PREFACE.

Or the two original works forming the subject of the present volume, and of which an English translation is now for the first time submitted to the public, the Miut Amil or that comprising the text, contains a brief but comprehensive view of the first division of Arabic Syntax, or of that part, which treats of the government exercised by nouns, verbs and particles. The second, or Shuri, is a commentary on the former, and illustrates by a more minute and detailed analysis, the various rules recorded in the text, and the general acceptations of the several governing powers.

The first Book is entitled MIUT AMIL, or the HUNDRED GOVERNING POWERS, because the Author has contrived to reduce to that precise number, the whole of those powers in Arabic construction, which are found to affect the terminations of nouns and verbs. A synopsis of this system may be seen in the commencement of the work, and a brief explanation of its leading divisions will be found in the concluding remarks to the translation; it is unnecessary therefore to enter into any further detail, and I shall merely observe of the title, that although it appears in some degree affected, and is not I imagine altogether strictly correct, yet the general design of the treatise, displays so much skill and ingenuity, and combines at the same time so many excellencies of brevity, order, perspicuity and precision, that it may be fairly considered, on the whole, as the most judicious compendium of Arabic regimen, that has yet appeared in the language.

Those indeed who are fond of simple abstracts of science, will have no reason to complain of the length or difficulty of the Miut Amil. It contains in something less than five quarto pages, the most important department of Arabic Syntax, and is almost entirely free from those little verbal quibbles and philological fopperies, which tend more or less to disgrace almost every work on Arabic grammar. The title to be sure carries with it an appearance of superfluous exactness, and some little grammatical finesse will no doubt be discovered in the author's mode of supporting it,* but this is too petty an objection to merit any remark, it is in truth a mere systematic capriccio: a solitary particle out of the great arabian desert of metaphysical refinement, where subtilities.

Swarm populous, un-numbered as the sands, Of Barca or Cyrene's torrid soil.

^{*} His method is as follows. He divides regimen into two general classes or departments. termed verbal and absolute. By the first is simply understood the effect that one word has upon the termination of another. By the second is meant that specific mark of case assumed by a noun when used absolutely as the nominative to a sentence. The government in the first instance is termed verbal, because, the change of termination is occasioned by some word either expressed or understood. In the second it is called absolute, because the word thus governed is considered independent of all verbal agency, and acquires this peculiar form of construction from its nominative situation alone. Verbal government he then subdivides into two distinct classes. The first, comprehends ninety-one specific words, which are termed from their nature, Prescriptive governors. The second, contains seven distinct classes of words, such as verbs, adjectives, participles, infinitives &c. &c. each of which necessarily includes all the words of its own species, and each of these classes he considers numerically as one, and terms the whole Analogous governors; here then are all the verbal governors in the language reduced to ninety-eight, viz. ninety-one in the prescriptive, and seven in the analogous class, to which if we add two in the absolute, we shall have an exact centenary of governing powers.

I know not well what the votaries of the eastern oracles will say to this comparison. I fear they will rise indignant against me for venturing an expression that may tend to degrade the literary eminence of the Arabs: but this is not my intention: I would rather support than lessen their importance. I consider myself in some measure as one of their disciples, and certainly feel respect for their language and literature. But although I freely acknowledge their merits, I will not acknowledge the infallibility of their doctrines, nor voluntarily subscribe to all their grammatical dogmas; their superlunar speculations; their metaphysical distinctions 'twixt south and south-west side;' and the whole host of fallacies and fictions, with which they perplex and embarrass the most simple subjects of literature. Undoubtedly their works discover both genius and learning, and in the minute cultivation of many sciences, particularly grammar and rhetoric, it may be doubted whether they have been surpassed by the learned of any other nation, but their literary affectation by disfiguring their works, diminishes in a considerable degree the real merit of their labours, and throws so many unnecessary impediments in the way of the student, that it is not very surprising we should find them almost entirely neglected.

One specimen of their solemn mode of trifling in literary works may be worth inserting. The Author of the grammatical treatise termed the Kafeea, for some reason best known to himself, neglected to prefix to his grammar the usual auspicatory formula of praise to the deity, the omission of which is considered by the sober Moosulmans as a serious mark of impiety. It was therefore necessary to defend this omission, and accordingly his commentator Moolla Jamee, in the true spirit of casuistical sophistry, settles the point of conscience as follows: "It is observable, 'says he' that the Author

Shuckh Ibnool Hajib, has not commenced his work with the prescribed ceremonial of praise to the deity. This omission however must not be attributed to negligence or contumely—'then to what must it be attributed?' why, to a proper sense of modest humility to be sure, which led him to depreciate his own merit as a grammarian, in comparison with those who preceded him, (the grace of God be upon them!) and consequently he thought himself unworthy to imitate their works in any respect! but although, continues the commentator, he has omitted the actual insertion of the words, it cannot therefore be inferred, that in direct opposition to the positive injunction of the sacred ritual, he has neglected the ceremony altogether. 'Oh no!—that would be an unreasonable and unnecessary supposition,' particularly as we know 'adds he,' that it is not restricted to verbal forms alone, but may be virtually discharged in secret, mental aspirations!' Now this is considered a very conclusive piece of reasoning, and completely exculpates the grammarian from all manner of censure.*

In speculations of this nature the Arabian grammarians seem to take peculiar delight. One third of the commentary on the Kafeea by Moolla Jamee, consists of subtilties and sophisms, which have very often no more connexion with the science of grammar, than with the science of palmistry. Every trifle gives occasion for an episode, and every episode is 'conglutinated or made up' + of as much recondite crudition, as the learned commentator can well muster together. After defining a word, he ascends synthetically to language as a compound, which comprises he says the language of Gon, of man, of angels, and

of Genii.* Lest any one however should be puzzled to find out the true nature of this latter dialect, a learned scholiast comes forward with a specimen, + and another gravely adds, as an infallible proof of its demoniac originality, that no human being can pronounce it three times successively at one breathing.

Through this commentary however, this xásqua μέγα of syntax, or some other, of equally 'crude consistence,' every student is obliged to 'swim, or sink, or wade, or creep, or fly,' who would aspire to any thing

It is also given in the *Tulkhees-ool-Miftah*, a treatise on Arabic Rhetoric, as a specimen of verbal harshness, and is supposed to have been uttered by a Jin after having killed a traveller in the Arabian desert, whose name was Hurb. It turns out however to be very intelligible Arabic, though in—

like literary distinction. Moolla Jamee is indeed the Priscian of the East, and his comment is considered the very ne plus ultrà of grammatical knowledge. Not to have read it, argues absolute ignorance; read it, and you are dubbed at once a Moolla, and a man of learning: such is the wonder-working efficacy of Arabic grammar. It supercedes in a great degree the knowledge of every other art, and every other science, being in fact, if we may credit some of the learned Arabian doctors, the very essence of all the arts and sciences.

But grammar after all in its obvious and natural sense, is truly a simple art, the art of teaching the rules of inflexion and syntax, or the various relations of words to one another in discourse. The rules necessary for this knowledge are neither very numerous nor difficult, and perhaps not more so in Arabic than in other languages, but the Arabian philologists by blending them with the abstract speculations of logic, have effected a new and complex system of grammar, a system which comprises not merely the various relations, but the exact significations and definitions of words; their divisions into genera or classes; their combinations into propositions, and these again into reasoning or dicourse. Now all this is the proper business of logic, which is surely a distinct science, yet all this they have in some measure confounded with the simple rules of government and concord, so that a student looking into their works for a plain rule of syntax, finds himself entangled in all the mysteries of metaphysics.

for There are some men, says Johnson, who seem to think nothing so much the characteristic of genius, as to do common things in an uncommon manner, like *Hudibras*, to tell the clock by algebra, or like the lady in Dr. Young's Satires, to drink tea by stratagem; to quit the beaten track only because it is known, and take a new path, however crooked

the case with the Arabian grammarians: they are always employed in raising straws with levers, in illustrating what cannot be misunderstood, in devising difficulties where none ever existed, and in perplexing the simplest rules of regimen and concord with useless subtilties and logical definitions: but if grammar be a particular art, what has it to do with general and abstract speculations? A disquisition on symbols and conventional signs, or the origin of general terms,* will not facilitate a student's progress in the laws of syntax. These may be important enquiries, but they are not the more so, because conducted in Arabic: they have in truth no more connexion with the language of the Arabs, than with the language of the Troglodytes.

It is indeed amusing to observe the very opposite opinions of learned men on the subject of grammar. Some will have it a science, which views language only as significant of thought, and this is philosophical or general grammar. Others consider it as a simple art, which teaches the inflexion of words, and their due disposition into sentences and phrases, and this is particular grammar. A third race of philologists will neither allow it to be general nor particular, but a mixture of both, and this may be properly called mixed, or Arabic grammar.

The modern grammarians of Europe consider grammar and etymology as synonymous terms, and with them all languages go upon wheels,† but those of Arabia who have no acquaintance with verbal antiquities, reject etymology altogether, and substitute in its place a dash of dialectics, with

^{*} See the Shurhoo Moolla and Shurhoo Ruzre.

which they are acquainted. Here then, are two opposite roads to the same end, and the student may take his choice. Either to adopt the plan of Horne Tooke and his followers, and set about digging for grammar through some dozen or fifteen collateral dialects, or getting boldly on the back of Synthesis with Mr. Harris and the Arabian grammarians, gallop circuitously to it, through the whole region of science.*

In order to learn any language with accuracy and facility, we must first endeavour to learn its rules, or the customary application of its words; these in their simple state, disencumbered of all technical formalities, are seldom difficult and may be easily acquired, but when once perplexed with obscure etymologies and logical definitions, and when every Dyche and Dilworth, who writes a twopenny-halfpenny guide to the eight parts of speech, deems it his duty to work them up into what he calls a new grammatical system, then indeed they assume a different character, or rather a variety of different characters, and are not easily acquired at all; the student, finding himself bewildered in the wordy labyrinth, abandons the study altogether, and willingly consigns to the Fates, the whole race of miserable grammarians with their miserable canons.

Felix grammaticus non est, sed nec fuit unquam,
Nec quisquam est felix nomine grammaticus:
Aut siquis felix præter fatum exstitit unquam,
Is demum excessit grammaticos canones.

As far however as relates to the present system of Arabic grammar, at least to the technical and speculative part of it, as distinct from the practical, my own opinion is, that it is chiefly, if not entirely derived from

^{*} Hermes p. 3.

⁺ Ausonius Ep. 126.

the philosophical writings of the Greeks, and particularly from those of Aristotle, with which the Arabs had been long and familiarly acquainted. They have certainly adopted his analysis of language,* his definition of the parts of speech,† his reasoning on substance and accident, or Mode,† which they have applied to words, under the grammatical denominations of Nouns and Infinitives, and his whole theory of the elements of language as significant of ideas. These are some of the principal topics, which the Arabian grammarians take delight in discussing, and to which, they not improperly attach a high degree of importance, but the merit of originality must be transfered to the Stagyrite, whose dialectics, if I am not much mistaken, will be found to contain the most remarkable facts that distinguish the philosophical grammar of the Arabs.

[‡] Accidents vero sive Modus est rei proprietas, quæ in aliquâ substantiâ inhæret, nec sine ipsâ potest existere. Element. Logicæ. By Accident here, and in Arabic grammar, as applied to an Infinitive, or is not meant as has been errone-ously supposed, any thing casual or fortuitous: but as this is a point of some importance to the true understanding of an Arabic Musdur, (for an explanation of which I refer the student to my Annotations on the Commentary, p. 195.) I shall lay before him Dr. Gillies' note on the subject, which will certainly corroborate one material point of my argument. "The Greek word συμεξεξημος is, as far as I know universally translated, "accident;" συμεξεξημοτα in the plural, "accidents," from which, "Accidence," denoting the little book, that explains the properties of the eight parts of speech, is generally held to be a corruption. But accident, in its proper sense of what is casual or fortuitous, has nothing to do with the one or the other; and Aristotle's meaning of συμεξεξημος ought to be expressed by a Latin or English word derived, not from 'accido,' but from, 'accēdo.' See p. 65.

Indeed the whole philosophy of the Arabs may be traced to the Greeks,* whose language and literature they seem to have studied with uncommon ardour, for upwards of five centuries, that is, from A. D. 754 to the taking of Bagdad in 1258. Rhetoric and logic were their favorite pursuits. Averröes, the great commentator, as he is generally called, is known to have paraphrased Aristotle's rhetoric, and Alfarabius is said to have written no less than sixty distinct treatises on the Aristotelian philosophy, which was publicly taught in Bagdad, Bussurah, Koofah, Bocharia, Alexandria, Cairo, Morocco and Fez, as well as in sereval parts of Spain and Italy; but

^{* &}quot;See Abulfarag. per Pocock, Dynast. p. 160. Greek was a familiar language to the Arabians. The accompts of the Caliph's treasury were always written in Greek till the year of Christ 715. They were then ordered to be drawn in Arabic. Many proofs of this might be mentioned. Greek was a familiar language in Mahomet's houshold. particularly in the celebrated Schola Salernitana?* For a detailed account however of the origin and progress of Grecian literature among the Arabs, I refer the student to Warton's 2d Dissertation on the History of English poetry, and Enfield's History of philosophy, from Brucker's Historia Critica Philosophie, a work of considerable merit, though Dr. Gillies is of opinion, that his account of Aristotle's philosophy, is in many parts erroneous, and in some even unintelligible; while others go still farther, and hint that he did not understand Greek! It will there be seen, that the acroatic works of the Stagyrite, were translated, studied and taught by the learned of Arabia, and that to these works in particular, the Arabians seem indebted for all their notions of the philosophical sciences.

^{* &}quot;Their learning, but especially their medical knowledge, flourished most in Salerno, a city of Italy, where it formed the famous Schola Salernitana."

It must not be forgot, that they translated Aristotle's Poetics. There is extant "Averroys Summa in Aristotelis poetriam ex Arabico sermone in Latinum traducta ab "Hermano Alemanno; Præmittitur determinatio Ibinrosdin in poetria Aristotelis Venet. "1515." There is a translation of the Poetics into Arabic by Abou Muscharmetta, entitled, ABOTIKA. See Herbel. Bibl. Oriental. p. 18. col. a. p. 971. b. p. 40. col. 2. p. 337. col. 2. Farabi, who studied at Bagdad about the year 930, one of the translator's of Aristotle's Analytics, wrote sixty books on that philosopher's Rhetoric; declaring that he had read it over two hundred times, and yet was equally desirous of reading it again, Fabric Bibl. Gr. xiii. 265. D'Herbelot mentions Aristotle's Monals, translated by Honain Bibl. Oriental. p. 963. a. See also p. 971. a. 973. p. 974. b. Compare Mosheim. Hist. ch. i. p. 217. 288. Note-C. p. 2, ch. l. Averroys also para hrased Aristotle's Rhn-TORIC. There are also translations into A rabic of Aristotle's ANALYTICS, and his treatise of Interpretation. The first they called A NALUTHICA, and the second, BARI ARMENIAS. But Aristotle's logic, metaphysics, and physics pleased them most; particularly the eight books of his physics, which exhibits a general view of that science. Some of our countrymen were translators of these Arabic books into Latin. Athelard, a monk of Bath, translated the Arabic Euclid into Latin, about 1000." Leland. Script. Brit. p. 200. There

It must not indeed be denied, that there are many subjects connected with the arts and sciences, for which the modern nations of Europe are supposed to be indebted to the Arabs. Bossut attributes to them our present system of arithmetical numeration, as well as the first notions of Algebra which are found in Diophantus.* He gives them the credit of several important discoveries on trigonometrical calculation, and many ingenious improvements and alterations in astronomy.† An Arab in Spain was the first who attempted a theory of refraction and the twilight, which doctrine Malbranch is said to have enlarged upon, but as he does not quote the author, Bossut presumes he was unacquainted with his works. In truth the Arabs seem to have arrived at eminence in almost every science, and even in mechanics, the clepsydra or water clock sent by Haroon Al Rusheed in 799 to Charlemagne, is said to have astonished by its ingenuity the whole of Europe.‡

- * "Cardan considers the Arabs as the real inventors of Algebra. Practical geometry and astronomy owe the Arabs eternal gratitude, for having given to trigonometrical calculation the simple and commodious form which it has at present. Bossut, p. 157.
- † Of all the mathematical siences astronomy is that which the Arabs have most cultivated, and in which they have made the most remarkable discoveries. p. 159.
- ‡ In the dial of this Clepsydra, were twelve small doors, forming the divisions of the hours, and each of these doors opened in succession at the hour it marked, and let out little balls, which, falling on a brazen bell, struck the hour. The doors continued open till twelve o'clock, when twelve little knights mounted on horseback, came out together, paraded round the dial, and shut all the doors. This machine astonished all Europe, when men's minds were employed chiefly on futile questions of Theology and Grammar." Bossut. p. 161.

All this must indeed be granted to the Arabs, but it appears from the united testimony of the learned,* that their philosophy was entirely Grecian. 'They did not form, says Brucker, a new system, but merely revived the Peripatetic doctrine.' Their logic was the logic of Aristotle, and the common introduction to that science, which is now current in Arabia and India, is a simple translation of the Isagoge of Porphyry. Aristotle's rhetoric probably led the way to their own, and his logic, when applied to the rudiments of their language, produced that ingenious but intricate and elaborate elementary system, which has perhaps not improperly, been termed philosophical or transcendental grammar.

This then is the origin of the philosophical sciences among the Arabs. Grammar, Rhetoric and Logic or Dialectics, formed the basis, to which if we add Arithmetic, Geometry and Astronomy, which they also

cultivated with success, we shall find them pursue (with the exception perhaps of music,)* the exact course of studies, as practiced by the Christian philosophers in the middle age.

^{*} I say with the exception of Music, because I am inclined to think that Music as a science, was not regularly cultivated in Arabia, though some examples may be produced to prove the contrary. The learned Farabi already mentioned as the translator of Aristotle's Analytics, and who was styled the Coryphæus of Philosophers, deserves perhaps to be recorded as the Timotheus of Arabian Musicians, for his performance on the Lute before Sooltan Syf-ood-Doula, was not inferior to that of the Thehan before Alexander. "Il tira, ' says D'Herbelot,' de sa poche une piece avec toutes ses parties qu'il distribua aux Musiciens, & continuant à soûtenir leur voix de son luth, il mit toute l'assemblée en si belle humeur, qu'ils se mirent tous à rire à gorge deployée; aprés quoy faisant chanter une autre de ses pieces, il les fit tous pleurer; & en dernier lieu changeant de registre, il endormit agreablement tous les assistans." vid. Art Farabi. Bibliotheque. Farabi is said also to have written an introduction to the science of Music, which is mentioned in the BILIOTECHE DE Turchi of Toderini. " Nell' accennata classe di Scienze, che contiene cento e venti due " volume, l'ottantesimo secondo scritto nell' Indice è un Trattato di Musica del Furabl inti≠ 66 tolato Medchalul Musiki, ossia Introduzione alla Musica." This valuable work of Toderini's, which seems very little known in India, contains a full account of the Arts and Sciences as known to, or cultivated by the Turks and Arabians, including, their Grammar, Logic, Rhetoric, Moral Philosophy, Arithmetic, Algebra, Geometry, Physics and Natural History, Medicine, Chemistry, Astronomy, Navigation, (Nautica, e Nuova Accademia di Marina.) Astrology, Poetry and Music. The work is entitled, Letteratura Turchesca, Studi, Accademie, Biblioteche e Tipografia in Costantinopli. Opera, dell' Ab. Gia. Battista Toderini. Tomo I, II, e III, in Venezia, 1786. The following extract from this work, relating to the Logic of the Arabs, as copied from the Greeks, will corroborate what I have before stated regarding that science.

I have now to offer a few words on the grammatical works here translated, but of their authors unfortunately I know little or nothing. The commentator indeed attributes the Mi,ut Amil to Abdoolqahiribno Abdirrihman of Goorgan,* whom he styles the most excellent of the learned, but he does not say in what age he lived, nor in what his excellence consisted, and we are left to form our own opinion of his merits, from five pages of Arabic syntax! I find his name however in the Mirat-ool-Junan, with a few particulars, which as we have nothing better, we must substitute for a biographical memoir.

Abdoolqahir, surnamed from eminence, Alnuhwee, or the grammarian, was of the sect of Shafei, and one of the followers of Abool Hussun al Asharee. Besides the Mijut Amil and Joomul, (another introduction to Arabic Syntax,) he wrote a learned commentary termed Almooghnee, in three volumes, upon the Eezah, besides several other celebrated works on grammar and rhetoric, and died in the four hundred and seventy-fourth year of the Hejira, or about the middle of the eleventh century of the Christian era. tions, are given in the Preface to Meninski,* on the authority of Shums-ood-Deen, the author of a commentary on the Joomul, and both these works (the former with a Latin translation,) are said to be deposited in the Escurial in Spain.

Abdoolqahir appears to be the first grammarian, who reduced the governing powers of the Arabic language to a definite number, † and as he lived at a time when Grecian literature of every kind was ardently cultivated in Arabia, and when in fact almost every learned Arab made a merit of studying and copying the philosophical writings of the Greeks, it is not very improbable that the Centiloquium of Ptolemy, ‡ a work, on Astrology, which must have been popular at that period in Arabia, gave him the first hint for the title of his treatise on regimen, and produced the Miut Amil, or Hundred governing powers.

The extreme brevity of the text has occasioned many commentaries on the Mi ut Amil, but that which usually accompanies it in this country, and which I have here translated, is generally supposed I believe to be written by a native of India. D'Herbelot mentions but one commentary

by Ebn Hescham, whose name as a grammarian, he probably confounds with Hoosam-ood-Deen, who is stated in the Kushf-ooz-Zoonoon, to be one of the commentators on the Mi,ut Amil:* it is possible however, that D'Herbelot alludes to Shuekh Jumal-ood-Deen Aboo-Mooliummud Yoosoof, who was also known by the name of Ibn Hisham, but as no such commentary is attributed to him, in either of the Biographical works above alluded to, I feel some hesitation in allowing him to be the author of the Shurhoo Mi,ut Amil. D'Herbelot however was certainly but very little acquainted

† He calls the MI, UT AMIL, the Hundred Particles! "ABDALCAHER, Grammairien celebre Auteur des Aouamel. Ce livre a été commenté par Ebn Heschám; Il se trouve manuscrit dans la Bibliotheque du Roy N°. 1086, & a été imprimé à Rome avec la traduction Latine sous le titre de Centum Regentes, c'est-à-dire, les cent Particules Arabiques, qui regissent aprés elles des noms de differens cas dans la construction de cette Langue. Ce même Auteur a aussi composé un abregé du Dictionnaire Arabic de Giauhari, & l'a intitulé Mokhtar al Sehah, qui se trouve aussi dans la Bibliotheque du Roy N°. 1088. with Abdoolqahir and his writings, and the account he gives of the Mi_ut Amil in particular, is a demonstrative proof that he was ignorant of the simplest principles of Arabic grammar.

This is all the information I have been able to collect of the author of the Miut Amil and his commentators. Something more might perhaps have been found had I been more industrious, but I confess I did not think it necessary to toss over half the manuscripts in the College Library, for the purpose of adding one or two obscure annecdotes to the life of Shuekh Abdoolgahir. Neither would the search have rewarded my pains, for Biography is a very different thing in Asia from what it is in Europe. There are no Pater Noster Rows, nor Cadell and Davies's in Arabia, and consequently there are no Boswells nor Piozzis. A grammarian may write five pages of Syntax there, without having five quarto volumes of Memorabilia recorded of him: for who could copy them, or who would read them? The life of an Arabian worthy indeed, is frequently dispatched in a line, and is seldom more entertaining or instructive, than a hic jacet, or a village epitaph. 'His name, his years,' with a ruzeeullaho anho,* or a 'holy text' from the Qooran, supply the place, " of fame and elegy," and constitute the brief memorials of a literary career.+

^{*} وضي الله عنه May God be satisfied with him, a pious petition, which almost invariably follows the name of the defunct, in Oriental Biography.

⁺ I ought perhaps to apologize for venturing this opinion of Arabian biography, for Sir Wm. Jones, whose authority will doubtless be considered decisive, has given a very different account of the matter. He prefers the biography of Ibn Khalikân, not only to that of Nepos and Laertius, but even to that of Plutarch himself; nay he seems inclined to rank the historian above all the biographers of ancient and modern times.

'Nescio an hic omnibus vitarum scriptoribus sit anteponendus. Est certè copiosior Nepote, elegantior Plutarcho, Laertio jucundior, and so on.—To all of which I can only answer, consult the Biography of Ibn Khalika'n.

Such is the life of Abdoolqahir, as handed down to us by two very popular historians, and the amount of the whole is simply this, that he was an eminent grammarian, that he wrote the Mooghnee, the Joomul, and the Mi ut Amil, and that he died in the year 474 of the Hejira.

There is no date to the Commentary, nor can I pretend to settle one, I suspect however that it is comparatively modern. The author, at the conclusion of it, speaks of Ibn Malik the grammarian, who died A. H. 672, but if D'Herbelot's information be correct, it will probably give an antiquity of 500 years to the work, as Ibn Hisham is known to have died in 762.

The Miut Amil must be considered as a mere text-book, in which the governing powers of the Arabic language are arranged into appropriate classes, their grammatical offices defined, and their primitive senses illustrated by easy familiar examples. The commentary is an enlarged exposition of the governing powers, after the precise order laid down in the text, for it preserves the same arrangement of the parts, the same definitions of the rules, and the same examples illustrative of the original force of the terms, adding however to the primitive or current senses, the more immediately consequential or secondary acceptations:—Let us explain by an example.

The Preposition of which is the first, in the first class of grammatical agents, is stated simply in the text, to be a Genitive Particle, and one example is subjoined to illustrate its force. The commentator repeats the rule regarding its regimen, but adds its primitive acceptation, which he states to be Union, and this he considers as two-fold: either absolute, as denoting actual coalition or cohesion of parts, or relative, as implying proximity or contiguity of person or place. The first he exemplifies by the phrase of the is sick, or sickness is inherent in him. The latter, by the

sentence 'or 'I passed by Zued.' He then goes on to define the collateral and accidental significations of this particle, under the various relations of instrumentality, causality or causation, concomitance or association, substitution or exchange, inclusion or comprehension, with some others, which may be seen by refering to the translation, and each of these senses he elucidates by one familiar example.

This is the general mode of analysis, as adopted in the commentary. The words are all considered either separately or in classes, their original and accidental significations defined and illustrated, and their analogous and anomalous syntactical structures pointed out and determined. The etymological formation of some words are occasionally explained, but this is but seldom, and only in particular cases, where words apparently simple, are shewn to be compound, as it formed from the particle if of similitude and the Pronoun is.

The commentary in short, is a simple introduction, comprising a distinct general view of the essential parts of Arabic regimen and nothing more. To render it however as extensively useful as possible, I have transcribed from the works of several of the most eminent Arabian grammarians, whatever appeared to me best calculated to illustrate the force and application of the several governing powers, and these with my own observations and remarks subjoined to the translation, form a perpetual commentary on the text, which I trust will be found useful.

To these annotations sometimes critical and sometimes explanatory,

I have occasionally added others of a more light and miscellaneous nature. They are not indeed of much importance to the work, and might well enough have been omitted, but they amused me at the time of

writing, and may probably amuse others. To extract mirth or humour however out of Arabic grammar, must I am persuaded be looked upon as a hopeless attempt, an attempt perhaps not altogether dissimilar to that on record of certain ingenious people in the Island of Mateotechny, who are said to have employed themselves, in gathering grapes from thorns, and figs from thistles; or of others, who pitched nets to catch the wind, and caught—cock lobsters!*

The original works from which I have selected the materials for the notes are as follow: Shurhoo Wafeea, Shurhoo Moolla, Shurhoo Ruzee, Shurhoo Misbah, Shurhoo Alfeea, Qutroon-Nuda, Moofussuls and the Mooghnee-ool-Lubeeb, Of these, the three first are commentaries on the Kafeea; the first by Ibnool Hajib, the author of

Pococke has given the name erroneously. " شرح شواهد لغني i e. Explicatio testimoniorum quœ in grammatica dicta ابر محمد عبد الله بن هاشم ab مغني لبيب conscripta afferuntur, cujus author est Jelalo'ddinus, idem qui commentarium in Alcorani partem, scripsit." p. 367.

the text; the second by Moolla Jamee the Poet, and the third by Ruzeeood-Deen Moohummud of Astrabad. The Wafeea though a very
valuable work, is perhaps but little read; the Shurhoo Moolla, as it is
generally called, is a logical and argumentative comment on the text,
and is every where studied in India, but the commentary by Ruzee (from
which indeed the greater part of Jamee's is supposed to be borrowed) is
the most voluminous and elaborate of all, and is justly considered a
chef d'œuvre of grammatical science.

Mochummud of Asferan; the Qutr-oon-Nuda, by Aboo Abdoolla Moo-hummud Bin Yoosoof Hisham, and the Shurhoo Alfeea, by Shuckh Aboo Mochummud Abdoolla Bin Abdoorruhman, more generally known by the name of Ibn Uqeel, I have nothing particular to offer. They are all popular works in Arabia, and the latter in particular, seems to possess the same rank in Bagdad, as the Shurhoo Moolla does in India, a fact which is certainly somewhat remarkable, as the former is as a much famed for simplicity, as the latter is for subtilty. The same may be observed of the Mooghnee-ool-Lubeeb, by far the most useful work on Arabic grammar with which I am acquainted. It has supplied me with almost every thing valuable on the particles.

In order to illustrate with greater effect, the practical applications of these most subtle parts of speech, as they are sometimes called, I have added at the conclusion of the annotations on each, an Arabic story, in which the particle will be found to occur under all the senses ascribed to it in the commentary. The natural and popular use of the word will, by this means be better understood, its lighter and more evanescent shades of meaning, rendered more obvious and determinate, and the whole series

of primitive, derivative and metaphorical acceptations exhibited at one view, in an easy and regular scheme of explication.

I have pursued this plan throughout the volume. A story is appropriated to every preposition, and afterwards to every class of governors consecutively. The words thus explained, are distinguished by figures in the original, that the student may be enabled to compare their use with the explanations given in the commentary, and the whole is accompanied with an easy English version.

The stories thus given, are partly original and partly extracted from books, either printed or in manuscript. Those at the commencement of the commentary, were prepared by Sueyid Uhmud, a learned Arab, of the College of Huneefu, who accompanied me from Bagdad in the year The sudden and unexpected death however of this most excellent scholar, a few months after his arrival in Calcutta, deprived me, at an early period, of the benefit of his services, and forced me, reluctantly to relinquish the extensive plan of illustration, which he had himself originally proposed, and by which I had hoped to diversify and enliven my commentary, with much curious and intersting matter. This pleasing scheme however was in a great measure prevented by his death. I had no choice of materials, and was frequently obliged to adopt a number of insipid stories, which under other circumstances, I should certainly have rejected. The most entertaining portion of them were supplied me by an ingenious native of Yemen in Arabia, Nathaniel Sabat,* whose literary talents and acquirements, are well known in India, and for whose useful assistance in this department of my work, I am under considerable obligations.

^{*} At present employed by the Reverend T. Thomason, on a translation of the New Testament into Arabic.

My constant guide and companion in almost every stage of this translation, was Mouluvee Umanut-Oollah, a learned native of India, formerly on the establishment of the College of Fort William, and a more able guide or skilful and judicious instructor, I know not well where I could have found.

For the poetical versions of sundry passages from the Arabian poets, which will be found occasionally interspersed through the notes, I am entirely* indebted to the kindness of my friend Mr. Wilson, the learned and elegant translator of the Megha Duta,† and to Captain Roebuck of the College, who afforded me his assistance in conducting the work through the press, I beg leave to offer my best thanks.

I have no further observations to make on the works here translated, and of the translation itself any observation on my part must be useless; I shall therefore offer none: it may speak for itself or be silent. The typographical errors are indeed rather numerous, and require some apology. I believe they were occasioned in a considerable degree, by the rapidity with which a large portion of the work was hurried through the press, for it is certain, that the greater part of the commentary, with all its appendages of extracts, stories, annotations, &c. were prepared, translated and printed off in something less than five months. I have endeavoured however to rectify these mistakes as well as I could, by a table of errata, which will be found in general to consist of little more than transpositions in the Vowel points. The errors in the English part, are not likely to embarrass the student, and I have accordingly omitted to record them.

^{*} With the exception of the paraphrase in page 48.

⁺ Or CLOUD MESSENGER, a Poem in the Sanscrit language by Ca'LIDA'SA.

If to the two elementary works contained in this volume, be added the first and fifth Chapters of the Misban,* or rather perhaps a portion of the Hidauut-oon-Nuho, a body of syntax will be formed sufficiently comprehensive for every practicable purpose whatever; but if the student aspires to a higher and more accurate knowledge of the subject, and would understand not only the rules, but the reasons of the rules, with all the delicacies, refinements and peculiarities of this admirable system of speech, I would recommend to him a Grammar of the Arabic Language, by Mr. Lumsden, the Persian and Arabic Professor in the College of Fort William, a work which I am persuaded will be found to exhibit, the most profound and masterly analysis of the language, that has ever been presented to the public.

OF THE HUNDRED GOVERNING POWERS.

ARABIC SYNTAX comprehends AN HUNDRED GOVERNING POWERS, of which some are, (verbal;) and some, or (absolute.)

Of those termed الفظي or verbal, there are two classes: The first, مساعي, or the prescriptive government; the second, سباعي or the analogous, which with two of the معنوي or absolute, comprise the hundred governing powers.*

^{*} A summary view of the whole MEEUT AAMIL is here annexed.

There are an hundred governing powers in Arabic syntax, of which some are verbal and some Absolute. The verbal is divided in two classes, the 1st prescriptive, the 2d analogous. The prescriptive, contains 91; the analogous 7, and the absolute 2, in all 100.

The or PRESCRIPTIVE government, is divided into thirteen CLASSES.

CLASS FIRST.

The first class contains seventeen particles, or prepositions, which govern the noun alone in the GENITIVE OF RELATIVE case. viz.

The PRESCRIPTIVE is divided into 13 classes. (Prepositions which govern the noun alone in the GEN. or RELATIVE The 1st class contains 17 (Particles, govern the noun in the ACC. or OBJECTIVE and the PREDI-2d cate in the nominative. (Particles, govern the noun in the nom. and the predicate in the 3d OBJECTIVE CASE. Particles, govern the NOUN in the OBJECTIVE CASE. 4th (Particles, prefixed to the agrist tense of verbs, change the ruffu of 5th the final letter into nusub. Particles, prefixed to the agrist render the final letter quiescent. 6th (Words, prefixed to the agrist render the final letter quiescent—they 7th possess a conditional or subjunctive meaning, like the particle. Nouns, govern an indefinite noun in the genitive or relative case, 8th when employed as the Tumeez or noun of specification. Words, called VERBAL NOUNS, of which 6 govern the OBJECTIVE 9 CASE, and have an imperative meaning; and 3 the NOMINATIVE and gih have a preterite signification. (Defective verbs, govern the noun in the nom. and PREDICATE 10th in the ACCUSATIVE. VERBS OF PROPINQUITY, govern the noun in the nominative case, 11th Verbs' of PRAISE AND CENSURE, govern generic nouns, with the 12th definite article, in the nominative case. VERBS OF DOUBT AND CERTAINTY, govern a double accusative, or two nouns in the objective case, the second explaining or announ-13th Cing some thing regarding the first.

The ANALOGOUS GOVERNORS, are 7, and are as follow; 1st a verb whether active or neuter.

2d A derivative adjective—3d a participle active. 4th A participle passive. 5th An infinitive.

6th A noun governing another in the genitive case. 7th An isme tamm.

The Absolute is of 2 sorts. 1st The Now. Absolute. 2d The Adrist.

Some word is evidently required to expel the obscurity, or in other words, to separate some specific object from the mass of possibles, in order to give a determinate character to the sensence: this word the Arabian Grammarians have therfore with analogical propriety termed the or, as it may be rendered in English, the noun of specification.

THE CLASS termed or ABSOLUTE, has two peculiarities of regimen. Of these, the first requires, in the absence of any verbal governor, the subject and predicate in the nominative case: the second is the Aorist tense of a verb, which, in the absence of certain governing particles, receives the vowel Zummu; or in other words, the final letter of the tense is marked

End of the Meeut Aanul.

At the conclusion of the first book, it may not be unnecessary to offer a few general observations, on the nature, divisions and peculiar distinctions of THE HUNDRED GOVERNING POWERS, a clear and comprehensive conception of which will tend to facilitate, in a considerable degree, the future progress of the student.

The subject of the Meeut Aamir, is grammatical regimen, or government; and is defined to be that part of Syntax, which regulates the dependency of words, and the alterations which one occasions in another.

This is divided into two general classes or divisions: the first termed verbal, or the relative or dependent government; in contradistinction to the second, which flows from the sense, and is therefore properly absolute or independent.

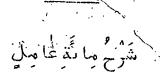

In the 'VERBAL or relative, the word governed necessarily depends on, or is influenced by, some other word in construction: the Absolute is totally independent of all such influence, having the intrinsic power of assuming a certain grammatical character, or indication of case, which in the Arabic language is invariably NONINATIVE.

For it must be remembered, that in this language, there is a state in which nouns are found to exist, before they are distinguished by any marks of annexation, or indications of case, such for instance as the word (deprived of the tunween,) which is considered the primary, or radical form of the noun, and must necessarily be connected with some other word in construction, before it can assume any grammatical character, indicative of case. The nominative therefore, which always denotes a certain specific relation, is distinguished by a termination or mark of inflection, significant and peculiar to itself, superscribed over the final letter of the noun in its radical form, as

Under the first species of government, namely the VERBAL, or relative, are included two distinct classes, or the PRESCRIPTIVE, and ANALOGOUS. Of these, the first relates to a certain specific number of words, the government of which is settled and authorized by long usage and custom; while the latter is restricted to the government of a certain class of words, in which you reason by analogy from one to another, and consequently, determine their influence in speech to be every where regular and uniform.

The second form of government, which has been translated absolute or independent, is of a twofold nature. The first governing the subject and predicate: the second the aorist tense of a verb, which is said to resemble in sundry particulars a noun, and, in the absence of any verbal governor, assumes the vowel Zummu, viz. the final letter of the tense is marked \$\frac{1}{2}

The above remarks will rerhaps be sufficient to convey a general ide of Arabic government. For a more minute and particular analysis of the subject, together with the various significations and poculiarities of the hundred governing powers, the reader is referred to the compaentary on this book.

COMMENTARY

ON THE

HUNDRED GOVERNING POWERS.

BOOK II.

INTRODUCTION.

не author of the Miut Amil* enumerates in Arabic syntax one hundred governing powers, of which some are أَغْظُنَى or verbal, † and some or absolute.

^{*} The grammatical treatise termed of the second Miller Amil, on which the present work is a Commentary, contains agreeably to the literal meaning of the title, one hundred governing powers: these are divided into co-ordinate and subordinate classes, with reference to their general and particular offices, and the author with an ingenuity characteristic of the systematic refinement of an Arabian grammarian has reduced the whole to an exact centenary of governing powers: in whis he was doubtless as much influenced by numerical symmetry, as legical or grammatical precision, but the arrangement is convenient and sufficiently accurate for all useful purposes.

to signification, meaning. The first signifies literally, verbal, and denotes that the government to

The VERBAL government is subdivided into two general classes, the first named PRESCRIPTIVE . * the second analogous . The PRESCRIPTIVE includes ninety-one, the Analogous seven, and the absolute two, forming on the whole, one hundred grammatical agents or governing powers.

OF THE GOVERNMENT TERMED OR PRESCRIPTIVE.

THE PRESCRIPTIVE GOVERNMENT IS DIVIDED INTO thirteen CLASSES.

CLASS FIRST.

The first class contains seventeen PARTICLES OF PREPOSITIONS, which simply go-

which it is applicable is influenced by words. The second on the contrary as its name imports has, no reference to words, but relates merely to sense: the one is extraneous, the other intrinsic, and both seem properly enough designated by our own grammatical terms, vehale and absolute.

* From the infinitives the hearing, and with a supplicable to all irregular grammatical relative nouns with and with the former of which, as applicable to all irregular grammatical agents, may be termed prescriptive, or as this class of irregular governors are more literally denominated by Agapitia Valle, and be general class of regular governors, and are accordingly restricted in number to ninety-one. The analogous classes will be illustrated in their proper place, and it therefore only remains to be remarked, that the government of the particles extend to all the cases while some of them possess the peculiar property of changing the of the final letter of verbs, into wai and others that of affecting the sound of the terminating letter, with the mark the final seems to correspond with the antithesis and apocope of European languages and should therefore agreeably to our notions of grammar, be rather included in the rules of prosody than inflexion.

vern a noun in the AORIST CASE. They are called 3 or PARTI-

* They are called PARTICLES OF ATTRACTION, because they are said to attract the sense of the antecedent word to the consequent, pointing out at the same time the relation subsisting between both, and for a similar reason are also termed so level of connexive particles. They are applied like the prepositions of other languages in a two-fold capacity; Karà wagabsonby way of juxta position, and Κατὰ σύιθεσεν by way af composition; viz. some of them are seperable, and some inseperable. They invariably render the governed word منجرور Mujro R, which some grammarians have rendered the Genitive case, but what it may be asked in the genitive case? 'le fils aîné du somanitif,' says Du Marsais, *-the eldest son of the nominative! 'and is formed to express all relations commencing FROM it itself,' says Harris, in contradistinction to the dative, which expresses all relations tending To itself.' If this be the true character of the genitive, it is obvious it cannot be applicable to the term mujroor, as the prepositions of from and it, to, govern the same case, though the relations they are formed to denote, are directly opposed to each other. If the metaphorical or rather whimsical language of the French grammarian be admissible, it must be allowed that the claims of this case to hereditary pre-eminence are much superior to those of the fils aine, as it may be said to inherit a sort of trinal consanguinity, or triplicity of filiation possessing in itself a complex cognation, with its progenitor the nominative, which includes not only the rank and powers of the eldest son, the genitive, but of the two younger also, the dative and ablative.

It might perhaps be called the RELATIVE CASE, if it were not that every case is strictly speaking relative, a case being generally defined by grammarians—the special difference in a noun, according to the different relations that things bear to one another; yet the Messieurs De Port Roxal who copied this definition from Sanctius, have strangely enough, and almost in the same page restricted the term relative to the dative. On a question however merely nominal it is not necessary to be captious:—in re levi nolumus esse morosi;—the arbitrary distinctions of language have no essential connexion with he operations of words; the name is seldom found significant of the office. But although 'the equality of words to things be often neglected,' it seems necessary in technical appeliations to be as precise as possible:—to the two first terminations or cases of an Arabic nour," the terms nominative and accusative are sufficiently applicable, but the compre-

Perties. CASE they say comes from casus à cadere to fall, like the Greek Hrion, from Hintowords following (as it were) from the mind or discursive faculty.* This is fanciful
enough, and worthy the ingenuity of Harris, and his friends the Peripatetics. But what
authority is advanced for supposing, that words when first applied as terms of art,
were applied in their primitive rather than in their consequential or metaphorical significations?
There is no authority for such a supposition, but authority directly against it. The word casus
in Latin is considered synonymous with eventus and exitus, and has many other senses besides its
literal one:—case in English is never used in its original import, and Aristotle; himself applies
literal to the variations of the noun and verb, not only to what we term declension and conjugation,
but even to the singular and plural number. But this is not a work for minute discussions on
grammatical subtelties and verbal peculiarities, I shall therefore conclude with observing that the

same idea is expressed in Arabic by the word $\ddot{x}(z)$, meaning familiarly state, case, &c. which a fanciful grammarian after the usual mode of etymological retrogradation might trace to the verb J(z) he turned, inverted or declined, and hence argue that the term was thus significantly applied in grammar, to express the variations, or declensions,* " of a noun from its upright form $(z^2, \dot{z}^2, \dot{z}^2)$ through its various declining forms." $(\dot{z}^2, \dot{z}^2, \dot{z}^2)$. This is quite as plausible a derivation as the other, but I am persuaded it never entered the mind of an Arabian Grammarian. Who would not smile to hear a physician etymologize on the word case, and inform his Patient, that it signified literally falling, implying as it were the decline or fall of his health from its upright form?—Yet the physician's etymology is every way as good as the grammarian's; or rather they are both good for nothing.

ا الشَّرَيْتُ الْعَبْدَ بالْغَرَسِ [I bartered the horse for the slave, or lit. I purchased the slave in exchange for the horse.

7. It denotes swearing, (,)

EXAMPLE.

الله كَانَ كَذَا By God, I will certainly do so.

8. It denotes inclusion, or comprehension, (غَرُ فَيْمَةُ)

EXAMPLE.

Zued is in the city.

9. It is used as a mere expletive or redundant particle, (زِيا دُوْ)

EXAMPLE.

Do not imbrue your hands in slaughter. وَلَا تُلْقُوا بِأَيْدِيكُمْ إِلَى التَّهِلُكَةِ

Annotation.

Grammarians have assigned various other relations to the particles , le besides those enumerated in the text, but they seem all correlative and may be traced to the primary signification or generic idea denoted by the term,

The radical import of this particle is therefore union, whether absolute or relative.

Absolutely, it denotes possitive or immediate union or co-alescence.

Relatively, it implies simple relation of vicinity or proximity of place.

From the generic idea of union flow several specific relations, which may be translated by the following English prepositions.

- 1. With, denoting the instrument or agent, which is expressed in Latin by the ablative case as
- 2. By, or on account of, denoting the efficient or final cause, the means by which any thing is performed; also in swearing.
 - 3. Along with, association, society, or connexion.
 - 4. For, in exchange of.
 - 5. In, denoting the relation between the object contained and that containing it.

It corresponds very nearly in all its relations with the English preposition by.

STORY.

The various uses of this particle, together with the Cacus amor sui, or tympany of self-conceit are illustrated in the following Story.—The Figures point out their application as explained in the Text.

A silly fellow observing one morning that his house was ready to tumble about his ears from decay, and being destitute of the means of repairing it, went with a long face of rueful cogitation to his wife, and informed her of his miseries. New the wife was just as great a noodle as himself,—so says she, why, my dear distress yourself about a trifle? You know you have got a cow worth thirty dirhum; take her to the market and sell her for that sum, I have also some thread which I will a spose of to-day, (and between us both we shall raise the wind I warrant it.)

The man instantly rose up, drove the cow to the market, and delivered her over for sale to the public appraiser of cattle. The salesman shewed her to the by standers; directed their attertion to all her excellent points,—expatiated on her numerous good qualities, and in short puffed her off as a cow of inestimable

value:—to all this the wiseacre listened with delight and astonishment;—he heard ker praised for qualities that he thought no other cow could possess, and determined in his own mind not to lose so rare a bargain, but purchase her himself and back the chapmen; he therefore called out to the appraiser, and asked him at what she was going, he replied at fifteen dirhums and upwards. By the head of our Prophet says the Cappochia, had I known before that my cow was such a prodigy of excellence, you would not have caught me in the market offering her for sale. Now it happened that he had just fisteen dirhums, and no more;—these he thrust upon the broker, exclaiming—the cow is mine—I have the best claim to her! He then seized her, and drove her home, exulting all the way, as if he had found a treasure. On reaching home he enquired eagerly after his wife to inform her of his adventure, but was told she had not returned from market. (There was no remedy but patience, which he despised, so he sat biting his nails in the last stage of the Fidgets.)—At length she appeared, and he sprung up to meet her exclaiming,—wife I have done something to-day, that I believe will astonish you!—I have performed an exploit, that would do honor to the first genius of the age. Patience says his wife; perhaps I have done something myself to match it:-however hear my story first and afterwards talk of genius if you please. The husband desired her to proceed. When I went to market, says she, I found a man in want of thread; —I shewed him mine, which he approved of, and having bargained for it, he agreed to pay me according to the weight. him it weighed so much, which he seemed to discredit, and weighed it himself:observing it fall short of the weight I had mentioned, and fearing I should the price I at first expected, I requested him to weigh it over again and be certain:—in the mean time taking an opportunity unobserved, I slipt off my bracelets, and put them slily into the scale with my thread.—The scale of course preponderated and I received the full price demanded. Having finished her story, she cryed out-What think you now of the genius of your wife!* (It must be

^{*} Literally the daughter of your uncle.

of the thread.) Amazing, amazing, says, the Booby, your capacity is truly supernatural!* and now, if you please, I will give you a specimen of mine, and he related the adventure as above.—Oh husband says the woman, the almighty has favored us in this affair—had we not possessed such consummate wisdom and address, how could we have contrived means to repair our old house? In future therefore annoy yourself no more about domestic concerns; for the Lord is merciful. On my part I shall continue to exert my abilities, and do you the same, and by our mutual talents and dexterity, it is impossible we can want for any thing.

The few liberties taken with the original will be readily pardoned by the Arabic Scholar, and to any other class of readers it would be useless to offer explanations. The extreme brevity, simplicity, and terseness of the original diction cannot I believe be preserved in our English idiom; but the solemn gravity of the dialogue defies all power of imitation.

^{*} easier to comprehend than translate. The word signifies literally flowning out exuberantly, as milk from the udder, &c. and was hence transferred to denote bounty, or liberality, as your bounty flows liberally, and laterally to signify natural capacity, indoles &c. The phrase means literally—your flow of milk is by or through God. i. e. your capacity is divine or supernatural.

OF THE PREPOSITION.

مس

1. The Preposition is used to denote the Commencement of Interval (ابتال الغاية)* as applicable to time and space.

EXAMPLES.

I travelled from Busruh to Koofuh.

I slept the whole night, lit. from the beginning نبث مِن أَوَّلِ اللَّيْلِ الْيَ آخِرِةِ لَا اللَّيْلِ الْيَ آخِرِةِ لَا اللَّيْلِ الْيَ آخِرِةِ لَا اللَّيْلِ الْيَ آخِرِةِ لَا اللَّيْلِ الْيُ الْيُ آخِرِةِ لَا اللَّيْلِ الْيُ آخِرِةِ لَا اللَّيْلِ الْيُ الْعِيلِ الْيُ الْعِيلِ الْعِيلِي الْعِيلِ الْعِيلِ الْعِيلِي الْعِيلِ الْعِيلِي الْعِيلِي الْعِيلِ الْعِيلِ الْعِيلِي الْعِيلِي الْعِيلِ الْعِيلِي الْعِيلِيِيلِ الْعِيلِ

2. It is used in the sense of partage, or participation, (تَبُعينُون)

EXAMPLE.

I took some of the Dirhums.

Annotation.

* The phrase $\ddot{z}_{i}(\dot{z})$ | would signify literally the beginning of the end, a sort of phrase ology not likely to convey much information; but the Commentators explain this oxymoron, by asserting that the word \ddot{z}_{i} \dot{z} by a* synecdoche is here synonymous with \ddot{z}_{i} \dot{z} space or interval.

The word interval which was originally applied to space, is considered by Dugald Stewart in his Philosophical Essays, as now exclusively restricted to time;—whatever may be the case now (which by the by is a very indefinite term,) it certainly was not so restricted by writers in the two last centuries. It is useless to multiply examples, but with following one from Milton, every reader is acquainted.

54 Twixt host and host a narrow space was left, A dreadful interval,"

Annotation.

Besides the above applications of the particle there are a great variety of others, the whole of which the Arabian Grammarians deduce from the primitive idea Beginning.

The present work will not admit a detail of these various senses; I shall therefore merely notice those of most frequent occurrence.

The particle denotes Causation, as in the following lines of the Poet Furuzduc, in praise of Zeen-ool-Abideen.

Through modesty he bends his looks on the ground;

the people do the same from awe of him; and no man

dares to speak but when he smiles.

It is used in a peculiar sense to denote termination, bound, or limit, the very opposite of its original signification;—example, its light of its li

^{*} In the Latin translation of this example, the preposition ex has the same force as e. g.

Recedite ab abminatione ex idolis.

4. It is redundant, (زيادة)

EXAMPLE.

He (God) will pardon your sins.

Annotation.

The particle as illustrated in the Text, may be translated as follows:

- 1. By the prepositon from, denoting commencement.
- 2. Some, part, &c. denoting partage and also by of;—as we say in English I took of, or from them; viz. I took some of them. In this sense it is always synonymous with
- 3. Namely, to wit, &c. in the sense of Elucidation: in such examples the relative pronoun in Arabic may be substituted for the particle. The above senses will be found illustrated in the following Story:

STORY.

The Calif Haroon Rusheed and his minister Giaffar the barmecide, intent one day on a frolic, strolled out of Bagdad together in disguise. A little way out of the city, they happened to meet an old man with sore eyes, driving along an ass. The Calif gave a wink to Giaffar to smoke him. Where are you bound, my old man says Giaffar? That is no concern of yours replied the other—What says Giaffar, not allow me to prescribe something for your eyes?—I want none of your prescriptions, rejoined the old fellow. Nay, don't say so, says Giaffar, you do require it, and this is the recipe. Take a little wind-wood, a quantity of the dust of water, and some mushroom leaves,* these having well mixed up together in a nut-shell, apply to your eyes, and you will find immediate relief. Upon this, the old man reclined backwards upon his ass, and—βροντᾶ κομιδῆ παππάξ.† So much learned doctor, says he, for your description of the wind-wood-eye-salve; and if I find it benefit me you shall have a double fce. The Calif was so delighted with the repartee, that he was nearly falling off his horse with laughter.

^{*} This is nearly as fanciful a collection of heterogenious ingredients as those in the thunderbolts of Jupiter—" Three rays of twisted showers, three of watery clouds, three of red fire, and three of winged south winds; with terrific lightnings, sound, fear, anger, and pursuing flames, mixed up in the work."

⁺ This may perhaps he called an obscure paraphase, but I found it difficult to express the bathos of the original, without descending to the oracular language of Giacoma Rodogina, the engastrymythian prophetess. The French Nuns in the scrupulous chastity of their dialect, have prettily termed it sonnet, but our language admits of no such happy refinement, I was therefore compelled to have recourse to the words of Strepsiades in the Clouds. Vid. Aristophanis Nubes.

OF THE PREPOSITION,

ر ^ عور)

(بعثن و مُجّا و زة) denotes distance and transition, (بعثن و مُجّا و زة)

EXAMPLE.

I shot the arrow from the bow. رَمَيْتُ السَّهُمَ عَنَ الْعَوْسِ

Annotation.

The prepositions which seem formed to denote ideas radically distinct and inconvertible, do notwithstanding very frequently occur as synonymous terms, and as such act reciprocally in composition without any injury to sense or idiom. Of these, the preposition of, is certainly represented in our language by from, which in common with its prototype is said to refer to beginning, and to nothing else; but for denoting distance and transition, where shall we find an adequate representative? This question has already been considered by Mr. Lumsden in his Persian Grammar, and after an attentive examination of the subject, he decides with his usual judgment and discrimination in favor of the preposition off. The particle of as explained in the Text, is unquestionably represented by off, for both are said to denote distance, and separation,* but the former is used in a multiplicity of relations, widely differing from the radical sense and from each other, and the latter seems restricted in its application to the two significations above mentioned, namely distance and separation, + so that the parity seems merely of an etymological nature, and will it is feared tend little to illustrate the singular powers of the Arabic preposition.

in Arabic is used in a threefold capacity.

^{*} Off seperationem significat, ut aliquando Latinorum alis, ex; ut abscindo, exuo; cui opponitur on continuationem innuens, (exuo to put off, induo to put or.) Ioannis Wallisii Gram. Linguæ Anglicanæ.

OFF signifies separation and distance. Royal Eng. Gram. by Greenway.

⁺ OFF in truth appears the most useless preposition in the English Language and might perhaps be entirely dispensed with: as an Adverbindeed it is of greater importance and signifying in this character, Disjunction, absence, privation and distance, may perhaps approximate nearer to the various powers attributed to we.

Annotation.

- J. It is placed before verbs in construction, and is termed عنى مصحرية bestowing on the werb to which it is prefixed the sense of the infinitive.
 - 2. It occurs as a noun, and in this sense is considered synonymous with is side, &c.
- 3. It is a proposition, and in this character has ten different applications; at least this is the opinion of the Grammarians of Busruh, for the rival schools of Koofuh allow it no other signification, than that of \$, trunsition, which is the strict sense of the term though perhaps separation, may be also indirectly inferred. The following example from the history of Tamerlane will shew the force of the word "جَاوِزَة بِنِي السِرِ الْمِيْلُ الْمِيْدُونَ They passed it (the river) like the passage of the children of Israel through the Red Sea."
- 1. The preposition and denotes distance and transition, (8) and may be then translated off, out of, from, from out.
 - 2. It denotes exchange, (J &) answering to _____ for, in exchange of, &c.
- A. It denotes exaltation, (Sein!) on, above, over.
 - 5. It is synonymous with si, after.
- 6. It denotes inclusion or comprehension, (فارفية) _____, in.
- 7. It is synonymous with from.
- 8. It denotes instrumentality, (% is is is with, by.
- 9. It is synonymous with , &c.
- -10. It is redundant, (الله على على على الله على

To the whole of these various senses, with the exception of the first, the preposition off seems ly inapplicable. The extensive character of from may render it a more general substitute in frinslation, but it will be found defective in several of the examples and must call in the assistance of other particles.

Annstition.

The radical distinction therefore between of, and of, with their occasional correspondence, and idiomatic peculiarity, do not appear sufficiently illustrated by any two particles in our language:

The Greek however will afford a nicer parallel, on which though a matter of mere curiosity, I may be permitted to offer a few remarks.

The preposition who and in are radically distinct in signification, and like go and we are occasionally substituted for each other. In composition who as well as well as is said to denote source or origin, and in from interpolation, cedo, is analogous to transition. The first will be found applicable to every use of on, the latter will be illustrated by the following examples.

- * 1. έκ, like ω is synonymous with after, as έκ της υπατέιας i. e. post consulatum.
- 2. έκ, like the 9th sense of ω weans with, as,
 έκ πολλε τε περιοντος i. e. cum ingenti excessu. or as the French say, and beaucoup
 d'avantage.
- g. éx resembles es in its 4th signification, se, éx tstov i. c. propterca, ob eas causas.
- هُ. وَهِ like فَ is frequently used adverbially, as,
- 5. Ln is sometimes explained by the ablative, as,

 ἐν θαλάσσης i. e. per mare. ἐν τετε τε λόγε hac ratione.

This sense though peculiar will be found frequently to occur in Arabic: the following example however from the law case proposed to Aboo Zued in the fifteenth Mucan of Hungers may be sufficient.

Which would be translated by the ablative absolute in Latin, thus,—

Llowo ob it relicto fratre. (A man died feaving a brother &c.)

The parallel if necessary, might be extended, but the above will doubtless be deemed sufficient.

[#] VIGERUS de Idiotismis.

Annotacion.

It very frequently resembles hors in French and fuor in Italian and in such cases will be translated out of: Take one example out of many from the اخوان العنفا المسلمة المسلم

وليس لحى مجلان امشي بهها ولا لسان ناطف اتكنتم بع ولا صَدَر لي عَن الهاء ساعةً و احدة الكن اري ان السلحفاة يصلح الهذا الامر لانة يصبر عَي الهاء

"And I have neither legs to walk with, nor tongue to speak with, nor can I live out of the water even for an hour; but I think the Tortoise is qualified for the task, for he can live out of the water."

The various applications of as as enumerated in page 34, will be found illustrated in the following Story.

An Arab presented himself one day before the Calif Mooatusim Billah, Commander of the Faithful. The Calif made trial of his abilities, and finding him in every respect intelligent and accomplished, appointed him one of his suite, and preferred his society to that of all his other counsellors. Now the Calif had a minister excessively envious whose jealousy was excited by the Arab's promotion, but dreading the anger of the Calif if he attempted anything against him openly, he continued to keep up a shew of friendship, determing to effect his ruin by some secret wile or artifice. He continued therefore daily to encrease in civility towards him, and at length invited him to his house to dinner, and mixed up in his food a large

^{*} It is here used as a noun, and means side.

portion of Garlic. After dinner he said to the Arab, - when you attend the Calif's assembly, take care to sit a distance from him, for the smell of the Garlic may offend him." The minister then waited on the Calif and said,—" The Arab whom you made your favorite, and whose company you prefer to ours, has spread about a report that you have a stinking breath." The Arab a little while after made his appearance, and seated himself at a distance from the Calif. The Calif desired him to come near him, which he obeyed, but covered his mouth as he approached with his sleeve. This action confirmed in the Calif's mind the truth of his minister's story and the treachery of the Arab. He thereupon wrote a letter to one of his governors to the following purport.—" On receipt of this letter, let the bearer be immediately put to death." He then sealed it, and delivered it to the Arab saying, convey this to such a one and return to me speedily with the answer. Arab took it, and in going out happened to meet the minister at the door, who enquired where he was going. He replied the Calif has employed me to carry a letter to one of his governors. The minister immediately conjectured, that the Arab would receive some very considerable present from the governor, and he determined in his own mind, to possess it himself,—" what say you, says he, if I release you from the annoyance and fatigue of the journey, and present you at the same time with two thousand Deenars? Most certainly says the Arab, you speak with judgment and in so doing will free me from a very unpleasant embassy.—" You have shot the arrow of your judgment, with the bow of unerring direction." So accept the letter. He then delivered it to the minister and received in return two thousand Deenars. The minister proceeded to the house of the governor and shewed him the Calif's letter. The governor read it, and in conformity to the injunction it contained, ordered the minister to be beheaded. After

^{*} It is evident that this example is similar to the one adduced in the text to denote distance and transition; It might therefore be naturally asked why the particle should not have a similar interpretation; I confess I see no good reason for it, but as the Arabian Grammarians think proper to allow it both applications, I have no wish to dispute the point with them.

come days had elapsed, the Calif remembered the affair with the Arab, and said to some of his atten lants, enquire after the Arab who was formerly with me, and desire the minister to attend. They told him, the Arab was in the city, but that the minister had gone on a message to a certain governor, and had not returned. The Calif desired the Arab to be called before him, and asked him the particulars of the matter, which be related from begining to end. But did you not says the Calif spread a report among the people, that I had a stinking breath? God forbid says the Arab I should report that of which I am ignorant. Your minister could have only told you this from treachery and deceit towards me;—he dug a pit for my destruction, in to which God has caused him to fall himself,—do not therefore grieve for his fate, for the proverb says, "he who digs a pit for his companion, will fall into it himself." Grieve not, for in grief there is no advantage. Unable

yourself to avoid the occurrence of contingent evils, how do you expect to ward them off others, as the Poet says,

> You lament at the untimely fate of another? But say can you extricate yourself from the power of death!

The Calif was astonished at this marvellous adventure, and saw that the almighty from the purity of the Arab's intentions had rescued him from an untimely end-He exclaimed—Vengeance on the head of the envious man!—Envy where it originates, will surely destroy its possessor. He then bestowed a dress of honor on the Arab, appointed him to the vacant office of his minister, and seated him at the head of the assembly on his right hand.

OF THE PREPOSITION,

1. The preposition of is used to denote the bound or termination of interval; (غَيْ الْعَا الْعَا) as applicable to time and space.

EXAMPLE.

I travelled to Koofuh.

Annotation.

There is nothing particular to be remarked of the preposition U1: it is the correlate of and as applicable to time and place, is properly rendered in English by To, and Till. The senses attributed to it in the text are doubtless those of most frequent occurrence, but there are a few others, which may be probably worthy of a place.

^{[&}quot;You have shot the arrow of your judgment from (or with) the bow of unerring direction." See page 40.] It may perhaps be worth remarking that the same idea is expressed nearly in the same words by Gay.

[&]quot;Go child, and when your grown maturer,

[&]quot;You'll shoot your next opinion surer."

THE PREPOSITION (3) is sometimes though not frequently synonymous with

EXAMPLE.

Annotacion.

1. LI After words expressive of love, esteem, &c. and their opposites hatred, aversion, and the like, serves to discriminate the agent in the sentence, which in such cases it immediately governs: as in the following example from the Quoran, where the BLOOMING HEBREW BOX in resisting the threats and blandishments of the Chaste Egyptian Dame, exclaims.

S O Lord, a prison is more desireable to me, than that which (these women) invite me to."

Here the first personal affix, is governed by [1] following the word is more desirable, and is thereby pointed out as the agent in the sentence.

2. [1] Is sometimes found in a sense directly opposite to its radical one, namely for beginning, and is consequently in this case synonymous with

EXAMPLE.

"She says, (i. e. the camel) while I am placing the saddle on her back;—has Inno-Uhmura drank of me, and is yet unsatisfied?"

The camel jaded and harassed by incessant travel is supposed to exclaim as above, on seeing her master about to remount her, but whether Inno-Uhmura was the name of the master, who relates the occurrence, or of some other whose conduct had passed into a proverb, I confess I am unable to decide,—these detached and frequently mutilated passages from the Poets which are constantly brought forward by the Arabian Grammarians in emergency, seem as often to

3. When that which follows bappens to be of the same general nature, or genus as that which precedes it, the preposition will then have an inclusive signification.

EXAMPLE.

Wash your hands and your faces to the elbows, (i. e. the clbows inclusive.)

Annotation.

require illustration themselves as the points which they are intended to illustrate; and without the aid of comment or context the sense must be often guessed at.

It seems worthy of remark that Till, like [1], in our old authors is found some times to denote with, and from.

EXAMPLES.

Till, denoting, with, in addition to.

The emptyce than oure story sayis,.

Come in Ingland in tha dayis,
In that land to ger be dwne,
And to be mad kyng hyr swne,
Henry, the quhilk oure kyng dawy,
And til hym seedis rycht mony,
Kend hyme nerrest ayre to be,
Than of all that reawte,

Wyntown, vii. 6. 230k

Till denoting from.

Swa til saynt margret eftyre syne, on As til malcolme in ewyn lyne, All our kyngis of Scotland, Ware in-til success yowne discendand,

Wyntown, vi. 19. 139.

See Jamieson's Diet .- _

In the latter example Jameson remarks that till is used improperly for from, and if the impropriety consist in the infrequency of its occurrence, the same may perhaps he said of [1].

They are both however found in this sense and should therefore be recorded.

4. When that which follows' [5] haspens to be of a different class or genus to that which precedes it, the preposition will then have an exclusive signification.

ENAMPEE.

Then continue the fast till night.

Amestation.

3. Ill Is occasionally synonymous with 3.

EXAMPLE.

"And do not desert me in society, under your threats, as if I were a scabby camel besmeared with pitch."

4. It is synonymous with him

EXAMPLE

But there is no return to youth, the very remembrance of which is dearer to me, than the most delicious wine."

This preposition may therefore be occasionally translated by, to, till, with, and from. The senses enumerated by the Commentator in the text, will be found in the following little Jeu d'esprit.

STORY.

I never says Furuzbug* experienced so severe a retort, as I did once from a certain Nabathæan. Are you the Furuzbug, says he, whose constant employment it is, to lampoon and flatter the people, for mercenary purposes? The same I replied. Than said he you are sunk in a privy to the very nose. But why exclude the eyes said I?—To enable you to behold, replied he, the abject state, into which your sordid passions have reduced you.

The name is sometimes written Khulikan and the Arabian Etymologists ascribe a reason for each. They say is compounded of it a friend and was; and with of it dismiss, let go, &c. and which in the current dialect signifies enough. This phrase the authour was frequently in the habit of making use of and at length it superceded his real name.

^{*} Furuzous one of the most ancient Arabian Poets celebrated alike for his extravagance of praise, and bitterness of censure. Some extracts from his writings will be found in the biography of Ibno-Khilukan, a work that has been eulogized by Sir William Jones in a strain of amplification, not much inferior perhaps to that of Furuzous himself:—The passage is so remarkable, that I think it should be laid before the reader. "Porrò scriptoris politissimi Ebn-1-Khalican, opus historicum non magis verborum elegantia et ubertate commendatur, quam illustriorum poctarum versibus, quibus conspergitur. Ac nescio an hic omnibus viturum scriptoribus sit anteponendus. Est certè copiosior Nepote, elegantior Plutarcho, Laertio jucundior, et dignus est profectò liber, qui in omnes Europæ linguas conversus prodeat." A very correct and elegant copy of this work which I procured at Bagdad is now in my possession; it consists of 1266 octavo pages, and 826 lives, and is considered I believe by the Arabs in general as an impartial compendium of biography, but as to copiousness, jucundity, elegance, and such other pleasing epithets ascribed to it by Sir William, I fear we must attribute them rather to the partiality than candour of the learned orientalist.

OF THE PREPOSITION

Annotation.

Busides the above senses, the particle is is found occasionally synonymous with a tipe in the () MOOGHNEE OCC.

The correspondent prepositions in Latin and Italian have a similar application, as

The original sense of the preposition, namely inclusion, is either real or metaphorical—the first has already been illustrated in the example in the text, the latter occurs repeatedly in the following

Wailing its lost mate, or its ravish'd young;

Like me it pours soft sorrow from its tongue."

They relate that AMUR-OOL-QUES, before his decease, delivered over his armour and military weapons to the care of SUMUWWUL BINE ADEEA. After his death, the

king of Kinduh sent an ambassador to Sumuwwul, to solicit the arms of the deceased, but he refused, and said, I will not deliver up any part of what has been entrusted to me, to any but the lawful proprietor. The king repeated his demand, but he persisted in his refusal, swearing, by the Almighty Goo, I will not abuse the trust reposed in me, nor act treacherously to gratify the king. When the ambassador reported the determination of SUMUWWUL to the king, he marched against him with his army; but Sumuwwul retreated into his fortress, and there secured himself. Then the king besieged it, and the son of Sumuwwul happened to be out of the fort at the time, and the king seized him and made him prisoner, and carried him round the fortress, proclaiming to Sumuwwul: I have taken your son captive, behold he is with me—then he shewed him to him, and said, if you will deliver to me the arms and weapons, I will restore to you your son; if not, I will slay him before your face; so choose which you like.—And Sumuwwul said, do as you please, for I will not violate my fai.h and Then the king put the son to death in the sight of his father. the king was baffled in his attempts against the fortress, and obliged to raise the siege and retreat in disgrace; but Sumuwwul bore his misfortune with patience, conscious of having performed his duty with integrity; and when the lawful heirs of Amur-oot-Ques arrived, he delivered to them the armour and weapons in his charge, preferring the observance of his promise and good faith, to the life of his own son; and the faith of Sumuwwul became afterwards proverbial.

OF THE PREPOSITION,

و ت رب

1. The preposition أَوَالِينَ denotes paucity, (عَالَيْنَ) and requires in construction an indefinite noun which it immediately governs, qualified by an adjective or epithet, and a verb in the past tense.

EXAMPLE.

ا رُبَّرُجِل کر یم لَقَیْنَهُ I visited a few liberal or generous mon.

2. It sometimes precedes a ضعير or indeterminate pronoun, and in this case governs an indefinite noun as its نعيز in the accusative or objective case.

EXAMPLE.

I visited a few men.

Annotation.

Neither the true character nor meaning of this word seems properly ascertained by Grammarians. By some it is considered a noun, by others a particle:—one will have it to signify paucity, another abundance, and for both opinions numerous examples are produced. Moola Jameé, the celebrated Commentator on the Kafeeu, says the word was originally formed to denote paucity, but the author of the Moognee-ool-Lubeeb, authority still higher, contends that its proper signification is abundance. From this 'chaos of mingled parposes,' how shall we extricate truth? The task would indeed be long and tedious, and provoke discussions unsuitable to the pature of this work, I shall therefore confine myself to a few observations on its practical application to the purposes of speech.

or رتب in the following sentence from the Qooran, is adduced by the author of the Moognee-ool-Lubech, as an example of its use in the sense of

Sale however has adopted the opinion of other Commentators, and renders it thus. "The time may come, when the unbelievers shall wish that they had been Moslims,"—instead of,—' the unbelievers shall frequently wish,' &c. In this he seems to have followed Maracci. "Aliquando, desiderabunt, qui infideles fuernut, ut fuissent Moslemi." Who justifies this version by the following note. Particula () significat tâm () multiplicitatem; quâm () paucitatem. Potest itaque verti multo ies, vel aliquando, vel fortassè. Hoc autem desiderium erit, juxta Gelalem () Die resurrectionis, quando infideles videbuni statum suum & statum filelium.

. In the following verse from رَحَى , the word رَحَى , is undoubtedly used in the sense of or paucity.

Annotation.

"There are few Children to whom nature has denied a father, and few parents, who never themselves had parents."

The poet in the first hemistich is supposed to allude to Christ, and in the latter to Adam.

after the particle (5 is very often understood, also frequently after 1, and occasionally after 1, of the two latter, the following examples will be sufficient.

*** There are few men from whose countenance the clouds can drink splendour, as they de from him who is, the proceedor of theorphan, and the support of the poor."

"There are few Cities containing men of exalted prowess and brivery.

When عَمْ الله or the prohibitive particle is affixed to رُبُّ الله مِن it destroys its government, example, الله مِن ا

This particle assumes no less than sixteen various forms, the following eight however are those of most frequent occurrence.

There are many things in the acquisition of which men exert themselves, which when they have acquired, they will wish they had never acquired. Second. There are few stratagems more advantageous than alliance.* The man remembered the maxim, thanked him, and went about his business.

2. It is occasionally synonymous with

EXAMPLE.

Annotation.

The true character of the as well as is imperfectly understood: although I believe at present, it is generally considered as a particle, yet the Grammarian , Seehuwueh, and others of high authority, contend that it is a noun, and nothing else. I shall as usual wave the discussion as unimportant, and content myself with offering a few examples of its practical application.

1. It is sometimes synonymous with

EXAMPLE.

66 It is not piety that you turn your faces during prayer, towards the East and the West, but piety is of him who believes in God and the last day, and the Angels and the book (i. e. the Qooran) and the Prophets, and who gives money for the love of God, to his kindred, and to orphans, and the poor, and to travellers and beggars, &c." See Qooran. C. ii.

It must be observed however that the words are capable of a different meaning, as remarked by some of the Commentators on the Quoran, who interpret them thus "notwithstanding his love of that money," &c.

[#] Lit -The son of the road,

Annotation.

It is sometimes synonymons with , y, example from the Qooran.

66 That ye may glorify God for having directed you, and that ye may give thanks."

It is synonymous with ...

It is synonymous with, is as mentioned in the Text.

EXAMPLE.

64 It is just that I speak not of God, any thing but the truth." See Qooran. C. vii.

It is evident from the above examples, that the preposition is capable of a variety of uses, besides those recorded in the Commentary, and there are several others of less importance which I have purposely omitted. The senses however in which it is most frequently found, are included in the following Story.

The Grammarian Seebuwuch with several others believe this particle to be a noun, synonymous with the word 120, and the reason adduced by them for this opinion is, that it occurs in this character in composition and is preceded by a preposition. Its nominal use however they say is restricted to poetry, but the author of the Moonner-ool-Lubreb extends it to every sort of composition, and gives an instance of it in common conversation, who is like a Lion." Some Grammarians however believe that the particle is never found in this sense, but when joined with the will, or who had be the author of the Moognee offers the following example from the Qooran, to prove the contrary. "And therefore certainly the unbelievers shall not prosper." It is not easy to translate the or particle of astonishment in the above example, without losing the peculiar force of the particle —Mara ci renders it—"Papè! certè non prosperabuntur infideles." Sale—"Aha! the unbelievers shall not prosper."

Annotation.

In the explication of these particles, or rather particle (for they are but different forms of the same word,) Grammarians are very diffuse. They are compounded as some imagine of and if or of and and if agreeably to the authority of Akrush is peculiar to the people of Hajaz, and if to the tribe of Tunkem. By the tribe of Soolymee, they are pronounced in and if the grammatical character also, of if or if has given rise to much controversy; some contending that it is at all times a noun, others that it is at all times a particle; the author of the Moognee however seems inclined to favor the latter doctrine.

Now, I have heard nothing of you during the whole month, and you promised to return in fifteen days: the month you see is finished; this is the night of the new moon. My soul, said he, you say right.—My intention was certainly to do so, on the day of my departure, but when I set out, my mind was so occupied, with the various

Whose Passion wakes the wildness of despair,

And mad, accelerates the hand of fate:

Farewell—Eternity relieves my care;

Death breaks affection's bonds, and ends thy hate.

She then stabbed herself with a knife she had in her hand, and died on the spot!

OF THE PREPOSITION,

The Grammarian Seenúwuen, is of opinion that of is an original particle of swearing synonymous with it, but others imagine that is an abbreviation, or contraction of an oath; and that is immediately derived from of thers, from happiness, felicity.

The word will occurs under seven various forms, viz. will, will, of these, the two first are appropriated to the words will, as will will, and the temple, as will will the other four are restricted to will.

Besides the above particles there are some nouns, such as tife, age, &c. / iz, duration, continuation; the book, i. e. Quoran, i.e. the temple; an oath; and happiness, or the pl. of are used in solemn forms of swearing.

The particle , is has already been illustrated in page 72, which see.

OF THE PREPOSITIONS.

ا عُدَا and الله عَلَى الله عَلَى

1. The prepositions, الله على and الله are used in the sense of exclusion or exception, (ولنشتا).

Annotation.

The prepositions \(\text{\text{\text{L}}} \), \(\text{\text{\text{L}}} \) and \(\text{\text{\text{L}}} \) considered either as verbs or particles, are every where used to denote the same idea, namely exclusion, or exception. As prepositions they govern the noun in the aorist, and as verbs in the accusative or objective case. See but were indeed with most of the Busruh Grammarians deny the verbal character of \(\text{\text{L}} \text{\text{L}} \), and contend that it is invariably an exceptive particle, while the grammarians \(\text{L} \text{\text{L}} \) HURUBER, \(\text{L} \text{\text{L}} \) \(\text{\text{L}} \) \(\text{\text{L}} \) \(\text{L} \) \(\text{\text{L}} \) \(\text{L} \) \(\text{L}

In which he appears to have followed Maracci, as indeed he very frequently does, who renders the phrase will be seen to have followed Maracci, as indeed he very frequently does, who renders the phrase will be seen to be that if si fueritis hoc facientes," The Commentators on the Qooran, aware of the general sense of the term, have accordingly proposed various interpretations, the most approved of which seems to be that of with mosumer Kashuper—who says the word he in the above passage must be rendered, acting with prudence and deliberation, the sense will then be—"Do not slay Joseph, for by that you will draw upon yourselves disgrace and reproach; but if you act with prudence and deliberation, cast him into a pit by the road side, where he may be discovered and taken out by travellers."

Annotation.

In the first sense it occurs in the following passage in the Qooran, I which Maracci renders,—" Proh deum, non est hic homo!" And Sale copying, or rather translating the Latin,—" O God, this is not a mortal!" The phrase all in means properly "God avert," Avertat Deus, hence the common expression (in or I in absit a te, in some respects resembling the Latin salutation Salvus sis. In its second or exceptive signification it is Synonymous with similar and significant, I excepted, or rejected him.—In this two-fold capacity of salutation and exception it resembles the English save, in the equivoque of Chaucer's Sompnour against the Frian.

"God save you all, save this cursed FRERE."

The author of the Mooghnee however on the authority of ابن مسعود I BNO Muscon, (one of the seven readers of the Qooran) reads the sentence عَلَّا اللهُ , with the tunween, and asserts that اللهُ أَنْ أَنْ أَنْ اللهُ اللهُ اللهُ اللهُ أَنْ أَنْ اللهُ ا

The prepositions No and No, are in every respect Synonymous with line except that they are never found in the sense of it. They correspond with the word save, except, unless, besides, &c. and their derivation is altogether as obvious as the English prepositions: whatever grammatical character therefore they may at present assume, it is obvious they cannot be considered in the light of original particles; they all occur in the following Story.

CONCLUDING REMARKS ON THE PREPOSITIONS.

The preceding view of the Arabic prepositions, will be found to contain almost every thing essentially useful. The Annotations are intended to convey a more precise and accurate notion of their extensive force, and the Stories and Extracts will illustrate their practical application to the purposes of speech. Minute discussions on their orgin and grammatical character, I have purposely omitted, not that I consider such discussions, as either useless or uninteresting, but that I am disposed to believe they are unsuitable to the nature of the present work. Theoretical disquisitions are good in their proper place, but they are not in their proper place in an elementary treatise, which should aim rather at the illustration of specific rules, than the discovery or examination of abstract principles.

CLASS SECOND.

1. The second class contains six words, termed or particles resembling verbs, which precede in construction both terms of a proposition, governing the Subject in the accusative or objective case, and the predicate in the nominative, viz.

Annotation.

The particle of governs generally the subject of a proposition in the accusative or objective case, I say generally, for examples are produced in which it is supposed to govern both terms in the accusative. The following examples may be sufficient to illustrate this.

Approach at night when darkness spreads her sable wings,
But let-your steps be silent and cautious, for our centinels are truly Lions.

In which the words and and with the subject and predicate, are both rendered Munsoob by

And in the following example from the or traditionary records of the Prophet.

" Verily the depth of Hell is equal to a seventy years Journey."

MILTON in like manner measures space by time.

44 Nine times the space that measures day and night.

To mortal men."

It is worth remarking that the three great Poets, Homen, Virgil and Milton, have all exerted themselves in extending the idea of the depth of hell. Homen makes it as far beneath the deepest pit of earth, as the heaven is above the earth. II. viii. 16. Virgil twice as far, Am. vi. 578, and Milton thrice as far; their efforts are commendable no doubt, but not to be compared with the more magnanimous flights of a modern Bard.

2. Of these, the two first, namely in and if, are used, to verify, or corraborate the sense of a given proposition. (

See the new THEATRUM PORTARUM.

It must be remembered that instances of the above government are by no means numerous, and that grammarians have accounted for the anomaly on other principles, which however I do not deem of sufficient importance to repeat.

The word governed by , is sometimes a pronoun understood.

EXAMPLE.

شعر

ان مَن يَد خُلِ الْكَنْيِسَةَ يَوْمًا إِنْ مَنْ يَد خُلِ الْكَنْيِسَةَ يَوْمًا يَلْتَ فَيْهَا جَأْ ذَرَا وَ ظِبًا رَ

"Whoever enters the Synagogue, will certainly, find in it beautiful youths of both sexes."

The Arabian Grammarians will not allow the pronoun in the above verse, to be the word governed by the particle, but g understood, viz. of for in the sense will then run—" the fact is this, whoever, &c."

The particle is sometimes written without the Tushdeed with the Noon Sakin, or quiescent; and in this form has seldom any government, but the grammaxians of Koofuh believe that in all

3. The third is in the sense of similitude, or comparison.

EXAMPLE.

تَّ كَانَ زَيْلُ السَّلُّ " Zued is like a lion."

Annotation.

such instances it must be translated negatively, example "iddis" "Zued is not but going." But this it may be presumed is a distinction, without a difference, for, "Zued is not but going," and "Zued is certainly going," convey in fact the same meaning.

Grammarians have assigned the following five places to in composition.

- 1. It commences a sentence, as وَا وَا الْهُ الْمُلْهُ الْهُ الْمُلْهُ الْمُلْهُ الْمُلْمُ الْمُلْهُ الْمُلْمُ الْمُلْهُ الْمُلْهُ الْمُلْهُ الْمُلْمُ الْمُلْمُلْمُ الْمُلْمُ الْمُلْمُلُمُ الْمُلْمُلُمُ الْمُلْمُلُمُ الْمُلْمُلْمُ الْمُلْمُلُمُ الْمُلْمُلِمُ الْمُلْمُلُمُ الْمُلْمُلِمُ الْمُلْمُلُمُ الْمُلْمُلِمُ الْمُلْمُلِمُ الْمُلْمُلُمُ الْمُلْمُلِمُ الْمُلْمُلِمُ الْمُلْمُ الْمُلْمُ لِلْمُلْمُ الْمُلْمُ الْمُلْمُ الْمُلْمُلُمُ الْمُلْمُلِمُ الْمُلْمُ لِلْمُلْمُ الْمُلْمُلْمُ الْمُلْمُ لِلْمُلْمُلُمُ الْمُلْمُ الْمُلْمُ الْمُلْمُ لِلْمُلْمُ الْمُلْمُ لِلْمُلْمُ الْمُلْمُلِمُ الْمُلْمُلِمُ الْمُلِمُ لِلْمُلْمُ لِلْمُلْمُ لِلْمُلْمُ لِلْمُلْمُ لِلْمُلْمُ لِمُلْ

EXAMPLE.

OF THE DERIVATION OF ...

The Arabian Grammarians have amused themselves in tracing the origin of this word, but have produced nothing satisfactory. Their principles of derivation, if indeed they can be said to have any such principles, are so whimsical and extravagant, that it may be doubted, whether they can be matched by those of our most fanciful European Etymologists. They seem to pay little regard to the original sense of the term, from which a word may be derived, and make no scruple to refer it to any word, or indeed to any phrase, provided

4. The fourth is in the grammatical sense of and is used to explain some uncertainty supposed to exist in the first branch of a compound proposition, it can therefore only occur between two sentences, distinguished from, and constructed with each other, by reason of some opposition contained in them, or denied by one of them.

EXAMPLES.

"Zued is absent but Bukur is present." خَابَزَيْدُ لِكُنَّ بَكُرًا حَاضِرُ الْحَافِرُ وَمَاجَاءَنِي زَبُدُلِكَنَّ كَا حَاضِرُ وَمَاجَاءَنِي زَبُدُلِكَنَّ Zued did not come to me but Oma did."

Annotation.

they are able to point out by the laws of permutation, the causes by which such a change may be legitimately iffected:—for instance they derive the word [o], (but,) from the sentence in the legitimately iffected:—for instance they derive the word [o], (but,) from the sentence in whatever state things may be;" by rejecting the last three words and subjecting the remaining one, ([o]) to all the evoluations of grammatical change. By some grammarians is supposed to be compounded of the negative particle of and the first personal pronounce of the Arabs are known occasionally to mke use of the expression, of [o], equivalent to [o], "I am not standing."

- 1. It may be the 3d pers. plur. sem. of wif lassitude, weariness, as in the example will, i, e. The women were fuligued," the original form of the word will having undergone the necessary changes established by the laws of permutation.
 - 2. It may be referred to off priginally of ricinity.
- 3. Or the 3d pers. mas, pret. pass, from waif complaining: being originally in the pass.

^{*} This is perhaps as happy an Etymology as King Parin, from the Greek δοπες. Thus, δοπες ήπες - δπες - Dioper - Napkin-Pipkin-Pipkin-Pippin-King-King Parin. See Div. Purley. Vol. 1, p. 130.

5. The fifth is رَيْتُ , and is used to denote supplication, or wishing, (تُعَانِي)

200 FITHE WORD

The true origin of this work seems little understood, though I believe it is generally considered by the Arabian Grammarians as compounded of the similar of Kaf of similar of the original construction therefore of such a sentence as and the particle in the original construction therefore of such a sentence as and the particle in the original construction therefore of such a sentence as and they read is like a Lion? would have been, agreeably to the above theory, and they readily account for this Hysteronproteron-evolution, by simply remarking, that the chief object in the mind of the speaker on all such occasions being similar or comparison, he would naturally commence the sentence with a word expressive of such similar the and hence with the slight change of Kusrah into Futhis, would eventually be produced the word the author of the Mooghnee however rejects this theory and considers it, as an original uncompounded particle.

OF THE WORD .

Furnata is of opinion that will is compounded of will (with the Noon quiescent,) and the particle of the junction of two homogeneous letters under the sign Idgham. This however is contrary to the doctrine of the schools of Busruh, who consider it an uncompounded primitive. On the other hand the grammarians of Koofuh, maintain that it is a compound of the negative X, and will, the intervening Kaf, being an expletive;—thus,—will, the Kusruh, of Humzu, is transferred to Kaf, after rejecting the vowel point of the Humzu, and the pleonastic letter—being omitted leaves with will, but Ruzzz rejects the etymology on the plea that by this change, the sense of the sentence would be entirely altered, converting a discretice or adversative proposition into a conjunctive, boths members of the compound being thereby rendered negative.

The word is also written with a single Noon, quiescent thus but grammarians seem divided in opinion, whether it should be considered merely as a different form of of or an independent primitive; it is frequently accompanied by the conjunctive particle of, the insertion or emission of which is guided by sundry conditions which I omit recording, as unprofitably minute.

Sir William Jones, has quoted these lines in his history of the Persian language, in a manner that destroys the versification, and embarrasses the sense, by the introduction of the conjunction of the conjunction of the second, and of the commencement of the fourth line; as the measure terminates on the penultima of the word to the final syllable of which, (i. e. 15), by the figure Dialysis,* must in reading be made to commence the following line, thus:

He has also mistaken the sense of the two first lines, taking the relative to for a negative particle, and the word to denote the abode of beautiful damsels, (and the second fawns, and is hence transferred to denote the abode of beautiful damsels, (and line, and in the second line, with the He Muftoohu and Meem Muksooru, is a contraction of the fault of the generic term for pigeon, of which the turtle-dove is a species. (is the plural of the generic term for pigeon, of which the turtle-dove is a species. This inaccurate reading seems to have been copied from Gentius, who has himself overlooked the true sense of the lines, translating in the first line delicium, and in the second campestris, thus:

66 Illud quod de mentione delicii ad auras meas pervenit,
Si turtur quoque campestris, audiret, mihi congemeret."

expressed in the first line. In some copies of the Goolistan with particle is would be required in the next line to complete the measure. It may be observed in the above example,

that المنت contrary to the rule laid down by the Commentator, is followed by a verb; hut this is a common ellipsis in poetry, a noun or pronoun being understood. Some copies read المنت instead of أَمِنَ which has nothing to recommend it. The author of the Mooghnee quotes the following example in which أَمِنَ نَعْتَ الْمِحَانِيَ عَلَى الْمُحَالِيَ عَلَى الْمُحَالِي اللهُ وَاللهُ اللهُ ال

The word is denotes contingency in some event, in a twofold manner.

First. Hope or expectation, (تُوَقِّعُ) of some contingent good.

Second. Fear or dread, (اشفا ف) of some contingent evil,

EXAMPLES.

- 1. Perhaps (I may gain) an interview with my beloved
- 2. الْعَلَّا لَرَقِيبَ حَاصِلَ Perhaps my sival is (there) present.

It denotes occasionally causality or illation, (Jules). Example from the Quorant

"Do good, (works) that you may be happy."

The word Lei agreeably to the author of the Qamoos, assumes eleven various forms, viz.

their taking after them two nouns which they immediately govern, tike transitive verbs, the sense of which they respectively assume.

EXAMPLES.

The word from which it is derived signifies in the past time: 1. He followed, comprehended.

2. Intransitively, he arrived or reached the age of puberty, as a boy,

3. Intransitively, he arrived or reached the age of puberty, as a boy,

4. The child of spring was now mature. On the measure with it signifies. 1. He wished to follow. 2. He comprehended. 3. He restored, amended or repaired, as in the phrase with the undertook to repair one thing by another, resembling in this respect the sense ascribed to but in English by Horne Tooke,—namely to boot, superadd, &c. The latter sense namely reparation, or restoration, appears most suitable to the grammatical term as applied to the conjunction whose office is properly the restoring or amending as it were, of some doubt or uncertainty originating in the first branch of a compound proposition which meaning may be illustrated by the ingenious remark of the Abbè Sicard. Ainsi, après l'énonciation d'une première proposition, trouvant un abstacle, ou un empêchement à l'exécution de ce qu'on vient de dire, on semble avertir l'auditeur ou le lecteur qu'il faut s'arzêter; on lui diroit, en Latin, cede (sed) arrêtez: il ya ici une restriction, un changement

à faire; en grec, Aλλά; il ya, ici, une borne, un achoppement; en anglais, but; il y a un plus, un point majeur à examiner; ensin il ya en français, un Mais."*

STORY. II.

A certain King of Persia had grown so excessively fat, that though naturally of a graceful form, he resembled in size more an elephant than a man. His Physicians in consequence tried various expedients to reduce his enormous size, but their efforts had no other effect than to encrease it: in this state, a certain eminent Physician waited upon him, and said, I will undertake to prescribe for your Majesty, provided you allow me three days to consult your horoscope, and determine on some medicines suitable to your case; perhaps through the aid of the Almighty I may effect your recovery. At the expiration of the time required, the Physician waited upon the King, and said, I have consulted the aspect of the stars, and observe that you have but four days more to live: when I saw this your approaching destiny, I was much troubled, would to God I had not seen it. If you doubt my words, let me be confined close to you and treated agreeably to the event of my prediction. Then the King gave orders for his confinement, and began to prepare for death, discarded all his former amusements, excluded himself from the eyes of mankind, and

And when the appointed day arrived, the King called the Physician before him, and spoke to him on the subject. The Physician replied, I made use of this stratagem, in order to reduce your corpulency, for I knew that until this occurred, no medicines would be of any avail, but now I may prescribe to you with effect. Then the King ordered him a dress of honor, and gave him a suitable reward.

CLASS THIRD.

The third class, contains two particles, which resemble the imperfect verb (), possessing like it a negative signification. They precede both TERMS

Annotation.

OF THE GOVERNMENT OF L.

As a grammatical agent, it precedes both a definite and indefinite noun, but most frequently the former, guided however by sundry conditions, the non-observance of which entirely destroysits government.

of a proposition, and govern the noun or subject in the NOMINATIVE, and the PREDICATE in the OBJECTIVE case.

Annotation.

CONDITIONS ATTENDING THE GOVERNMENT OF 1.

1. In the sentence in which it is employed, the PREDICATE must not precede the subject in the order of construction, otherwise its government is cancelled.

EXAMPLE

2. The subject must not be preceded by the particle of, as an expletive.

EXAMPLE.

نيعنا نقمال أنته و O tribe of Azanuh, you possess neither gold nor وَلاَ صَرِيفَ النَّهُ الْمَا أَنَّا النَّهُ الْمَا ال

3. The word or sentence immediately connected with the predicate, must not precede the noun of [6, in the order of construction.

EXAMPLE.

If however the Jose be a Zurf, or a noun in regimine, the government will be preserved.

EXAMPLES.

المنت المنت

To preserve the government, the natural order would be stored, and I suspect faulty.

Of these (is used indifferently with a definite or indefinite noun, & with an indefinite only.

EXAMPLES

"Zued is not standing." لَا زَيْدُ قَانِيًا Wo man is ingenious."

Annotation:

4. The particle XI must not precede the PREDICATE, otherwise the government is destroyed.

EXAMPLE

The word La as a relative, indicative, prohibitive, and interrogative particle, has a great variety of senses, attended with numerous grammatical distinctions, which cannot well be detailed here.

OF THE PARTICLE &.

The resemblance subsisting between & and the defective verb , is considered by Ibnoor. Hajib, in his Commentary on the Kafera, as inferior to that of Le as it is not formed like it peculiarly to denote present negation; is seldom found with a definite noun; and cannot be used in a sentence the predicate of which is preceded by , as an expletive: for these reasons it possesses a much more limited government than Le, and some grammarians go so far as to deny it any government but in poetry. As an Agent however it is guided in its application, by the same conditions already recorded of Le, with the exception of that relating to less a redundant particle preceding the predicate, in which form of construction it can never be employed.

Y preceding an indefinite noun has the force of a Universal negative, as in the example الْمَارِ عَلَى الْمَارِ الْمَارِي وَلَّالِي الْمَارِ الْمِلْمِيْرِ الْمَارِ الْمَارِ الْمَارِ الْمَارِ الْمَارِ الْمَارِ

 \mathbf{D} d

As grammarians however have observed a nice distinction between y in the character of is and y when synonymous with the verb is a shall endeavour to state in as few words as possible, the grounds upon which they suppose this distinction is founded.

The term is signified literally negation of the genus, and as applicable to the particle y in such a phrase as you with many in the house; and is therefore properly distinguished from y when resembling the imperfect verb it's office being simply to denote individual, or particular negation, of one or several from a general Class. Now as the negation in the above example is complete and universal, it is obvious that the proposition expressive of this negation, cannot be followed by a conjunction in order to restrict or qualify the general term; for example after the words in the house, we cannot add if it is obvious that the house, as this would in fact be a palpible absurdity; but the case is different with the same particle when Synonymous with the

It must be observed in the above example, that the noun of I in the character of which it is assumes over its final letter the indeclinable mark futhu, whereas in its verbal capacity, it governs (under the conditions already specified) the subject in the nominative, and the predicate in the objective case: this the Arabian Grammarians account for in the first instance, by supposing an Ellipsis of the preposition on, termed عمر المرابع المراب

The particle as a Universal Negative has the same government as if provided, first that the following noun, or noun affected by the negation, is connected with another word in the agrist case, i. e. in regimine, or has any connexion of a similar nature to a noun in regimine.*

EXAMPLE.

In regimine. لا صَاحِبُ جُودِ مُوجِودُ No man of liberality is now existing,

Resembling a noun عند المنافع المنافع

y is the common responsive negative and is directly opposed to as in the following elegant couplet.

As I saw a fawn upon a hillock, whose beauty eclipsed the full moon; I said, what is thy name? she answered Deer. What, my Dear? said I, but she replied, No, No!"

It is impossible to preserve in a translation the delicate play on the words, it is, it is impossible to preserve in a translation the delicate play on the words, it is, it is impossible to preserve in a translation the delicate play on the words are delicated. This species of paronymous composition is very common in the writings of the Persians and Arabs, and seems to have been practiced occasionally by the ancients: Vossits in his rhetoric has given numerous examples of the paronomasia from the Greek and Latin poets, others will be found in Aulus Gellius, Plautus and Ennius. &c. which the reader if inclined may consult with pleasure. In the mean time I shall content myself with offering a quibble of rather a different description, the effect depending entirely on the ambiguity of homonymous words.

^{*} Any word connected with another so as to render the sense complete is termed, علاضاً في or شيعة المنضاف or مضارع المنطقة

Α΄νής τε καλφύν ανής, σςνιθα κέν δςνιθα δ΄ σμως, ἐπὶ ζύλε κέ ζύλε καθημενην, λίθω τε κέ λίθω βαλών διώλεσεν.

Vir non vir, avem nec avem tamen, in arbore non Arbore sedentem, lapide non lapide feriens interemit;

That is—A man not a man, casting a stone not a stone, .

Killed a bird not a bird, sitting on a tree not a tree.

By the first (in the order of the original), is meant a eunuch or hermaphrodite, the second a bat : **
the third the sambucus or elder-tree, + and the latter the pumice stone, about the nature
and origin of which naturalists are not agreed.

OF THE PARTICLE SX.

The etymology of this particle has given rise to a variety of discordant opinions, which I shall briefly notice as a matter of curiosity, if not of instruction. The grammarian Ukhrush, says it is nothing but y with the paragogical (3 marked with the vowel point Fut, hu, in consequence of the junction of two quiescent letters, and the author of the Uozuh, (((a))) ascribes to it the same government with ((a)) but restricts its application to the word ((a)), which some grammarians consider as comprehending all nouns of time, such as zelw, ((a)), &c. and this is also the opinion of Inno Mulik in his Jan.

One peculiarity attending it is, that in the sentence in which it is employed, either the subject, or predicate must be understood; the common practice of the language seems to authorise the rejection of the subject, as "You have been su

^{*} LOCKE says it was long seriously disputed whether a bat was a bird or not.

⁺ This is the interpretation given by Suidas, and may perhaps be disputed.

Annotation.

Others again refer it to wal in the past tense, the Ya being changed into Ulif, and we into

בּבְּיבֵּילֵל Unoo Onuenun, and בּבְּילֵל Inno Turawun, imagine it to be compounded of אַ and the letter, is redundant in some other word, as in the following example from the Qooran, בּבְּילֵל but this is ridiculous; the Ta is not redundant in the word בּבְּיל but this is ridiculous; the Ta is not redundant in the word בּבְּיל by the carelessness of some transcriber. It is written thus erroneously in Maraccí. The author of the Mooghnee has entered into minute details regarding its government and the conditions attending its government, but they do not appear to me of sufficient importance to transcribe.

mentary, indeed it is to be feared I have already explained more than is necessary, I shall therefore close this annotation, with one or two miscellaneous remarks.

The intensive or corroborative negative which in Greek is effected by two or more negatives is provided for in Arabic, by a peculiar form of conjugation i. e. by the adjection of the prohibitive X and Noon Sukeela subjoined, as " let him certainly not strike." But this it must be remembered is applicable only to prohibitive forms of expression. It is curious to observe the concourse of negatives in the following passage from Demosthenes, Οὐδέποτε οὐδέν οὐ μλ γένηται τῶν δεόντων. 'Nothing that is necessary will ever (or never) be done,' which however is not more remarkable than the following attributed to according who had lost his hat—"Did nobody see nothing of never a hat no where?"

The particle in almost all its various, and even opposite relations, bears a striking resemblance to the Greek Mi, as and of do to of: to illustrate the latter remark, I shall offer the following little extract from Plutarch as quoted by the Messicurs De Port Royal, not indeed so much for the purpose of elucidating a point of comparatively no importance, as to introduce to the reader two very successful and spirited versions of the original into Arabic, by Shuern Unmun, a learned native of Yemen, at present attached to the College of

CLASS FOURTH.

The fourth class, contains seven particles, which govern the noun in the OBJECTIVE case, viz.

I. The Particle of synonymous with

ţ

EXAMPLE.

The water was equal with the wood.

Annotation.

The Particle, 1, as synonymous with is like other Particles a subject of controversy with Grammarians, some contending for its government, and others denying it, and both parties producing arguments and quotations to defend their respective opinions. The author of the says the government usually assigned to j, is properly owing to some preceding verb, either expressed or understood in the sentence, as in the example "" I travelled with Zued."

It always in the above sense, denotes society or companionship, and is found to occur three different ways in a sentence.

1. It is preceded by a verb, as سرت وزيداً T travelled with Zued? Or by a word resembling a verb in sense, as, مَالِكُ وَزِيْداً i. e. what are you doing with Zued?

2. المنتشار or exception, in two ways. The first is termed متشمل or homogeneous, and signifies in its grammatical sense, that the or word following the Particle of exception, is of the same species, or homogeneous with the مستثنى مند or word preceding the Particle,

EXAMPLE.

The tribe came to me, except Zued.

The second is termed منقطع and signifies that the منقطع and signifies that the must be heterogeneous or dissimilar in their nature.

EXAMPLE.

The tribe came to me except the Ass.

A man of learning went one day to the house of a Grammarian, who happened at the time to have a boy before him reading Syntax. The learned man stopped at. at the door to hear the boy read, and heard him say to his master. 'O Sir, when I say," " all the people went out but Zued." and am asked—why did not Zued? go out also? What answer should I give? Say, replied the master, that he was busy beating Amr. Very well, said the boy: but when I say, -" the tribe rose up all but the Ass," and am asked—why did not the Ass rise up too? What should I answer? Answer, said the pedant, that he was busy eating grass. Good, said the boy-and when I say-' the General came along with the army,' and am askedwhat brought the General along with the army? What should I say? Say, said the schoolmaster, they are come by order of this gentleman (at the door,) to flog me. On hearing which the boy uttered a shriek—exclaiming—protect me, O followers of Monumen! O father! O brother! O people! hasten, hasten, to my assistance. for this man at the door, is certainly mad, and has given orders to have me beaten, and out he ran. The man laughed heartily at both of them, and went about his business.

CLASS FIFTH.

The fifth class contains four particles, which render the final letter of the Aorist Tense viz.

اِذَنْ بَيْ لَنْ أَنْ

1. The Particle of prefixed to the Aorist, restricts it to rurung time.

EXAMPLE.

Thope you will rise.

Annotation.

OF THE PARTICLE

The Particle with the Human Muftoon, and Noon Quiescent, as explained in the Text, occurs both as a Noun, and a Particle.

As a noun it is supposed by the author of the Moogunee and other Grammarians, to be equivalent to lift the first personal pronoun, as "I did," and in other cases to the second personal pronoun, in the words "ii" lim limit where the termination is merely indicative of gender or number.

As a Particle it is used in four ways:

Its pronoun is generally rejected in composition, but sometimes expressed, as وَالْوَانِكَ فَوْمُ الْرِخُاسَالْتَنْدِي But if you had solicited me in the day of prosperity.

It is occasionally met with as an Explanatory Particle, synonymous with as in the following Example from the Quoran: (That is, make the Ark.)

But if prefixed to the Preterite it causes no alteration in the time, and is then called اَنَ الْمُعْلَ رِيَّة or the infinitive اَنَ الْمُعْلَ رِيَّة

EXAMPLE

Your going out surprised me, or it surprised me that you went out.

2. The Particle in restricts the verb to future time, in a confirmed negative sense.

EXAMPLE.

You will certainly not see me.

Annotation,

As a pleonastic particle it occurs as follows:

- 2. Between the Particle عَمَا and a مِشْكَالُهُ i. e. a verb of swearing: as الْوَانَى آقْسَمُ بِاللَّهِ And a أَوْانَى آقْسَمُ بِاللَّهِ If I swear by God.'
- 3. Between the Preposition and its governed word; as عُرِيْرُكُ وَالْمُونُ Zued is like a Lion;
 - 4. After اذًا أَنْ خَرْجَتَ as, اذًا الله When you went out.

OF THE PARTICLE of

is a negative Particle restricting the verb to future time. The Grammarian is says it was originally a, the Alif of which is changed into Noon; but this Etymology is rejected by the author of the Mooghnee who confirms the account given in the Commentary, in which opinion he is supported by and which opinion he

This Particle, agreeably to the authority of the Grammarian KHULEEL is compounded of Σ and $\widetilde{\mathbb{C}}$. The Humza is rejected, for the sake of euphony, heaving $\widetilde{\mathbb{C}}$, the Alif of which is also thrown out, because two quiescent letters occurring together cannot be pronounced, and thus we have $\widetilde{\mathbb{C}}$.

3. The Particle is used in the sense of is and in or cause and motive, indicating that that which precedes it, is the cause of that which follows it.

EXAMPLE.

آ سُلَوْتُ كُوْلُ الْجَنْةُ [I embraced the Moosulman faith, that I might enter into Heaven.

Annotation.

OF THE PARTICLE

The author of the Moognner says, that is a noun abbreviated from in the following verse:

How can you incline to peace, Your slaughtered friends being yet unrevenged, And the flame of war still raging?

It occurs as a particle in the sense of يُم التَعَلَيْلُ and تَي الْصَدَرِيَّةُ and in this sense precedes the عَنْ الْمُوسُولَةُ Example, مَا الْمُوسُولَةُ that is, الْفُوسُولَةُ Why did you strike.

It precedes also the مَا اَلُصْدَ رِيَّةُ لَهُمْ وَيَنْفِعُ بَالْعُتَى كَيْمَا يُصَّرُونِنْفِعُ Example, يَرْجِي الْفُتَي كَيْمَا يُصَّرُونِنْفِعُ A man may expect to receive the good or evil he does.

Also in the sense of الكَيْلَا تَاسُوا as الكَيْلاَ تَاسُوا for الكَيْلاَ تَاسُوا 'That you be not sorrowful.'

^{*} As a proof of this it may be observed that the is retained in which would have been tejected had been here a governing Particle.

4. The Particle is used in the sense of and and on answer, and consequence, and restricts the verb to FUTURE time.

EXAMPLE

Annotation.

OF THE PARTICLE 25

Some Grammarians maintain that 0.51 is a noun, but the general opinion is that it is a Particle.

As a Particle some derive it from 0.51 and 0.51 and others again allow it no Etymology, but consider it a simple uncompounded Particle.

The Grammarian (says it is always used in the sense of and and and and and as explained in the Text; but be merely admits its general application in this sense, and gives the following example, to prove that it is sometimes met with as the alone;—as in answer to the assertion, alone; alone; alone in answer to the assertion, and it is is one of the Grammarian observes that truth cannot be considered as a consequence of the preceding assertion.—'I love you,' and must therefore be looked upon merely as the answer. This is one of the many trifles that exercise the ingenuity of Arabian Grammarians.

The government of is guided by certain conditions.

The Particles in the Fifth Class are included in the following Story.

STORY.

I called one day, said a learned man, upon a friend of mine, who was an excellent Singer, and said to him, I am come to you, that you may enliven me with a song, for I have been annoyed this morning, and know no remedy so effectual in dispelling care. I beg therefore that you will oblige me with a couple of good verses. He answered, with great pleasure, and sung the following.

Thy flight the knots of patience hath unwound,*
Yet in my soul thy form is firmly bound:
What were thy wrong, love's bitter to allay,
With sweets from me withheld; on others cast away.

I was delighted, says the narrator, with his harmony, and found myself relieved from the affliction that weighed upon my heart, and asked him, do you think any other person in this city can be found a match for you in singing. No said he, I do not think there is, nor will you ever find in it any such. I then took my leave of him, saying;—I will call upon you tomorrow, please God, between the

noon and evening prayers.—Then, said he, I will sing you something that will please you. One of my friends called upon me in the evening, and informed me that the King had ordered the Songster to be put to death.—On what account I asked? Because replied he, the King's Daughter heard him singing to-day and was so enchanted with his voice, that she was nearly throwing herself down from the top of the palace in ecstasy;—the King ran and drew her in from the window, and having locked the door, ordered the Musician to be put to death. On hearing this said the learned man, I made my escape, as soon as the people left me, fearing I might experience the same fate myself, I being in fact the cause of his singing.

CLASS SIXTH.

The sixth class contains five particles which being prefixed to the aorist, render the final letter or quiescent, viz.

1. The Particle of converts the Aorist into a negative preterite.

EXAMPLE

آلُمْ يَضْرِبُ In the sense of مَاضَرَ لَ He did not strike.

Annotation.

OF THE PARTICLE J.

The Particle is synonymous with (... Its effect upon the Aorist is to change rendering the final letter quiescent, and seems in this respect to correspond with the Apocope of European Grammarians. In conversation however this rule is not always observed by the Arabs, who use it like (... and x without causing any difference of inflexion in the verb; the same license is sometimes indulged in Poetry, and what is still more extraordinary the Grammarian is sometimes says, it occasionally renders the Aorist indulged. and in this way he reads the first sentence of the 94th Chapter of the Qooran:

"Have we not opened thy breast." اَلَمْ دَشْرَحَ لَكَ صَدْرَكَ

2. The Particle is used like but is peculiarly applied in the sense of to denote universality of past time, and indicates, that the action conveyed by the verb was never performed at any past period.

EXAMPLE.

آ يَضُوبُ زَيْكُ اللهُ In the sense of مُاضَرَبُ زَيْكُ مَا ضَرَبُ زَيْكُ مِنَ الْاَزْمِنَةُ الْمَاضَيَّةِ

Zued did not strike (him), at any past period.

Annotation.

OF THE PARTICLE U.

The distinction observed by the Arabian Grammarians in point of sense between and and it seems to be this, that is as a Negative relates to a portion of time past, whereas it in a more comprehensive and absolute sense, embraces the whole period; we can say therefore it is in the sense of the control of time past, whereas it is a more comprehensive and absolute sense, embraces the whole period; we can say therefore it is in the sense of the control of time past, whereas it is a more comprehensive and absolute sense, embraces the whole period; we can say therefore there, and say if it was not then, but was afterwards; but we could not substitute it in the sense tence, and say if it is in the sense tence, and say if it is in the sense of the control of the control of time past, whereas it is a more comprehensive and absolute sense, embraces the whole period; we can say therefore the control of th

أَلُو differs also from it in this, that the verb of the latter may be some times omitted in a Sentence, as that is المُو اللهُ عَمْ اللهُ الله

The word U besides its use as a governing Particle, is employed to denote time, and seems in this case to recemble when. As such, it is prefixed to a verb in the past time, in a Proposition consisting of

two members, the second of which is connected with the first by means of this Particle, as ا كرمته When he came, I honored him; It is therefore termed by Grammarians to denote the relation it bears to, or its existence with some other thing; and by others again for a similar reason, to indicate its necessary connexion with some subsequent Event. زفارسي زابي سراج and many other Grammarians however consider it as a Noun of time, synonymous with the word but IBNO MALIK thinks rather with is.

Is also used in the sense of fixed or exception, as in the following example from the 86th · Chapter of the Queran;

ا و كُلُّ نَعْسَ لَهُ عَلَيْهَا حَافِظُ

There is no Soul without a Guardian over it.

4. The Land or Prohibitive & is directly opposed in sense to the high or action by an agent, whether the 1st 2d or 3d reason.

EXAMPLES.

لَا يَضْرِبُ Let him not strike.

Do thou not strike.

Let me not strike.

which amounts to this, that, 'every soul hath, a guardian over it,' and in this way the sentence is rendered by Sale, as well as Marracci, though the latter reads if instead of and makes of a conditional instead of a Negative Particle,—"Si omnis anima certe non est super eam custos!" OF THE PARTICLE CALLED X OR IMPERATIVE X.

The کُسُرُ or letter وَ وَ of command may be always marked with the vowel عَرَالُا مُورِ but the Grammarian مَسُرُ makes it وَ وَ وَ ti is generally rendered Quiescent, and also occasionally after مَرُّدُ .

It is generally omitted in the 2d Person of the Imperative Active, and also in the 1st Person, and is sometimes understood in Poetry, though its government remains, as "

And let your generosity or munificence reserve for me a portion.' The Grammarian however does not subscribe to this rule even in Poetry, unless it is found preceded in the Sentence by the preposition of the sentence by the preposition of the sentence are served.

But if the Aorist he merely in the latter sentence, or in that containing the consequence, it may, or may not be marked at discretion, as it is at discretion, as it is at discretion, as it is at discretion, as

Annotation.

Say (O Mohummud) to my faithful servants; let them observe the stated hours of prayer.

The Prohibitive Particle Y is seldom found with the 1st Person, Dut is equally applicable to the 2d and 3d. Its origin and character are disputed. Some Grammarians derive it from the Y LAM of command, by adding to it Alif— says it is not a prohibitive but a Negative Particle, and that the government ascribed to it, is to be attributed to the Imperative LAM understood: but both these opinions are overruled by the author of the Mooghnee who confirms the doctrine recorded in the Commentary.

OF THE PARTICLE OF.

There is nothing to be remarked of except that it is used as a Negative as well as a conditional Particle, and that it is frequently found as a mere expletive. Schultens says it is used rhetorically as an animated Aposiopesis in swearing, a use that has not been discovered by any of the Arabian Grammarians, and which I shall not therefore transcribe. The Particles in Class the Sixth are illustrated in the following Story.

S T O R Y.

It is related that a woman was troubled with a tingling* in her ear, and went to a Physician for his advice on the subject. The Physician said, if you apply (to your ear) the yolk of an egg, and a little pulverized Love-Apple you will be well. The woman went to an Apothecary, who had a handsome Apprentice, and said. I will thank you to desire your boy to weigh me out two Dirhums worth of Love's-Apple!† The Apothecary not knowing, that she meant the plant of that

^{*} The word which corresponds both in sound and sense with tinkle in English, and tinnio in Latin. It is here used technically for the Tinnitus Aurium of Physicians.

⁺ I have endeavoured to imitate the quibble in the original on the words مُواَجُوا Huowa-Juwwa, and عَوْمَا Huowul-Juowa. The first is the name of an herb or plant: the second means

name, on the contrary believing she wished for that which no plant or herb can cure, to said to his Apprentice, give the lady my boy, what she wishes of you. The woman was enraged at the insinuation, and said, I never thought of the strange idea, which has entered your mind; I merely wished for a little of the medicine called Love's-Apple. The Apothecary felt embarrassed, and said, O my good daughter do not annoy yourself, but say if you please, Love-Apple. He then gave an order to his boy to weigh her out three Drams of it, and not to stint her in the weight.

CLASS SEVENTH.

The seventh class contains nine words, which give or the QUIESCENT mark to the Aorist. They possess a conditional or hypothetical signification like the literally, the desire or ardour of love. I am aware that the Love-Apple, as a genus of the Monogynia order, is not exactly applicable to the Arabian plant, but it serves to convey some idea of the Pun, and this is all I intended.

‡ The original means simply, "that which the heart pants after from the bitterness, or violence of love." We may suppose that the Arabian Apothecary from the Lady's mistake imagined her in search of the Agnus Custus, or some other love antidote, but having no idea that so much virtue could be found in an herb:—He mihi quod nullis amor est medicabilis herbis! Unwittingly recommended her to his Apprentice.

§ Or two miskuls which are supposed equal to three Drams.

Annotation.

This Poet was contemporary with Mohummud, from whom tradition says he received the name of Hussan, in consequence of having delighted the Prophet by some Verses in his praise, and upon hearing which he is said to have called out was Most beautiful!

OF

The author of the Mooghnee says that 🛴 as a governing Noun, is sometimes significant of time, as مَا اَسْتَقَا مُو اَلَكُم فَا سَتَقْمِهِ الْهُم وَ الْكُم فَا سَتَقَامِهِ الْهُم وَالْكُم فَا سَتَقْمِهِ الْهِم them: and that it is sometimes used without any relation whatever to time, as من عَدْرِيعُلُمُ الله Gon knows whatever good you do.

4. The fourth is the and as also applicable to TIME.

EXAMPLE.

Whenever you go, I will go,

That is,

اَنْ تَذْهُبِ الْيَوْمُ اَنْ هُبِ الْيَوْمُ اَنْ هُبِ الْيَوْمُ اَنْ هُبِ الْيَوْمُ اَنْ هُبِ الْيَوْمُ اللَّهِ اللَّهُ اللَّهِ اللَّهُ اللّلِي اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللّلِي اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللّلْمُ اللَّهُ ال

5. The fifth is and is applicable to persons or things; in other words to rational or irrational beings, and is always connected with another word in the relation of the Aorist or oblique Case.

EXAMPLE.

اَیّهٔ یَضْرِبْنِی اَضْرِ بِهِ Whosoever strikes me, I will strike him,

That is,

If Zued strikes me, I will strike him, and

If Amr strikes me, I will strike him.

Annotation.

The Commentator considers (merely as a Noun, but the Grammarian Line makes it also Particle, as in the following Verse in which it is supposed Synonymous with ...

If a man possess a certain disposition, and is desirous to conceal it from mankind (it will not avail) it will be discovered.

It is also supposed to be used Interrogatively, as in the following Verse.

7. The seventh is and is also applicable to PLACE.

STORY.

A certain city lounger was standing one day in the street, and happened to see a woman of elegant appearance pass by with a child in her arms. He said to the people about him, 'if any one will bring me that child in order that I may kiss his feet, I will give him ten Dirhums,' but no body answered him. He addressed them again, and said, I will give fifteen Dirhums to any one that will bring me the child,' but they continued silent as before. I had better said he to himself leave these blockheads alone, and watch the motions of the woman, and wherever she goes, go there also, and at whatever house she enters, stop there (and wait her coming out,) upon which he began to follow her. The woman (turned round) and said, 'what is your object Sir, in pursuing me thus? I wish replied he for permission to kiss the feet of that child, and if you allow me, I will do whatever you command. Why do you wish this said the woman? because I love you replied he, and you love the child, and the beloved of the beloved, is also beloved. The woman laughed at his answer, and said if you are determined on this, you had better wait for his father, who is about to proceed to the bath,* and when he takes off his shoes you can go and kiss his feet, for my love to him is greater than to this child. The fellow was abashed at her reply and retreated.

I have omitted a sentence here to avoid repetition.

CLASS' EIGHTH.

The eighth Class contains four words which give نصب to an Indefinite Noun (السم نكرة) or govern it in the Accusative or Objective case, as the تربين or Noun of Specification.

1. Of these the first is المَّذَ Ten, when compounded with المَّذَ One; الْمُنَانِ Two; عَلَىٰ Three; عَلَىٰ Four; عَسَمَةُ Five; عَلَىٰ Six; عَلَىٰ Seven; قَلَا لَيْ Eight and عَدِينَ Nine.

The same government is applicable to the Numbers, تَالْرُتُونَ Twenty; تَالْرُتُونَ Forty; آرِبَعُونَ Sixty; كَالْمُونَ Seventy; الْبَعُونَ Eighty; تَسْعُونَ Ninety, whether compounded or not, but these are properly comprised among the Analogous governors, under the head of الله ما المتعادلة التّامُ التامُ التّامُ التامُ التامُ

If the jan be a Masculine Noun, the grammatical arrangement of the units and will in construction with will be as follows, with both members of the compound number in the Masculine Gender:

EXAMPLES.

آخُدُ عَشْرَاجُلًا Twelve men. اِثْنَا عَشْرَرْجِلاً

Annotation.

The words contained in the eighth Class are nouns of number either determinate or indeterminate, which generally give in and sometimes to an indefinite noun, or govern it in the Objective, and Aorist or Oblique Cases; and as Numbers in their applicate sense refer to particulars, in opposition to those in the abstract, the word expressive of that particularity is always termed or or particularity; or the Specification or Particularity; or the Specification and significantly of the noun Numbered. It must however be remembered that the

But if the juic be Feminine, the reverse will take place and both members of the compound be Feminine also:

EXAMPLES.

اَكُنَىٰ عَشَرَةُ اَمْرَنَةُ Eleven women. اَثَنَنَا عَشَرَةُ اَمْرَنَةً Twelve women.

The other cardinal numbers from three (عَلَى عَنْ) to nine (عَلَى) inclusive, in construction with عَشْرَ ten, are applied as below; the first member of the compound being Feminine the second Masculine, and this always happens when the same is a Masculine Noun:

EXAMPLES.

آرُبَعَةُ عَشَرَرَجِلاً Fourteen men. آرُبَعَةُ عَشَرَرَجِلاً Fourteen men, and so on to Nineteen men.

Annotation.

always refers to number, whereas the أَيْنَ and أَهُمْ have a more general application as explained in page 8 and 9 of the 1st Book. The word عَشْ in the text expresses the number ten abstractedly and differs perpaps from أَعُمْ in the same way as مَا عُمْ in Greek, or Decus from Decem in Latin. It always governs the عَمْ أَنَ اللهُ أَلُو اللهُ اللهُ أَلُو اللهُ أَلُو اللهُ أَلُو اللهُ أَلُو اللهُ أَلُو اللهُ أَلُو اللهُ اللهُ

But if the be a Feminine Noun, the order is reversed, and the first member of the compound will be Masculine, and the second Feminine.

Thirteen women.

Fourteen women, and so on to

Nineteen women.

The word مُرَادُ is derived by some from the preposition في and the interrogative له by the rejection of the Alif; but the general opinion I believe is, that it is simple and uncompounded. 2. The second is the word which is used to denote an Indeterminate Number, () and has a twofold relation: The first is termed or the Interrogative when used in the sense of interrogation, and governs the in the Objective Case, as

The second is termed or the Indicative, when not used Interrogatively, and governs the in the Objective Case if any word happen to intervene between it and the

آجُارُيُ رُجُالِ There are several men with me.

But if no word intervene it governs the rin in the Aorist or Oblique case, as

ا کَمْرَجُلاً صَرَبْتَهُ I struck several men.

I purchased several boys or slaves.

The third is کُافُ النَّشِيَّة or Kaf of similitude, and the pronoun کُلُ but is used to denote an Indeterminate number, and is never applied Interrogatively, as

يَ ارْجَالُ عنْدِي There are so many men with me.

STORY.

Whoever said a certain Physician will eat the Mad-Apple* for forty days successively will lose his senses. A person present said, how much of it must be eaten every day for that purpose? The Physician answered, so much, and made a motion with his hand three times towards him, to denote fifteen of them. The man went away and continued eating the Mad-Apple and in the forty first night, he put on his sword and went to the Physician and said—did you not say O stupid and ignorant Doctor, that whoever would eat fifteen of the fruit of the Mad-Apple for forty days successively would lose his senses? And howmany have I eaten beyond that number and yet am not mad? and now I swear by Gop I will put you to death with this sword. The Doctor alarmed ran off and shut the door against him, and said O pardon me my friend!—I repent of my misconduct, and promise you never to prescribe the Mad-Apple to another as long as I live.

^{*} Lisialso called the Egg-plant, Melongena, and is supposed (probably by those who have tasted of it) to be the mandrake of Theophrastus, which when eaten excites symptoms of madness. It is called in the Hindoostanee language Lucagun, from which word or perhaps form the Persian it may have found its way to Arabia.

CLASS NINTH.

The ninth Class contains nine words termed $\int |\hat{x}|^2 |\hat{x}|^2 |\hat{x}|^2$ or Verbal Nouns, because they are considered equivalent in signification to verbs. Of these, six are used as the second person of the Imperative and give \hat{x} to a Noun, or govern it in the Objective Case as its Object.

1. The first of these is زَوْيْن in the sense of مَوْرَيْن and is used in the beginning of a sentence.

EXAMPLE.

Annotation.

The author of the Grammatical Treatise called the Jaco Moofussul, divides Verbal Nouns into two Classes, the first having the sense of verbs in the 2d Person of the Imperative mood, the second of verbs in the past time, which are termed of verbs in the past time, which are termed of verbs in the past time, which are termed of verbs, are either transitive as exemplified in the Commentary, or intransitive, as he silent for one (with your discourse), like Agedum in Latin; or and have haste which occurs under four various foms, as the last of which is exemplified in the following distich:

An Arab went to a shepherd with the intention of purchasing a sheep, and requested to be supplied with a fat one. The shepherd told him he should have the fattest in his flock, but produced a poor, meagre, scurvy, halfstarved thing, with its nose snivelling from excess of poverty. The Arab called out with astonishment, what object of misery is this! where is the flesh or fat? why my good friend said the shepherd dont you observe the very fat dropping from her nose! O Bravo, said the Arab,

STORY.

An old man* complained to a Doctor of bad digestion. O let bad digestion alone said the Doctor, for it is one of the concomitants of old age. He then stated his weakness of sight. Don't meddle with weakness of sight replied the Doctor, for that also is one of the concomitants of old age. He complained to him of a difficulty of hearing. Alas how distant is hearing said the Doctor from old men! difficulty of hearing is a steady concomitant of old age. He complained to him of want of sleep. How widely separated said the Doctor, are sleep and old men, for want of sleep is certainly a concomitant of old age. He complained to him of a decrease of bodily vigour. † This is an evil replied the Doctor that soon hastens on old men, for want of vigour is a necessary concomitant of old age. The old man (unable to keep his patience any longer) called out to his companions—seize upon the booby, lay hold of the blockhead, drag along the ignorant idiot, that dolt of a Doctor, who understands nothing, and who has nothing to distinguish him from a Parrot, but the human figure, with his 'concomitants of old age,' for sooth! the only words he seems capable of uttering. The Doctor smiled, and said, come on my old boy, get into a passion, for this also is a concomitant of old age.

CLASS $\dot{T}ENTH$.

The tenth Class contains thirteen Verbs termed Applicated or Imperfect Verbs, and are so called because they cannot with an Agent alone, form a complete or perfect Sentence. They precede in construction a Nominal Sentence, or a Sentence consisting of a Subject and Predicate, to the first of which they give and to the second in the first Term is called the first the Substantive Noun, the second the the Attribute or Predicate.

1. Of these the first is $\tilde{\psi}$ which is used in two senses. 1st Imperfect. 2d Perfect.

As an Imperfect Verb it is used in two ways. First, as assirming the existence of its Attribute in its Substantive Noun or Subject, in time past, either in a sense capable of cessation, (مَنْ الْانْقَاعُ) as الْمُعَلِّمُ كُلُونُ الْانْقَاعُ as الْمُعَلِّمُ (كَانَ اللهُ عَلَيْهَا عَلَيْهُا عَلَيْهَا عَلَيْهُا عَلَيْهَا عَلَيْهُا عَلَيْهَا عَلَيْهُا عَلَيْهَا عَلَيْهُا عَلَيْهَا عَلَيْهُا عَلَيْهُا عَلَيْهُا عَلَيْهُ عَلَيْهُا عَلَيْهُ عَلَيْهُ عَلَيْهُا عَلَيْهُ ع

Second, in the sense of , as,

The poor man became rich. كَا نَ الْغَقِيرُ غَنِيًّا أَيْ صَا رَغَنِيًّا

Constation.

The Arabian Grammarians consider Verbe as either Perfect or Imperfect, and as their account of them seems to agree in almost every respect with that of the Stoics as given by Harris in his Hermes, I shall present the extract to the reader by way of illustration.

"The Stoics in their logical view of Verbs, as making part in Propositions, consider them under the four following sorts:

When a Verb Co-inciding with the Nominative of some Noun, made without further help a Perfect Assertive Sentence, as Σωμρατης περιπατεί Socrates walketh; then as the Verb in such Case implied the power of a Perfect Predicate, they called it for that reason Κατηγόρημα a Predicable;

2d. As a Perfect Verb, forming with its Nominative or Agent alone a complete or perfect Sentence, and consequently does not require to be connected with any other Predicate. In this sense it denotes existence (absolutely), as

2. The second is \(\subseteq \) which is used to denote a change in the Subject of the Proposition either, from one nature or substance into another, as,

Or, from one quality into another, as,

It is sometimes used as a perfect Verb, to denote change from one place to another, and is then applied transitively with the Preposition

Annotation.

er else from its readiness συμθάινειν, to co-incide with its Noun in completing the Sentence, they called it Σύμβαμα a Co-incider.

When a Verb was able with a Noun to from a Perfect Assertive Sentence, yet could not associate with such Noun, but under some Oblique Case, a Σωηςάτει μεταμέλει, Socratem pænitet: such a Verb from its near approach to just Co-incidence and Predication, they called Παςασύμδαμα or Παςακατηγόςημα.

When a Verb, though regularly Co-inciding with a Noun in its Nominative, still required to complete the sextiment some other Noun under an Oblique Casa, as Πλάτων Φιλεί Δίωννα, Plato loveth Dio (where without Dio or some other, the Verb loveth would rest indefinite:) such a Verb,

3. The third, fourth and fifth, are in the whole of which are used to unite or conjoin the sense of the Sentence with their respective times, namely, morning, evening, and noon, as

Annotation,

from this defect they ealled how in suplana, or in nathyograps some thing less than a Co-incider, or less than a Predicable.

Lastly, when a Verb required two Nouns in Oblique Cases, to render the sentiment complete, as when we say Σωνράτει Αλκιξιάδες μέλει, Tædet me vitæ, or the like, such Verb they called ητίον, or έλατίον η παραστίμεμμα, or η παρακατηγορημα, something less than an Imperfect Co-incider, or an Imperfect Predicable."

Here by the way it may be worth remarking, that almost the whole of the above extract seems copied from Stanley's History of Philosophy, which Harris appears to me to have made frequent use of in his Hermes and Philosophical Arrangements without any sort of acknowledgment. The following may serve as a specimen:—"Whatsoever is Predicated of another is Predicated of the name of the Case, and both these are either Perfect, as that which is predicated, and together with the subject sufficient to make an Axiom. Or they are Defective, and require some addition to make thereof a Perfect Predicate."

The above three Verbs are sometimes used in the sense of , as,

The poor man became rich.

Zued became a writer.

The obscure became bright.

They are sometimes used in the sense of Perfect Verbs, as,

الْنَبَ وَبُلُّ بِهَ عَلَى Zued arrived in the morning.

الْمَسَى زَيْدًا يُ

Zued arrived in the evening.

الْمَسَى زَيْدًا يُ

Bukr arrived in the fore-noon.

Annotation.

If that which is predicated of a name, make an Axiom, it is a Categorem, or σύμβαμα, a Congruity, as walketh, for example, Socrates walketh,

But if it be predicated of the Case (whereby Transitions are made from one person to another, wherein it is necessary that some Oblique Case be likewise pronounced with the right,) they are called a Tapasup Sapaka, as an addition to the σύμ Sapa (or as Priscian renders it, less than Congruities) as Cicero saved his country.

Again, if that which is predicated of some Noun, require a Case of some other Noun to be added to make up the Axiom, so as the construction be made of two Colline Cases, they are ασυμθαματα,

4. The Sixth and Seventh, are نات which are used to unite the sense of the sentence with their respective times, namely day and night: أَنْ therefore unites the sense of the Sentence with the day, and نات with the night, as,

كَا تَبِاً اَيُ كَا تِباً اَيُ لَا فَى النَّهَا لِ اللهَ اللهَ فَى النَّهَا لِ His writing was at that time.

Zued spent the night in sleep, i. e.

His sleep was at that time.

Annotation.

incongruities, or according to Ammonius, less than, σύμβαματα, as it pleases me to come to thee; whether the Nouns only or the words require it. See Stanley's History of Philosophy. Folio Ed. 1701, in the life of Zeno, p. 310.

In answer to certain of the Arabian Grammarians who contend that Imperfect Verbs, are merely used to denote time without reference to the sense of their Infinitives, the Grammarian Ruzee in his celebrated Commentary upon the Kafeea makes the following reply, which I offer as a short specimen of his style and manner.

وَمَا قَالَ بِعُضُهُمْ مِنْ اللَّهَ الْمَا اللَّهُ الللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ ال

The above two Verbs are sometimes used in the sense of مُعارَ, as,

الْعَالَ الصَّبِيِّ بِالْغَا The boy became adult.

The youth became an old man.

5. The eighth and ninth are مَا فَتَى sometimes written مَا فَتَى sometimes written مَا فَتَى the tenth, مَا وَالَ and eleventh مَا ازْغَى each of which is used to indicate the uninterrupted duration or permanence of the Attribute in its Substantive Noun, as,

كَا بَرَجَ زَيْثُ عَالِمًا Zued was always wise.

Zued was always standing.

Zued was always excellent.

Zued was always excellent.

Bukr was always intelligent.

Annotation.

they are merely indicative of time, without reference to the sense of the Infinitive, are nugatory, for the word in the Proposition, is signified being, that is, being abstractedly considered, and its Predicate denotes the mode or manner of that being, which is here being standing, or the existence of that accident. Introducing the Sentence therefore with a word indicative of absolute existence, and afterwards qualifying it by the attribute, is, as if we were to say, a thing existed or was, and afterwards add—it existed standing. The worl is therefore denotes the existence of an event absolutely, which is qualified by subjoining its attribute, and the Attribute is significant of a particular event, as occurring in time absolute, which is restricted to a particular time, by the word in the word in the content of a particular event, as occurring in time absolute, which is restricted to a particular time, by the word in the word in time absolute, which is restricted to a particular time, by the word in the word in time absolute, which is restricted to a particular time, by the word in the word in time absolute, which is restricted to a particular time, by the word in the word in time absolute, which is restricted to a particular time, by the word in the word in the particular time, by the word in the particular time, by the word in the properties of the sense of the time, which is the properties and the particular time, by the word in the properties are the particular time, by the word in the properties are the properties at the particular time, by the word in the properties are the properties.

Harris uses almost the same words upon the same subject. Now all Existence is either Absolute or qualified.—Absolute, as when we say B is; Qualified, as when we say, B is an Animal, B is Mack, is Round, &c. With respect to this difference, the Verb (1s) can by itself

6. The twelfth is [1] and is used for the purpose of indicating a temporary relation between two events, the time or duration of the first of which it limits or restricts to the duration of the second. It must therefore necessarily be preceded by either a Verbal or a Nominal Sentence, as

اَجْلُسْ مَا ذَامَ زَيْدٌ جَالِسًا Sit while Zued is sitting. اجْلُسْ مَا ذَامَ زَيْدٌ جَالِسًا كَامَ زَيْدٌ جَالِسًا Zued is standing as long as Amr is standing.

Amotation.

the forms of existence being in number infinite, if the particular form be not expressed, we cannot know which is intended." He then goes on to remark, "that when (is) only serves to subjoin some such form, it has little more force than that of a mere assertion," and further on.—"As to Existence in general, it is either Mutable, (is) or Immutable (is); Mutable, as in the Objects of Sensation; Immutable, as in the Objects of Intellection and Science. Now Mutable Objects exist all in Time, and admit the several distinctions of Present, Past, and Future: But Inmutable Objects know no such distinctions, but rather stand opposed to all things temporary.

And hence two different significations of the Substantive Vcrb (18), according as it denotes Mutable or Immutable being.

For example, if we say, this orange is rive, (18) meaneth, that it existeth so now at this Present, in Opposition to Past Time, when it was green, and to Future Time when it will be rotten.

But if we say, the Diameter of the square is commensurable with its side, we no not intend by (1s) that it is commensurable now, having been formerly commensurable or being to become so hercuster; on the contrary we intend that perfection of existence, to which time and its distinctions are uttered unknown. It is under the same meaning we employ this Verb, when we say, TRUTH is, or God is. The opposition into of time present to other times, but of necessary existence to all temporary existence whatever?

Hermes p. 92.

As my object in producing these extracts is merely to explain and in strate the doctrine of the Arabian Crammarians on the subject of Imperfect or Defective Verbs, I avoid as us al all discussion on the question of its merits or demerits.

The thirte inth is and is used for the purpose of giving a regative signification to the Sentence in present time, though some Grammarians are of opinion that it is applicable to time in general, whether past, present or future, as,

Zued is not standing.

Annotation.

Imperfect Verbs with respect to their government may be divided into two Classes, First, such as govern of themselves without any restriction or limitation, as اَصَنَى اَتُ عَلَى اَلَهُ عَلَى اَلَهُ عَلَى اللهُ عَلَى الله

The following seven Verbs are considered Synonymous with مار المستحال عاد الستحال عاد الستحال عاد الستحال عاد في المستحال عاد الستحال عاد الستحال المستحال المستحال

Of these Verbs there is nothing particular to be remarked, we may however encrease their number by adding it he arrived a noon, and is i he arrived in the first watch of the night.

Grammarians extend the privilege to the whole class of Imperfect Verbs, with the exception of مَادَام, as تَارِّبًا كَانَ زَيْدٌ Zued was standing.

But these Verbs, cannot be preceded by their Substantive Nouns, the Nouns being the AGENT, which can never take precedence of the Verb.

ABOOS SHIMUQMUQ was a humorist, but falling poor his wife, was compelled to pass a whole night without any thing to eat. He went out therefore with the hope of procuring for her a little sustenance, but not succeeding he continued traversing the streets till he arrived at the great Mosque, which he entered and concealing himself in one of its angles, continued standing there till the whole congregation had retired, with the exception of the public Crier, who when night came on, began to pray, saying.—' O God at whose mighty will non-existence sprung into life, and by whose merciful kindness the poor and sorrowful are made happy.'-I am here my servant, 'cried Aboos Shimuquiuq,' ask of me what thou requirest!' the astonished Crier believing he had been honored with the holy conference formerly granted to Moses, replied;— O Gon! thou certainly knowest that this thy servant hath always been obedient to thy will, and hath never ceased to confide to thee his wishes: he hath passed the day in such extreme hunger that his very bowels yearn again for food, bestow upon him then from thy infinite bounty one thousand Dirhums, which will supply his wants and provide sustenance for his family.'-O my servant! cried Aboos Shimuqmuq, petition for something else, for I'swear by my mighty power and dignity that my wife hath passed the whole night fasting, and although I searched every where to find a little bit of supper for her, I have not succeeded in procuring a mouthful, nor have I in my possession sufficient to keep her soul and body together!—The poor Crier ashamed of the trick played upon him, left the Mosque to Aboos Shimuqmuq and went off,

To the Verbs of this Class generally termed from their signification, Verbs of Propinquity, Grammarians have added several others, which though nearly synonymous in point of sense, are yet sufficiently distinct in application to warrant their arrangement into the following classes or divisions.

Annotation.

By this classification as laid down in the Commentary upon the Alfrea, the Verb it appears is excluded from the Verbs of Propinquity, contrary to the doctrine in the Text; the grounds upon which this exclusion is founded are the following:

It is supposed by the Grammarian A); Zahid to be a Particle Synonymous with W. Ruzee thinks its proper signification is hope or expectation, to which Seebuwen adds pity and fear, as in the second of the second of

And agreeably to the authority of the Siman it denotes certainty, as in the following example from the Qooran:

Maracci however renders it here fortasse which is copied by Sale. "War is enjoined you against the infidels, but this is hateful unto you: yet perchance you hate a thing which is better for you, and perchance you love a thing which is worse for you, but God knoweth and you know not." Sale.

The Predicate of the is restricted in the Text to a Verb in the Aorist Tense with the Particle but although this appears to be the general practice of the Language, there are some instances noticed by Grammarians in which the Predicate is a Noun, as the property of the Aorist of not censure me for I am about to practice abstinence. See Buweh is of opinion that the Aorist of should never be accompanied by as that Particle is known to bestow on the Verb the sense of the Infinitive, which becoming then an abstract term, cannot with propriety be predicated of its Substantive Noun. This doctrine seems conformable to that of Locke, who says that, "all our affirmations are only inconcrete, which is the affirming not one abstract idea to be another, but one abstract idea to be joined to another"—we can say a man is white, but we cannot say a man is whiteness, unless in a figure of speech. But some believe, that when it does occur in this form it is always by an ellipsis of some governing word, such as Jicor in and other Grammarians account for it by supposing it to be then redundant.

In which example is put in the Nominative Case, as the Noun of is and is substituted for, or put in the place of the Objective as its Predicate;

The sense of the Sentence is therefore.

The same rules that are applicable to its Derivative formations.

EXAMPLE.

يَكُنُ زَيْنٌ يَجِينَ Zued did not hasten his approach.

Grammarians differ considerably among themselves, with regard to the sense of sk when preceded by a Negative Particle, some maintaining and with propriety, that it bestows on the Verb a Negative signification, and others asserting that it has no such force, the sense of the Verb remaining unaffected as before; while others believe that the Particle is redundant before sk in the Past Tense, but preserves its signification in the Future.

Amotation.

· 0 F Šá, Š.

المشك فلان Was originally Synonymous with المشك فلان and is still to used in this sense, as المشك فلان 'such a person hastened his march;' agreeably to the authority of the Commentator on the Alfeea it is used like المستحدة either as a Perfect or Imperfect Verb. It is conjugated like في العبير but the Grammarian عمد المستحدي says, it never occurs in the Past Tense as given in the Text, but in the Aorist, which however is rejected in the Alfeea on the authority of Khuleel.

Under the general head of Verbs of Propinquity, (besides those enumerated in the Commentary above,) may be mentioned the following, namely,

- 3. The third is which governs the Noun in the Nominative, and the Predicate in the Objective Case, which Predicate is invariably the Aorist Tense of a Verb without as:
 - يَّ كَرَبُ زَيْدُ يَكُرِجُ Zucd was near coming out.
- 4. The fourth is which governs the Noun in the Nominative, and the Predicate in the Objective Case, which Predicate is a Verb in the Aorist Tense with or without

EXAMPLE.

Some Grammarians make out seven Verbs of Propinquity, adding to the four abovementioned the following three, namely in sense and application.

Annotation.

The above rules are precisely applicable to اَخْلُولَةَ عَلَى السَّهَاءُ لَنْ تَبْطِي as, الْخَلُولَةُ as, الْخُلُولَةُ The Heavens were about to descend in rain-

اَوْلَىٰ زَيْدُ أَنْ يَزِيدُ عَلَى ثَلَاثَ as, تَارَبُ as, اَوْلَىٰ آَلَىٰ وَيَدُ عَلَى ثَلَاثَ As supposed by Ruzee to be Synonymous with وَالْيَ عَلَى ثَلَاثَ As gift of three (Rupees!) Its predicate must be accompanied with اَوْلَىٰ وَيَعْمُ اللَّهُ عَلَى ثَلَاثُ اللَّهُ عَلَى ثَلْمُ عَلَى ثَلَاثُ اللَّهُ عَلَى ثَلَاثُ اللَّهُ عَلَى ثَلُونُ اللَّهُ عَلَى ثَلْمُ اللَّهُ عَلَى ثَلُونُ اللَّهُ عَلَى ثَلْمُ اللَّهُ عَلَى ثَلُونُ اللَّهُ عَلَى ثَلْمُ عَلَى ثَلْمُ عَلَى ثَلْمُ عَلَى ثَلْمُ عَلَى ثَلُونُ اللَّهُ عَلَى ثَلْمُ عَلَى ثَلُونُ اللَّهُ عَلَى ثَلُونُ اللَّهُ عَلَى ثَلْمُ عَلَى ثَلُونُ اللَّهُ عَلَى ثَلْمُ عَلَى ثَلْمُ عَلَى ثَلُونُ اللَّهُ عَلَى ثَلْمُ عَلَى ثَلْمُ عَلَى ثَلْمُ عَلَى ثَلْمُ عَلَى ثَلْمُ عَلَى أَلْمُ عَلَى ثَلْمُ عَلَى مُعْمَالًا عَلَى أَلّهُ عَلَى أَلَا عَلَى أَلَا عَلَى أَلْمُ عَلَى أَلَا عَلَى أَلَّا عَلَى أَلَّا عَلَى أَلْمُ عَلَى أَلْمُ عَلَى أَلَّا عَلَى أَلَّ عَلَى أَلَّا عَلَى أَلْمُ عَلَى أَلْمُ عَلَى أَلَّا عَلَى أَلَّا عَلَى أَلَّا عَلَى أَلَّا عَلَى أَلَّا عَلَى أَلَّا عَلَى أَلّا عَلَى أَلْمُ عَلَى أَلَّا عَلَى عَلَى أَلَّا عَلَّا عَلَى أَلَّا عَلَى عَلَى أَلَّا عَلَى أَلَّا عَلَى أَلْمُ عَلَى أَلْمُ عَلَى أَلَّا عَلَى أَلَّا عَلَّا عَلَى أَلْمُ عَلَّا عَلَى أَلْمُ عَلَّا عَلَّا عَلَا عَلَا عَلَى أَلْمُ عَلَّا عَلَّا عَلَاكًا عَلَا عَلَّا عَلَّا عَلَا عَلَا عَلَا عَلَا عَلَا عَلَّا عَلَاكًا عَلَامًا عَ

Jala Is used in the sense of Je, as,

ا يَعْرِي اللهِ We was on the point of rising, or he was very near rising.

The Aorist of this Verb does not require to be accompanied with . The Verbs of this Class are included in the following little story.

حكا يَّة

A certain religious man was so deeply affected with the love of a King's daughter, that he was brought to the very point of death. His disciple said to him one day, what has the Almighty done with the king of your understanding and patience, for your body seems almost reduced to a mere shadow? Ah my child said the devotee, I subdued my feelings till my very heart was nearly breaking, and practiced patience to the utmost stretch of my power, but when the army of love invaded me, the king of my understanding was put to flight, and I could hold out no longer: he then wept and repeated the following lines:

The jeerer was keen with his joke,
And eager to mock my despair;
But he saw my heart almost was broke,
And he sought but to soften my care.

Then may heaven my mistress defend,

Though still she my vows should disdain;

Though her cruelty hasten my end,

And my heart break indeed with its pain.*

CLASS TWELFTH.

The twelfth Class contains four Verbs termed or Verbs of Praise and Censure.

1. Of these the first is ; originally with the first letter marked Futha, and the second Kusra: the Futha is changed into Kusra to coincide with

Annotation,

As and was assume Ta or the mark of the Feminine Gender, they are generally considered as Verbs, but certain Grammarians of the schools of Koofuh will have them Nouns because they are occasionally found in construction with a Preposition, as

A good girth (perhaps a bridle is necessary) on a bad ass. المَّهُ وَالْمُولُودَةُ السَّهُ مُ الْمُولُودَةُ الْمُؤْمُونُ الْمُؤْمِلُولُودَةً اللّٰهِ اللّٰمِ الْمُؤْمِلُولُودَةً اللّٰمِ الْمُؤْمِلُولُودَةً اللّٰمِ اللل

* Or literally,

The censurers were eager to censure me,

But when my heart from excess of love was ready to break;

My very censurers basiened to console me;

Then preserve O God the life of my beloved!

There is something pretty if not elegant in the original of this verse, but its spirit I fear is too subtle for transfusion into our idiom. In a literal translation the repetition of the word censurers appears harsh and unpleasing, and the strange unconnected wish at the close not very suitable to the complaint expressed in the three first lines, though dilated into a quatrain. As a curious example whoever of the four Verbs under discussion it deserves to be remembered.

the Vowel mark of the second letter, which is then rendered quiescent to lighten or facilitate the pronunciation leaving (is which is a Verb of Praise.

The Agent (i) of the Verb is sometimes a general term (i) made definite by the Article

EXAMPLE.

تعمَّ الرَّجِلُ زَيْدُ Zucd was a good man.

The word אוֹב וֹנֹב is here בּיב or in the Nominative Case, as the Agent of case, as the Agent of case, as the Agent of case in the Nominative Case; and being the Subject of the Proposition is also in the Nominative Case; and the Predicate, preceding it in the order of construction.

Or ZUED may be in the Nominative Case as the PREDICATE, the SUBJECT of the Proposition being a Pronoun understood; the order will then be.

نعم الرجل هوزيد He was a good man namely Zued.

The Proposition by the first analysis consisting of one, and by the second of two Sentences.

The Agent of is sometimes a Noun connected in the relation of the Acrist Case with another Noun made definite by the Article of .

EXAMPLE.

تعَمَّ الْغَرْسِ زَيْدُ Zued the owner of the horse is a good man.

Annotation,

They both occur under the following forms, namely is is and is and is and is sufficient the first is the original one. The two first forms are used by the tribe of Bunoo Tumeem, and the second more frequently than the rest when employed to denote praise or censure. This distinction agreeably to the authority of Mooburrud and Seebuweh is observed by the Arabs in general.

BOOK SECOND.

And sometimes a Pronoun concealed rendered by an indefinite Noun in the Objective Case.

EXAMPLE.

How good was (he) the man Zucd.

The concealed Pronoun in such instances refers simply to an object in the mind termed, (مَعْهُونُ نَهُنَى).

The Noun Particularized by Praise () is sometimes omitted in the Sentence if the defect can be supplied by the context.

EXAMPLE.

الْعَبْدُ أَيْ يُوْبُ Ilow good a servant was he, namely Job!

The verse of the Quoran from which the example is taken being in praise of Job.

The Noun Particularized by Praise and the Agent must agree in gender and number

EXAMPLES.

نَعْمَ الرَّجُلُ زَيْدُ اللَّهِ كَالْ يَعْمُ الرَّجُلُ وَيُدُانِ The two Zueds were good men. نَعْمَ الرِّجَالُ زَيْدُونَ عَلَاللَّهِ الرِّجَالُ زَيْدُونَ عَلَا الرِّجَالُ زَيْدُونَ

Annotation.

The Nouns Particularized by Praise or Crisume sometimes though rarely precede their Verbs, as عَرَّهُ بِنْ الْرَجِلُ 'Zued is a good man.' The Agent in such cases is rendered definite by the Article J though sometimes the Pronoun is concealed and made by an indefinite noun, as in the following example,

نَعْبَتْ ٱلْرَّاقَ هُذَنَّ Hinda was a good woman.

The two Hindas were good women.

مندُ عَالَمُ All the Hindas were good women.

EXAMPLES.

يَّ مَنْ الرَّجُلُ وَيْدُ Zued was a bad man.

Zued the owner of the horse was a bad man.

Annotation.

. أَبُومُوسُلَ جَدُّ كَ نَعْمَ جَدَّا أَفِي وَشَيْخُ الْحَيْ خَالِكَ نِعْمَ خَدَّا لَا هِ.

Aboo-Moosa is your grandfather, how excellent a grandfather!

And Shuekh-ool-Huexa your uncle, how excellent an uncle!

These Verbs assume occasionally the Particle (as an affix, as local; which Particle sometimes coalesces with as in the following examples from the Quoran.

آ تَبَدُّ وَالْصَدَّ وَالْعَالَ وَالْعَالِ وَالْعَالَ وَالْعَالَ وَالْعَالَ وَالْعَالَ وَالْعَالَ وَالْعَالِ وَالْعَالَ وَالْعَالَ وَالْعَالَ وَالْعَالَ وَالْعَالَ وَالْعَالَ وَالْعَالِمُ وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلِيمُ وَالْعَلَى وَلِيمِ وَالْعَلَى وَالْعَلِيمُ وَالْعَلَى وَالْعَلِيمُ وَالْعَلَى وَالْعَلِيمِ وَالْعَلِيمِ وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَلِيمُ وَالْعِلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلِيمِ وَالْعِلَى وَالْعَلَى وَالْعَلِيمِ وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلَى وَالْعَلِيمُ وَالْعَلِيمِ وَالْعَلِيمُ وَالْعِلِيمِ وَالْعَلَى وَالْعِلِيمِ وَالْعِلَى وَالْعِلَى وَالْعَلَى وَالْعَلَى وَالْعَلِيمِ

- 4. The fourth is with is affixed, the first letter being marked either Futha or Zumma; originally with the second letter Muzmoom, which being afterwards rendered quiescent the two homogeneous letters coalesce under the sign Idgham. This rule is applicable to with its first letter Muftooh, but if Muzmoom, the Vowel point Zumma is transferred to the second letter, and the two homogeneous letters coalesce as before.

Annotation,

I have nothing particular to offer regarding these words. is supposed by some to be derived from originally in the Wao being changed into Alif by a common rule of permutation. It is precisely synonymous with is as observed in the Commentary. is sometimes preceded by the Vocative Particle is denoting surprize or admiration, as in the following example from the 3d Muqam of Hureeree in praise of a gold coin.

O how admirable is its metal, how fascinating its splendor! How delightfully it enriches, how potently it assists us! The Construction (بارح) of the محصوص of this Verb is the same as that of in both of the cases already detailed, but its Agent and Noun Particularized by Praise, do not necessarily agree in gender and number.

S T O R Y.

The wife of a niggardly attorney happened to be seized with a longing after fish, and expressed her desire one day to her husband. O what execrable food said the attorney is fish, and how vile a thing is fish for food! for its F is fatality; its I insipidity; its S sickness, and its H horror! The good woman however was determined to satisfy her longing, and accordingly having pawned her earring unknown to him, purchased some fish, but in the very act of enjoying it, who pops in upon her but old Pinchpenny, who seeing her eating cried outwhat is that you are eating my dear! Nothing but a little fish replied the wife, which a neighbour woman has sent me! Oh ho! cried Muckworm, then allow me to join your mess immediately, for most excellent food is fish, and fish is truly excellent for food, for its F is fatness; its I impletion; its S salubrity and its H hilarity.* What a vile describer of fish you are said his wife, for yesterday you abused it and now again you are praising it. Nay my dear said the attorney I am an admirable definer of fish, for I divide it into two classes. One that is purchased with money, and this I hold to be the bad class: the other that is got gratuitously and this I consider the good class. His wife laughed at his answer and was surprised at the readiness of his reply.

^{*} Or agreeably to the original word with its first letter is poison, its second sickness, and its hird affliction; and again, its 1st is fatness, its 2d enjoyment and its 3d competency.

CLASS THIRTEENTH.

The thirteenth class contains seven Verbs termed, is or Veres of the mind, and are so called because they have their source in the mind and come not under the cognizance of the senses. They are also called Verbs of doubt and certainty, some of them denoting doubt and some certainty, and precede a Sentence consisting of a subject and predicate to both of which they give if or govern them in the Objective Case as double Objects.

Annotation.

of the Soul with reference to the understanding, and grammatically Verbs denoting the operations of the mind or intellect) may be included a variety of other kindred Ve.bs besides those recorded in the Commentary; for Action which is here mant spiritual action, being a Genus, necessarily embraces all the various operations of the mind, and as these operations of the mind or modes of thinking, are but different kinds or species of the same genus, the verbs expressive of these actions must partake of one common character as to sense, and might therefore be expected to fall under one common rule of government. This has not escaped the notice of the Arabian Grammarians who, in some of their larger works, have discussed the subject with great ingenuity and have enumerated a variety of Verbs possessing a similar government to those recorded in the text; but as their arguments are very diffuse and scattered through many parts of their works, I shall save myself the trouble of collecting and translating them, and endeavour to supply the defect by presenting the reader with a short extract from the celebrated Essay of Bishop Wilkins towards a real character, and Philosophical Language, which containing a very precise view of the different. ACTIONS of the UNDERSTANDING (رَفْعَا لَا الْمُلَوْبُ) may not be deemed inapplicable to the Class of Verbs now under discussion.

Action as a Predicament he divides into four kinds.

I. SPIESTUAL. H. CORPOREAL. HI. MOTION. IV. OPERATION.

The genus of Spiritual Actions he divides into two Classes, those that belong to God by which are meant only his transient actions which are terminated in the creatures, such as creation,

Three of them denote doubt,

The Section is continued with an enumeration of the Actions of the understanding and judgment Practical, and the Actions of the Will, with these also of the sensitive part or the Fancy, which are properly styled Passions, but the whole would require too much space and the above extract may be deemed sufficient to illustrate the nature and division of words significant of the distinct operations of the mind, or of spiritual or intellectual Ideas.

The other three Verbs or those denoting certainty, are

EXAMBLES.

آ رایت عبر اکریا I perceived that Amr was generous.

آ اَدُوْدَا اَمِیْنَا اَمِیْنَا اَمِیْنَا اَمِیْنَا اَمِیْنَا اَمِیْنَا اَمِیْنَا اَمِیْنَا اَمِیْنَا

I found the house mortgaged.

Annotation.

That there are many Verbs of this Class besides those recorded in the Commentary, the following will demonstrate.

- 1. دَرَيْتُ بِكُواْصًا حَبِيَّ He knew, as, تَرَيْتُ بِكُواْصًا حَبِيَّ الله I knew that Dukr was your companion.
- 2. Know for certain, as,

Know that the preservation of the soul, is by subduing تعلم سَعَاءِ النفس قهرعة وها the passions.

3. jai He found, as,

Verily they found their fathers who were lost.

Ruzer however remarks that the Verbs when synonymous with is and with the Imperative synonymous with is do not govern two Objects in the Accusative Case, but require after them a Sentence preceded by the Particle is as,

I knew that you were standing.

نَعْدَ النَّي رَشُدُ اللَّهِ وَ اللَّهِ وَاللَّهِ وَ اللَّهِ وَاللَّهِ وَ اللَّهِ وَاللَّهِ وَاللَّهِ وَاللَّهِ وَاللَّهِ وَاللَّهِ وَاللَّهِ وَاللَّهِ وَاللَّهِ وَاللَّهُ وَاللَّهِ وَاللَّهِ وَاللَّهِ وَاللَّهِ وَاللَّهُ وَاللَّهِ وَاللَّهِ وَاللَّهُ وَاللَّهِ وَاللَّهُ وَاللّ

4. In He numbered or calculated, as,

Do not reckon on God as your companion in affluence وَلاَ تَعْدُ دِ الْمُولَىٰ شَدِ مِكْلُ فِي الْغَنَا لِمُولَىٰ شَدِ مِكْلُ فِي الْغَنَا لِمُولَىٰ الْمَدَاعِ but in poverty and distress.

The Verb is sometimes used to denote perception with the eye, as in the following sentence from the Qooran.

is sometimes used synonymously with عَرُفَتُ as,

l knew or recognized Zued. عَلِيْتُ زَيْمًا آيَ عَرَ نَتُهُ

Annotation.

5. He conjectured, &c. as,

5. عَلَى Synonymous, with فَانَ

They thought that the Angels who are the attendants of God were his daughters.

7. And some occur in this form as Neuter Verbs, as,

3. Or merely transitive to one Object, as,

There are many other Verbs besides the above which govern two Objects in the Accusative, but which for the sake of brevity I omit recording: the following however from their affinity to those under discussion may merit insertion:

We will come unto the work, which they shall have done, and make it as dust scattered abroad.

as, أَصَٰبُتُ and وَحُدِثُ in the sense of

I found or discovered the lost.

These three Verbs when used as above are transitive only to one Object or Accusative.

The Verb is sometimes used to denote doubt and sometimes certainty, as,

- 1. الله عَعْوْرًا رَحِيبًا I believed that God was merciful and forgiving.
- 2. الشَّيْطَانَ شَكُورًا I doubted whether the devil was a thanksgiver!

Annotation.

The above seven Verbs are termed اَفْعَالُ النَّهِ وَيلُ or Verbs of conversion.

Of the Verbs of doubt and certainty as recorded in the Text.

The Verbs though generally used to denote doubt or uncertainty of mind, are supposed by the Author of the Commentary upon the Alfees to be used in the Sense of certainty also: Examples.

Or in the following Jeu d'esprit attributed to المحمقة بين خلف المحمقة المعادة المعاد

ON A VERY LITTLE MAN CALLED DAVID, WITH A VERY LARGE BEARD.

مَا شَيْتُ مَدَّ أُودَ فَاسْتَضْعَكُمْتُ مِنْ عَجَيبِ

كَانَهُ وَ الدَّيرَ شَيْ بِهُولُودِ

مَا طُولُ مَدُّ أُودُ الأطولُ لَحِيمَةُ

مَا طُولُ مَدُّ أُودُ الأطولُ لَحَيمَةُ

These lines are very ingeniously versified by Dr. Carlyle in his Specimens of Arabian Poetry, for the learned Professor has not only preserved the sense but the very spirit of the Epigram, by lengthening out his version to an extent as disproportionate to the original as little David's beard.

When these Verbs happen to intervene between their Objects, or when they follow them, their government may be optionally omitted.

EXAMPLES.

زَيْلٌ ظَنَنْتُ قَائِمٌ زَيْدٌ ظَنْنُتُ قَائِمً زَيْدٌ قَائِمٌ طَنَنْتُ زَيْدً اَعَائِمٌ طَنَنْتُ

I believed Zued was standing.

Annotation.

1.

"How can thy chin that burden bear?

Is it all gravity to shock?

Is it to make the people stare?

And be thyself a laughing stock?

2.

When I behold thy little feet,
After thy beard obsequious run,
I always fancy that I meet,
Some father followed by his son.

3,

A man like thee scarce e'er appear'd,

A beard like thine—Where shall we find it?

Surely thou cherishest thy beard,

In hopes to hide thyself behind it."

The Verb is supposed to be used in the sense of doubt or uncertainty in the following example from the Qooran, as,

They suppose (the day of judgment) is distant.

It is used in a sense termed by the Arabian Grammarians to denote vision in a dream and requires after it two Objects in the Accusative, as in the following Sentence from the Quoran:

It seemed unto me in my dream, that I pressed out wine اذي أراً ذي أعصر خبراً (from grapes.)

Their government therefore or non-government is equally proper, though some Grammarians are of opinion that when they intervene between their Objects, their government had better be preserved, but when they follow them, it had better be cancelled.

If to the Verbs and and and a Humza be prefixed, they become transitive to three Objects or Accusatives.

EXAMPLES.

I made Zued know that Amr was excellent. وَعَلَيْتَ زَيْدًا عَبْرًا فَاضِلاً I shewed Amr that Khalid was wise.

Annotation.

Verbs of sense in Greek generally govern a genitive, but the Verb onlows: like in Arabic, requires an Accusative which Mr. Jones has endeavoured to account for philosophically in his Greek Grammar. See p. 275,

The example produced by the Commentator to prove that the Verb is sometimes used to express ocular in opposition to mental vision, appears to me very singularly inapplicable. The entire passage from the Quoran is as follows:

He (Abraham) said, O my dear son, verily I saw in a dream, that I should slay thee as a sacrifice, consider therefore what thou thinkest I should do. He replied, O my Father do what thou art ordered to do.' A word cannot surely be placed in a more unequivocal light than in the above Sentence: perhaps the Commentator intended to quote the preceding example,

Another Object is therefore added to these Verbs by this Humza of increase, which possesses the property termed increase (and is that by which the Agent or Nominative to a Verb puts the Object in possession of the sense of the radical.)

The meaning therefore of the first example is increase of the radical.)

The meaning therefore of the first example is increase of the radical.)

This property is restricted by prescription to the above two Verbs, contrary to the authority of Akhfush who bestows it upon the whole Class from their analogy to increase, which possesses the property is restricted by prescription to the above two Verbs, contrary to the authority of Akhfush who bestows it upon the whole Class from their analogy to increase, which possesses the property is restricted by prescription to the above two Verbs, contrary to the authority of Akhfush who bestows it upon the whole Class from their analogy to increase, which possesses the property is restricted by prescription to the above two Verbs, contrary to the authority of Akhfush who bestows it upon the whole Class from their analogy to increase, which possesses the property is restricted by prescription to the above two Verbs, contrary to the authority of Akhfush who bestows it upon the whole Class from their analogy to increase.

Annotation.

The Grammarian Ruser, makes Le synonymous with in every respect, and says the phrases have a says the phrases have a says the same precisely equivalent, but he acknowledges that does not govern two Objects in the Accusative like he Husham however thinks there is no difference between them either in sense or construction.

The government of these Verbs is suspended but not destroyed, first, by the introduction of the Particle termed المُعَمَّمُ عَلَى اللهُ ا

I doubted whether Zued was standing with you or Amr.

This suspension of government being caused by the immediate Agency of some word is termed by the Arabian grammarians but that the government of the Verbs is not altogether destroyed by the construction they alledge the following argument as a proof; namely that if another Sentence follow the one to which the Particle is prefixed, the government will be preserved, as

I thought that Zued was standing and Amr going.

The following Verbs namely أَنْبَا انْبَا انْبَا and عَدْبَ عَنْ and غَبْرَ ; أَخْبَرَ ; أَخْبَرَ ; أَخْبَرَ إِنْبَا انْبَا انْبَا are also transitive to three Objects.

Note, that it is not allowable to reject in composition the 1st Object or Accusative, nor either of the last two separately, but they may both be rejected together as already described.

Annotation.

The التفاريخ are distinguished from other Verbs by the following peculiarity, namely that the Agent and Object with which they are connected, may be expressed by the conjunctive personal pronouns, and both be the same Individual, as المحافظة الم

The following Story will illustrate the use of the different verbs of this Class.

مِنْيُ مَرْتَبَةً * STORY.

A Merchant was going through a slave-market one day and happened to see a Broker holding a boy by the ear for sale, and calling out, who will purchase a youth accomplished, sensible, learned, and faithful, for one hundred Dirhums? Why my good Sir said the Merchant, I suspect you must be crazy, for if your boy possess the qualities you mention, he is worth a thousand Dirhums. O said the Broker you see him shining and take him for silver, but if you were acquainted with his failing you would probably find him copper. Pray what is his failing said the Merchant, and what do you think the cause of it? He tells every year said the Merchant a great lie and a little lie, and each of these I consider as a very serious evil. Pooh

pooh! said the Merchant, I look upon this as a mere trifle. He accordingly purchased the boy and took him into his service; and finding him expert and skilful in duty, placed him at the head of all his servants. But it happened sometime after; that the Merchant accompanied by some of his friends went out to his garden, and sent the boy home about sunset to bring him his ass, but the boy as soon as he approached his master's house rent his clothes, and threw dust upon his head, and exclaimed, O alas, alas, my master! the lord of my bounty!—the Merchant's wife concluded from his appearance that some misfortune had happened to him, and said, alas, boy, what is the meaning of this outcry? Ah! replied he, the roof of the house has fallen in upon my master and crushed him to pieces with all the other Merchants. The wives of the Merchants who happened to be invited there by the lady of the house, as soon as they heard the report of the slave beat their faces in despair, and began to run towards the garden, but the boy got before them and entered it tearing his clothes like a frantic person and throwing dust on his head, in the same manner as he had done before-The Merchants surprised at his appearance asked the cause of his disthe women. tress. Ah! I believe he replied, a spark of fire escaped from the hands of one of the maid-servants and has set fire to your house, and I do not think there is a single child that has not been burned to death, nay not one even of the maid-servants nor one of your wives. The Merchants hearing this ran out all distracted, one weeping for his sister and wife, the other for the daughter of his relation, but when they got about half way home, both parties met on the road and every one saw his friend safe, and discovered that the whole was a trick played upon them by the lying valet. What has tempted you said his master to this act? Do you not know replied the boy that I was bound to tell you every year a great lie and a little. one? Well said the Merchant and under what class must I place the present? Is this the large lie or the little one? O this is the little lie, replied the boy, the large one you shall have bye and bye! This little lie said the Merchant will answer my purpose.—I now give you your liberty, so set out, and find some other person of more consequence to practice your large lie upon.

OF THE GOVERNMENT TERMED وياري OR ANALOGOUS.

The Class termed ويَمَاسِي or Analogous contains seven Governing Powers.

FIRST ANALOGOUS GOVERNOR.

اَلْغِعْلُ الْمُطْلَقُ

Of the Analogous Governors the first is a Verb Universally, whether neuter or transitive, and in any tense past or agrist; for every Verb governs an Agent in the Nominative, as تَرَبُرُيْنُ 'Zued stood.' تَا مِرْبُرُيْنُ 'Zued struck;' but if the Verb be transitive it governs an object in the accusative also, as المُحْرَبُرُيْنُ عُبُرًا 'Zued struck Amr.'

The Agent can never precede the Verb in the order of construction but the Object may, as زَيْدَا اَوْرَبَاتُ ; nor can the Agent be omitted in composition, which is not the case with the Object which may be optionally omitted.

SECOND ANALOGOUS GOVERNOR.

الصدر

The second is the Infinitive (الْكَيْدُونُ) which is defined to be the Name of a Mode, (الْمُحُدُنُ) and is termed الْمُحُدُنُ or the Source, being the source from which the Verb is conceived to flow.

Annotation!

The true Grammatical sense of the term as a semployed in the Definition of an Arabic Infinitive, is not easily conveyed by any one word in the English Language. Mr. Lumsden who well knew its true nature and force has rendered it event, and to his opinions on every important question of Arabic Science and general Grammar, the profoundest respect is justly due; but the word as

The Grammarians of Busrah call the one the noot or radix, from its absolute signification in itself, without reference to a Verb; and the the branch or stem, because it is not independent in itself, but has reference to some Noun. On the other hand the Grammarians of Koofuh call the other toot, and the one the branch or derivative, because the rules of permutation to which the latter may be subjected, depend entirely on the permutations of the

Annotation,

I shall endeavour to make appear, is a much more comprehensive term than event: it embraces all attributes when considered separately from the beings to which they are attributable; all essential and inward properties as well as outward respects and relations, and reaches to actions themselves as well as manners of actions.* On the contrary the word event means little more strictly speaking, than the end, conclusion or termination of an affair, and this also is the precise Definition of it as given by Cicero; "Eventus est alicujus exitus negotii." May it not therefore be concluded that the word event, even in its most comprehensive acceptation, signifies rather the effect of action, than action itself, and that consequently it cannot be considered as a legitimate representative of in the definition of an Arabic Infinitive?

This however is a question of too much importance to be hastily decided upon. It involves a very minute inquiry into the true nature and definition of the parts of speech, and if fully and satisfactorily conducted, into the general principles of universal Grammar. An analysis of this nature will not indeed be expected in the limited space allotted to a note, but a short view of the subject may be interesting, and this I purpose to submit.

My own opinion is that the most unexceptionable name for an Arabic Infinitive is a mode or manner of being; I mean a mode in its philosophical acceptation as explained by Locke, and since adopted I believe by every writer on ontology. "Modes I call such complex ideas, which, however compounded contain not in them the supposition of subsisting by themselves, but are considered as dependences on, or affections of Substancies; such as are ideas signified by the words triangle, gratitude, murder, &c." But in order to justify the application of this term to an Arabic Infinitive, it may be necessary to enter into some detail.

^{*} See Watt's Def. of Mode,

⁺ De Inv. 51, C.

Amotation.

The word in Arabic is precisely equivalent to the Hebrew will and means literally, to become new, and transitively as an augmented triliteral to make new or produce, God made new or created it and it was created,' in which sense its prototype is frequently found in the Bible production of the kingdom there," or rather as I should think make a new kingdom, establish royalty there. This is the original sense of the word which as applicable to an Arabic infinitive is explained as follows by the Grammarian Ruzce:

"We mean by the word at thing existing in or by some other thing, whether extrinsical as beating and going; or intrinsical as extension and contraction." If the reader will take the trouble to compare this with the definition of a mode as given above by Locke, and of its various divisions as recorded by Watts in his Logic, he will find I think the term is and mode in every respect reciprocal.

Let us compare them in a few places. "The very being of a Mone depends on some substance for its subject, in which it is, or to which it belongs; so motion, shape, quantity, weight, are modes of

^{*} The party opposed each other standing.

Now it is certain that the arguments of the Busrah Grammarians in support of the Jacob as the Root, are absolute and of general application, while those of the Grammarians of Koofah for the in are confined to the rules of permutation alone, from which no general principle can be inferred. But if no other proof were necessary to establish the original of a word, then it would follow that it is originally in and it is originally in and it is an

Annotation.

the body; knowledge, wit, folly, love, doubting, judging, are modes of the mind; for the one cannot subsist without body, and the other cannot subsist without mind."*— "We mean by the word is says Ruzee,' a thing existing in or by some other thing, as beating, going, extension and contraction, &c." So far the terms are clearly identified.

Further. "Modes are either essential or accidental. An essential Mode or Attribute, is that which belongs to the very Nature or Essence of the Subject wherein it is; and the Subject can never have the same Nature without it, such as Roundness in a Bowl, Hardness in a Stone, Softness in Water, Vital Motion in an Animal, Solidity in Matter, Thinking in a Spirit:" All these Modes are comprehended in the Definition and are all Arabic Infinitives and the Sources of Derivation."

Again. "An Accidental Mode, or an Accident, † is such a Mode, as is not necessary to the being of a thing, for the Subject may be without it, and yet remain of the same Nature that it was before; or it is that Mode, which may be separated or abolished from its Subject: So Smoothness or Rough-

Watts's Logic, p. 71.

[†] The word Event is merely applicable, agreeably to the authority of Lucretius to accidental modes, or to those accidents which may be absent or present without destroying the subject,

The Infinitive (مَصْدُر) has the same government as its own verb; if therefore the verb be neuter it governs the Agent in the Nominative.

EXAMPLE.

And if transitive it governs both a Nominative and an Accusative.

EXAMPLE.

In both these examples the word Zued is grammatically in the Aorist Case, from its relation to the Infinitive, but virtually in the Nominative, as its Agent.

Annotation.

ness, Blackness or Whiteness, Motion or Rest, are the accidents of a Bowl; for these may be all changed, and yet the body remain a Bowl still: Learning, Justice, Folly, Sickness, Health, are the accidents of a Man: Motion, Squareness, or any particular Shape or Size, are the accidents of Body:

—So Hope, Fear, Wishing, Assenting and Doubting, are accidents of the Mind, though Thinking in general seems to be essential to it.' These are all Arabic Infinitives.

"Modes belong either to Body or to Spirit, or to both. Modes of Body belong only to matter, or to corporeal Beings; Modes of Spirit belong only to minds; such as Knowledge, Assent, Dissent, Doubting, Reasoning, &c. Modes which belong to both have been sometimes called mixed Modes or human Modes, for these are only found in human nature, which is compounded both of body and spirit; such are Sensation, Imagination, Passion," &c. See Watts's Logic.

as above detailed will hardly I think be disputed, and that this precise word is peculiarly applicable to the Muspur or Infinitive we have the Grammarian's own words as authority مُعَنَّمُ الْعَامُ اللَّهُ لَلْهُ اللَّهُ اللّهُ اللّهُ

The Infinitive is constructed in five different ways.

- 1. It is connected as the oil or Governing word in the relation of the aorist case with an Agent, the Object being at the same time expressed, as in the last example.
- 2. It is connected as the in the relation of the agrist case with an Agent, the Object not being expressed.

EXAMPLE.

آ عَجَبْتُ مِنْ ضَرْبُ زَيْدٍ I was astonished at the beating of Zued.

Annotation.

object, end, instrument, time and place, ولابط له في الوجود من تكل يقوم به و زمان ومان وكبال له في الوجود من تكل يقوم به و زمان ومان وكبال له في الوجود من تكل يقوم به و زمان ومان وكبال له في الوجود من تكل يقوم به و زمان ومان الالقدى ومن الالقدى ومن الالقدى ومن الالقدى ومن الالقدى ومن الالقدى فوموضوع لسائح التحديد تا المحدر الذي هوموضوع لسائح التحديد تا المحدر الذي هوموضوع لسائح التحديد تا المحدر الذي هوموضوع لسائح التحديد على المحدد المحد

The result of this comparison may perhaps convince us that the Arabians have berrowed their general notions of Science from the Greeks, and that their nouns and infinitives, or their names of modes, comprise the two great philosophical divisions of subject and accident, from which the celebrated categories of Aristotle have been formed. This is indeed a fact that will hardly be disputed. Every system of Arabic logic sets out with this twofold arrangement, and although their modern Grammarians have not adverted to this circumstance in their enquiries into the true nature and definition of the parts of speech, I think it is evident that this must have been the original cause of the present grammatical classification. "The multitude of ideas says Harris," treasured up in the human mind and which, bearing reference to things, are expressed by words, may be arranged and circumscribed under the following characters. They all denote either substance or Attribute."

This Division of words and things into two general Classes is taken from the Sornista of Plato, and is thus given by Sanctius in his Minerva. "Quicquid enuntiatur, aut est permanens, ut Arbor, Durum; aut fluens, ut Currit, Dormit. Res permanentes sive constantes vocamus, quaram natura diu

ECOK SECCEND.

3. It is connected as the in the relation of the agrist case with an Object, the Agent not being expressed, having then a passive signification, and being used as the Agent's proxy.

EXAMPLE.

ا عَجَبْتُ مِنْ أَنْ يُضَرَّبُ زَيْدُ I was astonished at Zued's being beaten.

4. It is connected as the منكاف in the relation of the acrist case with an Object, the Agent being also expressed in the Nominative.

EXAMPLE.

5. It is connected as the فضاف in the relation of the aorist case with an Овјест, the Agent being understood.

EXAMPLE.

"Man is not wearied with soliciting good." لَا يُسَأَّمُ الَّا نَسَانَ مِن دُعَاءِ الْحَدْيِ

Annotation.

perstat: harum notam nomen dixere. Fluentes dicimus, quarum natura est, esse tamdiu quamdia fiunt. Harum nota vereum est? Sanct. Minerv. Lib. II, p. 14.

And hence I draw the following conclusions, that all modes in their absolute and Indefinite capacities are general terms or arbitrary names, affixed to certain combinations of simple ideas which have their existence only in the mind. That every mode denotes an attribute, and that every attribute is capable of sundry modifications as to means, object, end, instrument, time, place, and other circumstances, including in fact the nine sub-divisions or Post-Predicaments into which this comprehensive genus has been distributed.

COMMENTARY.

Note. The above rules of construction are only applicable to the Infinitive of a transitive Verb: when it happens to be neuter, it is constructed only in one way, namely in the relation of the agrist case with an Agent.

The AGENT of the Infinitive can never be concealed, nor can the Infinitive itself be preceded in composition by its $\int_{-\infty}^{\infty} e^{-s} ds$ or governed word.

Annotation.

This is absolutely capable of demonstration, for if we compare the nine subdivisions of ATTRIBUTE, with the common derivative forms or modifications of an Arabic Musdur; which are produced by the mere change of vowel points, or by the addition or clision of certain letters to and from the mode in its radical form, we shall find them agree in almost every particular. For example, quality abstractedly considered will be represented by the care, (and concretely by the considered will be represented by the care and action by the considered will be represented by the considered will be represented by the considered with the considered with the considered with the considered with the considered when by the certain properties of the conjugations which clother the object with the sense of the radical. I do not pretend however to assert that this comparison is precisely accurate, indeed I have no doubt it might easily be improved, * my object is merely to shew that an Arabic infinitive is capable of expressing by its derivative forms the entire series of predicaments or specific relations into which the Attribute or mode has been divided by Philosophers, and this I think I have effected. Aristotle-has enumerated but four divisions of the Attribute namely, Action, Passion, Habit and Position, which he also comprises in the axazéuparox or Infinitive.

Here then we discover the true origin and sense of the Infinitive mood or mode, a term familiar to every Schoolboy, yet strangely misunderstood by the most learned Grammarians. Sanctius, Scioppius, Perizonius and the Messicurs De Port Royal deny the propriety of the expression altogether, and Scaliger says the Infinitive is not a mood in act but in power, to which Vossius agrees.† "Assentior autem Jul. Scaligero, qui actu modum essenegat, contrà quam vulgus non modò semidoctum putat, &c."

^{*} I have omitted the ZIN or Noun of Instrument.

BOOK SEOND.

THIRD ANALOGOUS GOVERNOR.

اسمُ الْغَاعِلِ.

The third is an active participle, (الشرائفاعل) which possesses like the Infinitive the same regimen as its verb, that is, if derived from a neuter Verb it governs an agent in the Nominative as

"The Father of Zued is standing;" and if from a transitive verb it governs both a Nominative and an Accusative.

EXAMPLE.

تَرْدُنُ مَا رَبُ عُلَامِهِ Zued's servant is beating Amr.

Its government is guided by certain conditions.

The sentence in which the Active Participle is employed must include either present or future time, with one of which it must necessarily be accompanied in order to complete its affinity to the Aorist tense of a Verb; for as it already resembles the Aorist in the number of its letters and vowel points, it acquires by this addition of present or future time a similitude in signification also.

Annotation.

"The Infinitive says Dr. Beattie, if you please may be called a form, but a mood it certainly is not?" Now what is a mode but a form or manner of being abstractedly considered, a term synonymous with quality or accident, the ποιότης of the ancient Philosophers as opposed to εὐσία or substance, of which the Noun and Infinitive were used as the verbal Representatives? The whole source of the error proceeded from not attending to this original distinction, and by taking the word mode in its relative instead of its absolute signification, and to this perhaps we may trace the partial and consequently erroneous definition of it by Gaza in his Grammar I. IV; which Harris has unwittingly commended—βάλημα, ἐθὶ ἔν πάθημα ψυχῆς, διὰ Φανῆς συμαινόμ νου.—Α molition or affection of the Soul, signified through some voice, or sound articulate. See Hermes, p. 140.

The QUALITY of Verbs says the Roman Grammarian Consentius is either finite, or infinite.

COMMENTARY.

It must be connected with a Subject (الْبَيْنَا) preceding it in the order of construction to which it forms the Predicate, as in the examples already given, or with a QUALIFIED NOUN (مَوْصُونَ) to which it will be the Attributive, (عَفَى).

EXAMPLE.

المَّهُ أَنَّهُ اللهُ ا

Or with the Article الله as its Antecedent or مُوْصُول to which it forms the Relative (مَالَة)

in which these are altogether promiscuous, as, to read. "QUALITAS, Verborum aut finita est, aut infinita: finita est, quæ notat certam personam, certum numerum, certum tempus, ut, lego, scribo. Infinita est in qua hæc universa confusa, ut, legere." Vid. p. Consent. De Duabus Orationis part. Nomine et Verbo.

And hence the Verb in this form or mode was called Impersonal, Infinite, and by the Greeks ἀπας έμφατον or Indefinite.* "Adeo, 'says Macrobius,' autem hic modus absolutum nomen rerum est, ut in significationibus rerum, quas Aristoteles numero decem κατηγοςίας vocat, quatuor per ἀπας έμφατον properantur, κεῖσθαι, ἔχειν, ποιειν, πάσχειν. Græco vocabulo propterea dicitur ἀπας ε μφατον, quod nullum mentis indicat affectum." Vid. Macrob. De Differ. Græc. Lat. Verbi. p. 325.

This then is the result of our Analysis. An Arabic stripped of the learned language of definition in which it has been cloathed by Eastern Grammarians, turns out to be literally and strictly

the Infinitive Mood of a Verb, that is an indefinite or absolute Mode or manner of being, as opposed to Nouns denoting Substances, and this no doubt being a very important discovery I may perhaps claim the privilege of inserting a Q. E. I!

The Revd. Alexander Crombie, Author of the Etymology and Syntax of the English Language (a work in my opinion of very considerable merit) has adopted without consideration the vulgar error respecting the Infinitive mood, and says—" I concur decidedly with those Grammarians, who are so far from considering the Infinitive as a distinct Mood, that they entirely exclude it from the appellation of verb." Had Mr. Crombie taken the trouble to judge for himself he would have decided differently, for he could not be ignorant that all such words as running, leaping, flying, &c. &c. were Modes,-Modes of Action, but indefinite as to time, place, and other circumstances, and consequently Infinitive Modes. This is surely a very plain and simple matter of fact, and yet Horne Tooke himself that Hermes of critical sagacity has misunflerstood the term mode and says, "The Infinitive appears plainly to be what the Stoics called it, the very Verb itself, pure and uncompounded with the various accidents of Mood, of number, of gender, of person, &c. &c." and Bishop Wilkins proposes to alter the name. "That which is called the Infinitive Mode should according to the true analogy of speech, be styled a Participle Substantive. There hath been formerly much dispute among some learned men, whither the notion called the Infinitive Mode ought to be reduced according to the Philosophy of speech. Some would have it to be the prime and principal Verb, 25

the inflexions of this. Others question whether the infinitive mode be a Verb or no, because in the Greek it receives articles as a Noun. Scaliger concludes it to be a Verb but will not admit it to be a Mode. Vossius adds, that though it be not Modus in Actu, yet it is Modus in Potentia, All which difficulties, (mighty difficulties indeed!) will be most clearly stated by asserting it to be a Substantive Participle.

But in the name of common sense, where lies the difficulty or impropriety of the term? Are not the chief objects of our thoughts things or Substances and their Manners of being? Are not the words walking, flying, learning, dancing, sailing, sitting, &c. &c. certain Modes or manners of being, applicable to certain objects? Are not these manners of being, general words representing general ideas, and therefore applicable to many particular things? May we not talk of the walking of a Mun; the walking of a Hörse, the walking of a Dog, and so on ad infinitum? Is not walking then a mere mode or manner of being, applicable to an indefinite number of objects and consequently particular to none? Is it not therefore indefinite? It expresses no time, no person, no place, in fact nothing but a certain manner of motion; is it not therefore a Mode expressing a general idea, and therefore an Indefinite an Infinitive Mode?

And now having the Mode termed walking for instance, a word expressive of a manner of being, applicable to a great variety of objects, if we wish to limit its general application we apply it to

The Participles Active termed الْمَالَةُ or Participles of the Intensive or Superlative Degree, such as فَرُوْب ; ضَرَّاب ; مَصْرَاب ; and يَعْرُوْب ; and يَعْرُوْب ; a very wise man; ' very cautious or prudent,' have the same government as the simple Participles of the possitive degree, and are guided by the same conditions, and although they lose under this form their resemblance to the Verb in the number of letters, yet their increased signification as Intensive Participles is considered an equivolent for that loss.

Annotation.

becomes limited to a certain individual, but nothing more. If however we find it necessary to define the time in which the agent performed this Mode, this manner of action, we say Barclay walks—did walk, or will walk. Here we have the Mode modified, so as to express time and this we call the Mode indicative. If we desire the performance of the action, we say Walk, which is the Mode imperative and so on through all the other grammatical Modes or variations which we generally call Derivatives. Now these observations are equally applicable to every such word in the language, and consequently the term Mode is applicable to them also.

And so much for the Infinitive Mood, a term perfectly applicable to an Arabic Musdur. That the word Mode is the best representative of in its technical and Grammatical sense, I have endeavoured to prove, as well from the authority of the Arabian Grammarians themselves, as from the character of language in general, which being conversant about things or the manner of things, in other words about Substances and Modes, (the chief objects of our ideas,) would necessarily have two characteristic verbal Classes to represent them, and these appear to me to be Nouns and Infinitive Modes.

It now only remains to be observed that besides the Infinitive as above described, there is another species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term or the Infinitive's Noun, like the δυαμα ο ήματος of the Greeks. Between these two Nouns, namely the same distinction in point of sense, as between the word drink and the Participial Noun drinking, when used as a general term in such an example as the following:

FOURTH ANALOGOUS GOVERNOR.

The fourth Analogous Governor is a Passive Participle () and has the same regimen as a Verb in the passive voice, governing a Noun in the Nominative as the substitute of the Agent.

The conditions attending its government require that it be used in a sentence, including either present or future time, and be constructed with a SUBJECT in the same manner as the ACTIVE PARTICIPLE.

In which lines the word drink might be substituted for drinking without much detriment to the sense, for drinking joys mean the joys of drinking or drink, and the same may be observed of all other words of the same classes as grief, grieving; kiss, kissing; love, loving; &c. How then shall we ascertain the true character of these words? What for instance is love as opposed to the general term loving? It is certain that they are both general terms descriptive of certain sensations of delight or Modes of pleasure in the mind, and as such may become either the subject or predicate of a Proposition, but this explains nothing, and if we ask the Arabian Grammarians for an explanation they answer us by pointing out a mere distinction in their application. the Infinitive of a Neuter Verb. The essential distinction then, for some essential distinction there certainly is, between the Infinitive and the Infinitive's Noun or Ismo Musdun, is not in my judgment timple abstraction, that is, making the one an abstract Noun in opposition to the other; for as I have observed before they are both general* or abstract terms, but rather in the idea of action or energy conveyed by the Infinitive, which action, Locke observes, however various, and the effects almost infinite, is all included in the two ideas of thinking and motion. These are his words, "For action, being the great business of mankind and the whole matter about which all laws are conversant, it is no wonder, that the several Modes of thinking and motion should be taken notice of, the ideas of them observed, and laid up in the memory and have names assigned to them; without which, laws could be but ill made, or vice and disorder repressed. Nor could any communication be well had amongst men, without such complex ideas, with names to them: and therefore men have settled names and supposed settled ideas in their minds of Modes of Action, distinguished by their causes, means, objects, ends, instruments, time, place and other circumstances, &c."

The real distinction then between the Musdur and Ismo Musdur seems to be this. The Ismo Musdur signifies simply the name of a Mode without any reference to action or energy; the Musdur denotes a more complex idea and indicates indefinitely the action, energy or being of that Mode. Love for example is a name assigned to a certain feeling of delight, but Loving is something

more, being another name by which we indicate the action or efficacy of that feeling called Love; and hence we perceive the real cause of its possessing an active or transitive government, in contradistinction to the Ismo Muspun, which having no reference to action, has no other regiment than that of any common Substantive Noun.

Action indeed is applicable to every Infinitive, and this the Arabian Grammarians acknowledge by dividing all the verbs in the Language into two general Classes, which they term and that is, verbs denoting Actions transitively, (the actio transiens of Logicians;) and verbs denoting actions inherent or inseparable, (actio immanens) which we are accustomed to call neuter; and hence we perceive the propriety of the Rule laid down in the Commentary, namely, that the laid or Active Farticiple may be derived from either a transitive or intransitive verb, which is saying in other words that every action supposes an agent.

This idea of action is conveyed in other languages by terminations, as beat-ing: verber-ans:

TUT-200* &c. but in Arabic with a few particular exceptions, there is no distinguishing mark
by which we can discriminate the Infinitive from the Infinitive's Noun, so that we
must trust entirely to the context for the sense of either. Every Participle however in our
language when used as a general term, is the just representative of an Arabic

I mean every Active Participle formed by adding the termination ing to the Imperative of a Verb, which seems in this case to possess a similar power to the characteristic to, and therefore it may perhaps be said that we have two Infinitives,* as,

The real office of the Verb is supposed also by Plato to indicate action το μεν επὶ ταῖς πράζεσινον δέλωμα, ς ημά πουλεγομεν, declarationem qua actiones significantur verbum dicimus, the which is nothing but the res fluentes already quoted, but however this may be, it will scarcely I think be denied that action, energy or being is the essential characteristic of every Arabic Infinitive.

FIFTH ANALOGOUS GOVERNOR.

The fifth Analogous Governor is a simple Attribute or Adjective (اَلْصَغَةُ الْسَبُهُمُ) which resembles the Active Participle, as well in the forms of declension, as in its attributive character, as وَمَارِبُونَ ; ضَارِبُانِ ; ضَارِبُانِ ; ضَارِبُانِ ; ضَارِبُانِ ; ضَارِبُانِ ; ضَارِبَانِ ; ضَارِبَاتُ ; ضَارِبَاتُ ; ضَارِبَانِ ; ضَارِبَانِ ; ضَارِبَانِ ; ضَارِبَانِ ; ضَارِبَانِ ; ضَارِبَاتُ .

Annotation.

It must however be remembered that the proper subject of discussion in this work is the Musduk, and not the Ismo Muspur. It is this that the Arabian Grammarians include among the Analogous governors, ascribing to it the same regimen as its own Verb, which they say must in every case denote either transitive or intransitive Action. In this contracted sense it must be acknowledged that Mode cannot be considered as a strictly correlative term, for although it may be truly affirmed that every Arabic Musdun is a Mode, yet we cannot add conversely that every Mode is a Musdun; as the word Mode embraces every manner of being without exception, and a Grammatical Musdur includes only Modes of action, energy or being. These considerations led me to remark at the commencement of this note, that the true grammatical sense of an Arabic Infinitive was not easily conveyed by any one word in our Language, and as my object in this enquiry is truth and nothing but truth, I deem it my duty candidly to state and examine every objection that occurs to me on the subject. But the word Mode, although far more comprehensive in signification than a grammatical Musbun, is yet clearly the term that the Arabian Grammarians had in view in the Definition السم حَدَث and as it embraces, also the Ismo Musoun, which is only distinguished from the other by its want of verbal government, (being generally represented by the same word) I conceive it to be upon the whole the least exceptionable, if not the only just representative of an Arabic Infinitive.

But the word Event which is usually explained an incident, the consequence of an action, the conclusion or upshot of any thing, I confess I cannot but consider as inapplicable to any Arabic Infi-

The Attribute or Adjective (الصفة المنافقة) is derived from a neuter Verb, and is formed to denote the uninterrupted or perpetual existence of the sense of its infinitive in an Agent or Substantive Noun. NITIVE whatever.* It may indeed be frequently applied to an Ismo Musdur, for War, Peace, Poverty, &c. are called *events*, but these are not Nouns of Action, nor have they any verbal government, and cannot therefore be properly considered as Infinitives, in the true sense of the term Infinitive as laid down by the Arabian Grammarians.

Having given a short view of what appears to me to be the true character of an Arabic as well as an to both of which the term more is generally applicable, I shall close this Note with a few observations on the and and and two attributive Nouns derived from the Infinitive, which seem to require some explanation.

It has already been shewn that every Arabic Infinitive in the general sense of the term Infinitive, has a twofold signification: one under the character of an by which is simply indicated a mode, the other under that of a properly so called, by which is denoted the energy or being of that mode in a state of action. Now as every Object represented by a Substantive Noun, may be described by its active and passive qualities, i. e. by the actions which it performs, or by the qualities with which it is modified or distinguished, so would language naturally be provided with distinct words to express them, and hence the two Derivative Adjectives, in Arabic termed with distinct words to express them, and hence the two Derivative Adjectives, in Arabic termed

The word governed by the Adjective (رَبُونُ) is sometimes in the Accusative Case, either from its resemblance to the proper object of a transitive Verb when definite; or as the بَرْبُنُ when indefinite; and sometimes in the Aorist Case from its relation to the Adjective. and zamil ximil of which the former, as its name imports, is properly the Noun of the Agent, but used as a Verb Adjective, for the purpose of describing the Action in which the Agent is employed, as Discourse Zued is beating; and the latter a simple Attribute or quality supposed to exist in the Object to which it is imputed, as Zued is beautiful, and to this observance of active and passive qualities as signified by these derivitive words, and to this alone, we are perhaps to trace the distinction drawn by the Arabian Grammarians between them, namely, that the one, meaning the denotes the temporary existence of a Mode in an agent, and the other i. e.the zamil its permanent or uninterrupted continuance.

This general rule however regarding permanent Attributes is certainly erroneous, for to prove it true, we must prove that every Mode or Quality as expressed by the Attribute or in the object to which it refers, which if granted would confound accidental and essential Modes altogether, and produce as many strange phenomena in nature as in language. A poor man for instance would necessarily live and die a pauper, and if sick and gouty into the bargain, so much the worse, for no hope could be reasonably entertained of his cure. A Pregnant Woman (Line) might in vain look for an accouchement, for the quality being permanent, she could not consistently with the grammatical canon (or more properly speaking the grammatical Bull) expect the slightest change in her condition! yet seriously, the Arabian Grammarians maintain, that the Adjective or Attribute denotes properly its own perpetual existence in the Substantive Noun to which it is imputed, and the phrase (I) (Anacreon* is beautiful, must accordingly denote that Anacreon*

Moore,

To this mode of objection I can easily conceive the answer of an Arabian Grammarian. He will remark that certain objects are characterized by certain qualities, and consequently that although a female is not always pregnant, yet pregnancy is a quality habitual, or at all times attributable to her, in other words that the power of conception is co-existent with female nature. This is good, but it will not prove the point in question, for pregnancy can neither exist before, nor after certain periods, so that after all it is but a temporary, a transitory, in fact a

mere nine month's quality, and like the attribute supposed to be conveyed by the Active Participle or is a can only become permanent by the repetition of the action!

This distinction of permanent and transient qualities is commented upon by the Greek Philosophers. Aristotle has many passages of a similar nature to that under discussion, one of which Harris thus paraphrases in his Arrangements.

"And now with respect to all kinds of QUALITIES, whether corporeal or incorporeal, there is one thing to be observed, that some degree of permanence is always requisite; else they are not so properly Qualities, as incidental affections (Hába.) Thus we call not a man passionate because he has occasionally been angered, but because he is prone to frequent anger; nor do we say a man is of a pulid or a ruddy complexion, because he is red by immediate exercise, or pale by sudden fear, but when the paleness or redness may he called constitutional."

But first let us consider the true nature and use of an light or Active Participle, which may enable us to judge of the propriety or impropriety of the distinction supposed to exist between it and the simple Adjective.

The Participle Active or Jelis is used in two ways. First as a Verb Adjective, and secondly as a Substantive Noun. As a Verb Adjective alone it is properly the subject of Grammar, and in this character it describes the state or action in which any object exists or is employed, as "Zued is standing;" or "Zued is beating Amr," and has therefore the precise force of the Aorist Tense of a Verb, governing in the one case the agent in the nominative, and in the other,

the object in the accusative. It seems to possesses virtually, the united force of a predicate and copula, or of an attribute and assertion, and may be resolved into is and the sense of the Musdum or Infinitive, as يُمْ يُنُونُ equivalent to يَعْ يَعْمُ يُنْ وَاللَّهُ وَاللَ

These remarks are in a great measure applicable to the zamilizion which is also viewed in the double capacity of a Substantive Noun and a simple Adjective or Attribute, and having also a near resemblance to the delia it is termed by the Arabian Grammarians and leaves or Attribute resembling an Active Participle.

What then may be asked is the difference between the المنافقة المسلمة and the المنافقة المسلمة and the المنافقة المسلمة in their grammatical characters as governing powers? The difference in my judgment is very obvious and very simple, and consists merely in this, that in construction the first or المنافة المنافقة ا

Annotation.

The simple ATTRIBUTE or ADJECTIVE as expressing a passive quality, may perhaps have given rise to the idea of permanence, and the Active Participle as expressing an active quality, may also have led Grammarians to consider it as somewhat transitory, but in point of fact there is no such distinction between them, and the idea of duration whatever it may be, will in every possible case I imagine depend upon the nature of the Verb, as well as our own previous knowledge of the Subject. For instance, the phrase (الرض مناحد) The Earth is moving,' conveys to every one acquainted with our astronomical System, an idea of permanence, as the quality of mobility predicated of the Earth, is known to be continual,* but if we say الكرقة مناهر The Ballis moving,' we shall then be understood to infer merely that the BALL is IN MOTION temporarily, and will again be at rest. Yet the Active Participle is the same in both examples and cannot be said to convey any idea of duration either temporary or permanent. It simply describes the action in which the Agent is employed with an indefinite relation as to Time. The very same may be observed of the Attribute, for if we say, 'The Iron is Harp,' we shall be understood to speak of a quality co-existent and essential to the Substance Iron, and therefore permanent, but let us substitute another Adjective, and say the Iron is nor, and the permanence of the quality immediately vanishes, for we all know that heat is accidental and not essential to Iron, and from this very idea of its transitory existence arose the common adage, Strike while the Iron is nor.

With the Active Participles and Attributes, considered as Substantive Nouns, Arabic Syntax has properly no concern. They assume then a different character in composition, and have the same government as common Substantive Nouns. For instance the words at a substantive Nouns, and is a substantive words at a substantive Nouns, and is an Asker or Beggar, are all active Participles in the character of Substantive Nouns, though they may be literally translated and used as Verbal Adjectives, for all means Tyrannising; which substantive Nouns, though they may be literally translated and used as

This is effected either by its terminating in Tunween (وَ الْهُ الْمُرِيرُونَ) or in what is considered equivalent to the Tunween, namely the Noon (رَوُونِ) of the Dual or Plural Number, or by its being followed by the مُضَافَ الله or governed word.

both qualities and subjects, and are therefore assumed as Subjects in a Proposition, not however with any reference to the transitory nature of those qualities, as the Arabian Grammarians would fain make us believe: on the contrary they denote the habitual possession of the attributes or Modes referred to, and signify that the objects are acustomed to do so and so; for what is a Tyrant but a man who is known to practice tyranny? Or a Sentinel, but a man whose duty it is to keep watch? Or a Beggar but he who subsists by, or whose trade is begging? In truth the Active Participle as a Substantive Noun invariably denotes in Arabic the habitual Doer of an action, though in its Verbal capacity it may perhaps be considered as temporary, as

I have already remarked that the square final is used like the Active Participle in the double capacity of a Substantive Noun, and a simple Attribute, resembling in application an Active Participle, as its name imports. In the first capacity it is used as a concrete or complex Term, to express both a subject and quality conjoined, as large in a Miser or avaritious man (Miserus) and from a foreign Country. (Peregrinus) &c. (where it may be observed the Latin adjectives have precisely the same force as the Arabic;) but these are all strictly speaking, simple Adjective Nouns, which indicate by their prescribed form, that they are meant to be added to other Nouns, "so that both together may answer the purpose of complex terms," and in this character as simple modificatives, they are the proper subject of grammar. Now between an Active Participle and a simple Adjective considered as Verbal and Analagous Governors, we have already pointed out the distinction, (a distinction that comprises the two grand divisions of Modes or manners of being, that is, the modes of action, and the modes of being without action; as the first attributes Action to a subject, and the second Quality, but neither with any adsignification of time,) and it now only remains to cosider in what it is that they differ when used as Complex Terms.

Annotation.

With regard then to the transitory or permanent nature of the attributes expressed by either, there is not in my judgment any distinction whatever. They are both concrete Terms that differ only in the nature of the qualities they express. The Active Participle being the abbreviated sign of a complex idea, i. e. of a Subject and an Active Quality, as a Sentinel, or man who keeps watch; and the Adjective Noun, the sign of another complex idea, i. e. of a Subject and a Passive Quality as, a Miser, or man in whom the passion of avarice is supposed to exist. Compare all the Participles and Adjective Nouns in the Arabic Language (as complex Terms) and this distinction and no other I think will be found to characterize them; and indeed the reason appears obvious, for the Participles are derived from Acrive Verbs, the Adjective Nouns from Neuter, or from those that merely express corporeal or mental qualities in a passive state.

If we have occasion to mention an Object habitually employed in any given action, or whose profession is agency or business of any sort, we use the Active Participle as a Substantive Noun, and say if an Agent, if a Story-Teller: a Husbandman: a Servant, &c. and on the contrary, if we intend merely to describe an Object as possessing some particular Quality, we make use of the Adjective Noun, and say if a Virgin, (which is also an Adjective) Virgo Intactation of the Old Man, Senex. If a Partner, Consors, &c. without any reference to their active states.

But I repeat again that Arabic Syntax has nothing to do with Active Participles, and Adjective Nouns, as Complex Terms. They are employed in Grammar as Verb adjectives, and simple Attributes or Qualities, and are used descriptiveley, to define either the action in which a given Agent is employed, or the Quality with which a given Object is invested. As such they are necessarily adjected to Nouns, and although their grammatical office is to describe the Active or Passive state of a Substantive, they come afterwards like the Participles and Adjectives of other Languages, to stand for the Substances themselves.

In this manner are Passive Participles employed, for which means literally beloved, is used as a Substantive Noun to denote a Mistress. Worshipped, or God. Worshipped, or God. Written, a Book. Possessed, a Slave or Servant. John sent, a Prophet. Hidden, an Enigma Imprisoned, a Prisoner. &c. &c. upon which principle of Analysis, Horne Tooke has explained above 2,000 abstract terms in the English Language, a process that may be adduced as a very powerful argument in favor of Etymology, as it enables us to trace the true and legitimate character of Words,

between the Active Participle, or Le (1) and the Simple Attribute, or Radian Grammarians, between the Active Participle, or Le (1) and the Simple Attribute, or Radian Grammarians, with regard to the temporary or permanent nature of their qualities, is founded in error and misconception, and that the source of this error proceeds from confounding the different offices of these words together, that is, by comparing the Attribute or Adjective when used as a complex term or Substantive Noun, with the Active Participle as a Verb Adjective, which being then considered as equivalent to the Aorist Tense of a Verb, may well enough have given rise to the transitory nature of its attribute, when applied to any given Agent or Object. For instance the word is a simple Attribute or Adjective, signifying properly familiar, but like our own Adjective it is used in the sense of a Complex Terms to denote an intimate or companion, a Familiar. If however we use the Active Participle, and say if the Participle is equal to the Aorist and the phrase will mean that, Zued is sitting, which though indefinite as to time, has certainly something transitory in its nature as opposed to the complex Term which does not mean indeed a perpetual sitter,

that would be ridiculous, but merely a companion with whom we are accustomed to sit, and corresponds precisely with the Latin Sodalis, "qu. sedales quod una sederent et essent."

I have extended this Note so far beyond the limits of the Text, that I cannot with propriety persevere in the discussion, yet I relinquish it with reluctance, for I consider it as one of very considerable importance, and one by no means satisfactorily explained by the Arabian Grammarians. The few remarks here offered may however enable the reader to carry on the enquiry himself. I have pointed out what appears to me the source of the error in the distinction drawn between the Active Participle and the simple Attribute, (which should properly be called the Verb Adjective and the Adjective Noun.) This if correct, will be found of importance, but much imformation is still wanting to elucidate the true nature of Arabic Adjectives, and this I may possibly attempt in a future work. I shall therefore close this enquiry with a few promiscuous remarks (extracted from Ruzee and the Waffeld) on the Active Participle and Attribute.

The Participle Active and Simple Attribute or Adjective, agree in denoting a mode or manner of being; they assimilate also in form as to number and gender, and follow the same rule of construction with the single exception alluded to in the Commentary.

There are however some particulars in which they differ. The Adjective for instance, is derived from a Neuter Verb alone; the Participle Active may be derived from either a Neuter or an Active Verb. The Adjective denotes the perpetual, the Participle Active the temporal existence of an attribute in a given Object or Substantive Noun. The Adjective has seldom any resemblance in point of form to the Aorist of a Verb, as غريف ,* though some examples of this are known to occur as , خامر , در منافع و , خامر , خام

The word governed in the Objective Case by the Adjective, is never allowed to precede it in construction: that of the Active Participle may. We can therefore say زيد آزانا فاريع 'I am beat- ing Zued,' but we could not say زيد وجهو من 'Zued has an ingenious countenance.'

There are other distinctions between them which I omit to record as unimportant.

Witty, Beautiful ..

⁺ Evident. Delicate or slender.

The Adjective may or may not be constructed with the definite article \hat{J}_{j} , and in either case its governed word is to another; or made definite by the Article; or neither one or other: hence we have six peculiarities of construction; but besides these the governed word is itself constructed in three different forms, namely in the Nominative, Aorist, or Objective Cases, which multiplied by six as given above, leave eighteen varieties of construction, as may be seen in the following:

Of the examples however given in the above table, two are rejected by Grammarians as improper, namely the 13th in which the Adjective Nour is made definite by the Article of and connected in the relation of the Acrist Case with its own which is itself constructed with a Pronoun in the acrist case; and the 15th in which the Adjective Nour is made definite by the Article, and connected in the acrist case with an Indefinite Nour.

The propriety of the 16th example is also disputed by some and defended by others, but I willingly resign the office of umpire to any other Commentator.

Of the fifteen remaining examples the 1st, 4th, 8th, 9th, 11th, 12th, 14th, 15th and 16th, are termed by the Arabian Grammarians i. e. elegant or perfectly correct. The 7th and 10th or unobjectionable, and the 2d, 3d, 5th and 6th,

I shall close this long grammatical narcotic on Infinitives, Verb Adjectives and Noun Adjectives, (which the generality of readers may probably feel inclined to class among the Insolubilia de Aliaco) with a few extracts from Arabic Authors by way of illustration. In the following poetical panegyric on a departed Hero, extracted from the 20th Muqam of the Muqamat-ool-Hureeree will be found a variety of Adjective Nouns, employed both as simple Attributes and complex Terms.

O People I have a surprising story to unfold,

From which the wise and ingenious may derive advantage!

I was acquainted in my youthful days with a potent Hero,

Whose warrior-blade was sharp and piercing,

Who entered the lists of combat in crested pride,

Confident of success and fearless of danger.

^{*} The word the Plural of means both brilliant swords and beautiful women. I have tried to preserve the quibble but I fear not very successfully.

At the vigour of his onset the most impervious holds gave way,

And he made himself an easy passage through the narrowest defiles.

He never encountered an adversary in single combat,

Without returning from the tilt with a blood stain'd spear:

Nor assaulted a fortress however fenc'd and barricado'd,

Without being hailed on the erection of his standard, with the auspicious cry,

'Assistance from above and a speedy victory!'*

Thus he lived triumphant: -arrayed every night in the stately garb of youth.

Giving rapture to the young and beautiful and receiving it in return,

Nay caressed by all as an idol of perfection.

But time which continu'd to extract his vigour and diminish his strength,

At length succeeded in effecting his fall,

And reduced him to so mean and shriveled a plight,

That his very friends beheld him with contempt.

The exorcists and cunning men in vain attempted his recovery,

And the most skilful Physicians were baffled in their attempts:

Then indeed he abandoned arms, for arms had abandoned him,

After giving and receiving many a hostile salute.

He is now dejected, drooping and crest fallen, †

And such is the fate of man who is born to misery.

Behold to-day the warrior stranger on his funeral couch,

And who will bestow a trifle to have him decently intered?

The reader will perhaps smile when he hears, that this 'sable warrior,' this Arabian Achilles, so feelingly and pathetically eulogized by Aboo Zued, is no other than the celebrated Bonus Deus or Hellespontiacus of the Ancients! Of this un-

fortunately Sir William Jones was not aware, when he gave it a place in his Poeseos Asiaticæ Commentarii, for taking the whole as a serious funeral oration over some departed Chieftain, he has inserted it in his chapter De Poesi Funebri, and has actually drawn a grave comparison between it and David's Lamentation on the death of Saul and Jonathon!*† "Hæc Elegia, 'says he,' non admodum dissimilis esse videtur pulcherrimi illius carminis de Sauli et Jonathani obitu; atque adeò versus iste.

Had Sir William read one page farther in the Muqum he would have discovered the true Hero. Take another example of permanent attributes, simple adjectives and descriptive Epithets as included in the following Story.

STORY.

I resided at Busrah,* said a certain Arabian Yorick, as a parson and professor of humanity, and was one day a good deal amused by a strange fellow, squint-eyed, straddle-footed, lame of both legs, with rotten teeth, stammering-tongue, staggering in his gate like a man intoxicated, puffing and blowing like a thirsty dog, and foaming at the mouth like an angry camel, who came up and scated himself before me. Whence come you, said I, O father of gladness? From home please your worship said he. And pray where is your home I rejoined, and what is the cause of your journey? My home he replied, is near the great mosque, adjoining the poor house, and I am come for the purpose of being married, and to beg you will perform the ceremony. The object of my choice is this long-tongued, importunate hump-backed, scarlet-skined, one-eyed, no-nosed, stinking, deaf, wide-mouthed, daughter of my uncle. Do you agree Miss Long-tongue said I, to marry this Mr. Pot-belly? Ay, said the lady (with a great deal of doric brevity!) then accept my friend cried I, this woman for your wife, take her home, cherish and protect her. So he took her by the hand and departed. Now it happened that about

^{*} I suspect this Busrah professor of humanity must have had a peop at our old friend Democritus Junr. whose sketch of an accomplished beauty may be considered complete. "Every lover admires his mistriss, though she be very deformed of herself, ill-favored, wrinkled, pimpled, pale, red, yellow, tan'd, tallow-faced, have a swoin jugiers platter face, or a thin, lean, chitty face, have clouds in her face, be crooked, dry, bald, goggle-ey'd, blear-ey'd or with staring ey's, she looks like a squis'd cat, hold her head still awry, heavy, dull, hollow-ey'd, black or yellow about the eys, or squint-ey'd, sparrow-mouthed, Persean hook-nosed, have a sharp fox nose, a red nose, China flat, great nose, nare simo patuloque, a nose like a promontory, gubbertushed, rotten teeth, black uneven, brown teeth, beetle browed, a witches beard, her breath stink all over the room, her flose drop winter and summer, with a Bavarian poke under her chin, a sharp chin, lave eared, with a long cranes neck, which stands awry too, pendulis mammis, her dugs like two double jugs, or else no dugs in the other extream, bloody faln-fingers, she have filthy long unpaired nails, scabbed hands or wrists, a tan'd skin, a rotten carkass, crooked back, she stoops, is lame, splea-footed, as slender in the middle as a cow in the waste, gowty legs, her ankles hang over,

nine months after that they both returned to me, rejoicing and had hardly seated themselves when my old friend Adonis called out.—O your worship we have been blessed with a most sweet and fascinating child, and are come to request you will bless and give him a name, and offer up a prayer for his parents. Now what should I behold, but a little urchin stone-blind, hair-liped, without the use of its hands, splay-footed, bald-headed, ass-eared, bull-necked not posessing one sense out of the five, and altogether frightful and deformed, in short a perfect epitome of all the qualities of his parents. At this sight I said to them, be thankful for this darling boy, and call him Oombsoon,* for truly he has all your perfections combined in himself, and that child is truly admirable who resembles his parents!

OF THE GOVERNMENT TERMED OR ABSOLUTE.

By Absolute Government (العاصل العامل) is meant a government perceived by the mind, and in which a word as an agent has no concern. It is distinguished in two ways. First, as governing the Subject and Attribute in the Nominative Case, which is the primary form of a word in construction, or the state of a Noun uninfluenced by any Verbal governor, as

Annotation.

The Government termed as opposed to still or Verbal, may be properly denominated Absolute or Independent, and like the Absolute Case in Greek, it comprehends the Participle or Verbal Adjective with its substantive Noun, or the sime and silve which are termed also the Subject and Predicate, and which seem to correspond with the Quop Loquimur and De Quo Loquimur of European Grammarians. This therefore may account for the mark of Case assigned by the Arabs to the Aorist Tense of a Verb, for the Aorist as well as the Participle forms the sime, the Quop Loquimur or Predicate, to the silve or thing spoken or, and both terms connected together in discourse by means of this Absolute Government, produce the connexion termed simil which constitute a perfect or complete Proposition.

Tued is going. Secondly, as governing the Aorist tense of a Verb, which arises from its aptitude to supply the place of a Noun, as كَانِي كَا كَانِ اللهُ اللهُ كَانِي اللهُ اللهُ

Annotation.

The Nominative Absolute in Greek, which may be considered equivalent to the AMIL MANUMEE in Arabic, is accounted for by Grammarians by supposing a verbal ellipsis, as they contend that there can be no Nominative without a Verb either expressed or understood. This doctrine may perhaps be applied to the Case in question, though the ancient* Arabian Grammarians endeavour to account for the construction in a different manner, alledging that the Subject governs the Predicate, while others again pretend that they mutually govern each other.

With regard to the government assumed by the Aorist, it is the opinion of Kissaer that it should be considered Verbal, and not Absolute as laid down in the Commentary, and this Verbal regimen he ascribes to one of the four formative letters of the Aorist, namely and if which he thinks must give the Tense is very gravely refuted by other Grammarians, but the reader I imagine will readily dispense with their arguments, and I shall accordingly permit them to rest in peace.

The Nominative Case, † or that Case in Arabic which expresses the subject of a proposition without the means of any Verbal Governor, may be illustrated by the following extract from Hermes. " It has been said already in the preceding chapter, that the great Objects of natural union are Substance and Attribute. Now from this Natural Concord arises the Logical Concord

of Subject and Predicate, and the Grammatical Concord of Substantive and Attributive.† These Concords in Speech produce Propositions and Sentences, as that previous Concord in Nature produces Natural Beings! this being admitted"— "What?—Why that Nouns and Adjectives like natural Beings coalesce and bring forth Sentences!" we proceed by oberving, that when a Sentence is regular and orderly, Nature's Substance, the Logician's Subject, and the Grammarian's Substantive are all denoted by that Case, which we call the Nominative." He then goes on to explain how the Attribute in imitation of its Substantive would appear in the Nominative Case also.—"Every Attributive would as far as possible conform itself to its Substantive, so for this reason, when it has Cases, it imitates its Substantive, and appears as a Nominative also. When it has no Cases, it is forced to content itself with such assimilations as it has!" [†] Harris classes Verbs, Participles, and Adjectives under the general head of Attributers, and for this, the poor man has not escaped the lash of the Wimbleden Aristarchus. "Harris should have called them either Attributes or Attributables; but having terminated the names of his three other Classes (Substantive, Definitive, Connective) in Ive, he judged it more regular to terminate the title of this Class also in Ive: having no notion whatever, that all common terminations have a meaning and probably supposing them to be, (as the Etymologists ignorantly term them) mere protractiones vocum; as if words were wire-drawn, and that it was a mere matter of taste in the writer to use indifferently either one termination or another at his pleasure."
