DREER'S SUPERB ASTERS.

We take special pains to secure only the choicest Asters, and nothing better in quality can be had at any price; beware of low-priced stock, it is liable to be low grade at the same time.
 For early flowering, Queen of the Market is used almost exclusively, although the earliest of all is the new Early Wonder. Snowdrift and Lavender Gem are also very early and very desirable. Our Superh Late Branching is in most demand for late, while for mid-season Ostrich Feather, Pæony Perfection, Victoria and Washington, are all equally desirable.

AMERICAN GROWN ASTERS.

The varieties offered on this page are all American grown and stand at the head of Asters for the American climate.

The stocks have all been grown under our own supervision and we know that the quality in every case is as fine as can be had at any price and much superior to what can be procured from most sources.

Dreer's Superb Late Branching.

The finest Aster for late August and September blooming. The plants form strong, branching bushes, 2 to 2½ feet high, bearing on long, strong stems their handsome Chrysanthemum-like flowers, which, under ordinary cultivation, average 5 inches across. The form of the flowers, together with the length of the stems, places them at the head of Asters for cutting. They come into bloom from two to three weeks after the average type, usually being at their best during September, and filling in the gap between the general run of Asters and Chrysanthemums. We offer eight beautiful and distinct colors, viz.

Petunia.

Our Riverton grown strain of Double and Single Fringed Petunia have long been celebrated as the best on the market. We keep continually culling out and hybridizing and thus maintain the high standard. We frequently test stocks from the world's best growers and can say, without fear of contradiction, that our own strain is by far the best to be had at any price.

Note.—We would especially call the attention of every florist who grows Double Petunias from seed that all the smallest and weakest seedlings should be saved, as they usually produce the finest double flowers. The same is true of the singles, the strong seedlings being inclined to "weediness."

Dreer's Superb Double Fringed. Our own unrivaled strain. Every seed saved at Riverton. 75 cts. per 500 seeds; \$1.50 per 1000 seeds.

Double Fringed imported. Seeds are saved by one of the foremost European growers; the best that can be had abroad; \$1.00 per 1000 seeds.

New Double-fringed Tuberous Begonias.

These new double-fringed Begonias originated with our grower of these indispensable summer flowering bulbs. The individual flowers are identical in every way with the best types of double Begonias, of large size, full double form and brilliant color, but the edges of the petals are deeply cut or serrated, adding a most desirable character of lightness to the flower. We offer three distinct colors—white, rose and scarlet. 25 cents each; \$2.50 per dozen.

BEGONIA GLOIRE DE LORRAINE

FANCY-LEAVED CALADIUMS

THE YELLOW CANNA, R. WALLACE

Six Grand Cannas of Recent Introduction.

Frau Marie Nagel. The most floriferous of the large white-flowered varieties; an excellent bedder, contrasting well when planted in connection with some of the high-colored sorts. The flowers are large, with broad, well-rounded petals, and are produced in the greatest profusion on 3½ feet high branching stems. They are of a creamy-white when first opening, changing to almost a pure white. \$1.00 per dozen; \$7.00 per 100.

Grand Chancellor Bulow. Rich deep crimson-scarlet overlaid with maroon; very large spikes of good-sized flowers of good substance thrown well above the fine green foliage; 3 feet. 85 cents per dozen; \$6.00 per 100.

Mephisto. The darkest crimson variety yet introduced; flowers of large size, held well above the foliage; 3½ feet. 35 cents each; \$3.50 per dozen.

Richard Wallace. As a good free-flowering yellow Canna of vigorous growth, we believe that this variety comes nearer to the ideal than any variety yet offered. In color it is a pleasing canary-yellow, with exceptionally large flowers, which are carried well above the green foliage in upright well-branched trusses; 4½ feet. 85 cents per-dozen; \$6.00 per 100.

Venus. One of the softest and most delicately-colored varieties that has yet been introduced. The flowers are of a fair size, of a soft rosy pink, with a pretty mottled border of creamy yellow. The plant always presents a clean, fresh appearance, and attracts much attention. It grows about 3½ feet high, and has bright green foliage. 85 cents per dozen; \$6.00 per 100.

William Saunders. A gorgeous bronze-leaved variety, probably coming nearer to the ideal Canna than any yet introduced. The flowers are of a bright crimson-scarlet, often measuring five inches across, of remarkable substance and durability, and are produced in large trusses, nearly a foot across. The plant is of a uniform habit of growth about 4 feet high. \$2.50 per dozen; \$20.00 per 100.

One each of the above 6 varieties for \$1.00.

Dark-leaved Canna, Black Beauty.

In dark-leaved Cannas no variety is so effective as "Black Beauty;" the massive foliage is of such an intense rich color as to at once place it at the head of the list of ornamental bedding plants, where foliage or sub-tropical effect is wanted. The plant grows 5 to 6 feet high, with foliage of the richest glistening bronzy-purple, shaded black, and having crimped, wavy margins. \$1.50 per dozen; \$10.00 per 100.

Italian Orchid-flowered Cannas.

Allemania. Pleasing dark salmon with golden markings. 75 cents per dozen; \$5.00 per 100.

Austria. Pure canary-yellow; few reddish dots in the centre, 75 cents per dozen; \$5.00 per 100.

King Humbert. In this grand Canna we have a combination of the highest type of flower with the finest bronze foliage. Its flowers, which, under ordinary cultivation, will measure six inches in diameter, and which are produced in trusses of gigantic size, are of a brilliant orange-scarlet with bright red markings; while the foliage is broad and massive and of a rich coppery-bronze; bold and effective; 5 feet. \$1.25 per dozen; \$8.00 per 100.

Pennsylvania. Flowers measure fully 6½ inches in diameter, are of an intense vermilion-scarlet, overlaid with an orange sheen; foliage rich green. 75 cents per dozen; \$6.00 per 100.

An assortment of early-flowering varieties selected from an English open-air collection which, during the season 1907, we found in full bloom in a nursery in the vicinity of London as early as September 20th. We have, during the past season, given them a careful trial in our own grounds, and while but few of them in our climate showed full developed flowers before the end of September, all of them perfected their blooms during the month of October, giving a wealth of bloom after Dahlias and other tender plants were cut by frost.

Dreer's Select Dahlias

Dahlias True to Name.—Practically all of the Dahlias which we offer this season have been grown at our Locust Farm Nurseries under our personal supervision, every precaution was taken to prevent errors and our customers may depend upon receiving stock **absolutely true to name.**

Dahlia Roots or Plants.—Unless otherwise noted in the descriptions of the various varieties, we supply all Dahlias in strong dormant roots, and we believe our supply this season is ample to meet all demands. However, in case the demand for certain varieties exhausts our supply of roots, we will send out strong growing plants which will give equally good results.

Dahlias for Cutting.—We give a list of the best varieties for this purpose on page 27.

The space at our disposal in this catalogue does not allow us to give full descriptions and but few illustrations. For same see our Garden Book for 1909, pages 133 to 140.

New Quilled Show Dahlia

"Dreer's White"

This new quilled Show Dahlia is probably the most important introduction of the season, not only on account of its color, form and size, but also on account of its remarkable free-flowering habit. In our trial grounds the past summer it bloomed as profusely as A. D. Livoni. Its flowers are of large size, frequently measuring 6 inches across and are borne on stout, stiff stems, nodding lightly, and while it resembles in form in a general way the popular Grand Duke Alexis, it is of a much more refined and perfect build, and never shows a trace of any color, always being of a pure glistening white. It was shown at the annual exhibition of the New England Dahlia Society, where it received an Honorary Award, the highest award given. The Florists Exchange, reporting on this exhibition, says: "Among notable exhibits perhaps the most striking was that of Henry A. Dreer, Inc., Philadelphia, who exhibited a lot of their new Dahlia Dreer's White, and which were magnificent flowers of a pure white."

We offer strong plants ready April 15th. 50 cts. each; \$5.00 per doz.; \$35.00 per 100.

New Yellow Show Dahlia

"Charles Lanier"

The largest yellow show Dahlia to date; in color a rich deep yellow, showing up especially fine under artificial light, which adds to its value as a cut flower. It is a strong, vigorous grower and produces its flowers very freely on long stiff stems. Strong plants ready April 15th. 25 cts. each; \$2.50 per doz.; \$15.00 per 100.

New Cactus Dahlia for Cutting

"Pearlhilde"

Mr. Bassett, the oldest and one of the most extensive growers of Dahlias for cut-flowers for the Philadelphia markets and with whom this variety originated as a sport from Kriemhilde, includes this as one of his best six cut flower varieties. It is identical with its parent except in color, which is a soft blush, so near a white as to pass for such. Strong field roots, 35 cents each; \$3.50 per doz.; \$25.00 per 100.

New Decorative Dahlias for 1909.

Jack Rose. Unquestionably the most important addition to the decorative class of Dahlias for many years. In color a brilliant crimson-red, rich and glowing, and which has suggested its name Jack Rose on account of the close approach in color to the popular Gen. Jacqueminot Rose, or as it is more commonly known, the Jack Rose. The habit of the plant is all that can be desired for garden decoration, it being of a uniform compact habit of growth, producing its flowers with the greatest freedom; these are borne on erect stout stems and always come perfect, a green centre or an open flower never having been seen, and under the most ordinary cultivation they will measure five inches or more in diameter. As a cut flower its rich color, together with its long stiff stems which hold the flower erect, will at once secure it a place, in fact the comparatively few flowers placed on the market the past season were quickly disposed of at highest prices. Awarded a certificate of merit by the Pennsylvania Horticultural Society October 20th. Strong plants ready April 15th. 50 cts. each; \$5.00 per doz.; \$35.00 per 100.

Delice. A variety that appeals to every one on account of its distinct color, which is of a lively crimson-pink, entirely different from any other variety in cultivation; its habit is perfect, of strong erect growth, holding its flowers well above the foliage on stiff stems. As a cut flower it outlasts after being cut any other variety known to us. Strong plants ready April 15th. 50 cts. each; \$5.00 per doz.; \$35.00 per 100.

Le Colosse. Flower of colossal size, few measuring under 6 inches in diameter; color, according to the introducer, carmine-scarlet, but really watermelon-red; comes into bloom very early, is very free and seems to suit our climatic conditions exactly. Strong plants ready April 15th. 35 cts. each; \$3.50 per doz.

La France. A free flowering solferino red of large size, holding its flowers well above the foliage, a variety that will give a good account of itself under the most varied conditions. 25 cts. each; \$2.50 per doz.

Mlle. Marguerite des Blanc. Flowers from 5 to 6 inches in diameter, pure white, very full and of perfect form; an early and abundant bloomer. Strong plants ready April 15th. 25 cts. each; \$2.50 per doz.

NEPHROLEPIS SCHOLZELI

NEPHROLEPIS SCHOLZELI. The Plumed Scott Fern

Will be introduced by us June 1st. Orders booked now and filled in strict rotation.

The ideal plumed Fern, holding the same position to all other plumed varieties that Scottii holds to the old Boston. It is a sport from Scottii, possessing all the merits of that most popular variety, but with the pinnae sub-divided, giving it an airy feathery appearance. The fronds, like in Scottii, stand erect, with a graceful arch forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the centre of even the largest specimen from becoming defective or yellow, which is one of the weak points of all of its predecessors.

We are fully aware of the fact that the general opinion is that there have been too many varieties of plumed Nephrolepis, but we are positive that you will agree with us that there is not only ample room but a need for this variety. Its merits are so apparent that they appeal at first sight, and continue to grow on closer acquaintance; in fact, there is no room for comparison with its forerunners. It makes a good, salable plant in any size, from a 3-inch pot to the largest specimen, and is just as easy to grow as Scottii, and will prove profitable to the grower as well as to the retailer, and give full satisfaction to your customers for house decorations.

NEW DOUBLE BLUE LOBELIA

PALMS

Our Leading Specialty.

We again call special attention to our stock of Palms, which is the largest and most complete in the country, especially in the varieties and sizes used in the general florists trade, our stock of Kentias alone occupying over one and a half acres of glass, and all other popular varieties being on hand in proportionate quantities.

Cocos Weddeliana.

We have greatly increased the area of glass devoted to this most graceful of all Palms and we are now devoting six houses covering half an acre of ground to its cultivation, and while heretofore very few plants of it were grown into sizes above 2 1/4 and 3-inch pots, used principally in fern dishes, we have this season grown many thousands into 5 and 7-inch pots, these are beautiful plants, and have been taken up extensively by the best trade and are giving good satisfaction.

DREER'S SELECT ROSES.

HYBRID TEA ROSE, BESSIE BROWN

HYBRID TEA ROSE, KILLARNEY

The Roses offered on this and next page are field grown stock either American grown or plants that have been imported from England and Ireland. We handle no Holland grown Roses.

These plants are all potted up during December and January, stored in cold houses, so that they break away naturally in spring, making this the best possible stock for selling to the retail customer.

The prices noted are for strong plants in 5 and 6-inch pots (according to the growth of the variety) for delivery during April and May, and while we will make shipments earlier if requested, we prefer to book orders for these months only.

NEWER ROSES.

New Hybrid Tea Rose, Betty.

A glorious bedding Rose, especially handsome and brilliant in the late summer and fall months. It is of strong, vigorous growth, with clean, healthy foliage, and produces in great profusion its large, deliciously-perfumed flowers, which are of a glowing coppery-rose color, suffused with a golden sheen.

Strong pot-grown dormant plants from 5-inch pots, 35 cents each; \$3.50 per dozen; \$25.00 per 100.

Strong Imported Budded Stock, 50 cents each; \$5.00 per dozen; \$40.00 per 100.

New Hybrid Tea Rose, Celia.

Most attractive flowers of perfect form, of a bright, satiny pink, with deeper centre; exceptionally free-flowering, equalling, in this respect, such sorts as Killarney, Mme. Jules Grolez, etc. Strong 2-year-old plants, 40 cents each; \$4.00 per dozen.

New Hybrid Tea Rose, Earl of Warwick.

Rich, soft salmon-pink shaded in the centre with vermilion, large and full, of beautiful shape and quite distinct from any other variety, Strong 2-year-old plants, 35 cents each; \$3.50 per dozen.

New Hybrid Tea Rose, Countess of Gosford.

Salmon-pink rose and pink running into each other, with the base of petals suffused saffron-yellow. Flowers of perfect form, large, full, very long pointed buds and produced very freely. Strong 2-year-old plants, \$5.00 per dozen.

New Tea Rose, Lady Faire or Joseph Lowe.

A vigorous sport from Belle Siebrecht, and as a bedding Rose probably one of the most important of recent introduction. The color of the flower is most striking, the inner surface of the petals are an exquisite shade of pale pink, the outer side being suffused with a brilliant deep pink. Strong 2-year-old plants, 75 cents each; \$7.50 per doz.

New Rambler Rose, Tausendschön.

An entirely distinct break in climbing Roses, the flowers being fully three inches in diameter and of elegant, graceful form, as beautiful as a double Azalea. In color it is a most delightful shade of soft pink when first opening, changing to carmine on the reverse when fully expanded. These are produced in trusses, each truss a veritable bouquet. In this market it was the most profitable Rose sold as a pot plant last Easter. Very strong 2-year-old plants, 40 cents each; \$4.00 per dozen; \$30.00 per 100.

New Single Rambler Rose, Hiawatha.

A most remarkably brilliant single-flowering variety which must be seen to be appreciated. No other variety is of such a brilliant ruby crimson, with clear white eye and a mass of golden stamens, a glowing color which can be seen at a great distance and which does not tire the eye as masses of Crimson Rambler do. The flowers are about 1½ inches in diameter, and produced in long pendulous sprays with frequently from 40 to 50 flowers in a spray. Strong 2-year-old plants, 40 cents each; \$4.00 per dozen; \$30.00 per 100.

HARDY PERENNIAL PLANTS.

For some years past we have been handling Hardy Perennials as one of our leading specialties, and our stock at the present time is unquestionably the most complete both in variety and quantity in the country.

Many planters not thoroughly familiar with this class of plants have an idea that nothing but a large, field-grown clump will give satisfactory returns the first season. This, as experience has taught us, is in most instances, a mistake. A vigorous plant of proper size will, in nearly every case, give quicker and better returns than the best so-called "field clumps" that can be procured. It will be noticed that the majority of the stock offered in this list is described as being 3, 4 or 5-inch pots. This does not necessarily mean that the plants have been altogether pot-grown, but that they have been field-grown and dug and potted up during the Fall and early Winter months, and such stock can be planted, even late in the Spring, with practically no loss, which, in the case of clumps, is often quite serious.

STOKESIA CYANEA

Tritoma.

(Red-hot Poker, Flame Flower, or Torch Lily.)

The introduction of early, free and continuous-blooming varieties has made this one of the great bedding plants, and when we consider that, outside of Cannas and Geraniums, there are few plants which are suitable for massing under our climatic conditions, it is little wonder that such excellent subjects should at once become popular.

All the varieties offered are worthy of cultivation. They are hardy if given protection, but the most satisfactory method of wintering is to bury the roots in sand in a cool cellar.

Floribunda. Very large heads of fiery red; August to October; 4 to 5 feet. 25 cents each; \$2.50 per dozen.

Lemon Queen. Light chrome yellow; Aug. and Sept. 35 cents each; \$3.50 per dozen.

Obelisque. Large spikes of saffron yellow, with brighter shadings; July and August; 3½ to 4 feet. \$1.50 per dozen; \$10.00 per 100.

Pfitzerii. (*The Everblooming Flame Flower.*) The freest-flowering variety; in bloom from August to November, with heads of bloom over 12 inches long, of a rich orange scarlet, producing a grand effect either planted singly in the border or in masses. \$1.00 per dozen; \$6.00 per 100; \$50.00 per 1000.

Quartiniiana. This novel variety flowers during the latter part of May and June in spikes to 12 inches long, orange red when first opening, the lower part changing to yellow when mature; 3½ to 4 feet. 35 cents each; \$3.50 per dozen.

Saundersi. Deep coral red, changing to chrome yellow; in flower throughout July and August; 3 feet. 15 cts. each; \$1.50 per dozen.

Triumph. A remarkably strong growing variety that produces from August to October flower heads from 12 to 16 inches long, on stems 4 to 5 feet high, and are entirely distinct in color, being of a rich, deep saffron yellow shaded orange red; unique. 25 cents each; \$2.50 per dozen.

Tricolor. The buds are first cochineal-red, changing to canary yellow as they develop, finally opening a sulphur white; very free-flowering; August to October; 2½ feet. 15 cents each; \$1.50 per dozen; \$10.00 per 100.

Tuckii. Bright orange-yellow; early in July; 3 to 4 feet. 15 cents each; \$1.50 per dozen; \$10.00 per 100.

Uvaria Grandiflora. The old-fashioned late flowering sort; spikes 3 to 5 feet high, flowers rich ochre red, passing to salmon pink. \$1.00 per dozen; \$6.00 per 100; \$50.00 per 1000.

Hydrangea Arborescens Grandiflora Forma Nova.

(The Snowball Hydrangea.)

This magnificent, perfectly hardy, American Shrub is the very finest addition to this class of plants in many a year. The snow-white blooms are of largest size, the form of the panicle much like that of *Hydrangea Hortensis*. The habit of the plant is excellent, the foliage finely finished, lacking entirely the coarseness of *Hydrangea Paniculata Grandiflora*. One of the most valuable characteristics is its coming into bloom just after the passing of all the early spring Shrubs, while its long flowering season, from early June until late August, makes it a valuable acquisition in any garden. Strong, 1-year-old plants, 12 to 15 inches high, 25 cents each; \$2.50 per dozen; \$18.00 per 100.

NOTE—Prices include boxes, packing and delivery to any Express or Freight Line in Philadelphia.
