PROBLEMS

Everyone will agree that the Problems of the Far East are of transcending importance.

It is impossible to evaluate the closely interwoven fabric of the Far East without an understanding of the important component parts.

To understand Japan, it is essential to keep in close touch, not only with current events—startling as they often are—but with an impartial and thoroughly interpretative background of those events—for the events themselves are often but the surface indication of deeper and more significant currents—and those currents are forceful and moving rapidly in these days.

If you wish to keep yourself reliably informed, subscribe to The Japan Advertiser, concededly the leading foreign language daily published in Japan.

The Japan Advertiser is the one and only medium which supplies this information, fully and impartially, and which gives the essential interpretative background.
