The late Elections do not much change the aspect of public affairs. The Republican party can largely early can be soon as a stricking feature is the revival at strong. The most striking feature is the revival is of old issues and the interest in new ones. This is of old issues and the interest in new ones. This is of old issues and the great party of the control of the carry devotion to the one great question of the struggle was entirely on local interests. In Massachanouts, a new party—the working men—polled enearly fifteen thousand votes, and has placed in it woman question also appears more distinctively. It is that it has ever done before. In the Western is woman question also appears more distinctively in that it has ever done before. In the Western is control of the contr

Meanwhile two things are evident. Unless some remedy is devised, the negro will stand in peril and use his rights only at great personal hazard for many years to come. Secondly, it is as evident that the Administration at Washington does not mean to interfere actively in his behalf. President Grant not only does not plan any interference, he cannot by any appeal be ronsed to allow or arrange any.

any.

One of the most active business men,—one of whose name is familiar on three continents,—told on a lately that on a plantation he holds in Texas, one negro voting the Republican and refusing to change it for a Democratic ticket, was shot dead, as he stood. From another plantation in Louisiana, in his possession, of 1500 acres and two handred hands, he received only two bales of cotton. On the reason was the neighbors shot two of his gang and drove the rest off, inst when the crop was tready. A member of the South Carolhan Senate assured as that in five counties there, the Ko-Kinx X shot all the leading hands on the plantations and so frightened the rest from voting. A report to the Legislature, soon to be printed by one of its till Committees, will confirm these and like statements by abundant vidence. Look at the report copied in another column, to a convention of colored men, for the state of affairs in Georgia. These facts are not exceptional—they are the rule and not the ex- negation in many parts of the South. Yet South Garolius is further advanced than most by other States, toward reconstruction. During the fifteen months preceding June, 1868, the negroes bought and paid for thirteen thousand acres in the a single county of Beanfort. Besides, the Legislacitor wisely appointed a Land Commission to buy up tracts of land and sell them in small lots to the tagroes. This has forced or provoked the rebels of the Sarte the object of the vebels in thus surreuder ing their old policy, never to sell an acre to a significant of the state to imagurate a system of entiting their town estates an and selling them to the linear.
