious queen,  
Judge me not harshly; never a trick so mean

As this one have I played, and so, I beg  
You punish as you wish; cut off my leg,  
But in so doing, spare my foot, I pray,  
That I may, as I promised, dance today  
At the fairies' feast. 'Twas on a bet  
'Twixt the moon and me, I could not get  
The sun to do my bidding. A dish of rice  
The North Star holds for him who wins.  
I get the rice, but suffer for my sins.

*Queen:*

Speak, Flowers, what would you have me do?

(Enter Heralds, followed by Rain.)

*Heralds:*

Behold, your Majesty, here is the Rain for you.

Of course the fairy queen in the pageant won't be able to do much toe-dancing on a flower petal, but this picture shows a costume that Fairy Beautiful may wear

*Queen:*

Rain, you are late, but quickly spread your showers,  
Revive quite speedily these thirsty flowers.  
And Heralds, fetch the brightest gowns  
Within my castle. These awful browns  
Do make me ill. (Heralds exit.)

Now you, oh Sun

Will also pay for the mischief you have done.

Within a dungeon you shall hide your face  
And shine on none but Mischief Maker.

Disgrace

Shall be on both. My soldiers wait without,  
Begone, the two of you. My time I give  
In seeing that these flowers may ever live  
To bless the day that I came to the throne,  
Forgetting all the sadness. Ah, they moan!

(Exit Mischief Maker and Sun.)

Hurry, Rain. (As rain touches each flower,  
it turns each cap on the other side,  
showing green.)

'Tis better as you see;

Already they are growing. One, two, three,  
Ho, every single one doth breathe; oh, Rain,  
'tis well,

You make me glad. Now that you're done,  
Go take this message to the repentant Sun:  
Say that he must come here every day  
A little while to shine, then go away,  
And leave the rest unto the clouds and you.

(Exit Rain, flowers lift heads.)

Now, Flowers, why so sad are all your faces?  
*Lily:*

Please, Queen we're not in our proper places.

*Queen:*

True, I had not noticed. Come with me  
(Leads each to proper place.)

A fairer garden one would not wish to see.

(Enter Heralds carrying the flower costumes.)

*Queen:*

Now help me, Heralds, quickly to bedeck  
These fair ones. Place around each neck  
A lovely picce. (Enter Farmer.)

*Farmer:*

By Jove! By Heck! By Heck!  
The Fairy Beautiful. She's working, too.  
I heard such awful news. I'm glad 'taint true—

Good morning Ma'am. And pray how do you do

This lovely morning? Sure, I did not know  
This was your bower, 'til Raindrop told me so.

I'll move them all and plant my flow'rs elsewhere,

I beg your humble pardon. I wouldn't dare intrude.

*Queen:*

You'll leave the flowers where they are.  
I'll help you care for them. 'Twere better far,

Since you have many cattle oft to seek.  
And did you find them?

*Farmer:*

Yea, down by the creek  
Near yonder mill, where Mischief Maker'd led them,

But luck is with me, for the Brownie fed them.

*Queen:*

You are blest. The naughty one I've sent  
To Bedlam Tower. He'll ne'er be content  
Until some mischief his little hands are doing

I'll lay he'll find there lots of trouble brewing.

Now, Flowers, listen: dance ye to this tune  
Which the South Wind's playing on the Silvery Moon.

(Someone plays violin while fairies, led by Queen and Farmer, give an old fashioned folk dance. Directions for this may be found in any well equipped library. The Virginia Reel is a good example, as are a number of the Minuets. At end of dance, all form in twos, Farmer and Fairy Queen leading, and march around "stage." As they pass the right entrance, the Rain and

Sun join the procession; at left entrance, Mischief Maker joins, cutting up all kinds of queer antics at end of line as they march around once more. Exit, one line going to left, the other to right. Heralds come to entrance as at beginning, stand on upper step and blow trumpets. A trumpet in the distance replies. Heralds turn somersaults and run away):

## Braids and Embroideries, Ribbons and Fringes for Your Summer Frocks

By Maude Hall

**B**RAIDS and embroideries are used alike on clothes for sports and dressy wear. Often braid is employed exclusively in the decoration of a frock, especially when it is developed in serge, rep or the silk crepes. Flat silk braid adorns an unusually attractive frock of dark brown kasha cloth, which fastens at one side. The neck is square and the sleeves are close-fitting to the elbows, after which they flare decidedly. The belt is formed of narrow ribbon, tied at one side and allowed to hang in uneven ends almost to the hem of the skirt.

A simple and chic overblouse of rose-color tweed has the lower edge trimmed with a narrow braid border, below which the ends are fringed for about three inches. Sometimes instead of fringing the edges of the material, they are cut in very narrow strips to simulate fringe. This method is most effective, though, when the fabric is one that does not fray readily. Skirts of the wrap-around type made of the coarse-weave woolens are almost always fringed.

Little patches of braid appear frequently on one-piece dresses which combine two contrasting materials, the patches being placed where their effect will be the most striking. One can see in this arrangement a variation of the applique idea, and it is one that any home dressmaker can reproduce. A check silk trimmed with brilliant red braid, selects two-tone ribbon to confine the fulness at the waist. The ribbon repeats the color of the braid and the dominant tone of the check. The braid is used only about the very deep armholes and down the front of the dress. The sleeves and collar are of the plain fabric.

A simple frock in beige crepe has the gathered skirt trimmed with narrow self-panels held in place with rosettes of apricot satin ribbon. The blouse, which has the short kimono sleeves cut in one with the front and back, uses the apricot ribbon to bind the oval neck and the sleeves. Self-material is used for the belt, which is a narrow crushed affair,

simply finished at the back with an embroidered ornament in which beige and apricot tones are blended.

### Genius Engagingly Serves Fashion

The frock of lime-color organdy pictured above takes on distinction by having narrow trills of white net trim the skirt and blouse. The sash is of changeable messaline ribbon in tones of canary and rose pink. Medium size requires 3½ yards 40-inch organdy and 7 yards of frilled net.

The second design features a blouse of fine silk-figured voile and skirt of sports satin. The neckline of the blouse is oval and deep, while the short sleeves are slashed and connected with bands of the skirt material. Georgette, figured chiffon cloths, etc., are used for developing the overblouse. Medium size requires 2¼ yards 36-inch material for the skirt and 2¾ yards 40-inch voile for the blouse.

FIRST MODEL: Pictorial Review DRESS No. 1012. Sizes, 14 to 20 years. Price, 35 cents.

SECOND MODEL: BLOUSE No. 1016. Sizes, 34 to 44 inches bust. Price, 35 cents. SKIRT No. 9666. Sizes, 24 to 38 inches waist. Price, 30 cents.

### Fashion Considers Juvenile Needs

At six, one cannot give much in the way of expert advice, but sympathy counts for a great deal, especially if clothed in French blue chambray trimmed with navy linen. The blouse is trimmed with a large, square collar and the knee trousers are side closing. Size 6 requires 2 3/4 yards 36-inch material with 1/4 yard extra in contrasting color for trimming.

Nothing but a figured dimity with organdy collar and cuffs could assuage grief for a decapitated dolly. The blouse is a slip-on model, slashed at the front. The bloomers are side-closing and may be gathered and tucked under at the lower edges or finished with straight bands. Medium size requires 2 1/4 yards 36-inch material.

FIRST MODEL: Pictorial Review Boy's SUIT No. 7101. Sizes, 2 to 6 years. Price, 35 cents.

SECOND MODEL: BLOOMER DRESS No. 9824. Sizes, 1 to 4 years. Price, 30 cents.

Yankees all have lots of sense,  
Optimists won't take offense—  
( 'Tisn't true).

Old Gentleman: What are you crying about, sonny?

Sonny: Me mother cleaned me pants with a carpet-beater.

Old Gentleman: That's nothing to cry about, sonny.

Sonny: But I was wearing them at the time.—N. E. Advertiser.

### Lesson in Home Dressmaking

Piquant and Charming Is This One-Piece Kimono Nightgown in Orchid Voile

THERE is a new note in lingerie materials and voile achieves another triumph. This season it is featured particularly in nightgowns and while the designs of the garments are simple, the colorings are exquisite. As a rule embroidery takes the place of lace for trimming.

Three and three-eighths yards of 36-inch material are required for this one-piece slip-on kimono nightgown, with

V-shaped neck, cut out neck of front along indicating small "o" perforations. The back may be cut the same way if desired.

Now, close the under-arm and sleeve seam as notched. The sleeve may be slashed up from lower edge between the small "o" perforations, for a more elaborate decorative effect. Turn away 3/8 of an inch at lower edges of slash and graduate into nothing at upper edge. Of course, if buttonholed scallops are used to finish the neck and sleeves, this will not be necessary. Form tucks on the shoulder and stitch, either with plain running stitches or feather-stitching. Turn hem at lower edge, and if desired, work eyelets near the neck edge in front and back for ribbon to be run through. In addition to the embroidered scallops, the sleeves are trimmed with ribbon bows.

NIGHTGOWN No. 9975. Sizes, small, medium, large. Price, 30 cents. Scallop 11747. Transfer, blue only, 30 cents.

9975

short sleeves and V-neck. There are three tucks at each shoulder and these, of course, are put in by hand. At the back the neck is round.

As there is no seam at the shoulder the material should be cut as if the pattern were in one piece. Place the triple "TTT" perforations along the lengthwise fold of material as shown in the cutting guide. For

## Only a Button

By Sarah F. Pennington and Her Daddy

*Note—The outline for this story was furnished by Sarah's father, who is Crossing Watchman Philip M. Pennington, Polk Street, Cumberland, Md. The facts which relate to the accident are true; the accident happened in West Virginia. Sarah wishes us to give due credit to her father for his help; this we are pleased to do.—Ed.*

*For the want of a nail, the shoe was lost;  
For the want of a shoe, the horse was lost;  
For the want of a horse, the rider was lost;  
For the want of a rider, the battle was lost;  
For the want of a victory, the kingdom  
was lost—  
And all for the want of a horseshoe nail.*

THUS runs the old familiar quotation. Once upon a time there was a factory. As I have never been in one I can only imagine that there were a number of women, some cutting, some busily running sewing machines, and among them, a very young girl who sewed on buttons at so much the dozen. This happened before the days of child labor laws. This little girl should have been in school, but, as we know, many of those who come from other lands to our shores in search of freedom and wealth seem to care more for the latter, and their children suffer in consequence.

Whether this little girl's chief object was to attach the buttons so that they would stay on until the customer got out of the store, or whether her thread ran out too soon and when the needle was re-threaded she forgot that the button was insecure, I do not know. Perhaps she was thinking of the meagre wages which would not justify doing the job well. Anyway, the button on the right wristband of a shirt was badly sewed on. Who the girl was, or where the factory was, will probably never be known, but this is the true story of how that button caused a man to lose his life.

The shirt found its way to a little country store in Cold Stream, West Virginia. Near here lived "Bent" Whitaker, a poor man who had had a struggle to keep his family in necessities. By hard work and economy he managed, with the help of a little money which he had saved and some that he had borrowed, to purchase a threshing machine. With this he threshed the oats, wheat and rye of the farmers in that vicinity. One farmer would haul the machine to his farm; then, after his threshing was finished, the next man would haul it away to his own farm, and so on, each farmer helping the

others in turn. It was a portable engine, as at that time no tractor engines had yet appeared in the country. All of the "hands" boarded with the farmers and slept in their houses at night.

"Bent" being too far from home to get his washing done, and not staying at any one place long enough to have it done, decided to do without washing and to purchase a clean shirt, when he needed one, at the country store. On a bright Monday morning he stopped at the store and purchased a shirt, the one on which the button had been sewed improperly. Then he proceeded to the threshing field.

"Bent" had no time to think of buttons, for he was busily tossing the bundles into the thresher, sending them head first into the machine, the butt end of the sheaves turned slightly upward. And the great cylinders sucked them in as though some great, insatiable monster was drinking an everlasting draught. The scene is familiar to all country folk. The steam engine some distance away gave a sudden "pop off"

of steam that frightens everybody save the black-faced engineman. The farmers' wives long to hear the shrill whistle, yet scream when it blows to announce that the threshing is done. It is the annual event which breaks the monotony of farm life among the hills of West Virginia. It is truly marvelous to see the straw go up the "drag" and the men with pitchforks pitching it into a "rick." Then the clean wheat pours out in a steady stream into the half-bushel measures. As fast as one measure is full, another takes its place.

The last shock was in, and the men were busy cleaning up. "Bent," as busy as the rest, helped to gather up the chaff where the big stack of wheat stood. There was some scattered wheat. He gathered it up and put it into the thresher. The cylinder spun around. Some of the chaff had lodged upon the tongue. "Bent" stood on the double-trees, the better to reach the chaff with his right forearm, and pushed it into the cylinder. This is where the button, dangling from his wristband, was caught by the spikes, drawing his arm savagely in with it. The sudden jolt to the machinery caused the belt to fly off. Men came to his rescue.

The arm was too badly mangled to save. It had to be amputated at the elbow. The intensity of his suffering can only be imagined by those who have had a similar experience. It was thought that he would recover, but within a few days gangrene set in, and "Bent" died shortly afterward.

His wife did the best she could to provide a living for her children. What she endured can only be understood by a mother who has had her all taken from her. All of this happened because. . . . of a little button that a little girl had carelessly sewed to the right wristband of a man's shirt.

Even little girls can become careless in their work, just as this one did. Are you careful? Let's remember that "whatever is worth doing, is worth doing well."

## Here Dwell the "Frosty Sons of Thunder"

By Freda Brown Michaels, 14 Year Old Daughter of Locomotive Engineer, Somerset, Pa.

Third Prize. Class A

MY hometown is one of the prettiest, the cleanest and healthiest towns in Western Pennsylvania—the town of Somerset. It is also the county seat of Somerset County. It is located nine miles from the main line of the Connellsville Division, on the Somerset and Cambria Branch of the Baltimore and Ohio Railroad, and about 35 miles from the city of Johnstown, known as the Flood City.

Somerset was founded before the Revolutionary War, and was known then as The Glens. It has a population of about 5,000. We have nine churches, four banks, three hotels, three school buildings—each accommodating about 400 pupils—and a new high school now under construction. This building will cost \$135,000. We have a public library, and a beautiful Court

House which it cost \$2,000,000 to build. We have a Country Club, with splendid golf grounds; a hospital that is as well equipped as any of its size in the state; a Children's Aid, which takes care of all of the homeless children of the town. The County Home is also located here. We have a good water system and two splendid new fire trucks, an ice plant, and our own creamery.

Almost every street is paved, and we have a state road leading in any direction that you might wish to go from our town. We can reach the Lincoln Highway over state roads at a distance of eight miles, and the National Pike over concrete road at the distance of 35 miles.

Just half a mile south of our town we have the most beautiful little groves.

The Great American Game  
 Drawn by Harley H. Knight, Keyser, W. Va.

Here the Baltimore and Ohio Veterans have held their annual picnics for the past two years. This is certainly an honor to our town, for on one of these occasions we had the pleasure of having President Willard make a splendid address.

About eight years ago the Baltimore and Ohio built a splendid new brick depot, which adds greatly to the appearance of out town.

Our Mayor's name is Mr. Sober, who is always ready and willing to welcome strangers to our city, and who is always on the job to keep our town as clean as possible.

Somerset is in the heart of the coal mining region of Somerset County, which, during the World War, produced an average of 365 carloads of coal per day, or more than any other county in the United States. Somerset is also located in the center of one of the greatest farming districts in this part of the state. Here fresh meat, eggs, butter, and milk, as well as fresh fruits and vegetables may be obtained at all times.

Somerset citizens are called the "Frosty Sons of Thunder," but I think that we can boast of having one of the finest little towns that the Baltimore and Ohio has along its lines.

My father is a Baltimore and Ohio engineer. He has been in the employ of the Company for 20 years, and he says there is no other company that is better to work for.

P. S. The oldest building is owned by the Scull heirs, and is occupied by the First National Bank and the Herald Printing Office. It stands opposite the Court House.

**The Greatest Town on Earth**

*By Mazie Walker,*

Nine Year Old Daughter of Bridge Inspector,  
 Midland City, Ohio

SECOND PRIZE, CLASS B

I really think that my home town is the greatest town on earth!

We have moved to other towns, but we have always come back to Midland City, Ohio. Our little village is so located on the Baltimore and Ohio that it is called a

junction, so you see we have more trains than many larger villages—and *all trains stop at Midland City.*

All of the people here know each other, so there is always much to talk about. The village is bounded on all sides by farm lands, so we have little need of parks. You may find here the finest kinds of schools, churches, stores, and home buildings, and a nearly perfect system of concrete sidewalks. Many years ago we had saloons and pool rooms; now that they are gone the mayor and the marshall are very idle persons. The doors to our jail stand wide open. At our last revival meeting eighteen souls were saved in one night; that, of course, makes our town better.

Once upon a time it was said that all railroad towns were tough, because the men were always happy-go-lucky fellows. That is not true here.

Our little town was first called Clinton Valley, but its name was changed later to Midland City, for that is about midway between Cincinnati and Columbus.

Mr Ed. Shaw is mayor of this village. We claim about four hundred people.

The thing that interests me is the way that children are treated in general. There is no grouping of poor and rich. All play and live together when at school or elsewhere.

The most beautiful things about our town are its fine shade trees, pretty flower gardens, and nicely kept homes. These

are the reasons why I call Midland City the greatest town on earth.

**Where Freedom and Kindness Reign**

*By James King, Jr.,*

Thirteen Year Old Son of Machinist,  
 Mt. Clare Shops

SECOND PRIZE, CLASS C

Dorsey, Maryland, is my home town. I like it for the freedom of the country and for the kindness of the people.

Not many years ago we had only one house in Dorsey. This was the old Dorsey Estate. When the Baltimore and Ohio started laying its tracks, Miss Eliza Dorsey gave the Railroad a strip of her land. That is how the village got its name.

During the Civil War soldiers were stationed along the Railroad. A regiment of soldiers had their barracks not far from Dorsey

At one time our town had one of the largest camp meetings in the state of Maryland, known as Wesley Grove Camp. The Baltimore and Ohio ran special excursion trains to haul the people back and forth. Many thousands of people took advantage of these excursions each season.

Dorsey has a factory which manufactures firebricks. The chief industries are farming and railroading. Dorsey, which has about five hundred inhabitants—including the

# Employees Who Are Taking the "Curt" out

## Service of Baltimore and Ohio Inspires Passengers to Poetry and Song

ON June 28 Number 6 carried a party of passengers enroute from Denver, Colorado to Boston and Canada for the convention of the National Educational Association. G. W. Sturmer, grand president of the Veterans, was on the train and enjoyed pointing out to these educators (for most of them were school teachers) the historical points on the Baltimore and Ohio from Pittsburgh to Baltimore.

The folks in the party declared that they had never enjoyed a ride so much in their lives and that the Baltimore and Ohio dining car service was the best in the world. And to cap the climax Miss Katherine L. Craig, state superintendent of Public Instruction of Colorado, wrote the following poem, which she and her companions sang to the rollicking tune of "Marching Through Georgia:"

Bring out the ukelele, boys,  
Let's sound the glorious news;  
The N. E. A. are a bunch of folks  
Who never get the blues.  
We've got them all a'going east,  
We're ready to enthuse—  
As we ride joytully onward.

### CHORUS:

Hurrah, hurrah, we'll sing with might and main,  
Hurrah, hurrah, for the B. & O. fast train;  
We sing it 'til the whistle blows  
That we have reached the sea—  
As we ride joyfully onward.

We live in Colorado,  
We're very proud to say.  
Our climate is the best of all,  
The sun shines every day;  
So if you want a place to live,  
You'd better come our way—  
While we ride joyfully onward.

We are going to send Miss Craig sufficient copies of the MAGAZINE to permit each one of her party to have a copy of her poem.

### Agent J. W. Stine

#### *A Business Getter through Service*

THE following appreciation of the service being given to patrons of the Railroad by Agent J. W. Stine at Capon Road, was contained in a letter sent to J. L. Hayes, division freight agent of the Baltimore Division, by J. Carson Adkerson, manager of the Hy-Grade Manganese Company of Woodstock, Va., who is developing a quarry near our station at Capon Road:

"We want also to thank you and the Baltimore and Ohio Railroad for your prompt and hearty cooperation in giving us freight rates and various information, and we want to express our appreciation of the good service being rendered us by your Agent, Mr. J. W. Stine at Capon Road. Mr. Stine is a live wire agent, and through his alert, prompt and cooperative spirit he has deliberately won a lot of business for the Baltimore and Ohio, and in addition has imparted to us a spirit of genuine satisfaction and confidence through the services being rendered."

### Fairmont, W. Va., Newspaper Praises Our Service

THE following appeared in one of the October issues of a Fairmount, W. Va., daily. We congratulate the crews of the train so highly praised:

#### **Baltimore and Ohio Evening Train from Pittsburgh Praised**

"The best train out of Pittsburgh, in any direction and on any railroad is the Baltimore and Ohio train which arrives here at 8.28 in the evening."

This is the declaration of a Morgantown business man who travels far and frequently, and who has opportunities to patronize many trains on many roads out of Pittsburgh.

"This train," he continues, "leaves Pittsburgh at five o'clock in the evening and

Two hundred and sixty-seven Rotarians made up the party from the Fifth District for their Atlantic to Pacific trip, the entire transportati

# of "Courtesy" on the Baltimore and Ohio

covers the 101 miles to Morgantown in three hours and twenty-eight minutes. In the course of its journey it traverses at least three very considerable grades, two of them long and heavy. But in spite of this it makes the distance of 101 miles between the two cities in only four minutes more than any other train, which covers 96 miles in three hours and twenty-four minutes.

"It is equipped with a complete chair car, a combination chair and observation and buffet car, and a complete diner. Morgantown people ought to patronize it to such an extent that its continuance will be assured. Personally, I am of the opinion that no better train leaves Pittsburgh on any road in any direction than that train which starts at five o'clock from the old Baltimore and Ohio station and sets you down at Morgantown at 8.28. The members of the crew, the waiters, porters and caterer all make you feel at home on the train to such an extent that you regret to leave it."

Charles H. Minnich

*"Hereafter the Baltimore and Ohio Will Always be My Road to Chicago."*

**I**N CALLING on Mr. Ohl, the writer of the following letter, on a matter not connected with Railroad business, Charles H. Minnich, correspondent of the

MAGAZINE for East Side, Philadelphia, discovered that he was soon to take a trip to Chicago and return. He presented the Baltimore and Ohio's case convincingly, and with the following result:

## THE PHILADELPHIA CITY MISSION

Evangelical Lutheran Church

Reverend J. F. OHL, Superintendent  
PHILADELPHIA, PA.,

May 22, 1922.

My Dear Mr. MINNICH,

Let me thank you and Mr. Stewart for directing my attention to the superior equipment and accommodations of the Baltimore and Ohio Railroad. The trip from which I returned on Saturday evening was in all respects the most agreeable and satisfying I have ever made between Philadelphia and Chicago. The trains on which I traveled (Nos. 5 and 6) were all that any reasonable person can desire or need: the dining car service was absolutely unexcelled and is probably not equalled by any other road: and I was most favorably impressed by the uniform courtesy of the conductors, trainmen, waiters and porters—all this, too, without extra fare. Hereafter the Baltimore and Ohio will always be my road to Chicago.

With kindest regards, I am,

Very truly,

(Signed) J. F. OHL.

## First Passenger Train to Mansfield, Ohio, on June 19, 1846

**G.** F. SELLERS, ticket agent at Mansfield, Ohio, recently sent the MAGAZINE Office a copy of the *Mansfield News* for June 18, which, under the caption, "First Passenger Train Came to Mansfield 76 Years Ago", had an article which read in part as follows:

The first engine used in drawing the passenger train was named the Vigilant, and wood was burned in it to generate steam. Bunches of four-foot wood were placed at convenient distances along the railroad, so that the fireman could load the tender with fuel when the necessity arose. Men were employed to saw the wood into the right length for the boiler. Water for the engine was secured from the creek, being dipped up by the pailfull, which was very slow work, but passengers on board the train appear to have been more patient than they are today, and waited until the train was ready to go, without the least sign of displeasure.

Headlights were not provided for the engine, and the train was operated only by daylight. One day the engine drawing the train for Mansfield became disabled north of Shelby, and night came before it was ready to resume the journey. One passenger who was anxious to get to Shelby, made the suggestion that a lantern be carried ahead of the engine, so it could proceed to Shelby. This was frowned down, and the crew, with the passengers, lodged all night in a farmhouse.

Arrangements being handled by our Philadelphia Passenger Office. This picture was made at Willard, Ohio., on June 29. See page 14 for story

countryside around it—has now become quite a village.

I received most of my information about

the history of Dorsey from Mr. John Englehart and Mr. Jacob Ambrosie, both pensioners of the Baltimore and Ohio.

It pays to keep your eyes open. Three cheers for Bert and Forest!

## Win a Prize in the Little Folks' Safety Contest

*Dear Girls and Boys:*

I know that you will be glad to know that another contest is on the way. Full directions for this contest will be given in the August issue of the MAGAZINE, but, in the meantime, you may be preparing for it.

If you will turn to the Among Ourselves Department of this MAGAZINE and look in the Chicago Division notes, you will find the story of an accident that happened to one of our little folks. We are awfully sorry to hear about it, and we hope that Floyd is getting along nicely now. It just shows you that terrible accidents can happen to little people as well as to grown-ups. In our Safety Roll of Honor you will find the names of men who have done big things to avert accidents to trains, to themselves and to their fellow-workers. Little girls and boys can do just as much, in a small way, to keep themselves and their playmates out of danger.

What can you do? What are you doing?

Have you seen the big poster, "CROSS CROSSINGS CAUTIOUSLY?" That's just one of the many things that you can do. Just begin right away. See how many things you can do to help in the Safety Campaign which is going on now and lasts until the end of September. Every time you do a little act to keep yourself or someone else out of danger, write it down; no matter how

small an act it is, make a note of it. Perhaps Baby Sister will get hold of a pair of scissors. If you take them away from her before she cuts herself, write that down; if you find the scissors in a place where Baby Sister might reach them and you put them on a high shelf, where she won't see them, that is still better. Write it down. Then, during the first week of October, write me a letter, telling me just what you have done to keep yourself and others from getting hurt. There will be lots of prizes, things that you can use in school. Everybody who enters the contest will receive a little surprise. Don't forget. Begin your little Safety List today. Tell other little Baltimore and Ohio girls and boys about it; perhaps your teacher will tell you lots of things that you can do.

I want every single one of our little folks to enter this contest. Send me your names now, so that I may expect your Safety Letter in October.

With love,

*Aunt Mary*

Address:

Aunt Mary, Baltimore and Ohio Magazine, Mt. Royal Station, Baltimore, Maryland. (Be sure to write the full address.)

## What a Twelve Year Old Boy Can Do

*By M. W. Jones, Weston, W. Va.*

ON May 3, Bert Ferris, a twelve year old school boy of Weston, W. Va., was walking along the track near Deanville, about two miles from the Weston passenger station, when he found a land slide obstructing the tracks.

There was no means of communication, so Bert walked to the passenger station, where he found Chief Train Dispatcher Staples and told him of the obstruction. Mr. Staples immediately arranged for the track men to clear the slide; then he informed Superintendent Trapnell of what had occurred. There happened to be a division staff meeting in progress at the time, and Superintendent Trapnell had Mr. Staples bring Bert into the meeting, where he was introduced to all staff officers, and thanked personally by them. Here is a photograph of Bert. We are glad to let our other little Railroad boys and girls know what he did.

And here's another record for a Charleston Division boy. The other day Forest Johnson, a twelve year old school boy, found a broken rail. He flagged our passenger train No. 61, notifying the crew of the trouble so that repairs might be made. He has been thanked by our superintendent.

Not all of us can find something wrong on the railroad tracks, but all of us can do something to help in the Careful Crossing Campaign. Have you seen that big poster "CROSS CROSSINGS CAUTIOUSLY?" We can all help that work whether at railroad, trolley car, or just street crossings.

Bert Ferris, a real little Honor Man

(Continued on page 40)

## Safety Roll of Honor

### Staten Island

On April 14 Engineer Frank Horan discovered a broken rail in eastbound main, east of Yard Office, Cranford Junction. He reported the matter to the yardmaster promptly and the trackman made repairs. Had it not been for Engineer Horan's keenness and alertness in detecting this broken rail, and having it attended to promptly, a possible derailment might have resulted.

On April 1, Engineer Charles E. Wynans, train No. 109, while at St. George Coal Pocket, discovered broken rail in coal tipple track, while engine No. 1181 was working thereon. He immediately told the crew about the broken rail, also the towerman and the dispatcher. His prompt action averted a possible derailment.

Trainman Oscar Williams, train No. 108, discovered brake rigging down on car 101 while train was passing over at Arlington. He signalled the engineer to stop and had brake rigging attended to, thereby averting a possible derailment.

On April 24, while backing some passenger cars down on station trestle at Tottenville, Trainmen Harry J. Finlay and Fireman Fred Helmeyer discovered trestle on fire. They extinguished blaze before any serious damage was done.

### Baltimore Division

On May 22, Brakeman L. Clark, East-bound Hump, Brunswick, while riding Baltimore and Ohio 32627, discovered sixteen inches of flange lost from a wheel. Mr. Clark has been commended for his discovery of the broken wheel in time to prevent a possible derailment.

On April 22, the conductor with Train 93, engine 4445, April 22, on arrival at Gaither, Md., reported that the train had run over a bad place in the track at Woodstock. Extra west, engine 4854, following, was notified. On arrival at Woodstock, Engineer I. M. Brubaker in charge of engine 4854, made an examination of the track and found eighteen inches of broken rail. He replaced a piece of the broken rail and pulled the train over same carefully and safely. Trackmen were notified and a new rail placed at 5.50 a. m. Engineer Brubaker has been commended for the manner in which he handled the situation by stopping, examining the track, replacing the piece of broken rail, and pulling the train over it, thus avoiding excessive delay to the train.

### Cumberland Division

About 10.30 p. m., on May 6, Mr. W. W. Lymire reported to our operator at Hardman that considerable heavy timber was on the tracks just east of Hardman shop. Trackmen were called to remove the timber, which was 12 x 12 x 28 feet, but in the meantime Mr. Lymire, with the assistance of Shop Foreman Lambert, Hardman, succeeded in clearing the tracks.

Mr. Lymire's prompt action and interest are appreciated. He is not an employe of the Company.

While First 97, engine 4419, was passing Paw Paw on May 27, Mr. A. P. Wentling, a resident of Paw Paw, noted car door open on north side of car, near front of train. Loading of car was exposed and appeared as if about ready to fall from car. He made a report of the matter and arrangements were made to stop the train at Green Spring where the trouble was corrected.

On April 13 at 5.40 a. m., J. F. Keller, section foreman, Section No. 24-A, noticed automatic signal standing red against traffic. He at once went to locate trouble and found a broken rail on No. 4 track one-half mile east of signal. He made temporary repairs until men could be secured to replace rail. This saved a delay to traffic and no doubt considerable damage to equipment. Foreman Keller is always on the job whether during working hours or not.

### Pittsburgh Division

On a recent trip westward, Brakeman A. R. Oyler noticed sparks flying along train. Investigation showed that a truck was giving way under a load of coal. Car was set off for repairs without any damage having been done and with little delay.

On May 29, Section Foreman D. E. Berlin, on Extra west passing west of Turkey Station, noticed brake beam down on N. Y. C. 208293. He notified crew, train was stopped and the matter corrected.

On June 14, Section Foreman Berlin also discovered broken flange on wheel of car in train No. 87, loaded with coal just out of Bostaph Mine, just east of Bridge 506, and notified the conductor as train passed. Conductor stopped train and had car set off on siding at Turkey.

The prompt action on the part of Section Foreman D. L. Berlin in these cases prevented what might have been serious accidents, and he is commended.

On June 12, while No. 98, engine 4579, was passing Layton, Signal Repairman H. J. Piper discovered a broken truck on P. R. R. 288254 in this train and immediately notified local freight, Engine 2505, on siding at Lavenia, to flag this train. This was done, and this car set off at Hickman Run, thus averting a possible accident. Mr. Piper is commended.

### Monongah Division

On May 31, the crew on the Blue Goose, No. 48, discovered a badly broken rail 50 yards west of Buck Mine Siding. Train was stopped and examination made. Sectionmen were left in charge and necessary repairs were made.

On May 18, while riding engine 1827 on Buckhannon local, Brakeman R. B. Hill's keen eye detected a badly broken rail just east of New Comer Mine Siding. He immediately got the ever-ready Engineer Bud's attention to it. Train was stopped and temporary repairs made so train could pass over. Conductor Ball on Extra 1827 used splendid judgment and left Brakeman B. G. Patterson to flag and notify following trains.

### Charleston Division

Following is the list of Charleston Division employes who recently have been commended:

Section Foremen S. L. Queen, J. Warner, W. W. McCord and J. B. Woemer, for interest taken in picking up material on their sections.

Conductor R. F. Hanzy, for interest taken in handling his train under difficult conditions.

Conductor Brake, for close observation in connection with bad order cars in his train. Engineer A. C. Whitecotton, Fireman O. E. Wright, Engineer F. Kerrigan, Fireman G. L. Nicholas, Engineer F. F. Bailey and Firemen G. E. Ramsburg and L. H. Fitzgerald for interest shown in connection with fuel economy.

Agent R. B. Snyder for his interest in safe operation.

Yard Clerk H. H. Cayton, for detecting a broken flange on freight car in train passing through Buckhannon yard.

Conductor R. E. McCoy, Brakemen J. M. Claypool, S. H. Caines and J. F. Bennett, Engineer Pickens and Fireman G. Carothers, for assistance rendered in replacing broken rail, averting delay to passenger train.

Agent L. A. Rollyson, Frametown, for his interest in Claim Prevention.

Agent J. A. Fisher, Weston, and E. J. Hoover, Buckhannon, with their entire forces, for interest shown in connection with check weighing L. C. L., securing good results.

Brakeman N. L. Myers for the courteous attention shown passengers on his train, this having been brought to the notice of the superintendent by letters from patrons.

Parlor Car Porter John J. Harris, running between Gassaway and Orlando, has been commended by patrons in letters to the superintendent, for courtesy shown them.

Agent Ryan has been commended by patrons in letters to the superintendent for courtesies extended to them.

Conductor H. E. Bragg has been commended for close attention to handling bad order cars.

### Wheeling Division

On Sunday, June 11, as train No. 51, Fairmont to Wheeling, approached Blackshire's spur west of Mannington, Engineer George Gillingham noticed tree blown down by storm across the track and telegraph wires. Engineer Gillingham applied the emergency airbrakes, bringing the train to a quick stop.

Although the train could have safely proceeded, it was thought by Conductor W. Smallwood that the obstruction should be removed, and suiting action to the thought, the crew got out the axes, trimmed the branches from off the tree, and cleared the track. Others who aided in clearing the track are: Conductor J. L. Manion, Train Baggage C. E. Harter, Fireman H. Bartels, Brakemen T. C. Reber and E. C. Giffin, and Electrician J. A. Debolt.

Riding on the train at the time were General Superintendent J. C. Scott, Superintendent C. B. Gorsuch, Division Engineer A. H. Woerner and they requested Trainmaster C. Higinbotham, who was also present, to write these men and express their appreciation of the action taken in this emergency.

### Newark Division

GEORGE W. FORBS  
Section Foreman  
Pleasant Valley, Ohio

Dear Sir—It has come to my attention that on May 9 you observed smoke stack loaded on Baltimore and Ohio flat car

106114, with braces broken and stack about to fall; that you stopped Train 98 and had the car set out for necessary adjustment.

Your vigilance and prompt action in this matter undoubtedly averted an accident, and I take this method of commending you and expressing my personal appreciation of the service rendered. We are arranging to have due mention made of the incident in our MAGAZINE.

Yours truly,  
(Signed) H. G. KRUSE  
Superintendent.

MR. C. V. GRAHAM  
Operator  
Cambridge, Ohio

Dear Sir—It has come to my attention that on the morning of May 26, while train 85 was passing Cambridge, you observed a bent fulcrum bar under car in that train; that you notified both dispatcher and conductor, with the result that the fulcrum bar was removed at Sundale.

I beg to express my appreciation of your vigilance and prompt action, and to thank you for the service rendered.

Yours truly,  
(Signed) H. G. KRUSE  
Superintendent.

Peter Pole, section foreman, Erie R. R., discovered about six inches of broken wheel flange upon Baltimore and Ohio crossing just after eastbound extra had passed over. He reported same to Operator Mulquinn, Baltimore and Ohio North Siding, who immediately notified conductor in charge. Car was reported taken from train at Willard and wheel was a clean break.

#### Chicago Division

Operator O. Hutto, Holgate Tower, recently performed meritorious service by observing a car loaded with pipe that had become shifted. The pipe was about to fall off the sides of the car in Train 4267, west. Mr. Hutto took prompt measures to protect this shipment.

On June 9, fire from a passing engine set the depot platform on fire at Milford Junction. Operator G. L. Rex, in the tower, used the fire extinguisher from the tower and put the fire out before much damage had been done.

First Trick Operator Oscar Hutto, Holgate, observed hot box on No. 4299 east. Train was stopped and condition corrected before any damage resulted.

#### Akron Division

On May 21 Mr. P. W. Hablitzel, 1129 Second Street, Canton, Ohio, while passing the east end of yard limit at "CO" Tower, noticed a broken rail. He immediately notified operator and also flagged engine 2779 and advised of this unsafe condition. Mr. Hablitzel is an employe of The Burger Manufacturing Co., Canton, Ohio. His prompt action in this instance is highly commended. Superintendent Stevens has written him a personal letter of appreciation for his keen interest in the safe operation of trains.

On May 18 while Extra 4314 was passing "FS" Tower, Operator N. H. Shriver noticed something dragging on one of the cars. He immediately notified operator at Ravenna, who had train stopped. An examination developed a broken arch bar on a tank car.

On May 10, Freight Brakeman N. B. Chalfant was acting as flagman with the helper engine at Akron Junction. He noticed a flat spot on wheel of car near the head end of Extra 4093 west. Road Foreman of Engines Sample investigated and

found about seven inches broken out of tread of wheel on Baltimore and Ohio car 20599 which was set off on siding for repairs.

On May 13, while Extra 2339 was passing "GI" Tower, Operator J. A. Keifer noticed brake beam down. He immediately notified crew who had train stopped and the defect corrected.

On May 12, while Train 67 was crossing Center Street, Haselton, Ohio, Freight Fireman A. R. Hubener, who was employed on an engine in that vicinity, noticed brake beam down on milk car. Conductor was notified, train was stopped and necessary repairs were made.

Superintendent D. F. Stevens has written each of the above named employes a personal letter expressing his appreciation for their interest in the safe movement of traffic. Commendatory entries have been placed on their service records.

#### Ohio Division

On May 31, at 8.45 a. m., while No. 92 was passing through Blanchester, Conductor Brisland, in charge of the Hillsboro local freight, observed brake rigging dragging under car on No. 92's train. He notified train crew when rear of this train passed. The train was stopped and defective rigging removed. Conductor Brisland's watchfulness undoubtedly averted an accident.

While Extra 2318, east, was on west-bound track at Byers Junction on May 26, Engineer N. Rice, in charge, discovered about seven inches broken out of ball of rail on eastbound track. He immediately made arrangements to notify proper parties. The close observance on the part of Engineer Rice averted a serious accident.

On April 19, Operator W. C. Pratt, who was on duty at "RK" Tower, flagged Second 96 and called conductor's attention to a broken brake beam in train. The brake beam was removed. Operator Pratt is commended for his action in this matter.

Letter of appreciation was recently received from Mr. W. L. Granberry, Nashville, Tenn., in connection with courteous attention given him by Conductor E. K. Cleveland and Brakeman William Shermer, on train No. 1 on May 19. He said that he was greatly assisted and given very valuable information by these two employes.

On the morning of June 9, Brakeman W. D. Cox with Conductor J. H. Howard, Extra 2884, west, discovered two broken angle bars in eastbound main track at Midland City. Information was immediately communicated to section foreman, so that repairs could be made, and trains were notified to run carefully over the defect.

#### St. Louis Division

While train No. 99 was passing Delhi, Operator F. Vawter observed brake beam down on Baltimore and Ohio 194496. He immediately notified crew and defects were repaired.

While Train First 94 was passing an eastbound extra in siding at Salem, E. B. Milligan, brakeman on the extra, noticed brake rigging dragging on First 94's train. Fearing that he would be unable to attract the crew's attention he boarded caboose and notified them of this defective condition. On examination additional defective brake rigging was found as well as a hot box on one of the cars. His close observance of a passing truck and the action taken to notify crew, which in all probability averted an accident, are appreciated.

On May 28, while inspecting Train

Second 94 in Flora Yard, Car Inspector F. O'Shatz found wheels hot under Baltimore and Ohio 171420. On closely examining wheels, he found that three of them were cracked. One of these wheels fell apart when it was removed from car on repair track. His close observance probably averted a serious accident.

While Extra East 2620 was passing C. E. Cabin at 6.51 p. m., on May 29, Operator J. H. Vawter noticed brake beam down and dragging on eighth car from the engine. He notified crew, train was stopped and repairs were made. This is the second or third case in which Mr. Vawter has observed bad conditions under trains.

#### Toledo Division

On May 7, while Extra 4177 north was passing Sidney Station, Agent C. J. Brown noticed a brake beam down and doing considerable damage. He got hold of the dispatcher and stopped this train at S. W. Cabin, where the brake beam was removed.

MR. H. C. SOUTH  
Cridersville, Ohio

Dear Sir—I note with pleasure the effort made on your part to protect the Company's interest by notifying train crew of Extra 4504 north, of brake beam dragging on car Pennsylvania 707845. This enabled them to stop train and make repairs.

You also called the dispatcher's attention to brake rigging dragging in Extra 4253 north, which enabled him to get this train at Erie Junction.

Either of these instances unnoticed might have caused an accident resulting in property damage as well as personal injury. Such action as this on the part of employes is much appreciated by the Management.

Yours truly,  
(Signed) R. E. CHAMBERLAIN  
Division Engineer.

On May 20, Jesse Jones, assistant shop foreman, Lima, noticed a broken arch bar on Baltimore and Ohio 142189, in Extra south 4650. Mr. Jones notified the dispatcher and car was set out at Erie Junction.

## Among Ourselves

### Baltimore and Ohio and Baltimore and Ohio Annex Buildings

#### Law Department

Correspondent, GEORGE W. HAULENBECK  
Homage to the State of Pennsylvania

Why should we not have a reference in our Magazine to the State of Pennsylvania? I cannot begin to tell you how many subsidiary corporations we have across the Pennsylvania Line, all doing effective work. At divers times Secretary Woolford signs and makes affidavit to reports appertaining to these companies, and accordingly they come to me as well.

At Philadelphia, H. B. Gill; at Pittsburgh, Messrs. Gordon and Smith; and at ten other places in Pennsylvania, the railroad has eminent counsel who render efficient service. Form Six gives this information, and I am thus explicit, because letters to some of our attorneys are erroneously addressed to the parent office here in Baltimore.

#### Bethlehem Steel

Bethlehem, Pennsylvania, the Mecca of my week end trips, is worthy of note. It is reached by the Bethlehem Branch of the Philadelphia and Reading Railway, and like its companion line to the seashore, its trains make the highest speed, consistent with safety. The Bethlehem Steel Company at Bethlehem is a wonderful institution. It extends for five miles along the south bank of the Lehigh River.

#### Diplomatic Conductor Bender!

On my return trip the other Sunday evening, a young woman passenger declared that her ticket to Washington had already been lifted. Our train conductor knew this was a mistake, but instead of losing patience, he was patient and pleasantly persuaded her to make a more careful search. It resulted happily, for the ticket was found and promptly presented.

Number of train, 509; day of the week, Sunday; description of conductor, tall, hair liberally tinged with gray; weighing not so much in avoirdupois, but possessing oceans of experience and good common sense. He saved the day and that young lady will be a life long patron of our line. She was traveling from New York to Washington.

Our junior addition to the department in the person of George Raymond Brennan is wearing well. I have a strong admiration for young lads who are filled with a desire to do their very best, and to keep a full stock of courtesy and politeness on tap at all times. George is in this class. Now

girls, let him alone please, for he is only seventeen, and there is plenty of time. If it is really necessary to tackle anybody, let the flood gates open upon your obedient. I am impervious to all attacks. I should be distressed if George had cautioned me not to discuss him and his qualifications in our MAGAZINE. I hope no one will entice him away from the Law Department. He is needed here.

The other Saturday my dear old train 524 was detoured over other tracks from Wilmington to Philadelphia. Our train was accordingly whisked along in fine shape and made connection with the Bethlehem train at Wayne Junction. This running of trains at high speed, and detouring when necessary with a minimum of delay, has always struck me as being marvelous.

#### Office of General Manager

Correspondent, H. E. WEIFENBACH

Considering the long absence of the General Manager's Office from these columns, it might be expected that we would burst forth into the spot light with a great splurge in an endeavor to display our vast knowledge gained from daily contact and intimate relations with those who are doing big things for the Railroad. We fear, however, that it would be vain to try to impress anyone with our wonderful store of knowledge, particularly our neighbors. Then too, we do not want to arouse any jealousy among the older inhabitants of the "Column" and are inclined to believe in small beginnings. As there have been some changes in this office since our last appearance in the MAGAZINE, it may be interesting to you all to have an up-to-date introduction to our personnel, so here goes:

A. O. Herman—chief clerk and winner of many trophies in golf. Our advice to him would be that the next time he picks out a circus day in which to move, he hire a row boat instead of a moving van.

V. F. Riley—secretary to the general manager. The honorable secretary is never so happy as when in contemplation of a tour of the Baltimore and Ohio.

T. J. O'Connell—secretary to assistant to general manager. Mr. O'Connell is a great favorite with the flappers, particularly in that Maryland Club bathing suit.

J. D. Hedding—stenographer, recently transferred from Special Accountant J. K. Skilling's Office. A rare example of the effect of European influences on American citizens during the 20th Century. Mr. Hedding's intimate knowledge of the French

and Russian languages and his dissemination of such knowledge are extremely enlightening.

H. E. Weifenbach—secretary to chief clerk, also a former protege of J. K. Skilling.

George Seeds—chief file clerk and champion bowler.

C. W. Staines—file clerk. If you don't believe that file clerks go to Heaven, ask Clarence. As a matter of information, Winfield was married several months ago and has turned out to be a model husband.

Mrs. M. G. Craig—Another member of our illustrious file room. Mrs. Craig needs no introduction, and makes a special request that she be given none. She did not say anything about her picture, though, so we are taking a chance.

J. W. Hamilton—special representative to the general manager. When it comes to figures and facts we take our hats off to Mr. Hamilton.

J. Albert Wieber—junior clerk. Albert has been accused of being a cake-eater, but we think he wears those silk shirts and a flower in his buttonhole just because his (cute) little B. L. girl likes them.

Recently Joseph Barroll, porter on the general manager's ear, was missing for several days. There are various stories about the cause of it. Some say it was from eating too much cherry pie, and others mentioned Ringling Brothers' elephants.

After breaking the ice, to use the vernacular, with this formal introduction, we shall feel better acquainted, and we hope to meet you all again next month.

#### Car Service Department

Correspondent, H. V. OBERENDER

One Sunday during May some of our pretty girls of this office went on a hiking party to Harper's Ferry W. Va. All were dressed in knickers, sweaters, etc. They certainly did have a fine time running up the mountain sides, picking flowers and taking pictures. We'll have a good picture of them here, soon.

Grace Jacobs and Kathleen Ruppert caused a great deal of comment when they came into the office the other day minus part of their hair. Yes, they had it bobbed, but we are all of the opinion that it is becoming to them.

Wilson Auld, manager of our baseball team, has been working hard to land a winning combination. He is ably assisted by Charlie Bayne and "Shorty" Reider, two former semi-pro baseball stars.

Rae Cook and Margaret Zepp recently

Mrs. M. G. Craig, file clerk, Office of General Manager

returned from their vacations. They had a fine time down on the farm among the cows and chickens.

Ruth Beauchamp and Florence Callahan recently resigned from the service to be married. We wish them happiness. Who's next? We understand May Poteet has completed her hope-chest and Evelyn Mays received a sparkler. Looks as if they are next.

### Engineering Department

Correspondent, OSWALD K. EDEN

A word to the wise is sufficient. CROSS CROSSINGS CAUTIOUSLY!

Tennis is coming along in great style, considering the fact that this is our first attempt at organizing a team. Due to the inclement weather, we have not been able to get much practice, but from what has been accomplished, it appears that we will eventually have a well-balanced team.

"Empty" has turned to farming this season. Most every Saturday you can see him heading for Loch Raven where he likes to be among the cows and chickens 'n everything. But maybe it's not the song of the farm that calls.

For sometime past our demure stenographer in the drafting room has been consulting time tables, etc., figuring out just where to spend her vacation. She told me she expected to go to "Gawgia," and declared it was her ambition to settle down in a southern town. We wonder why and who is the cause of this.

Those of you who missed the Festival of Lights and Flowers, held on the grounds of the future Protestant Episcopal Cathedral of Maryland, and especially the clavilux, or color organ, missed a sight worth seeing.

What is to be done to a person who tries to drive his Ford down the street with a safety lock on one of the wheels?

How many of you have read the interesting department running in our MAGAZINE, entitled "In the Realm of the Riddle," originated and written by George H. Pryor, auditor disbursements? "Alf" and I, with the help of a dictionary, have been able to solve most of the puzzles in the May issue. Why not try your hand at it? Besides enlarging your vocabulary, it affords an enjoyable past-time for your spare moments.

I wonder how many knew that the Company maintains a library for the convenience of its employes. I'll wager not many. The library is situated in Mt. Royal Station, and Mrs. E. P. Irving is librarian. No charge is made for the borrowing of a book, and I am sure that there are several books in it that you have not read. If you have never heard of it before, and would like to receive information, ask your chief clerk or write direct to Mrs. Irving. Among other good books they have the well-known, but infrequently read, Harvard Classics, which are worth the time spent in reading them.

We have another addition to our "goggle" club—"Joe" Gallagher, of Engineer of Buildings Office. He looks all dressed up nowadays.

When your friends go on their vacation, if they have never been there before, be sure to get them to see Washington, going on their journey via the Best and Only.

The other day "Colonel" Frye was in the office with his sleeves rolled up and without the customary collar. Verily, by this sign we knew it was warm.

When writing letters don't be afraid to put a subject at the head. It might cost you a little extra effort, but in the end it will save a lot of time and inconvenience when the preceding correspondence is wanted in a hurry.

Looks as if J. F. C. has gone housekeeping. At least it appears that way as he always carries a camouflaged market basket, more commonly known as a grip.

We hear that Roger Hilleary Leroy Bell goes over to Washington on No. 5 every Saturday afternoon, gets five gallons of tax-less gas and brings it home for use on Sunday. Some people sure are progressive!

### Office of District Engineer, Pittsburgh, Pa.

Correspondent, J. M. WHEALAN  
Accountant

Recently Mr. B. was an interested spectator of the methods used in the Accounting Department. He stayed a little longer than he anticipated, but left well satisfied.

Our quarters are in any but spick and span condition these days because of the presence of the painters, but we live in hopes that some day "calmness and serenity will reign once more" as Mr. R. says.

We are enjoying the excellent company of E. R. Winslow, senior land appraiser, Valuation Department, Cincinnati, Ohio, who is engaged in performing some valuation work in this vicinity.

Messrs. Lane, Lang and Kinsman were visitors here recently, it being Messrs. Lang's and Kinsman's first view of our new offices. We were also glad to greet Mr. Frye, Mr. Bennett's office, Baltimore, who was here recently in connection with some accounting matters.

Miss W. was good enough to act as buyer for the married members of this department a short while ago. Bungalow aprons were the center of attraction. We hope that the wives will be satisfied with the results.

Mr. M. was fortunate in securing a bargain in a new car and is very proud of it.

There are a good many members of this office who are gaining a lot of experience in the proper manner of dickering with auctioneers. We understand that the auctioneer came off second-best several times, if we can judge by the number of trophies presented for inspection.

Fritz Broderick, on his return to the office after the concrete mixer turned over

### District Engineer's Office, Baltimore, Md.

Correspondent, J. F. COLLISON

CONGRATULATIONS! Cyrus III is a fine baby boy, son of Mr. and Mrs. Clarence Young, born on June 2. Mr. Young is engineering accountant in R. C. Howard's Office, Mt. Royal. There ain't no living 'round "Cy" these days.

The friends of Assistant Engineer R. C. Howard who is stationed at Mt. Royal, will be sorry to hear that he is compelled to be away from his office because of illness. We hope his recovery will be rapid and that he will be back with us again soon.

### Office of District Engineer, Philadelphia, Pa.

Presenting a One Act Playlet in two scenes, entitled:

"The Turning Over of the Concrete Mixer"

Time: May 26, 1922.

Place: New warehouse, 24th and Walnut Streets, Philadelphia.

#### SCENE I

Scene: Site of construction. We find mixer situated on bank along 24th Street side. Enter Francis D. Broderick, Inspector, played by "Fritz" himself, who is standing about the center of the job. Mixer turns over when the bank gives away and falls down the hole.

Fritz: Hey! (and then he turns away, his coat tail at about 90 degrees from his body, and disappears).

#### SCENE II

Office of Assistant Engineer: Teders, Gwathmey, Boettger and Jones all supposed to be working hard. Enter Fritz, all excited and with his hands up over his head. He is breathing hard.

Fritz: It's gone! It's gone! (endeavors to regain his lost breath).

All: What's gone?

Fritz: It's gone! I knew d— well it would go. I told 'em! (Hands still in the air.)

All: What's gone?

Fritz: The d— mixer. It's gone, don't cha know, down the hole! The bank gave away and it's gone!

(Everybody laughs except Fritz who doesn't see the joke; then all journey down to the job to see the wreck).

Curtain.

### Office of District Engineer, Cincinnati, Ohio

Correspondent, GEO. F. DAUBENMERKL

Earl W. Stout, former transitman, is now employed on city engineering work, Trinidad, Colorado. Earl says the work is similar to Railroad work, for which he still retains a fondness. The altitude of Trinidad is 6,000 feet, and with the surrounding peaks 14,000 feet. Some scenery, we'll say! We all wish Earl every success in his new work and hope to see him back with us some time in the near future.

George Kopp is now experiencing the trials and tribulations of city life. Mr. Kopp wants to purchase a home, but is trying to find the person who told him prices were dropping.

Assistant Engineer James P. Ray has moved to a new location in Lawrenceburg, Ind. Jim says he has a fine garden with strawberries 'n everything. Several of the boys state they are going down and watch him wrestle with the weeds. I suppose Jim wears one of those big loads of hay on his head known as a straw hat.

J. J. Kolker, our radio expert, has engaged in the construction and installation of receiving sets. His latest victim is Mr. Wakefield, who goes around with a harrie l

look on his face. What's the matter, George? Doesn't it work, or is it loss of sleep "listening in?"

Mrs. S. A. Graham and family recently paid a visit to relatives in Pittsburgh, leaving S. A. to run "Bachelor's Hall."

P. A. Callahan has found a successful way to increase his avoirdupois, the formula being very simple. He joined the North Cincinnati Gym and takes a strenuous workout every Wednesday night. Result, a loss of 2 pounds. Then comes the refreshments (limberger, etc.). Result, a gain of 3 pounds. Net result "A" gain.

"Jim" Spires, Cost Department, Baltimore, was in to see us recently. We were all glad to see him, as he is popular in Cincinnati and more especially Newport.

Mr. and Mrs. McKibben paid a visit to Mr. and Mrs. Davis at Greenfield recently and "Mac" says they had quite a time. They say "Mac" is some Pinoche player. He can beat the Mrs., but can we judge him correctly on that performance?

What would Stanley Thompson do if Chester Park should burn or have to close up? Every Sunday night, regularly, for "Tommy." He has a stop-over on the trip to Chester Park "Reichrath's Garden."

Business around Cincinnati is picking up nicely and everybody on the staff is in good humor and stepping lively. Bring on some more work if it keeps the boys in good humor.

**General Freight Claim Agent**

Correspondent, **GEORGE DOBBIN**

Yes, it's plenty hot enough for us, thank you!

The getting of business for the Baltimore and Ohio Railroad, whether it be freight or passenger, has been one of the most worthy objectives of every member of the "Best and Only" family for some time past. Conditions now point to a return to normalcy, and the outlook for busier times in manufacturing and other commercial lines seems to warrant an optimistic attitude in general. Shippers and the traveling public are both availing themselves more freely of the service extended by the railroads, partly because the economic situation has improved and partly because of the 'word-of-mouth' advertising practised by the 'Vets' and other loyal employes. Financial improvement increases the volume of business to be gotten, but competition is beaten only through **LOYALTY** and **UNITED EFFORT**. Let's go.

Fireworks, being spectacular, always attract crowds, as demonstrated on the past 'ga-lorious' Fourth (as pronounced by our best orators). But they die away swiftly, leaving but a rather unpleasant odor. Give us the steady 'plugger' who has a purpose in life and a goal to work for; he is a safe bet.

Great visions of the swimmin' hole! Our own George Garner of K. K. K. fame, has taken to the latest modes in gray shirtings. How is the law school these hot days, old timer?

Our friend, George Travers, is challenged as the Squire of Overlea by John Koehlein. John claims that title, leaving Belmar to George in a spirit of friendliness. Oh, you Belair Road!

The 313th Infantry had a fine crowd for their moonlight on June 8, in spite of the rain and the threatening clouds. Such support is more than deserved by an organization whose club house has its walls partly

Left: Walter Garland Fink. Center: Tommy Fitzpatrick, ready to go a-canoeing. Right: Eddie Litke, former employe of the Freight Claim Department, now enjoying the sunny lands of California and waiting for the 1.07 on the S. J. and E. R'y. See G. F. C. A. notes

covered with pictures of 'buddies' who sleep in France.

Flynn has been in a rather dreamy attitude these few weeks past and we believe that the seemingly pleasant chats with Miss Brillhart may have some bearing on the case. Don't be a lonely "batch" all your life, Flynn, old scout—we don't see how you can resist "them" eyes anyhow.

Treat the boys in the back room, "Eddie," yeah, banana royals. Oh, shucks!

Sometimes the circus is an excuse for the old folks to take the youngsters and thereby glimpse the beautiful rhinoceros, but this time we found Mr. Griffith and Miss Kramer cramming the peanut down sundry throats, including those made famous by Darwin. The pink lemonade will do it, Griff. All of which goes to prove that the quieter they are, the faster they think.

"Shad" Gaynor ushered in the summer season with his usual display of natty socks. Paris may have the styles, but we have the wearers.

Mr. Waters invited a bunch of friends to a Masonic meeting and "feed" at Odenton recently. Sweet visions of golden brown chicken! "Hoggie" Brown and "Skinny" Keene held the boys up so long trying to eat up everything so that the ladies would not have to take it away, that we missed all but the last train. Thank you, J. I.

Close by will be seen the photo of Master Walter Garland Fink, Jr., aged three years. He is the manly little son of friend Fink.

Some of the fellows in the office remember Eddie Litke, who went to California to seek health and found in that varying elime of snow-capped mountains and balmy vales not only his health, but an occupation in which he seems to be making good. Have a good look at this photo of "Ed." Best of luck to you, "Ed," from all.

Our marriage roster is not only a blank for this summer (so far) but the signs don't indicate any improvement. Who believes in signs, anyway!

Keep your temper folks; let your mind dwell on the cooling breezes of the North Woods and the cooling drinks of Cuba and elsewhere.

We have with us today a photo of "Tommy" Fitzpatrick, of the O. S. & D. Division, canoeing. Atta boy, "Tommy!"

Hurrah for the baseball game of the Married Men vs. the Single Men of this office! They played a great old game on June 12, resulting in a victory for the benedicts. Score, 15 to 9. Goeller and Neville pitched on the side of the victorious, and Garner pitched for the "aint-yets." Never mind, girls, keep on rooting and someday you'll be proud of Garner. He's got the makings of a good pitcher—or spoon holder, which is it?

We fervently hope that our own Miss Wingate has fully recovered from the inconvenience caused by the sad loss of a portion of her wardrobe at Bay Shore Park on June 11.

**Tariff Bureau**

Correspondents, **F. W. RUPPERT** and **C. A. WAGNER**

The full tariff force of this department has been working hard on the 10 per cent. freight rate reduction, which went into effect on July 1. Everybody put his best efforts into the work with the view to finishing the reductions in time to allow at least a three day notice on all issues as well as a vacation for all concerned. It is hoped that the cost of living will come down accordingly.

Mrs. Hoyt, who received serious injuries when she was struck by an automobile a few months ago, is now improving. We are all glad to hear Mrs. Hoyt is able to sit up for short intervals and we hope for her complete recovery.

Well fellas 'ja get yer vacation yet?

No, Ralph, the Charge of the Light Brigade has nothing to do with the bills of the Consolidated Gas Co., nor is the Daylight Savings Plan connected with The Baltimore Savings Bank.

Ann B is now sporting a country fellow; he has been seen driving his wares to market in high boots, with his little tootsie by his side. Wonder what Annapolis Charlie would say if he knew.

Rain, which was plentiful, is said to have been of wonderful value in assisting the vegetable gardens of our industrious clerks, to sprout the first signs of encouragement. A prize of six rubles will be paid to the first one bringing one full grown, edible vegetable to the office; said vegetable must have been grown in his or her garden.

### Valuation Department

Correspondent, G. B. SAUMENIG  
Accountant

In the May issue of the MAGAZINE the following limerick appeared:

We have an affliction named Doyle,  
Whose wife consumes pure olive oil,  
He thinks matrimony  
Is a pathway quite stony,

To the person submitting the best last line, the author offered the prize of one plugged car check. Under date of June 13 from far away Washington, Ind., comes the last line which is worth passing on to our readers:

Well, why did he marry the "goil."

The author would appreciate being advised the name and address of our friend from the west, in order that the prize may be sent promptly. In case it could be arranged for this party to come to Baltimore, public presentation of the trophy would no doubt draw a great crowd.

In the past our attention has been directed to the wonderful colors shown by some of the boys. There was Smythe in his shirt of many colors, and Gumpman, whose dainty pink creation stood out prominently in the office. Now Faber, who has always been noted as a quiet dresser, sneaks in with the most beautiful shirt of salmon pink. He claims his wife made it for him and even if we congratulate her on her taste, yet we hope she will see to it that it is only worn on special occasions and then not to the OFFICE.

Switchlamp McGarry is very busy these days and has his troubles, according to his nickname.

We are glad to have Pilot Engineer Bowditch back with us after his six weeks' leave of absence.

Our friends R. E. K., O. G. W., and R. C. S., can be seen each day about noon at the Caswell Hotel Drug Store. They say it is coca-cola and it has also been rumored that a free lunch is given with each glass of beverage, besides the usual generous supply of graham crackers. After a strenuous morning of corporate history and intricate building subjects, it certainly must be a grand and glorious feeling to be able to secure such a repast at such a low cost.

Brewer and Daws had a wonderful time early in June on their fishing trip. Their stories were exciting but unbelievable in their unusual similarity. Brewer claims to have caught the largest fish ever taken. Photographs, please.

Johnny Linder, a former "Duncanite," has left the service of the Baltimore and Ohio Railroad to accept a position with Morris. We have not been told whether it is the Soda Water Man or the Real Estate Man. We hunted up Miss Dorsay but found out that she had left the Real Estate Department. The date has been set and further particulars will be given in a future issue of the MAGAZINE.

There are but few offices where styles and colors are shown that can be compared with the Valuation Department. How is the following for an outfit?

Shoes, furnished by Gus Spath (Size taken into consideration).

Fur cap, donated by Vorwerck (Used in all seasons).

Checked trousers, loaned by Boberg (Must be returned).

Choice of shirts, property of Gumpman, Smythe or Faber (Beautiful assortment).

Cerise tie, practically new, says Porter (The only one we could find).

Collar, Bonney could only stand it one day (It costs 14 cents to launder).

Latest haircut, especially noticeable on Cathcart, Wilkinson and Vorwerck.

Hair tonic, used in great quantity by Meese.

Pilot Engineer Dougherty has that wonderful smile. Mary Helen, weight 8 pounds, arrived on June 15. Both Mrs. Daugherty and Mary are doing well. Daddy is very proud and is constantly holding secret conferences with the various fathers in the office.

Our girls are trying to outdo each other as far as sweaters are concerned. All colors of the rainbow are seen. It is difficult to make a selection, they are all so classy.

Pilot Engineer Bolin attended the Eighth Annual Convention of American Association of Engineers during the early part of June. It was held in Salt Lake City and it is rumored that Mrs. Bolin insisted upon going. In reading over the program and news of the convention, it is noted that our representative was very popular and it is with great pleasure that we are able to quote several items from this Convention's News:

The longest man in all the show,  
Is Bolin Bill of Baltimo',  
In stocking feet, Bill's six feet seven,  
Bill claims he's very close to Heaven."

"There was a sudden rise in the level of Great Salt Lake this afternoon for which no approximate reason could be given until we spied Bolin of Baltimore in the briny deep."

There have been many verses written about the grouch, some good and some bad, but the following which was handed me the other day, seems to be one of the best:

#### The Champ

It is easy enough to be grouchy,  
When things aren't coming your way,  
But the prize old growl  
Is the man who can howl,  
When everything's going O. K.

(There are always a few in each department who take great delight in growling. It is hoped that this little verse will help.)

#### Worth While

In searching for cost data one of our men discovered a volume that contained just what he was after. This volume belonged to the United States Government and was the only copy at Washington, for the department's own use.

The late Charles A. Luken, Office of Auditor Coal and Coke Receipts. See June issue

Mr. Axel H. Oxholm, Chief Bureau of Foreign and Domestic Commerce, upon discovering the information desired was for the Baltimore and Ohio Railroad to assist them in valuation work, agreed to loan this volume in return for the courteous treatment he has always received while traveling over the Baltimore and Ohio Railroad. He also complimented the Baltimore and Ohio for the excellent Dining Car Service, and never fails to ride the Baltimore and Ohio Railroad if possible to do so.

This, I think, is what we all like to hear, so why not pass it along?

(Signed) G. SPATH,

Valuation Department.

### Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPURT

The sincere sympathy of the entire office force is extended to A. T. W. Moore, whose father died suddenly during the last week of May; and to W. J. Watts, whose daughter Helen expired after a lingering illness on the night of June 8.

The final chapter of the 1921-1922 season of the office bowling league was written on Saturday afternoon, May 27, when the members and a few friends held an outing at Willow Spring Shore.

The start was made direct from the office and a light lunch was ready on the grounds when the party arrived. All sorts of games and sports were indulged in during the afternoon. By the time the main feed was ready, everybody had a ravenous appetite. Chicken, soft crabs, fish, etc., disappeared at an alarming rate.

The day itself was not what could have been desired, but everything considered, an enjoyable time was had and the affair voted a huge success.

Anyone desiring a joy ride in Andy Ku Ku Bickel's "fliv" can do so by seeing his booking agent, Mr. Jerry Johnson. Understand a horse has been bought by this firm, which insures a round trip. All kinds of thrills are experienced on this trip and once taken, will never be forgotten.

### Auditor Disbursements

Correspondent, JOHN C. SVEC

We congratulate John A. Zimmerman, head clerk, Journal Entry Bureau, upon being with the Baltimore and Ohio Railroad Company for 42 years. Mr. Zimmerman entered the service on June 1, 1880, starting in the ranks as a messenger, Telegraph Department. Shortly afterwards he was transferred to this office, where he has remained ever since. Although "Cap" is not quite 54 years old, he looks as though he will not get any older and that he will spend quite a few more years with the Company. Good Luck, "Cap," and may you be with us a long, long while.

The accompanying picture is of Richard Charles, 27 months old son of Charles N. McDevitt, clerk, Payroll Bureau.

The picture of Miss Selma M. Herzog was taken while she and Miss Emilie H. Tripp were on a stroll through Jackson Park, Chicago.

June, as usual, brings forth the blushing brides and many showers. On May 17 the girls of the Payroll Bureau gave Miss Loretta A. Schaffer an aluminum kitchen shower. She was taken very much by surprise and was pleased with the gifts. Refreshments were served and the evening was spent in music and dancing.

On Saturday afternoon, June 3, a luncheon was given Miss Marie A. Smith by Miss M. Virgin Mitchell, in honor of her approaching wedding. The girls of the Payroll Bureau were present, also some of our former brides, Mrs. Hendrickson, Mrs. Fowler and Mrs. Aist.

On the following Monday, June 5, a miscellaneous shower was given by all the girls of the Payroll Bureau, at the home of Miss Gladys Griffith, in honor of Miss Smith. The affair was an enjoyable one. Music and refreshments were indulged in 'til a late hour.

A recent wedding was that of W. S. Nicholson, M. C. B. Bureau, to Mrs. Murr, Pittsburgh, Pa. The wedding took place on Thursday, June 8. Mr. and Mrs. Nicholson spent their honeymoon in Atlantic City. We extend our congratulations.

Edward S. Deal and Charles V. McCauley have both returned to the office, having been away for several weeks because of operations for appendicitis.

E. W. Beck and J. A. Remington have been absent from the office for several weeks because of illness. We are hoping that they soon will recover and be with us again.

Charles V. McCauley, Jr., one year old son of our clerk, Payroll Bureau

The Auditor Disbursements Baseball Team has been playing splendid ball, having won six games and lost one. They have their opponents on the run and are trying to stay in the lead. The boys hope to capture the pennant this year.

We have been advised that the ring "Tony" K. gave away this year is the one that counts and that the ones that were given away before did not count. It has been rumored that the date has been set for August. We will let you know the results in a later issue.

**Auditor Passenger Receipts**

Correspondent, FRANK O. CLARKE

Little Dan Cupid has popped a few suggestions for vacations. As it seems now, he surely will have quite a number under his supervision during this season, and our office will be well represented at the License Bureau. For further information ask our Little "Carl." Good luck to you, old boy.

There is a fellow named Kuehn, Who has a little machine, You can hear it rattle, you can hear it puff, And it always rides like the road is rough.

Richard Charles McDevitt and Miss Selma M. Herzog

Now Mama and Papa and Eddie Kuehn, All sit up straight in front the machine, "Are you ready my dear," you'll hear him cry, Then Bang! "What's that, mama?" he'll sadly sigh.

Daddy Kuehn wishes to announce that Eddie, Jr., who is now three months' old, has one tooth, pointing north.

Harry Phelps, who was recently operated upon, is improving slowly; we are looking forward to the time when he shall again be among us.

Misses Helen Schaaale and Martha Akers, both of whom have been seriously ill, are rapidly traveling the road to recovery.

The head clerk of our Statistical Bureau, Mr. Jenkins, who has just returned from a visit to his brother's home on the Pacific Coast, brings us news from our old friends C. X. Hale, Gilroy, Cal., and Agnes Hoffman, of Los Angeles, Cal. Mr. Jenkins informs us that clerks do look good in overalls sometimes, and he expresses his delight at being personally conducted through Hollywood by a real movie actress, none other than our little "Aggie."

Auditor Passenger Receipts C. H. Poumarat was in Cleveland from June 6 to 10, attending the meeting of the Railway Accounting Officers' Association.

Let's not forget our picnic this year at Miller's Park. "Remember Last Year?" I'll say we do. Some good time! Well, this year is going to be just twice as good.

What say? Could'n't be possible? Well, just wait and see what "Johnny" Finn has up his sleeve for us; he just knows we can't forget July 29.

Alfred O. Whitehorne, accountant, who had been ill since September 30, 1921, died on Sunday, June 11, at about 3.00 p.m., much to the sorrow of his former associates.

Mr. Whitehorne had been in our service since September 15, 1881. Throughout his long years of activity he proved to be a conscientious, efficient and estimable employe; his demise has cast a gloom over the entire office.

The funeral took place from St. Luke's P. E. Church on Tuesday morning, June 13, at 10.00 a.m. Mr. Whitehorne had been a member of this church for many years.

Mr. Whitehorne was a man of amiable disposition and fine intelligence. He was a lover of music, having been at one time a member of St. Luke's Choir, and his many good qualities were recognized and appreciated by all who knew him. It is believed that in passing down the dark river of death he will find beyond a sunlit sea to bear his barque on a voyage of supernal happiness.

The beautiful poem memorializing him, and written by our esteemed assistant auditor, Mr. Grice, will be found on another page of this issue.

### Eastern Lines

Pier 22, North River, N. Y.

Correspondent, JOHN NEWMAN

Another Tiffany solitaire illuminating Pier 22 Office. Shades of Croesus and the Maharajahs of kingdoms past and to come! How do they do it? The third one this year of grace: First our beloved "Fattie"—(topographical error)—Hattie M.; next Miss Kewpie G., and now Miss Florence Petero. Big diamonds! Are they all marrying Geewhatawads or Millionbucks?—When I got engaged I paid \$1.50 for the engagement ring; it looked fine at the time (I don't see the Mrs. wearing it any more). The news of Miss Petero's shiner was brought to us from the other office. Again we pronounce the word "CONGRATULATIONS!" Who's next? Please tell the correspondent.

Miss Elinor McDermott sailed for Tipperary, as forecast and scheduled in the May issue of the MAGAZINE. Her popularity is attested to by the fact that on May 18, two days before her sailing, in a downpour of rain, her friends in the claim department and some others crossed the bay to her home on Staten Island, and gave her a "surprise party" that both she and the surprisers will long remember with pleasure. An impromptu musicale and dansant was arranged at which certain amateur artists and artistes distinguished themselves in various ways. Special notice is due the following: Mr. D. Hooper, impersonating Paderewski; Miss "P. K." as Salome; F. Manthey and Miss Schultz, singing; Frank McArdle and Miss Bowne, fancy dancing; Miss Elinor and Miss Rosalie, looking radiant; et al enjoying themselves.

Francis Joseph Duffy, our Accounting Department, has left to engage in business for himself, in the candy trade. May he succeed and from a candy kid develop into a candy king! Nice as a Bon-bon himself, clean and good natured, he *should* succeed. He was liked and will be missed by his fellows here, and particularly by his lunch partner, "the girl he left behind him."

This correspondent stuck his finger, not

into a pie but into the bunghole of a hornet's bungalow when he took liberties with Miss Wilson in the May MAGAZINE. Thus sometimes our good intentions are misconstrued and get us into trouble. Being physically less than nothing, myself, I have always looked with envy and admiration upon those blessed with volume, and the notice given Miss Wilson was meant as a congratulatory compliment. But it seems that as volume is not "en vogue" at present, I missed my mark. And I never thought that such a nice girl as Miss W. concealed a temper. I apologize for being too personal, but cannot retract anything I said, it being the truth.

Montclair, N. J., where "Tom" Bradley is raising a family and "Jim" Lynch expects to, is in New Jersey. (N. J. means New Jersey.) Taxies will take one (or two) to Montclair for a green "V." Of course there are other cheaper means of transportation, but taxies are more comfortable and slower; they will get you there when it is all over and time to go home. This for the benefit of C. H. R. and P. J. O'C.—"Dave" Hooper says there are plenty of taxies in N. J. looking for N. Y. City farmers. (This is contributed and the Correspondent disclaims all responsibility.)

In Memoriam: It is saddening to report the death of a good man, especially so if he is a young man, strong and full of ambition, as was Cornelius M. Toomey, our agent at Wallabout Station, who died on June 1. He leaves a wife and child and a host of friends to mourn his premature "going West." Mr. Toomey began his career with the Baltimore and Ohio at the age of nineteen, in January, 1907, and worked up through the usual grades to foreman of labor at Pier 22. Sterling qualities brought him to the notice of his superiors and secured for him the Wallabout agency in March, 1919. The sympathy of us who knew him goes to his bereft family.

The Careful Crossing Campaign's three-color poster, picturing an impending collision of a fast train and an auto, produces a sensation of horror, a desire to shout, first, and next a lust to throttle the creature at the steering wheel who gambles with death, with the lives of others at stake. The sad part of it is that a person so dead to moral responsibility is impervious to such appeals as the poster carries to normal humans. Perverts of that stamp consider it a mark of distinction to be given the title "dare-

Mistress Mary, quite contrary? No! Her last name is Caffrey

devil;" haven't we heard them boast of being arrested for reckless driving, each arrest another valued "nick in the gun-handle?" Potential murderers, they should be incarcerated as homicidal maniacs.

"Emmy says," says Miss Stevens, that a frown calls 65 facial muscles into action while only 13 respond to a smile. As a "bon mot" it is good and apt to provoke a smile where a frown dwelt before. However, the smile that counts does not call for any facial contortions; it shines from the eyes. It is a spontaneous expression of approval of something pleasant and denotes a mind receptive of the good and beautiful, distinct from the society smirk and the ingratiating smile of the sycophant and the tempter. "A man may smile and smile and be a villain."

A frown is the expression of a mind concerned chiefly with trying to adjust external things to self, instead of trying to adjust self to facts. A frown frozen to the face is forbidding. So is a frozen smile. The perpetual working of the 16 muscles may conceal a vacant mind. The man "who can smile when everything goes dead wrong" is a fanciful poetic fiction. Under such conditions, a man may force his features into a grin, but that is not smiling, it is bluffing.

We present Miss Mary Caffrey, assistant to terminal timekeeper, the girl whose nimble digits tickle the 20-inch "Underwood Standard" to disclose the amounts of next payday's checks (one of the most important jobs on the system; what would we do without them, the checks to wit). Miss C. has many other qualifications besides the following: Age 22, amiable, charming, unattached, heart-whole and fancy-free, she says. (What a chance for someone still beyond the horizon!) We may also add, in confidence, that Miss C. is accomplished in housekeeping duties; she has told the correspondent that sometimes she helps in the kitchen at drying dishes, when she can't go out on account of the weather. She can also pick up and pass to its destination unlimited pieces of candy, while typing, without missing a figure, the while she hums Irish tunes through her nose. She is nice, and we would hate to have her otherwise.

### Staten Island

Correspondent, G. J. GOOLIC

The accompanying picture is of Miss Francis O'Donnell, extra ticket agent.

Random Shots at Pier 22 by Cartoonist Lynch

Left to right: George O'Regan and John V. Costello; St. George Tunnel; Miss Francis O'Donnell, extra ticket agent, St. George

Francis is well liked by everyone and is always there with a smile—just as you see her in the picture.

Here we have a picture of George O'Regan, clerk, Car Accountant's Office, and John V. Costello, assistant chief clerk to Superintendent, Pier 6, St. George. George and John have no creases in their trousers, but since this picture was taken, they sent them to the tailor and had them pressed.

Freight Clerk Frank Avezac is receiving congratulations from his friends on the arrival of a baby girl.

Here is a picture of St. George Tunnel. This is the only tunnel on Staten Island. There are about 430 trains going through this tunnel daily. It is 585 feet long and located just at the entrance of East Shore Terminal, St. George.

**What We Would Like to See in the Division Engineer's Office:**

- J. L. S.—Stop walking the tracks.
- W. E. P.—Get good service on the telephone.
- W. J. V.—Come in late (Impossible).
- F. T. M.—With empty pockets.
- A. R.—Out of a hurry.

- G. J. G.—Stop winning the pool.
- V. C. N.—Stop eating.
- B. I. H.—Wear her red hat.
- P. S.—Stop listening on the radio.
- D. R.—Stop flirting with traffic cops.
- H. G.—"KAKE EATER," eating cake.
- J. B.—Keep from the news-stand.
- H. J. C.—Stop swearing for two minutes.

Our hats off to Agent F. J. Gorman, 26th Street Stores, New York City. On May 31, "Al" Rauscher discovered a fire underneath a plank in the yard. F. J. G. rushed forward with pail of water which he threw on the fire, probably saving the Stores from considerable damage.

William "Buck" Langford, Division Accountant's Office, got his first shave and massage on June 2. "Buck" as he is known, thinks he is the berries now. The boys are unable to hold him.

They spent their honeymoon in New York. The office force extends congratulations.

The following is line up of baseball team organized from our various office forces: Dean, second base; Richardson, short stop; Higgs, first base; Machin, right field; Fox, left field; Mallery, center field; Moore, catcher; Hibler, third base; German and McMillen, pitchers. They started with their first game at Latrobe Park, and by the time this article appears, they expect to be going strong.

Quite a lot of sport is had by the office forces at Camden playing indoor ball during lunch hour; but we understand if "Ed" Hughes continues to make errors and shake the earth, he will be ruled out.

Miss Thelma Thomas, stenographer, is back with us again after a leave of absence because of ill health.

Why the single men won, 8 to 0, in the married men—single men baseball game Decoration Day. This was a championship game played at Clifton Park. The results? See the picture

to produce in minimum time, labels for our index books in the Car Record Office. These are silent evidences of his skill and good will.

His funeral services were held at the home of Charles Block, Eastside machinist, 7103 Gray's Avenue, Philadelphia. Here his many friends and fellow workers called to pay their last respects.

**Washington, D. C. Freight Station**  
Correspondent, W. L. WHITING

Notwithstanding the fact that the temperature is dancing around the ninety-degree mark, our business here keeps up with the thermometer. We are kept as busy as bees running along with the procession of both inbound and outbound freight. This is a good indication of what we may expect during the approaching fall and winter, when things get real busy.

We are, and have been so busy that no one seems to be thinking about vacation. The only member of our force who has enjoyed anything approaching it is our revising clerk, P. S. Smith, who has recently returned from an extended trip through many of the western states; but even this trip was partly of a business nature, and could hardly be termed a vacation. Mr. Smith left Washington for Dallas, Texas, on business, and then started for the northwest, finally landing at Billings, Montana.

We have had one change in our force since the last issue of the MAGAZINE. Our messenger boy, Windsor B. Haga, has obtained a position with a large packing house in this city. He is succeeded by Richard Kearns. We welcome the coming, and speed the parting, wishing both success.

Sealer M. F. Kelly and Delivery Clerk W. A. Keys are still on the sick list. We are optimistic enough to hope to see them around again before long.

Our veteran claim clerk, Jesse T. Carr, reports the arrival of a grandson, who was left by the stork on June 9. Baby weighs ten pounds. Grandpop's head is a little higher than usual.

The World of Mirth show is at present parked in our Yard, although it arrived sometime ago in Washington over another road. Since its next destination is Charleston, W. Va., it naturally had to come to the road that would give it the best service.

**Baltimore Terminal Division**

Correspondent, MARTHA V. FOX

Every man to his own sport, but Dr. Mather's latest fad is pruning the vines around his summer home. Looks as though this would be great sport. Shades of Volstead!

FROM THE STATIONER'S OFFICE

The late William H. Kirman and Robert E. Ward. This picture was taken in 1913. Mr. Kirman died on the following day. Mr. Ward is still very much alive. On the right are Edward Pohler, Herold Fountain, George Ward and George W. Smith. These pictures are owned by Mr. Smith and were kindly loaned by him

Cupid has been again in our midst and this time the victim was Miss E. L. Poyner, Superintendent's Office. On a bright morning recently she entered the office with her left hand bedecked with a diamond. Congratulations! Next time, girls, please let us in on the things, for when they come suddenly they are quite shocking!

Anyone wishing to know how to kill rats will please confer with Mr. Jefferson, Oak Street. We understand that he has recently found a remarkable patent and we hope, Marvin, that this will prove quite a success.

J. H. Keys, formerly interchange inspector, has recently been appointed car foreman, Curtis Bay, vice H. Weiss. We hope success will continue to follow Mr. Keys in his new work. Mr. Weiss left the service to enter the service of the Western Maryland R. R. as district master car builder.

Mr. Sigfoose, assistant shop clerk, Office of Master Mechanic, has left that office to assume a position in the Car Service Department, Brunswick. Brunswick is Mr. Sigfoose's old home and although we shall miss him, we all understand how it feels to be home.

The Baltimore Terminal Division and the Baltimore Division have formed a baseball team. We know that the boys are going to make quite a showing for us.

Mr. Barrett, Yardmaster's Office, Locust Point, has been granted a leave of absence for the summer to assume the position as

pitcher of the Martinsburg League Team. Mr. Barrett pitched for the Baltimore Division in 1920, when we received the silver loving cup for the championship between the Eastern and Western Lines.

**Riverside**  
**The Painter's Trio**

Well here we have our C. E. Sears, Who's been with us for fifty years, Fancy signs? Why that's his work— With Harry Snyder and "Lefty" Burke.

Charlie loves both kinds of chickens, Snyder—how he plays the dickens! And "Lefty" has a hopeless case, He'll play nowhere but on first base.

In married life also these three, Are daddies, so they well agree, But "Lefty" still is out of luck, His mother-in-law he has to buck!

**Bailey's Tower**

Correspondent, J. A. POE, *Electrician*

Here we are again, in again, out again, and going strong!

The junior baseball team of Locust Point has been reorganized with the following line up: C. Miller, J. Hamburg, D. Cohen, J. Oliver, J. Clarke, M. Loeber, T. Woolmer, J. Bryant, W. Mitchel.

Substitutes: Thomas, Long, Abbot, Sours, Boline.

We are here to stay.

We are open for engagements with any strong uniformed team of the Baltimore and Ohio League. We wish to say here

Painters Three—at Riverside

that we have a record of no games lost—and we won't lose any so long as "Heine" umpires and "Ed" Wolfe roots. To satisfy the vanity of our third baseman we are including his name in our line up; at the same time we are ordering a new supply of monkey glands.

The base running of Cohen is not to be overlooked. The same may be said of the batting of Miller; the latter being shown on the score card in all our sporting editions. Recently a decisive game was played with the strong team of the Chamber of Commerce, the result being a tie, 46 to 46. We mention the brilliancy of the playing of "Ben" Frederick and "Caul" Pethpert, and the masterly pitching of Stony Jigman. There is also quite a discussion as to whether or not the pitcher should put bends in the ball. We are leaving it to "Ludge" Handis. Now we feel that we have given the MAGAZINE a full line of "dope" but as a word of warning to McGraw, Huggins, Stallings and others, we wish to impress upon their minds that our players are under contract for an indefinite time. We concede the right to those of last year that are not shown in our present line-up to negotiate.

**Mt. Clare Shops**

Correspondent, MOLLIE S. ALBRECHT

Superintendent of Shops Office

How would you like to go flivver riding home to lunch and flivver riding back again? Don't you think that's a nice way to get cool, and to save shoe-leather? Well, evidently two young ladies at Mt. Clare think the same thing. At 12.05 every day, you can see them waiting for a certain young man, who owns the flivver. They know the license number, and if the little car with the green head-lights and the Washington and Baltimore licenses, isn't there, gloom descends upon the young ladies, and then they get another one of the Mt. Clare boys to run them up the street so they can catch the 12.10 car. Life has its ups and downs, even at Mt. Clare.

"Oh, what is so rare as a day in June! Then, if ever, come perfect days!" I wonder if the author of these lines was a Baltimorean. "Nuf sed!" By the time that this MAGAZINE reaches you, we will probably be sweltering! Then the old swimming pool will be full to overflowing, and the old silk and mohair suits will be out in full glory!

"Pop" Higgs - Pursuing the Elusive "Pill."

Abe Lincoln says—"Camden Station has a real baseball team. Here are some of the stars"

### Sparks from the Flue Plant

Our old friend "Big Sam" Dearing, has been showing us some of the results of his labors on his Elkridge farm, and they are surely some of the finest strawberries we have seen this season. "Big Sam" must know just how to talk to old Mother Earth to coax her into yielding up such berries!

Harry Tarun, one of our baseball experts, took a trip to Washington to get a slant on the re-instated Babe! Harry rises to announce that Babe Ruth is still the "Cheese."

B. Franklin Ellers is in love again! Either that or else he's sick, but we are afraid he has all the symptoms of the former ailment. (Isn't it funny how the ones who have been thus afflicted can so readily detect it in others?)

"Big Sam" Dearing also says all his cherries were sold before they were ripe. Mr. Volstead has certainly boosted the cherry market.

### Axle Shop

This shop is still working away merrily. "Irish" O'Brien has been transferred from the second shift to the third shift, and we are all thankful, for "Irish" was losing weight. Now that he can see his "sweetie" every night, everything is O. K.

### Blacksmith Shop

If I wanted to start at the first of our shops, and, like Diogenes of old, go searching, I wouldn't need a lantern; and I wouldn't look for an honest man, but for a happy man, and, I shouldn't need a light to find one. These kind aren't hard to find at Mt. Clare. Happiness radiates from the faces of just lots of our employes! As I can't write about each and every one of these happy men, and their families, I'll take this little space each month to tell about one.

Coleman Shear, blacksmith helper, Mt. Clare, is the subject of my conversation! The accompanying picture shows Coleman Shear and his girl-wife, just as they looked on their wedding day, and the little picture shows their "family," Fannie Shear, who is five months old.

### Cumberland Division

Correspondent, JOHN J. SELL

Our station and grounds at Harper's Ferry are certainly looking fine these days, having been given a thorough over-hauling. Patrons are commenting on the fine appearance.

Our genial second trick chief dispatcher, "Jake" Miller, has made arrangements to spend his vacation in California's sunny clime. "Jake" says he is going to see just what is going on in Hollywood.

Miss Virginia June Cosgrove, young daughter of Maintenance of Way Clerk E. A. Cosgrove, met with a distressing accident recently, having been struck by an automobile near her home, receiving serious injury. Mr. Cosgrove's many friends are hoping for her early recovery.

Assistant Division Engineer John Edwards spent his vacation on a fishing trip. From the reported size of some of his catches he will return fully competent to cope with the mallet operation on the M. & K. Sub-division.

"Colonel" tells us he is sure of a gusher soon.

The ballast cleaning machines recently put in operation on the division are proving a success. Assistant Division Engineer M. B. Jones is cleaning everything in sight.

"Luke" Burns says they have some team in his office, the Transportation Department, Baltimore; we would like that team to come to Cumberland, where we teach the game. We understand Faustman is some pitcher; oh, well, we will have Fike show him something besides a straight ball.

Miss Lillian Judy has been appointed stenographer, Superintendent's Office, vice R. V. Coulehan, who has been made stenographer to the Freight Agent.

Manager McGinn has a fast team to compete in the City league, recently organized among local teams in Cumberland. We look for some fast ball playing. No doubt time will be available for some games with other Baltimore and Ohio teams on the system.

The following candidates were elected delegates to the Relief Department convention in Cincinnati on June 22 and 23; Russler, Ketzner, Ervin, Mathews, Williams and Gulick.

H. S. Woods, caller, Martinsburg, is some baseball enthusiast. He says Martinsburg has "some" team.

John Ketzner, one of our veteran employes, has a wonderful garden on the Company lot on William Street, and is attracting much attention. All who pass that way comment on the fine line of vegetables being raised. Have a pot of soup some day, Uncle John, and invite us all around.

J. W. Robertson, baggage agent, Cumberland, reports hearing many favorable remarks concerning our service. The best recently was from a traveling man, who stated he had quit eating at hotels except when necessary, as the meals being served on our dining cars are far superior, and much more reasonable.

Two more of our budding romances have reached a head:

Harry S. Lamm, chief clerk to the superintendent of shops, and Miss Mayme Neff were married on June 8. George Prentiss Porter, night ticket clerk, and Miss Ruth Ferguson, telephone operator in our PBX office, were married on June 8. We wish them much happiness.

Our crop of eligibles is slowly dwindling; some of the prospects will have to hurry up, or it will be necessary to hold them over until next year.

The Deer Park Hotel has opened for the season. This popular summer resort has always been attractive to summer visitors, and a busy season is looked for this year.

Agent E. G. McDonald, Duffields, W. Va., is to be congratulated on the fine condition in which that station and its surroundings are kept. Our patrons using his

MT. CLARE PRESENTS  
Mr. and Mrs. Coleman Shear, as they looked on their wedding day; in the insert is the "family" which they have since acquired.

Anna May Trost, Telephone Operator

station find nothing left undone for their comfort and convenience.

Here is a good picture of Miss Anna May Trost, our efficient telephone operator in the PBX at Cumberland. We will say that in addition to being a good operator, she is also good looking.

W. A. Johnson has been appointed super-

visor of icing at our new icing station, Cumberland, which is quite busy now.

The furnaces in the new reclamation plant at Cumberland have been fired and the plant put into operation. It is now rolling some fine qualities of steel; the old rolling mill is taking on a busy appearance. It recalls to the old-timers, the busy days of 1870, when the plant was in full blast.

The Careful Crossing Campaign is now in progress, and the posters which have been placed at conspicuous places all over the country, are receiving much favorable comment. Motorists seem to have entered into the spirit of the drive, to make it a success.

At noon on June 8, George P. Porter and Miss Ruth S. Ferguson were married at Cumberland.

Mr. Porter entered the service of the Company at Deer Park, Md., on March 13, 1918 as agent. He has worked in various capacities for the Railroad since that time. His present position is as ticket agent at Cumberland, to which he was appointed several years ago.

Miss Ferguson was employed as telephone operator in the private branch exchange of the Company in the Queen City Station, Cumberland. She entered the service on November 4, 1918.

After their marriage they left on an extended wedding trip to various western cities. On their return they will make their home with the bride's parents in Cumberland for the present.

Their large circle of friends wish them much happiness and prosperity.

Mr. and Mrs. George P. Porter.

The upper right and lower pictures show the girls and boys from East End School, Brunswick, as they appeared on the day of the Veterans' picnic. Center left shows three little folks from the Catholic School with their teacher. Picture No. 3 gives one of the slogans of the little Health Crusaders

### Martinsburg Shops

Correspondent, W. L. STEPHENS

J. W. Onderdonk, Vancle resville, W. Va., one of the members of Martinsburg Veterans' Association, has been placed upon the pension list after an active service record of 41 years as trackman. The greater portion of his Railroad career was spent working on Section No. 6, east end of Cumberland Division. He served under five foremen, James Willingham, Daniel Sloan, J. W. Barker, J. W. King and C. R. Fulk. Brother Underdonk has always been a faithful and conservative employe, and it was a sad day for him when failing health caused him to retire. May he live for many years to enjoy so well earned a rest!

The local Y. M. C. A. and several industries have arranged a city baseball league. The shop boys, under the guidance of Train Master Tonry, have formed a team and are playing in the league. The locals and the Baltimore and Ohio have played three games, losing two and winning one. The boys are putting up a good game under the leadership of Manager Hobbs. The players are: Leonard Hobbs, manager; Alonza Edwards, Roy Townsend, Emory Cline, Robert Banks, Leon Riner, Marshall Mahony, Arthur Fey, Raymond Jackson, Rodger Brown, Charles Minor, Edison Baker, James Cody, Noah Walker, Harry Everhart.

We hope to see the boys make a good showing in the league. A loving cup has been donated as a prize.

John O'Leary, Baltimore and Ohio Veteran, died suddenly on June 7. He had been in failing health for some months but his condition was not considered grave. He arose at his usual hour and had dressed himself when he fell across the bed and expired. He was born at North Mountain on April 23, 1868. For many years he has been a resident of Martinsburg. In earlier life he was a Baltimore and Ohio engineer but for the past few years had been a section foreman. A widow and eleven children survive.

The deceased was a member of the Martinsburg Chapter of Veterans. He was a faithful member of St. Joseph's Catholic Church. The funeral services were held there on Friday, June 10.

Our old friend and fellow workman "Charlie" Davis intends to enjoy life after working hours. He has purchased a fine automobile. "Piney" Auld claims it is not a good one, but "Piney" said he could tell more about the running qualities of it if "Charlie" would take him for a ride. The trouble is, Davis says, that "Piney" will never be able to tell, as he will never remember taking a ride in "Charlie's" auto.

Our shop safety first committeeman, Harry Oliver, is happy these days. Harry is a great baseball fan, and takes a great deal of interest in the Blue Ridge League. He is one of the leading stockholders in the league; but the trouble with Harry, so his old friend Ray Russler claims, is that he gets so excited about the game that he cannot wait until the crowd gets through the gate but purchases a ticket and jumps over the fence.

P. S.—We are indebted to "Piney" Auld for helping us out on the foregoing notes.

### Paw Paw, W. Va.

Correspondent, M. L. SHARON  
*Pensioned Engineer*

In our last letter to the MAGAZINE, we stated that there would be an abundant harvest of fruit, but He who changes all things has ruled it otherwise. A sudden change in the weather to freezing has wiped out all of the smaller fruits and a great part of the apple crop. This makes a hardship for all, but particularly to the orchardist. Let us hope for the best. Maybe the apples will be larger.

We are sorry to chronicle the death of one of the oldest citizens of this community—Edward Doyle. Mr. Doyle was a pensioned engineer, who, after a long and useful life, has passed to the City Beautiful. "Ed," as he was generally known to his associates, spent practically his whole life in the service of the Baltimore and Ohio, first as a track hand at Orleans Road. As nearly as

we can discover, "Ed" was nearing his hundredth milestone.

He leaves two daughters, Mrs. E. O'Brien and Miss Nellie Doyle, a daughter-in-law and four grandchildren. All of these have our sympathy. The funeral was largely attended by members of the Brotherhood of Locomotive Engineers and of the Veterans' Association, of which Mr. Doyle was a member. Interment was made in the Catholic cemetery at Little Orleans; funeral services were conducted by the priest from Hancock, Md.

The season for fishing is now open in this state, and all kinds of fish seem to be plentiful. Your correspondent has everything ready for a hike to the Great Cacapon and to the Potomac; we're only waiting for our old friend, "Joe" Linthicum, to put in his appearance with a big basketful of good eats and a few other little incidentals which it is not necessary nor appropriate to mention, yet which insure a good time. Come on, "Joe!"

Your correspondent was in Martinsburg a few days ago on a business trip, seeing old friends and having a good time in general.

One of the Radcliffe Chautauquas is now in our town for three days, giving the people some fine lectures and plays, which are very entertaining. Of course, they are travelling via the Baltimore and Ohio, as they should.

### Keyser, W. Va.

Correspondent, HARRY B. KIGHT  
Assistant Terminal Trainmaster and Mrs. Virts have been on an extended trip through the West.

West End Brakeman "Bill" Thrush, whose two beautiful teeth were mentioned in the April issue, read the account, and straightway went down street and had "Doc" O'Donnell, yank the remaining two out and make him a whole new set. It really has improved "Bill's" looks.

For the benefit of the employes and the public as well, Ticket Clerk Kight secured more than one hundred beautifully colored stereopticon slides of the great Yellowstone Park, and requested Manager Thrush of the Liberty Theatre to run them. Mr. Thrush, being one of our Baltimore and Ohio boosters and a booster for the town, consented, and featured these slides with his matinee and night show, on May 22. Mr. C. G. Scribner read the lecture. We thank Mr. Thrush and Mr. Scribner for their cooperation and hope that these pictures have awakened an interest for the great Yellowstone and that perhaps it will get us some business.

Frank and Lee Allen, Keyser.  
Mike and Ike, they look alike

We find the general public always ready to cooperate with us in our work, and in this connection we desire also to thank the Manager of the *Mineral Daily News* because of his readiness to publish everything of interest.

The other day I heard a conversation between two employes about waste—waste that is used in keeping things clean and for other purposes. They were talking about the quality of waste. Said one, "What do you know about waste?" and the other fellow went on to tell him. There is another kind of waste, too, and it is about as important as the waste these fellows were talking about. It is the waste of time, material, money or anything else. Let's eliminate WASTE of this kind, and go as easy as possible on the engine cleaning kind.

Carpenter Foreman Appell has moved his family from Martinsburg to Keyser and Keyser is proud to have them make their home here.

A traveling man recently came to my ticket window and told me of an incident which came to his attention on one of our trains a few days ago, and which I believe is worth repeating. An aged, crippled lady boarded our train No. 36 (in charge of Conductor D. W. Mohler) at Oakland, her destination being Cumberland. Captain Mohler and the brakeman assisted her on the train and at Cumberland, Captain Mohler, still thinking of her, made it his business personally to assist her from the train. When she was safely on the station platform, she turned to Mr. Mohler and said, "Captain, that's the nicest I have ever been treated on a train." This is truly Baltimore and Ohio service and Captain Mohler is one of our conductors who believes that "our passengers are our guests."

At the passenger station, there are gates, put there for the safety and protection of employes and the public as well. These gates are of no service unless they are kept closed, except at the proper time, when they have to be opened to get to the passenger trains. Trainmen and others using them

**DEPOSITS \$1,055,260.26**

**The First National Bank**

**Keyser, W. Va.**

**SPECIAL SAVINGS DEPARTMENT**  
Interest paid every six months  
from date of deposit

should not leave them standing open, as some of them now do, but should think of the safety of their fellow men, and keep them closed. Please cooperate with the station employes in this matter, fellows, and let's live up to our motto, "Safety First."

Yard Brakeman "Grandpa" Leith underwent an operation at a Government Hospital in Washington. Latest reports are that he is recovering nicely.

Overheard on the station platform at Keyser. "Bob" the porter, speaking: "Who marked that train up twenty minutes late? Better 'rect that 'stake!" Good for "Bob."

In the May issue of the MAGAZINE we read of the rail reclamation at Martinsburg. Much money is being saved at Keyser by the reclamation of material. For instance, tin car roofs that are removed are put through a machine that trims off the rough edges, straightens the tin and by reclaiming three of these roofs, two new roofs are saved. This, alone, means a saving, and with the cooperation of all the employes, much material that once was scrapped is now saved.

Dr. English, medical examiner, Baltimore, relieved Dr. Biser, our local medical examiner for a couple of weeks while Dr. Biser took a vacation. By the way, have you noticed "Doc" Biser's farm in his back yard? Looks as if he will not have to buy any vegetables for a long time, if the cut-worms don't beat him to it.

We extend our sympathy to Clarence Washington, freight house trucker, in the death of his son, a few days ago.

The first agent ever stationed at Keyser, Colonel T. B. Davis, later ran for Congress and was elected. Now the last agent, Mr. Stover, is after the same office, and though we would hate to lose so good a boss, yet we're hoping that he will reach the goal.

The hotel buildings and station at Deer Park Hotel have been freshly painted and the grounds put in excellent condition for the coming summer season.

The Carmen's Band gave a concert on Community Lawn, just back of the Passenger Station, on Saturday night, May 27, which was much enjoyed by the citizens of the town.

We are glad to see our old friend, Conductor "Bill" Lindsay, around again. "Bill" was using a shovel about two months ago and a blister formed on his hand. He picked the blister, blood poison set in and "Bill" nearly lost an arm.

Keyser is proud, and justly so, of its City Fire Department and of the Fire Department of the Baltimore and Ohio. Both of these organizations are composed of volunteer firemen and there exists among the members a spirit consistent with the highest type of manhood. On Sunday, June 4, the Baltimore and Ohio Fire Department held a memorial service at Queen's Point Cemetery in memory of Leo Brotmarkle, W. A. Dawson and "Billie" Wells, former members who have crossed the Great Divide. Reverend Charles L. DeLong officiated. The graves were completely covered with flowers.

"Community Park," the lawn between the Passenger and Freight Stations, has taken on a beautiful appearance by the addition of sixty beautiful geranium plants, furnished by the Civic Club, through the Watercliff Greenhouses. Mr. Philipps, proprietor of these greenhouses, took especial care to furnish the best plants that he had in view of the fact that our Civic Club was presenting them in an effort to help beautify the lawn.

"Community Park" is one of Keyser's

GREEN SPRING SNAPSHOTS

In the picture on the upper left we see the supervisor measuring some big fat ties; on the right are Amy Jewel and Edward Wesley, children of Treating Engineer and Mrs. J. C. Alexander. In the insert below are Safety Agent W. D. Lenderking and Arthur D. Gans, who exhibited the safety movie; also Marie and Carol, children of Commissary Chief and Mrs. Passapae

Please mention our magazine when writing advertisers

beauty spots and with the cooperation of the citizens of the town, the station employees want to keep it so—*Mineral Daily News*.

Mrs. P. G. Ervin, wife of chief clerk to Trainmaster Welshonce, is visiting with her children, at Mendon, Michigan.

Captain John Edwards, Jr., our efficient roadmaster, spent his vacation at Washington and Atlantic City.

It is with deep regret that we announce the death of Yard Brakeman John Virts, at the Hoffman Hospital on June 8. We extend to the bereaved family our deepest sympathy.

### Timber Treating Plant Green Spring, W. Va.

Correspondent, E. E. ALEXANDER

It is most pleasing to note the effort made by some of our residents, nearly all railroad employes, to improve the appearance of our town. Much has been done recently but much is yet to be done and there are still some who have made little effort to help in the good work! From a hamlet without church or school at the time the Plant was built, Green Spring has grown to a thriving village with a population of about 375, about 70 dwellings, two excellent churches, a school and several modern, elegant homes.

Former Clerk R. G. Smith was recently appointed agent here. We are glad to see Ralph get this promotion and wish him continued success.

Switchman W. F. Kesler, Treating Engineer J. R. Myerly, Clerk F. A. Sebald and Tieman W. Grove and H. S. Roach were elected rotating members of our Safety Committee at the May meeting. The retiring members are: Craneman Guy Crites, Narrow Gauge Engineer R. Montgomery, Stationary Fireman J. R. House, Standard Gauge Engineer H. S. Long and Tieman R. H. Corbin.

If you missed the M. E. Ladies Aid Supper at the Commissary on May 15, you missed a feast. And it was only 50 cents. (Ask Stottlemeyer and Gross; they were there.)

The Cross Tie-gers have reorganized and are playing fast ball. With Chapman, Harry Keister and James added, they claim an air tight infield. We also have the "Cubs" and "Midgets" in the field this year.

Evidently some of our reporters are falling down. We have heard of several births recently, but no names or dates were fur-

nished us. Speak up, fellers an' 'spress yourselves!

Treating Engineer J. R. Myerly has purchased an elegant home in Cumberland and has joined the band of employes traveling back and forth from that city.

Tieman Richard Parry, pipefitter by trade, has secured a position in Wilmington, Del., where he has moved his family. Good luck, Dick!

Somebody said that Earl Robinson was married. Did anybody get the particulars? We didn't.

Lieutenant Paul S. Wilkins, U. S. Air Service, recently created quite a furore when he landed on railroad property, adjacent to the Plant, leased by V. L. Myerly, in search of an emergency field. Our force was disorganized for awhile.

Mrs. W. G. Haines, wife of our blacksmith, recently underwent a minor operation at the Alleghany Hospital. She is now getting along nicely.

It is with regret that we report the death of Mr. Hugh Kinkead, father of Tieman John Kinkead, at Springfield. Mr. Kinkead was 89 years old and well known in this community where he had lived. Burial was in Springfield Cemetery.

Mrs. G. W. Barrager and daughter Evelyn entertained with music at their home on Thursday, June 8. A delicious strawberry luncheon was served. Those present were: Mr. and Mrs. Alexander, Mr. and Mrs. Stottlemeyer, Mr. and Mrs. Passapae, Miss Florence Skelley, Miss Grace Skelly, Miss Margaret Twigg, Harry Keister, A. C. James, William Kesler, W. M. Chapman, G. C. Conley.

Moore Keppel & Co., Garland, Pa., have completed their railroad from Moorefield, W. Va., up the south fork of the South Branch River, a distance of twenty miles. It is estimated that the 40,000 acres now owned by Moore Keppel & Co., will yield 4,000,000 standard railroad ties and a large quantity of lumber, and that the total number of ties which will eventually be carried by the new road will exceed 15,000,000. The lumber of all kinds will probably amount to 700,000,000 feet.

### Connellsville Division

Correspondent, O. E. REYNOLDS

Yardmaster H. R. Humphrey, Connellsville yard, spent his two relief days during the first part of June visiting along the

Potomac River, near Brunswick, angling for the fishes. Catch any, "Harry?"

P. C. Dix, division claim agent, is now located on the fifth floor in the Second National Bank Building. Until recently his office was located at Rockwood. This is better; we can get him now when we want him.

On May 10, Miss Rose Mary Soisson and James Kelley Corvin, a well known couple of South Connellsville, were wedded at Cumberland. The bride is a daughter of Yard Brakeman and Mrs. William Soisson of Second Street, South Connellsville. We extend our best wishes.

Car Foreman George W. Matthews, Somerset, Pa., and Mrs. Sophie Wessels, M. C. B. clerk, Master Mechanic's Office, Connellsville, were united in marriage on May 31 at Uniontown. While the Master Mechanic's Office loses a valuable clerk, Mr. Matthews profits by the transaction in securing a valuable assistant to help him fathom out the mysteries of the car department matters. The couple will make their home in Somerset. The best wishes of all on the Division be with them!

Machinist Helper J. P. Geisler, Connellsville Shops, and Miss Madeline Krob, Connellsville, took a quiet trip to Cumberland on May 31, and were married. They took a short trip, returning to Connellsville later to advise their friends and acquaintances. That they may both enjoy a life of peace and contentment is the wish of their many friends!

Miss Zona McCarthy, aged two years, is shown posing among the chickens at Kane, Pa. Here she had been taken by her parents, Mr. and Mrs. E. J. McCarthy, of McKeesport, Pa. Zona is the daughter of the former Miss Della Patterson, who previously worked for our Company as a clerk in the Yard Office, Connellsville. The little one is also a niece of Miss Violet F. Patterson, M. C. B. clerk, Master Mechanic's Office, Connellsville. From what we understand, the young lady in the picture will, some of these days, grace one of the offices of the Company. She is endowed with blue eyes, rosy cheeks and brown hair.

Second Trick Operator Charles Brady, Johnstown, recently spent an extended vacation in the south and west. While away his place was filled by Miss Gertrude Boyer.

**CHICKENS 'N OTHER FOLKS AROUND CONNELLSVILLE**

Upper Left: The sweetest in the flock is little Zona McCarthy. Upper right: Blacks with H. Dinsmore. Lower picture, left to right: Blanche Stafford; "Johany" Shallenberger, janitor, Westbound Yard, Connellsville; four-year-old Robert C. Bittner

Here is a photo of Robert C. Bittner, aged four, son of Conductor and Mrs. A. H. Bittner, Rockwood, Pa. Aaron says he is "some boy."

We are sorry to report the recent death of Miss Florence Cummings, who first entered the service as telegraph operator on March 1, 1880. She was in continuous service until her death.

Here are photos of Misses Blanche Stafford and Thelma Camper, stenographers in the division offices, posing for the cameraman while on a recent trip to the mountains.

W. C. Bressler, agent, Paint Creek, is seriously considering joining a circus as a snake charmer. His friends are firmly convinced that he can qualify. The conviction came recently after a little stunt performed at the Paint Creek Station. Following the heavy rains, a big black snake measuring around six feet, put in an appearance near the station. Using a forked stick Mr. Bressler wrapped the reptile around his arm and exhibited it to friends. The snake didn't bite him and today his friends are marveling.

Here you see our cartoonist's sketch of Miss Beatty Fornwalt, our well known stenographer, Superintendent's Office.

On May 13 Superintendent Brown issued a circular letter to all agents on the Connellsville Division, relative to securing additional business for our Company; therefore,

to inform everyone interested in the "Best and Only," we produce the following from our agent at Boswell, Pa., indicating what Clerk T. O. Imhoff is doing: "Mr. Brown: I take pleasure in advising you that Clerk T. O. Imhoff, on learning party of foreigners at Jenner, Pa., intending to go via bus to point on competing line, thence to Chicago, personally solicited for our own line. As a result, on June 6, we sold them three whole and two half tickets, amounting to \$82.13. The company will also benefit by its share of two large express shipments made by the passengers."

"Mr. Brown: Supplementing my letter June 6, wish to advise that Clerk Imhoff, upon learning of a foreigner who intended to go to Johnstown via bus line, thence to Akron, Ohio, solicited for our line. Mr. Imhoff had to get some others to interpret for him, but after several attempts he secured the passenger."

The accompanying picture is of Blacksmith H. Dinsmore, Connellsville Shops. Harry, as he is known by his long list of friends, is rounding out a service record of forty-four years continuous service with the Baltimore and Ohio, all of which has been spent at Connellsville. Mr. Dinsmore first entered the service of the Company on September 20, 1878 as a blacksmith helper under Master Mechanic J. E. Sampson. At that time the shop was located at the point where the Connellsville passenger

station now stands. He served as a blacksmith helper until October 1, 1882, when he was promoted to blacksmith. This position he held until April 1, 1910, when he was placed in the supervising capacity of blacksmith foreman. This position he held until February 23, 1921 when, with the re-organizing of the supervisory forces account of the business depression at Connellsville, the position of blacksmith foreman was abolished and he started back as one of the craft.

Mr. Dinsmore was born in Mt. Pleasant, Pa., on July 7, 186. His age of sixty-one years is not reflected in the picture or in his personal appearance. He is an ardent "Veteran booster" and was recently presented with a forty year service button by that association. Filled to overflowing with loyalty to the Company, and good fellowship from a natural disposition, he is very popular with his fellow workers.

(See page 64 for additional Connellsville Division Notes.)

**Pittsburgh Bowlers Celebrate**

The second annual dinner of the Baltimore and Ohio City Office Bowling League was held at the Hotel Henry on Tuesday, April 18, at 6.30 p. m. It was a great success. The program was an excellent one.

The affair was opened with a march, furnished by Mar-h's Orchestra and all members and officials marched into the banquet hall. After all were seated, our worthy president, Earl Tovey, delivered a short address. Dinner was served and the entertainers were then called upon. The Three Dancing Beauties ("Les-Belles Francais Tres-Chic-Oo-La! La!") made merry with singing and dancing. The Superior Quartette also furnished an excellent program. The speakers for the evening were: G. W. Martin, superintendent of terminals; C. W. Gorsuch, transportation assistant; R. M. Van Zant, our newly wedded freight representative.

Mr. Martin made the presentation speech, presenting to Joseph Rausch and team a beautiful engraved trophy, as a reward for their success in defeating the rest of the teams during the past season. "Pat" Griffin and Earl Tovey recited a dialogue entitled "Mr. Finkelstein making a sale," which took the guests by surprise. The "Big Five Brotherhood"—Messrs. E. B. Walsh, T. M., Keystone Fertilizer Co., O. J. Bertram, A. T. M., Wilkinsburg Stock Yards Co.; J. Maginn, G. F. A., S. S. & V. V. R. R. Co.; T. Walsh, T. M., Galvanized Pretzel Co.; E. Dodds, T. M., Fifth Avenue, with their little sketch and their good vocal talent were the sensation of the evening. Smokes were furnished throughout the entertainment.

The program was concluded by our president, who delivered a short address of thanks to the committees which assisted him. The officers for the coming season were elected as follows: Entertainment Committee, M. A. Greenwood, chairman; S. Burns, J. Rausch, C. J. Weaverling, F. W. Boolus. President W. E. Swank; secretary, Joseph Rausch; treasurer, M. A. Greenwood.

Correspondent, J. F. MILLER

Conductor J. F. Boyd, Foxburg, is working hard to land a party of twelve via Baltimore and Ohio, Foxburg to Providence, R. I., and return.

In April, Engineer A. L. Thompson, Butler, was directly and solely the moving spirit in securing two and one half tickets via Baltimore and Ohio from Butler to Colorado Springs and return. Mr. Thompson took his own time to come to ticket office, order the tickets, arrange for Pullman accommodations, etc.

Abraham Martin is the latest versatile acquisition to the wracking force. He is combination man, jack-juggler and cook. "Abe" does not walk in his sleep, but he walks while others sleep, or while they try to. He is the best bean cooker outside Boston. In order to allow the beloved "Abe" to indulge his nocturnal pedestrian proclivities and still make it possible for the balance of the crew (2) to get a little 'hay,' roller skates with rubber rolls, greased pole and numerous other devices have been suggested. The contest is still open.

Agent George Edmonds, Kane, who has been off duty for several months because of serious illness, is again back in his old place. Kane will never be at home without Edmonds. We are glad he is back and hope that his recovery is thorough and complete and that he will be with us for many years to come.

Left: Retired Matron Mrs. Marie Moore and her little grand-daughter. Right: General Foreman P. J. Leonard

Miss Claire Rea, Freight Office, Butler, took a trip to Mercer on June 1. It is now learned that at this time she became the bride of Mr. D. E. VanDyke, the coming Babe Ruth, who is at present in the employ of the Harmony Railway Co. After a short honeymoon Mrs. Van Dyke returned to her position; she will remain here for a while. Mr. VanDyke is lucky, and when the time comes for the parting Butler Freight Office will lose one of its most efficient, genial and beloved members.

**Glenwood Round House**

Correspondent, MARY E. BREEN

The chummy looking little chap is Charles E. McGann, Jr., age nine months. His daddy thinks he's going to be a pugilist. Judging by the present outlook, his hopes should materialize.

One of the groups shows Mr. and Mrs. J. F. Gibson, and family: Elizabeth, "Jud," Lillian and the youngest, "Steamboat," who acquired his title from the fact that his real name is Robert Fulton. Characteristics of the family (judging from the picture): Elizabeth, pretty strong on the lungs; "Jud," happy-go-lucky; Mary, inclined toward bashfulness. We haven't a good line on the youngest as "Gibbie" puts his nights in at Glenwood Round House instead of Gibsonia. As a consequence he doesn't get much exercise in the way of walking the floor.

In the other group, you will find "Nick" Yost, "Red" Ternent and (take a good look) "Bill" Spohn and Isabel. Would you like to know about Isabel? Well, I've promised "Bill" not to tell but I'm so afraid that the walking at Gibsonia doesn't at all agree with "Bill" for he falls so hard. Imagine getting yourself on a picture like this with your arm (by the way, "Bill," why not use the other one?) all wrapped around a young lady and on such short acquaintance!

**The Conscientious Scot**

"An enterprising drummer," says a New York business man, "once attempted to bribe an old Scotch merchant by offering him a box of cigars."

"Na, na," said the old chap, shaking his head gravely, "I canna' tak' 'em."

"Nonsense," said the drummer. "If you have any conscientious scruples you may pay me a quarter for the box."

"Weel, weel," said the old Scot, "I'll tak' twa boxes."

—North Shore Bulletin.

I've been delegated as a Committee of One to ascertain from Machinist I. R. Border why he rides a street car, route No. 56, nightly to Hays Boro. If it was a girl who was doing this, I would be inclined to think that maybe she had a crush on the conductor, but it must be something interesting on the other side of the bridge. Border, will you please straighten this out?

The annual clean-up has left our office something good to look at, for with its new coat of green (so refreshing you know) one feels so-so just looking at it. Mr. Mc-

**SOME OF THE FOLKS WHO MAKE US PROUD OF GLENWOOD**  
 1. First and third trick baseball teams, Glenwood Roundhouse. 2. Charles Edward McGann, Jr. (see notes). 3. Mr. and Mrs. J. F. Gibson, plus their interesting family. 4. Here are Nick Yost, Margaret Gibbons, Red Ternent, Mary Cassidy, Bill Spohn and Isabel Gibbons. Look 'em over!

Gann has also moved into his new private office, which was formerly occupied by the road foreman but has now been painted, scrubbed and shined until it looks like a dream of its former self. Drop around to see us sometime, everybody.

On an evening, not so long ago, I became almost reconciled to the daylight saving plan, for I thought it would be my opportunity to see a wonderful baseball game. With that thought uppermost, I went to Burgwin to see Glenwood Round House first and third trick teams play. Such a game! It was pretty tight but oh, the after effects (had a bum throat for a week and rooting for the wrong team at that)! The score wound up 5-4, in favor of the ball players, I mean Captain "Bill" Glase-man's third trick team. Here are some of the boys on the second and third trick teams. Look 'em over, pick 'em out, but in your choice, be careful girls, for some of them are married.

And, what do you think of that Harry Long haircut? Believe me, Rudolph doesn't stand a show alongside of Harry. Harry has had his side burns completely removed. It's all right, H. P., you can't have hair and brains, too.

Allegheny car yard has been beautified by planting some flowers at the Carmen's drinking fountain. Flowers and ferns have been placed at each corner and a hanging basket has been suspended from the roof above the drinking fountain. Some class to the car foreman at Allegheny!

The Grim Reaper has made his appearance among us and taken "Smiling Jimmie" Doyle of the Stores Department. He met with an untimely death on the evening of May 12, the details of which are familiar to all our employes at Glenwood. "Jimmie" was buried at Calvary Cemetery on May 15, and having been recently discharged from the United States Army, he was given a military funeral, which was attended by scores of his friends. His passing has left a vacant place in our midst. We extend our sympathy to his family.

We also extend sincere sympathy to Engineer Fred Poorman in the loss of his wife as a result of burns sustained when her clothes ignited from a stove in her home. Mrs. Poorman suffered severely, but for a time hope was held out for her recovery. Mrs. Poorman is survived by her husband and two children.

For a few days, it has been rather desolate to call the Caller's Office and not to hear the usual cheerful voice of "Bill" Irwin, who has been on the sick list. We saw "Bill" the other day and we are inclined to believe that it will only be a few more days until he is on the job again.

Engineer W. N. Hollis has also been off duty for several weeks because of illness, but the latest news from the firing line is that he is recovering rapidly and will possibly be batting out the extra board soon again.

### Monongah Division

Correspondent, CECIL B. BAKER

Agent T. M. Gillum, Shinnston, W. Va., who on August 1 will have been 20 years in continuous service on this division, enjoyed a week's vacation, visiting his parents and renewing old acquaintances on the Charleston Division. He was relieved by Extra Agent Miss Nina Ford.

Mrs. E. E. Satterfield, who in last month's MAGAZINE was reported as having displaced Agent McIntyre at Haywood, W. Va., has likewise been displaced by S. H. Hines, operator at Lumberport.

We are sorry to report the illness of Agent Hardesty, Lumberport, who at this time is off duty, being relieved by Extra Agent Miss Nina Ford.

Extra Agent R. Long was recently called to West Union to relieve Agent Foutty, who is off duty because of illness.

Local Conductor F. H. Brumage, running between Fairmont and Clarksburg, who has

been attending the Conductors' Convention at Cleveland, Ohio for the past two or three weeks, has returned to duty. He was relieved by Extra Conductor W. H. Nicholas, who since has been assigned to the Clarksburg-Fairmont Highball.

Operator E. Wilson, Chiefton, was a recent Sunday visitor at Weston; we understand he is taking medical treatment for his hearing, which, we are glad to report, is improving nicely.

General Foreman S. J. Tighe, West Fork Shops, is the proud grandfather of a ten-pound grandson.

It is with pleasure that we quote the following letter received by General Foreman Tighe from the Commissioner of Labor:

CHARLESTON, W. Va.

April 15, 1922

Mr. S. J. TIGHE, General Foreman  
Baltimore and Ohio Railroad Company  
Clarksburg, W. Va.  
Dear Sir:

Factory Inspector Thomas W. Williams, of the Clarksburg District, writes this office that he has recently inspected the general repair shops of the Baltimore and Ohio Railroad Company and has found the shops in excellent condition, the machinery safeguarded, and the sanitary conditions of the best.

It gives this department great pleasure to compliment you upon the interest you have taken in this important work, and your efforts in the elimination of hazards should meet with the approbation of the workmen and officials as it does with this department.

Very truly yours,

(Signed) G. F. DAUGHERTY  
Commissioner of Labor

Douglas Fleming

Machinist Helper A. Curella, Clarksburg W. Va., is the proud father of an 8-pound girl. He only has been father nine times; the father of six boys and three girls.

Guy Powell is also wearing a smile over the arrival of a fine baby girl.

Night Foreman W. H. Longwell, West Fork Shops, went to Baltimore to get married. We hope that now that he is married he will work more steadily and not be putting up any excuses to get back to Gassaway.

P. Temple, box packer, Clarksburg, W. Va., better known around the shop as "Old Maid," is still cracking his "Harding jokes."

We hope that "Joe" Schutte's wife and daughter will soon come back from California where they have been visiting for the past year and six months. "Joe" looks lonesome.

"Caller" O. B. Buffington has just purchased a new car. If it doesn't break up before he learns to run it, it will be a pretty good one.

We are sorry to know that Local Storekeeper C. C. Gillespie, Clarksburg, W. Va., is now in the Walter Reed Hospital, Washington, D. C. We hope for his speedy recovery.

Quincy Edward Myers, third trick operator, Tygarts Junction, took a week's badly needed rest. H. O. Alderson officiated during "Q. E's" absence.

"Somebody ought to find a good use for old ties—both railroad and neck."—*Pathfinder*.

J. C. Bishop, H. E. Knight and "Hillard" G. A. Hannan have their lunch and Java at the Dew Drop Inn, River Street, Tygarts Junction, regularly now.

A. McCoy and H. H. Poling wear pleasant smiles since their Sheffield motor, for use between Tygart Junction and Belington, has been returned from the shops.

Car Repairman John Waters is out again after a few days' illness. Glad to see you, "Hot Box."

The accompanying photograph is of Douglas Fleming, Fairmont, W. Va., vaudeville performer, and son of Veteran Engineer Harry S. Fleming. Douglas entertains at all of the Veterans' social events. He gave much of his time to promoting and producing the Railroad Folks' Charity Chautauqua, held in Fairmont, June 15 to 17, inclusive.

### Grafton

Mr. and Mrs. Clarence Dotson spent a few days in Chicago during May, attending the Fuel Conservation meeting. Mr. Dotson is our efficient road foreman of engines on the Monongah Division.

### Charleston Division

Correspondent, M. W. JONES, *Secretary to Superintendent*

When freight is thick upon the floor, and worse is yet to come,  
When someone slams the big front door, and slams it on your thumb,  
When everyone with stuff to shop acts mean enough to bite,  
It pays to wear a smiling lip, AND BE POLITE.

When some big shipper raises H—, because his shipping clerk  
Has shuffled on your luckless head the blame for his own work,  
And hustles down to raid the place, just spoiling for a fight,  
It pays to pull a merry face—AND BE POLITE.

And when some lady wants to know the cause of such delay  
And doubts your word and tells you so, no matter what you say,  
Though you may itch to tell the dame to run and fly her kite,  
It pays to grin right through the blame—AND BE POLITE.—*Exchange.*

Business on the Charleston Division continues to hold good. During the month of May, loads originating on the division numbered 6909, as against 5,792 in April, this year, and 4,239 in May, 1921, this being the best month we have had since October 1920, the banner month of our existence.

Recently our friend W. C. Donnelly, supervisor Time Service, dropped in. In our office we have a clock with the legend underneath in neat black letters, "Standard Time." Unfortunately for our reputation, a few minutes before he arrived, the clock had stopped. Friend Donnelly, being an advocate of the "Observe, Think and Act" slogan, marches in and stands under the clock. Compares with his watch, and turning to his auditors asks if we will do something for him. Of course we all say, "Sure." Whereupon he remarks, "Please change that sign under the clock to read "Standing Time" instead of "Standard Time." Imagine our feelings!

We extend our sincere sympathy to the family of Yard Brakeman Lee Wilson feston, in their sad bereavement. Lee

was working his usual night turn, and in some manner fell from the top of a car. He was run over and instantly killed. He was a likeable fellow, highly thought of by his superiors and fellow employes alike, and with his widow and three children, we mourn his loss.

"Teach me to feel another's woe  
To hide the fault I see,  
That mercy I to others show,  
That mercy show to me."

In our art gallery this month we show a photograph of Mrs. C. E. Blake and her baby. Mrs. Blake is the wife of C. E. Blake, sectional stockman, Stores Department. Mr. Blake has been in our service 12 years.

We also show you Rose Helena Farnsworth, the four year old daughter of Engineer Farnsworth, Buckhannon Yard. Mr. Farnsworth has a record of 24 years of service with us.

Miss Bernadine Tierney, for two years with us in the Superintendent's Office, has resigned. Because of the death of her mother it is necessary that she remain at home to look after the household. Of a bright and sunny disposition, we will all miss her smiles among us. We wish her every success in her new undertaking. Miss Tierney is replaced by Miss Gladys Tivey, Weston, a new comer among us.

A very interesting investigation was recently held in Weston by Chief Dispatcher Staples and Chief Clerk Schide at 8.00 a. m., on a Sunday morning. We think our readers will agree it is worth reproducing. It was transcribed verbatim by your reporter.

Mtrs., Adrian, Mich.

with this investigation. You had better "come clean," Mr. Brown.

Mr. Staples: Mr. Brown, is it a fact that you decided to take a certain young lady admirer of yours for a ride before you had learned to drive?

A. Well—I took one out last night, yes.

Q. Mr. Brown, have you a copy of the Safety Rules?

A. Yes sir.

Q. Do you thoroughly understand them?

A. Yes sir. Safety above everything, that's my motto.

Q. Tell in your own words what happened on the bridge.

A. Well, I was coming along at a speed of about three miles per hour, when we came to the covered bridge out near Poke Creek. I saw another flivver coming along with a man and a young lady whom I know quite well in it. This "got my nerve," and instead of attending to what I was doing, I was making signals to the girl to get away or be in bad with me forever. In a word, I hit the side of the bridge.

Q. What action will you take, Mr. Brown, to avoid such accidents in future, and what damage did you do?

A. I have asked the county court of Lewis to widen the bridges by about eight feet. I will try to keep my eyes on the road in future, and the only damage done was to my dignity as a driver.

In concluding the investigation Messrs. Staples and Schide impressed upon Mr. Brown very strongly the importance of keeping in the roadway, not attempting to take young ladies with him before he could

PLAYTIME ON THE CHARLESTON DIVISION  
Left to right: Mrs. C. E. Blake and her charming baby; Barney Jefferies, on Elk River, Holly Junction, W. Va., with a string of bass; Bright-eyed Rose Helena Farnsworth, Buckhannon, and her baby doll

Please mention our magazine when writing advertisers

drive, and sentenced him to read the Book of Safety Rules once every day for the next six weeks, at the end of which time he is to appear for further examination. If he passes he will be furnished by them with a certificate as an expert auto driver, after which time he may escort his numerous lady friends for drives in Weston and its environs. Through the courtesy of these two gentlemen also, the claim for damages to the bridge made by the authorities has been cancelled. We hope Mr. Brown appreciates what they have done for him.

A. H. Spurrier, formerly of the General Offices, Baltimore, recently accepted a position in the Gassaway station. He has now bid in third trick yard clerk at Weston, as a result of the promotion of Yard Clerk Fisher at Buckhannon to the position of cashier, and the removal of Yard Clerk H. H. Cayton from Weston to Buckhannon.

Among our most devoted disciples of Isaac Walton, the gentle fisherman, we find Conductor Barney Jeffries, of the Gauley local. Here we show him with a one day's catch on the Elk River, Holly Junction. All on the string are bass. If you don't believe it can be done, come down and we will show you. Barney is an old timer on this division, in fact we would not like to tell you how many years service he has.

"You've got to be a go-getter, or a do-withouter."

Falling Rock! Boy, did you ever hear of that town? Large and flourishing place on the Elk Line, total population under ordinary conditions four, now increased to five because of the presence of Assistant Division Engineer W. E. Kearfott, who is putting in some new sidings. Further particulars furnished on application at the Weston shop office, where if you listen hard you will hear a sad and tender voice singing low and sweet, "Don't you know I'm lonely, lonely as can be?"

Our old pal, "Bill" Hefner, has returned from Texas all safe and sound, where he attended the Clerks' Convention. "Bill" says that's sure some country. Space forbids our telling the stories of the bull fights, etc., which "Bill" brought back with him. By the way, "Pat" Hickey, who went to Toronto, is still among the missing. Toronto papers please copy; much anxiety in Gassaway.

"Work—good, hard, honest work—will achieve almost every material thing in this world, and work may be delightful, noble, exhilarating and fascinating." ("Not when it's painting the kitchen floor after a hard day's work distributing cars at the office," says our friend "Charlie" Dixon. Ask him for further details. We don't like to tell them.)

Friend Allman, Wireless Department, was here the other day. Asked him to fix us up a radio set in our house, but he declined, referring us to Mr. Donnelly, who he says is more of an expert at that sort of thing.

Division Claim Agent John Workmeister attended the Claim Agents' Association meeting in Montreal last month. We're glad to say he's back safe. John says the French girls are pretty, but oh, you Weston belles!

General Manager Schær and General Superintendent Scott made a recent trip of inspection over the Charleston Division, accompanied by Superintendent Trapnell, Division Engineer Brooke and other officers.

There's going to be a big crop of potatoes near the Weston general offices this year. The other morning about 10.00, we looked

out of our window for a moment, and what did we see? "Al" Mason hoeing the "Murphies." It's true; we can prove it, because believing that our eyes deceived us, we called in witnesses.

Success isn't luck. It doesn't happen; success is concentrated energy plus brain force.

That reminds me of a story, a true one too. You know our old friend Kelly of the shops is very good at telling us that he likes to see people "show a little indication of speed," and that "speed is his middle name." Well, the speed is not all at the shop. The other night there was a party in Weston. Miss Madeline Hayden, Superintendent's Office, was there. They decided on a game to demonstrate speed. It went like this: First the contestant had to drink a glass of water, then two needles had to be threaded, each with two threads, then hands tied behind their backs, and a marsh-mellow dangling from a string in front of them was to be eaten, then a piece of cake had to be eaten from a table without use of hands. A large box of marshmallows was the prize. Miss Hayden won it; she did all this in two minutes and five seconds, while the nearest to her required two minutes and 25 seconds. Talk about speed! Often the Mallet type will run faster than the B-8. Anyway the Baltimore and Ohio contestant won, and thereby hangs a lesson for all of us.

"Get your happiness out of your work, or you'll never know what happiness is."  
—Hubbard

We extend our sincere sympathy to Division Accountant W. E. Severns, in the serious illness of his wife, who is at present in the Maryland General Hospital, Baltimore, undergoing an operation. We all extend our best wishes for her prompt and complete recovery. We also extend our best wishes to Miss Viola Hickman, Trainmaster's Office, Weston, who is at present in St. Mary's Hospital, Clarksburg, having recently undergone an operation for appendicitis.

The regular bi-monthly meeting of the Charleston Division Safety Committee was held in Weston on May 26, all members being present. A program for pushing the Careful Crossing Campaign to a successful conclusion was outlined, and its importance impressed on all members.

In the evening of the same day, the Division Claim Prevention Committee met. We had with us C. M. Criswell, representing the Claim Department, and H. M. Baker, representing the Traffic Department, together with about ten agents from various parts of the Division. Great interest continues to be shown in Claim Prevention work, and we are getting good results.

"When we start the construction of a building, that we expect will endure, the foundations receive our greatest consideration; and so in life if we would attain the greatest success, that is, the success that money cannot purchase, nor the lack of money or the wastage of time, destroy, our moral character should rest on a firm basis." THINK ABOUT IT.

## Wheeling Division

Correspondent, MARIE SLATTERICK

Wheeling Division employees desire to express their deep and sincere sympathy to Miss Anna Riley, clerk, Division Accountant's Office, on the death of her sister, Miss Alma, aged 14, on May 12, at Bellaire, Ohio.

Charles McElroy, general crossing watchman, Wheeling Division, is suffering from the results of an auto striking him while

alighting from a street car at 38th Street, Wheeling. He was hurt about the right side and his right arm considerably bruised. "Mac" advises he got the license number.

C. C. Wilson, traveling car checker, is suffering from the results of a fall sustained on May 31 at Wheeling. We wish him a speedy recovery.

"Joe" Marchani, chief clerk to the storekeeper, Benwood, was a visitor in Wheeling on June 1. He stopped in the Division Engineer's Office for a few minutes and made us all feel glad with his happy smile. Come around again, "Joe!"

Talk about your talent! The Baltimore and Ohio certainly does feel proud of its talented employes, Miss Marie Haveron, Angela Kirchgessner and Marie Slatterick, all of Wheeling Station. These girls recently sang at a musicale at the St. Joseph's Academy. They are all gifted singers.

Eddie Kuhn, Division Freight Agent's Office, is the proud papa of a baby girl, born on Sunday, May 7. Very good, "Eddie!"

H. A. Lynch, formerly of Wheeling, now of Baltimore, was a visitor in Wheeling on Sunday, May 14. They say a certain young lady in the Division Accountant's Office at Wheeling knows about these sudden visits. Incidentally, "Hal's" picture was in the May MAGAZINE.

Among those who have had their hair "bobbed" are: Misses Raphael Haveron, Wheeling Freight House; Mary Ellen Ullom, Division Accountant's Office, Wheeling; Marie Slatterick, Division Engineer's Office; Mabel Kelly, Division Freight Agent's Office; Della Wells, Division Accountant's Office and Mary Marker, General Superintendent's Office. Who's next?

Things heard around Wheeling Station: John R. Padden: Say, have you got the file where we wrote What'shisname?

A. J. Sonnefeld: Hey, "Mac," get me a ham sandwich.

F. M. Powell: Got a cigarette?

If you want to have some fun, ask "Sonne" (A. J. Sonnefeld,) chief clerk, Division Engineer's Office, where he got his sunburned nose—and if he got it "Wintering" in Florida.

The accompanying picture is of some of our right of way in the vicinity of Downs, W. Va., just a short distance west of Fairmont, W. Va.

Here is a picture of M. C. Smith, Jr., son of Division Claim Agent, Wheeling, W. Va., Eagle Scout of Troop No. 5, Wheeling, ready for camp.

## Accounting Department

Correspondent, R. C. GRUVER

Lawrence Michels, M. of W. timekeeper, was host at an informal party given at his home in Kirkwood a few evenings ago. Dancing and games were the principal diversions of the evening, after which a delicious lunch was served. At a late hour the young people departed for their homes, having spent a most enjoyable evening. The following were present:

Misses Angela Kirchgessner, Gertrude Dailer, Elizabeth Kutsch, Adelaide Auth, Mary Ullom, Marguerite Cockrell. Messrs. N. K. Harrison, James Michels, E. P. Fortner, Anthony Michels, Leo Michels, Lawrence Michels. Messrs. and Mesdames: R. C. Gruver, Anthony Michels, Sr.

Elmer was seen carrying water in a huge receptacle the other day, and we all wondered where the fire was. However, upon investigation it developed that he was only carrying Frances a drink (by orders of the C. C.).

C. R. Evans, of bowling alley fame, made a trip to Clarksburg over the week end. When questioned concerning it, his only reply was "Let me alone, I'm sleepy." We all thought from his conversation later that he was also going to Pittsburgh over Memorial Day. However, when he didn't go and some one asked him why, he replied; "Well, when I found out Vernon Coxen was going, I decided there was no use for me to go, since she wouldn't see me if I did."

Angela: Do you know, why your neck reminds me of a typewriter?

Robert: No, why?

Angela: Because it's Underwood.

A few of the things we'd like to see:

Vernon when he wasn't chewing something.

Lawrence bowling ten pins.

Edgar when he was real busy.

Norman boxing Jack D.

Listen girls, if you have been contemplating having your hair bobbed but have been skeptical for fear of the effect it would have on your good looks, do not hesitate any longer. It has made Della much better looking. Seeing is believing!

## Western Lines

### Cincinnati Terminals

Correspondent, JOSEPH BEEL

The following were elected as rotating members of the Cincinnati Terminal Division Safety Committee: Peter Schuetz, engineer; T. F. Troy, fireman; Thomas Fay, switchman; D. Bennett, section foreman; Jesse Adams, tallyman, and William E. Hayes, conductor. The terminal prides itself on the activities of its Safety Committee and feels confident that the new members will maintain the high standard that has been established by their predecessors, and due honor to themselves as committeemen.

"Bob" Jennings, car distributor, Superintendent's Office, is back after a protracted siege of sickness. Needless to say, we were all glad to see "Bob" back on the job manipulating the rolling stock,

It would not have been amiss to carry our Safety Program to the Outing on May 27, for, had we had the forethought we

might have been able to avoid what might have been a serious accident. Entered in the Ladies' Running Race were Misses Weber and Herron, honors even as to their ability as Followers of Mercury; however, after a flying start our "Honored Guest from the East" was making great speed to the wire when an unfortunate catastrophe occurred. Apparently she did not see "Miss Weber" who was one step ahead of her, and she just simply ran over her, causing the former young lady to lose her stride and fall. The young lady from the east and Miss Herron also did the same stunt, and the next thing we knew the trio were receiving "First Aid." All's well that ends well and bruises and wounds having now healed, it is the consensus of opinion that the judges of the race should have been more careful of the qualifications of certain contestants.

The "Benzine Bug" got him! Chester Rardin, yard clerk at Brighton, is now knocking down fences and telegraph poles with his new "Gas Hack." It was a brilliant idea of "Ches'" to annex the buggy for it is thought that "Al" Booth will take a hint and also buy one of his own and discontinue paying for the up-keep of someone else's machine.

To some of the employes who have not had the privilege of seeing the Goddess of Liberty Statue, it is suggested that some afternoon between 3.00 and 4.00 they station themselves at Ivorydale (Toledo Division) and see what we believe to be a living replica of the statue: "Mike" Grady standing on the rear box car as his train is being shoved into Elmwood yards.

V. Coleman, report clerk at Elmwood, "reports" that he has just moved again. "Coley" says that the easiest thing about moving is finding a place; the hardest thing for him to remember is where he moved last. However, as "Jim" Flanagan, "our country cousin from Hoovan," keeps such an accurate record at Elmwood, the postal authorities have no difficulty in tracing Coleman's former residence.

John Wiethoff, yard clerk at Elmwood, is the champion "fish fan" in the terminals. John can be seen any Saturday about 4.00 a. m., hurrying to some nearby stream to try his patience. It has been suggested that along the "pieccful (?) valley" from Cleves

## The Vose Grand

has the incomparable *Tone*—the one quality above all others which makes a real piano. The exquisite tone of the Vose Grand distinguishes it from all other pianos.

### We Challenge Comparisons

Write for our beautifully illustrated catalog and floor pattern of the Vose Grand, also our easy payment plan.

VOSE & SONS PIANO CO.  
165 Boylston St. Boston, Mass.

**vose**

to Miamitown runs a stream, known by the Indian Name of Miami, where sometimes the fish *do* bite. This suggestion comes from one who we know would be very glad to extend his hospitality should John be marooned there.

Decoration Day of 1922 shall long linger in the minds of the natives of Southside. Particularly will they remember the leader of the band in the afternoon procession, for was it not our *own* "Cliff" Lindsey who so majestically strutted out heading the procession!

Possibly the Cincinnati Terminal employes are surprised not to find any items of interest concerning the employes at the Smith Street Freight House, and we hereby

Eagle Scout M. C. Smith, Jr., and a beauty spot along the right-of-way near Davis, W. Va., in the vicinity of Fairmont, Wheeling Division

Please mention our magazine when writing advertisers

#### FROM THE GENERAL SUPERINTENDENT'S OFFICE, CINCINNATI

Elmer F. Becker, file clerk; Elmer A. Duncan, assistant file clerk; C. E. Pierret, chief clerk; Gertrude Wehage, stenographer; Frank J. Brinkman, secretary; Francis O. Bunton, assistant chief clerk

call upon the associate correspondents, "Rip Van Winkle" O'Donnell and "Ben" Jelleff to awake and let us know whether or not Smith Street is still asleep.

Although summer is with us, it seems that Division Engineer W. P. Abbott has failed to resurrect his Palm Beach suit. We suggest, "Doc," that you get the old cedar chest out, unravel this raiment and polish up the old white shoes and give the old panama the "once over," and duck into the office like a summer boy.

The sympathy of the Cincinnati Terminals is extended to Trainmaster R. B. Fitzpatrick in the loss of his daughter, Kathleen.

The Division Engineer's Office force has lost an efficient chief clerk, Francis Hughes, who has been promoted to position in the office of S. A. Jordan. The promotion of Mr. Hughes takes from our midst one of our ardent social climbers and we know that the blow is felt most at the desk situated diagonally across from that at which Mr. Hughes used to hold forth.

Ralph Shaw, one of our faithful at Smith Street Local Freight Office, will join the ranks of the benedicts early in July. Miss Ruth Shelton of Wyoming is the fortunate lady. After a short honeymoon to Plainwell, Mich., they will be at home to their many friends. Best wishes for a long and prosperous life!

Miss Earnestine Stricker, settlement clerk, Smith Street, is visiting relatives in Texas. Miss Stricker has been in poor health for some time. It is hoped that she will be greatly benefited by a change of climate.

Herman Franz, private secretary to L. A. Cordie, agent (a great admirer of Teddy Roosevelt), is in some ways imitating the "Great Teddy." Raymond Victor arrived on May 8 and all are happy. This makes "three" that have come to cheer Mr. and Mrs. Franz on their way. Good luck and best wishes from all the employes in the Terminal!

Everybody is wondering why Irwin Hein, rate clerk, Smith Street Office, is wearing such a broad smile. It's a girl, "Joan Elizabeth," and she arrived on June 3. Congratulations!

Through the MAGAZINE, Miss Edna M. Orr wishes to express thanks and appreciation to her friends and fellow workers for their loyalty and assistance in the popularity contest, held in May by the Cincinnati Terminal employes, in which she was victorious.

Quite a number of our apprentice boys have started courses with the International Correspondence Schools. In a few years we will have produced some mighty fine, bright, young mechanics.

On account of increased business our roundhouse forces are kept pretty busy these days getting power out. But they are equal to the occasion and the power is right there when called for. The inspection pit is being enlarged to take care of more work.

Our boiler foreman has taken up the real-estate business as a side line. We understand that our air brake and pipe shop foreman, Paul Haaf, is looking for a home. If John hurries up, maybe he will be able to sell "Mose" a home.

#### Thinks

George Holt, that roof paint came from the Red Sea.

"Ben" Hesselbrock, that Rex Beach is a pleasure resort.

J. R. Zureick, that Puget Sound came from a boiler.

F. E. Liebetrau, that a canteloupe is some kind of an animal.

Ivorydale has had quite a number of distinguished visitors lately and is proud of the 100 per cent. praise given to her.

The he-vamp at Ivorydale, otherwise known as "Bob" Miller, has purchased a bran new Ford. We have heard that he also purchased a small machine-gun which he has installed on the running board of the "Fliv." What for? Why, to keep the women away.

H. Graue has joined the ranks of the benedicts. Our best wishes go with him and his bride.

We can't figure out what "Mac" Cracraft means when he says, "I wonder what you would say if I were to request transportation to Philadelphia—for two."

George Donnelly, our popular Machine Shop foreman, has recently been wearing a broader smile than usual. We wondered what this might be about. On conversing with him we find that he has the "auto fever." Now, we believe that our old bachlor friend has at last succumbed to the wiles of one of the fair sex and wants to get the auto to take "his sweetie" out in.

#### Newark Division

Correspondent, B. A. OATMAN

#### Newark, Ohio

Behold our shop foreman at Newark, Ohio shops. Standing—left to right: Sam Gallagher, Leo Thomas, O. M. Burke, D. Ochs, O. C. Rommel, Clyde Hupp, J. W. Hughes, Joe Fuller, General Foreman W. L. Clugston, Willard Wright, A. Mitchell. Sitting: Will Floyd, R. J. Brooker, G. H. Franklin, Charles Haslop, C. A. Card, Henry Sherrard, C. M. Hinger (deceased), Ira Peterman, Charles Barrett, George Duffy.

This picture was taken when the Newark shop foremen held their annual picnic at the Atlantic City of Ohio (Buckeye Lake), where the Western Line Veterans will hold their annual picnic on August 17.

#### OFFICE FORCE OF SUPERINTENDENT OF MOTIVE POWER, CINCINNATI

Left to right, back row: H. E. Duncan, chief clerk; Charles Bick, stenographer; W. Malthaner, superintendent motive power; G. E. Lund, draftsman; George Lishawa, clerk; Joseph Shea, secretary to superintendent motive power; G. H. Lucky, clerk; F. Wilhelm, chief clerk to paymaster, Baltimore, visitor; L. A. Cordie, local agent; George Sturmer, president Veterans Association, (visitor); George Nagel, file clerk. Front row: Dewey Smoot, clerk; Roger Meagher, clerk; George A. Bick, clerk; C. H. Auberger, stenographer; F. L. Welz, clerk; W. H. Moorhouse, assistant chief clerk; Cliff Winnall, clerk

This is a picture of our station building at Bethesda, Ohio, with Agent H. A. Davis standing in the doorway.

As predicted prior to the opening of the baseball season, the Newark Shop ball team has pushed its way to the top and now stands at the head of the Industrial Twilight League of Newark, Ohio. Of course there is a good reason for all this. When Manager Leon Stanford undertakes to round up a team of real good ball players, he usually meets with success. He has ability to spot a ball player the minute he puts his optics on one; he also has a way of getting his men to work every minute they are on the field, and the luck in the breaks is usually with Leon. Arrangements are now being made to have the 1922 silver cup placed in the glass case, provided for the purpose, in the Office of Master Mechanic, Newark Shop. We are all behind the ball team which may develop into the winning team for the Baltimore and Ohio System, should it be arranged to make a schedule with other divisions.

**Levi Willimine**

Born, November 1, 1864. Died, May 13, 1922

What little claim we have on life! Mr. Willimine reported for work at seven o'clock on the morning of May 13. At fifteen after seven he was on the way to the hospital after having suffered a stroke of apoplexy. Before the shop whistle blew for one o'clock he had departed this life.

Mr. Willimine had been employed at the Newark shops as flue welder for many years. He was considered an expert flue man and was always at his post of duty. Very rarely did he miss a day's work. We will miss him as a good fellow who was always to be depended upon. Newark shop employes extend to his survivors—his widow, one brother and one sister—their sympathy.

**Radioitis**

We have been wondering how many employes on the Baltimore and Ohio have been troubled with the new disease known as

"Radioitis." We have located several cases on the Newark Division and there seems to be no permanent cure.

We find that the victim is affected to a greater extent at night time than in day time; this is probably due to so much static during these days of summer, but we understand that the disease is more confining in winter months than in summer, so we are still at a loss to know just when or what part of the year it would be best to take treatment which would be lasting. From information at hand we diagnose the case as follows: Symptoms—A craving to listen in on some concert being given at Schenectady, N. Y., Pittsburgh, Pa., Detroit, Mich., Newark, N. J., etc.

Treatment—See some one thoroughly familiar with the building of radio sets; he will be able to relieve this craving to some extent, at least temporarily, until you are advised what a good set will cost you. Then you'll get a setback—but by listening in on his set frequently you are inclined to think that you are improving, while in reality you are just getting more fever. As a dependable cure we suggest that you get a good radio set with at least two stage amplification, sit at home in the evenings, tune in and hear what is going on in the world around you.

**Mansfield, Ohio**

Correspondent, C. R. STONE

Miss Grace Wright, our efficient assistant cashier, has returned from a pleasure trip to Washington, D. C.

Robert Kaufman, the handy over and short clerk, is making a good many trips to Mt. Vernon of late. Be careful, "Bobby," the sea is rough; you need plenty of sail to get along real nicely.

Albert Walters, car demurrage clerk, is also buying flowers and candy by the carload. Why? That's what we want to know.

Charley Richards, second trick operator at North Siding, is riding around in his new Dodge.

# This Man Wouldn't Stay Down

C. W. Foshay used to be an operator and signalman at Tower 37, Peekskill, N. Y.

But he wasn't satisfied. He wanted a better job. And one fortunate day he decided that the best way to get a better job was to deserve it. So he enrolled with the International Correspondence Schools.

"I worked in the tower and studied nights," he wrote to us the other day. "I completed the course and received my diploma after six to eight months of study."

"As a direct result of this study I obtained a chance in the signal supervisor's office as a draftsman, which work I pursued for a couple of years. The proficiency gained from experience, added to my knowledge of signal work, led to my being promoted to chief signalman of the Hudson Division."

"Incidentally, the taking of that I. C. S. course led directly, through subsequent steps, to my attaining my present position."

"I recommend Scranton instruction to any person who is not afraid of hard work—the only kind that pays."

C. W. FOSHAY, Train Master,  
Hudson Division,  
New York Central Railroad.

Mr. Foshay is just one of many thousands of railroad men who have gone forward to better positions and larger salaries through I. C. S. training.

You have just as good a chance as he had—perhaps better. But you'll never get anywhere by just wishing. You've got to prepare for a better job before you get it.

Just mark and mail the coupon printed below, and without obligation or a penny of cost, find out what the I. C. S. can do for you. Today—not tomorrow—is the day to take that first step forward.

The Hagenback and Wallace circus has come and gone, with the same old crowd of both young and old on hand to greet it. The number of volunteers for the HEAVY WORK was about up to the average, but the much sought after pasteboard or pass was as freely given as the income tax. The Baltimore and Ohio had the circus out of Mansfield to Cumminsville, Ohio. The greater part of the crowd on circus day was brought into the city over the Baltimore and Ohio.

**Columbus, Ohio, Station**  
Correspondent, J. V. PRICE

Assistant Correspondent, EDITH ROACH

Thursday, May 10, was the record day for the Columbus and Newark Joint Division. The Baltimore and Ohio and the Pennsylvania lines handled forty passenger trains consisting of 314 cars, and 112 freight trains consisting of 2579 cars. This in a period of 24 hours. The major portion of this traffic was coal destined to the steel industries in eastern Ohio and western Pennsylvania, and all of this traffic was handled with little or no delay in the Columbus Terminal Yards. This section of the Newark Division is double tracked the entire thirty-three miles and has the third or slow track over the hills in both directions. From comments made by passengers riding on both roads, this is one of the finest pieces of track in the United States.

The contract for the repaving of Third Street, from the Baltimore and Ohio Freight station for a distance of one mile south, has just been let. When this improvement is completed, the Baltimore and Ohio will have the best located and most easily accessible freight station in Columbus. The street will be widened and paved with asphalt.

Fred Whalen was awarded the position of cash clerk, succeeding Edward Dauer, who resigned to accept a position with a local firm. We wish him success.

We have with us James Shea from Shawnee, who received the position of utility clerk.

Because of the increase in business we have put back one of our furloughed clerks, Miss Jessie Fralinger. We are glad to have little Jessie with us once more.

S. A. Bush was called to Chicago last week to the bedside of his mother, who had sustained a severe accident. She was leaning against the porch railing, which suddenly broke, causing her to fall backwards a distance of ten feet. She was severely injured, but happily the prospects for her recovery are good.

A new delivery clerk arrived. Born to Mr. and Mrs. James Butler, an eight pound boy, John James, May 18.

Assistant Foreman James Avery, Columbus Shops, is on the sick list.

Storekeeper W. T. Giblin has been transferred to Sandusky as storekeeper. H. C. Burton, Newark, succeeds Mr. Giblin at Columbus.

On April 14, Miss Kathryn Funke became the bride of Ray T. Jones. Mr. Jones was formerly with the Baltimore and Ohio, but is now with the Hocking Valley Railway at their General Offices in Columbus. The ceremony took place at the parsonage of the Methodist Protestant Church and was performed by Reverend Maier, a life long friend of the bride. After the wedding, the happy couple went to their comfortably furnished home at 48 Hubbard Avenue.

They received a great number of valuable gifts, perhaps none more appreciated than the one given by the Platform Bunch and the clerks "upstairs." Everyone was invited to spend the evening at the new home of the newly weds on the evening of May 3 for a good time. Mr. Payne ably presented Mr. and Mrs. Jones with a beautiful mahogany floor lamp, the gift from the Platform Bunch, they having always considered Katie as "Their Girl." Then Miss Marie Brink, in her inimitable manner, represented the "upstairs bunch," and presented them with a mahogany rocking chair. R. S.

Dodds, a former employe, knowing the great loss the platform bunch had sustained and understanding their thoughts and feelings, contributed the following:

"Were it not for the mirror of memory, the ever promising vision of hope and the heartening common place realities of life, none of us would care to linger long on this old planet. It is just such occasions as this one which brings us to a full appreciation of the inestimable value of friendship. The impulses of one's heart never run truer to form than when expression is had of the regard one entertains toward another. And so tonight, with or without the consent of Ray, we want to refer to you as "our girl."

We bring to you a renewed avowal of our esteem and affection toward you, and, as our little remembrance will serve to light and cheer when the shadows gather, so may each of you fetch cheer one to the other, ever having in mind that a sorrow shared is halved, and a joy shared, is doubled. To you, Ray, who have taken away the girl of our choice, and your choice, the only girl, we extend congratulations. Surely you have chosen wisely and well, but we are only going to grant that you have adopted "our girl." To each of you we can only sincerely wish that in your journey together through life, you will ever find an increasing pleasure in the fond companionship you are just entering upon. In conclusion, Mrs. Jones, do be certain that we of the platform will always wish you well, indeed.

Our yesterdays with you, fine friend,

We'll count them o'er and o'er,

A-wishing you with every count

Long years of joy galore.

(Signed) The Platform Bunch.

The sewing club was entertained by Mrs. J. V. Price, wife of our chief clerk, on April 25.

Oscar Scéen, check clerk, is spending a short time in Texas.

**Marietta, Ohio**

Correspondent, G. R. STEEN

One of the latest additions to our business enterprises is the Scott Garage and Aviation Company. They have opened a flying school, and are carrying passengers at the rate of five dollars per trip. They are making trips to all cities for those desiring quick transportation. "Scotty," the aviator, says, "Fly with me," but our most efficient cashier, Mr. Schantz, says, "Nothing doing."

Some excitement was caused on Putnam Street the other evening when a swarm of bees took possession of an automobile. While some one was hiving the bees, our car record clerk appeared on the scene. Evidently one of the bees thought he was an enemy and knocked him cold.

Things that never happen in our office: Rate Clerk Miller losing rate sheets; Waybill Clerk Reed running to the waiting room for a drink of water, and Herman Henry leaving out waybills in making up the reports.

For Sale—One 1917 Model Ford touring car in good running condition, sometimes, or will trade for a Maxwell. See Herman Henry, baggageman.

The produce season started on June 10 with the first car of cabbage. Oh boy! our job begins now!

**Office of Train Master, Connellsville, Pa.**

Yardmaster A. McCormick, westbound hump, Connellsville yard, started on his vacation June 7, and since he had never seen the "main" part of the U. S. A., he left immediately for New York.

Yard Brakeman H. S. Lancaster spent several days along the streams in the mountains above Indian Creek, during the first part of June, trying his luck in capturing the speckled trout. He returned with a good catch.

D. M. Springer, clerk, General Yard Office, Connellsville, sure is blue these days; his lady friend recently graduated from the High School and has gone on an extended trip for the summer. This regret will be only temporary as "Dannie" will soon be raving over some other fair one.

"Jimmie" McClure, the efficient messenger in the General Yard Office, Connellsville, returned to the service recently after having been off several weeks account of illness. We are glad to see you back, "Jimmie."

Here is a picture of F. H. Hanlon, lightweight boxer, Connellsville—not yet defeated. Look him over, boys. Mr. Hanlon is employed as machinist helper at our shops.

Fireman E. C. Lendon and family have been sojourning in Houston, Texas.

Take a good look at "Johnny" Shallenberger, janitor, westbound yard, Connellsville.

L. A. Glover, Trainmen's committeeman, attended the Convention of Trainmen at Toronto, Canada, during May.

**Mansfield, Ohio**

Correspondent, C. R. STONE

From the number of people who have asked about rates on crushed stone and paving brick, we are inclined to predict that there will soon be a boom in road making in this vicinity. This will delight those who have occasion to travel over highways, and we are looking forward to a nice business.

Strawberries are very plentiful. Five carloads were recently brought into Mansfield over the Baltimore and Ohio in three days. We are wondering what became of all of them, and how many strawberry short cakes the lot would make.

Ticket Agent G. F. Sellers says that the passenger business is increasing and that the people are starting out early on their summer tours. Applications are being made daily for accommodations on our trains.

S. T. Bride, local baggageman, seems to have his hands full handling show baggage. Mansfield is getting the same class of shows that appear in the larger cities. This means more and better business for the Baltimore and Ohio.

Summer seems to be here at last, judging from the parties being made up to feed the fishes. Yardmaster Kerr and Agent Stockwell and your correspondent are equally guilty and have in mind some private fishing ground not far distant from Mansfield.

G. F. Sellers, ticket agent, recently moved from Dickson Avenue into his new home on Bartley Avenue. George says it is more like living when you are occupying your own home. We agree with him.

Yard Conductor George B. Turner, first trick, has just returned from a trip to the Tri State region, Huntington, W. Va., Kenova, W. Va., and east. George says the Ohio River is still a good place to fish if you know where to go.

Yardmaster L. L. Kerr is contemplating a fishing trip. Let us hope that "Lou" will bring home the fish, and that he will have good luck and that there may be samples to grace the employes' tables.

## Akron Division

Correspondent, J. A. JACKSON

George Farr, formerly of the Office of the Superintendent of Locomotive and Fuel Consumption, Baltimore, has accepted the position of secretary to D. F. Stevens, superintendent of the Akron Division. Welcome to our city, George!

William Mulcahy, roundhouse foreman, New Castle Junction, is passing around the "El Versos." William, Jr., ten pounds, arrived on May 10. Congratulations "Bill" and many of them!

General Yardmaster O. L. Murphy, New Castle Junction, spent his annual vacation in Halburton, Canada, one of the best fishing locations in the Dominion. "Murph" reports having had good luck with the rod and reel.

Assistant Division Engineer John H. Babbitt, Akron, Ohio, and Miss Edith Josephine Wells, of Northampton, Mass., were married on Saturday, April 29 at the home of the bride, 71 Washington Avenue. The ceremony was performed in a bower of laurel and hemlock, and the house decorations were of laurel and snapdragons. Rev. Richard H. Clapp, pastor of the First Congregational Church, performed the wedding ceremony. The wedding march was played by Miss Lelia Babbitt, a sister of the groom. The bridesmaid was Miss Elsie Wright of Pittsfield, Mass., a classmate of the bride. The best man was David Johnston, of Boonton, N. J. The bride was beautifully gowned in white georgette, and carried a bouquet of white roses and sweet peas. The bridesmaid wore blue taffeta silk and carried a bouquet of pink roses and sweet peas. Immediately following the ceremony a reception was held for over 150 guests, and a buffet luncheon was served. Guests were in attendance from Boston, New York, Boonton, N. J., and Springfield, Mass. The bride and groom are both graduates of Northampton High School, class of 1912; the bride is also a graduate of Smith College, 1916 and the groom graduated from the Massachusetts School of Technology in the class of 1917. He served during the World War with the rank of captain in the 13th Anti-Aircraft battery. After an eastern wedding journey, Mr. and Mrs. Babbitt will take up their residence in a newly furnished home at 745 Roselawn Avenue, Akron, Ohio. The best of good wishes and happiness are extended to the happy couple from their many friends on the Akron Division.

One of the most pleasing and charming parties of the early summer season was held in the Firestone Auditorium, Akron, Ohio, on Thursday evening, April 27, under the auspices of the Welfare Bureau of the Akron Division. A splendid program of dance music was rendered by the Pat Patrick Orchestra, and over 400 employes and members of their families enjoyed the evening's entertainment. A pleasing feature was the introduction of the various officers of the newly organized Akron Division. President Eichelberger, Welfare Bureau, acted as host for the evening, and no one was missed in the way of seeing that everybody had a good time. Credit for the success of the party is due Mr. Eichelberger, E. L. Miller and District Freight Agent C. M. Groninger. The same Committee is making arrangements for the annual picnic, which will be held in the near future.

P. H. Groscup, formerly division accountant, New Castle Junction, has been transferred to the Connellsville Division, where he will be the division accountant, with headquarters at Connellsville. Mr. Groscup

has long been connected with the Baltimore and Ohio, and there is little left to say on his being selected as division accountant, Connellsville. However, with Mr. Groscup's enterprise and ability, it can be depended upon that his work in this position, as in others, will speak eloquently for itself. While his numerous friends on the Akron Division regret his leaving, yet all are jubilant over his well deserved promotion. We hope that the stretch of miles which separates him from his friends will not prevent his calling for a little chat whenever time permits his presence on the Akron Division.

"Jimmie" Geddis and "Tommie" Williams, congenial mail boys in the Superintendent's Office, are having the time of their young lives in their new location at Akron, Ohio. The boys are inseparable companions and can be found almost every evening at one of the many beautiful parks, enjoying themselves in their new bathing suits. Both are expert swimmers, and say that they would rather swim than eat. Just the kind of boys that will make future superintendents!

### My Auto, 'Tis Of Thee

Sympathetically dedicated to "Mike" Walus, on the occasion of his purchase of a new Ford Sedan and sung to the tune of "My Country, 'Tis Of Thee."

My Auto 'tis of thee, short cut to poverty,  
of thee I chant.

I blew a pile of dough on you two years ago,  
Now you refuse to go,  
Or won't or can't.

Through town and countryside, you were  
my joy and pride,  
One happy day.

I love the gaudy hue, the nice white tires so  
new,  
But now you're down and through,  
in every way.

To thee old rattletrap, came many bumps  
and knocks,  
for thee I grieve.

Badly thy top is torn, frayed are thy seats  
and worn,

A whoop affects thy horn,  
I do believe.

Thy motor has the grip, thy spark plug has  
the pip, and woe is thine.

I too have suffered chills, ague and kindred  
ills.

Trying to pay my bills  
Since thou wert mine.

Charming in its simplicity of appointment, was the wedding of Betty May Richards and J. Walker Balentine, which was solemnized at the home of the bride on Wednesday, June 14. The bride is a daughter of Mrs. S. A. Richards, South Mill Street, New Castle, Pa. She has been connected with the Baltimore and Ohio ever since her graduation from the New Castle High School in 1918. The groom is also in the employ of the Baltimore and Ohio. He is a graduate of the North Stradane High School in the Class of 1917. Mr. Balentine is a son of Mr. and Mrs. Joseph M. Balentine, Cannonsburg, Pa. Following the ceremony, a wedding dinner was served to the relatives of the immediate families. After an extended wedding trip through the East, they will take up their residence in a newly furnished home at 362 Parkwood Avenue, Akron, Ohio. Their many friends on the Akron Division extend their best wishes for long and continued happiness.

Stuart A. Allen, freight traffic manager, Chicago, was the principal speaker at the first meeting of the staff officers of the Akron Division, which was held in the red room of the Portage Hotel, on May 19. Mr.

**Do you want a \$150.00 Phonograph for a few hours of your spare time? If you do write the Auburn Phonograph Company, Auburn, Indiana, for full particulars.**

Allen laid particular stress on the solicitation of freight, by the various agents, clerks, and other employes and recommended that particular attention be given to the fast freight schedules in order to maintain the high standard of efficiency which has been established in the past. Other speakers included W. W. Blakely, general freight agent, Pittsburgh, Pa.; J. C. Kimes, assistant general freight agent, Cleveland, Ohio; C. F. Farmer, division freight agent, Youngstown, Ohio; C. M. Groninger district freight agent, Akron, Ohio, and Superintendent D. F. Stevens, of the Akron Division. Impromptu remarks were also made by several of the prominent traffic men of the city. Superintendent Stevens' remarks were interspersed with a general outline on the existing conditions of the country, and a plea for the earnest cooperation of the various officers in the proper handling of the large territory now embraced by the new division. After the meeting a banquet was served in the private dining room, the guests being entertained by the Akron Traffic Club.

### Lorain, Ohio

Correspondent, G. W. HARMON

Miss Myrtle Gonnerman, stenographer, General Car Foreman's Office, has resigned and is now working for the Lorain County Electric Company.

There were many sad scenes of parting in Lorain when the Cleveland and New Castle Divisions became the Akron Division. George Coon surely will be missed by the little ones that he left behind. Nettie and Julia miss him awfully. Don't tell his wife.

The girls in the Master Mechanic's Office at Lorain gave a farewell party for the boss, G. R. Coon, before he left for Akron. He was presented with a gold pencil. They thought perhaps he would use it to write to them, but to date they have not received as much as a note.

Lorain is rather dead these days, because the coal machines are not working. It is all right to be dead in the winter, but when the spring comes and all seems to blossom out with newness of life, one feels like doing something. Agent Ferguson just sits and weeps because there is no activity around here.

Former Master Mechanic M. A. Gleeson is at the present time on a four months' furlough down in Texas prospecting in oil. Maybe he will have his picture painted in oil; who knows? Good luck to "Mike!"

The Baltimore and Ohio Dredge, "Black Rock," is doing good work dredging in the river at Car Dump No. 2. This will be a great benefit to vessels loading coal at Lorain Docks. Captain Kulnane and his crew from Painesville, Ohio, are doing the work on the dredge here. The captains of the vessels loading will be greatly surprised in finding so much water at all times.

W. Arick and wife, clerk at No. 2, went to Salina, Kansas on their winter vacation and came back all smiles—with a new baby girl! Isn't that nice?

"Zack" Robinson, carpenter foreman, Lorain Terminals, has returned from a six weeks visit to Lake Helen, Fla. Here he spent most of his time as a disciple of Isaac Walton, with excellent success. He tells some fish stories about his wonderful catches and about the kind of bait he used

### Massillon, Ohio

Correspondent, W. E. BRUGH

Mrs. L. T. Kegler, wife of our agent, Massillon, when in a conversation with a lady friend, was informed that her friend was leaving that evening for Florida. Mrs. Kegler inquired about the route she was taking and was informed that she was going via a competing line. Through Mrs. Kegler's influence, this lady was persuaded to go on the Baltimore and Ohio. Good work, Mrs. Kegler. Let's hear from some of the other women.

Brakeman George H. Brugh recently took an extended sight seeing trip through the West.

Round House Foreman Emerson W. Polem and Laborer Sam Domro, while out testing a Ford machine on May 17, met with a serious accident. Mr. Polem lost control of the machine, struck a telephone pole, broke it off, and collided head-on into a barn. Mr. Polem was fatally injured and Mr. Domro seriously injured. Much sympathy is felt for Mr. Polem's widow and only daughter, Nancy Jane, age seven years.

Yard Clerk L. W. Meyers recently became the proud father of a new-born daughter. Good luck to you and Mrs. Meyers, "Gov."

Here's William E. Brugh, Jr., two year old son of clerk to trainmaster, lunching on an ice cream cone.

The accompanying picture shows our office force and warehouse men at Massillon Freight House. They are, left to right, standing: Agent L. T. Kegler, Ethel Donahue, Myrtle Slicker, "Ed" Richards, Jennie Eckroad, Paul Seifert, Kent Spangler, Archie Seifert, John Becker. Front row: "Mickey" Rohr, N. R. Fashbaugh, F. J. Rhine, C. A. Workinger, G. N. Helline and Oliver V. Seifert.

### Chicago Terminal

Correspondent, T. H. WILLIAMS

Along with the daily gossip around the Terminal is one item that attracts more attention than others. This concerns our chief telephone operator, who, it seems, is falling for one of the stars in the Traffic Department. I really don't blame her; he's

The late E. W. Polem, Massillon

some handsome boy—one of those kind who finds it necessary to carry a club to keep the girls away. And then he shakes a wicked shoulder, as was noticed the other night at one of our most fashionable inns. Irene, is it true?

And we don't blame "Tommie." There is a long string of admirers just waiting an opportunity to have the pleasure of even talking to our beauty. Watch your step, "Tom."

We are all glad to see smiling "Joe" Kennedy back on the job after a long illness.

Some young fellows at East Chicago who have organized a baseball team that has never been defeated, viz.: pitcher, F. N. Hickok; catcher, C. F. McKelvey; first baseman, A. W. Booth; second baseman, F. W. Cross; third baseman, Elmer Brands; short-stop, Tom Hagerty; right field, Tom Finnon; center field, P. J. Wolfe; left field, Tom Maher; umpire, William Birdsley.

Our manager, John Reynolds, Master Mechanic's Office, is anxious to get a game with any railroad team, but particularly one with any team on our System. Every man on the team is batting over 300 at the present time.

Friend Specken, operator at 14th Street, came out the other night with his eye decorated. We asked him how come. The

reply was, "fell on the curb stone." Why not quit arguing with friend wife?

Yours for advice,  
Seldom Inn.

Our old friend, Hugh McDonald, who has been on the sick list for over a year, is spending the summer with his sister at Des Moines. We certainly hope the western atmosphere and garden work will do him a world of good, as we want to see him back on the job again.

Yard Brakeman Harley Moffett, of Deshler, inventor of the Moffett Automatic stop signal, met with a painful accident a few days ago while experimenting with some kind of an invention, in which he used hydrochloric acid. He burned one of his fingers so seriously that amputation was necessary. It is hoped that no further trouble develops and that he will soon be back on the job.

Chief Dispatcher H. S. Carroll is again having trouble with his injured leg. Almost a year ago he received a slight injury, which, however, failed to heal for a couple of months. Trouble developed again about May 10 and at the present time he is unable to use it. All of his friends wish him a speedy recovery.

Little W. E. Brugh, Jr., likes ice cream cones, and we suspect that the big boys and girls in the other picture do, too. They represent the office force and warehouse at Massillon

James Duncan, aged 82, died at his home, Willard, Ohio, on June 6. Mr. Duncan was a retired Baltimore and Ohio passenger conductor and had been an invalid for the past 22 years. He entered our service in 1881 and retired after twenty years service as brakeman and freight and passenger conductor. He was a member of the Order of Railway Conductors, the Grand Army of the Republic and a charter member of the Presbyterian church of Willard. Burial was in Greenwood Cemetery, Willard. Two sons and four sons-in-law acted as pallbearers. Mr. Duncan was a resident of Garrett for several years before moving to Willard in 1887.

Assistant Shop Clerk

**What To Do**

When the little devils fret ye,  
And you're feeling kind of blue—  
When a bit of sadness hits ye,  
And you don't know what to do,  
Just remember that your troubles,  
All your sorrows and your pains  
Go to help you win your struggles  
If you cry not when it rains.  
When a bit of sunshine greets ye  
And your chest is swelling out—  
And a bit of gladness meets ye  
And you're feeling big and stout,  
Why! just grab a hold and sling it  
At the folks you see around,  
For, the minute that you fling it  
Your're the gladdest man in town.

—Geo. Connor in *Journal of Outdoor Life*.

The marriage of Peter Treesh and Mrs. Cora Creager was solemnized on Thursday afternoon, June 1, at the Christian Parsonage, Rev. W. R. Willson officiating. Both have been residents of Garrett, and Mr. Treesh has been employed in various capacities at the local car shops for a number of years. After a short visit with relatives at Butler, they will be at home at the bride's home on South Lee Street. Hearty congratulations!

In connection with the movement of two special trains leaving Cleveland at 8 p. m. on June 6, carrying the Alkoran Temple of Mystic Shriners of Cleveland to the convention in San Francisco, the following note in "The Happenings in Garrett Twenty Years Ago This Week" will be read with interest:

"A fine special train run as First No. 7 passed through Garrett yesterday bearing a merry crowd of Mystic Shriners bound for San Francisco to attend a convention at that city."

The last named train carried Shriners from Baltimore, and the present time Shriners of Boumi Temple of Baltimore were moved in a special Pullman on Train No. 7, leaving Baltimore on June 4. This certainly speaks well for Baltimore and Ohio Passenger Service.

Floyd, the nine year old son of Dispatcher and Mrs J. C. Brookmeyer, met with a serious accident on Sunday evening, May 28, which resulted in the loss of his left eye.

Floyd and his twin brother, Clarence, were watching some other boys playing ball, when one of the boys swung a bat. It broke and the sharp end struck Floyd in the eye, completely destroying the sight. He was removed to Sacred Heart Hospital where an examination revealed that although the eyeball was badly lacerated the brain and skull were uninjured. The eye was immediately removed by Dr. W. G. Symon. Floyd is now at home and able to be out of doors as usual.

Engineer and Mrs. F. G. Heinlen and daughter, Mrs. Francis Van Derbosch, and Engineer J. E. Cogley, went to Wheeling, W. Va., to attend the wedding of Leo Heinlein and Miss Mary Margaret Crogan, which took place on June 1. Immediately after the ceremony the bride and groom left for a honeymoon to be spent in Yellowstone National Park and other western points. On their return they will make their home in Chicago. Mr. Heinlein was formerly employed at this station as a machinist, but for the past two years has been night roundhouse foreman, South Chicago. Hearty congratulations!

Decoration Day was chosen for the marriage of Machinist Joseph Jankowski and Miss Stella Vanderbosch, the ceremony being performed at St. Peter and Paul Church, Garrett, at 8.30 a. m., Rev. Father King officiating. Both Mr. and Mrs. Jankowski are well known and enjoy a large circle of friends who extend hearty congratulations. Mr. Jankowski is employed at the local shops.

Patrick McCarthy, Rochester, N. Y., recently visted his son, J. P. McCarthy. This is Mr. McCarthy's first visit to Garrett in seven years; he was employed in the local yards as fireman until pensioned, and then went to Rochester to make his home with his daughter at that city. He was enroute to South Bend to attend the commencement exercises at Notre Dame from which one of his nephews will be graduated.

Shop Clerk and Mrs. J. H. Lantz will spend their vacation at their Cottage Laffalot, Lake Wawasee. Jim says all are welcome; however he asks that any one who comes to visit him there brings his own bait, as it keeps him busy securing enough for his own use. He usually finds that the fish have a good appetite, but not much for a real bite.

If the number of requests for transportation for "myself and Wife" is a true indicator, as we believe, there certainly are going to be a number of June brides. We are not mentioning any names, but we wish each and everyone a long and prosperous life.

**South Chicago**

Correspondent, ESTHER J. SPREENBERG

herr, 90th Street. Have them in before the tenth of each month. It is impossible to reach all the departments and the writer would appreciate the assistance of other employes at South Chicago.

Our transfer foreman, Max Lewandowski, attended the convention of delegates to the Relief Department held at Cincinnati, Ohio, on June 22 and 23. Statement Clerk J. S. Cusick, South Chicago, also attended, he being a member of the Operating Committee. Now we know that South Chicago was well represented.

### Ohio Division

Correspondent, A. E. ERICH

A certain young clerk-stenographer in the General Car Foreman's Office was seen recently calling on Henn and Haynes, the local dispensers of those gems which the fair sex always seem more than pleased to receive. Putting on a bold front (although with knees shaking) he told the clerk, "I want to get a diamond engagement ring." She is wearing it on the right finger at Frads' Candy Store. We hope she proves to be the "candy kid" for "Schwitz."

And then—another clerk in the same department, so we hear, has let the contract for a new "Love-Nest" on Water Street. He evidently believes in getting the cage before he gets the bird. Our informant also tells us that Charles has some difficulty in making his numerous calls on his fiancée. He suggests that a motor bus line between Chillicothe and Williamsport, Ohio, operated at least three times per week, would bear looking into as a "side line" for some employe.

Better look out "Tubby" and "Reedy;" you may be next.

Miss Clara "Ted" Moore, Storekeeper's Office, has purchased a Ford coupe. He now rides to work—accompanied of course.

#### James Emmett Braley

James Emmett Braley was born at Langsville, Ohio, on July 22, 1861, son of Elliott and Juanetta McKnight Braley. He came to Chillicothe in 1884 and accepted a position as freight brakeman on the old C. W. & B. R. R. This position he held until 1890 when he was promoted to freight conductor. After years of faithful service he was promoted to passenger conductor in 1911. In this capacity he was serving at the time of his untimely death, on May 19. He was married to Miss Nellie Murphy of Stewart, Ohio, in 1889. This

union was blessed with a daughter and son. The daughter died at the early age of two years. The son, Frank, who survives his father, has followed in his footsteps. He is a conductor on the Ohio Division. They were constant companions. The orders to which he belonged lose a loyal member and the Company, a faithful employe. He was a member of the Masonic Fraternity, Baltimore and Ohio Veterans' Association, and the Order of Railway Conductors. In the last two named, he held positions of trust. Mr. Braley was a lover of outdoor sports, especially of fishing and hunting; he was a man of conservative and broad ideas; he was loyal to his friends and his orders and to the Company by which he was employed, and it is needless to say he will be greatly missed, not only by the widow and son, but by all his associates.

The Hagenbeck-Wallace Circus, whose routing was at different points on the Baltimore and Ohio every day for over a week, are without a doubt warm friends of the "Best and Only." At the end of this route, just before leaving, one of the traffic officers of the circus came to Trainmaster Banks, personally, and commented on the movement and handling. As a final remark he said: It was the best handling we have had in four years."

Ask E. R. "Sheeney" Miller, Division Accountant's Office, what made him so nervous and embarrassed when walking up from work with one of the lady clerks. It wasn't the walk, for this occurs frequently—with the same young lady.

A. A. Ramsey, fireman, has taken unto himself a wife. Miss Mary Jenkins, Ray, Ohio, is the lucky girl.

We are glad to announce that George Blake, brakeman, who has been quite ill, is greatly improved.

Howard Rice, ticket clerk, Union Station, Chillicothe, is the proud father of a baby girl, born on May 25. Congratulations!

C. C. "Shorty" Watkins, deadheaded (without authority) to Cincinnati, and came back double. Congratulations and best wishes!

Another victim of Cupid: E. W. Foster, brakeman. Congratulations!

H. G. Files, ticket agent, Athens, is smiling over the arrival of a nine pound boy, born on May 8.

The late Conductor J. E. Braley

We welcome Miss Ruth Buckmiller, new stenographer to division engineer, who has taken the place of Miss Edith Woodall, promoted to Division Accountant's Office. We also wish Edith success in her new position.

From the following note, which accompanied requests for passes in favor of John Race, signal helper, it was learned that he is to be among the ranks of married men.

"Please furnish these passes for John Race, as he is to be married on June 30, 1922. Lord help him."

We are sorry to announce the death of James L. Starlin, yard brakeman, Portsmouth.

To Engineer Clyde Garber, in the loss of his wife, our most sincere sympathy is extended.

Mr. Senff, engineer, who was struck and seriously injured by a street car while on his way home May 6, is getting along very nicely. He hopes to be back on his run before long.

F. M. West, baggagemaster, Hillsboro Local, who recently underwent an operation on his eyes, is improving rapidly.

Please Help SAVE FUEL!

#### SAFETY AGENT "SEZ":

One of the most positive and absolute rules of this Company is that of requiring car repairers to protect themselves by flag or light when working under cars. The necessity and reasonableness of this rule are apparent to every one, yet it is often necessary to discipline men for disobeying this rule, one that concerns their own personal safety. Relaxation of vigilance on the part of those in authority would probably result in a wholesale disregard of this rule by the very men whose lives are protected by it. CAR REPAIRERS, as you value your own safety and the safety of your fellow employes, stick by the BLUE FLAG and use it ALWAYS!

Now is the time for all good employes to BOOST BUSINESS.

### St. Louis Division

Correspondent, H. F. SMITH

Careful Crossing Campaign posters are in every garage, filling station, repair shop, courthouse, public building and railroad station. But there is no advertising better than by word of mouth. Can't each of us talk with the people with whom we may chance to ride, so that when they or we at-

Inside the cleanest and most orderly signal tower on the Ohio Division, located at Sabina. Levermen D. McKinney, John Morey and Charles Ray take special pride in keeping this tower clean, and they are commended on the orderly condition

tempt to pass over a crossing, the Safety idea will be uppermost in mind.

On May 21, Supervisor M. F. Wyatt reached the seventy-third milestone of his life. He is still in active service. This event was justly and proudly celebrated by his family. Mr. Wyatt was born on May 21, 1849, at Danville, Province of Quebec, Canada. He entered service of the K. C. St. J. & C. B., now the C. B. & Q. R. R., as trackman on June 1, 1871. After working two weeks in this capacity, he was promoted to yard foreman at St. Joseph, Mo., where he served for nine years. He was then promoted to foreman of construction gang. As such he worked until September 1, 1887, when he entered the service of the O. & M., now the Baltimore and Ohio, as supervisor with headquarters at Flora, Ill. In December, 1889 he was transferred to the district between North Vernon and Cincinnati, with headquarters at Aurora, Indiana; in May, 1898 he was transferred to district between Seymour and Louisville, with headquarters at North Vernon. In September, 1902, he was transferred to the district between Tower Hill and Shawneetown, over which he is still supervisor. The birthday was celebrated with a family dinner at his home. All of his children and their families were present, with the exception of the oldest son, who was unable to come. Mr. Wyatt has two sons in service of the Baltimore and Ohio, Trainmaster H. F. Wyatt, Newark, Ohio, and Conductor H. A. Wyatt, St. Louis Division. He received many presents but said the thing most appreciated was the shower of letters and birthday cards received from Baltimore and Ohio officials and employes and that for these he is unable to find words to express his feeling of appreciation. We know of no one who is more universally liked and respected by both employes and the citizens of his town than Mr. Wyatt and we sincerely hope that it will be his fortune to enjoy many more birthdays.

Cards are out announcing the wedding of Miss Georgia Bryden to Mr. Andrew Hansen of La Junta, Colo. This wedding took place at La Junta on May 25. Miss Bryden is the daughter of Engineer E. G. Bryden, of this division, and Mr. Hansen is chief clerk to the master mechanic of the Santa Fe, at La Junta. The wedding was attended by Mrs. Bryden of Flora and Mrs. K. S. Pritchett, wife of the trainmaster.

Division Accountant W. S. Hopkins, Garrett, Indiana, located at Flora before the consolidation, paid us a visit while on his vacation. "Hoppy" says that the climate agrees with him; he now weighs 98 pounds with his coat on.

L. R. Ruby departed for Toronto, Ontario, on May 5 to attend the B. of R. T. Convention. He was later joined by Mrs. Ruby and daughter Vera. After the convention was over they visited several places of interest in Canada. Leonard says that no one seems to know Mr. Volstead in Canada.

Edward G. Brydon attended the convention of the B. of L. F. & E. at Houston, Texas, in May. Mr. Brydon, who is an extra engineer on the Springfield District, has been local chairman for several years.

Conductor C. B. Eddings, west end, was confined to his bed, undergoing an operation which caused him to be off duty for about a month. However "Bass" is pretty husky and stood the operation well. He resumed duties on the C7 on the 17th, but because of new passenger runs, he will take the preferred run with Shops layover.

It is rumored that Conductor "Peeky" Wright wants to move again and serious

consideration is being given towards establishing a new terminal in case he runs out of locations.

Conductor A. W. Irwin, while attending the O. R. C. convention at Cleveland, was taken ill suddenly and it was necessary that he be hurried to his home at Flora, where it developed that he had acute erysipelas. He was taken to the hospital where he was in a serious condition for several days. However, we are glad to report that Mr. Irwin has entirely recovered and is again collecting tickets on the Shawneetown run.

Bradford, over at the roundhouse, has removed the awning over the upper lip since he has taken up the drums in the band. Says it interferes with his blowing the snare drum.

Born to General Foreman and Mrs. D. L. Booth, of Flora, on May 28, a baby boy, weighing nine pounds and five ounces. Congratulations are in order. Mrs. Booth was formerly Miss Maragaret O'Haran, of the Car Foreman's Office, East St. Louis.

After selling a party two tickets for Pana, R. M. Allen, first trick operator, Taylorville, learned the party intended to go from Pana to New York via competing line. But by telling them of the service offered by the Baltimore and Ohio, together with the scenery and points of interest to be enjoyed enroute, they purchased two tickets from Taylorville to New York, via our line. Mr. Allen and Mr. McClure, second trick operators, Taylorville, are both wide awake employes of the Baltimore and Ohio, constantly looking out for business for the Company and the interests of the public. Their efforts are commendable.

Did you ever try erasing the addresses written with pencil on large envelopes, form 387-H, thus increasing the life of the envelopes and effecting economy?

Freight Representative C. P. Burrus, Springfield, accompanied by Mrs. Burrus, enjoying his first vacation in his long service with this Company, attended the various functions at Cambridge, Mass., where his son Ray was graduated from the Massachusetts Institute of Technology. While on his vacation Mr. Burrus also attended the wedding of his daughter Mora, at Boston.

Chief Dispatcher's Clerk Charles Chick-adantz had the misfortune to have his leg broken while playing ball at Washington. "Chick" is now confined to his home at Flora, but reports that he is getting rather adept in the use of crutches.

Several of us received some of the fine berries from Trainmaster Pritchett's strawberry farm, located at Farina, Ill. Mr. Pritchett supervised the work of picking and shipping while on his vacation.

Can't someone from East St. Louis, Louisville or Springfield send us some items of interest?

They met on the bridge at midnight, They will never meet again.  
For one was an eastbound heifer,  
The other a westbound train.

#### Motive Power Department

Labor Foreman E. C. Bateman, Locomotive Department, has been off duty for several weeks because of a broken foot.

The carmen at Washington Shops held a picnic at East Side Park on May 25, which was greatly enjoyed by that organization and their families. Two young ladies and a certain work checker are accused of having consumed considerable cake.

John T. Connelly is again on the pay roll, now doing stenographic work in the General Car Foreman's Office.

Twenty-two young ladies from the various offices held a picnic at noon on May 18 on the shop grounds. Sufficient eats were on hand to have fed an additional dozen.

There really isn't any resemblance between "Red" and "Sam," but there is a young lady in the Master Mechanic's Office who can't tell the one from the other. We don't know who should feel worse about it, (possibly the young lady). We don't seem to get any news from Cone. Nobody gets married or goes anywhere. What's the trouble, J. A. Q., you promised to give us something.

#### Something We Would Like to See

CAREFUL CROSSING CAMPAIGN—without an accident on the St. Louis Division

Richard come in and not stop at a certain desk

A clerk in the General Locomotive Foreman's Office

Everybody in a good humor on Monday

#### Sayin's Often Heard in the Office

Chief Clerk—Is Miller in there?

Gib.—Have you got the cards ready?

Leo. J.—Billie, gimme a pencil.

E. B. W.—Joe, tell Mr. Hopper I want to see him.

Dot—Johnnie, tell the boiler inspector to come over.

#### Accounting Department

C. H. Bier and Leo Isenogle have returned from Dallas, having attended the Clerk's Convention there. Everything is quiet on the Potomac now. Division Accountant Summers is back on the job, but wearing "specs." Had the misfortune to get a cinder in his eye while "viewing the landscape" from the back end of one of our banana specials. Result, two days off. The office force presented Mr. and Mrs. Leo Isenogle with a beautiful four piece silver coffee service as a wedding gift. The account of their wedding appeared in a previous issue.

The baseball diamonds are now in use. Every evening sees a close game. How we miss "Zuke's strong right arm—well now, I guess there are some of us who do miss him—three guesses!

Lloyd Ackerman has been assigned to the position temporarily made vacant by Earle Dykins, on leave of absence.

George T. Hoffman is the proud father of a baby girl, Betty Lu. Best wishes to Betty Lu and her mother.

Clyde Catt, chief clerk to the division accountant, Pittsburgh, visited us recently.

A number of the force attended the automobile races at Indianapolis on Decoration Day and all got back whole. Nothing "busted" but their pocketbooks, which, from all indications, were pretty flat.

#### Toledo Division

Correspondent. EDWARD M. MANNIX

#### East Dayton

The letter addressed by Superintendent R. B. Mann to his staff, speaks in the most optimistic terms of our future. He says that the business must stay on our rails, and stay it will, as he urges all to use their utmost efforts to this end. He has proved himself "a live wire," and he wants none but live wires around him. That's the stuff, Chief, that's the stuff!

The writer received an invitation to attend the outing of the Baltimore and Ohio Employes at Chester Park on Saturday May 28. I desire to thank the Committee

and to add that it was just another of those successful events so characteristic of Cincinnati, Ohio.

One of our recently furloughed boiler-makers blew in the other night for a short visit. Looking the picture of health and the future representative of prosperity, he informed the writer that he had secured a very good position in the West, and was drawing down "300.00 per." I didn't get the "per" exactly right, but, I think it was "per-haps."

To use the language of baseball, all of the boys at the East Dayton shops are batting around the 300-mark and under. Captain Gilmore, they are surely making a record. Everybody's hitting the ball!

#### A Picture

Pipefitter Forrest Davis, third shift, with one of those million dollar smiles and a big box of El Verso's. Reason: Heir to the throne. Good luck, Forrest! May he live and prosper.

Just took a little walk around the yard trying to dig up a little news, and this is what I found:—At the depot, Station Master T. J. O'Neill in his usual "Sherlock Holmes" attitude. Harvey Voris looking over his glasses, thinking that he saw something. Yardmaster "Bill" Conway, away over in North Dayton, trying to keep track of the passing trains (impossible)! Kept me busy keeping out of the way; but, I remembered "Safety First" on my news hunting expedition. I just said to myself—"That Baltimore and Ohio is doing *some* business."

President Daniel Willard said on the first page of our May Issue: "We will make Ours the Best Railroad in the world in point of service." Nothing else to it. He is the man who put the "Will" in Willard.

I'm going to have a couple of new correspondents for the August issue. One from Toledo, Ohio, and one from Hamilton, Ohio. Fretty soon I'll have the whole division covered in nice shape; than we can more fully carry out that Neighborly idea—"Among ourselves."

#### But Remember

If you're looking for a rep,  
Just get out and show your pep;  
Everyone to you'll be "hep—"  
Then—"Watch your step."

Just heard it said: "You can't beat those three correspondents of the Toledo Division, McBride, Garrigus and Mannix." Glad somebody is boosting. We get knocks enough—but, then it's the old saying—"Nobody knocks a dead one. Try a San Felice on us!"

There's a special sale on Safety Stock that's only bought with brains,  
It's agents are the Baltimore and Ohio,  
whose men run all their trains.  
The dividends are very large and safe  
returns they pay,  
The bonds are labeled very plain—"Safety every day."

#### Division Accounting Office, Dayton, Ohio

Correspondent, G. M. McBRIDE

"Go to the ant, thou sluggard, consider her ways and be wise."

Some time ago the office was startled by the sound of a miniature locomotive and looked up to see a small boy who had invaded the office with his father. Needless to say his father is an engineer and that he is training his son to have a love for the same line of work which he followed. That boy has heard the call, even as we have; the

shrill, sharp whistle of the locomotive is being heard often now since the business on the Toledo Division has increased to such a great extent. We ought to imbibe some of the enthusiasm and cooperate so far as we are able. It takes the little drops of water to make up the mighty stream. We are the little drops of water, yet each one can lend a hand toward making a prosperous, efficient division.

We are glad to note that one by one our fellow workers are swooping down on us with flivvers. Mr. Maus is the latest of our number to possess one. Just a word of advice, "Billie"—don't go down on Third Street and carry on like Mr. Fenner did—stopping traffic, etc., and then wake up to find that the trouble was "no gasoline," nor yet provide a means of safety, as Stoecklin did, and all at once wake up to find that you cannot spin off in your own machine until the lock is taken off the front wheel.

The new siding, an elevated track, for the City of Troy lighting plant, has been completed and is now in use. This track was started in January, 1921, and completed in May, this year. A concrete trestle was constructed. This is quite an improvement for the City of Troy, since it serves two purposes; that of furnishing fuel for the lighting plant in addition to coal for the proposed coal yard. The intentions are that this coal yard will be operated by the City of Troy for the benefit of its residents.

Keep our "Safety" campaign going. Put stickers on every letter you send to your friends. The campaign lasts until October 1—get your stickers and use them.

The Dayton Union joint tracks from Second Street to Miami Junction, which are joint tracks for all railroads entering Dayton, are being reballasted and new steel laid. This is one of the busiest pieces of track in the United States—55 passenger trains being scheduled over it daily, in addition to freight trains.

The man who knows your name and face your occupation and your race, your desk, your chair, your hat, your shoes, and various other bits of news, is Mr. Hockett—paymaster.

Several of our number attended the annual picnic at Cincinnati on May 27 and reported a good time. Someone has asked why "Gene" didn't get in the tug of war. Were the other fellows too big for you, "Gene?"

Edmund Velten, Jr. whose daddy holds forth in the Division Accountant's Office

Tracks for the Wilson Engineering Company, Jamestown, Ohio, have recently been completed. These consist of coal and delivery tracks. This firm also expects to erect an elevator at an early date. These tracks will net the railroad a nice sum from the fact that this is a wealthy farming community and the Baltimore and Ohio can expect plenty of business.

The accompanying picture is of the son of "Eddie" Velten, motive power timekeeper.

Worth Ralph and W. G. Ball have again taken positions with our Accounting Department. Needless to say, everybody extended them a cordial welcome. From their countenances we judge that they are just as glad to be with us again as we are to have them.

Maintenance of Way Accountant and Mrs. M. F. Beck are contemplating a trip to Rochester, Minnesota in the near future, for the benefit of Mr. Beck's health. We trust that this trip will prove to be beneficial to his health and that he may soon return to us.

#### Lima

Correspondent, RAY GARRIGUS

Switchman Albert Conners is the proud father of a nine pound baby girl. Congratulations, "Al!"

Air Brake Repairman Lorenzo Davis spent a pleasant vacation in Baltimore, Md.

'Tis rumored that Yard Clerk Harry McDonald is to take unto himself a better half and will spend a month honeymooning through the East.

Frank Snyder, veteran switchman, stole a march on the gang. With his happy bride he is spending the honeymoon in New Orleans. Good work, Frank!

Foster Sanders, switchman, is attending the convention of the trainmen at Toronto, Canada. Foster has many friends at Lima and he mailed back many postal cards. Many, I say, about a hundred and fifty. The postman was busy on that day for "Fos" sent them all C. O. D.

Carl Koch, pipefitter, can't be touched with a ten foot pole. Why? It's a ten pound baby boy, of course. Arrived June 4, and has been named James. El Versos, please.

Harry Gunn, boilermaker, bought a new Studebaker and 'tis said he went through the wrong end of the garage the first time he stepped on 'er. Better luck next time, Harry. Put a turntable in that garage.

Crew Caller Leo Finn has been advanced to first trick roundhouse clerk.

"Pete" Slusser, veteran engineer, pilots yard engine 93 around Lima shops. "Pete" is a veteran in the service, having worked for the Baltimore and Ohio continuously for 43 years. He has an enviable record for promptness and regularity on duty. Slusser, Harboldt, Light and Loudon make a crew hard to beat at switching, fish stories and politics.

Say, did you notice the smile that Ticket Agent L. E. Swick is passing across the counter with the tickets? Well, I should say! It's a nine pound baby girl and her name is Gloria. Congratulations!

Yardmaster C. W. Jennings has been absent from duty for some time account of illness. The boys at North Lima will certainly be glad to see him back on the job.

We understand that John Cussick, yard clerk, is to be married sometime in July, although, of course, we have not yet received the official reports. Best wishes, John!

1. A sextette of Railroaders visit Lima  
2. Keith, Vivian and Bernard, children of Passenger Car Repairman Lawrence Lamb

This photograph was taken at Lima shops. Left to right they are: Car Foreman F. Richardson, Newark; District Master Car Builder W. A. Bender, Northwest District; Car Foreman E. L. Hannon, Lima; General Foreman T. C. O'Brien, Lima; General Car Foreman E. H. Mattingly, Chicago Terminals; District Master Car Builder C. M. Hitch, Southwest District.

Miss Katherine Fitzgerald, stenographer, General Foreman's Office, is the owner of a new Ford sedan.

We extend our sincere sympathy to William and Roy Hunt, painters, in the death of their father, John Hunt.

Assistant Passenger Car Foreman William Wendler, Lima Shops, died at his home on May 19. His death was sudden and was due to heart trouble.

Mr. Wendler had attended sessions of Lima Lodge of Odd Fellows and returned home with several friends. They stopped a few minutes before his residence and Mr. Wendler remarked how well he felt. He entered the house.

When the wife arose the next morning she found the lights still burning and her husband's body lying on the floor of the dining room.

Mr. Wendler was born in Germany, on May 2, 1860. He came to America when about 12 years old, entering the service of what is now the Baltimore and Ohio in September, 1883 as a freight car repairer at Lima. He was advanced from freight car repairman to passenger car repairman in 1889, and to coach foreman in 1907. He held this position until 1916, when the Lima coach shop was destroyed by fire. When the coach shop was rebuilt, Mr. Wendler was made assistant passenger car foreman, which position he held at the time of his death.

A thorough and efficient passenger car man, he knew the passenger equipment of the railroad as few others knew it. He gave

the best that was in him always and in his passing the Passenger Car Department lost a valuable man.

Mr. Wendler was an active member of the I. O. O. F. lodge and the Veterans' Association.

The funeral was held in the First Reformed Church on May 21, at 2 o'clock. Rev. T. W. Hoernemann, pastor, conducted the services. The floral tributes were numerous and beautiful.

Interment was made at Woodlawn Cemetery, two hundred shopmen attending in a body.

Here is a picture of Keith, Vivian and Bernard, children of Passenger Car Repairer Lawrence Lamb.

### Sandy Valley & Elkhorn R. R.

Correspondent, H. L. GRAHAM  
Telephone Maintainer

The two year re-examination of men in the Kentucky District on train rules commenced on June 6 and is progressing nicely on the L. F., M. C., and S. V. & E. Branches.

The Kentucky District has established an exceptional loading record during the past few months. During the month of May there were loaded on the S. V. & E. R. R., 3655 cars of coal. On the L. F. branch 2171 cars were loaded, making a grand total of 5826 cars for the Kentucky District during May. This number of cars surpasses by several hundred the loading record for the district during any previous month, despite the fact that the Miller's Creek branch has not loaded a car of coal since the beginning of the coal strike on April 1. This means increased business for the Baltimore and Ohio main lines as all of this business from this district is routed via Baltimore and Ohio beyond Cincinnati.

On the night of June 4 the mountain streams of eastern Kentucky were suddenly swollen to several times normal size by a

cloudburst. This unusual rush of water did considerable damage on the Clear Creek branch of the L. F. R. R., washing entirely away eight of the fourteen wooden bridges and dislodging several bents under the remaining six. About 2000 feet of fill and ballast along this branch was also washed away, leaving ties and rails suspended. Our division engineer, Mr. White, with the railroad ditcher in charge of THE ONLY DITCHER ENGINEER, "Shorty" Beck, expects to have this branch of the L. F. R. R., again in operation within a few days.

On June 1 one additional passenger train a day, each way, was installed on the L. F. R. R., and its branches. This new train is made up entirely of new equipment in charge of Conductor Fred Ludwick; it will be pulled by engine No. 1399 with our old reliable engineer, John R. Boggs, at the throttle. This new service is greatly appreciated by our many patrons as it enables them to make the trip, either way, between all points on the L. F. R. R., and Cincinnati or Huntington.

District Superintendent H. R. Laughlin has recently been informed that the Kentucky District is to be furnished with a nice equipment of shop machines which he will have installed at Jenkins, Ky. When this installation has been completed, Mr. Laughlin will take care of all necessary repairs above class 2 on all locomotives on the S. V. & E., L. F., and M. C. branches, thereby enabling the Kentucky lines to effect a big saving in locomotive maintenance.

On Sunday, May 21, we operated over the S. V. & E., an honest to goodness baseball special, handling the Wolf Pit baseball team and six hundred of their staunch supporters, to Jenkins, where all claim to have had wonderful time regardless of fact that they lost both games, the first, 2 to 1, and the second, 3 to 2.

Again on Sunday, June 4, another baseball special was operated over S. V. & E., this time from Edgewater to Jenkins. The Edgewater team and "fans" were equally as sure of victory over Jenkins as were the Wolf Pit citizens, but we are sorry to say that many of Edgewater's supporters had to borrow train fare to get home. Edgewater lost the first game 4 to 2, and the second, 6 to 5. This leaves the Jenkins nine undefeated so far this year, a fact which makes Manager H. R. Laughlin and us "fans" justly proud. Arrangements are now being made for a baseball special from Ashland, Ky., to Jenkins, during the latter part of July. This will bring together two ball clubs that have not suffered defeat so far this year.

The many friends of the famous short stop A. R. Hunter, better known as "McGaffigan," will be pleased to learn of his promotion from stenographer to Chief Clerk, Kentucky District, to the position of chief clerk to Assistant Division Engineer W. P. Abbott, the Cincinnati offices. Mr. Hunter has been stenographer to Chief Clerk Gatwood at Jenkins for the past two years. We are glad of Mr. Hunter's good fortune, although we are sorry to lose his companionship.

District Superintendent Laughlin has just received information from the Villa Madonna Academy, Covington, Ky., that his daughter, Miss Rose Alice Laughlin, has been awarded the sophomore scholarship medal, having attained in her examinations the highest average of any of the ninety-three scholars enrolled at the school. Miss Laughlin expects to return home this month for her vacation but will return to Covington early in September to begin her junior year.

## Pensioners Roll of Honor

(Continued from page 29)

### George W. McKensie

George W. McKensie, pensioned section foreman, Cumberland Division, was born on February 22, 1857, at Rawlings, Md. He entered the service of the Baltimore and Ohio on April 15, 1877, as trackman, Twenty-first Bridge, just east of Keyser.

In January, 1883 he was promoted to section foreman, Section 29, Brady, Md., remaining in this position until he was retired.

### John T. Cissell

John T. Cissell, pensioned machine operator, was born in Martin County, Indiana, on November 11, 1854. His parents were Robert and Harriett (Bramble) Cissell, from near Mt. Pleasant, Indiana.

After attending the public schools for about 12 years, Mr. Cissell obtained employment on a farm, where he remained until July, 1892, when he came to the Baltimore and Ohio as laborer, Washington, Indiana. In 1903 he was made nut tapper; in 1906, bolt cutter; in 1911, machine shop hand; in 1916, machine operator, which position he held until the time of his retirement.

Mr. Cissell married Miss Julia McBride in 1889. They have five children.

### John Hession

John Hession, pensioned engineer, 54 years' service, was born in County Galway, Ireland, in 1854.

He began his service with the Baltimore and Ohio on April 4, 1868, as laborer, Cumberland Division. On September 10, 1870 he was made hostler, and in 1884 he was promoted to engineer, shop engine; during the next year he became yard engineer. He was pensioned in May, this year. His retirement was due to failing eyesight, brought on by a cataract on his eye.

Mr. Hession was a loyal railroader, popular among his fellows, and one who paid close attention to his work. In 1879 he was married to Miss Mary McMahan. To this union ten children were born, six sons and four daughters, all of whom are living except one daughter, Alice, who died several years ago.

Mr. Hession always loved his work and it is with reluctance that he "steps down." May the closing years of his life be years of rest and happiness.

### Michael C. J. Dugan

Michael C. J. Dugan, pensioned boiler-maker, Keyser, W. Va., was born on October 16, 1855. He entered the service of the Baltimore and Ohio as water boy, Road Department, in 1869. On June 1, 1870 he entered the Machine Department under Master Mechanic A. J. Cromwell, Piedmont, W. Va. In 1872 he was promoted to boiler-

maker. He moved to Keyser in 1875, when he entered the new shop under S. A. Silves. In June, 1880 he moved to Cumberland. In 1896 he was furloughed. He re-entered the service in the Road Department in 1897; was later transferred to the Car Department at Keyser, but was recalled to Cumberland in 1898 as boiler-maker. He returned to Keyser in 1904 and remained in the position of boiler-maker until the time of his retirement.

### Jacob P. Jefferys

Jacob P. Jefferys was born on February 20, 1857, near Tunnelton, W. Va. He spent his boyhood days attending a rural school in that vicinity, and later spent several years in farm work at his home.

In 1890 he moved to Grafton, W. Va., and entered the service of the Baltimore and Ohio as truckman, Freight Department. In 1884 he was made checkman, and in 1902, tallyman. He remained in this service until his recent retirement, at the completion of 32 years with the Baltimore and Ohio.

### Robert T. Harris

Robert T. Harris, pensioned boiler-maker, was born at Black Walnut Post Office, Virginia, on June 6, 1857. For four years he worked in a country store at Barksdale Depot. In 1882 he moved to Baltimore where he entered the service of the Company as helper, Mt. Clare. In 1888 he was made riveter, and in 1902, boiler-maker. He has been on relief because of illness since September 6, 1910. He was pensioned in June, this year.

### Charles W. Thayer

*Note: Mr. Thayer's photograph appeared in the June issue of the Magazine, but through an error, the write-up of his life was omitted.*

Charles W. Thayer was born on March 11, 1857, at Terra Alta, W. Va. Here his father was engaged in the hotel business. Several years later his parents moved to Walkers, W. Va. Here Mr. Thayer attended school for about ten years. His father owned and operated a small farm where Mr. Thayer worked during his early boyhood. In 1880 he entered the service of the Baltimore and Ohio as a brakeman. He continued in that capacity until 1885 when he was transferred to the Maintenance of Way Department. One year later, he was again transferred to Rowlesburg, W. Va., as a pumper, where he worked for about 19 years. About 1905 Mr. Thayer moved to Cumberland where he continued working for the Company as a pipeman until his retirement. Mr. Thayer married Miss Ella Wheeler in 1886. They have three children—two sons, one working as a clerk in the Post-office Department at Cumberland, and one as a truck driver, working in Washington, and one daughter, a school teacher, working in Cumberland. Mr. and Mrs. Thayer now reside at 58 Baltimore Avenue, Cumberland, Md.

## “Twenty years I’ve carried this watch”

**E**NGINEER Charles Monk, of the Erie Railroad, is proud of his Hamilton. Twenty year companions they’ve been, and the Hamilton has been a faithful, reliable comrade.

Even Engineer Monk wouldn’t estimate the enormous number of trains he has brought in “on time.”

He does say that in the ordinary day’s work he must consult his Hamilton dozens of times.

Dozens of times a day, multiplied by three hundred odd days a year and by twenty years—that would make a figure which in itself spells “service.” Through it all his Hamilton has given accurate time.

This experience of Engineer Monk is but the echo of the experience of thousands of other railroad men who own Hamilton Watches. And these men know that for time inspection service the Hamilton 16-size, 21 Jewel, No. 992, is the most popular watch on American railroads.

Hamilton Watches range in price from \$40 to \$200; movements alone, \$22 (in Canada, \$25) and up. Send for “The Timekeeper,” an interesting booklet about the manufacture and care of fine watches. The different Hamiltons are illustrated and prices given.

**pudding Pan.** Used like this for puddings, cakes, bread. Also milk dish. 2½ quarts.

Used as Colander. Handy to rinse berries. Also used as Strainer

Used as a Double Boiler. Cooks cereals, no scorching. Steams vegetables in top. Kettle Cover made of thick aluminum.

When used as Casserole ideal for baking apples, beans, escaloped potatoes, macaroni, etc.

When used as Preserving Kettle distributes heat evenly. Not necessary to stir the contents.

Corn Popper. This combination is what you want for special things—corn popping, crisping corn flakes, roasting coffee, etc.

Combination Cooker. Used this way for general purposes not so well filled by any other utensil. Ears of kettle hold upright or lowered position.

Self-Basting Roaster. When used this way makes juicy, well browned roasts. A perfect self-baster. Steam condenses on cover and drips back.

Used this way is a Steamer Set. For steaming potatoes or corn on cob. Perforated bottom makes uniform cooking.

Corn Popper. This combination is what you want for special things—corn popping, crisping corn flakes, roasting coffee, etc.

Combination Cooker. Used this way for general purposes not so well filled by any other utensil. Ears of kettle hold upright or lowered position.

Self-Basting Roaster. When used this way makes juicy, well browned roasts. A perfect self-baster. Steam condenses on cover and drips back.

Used this way is a Steamer Set. For steaming potatoes or corn on cob. Perforated bottom makes uniform cooking.

Corn Popper. This combination is what you want for special things—corn popping, crisping corn flakes, roasting coffee, etc.

Used this way for Tubed Cake Pan. Removable tube. Cakes taken out easily without breaking.

A complete cooking set in this wonderful combination. Send only the coupon and we ship the set, all charges prepaid. Try it 30 days on free trial, and then if not just what you want, pay nothing and send it back and we'll pay the return postage charges. If you keep it, pay bargain price at the end of 30 days' free trial and it is yours. Mail coupon today.

## Wonderful Combination ALUMINUM Cooker Set

5 Pieces, Make 11 Utensil Combinations

- |                      |                      |               |
|----------------------|----------------------|---------------|
| pudding Pan          | Tubed Cake Pan       | Casserole     |
| Preserving Kettle    | Double Boiler        | Convex Kettle |
| Combination Cooker   | Strainer or Colander | Steamer Set   |
| Self-Basting Roaster |                      | Corn Popper   |

Made of best heavy-gauge aluminum—bright, silvery, beautiful, easy to keep clean, light to handle—guaranteed for life.

This complete set gives you eleven utensil combinations. Outside kettle holds 6 quarts, inside pans 2½ quarts, other utensils in proportion. All highly polished on outside. Sun-ray finish inside. When not in use all pieces nest together. Takes up little space. Sets on shelf. Bails (or handles) detachable. You must see it and use it to realize what it really is. So send at once.

Order by No. 417DMA6. At end of 30 days' free trial, pay only \$2.75 if you keep it. Shipped from Chicago prepaid.

Tourist (in village notion store)—  
 Whaddya got in the shape of motor car  
 tires?

Saleslady—Funeral wreaths, life pre-  
 servers, invalid cushions and doughnuts.  
 —*Life*.

## Hot Weather Poetry—or Something

A peanut sat on the railroad track,  
 It's heart was all a-flutter;  
 The 3-45 came thundering past—  
 Toot! Toot! peanut butter!

—*The News*.

## En Route

"Mose, what would you do if you re-  
 ceived a letter from the Ku Klux Klan?"  
 a local Negro was asked.

"Well, sah, I'd read it on a train," replied  
 Mose.—*Atchison Globe*.

"Do you drink?"

"No."

"Then hold this quart while I tie my  
 shoe string."—*Railroad Red Book*.

## Such an Odd World.

In Chicago they tell of a fascinating  
 young married woman who, in the absence  
 of her husband, received much attention  
 from an old admirer. One evening the  
 latter ventured to become reminiscent.

"Ah," he sighed. "If only you had  
 married me instead of Babcock."

"Then I should have been with Mr.  
 Babcock at this very moment instead of  
 with you," answered the fascinating one.  
 "How strangely things turn out!"

—*American Legion Weekly*.

## Wifie to the Rescue

Young Doctor—"My Jove! Mary, this  
 sitting around waiting for a practise is  
 getting on my nerves."

Doctor's Wife—"Couldn't we invite the  
 neighbors to dinner and give them some-  
 thing that would disagree with them?"

## Coming Through with Rye

Should a body greet a body  
 With a bit o' rye,  
 Should that body gie the body  
 Muckle o' the rye,  
 Should the body kiss the body,  
 While the spirit's high;  
 Why should that body ask the body  
 Where he got the rye?  
 —*Railroad Red Book*.

## Reassuring

Six-year-old Dora returned unusually  
 early from school the other day. She rang  
 the door bell. There was no answer. She  
 rang again, a little longer. Still there was  
 no response. A third time she pressed the  
 button, long and hard. Nobody came to  
 the door, and she pressed her nose against  
 the window pane and in a shrill voice,  
 which caught the ears of every neighbor,  
 called:

"It's all right, mamma, I'm not the  
 installment man."

—*Weekly Telegraph* (London).

## A Word for Father

"Dear God," prayed golden-haired Willie,  
 "please watch over my mamma."

And then he added as an afterthought.  
 "And I dunno as it would do any harm  
 to keep an eye on the old man, too."

—*The Leatherneck*, Washington.

A colored recruit who had been placed  
 on sentry duty was accosted by a corporal  
 who asked if the sentry had seen anything  
 of the captain.

"Ah ain't seen no cap'n," said the recruit.  
 After a little while the corporal passed  
 that way again and repeated the inquiry.

The sentry had still not seen the captain.  
 Presently, however, the captain appeared.

"Ain't you the cap'n?" asked the sentry.  
 The other replied that he was.

"Well, you all is gonna get it! That  
 co'pral is been lookin' high en low fo'  
 you," the sentry exclaimed.—*Ex*.

## To Horse!

Young Son: Papa, now that you've  
 bought sister a piano, couldn't you buy me  
 a pony?

Father: What for, my child?  
 Son: So I can go out for a ride when she  
 is learning to play.—*Der Brummer* (Berlin).

Two soldiers foraging for a meal behind  
 the lines in France caught a stray hen.  
 Pat was about to wring its neck, saying,  
 "What luck; now we'll have a fine supper."

"Nae! Nae!" said Sandy, "Dinna kill it  
 yet, mon—keep it for breakfast—it might  
 lay an egg."—*The Beaver*.

A Scotchman went to his doctor com-  
 plaining of loss of appetite. The doctor  
 advised him to exercise more; take his horse  
 out of the stable and ride ten or fifteen  
 miles a day—then he would come back  
 ravenously hungry.

Andy considered a moment, then said,  
 "Aye, but wadna some ither exercise dae.  
 What about the horse's appetite?"  
 —*The Beaver*.

In a case tried in a Western court a  
 stonemason was called to describe the way  
 in which he had been assaulted by the de-  
 fendant. "He walked right into me,"  
 the witness said, "and slammed me against  
 one of my own tombstones."

"Were you hurt?" inquired the court.  
 "Was I hurt, judge! Why, I've got  
 'Sacred to the Memory of' stamped all the  
 way down my back!"—*Country Gentleman*.

## The Pay-Car

By James Edward Hungerford

Illustrated by Robert L. Heiser

An engine is ever a source of attraction;  
 A day coach is full of appeal to the eye;  
 The sight of a Pullman affords satisfaction—  
 A thing of rare beauty and comfort, say I;  
 Of praise the express car's deserving its measure;  
 The diner's a marvel, it's way above far,  
 But somehow there's none of e'm gives us the pleasure,  
 That thrills at the sight of the Paymaster's car!

We watch for its coming each month with elation,  
 And hail its approach with a feeling of pride;  
 We greet it with joy when it stops at our station,  
 And give it a welcome we'd tender a bride.  
 The Paymaster's car! How it makes us all hustle  
 From roundhouse and depot and section and yard,  
 To draw for the work of our brain and our muscle,  
 The dollars we've rustled for almighty hard!

There's bills rolling in from the butcher and baker;  
 The grocer is asking for money that's due;  
 The wife's got a call to go see a dressmaker;  
 And maybe we're booked for some articles, too;  
 The boy has to visit the shoeman and hatter;  
 The girl has some gew-gaws and trifles to get,  
 Perhaps we're some short, but then what does it matter—  
 The pay-car is comin'—there's no need to fret!

## How It Feels to Have a Boss

By the Honorable John J. Cornwell  
General Counsel

(Editorial Note)—At the June 20th meeting of the Board of Directors of the Baltimore and Ohio the Honorable John J. Cornwell, former governor of West Virginia, was elected General Counsel of the Company, succeeding the late Hugh L. Bond, Jr. A full account of the career of Mr. Cornwell was given in the December, 1920 issue of the Magazine on the occasion of his election as a director of the Baltimore and Ohio. It told of the small farm of his father, a Confederate veteran, in Hampshire County, West Virginia; of his birth in Ritchie County on July 11, 1867; of the sale he made when a lad of fifteen in Cumberland of one of the first baskets of improved peaches to be raised in Hampshire County, and of his purchase with the money thus secured of the two book classics "Plutarch's Lives" and "Creasy's Fifteen Decisive Battles of the World."

Trained in the arduous toil of the farmer lad, he was able at the age of seventeen to handle a track-hand's job at ninety cents a day on the Baltimore and Ohio. His next regular job paid \$1.00 a day and took him into the woods to peel bark for tanning purposes. School teacher at seventeen and a lumberman during vacations, he managed to increase his store of learning by a short term at Shepherd's College, Shepherdstown, West Virginia. He was school principal at Romney at the age of twenty. Three years later he and his brother bought the Hampshire Review, a weekly newspaper which has

been under his control ever since. While running this paper he studied law, was admitted to the West Virginia bar in 1894, and began to practice. In 1900 he and his brother began the building of the Hampshire Southern Railroad, now a part of the Baltimore and Ohio. From 1899 to 1907 he was a member of the West Virginia State Senate and was Democratic nominee for governor of West Virginia in 1904, and although not elected, ran 26,000 votes ahead of the national Democratic ticket.

From 1906 to 1916 he practiced law and developed private business enterprises. In 1916, upon a state-wide demand from his party, he became candidate for governor and was the only Democrat elected. His period of office was notable for much constructive legislation.

Shortly after Mr. Cornwell took up his new work for our Railroad in Baltimore in July, the writer, knowing him to be a newspaper man who appreciates the value of good copy, as well as a most interesting figure in political and business life, asked him if he would consent to an interview. And the subject of this article was suggested as an appropriate one for Mr. Cornwell to talk on because, as general counsel for the Baltimore and Ohio, he is, for the first time since his earliest working days, amenable to the business policies of an organization of which he is not the chief.

His reply as given in the interview, in substance, was as follows:

IT is quite a coincidence that the subject suggested for this interview is one which was for some time uppermost in my mind after the tender of the position of general counsel of the Baltimore and Ohio came to me. Although every man, in no matter what position in life, is dependent upon the good will of those he represents, whether it be in the capacity of attorney, orchardman, school teacher, railroad builder, governor or what not, it is a fact, nevertheless, that during most of my life I have, so to speak, "sat at the head of the table." This has perhaps been due to force of circumstances, which every thinking man knows plays a large part in the lives of most of us. It just happens in my case, however, that as editor and owner of a country

newspaper, lawyer, farmer and governor, it was but fitting that I should form opinions and enunciate policies which were my own.

Fortunately your question, "How does it feel to have a boss?" so far as I am concerned—has already been answered. I refer to the farewell editorial which I wrote for my newspaper, the Hampshire Review, on the day I was severing my active connection with it to take up my work as the general counsel of the Baltimore and Ohio. And particularly do I refer to the paragraphs addressed in an intimate way to the readers of the paper, so many of whom have been personal friends of mine for years, as follows:

"And now a word of explanation to those near friends, who

will, a few at least, regret I have taken this step. It is not prompted by hope of greater monetary reward. The fact is that after grappling for four years with big and interesting problems, it is hard to content myself with the smaller and less interesting things of the small town. Then the associations appeal to me. I have never known finer men than Daniel Willard, president of the Baltimore and Ohio Railroad Company, and those whom he has gathered around him in the management of the property—his staff. I believe I can work with them, having confidence in them and I could not resist the invitation to become a member of that staff

"The Baltimore and Ohio Railroad is the biggest single institution in West Virginia. It employs more men, pays more wages, serves more people and pays the most taxes. I have no apology to offer for becoming a part of its organization, but if a time should ever come when I cannot, conscientiously, serve it, or those in charge do not find me as useful as they now think I may be, I will, of course, sever my relations with the Company and hope, under such circumstances, to again become actively connected as editor with The Review which, for nearly thirty-two years, has been a part of my very life."

That little message to the men and women who have been reading, some of them for over thirty years, my editorials in the Hampshire Review, tells pretty well how I felt about accepting a position with the Baltimore and Ohio. It was not intended for the eyes of Baltimore and Ohio people and yet I am glad that it is being brought to their attention in this

way because I believe that if a man stands for something he ought to be willing to get up in meeting and say so.

Certainly it seems to me that the degree of pleasure and profit a man gets out of his work depends principally upon the extent to which he believes in the business he is working for, the way it is managed and the men who manage it. And here the employes of the Baltimore and Ohio are especially fortunate.

A good deal of water has flowed over the railroad dam since I began work as a trackman for our railroad in 1884. Practically the whole principle and practice of government control of railroads in this country has been evolved since that time. Practically the whole growth of trade unionism here, and especially on the railroads, has taken place during that period. And I am not expressing my own opinion alone, but that of other men of experience, both in the railroad business and in other lines of industry, when I say that there is no railroad in the United States which has shown itself more anxious to fall

Hon. John J. Cornwell, General Counsel

*A tall, erect, white-haired, smoothly shaven man, who gives an impression of great physical power and youthfulness of body; one who looks a stranger straight in the face with a pair of friendly, yet penetrating, dark brown eyes and who extends his hand with genuine warmth of greeting—that's former Gov. John J. Cornwell, of West Virginia, who was elected general counsel of the Baltimore and Ohio Railroad last week. He has just taken charge of his offices in the Baltimore and Ohio Central Building.*

*There is no aloofness about the Governor. He's a solid figure of a man who clearly weighs enough to keep his feet solidly on the earth—probably upward of 180 pounds distributed over six feet of height. His outlines are those of an athlete. His face, the features generously sketched, is tanned brown. He has been a hunter and a fisherman, rather than a golf player, fond of spending days in the open, cooking his meals over a fire of twigs and sleeping on pine boughs, either in West Virginia or in Colorado. And he shows it.—Baltimore Sun.*

into line with the new ideals of public service associated with the transportation business, more amenable to the spirit of the times as expressed in the quasi-control of such governmental bodies as the Interstate Commerce Commission and the Railway Labor Board, more willing to recognize the right of employes to organize themselves into trade bodies and to meet with the representatives of these bodies in free and frank discussions, calculated to bring about the best results possible for all concerned, than has been the Baltimore and Ohio during the recent twelve year period of its present leadership.

As illustrations of this I merely mention the well-known practice of the Baltimore and Ohio to co-operate to the fullest extent in helping such bodies as the Interstate Commerce Commission, and the "good neighbor" pronouncement made by Mr. Willard in 1916, which is the best definition I know of what a public service organization should be toward the people it serves.

With this general recognition of the progressive and sympathetic way in which the Baltimore and Ohio keeps step with the times, through the attitude of its president, there must come seeping down through all the ranks of the organization the same kind of a spirit. It is itself manifested in a thousand different ways: in the way you, Mr. Clerk, answer the telephone inquiry of a perplexed shipper; you, Mr. Officer, practice the spirit of fair dealing and proper appreciation toward your men; you, Mr. Ticket Clerk, in answering the sometimes tiresome inquiries of the passengers who step up to your window; you, Mr. Yardmaster, in the extra service you can offer to the industries which have sidings along your section of the yard; you, Mr. Engineer, in the care with which you handle your train; you, Mr. Conductor, in the happiness which you can spread by courtesy and friendly and helpful dealing with the people who come into your charge.

With such leadership it should be, and I believe is, a natural thing for

practically every person in the great Baltimore and Ohio family to feel this way toward his or her job. It is certainly the reason why I am glad to be associated with the organization and to the best of my ability to carry out its policies.

## Treating Water for Locomotives

By C. P. Van Gundy

Water Engineer

THE importance of water supply and the prominent part it plays in railroad operation have not always been recognized. In recent years, however, more attention has been given the subject, and, as the Baltimore and Ohio is making a special study of conditions, especially in connection with locomotive water supply, the following outline will be found interesting.

The total consumption of water on the Baltimore and Ohio is about 50,000,000 gallons per day, nearly 30,000,000 gallons being used on locomotives. As we maintain more than 400 water stations, so that the water may be delivered where needed, the difficulty of providing a satisfactory supply at all times and places will be appreciated.

In addition to furnishing an adequate supply at the various stations, it is also necessary to furnish the best water possible for locomotive use, as much damage follows the use of bad water. The following cases illustrate this:

Recently, when engine 4195 was brought to Mt. Clare Shops for repairs, 11,000 pounds of scale and mud were removed from the boiler, and the firebox sheets were fire cracked around the staybolts and gave evidence of being mud burned as the result of this accumulation. This is not an unusual trouble, especially in the middle west, and every precaution should be taken to prevent it.

About 18 months ago the Mallet helpers at Hardman, W. Va., began to leak. As it was very unusual to have this trouble at this season of the year, the cause was more or less of a mystery. Investigation developed that the drainage from a coal mine located on top of the hill at Newburg, W. Va., had been turned into a small stream which feeds the reservoir, thus making the water acid. As a result of using this water many flues became pitted and one particular engine had to have a number of flues renewed after but 28 days' service.

About the same time, a well at Curtis Bay from which we had been getting good water, failed, and we were forced to get our supply for a time from other wells, which were con-

taminated by salt water from the bay. Much damage was done to the locomotives and to the power plant boilers at the coal pier which used this water. Many flues in the power plant boilers had to be replaced, and engine No. 377, which operated in that territory, recently was in shop and it was found necessary to renew the firebox, although it was but three years old.

### The Three Bad Water Types

These instances not only illustrate the serious character of the damage that may result from the use of bad water, but show also the three types of water which may be expected to give us trouble. These are:

First. Those carrying scale forming solids which prevail in the middle west and in the limestone districts of western Maryland and eastern West Virginia.

Second. The acid waters such as we find in the coal mining regions of West Virginia and Pennsylvania.

Third. The type of water found in

deep wells inland and more often along the coast where sea water filters into them.

The photographs further illustrate this, those at the bottom of page 8 showing scale formation resulting from the use of hard water. The thickness of the small curved piece in the center is  $\frac{1}{2}$ -inch, from which the size of the others can be judged. In the strip above, the small pipes are two inch feed water pipes, almost closed with scale. The large piece is from a four inch water line carrying improperly treated water. Pictures 1 and 2 illustrate corrosion, the tubes being pitted by using acid water, while the bolts were eaten by salt water.

The scale formers constitute the largest class, the impurities consisting, for the most part, of salts of lime and magnesia. When the water is evaporated, these salts remain and either form a sludge in the boiler or deposit as scale on the tubes, sheets and bolts. This sludge, together with the mud, causes foaming and must be washed out frequently. These deposits interfere with the efficient operation of the boilers, increasing the amount of fuel used, shortening the life of sheets and tubes, and causing leaks. At times, also, feed pipes become stopped up and injectors heavily encrusted.

While the territory in which acid waters are found is not as large as that of the scale formers, they present a serious source of danger. The action of the acid is very rapid and results in

Water Treating Plant at Emblem, Pa.

grooved and pitted sheets and flues, weakened staybolts and the rapid retiring from service of the locomotives using them.

Waters of the third type are only met with occasionally on this road and their action is about the same as that of the acid waters. Our principal experience with them has been at Curtis Bay and on Staten Island, where wells have become contaminated with sea water.

In addition to the above we sometimes have corrosion as a result of gases in the water. Also some sources of supply, which in other respects are of good quality, carry in time of

freshets, large quantities of mud which place them temporarily in the first class.

**Natural Supply of Good Water Decreasing**

It is becoming more difficult every year to get good natural supplies of water, as the removal of the forests from the hills and the drainage of the lowlands leave little water in reserve, while the increasing amount of pollution dumped into the rivers often makes them undesirable sources. Further, the level of the ground water is constantly lowering so that wells must be sunk deeper than a few years ago, the quality of the water, at the

same time, becoming worse. The quality of the water also changes from season to season, sometimes quite rapidly, being worse generally in the fall.

**Making Good Water out of Bad**

Running as we do from the Atlantic Ocean to the Mississippi River, it is impossible to get good natural water at all points. The next best thing to do is to treat it for the removal of mud and scale forming solids and to prevent corrosion. Several methods and many different chemicals have been tried to protect the boilers from the effects of these impurities, the first

1 Boiler Flue, a dozen bolts and a tee Corroded by acid water

2 Boiler flues corroded by salt water

4 INCH PIPE LINE AND 2 INCH FEED WATER PIPES

Boiler Scale

The damage done by bad water, often in an incredibly short time, can be seen by the size of the scales and the depth of the corrossions shown here

attempt being the addition of various materials to the boilers. This has become an extensive practice, all sorts of compounds being sold for the purpose.

**Treating Water is Best Method**

The best method however, and the one being generally adopted, consists in treating the water with the necessary chemicals, allowing the impurities to settle out, sludging them off and delivering the clear water to the locomotives. Lime and soda ash are the chemicals mostly used for this purpose and *the main thing is to add them in the exact proportion necessary and to allow sufficient time for settling.* This is best accomplished in special treating plants.

**Treating Plants on Baltimore and Ohio**

We have nine special plants in operation with others in prospect. The oldest are those at Emblem and Glenwood, Pa., erected in 1905. The latter has a capacity of 100,000 gallons per hour and is the largest railroad water softener in the country. In these plants we treat the acid waters of the Youghiogheny and Monongahela Rivers and we have maintained our locomotive service in this district much better since they were installed. In fact, it would be almost impossible to operate in the dry season if we used the water from these rivers without treatment.

We have special treating plants also at East Side, Philadelphia, Pa., where the filthy water of the Schuylkill River is treated, and at Fairmont, W. Va., and Benwood, W. Va., where water from the Monongahela and Ohio Rivers is supplied. There are also plants in the west, where hard waters are treated, namely Cincinnati, Garrett, Chillicothe and Harvey Junction. In addition to these we

**Table One**

Incrusting Solids	Grains per Gallon

Boilermakers employed.....	10	6	40.0%
" helpers, employed.....	14	9	35.7%
Thickness of scale produced by one year's service.....	38"	less than 1/8"	

have a dozen small plants where soda ash only is used to counteract the acid which is found in the streams at times. In these no provision is made for settling and removing the sludge as is the case with the complete plant.

**What Treating Plants Do**

It may be of interest to note just what is accomplished in one of these plants. At Harvey Junction, on the Baltimore and Ohio Chicago Terminal Railroad, we treat water from the Calumet River which carries not only considerable mineral matter in solution, but is more or less polluted with organic matter from manufacturing plants. The analysis of this water before and after treatment is shown in Table One.

It will be seen that the incrusting solids have been reduced from 27.44 grains per gallon to 5.39 grains per gallon, a reduction of 22.05 grains per gallon or 3.15 pounds per 1,000 gallons. With this particular water the total solids do not show much decrease because of the large amount of alkaline salts formed. But the use of this treated water has given excellent results, as witnessed by the statement (Table Two) of repairs to Baltimore and Ohio Chicago Terminal engines the year before and the year after the plant was installed.

The master mechanic also reported that before this treating plant was built it was necessary to wash boilers every four or six days and that after it was put in operation engines were run for two weeks between washouts. Also trouble from leaky flues and engine failures due to boiler conditions were corrected by the use of treated water.

At Garrett, Ind. a different type of water is treated. This is a deep well water and the total solids are reduced from 21 grains to about 10 grains, with the removal of about 1 1/2 pounds of incrusting solids. At Glenwood, Pa. and several other points, water of an entirely different character is treated, very little scale forming material as a rule being removed except the mud which the water carries, but the corrosive solids in the water are neutralized. These waters are very changeable and, at times, carry high encrusting solids which are also removed.

The cost of treating water varies greatly according to the amount treated, the composition of the water and other conditions and will run from two and one half cents to ten cents per 1,000 gallons. It is not claimed that treatment makes a perfect water, as it is not practicable to remove the scale forming solids completely. A small amount of these is left, together with the alkaline salts, which cannot be taken out by this method. However, the savings from the use of treated water are very marked and when we attempt to estimate them they run into enormous figures.

**Savings Effected by Water Treatment**

Using the shop data given above and the present prices for labor and material, the Harvey Junction plant would show a saving of about \$15,000.00 per year on running repairs, or about the cost of the plant. It has been estimated that the changes made in supply on the Pittsburgh Division some years ago, were worth \$500,000.00 per year to the Company. This does not seem an extravagant claim when you con-

sider that it would be impossible to operate that division if we attempted to use without treatment, the water from the Youghiougheny and Monongahela Rivers.

In addition to reducing the cost of running repairs, as shown, the use of treated water increases the life of flues and fire-boxes, decreases the

amount of fuel used, reduces the length of time out of service of locomotives, and eventually, the number of locomotives required.

Better condition of locomotives means fewer cars set off, fewer trains given up, better running time, and more economical operation in general.

## The Division Superintendent's Job\*

*How should he handle Fuel Conservation?*

By S. U. Hooper, Superintendent, Chicago Division

LET it be definitely understood that this is strictly a non-technical paper. The very nature of the subject makes it desirable that it be treated in a non-technical way. The selection of such a subject and its assignment to an operating officer was designed, presumably, with the express purpose of having it treated in a general manner, with a view towards injecting, if possible, some elements or aspects which might not occur to the specialist. Furthermore, it is fitting that the preponderance of technical matter such as is necessarily involved in the comprehensive subject of Fuel, should be interspersed, as it were, with a salad of a plain and ungarished nature.

\*Prepared for and read at the Convention of the International Railway Fuel Association in May 1922.

### Superintendent Not a Technical Expert

Bearing in mind that many of our largest railroad systems have adopted what is generally termed the divisional form of organization, oftentimes putting at the head of a divisional unit a man whose sole claim to shouldering that responsibility is his general ability to co-ordinate, regulate and stimulate all of the numerous phases which go to make up successful operation, it will be seen that there is a decided place for the general or non-technical treatment of fuel conservation.

The introduction of a subject such as this and its treatment before this Association, may well lay claim to the furtherance of one of the prime objects of this body, which has long sought to have it understood that

fuel conservation does not belong to any one department, but is something with which every department of a railroad is concerned. It requires the mechanical specialist and the fuel expert to determine the proper grade of fuel and the proper design of locomotive. But the battle is then only partially won. It also requires the competent road foreman, the able supervisor, backed up by the operating officer, to insure the successful operation of correctly designed and maintained locomotives supplied with the carefully selected and prepared fuel. Too much stress, therefore, cannot be laid upon the well established policy of this Association in getting its purpose before, and in arousing the interest of, every so-called strictly operating officer.

Our railroads are composed of units known as divisions. The whole is no greater than the sum of its parts. If each division is successfully managed, the road, as a whole, will reflect that success.

### Relative Importance of Fuel Problem

Now comes the question of the relative importance of the fuel problem from a superintendent's viewpoint. Granted that he has comparatively adequate facilities, a safe roadbed approximating the desired standards, power adapted to his grade

Agent C. B. Kellar, Washington, Indiana, sent us this picture of the window display arranged by the Moore, McGuire Sales Co., Ford dealers of Washington, Indiana, to help in the Careful Crossing Campaign

and traffic conditions, and maintenance forces conscientiously striving to keep that power in proper operating condition, his problem then becomes largely a question of efficient and economical operation.

Operating efficiency resolves itself into getting his trains properly made up and over the road in compliance with safety and obedience to the rules prescribed.

Operating economy consists primarily in keeping down his wage and fuel costs, and, of these factors, fuel cost amounts to approximately one-third of the total expenses. Is it any wonder, then, that the subject should be rightfully given a considerable proportion of the operating officer's study and attention! And is it not self-evident that the subject is so large, and so important, that it should be handled by the "boss himself." The answer is conclusively obvious. Neither must we lose sight of a still larger aspect of the subject, namely, its public phase. As a public servant, and the direct representative of an institution primarily concerned with serving the public, the superintendent is in a position to appreciate that the public, especially in this day and date, possesses a keen interest in economical operation. The public pays the bill, whether the railroad operates at a profit or not and

the public is, therefore, entitled to as efficient and economical an operation as possible. This is truer still at a time like the present, when every means for stimulating industrial activity and for getting back to normal must be effected.

We may assume, therefore, that the superintendent looks upon fuel as one of his most important problems. Let us consider briefly a few of the ways in which he can help.

He is the father of his entire divisional organization, and particularly that important part known as his staff. His main function is to educate, to devise ways and means whereby the most up-to-date methods and the most advanced tactics can be effectively placed before his subordinates, on whom he must considerably rely to pass the gospel to the men. It lies largely with him whether harmony is going to exist in his family, and genuine success is not going to be his unless the representatives of all his departments pull together. It is not only his prerogative, but his duty, to press constantly on the identity of interest until the various members of his staff are co-operating for the accomplishment of what is best for the division and the railroad as a whole, burying everything which might savor of departmental influence. It rests with

him to determine such delicate matters as inter-departmental relationships. One department must not be allowed to profit in making a showing at the expense of another. Specifically illustrating: fuel conservation must not be sacrificed in order that maintenance expenses may show a reduction.

Let us progress one step further. The staff are not only pulling together, but have a proper conception of the manner in which each cog in the wheel is related to every other cog. They appreciate that their superintendent, even though not a specialist, has a knowledge of each phase of operation, sufficient, at least, to enable him to know when things are going well, when the work is being properly performed, and, above everything else, one who invariably shows a keen interest in the particular problems of each member of his staff.

#### Getting the Idea "Down the Line"

The success of any movement lies in getting the object to be accomplished, and the methods whereby they are to be accomplished, to the men who are actually performing the work. As the superintendent comes in frequent close contact with the men who are handling his trains, he is indeed in a position to reinforce the educational measures of his staff officers and can do much

Superintendent C. G. Stevens, St. Louis Division, sent us this picture, a "silent sentinel" placed between Lawrenceville, Ill., and Vincennes, Ind., by the Baltimore and Ohio. Here the Midland Trail and another north and south hard road cross the track. This warning is passed by a minimum of 500 automobiles every 24 hours. The approaching train is running at the rate of 55 miles per hour. The automobile, a Buick roadster, was abandoned on our tracks about three miles south of Beardstown, Illinois at night with all lights turned off, and was struck by a passenger train

towards stimulating, on the part of the men, a genuine interest and desire to carry out the program.

Bear in mind that some of the foregoing assertions, and some of those which will follow, may sound like a catechism of the superintendent's duties. This is true only as to the relationship existing between the superintendent and the subject of fuel conservation.

It is scarcely necessary to deal in detail with the many other ways in which the superintendent can prove himself the actual leader of his division in fuel conservation. This Association, the Traveling Engineers' Association and The Fuel Conservation Section have all at various times laid stress upon such transportation matters as ordering of power, the correct utilization of power, the innumerable methods of eliminating delays, adverse physical conditions, the maximum allowance of time to mechanical department for running repairs, the outlining of shopping programs which will mutually serve the best interests of both the mechanical and the operating departments, the avoidance of surplus power by means of a well-defined storing or white-leading policy, and other features too numerous to mention here.

#### Importance of Employees' Fuel Meetings

It is fitting, however, to emphasize again the importance of the Employees' Monthly Fuel Meetings, for these occasions bring to the superintendent a splendid opportunity not only to familiarize himself thoroughly with what is transpiring on the division but the chance of getting directly before his employes an expression of what can be done in the saving of coal. On such divisions as enjoy superintendent's staff meetings, (which on the Baltimore and Ohio are open also to the employes), fuel conservation subjects should invariably occupy a prominent place on the program. It will sometimes be found surprising, as well as gratifying, to note how much interest can be aroused by an enumeration, in simple form, of divisional operating statistics, especially as affected by fuel costs, savings, etc. The employes feel that they are entitled to this information and in possessing it their identity of interest with the employer is materially strengthened. An occasional remark showing that the superintendent is familiar with the enginemen and firemen who are making noteworthy fuel performances is oftentimes productive of real interest and competition on the part of the employes.

As the direct connecting link between the division and the general

officers, the superintendent is in the best possible position to call attention to, and urge such improvements in, the physical condition of his division as will bring about additional fuel economies.

#### Proper Relations between Tonnage and Speed

Among the many possibilities which the present day holds for progress in fuel conservation should be named the proper relation of tonnage to speed in producing fuel efficiency. The endeavor to find the economic speed at which a locomotive will produce the least expensive transportation has not yet achieved complete accomplishment. In the solution of this problem alone the results to a superintendent should more than repay all his efforts. Granting, as indicated in an earlier paragraph, that wages and fuel constitute by far the major portion of train operating expense, it would seem that tabulating the results of a series of experiments (the varying factor in which will alone be the train tonnage) should, and does, place us in a position to determine what train rating will produce the lowest wage and fuel expense per thousand gross ton miles. It has, within the past few months, been the privilege of the writer to engage in studies of this nature, but, unfortunately, the fluctuating traffic conditions have thrown our computations, thus far, somewhat out of line.

#### Lengthening Freight and Passenger Runs

Closely allied to these tonnage experiments, is another evolution of transportation improvement, namely, increasing the length of through freight and passenger runs. The idea is by no means a new one, but its recent adoption by many of our most progressive railroads shows that operating officers are today leaving no stone unturned along the road to economy. Logically, a locomotive

should be operated over the longest possible territory that good maintenance of power will permit. An investment such as is represented in the modern locomotive should be producing transportation as great a proportion of the twenty-four hour period as proper maintenance will allow. Recent experiments have shown conclusively that with proper attention at the dispatching terminal, engines can easily be prepared to withstand longer runs, intermediate terminals can be dispensed with, engine mileage increased, and a decided fuel economy effected.

It is in the solving of such problems that a superintendent can perhaps do his most constructive work for fuel conservation. The opportunity is his, for he alone has all the necessary machinery at his disposal.

Omitting altogether any selfish motives which might legitimately actuate a superintendent in his efforts to improve operation by fuel conservation, it is hoped that the foregoing brief outline of why the subject should be warmly embraced, and the general, though inadequate, treatment of a few of the ways in which fuel conservation can be accomplished, will play its small part in arousing in operating officers keener interest in the tremendous subject with which we, as railroad men, are all so vitally concerned.

#### Superintendent Must Show His Active Interest

In conclusion: Let the superintendent ever remember that unless he is thoroughly acquainted with the fuel problems on his division, and unless he takes an active part in the solution of these problems, his subordinates and employes will not be impressed with the importance and possibilities of fuel conservation, and cannot be censured if they do not display a whole-hearted interest in the subject.

# Thirty-First Convention of Baltimore and Ohio Association of Railway Surgeons, Chicago, June 15, 16, 17

By W. H. Ball

Assistant to Superintendent, Relief Department

THE Thirty-first Convention of the Baltimore and Ohio Association of Railway Surgeons was held at Chicago, Illinois, in the Hotel Sherman, on June 15, 16 and 17.

This convention of the physicians and surgeons upon the staff of our Company is held annually for the exchange of ideas relating to surgical services to passengers, employes and others, incident to the operation of the railroad.

The attendance at this convention was, as usual, representative and gratifying. The choice of the Hotel Sherman at Chicago by the Committee on Arrangements as a meeting place was especially fortunate, in that an unusually serviceable convention hall and accessory rooms were provided by the management, and everything within reason was done to make the stay of the guests both profitable and pleasing. The presentation to each lady attending the convention of a bouquet of cut flowers by the hotel management was greatly appreciated.

The scientific program was arranged with the view of causing discussion of the surgical topics most vitally concerned with the injuries sustained by employes and others upon a railroad. For the purpose of placing this subject more vitally before the delegates, in addition to the usual presentation of papers by the surgeons, clinics were provided on two occasions—one at West Side Hospital by Dr. C. R. G. Forrester, one of our consulting surgeons, and the other at St. Anthony's Hospital, by Dr. Lawrence Ryan, Company's surgeon. These were largely attended and pronounced most profitable by everybody.

One of the outstanding topics of the scientific discussions was the consideration of certain diseases that render employes unsafe in the operation of trains, and much data of value to the staff was presented.

In the absence of the Hon. William H. Thompson, mayor of Chicago, the address of welcome on behalf of the City of Chicago was delivered by Mr. William D. Saltiel, assistant corporation counsel. R. N. Begien, general manager of the Western Lines, spoke in an entertaining and

instructive manner in his address of welcome on behalf of the Baltimore and Ohio Railroad. The response to these addresses was made by Dr. J. G. Shirer, president of the Surgeons Association. W. J. Dudley, superintendent Relief Department, talked to the assemblage in an informal manner, giving quite a comprehensive resume of the workings and achievements of the Department.

The entertainment features were attractive. While the surgeons were attending the formal discussions and the several clinics mentioned, the members of their families were entertained by an auto trip to Lincoln Park, a visit through the big stores, and vaudeville and motion pictures at Chicago's best amusement houses. In the evenings the surgeons and the members of their families were provided suitable entertainment in a trip to White City, one of Chicago's amusement resorts, and on the second

evening by a dinner and a dance at the Hotel Sherman, while the afternoon of the last day was devoted to a boat trip along Chicago's water front.

The following officers were elected for the coming year.

President, Dr. V. D. Lespinasse, Chicago, Ill.

First Vice-President, Dr. Walter R. Griess, Consulting Surgeon, Cincinnati, Ohio.

Second Vice-President, Dr. Paul R. Sieber, Consulting Surgeon, Pittsburgh, Pa.

Secretary-Treasurer, C. E. Johnson, Baltimore, Md.

## Pipe Dreams

ON the test trip made by the first Baltimore and Ohio Railway Gasoline Motor Car on June 26, General Manager Scheer and Chief of Motive Power Emerson were sitting in the same seat, talking. The latter was loading his "Jimmy" pipe, and, as the smoke began to rise, dug a dime out of his pocket and inserted it in the fire bowl, "to," as he expressed it, "keep the cinders down." Whereat the general manager remarked, "Don't you wish you could find something simple like that to keep the front end cinders from coming out of the Mallets on the mountain?"

## To Our Locust Point Fire Fighters

*"Conduct Commendable—Showed Effect of Careful Training and Ability to Meet Emergencies"*

CITY OF BALTIMORE

MARYLAND

BOARD OF FIRE COMMISSIONERS

July 15, 1922

Mr. Daniel Willard, President  
Baltimore & Ohio Railroad Company  
Baltimore, Md.  
Sir:—

In connection with the fire at the elevators of the Baltimore & Ohio Railroad Company, Locust Point, the P. M. of the 2nd instant, the Board of Fire Commissioners wishes to extend to President Daniel Willard and the management of the Baltimore & Ohio Railroad Company its thanks and appreciation for the effective manner in which the Railroad Company's Fire Department co-operated with the Baltimore City Fire Department in coping with the recent fire at the Locust Point Terminals. Not only did the fire-fighting forces of the Railroad Company give invaluable service before and after the arrival of the City Department, but they handled in most efficient manner the problem of removing rolling stock from the points of danger and possible interference, that of cutting off water supply from burned buildings in order not to bleed the service in effective operation and in furnishing power through its pumping station.

The entire conduct of the Baltimore & Ohio Railroad Company's Fire Department during this trying time was most commendable, and showed the effects of careful training and ability to meet emergencies.

Very respectfully,

(Signed) Clinton O. Richardson

President

# Safety Section

## How Can Casualties Caused by Men Boarding and Jumping from Moving Trains be Reduced?

By W. J. Mulvihill

Supervising Agent, Chicago Division

THIS subject is a vital one and covers a great many points in Transportation work, and the observance of the following Safety measures will have splendid effect on it:

1. Employes must examine and know for themselves that grab irons, brake shafts and attachments, running boards, steps and all other parts of cars and engines which they are to use, and facilities of every kind which they utilize in the performance of their duties, are in proper condition. If not, they must make them so, or report to the proper person to have them put in order before using.

2. Employes should be familiar with the location of all structures or obstructions that will not clear men on top or sides of cars, and inform all others regarding them.

3. Avoid at all times boarding the middle of train; always get on rear step of caboose.

4. Trainmen should not attempt to get on or off trains moving at a

greater speed than ten miles per hour.

5. Great care should be taken by men using side ladders to see that sill steps are in line and feet set firmly before attempting to get on or off.

6. Always be sure, when pulling out of station or terminal, that engineer has proper signal that crew are to get on, and not to move too fast.

7. Watch for material and obstructions being left between tracks.

I notice in report of Safety Department showing causes of fatalities among employes during the years 1919, 1920 and 1921, that fifty-three men lost their lives, as follows:

	1919	1920	1921
Fell from train....	6	9	4
Fell under train....	8	19	6
Fell from ladder....	0	1	0

While none of the foregoing is new, they are to remind us that Safety First is the only way in which casualties can be reduced. The Company may provide every known safeguard for the protection of employes.

How many Safety Rules  
are being violated in this  
picture?

**THINK!**

## READ THAT RULE BOOK

By E. M. Mannix and Walter Wentworth

Note black smoke, cylinder cocks open, pop blowing, two men on foot board, fireman looking backward, man sitting on chain, etc.

but without the cooperation of the employes themselves, they are of no avail.

## How Can I Best Help Safety?

By H. B. WRIGHT, Brakeman

St. Louis Division

SAFETY is a word, according to Webster, meaning freedom from danger or hazard, and in order to exemplify the meaning I, myself, shall put forth every effort known to safety to make it safe for myself and fellow workers; using all means and devices used and furnished by the Company to protect not only myself and fellow employes, but for the safety of company property and the public in general.

A hazard is a gambling chance and I shall endeavor to try no hazardous things and will also caution all others whom I see doing a hazardous thing.

Also, to insure greater Safety, I will at all times have in my possession or hand all flagging supplies which are furnished by the Company, and always walk between the tracks and not between the rails. In passing signals I will put plenty of "pep" in them so the one to whom I am signaling will thoroughly understand their proper meaning. Careless signals are as bad as none at all and have often caused loss of life and untold damage to equipment.

### Careful Crossing Campaign

By J. F. HINES, Chief Receiving Clerk  
Pittsburgh Freight House

Our great and glorious country,  
Grows faster every day,  
Folks can't find living fast enough  
To speed them on their way.

The auto seems to beat them all,  
For everywhere you go,  
You'll find some person at the wheel,  
Who likes to make a show.

They were only built for pleasure,  
But you can daily read  
About some fatal accident,  
From putting on high speed.

When driving near a crossing,  
Where trains pass day and night,  
They never seem to look ahead,  
But speed with all their might.

Then happy homes are saddened,  
By someone at the wheel,  
Who likes to take a chance or two  
To see how it may feel.

He may get by without a wreck,  
For things just go his way,  
But next time luck may pass him by,  
And he'll be "laid away."

Our engines must stay on the rails,  
For they can't turn aside  
When auto car goes crashing through  
The gates on careless ride.

So let us warn our friends today  
Who may possess a car,  
To watch all railroad crossings, lest  
It may mean quite a jar.

## How Do You Stand?

WE have heard a good deal about the "debutante slouch," a physical fad which seems to be passing. We have perhaps not heard enough about the "Freshman slump," if we are to judge by recent statistics revealing the physique of Harvard Freshmen. Dr. Philip D. Wilson, writing in the July issue of the *Journal of Industrial Hygiene*, presents some rather startling figures bearing on this question.

If we are to consider the College man as, in a certain sense, a picked man who has passed through the junior schools and measured up to certain requirements in the matter of mental and physical condition, the high percentage of men with defective physique reflects an even greater degree of deficiency in the population at large.

The physical examinations of the Life Extension Institute, among industrial classes and other classes in the population, fully support this view. It is quite apparent that civilized man has paid a certain physical price for his civilization. He has cut his death rate down by protecting himself against epidemics but has not built up a superior animal physique. Under civilized conditions the man who is round-shouldered, flabby-muscled, under-exercised, and, taken altogether, a pretty poor specimen of an animal, can, if he has sufficient intelligence, eke out a fairly long existence.

A good deal has been said about the physical findings in the draft examinations, but no man was declined for military service simply because of bad posture. Poor physique, light weight, and such conditions as flat foot had to be of extreme degree in order to warrant rejection. We all know that the men accepted had to go through a lot of training and setting up before they were physically fit for war service.

No man with a proper sense of self-respect and with a reasonable ambition to succeed in life should be content with anything less than the best physical condition that he can attain. Ordinary manly and womanly self-respect should prompt attention to this matter of posture, of standing and walking in a manner not offensive, discouraging or depressing to those around us, but one that reflects a sense of reasonable physical self-confidence. Dr. Wilson presents the following classification for 700 Harvard students:

Group A.—7.5%. Good mechanical use of the human body. (1) head straight above chest, hips and feet; (2) chest up and forward; (3) abdomen in or flat; (4) back, usual curves not exaggerated.

Group B.—12.5%. Fairly good mechanical use of the human body. *Note changes from Group A:* (1) head too far forward; (2) chest not so well up or forward; (3) abdomen, very little change; (4) back, very little change.

Group C.—55%. Bad mechanical use of the human body. *Note changes from Group A:* (1) head forward of chest; (2) chest flat; (3) abdomen relaxed and forward; (4) back curves exaggerated.

Group D.—25%. Very bad mechanical use of the human body. *Note changes from Group A:* (1) head still farther forward; (2) chest still flatter and farther back; (3) abdomen completely relaxed—"slouchy"; (4) back, all curves exaggerated to the extreme.

The Life Extension Institute describes the following tests for good posture:

Stand erect, with heels about six inches apart and toes directed straight forward. Imagine that you are pushing some resisting object with your chest. Your body will then be in proper posture; that is, your chin

will be in, your chest arched forward, your neck perpendicular and well stretched, your arms hanging by their own weight along the middle line of the hips.

To test the posture, take a board and place it on a line touching your toes. If your posture is correct and the board is perpendicular, it will just touch your chest but no other part of your body and will miss your nose by about one-half inch.

It is encouraging to learn from Dr. Wilson's paper that even long established bad posture as a rule can easily be corrected by exercises and proper instruction on the mechanics of the body. Nevertheless we must bear in mind that all cases of bad posture cannot wholly be corrected by physical training. In cases where the individual is infected or undernourished or suffering from some nervous disease, the original cause of the drooping, apathetic attitude should be sought and removed.

Good physical posture, like good mental posture, should be free from an aggressive, self-sufficient strut, but should reflect a body and mind moving easily and confidently and courageously to meet life struggle. While there are exceptions to the rule, posture usually is a key to character. A courageous attitude of mind induces a courageous attitude of body; on the other hand, a slouching attitude of body may well bring about an apathetic and spiritless and pusillanimous attitude of mind. Barring actual disease or incurable structural deformity, good posture is within the reach of all. It costs nothing.

WHY NOT THIS AT CROSSINGS

Will the Big Club have to be used at railway crossings?

### A Railroad the Price of Joining the Union

The Department of Commerce reports through its trade commissioner at Johannesburg, South Africa, that the country of Rhodesia has demanded a railroad before it will join the Union of South Africa. They realize that in order to compete economically with the other states in the Union, they must have this agent of civilization, this bearer of the world's goods from the places of production to the consumer.

This is rather an interesting commentary on the big part which the railroad is still playing in world development. It is more than the principal agency in the opening up of frontier lands and undeveloped resources. In this case it becomes a very potent factor in the political history of the country affected and as such might play a part comparable in importance, let us say, to that played by the famous Berlin to Bagdad scheme of Prussia in her vicious and elaborate plan for the domination of Europe.

### A Business Getting Bulletin

In its series of interesting bulletins sent out at intervals by the Charleston Division, they have one especially addressed to agents, one that is calculated to create business. It describes briefly one of the Washington tours to be run from the Charleston Division section and asks all agents to make sure that all persons in their localities are informed concerning the charms of the trip.

It is surprising how many people not only in remote districts in the country but also in the big cities, have done practically no traveling. The desire is in most of them, just as it is in enthusiastic travelers, but it has not yet been awakened.

I recall the case of a young lady, 22 years old, in Baltimore, who is employed by the Railroad, and who had never been outside the city limits except for two or three excursions on Chesapeake Bay. On being assured that the Indians had been driven west of Washington, she finally was persuaded into making a trip to that city and since then has become a confirmed and enthusiastic traveler. Furthermore her travel has developed her tremendously, her limited horizon of persons and things and places having been broadened and she herself made a much more interesting person.

So, if we will awaken the desire for travel in persons in our communities, explaining to them at the same time how inexpensively excursion or special tour travel can be made, we will find a veritable army of people who will respond, and, after their first one or two experiences,

thank us for having enlarged their perspective so considerably.

In order to make sure that the agents on the Charleston Division are taking this travel propaganda seriously, the superintendent affixed a little form at the bottom of his letter, requesting that after the excursion was over, agents insert in the proper place the number of passengers making the excursion from their stations, so that an accurate comparative record could be kept of the results secured at the various stations.

An excellent idea which might be established profitably on other divisions!

### At Sixes and Sevens

There are two shoe shining establishments near my office, situated next door to each other. I had been using one or the other, without discrimination and, until several months ago, putting up the war price of a dime for a shine. One day I was surprised and gratified to have the bootblack return a nickle as I handed him a dime and I then saw a big sign reading "All Shines Now Five Cents."

"Good," said I to myself. "Another indication of falling prices!"

I went in one of the shops yesterday and as I was sitting in the chair listening to the amusing and childish prattle of the colored boys working on the shoes. One of them said: "Uncle Sam put a load of bad luck on me back in 1917 and I ain't got straightened out yet." Then he began bickering with his side partner for the loan of a penny to make up the needed two cents for an afternoon newspaper. He admitted a yearning desire to see the racing dope which, in view of his financial condition, seemed rather useless to him, to say the least. He was talking to his buddie but *at me*.

My shine finished, (it was an indifferent one) I got down from the chair and stuck a nickle in his hand. He came back so quickly with "Ten cents, please," that it nearly knocked me off my feet. I then realized that I was in the wrong shop, that I should have gone to his next door neighbor who has reduced his prices to five cents and who gives just as good service. I also appreciated how general is the application of the colored fellow's remark: "Uncle Sam put a load of bad luck on me back in 1917 and I ain't got straightened out yet."

There are corporations, merchandizers and business men in general who are honestly trying to bring prices back to a pre-war level by charging but a fair profit. Others are still profiteering and will continue to do so as long as they can. Some of the profiteers seem so well organized as to be able to keep up prices despite the attacks of the press and public clamor against them. The best way to fight them is to buy as little of their product as possible. Another good thing to do is to pick the right store. Don't patronize the profiteer when he may have a next door neighbor who is trying to give you a square deal.

### A Sermon on a Bee

When some of your salesmen and managers complain that it is hard to make sales, and report that it is impossible to find buyers for your products, remind them that a red clover blossom contains less than one-eighth of a grain of sugar, that seven thousand grains are required to make a pound of honey, that a vagabond bee, seeking everywhere for sweetness, must obtain this material from fifty-six thousand clover heads.

Tell them, too, that the bee is compelled to insert its proboscis separately into each floret or flower tube, and that there are about sixty of these to each head.

Remind them that the bee, in performing that operation sixty times fifty-six thousand, or three million three hundred and sixty thousand times, gets only enough nectar for one pound of honey—and then doesn't get the honey.

The bee has preached another sermon.

It is time for some of us to learn what work really is.

THOMAS DREIER IN *The Wanalancet Way*

### A Waiting Game

Often a man has to wait a long time before his ship comes in.

The sales manager of one of the largest companies in the country worked twenty-three years before the president knew of his existence. I was employed by the same company at the time this man was promoted, and I am familiar with the facts.

\* \* \* \*

The president of the company was a man of many eccentricities. One day he released his sales manager unexpectedly and immediately placed the office manager in temporary charge of sales. The office manager knew of a certain man in the sales department who had started working for the company at the age of fifteen. He had put in twenty-three years of service, and was still only thirty-eight—one of those invaluable men who are held back by circumstances over which they apparently have no control.

Anyway the office manager began taking this man to sales conferences to answer questions for the president. In a week the president had the situation sized up. He announced that he was going to take charge of sales himself and that this man would be his assistant.

A month later he placed the man in charge of sales in the United States; and a year later he was given charge of sales throughout the world.

\* \* \* \*

Ten years ago this company paid its sales manager \$72,000 a year. I don't think they pay salaries like that now, but on the other hand I don't doubt that the present holder of the job found his salary quadrupled in one year.

That is the way things go sometimes—it seems to take as long for a man to bloom as it does for a century plant.—*William Feather Magazine*

### Initiative

Most times I think that the greatest ability in any man or woman is Initiative. Initiative means to take things into your own hands and go ahead and do things without being told to do them. There is more time wasted in the world in explaining to people how to do things than through any other source. People of initiative rule the world. They father circumstances. They master environment. They throw great luck to the winds. Initiative is faith—all bedecked with diamonds—each diamond an inspiring prod pointing to something better. Initiative is rulership over yourself. Folks with Initiative have few complaints excepting as they complain of the slowness of the crowd in catching up to them. Of course Initiative costs—you have to bore through great days of discouragement. You have to be able to walk right by failure and not mind a bit. But Initiative pays because all things both great and small have their birth there. Also Initiative is a leadership quality and no man ever led without it—and no man ever won without it either.—J. S. CALVERT

*Western Union Telegraph Company*

### Put Them on the Right 'Phone!

The very bigness of our Baltimore and Ohio organization in Baltimore and in other large cities along the line sometimes makes it difficult for those outside the service to get in touch with the right person at the right time, especially by telephone. Shippers and passengers generally know exactly what they want to find out but have trouble in indicating to our P. B. X. operators the department which can give them this information. As a result they are sometimes put in touch with the wrong department.

And what, in the light of the Baltimore and Ohio stand on courtesy and good neighborliness, should be the attitude of that department? Should it be to receive the call, answer it courteously, say "wrong number" and hang up the receiver? Or to say "You have the wrong number; you want Number So and So" and then hang up the receiver? Not so in some departments, where the invariable rule is for the clerk receiving the inquiry to look up, if necessary, the number wanted by the inquirer while he or she is waiting, to call back the private branch exchange and to request them to give the inquirer the correct number as indicated.

Failing to do as much as this means that we are not treating the inquiring shipper or passenger as we would like to be treated. Hanging up the receiver after calling "wrong number" over the telephone means that the inquirer must do the work practically all over again with considerable inconvenience and unquestionably some annoyance.

Can't we make the practice adopted by some of our departments in this respect a uniform one throughout the entire System?

### Cavilers and Carpers

By John Newman, Terminal Timekeeper, Pier 22, N. Y.

The peacock looked the eagle o'er and sneered, "It is absurd That such a queer, drab, nondescript is classified as 'bird'." "He swims, but is so shapeless," said the flounder, "that I wish Someone would please inform me if the salmon is a 'fish'."

The pothouse politician, though a wise and knowing gent, Could not "get wise to what the deuce made Wilson president." The doughboy doubted very much that Pershing knew his job; And Sims was quite a misfit, in the judgment of the gob.

(Which often makes me wonder at the chap who always flings "How did that fellow get *his* job?" and other "sich-like" things. Though all of us aren't feathered fowls, no matter what we'd wish, This poking fun at other folks won't make us better fish.

It's not a case of "getting by," or riding on a pass, It's not a case of owning wings or fins that gives us "class," It's simply that we make the best of what we find about And never worry other folks except to help them out.—*Asso. Ed.*)

# THE BALTIMORE AND OHIO RAILROAD COMPANY

## Relief Department—Advisory Committee

### Conducting Transportation Department

L. W. GRAHAM.....	Operator.....	Kanawha Station, W. Va.
C. H. CRAWFORD.....	Yard Brakeman.....	Glenwood, Pa.

# Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—  
Retreat from care that ever must be thine;  
How blest is he who crowns, in shades like these,  
A youth of labor with an age of ease.*

OLIVER GOLDSMITH—"The Deserted Village"

## Aaron F. Berkley

Aaron F. Berkley was born at Jenner, Pa., on April 4, 1852. He attended school there until he was ten years old, when the family moved to Dividing Ridge, Pa. Here he completed his schooling. He came to work with the Baltimore and Ohio as trackman in 1876, on the section around Mance, Pa. About five years later he went to Meyersdale, and later to Fairhope; where he was employed as watchman in 1889. This position he held until the time of his retirement.

## William T. Buell

William T. Buell, retired passenger conductor, was born at Manchester, Carroll County, Maryland, March 6, 1857. He entered Baltimore and Ohio service in August, 1878 as laborer in the construction gang between Baltimore and Cumberland.

In 1879 he went into train service as brakeman, Philadelphia Division. In 1884 he was promoted to freight conductor, and on October 1, 1888 he was promoted to passenger conductor.

## John G. Ittner

John G. Ittner, pensioned machinist, Baltimore Division, was born on January 10, 1850. He entered the service of the Railroad in May, 1873, as locksmith, Mt. Clare Shops. In 1883 he was made helper, and in 1884, carpenter. Later during the year he was promoted to machinist. This position he held until the time of his retirement.

## Charles H. Van Cleaf

Charles H. Van Cleaf was born on January 31, 1857, at Columbia, Burlington County, N. J. He learned milling and worked with his father. In 1877 he came

to Maryland where he was employed by the C. A. Gambrell Manufacturing Company, and where he was married to Miss Lula Neal.

In 1889 he came to the Baltimore and Ohio as fireman, but lost both of his feet, so that in 1892 he was given a position as pumper, at Gaither, Md.

In spite of his affliction, Mr. Van Cleaf managed to be punctual in his attendance at work. He made every day between 1916 and 1921. In February, 1921, he was taken ill. He was pensioned on May 24, 1922. He still lives at Gaither.

## Americus Helm

Americus Helm, pensioned truckman, Baltimore Division, entered the service of the Railroad on August 28, 1884, as truckman, Fell Street. Here he worked under the supervision of Agent Helwig until 1894, when he was promoted to receiving and delivery clerk. In 1911 he acted as clerk-sealer and truckman. Mr. Helm has handled hundreds of carloads of all kinds of merchandise and perishable freight without a claim or come-back. "I thank all of the railroad employes and the gentlemen in the Relief Department," says Mr. Helm, "for helping me to get my pension. It will help me along in my old age."

## Creighton Conner

*Who never missed a day's work*

Creighton Conner, crossing watchman, Baltimore Division, was pensioned on July 30, 1922 after being in the service every day for 36 years, four months. He was born in 1859. He entered Baltimore and Ohio service as trackman, Baltimore Division. On October 16, 1908, Mr. Conner was made crossing watchman at Point of Rocks. Here he worked for the 13 years that followed.

Mr. Conner says that he is glad to tell us that he got along splendidly with the Railroad and with all of his employers and fellow workers.

## Samuel E. Huff

Samuel E. Huff, pensioned yard conductor, was born on a farm in Licking Co., Ohio, on March 6, 1856. In his younger days he taught country school; in the fall of 1886 he came to work for the Baltimore and Ohio as night clerk at Garrett, Ind. He remained there for two years and was then transferred to Fostoria, Ohio, as yard clerk. Two years later he went into road and yard service. On March 26, 1892 he was promoted to yard conductor, which position he held until retired, on March 16, this year.

Mr. Huff has also been a member of the Veteran's Association since it was organized on the Chicago Division.

## William E. Foutch

William E. Foutch was born on July 27, 1855 at Hopkinsville, Kentucky. When he was four years old, his parents, Thomas and Caroline (Reed) Foutch, moved to Salem, Ill. Here he attended school until he was seventeen. At the age of nineteen he obtained employment with the Baltimore and Ohio as trackman. In December of that year he was made freight brakeman, and in 1872 he was transferred to conductor. In 1908 he was made passenger conductor. He left the service in 1913, but was re-instated in 1914 as machinist helper. In 1916, because of his poor health he was made crossing switchman, and in 1918, crossing watchman.

### Billing and Cooing

He met a fair maiden and soon was wooing. He told her he loved her, the words softly cooing.

He suggested they marry, she fell for the plan.

On the first of the month the billing began.  
*Railroad Red Book.*

### Tough

Two negroes were lying behind a packing case on the dock at Brest taking the labor out of the alleged Labor battalion. Said one boastfully:

"Boy, Ah comes f'um a tough breed. Mah ole man done cut his nails wif a ax an' brush his teef wif a file."

"Huh, ain't so tough. Mah ole man am a mechanic an' twice a week he done shave himself wif a blow torch."

—*American Legion Weekly.*

SEVEN STALWART SOLDIERS OF SERVICE NOW ON THE PENSIONERS' LIST

1—Aaron F. Berkley. 2—William T. Buell. 3—John G. Ittner. 4—Charles H. Van Cleaf. 5—Americus Helm. 6—Creighton Connor. 7—S. E. Huff.

*Note:*  
 All puzzles published in this department will be defined, as far as possible, from the New Standard Dictionary, edition of 1920. It is permissible to use both geographical and biographical words in the construction of puzzles, but when such words are taken from any authority other than the New Standard Dictionary, the name of such authority must be stated at the end of the definition, in parenthesis. Obsolete words will be marked at the end of the definition thus—"obs". Variant spellings of a word must be marked at the end of the definition thus—"var". Address all communications concerning this department to G. H. Pryor, Room 800, Baltimore and Ohio Building, Baltimore, Maryland, and mark the envelope "Puzzles."

Following are the answers to the puzzles published in the May issue:

Correct solutions were received from the following: Grace M. Manning, W. E. Madden, John C. Svec, Mrs. Gertrude L. Kelly, W. T. Ahrens, Comrade, Primrose, Pearlle Glenn, L. M. N. Terry, Martelia, The Major, Atlas, L. E. Phant, Baltimore, Md.; John Newman, C. Saw, Tunst, New York, N. Y.; Poly, Gemini, Brooklyn, N. Y.; Nanki Poo, Holyoke, Mass.; P. M. Pennington, Cumberland, Md.; K. T. Did, E. R. Woodson, Washington, D. C.; Arty Ess, Scranton, Pa.; Thomas S. Comer, Alec Sander, Philadelphia, Pa.; Kappa Kappa, Hawley, Minn.; Dan D. Lyon, Helva Goodman, New Florence, Pa.; Margaret Smurdon, Mentor, Chicago, Ill.; Oidono, Martinsburg, W. Va.; Emiline, Fairbury, Nebraska; Towhead, Lafayette, Ind.; Wick-o-cincy, Gem, Cincinnati, Ohio; and Margaret Carrico, Washington, Ind.

**NEW PUZZLES**

1. BEHEADMENT (6)

(To Martelia)

Like Mart and his humorous jingle  
 My Pegasus PRIMAL won't "peg."  
 Persuasion and censure commingle,  
 But still he will not shake a leg.

I don't mean to LAST he's contrary—  
 The weather is doubtless to blame,  
 But just now it is bothersome, very,  
 That Peggy should have to go lame.

Baltimore, Md. *L. M. N. Terry*

2. DIAMOND

- 1—A letter.
  - 2—A domesticated carnivorous mamal.
  - 3—To furnish food or entertainment.
  - 4—Pertaining to nature.
  - 5—A pile dressmaking fabric in which the loops are uncut.
  - 6—Line of radiating force.
  - 7—A letter.
- Baltimore, Md. *Guy F. Biggs*

3. DELETION (4)

(To Martelia)

There's a charm about fishing,  
 And many are wishing  
 To angle with PRIMED hook and line.

**May Issue Prize Winners**

Miss Margaret Smurdon  
 Terminal Trainmaster's Office  
 South Chicago, Ill.

W. E. Madden  
 Auditor Disbursements' Office  
 Baltimore, Md.

Wick-o-cincy  
 Dining Car Department  
 Cincinnati, Ohio.

Mrs. Gertrude L. Kelly  
 Law Department  
 Baltimore, Md.

Thomas S. Comer  
 Second Trick Towerman  
 Park Junction, Philadelphia, Pa.

In a boat the whole night  
Without getting a bite,  
And then tell you the fishing was fine.

Their perches and trout and spots,  
Flounders and bass and what-nots,  
Hold no charm for a deep water sailor.  
Not a FINAL for me,  
As you surely must see,  
That I'd only go fishing for tailor.

Baltimore, Md. *Atlas*

4. SQUARE

- 1—To show honor in drinking.
- 2—An amphibious mammal of the weasel family.
- 3—To make reparation.
- 4—Dry leaves of herbs used as medicine.
- 5—To give pleasure.

Cincinnati, Ohio. *Gem*

5. TRANSPOSITION (4)

Our ONE are swiftly turning,  
Each on its shiny TWO;  
A single THREE they're spurning,  
'Till we say, "FOUR, you're thru!"

Cincinnati, Ohio. *Wick-o-cincy*

6. PYRAMID

- Across:
- 1—A letter.
  - 2—Possessive case of He.
  - 3—Deposits in a bank.
  - 4—A peculiar nocturnal arboreal lemurine mammal of the East Indies.
  - 5—An artificer who works in timber.

- Down:
- 1—A letter.
  - 2—Scotch and English dialect of The.
  - 3—To fence in.
  - 4—To play the harp.
  - 5—To wash lightly.
  - 6—To strip off.
  - 7—To place.
  - 8—The tone D in music.
  - 9—A letter.

Philadelphia, Pa. *Alec Sander*

7. INITIAL CHANGE (4)

The freight upon its journey starts,  
With ears of ONE in lengthened line;  
Its TWO the city's busy marts  
Which need the product of the mine.

New York, N. Y. *C. Saw*

8. RHOMBOID

- Across:
- 1—A shield.
  - 2—A cloth worn by Jews.
  - 3—A bird, the Lapwing.
  - 4—The name of a city in Ohio.
  - 5—Payments on leases.
- Down:
- 1—A letter.
  - 2—A suffix meaning "little."
  - 3—A passage.
  - 4—The nollies.
  - 5—A drain.
  - 6—To eat a dinner.
  - 7—A silverwhite, soft, malleable and fusible metal.

- 8—Presence.
  - 9—A letter.
- Baltimore, Md. *Grace M. Manning*

9. CHARADE (7)

I saw her bending o'er the WHOLE  
With FIRST and tearful face;  
The LAST had entered deep her soul.  
She keenly felt disgrace!

Her sire, once fortunate in wealth,  
Had, in mistortune dread,  
Encountered loss thru fraud and stealth,  
So she labored for their bread.

And as I called that summer day  
To pay devotion true,  
I whispered, as I turned away,  
" 'Tis FIRST to see you TWO!"

*Towhead*

10. DIAMOND

- 1—A letter.
- 2—A chart.
- 3—To saw again.
- 4—The Christ.
- 5—A person who travels in a public conveyance.
- 6—An artist.
- 7—A bet.
- 8—The objective case of "sne."
- 9—A letter.

Chicago, Ill. *Mentor*

11. TRANSDELETION (7)

What scaly "Denizen of the deep" is this  
so freshly drawn,  
From Columbia's whirling waters on it's  
way to spawn;  
Lies flapping in the boat a helpless captive  
of man,  
To be cleaned and boned and cooked and  
pickled and canned.  
"What's in a name," is an expression that  
true,  
Can well be asked here for I will show you;  
Just cut off one letter with a strong sturdy  
blow,  
From the name of the Denizen, the result  
lies below.

From a bending position, with a satisfied  
sigh;  
Stands straight the man, who with critical  
eye;  
Looks at his work, growing finer and grand,  
While on his white apron he wipes his  
hard hand.  
With mallet and chisel and light tapping  
blows,  
From his strong clever hands this work of  
art grows.  
Just think a little, of the description I've  
made,  
Then tell me what this man is by trade.

Baltimore, Md. *W. E. Madden*

12. SQUARE

- 1—The act of fondling or treating affectionately.
- 2—A crystalline compound derived from aldehyde, ammonia and hydrocyanic acid.

3—A plaything or implement intended to produce a rattling noise.

- 4—The privilege of entering.
- 5—Noiseless.
- 6—Variant spelling of the word "snath"

(New. Int.)  
Baltimore, Md. *Pat Tapsco*

13. ANAGRAM

LOAD HIM ABOARD ORIOLE TRAIN  
I surely would, if I were you,  
Travel on the Royal Blue.

Baltimore, Md. *Atlas*

14. SQUARE

- 1—A swindler.
- 2—A long-necked and long-legged wading bird.
- 3—To present arguments.
- 4—A course taken by any person in passing from one point to another.
- 5—To fall on the knees.

Scranton, Pa. *Arty Ess*

15. CHARADE (8)

(To Dan D. Lyon)

Say, boy, have you seen old Dan today?  
He rode a ONE down this TWO, they say.  
"I've seen old Dan on the TOTAL track,  
But he ne'er rode a ONE down the TWO or  
back."

Hawley, Minn. *Kappa Kappa*

To receive proper credit solutions to these puzzles must be in my hands by October 15. The answers, together with a list of the solvers, will be published in the November issue.

**Just between You and Me**

No. 7, the Initial Change, in this number, is a puzzle new to our department but very simple to understand. You take the word represented by ONE, cut off the *first* letter and substitute another letter in its place to make the word represented by TWO. For illustration take the word "Paid," cut off the first letter "P," substitute the letter "R" and you have the word "Raid."

Towhead, the author of No. 9, Charade, in this issue, is not only a veteran puzzler but a veteran railroad man. He holds a record of fifty-six years of unbroken service with the Chicago, Milwaukee & St. Paul Railway as telegraph operator and station agent and is now on the retired list, but, after forty-five years of puzzling, is still active as a puzzler at the age of 86. In every respect his is a record to be proud of.

No. 13 is a very neat anagram. When you take the letters of the sentence in capitals and transpose them properly you will bring forth an answer that will remind you of something very close to all of us. It is a thorough railroad puzzle.

Gem (Miss E. M. Graveson, Passenger Department, Cincinnati, Ohio) seems to be very much interested in our department. Among other things she writes: "We think puzzles sharpen the wits. One certainly learns much from them, both in

(Continued on page 38)

# Auditor Freight Claims Office Makes Merry at Picnic

By Nellie F. Collison

**S**TOP-LOOK-LISTEN!" was the slogan of the committee in charge of the big outing of our department at Miller's Park on Saturday, July 22. We did this and more, and just now are seriously sympathizing with every member who was absent.

Nature smiled upon us beautifully. The day was as rare as those W. K. days of June. For a few minutes only the elements flew into a rage at the sun's seeming selfishness, and deluged the earth with a shower that forced us picnickers to shelter. This little cloud was soon forgotten when the sun smiled again, and the delightful fragrance of nature's own "washed air" renewed our pep and the real picnic was on. The program was glorious. We doff our hats and bend low our heads to our chairman and his able assistants. Caterer Bopp also

did a wonderful job, and we are particularly anxious to advertise his arts and his wares.

The youngest of the kiddies, all the flappers, and rarest of all surprises, the "Ladies in Waiting" and the married men, were considered in the selection of prizes for the three-legged race, pie eating contest and running races—by lean men, fat men and men of all sizes. Smiles flit across our countenances as a result of mental visions, but the lean men, fat men and men of all sizes, flappers, maidens and all, they "should worry," for now they smile in their mirrors and see the ten years and more that have made a hasty exit.

Officials forgot their rank and surprised us "on the level." Right here we want to warn Comptroller Ekin and our friend "Andy," whose picture and that of Mrs. "Andy," we are exceedingly proud to offer

you for inspection, to get some real knowledge of the game of quoits before again challenging our "Boss" Schutte and gay Mr. Alrich,—who is pictured with Mr. Finch in a jazzy, terpsichorean pose. Mr. Alrich put to flight forever any belief we may have had in the Osler theory, and we believe with Uncle Joe Cannon in the joys of numerous "young summers" putting to rout a few hard winters.

Our "Andy" talked incessantly about his skill as a runner before the show began, but we found him very much absent when the ball game and running races were in progress. Of course, he excused himself by saying that the ground was slippery and that he was afraid of getting his feet wet, but we know the truth of the matter was a case of "cold feet."

The camera man made a good shot at "Boss" Schutte. Someone was trying to figure out the "glad smile." Quite an easy deduction for those of us who saw his right foot reaching out for an imaginary third rail and calling for "another bottle of Green River, please!"

Miss White was in the zenith of her glory;

"Boss" Schutte is at the top, center, as he should be. But the ice cream cone is a libellous fancy of the artist. It should have been a bottle. The names of others in the groups may be found in Miss Collison's interesting story of the annual outing of the Auditor Freight Claims Office

in fact, she made some desperate moves to stall the attempts of would be rivals. Jazz Babies wiggled their toes at the strains of "Oogie Oogie Wa Wa" and on the "Gin Gin Ginny Shore." The musicians made an early call, "to come and trip it as you go, on the light fantastic toe," and the Vernon Castles would have marveled at Mr. and Mrs. Geraghty. Their grace and beauty filled us with wonder. (Mr. G—, this surely should bring forth your stentorian tones until, at least, we have another opportunity to add to the size of your hat. You get us, don't you?)

The base-ball fans had the surprise of their lives and George Washington Ford wants Joe Bowden to know that the score was "six to nothing" in favor of the married men, otherwise "the derelicts." Poor Joe and Herbert Brown! Their only consolation is their challenge for another game after work—some day.

Ray English has picked up all kinds of enthusiasm since his "better half" made herself famous as a "pie eater." Jobs may be scarce without any consternation in that family; they have dreams of calling on Ringling Brothers in any event.

The losing contestants in the "Tug of War" claimed that the heavy-weights were all on the winning side, but they agreed that many pounds were equalized when Mill Dopman and Lil Prenger lined up side by side.

Otten Babendrier is boastful of her success as a runner. Most of us, after a casual scrutiny of this young lady, believe she walked to the goal. Anyway Otts did the stunt in a fashion that would have put the "god of flight" to shame.

We have touched only a few of the high spots, but enough, we believe, to make you understand why our sympathies are aroused for each of you who was not with us on our Big Picnic Day.

Waiter: Another bottle of Green River, please!

Such an event as ours naturally would leave the curious with some problems to unravel, and we would like to ask: Can anyone tell us why our good friend Robert, Accounting Division, was found isolated in the children's swings? Perhaps Mildred will explain.

Why all the commotion caused at Howard and Saratoga Steets by our friend E. Vincenti Stein? Was Green River or ginger ale responsible?

Our friend M. DePascal appeared somewhat peeved during the prize waltz. Will Madeline clear up this mystery?

#### Schedule of Games, Prizes and Winners.

Running Race—Children, age 6 to 9 years. (Girls)—Bracelet—Awarded to Marie Smith, Relay, Md.

Running Race—Children, age 9 to 15 years. (Girls)—Umbrella—Awarded to Margaret Ford, Lansdowne, Md.

Running Race—Children, age 6 and under. (Girls)—Parasol—Awarded to Florence L. Waters, 1220 E. Preston St.

Running Race—Children, age 6 to 9 years. (Boys)—Roller skates—Awarded to Russell Baker, 5003 Augusta Ave.

Running Race—Children, age 9 to 15 years. (Boys)—Fielder's glove—Awarded to Harry Miller, Jr., 1510 Moreland Ave.

Running Race—Children, age 6 and under. (Boys)—Novelty ball—Awarded to Austin Dopman, 421 N. Elwood Ave.

Running Race—Ladies—Leather purse—Awarded to O. Babendrier.

Running Race—Men—Gillette (Gold)—Awarded to F. Kress.

Three-Legged Race—Umbrella—Awarded to J. Bowden and M. Golden.

Pie Eating Contest—Girls—Tennis racket—Awarded to Mrs. Ray English.

Pie Eating Contest—Boys—Ball and bat—Awarded to Boyd Goslee.

Shoe Putting Contest—Roller skates—Awarded to Marie Smith.

Tug of War—Ladies—Candy—Awarded to the Misses Prenger, Dopman, E. Ball, L. Prenger, Neuman and L. Ball.

Base Running Contest (Thin men)—Fountain pen—Awarded to E. Stevens.

Base Running Contest (Stout Men, all sizes)—Fountain pen—Awarded to J. G. Brubaker.

Prize Bowling—High Score: Two Consecutive Games, for ladies and gentlemen—Lawn tennis shoes—Awarded to D. Streib and Grace Stanford.

Prize Waltz—Candy—Awarded to Mr. and Mrs. Geraghty.

## Baltimore and Ohio Railroad Accounting Association Entertained by Senior Vice-President Shriver

ON Saturday afternoon, August 5, the members of the Baltimore and Ohio Railroad Accounting Association and their families, with Senior Vice President George M. Shriver as their host, enjoyed a splendid trip on the Chesapeake Bay.

At 2.30 p. m. the jolly party boarded the tug "Latrobe," which, through the courtesy of the city of Baltimore, had been loaned for the occasion. The "Latrobe," by the way, is used to take the poor children of the city on the free excursions every Saturday during the summer. After a tour of the harbor, the boat pointed her nose seaward, and John Bopp, famous restaurateur of the Baltimore and Ohio Building, appeared on the scene with food enough for a regiment. There was sarsaparilla, ginger ale, fruit punch, ham sandwiches, deviled crabs, olives, potato salad, rolls, "hot dogs," apple pie, and ice cream cones—as much as you could hold.

Downstairs the deck was cleared, the jazz musicians came forth, and the young folks—they were all young folks—danced to their heart's content. The little folks ran here and there with their ice cream cones, and the big folks chatted and laughed, sang and—yes, we found one man asleep. High in the air around and around sailed a seaplane. The pilot of the plane could not be seen by those aboard the Latrobe, but it was learned later that he was very much on the job, finding out what the big party was all about. He carried with him a sort of combination ear trumpet, spy glass and X-ray machine. With this he was able to see and hear all that went on. When he went home that night, he told a little bird all about it, and the bird told—oh, well, it doesn't make any difference whom, but these are some of the things that he saw and heard:

H. Irving Martin, philosopher of the Relief Department, sagely observed that he saw a man wearing a seal-skin. Of

course, his hearers could scarcely believe their ears until he pointed out the wearer, Mr. Seal.

B. S. Mace, superintendent of insurance, was seen occupying the position of censor. Holding a newspaper before his face, his eyes followed the foot(steps?) of many a fair young dancer. Moreover, he was seen to shake his shoulders in an attitude unmistakable. Yea, verily, he was shaking a—, well, whatever it was, and so also was S. W. Hi F. L. Schepler gave a knowing wink, and J. F. Schutte resorted to the famous Green River.

Frank Thomas, disguised as The Shiek, paraded out on the floor and danced an Irish hornpipe. When "Bill" Donnelly got through showing his photograph to everybody, including the fishes in the deep, deep sea, he joined Mr. Thomas in an act entitled, "Why Women Let the Bread Burn in the Oven."

Hobart Smock, with his Glee-ers of the Glee Club, sunned himself in his ice cream trousers, chatted with the girls with one ear, and wondered what time he'd get home to his chickens (real ones) with the other. However, when he called the boys together for a performance, there was nobody left up on the upper deck to c—nk the fruit punch.

"How shall I hold my husband?" asked one good lady, whose worse half was busily holding a buttercup beneath a flapper's chin.

"Oh, just get a good rocking chair," advised another unfortunate, "pull him down on your lap. Then if your arms are strong and the chair will hold you, the rest is easy."

For a short while the dancing was dispensed with while the Association held a business meeting. S. F. Lollman, president, was in charge. As the members of the official family entered, the others began to sing, "Hail, hail, the gang's all here!" The big event of the meeting was the electing of honorary members, as follows:

# There Were Miles and Miles of Baltimore and Ohio Smiles on the "Latrobe," Baltimore City Ice-Breaking Boat, at the Excursion of Our Accounting Association on August 5

Photographs by G. B. Lucky

1. C. C. Glessner, general freight claim agent. 2. W. E. Rittenhouse, auditor merchandise receipts. 3. C. G. Pollock, auditor miscellaneous accounts. 4. Back row, left to right: Harry F. Reid, head clerk, Fuel Department; H. T. Beck, chief clerk to assistant auditor disbursements; J. W. Switzer, chief clerk to Assistant Comptroller Deverell; Edward Talbott, special accountant; J. F. Donovan, chief clerk to auditor disbursements; J. M. St. Leger, secretary to auditor disbursements. Sitting: Mrs. Harry F. Reid; Mrs. J. F. Donovan; Miss Rebecca Fennimore; Mrs. J. W. Sweitzer; little son of Harry Reid, and Miss Margaret Sweitzer. 5. Standing: Eugene La Motte, assistant chief clerk, Freight Claim Department; W. R. Heartt, chief clerk, Freight Claim Department; Frank Miller, head statistical clerk, Office Auditor Coal and Coke Receipts. Sitting: Mrs. LaMotte, Mrs. Miller and Mrs. Heartt. 6. When a fat lady told him to move over, Hobart Smock, leader of the Glee Club, looked like this

# Senior Vice-President George M. Shriver Played Santa Claus to the Party and He Was *There* with Everything but the Reindeer and the Snow

7. These are folks from the Office of the Auditor of Merchandise Receipts. Standing are Thomas Everitt, head clerk; H. H. Hohman, assistant chief clerk; F. C. Rutter, assistant chief clerk; R. G. Austin, head clerk. Sitting: Mrs. Everitt, Mrs. Austin, Mrs. Hohman, Mrs. Rutter, Mrs. Straughn, wife of head clerk. 8. A "Snap" of Mr. Shriver's smile during any one of the 18,000 seconds of the excursion. 9. A group of "Aunt Mary's" nieces and nephews. Right in front are Naudain Crawford Bowersock, daughter of chief registrar, Relief Department, and Joseph Renehan, Jr., whose daddy is in the Valuation Department. Second row, left to right are: Myra Gill, whose daddy is in the Freight Claim Department; Doris Eleanor, daughter of Charles Miller, Office of Auditor Disbursements; Margaret, daughter of Charles Kunkel, Office of Special Accountant Skilling; Ruth, daughter of George J. Jones, Assistant Comptroller's Office; Dorothy, daughter of Joseph Wheeler, Freight Claim Department. The three boys are: Douglas Landeman and Earl Mitchell, whose fathers are in the Office of the Auditor Merchandise Receipts, and Joseph Wheeler, brother of Dorothy. 10. J. O. McComas, assistant treasurer; J. W. Price, chief clerk to senior vice-president; Miss Sprankling; J. J. Ekin, comptroller; J. C. McCahan (standing) Office of the Treasurer; Mrs. Frank Thomas, wife of head clerk, Payroll Bureau. 11. The crew: Captain Haselback, Chief Engineer Danaker, Mate Dowden and Captain J. W. Byrd, of the "Annapolis." 12. Mr. and Mrs. John Bopp, who need no introduction; "the nearest way to a man's heart" is Mrs. Bopp's motto. 13. Miss Frances Milholland, daughter of assistant to senior vice-president, and "Andy" Hartzell, son of manager Commercial Development Department.

Senior Vice President George M. Shriver and his assistant, F. X. Milholland; Comptroller J. J. Ekin and Assistant Comptrollers F. A. Devercll, W. D. Owens, and J. P. O'Malley; Treasurer E. M. Devereux and Assistant Treasurers T. H. Schultz and J. S. McComas; Auditor Passenger Receipts C. H. Poumairat and Assistant Auditor Passenger Receipts L. M. Grice; Auditor Coal and Coke Receipts L. A. Lambert and Assistant Auditor Coal and Coke Receipts W. B. Dudderar; Auditor Disbursements G. H. Pryor and Assistant Auditor Disbursements S. W. Hill; Auditor Merchandise Receipts W. E. Rittenhouse and Assistant Auditors Merchandise Receipts N. H. Davis and H. S. Maccubbin; General Accountant O. J. Rider; Auditor Freight Claims J. F. Schutte; General Freight Claim Agent C. C. Glessner; Auditor Miscellaneous Accounts C. G. Pollock; Chief Travelling Auditor Q. E. Turner; Assistant Treasurer and Transfer Agent (N. Y.) R. B. Luckey; General Paymaster P. C. Swein; Chief Engineer Adjustment Division L. G. Curtis; Valuation Engineer Jenks

B. Jenkins and Assistant Valuation Engineer H. B. Dick; Superintendent Relief Department W. J. Dudley and Assistant Superintendent Relief Department W. M. Kennedy; Medical and Surgical Director Dr. E. V. Milholland.

After initiating the aforesaid persons, it was moved and seconded that a committee be appointed to purchase the "Latrobe," and invite those present to make their homes thereon, for nobody wanted to go home.

"Mrs. Frank Thomas believes in Ice-Cremation" said Mr. Martin, adding that "When her husband gets through with wearing her hat, she'll have no overhead expense left."

Captain Haselback and his crew—Chief Engineer Danaker, Mate Dowden, and Captain J. W. Byrd, of the "Annapolis"—decided that it was time for the happy sailors to return, so they turned the "Latrobe" shoreward, Baltimoreward. All landed, safe and happy, at twilight, and everybody voted that Mr. Shriver's party had been the best ever.

life by Mr. Perkinson; we shall all be better for the memory of him who has now been called to his Eternal Reward.

Unswerving in his loyalty, Mr. Perkinson was on almost constant duty from July first until the sixth, when pneumonia was contracted and he was removed to the hospital, death following three days later. To Mrs. Perkinson, and her children, James, Thomas, John, Catherine and Mary, we would say that their loss is also the world's loss. But knowing that God in His wisdom has called our beloved to his reward, let us take solace in the prayer "Eternal rest shine upon him, Oh Lord; may he rest in peace, Amen."

Funeral arrangements were in charge of the Knights of Columbus, of which the deceased was a member. The pallbearers were George P. Ways, Joseph H. Reinhart, F. A. Wolfhope, G. Frank Messman, Patrick D. Harvey and Joseph J. Carney. Following the hearse were two hundred Knights of Columbus, in charge of Robert Davis and Thomas Conlin, followed by about two hundred and fifty of his former Baltimore and Ohio associates. The line marched to the Queen City Depot where the body was deposited in the private car of Vice-President Galloway and attached to Train 12 to be taken to Mechanicsville, N. Y. for interment.

The body was accompanied by the family and by Thomas E. Grindell, chief clerk to the master mechanic, and Griffin A. McGinn, chief clerk to the superintendent. These represented Superintendent VanHorn and his staff.

### A New Feud (?) Started

AN interesting game of baseball was played between the boys of the Statistical Bureau and those of the Comptroller's Office on Friday, July 28. The final score was 18 to 9 in favor of the Comptrollers. Home runs were made by Schacker, of the Statistical Bureau, and Schuppner, Warner and Luber of the Comptrollers. A two-base hit was made by Deal. The umpires were Rider and Dixon. The totals are as follows:

	I	2	3	4	5	6	R	H	E
Comptroller . . . . .	1	10	3	1	3	x	18	13	0
Statistical Bureau	5	1	0	2	1	0	9	10	2

The Balto. Heigho Means—"Let's Go"  
 No matter where She'll get you there,  
 In as "comfy" time As competing line;  
 With "comfy" cars and courtesy, too,  
 On any train whether local or through.  
 A ticket will prove this and bring a smile  
 To think what you've missed on your way  
 all the while.

Engineer Harry Franks, Dayton, Ohio

## The Late Master Mechanic T. F. Perkinson of Cumberland

By John J. Sell

MAGAZINE Correspondent

THE sad death of our beloved master mechanic, Thomas F. Perkinson, on Monday morning, July 10 at the Allegany Hospital, Cumberland, after three days illness, cast gloom over our entire city. Mr. Perkinson was not only beloved by every man and woman in our great Railroad family who knew him but was so well known and respected throughout the city that a throng of mourners two blocks long attended his funeral and made memorable impression on those who witnessed this procession of grief.

Mr. Perkinson was an officer on the Cumberland Division for eight years, coming to Keyser as assistant master mechanic in 1914. On August 1, 1915, he was transferred to Grafton as master mechanic. He went to Baltimore in 1916, but returned to Cumberland, in charge of Motive Power, in 1918, when T. R. Stewart was transferred to Mt. Clare Shops.

As master mechanic of the Cumberland Division, Mr. Perkinson was all that the word implies. He was master of every situation, dynamic, forceful, yet possessing and always finding time to use the greatest of gifts; his knowledge of human nature. Regardless of position, the man that approached this kindly official was sure to find a sympathetic ear and could count on receiving counsel that always made the way clear. The expressions of condolence by the shop craft committees from Keyser, Cumberland, and Martinsburg were augmented by those from employes in all lines and from civic and fraternal bodies.

As a member of the official council of the

Baltimore and Ohio, Mr. Perkinson stood second to none. True to him in death as in life, Vice-President Galloway left no stone unturned trying to ease the great loss the family suffered, and ordered his business car, the 912, to Cumberland and placed it at the afflicted family's disposal.

The constant procession of his friends showed the respect we all hold for true Christian ideals as exemplified throughout

The late T. F. Perkinson

## Baltimore and Ohio Relief Department Convention Held in Cincinnati June 22 and 23

By George R. Ball, Delegate

THE convention was called to order by George G. James, member of the Advisory Committee. The credentials of delegates were examined and absentees noted.

Superintendent Dudley was called on for the opening address. He enlightened us on a great many things concerning the Relief Department's work and also on the duties of the delegates at the convention. He also answered a good many questions asked him and the membership showed their appreciation by applauding greatly.

Dr. E. V. Milholland, medical and surgical director, was also present and made a good talk on the subject of the health of our railroad men. He, too, was applauded.

Next in order was the appointment of three tellers: H. W. Auld, Thomas J. Mylet and John F. Maloney.

The election of permanent chairman being in order, several nominations were made and after several ballots were taken, George G. James received the largest number of votes cast, and was declared elected. We could not have elected a better man. He is cool and level-headed, and always ready to give each and every man his turn.

Thomas J. Andrews was elected assistant chairman. Next in order was the nomination and election of a secretary. Several nominations were made and Miss Elizabeth

A. Lucy, statistician from Pittsburgh, was elected.

Next in order was the election of one member on the Operating Board. W. L. Pross received the largest number of votes cast and was declared elected. The Convention was adjourned at 11.59 a. m.

Promptly at 2.00 p. m. the meeting was resumed, Chairman George G. James being in the chair. Roll was called and absentees noted.

The election of two members of the advisory committee being in order, many were nominated. On the first ballot J. W. Warner was elected. Then several more ballots were taken and George G. James was elected.

The Convention adjourned at 5.00 p. m.

The people of Cincinnati entertained us nicely. They gave us free admission to the Park and also to the theatre, and we enjoyed both very much.

Convention was called to order at 10.00 a. m., June 23; Chairman George James in the chair. Roll was called and absentees noted. Several nominations for members of the advisory committee from the Maintenance of Way Department were made and after a considerable number of ballots were taken Carl W. Gordenberger and Morris D. Crowther were declared elected.

Before bringing the convention to a close Mr. Dudley was again called upon for a talk.

I cannot conclude this report without expressing my own thanks for the pleasant hospitality that was shown me, and I feel sure that this also is the feeling of all the other delegates.

### Relief Department A Good Friend

Johnstown, Pa. May 15, 1921.

Mr. W. J. DUDLEY, Superintendent  
Relief Department  
Baltimore, Md.

Dear Sir: This will acknowledge receipt of your letter under date of April 20, 1921, enclosing the following: policy of fire insurance in force, judgment bond, abstract of title.

At this time I desire to express my sincere appreciation of the courtesy and interest you have at all times displayed in my behalf and to assure you of my gratefulness for the plan which enabled me to own my home.

Thanking you, I am,

Very respectfully,

(Signed) JACKSON R. DRISCOLL,

Yard Conductor

#### Some Sight

Teacher: "You dirty boy, you. Why don't you wash your face? I can see what you had for breakfast this morning."

Bob: "What was it?"

Teacher: "Eggs."

Bob: "Wrong. That was yesterday."

## These Pictures Suggest Reasons for Joining the Baltimore and Ohio Recreation Association

Hip, Hurrah, and Away We Go! Come on, Everybody!

All Baltimore employees are invited to join the newly-organized Baltimore and Ohio Recreation Association, whose members, on Mondays, Wednesdays and Fridays of each week, close up their desks with a bang, seize tennis racquets, sweaters, gym suits, and make a bee-line for Homewood. Here, under the direction of Athletic Director Kistler, they get into the real playtime spirit as is shown in the pictures above. 1-A tug of war by two "nines." 2-You may see him do this "most any day." 3-Two of the girls' basket-ball teams. 4-Secretary-treasurer Shipley shows us how well-balanced he is. Be on hand next week at 6.15 p. m. and we'll show you how to enjoy real fun

## "Safety Jack" Perin Retires

*Is Given a Handsome Watch by Mates in No. 2 Shop, Mt. Clare*

*By Mollie S. Albrecht, Secretary to Superintendent of Shops  
Mt. Clare*

ON April 15, at 3.20 p. m., John O. Perin, known as "Safety Jack," machinist, No. 2 Machine Shop, was pensioned. As a token of esteem from the men of No. 2 Shop, Mr. Perin was presented with a beautiful gold watch, which was suitably inscribed to make him ever remember the occasion.

Mr. Perin entered the service of the Baltimore and Ohio Railroad Company as a machinist apprentice, on July 26, 1875. He has been actively engaged ever since in making his service with the Company one that will always be remembered, and one of which he can well be proud. Forty-seven years of continuous, unselfish service to the Company and to his fellow-men!

"Jack" Perin has been one of the unique figures around Mount Clare, and we are proud to say that he is known by practically all our employes; when we say "Safety Jack," or just plain "Safety," everybody knows just whom we mean! He is a man who is always willing to help everyone with whom he comes in contact; he is always ready to encourage the apprentice and to help him along, as he has not forgotten his own apprentice days. During Mr. Perin's years with the Company, whenever any employe saw some unsafe condition, he would run to "Safety Jack," and you can just bet your last dollar the condition would be remedied at once.

Mr. Perin ran the radius machine in No.

2 Machine Shop for forty years and his friends maintain that this is a record which cannot be beaten by any mechanic on the Baltimore and Ohio System. It is little wonder, therefore, that when the Safety movement began to take serious hold on the railroads about ten years ago, and the General Safety Committee was looking over Mount Clare for men to build strong Safety foundations, they picked "Jack" Perin. On this Mr. Perin says:

"Nothing more beneficial to the railroader has ever been brought about than the Safety work waged during the last ten years. I knew nothing about it until put on the Mount Clare Safety Committee, but when I saw the good which could be accomplished by it I jumped into the work heart and soul. In fact my interest in it may be seen from the fact that although it was customary to have Safety Committeemen serve for six months only, I was kept on the committee for four years. I am also

"Safety Jack," his home, and seen as two cartoons pictured him in former issues of the Magazine

proud of the fact that several years ago an official report on Safety stated that No. 2 Machine Shop in Mount Clare was the best safe-guarded railroad shop in the United States."

Mr. Perin has been independent in thought and action during his entire life. Not always has he followed the majority. On this he says:

"The Baltimore and Ohio has been a considerate and square employer to me. I have never had any fault to find with a single officer on the railroad and, despite the fact that I have often been in a minority among my fellow workmen on questions of employer-employee relationship, I believe that my attitude has never cost me a true friend among them.

"I have always tried to be honestly helpful to all those associated with me and to play the game squarely at all times, and I could ask for no better proof of my good judgement than this beautiful watch inscribed from my shopmates at No. 2 Shop."

Mr. Perin and his wife live in the attractive home shown in the picture, situated at the corner of Wilkens Avenue and Pitcher Road. The Relief Department loaned him a part of the money with which to secure this home.

His wife and two daughters are living

and of his grandchildren, two of the boys are employed in the Annex Building. One of the daughters, a widow, is in another department in the service.

Mr. Perin is Past Master of Millington Lodge, A. F. & A. M., Past Grand Patron for the State of Maryland, Order of Eastern Star, and Past Counsellor of the Jr. O. U. A. M.

Although Mr. Perin has withdrawn from active service with the Company, he still pays us numerous visits, and is active in the Veterans' Association.

All Mount Clare joins me in saying that we are mighty sorry to lose our "Safety Jack," but we hope his pension days will be full to the brim with happiness, and a big share of it!

## What's in a Building?

### *A Description of the Beautiful Main Corridor Marbles of the General Office Building*

WE all know that little girls are made of "rice and spice and everything nice," and that little boys are made of "nails and snails and puppy-dogs' tails," but did you ever stop to wonder what the big Baltimore and Ohio Central Building, where all of these nice little girls and naughty little boys go to work every day, is made of? Well, if you never thought seriously about it, take a good look at the accompanying picture which was made in the lobby of the Central Building at Baltimore.

First of all, you will see Veteran "Judge" Holmes, news vendor of the Building, selling a paper to our old friend, C. M. Heany, superintendent of buildings. Spread

about on the stairway are the papers and magazines, whose attractive covers, together with the "Judge's" smile, invite our employees to buy.

Mr. Holmes was in service at the Tin Shop, Mt. Clare, for fifty years. He says that he is younger than ever, now that he can get around with the girls and boys of the Railroad again. When asked about his age, Mr. Holmes said:

"I had a birthday the other day, July 28. Somebody sent me a lovely bouquet of flowers. One of the girls in the Building who stopped to get a paper, admired my flowers. 'Yes,' I told her, 'this is my birth-

*(Continued on page 35)*

"GRANDPA" HOLMES MAKES A SALE

Left, C. M. Heany, superintendent of buildings; right, W. T. Holmes, newspaper salesman, Baltimore and Ohio Central Building, Baltimore, Md. Note the various kinds of marble which are shown in the beautiful corridor background

Edited by MARGARET TALBOTT STEVENS

## A Good Start for Billie

JUST a few more days and Mother will be dressing little Billie in his best linen suit and starting him off for his first day at school. How strange it will seem for "my baby" to be running along with the older boys and girls on that dewy, sunshiny morning! And how lonesome the old house will feel without his laughter and his "Muvver, where does the sun go when it goes down?" and all of the other little questions that Mother is accustomed to hearing! Yes, she would like to keep her baby at home, but Billie is growing up. He was six years old last week, and now he must begin his education.

Billie's mother and I have talked it over. She is going to accompany her little son to the schoolhouse on that first day. And why? Well, let's see.

Marie Bonnier (that's the mother's name now) was once a teacher herself, and she realizes the importance of many things that mothers do not always think of. To begin with, she thoroughly believes in seeing that her children go to school on the very first day. This day is even more important than the next, or any day a week hence. This is the time that the teacher outlines to the children their work for the following term. This is the day that she learns the names of the little people. She gives them their new books; she learns something of their characters; she assigns them to their desks; this is the day that she makes friends with them. If children are to spend the best part of their day with the same person, it is necessary that they make friends with her, and there is no better time than the first day for this.

Above all, it is important, from a standpoint of attendance, that children be present on the first day. Marie recalls a serious mistake that she made two years ago, when she kept Gordon, Jr., her eldest, and little eight-year-old Ruth with her at the seashore until the first day of October.

School had begun on September 16. When they returned from their vacation, Gordie and Ruth were rather indifferent about entering their classes where the other children had had a two week's start ahead of them. They went to school on Monday. On Tuesday morning, however, they both decided that they didn't want to go. Their lessons were too hard; they might as well wait a few days longer anyway, as the teacher hadn't all of their books for them. She had sent in her book order during the first week, and as she had been told to

economize as much as possible, she had not ordered more than had been necessary at the time. Besides, there were so many rules that Marie and Gordie didn't know about. Why, yesterday Gordie got ten demerits because he had broken a rule which the pupils had been told all about on that first day. Of course, after a talk after school, the teacher had agreed to take off the demerits; nevertheless, Gordie had been made ashamed before the other pupils, and no amount of explanation would make them forget. No, decidedly, he and Ruth did not want to go to school. Besides, Ruth suddenly developed a headache. She was quite sure that she would die if she went to school.

After much persuasion, and even after threatening them with the loss of a trip to the country on Saturday, Marie finally induced them to start off. Great was her dismay, however, to be visited by the truant officer on Thursday, and to be told that both Ruth and Gordie had been absent since Monday.

It was nearly two months before Marie got the children fairly started to school regularly and in line for their regular school duties. After an absence for the first few days, it became so very easy for them to fall into loose habits of attendance and deportment.

There is a new teacher, Miss Williams, in the Primary Department of Cleveland School this year, and Marie knows how important it is that she should speak a word of cheer and encouragement to the little girl who is going to take charge of Billie's education. Oh, didn't you know that teachers sometimes need encouragement? Why, bless your soul, when some of those girls, just out of the normal or training school, take charge of a school of their own, they are half-frightened out of their wits. Not that they do not have sufficient training to take care of a roomful of children properly, but just the very fact that they are sensitive to the first day's criticisms of their children. What impressions of their teachers will they take home to their parents?

Johnny Blank takes his new book, ties a string to it, and goes fishing over the back of his desk while Miss Williams is endeavoring to teach a little song. The other children giggle. Miss Williams tells Johnny to come up and sit on her platform until the song is finished. Johnny is already prejudiced against the new teacher because he has heard it said at home that she is too young

to teach children. He decides not to go to the platform, just to see what she will do. Miss Williams comes down to his desk and asks him once more, gently but firmly, if he will go and sit on the platform. Again Johnny refuses. Then Miss Williams takes him by the hand and helps him along; or, she sends for the principal; or, she applies one of the many other rules which she has used in training school. Oh, yes, she finds that her rules work out sometimes, but that she has many adjustments to make before they fit certain stubborn little people.

Johnny sets up a wail, and his schoolmates sympathize with him. On, they hate that new teacher! They cannot see why she wants to act so mean. Why, Johnny wasn't doing a thing, 'cept tying a string to his book! Nine chances out of ten, Billie will get into the same spirit as some of the others, so that when he goes home that afternoon, he will tell his parents that he hates Miss Williams; that she's awfully mean, and that she pulled Johnny Blank out of his seat and made him cry. Now, how much nicer it will be if Billie's mother and Johnny's mother go to school on the first day so that they can get the correct impression, see the real situation for themselves. It is the personal contact of mother and teacher that brings about fair play in the child's education. If Johnny Blank's mother is there, she will see how her boy behaves, and will be able to help the teacher by correcting him in her own way when he gets home. If mothers would visit the school oftener, in a spirit of friendliness, there would be much less chance of their being sent for later because of their children's misdemeanors. The child himself would feel that the mother is cooperating with the teacher, instead of with him against the teacher, and there is no doubt but that he would do less to try the teacher's patience, thereby wasting less of her valuable time, and his.

Marie has decided to tell Miss Williams all about Billie's little peculiarities, so that she will know better how to deal with the youngster in case of misbehavior. If Miss Williams is wise, and I know she is, she will make note of these things. Nearly all teachers keep notebooks of the peculiar characteristics of their children, for these help them in dealing with other children whom they may teach in years to come.

A mother once came to me and told me that her boy, who was then in my sixth grade, hated school; that he had made trouble for every teacher that he had had, because of his stubbornness. She said also, however, that I might be able to appeal to Edward's curiosity.

On the blackboard on that first morning, I began to write a list of subjects, to be used for compositions, beginning with the eighth grade, and going down (there were three) to the sixth. I was just about to write a subject opposite "Sixth Grade—", when up jumped Edward, the only sixth grade pupil in the school:

"You needn't put any subject down for

me," he said, "for I don't write compositions."

"Oh, you don't?" I asked, completely taken "off my feet."

"No, ma'am, I don't! No teacher ever made me, and I know you aint going to!"

I took my eraser and rubbed out the few letters that I had written.

"Well, then, I don't believe I shall waste my time in trying to *make* you do it either. I had a fine subject for you, but, of course, it would be useless to tell it to you since you're not going to write it."

Ed ward's surprised expression was comical to see.

"What is it?" he asked. Thank goodness! It was his curiosity, then, that I could appeal to.

"Never mind."

"Aint you going to tell me?"

"Not until you're ready to write the composition."

I wondered if that had ended it. It

hadn't. At recess and again after school he came to me to ask what his subject was. I refused, gently, but firmly, to tell him. Several times the next day he came. Still I held out. On Thursday he came again, but I would not tell him. On Friday he came again, saying that he might write it if I would tell him; in fact, he thought that he would. Yes, he would, really and truly. Didn't I believe him? I did. Then I told him to forget the composition for a minute while I talked to him about something else. Did he know anything about the oyster industry in the Chesapeake Bay? He did. He began telling me all about it, but he hadn't gone very far when I stopped him, saying that this was what I wanted him to write about. He was quite surprised, in fact he laughed aloud as he told me that he knew "dog-goned nearly a bookfull" about that, for his father was a "Cap'n" of an oyster boat. He'd never written a composition since he was in the third grade, but he'd try. I thanked him. (How he

had passed through the grades without composition work, I never knew, but I suppose it was because he was exceptionally bright along other lines.) He wrote the composition and brought it in on Monday, a well-written theme, five pages long. From that day on I had no more trouble with him. And why? Because his thoughtful mother had told me how to get the better of him.

Marie attends all of the Parent-Teacher Association meetings, for she knows how much they help. Here the parents discuss the teacher's problems, including deportment, the needs of the pupils and of their teachers, and the condition of the school and its grounds. Ofttimes, too, the teacher is able to help the parents. Marie also goes to the school's entertainments and exhibitions, for there is nothing that will encourage her children and their teacher more than to have Mother praise their little attempts. Encouragement, to most children, means a spur to greater labor, although to some in

#### HAVE YOU KNITTED YOUR SIX SWEATERS?

These Baltimore and Ohio girls at Baltimore are members of the Knitter Family from Knittersville, Angora Islands, where wool and floss run in rivers and where knitting needles are used as forks. Seriously speaking, however, these sweaters were simply and easily made. Sweater No. 1 decorates Lillian Foster, stenographer, Scales and Weighing Bureau. It is of a vivid red with white angora collar and cuffs. No. 2, which enhances the beauty of Dorothy Lippy, Multigraph Department, Mt. Royal Station, is of white silk-and-wool, drop stitch, with a ribbon run around the top. "Lou" Clarke, wearing sweater No. 3, doesn't need the daisy pinned on her sweater to let us know that she herself is that kind of a blossom. This sweater is of the "knit a row, purl a row, and turn it on the wrong side" variety. Lou is a stenographer, Transportation Department, as also is Edith Coplan, who wears sweater No. 4. Edith's sweater was knitted by Genevieve Wright, chief multigraph operator, Mt. Royal Station. It is of apricot Shetland floss, knitted plain on those large needles. A sweater like this can be made in the time you have left over from two or three lunch periods. Elizabeth La Fevre, Auditor Disbursements Office, wears the charming little sweater No. 5, made in a lovely shade of blue silk-and-wool. She knitted six rows, then did that cunning little drop stitch. If you need any further directions about these sweaters, we are sure that these girls will be glad to tell you more. In the meantime, if you have made a sweater in a style different from any of these, let us have a picture of it—with you inside

the upper grades it means a slowing up in their endeavors; they sometimes get the idea that they have entered some kind of a state of perfection, wherein further work is unnecessary. The teacher, however, will be able to overcome this by putting the

child up against some problem that is a little too much for him. Marie is never afraid to encourage, for mother's and daddy's encouragement mean more to Billie and his older brother and sister than anybody's in the whole world.

## Frocks Built in Accordance with the Smartest Decrees of Fashion

By Maude Hall

**T**HE accent is placed on simple, graceful lines in frocks built in accordance with the latest decrees of Paris. Interest centers about the Russian and Egyptian embroideries, Spanish laces, Grecian draperies, etc., yet the keynote of all of these marvels of the French couturier's art is simplicity.

A smart straight-line one-piece frock in navy blue satin crepe has flowing sleeves and side panels of cherry chiffon cloth with polka dots of dark blue. The sleeves are cut in one with the side-fronts and side-backs of the blouse, so that when the front and back sections are added they have the effect of applied panels.

Foulard silk has a fixed place in the modes for summer. It is the one material of moderate price which seems to meet the demands of all tastes. A figured foulard with background of fawn and designs in navy blue and green, is fashioned in one piece, the low waist-line being indicated with a soft belt. At the sides are cascade panels of plain material—preferably Georgette crepe, with picoted edges. The kimono sleeves are extended with deep puffs of the Georgette, slit through the center and finished with a picot.

### Distinctive and Durable

The tailleur has a definite place among the fashions for all seasons, and for mid-summer one sees this advance model in sports silk. The single-breasted jacket is amply supplied with pockets and falls well to the hips. The skirt is a straight gathered model with straight belt. Medium size requires 5 yards 40-inch sports silk.

PICTORIAL REVIEW JACKET No. 9998.  
Sizes 34 to 44 inches bust. Price, 35 cents.

JACKET  
9998  
SKIRT  
9905

SKIRT No. 9905. Sizes, 24 to 36 inches waist. Price, 30 cents.

Radium Silk and Crepe

Of much importance in the development of semi-formal frocks is the contrast between blouse and skirt, though the material of one often trims some part of the other. Here the blouse of radium silk or large patterned design is unusually long-waisted and attached to a skirt of charmeuse satin. The satin forms deep bands on the large, full sleeves and binds the slashed front and round neck. Medium size requires 2½ yards 40-inch radium silk and 2 yards 40-inch satin.

PICTORIAL REVIEW DRESS No. 1030.  
Sizes, 34 to 48 inches bust. Price, 35 cents.

## Lesson in Home Dressmaking

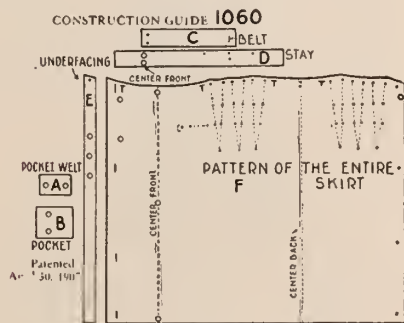

The "Wrap-Around" Model Offers Variety in the Realm of the Separate Skirt

THE "wrap-around skirt" made of fringed tweed is one of the smartest modes of the moment. It is exceedingly simple to make, requiring but a few hour's work. The model pictured is gath-

The model requires 1 3/4 yards of tweed 44 inches wide. To cut, lay the material open on the cutting table, right side up. Place belt on tweed with edge having single "T" perforation on a lengthwise or crosswise fold and remaining pieces with lines of large "O" perforations on a lengthwise thread of material. Cut only one each of sections F, E, D and A. Place pieces of material as shown in the cutting guide, keeping right side of material up.

Begin the making of the skirt by forming dart-plaits at sides, bringing together and basting along the corresponding lines of small "o" perforations. Terminate the darts at the single small "o" perforations and stitch invisibly on the under side. Gather skirt at upper edge between "T" perforations. Adjust underfacing to position underneath the right front edge of skirt, with the outer edge of underfacing along the line of slot perforations in skirt.

ered in front and back, with dart-plaits at the sides. The right-front edge of the skirt may be turned under for a hem or allowed to extend, and fringed. If the skirt is desired fringed, draw out the threads at the lower edge, one at a time, to the desired depth. Make the fringe at right front end of skirt, drawing out the threads as far as the line of slot perforations.

Lap right front of skirt over the left, bringing line of slot perforations to corresponding line of single small "o" perforations and stitch to position along the back edge of the underfacing, from the lower large "O" perforation in skirt to the lower edge.

Finish above large "O" perforations for closing.

Adjust stay to position underneath the skirt with two large "O" perforations at center-front, double small "oo" perforations at center-back and bring the single small "o" perforations to the folded edges of plaits nearest center-back. Stitch upper edges of skirt and stay together and close stay at left side of front.

The pocket may be omitted, if desired, or a patch pocket substituted for the inserted one. The belt is arranged around the waist with upper edge a little above the top of the skirt.

SKIRT No. 1060. Sizes 34 to 36 inches waist. Price 30 cents.

DRESS No. 1174. Sizes 34 to 50 inches bust. Price 35 cents.

DRESS No. 1209. Sizes 34 to 50 inches bust. Price 35 cents.

DRESS No. 1207. Sizes 34 to 50 inches bust. Price 35 cents.

DRESS No. 1200. Sizes 34 to 50 inches bust. Price 35 cents.

DRESS No. 1217. Sizes 34 to 44 inches bust. Price 35 cents.

### Wearable and Easily Made

With a wearing quality that is remarkable and a style feature that is undeniable this bloomer dress is equal to the serious phases of play. Checked gingham is used for the dress, while plain material supplies the trimming band on neck, sleeves and lower edge, also the bloomers. The bands are put on with blanket-stitch embroidery in one of the colors of the check. Medium size requires 1 1/4 yards 36-inch checked, and 1 1/2 yards 32-inch plain, gingham.

PICTORIAL REVIEW BLOOMER PLAY DRESS No. 9305. Sizes, 1 to 4 years. Price, 30 cents.

9305

A Comfortable House or Home Dress

4081. Long waisted effects still prevail, as this style shows. It is nice for tub silk, gingham, voile and also for taffeta, gabardine and crepe. Blue and white checked gingham is here portrayed with bandings of blue chambray and organdy for collar and cuffs. The sleeve in wrist length is fitted with a dart.

The pattern is cut in seven sizes: 34, 36, 38, 40, 42, 44 and 46 inches bust measure. A 38-inch size requires 5 3/4 yards of 32-inch material. The width at the foot is 2 3/8 yards with plaits extended. Collar and cuffs of contrasting material require 3/4 yard 32 inches wide.

Girls' Dress

4091. This is a splendid warm weather frock, and one that may be worn with a guimpe on cool days. Cretonne in red and

A Popular Style

4088. Here is a simple sleeveless style, with a neat guimpe that may be finished with wrist length or three quarter length sleeves. Plaid gingham is used for the dress and voile for the guimpe. This style is nice for tub silk, for crepe and gabardine.

The pattern is cut in four sizes: 6, 8, 10, and 12 years. A 10 year size requires 2 1/8 yards for the guimpe and 2 1/4 yards for the dress of 32-inch material.

A Good School Dress

4057. Dotted percale and white linene are here combined. This style is nice for all wash fabrics and also for serge, tricotine, homespun, or taffeta. The sleeve may be in wrist or elbow length.

The pattern is cut in four sizes: 8, 10, 12 and 14 years. A 10 year size requires 4 yards of 32-inch material. The dress may be finished in coat style as the closing indicates.

blue tones is illustrated with binding of black sateen. Crepe and linen are also good for this style.

The Pattern is cut in four Sizes: 2, 4, 6, and 8 years. A 2 year size requires 1 1/2-yard of 32-inch material.

A Dainty Tub Frock

4080. Tissue gingham or wash silk would be pretty for this model. As here shown checked gingham and organdy are combined. The sleeve may be finished in wrist or elbow length.

The pattern is cut in three sizes: 16, 18 and 20 years. An 18 year size will require 6 3/8 yards of 32-inch material. The width of the skirt at the foot is about 2 1/4 yards.

NOTICE

Any pattern on this page only mailed to any address on receipt of 12 cents in stamps. Use the blank on page 32, or send in your name and address in full on another piece of paper, giving numbers and sizes of the patterns desired.

## What's in a Building.

(Continued from page 29.)

day.' 'Oh!' she exclaimed, 'Isn't that funny? Why it's mine, too.'"

"'You don't say!'" says I, 'Now, then, let's tell ages. I'm just seventy-four today. How old are you?'"

"She hasn't answered me yet."

Now for the background: The white marble for the steps on which the papers are lying came from sunny Italy. From the far-away Scandinavian Peninsula came the marble, also white, that forms the handsome balustrades that support the stairways. This is known as Norwegian marble; it also forms the walls of the downstairs hallway. Upstairs we find the Italian marble again.

The yellowish-white wall panels which peep at us from here and there came from the Island of Syros, Greece. This Grecian marble is also found in artistic little inlays about the corridor. The ancient kingdom of Numidia, in Africa, is one of the oldest marble yielding countries of the world. Its marbles are conspicuous for their red and yellow colorings which we see in the borders around the flooring of the corridor. Surrounding this and around the base above the floors, we find a marble, intensely black, and forming a striking contrast to the lighter colors. This comes, not from far distant lands, but from our own state of New York, and is known as Glen Falls marble. This black, fossiliferous substance is found in the northern section of the state. It takes a fine polish and is comparable to the famous Irish Black. Harmonizing with and between the black borders on the walls we see an attractive mixture of black and green marble, this being from Tinos, Greece.

After you have bought your Evening Sun or News or the Saturday Evening Post from "Grandpa" Holmes, walk out the Charles Street door and look up at the handsome figures representing Commerce and Labor, above the doorways. These figures and the sides of the building up as high as the third floor are of granite, brought from North Conway, New Hampshire; the fourth story and those above it are of limestone from Bedford, Indiana.

## Solomon B. Sponseller

By H. B. Kight, Ticket Clerk, Keyser

Solomon B. Sponseller was born on March 3, 1857. At the age of 23, he came to the Baltimore and Ohio as a carpenter. In this position he has remained, a faithful and loyal employe, for 42 years.

Mr. Sponseller's first work with the Company began on October 15, 1880, when he was taken in with a gang of carpenters who were taking down old wooden bridges and building more modern and up-to-date ones, using steel girders. These were

bridges Nos. 6 and 7 on the H. F. A. V. Branch. In the latter part of November and December 1880, and January, 1881, he helped to install steel girders for the bridge that spans the South Branch river, below Green Spring, later doing small repairs to other bridges along the line. It was while he was stationed at New Market, Virginia, that he was called to Locust Point to assist in putting in the main braces and raising the tops over the 85 foot bins of an elevator which had been damaged by fire.

Seventeen hundred men were employed on this job, and the work done by Mr. Sponseller gained for him a foremanship over a force of men, located at Harpers Ferry. His job was to reinforce all bridges in that territory with trestles and truss work. When the laying of the track up the Green Spring Valley was going on, his forces worked right ahead of the track laying forces, building bridges over the 47 openings that lined the 16 miles of roadbed. His gang was housed in a portable house 16 x 32, which was moved whenever necessary. Mr. Sponseller continued building bridges until about 1885, when he was given general repair work to do. The bridges at Hyattsville, Frederick Junction, Opequon River, Ratling Bridge at Martinsburg, Back Creek, Sleepy Creek, Great Cacapon, Little Cacapon and Evitt's Creek, were trans-

formed from wooden structures to modern ones of iron and steel, under his direction. Many ballast decked bridges were built by him, among them being the subway at Oldtown road, in Cumberland.

Nearly all of his years with the Company Mr. Sponseller spent in camp life, in cars that were fitted out for the men to live in. It was his aim, and in it he succeeded, to make the camp life of his men and himself as near home like as was possible, and at the lowest possible cost. Each man living in a camp, in which he was in charge, paid his board to Mr. Sponseller, who bought all the provisions, and paid the cook hire. At the end of the month, the total amount spent was divided by the number of men in the camp, and in this way the amount of board to be paid was arrived at.

The boys, and in fact all of his many friends and acquaintances, are sorry that the time has come for him to give up his work; yet all are proud of his record and especially proud of the wonderful Pension Feature of our Big Railroad Company, which takes care of those who have given to the Company the best that is in them.

May "Spony's" future years be filled with much happiness, and may he always feel welcome to visit the various departments, where he always had a smile and a cheery word for those whom he met.

## The Letter of an Honest Fisherman

By "Bill" Baker, Lima, Ohio

Note:—Our live correspondent at Lima, Ra, Garrigus, headlined the following, "A letter from "Bill" Baker, who is spending his vacation with several friends, somewhere in Michigan." We stole it from the Lima notes to let others enjoy it as much as we have.—Ed.

WELL boys, the first week of the back-to-nature trip is at an end. The fish in the lakes are all present and accounted for. Not one of 'em missing. The members of the party are all present and accounted for. Not one of them missing at meal times. And I have to cook. Everything connected with this glorious (?) trip is all present and accounted for except a few chips that fell on the floor. Socially, the trip has been a success. Sportively, not so good. This idea of casting fish hooks into a lake and pulling out a bass as big as a rubber boot—all that stuff is bunk. Our personal statistics prove it.

Friend Walton's handy volume tells you that angleworms make good bait. We don't like to dispute Mr. Walton's word, but angleworms have got very little for this bunch. We all have the worms but maybe we miss the angle at which they are to be placed on the hook. Something, somewhere, is radically wrong.

According to Walton (and Hoyle is to poker what Walton is to fish) a young worm, if properly impaled on a hook, will excite the culinary complex of a fish. In other words, the hook lies in ambush behind a coy angle worm. The bass sees the worm, snaps it a la carte and then pays dearly for what he

eats. That is the theory of the thing. Practically, it doesn't work out that way.

Our fishing demons lance the worm as directed. They toss the bait and line into the lake. Then the bass proceed to eat the worm right off the hook like a four alarm fire would eat the stuffing off the steel springs of a mattress. At the end of a minute all we have left are the poles and the boat we're fishing in. Some of those fish have even tried to bite initials in the hook.

We fish all morning and eat canned beans for dinner. We fish all afternoon and have boiled eggs for supper. What fish we eat are sardines. If it wasn't for the chips, this would be a rotten fishing trip.

The educational values of this trip are expansive. We prove that fish do not make a fishing trip. We prove that a straight flush is better to the eyes than an eight pound bass or a three pound trout. We prove that warmth and good cheer do not necessarily flow from the brook that pours into the lake. All our proof is 110. After all who was that old sportsman who said, "A jug o' wine, a leafy bough and thou." Yea, bo! And you can leave behind the leafy bough and thou and still have a good fishing trip.

Sec you in a few days.

Bill.

## Begin Your Safety List Now and Win a Prize!

**A**LL Baltimore and Ohio girls and boys may enter our new contest. All that you have to remember are the following rules.

1. Begin now, if you haven't already begun, to write a list of the little Safety acts that you have done each day to keep yourself or someone else out of danger. Make your list out something like this:

Aug. 25. Found broken bottle on road where children walk barefoot. Buried the broken glass.

Waited until the watchman told me that I might cross the railroad track.

Helped an old lady across the street.

Aug. 26. Tied a bell on the iodine bottle so that little sister would not mistake it for cough syrup and drink it.

Told a man that there was something dragging from the back of his automobile. He thanked me.

Aug. 27. Pulled a heavy stone out of the road so that nobody would stumble over it.

Picked up tacks which spilled on the floor.

And so on, until September 30.

2. Make your list out on each day, if you can. Of course, the sooner you begin, the more things you'll have on your list when the contest ends, September 30. Even if you can't begin early, begin as soon as you can. Some of our little people will be able to do more in a few days than others can do in a month.

3. Do not send in your lists before October 1, nor later than October 10.

4. If there is anything that you do not understand, write to Aunt Mary. She will be glad to explain.

5. You may keep your list on scratch paper until you are ready to send it in. Then write it on one side of your paper only.

6. If you will write to Aunt Mary right away and tell her that you are going to enter the contest, she will send you a little surprise. Address all letters to:

Aunt Mary

Baltimore and Ohio Magazine

Mt. Royal Station, Baltimore, Maryland.

There are lots and lots of things that little folks can do to help themselves and everybody else to be safe from harm. One little boy told me that he put a big cork on the end of Mother's scissors when they were not in use. A little girl in Baltimore just told me that she always obeys certain

Safety rules. She wrote them down for me to give you.

Don't push a playmate into the street, even in play. A car may be coming.

Look up and down, both ways, before crossing the street.

Never jump on or off a wagon or trolley car while it is going.

Do not roller-skate or play baseball in the street.

Never try to run across the street. Be very careful.

Do not go riding or walking with people whom you do not know. My mother says that this is wrong.

If you little Baltimore and Ohio people can help somebody to obey these rules, then write down on your list just what you have done. Each thing that you do will count for so many points, and the little girls and boys who have the greatest number of points will win the biggest prizes. An orig-

inal Safety drawing sent with your list counts *five points* extra. No matter how small you are, you can do something. Your age will be considered, so be sure to say how old you are when you send in your lists.

Everybody join!

### Why I Want an Education

By Viola Wolfe, Daughter of Carpenter Elmer E. Wolfe, Chillicothe, Ohio

**E**DUCATION is one of the greatest essentials of life. You have often heard children remark, "What is the use of wasting time in going to High School?" They don't realize the meaning of these words until it is too late. After many years of hard labor they begin to look back and wish for the education which they did not get.

Many people today are trudging along in the same old space which they have occupied for years, and not moving forward at all.

Your success in life, as many people have learned, depends largely upon your education.

So, for my part, I am going to try *very hard* for an education.

### Dear Girls and Boys:

Just a little letter to tell you that one of our surprises has come along. Here's a real letter from Mother Goose, who lives 'way up in the moon. I saw her name in the Railways and Harbours Magazine, which is printed 'way, 'way over in South Africa. I wrote a letter to her a long time ago, hardly hoping that I would get a reply,

Two Tots from Tottenville, N. Y.—Eleanor and Marion Taber

## A Letter from Mother Goose

The Moon  
June 19, 1922

You dear Children:

I am Old Mother Goose who lives up in the moon. I ride on a broomstick and I fly all over the world at night. I really think, however, that I must soon be getting one of these modern aeroplanes—silly, buzzy, noisy things! I can steer my way as I like on my broom; my cloak floats out and acts as wings, but these aeroplanes make such a fuss about flying, when it is just the simplest thing to glide out into the air and alight and mount when one chooses.

The other day, too, I heard of a man who was talking about being shot up by a rocket into the moon—my moon, too. I never heard of such a silly thing! There is a man in the moon already; I shall tell him.

However, your Aunt Mary has told me that I may come and visit you. It is kind

Cherries and a Sunbonnet Baby—Drawn by Marion and Eleanor Tabor, Tottenville, New York

ters have come back to the Magazine office because little folks have forgotten to give their new addresses, or their old ones in full.

Minnie Loury, where do you live now? And Edna Akes, we sent you a letter to Xenia, Ohio, and it came back.

One more thing. Sometimes your daddies may leave the Baltimore and Ohio to go to some other kind of work. That does not make any difference as far as you are concerned. You may still contribute to our Children's Page, for once you're Aunt Mary's niece or nephew, you're always one of her family.

## The Hills of West Virginia

By Martha O'Gilvie

Morgantown, W. Va.

Oh, the hills of West Virginia,  
So beautiful to see,  
Make happiness within us when  
They smile at you and me.

We sit about the doorstep,  
Looking up into the sky,  
And we see the tops of mountains,  
And white clouds floating by.

I love these dear old mountains  
That stay forever green  
With trees and Nature's fountains  
And deep, blue, mirrored streams.

A home between the mountains  
Is most beautiful to me—  
I want to live forever where  
The mountains I can see.

Old Mother Goose

of her. You have a dear, kind Aunt Mary. I have often seen you, too, but I dared not come before.

I have sent Aunt Mary a story of South African boys and girls (more girls than boys). It is a story more true than I made up out of my own head. I have collected facts together and arranged them. Children of South Africa love the story.

I am glad that your Aunt Mary and I have made friends. I am sure that we, together, can do very much for children.

With love, dears,  
Your moon friend,  
Mother Goose.

Note to Girls and Boys:—Aunt Mary had not received the story at the time that this letter arrived, but you will be sure to hear about it when it comes. We hope that it didn't drop off the end of the broomstick as Mother Goose was on her way across the sky.

## If You Should Move Away

When you move, don't forget to send Aunt Mary your new address. Several let-

Drawn by Edna Akes, 12 years old, Xenia, Ohio but here it is; you may read it for yourselves. Notice the long, long time it took to get the letter from the moon down here. It was mailed on June 19, and just reached me on July 20. What do you think of our writing another letter to Mother Goose? If you will tell me what to say, I'll gladly write it, and put a copy of the letter on our Children's Page.

Now for the contest. Read about it in the July issue of the MAGAZINE, and in this one. I'm not going to tell you what the prizes are, for there are many of them. They are not such big prizes, but they'll be something that you can use every day. Begin today to make out your lists. The longer, the better. Yours lovingly,

Aunt Mary

Jiggs

Martha O'Gilvie, daughter of painter, Sabraton Shops

## Safety Roll of Honor

*The following named persons have contributed toward the safety of the Baltimore and Ohio by keeping their eyes and ears open for all irregularities, and have been commended by their officers for their watchfulness and prompt action. We are proud to record their names here.*

### Staten Island, New York

**Trainman B. Scanlon.** May 16. Discovered broken flange, Baltimore and Ohio car 199690, at East Shore Drill. Notified conductor. Wrecker necessary to replace wheel.

### Baltimore Division

**Acting Caller Joseph Burke.** June 25. Discovered fire in Baltimore and Ohio car 192317, empty box car, 58th Street Freight House, Philadelphia. Put out fire with extinguisher. No damage done, save small hole in floor of car.

**Brakeman S. L. Lambert.** May 21. Observed fire flying from Baltimore and Ohio car 184551, Train 94, Halethorpe, Md. Car set out.

**Engineer W. Louder.** May 31. While deadheading on Train 67, assisted engineer of train to care for heated journal by riding pilot of engine, Cowenton to Baltimore, in order to keep water in cellar of hot journal.

**Operator H. C. White.** July 1. Reported hearing something strike rails at crossover, Barnesville. Brake shaft found disconnected and dragging, Baltimore and Ohio car 15550, 13th car from engine.

### Cumberland Division

**Brakeman M. A. Watson.** July 1. Discovered one-third of wheel missing, Baltimore and Ohio car 14665, empty refrigerator. Had attention given car at M. & K. Junction.

### Monongah Division

**Mr. G. I. Shroyer, Shinnston, W. Va.** June 13. While working across river from Kitty's Cut, heard falling rocks. Investigated, found and removed one stone that had fallen on track. Notified dispatcher.

**Mr. H. B. Andrews, Ellenboro, W. Va.** June 12. Discovered badly washed track near Ellenboro. Flagged Train 4 and advised crew of condition.

**Operator J. L. Jenkins.** July 1. Observed hot box in Train 178, passing Berryburg Junction. Notified conductor. Car set off.

**Mr. C. C. Tichenor, Enterprise, W. Va.** June 22. Discovered broken rail, main track. Notified agent, Shinnston, so that repairs might be made.

### Wheeling Division

**Assistant Foreman A. J. Henry.** May 28. Detected bridge on fire east of Clarington. Had fire put under control and finally extinguished. Bridge saved.

**Foreman C. I. Gay.** May 17. Detected brakeshoe in point of frog, east of Moundsville, W. Va. Removed brakeshoe with sledge hammer.

### Newark Division

**Operator-Leverman George Meyer.** June 22. Observed brake rigging dragging. Telephoned towerman, had train stopped and crew notified.

### Akron Division

**Operator F. L. Milburn.** June 12. Noticed brakes sticking in car on Train 9. Train crew notified.

**Operator G. A. McBride.** June 12. Noticed brakes sticking, Extra east 4260, Sterling, Ohio. Notified train crew.

**Operator P. W. Adams.** Discovered dead cow on westbound track. Removed animal, eliminating danger to passing train.

**Mr. Rufus Warren, Mr. Eugene Fields.** Cayuhoga Falls, Ohio. June 15. Observed badly broken rail near Sand Run Bridge. Proceeded north and flagged approaching train.

**Track Foreman J. C. Reedy.** July 15. Discovered brake rigging down on Baltimore and Ohio car 149623. Notified yardmaster; train stopped; condition corrected.

**Foreman H. B. Wood.** June 23. Discovered bridge just east of Haselton on fire. Train stopped. Fire extinguished.

### Chicago Division

**Operator E. J. Smith.** Discovered rail broken out of crossing frog. Notified dispatcher, who protected by slow order and had repairs made.

**Operator C. W. Paull.** June 25. Notified bad hot box. Stopped No. 4315 at advance signal. Car set off.

### Ohio Division

**Brakeman W. D. Cox.** June 9. Discovered two broken angle bars, eastbound main track, Midland City. Notified section foreman, who made repairs.

**Operator G. G. Doherty, G. N. Tower,** Columbus, Ohio. June 24. Discovered telegraph pole and rubbish on fire on Pennsylvania R. R. right of way, near Baltimore and Ohio and Pennsylvania crossing. Extinguished fire with broom and bucket of water. Also discovered defective railing at top of stone wall, Broad Street Bridge, west of Columbus Station. Reported condition. Repairs made.

### St. Louis Division

**Mason Foreman W. E. Moore.** June 20. Discovered rail on main track broken. Notified section foreman, who made repairs.

**Flagman E. Scherber.** April 29. Discovered two angle bars broken on rail joint, just west of Fern Bank. Protected trains while Conductor Meyers reported condition to section men, who made repairs.

### Toledo Division

**Trackman Herman Wilgus.** June 19. Noticed brake beam dragging in Extra 4005, north. Notified train crew. Repairs made.

**M. Piccola.** July 16. Detected defective equipment on Train 56, Middletown. Two bolts out of arch bars and journal displaced. Notified supervisor.

### In the Realm of the Riddle.

(Continued from page 21.)

the way of new words, and the meaning of others, perhaps vaguely known but, when looked up in the dictionary, taking on a new meaning. The puzzle department is fine and I hope to solve some more of the puzzles."

Thomas S. Comer, second trick towerman, Park Junction, Philadelphia, sends in a very neat and absolutely complete list of answers to the puzzles in the May issue and has our congratulations on his good work.

The 79th semi-annual convention of the National Puzzlers' League was held at the Hotel McAlpin, New York City, July 4, and was largely attended by puzzlers from every section of the country. The report of the Committee on new puzzle departments mentioned "In the Realm of the Riddle" in highly complimentary terms. The 80th convention will be held in Baltimore, February 22, 1923, and when the arrangements are perfected, announcement will be made through these columns and an invitation extended to all members of the Baltimore and Ohio Puzzlers' Club to attend.

We would like to have some of the following puzzles for publication: Rhomboids reversed, pyramids, inverted pyramids, octagons, hexagons, half squares, charades, beheadments, curtailments, transpositions, transdeletions, deletions and anagrams. Our bin is very low on these puzzles and if we are going to continue an interesting department our members must get busy and try their hands at composition.

Don't hesitate to send in whatever answers you are able to work out, even if only one. It isn't everybody who can work out a complete list and you will be just as welcome with one or two answers as with a "complete."

### Credit for July Cover Design

Because of an unfortunate omission we failed to state in our July issue our appreciation for the attractive cover on that number, designed and drawn by R. G. Moorehead, operator at Dillon, Ohio, who has also contributed other attractive illustrations to the Magazine.

## Among Ourselves

### Baltimore and Ohio and Baltimore and Ohio Annex Buildings

Law Department.

Correspondent, GEORGE W. HAULENBEEK

In July I made my initial trip to Ocean City, New Jersey, to spend the week end with my little sweetheart, Susan Anne Trageser. Baltimore and Ohio train No. 524 makes good connection with the last evening train on the Reading Railway to Ocean City and the trip is a very pleasant one. The Delaware is crossed to Camden, New Jersey, and this little water trip adds to the attractiveness of the journey, and the boat is always filled to capacity. The better class of people, I find, take the Ocean City trip because there is less sensation and frivolity at Ocean City. People go there for the bathing, leaving nonsense at home for the winter period. On the Reading trains everybody utilizes the time in reading. The farther north you go, the more you see of this, though I do not know why, as there is just as much intelligence in our grand little State of Maryland as anywhere else. In the sub-way in New York, for instance, everybody has his nose buried in a newspaper.

Mr. Galloway's article.

One of the best things in the June number of the Baltimore and Ohio MAGAZINE was the article by Vice President Galloway, his message to our engineers. I hope that

every one of our engineers will give it full perusal. I want every traveler to read it. Our passenger traffic is increasing and we must give them the "best in the shop;" we must show them that our trains are properly managed; that they are run to make the journey safe and comfortable.

### Three Young Men

There is one feature of John Bopp's Dining room on the 12th floor that calls for commendation, and that is the work of the three young men who serve the food. With ever so many active waitresses calling for supplies, it is not an easy task to fill their orders, but these three workers are fully capable of doing the work and doing it satisfactorily. I always sit where I can observe, and if I have to wait for a vacant chair, it gives me an opportunity to see how people handle their forks. Look into this sometime and you will see what I mean.

### Proud of Him

One of the young gentlemen in the Law Department who served on the other side in the Great War, never dreamed when he was performing service there that he would be the recipient of recognition from a foreign government. He does not care for publicity and I rather admire him for it. He did good work with the Y. M. C. A. in Italy. He did not go across for fame, but to perform a duty; a service. The King of Italy has bestowed a medal upon him for meri-

torious services, and I think very properly. I wish I could place his name at the head of this paragraph, but he shuns publicity, as I have said, and I have regard for his feelings.

### Office of General Manager Eastern Lines

Correspondent, H. E. WEIFENBACH

Everybody is well and happy, and why shouldn't they be? There's Mrs. Craig, just returned from a trip to Atlantic City over the Fourth, and there's "Jim" Hedinger enjoying so much swimming at Bay Shore that he looks like a blushing school boy with all of his sunburn. A large package was received the other morning in the mail (it was so large that Albert was 15 minutes late in arriving with it), addressed to Mrs. Craig. When she opened it, there was revealed to the curious eyes of the Proletariat, a bunch of beautiful gladioli (for the benefit of the unfortunates, if there are any, who are not well informed on the subject of botany, this is a flower and not an animal). Of course this seemed rather suspicious and, while not called on for an explanation, Mrs. Craig told us that these flowers were raised by her "aunt" and had been sent her from Marietta, Ohio. Atlantic City—flowers—raised by her aunt!—Oh, well! the plot is entirely too thick for us. For further information, see Mr. Foster at Atlantic City.

Clarence Staines was on the sick list for a few days, but we are glad to report that under the careful attention of his wife, he is back with us and apparently normal again. Such are the blessings of married life—not the sickness, but the comfort of home attention. Ask Clarence, he knows.

Last month we introduced the members of our office force. This time we present their pictures. Did you think from the descriptions that they'd look like this?

### Engineering Department

Correspondent, OSWALD K. EDEN

Just a reminder: Cross Crossings Cautiously. Whether it is a railroad crossing, street crossing, or any other kind of crossing; whether in an automobile, horse and carriage, or on foot, if we will only remember those three words, a good many casualties can and will be averted.

Our Company had an attractive booth at the recent exhibition of the Export-Import Board of Trade of Baltimore, at the Fifth Regiment Armory during the week of July 10 to 15. Of special interest (at least to this

"Why are photographers?" wonders "Matter of Fact Gil" Martin, assistant to general manager, center, front row; and "Al" Herman, chief clerk, on his right, echoes, "Why?" The others comprise the office force, lacking only Friend Riley, the g. m.'s secretary

department) was a large wall map of Baltimore, drawn to the scale of 400 feet to the inch. This was beautifully colored and lettered by members of our drafting room. This map shows the railroad and terminal facilities in Baltimore, but more especially does it show our piers at Locust Point, our coaling piers at Curtis Bay, etc. On this large map there is an insert, scaled one mile to the inch. This was also colored and showed our terminal facilities in relation to ocean going travel. The designing, coloring, etc., of this map was under the supervision of J. H. Milburn, office engineer. He and his workers deserve a good deal of credit for such an attractive as well as instructive piece of work.

Our department was not left out when it came to June brides this year. Though it was late in the month when it was found that nobody had been married, who should come to our help but "Henny" Seitz, of the Engineer of Bridges Office. On June 28 he married Miss Leona Carolyn Altvater, at St. John's Evangelical Lutheran Church, Baltimore. After the minister had said the words that sealed their fate as one, like two turtle doves, they flitted north on their honeymoon, visiting Niagara and other points of interest. On their return to Baltimore they went to housekeeping, and are living at 3 Gorman Avenue. As a token of appreciation for "Henny's" adventurous (?) step, the department presented Mr. and Mrs. Seitz with a beautiful mahogany clock, floor lamp, etc., with the best of wishes. We all wish Henry the best of luck!

We take pleasure in congratulating Mr. and Mrs. D. A. Riley on their gift from the stork—a seven-and-a-half-pound baby boy, who came to them on June 24. Good work, "Mike," and good luck!

One of our mumber sent his wife to the country, then went to Atlantic City and

Miss Sullivan, of the O. S. & D. Division,  
'Freight Claim Department

gallivanted around there. How do you do it, "R. H?"

The tennis team is coming along in great shape. We were getting off to a flying start when we came from behind and captured our first match, played with Latrobe at Latrobe Park, five matches to four, after we were on the short end two to four in the singles. Although we played hard in the second match, we did not have such good luck, losing to Druid Hill seven matches to two. In fairness, however, it should be remembered that six of the nine matches played, one of which we won, went to three sets, and it was only after the hardest sort of struggle that we had to admit defeat. In this match the presence of E. A. Rudy, who plays for the Maryland Swimming Club, was a great asset, as he gave us one of our two wins. The other win was turned in by G. H. Dayett, who can put to shame many a younger player on the courts.

If you like to play, and yet get exercise out of it, you should join the recreational club that Mr. Kissler, athletic director at Hopkins, is organizing for employes of our Company. We meet at Homewood three times a week, Monday, Wednesday, and Friday, after work. If you haven't tried it, come out some day, bringing some old clothes along, and I can assure you that if you don't enjoy yourself it will be nobody's fault but your own.

Our cartoonist-file clerk, Howard F. Buffington, left us on July 15 for St. Louis and points west.

T. E. H. has started another real estate business as a side line to his many other enterprises. It is proving lucrative to him. From reports he is working on a community development, although just where I am not in a position to say.

Where did H. B. B. spend his Fourth?

Office of District Engineer, Cincinnati, O.

Correspondent, G. F. DAUBENMERKL

The stork insists upon keeping busy. A young engineer this time. E. J. Southerington, office engineer, announced the arrival of a bouncing baby boy on June 17. "Ernie" passed the cigars and they were certainly good ones. Congratulations, "Ernie," and thanks for the smokes!

Some of the boys went over to Death Valley not long ago and while they did not come back in a barrel, they were pretty badly bent. Whomever this shoe fits, please put it on.

Office of District Engineer, Baltimore, Md.

Correspondent, J. FORD COLLISON

District Engineer Mather made an automobile trip from Baltimore to Cumberland during the Fourth of July holiday. He states that the Nash is a wonderful car as it climbed all the mountains in high. He is of the opinion that it would do good work in helper service on the 17-mile grade.

Office of District Engineer, Pittsburgh, Pa.

Correspondent, J. M. WHEALAN

A certain young man's wife being away for the present, we rather anticipate that the crowd will gather at the old home soon to settle a much disputed question, "To win or not to win." We are in a position to state that the matter is given close attention and that charity demands that the losers have at least sufficient funds with which to reach home without embarrassment. In times past the banking and book-keeping end of it has given some trouble, but we are assured that the banker has arranged to protect himself in the future.

The work of this department is proceeding at a satisfactory pace and, like Oliver Twist, we are looking for more. It is regrettable that labor troubles are at present holding back the tide of business, but we hope for an early settlement satisfactory to both sides, so that business may resume in full swing. We are certainly glad to see the railroads buying and building, as that is a good indication of a revival of business generally.

Miss M. Ward and her mother are spending the summer near Allison Park; Miss Ward is enjoying the pleasures of commuting twice each day.

A fine aeroplane view of the location and the work at Allegheny River Bridge has been on display in this office recently. The picture was taken by the Air Service Department of the Army while engaged in photographing locations for landing fields in the vicinity of Pittsburgh, and is an especially good example of that kind of work, showing the entire structure with approaches.

Things are generally quite with the office force and we have nothing startling to report at this time. However, you can never tell, and our advice is to be prepared for any eventualities.

Mr. R. is on the job at Bridge 202, Laughlin Junction, trying to hold himself in. Memories of Allegheny River Bridge no doubt will crop out from time to time and he will be pardoned if occasionally he makes use of that famous remark which begins thusly, "When I was at Allegheny River Bridge."

General Freight Claim Agent

Correspondent, GEORGE DOBBIN

Baseball News

Even the hottest kind of weather fails to shrivel the supply of 'pep' among the men of our office. Pro and con, the merits of married vs. single men were discussed along lines of general ability until the showdown was reached in a decision to back up "heavy talk" with a practical demonstration of prowess with the National Pill. George, of Ku Klux fame, started the ball rolling for the Single Men, being succeeded by Mose Katzeff, under whose management the two out of three games went to the unmarried and un-worried males. Hoggie Brown marshalled the Benedicts to a strenuous defense, but after the first game, the cares that weight them down proved too much and they suffered a gallant (?) defeat, as proven by the scores of the second and third games.

The first game, played at Carroll Park on June 12, was a noble victory for the married men. With Mr. Heartt judging the curves and in-shoots in the role of umpire, and Baldwin acting as a "cussing" coach, the score of 14 to 10 was rolled up, leaving the "chicken hunters" in the lurch.

The second game, played at Clifton Park on June 19, resulted in a score of 20 to 14 in favor of the single men; the third game on the same battle ground on June 26 also brought victory to the prospective husbands by a score of 22 to 10. (The benedicts should have stuck to Carroll Park for luck.) All games were well attended, the ladies being in evidence. We hope that this outburst of enthusiasm will not mark the end of athletics in our office.

If a sufficient number of candidates volunteered, a Thin Men's and Fat Girls'

These folks probably never knew each other. We introduce them here by grouping their pictures. Upper left, a trio from the General Freight Claim Agent's Office. Upper right, former Mary Tansil, now married, who left the Telegraph Department minus one smile. Lower left, Joe Canfield, famous sprinter of Pier 22, New York. Lower right is little Le Roy Heise, whose daddy, Charles Heise, is a machinist at Mt. Clare. See notes for further information

Tennis Tournament would help to drive away the doleful "willies" during the Dog Days. Do we hear from interested parties?

Hurrah, for "Pop" Koehnlein! On June 15 the Stork paid him a visit, with the result that Billy is now among those present and all set to be a regular railroader.

Our friend Barry, O. S. & D. Division, took his family to Ocean City just before the Glorious Fourth. Since then we notice that his lunches are no longer the elaborate affairs they used to be. The cake is not there. Do you miss her, boy?

Our sympathy is extended to Mr. Wheeler in the loss of his uncle, Mr. Wm. H. Bians on June 14. Mr. Bians was a former director of the Baltimore and Ohio; he served in the Maryland State Senate in the early eighties, and after the Civil War was president of the M. & P. R. R. He was at one time the owner of the site of the old Baltimore and Ohio Building, now occupied by the Emerson Hotel.

At the present writing "Senator" Chance, Halethorpe, is enjoying his vacation, and those of us who come in on the "stop-everywhere" miss the usual debate between the "Honorable Abe" Sparrow of Lansdowne and our friend Bill, relative to the merits of their respective home towns. Abe reports

progress in the form of repairs done to the apparatus of the Lansdowne Fire Department, and Halethorpe comes back strong with a carnival during the month of August. Some competition!

Here is a shout to the newly formed Baltimore and Ohio Recreation Association, going in full force at the Baltimore and Ohio Building. We in the Annex are invited to participate. "We bane a purty gude feller," as the Swedish girl remarked to her "sweetie," so let's go!

The Legal Division of our office has been graced with an added attraction in the form of a suit of bobbed locks. Stand up and bow, Mildred!

Our Mr. Perry has been wearing a mysterious look for quite a while now and we feel only too well the sad truth as by a telepathic wave (whatever that is) conveyed. It must be that the old-timer tried a new formula in the hope of starting Christmas spirits (plural) and she fell thru.

Everything still and quiet on the Potomac! Not a chirp do we hear of those loud and frequent wedding bells that sounded through our "diggins" last Cupid-Bow Season. Can it be that the girls are more particular, or older—or that the "fellers" have less Root-of-All-Evil, or what?

Water sports have an attraction for the folks of our office and we know that they all participate in plain and fancy costumes, either in the water or just at the edge. Right after all these vacation and outing trips, a few photos, please. From the ladies they are more highly acceptable than from the gentlemen because of the fact that the girls show up better to advantage than the boys and we aim to have an attractive MAGAZINE!

Our friend Mead of Mr. Brown's Division, has been coming in and out of Ellicott City so quietly that we are compelled to ask how everything is growing and doing in his part of Maryland. Come out of your shell, old scout, and make a noise.

Mr. Bradburn goes on record as pronouncing the weather "hot" in no uncertain terms, "but, we must eat!" Open up the lunches, boys and girls (or vice-versa, as our friend Fink puts it) and let's chow. The "duke" is all O. K.

Mr. Russell has doubtless found the past session of hot weather irksome in the confines of the Annex. Sorry, old top, but we just can't seem to find over so much junk for the Unclaimed Freight House. But she's picking up (somewhere).

Our friend Runkles, O. S. & D. Division, recently escaped with his life only because of the presence of mind of the plumber who installed his bath tub. Because of his general lack of girth he was just being washed away, having absentmindedly removed the plug before stepping out after the "semi-annual." He was saved by the cross pieces at the mouth of the drain! Congrat's, old boy!

Oh! Hum! There comes another pile of work. Happy days!

**Printing Department**

Correspondents, H. R. FOGLE AND HARRY TOFT

Recent adventures in matrimony hereabouts include Composer Charles Adler, who was married June 4 to Miss Erma Weiser. Miss Lottie Wright, of the Bindery was married on June 16 to Mr. John Downey. Our best wishes to the two young couples.

We welcome to our circle our new proof-reader, E. L. Wood; also our old friend, Donald Purcell, now back on the job.

Children of H. R. Fogle, Magazine correspondent Printing Department

Compositor Harry Toft is receiving congratulations on the arrival of a baby girl in his home on June 6.

After a period of chasing the elusive comma, "Red" Toft is back again in his corner. "Red" becomes a fellow scribe in this issue.

On June 24 we said good-bye to Murray Lindsay, our colored porter. He was most industrious and obliging and we were sorry to see him go, but he took the best wishes of all of us with him.

The tariff rush incident to the rate reduction made us all glad to get the Fourth of July week end holiday. Fish were caught and babies entertained, depending upon our respective proclivities.

Born to Compositor Purcell and wife, on July 26, a son. Congratulations.

The accompanying picture is of the children of Correspondent H. R. Fogle.

If you have a bit of news, send it in.

### Relief Department.

Correspondent, H. IRVING MARTIN

A generation or two back, most of the population of these United States were content to read books of travel rather than help to make them. Some of them reveled in Daudet's "Tartarin of Tarascon" and took their visions of mountain climbing in tabloid form. In these days it is not unusual for us to see even the ladies, the enfranchised "seven-eighths," pack a few necessaries and a tooth brush into a hand satchel, and in two weeks cover a greater distance than did Columbus in the Little Journey that put us Americans on the map.

Miss Elizabeth Helfrich and Miss Esther Harr, who left their visiting cards in the home of the Shoshones, spent a large part of their vacation in the Yellowstone Park, took on a "permanent blush" of sunburn and had a snow-balling match in the mountains of Yellowstone Park, all in the same day. They traversed eleven states, spent two days in Chicago, and are back brown and happy. They will be all right after a few weeks' rest. While in the Yellowstone country the quartette, for the party also included "Aunt Mary" of the MAGAZINE, and Miss Elsie M. Russell of the Transportation Department, organized another Chapter of the "G. G.'s," or "Geographical Grasshoppers," noted nationally for their

ALL ABOARD FOR THE HONEYMOON EXPRESS!  
Left to right: Helen A. Lange, bridesmaid; William J. Cruickshank, the happy groom, and his smiling bride, Elsa Ann (Shroedl) Cruickshank

power to jump long distances at vacation time.

Some men are born with smiles, others acquire them.

Ever so often you hear of the "born" this or that—the born orator, or the born salesman, or a titled job that some chap fills better than others because he is born for it. But for the art of making friends, or of getting things done for him, give me the man who is born with the smile.

Back in the last century Ella Wheeler Wilcox woke up the human owls and put grins on their mugs when she wrote:

"Laugh, and the world laughs with you."

It is just as true now as it was a century since.

One in the anti-grouch class is our William T. Dixon, who recently faced an operation for appendicitis with a cheerful face, and came back to his desk after some weeks in the Homewood Hospital, with a big smile that seemed to say, "never touched me."

A sunny smile among the current assets of your personal Balance Sheet is going to start a big surplus on the other side of the Account Current; and it won't take a C. P. A. to find it.

The fellows who believe it is possible to be happy though married have gained another recruit.

This time it is William J. Cruickshank, Savings Feature, who was married to Miss Elsa A. Schroedl on June 28, by Rev. Theodore C. Sorge. The ceremony took place at 7 p. m. at the home of the bride, 16 South Patterson Park Avenue, Baltimore, Md. The families of the contracting parties and many of their friends, including T. Parkin Scott and Joseph W. Swikert, were present to see the tying of the knot, and to hear Miss Anita J. Berrett sing "O! Promise Me." The wedding trip was a visit to New England, the birthplace of the groom, with side trips from Boston and New London. During the World War, Mr. Cruickshank served as a Lieutenant in the Navy.

Smile!

An old philosopher has carved over a mantel in his home the following words: "I AM AN OLD MAN AND HAVE HAD MANY TROUBLES: BUT MOST OF THEM NEVER HAPPENED."

A whole sermon is contained in these words. Haven't most of your troubles been imaginary? Haven't most of them never happened? For gracious sake, do not worry about troubles that MIGHT happen. Do you not have enough real troubles without reaching out and anticipating others? If some trouble is pending, reserve your strength to combat it *when* and *if* it happens. Do not use up your energy in useless worry. Worry is natural and cannot be entirely eliminated, but we can refrain from worrying until the occasion arises. Worry may properly be classed as a disease and the best-known specific is not to worry.

We each have a life to live, and throughout its duration we have many pleasures and some troubles. Both are inevitable. Having the journey to make, however, it lies within our power to make at least part of it smooth. Notwithstanding the troubles there is always a certain amount of happiness within our reach. Grasp it, hold it, and enjoy it. Make others happy and you, too, will be happy. Smile and others will smile in return, but do not unfit yourself for all usefulness by constant worry. If your side of the street is dark and gloomy, cross to the other side where the sun shines. Keep your face to the sun and let the shadows fall behind you.

**Telegraph Department**

Correspondent, DELLA M. HAIN

Effective July 1, the supervision of time service throughout the System was taken over by the Baltimore and Ohio Railroad. Effective the same date, W. C. Donnelly was appointed general supervisor time service, headquarters, Baltimore, Maryland. It has been arranged for inspectors, who are established jewelers, to sell watches, chains and charms, to *any employe* whether in classified service requiring standard watches or not, the Railroad Company making deductions on payrolls for such sales and subsequent expense of repairs thereof, *but for no other jewelry or merchandise.*

On Saturday, July 8, Mrs. B. F. Thompson, wife of our telephone engineer, sailed from New York on the Royal Mail Liner "Orduna" for Southampton, England. During her stay in England Mrs. Thompson will visit relatives and enjoy a rest in Portsmouth, returning home in about three months.

Mrs. A. Stevens, wife of Special Inspector Stevens, has returned home from several weeks' visit in Cleveland and Toledo.

Miss Elizabeth Horre and Miss Catharine Cavanaugh, recently operators in our private branch exchange, Baltimore and Ohio Building, are now writing "Mrs." in front of their names—new names—which we know they like. Elizabeth was a June bride, but Catharine "put one over on us," as we learn she was married on February 22. What a holiday it was! Misses Rose Meyer and Nellie Holston have been employed as telephone operators to fill the vacancies created by "Cupid."

The picture on page 41 is of Miss Mary Fansill, recently employed in the Office of Superintendent Telegraph and former MAG-

AZINE correspondent. She is now Mrs. Samuel Kelly, residing in Fairmont, W. Va. Mary was formerly a Fairmont girl, and "Sam" and the West Virginia hills won her love. We wish for them both much happiness.

**Valuation Department**

Correspondent, G. B. SAUMENIG

Our friend Hiltz, Real Estate Department, has become quite prosperous of late. In addition to his real estate duties, he is in the show business, and is exhibiting some valuable live stock, which he acquired under peculiar circumstances, while on a trip to Chicago. He is very proud of his three pets and uses every precaution to keep them off the 11th floor. For further information see the owner.

One can never tell Bonney's reason for so many trips to the Southland. He says it is his mother. Is it?

Meese is back from his vacation in Atlantic City and various points in Pennsylvania. He had the time of his life—according to the snap shots.

Happy Charlotte Elizabeth King, niece of Valuation Department Correspondent

Beaumont's mail, while he was on his vacation in July, assumed gigantic proportions. The strange thing is that almost all of it bore one-cent postage. Form your own conclusions.

Gladys wrote us from Atlantic City and says she has had her hair bobbed. Well!

Cathcart has been receiving more catalogues regarding houses and more correspondence about material than the average architect receives in a year. That boy certainly had wonderful ideas, even if it takes years and years to bring them to pass. A dreadful catastrophe befell this young man in July. Previous to this date, it was rumored that it might be possible that he would go to Chicago for special work. Thousands of questions were asked about the number of collars to take and other ridiculous inquiries. He even went so far as to pack his grip, thinking he would be ready in case quick action was needed. Sorrowful was his countenance when he found out that he had been overlooked and he was not to go. Pretty hard luck when so much valuable time has been wasted buying shoes and suit.

Mrs. Barker has a peculiar fondness for those Charles Street busses. One thing that is noticeable is the numerous times she speaks of "Vic." One can never tell

whether she means her Victrola, Vick's Salve, or Vic Kruger.

Reid wins the straw handled fork awarded in July for the prize shirt. A most delicate shade of gray and peculiar material. He claims it was Mexican silk. We generally call it cambric or muslin.) It might have been a field shirt but not an office shirt.

Gus Spath occasionally wanders to the 12th floor. That boy is afflicted with absent-mindedness and we believe he is looking for a rest cure.

Jacobs is often in deep study. That boy of his, born on July 1, is the reason. If the youngster takes after his daddy, it would mean deep study for any parent.

Gerhold is back from his trot around the globe. This time he went to Omaha, Neb. He is rather quiet on the subject and there must be a mystery. Last year he went to California and the year before to Colorado. Europe in 1923?

McCrone and Dews, Cost Engineer's force, are on special work in Chicago and there is no telling what will happen. We may have interesting news later.

Brewer still handles the Official Guide in secrecy. When he is asked as to his destination, he only says "I am going away."

Bartell spent a week at Royal Oak, Md. He wrote to almost every place in the world and I believe this was the only place that would take him.

The accompanying picture is of Charlotte Elizabeth King, niece of the Valuation Department correspondent. This youngster is an ardent exponent of good humor and cheerfulness. She is just nine months old, weighs 18 pounds, and resides with her parents, Rev. H. W. and Mrs. King, at Scranton, Pa.

**Little Bits of Lubrication that Make the Wheels of the Machine in the Central Building Run Smoothly**

1. When boarding the elevator, be sure to stand right in front in case you are going to 9th, 10th or higher floors. This is in order that those desiring to get off at the lower floors may have the pleasure of pushing through and jostling the other passengers.
2. When in the lunch room, take your own good time at the counter and when through, continue your conversation with the one next to you. Those waiting have plenty of time for lunch and the time they return to the office makes no difference at all.
3. Do not replace catalogues, files and other papers where they belong, as you can always find them yourself and the other fellow does not count.
4. Make the floor the place for waste paper and other refuse. This saves the wear and tear on the waste paper baskets and makes life easier for those cleaning the office.
5. Never excuse yourself to your fellow clerks for any mistakes in your work or for any inconvenience you may cause. It is not expected of you.
6. Be sure to consider yourself first in all things, as the other fellow does not count.
7. When a head of a department or group head is conversing with one of the office force, be sure to butt in without excuse or invitation. *You* and *your* work are the two most important factors in the office. Politeness and good breeding should always be forgotten. They do not count at all.
8. Do not make use of brevity in your work. Others often have to handle work which you have completed and they prefer to wade through an elaborate description and details; and besides it helps to pass

away the time and increases the use of stationery.

9. Always come late in the morning. Five minutes makes no difference and the boss believes in variety.

10. Never smile but look grouchy. This does the most good and conveys the impression that you are bearing the world's burden.

11. Transact all of your private business on Company's time. This is what you are paid for.

12. See the other fellow's faults and mistakes first. Yours are so few that you have plenty of time to knock the rest.

The Valuation Department Summer Duck Pin Tournament has been brought to a close and all have agreed that it was a success. Although it was our first series, the spirit of the boys was wonderful. Some of the boys had practically no experience and were new to the game, yet strange to relate, two of these were on the winning team. The figures given below show the relative standing of the teams, averages, etc., and it is safe to say that if the team from the Auditor of Coal and Coke Receipts Office will look carefully it can be seen that our hat has been thrown into the ring. A series of games between these two teams would be interesting:

dent happened at a baseball game, we'll take his word for it.

In accordance with the expressed wish of the majority of the employees of this office, a committee was appointed for the purpose of effecting a Welfare Organization. Rules were adopted on May 16, and the following officers were elected by this committee: Chairman E. F. Jendrek, Treasurer Miss A. M. Kerr and Secretary C. B. Lewis.

**Auditor Coal and Coke Receipts**

Correspondent, JOHN LIMPETT

When Miss Alice B. Ott resigned her position on June 27 to take up her duties as a model wife to one Warren B. Shipley (at one time an employe of this office) another of the old guard passed by the way.

Miss Ott was one of the first group of ladies employed in this department and after eight years of acquaintance, she is the same today as when first we knew her. Of course she carries a little more weight today than she did eight years ago.

Weddings of recent interest were as follows:

Miss Loretta A. Schaffer to Mr. Randolph Weaver, on Monday June 19, at St. Paul's R. C. Church. After a trip to Norfolk, Va., they will reside on Evergreen Avenue, Hamilton.

Miss Marie A. Smith to Richard J. Peters, who was formerly employed in this office (where the romance began) and now employed in Assistant Comptroller Deverell's Office. The wedding took place on Wednesday, June 28, at St. Martin's R. C. Church. After a trip north they will reside at 2111 Penrose Avenue.

William G. Fritz to Miss Lillian E. Land, on June 20 at Christ English Lutheran Parsonage. After a boat trip to Boston and nearby points the couple will reside at 1220 Cleveland Street.

Louis H. Becker to Miss May Harvey, on June 27. The couple spent their

Eight reasons why the Auditor of Disbursements has a happy office force. Picture taken on the roof of the Baltimore and Ohio Building. Their names are Misses Dorothy L. Robinson, M. Elizabeth LaFevre, Gladys V. Griffith, Kathryn S. Spear, Francis W. Goldsmith, Ethel A. Porter, Regina M. Coster and Mary C. O'Hayer

honeymoon in Boston and Atlantic City.

We extend our hearty congratulations to all and the Auditor Disbursements Association presented each couple with a gift.

It looks as if the summer rush is about over, but as Dame Rumor will have it, there will be a few more of the young ladies leaving us in the fall.

The Auditor Disbursements Office Baseball Team is still keeping up its winning streak and keeping in first place, having won nine and lost two games. They are in hopes of winning the pennant this year in the General Office League.

A familiar face that will be missed in the games will be that of "Long" John Scheuerman, who was injured on Saturday, July 3, while playing with the team at Druid Hill Park against "Scotty's" Royal Blues. Attempting to steal second, John tried one of his famous (to be) slides, but this one refused to work (as usual) and he broke his right leg. After rendering first aid, Dr. Hoffman took him to the Mercy Hospital where his leg was set. We all hope that it will heal quickly.

On Sunday, June 25 Assistant Chief Clerk John R. Boring took it into his head to try out his Auburn car on a long trip. Newark, Ohio, his home town, was his destination. He had a fine trip, both going and returning.

Herbert Corkran acted as special representative of the Baltimore and Ohio on the recent excursion of the Shriners to the Pacific Coast. Colonel Corkran reports a splendid trip and a thoroughly satisfied lot of excursionists, which only goes to show that when the Baltimore and Ohio starts something it knows how to finish it.

Some of our supervising force have been celebrating in the past couple of months. E. Frank Thomas, head clerk, Payroll Bureau, celebrated the completion of his thirtieth year of service with the Company on July 1; G. H. Pryor, auditor disbursements, completed his thirty-eighth year of service on July 7; J. F. Donovan, chief clerk, completed his forty-third year of service on July 28; and Walter Wilmer, assistant chief clerk, finished up thirty years of service on August 9. And still they all look good for many more celebrations.

### Auditor Freight Claims Department

Correspondent, NELLIE F. COLLISON

Our fair Lillian is shown in the accompanying picture with her "Dear" Paul and other friends, having a glorious Fourth at Atlantic City.

Paul is one of the modern Seven Wonders and has succeeded in making Mother believe he is a W-o-n-d-e-r-f-u-l Boy. Be this as it may, all of us have had to lend our hands at "Match Making." The game is now progressing rapidly and Paul is a great strategist. To further his ends he has resorted to gifts of wonderful green earrings, necklaces and oil paintings, besides the usual voluminous donations of sweets and flowers. His latest and greatest success was an alligator from "Way down Souf." "It won't be long now."

"Rip Van Winkle," S——, our celebrated song bird who sleeps with one eye open, has returned from his vacation with a pair of patent leather pumps and a new supply of songs. Flapper Blues, Home Brew Walk and Cake Eater Glide are among his latest hits.

Since July 7, our co-worker, W. H. O., has been displaying more pep and wears the ear-to-ear smile. Some attribute this to his emigration from South Baltimore to the suburbs of Lake Montebello. It must be so, too, because in the early morning hours he discourses eloquently upon birds and their songs and the sweet odors of new mown grass. We also notice that his eyesight is better and there are no more complaints relative to cinders from passing trains. We hope the improvement will last equally as long, as this "move" was delayed, and that never, in a moment of retrospection, will he entertain the sentiment expressed in George Cohan's song, "Anywhere but Broadway Is Simply Camping Out," substituting South Baltimore for Broadway, of course.

"Dapper Dan" and "Teddy" have a really bad case and it looks as if we are going to lose our fair "Teddy." This is a fair warning, boys and girls, to save up your pennies in an effort to get the usual quarter.

Since the evening of May 30, D. H. D., Tariff Department, seems to be interested in one of the fair maidens of our department — or is it the Nash car that is the attraction?

Our Earl at one time owned a Saxon (one of those cars you fold up and shove through the cellar window), but, alas! the engine reached the stage of a one-passenger puller. As the lady in the ease had never learned to manage the wheel, and Earl was too gallant to ride and let her follow, he made a sale and bought a "Shove-or-let."

A full crop of inconsistency is the chief possession of a certain member of this Department. For some reason or other, his conversation is largely upon the subject of matrimony and he points with the finger of scorn to anyone languishing in a state of single blessedness. On the other hand, all attempts at vamping parties in the office are immediately squelched (you may ask GLS and FXS to verify this statement) by his interference.

Moral: Inconsistency, thy name is not always Woman.

The deed is done, and Nelson A. Thompson and Miss Margaret A. Auck are "Two minds with but a single thought; two hearts that beat as one."

Felicitations! May your joys be as deep as the ocean and your sorrows as light as its foam.

Lillian, "Dear Paul" and their friends at Atlantic City. This was not taken in the Annex

Look at this and keep cool. This is where the snowdrifts drifted around Bayonne Avenue, Baltimore, last winter

Hide and Seek is a good game, but, Henrietta Marie, we think that you and a certain brown eyed person of noted flaming locks, should have had enough of the corners. It is about time now for "Ike" to "speak up and 'spress himself."

#### Auditor Merchandise Receipts

Correspondent, P. HENRY STARKLAUF

While the weather is hot, lets take a peep out on Bayonne Avenue, as it looked last February through the kodak of Osborn.

Some time ago one of our number was glad handing it around like an old time politician. Had a fine time piling up votes through the instrumentality of some of his friends who landed him, they say, at the head of the list as a delegate to the Relief Department Convention held in Cincinnati. Maybe Harry Ries liked it so well he might try again next year, now that he knows the ropes. Sorry we couldn't purloin a photo to let you know how he looks, but his picture was on an inside cover a long time ago.

Mary and Helen were complaining about sore feet after their vacation north. Blowing into Niagara Falls, they found the car lines were tied up, so, to see things firsthand, they hiked.

Radio from Lancaster states that the Maries have arrived.

Country dinners, etc.—  
Back to the simple life for a spell.

The airplane bird—Mr. Stock—was seen soaring around Relay—Elkridge, some few days ago and left a fine girl at the home of L. E. Kemp, at Hanover, Md. More congratulations!

#### Weddings

George L. Donoho, Interline Settlement, to Lillian Worthington, Statistical Department, June 6, at Church of the Ascension, Lafayette Square.

Allen Hartment, Interline Settlement, to Bessie C. Leitch, June 1, Overlea M. E. Church, Maple Avenue, Overlea, Md., Rev. C. H. Lambdin, Pastor. Best wishes!

## New York Terminal Lines Staten Island Lines

Correspondent, G. J. GOOLIC

Tough luck when you hang your raincoat in an office and return, only to find it gone out for a walk! Well, the Hon. W. E. Pettigrew slipped on a raincoat and went out. Later, General Foreman "Barney" Devins returned, looked for his raincoat, and picked on the office staff for having hidden it. We're sorry he had to go out to Arlington (no man's land) without a raincoat, in all of that down-pour.

The accompanying picture is of Ruth Taylor, age 4¼ years, daughter of Walter Taylor, chief clerk to the superintendent.

The Staten Island Railroad Club defeated a team composed of "Vikings" and "Americans" at Viking Field, on Saturday, June 10, by score of 5-4. Kopko twirled his usual fine game for the rails and allowed but a few scattered hits.

The Railroad club lined up as follows:  
J. Larkin, s. s.; F. Dougherty, c. f.; C. Ryan, 1b.; T. Hurley, r. f.; F. Rebhan, l. f.; F. Stanton, c.; J. Goodski, 3b.; J. Ryan, 2b.; J. Kopko, p.

Here's a good picture of Train Announcer Robert Silva, Passenger Crew Dispatcher Malcom Sandborn and Trainman John Heywood.

John Goodski, clerk, Superintendent's Office, has just returned from a two weeks' tour, Niagara Falls and Washington. This

is the first time John has taken such a trip, and he got sunburned. The office force is trying to figure out just how he got it riding on the trains for two weeks. Tell them, John.

Henry Hegdal is now office boy, Superintendent's Office, Pier 6, St. George, vice Henry Kiehn, transferred to Division Accountant's Office. We all wish them the greatest success.

Harold Vidler has been employed as messenger, Division Accountant's Office, vice William Langford, who went into the car repair gang.

A certain engineer in St. George Yard has been trailing with his car in search of Prince Dwyer, for the last month, but is unable to find him. Prince, as he is known, has found a new widow and is now much interested in her. Why are they after you, "Prince?"

There is a rumor going around that Yard Clerk Henry Keonig, St. George, has a new boss, and that he is first trick reefer inspector. We wonder who he is.

The Third Annual Ball of the Employees' Mutual Benefit Association will be held on Saturday evening, October 28, at the Stapleton Club Rooms, Stapleton, Staten Island. Music will be furnished by our old favorite, Prof. "Nick" P. Vice. "Nick" was an old employe of the Staten Island Rapid Transit and has always treated the Association with the best music on Staten Island.

We would like to have all employes come and have a fine time. Tickets, gentlemen—50 cents, ladies—25 cents.

The members of the committee in charge of this affair are G. J. Goolic, J. V. Costello and W. P. Slattery. If you were at our last dance, we know you will not miss this one. The committee is working hard at present to make this dance the best that was ever held on the Island. This can be done, if all will work together.

#### Pier 22, North River, New York

Correspondent, JOHN NEWMAN

The first picture in the group on the facing page might be named "Extremes Meet," "The Long and Short of It," or "One and a Half." The long end of it is our Brobdignagian, Pete McKaigney, ex-

Left: A worthy trio—R. Silva, M. Sanborn, J. Haywood. Right: Little Ruth Taylor, daughter of chief clerk to superintendent, St. George, S. I.

Santoro's Picturesque Personalities

Watch your step!

tending a four-foot arm in protection, or blessing, above the head of a micro-organism named Francisco Carmine Santagata. If he were half as long as his name!! Well, he is good stuff in a small package. Good fellow, good worker, good citizen and good friend. Quantity doesn't count. Many of us poor perverts still would prefer a "pony" of Pilsener to a bucketful of "near-beer." ("Near-beer!" Far from it—"Far-beer!")

This picture, taken by the correspondent on the roof of Pier 22, presents the Misses P. K. (left) and M. G. (right), our two "bobs," previously referred to in these columns, also the sparkler on Miss M. G.'s hand—the promissory note to the "Promised Land"—of which mention was made in the May issue. Thus flanked, left and right, in the center stands a beauty of a different type—blonde, shy, Miss Lillian Schultz. We are sorry to say that we will have no further opportunity to speak of Miss S., as she has resigned her position since this picture was taken, so we cannot let this chance pass without saying that she was an "awfully nice" girl, with a smile always ready to acknowledge a pleasantry. The picture furnishes a study in contrasts; it also affords an opportunity to review anew the "to bob or not" question. Of course, there is no reason for argument.

John Bradley has left Pier 22 to become a "Street Man" in the Traffic Department. Willet Peleman quit the railroad for the candy business, as did Francis Duffy. Miss Schultz left to accept a position with better pay and better prospects, she hopes. And we hope so too; in fact, we are hoping that everybody who is *trying* and *hoping* will not hope in vain. Hoping for something to "turn up" is vain. The only thing that we can depend on to turn up is a barrel-hoop when trod upon. But hopefully trying and again trying, should be productive of results sooner or later.

Quite a number of changes or shifts have taken place in the office personnel within the past few months, caused by these and other resignations. These have been followed by the inevitable chain of promotions, determined by seniority primarily, "fitness and ability" being subjacent and subordinate conditions, according to agreement. Every resignation from one of the higher rated positions means a shake-up that amounts to practically an overturn of the whole office force, causing much trouble to the department heads by necessitating "breaking in" new hands continuously.

"Barney" Jordan has returned from a sick-bed back to harness, taking up his old duties at Pier 22, and also resuming the old habit of lurching in a certain place

with a certain partner. He appears aglow with new health and new ambitions.

Wonder if our wishes, expressed some time ago in these columns, were effective.

The following note, contributed by "X," is masked and shrouded in mystery to the uninitiated, including ourselves, but will no doubt prove interesting to the parties for whom intended:

"Al" Fox has declared his favorite instrument to be the cornet, especially the powerful La Blanche Cornet." (We never heard of it.) "He is scanning the 'ad' columns of 'apartments to let' for one room and bath for the pursuance of his musical studies." (The bath to drown the noise in, we presume.) "Al" is a man of large ideas; he is negotiating for the shipment of a carload of preserve jars, f. o. b. Kingston, N. Y." The paragraphs in the foregoing appear not correlated, but they probably

all revolve about the fact of Al's approaching nuptials, next fall.

Safety item addressed to some of the boys here: "Wear suspenders—or if you *must* wear a belt, for the luv-o'-mike, wear a belt *and* suspenders.

This nice person is Edmond Joseph Levey, Eastbound Department—"sport, man-about-town and all that," as Cartoonist Lynch puts it. He has a good face and a fine vest. He also, like myself, has a great future behind him. That is all we know about him, and, anyhow, it describes him.

We want to call the attention of everybody to page 33 in the June issue of the MAGAZINE, where the name of J. J. Bayer

ALL AROUND PIER 22, N. Y.

1.—"From hillocks low to dizzy heights"—and we have 'em all sizes in between. 2.—Edmond Joseph Levey, his smile and his checkered shirt. 3.—The Fourth Triumvirate—or "Holding down a man's job."

stands forth emblazoned in large type. On another page in the same number we poked some fun at Mr. Bayer's refusal to "blow his own horn," insinuating the possibility of there being no music in it. Sort of veiled "ha-ha" it was.

We now stand shamed and beg pardon. "Joe" never did shout much; he transacts (accent on the second syllable) without noise. His motto in this respect is "let George do it," and George does it. "Deeds, not words," said T. R. That is what boosted "Joe" into a station agency at the age of twenty-seven.

The great and "Glorious Fourth" of the past generations, with its wonderful pyrotechnical displays of gunpowder and bathos, the bomb and the cannon-cracker, the fires, deaths and mutilations directly due to these agencies, has gone to join the Auk and the Dinosaur. In its stead there has been inaugurated, or rather developed, a "safe and sane Independence Day," on which the old fire-eaters may watch their children's children in parades, games and patriotic exercises. This is to lead up to a story concerning Joe Canfield, our chief messenger at Pier 22, whose picture you find on page 41. We were told that Joe had won a medal for fast running, so we got after him for a look at the medal and particulars.

It is a beautiful goldpiece about the size of a "double eagle," with Mayor Hylan's bust in relief on the obverse and a field of runners racing towards the beholder on the reverse, surrounded by the inscription "Safe and Sane Fourth of July, 1922." That is the medal. And the particulars: Joe was strolling about on the Fourth, togged in his best, when he happened at an athletic meet arranged in Battery Park. A 100-yard dash was the next on the program and Joe entered it as he stood, in toto, creased trousers, shined boots and all, against a large field of B. V. D'ed would-be winners. Joe came out first, in 11 seconds flat. The field "also ran." Like another chief messenger, Mercury, Joe has wings on his heels. Further inquiries brought out that this is not Joe's first or only medal; he has a collection of them for victories in distance running, boxing, broad-jump and high-jump. He is only seventeen this month and is a quiet, unobtrusive, and well behaved boy. Want to meet him in B. V. D's? Take another look at his picture. We predict that Joe will "be in the papers" some day.

A world-beater in another line is Tom Marrucci of Uniontown, Pa. See page 15, June issue of this MAGAZINE. Tom worked eight years at two-fifty per day, and saved. With his savings for this period he bought twelve "properties," the last one costing ten thousand dollars. How he did it is in the Realm of the Riddle. Spencer in his "First Principles" says: "Before an idea can be understood there must be a mental structure capable of grasping the terms of the proposition."—My mental structure, Giddap!

**Editor's Note**

Knowing only enough about high finance to keep the w. k. wolf barely off the ancestral estate, and claiming no relationship or acquaintance with the equally w. k. Ponzi, et al., I can only refer my esteemed correspondent to one Andrew Mellon (who is said to know how to cut 'em) but who is now occupying the m. or l. exalted position of secretary of the Treasury, at the Hub of the Baltimore and Ohio Universe, to wit, Washington, D. C., and whose Savings Department is responsible for the aforementioned story about the redoubtable Tom.

On June 30, Terminal Cashier Fred W. Nelson attained his majority, 21 years, in the service of the Baltimore and Ohio.

Twenty-one years from messenger-boy to terminal cashier in exactly twenty-one moves, by promotions. He tackled the Baltimore and Ohio mailbag at the age of fourteen, in 1901, and through a desire to want to know, learned in advance the jobs to which he was successively promoted. Mr. Nelson also has the remarkable, if not unique, distinction of having caught up with his father as a veteran in the service, both now being members of the Baltimore and Ohio Veteran's Association. Mr. Nelson's father, Captain Nels. B. Nelson, ex-deepwater sailor and globe circumnavigator, has been navigating Baltimore and Ohio lighters for the past 32 years; but is still young, in appearance about forty. As Cashier Fred's oldest son soon will be the age at which his dad shouldered responsibilities and the mailpouch, twenty-one years ago, it is possible that twenty-one years hence a Nelson the Third will step into the ranks of the Baltimore and Ohio Vets, and along with sire and grandsire combine to make up a trio, as remarkable, in a different respect, as that depicted in "The Spirit of '76."

Miss P. K., previously introduced in these columns, has reported for duty after being absent for two weeks, as the result of an operation for too much tonsils. Not so very sick, but couldn't talk, she says. That explains the two weeks' absence from duty, for of course, of what use is a stenographer if she cannot talk.

Aside from the really worth while reading matter in the MAGAZINE there are many gems of wit, humor, experience and reasoning scattered in the text of the Among Our-

selves notes. Read them and profit. The funniest conceit in the May issue is Mr. Mannix's (East Dayton, O.) epigram in verse, entitled "Save the Pieces." Read it and laugh.

The Pier 22 office has taken on the aspect of a cloudy day because of the lead-colored alpaca office coats purchased wholesale and distributed at cost to the male force by Mike Mueller, general purveyor and commissary by self-appointment. Silver edging to the cloudy effect, with here and there a rift furnishing light and color to offset the gloom, supplied by the "bobbees" and "flapperettes."

Extensive repairs to the Pier 22 structure are being made. New foundations laid under the supports carrying the superstructure containing the offices, necessitate excavations under the dock flooring. An idle bystander, watching operations, wanted to know if the diggers had found "any nuggets." "Only pay-dirt," replied one of the gang. Correct!

Arthur Brisbane says: "Tell your young man who thinks that the most important thing in the world is a good, long vacation, that when the hare lies down to sleep the turtle wins the race. Remind him that Edison's genius is ten per cent inspiration and ninety per cent perspiration. Many turtles will collect, as usual, at the end of this summer." Some other wisenheimer has said: "All work and no play makes Jack a dull boy." So there you are; it is up to you to decide whether you prefer to be a perspiring turtle, equivalent to a dull boy, or a sleeping rabbit. There seems to be no other alternative.

A "funny" by Jim Powell of Staten Island

What is a man worth? Practically nothing, or about 98 cents, chemically. Analysts assert that man is composed, in addition to water, 85 per cent, of the following ingredients: "Fat, enough for 7 bars of soap; iron, enough for a twopenny nail; sugar, enough to fill a shaker; lime, enough to whitewash a chicken-coop, phosphorus, enough to tip a box of matches; magnesium, enough for one medicinal dose; potassium, enough to explode a toy cannon; sulphur enough to rid a dog of fleas. As William Cox sings, "Oh, why should the spirit of mortal be proud?" Oh why, indeed? 98 cents! That covers the value of *man*; does not apply to woman. From our acquaintance with the superior sex we should judge them to consist of pop-soda, (you know the fizzy kind) for the liquid component, and chocolates, tea-crackers, pickles and etceteras for solids.

Safety First Item—Don't dispute the right of way with a Locomotive.

Weary—Eight hours' work and eight hours' sleep, says the doctor.

Wiry—Yes, but not together.

Thickfellow—I was thinking.

Quickfellow—What with?

## Eastern Lines

### Baltimore Division

Correspondent, W. H. TARR

Well! The Division Baseball Team got into the League. Earl Mallery, manager. They expect to be bidding strong for first place before the season closes.

### East Side, Philadelphia

Correspondent, CHARLES H. MINNICH

Max Kaigh married Frieda at last, and it was some wedding! We didn't think that he had the nerve to do it. Well, it's too late to worry now. Max returned safely from his honeymoon in Chicago.

Pete Perlson also tells me that he is numbered among the benedicts. Good luck to 'em!

### Mt. Clare

Correspondent, MOLLIE S. ALBRECHT

#### Superintendent of Shops Office

Marion doesn't look quite so sleepy in the mornings now. Perhaps the cars have stopped running to Highlandtown.

The arguments put forth are worthy of our best lawyers, the usual contestants being "Judge" Duffy Kuhl, Ed. Kuhl, Sam Dearing, Harry Tarun and George Washington. What they don't know about baseball isn't worth knowing!

We are sorry to announce the loss of one of our best-liked men, B. F. Ellers, who has resigned to take a clerical position in the Post Office. Frank, old scout, we wish you

all kinds of luck, and we know that if it rests with you, you're bound to "get there."

William Sapp, the dark complexioned gentleman who helps operate the cranes and rattlers, is proud to say he hasn't lost a minute this year. Harry Tarun, his side kick, is running him a close second, save that Harry came in half-hour late one day. Is there a reason? you ask. We really cannot say!

### Spring Plant

#### Jones Creek for Fishing

Yes, this is the advice put forth by Mr. Crandoll. And you can just bet on this being so, for Mr. Crandoll has quite a reputation as a fisherman. However, we are just a wee bit afraid of his losing his reputation as a salty fisherman if he doesn't do better than he did on the fishing party of June 10. He may have to go down-town, buy a fishing game and do a lot of practicing to keep up his reputation! All the bites he had on this trip were mosquito bites. We believe that he landed four fish but we do not know whether they were minnows or whales.

### Washington, D. C. Freight Station

Correspondent, W. L. WHITING

Washington, D. C. is at the present time enjoying its annual vacation period. The governmental departments and the majority

of the business houses are closed part of the time so that we are not experiencing the great rush of work that the late winter and spring trade affords us. Nevertheless, we are not in danger of falling into the mischief that is to be found for "idle hands to do."

We have had no changes in our force since last month, and we do not contemplate any.

Our sick list is the same; M. F. Kelly, sealer and W. A. Keys, delivery clerk, are still unable to return to duty. The former is suffering from nervous troubles, and the latter with rheumatism. Fears are entertained that Mr. Kelly may not return for some time to come, if at all; but we hope to see "Doc" Keys around before very long. Both are veterans in the service and are popular with all.

Yard Delivery Clerk F. W. Harrison spent a pleasant week at Norfolk, Va. recently, visiting all the points of interest within reach of that city. He came back showing that he had missed nothing of the sea air and warm sun of that section.

### Brunswick, Md.

Correspondent, R. L. MUCH

Firemen S. S. Keller and F. W. Faulconer, with their pedigreed setters, appear in our photographic limelight this month. The dogs are being trained for their fall hunt. They are valued at \$300, and are the finest of their kind. Besides being our Company's firemen and always on the job, Messrs. Keller and Faulconer are hunters and sportsmen.

Engineer Jasper Harrison and his interesting family, along with Mrs. May Jenkins, of Washington, D. C. (sitting), are also thrown on the screen. Mr. Harrison owns a lovely home on New York Hill, Brunswick. He has been in the service of the Baltimore and Ohio for 30 years.

The Careful Crossing Campaign has proved a success, as far as our railroaders around Brunswick are concerned. Not a single accident has occurred here. "Our Boys" are always ready to stop, look and listen, and it would be a great blessing if everyone would observe our Company's safe rules.

Because of the unsettled labor conditions, it has been rather difficult for the correspondent to secure many items of interest. We have sincere hopes, however, that everything will be ironed out soon, and that we shall all be happy again.

### Cumberland

Correspondent, JOHN J. SELL

Matthew J. Sarsfield

Night Chief Train Dispatcher Matthew J. Sarsfield, Cumberland Division, died on July 9. Mr. Sarsfield was born in Oakland, Garrett County, Maryland, 38 years ago. He was educated in the common schools of Oakland, after which he studied telegraphy, and secured a position with this company as extra operator. He worked in various telegraph offices on the Cumberland Division, and later was regularly assigned as operator at Piedmont, which in those days was a very important helper station on the West End of the Division. After serving some time there, he was made copying operator in the Dispatchers Office, Cumberland. He rapidly rose to the positions of extra train dispatcher, train dispatcher and chief train dispatcher. Brunswick Folks. Above: Engineer Jasper Harrison and his interesting family. Below: Firemen S. S. Keller and F. W. Faulconer and their pedigreed setters

Hamilton Watches range in price from \$40 to \$200; movements alone, \$20 (in Canada, \$23) and up. Send for "The Timekeeper," an interesting booklet about the manufacture and care of fine watches. The different Hamiltons are illustrated and prices given.

## A Mile-a-Minute Schedule on Hamilton Time

**C**ONDUCTOR Nicholas Laycock of the Philadelphia and Reading Railway "Rocket" to Atlantic City times his fast train with a HAMILTON WATCH. This train regularly travels the fifty-six and a half miles between Camden and Atlantic City in fifty-five minutes, equaling the record of the "Boardwalk Flyer," which is known as the fastest regularly scheduled train in the world.

When Conductor Laycock chose a watch that would time his train with consistent accuracy, his choice was naturally the HAMILTON—"The Railroad Timekeeper of America."

**It will pay you to own a watch  
with a service record**

The Hamilton Watch is the choice of most American Railroad men—a highly significant fact, for Railroad men **MUST** have accurate time-pieces. A great many of them choose the Hamilton 21 Jewel, No. 992—and if you want true time all the time follow Conductor Laycock's example and purchase a watch with a real record for service, where service counts.

HAMILTON WATCH COMPANY, Lancaster, Penna., U. S. A.

# Hamilton Watch

"The Railroad Timekeeper of America"

The late M. J. Sarsfield

shock to his many friends and fellow employees.

Mr. Sarsfield was of a genial disposition and was never too busy to do a friend or fellow employe a favor, no matter how small. This endeared him to all who knew him.

He is survived by his wife, who was Miss Stella Laughlin, formerly of Westernport, Maryland, and two small children, who reside in Cumberland.

The funeral services were held from St. Patrick's Church, Cumberland, with burial in the church cemetery. The Local lodge of the Knights of Columbus, of which the deceased was a member, had charge of the funeral arrangements.

In our photograph gallery this month is a good likeness of the able assistant chief clerk to the superintendent. His many friends will be glad to see Ralph still climbing the ladder of fame. Ralph L. Ketzner, better known as "Abe", is always in the

limelight, and we are glad to say that he never gets tired of publicity. Recently "Abe" was elected to the Relief Department Convention, by one of the heaviest majorities ever given a candidate from the Cumberland Division. Mr. Ketzner is a sportsman of the first water, never missing a chance at the water and if space would permit, we'd tell you of the great catch at Harper's Ferry last summer which carried headlines in our Local Papers. Ralph started in the railroad game about 16 years ago as messenger and has been advanced through the ranks. Some time ago he was promoted from chief car distributor to his present position.

C. A. Wigal, known to all the division as "Charley," our water station foreman, has been confined to his home for the past three months, but we are happy to report that he is now recovering and that he will soon resume duty. Charley is a man who believes in a smile all the time and is always ready with a little joke to brighten the day. As a mechanic, foreman and friend, there is none better, and all our Railroad men will be glad to see him back on the job.

We also have a picture of general supervisor I. S. Sponseller, who is considered a prince among men. "Spon" is the busiest man in three states and is always on the run. This picture caught him once, however, and is almost an exact likeness.

Well, boys, vacations are in order. When on your trips don't forget the good work of passing along the word about the Baltimore and Ohio. Tell the world we have the finest Railroad, the best scenery and real service, and give them a line on why the Baltimore and Ohio should always be specified when any railroad is considered.

Misses Winifred King and Louise Zihlman, two of our efficient clerks in the Division Accountant's Office, have returned from a vacation trip through Virginia and Delaware. Several days were spent in Washington and the girls had the time of their lives. From the way Winnie always looks at *his* picture it seems rather serious, but Louise refuses to tell, and we are inclined to believe that Louise, too, could tell an interesting story about the Blue Ridge Mountains of Virginia.

Correspondent, HARRY B. KIGHT

We are proud to see two more of our boys climbing the ladder of success. Frank Cheshire has gone to Sandusky where he has been appointed car foreman; Roy Ravenscroft has gone to Zanesville where he has accepted a similar position. Good luck, fellows!

Out on our newly acquired M. & K. Railroad, Whitey Welshonce is guarding our property, being assigned to the night trick. It seems there abounds in that part of the country, wildcats, and other ferocious beasts of the forest. Whitey had heard of these animals appearing each night, and knowing that for some reason other employes had departed, refusing to work in such a beast infested country, he went there determined to kill or capture the cause of the trouble. Last reports are that he now has them coming to him and eating from his hand.

Deer Park Hotel opened on June 24 for its 49th consecutive year. Harry B. Kight has been appointed agent there for the coming season.

"Pete" Ervin represented us at the Relief Department Convention at Cincinnati.

Misses Katherine Kepler, Lillian Foster and Maybelle Foster, employes of the Transportation Department in the general offices at Baltimore, spent a part of their vacation at the Deer Park Hotel. These ladies paid the ticket office several pleasant visits, and seemed to be enjoying their stay here very much. They became great golf enthusiasts, and attired in their "knickers," proved themselves real horse back riders, too. We were sorry when the time came for them to have to return home.

#### Timber Preserving Plant Green Spring, W. Va.

Correspondent, E. E. ALEXANDER

Stop!

At the end of a day every man knows whether or not he has done a fair day's work.

Think!

Each day is precious and each setting sun marks another passing. How earnestly we should strive to make best use of the time given us.

How sad to think of the awful waste of time daily! We use our days as though we had a never ending supply.

Act!

Can we afford to lose one single day?

For the first time in years some of our employes are out of employment, temporarily, on account of the strike in progress throughout the country. We most sincerely hope that before this item reaches the printer, the "Slow Down" sign will be removed and that we'll get orders "Resume full speed." That's the way we are used to working; it's the only way we work and we are anxious to get back on the "high speed track" again.

Ralph "Abe" L. Ketzner, assistant chief clerk to superintendent, Cumberland, and General Supervisor I. S. Sponseller

Please mention our magazine when writing advertisers

Trackman Tom Malone, who was recently injured by being accidentally struck on the head with a pick by a fellow workman, is able to be at work again.

H. S. Simpson

We were shocked by the tragic death of one of our employes, H. S. Simpson, early on Wednesday morning, June 28, at the home of his daughter, Mrs. W. G. Adams, Springfield, W. Va.

Mr. Simpson had been in the service a number of years. He was a straightforward, conscientious worker, well liked by all who knew him.

His funeral, one of the largest in this section for years, was held from Springfield, Friday, June 30. His pall bearers, all young men, were E. M. Stottlemeyer, G. C. Conley, B. F. Twigg, J. M. Bean, Asbury Seders and J. R. House.

Our supervisor was called to Harrisburg during the latter part of June to attend the funeral of his uncle, A. I. Alexander, whose sudden death followed close upon the death of another uncle, Rev. M. C. Alexander, of Camosa, Ia.

Hamilton says "North Branch has a Mill Team that never lost a double header." We didn't know they had ever played any.

Two more nice bungalows are going up in our little town and will be occupied as soon as completed. We need more and still more just like them.

Jerry Setor is another good tieman contemplating building soon. Go ahead, Jerry! Every new home increases the value of those already built.

James Shaw, laborer, lost a fine little horse recently. Some one shot it—a pretty mean trick.

Mr. and Mrs. E. S. Robinson were the recipients recently of a beautiful "Lilly" traveling bag—another wedding present from plant employes.

- Favorite pastimes of some of our men:

Fireman C. C. Ricewick and Switchman W. F. Kesler are among our men who are off nursing injuries received while wrestling and playing baseball.

Assistant Engineer Maintenance Z. M. Briggs, Pennsylvania System, was among the July visitors at the plant.

At this writing Mrs. W. C. Gurtler, wife of one of our genial station clerks, is convalescing at the Allegany Hospital, Cumberland, following an operation for appendicitis.

We accompany our notes this month with a picture of one of our Operators, G.

W. Kaylor, whom our reporter was fortunate enough to catch right on the job. Mr. Kaylor, who is also W. U. manager here, is always "on the job," but most of them want to get dressed up for a MAGAZINE picture. Mr. Kaylor is so well known to Cumberland Division men he needs no introduction. His attractive home was pictured in the MAGAZINE recently and we are glad he lives among us. We need more like him. The two fine looking young men on the motor car, guarding the tower in which Mr. Kaylor is working, are our efficient signal maintainer, H. P. Logsdon (left) and his assistant, J. T. Duvall (right).

Our reporter has tried several times to snap these men, but with their trusty motor car they have sped away. (They are some drivers, too.) Mr. Logsdon has fifteen years service to his credit, in the last seven of which he has served as signal maintainer. Duvall has eight; he was appointed assistant maintainer several years ago.

Theresa Pauletta Allen

One of the saddest tragedies that has blighted our community for years was the death of little Theresa Pauletta Allen, four and one half year old daughter of Engineer and Mrs. Pressley Allen, on Monday, July 10, as a result of burns earlier in the day.

The little one had been with her mother only a few minutes before the accident and her parents are unable to understand how her clothing caught fire, while playing. Her little body was severely burned and although

she was rushed by speeder to a Cumberland hospital and every effort made to save her precious little life, her little soul returned to the God who gave it only a few short years before.

The little body, in a tiny casket, banked with flowers which she loved, accompanied by the bereaved parents, relatives and friends, was taken to Berkeley Springs, W. Va. on the following Wednesday, where the funeral services were conducted by Revs. Bridges and Mundy.

Six little playmates acted as her pall bearers. Pauletta was a sweet little child with a disposition that attracted all who knew her. Although not yet five years old, she took an especial interest in her Sunday School and had cried for an emblem she had won for regular attendance but which had not yet been received.

It seems hard that one so small and so innocent should be taken, and the many beautiful floral tributes attested the sympathy of loving friends. Her parents we commend to that Divine Master, whose comforting voice they can hear as he says, "Suffer the little children to come unto me and forbid them not; for of such is the Kingdom of God." "They shall shine in their beauty—Bright gems for His crown."

**Card of Thanks**

"We want to express through our MAGAZINE our deep appreciation of the many kindnesses of our neighbors and friends in our sorrow at the loss of our baby, Theresa Pauletta.

(Signed) Mr. and Mrs. Pressley Allen."

J. C. Wilson, tieman, has been appointed a member of Potomac Hose Company, to succeed H. S. Simpson, deceased.

Did you do a fair day's work today? Stop! Think!

**Sabraton, W. Va.**

Correspondent, L. M. GUMP

Storekeeper "Red" Farrell, is spending his time on night turn now, in company with Car Foreman C. B. Keller, Terra Alta, and Yard Master Fyre, Keyser. Our fear is that "Red's" hair may lose some of its brilliance without the aid of the sun; his complexion has already done so.

In spite of the fact that the coal miners are on strike, and have been for some time, the Sub-Cumberland Division has been, and still is, handling a record breaking amount of tonnage. Numerous small mines and team track tipples are in operation, as well as practically all the larger mines, the Cascade Coke Ovens, and various other industries along the line.

Quite a number of furloughed Transportation Department employes from the West End have accepted employment here and are now running out of this terminal.

Dr. Byrne, the genial medical examinee from Fairmont, paid us a short visit recently in the interest of the Relief Department Call again, "Doc."

**Connellsville Division**

Office of Trainmaster

Correspondent, C. E. REYNOLDS

We have here a photo of Cut Watchman Andrew Hawk, Rock Cut. Mr. Hawk was born on March 7, 1857 and entered the service of the Baltimore and Ohio on August 1, 1885, having been in active service for 37 years. We understand that Mr. Hawk has made application for pension. During his long years of service he performed his duties faithfully, and was considered one of the best cut watchmen on the Connellsville Division.

On June 7, Agent J. W. Hammer, Ohio Pyle, Pa., resigned to enter into business for himself. We wish him all good luck.

Effective July 1, 1922, Engineer Jerr Lowney was pensioned after 47 years of continuous service with the Baltimore and

AMONG THE GREEN SPRING FOLKS

Only one casualty to report this month but this one doesn't go on the Safety report, for he's just a victim of Cupid's wiles. Caller E. J. Reese has forever forsaken his membership in the Bachelor Boys and henceforth is willing to be numbered among the Elect—er, I mean the Henpecked. Cheer up, E. J., it's only half as bad as painted and you certainly have the best wishes of the gang

Hostler M. Fiorilla is handing out the

Mr. Lowney was born in Ireland on March 15, 1852. He came to the U. S. A. in 1871 and entered service on the Philadelphia and Erie Railroad as trackman, S. Mary's, Pa. He came to Connellsville in 1875 and entered the service of the Baltimore and Ohio as hostler; was transferred to fireman on June 12, 1882, and was promoted to engineer, October 13, 1886. This position he held until the time of his retirement. Mr. Lowney is of a retiring disposition, and when asked for a picture to be placed in the MAGAZINE, he merely smiled and said he hadn't had a picture taken for years. Mr. Lowney has a very wide circle of friends, and is held in high esteem by all.

On July 14 a daughter was born to Olive Power Timekeeper and Mrs. H. G. Fisher, of West Fayette Street, Connellsville. The little one is the second granddaughter of Mr. and Mrs. H. E. Penn of this city, and Mr. and of Mrs. F. M. Fisher, of South Connellsville. The little one's name, "Hobe," is employed in the Division Accountant's Office.

On July 14 Mrs. C. R. Burns and five children, wife and family of our well known road foreman of engines, arrived home from a two months' visit at Long Beach, California.

We have information that Miss Leona McClintock, stenographer, General Foreman's Office, Somerset, and popular young woman of Connellsville, and John M. Holey, formerly of Somerset, were recently licensed to wed in Buffalo, N. Y., where Mr. Holey is employed. The bride is a daughter of Mrs. Ada McClintock of West Fayette Street, and has been with the Baltimore and Ohio for the past three years. We extend to them our best wishes.

On July 14 Mr. and Mrs. E. C. Lendon and daughter Bessie returned to their home at Connellsville from an extended trip through the West, covering the Pacific coast and southern Texas and Arizona. They attended the convention of the Brotherhood of Locomotive Firemen and Engineers held in Houston, Tex., to which Mr. Lendon was a delegate from Connellsville Lodge, No. 302, Brotherhood of Locomotive Firemen and Engineers. They left here on May 2. Mr. Lendon is engineering the Connellsville Division.

INTERESTING FAMILY OF SAMUEL F. BEALL

Carpenter Foreman and member of Safety Committee, Uniontown, Pa. On Mr. Beall's left is little John F., one of the "Little Safety Men" of the Children's Page, and seated right in front is little Hazel, who insisted on seeing this picture in the Magazine. Mr. Beall has been in service since 1902

cigars, so if anyone has missed them, it is his own fault. "Mike" tells us it's a boy!

It is a little early to be thinking about indoor sports, but when the outdoor stuff is not available, I'll tell the world, it's great to get the gang together and go over to the "Monon" House, or down to the Club Alleys and start out with "strike," "spare," etc. A couple of years ago, we girls had a bowling league and we had great fun. Why can't we all get together again (all the girls on the division) and see what we can do in the way of knocking 'em cold? I mean the pins. We have quite a bunch at Glenwood, who, I'll wager, could lick the bunch from Pittsburgh by simply trying. Let's get together some noontime, talk it over, get the alleys, and go. Then, too, you know it makes fat girls thin and thin ones, why—plump!

### Wheeling Division

Correspondent, MARIE SLATTERICK

Master Carpenter H. M. Potts, Wheeling, for the past few months has been busily

engaged in miniature farming at his home on Mozart Hill. However, since three weeks ago the rabbits took control of his cabbage patch. Mr. Potts is able to keep the woodpeckers from eating holes in his water tanks, but he can't keep the rabbits out of his cabbage patch.

Louise Walther has joined the Bobbed Hair Brigade.

J. T. Coyne, section foreman, Bridgeport, Ohio, recently went back to Ireland, his native land, to visit his old home. Mr. Coyne hadn't seen his mother for thirty-three years. He sent us a postcard picture of the Blarney Stone!

Nobody seems to know why it is, but every time Supervisor W. C. Wright goes east of Board Tree Tunnel, he seems to get younger. Why is it, Mr. Wright? We'd like to know your secret of eternal youth, also.

Arthur Bom, stores material clerk, Accounting Department, stole a march on his fellow workers and was quietly married,

June 27. Oh, yes, he passed around the candy and cigars to the office force. Congratulations, Arthur!!

And another of our employes who took unto himself a wife is L. A. Mannir better known as "Jimmy." This happened on June 17. Fortunately, "Jimmy" who is an assistant signal maintainer, did not have to go out that night to fix up the signals. Congratulations to you both Mr. and Mrs. Manning!!

The accompanying photograph is of the late A. J. Wells, signal maintainer, Bellaire, Ohio. This photo was taken when Mr. Wells was twenty years of age, twenty years ago. He was born on July 4, 1882. He entered the service on May 20, 1903, as pipefitter, and on becoming signal maintainer at Bellaire on September 25, 1907, filled that position until his death, on April 17, 1922, which was due to spinal meningitis.

Wheeling Station had a baseball team "Had" is right. It is no more. Somehow or other it fell through after the first game. We don't know whether it was because A. J. Sonnefeld, first baseman, wasn't tall enough, or because R. C. Gruver, manager, failed to manage; perhaps Jimmie Crogan's attention was drawn to his blue socks instead of the ball. In any event they play the Freight House Fast Team and almost beat 'em but not quite. It must have been a hard fought game because Sonnefeld wore his raincoat home after the game because of a fall.

We have a stranger in our midst. W. Packard of John Hopkins University, Baltimore, is temporary chairman for the summer months in the Division Engineer's Office at Wheeling. We're all mighty glad to meet you, W. G. Here's our hand!!!

The accompanying picture is of American Ditcher No. 13 on the Wheeling Division and its crew, headed by Division Engineer J. S. Batton.

Things heard around Wheeling:

Bob Evans: Here is the fuel report, Mr. G——.

Mr. G——: What makes your figure so high?

Bob: Oh, my carbon slipped.

Our old friend Carl Miller is with us again. He is now working in the Division Engineer's Office at Wheeling. Welcome back, Heinie!

The late A. J. Wells

American ditcher No. 1, out on the line o'road

Please mention our magazine when writing advertisers

A merry party of Baltimore and Ohio folks motored to Pelley's Inn, at Sherrard, Va., and enjoyed a chicken-waffle dinner on June 14. Pelley's is noted for its dinners and everybody certainly enjoyed the evening immensely. Among those present were: Misses Marguerite Cockrell, Frances Suman, Anna Reilly, Marie Haveron, Ephraim Haveron, Sarah Haveron, Hazel Hason, Monica Peel, Helen Thomas, Catherine Cartwright, Mary Marker, Hazel Woodburn, Lillian Roth and Angela Kirchgisner. Messrs. J. E. Michels, A. H. Michels, L. A. Michels, E. B. Cornett, Edward Gantzer, L. W. Wetzel, Jas. Crogan, Jim Padden, A. J. Sonnefeld, Roy F. Arnold, Tracy Burke, N. K. Harrison; Mr. and Mrs. R. A. Shields, Mr. and Mrs. I. R. Sigler, Mr. and Mrs. H. Sigler, Mrs. Rosemary Armbruster and Mrs. Harry Martin.

**Monongah Division**

Correspondent, CECIL B. BAKER

J. F. Schroder now fills the vacancy in

the Western Union office, created by the death of Carson Newham.

H. H. Stephens, Martinsburg, has been appointed chairman on our engineering corps. Although very shy, he has already many admirers, among whom are Luther Ford's Chickens. He will consider himself lucky if he gets back to Martinsburg a single man.

Mr. Schroder is popular among the Grafton employes, all of whom wish him success in his new position.

Supervisor John H. Shafferman, Fairmont, spent his vacation at Webster Springs. Last year he went to Washington and gained distinction by finding a broken chandelier in Union Station. It is to be hoped that he has no criticism to make of the West Virginia Midland.

The Cumberland Division has played another mean trick on us. Oh July 1 they stole our biggest supervisor, Clarence Foltz. Clarence has been with us for a number of years and we all liked him. We are confident that he will be as successful "over the mountain" as he has been here,

1. A quartette of Grafton smiles. 2. "Ye Correspondent," Cecil B. Baker. 3. J. G. Begley, of the engineering corps

**General Offices**

Correspondent, E. W. SPILLE

**Law Department**

Someone has said that law is "as dry as dust." Even the Law Department has been so termed, but permit us to say that we are "live wires" when it comes to matters legal. Our modesty has precluded our sending anything to the MAGAZINE in the past, but—

Though "dry as dust,"  
 Appear we must,  
 For so it is decreed.  
 Our verdicts just,  
 When others fustle.  
 Are passed with joy indeed.  
 Sometimes we're cusse'd,  
 But then, we trust,  
 We've no one tried to bleed.  
 "Settle or bust,  
 Before claims rust"—  
 That is the cry we heed.

The extensive law library of the Company has recently been moved to the tenth floor of the Carew Building.

Assistant General Solicitor Eggers went fishing in the wilds of Northern Michigan.

In spite of the recent extreme heat in Cincinnati, one member of the Law Department thinks longingly of dear old New Orleans.

Attorney Harr and family have returned from an automobile trip in Southern Michigan.

Paul Dewald, chief clerk and statistician, is now quite hale and hearty. This is, perhaps, because of his gardening activities.

If you want to see Attorney Cole smile, just ask him about the junior member of his family.

Jim Carmichael and Ray Kleinman, our genial and efficient file clerks, are enthusiastic advocates of camp life, as is indicated by their tanned faces.

### Cincinnati Terminals

Correspondent, JOSEPH BEEL

Bertha Goetz, aspiring to succeed the Great Bernhardt, made her debut recently in a little sketch entitled "Patsy," and scored quite a hit. At the close of the second act she was presented with two empty tomato cans, one box of tacks and a picture of Charlie Chaplin, by her admiring friends.

C. W. Bliss, the claim preventor, Cincinnati Terminals, recently slid into the limelight as a story-teller. He sprang an antique one about "Whose nose." Of course, this story everyone knows as Martha Washington told it at one of her afternoon teas sometime in the early eighties or nineties of the Eighteenth Century.

The yard clerks at Stock Yards are stepping out. George Ernst and family took a peep at St. Louis for two weeks.

"Picking a Winner" will be the next contribution from the Bard of Storrs, getting his inspirations at Latonia watching Morvich go down to defeat.

From the reports coming in from Pete Schuetz, we think that the Committee knew something when they elected him as a member of the Safety Committee. He has proven to be a live wire, with emphasis on the *live*.

From the number of passes requested by Trainmaster Cleary and family, it is assumed that he is getting a sort of wanderlust disposition in his old days—trotting from Cincinnati to Cleveland, Chicago, and other points too numerous to mention. More power to you, Charlie! The world is little; take a squint at all you can as long as you can!

Just a little quiet game, on a little quiet evening, in a little quiet spot—but we want to know what the words "I cease" mean as applied to a little game of D. P.? Maybe J. J. O'Donnell will explain.

Yes, I think when he gets that team of molar that it will set off his hummingbird eyebrow to the extent that it will be discernible without the use of a microscope. However, as far as our friend Frank is concerned, he doesn't need any additional attributes to add to his facial beauty. You should have given him the once-over at Chester Park; he looked like a Hart-Schaffner-Marx ad. But, while we are talking about Mr. Nock, why not talk about the little Nock that came to his door a few

Havilah and John Price, Jr., children of chief clerk to freight agent, Columbus, Ohio

months ago and when the door opened in came another little ray of sunshine in the form of a baby girl. Congratulations, old man!

Fan-Tan, the girl with the Japanese sweater of a vivid yellow, found out recently that radium did not come in carload lots. The information was gained after she tried to purchase five cent's worth of green radium at the corner drug store, and when the clerk said, "Miss Webber, somebody is apparently kidding you. If I had enough radium to fill that quart jar you are carrying, I would make J. D. look like a pauper."

Through the efforts of E. R. Swepston, son of E. G. Swepston, car foreman, Sixth and Baymiller Streets, the Baltimore and Ohio received passenger haul, Cincinnati to Columbus, Ohio, of 24 medical students, and haul of 10 students, Columbus to Cincinnati, in June. This is good, "Swep." Keep it up!

And why may not the rest of us make an earnest effort to follow his lead?

### Newark Division

Correspondent, B. A. OATMAN

T. V. ("Buck") Hankinson, efficient clerk and fashion plate of the yard office, has added to his many troubles, another in the form of an auto(?) of unknown age or origin.

As far as we have been able to learn, this machine was imported into this country to be used as a tractor on the Jones Ranch in Colorado, but Buck seems to get much joy from it (when it runs) as a pleasure car. Luck to you, Buck!

(P. S.) Buck bought this machine from Johnny Jones. It's about 5 years old. Johnny was going to take it to Colorado and use it on the Homestead to plow with. He took up a Homestead in Colorado this spring.

Columbus, Ohio, Station

Correspondent, EDITH ROACH

The picture is of Havilah and John, Jr. Price, two children of Chief Clerk and Mrs. J. V. Price.

Miss Marie Brink spent a part of her vacation in Lewistown, Pa.

Mr. and Mrs. A. G. Burgett have returned from a week's trip East, stopping at Washington, D. C., Baltimore, Md., and then to Norfolk, Va., by boat.

Mrs. Roy Knapp entertained the sewing club at her home on Michigan Avenue on July 11.

The Girls' Sewing Club had a picnic supper at the Storage Dam on Sunday July 9. Thirty-four enjoyed it.

Jonathan Murphy, assistant yardmaster has been off account of the death of his father-in-law.

H. C. McCormick has just moved in his new home on Hill Top which he recently purchased.

Misses Lillie and Bess Sites made a weekend trip in a machine to Portsmouth, Ohio where they visited friends.

Born to Mr. and Mrs. Oscar Skeen on July 5, a girl. This makes their family which now consists of five boys and a girl, complete.

Tallyman Skeen is taking a three month furlough.

Marietta, Ohio

Correspondent, G. R. STEEN

This is going to be the greatest year record in the shipment of produce. Already we have shipped more cars to date than the entire season in previous years. The revenue is greater as the cars are moving to all points from New York to Florida as far west as Minneapolis, which prove how efficient are the transportation facilities of the Baltimore and Ohio.

July 12 was a great day for our efficient freight trucker, Pearl Biehl. On this day he took unto himself a wife. We hope a trust they will live happily ever after. Bring her down, Pearl, as we all would like to see your queen.

Ticket Agent G. M. Payne reports great business in the tourist line this season.

Baggageman Herman Henry has purchased another car. He now has one for himself and one for his family. But Herman drives the new car, and can drive very efficiently with one hand.

Rate Clerk Miller says, "It won't be long now until he will be driving his car." It's a Gardner, now. Girls, they are some cars. But if you want a real car, buy a Cleveland Six.

**Akron Division**

Correspondent, J. A. JACKSON

Time Clerk Frank Vogan, Division Accountant's Office, and Miss Bertha Bees, New Castle, Pa., were married on Wednesday, June 28 in the parsonage of the College Hill United Presbyterian Church, Dover Falls, Pa. Rev. J. Elmer Campbell officiated, using the beautiful ring ceremony of the nuptials. A wedding dinner was served at the home of the bride for members of the immediate family, after which the happy couple departed on a short honeymoon. They are now residing in a newly finished home at 73 N. Forge Street, Akron, Ohio. A host of friends are extending congratulations and best wishes for a long and happy life.

Lockhart, New Castle, who was wedded to Miss Mary C. Kokengs at Avilla, Indiana on June 6. After the ceremony the happy couple departed on a wedding journey that took them to Toronto, Montreal, Boston, New York and other eastern cities. They are now at home to their many friends on West Laurel Boulevard, New Castle, Pa. Congratulations and best wishes to the happy couple from their many friends of the Akron Division!

Alexander Rosenblum, ticket clerk, New Castle Station, and Miss Sarah Fried, of Youngstown, were married on Sunday, June 25. The wedding was solemnized at the home of the bride and witnessed by a large circle of friends. Immediately after the ceremony they departed on a wedding tour of the western states. They are now at home to their friends at 406 Bell Avenue, New Castle.

Bletteher, a business man of Cleveland, Ohio. They are now residing in their newly furnished home at Cleveland, Ohio. Their many friends on the Akron Division extend their hearty congratulations.

Gladys Keelan, stenographer, Division Accountant's Office, for the past three years, has resigned her position and is now employed in the office of the Johnson Limestone Company at New Castle. We miss Gladys and the little smile which she took with her.

J. C. Ritty, former stenographer to terminal trainmaster, New Castle Junction, has been promoted to roundhouse clerk, Motive Power Department, H. Isleton, Ohio.

Slim: Smoke, that's Miss Styles herself  
 Smoke: Was it? Ah didn't see her face

Please mention our magazine when writing a letter

Vincent P. Traver, roundhouse clerk, New Castle Junction, has recovered from a serious operation for appendicitis, which was performed at the New Castle Hospital. We are all glad to see "Vince" back on the job again.

Miss Ruth Dufford, time clerk, Division Accountant's Office, for the past four years, resigned her position on July 1 and is now at her home in New Castle, Pa. We understand that the cause of her resignation is due to her signing a life long contract with Mr. Lyle Calvin, who is employed as efficiency man in Fisher's Chain of Department Stores. This contract will result in the wedding of the contracting parties during the latter part of August.

"Fred" Ellis, statistical clerk, Division Accountant's Office, enjoyed a two weeks' vacation at his home in New Castle. We cannot understand why "Fred" would spend his vacation thusly, and then take a week end trip to Conneaut Lake, Ohio. This latter trip was made by jitney bus to Youngstown, Ohio, street car to New Castle, and then by auto to Conneaut. Can you explain this, "Fred?"

E. J. Merriman, M. of W. time keeper, Division Accountant's Office, has certainly been getting his money's worth out of his new Ford roadster. "Ed" has taken kindly

to the Cleveland girls at his office and almost any evening you can see them out with "Ed," spinning along some nice quiet country road. We also understand that it was the influence of the Cleveland girls which caused "Ed" to shave off the misplaced eyebrow which he had been developing for six months.

C. M. Gosnell, former industrial freight agent, Pittsburgh, Pa., has been transferred to Akron, as division freight agent, succeeding C. F. Farmer, transferred to Youngstown, Ohio. Mr. Gosnell's long experience in the Baltimore and Ohio family will make him a valuable asset in the Akron territory. A host of admiring friends are extending him congratulations on his well deserved promotion.

W. E. Winebrenner, ticket agent at New Castle, has been elected manager of the Baltimore and Ohio Baseball Team on the east end of the Akron Division. Already his team has met with much success, having defeated some of the best semi-pro teams in the New Castle territory. Glenn, Battley, Nicholson, Burnett and McCormick are some of the stars who are on his team; this fact alone is an assurance that they will land well up near the top when the season closes in September. Best wishes, "Winey." We are only sorry that we haven't got a team on

the west end. We know that then we would have another scalp to add to our already large collection.

Representatives who were elected delegates from the Akron Division to the Relief Department Convention which was held in Cincinnati on June 22-23 were A. C. Harris, G. H. Hammer, H. E. Kirwood, "Sam" Poxon, W. P. Burrell and E. M. Tuttle. Unfortunately Mr. Tuttle was taken ill after reaching Pittsburgh and had to return home. A good time was reported by all in attendance and the regret from those who went was that they were unsuccessful in electing their candidate to the National Convention.

New Castle Junction Shops are just buzzing with activities these days, the result of the hearty co-operation of all the employes and foreman under the leadership of General Foreman N. R. Butler. When you see a happy family of employes such as exists at New Castle Junction, you can always depend on unbounded success whatever work is undertaken. General Foreman Butler is to be congratulated having such an efficient force to work with and we know that under these happy conditions New Castle Junction Shops will top the list of the shops on the System.

WHY THE OFFICES AT AKRON ARE POPULAR

1-Mrs. Ralph Edwin Koll, formerly Miss Marie B. Lorenz, secretary to the coal freight agent. 2-Dora and Julia, homeward bound. 3-Ruth Dufford and Herb Hosseler indulge in ice cream cones. 4-The brains of the division, Jimmy and Tommy. 5-Vogan and Kocher, week ending at Newton Falls. 6-Before and after-Do you know the reason? See the notes

**In Our Picture Gallery**

"The brains of the railroad;" "Jimmie" and "Tommy," clerks in Superintendent's Office, Akron. We expect much from these two youngsters and treat them kindly, for we look for them to be superintendents at some future date.

Homeward bound. Miss Dora Carlson, stenographer, Division Accountant's Office, and Miss Julia Quinn, stenographer, Road Foreman's Office, on one of their week end trips to their home in New Castle.

Frank Vogan, on left, and Clare Kocher, on right, are clerks, Division Accountant's Office. The picture was taken at Newton Falls, Ohio, when on their week end trip to their home in New Castle.

Before and After. Frank Vogan (left) three days before his marriage. J. W. Balentine, (right) taken three days after his marriage. Notice the difference and take heed.

Miss Marie B. Lorenz, former secretary to coal freight agent, Cleveland, was married to Ralph Edwin Koll on June 21. Here you see her picture.

Yum, yum! How would you like to have a bite? Ruth Dufford and Herb Hosselcer, clerks, Division Accountant's Office, are on their way to their home in New Castle. This picture was snapped just as "Herbie" had invested in some ice cream cones which were being sold on the platform.

**Cleveland, Ohio**

Correspondent, G. R. LITTELL

Miss Jennie Demaline, adjustment clerk, was married on June 17 to Mr. LeRoy Fulton. Miss Mary Medley, our mailing clerk, and "Eddie" Cracker were their attendants. Mr. and Mrs. Fulton spent their honeymoon at Shore Inn, Vermillion on the Lake.

W. J. Rady, our bashful yard clerk, also fell, as did Thomas Brennan, delivery clerk at the freight house, and "Herb" Hanzlick of the Clark Avenue force. They all have our best wishes for the future.

Howard Frœlick is sporting a new Ford. T. O'Hara, with characteristic gentleness, says that Howard must have a "Jane" on his staff. Maybe she fell for the light shadow of the misplaced eyebrow that adorns Howard's upper lip. How about it, Howard?

We have missed C. W. ("Daddy") Ball from the freight house. Hope his sixty-day leave of absence which he is spending at Fon Du Lac, Wis., proves beneficial.

Miss Mary Freidel desires to thank members of the freight house office force for the flowers and also for the attention shown her during her recent illness. That's all right Mary; we are mighty glad to have you back with us again.

Anyone having explicit directions which have been thoroughly tested and found to be O. K. for the shifting of gears on a brand new Maxwell car, will kindly forward same to G. R. Littell, terminal agent, Cleveland, Ohio. This seems to be the chief trouble of his life at the present time.

On June 21, at 8.00 a. m. at St. Coleman's Church, Miss Marie Barbara Lorenz, former secretary to the coal freight agent, was married to Mr. Ralph Edwin Koll, traffic manager of the Goff-Kirby Coal Company, Cleveland. The wedding was a brilliant society affair, the bride being attended by three bridesmaids and two flower girls. Many attended and the church was beautifully decorated with flowers. The bridal

couple departed in the evening for Niagara Falls, Toronto and The Thousand Islands for a month's tour. However, time will not allow them to visit each of the Thousand Islands.

Harold A. Germann, former file clerk, Coal Freight Office, has succeeded Miss Lorenz. He, in turn is succeeded by Miss Angela D. Losee, formerly employed in the Local Freight Office.

**Lorain, Ohio**

Correspondent, W. G. HARMON

**Chicago Terminal**

Correspondent, T. H. WILLIAMS

Sidelights on the Relief Department Convention

An innovation this year was the election of two popular girls at Lincoln Street, Misses Catherine Cummings and Bessie Kehoe. They showed a keen interest in the meetings and were instrumental in the election of M. D. Carothers as a member of the Advisory Committee, as was Mr. Wilkinson, who has quite a wide acquaintance among Baltimore and Ohio employees.

Jack Maloney, while out at an amusement park, distinguished himself by rescuing a fair young damsel who was in peril of becoming a human pinwheel. Further information regarding "Jack's" thrilling rescue may be obtained from Mr. Carothers or C. E. Stuart, who were witnesses to the entrance into the death-trap of friend John, and his exit, bearing the limp form of this beautiful creature in his arms. For the benefit of the fair sex of the Chicago Terminal let it be known that this ravishing goddess showed no signs of haste to disentangle herself from our hero. Ask "Mike," he knows.

They say you're never happy 'til you're broke. Well "Mike" sure was happy when he returned from Cincinnati, and incidentally, Latonia.

"Mike" Hajek, the Accounting Department's "Sheik," is still going on in his nonchalant way, leaving a trail of wounded hearts in his wake. Oh "Mike," you rascal, why can't you behave?

Miss Rose Byrnes, telephone operator, will spend the month of August with her sister in Oklahoma. It is rumored that she will take advantage of this occasion to decide an important question.

Train Dispatcher and Mrs. Ralph Williams, motored to Eagle River, Wis., on their vacation. Fishing was good but we are informed that the big ones are all left. Of course, he got a glimpse of them on the end of his line and worked hard to land 'em,—but you know the old story.

W. H. and E. C. Schulz, Cost Department, and their wives, spent an enjoyable time at Niagara Falls, New York City and Washington, D. C. over the Fourth.

Miss Etta Rauch, Barr Yard, spent a week at Columbus, Ohio, where she attended the commencement exercises of Capitol University students. She also enjoyed the moonlight in the parks.

**The Vose Grand**

Wonder if John Maloney will take a good tip on a winning horse from the old colored mammy, the next time he goes down to see the Kentucky Derby?

Judging from Charlie Stuart's sweet line of talk, the girls down in Cincinnati have no show with the ladies of this town. Who would know better than our Charlie?

We certainly appreciated the only too short visit we had with "Aunt Mary," Miss Russell, Miss Helfrich and Miss Harr, from Baltimore, on their trip to Yellowstone Park.

At the present writing Mrs. E. J. Hughes, wife of medical examiner, is touring Europe. Better hurry home, Mrs. Hughes; "Doc" needs your eyes on 'im.

Thought I had walked into the wrong office, or that a new doctor had been added to our medical examiner's force, but upon closer inspection I found it was none other than our very own Dr. Currier, who had disguised himself with a real Charlie Chaplin mustache.

Announcement has been received of the marriage of Miss Henrietta Cordt, formerly secretary to superintendent, and H. F. Anderson, assistant trainmaster, East Chicago. The wedding took place on June 17. Our best wishes to them both.

It is with pleasure that we announce the marriage of "Joe" Kennedy, chief clerk to master mechanic, which took place on July 1. The fortunate young lady is unknown to us, but we are sure that if she is anything like "Joe," they will be a happy couple.

Huh!

Ed Ryan: "Did you call me a liar?"  
Rose W.: "Not at all. I merely remarked that the sinuosity of your ultimate conclusion was due to a superficial appreciation of the veracious reality."

### South Chicago

Correspondent, ESTHER J. SPREENBERG

Louis Stack, repair track foreman, is going around with a Great Big Smile. There is always a reason; a baby girl—born to Mr. and Mrs. Stack on June 15, We are waiting for the candy and cigars, Louis, so you'd better get busy.

Several changes have been made in the staff at South Chicago and Wolf Lake. R. M. Shafer is now Wolf Lake utility clerk, vice George Garrett, resigned. Billy Polard is our new messenger, vice Edward Eckert, resigned.

### Chicago Division

Correspondent, F. N. SCHULTZ

Willard, Ohio

Correspondent, CARL C. CLUGGISH

Since January 1 Willard has been holding meetings of yardmasters and clerks, these meetings being presided over by Terminal Trainmaster J. B. Hersh. Questions are brought up for discussion which have a direct bearing on the daily work of everyone present. A notice is posted in convenient places giving the date and time of each meeting and we have been having a fine attendance at each session. It is noticeable that much good has been accomplished by these meetings, as each person present has a chance to learn how others view a certain question, which, after being discussed, is bound to be clearer in his mind when the time comes to put it into practical use. The minutes of these meetings are kept and copies are sent to the various divisions.

Great enthusiasm has been worked up at Willard over the City League baseball teams. The various teams are composed almost in their entirety of Baltimore and Ohio men. At the present time the K. of P. team is in the lead and they are working hard to win the championship.

The girls at Willard are starting a soap throwing contest, the object of this being to see who can place a bar of hard soap nearest a given mark without actually hitting it. We know of one girl on whom we are willing to place our money.

Yard Clerk Floyd Thornton is the proud father of a baby boy. Floyd says he is going to grow up to be nearly as good a yard clerk as his father.

It seems that Willard has lost all attraction for A. R. A. Clerk Charles "Keip" Saunders. Sandusky is the only town on the map that he can see.

William Cross, our messenger, has decided to enter some other occupation. "Bill" says he is thinking of applying for a position as official growler for an animal side show or hiring out as a fog horn on board ship. He just recently returned from a trip to Minneapolis and from what he tells us of his experiences up there, we wonder that he ever returned at all.

The following is for reference and roll call only:

If a Mann Sell a Peck of Rice on a Holliday, how Long would it take King Wilhelm to kill a Wolfe with a Stone?

One of the switchtenders was observed to use a slingshot during one of his idle moments, in throwing stones over in the westbound classification yard. This is a dangerous practice. 'Nuff said!

### Ohio Division

Correspondent, A. E. ERICH, *Secretary to Superintendent*

It is always well for autoists to remember that there is no special prize offered for "beating a train over a crossing," but CROSSING CROSSINGS CAUTIOUSLY pays more than any prize ever offered.

Charles Dewey, second trick operator, Mt. Sterling, recently purchased a "dandy" Wescott Sport Model car, which has a guarantee of making seventy-five miles per hour. Of course in order to make sure, he undertook to try this speed limit within the city limits of Mt. Sterling. The mayor of that town was sitting on a porch when "Charley" went by on the try out, and being a "good sport" remarked: "He must have tried to pass another machine and this caused the excessive speed." However, "Charley" was not satisfied, and a short time after, passed the same place going at the same rate of speed. He was notified to appear before the mayor on the next morning, who then said "Twenty-five dollars and costs." Anyway, he has no "come-back" on the seventy-five miles per hour guarantee.

Our sympathy is extended to J. Long, section foreman, Cozaddale, in the death of his wife.

Another train baggagemaster! Born to Mr. and Mrs. W. F. Butler on June 30, a nine pound boy. Congratulations!

Elba Seymour, carman helper and a recent groom, and Joseph Hughes, Storekeeper's force, another groom, were given a calf wagon ride over rough and rugged streets, which they "enjoyed" immensely.

W. E. Vititoe, engineer, while in New Mexico recently because of his health, met two gentlemen on his return trip, one enroute to Athens, Ohio and one to New York, N. Y. They complained of the rough riding of the train of another road on which they were and inquired of Mr. Vititoe as to his suggestion of a more pleasant trip east of St. Louis. Mr. Vititoe informed them that the Baltimore and Ohio had established a record for good passenger train service and recommended that they use our line. Consequently each purchased a ticket to their destination on arrival at St. Louis, via Baltimore and Ohio.

Cupid's wiles could not be resisted by Miss Grace Bennett, stenographer to storekeeper, and she surrendered her position and embarked on the sea of matrimony with Mr. Don Jardine. No, not one of the clerks, as happens in many cases; Grace's winning ways charmed someone outside of our ranks. We all join in wishing Mr. and Mrs. Jardine a happy and prosperous married life.

Something is going to happen—we hear them all talking. I guess we will have to wait. They say it will come off in September. It may only be a current rumor, but it is persistent that there will be a closer relationship between two clerks in the Division Accountants' Office some time during that month, and then perhaps—More details in a later issue of the MAGAZINE. "It won't be long now."

EVERYBODY help SAVE FUEL. Take Kipling's splendid couplet as a watchword: "It aint the individual or the army as a whole

But the everlasting teamwork of every bloomin' soul."

To track foreman W. H. Grady, in the loss of his wife, our most sincere sympathy is extended.

George G. Wilson, Jr., one of the yard office force, is now file clerk in the Superintendent's Office, in place of W. T. Neal, who resigned to go into the insurance business. We wish both success.

As we have not heard from the safety agent, we presume he is too busy at this time, to say anything, so the safety secretary sez (with an attempt at poetry):

Scene from Gravel Pit, Chillicothe and our little friend, Pearl Jenkins

**A "Cross Crossings Cautiously" Convert**

I us'der cross a crossin' lookin' strait ahead,  
Layin' down in my seat, like I was 'abed.  
An' thinkin' about—the weather,  
An' the hi' cost of——leather.  
But! since I've he'rd of the Careful Crossin' Campan',  
I look up and down, 'Begosh, and then I look agan'—  
An' then jus' beat it right strait across,  
Jus' like I was runnin' from the big boss.  
An' now SAFETY FIRS' jus' means to me,  
To be SAFE—as 'gosh ding SAFE as can be.

Between the rails of a railroad there are, ordinarily, just four feet eight and one-half inches, and the remainder of the unsafe space does not exceed three feet; yet, with all the rest of the world to stand and walk on, some several thousand persons every year find it necessary to end their days or their health on this narrow strip of land. Think about it, and remember the railroad track is not a public highway.

The accompanying picture was taken near the coal storage pile at Gravel Pit, Chillicothe, with tram No. 3 coming. Although the characters in the foreground are so small they can hardly be seen, they are large men, namely: C. E. Francis, O. E. Sorguis, F. E. Baldwin and Conductor S. Stillwell. Photo by courtesy of J. C. Wilkins, inspector of Fuel Service.

Pearl Jenkins was 14 years old on July 8. She is the daughter of H. B. "Bundy" Jenkins, M. of W. carpenter, Hamden, Ohio. This little lady has had the misfortune of being crippled since birth, but it is made up for her in part because everybody is her friend. This is because of her sunny disposition at all times. She believes in smiling even if things go wrong. Next fall she expects to start her first High School year.

**St. Louis Division**

Correspondent, H. F. SMITH  
Secretary to Trainmaster, Flora, Ill.

Report has reached us of the efforts of Conductor G. F. Gaudlitz to increase passenger revenue. While in the performance of his duties he was asked by two passengers on his train, the time of a competing line train at point of connection. Mr. Gaudlitz inquired of the passengers as to their destination. Learning that they were en route to Cincinnati he informed them of the good connection and service to Cincinnati that was afforded by our line. As a result they purchased two tickets to Cincinnati via the Baltimore and Ohio. Thanks Mr. Gaudlitz.

Chief Caller Frank Wright, Flora, who contributes a column in the local newspaper entitled "Railroad Notes," does not fail to give publicity to the Crossing Campaign in each issue in an interesting style.

A conscientious train baggageman approached us the other day with an aggrieved look on his face, mumbling "It is not so on the Baltimore and Ohio." We, being solicitous as to the cause of all the grief, produced a two column clipping from a big daily entitled "Some concern is making trunk with the handles inside. This prevents the baggage man from tearing them off." Then there followed quite a discourse on the handling of train baggage. Getting serious, we do not believe that Baltimore and Ohio baggagemen handle them in any other way than if they were their own, and the writer of the article had occasion to ship his baggage over this line his opinion very likely would be changed.

You could hardly blame Fireman and Mrs. Paul Naney of Flora for being proud

of the smiling youngster in the picture. It is William Horn Naney, age five months; weight, 17½ pounds. William was judged 100 per cent. perfect in a recent Better Baby Contest.

We had the pleasure of receiving a copy of the Illinois Central Employees' Magazine a few days ago. Very interesting, finished in neat style, and right up to the minute.

A large group of bleacherites witnessed the first baseball game of the season on Wednesday June 14 when the Stores Department took the Accounting Department over the diamond to the tune of four to nothin'. It is said that the Accounting Department worked just as hard for the "nothin'" as the Stores Department did for the "four." The lineup follows:

ACCOUNTING DEPARTMENT	STORES DEPARTMENT
Kellums, c. f.;	White, c. f.;
Jeffries, 2b.;	Hancock, 2b.;
McIntire, r. f.;	Tomney, r. f.;
Phillips, 3b.;	Miller, 3b.;
Donahue, s. s.;	Smoot, s. s.;
Malinsky, 1b.;	Allison, 1b.;
Ackerman, l. f.;	Allison, l. f.;
Davis, c.;	Delphi, c.;
Bier, p.	Fouts, p.

Umpire: H. M. Hogan. Time: Plenty.

The line-up was on short notice and the Accounting Department has had little practice together this season; however, considering it from an accounting standpoint,

A 100 per cent. baby—William Horn Naney  
St. Louis Division

the game was well worth while. Center-Fielder Kellums was ousted by Umpire Hogan in the second inning, but re-instated in the third, account of not being able to find a man to fill our "Babe Ruth's" position. Kellums is the Babe Ruth of the Accounting Department, when he hits them. I say when he does (and he is going to some of these days) there won't be any use to look for the ball. There won't be any. The Accounting Department managed to get men on second and third a number of times during the game, but they wouldn't count that. Then, one of the heavies would get up and fan the air for about three rounds and down he would go, and with him the rest of the might-have-beens. Taking it all in all, the boys enjoyed themselves and the Accounting Department solemnly swore on the Home Plate to show the Stores Department a real game of baseball at the next opportunity.

Weldon E. Davis, clerk, was married on June 24 to Miss Josephine Fitzgibbons, tonnage clerk. L. D. Barlett acted as best man. The young couple are now on their honeymoon, touring the East. Best wishes!

Messrs. Harker, Starke and Warner are with us from Baltimore, checking time.

Send us some good photographs of St. Louis Division employes; we will do anything for news items except pay for them.

**Toledo Division**

Correspondent, EDWARD M. MANNIX

**East Dayton, Ohio**

That Dayton is the champion bowling city is attested by the fact that Edward Maley, Jake Reister, W. H. Gibson and Harry Schoenberger—four pogo jumpers, recently indulged in a game or two in our city. Before leaving, each purchased several bottles of liniment, for external use only. This bowling game is hard on the muscles, boys.

Can't say that we've got much on Jess Hubbard, our relief agent, but our advice is not to send him to North Dayton; he may land in Hamilton. Ask him about trains 54 and 55, recently. He wins the lace compass.

The old copy book tells us that "Patience is a Virtue." It is more than a virtue. It is the deliberate policy of a well balanced mind. Conditions are changing as the world progresses, and we are bound to change with it, but remember, "all's well that end's well."

Walter Wentworth and family have just returned from a delightful vacation in Chicago, and a visit to the old folks at Kans. Welcome back, old scout! Now hustle to catch up.

Just as I expected, Travers H. Smith, one of our boilermakers, kicked over the traces and led to the altar one of Dayton's most beautiful girls, and gave her his name right in front of the preacher. Good Luck, Mr. and Mrs. Smith! May your lives be one continual round of pleasure.

**In Memoriam**

On Tuesday evening, June 27, the sad intelligence reached us of the death of Mrs. Minnie Finley, wife of William Finley, our veteran machinist. "Mother" Finley, as she was known to all of the boys, was a sweet and lovable character, always bearing her sufferings patiently, and as her end approached it was with the same sweet smile that characterized her womanly life. Of her it may be well said that she was one of God's noblest creatures, charitable and patient, sweet and kind. To those surviving her we offer our condolence. Many indeed were the beautiful floral offerings that surrounded her casket. Her remains were conveyed to her last resting place at Chillicothe, Ohio, amid the silent prayers of those who loved her in life and death.

Here's a good one: Our agent, Harry Schoenberger was cutting quit a caper around the streets of Toledo with his new Ford sedan, when like a flash of lightning from out of the clear sky, he was seen to collide with a brewery wagon. They were both trying to compromise the damage but we learn that Harry got the best of it by 4¢. What?

The writer was again honored by an invitation to attend the outing of the clerks of the Superintendent's Division

Accountant's and Freight Offices. It was a jolly affair. The only thing I could not understand was, whether it was a baseball game or a prize fight they were trying to pull off. I waited for three rounds, (I mean innings) and felt sure that the inventor of our National sport would turn over in his grave, if he witnessed this terrific encounter. I left just as the water carnival took place, as I felt it was more than I could stand.

I had the pleasure of visiting Toledo on my vacation and was much pleased to meet our correspondent, Frank J. McManus, chief clerk to Assistant Superintendent J.W. Kelly (who, by the way, is back on the job as our correspondent). I also had the pleasure of addressing the roundhouse employees on Safety First. The meeting was kindly arranged by General Foreman J.W. Phares. I left with a good impression of Toledo, and all of our employees there.

#### Division Accounting Office Dayton, Ohio

Correspondent, G. M. MCBRIDE

Why didn't they have the Fat Man's Race at the picnic? Some said it was too hot; others said Mr. Hoban was afraid Mr. Spencer would win it; still others said they'd bet it was the other way round, but gee whiz, why don't people use their brains? Here's why. They couldn't run up hill—they couldn't run down hill—they couldn't race along the water front because they were afraid they would fall in and get their Sunday clothes wet. The "boys" had the ball ground. Nobody was out in front to see the race, so why have it? That's why.

Someone has asked for information as to the necessity of Mr. Bowman's wanting to borrow an oil can from every automobile owner he met at the picnic. We are at a loss to explain but perhaps Mr. Bowman believes in preparedness and is contemplating the purchase of a new car. Eh, Mr. Bowman?

By the way, did you get any of that lemonade?

Hurrah! for the ball game! Whom did you root for? Who won? Ask somebody else. All I know is Fox made a home run; Maus broke his glasses; Thrasher threw the bat at the ball; and Spencer sat on the bleachers. We have some mighty good fielders. And then they quit playing and went down to the water, and watched "Sam" Payne wade. Long came Hoban and jumped in and Payne had to leave 'cause the water rose two feet and he would have been drowned but for his timely exit. Thrasher couldn't go in swimming because his wife, being afraid that he'd drown, had taken his bathing suit out of his grip. That's the way it goes when you're married.

The Baltimore and Ohio girls have hung out the white flag and are ready to acquiesce in the matter of the Baltimore and Ohio men's ability to judge beauty. This fact was brought out rather forcibly at the picnic when the men appeared with their families. Never again will we doubt their ability; they always said they were good judges but we thought they were spoofing us.

Allow us to introduce to you our champion pugilist, Mr. Ball.

General Clerk H. C. White, Division Accounting Department, reports the theft of his automobile. In spite of the fact that he had a Yale lock on the garage, it was opened and the next morning he discovered that somebody had made a successful escape with his car. Subsequent reports

are to the effect that his auto was located a few days later, and stripped of everything that was loose on the car. Now he has arranged a means whereby his auto will be safe and expects to put his scheme on the market in the near future.

Mrs. "Frank" Beh has announced the engagement of her daughter, Mary E. Weaver, to David E. Snyder, time clerk, Division Accounting Office. The marriage will take place sometime in August. Best wishes!

Something interesting—Nann trying to convince Vermilion—and vice versa.

Bowman has a run on "Age before Beauty, go ahead." Who do you mean is beautiful, Bowman?

On June 1, through sleeping car service was put into effect between Cincinnati and Bay View, Michigan.

Regardless of the fact that the permanent wave is much talked about and in style, we also have the other extreme—men who do not care for it under any circumstances; for instance, Messrs. Spencer, Fortman and Payne. Yes, and I almost forgot to mention that "Gene" has joined the ranks of the latter.

We are glad to welcome to the Baltimore and Ohio family two new members—Randolph Van Scoyk and Cassimir Petkewicz. If you cannot recall the name of the latter just call him "Pet."

#### Kentucky District

Correspondent, H. L. GRAHAM  
Telephone Maintainer

Our shop foreman, "Jim" Aldridge, Jenkins, Ky., has a little daughter, Sarah, who, at the age of ten years, has made such an exceptionally good school record that her work has become a subject of popular conversation.

Sara Aldridge, daughter of shop foreman,  
Jenkins, Ky.

Superintendent of Schools L. B. Stephan gives us the data concerning her examination, as follows:

Intelligence test given in October, 1921, at the age of nine and eight-twelfths years, shows her mental capacity to be equal to that of thirteen years.

Intelligence test given in April, 1922, at the age of ten and three-twelfths years, shows her mental capacity to be equal to that of fourteen years.

In other words, in seven months she increased twelve months in mental capacity. In her arithmetic she showed normal

achievement. In reading, however, she showed the achievement of an eighteen year old girl, both in rate and comprehension.

At the end of the school term this year, she was selected by the faculty, principal and superintendent as one of the three most efficient girls in the whole school, grades and high school, for the efficiency prize of five dollars. This took into consideration scholarship, attendance, punctuality, effort, neatness, loyalty, deportment, honesty, leadership and general progressiveness.

Despite the unsettled labor conditions all of our engines in the Kentucky District are, at this writing, July 15, in first class service condition and will remain so, due to the untiring efforts of division officers. These, from the superintendent down have been working from twelve to sixteen hours a day in their efforts to maintain the high standard of public service for which our System is noted.

During the month of July, on the train dispatchers' telephone circuits throughout the Kentucky District, an extensive test is being made of loud speaking telephone equipment. This instrument, known as a "telemegafone" eliminates the necessity of wearing a head receiver and, therefore, does away with the momentary deafness and other objectional features that result from the wearing of a head set, especially during an electrical storm. The telemegafone has so far operated entirely satisfactorily under varying weather conditions and our dispatchers are hoping that it will soon be a permanent part of our train dispatching telephone equipment.

Engineer Nathan Adams and Conductor Oscar Arrington were recently married to popular Kentucky belles. Mrs. Nathan Adams was Miss Leonia Plummer, of Jenkins, Ky., Mrs. Oscar Arrington was Miss Virginia Mayo, of Hite, Ky. Both couples are now residing in Jenkins. We wish them all happiness and prosperity possible.

R. H. Baker, formerly with the Consolidation Coal Co., Auditing Department, is now stenographer to Chief Clerk L. E. Gatwood. Mr. Baker is efficiently filling the position recently made vacant by the transfer of A. R. Hunter to the position of chief clerk to Division Engineer Abbott, Cincinnati, Ohio.

#### Not for Men

The minister was trying to teach the significance of white to a Sunday school class.

"Why," said he, "does a bride invariably desire to be clothed in white at her marriage?"

As no one answered he explained. "White," he said, "stands for joy, and the wedding day is the most joyous occasion of a woman's life."

A small boy queried "Why do the men wear black?"

—Partners.

#### He Nearly Missed

Once a famous cricketer who scorned the "ancient game" of golf consented to try his luck in the presence of a number of club members. Strolling languidly to the tee, he adjusted his monocle and let drive. By some miracle the ball fell on the edge of the green and trickled down into the hole.

"You're down in one, sir," shouted the amazed caddie.

"I'm glad of that," said the novice; "I was afraid I might have missed it."

—North Shore Bulletin

A. E. DAY, Chief of Weighing Bureau, Transportation Department

# \$1 Brings Hartman's Richly Upholstered 7 Piece Suite

**Quarter-Sawed and Solid Oak**

Send only \$1 for this complete suite of library, parlor, or living room furniture—seven splendid, massive pieces. Use it 30 days, on free trial, then if you don't say that it is even more than you expected, ship it back and we return your \$1 and pay transportation charges both ways.

**Over a Year to Pay**

Only by seeing this splendid quarter-sawed and solid oak suite can you realize how it will add to the appearance of your home. Only by examining it can you appreciate what a record-breaking bargain it is at our smashed price. Furniture like this—elegant, comfortable, massive—can be bought nowhere else at anywhere near the price, nor on such liberal terms.

**Handsome Fumed Finish!** TABLE, solid oak with top 26x42 inches. ARM ROCKER, solid oak with quarter-sawed top panel and arm rests; seat 18x19 in. SIDE ROCKER, solid oak with quarter-sawed oak top rail; seat 16x14 inches. ARM CHAIR, 37 inches high, and SIDE CHAIR, 36 inches high, with seat 16x14 inches.

Table and chairs stand on noiseless glides. Backs and seats upholstered in durable imitation Spanish brown leather. Comfortable spring seats. TABOURETTE, 16½ inches high with 10-inch top, is solid oak. BOOK BLOCKS, heavy enough to support a liberal number of volumes. Shipped (fully boxed, "knocked down" to lessen freight charges) from factory in Central Indiana, Western New York State or Chicago warehouse. Send the coupon.

Order by No. 112DDMA7. Price, \$37.95. Send \$1 now. Pay balance \$3.00 per month.

**FREE BARGAIN CATALOG**

368 pages of the world's greatest price-smashing bargains. Everything you need for the home—the pick of the markets in Furniture, rugs, linoleum, stoves, watches, silverware, dishes, washing machines, sewing machines, aluminum ware, phonographs, gas engines, cream separators, etc.—all sold on our easy monthly payment plan and on 30 days' Free trial. Post card or letter brings this 368-page Bargain Book by return mail FREE.

## “Safety-Valve Steve” Says:

Tim, my fireman, can't wear his jumper when he's firing—but when the run's over he slips on a slick jumper—and gives the crowds the once over.

Yes—Tim is careful that all Overalls and Jumpers he buys are made out of Stifel's Indigo Cloth. I switched him in right—twelve years ago when I says—“Tim—always look for this boot-shaped trade mark in your Work Clothes.”

All the big Overall and Work Clothes manufacturers use Stifel's Indigo Cloth because it wears best. Well—we're pulling out now. See you later.

## The Amazing Story of Carl Rowe who rose from an Income of \$50.00 a Week to \$1,000 a Month

### These Men Are Making Big Money

Here are just three of the Comer Representatives who are making large profits and making them easily. They find that they can take an hour or so of spare time any day and make plenty of extra money. Or they can devote all their time to Comer work and make large and steady income. Read their records and hear what they have to say regarding the Comer Way of making big money.

Carl P. King, of Kentucky, a machinist, says: "Since I received my outfit the time I've spent calling on customers has paid me \$3.00 an hour profit."

F. E. Wright, South Carolina, railroad man, finds the Comer Agency a great profit maker. \$256.58 for one month's leisure hours' effort.

I. J. Maher, of Maine, finds the Comer Business a sure way to steady and large profits. He averages \$250 to \$350 a month and frequently goes over the \$500 mark.

You can make profits like these just as easily as King, Wright and Maher. You don't need experience or previous training to start. The Comer Way shows you how to make big money from the first day, and how to keep right on making it.

My name is Rowe—Carl Rowe. I live in a small city in New York State.

I am going to tell you an amazing story about myself. It may seem too strange to believe, but you can easily verify everything I have to say.

Two years ago I was a baker. I was struggling along, trying to make the money in my pay envelope meet the increasing expenses of our family. There was no prospect for the future.

Today, just two years later, I am a successful business man. I have plenty of money for all the things we need and want. Last month I made \$876 during my spare time, and was able to put \$200 a week in my savings account.

I am going to tell you how it happened.

Please remember that two years ago I had no surplus cash. I was in the same fix as nine out of ten other men. Expenses were constantly mounting and my salary, although it had increased, could not keep pace with the cost of living. My wife had to do without things that I knew she ought to have. We wanted an automobile, but we couldn't afford it. We wanted to buy our home, but we couldn't afford that.

It made me desperate to think of what might happen if I became sick or lost my job. I worried about it, and so did my wife. We were living from hand to mouth, and we didn't know what calamity and hardships might be lurking just around the corner.

And yet—today—I own our nine-room house. I have an automobile. I have money for books, the theatre, or any other pleasures that I may want. I have the cash today to educate my son and send him through college.

Here is how it happened. One day in glancing through a magazine I read an advertisement. The advertisement said that any man could make from a hundred to three hundred dollars a month during his spare time.

I didn't believe it. I knew that I had worked hard eight hours a day for \$50.00 a week, and I figured that no man could make that much during a couple of hours a day spare time.

But as I read that ad I found that it pointed to men who had made that much and more. In the last paragraph the advertiser offered to send a book without cost. I still doubted. But I thought it was worth a two-cent stamp, so I tore out the coupon and put it in my pocket and next day on my way home from work I mailed it.

When I look back to that day and realize how close I came to passing up that ad, it sends cold chills down my spine. If the book had cost me a thousand dollars instead of a two-cent stamp, it would have still been cheap. All that I have today—an automobile, my home, an established business, a contented family—

all these are due to the things I learned by reading that little eight-page booklet.

There is no secret to my success, I have succeeded beyond any dream I may have had three years ago, and I consider myself an average man. I believe that I would be criminally selfish if I did not tell other people how I made my success.

All the work I have done has been pleasant and easy, and withal, amazingly simple. I am the representative in this territory for a raincoat manufacturer. The booklet that I read was one issued by that company. It tells any man or woman just what it told me. It offers to anyone the same opportunity that was offered to me. It will give to anyone the same success that it has brought to me.

The Comer Manufacturing Company are one of the largest manufacturers of high-grade raincoats on the market; but they do not sell through stores. They sell their coats through local representatives. The local representative does not have to buy a stock. All he does is to take orders for Comer raincoats and he gets his profit the same day the order is taken. Fully half my customers come to my house to give me their orders.

My business is growing bigger every month. I don't know how great it will grow, but there are very few business men in this city whose net profit is greater than mine, and I can see only unlimited opportunity in the future.

### A Special Offer To Railroad Men

If you are interested in increasing your income from \$100 to \$1,000 a month and can devote all your time or only an hour or so a day to this same proposition in your territory, write at once to The Comer Manufacturing Company, Dayton, Ohio. This is their special offer. They will send you, without any preliminary correspondence or red tape, a complete outfit with full instructions, samples, style book order book and everything you need to get started. Sign and mail the coupon below and in less than a week you can be making more money than you ever believed possible.

### Mail This Coupon At Once

### THE READER AND ADVERTISING

Circulation of the Baltimore and Ohio Magazine is over 37,000 copies per issue, our aim being to place it in the hands and in the homes of practically all English speaking employes of the Railroad. An examination of our advertising will show that it conforms to the highest standards. We do not guarantee it, but we believe that it means exactly what it says, and for that reason feel free to urge our readers to patronize our advertisers whenever they consistently can.

## An Amazing Raincoat Offer

Goodyear Mfg. Co., 4557RD, Goodyear Bldg., Kansas City, Mo., are offering to send a Goodyear Combination Top and Raincoat to one person in each community who will recommend it to friends. If you want one, write today.

### Checking Up

Roy Simpson, negro laborer, was putting in his first day with a construction gang whose foreman was known for getting the maximum amount of labor out of his men. Simpson was helping in the task of moving the right-of-way and all day long he carried heavy timbers and ties until at the close of the day he was completely tired out. Came quitting time. Before he went he approached the boss and said:

"Mister, you sure you got me down on the payroll?"

The foreman looked over the list of names he held. "Yes," he said, finally, "here you are—Simpson—Roy Simpson. That's right, isn't it?"

"Yaas suh, boss," said the negro, "dass right. I thought mebbe you had me down as Sampson." —*Forbes Magazine, (N. Y.).*

### A Sure Sign

The little suburb of Mudville cannot by any stretch of imagination be considered a busy place. The railway upholds the reputation of the village.

A visitor to Mudville realized this recently after waiting four hours for an overdue train. He approached the porter.

"Isn't that train coming soon?" he inquired mildly.

Just at that moment a dog came trotting up the line, and a glad smile illuminated the porter's face.

"Oh,—yes, sir," replied the official; "it'll be getting here now. Here comes the engineer's dog." —*Edinburgh Scotsman*

### His Condition

"How are you coming on, Uncle Bragg?" asked an acquaintance.

"Well, I'll just tell ye, Gabe," answered old Bragg Sockery of Mount Pizgy, Ark.—"I hain't doing no pertickler good. 'Pears like the doctor and the neighbors don't understand my case. Some says one thing about it and some says something else, till I'll be dogged if I don't get to sorter wondering whether none of 'em have got any sense. I don't like to disapp'int my friends, though, and I hate to waste what I pay the doctor for. So I've took enough of one thing and tuther to float a boat, and have kinda got the notion that what's the matter with me is simply what's the matter with me, and there hain't no help for it."

—*Kansas City Star.*

### Unlimited Ability

The town band had been royally entertained in a neighboring village where a concert had been given. On the train home the conductor had some trouble getting the ticket of one of the musicians. After several futile attempts to get his fingers into his vest pocket, the musician gave it up and announced:

"I losht th' dang thing."

"Come, come," ejaculated the conductor encouragingly. "You couldn't lose a thing like a railroad ticket."

"Oh, I couldn't hey?" retorted the other with indignation. "Y' don' know me. I just losht the bass drum, thass what I did."

—*M M C—News.*

### Husbanding Her Resources.

He was cycling through a quaint, old-fashioned village, when he was thrilled by the sound of a woman's cry for help, followed by the muffled tones of a man's voice. He quickened his pace, to find a woman holding on to the handle of a cottage door, while from within it was evident that somebody was endeavoring to force it open.

"Give me a hand, mister," she cried. "I daren't let him come out!"

The cyclist dismounted, and by adding his strength to that of the woman the door was kept closed.

"Your husband, I suppose?" he said.

"Yes," was the breathless reply. "He's got one of his crazy fits on to-day."

"Well, I should think you would be pleased to let him out."

"Not till this policeman's passed," panted the woman. "You see, Bill's very nasty with policemen when he's like this, and this one's too valuable to lose. I do his washing." —*Tit-Bits (London.)*

### Wouldn't Mind That

An Italian who kept a fruit stand was much annoyed by possible customers who made a practice of handling the fruit and pinching it, thereby leaving it softened and often spoiled. Exasperated beyond endurance he finally put up a sign which read:

If you must pincha da fruit—  
 pincha da cocoanut!

—*Exchange.*

First hobo, under freight car: I used to travel first class, off and on.

Second ditto: Getting on at one station and put off at the next, I suppose.

—*Exchange.*

### Another Smart Youngster

Mr. and Mrs. Jones had been invited to a friend's home for tea and the time had arrived for preparing for the visit.

"Come along, dearie," said Mrs. Jones to her 3-year-old-son, "and have your face washed."

"Don't want to be washed," came the reply.

"But," said the mother, "you don't want to be a dirty little boy, do you? I want my little boy to have a nice clean face for the ladies to kiss."

Upon this persuasion he gave way and was washed.

A few minutes later he stood watching his father washing.

"Ha, ha, daddy!" he cried. "I know why you're washing!"

—*Pittsburgh Chronicle-Telegraph.*

### The Tie That Binds

A baby will make love stronger, days shorter, nights longer, bank roll smaller, home happier, clothes shabbier, the past forgotten and the future worth living for.

—*Mead Corporation.*

### Chance of a Lifetime

She had become engaged to the handsome and titled foreigner, much against the wishes of her family, who were averse to taking on a life boarder.

"Ah, Count," she sighed regretfully "you don't know how my love for you distresses my parents. I have often heard father say he would gladly give fifty thousand dollars if I should never see you again."

The scion of nobility sat up excitedly. "Ees zat so?" he demanded. "And ees your fazaire in hees offees now, you sink?"

Terrible accident narrowly averted on the B. Z. & C. (Bent, Zigzag and Crooked). Flagman on the cannon ball saw an engine coming around Snake Curve, jumped off to flag and found it was his own train

## An Embryo Engineer

By James Edward Hungerford

Illustrated by Robert L. Heiser

There are those that have ambitions,  
To attain the high positions,  
Such as President and Senator and Governor and sich;  
And there's those that simply hankers,  
To be business men, or bankers,  
And they won't be restin' easy, 'til they're fairly rollin' rich;  
And there's those who'd be contented,  
Just to get their names indented  
On a tablet in the archives of the mighty Hall of Fame;  
But with me, I'll tell you straight, sir,  
I would rather sit in state, sir,  
In an engine cab, with "engineer" outstringin' from my name!

Ah, to me it is a treat, sir,  
When a driver takes his seat, sir,  
And just pulls that grimy cap of his far down to shield his eyes;  
And then glances up the track, sir,  
And then proudly glances back, sir,  
With his keen eyes all aight, sir, kinda knowin' like, an' wise;  
When he pulls his gauntlets on, sir,  
Like he's anxious to be gone, sir,  
And a glow of pride and pleasure sort of creeps into his face;  
"All aboard!" Now watch him start, sir,  
Golly! How it grips my heart, sir!  
Why, I'd give all I possess, sir, to be sitting in his place!

Ah, it makes me thrill with pride, sir,  
When he throws the throttle wide, sir,  
And away the engine glides, sir, with her long majestic train!  
Gee! The sight of him's just grand, sir!  
Golly! Don't he beat the band, sir!  
Can I make you understand, sir—do I make my feelin's plain?  
Why, it makes me feel so queer, sir,  
That I'd simply like to cheer, sir,  
When I see an engineer, sir, I am joyous and content;  
For the fact is—get me straight, sir,  
I would rather sit in state, sir,  
In an engine cab, than sign myself the Nation's President!

# BALTIMORE AND OHIO MAGAZINE

Published monthly at Baltimore, Maryland, by the Baltimore and Ohio Railroad, to improve its service to the public and to promote efficiency and community of interest among its employes

VOLUME 10

BALTIMORE, SEPTEMBER, 1922

NUMBER 5

## One-Hundred Dollars for an Idea— And Honor without Stint for the Person who Suggests It!

THE Baltimore and Ohio needs an idea. It wants to express in words, picture, design or a combination of them,—forcefully and briefly—what the Baltimore and Ohio is. It wants a trademark, slogan or advertising idea, adaptable for its timetables, advertising literature, etc. And it is willing to pay one-hundred dollars (\$100.00) for it!

For years our trademark has been the one shown at the top of this page, the dome of the Capitol in Washington in the lettered circle. In fact, the dome of the National Capitol has or so long been associated with our railroad that a newly suggested trademark not containing the Dome will have to be supremely good to outweigh the value of this long association between the Capitol and the Baltimore and Ohio. But remember that the Dome in the design is not necessary, although it is permissible! Other railroad trademarks of varying significance and excellence are pictured here as suggestions.

There are hundreds of interesting facts about the Baltimore and Ohio which have a bearing on this subject. It is the oldest railroad in the United States. It was the first to cross the Alleghenies, to use electricity as motive power, and in other important respects. It runs through thirteen different states. It is the only railroad which runs east and west through the National Capital. Its safety record is an enviable one. Its reputation for smooth-riding trains, dining car service and courteous employes is second to none. It is famous as "the Good Neighbor Railroad."

But pertinent as are all these facts, it is apparent that they cannot be completely expressed in a

trademark or concrete advertising idea, which must be extremely brief, simple and, at the same time, forceful. Beyond this, however, there is no restriction on the ideas which may be suggested.

A trademark of any shape or lettering, or simply an idea, provided it has outstanding merit, will do. Whatever is suggested, however, should have a "sales value" if possible, such as is expressed by such well known slogans as "Eventually—Why not Now," "Veribest," "Taste Tells," "It Floats," etc. It may also be an adaptable trademark such as the Sante Fe Car Wheel and Cross, used in many variations. But as this trademark is always recognized as the Sante Fe, so must our trademark be recognizable as the

Baltimore and Ohio. In this connection it will be remembered how well the Lackawanna Railroad has adapted the "Phoebe Snow" and "Road of Anthracite" ideas to its advertising.

### Conditions

1. Any person may submit one or more suggestions.
  - a. Each must be sent in a separate envelope.
  - b. The suggestions may be described, sketched or drawn. It is not necessary that a drawing be submitted, although this is advisable where possible because it will clarify the idea of the writer.
  - c. The reasons why contestant believes his idea has merit *may* be explained in not more than 200 words.
2. There is no time limit on the competition, but quick responses are advisable since the first idea of outstanding merit received after the lapse of a reasonable period, will be accepted.
3. If no idea of outstanding merit is received, the prize will not be awarded.
4. After the contest is closed, credit will be given in the MAGAZINE to all those who have submitted ideas of unusual merit.
5. Suggestions will be sent in a plain envelope addressed,

Trade Mark Contest,  
Baltimore and Ohio  
MAGAZINE,  
Mt. Royal Station,  
Baltimore, Md.

6. Write on one side of the sheet only, allowing plenty of space between lines. Do not place any evidence of authorship on the envelope in which the suggestion is mailed or in the suggestion itself. But with the suggestion enclose

1

2

3

4

5

6

7

8

9

10

11

Trademarks of some of the other railroads, all self explanatory except No. 7, of the Chicago and Alton

a blank envelope containing a slip of paper showing name and address of the contestant. The contestants will not be known, even to the judges, until the winning suggestion, if such there be, has been decided upon.

This contest may develop some of

the most important head-work ever started by the Baltimore and Ohio. A good trademark is an invaluable thing and we hope that one of our employes may have the honor and reward of suggesting the right one.

Get your idea in now!

Train No. 44, of course, would have overcome all the delay if the engine had been performing. On the return trip on train No. 53, this engine made a very creditable performance.

Yours Truly,

(Signed) J. M. SCOTT.

## Fireman Albert Adams Commended for Unusual Interest in His Work

*After finishing an unsatisfactory run, he played "night hawk" with the boilermaker and found out just what was wrong with his engine*

AN account of the recent unusual interest shown by Fireman Albert Adams in his work, was sent to General Manager Scheer by General Superintendent Scott, with recommendation that it be published in the MAGAZINE. Mr. Scheer said that it was one of the most gratifying instances of the kind that had ever come under his observation and forwarded the recommendation approved. Mr. Scott's letter, telling the story, is in part, viz.:

Wheeling, W. Va., Dec. 13, 1921.

Mr. E. W. SCHEER,  
General Manager.

Dear Sir:

Train No. 44, engine 5011, Conductor J. P. Hickey, Engineer George Gillingham, made a poor run on December 10. They were delayed five minutes at Denver, meeting No. 51, took coal at the Shaft Mine just west of Fairmont and did not have steam enough to get away from there for four or five minutes on account of being unable to release the air, only having 130 pounds of steam when they stopped at the coaling station. The engine crew stated that the engine failed right out of Wheeling on account of a poor tank of coal.

The feature of this delay that I want to bring to your personal attention is the way in which Fireman A. Adams handled himself after he arrived at Grafton. He has been in the service eight years as a fireman and has been promoted since 1918 although he has run but little, account being set back. I asked him to come to the office to see me today. He is married, has one child, is purchasing his home through the Baltimore and Ohio Relief Department, and is very much interested in his work. He said that the engine did poorly from Wheeling to the Shaft Mine, just west of Fairmont, that he had burned about six tons of coal in that seventy-five miles and only had 130 pounds of steam when they stopped at the coal tipple; that the brakes stuck and they could not release them for four or five minutes; that there was but little life in the coal, that the blower was O. K. and that it was the first time in his experience that he has ever had to lose a minute on a passenger train account waiting for steam.

My reason for calling him to the office was that I had learned that on his arrival on train No. 44 on the night in question, which was about 11.00 p. m., he did not go to bed but waited around until the 5011 had been hostled and when the boilermaker got in her about 2.00 or 2.30 a. m., Fireman Adams was there to see what was wrong. He crawled into the fire box with the boilermaker and found seven flues leaking, three at the top of the sheet squirting slightly, seven flues on the right hand side capped over and five or six flues at the bottom of the sheet stopped up.

This is the first case I have ever known of a fireman hanging around three or three and a half hours at midnight to find out what was the matter with an engine that he had fired over a division and had not been able to keep hot. I told Adams that that was why I wanted to see him. I was interested in the man that had that much interest in his work and the good performance of our trains. If everybody had this much interest in the game there would be but few failures, and certainly not a second failure of the same kind if the man could have anything at all to do with the correction of the defects that caused the first one.

Fireman Albert Adams, Wheeling Division

Mr. Adams became a fireman for the Baltimore and Ohio in 1910. He remained in the service for but a short time, but reentered it on July 15, 1911, as freight fireman and continued as such until promoted to engineer on June 1, 1920. Recent poor business conditions put him back to his firing job, but his clean record, fine interest in his work and other substantial qualities noted indicate that he will be ready for his opportunity when it comes. And it will come!

### Lady Astor Remembers

THE story of Lady Astor's experience on a Baltimore and Ohio dining car on April 22, and her keen enjoyment of the hospitality there provided, will be remembered as having appeared in the May issue. Further evidence of Lady Astor's enjoyment of her lunch and of the courtesy shown her by our Dining Car Department men was recently substantially evidenced by the receipt by Steward De Leon Rush and Inspector Sherman, of the Dining Car Department, of a handsome fountain pens sent them by Lady Astor.

### Milwaukee's New Folder with Map of the Orient

THE C. M. & St. P. Railway Company has just issued an usually attractive folder called "To The Orient." It contains scenes of the electrified line of the Milwaukee and characteristic views in China, Japan and the Far East. Its special distinction is its large and comprehensive map of North America, the Pacific, Asia and Australia, showing the principal trade routes. Copies of this folder can be had from any Milwaukee representative or the Passenger Traffic Department, Railway Exchange, Chicago.

### Promotions and Appointments Traffic

ON June 15, C. M. Gosnell was appointed division freight agent, Akron, Ohio, vice C. F. Farmer, promoted.

On July 1, the following appointments were made in the Commercial Development Department.

Wm. W. Baker, assistant to Manager Commercial Development, Baltimore, Md.

David Hum, Jr., industrial survey agent, Baltimore, Md., vice Mr. Baker.

On July 15, R. L. Hamme, industrial agent, St. Louis, Mo., in charge of St. Louis Division west of North Vernon, Ind., exclusive, and including line Beardstown, Ill., to Shawneetown, Ill., both inclusive.

C. L. Hardin, traveling industrial agent, Cincinnati, Ohio, vice Mr. Hamme.

W. E. Hampton, industrial agent,

Pittsburgh, Pa., vice C. M. Gosnell, promoted.

#### Operating

On July 10 R. E. Wilson was appointed instructor fuel economy, Ohio Division.

On July 19 James P. Britton was appointed assistant road foreman of engines, Chillicothe, Midland and Hillsboro Sub-divisions.

Wm. E. Foster was appointed assistant road foreman of engines, Parkersburg and Portsmouth sub-divisions.

## F. B. Huntington, General Auditor, Baltimore and Ohio Chicago Terminal Railroad

By Thomas H. Williams, Magazine Correspondent

**D**URING the past few years the readers of the MAGAZINE have had the pleasure of seeing biographies of a number of our officials, and we now take pleasure in introducing to them our general auditor, F. B. Huntington, located in Chicago.

Mr. Huntington was born in Cleveland, educated in the public schools of Milwaukee, Wis., and first entered railroad service in 1883 as a clerk with the Milwaukee Northern. He filled various clerical positions until 1887 when he was promoted to chief clerk to the auditor. During this period he was not only holding a clerkship, but during his spare time, studied and mastered telegraphy and also acted as dispatcher at intervals.

In 1896 Mr. Huntington became traveling auditor for the Wisconsin Central Railway Co., Marshfield & Southeastern Ry. Co. and Abbottsford & Northeastern Railroad Co., continuing as such until 1901 when he was appointed special representative of the general manager of the

Wisconsin Central. During 1904 Mr. Huntington was elected vice-president and director of the Eastern Wisconsin Railway and Light Co., located at Fond Du Lac, Wis. While holding this position he had complete charge of all financial accounting, purchasing and storekeeping departments.

Meantime Mr. Huntington was preparing himself for further advancements, and was rewarded in 1906 by receiving the appointment of comptroller and director of the Chicago Terminal Transfer Railroad Company at Chicago. He held this position until 1910, and when the Chicago Terminal Transfer was consolidated with the Baltimore and Ohio Railroad, he was appointed auditor, and in 1920, general auditor, which position he is still holding.

Mr. Huntington has long exhibited particular interest in the advancement and education of those working under his supervision and is always ready and willing to discuss their problems with them.

Through his complete knowledge of higher accounting, Mr. Huntington has, for the past several years, held the chairmanship of The Terminal and Switching Lines Accounting Conferences. He has also held executive offices in several clubs in Chicago.

### The Cover Picture

**O**N August 21 G. B. Luckey, official photographer of the Railroad, made the picture which appears on the cover of this issue, No. 1 taking water from the track pan at Swan Creek, Maryland.

One of these pans is built between both eastbound and westbound tracks. Each is 1,200 feet long and holds 7,000 gallons of water. An engine of the type shown in the picture (the 3200) can take about 3,500 gallons in one trip over the pan.

When this picture was taken the train was running about fifty miles an hour, which is the maximum at which the Management wishes engines to be operated when scooping water because at higher speeds so much of the water is wasted. The ideal speed for taking water is between thirty and forty miles an hour.

The scoop which dips into the track pan and takes up the water is a big, strong and heavy contrivance which is operated by air. When scoops were first put on engines they were operated by hand, but the engines could not run at a greater speed than twenty miles an hour because at higher speed than that it was impossible for the fireman to pull up the scoop at the proper time, on account of the force of the water being exerted against it.

As might be supposed, there is considerable longitudinal expansion of this track pan during the course of the year, between our hottest and coldest weather. The pan is laid on ties and the bottom edges of it are spiked down in the same way that a rail is spiked down, which would allow, therefore, for necessary expansion and contraction.

### Thirty-five New Mikados

**O**N July 13 announcement was made by Geo. M. Shriver, senior vice-president, that the Baltimore and Ohio had placed an order with the Baldwin Locomotive Works, Philadelphia, for thirty-five Mikado type freight locomotives. It is understood that these locomotives will be included in the equipment trust already arranged for in connection with the purchase of passenger and other car equipment.

# Receiving Clerks and Others at Chicago Doing Yeoman Work in Securing Competitive Business

*There is a fine suggestion here for the force at every large station*

*By John Draper*

Freight Agent, Chicago

OUR receiving clerks are doing excellent work in obtaining tonnage for our road that without their "boosting" would go forward over other lines. When drivers call to deliver freight to us it is their practice to inquire if they have any freight on their wagons routed over other lines and that we could handle. Usually the reply is "Yes" or "I don't know—look at the bills." Our receiving clerks in that way pick up much freight that we can handle. When they suggest that the driver call his firm and ask permission to change the routing, the firm usually (upon being told by the driver that by changing the routing it would save him considerable time by his not having to haul the freight over to the stations of competitive lines over which originally routed) authorizes the change to make routing read via the Baltimore and Ohio.

During the period September 9 to December 18, 1921, we obtained 341,694 pounds of freight in that manner, netting us in revenue approximately \$3,400.00.

Of our entire L. C. L. tonnage of about 12,000 tons forwarded a month, only about 25 per cent. is received at the doors and from trucks and wagons. Thus, in the three months period, our total door receipts amounted to only about 9,000 tons, and of this amount over 170 tons came to us through solicitation on the part of our receiving clerks.

The full importance of this may be better understood when it is shown that the revenue we derived from these odd 170 tons more than paid the full salary for the full three months of the seven or eight receiving clerks, through whose efforts this additional freight was obtained. This clearly demonstrates what a united effort in the right direction can do.

Shortly after the inauguration of the "Think and Act" Drive, when we began reporting the tonnage obtained by our receiving clerks, a copy of the report went to each of the ones through whom the freight was obtained for movement over our lines. In that way there was added interest exercised and aside from the substantial increase in revenue to the Railroad and the satisfaction derived by these employees in knowing

they did all they could in the interest of the Road which employs them, many well satisfied patrons have been gained.

Efforts such as these are highly commendable and speak for the evident good will of the employees. Let us hope that others may follow their example and, no matter in what department engaged, put forth their efforts along their own particular lines in the interest of the Company and thus bring home to themselves that satisfaction we feel when we know we have done a good and faithful day's work.

This spirit is by no means confined to our freight house forces. During this same period a considerable amount of money was saved by our reconsigning clerk at South Chicago, J. Stack, by our reconsigning clerk in this office, Frank Bastl, our chief rate clerk, Geo. Maypole, and by my chief clerk, J. H. Maginn, and by M. Rosenthal at South Chicago. These forces, by inducing consignees to accept our team track delivery on certain cars that were billed for various deliveries on the tracks of other roads in Chicago, saved the switching charges we would have had to pay, had the cars moved to the lines in whose care they were billed for final delivery, and in addition thereto, the intermediate charges we would have had to pay upon these same cars had they been delivered as originally billed. These remarks are true of all mentioned, except Mr. Maypole. His gains were due entirely to having through his ever courteous and affable manner, se-

cured new business to our line, such new business being from Erie, Pa., and Hog Island, Pa.

The amounts thus credited and in this report to each of these employes are as follows:

George Maypole.....	\$1354.32
Frank Bastl.....	515.49
J. H. Maginn.....	270.83
Jno. Stack—S. Chicago.....	340.86
M. Rosenthal—S. Chicago....	26.61

Total.....\$2517.11

These amounts by no means represent all that these forces have saved through their efforts and vigilance. There are numerous other instances involving considerable money that with more time might be included, to the credit of these employes. And for the edification of any who may be skeptical enough to doubt the accuracy of this report, I desire to say that we are prepared, if needs be, to support the report by positive and detailed information such as the car number, initials, waybill reference, etc.

It might be well, perhaps, to mention also the good work done in our freight houses in checkweighing and classification changes during December, 1921. The volume of tonnage was less than usual; yet the gains made in checkweighing and classification changes exceed those of any other month, showing that the forces took advantage of the lull to pick up and increase the gains from these particular operations.

In addition to the business above mentioned I am glad to be able to say that through the efforts of our receiving clerks, the competitive freight listed in table at bottom of this page, was secured for our line from December 20 to 27 alone:

We are proud of all these men out here and hope that the methods they have pursued so successfully may be helpful in suggesting ways of getting business at other stations, all to our mutual advantage.

COMMODITY	WEIGHT	REVENUE	CREDIT

# "Nailing" a Profitable Passenger in 1874

Colonel Guffey Paid the Price and Made Pittsburgh on Time

By H. L. Armor

Pensioned Operator, St. Petersburg, Pa.

## Helps Our Men Get Good Homes

Garrett, Ind.,  
March 24, 1922.

Mr. W. J. Dudley,  
Supt. Relief Department,  
Baltimore, Md.

Dear Sir:

Per request am enclosing attached receipt and in doing so I wish to extend thanks to the Relief Department for assisting me to become the owner of a nice home and one well worth more than it has cost me.

The Savings Feature of the department has been the means of many Baltimore and Ohio men securing a good home and I trust many more will avail themselves of the opportunity.

Again thanking you, I am,  
Respectfully yours,

(Signed) Clifford H. Martin,  
Engineman, Garrett, Indiana

NOTE: Baltimore and Ohio employes can promptly secure full information about the Relief Department's easy plan of home-owning by writing Division "S," Baltimore and Ohio Bldg., Baltimore, Md.—Ed.

IN our October MAGAZINE there is an article on the subject of how alert station agents should be in securing business for the Road. It takes me back in memory to the early seventies, when there were no telephones or other present day facilities for coming in contact with our patrons quickly, and I have thought that the readers of the MAGAZINE might want to hear of a particular instance of the "grab onto act" occurring in the late fall of the year 1874.

The writer was, of a Sunday afternoon, seated in his office at Foxburg, Pa., on the Allegheny Valley R. R., when a knock came at the door. With a "come in," one Jean Vasey, cab driver from St. Petersburg, desired to know if the three o'clock train for Pittsburgh had passed. I assured him it had gone on time. At this junction of the conversation Col. James M. Guffey appeared, and, on learning that he had missed his train, at once showed keen disappointment, almost akin to anger, as he paced the floor, addressing Mr. Vasey with, "I would not have missed that train for fifty dollars." Quickly as I could utter the words I said, "Pardon me, Mr. Guffey, but I think we can yet get you to Pittsburgh this evening for fifty dollars." He replied, "very well," and with that assurance I hastened to wire, and this conversation with J. B. Stewart, wire chief at Pittsburgh, occurred.

"A belated passenger for train No. 2 for Pittsburgh offers fifty dollars to reach Pittsburgh this evening. I have assured him that we can do this. Can't we hold train No. 2 at East Brady until arrival of Engine No. 12, now lying on siding here with steam up and engine crew on engineering?"

Back came this reply.  
"Good, have crew with engine 12 get ready to come south at once, and will get a strangle hold on train No. 2 at East Brady."

The usual routine of train orders for engine No. 12 and signed by Engineer John Muncy, the collection of the fee of fifty dollars, and escorting Mr. Guffey to a seat on the fireman's box on engine, followed. With a good-bye wave to the writer, Mr. Guffey now wore a smile of relief that at least the first leg of his journey was assuming reality as the engine moved quickly out of sight. When back at the office I found that the incident had taken just six minutes. It is needless to add that train No. 2 arrived at Pittsburgh on schedule time.

Mr. J. M. Guffey is well past his eightieth mile stone, but is still hale and hearty, and Mr. Jean Vasey and the writer are the only ones living that took part in this episode now forty-seven years in the past.

### Delighted with Trip

CLINTON T. SMITH, pressman in our Printing Department, Mount Clare, secured a passenger from Baltimore to Huntington, W. Va., Mrs. Davis Dawson, who had intended to use other roads. Mrs. Dawson wrote Mr. Smith after her trip and told him that it had been a delightful one.

Can't we make it second thought with ourselves, each and everyone of us, when we hear someone talk about going somewhere, to suggest our Railroad as being the Best and Only for the trip?

## The Man Who Couldn't Sleep

By Edgar White

MR. MAURICE HAMILTON, wealthy manufacturer of an inland town, climbed aboard the Limited at the river junction, and made his way to the chair car. The night was half gone and he thought he could get what sleep he needed in an easy chair as well as in a sleeper. He had attended important meetings during the day, and had fought down some bitter opposition. Cool and steady as steel while the battle was on, with relaxation came a feeling of irritation. He was angry at the heat, at the tinkering on the car wheels, at the excitable women who came in chattering. His nerves were raw. But he dropped back into his chair, shut his eyes and tried to compose himself. Soon the chattering women subsided, the wheel testers quit tinkering and quiet reigned.

The car window was slightly raised, but the heat was stifling. Why on earth didn't the train start! Everybody was on. What were they waiting for?

While he lay there in the heat the conductor came through, recognized him and good-naturedly inquired if he was going home.

Home! He had had no home since that black day when he had hurt his young wife, Helen, to the quick by insinuating she had married him for his money. She had waited in agony a whole day for him to apologize, but his proud spirit would not yield. Then she returned to her father's home, on a farm some ten miles from Brookdale, where they had lived. Now he stayed at a hotel, a cold, hard man, they said of him, but a perfect business machine. He and Helen were not divorced.

These things intruded along with the heat, and made the night unbearable. But with bulldog tenacity he tried to sleep, and lay as still as he could, his eyes closed.

The train started slowly. It roared over a few street viaducts. A whiff of fresh air came into the window. He grunted with satisfaction. He could sleep now. But in a moment, from far out ahead, came two long weird blasts like a cry, then two short snarls. Signals for road or street crossings at grade. Again and again the long weird warning came, until it seemed there were nothing but crossings ahead. It seemed to the weary travelers that each time the warning blasts were longer, louder and more irritating.

The train was out in the country now, running at full speed. Still the

warning blasts—two long ones that seemed to the nerve-wracked man like the scream of lost souls, and two short spiteful flashes as the bursting of shells.

Of course he knew what these signals were for, but why on earth should they be given at every highway across the state, in the dead of night, when there were no travelers on the public road? At the hundreds of road crossings, from one end of the state to the other, that infernal noise would be kept up until it seemed like one continuous shriek. What nonsense! He wished some official was on the train to see what he had to put up with. Sleep was out of the question. He got to counting the moments between signals, and yet when each one came he started as if struck. With a growl he straightened his chair back and peered out of the window. The dust came swirling against his face, but the cool wind was refreshing.

God! What a day it had been! And how he wished he was at home at Brookdale. He had no home. He looked at his watch. Only an hour gone.

Again that uncanny blast! It was maddening. He turned from the window and held his hands to his ears. But he heard just the same. He didn't believe he could do any-

thing to shut out that sound—that it would abide with him forever. In his excited state of mind he was convinced that this night's experience would have some influence on his destiny.

Maurice Hamilton was late in reaching the office of his factory in the morning. He glanced carelessly at his mail and then called Miss Madeline Merrill, his stenographer. He didn't notice that she was very pale, and that she too looked as if she had lost sleep the night before.

"Take a letter, Miss Merrill," Hamilton directed, "to the superintendent of the Valley railroad—C. J. McIntosh—you know the address:

"Dear Sir:—Coming over from the Junction last night I noticed what occurs to me a very ridiculous rule for your engineers—the giving of long, harsh blasts just before every road crossing. I'm sure the law doesn't require such a lengthy performance. It makes sleep in the night time impossible, and is practically useless, for there is no travel on the highways at night time. If there were, the noise of the train itself would be a sufficient warning. I believe if you would investigate this matter, you would find it for the good of the service to cut out this intolerable nuisance, or at least shorten it considerably.

"Yours truly,  
"Maurice Hamilton."

I heard the two short blasts

"Is that all?" asked the stenographer, as Hamilton ceased dictating.

"There'll be some more when I run through this mail. Lord! There's a batch of it."

"Mr. Hamilton!"

The girl hesitated, and he looked up in surprise.

"Well?"

"If you have time I would like to tell you something—it happened last night."

He saw that she was agitated and somewhat embarrassed.

"All right, Miss Merrill," he nodded, "let's have it."

The girl stood behind a chair, holding nervously to the back of it.

"Last night, about 10 o'clock, I was called by some one who said a friend—a very good young woman friend—was sick," Miss Merrill began. "She lives out of town ways. Father wasn't here, but I can run the car as well as he can, so I set out alone. It was a nice night, and I knew the road. I never thought of any danger. The only thing I thought of was reaching my friend as quickly as possible.

"You know the road by Muscle Fork?"

Hamilton nodded.

"It goes through a sort of cut."

"Yes, and before you get to the cut there's a forest on the east side. The wind was blowing from the west," Miss Merrill narrated significantly. "When you get through the cut you're on the right-of-way of the Valley railroad.

"In ordinary circumstances I suppose I'd have thought of all these things, but last night I only thought of this friend who was sick—I couldn't think of anything else. I was putting my car through at top speed, and was in the middle of Muscle Fork cut when I heard two sharp whistles—'toot' . . . 'toot!' . . . just like that. Until that moment I hadn't thought of a train being within a hundred miles. You see, it was coming from the east and the wind was blowing against it."

"I see," returned Hamilton, who was now as much agitated as she was.

"Of course I shut off my engine, and applied the brake. It was just in the nick of time, too. The curious part of it was that I hadn't heard or noticed the two long whistles before the short ones, but they must have been given."

Nothing was said for a few moments, and then Hamilton, with manifest uneasiness—

"Who was your sick friend, Miss Merrill?"

The girl looked at him swiftly, and noted his agitation.

"Helen, but she's some better this morning."

"Ah."

"She called your name several times."

"She did?"

"Yes, sir, and—"

Hamilton hurried to the rack and hastily putting on his hat and coat started for the door.

"You are going out?"

"Yes—yes, and I'll be there all day—if she'll let me."

"She will, sir—I'm sure," returned Miss Merrill earnestly. "But about this letter to the superintendent—"

"Oh, yes," returned Hamilton. "Tear it up!"

### Removing Knuckle Pins Endangers Pal's Welfare

**T**HE first impulse many of us have when we want a knuckle pin for a train we are making up, is to go to another car and take it. Then perhaps, our best friend, a pal, in fact, will have occasion to couple this car. It usually happens that the knuckle falls and another employe is severely injured.

It is anything but a pleasant sensation to have a heavy knuckle fall

upon one's foot. A brakeman on the Baltimore Terminal Division recently spent six weeks in solitude and pain because a fellow brakeman had removed a knuckle pin to save a minute or so of time and forgot to report the matter to car inspectors.

It is so easy to prevent this kind of accident, and, perhaps, save from injury a pal. He would do the same for you. If it is absolutely necessary to remove the pin, place the knuckle securely on the sill of the car and the brakeman who has to handle that car will see it there and use care not to allow it to fall upon him. It is even better to report the matter to a car inspector and let him make repairs before another employe comes along and gets in the way of danger.

Let's make this resolution: "I'll never take a knuckle pin from a car without making sure that no one will be injured."

At ninety miles  
Drove Edward Shawn,  
The motor stopped,  
But Ed went on.

### Crossing Watchman Shipley of K. & I. T. R. R. "Talks Turkey" on Crossing Accidents

Some time ago President Markham of the Illinois Central issued a circular on the question of accidents at grade crossings. It was published in the Louisville (Ky.) Herald, where it came to the attention of Charles Shipley, watchman at the Catalpa and Magnolia crossing, Kentucky & Indiana Terminal R. R., who wrote Mr. Markham as follows:

"I saw your article in the Louisville Herald of recent date, re'grade crossings.

"Railroad crossings are not dangerous. As a river flows down the bed of the stream, so the train runs on the rail bed. It's the public that is dangerous, mostly with the idea that they can beat it—can cross the track ahead of the train. Mostly they do. When they don't, then the avoidable accident. Flagmen may sometimes be negligent, and signal bells are at times out of commission. But trains have a certain time to make their destination, they have numerous crossings to go over and must keep moving to do so, whereas the public may have only one crossing. It's not the fault of the train if some one gets in front of it. The only prevention of accidents is to stop, look and listen. So easy.

"The press should do the right thing with the right kind of publicity, by showing the public that these accidents are caused by their own carelessness and stupidity, and by letting them see that they run in front of the train, not that the train runs them down. They say that a man hangs himself with a rope, not that the rope hangs the man. It's the public's risk, and if they will just think, accidents will not occur."

To this Mr. Markham replied:

"My dear Mr. Shipley:

"I am indebted to you for one of the best letters I have received in reply to my public discussion of the grade crossing problem. I am taking the liberty of sending a copy of this letter to the president of your company. I think he will appreciate it."

## The Light That Does Not Fail

*One of a Series by Life Extension Institute Containing the Latest and the Most Scientific Information on Healthful Living and the Prevention of Disease*

**S**PEEDING towards the earth at the stupendous rate of 186,000 miles a second, the Sunshine Express makes the distance from the great central power house of the solar system to the earth in about 8 minutes. This Sunshine Express brings rays without which we could not live. If there should be a strike on that road, the living world would quickly disappear.

Sunlight is truly the dominant factor in human affairs. The coal that we are becoming apprehensive about as to next winter's supply has been well described as imprisoned sunlight. Nature, prodigal in many ways, creating millions of organisms that thousands may live, is in other ways very thrifty. These beds of coal which she laid down millions of years ago are merely carbonized vegetation which originally grew through the action of sunlight on its green coloring matter. The glittering diamond that adorns Milady's neck is simply another form of carbon, and the flush of her cheeks (in the rare instances when it is natural) is due to sunlight.

Sunshine has always held a high reputation in health circles, but lately more definite reasons for this faith in sunlight has been found through the study of its action in the prevention and cure of rickets, a disease characterized by faulty bone formation in the growing child. Inspired by these thoughts we may say that:

The light that makes our precious stones  
Builds up our precious babies' bones;  
It paints the human lily's face  
And puts red blood into the race.

Until quite recently rickets was a medical mystery. Medical authorities differed as to its probable cause:

some inclined to the belief that it was due to faulty hygiene, to poor ventilation, lack of exercise and sunshine, and overcrowding; others inclined to the belief that it was solely due to a dietetic deficiency, lack of mineral or vitamin constituent in the food. Recent evidence would indicate that these combined factors may be at work causing this disease. A number of investigators have found that cod liver oil would prevent and cure rickets, and this gave color to the belief that disease was caused solely by a specific food deficiency. This belief was further strengthened by Professor McCollum's researches, showing a fourth vitamin apparently present in cod liver oil which has the power to prevent and cure rickets.

On the other hand, Drs. Hess, Unger, Pappenheimer, Powers and Park, also conscious of the value of cod liver oil in this way, have made a careful study of the influence of sunlight in the prevention and cure of rickets,

and have pretty conclusively shown that adequate exposure to sunlight supplies an influence that makes good a deficiency of anti-rachitic vitamin. Dr. Hess in his Cutter Lecture at the Harvard Medical School, February 15, 1922, discussing this interesting question, called attention to the fact that in the course of a study of the value of cod liver oil in a negro district in New York City it was found that the majority of breast fed infants and almost all the bottle fed infants showed clinical signs of rickets. He suggests that the pigmentation of the skin is an important factor in these cases, and that the widespread prevalence of rickets among negroes, and its greater frequency among the southern Italian, the Syrian and other southern races that are dark-skinned, is due to the fact that they are more susceptible to the deficiency of sunlight. It cannot be denied that dwellers in these districts where rickets prevails suffer from lack of sunlight, whatever may be their dietetic deficiency. It is a significant fact that all the children in these districts, who are on a similar diet, do not develop rickets; and it seems entirely reasonable to conclude that the supply of sunlight and the degree of pigmentation of the skin are important factors in developing this condition. In combatting these conditions, therefore, it is wise to see that the babies have as much sunlight as possible in addition to supplying proper diet. Among the negro population it would be wise to give cod liver oil as a specific preventive.

If sunlight can exert such a powerful influence over the growth of bone and can prevent or cure such a serious condition as rickets, we are justified in emphasizing its importance in the possible prevention and cure of other chronic conditions, such as

tuberculosis, faulty nutrition, chronic joint changes, and neuritis. It is reasonable to conclude that a sun-bath can materially contribute to the well-being of average people who do not suffer from any particular complaint. The sun-bath, like the air-bath which we have often advocated, should be more generally employed as a hygienic measure.

A striking feature of the experiments on the efficacy of light in rickets is the fact that the whole body is benefited by the exposure of only a portion of it to sunlight. In taking sun-baths, as in taking air-baths, common sense must be exercised. It is well to protect the eyes and the head. Shade the eyes from the glare of the sun and its reflection from the sand or the surface of the water. It is also well not to expose the head to the direct rays of the sun during the

extreme hot weather. The monkey, adapted to the heat of the tropics, will perish very quickly if exposed continuously to the direct rays of the tropic sun. Bearing these cautions in mind, the daily exposure of as much as possible of the surface of the body to the direct rays of the sun, for as long a period as convenient, not of course to the point of blistering or extreme sunburn, is a health-giving measure that should be more widely employed. The first exposures may be brief—for a few minutes—and then increased to half an hour.

As in the case of all hygienic measures, however, this should not be regarded as a "cure-all," and it should not deter any person who is ill from having a critical search made for such important original causes of disease as infection, poison or food deficiency.

give him a fair chance to make something of himself in life, since he will attack his school work with renewed vigor and ambition.

It will materially lower the per capita cost of education as all teachers know that much time is wasted in repeating and drilling for the sake of the defective child, the whole class being thus retarded.

It will greatly increase the efficiency of the child himself and thus make him of more value to himself and to his community.

Don't neglect your plain duty to your children. Let the child's necessity be the guide. Give it every chance to become a happy, prosperous citizen, even though it is necessary for him to wear glasses.

## Parents—Don't Permit Your Children to be Handicapped by Poor Eyes!

*Here is a Typical Schoolroom Scene*

"TOM, you may read next." Tom, an overgrown boy two or three years older than the other children in his grade, rose awkwardly to his feet. The teacher turned to her visitor with a shrug which expressed her utter despair of Tom and his ability to read. She said in a whisper, "I think he's just plain dumb."

*An overgrown boy rose awkwardly to his feet*

Tom has been in this grade now for two years and he can't read a bit better now than when he came in. Listen to him." Tom was bent away over his book, peering at the print, studying out the words one by one. The teacher interrupted his hesitations with a sharp, "That will do, sit down!"

Then she turned to her visitor with resignation in her entire bearing, "What would you do with a hopeless boy like that?"

"Have his eyes examined," the answer came.

"Why, I never thought of that!" gasped the teacher. And then with the thought came various recollections of Tom as he sat in his seat crushed down over his book, and of her sharp admonitions to sit up straight; of his utter failure to copy problems written on the board, of his inability to learn, which came not

from the lack of trying but from what she had termed "dumbness."

The teacher visited Tom's mother and father. After considerable persuasion they at last consented to take the boy to a specialist. He was found to be suffering from astigmatism and near-sightedness which caused the words on the printed page to double and dance before his eyes. A pair of glasses corrected the difficulty and Tom returned to school now able to see as well as any other boy.

Careful examination of the eyes of children in our public schools today reveals the fact that many of them are suffering from defective or undeveloped eyes or from eye strain. Thousands of children drop out of school annually because defective vision will not permit them to keep pace with their fellows, and these thousands go out to join the vast army of "misfits." They find it hard to concentrate their attention, their heads tire quickly when they try to think, they are nervous and irritable. All this impairs their efficiency, sending their earning power far below what it ought to be.

The correction of defective vision in such children will benefit all concerned. It will put many a child on his feet, relieve him on the road to success. It will

## Always a Good Word for the Savings Feature

NEWARK, OHIO

September 18, 1921

MR. W. J. DUDLEY  
Supt., Relief Department

Dear Sir:—Fire insurance policies, abstract of title, and several tax receipts received. While I am glad to have the loan paid out and be out of debt, I can only have the highest regard for the Building and Loan plan of the Baltimore and Ohio Railroad, as there is none better for an employe of the Company. Any time that I can say a good word for it I will be very glad to do so. If at any time I can see my way clear to buy another property I will be glad to make application for another loan. Thanking you, I am, yours very truly,  
(Signed) JOHN R. MEANOR, Conductor

## An Easy Method to Secure a Home

McMechen, W. Va.,

Mr. W. J. Dudley June 9, 1922  
Supt., Relief Department  
Baltimore, Md.

Dear Sir:

I received papers in connection with my loan in a prompt and efficient manner. I am at a loss to know why there aren't more employes that take advantage of this feature in securing a home, as it is a very easy method and convenient to all.

Very respectfully,

(Signed) W. H. Peel,  
Engineman, Benwood, W. Va

*The teacher visited Tom's Mother*

### Shavings

An attractive price on an attractive cedar chest in a store window in Baltimore was recently persuasive enough to cause the transfer of some cash from my pocket to that of the store owner, and of the cedar chest from his store to my home. The major fraction of our partnership in the home was good enough to say that the chest was nice but the surprise much nicer.

It is inside the chest itself, however, that my story begins, for when I opened it I discovered a paper bag which was full of fragrant cedar shavings. On the bag was a printed statement that the manufacturer was glad to give the shavings as an evidence of his good will and that they would be found useful in providing additional protection against moths if sprinkled among the clothes.

I do not know anything which illustrates better how business organizations can earn the good will of their customers. The shavings cost the manufacturer not more than a copper or two at the most but what a multiplied impression of great good will they make on the buyer!

The duties attaching to the positions which most of us hold are pretty well defined. We are told the hours for starting and stopping work and the time allowed for lunch. We are advised that this is our pile of work or that this is the amount of progress we are expected to make in a day, etc. What we do beyond these specified and expected duties is the amount of good will which we are showing toward our employer and those whom he serves.

There may be a few positions on the Railroad where too much is expected of the worker. My observation has been that there are few of these, however, and that there is ample opportunity for most of us to do more than we are expected to do and that without transgressing on our own time or privileges. The reason that some of us do not do this extra bit is because we haven't yet come to realize the abiding truth that it helps us as well as those we work for and those whom we serve.

The train service man affords the best illustration because there is the widest latitude in his job for the exercise of that very tangible but unpurchaseable thing

called "good will." The conductor can work his train like an automaton—efficiently, courteously and well. But the superior conductor can add that bit of humanity to his job, which makes him a friend of every person on the train instead of just a uniformed representative of the Company. We have many such conductors and every passenger who comes in contact with them has felt that persuasive and pleasing influence of friendliness which the Baltimore and Ohio is trying to hold out to all of its passengers and shippers.

The manufacturer who first saw in the pile of valueless cedar shavings in his factory, paper packages containing an unlimited amount of good will—fragrant, penetrating, useful and lasting—was a genius and deserves all the good will which his idea will bring him. And it is worth while remembering that there is the opportunity for each one of us to pack into every bit of work we do a fragrant and friendly evidence of our good will, the recollection of which will last as long as does the fragrance of the cedar shavings.

### Baltimore and Ohio Courtesy

Baltimore, Md.

August 8, 1922

To the Editor:

Last Sunday morning as the Frederick Accommodation was gliding along, a colored woman was observed running towards Monumental. She was about half way between Landsdowne and Monumental stations. Our mental comment was "No use to run, you will never get this train." But we were mistaken, for while we passed her and reached the station some minutes ahead of her the conductor, having observed her, courteously waited.

Three results were plainly evident: the passengers were amused; the woman was tickled to death; and the Company enriched by a 90 cent fare and something more.

Passenger Observer

### Holding the Pace

Several months ago our electrical engineer, J. H. Davis, reminded us that the decoration which appeared at the top of the editorial page was hardly in keeping with the Baltimore and Ohio's reputation of being strictly up to date; that the Editor's Turntable was operated by hand and, as such, was entirely obsolete. We trust that the new decoration will have the unqualified approval of the modernists!

### A Treat

Every once in a while the writer is delighted to find a contribution on his desk, submitted by an employe and 'way above the ordinary in interest. One man in particular has had something worth while to say so often that it seemed a pity to hide his contributions in the departmental notes that he sent in monthly. Hence the frequency of the featured little articles credited to John Newman, terminal timekeeper at Pier 22, New York. And now, after overriding his strenuous objections, we are pleased to announce that every now and then we will publish a whole page of his characteristic comment, the initial installment awaiting you on the next page.

It is a poor paper or magazine nowadays that hasn't at least one "collyumnist," and we will back ours against the field!

# Homilies of the Hudson

## The Vanishing Point

It is related that when the railroad from St. Petersburg (now Petrograd) to Moscow, a distance of some five hundred miles, was contemplated, some divergences of opinion among the czar's engineers as to the most desirable route caused the czar, Nicholas II, to settle the matter by taking a ruler and connecting the two terminal points with a straight pencil line. "There," he decreed, "is your route." And though the cost in overcoming obstacles that could have been avoided by making circuits was enormous, the road was constructed as decreed.

And the story goes on to say that when the road was completed the czar in person visited the grand terminal depot in St. Petersburg and, viewing the straight line of track, called the chief engineer's attention to the rails' not being parallel; "they were closing in and the track was getting narrower in the distance." Being told that it was due to perspective he objected to the perspective and decreed that it be removed forthwith. Further the story sayeth not.

The anecdote was recalled by one of the views in the MAGAZINE, showing a stretch of straight track with the rails converging to a point at the horizon. This point in a picture is called the "vanishing point." Looking at the MAGAZINE picture we imagined a man walking towards that point as his objective, yet never nearing it; finding at the end of each day, as at its beginning, the point still at the horizon. Yet each morning, with fresh hope and vigor he resumed his walk, until finally the fast express, bound for beyond, picked him up on the cowcatcher and carried him to his destination, the "vanishing point."

The force that urged the track-walker onward was AMBITION, the faculty that spurs a man to exert himself to gain that which he has set himself to gain. And, like the vanishing point, ambition remains beckoning in the distance. No matter how far a man has traveled on the road to success, he, like Alexander, cries for more. And this urge, ambition, though often misdirected and misapplied, is what keeps the wheels of the world greased and the world traveling toward some objective whereof we know nothing.....

P. S. When a man's ambition dies, the man himself becomes dead from his feet up, though he may breathe for a long time after that.

## The Price

What profits it a man to know Greek and Latin or to be versed in the realms of the abstruse if he does not, when necessity arises, know how to attach a button to his pantaloons? What is metaphysics good for anyway? Mental gymnastics to exercise and build up the mind. Maybe so, but like laboratory experiments in alchemy, or in search for the "elixir of life" and the "perpetuum mobile," metaphysics will result in nothing, take you nowhere and leave you aghast at your own audacity. The other "experiments" mentioned may not be entirely in vain as they may produce unlooked for results based on natural laws. Thinking of the unthinkable is vain and wasteful.

Whittier voices a desire to "search for the Truth, trying with uncertain key door by door of mystery" in order to learn "what the hieroglyphics mean of the unseen in

the seen, what it is that hides beneath birth and bloom and life and death." Somewhere among the heavens they have in a sacrosanct nook of a sacred temple, a curtained booth within which the inquirer that "wants to know," may have the troublesome questions presented by the poet quoted above, answered. The price for the information is—death; payment in advance.

\*\*\*\*\*

A Scotch blacksmith's definition of metaphysics was:—"When the party wha listens disna ken what the party wha speaks means, and when the party wha speaks disna ken what he means himself, that is metaphysics."

## Eight Left

Cats!—Once, not long ago, one of our clerks opening a desk drawer on a Monday morning, found the drawer full of cats; one big cat and a shovelful of little fellers. And a week or two ago Mike Mueller opened his safe on Monday morning, and saw the office cat emerge therefrom, wobbling like a drunkard, full of carbon monoxide and one ninth part dead. It left one of its nine lives and aliquid plus (pidgin Latin) in the safe. The administration of some first aid measures rendered it soon fit to resume its uselessness, with eight lives ahead of it.

## Two Triolets

1.

This kiss upon your fan I press  
 Ah! St. Nitouche, you don't refuse it,  
 And may it from its soft recess,  
 —This kiss upon your fan I press —  
 Be blown to you, a shy caress  
 By this white down, whene'er you use it.  
 This kiss upon your fan I press,  
 Ah! St. Nitouche, you don't refuse it.

—Harrison Robertson.

2.

I did not want to kiss the fan,  
 I only essayed to adjust it  
 While it at eighty cycles ran.  
 I did not want to kiss the fan  
 But turn its wind to fan my tan;  
 It bit my finger—and I 'cusst' it.  
 I did not want to kiss the fan  
 I only essayed to adjust it.

# Pressing Problems in Railway Accounting

By John J. Ekin, Comptroller

*Note: Mr. Ekin was president of the Railway Accounting Officers Association for the year which ended with their 34th Annual Meeting in Cleveland, Ohio, June 6-9, 1922. His address presented a clear and comprehensive picture of the situation which obtains in the Railway Accounting field today—the multiplication of work which it has been called upon to handle since the period of Federal Control began, the new conditions created by the Transportation Act, the defects in accounting methods, the plan for remedying them, etc. The presentation is frank, informative and interesting, and will prove enjoyable to our readers and to those in the Accounting Department in particular.*

After reviewing the work of the association for the past year, and thanking the committees and officers who had given him such loyal support, Mr. Ekin said:

**T**HERE never has been a period in the history of the railroads to compare with the last five years. The period of Federal Control and the subsequent period of readjustment have borne heavily on the Accounting Officer, and the end is not yet.

The Transportation Act, under which we are trying to work out our salvation, was passed February 28, 1920, and, in the masterly addresses delivered in 1920 and 1921, the many difficult problems growing out of the provisions of the Transportation Act were mentioned. Some of these problems are still with us and some new ones have been added.

The sharp decline in railroad traffic which commenced in the closing months of 1920, continued throughout 1921, and only recently have there been indications of a revival. This, and the fact that the Accounting Department had to carry on the work of stating the Federal, Guaranty Period and Corporate Accounts, as well as the new statistics required in enforcing the Act and furnishing the data for the special investigations and rate hearings, has made the life of the accounting officers anything but easy and pleasant.

The large increase in clerical forces and the expense thereof have been the subject of a great deal of discussion and criticism, and there has been apparently a tendency to attribute it all to accounting and statistical requirements, which is misleading for the reason that a large proportion of the forces now classified as clerical in the reports to the Interstate Commerce Commission, are not engaged in accounting and statistical work. This applies to forces in the general offices as well as on the line of road.

The Great War and Federal Control of railroads brought about many changes in accounting methods and practices. In 1917 the railroads had one set of accounts and books. Most of them now have three; Federal Control, Guaranty Period and Corporate, and this condition adds vastly to the expense of accounting by requiring separations between different interests, for both receipts and disbursements.

The accounts for the Federal Control and Guaranty Period are naturally subject to inspection and check, and the carriers, through their accounting departments, have

been required to prepare many detailed statements, which consume the time and attention of the most competent employees.

Since March 1, 1920, there have been almost constant Rate Hearings, both State and Interstate; there have been numerous investigations, for example: Hearings before the Committee on Interstate Commerce, United States Senate, and the Agricultural Inquiry; there have been continual Wage Hearings and the negotiations with employes; all of which have required the preparation of a large amount of detail data at a great expense on the part of the accounting and statistical forces.

Among the causes contributing to the cost of accounting today are changes in rates, complicated divisions, adjustments in wages of employes, and settlement of accounts with the Government covering Federal Control and Guaranty Periods. The stabilization of transportation rates and employes' wages, the use of simple divisions for apportioning revenues, and the settlement of Federal and Guaranty accounts will result in

a marked reduction in the cost of accounting.

I am optimistic, believing that a better day is dawning and that a better understanding of the railroad problem is being reached. In fact I am more hopeful of the railroad situation today than at any time in the past ten years.

It was President Roosevelt, in his address to Congress, December, 1901, over 20 years ago, who said: "It must not be forgotten that our railways are the arteries through which the commercial life blood of our nation flows. Nothing could be more foolish than the enactment of legislation which would unnecessarily interfere with the development and operation of the commercial agencies."

## Simplification of Accounts Needed

The Transportation Act, with the new elements it brings into play (for example, the Labor Board, the rate making provisions, the fixing of a rate of return on investment and the duty it places upon the Commission of seeing that the railroads are operated in an efficient and economical manner) has made it even more necessary than before that the factors entering into the cost of transportation be stated in a simple and direct manner.

Railroad transportation is the industry engaged in producing train miles and selling transportation, the product of these train miles, represented by passenger miles and ton miles. Talk as we may, the energies of a railroad are all centralized-concentrated on producing this result.

First, we must have the railroad and its equipment—this is where capital contributes its share; then we must have man power, separated into two groups, management and the rank and file—labor's con-

## Conductor J. A. Zepp Handles Trying Situation Admirably

By John J. Sell, Car Distributor, Cumberland

The writer would like to congratulate Conductor J. A. Zepp, in charge of Train 16, Cumberland to Baltimore, for the efficient manner in which he handled a very trying situation on Saturday evening, August 12. Some rowdies (an element which we as a Public Servant are sometimes compelled to carry) were very much in evidence on this train and when five of them crowded around an elderly lady and were making the ladies' coach everything that even a smoker should not be, Conductor Zepp informed them that unless such conduct immediately ceased the train would be stopped and the trouble makers ejected.

Not stopping at this, the Conductor secured another seat nearer the middle of the car and escorted the lady, meanwhile requesting the porter to transfer her luggage so that she would be perfectly at ease.

The writer interviewed the passenger in order to assure her that scenes of this nature are rare occasions on a Baltimore and Ohio Train. She answered "That must be true, as I have never seen a conductor anywhere more considerate." I further learned the lady had traveled quite a distance and was almost an absolute stranger to our Road. It is quite possible that had it not been for the appropriate action of Conductor Zepp, the Baltimore and Ohio would have been severely criticised by this passenger instead of her now feeling that our conductors are equal to any situation and constantly alert to the best interests of passengers.

tribution; and lastly, the materials and fuel, the joint contribution of capital and labor necessary for the maintenance and the operation of trains.

The cost—the expense of operating these trains—has its origin in very simple and direct objects. The time card for labor, which forms the basis of the payroll, or three-fifths of the total cost of operation, and the material order and fuel ticket for supplies and fuel consumed, which form practically all of the remaining two fifths of the expenses. So much for the outgo or expenses.

Now we turn to the income or receipts, and we find that they are based on equally simple and direct documents, the ticket and the freight bill.

### No Mystery in Railroad Accounting

There is no mystery in railroad accounting. It is simply auditing into the treasury the receipts from the sale of transportation through the medium of tickets and freight bills; and auditing out of the treasury, through the medium of time cards, material orders and service bills, the cost of producing this transportation as represented by labor, fuel and material and supplies.

The trouble and complications we have are largely of our own origin, for instance, expensive methods of timekeeping and distribution, antiquated methods for handling material accounts, and a too refined and extended classification for stating these simple elements of cost.

Again, on the income or revenue side we lack definite classification of commodities. We haven't clear and concise tariffs. We haven't in many instances simple and agreed-upon divisions for apportioning revenues, as a result of which many of the carriers have long standing items of adjustment in their interline accounts, and claim channels are choked with overcharge and other claims.

### Division of Revenue a Problem

It should be a simple operation to issue a bill of lading and way bill, move the shipment (carload or less carload) from point of origin to destination, and issue a freight bill for the transportation charges. I am sorry to say that the opposite is often the fact, and the journeys of many of these way bills might be compared with the wanderings of the Ancient Ulysses.

I am indebted to my friend Evans for a report of canvass made by the Local Freight Agents' Association of Chicago, during a recent month. The result is startling.

The total number of shipments delivered to connecting lines on local transfers, included in junction settlements during the month of February, 1922 was 202,120, and, mark you—the number of transfers cut down by connecting lines on account of disputed divisions was 36,644 or 18%. Almost one out of every five bills was a subject of dispute for divisions alone.

You who are familiar with the cost of handling corrections and claims appreciate what this means in increased clerks and expense at stations and in claim and accounting offices.

The subject of divisions has been presented to traffic officers and the executives, and I am glad to say that progress is being made in improving conditions. But a great work is still to be done—both as to rates and divisions.

The point I wish to bring out—to emphasize—is that it is not the higher accounting on which we need to lay stress, but we should look to our primary accounting, the detail work, and bend our efforts towards having it performed in a simple, direct and positive manner. It is the duty of this Association to see that this is done. It must be done in order that we, as accounting officers, in charge of one of the single largest groups of railroad employes, may do our part in having the railroads operated

in an efficient and economical manner. There is a crying need today in many instances for proper instruction of the forces now engaged in the detail work.

We must not forget that accounting regulations and requirements enter into the minutest details of railroad operations; into the timekeeper's work, the material clerk's work, the agent's work—both ticket and freight. There must be the closest co-operation between the traffic, operating and accounting officers, if the desired results in operating these vast properties are to be obtained.

When I speak of cooperation, it is the real thing I have in mind, as in a battle when every one has to stand shoulder to shoulder. So now it has become absolutely necessary in railroading to do likewise where the margin of safety so far as income is concerned has been reduced in many instances to the vanishing point.

The operating people are the "doers" of the work of transportation and we should join with them, be at their right hand in assisting them in every way possible.

The same should be true of our relations with the traffic department. Our real work is stating the results clearly and accurately, holding up the mirror so that those responsible may see a clear and true reflection of what has been accomplished.

And with this knowledge we should keep in the closest and friendliest touch with the traffic and operating officers, pointing out things that should be corrected and where improvements can be made.

This is the great work of the accounting officer, his great opportunity, the embracing of which has rendered his position so important and added so much to his prestige—the simple telling of the truth, not in a critical but in a helpful manner.

An eminent authority has said: "Railroad Management must have as its aid a system of accounts which becomes the eyes, the ears, the memory, and to a large extent, the analysis and the reasoning, of a successful administration."

As Professor Adams so aptly stated: "The accountant stands at the center of an organized industry; every transaction passes through his hands; every problem must receive the imprint of his mind, for it is he who supplies, in concrete form, the information upon which reliance must be placed for deciding administrative policies. No other single officer of a great industry is required by virtue of his official position to know as much of all operations in all departments as the accounting officer. This is the explanation of a very significant fact disclosed by the recent history of great industries: namely, that of the development of the bookkeeper into an executive officer. The modern railway accountant is no longer a clerk whose duty it is to keep records according to instructions received from others. On the contrary he has become a critic, responsible for detecting unnecessary wastes in operation, and for

## Dividends from a Three Cent Bone

By George Dobbin

Office of General Freight Claim Agent

In the corner of a wonderful garden there was a cozy resting place with an old and seasoned honeysuckle vine reaching its tendrils up and over it. From a tiny sprig planted months ago, there grew and bloomed a beautiful rose, attracting admiration and favorable comment. But slowly the honeysuckle roots sapped the strength of the rose bush and the foliage laden vines hid it from the sunshine. Season after season the beauty of the blossoms lessened until it became necessary to transplant it or let it wither and die.

This compares well with the enthusiasm which daily inspires special effort in someone, and the lack of encouragement which gradually reduces the desire to do more than is necessary, until we develop a so-called "groach." This mental attitude becomes habitual and contagious. The result is a sort of Jekyll and Hyde personality which forbids even the smile of common courtesy to a fellow-employee and sometimes forgets to change into a natural and companionable being after reaching home. An attitude of interest and encouragement toward each other will help the average human being do three dollars worth of work for one dollar paid as salary, for the same reason that makes us love a dog because he gives thirty dollars worth of appreciation for a three cent bone.

testing the efficiency of current administration. He is responsible, also, for exposing incompetence, whether of departments or of policies, and for pointing out those tendencies in the business world, the recognition of which is essential to the successful administration of a property. It is no accident, therefore, that the railway accountant of today is classed among the higher executive officials in the organization of American railways."

#### Refinements of Transportation are Expensive

The first thing we must realize is that there has been a radical change in social and economic conditions in this country and throughout the world. We have seen the development of telegraphy, the telephone, electricity for light and power, the automobile, good roads, refrigeration in transit, Pullman cars, and the numerous other inventions and devices which have contributed in making our social and economic life more complex.

This has had a tremendous influence on railroad operation and costs. There has been an increase in the volume of traffic as measured by passengers one mile and tons one mile, but the real increase is in the

expense measured by the expenditures to meet the demand for more ease and comfort, better dining cars and other features in passenger service, the highly specialized service in handling perishable freight, and the great increase per capita in small shipments of merchandise, all of which has added so much to the station, operating and accounting costs of the railroads.

The increased demand for transportation in a refined, instead of what may be termed a raw state, has been one of the principal factors in producing the increase in overhead expense, made up largely in wages paid clerical forces.

It should be remembered that it requires the same outlay, probably more, to bill, collect and account for a shipment of 50 pounds merchandise, as it does to bill, collect and account for 50 tons of coal handled as a carload.

It is for this reason that I urge that we get back to first principles, start at the beginning in this transportation game and see how we can best account for these millions of transactions which produce our revenues, and the equally numerous transactions which constitute our expenses.

The real problem, from an accounting standpoint, is not one of handling the income account, the profit and loss account, and the balance sheet, but a simple, uniform, direct and efficient method of verifying and stating the millions of items that compose the receipts from, and the cost of, transportation.

#### Uniformity and Economy in Accounting

As an aid to uniformity and in producing economy I would suggest—

1. A plan of arbitration be put into effect for settling disputes relating to divisions of joint rates, a plan similar to that now in effect for settling disputes between carriers relating to apportionment of loss and damage and overcharge claims.

2. The carriers should develop and put into effect standard methods for accounting for passenger and freight receipts, both local and interline. This should embrace practice in making and handling way bills, station forms and methods, reporting by agents, and settlements as between carriers.

3. Carriers should develop and put into effect standard methods of timekeeping, material accounting and stating of disbursements.

## Can You Find Our Operating Vice President, Mr. Galloway, in This Picture?

*He Celebrated His Thirty Ninth Anniversary with the Company on August 23*

This picture reminds us of some of those now running in our daily papers entitled, "Do You Remember Way Back When——?" There are many of our Baltimore and Ohio folks who will remember "Way Back When" this jolly group of eighteen-ninety-fivers took a trip to Natura Bridge, Virginia, and who will be able to identify nearly all of the employes represented here.

The photograph itself was loaned to the Magazine by C. J. Gillespie, clerk to general foreman, Camden Station, Baltimore.

Read: g left to right we find:

Front row: E. W. Day, then secretary to the superintendent of telegraph, now the assistant superintendent in that department; R. L. Showacre, then a clerk, now manager of Mt. Clare Stockyards; Carson Smith, then of the Dining Car Department, Baltimore, now in the same department, Pittsburgh; "Bun" Oneon, then clerk, Dining Car Department; Walter Galloway (brother of our operating vice president), then messenger boy; Mr. Baker, then timekeeper, now in the Post Office at Baltimore; next man not known.

Second row: William Post, then claim agent; Robert White, then chief clerk to the superintendent; Frank Gallagher, clerk, Transportation Department; Oswald Baynes, then claim agent; W. T. Moore, then chief clerk to agent, Locust Point, now assistant to general freight traffic manager; Mr. Clark, clerk, Auditor's Office; J. B. Duval, then of Car Record Office; next man not known; Ed. Ke'ley, then train dispatcher; Ernest E. Brewer, then superintendent Dining Car Department, now agent at Curtis Bay; George Howath, then chief clerk to the auditor of disbursements, now deceased; C. McCahan, then chief claim agent; William F. Iden, then clerk to superintendent; Charles Gillespie, then secretary to the agent, Camden Station.

Third row: D. F. Maroney, then superintendent of transportation; next man not known; Harry Biden, then in the office of general superintendent.

Fourth row: First man not known; Howard "Blacksmith Pie" Valentine, chef to the general manager; Operating Vice President Galloway, then secretary to Superintendent of Transportation D. F. Maroney; next man not known; J. A. McCaghey, then clerk, Transportation Department, now special representative

4. The Interstate Commerce Commission, working jointly with this Association, should revise the Classifications. The work, as you know, is already under way with respect to operating expenses, and it is highly important that this classification be completed and put into effect January 1, 1923. I consider this the foundation of all of our construction work.

The revision of the Disbursement Classification should be approached in the light of present conditions prevailing under the Transportation Act. The accounts should afford a prompt and accurate method of controlling expenses represented by disbursements for labor, fuel and material, and the classification should directly reflect those elements.

The nearer we can have the disbursement accounts show the current expenditures for labor-payrolls, fuel, and material and supplies, the more useful the accounts will become as a check and record of these items of cost, and I strongly urge that the revised classification should show separately, with as few accounts as possible, the direct items of expense for labor, fuel, material and miscellaneous, the aggregate of which constitutes the cost of maintaining and operating the railroad properties. This fact was very forcibly impressed on me

through the requirements of the Interstate Commerce Commission in the recent Rate Hearings, the Senate Investigation, and in the preparation of data for submission to the United States Railroad Labor Board.

There should be a decided reduction, instead of an expansion, in the number of accounts. It is not a refinement and further extension of the Classification that is desired. The accounts, as few in number as possible, should be constructed so that a distribution can be made from the details of timekeeping, material disbursements, etc., with the least amount of additional expense. The thought is that with the proper timekeeping records and material and fuel disbursements, a direct classification can be made in relatively few accounts, showing separately the expenditures for labor, fuel, material and miscellaneous, under the general headings of  
Management  
Maintenance, and  
Operation.

The revised classification for disbursements should apply to each and every common carrier railroad without respect to its class or size.

5. The Interstate Commerce Commission and all other Federal and State Commissions should revise their reports and

statistical requirements as as to conform with the summaries regularly prepared from detail records, in conformity with the revised classification, and should be confined to the annual report, monthly income account and the standard statistical units of comparison developed for each road.

The annual reports to the Commission, to the states, and to the stockholders, should be harmonized so that one form will answer the requirements of all.

The situation with respect to statistics has reached that point where it seems to me desirable that this Association of Accounting Officers, cooperating with representatives of the Interstate Commerce Commission, should formulate a system of statistics that may be generally used by the individual carriers, the summaries to be furnished the Commission for its information and as a guide in determining whether the properties are being operated in an efficient and economical manner.

The statistics required by the Interstate Commerce Commission and the State and Federal bodies should be on a basis of maximum of essential operating data, with a minimum of detail.

The object of statistics is to establish facts. Let us not waste our energies in the preparation of a lot of useless, meaningless

### When Using Telephone, Please—

Always say "Baltimore and Ohio." Never say "B. & O."

Speak close to the mouthpiece in a clear tone.

If necessary to attract operator's attention, move the hook up and down slowly. A rapid movement does not signal her.

Answer calls as promptly as you would like yours answered.

Call by number invariably and always know the number; do not guess.

In answering, identify your department and yourself, as: "Mr. Blank's office, Mr. Jones speaking."

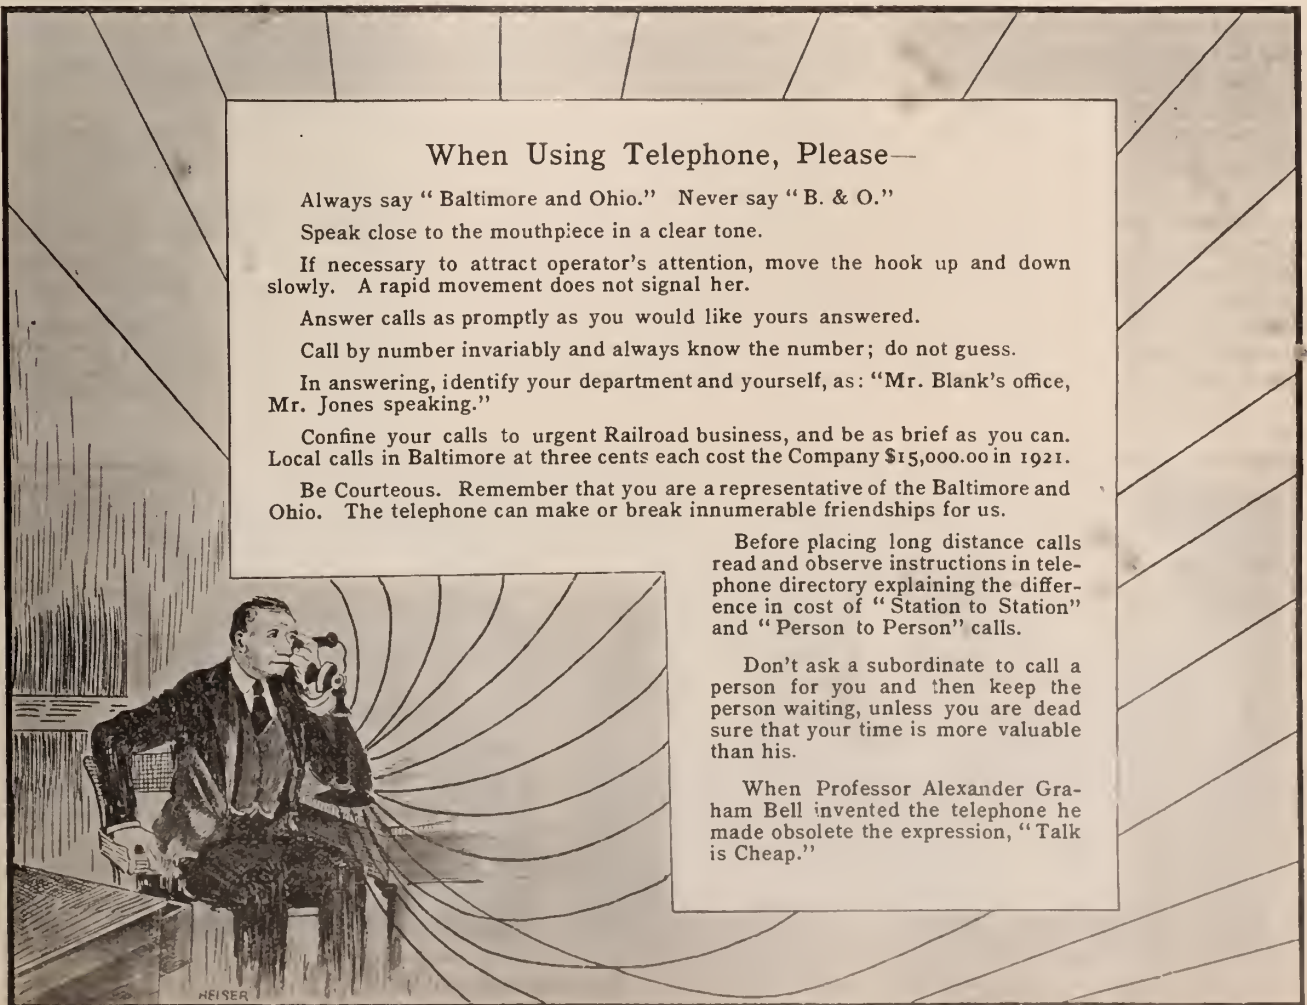

Confine your calls to urgent Railroad business, and be as brief as you can. Local calls in Baltimore at three cents each cost the Company \$15,000.00 in 1921.

Be Courteous. Remember that you are a representative of the Baltimore and Ohio. The telephone can make or break innumerable friendships for us.

Before placing long distance calls read and observe instructions in telephone directory explaining the difference in cost of "Station to Station" and "Person to Person" calls.

Don't ask a subordinate to call a person for you and then keep the person waiting, unless you are dead sure that your time is more valuable than his.

When Professor Alexander Graham Bell invented the telephone he made obsolete the expression, "Talk is Cheap."

statistics, compiled at great expense, which cannot be utilized in producing results that will add one penny to the net revenue or be the means of improving the service.

I have conferred with Commissioner Potter and know how much in earnest he is in regard to this subject.

A working basis has been established with the Interstate Commerce Commission for the purpose of solving this problem. It remains for the railroads to get together and adopt the best methods in handling the details of accounting, discontinuing anything of questionable value now prepared, and eliminating the numerous disputes and sources of expense, caused by lack of proper through rates and properly constructed divisions for apportioning revenue.

Let us finish as quickly as possible the work of settling the accounts for Federal Control and Guaranty Period operation, and then declare perpetual holiday in the production of useless statistics and reports.

The final feature in the object of this Association as set forth in the Constitution reads, "For benefitting of railways in every proper way that comes within the scope of such an association."

This provides a broad field for activity. To stand still is to retreat. It is the same with men as it is with races. When Caesar Augustus said "Rome is great enough—here we rest," he merely meant that he had reached his limit and had had enough of road building. There was lime in the bones of the boss. At the boundaries of the Empire and the end of each Roman road he set up a statue of the god Terminus.

This god Terminus supplied the world, especially the railroad world, a word. When Augustus set up his Termini, announcing to all mankind that this was the limit, the enemies of Rome took courage and became active. The Goths and Vandals, the barbarians, some of whom evidently had a sense of humor, had a way of picking up the Termini and carrying them inward and finally they smashed them entirely.

Mme. Marguerita Sylva, prima donna soprano, and the Mersereaux sisters of Movie fame enjoyed their trip from New York to Baltimore for the Fashion Show, via the Best and Only

The foregoing came to mind while reading some of the records of the Association, particularly of 1907. Time has completely proved how far from the mark was the opinion of those, who at that time, believed the work of the Association had been completed.

I have the greatest respect, nay reverence, for what has been accomplished by this Association in the past, and I am thoroughly in accord with the thought so ably expressed, that we should hasten slowly in making changes. But I firmly believe we now have in our grasp the greatest opportunity ever offered to do constructive work in revising our detail practices at home and in working out with representatives of the Interstate Commerce Commission a revision of the existing classifications and statistical requirements.

This Association must not stand still, must not retreat. The past is secure. The foundation is solid and broad enough to continue to build upon it any structure required by the present or the future. Let us be true to our ideals, continuing the work which has already accomplished such great and lasting benefits, not only for ourselves, but for the railroads and our country. Let us be filled with the spirit of the true pioneer, ever advancing, developing our powers for service and carrying forward the banner of progress.

In the words of Edward Everett Hale, the Grand Old Man of the Nineteenth Century.

"Look up, and not down;  
Look out, and not in;  
Look forward, and not back;  
Lend a hand."

## The Code of Success for the Office Man

By C. A. STULTZ

Freight Claim Adjuster, Chicago

1. Think!
2. Keep your mind on the race, and don't talk shop and scandal.
3. Don't wait to be told to do a certain thing—DO IT! If you don't know your line, learn it.
4. Keep your desk clean and in order.
5. Keep your records up-to-date. Put off nothing until tomorrow.
6. Write your letters uniformly—use your brains as well as your tongue and fingers.
7. Never allow yourself to be reminded of anything the second time—strive to avoid the first time.
8. Remember that you are employed on a 100 per cent. basis, that every dollar you receive contains 100 cents, and that if your service is not 100 per cent. you are defrauding your employer.
9. Keep your appearance neat—but within your income—and remember that your brain power is often measured by the clothes you wear.
10. Be honest with yourself, and your employer will never mistake your value or misplace his confidence in you. Your success will be measured by the confidence you command from others.

TELL-TALE SMILES AFTER A RIDE ON THE BALTIMORE AND OHIO

A few of the models who appeared in the Fashion Show pageant in Baltimore during August. Most of the "show girls" used the Best and Only. The acting mayor of Baltimore, Howard Bryant, is naturally pleased being in the centre of such a group

## Weiant Gardens—Growers of Greenhouse Vegetables, Newark, Ohio

An interesting "quality" industry which gives the Baltimore and Ohio a large annual business

By B. A. Oatman, Office of Master Mechanic, Newark, Ohio

**A**T Weiant, Ohio, four miles east of Newark on the line of the Baltimore and Ohio, are the Weiant Gardens. Owned by Warren S. Weiant and Son, this industry is a good illustration of the success which can be attained by putting only a one grade product on the market, and that the very best. The main products of this concern are hothouse cucumbers, lettuce and tomatoes, grown in two large houses,

each covering one acre of ground, and five acres of smaller houses.

### Fifty Miles of Pipe for Heat and Water

It might be of interest to know that it requires about 50 miles of pipe to heat and water these houses. Cucumbers are trained upright on stakes, then overhead on wire trellis. This network of wire amounts to 75 miles.

The entire plant is watered with overhead sprinkler system, water being obtained from a filtration plant in the Licking River at the rate of 300 gallons per minute.

### The New Power Plant

The power plant which was recently installed is the most up to date automatic steam plant of any in the country, it not being necessary to shovel either coal or ashes. Drafts, stokers and water supply are all handled automatically. This plant has a capacity 3000 h. p., of which 1500 is installed. All of the water used in the boilers is softened and purified so that no scale forms in the boiler tubes.

An average of 110 cars of freight are received over the Baltimore and Ohio at this plant each year on its own siding and coal tipple. The output is mostly shipped by express, which totals over 1,000,000 pounds annually.

Lettuce of the leaf variety is grown from September until May; cucumbers from December until August, and tomatoes from October until January.

This firm has built up a reputation upon the excellent quality of its products and methods of packing. None but new containers are used, with attractive labels. Their products are widely known, goods being distributed throughout eleven states.

They take pleasure in having visitors go through their plant, and it is a treat to those who are unaccustomed to seeing vegetables grown under glass.

### Praise for Agent Coffman

WASHINGTON, D. C.

July 13, 1922

MR. R. B. WHITE  
General Superintendent  
Baltimore & Ohio R. R.  
Baltimore, Md.

Dear Sir—Recently there was held at the Catholic University, Washington, D. C., a large convention of the Catholic Hospital Association of the United States and Canada, with about seven hundred delegates attending. In connection with the convention was held a commercial exhibit of hospital supplies, equipment, machinery etc., with about sixty five firms exhibiting. This involved the handling of a very large amount of freight through University Station, D. C., and its handling under somewhat trying conditions. The writer was in charge of all local arrangements for the convention and exhibit.

I suppose you get complaints from time to time, but it seems to me only fair to register commendations as well. And the present letter, written entirely at the writer's initiative, is sent to commend in special manner, the handling by the Baltimore and Ohio of the freight and of the exhibit, and particularly the unfailing courtesy, co-operation, and efficiency shown throughout by your representative here at University Station, Mr. Coffman. The inrush especially on the two or three days preceding the convention, and the outgo at the conclusion thereof, put a severe strain on the facilities of the station and on the good temper of the agent. He handled his problem with uniform smoothness, good nature, and obligingness. And we wish to express our appreciation thereof.

Very truly yours,

(Sgd) REV. JOHN M. COOPER

Weiant Gardens—An Interesting Industry along the lines of the Baltimore and Ohio. The new power plant on the left is ultra-modern. It takes fifty miles of pipe to heat the hothouses shown at the right

Auditor of Disbursements

Note:

All puzzles published in this department will be defined, as far as possible, from the New Standard Dictionary, edition of 1920. It is permissible to use both geographical and biographical words in the construction of puzzles, but when such words are taken from any authority other than the New Standard Dictionary, the name of such authority must be stated at the end of the definition, in parenthesis. Obsolete words will be marked at the end of the definition thus—"obs". Variant spellings of a word must be marked at the end of the definition thus—"var". Address all communications concerning this department to G. H. Pryor, Room 800, Baltimore and Ohio Building, Baltimore, Maryland, and mark the envelope "Puzzles."

Correct solutions were received from the following: John C. Svec, Grace M. Manning, W. E. Madden, W. T. Ahrens, Comrade, Primrose, Pearlle Glenn, L. M. N. Terry, Martelia, The Major, Atlas, L. E. Phant, Baltimore, Md.; C. Saw, Tunste, New York, N. Y.; Poly, Gemini, Brooklyn,

NEW PUZZLES

1. CURTAILMENT AND BEHEADMENT (6)  
Colonial dames oft played my WHOLE  
With fingers spry;  
Its sweet, clear music soothed the soul  
In days gone by.  
Curtail my WHOLE; TWO is a thorn,  
Sharp, thin, and long;  
Behead this TWO and do not mourn—  
THREE'S just as strong;  
For THREE'S cut down from houses neat  
For you and me.  
Once more curtail this work complete—  
Perhaps you'll see  
A tiny help to one and all:  
Our useful FOUR.  
It has a point, its head is small;  
Yet without gore  
Let us behead it, and in FIVE reveal  
A preposition.  
Thru our curtailment you must feel  
Our disposition.  
How we did trim, and prune and maul  
WHOLE into pieces;  
Naught will remain, say SIX, at all  
Unless this ceases!  
Cincinnati, Ohio. Wick-o-cincy
2. RHOMBOID REVERSED

Across:

- 1—The gate of a mold.
- 2—The relation of one thing to another; proportion.
- 3—An elegant room.
- 4—The name of a city in Georgia.
- 5—A kind of chair.

Down:

- 1—A letter.
- 2—To proceed.
- 3—A loud noise.
- 4—The name of an English college.
- 5—The claws of a bird of prey.
- 6—A word meaning worthless.
- 7—Sorrowful.

**Prize Winners—June Issue**

John C Svec  
Auditor Disbursements' Office  
Baltimore, Md.

P. M. Pennington  
Crossing Watchman  
Polk St., Cumberland, Md.

Miss E. M. Graveson, (Gem)  
Passenger Traffic Department  
43 Carew Bldg., Cincinnati, Ohio

W. T. Ahrens  
Auditor Disbursements' Office  
Baltimore, Md.

8—In Grammar, the dative of I.  
9—A letter.  
Baltimore, Md. Grace M. Manning

3. CHARADE (9)  
Oft beneath the stately maples,  
Safely sheltered from the sun,  
Feeling need of relaxation,  
Fain wouldst I peruse my ONE.

When Dame Nature loud is calling,  
And all the sky is azure blue.  
Work to me is then most galling,  
So from a hook there dangles TWO.

If, when in quest of broader knowledge,  
A library room shall be thy goal,  
Within, with tomes outspread before  
them,  
Most any day you'll see my WHOLE.  
Philadelphia, Pa. Thomas S. Comer

4. DIAMOND  
1—A letter.  
2—In law, a thing or things, real or personal.  
3—Bundles.  
4—To emit or send out in rays, from a point or surface.  
5—In the metric system, one tenth of a stere.  
6—A white crystalline compound with an intense fecal odor.  
7—In archeology, an upright slat or tablet of stone, often elaborately sculptured.  
8—Before.  
9—A letter.  
New Florence, Pa. Helva Goodman

5. TRANSPOSITION (6)  
Young Snappity-Snap came slappity-slap  
A-sliding down the cellar door;  
With a flippity-flop made a hippity-hop  
When a PRIMAL of wood his breeches  
tore.  
  
The tailor FINAL did demand,  
In voice most loud but not so grand,  
To sew the breeches so ma ne'er  
Would ever find there'd been a tear.  
  
Then sniffity-sniff came swiftity-swift,  
Because of FINAL he had none.  
A clappity-clap young Snappity-Snap  
To tell his ma went home on a run.  
  
His mamma laid him o'er a chair  
And paddled him right on the tear  
His breeches rent, until he cried  
No more he down a door would slide.  
Bangor, Pa. Jack O'Lantern

6. OCTAGON  
1—One of the spirits, demons or genii worshipped in Burmah and Siam.  
2—Wet or boggy groves.  
3—To tell.  
4—The act of arriving.  
5—Toil.  
6—To discolor.  
7—A measure of length.  
Washington, D. C. Nypho

7. MUTATION  
(To the great Baltimore and Ohio R. R. Family)  
We work each day, and 'tis with pride,  
For over all he is our guide.  
And knowing all, "WILL LAND A  
RIDE,"  
We labor on, well satisfied.  
Baltimore, Md. The Major

8. PENTAGON  
1—A letter.  
2—An habitual drunkard.  
3—Of pertaining to or proceeding from the sun.  
4—An enlisted man in the military service.  
5—An imposition or tax.  
6—That which remains.  
7—To take heed.  
Philadelphia, Pa. Alec Sander

9. DOUBLE CROSS WORD ENIGMA  
In "trolley ride;"  
In "railway slide;"  
In "signal sweep;"  
In "eulvert deep;"  
In "freight car;"  
In "piston bar;"  
In "trailer wheel;"  
In "hardened steel."  
Don't travel on the surface, friend—  
Just take the FIRST for journey's end.  
Don't travel on the turnpike, mate—  
Just use the LAST or you'll be late.  
The subway route some folks disdain—  
They much prefer the TOTAL train.  
Baltimore, Md. Primose

10. CURTAILMENT (3)  
What has tomorrow in store for us?  
ONE we TWO sun settles low.  
Might not today have done more for us,  
Had we not wasted it so?  
Now! Have we all made the most of it,  
Ere twilight tells it's too late?  
Have we done ought we could boast of it,  
Proud in achievement so great?  
Why should we ONE of tomorrow then,  
Trifling the present away?  
Bowed should our heads be in sorrow then  
Over a waste'd today.  
Baltimore, Md. L. M. N. Terry

11. SQUARE  
1—To degrade.  
2—A prickly plant or shrub.  
3—The nave or wing of a building.  
4—A city in Essex County, Mass.  
5—(Gr.) Slowly, gently.  
Baltimore, Md. John C. Svec

12. HEXAGON  
1—The break of day.  
2—A Mohammedan noble, especially a prince of Afghanistan or of Tind.  
3—Ponders in the mind.  
4—Inattention.  
5—A small genus of Melastomaceous herbs, the Seer grass and meadow beauty.  
6—A descendant.  
7—A large basin, astern or vessel of any kind.  
Chicago, Ill. Mentor

13. HALF SQUARE  
1—One who listens.  
2—Combined.  
3—Cut in cubes.  
4—A sum entered.  
5—To tidy.  
6—A hypothetical force.  
7—A letter.  
Washington, C. D. K. T. Did

14. BEHEADMENT (5)  
It is great ALL to go to sea  
Away from cares and to be free,  
For just a little while.  
But when our journeying is o'er  
And we come back to LAST once more,  
We greet it with a smile.  
Butler, Pa. E. W. Jones

15. SQUARE  
(Defined from the New International Dictionary)  
1—Brisk (Mus.).  
2—New Zealand smelts.  
3—Body—servants.  
4—The Sapindaceous tree Dodonaea Visceora.  
5—An ament.  
6—One of a brotherhood among the Jews of Palestine, from the 2nd century B. C. to the 2nd century, A. D.  
Brooklyn, N. Y. Gemini

To receive proper credit solutions to these puzzles must be in my hands by November 15. The answers together with a list of the solvers, will be published in the December issue.

**Just between You and Me**

Through an error on the part of the Editor (which I insist on thus assuming) many of our solvers were under the impression that the answers to the puzzles published in the June number had to be in my hands by July 15, as indicated in the June number, instead of August 15, as was the intention. As many of them did not receive their copy of the MAGAZINE until a few days before July 15 they thought the time too short and wrote to say that they would not be able to send in any answers. Hence our list of solvers of the June puzzles is not as large as it should be and would have been but for the mistake. Be it understood that the answers to puzzles published in any issue will be printed in the third issue following. This will give you from 30 to 45 days to solve the puzzles. For instance, the answers to the puzzles published in this issue of the MAGAZINE do not have to be in my hands until November 15. Because of the abbreviated solver's list we have only awarded four prizes for the answers to the June puzzles but will make up for this by giving six prizes for the July answers. Who is going to win them?

We are showing the following new puzzles this month: No. 7, a mutation, No. 8, a pentagon, and No. 9, a double cross word enigma.

A mutation is constructed on the principal of an anagram except that the answer (Continued on page 27)

# Accurate Weights Insure Correct Freight Charges

Gains in Revenue from Check-Weighing and Revising Classification of Inbound and Transfer L. C. L. Freight During July, 1922

*Note:—Each month there will be published in the Magazine, statement of increases, shown by stations, made in the revenue of the Company by revising classification and check-weighing inbound L. C. L. shipments and L. C. L. freight in transfer.*

A. E. DAY, Chief of Weighing Bureau, Transportation Department

# An Economical House for the Family of Moderate Means

**T**HIS suburban home was designed for the small family of moderate means and is intended to be built of concrete block and covered with Portland cement stucco. Its many attractive features are apparent at first glance, while the durable, fire-safe qualities of its construction material make it of especial interest to the family planning on building a home where they can live in safety and comfort.

This house can be placed upon a narrow lot simply by moving the porch from the side wall to either the front or rear without in any way spoiling the plan or architectural appearance. Although the porch is shown entirely open, it can easily be enclosed with windows if it is desired to make it into a sun parlor. An unusual feature of the porch is the supporting piers, which are placed in the middle instead of at the corners. This gives an unusual feeling of airiness to the occupants.

The entrance porch can be screened in if desired, making a vestibule and in the cold winters of northern cities this will be found of particular benefit. From the small entrance hall we enter a spacious living room

leading into a comfortable dining room at the rear of the house. An effect of spaciousness is obtained by the arrangement of three sets of folding doors leading to the porch in such a way that the side wall of the dining room and living room appears to make one large room although they are naturally screened by the projecting fireplace.

The placing of the fireplace in the center of the house not only adds to the attractiveness of the design, but insures that all of the heat will be utilized in warming the house. Where the fireplace is placed on the outside wall a good deal of heat is lost through radiation into the outside air.

Two good sized bedrooms and one single bedroom are found on the upper floor as well as a well-arranged bathroom. The economy of this plan is evident when the very small amount of floor space lost in halls and passages is observed. The plumbing is arranged in one stack, while the cellar plans give plenty of room for laundry, food closets and similar conveniences.

The outside of the house is simple as well as attractive and is well suited to the man who does not desire an extravagant

display. It is modern and appropriate for the man of quiet tastes.

Concrete block houses built with a surfacing of Portland cement stucco are becoming increasingly popular on account of their attractive appearance, strength, fire-safety and comfort. The house described in this article was designed by Russel Barr Williamson, an architect of Milwaukee and is an excellent example of the adaptability of concrete block to the requirements of the family of moderate means.

## Do You Want to Build Your Own Home?

Yes? Then we can help you, for through the courtesy of the Portland Cement Association we can supply complete plans and blue prints of the house shown on this page at the low cost of ten dollars (\$10.00).

We also have copies of a book "Concrete Houses," containing pictures and floor plans of 25 houses built of cement and concrete block. Copies of this book may be had by any reader of our Magazine at a cost of fifty cents apiece. For either the book or the complete specifications and blue prints of the house described on this page, remit to the Editor, Mt. Royal Station, Baltimore, Md.

Baltimore and Ohio employes have a special reason for taking advantage of these offers because they can get such substantial help in home building from our Relief Department. For full information write Division "S," Baltimore and Ohio Building, Baltimore, Md.

Employes in small towns and cities along the Railroad would do well to emulate the example set by the Baltimore and Ohio folks at Somerset, Pa. They started a big building boom, got the material people and contractors interested by offering them big contracts for a large number of houses and were thus able to make substantial reductions in the cost of their homes. The Relief Department will be glad to send a representative to any Baltimore and Ohio community which would like to have this plan explained in detail.

# THE BALTIMORE AND OHIO RAILROAD COMPANY

## Relief Department—Advisory Committee

### Conducting Transportation Department

L. W. GRAHAM.....	Operator.....	Kanawha Station, W. Va.
CHARLES H. CRAWFORD.....	Yard Brakeman.....	Glenwood, Pa.
GEORGE G. JAMES.....	Conductor.....	Baltimore, Md.
JOHN F. WUNNER.....	Clerk.....	New York, N. Y.

### Motive Power Department

K. W. GEIDENBERGER.....	Pipe Fitter.....	Newark, Ohio.
WILLIAM A. HODEL.....	Material Man.....	Grafton, W. Va.
PATRICK J. HARRIGAN.....	Mechanical Examiner.....	Connellsville, Pa.
H. W. OLDENBURG.....	Car Inspector.....	Cincinnati, Ohio.

### Maintenance of Way Department

WILLIAM A. EVANS.....	Section Foreman.....	Louis, Ill.
M. D. CAROTHERS.....	Assistant Engineer Maintenance.....	Chicago, Ill.
F. A. TAYLOR.....	Master Carpenter.....	Cumberland, Md.
HENRY F. EGGERT.....	Track Foreman.....	Pleasant Plain, Ohio.

### Statement of Pension Feature

Employees who were honorably retired during July, 1922, and to whom pensions were granted:

NAME	LAST OCCUPATION	DEPARTMENT	DIVISION	YEARS OF SERVICE
Berkley, Aaron F.....	Crossing Watchman.....	Maintenance of Way.....	Connellsville.....	36
Blankline, George.....	Brakeman.....	Conducting Transportation...	Baltimore.....	42
Conner, Creighton.....	Crossing Watchman.....	Maintenance of Way.....	Baltimore.....	36
Estep, J. Wiley.....	Superintendent.....	Tobacco Warehouses.....	Baltimore.....	35
Foutch, William E.....	Crossing Watchman.....	Conducting Transportation...	St. Louis.....	34
Lowney, Jerry.....	Engineer.....	Conducting Transportation...	Connellsville.....	46
Richter, Henry H.....	Passenger Brakeman.....	Conducting Transportation...	Toledo.....	27

The payments to pensioned employes constitute a special roll contributed by the Company.

During the calendar year 1921, \$367,795.95 was paid out through the Pension Feature to those who have been honorably retired.

The total payments since the inauguration of the Pension Feature, October 1, 1884 to June 30, 1922 amount to \$4,825,850.25.

The following pensioned employes, after serving the Company faithfully for a number of years, have died:

NAME	LAST OCCUPATION	DEPARTMENT	DIVISION	DATE OF DEATH	YEARS OF SERVICE
Barnes, William W.....	Section Foreman....	Maintenance of Way.....	Ohio.....	July 22, 1922.....	31
Batterton, Joshua.....	Passenger Engineman	Conducting Transportation	Ohio.....	July 12, 1922....	41
Brown, Jesse W.....	Conductor.....	Conducting Transportation	Philadelphia..	June 30, 1922....	44
Chew, Charles E.....	Engineman.....	Conducting Transportation	Baltimore.....	June 25, 1922....	46
Kramer, Frederick.....	Machine Hand.....	Motive Power.....	Cleveland.....	June 23, 1922....	26
Kuhley, John A., Sr.....	Lampman.....	Conducting Transportation	Cumberland...	July 11, 1922....	21
Kuhn, John.....	Car Shop Laborer...	Motive Power.....	Cleveland.....	July 9, 1922.....	18
Miller, Wilmer.....	Agent.....	Conducting Transportation	Ohio.....	June 5, 1922....	43
Mitchell, Emery G.....	Foreman.....	Stores.....	Baltimore.....	July 29, 1922....	31
Molloy, Patrick J.....	Fireman.....	Conducting Transportation	Newark.....	June 3, 1922....	30
Scheele, Conrad.....	Carpenter.....	Motive Power.....	Mt. Clare....	July 8, 1922....	26
Wilson, Plymon.....	Engineer.....	Conducting Transportation	Pittsburgh....	June 24, 1922....	33

# Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—  
Retreat from care that ever must be thine:  
How blest is he who crowns, in shades like these,  
A youth of labor with an age of ease.*

OLIVER GOLDSMITH—"The Deserted Village"

## William E. Duvall

Pensioned Fireman William E. Duvall, Baltimore Division, was born at Annapolis Junction, Maryland, on August 15, 1859. He worked on his father's farm until September 2, 1883 when he entered the service of the Baltimore and Ohio as laborer.

On August 3, 1887 he became fireman, Baltimore Division. He held this position until he was pensioned, this year.

## James B. Crislip

Pensioned Foreman James B. Crislip, Connellsville Division, was born in Barbour County, West Virginia on June 27, 1857. He was the son of P. G. and Barbara (Marple) Crislip. He was educated in the public schools, and in 1877 was married to Miss Margaret Hinkle, of Buckhannon. Mr. and Mrs. Crislip have reared thirteen children, eight boys and five girls. Six of the boys have worked in the Maintenance of Way Department. One son is now a conductor on the Connellsville Division.

Mr. Crislip entered the service of the West Virginia and Pittsburgh (now the Baltimore and Ohio) in 1896, laying steel rail from Weston to Sutton. He also helped to complete the line from Flatwoods to

Richwood. He entered the service of the Baltimore and Ohio proper on March 11, 1900. In 1903 he was promoted to foreman; in 1908, watchman; in 1911, crossing watchman, Johnstown; in 1913, foreman; in 1916, trackman; in 1917, brakeman, and then back to foreman, M. of W. Department.

Mr. Crislip has a daily record of all his days of labor, from the year 1883. He can tell what he worked at on each day, what section of the road, and the principal events of each day. He is a charter member of the Crystal Lodge No. 125, I. O. O. F., of Sutton, W. Va., and also belongs to Osage Tribe No. 40 of the I. O. R. M. He owns a lovely home 14 miles west of Cumberland, near Hyndman, a mountain resort of 1600 inhabitants.

## Andrew Hawk

Andrew Hawk, pensioned watchman, Indian Creek, was born at Dunbar, Pa., on March 7, 1857. He worked on a farm until August 21, 1885, when he came to the Baltimore and Ohio as laborer. In 1902 he was made watchman, and in 1906, assistant foreman. In 1907 he was put on as cut watchman. This position he held until his recent retirement.

Mr. Hawk was married in 1882. He has seven children. Mr. Hawk's photograph appeared in the Among Ourselves notes of the Connellsville Division, in the August issue of the MAGAZINE.

## In the Realm of the Riddle

(Continued from page 23)

does not necessarily have a relation to the puzzle itself as must always be the case with an anagram. In looking for clues to No. 7 take into consideration the dedication at the head of the puzzle and particularly the second line of the puzzle. Then take the words in capital letters in the third line and see if you cannot from them construct a name held in high esteem by all of us.

As its name implies, the pentagon is a form puzzle with five sides and is shaped like this:

```

      O
    O O O
  O O O O O
O O O O O O
  O O O O O
    O O O O
      O O O O
    
```

The words read the same from left to right and from top to bottom as in the case of a diamond or a square.

The cross word enigma is one of the oldest styles of puzzles known to the game. No. 9 is a double cross word enigma and the answer is composed of two words of eight letters each. To solve the puzzle you must find two letters in the words in quotation marks on each line, which, when put one after the other, will give you "FIRST", described in the first verse and "LAST," described in the second verse, and these two words put one after the other will give you the "TOTAL" described in the third verse.

No. 10 in this issue is commended not only as a good puzzle but a fine idea beautifully and poetically expressed. L.M. N. Terry is known in puzzeldom for just such high grade work as this.

## Those Women

"John," she said to her devoted husband, "I wish you would sing two or three lines of some song for me."

"What on earth do you want me to do that for?"

"There is something I want you to get me tomorrow, and I've forgotten what it is, but I have associated it with your singing, and I am sure I can recall it if you'll sing just a line or two."

"It isn't a canary bird you want, is it?" ventured her husband, hopefully.

"No, I'm sure it isn't that. Now please sing."

Whereupon he cleared his throat for action and did his best to comply.

"That's enough," said his wife, before he had finished the first line. "Thank you, dear. I remember now. I want you to stop at the hardware store and get me a file."

—North Shore Bulletin.

Pensioners Two—William E. Duvall and James B. Crislip

## W. Cornell, Grand Old Man of the New York Terminals

*Who Reminiscences a Bit about Our History in the Metropolis*

*By John Newman, Terminal Timekeeper, Pier 22, N. Y.*

**W.** CORNELL, lighterage supervisor, and "Grand Old Man" of the Baltimore and Ohio in our New York Terminals, fifty years in railroad service in New York, thirty-six of them serving our Road, and, like Johnny Walker, still "going strong," will, when in a reminiscent mood, "talk shop" of old times. He does not, however, like many of us who have past recollections to revive and review, refer to them as "the good old times," but speaks of them as times of struggles under difficulties. Having been an adjunct to the progressive development of the Baltimore and Ohio in New York since its inception, no one is better qualified to comment on the "old times" in their relation to our Road.

In October, 1886, when the Baltimore and Ohio opened the gates at Pier 27, East River, the pier was roofed but without side covering, and the neighborhood, called "The Swamp," was a notorious rendezvous of river-pirates and thieves. Eternal vigilance was necessary to protect the property. There at that time, under the late P. H. Marshall as agent, Mr. Cornell entered our service as manifest clerk. A manifest then was just what the word literally means—"struck by hand." Billing and adding machines and other modern time and labor-saving devices were unknown, at least in railroad freight offices. Copying ink and the copying press were the tools.

After a few weeks' service Mr. Cornell was promoted to chief clerk, later becoming agent and terminal agent successively, until after having completed thirty years' service with the Company in 1916, being granted a pension, he retired. At least, he thought he did. But after a few months of restless rest, his soul-mate, the railroad, beckoned him back into harness, and he was appointed lighterage supervisor—the position he occupies today, without further thoughts of retirement. Although he has

just completed his three score and ten years, there are older men in the service that have not yet attained their majority age.

But let us have "W. C.," as he is familiarly known and called, do the talking.

"In 1886," he says, "cars were floated to and from the Central R. R. of N. J. where we had a small covered pier for lighterage business. Towing and lighterage work was handled by outside parties.

"That prince of railroad officials, the late A. C. Rose, was general eastern freight agent, beloved by employes and 'ace high' with the business public. He instilled into us progressive ideas, urging cooperation with and good service to the public. Business began to grow rapidly under his management, and additional facilities were sought and secured.

"In January, 1887, Pier 43, North River, was opened for east and westbound freight traffic.

"In 1888 Piers 20 and 21, North River, (old numbers) were secured and the Agent's

W. Cornell

Office moved to Pier 20, Pier 21 being sublet to a line of Spanish steamships. These piers were old and delapidated, facing the old West Washington Market, a combination of shacks and dirt.

"We were not allowed to stay long at this point, the city having decided to demolish the piers, but we hung on until they were pulled down over our heads and in May, 1892, we moved temporarily to Pier 1, North River, the headquarters of the Dock Department, doing the best we could there for a month, when the Pennsylvania R. R. came to our assistance, giving us Pier 5, North River, where we remained peacefully until Pier 22 was ready in July, 1894. To see the Pier 22 office now, with its personnel of a hundred clerks, equipped with every modern appliance and all possible facilities, makes one wonder how things could be done without them, but we got there just the same.

"I shall not forget the moving from Pier 20, for it was there I received my first criticism for trying to keep a gang-plank space working for our interests contrary to instructions from the Dock Department, my superiors hiding away from the Dock Department officials. However, they 'exonerated' me, and we went forward.

"Barge station was successfully operated at 17th Street, North River, 1892 to 1898; station at North 1st Street, Brooklyn, opened 1888 jointly with Central R. R. of New Jersey; 26th Street Station opened 1897; and Wallabout Station in 1911. A barge station was also operated at 37th Street, East River, 1887 to 1889, freight received being loaded and billed at Pier 27.

"We early found that, to meet our competitors, we should operate our own lighterage department, and hence set out to secure equipment. Our first departure was to hire the 'Eagle,' a North River steam barge which had been plying the North River for years carrying stone. The skipper was infected with that tired feeling characteristic of his class and soon told us that if the railroads wanted a boat to go like a train, we might go to the devil; he went ashore. Large quantities of copper were being handled at the time and we loaded the ancient 'Eagle' ready to get out in the early morning. During the night we were aroused by the report she was sinking. With hair on end and tingling nerves we rushed to Pier 20 and succeeded in saving boat and cargo. After that experience, however, we declined further business with this boat and began looking for more seaworthy craft, and equipment of our own. Finally we received our first importation from Baltimore, four covered barges christened: 'New Dorp,' 'Jupiter,' 'Clifton' and 'Minerva.' These boats were a curiosity to New York lightermen and they dubbed them 'chicken coops' on account of their slanting roofs, and many were the jokes thrown at Mr. Marshall in reference to them. However, they gave good service until consigned to the marine boneyard.

"From this beginning we have developed an A-1 Lighterage Department, equaling any in the Harbor, with a fleet of 101 bottoms and more coming, with plenty of power to keep them moving, and with an organization full of 'pep.' 'Nothing succeeds like success.'

"The changes in thirty-six years have been so numerous that many pages would be required to record them.

"It would be interesting to those unacquainted with St. George to see what was

## Ephraim Provance, Retired Engineer

*He was willing to get a disabled engine back home, or have her hauled*

**M**ANY of our railroaders will remember the time that Engineer Ephraim Provance saved the city of Annapolis from being destroyed by fire when he made a record run to that city and carried fire fighting apparatus from Baltimore. Mr. Provance is now a pensioner, eighty-two years old. His home is in Baltimore, where he is a good citizen, revered by his neighbors. Many of them do not know him by name, but all speak of him as "the kind faced old gentleman who passes the door and talks so beautifully to the children."

Mr. Provance is not only a veteran in the service of the Railroad, but he is also a veteran of the Civil War. He served in the infantry of the Northern Army from 1861 to 1864, then enlisted in the cavalry. He was wounded once during his service. He was 26 years old when he became a brakeman on the Baltimore and Ohio. After nearly two years he went to firing. In 1872 he became an engineer on the Second Division—Martinsburg to Piedmont. When asked to touch upon this, Mr. Provance said:

"I then ran old Perkins Wheeler, No. 3. Before I was promoted I went to Master Mechanic Billy Edwards. 'Why,' said he, 'you haven't been firin' long enough to know a full stoke from a cut-off on a camel-back engine.' You see, we had bars then that stood up in the cab. One day a little later, I fired for a man who didn't know how to run an engine. Then Billy Edwards sent for me.

Ephraim Provance

originally the Lighterage Terminal Office, where each morning one had to slide down the embankment from Richmond Terrace to the northbound tracks, get up, straighten out his legs, brush his clothing, and cross the tracks to the 'office,' there to meet the 'Super.,' size up the situation and prepare for the day's business.

"It is different now, very much so; a light, commodious, well-appointed office on the shore end of Dock 6 houses the entire Operating Department."

"'Eph,' said he, 'do you reckon you could get an engine in if she broke down on the track?'"

"'Yes,' said I, 'I'll get her in if I have to get her hauled in with mules.' And so I was promoted.

"In 1876, the time of the Centennial at Philadelphia, I was promoted to passenger engineer, after which I got one of A. S.

Cromwell's engines, old 824. There have been lots of improvements since the old days. Before the time of the link motion, there was the hook motion camel engine. We didn't know what it was to take up water while the engine was going along. The tenders held 6 to 7 tons of coal. How much do they hold now? By gum, I couldn't tell you, but it's quite a few bushels more.

"The railroad has been good to me. There are not many of my old buddies left now, but I am thankful that I have children who take such good care of me. I was raised in one religion and married a fine little girl of another, so I turned to her way of thinking. You know, all of these different roads lead to the same gate, and no matter which one of 'em that you take, if you do the right thing, you'll get there."

Our readers will see by this picture that "Uncle Eph," although 82 years old, is still on the job when it comes to his health. He is a familiar figure at our Veterans' picnics, and we hope that he will enjoy many, many more of them.

## Forty Years in One Department

*Robert C. Clark a Beloved Veteran of Grain Elevator Office*

**O**NE of the most interesting characters in the service of the Baltimore and Ohio is Robert C. Clark, cashier, Baltimore and Ohio Railroad Grain Elevators. Mr. Clark first saw the light of day on April 29, 1863. He entered the employ of the Company in the Elevator Office on August 1, 1882, as clerk, and has been in continuous service in that office ever since.

He ascended the various steps of a clerkship until promoted to cashier on August 1, 1907, which position he has held continuously for 15 years; making a total of 40 years in the same department,—a most commendable record.

By his urbane manner he has endeared himself to all who come in contact with him; and, to those who know him best, he is familiarly and fondly addressed as "Pap." He stands high in the estimation of the various grain exporters and grain handlers and has their full confidence. He has seen the evolution of many a young clerk to a full fledged grain merchant; this evolution often being helped by the kindly advice of "Pap" himself, who has always taken a great interest in "youngsters."

His photograph suggests the genial soul, that he is and that he is a 100 per cent. optimist. The years weigh lightly upon him and do not detract from his youthful spirit and vision.

It will be noted that there is a striking likeness between president Harding and "Pap" Clark, and the difficulties met by "Pap" are settled just as diplomatically as the President of the United States settles his difficulties. In fact, it would not be

presumptuous to say that "Pap" Clark settles difficulties and problems that are presented to him with a smoothness and dispatch that could be profitably employed in more of our harrassing present day industrial situations.

"Pap" Clark's theology is based on what he was taught and learned in the great school of Railroad Experience; and he knows what he knows when he knows it. The pillar noticed in the photograph is typical of his character. He is sturdy, upright, rugged; he is charitable in word and deed and is filled with the milk of human kindness. He is a man of strong likes and sympathies; he is a real human document, as those who come in contact with him gladly affirm.

Robert C. Clark

That many more years may elapse before he receives the final call to make his final accounting is the wish of his many friends.

### Carl C. Steinbruner

*A Loyal Veteran Who Praises the Bridge That Has Carried Him Over*

Garrett, Indiana

To the Officers and Members of the Baltimore and Ohio Railroad:

There has never yet been any statement from me in the MAGAZINE, and I respectfully ask that a little space be given me for the purpose of rendering thanks and credit where it rightfully belongs.

I began work with the Railroad on January 9, 1883, as machinist. I received 19 cents per hour, and in those days work was much harder than it has been during the last 15 or 20 years. In those days most of the work had to be done by hand. But the Baltimore and Ohio, having at heart the welfare of its employes, spared no pains to put into use the latest developments on the market which were found to be helpful in making working conditions more pleasant.

I had been in actual service for 37 years, when, because of my health's failing, I was compelled to step back on February 2, 1920. Some one may say, on hearing of one who has been retired, "Yes, he's down and out now," but listen: give no thought of such a thing in my case; I am still ready to serve the Baltimore and Ohio to the end of my days.

My brothers, I thank God that I have had the chance to become one of the family of the Baltimore and Ohio Railroad, for this is, without doubt, one of the best, if not *the* best, organization in the United States. Let me say that when you put your shoulder to the wheel for the advancement of the Baltimore and Ohio, you are doing a noble work. Think what well-thinking and straightforward officers we have at the head of Our Company.

Carl C. Steinbruner

To you who are not any longer in actual service, I would speak a word. Never think that there is no more for you to do. Opportunities come at all times for us to speak a good word for the Baltimore and Ohio, and in so doing, we are performing a faithful service.

To those who are not employes, I would say that if you are fortunate enough to gain admittance to our Baltimore and Ohio family, you will not regret it.

Your loving and grateful brother,

(Signed) Carl C. Steinbruner.

### The First Telegram

**I**N A memorandum dated, Baltimore, November 20, 1919, to O. P. McCarty, now assistant to passenger traffic manager, the late John E. Spurrier wrote:

"Referring to our talk of the telegraph: My notes show that Benjamin Franklin was born in 1706 and died in 1790; that in 1752 he went into a field, faced a thunder storm, flew a kite with a wire attached, drew lightning from the clouds, and thus discovered the identity of lightning and electricity.

"Samuel Finley Breese Morse was born in 1791 and died in 1872. He invented the telegraph and made his name immortal. In 1835 he constructed a small recording electric telegraph. In 1843, after an uphill struggle against adverse circumstances, he succeeded through Mr. John P. Kennedy, the distinguished Marylander, in obtaining aid from the U. S. Government.

"In 1844 he constructed on our Washington Branch right of way, Washington to Relay, and Baltimore and Ohio Railroad Company right of way via its main stem to Mt. Clare Station and Pratt Street Station, a telegraph line between Washington and Baltimore. The line ended in the Mt. Clare Station Building where the *first telegram* was received from Washington.

"I was night operator in the original building at Mt. Clare, 1866-67, and the Morse register was still being used by an old timer, William H. Bauer, the day operator. This old building still marks the spot and it makes me feel good to look at it and think of by-gone days and the good old times."

### The Late John C. McCahan

**L**OYAL and faithful to the Baltimore and Ohio Railroad and with a service record of 45 years at Camden Station, John C. McCahan died on August 7 at Franklin Square Hospital, Baltimore.

Mr. McCahan was born on September 20, 1842. He entered the service of the Company as tinner on August 14, 1868. On March 1, 1906 he was made baggage-man; in 1910, checkman; in 1910, assistant baggage agent; in 1914 he again was made checkman, serving in this capacity until the time of his retirement on November 14 of that year. He had always enjoyed splendid health until just a few months before his death, which was brought about by a general breakdown.

Mr. McCahan was a member of the Baltimore and Ohio Veterans' Association, and for 54 years had been a Master Mason. In 1876 he was elected Worshipful Master of Union Lodge No. 60. His funeral services, which took place at his home, 725 N. Fulton Ave, Baltimore, were in charge of the Masons. He had often expressed the wish that his family be with him at the time of his death. This wish was granted, all the members of his family being at his bedside. He had many dear friends who mourn his death, one of the nearest of whom is William Muth, Stores Department, who was also present to bid farewell to his companion.

Mr. McCahan was the father of J. C. McCahan, Jr., manager of Mail and Express Traffic.

### Fly Wheel Bursting Pit Used at Purdue University

Investigating bursting fly wheels has never been considered a popular subject of research and but little work was done along this line before Dean C. H. Benjamin, of Purdue University, devised a special apparatus for bursting the wheels under safe and controlled conditions.

The apparatus consists of a sand lined pit, eight feet in diameter and six feet deep, inside of which the fly wheel is spun like a top by means of a powerful electric motor. Suitable instruments measure the speed and when the wheel bursts, the fragments fly into the sand which surrounds it. They are thus preserved in their relative position so accurate study can be made of the conditions of bursting.

A lady entered an English Railway station and said that she wanted a ticket for London. The pale-faced clerk asked, "Single?"

"It's none of your business," she replied. "I might have been married a dozen times if I'd felt like providin' for some poor shiftless wreck of a man like you."

The late John C. McCahan

# Bunny Gets the Bones

When the Newark Division Veterans Celebrated at Buckeye Lake

Note: High up in the top of a tall oak tree at Buckeye Lake there dwells an old squirrel with his family. Old as the hills, yet nimble as any of his children, keen of eye and swift of foot, there is nothing that ever goes on at Buckeye that escapes his notice. Those of us who attended the picnic of the Newark Division Veterans on August 17, will remember how he sat upon the bough and ran up and down the tree, chattering with his wife about the doings down below. Of course we did not understand the conversation at the time, but, translated into squirrel language, it ran somewhat as follows:

Bunny: Hey there, Old Girl! Come quickly and see what all this noise is about, and bring me my spectacles! Hurry!

Mrs. Bunny (taking off her apron and hurrying to their knot-hole window): Why, bless my soul! It's a picnic, of course. It must be, for there come the children. I see little Dick Connelly and Johnny Chesley and Johnny Walker! Oh, just look at the people!

Bunny: Johnny Walker! What do you mean Johnny Walker?

Mrs. Bunny: Of course, that's his name! And there's Mrs. Frank Howard, and Mr. Howard, and Dan Moriarity and the Missus! And bless my soul, if there isn't big, fat Mr. Murphy! Just look at them! And they've all got dinner baskets. Do you suppose there'll be some bones and things for us after the eats are over? Oh, I hope so, for then we can store some away for winter. A nut diet always gives me heart-burn, but a few chicken bones will vary the menus considerably.

Bunny: Old Girl, you'd better keep quiet. First thing you know somebody'll be throwing stones at us.

Mrs. Bunny: The very idea! Don't you know they're friends of ours? Why there's

THERE WERE LOADS OF GOOD EATS AND SOME LEFT OVER

1—Jim Dennison, the "Missus" and their daughter, Grace. 2—Reserved for the picnic were J. M. and Mrs. Garvey, Veteran and Ladies' Auxiliary vice-presidents, respectively, and Engineer and Mrs. "Bunty" Little. 3—The thick and the thin of the whole affair—Dave Murphy, the fattest man, shaking hands with Ben Oatman, the thinnest. 4—Holding up his prize tie is Richard Connelly. 5—Louise, Harold and their daddy, B. F. Oatman, Office of Master Mechanic, Newark, O., and Division Correspondent for the Magazine. 6—Silas Higgs, veteran passenger engineer. 7—All lined up for the girls' race. 8—Peaches, preserves and pickles were among the prizes for the women's races. 9—S. A. Reagan, veteran carpenter foreman, Maintenance of Way Department; Jonn Chesley, veteran machinist, Newark Shop. 10—Mrs. H. B. Howard, wife of machinist, and Mrs. F. M. Maburd, wife of supervisor. 11—"Darby and Joan"—a closer up of Brother and Sister Garvey. 12—Two of the Prize Winners. 13—Mrs. W. Stewart and Mrs. John Connelly. 14—The tables were loaded heavily. 15—Some ate theirs on the green grass. 16—Victors in 50-yard dash, Engineer Frank M. Howard and Section Foreman James Bushew

the big sign over there that says: RESERVED FOR BALTIMORE AND OHIO VETERANS' PICNIC. Where are your specs?

*Bunny:* Surely, you're right as usual. Say, isn't that my old friend Dan Kelly, of the Bristol Pumping Station? The one with the black derby, I mean.

*Mrs. Bunny:* It surely is. Do you know him, too?

*Bunny:* You bet! It's many a nut we've cracked together. Why, that man is 76 years old now, with a service record of 50 years. And there's Mr. and Mrs. Sheats, from Chillicothe. And maybe my nose is deceiving me, but I'm 'most sure that I smell Mrs. Little's lemon pie, and Mrs. Murphy's chocolate cake. I could tell them from anybody's, anywhere. They don't make 'em any better in the world.

*Mrs. Bunny:* I just heard that old lady from Baltimore say that she wished those two ladies would send her the recipes for that pie and cake. She wants to put 'em in her MAGAZINE. But say, do you s'pose there'll be anything left for us after that fat Mr. Murphy gets through eating?

*Bunny:* Don't you worry about him. It ain't always the fattest ones who eat the most. Murphy weighs 335 pounds, but that carrel that the circus monkey told us about was big and fat, too, but he only eats once a week. He lives on his hump; maybe that's what Murphy does. And I'll bet you a hickory nut that either Frank Howard, Dan Moriarity, or that skinny Ben Oatman can beat Murphy eating any old time. My, but Miss Cora Doyle does look peachy today! And who's the lady with her?

*Mrs. Bunny:* She surely does; the other one's her sister, Mrs. Davis. Who's the big, hefty looking man with the sweet faced lady?

*Bunny:* Why, that's Jim Dennison and the Missus. Jim used to be a railroader, way back in the days when the hazelnuts

grew alongside the track. He was at the head of the Brotherhood of Locomotive Engineers, too, but he's retired now. Many's the hazelnut he fired at me, trying to shut up my chatter. I made more noise than his train, you see, so he was jealous. That's their daughter, sitting over on the stump yonder.

*Mrs. Bunny:* I see. And here come two pretty little girls, all dressed up in trousers.

*Bunny:* Oh, go on. They're not trousers, they're knickers. Didn't you ever see knickers? And the little girls wearing them are Ruth Lewis, daughter of Engineer C. A. Lewis, and Lillian Gerold, daughter of Engineer W. N. Gerold. Smart looking? I'll say they are. And with them is little Fern Forquer. Her daddy was the late J. B. Forquer, foreman, Newark Shops. Say! Say, there! What do you suppose is going on now? There's Dan Moriarity up on the table, and everybody getting together like as if for a church meeting?

*Mrs. Bunny:* Oh, didn't you just hear them say that they're going to have running races, and all kinds of games and prizes? Let's skip out to the end of this branch where we can see better. That's it. Ah, here come the boys! Come on, Forest, come on, come on! No, George has you beat. George gets first prize, and Forest, second. George's father is Lawrence Schmidt, moulder, and Forest is the son of Ben Robinette, telegraph operator. George gets a baseball, and Forest a tube of tooth paste.

*Mrs. Bunny:* And here come's the fifty-yard dash for men weighing over 200 pounds. Chip, chip, chatter, chatter (squirrel's way of saying "Hurrah!") for Engineer John Connelly! Former Brakeman T. H. Stewart comes in second. My goodness! I wish they'd have a race for squirrels.

*Bunny:* Be quiet, and be glad if you get the chicken bones. Don't you know that all this running sharpens up folks' appetites? Hallelujah! Here come the ladies! And

they've got to weigh over 150 pounds to get into the race, too. One, two, three—Go! Well, I'm betting on the one with the white dress!

*Mrs. Bunny:* They all have white dresses on, goose!

*Bunny:* Hold on, my dear. Don't call me names like that; remember, I wear fur and not feathers!

*Mrs. Bunny:* Nobody would believe it, the way you fly up whenever you get angry. But see, Mrs. H. B. Howard is ahead!

*Bunny:* And so she is! Bully for her! And here comes Mrs. Davis following close behind—and Mrs. Frank Mahurd! Come on, girls! You're all girls to me. Fine! That's what I call running! Run back now, and get your prizes. Chip, chip, chatter, chatter!

*Mrs. Bunny:* Will you watch for a minute or two while I go in to look after my supper? There's no use in taking chances; we'd better be sure of something, don't you think?

*Bunny:* Right. I'll watch. (Mrs. Bunny goes in. Bunny watches for half an hour. Mrs. Bunny reappears, with her hair brushed back and white apron on.)

*Mrs. Bunny:* Well, what's the news?

*Bunny:* Oh, you missed it! Richard Connelly won first prize in the race for boys from 7 to 16 years, and George Schmidt came in second. In the girl's race, little Francis Raymond came out first, and Virginia Brown second. The nail driving contest was a peach. Machinist John Chesley came out ahead of the men, and Carpenter Foreman S. A. Reagan came in second; in the women's contest, Engineer Connelly's wife won first prize and Mrs. W. Stewart second.

*Mrs. Bunny:* And didn't they give a prize for the oldest Veteran?

*Bunny:* Sure! Daniel Kelly got that, and a fine box of cigars it was, too. And the oldest widow of a Veteran was Mrs. Beecher, widow of the late Passenger Con-

Beautiful Buckeye Lake, near Newark, Ohio, wh...

ductor J. S. Beecher. I won't tell you out loud just how old she is; I'll just whisper it. (She's 67 years old.) I think she's a real sport for telling it, don't you?

*Mrs. Bunny:* You bet. And who's the happy woman over there?

*Bunny:* That's Mrs. John McGreevy. She got the prize for having the largest family on the grounds. Gee whiz! They never saw ours, did they? Well, you might know that Murphy got the fat man's prize. They gave him a kiddie car. Oh, my old woman! If you'd only seen him trying to ride it. He'll need lots more practice, I'm thinking. And they gave the old lady from Baltimore an apron for coming the longest distance. Then, if she didn't turn around and guess the number of grains in a bottle of rice and get a great, big aluminum tea kettle. My, but she's proud of 'em! Only thing's bothering me, I'm wondering what an old maid wants with a tea kettle. To make tea with, I guess, eh?

*Mrs. Bunny:* Certainly. But look, will you! They're spreading the tables over here and getting ready to eat. Oh, my! Did you ever see so much fried chicken in your life? And there are boiled eggs, and deviled eggs, and pickled beets, and chow chow.

*Bunny:* And chocolate cake, and salads, and coffee. Look, and there's ice cream! They had it at their last picnic. I wonder what it tastes like. That's one thing of which there is never any left over for squirrels. Now they're all sitting down to eat. M-mm-mm! I'm mighty glad they didn't have any squirrel soup! Here they come—Machinist Teagarden, Conductor J. C. Richardson, and pensioned Freight Conductor Thomas McDermott. And little Freda Brown and Esther Mulquin, who won the prizes in the peanut walk. I'll bet they're hungry, too. By the way, I forgot to tell you that Engineer Frank Howard and Section Foreman J. Bushew won the prize in the race for men over 60

years old. Who would think that they're sixty? Little Johnny Walker and Jimmie McGreevy won in the ball throwing contest. Come, let's let them enjoy themselves while we go into our house and eat some nuts before I disgrace my family by jumping down into the middle of that table.

(Go down into hollow of tree. Reappear an hour later.)

*Mrs. Bunny:* Well, do you see any chance of getting any bones?

*Bunny:* You bet! There's a big pile of 'em right under the table where Mr. Sheats is sitting. But here comes that dog. No, he can't eat them all. There are lots and lots, and only one dog. They're all leaving the tables now, and they're having a hard time to get up. Some of those skinny folks look mighty fat now. My stars! Where do you suppose Mr. Garvey is going with that grin on his face?

*Mrs. Bunny:* He's heading for the pier. Making his—Sakes alive! He's going in swimming! Get your hat and we'll scamper down and see him dive. Oh, just see the folks in bathing. And there are some divers among the girls, too. I'll bet it's fine to have bobbed hair and not have to bother about getting it wet, eh? And there are the little folks, the babies and their mothers, all in the water. And the young folks are swinging out over the water in those jolly swings.

*Bunny:* Whoo-ee! Here comes John Garvey! I wonder that the springing board will hold him. See him running. Jimminy! There he goes—off into the water, headfirst. Hello, there he is, up again, and everybody's watching him. Mrs. G. is sitting on the pier holding his clothes. She hasn't any idea of going back to Wheeling tonight with a husband wearing a bathing suit. Ouch! What a dive!

*Mrs. Bunny:* And see! The folks, old and young, all of 'em are going over to the dancing pavilion, where they'll have the regular Baltimore and Ohio dance. I can

see Frank Howard and Dave Murphy, and the whole gang of 'em, swinging their partners in a waltz. Oh, what fun it must be!

*Bunny:* Old Woman, Old Woman! We've certainly forgotten something. The island is deserted, and that pesky dog will have all the bones. Let's hurry back and gather them up and take them home to the children. (Run back to piles of bones, etc., under the tables.)

*Mrs. Bunny:* Oh, Bun, I say, isn't this fine? There's enough chicken left for our breakfast in the morning.

*Bunny:* And if only they'd have a picnic every day, we could just sit around and wait for them. We'd never have to bother about hunting all around Buckeye Lake for nuts for winter. We could just store up chicken bones.

*Mrs. Bunny:* Yes, silly! And then you'd be so lazy that you'd go and get as fat as—well, as fat as some human beings that I know.

*Bunny:* Yes, Old Girl, I guess you're right.

*Mrs. Bunny:* As usual.

*Bunny:* As usual.

#### Has Solved Similar Cases

Dear Editor: I am a young girl of 23 and am told that I am fascinatingly beautiful. Two boys love me. They are motherless twins. I love them both, but they fight dreadfully over me. Dear Editor, is it possible to love two men at once? And how can I keep them from fighting over me?

Beautiful Bella.

Dear Beautiful Bella: Yes, it is possible, but not feasible. Have you met the father yet? That might solve the difficulty.

*The Bughouse Bugle.*

And you say you lost control of your car? Yes, I couldn't keep up the installments.

## A Week's Lunches

Put these into your husband's dinner pail and he will have a smile for you when he comes home

By Mrs. Charles H. Shipley, Wife of Conductor, Baltimore, Md.

**Monday**  
Chicken salad sandwiches (made of chicken left over from Sunday)  
Fruit  
Cake

**Tuesday**  
Ham sandwiches  
Apple pie  
Doughnuts

**Wednesday**  
Cold roast beef  
Potato salad  
Bread and butter  
Cup custard

**Thursday**  
Cheese sandwiches  
Raisin Bread  
Apple or orange  
Pickle

**Friday**  
Combination sandwiches (made of cold veal, hard-boiled eggs, celery, lettuce, mayonnaise dressing)  
Deviled eggs  
Lemon pie

**Saturday**  
Cold slice of ham  
Preserves  
Bread and Butter  
Vegetable salad  
Cake  
Fruit

Suggestions:

With every lunch pack a paper napkin. Arrange the lunch box as tastefully as possible. Workingmen's lunches should be dainty and appetizing as well as wholesome and strengthening. Coffee, iced tea, iced cocoa, or buttermilk may be added to each day's menu. These are carried in a thermos bottle, the essential adjunct to the dinner pail. I might also add that a smile and a kiss packed in with the lunch will keep a man well nourished and in a good humor. The way to a Railroader's heart is through his dinner pail.

## Lick the Bully

ERNEST THOMPSON SETON told a story at the Rotary Club in New York last month that carries a lesson to every man and boy in the country.

E. T. S. conducts a boys' camp in Connecticut. To his camp come all kinds of boys: big boys, small boys, strong boys, weak boys, good boys and bad boys—boys who are full of courage and boys who are full of fear. It is the aim of E. T. S. to send these boys away with more strength, more courage, more manliness and better morals than they had when they came. But the aims of E. T. S. have no place here. It is his story we want to tell.

There drifted into camp one day a mite of a boy. He had small legs and small arms. He looked starved in body and in mind—and was. To put that boy in among the other boys in camp seemed like throwing a sheep to a pack of wolves—and yet it had to be done.

"Boys have a sixth sense in sizing up their companions," said E. T. S., "and it took less time than it takes to tell it for the boys in camp to size up the newcomer, and it took the camp bully even less time to tell that his meat had arrived.

"The camp bully was a big boy—big in body but not in mind, so he started out to terrorize and humiliate the new boy. Everything he could do he did to make that small

boy uncomfortable. He couldn't strike him—that would not be permitted—but in every subtle way that he could annoy him he did. The small boy was in constant fear.

"After the small boy had been terrorized for several days and I saw how things were going, I called the small boy to me and told him I could not side with him. If I did he would lose the respect of all the boys—that the only way a boy could get along was to fight his own battles and prove his own valor.

"That boy who is annoying you," I said, "is a big bluff. If he weren't he wouldn't pick on a small boy like you. He's all bluff

and the only thing for you to do is to lick him. Will you do it?"

"And the little fellow with tears in his eyes said, 'I'll try.'

"Then I told him how to do it.

"You've only got to hit him once," I said, "and he'll lie down because he's a coward. When he starts to fight he'll swing his arms and yell and make a rush for you. Don't try to strike him. Just put your head down, cover your face with your arms and when he comes at you just butt him in the stomach." The small boy said he would.

"Then I called the boys together and told them that we were going to have a fight—that I didn't usually approve of fighting, but that the conditions were unusual—that one of the boys had been abused and ill-treated and that he insisted on showing his companions that he was entitled to their respect, not to their derision.

"The boys made a big ring. They all wondered who were to be the fighters. After the ring was formed little Johnny stepped into the center and called out the bully. The other boys were all surprised. They couldn't understand little Johnny taking on such a task. The bully was the most surprised of all, but there wasn't anything for him to do but to step forward.

"He hesitated a little, then he came up to the scratch. He acted just as I thought he would. I'd seen many camp bullies before. Little Johnny did just what I told him to do and it worked out just as I thought it would. In less than a minute the bully was lying on the ground shouting 'enough' and little Johnny was standing over him bright-eyed, face smiling, chin up and chest out.

"The boys named him 'Little Thunder.' They put him on a mental pedestal and he never had any more trouble either with the bully or with any of the other boys."

We've told this story because there is a big bully stalking about today. Some people call him "Hard Times." He's got a lot of men licked. He grins at them and they wilt. But this bully isn't nearly as formidable as he seems. One good poke in the stomach will put him out of business. Let's get together and give him that one hard poke.—*Vulcan Bulletin*

"MA" HAMILTON AND HER FAMILY

You all remember "Ma" Hamilton's recipe for the pumpkin pie that "Pa" Hamilton's mother used to make. Well, here's the whole family. Left to right they are: "Ma," Forrest, Ruth and "Pa." "Pa" (Charles W.) is with the Baltimore and Ohio at East Side, Philadelphia, Pa.

## Anna's Surprise Cake

By Mrs. Harry S. Fleming  
Fairmont, W. Va.

Mix together one and three fourths cupfuls of flour, one cupful of sugar, and one teaspoonful of baking powder. Drop the white of an egg into a measuring cup, add butter to half-fill the cup, and then add milk to finish. Pour into the flour mixture and beat hard for five minutes. Add flavor to taste and bake in a moderate oven.

Icing: Yolk of one egg, rind and half the juice of one lemon. Beat in powdered sugar until stiff.

## A Quickly Made Cake

Contributed by Mrs. H. L. Stires

Two cups flour, two teaspoons baking powder, one cup sugar, a pinch of salt. Mix all these dry ingredients. Then mix together one scant cup of milk with two eggs. Beat this into the dry ingredients. Melt a half-cup of butter and add. Flavor with vanilla and bake in moderate oven.

For the icing, melt two tablespoons butter. Add all of the XXXX sugar that it will take, two tablespoons cocoa, and flavor with vanilla. Thin with cream to the desired consistency.

## A Magazine for Business Women

A new magazine for women makes its first appearance in September, and if it lives up to the aims and aspirations it voices in the attractive prospectus sent out in advance, it will undoubtedly be "some magazine."

THE BUSINESS WOMAN will fill a big gap in the lists of women's magazines, for it will be the only one devoted exclusively to the interests of the self-supporting girls and women in business, trade, industry and the professions. It will be national in scope and will have no club, political nor religious affiliations. It is to stand for the best in every way that life has for the self-supporting woman today.

Beside delightful fiction, good illustrations, articles of general interest and on timely subjects, there will also be real stories of women who have made good, who have reached the top in some specific line, and who through the pages of THE BUSINESS WOMAN will deliver their own messages of encouragement and help to all those who are still struggling on the ladder of success.

Special articles will tell of the opportunities that the various fields, commercial, mercantile, industrial and professional, have to offer in the way of careers for the ambitious girl or woman; while a number of departments covering book and dramatic reviews, fashions, beauty hints and the thousand and one activities that go to the making up of a business woman's life, all combine to make a magazine that promises much for the progress and development of the woman in the business and financial world.

## Sauer Kraut without a Smell

By B. A. Oatman, MAGAZINE Correspondent, Newark, Ohio

HER troubles were over. She had learned of a way to cook kraut without filling the house with the usual offensive odor. Mrs. Smith had told her and Mrs. Brown forthwith secured a can of the kraut, placed it into a kettle of boiling water, expecting that she could thoroughly heat it without even opening the can. It was only a few minutes before there was an awful noise in the kitchen. On arrival Mrs. Brown found the kitchen looking like the inside of a hut on the Hawaiian Islands. The kraut hung like grass from the ceiling, light fixtures and pictures which happened to be hanging in the kitchen. It happened also that Mrs. Brown had a picture of her Uncle Robert hanging on the wall near the scene of the accident. One look and my, how she did cry, to think that such a thing had happened in her house! The picture

of Uncle Robert was literally covered with sauer kraut, and Uncle Robert seemed to be making a vain effort to still look down on his niece with that endearing smile.

No kraut served at the Brown home that day. The decorator spent several days renewing the wall paper and with paint and kalsomine. They now serve kraut in the old fashioned way at the Brown home. Sometimes the old way is the best.

## See What Our Little Folks Are Doing

Did you read the two "honest-to-goodness" honor notes on our Children's Page of the July issue? We're willing to bet our last summer's organdy that these two little fellows have "Safety First" parents.

### Dear Women Readers:

We have all heard a great deal on the subject of "Suggestions" in connection with railroad work. All employes have been invited to offer suggestions to improve the operation of the Baltimore and Ohio. Whether or not this invitation has always seemed to apply directly to our railroad men, or whether our women and girls have not given careful consideration to the subject, we are not prepared to say. Railroading is naturally a man's subject—or it has been; just now, however, with many of our women entering new fields of work, and even new fields of railroad work, we may safely say that there is a big opportunity for all of us to make suggestions that will help to prove that women are capable of doing real, helpful things; that they are capable of holding real jobs; that we are interested in the Company on which we depend for our living in a way other than the actual amount of money which it pays us.

Down on the Gult, Mobile & Northern Railroad there are some girls who are getting busy. In a recent issue of the G. M. & N. News there appeared two articles, one written by Miss E. A. Garrett, the other by Mrs. Gertrude Johnson, both dealing with suggestions for better operation. Miss Garrett speaks for honesty with other roads, with the public, and with ourselves; loyalty, sympathy and courtesy. Mrs. Johnson has a business-getting article. She also suggests that a sign be posted in every waiting room and on every passenger train, reading as follows: "THE INSTRUCTIONS TO OUR EMPLOYEES ARE TO HELP US GIVE YOU BETTER SERVICE. IF YOU ARE NOT WELL SERVED THE MANAGEMENT WANTS TO KNOW IT."

Not a bad idea, is it? And yet Mrs. Johnson probably did not have to work hard to think of it. You could have thought of the same thing; perhaps you have done so already, but you simply failed to mention it to somebody. Don't you believe that you have a single idea that would help in some railroad improvement? I believe that there are thousands of ideas in the brains of our Baltimore and Ohio girls that are just waiting for an inspiration to push them into words. I don't care if you wear bobbed hair, savage earrings, or horseshoe waves—these make it all the more important that you show your ability to do things in spite of what arguments there are to the contrary. As long as we are in the business, let's stick to it for all we're worth.

Is there something about the Baltimore and Ohio that you don't like? Have you found the remedy? Is there something that you do like but that you believe that you could improve on? Let's have it!

Yours sincerely,

Margaret Talbot Stevens

# Belts, Bows and Buttons among the Season's Color Extravagances

By Maude Hall

**B**ELTS, bows and buttons are the season's color extravagances, but more moderation is expressed in gowns. A frock designed for stout as well as slender figures is in periwinkle and tan check material, combined with tan crepe. The side panels on the skirt and the deep collar are edged with picot points of the crepe. The waist closes at the left side edge of the inserted vestee. The back extends over the shoulders, joining the gathered shoulder edges of the front.

Another model equally impartial in its becomingness is designed of striped cotton sponge and made to be worn with separate blouses. The front is deeply slashed and bound with braid, this trimming being repeated on the large armholes and the pockets. The belt is a colorful affair in suede with a buckle equally as spirited in tone. The shoulders are quite long and the neck edges are caught together under the round collar of the plain white dimity blouse.

Despite the reaction against black, it is returning to favor and from all reports intends to contend for first place among fashionable colors. Lovely frocks of black crepe roma and Bengal crepe are among the newest designs.

The most dangerous rival of black is brown, and the nearest competitor of brown is navy or midnight blue. For afternoon and indoor wear, sand, beige and nude are exceedingly fashionable colors, both here and abroad.

The exception to the rule of the straight-line one-piece frock is found in the outfit composed of skirt and blouse, which may be worn separately also. The season offers

a number of unusually attractive models. In one the blouse, of sand color pussy-willow taffeta, closes in front through an applied plait band. The back of the blouse extends over the shoulders, where it is joined to the gathered fronts. Tiny frills

1210

of self-material outline the collar, cuffs and plait at the front through which the blouse fastens.

9980

The skirt is of a simple, elegant style and may be developed in a variety of fabrics. Serge, tricotine, tweed, sports satin, etc., are all in good taste and may be had at moderate cost. The skirt has a two-inch raised waist-line and closes at the left side seam. There are gathers across the back and at each side of the front gore. There are inserted pockets, which may be substituted for patch pockets, or omitted entirely.

### The Tree Across the Alley

By Martha O'Gilvie, 10 Years Old

Daughter of Painter, Sabraton Shops

IT was in Autumn. The leaves were colored. I was very ill, and I dreamed all kinds of things. I imagined that the leaves were people and that the trees were people and animals and all kinds of funny things. I have called my poem, "The Tree Across the Alley."

The tree across the alley  
 Is filled with wondrous things,  
 Animals and children,  
 And princes, queens and kings.

There are the wildest Indians  
 All climbing up my tree,

With old wildeats a-chasing—  
 Across the street from me.

There's a funny little woman,  
 As old as she can be,  
 She takes her little puppy  
 And climbs into my tree.

There are so many, many  
 Such wondrous, funny things,  
 Animals and people, too,  
 And lots of queens and kings.

### He Traveled With Them

"Suppose you had two apples, Johnnie," said a Sunday school teacher who hoped to give her class of boys a moral lesson, "and suppose one of the other boys wanted one of them. You would let him take the larger of them, wouldn't you?"

"It wouldn't be necessary, ma'am," answered Johnnie, as he surveyed the other boys of the class. "I know this crowd."  
 —The Beaver.

## Lesson in Home Dressmaking

Square Necks and Raglan Sleeves Give Extra Touches of Smartness to Little Frocks

THIS season's styles for children are unusually well-planned and simple. They are attractive without attracting undue attention, which means a lot in the consideration of clothes for youngsters. The dress featured here is of the slip-on type, having a square neck in front and back. The raglan sleeves may be long or short. It is trimmed with a picot edge of colored organdy and applique embroidery. Medium size requires 1 3/4 yards 36-inch material, with 5 yards of picot edging or embroidery for the trimming.

The front and back of the dress, to be cut according to the guide should be laid

along the fold of material, with the triple "TTT" perforations resting on the fold. The sleeve, the band and pocket, with large "O" perforations are laid over a lengthwise thread. This is important, because if the garment is cut on a thread other than the one planned in its design, the line is sure to be spoiled. For the sash, either use ribbon or cut a straight strip of material 2 1/4 yards long and 1 1/2 inch wide when finished.

Mark all notches and other symbols of construction carefully. Then, sew the sleeve to the front and back of the dress, matching double and single notches. Close seam of sleeve and the under-arm seam of dress as notched. Turn hem at lower edge of dress on small "o" perforations. Slash front and back (up and down) between the indicating small "o" perforations to slip the sash through and bind the slashed edges.

Adjust pocket on front of dress with upper edge of pocket between the indicating small "o" perforations. Slip the sash through the slashes in front and back of dress and tie in any dainty way.

The applique may be carried out in vari-colored organdy, stitched onto the apron with running or blanket-stitch embroidery.

CHILD'S DRESS No. 1043. Sizes, 1 to 4 years. Price, 30 cent.

CUTTING GUIDE 1043 Showing Size 4 SELVAGE EDGES

FOLD OF 36 INCH MATERIAL WITHOUT NAP

Patented April 30, 1907

### A Dainty Frock for Everyday

4117. Smart belt extensions on this dress, effected by slashes at the sides, are an outstanding style feature. The sleeve may be in wrist or elbow length.

The Pattern is cut in 4 Sizes: 6, 8, 10 and 12 years. A 10 year size requires  $3\frac{1}{2}$  yards of 32 inch material. Serge, crepe knit and jersey weaves, also taffeta are attractive materials for this style.

4117

### An Attractive Cape for the "Little Girl"

4134. This comfortable model will please the "small person." It is appropriate for eponge, gabardine, broadcloth, serge and silk.

The Pattern is cut in 4 Sizes: 2, 4, 6 and 8 years. A 6 year size requires  $2\frac{1}{4}$  yards of 44 inch material.

4134

3815

### When Margie Goes to School

3815. This makes a very comfortable school dress and one especially attractive for slender figures. One could have this in striped or checked gingham, serge, prunella, velvet, taffeta, poplin, twill or jersey cloth.

The Pattern is cut in 4 sizes: 8, 10, 12 and 14 years. A 12 year size requires  $3\frac{3}{4}$  yards of 44 inch material.

4130

### How is This for a Nice Comfy Apron?

4130. A neat and comfortable apron, with ample skirt sections to protect the dress beneath. Gingham, percale or sateen, also muslin and lawn may be used for this style.

The pattern is cut in 4 Sizes: Small, Medium, Large and Extra Large. A Medium size requires  $3\frac{1}{8}$  yards of 36 inch material.

### When Milady Takes a Walk

4122. Fashion has put her smartest lines in this creation. The sleeve and collar are new and attractive. Serviceable pockets are concealed under the neat tabs. As portrayed, checked eponge and linen are here combined. One could have this in gabardine with contrasting material for trimming.

The Pattern is cut in 6 Sizes: 34, 36, 38, 40, 42 and 44 inches bust measure. A 38 inch size requires  $4\frac{5}{8}$  yards of 44 inch material. To trim as illustrated requires  $\frac{5}{8}$  yard of 44 inch material. The width at the foot is  $2\frac{1}{4}$  yards.

Pattern mailed to any address on receipt of 12c in silver or stamps.

Send 12c in stamps for our UP-TO-DATE FALL & WINTER 1922-1923 BOOK OF FASHIONS.

### Pattern Prices

Any Pattern, ON THIS PAGE ONLY, sent to any address on receipt of 12 cents in stamps. Use coupon on preceding page.

# Auditor of Passenger Receipts Office Has Officers as its Guests at a Fine Picnic

By E. B. Hoppman, Magazine Correspondent

**W**ELL, it's all over now but the shouting. Yes I mean the Office Picnic at Miller's Park on Saturday, July 29. Say, did we have a good time? I'll say we did. Thanks to Messrs. Finn, Billmeyer and Miller, the committee who made all arrangements for the big blowout, everything was ideal even to the weather. The fun started when the three special cars left Lombard and Paca Streets at one o'clock, and there was not one dull moment until the jolly crowd returned to the city at 9.30 Saturday night.

We are proud to have had with us the following from among our officers. Senior Vice President George M. Shriver, Assistant to the President James S. Murray, Comptroller J. J. Ekin, Assistant Comptroller J. P. O'Malley, Assistant Comptroller W. D. Owens, Superintendent Relief Department and Mrs. W. J. Dudley, Assistant Treasurer J. Q. McComas, Auditor Freight Claims J. F. Schutte, Auditor Merchandise Receipts W. E. Rittenhouse, Auditor Coal and Coke Receipts L. A. Lambert, Auditor Passenger Receipts C. H. Poumairat, Assistant Auditor Passenger Receipts and Mrs. Louis M. Grice, General Accountant and Mrs. O. J. Rider, Assistant Auditor Disbursements S. W. Hill, Chief Clerk to Auditor Passenger Receipts G. W. Jentner.

Immediately on our arrival at the park, luncheon was served. At 2.30 a game of baseball was played between the two clubs of the office, namely, the Never Wases and the Has Beens. The game was most interesting. Catcher Fussy Seems almost caught a foul ball, but, not wanting to hurt his hand, dropped it. Then he picked it up. The brilliant play of the day was made by

Short Stop Charlie Lewin, when he caught a hot liner 'way over back of third base. The real hero of the game was none other than Comptroller J. J. Ekin himself. Mr. Ekin was called upon to pinch hit for J. O'Keffee. He made a two-base hit.

When the game was over, the contests began. The first was a watermelon eating contest, in which I, E. B. Hoppman gallantly ate my way to victory. The potato race for ladies was won by Miss Lang, while Miss Lee Adele McNally carried off the honors in the stout girl's race. And she carried her weight well.

In the thin girls race Minnie Lang was again victorious. We wish to state that Minnie surely can run. Among the winners in other race were George Lewis and Mr. Smith. A swimming contest between James Zimmerman and Walter Seems was also an exciting event.

Supper was served at 6.00 p. m. and every one certainly was treated right. Pap Purdy and Tom Cook were popular figures with their white aprons behind the bar, passing out all the soft drinks and ice cream you wanted. Excellent music was obtained for the occasion and dancing was continuous from 2.00 until 8.00 p. m.

At 8.30 the special cars arrived to take us back to the city and this was the end of a perfect outing. I want to say, and I'm sure that everyone who was present agrees with me, that the Committee deserves great credit for the great success of this picnic. We, one and all, thank you, Messrs. Finn, Billmeyer and Miller, for the fine time that we enjoyed.

Next year we are going to take a camera so that we can give the readers of the Magazine a peep at our celebrities.

## Claim Prevention Don'ts

By H. L. Gandenberg

Chief Clerk

Office of Assistant to General Freight Claim Agent, Cincinnati, Ohio

### Don't

- Cause freight to be handled roughly.
- Leave car doors open and unsealed.
- Allow freight to stand on platform in rain.
- Ignore instructions given you by Supervising Agents.
- Make any errors in mailing way-bills.
- Pile freight too high in car, or light boxes under heavy freight.
- Receive freight that is not properly marked and packed.
- Enter a car of explosives with matches or lights exposed.
- Violate your loading instructions.
- Enter with freight a car that is defective, with leaky roof, etc.
- Neglect to clean cars before loading.
- Tear shipments of woolens by using hooks.
- Imagine you know it all, but consult your instructions.
- Overlook defective containers.
- Neglect to observe these pointers, which will prevent claims.

### Hire Out to Yourself

- Some day, when you feel gay,  
and you think you deserve a raise  
For your valuable services,  
I tell you what to do:  
You put the shoe on the other foot and hire  
out to yourself.
- Just for a day or two,  
Put yourself in your employer's place  
And keep tab on the work you do.  
Let's see!
- You were late this morning.  
Only ten minutes?  
That's true, but whose time was it?  
You took pay for it,  
Therefore you sold it.
- You can't sell eight hours of time and keep  
part of it—
- Not unless you give short measure.  
Then again, how about that passenger you  
rubbed the wrong way?
- Not your funeral, you say?  
Maybe, but you are paid for building busines,  
Not driving it away.
- How about that work you had to do over?  
You're not paid to be careless,  
You're paid to do work well.
- Not twice over,  
But once, that's enough!  
Then do it right!
- That's what you would say  
If you worked for yourself.
- Hire out, then, to a man named  
"You" and imagine it's up to you  
To meet the payroll.
- Then see what difference it makes  
In the point of view.  
Say, try it once,  
For a day or two.

"Pop" Purdy and "Tom" Cook passed out the liquids

## Who Can Solve These Puzzles?

SOME of you little people have been reading about the puzzles on Mr. Pryor's puzzle page, "The Realm of the Riddle." but did you think that there would be a lot of puzzles for you, too? Well, here are some. If you can solve them, send in your answers to Aunt Mary. Next month there will be more puzzles, for Mr. Pryor has sent a nice lot of them. Let's see who will be the first to answer. There are no prizes given for best answers just yet, but there may be some time. In the meanwhile, practice on these.

The following puzzles were written by two grown-up men, especially for you little folks. One calls himself Mr. Oyster; the other calls himself Mr. Towhead.

### No. 1. RIDDLE

(Each asterisk in the last line represents a letter in making the answer)

Little Miss Midget  
Sat in a high chair,  
She was reading a book  
And exclaimed, "I declare,  
Here's a curious word,  
Without head or tail!"

You may guess what it is  
And send it by mail;  
Or have it all ready  
When I come to call;—  
I'll catch you—O, well,  
It's just \* \* \* \* \* at all!

By Mr. Towhead, Lafayette, Ind.

### No. 2. RIDDLE

What makes a cat chat?

By Mr. Towhead, Lafayette, Ind.

### No. 3. PUZZLE

#### HIDDEN FRUITS

Concealed in these five sentences are five different fruits, spelled out in consecutive letters forming a part of two or more of the words in each sentence. As an example, the answer to number one is "peach" and is formed by the last two letters of the word "ape," the following letter "a" and the first two letters of the word "cherry."

- (1) The boy gave the ape a cherry pie.
- (2) That little chap pleases his mother.
- (3) The yellow cur ran to his master.
- (4) The plumber fixed the leak.
- (5) That girl has her cape arranged nicely.

By Mr. Oyster, Baltimore Md.

Lillian Reay, who wrote the story of her trip to St. Louis, is seen dancing for our Little Folks

## My Trip to Chicago

By Lillian Reay, Baltimore, Md.

LAST month I told you about my trip to St. Louis. Now I shall tell you about my trip to Chicago, on July 1. We left Mt. Royal Station on Train No. 15, in Pullman No. 76. We had another good porter, who would give you any information you wanted concerning the trip. On the next morning we had a fine breakfast on the train. The diner was in charge of Mr. Sipp. At nine o'clock we arrived in Chicago, which means eight o'clock, Central Time, and we went right to the hotel where we were going to stay.

The first sight-seeing trip we took was down to the great Lake Michigan, which was very rough. We spent the entire time down on the lake shore, where there were many small boats for hire. We did not go out, however, for the water was too rough.

The next place we went was into Lincoln Park. They have many animals here; it is a regular zoo, and is also on the Lake. Many people go there and go in bathing. We did some shopping and bought many things to bring back with us.

We left Chicago on July 4, Train 16. We had the Baltimore and Ohio Special Lunch in Mr. Payne's dining car. It was delightful, and the ice cream—oh, I thought I'd never get through with it; it was such a large dish.

To my surprise, when we went out to dinner, we found Mr. Payne again, and the same good waiter, who had given so much ice cream for lunch. We had the best chicken dinner that I had had for a long time, and the waiter, knowing how I liked ice cream, gave me still more than I had

John Gianfagna, who drew this picture, lives at New Brighton, Staten Island, N. Y.

Hurrah for the ice cream triplets! Drawn by Elsie Elizabeth Ganzer, Jessup, Md.

had for lunch. It was so much that my mother had to help me finish it.

After dinner the people in the Pullman felt so good that they were all in a good humor. My father had bought me a ball in Chicago, so one of the men played ball with me, and we had a good time. We all arrived home safely.

If you want good service, travel always by the Baltimore and Ohio, and be sure to eat in the diner.

### Dear Girls and Boys:

How glad I am that so many of you are entering the contest for Safety! And what makes me so pleased is that so many of those who failed to win a prize in the Home Town Contest are showing what real little men and women they are by entering the Safety Contest. That's just fine!

You have, by this time, begun your Safety lists of the little things that you have done to make yourself and other people safe—to keep even the very smallest accidents from happening. I am going to have a group of judges tell me just how much I ought to count for each item on your lists. Your papers will then be marked according to number, just as your teacher marks your examination papers. Then, those who have the highest marks get the prizes. There will be lots of prizes, and I shouldn't wonder if there wasn't something for 'most everybody.

A little girl told me that she lives in the country and that there was nothing to do to help people to be safe there. What do you think of that? Let's think of the many things that this little girl could do in a single day. This is what a little boy who lives in the country told me that he did. He got up early one morning, and as he started downstairs, he saw a pair of shoes that his little brother had left on the stairway. The stairway was dark and it was

possible that somebody might stumble over those shoes; Dick picked them up and took them back to his brother's room where they belonged. That doesn't seem like a big thing to do, but suppose his mother had fallen over them in going down the steps. Dick had done almost as much as if he had asked Mr. Brown to stop, look and listen before he drove his car across the railroad tracks.

Then Dick went downstairs and out on the porch to get the paper. There in the floor of the porch was a big splinter that had splintered off. He picked it up, and told Daddy, who fixed the place before breakfast. At the table, Little Brother dropped a cup. It fell to the floor and broke into many pieces. Dick got the dustpan and broom and swept up the pieces before they had a chance to stick into somebody's shoe. That morning he fixed Little Brother's wagon so that it wouldn't fall apart while the little fellow was riding in it; he suggested to mother that she wear a pair of old stockings on her arms when she went for berries, so that her arms might not get scratched; he picked up several pins from the floor; he amused the baby so that she wouldn't get into mischief while Mother

was out; he asked the hired man to fix his hook so that it wouldn't break again, and he took a green apple out of Baby's hands.

There are nine things that Dicky did for Safety—all in one morning—and I am sure that your lists will show me lots and lots of things that other little folks can do, whether they live in the country or not. Send them before October 10.

Yours lovingly,

*Aunt Mary*

### Making Him Toot

"Willie!"

"Yes, mamma."

"What in the world are you pinching the baby for? Let him alone!"

"Aw, I ain't doin' nothin'! We're only playin' automobile, an' he's th' horn."

—Louisville Courier-Journal.

This is Marysville, Indiana, Station, where Dorothy Cassady's daddy is agent. Here also is a load of chickens, etc., all ready to go out on the train. It must be lots of fun to watch them, isn't it, Dorothy?

# Safety Roll of Honor

## Staten Island Lines

**Fireman Edward Barrett.** July 31. Noticed two small boys playing on trestle at Old Town Road Bridge as train was descending Arrochar Hill. Shouted to Engineer, who applied emergency brakes, but who was unable to stop train short of the bridge. Realizing possibility of boy being struck by engine, Fireman Barrett left cab, got out on running board, and as train was about to pass, caught hold of the boy, lifting him clear of the engine. The boy's shirt gave away and he dropped 20 feet to the street below. Train stopped. Fireman went back to boy, picked him up and carried him on train to South Beach. Here ambulance surgeon found boy uninjured.

**Telephoner O. M. Bendig.** July 19. Observed and reported to Dispatcher's Office, hole, 5 feet in diameter, beneath ties of both rails in westbound track, 50 feet from A. K. Office. Westward track put out of service until this dangerous condition made safe.

## Baltimore Division and Baltimore Terminal Division

**Brakeman G. T. Hopper.** July 15. Westport. While working with engine No. 376, noticed broken rail on Long Siding. Reported condition to Conductor T. W. Lafferty, who, although after working hours, had section foreman repair track.

**Conductor M. Mundie, Brakeman F. A. Ebberts.** July 16. Curtis Bay Yard. Observed brake beam dragging under car B. & A. 16270, pulling out of yard, engine No. 4010. Went to Sea Wall Tower and notified operator. Train stopped, brake beam removed. Possible derailment averted.

**Brakeman L. J. Bocdry.** July 25. Mt. Clare Junction. Noticed broken flange on Baltimore and Ohio 172006. Notified yardmaster.

**Patrolman G. W. Hisley.** July 31. Bay View. Observed brake rigging down, Baltimore and Ohio 147573. Notified operator. Train stopped and brake rigging adjusted. Slight delay to train. Possible derailment averted.

## Cumberland Division

**Brakeman B. H. Grayson.** August 6. Keyser Yard. Observed cracked wheel in Western Maryland car 11392. Immediately reported condition to proper authorities. Car set out.

## Wheeling Division

**Agent E. E. Higgins.** August 6. Sandyville, W. Va. No telephone being available, took his car to the break. Notified by Mr. Lewis Clem of broken rail. Flagged Train 768, near Meadowdale, while off duty.

**Mr. Lewis Clem.** August 6. Near Meadowdale, W. Va. Discovered broken rail. Went to home of Agent E. E. Higgins and notified him in time to flag train No. 768.

## Observations Made by Operators, Cumberland Division, May, 1922

Date	Train	Engine	Operator	Location	Shifted Loads	Brake Rig'n Down	Projection From Car	Hot Car Box	Brakes Sticking

Cars marked x set off on line of road.

## Newark Division

**Operator H. H. Supplee.** August 10. Dillon, Ohio. Discovered brake rigging dragging on Train 85. Signalled conductor. Train stopped and trouble corrected.

## Akron Division

**Patrolman M. J. Teater.** August 11. New Castle Junction. Noticed brake rigging down on car St. L. & S. F. 124411, in train of engine 4073. Notified conductor immediately. Train stopped. Defective rigging removed.

**Brakeman E. R. Stephenson.** August 4. New Castle Junction. Discovered box bolts missing and arch bar dropped and hanging close to tier on east end of rear truck, car N. Y. C. 495681. Reported condition to conductor. Car set out and possible accident averted.

**Operator V. P. McLaughlin.** August 4. Newton Falls. Discovered fire in three different places on Bridge No. 47½, located just west of his station. Notified Supervisor G. W. Hoffman. Both secured buckets and carried water from nearby pump. Blase extinguished before any damage done.

## Toledo Division

**Operator O. M. Fridell.** August 6. Deshler. Noticed broken arch bar on

empty L. & N. gondola x4175 as train was passing. Notified crew. Car set out.

**Operator C. H. Phillipi.** August 3. Bates. Discovered bent axle. Car set out. Possible serious accident averted.

Our idea of sinful wastefulness is a pretty girl that has never been kissed.—*Humbug*

Girlie: Can you give me a couple o-rooms?

Hotel Clerk: Yes. Suite one.

Girlie: Sir!—*Goblin*.

## Bon Voyage

Passenger (from car window): Hey, you darn fool, here goes the train and you haven't put my baggage aboard.

Porter: You're the darn fool; you're on the wrong train.—*Le Rire* (Paris).

George T. Hooper

F. A. Eberts

## Among Ourselves

### Baltimore and Ohio and Baltimore and Ohio Annex Buildings

#### Law Department

Correspondent, GEORGE W. HAULENBECK  
Our New General Counsel

Hon. John J. Cornwell, elected general counsel of The Baltimore and Ohio Railroad, Company, vice Hugh L. Bond, Jr., deceased took possession of his office on July 24. He was warmly greeted by the Law Department force. An appropriate mode of meeting our attorneys was adopted by the new official in inviting them to a luncheon on the day he appeared for duty. The participants report a pleasant meeting.

Though I have been in the Law Department for 41 years, we have only had two officers bearing the title of General Counsel in all that time: John K. Cowen and Hugh L. Bond, Jr. Mr. Cornwell makes the third. He stands high in the legal profession and is well fitted for his new position. And let me tell you something—he is at his desk at nine o'clock every morning!

Albert E. Frankton

With the advent of our new general counsel, Albert E. Frankton came into the Law Department. He will act as secretary to Charles Radley Webber, assistant general attorney, Mr. Horsey being assigned to other duties. It is a pleasant task to utter words of praise of Mr. Frankton, for I know him well. He was formerly in our Relief Department. Then he entered the service of R. J. Taylor Company, ship ehandlers, Baltimore, and now he is back with us again. No spot like the old Baltimore and Ohio Building after all, as I can testify from my long period of service in the Law Department.

Mrs. Gertrude Kelley, Marsden Smith's secretary, made preparations for her annual vacation in July. She had given faithful service in the office, and was quite ready for a rest. Her preparations for a respite, though nominally for herself, were really made for her mother. While arrangements were being perfected, the mother was taken ill; seriously ill, and died quite suddenly. We were all dreadfully disturbed over the sad occurrence.

One of the Company's attorneys in Indiana who is 80 years of age and still in the ring, has been in the service continuously for nearly 40 years. While receiving an annual card of travel every year, he made only one trip, going to Washington, Baltimore and Philadelphia. That was the

only time that he has been absent from his post. Never took a vacation in all that time; never took a drink of whiskey; never played a game of cards, but was always addicted to the use of the weed. This, however, he abandoned, when he attained his eightieth anniversary. These interesting facts were elicited in answer to a letter congratulating him. He is held in high esteem by the Law Department.

"Ambition has but one reward for all—  
A little power, a little transient fame;  
A grave to rest in, and a fading name."

I have always wanted to meet one of our locomotive engineers, especially one running my favorite train No. 524, for it is on this train that I am conveyed to Philadelphia every Saturday on my week end trip in such good shape that I can sleep the best part of the way if so inclined.

I maintain that a locomotive engineer is a man of courage and I told William E. Carroll, one of them, that I always feel like saluting the occupants of the big engine when the trip to 24th and Chestnut is consummated.

#### Engineering Department

Correspondent, OSWALD EDEN

"Handle the hardest job first each day.  
Easy ones are pleasures."

During the first week of August our chief engineer, H. A. Lane, Engineer of Buildings L. P. Kimball and L. A. Stinson, consulting engineer, accompanied by Mr. Lane's secretary, M. T. Chambers, made a tour of some of the lake ports of the United States and Canada, inspecting the grain elevators, in connection with the proposed construction of new grain elevators at Locust Point, which were destroyed by fire last July.

"Do not be afraid of criticism—criticize yourself often."

We have quite an athlete in Harry Roebuck, one of our draftsmen. In races held by the Maryland Swimming Club on Saturday, August 12, Harry was in three of the canoe events and won medals in each. In one, mixed doubles, paddling with a young lady as a partner, he came in second. In another, senior doubles, with another fellow, he came in first. But canoeing is not the only sport Harry goes in for. Besides being a "regular" athlete Harry is quite some lady's man. Gosh! he's a devil when it comes to wimmin!!

"Be glad and rejoice in the other fellow's success—study his methods."

Due to vacations and sickness our tennis team was obliged to call off its return match with Latrobe Park. To date, August 15, we have only played two matches, winning the first and losing the second.

"Be enthusiastic—it is contagious."

One of our young lady "stenogs" spent her vacation in the Windy City, going and coming via the Best and Only. She said that she preferred the windy city to "little old New York" any time, any day, any where. And what is of more importance, she said that she thoroughly enjoyed her trip on the train, stating that the porters and all employes she came in contact with were most courteous and solicitous for her welfare.

"Do not be misled by dislikes. Acid ruins the finest fabrics."

As a part of their vacation three of our draftsmen, H. T. Roebuck, C. W. Gabrio and L. W. Warren journeyed to Asbury Park, N. J., and from all accounts had "some time."

"Do not have the notion that success means simply money-making."

When the Baltimore chapter of the American Association of Engineers gave their annual excursion down the bay on Saturday, August 5, some of the members of this department went along and reported having a fine time.

"Be fair, and do at least one decent act every day in the year."

Mention should be made of the fact that we have another assistant file clerk, Charles K. Boxwell. At the same time the Bridge Department got a new file clerk, E. R. Gallagher, brother of our Joe Gallagher. Mr. Boxwell took the place of Edward J. Norwood, the only "beau brummel" of our department, who accepted a position as stenographer in Chief Engineer Stimson's office. Mr. Gallagher took the place of Howard F. Buffington, who left the service to enter the illustrating and advertising game.

"Honor the chief. There must be a head to everything."

Since the burning of two of our grain elevators and piers at Locust Point, the members of the drafting room have been busy preparing plans for a new terminal layout at that point.

"Have confidence in yourself, and make yourself fit."

Speaking of shirts, it appears to me that Mr. Hillcary and Henry Seitz are running a race to see who can wear a shirt with the most brilliant colors. The other day—it was a Saturday and thereby lies the reason probably—Henry came to work all decked out in a shirt that would dazzle the eyes of a bull. Mr. Hillcary is not so particular in sticking to one color, wearing everything, just so it speaks for itself.

"Harmonize your work. Let sunshine radiate and penetrate."

Several members of the tennis team entered the inter-park elimination tennis tournament held by the Baltimore News, August 19 to 26.

"Lady Jane" just returned from her vacation which she spent in the country. She says she gained eight pounds, so country life must agree with her.

"Jazz Lovers Dance to Radio Program"

"W. E. A. R.'S Concert Especially Pleasing"  
\* \* \* \* \* Thousands of radio fans throughout Maryland still feel like dancing as a result of the program broadcast last

night by The American radio station, W E A R. It was a jazz concert, pure and simple, and the director of the Novelty Five Orchestra, Gus Schell, let his musicians go the limit in the selections played. One snappy piece followed another so rapidly that it was all the operators could do to keep their heads and feet still and run the station efficiently.

"Beginning with the appropriate song, 'Dancing Fool,' the orchestra played for more than an hour and concluded with 'Teasing.' The many telephone calls received at the offices of The American after the concert gave proof that Maryland loves jazz and always wants a little more..."

—Baltimore American, July 22, 1922.

(The above mentioned director of the orchestra, Gus Schell, is assistant secretary to Chief Engineer Lane, and is a musician of repute, playing either the cornet or the saxophone.)

#### District Engineer's Office, Cincinnati

Correspondent, G. F. DAUBENMERKL

ANOTHER ENGINEER—H. L. Scribner, transitman, announced the arrival of a big boy on July 31, 1922. Registered weight 12 lbs. 4 oz. Scrib says it looks like him. We are wondering if he will follow in the steps of his Dad. "Scrib" passed the "Rasola's." Congratulations, Herbert, but the boys are afraid you will have to buy a larger size hat.

Talking about "bags." There are paper bags, and cloth bags, etc., but ask Mr. Daubenmerkl, he seems to be a good judge of bags.

#### Office of District Engineer Baltimore, Maryland

Correspondent, J. FORD COLLISON

C. L. Righter has gone into the huxtering business in addition to his position in the District Engineer's office. Every day finds him with his "little tin liz" piled up with fresh vegetables **picked daily** from his own garden. Everybody, almost, in the Engineering Department, takes a package home most every day—containing vegetables purchased from our famous Mr. Righter.

#### From Our Philadelphia Office

Will wonders never cease? At least we have found three engineers who are practicing religion, namely Jones, Little and Wich, and this is their motto "The Lord loveth a cheerful giver." They are beginning to believe that "It is more blessed to give than to receive."

We have now with us Messrs. Eddie Little, Johnny Mulligan and "Handsome" Harry Rankin, and we will quote you just for fun some of their peculiarities, taking first Handsome Harry: Harry came to us five weeks ago from the Surveys Department and is rather used to having the ladies fall for him. Only recently he made the following assertion, "he had been here five weeks and hadn't a date yet." Oh, you cruel girls of Philadelphia! Now we have Johnny Mulligan. He, too, is a handsome brute (and he admits it). However, unlike Handsome Harry, Johnny is very popular and has his greatest trouble each noon getting dressed to greet the ladies, we assume. However, Johnny doesn't admit this, and can't give us any reason for all this display of dress. As you know, this is very unusual for us "field fellows," so we will probably have to hold an investigation. As to Eddie Little, well—there is a lot of stuff we could say but won't—only we hope that concrete mixer doesn't turn over again.

For the last few weeks that Wich fellow has been pestering us in the office, although

we understand he now wishes he had remained in Newark. Just why we can't say.

Assistant Engineer Teders is having his troubles these days (but not at nights) trying to keep his figures as high as the contractor's when it comes to counting the carpenters working on the job. We recommend an adding machine as he can use it at nights also.

Bill Gwathmey's better half has gone to the country and "Bill" can now sing the old song. But confidentially "Bill" has been losing weight since he began cooking his own meals. When Mrs. G. comes back and Bill greets her at the station little Mary will ask her mother who he is.

One of the busiest men in Philadelphia these days is our beloved Arthur Alexander Boettger. Since the City let that Five Hundred Dollar contract to look at the South Philadelphia Elevation, Arthur has been absent from our midst the greater part of each day. We miss him terribly.

Correspondent, GEORGE DOBBIN

Now that the heat of the summer is over, we can begin to give a serious thought or two to the business of living. No one who has climbed the dizzy heights of effort to fame or achievement will truthfully admit having reached success through any one of the miraculous agencies which some folks insist are essential. Genius is but another and condensed description of intelligent, constant and persistent striving after a definitely set goal. Every individual who has gotten into the habit of following the "crowd" asks how? how? and in that one query admits defeat because unable to use good judgement. No one knows better than you and I our qualities and faults. If we are honest with ourselves they loom up like the debit and credit sides of a ledger. We can, if we will, cradicate the habits that pull us down to the level of "the crowd," and, at the same time, build up our assets to make us sufficiently valuable for the higher places of responsibility. Countless numbers daily report to their allotted tasks on time; so do we. At the ring of the bell that signals quitting time, crowds pour out of the various offices, mills, factories and stores; we are in those crowds. Every individual works at certain assignments, and, having performed them, feels a sense of virtue pervade his being, although he realizes that were these duties left undone he probably would

A RIVERSIDE TRIO  
Left to right; Turntable Operator D. W. Wolf, Tender Repairman H. W. Rice and Tender Repairman Helper John Minor

be replaced. Through all this daily routine shine the rays of *hope* that make it possible. The greatest of sins are *apathy* and *lack of courage*; they father all the rumors regarding "pull" and "favoritism," and at the same time reduce the incentive to build a mental foundation that will withstand the wearing of the years. *You can reach your objective if you will.*

Which reminds us that the American Army in the recent argument "Over There" won every battle. They could have been defeated, but they weren't.

Our sincere sympathy is extended to Miss Williams of the O. S. & D. Division in the loss of her sister, who passed away after a lingering illness on August 1. There is consolation in the fact that the Guiding Hand may leave temporary sorrow for the good of all concerned.

Congratulations to "Rudy" Benfer on the birth of a husky son! All you have to do now, Benny, is to watch him grow, educate him, make a smart man of him, and then dare him to fail to come up to expectations. What? Yes, we'll have a cigar! Success to the Junior!

Following the example of several friends and associates, our Miss Sullivan had her locks shorn on August 4 last. "Aggie" sure does make "an appearance" and we're all much in favor of bobbed locks if the girls would all look like her in that style of "hair-cut." Some of them think they do but—

Earle Redding will also accept our congratulations on the birth of a fine little daughter. Things are certainly "looking up" and "Teddy" Roosevelt must feel fine when his shade visits our office and gazes upon the earnest followers of his teachings.

Not a bit daunted by all the recent happenings, our friend, E. Perine Wootton, has gone ahead (even as you and I), sat in the moonlight, held hands, heaved a sigh or two and asked Her to be His'n! Needless to say, the "sweetest girl" couldn't resist him and now the ring is bought an' everything. Congratulations!

Sergeant Harris of the 5th., M. N. G., was our sole representative at the National Guard encampment this year. We believe that this winds up another military career. Ed. doesn't seem to enjoy being told to "do things by a "shave-tail." After a few years the novelty does wear off and you can't help but feel like telling 'em where to head in.

Do your Xmas shopping early!

We have had our experience with the bowling team, the baseball teams and some of us with the poker experts who play in teams. The days are fast approaching when the football sharks, past-and-present, also think-and-hope; soon they may get out the necessary paraphernalia and start to work bumping and being bumped. We are not to be outdone by the classy individuals who speak of "country clubs" as a matter of course. Bring on the victims!

"Gene" Bahn, as he is popularly known up and down the line, claims that the one comfortable place any man can spend his vacation in—is the "living room" of a wrecking train. Even at that, Mr. Bahn seems to always find plenty of time to extend a hearty "good morning" to all the great, near-great, and hope-to-be-great folks of the Baltimore and Ohio, with whom he comes in contact.

It took him a long time indeed, but our Mr. Tyson, the Royal High Supervisor of the Piles, has at last decided to come out to the country; moreover he has his eye on Halethorpe. It's the life—chickens, garden, fresh air, exercise, trees, flowers, birds and everything. Oh, boy!

Vacations are dying slowly away. Gosh! Another year before the joyful days are repeated. The politicians seek popularity—why not legislate fifty weeks vacation and two weeks work, then you would see the boys and girls flock to the polls. However, some folks have a habit of taking a perpetual vacation and calling it work, so that it wouldn't make a great deal of difference to them anyway.

When everything looks sad and blue, the country going to the bow-wows, winter coming and coal scarce, prohibition raising the price of "likker" sky high; grocers elevating prices while the payroll rides the elevator in the opposite direction, just talk to "Texas Bill" Bowhay! Mr. Bowhay radiates sensible ideas like Old Sol radiates heat. Are you downhearted, young feller? See Bill.

Our whole-hearted and sincere congratulations to Miss Zepp on her venture into the turbulent waters of the Matrimonial Sea! We feel positive that the "rank" of Mrs. Flynn and the active "skipper" in the person of an officer of the United States Navy, will make the Voyage of Life quite safe, and with abundant love as motive power, very happy.

At the recent meeting and trip held by the Baltimore and Ohio Accounting Association, Brother "Bert" Hall (with his paper suit), was among those who represented our department. In the midst of the gay festivities, Brother Hall was heard to turn down an offer of an exceptionally good cigar (some folks have all the luck), but went on record to Mr. Shriver as being very much in favor of "another one of those hot dogs!" Needless to say we were all well represented and everybody had a wonderfully enjoyable time.

On August 11, Mr. McShane, O. S. & D. Division, was operated on at St. Joseph's Hospital for appendicitis. It is our sincere wish that a speedy recovery will follow, for we miss his cheery "good morning!" Take it easy, Mac, and it will all turn out O. K. We are all with you and for you!

#### Printing Department

Correspondents, H. R. FOGLE AND HARRY TOFT

We are pleased to announce that Mr. Callender, our proofreader, has returned to the proof desk after being absent for several weeks because of a nervous breakdown. Also we are sorry to announce that our other proofreader, Mr. Handley, is sick at this writing.

Roland Vermillion, "Red" for short, has been appointed messenger.

Since our last issue several of our members have been included in the automobile owner's class, among them being our efficient stone hand, William Haigis, and Composer Shackleford, who resides in Washington, D. C.

We wonder how it feels to be marooned out several miles from nowhere and have to walk three miles through the pouring rain with a leaky pail for gas? Ask "Slim." He knows.

M. L. Johnston, compositor, spent several weeks up and down the "gay white way" of New York, and, judging from the smile on his face, he must have enjoyed himself.

While working at his place of employment, Robert, son of Composer R. E. Hardy, had two of his fingers cut off at the first joint. We are pleased to say, however, that he is getting along as well as could be expected at this writing.

The following notice was recently posted on the Bulletin Board:

"Effective July 1, 1922, Mr. William E. Staines is appointed foreman of the press room, vice Mr. E. F. Leilich, resigned."

All the boys join in wishing Mr. Staines every success in his new position.

Willie Hopkins has been appointed porter in place of Murray Lindsay, resigned.

We appeal to the members of the Printing Departments, including the press room and the bindery, for bits of news.

#### Telegraph Department

Correspondent, DELLA M. HAIN

"I do like to hear Miss Bryan answer the 'phone. It sounds as though it is such a pleasure to do it," is the remark made to me the other day. What could be a better compliment? Do you give the same good impression to the party at the other end of the line? Watch yourself, and *do it!*

"Uncle" Frank Adams—so a little bird tells us—has been appointed "Colonel." The same little bird gave us the news concerning "Colonel" Donnelly's appointment to "General."

We are pleased to note that Mr. F. C. Beckwith, vice president and general manager of the Hamilton Watch Co., Lancaster, Pa., and Mr. Julius Armbruster, representing the Illinois Watch Factory, Springfield, Ill., called at this office to assure us of their co-operation.

Our superintendent has discontinued his mid-day meal, in the hope that it will cause a decline in his weight. May his shadow ne'er grow less! His avoirdupois may be reduced, but his worth and value to the Company—never!

Cupid has been playing checkers in our telephone exchange in the Baltimore and Ohio Building. Just recently he has taken a chance at the Office of Superintendent Telegraph. He is a little undecided yet, however, as "she" is rather "kittenish" on the subject.

As an afterthought, we want to add that anyone not acquainted with General Supervisor Time Service Donnelly, should call and see him in person, as the photograph in the July issue of the MAGAZINE didn't do him justice. He's better looking than that!

#### Transportation Department

Correspondent, L. K. BURNS

Harry Burns, another travelling ear agent, sends us word that he is the daddy of a handsome baby girl. It goes without saying that we know which parent she resembles.

Then, just to be in style with the others of his class, along comes H. F. Loelch, giving us this same information about himself and the "Missus." They've a baby girl, too, but H. F. didn't say whether she looks like her daddy or not. Whew! All of 'em are girls! Wonder what this railroad's coming to. Oh, well, Boys, I hope you'll hustle along with the cigars. I need a smoke.

We're glad to see W. C. Thiede back on the job in the Mine Rating Bureau. He worked a while up at the mail desk. S'pose he's glad to get back here, too, even if it does mean a lot of real work.

Reckon you've all seen that red sweater Miss Coplan's been knitting on, eh? When she gets it finished she's going to teach us fellows how to knit. I want a green one; Carl wants a red one, and I guess

Ruth McKay Sherry

Phil Wood—Oh, shucks! He's got a wife to knit his sweaters. When we get through with our knittin' we'll get that photographer man to make a picture of us for the MAGAZINE. Those girls shan't have anything on us.

The accompanying picture is of Miss Ruth McKay Sherry, the little daughter of Traveling Car Agent H. B. Sherry. She was just ten months old when this picture was taken, and had been saying "Da, da!" for some time; at least, that's the way H. B. translated it. You know how these proud papas rave. Anyway, she's a bright little miss, and the whole gang is proud of her.

The Mine Rating Bureau Boys will play a real baseball game with the rest of the office on Saturday, September 23. All come out and root your loudest. Girls, you'd better bring along a little grub; that game's going to be a long story, and those who root for the other side may feel a bit weak after the game.

### Valuation Department

Correspondent, G. B. SAUMENIG

Cupid has again made himself known and it is with pleasure that we have to advise that on Monday, August 14, at Harlem Park M. E. Church, Charles Ellwood Smyrk, formerly of this office, but now associated with Cost Engineer Bennett, was married to Miss Flossie Blanche Christopher.

At this writing the dates have not been set but we have it doped out that very shortly J. Fred Rau of this office and Miss Anna W. Reinhardt, also Miss Nellie Schaefer of this office and Mr. Conrad Johnson, will take the fatal step.

Miss Waugh returned from Atlantic City with bobbed hair. Some class to her!

Our friend Bartellon, on his return from Royal Oaks, Md., gave the most glowing accounts of his fishing adventures there. We wanted to believe all he said but someone else, who had been to the same locality at about the same time, differed.

At this writing, McCrone and Cronkhite are the main figures at the Halthorpe Carnival. No doubt but that it is a fine combination.

Smythe advises that Babe Ruth is no longer in his class. Recently he knocked out two home runs in one game. That boy

always delivers the goods and there is very little that he cannot do. He persists in thinking that baseball was originated in Cincinnati and we have to differ from him owing to this city's standing in the race.

That boy Gover could not stand the pace in Washington, D. C., and is again living in Baltimore. We are glad to have him back with us.

Strange news has been circulated about Mrs. Larmore. It may be and it may be not. Later on we may give the press the best piece of information ever published.

Duncan Alley is about deserted, only three inhabitants with an occasional visitor left. That boy Johnson is certainly missed by Miss R.

Did you ever notice the importance of the guardian of the ash can. Ask Storm his duties. Where you see him, there is always a Rau.

One of the most important things in the office on the 1st and 16th is the word "Check." Sometimes early and sometimes late, yet it is always welcome.

Marie and John Svec, Jr., children of correspondent, Office Auditor Disbursements

Miss Ritter is again acting suspiciously and we wonder whether it has happened or not. She has us guessing all the time. What is the use of waiting?

We hope that the team representing the Valuation Department this year in the Duck Pin League will take first place and keep it. They can if they will.

### Office of Auditor Disbursements

Correspondent, JOHN C. SVEC

Guess Who This Is!

In our midst we have a maiden, shown in this picture rare;  
Who as a little lady wore ribbons in her hair,  
But now she has discarded them for ear buns, a large pair—  
And has on rare occasions wished she knew well how to swear.  
She travels light and airy, without a single care,  
And cleans up every morning' round a head clerk's desk and chair  
And to her luncheon daily you should see her race and tear.

As announced in the July issue of this MAGAZINE the wedding of Anthony C. Koehler to Miss Francis Hergenroer took place on August 3, at St. Michael's R. C. Church. The entire office joins in extending their congratulations.

Miss Eleanor M. Erdman has returned to the office after having been away several weeks owing to an operation for appendicitis.

### Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPERT  
New Business

When two persons from the same office commence thinking about and looking at furniture, I think it is only fair that they should give their fellow workers a chance to save up. Come on and tell us about it. We know who you are.

### Old Business or Gone out of Business

One night Els and Bill

Had quite a large spill.

Now the hope chest is at much of a stand still.

Edith and Glen didn't hit it up right,  
So they parted for good in the course of a fight.

Florence and Ray, in a storm of great tears,  
Each had their say, ending five years.

Our little Helene couldn't stand being bossed,

So Joe got the can, and that's how he lost.

Now about Elsie, our little stenog,  
We hear she and Bernard have slipped up a cog.

The employes of this office were guests of C. P. Spedden and W. H. Brauer at Maryland Park, where a watermelon feast was held, evening of August 16. The party went direct from the office, and upon arrival on the grounds, lunch was served, all kinds of sandwiches and drinks being on hand in abundance. The main event of the evening was the watermelon feast, twenty-five of those large juicy "Annearundels" falling before the onslaught.

In addition to the eats and drinks, a set of dusky jazz boys kept things in motion, and from 6 to 8 it was a case of eat, drink and dance around; eat or drink some more and then dance another round and so on, until the music stopped and then the Victrola was pressed into service and the dancing resumed in the clubhouse.

If anyone failed to get enough it was his or her own fault, because plenty was on hand and it was to be had for the asking.

Too much credit cannot be given Messrs. Spedden and Brauer for their great generosity in making these affairs possible and it certainly is to be regretted that more of the employes in the office do not attend them.

She used to look like this, but she wears earbobs now—See Auditor Disbursement's Notes

## Invest in a Hamilton if You Want True Time All the Time

**B**UYING a new watch requires some thought. You are making an investment that should pay you dividends of true time for years and years to come. Eliminate guess-work and make your choice the HAMILTON WATCH, "The Railroad Timekeeper of America"—the watch that Conductor J. E. Hopkinson, of the Boston and Maine Railroad, has carried for twenty-five years with great satisfaction.

You owe it to yourself to purchase this watch with a service record. Thousands of your fellow workmen heartily indorse it, and owners of thirty years or of six months standing are equally enthusiastic about its unrivaled accuracy and dependability. Ask your jeweler to show you

**The "992" Movement: Now \$48.50**

This is the twenty-one jewel movement that is preferred by so many Railroad Men. Your jeweler will be glad to suggest a suitable case for it and you can choose the dial you require. Make it "your watch," and you'll have true time all the time.

Send for the "Timekeeper," a most interesting booklet showing the various HAMILTONS and giving other valuable watch information.

It is sent postpaid on request. A postal card brings it to you.

HAMILTON WATCH COMPANY, Lancaster, Penna., U. S. A.

# Hamilton Watch

"The Railroad Timekeeper of America"

However, I feel sure the sentiments of all those present are voiced when I state that a wonderful time was had by all, for which we are deeply appreciative.

We understand Howard A. Ekas bought a bathing suit and when he tried it on, found it was too small. Curses! Got a larger size and was all set for a big display at Bay Shore when it rained. Couldn't go in bathing while it was raining, might get the suit wet. It's a tough old world. Next thing we know, Howard will be playing tennis or golf. Something fierce the way that fellow is cutting up.

#### Auditor of Freight Claims

Correspondent, NELLIE F. COLLISON

"Not in the clamor of the crowded street, not in the shouts and plaudits of the throng, but in ourselves, are triumph and defeat."

The members of our department to a considerable degree realize this truth, so beautifully expressed by Longfellow. We are in rollicking good spirits and up to things, enlivened by the fact that we know how to enjoy the fruits of our labors, a condition inspired by the success of our outing, which was outlined in the August issue of our MAGAZINE.

Our social activities are doing a "rushing business." We have organized a Welfare Association. On July 28, 1922, a meeting was held for this purpose, and to encourage social features—dances, outings, etc.; in fact, to promote the general welfare of our department, with the success that naturally comes from a band of contented workers.

The following officers were elected: R. H. English, president; W. A. Doxen, vice president; C. W. Eger, secretary; G. L. Bauerle, treasurer. A committee headed by G. W. Ritter as chairman, was appointed to draft the by-laws for the Association. W. A. Geraghty was elected Chairman of a committee to make arrangements for an entertainment and dance, on November 24, 1922.

Last, but most assuredly not least, our chief, Mr. Schutte, has proffered a donation in the way of a hall in which to hold our activities of November 24, and like the poet we exclaim in unison, "Would that my tongue might utter the thoughts that arise in me."

We wish to extend our congratulations to Mr. and Mrs. P. L. Grafton on the birth of Geraldine Marian, July 20, 1922, and we do not blame P. L. if, at present, his world is only large enough to contain his little daughter.

Grace L. Stanford was the hostess at a delightful dance given in honor of her cousin, Miss Fern Redden, of Connecticut, which was voted a great success by all present. Oh, yes! a lovely moon had the usual effect on several couples.

They tell us that a certain blonde has given "Jose Romero" the "gate." It would seem that he has been trying to catch something besides baseballs, but has been unfortunate in his endeavors. Just a little advice, dear Jose, try measles.

Whatever other inconveniences our Joe may have to endure when calling on his latest sweetie, he can console himself in knowing there is safety in numbers. Never mind, Joe, we have been told that true love always finds a way.

#### STOP—LOOK—LISTEN!

New Motor Bus Line

717 East 22nd Street  
to

Baltimore and Ohio Annex Building,  
One trip Daily, except Sun days.

Leaves 7.30 A. M., arrives Annex 7.50 A. M.  
Only Stout People Desired

Miss L. P. has lease on Machine and  
Chauffeur.

Sometime ago a small, fat boy was lost, strayed or stolen on Washington Boulevard. We are glad to inform our readers that Francis has been found and is now residing at Dorsey, Md. What's the attraction, Francis?

Dear H. J. B., 3rd, of all the places in the world, be sure to give Philadelphia a wide berth.

We are wondering if G. L. S. still "rolls—own" after that memorable trip to Carlin's.

Just over the Canadian borderline seems to be a popular rendezvous for many of our vacationists. Would an interpretation such as we might expect from a certain Mr. Crabbe be of real value in satisfying our curiosity?

Is it E. M.'s enthusiasm for our ball team that makes her an unusually regular attendant at the Saturday afternoon games? She has us guessing although she has been conspicuously absent on certain occasions when another party's fancy did not turn to baseball.

Our enthusiasm again expresses itself in a picked delegation, J. B. O'Toole, manager, to represent us in the Bowling League of 1922-1923.

It is absolutely impossible to appreciate the "Whistling Chorus" these sultry August afternoons.

#### Auditor Passenger Receipts

Correspondent, E. B. HOPPMAN

In taking over the duties of correspondent during the illness and absence of Frank Clarke, I hope I will be able to officiate as proficiently as he, and I earnestly request the hearty cooperation of all my fellow employees in making our section of the MAGAZINE an overwhelming success. We wish Mr. Clarke a speedy recovery. May he soon return to his duties in fine health.

Our office Romeo, Carl F. Grund, has taken unto himself a Juliet. We congratulate him! Mr. Grund and Miss Mary Hilficker were united in wedlock at the Parish House of St. Gregory's Church on July 22. Immediately after the ceremony they journeyed on their honeymoon to New York City, Albany, Buffalo and Niagara Falls. The "Mr. and Mrs." are residing at 204 Rogers Avenue, where they have entertained many friends since their return. Carl was a popular young man and the couple have received numerous presents. The clerks of the office presented the couple with a beautiful chest of silver, and Misses Margaret McAvoy and Mollie Hamlen expressed their best wishes with a set of handsome silver teaspoons to match, while a beautiful engraved silver set was the gift of Miss Eva Hammond and Gus Brandt.

Miss Guyton recently returned from her vacation—a trip up the Atlantic Ocean to Boston, a tour of Niagara Falls and a day on the Hudson River. The fair young lady informs that she had a wonderful time, but the ocean was much larger than she expected and behaved roughly at times.

The Misses Eva Hammond and Leah Radcliffe spent a week at Ocean View. We certainly miss their bright and cheery smile during their absence. Glad to have you back, girls. Don't leave us so long again. A certain fellow, namely Gus, was quoted as saying during Miss Hammond's absence that some weeks certainly seem awfully long. We get you Gus, and we understand.

We announce that Carl Miller, formerly of this office, is now the proud daddy of a bouncing baby boy. Uncle Fred (Miller) of our office, is to stand for the little Miller when he is christened.

On July 23, the clerks of the Statistical Department and friends were the guests of Mr. Hullett and his sister at their summer residence at Round Bay on the Severn. Those present were Mr. and Mrs. J. D. Zimmerman and son, Mr. and Mrs. Shaffer, Misses Mildred Sullivan, Margaret McAvoy, Katherine Leacy, Helen Harte, Mollie Hamlen, Blanche Broderick, Messrs. Francis Bopp, John L. Jefferson, W. T. Jenkins, Ben Clarke, Barber and Shipley. Much talent was represented and Miss Mollie Hamlen carried off the honors for fancy diving. We have it from a good source that Miss Margaret McAvoy was also a center of attraction and that she has been made an offer by Mack Sennett. Miss Harte said she had a fine time, but the water was not as green as it is in Ireland. A fine time was had by all and the occasion will long be remembered.

We extend to our sister clerk, Miss Bessie Brewer, our deepest sympathy in the loss of her sister on June 13.

Willie Hiss, Interline Division clerk, recently secured two passengers for the Baltimore and Ohio. Willie persuaded these friends to use the Baltimore and Ohio instead of a competing line, as they had planned to do. This is but another instance which shows that the A. P. R. clerks are always on the job, out of the office as well as in.

We were sorry to hear of the misfortune of our chief clerk, G. W. Jentner. Mr. Jentner, while on the way to the office on August 4, slipped and fell to the ground on Howard Street near Saratoga, badly injuring his hip. We are glad to hear the hip was not fractured or broken, but just badly bruised. Mr. Jentner, who suffered great pain for several days, is now resting much easier. We wish him a speedy recovery, and hope that he may soon be with us again.

## New York Lines

Pier 22, N. R., New York

Correspondent, JOHN NEWMAN

Old friends at Pier 22 and friends of the Baltimore and Ohio in the business world are welcoming back to our service Harvey Morris, who, after an absence of four years to a day, has re-enrolled into the ranks of our traffic department. Having previously covered every district in our lighterage territory as freight solicitor and contracting agent, he is encountering old friends everywhere and making new ones. One of his first "scoops" after getting into his old harness was to secure new business to the extent of 18 carloads, 475 tons, newsprint paper from New York to East St. Louis, straight through, from end to end of the system. This is probably the biggest single shipment of any kind handled from here, swelling the westbound tonnage for July considerably above that of the previous month, to the particular satisfaction of Agent Bayer, who is a hog on tonnage. Mr. Morris personally supervised the loading of the entire shipment, in order to be able to make a direct report of its departure in good order.

In this connection it is a pleasure to review and recount Mr. Morris' personal record, which goes back to 1896, when he entered the service of this Company in a subordinate clerical position. After a succession of promotions in the "C. T." he

Filedora, Mahoney and Lee—a troublesome trio

was transferred to the Traffic Department in 1903. In January, 1918 when the government practically abolished this branch of the service, he sought and obtained a commission, a first lieutenantcy, in the transport division of the Quartermaster's corps. There his accumulated experience and thorough familiarity with the port facilities served the government well. He claims as his greatest achievement the rush transfer of supplies from scattered warehouses to the Army base at 58th Street, Brooklyn, to cancel leases expiring July 1, 1920, when within 27 days he directed and supervised the moving of 160,000 tons of supplies.

Personally we have known "Harvey" since he was a boy and before him we knew his father, Captain J. L. Morris, "commodore" of our tug-flotilla, now retired and pensioned.

More success to you, Morris, son of Morris. "Leagues of travel prove the horse, years of service prove the man."

It is said in reference to another unit of our mobile force, J. E. Price, the hustling travelling freight claim agent, that he is always "on the go" (travelling on the hoof). He has been known to offer settlements as high as 33 per cent. of the claim; he generally starts with an offer of 10 per cent. and proceeds, like an auctioneer, bidding up. They say he can talk a hole into a man's conscience and look through it. We know that he can talk, having been subjected to it.

The correspondent is requested to inform those who contemplate making long distance auto trips to consult Messrs. W. J. Filedora or "Tony" Stuhl, both of 295 B'way., and both familiar with all desirable routes leading out of, into and around N. Y.

From St. George transfer we get, with the accompanying picture, the following introduction:

On the left P. J. Filedora, who in addition to running the job he is paid for, has gratuitously assumed the role of office comedian. He is keeping everybody in good spirits (no insinuation as to bootlegging activities or violations of the Volstead amendment). The subject that Peter cannot make fun out of must be serious indeed. His services as a fun maker are always in demand, and only unavailable on payday when he goes shopping. He is a shark on "sales" and keeps "Kitty" posted on bargains at Hearn's.

The tall chap in the centre is Thomas F. ("Fighting-Kid") Mahoney. (Note the "set" jaw and challenging attitude.) Tom is undergoing intensive training, has already trained four hours in the past two years, preparing for war. When he has completed the course there is going to be "some" scrap (watch yourself, H. J. B.). "Sawing wood and saying little" is his motto. It is said that Addison never spoke more than six words on any one subject at any one time; Tom has him as they say in Jersey Street, "skinned a mile;" anything expressed in more than three words Tom considers verbosity.

On the right is Herman Lee. See that smile? Recently Herman made a bet that he could iron out the smile and look serious for a whole day. The bet was made at 8.00 a. m. Before 10.00 o'clock Herman was paying for ice cream and cake, paying the winner. "Smiling through" originated with him in the cradle.

In the group P. J. F. is feeling T. F. M.'s muscle and giving his opinion, allegro and fortissimo, that Tom is the real cheese, ne

Send your name and address today for our big million dollar bargain book showing thousands of unusual bargains. Send for your free copy today to Dept. 4016

The Bunn Special comes to you, express prepaid. Only if pleased, only if you recognize it as the best Railroad Watch on the market, do you send \$5.75 as first payment. Wear the watch. If after 30 days trial you decide to return it, we will refund your deposit. Only if you buy, send \$5.75 monthly until the cash price of \$7.50 is paid.

## SEND NO MONEY

Just write, "Send me the Bunn Special." No expense or obligation to you. Only if you are convinced it is dependable in every way—and it is the Master Railroad Watch, do you send \$5.75 monthly—at the rate of a few pennies a day. Order today—NOW.

**J. M. LYON & CO.**  
2-4 Maiden Lane New York

plus ultra and nonpareil, which appear to amuse Herman.

R. I. P.—Giuseppe Calero, "Old Joe Mass," one of the veteran employes at this station, has been gathered in by the grim reaper. Joe lived a long and useful life, most of it, 35 years, in the service of the Baltimore and Ohio, and died peacefully with his boots on, attending to his work until a day or two before his death. Now he is through. "Well done, good and faithful servant."

Right after the coming the announcement of the death of Mrs. Helen Graham, who was granted sick leave for an indeterminate period several months ago. Mrs.

Santoro says that Rice has his troubles

Please mention our magazine when writing advertisers

Left: Christian and Mena, grandchildren of F. Santora. Right: Engineer Belden, Trainman Jacobie, Fireman Hurley and Trainmaster Walz, all of Staten Island Lines

Graham was plucked away in her youth, just when the joy of day-dreaming and castle-building makes life most worth while. She was affianced to Arthur Tolley, agent at Wallabout Station, to whom we extend a sympathetic thought. When a man's heart is bowed in grief you can't pat him on the shoulder and console him with platitudes. Only time heals wounds.

### Staten Island Lines

Correspondent, G. J. GOOLIC

On August 1, the chief clerk at Arlington Yard Office, Oscar Hovik, was married to Viola Lake, of Mariners Harbor. They are touring the Catskill Mountains on their honeymoon. We congratulate Mr. and Mrs. Hovik!

We are pleased to announce the wedding of J. L. Suesserott, division engineer, St. George, S. I. to Miss Anna Mundy Bones, of Tompkinsville, S. I., the happy event taking place on Saturday, September 2, on the lawn of St. Johns Church, Clifton, S. I.

Mr. Suesserott came to the Staten Island Lines on September 1, 1920 in the capacity of division engineer, but to the older members of the New York Division he was no stranger, as he was formerly on this division in the Engineer Maintenance of Way's Office as draftsman during 1909 and 1910, being transferred to Wheeling in 1910 as assistant engineer.

As division engineer he has proved himself very capable, and is beloved by all employes in the Maintenance of Way Department. We wish him every success in his new venture which we trust will be one of happiness, health and prosperity.

Joseph Catalano, clerk to division agent, was promoted to clerk in Master Mechanic's Office, vice J. McCann, resigned.

W. E. Pettigrew, assistant division engineer, and family have just returned from a pleasant two weeks vacation spent at Waldan, New York. When "Petty" (as he is known) returned to his regular duties, the boys hardly knew him, he had gained so considerably. "Petty" tells us that he drank a quart of fresh milk every morning for breakfast. He has now joined the same class as the Supervisory Offices of the Maintenance of Way Department.

Guy O. Walslev was appointed attorney for the Staten Island Rapid Transit Railway vice William J. Kenney, deceased. We all wish him success.

David Seeman, freight clerk at Mariners Harbor, sojourned at Sea Girt with the National Guard of Elizabeth, New Jersey.

Some friends of J. J. Rice, freight clerk at Mariners Harbor, reported seeing Seeman driving through Elizabeth with his "Velie" touring car. Had it not been for the color of the car they would never have known it was "Rice" speeding by. For further details see sketch.

We are not sure whether that "grandfather" story or some other story is being used, but A. Bovino, another freight clerk of the Mariners Harbor Brigade on a hot day, or when there's a double header at the Polo Grounds, manages to get there for the game; and not alone, mind you, he's been seen with a charming young lady recently.

Henry Hegdal, who was recently employed as office boy in the Superintendent's Office at Pier 6, St. George, was promoted to clerk to division agent, Pier 6. We all wish him more success. Keep going ahead, Henry.

Edward Finley was employed as office boy, Superintendent's Office, Pier 6, vice Henry Hegdal, promoted.

John D. Gibb, trainmaster, is now traveling through the Adirondack Mountains in his new "Durant" machine. John also took transportation to use for return home in case his machine breaks down.

We are pleased to announce the marriage of Joseph Griffith, clerk, Lighterage Department, to Miss Madelyn Graebe, formerly clerk in the same department. The marriage took place on August 6 and the honeymoon was spent at Atlantic City. We all wish them health and prosperity.

The accompanying picture is of Engineer Belden, Trainman Jacobie, Fireman Hurley and Trainmaster Walz.

The other picture is of the grand children of Extra Gang Foreman Frank Santoro, Christian and Mena.

The Eighth Annual Field Day Carnival and Dance of the Staten Island Railroad Club will be held at Harmony Park, Grammere, S. I. on September 16, 1922. Music will be furnished by Royal Blue Novelty Jazz Orchestra. Tickets 50 cents, including lady and gentleman. Come along and have a fine time.

W. Whitely, marine clerk, has a new job assigned to him, Fire Commissioner, Coal Dock 2. "Bill" has to walk over the trestle every time an engine goes up to see if any fire occurred account of engine dropping

Since that little stranger has arrived, Knoor wishes he had that extra hour of daylight back. He could make darn good use of it

**MT. CLAREITES**

1. Jack Burdette, Jr. 2. Mary M. Mileski. 3. Mrs. G. F. Muller and her little son, Leroy. 4. Elsie Demitz and Ethel Oursler

**TAILORING \$50 to \$100 a week**  
**AGENTS WANTED** Tailoring agents earn \$50 to \$100 a week selling virgin wool tailored-to-order suits and overcoats direct to wearer. All one price, \$29.50. Wonderful values. Rich assortment of fabrics. We furnish 6x9 swatch outfit and free advertising. Protected territory. Commissions paid daily. Will train inexperienced men who are honest, industrious, ambitious.  
**J. B. SIMPSON, Inc., 831 W. Adams St., Dept. 221 Chicago**

Most all he'd wish,  
 And Miss A. won't call  
 Some one "Poor Fish!"  
 All these may come  
 As we hope and pray,  
 But the distance off  
 Is a long, long way.

During the early part of the summer, Elsie Demitz, Mechanical Engineer's Office, and Ethel Oursler, secretary to the accountant, decided that they wanted to wear oil-skins, and to ride on the Mayflower, so, here they are! "Haste thee Nymphs! and bring with thee" etc. The oil-skins do take away the nymph-like effect of these young ladies, but nevertheless they seem to be spreading just as much mirth and youthful jollity as the pretty nymphs, sparsely clad, that we carry in our minds! They arrived back, safe and sound, and for thrilling experiences, you will have to apply to them, personally. I won't tell tales out of school.

**Drawing Room**

This cunning little youngster is "Jack" Burdette, Jr., son of J. C. Burdette, draftsman, Mt. Clare. "Jack" just knows he is having his picture taken, I'm sure, and he knows he is going to be much admired by the "weaker" sex.

**Here and There at Mt. Clare**

Contributed by C. RAEUCHLE

One of the former employes of the Fruit Plant, G. H. Miller, has returned after being away two years. George lives out Elkridge way, and he tells us the apples are so plentiful that they are lying around on the ground, three deep. If you hear of any earthquakes in Howard County, you'll know the "Nectar of the Gods" has had the same effect on old Mother Earth that it has on our poor humans.

We understand that Foreman M. Keller, Axle Shop, is going to give his men a theatre party. Eh, Kel.?

Janitor Henry Leitro, East Side  
 The man who kept us alive during the hot weather by supplying us with good cold ice water

shes. What's the idea of the new assignment "Bill"?

Leo Maloy, clerk to trainmaster, pitched a no-hit game against the School Boy Mid-lets.

**Baltimore Terminal Division**

Agent's Office, Camden

Correspondent, W. H. BULL

There is nothing new or startling happening at Camden these days—the only real em being the periodical visits of Mr. tork, A. L. Knorr, Accounting Department, and Mrs. Knorr being the proud parents of a bouncing boy who will answer to the name of Vernon Adrian Knorr. Congratulations!

**Mt. Clare**

Correspondent, MCLLIE S. ALBRECHT

Superintendent of Shops Office

This little poem is dedicated to our office and we may all live to see this day, too!

**Some Day**

(with all due apologies to Harry Lee)

A quiet day  
 When the 'phone won't ring,  
 To talk to Carroll  
 Of medical things.  
 When Hankin's face  
 A smile won't mar,  
 And Poulton won't take  
 A man to the car.  
 When men to the window  
 Will cease to come;  
 And Tommy Collins  
 Won't add a sum.  
 When Edna's hair  
 Grows long and trim,  
 And Marion's wave  
 Goes away from him.  
 When Poole stops  
 Yelling "Hydrostat!"  
 And Mr. Serp  
 Takes off his hat.  
 When Mr. Davis  
 Can hear a man  
 As quick as he  
 At the window stands.  
 When Arthur won't  
 Have to run a mile,  
 And Miss H. won't have  
 To find a file.  
 When Buck can have

Above: Mason Foreman John Bowsted and his gang. Below: Seeking rest and renewed spirit (s?)  
See notes

One perfectly good detective needed at Mt. Clare to find out what F. P. McConnell finds so interesting at Staunton, Virginia.

"Bill" Barthell, side rod blacksmith, bought himself a machine. "Bill" says it's a 1916 "Booick," almost new. She has only run 10,000 miles. "Bill" gave her a try-out the other night, and says she ran from Laurel to Bay Shore and back again under her own "Shteam!"

E. Connelly, Shop Order Bureau, despises publicity. Nuf Sed!

Take heed, Ye lovers of frozen sweets! P. B. Nolan, Bolt and Forge Shop, has issued a standing invitation to all his friends to visit his house any Sunday for an ice-cream feed. Nolan boasts that he is the champion ice-cream maker of Baltimore, so accept his invitation, gentle readers, and be agreeably, or disagreeably, convinced.

The accompanying picture is that of Mrs. G. F. Muller and Leroy Muller, wife and son of Machinist G. F. Muller, Axle Shop. We wouldn't blame Mr. Muller if he grinned all the time; don't see how he could help it with such a charming family.

Apprentice Leo Forrestell, No. 3 Machine Shop, and Miss Marie Eckert were married Saturday, July 29. They spent a short honeymoon at Norfolk, Virginia. We extend our heartiest congratulations to the young couple. Connubial bliss, etc., etc.!

#### Stores Department

We wish to introduce to you Miss Mary M. Milesky, age two and one half years, daughter of Section Stockman Stanley J. Milesky, Mt. Clare. By the nonchalant way in which little Miss Mary carries her parasol, we are sure that about sixteen years from now, we will be visiting the 1938 Fashion Show to get a glimpse of her.

### Baltimore Division

Correspondent, W. H. TARR

The above group of Baltimore Division employes includes "Al Smit," "Chinch" Roache, of the Division Accountant's office, and Barney Moriarity of the General Superintendent's office. The picture was taken at Wobavilla, on Lake Wob, South River—a quiet spot where one can rest—and absorb refreshments.

### Washington, D. C. Freight Station

Correspondent, W. L. WHITING

Yard Delivery Clerk W. S. Coates spent his vacation between his home in Laurel, Md. and Baltimore. He enjoyed himself greatly, and returned looking better for the change and ready to buckle down for the strenuous fall and winter season.

Miss Katie Gerhardt, freight bill clerk, had a fine time in Monterey, Pa., up among the mountains. She came back to us showing that the clear, healthful ozone of that neighborhood is something that many of us could enjoy with good effect.

Far away from the dusty crowd in Berryville, among the Virginian hills, where no telephones are in constant service, and where the monotonous question, "Is that car of mine in yet?" cannot be heard, "Sol." Hardy reports having enjoyed the quietest and most restful time that a tired body could wish for. He certainly looks all the better for it.

Cashier John H. Peak forgot the troubles of a busy life in Pittsburgh, Pa., Buffalo, N. Y. and the surrounding country. Of course, being in Buffalo, it was not likely that he would miss a trip to Niagara Falls, and it being the first visit to that historic spot, the usual thrills ensued. John states that the most enjoyable part of his vacation was the bathing in Chatauqua Lake. He is enthusiastic over the strengthening quali-

ties of the water in the lake and advises everyone who gets in that neighborhood to follow a good example.

Miss Gladys Beall, waybill and abstract clerk, enjoyed the cool breezes and refreshing air of Braddock Heights, Md. It is unnecessary to say much about this beauty spot of Frederick County, as most of the readers of the MAGAZINE are familiar with the enchanting view from the heights. Anyone who was never there should quickly wipe out this sin of "omission." We congratulate Miss Beall on her choice.

It is a short step from the pleasurable side of life to the unfortunate side, and it is now necessary to speak of the sick and afflicted of our force.

Sealer M. F. Kelly is still unable to think of returning to duty.

W. A. (Doc) Keys has fortunately recovered from his long siege of rheumatism and has now returned to his old love, the Motive Power Department, and is back on his old job with Car Foreman T. O'Leary.

Our veteran rate clerk, Clarence A. Ridgely, one of the most rugged of our clerical force, from the standpoint of health, has recently complained of an affection in one of his eyes, which caused him much pain, necessitating his staying home for a time. This affection became so serious that an operation was necessary. Mr. Ridgely has returned from the hospital greatly benefitted. Everyone is anxious to see Clarence back at his old desk before long. Mr. Ridgely is a veteran of thirty-three years standing in the company's service. The office looks strange without his presence.

Delivery Clerk Melvin M. Phelps was the victim of a bad automobile accident on the Baltimore Pike one evening recently. We have been unable to obtain the full details of the trouble, but it is sufficient for us to know that poor Melvin is in the Baltimore Emergency Hospital suffering with a broken leg and considerable shaking up. We can only hope that his sufferings will not extend over a great length of time, and that we shall have him back before very long. The sympathies of your correspondent are especially extended to Mr. Phelps, as he is well acquainted with all the exigencies of a broken leg. Cheer up, Melvin, you are travelling in good company!

### Cumberland Division

Correspondent, JOHN J. SELL

The Misses Eula and Edith McMakin have just returned from touring the eastern cities and report "Some Vacation." We know wherever these charming sisters go there is always "some time." Atlantic City seemed to be the charm. How those Cumberland boys were there at the same time isn't altogether a mystery either. How about the rumors of the Harvest Moon, Edith?

Fishing along the Potomac is real sport and many lovers of the rod are taking advantage of the fine water we have enjoyed this season. We hear plots of lynching Duke McClintock if he doesn't stop feeding the fish all along the line. Funny thing "The Duke" always gets six, but they are so securely concealed, we are commencing to believe the six must all be in a twenty cent can.

Here is a splendid likeness of our train announcer at the Queen City Depot, Harry Snowden, taking a once over at the cab stand. You may depend on it that here is one boy that is always on the job. Harry

Train Caller Harry Snowden, Cumberland

has many friends around the station and it is a real pleasure to watch him perform the numerous duties required in looking after the traveling public. If a traveler is heavily laden, depend on it Harry has one of the porters hustling. Should a taxi be required there is no waiting; you get the taxi. To hear Harry calling trains is one of the wonders of the day. Congratulations, Snowden, Old Boy, you're there!

Miss Margaret Burns is spending part of her vacation in Piedmont. We don't know what the attraction is West, but it's a safe bet that "Buck" is watching the situation closely.

Walter Holtzman is spending some time around Elkins and Thomas. Come on, Walter, it can't be "shine" and with the wife along too. Boy, you got our number unless you are trying to get so far away that the folks in the neighborhood will think Form 1150 is a calendar.

The "Colonel" spent an enjoyable vacation in and around Cumberland, and is back on the job much rested, and ready for heavy work.

Quite a number of our employes are now harvesting bountiful crops from their gardens along the right of way, the yield of all truck vegetables being good this year. The Company's generosity is permitting the use of idle ground along the right of way for this purpose is appreciated by the employes benefitted.

The peach and apple crop in this territory is not as heavy as in previous years, due to the late frost. The fruit that is being picked is very good, being large and luscious.

"Mutt and Jeff" in action—Jones and O'Connor.

A. G. Boughner, who keeps us straight on our tonnage and performance of the division, has been with us for quite a while. While our performance has slipped a little, being a notch or two behind first place where we usually hang out, we expect to get back in form shortly, and again set the pace for others to follow.

Our local correspondent, J. J. Sell, claims to have made the seasons biggest catch, having landed a six pound bass in the Potomac River just below the dam at Cumberland.

Three old Cumberland Division veterans, who are on the job every day, still going strong, are W. Price, station cleaner, Shobe Thrasher, Stores Department and Gus Scharf, material man, M. and E. Department, all three of whom work around the Queen City Station at Cumberland, and are to be commended for their efficient work in respective departments.

We had hopes of sending in some good photos of some of our local talent for this issue, but they all claim to have forgotten their cameras while on their vacations. However we feel that we will be able to secure some for the next issue, as some of the best have not yet returned.

Night Chief Dispatcher J. A. (Jake) Miller has returned from a vacation spent in California, but "Jake" has been too busy to give us a full account of his trip, particularly conditions as found in "Hollywood."

The many friends of Ira W. McBride, work train foreman, were shocked to hear of his serious injury. A tie falling from a car in train, struck him on the head and caused a slight fracture, from which a speedy recovery and return to duty is anticipated. Two days before the accident Mr. McBride was married.

The many athletic and social activities arranged for the summer, had to be postponed because of the unsettled conditions, but with things fast getting back to normal it is felt that many of the postponed events will be held.

The business outlook on the division is good, and a busy fall and winter is predicted.

From the size of the bucket the clerks in the Dispatchers Office have been carrying, it was thought the days of the "Growler" had returned, until investigation developed that it was filled with hot coffee.

The new icing station at Cumberland has been doing splendid work during the present summer, and the value of this facility can hardly be appreciated.

The assistant shop clerk at Keyser is practicing up on his checker board with view of taking the system championship next season.

**Timber Preserving Plant  
Green Spring, W. Va.**

Correspondent, E. E. ALEXANDER

The tie that lasts the longest is the least expensive.

The demand for durable timbers has increased. In 1904, thirty-three pressure treating plants were in operation, with an annual capacity of about one-fourth billion board feet of timber.

In 1921, 122 plants were in operation. They treated more than 2,400,000,000 board feet, and others are being built to meet increased demand.

Eighty-five per cent. of the timber treated is for railroad uses.

The preservative treatment of wood has long since passed the experimental stage. There is no guess work about the results obtained.

Good ties, well treated, have a life in track several times that of untreated, which means an enormous saving.

Those of us who had the pleasure of knowing her were saddened by the death of Mrs. J. H. Waterman, wife of superintendent of timber preservation, C. B. & Q. R. R. Our deepest sympathy is extended the bereaved family.

Mr. Harry White, Grasselli Chemical Co., was a July business caller at the plant.

# Free Proof

## That Cooke Trained Men

### DO Earn

# \$3,500 to \$10,000 a Year

Let me send you Free, this big package of "Vital Facts" showing what "Cooke Trained Men" earn, the big opportunities Electricity offers, and how you, too, can earn \$3,500 to \$10,000 a year. Coupon will bring it Free.

## Be a Certificated Electrical Expert

### What's Your Future?

It's a shame for you to earn less than \$100 a week. You ought to earn more. You can do it too, when you are backed up with my training—the training that makes "Big Pay Men." Don't be content with an ordinary job paying anywhere from \$30 to \$10.00 a day, with no future to speak of. Strike right out—hold the job you've got and prepare for a better one—prepare for the "man's job" in the \$3500 to \$10,000 a year class in the greatest profession in the world. I show you the way.

### RADIO Course FREE

My new \$45.00 Radio Course, just completed given Free when you enroll for the Electrical Course. Two courses for the price of one. 2 great professions open to you.

**I Give You a REAL TRAINING**  
As Chief Engineer of the Chicago Engineering Works I know exactly the kind of training a man needs to get the best positions at the highest salaries. Hundreds of my students are now earning \$3,500 to \$10,000. Many are now successful ELECTRICAL CONTRACTORS.

### Your Satisfaction Guaranteed

So sure am I that you can learn Electricity—so sure am I that after studying with me, you too, can get into the "big money" class in electrical work, that I will guarantee under bond to return every single penny paid me in tuition if, when you have finished my course you are not satisfied it was the best investment you ever made.

### FREE Electrical Working OUTFIT FREE

I give each student a Splendid Outfit of Electrical Tools, Materials and Measuring Instruments absolutely FREE. I also supply them with Drawing Outfit, examination paper, and many other things that other schools don't furnish. You do the PRACTICAL WORK—AT HOME. You start right in after the first few lessons to WORK AT YOUR PROFESSION in a practical way.

### Get Started Now—Mail Coupon

I want to send you my package of "Vital Facts" including Electrical Book and Prof. Lesson FREE. These cost you nothing and you'll enjoy them. Make the start today for a bright future in Electricity. Mail the coupon—NOW.

The Cooke Trained Man is the "Big Pay" Man

Sunday Afternoon at Hamilton's, North Branch

“We were well represented at the Donaldson Sunday School picnic on August 3. In fact we didn't know we had so many Sunday School scholars among us! But did you ever notice what a large attendance always turned out on Picnic Day? Toobad it rained.

Our former plant operation clerk, D. Frank Clarke, and file clerk, Miss Addie McCauley, accompanied by the latter's sister, spent Sunday, July 30 at the Plant. Though she has been in this department for five years it was Miss McCauley's first visit to the Plant. We invite them all back again.

Night Foreman E. Allen is enjoying a well earned vacation at this writing.

Retortman “Jack” Wilson has moved his family to Cumberland, having accepted a position with N. G. Taylor Tin Plate.

Engineer J. C. Alexander moved into the “cute” little bungalow erected by Mr. J. W. Reese, before the paint was dry. We understand Station Clerk Walter Gurtler will move into Dal Foley's new cottage as soon as completed, while Lineman Whitlock is waiting for Gurtler to move out so that he can move in.

We have never known of an empty house since our Plant has been operating.

Our photograph this month is captioned “Sunday Afternoon at Hamilton's, North Branch.” We all love to go there. The smiling faces are caused by the knowledge of the “good eats” which Mrs. Hamilton always provides, waiting until after the MAGAZINE artist had finished his work.

The two little darlings in front are Mary Josephine Hamilton and Amy Jewel Alexander. Immediately back of them, sitting, left to right, we have Mrs. J. C. Newcomb (nee Addie Hamilton) and her husband, “Paddy,” a former Plant employe; Mr. and Mrs. C. H. Hamilton, Mrs. C. P. Houck (nee Mildred Hamilton) and, standing, C. P. himself, well known to all Cumberland

Divisionites, now holding down third trick at Patterson Creek. The young lady seated so comfortably on Houck's strong right arm is Miss Mildred Maxine Newcomb.

In the next row standing, is “Brother” Frank Hamilton; sitting, are Western Maryland Operator A. J. Chen, Special Apprentice R. W. “Bud” Hamilton, Mrs. J. C. Alexander and son, Edward Wesley. Up on the porch we find Mrs. E. E. Alexander, Fireman Helper G. W. Robinson, and our supervisor.

Mr. Hamilton has a record of thirty years at the “key,” all on the Cumberland Division. He is now first trick operator at Patterson's Creek where he has been—well, ever since North Branch tower was closed. Their lovely home at North Branch is noted for its hospitality and is scarcely ever found without its guests.

#### Scattered!

“Pat,” employed on an engineering job a few miles west of Los Angeles, was carried to his work by an express train, which accomodatingly slowed up near the scene of his labors.

One morning, however, the train rushed through the cut without reducing speed. The superintendent of the job looked in vain for “Pat.” At last he saw a much battered Irishman, limping back down the ties.

“Hello, Pat!” he cried, “where did you get off?”

“Pat” turned stiffly, and waving his hand toward the steep embankment sighed, “Oh, all along here!”

Engineer G. E. Tribbett, McMechen, is suffering from an injury sustained about two months ago when he fell from his engine and hurt his knee. The knee is still bound in a plaster Paris cast and at times is quite painful. We all hope for his speedy recovery.

Mr. and Mrs. Lawrence Kenney are the proud parents of a baby boy born on August 8 at the Ohio Valley Hospital. Both Mrs. Kenny and the baby are doing nicely. Congratulations and best wishes! Mr. Kenney is operator at "FY" at Wheeling.

More congratulations! Miss Louise Walthers, Master Mechanic's Office, is wearing a diamond on the finger. We asked her when it was "coming off" and she said not for a long, long time. We are glad to hear that for we'd sure miss "Gus" should she leave us.

The accompanying picture is of Carl F. Miller and C. F. Miller, Jr., age four months. Mr. Miller is now employed in the Division

Engineer's Office, Wheeling. He was formerly located at Holloway, Ohio.

R. C. Gruver, Division Accountant's Office, received a pleasant surprise on the evening of August 2, when the following members of his department tendered a birthday surprise party at his home: E. P. Fortner, L. A. Michels, J. E. Michels, A. Michels, N. K. Harrison.

These names indicate that the party was a "stag." We didn't learn Mr. Gruver's age as it seems to be a dark secret.

Supervisor Tederick, Fairmont, seems to have an awful time coaxing Supervisor Wright of the Wheeling Division, at Moundsville, to lend him his goats. What for? Why to clean the right of way of weeds, of course.

We have a newcomer in our midst. L. S. Johnston, of Annapolis, Md., is at present on the engineering corps in the Division Engineer's Office. We bid you welcome, Mr. Johnston!

**Wheeling Division**

Correspondent, MARIE SLATTERICK

On August 13 I was riding Train 52 on my way to Colfax. At the time that I tried to get a chair in the parlor car a lady with her daughter, age about nine, tried to get one also. But our efforts were quite fruitless and we had to ride in the day coach. The lady secured a seat in front of me and we chatted most of the way to Fairmont where she got off. We discussed Baltimore and Ohio service and among other things she spoke of the diner. I can't begin to tell how much she said she liked the dinners served and how she did praise them. I then told her I was a Baltimore and Ohio employe and also a MAGAZINE Correspondent and asked if I might use her kind words. She said I certainly could, that she wanted to put everyone next. She is Mrs. R. L. Fetty of 212 Park Boulevard, Clarksburg, W. Va., and has much occasion to ride the trains. It certainly makes one feel good "all over" to hear praise of that kind.

Through an error in last month's MAGAZINE, it was recorded that the Freight House Baseball Team defeated the Passenger Station Team. It should have been the other way and we regret if the victors suffered any ill effect because of this mistake. The score was 7-6.

Mrs. H. M. Potts, wife of the master carpenter at Wheeling, and her daughter, Marguerite, are spending the summer at their cottage at Camp Welcome, Colfax, W. Va. Both Mr. and Mrs. Potts has stated that the name of the camp is sufficient invitation to all Baltimore and Ohio employes and their friends. Come one, come all! Some of us around Wheeling have been going down there for the past two years and we know what it really is like. J. O. Potts, who works out of Baltimore and who is a brother of H. M., has a cottage right next door to Camp Welcome and it is called Camp Comfort. So when you go to the Potts', they first make you mighty welcome and then mighty comfortable.

C. F. Miller and C. F. Jr.

**Do YOU Know the English Language of To-day?**

Are you familiar with the wealth of new words with which our already wonderfully expressive tongue has been enriched since the Great War—even during the past few months? Have you amplified your vocabulary with all of them? Can you, on the instant, use them correctly in your conversation and writings? Do you fully comprehend their true meaning when you see them in the current newspapers, periodicals, and books, and in your daily mail—when you hear them on the

stage, and in the conversation of your friends? Can you define and pronounce them accurately for your children?

Packed in the pages of this wonderful volume—the greatest of abridged dictionaries—you have instantly available the definitions of over 83,000 terms, more than in any other dictionary of its size, including the very latest words that have come into our language! And in addition, a veritable treasure trove of valuable, authentic information is yours in the new Funk & Wagnalls

**Desk Standard Dictionary**

A Marvel of Up-to-Dateness, Comprehensiveness, Definitive Clearness, and Accuracy

Think of a dictionary containing all the newest words in our language! With over 83,000 words and phrases defined, explained, pronounced, and traced to their original sources for you! With answers to nearly 400,000 questions in all branches of human knowledge! With the most common meaning given first, and all definitions expressed with incomparable clearness! With 1,200 up-to-date, clear pictorial illustrations! With information concerning persons, places, countries, cities, states, battles, treaties, mountains, rivers, etc., such as Lloyd George, Dardanelles, Foch, Chateau-Thierry, Bolshevik, Venetian, Senlis, Piave, Argonne! With all the authority and accuracy of the great Unabridged Standard Dictionary from which it is derived! Think of such a Dictionary containing this and more information of vital importance, all compressed into 500 pages in a volume less than one and one-half inches in thickness—think of such a source of facts which it behooves everyone to know, and you have pictured Funk & Wagnalls Desk Standard Dictionary!

Supplies information on Practically Everything That Can Be Expressed in English

It is difficult to estimate the immense cultural value and the great every-day practical utility of the information given in the Desk Standard Dictionary on many thousands of terms in such subjects as politics, business, music, art, literature, law, medicine, agriculture, philosophy, history, science, religion, etc. It includes lists of broad interest upon practically every topic that can be discussed, or that can be expressed in the English language!

This remarkable volume also gives you a thorough, practical, and instructive treatment of synonyms, giving not mere lists of synonymous words but examples of use in actual sentences, clearly showing their varying shades of meaning. With these are many lists of antonyms, an exclusive and most helpful feature. It gives you the leading events of American and English history. In it you will find a number of lists, phrases, and tables—coins, astronomy, weights and measures, metric system, chemical elements, presidents, sovereigns of England, laws, prefixes and suffixes, foreign words and phrases, etc.

**Splendidly Illustrated** In addition to its other features, many of them exclusive, Funk & Wagnalls Desk Standard Dictionary contains numerous full-page illustrations, scientifically correct and unusually attractive, which visualize for you the information sought for such as the page plates of Agricultural Implements—Bark of Trees—Examples of Architecture—Types of Land and Water Birds—Types of Cattle—Types of Bees—Food and Game Fishes—Types of Flowers—Types of Horses—Types of Fowls—Common American Leaves, etc.

**Whether You Want to Know** how to pronounce, divide, spell, understand, or define thousands of words, phrases, terms, proper names, etc., such as

- |                  |             |               |              |
|------------------|-------------|---------------|--------------|
| Jugo-Slav        | Madamist    | questionnaire | gas-helmet   |
| Rainbow Division | pudding     | stock troops  | epitaph      |
| Soviet           | puddingfoot | baby bond     | pragmatic    |
| Czechoslovak     | pudding     | Novgorod      | invertebrate |
| Centigny         | pudding     | anti-aircraft | etc., etc.   |
| Jazz-band        | pudding     |               |              |
| sticker          | pudding     |               |              |
| Parthian         | pudding     |               |              |
| Saint-Nicolas    | pudding     |               |              |

**FEATURES** Spelling, pronounces, defines over 83,000 terms. Answers nearly 400,000 questions in all branches of human knowledge. It contains 1,200 up-to-date and accurate pictorial illustrations, including numerous full-page plates. Has 11,000 hints of synonym treatment. Contains over 200 pages. Has Patent Thumb-Notch Quick Reference Index.

**ONLY \$2.75—POSTAGE 16c. EXTRA—\$2.91 IN ALL**

Correspondent, R. C. GRUVER

The baseball teams representing the Passenger and Freight Stations met in the second game of a series at Tunnel Green Diamond. The game resulted rather disastrously for the freight handlers, they finding themselves on the short end of a 12 to 4 score after the smoke of the battle had cleared away. The game was fast from beginning to end and was much more interesting than the score would indicate. It was featured by some sensational playing and rumor has it now that Sonnefeld, star First Baseman for the Passengers, is due for a tryout with the big leaguers. The real feature of the game, however, was the heavy slugging of Catcher Harrison, who connected with Sprowl's offerings for two home runs in the 3d inning, each time with men on bases. The splendid hurling of Pitcher Dean was also a feature. Score by innings:

	R	H	E
Passenger.....	2	0	8
Freight.....	2	0	0
Batteries—Dean and Harrison; Sprowl, W. Nickerson and H. Nickerson.	12	14	3
Umpire—McCarty.	4	6	4

Our efficient stenographer, Miss Gertrude Dailer, enjoyed two weeks vacation at Niagara Falls. One of the girls had a card from her postmarked "Canada." Thirsty, eh, Gertrude, and all the nice cool water running over the Falls?

Robert Evans says that after all he does not believe girls are as bad as they are painted. Why? Well, he was seen getting on the train a few days ago with two mighty nice looking ones.

We are all glad indeed to see Miss Well's smiling face in the office again after a few weeks illness. We all miss Della very much when she is not in the office. Just look at her if you don't believe it. Do you wonder why?

Miss Angela Kirchgessner spent her vacation in some cool retreat up in Pennsylvania. We certainly envied her on those hot days.

"Jimmie" Mitchell is making quite frequent trips to Pittsburgh of late. Some say it's to see the Pirates play baseball, but when we consider they do not play Sunday ball up there, there must be some other reason. What is it "Mich"? A woman in the a.e.

Lawrence Michel says timekeeping may be all right but he wishes he had less of it to do.

We have one person at least in the office who is fond of mashed potatoes—James Michel went to the cafeteria the other day for lunch. After standing in line fully fifteen minutes as per usual in cafeterias, he got a glimpse of the various articles of food to be had that day; then turned to his friend who was four or five persons back of him and announced in a loud clear voice, "Oh, shoot, they haven't got any mashed potatoes. Let's beat it, Ed."

Norman:—Do you know, Lawrence, I can be two places at the same time?

Lawrence:—No, how can that be?

Norman:—I can be here and home sick (homesick).

## Western Lines Newark Division

Correspondent, B. A. OATMAN

Terminal Trainmaster Thomas Master-son, Pittsburgh, who spent his vacation at Buckeye Lake, the Atlantic City of Ohio, paid us a call at the Yard recently. He renewed many acquaintances, and incidentally interceded for a large shipper, whom he had met at the Lake. And this Mr. Large Shipper, advised that Tom just dragged him down to meet his friends and advised him by the way that it was his interest to ship his entire output via the Baltimore and Ohio. (And Mr. Large Shipper's output is expected to be 20 cars per day for the next few months.) As a result, Mr. Large Shipper got the promise of service, and the Baltimore and Ohio got the promise of the business—all new business at that.

We take off our hats to Tom. He admits that he is in his fifties, but we believe that he has discovered the secret of Eternal Youth. Perhaps this secret lies in the fact that he spends his two weeks' vacation at Buckeye Lake each year, eh, Tom? Come again.

#### A Few of Our Nicknames and How We Got 'Em

**Skin Allen**, chief clerk, Yard Office. Height 6 feet 5¼ inches. Why go into details as to the source of this nickname?

**Peanut Armentrout**, clerk, Yard Office, stands 5 feet 2 inches. It's a foggy brain that doesn't get the origin of "Peanut."

**Dock Savey**, genial timekeeper, Division Accountant's Office, has one of those nicknames that are acquired in youth and which always hang on. If he heard his real name he wouldn't recognize it.

**Bo Hughes** once had the habit of addressing all of his companions as "Bo." The name came back at him. He was at one time at elephant trainer, and acquired the habit of calling everybody by this one fitting name.

**Scrappy Hefley** used to do some scrapping once in a time. Since he has grown up, however, he has lost his taste for this delightful pastime; but the name clings like the vine to the trellis.

SMILES FROM ZANESVILLE STATION  
Ticket Agent H. C. Grimm and Stationmaster C. W. Jones

Margaret Jeanne Weisgerber, three-months old daughter of Machinist E. L. Weisgerber, Newark, O.

Red Markham, Freight House, as may be expected, derived his name from the color of his hair. However, there being so many reds around the neighborhood, and we never wuz named nor nicknamed neither "red" nor "Scrappy," so we reckon we'd better rest our pen from further comments along this line 'til next month, that is, providin' we live that long after writing all the foregoing.

**Mansfield, Ohio**

Correspondent, C. R. STONE

One of the pictures on the next page is of little Carl Edward, age 1 two years six months, son of the correspondent.

The Baltimore and Ohio Baseball Team won from the Central Fruit Co. on the East Mansfield Ball grounds recently, by a 9 to 1 score.

The game was featured by the heavy hitting of Dudley, of the railroad nine. Batteries for the railroaders were: Kitchart and Mack; for Central Fruits; Herr, King and Piper.

George Sellars, the popular ticket agent, Mansfield, has purchased a new home. Good luck to you, *GEORGE*, we will be with you some day. Mr. Sellars reports that the passenger business is good and that the public always seem to be going somewhere regardless of how late or how stormy the day or night may be.

A change has taken place in our force recently. Albert Walters, car record clerk, who has gone into the garage business with his father, is succeeded here by Wilbur Burer.

L. L. Kerr, who recently returned from a vacation in Michigan, reports that the fish fall for him the same as they always did, and that he had to leave quite a few on the bank as he only brought the choicest home. Mr. Kerr is quite a fisherman and "Lou" always says that what it takes to catch the members of the fin family, he has.

E. N. Kendall, D. F. A., Newark, Ohio, called to pay us a visit relative to business solicitation and reports that Mansfield is still on the map. We are proud to say that we agree with him.

George Reichart, popular chief clerk, Mansfield Office, recently returned from his vacation from points in Illinois. He reports that the crops were all growing and that the farmers expect to have a good crop.

George returned in good spirits and full of pep and says he enjoyed himself very much. Again we say, what is life without a vacation?

The plant of the Mansfield Tire and Rubber Co. is still working the three eight hour tricks, and prospects are that it will continue for quite a spell. The sale of tires from both the Mansfield Tire & Rubber Co., and the Columbia Tire & Rubber Co. amount to quite a neat sum for the season. Both plants have been enjoying a nice business while the Baltimore and Ohio also is enjoying nice revenue from both industries.

Recently Mr. Schultz, agent, Pennsylvania Railroad; Mr. Gilkison, agent, Erie Railroad, and W. O. Stockwell, agent, Baltimore and Ohio, distributed throughout the country the Careful Crossing reminders at various railroad crossings and prominent places along the highway. While, of course, the time will come when there will be elimination of grade crossings, to accomplish this will take time because of the extent of railroad mileage.

There has been quite a number of comments on the design of the poster, and we trust that the motive that prompted the American Railway Association to conduct such a campaign will in a measure be fulfilled.

**Why an Engine is Called a Dissipated Creature**

Passenger: I say, Engineer, what is the average life of a locomotive?

Engineer: About thirty years, sir.

Passenger: I should think such a tough looking thing would last longer than that.

Engineer: Well, perhaps it would sir, if it didn't smoke so much.

*The Congregationalist.*

**Convenient to Business**

A good place for a junk dealer's establishment would be almost any grade crossing. Again we say, "Stop, Look, and Listen!"

**Marietta, Ohio**

Correspondent, G. R. STEEN

The produce season was the greatest ever this year. Our comparative monthly statement showed a decided increase over last year.

The fishing bug has struck the office full force. Miller and Schantz are doing their

No rubber to rot. Phosphor Bronze Springs give the stretch. Nickel trimmed, 50c. Satin brass trimmed, 75c. Nu-Way Wide Web Garters, surprisingly easy and comfy, 50c. Ask Your Dealer for Nu-Way Suspenders, Garters and Hose Supporters. If he hasn't them, send direct, giving dealer's name. Every pair guaranteed.

Nu-Way Stretch Suspenders Co. Dept. A. Adrian, Mich.

"derndest." But most of their luck is confined to "squealers and skip jacks."

Yep, Meller has done gone and done it, and Boy! She's going to have Lyon bumpers, on both ends, a water bottle, stop and spot light and everything. She's a DODGE.

Baggageman Herman Henry spent Thursday at the County Experiment Farm picnic. Herman says he never ate so much chicken in all his life before. On the way back it rained hard and Herman and "LIZZIE" had a hard time getting home.

Delivery Clerk W. G. Gardner received a card from Wheeling, W. Va. the other day which read as follows:

I count each hour that I'm away; I'm looking forward to that day When happy hearted I'll be found, My journeys o'er and "Homeward Bound." Who Wrote that letter?

Yard Conductor Lewis Schilling reports bumper crops on his Rainbow Farm this season. He says he is going to have a real old corn husking bee this fall with everything. We'll be there for the everything, O. K.

J. E. Jackson, our West Marietta agent, claims the championship as horse snatcher. He will meet all comers.

The Standard Oil Co. is constructing a large blending plant here on the site formerly occupied by the Argan Refinery several years ago.

**Sandusky, Ohio**

Correspondent, Miss I. C. MARTIN

On July 30, at 1.00 p. m., fire was discovered in our Freight House. The City Fire Department responded promptly, but by the time they started to turn on the water, the greater part of the building was in flames. The entire building was destroyed, together with a considerable amount of merchandise and some Company material. The pictures shown tell the story.

The building was 518 feet long and 74 feet wide. It was erected in 1886, but was still in good condition and would have served for freight house purposes for a number of years to come. Five cars were also destroyed. The fire was confined to the freight house, as there was little wind blowing. Had there been a heavy wind, it is probable that the grain elevators and the coal docks would have been destroyed.

We wish to thank the City Fire Department for the good work which they performed, and the public at large for the assistance rendered. We also wish to make special mention of the splendid work of the Baltimore and Ohio employes, many of whom assisted in removing the cars that were standing between the freight house and the elevator.

Up to the time of this writing it has not been decided how the fire originated. No freight had been handled in the freight house since 4.00 p. m. of the 29th. It is highly probable, however, that the fire

started from the stub of a lighted cigarette or burning matches from the hands of several who were said to have been fishing on the docks on Sunday evening.

In our picture gallery we find: A sand-Witch and a sand-Wizard! They are Miss I. C. Martin and Towerman E. F. Miller, Sandusky. Even railroaders can have a jolly day once in a while. Sometimes Mr. Miller forgets his 'cares and takes a trip down the Sandusky Bay in his motor boat. Here you see him "speedin' along."

"She loves me, she loves me not," might be the title of the picture of the little tots as they pluck the petals from the daisies. They are the niece and nephew of Miss I. C. Martin, correspondent. Daisies won't tell.

**Columbus, Ohio Station**

Correspondent, Miss EDITH ROACH

On July 27 the Baltimore and Ohio Freight Depot employes held their annual picnic at the home of A. G. Burgette, Grove City, Ohio. A most delightful time was enjoyed by the sixty odd present. It being also the birthday of Mrs. Burgette, she was presented with a lovely aluminum percolator and water pitcher. The presentation was made by F. A. Dike. Mrs. Burgette acknowledged the remembrance with well chosen remarks.

The annual picnic is looked forward to each year by Mr. Burgette's co-workers, and they sincerely wish that there may be

many more years in which they may enjoy such hospitality.

Former Rate Clerk M. D. Barley and his family have moved to Cincinnati where he will be rate clerk in the Freight Traffic Department, a promotion well earned. We wish him success.

Miss Mary Connell returned from a week's outing at Russell's Point.

Miss Marie Brink was awarded position of rate clerk, vice M. B. Barley.

Baby Margaret Patricia Vantilburg arrived at the home of our utility clerk on June 9.

Our sincere sympathy is extended to Messenger Theron Wise in the death of his father on July 19.

M. E. Tuttle, formerly clerk to the trainmaster at Cleveland, has been transferred to assistant chief clerk in the Division Engineer's Office, Akron.

S. S. Mehard, one of the oldest employes on the old New Castle Division, is the newest addition to our family circle at Akron, Ohio, having recently accepted service in the Division Accountant's Office. (Pinochle players, take notice.)

"Herb" Hossler, time clerk in Division Accountant's Office, spent an enjoyable two week's vacation in Denver, Col. A mighty long trip, but "Herb" says it was well worth the time spent. We expect soon to hear the merry jingle of the bells, "Herb."

J. H. Babbitt, assistant engineer on the corps, has been promoted to assistant super-

visor, headquarters, Massillon, Ohio. John was one of the real popular boys in Division Engineer Correll's office and his fellow employes at Akron regret his leaving, but extend their congratulations on his well deserved promotion.

Conductor J. W. (Jack) Gifford, one of the oldest and most popular conductors on the Akron Division, died at his home in Willard, Ohio on August 5 after an operation for the removal of gall stones. His funeral was held from the family residence on August 8 and was attended by a large number of his neighbors and friends. Sincere sympathy from his old time railroad associates is extended to his bereaved widow in her great loss.

Mrs. George W. Hoffman and Mary Louise, wife and daughter of Engineer G. W. Hoffman, enjoyed a two weeks' vacation in Washington, D. C.

Perry I. Eilbeck, time clerk, and wife have returned from their vacation which they enjoyed in visiting friends and relatives at Washington, D. C., and Lonaconing, Md.

Fireman Harry Pifer met with a distressing accident on July 18 which resulted in his death at the Ravenna Hospital on July 21. While leaning out of cab window his head struck a switch lever with such force

that his skull was fractured and he never regained consciousness. Harry was a resident of New Castle, Pa., was a young man of sterling character and is mourned by a host of sorrowing friends. He is survived by his widow, to whom our sincere sympathy is extended in the sudden taking away of a devoted husband.

T. Ridley, carpenter foreman, who was in a hospital at Cleveland for some time, is now entirely recovered and is back on the job again.

John Scrofford, formerly in the Division Accountant's Office at Newark, Ohio, has been transferred to the Akron Division as time clerk in S. H. Jewett's office.

Our baseball team at New Castle Junction under the management of W. E. Winebrenner, has just closed a successful season, and was numbered among the best teams in the city, having defeated some of the strongest teams in Lawrence County. Plans are already under way for putting a strong basketball team in the City League, and it is almost certain that the division team of Akron, will be pitted against the New Castle Junction team in a series of games during the winter months. Kocher and Eilbeck of last year's team are now located at Akron and these stars will form a nucleus around which the representative team of the Akron Division will be selected. It is planned to put one of the strongest teams in the Akron League and to this end practice will begin in the next few weeks.

A. C. Harris, chief clerk to division engineer, is fast becoming one of the most popular singers in Akron, and his services are in great demand at all times. He was recently honored by The Buckeye Cycle Co. appearing on their Radio service program and his numbers were well received in all parts of the country where the Radio is in use.

Miss Pearl Thompson, stenographer in Superintendent's Office, Akron, Ohio, spent a pleasant two weeks vacation at her home in New Castle, Pa.

"Jimmie" Geddis, of the Superintendent's Office, hied off to the wild and woolly west for his vacation, spending most of the time in Colfax and Des Moines, Iowa.

#### Cleveland, Ohio

Correspondent, G. R. LITTELL

Our distinguished bill clerk, "Dick" Brewer, asked for a three day's leave of absence and upon his return he brought with him a wife. Congratulations, "Dick," and may your voyage upon the matrimonial sea be a long and enjoyable one.

Our amiable record clerk, Miss Beulah Stephenson, is sporting a new diamond ring but declines to say when the wedding bells will ring.

The boys of the terminal have organized an Indoor Baseball Team which they have entered in the City Metropolitan League. So far they have played seven games, four of which they have won and when it is taken into consideration that they played the best teams in the city, this is a record of which they can be justly proud. At this writing the team is in third place in the league standing and we are all confident that it will "grab off" the pennant. R. G. Davison is manager and challenges any other team on the system for a game or series of games.

Our rate clerk, "Whitey" Weishaar, and family are spending their vacation at Portage, Wisconsin.

Rumor had it that A. Braun, our team track foreman, was to be married August 23. (Poor girl.)

R. B. McGinley, chief clerk, is going on a vacation this year sure. I wonder if the Pittsburgh Plate Glass Company has anyone going with him.

#### Massillon, Ohio

Correspondent, W. E. BRUGH

My-o-my, but railroad families are increasing. Nothing like race suicide in

Massillon. On June 23 the stork left an eight and one-half pound daughter at the home of Mr. and Mrs. William E. Brugh. She has been named Ruth Caroline. Much success is wished the happy family, which now consists of a boy and a girl. Fireman and Mrs. H. Wallace announced the arrival of an eight pound son on July 21, which has been named "Billy" Urban. Hearty congratulations and good luck to the mother and new born son. Last but not least, Brakeman and Mrs. Harold U. Brugh come in for their share of the glory. Their new arrival, a son, arrived on August 3, and tipped the scales at seven pounds, and has been named "Bobby" Harold. I wonder how many sleepless nights this will mean.

We announced with regret the death of Agent L. T. Kegler's mother in July, and express our sincere sympathy.

In one of our pictures you will find Edward Dale Fenstermaker, bouncing six month's old son of Brakeman and Mrs. E. Fenstermaker. Some baby, "Pete!"

#### Dover, Ohio

Conductor "Dave" Mathews is having quite a time trying to keep track of his keys. Recently "Dave" showed up at the yard office and said he had lost his keys. Then he called up his home and they proceeded to get out a search warrant for them, but without success. So R. P. Mathews, son of "Dave," and also one of our brakemen, was sent up to the garage to see if they were there. In the meantime "Dave" found his keys hanging inside his trousers, where they usually hang out.

Another picture shows a mighty fine piece of track on Section 42, in charge of Section Foreman C. M. Goodie, looking west from No. 5 Switch, Dover. This track compares favorably with Main Line.

Miss Margaret Smurdon, stenographer to R. R. Huggins, terminal trainmaster at South Chicago, was awarded a prize in G. H. Pryor's Puzzle Contest, receiving a book entitled "The Key to Puzzledom." Congratulations, Margaret, keep the good work up.

Frank Bastl, reconsigning clerk at Chicago, in the handling of one car at Chicago, was successful in saving the Company \$38.13. Another good mark to his credit! We would like to hear more from Mr. Bastl regarding savings of this kind.

We were agreeably surprised and much pleased when Mrs. Bertha Phelps, our former statement clerk, but now affiliated with the office of Division Freight Agent at Minneapolis, Minn., paid us a visit. Mrs. Phelps spent her vacation with relatives in Chicago, and we were mighty happy to see her once again.

#### Ohio Division

Correspondent, A. E. ERICH

Charles Coler, brakeman, has taken unto himself a wife. He believes in keeping in the "railroad family," having married a daughter of Conductor Dudley, Toledo Division. Congratulations and best wishes!

A. B. Bracken, brakeman, who has been off duty for almost a year because of illness, is back on the job again, feeling fine.

We welcome R. E. Wilson to the Ohio Division as instructor of fuel economy.

MY DADDY IS A BRAKEMAN ON THIS RAILROAD

I am Edward Dale, son of Brakeman E. Fenstermaker, and this good looking piece of railroad track you may see by looking west from No. 5 switch, Dover, O.

The late Conductor Melvin E. Eveland

Engineer Frank Mattox has a new Ford. Frank is working out of Loveland at present, and we are informed that with his singing and the new car, he has the company of the fair sex in numbers.

Floyd ("Shocky") Clingman, switchman, has taken the vow "For better, for worse." Also C. Oylar, another switchman, has taken the vow. We wish these newly married men, good luck and happiness.

We are pleased to say that "Bill" Foster and "Jim" Britton, both engineers on this division, have been appointed assistant road foremen of engines, with headquarters at Chillicothe. We congratulate them on their promotion.

Howard Rice, ticket clerk, resigned on August 1 to go into the coal business with his father. We wish him success.

Our sympathy is extended to Conductor M. O'Donnel in the death of his wife.

Dispatcher W. W. Woodward, while returning from Columbus in his automobile early in August, had the misfortune to meet with an accident in which his face was badly cut by broken glass from the wind shield. He has recovered.

Fireman "Tommy" Taylor has bid in a life run. We wish him and his bride orders for a clear track.

It was with deepest regret that we heard of the sudden death of T. "Tommy" K. Stevenson, operator, "DO" office, Chillicothe. His death was due to heart trouble. He had reported for duty at the usual hour but complained of feeling badly and was relieved immediately. Going home he called a physician and later was taken to the hospital. His condition was not thought to be serious, but he suddenly took a turn for the worse and died at 8.45 p. m. on August 5. Funeral services, in charge of the Knights Templar, of which he was a devoted member, were held at his late residence. "Tommy" was well known and liked and his many friends join in extending their sympathy to his wife.

Baggage man J. Touhy is back on his car again after over a month's illness.

Messenger Georgie Northcraft, Chillicothe

Melvin E. Eveland

It was with sincere regret and deepest sympathy that we learned of the death of Melvin Eveland, passenger conductor, who passed away at his home at Price Hill, Cincinnati on Wednesday, July 26, at 9.30 a. m. He entered the service of our Company on February 4, 1881 as freight brakeman; was promoted to freight conductor on February 4, 1885 and to passenger conductor on July 8, 1907, in which capacity he served until taken sick on March 2, 1922. During this time he had made hosts of friends, being one of the best liked men on the road. Previous to his last illness he was conductor on trains Nos. 4 and 1 between Cincinnati and Parkersburg. He was born in Goshen, Ohio, on May 4, 1859. His wife, two daughters and one brother, Conductor R. C. Eveland, survive. To these our heartfelt sympathy is extended.

The Safety Secretary Says:

From the time of life's beginning it has been natural on the part of man to consider self-protection first and foremost. There is an old proverb which says that self-preservation is the first law of nature. Practice SAFETY FIRST.

Manufacturing cripples is poor business. Keep out of it.

Who says "safety" doesn't pay?

First in our picture gallery this month is Georgie Northcraft, messenger, Superintendent's Office. Georgie recently found a purse in the ladies waiting room at Chillicothe containing about \$10.00 and some papers. She immediately turned this in to the ticket office, where it was found that it was the property of a lady who had just left on a train to Athens. By Georgie's prompt action and honesty considerable worry and difficulty were avoided, and she is commended.

St. Louis Division

Correspondent, H. F. SMITH

Cloyd Stanford, familiarly known as "Hossfly," has now become a certified public accountant and has left our midst to settle in Owensburg, Ky. If you need any letters of recommendation call on us, Cloyd.

Engineers George Vance, Carl Vollmer, Fireman C. Gibson and Brakemen Don Clark and A. P. Harwood, together with their families (beg pardon, Adolph hasn't any) enjoyed quite a fishing expedition at Bay Minnette, Ala. Only our modesty restrains us from repeating the fish stories they told. Anyway the water was deep enough for Harwood to dive in.

Indebted to Caller F. H. Wright for quite a number of items in recent issue. Don't quit us, Frank, after the first offering.

Timekeeper L. R. Kellams is on a leave of absence during which he is taking treatment for his hearing.

M. P. Timekeeper F. C. Klaus has been installed in the big empty room of the former office building at Flora. We suggest a smaller room so it won't be so hard to locate him.

We don't know anything about this but somebody wants to know when Operator

"Keep These Men"

"Brown, I've been putting the axe to the pay-roll. I've cut out a lot of dead wood unskilled men we can replace tomorrow if necessary.

"But—keep these men whose names I have checked. They draw big pay but they know their work. They are the men who looked ahead and trained themselves to do some one thing better than any one else. We can't afford to lose them."

Thousands of men are idle right now for just one reason—they are unskilled! They work at any kind of job they can get, and when a slow-up comes, they are the first to be dropped.

You can climb out of the ranks of the unskilled and be sure of your job if you really want to do so. You can get the position you want by spare time study in the evening hours you now waste. Yes, you can!

For thirty years the International Correspondence Schools have been helping men and women to win promotion—to earn more money—to get ahead in business and in life. More than 2,000,000 have taken the Up-road to Success with I. C. S. help.

Don't let another priceless hour go to waste. Without cost, without obligation, tear out and mail this coupon. It will take only a moment of your time. But it's the most important thing you can do today. DO IT RIGHT NOW!

Hoopengartner at "K1" is going to do it. Cold weather is no time to take these trips, "Hopp."

August 1 witnessed the removal of office of Division Freight Agent Ferguson from Flora to Springfield. As a result of this move J. M. Skube becomes chief clerk to Mr. Ferguson at Springfield, C. N. Turns going to Washington as chief clerk to Division Freight Agent Lindsay, succeeding J. T. Wright, who has been appointed traveling freight agent.

Operator and Extra Dispatcher C. V. George has bid in a job at Cincinnati and moved his residence to that point.

Main Line, west of Mt. Vernon, Ohio

L. F. Ackerman has been appointed secretary to Trainmaster Smith and A. J. Smith is now holding down the job as day chief dispatcher's clerk.

### The Picnic Jingle

In honor of Maud Taskey, the trainmaster's clerk,

Who has resigned and will go home to Seymour to work,

Our Company girls gave a picnic quite jolly,  
And put a big crimp in Old Man Melancholy!

So they hied themselves out to East Side Park

All bent on having a jolly good lark.

Eighteen gathered round the table all merry,

Lucile, Blanche, Maud, Pearl, Mayme and Miss Berry,

Edna, Nettie, Bess, Stella, Alice and Lottie,  
Bertha, Josephine, Grace, Carrie, Etta and Dottie.

Sandwiches, olives, pickles, deviled eggs galore

And Jo's fruit salad that makes you call for more.

There was chicken fried to a nice perfection,  
And after all this a dainty confection,

And when they had eaten too much, 'twould seem

They ended the feast with huge blocks of ice cream.

Then when they started to stack up the dishes,

Pearl fed the scraps to the little fishes.

Then round and round the maypole they'd glide,

They swung in the swings and slid down the slide.

Dotty "skinned the cat," she should join a big show.

Stella did likewise, but Edna broke her toe.  
Bess Heise chinned herself on the high trapeze,

Grace couldn't skin the cat, but did skin her knees.

They all romped and frolicked and forgot all dull cares,

Then home on the street car, Lottie rang up the fares,

When each went her way, they said they'd had a good time,

I would tell you the rest, but I can't make it rhyme.

The accompanying photograph shows a portion of main line, St. Louis Division, just west of North Vernon. William S. Canfield is foreman here. This cut was recently worked through with American Ditcher; afterwards the shoulder, as is shown in the

picture, was moulded by hand. This piece of track presents a good appearance and reflects considerable credit on Foreman Canfield, who, as is indicated in this picture, takes great pride in the neat and orderly condition of his section.

### Toledo Division

#### East Dayton, Ohio

Correspondent, EDWARD M. MANNIX

Hats off to East Dayton for the phenomenal record established for "No Accidents"—going through five continuous months on the Honor Roll, with not one accident at our roundhouse. It is a record seldom if ever established at any similar place on the System.

Everybody's been busy during the period of unrest for the past few weeks, the writer having his share of the added responsibilities, but (glad to say) willing to find time for some notes for our good old MAGAZINE and proud to keep East Dayton represented as the "Garden Spot of the Toledo Division."

General Master Mechanic George Galloway recently remarked to the writer that we have a splendidly managed and progressive roundhouse. "Much obliged, Mr. Galloway, we know that, and we're going to keep it that way."

I am reserving a whole lot of recent occurrences which I may use in my notes later on, as they are well adapted to "Among Ourselves." Here is a sample:

Train Master T. J. Daly, while at the roundhouse one evening, asked two of the engine watchmen, Shorty and Percy, if the two yard engines were fired up. He received this reply, "No Boss, they're sound asleep and settin' pretty."

C. E. Thrasher, supervising agent, blew into the yard one evening recently with a swell Oakland Sedan. Just then J. H. Dixon looked up and asked: "What the h—l is making all that noise?" He was informed that it was Thrasher with his trasher. Dick said: "No need of a horn on that machine, it makes noise enough."

The accompanying photo is that of C. Edgar Thrasher, son of Supervising Agent C. E. Thrasher. A bright young chap of four years, and general favorite in his neighborhood!

The writer was asked last week to say a word or two about Yardmaster Lett's automobile and when I saw it, I had a good old fashioned laugh. Four tires of different

sizes, part wagon, and equipped with an odd shaped motor, runs side-ways at times other times not at all. I think this was the machine McGarry was in when they saw those Walking Fish.

I am not mentioning any names, but this ought to get him, all right:

"At every Gal he smiles and smiles,  
He's known as "Smiling Al."  
'Tis said that Ol' Al averages,  
'Bout twenty smiles per Gal."

Helen O'Neil and Irene Mannix are back from their vacations, all smiles, etc., and now Clara Leingang is going to Cedar Point again! Some attraction up there this year, I guess.

I want to offer a gentle yet serious hint to drivers of automobiles in connection with our Safety Crossing Campaign and here it is: "The best time to cross a railroad crossing is after the train has passed."

### Then Remember

"The best thought that Nature ever nursed was that Sweet Thought of Safety First."

### With Apologies to James Whitcomb Riley

When the frost is on the pumpkin

And the corn is in the shock,

That's the time that our business

Goes to pieces on the dock.

When the ice is on the river

And the winds begin to blow,

Frank and Nowak steady pinchem

But the cars are running slow.

Big Tony steady jumping

With the cable on his back,

Old Gotleib at the engine

Steady feeding out the slack.

When you get them on the cradle

Then the coal begins to stick,

Then Albert starts to holler

"Everybody get your pick;"

Then you pick them up and dump 'em

And again you can repeat it

Then it's time to check you bank-book

For it's almost time to beat it.

William Maguire, Toledo

Four-year-old C. Edgar Thrasher

[Division Accounting Office, Dayton, Ohio  
Correspondent, G. M. McBRIDE

You may think you cannot get out of your groove, but so long as you indulge in such thoughts, just so long you stay there.

Keep the Safety First movement in mind—the campaign doesn't close until October 1; really, there is no closing to Safety First movements.

Recently we noticed relics of vacations on some of the desks, being used as paper weights which really helped the looks of the desks very much. What does it mean? Just foresight, that's all—Joe always did have foresight.

Happiness is one thing that can be increased by giving part of it to others.

We are glad to note several new faces in the Division Accounting Office. We are glad also to note the ready adaptability of these newcomers in their respective positions.

Roy Ellison has accepted the position as general stenographer recently vacated on account of Randolph Van Seoyk being promoted to time clerk.

Karl Hotchkiss has accepted the position of income tax clerk recently made vacant on account of Bob Ball being run down by an automobile.

Carl Krug has accepted a position as labor distributor in the Maintenance of Way Bureau.

(Continued on page 64)

# Carnegie Institute, Pittsburgh, Offers Splendid Night Courses in Railroad-ing and Allied Subjects

By R. Sherman Clark

NOTHING brings success like know- ledge. Loyalty, persistence and general natural intelligence all count, of course. But without real knowledge they will not alone go far enough. And there is no royal road to knowledge, so the sages, past and present, have discovered. It comes only to the ambitious—to those who value the returns it brings sufficiently to work hard for it.

Pittsburgh, fortunately, is one place in America where the ambitious readily can learn. To any young man or woman in this district is offered a rare opportunity to increase knowledge and earning power through the Night Courses at Carnegie Institute of Technology. The scope of the courses touches nearly every branch of industry. The range of the work is wide enough to interest either the young worker who wants to specialize, or the one who wants to start along the road of increased efficiency in general, in industry or in the arts. And in no branch of practical, success-bringing learning is this opportunity greater than in the courses incident to rail- road operation and management.

Of particular interest to railroad workers are the courses in civil and mechanical engineering; machinery courses in foundry work, forge shop practice, patternmaking, machine shop practice, and heat treatment of steel, and other special courses in tele- phony, practical chemistry, mechanical drafting, storage batteries, lead burning, Oxy-Acetylene welding, algebra, plane geometry, physics and English.

Each of the shops used in these groups represents the last word in equipment and facilities. Each shop and laboratory is complete in every detail. Expert instruc- tions, combined with modern facilities with which to impart it, are almost immediately reflected in a student's earning capacity.

The Night Courses not only dovetail into the needs of workers in many industries, but they also serve workers with limited education as well as others who already have completed a more thorough schooling. While many courses are available to college and high school graduates, the majority are for the benefit of students without much education, but who wish to broaden their knowledge or to gain additional technical

BETTER TRAINING FACILITIES FOR STUDENTS THAN THESE CANNOT BE PROVIDED  
No. 1. Machine Room. No. 2. Materials Testing Laboratory. No. 3. Drafting Room in Department of Architecture

training in certain fields. And the man or youth of lesser education is as welcome as the more highly trained, and receives equally skilled and conscientious instruction.

Courses in the College of Engineering appeal especially to students with the equivalent of a high school education. In this college, courses are given in Chemistry, Civil Engineering, Electrical Engineering, Mechanical Engineering, and Metallurgical Engineering.

The courses in the College of Industries are the most popular because they meet so many needs. Here ambitious youths, at work during the day, can acquire, at night, technical training in many trades and occupations. Regular courses, leading to a Certificate of Proficiency, are given in the Machinery Trades, Building Trades, Printing, Practical Chemistry, Mechanical Drafting, Stationary Engineering and Telephony. Short special courses are given in many other vocational subjects.

Within the last few years, the College of Fine Arts has drawn heavy enrollment in its Night Courses. Hundreds of young people employed in offices, stores, and in other non-technical pursuits, feeling they have some inclination toward the arts, have uncovered latent talents. Courses open to men and women, are given in Architecture, Painting and Illustration, Music, Drama, Applied Art and Sculpture.

By a new arrangement, the fees for the year of 1922-1923 will be adjusted in accordance with the number of units each course represents. Registration and interview nights will be September 27th, 28th, and 29th. Regular class exercises begin Monday evening, October 2.

## Dayton, Ohio, Notes

(Continued from page 63)

At this critical time all we have to say to these newcomers is "Step on it."

Recently the writer talked with a lady who had been sent a card, complimenting her for heeding the rules in the Safety First movement. The public is being encouraged to "Stop, Look and Listen" at railroad crossings and the efforts are being rewarded in a wonderful way in spite of the fact that there are still some reckless ones. The public, in general, appreciate very much that little card of encouragement and it is to be hoped that many more may be sent before the first of October.

Our prima donna, Miss Clayton, spent her vacation attending Chataqua with the

Westminster Choir, at Winona, where they gave several concerts.

What do you know about promptness? Here's what I know about promptness. Recently, one of our number had an engagement to meet somebody (Mr. Morton, I think) at Ivorydale and as the train was late and he didn't want to be late in keeping his appointment, he started and ran to the shops where, he kept on running. The watchman was on the job with his long automatic and started to run too, and the more he ran the more the one from our office ran but that's all I know about it. If you want to know any more just ask Gene—'cause he knows the fellow who knows all about it. (Somebody told me it was he who did the running in the first place.)

And still we hear the remark "Did you hear about that horse?"

"The early bird catches the worm." Let's see how many early birds there are in this office.

Oh the trials of pedestrians

As they're passing to and fro,  
Mid automobile conveyances

As to their work they go,  
Let us not forget the birdies

In their flight amidst the blue  
With the perils of the airplane  
To dodge 'em just like you.

## Natural Resources along the Baltimore and Ohio

OFFICIALS of the Baltimore and Ohio Railroad's Commercial Development Department, of which H. O. Hartzell is manager, have just completed an analysis showing there are more than 1,000 coal mines on its lines in 54 counties in 7 of the states through which it operates and the seams of coal are minable with a coal reserve of 25,000,000,000 tons. In West Virginia alone, which ranks third in the coal output of the country, 18 billion tons of coal are available for steam and technical use, in mines adjacent to the Company's right of way.

This and other data compiled concerning the mines and grades of coal in Baltimore and Ohio territory are dealt with in the analysis which has been issued in pamphlet form under the title, "Coals and Their Relation to Economic Industrial Locations." Three other pamphlets have been prepared for distribution, one dwelling on "Salt and Its By-Products," which describes locations of salt mines and chemical uses of salt;

another, "Lime, Limestone Flux," serving as a guide to manufacturers who use limestone in quantity, and the third, "Sands, Molding and Glass," points out where these materials are found in abundance.

The analyses made by the Commercial Development Department further indicate that a large proportion of manufactured goods in the United States is produced in cities with a population of 50,000 or less and that on the Baltimore and Ohio alone there are 65 cities of 10,000 or more people practically near the coal fields. Industrial plants, located in these cities, states the report, on account of their nearness to the bases of raw materials operate at lower costs than those less favorably located. This is exemplified by one large metal fabrication plant that changed its location to the West Virginia coal fields and was thereby enabled to lower its costs one cent per pound less than the cost to similar industries that did not have the advantage of such proximity.

In analyzing salt and its by-products, Mr. Hartzell's report points out the opportunities for expansion and future development in the salt industry, especially along chemical lines, citing the northeastern portion of the State of West Virginia as a fruitful field for exploration along this line. Touching on this, Mr. Hartzell says:

"One of the beneficial results of the Great War has been the marked growth of the American chemical industry and the severance of dependence on German chemicals which formerly controlled the world markets. There is an unsupplied demand for these chemicals and in the Ohio Valley of West Virginia and in Ohio are latent possibilities for a large chemical industry, where the finer grades of chemicals in variety can be made under unusually favorable conditions."

## Bottled Sunlight

*Trying to Make Electric Light Bulb to Remain Aglow for Several Years*

A group of men associated with the Tomadelli Corporation, 533-535 Bergen Street, Harrison, N. J., believe they are on the verge of an important discovery, the manufacture of an electric light bulb which, once it is charged with electricity, will remain lighted for a year, possibly two or three years.

It was learned yesterday that all the energies of those interested in the idea are being bent toward the construction of machinery which will charge the lamp. No lamps have as yet been made, it was said.

The originator of the idea is Juan J. Tomadelli, an engineer, formerly of Buenos Aires. An associate of Mr. Tomadelli said yesterday that within three or four months the machinery would be completed, and a private demonstration will take place. A public demonstration will follow if the private demonstration is a success.

"Bottled sunlight" is the name given to the idea of charging electric lamps for a long period. The lamps used in the experiments are similar to the ordinary electric lamp. Instead of a brass cap with a thread to be screwed in the electric light fixture, porcelain is substituted. The porcelain bears the standard thread on the outside. Between the porcelain and the glass of the lamp is an alloy, the secret of which is known to Mr. Tomadelli. Some property in the alloy, when affected by a current of electricity, causes the filament in the lamp to glow with a bright light, according to Mr. Tomadelli's associates. Once charged the lamp will burn for a long time, it was said, and a shade of some sort will have to be devised to cover the light when it is not required.

Have You Gotten Your Free Booklet Showing Floor Plans of 50 Homes; or That Set of Complete Plans and Blueprints for Your Own Home at \$2.50? See Below

You Can Get a Complete Set of Blue Prints and Plans for Any One of These Houses for \$2.50. Order by Plan Number from the Editor, Mt. Royal Station, Baltimore, Md. This offer is made through the courtesy of the American Wholesale Lumber Association.

A handsome booklet issued by the Southern Pine Association, and containing the pictures and floor plans of fifty modern houses, may be had without charge from the Editor of the Magazine on request. We have already distributed over 300 copies of this booklet. Complete working blue prints and specifications for any one of the houses in the booklet may also be had for \$2.50

# No Money Down

Guaranteed  
for  
Life

**Pudding Pan.** Used like this for puddings, cakes, bread. Also milk dish. 2½ quarts.

Used as Colander. Handy to rinse berries. Also used as Strainer.

Used as a Double Boiler cooks cereals, no scorching. Steams vegetables in top. Kettle Cover made of thick aluminum.

When used as Casserole ideal for baking apples, beans, escalloped potatoes, macaroni, etc.

**Convex Kettle.** This combination used for cooking and stewing vegetables. Bulged sides, easy to pour liquids off. Used as Windsor kettle.

Used as a Double Boiler cooks cereals, no scorching. Steams vegetables in top. Kettle Cover made of thick aluminum.

When used as Preserving Kettle distributes heat evenly. Not necessary to stir the contents.

**Corn Popper.** This combination is what you want for special things—corn popping, crisping corn flakes, roasting coffee, etc.

**Combination Cooker.** Used this way for general purposes not so well filled by any other utensil. Ears of kettle hold bail upright or lowered position.

Used this way is a Steamer Set. For steaming potatoes or corn on cob. Perforated bottom makes uniform cooking.

Used this way for Tubed Cake Pan. Removable tube. Cakes taken out easily without breaking.

**Self-Basting Roaster.** When used this way makes juicy, well browned roasts. A perfect self-baster. Steam condenses on cover and drips back.

A complete cooking set in this wonderful combination. Send only the coupon and we ship the set, all charges prepaid. Try it 30 days on free trial, and then if not just what you want, pay nothing and send it back and we'll pay the return postage charges. If you keep it, pay bargain price at the end of 30 days' free trial and it is yours. Mail coupon today.

## Wonderful Combination ALUMINUM Cooker Set

5 Pieces, Make 11 Utensil Combinations

- |                      |                      |               |
|----------------------|----------------------|---------------|
| Pudding Pan          | Tubed Cake Pan       | Casserole     |
| Preserving Kettle    | Double Boiler        | Convex Kettle |
| Combination Cooker   | Strainer or Colander | Steamer Set   |
| Self-Basting Roaster |                      | Corn Popper   |

Made of best heavy-gauge aluminum—bright, silvery, beautiful, easy to keep clean, light to handle—guaranteed for life.

This complete set gives you eleven utensil combinations. Outside kettle holds 6 quarts, inside pans 2½ quarts, other utensils in proportion. All highly polished on outside. Sun-ray finish inside. When not in use all pieces nest together. Takes up little space. Sets on shelf. Bails (or handle) detachable. You must see it and use it to realize what it really is. So send at once.

Order by No. 417DMA6. At end of 30 days' free trial, pay only \$2.75 if you keep it. Shipped from Chicago prepaid.

### THE READER AND ADVERTISING

Circulation of the Baltimore and Ohio Magazine is over 40,000 copies per issue, our aim being to place it in the hands and in the homes of practically all English speaking employes of the Railroad. An examination of our advertising will show that it conforms to the highest standards. We do not guarantee it, but we believe that it means exactly what it says, and for that reason feel free to urge our readers to patronize our advertisers whenever they consistently can.

**Have a Smile**

A customer who called at the clock shop was shown all kinds of clocks, all sizes and shapes and a timepiece of every description. At length the jeweler took a massive timepiece from the shelves. "Here, Sir," said the jeweler, "is a clock which will, I think, suit your fastidious taste. At precisely 10 o'clock every morning the tiny bells chime and a bird hops out and sings a carol."

"I will take that if you make a few changes in it," replied the customer.

"With pleasure," said the jeweler, who seems to be the only man who can change the facial expressions without pain.

"I have a daughter, went on the customer, "and I want a clock for the front room where she entertains her company. Make it so that at 11.00 o'clock every night a milkman's bell will ring and a newsboy will shout "Morning papers."

—*Ironton News, Ironton, Ohio*

**Quite a Nuisance**

Charles M. Schwab is credited with having sprung the following at a dinner recently:

"Some men, retiring from business at fifty-five or so, take bungalows at Los Angeles and do nothing but sit on their front porches and listen to their arteries hardening. A bad thing.

"Others join the Atlantic City colony. There they are sure to become cranks, golf cranks, while their wives, frequenting the boardwalk sales in the Japanese shops, become auction cranks. Rather a nuisance, that.

"I once spent the week-end at an Atlantic City cottage where my host and hostess were cranks of this kind. My bedroom adjoined theirs and I got very little rest, for all night long the golf crank husband kept shouting in his sleep, "Fore!" and instantly his auction crank wife would yell out, "Four and a half."

—*North Shore Bulletin*

**On the Safe Side**

A man from Arizona on returning home was telling of the crookedness of card playing, as practiced in Montana.

"I was settin' in a little poker game with a bunch of fellers up there," he orated, "when one guy parks a cud of chewin' tobacco in the middle of the table. Well, I don't say nothin.' Then pretty soon another feller parks his. Still I don't say nothin.' But when a third does the same thing, I gets fretful.

"Say, I says, 'what's the big idea.'"

"Pardner, one of the fellers says, 'you don't think we're goin' to take no chances by turnin' our heads, do you?'"

**Both of 'Em**

Judge O'Neill (to Irish prisoner)—"Well, and what brought you here?"

"Two policemen, your honor."

"Drunk, I suppose?"

"Oh, begorra, they were, your honor—both of them."

"Ten dollars, or a month in jail!"

"Thank yer kindly, I'll take the money."  
 C. A. Wagner

**Can't Leave His Business**

"Mamma," asked Freddie, son of Mooie Goldstein, "are we going to heaven some day?"

"Yes, dear, I hope so," was the reply.

"I wish papa could go, too," continued the little fellow.

"Well, and don't you think he will?" asked his mother.

"Oh, no," replied Freddie, "he couldn't leave his business."  
 C. A. Wagner

**Good to the Irish**

"How much are yer fish, Mr. Goldstein?"

"Eight cents a pound, Mrs. O'Brien."

"I'll take two of them. How much will they be?"

"Let's see: Eight pounds—eight times eight are eighty-four. Take them for seventy-five cents, Mrs. O'Brien."

"Thank ye, Mr. Goldstein, I'll do that. Ye're always good to the Irish, I'll say that fer ye."  
 —*North Shore Bulletin*

Traveler rushing up to a station attendant, breathlessly: I want to catch the last train to Buffalo.

Attendant: What's your hurry—You'll be dead a long time when she leaves.

**Why Call on the Girls**

Dear Editor: I have a conversational problem. After I go with a girl a time or two she seems to tire of me. I do not care to make love, or to brag, and I do not know what to talk about. Can you suggest some way from me to be interesting?

Serious Samuel

Dear Serious Samuel: If you do not care to make love, or brag, why waste a girl's time? Why not join the Y. M. C. A. and spend your evenings there?

*The Bughouse Bugle*

**Saving It for the Wake**

An Irishman, lying on his death bed, was questioned by his inconsolable, prospective widow. "Poor Mike," said she, "is there inythin' ye wud like to have that wud make ye feel better?"

"Plaze, Bridget," he replied. "O'id like a taste of that ham Oi smelt a-boilin'."

"Go 'way wi ye. Divil a bit of that ham ye'll get. 'Tis for the wake."

—*American Legion Weekly*

**Righto, Old Top!**

"Well, dad, here we are," said the young man who had persuaded his father to attend a boxing match, "I'll warrant you'll get more excitement for your two dollars than you ever got in your life before." "Huh! I doubt that," grunted the old man. "Two dollars was all I paid for my marriage license."  
*The Bughouse Bugle*

Jocular traveler to Pullman porter: How often do you kill a man on this railroad, Sam?

P. P.: Only once, Suh—only once.  
 —*Exchange*

## The Baltimore and Ohio Railroad Company

OFFICE OF THE PRESIDENT  
BALTIMORE, MD.

SEPTEMBER 25, 1922

### TO OFFICERS AND EMPLOYEES:

During the past ten weeks, owing to the fact that a large number of the men employed in the shops were on strike, the Baltimore and Ohio Company has been obliged to curtail its service to a considerable extent. Much through freight, which customarily would move over the Baltimore and Ohio rails, has been diverted to other lines. The pressure for coal since the end of the strike of the bituminous coal miners has also added to our difficulties, and made it impossible to fully serve shippers located on the lines of the Baltimore and Ohio, and at some places dependent wholly upon this Company for transportation. Nevertheless the shippers have shown great patience under trying circumstances.

Now that the Baltimore and Ohio men have returned to work, the public will expect an immediate resumption of normal operation. This will, of course, be impossible, no matter how hard we may try to meet the requirements of the situation. We cannot in a few days recover what was lost in a period of more than two months. However, by a united effort and with a determination on the part of everybody connected with the Baltimore and Ohio System to restore normal conditions at the earliest possible moment, in order that we may give to the public the service it has a right to expect, a remarkably quick recovery can, without doubt, be made.

The officers and men upon whom an unusual burden has fallen during the strike have undergone a great strain. The Management realizes this and appreciates the efforts and sacrifices they have made. The men who have been idle have experienced a loss in wages equal relatively perhaps to the severe loss which the Company has sustained in consequence of the strike. To regain the business which naturally and normally belongs to the Baltimore and Ohio; to handle the business which has been held back but will now move, together with the increase which we must look for due to a lessened coal production during the past Summer—is a task which we must now unitedly attempt to perform. It is a big task, but one which I believe we can accomplish and accomplish quickly if there is a genuine spirit of cooperation among all connected with the Baltimore and Ohio service.

For the reasons above mentioned, the Baltimore and Ohio Management appeals to all Baltimore and Ohio employes for a special effort; for a little additional energy and enthusiasm, if possible, in order that we may come back quickly to a normal basis and be able to give to our patrons and to the public generally the kind of service which they are accustomed to expect and receive from this Company.

THE BALTIMORE AND OHIO RAILROAD COMPANY,

President

# BALTIMORE AND OHIO MAGAZINE

*Published monthly at Baltimore, Maryland, by the Baltimore and Ohio Railroad, to improve its service to the public and to promote efficiency and community of interest among its employes*

VOLUME 10

BALTIMORE, OCTOBER, 1922

NUMBER 6

## Our Tenth Anniversary Number

### The First Issue of the Baltimore and Ohio Magazine Was for October, 1912—A Retrospect and a Prophecy

The first issue of the Baltimore and Ohio MAGAZINE, then called the "Baltimore and Ohio Employes MAGAZINE," was for the month of October, 1912, just ten years ago this month. This, therefore, is our Tenth Anniversary Number notwithstanding the fact that publication was suspended during a few months of 1914-1915 on account of extremely unfavorable business conditions and the necessity for retrenchment in every direction.

Although the Baltimore and Ohio cannot add the MAGAZINE to its other "Firsts," it can claim that our MAGAZINE was *one* of the first of its kind published. Since its first issue many other railroad magazines have come into the field and there are now being published in this country alone literally hundreds of plant publications similar in scope and object to our own.

The present editor has been with the MAGAZINE during practically its whole history. During that time it has been his pleasure to meet a host of Baltimore and Ohio people, to work with them and to feel the fine assurance of having their support and interest. In fact, if there is one respect in which the Baltimore and Ohio MAGAZINE excels it is because it has enlisted so generally the active support of so many officers and employes of the Railroad. It has become to an extent (although not nearly to the extent we should like to see it) a clearing house for the opinions and ideas of those in the Baltimore and Ohio family.

Nine years' work on the MAGAZINE has given the editor a pretty clear conception of the problems of the Railroad and of those connected with it. These have been gained through contributions reaching the MAGAZINE office, through inquiry and through acquaintance and friendship. Furthermore, he has had the privilege

of consulting freely with officers of the Railroad, to find out just what they are thinking about the great property and the great family with which we are all connected—and with the thought, of course, of passing on their views for the benefit of all the rest of us. It has often appeared that these views were being interpreted to the members of our Railroad family in words which they could clearly understand. At other times it has seemed discouragingly evident that the admittedly fair and liberal attitude of our Management toward our employes has been so poorly presented in the MAGAZINE as to have missed the mark almost entirely.

With this in mind, it seems to the writer that no better use could be made of this space in our Tenth Anniversary Number than by presenting to our readers a somewhat intimate and informal history of the Baltimore and Ohio in certain of its aspects during the last ten years, as well as some remarks concerning its present and future, for the purpose of trying to make clear just what the Railroad stands for.

#### In Retrospect

It was in 1913 that the officer then directing the MAGAZINE policy requested that the question,

"Are You Following the Baltimore and Ohio Way?"

be printed in bold face type in the center of a Magazine page containing no other printed matter. This was done and was, in effect, a friendly challenge to all employes who read it. It meant that the Baltimore and Ohio had gone on record as being in favor of certain well defined principles of business action and that if a man were really a loyal employe he would do what he could to make them effective.

Even before this, certain of these

principles were well known to the rank and file on the Railroad. It was only shortly after Mr. Willard became our president that he was asked the question, "Where do you place Safety in the operation of a railroad?" He gave the answer, "Above everything else,"—an answer which has been an inspiration and buttress to all those interested in Safety ever since that time. And our record shows that in a gratifying measure at least we have followed "the Baltimore and Ohio Way" in Safety.

As early as January, 1913, there appeared an article in the MAGAZINE requesting employes not engaged in traffic solicitation to do what they could to bring business to the Railroad. Several years later postcards addressed to a traffic officer were inserted in each issue of the MAGAZINE for the purpose of giving every employe a chance to send in a traffic "tip" which might lead to new business. It was in the latter part of 1920 that President Willard appealed to the Veterans to make a united effort to bring business to our rails, thus bringing to a climax the business getting efforts of the decade. And that here again we followed "the Baltimore and Ohio Way" was shown by the many carloads of freight and passengers moved on the Baltimore and Ohio which, without the ready response, would have gone to other roads.

At the convention of officers of the Railroad at Deer Park in 1916, the Mexican trouble was brewing, and it was in his address there that President Willard made clear another great principle of the Baltimore and Ohio, namely, that in time of national emergency everything on the Railroad would be secondary in importance to the movement of troops, munitions and supplies. It was also at this convention that he gave utterance to

his memorable "Good Neighbor" statement which has been frequently printed in the *MAGAZINE* and which has become more truly the expression of what the Baltimore and Ohio stands for than anything else. During the years, evidence has not been wanting that in these principles also we have been following "the Baltimore and Ohio Way."

Who can forget the importance which the word "Americanism" began to take on during the latter half of 1914, after Europe had plunged into the war debacle? At first it was negative in its meaning—we were to be pro-nothing except pro-American. But even then it was necessary to stand up and be counted, for there were many about us who were anything but pro-American. Then came the day that for months had seemed inevitable, the day on which our nation decided to take its stand on the firing line at the side of the Allies. Here again a Baltimore and Ohio principle was enunciated clearly—that every employe who went to war could get his job back when he returned—and it is only fair to believe that many of the over five thousand from our Railroad ranks who marched with the colors, were buoyed up in moments of depression and danger by the thought that back home their jobs awaited them on the old Railroad. Furthermore, the old Railroad itself—in keeping with its tradition of public service, begun during a national emergency, the Civil War, and carried on through every following national crisis—was in "up to its neck." Munitions of war in large quantities and men in great numbers were carried safely and swiftly over our rails during the war, and there were few railroads which suffered as much as did ours, particularly in the division of Management and the diversion of traffic enforced by Federal Control.

Be it known to all who read this, whether they are entirely in sympathy with it or not, that President Willard was one of the earliest and most earnest supporters of the legislation which resulted in the Transportation Act of 1920, under which the railroads are now operating; and that since this was made the law of the land the Baltimore and Ohio has lived up not only to the word, but to the spirit of all its provisions. In this the Baltimore and Ohio is following the only legally constituted authority that it can follow as an American public utility. It has, therefore, most truthfully made this government statute "the Baltimore and Ohio Way" for itself, and has only maintained and urged that

the employes of the Baltimore and Ohio should be willing to do the same thing.

It seems almost unnecessary to mention the growing importance of courtesy on the Railroad during the last decade. Yet, as we pause in our retrospect, we not only mention it but we emphasize it because its recent vigorous growth on the Baltimore and Ohio is the best proof that as the years have sped by more and more employes have been glad to follow "the Baltimore and Ohio Way."

It is undoubtedly true that ten, twenty and more years ago Baltimore and Ohio employes were courteous. To see that, it is only necessary to meet the dozens of inherently courteous trainmen who are on the Road today and whose service stripes show that they were on the Road extending courtesy twenty and more years ago.

Nevertheless the spirit of the times has changed during that period and progressive leaders in the railroad world have been wont more and more to emphasize the public service nature of their business and how big Courtesy bulks in it—none, please note, more quickly or more vigorously than on the Baltimore and Ohio. It is but natural, therefore, that with this ideal held out by the Management before the employes of the Road, there should have been a quickened response from them. Casual conversations in the day coaches and Pullmans on our trains, or in our stations, and the letters of appreciation which pour in upon the officers of our various departments, for special courtesies rendered by our employes, show the extent of this response.

Leaders in our railroad ranks have been quick to catch the soundness of the appeal in the courtsey idea and to promulgate it among their associates. It is not unreasonable also to suppose that the *MAGAZINE* has been an important factor in suggesting constantly to the employes of the Road that they are following the best Baltimore and Ohio tradition when they are courteous.

This apparently greater willingness of larger numbers of our employes to follow "the Baltimore and Ohio Way" has come because of growing belief in the absolute fairness and reasonableness of our Management, which does not expect or ask the impossible of anyone. It has also been brought about by a better understanding of what the Management wishes, made possible by many things; by the greater social mingling of our employes, for in-

stance, in welfare, athletic and other recreational organizations.

#### The Present

But if the retrospect shows that something has been accomplished during the last decade to make us a more useful, contented and successful organization, let us not on this account discount the job facing us today and in the future.

The last five years have been extremely trying ones for the railroads. It seems that just as soon as they pull through one crisis, another is heaped upon them. Operating today more efficiently and more economically and with lower rates and higher wages than railroads elsewhere in the world, some power, some interest, some threat seems constantly to be demanding the impossible of them. And the penalty that is held like a sword over their heads is Government Ownership, a panacea put forward by theorists who are unwilling or unable to see that in no matter what place or country it has been tried, it has been proved far inferior to private control from almost every standpoint and a positive menace to economical national administration in the country which is burdened with it.

Fair minded and far seeing experts in our railroad world have repeatedly said that if the railroads are permitted to work out their problems under the provisions of the Transportation Act of 1920, with such modifications as may be admittedly advisable, they can do so. And at the same time they can give satisfactory service to the public, fair wages to their employes and reasonable dividends to their stockholders. This is what the Baltimore and Ohio believes it can do provided it has the good will and cooperation of its employes.

The Baltimore and Ohio has great assets to help it win this goal. Its reputation is above reproach among all people. Its Management has shown high qualities of skill, patience, courage, liberality, fairness and determination. And it is safe to say that the desire among its employes to place the Baltimore and Ohio in the first rank among American railroads, is stronger today than ever before. But let us not forget that our Railroad has suffered so severely that even if every employe increases his own or her own efficiency beyond anything that it has been before, as is confidently expected, it will take months to put the Road where it should be.

#### The Future

Therefore, as for the future, what can be said? Nothing, perhaps, more

definite and conclusive than this, addressed to the Veterans by President Willard last January:

"No matter how hard we try, we cannot make the Baltimore and Ohio Railroad the greatest railroad in the world, or the straightest or the richest railroad, but we can, if we will only try hard enough, create for it the reputation of being the best railroad in the world in point of service. We can do that. I cannot do it alone. You cannot do it along. But all of us working together can do it, and I earnestly desire your cooperation in this way.

There—is another friendly challenge to follow "the Baltimore and Ohio Way," a way which will surely be a pleasant one and a profitable one "if we work together."

The Management of the Baltimore and Ohio is infinitely more concerned about the welfare of every individual employed by it than most of us realize. It is thus concerned about them not alone because it realizes that a satisfied employe is the best employe—not alone because it knows that the health and prosperity of a big organization like the Railroad can most often be gauged by the health and prosperity of those employed by it. The bigger and finer reason is because it is interested in the welfare of its employes in the same way that one man should be interested in the welfare of another, purely from the standpoint of disinterested friendship.

It was only last winter that the Management made certain engagements with the Veterans in regard to an increase in our pension. A better illustration is the fact that for the year ended August 31, 1922, the Baltimore and Ohio paid over \$50,000 in salaries to sick employes of one department alone.

The Company was under no requirement to pay out this money in wages and did so in a spirit of liberality and appreciation to considerate and faithful employes.

The Management has also had under consideration for some time proposals which, if put into effect, would redound to the prosperity and happiness of its employes. In the opinion of the writer these will come, in time, if "we all work together."

#### The 100 Percent. Baltimore and Ohio

There is everything to make one proud in active employment with the Baltimore and Ohio. Its policies are progressive, constructive and humanitarian, both in relation to the public which it serves and the thousands of people whom it employs.

It is a fine thing to be able to say that one works for the Baltimore and

Ohio. One can do it in any assemblage and hold his head high and have a look of pride in his eyes. For the people of the country through which the Baltimore and Ohio runs and where it is best known have come to understand clearly that it is fearlessly and ably led, honestly and fairly managed.

Membership in such an organization should be a tremendous incentive to all officers and employes. It should mean complete assurance of

getting a square deal, of having every effort which they make in the interest of the Company appreciated and rewarded. It should mean that every one of us will gladly work toward a 100% Baltimore and Ohio, when

The people who own it,  
The people who manage it,  
The people who work for it and  
The people who use it—

like it so well that they want to continue their relationship with it indefinitely.

## Trade Mark Contest—Some Suggestions

AT this writing, the September MAGAZINE having been distributed for only two weeks, 271 entries have been received in the Trade Mark Contest, showing great interest among our readers.

Solely with the idea of being helpful and not critical, we must register our disappointment at the quality of the ideas thus far submitted. The outline of the contest given in the September issue emphasized the fact that a trade mark, to be effective, must be simple. Fully nine out of ten of the suggestions thus far received have more words and ideas expressed in them than a trade mark should have. It is easy to put down in a circle, or a square or some other drawn figure, a summary of the outstanding best characteristics of the Baltimore and Ohio, and this, unfortunately, is what most of the contestants thus far entering the contest, have done. It is much harder to boil all these things down into one concrete, convincing and, at the same time, comprehensive idea which stands out like a searchlight at night, and which has stamped all over it the character "Baltimore and Ohio."

Only a few of the contestants have gotten anywhere near the kernel of the subject. We hope that our supposition that those who have thus far replied have really not given the contest a great deal of serious thought, and that the more thoughtful entries will be received later, is a correct one. Not all of those replying thus far have observed regulation No. 6, which reads:

"6. Write on one side of the sheet only, allowing plenty of space between lines. Do not place any evidence of authorship of the suggestion either on the envelop in which the suggestion is mailed or in the suggestion itself. But with the suggestion enclose a blank envelop containing a slip of paper showing name and address of the contestant. The contestants will not be known, even to the judges,

until the winning suggestion, if such there be, has been decided upon."

Those who have violated this rule have had their entries returned to them to be resubmitted correctly.

Some of the contestants have used the expression "B & O" in the ideas which they have submitted. Anyone who has read the MAGAZINE at all carefully during the past few years should know that it is the wish of the Management that this expression be not used in any way in connection with the Railroad, except where absolutely necessary in car records, etc. It certainly does not wish it featured in a trade mark and the use of "B & O" would disbar any entry from the competition. The expression "Baltimore and Ohio" should be used and not the initial abbreviation. A perusal of the MAGAZINE, practically since its inception, will indicate how infrequently "B & O" has been used, generally only in poems, where the rhyme or rhythm made its use desirable.

The contest will not be concluded until a satisfactory trade mark has been submitted or until it is deemed inadvisable to search further through the contest for one. But the first trade mark which hits the mark, will be accepted, and the contest will then be over. The desirability of using reasonable speed in submitting your idea is, therefore, apparent.

Many entering the contest have evidently been obsessed with the importance of Maryland and Baltimore in Baltimore and Ohio history. To be sure, they have played bigger parts than any other states or cities, respectively, but it must be remembered that the Baltimore and Ohio now runs through thirteen different states and that the largest cities in the country are served by it; and that to suggest a trade mark featuring Maryland or Baltimore at the expense of other states and cities, would certainly not represent the whole Railroad and all that it stands for.

# Columbus

Cincinnatus Hiner Miller

Known as JOAQUIN MILLER

**B**EHIND him lay the gray Azores,  
 Behind the Gates of Hercules;  
 Before him not the ghost of shores,  
 Before him only shoreless seas.  
 The good mate said: "Now must we pray,  
 For lo! the very stars are gone.  
 Brave Adm'r'l, speak; what shall I say?"  
 "Why, say: 'Sail on! sail on! and on!'"

"My men grow mutinous day by day;  
 My men grow ghastly wan and weak."  
 The stout mate thought of home; a spray  
 Of salt wave washed his swarthy cheek.  
 "What shall I say, brave Adm'r'l, say,  
 If we sight naught but seas at dawn?"  
 "Why, you shall say, at break of day:  
 'Sail on! sail on! sail on! and on!'"

They sailed and sailed, as winds might blow,  
 Until at last the blanched mate said:  
 "Why, now not even God would know  
 Should I and all my men fall dead.  
 These very winds forget their way,  
 For God from these dead seas is gone.  
 Now speak, brave Adm'r'l; speak and say"—  
 He said: "Sail on! sail on! and on!"

They sailed. They sailed. Then spake the mate:  
 "This mad sea shows his teeth tonight;  
 He curls his lips, he lies in wait,  
 With lifted teeth, as if to bite:  
 Brave Adm'r'l, say but one good word;  
 What shall we do when hope is gone?"  
 The words leapt like a leaping sword:  
 "Sail on! sail on! sail on! and on!"

Then, pale and worn, he kept his deck,  
 And peered through darkness. Ah, that night  
 Of all dark nights! And then a speck—  
 A light! a light! a light! a light!  
 It grew, a starlit flag unfurled!  
 It grew to be Time's burst of dawn.  
 He gained a world; he gave that world  
 Its grandest lesson: "On! sail on!"

### Government Ownership in Australia—Industries Returning to Private Control

GOVERNMENT ownership is on the wane in Australia. In August the Australian Government announced it was going out of the shipbuilding business and also out of the business of owning and operating merchant steamers. As for its woolen mills, it has decided that they should be handed over to private enterprise, on the theory that the government should not engage in an undertaking which requires it to go out and solicit trade. In the business of operating ships the Australian Government has encountered exactly the labor troubles that confronted the employers with a few extra thrown in for good measure. Official Australia is now anxious to have someone else operate its ships.

—The Nation's Business

## The Coal Bill and the "Smoke Screen"

That part of coal which will burn is called the "Combustible" of the coal. The Combustible of coal is found in two forms in all coals: (a) fixed carbon or coke; and (b) volatile matter, which consists of the pitch tars and oils of the coal, which, when driven off, are made gases by the heat of the firebox.

The fixed carbon of the coal gives the fireman little trouble because it stays on the grates until it is burned, and it will all burn; but it only constitutes approximately 39 per cent. of the heat value of the coal in such coals as are used on the Baltimore and Ohio.

The Volatile or gaseous matter of the coal that will burn, constitutes approximately 61 per cent. of the heat of the coal.

The Volatile will not burn in the tubes. The time that it takes the gases to travel from the fuel bed to the tubes is so short that burning conditions must be JUST RIGHT or a large portion of the gases will escape unburned. When they escape unburned they come out of the stack AS SMOKE. SMOKE therefore, is for a large part UNBURNED COAL—WASTED COAL in other words. BLACK SMOKE IS A SIGN OF WASTE.

An Engine crew that does not understand how to burn gases may allow 70% of the gases to escape unburned. This means that of two firemen on a trip, one who knew how to burn the gases completely would use 5 tons—the other who allowed 70% of the gases to escape unburned would use 8.5 tons. In other words the second man would have to fire 3.5 tons more coal than the first man to get the same heat value on that trip. This is EXTRA WORK for the MAN, EXTRA EXPENSE for the Railroad for coal, to say nothing of the extra labor involved in caring for dirty fires and the extra expense of repairs made necessary by burning the extra 3.5 tons of coal.

BLACK SMOKE IS NOT NECESSARY—IT IS A SIGN OF INEFFICIENT FIRING.

HOW TO PREVENT IT? Read pages 14 and 16 of the book "GOOD FIRING." If you haven't a copy ask the Road Foreman, and remember.

P.S. - About 12 Million of the 17 Million dollar 1921 Loco. fuel bill heat value was "VOLATILE". We wonder how much of it was "SMOKE"

## Do You Want to Earn Big Profits?

*Invest in Some Safety Stock—It Pays Good Dividends!*

By E. E. Alexander

Supervisor, Timber Treating Plant, Green Spring, W. Va.

THE success of the Safety work is better understood when we realize the importance given to it by our own president, Daniel Willard, who has placed it "above everything else" in importance in the operation of a railroad.

It is the greatest work ever undertaken by any railroad or industry and it pays bigger dividends. Having for its object the preservation of human life and limb and the prevention of destitution and misery, it has come to be recognized as an indispensable part of any organization. It is not only good ethics, but it is good business.

To my mind, the three fundamentals that have made the Safety work successful are: Education, Cooperation, Confidence. If I were asked to design a Safety emblem, I would suggest three links, arranged in the form of a triangle and bearing these three words. In the center I would have the word "Safety," in gold, for the sum of Education, Cooperation and Confidence equals Safety—pure gold to all, but often recognized too late.

Through Education, the most important of these, ignorant and careless persons become intelligent and careful, capable of fullest cooperation with their employes and fellow workers; they learn to place confidence in themselves and in others; they realize that Safety is a mutual benefit and a blessing to all and that it is necessary to health and happiness.

By far the greatest number of accidents have been the result of carelessness, ignorance and bad practices. Any Safety campaign, if it would achieve success, must recognize these causes and must combat them through education. Education is oft-times slow and its results are sometimes intangible, but that it does produce real results is evidenced by the great reduction in the number of accidents since Safety work began.

Fully three-fourths or 75 per cent! Think of it!

Read that again; consider it well; estimate its value, if you can. How

far-reaching are its results! How many lives does this 75 per cent. represent? How many limbs saved? How much suffering, destitution and misery prevented?

The real results of accidents reach beyond the capacity of cold figures. They cannot be computed. If we could conceive, only partially, its true value, we would all be converts to Safety and never miss an opportunity to be careful and to make the world safe for others. Our reward would be a duty well done, the satisfaction of never having caused unnecessary loss of life or limb through any careless action on our part.

Seventy-five per cent. of accidents, due to carelessness, averted! This is the result of education; education that has taught men that there is a cause, a responsibility for every accident; education that has taught men to wear goggles, proper clothes, gloves;

etc., and how to use tools and machinery. Safety committees are Safety teachers who have taught us to think first (which is synonymous with Safety First). This is the education that has made safety work successful.

And this education will go on. Our mechanical hazard has been reduced almost to a minimum; it is the human factor that needs further teaching. Moreover, this education requires careful, efficient foremen to carry the work on. If a foreman is careless his men will be careless. Cleanliness and neatness are also aids to Safety and are included in its education.

How has this education been carried on?

Through cooperation between our officers and employes; through various Safety committees; through moving pictures, blue prints, placards, slogans and posters. Last, but by no means least, through our MAGAZINE.

Only continuous campaigns are successful. This campaign will be carried on until every child is taught Safety in the public schools, until the mother teaches Safety in the home, and until the civic and social clubs, the churches and other organizations, including the press, cooperate in the promotion of Safety. How successful our Safety work will be when education reaches that stage where careless acts and even words that cause suffering to others will be avoided as poisons that destroy soul and body!

## Some Accidents That Might Have Been Prevented

**Baltimore Terminal Division**—A car repairman was assisting some fellow workers to move a car which was too close on the repair tracks to another. As some of the others moved the car, the repairman attempted to place chocks under the wheels. It had been raining and the tracks were wet. The car wheel shoved the chocks along the rail. The repairman was walking behind the car as it drifted slowly along and as he rose he was squeezed between the end sill of the moving car and another standing still. He should have stood outside the tracks to place the chocks. There were brakes on the car and these could have been used to stop the car just where it was wanted and then the chocks could have been safely placed in position. The repairman paid with his life for his thoughtlessness.

**Ohio Division**—After relaying a signal to the engineer of a freight train that was pulling into a siding, a brakeman walked along the top of the cars towards the locomotive. It was night, but clear weather. When about six car lengths from the forward end of the train he fell between two cars and was fatally injured. The condition of the top of the cars was good, but it is believed that he forgot for a moment the necessity of carefulness. The train was moving about 6 miles an hour and there was no rough handling.

**Newark Division**—After carelessly piling their tools on a motor car, a track gang boarded the car and when it was moving at about 12 miles an hour, a lining bar fell off, struck the ballast and this caused the other end to puncture the leg of one of the laborers, throwing him from the car. The man suffered a nasty leg wound where the bar punctured it and he also was bruised and scratched from being hurled to the ground. It is always well to see that tools are safely piled on cars and secured before moving.

**Baltimore Division**—Two linemen were riding along leisurely, both facing forward and in earnest conversation. They were more intent upon other things than their own welfare. A light engine came up behind them, struck the motor car and both men were thrown off. One was severely injured, but the other only slightly. It is safe only when you watch in both directions when riding motor cars.

Lets Build—Safety!

By Arthur E. Heinzenberger

NO, it isn't foolish to ask the other fellow to be careful; and for me to be likewise. Can I or the other fellow give any sensible reason for not being careful. Surely not! Just plain negligence and dumbness will oftentimes bring temporary and prolonged sorrows.

Would it be dumbness (to be frank) if I should allow my buddy worker to run into danger. No! It would be downright cowardice and manslaughter. The bitter cup of sorrow is always swallowed with eternal regret. Beware of consequences.

Acquaint your fellow worker with all the dangers that surround him and work with him and it will be needless to sympathize with him over his injuries. Keep him whole and whole-hearted. By all means use your head and do the job clean.

Stop and think occasionally whether you are guilty of letting things slip. If so, put grit and determination on the slipping surface and make way for security.

It is much better to wash a hand of five fingers, than wish you had them. Play safe and make the round trip home each day. It is the minutes of time that bring forth hours of regret. Watch the seconds too and above all things—THINK! The things that look first rate are not all straight—they bear watching.

It takes a many step to make a mile, but only one to cause an accident. Watch your step. You can't keep a good man down, but accidents can and will. Help carry and place the stakes that crowd out dangers. Build a stronghold against minor injuries, then you will see the

No Place to go but... OUT.

light and enjoy the reward. Let's not segregate unsafe methods, but bury them. Let them be dead issues.

A National Trait

OUR country is less than a century and a half old. Implanted on the richest continent of the globe, from the beginning our people have been extravagant in the extreme. We have eaten only the heart of the watermelon and peeled our potatoes with a dull knife. Only the most fertile of lands have been planted which, when exhausted of fertility, have without attempt at reclamation been abandoned for virgin soils of golden promise. Forests have been laid waste to obtain a few sticks of choice timber. Our mines have been gophered to yield only the richest minerals and millions of tons of pay dirt cast over the dump. Only the highest values have been captured, the commonplace allowed to escape with the dross. No deeper than the grass roots have we scratched into the surface of this broad land

and its marvelous resources. So fabulous its wealth and productivity, why worry? This has been our training for generations. Small wonder, therefore, that we scrap rather than mend our shoes, discard rather than patch our clothing. It is as if "Extravagance and Waste" were the Nation's slogan. How prominently and how nearly parallel this indifferent attitude of a rising, rich, and reckless people is reflected in our social life. Of all its striking effects none is so prominent as the unconcern for the daily waste of human life and limb. Long continued extravagance in material things has induced a like indifference to the personal safety of our fellows, ourselves, and our children. Isn't it time to pause in our mad progress—nay, not only call a halt, but rather command a right-about-face?

—The Safety Message

The Loaded Gun

IT is almost, if not quite, always that the unloaded gun does the killing. This is easy to understand, for a loaded gun is handled with due regard for its possible discharge. The "didn't know it was loaded" explanation is the excuse of a plain fool. Moreover, whether loaded or not, the manipulation in any other than a safe manner of so destructive an implement could not possibly serve a useful purpose and should therefore be stamped as the rankest kind of trifling. The answer is plain—every gun is loaded. Similarly, every act, every move, every operation in any way involving even the remotest possible hazard should be performed as though it were dangerous. It is the "didn't know it was loaded" and the "didn't think it unsafe" attitude that causes most of our injuries.

Despite the united efforts of the railroads of the country, in cooperation with many other agencies, to reduce accidents during the Careful Crossing Campaign, the casualties at crossings on most of the railroads were actually higher than ever before. There may be some legitimate reasons to explain this unpleasant fact in part, but the real explanation is that there are many American motor car drivers who are notoriously careless. Don't be one of them yourself! And then you can try to save your automobile driving friends from fatal crossing accidents, also, by giving them constant warning of the danger

## When Winter Comes

*One of a Series by Life Extension Institute Containing the Latest and the Most Scientific Information on Healthful Living and the Prevention of Disease*

**T**HERE is no use in saying, "If winter comes." We all know that winter will come. When it comes, in what condition will it find you? Without coal? That would be very dreadful. Without health? That would be much worse.

The vacation season is over. People are back at work, most of them with a good coat of tan or the lingering remains of it. When this coat of tan disappears, what will it leave behind? The prison pallor of the city dwelling business man and the professional or commercial grind? This is very largely up to you. The days in the open, the swimming, boating, fishing and other sports, have given us a taste of the physical exhilaration of primitive health. Must we settle down to a winter of infection and poison, of physical inactivity, of hugging the fire-side?

Perhaps there will be no fireside to hug. But there will certainly be the invitation to stay indoors, to play cards, to overeat and to accumulate a burden of flesh, or to let our muscles grow soft. There is no reason why we should accept these invitations. We can keep physically active. We can seek the fresh air and, if we are short of coal, keep warmer moving around in the open than sitting still in a chilly house. But whatever may be our program, it is wise to plan it according to our real needs. Exercise, diet and activity cannot do everything in maintaining health. We need to know the kind of exercise and diet appropriate to our individual selves. If we have infection in our bodies, we need to get it out before exercise or diet can do very much for us. If we have some physical defect or disability that requires correction, this should be attended to; and especially as a preparation for the winter campaign.

We use the word "campaign" advisedly. Human life is one great struggle with infection. Hordes of streptococci, pneumococci and staphylococci, and the bacilli of tuberculosis and influenza are always ready to attack, in fact they are always attacking. Recent researches have shown the presence of these organisms in apparently healthy people. When our physical guard is lowered and our physical outposts are asleep, these enemies attack in force. There are no intervals of peace in this warfare. The outposts must be inspected periodically. Our lines must be continually strengthened to resist these active enemy organisms. But in addition we are menaced by poisons formed in our own bodies by physical neglect, faulty diet and faulty functioning of our organs.

Instead of settling down to accept as strokes of fate the winter's ills, why not do the simple and obvious thing; prepare to meet them and conquer them? There is no reason why the winter period should not be one of health and happiness. The cold should stimulate us, we should react vigorously to it. We do not catch cold from cold; the term is a misnomer. By harboring chronic centers of infection in our bodies, by poisoning ourselves, by over clothing and over housing ourselves, by our physical inactivity, we invite the attack of these infectious organisms. These tiny enemies infect our noses, throats and bronchial tubes.

You will agree, therefore, that it is a wise, indeed an indispensable, measure in protecting our health and in building ourselves up for the winter to have a thorough physical overhauling. You may answer, "I do not need it, I know I am in good health." How do you know? Have you had every region of your body

critically examined and tested? Are you sure about eyes, ears, nose, throat and chest, heart and circulation, kidneys, liver and other organs? Are you free from headaches and physical depression, undue fatigue after normal work? Or are you all in after a day that should leave the healthy man or woman with a healthy tired feeling that is really a luxury?

You may still answer, "I feel vigorous and fine, and the winter has no terrors for me." In that case you are the man we wish to talk to. Such a splendid endowment of health is surely worth fighting to maintain. You know you cannot maintain it indefinitely, that age will come. But you can postpone it. Like a man with a big and prosperous business in a business crisis, you have a lot at stake and you cannot afford to neglect these great assets. **You** need a periodic physical overhauling even more than the physical bankrupt. But if you do have an overhauling, see that it is a thorough one, that nothing is taken for granted, that regardless of your external evidences of health every region of the body is probed.

Among the special precautions that can be taken against winter ills is to have the teeth x-rayed and any infected teeth removed or properly treated. Diseased gum conditions should also be corrected. A careful examination of the nasal cavities and the tonsils, and the elimination of any infection in that region, is important. This is the least one can fairly do in the matter of physical examination. The ideal plan is to have the whole body examined.

Such conditions as constipation, underweight and overweight should be corrected. Vaccination against pneumonia has its strong advocates and may be tried; also vaccination against colds. Skin tests to ascertain sensitization to certain types of bacteria may be tried, and vaccine treatment based on such tests. By properly adjusted diet and exercise and adequate rest, and the eradication of any centers of infection in the head such as we have mentioned, the battle line against our winter enemies will be fairly strengthened. Cold bathing of neck and chest, as well as alternate hot and cold showers taken night and morning, will also strengthen resistance.

At the first sign of a cold a piping hot foot bath lasting half an hour, a drink of hot lemonade, a brisk cathartic, and rest in bed with the neck and chest anointed with camphorated oil will do a lot to stem the tide. If there has been a distinct chill, summon a physician at once. In an

event it is well not to temporize with a cold, but to have prompt medical attention. In the case of nose cold, where the local symptoms are distressing, the simplest and safest local application is liquid albolene or white mineral oil which can be dropped into each nostril with a medicine dropper at intervals of several hours during the day. Use no antiseptic nasal douches except on the advice of a doctor. The vestibule of the nose may be sprayed gently with weak warm salt solution and the nose gently blown to remove dust, etc. Hold one nostril while blowing the other gently. Do not seize the nose in a vicious grip and blow it violently or you may force infected material into the ear canals.

These are the best measures we can recommend to escape influenza, pneumonia, bronchitis, and the long train of winter ills which afflict such vast numbers each winter even when there is no positive epidemic.

### October 27—Navy Day

SEVERAL months ago I heard the Assistant Secretary of the Navy, the Honorable Theodore Roosevelt, tell the inside story of the Conference for the Limitation of Armaments, held during the forepart of this year in Washington. It was an interesting situation—a colonel of infantry who had performed brave and useful service during the World War, appearing before a gathering of ex-service men and, in his new capacity as assistant chief of the navy, telling the great part the Navy willingly played in the Limitation of Armaments Conference, even though it meant a sharp reduction in her power and personnel.

Proudly may we sing the praises of John Paul Jones, Perry, Lawrence, Farragut, Dewey and Sims. But when we pause to consider that the naval holiday agreed upon by the leading powers during the conference, was an entirely new and upward step in the progress of civilization, we must feel that it is the greatest naval victory in our own history. It is only a victory, however, because it was reached by agreement and because a proportionate reduction in power and personnel is being worked out by all the leading nations as by the United States. It is not a concession to the pacifists, but merely an intelligent forward movement toward world peace, and with an appreciable decrease in the hazards of war to the signatory powers and to smaller nations.

It is well that we should celebrate Navy Day for the first time this year,

because in peace our Navy has this year won its greatest victory.

### Passenger Department All-Expense Tours

WE are reminded by a clipping from the Pomeroy, Ohio, Tribune, sent us by L. A. Carl, Comptroller's Office, of the fact that "satisfied customers are the best advertisements."

The clipping, about a column and a half in size and written by "The Rambler," evidently one of the regular

contributors to the paper, spoke most appreciatively of the fine personal service afforded by all the representatives of the Baltimore and Ohio, especially by Passenger Agent J. C. M. Martin and Mrs. Martin. The party had a special train of five sleeping cars and a diner and the writer makes it evident that every member of the party felt that this was the ideal way to make such a trip and that the Baltimore and Ohio had indeed done them a good service in arranging the tour.

## Join the Red Cross— November 11 to November 30

The political entanglements which have again made strange bed fellows in Asia Minor and, through the success and cruelty of the Turk, have caused untold suffering, are hard for most of us to understand. Perhaps the only ray of light which quickly appeared through the black shadows caused by the catastrophe was that which came from the immediate appropriation made by the International Red Cross for the succor of the Christian sufferers.

It is not alone in foreign countries but wherever there is suffering throughout the world, that the Red Cross ministers. There have been several notable illustrations of this during the past year in our own country.

The plan of dollar memberships evolved during the war is thoroughly American in plan and scope, permitting so many citizens to share in supporting the work of the Red Cross, at so small a personal sacrifice and with such splendid results.

The opportunity will be offered this year between the significant dates of November 11, Armistice Day, and November 30, Thanksgiving. We can hardly feel the real spirit of either of these notable days unless we are willing to give concrete expression to our own thankfulness by contributing our dollars for memberships to our non-sectarian and non-political Red Cross.

### Character in Business

One day recently I happened to meet a representative business man from the Northwest. He is the president of a trust company, was governor of his state for two terms, national chief of a great patriotic organization for one term and is entirely a so-called "self-made" man, his parents having been able to give him but a rudimentary education. He stopped in Baltimore for a day on his way home from a visit at his winter home in Florida.

It was at a business luncheon that I happened to be placed next to him. I wanted to find out what he thought of trade prospects and said,

"How do you feel about business now?"

For answer he pulled a portfolio out of his inside coat pocket, extracted therefrom a well thumbed sheet of paper and handed it to me. On it were listed railroad bonds—over half a million dollars' worth at par. Most of them were considerably below par at the time. Then he leaned over and said:

"This is a part of our company's investment. During the last three months these have appreciated over \$30,000 in value. How can I help but think that business is on the mend?"

Then I noticed to my surprise that more than one-fifth of the bonds, listed together, were issued by one railroad. It seemed disproportionate and I asked: "Why so many of these?"

There was great significance in his answer—

"Oh, you know So and So is the president of that railroad and we have a whole lot of confidence in him out in our country."

The statement could not but be taken at its face value, for the railroad is not the largest, or the richest or the strongest railroad and had no claim upon his confidence except for the reason he gave.

It will be recalled that the late J. Pierpont Morgan, while testifying before the Pujos Committee of the United States Congress, was asked what security he demanded for loans running into the millions and made to individuals. His reply was that if the character of the man getting the loan satisfied him, it was enough.

Very few of us realize what a tremendous asset to any organization it is when the man who leads it, who formulates its policies and who speaks for it to the public, is a man of the character suggested in this incident.

### Courtesy

The Pullman Company has followed the lead of many of the railroads and started a publication for its employes. It is called the "Pullman News" and is cleverly edited, well printed and interesting. The leading article in the fourth number published, the August issue, gives prize winning definitions on Courtesy as submitted by Pullman employes, as follows:

**FIRST PRIZE \$50.** Won by Porter Thomas J. Pickett, St. Louis

*COURTESY* consists of giving those we meet such considerate attention that their every want will be satisfied, and they will realize the attention is due to real interest in their comfort.

**SECOND PRIZE \$35.** Won by Conductor W. F. Lawler, Denver

*COURTESY* is the spirit and essence of service, kindness and good will. The cheery word, the friendly smile, the helping hand—these are its handmaidens. It is born of a gentle mind and fostered by tact.

**THIRD PRIZE \$15.** Won by Porter W. A. Hill, Cincinnati

*DO ALL* the good you can, to all the people you can, whenever you can and as promptly and politely as you can.

These are splendid definitions, the last one appealing to us particularly. We would like to see it inscribed over the portals of every public service building, and emblazoned where it could be a constant reminder to every public service employe in the United States.

The Philosopher of the Hudson, who writes on the opposite page, tells us that Americans are notably deficient in politeness. As a race, we may be, but personal experience proves that the consideration and courtesy given the public by railroad employes of the United States are much greater now than ever before.

This is particularly true on the Baltimore and Ohio and it is one of our greatest selling points. Other railroads can have good trains, on time service and everything that money can buy, but courtesy is unpurchaseable. It is a growth, an evidence of good will between employer and employe, and the result of long training and effort. The years to come will show that it is one of the priceless qualities which the name "Baltimore and Ohio" stands for, a part of our reputation that no circumstance can shatter and that no money can buy.

**A One-Hundred Percent. Baltimore and Ohio—When**

The people who own it,  
 The people who manage it,  
 The people who work for it and  
 The people who use it—

like it so well that they want to continue their relationship with it indefinitely!

*We used to qualify the word "careless" with the word "Notoriously." Since we have been studying railroad crossing accidents we are convinced that it ought to be spelled "Motoriously."*

# Homilies of the Hudson

## Politeness

"Bruno Lessing says: "If 'courtesy is the virtue of kings,' ours is the most democratic country in the world." That is sad but sounds true. It is not necessary to recount instances or draw pictures to prove it; it is so common that we don't pay any attention to discourtesy—unless it hits us, personally. It is a national characteristic of which, as a people we are unconscious and only become aware of after having travelled and visited other peoples. Here we are taught to ridicule politeness as something nonsensical and out of place among busy people.

In a friendly argument upon this subject one of the principals advanced the opinion that the lack of courtesy was due to a sense of honesty, that politeness was a sort of hypocrisy, if not artifice and cunning. "To call a man a liar when he lies," he said, "is honest, but to call him that in your mind while you bow and say 'my dear sir, I have no desire to dispute your statement, however I beg to differ,' is dishonest and unmanly." There you have it.

But there is something wrong with an education that teaches a man to think so. It is the desire to appear "independent" and tough that the uneducated and the wrongly educated hold up as a mark of manliness, and which accounts for much of the crude and unmannerly deportment of the rising generation.

The worst part of bad manners is that due to some confounded perversity of human nature they are viciously contagious. A boy will learn to smoke, swear and shoot craps much more easily and quickly than he will learn to say a prayer or even a "good morning." Then why should it not be as rigid and conscientious a duty of the public schools as it is to debar sectarian teachings, to make the teachings of deportment and ethics (or call it civility, which means an obliging behaviour towards others) a part of the curriculum, to go hand in hand with the three R's, or even precede them, beginning in the kindergarten.

## A Fine Time

We are interested in psychology to a certain extent; not enough to disturb us, but enough to cause us to pro-pose the "Why?" on occasions. The thing that is in our mind just now is: Why do all the people who go on vacations, to spend a week or two on some ill-smelling farm without even the most ordinary sanitary provisions, to sleep in stuffy rooms with beds not above suspicion, to return sunbaked and mosquito-bitten—invariably report having a "fine time," while having put up with discomforts that they would call outrageous and unbearable in home or office? Why? And those who go "to see the falls" (from the Canadian side) or to Atlantic City, or to Palm Beach, and on their return talk mostly in reference to the charges, prices and costs, with a note of sadness running through the motif, still maintain that they "had a fine time?" Now psychology explains that it does not matter under what circumstances or conditions one spends the vacation period if only it is a *diversion*, a turning out of the rut, any kind of change from the bondage of routine; it means having a fine time, and benefits the—sufferer.

## Signs and Sichlike

Do you believe in signs—not meaning any supernatural manifestations—but such signs as the Profit Prospectors and the Painless Dentists hang up to delude the innocent, escaping being hung up themselves by the grace of God and oblique interpretations of the law? Reading signs as one goes along is both a pastime and an education. One learns, for instance, how the Queen's English and the President's American are mutilated and murdered. Within a few blocks from where we live there is a sign on a barbershop window reading: "Sam, the Physiognomical Tosorialist—Cupping a Specialty;" and another on the window of an empty store in Bath Ave., Bath Beach, informing one that "This place will be open as a shoemaker and first class shoe shine about as soon as possible." What have you to offer?

"Some have eyes but do not see;" others can see but do not take notice. The person who *observes* gets the most of what there is of comedy and tragedy in life. Momus grinning, on one hand, Melpomene tearing her hair on the other. It is all interesting, and being observant and receptive, we are ever ready to grin with the one and—turn our back on the other. The "movies" is the only place where a "sad story" appeals to us—some of us; do we not all have a wife, sister or sweetheart who, after seeing Othello push the pillow down Desdemona's windpipe, or some other horror, and after stowing the tear-stained cambric into the reticule (ditty-bag), ejaculates: "Wasn't it just lovely? Let's have some chop suey."

## Kitty, Kitty!

In one of our dailies our eye caught, under the heading, "The great buddha" the following stanza:

"Tsuki-yo yoshi  
Tachitsu, itsu etsu  
Mitsu-no-hama."

The translation given shows it to be poetry of some order, depicting the glories of a moonlight night. To try its euphonistic qualities we read the lines aloud, to ourself, and re-read them. The missus, who was in the adjoining room, called out: "I just put him out." She thought we were calling the house-cat.

Why do some people get excited over the theory of evolution from monkey to man? Pride of ancestry? Blaah! The man that boasts of his "family" is a monkey still. "My mother was a mare!" boasts the mule," says a Hindoo proverb. "My father was a lord," proclaims the ass.

THE SPRING SHOP AT GLENWOOD IS SAVING MONEY FOR THE RAILROAD

A—The Hydraulic Testing Machine. B—The Stripping Machine, whose huge jaws strip the bands from around the leaves like an alligator's jaw barking a tree limb. C—Combination Cold Shear and Hot Punch. D—The Forming Machine. E—The Banding Machine

## The Glenwood Spring Plant

By Harry Liehr

Shop Schedule Supervisor

*Where Great Savings Are Effected through Reclamation*

**I**N a secluded corner of the Glenwood Back Shop, practically hidden from the view of the casual observer, is a small self contained plant which repairs, rebuilds and manufactures springs for the Pennsylvania District and the Western Lines of the Baltimore and Ohio. It is neatly kept and, with its half dozen machines and four furnances, is capable of producing 500 springs a month. Here will be found types and sizes of springs used for various purposes, such as engines, tenders, cabooses and passenger cars.

Springs are so commonly used and are such an essential part of all carriers, that they are usually given little thought by the layman. However, the treatment through which the springs pass in the process of manufacture and repair in order to give them the proper qualities to produce both comfort and safety in riding, is seldom thought of and little known by most of us. One can obtain a little interesting information regarding this subject, by following a group of springs through the process.

### Thorough Inspection

On arriving at the plant all springs are given a thorough surface inspection to determine any noticeable defects, especially as

to the proper height and broken leaves. On passing this inspection the springs are hammer-tested to determine broken leaves and loose bands. Should the springs successfully pass this, they are placed in the hydraulic testing machine, (Exhibit "A"), where the free height is taken and a load and loaded height test is given.

During this operation they are subjected to a maximum load, determined by the service which they are to render, and the height is taken at the specified working load. Should the springs meet the blue print requirements, they are considered safe for service, are painted by being dipped into a vat and placed on racks where the excess paint drains back into the vat and is sent to the storekeeper to be later sent out for use. In the event that they fail to meet the blue print requirements, they go the way of those which failed to pass the surface inspection and the hammer test.

### The Stripping Process

Those which failed to meet the specified requirements are stripped for repairs, the bands being removed by placing the springs in the stripping machine (Exhibit "B"). The machine as shown consists of a large base

or table, on one end of which is an hydraulic cylinder with a piston and rod. At the end of the piston rod is a head which terminates in jaws similar to those of an alligator. The upper jaw contains a hinge joint and raises and lowers in a fashion after the manner of an alligator's mouth. At the other end of the table is a heavy tail stop or slotted block. The spring is placed as shown in Exhibit "B" with one end in the slot of the tail stop, and the other facing the alligator jaws. A yoke of heavy metal is placed between the band and the tail stop in such a manner that when the pressure is applied the band rests against the side of the yoke which in turn, is forced back against the tail stop. This yoke serves to keep the entire spring from being pushed through the slot in the tail stop which is of sufficient width to permit such occurrence. The pressure is then applied to the piston by opening the valve and permitting high pressure water to enter the cylinder behind the piston. The piston moves forward as does the alligator jaw, which is opened or raised as it comes in contact with the lower leaves of the spring. When it has obtained its full opening, the jaw grips tightly behind the leaves and pushes them through the band which is held fast by the yoke, which in turn, rests against the tail stop. The pressure continues to be applied until all of the leaves are forced completely out of the band, when the operation is complete.

The orderly little Spring Plant at Glenwood

When cutting and punching are completed, the leaves are placed in the nibbing machine, where a round punch-like tool puts a nib on each plate. The nibber makes a depression in one side and a raised place on the other side of the leaf. These are so made that when the leaves are assembled the raised place on each registers with the depression on the leaf next to it and thus forms a joint which holds the leaves in place.

The leaves are then heated and placed in the forming machine (Exhibit "D") where they are made to conform to a master leaf against which they are pressed. This machine consists of table with a link belt running its full length; behind this belt are two stops capable of being moved from the center outward toward each end of the table, respectively, by means of a screw feed, with right and left threads. Facing this belt in the center of the table is a movable head which is pneumatically operated and acts as a horizontal press in forcing the leaf to be formed against the master leaf with the chain belt re-acting against the back of the leaf. The belt takes the form of a master leaf; thus the new one is formed.

#### Hardening and Tempering

The leaves are then hardened and tempered. During this process they are heated to 1600 degrees Fahrenheit and dipped in oil, thus giving them hardness. Then they are heated to 800 degrees Fahrenheit and permitted to cool slowly in the open atmosphere, or at room temperature. This tempers them and gives them proper qualities for working conditions.

#### Clamping under 100 Ton Pressure

The leaves are then assembled in the clamp on the assembling table at the end of the banding machine (Exhibit "E"). The clamp holding the leaves in place is rotated through an angle of 90 degrees and a hot band is applied. They are then in spring form and placed on the table of the banding machine where a vertical and horizontal hydraulic press acts simultaneously at 100 ton pressure on the band, pressing it tightly around the leaves, thus completing the process.

The springs, now complete, are placed in the testing machine and tested for load, loaded height and free height. After successfully passing these tests, they are painted and ready for service.

Defective or broken are discarded, to be replaced by new ones made for the purpose, or by old ones from other springs altered to suit the condition. New leaves on used springs are avoided in so far as possible by using old ones cut and fit to suit. When the selection has been made, the building up process of cutting, punching, nibbing and forming takes place. The leaves are cut to length and punched in the combination cold shear and hot punch, (Exhibit "C"). The shear is not essentially different from any commonly used in the Boiler Shop. The punch used cuts an oval hole about

4½" long, just inside the ends of the longer leaves along the central axis in engine springs. The position of this hole is assured by using a jig which holds the leaf in the proper position while punching. The hole

in the shorter leaves is not so long as that in the longer ones and is cut through the end of the leaves. The shortest leaves are void of punch holes. The holes serve as fastenings for spring hangers.

## Wot is Government Onership? Another Letter to His Brother Bill

By Harry Franks, Engineer, Dayton, Ohio

Dayton, O., Aug., 15, 1922

Deer Bill

Yaur leter receaved and I notise with plesure the improvement specialy yaur ritin and spellin and with the unushul intreast manifessted is a sure sine yau are on yaur way 2 get somwher regardles.

Your questshun wot is government onership? finds me prepared fer I hev ben lookin it up and will give yau the facks as I find them, wich of koarse wuz sum job, huntin up datta here and there.

Yau kno Bill this onership idea wuz mported frum Russhia, and havin quit wurk all 2 geather they put in there time thinkin, planin and huntin fer somthin 2 eat.

Havin no edukation 2 speke of is thire any wunder at them havin a surpluss of ideas and plans wich they kant figer out theselves, so they send them 2 us 2 solve.

I hev found there skeams dont take very wel over here fer the simpel reason we are 2 bize 2 be pesterd with foren mportashuns of that sort.

The Russhia peepel hev so reverst things that nite is supierur 2 rite, and frum all reports they wurk it fer the salvashun of there kintry, sounds funy dont it, but the xplanashun is they hev brout the rich down 2 the level with the poor, and as I sea it with figers Aut frum Aut leaves Aut so it in other wurdz dont mean anything.

Now Bill I dont want yau 2 think I am given you a lot puzels 2 solve, my intenshuns realy are 2 make this subject so plane it wont be nesasary fer you 2 be ritin askin me 2 be more xplissit.

1 of the little inosent oferings sent over wuz labeld Power Plan, with direckshuns, is still bein discust here more or less.

If I member rite the plan provides a way fer the gouvment 2 konfisskate the ralerods and later if it feals justifide the koal mines and auto faktorys, refuesin at the same time 2 xcept any of the watterd stock klaimin it is 2 wet and disagreebel 2 handel.

Konseadin no possibel chance fer the Power Plan, Ill pickture the operashun if it wuz in efect. The peepel wud expect 2 kome in fer wot is ritefully thers, fer instance you kno all the high salried officers of the konfissikated konserns wud get fired, and there places wud be filled by men who neded the money and new how 2 do a days wurk with a shovel.

So we will hev 2 admitt that among the wurkers many brilliyunt ideas specialy how 2 operate a ralerode wud be put in 2 efect,

just 2 make it plane wot I mean instead of runnin dubbel hedders, that is 2 engins kupeld on the front end uf a trane, my idea is 2 put 1 on the frunt and 1 on the back end, doin away with the kaboose wich I figer is a newsence kause it is always bein nocked off its center, the konduktor and frunt brakie 2 ride on the gide or lead engin, and the flagger on the rear engin, ware besides bein in a nice prepared warm place on the firemans seat and tween naps he wud be xpected 2 proteck the trane, klose the gates and give the nesasary high balls.

Another feature wud be the eliminashun of the danger runnin by a red block, fer if the furst man faled 2 sea it the sekond engineer wud.

Now Bill 2 make it plane how a savin of money and time akomplished by this supierur arrangement yau understand that wen wurk is 2 be done at a stashun on 1 or more tracks, the engins kuld do it in very short time wurkin frum both ends at wunce.

Naw gittin back 2 the onership plan we will xpect the gouvment 2 operate the pasinger and frate tranes fer the xpress perpuss of konvayin the peepel and frate shipments 2 any point in the U. S. and return free of charge.

Oning the koal mines I preasume we kud xpect free koal wich probly wud be in charge of the Post Office and yaur winters order of say 8 tuns wud hev 2 be filled aut an a prescribed form and persented 2 the post master fer his O. K., who then wud order the deliverie maid.

Bill the krownin event wud be the establishing of distribiting agencies, in all the cities large or small fer the purpus of providing any favord make of Auto free of charge 2 all applikants who didnt hev any, and riplaying masheens worn out or recked by ralerode tranes thru karelessness.

I kan sea myself makin applikation fer a Supertendants position, I kno the gouvment wud be pleased 2 hev a man of my ralerode xperience and natural aptness.

I wudnt forget yau Bill, fer I wud kreate a good job with good pay with little 2 do and a high soundin title.

Yaur dutys wud be 2 open the male, sea that the ofice is klean and tidy, that the diferent klerks arive-on time 2 start wurk, and last but not least 2 keep the diferent grevius komities frum takin up my time wen I hev an auto trip planned, or an envite 2 a chamber of Komerce speakin or Chikin dinner.

Of koarse Bill in dealing with these greivous Komities a grate amount of diploamacy is requird specially wen meatin the powerful nut grinders union of ishals.

But frum past xperience with yau at home I am sure yau kuld handel the situ-wayshun admireably bckause yau always had a redy xeuse wen the okasion demanded.

As it is gettin late Bill I will klose hoping I maid plane 2 yau the reason fer the Power Plan. So good by and in reasonabel time will expect a long letter.

Again good by with love 2 the folks an yaurself.

Yaur Bro.

John.

PS Kum & see us sune.

### Cleveland, O., Traffic Department Has Its Annual Beach Party

By A. G. Strome, Assistant Chief Clerk

**T**RAFFIC forces, including the Assistant General Freight, Coal Freight and District Passenger Offices, and that of Terminal Agent G. R. Littell, held their annual beach party at Mentor Beach, 35 miles East of Cleveland, on Saturday afternoon and evening, September 9.

The members of the party enjoyed the automobile trip along Lake Shore Drive and the boating and bathing at Mentor Beach. Ball game and other sports were staged on the Beach. A big feature of the

affair was the picnic dinner under the trees in the grove, which was followed by dancing.

### The Vagrant

By OSCAR H. ADKINSON

I am a vagrant shipment,  
About the world I roam,  
Some careless clerk neglected me,  
And no one knows my home.

My address is but dimly shown,  
I've no waybill, you see,  
So those who seek me as their own  
Must wait in vain for me.

AND THEY ALL GOT INTO THE SWIM NEAR CLEVELAND

Upper left, under the "umbrell," sit Mr. and Mrs. A. G. F. A. Upper right shows some of those who were there. Might the picture in the center be a centipede? At least, it shows how some folks sit on others. Lower left, Assistant Chief Clerk Strome "Wheeling" Tessie across the hot sands. Lower center, our Mack Sennett bathing beauties. Right, Senior Freight Representative J. W. Freeland and Earl and "Bill," Sons of the terminal agent and chief clerk to coal freight agent, respectively

**Note:**

All puzzles published in this department will be defined, as far as possible, from the New Standard Dictionary, edition of 1920. It is permissible to use both geographical and biographical words in the construction of puzzles, but when such words are taken from any authority other than the New Standard Dictionary, the name of such authority must be stated at the end of the definition, in parentheses. Obsolete words will be marked at the end of the definition thus—"obs.". Variant spellings of a word must be marked at the end of the definition thus—"var". Address all communications concerning this department to G. H. Pryor, Room 800, Baltimore and Ohio Building, Baltimore, Maryland, and mark the envelope "Puzzles."

Correct solutions were received from the following: S. T. Udent, C. Lion, W. G. Carl, W. T. Ahrens, W. E. Madden, Grace M. Manning, Comrade, Primrose, Pearlle Glenn, L. M. N. Terry, The Major, Martelia Atlas, L. E. Phant, Baltimore, Md., Spica, Whitney's Crossing, N. Y.; C. Saw, Tunste, Joaquin, New York, N. Y.; Jack O' Lantern, T. Hinker, Bangor, Pa.; Towhead, Lafayette, Ind.; Gi Gantic, Molemi, St. Louis, Mo.; Wick-o-cincy, Cincinnati, Ohio.; Kappa Kappa, Fargo, N. Dak.; Poly, Gimini, Brooklyn, N. Y.; P. M. Pennington, Cumberland, Md.; Nanki Poo, Holyoke, Mass.; K. T. Did, E. R. Woodson, Nypho, Washington, D. C.; Arty Ess, Scranton, Pa.; Alec Sander, Philadelphia, Pa.; Dan D. Lyon, New Florence, Pa.; Mentor, Chicago, Ill.

**Just between You and Me**

Geo. D. Chisholm, known to all puzzlerdom for many years as W. E. Stern, died at Pittsburgh, Pa., August 17, 1922. Mr. Chisholm, at the time of his death, occupied the position of chief operator for the Western Union Telegraph Company at Pittsburgh, but during his long career had seen railroad service. He was of a congenial, kindly disposition and was dearly beloved by his thousands of friends in and out of puzzlerdom. He ranked high as a puzzler, being particularly noted for his fine anagrams. We extend our sincere condolence to the members of his bereaved family.

With the advent of cooler weather we hope for a largely increased solvers' list. A few hours spent now and then in building and solving puzzles will accomplish wonders in developing your mind and improving your vocabulary. Just give it a trial and I am sure you will be convinced of this statement.

**NEW PUZZLES**

No. 1 TRANSPOSITION (4)  
When Bobby sings, the welkin rings  
With all the mirth that boyhood brings.  
His fancies soar  
Into a roar  
Of ONE-less, vague imaginings.  
  
The neighbors mutter direful things,  
And Uncle Job his bootjack slings:  
Old Fido sneaks behind the dcer  
When Bobby sings.

**New Prize Offer**

As a prize for the best list of solutions to these puzzles, a year's subscription to the Enigma, the official organ of the National Puzzler's League, which carries with it a year's membership in the League, will be awarded by Mr. Pryor. The Enigma publishes the highest grade of word puzzles and numbers among its contributors the brightest lights in puzzledom. To receive proper credit all lists of solutions must be in Mr. Pryor's hands by December 5. The answers and solvers' list will be published in the January issue. *Ed.*

To open and disclose the WHOLE, a well-known riddlesmith.  
New York, N. Y. John Newman

**No. 4. SQUARE**

- 1—Consisting mainly of froth or foam.
  - 2—Any powerful nation.
  - 3—A former department of Italy, now divided into three provinces.
  - 4—Extensive woodland plains in South America.
  - 5—A triact spicule.
  - 6—Causing fermentation.
- St. Louis, Mo. Gi Gantic

**No. 5. BEHEADMENT (5)**

In the bright sunny South,  
A luscious fruit grows  
In long blossomed lines,  
Rows after rows.  
They're picked and brushed,  
Then packed in a ALL;  
Shipped to the North,  
At a forty-mile LAST.  
Wholesaled to a foreigner,  
Usually from Greece,  
And sold to the public—  
Five cents apiece.

Baltimore, Md. W. E. Madden

**No. 6. REVERSED RHOMBOLD**

Across:  
1—The abode and burial place of King Arthur.  
2—Purloined.  
3—A Latin word meaning "to the best."

- 4—Ruins.
- 5—A cask for packing salt provisions.
- 6—An anterior transparent part of the eye.

Down:

- 1—A letter.
  - 2—As far as.
  - 3—The title of a knight.
  - 4—To make free of access.
  - 5—A germ.
  - 6—A famous city of ancient Greece.
  - 7—A thin dress fabric of cotton, wool or silk.
  - 8—Offerings collected during divine service.
  - 9—A constellation of 84 stars; on the meridian in April.
  - 10—About.
  - 11—A letter.
- Cincinnati, Ohio. Wick-o-cincy

**No. 7. DELETION (6)**

At the picnic we were ONE,  
Mary dear and I,  
Ate our dinner with the rest,  
Made the moments fly.

As I TWO a peach for her,  
Said, "You are my THREE"  
Laughingly she shyly answered,  
"More than FOUR I see."

Quickly then I asked the question,  
"Will you marry me?"  
"Gladly if FIVE gives consent,  
I, your wife will be."

But Mother—bless her angel wings!—  
Quite comprehends these boyish flings.  
She passes o'er  
The mangled score;  
Her soul quaffs deep TWO Heaven's  
springs  
When Bobby sings.

St. Louis, Mo. Molemi

**No. 2. DIAMOND**

- 1—A letter.
  - 2—The covered part of a locomotive.
  - 3—A dewlap.
  - 4—The 98th Psalm.
  - 5—The metropolis of Maryland.
  - 6—Radiant.
  - 7—To make amends for.
  - 8—In the C. G. S. system, the unit of work and of energy.
  - 9—A letter.
- Baltimore, Md. Red Crow

**No. 3. CHARADE (5)**

Pandora was a flapper and she had a ditty-box,  
A double-locked, mysterious and magic box of tricks;  
Her old man, Vulcan, mastersmith, himself had wrought the locks  
And Captain Charon got the keys to throw them in the Styx.

Pandora was a nosey kid, and was not satisfied—  
She could not rest until she knew just what there was inside,  
So with a crooked hairpin, and some other tools, she tried  
To pick the locks and when she failed to do the stunt she eried.

She then got mad and brought her file and seissors to the fray  
To ONE the lid or hinges off,—to do it TWO to die—,  
We know that she succeeded, that at last she won her way,  
The moral is: to persevere. So now for you to try  
This double padlock:ed riddle I am giving you herewith

**In Memoriam**

*By Dan D. Lyon*

Geo. D. Chisholm (W. E. Stern) died at Pittsburgh, Pa., August 17, 1922

Fair is the day, bright the sun shining;  
Gently the vine leaves the South wind is twining.  
Peacefully resting, quiet enjoying,  
Free from all care and troubles annoying;  
Harking to coo of pigeon and wild dove  
Filling the heart of all nature with kind love.  
Sudden, as shot of deep thunder o'er head—  
W. E. Stern, Prince of Thedom, is dead!

A vision of happiness, sweetest content,  
Changes to sorrow and bitter lament.  
Dark grows all nature, the wild dove is crying,  
Still are the vine leaves, the South wind is sighing.  
Trouble and sorrow dispel my repose;  
Vainly my senses I try to compose,  
Roused by the shock like deep thunder o'er head  
W. E. Stern, Prince of Thedom is dead!

Dearest of brothers to each one who knew him,  
Death, thou hard master, Oh, why did'st thou slay him?  
Cans't thou not change from choosing the rarest,  
Calling the finest, the brightest and fairest;  
Stilling the hand that is guiding the helm,  
Breaking the heart of each of our realm?  
Causing a shock like deep thunder o'er head,  
W. E. Stern, Prince of Thedom, is dead!

Standard Track, Baltimore and Ohio Railroad, Newburg Grade, Cumberland Division

FIVE said "Yes! God bless you boy,  
Tell Mary I've consented."  
She named SIX day which suited me,  
And soon we were cemented.

Baltimore, Md.

No. 15. CHARADE (8)  
 My FIRST is of wood and also of steel  
 While iron it surely could be;  
 ('Tis of greatest use, I certainly feel,  
 For it reaches from sea to sea.)

My SECOND'S of stone or maybe of earth,  
 Or mixtures of numerous make;  
 In country and town we know of its worth,  
 For it stretches from gulf to lake.

My TOTAL'S for man and likewise for beast,  
 Or anything else on the go;  
 There are various kinds from best to least,  
 But there's none like the B. & O.  
 Baltimore, Md. Primrose

### Auditor Freight Claims Office Baseball Team Wins General Office Championship—1922

THE Baltimore and Ohio General Office Baseball League closed its season on Saturday, September 30, with the playing of the championship game between the teams of the offices of Auditor of Freight Claims and the Auditor of Disbursements, as each of these teams had won 17 and lost 4 games. The game was won by the boys from the office of the Auditor of Freight Claims with a score of 6 to 4. The stand-

Relief Department	20	3	17	.150
Camden Station	21	3	18	.143

—Welfare Department

### Simple Caution Thoughts

By Harry Franks

Locomotive Engineer, Dayton, Ohio

Look to left and then to right,  
 Also to the front and back,

Danger's there within your sight,  
 On or near the railroad track.

Many steps we make too far,  
 Many steps we take too near,  
 But one will save a jar or scar—  
 The step that keeps us clear.

If all the little safety thoughts,  
 Were carried through for fair,  
 The Railroad's books instead of noughts,  
 Would show a balance there.

So let us try to do our best,  
 To keep the record straight and clear  
 Of accidents, that we may rest  
 Not in sorrow but in cheer.

THE RUNNERS—UP, AUDITOR DISBURSEMENTS OFFICE BASEBALL TEAM, 1922

Left to right, sitting: Robert H. Fisher, outfielder; C. E. McManus, shortstop; Wm. McLean, 3rd base; R. M. Huffington, 2nd base; H. C. Shipley, outfielder and captain; Wm. Glaser, catcher. Standing, J. E. Scheuerman, 1st base; Wm. Behnkans, catcher; U. R. Truitt, pitcher; Edw. Deal, utility; Geo. Lewis, outfielder and pitcher; John O'Keefe, catcher; Walter Brandau, pitcher. Other members of the team who do not appear in the picture, but who rendered valuable service, are Carl Faith, pitcher; Jos. Bowden, outfielder; and M. A. Jenkins, infielder

#### Statement of Pension Feature

Employees who were honorably retired during August, 1922, and to whom pensions have been granted:

NAME	LAST OCCUPATION	DEPARTMENT	DIVISION	YEARS OF SERVICE
Crislip, James B. Jr.	Foreman	Maintenance of Way	Connellsville	20
Duvall, William E.	Yard Fireman	Conducting Transportation	Baltimore	35
Fleishell, John A.	Laborer	Stores	Baltimore	52
Frey, Charles H.	Engineer	Conducting Transportation	St. Louis	45
Gallagher, James F.	Engineer	Conducting Transportation	Pittsburgh	44
Hawk, Andrew	Watchman	Conducting Transportation	Connellsville	19
Linn, John J.	Crossing Watchman	Conducting Transportation	Toledo	41
Miles, Samuel J.	Laborer	Stores	Baltimore	32
Miller, Wesley, C.	Agent	Conducting Transportation	Akron	39-9 mo.
Moran, Edward A.	Yard Brakeman	Conducting Transportation	Philadelphia	30
Nary, Daniel	Trackman	Maintenance of Way	Wheeling	35
Shewbridge, Samuel A.	Laborer	Motive Power	Baltimore	45
Slate, John Edward	Crossing Watchman	Conducting Transportation	C. & N.	47

The payments to pensioned employes constitute a special roll contributed by the Company.

During the calendar year 1921, \$367,795.95 was paid out through the Pension Feature to those who have been honorably retired.

The total payments since the inauguration of the Pension Feature, October 1, 1884 to July 31, 1922 amount to \$4,858, 856. 95.

The following pensioned employes, after serving the Company faithfully for a number of years, have died:

NAME	LAST OCCUPATION	DEPARTMENT	DIVISION	DATE OF DEATH	YEARS OF SERVICE
Bear, David	Laborer	Motive Power	Baltimore	August 19, 1922	26
Burke, M. H.	Supervisor	Maintenance of Way	Baltimore	August 17, 1922	48
Carroll, Catherine	Car Preparer	Motive Power	Baltimore	August 7, 1922	36
Cobaugh, Robert, J.	Engineer	Conducting Transportation	Pittsburgh	July 31, 1922	34
Hayes, Thomas W.	Crossing Watchman	Conducting Transportation	Newark	July 7, 1922	30
Heddrick, George W.	Engineman	Conducting Transportation	Baltimore	August 17, 1922	50
McCahan, John C.	Checkman	Conducting Transportation	Baltimore	August 7, 1922	34
Murnan, John	Crossing Watchman	Maintenance of Way	Shenadoah	August 21, 1922	40
Quinlan, James J.	Engineman	Conducting Transportation	Cleveland	August 7, 1922	29

# Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—  
Retreat from care that ever must be thine:  
How blest is he who crowns, in shades like these  
A youth of labor with an age of ease.*

OLIVER GOLDSMITH—"The Deserted Village"

## Daniel Nary

Daniel Nary, retired trackman, Wheeling Division, was born at La Grange, Lorain County, Ohio, on March 15, 1850. He attended public school there, and in 1874 he went to work with the Big Four Railroad. Later he was promoted to section foreman. In this position he came to the old C. L. & W. in 1887 in charge of track work at St. Clairsville, Ohio. When the Baltimore and Ohio took over this section of the Railroad, Mr. Nary came with it. He remained here as trackman, Maintenance of Way Department, until his recent retirement.

Mr. Nary was married in 1875 to Miss Margaret Brahney. Three children were born to them, a daughter and two sons. The daughter, Mrs. Katherine Henry, is now agent for the Baltimore and Ohio at St. Clairsville. It is with her that Mr. Nary now makes his home, Mrs. Nary having died in 1918.

Mr. Nary is a man of a genial and kindly disposition. He has a wide circle of friends and is well known for his constant and faithful service to the Company.

## Edward Draime

Edward Draime is an old-timer of the Railroad. He was pensioned during March this year, but his picture appears in the MAGAZINE for the first time.

Mr. Draime entered the service of the Baltimore and Ohio at Garrett, Indiana, as blacksmith helper on February 25, 1881. In 1887 he started in working as a boiler washer. In 1892 he was transferred to the Car Shops as car repairman. The next year he took up the work of repairing engine tenders, pilots and cabs. He worked at this for 23 years.

Mr. Draime tells many interesting tales of the hardships connected with work in the early days, when men were forced to do with their hands what machines now do for us.

## Edward A. Moran

Edward A. Moran, pensioned yard brakeman, was born in Philadelphia County, Pa., on July 22, 1855. He began his service with the Baltimore and Ohio on January 1, 1888, as yard brakeman. In 1890 he resigned from service, but returned to service on February 24, 1892. His retirement is due to failing health.

## The Engineer

CANDACE SAWYER LAUBACH, in the *Milwaukee Magazine*

As I listen in the night-time  
To the engine's whistle shrill,  
Knowing the iron monster  
Is controlled by human will,  
I send a prayer to Heaven,  
For the man of steady nerve,  
Who peers into the darkness  
Watching every bridge and curve;  
For 'tis he who brings the message,  
From our loved ones far away;  
And the paper in the morning  
Filled with records of the day;  
And the rover who is weary,  
Who no longer cares to roam,  
Longing for his wife and children,  
In the blessed walls of home.  
And the freight of market value  
Comes to make our lives complete,  
Bringing comfort without measure  
To the farm and busy street.  
So I pray for him sincerely,  
Asking a power divine  
To carry him through in safety  
While he's "covering his line."

## The Right Way

By C. Edgar Wooden, Jr.

Engineer, Norfolk and Western Railway

It is not the way we treat ourselves,  
The style of clothes we wear,  
The food we feed the inner man  
Or how we comb our hair,  
That makes this world seem better  
And the living more worth while;  
But the deeds we do for others  
When we do them with a smile.

1—Daniel Nary

2—Edward Draime

3—Edward A. Moran

## How to Make Good Coffee

By Helen Rose White, Wife of E. F. White, Office of Auditor Coal and Coke Receipts, Baltimore, Md.

*Note: We are not telling any tales out of school, but a certain little lady who works in a Baltimore and Ohio Office wrote us that she is seriously contemplating a matrimonial plunge. The future husband is a Baltimore and Ohio employe. He will need good things to eat, and M—(There! I almost told her name) says she doesn't know a blessed thing about cooking. Therefore, she turned to us, asking our grandmotherly advice on the best way of making coffee, and also, how to hold her husband after she has him. Knowing probably less than she does about either question, we turned to a woman of experience to help us out of the dilemma. Mrs. White is noted for her good eats, and her husband has stuck by her for a number of years. She answered both questions. This is the answer to one. The answer to the second will appear in an early issue of the MAGAZINE. Mary—Oh! I mean Mrs. Engineer-to-be, we hope that you may profit by this splendid advice.*

—Aunt Mary.

**I**N the matter of the future Railroader's wife and her request, I shall proceed to write out the directions for making good coffee so that she may try it out beforehand and thus get the *modus operandi* down pat before the arduous duties of married life come clamoring for recognition. Having got that "off my chest" (the big words, I mean), here goes:

Select any good grade of coffee. Have it ground medium fine. Keep it in a glass jar with a tight cover, and always keep the cover screwed down. This is essential in order that the coffee may retain its strength.

### For the Old-Fashioned Pot

For coffee to be made in an old-fashioned coffee pot, take a heaping dessert spoonful for each cup, and an extra one "for the pot." Measure one less cup of water (cold) than you intend to have, and pour this into the pot, stirring the coffee and water together with a big spoon. Set the pot over a quick fire. Watch it 'til it boils to the top of the pot. When it is about to boil over, put in your last cup of cold water, right into the seething mass. Then set the coffee aside to settle for about a minute. Pour the coffee off the grounds and serve.

Never put eggs or eggshells into the coffee. The cold water carries all sediment to the bottom of the pot. If necessary, this coffee can be warmed over *once* again for another meal, and if you are careful at the second warming not to let it boil, you cannot tell from its taste that it has not been newly made.

### For Percolator Coffee

One heaping dessert spoonful of coffee for each cup and an extra one "for the pot." (For *two* people, Miss Mary, a four-cup size percolator is quite large enough.)

Measure the cold water into the pot, and set the percolator into its pot of cold water. Cover and set it over the burner. Let it percolate for fifteen minutes. Then take out the percolator, which will be full of grounds, (for it always swells considerably) and serve your delicious beverage with sugar and cream. Lacking good, rich cream, use instead unsweetened evaporated milk, of which there are a number of good brands to be obtained. And according to our point of view, this is much to be preferred to "top milk" or thin cream.

## The All-American Cook Book

### Good Eats for a Worthy Cause

**W**OULD you like to taste the best dishes served in the White House under the present and preceding presidents? Would you like to partake of the favorite foods of generals, admirals, diplomats and leaders in public affairs?

There's only one way we know of in which you can accomplish it and still stay at home—by procuring a copy of the All-American Cook Book, comprising over five hundred favorite recipes of our leaders in governmental, military, naval and diplomatic affairs, located not only in America but representing this country in every foreign land. In the All-American Cook Book you can learn what best tickles the palate of your senator and congressman, your favorite President and your model statesman. In fact you find in one volume the secrets of feeding the brains of a nation.

The All-American Cook Book is prepared with a view to fitting into, and amplifying most creditably, every housewife's culinary

library. "No home is complete without it." To our men readers we would suggest making a hit with wife, mother or sweetheart by purchasing a copy for her. To our women readers we would say that buying a copy is the surest and most economical means of winning or holding a man's affection and making for him in reality a "home, sweet home." We know that the best way to make men feel at peace with the world—and especially their own particular little worlds at home—is to "feed the brutes."

And—here is a splendid outstanding feature—no one makes any profit from the sale of the All-American Cook Book. The proceeds go toward easing the lot of disabled World War veterans and their dependent families. We know the book is good. We know the cause is good—which accounts for our cheerfully running this complimentary writeup. Let every reader get his or her money's worth and at the same time help this worthy cause by buying one or more copies, at \$1.50 each, from the Judy Publishing Company, 102 North Wells Street, Chicago.

The Baltimore and Ohio MAGAZINE seldom appeals to its readers for any cause which requests their financial support, but the especial worthiness of this cause warrants this exception being made.

## Hallowe'en Charms

By Dorothy Rubenstein

Freight Traffic Department, Baltimore

**S**POOKY Hallowe'en is with us once again. This is the time when ghosts stalk amidst the shadows, strange lights flash among the trees, and superstition reigns supreme over young and old.

Have you ever tried walking backwards, with a lighted candle over your left shoulder, down the cellar stairs, thinking you will catch a glimpse of your future husband, or wife as the case may be? Or have you looked into a mirror over your left shoulder by the light of the moon? If you have not tried either of these charms, you have missed a great deal, and you should not by any means delay doing these stunts this year, for remember, the spell will only work at midnight—All Hallow's Eve.

This advice is given especially for the benefit of the lovelorn, and I am sure it will be of great help to them, if directions are carefully followed.

"Teacher whipped me because I was the only boy who could answer a question she asked the class," cried Willie.

Willie's mother was angry. "I'll see the teacher about that!" said she. "What was the question she asked you?"

"She wanted to know who put the glue in her ink bottle."

—Great Western Magazine

## World Famous Opera Singer a Devoted Mother

*Marguerita Sylva Talks about Pretty Girls and about Her Profession, but Mostly about Her Babies*

MOTHERS are mothers the world over. No matter whether they have other "professions," vocations, or avocations, they can always find a moment to tell you about their children—and most of us are willing listeners.
