# Bulbs, Roses and Plants

For Winter and Spring Blooming, and Fruits for Fall Planting

Innisfallen Green Houses,

Springfield, Ohio.

## CROCUS

### The First Flowers of Spring.

**T**HE CROCUS we offer are a great improvement over the older sorts usually sold, being much handsomer in form and color. You cannot plant too many—a good place is any place—in groups, in figures, in lines at the edge of walks, etc. With a trowel or spade make a slanting opening about two inches deep, put in the bulb, then with the foot press back the sod. This is an easy way to plant flowers that will be a sheet of bloom almost before the grass is green. If planted in beds, cover bulbs about two inches. Crocus can be readily bloomed in pots or boxes, requiring no special culture; by planting at intervals a succession of bloom can be had. Few flowers will give so much pleasure and delight for the little care and expense called for.

### Choice Named Giant Flowered

### Dutch Crocus.

**Cloth of Silver**—Silvery-white, striped lilac, small flowers, but very profuse.

**Lewis Napoleon**—Extra large, dark purple.

**Mont Blanc**—Large and fine white.

**Sir Walter Scott**—White striped.

**Yellow Mammoth**—Large bulbs, each producing a number of large golden-yellow flowers.

Price, 10 cents per dozen; 75 cents per hundred, postpaid, or by express 60 cents per hundred.

Mixed Crocus, all colors, 8 cents per dozen; 50 cents per hundred by mail. By express, 40 cents per hundred.

These Mixed Hyacinths are used almost exclusively for bedding out in the Fall on account of their cheapness. They are just as good colors and just as fragrant as the named varieties; the difference is in the cost of keeping the named sorts separate, both while planting and after they are dug. The exact shades cannot be given, but the general outline of colors are kept separate, so that in ordering you know what color you are buying.

*Just think of a dozen good Hyacinths for only 60c, postpaid.*

**Grape Hyacinths.** One of the sweetest little flowers imaginable, and in masses very striking, making a wave of intense blue that catches every eye. As hardy as an oak and increases rapidly. Ours is an improved variety with longer spikes and larger bells than the old-fashioned variety. Its spikes are just the size for button hole bouquets, while its long stems enables it to be used to advantage in all bouquets or cut flower work. We offer them in white and blue. Price, 2 for 5c; 25c per dozen.

**Cockade Hyacinth.** A real curiosity. First, a frizzled, cockade-like spike an inch or two in length, appears above the soil and, as it slowly rises on its long stalk it becomes five or six times as long as at first, developing into a long, feathery, blue plume, and lasting for weeks in that condition. One of those pretty odd things that everybody likes. Perfectly hardy in the garden and fine for pots. Price, 3c each, 25c per dozen.

**Hyacinthus Candicans.** This is unlike our Spring blooming Hyacinths. Its leaves are deep green, fleshy, resembling some of the Yuccas. The flowers are white, in handsome pendulous bells arranged on pyramidal spikes. A strong bulb will give from two to three flower spikes, and these produce from thirty to fifty flowers. The plants come into bloom in July and bloom continuously until October. Price, 10c each; 3 for 25c.

## Winter Blooming

### *Freesia. Refracta Alba.*

The charming and novel blossoms of this popular flowering bulb are well shown in our illustration. For Winter blooming in the house it is probably to day the most popular of all. It is sure to succeed and flower elegantly for anyone in any situation. The perfume is delicious. There are six to eight flowers on a stem nine inches high, which are particularly valuable for cutting. Four to six bulbs can be planted in a five inch pot. They commence growth immediately after planting and need not be put away to form roots like Hyacinths. Planting successively from September to November will give a succession of bloom through the Winter. We cannot too earnestly urge customers to plant this charming Winter flower. Pure white, with yellow blotched throat; delicious fragrance. Price, fine bulbs, 3 cents each; 12 for 25 cents; mammoth bulbs, 5 cents each; 7 for 25 cents.

### *Sparaxis.*

Resembles Ixias, but flowers are more drooping, opening flatly. Their combination of beautiful and unusual colors is fascinating. The individual flowers are very large, and the brilliant colors are striped and splashed in every imaginable manner. Fine mixed, all colors, 3 cents each; 25c per dozen.

### *Ixias.*

The graceful flower spikes of the Ixias remind one of the Gladiolus, but the flowers are very distinct, being round and well opened. Their brilliant colors and vividly contrasting markings have made them already quite popular, although introduced only of late years. For pot culture, plant six in a five-inch pot and treat as Hyacinths. When in full bloom the display will be magnificent. For outdoor culture they should be planted in a somewhat sheltered situation, and protected with leaves or straw.

Mixed Sorts—Many varieties of rich shades and colors. Price, 3 cents each; 25 cents per dozen.

# The Chinese Sacred Lily, or Oriental Narcissus.

THIS variety of Narcissus is called by the Celestials "The Water Fairy Lily," "Joss Flower," or "Flower of the Gods"—is grown by them to herald the advent of their New Year and as a symbol of good luck. It bears in lavish profusion chaste flowers of silvery-white, with golden-yellow cups. They are of exquisite beauty and entrancing perfume. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, insuring luxuriant growth and immense spikes of flowers. In fact, the incredibly short time required to bring the bulbs into bloom, four to six weeks after planting, is one of the wonders of nature. "You can almost see them grow," succeeding almost everywhere and with everybody. They do well in pots of earth, but are more novel and beautiful grown in shallow bowls of water, with enough pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the Winter.

Our importation of these BULBS will arrive from China about October 1st, and will be an unusually large one, in consequence of which we are enabled to offer you extra fine large flowering Bulbs at the reduced price of 15c each, or 3 for 40c, by mail post-paid. If ordered sent by Express, 3 for 30c. Don't fail to include a few of these in your Fall order.

## Giant Snowdrops.

The Charming Snowdrop is the first of all flowers to herald the approach of Spring

It can frequently be seen in bloom when the ground is white with snow, as it takes every advantage, and hastens to display its graceful snow-white bells before Winter has disappeared. In conjunction with Chionodoxa and Scilla a matchless effect can be produced. As the bulbs are small, they should be planted liberally in order to obtain immediate results. Banks, grassy slopes, edging, or rock-work will suit all of these bulbs. They should not be disturbed often if a fine display is desired.

## CHIONODOXA LUCILLÆ.

(Glory of the Snow.)

We find these bulbs are becoming very popular, and deservedly so, for their lovely blue and white flowers, produced in long sprays, are seen in the garden among the earliest Spring flowers—sometimes even before the snow has disappeared. The bulbs are perfectly hardy and make a fine display when planted in masses out-doors. For window culture they are fully as charming as Freesias. They bloom very early, commonly by Christmas. Selected bulbs. Price, 3 cents each; 25 cents per dozen.

## ORNATHOGALUM ARABICUM

(Arabian Star of Bethlehem.)

This is another bulb of comparatively recent introduction. It is one of the most magnificent Winter blooming bulbs or plants; in fact, some consider that it excels all others. The bulb resembles that of a Hyacinth. Treat it just as you would a Hyacinth, not bringing it up to the light too soon, and it will reward you by throwing up a flower spike eighteen inches, or even two feet in height, a great mass of pearly white flowers, having a bright, jet-black center. Price, 5 cents each; six for 25 cents.

Astilbe Floribunda.

## ASTILBE.

Ready for Shipment in November.

**Astilboides Floribunda.** This new variety is a great improvement over Spirea Japonica. The flowers are borne in large, feathery panicles of purest white, and last a long time in bloom. It is dwarfer in habit, earlier and more profuse in bloom. This is undoubtedly one of the most beautiful and graceful subjects grown, its foliage and flowers combined making it one of the finest gems for winter and spring decoration in the house and conservatory, while for grace and elegance as a cut flower it is unequalled. Strong roots, 25c each.

Gloxinia.

## GLOXINIAS.

Charming plants; dwarf habit. Flowers in profusion, of ten 2 to 4 inches across, of most exquisite and gorgeous colors, magnificently spotted, mottled and blended. ## RANUNCULUS---Fair Maids of France.

For beauty and grace of form, and brightness of colors, the Ranunculus is unsurpassed. These attractive qualities have made it a prime favorite. The Ranunculus requires careful culture, and is worthy of it. The plants should not be exposed to a hot, dry air, nor to a blazing sun. The soil should be rich and not too dry, and yet well drained. Persian and Turkish mixed, 2 cents each; 20 cents per dozen.

## TRITELIA UNIFLORA.

A most valuable addition to Winter flowering bulbs for house culture. Several bulbs can be planted in a four or five inch pot; each will send up numerous flower stalks, producing exquisite star-shaped blossoms; pure white, beautifully lined with azure-blue. The flowers follow each other successively, and a pot or basket of these bulbs presents a lovely blooming appearance all Winter. In the open ground they are quite hardy and are specially fine planted in small beds or with Snowdrops, and like them, frequently blooming before the snow has gone. Price, 2 cents each; 15 cents per dozen.

## ZEPHYRANTHES, or ATAMASCO LILIES

The Zephyranthes, or Zephyr Flowers, are becoming very popular. Cyclamen.

## Giant Persian Cyclamen,

OR PERSIAN VIOLET (New Improved.)

HERE is no more ornamental plant for greenhouse or parlor culture than Cyclamen. It grows readily, blossoms freely, and remains a long time in flower. The soil should be equal parts of turfy loam, leaf mould and sand. The whole secret of growing Cyclamen to perfection is light, air and low temperature. We offer fine large plants (not dry bulbs) in two colors—red and white. Price, 10 cents each; three for 25 cents.

## Dwarf Calla, "The Gem."

The foliage is of a lustrous dark green, and is produced in great abundance. Its flowers are produced in the greatest profusion, being literally an ever-bloomer; it will bloom freely all Summer out in the open ground; in September it can be lifted and potted, and will continue blooming all Winter. "The Gem" Calla will continue to grow and bloom for years without ceasing, and the quantity of flowers which a large plant will produce is astonishing. Price, 10 cents each.

Dwarf Calla, "The Gem."

## Black Calla.

There have been many grand introductions of late years among bulbous and tuberous rooted plants, but this one stands very close to the top of the list, and the demand for it has been very great. It demands a high place in every collection of Winter flowers, for it is exclusively a Winter bloomer, and must be treated as such. It is a native of the Holy Land, and produces several large, thick leaves very rich in color, resembling those of ordinary Calla Lily. The flower is very large and sweet scented, having a peculiar fruity odor. The color is strikingly odd and beautiful, being an intense glistening coal black. Appearance of plant when in bloom is majestic; people come from every direction to see the Black Calla when they find it in your possession. Decidedly one of the finest novelties that has been brought out in many years. Price, large blooming bulbs, 25 cents each.

Black Calla.

In addition to its usefulness as a pot plant, it makes a fine thing for planting in the garden in the Summer, being very effective. Price, 15 cents each; extra large, 25 cents each.

# ROSES.

**O**WING to limited space in Fall Catalogue we cannot enumerate and describe as many varieties of Roses as we do in Spring. We can, however, furnish all Roses mentioned in our Spring Catalogue.

As the demand for Roses during the Autumn months is largely confined to the finer sorts for house culture during the Winter, we therefore devote the following pages to a select list of choice varieties most suitable for the purpose and that cannot fail to give the most gratifying results. When received the Roses should be planted at once in a three or four inch pot, in good, rich soil, watered freely and given a warm temperature and as much light and sun as possible. In the spring they may be transplanted in the open ground, where they will continue to bloom throughout the Summer.

Fall planting of Roses in open ground is only recommended for the Southern and Pacific Coast States, where the Fall and Winter is the most favorable time for all kinds of out-door planting.

Price, 10 cents each; any six for 50 cents; or entire list of twenty for \$1.25, by mail, postpaid.

All Roses mentioned in this catalogue will be furnished in two-year-old plants at 25 cents each. Selection can also be made from Spring Catalogue at prices where named.

We recommend this beautiful Rose as one of the best in the entire list of new varieties for general purposes. The flowers are medium to large size and are produced in large numbers. The plant commences blooming when quite young and continues throughout the season. The color is exceptionally fine and unique—a vivid Rose, with bright yellow in the center, which is altogether remarkable in a Rose.

## BRIDESMAID.

The bud is of exquisite shape and contour, so solid and firm, and the stems are so long and stiff that no other Rose will compare with it in keeping qualities after being cut. It is a bright pink and is the same color all the time under every condition of weather and surroundings.

## CLIMBING METEOR.

The brightest color of all Roses. It is a free, persistent bloomer and will make a growth of from ten to fifteen feet in a season, in bloom all the time, as it is a true ever-bloomer, being literally loaded with its deep, rich red flowers, all the time.

## EMPRESS AUGUSTA VICTORIA.

One of our customers in California writes that she is kept busy by people asking her what Rose this is.

## SWEET PEAS

When Sweet Peas are wanted in bloom for Winter or early Spring, they should be planted indoors early in September, and, to have the best results, the temperature should not exceed 45 degrees at night, to keep them stucky and firm. They should have plenty of air during the day and a full exposure to the sun. Splendid success may be obtained from sowing Sweet Peas in October or November. A perfectly drained soil so situated as not to be subject to too frequent or severe freezing should be selected, and the seed covered about three inches deep. While you cannot be sure of success from Fall sowing, yet it is worth while to take the risk for the advantage of having blooms about a month earlier than you could get them from outdoor sowings made in the spring.

**Invincible Scarlet**—Bright Scarlet. Per packet, 5c; oz., 10c.  
**Invincible White**—Per packet 5c; oz., 10c.

**Monarch**—Deep bronzy-maroon and dark blue. Pkt., 5c.; oz., 10c.

**Primrose**—Pale primrose yellow. Pkt., 5c.; oz., 10c.

**Choice Mixed**—Includes many of the new sorts and can be depended upon to give fine flowers of a wide range of color. Per Packet, 5 cents; ounce, 10 cents; ¼ pound, 15 cents.

\***Sweet William, Single Mixed**—Rich flowers. Pea Pkt., 3c.  
\***Sweet William, Double Mixed**—Very attractive and effective. Per packet, 6 c.

\***Valeriana**—Hardy Heliotrope. Per packet, 3 cents.

**Mammoth Verbenas**—The average trusses measure nine to twelve inches in circumference, and the individual florets on properly grown plants over one inch across, or larger than a 25-cent silver piece. They bloom freely, are vigorous in growth, and contain all the beautiful new colors and shades. Mixed colors. Per Packet, 13 cents.

\***Violet**—(Viola Odorata). Well known, fragrant, early Spring blooming plants for edging, groups or borders. Per packet, 6 cents.

This large-flowering, fragrant Tulip is a decided novelty. A fine variety for pots or garden. The color is yellow and the flowers emit the odor of Violets. Price, 5 cents each; six for 25 cents.

## Mixed Tulips.

Superfine.

We have a large stock of unnamed Tulips for bedding, which we price so low as to make a large mass of these showy flowers a matter of trifling expense. They are excellent bulbs, and will bear handsome blooms.

Double and Single collections are kept separate. Several hundred bulbs at the quotations below involve less expense than is required to secure a few Summer bedding plants, and in the matter of display they are fully as valuable during their season as an equal number of ordinary blooming plants.

**Superfine Mixture Single Tulips**—In fifty choicest kinds, splendid flowers. Price, 25 cents per dozen; \$1.75 per hundred.

**Superfine Mixture Double Tulips**—In fifty choicest kinds, splendid flowers. Price, 25 cents per dozen; \$1.75 per hundred.
