# $\mathbf{R} \in \mathbf{A} \quad \mathbf{D} \in \mathbf{R}.$

I Believe I have attempted a branch of Cookery, which nobody has yet thought worth their while to write upon: but as I have both seen, and found, by experience, that the generality of servants are greatly wanting in that point, therefore I have taken upon me to instruct them in the best manner I am capable; and, I dare say, that every servant who can but read will be capable of making a tolerable good cook, and those who have the least notion of Cookery cannot mis of being very good ones.

If I have not wrote in the high polite style, I hope I shall be forgiven; for my intention is to instruct the lower fort, and therefore must treat them in their own way. For example: when I bid them lard a fowl, if I should bid them lard with large lardoons, they would not know what I meant; but when I say they must lard with little pieces of bacon, they know what I mean. So, in many other things in Cookery, the great cooks bave fuch a bigh way of expresfing themselves, that the poor girls are at a loss to know what they mean : and in all Receipt Books yet printed, there are such an odd jumble of things as would quite spoil a good difh; and indeed some things so extravagant, that it would be almost a shame to make use of them, when a dish can be made full as good, or better, without them. For example: when you entertain ten or twelve people, you shall use for a cuilis, a leg of veal and ham; which, with the other ingredients, makes it very expensive, and all this only to mix with other fauce. And again, the effence of ham for fauce to one dish; when I will prove it, for about three shillings I will make as rich and high a fauce as all that will be, when done, for example : A 2 Take

Take a large deep flew pan, half a pound of bacon. fat and lean together, cut the fat and lay it over the bottom of the pan; then take a pound of veal, cut it into thin flices, beat it well with the back of a knife. lay it all over the bacon; then have fix pennyworth of the coarse lean part of the beef cut thin and well beat, lay a layer of it all over, with fome carrot, then the lean of the bacon cut thin and laid over that: then cut two onions and ftrew over, a bundle of fweet-herbs, four or five blades of mace, fix or feven cloves, a Spoonful of whole pepper, black and white together, half a nutmeg beat, a pigeon beat all to pieces, lay that all over, half an ounce of truffles and morels, then the reft of your beef, a good cruft of bread toafted very brown and dry on both fides: you may add an old cock beat to pieces; cover it close, and let it ftand over a flow fire two or three minutes, then pour on boiling water enough to fill the pan, cover it clofe, and let it flew till it is as rich as you would have it, and then strain off all that fauce. Put all your ingredients together again, fill the pan with boiling water, put in a fresh onion, a blade of mace, and a piece of carrot; cover it clofe, and let it flew till it is as fliong as you want it. This will be full as good as the effence of ham for all forts of fowls, or indeed most made-diffies, mixed with a glass of wine, and two or three spoonfuls of catchup. When your first gravy is cool. ikim off all the fat, and keep it for ule .-This falls far short of the extreme of a leg of veal and bam, and answers every purpose you want.

If you go to market, the ingredients will not come to above half a crown, or for about eighteen-pence you may make as much good gravy as will ferve twenty people.

Take twelve penny-worth of coarfe lean beef, which will be fix or feven pounds, cut it all to pieces, flour it well, take a quarter of a pound of good butter, put it into a little pot or large deep flew-pan, and put in your beef: keep flirring it, and when it begins to look a little brown, pour in a pint of boiling water; flir it all together, put in a large onion, a bundle of fweet

fweet herbs, two or three blades of mace, five or fix cloves, a fpoonful of whole pepper, a cruft of bread toasted, and a piece of carrot; then pour in four or five quarts of water, ftir all together, cover clofe, and let it flew till it is as rich as you would have it; when enough, ftrain it off, mix it with two or three fpoonfuls of catchup, and half a pint of white wine; then put all the ingredients together again, and put in two quarts of boiling water, cover it clofe, and let it boil till there is about a pint; ftrain it off well. add it to the first, and give it a boil together. This will make a great deal of rich good gravy.

You may leave out the wine, according to what use you want it for; (o that really one might have a genteel entertainment, for the price the fauce of one dish comes to: but if gentlemen will have French cooks, they must pay for French tricks.

A Frenchman in bis own country will dress a fine dinner of twenty diffes, and all genteel and pretty, for the expence he will put an English lord to for dreffing one dish. But then there is the little petty profit. I have beard of a cook that used fix pounds of butter to fry twelve eggs; when every body knows (that understands cooking) that half a pound is full enough, or more than need be used: but then it would not be French. So much is the blind folly of this age, that they would rather be impoled on by a French booby, than give encouragement to a good English cook !

I doubt I shall not gain the esteem of those gentlemen; bowever, let that be as it will, it little concerns me; but should I be so happy as to gain the good opinion of my own fex, I defire no more; that will be full recompence for all my trouble; and I only beg the favour of every lady to read my Book throughout before they cenfure me, and then I flatter my (elf I shall have their approbation.

I shall not take upon me to meddle in the physical way farther than two receipts, which will be of use to the public in general : one is for the bite of a mad dog : and the other, if a man should be near where the plague is, be [ball

# To the READER.

Shall be in no danger; which, if made use of, would be found of very great service to those who go abroad.

Nor shall I take upon me to direct a lady in the acconomy of her family; for every mistress does, or at least ought to know, what is most proper to be done there; therefore I shall not fill my Book with a deal of nonsense of that kind, which I am very well assured none will have regard to.

I have indeed given some of my dishes French names to distinguish them, because they are known by those names: and where there is great, variety of dishes and a large table to cover, so there must be variety of names for them; and it matters not whether they be called by a French, Dutch, or English name, so they are good, and done with as little expence as the dish will allow of.

I shall fay no more, only hope my Book will answer the ends I intend it for; which is to improve the servants, and fave the ladies a great deal of trouble.

# PLAIN and EASY.

## C H A P. I.

OF ROASTING, BOILING, &c.

THAT profeffed cooks will find fault with touching upon a branch of cookery which they never thought worth their notice, is what I expect; however, this I know, it is the most neceffary part of it; and few fervants there are that know how to roaft and boil to perfection.

I do not pretend to teach professed cooks, but my defign is to inftruct the ignorant and unlearned (which will likewise be of great use in all private families) and in so plain and full a manner, that the most illiterate and ignorant person, who can but read, will know how to do every thing in cookery well.

I shall first begin with roast and boiled of all forts, and must defire the cook to order her fire according to what she is to drefs; if any thing very little or thin, then a pretty little brisk fire, that it may be done quick and nice; if a very large joint, then be fure a good fire be laid to cake. Let it be clear at the bottom; and when your meat is half done, move the dripping-pan and spit a little from the fire, and stir up a good brisk fire; for according to the goodness of your fire, your meat will be done some or later.

#### EEF.

IF beef, be fure to paper the top, and bafte it well all the time it is roafting, and throw a handful of falt on it. When you fee the fmoak draw to the fire, it is near enough; then take off the paper, bafte it well, and drudge it with fome flour to make a fine froth. Never falt your roaft meat before you lay it to the fire, for that draws out all the gravy. If you would keep it a few days before you drefs it, dry it very well with a clean cloth, then flour it all over, and hang it where the air will come to it; but be fure always to mind that there is no damp place about it, if there is you muft dry it well with a cloth. Take up your meat, and garnifh your difh with nothing but horfe-radifh.

#### Directions concerning Garden things.

Most people fpoil garden things by over-boiling them. All things that are green fhould have a little crifpnefs, for if they are over boiled they never have any fweetnefs or beauty.

#### To drefs Beans and Bacon.

WHEN you drefs beans and bacon, boil the bacon by itfelf, and the beans by themfeives, for the bacon will fpoil the colour of the beans. Always throw fome falt into the water, and fome parfley nicely picked. When the beans are enough, (which you will know by their being tender) throw them into a cullender to drain. Take up the bacon and fkin it; throw fome rafpings of bread over the top, and if you have an iron make it red-hot and hold over it, to brown the top of the bacon : if you have not one, fet it before the fire to brown. Lay the beans in the difh, and the bacon in the middle on the top, and fend them to table with butter in a bafon.

#### To make Gravy for a Turkey, or any fort of Fowls.

TAKE a pound of the lean part of the beef, hack it with a knife, flour it well, have ready a flew-pan with a piece of frefh butter. Cover it clofe, and let it flew till it is as good as you would have it. This will make a pint of rich gravy.

#### To draw Mutton, Beef, or Veal Gravy.

TAKE a pound of meat, cut it very thin, lay a piece of bacon about two inches long, at the bottom of the flew-pan or fauce-pan, and lay the meat on it. Lay in fome carrot, and cover it close for two or three minutes, then pour in a quart of boiling water, fome fpice, onion, fweet herbs, and a little cruft of bread toafted. Let it do over a flow fire, and thicken it with a little piece of butter rolled in flour. When the gravy is as good as you would have it, feafon it with falt, and then ftrain it off. You may omit the bacon, if you diflike it.

#### To burn Butter for thickening Sauce.

SET your butter on the fire, and let it boil till it is brown, then fhake in fome flour, and flir it all the time it is on the fire, till it is thick. Put it by, and keep it for ufe. A little piece is what the cooks ufe to thicken and brown their fauce; but there are few ftomachs it agrees with, therefore feldom make wfe of it.

#### To make Gravy.

IF you live in the country, where you cannot always have gravymeat, when your meat comes from the butcher's take a piece of beef, a piece of veal, and a piece of mutton : cut them into as fmall pieces as you can, and take a large deep fauce-pan with a cover, cover, lay your beef at bottom, then your mutton, then a very little piece of bacon, a flice or two of carrot, fome mace, cloves, whole pepper black and white, a large onion cut in flices, a bundle of fweet herbs, and then lay in your veal. Cover it clofe over a flow fire for fix or feven minutes, flaking the fauce-pan now and then, then flaking fome flour in, and have ready fome boiling water; pour it in till you cover the meat and fomething more. When it comes home, strain it through a coarle sieve; lay the meat into a clean difh, as you firain it, and keep it for ufe. It is a fine thing in the house, and will serve for gravy, thickened with a piece of butter, red wine, catchup, or whatever you have a mind to put in, and is always ready for foups of most forts. If you have peas ready boiled, your foup will foon be made : or take fome of the broth and fome vermicelli, boil it together, fry a french roll and put in the middle, and you have good foup. You may add a fewtruffles and morels, or celery flewed tender, and then you are always ready.

#### To bake a Leg of Beef.

Do it just in the fame manner as before directed in the making gravy foups, &c. and when it is baked strain it through a coarse fieve. Pick out all the finews and fat, put them into a fauce-pan with a few spoonfuls of the gravy, a little red wine, a little piece of butter rolled in flour, and some mussard, shake your sauce-pan often, and when the sauce is hot and thick, dish it up, and fend it to table. It is a pretty dish.

#### To bake an Ox's Head.

Do just in the fame manner as the leg of beef is directed to be done in making the gravy for foups, &c. and it does full as well for the fame uses. If it should be too strong for any thing you want it for, it is only putting fome hot water to it. Cold water will spoil it.

TAKE fage, wash it, pick it clean, chop it finall, with pepper and falt; roll them with butter, and put them into the belly; never put onion into any thing, unless you are fure every body loves it; take care that your goose be clean picked and washed. I think the best way is to feald a goose, and then you are fure it is clean, and not to strong: Let your water be fealding hot, dip in your goose for a minute, then all the feathers will come off clean : when it is quite clean wash it with cold water, and dry it with a cloth; roast it and baste it with butter, and when it is half done throw fome flour over it, that it may have a fine brown. Three quarters of an hour will do it at a quick fire, if it is not too large, otherwife it will require an hour. Always have good gravy in a bastom, and apple-fauce in another.

#### A Green Goofe.

NEVER put any feafoning into it, unlefs defired. You muft either put good gravy, or green-fauce in the difh, made thus : take a handful of forrel, beat in a mortar, and fqueeze the juice out, add to it the juice of an orange or lemon, and a little fugar, beat it in a pipkin, and pour it into your difh; but the belf way is to put gravy in the difh, and green-fauce in a cup or boar. Or made thus : take half a pint of the juice of forrel, a fpoonful of white wine, a little grated nutmeg, a little grated bread; boil thefe a quarter of an hour foftly, then frain it and put it into the fauce-pan again, and fweeten it with a little fugar, give it a boil, and pour it into a difh or bafon; forme like a little piece of butter rolled in flour, and put into it.

#### To dry a Goofe.

GET a fat goofe, take a handful of common falt, a quarter of an ounce of falt-petre, a quarter of a pound of coarie fugar, mix all together, and rub your goofe very well, let it lie in this pickle a fortnight, turning and rubbing it every day, then roll it in bran, and hang it up in a chimney where wood-fmoke is for a week. If you have not that conveniency fend it to the bakers, the fmoke of the oven will dry it; or you may hang 't in your own chimney, not too near the file, but make a fire under it, and and lay horfe-dung and faw-duft on it, and that will fmother and fmoke-dry it; when it is well dried keep it in a dry place, you may keep it two or three months or more; when you boil it put it in a good deal of water, and be fure to fkim it well

Note, You may boil turnips, or cabbage boiled and flewed in butter, or onion-fauce.

Or you may roalt your plover as you do any other fowl, and have gravy fauce in the difh.

Or boil them in good celery fauce, either white or brown, just as you like.

The fame way you may drefs Wigeons.

#### To drefs Larks Pear Fashion.

You must truss the larks close, and cut off the legs, feafon them with falt, pepper, cloves and mace, make a force-meat thus, take a veal fweetbread, as much beef fuet, a few morels and mushrooms, chop all fine together, fome crumbs of bread, and a few fweet herbs, a little lemon-peel cut fmall, mix all together with the yolk of an egg, wrap up every lark in force-meat, and shape them like a pear, flick one leg in the top like the stalk of a pear, rub them over with the yolk of an egg and crumbs of bread, bake them in a gentle oven, ferve them without fauce; or they make a good garnish to a very fine dift.

You may use veal, if you have not fweetbread.

#### To drefs a Hare.

As to reaffing of a hare, I have given full directions in the beginning of the book.

# A jugged Hare.

CUT it into little pieces, lard them here and there with little flips of bacon, feafon them with a very little pepper and falt, put them into an earthen jugg, with a blade of mace, an onion fluck with cloves, and a bundle of fweet-herbs; cover the jugg or jar you do it in fo clofe that nothing can get in, then fet it in a pot of boiling water, keep the water boiling, and three hours will do it; then turn it out into the difh, and take out the onion and fweet-herbs, and fend it to table hot. If you don't like it larded, leave it out.

#### To scare a Hare.

LARD your hare and put a pudding in the belly; put it into a pot or fifh-kettle, then put to it two quarts of firong draw'd gravy, one of red wine, a whole lemon cut, a faggot of fweetherbs, a nutmeg, pepper, a little falt and fix cloves; cover it clofe, and flew it over a very flow fire, till it is three parts done then take it up, put it into a difh, and frew it over with crumbs of bread, a few iweet-herbs chopp'd fine, fome lemon-peel grated and half a nutmeg; fet it before the fire, and bafte it till it is all of a fine light brown. In the mean time take the fat of your gravy, and thicken it with the yolk of an egg; take fix eggs boil'd hard and chopped fmall, fome pickled cucumbers cut very thin; mix thefe with the fauce, and pour it into the difh.

A fillet of mutton or neck of venifon may be done the fame way.

Note,

Note, You may do rabbits the fame way, but it must be vest gravy and white wine; adding mushrooms for cucumbers.

#### To stew a Hare.

Cur it to pieces, put it into a flew-pan, with a blade or two of mace, fonie whole pepper, black and white, an onion fluck with cloves, an anchovy, a bundle of fweet herbs and a nutmeg cut into pieces, and cover it with water; cover the flew-pan clofe, let it flew till the hare is tender, but not too much done; thentake it up, and with a fork take out the hare into a clean pan, flrain the fauce through a coarfe fieve, empty all out of the pan, put in the hare again with the fauce, take a piece of butter as big as a walnut rolled in flour, and put in likewife one fpoontul of eatchup, and one of red wine; flew all together (with a few frefh mufhrooms, or pickled ones, if you have any) till it is thick and fimoth; then difh it up, and lend it to table. You 'may cut a hare in two, and flew the fore-quarters thus, and roaft the hindquarters with a pudding in the belly.

#### A Hare Civet.

BONE the hare and take out all the finews, then cut one half in thin flices, and the other half in pieces an inch thick, flour them and fry them in a little fresh butter as collops quick, and have ready some gravy made good with the bones of the hare and beet, put a pint of it into the pan to the hare, some mustard, and a little elder vinegar; cover it close, and let it do softly till it is as thick as cream, then dish it up with the head in the middle.

#### Portuguese Rabbits.

I HAVE in the beginning of my book given directions for boiled and roafted. Get fome rabbits, truis them chicken fashion, the head must be cut off, and the rabbit turned with the back upwards, and two of the legs firipped to the claw end, and fo truffed with two fkewers. Lard them, and roaft them with what fauce you please. If you want chickens and they are to appear as fuch, they must be drefs'd in this manner; but if otherwise, the head must be fkewered back and come to the table on, with liver, butter and parfley, as you have for rabbits, and they look very pretty boiled and truffed in this manner, and fmothered with onions; or if they are to be boiled for chickens, cut off the head and cover them with white cellery fauce, or rice fauce toffed up with cream.

# Rabbits Surprize.

ROAST two half-grown rabbits, cut off the heads clofe to the fhoulders and the first joints; then take off all the lean meat from the back bones, cut it fmall and tofs it up with fix or feven spoonfuls of cream and milk, and a piece of butter as big as a walnut rolled in flour, a little nutmeg and a little falt, shake all together till it is as thick as good cream, and set it to cool: then make a force-meat with a pound of veal, a pound of suet, as much crumbs of bread, two anchovies, a little piece of lemon-peel cut fine, a little fprig of thyme, and a nutmeg grated; let the veal and

and fuet be chopped very fine, and beat in a mortar, then mix it all together with the yolks of two raw eggs, place it all round the rabbits, leaving a long trough in the back bone open, that you think will hold the meat you cut out with the fauce, pour it in and cover it with the force-meat, fmooth it all over with your hand as well as you can with a raw egg, fquare at both ends, throw on a little grated bread, and butter a mazarine, or pan, and take them from the dreffer where you formed them, and place them on it very carefully. Bake them three quarters of an hour till they are of a fine brown colour. Let your fauce be gravy thickened with butter and the juice of a lemon; lay them into the difh, and pour in the fauce. Garnifh with orange cut into quarters, and ferve it up for a first courfe.

#### To boil Rabbits.

TRUSS them for boiling, boil them quick and white : for fauce take the livers, boil and fired them, and fome parfley fired fine, and pickled aftertian-buds chopped fine, or capers; mix thefe with half a pint of good gravy, a glafs of white wine, a little beaten mace and nutmeg, a little pepper and falt if wanted, a piece of butter as big as a large walnut rolled in flour; let it all boil together till it is thick, take up the rabbits and pour the fauce over them. Garnifh with lemon. You may lard them with bacon if it is liked.

#### To drefs Rabbits in Cafferole.

DIVIDE the rabbits into quarters. You may lard them of let them alone, just as you pleafe, shake fome flour over them, and fry them with lard or butter, then put them into an earthen pipkin with a quart of good broth, a glass of white wine, a little pepper and falt, if wanted, a bunch of sweet herbs, and a piece of butter as big as a walnut rolled in flour; cover them close and let them stew half an hour, then dish them up, and pour the fauce over them. Garnish with Seville orange cut into thin flices and notched; the peel that is cut out lay prettily between the flices.

#### Mutton Kebob'd.

TAKE a loin of mutton, and joint it between every bone; feafon it with pepper and falt moderately, grate a fmall nutmeg all over, dip them in the yolks of three eggs, and have ready crumbs of bread and fiveet herbs, dip them in and clap them together in the fame fhape again, and put it on a fmall fpit, roaft them before a quick fire, fet a difh under and bafte it with a little piece of butter, and then keep bafting with what comes from it, and throw fome crumbs of bread all over them as it is roafting; when it is enough take it up, and lay it in the difn, and have ready half a pint of good gravy, and what comes from it; take two fpoonfuls of catchup, and mix a tea-fpoonful of flour with it and put to the gravy, flir it together and give it a boil, and pour over the mutton.

Note, You must observe to take off all the fat of the infide, and the fkin of the top of the meat, and some of the fat, if there

the gravy, obferve to pour out all the fat.

# . A Neck of Mutton, called the Hafty Diff.

TAKE a large pewter or filver difh, made like a deep foup-difh. with an edge about an inch deep on the infide, on which the lid fixes (with a handle at top) fo fail that you may lift it up full by that handle, without falling. This difh is called a necromancer. Take a neck of mutton about fix pounds, take off the 1kin, cut it into chops, not too thick, flice a French roll thin, peel and flice a very large onion, pare and flice three or four turnips, lay a row of mutton in the difh, on that a row of roll, then a row of turnips, and then onions, a little falt, then the meat, and fo on ; put in a little bundle of fweet herbs, and two or thee blades of mace; have a tea-kettle of water boiling, fill the difh and cover it clofe, hang the difh on the back of two chairs by the rim, have ready three fleets of brown paper, tear each fleet into five pieces, and draw them through your hand, light one piece and hold it under the bottom of the difh, moving the paper about; as fast as the paper burns light another till all is burnt, and your meat will be enough. Fifteen minutes just does it. Send it to table hot in the diff.

Note, This difh was first contrived by Mr. Rich, and is much admired by the nobility.

#### To drefs a Loin of Pork with Onions.

TAKE a fore-loin of rork, and roaft it as at another time, peel a quarter of a peck of onions, and flice them thin, lay them in the dripping-pan, which must be very clean, under the pork, let the fat drop on them; when the pork is nigh enough, put the onions into the fauce-pan, let them fimmer over the fire a quarter of at hour, flaking them well, then pour out all the fat as well as you can, flake in a very little flour, a fpoonful of vinegar, and three tea-fpoonfuls of mustard, flake all well together, and fitr in the mustard, fet it over the fire for four or five minutes, lay the pork in a difh, and the onions in a bafon. This is an admirable difh to those who love onions.

#### . To make a Currey the Indian way.

TAKE two fmall chickens, fkin them and cut them as for a fricafey, wash them clean, and ftew them in about a quart of water, for about five minutes, then strain off the liquor and put the chickens in a clean dish; take three large onions, chop them small and fry them in about two ounces of butter, then put in the chickens and fry them together till they are brown, take a quarter of an ounce of Turmerick, a large spoonful of ginger and beaten pepper together, and a little falt to your palate; ftrew all thefe ingredients over the chickens whils it is frying, then pour in the liquor, and let it she wabout half an hour, then put in a quarter of a pint of cream, and the juice of two lemons, and ferve it up. The ginger, pepper and turmerick must be beat very fine.

#### To boil Rice.

Put two quarts of water to a pint of rice, let it boil till you think it is done enough, then throw in a fpoontul of falt, and turn it out into a cullender; then let it fland about five minutes before the fire to dry, and ferve it up in a difh by itfelf. Difh it up and fend it to table, the rice in a difh by itfelf.

#### To make a Pellow the Indian way.

TAKE three pounds of rice, pick and wash it very clean, put it into a cullender, and let it drain very dry; take three quarters of a pound of butter, and put it in a pan over a very flow fire till it melts, then put in the rice and cover it over very close, that it may keep all the fleam in; add to it a little falt, some whole pepper, half a dozen blades of mace, and a few cloves. You muff put in a little water to keep it from burning, then flir it up very often, and let it flew till the rice is foft. Boil two fowls and a fine piece of bacon, of about two pounds weight, as common, cut the bacon-in two-pieces, lay-it in the diff with the fowls, cover it over with the rice, and garnifh it with about half a dozen hard eggs and a dozen onions fryed whole and very brown.

Note, This is the true Indian way of dreffing them.

#### Another way to make a Pellow.

TAKE a leg of veal about twelve or fourteen pounds weight, an old cock fkinned, chop both to pieces, put it into a pot with five or fix blades of mace, fome whole white pepper, and three gallons of water, half a pound of bacon, two onions, and fix cloves; cover it clofe, and when it boils, let it do very foftly till the mear is good for nothing and above two thirds is walted, then firain it, the next day, put this foup into a fauce-pan, with a pound of rice; fet it over a very flow fire, take great care it don't burn; when the rice is very thick and dry, turn it into a dift. Garnifh with hard eggs cut in two, and have roafied fowls in another dift.

Note, You are to observe, if your rice fimmers too fast it will burn, when it comes to be thick. It must be very thick and dry, and the rice not boiled to a mummy.

#### To make Effence of Ham.

TAKE off the fat of a ham, and cut the lean in flices, beat them well and lay them in the bottom of a flew-pan, with flices of carrots, parfnips and onions; cover your pan, and fet it over a gentle fire : let them flew till they begin to flick, then fprinkle on a little flour, and turn them; then moiften with broth and veal 'gravy. Seafon them with three or four mufhroms, as many truffles, a whole leek, fome parfley, and half a dozen cloves; or inflead of a leek, a clove of garlick. Put in fome crufts of bread, and let them fimmer over a fire for a quarter of an hour; flrain it, and fet it away for ufe. Any pork or ham does for this, that is well made.

#### Rules to be observed in all Made-dishes.

FIRST, that the flew-pans, or fauce-pans and covers be very clean, free from fand, and well tinned; and that all the white fauces fauces have a little tartness, and be very fmooth and of a fine thickness, and all the time any white fauce is over the fire keep firring it one way.

**y**6

And as to brown fauce, take great care no fat fivins at the top, but that it be all fmooth alike, and about as thick as good cream, and not to tafte of one thing more than another. As to pepper and falt, feafon to your palate, but don't put too much of either, for that will take away the fine flavour of every thing. As to moft made diffes, you may put in what you think proper to inlarge it, or make it good; as mufhrooms, pickled, dryed, frefh, or powder'd; truffles, morels, cocks-combs flewed, or-palates cut in little bits, artichoke-bottoms, either pickled, frefh boiled, or dryed ones foftened in warm water, each cut in four pieces, afbeft things to give a fauce a tartners, are mufhroom-pickle, white walnut-pickle, elder-vinegar, or lemon-juice.

#### The French way of dreffing Partridges.

THEN they are newly picked and drawn, finge them : you must mince their livers with a bit of butter, fome fcraped bacon, green truffles, if you have any, parfley, chimbol, falt, pepper, fweet herbs and alfpice. The whole being minced together, put it in the infide of your partridges, then stop both ends of them, after which give them a fry in the flew-pan; that being done, fpit them, and wrap them up in flices of bacon and paper; then take a flew-pan, and having put in an onion cut into flices, a carrot cut into little bits, with a little oil, give them a few toffes over the fire ; then moisten them with gravy, cullis, and a little effence of ham. Put therein half a lemon cut into flices, four cloves of garlick, a little fweet bafil, thyme, a bay-leaf, a little partley, chimbol, two glasses of white wine, and four of the carcaffes of the partridges; let them be pounded, and put them in When the fat of your cullis is taken away be careful this fauce. to make it relifting; and after your pounded livers is put into your cullis, you must strain them through a fieve. Your partridges being done, take them off; as also take off the bacon and paper, and lay them in your difh with your fauce over them.

This difh. I do not recommend; for I think it an odd jumble of trafh; by that time the cullis, the effence of ham, and all other ingredients are reckoned, the partridges will come to a fine penny. But fuch receipts as this, is what you have in most books of cookery yet printed.

# To make Effence of Ham.

TAKE the fat off a Wettphalia Hem, cut the lean in flices, beat them well and lay them in the bottom of a flew-pan, with flices of carrots, parfnips, and onions; cover your pan, and fet it over a gentle fire. Let them flew till they begin to flick, then fprinkle on a little flour, and turn them; then moiften with broth and veat gravy; feafon with three or four mufhrooms, as many truffles, a whole leek, fome ball, parfley, and half a dozen cloves; or inflead of the leek you may put a clove of garlic. Put in fome crufts of bread, and let them fimmer over the fire for three quarters of an hour. Strain it, and fet it by for ufe.

# A Cullis for all forts of Ragoo.

HAVING cut three pounds of lean veal, and half a pound of ham, into flices, lay it into the bottom of a flew-pan, put in carrots and parfnips, and an onion fliced ; cover it, and fet it a flewing over a flove : when it has a good colour, and begins to flick, put to it a little melted butter, and hake in a little flour, keep it moving a little while till the flour is fried ; then moilen it with gravy and broth, of each a like quantity, then put in fome parfley, and bafil, a whole leek, a bay-leaf, fome mufhrooms and truffles minced fmall, three or four cloves, and the cruft of two French rolls : let all this fimmer together for three quarters of an hour; then take out your flices of veal; and firain it, and keep it for all forts of ragoos. Now compute the expence, and fee if this diffe cannot be dreffed full as well without this expence,

### A Cullis for all forts of Butcher's meat.

You must take meat according to your company. If ten or twelve, you cannot take lefs than a leg of veal and a ham, with all the fat and ikin and outlide cut off. Cut the leg of veal in pieces, about the bignefs of your fift, place them in your flew-pan, and then the flices of ham, two carrots, an onion cut in two; cover it close, let it stew foftly at first, and as it begins to be brown, take off the cover, and turn it to colour it on all fides the fame; but take care not to burn the meat. When it has a pretty brown colour, moisten your cullis with broth made of beef, or other meat; feafon your cullis with a little fweet bafil, fome cloves, with fome garlick; pare a lemon, cut it into flices, and put it into your cullis, with fome mushrooms. Put into a flew-pan a good lump of butter, and fet it over a flow fire; put into it two or three handfuls of flour, ftir it with a wooden-ladle, and let it take a colour; if your cullis be pretty brown, you must put in fome flour. Your flour being brown, with your cullis, then pour it very foftly into your cullis, keeping your cullis ftirring with a wooden-ladle; then let your cullis ftew foftly, and skim off all the fat, put in two glasses of champaign, or other white wine; but take care to keep your cullis very thin, fo that you may take the fat well off, and clarify it. To clarify it, you must put it in a stove that draws well, and cover it close, and let it boil without uncovering, till it boils over ; then uncover it, and take off the fat that is round the flew-pan, then wipe it off the

#### Cullis the Italian Way.

Pur into a flew-pan half a handful of cullis, as much effence of ham, half a ladleful of gravy, as much of broth, three or four onions cut into flices, four or five cloves of garlick, a little beaten coriander-feed, with a lemon pared and cut into flices, a little fweet bafil, mufhrooms, and good oil; put all over the fire; let it flew a quarter of an hour, take the fat well off, let it be of a good taffe, and you may use it with all forts all meat and fifh, particularly with glazed fifh. This fauce will do for two chickens, fix pigeons, quails, or ducklings, and all forts of tame and wild fowl. Now this *Italian*, or *French* fauce, is faucy.

# Cullis of Craw-Fifb.

You must get the middling fort of craw-fifh, put them over the fire, feafon'd with falt, pepper, and onion cut in flices; being done take them out, pick them, and keep the tails after they are fealed, pound the rest together in a mortar; the more they are pounded, the finer your cullis will be. Take a bit of veal, the bigness of your fift, with a small bit of ham, an onion cut into four, put it in to sweat gently; if it flicks but a very little to the pan, powder it a little. Moisten it with broth, put in it fome cloves, fweet basilin branches, fome mushrooms, with lemon pared and cut in flices: being done, skim the fat well, let it be of a good tafte, then take out your meat with a fkimmer, and go on to thicken it a little with effence of ham; then put in your craw-fish, and strain it off. Being strained, keep it for a first course of crawfish-

#### A White Cullis.

TAKE a piece of veal, cut it into finall bits, with fome thin flices of ham, and two onions cut into four pieces; moithen it with broth, feafon'd with mufhrooms, a bunch of parlley, green onions, three cloves, and fo let it flew. Being flewed, take out all your meat and roots with a fkimmer, put in a few crulnbs of bread, and let it flew foftly: take the white of a fowl, or two chickens, and pound it in a mortar: being well pounded, mix it in your cullis, but it muft not boil, and your cullis muft be very white; but if not white enough you muft pound two dozen of fweet almonds blanched, and put into your cullis; then boil a glafs of milk, and put it in your cullis: let it be of a good tafle, and ftrain it off; then put it in a fmall kettle, and keep it warm. You may ufe it for white loaves, white cruft of bread and bifquets.

Sauce for a brace of Partridges, Pheasants, or any thing you please.

Roast a partridge, pound it well in a mortar with the pinions of four turkeys, with a quart of firong gravy, and the liver of the partridges and fome truffles, let it fimmer till it be pretty thick, let it fland in a diff for a while, then put two glaffes of Burgundy into a flew-pan, with two or three flices of onions, a clove

or two of Garlick, and the above fauce. Let it fimmer a few minutes, then prefs it through a hair-bag into a stew-pan, add the effence of a ham, let all boil for iome time, feafon it with good fpices and pepper, lay your partridges, &c. in the difh, and pour your fauce in.

They will use as many fine ingredients to stew a pigeon, or fowl, as will make a very fine difh, which is equal with boiling a leg of mutton in champaign.

It would be needless to name any more; though you have much more expensive fauce than this. However I think here is enough to shew the folly of these fine French cooks. In their own country, they will make a grand entertainment with the expence of one of these dishes; but here they want the little petty profit; and by this fort of legerdemain, fome fine estates are juggled into France.

#### H A **P.** IV. С

To make a number of pretty little difhes, fit for a fupper, or fide-difh, and little corner-difhes for a great table; and the reft you have in the CHAP-TER for Lent.

#### Hogs Ears forced.

AKE four hogs ears and half boil them, or take them foused ; make a force-meat thus : take half a pound of beef fuer, as much crumbs of bread, an anchovy, fome fage, boil and chop very fine a little parfley, flit all together with the yolk of an egg, a little pepper, flit your ears very carefully to make a place for your stuffing, fill them, flour them, and fry them in fresh butter till they are of a fine brown; then pour out all the fat clean, and put to them half a pint of gravy, a glafs of white wine, three tea spoonfuls of mustard, a piece of butter as big as a nutmeg rolled in flour, a little pepper, a fmall onion whole; cover them close and let them shew foftly for half an hour, shaking your pan now and then. When they are enough, lay them in your difh, and pour your fauce over them : but first take out the onion. This makes a very pretty dish; but if you would make a fine large difh, take the feet, and cut all the meat in fmall thin pieces, and flew with the ears. Seafon with falt to your palate.

# To force Cocks-Combs.

PARBOIL your cocks-combs, then open them with the point of a knife at the great end ! take the white of a fowl, as much bacon and beef marrow, cut these small, and beat them fine in a marble mortar; feafon them with falt, pepper and grated nutineg, and mix it with an egg; fill the cocks-combs, and flew them in a little strong gravy foftly for half an hour, then flice in some fresh mutha

mushrooms, and a few pickled ones; then beat up the yolk of me egg in a little gravy, furring it. Seafon with falt. When they are enough, difh them up in little diffes or plates.

#### To preferve Cocks-Combs.

LET them be well cleaned, then put them into a pot, with fome melted bacon, and boil them a little. About half an hour after, add a little bay falt, fome pepper, a little vinegar, a lemon fliced; and an onion fluck with cloves. When the bacon begins to flick to the pot, take them up, put them into the pan you would keep them in, lay a clean linen cloth over them, and pour melted butter clarified over them, to keep them close from the air. These make a pretty plate and fupper.

### To preferve or pickle Pigs Feet and Ears.

TAKE yout feet and ears fingle, and wash them well, fplit the feet in two, put a bay-leaf between every foot, put in almost as much water as will cover them. When they are well steemed, add to them cloves, mace, whole pepper and ginger, coriander feed and fait, according to your differences, put to them a bottle or two of Rhenish wine, according to the quantity you do, half a fcore bay-leaves, and a bunch of fweet herbs. Let them boil foftly till they are very tender, then take them out of the liquor, lay them in an earthen pot, then strain the liquor over them; when they are cold, cover them down close, and keep them for wife.

You should let them stand to be cold; skim off all the fat, and then put in the wine and spice.

They eat well cold; or at any time heat them in the jelly, and thicken it with a little piece of butter rolled in flour, makes a very pretty difh; or heat the ears, and take the feet clean out of the jelly and roll in the yolk of an egg, or melted butter, and then in crumbs of bread and broil them; or fry them in frefh butter, lay the cars in the middle and the feet round, and pour the fauce over; or you may cut the ears in long flips, which is better : And if you chufe it, make a good brown gravy to mix with them, a glafs of white wine and fome muftard, thicken'd with a piece butter rolled in flour.

#### To pickle Ox-Palates.

TAKE your palates and wash them well with fait and water, and put them in a pipkin with water and fome fait; and when they are ready to boil, skim them well, and put to them pepper, cloves, and mace, as much as will give them a quick taste. When they are boiled tender (which will require four or five hours) peel them and cut them into small pieces, and let them cool; then make the pickle of white wine and vinegar, an equal quantity; boil the pickle, and put in the spices that were boiled in the palates: When both the pickle and the palates are cold, lay your palates in a jar, and put to them a few bay-leaves and a little fresh spice; pour the pickle over them, cover them close, and keep them for use.

Let these boil till the meat is boiled in pieces, and the ftrength boiled out of it; then put to it three or four anchovies, and when they are diffolv'd, frain it out and keep it for use.

#### A Craw-filb Soupe

TAKE a gallon of water, and fet it a boiling put in it a bunch of fweet herbs, three or four blades of mace, an onion fluck with cloves, pepper and falt; then have about two hundred craw-fifh, fave out about twenty, then pick the reft from the shells, fave the tails whole; the body and shells beat in a mortar, with a pint of peas, green or dry, first boiled tender in fair water, put your boiling water to it, and straining it boiling hot through a cloth till you have all the goodness out of it; set it over a flow fire or stewhole, have ready a French roll cut very thin, and let be very dry, put it to your foup, let it stew till half is wasted, then put a piece. of butter as big as an egg into a fauce pan, let it fimmer till it has done making a noise, shake in two tea spoonfuls of flour, firring it about, and an onion; put in the tails of the fifh, give them a fhake round, put to them a pint of good gravy, let it boil four or five minutes foftly, take out the onion, and put to it a pint of the foup, ftir it well together and pour it all together, and let it fimmer very foftly a quarter of an hour; fry a French roll very nice and brown, and the twenty craw-fish, pour your foup into the difh, and lay the roll in the middle, and the craw-fifh round the difh.

Fine cooks boil a brace of carp and tench, and may be a lobiler or two, and many more rich things, to make a craw-fish foup : but the above is full as good, and wants no addition.

#### A good Grany Soup.

TAKE a pound of beef, a pound of veal, and a pound of mutton cut and hacked all to pieces, put it into two gallons of water, with an old cock beat to pieces, a piece of carrot, the upper cruft of a penny loaf toafted very crifp, a little bundle of fweet herbs, an onion, a tea fpoonful of black pepper and one of white pepper, four or five blades of mace, and four cloves; cover it, and let it flew over a flow fire till half is wafted, then firain it off and put it into a clean fauce-pan, with two or three large fpoonfuls of rafpings clean fifted, half an ounce of truffles and morels, three or four heads of celery wafted very clean and cut fmall, an ox's palate, firft boiled tender and cut in pieces, a few cocks-combs, a few of the little hearts' of young favoys; cover it clofe, and let it fimmer very foftly over a flow fire two hours: then have ready tready a French roll fry'd and a few force-meat balls fry'd, put them in your difh and pour in your foup. You may boil a leg of veal, and leg of beef, and and as many fine things as you pleafe; but I believe you will find this rich and high enough.

You may leave out the cocks-combs, and palates, truffles, &c. if you don't like them, it will be good foup without them; and if you would have your foup very clear, don't put in the rafpings.

Obferve, if it be a china dish not to pour your sour ju boilinghot off the fire, but set it down half a minute, and put a ladleful in first to warm the dish, then put it in; for if it be a frost, the bottom of your dish will say out. Vermicelli is good in it, an ounce put in just before you take it up, let it boil four or five minutes.

You may make this foup of beef, or veal alone, just as you fancy. A leg of beef will do either without veal, mutton, or fowl.

#### A Green Peas Soup.

TAKE a fmall knuckle of veal, about three or four pounds, chop it all to pieces, fet it on the fire in fix quarts of water, a little piece of lean bacon, about half an ounce, steeped in vinegar an hour, four or five blades of mace, three or four cloves, twelve pepper-corns of black pepper, twelve of white, a little bundle of fweet herbs and parsley, a little piece of upper crust toasted crifp, cover it close, and let it boil foftly over a flow fire till half is wasted; then strain it off, and put to it a pint of green peas and a lettuce cut small, four heads of celery cut very small, and washed clean : cover it close, and let it stew very foftly over a flow fire two hours; in the mean time boil a pint of old peas in a pint of water very tender, and itrain them well through a coarfe hairfieve and all the pulp, then pour it into the foup, and let it boil together. Seafon with falt to your palate, but not too much, fry a French roll crifp, pour it into your difh, and pour your foup in. Be fure there be full two quarts.

Mutton gravy will do, if you have no veal; or a fhin of beef chopped to pieces. A few alparagus-tops are very good in it.

#### A White Peas Soup.

TAKE about three pounds of thick flank of beef, or any lean part of the leg chopped to pieces; fet it on the fire in three gallons of water, about half a pound of bacon, a fmall bundle of fweet herbs, a good deal of dried mint, and thirty or forty corns of pepper; take a bunch of celery, wash it very clean, put in the green tops, and a quart of split pers, cover it close and let it boil till two parts is wasted; then strain it off, and put it into a clean fauce-pan, five or fix heads of celery cut fmall and washed clean, cover it close and let it boil till there is about three quarts; then cut fome fat and lean bacon in dice, fome bread in dice, and fry them just crifp; throw them into your dish, season your soup with falt and pour it into your difh, rub a little dried mint over it, and fend it to table. You may add force-meat balls fry'd, cockscombs boiled in it, and an ox's palate stewed tender and cut small. Stewed spinach well drained, and laid round the dish is very pretty. Another

#### Another Way to make it.

WHEN you boil a leg of pork, or a good piece of beef, fave the liquor. When it is cold take off the fat, the next day boil a leg of mutton, fave the liquor, and when it is cold take off the fat, fet it on the fire, with two quarts of peas. Let them boil till they are tender, then put in the pork or beef liquor, with the ingredients as above, and let it boil till it is as thick as you would have it, allowing for the boiling again; then ftrain it off, and add the ingredients as above. You may make your foup of veal or mutton gravy if you pleafe, that is according to your fancy.

#### A Chefnut Soup.

TAKE half a hundred of chefnuts, pick them, put them in an earthen pan, and fet them in an oven half an hour; or roaft them gently over a flow fire, but take care they don't burn; then peel them, and fet them to ilew in a quart of good beef, veal, or mutton broth, till they are quite tender. In the mean time, take a piece or flice of ham, or bacon, a pound of veal, a pigeon beat to pleces, a bundle of fweet herbs, an onion, a little pepper and mace, and a piece of carrot; lay the bacon at the bottom of a flew-pan, and lay the meat and ingredients at top. Set it over a flow fire till it begins to flick to the pan, then put in a cruft of bread, and pour in two quarts of broth. Let it boil foftly till one third is wasted; then strain it off, and add to it the chefnuts. Scafon it with falt, and let it boil till it is well tafted, flew two pigeons in it, and a fry'd French roll crifp; lay the roll in the middle of the difh, and the pigeons on each fide; pour in the foup, and fend it away hot.

A French cook will beat a pheafant and brace of partridges to pieces, and put to it. Garnifh your difh with hot chefnuts.

#### To make Mutton Broth.

TAKE a neck of mutton about fix pounds, cut it in two, boil the foraig in a gallon of water, fkim it well, then put in a little bundle of fweet herbs, an onion, and a good cruth of bread. Let it boil an hour, then put in the other part of the mutton, a turnip or two, fome dried marigolds, a few chives chopped fine, a little partley chopped fmall; put thefe in about a quarter of an hour before your broth is enough. Seafon it with falt; or you may put in a quarter of a pound of barley or rice at firth. Some love it thickened with oatmeal, and fome with bread; and fome love it feafon'd with mace, inftead of fweet herbs and onion. All this is fancy, and different palates. If you boil turnips for fauce, don't boil all in the pot, it makes the broth too ftrong for them, but boil them in a lauce-pan.

### Beef Broth.

TAKE a leg of beef, crack the bone in two or three parts, wash it clean, put it into a pot with a gallon of water, skim it well, then put in two or three blades of mace, a little bundle of parsley and a good crust of bread. Let it boil till the beef is quite tender, and the finews. Toast fome bread and cut it in dice, and lay in your dift; lay in the meat, and pour the foup in,

#### To make Scotch Barley Broch.

- TAKE a leg of beef, chop it all to pieces, boil it in three gal lons of water, with a piece of carrot, and a cruft of bread, till it is half boiled away; then strain it off, and put it into the pot again, with half a pound of barley, four or five heads of celery washed clean and cut fmall, a large onion, a bundle of fweet herbs, a little parfley chopped finall, and a few marigolds. Let this boil an Take a cock or large fowl, clean picked and washed, and hour. put into the pot; boil it till the broth is quite good, then feafon with falt, and fend it to table, with the fowl in the middle. This broth is very good without the fowl. Take out the onion and fweet herbs, before you fend it to table.

Some make this broth with a sheep's head, instead of a leg of beef, and it is very good; but you must chop the head all to pieces. The thick flank, about fix pounds to fix quarts of water, makes good broth ; but then put the barley in with the neat, first skim it well, boil it an hour very foftly, then put in the above ingredients, with turnips and carrots clean foraped and pared, and cut in little pieces. Boil all together foftly, till the broth is very good ; then feason it with falt, and fend it to table, with the beef in the middle, turnips and carrots round, and pour the broth over all. To make Hodge-podge.

TAKE a piece of beef, fat and lean together about a pound, a pound of veal, a pound of fcraig of mutton, cut all into little pieces; fet it on the fire, with two quarts of water, an ounce of barley, an onion, a little bundle of fweet herbs, three or four heads of celery washed clean and cut small, a little mace, two or three cloves, fome whole pepper, tied all in a muflin rag, and put to the meat three turnips pared and cut in two, a large carrot fcraped clean and cut in fix pieces, a little lettuce cut fmall, put all in the pot, and cover it close. Let it flew very foftly over a flow fire five or fix hours ; take out the fpice, fweet herbs, and onion, and pour all into a foup difh, and fend it to table; first feafon it with falt. Half a pint of green peas, when it is the feafon for them, is very good. If you let this boil fast it will waste too much ; therefore you cannot do it too flow, if it does but fimmer. All other stews you have in the foregoing chapter; and foups in the chapter of Lent.

#### To make Pocket Soup.

TAKE a leg of veal, strip off all the skin and fat, then take all the muscular or fleshy parts clean from the bones. Boil this slesh in three or four gallons of water till it comes to a strong jelly, and that the meat is good for nothing. Be fure to keep the pot close covered, and not do too fast; take a little out in a spoon now and then, and when you find it is a good rich jelly, firain it through a fieve into a clean earthen pan, when it is cold take off all the tkim and fat from the top, then provide a large deep flew-pan with water boiling over a ftove, then take fome deep china cups, or well glazed earthen ware, and fill these cups with the jelly, which you must take clear from the fettling at the bottom, and fet them

them in the flew-pan of water. Take great care that none of the water gets into the cups; if it does it will fpoil it. Keep the water boiling gently all the time till the jelly becomes as thick as glew, take them out and let them fland to cool, and then turn the glew out into fome new coarfe flannel, which draws out all the moiffure, turn them is fix or eight hours on frefh flannel, and to do till they are quite dry. Keep it in a dry warm place, and in a little time it will be life a dry hard piece of glew, which you may carry in your pocket without getting any harm. The beft way is to put it into little timboxes. When you ufe it boil about a pint of water, and pour it on a piece of glew about as big as a fmall walnut, flirring it all the time till it is melted. Seafon with falt to your palate; and if you chuie any herbs or fpice, boil them in the water firft, and then pour the water over the glew.

#### To make Portable Soup.

TAKE two legs of beef about fifty pounds weight, take off all the fkin and fat as well as you can, then take all the meat and finews clean from the bones, which mert put into a large pot, and , put to it eight or nine gallons of foft water; first make it boil, then put in twelve atchovies, an ounce of mace, a quarter of an ounce of cloves, an bunce of whole pepper, black and white together, fix large onions peeled and cut in two, a little bundle of thyme, fweet-majorim, and winter-favory, the dry hard cruft of a two-penny loaf, it i altogether, and cover it close, lay a weight on the cover to keep it close down, and let it boil foftly for eight or nine hours, then uncover it, and flir it together; cover it close again, and let it boil till it is a very rich good jelly, which you will know by taking a little out now and then, and letting it cool. When you think it is a thick jelly, take it off, strain it through a coarle thair bag, and press it hard; then strain it through a hair fieve into a large eatthen pan; when it is quite cold take off all the fkim and fat, and take the fine jelly clear from the fettlings at bottom, and then put the jelly into a large deep well-tinned flew-pan. Set it over a flove with a flow fire, keep stirring it often, and take great care it neither sticks to the pan or When you find the jelly very fliff and thick, as it will be burns. in lumps about the pan, take it out, and put it into large deep china cups, or well glazed earthen ware. Fill the pan two thirds full with water, and when the water boils, fet in your cups. Be fure no water gets into the cups, and keep the water boiling foftly all the time till you find the jelly is like a ftiff glew; take out the cups, and when they are cool, turn out the glew into a coarfe new flannel. Let it lay eight or nine hours, keeping it in a dry warm place, and turn it on fresh flannel till it is quite dry, and the glew will be quite hard ; put it into clean new stone pots, keep it close covered from dust and dirt, in a dry place, and where no damp can come to it.

When you use it, pour boiling water on it, and fir it all the time till it is melted. Seafon it with falt to your palate. A piece the big as a large walnut will make a pint of water very rich; but

as

as to that you are to make it as good as you pleafe: if for foup, fry a French roll and lay in the middle of the difh, and when the glew is diffolved in the water, give it a boil, and pour it into a difh. If you chufe it for change, you may boil either rice, or barley, vermicelli, celery cut fmall, or truffles or morels; but let them be very tenderly boiled in the water before you ftir in the glew, and then give it a boil altogether. You may, when you would have it very fine, add force-meat balls, cock's combs, or a palate boiled very tender, and cut into little bits; but it will be very rich and good without any of thefe ingredients.

If for gravy, pour the boiling water on to what quantity you think proper; and when it is diffolved, add what ingredients you pleafe, as in other fauces. This is only in the room of a rich good gravy. You may make your fauce either weak or firong, by adding more or lefs.

#### Rules to be observed in making Soups or Broths.

FIRST take great care the pors, or fauce-pans and covers be veryslean and free from all greafe and fand, and that they be well tinned, for fear of giving the broths and foups any braffy tafte. If you have time to flew as foftly as you can, it will both have a finer flavour, and the meat will be the tenderer. But then obferve when you make foups or broth for prefent ufe, if it is to be done foftly, don't put much more water then you intend to have foup or broth; and if you have the convenience of an earthen pan or pipkin, and fet it on wood embers till it boils, then fkim it, and put in your feafoning; cover it clofe, and fet it on embers, fo that it may do very foftly for fome time, and both the meat and broths will be delicious. You muft obferve in all broths and foups, that one thing does not tafte more than another; but that the tafte be equal, and it has a fine agreeable relifh, according to what you defign it for; and you muft be fure, that all the greens and herbs you put in be cleahed, wafhed, and picked.

if you have them; put in a good many force-meat balls, a few artichoke-bottoms and afparagus-tops, if you have any. Seafon your pye with pepper and falt to your palate, and fill the pye with the gravy it was baked in. If the head be rightly feafoned when it comes out of the oven, it will want very little more; put on the lid, and bake it. When the cruft is done, your pye will be enough.

#### To make a York/bire Christmas Pye.

Seafon them all very well; take half an ounce of mace. half an ounce of nutmeg, a quarter of an ounce of cloves, and half an ounce of black pepper, all beat fine together, two large fpoonfuls of falt, and then mix them together. Open the fowls all down the back, and bone them; first the pigeon, then the partridge, cover them, then the fowl, then the goose, and then the turkey, which must be large, season them all well first, and lay them in the cruft, fo as it will look only like a whole turkey : then have a hare ready cafed, and wiped with a clean cloth. Cut it to pieces; that is, jointed; feafon it, and lay it as close as you can on one fide; on the other fide woodcocks, more game, and what fort of wild fowl you can get. Scafon them well, and lay them close; put at least four pounds of butter into the pye, then lay on your lid, which must be a very thick one, and let it be well baked. It must have a very hot oven, and will take at least four hours.

This cruft will take a buffiel of flour. In this chapter you will fee how to make it. These pies are often sent to London in a box as prefents, therefore the wall must be well built.

#### To make a Goofe Pye.

Put half a pound of butter on the top, and lay on the lid. This pye is delicious, either hot or cold, and will keep a great while. A flice of this pye cut down a-crofs makes a pretty little fide-difh for fupper.

#### To make a Venison Pasty.

TAKE a neck and breast of venision, bone it, season it with pepper and falt according to your palate. Cut the breast in two or three pieces; but don't cut the fat of the neek if you can help it. Lay in the breaft and neck-end first, and the best end of the neck on the top, that the fat may be whole; make a good rich puffpaste crust, let it be very thick on the fides, a good bottom crust, and thick top; cover the dish, then lay in your venifon, put in half a pound of butter, about a quarter of a pint of water, close your pasty, and let it be baked two hours in a very quick oven. In the mean time fet on the bones of the venifon in two quarts of water, with two or three blades of mace, an onion, a little piece of cruit baked crifp and brown, a little whole pepper; cover it close, and let it boil foftly over a flow fire till above half is wasted, then strain it off. When the pasty comes out of the oven, lift up the lid, and pour in the gravy.

When your venifon is not fat enough, take the fat of a loin of mutton, steeped in a little rap vinegar and red wine twentyfour hours, then lay it on the top of the venifon, and close your It is a wrong notion of fome people, to think venifon pafty. - cannot be baked enough, and will first bake it in a false crust, and then bake it in the pasty; by this time the fine flavour of the venifon is gone. No, if you want it to be very tender, wash it in warm milk and water, dry it in clean cloths till it is very dry, then rub it all over with vinegar, and hang it in the air. Keep it as long as you think proper, it will keep thus a fortnight good ; but be fure there be no moistness about it; if there is, you must dry it well and throw ginger over it, and it will keep a long time. When you use it, just dip it in luke warm water, and dry it. Bake it in a quick oven; if it is a large pasty, it will take three hours; then your venifon will be tender, and have all the fine flavour. The shoulder makes a pretty pasty, boned and made as above with the mutton fat.

¢

A loin of mutton makes a fine pasty : Take a large fat loin of mutton, let it hang four or five days, then bone it, leaving the meat as whole as you can, lay the meat twenty-four hours in half a pint of red wine and half a pint of rap vinegar; than take it out of the pickle, and order it as you do a pasty, and boil the bones in the same manner to fill the pasty, when it come out of the oven.

the difh, lay in your meat, throw over the tongue, lay the eyes cut in two, at each corner. Seafon it with a very little pepper and falt, pour in half a pint of the liquor it was boiled in, lay a thin top-cruft on, and bake it an hour in a quick oven. In the mean time boil the bones of the head in two quarts of the liquor, with two or three blades of mace, half a quarter of an ounce of whole pepper, a large onion, and a bundle of fweet herbs. Let it boil till there is about a pint, then strain it off, and add two fpoonfuls of catchup, three of red wine, a piece of butter as big as a walnut rolled in flour, half an ounce of truffles and morels. Seafon with falt to your palate. Boil it, and have half the brains boiled with fome fage; beat them, and twelve leaves of fage chopped fine; fiir all together, and give it a boil; take the other part of the brains, and beat them up with fome of the fage chopped fine, a little lemon-peel minced fine, and half a small nutmeg grated. Beat it up with an egg, and fry it in little cakes of a fine light brown, boil fix eggs hard, take only the yolks; when your pye comes out of the oven, take off the lid, lay the eggs and cakes over it, and pour the fauce all over. Send it to table hot without the lid. This is a fine difh ; you may put in it as many fine things as you pleafe, but it wants no more addition.

#### To make a Tort.

FIRST make a fine puff-pafte, cover your difh with the cruft, make a good force-meat thus: Take a pound of veal, and a pound of beef fuet, cut them fmall, and beat them fine in a mortar. Seafon it with a fmall nutmeg grated, a little lemon-peel fired fine, a few fweet herbs, not too much, a little pepper and falt, juft enough to feafon it, the crumb of a penny-loaf rubbed fine; mix it up with the yolk of an egg, make one third into balls, and the reft lay round the fides of the difh. Get two fine large veal fweetbreads, cut each in four pieces; two pair of lambfones, each cut in two, twelve cocks-combs, half an ounce of truffles and morels, four artichoke-bottoms cut each into four pieces, a few afparagustops, fome frefh mufhrooms, and fome pickled; put all together in your difh.

100

half a pint of fack; put it down clofe in a flone-pot, and it will keep good four months. When you make your pies, take a little difh, fomething bigger than a foup-plate, lay a very thin cruft all over it, lay a thin layer of a meat, and then a thin layer of citron cut very thin, then a layer of mince met, and a thin layer of orange-peel cut thin, over that a little meat, fqueeze half the juice of a fine Seville orange or lemon, and pour in three fpoonfuls of red wine; lay on your cruft, and bake it nicely. Thefe pies cat finely cold. If you make them in little patties, mix your meat and fweet meats ace rdingly. If you chufe meat in your pies, parboil a neat's tongue, peel it, and chop the meat as fing as pollible, and mix with the reft; or two pounds of the infide of a full in of beet boiled.

#### Tort de Moy.

MAKE puff-paste, and lay round your difh, then a layer of biscuit, and a layer of butter and marrow, and then a layer of all forts of fweet meats, or as many as you have, and so do till your difh is full; then boil a quart of cream, and thicken it with four eggs, and a spoonful of orange-flower water. Sweeten it with fugar to your palate, and pour over the rest. Half an hour will bake it.

#### To make Orange or Lemon Tarts.

TAKE fix large lemons, and rub them very well with falt, and put them in water for two days, with a handful of falt in it; then change them into fresh water every day (without falt) for a fortnight, then boil them for two or three hours till they are tender, then cut them into half quarters, and then cut them three-corner-ways, as thin as you can: take fix pippins pared, cored and quartered, and a pint of fair water. Let them boil till the pippins break; put the liquor to your orange or lemon, and half the pulp of the pippins well broken, and a pound of fugar. Boil these together a quarter of an hour, then put it in a gallipot, and fqueeze an orange in it : if it be a lemon tarr. fqueeze a lemon ; two spoonfuls is enough for a tart. Your pattypans must be finall and shallow. Put fine puff-paste, and very thin; a little while will bake it. Just as your tarts are going into the oven, with a feather, or brush, do them over with melted butter, and then fift double-refined fugar over them; and this is a pretty iceing on them.

#### To make different forts of Tarts.

Ir you bake in tin-patties, butter them, and you must put a little cruft all over, because of the taking them out; if in china, or glafs, no cruft but the top one. Lay fine fugar at the bottom, then your plumbs, cherries, or any other fort of fruit, and fugar at top; then put on your lid, and bake them in a flack oven. Mince pies mult be baked in tin-patties, because of taking them out, and puff-passe is best for them. All fweet tarts the beaten cruft is best; but as you fancy. You have the receipt for the crufts in this chapter. Apple, pear, apricot &c. make thus: apples and pears, pare them, cut them into quarters, and core them; cut the quarters across again, fet them on in a fauce-pan with juft

just as much water as will barely cover them, let them fimmer on a flow fire just till the fruit is tender; put a good piece of lemonpeel in the water with the fruit, then have your patties ready. Lay fine fugar at bottom, then your fruit, and a little fugar at top; that you must put in at your differentian. Pour over each tart a tea spoonful of lemon-juice, and three tea spoonfuls of the liquor they were boiled in; put on your lid, and bake them in a slack oven. Apricots do the same way, only don't use lemon.

As to preferve tarts, only lay in your preferved fruit, and put a very thin cruft at top, and let them be baked as little as poffible; but if you would make them nice, have a large patty, the fize you would have your tart. Make your fugar-cruft, roll it as thick as a halfpenny; then butter your patties, and cover it. Shape your upper-cruft on a hollow thing on purpofe, the fize of your patty, and mark it with a marking-iron for that purpofe in what fhape you pleafe, to be hollow and open to fee the fruit through; then bake your cruft in a very flack oven, not to difcolour it, but to have it crifp. When the cruft is cold, very carefully take it out, and fill it with what fruit you pleafe, lay on the lid, and it is done; therefore if the tart is not eat, your fweet meat is not the worfe, and it looks genteel.

Three hours will bake it, if a large fish; if a small one, two hours; and when it comes out of the oven, let it fland half an hour; then uncover it, and raife it up at one end, that the gravy may run out, then put a trencher and a weight on it to prefs out N the gravy. When the butter is cold, take it out clear from the gravy, add fome more to it, and put it in a pan before the fire i when it is melted, pour it over the falmon; and when it is cold, paper it up. As to the feafoning of these things, it must be according to your palate, more or lefs.

Note, Always take great care that no gravy or whey of the butter is left in the potting, if there is it will not keep.

# CHAP.X.

## Directions for the SICK.

I don't pretend to meddle here in the Phylical Way; but a few Directions for the Cook, or Nurfe, I prefume will not be improper, to make fuch Diet, Ec. as the Doctor shall order.

## To make Mutton Broth.

**T** AKE a pound of a loin of mutton, take off the fat, put to it one quart of water, let it boil and ikim it well, then put in a good piece of upper-cruit of bread, and one large blade of mace, cover it cloie, and let it boil flowly an hour: don't flir it, but pour the broth clear off. Scalon it with a little falt, and the mutton will be fit to eat. If your boil turnips, don't boil them in the broth, but by themselves in another fauce-pan.

### To boil a Scrag of Vcal.

SET on the ferrag in a clean fauce-pan: to each pound of vera put a quar; of water, fkim it very clean, then put in a good piece of upper-cruft, a blade of mace to each pound, and a little parfley tied with a thread. Cover it close, then let it boil very foftly two hours, and both broth and meat will be fit to ear.

## To make Beef or Mutton Broth for very weak People, who take but little Nouriflment.

TAKE a pound of beef, or mutton, or both together : to a pound put two quarts of water, first skin the meat and take off all the fat ; then cut it into little pieces, and boil it till it comes to a quarter of a pint. Season it with a very little corn of falt, skim off all the fat, and give a spoonful of this broth at a time. To very weak people, half a spoonful is enough; to some a teaspoonful at a time; and to others a tea-cup full. There is greater nourithment from this than any thing elfe.

To make Beef Drink, which is ordered for weak People.

T.VKE a pound of lean beef, then take off all the fat and fkin, out it into pieces, put it into a gallon of water, with the undercruft

179 crust of a penny-loaf, and a very little falt. Let it boil till it comes to two quarts; then strain it off, and it is a very hearty drink.

### To make Pork Broth.

TAKE two pounds of young pork, then take off the skin and fat. boil it in a gallon of water, with a turnip and a very little corn of falt. Let it boil till it comes to two quarts, then strain it off and let it ftand till cold Take off the fat, then leave the fettling at the bottom of the pan, and drink half a pint in the morning fasting, an hour before breakfast; and at noon, if the ftomach will bear it.

### To boil a Chicken.

LET your fauce-pan be very clean and nice; when the water boils put in your chicken, which must be very nicely picked and clean, and laid in cold water a quarter of an hour before it is boiled, then take it up out of the water boiling and lay it in a pewter-difh. Save all the liquor that runs from it in the difh, cut up your chicken all in joints in the difh, then bruife the liver very fine, add a little boiled pariley chopped very fine, a very little falt, and a very little grated nutmeg: mix it all well together with two spoonfuls of the liquor of the fowl, and pour it into the difh with the reft of the liquor in the difh. If there is not liquor enough, take two or three spoonfuls of the liquor it was boiled in, clap another difh over it, then fet it over a chafingdifh of hot coals five or fix minutes, and carry it to table hot with the cover on. This is better than butter, and lighter for the flomach, though fome chufe it only with the liquor, and no parfley, nor liver, hor any thing thing elfe, and that is according to different palates. If it is for a very weak perfon, take off the fkin of the chicken before you fet it on the chafing-difh. If you roast it, make nothing but the bread-fauce, and that is lighter than any fauce you can make for a weak ftomach.

Thus you may drefs a rabbit, only bruife but a little piece of the liver.

### To boil Pigeons.

LET your pigeon be cleaned, wafhed, drawn and fkinned. Boilthem in milk and water ten minutes, and pour over them fauce, made thus : take the livers parboiled, and bruife them fine with as much parfley boiled and chopped fine. Melt fome butter, mix a little with the liver and parfley first, then mix all together, and pour over the pigeons.

### To boil a Partridge, or any other Wild Forul.

WHEN your water boils, put in your partridge, let it boil ten minutes, then take it up into a pewter-plate, and cut it in two, laying the infides next the plate, and have ready fome bread-fauce, made thus : take the crumb of a half-penny roll, or thereabouts, and boil it in half a pint of water, with a blade of mace. Let it boil two or three minutes, pour away most of the water, then beat it up with a little piece of nice butter, a little falt, and pour

N 2

1.

180

pour it over the partridge. Clap a cover over it, then fet it over a chafing-difh of coals four or five minutes, and fend it away hot, covered clofe.

Thus you may drefs any fort of wild fowl, only boiling it more or lefs, according to the bignefs. Ducks, take off the fkinsbefore you pour the bread-fauce over them; and if you roaft them, lay bread-fauce under them. It is lighter than gravy for weak ftomachs.

### To boil a Plaise or Flounder.

Let your water boil, throw fome falt in, then put in your fifth, boil it till you think it is enough, and take it out of the water in a flice to drain. Or in the room of this fauce, add melted butter in a cup.

To mince Veal or Chicken, for Sick, or weak People.

• MINCE a chicken or veal very fine, taking off the fkin; just boil as much water as will moisten it, and no more, with a very little falt, grate a very little nutmeg, then throw a little flour over it, and when the water boils put in the meat. Keep flaking it about over the fire a minute; then have ready two or three very thin fippers toafted nice and brown, laid in the plate, and pourthe mince-meat over, it.

## To pull a Chicken for the Sick.

You must take as much cold chicken as you think proper, take off the fkin, and pull the meat into little bits as thick as a quill; then take the bones, boil them with a little falt till they are good, ftrain it, then take a fpoonful of the liquor, a fpoontul of milk, a little bit of butter, as big at a large nutmeg rolled in flour, a little chopped parfley as much as will lye on a fix-pence, and a little falt if wanted. This will be enough for half a fmall chicken. Put all together into the fauce-pan; then keep thaking it till it is thick, and pour it into a hot plate.

### 'To make Chicken Broth.

You must take an old cock, or large fowl, flea it, then pickoff all the fat, and break it all to pieces with a rolling-pin; putit into two quarts of water, with a good cruft of bread, and a blade of made. Let it boil foftly till it is as good as you would have it. If you do it as it should be done, it will take five or fix hours doing; pour it off, then put a quart more of boiling water, and cover it clofe. Let it boil foftly till it is good, and ftrain it off. Seafon with a very little falt. When you boil a chicken fave the liquor, and when the meat is eat, take the bones, then break them and put to the liquor you boiled the chicken in, with a blade of mace, and a cruft of bread. It will eat very fine, especially if the heat will give you leave to keep it long. Take off all the fuet before you lay it in the blood, take the other joints and lay them in a large pan, pour over them a quart of red wine and a quart of rap vinegar, Lay the fat fide of the meat downwards in the pan, on a hollow tray is beft, and pour the wine and vinegar over it; let it lay twelve hours, then take the neck, breaft and loin out of the pickle, let the shoulder lay a week, if the heat will let you, rub it with bay falt, falt petre and coarse fugar, of each a quarter of an ounce, one handful of common falt, and let it lay a week or ten days. # To pet Tongues.

This pickle will do feveral tongues, only adding a little more white falt; or we generally do them after our hams. Take the tongue out of the pickle, cut off the root, and boil it well, till it will peel; then take your tongues and feafon them with falt, pepper, cloves, 'mace and nutmeg, all beat fine, rub it well with your hands whill it is hot, then put it-into a pot, and melt as much butter as will cover it all over. Bake it an hour in the oven, then take it out, let it ffand to cool, rub a little frefh fpice on it; and when it is quite cold, lay it in your pickling-pot. When your butter is cold you baked it in, take it off clean from the gravy, fet it in an earthen pan before the fire; and when it is melted, pour it over the tongue. Carefully drain it from . the butter, lay it on a coarfe cloth till it is cold; and when the butter is cold, take off the hard fat from the gravy, and lay it before the fire to melt, put your meat into the pot again, and pour the butter over. If there is not enough, clarify more, and let the butter be an inch above the meat; and this will keep a great while, eats fine, and looks beautiful. When you cut it, it must be cut cross-ways down through, and looks very pretty. It makes a pretty corner-difh at table, or fide-difh for fupper. If you cut a flice down the middle quite through, lay it in a plate, and garnish with green parfley and stertian-flowers. If you will be at the expence, bone a turkey, and put over the goofe. # Another Way to feafon a Collar of Beef.

# To collar Salmon.

TAKE a fide of falmon, and cut off about a handful of the tail. wash your large piece very well, and dry it with a cloth; then wash it over with the yolks of eggs, then make fome force-meat with that you cut off the tail, but take care of the skin, and put to it a handful of the parboiled oysters, a tail or two of lobster, the yolks of three or four eggs boiled hard, fix anchovies, a good handful of fweet herbs chopped fmall, a little falt, cloves, mace, nutmeg, pepper, all beat fine and grated bread. Work all these together into a body, with the yolks of eggs, lay it all over the flefhy part, and a little more pepper and fait over the falmon; fo roll it up into a collar, and bind it with broad tape; then boil it in water. falt and vinegar, but let the liquor boil first, then put in your col-· lar, a bunch of fweet herbs, fliced ginger and nutmeg. Let it boil, but not too fast. It will take near two hours boiling; and when it is enough, take it up, put it into your foufing-pan, and when the pickle is cold put it to your falmon, and let it fland in it till used. Or you may pot it, after it is boiled pour clarified butter over it. It will keep longest so; but either way is good. If you pot it, be fure the butter be the nicest you can get.

#### To make Dutch Beef.

TAKE the lean part of a buttock of beef raw, rub it well with brown fugar all over, and let it lie in a pan or tray two or three hours, turning it two or three times, then falt it well with common falt and falt-petre, and let it lie a fortnight, turning it every day; then roll it very strait in a coarfe cloth, put it in a cheefeprefs a day and a night, and hang it to dry in a chimney. When you boil it, you must put it in a cloth; when it is cold, it will cut in flivers as Dutch beef.

# To make Sham Brawn.

#### To fouse a Turkey, in initiation of Sturgeon.

You must take a fine large turkey, drefs it very clean, dry and bone it, then tie it up as you do florgeon, put into the pot you boil it in one quart of white wine, one quart of water, one quart of good vinegar, a very large handful of falt, let it boil, fkim it well, and then put in the turkey. When it is enough, take it out, and tie it eighter. Let the liquor boil a little longer; and if you think the pickle wants more vinegar or falt, add it when it is cold, and pour it upon the turkey. It will keep fome months, covering it clofe from the air, and keeping it in a dry cool place. Eat it with oil, vinegar and fugar, jult as you like it. Some admire it more than flurgeon; it looks pretty covered with fennel for a fide-difh.

#### To pickle Pork.

BONE your pork, cut it into pieces, of a fize fit to be in the tub or pair you delign it to be in, rub your pieces well with falt-petre, then take two parts of common falt and two of bay-falt, and rub every piece well: lay a layer of common falt in the bottom of your veffel, cover every piece over with common falt, lay them one upon another as clofe as you can, filling the hollow places on the fides with falt. As your falt melts on the top, firew on more, lay a coarfe cloth over the vefiel, a board over that, and a weight on the board to keep it down. Keep it clofe covered; it will thus ordered. keep the whole year. Put a pound of falt-petre and two pounds of bay-falt to a hog.

# A Pickle for Pork, which is to be cat form.

You must take two gallons of pump-water, one pound of bay-falt, one pound of coarte lugar, fix ounces of falt-petre; boil it all together, and ikim it when cold. Cut the pork in what pieces you please, lay it down close, and pour the liquor over it. Lay a weight on it to keep it close, and cover it close from the air, and it will be fit for use in a week. If you find the pickle begins to ipoil, boil the pickle again, and fkim it; when it is cold, pour it on your pork again.

#### To make Vial Hams.

Cut the leg of veal like a ham, then take a pint of bay-falt, two ounces of falt-petre, and a pound of common falt; mix them together, with an ounce of juniper berries beat; rab the ham well, and lay it in a hollow tray, with the fkinny fide downwards. Balte it every day with the pickle for a fortnight, and then hang it in wood fmoke for a fortnight. You may boil it, or parboil it and roath it: In this pickle you may do two or three tongues, or a piece of pork.

# To make Beef Hams.

You must take the leg of a fat, but small beef, the fat Scotch or Welch cartle is beit, and cut it ham fashion. Take an ounce of

bay-

bay-falt, an ounce of falt-petre, a pound of common falt, and a pound of coarfe fugar (this quantity for about fourteen or fifteen pounds weight, and to accordingly, if you pickle-the whole quarter) rub it with the above ingredients, turn it every day, and baile it well with the pickle for a month : Take it out and roll it in bran or faw duit, then hang it in wood-fmoke, where there is but little fire, and a conftant imoke for a month; then take it down; and hang it in a dry place, not hot, and keep it for ule,... You may cut a piece off as you have occafion, and either boil it or cut it in rafhers, and broil it with poached eggs, or boil a piece, and it eats five cold, and will fhiver like Dutch beef. After this beef is done, you may do a thick brifcuit of beef in the fame pickle. Let it lay a month, rubbing it every day with the pickle, then boil it till it is tender; hang it in a dry place, and it eats finely cold cut in flices on a plate. It is a pretty thing for a fide-difh, or for fupper. A moulder of mutton laid in this pickle a week, hung in wood fmoke two or three days, and then boiled with cabbage, is very good. C. 1 . . .

#### To make Mutton Hams.

You must take a hind-quarter of mutton, cut it like a ham, take one ounce of fult-petre, a pound of coarle fugar, a pound of common fait; mix them and rub your ham, lay it in a hollow tray with the fkin downwards, baste it every day for a fortnight, then roll it in fawduss, and hang it in the wood-smoke a fortnight; then boil it, and hang it in a dry place; and cut it out in rashers. It don't eat well boiled, but eats finely broiled.

#### To make Pork Hams.

You must take a fat hind-quarter of pork, and cut off a fine ham. Take an ounce of falt-petre, a pound of coarfe fugar, and a pound of common falt; mix all together, and rub it well. Let it lie a month in this pickle, turning and bafting it every day, then hang it in wood-fmoke as you do your beef in a dry place, fo as no heat comes to it; and if you keep them long, hang them a month or two in a damp place, fo that they will be mouldy, and it will make them cut fine and fhort. Never lay these hams in water till you boil them, and then boil them in a copper, if you have one, or the biggeft pot you have. Put them in the cold water, and let them, be four or five hours before they boil. Skim the pot well and often, till it boils. If it is a very large one, two hours will boil it; if a finall one, an hour and a half will do, provided it be a great while before the water boils. Take it up half an hour before dinner, pull off the fkin, and throw raspings finely fifted all over. Hold a red-hot fire-shovel over it, and when dinner is ready take a few raspings in a fieve and fift all over the dish; then lay in your ham, and with your finger make fine figures round the edge of the Be fure to boil your ham in as much water as you can, and difh. to keep it fkimming all the time till it boils. It must be at least four hours before it boils.

This pickle does finely for tongues, afterwards to lie in it a fortnight, and then hung in the wood-fmoke a fortnight, or to boil them out of the pickle.

Q 3

Yorkshire

• Yorkfhire is famous for hams; and the reason is this: Their fale is much finer than ours in London, it is a large clear falt, and given the meat a fine flavour. I used to have it from Malding in Essex, and that falt will make any ham as fine as you can defire. It is by much the best falt, for falting of meat. A deep hollow wooden tray is better than a pan, because the pickle sould best about it.

When you broil any of these hams in flices or bacon, have fonce boiling water ready, and let the flices lay a minute or two in the water; then broil them, it takes out the falt, and makes them eat finer.

#### To make Bacon.

TAKE a fide of pork, then take off all the infide fat, lay it on a long board or dreffer, that the blood may run away, rub it well with falt on both fides, let it lye thus a week; then take a pint of bay falt, a quarter of a pound of falt-petre, beat them fine, two pounds of coarfe fugar, and a quarter of a peck of common falt. Lay your pork in fomething that will hold the pickle, and rub it well with the above ingredients. Lay the fkinny fide down wards, and bafte it every day with the pickle for a fortnight; then hang it in wood-funcke as you do the beef, and afterwards hang it in a dry place, but not hot. You are to obferve, that all hams and bacon fhould hang clear from evey thing, and not againft a wall.

Observe to wipe off all the old falt before you put it into this pickle, and never keep bacon or hams in a hot kitchen, or in a room where the fun comes. It makes them all rusty.

# To fave potted Birds, that begin to be bad.

I HAVE feen potted birds which have come a great way, often finell fo bad, that no body could bear the fmell for the ranknefs of the butter, and by managing them in the following manner, have made them as good as ever was eat.

Set a large fauce-pan of clean water on the fire; when it boils, take off the butter at the top, then take the fowls out one by one, throw them into that fauce-pan of water half a minute, whip it out, and dry it in a clean cloth infide aud out; fo do all till they are quite done. Scald the pot clean; when the birds are quite cold, feafon them with mace, pepper and falt to your mind, put them down clofe in the pot, and pour clarified butter over them,

# To pickle Mackrel, call'd Caveach.

Cut your mackrel into round pieces, and divide one into five or fix pieces: To fix large mackrel, you may take one ounce of beaten pepper, three large nutmegs, a little mace, and a handful of falt. Mix your falt and beaten fpice together, then make two or three holes in each piece, and thruit the feafoning into the holes with your finger, rub the piece all over with the feafoning, fry them brown in oil, and lot them fland till they are cold; then put them into vinegar, and cover them with oil. They will keep well covered a great while, and are delicious.

#### To pickle Walnuts black.

You must take large full-grown nuts at their full growth, before they are hard, lay them in falt and water; let them lye two days, then shift them into fresh water; let them lye two days longer, then shift them again, and let them lye three days; then take them out of the water, and put them into your pickling-pot. When the pot is half full, put in a large onion fluck with cloves. To a hundred of walnuts, put in half a piut of mustard-feed, a quarter of an ounce of mace, half an ounce of black pepper; half an ounce of all-fpice, fix bay-leaves, and a flick of horferadifh; then fill your pot, and pour boiling vinegar over them. Cover them with a plate, and when they are cold tie them down with a bladder and leather, and they will be fit to eat in two or three months. The next year, if any remains, boil up your vinegar again, and fkim it; when cold, pour it over your walnuts. This is by much the best pickle for use; therefore you may add more vinegar to it, what quantity you pleafe. If you pickle a great many walnuts, and eat them faft, make your pickle for a hundred or two, the reft keep in a ftrong brine of falt and water boiled till it will bear an egg, and as your pot empties, fill them up with those in the falt and water. Take care they are covered with pickle.

In the fame manner you may do a fmaller quantity; but if you can get rap vinegar, use that instead of falt and water. Do them thus; put your nuts in the pot you intend to pickle them in, throw in a good handful of falt, and fill the pot with rap vinegar. Cover it close, and let them find a fortnight; then pour them out of the pot, wipe it clean, and just rub the nuts with a coarfe cloth, and then put them in the jar with the pickle as above. If you have the best fugar-vinegar of your own making, you need not boil it the first year, but pour it on cold; and the next year, if any remain, boil it up again, skinw it, put fresh spices to it, and it will do again.

much. To every gallon of pickle, put one nutmog cut in quarters, a quarter of an ounce of cloves, a quarter of an ounce of mace, a quarter of an ounce of whole pepper, and a large race of ginger fliced; boil all these together in a bell-metal or copperpot, pour it boiling hot on your cucumbers, and cover them as before. Be fure never to put your hands in to take pickles out, it will soon spoil it. The best way is, to every pot tie a wooden spoon full of little holes, to take the pickles out with.

GET fome oatmeal, put it into a broad deep pan, then cover it with water, ilir it together and let it ftand twelve hours, then pour off that water clear, and put on a good deal of fresh water, thift it again in twelve hours, and fo in twelve more; then pour off the water clean, and firain the oatmeal through a coarle hairfieve, and pour it into a fauce-pan, keeping it firring all the sime with a flick till it boils and is very thick, then pour it into dishes; when cold turn it into plates, and cat it with what you pleafe, pleafe, either wine and fugar, or beer aud fugar, or milk. It eats very pretty with cyder and fugar.

You must observe to put a great deal of water to the oatmeal, and when you pour off the last water, pour on just enough fresh as to strain the oatmeal well. Some let it stand forty-eight hours, fome three days, shifting the water every twelve hours; but that is as you love it for sweetness or tartness. Gruts once cut does better than oatmeal. Mind to fir it together when you put in fresh water.

# To make a fine Syllabub from the Cow.

MAKE your fyllabub of either cyder dr wine, fweeten it pretty fweet, and grate nutmeg in, then milk the milk into the liquor; when this is done, pour over the top half a pint or a pint of cream, according to the quantity of fyllabub you make.

You may make this fyllabub at home, only have new milk; make it as hot as milk from the cow, and out of a tea-pot, or any fuch thing, pour it in holding your hand very high.

# To make a Hedge-Hog.

TAKE two pounds of blanched almonds, beat them well in a mortar, with a little canary and orange-flower water, to keep them from oiling. Make them into fliff-paste, then beat in the yolks of twelve eggs, leave out five of the whites put to it a pint of cream, fweeten'd with fugar, put in half a pound of fweet butter melted, fet it on a furnace or flow fire, and keep it conftantly ftirring, till it is ftiff enough to be made in the form of a hedge-hog; then flick it full of blanched almonds, flit and fluck up like the briftles of a hedge-hog, then put it into a difh, take a pint of cream and the yolks of four eggs beat up, fweeten'd with fugar to your palate. Stir them together over a flow fire till it is quite hot, then pour it round the hedge-hog in a difh, and let it stand till it is cold, and ferve it up. Or a rich calf's foot jelly made clear and good, and pour in the difh round the hedgehog; and when it is cold, it looks pretty, and makes a pretty dilh; or it looks pretty in the middle of a table for fupper.

#### To make French Flummery.

You must take a quart of cream and half an ounce of isinglafs, beat it fine, and flir it into the cream. It makes a fine fide-difh. You may eat it with cream, wine, or what you pleafe. Lay round it baked pears. It both looks very pretty, and eats fine.

### A Buttered Tort.

TAKE eight or ten large codlings and fcald them, when cold fkin them, take the pulp and beat it as you can with a filver fpoon, then mix in the yolks of fix eggs, and the whites of four beat all well together, a Seville orange, fqueeze in the juice, and fired thethe rhind as a fine as possible, with fome grated nutmeg and fugar to your taffe; melt fome fine fresh butter, and beat up with it according as it wants, till it is all like a fine thick cream, then make a fine puff-passe, have a large tin-patty that will just hold it, cover the patty with the passe, and pour in the ingredients. Don't put any cover on, bake it a quarter of an hour, then flip it out of the patty on a dish, and throw fine sugar well beat, all over it. It is a very pretty fide-dish for a second course. You may make this of any large apples you please.

#### Moon-Shine.

FIRST have a piece of tin, made in the shape of a half-moon, as deep as a half-pint bason, and one in the shape of a large star, and two or three lesser ones. Boil two calves set in a gallon of water till it comes to a quart, then strain it off, and when cold fkim off all the fat, take half the jelly, and fwceten it with fugar. to your palate, beat up the whites of four eggs; ftir all together over a flow fire till it boils, then run it through a flannel bag till clear, put it in a clean fauce-pan, and take an ounce of fweet almonds blanched and beat very fine in a marble mortar, with two fpoonfuls of role water and two of orange-flower water; then ftrain it through a coarfe cloth, mix it with the jelly, ftir in four large spoonfuls of thick cream, stir it all together till it boils, then have ready the diff you intend it for, lay the tin in the shape of a half-moon in the middle, and the flars round it; lay little weights on the tin to keep them in the places you would have them lye, then pour in the above Blanc Manger into the difh, and when it is quite cold take out the tin things, and mix the other half of the jelly with half a pint of good white wine and the juice of two or three lemons, with loaf fugar enough to make it fweet, and the whites of eight eggs beat fine; fir it all together over a flow fire till it boils, then run it through a flannel bag till it is quite clear in a china bason, and very carefully fill up the places where you took the tin out; let it stand till cold, and fend it to table.

Note, You may for change fill the difh with a fine thick almond cuftard; and when it is cold, fill up the half-moon and flars with the clear jelly.

# The Floating Island, a pretty Dish jor the Middle of a Table at a Second Course, or for Supper.

You may take a foup-d fh, according to the fize and quantity you would make, but a pretty deep glafs difh is beft, and fct if on a china difh: First take a quart of the thickest cream you can get, make it pretty sweet with fine fugar, pour in a gill of fack, grate the yellow rhind of a lemon in, and mill the cream till it is all of a thick froth, then carefully as you can pour the thin from the froth into a difh; take a French roll, or as many as you want, cut it as thin as you can, lay a layer of that as light as possible on the cream, then a layer of currant jelly, then a very thin layer of roll, and then hartshorn jelly, then French roll, and over ever that whip your froth which you faved off the cream very welk milled up, and lay at top as high as you can heap it; and as for the rim of the difh, fet it round with fruit or fweet-meats, according to your fancy. This looks very pretty in the middle of a table with candles round it, and you may make it of as many different colours as you fancy, and according to what jellies and giams or fweet-meats you have, or at the bottom of your difh you may put the thickeft cream you can get, but that is as you fancy.

#### To make Cherry Wine.

PULL your cherries when full ripe, off the fialks, and prefs them thro' a hair-fieve. To every gallon of liquor put two pounds of lump fugar beat fine, flir it together and put it into a veffel, it must be full; when it has done working and making any noife, flop it close for three months, and bottle it off.

# To make Birch Wine.

THE feafon for procuring the liquor from the birch trees is in the beginning of March, while the fap is riting, and before the leaves shoot out; for when the fap is come forward, and the leaves appear, the juice by being long digested in the bark, grows thick and coloured, which before was thin and clear.

The method of procuring the juice is, by bering holes in the body of the tree, and putting in foffets, which are commonly made of the branches of eider, the pith being taken out. You may without hurting the tree, if large, tap it in feveral places, four or five at a time, and by that means fave from a good many trees feveral gallons every day; 7, you have not enough in one day, the bottles, in which it drops muft be corked clofe, and rofined or waxed; however make use of it as foon as you can.

Take the fap and boil it as long as any feum rifes, fkimming it all the time: To every gallon of liquor put four pounds of good fugar, the thin peel of a lemon, boil it afterwards half an hour, feumming it very well, pour it into a clean tub, and when it is almost cold, fet it to work with yeaft fpread on a toaft, let it fland five or fix days, flirring it often; then take fuch a cafk as will hold the liquor, fire a large match dipt in brimflone, and throw it into the cafk, flop it close till the match is extinguished, turn your wine, lay the bung on light till you find it has done working; flop it clofe and keep it three months, then bottle it off.

If yout make a twenty gallon cafk, let it finand fix months before you bottle it; when you firain your quinces, you are to wfing them hard in a coarfe cloth.

#### To make Couffip or Clary Wine.

TAKE fix gallons of water, twelve pounds of fugar, the juice of fix lemons, the whites of four eggs beat very fmall, put all together in a kettle, let it boil half an hour, fkim it very well, take a peck  $Q_{-}$  of

of cowflips; if dry ones, half a peck; put them into a tub with the thin peeling of the fix lemons, then pour in the boiling liquor. and stir them about; when almost cold, put in a thin toast baked dry and rubbed with yeaft. Let it ftand two or three days to work. If you put in before you tun it fix ounces of fyrup of citron or lemons, with a quart of Rhenish wine, it will be a great addition ; the third day frain it off, and fqueeze the cowflips through a coarfecloth, then strain it through a stannel bag and tun it up, lay the bung loofe for two or three days to fee if it works, and if it don't bung it down tight; let it stand three months, then bottle it.

#### To make Turnip Wine.

TAKE a good many turnips, pare them, flice them, put them in a cyder-preis, and prefs out all the juice very well. To every gallon of juice, have three pounds of lump fugar, have a veffel ready, just big enough to hold the juice, put your fugar into a vessel, and also to every gallon of juice half a pint of brandy. Pour in the juice, and lay fomething over the bung for a week, to fee if it works. If it does, you must not bung it down till it has done working; then ftop it close for three months, and draw it off intoanother vessel. When it is fine, bottle it off.

#### To make Rafterry Wine.

TAKE fome fine ripe rafberries, bruife them with the back of a spoon, then strain them through a flannel bag into a stone jar. To each quart of juice, put a pound of double-refined fugar, ftir it well together, and cover it close; let it stand three days, then pour-it off clear. To a quart of juice, put two quarts of white wine, bottle it off, it will be fit to drink in a week. Brandy made thus is a very fine dram, and a much better way than steeping the rafberries.

#### Rules for Brewing.

CARE must be taken in the first place to have the malt clean; and after it is grinded, it ought to fland four or five days.

For frong October, five quarters of malt to three hogsheads, and twenty-four pounds of hops. This will afterwards make two hogiheads of good keeping fmall beer, allowing five pounds of hops to it.

For good middling beer, a quarter of malt makes a hoghead of ale, and one of imall beer; or it will make three hogheads of good fmall beer, allowing eight pounds of hops. This will keep all the year; or it will make twenty gallons of firong ale, and two hogfheads of fmall beer, that will keep all the year.

If you intend your ale to keep a great while, allow a pound of hops to every bushel; if to keep fix months, five pounds to a hogfhead; if for prefent drinking, three pounds to a hoghead, and the foftest and clearest water you can get ..

Observe the day before to have all your vessels very clean, and never use your tubs for any use, except to make wines.

Let your cafks be very clean the day before with boiling water :and if your bung is big enough, ferub them well with a little birehbroom or brush; but if they be very bad; take out the heads, and lep.

Ì

let them be fcrubbed clean with a hand-brush and fand and fullersearth. Put on the head again and fcald them well, throw into the barrel a piece of unflacked lime, and stop the bung close.

The first copper of water, when it boils, pour into your mash-tub, and let it be cool enough to fee your face in; then put in your malt, and let it be well mashed, have a copper of water boiling in the mean time, and when your malt is well mathed, fill your mathing-tub, ftir it well again, and cover it over with the facks. Let it stand three hours, then fet a broad shallow tub under the cock, let it run very foftly, and if it is thick throw it up again till it runs fine, then throw a handful of hops in the under tub, and let the mash run into it, and fill your tubs till all is run off. Have water boiling in the copper, and lay as much more on as you have occafion for, allowing one third for builing and wafte. Let that fland an hour, boiling more water to fill the math-tub for fmall beer; let the fire down a little, and put it into tubs enough to fill your mash. Let the fecond math be run off, and fill your copper with the first wort; put in part of your hops, and make it boil quick. About an hour is long enough; when it is half boiled, throw in a handful of falt. Have a clean white wand and dip it into the copper, and if the wort feels clammy, it is boiled enough; then flacken your fire, and take off your wort. Have ready a large tub, put two flicks a-crois and fet your ftraining-basket over the tub on the flicks, and ftrain your wort through it. Put your other wort on to boil with the reft of the hops; let your mash be still covered again with water, and thin your wort that is cooled in as many things as you can; for the thinner it lies, and the quicker it cools, the better. When quite cool, put it into the tunning-tub. Mind to throw a handful of falt into every boil. When the mash has ftood an hour draw it off, then fill your mash with cold water, take off the wort in the copper, and order it as before. When cool, add to it the first in the tub; so foon as you empty one copper, fill the other, fo boil your fmall beer well. Let the last mash run off, and when both are boiled with fresh hops, order them as the two first boilings; when cool, empty the mash-tub, and put the small beer to work there. When cool enough, work it, fet a wooden bowl of yeast in the beer, and it will work over with a little of the beer in the boil. Stir your tun up every twelve hours, let it stand two days, then tun it, taking off the yeaft. Fill your veffels full, and fave fome to fill your barrels; let it fland till it has done working, then lay on your bung lightly for a fortnight, after that stop it as close as you can. Mind you have a vent-peg at the top of the veffel in warm weather, open it; and if your drink hilles, as it often will, loofen it till it has done, then ftop it close again. If you can boil your ale in one boiling it is best, if your copper will allow of it; if not, boil it as conveniency ferves. The ftrength of your beer must be according to the malt you allow, more or lefs; there is no certain rule.

When you come to draw your beer, and find it is not fine, draw off a gallon, and fet it on the fire, with two ounces of ifinglafs cut fmall and beat. Diffolve it in the beer over the fire; when it is  $Q_2$  at

all melted, let it fand till it is cold, and pour it in at the bung, which must lay loose on till it has done fomenting, then ftop it close for a month.

Take great care your cafks are not mufty, or have any ill tafte : if they have, it is the hardeft thing in the world to fweeten them.

You are to wash your cashs with cold water before you feald them, and they should lie a day or two foaking, and clean them well, then feald them.

# The best Thing for Rope Beer.

Mix two handfuls of bean flour, and one handful of falt, throw, this into a kilderkin of beer, don't ftop it clofe till it has done fomenting, then let it ftand a month, and draw it off; but fometimese nothing will do with it.

#### When a Barrel of Beer is turned four.

To a kilderkin of beer throw in at the bung a quart of oatmeal, lay the bung on loofe two or three days, then flop it down clofe, and let it fland a month. Some throw in a piece of chalk as big as a turkey's egg, and when it has done working flop it clofe for a month, then tap it.

#### To make white Bread, after the London Way.

You must take a bushel of the finest flour well dressed, put it in the kneading-trough at one end ready to mix, take a gallon of water (which we call liquor) and fome yeaft; fir it into the liquor till it looks of a good brown colour and begins to curdle, itrain it and mix it with your flour till it is about the thickness of a good feed. cake; then cover it up with the lid of the trough, and let it fland three hours, and as foon as you fee it begin to fall, take a gallon more of liquor, and weigh three quarters of a pound of falt, and with your hand mix it well with the water : Strain it, and with this liquor make your dough of a moderate thickness, fit to make up into loaves; then cover it again with the lid, and let fland three hours more. In the mean time; put the wood into the oven and heat it. It will take two hours heating. When your fpunge has flood its proper time, clear the oven, and begin to make your bread. Set it in the oven and clofe it up, and three hours will just bake it. When once it is in, you must not open the oven till the bread is baked; and observe in fummer that your water be milkwarm, and in winter as hot as you can bear your finger in it.

Note, As to the exact quantity of liquor your dough will take, experience will teach you in two or three times making, for all flour does not want the fame quantity of liquor; and if you make any quantity, it will raife up the lid and run over, when it has flood its time.

#### To make French Bread.

TAKE three quarts of water, and one of milk; in winter fealding hot, in fummer a little more than milk-warm. Seafon it well, with falt, then take a pint and a half of good ale yeath not bitter; lay it in a gallon of water the night before, pour it off the water, flir in your yeaft into the milk and water, then with your hand break in a little more than a quarter of a pound of butter, work it well.

well till it is diffolved, then beat up two eggs in a bafon, and für them in, have about a peck and a half of four, mix it with your liquor; in winter make your dough pretty fliff, in fummer more flack; fo that you may use a little more or lets of flour, according to the fliffnefs of your dough; mix it well, but the lefs you work it the better. Make it into rolls, and have a very quick oven, but not to burn. When they have lain about a quarter of an hour turn them on the other fide, let them lye about a quarter longer, take them out and chip all your French bread with a knife, which is better than rafping it, and makes it look fpungy and of a fine yellow, whereas the rafping takes of all that fine colour, and makes it look too fmooth. You must für your liquor into the flour as you do for pye-cruit. After yeur dough is made cover it with a cloth,' and let it 4ye-to rife while the oven is heating.

#### To make Muffins and Oat-Cakes.

To a bufhel of Hertfordshire white flour, take a pint and a half of good Ale Yeaft, fome pale malt, if you can get it, because it is whitest; let the yeast lye in water all night, the next day pour off the water clear, make two gallons of water juit milk-warm, not to feald your yeaft, and two ounces of falt; mix your water, yeaft and falt woll together for about a quarter of an hour, then firain it and mix.up your dough as light as possible, and let it lye in your trough an hour to rife, then with your hand roll it, and pull it into little pieces about as big as a large walnut, roll them with your hand like a ball, lay them on your table, and as fail as you do them lay a piece of flannel over them, and be fure to keep your dough covered with flannel; when you have rolled out all your dough begin to bake the first, and by that time they will be fpread out in the right form; lay them on your iron, as one fide begins to change volour turn the other, and take great care they don't burn, or be too much difeoloured, but that you will be a judge of in two or three makings. Take care the middle of the iron is not too hot, as it will be, but then you may put a blickbat or two in the middle of the fire to flacken the heat. The thing you bake on mult be made thus:

Build a place just as if you was going to fet a copper, and in the flead of a copper, a piece of iron all over the top fixed in form just the fame as the bottom of an iron pot, and make your fire underneath with coal as in a copper. Observe, muffins are made the fame way; only this, when you pull them to pieces roll them in a good deal of flour, and with a rolling-pin roll them thin, cover them with a piece of flannel, and they will rife to a proper thickness; and if you find them too big or too little, you must roll dough accordingly. These mut not be the least difeoloured.

When you cat them, toalt them with a fork critp on both fides, then with your hand pull them open, and they will be like a honeycomb; lay in as much butter as you intend to ufe, then clap them together again, and fet it by the fire. When you think the butter is melted turn them, that both fides may be buttered alike, but don't touch them with the knife, either to fpread or cut them open, if

you

you do they will be as heavy as lead, only when they are quite buttered and done, you may cut them crofs with a knife.

Note, Some flour will foak up a quart or three pints more water than other flour, then you must add more water, or flake in more flour in the making up, for the dough must be as light as poffible.

#### A Receipt for making Bread without Barm, by the Help of a Leaven.

TAKE a lump of dough, about two pounds of your laft making, which has been ruled by barm, keep it by you in a wooden velfel, and cover it well with flour. This is your leaves; then the night before you intend to bake put the faid leaven to a peck of flour, and work them well together with warm water. Let it lie in a dry wooden veffel, well covered with a linen cloth and a blanket, and keep it in a warm place. This dough kept warm will rife again next morning, and will be fufficient to mix with two or three bufhels of flour, being worked up with warm water and a little falt. When it is well worked up, and thoroughly mixed with all the flour, let it be well covered with the linen and blanket, until you find it rife; then knead it well, and work it up into bricks or loaves, making the loaves broad, and not fo thick and high as is frequently done, by which means the bread will be better baked. Then bake your bread.

Always keep by you two or more pounds of the dough of your last baking, well covered with flour to make leaven to ferve from one baking day to another; the more leaven is put to the flour, the lighter and fpungier the bread will be. The fresher the leaven, the bread will be less four.

#### From the Dublin Society.

# A Method to preferve a large Stock of Yeaft, which will keep and be of Uje for feveral Months, either to make Bread or Cakes.

WHEN you have yeaft in plenty, take a quantity of it, ftir and work it well with a wifk until it becomes liquid and thin, then get a large wooden platter, cooler or tub, clean and dry, and with a foft brush, lay a thin layer of the yeast on the tub, and turn the mouth downwards that no dust may fall upon it, but so that the air may get under to dry it. When that coat is very dry, then lay on another coat and let it dry, and fo go on to put one coat upon another till you have a fufficient quantity, even two or three inches thick, to ferve for feveral months, always taking care the yeast in the tub be very dry before you lay more on. When you have occasion to make use of this yeast cut a piece off, and lay it in warm water; flir it together, and it will be fit for ufe. If it is for brewing, take a large handtul of birch tied together, and dip it into the yeast and hang it up to dry; take great care no dust comes to it, and fo you may do as many as you pleafe. When your beer is fit to fet to work, throw in one of these, and it will make it work as well as if you had fresh veast. You must whip it about in the wort, and then let it lye; when the fat works well, take out the broom and dry it again, it will do for the next brewing.

Note

Note, In the building of your oven for baking, observe that you make it round, low roofed, and a little mouth; then it will take lefs fire, and keep in the heat better than a long oven and high roof, and will bake the bread better.

Let it work twenty-four hours; then have ready a veffel iron-hooped, well painted, fixed in a place where the fun has full power, and fix it fo as not to have any occasion to move it. When you draw it off, then fill your veffel, lay a tile on the bung to keep the dust out. Make it in March, and it will be fit to use in June or July. Draw it off into little stone bottles the latter end of June or beginning of July, let it ftand till you want to use it, and it will never foul any more; but when you go to draw it off, and you find it is not four enough, let it ftand a month longer before you draw it off. For pickles to go abroad, use this vinegar alone; but in England you will be obliged, when you pickle, to put one half cold fpring water to it, and then it will be full four with this vinegar. You need not boil, unless you please, for almost any fort of pickles, it will keep them quite good. It will keep walnuts very fine without boiling, even to go to the Indies; but then don't put water to it. For green pickles, you may pour it fcalding hot on two or three times. ## A Sheep.

THE head and pluck; which includes the liver, lights, heart, weetbreads, and melt.

# The Fore-Quarter.

The neck, breast, and shoulder.

The Hind-Quarter.

The leg and loin. The two loins together is called a faddle of mutton, which is a fine joint when it is the little fat mutton.

A Calf.

THE head and inwards are the pluck; which contains the heart, liver, lights, nut and melt, and what they call the fkirts (which eat finely broiled) the throat fweetbread, and the windpipe fweetbread, which is the fineit.

The fore-quarter is the shoulder, neck, and breast.

The hind-quarter is the leg, which contains the knuckle and fillet, then the loin.

#### House Lamb.

THE head and pluck, that is the liver, lights, heart, nut and melt. Then there is the fry, which is the fweetbreads, lambstones and fkirts, with fome of the liver.

The fore-quarter is the shoulder, neck and breast together.

The hind-quarter the leg and loin. This is in high feafon at Christmas, but laits all the year.

Grafs Lamb comes in, in April or May, according to the feafon of the year, and holds good till the middle of August.

## A Hog.

THE head and inwards; and that is the haflet, which is the liver and crow, kidney and fkirts. It is mixed with a great deal of lage and fweet herbs, pepper, fult and fpice, fo rolled in the caul and roafted; then there are the chitterlins and the guts, which are oleaned for faufages.

The fore-quarter is the fore-loin and fpring ; if a large hog, you may cut a sparrib off.

The hind-quarter, only leg and loin.

A Bacon Hog.

THIS is cut different, becaufe of making ham, bacon and pickled pork. Here you have fine sparribs, chines and griskins, and fat for hog's-lard. The liver and crow is much admired fry'd with bacon; the feet and ears of both are equally good fouled.

Pork comes in featon at Bartholomew-tide, and holds good till Lady-day.

# How to chuse Butchers Meat.

#### To chuse Lamb.

In a fore-quarter of lamb, mind the neck vein; if it be an azure blue it is new and good, but if greenish or yellowish, it is mear tainting, if not tainted already. In the hinder-quarter, fmell under the kidney and try the knuckle; if you meet with a faint feent, and the knuckle be limber, it is itsle killed. For a lamb's head,

R 3

head, mind the eyes if they be funk or wrinkled, it is fale; if plump and lively, it is new and fweet.

246

#### Veal.

IF the bloody vein in the fhoulder looks blue, or a bright red. it is new killed; but if blackifh, greenifh, or yellowifh, it is flabby and ftale; if wrapped in wet cloths, fmell whether it be mufty or not. The loin first taints under the kidney, and the flefh, if ftale killed, will be foft and flimy.

The breat and neck taints first at the upper-end, and you will perceive fome dufky, yellow, or greenish appearance; the fweetbread on the breast will be clammy, otherwise its fresh and good. The leg is known to be new by the stitutes of the joint; if limber, and the flesh feems clammy, and has green or yellowish specks, 'sis stale. The head is known as the lamb's. The Flesh of a bull-calf is more red and firm that that of a cow-calf, and the fat more hard and curdled.

### Mutton.

If the nutton be young, the flefh will pinch tender; if old, it will wrinkle and re ain fo; if young, the fat will eafily part from the lean; if old, it will flick by itrings and fkins: If rammutton, the fat feels fpungy, the flefh clofe grained and tough, not rifing again, when dented by your finger; if ewe-mutton, the flefh is paler than weather-mutton, a clofer-grain, and eafily parting. If there be a rot, the flefh will be palifh, and the fat a faint whitifh, inclining to yellow, and the flefh be loofe at the bone. If you fqueeze it hard, fome drops of water will fland up like fiweat; as to newnefs and flalencis, the fame is to be obferved as by lamb.

#### Beef.

If it be right ox-beef, it will have an open grain; if young, a tender and oily finoothnefs; If rough and fpungy, it is old, or inclining to be fo, except neck, brifcuit, and fuch parts as are very fibrous, which in young meat will be more rough than in other parts. A carnation pleafant colour betokens good fpending meat, the fuet a curious white, yellowish is not fo good.

Cow-beef is lefs bound and clofer grained than the ox, the fat whiter, but the lean fomewhat paler; if young, the dent you make with your finger will rife again in a little time.

Bull-beef is of a clofer grain, a deep dufky red, tough in pinching, the fat fkinny, hard, and has a rammifh rank fmell; and for newnefs or stalenefs, this flesh bought fresh has but few figns, the more material is its clamminefs, and the rest your smell will inform you. If it be bruifed, these places will look more dufky or blackish than the rest.

#### Pork.

If it be young, the lean will break in pinching between your fingers, and if you nip the fkin with your nails, it will make a dent; also if the fat be fost and pulpy, in a manner like lard: If the lean be tough, and the fat flabby and fpungy, feeling rough,

iť

it is old; especially if the rhind be stubborn, and you cannot nip it with your nails.

If of a boar, though young, or of a hog, gelded at full growth, the flefh will be hard, tough, reddifh, and rammifh of fmell; the fat fkinny and hard; the fkin very thick and tough, and pinched up it will immediatly fall again.

As for old and new killed, try the legs, hands and fprings, by putting your fingers under the bone that comes out; for if it be tainted, you will there find it by finelling your finger; befides, the fkin will be fweaty and clammy when ftale, but cool and fmooth when new.

If you find little kernels in the fat or pork, like hail-fhot; if many, 'tis meafly, and dangerous to be eaten.

# How to chuse Brawn, Venison, Westphalia Hams, &c.

**B** R A W N is known to be old or young, by the extraordinary or moderate thickness of the rhind; the thick is old, the moderate is young. If the rhind and fat be very tender, it is not boar-brawn, but barrow or fow.

#### Venifon.

TRY the haunches or fhoulders under the bones that come out, with your finger or knife, and as the fcent is fweet or rank, it is new or ftale; and the like of the fides in the most flefhy parts: If tainted, they will look greenish in fome places, or more than ordinary black. Look on the hoofs, and if the clifts are very wide and tough, it is old; if clofe and finooth, it is young.

The Scafon for Venifon.

THE buck-venifon begins in May, and is in high feafon till All-Hallows-Day; the doe is in feafon from Michaelmas to the end of December, or fometimes to the end of January.

#### Westphalia Hams and English Bacon.

PUT a knife under the bone that flicks out of the ham, and if it come out in a manner clean, and has a curious flavour, it is fweet and good; if much fmeared and dulled, it is tainted or rufty.

English gammons are tried the fame way; and for other parts try the fat, if it be white, oily in feeling, and does not break or crumble, and the flesh flicks well to the bone and bears a good colour, it is good; but if the contrary, and the lean has some little streaks of yellow, it is rusty, or will some be fo.

#### Butter, Checfe, and Eggs.

WHEN you buy butter, truft not to that which will be given you to tafte, but try in the middle, and if your fmell and tafte be good, you cannot be deceived.

Cheefe is to be chofen by its moift and fmooth coat; if old cheefe be rough coated, rugged, or dry at top, beware of little worms or mittes. If it be over full of holes, moift or fpungy, it is fubject to maggots. If any foft or perifhed place appear on the

outfide, try how deep it goes, for the greater part may be hid within.

Eggs, hold the great end to your tongue; if it feels warm, be fure it is new; if cold, it is bad, and fo in proportion to the heat and cold, fo is the goodnefs of the egg. Another way to know a good egg is, to put the egg into a pan of cold water, the fresher the egg the fooner it will fall to the bottom; if rotten, it will fwim at the top. This is also a fure way not to be deceived. As to the keeping of them, pitch them all with the fmall end downwards in fine wood-ashes, turning them once a week endways, and they will keep fome months.

# How to chuse POULTRY.

To know whether & Capon is a true one, young or old, new or flale,

#### A Cock or Hen Furkey, Turkey Poults

If the the cock be young, his legs will be black and fmooth, and his fpurs fhort ; if stale, his eyes will be funk in his head, and the feet dry; if new, the eyes lively and feet limber. Obferva the like by the hen, and moreover if the be with egg, the will have a fort open vent ; if not, a hard close vent. Turkey poults are known the fame Way, and their age cannot deceive you.

#### A Cock, Hen, Gc.

If young his fpurs are fort and dubbed, but take particular notice they are not pared or fcraped : If old, he will have an open vent ;

#### A Tame Goose, Wild Goose, Bran Goose.

#### Heath Cock and Hen.

IF young, they have fmooth legs and bills; and if old, rough. For the reft are known as the foregoing.

#### Partridge, Cock or Hen.

The bill white and the legs bluish, shew age; for if young, the bill is black and legs yellowish; if new, fatt vent; if itale, a green and open one. If their crops be full, and they have fed on green wheat, they may taint there; and for this imell in their mouth.

#### Woodcock and Snipe.

THE woodcock, if fat, is thick and hard; if new, limber footed; when stale, dry footed; or if their noses are snotty, and their throats muddy and moorish, they are nought. A since, if fat, has a fat vent in the side under the wing, and in the vent feels thick; for the rest like the woodcock.

#### Doves and Pigeons.

To know the turtle dove, look for the bluish ring round his neck, and the rest mostly white: The stock dove is bigger; and the ring dove is less than the stock dove. The dove-house pigeons, when old, are red legged; if new and fat, they will seel full and fat in the vent, and are limber footed; but if stale, a flabby and green vent,

And

And thus of green or grey plovers, felfare, blackbird, thrush, larks, &c.

#### Of Hare, Leveret, and Rabbit.

To know a true leveret, feel on the fore-leg near the foot, and if there be a small bone or knob it is right, it not, it is a hare: For the rest observe as in a hare. A rabbit, if stale, will be limber and flimy, if new, white and fiff; if old, her claws are very long and rough, the wool mottled with grey hairs; if young, the claws and wool fmooth.

# A certain Cure for the Bite of a Mad Dog.

ET the patient be blooded at the arm nine or ten ounces. Take of the herb, called in Latin, *lichen cinercus terrefiris*; in English, ash-coloured ground liverwort, cleaned and dried and powdered, half and ounce; of black pepper powdered, two drachms drachms. Mix thefe well together, and divide the powder into four dofes; one of which muit be taken every morning failing, for four mornings fucceffively in half a pint of cow's milk warm. After thefe four dofes are taken, the patient must go into the cold bath or a cold fpring, or river every morning failing for a month. He must be dipt all over, but not stay in (with his head above water) longer than half a minute, if the water be very cold. After this he must go in three times a week for a fortnight longer.

N. B. The lichen is a very common herb, and grows generally in fandy and barren foils all over England. The right time to gather it, is in the months of October and November.

Dr. MEAD.

## Another for the Bite of a Mad Dog.

For the bite of a mad dog, either man or beaft: Take fix ounces of rue clean picked and bruifed, four ounces of garlick peeled and bruifed, four ounces of Venice treacle, and four ounces of filed pewter, or fcraped tin. Boil thefe in two quarts of the beft ale, in a pan covered clofe over a gentle fire, for the fpace of an hour, then ftrain the ingredients from the liquor. Give eight or nine fpoonfuls of it warm to a man, or a woman, three mornings failing. Eight or nine fpoonfuls is fufficient for the ftrongeft; a leffer quantity to thofe younger, or of a weaker conflitution, as you may judge of their ftrength. Ten or twelve fpoonfuls for a horfe, or a bullock; three, four, or five to a fheep, hog, or dog. This muft be given within nine days after the bite; it feldom fails in man or beaft. If you can conveniently bind fome of the ingredients on the wound, it will be fo much the better.

#### Receipt against the Plague.

TAKE of rue, fage, mint, rofemary, wormwood and lavender, a handful of each ; infuse them together in a gallon of white wine vinegar, put the whole into a ftone-pot clofely covered up, upon warm wood ashes for four days: After which draw off (or strain through fine flannel) the liquid, and put it into bottles well corked; and into every quart bottle, put a quarter of an ounce of camphire. With this preparation wash your mouth, and rub your loins and your temples every day; fnuff a little up your nostrils when you go into the air, and carry about you a bit of fponge dipped in the fame, in order to finell to upon all occafions, especially when you are near any place or person that is infected. They write, that four malefactors (who had robbed the infefted houses, and murdered the people during the course of the plague) owned, when they came to the gallows, that they had preferved themselves from the contagion, by using the above medicine only; and that they went the whole time from house to house, without any fear of the diftemper.

#### How to keep clear from Buggs.

- FIRST take out of your room all filver and gold lace, then fer the chairs about the room, flut up your windows and doors, tack a blanket over each window, and before the chimney, and over the

the doors of the room, fet open all clofets and cupboard doors, all your draws and boxes, hang the reft of your bedding on the chair-backs, lay the feather-bed on a table, then fet a large broad earthen pan in the middle of the room, and in that fet a chafing-difh that itands on feet, full of charcoal well lighted. If your room is very bad, a pound of rolled brimitone; if only a iew, half a pound. Lay it on the charcoal, and get out of the room as as quick as possible, or it will take away your breath. Shut your door close, with the blanket over it, and be fure to fet it fo as nothing can catch fire. If you have any India pepper, throw in with the brimstone. You must take care to have the door open whilst you lay in the brimstone, that you may get out as foon as possible. Don't open the door under fix hours, and then you must be very careful how you go in to open the windows : therefore let the doors stand open an hour before you open the windows. Then brush and sweep your room very clean, wash it well with boiling lee, or boiling water, with a little unflacked lime in it, get a pint of spirits of wine, a pint of spirit of turpentine, and an ounce of camphire; shake all well together, and with a bunch of feathers wash your bedstead very well, and fprinkle the reft over the feather-bed, and about the wainfcot and room.

It you find great fwarms about the room, and fome not dead, do this over again, and you will be quite clear. Every fpring and fall, wash your bedstead with half a pint, and you will never have a bugg; but if you find any come in with new goods, or box, &c. only wash your bedstead, and fprinkle all over your bedding and bed, and you will be clear; but be fure to do it as foon as you find one. If your room is very bad, it will be well to paint the room after the brimstone is burnt in it.

This never fails, if rightly done.

#### An effectual Way to clear the Bedflead of Buggs.

TAKE quickfilver and mix it well in a mortar with the white of an egg-till the quickfilver is all well mixt, and there is no blubbers; then beat up fome white of an egg very fine, and mix with the quickfilver till it is like a fine ointment, then with a feather anoint the bediftead all over in every creek, and corner, and about the lacing and binding, where you think there is any. Do this two or three times, and it is a certain cure, and will not fpoil any thing.

#### Directions to the House-Maid.

ALWAYS when you fweep a room, throw a little wet fand all over it, and that will gather up all the flew and duft, prevents it from rifing, cleans the boards, and faves the bedding, pictures, and all other furniture from duft and dirt.

# To drefs a Turtle, the West-India Way.

AKE the turtle out of the water the night before you intend to drefs it, and lay it on its back in the morning, cut its throat or the head off, and let it bleed well ; then cut off the fins, fcald, fcale and trim them with the head, then raife the callepy (which is the belly or under fhell) clean off, leaving to it as much meat as you conveniently can; then take from the back shell all the meat and intrails, except the monfieur, which is the fat and looks green, that must be baked to and with the shell; wash all clean with falt and water, and cut it in pieces of a moderate fize, taking from it the bones, and put them with the fins and headin a foup-pot, with a gallon of water, fome fait, and two blades of When it boils, fcum it clean, then put in a bunch of mace. thyme, parfley, favoury and young onions, and your veal part, except about one pound and a half, which must be made forcemeat of, as for Scotch collops, adding a little Cayan pepper; when the yeal has boiled in the foup about an hour, take it out and cut it in pieces, and put to the other part. The guts (which is reckoned the best part) must be split open, scraped and made clean, and cut in pieces about two inches long. The paunch or maw must be scalded and skinned, and cut as the other parts, the fize you think proper; then put them with the guts and other parts, except the liver, with half a pound of good fresh butter, a few shalots, a bunch of thyme, parsley, and a little favoury, feafon'd with falt, white pepper, mace, three or four cloves beaten, a little Cayan pepper, and take care not to put too much ; then let it flew about half an hour over a good charcoal fire, and put in a pint and a half of Madeira wine and as much of the broth as will cover it, and let it flew till tender. It will take four or five hours doing. When almost enough, foum it, and thicken it with flour, mixt with fome veal broth, about the thickness of a fricafey. Let your force-meat balls be fry'd about the fize of a walnut, and be flew'd about half an hour with the reft; if any eggs, let them be boiled and cleaned as you do knots of pullets eggs, and if none, get twelve or fourteen yolks of hard eggs; then put the flew (which is called the callepash) into the back-shell, with the eggs all over, and put it in the oven to brown, or do it with a falamander.

The callepy must be flashed in feveral places, and moderately feason'd, with pieces of butter, mixt with chopp'd thyme, parfley and young onions, with falt, white pepper and mace beaten, and a little Cayan pepper; put a piece in each flash, and then fome over, and a dust of flour; then bake it in a tin or iron dripping pan, in a brick oven.

S

The

The back fhell (which is called the callepath) must be feafoned as the callepy, and baked in a dripping-pan, fet upright, with four brickbats or any thing elfe. An hour and a half will bake it, which must be done before the flew is put in.

The fins, when boiled very tender, to be taken out of the foup, and put in a flew-pan, with fome good veal gravy, not high coloured, a little Madeira wine, feafoned and thickened as the callepafh, and ferved in a difh by itfelf.

The lights, heart and liver may be done the fame way, only a little higher feasoned; or the lights and hearts may be flewed with the callepath, and taken out before you put it in the fhell, with a little of the fauce, adding a little more feasoning, and difh it by itfelf.

The veal part may be made friandos, or Scotch collops of. The liver fhould never be flewed with the callepafh, but always dreft by itfelf, after any manner you like; except you feparate the lights and hearts from the callepafh, and then always ferve them together in one difh. Take care to flrain the foup, and ferve it in a tureen, or clean china bowl.

#### Diftes.

#### A callepy.

# Lights, &c.-foup-fins.

# Callepafh.

N. B. In the West-Indies they generally fouse the fins, and eat them cold; omit the liver, and only fend to table the callepy, callepash and soup. This is for a turtle, about fixty pounds weight.

#### To make Ice Cream.

TAKE two pewter bafons, one larger than the other; the inward one must have a close cover, into which you are to put your cream, and mix it with rafberries or whatever you like beit, to give it a flavour and a colour. Sweeten it to your palate; then cover it close, and fet it into the large bafon. Fill it with ice, and a handful of falt; let it frand in this ice three quarters of an hour, then uncover it, and fir the cream well together; cover it close again, and let it frand half an hour longer, after that turn it into your plate. These things are made at the pewterers.

#### A Turkey, &c. in Jelly.

Boil a turkey or fowl as white as you can, let it fland till cold, and have ready a jelly made thus : take a fowl, fkin it, take off all the fat, don't cut it to pieces, nor break the bones; take four pounds of leg of veal, without any fat or fkin, put it into a well tinned fauce-pan, put to it full three quarts of water, fet it on a very clear fire till it begins to fimmer; be fure to fkim it well, but take great care it don't boil. When it is well fkimmed, fet it fo as it will but juft feem to fimmer, put to it two large blades of mace, half a nutmeg, and twenty corns of white pepper, a little bit of lemon-peel as big as a fix-pence. This will take fix or feven hours doing. When you think it is a fliff jelly, which you with

ž;8

will know by taking a little out to cool, be fure to fkim off all the fat, if any, and be fure not to flir the meat in the fauce-pan. A quarter of an hour before it is done, throw in a large tea-fpoonful of falt, fqueeze in the juice of half a Seville orange or lemon; when you think it is enough, firain it off through a clean fieve, but don't pour it off quite to the bottom, for fear of fettlings. Lay the turkey or fowl in the difn you intend to fend it to table in, then pour this liquor over it, let it fland till quite cold, and fend it to table. A few aftertian flowers fluck here and there looks preity, if you can get them; but lemon, and all thofe things are entirely fancy. This is a very pretty difn for a cold collation, or a fupper.

All forts of birds or fowls may be done this way.

#### To make Citron.

QUARTER your melon and take out all the infide, then put it into the fyrup as much as will cover the coat; let it boil in the fyrup till the coat is as tender as the inward part, then put them in the pot with as much fyrup as will cover them. Let them ftand for two or three days, that the fyrup may penetrate through them, and boil your fyrup to a candy height, with as much mountain wine as will wet your fyrup, clarify it and then boil it to a candy height; then dip in the quarters, and lay them on a fieve to dry, and fet them before a flow fire, or put them in a flow oven till dry. Obferve that your melon is but half ripe, and when they are dry put them in deal boxes in paper.

#### To candy Gberries or Green Gages.

DIP the flaks and leaves in white wine vinegar boiling, then fcald them in fyrup; take them out and boil them to a candy height; dip in the cherries, and hang them to dry with the cherries downwards. Dry them before the fire, or in the fun. Then take the plumbs, after boiling in the thin fyrup, peel off the fkin and candy them, and fo hang them up to dry.

#### To take Ironmolds out of Lingn.

TAKE forrel, bruife it well in a mortar, fqueeze it through a cloth, bottle it and keep it for use. Take a little of the above juice, in a filver or tin fauce-pan, boil it over a lamp, as it boils dip in the ironmold, don't rub it, but only fqueeze it. As foon as the iron mold is out, throw it into cold water.

#### To make India Pickle.

To a gallon of vinegar, one pound of garlick, add three quarters of a pound of long pepper, a pint of muftard-feed, one pound of ginger, and two ounces of turmerick; the garlick muft be laid in falt three days, then wiped clean and dried in the fun; the long pepper broke, and the muftard-feed bruifed: mix all together in the vinegar, then take two large hard cabbages, and two cauliflowers, cut them in quarters, and falt them well; let them lie three days, and then dry them well in the fun.

N. B. The ginger must lie twenty-four hours in falt and water, then cut small and laid in falt three days.

### To make English Catchup.

TAKE the largest flaps of mushrooms, wipe them dry, but don't peel them, break them to pieces, and falt them very well; let them stand fo in an earthen pan for nine days, firring them once or twice a day, then put them into a jugg close flopped set into water over a fire for three hours; then strain it through a fieve, and to every quart of the juice, put a pint of strong stale mummy beer, not bitter, a quarter of a pound of anchovies, a quarter of an ounce of mace, the stame of cloves, half an ounce of pepper, a race of ginger, half a pound of stale stated, keeping the pot close covered; then strain it through a flannel bag. ## Observations on preferving Salt Meat mellow and fine for three or four Months; and to preferve potted Butter.

**7HEN** you falt your meat in the fummer, take care that it be perfectly cool after it comes from the butchers; the best way is, to lay it on cold bricks for a few hours, and when you falt it, lay it up on an inclining board, to drain off the blood; then falt it a-fresh, add to every pound of falt half a pound of Lisbon fugar, and turn it in the pickle every day; it will be fine at the month's end: the falt which is commonly used, hardens and fpoils all the meat; the right fort is that called Lowndes's falt; it comes from Nantwich in Cheshire : a very fine fort also comes from Malden in Effex, and from Suffolk, which is the reason of that butter being finer than any other; and if every body would make use of that falt in potting butter, we should not have fo much bad come to market; observing all the general rules of a dairy. If you keep your meat long in falt, half the quantity of fugar will do; and if you then beflow loaf fugar, it will eat much finer. This pickle cannot be called extravagant, because it will keep a great while ; at three or four months end, boil it up ; if you have no meat in the pickle, skim it, and when cold, only add a little more falt and fugar to the next meat you put in, and ir will be good a twelvemonth longer.

A leg of mutton piece, veiny or thick flank-piece, without any bone, pickled as above is very fine, only add to every pound of falt an ounce of fast-petre ; after being a month or two in the pickle, take it out, and lay it in foft water a few hours, then roaft it. A leg of mutton, or fhoulder of veal does the fame. It is a very good article where a market is at a great distance, and a large family obliged to provide a great deal of meat.

Concerning the pickling of hams and tongues, you have the receipt in the foregoing chapters ; but use either of these fine falts. and they will be equal to any Bayonne hams, provided your porkling is fine and well fed.

#### To dress a Mock Turtle.

Having provided a calf's-head, scald off the hair, as you would do off a pig; then clean it, cut off the horny part in thin flices, with as little of the lean as poffible ; put in a few chopp'd oysters, and

S ∡

and the brains; have ready between a quart and three pints of ftrong mutton or veal gravy, with a quart of Madeira wine, a large tea fpoonful of Cayan pepper, a large onion chopped very fmall; peel off half of a large lemon, fhred as fine as poffible, a little falt, the juice of four lemons, and fome fweet-herbs cut fmall; ftew all their together till the meat is very tender, which will be in about an hour and a half; and then have ready the back fhell of a turtle, lined with a pafte of flour and water, which you muft first fet into the oven to harden; then put in the ingredients, and fet into the oven to brown the top; and when that is done, fuit your garnifh at the top with the yolks of eggs boiled hard, and force-meat balls.

This receipt is intended for a large head; if you cannot get the fhell of a turtle, a china-foup difh will do as well; and if no oven is at hand, the fetting may be omitted; and if no oyfters are to be procured, it is very good without.

It is fometimes dreffed with but a pint of wine, and the juice of two lemons.

After the horny part is boiled a little tender, put in your white meat.

It will do without the oven, and take a fine knuckle of veal, cut off the fkin, and cut fome of the fine firm lean into fmall pieces, as you do the white meat of a turtle, and flew it with the other white meat above.

Take the firm hard fat which grows between the meat, and lay that into the fauce of fpinach or forrel, till half an hour before the above is ready; then take it out, and lay it on a fieve to drain; and put in juice to flew with the above. The remainder of the knuckle will help the gravy.

#### To flew a Buttock of Beef.

AFTER the beef is foaked, wash it clean from falt, and let it lie about an hour in foft water; then take it out, and put it into your pot, as you would to boil, but put no water in, cover it close with the lid, and let it stand over a middling fire, not fierce, but rather flow: it will require just the fame time to do, as if it was to be boiled; when it is about half done, throw in an onion, a little bundle of fweet-herbs, a little mace and whole pepper; cover it down quick again; boil roots and herbs as usual to eat with it. Send it to table with the gravy in a difh.

#### The fews Method of Stewing Green Peafe.

To about two full quarts of peale put in a quarter of a pint of oil and water, not fo much water as oil; a little different fort of fpices, as mace, cloves, pepper and nutmeg, all beat fine; a little Cayan pepper, a little fait; ftew all this in a broad flat pipkin; when they are half done, with a fpoon make two or three holes; into each of these holes break an egg, yolk and white; take one egg and heat it, and throw over the whole when enough, which you you will know by tasting them; and the egg being quite hard, fend them to table.

If they are not done in a very broad, open thing, it will be difficult to get them out to lay in a difh.

They would be better done in a filver or tin difh, on a flewhole, and go to table in the fame difh; it is much better than putting them out into another difh.

#### Minced Hadaicks after the Dutch way.

Boil them, take out all the bones, mince them very fine with parfley and onions; feafon with nutmeg, pepper and falt, and flew them in butter, just enough to keep moist, squeeze the juice of a lemon, and when cold, mix them up with eggs, and put into a puff paste.

#### Onton Soup, the Spanifs way.

PEEL and flice two large Spanish onions, let them boil very fostly in half a pint of fweet oil till the onions are very fost; then pour on them three pints of boiling water; feason with beaten pepper, falt, a little beaten clove and mace, two spoonfuls of vinegar, a handful of parsley washed clean, and chopped fine: let it boil fast a quarter of an hour; in the mean time, get fome fippets to cover the bottom of the dish, fried quick, not hard; lay them in a dish, and cover each fippet with a poached egg; beat up the yolks of two eggs, and throw over them; pour in your foup, and fend it to table.

Garlick and forrel done the fame way, eats very well.

#### A Spanifb Peafe Soup.

LAY one pound of Spanish pease in water the night before you use them; then take a gallon of water, one quart of fine fweet oil, a head of garlick; cover the put close, and let it boil till

thç

#### Fifs Paffies the Kakan way.

KNEAD your flour with oil; take a flice of falmon, feafon it with pepper and falt, and dip into fweet oil, chop onion and parfley fine, and firew over it; lay it in the pafte, and double it up in the fhape of a flice of falmon: oil a piece of white paper, and lay it under the pafty, and bake it; it is beft cold, and will keep a month.

Mackrel done the fame manner; head and tail together folded in a pafty, is a fine difh.

## Red Cabbage after the Dutch way, good for a Cold in the Breaft.

Cut the cabbage fmall, and boil it foft, then drain it, and put it in a flew-pan, with a proper quantity of oil and butter, a little water and vinegar, and an onion cut fmall; feafon it with pepper and falt, and let it fimmer on a flow fire, till all the liquor is wafted.

## Afparagus the Spanifs way.

BREAK your afparagus in pieces, then boil them foft, and drain the water from them : take a little oil, water and vinegar, let it boil, feafon it with pepper and falt, throw in the afparagus, and thicken with yolks of eggs.

#### Beans the German way.

PEEL and flice a large bunch of onions, take a great quantity of parfley washed and cut small, throw them into a flew-pan, with a pound of butter; feason them well with pepper and falt, put in two quarts of beans; cover them close, and let them do till the beans are brown, shaking the pan frequently. Peake may be done the fame way.

#### To dry Lettuce-falks, Artichoke-falks, or Cabbage-falks.

PEEL the falks to the pith, and put the pith in a firong brine three or four days; then take them out of the brine, boil them in water very tender, then dry them with a cloth, and put them into as much clarified fugar as will cover them, and fo preferve them as you do oranges; then take them and fet them to drain : then take fresh fugar, and boil it to the height; take them out and dry them.

They will keep good a twelvemonth and are to be eat cold with oil and vinegar : they will go good to to the East-Indies. All forts of fish fried well in oil, eat very fine cold with shalot, or oil and vinegar. Observe, in the pickling of your filh, to have the pickle ready : first put a little pickle in ; then a layer of fifli; then pickle; then a little fifli, and fo lay them down very close, and to be well covered ; put a little faffron in the pickle. Frying fifth in common oil is not to expensive with care; for prefent use a little does; and if the cook is careful not to burn the oil, or black it, it will fry them two or three times.

## The Manner of dreffing various Sorts of dried Fish; as Stock-fish, Salmon, Cod, Whitings, &c.

#### The general Rule for fleeping of dried Fish, the Stock-fish excepted.

ALL kinds of fifh, except flock-fifh, are falted, or either dried in the fun, as the most common way, or in prepared kilns, or by the fmoke of wood fires in chimney corners; and in either cafe require the being foftened and freshened in proportion to their bulk, their nature or drymels; the very dry fort, as, codsifh; bacalo, or whiting, and fuch like, should be steeped in luke-warm milk and water; the steeping kept as near as possible

U3

to an equal degree of heat. The larger fifh fhould be fleeped twelve, the fmall, as whiting, &c. about two hours. The cod are therefore laid to steep in the evening, the whitings, &c. in morning before they are to be dreffed; after the time of fteeping. they are to be taken out, and hung up by the tails until they are drefled : the reason of hanging them up is, that they foften equally as in the fleeping, without extracting too much of the relifh, which would make them infipid; when thus prepared, the fmall fifh, as whiting, tufk, and fuch like, are flowered and laid on the gridiron; and when a little hardened on the one fide. must be turned and basted with oil upon a feather; and when bailed on both fides, and well hot through, taken up, always obferving, that as fweet oil fupples, and fupplies the fifth with a kind of artificial juices, fo the fire draws out those juices and hardens them; therefore be careful not to let them broil too long; no time can be preferibed, because of the difference of fires, and the fizes of the fifh. A clear charcoal fire is much the best, and the fish kept at a good distance to broil gradually : the best way to know when they are enough is, they will swell a little in the bailing, and you must not let them fall again.

The fauces are the fame as usual to falt-fifh, and garnish with oysters fried in batter

For a supper, for those that love sweet oil, the best fauce is oil, vinegar, and mustard beat up to a confistence, and ferved up in faucers.

It boiled as the great fifth ufually are, it fhould be in milk and water, but not to properly boiled as kept just fimmering over an equal fire; in which way, half an hour will do the largeft fifth, and five minutes the finalleft. Some broil both forts after fimmering, and fome pick them to pieces, and then tofs them up in a pan with fried onlons and apples.

They are either way very good, and the choice depends on the weak or firong flomach of the eaters.

#### Dried Salmon must be differently managed.

DRIED falmon though a large fifh, does not require mora fteeping than a whiting; and when laid on the gridiron, fhould be moderately peppered.

#### The dried Herring.

INSTEAD of milk and water, fhould be fteeped the like time as the whiting, in finall beer; and to which, as to all kind of broiled falt-fifh, tweet oil will always be found the best basting, and no way affect even the delicacy of those who do not love oil.

#### Stock Fift,

ARE very different from those we have just mentioned; they being dried in the frost without falt, are in their kind very infipid and are only eatable by the ingredients that make them fo, and the art of cookery; they should be first beat with a fledge hammer on an iron anvil, or on a very folid smooth oaken block; and when reduced almost to atoms, the skin and bones taken away, and the remainder of the fifth steeped in milk and warm water

water until very foft; then strained out, and put into a foupdifh with new milk, powdered cinnamon, mace, and nutmeg; the chief part cinnamon, a paste round the edge of the dish, and put in a temperate oven to fimmer for about an hour, and then ferved up in the place of pudding.

N. B. The inhabitants of Italy eat the kin boiled, either hot or cold, and most usually with oil and vinegar, preferring the fkin to the body of the fifth.

### The Way of curing Mackrel.

GET fome fresh mackrel, split them down the backs, open them flat : take out the guts, and wash them very clean from the blood, hang them up by the tails to drain well; do this in the cool of the evening, or in a very cool place; firew falt at the bottom of the pan, fprinkle the fifh well with clean falt, lay them in the pan, belly to belly, and back to back; let them lie in the falt above twelve hours, wash the falt clean off in the pickle, hang them again up by the tails half an hour to drain ; pepper the infides moderately, and lay them to dry on inclining ftones facing the fun; never leaving them out when the fun is off, nor lay them out before the fun has dispersed the dews, and the stones you lay them on be dry and warm. A week's time of fine weather perfectly cures them; when cured, hang them up by the tails, belly to belly, in a very dry place, but not in feacoal fmoak, as it will fpoil their flavour.

#### To dress cured Mackrel.

FRY them in boiling oil, and lay them to drain, or broil them before, or on a very clear fire : in the latter cafe, baste them with oil and a feather; fauce will be very little wanting, as they will be very moift and mellow, if good in kind; otherwife you may use melted butter and crimped parsley.

#### To pickle a Buttock of Beef.
