Certain units of this command are engaged in night intruder operations in Korea. In order to train replacement crews in procedures for bombing targets illuminated by air-dropped flares and to maintain the effectiveness of regular combat crews, it is essential that a bombing range be made available for practice bombing during the hours of darkness.

Bombing ranges now authorized for use in Japan are restricted to daylight operation. A survey of these ranges indicates that the water target of the Yonago air-to-ground range is suitable as a night bombing facility.

It is requested that the Yonago air-to-ground range, using the water target, be authorized for use from 0700 to 2400 hours Monday thru Friday. Safety precautions contained in AFM 91-5 and AFR 50-13 will be observed.
