15 Remarks:  
 (A) Graphite used to be imported from Korea, but the stock is very small quantity because no import is made after the war. When all stock is gone, there is no solving method except using substitute.  
 Crome ore is produced in HOKKAIDO as much as cover the demand of these big consumer, but now it is badly disturbed by the poor transportation.  
 (B) Caused by the abolition of Fertilizer Kodan and national subsidy, the market price will rise, and production cost has to be decreased. This increase the difficulties in the production and will decrease the purchasing power of consumers. Therefore the production will be decreased.

REMARKS

(C). Company has a loan of ¥117,000,000, and now only the interest of it is being paid. This interest is included in the price of Calcium Cyanamide as much as ¥1,700 in each one ton (Production cost of one ton is ¥17,000.) Therefore this company has to stand on much unprofitable condition in the free competition that is supposed to come in July 1950.
