

# Wikimedia Foundation Environmental Sustainability Report 2022

**WIKIMANIA  
SINGAPORE**

Erin Morris  
[emorris@wikimedia.org](mailto:emorris@wikimedia.org)

# Agenda

- Sustainability at the Wikimedia Foundation
- Key Concepts
- Major Takeaways and Sources of Emissions
- Year over year Comparison
- Internal Carbon Fund **New!**
- Get Involved

# Sustainability at the Foundation

**February 2017** - Board adopts [Environmental Impact Resolution](#) in response to community-led [Sustainability Initiative](#)

**May 2020** - Movement Strategy recommendations prioritize [environmental sustainability](#)

**July 2022** - Internal Carbon Fund established

**June 2019** - the Wikimedia Foundation publishes its first ever [carbon footprint report](#) on calendar year 2018

**June 2022** - The board updates its 2017 resolution, formally committing us to the publication of periodic environmental sustainability reports

**WIKIMANIA  
SINGAPORE**

# Key Concepts

**Greenhouse Gas<sub>1</sub>**- a gas that traps heats in the atmosphere (e.g., carbon dioxide, methane, nitrous oxide, fluorinated gases)

**Carbon Dioxide Equivalent (CO<sub>2</sub>eq)<sub>2</sub>** provides a common scale for measuring the climate effects of different gases

**Greenhouse Gas (GHG) Protocol<sub>3</sub>** provides a global, standardized framework for measuring and managing emissions. It classifies emissions into:

- **Scope 1:** Direct GHG emissions that occur from sources controlled or owned by a company.
- **Scope 2:** Indirect emissions associated with the purchase of electricity, steam, heat, or cooling.
- **Scope 3:** Indirect emissions resulting from activities from assets not owned or controlled by a company, but that it indirectly impacts through its operations or supply chain.

# What is 1 ton of CO<sub>2</sub>-eq?

- Average emissions of direct flight between NYC and London<sub>1</sub> ✈️
- 1/5 of the global average per capita emissions<sub>2</sub>
- 2,564 miles<sub>3</sub>, or 4,126 kilometers, driven by an average American passenger vehicle 🚗
  - The distance between Madrid and Moscow

# Major Takeaways from 2022 Report

**Our scope 1, 2, and 3 emissions totalled 2.9kt Co<sub>2</sub>-eq** – less than 1% of other top ten website platforms like Google<sub>1</sub> and Meta<sub>2</sub>

**We expanded our scope 3 emissions to include remote work impacts,** which added another 0.5kt Co<sub>2</sub>-eq

**Travel-related emissions were 25% below 2019 levels** despite almost doubling our staff

**Wikipedia is an important resource for climate education,** recording 346M page views<sub>3</sub> across 31,000+ articles about climate change in 2022

# Sources of Emissions

**WIKIMANIA  
SINGAPORE**

# Data Centers

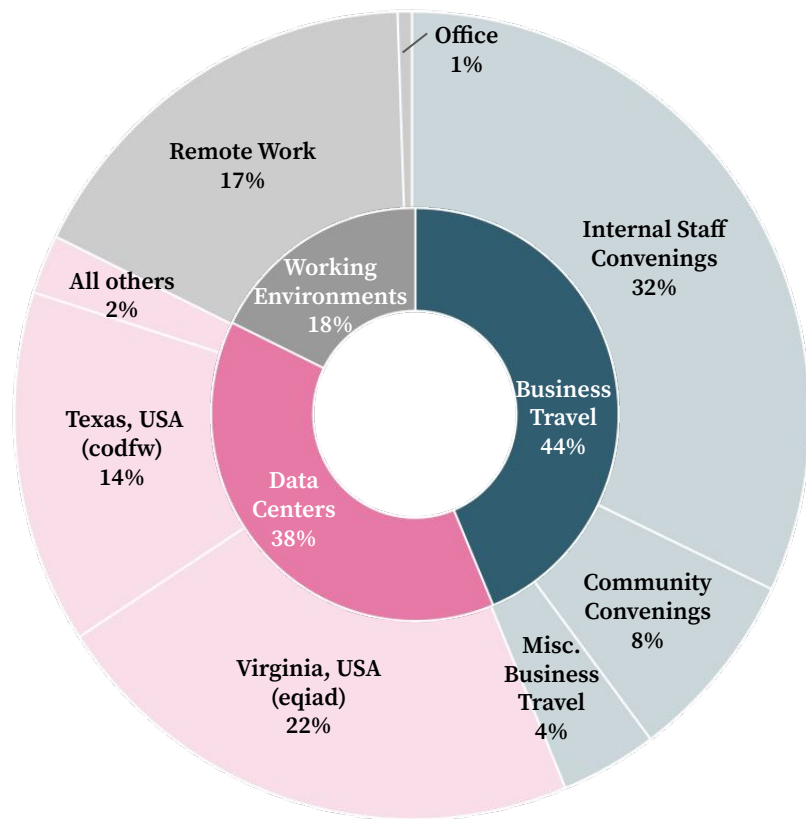

Data centers by 2022 electricity consumption, underlying map [public domain](#)

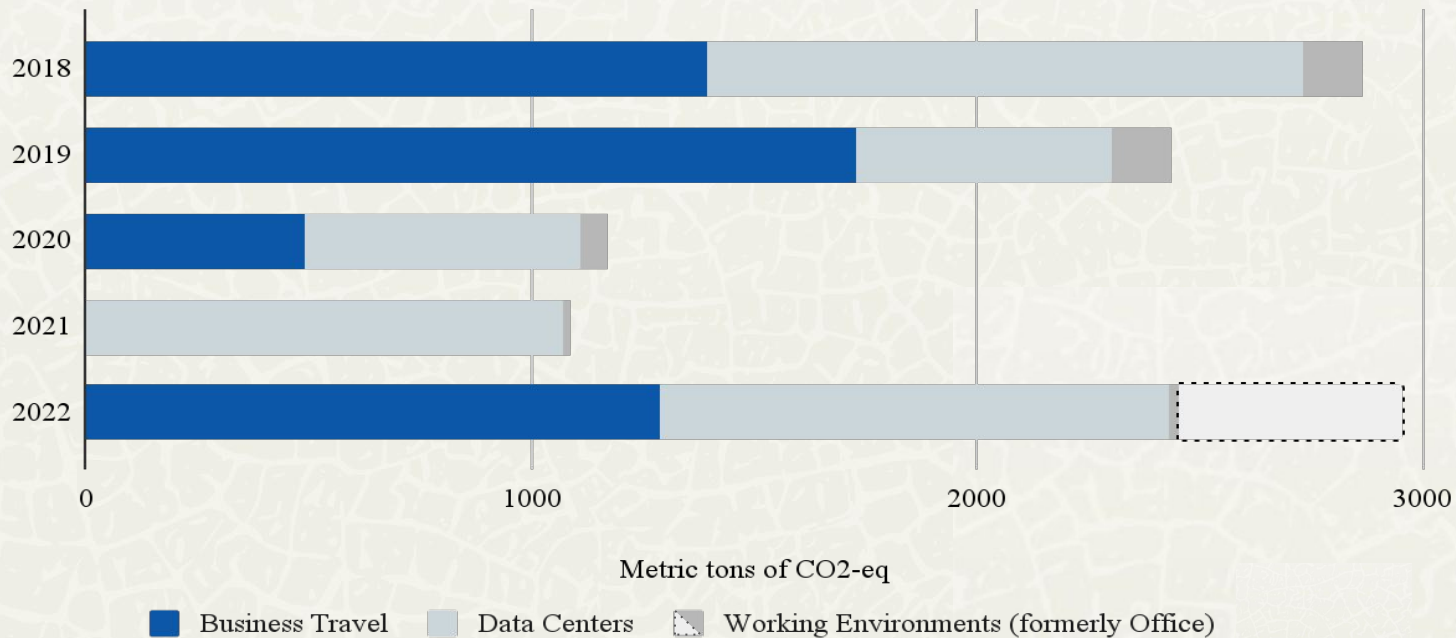

# Sources of Emissions

**WIKIMANIA  
SINGAPORE**

# Year over Year Comparison

**WIKIMANIA  
SINGAPORE**

# Internal Carbon Fund

- **US\$50/ton internal fee** on our scope 1, 2, and 3 emissions
- **Year 1** (July 1, 2022 - June 30, 2023)
  - **US\$113k** used to run a [organizer lab pilot](#)
  - 21 graduates, 6 projects funded
- **Year 2** (July 1, 2023 - June 30, 2024)
  - **US\$150k** available to support community-led sustainability campaigns
