Chicago. The Chicago Public Library in the face of difficulties imposed by reduced appropriations and the draining away of trained assistants did little more than hold its own in 1920. The impossibility of recruiting a staff of any description made necessary the closing of six of the smaller branches in October for the remainder of the year, so that the circulation figures for the branches showed an increase of less than 8,000 volumes in a total of over four millions. The Central Library, with a circula-

tion of 859,998, registered a fair increase over the 1919 circulation of 827,353. The inequitable distribution of expenses between the Library and the Board of Education also caused the closing of seven high school libraries from the beginning of the current school year in September until November first. The library tax rate is six and two-thirds tenths of a mill per dollar of assessed valuation, but is reduced by a scaling process to barely half a mill. Since the per capita cost of the Chicago Public Library to the population of 2,701,705 is less than thirty cents per annum the city ranks lowest in library support among the ten leading American cities.

The Library operated thru 52 branches, the Central Library, and 1,739 stations and other agencies. The new Henry E. Legler Regional Branch, opened on Chicago Day, October 9th, was the first of five contemplated branches which are to act as regional or key branches and centers of supply and direction for the smaller and less well equipped installations, and within a few months was already circulating six and seven thousand books a week.

The closing of the John Crerar Library pending its removal to new quarters probably accounted for the heavy increase in the reference use of the main library, especially in the Civics and Documents Division. The total reference use for all departments was 905,511 as against the 1919 figures of 753,478. The circulating documents collection comprises 11,284 titles. The Music Room has 4,472 specially registered borrowers, and loaned 10,020 volumes and 27,739 pieces. The collection of books for the blind numbers 2,656 volumes, somewhat less than half of these being in Moon type, and 12,060 volumes were circulated for home use.

The total number of employes on the Library roster, including the janitor force, auto-truck drivers and elevator operators, was 629 at the end of the year. Their combined salaries amounted to \$583,421. Other maintenance costs were for books, \$105,465; periodicals, \$15,925; binding, \$55,331; rent, heat and light, \$37,276. Total receipts were \$970,678. The Henry E. Legler Branch was erected under a general contract at a cost of \$185,000.

WISCONSIN

Madison. The University of Wisconsin Library School celebrated its fifteenth anniversary on the occasion of its annual May Day festival, held this year on April 30th. The morning was devoted to the festival, at which Corinne Bacon was the speaker, her subject being "The Organization of Life," a discussion of current books dealing with the problems of the day. This

brought a large audience, which remained for the reception following.

At one o'clock the alumni held a reunion and a luncheon for sixty-five—twenty-eight alumni, the faculty and class of 1921. The guests of honor were Miss Bacon, Sarah C. N. Bogle, assistant secretary of the A. L. A., and Zana K. Miller of the Library Bureau, a former instructor in the School. Many letters and telegrams of greeting were read, and the program concluded with a talk by Miss Hazeltine.

IOWA

Davenport. The per capita circulation of the Davenport Public Library in 1920 was 6.3. The circulation to the registered borrowers, numbering 15,479 persons, was 360,328, a gain over the previous year of 45,031. The collection was brought up to a total of 66,181 by the addition of 6559 volumes. Expenditures amounted to \$37,797, of which \$14,893 was used for the salaries of the library staff.

The special event of the year was the opening of the branch at Bettendorf, where the city council had contracted with the Davenport Public Library to provide books and library service for two afternoons and evenings a week. This branch, situated in the town hall, was opened for the loaning of books October 26th. The Extension Department also loaned 106,952 books for home reading thru eight deposit stations.

The librarian for fourteen years, Grace D. Rose, resigned early in the year to become librarian of the Des Moines Public Library, her place being taken by the present librarian, Grace Shellenberger.

MISSOURI

St. Louis. In order to meet the assertion made recently in the Professional Training Section of the American Library Association that library schools are failing to give instruction in the social relations of the public library, and to attempt to awaken social consciousness in the beginning library worker, the school has assigned to its pupils, social work of various kinds during the past few months. As a part of the entertainment given to the group of Jugo-Slavs on a recent "Visitors' Night" held at the Central Library, Cecile Pajanovitch read poems in the Croatian, Serbian and Slovenian dialects. The students have served as guides at several of the receptions given to various groups during the year. They also assisted in taking charge of the Library booth in connection with the "Own Your Own Home" exhibit at the Coliseum, April 25-30.

In connection with the courses in subject bibliography and book annotation, the students are writing the annotations for the June number of the Monthly Bulletin and preparing a selected bibliography on vocational guidance.

LIBRARY OPPORTUNITIES

POSITIONS WANTED

Librarian with ten years' public library experience, two years' cataloging work and reference work in a museum library, wishes a position as assistant cataloger in a special library in Brooklyn or downtown Manhattan. Address: L. L. 11, care of the LIBRARY JOURNAL.

College graduate, who has had one year's course in library science, one year's experience as student assistant in college library and two years' teaching experience, wants position as an assistant in college library. Address: Anne Dudley Gibbs, Peabody College, Nashville, Tenn.

Experienced cataloger desires position in northwest, preferably Idaho, Wyoming, Colorado or Montana. Address: D. M. 11, care of the LIBRARY JOURNAL.

Librarian, young man, college graduate, twelve years' experience, four in administrative

position, now employed, desires position with banking or other corporation or in technical library paying salary of approximately \$2500. Thoroughly competent. Best references. Address: L. 11, care of the LIBRARY JOURNAL.

Library school graduate, expert cataloger, with ten years' experience in public and college library work would like to organize or develop a library in the Northwest. Salary, \$1800. Interview at Swampscott. Address: W. E. 10, care of the LIBRARY JOURNAL.

POSITIONS OFFERED

Editorial assistant with experience in briefing or digesting legal or business material: the ability to turn out a considerable amount of clear readable English and some business knowledge are essential. Salary to start \$30 a week with excellent opportunity for rapid advancement. X. B., LIBRARY JOURNAL.

This volume meets a great demand and is a very creditable piece of work.
—Atlantic Monthly.

We unhesitatingly and unqualifiedly recommend this Atlas as being authentic, complete, and done with the minutest regard to detail.—Union Library Association.

The Cornerstone of the Library

REYNOLDS COMPREHENSIVE ATLAS AND GAZETTEER OF THE WORLD

The world today is more important to 20th century men and women than all the documents of history. Reynolds Atlas is replete with latest information that is continually sought in libraries. Facts too recent for encyclopedias are here fully compiled for the first time. It contains, in one volume, maps, statistics and world data that would ordinarily be distributed through many volumes; post-war maps and post-war knowledge completely covering the world of 1921. Reynolds occupies negligible shelf space.

Partial Contents

Official 1920 Census; 242 NEW post-war maps (practically all full-page) of continents, countries, states, cities—128 printed in from 3 to 6 colors; 55 maps of American and foreign cities; latest Gazetteer information on more than 8,500 principal world cities; discussion of Einstein Theory of Relativity; 40 automobile road maps of every state in the Union and parts of Canada, with motor laws for speed, lights, licenses and regis-

tration in every locality; 34 railroad maps—every railroad in the country; 132,000-word history of the World War, with 40 battle maps; facts and figures concerning every land and people—areas, boundaries, altitudes, soils, climates, minerals, manufactures, commerce, agriculture, vegetation, shipping, etc.—just a few of the features in Reynolds Comprehensive Atlas and Gazetteer of the World.

BLODGETT, Evelyn, head of the Order Department of the University of Washington Library, and lecturer in order, accession and trade bibliography at the Library School, left on May 23rd to join the Reference Department staff of the New York Public Library as reviser of cataloging.

BROWN, L. Lindsey, 1920 N. Y. P. L., appointed assistant librarian New Haven (Conn.) Public Library.

BUTTERWORTH, Jeanne, 1919 S., appointed librarian of the Elmwood (R. I.) Public Library.

DERMAN, Henrietta M., 1916-17 S. special, for nearly four years cataloger and classifier of the Slavonic division of the Library of Congress, sailed for Europe on May 24th. After some time in England and in Latvia, Mrs. Derman plans to go to Russia to help in the development of libraries there. In anticipation of this work, she has prepared in Russian and in Lettish booklets on American library methods, on cooperative cataloging, on the national library and its activities, and on principles of book classification. The manuscripts are almost ready for the printer. For the present, her address will be care of C. C. Abel, Elizabeth Street, 27, Riga, Latvia.

HAFNER, Alfred, of G. E. Stechert and Co., New York, sails for Europe on June 9th and will return on September 1st.

HINESLEY, Pearl, 1919 N. Y. S., resigned her position with E. I. Dupont de Nemours & Co., Wilmington, Del., May 1, to become reference librarian of the Public Library at Roanoke, Va.

HISS, Mary, 1920 N. Y. S., has resigned as assistant organizer for the Kentucky Library Commission to become assistant cataloger in the Evansville, Ind., Public Library.

JAMESON, Mary Ethel, 1912-14 N. Y. P. L., has resigned her position in the Science Division of the New York Public Library, to become executive secretary and librarian in the Syracuse Clinic, Syracuse, N. Y., organized by Dr. T. H. Halstead under whom she worked while in France with the American Red Cross.

RODEN, Carl Bismarck, librarian of the Chicago Public Library, was married on May 24th to Lora Antoinette Rich.

VAIL, Robert W. G., 1914-16 N. Y. P. L., resigns the librarianship of the Minnesota Historical Society, St. Paul, to become assistant director of the Research Bureau of the Roosevelt Memorial Association at 1 Madison Avenue, New York City. Wilhelmina E. Carrothers, head cataloger of the Library, and formerly of the Portland (Ore.) Library Association succeeds to the librarianship.

WROTH, Lawrence C., first assistant librarian of the Enoch Pratt Free Library, Baltimore, Md., is author of "A History of Printing in Colonial Maryland, 1686 to 1776," announced for publication by the Typothetae of Baltimore.

The following appointments of members of the class of 1921 of the New York State Library School have been made: Sallie B. Kappes, librarian in charge of the high school branch of the Morristown (N. J.) Public Library; Dorris M. Reed, reference assistant, Columbia University Library; Helen M. Vincent, assistant in the reference department of the Wilmington Institute Free Library.

Members of the graduating class of the Syracuse University Library School have been appointed to the following positions: Lucille Crockett, in charge of the Children's Department of the Salem (Ore.) Public Library; Helen L. Bailey, assistant, Rochester (N. Y.) Public Library; Margaret Stauffer, assistant, Cleveland Public Library; Hazel Manville, in charge of school libraries, Ithaca (N. Y.); Berdella Krueger, cataloger, Union College Library.

Appointments of members of the class of 1921 of the University of Wisconsin Library School are: Clara Louise Chamberlain and Anne M. Robertson, assistants, Milwaukee Public Library; Esther Friedman, assistant, Hibbing (Minn.) Public Library; Mrs. Blanche M. Haye, assistant, Children's Department, Cleveland Public Library; Mrs. Lucy B. Hoxie, assistant librarian, Oneonta (N. Y.) Public Library; Lois M. Ingling, head of extension work, Muncie (Ind.) Public Library; Edna B. Johnson, assist-

The Constitutional Review

A quarterly magazine, founded and maintained for the purpose of "advocating the maintenance of constitutional government and recording its progress at home and abroad." Discusses the great problems of democratic, representative, and constitutional government. It stands for a firm adherence to the fundamental principles of American government as set forth in the Constitution, opposes bolshevism, socialism, and other forms of extreme radicalism.

Henry Campbell Black, Editor. Published by the **National Association for Constitutional Government**, and sent without charge to all members of that Association. State, municipal, college, and university libraries, and public institutions of various kinds are subscribers. Subscription price, one dollar a year.

ant, Children's Department, Indianapolis Public Library; Jessie E. Logan, librarian, Hawthorne Branch, Indianapolis Public Library; Marie A. Peters, assistant, catalog department, Indianapolis Public Library; Ruth A. Longden, assistant librarian, Soochow University, Soochow, China; Margaret A. McLeish, assistant in

charge of circulation; Coliseum Branch, Evansville (Ind.) Public Library; Lillian M. Morehouse, assistant cataloger, Elkhart (Ind.) Public Library; Gertrude Senne, librarian, McKinley Junior High School, Kenosha (Wis.); and E. Suzanne Witwen, assistant, Eau Claire (Wis.) Public Library.

BIBLIOGRAPHICAL NOTES

"Record Writing and Printing" by Mary Elizabeth Hyde, instructor in the New York State Library School, is a four-page card folder showing the mental and mechanical sides of adapting handwriting to record purposes. An illustration shows the use of this hand on the standard catalog card. Price 5c.

A list of current serials received by the Newberry Library is "intended primarily as a finding list for the convenience of readers and assistants in the Library. All titles that were deemed desirable. . . whether or not they were serials in the strict sense of the word, have been included. Certain series as distinct from serials have also been added."

"Tested Stories," a list of stories and where to find them, has been compiled by the Children's Department of the Cincinnati Public Library "to meet the call for help from playground directors and story tellers who have not had much experience. . . ." The stories listed "have been told by staff members. . . ." The story tellers say that they sell well, and the children say that they are good stories.

"Library Advertising" by Walter A. Briscoe, chief librarian of the Nottingham (England) City Library, discusses publicity methods for city libraries, library work with children, rural library schemes, and contains material included in articles which have appeared in the *Library Association Record* and the *Library World*, with considerable amplification and additional chapters on newer phases of library advertising. The book is published in this country by the H. W. Wilson Co.

"Advertising the Public Library" by Winifred Fleming Ticer, librarian of the Free Library of Huntington (Ind.), is an account of advertising methods calculated to bring the best results. It discusses the "story" and the paid advertisement, giving many varied examples of the human interest and feature stories, and concludes with a series of forty library chats suitable for posting or for advertising and easily adapted to local

needs. There are several plates illustrating devices successfully employed on Booster Day by the Huntington Free Library—"the first library in Indiana or any other state, so far as I can learn, to have a float in the industrial parade on Booster Day."

"Lessons on the Use of Books and Libraries" by O. S. Rice, State Supervisor of School Libraries for the Wisconsin Department of Public Instruction, is published by Rand McNally and Co., at one dollar. The request from other states for the author's "Lessons on the Use of the School Library," which formed a part of the Wisconsin common school course of study, led to the preparation of this volume, "which differs in plan from its predecessor in that it is designed primarily for the use of the pupils as a text, tho at the same time, it will serve as a guide to the teacher in giving lessons on the use of books and libraries."

"Library and Society," edited by Arthur E. Bostwick, is volume 3 in the Classics of American Librarianship series published by the H. W. Wilson Co. (price, \$2.25). In his preface, Dr. Bostwick repeats "the warning that the word 'classics' in the title of this series is to be understood as meaning early and standard expressions of ideas that have developed into prominence. The papers and addresses in this volume have been chosen especially with this in view, and as they emphasize social relations an effort has been made to include expressions from men of eminence, whose names would not ordinarily occur to the student of library economy as having expressed an opinion about the work of libraries or as having influenced it in any permanent way."

To fill the requirements for graduation, which demands a compilation of a bibliography, the following subjects have been chosen by students of the Library School of the University of Wisconsin, with the co-operation of various departments of the University and Capitol. The topics are:

PRESS NOTICES.

CHRISTIAN WORLD—This is a timely, impersonal, dispassionate, analytical unanswerable discussion of the weaknesses and inconsistencies of the Christian Science Church. It overflows with facts which provide the ground-work of the author's incisive argument . . . and is as clear as sunshine and as irrefutable as the decalogue.

THE EVANGELICAL MESSENGER—The spirit in which his exposures of inconsistencies in the organization are made is very commendable, and adds merit and pungency to his arguments and forceful statements. It is the only book of its kind on the market as far as we have any knowledge.

NOTICE

THE LIBRARY JOURNAL is developing rapidly as a medium of increasing interest in its announcements of publishers and other business houses whose objective is service for public libraries. Its advertising columns are therefore commended to the attention of its readers who will find in each succeeding issue numerous suggestions in the way of supplies for the well-equipped library.

"Lists of Stories and Programs for Story Hours," by Effie L. Power, compiled by the staff of the Children's Department of the St. Louis Public Library and edited by Effie L. Power, now director of work with children at the Cleveland Public Library, is based on material first published in the *Monthly Bulletin* of the St. Louis Public Library in 1914, slightly revised. "The editor has made no attempt to compile a complete handbook on story-telling, but has merely brought together in uniform printed form story lists and programs of story hours as they have been used to meet the needs of the various divisions of the children's department. . . . Since library story-telling is directed primarily toward inspirational reading, the selections listed are chiefly from literary sources. A wealth of material in the form of biography and history has not been included because books in those classes have been fully indexed by subject in the library catalogs." Published by the H. W. Wilson Co.

THE KEYLESS LOCK BINDER

Allows the magazine to open flat. Made in all sizes and styles of binding Will hold one thick or a number of thin magazines

WM. G. JOHNSTON & Co., Pittsburgh, Pa.

DEAR SIR:—

We have been using several of your Keyless Lock Binders for several months and find them perfectly satisfactory. We have had no more trouble with the "Magazine Thief" and the old numbers look as good as "the new" when taken from the binders.

They improve the looks of the reading table, keep the magazine in better condition and are so reasonable in price that EVERY Association can afford them.

Your sincerely General Secretary.

CANNIBALS and DINNER-COATS

If you were the manager of a plantation in the South Sea Islands and lived alone with your dusky servants not far from where there existed in the jungle a real race of cannibals, would you always put on a dinner-jacket for your lonely meal?

When *Martin Johnson*, motion-picture explorer and adventurer, first went to the South Seas, he was disposed to regard the punctiliousness in dress of the isolated British planter as an affectation. Now he recognizes the dinner-coat as a symbol. It is the man's declaration that he has a firm hold on himself. A Frenchman in the Islands can go half clothed and un-governed by convention and still maintain his dignity. But an Englishman must hold fast to an ordered existence or the Islands will "get" him.

Johnson, whose articles in *ASIA* have been attracting such keen attention, unearthed much information about the wild men he saw, and recounts as well many delightful and human obser-

Martin Johnson, himself, and some of his "wildmen" who seem completely tamed (C)

vations of himself and other white men in a cannibal atmosphere. In the July *ASIA*, "*Wild Men of the New Hebrides*."

Jump the Hedge of Convention

Put yourself in her place!

An American woman made a pilgrimage to a sacred mountain in Japan. She stayed overnight at a Buddhist Monastery. The Temple master led her down a long hall to the bath-house and invited her to bathe while he stood by as any courteous Japanese host would. Later he and a young disciple went to her room to converse with the interesting "foreign" traveler. Fearing she was weary, they asked, kindly, "why don't you go to bed?"

What would you have answered? This and other delicate situations were cleverly and entertainingly met by *Lucy F. Brown* in her article, "A Summer Pilgrimage to Sacred Koya-San."

The second instalment of

"My Chinese Marriage"

the true life story of an American girl who married a Chinese student and went with him to dwell in China.

Other articles and stories of absorbing interest to the lover of the Orient in the July

ASIA

The American MAGAZINE on the Orient

Art Insert of 8 pages. More than 60 Illustrations

ASIA is emphatically a magazine for every public library. Readers who wish to keep abreast of the times expect it to be on file.

H. G. Wells and Strindberg—Not Shakespeare and Dickens— Young China's Choice

Thus do the students of China throw off the yoke of tradition. In one school they suggested that their foreign teacher of literature take a vacation—go home and catch up—because he used Shakespeare and Dickens. They wanted Hardy, Wells, Kropotkin, Shaw, Ibsen, and Maeterlinck. He had become too "chinated and conservative."

This is a small straw that shows which way the Oriental winds are blowing. *Professor John Dewey*, the distinguished American educator who is now lecturing in the Oriental universities, discusses the issues of the New East. His article, "*New Culture in China*," has all the elements of historical importance and rich, human interest.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Chivers Book Binding Co., Inc.

How a Community Met a Library Deficit

By IDA FAYE WRIGHT

Librarian of the Evanston (Ill.) Public Library

Chart Portrays Evanston Library Situation

FACED with a thirty-three and one-third per cent reduction from the tax levy, the Evanston (Illinois) Public Library found that the funds with which to maintain the library were less than those of five years ago, at a time when the population of the city had increased thirty-five per cent and the circulation of the library had almost doubled.

To keep expenses within the appropriation allowed, it would have been necessary to discontinue all of the extension work and buy no new books. Such a curtailment of service would have meant a loss in reading of over one hundred thousand volumes, and that among the people who have fewest books in the home and are farthest from means of transportation to the Main Building.

The Board of Directors set out to inform the public of the facts but not to raise money.

The first announcement was made at the annual Library Day of the Woman's Club, showing thru stereopticon pictures the work which would have to be eliminated. The evening paper told the same story.

As a result protests came by telephone, thru the mails and in personal interviews.

The local paper offered to give a column a day to an intensive publicity campaign; the current events class of the Congregational church which for years has been a clearing house for the discussion of social and welfare problems, deferred its scheduled program and asked the

President of the Board and the Librarian to present the library situation. The opinion of the meeting was that such a curtailment of service would be a serious detriment to Evanston as a whole and must not be permitted. It was voted that the committee of the current events class should call a meeting of citizens to provide ways and means of raising funds to supplement the tax levy of the library.

The war time plan of organization was used in the gathering together of the citizens—each active organization in the city was asked to send a representative. Some forty organizations responded to the call for a meeting at the Library. The gathering was presided over by the chief Americanization worker of the City, one who has been most helpful in the work of the library stations in the foreign district and who is revered by all elements in the City.

In addition to the presentation of the situation by the Library Board, the Mayor and City Treasurer stated the case from the standpoint of the City. Facts brought out were that should remedial legislation be passed at the 1921 session of the Illinois legislature, it could not become effective in producing revenue until 1923 and that a campaign for funds should be on a two year basis, since the sum of ten thousand dollars for each year would be the necessary supplement to the tax. The pastors of seven churches of various denominations took a significant part in guiding and bringing the discussion to a climax.

The first offer of money was made by the rector of the Episcopal Church located in the heart of the district served by the South Branch. His parish guaranteed the rent of the store in which the South Branch is located.

Pledges of the support of their organizations were made by the Catholic Woman's Club, the Boy and Girl Scouts, the Evanston Commercial Association, the Kiwanis, the Rotary and the Evanston Woman's Club—in fact by all of the

organizations represented. The Library Board was requested to appoint a committee to organize the campaign for funds.

During the following ten days the members of the Library Board and the librarian were asked to speak at the local betterment and community gatherings in the different parts of the City, at mothers' clubs, parent-teachers associations, to clubs of high school boys and girls, Junior W. C. T. U., the District Federation of Woman's Clubs, the Legislative Forum of the Illinois Federation of Woman's Clubs, the Evanston Commercial Association, and the Board of Education. At other gatherings a letter from the librarian was read or a message was taken to the club by one of its members.

The legislative as well as the financial needs of the library were stressed. The lawyer member of the Board assisted in drafting legislative measures, and the citizens thru letters and interviews made known to the legislators the needs for remedial legislation and an increase in tax rate. (The bills have now passed the House and are up for reading in the Senate.)

The Evanston Commercial Association in its reorganized form seized the library situation as an opportunity to let the people of the City know that it is interested not alone in the business progress, but in everything which affects the welfare of the City as a whole. Its executive board therefore made the proposition to the Library Board that it would underwrite the library for twenty thousand dollars for two years, the money to be raised thru a campaign.

In response to the previous request that the Library Board appoint a committee to raise the money, the Board appointed as the committee the delegates from the various organizations represented at the previous mass meeting. To this committee, the Evanston Commercial Association proposed that it would head the campaign, provided it could be assured of the support of the organizations represented. The pledges of support were most heartily given.

The Commercial Association organized its campaign with the central idea of popularizing the library as a civic institution—the slogan adopted being ten dollars from a family—five dollars for 1921 and five for 1922. The campaign was started by a full page advertisement

“HELP THE LIBRARY.”

“Every organization, club, lodge, association or group of citizens of whatever nature, is asked to send an officer and four other members to a meeting at the North Shore Hotel to perfect an organization to secure for the Evanston Public Library the funds which it has lost thru the operation of the Juul law.

George Craig Stewart will preside.”

Over a hundred persons attended the meeting including representatives of the following organizations: Rotary Club, Evanston Child Welfare Association, Garden Club, Kiwanis Club, Neighborhood Central School Association, Evanston Drama Club, Evanston Commercial Association, Foster School, Foster Street Mothers' Club, Elks, University Guild, D. A. R., North End Mothers' Club, North End Improvement Association, Oakton Parent-Teachers Association, Oakton School, Evanston Day Nursery, Real Estate Board, Dewey School Mothers' Club, Evanston Dental Association, Evanston Kings' Daughters, Daughters of Isabella, Knights of Columbus, Girls' League, Central School Neighborhood Association, Janet Steele Library, Evanston Woman's Club, South Side Betterment Association, Lake Shore Neighborhood Club, Evanston Historical Society, Community Golf Club, Garrett Biblical Institute, Girl Scouts, Boy Scouts, Evanston Branch Chicago Medical Society, W. C. T. U., School District 76, Northwestern University School of Music, the Current Events Class, Evanston Public Library Board.

The presiding officer, the rector of St. Luke's Church, a distinguished orator of the City, carried the program thru. A large precinct map of Evanston showed the territory to be covered in a house-to-house canvass. These precincts were “auctioned” off to the quickest bidder. With forty organizations to bid and only seven-teen precincts to be divided, it was necessary that two or three groups should combine forces.

The house-to-house canvass carried on by the organizations resulted in cash collections of about nine thousand dollars, and pledges for 1922 of over three thousand dollars. Plans are under way for the raising of the remainder of the 1922 quota in the fall.

The Board of Education realizing that the school stations directly benefit the work of the grades, unanimously voted to pay the salary of the station librarian.

The funds from the less affluent districts which are served by the stations were raised thru entertainments of various kinds, bunco parties and movies, under the direction of the Parent-teachers Associations, Neighborhood Clubs, etc. The Washington School, in the heart of the foreign district, has been the scene of weekly festivities for the benefit of the library. The Swedish group gave a party, the Polish Falcons a dance, the teachers a children's entertainment, and the Mother's Club stereopticon pictures of the work of the library as a whole. This district, which benefits especially from the services of the Book Auto during the summer, is making an extra contribution for the upkeep of the “library on wheels.” The

THE BOOK AUTO IN THE FOSTER SCHOOL DISTRICT

Ebenezer African Methodist Episcopal Church gave the collection box receipts one Sunday.

Many groups such as the Evanston Dental Association, The Drama, Music Study, French and Pierian clubs, the University Guild, and others made generous contributions as organizations.

The firms belonging to the Evanston Commercial Association sent out with their monthly statements a slip furnished by the association reading—

A CIVIC DUTY

YOUR LIBRARY IS IN NEED

The Evanston Public Library must have a certain income for the next two years to function properly.

\$10,000.00 a Year Is Needed

You and every member of your household should pledge support in this work. Be prepared to act when requested.

EVANSTON COMMERCIAL ASSOCIATION

Executive Committee for the Community.

These slips were also put into books issued from the Main Library and extension departments.

Without the unlimited support of the local paper, the campaign would have lost much of its publicity value. Altho only a small number of the articles were written by those connected with the library, the data had to emanate from that institution. Until the E. C. A. assumed the responsibility for the campaign, work was done by the *News-Index* staff, and after that by the publicity man employed especially for that purpose by the E. C. A.

During the two months from the first announcement of the financial straits of the library, to the completion of the house-to-house canvass, the *Evanston News-Index* gave a total of sixty-eight full columns of space.

This publicity consisted of front page feature stories, editorials and two full page and one half page advertisements. The editorials showed an unusually sympathetic and keen insight into the service which libraries perform in a community; especially noteworthy were the articles on the value of books in the outlying communities where the needs for social service and Americanization work are the greatest.

The front page feature stories stressed what the library has to offer the community, especially in the line of practical books:

"Workman finds at library way to build house."
"Books on the care of children, 'Well baby primer,' as popular as fiction at the Foster station."

"Rotarians secure information on disputed question by telephoning the library."

"Chickens, rabbits, squabs and gardens raised according to library books."

"Workman must have his tools, so must a community,—the library is one of those tools."

Human interest stories were most in demand by the reporters, such as letters from the children who would suffer from the closing of the school stations, lists of questions asked over the loan desk; personal help secured from the library books, inventions perfected, etc.

A point of interest to the business man was the fact that the cost of maintenance of the

library extension system is not as great as the amount of car fare which the patrons would expend to secure books from the Main library to say nothing of the time involved in making the trip. Another "selling" point was that forty per cent of the population of the city are registered card holders, more than twice as many persons as are enrolled in all of the public, private and parochial schools.

The spirit which was shown by the com-

munity thruout and since the campaign toward the library is a tribute to the Board of Directors and the librarians who thru years have built up the library system in the city.

Not only do people think "library first" more than ever when in need of assistance, but they think of the library when they have donations to make; over twelve hundred usable volumes having been given during the campaign.

Recent Motion Pictures Based On Fiction and Drama

A LIST OF IMPORTANT PHOTOPLAYS REVIEWED BY THE NATIONAL BOARD OF REVIEW

- BARS OF IRON.** Stoll. 6 reels. Stars: R. Miles and M. White.
English society romance; taken from Ethel M. Dell's novel.
- BLACK BEAUTY.** Vitagraph. 7 reels. Star: Jean Paige.
Romantic comedy drama; taken from novel by Anna Sewell.
- BLACK ROSES.** Robertson-Cole. 6 reels. Star: Sessue Hayakawa.
Melodrama of a gang; from story by E. Richard Scheyer.
- CITY OF SILENT MEN, THE.** Famous-Players Lasky. 6 reels. Star: Thomas Meighan.
Romance; from "The Quarry" by John M. Moroso.
- DECEPTION.** Famous-Players Lasky. 10 reels. All star.
Historical tragedy of Henry VIII and Anne Boleyn.
- DESPERATE YOUTH.** Universal. 5 reels. Star: Gladys Walton.
Romantic melodrama; from story by F. Hopkinson Smith, "A Kentucky Cinderella."
- EAST LYNNE.** Hodkinson. 7 reels. Star: Edward Earle and Mabel Ballin.
Romance and melodrama; taken from novel by Mrs. H. Wood.
- GOLEM, THE.** Famous-Players Lasky. 6 reels. All star.
Drama legend of Prague; based on Meyrink's novel.
- HEART OF MARYLAND.** Vitagraph. 7 reels. Star: Crane Wilbur.
Melodrama; from Belasco's play.
- HER LORD AND MASTER.** Vitagraph. 6 reels. Star: Alice Joyce.
Society comedy drama; from stage play by Martha Morton.
- HOUSE THAT JAZZ BUILT, THE.** Realart. 6 reels. Star: Wanda Hawley.
Domestic drama; from story "Sweetie Peach" by Sophie Kerr.
- IF WOMEN ONLY KNEW.** Robertson-Cole. 6 reels.
Society romance; based on Balzac's "Meditations on Marriage."
- JIM THE PENMAN.** First National. 7 reels. Star: Lionel Barrymore.
Forgery melodrama; from story by Sir Charles L. Young.
- LAMPLIGHTER, THE.** Fox. 6 reels. Star: Shirley Mason.
Drama; from story by Maria Susanna Cummins.
- MESSAGE FROM MARS, A.** Metro. 6 reels. Star: Bert Lytell.
Romantic drama; adapted from Richard Ganthoney's stage play.
- NOBODY'S KID.** Robertson-Cole. 5 reels. Star: Mae Marsh.
Orphan asylum romance; from novel "Mary Carey" by Kate Langley Boshier.
- OATH, THE.** First National. 8 reels. Stars: M. Cooper and A. Nilson.
Society drama of intrigue; taken from "Idols" by William J. Locke.
- OTHER WOMEN, THE.** Hodkinson. 6 reels. Star: Jane Novak and Helen Eddy.
Drama of dual personality; from novel by Nora Davis.
- OUTSIDE WOMAN, THE.** Realart. 5 reels. Star: Wanda Hawley.
Farical drama; adapted from play "All Night Long" by Philip Bartholomae.
- PARTNERS OF THE TIDE.** Hodkinson. 6 reels. Star: Jack Perrin.
Melodramatic romance of divers; from story by Joseph C. Lincoln.
- PASSION FLOWER, THE.** First National. 6 reels. Star: Norma Talmadge.
Spanish tragic drama; adapted for screen from play by Jacinto Benavente.
- PROXIES.** Famous-Players Lasky. 7 reels. Stars: Norman Kerry and Zena Keefe.
Drama—crook melodrama; from story by Frank R. Adams.
- SENTIMENTAL TOMMY.** Famous-Players Lasky. 8 reels. Stars: Gareth Hughes, Mabel Taliaferro, May McAvoy.
Scotch costume romance; from J. M. Barrie's story.
- SHELTERED DAUGHTERS.** Realart. 5 reels. Star: Justine Johnstone.
Melodrama; by George Bronson Howard.
- SKY PILOT, THE.** First National. 7 reels. Stars: J. Bowers and D. Butler.
Western drama; from novel by Ralph Connor.
- TALE OF TWO WORLDS, A.** Goldwyn. 6 reels. Stars: Glendon and Joy.
Chinatown melodrama and romance; from story by Gouverneur Morris.
- TRUST YOUR WIFE.** First National. 6 reels.
Marriage problem; based on stage play "Conscience" by H. S. Sheldon.
- UNCHARTED SEAS.** Metro. 6 reels. Star: Althea Lake.
Alaskan melodrama; from John Fleming Wilson's story.
- UNKNOWN WIFE, THE.** Universal. 5 reels. Star: Edith Roberts.
Romantic drama of faith; from story by Bennett Cohen.

Libraries and Museums

By JOHN COTTON DANA

Librarian, Public Library, and Director, Museum Association, Newark, N. J.

II. The Functions of a Museum

TO librarians, when speaking of museums, it should first be said that to be interested in museums after the modern manner is to be interested in visual instruction. Just what is meant by this phrase it is not easy to say. The methods, the tools and the results of teaching with the aid of objects and pictures are being studied as never before. The movie would have compelled such study if the modern museum idea had not. For the purposes of this discussion it is enough to say that the old type of museum was almost useless as an educational tool, education here being used in its popular meaning. This educational inutility of museums of the old type would still remain even were they greatly visited by both old and young, and they are not.

Hence the question which confronts one who considers museums is not how to make them more attractive—that can be done, as experiments have shown, by the skilful use of free ice cream and free music. The question is, how can they be made so useful, so helpful toward happiness, intelligence and general well-being, that all save those of quite the lowest mentality will be moved to use them.

It is impossible to bring to a museum in any community so many interested visitors as to make the aid it gives to those visitors in making them happier and more intelligent citizens, an adequate return for the cost of building, contents and maintenance. A study of its finances and of its report on its visitors of our largest and richest museum, located in our largest city, will be sufficient proof of the truth of that statement. A few students can and do visit museums each year for definite and useful ends. The relatively small attendance on them, however, is chiefly made up of casuals; and even if they gain from their visits reactions of extraordinary esthetic value or enthusiasms for popular science of extraordinary range and depth, those reactions are adherent to so small a part of the whole citizenship as to make them almost negligible; and they are entirely negligible if one attempts to set them over against the museum's cost as an adequate return therefor.

Space is here lacking for further argument against the old doctrine that a museum, like beauty, is its own excuse for being; and in favor of the new doctrine that all institutions

supported from the public purse, including museums, should show returns for their cost which are definite and in fair degree measurable. The conclusion is, briefly, that no museum can pay for its upkeep thru the good it does its visitors.

If library enthusiasts here interrupt to say that the facts and conclusion which have just been roughly outlined can be applied to libraries established for reference use only, this comment may be made in return: that the use of books in a reference library is in most cases far different from the use made of objects in a "reference museum," and that the development of printing in the last half century has given us conditions under which the old type of reference library is in much the same position as is the old type of museum; and that nearly all of the world's reference libraries would be far more useful than they now are did they lend freely or place in branches, or both, about seventy-five per cent of their books and journals.

The museum that is chiefly under view in these notes is the museum which frankly admits that its value to visitors is quite slight, being a value realized by few and decidedly minute to most of the few, and finds its excuse for being chiefly in four forms of activity, to wit: it lends its objects for use in school, studio, shop or home; it places its objects, often in moveable groups, in branch museums; it publishes things of use to its community, things based on the museum's objects and activities, yet not demanding of one who gets profit and pleasure from them, a visit to the museum itself; and it teaches many, not merely thru casual gazing at its objects, but with those objects as illustrations of spoken and written treatises.

It is now obvious that the libraries of a public library is in many respects well equipped to do the fundamental things in modern museum making; and that a public library is a good and proper place in which to lay the foundations of a museum. The librarian is friendly to students who come to his collection of books; he lends books freely; he puts books in branches, including in this term every group of books that goes out to a certain spot and there eagerly seeks for ways of usefulness; and he publishes useful things, so far as funds and imagination permit.

It is worth while to note here the fact that most of the movements toward museum beginnings that have been set up in libraries have had the ear-mark of the modern library and consequently of the modern museum. Objects and collections gathered in libraries have been selected, where that was possible, not with a mind set on cost, rarity and age; but on immediate value as a tool in teaching. And, again, the collections of pictures which libraries make and lend are in fact collections of museum objects. One very important museum consists of pictures only. Many museums have picture collections; but are in most cases far behind libraries in that they do not lend them.

A library, then, is a good place in which to lay a museum's foundations, or, to put it in better phrase, in which to begin a modern museum's pleasure-giving and helpful activities. In later papers it may prove possible to suggest definite methods, furniture and devices for modest museum beginnings.

The museums of the future, especially those in industrial cities and smaller towns, will not be each of a definite kind. That statement does not say and does not imply that collections of objects in many specific fields will not continue to be made, and, if wisely administered, will not be useful and even essential tools in the development of knowledge in the fields they severally represent.

The meaning of the statement, that the coming museum will be, in most communities, not of one specific kind but of all kinds, will perhaps be made fairly clear by what follows.

The new museum wishes to be useful to its community from the very first day of its existence. It finds in the public school system of its community demand for the most modest objects it can collect. It proceeds at once to make itself a helpful adjunct to that system, thus following that fundamental law of social economy which insists that existing organs be utilized to the utmost in the development of new ones. To fill the demands for objects useful in school rooms it must go into fields of art, science, industry and history. So doing it forms collections which make it at once, not a museum of a certain fixed type, but a group of museums of all types.

Looking about for other fields of usefulness it finds that in its community is a wish to see and to make use of industrial products, old and modern, local and foreign; a wish that is in most communities far stronger than that for seeing and enjoying paintings and sculptures. It begins, therefore, to collect examples of the city's own products, and forms thus an industrial and commercial museum such as England

is now developing thru some of its most important industrial and educational organizations.

And so it proceeds; gathering and making available for study such things as it finds its constituents can enjoy and can use and are eager thus to do.

The new museum, then, is not a museum of art, or science, or industry or history or of any other type or field; it is such a wide-ranging collection of material as careful observation and controlled experiment indicate are useful and pleasure-giving to the community which supports it.

These remarks have, it is hoped, cleared the ground for the statement that, just as a librarian selects for purchase for a library for the public the books that will be to that public most acceptable and most useful and most used; so the director of a museum of the new type collects for his community, not what convention and fashion say a museum should contain, but what a study of the tastes, industries and pastimes of the community suggests as best fitted to fill that community's wishes.

It follows, once more, that a good librarian is eminently well-fitted to be a museum founder.

Proposed Catalog of Biblical Manuscripts

THE following letter which has been addressed to a number of librarians by the Society of Biblical Literature and Exegesis, is here given in the hope that librarians not personally addressed will offer the Committee any help in their power.

"The undersigned have been appointed by the Society of Biblical Literature and Exegesis a Committee to inquire into the feasibility of compiling a catalog of Biblical manuscripts in this country. The first need is to find out where such manuscripts are located. It will greatly facilitate the work of the Committee if you will answer the following questions:

"1. What manuscripts of the Old or the New Testament, either texts or versions, have you in your collection?

"2. If any are in your collection have they been examined as to date and present condition?

"3. If of the New Testament are they among those collated by Gregory or von Soden?

"4. Are they already adequately catalogued in your own list, and if so would you furnish a description in case we are able to carry out the plan of the Society?

"5. Do you know of such manuscripts in private hands, and can you put us in communication with the owners?

"Please address your reply to the Library of Union Theological Seminary, Broadway at 120th Street. . . ."

"The Four Treasuries of Literature"

By KATHARINE H. WEAD, Bureau of Plants, Washington, D. C.

LETTERS and circulars recently received in this country tell of a great literary enterprise which the Chinese government is fostering. In Peking there are several copies of a manuscript collection of about thirty-five hundred works known as the *Ssu k'u ch'üan shu* 四庫全書 or "The Four Treasuries of Literature." This includes the most important works of Chinese literature from the most ancient times to the second half of the eighteenth century when it was compiled. In order to preserve these valuable writings it is proposed to reprint them while a fairly complete set is still in existence; war, fire and time have already played havoc with the original manuscript copies of it.

The history of this collection is little known to Western people but it is of great interest, not merely because it shows the reverence of the Chinese for literature but because it is unique in the literary world.

Ch'ien Lung who reigned from 1736-1795 was one of the most enlightened and scholarly rulers of China and one of his chief interests was the encouragement of literature and art. Printing had been invented in China many centuries before this, but many books were out of print and difficult to obtain, others had been lost and others were only in manuscript form. Many of these were of great literary value and Ch'ien Lung realized that if copies were not soon made, many other works would in all probability be lost. So in 1772 he issued a decree in which he ordered the officials of each province to collect from every possible source all writings of more than ephemeral or trivial value. From these were to be selected the most important ones which were to be printed in a great uniform edition.

The response to this was overwhelming for within a few months thousands of volumes were sent in and whole libraries were offered to the government. To the greatest donors were later given rewards and high honors. An imperial Editorial Commission was appointed to take charge of the work with an eminent scholar named Chu Yün as editor-in-chief.

In reading about Chinese literature the uninitiated must be on guard against the use of the word "book." In English it is used very loosely to mean either a physical volume or an entire work; but it may also be used for a part of a work, as a book in the Bible. In Chinese bibliography the word which is so translated

is *chüan* and is more closely allied to what we should call a chapter or part. The *chüan* may or may not be bound in separate volumes. Chinese volumes are usually of a hundred to two hundred pages, of convenient size, several of these—often several hundred—forming the complete work and the work itself is made up of any number of *chüan*. It has been said that Chi Yün himself read several hundred thousand books and reported on them to the Emperor. This would be a superhuman task, while the reading of even as many chapters would be a large undertaking except for a man of his unusual attainments. The fact remains, however, that some ten thousand works were examined by him and his assistants and summaries and reviews of all of them were made in accordance with an Imperial decree—3,511 of them were considered the cream of Chinese literature and worthy to be included in the imperial collections. These selected works were called the *Ssu k'u ch'üan*, or literally, the "Four Treasuries of Literature."

In addition to these works which were found in private libraries, 385 works were taken from the *Yung Loh Ta Tien*. This was a great manuscript compendium of knowledge, or encyclopedia, in some 24,000 volumes, made three and a half centuries earlier, which included the whole or parts of all writings which were considered of importance at that time. There was only one partially complete copy in existence at the time of Ch'ien Lung. The fear that this would disappear was justified, for many of the volumes which were stored at Han-Lin College were destroyed when the library was burned to the ground in 1900. Two of the volumes comprising the original work are now in the Library of Congress, where they are among the greatest treasures of that Library.

As the work progressed a catalog called the *Ssu k'u ch'üan shu tsung mu* was made. This included critical reviews of all the works which had been examined. The titles were arranged in the order of a recognized classification which had in the main been devised some centuries earlier during the T'ang dynasty (618-905 A.D.). This classification has four main divisions, known as Classics, History, Philosophy and Belles Lettres, which are divided into forty-four classes with many subclasses. The Classics include certain ancient works on history, poetry, ritual and music; some of Confucius' writings, commentaries and also dictionaries. Under History are works on biography, geography, administration

and jurisprudence, and bibliography as well as history in its narrower sense. Philosophy covers every subject which a Westerner would include under science, as well as fine arts, divination, religion and miscellaneous essays. Belles Lettres include individual and collective works in prose and poetry. The works are entered in the catalog by title, followed by author and a note as to the owner of the original copy. Then follow several pages of critical summary and review. The divisions and classes are indicated on the margin. The works comprising the *Ssu k'u ch'üan shu* (the 3,511 selected works) are entered first in each class or subclass, and are followed by the other works which had been examined. To this last group were given the name *Ts'un mu* or literally, remaining list. The numbers given here for the two parts of the catalog are taken from Mayers' article (see Bibliography), but other writers give figures which differ from these in some cases by several hundred. The catalog therefore contains reviews of approximately ten thousand separate works, forming a résumé of the whole field of Chinese literature from the earliest times up to the middle of the eighteenth century, A.D. Anyone who would undertake the translation of this catalog would render a great service to the world of literature. There have been various reprints of the catalog and it is possible to buy a small edition at a very moderate price. The finest edition published by the Imperial presses at Peking by order of Ch'ien Lung is in large type and occupies about four feet of shelf space.

There is also an abridgement of the catalog—*Ssu k'u ch'üan shu chien ming mu lu*—which includes only reviews of the *Ssu k'u ch'üan shu* and not of the works in the *Ts'un mu*. And there is also a table of contents—*Ssu k'u ch'üan shu mu liao*—in twelve thin volumes, which gives the title and author only of all the works listed in the catalog. The difficulty in using either the catalog or the table of contents is that unless the reader knows under what class a book should be found it is impossible to find the title! Many years ago the late Professor Eitel, a sinologue of high standing, made a title list arranged by Cantonese dialect which has been lately revised. In order to make this of use to those who do not know Cantonese, keys have been made to it in which only the first character (comparable to the first word of an English title) of the title has been listed, and these first characters are arranged according to the two or three systems which are in common use among Chinese students, that is, arranged by the number of brush strokes required in writing a character, or by the radical which is the basis of the character. This revised index and the keys to

it are in constant use in the Chinese collection of the Library of Congress. By means of these keys any title in the *Ssu k'u ch'üan shu* or the *Ts'un mu* can easily be found even by persons who know very little Chinese. A similar list of authors based on another list of Professor Eitel's has also been made, which includes all writers mentioned in the reviews, giving practically a concordance to Chinese literary personages.

The question of copying these many hundreds of works included in the *Ssu k'u ch'üan shu* was seriously considered by Ch'ien Lung. Wood-blocks and moveable copper type were both in use at this time for printing, but after thoro study of the best processes it was recommended that a set of moveable wooden type be engraved. This was done and a few of the works were printed. But this proved to be very expensive and the Emperor decreed that a manuscript copy should be made. Later he ordered that six more manuscripts be made, making seven in all. Four of these were to be placed in the Imperial libraries in Peking, Yüan-Ming Yüan, Jehol and Mukden; the other three were to be given to great private libraries. The magnitude of this work will be appreciated when it is stated that it was necessary to copy by hand nearly fifty million pages seven times without a mistake and that fifteen hundred copyists were employed for nine years. The whole undertaking, including the catalog, was finished in the ten years from 1773-1782. While the catalog has been reprinted several times, the *Ssu k'u ch'üan shu* as a whole has never been printed.

Unfortunately, of the seven manuscripts only three complete sets are still in existence and they are all now in Peking, one in the Bureau of Education Library, one in the President's Palace and one in the National Library. The Chinese Government is therefore looking for a way of reproducing the "Four Treasuries" before any more of the works are lost. This is referred to in some articles as an encyclopedia, but it should be carefully distinguished from the vast work generally known as the "Chinese encyclopedia"—the *T'u shu chi ch'êng*. It is really not an encyclopedia at all any more than the "Five-foot shelf" of the modern American library is one; it is merely an uniformly written and bound collection of writings on many subjects, occupying about a fifth of a mile of shelving! It will take three years to print one hundred sets and each set will consist of 5,540,000 pages and will cost between \$10,000 and \$20,000. The Commercial Press, the largest publishing house in China, does not feel able to undertake this work and the Chinese government hopes that enough copies will be subscribed for in Europe, America and Asia to make it possible to get

some publishing house to undertake the gigantic task.

Wanted—Catalogers

By JULIA PETTEE

Head Cataloger, Union Theological Seminary, New York.

BEING in a theological seminary it seems natural for me to begin with a text. My text is the 18th verse of the 29th chapter of Proverbs: "Where there is no vision the people perish."

There is a great hue and cry now on for catalogers. Even salaries abnormal to other functions in our library economy fail to discover these highly essential members of the library organism in numbers necessary to the health of the body bibliographic, and we are asking why. In my opinion this is largely due to the fact that the popular idea of cataloging is both unworthy and false.

Not long ago I was in conversation with a young woman who holds a position where she is responsible for the correct form of certain classes of headings used in the catalog. I casually referred to this work as cataloging. She resented it hotly. "No," she said, "I am not a cataloger, I do reference work." I asked her what she called cataloging. "Why, copying title-pages, collation and all that sort of typewriter business." This answer is illuminating as expressing the popular attitude towards cataloging held by even catalogers themselves. It has been stripped of every vestige of dignity (if it ever had it) and is looked upon by the ambitious young person as the mere drudgery of copying title-pages and counting leaves, with correct spacing, dots, dashes, and capitals being the chief concern—little fussy things truly beneath the attention of one of ability. The library schools are making a vigorous campaign against this, I know. Teachers in the two schools I know best, say that this attitude is not

true of their students. I wish it were not, but I happen to know of eruptions (in private) from some of these same students and I can state with certain knowledge that in the year 1921, at least some students, devoted to their profession in other ways, are ready "to face starvation before they will take a cataloging position."

It is a recurrent experience with many of us to take this same kind of young person, who, for some reason or other has consented to endure a brief season of cataloging as a stepping stone to something more desirable, and to have her confess later "that she had no idea that cataloging could be interesting," and after this surprise, perhaps to decide, that, after all it is what she wants most to do. The library schools have yet to produce a normal graduate who can not develop a real enthusiasm for some line of work in a cataloging department. The work is interesting and under the right conditions furnishes the large satisfactions inherent in all scholarly constructive work. But it is not what we, who know, think about cataloging, but what the young people who have the choice before them, think about it, that will fill the demand. Where there is no vision the people perish, and this is as true of catalogers as of nations.

Cataloging has been both underestimated and overestimated. I would say frankly that the part of the catalog in a small open shelf collection is not important. The accession book, almost any kind of an author and inventory list will serve to find and keep track of the books. The function of any library, large or small, is to make the connection between the books on the shelves and the community it serves, and it is

only as the library grows in size that the intermediary of the catalog becomes important. But as the volumes roll into the tens of thousands the catalog becomes so all-important that the library cannot function without it.

It is only in terms of the large library that we can adequately define cataloging. Where publications of learned societies come in by hundreds, where for ever changing serials swamp the waiting shelves, where authors of all ages and nations flood the staff with their output—with queer outlandish names, medieval and oriental, on recondite subjects of scholarship, where whole phalanxes of doctors of philosophy pour forth their wisdom on every topic under the shining heaven, where all these broad rivers of scholarship flow in a steady stream into the cataloging department, there to be evaluated, sifted, sorted, tabbed and arranged in orderly fashion, so that as the generations of the staff come and go, still the contents of the library will be accurately known, and the newcomer can take up the work without interruption and loss; this is cataloging.

This definition of cataloging is the baldest truism. The trouble is, like Christianity, it is largely accepted in the abstract. When it comes to believing in it enough to put it into practice—that is a different matter. The library schools will all tell you, "Why yes, this is our conception of cataloging," but the student believes in this heavenly vision so little that she does not aspire to achieve it for herself.

The remedy for this state of things, it seems to me, lies in putting over in practice what is accepted without dissent in theory. It lies both with the library schools and with the libraries to put reality into this larger conception of cataloging and to make it popular.

My suggestions for the library schools are:

In the first place define cataloging worthily in its largest aspects as historical research. That is exactly what it is in every large library where a careful and scholarly catalog is being made. Speak of it as bibliographical work and make the connection close. Over the door which the catalogers at Union enter every morning, in big gilt letters, are the words: Bibliographical Room. Cataloguers are bibliographers. Certainly the compiling of printed lists, which is usually called bibliographical work is no more difficult or important than making the card catalog. Then granted a really worthy conception of cataloging arrange the courses accordingly.

Next, the school should never for one moment confuse this broad conception of cataloging with the details of form. Give the student the big idea and never mind the form in which the responses are given. Set them the

real problems of cataloging, running down the identity of authors, making history cards for societies which run thru various changes of name, differentiating the scope of slightly varying subject headings, and judge the work done on these problems by the thoroughness with which the research is made and the way in which they are carefully thought thru. Catalogers sent out by the schools fall down here. They jump at conclusions without evidence. It takes a fine sense of historical accuracy to make a good cataloger. For students who wish to go beyond elementary cataloging a course in historical method would be most desirable. Not one cataloger in ten knows how to select the data she is seeking from a mass of facts and put it into the compact, connected form, in clear English, suited to a "history card." I tell our staff that cataloging is nothing more or less than the search for significant facts plus the ability to express the result of that search in such unmistakable English, that, as we pass on, each person having occasion to read the card will correctly and exactly understand our statement. It is telling the bibliographical truth with exactitude.

Given a large definition of cataloging, the minor but essential virtues will follow in the course of things as the light follows the sun. Of course the conscientious verification of facts and the adequate expression of the truths we discover, involves painstaking accuracy, order, and good judgment. It even involves typewriting in the ordinary library routine.

Moreover, the adequate expression of bibliographical facts involves something more than these virtues. It involves technique. When the same problem occurs over and over again a uniform method of dealing with it saves time. Hence rules come to be. Presenting the problems first, however, gives the rules their point.

The teaching I had in library rules very much reminds me of a little girl whom I once discovered in a back country school. She invited me to hear her say her arithmetic lesson and exhibited with pride her sheet of sums. "This is the example," she began, "if John has ten apples and Mary has one half as many how many does Mary have? The answer is five. For why? 'Cause the rule says multiply the numerator and divide the denominator." Thus she went down the whole sheet, after each answer asking the question "For why," and adding the formula, "'Cause the rule says multiply the numerator and divide the denominator," the rule in each case being the all sufficing authority. I gave her other sums but she was much confused and invariably answered. "We don't do that kind at our school. You have got to have a rule." In teaching cataloging by rule there is

danger lurking when the student gets outside "our school," for, numerous as the rules seem to be, the examples far outnumber them.

The back-end-firstness in which cataloging has been taught accounts in some measure for the students' disdain of it. They are often introduced to it thru the difficult gateway of the typewriter. Theoretically, this is demanded at entrance, but inexpertness in typing often adds to the miseries of beginning cataloging. But far more disastrous is the serious importance, which is attached to errors of form. Cards are handed back for these irregularities until the student gets the idea thoroly fixed that form is the whole hated, petty substance of cataloging. Fixed forms, like fixed rules, expedite the work when the same type of information is given in endless repetition, and the erratic person who can not fall in line and conform is a nuisance in any department of the library. But perfection in form is *not* cataloging and pains should be taken to root out this source of prejudice against it. Drill on the typewriter and drill in form should, most emphatically, be made entirely independent of the real work of cataloging. Cataloging should always be given the character of research work. It should go hand in hand with reference work, the difference between the two being that the cataloger puts information which is repeatedly called for into permanent literary form.

In some libraries where intelligent untrained help is employed some progressive instruction on the plan I have indicated is carried out. Typists are carefully trained in form to make the various kinds of cards from a single author card. But they never think of this as cataloging. It is not. It lies in the range of the mechanical preparation of the cards for the catalog. When the typists graduate to cataloging as they frequently do they enter upon a very different field of work. Authors must be searched, corporate headings verified, pseudonyms run down, and altho this is all quite elementary cataloging, it is real research work and the door is opened into the wide field of bibliography.

But much as the schools may be at fault, the situation ultimately rests with the libraries. Of what use is it for the schools to foster a scholarly ideal of cataloging and train bibliographers if the libraries demand only clerks and copyists?

There is much to be done in many libraries before the position of cataloger is made attractive. In some of the largest libraries the "efficiency" and "output" spirit has created something approaching a military machine or a manufacturing plant. Now proper organization is

very essential and both "output" and "efficiency" must be watched, but these perfectly good and necessary things, if allowed to be an end in themselves can crush out all initiative and create an atmosphere and spirit that is fatal to all creative pleasure in one's work.

In some large libraries over-organization kills the constructive pleasure that should be inherent in the work. When work is reduced to "processes" and catalogers are kept at single processes day after day, cataloging becomes mere factory work with all the evils inherent in the factory system. The classifier classifies, the subject header heads, another person "establishes" corporate headings, the so-called "cataloger" copies the title-pages, and so on all down the line. A better type of organization is found, it seems to me, in libraries which divide the work by subject groups, and around each group build up a small corps of workers who are responsible for all the processes. This group arrangement makes good team work possible.

It goes without saying that catalogers should be free from the mechanical work of typing, filing and numerous things that untrained workers can learn quickly to do well, and do much more cheaply. Care should be taken not to burden them with non-essential details imposed by overhead authority. Responsibility for certain lines of work in which individual catalogers are interested should be freely given. The head cataloger who keeps all the responsibility and all the credit finds that she has also to herself all the interest in the work. If she is wise, she is keen to discover where responsibility can be placed and quick to put it there. And if she is successful, she will pass her own interest all down the staff. If she can not do this, something is wrong, not with cataloging, but with her ideals of it, or with what matters even more, her own personal relationships with her staff. Given a chief with a true interest in her work and the human sympathy that will consider the well-being of the staff as important as the catalog, young people who have some interest in intellectual things, will find the cataloging department of a large library a congenial place.

Both the libraries and the library schools have much before them. Perhaps groups of young people in library work explode in private and say, "I hate children's work," "I hate reference work," but as far as I can find out, this corporate venom is reserved for cataloging. And so I come back to my text. Salaries will help and are helping to draw recruits, but, after all, unless the work makes a more potent appeal to the average young person, catalogers will continue to be scarce. Where there is no vision the people perish.

The Youngstown Plan

ARTICLES on "That Abyss of Ignorance," the "Mind of the High School Freshman," and "What College Students *Should*, But Do Not Know," have come of late years to be legion.

Yet, in spite of this generally prevalent condition, quite frequently one hears of communities where really systematic campaigns are being carried on to remove or at least alleviate the cause of this criticism.

In Youngstown, Ohio, for example, where the cause of the unpreparedness of students was generally conceded to have first taken root in the grade schools, members of the teaching and library staff arrived at a happy solution. They decided to allow credit for the home reading of the grade school pupils.

The details of the plan of carrying forward the work were described in the *LIBRARY JOURNAL* for September, 1920, and in the *Elementary School Journal* for January 1919. In order to get a more comprehensive idea of the project we sent for the graded lists, with their accompanying book-notes. From these lists the children of Youngstown were allowed to make their selection of books.

After considering the notes, I should say that the number of children who would find it a hardship to read the required 10 or 15 titles a year, from these lists, with or without credit, would be gratifyingly small.

The titles for inclusion were passed upon by a committee of teachers, after careful examination of standard lists of a similar nature. The book-notes were contributed by members of the library staff. The notes, compiled for the benefit and information of the teachers, are especially deserving of mention. They reflect to an unusual degree a nice evaluation of titles, extensive reading and a clear insight of the ultimate end to be achieved by each title.

This plan has been in operation for about three years, receiving the whole-hearted endorsement of the community, the library and the schools, and if the project can be carried on in Youngstown, without interfering with the school curriculum, why not elsewhere?

The Youngstown plan is not a new one: giving credit and time for carrying on the work as a legitimate part of the school curriculum is the only phase of the plan that has not been in operation in the schools for decades.

All that remains to be achieved elsewhere is, then:

1. The adoption of a uniform standard in the selection of titles for inclusion.
2. The general recognition of the value of such a list of books for home reading.

3. The expansion of the grade school curriculum to allow credit for titles, selected from such lists.

Is not the subject deserving of wider consideration?

Is it not possible for both libraries and schools generally to arrive at some satisfactory list of titles with which any child who has completed the eighth grade may legitimately be expected to be familiar? Having decided on the list, a suitable method of introducing the books to the child ought to be a comparatively simple matter.

Could not the Youngstown plan and lists be submitted to committees of both the N. E. A. and A. L. A., as a working basis? Copies of the resultant lists could then be submitted to the Horace Mann school, in New York, the Francis Parker school, in Chicago, and the Cora L. Williams Institute, in Berkeley, California, during the coming year or two. These schools are generally recognized as standing for the best in the field of education. The benefit of their widely distributed experience would be invaluable in the working out of some such plan.

This is, of course, not the only solution of the problem. I cite it merely as one means of achieving a desirable end.

Might not a general solution come thru the focusing of attention on a problem that has now come to be an universal one?

Recent Reference Books*

Rushmore, Elsie M., ed. *Social Worker Guide to the Serial Publications of Representative Social Agencies; with an introduction by Frederick W. Jenkins, librarian of the Russell Sage Foundation Library.* N. Y., Russell Sage Foundation, 1921. 174 p. 8°.

A checklist to aid social workers who use the Russell Sage Foundation Library, to supply students at a distance with a source guide, and to promote visits to and studies of social institutions. Omits the publications of institutions and organizations which do not appear regularly. Some technical periodicals are included. The condition of the files in the Russell Sage Foundation is indicated. An index by subjects supplements the main arrangement which is alphabetical by title or in case of institutions, by place. Lists 4,000 institutions or organizations.

The *Encyclopedia and Dictionary of Education.* Edited by Professor Foster Watson. London., Sir Isaac Pitman & Sons. To be complete in 31 parts. Parts 1-4 received.

A British reference work on education. While foreign contributors have assisted in the compilation and some foreign references are included, the work is chiefly useful for facts concerning education in the United Kingdom. Articles, in general, are short and suited for secondary schools rather than for universities. Only part of the articles are signed and many of the bibliographical references seem out-of-date. Prospectus announces that when complete the encyclopedia will consist of four volumes of 2,000 pages with 2,250 separate articles.

Cotton, C. W. E. *Handbook of Commercial Information for India.* Calcutta, Superintendent Government Printing, India. 1919. 360 p. 8°. map. chart.

Aims to give readers outside of India a bird's-eye view of the foreign trade of the country. Intended to supplement Sir George Watt's *Dictionary of the economic products of India.* Import trade is of secondary importance. Areas of export products are specified, ports used are designated, together with the method of marketing and the unit of sale and shipment. Appendices

contain tonnage schedules in force at the five principal ports and a glossary of vernacular terms. Commercial organizations are given considerable attention. Indexed.

Holmes, Arthur. *The Nomenclature of Petrology with References to Selected Literature.*

London, Thomas Murby. 1920. 284 p. 12°.

A dictionary of rock names bringing up-to-date the Loewinson-Lessing *Lexique Petrographique* which appeared twenty years ago. Excludes (a) modifications of existing terms (b) most compound terms built up from mineral qualifiers (c) most obsolete terms. Includes list of books which define petrographic terms, appendices of French petrographic terms, German petrographic terms, Greek words and prefixes, Latin words and prefixes and classification tables.

Little, Arthur D., Inc. *Reading List on Paper-making Materials; compiled by Clarence J. West, Information Department, Arthur D. Little, Inc., Cambridge, Mass.* 1921. 170 p. 8°. (Bibliographic series No. 6.)

Reprinted from the *Paper Trade Journal* 1920-21. Originally published as Contribution No. 23 of the Committee on Bibliography, Technical Association of the Pulp and Paper Industry. A carefully prepared bibliography arranged by subject and consisting for the most part of references to articles in some 130 American and foreign chemical and paper trade journals. Analyticals from books are given also, these being listed under the author in the dictionary arrangement.

Plumon's *Dictionaries of Technical Terms.* Paris and Liège, Librairie Polytechnique Ch. Beranger, editeur; London, Selwyn and Blount, Limited. 1919.

Dictionaries which have already appeared include: *The factory*, 256p; *Reinforced concrete* 238p; *Shipping and transport*, 767p. Those announced include 28 titles on practically every phase of technical construction. Most of the volumes, it is announced, are in English, French, German, Spanish, Italian and Dutch. Those which have appeared are French-English, English-French and in the case of the *Reinforced Concrete* volume in French-English-Italian. Terms are arranged under subject with an index of words and some tables and bibliographies illustrated.

Firkins, Ina Ten Eyck. *Henrik Ibsen: a bibliography of criticism and biography with an*

*From Carl L. Cannon's "Interesting Recent Additions" prepared for the *Bulletin of the New York Public Library.* Continues the list in the April 15th L. J.

index to characters. New York, The H. W. Wilson Company; Lond., Grafton & Co. 1921. 80 p. 12°. (Practical bibliographies.)

For general use rather than for the scholar. Not a complete list of Ibsen's writings. Includes selected list of critical and biographical material relating to Ibsen. Arranged in three lists: an author index, a subject index, and an index to characters. Alphabetical list of all characters in the plays and title of play in which they appear are given.

Weekley, Ernest. An Etymological Dictionary of Modern English. London, John Murray, 1921. 1659 p. 8°.

Intended to meet the need of the etymologist who has an interest in words and curiosity as to their origins and earlier senses without wishing to go back to pre-historic roots or conjectural word-forms. Includes the foreign elements in the language. "The vocabulary dealt with is roughly speaking that of the 'Concise Oxford Dictionary' . . . and Cassell's 'New English Dictionary.'" Many slang words and archaisms are included. Foreign words will be found if they are likely to occur in reading and in educated conversation, as will many proper names. "For the small nucleus of Aryan words the parallel forms are given from the other languages, Teutonic and Romance, together with some indication of the word in Celtic and Slavonic, Persian and Sanskrit." Approximate date of appearance in the language of some foreign words is given. Quotations used in some cases. Inclines to the semantic rather than the phonetic school. Contains a bibliography of modern etymological dictionaries.

Who's Who in China; containing the pictures and biographies of some of China's political, financial, business and professional leaders; 2d edition. Shanghai, China, *Millard's Review* [1920]. 314+IV p. 8°.

"Material in this book has been reproduced practically without change from the pages of *Millard's Review* during the past three years." Lists about 150 names. Paper and cuts of rather poor quality. Indexed.

Dictionnaire Suisse des Contemporains; herausgegeben von Hermann Aellen. . . Dr. Wilhelm Josef Meyer. . . Edgar Marraud und Dr. Hugo Walser. Bern, Verlag des Schweizerischen Zeitgenossen-Lexikons, 1921. Erste Lieferung A.-F. To be completed in two volumes.

Condensed biographical facts about eminent contemporary Swiss. Similar to *Who's Who*. Compiler states that most of his material was collected prior to 1915 and a supplementary volume is anticipated to bring the work up-to-date. Some biographies are given in German and some in the French language.

Scarone, Arturo. Uruguayos Contemporáneas; obra de consulta biográfica; diccionario de datos referentes a compatriotas de figuración en las letras, artes, ciencias, parlamento, magisterio, milicias, etc., etc., y de algunos extranjeros desde largo tiempos incorporados y descollantes en nuestra vida publicado; primera edición, con un apéndice con datos complementarios. Montevideo, Imprenta y Casa editorial "Renacimiento," 1918. 676 p. 12°.

An illustrated dictionary of eminent contemporary

Uruguayans. The work, while of uneven merit, is useful because little reference material on this subject exists. The facts supplied have not been given in a uniform manner. Dates of birth are often omitted and only the briefest details given. Other biographies in the book are fairly complete. A great many names and portraits are included. There is an index of portraits. A second edition is announced as in preparation.

West African Directory and Year Book, 1920-21; editors, Dusé Mohamed Ali; W. F. Hutchison. London, *Africa and Oriental Review*, [1921]. 253 p. 12°.

The first edition of what is planned as an annual publication giving information particularly for traders regarding the West African States of Liberia, The Gambia, Sierra Leone, Gold Coast and Nigeria. The work shows some of the defects usually found in first issues of this kind. Much information of general interest, such as government departments, educational establishments, history, banking and currency, population and ethnology, missions, tribes and chiefs, and a few biographies of eminent citizens is included as well as detailed statistics concerning industry and trade.

Duplicate Questionnaires

DURING twenty-eight years as a college librarian I have annually filled out several questionnaires. If I had them all preserved in a series they would form an interesting and even important contribution to the history of the library; but very few were sent in duplicate, in many of them the copying of the questions would have been burdensome, and I simply filled out the blanks and returned them. So my work, so far as my own library is concerned, has gone practically for naught. But the future is more important than the past, and the mistake can be rectified for the future if our questioners will send their inquiries in duplicate. May I ask the LIBRARY JOURNAL to second my efforts to urge this duplication of questionnaires? I feel so strongly on the subject that I am minded to have a form of reply printed to send to single-blank questioners stating that I will fill out and return the questionnaire when I receive a duplicate for my own records. To the A. L. A. Committee on Library Administration, as to the few others who have already adopted the practice for which I am pleading, I gladly give credit for showing what we all ought to have done and insisted on from the beginning.

H. L. KOOPMAN, Librarian.

Brown University Library, Providence, R. I.

The annual dinner of the Drexel Institute Library School Alumnae Association, held in connection with the meeting of the Pennsylvania Library Club and the New Jersey Library Association at Atlantic City, took place on April 30th. Together with guests there were twenty-six persons present.

The Henry E. Legler Regional Branch of the Chicago Public Library

THE completion and opening of the first regional branch of the Chicago Public Library, fitly named for Henry E. Legler who proposed the regional system, presents the occasion for a brief explanation of this plan for the information of such of our colleagues as may be interested.

The theory of the regional branch had its origin in the exigencies of the Chicago library situation and is probably not applicable elsewhere in anything like the same degree. Chicago has never enjoyed the favor of large donors whose systematic benefactions have provided the means for adequate branch developments and comprehensive building programs in other cities. Such extension as has been possible was accomplished by the utilization of free space in parks and schools, usually much too small and always poorly adapted to library service. These were supplemented by rented stores whose one advantage of location is most often counterbalanced by the lack of all other facilities for the accommodation of large numbers of persons, comprising both children and adults. Most of the small branches are thus little more than circulation centers in which the harassed librarians are primarily concerned with handling large and clamorous crowds in congested quarters. Reference work, facilities for study, and attention to individual needs are difficult under such conditions, and such conditions prevail in all but four or five of the forty-five branches in Chicago.

Since the only prospect of securing a building fund seems to lie in the slow accumulation

of possible unexpended balances from the annual revenue, it follows that the chances of replacing these meagre and feeble agencies with more effective installations are exceedingly remote. In prosperous times it was hoped that one branch might be built every two or three years. In ten years, therefore, Chicago might perhaps look forward to owning five properly planned branch library buildings. In these circumstances it was wisely resolved to place one large and well equipped branch in each of five main divisions, to become the center or nucleus of library service, and thus to re-enforce the meagre resources of the present little branches with ample collections near enough at hand to be quickly sent for, or to which patrons could be referred. Other library activities, impossible in the one-room installations, such as seminar work with schools and colleges, clubs, reading circles, work with foreigners, the blind, and other special groups, all conducted on a large and complete scale, are to be centered in these Regional Branches. Stack capacity will be large; that of the Henry E. Legler Branch is more than 60,000 volumes. Spacious work-rooms are provided to house such activities as school deposit and traveling library work, and ample space for groups of students or other public assemblages is planned for, the auditoriums are not included. In this manner it is contemplated to centralize in one of each of five complete and properly equipped regional branches all such intensive and extensive library work covering an entire district as more fortunate cities are enabled to do effectively and

independently in all of their branches alike. The Chicago plan does not make for economy in administration and will probably not be widely copied. It is more or less an experiment, born of our necessities and expressing our desire to make a beginning, at least, upon the great tasks that lie ready to be undertaken all about us.

For the present an unfortunate contraction of revenues has prevented the full development of these plans in the Henry E. Legler Branch, opened to the public on Chicago Day, October 9th, 1920. Functioning simply as a neighborhood library, this beautiful branch has meanwhile justified its location and equipment by showing a daily use greater than that of any other branch in Chicago and indicating an annual circulation of well over three hundred thousand volumes. A brief description, together with photographs of the new building, the largest and finest library branch building in the city, and one of the largest and handsomest in the country, follows:

The new branch occupies a site on Crawford Avenue, comprising the block between Wilcox Avenue and West Monroe Street, exactly five miles west of the central library. In point of accessibility this location is unusually favorable, being reached by main-traveled roads, trolley lines and boulevards from all directions. Surrounding it is a populous residence district with thriving retail streets and, just beyond, large foreign sections. Numerous schools, public, private and parochial, and many professional institutions, especially medical and theological, are found within a radius of two miles. Opportunities for library service of great variety and extent are therefore not wanting.

The building is in English style of the Georgian period, built of tapestry brick with stone trimming, and measures one hundred and eighty-five feet in length by seventy-six feet in depth, the façade rising to a height of forty feet. The façade is exceedingly handsome and dignified and the interior, while simple, is attractive in design and is proving practical and convenient in arrangement. The note of hospitality, consciously striven for in the plan, has been successfully achieved by the introduction of ample windows and spacious doorways. Daylight and an impression of freedom and absence of barriers and restraints greet the visitor on every hand. Two principal reading rooms, sixty-five by thirty-five feet, occupy the wings on the main floor, the central portion or rotunda containing a large charging desk and behind the latter a two-story Snead book stack. Small work rooms and offices flank the stack on either side. Beneath is a spacious basement in the

south end of which is a cheerful story hour room, directly below the children's reading room and connected with it by a special staircase. A separate entrance from the side street leads to this story hour room and upward to the children's room. The remainder of the basement is fitted with deep steel bins capable ultimately of holding 200,000 volumes, and here the entire school collection is housed during the vacation months, to be revised, repaired and redistributed. The transfer of all the school deposits to the new building has not only relieved the congestion in the main library, but has, thru the provision of better quarters and equipment, served to facilitate and expedite this work to a very marked degree. A garage for two auto trucks built into the southeast corner of the building, and an automatic elevator, provide for easy and rapid transporting and shipping of books in large or small quantities. The second floor contains, besides two large rooms corresponding to the reading rooms below, a staff rest room and a commodious work room. The building was erected under a general contract at a cost of \$185,000. Building operations were begun in March, 1919, and completed last October. Considering industrial conditions and costs during this period, the amount both of money and time required for the construction of the Henry E. Legler Branch may be regarded as reasonable and satisfactory. Needless to add, the great West Side community which it serves is highly pleased with its new branch and its librarian, Miss Pearl I. Field.

CARL B. RODEN, *Librarian.*

An Odd Source of Revenue for Libraries

To the Editor of the LIBRARY JOURNAL:

An odd source of revenue for the support of a public library is mentioned in the following remarks from the recent publication, "The Cape of Good Hope, Being the Official Handbook of the City of Capetown," p. 103:

"The South African Public Library (Cape Town) was established by a proclamation of the 20th March, 1818, as a Government library, which was to be supported by funds derived from a tax upon every cask of wine passing through the market of Capetown.

"The wine trade was at that date the principal source of wealth to the inhabitants, and the staple export of the Colony.

"In 1828 the Wine Tax was repealed, and to support the library a circulating portion was established, for the privileges of which subscriptions had to be paid."

J. B. CHILDS,

University of Illinois Library.

Standardization of Magazine Bindings*

IN the fall of 1920 the Massachusetts Library Club appointed a committee on binding which has given especial attention to the standardization of magazine bindings. At a later winter meeting a report of progress outlined a plan that promised both efficiency and economy. The committee was, therefore, instructed to continue its work.

After investigation of prevailing library usage in thirty-four representative libraries, careful and detailed study and experiment, and consultation with book binders, the Committee has determined upon certain principles of standardization which will be practicable for binders and may be adopted by libraries with what will be, in most cases, only a slight divergence from already existing practice. Adoption of the standard will mean for libraries the elimination of all specifications in ordering bindings in the standardized list. It will be necessary only to order the binder to follow the Massachusetts Library Club standard specifications. It will mean for the binder the elimination of thousands of rubbings, substituting therefor a set of patterns with standard specifications, and will permit the binder to carry out certain operations in quantity instead of by single volumes. The result will be uniformity, economy of operation and, it is confidently hoped, reduced cost.

The standard specifications, in the form of a set of patterns which will be supplied to all binders desiring them, determine the following features: (a) height of the volume; (b) proportional division of back; (c) position, form, and wording of the inscriptions on the volume, i. e., title, volume number, date or inclusive dates, and book number, if used.

In addition to the series of group patterns to be supplied to binders a slide rule has been devised. It combines in one implement all the elements contained in the entire set of patterns. It is essentially a binder's tool. By its use the finisher, without reference to patterns, can ascertain with accuracy from the height of the boards of any volume, both the group to which it belongs, and the location of any given line of lettering upon the back. The various positions have been worked out for the entire range of sizes by a mathematical formula that insures a constant proportion, regardless of variation in height.

The Committee finds that there are eighty-four periodicals concurrently bound by enough

libraries to entitle them to inclusion in the standardized list. Most of them are indexed in the Reader's Guide. These magazines are divided into groups according to the heights to which the boards have to be cut. The unit of gradation between groups is one-quarter of an inch. For example: it is found that Bird Lore and Blackwood's have pages nine and five-sixteenths of an inch high; Living Age, nine and one-quarter of an inch, and Quarterly Journal of Economics, nine inches. When cut, however, these magazines will all fall into the nine and one-quarter inch group, so called because their boards will all be cut to that dimension.

A complete list of such groups is herewith appended. It will be a simple matter for a library regularly binding any magazine not included in this list to have it added to its proper group by special order to the binder.

8 inch group	Harper's Magazine
Poetry	Little Folks
8½ inch group	Mayflower Descendant
Unpartizan Review	Munsey's Magazine
9 inch group	National Municipal Review
Booklist	New England Historical and Genealogical Register
Edinburgh Review	North American Review.
9¼ inch group	Poet-Lore
Bird Lore	Popular Mechanics
Blackwood's Magazine	Public Libraries
Educational Review	St. Nicholas
Living Age	Scientific Monthly
Quarterly Journal of Economics	Scribner's
9½ inch group	Yale Review
American Cookery	10 inch group
Annals	Architectural Record
Atlantic Monthly	Book Review Digest
Bookman	Contemporary Review
Catholic World	Fortnightly Review
Century	National Geographic Magazine
Education	Nineteenth Century
Forum	10¼ inch group
Hibbert Journal	World's Work
Overland Monthly	10½ inch group
Review of Reviews	American Historical Review
School Arts Magazine	Photo-era
School Review	10¾ inch group
9¾ inch group	Library Journal
American City	Official Gazette
American Magazine of Art	11¼ inch group
Bulletin of the Pan American Union	Punch
Current History	
Current Opinion	
Dial	

*Report of the Massachusetts Library Club Committee on Binding.

11½ inch group	12¼ inch group
Cosmopolitan	New Republic
Everybody's Magazine	12½ inch group
Good Housekeeping	Garden Magazine
International Studio	House & Garden
11¾ inch group	House Beautiful
American Forestry	12¾ inch group
American Magazine	Musician
Asia	13¼ inch group
Independent	Etude
Outing	14 inch group
Outlook	Collier's Weekly
Scientific American	Scientific American
Monthly	14¼ inch group
12 inch group	Country Life
American Architect	16 inch group
Electrical World	Illustrated London
Industrial Management	News
Literary Digest	Ladies' Home Journal
Nation	16¼ inch group
Review	Youth's Companion
Survey	

It is expected that a complete exhibit of specifications and patterns, and of magazines bound in accordance therewith, will be displayed at the Swampscott meeting.

Chairman.

The Great Wall of China

A CORRESPONDENT of *Le Temps* has discovered fresh and cogent reason for making use of the American Library in Paris, after a disheartening encounter with a bookseller's high prices. His experiences are recounted in *Le Temps* for April 10, under the caption "La Muraille de Chine" ("The Great Wall of China").

He went to a book shop one afternoon, wishing to purchase an English book which he had heard discussed on all sides, a book "written by the wife of an English statesman, who has accumulated there many anecdotes mingled with much gossip and not a few indiscretions. 'One hundred and forty francs for the two volumes,' said the clerk in the most natural manner imaginable. 'One hundred and forty francs!' cried the other, not without a violent start. And he replaced the books on the shelf from which they had been taken, in less time than it takes to write it.

"Then show me," he murmured timidly, "Colonel X.'s Diary."

"The clerk handed him two volumes, letting fall these simple words: 'One hundred and fifty francs!' Our hero surrendered these two also, and made his

escape precipitately: 'One hundred and fifty francs,' said he, 'for a work which contains little more, I am told, than table talk! Conversation at that price is altogether too costly! For the same price I could have three juicy dinners at the most expensive restaurant in Paris!'" . . .

"Many of us now occasionally feel the need of buying English and American books so as to keep in touch with contemporary literature. At present, it is a luxury which is strictly forbidden us. The rate of exchange prevents us from buying any works from England, even as it prevents a large percentage of European countries from buying any from us. . . . In this way a barrier like the Great Wall of China is raised between one people and another, which is nothing less than a return, pure and simple, to barbarism. Travel to foreign countries has become nearly impossible, not only on account of the scandalous rise in cost but even more because of the annoyance and unpleasantness of all kinds which it entails: innumerable formalities, viciating of passports, vexations and insolence of customs officers, train delays, railway workers' strikes, the difficulty of finding even the smallest room at hotels, etc., so that each people is thus more and more thrown back upon its own resources.

"To remedy this only one way seems possible. Since individual purchases are forbidden us by the high price of books, there remains only collective purchasing. Associations, clubs and public libraries should acquire the largest possible number of those foreign works which can now be found abroad only. But most of these groups too are suffering terribly from lack of money. Far from increasing the funds allotted them, every effort is being made to pare them down. Rather than create new organizations, which would not continue without very great expenditure, let us at the least try to save the existing institutions. There is now in Paris, at number 10 Rue de l'Elysee, an excellent American library, which was formed during the war from gifts coming from the United States. It numbers some thirty thousand volumes and it is adding to its treasures as far as its limited resources permit, its concern being rather to render service than to realize profits. It welcomes the students of all nationalities who come at every hour of the day to consult its books, reviews, newspapers. For the moderate sum of twenty francs a year, it authorizes the borrowing of books. Members pay an annual subscription of one hundred francs. It needs hundreds or rather thousands of members in order to carry on its work. It is to be hoped that it will find them. With books at their present prices, every one who is interested in English and American literature will make quick work of renewing his subscription."

The Polish Bureau of Information at 40 West 40th Street, New York, is considering the organization of a system of book and periodical exchanges between various libraries and other institutions of learning in this country and in Poland. It is also considering the best way of supplying a bibliography of Polish publications, including the more important works already published and new books and periodicals as they appear. The Bureau will be glad to hear from any library that would care to establish an exchange system thru this agency, which is entirely non-commercial.

THE FACULTY AND FIRST CLASS OF THE BOONE UNIVERSITY LIBRARY SCHOOL AT WUCHANG

China's First Library School

CHINA'S first library school which is a department of Boone University at Wuchang graduated its first class of eight students last year and seven students are enrolled in the second class.

This school is peculiarly the offspring of the American library idea, the principal, Mary Elizabeth Wood having studied at the Pratt Institute of Library Science and the other two members of the faculty being graduates of the Library School of the New York Public Library: Samuel Tou Yung Seng (second to the right of Miss Wood as you look at the group) of 1914-1916, and Thomas Ching-Sen Hu (second on the left of Miss Wood) of 1917-1919.

The School and the University Library are glad at all times to receive books in English of all kinds except fiction and welcomes especially reference books, works on library economy and history.

Collecting Overdue Books in Tampa

To the Editor of the LIBRARY JOURNAL:

Thinking that perhaps the library profession might be interested in our recent experience in connecting overdue books, I am sending the following.

One of the most universally discussed problems in the library world is that of collecting overdue books.

In the Children's Department of the Tampa (Fla.) Public Library, our system is to send post cards when the book is five days overdue

and a letter at the end of ten days. When both fail to reclaim our property one of the staff accompanies a member of the police force. Since the Library is a department of the city, we can explain to the borrower that both are operating under the same city commission and no disgrace need be felt by the person upon whom the call is made.

In three afternoons of two hours each, the Children's Librarian and the policeman collected eighteen books and nine dollars in fines, only one dollar and a half of which was penalty for lost books. Besides the money collected during the calls, five children accompanied by parents came to the Library to pay the fines which had to await "pay day."

Aside from the gratification of refilled coffers and completed records, these visits have aided us in getting acquainted with the home life of our juvenile friends and we have no reports of permanent enmities resulting from the visits of the "hand of the law."

In Ybor City, the Spanish section of our city, we encountered some difficulty; but that was always solved by the presence of an interpreter who explained our errand, and we usually received the book.

We have noticed a decided increase in the circulation and attendance in our Children's Room since many of the wayward members have returned saying that they "had forgot all about the 'Liberry.'"

We do not, however, advocate the adoption of this system in all communities.

MARIAN M. PERCE, *Children's Librarian.*

Book Prices in Library Bulletins

THE A. L. A. thru James I. Wyer, Jr., chairman of the Committee on Federal and State Relations, and the National Association of Book Publishers, thru its Secretary, Frederic G. Melcher, have again taken up with the U. S. Post Office Department the question of including prices in book lists, with the result that P. O. Order No. 5857, dated May 23, permits the inclusion of prices provided that no compensation is offered the publisher of the list for such inclusion:

"Hereafter, with respect to publication entered as second-class matter, the question as to whether, under the law of October 3, 1917, requiring a higher rate of postage on the portion devoted to advertisements than on the portion devoted to matter other than advertisements, editorial and other reading matter is advertising will be decided by whether or not the publisher has been, or is to be, directly or indirectly compensated, either by money or other valuable consideration, for its insertion. In all cases where the publisher has not been, and is not to be, compensated such matter will take the rate of postage for other than advertising. In all cases where the publisher has been or is to be compensated in any form whatever the advertising rate of postage will be charged. Articles, items and notices in the form of reading matter inserted in accordance with a custom or understanding, explicit or tacit, that a 'reader' is to be given the advertiser or his products in the publication in which the display advertisement appears are advertising within the meaning of the law."

Library Summer Course

NEW YORK STATE NORMAL SCHOOL

A SUMMER course for school librarians will be given at the New York State Normal School at Geneseo from July 5th to August 12th, open only to graduates of normal schools, colleges or experienced librarians and teachers. The object of the course is to give assistance to those in charge of school libraries who have had no training for the work.

The course will require seven hours a day. The subjects are: Cataloging (dictionary catalog); Classification (including shelf-listing) Dewey Decimal System; Book selection, children's books, adults' Books, magazines, reference work and bibliography; Administration of the school library.

On satisfactory completion of the course, students will be entitled to a school librarian's certificate, the grade varying according to previous training and experience.

Applications for admission should be addressed to Mary C. Richardson, Head of the Library Department, State Normal School, Geneseo, New York.

MARY C. RICHARDSON,
Head of the Library Department.

To Librarians of Collections on Natural Sciences

Eunice R. Oberly, librarian of the Bureau of Plant Industry, U. S. Department of Agriculture would be glad to get in touch during the Swampscott meeting with librarians of libraries or collections of material on the natural sciences.

To Users of the New York Times Index

Jennie Welland, editor of the *New York Times Index* and supervisor of the *Times "Morgue"* would like to get in touch with users of the *Index* during the Swampscott Conference for the discussion of ways for increasing the usefulness of the *Index* in libraries and elsewhere. An exhibit will show the development of the *Index* from the time of the old hand written form to the present day.

HOW'S YOUR MOTOR?

Courtesy B. F. Goodrich Co

ROCHESTER PUBLIC LIBRARY

THE ROCHESTER PUBLIC LIBRARY'S INVITATION
TO "HAVE YOUR ENGINE 'GONE OVER'"

THE LIBRARY JOURNAL

TWICE-A-MONTH

JUNE 15, 1921

IT is only a dozen years since the business librarian became recognized in his specialty by the organization of the Special Libraries Association and within that time this branch of the profession has had indeed wonderful development. The number of towns in the several states is limited by geographical consideration but the number of corporations and other businesses, which need the service of business librarians, is without limit. The Special Libraries Association included from its start librarians of all specialties, exclusive of those of public libraries and of state, law and medical libraries which have associations of their own, but it has become chiefly the representative of the information service in business organizations. The library of a business organization is essentially an information service in connection with a collection of books and other material, while the public library, essentially a collection of books, nevertheless includes in the course of its development an information service as one of its most important features. Thus the two methods complement each other and it is gratifying that this is so heartily appreciated on both sides. This plan has been worked out more thoroly in Boston in relations between the Public Library, the "Tech" library and those of commercial organizations, than in any other city, which is one of the reasons why the joint meeting of the S. L. A. and the A. L. A. at Swampscott is so suitable a feature of the 1921 conference.

★ ★ ★ ★ ★ ★ ★

UNDER the leadership of learned societies in France the organization was completed last year of Councils of Academies and learned societies in several of the leading countries, America among them. The American Council which convenes semi-annually in New York, now includes nearly a score of such societies and it is of value both in bringing together the national societies and in extending international relations. Thus far the library interest has not been represented in the Council. It is not clear whether societies of general membership like the National Educational Association and the American Library Association will be classed as learned societies, which term is usually confined to organizations whose membership involves a certain standard of attainment. The A. L. A. prop-

erly welcomes to its ranks all those interested in the library profession, whether as chiefs or beginners, trustees or sympathizers, and is therefore scarcely to be classed as a body of experts. The American Library Institute, on the other hand, is a selective organization in this respect, especially representative of the experts of the profession and perhaps this is the body which should take part in the American Council of learned societies.

★ ★ ★ ★ ★ ★ ★

PILFERING from libraries in New York State should be much lessened under the law passed by the legislature of 1921 which in the case of stolen books puts the burden of proof upon the possessor instead of upon the owner. The great majority of the second-hand book-trade are honest men, but there are those who at least do not ask questions. Now that the possessor of a stolen book is called upon by the law to state how it came into his possession this class of dealers will buy with greater caution while the law by making theft more easy of detection will be a safeguard for reputable book-dealers for which they should be grateful.

★ ★ ★ ★ ★ ★ ★

WE congratulate our younger co-temporary, *Public Libraries*, on the completion of twenty-five years of manhood—or womanhood—and its editress on her continuous service to the library interest thru this medium, interrupted only by her war work abroad. In making this anniversary the happy occasion of inquiring what others have served in library positions for at least twenty-five years, a roster of nearly two hundred is presented, and in view of the fact that, as usual, many librarians did not answer inquiries, it is quite possible that there are double that number of instances of a quarter century service in the same institution. This speaks well for the longevity of library service, which is abundantly illustrated from other directions. Of the eight veterans of 1876, five are still in active relationship and in the Brooklyn Public Library, which failed to report to *Public Libraries*, a pleasant company gathered recently to celebrate the completion of Dr. Hill's twenty years of service there, being the thirty-eighth of his library work.

LIBRARY ORGANIZATIONS

CONNECTICUT LIBRARY ASSOCIATION

THE spring meeting of the Connecticut Library Association was held on Friday, May 27th, at the Farmington Village Library, Henry N. Sanborn, president, in the chair.

D. N. Barney, representing the trustees and donor of the beautiful library, gave the members a hearty welcome.

F. W. Edgerton of New London reported that the Connecticut pension bill for librarians in its final form had become an act May 5, 1921, the text of which is: "Any city, borough or town or any subdivision thereof may retire with a pension or other reward any employee of any public library within the limits of such city, borough or town or subdivision."

Belle H. Johnson, visitor and inspector of the Connecticut Public Library Committee, told of the summer class in library methods which is to be held at Yale University, New Haven, July 13-31, a good program being offered. Among the speakers will be Corinne Bacon of the H. W. Wilson Co., who will give ten talks on book selection; Mary L. Sutliff of the Library School of the New York Public Library, six lectures on reference work, and Adeline B. Zachert, director of school libraries in Pennsylvania, talks on school libraries.

Mr. Sanborn, Chairman of the A. L. A. Committee on Constitution and By-laws, spoke briefly on the proposed revision of the A. L. A. Constitution especially the provision for state chapters. If the new constitution is adopted, the state chapters will be chapters of the national organization. In the matter of dues and delegates it was the prevailing opinion that in determining the relation of the state chapter to the A. L. A. the dues and representation should be placed on the same basis.

One of the most interesting parts of the program was seeing the famous Parnassus on Wheels, "The Book Caravan." The jottings by the way were told in an entertaining manner by Frances Darling, one of the Caravaners. The idea of the Caravan Bookstore of 1500 volumes was conceived by Bertha Mahoney, director of the Boston Bookshop for Boys and Girls, and was financed by big publishers who contributed money, books, etc., on a co-operative plan. Books by non-contributing publishers are not carried on the wagon, but as the aim is to sell and advertise books, orders are taken for any book regardless of publisher. The Caravan is a Stewart motor truck, designed by Maurice Day, illustrator. Miss Darling said that the

most popular books of last year were *The Open Road* and *Parnassus on Wheels*. Psychic books did not sell. At the town festival at Barre, Vermont, folks bought books at the Caravan to give to their public library. She thought the Vermonters bought more books and were more interested than the people of New Hampshire or Maine. At Falmouth the moving picture men staged a scene on a farm where the farmer's wife was to walk into the house with a book under her arm. She did, and when it was over she refused to give up the book, saying: "You have trampled on my potato field, now I guess I can have the book." This year the Caravan will carry some of the children's favorites that have been out of print, such as books by Cecil Aldin, Leslie Brooke and Kate Greenaway. They will also carry the Medici prints and some charming post cards illustrated by Willebeek Le Mair.

At noon one hundred and sixty members were guests of Mr. Barney. The alumni of the Library School of the New York Public Library lunched at the Country Club with Miss Sutliff as their guest of honor. The school has fourteen graduates who hold public library positions in Connecticut.

At the afternoon session Winchell Smith, President of the Farmington Movie Film Co., spoke on "The Movies and the Village Library in Farmington." Mr. Smith sketched the community movie picture project at Farmington which cost \$1500, financed by local people. Mr. Smith gave an unofficial talk on a new Recreation Department, a welfare department which is under consideration by President Harding. If adopted the new federal department will be under the Secretary of Labor. Mr. Smith spoke of the need for better censorship of motion pictures with a balanced and broad-minded board instead of the present control under forty-two state boards of different minds and opinions.

Brian Hooker, lecturer and author, who lives at Farmington, gave a talk on "Libraries and Moving Pictures." Mr. Hooker believes that the theater and the screen can portray best of all the arts historical settings, and that the library is a big factor in producing information and details on "how people lived and what they were."

A letter was read by Mr. Sanborn from Hettie Gray Baker, Productions Editor of the Fox Film Corporation, Miss Gray urging the stressing of good movies "the same way you stress good books, good plays, good paintings." They are all the same thing—mediums for creative art,

for expression. The library can help and is helping the motion picture. Two annotated catalogs of good films exist in the files of the National Board of Review of Motion Pictures, 70 Fifth Ave., and the Community Motion Picture Bureau, 46 West 24th Street, both in New York City.

A round table discussion followed on the libraries and the movies. George Godard, State Librarian, spoke of two reels of Yale University in the World War as owned by the State Library. Mr. Sanborn suggested the lists that have been published in the LIBRARY JOURNAL, the last appearing April, 1921, selected by the National Board of Review of Motion Pictures and entitled "Recent Motion Pictures Based on Standard or Current Literature or Drama," as good publicity. Articles of interest have appeared in the May issue of the *Congregationalist* and the January and other issues of 1921 of *Visual Education*. Places were suggested from which free or inexpensive material could be obtained, as the U. S. Department of Education, U. S. Department of Agriculture, S. N. E. Telephone Co., and the U. S. Americanization Committee. Caroline Hewins of Hartford, Helen Scarth, Farmington, Helen Sperry, Waterbury, and Mr. Perry, Simsbury, took active part in the discussion. It was suggested that the small town movie manager would produce the best films obtainable, if desirable titles should be suggested by the local librarian, but to do this effectively it would be necessary that she keep in touch with those films as currently produced in nearby cities.

Laura A. Eales, *Secretary*.

PENNSYLVANIA LIBRARY CLUB

THE spring meeting of the Pennsylvania Library Club was held on Monday evening, May 23, 1921, at the library of the University of Pennsylvania, Philadelphia, Frank Grant Lewis, president, in the chair. This being the business meeting for the year, the treasurer's report was read and unanimously accepted, followed by the election of officers for the coming year, 1921-22, as follows: President, Asa Don Dickinson; First Vice-President, A. S. W. Rosenbach; Second Vice-President, Elizabeth V. Kelly; Secretary, Martha Lee Coplin; Treasurer, Bertha Seidl Wetzell.

The first speaker of the evening was Morris Jastrow, Jr., whose address, "Sketch of the Life and Services of the late Dr. J. G. Rosengarten," was exceedingly interesting and impressive. As a life-long and a close friend of Dr. Rosengarten, Dr. Jastrow was well able to speak feelingly and authoritatively on the distinguished

lawyer and philanthropist. Many institutions and persons, particularly young men, were helped by Dr. Rosengarten's wise counsel and generosity. As an alumnus of the University of Pennsylvania, Dr. Rosengarten took great and untiring interest in its expansion, and there is no department of that institution that does not bear evidence of his generosity. The intimate relations existing between the board of trustees and the faculty of the University were due to Dr. Rosengarten's tact and ability to draw men together in a common interest. Dr. Rosengarten wrote valuable articles for many scientific societies. He kept up an intimate association with great and prominent men of all countries, so that his influence was far reaching. At the time of his death he was the senior member of the American Bar. The Free Library of Philadelphia owes a tremendous debt of gratitude to Dr. Rosengarten. The \$1,500,000 given by Andrew Carnegie for the branches of the Free Library was procured thru the aid of Dr. Rosengarten, who enlisted also the aid of prominent men in procuring sites for the branch buildings. He was much interested in the Drexel Institute Library School and was very sorry when it was given up, and Dr. Jastrow suggested that a library school named after Dr. Rosengarten would be a fitting memorial to him.

The second speaker was the new president of the Club, Asa Don Dickinson, librarian of the University of Pennsylvania. His illustrated address, "Franklin's Life in Title Pages as illustrated by the Curtis collection of Franklin Imprints," was thoroly delightful and instructive. The Curtis Publishing Company has recently presented to the University of Pennsylvania a treasure of incalculable value in the gift of a priceless collection of Franklin relics. Franklin used books constantly, and contrived by hook or crook, to get access to the books he craved. Pictures of the title pages of many of the rare and interesting books printed and collected by Franklin were thrown on the screen. A copy of the famous newspaper, "The Pennsylvania Gazette," founded by Franklin, was also shown. This paper was the ancestor of the present *Saturday Evening Post*. The University Library has now sixty-five varieties of the "Poor Richard Almanack," all of those published except four; three "Country Almanacks," and a file of pocket almanacks, all published by Franklin. The first novel published in America, "Pamela," is in this Franklin collection, was the first cartoon, published in the *Pennsylvania Gazette* in 1749; and the first attempt to illustrate a newspaper, being a map of the siege of Louisburgh, which is very crude, but

important because of its historical significance. A picture of one of the pages of Franklin's attempt to abridge the Book of Common Prayer was shown. The guests were invited to inspect the relics, and see the library.

At this, one of the most interesting evenings the club has ever had, there were one hundred and twenty-five present.

MARTHA LEE COPLIN, *Secretary*.

NEW YORK HIGH SCHOOL LIBRARIANS ASSOCIATION

THE New York High School Librarians Association has held three successful meetings this session. In October the Association met at the Fifty-Eighth Street Branch of the New York Public Library to discuss with Mabel Williams, the Library's supervisor of work with schools, plans for co-ordination.

In December the meeting held at the Washington Irving High School was addressed by Allen Abbott of Teachers College on the progress of school libraries. Dr. Abbott told of an experiment which he had made with his own pupils, illustrating the passing of the text book method in the teaching of English. Two classes of approximately equal ability were selected and to each was offered the choice of continuing along the lines prescribed in the English syllabus or of adopting the plan of an excursion into the resources of the school library. The "syllabus" group plodded along the regular channels congratulating itself on not having to

be original; the pupils who elected to explore the library (and incidentally their own minds) hesitated, at first, awed by so much freedom and chance for initiative, but it was not long before the experiment was "working" in a very satisfactory manner, and the pupils submitted carefully thought out lists of books which they purposed to read and review in class, proving that the youthful mind when freed from too much guidance and restraint naturally selects wholesome literature to read. Lively class discussions ensued and the boys and girls enjoyed their new-born interest in their school library and an air of proprietorship developed in them at once. At the end of the term when the two classes compared notes it was unanimously agreed that the "library experiment" had been a great success and a source of so much pleasure and profit that all would be eager to follow up the idea.

In February, the annual meeting of the Association was held and the following officers were elected: President, Katharine M. Christopher, Julia Richman High School; vice-president, Rosamond Joslyn, Jamaica High School; secretary-treasurer, Ruth Wilcox, Washington Irving High School. A consideration of current problems about library instruction led by Mr. Leland, Supervisor of School Libraries, resulted in the appointment of a joint committee of English teachers and librarians to prepare a statement and syllabus to submit to the Board of Superintendents.

RUTH S. WILCOX, *Secretary*.

LIBRARY OPPORTUNITIES

POSITION WANTED

Trained librarian with four years' experience wants librarianship in California. Address L D 12, care of LIBRARY JOURNAL.

POSITIONS OFFERED

Wanted, a first assistant and a cataloger in a small city library in Massachusetts. Address, F. N. 12, care of the LIBRARY JOURNAL.

The Wells College Library, Aurora (N. Y.), has an opening for a general library assistant, able to do cataloging, after June 15th. Applicants should have college education and library school training. Apply to the Librarian.

The St. Paul (Minn.) Civil Service Commission announces an examination on July 29 for a children's librarian (residence requirements waived). The examination will consist solely

of a rating of the candidates' training and experience. For further information, blank and folder "E" describing the method of rating experience, write to the Civil Service Bureau, Room 113, Court House, St. Paul, Minn.

The United States Civil Service Commission announces open competitive examinations for a library specialist at \$3,600 to \$5,000 a year and a senior educational advisor at \$5,000 to \$6,500 a year in the Bureau of Navigation, U. S. Navy Department. United States citizens of both sexes may take these examinations. The subjects are: Education, experience and fitness, 70 weights; thesis or publication (to be filed with application), 30 weights. Applications must be filed before July 12th. Applicants should at once apply for Form 2118, stating the title of the examination desired, to Civil Service Commission, Washington, D. C.

IN THE LIBRARY WORLD

MASSACHUSETTS

Chestnut Hill. A drive for \$2,000,000 for Boston College resulted in the sum being over-subscribed. \$400,000 are to be devoted to a new library building which will be open to the public for research. The architects are McGinnis and Walsh of Boston.

Malden. The circulation of books from the Malden Public Library showed a gain of 54 per cent in eight years, or six volumes per capita for a population of 49,103 (1920 census), which has increased 10 per cent since the last census. The library contained 76,352 books, and 291,028 volumes were circulated in 1920 from all sources, including the two branches at Maplewood and Linden. Among Massachusetts libraries Malden is third in the circulation of books, but thirteenth in the size of its city appropriation and eighteenth in the scale of salaries paid. The staff is of the same size as in 1913, which was before the branches were established and when the circulation was half its present figure. The Board of Trustees is asking the City Council to raise the per capita tax for the library from 31½ to 40 cents, which would yield \$19,600, or \$4,400 over the appropriation for last year. In 1920 \$5,146 was expended for books, \$1,760 for binding, and \$14,846 for salaries. The total expenditure for the year was \$28,977.

CONNECTICUT

The Connecticut pension bill for librarians, enacted on May 5, provides that: Any city, borough or town, or any subdivision thereof, may retire with a pension or other reward any employee of any public library within the limits of such city, borough or town or subdivision.

RHODE ISLAND

Providence. The total circulation for 1920 of the Providence Public Library thru the Central Library and five branches and three sub-branches was 501,127, of which 306,148 volumes were circulated from the Central Library. The latest branch of the Library, the Olneyville Free Library, was opened in the middle of the year by a formal agreement between the Providence Public Library and the Olneyville Free Library Association providing for a temporary union to be renewed at the end of three years, if so desired. Mabel E. Colwell, Reference Librarian at the Central Library for nearly twenty years, was placed in charge.

The total of books in the library at the end of the year was 230,692 volumes, an increase of 22,604, in which 7,086 volumes of government documents not previously counted in stock are included. The record of all books missing in 1919 and 1920 was 4,778 volumes, of which 3,673 are missing from the Central Library. Of these 1,094 volumes are recorded as missing both years. The total stock of the three main sections of the Special Libraries Department, the Industrial Library, the Art Library, and the Music Library, comprised 44,341 volumes, and the total circulation was 34,957. The collection of books for the blind, with 464 volumes, had a circulation of 797. The Registration Department records 39,033 as the number of cards in use. The number of borrowers' cards issued during the year was 9,733, this figure including only new borrowers and residents of Providence and excluding various special forms of cards.

Receipts were \$173,418, and expenditures \$171,524. Payments for books, periodicals and binding amounted to \$37,910; salaries \$108,379; light, heat and other maintenance \$24,983.

NEW YORK

The penal law in relation to buying or receiving stolen or wrongfully acquired property has been amended to read as follows:

“. . . A person, who buys or receives any stolen property, or any property which has been wrongfully appropriated in such a manner as to constitute larceny according to this article, knowing the same to have been stolen or so dealt with, or who . . . conceals, withholds, or aids in concealing or withholding any property, knowing the same to have been stolen, or appropriated wrongfully in such a manner as to constitute larceny under the provisions of this article, if such misappropriation has been committed within the state, whether such property were so stolen or misappropriated within or without the state, or who being a dealer in or collector of junk, metals or second-hand materials, or the agents, employee or representative of such dealer or collector, buys or receives any wire, cable, copper, lead, solder, iron or brass used by or belonging to a railroad, telephone, telegraph, gas or electric light company, or any metal in the form of ingots, ingot bars, wire bars, cakes, slabs, billets or pigs, *or who being a dealer in or collector of second hand books or other literary material, or the agent, employee or representative of such dealer, or collector, buys or receives any book, manuscript, map,

chart, or other work of literature, belonging to, or bearing any mark or indicia of ownership by a public or incorporated library, college or University, without ascertaining by diligent inquiry, that the person selling or delivering the same has a legal right to do so, is guilty of a felony, namely, of criminally receiving such property in the first degree, if such property be of the value of more than fifty dollars, and is punishable by imprisonment for not more than five years, or by a fine of not more than one thousand dollars, or by both such fine and imprisonment, and is guilty of a misdemeanor, namely, of criminally receiving such property in the second degree, if such property be of the value of fifty dollars or under, and is punishable by imprisonment for not more than one year, or by a fine of not more than five hundred dollars, or by both such fine and imprisonment.

"This act shall take effect September first, nineteen hundred and twenty-one."

NORTH CAROLINA

Library legislation recently enacted will greatly facilitate library development in the state. The annual appropriation of the Library Commission was increased from \$8,000 to \$17,500. The law establishing the Wilmington Public Library was amended by striking out the clause which limited to \$2,000 the amount which the Wilmington municipal authorities may spend for the maintenance of its public library. The book fund of the state library was placed at \$3,000 annually instead of \$500 and the salary of the state librarian increased by \$1,000. The Concord Public Library has secured a special tax of one cent on each one hundred dollars valuation for the support of the library, which increases the fund heretofore available almost three times. A bill for the protection of public libraries provides that whoever wilfully or maliciously detains any book, newspaper, magazine, pamphlet or manuscript belonging to any public library for fifteen days after mailing or delivery in person of notice from the librarian, . . . shall be guilty of a misdemeanor.

OHIO

Toledo. The Navarre Branch of the Toledo Public Library in the Navarre grade school building was opened to the public on April 28th. This branch is the first of the school branches to be opened in Toledo. The library room is 68x24 feet and has a book capacity of about 5,000 volumes and seats fifty readers. There is a direct entrance from the street and the room has a separate hot water heating system equipped with a Bryant gas boiler with thermostatic control so there will be no diffi-

culty in heating the room during hours when the school is not in session. The Board of Education supplies the heat, light and janitor service and the Library Board supplies books, equipment and service. Tenure of the room is designed to be permanent, but the Library Board may vacate or the Board of Education secure the room for its own purposes on one year's notice by either party.

INDIANA

Three of the four library bills presented to the 1921 Legislature were enacted. The fourth was a bill to repeal the county library act of 1918. The library workers and library boards of the state made such heated protest that the bill was never brought up for action.

House Bill 103 rectifies the mistake drafted into the township support act of 1911 by the 1919 General Assembly. As a result of this change, any library board may insist on a tax from *any neighboring township* when backed by the signatures of fifty taxpayers. The law previously permitted a tax only in a neighboring *county*.

House Bill 87 provides for several changes in the county library act.

a. In the section applying to counties where there was no free public library, the law now provides for a board consisting of nine instead of seven members, and permitting four members to reside in any one township in place of two permitted previously. This will enable boards to maintain a quorum more easily. . . .

b. The term of board appointment is specified as two years.

c. The county tax shall be continued as long as ten per cent of the inhabitants of the district so taxed use the library (instead of ten per cent of the entire county).

d. The minimum tax rate prescribed is reduced from five cents to two cents. The fixing of the tax still rests with the library board, and when five cents is needed, it may be levied. With the present high valuation, it is not needed in about half of the counties of the state.

The third library bill introduced by Senator Holmes of Gary, provides that while the township trustee will continue to be a member of any library board for the support of which a township tax is levied, the additional township member is hereafter to be appointed, not by the trustee, but by the judge of the county district court. All present appointees continue to hold office until the expiration of their term of appointment. Another change provided by this act requires that no person may be appointed to a city or town library board who has resided less than two years in the district, whereas one year residence was formerly satisfactory.

ACCOUNTANTS' INDEX

Compiled by the Librarian of the
AMERICAN INSTITUTE OF
ACCOUNTANTS

and Complete to Jan. 1, 1921

There being no other work now in print covering the field of accounting literature, this volume--1578 pages, 6 by 9 in.; excellently bound in substantial cloth--fills a real need for the lawyer, banker, merchant, librarian, public utility executive and federal, state and municipal employee as well as the accountant.

Contains references to all literature on accounting subjects in print in 1912 and published since that time, summaries of information such as rates of depreciation, obsolescence, depletion, etc.; names of authors, publishers and dates of publication of all references.

IOWA

Of the seven bills drawn by the Legislative Committee of the Iowa Library Association and brought before the Thirty-ninth General Assembly, three were passed:

Senate File 440, removing the five year time limit in rural extension contracts to townships, counties, etc.; Senate File 441, adding the words "by and with the consent of the Council" in the appointment of trustees to fill vacancies. The Library Commission Law was amended, placing the salaries in the general salary fund and doubling the amount for the purchase of books, so as to give the Commission at the present time \$12,000 for that purpose.

LOUISIANA

New Orleans. The New Orleans Public Library, including the Fisk and the Simon Hershheim Library, circulated 480,603 books during 1920 thru the Central Library and five branches, one of which, the Dryades Branch, is for the use of the colored population. The entire collection numbers 170,582 volumes. The net increase of books was 2,089 volumes, the smallest for many years. The total receipts were \$54,535, the city contributing \$47,100. The available income leaves no margin for extension work or publicity, which Librarian Henry M. Gill considers of peculiar importance to a southern library. "To meet and overcome our local conditions, which include, in addition to the characteristic social attitude of our people [individualism as opposed to community effort], the great area of our city, offset by so few branch libraries, the temptations of a mild climate offering nine months of outdoor life, the easiness of earning a living without that keenness of competition that compels the commercial worker and the mechanic to read and study, we must, more than any other large city, thru publicity, thru advertisement, secure the opportunity to make the library the powerful factor for the advancement of our community that it should be."

MISSOURI

St. Louis. The St. Louis Mercantile Library has had a prosperous year, with an increased circulation and an unusual growth in membership, every month of 1920 marking a gain in this respect. The total gain during the year was 187, bringing the total membership up to 3,564, classified as honorary, perpetual, life and annual members, and clerks and teachers. Books purchased cost \$9,720 and salaries were \$28,653. The total expenditures were \$62,584. The circulation of 129,777 exceeded that of 1919 by 9,450.

SOUTH DAKOTA

An amendment to the county library law of 1917, strengthening and improving that law, was passed at the last session of the Legislature. The amendment was introduced by Senator Amsden, who also sponsored the free library commission bill and the public library law, both passed in 1913, and the first county library law passed in 1917.

1. When a petition is signed by at least forty per cent of the legal voters of a county and signed in at least sixty per cent of the taxing districts of such county . . . the board of county commissioners are authorized and directed to establish a library for that county.

2. If there is no free library in the county available for use as a central library, the board of county commissioners shall appoint a board of county public library trustees, consisting of five competent citizens, two of whom shall be women. . . . The county librarian shall be the secretary of such board of trustees.

4. The trustees shall provide suitable accommodations for the free public library. . . . They shall select books, papers and periodicals for the library, and they may exclude any reading matter they may deem harmful; they may accept gifts of books, money or property for the use of the library . . . shall appoint a librarian and other persons necessary for the care of the library and fix their compensation. Any librarian so appointed shall have such qualifications and training as shall be approved by the State Library Commission. The trustees shall make all necessary rules and regulations pertaining to the use and selection of books and periodicals. . . shall determine what books may be circulated and what shall be retained . . . for reference purposes only. . . may provide for the circulation of the books in the rural communities. . . and shall have the power to place certain books upon a pay shelf.

5. The trustees shall give to the county commissioners an estimate of the expenses of the library for the ensuing year. . . . The said board of county commissioners shall levy tax upon the taxable property of the county. . . not to exceed in any one year one-half of one mill. . . which tax when collected shall constitute the county free library fund. Provided, that in making the levy, the board of commissioners shall omit any taxing districts that may . . . be maintaining a free public library by revenue derived from taxes. . . .

6. In counties where there are one or more free libraries, the board of county commissioners are authorized to take over the care and control of the same upon such conditions as may be agreed upon between the board of county

VOCATIONS FOR GIRLS*The Evening Post* says of**THE HALL WITH DOORS**

Louise S. Hasbrouck

"How a club of girls of the everyday sort faced the problem of deciding what to do after their school days were over. commissioners and the then existing board of library trustees. . . . The board of county commissioners may contract with the library board of such county for free service to all residents of the county upon such terms as may be agreed upon. . . . for a term of five years, to be renewed, if terms and conditions can be agreed upon, for terms not less than five nor more than ten years. . . . If there is more than one such free public library in the county, the board may contract with each for service if. . . . advisable. In case the county commissioners and the library board are not able to agree upon terms satisfactory to both, the county commissioners shall appoint a board of county public library trustees, as provided above. . . .

7. A report is to be made in duplicate by the trustees, one copy of which shall be filed with the board of county commissioners and the other with the Free Library Commission.

WASHINGTON

Tacoma. The report of the Tacoma Public Library for 1919 and 1920 includes a statistical and interpretative summary of the library's rapid extension during the decade 1910-1920. In ten years' time the millage tax levy increased sixty per cent, and the total expenses of the library system, including the expenses of the two high school libraries, managed jointly by the School Board and Library Board, one hundred per cent. With this went a net gain of 151.8 per cent in the use of books as represented by the library's circulation figures of 504,742 for 1920. The gain in those using the library was 208.9 per cent, while the population gained only 15.7 per cent. One-third of the population of approximately one hundred thousand persons now use the library regularly, making use of the 101,000 volumes of the library's collections to the extent of 5.2 books per capita. The present central building, a Carnegie building, was opened on June 4, 1903. The agencies for book distribution in 1920 numbered forty-eight, including in addition to the main building the South Tacoma and McKinley Hill branches, two high school libraries, Rhodes and four other adult stations, twenty-nine city schools, and nine points where children's books have been made available thru the assistance of civic bodies, clubs, or summer camps.

In 1910 the library owned 48,562 volumes; in 1920, 101,823. In the former year the circulation was 200,411, and the registration of borrowers 10,393, as against 31,993 in 1920. The book fund showed a slight increase from \$5,268 to \$6,889, but salaries and wages rose from \$13,994 to \$34,653. The most striking comparison which the decade affords, in the

opinion of the librarian, John Boynton Kaiser, is the relation between the operating expense of the library system in 1910 and 1920, analyzed on the basis of the cost per volume circulated in each of these years. In 1910 it cost 12.9 cents per volume to circulate 200,411 volumes; in 1920, 504,742 volumes were circulated at a cost per volume circulated of 11.1 cents, or a decrease in the cost per volume circulated of 13.9 per cent while increasing the number circulated 151.8 per cent. If the comparison is limited to the figures for the Public Library alone, omitting the jointly administered High School Libraries, the decrease in cost per volume circulated is 17 per cent.

Ten thousand children are now registered, and one-quarter of the Library's resources are constituted in the 25,000 volumes for their use. During the decade the circulation of children's books gained more than adult books thruout the entire system, as indicated by the relative percentages of increase, 184 per cent to 131 per cent.

Scores of requests for books and reference material each year from residents of the smaller towns and rural districts, from club women, superintendents, teachers and pupils of the county have shown the need of a county-wide library service. Such service could be rendered by contract between the Library Trustees and County Commissioners under Section 6980 of Remington and Ballinger Annotated Codes and Statutes, but public opinion has not yet reached the point where County Commissioners can be persuaded to enter into such a contract. A County Library Bill has been introduced at each successive biennial session of the Washington legislature for years without result. Contract service to the town of Ruston, geographically entirely surrounded by the City of Tacoma, was proposed during 1919-1920, but no agreement was reached.

The budgets granted the library, in each case less than those originally asked of the City Council by the Library Board, were for 1919, \$45,750; 1920, \$51,699; and 1921, \$60,830. In 1920 the main library expended \$5,248 for books, and the two branches \$1,634. Binding cost \$2,691 and \$396 respectively.

The librarian has prepared a statement of the war record of the Tacoma Public Library for a forthcoming volume entitled "With the Colors from Tacoma and Pierce County." Tacoma raised \$707 for the "Books for Everybody" fund, and the State of Washington \$4,584. The library supplied with books such vessels of the U. S. Shipping Board as stopped at Tacoma without also stopping at Seattle, a city with greater facilities for handling a larger number of vessels.

PERU

A supreme resolution promulgated by the President of Peru, April 9, provides for the immediate formation of a "Biblioteca Escolar y Administrativa del Peru" to consist of all books now existing in the administrative offices of the Republic, including the institutions of primary and secondary instruction.

The Director of School Libraries and Museums, on the staff of the Director General of Education is charged with the classification and cataloging of the books now forming the separate departmental libraries of the Peruvian Government. The Decimal classification, with some necessary modifications, has been adopted and the card catalog, made according to the usual rules of American libraries, has been begun.

- Wash. University of Washington Library School.

BROCK, Geneva, 1916 R., formerly with the Cheyenne Public Library, appointed Wyoming State Librarian.

CAGE, Rosa, 1919 R., appointed librarian of the Riverside Girls' High School in place of Arline Davis, 1915 R.

CLATWORTHY, Linda M., has been called to the librarianship of the University of Colorado at Denver, and leaves the State Library of New Hampshire shortly after the Swampscott meeting.

DANIELS, Joseph F., librarian of the Riverside (Calif.) Public Library, was unanimously elected president of the Riverside Chamber of Commerce last month.

DAVIS, Eleanor, for a short time with the Portland (Ore.) Library Association, became reference librarian of the University of Oklahoma at Norman in March.

DENIO, Herbert Williams, 1894 N. Y. S., of the Henry E. Huntington Library, is now li-

brarian of the Vermont Historical Society at Montpelier.

FAULKNER, Mabel F., 1916 R., in charge of the lending system of the Riverside (Calif.) Public Library, will sail on August 31 for Honolulu to join the staff of the Punahou School, formerly known as Oahu College.

FENTON, Polly, 1909 Wis., assistant in cataloging in the California State Library School, 1919-20, and since then assistant in the reference department of the California State Library, joins the faculty of the Library School of the New York Public Library in September and will have charge of the instruction in cataloging subject headings and some minor subjects.

HALLSTED, Sarah, 1915 N. Y. S., assistant librarian of the National Bank of Commerce, New York City, appointed chief librarian, May 11th.

HUBBARD, Mary, for two years instructor in cataloging and subject headings at the Library School of the New York Public Library, resigns at the end of the present school year in order to return to reference work. The faculty greatly regrets the loss of Miss Hubbard, who has contributed much to the life of the School during the period of her connection with it.

WESTFALL, Ethel L., 1921 R., is now librarian of the Deschutes County Library at Bend, Oregon.

WELLES, Jessie, 1910 P., recently of the Wisconsin Library Commission and for many years superintendent of circulation in the Carnegie Library of Pittsburgh, has been appointed assistant librarian of the Toledo Public Library, with charge of the Circulating Department.

Instructors, Students, Libraries

No other books of a like character are on the market today. For class room work and as references they are invaluable.

About Library Equipment and Supplies

The problems of librarians are sometimes perplexing but always interesting.

We do not set ourselves up as experts who can answer all questions off-hand, but we shall be glad to offer our subscribers our facilities for securing valuable and helpful information.

We are not selling anything, and no charge whatever is made for this service.

QUALITY—SERVICE

The cost of your binding should be determined not so much by the price you are paying for the work, but by the number of times your books circulate after rebinding, and by the wearing of your magazine binding.

The lowest priced work is usually the most expensive in the end.
 Send us two of your books for sample binding free of charge.

\$1.50 net

PRESS NOTICES.

CHRISTIAN WORLD—This is a timely, impersonal, dispassionate, analytical unanswerable discussion of the weaknesses and inconsistencies of the Christian Science Church. It overflows with facts which provide the ground-work of the author's incisive argument . . . and is as clear as sunshine and as irrefutable as the decalogue.

THE EVANGELICAL MESSENGER—The spirit in which his exposures of inconsistencies in the organization are made is very commendable, and adds merit and pungency to his arguments and forceful statements. It is the only book of its kind on the market as far as we have any knowledge.

Electrical Equipment of the Motor Car

A practical manual on Ignition, Starting and Lighting, in which special attention has been given to the fundamental principles of electrical engineering as applied to the electrical equipment found on the modern motor car.

The book is well illustrated and numerous special diagrams have been prepared to bring home more fully the subject matter under discussion.

712 Pages, 5 x 8 ins., 464 Figs., 256 Blueprint Wiring Diagrams, Flexible Fabrikoid, \$3.50

Let us send a copy for your inspection, prepaid at 15% discount, subject to return if you don't want it.

The Reader and the Advertiser
 THE LIBRARY JOURNAL is of continuing service to its subscribers, as the many enthusiastic letters to the publishers attest. This appreciation of the editorial efforts of the magazine also extends, we are confident, to the advertising pages.
 A practical way for the reader to help in the development of THE LIBRARY JOURNAL is to patronize the advertisers who by their presence demonstrate their belief in the merit of the magazine. An added service is performed if the reader mentions THE LIBRARY JOURNAL in connection with such patronage.

"The World's Most Perfect Zoölogical Monograph"

A Monograph of the Pheasants

By
WILLIAM BEEBE

Published by the New York Zoölogical Society,
with the coöperation of Col. Anthony R. Kuser

THIS magnificent work, to be completed in four royal quarto volumes, describes the haunts, habits and plumages of the most brilliant family of birds. It appeals equally to the layman and the scientist. Richly illustrated with reproductions in color of exquisite paintings by Thorburn, Lodge, Knight, Fuertes and Jones. Also many photographs and maps.

Only 400 copies, a large number of which have already been subscribed for, are available for sale in America. Vol. I, containing an introduction by Professor Henry Fairfield Osborn, 198 pages of text, 20 colored plates and 31 photogravures, and Vol. II are now ready for distribution. Price \$62.50 each volume.

Prospectus, specimen plate and subscription blank sent on application to the New York Zoölogical Society, Zoölogical Park, New York.

"There can be no question that Mr. Beebe's 'Monograph of the Pheasants' will rank as the standard work on the subject."—*Country Life (England)*.

"Its outstanding merits are the beauty of its plates. . . . the extensive series of photogravures. . . . and the graphic and popular descriptions of their habits from studies made amid their native wilds. These and other features render the work far in advance of all other books written on the subject and make it welcome alike to the ornithologist, the aviculturist and the sportsman."—*Nature (England)*.

"It pulses with life and interest, and the charming personal touch of the author. Its scope is broad, its plan new and original, and it grips the reader with a warm and masterful hand. The overflowing wealth of first-hand facts is a delightful surprise. It tells the reader the things he most wishes to know about these strange and beautiful birds. It reveals their personalities, their habits and their romantic dwelling places, their classification and their geography. The science of ornithology is made fascinating and the general reader of Mr. Beebe's abundant text soon realizes that when science is written by a sympathetic hand, it can be both understandable and delightful."—*Wm. T. Hornaday*.

"Nothing has been spared to make this study of the most brilliant family of the larger birds of the world complete. The illustrations are brilliantly drawn and excellently reproduced and the series of photographs showing the natural surroundings of the species are models of what such pictures should be. Nor is the wide knowledge displayed, the unflinching perseverance by which it was acquired, his justice to his predecessors, the aptness of his quotation and the singularly happy power of expression possessed by the writer less remarkable."—*Daily Telegraph (London)*.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

New Business Publications For Your Library

RONALD
Publications on Business

Financing An Enterprise

By HUGH R. CONYNGTON, Chairman of the Board, The Ronald Press Company.

The author is a recognized authority on matters of finance. This is a revised edition, in three volumes, of his previous work which was published under the pseudonym of Francis Cooper.

"Financing an Enterprise" shows how to conduct every phase of the financial plan from the inception of the enterprise in the mind of the promoter to its launching as a full-fledged, self-supporting concern.

It will be of specific value to those among your readers who are interested in financing new enterprises as well as to bankers, lawyers, investors and promoters. Three volumes, cloth binding, price \$7.00.

Management Engineering

The new journal of management in productive industry. It will deal with methods for the everyday control of men, materials, and machinery and will appeal to industrial executives, presidents, secretaries, treasurers, general managers, works managers, cost accountants, management engineers and purchasing agents. Published monthly, \$5.00 a year.

The Principles of Marketing

A clear, well-organized and readable text-book by Paul Wesley Ivey, Ph.D., Professor of Marketing, University of Nebraska. The author gives a reliable estimate of the marketing developments that have taken place in the wholesaling, retailing and manufacturing fields. Cloth binding, 351 pages, price \$3.00.

The Principles of Economics

A new edition of the former text-book by F. M. Taylor, Ph.D., Professor of Economics at University of Michigan. It is the result of thirty years' careful study in the best method of presenting the subject. The student is first given a thorough understanding of today's economic forces before he is allowed to speculate upon developments that can be expected in the future. Carefully prepared questions throughout the book test the student's grasp of the text. Cloth, 655 pages, price \$3.00.

These volumes will be worth-while additions to your library. You may examine them for 30 days before deciding. At bookstores, or direct from publishers.

Some Aspects of Library Progress*

By ALICE S. TYLER

President of the American Library Association

LIBRARIANSHIP is an ancient and honorable profession and comes to us as a noble heritage from the past, rooted in scholarship and learning. We should, with pride, do homage to those whose honored names are associated with the care and preservation of precious manuscripts and documents, and later with printed material, preserving and transmitting the recorded thoughts and aspirations of past generations to the service of the present.

When a new world and a new era became established upon the American continent, conditions and requirements arose unlike those of any previous country or age. The great experiment in democracy was undertaken. The fundamental conception has broadened and strengthened as new experiences have enlarged the democratic ideal, but we recognize that the underlying principle of the new order was universal intelligence. Into this new land, with its conditions absolutely unlike those of the home land, the pioneers had brought a belief in education and in libraries; for we learn that those who came on the Mayflower brought libraries quite out of proportion to their other worldly goods. Miles Standish, for example, had fifteen volumes, including Caesar's Commentaries on the Gallic War, as we learn from "The Courtship." Of the pioneers the inventory of whose estates is preserved in the Old Colony records, none had less than one pound value in books and eleven had five pounds or more, and money was worth five times as much then as now. Elder Brewster had four hundred volumes, including works of Bacon and Milton, and not a few plays; Governor Bradford had eighty volumes, and John Miles had fifty pounds' worth. It is also noted that John Harvard, who immortalized himself by leaving his

property and his name to the little collegiate school in Cambridge, had a library of three hundred volumes.

It was inevitable that the founding of public collections of books should be fostered by such men and their descendants and naturally these libraries have taken on characteristics and methods quite unlike those of older countries, with different standards and requirements. Libraries are no longer for a limited and select group. They must be for everyone. The American library from the nature of the governmental experiment has opened wide its doors to all. For this reason we have developed in this country a profession new in many aspects, springing from the old—a newness which is the adaptation of books and information to modern democratic needs. All recognize that scholarship and research are fundamental and essential to sound library progress, but in addition there is the distinctive responsibility for meeting the needs and requirements of the new age and the new state.

Those who have to do with book distribution in this country—not only librarians, but authors, literary workers, publishers and booksellers—recognize the service books should render to the varied conditions of American life. The boundless field of the universal appeal of literature, more or less intangible, is the common interest of all and no one institution or organization can compass it, tho the library has an essential and important part. To reach, by means of the printed page, the minds and thought of all who can read—while the schools face the task of reducing the appalling number of the illiterate—is task enough for the united purpose and energy of all forward looking people who have personal contact with books in any relation. Here is a field for co-operation—definite, practical and immediate—to project *the book* with its potential service upon the at-

*Delivered at the forty-third annual meeting of the American Library Association at Swampscott, Mass., June 21, 1921.

tention and thought of an unawakened people, by means of active and convincing methods, such as are utilized by other world activities and agencies which appeal to an intelligent response.

While sharing in this general responsibility the Library has a distinctive contribution to make as a public institution, far beyond that of other groups which are concerned in book distribution. It has been created by society for its own service, supported by public funds. It is obligated to provide for the community the aids and encouragements for mental and intellectual health and growth, in as definite and responsible manner as the health and welfare departments, municipal and state, are obligated to provide for physical health and well-being and the essential needs of pure food and water. The mental and spiritual needs of a community must not yield in importance to the material. A recent *Book Bulletin* of the Toronto Library admirably says "It is the public library which conserves and develops the public taste. Without it there is comparatively little protection in any community against the cheap, the common, the trashy in literature. Its very catholicity in taste and democracy in administration make it the representative public social institution of any community."

In accepting this, there is the added thought that the library may well be considered the clearing house of ideas for the community. It has been deemed essential that books should be made freely available, not primarily to make one's business more effective, tho that is important and desirable,—but to make the individual more effective in his personal life. To foster idealism and to strengthen the struggling aspirations of the human spirit is the very essence of the library's service as an institution. In the light of the present day, what higher service can be rendered?

The tide of distractions and thoughtless pursuit of entertainment and amusement seem oftentimes almost overwhelming. Has the library as an institution any constructive program to turn this tide? If the tendency of the average person is to follow the easiest way of receiving mental impression thru pictures, glaring headlines or blatant propaganda, should the library present a program of activity to arrest the attention of the careless and indifferent?

Can the library become vocal and active in stimulating discussion of books that arouse thought? Is there not a distinct service to be rendered not only in placing on our shelves, but publicly discussing, books on the great questions of public life and affairs? In short, how may the American public library be utilized

for the general good? And how may the college and university libraries with their matchless opportunities for reaching picked groups of young men and women, utilize these opportunities by inspiring in these young people a real feeling for books and reading, aside from the lecture room task which they may carry with them into life's activities?

We believe in the compelling power of books to draw to them those for whom books have a message; we believe in the library as an essential factor in democracy; we believe in the power of the library's influence because it responds to a voluntary and not a compulsory educational contact. It has been said that "democratic consciousness is that state of mind which takes delight in, and has confidence in people rather than things." Have librarians reached this state of "democratic consciousness" in their library service? Has the library become socially conscious as an institution?

We find the answer in the realization of the service of the modern public library and the specialized service of the many business and special libraries. And most of all when we recall the historic library service to our soldiers and sailors during the Great War.

It has been said that there is inherent in the intangible medium with which we deal—thought recorded in books—an obstacle to an active and dynamic projection of library service from the institutional point of view. Some have even suggested that we should recognize the passive and subsidiary nature of our service and that the library accept a secondary and not seek a primary place in the great scheme of general education—books and the library being the handmaid of the schools and other aggressive educational forces.

This view is probably held by some writers of books on sociology and social institutions, for it is rare indeed that we find the library, as a public institution, with both an educational and a social purpose included in such books. Doubtless such authors have received generous aid from the libraries in the preparation of their books, but with the thought that the service of the library is essentially for the scholar and the student. They have not realized the obligations and services of the institution to the community or institution supporting it. Have we not been remiss in failing to bring this to their attention?

We do not of course accept this secondary view of our place in the educational scheme, hence it is of concern to us that a clearer conception of the institutional service of the library shall be more frequently and clearly presented

and that discrimination be made in our own minds and in that of others, between the service of books to individuals in their pervading and intangible influences, which we share with others who are concerned with book distribution, and the specific and professional sense in which the organized and definite obligations is ours to stimulate, direct and extend the use of books in the service of every citizen.

The school, the church, the theatre and the newspaper, share with the library in influencing public thought and action; but the appeal of the library is not only to the individual but is also a group appeal and is hence more vital and significant as it not only seeks the individual with the message of the book in a special and personal way, but has equally in view the welfare of the entire community.

One after another certain achievements have been realized by the libraries and in their realization milestones have been set up in the slow stages of progress—tax support, free access to books, state responsibility for library extension, the library the heart of university life, book service to the home by means of neighborhood library or home delivery, the work with children and schools, the business and research library, the rural book service—only to push forward with the goal still ahead and with an ardent belief in the results accomplished and the greater yet to be.

Those who participate in a great social movement always picture an ultimate triumph in which the goal is reached and their labors ended. The "destructive myth" of certain revolutionist philosophers has provided no project for future social organization after the tremendous finality of their effort is accomplished. In common with those who hold higher conceptions of education, are we not seeking to banish ignorance and create a literate, thinking world of universal intelligence? The unattainable some may say—possibly a creative or constructive myth—but after all an inspiring aim, and if the seemingly impossible should come to pass, the human imagination cannot picture the beauty, joy and unlimited growth and accomplishments of the human soul untrammelled by ignorance, blindness and superstition.

Meantime our feet are upon the earth, our immediate tasks are practical and possible of accomplishment and thru united effort our progress is sure. In our common purposes and ideals we can more effectively labor thru the united efforts of our great national organization which gives us courage, force and strength.

It seems necessary to reiterate the fact that organizations cannot, if growing and vital, re-

main unchanged. There must be new and varied forms of activity adapted to the rising needs which express the progressive spirit of man.

The American Library Association is not an exception. If we should be tempted to say, because of our affection for the organization, that the methods and ideals which were so well conceived in those early years should remain unchanged, let us remember that the last twenty-five years, yes, the last decade, has produced a new world and we must adapt our methods and plans to these urgent needs.

It may be truthfully said that the American Library Association has mastered new obligations as they have come to it in the progress of events and acquitted itself, during the momentous and historic period of the war, by meeting a tremendous patriotic obligation in a manner that could not possibly have been anticipated by those who created the organization.

With the return to somewhat normal conditions there is need of adaptation to post-war needs. Certain weaknesses in our organization have been revealed by both war and post-war experiences. To meet new needs and obligations, amending the constitution seems to be the first step taken by most organizations. This is doubtless essential. There are, however, some possibilities in meeting certain needs that may be suggested with our organization as it is, or in process of adjustments.

It seems unnecessary to emphasize the difficulties that are inherent in national organizations, with members widely scattered, to carry on consecutive or continuous work or investigation. Your attention has been called during the year to the vague and undefined status of committees in the American Library Association and altho much valuable and resultful work has been done by committees in the past, it is most desirable that a more definite program shall be worked out for committee activities. For this reason the American Library Association Council has created a committee to study the subject and report at a meeting during this Conference. There should be, without doubt, a correlation of the work of a committee on a given subject with the work of a section on the same subject, and the query arises as to whether both are needed. There is, too, the matter of overlapping Committees and the utilization of Committee findings in continuity of effort. Does not the creation of a section mean that a considerable group of librarians have a continued interest in that phase of library activity in providing for annual discussion and conference? In which case might it not include all of the functions of a standing committee? To illustrate, might not all who are

especially concerned as to professional preparation concentrate effort in the Professional Training section, with sub-committees on various types of training?

Doubtless most of us have many times felt helpless over our inability to find specific and accurate data regarding important items in library service and library extension. We cannot much longer indulge in "glittering generalities" regarding library problems and library accomplishments. What do we *know* as to the effect of this? or the results of that activity? What ends have been accomplished? What are the most direct and inexpensive means? And have there been recorded data in a sufficient number of instances for us to know with certainty what may properly be expected as a result of certain expenditures of effort or of money?

Have we been ready to measure our activities by adapted and modified standards of measurements such as are applied in industrial, commercial and school work? It is but a few years ago that many teachers scorned the dreams of a few that the processes of school work should be scientifically measured. They said, as do some of us now, that school work was intangible and the processes could not be measured by the rule and yard stick. While this is true of the final results of education as manifested in character and personality, it has been shown that methods and processes by which such results are gained in the class room can be measured. Is it not time that we should be seeking to know what certain library activities really mean in measured terms?

Would it be feasible for the sections of the American Library Association to become our "experiment stations"? Where could we turn for a "picked group" better adapted than the Lending Section to undertake, thru the co-operation of a score or less of librarians, time fatigue and motion studies of loan desk processes with detailed and continuous record for a considerable period?

There is in the Catalog Section an opportunity similar to that of the Lending Section to make a similar study of time and motion in their relations to department organization.

What other group could attempt with such understanding and technical knowledge as the Children's Librarians Section, a study of the reactions of children to various types of literature, the handicaps of the printed page for those who find the mechanics of reading difficult, the physical make-up and size of type used in children's books, with a selected group of children's librarians co-operating and with a scientific schedule upon which to work?

Undoubtedly more resultful work could be accomplished by the Sections if a simple organization of each section should be made, whereby continuity would be secured for plans and policies. An Executive Committee of five, one elected each year for a period of five years, would probably provide this, the Chairman of the Section to be named by this committee either from their own number or from the membership of the Section.

A general need for timely and accurate library statistics with sufficient details upon which statements can be based and conclusions drawn, is recognized by the Committee on Library Administration in its efforts. Here, indeed was disclosed one of our greatest needs during the trying periods of war service and publicity. We have been favored by the willingness of the U. S. Bureau of Education in the past to gather and publish library statistics, but the schedule of the items has been somewhat unresponsive to our needs and the results have not always given us the facts so much needed to meet the crucial questions of cost of operation, tax maintenance, and the ultimate "acid test" of the whole question of a tax supported library service, viz.: what proportion of the people are really being served and at what cost? The Committee on Federal and State Relations is co-operating with the Bureau in securing a more comprehensive schedule, but when such statistics are ascertained we are in need of an analysis of the findings, for it is not collecting material but organizing it after collection, that will give us the convincing facts. A library "actuary," (to borrow a word from the insurance world) for the American Library Association, who would translate figures into living realities, could produce conclusive arguments for library extension—the vital need—which comprehends in its far-reaching program the ultimate goal of making books freely and easily accessible to every person. The Survey Committee of Five in its plans for securing information as to the activities and methods now existing, will reveal to us the vast field yet to be developed by the American library system. Some prospects are clearly visible and many we do not see, just around the bend of the road as we steadily advance. It should stir our imaginations and arouse our flagging energies to feel that in the united purpose of this organization higher levels are being attained, the individual worker is given courage for the daily task, and that all are contributing in greater or less degree to the tremendous educational task of the day and hour—a richer, fuller individual life for every one.

The City's Leadership in Book Distribution*

By ARTHUR E. BOSTWICK
Librarian of the St. Louis Public Library

MANY, perhaps most, of our early libraries were in small towns or in the country. We were an agricultural people then and the great city, even the industrial town, had not yet come into being. We are still a great agricultural country but there are regions where the spread of the factory system has almost made us forget it. For it is not the fact that we have devoted ourselves to the mechanical industries—it is the socialization of those industries, that interests us here. I was born and reared in a New England hilltop village which was one of the important centers of the state during the Revolution. The population of its township was then about three thousand, and it is still that. Its rivals and other places that were then too small for rivalry are above the hundred thousand mark and so it has become relatively undistinguished. In the days of its importance it was known industrially, as well as politically, socially and educationally. Its hills were dotted with little metal-working shops, turning out knives or scissors, with fulling mills, dye-houses and other adjuncts to the textile industry, with tanneries, with clock factories. These are gone, but in a valley five miles to the east is the world's greatest brass industry, in a chain of industrial cities fifty miles in length. Just as the rain water falling on the hills trickles down their flanks to swell the river Naugatuck, so all these little industries have gradually, in the course of years, gone the same way to swell the industrial flood in that valley. Our industries are now conducted by great bodies of men who both work and live near each other in communities. Agriculture is almost the only occupation that cannot be so concentrated, but even it has been affected by the invention of mechanical appliances. One man can now do on the farm work that used to employ several. The balance have drifted to the towns. I think we may now roughly say that we all live in towns except those who must live in the country to grow food for our population.

With this flood of industrial, commercial and professional population, the library, which serves it, has also sought the cities, and what we call the modern library movement has de-

veloped there, has burst into flower and has begun to bear fruit. Many of its products are unfitted to the small rural library, or at any rate the pressure that originated them was of the kind that would naturally be felt first in crowded centers. Such are branch libraries, stations, children's rooms, traveling libraries and many of the new social functions with which we are becoming familiar.

There are some signs, it is true, that the tide is turning. These appear not so much in the migration of individuals from city to country, despite all that we hear of a "back-to-the-land" movement, as in a tendency toward mutual interpenetration. The country is becoming cityfied and the city countryfied, owing to the spread of devices unknown a half-century since. Take, if you please, the influence of the automobile. It is substituting for the unpaved dirt road, the graded, aligned and hard surfaced street formerly found only in large cities. It is making possible the abandonment of the old-fashioned country school, with the substitution, for a group of these, of a single centralized school, of size and type formerly found only in towns, to which the children from a large surrounding region are carried daily as part of the school's machinery of public operation. It is bringing to the farmer's door the postman, the laundry-wagon and the butcher's cart. On the city the effect of the automobile has been somewhat as if its houses had been built on sheet rubber and a stretching force had been applied all along its boundary. Its citizens now live in the suburbs far more than formerly, and in an approach to rural environment. This mutual approach is not only the beginning of a tendency to mingle city and country, but it has begun to vitiate our census statistics. Cities are extending their imaginary boundary lines to catch up with the fast-receding residences of their citizens and these lines now often include vast stretches of rural land, so that the Staten Island farmer in New York or the man who owns wheat lands in the southwestern part of St. Louis finds himself cataloged as an urban dweller.

I have alluded here to one item alone, affecting speed of transportation. Were this my main subject I might take up in turn the telephone, the electric light, the moving picture—a hundred and one novelties of the past 25 years—

* Paper contributed as part of discussion of the topic "Library Extension: Its Scope and Methods," at the fifth general session of the A. L. A. Conference at Swampscott, Mass., on Saturday, June 25th, 1921.

and show how each has lent its influence toward the same result.

I have dwelt upon this result because it is essential to an understanding of the city's "leadership" in book-distribution, by which I understand the influences that have not only caused it to do certain things first but have made it possible and desirable for non-urban regions to follow it in doing them. For one cannot be a leader without followers, and his ability to acquire them is an essential part of his leadership.

Let us then, if you please, take so familiar a thing as a branch library, unknown within the memory of some of us. I am selecting this agency of book-distribution because the forces which compelled its adoption were the same as those that have resulted in locating many other branches—police stations, branch postoffices, telephone exchanges, milk-depots, chain drug or grocery stores, etc. In all these cases, a single central agency, sufficient for a small town, is found insufficient to serve the needs of a large one, both on account of distances and because of the congestion of work at the one center. The distance factor may not always work in the same way. In the telephone central, for instance, it affects the length of cable for which the company must pay. In the branch postoffices and libraries it works thru the increased travel of the individual user. But the result is the same. Library branches began to be established in large cities long before the spreading-out process began. When that came the effect of increased distances at once made itself felt, and branches began to appear not only in huge centers like New York, Philadelphia and Boston, but in comparatively small towns like East Orange, New Jersey.

Here we have a "leadership" that was distinctly thrust upon the large city—and those of us who are librarians of libraries in such cities have no disposition, I am sure, to claim any different origin for it in this, or any other case. Economic congestion of population gave it birth, and the expansion of that population over adjoining territory multiplied it. Now, those who are interested in the rural population do not see why it should not follow city leadership here, as it has with its paved and lighted streets and its telephones. Consequently, we have the county library with its rural branches, something of which another will tell you more.

Here, let me repeat, is a leadership both of whose elements are determined by economic forces. These forces brought it about that cities were the first to do this thing and they also made it inevitable that what they did should ultimately extend to the country. Enough has been said I am sure to bring out the fact that

leadership is selected. We follow a leader in certain respects only; there are few, perhaps, that we should choose as exemplars in all the affairs of life. I may follow my captain to the death; I do not necessarily agree with his taste in poetry or think it necessary to brush my hair like his. Or because I rely wholly on what my music master tells me of the relative merits of Scriabin and Rimsky-Korsakoff, that does not mean that I shall follow his ideas of dress. The city's leadership, in like manner, is exerted and felt only in directions where it is proper that the country should follow. It will be interesting, therefore, at this point to examine the chief activities of a city library and to ask whether they are merely local or fitted to spread by leadership, and if the latter, how they are likely to be modified in the process. A large city library acquires, owns and conserves books; it makes them available to readers; it also endeavors to gain readers for them, and in so doing it comes into very close contact with all the social activities and interests of its community. Let us examine its capacity for leadership under each of these three heads.

In the first place, it is evident, I think, that the points in which the rural library can and should follow a city leadership are those included by most persons under the head of "library extension." This term itself requires definition. In an article printed in the *Annals of the American Academy* I have already pointed out that, considered with relation to topography a library may increase its work either intensively or extensively; it may do more work, or more kinds of work in one spot, or it may work in more spots. In the former class are adoption of home issue, children's rooms, or the provision of assembly rooms; in the other are branches and stations, traveling libraries, interlibrary loans, distribution by parcel post. Items in both these types may be referred to roughly under the title of extension, but the rural problem is essentially that of the second type, when the library is brought to its users and not simply made more usable in one spot. There must, of course, be an administrative center in a system of rural distribution, but while the functions of this centre may be, and no doubt are, copied from the city library, its functions are not those of a library *per se*. When there is, in a rural community, a library with the facilities, or some of them, usually found in a city library, this is because there is within reach a population sufficiently large to make use of them and because, in so far as this is true, conditions are not rural, but urban.

Taking up first the acquisition, ownership and preservation of books, this must of course

be undertaken by any rural system of distribution, and it must follow the city in dividing these into stationary and fluid collections. The advantage of the county library over the state traveling-library system is that it gives opportunity for both kinds. The traveling library is entirely fluid, that is, in the topographical sense. In the oldest form it consisted of fixed collections, which was often a bad thing; but these were not fixed topographically. Lately more liberty of selection has been given and such collections have been called "open shelf traveling libraries"—an extension of the term "open shelf" which seems unfortunate and confusing. But in all this there is no possibility of a collection fixed locally for places where it is desired and for which it is fitted. The county library gives this, for it admits of branch libraries at local centers of population. These may, in fact, be so considerable that the branch takes on the characteristics of an urban library, which only shows, as pointed out above, the modern interpenetration of town and city. A county library is not necessarily wholly rural, altho it may be largely so. The storage of books, then, may be partly in local centers where they are to be used and partly in a general center whence they are to be constantly distributed. This follows city leadership; but, whereas in a city the great bulk of the collection is stationary, in the country it is fluid. The selection and ordering of the books and their conservation goes on along lines worked out and followed in the large city institutions, whether the central administrative office and place of general storage is in a rural spot at a convenient central point, in a city library, or at the office of a State Commission.

Next let us examine systems of distribution. So far as this is effected thru branch libraries we have a distinct following of city leadership. So far as there are merely temporary deposits, as in a state traveling library system, this is more doubtful. The traveling library is very much older than anything in library work, that we are accustomed to call "modern." It was devised definitely as a plan of rural distribution in days when nothing like it existed anywhere in cities or towns. The present use of it, however, post-dates this, and may be in part influenced by the deposit system which was an early form of city extension. In one form of rural distribution, however, we have the leadership distinctly reversed. I mean, of course, distribution by book-wagon, the only real "traveling library," since a library is no library without a librarian, and this is the only form in which a librarian actually "travels" with the books. Whenever the book-wagon is found in

a city it is distinctly copied from rural practice, in which Miss Titcomb was the pioneer. I am not speaking, of course, of mere delivery by wagon, in which urban practice probably did lead. I am thinking particularly of the early delivery system of the Mercantile Library in New York. Of course the book-wagon, with its librarian, is an extension to the free-library field of the plant and methods of the itinerant vendor or "Yankee peddler," in which shop, goods, proprietor, and salesman all travel about the country together.

In approaching our third point, efforts to gain readers by social contact, we are nearing those activities of a library that I have elsewhere described as the result of "socialization." A curve made to represent how far the social influence of the librarian is dependent on the size of the library, that is, on the number of readers, would approximate in form the well-known probability curve, high in the middle and low at both ends. In fact, this influence is small with few readers, for obvious reasons, but it is also small where the readers are many, because congestion leaves little time to exercise it and there is little of that personal intimacy between librarian and reader that one finds in the best small-town libraries, where the librarian knows everyone by name and is acquainted with all their likes and dislikes, their mental faults and abilities. Probably the most favorable library for this kind of contact is one circulating from three to five thousand books a month. The city may have it in branch libraries, which is an argument for building many small ones instead of a few large ones.

I say "may have," not "necessarily has." Of two city branches, one may be highly socialized and the other not at all. It depends both on the community feeling of the neighborhood and on the abilities of the librarian to foster this kind of contact. Branches in old community centers often favor it; yet the old village center swallowed up by the city is sometimes paralyzed socially by the catastrophe and loses its individuality completely.

In following city leadership here, the rural distribution system has a clear field only where branch libraries are possible in groups of population of considerable size, where the curve is at its highest. A sparse population is not socialized, just because of its sparseness. The field-worker or the book-wagon librarian has a few hours or minutes of intensive influence, which are worth much, but it is exercised wholly on individuals. There are groups on paper, but they rarely get together in the flesh. When they do, at church, in the grange, or at school, the librarian is not there.

He who desires to bring his own personality to bear on a group of persons, must be able to come in contact with them both individually and collectively. Neither individual nor collective contact is sufficient in itself. The reactions are different and to get the total effect we must have both kinds. The librarian who is favored with an opportunity to take part in a discussion of current books with a woman's club, all of whose members she has often talked with individually, knows that this is true.

It is in thus dealing with groups in group form that the city's leadership in book-distribution looks a little impractical for, we will say, the conductor of a library book-wagon in a region where one's nearest neighbor is at least a mile to the right or left. But where one cannot follow leadership directly, he may often do so indirectly; and he does, if he is a convinced follower. Where the tank crashes directly thru the bushes the infantry may have to go around. Where there are occasionally gatherings of groups, the librarian may make a point of attending them. Besides this, the written expression of opinion by readers in such form that others may profit by it, may be encouraged. This is the next thing to the give and take of group discussion, even if it does not quite replace it.

It must be remembered that in every city library that supplements its branch system by delivery stations, verbal communication between reader and librarian is necessarily replaced by writing. This is what I have elsewhere called "long-range circulation," and it has some good points. Correspondence is slightly more formal than conversation and makes a correspondingly greater and more durable impression. So far as this goes on in county library or state traveling library systems it is a direct following of city leadership, altho "long-range" circulation is something that most cities would prefer to replace as far as possible with something else.

So far, the city is ahead in its opportunities for social contacts, altho the interpenetration that I have already described, is beginning to offer opportunities which could not have been anticipated ten years ago. This is not the kind of opportunity that raps once on the door and then goes off in a sulk. It beats a tattoo like the sound of a buzzer, and we librarians are usually not disobedient to the summons.

In discussing the city's leadership in book-distribution in this fashion, I realize that I am exposing myself to criticism for talking more about rural than about urban conditions. This, however, is the penalty of talking about leadership of any kind. No one can discuss the duties

of a general without talking about his army, or the functions of a chairman without understanding those of the body over which he presides. If the city has been exercising leadership, and I think we cannot doubt it, we shall understand better its quality and extent if we observe and study somewhat the character of the libraries on which that leadership is supposed to have been exercised.

It is a pity that while in the past the problems of city distribution have had the best minds of the profession to study them and to develop their treatment, those of the country have been entrusted largely to persons with little ability and no experience. This is an instance of the fact that "to him that hath shall be given." One of the great advantages of the county library, as of the regional high school, is the grouping of forces that make possible the employment of trained experts to handle rural problems in the way in which only city problems could have been handled ten years ago.

Group and join forces as we may, however, it is extremely unlikely that any system of rural book-distribution will ever be able to follow city leadership in the expenditure of money. We of the city have been too prone to assume that our incomes proceed from an inexhaustible source. We are surprised and grieved when they are reduced. We are inclined to sulk and to plan for reduced service in such a way as to "get even" with the authorities. It is well that we should rather plan for a minimum diminution of service for a given reduction of income, for extensions at a minimum cost and for betterments at no cost at all.

What is your income? It is pretty safe to say that whatever it is there is a library somewhere with the same income that is doing some one thing better than you are. At the same time, doubtless, you are doing some other thing better than it is. Why not "swap" improvements, and better both services without spending a cent? One reason is that we do not know what our neighbors are doing. The abolition of this state of ignorance is the principal reason for undertaking a library survey. The present one—the first of its kind—will inevitably be partial and disappointing. It should be repeated at intervals of five or ten years, becoming more detailed, more reasoned, more valuable at each repetition. I am expecting one result to be that the predominance of city leadership will become a thing of the past. We should look for future leadership, whether in country or in city, not to communities of any particular size or type, but to those who are doing things more efficiently than we are—providing new or better service at less

cost, discovering and exploiting new fields of usefulness, and showing others how they may do the same.

I wish I might say that we are doing something to develop this type of leadership. Most of our efforts are to make good followers. When a leader does arise, he is not developed but forces his way up because he cannot help it. He is not the finely bred and cultivated fruit, but the occasional big wild berry—the tall stalk that no one can keep down. I have often seen traits that might have developed into leadership discouraged or frowned upon. But one thing is sure—no one ever got to a new place by following an old path. The new path, to be sure, may not turn out to lead anywhere, or may lead where

we do not want to go—that is, if it is blazed and followed carelessly. Why not give some attention to the treading of new paths? The men we read about in our histories—Napoleon, Watt, Wagner, Shakespeare, Michael Angelo—all the leaders, were not content to walk the old roads. The leadership of the city in book distribution, unsatisfactory as it has been in many ways, was leadership because it did something new. The American public library has its present status because it has done unheard-of things. If we are to look in future solely to a leadership of the fit, wherever it may show itself, let us leave nothing undone to seek it out and encourage it in whatever spot, high or humble, far or near, it may venture to raise its head.

The Future of the A. A. L. L.*

By FREDERICK C. HICKS

Law Librarian, Columbia University, New York City.

IT is a pleasure for this Association to be welcomed to New England by one of its own members, who has long been an enthusiastic advocate of the principles for which we stand, and a practical example in his own career, of successful law librarianship.** In New England we are at home because it was here that our Association was born, and because here are men and institutions true to the best traditions of our profession. Within a few miles of us is located the foremost law library in the world, the Harvard Law Library; in Boston is the Social Law Library, with a history and a record of service unexcelled in the United States; in Worcester is the County Law Library which is a veritable laboratory of law library economy. The state of Massachusetts has the distinction of being literally dotted with law libraries, and of having been first to establish a county library system. It is a matter of pride that this oldest system of public county libraries is a system of law libraries. Nearly one-fifth of the membership of this Association is drawn from New England. It had been hoped that the dean of living law librarians, John Himes Arnold, formerly librarian of Harvard Law School, might be present at this meeting so that we might do honor to him in person. A special invitation was issued to him in the name of the Association, but he was unable to accept.

*Presidential address at the 16th annual meeting of the American Association of Law Libraries, at Swamscott, Mass., June 21, 1921.

**Sumner Y. Wheeler, secretary of the Essex Bar Association.

Later at this conference, we shall have an opportunity to hear again of the great work that he has done; and it will be fitting that some message of respect and appreciation be sent to him. Of other New England law librarians still with us, there is not time to speak individually; but they will understand that the other members of the Association feel toward them only sentiments of respect and admiration. They will wish to join with us in recalling, if only by mention of their names, the work for the advancement of law and law librarianship of Charles C. Soule, Leonard A. Jones, Francis Wales Vaughan and those sages of the law, Story, Langdell, Thayer and Ames.

It would be inspiring to dwell upon the work of these men; but if we are to carry on, even so poorly, the work which they began, we must deal with the problems of the present. And these problems are many, if this Association is to realize the aims of its founders. Last year, I ventured to suggest a programme for the work of the Association. It was little more than a statement, from an examination of our records, of work already done and suggestions already made, by members of the Association; but it indicated beyond a doubt that there was and is a real need for this Association, and that much of its work still remains to be done. If we run back in memory over the last three years, including the programme of this present meeting, we see that definite contributions of permanent value have been made in several directions. In the field of law library economy there are papers and discussions on binding, on

classification of foreign law books, and on inter-library loans; and we have been directly instrumental in the preparation for sale by the Library Bureau, of two sets of guides for law catalogs, viz. subject guides and author guides. In law library history, we have to our credit sketches of the Social Law Library, the Cincinnati Law Library, and of the County Law Library system of Massachusetts. We are making a beginning this year in the biography of law librarians by two papers on two of the most notable figures which have ever been of our number. In legal bibliography we have published articles on New York, New Hampshire and Louisiana statute law; on Pennsylvania Side Reports and the local journals of other states; on the citation of statute law; on Bar Association Reports; on the history of the Case Book; and at this meeting, we are to have papers on the bibliography of naval and military law, and on the history of American legal periodicals.

TRAINING FOR LAW LIBRARIANSHIP

These are all matters for congratulation, and I believe there is still much helpful work that can be done by our Association in these several fields of law library economy, law library history, law library biography and legal bibliography. There is moreover, a new field in which this Association should exert its influence, viz. training for law librarianship. With law libraries fast growing in number, size and importance; with requirements for efficiency in general management, in service to readers, in classification and cataloging, and in nearly every phase of library economy, becoming more necessary; it is evident that some step should be taken to provide systematic training for law librarianship. Each year it becomes more difficult to find competent persons to fill law library positions. We can, as heretofore, go on training our own assistants; but while the results in many individual cases are excellent, there are many who fall by the way-side; after having been an expense rather than an asset to the respective libraries during probationary periods of several months. Much of this waste of time and money could be avoided if the process of selection could begin in the library schools. And if library schools are to make this preliminary selection for us, then law librarians must indicate to them that they wish to recruit their forces from among the graduates of library schools, and would like to have courses preparatory for law library work instituted in the schools. We can most effectively indicate our desire by applying to the schools whenever we have a position to fill. In order to find out whether this was being done, I wrote to a num-

ber of library schools, asking the question, "Do law librarians ever ask you to recommend your graduates for law library positions?" These are typical answers:—Yes, once in a while; No; Very seldom; Very infrequently; One or two requests a year. To the question, "Have any of your graduates entered law library work?" the replies indicated that very few students had entered our ranks.

What does the above information mean? Do not law librarians think well of library school graduates? Or do not library school graduates care to take up law library work? Or again, are not library schools preparing students for law librarianship? To get information on this last point, I asked the following questions:—

1. Do you give any training intended to prepare students for law library work?
2. If so, of what does it consist?
3. Would you be willing to add to your curriculum, lectures and practice work in preparation for law librarianship?

No one of the schools answered that it was giving training that it considered to be adequate preparation for law library work. In a few schools a limited number of lectures are given, and in some cases practice work is offered as an elective course. In reply to the third question, the trend of the answers was that courses would be added as soon as the demand for them was sufficient to justify specialization in law library work.

Further to gauge the general situation, I sought information from the President of the Association of American Library Schools, and from the respective chairmen of the American Library Association Section on Professional Training, and of the Committees on Library Training, and on Recruiting for Library Service. The question asked was whether any attention was being given by these bodies to training and recruiting for law library service. The replies were sympathetic to the need, but in only one case had any definite step been taken. The report of the Committee on Library Training recommends "that arrangement be made by library schools with the best facilities for each kind of work to offer occasionally courses of special training for business, law and agricultural library work." It suggests that announcement of such courses be made at least a year in advance in order to give time to those interested to make the necessary arrangements for attendance.

This, then, as far as I have been able to discover, is the situation in regard to training for law library work. Are we satisfied with it? Personally, I shall not be content until the importance of training for our work is recognized

by the best of the schools. If enough law librarians are of the same mind, and if they make known their desires, the library schools will respond.

THE FUTURE OF THE ASSOCIATION

Training for librarianship is of vital importance to our profession. Of equal importance is consideration of the immediate future of this Association. It cannot continue the publication of its *Index* and its *Journal* without a larger membership and a larger subscription list. During the last year a determined and successful effort has been made by our Committee on New Members, under Mr. Stebbins' leadership, to increase our membership. Yet the results are small compared with the possibilities. Of the total of all people engaged in law library work, or interested in it, we have less than two hundred on our list of members. From all the libraries and all the lawyers in the world, we have only two hundred and six subscribers to our quarterly publications. These subscriptions, under present conditions, scarcely cover the cost of printing and distribution, not including the cost of editing; and the total of all dues of members is insufficient to meet this latter necessary item of expense. The details of our present financial condition I leave for the report of our Treasurer and of the Committee on Index and Journal; but I ask your consideration of a few suggestions which have a bearing on the problem which confronts us.

Thus far, the membership of the Association has been made up only of those who have felt able to contribute time, labor and money, without any tangible result coming to them personally in return for their dues. Recently one of our members wrote me as follows: "I do not have the *Law Library Journal*,. . . and do not know what is transpiring among the law libraries. . . I get nothing in return for my dues." Not being a subscriber to the *Index* and *Journal*, this librarian hears nothing from the Association except when the treasurer sends out bills for dues, or when service on Committees is requested. Now I am not personally convinced that members get nothing for their dues. On the contrary, everything that the Association has done for librarianship has been dependent on the payment of these dues, and the sacrifices of time and labor that have been made by our members. We get most when we give most; yet there is a truth that should not be overlooked in the frank statement of our sincere and well-wishing member. We ought to offer something tangible to our members, and particularly we ought to make our Association more useful to library assistants. Would not more of them enter our membership if, in return

for their dues, they received the *Journal* issued separately from the *Index*? Under these conditions, would they not be glad to join with us, even if the amount of the dues were increased? These are questions which I believe should receive your attention at this meeting.

The future of the *Index* is another matter. We are all proud of it, and it would be a catastrophe to law librarianship if it were discontinued. Yet it can be continued only under one of the following conditions: the subscription list must be enlarged; or the price must be increased; or we must reduce its size; or a subsidy for it must be obtained; or it must be turned over to some publisher to be promoted purely as a commercial proposition. Which shall it be? For myself, I have faith that, if properly advertised, this valuable tool for lawyers and librarians would yield a handsome profit; and I believe that its size and scope should be increased rather than decreased. Our problem is chiefly one of promotion and advertising. The publication is so useful that every large law firm in the country would see its value if it were shown personally to the members of the firms. And every public library situated in a city where there is no law library, could add many lawyers to its clientèle if it advertised the fact that it subscribed to the *Index*. The whole problem, however, will be presented to you by the Committee on Index and Journal, and need not be pursued further at this time.

One other matter, I lay before you with considerable hesitation because action upon it is only partially within our power to take. It has to do with the relation of this Association to the National Association of State Libraries. The aims of the two associations are so similar and the membership of the latter so largely duplicates our own list, that a closer affiliation of the two would seem to be mutually desirable. If, by combining resources, duplication of expenses could be avoided, and efforts concentrated on our joint similar problems, would not the purposes of both associations be more nearly accomplished? The question is raised merely for consideration, and with the hope that, if the suggestion meets with your approval, a Committee may be appointed to confer with the National Association of State Libraries on possible methods of co-operation.

A. L. A. COMMITTEE REPORTS

Reports of the A. L. A. Committees, Publishing Board, Secretary and Treasurer for the year 1920-1921 which were distributed to members at the Swampscott Conference will not be reprinted in the proceedings. Copies are available for those who wish to have them for binding with the *A. L. A. Bulletin* for 1921.

The Swampscott Conference

“GOOD measure, pressed down, and shaken together and running over” was the order of the forty-third annual Conference of the A. L. A. as regards attendance, program, hospitality and good fellowship. Nearly 1900 registered, about one-third of whom were at the New Ocean House. Eight national associations and some local groups held over fifty scheduled meetings and many informal meetings were arranged during the week by groups of workers with colored people, hospital librarians, librarians of natural science collections, librarians of small libraries and those who wanted to hear poetry. Reports of the A. L. A. Section meetings and of the meetings of the other Associations will be given in our August number.

ADDRESS OF WELCOME

A large number of the members were present at the opening session when George Edward Woodberry welcomed the Association to New England wherein “were rooted the origins of American librarianship.” The intellectual centre of anything American, said Dr. Woodberry, is not a place, but is a convention “such as this great assembly gathered from all quarters of the land for communication of ideas and the intellectual ferment that follows.” Dr. Woodberry praised the life of the librarian, who is the trustee of all knowledge and the guardian of the book, instancing many “seemingly useless acts of kindness” on the part of librarians

which had opened life-long horizons by bringing to bear the power of books, which, “silent volleys falling incessantly on the forts of folly are the batteries of civilization.” Groups which have become nation-wide like to come back to the places of their beginnings. And men like to make pilgrimages to what were the haunts of authors who, after death, become socialized, as it were, and live approachable in men’s af-

fections and regard. And in this later day “you will better hear the silent voices of the past in the sights and sounds about you; the bells of Lynn whose music Longfellow rang in his verse; not far off Aldrich’s Lynn Terrace where he dreamed over again his Spanish voyages; northward the Marblehead beaches and headlands, where Hawthorne drank the sunshine of long summer days and the Salem streets he walked by night brooding his New England tales; and if you are adventurous, further away you may sight the “reef of Norman’s woe” or by the Beverly shore where the

AZARIAH SMITH ROOT, 35th President of the A. L. A.

road dips down nearest the beach, you may see the cottage where Lowell, looking over the luminous waves, seemed to have a second sight of Sorrento and the wide Neapolitan Bay. Such literary memories give a nobler background of the mind to the quiet beauty of our shore. But Lowell did not have the tang of salt water in his verse; his was an inland nature, and you must go past the Elmwood chimneys to the Charles

River meadows to catch the echo of that large and liberal soul, that happy nature, 'sloping to the southern side,' and beyond are Walden Pond, and Emerson, and Whittier. These poets are your hosts, hosts of your minds, and there is your true welcome."

Following, Sarah L. Arnold, dean emerita of Simmons College gave greeting from Massachusetts and paid tribute to the increasingly valuable work of librarians in satisfying men's material and spiritual needs.

An address by Dallas Lore Sharp on "The Prophet and the Poet," pointing out the need of going back into the wilderness in order to view life sanely and to "speak as one having authority" and not as one who went to college," concluded the first session, after which a reception was held in the Ball Room of the New Ocean House.

SOME ASPECTS OF LIBRARY PROGRESS

At the second general session, on Tuesday morning, President Tyler delivered her address on "Some Aspects of Library Progress," which forms the leading article in this number of the LIBRARY JOURNAL.

Following, greetings from the affiliated organizations were received: The National Association of State Libraries thru its president, Edward H. Redstone, who told the story of the long lost manuscript of Bradford's Journal as an illustration that "a good book is the precious life blood of a master spirit. . ." and expressed his conviction that: "An active, wide-awake state librarian, gathering around him the librarians of his state, can do much to awaken general recognition of the importance of libraries in a system of public education, to shape legislation, to influence public opinion and to direct the current of private philanthropy in such a way as to promote the development of the free public library, which must eventually take its place by the side of the free public school."

In the absence of William R. Watson, president of the League of Library Commissions, Secretary W. J. Hamilton, of the Indiana Commission, spoke of the aim of the library commission as the development of all libraries towards the meeting of cultural needs, especially those of the smaller communities. The League and the A. L. A. have related aims and with the backing of the A. L. A., the League can accomplish much.

Frederick C. Hicks outlined the objects of the American Association of Law Libraries, now holding its sixteenth annual meeting. This Association has never been affiliated with any other organization than the A. L. A. and will continue its work at all times in co-operation

with the A. L. A. In return, it begs the help of the A. L. A., and especially that of the Professional Training Section, and of the Committees on Library Training and Recruiting for Library Service in recruiting and training for law library service.

Dorsey W. Hyde, Jr., bringing the greetings of the Special Libraries Association, also stressed the good feeling that exists between the S. L. A. and the A. L. A., each organization complementing the other.

At a business meeting which followed, the Constitution voted at Colorado Springs was adopted and discussion of the by-laws for this Constitution was begun. The framing of the by-laws was continued at subsequent sessions (See p. 602.)

The report of the Committee on National Certification for Librarians was presented by C. C. Williamson and that of the Committee on Library Co-operation with Other Countries by Mary Eileen Ahern. These reports have been reprinted and were in the hands of those present. A summary of the certification report will be found on p. 604-606, and those of the Committee on Library Co-operation with other Countries and of the Sub-Committee on Co-operation with Latin-America will be summarized in an early number of the LIBRARY JOURNAL.

STATE PROGRESS IN LIBRARY AFFAIRS

Reports on state problems and state progress in library affairs, contributed by the presidents of state library associations present or their representatives, were received at the third session.

For Massachusetts, Harold T. Dougherty told of the Massachusetts Library Club's two years' fight to secure pensions for librarians, which so far has been without success. The Pensions Committee is now awaiting the development of a bill under consideration for the pensioning of all state and city workers. An exhibit of inexpensive magazine binding methods illustrated the report of the Committee on Binding, given in the LIBRARY JOURNAL for June 15. There are in Massachusetts 962 library workers who are members of some library club. The Massachusetts Library Club has 600 members; the Western Massachusetts Library Club and the Special Libraries Association of Boston, 90 each; the Bay Path Club, 74; the Cape Cod Club, 60; the Old Colony Club, 50; the South Worcester, 48; and the Berkshire, 35. This does not include groups formed by the Free Library Commission, which meet from one to four or five times a year.

New Hampshire reported progress and noted as the chief problems for the state the need of

more trained librarians, more interested trustees and more money.

Effie J. Lansden reported for Illinois 415 librarians from the 221 tax supported libraries members of the A. L. A. and 381 members of the State Library Association and the Chicago Library Club. Fourteen well attended regional round table conferences were held during the year and legislation for increased appropriations has been secured. In conclusion, Miss Lansden brought greetings from the state which gave Henry E. Legler and Katharine L. Sharp to the library profession and invited everyone present to the twenty-fifth annual meeting of the Illinois Library Association, to be held at Urbana, October 11-13.

Rhode Island, reported by George Lyman Hinckley, failed to pass a certification bill proposed at the last session, but has secured state aid in the payment of salaries to librarians in small libraries.

Clarence W. Sumner, reporting for Iowa, recorded the failure to pass the county library law, but an increase in appropriation for the State Library Commission. "There is in Iowa a spirit which is going to win," said Mr. Sumner, "and which aims at 100% membership in the Iowa Library Association and, incidentally, a great increase in A. L. A. membership."

Mary E. Downey told of Utah's remarkable progress in the establishment of tax-supported libraries (See L. J. Jan. 1, 1920. p. 44) and of the prospect of increasing development after the establishment of a library school next year.

LIBRARIES AND THE NATION

In an address entitled "Libraries and the Nation," Representative Horace M. Towner of Iowa, sponsor of the Smith-Towner Bill of the last Congress and of the Towner-Sterling Bill at present before Congress, reviewed the nation's illiteracy and the low degree of Americanization of our foreign-born population, recognizing the library's important part in reducing these evils. Librarians, like teachers, have hitherto had inadequate remuneration, and it is to be hoped this condition will be remedied by the representation of the library interest in the cabinet thru the establishment of a bureau of libraries under the Department of Education, proposed in the Bill now under consideration.

LIBRARY EXTENSION

Discussion of Library Extension: Its Scope and Methods at the fifth general session, a joint meeting with the League of Library Commissions, was opened by Arthur E. Bostwick in a paper on "The City's Leadership in Book Distribution," given in full in this number.

Following, Julia A. Robinson, secretary of the

Iowa Library Commission, traced the development of the idea of state-wide library service in America from Benjamin Franklin's subscription library, via New Hampshire's first town-supported library, the establishment of city branch libraries, and especially the "itinerating library" advocated by the managers of the American Lyceum in 1831, which developed into the traveling library system, inaugurated in New York State by Melvil Dewey in 1893, and became the pattern for similar systems in other states, until to-day there is a state traveling library system in over half the states of the Union. Miss Robinson went on to enumerate the different controlling boards in the various states operating traveling libraries and to discuss the achievements and limitations of this form of library extension work, and gave as the ideal for state-wide library service "city and county libraries supplying the ordinary book demands, and in addition a state department for the fostering of these libraries and the maintenance of a book collection to serve the state thru these larger units in supplying books of limited local demand. . . ."

Bringing the greetings of the National Country Life Association, which is affiliated with the A. L. A., Kenyon C. Butterfield told of ways in which the library can help to enrich rural life: by distributing vocational books, books on citizenship, books for culture and relaxation, and nature books. The rural library ought to tie up with the grange and the county farm bureau and aim at becoming a community center. "Books for Everybody" is a good slogan for the library but perhaps a better is "Everybody for Books."

Other national associations sent greetings: The General Federation of Women's Clubs thru Mary L. Titcomb, the National Education Association thru Annie C. Woodward, and the National League of Women Voters thru Mrs. H. W. Wilson.

CO-OPERATION BETWEEN PUBLIC AND SPECIAL LIBRARIES

Co-operation between Public and Special Libraries was discussed at a joint session of the A. L. A. and S. L. A. on Friday morning.

Charles F. D. Belden pointed out some of the points of similarity and difference in the respective provinces of the general and the special library; instancing the parallel case of the department store and the special shop.

R. R. Bowker in a paper read by George F. Bowerman brought out the need of co-operation between special libraries and between the special and the public library, the respective fields of which merge to an ever increasing degree.

June R. Donnelly, in discussing the training of a special librarian, pointed out that education is merely a preparation for the "conquest of one's environment" and that in planning training, one must pre-suppose a supply of educated people of good native ability. "Given this, I should, in a year's training, give all the same core of library science, including bibliography, cataloging, indexing, reference and research work. . . .taught with all types of libraries in mind. . . . In the third term I should allow differentiation in the curriculum, allowing each member of the class to choose according to his or her desires. . . .to visit places of the type that would fit his purpose: factories, banks, science libraries or museums. He should study more intensively the literature of his subject, work out real problems in obtaining information, and make a wide acquaintance with periodicals in his special field and practice digesting articles. Finally, he should be given the general problem. . . .of organizing and running a library of the type desired and work out his solution. . . ."

TO-DAY'S TENDENCIES IN BOOK PUBLISHING AND DISTRIBUTION

"To-day's Tendencies in Book Publishing and Distribution" were discussed at the sixth general session on Saturday evening. Glenn Frank, editor of *The Century Magazine*, gave his interpretation of the new temper of to-day's reading public which, while reading more and more for recreation, is at the same time beginning to give serious consideration to national and international affairs and is demanding books giving facts on which to base this consideration.

In a paper entitled "Ferments and Facts," Alfred Harcourt, president of Harcourt, Brace & Co., discussed the reading of a public which, since the war, is "drinking fully and deeply from the continental stream that had its source in Ibsen, Tolstoi and Zola, and which has become interested in the full and frank look at our civilization which these writers are taking." The public is to-day asking questions on social science, on economics, with the expectation of a higher order of factual value in things in print to help it make a fresh and searching evaluation of what such words as "democracy," "public opinion" "efficiency" and the general lingo of our industrial, economic and social life really mean to civilization. But while writers are facing new facts and following where they lead, and the public is eager to read the results of these investigations, our national book distribution problem is far from a satisfactory solution. A few books penetrate to a large market, but books of information, of fact and opinion are for sale

in not over a few hundred places altogether.

But while there is nothing in the United States to compare with W. H. Smith & Sons' European chain of two hundred and fifty stores, seven hundred and fifty main bookstalls and one thousand and substalls, there are encouraging signs. Bookstores and book departments have been started and run successfully by women, some of whom came from the library field, and there is clear evidence that good bookstores make a decent living and a little more for those who run them. . . . And a generation, just coming of age, nurtured on the school and the public library, will continue to have books in their homes, if books can easily be bought, and will help to make possible more places where books are sold—which is the great problem in the distribution of books in this country.

That the nation's fiction appetite while increasing is also becoming more discriminating was shown by Herbert F. Jenkins of Little, Brown & Co. Magazine fiction has enormously increased in quantity in recent years, some periodicals running as many as three serials, and stories written primarily for book production by writers of the first rank—Galsworthy, Arnold Bennett, Wells, Blasco Ibáñez and Joseph Hergesheimer—may now be first read in popular periodicals. Passing in review the favorites of the last twenty-five years, from "Quo Vadis" to "Main Street," Mr. Jenkins showed Mark Twain, Kipling, H. G. Wells and even Conrad holding a high place among the books that reach the multitude.

In discussing next steps in extending the use of books so as to realize "everyone for books," Frederic G. Melcher pointed out that book distribution is still a young enterprise and one with a great future before it. Fields still to be developed are children's reading, religious reading and that of literature painting the new vision of the social order. Despite the number now engaged in book-distribution there is a great wealth still to tap for this work, so long as a representative average per capita contribution to library support is about fifty-two cents a year. Thru strong co-operation between all who are interested in the distribution of books shall we see "evermore new light break forth from the printed word."

LIBRARY REVENUES

Library revenues formed the topic of discussion at the first meeting of the Council, held on Tuesday evening, June 21st. William F. Yust opened with a summary of the effects of recent legislation on library revenues, to be given in full in our August number.

William J. Hamilton then spoke in the affirmative on the question: "Should Public Library Boards have Power to Levy the Library Tax?" The Board of Trustees has the greatest responsibility for the library and the most intimate knowledge of its needs, its members are apt to be selected from those having an interest in the intellectual welfare of the community, rather than from among the politically inclined, and may be safely trusted not to abuse any powers given them. Regarding the advisability of stating a maximum beyond which the library rate may not go, Mr. Hamilton thought it might be necessary to specify a maximum, if legislatures are to be persuaded to grant levy powers to boards. Preferable to the fixed appropriation is the millage tax, which will automatically increase the library income as the city grows and valuations increase. Again, the library board is best equipped to determine what tax is needed to render good library service, service being the primary responsibility of the library board and not the guarding of the city treasury. Again, the library board, which is responsible for dealing with the staff, should be able to control the funds which may be needed. City councils have not always shown themselves ready to appreciate the need of paying good salaries to trained people from outside the community. Replying to the statement by a western librarian that "a library board is a mere buffer anyway, which, despite high personnel and good intentions, cannot get results that an official governing body can," Mr. Hamilton pointed out that enlarged powers, such as the right to fix the library tax rate, inevitably lead to greater interest, broader vision and more strenuous efforts to get results, and that in Indiana recent rapid development is proof that library boards are not mere buffers, but active agents with powers and privileges, as well as responsibilities. Regarding the legality or constitutionality of a tax levied by a library board Mr. Hamilton quoted Judge Wildermuth as reported in the LIBRARY JOURNAL for February 1st.

In his paper on the results of the Ontario library law, W. O. Carson differed from Mr. Hamilton on the question of the desirability of a millage tax, explaining that since libraries serve people, the tax ought to depend upon the number of people to be served and not on the number of dogs or the amount of property owned by the community. This does away also with the consideration of the great variations in bases of assessments found thruout a territory, where, as a general rule, the smaller the place, the smaller the assessment in proportion to population. Ontario last year estimated that a library

with an income of 50 cents per capita from taxation for ordinary expenditure could give a good quality of service based on a standard of four books per capita in cities and five books in smaller places. The Public Libraries Act of 1920 granted this; furthermore, power was unanimously granted the council to increase the rate and to make a special grant. The average library under the old tax could claim about thirty cents per capita; the increase under the new law of between sixty and seventy per cent can be used largely for books and personnel, which are the two most important and, at the same time, most variable items in library expenditure. A per capita tax conveys a definite meaning to voters and legislators, whereas a millage does not, and it is anticipated that when a higher per capita income is required, it will be granted with the same good will which characterized the attitude toward the fifty cent tax.

Samuel H. Ranck showed how much a law would affect some of our libraries. In Michigan, for example, only six of the twenty-four cities having a population of ten thousand or more have a per capita tax of more than 50 cents; Grand Rapids and Detroit have much more, and rural districts less. A questionnaire sent to one hundred libraries in thirty-three states, asking what amount per capita for general maintenance is appropriated, showed that the average is rather over 53 cents. South of the Mason and Dixon Line there is but one city with more than fifty cents per capita, but many cities in the North have considerably more than a dollar, East Cleveland ranking highest with \$1.46 per capita, Gary (Ind.) having \$1.24, and Newton (Mass.) having \$1.22½. In Pennsylvania, however, only one city, Pittsburgh, has more than 50 cents, and in Lancaster the rate is only a little more than five cents.

Discussion brought forth the suggestion that the A. L. A. should make a thoro study of library incomes from all sources: endowments, special funds, city taxes, etc., and in the light of these findings make a definite recommendation as to an adequate per capita tax.

RESOLUTIONS ADOPTED

In submitting its report, the Committee on Resolutions strongly recommended that in the future this Committee be appointed early each year, so that as many resolutions as possible may be submitted to it in writing in advance of the annual meeting, which is the only way in which sufficient time may be obtained for the proper resolutions to go before the Association. The resolutions adopted were:

Resolution of deep sorrow for the severe illness of John G. Moulton of Haverhill, President

of the Massachusetts Library Club, at whose initiation the A. L. A. met at Swampscott.

Regret for the absence, due to illness, of R. R. Bowker, one of the founders and most loyal members of the Association.

Re-affirmation of the Association's endorsement of the Smith-Towner Bill, passed at the Asbury Park meeting in 1919, and urging upon the President and Congress that a government division devoted to the stimulation of library activities be created.

Endorsement of the general principles of re-classification, as applied to librarians, in the bills now before Congress for the reclassification of Government Civil Service, and urging upon Congress the immediate passage of one of the measures now before it for the reclassification of the Government Service.

Third endorsement of Bills S. 61 and H. R. 4385 for the establishment of a clearing house at the National Capital, which should result in more intelligent distribution of government information.

Pleasure at the prospect now seemingly assured of a National Archives Building at Washington.

Greetings to the National Association of Book Publishers, established last year, and expression of hope of much constructive co-operation between the two Associations.

Endorsement of the plans of the National Dante Committee to commemorate the sixth centenary of the death of Dante.

Hearty appreciation of the Association to all members, too numerous to mention, who have contributed to the undoubted success of the Conference, and expression of appreciation to all committees, organizations, institutions and municipalities which have arranged for the comfort and entertainment of the members of the Association. Among these are to be specially mentioned the Massachusetts Library Club, its Local Committee under the chairmanship of Mr. Charles F. D. Belden, its Transportation Committee, and its Hospitality Committee; the City of Cambridge; Harvard University; the Massachusetts Institute of Technology; the Board of Trustees of the Boston Public Library; the Free Library Commission of Massachusetts; the trustees and librarian of the Cary Memorial Library of Lexington; the trustees and librarian of the Concord Public Library; the Rotary and Kiwanis Clubs of Lynn; and the management of the New Ocean House.

On a communication from the Catalog Section regarding the importance of a sufficient staff to accomplish the prompt preparation of L. C. catalog cards, it was, on the motion of W.

Dawson Johnston, resolved: That the Secretary be instructed to transmit copies of the communication from the Catalog Section to Senator Thomas Sterling, chairman of the Joint Committee of Congress on Civil Service, and to the Hon. Herbert Putnam, Librarian of Congress, with the endorsement of the Council of the American Library Association; and that the Executive Board be asked to consider the advisability of sending a representative to Washington to urge such action as will enable the Library of Congress to compete successfully with other libraries and with business houses in securing capable assistants. (Coupled with the resolution is the suggestion that it be given the widest possible publicity, especially thru the state library associations.)

Attention having been drawn to the fact that a trained library worker in the New York Public Library had been deported under the contract labor law, it was on the motion of Mr. Ranck adopted that: Whereas, the A. L. A. has learned of the deportation under the contract labor law of a trained library assistant consequent upon a ruling by the Department of Labor that such assistants are to be classed as "skilled labor," and whereas, it is the understanding of the A. L. A. that trained library assistants are "professional workers" within the meaning of the exemption under the law of such persons from its provisions, and whereas, library assistants have been ruled to be "professional workers" by other Government departments; Resolved, therefore, that the A. L. A. respectfully and solemnly protests against any classification that places librarians in any other rank than that of professional workers, and earnestly requests that the Department of Labor will revise its classification to correspond with the facts of the case.

By a vote of 14 to 5, the following was, on the motion of Miss Ahern, adopted, that: Whereas, The members of the American Library Association have had full demonstration of the pain and pinch that belongs to war and the increased cost of all necessities, both personal and professional, caused thereby; and whereas, the exigencies of international conditions brought about by the cost of war are appalling from every standpoint; and whereas, we believe the example of the United States in this matter will be followed by other nations, therefore, be it resolved, That the American Library Association urges upon the President and Congress the initiative movement leading to a reduction of armament at the earliest possible moment; and be it further resolved, That a request be made by the members of the American Library

Association to their individual Congressmen for such action and that a record be made of the replies.

REVISION OF THE CONSTITUTION

The Committee on the Constitution (Henry N. Sanborn, chairman, Matthew S. Dudgeon and Malcolm G. Wyer) presented to the Association the Constitution voted on at Colorado Springs, which was unanimously adopted and which, accordingly, becomes the new Constitution of the A. L. A. Time did not permit of a further revision of this newly adopted Constitution proposed by the Committee, and the Association devoted three short business sessions to the consideration of by-laws for the Constitution just adopted.

The main provisions of the by-laws are:

Sec. 1-4. *Annual Dues.* For individuals receiving the *A. L. A. Bulletin*, except the *Handbook* and *Proceedings*, two dollars; for libraries and other institutions, five dollars, including the *Bulletin*, the *Handbook* and *Proceedings*; for all new members of the Association and all who rejoin, an initiation fee of one dollar; for members of the Association attending the annual conference, except new members who have just paid initiation fee, a registration fee of one dollar; the Executive Board to fix the annual dues of individual members receiving the *Handbook* and *Proceedings*; sustaining memberships to be twenty-five dollars; life memberships, fifty dollars; chapter dues five dollars, plus five cents for each member of the chapter in excess of fifty.

Sec. 5. *Unpaid Dues.* Members whose dues are unpaid on July 1st of each year, and who continue such delinquency one month after notice of same, to be dropped from membership. (The former provision in this section that "Any person renewing membership shall pay all arrears of dues or dues required of new members" is dropped in the new By-Laws.)

Sec. 6. *New Members.* Each new member to be assigned a consecutive number in order of joining. A delinquent member rejoining and paying arrears of annual dues to receive his original number.

Sec. 7. Fiscal year to be the calendar year.

Sec. 8. *Nominations.*

(a) Six months prior to the regular meeting of the Association the Executive Board to appoint a committee of five to nominate at least three candidates for each elective position to be filled.

(b) The report of the Nominating Committee to be published in the *Bulletin* at least three months prior to the regular meeting. . . . The Nominating Committee also to include on the ballot other nominations filed with the Sec-

retary by any fifteen members of the Association at least two months before the regular meeting.

(c) Six weeks prior to the regular meeting the Secretary to mail a copy of the ballot to members of the Association.

(d) Ballots received by mail not to be opened until after balloting at the regular meeting. Election to be held at the regular meeting, at which ballots may be cast by any members in attendance whose ballots by mail have not already been received.

(e) (The proposal of the Committee that "no person shall be nominated as president or first or second vice-president for two consecutive terms" was rejected.)

Sec. 9. *State Representation in Council.* Each state, provincial, territorial association becoming a chapter of the A. L. A. to be entitled to one delegate in the A. L. A. Council. Delegates to be elected at meetings of the chapters and to serve until the next election of officers of the Association. . . .

Sec. 10. At least two meetings of the Council to be held annually.

Sec. 11. *Chapters.* State, territorial or regional chapters of the A. L. A. may be established by the Council at the written request of ten members of the A. L. A. residing in the territory within which the chapter is desired. Local groups of fifty or more members of the A. L. A. within such regional or state division may in the same way become local chapters registered as divisions of the regional state or territorial chapters. Chapters may adopt their own constitution and by-laws if they are harmonious with the A. L. A. Constitution and By-Laws. Chapters may admit members who are not members of the A. L. A. These members shall not be counted in determining the apportionment of delegates to the A. L. A. Council. . . . Chapters may be dissolved by the Council for good and sufficient reasons. . . .

Sec. 12-16. *Sections.* These sections, which are the same as in the old By-Laws, adopted.

Sec. 17. *Publications.* The Executive Board shall administer all publishing activities of the Association, and shall appoint an editorial committee of five to advise regarding material for publication, and to serve until their successors are appointed.

Sec. 18-19. *Committees.* A committee on committees appointed by the Council shall recommend to the Executive Board appointment or discontinuance of such committees . . . as the needs of the Association may require. The committee on committees shall define the duties of all committees so to be appointed. All committees

shall be appointed annually and hold office until their successors are appointed and qualified to take office. (The function of the committee on committees is purely advisory.) The Executive Board at each annual meeting shall appoint a committee of three on resolutions, which shall prepare and report to the Association suitable resolutions. (The Constitution, Sec. 24, provides that no resolutions other than votes of thanks shall be adopted by the Association without reference to the Council.)

Sec. 20. *Votes by Correspondence.* Approval in writing by a majority of a board or committee shall have the force of a vote, provided not more than one member dissent. If one member dissent, the vote shall not be effective until such member has had opportunity to communicate his views to the other members and a second vote has been taken. If two members on the second mail vote dissent, the action shall fail.

Sec. 21. Privileges and advantages of A. L. A. conferences shall be available only to those holding personal membership or representing institutional membership, or to members of affiliated societies.

Sec. 22. The Executive Board may arrange for regional meetings to include such chapters or library associations as it sees fit to group.

INFORMATION SERVICE

The great size of the conference made especially valuable the information service of the A. L. A. Publicity Committee (Willis H. Kerr, chairman) which issued two bulletins, and still more so that of the Sub-Committee on Local Information which, at the sign of the blueprint reading **INFORMATION**, maintained its service in four regular shifts daily. There were something like fifty persons connected with the booth, some of whom served for one period, others for several, according to the time at their disposal. There was hardly room for four persons at a time behind the counter, so that in the busiest hours there were one or two running errands.

Particular effort was made to record the most distinctive information asked for, with a view to studying for improvements at subsequent conferences. It is likely, then, that the Committee, which it is planned to call together early in the autumn, will prepare a report containing general specifications for convention facilities. Mrs. Allen Chamberlain (a non-librarian volunteer), who was in charge of the booth, already has many suggestions which will make a good beginning for the report. It is obvious, for example that, if in registering at the convention headquarters, the delegates were instructed to give not only their name and home address, but also their convention address and to note their

immediate interests and the names of persons they would particularly like to meet, this would be a means of developing the personal and conversational feature of the convention, which to many people means more than the regular sessions.

RECREATION

Scarcely less wide in scope than the deliberative sessions were the recreational features of the Conference. Arrangements were made by the officers and executive committee of the Massachusetts Library Club, assisted by various sub-committees, the active heads of which were Harold T. Dougherty, Charles F. D. Belden, Edward H. Redstone and George Winthrop Lee.

On two afternoons during the week several hundred librarians made a motor trip to Lynn, Nahant, Marblehead, Salem and other points along the North Shore, by invitation of the Local Committee, the Lynn Chamber of Commerce, the Lynn Rotary Club and the Kiwanis. On Thursday there was an all-day outing by automobile to historic Lexington and Concord, where local committees showed the various points of interest and provided refreshments for the visitors, then on to Cambridge, where the time was divided between the Widener Library and supper, and, finally, an evening reception and literary entertainment at the Boston Public Library, by invitation of the Public Library and the Massachusetts Library Commission.

After several selections by the Footlight Orchestra under the conductorship of Charles F. Manney, Librarian Belden opened the program, presenting Governor Cox, who extended the Commonwealth's greetings and Mayor Peters, who gave greetings from Boston. The Rev. Alexander Mann, president of the Boston Public Library and Board of Trustees, then introduced Robert Frost and Josephine Preston Peabody, who read from their works, and Joseph C. Lincoln, who spoke informally in humorous vein. The Harvard Alumni Chorus, under the directorship of Malcolm Lang, also gave several very enjoyable numbers.

Boston was again visited on Sunday, when Trinity Church, of which Dr. Mann is rector, extended a special invitation to the A. L. A. A large party visited the Boston Museum of Fine Arts in the afternoon, spent the night in Boston and several hundred went thence to Plymouth on Monday, half by automobile and half by boat, returning in alternate manner. On Tuesday ninety-seven set off for a week's post conference trip in the White Mountains, while many remained in Boston to visit libraries and other points of interest under guidance of the local committees.

National Certification and Training*

STANDARDS may be secured and maintained by law in some professions almost from the beginning, while in others it is necessary for a long period to rely on the voluntary action of the professional group. In medicine, law, dentistry, and in general in those professions in which the danger to the public from inadequately trained and incompetent practitioners is easily demonstrated, certain minimum standards are usually embodied in state law without difficulty. On the other hand, in professions in which the danger to life, health, or property resulting from incompetence, either relative or absolute, does not make a popular appeal, proper standards may have to be secured and maintained for a long period by the voluntary action of professional organizations."

Since library work is such a profession, emphasis must be laid, for the present at least, on voluntary rather than compulsory methods. It is to be hoped that legislation will eventually embody any workable system of standardization, in this case the certification of librarians, but legislation preceding the creation of such standards would be likely to work more harm than good.

When the state of Wisconsin recently passed a law requiring high schools to employ librarians with a certain minimum of technical training, it was found that comparatively few persons were able to qualify. The same situation would probably recur if proper standards were to be made applicable at once to any except the head librarians in the larger cities. After the voluntary system has been in operation a few years, its standards can gradually be made compulsory as local conditions permit.

Since qualifications for professional library work are essentially the same in every part of the country it should not be difficult for a National Certification Board to set up standards for the entire country, and for that same reason it would be advisable for the Board to organize advisory committees in various sections of the country to assist in the application of these standards. They would keep the National Board closely in touch with local conditions in all parts of the country, help to bring the attention of state and local associations to the work of the Board, and in particular be of the greatest assistance in securing the adoption of national standards by state and local authorities.

*Summary of the report of the Committee on National Certification presented at the A. L. A. Conference at Swampscott, June 21, 1921.

The report of a special committee appointed last year by the Executive Board recommending the establishment of a National Board of Certification for Librarians, which was adopted by the Colorado Springs Conference, has formed the basis of the study given the subject by the present committee.* *

The American Library Association by its action then put itself definitely on record in favor of national certification and the use of the accrediting device to secure professional progress and progressive efficiency in library service, but the work of formulating standards and financing and organizing the Certification Board has still to be undertaken. A Certification Board would require an annual income of at least \$10,000, without which it would be unwise, in the opinion of the Committee, to proceed with the organization of the Board.

In the meantime, the Committee has drawn up a tentative scheme of certification illustrative of what the Board may eventually adopt.

CLASS I

Education: Same as for Classes II and III.

Experience: Notably successful experience of at least ten years in library administration or in professional library work requiring special technical skill and involving considerable responsibility.

Types of Positions to Be Filled by Holders of Class I Certificates: Chief librarian, and occasionally assistant librarians, of large libraries—municipal, state, university, college, endowed libraries, etc.; head of department in large libraries, where position requires special technical qualifications, or broad knowledge of library work, with supervisory or administrative responsibilities; directors of library schools and the successful professors and instructors in library schools; officials of state library commissions.

CLASS II

GRADE A. Education: (1) Graduation from approved college, with reading knowledge of at least one modern language other than English; and (2) not less than one year's successful study in an approved library school, with recommendation of school faculty.

Experience: Not less than five years' successful experience after taking library school course, except that one year of approved specialized or advanced study may be substituted for two years of the experience required for Class II certificate.

GRADE B. Education: (1) Not less than one year of successful study in approved college, or the equivalent, including reading knowledge of at least one modern language other than English; (2) one year's study in approved library school, with recommendation of school faculty; or passing of examination in library economy, and such other tests as may be prescribed by Certification Board.

* *C. C. Williamson, Chairman; James F. Hosc, Dorsey W. Hyde, Jr. (acting in his personal capacity and not as president of Special Libraries Association), Cornelia Marvin, Everett R. Perry, Josephine Adams Rathbone, Julia A. Robinson, Azariah S. Root.

Experience: Ten years' successful experience, less one year for each full year of study (beyond the first year) in an approved college, and for one year of study in an approved library school.

Types of Positions: Head of public libraries in smaller cities, smaller state libraries, less important college and university libraries; assistant librarians in such libraries; heads of departments in libraries of all sizes; branch librarians; reference librarians; librarians of important school libraries; heads of important special libraries; teachers in library schools.

CLASS III

GRADE A. Education: (1) Graduation from approved college, with reading knowledge of at least one modern language other than English; and (2) not less than one year's successful study in approved library school, with recommendation of school.

Experience: None required.

GRADE B. Education: (1) Not less than one year of successful study in approved college, or equivalent, including reading knowledge of at least one modern language; and (2) one year's successful study in approved library school and recommendation of school faculty; or, passing of examination in library economy and such other tests as may be prescribed by Certification Board.

Experience: None required.

Types of Positions: Professional assistants in all departments; heads of small libraries; heads of minor departments; branch librarians of smaller branches.

CLASS IV

GRADE A. Education: Four-year course in approved high school; instruction in approved training class or other approved training agency, as may be required by the Certification Board.

Experience: None.

GRADE B. Education: Four-year high school course, or equivalent to be determined by the Certification Board; and passing of examination in library technique and such other tests as may be prescribed by the Certification Board.

Experience: At least one year of approved library work.

The distinction between the three classes of professional certificates is based primarily on successful experience, professional achievement and demonstrated fitness for some branch of professional library work. A full college course or its equivalent is the presumed minimum of general education desirable for the three classes, after a reasonable period has elapsed in which to adjust library schools and library service to the higher standards now demanded in library work of professional grade.

College graduates with approved general library school training would enter Class III automatically on the recommendation of the library school. Library school graduates offering less than a full college course would also enter Class III but would not be eligible for advancement to Class II in as short a time as those who enter with a college degree. Into Class III, Grade B, persons with no college study and no library school training could enter if they satisfy the Board that they possess the approved equivalent. Class IV provides a sub-professional certificate for trained clerical workers,

and is intended to give conspicuous recognition to the distinction between the professional and clerical types of library work. The plan of giving the trained clerical worker a recognized place in the certification scheme is expected to have the effect of making that the minimum qualification which will satisfy even the smallest library, without also making it the final goal.

SPECIAL CERTIFICATES

In addition to the three classes of professional certificates a group of special certificates should be provided for, and in the beginning should probably be at least equal in rank to Class II certificates, and call for special qualifications besides those required for admittance to that class. A special certificate in cataloging would carry with it a guaranty of thoro general and technical training, with special training in cataloging and a period of successful work long enough to demonstrate ability to give satisfactory service in positions of responsibility requiring exceptional skill. Certificates for high school work, children's work, and business library work are other types that suggest themselves for first consideration.

APPLICATION TO LIBRARIANS NOW IN SERVICE

After the national certification system is well launched, which can hardly be before another two or three years, the Board will be confronted with the problem of classifying and certifying librarians now in service, and of classifying and accrediting training agencies, since entrance to the system will from the start be partly thru the library schools. The system, while proposed primarily to apply to those entering library service in the future, should also bring into the system as soon as possible the larger number of workers now in service. The procedure of the Board may be somewhat as follows: After a system of certification has been formulated and adopted, it will be given wide publicity and carefully explained. Each library worker will then make application to the Board for the certificate to which he considers himself entitled in view of his present work and responsibilities, or will simply apply for certificate, leaving the matter of class entirely to the Board. The blanks provided would ordinarily give the Board the information necessary to pass on the application; in doubtful cases it would seek the assistance of properly constituted advisory committees. No applicant now in service would be subjected to examination other than the statement of facts submitted in making formal application for certification. It is believed that each worker should be accepted and certified on the basis of what he is now doing and not be made to suffer any disadvantage for lack of formal technical training.

CERTIFICATION A HELP IN RECRUITING

It is expected that the setting up of the certification system will help rather than hinder recruiting. The fixing of standards, by fostering professional spirit and increasing efficiency, should raise salaries and attract more and better recruits which improved and enlarged training agencies will bring into the certification system and relieve the existing shortage of competent workers.

SALARIES

Standardization of salaries to correspond with standard grades of professional rank will not come within the scope or powers of the Board, altho it is probable that in the course of time each class of certificate will come to stand for a definite range of salaries. A Class III certificate, for example, might stand for a salary of \$1,500 to \$2,400; a Class II for \$2,000 to \$4,000; and Class I, \$3,000 and upwards.

Salaries for the different classes of certificate holders would necessarily overlap, due to local conditions. In a final word the Committee calls attention to the importance of establishing the Board in such security that it may be able to maintain a consistent and independent policy and program over a long period of years, and to deal without fear or favor with all present and future library organizations as well with all other professional and educational organizations having any interest in standards of library service and training.

A Board incorporated by Congress or one of the states would be in such a position and still sufficiently amenable to the real opinions and desires of the library profession. The membership of the Board, as outlined by last year's Committee, would include nine representatives, five to be elected by the Council of the A. L. A., one representing a public library with a training class, one a small public library, one a state or federal library, one a college or reference library, and one with library relations not specified. The four other members were to be elected by the Council upon nomination by each of the following organizations: the Association of American Library Schools, the League of Library Commissions, the National Education Association, and the Special Libraries Association. The present committee endorses this plan in principle, but asks whether it would not be advisable to bring in also a representative of institutions primarily engaged in the work of professional education in general, since many of the library schools are now more or less closely affiliated with universities, and the tendency is clearly in that direction. The presence of a representative of the American Association of

Universities or the National Association of State Universities might prove of great assistance, and room might be made for such a member in a board of nine by omitting the League of Library Commissions, since the interests represented by the commissions are fully cared for by other members of the Board.

This form of organization is not of primary importance, because the Board's constitution or articles of incorporation would naturally provide a workable method of changing its composition and machinery to conform to changing needs and conditions.

The Committee recommends to the Executive Board of the A. L. A. the appointment of another temporary Committee (1) to seek financial support, (2) to prepare articles of incorporation, and (3) to proceed with the organization of a Certification Board whenever funds are available.

May Seymour

August 31, 1857—June 14, 1921

ONLY those in the inner circle will realize how great a loss the profession has met in the death of May Seymour. She was so insistent on keeping herself in the background that few realized the extent or value of the admirable work she has been doing for 34 years.

She was a prominent graduate of Smith College in the 2d class, 1880, and was perhaps the first to matriculate in the first library school at Columbia. She took in this school the same foremost place that she has held in every position.

Except for a few months spent in helping to organize the Osterhout Library in Wilkes Barre, she has worked constantly as my personal assistant for 34 years. She went to Albany April 1, 1889, in charge of classification. During her 17 years in the State Library no member of the Library School faculty was more interested or efficient in developing the new school. Her unusual ability very soon won her appointment as secretary's assistant in the Regents' office which placed her next to me as the executive officer of the University of the State of New York. Beside her work in the library and school, her marvelous mind very quickly grasped the broader problems of the University, and no person, of several hundred on my staff during those 17 years of re-organization, helped me more, not alone by loyal co-operation and service, but in practical suggestions based on thorough study and most unusual breadth of comprehension of the great educational problems of the Empire State. She worked with me constantly as State director of education for the Chicago World's Fair. She was

the editor and executiv for the A L A catalog which is a monument to her ability and industry. She soon relieved me of most of the work of the successiv editions of the Decimal Classification, and for the last 17 years has been the responsibl editor, doing all the work, coming to me only for occasional consultation. She had recently completed the 10th edition. This spring the long talkt of Abrijd D C was publiisht and she had sent the last ms with instructions to print only a few days befor her deth.

She shared fully my enthusiasm for simplifying English spelling, and for the introduction of decimal weits and measures. She shared with Mrs. Dewey and me, mor than anyone else, in formulating the ideals and working plans for the Lake Placid Club. 15 years ago, soon after I left Albany, she came to Placid, and has from that time livd with us like an own sister, and yet more efficient than any salaried officer.

In my 70 years experience I can recall no woman with a finer intellect, or with a loftier character. By birth and training pre-eminently a scholar, she had an impatience of inaccuracy, or mental sloppiness or indolence that made her a terror to the incompetent. Many very able peopl never knew her wel enuf to realize her unusual qualities, but those who did, found bak of that somewhat prim exterior and the critical mind, a welth of qualities of which they had litl dreamd.

MELVIL DEWEY

Books Popular in May

The six fiction titles most in demand in the public libraries during May, according to Frank Parker Stockbridge's statistics compiled for the July *Bookman*, are:

Sinclair Lewis. Main Street. Harcourt.
Zane Grey. The Mysterious Rider. Harper.
Rose Macaulay. Potterism. Boni.
Ethel M. Dell. The Top of the World. Putnam.
Gertrude Atherton. The Sisters-in-Law. Stokes.
Floyd Dell. Moon-Calf. Knopf.

In general literature the books most in demand were:

H. G. Wells. The Outline of History. Macmillan.
Margot Asquith. Margot Asquith: An Autobiography. Doran.
Edward Bok. The Americanization of Edward Bok. Scribner.
Robert Lansing. The Peace Negotiations. Houghton.
Mrs. Thomas Bailey Aldrich. Crowding Memories. Houghton.
Frederick O'Brien. White Shadows in the South Seas. Century.

During the same month the best sellers in fiction, shown by special reports from seventy-four booksellers in fifty-two cities compiled for the July issue of *Books of the Month*, were:

Sinclair Lewis. Main Street. Harcourt.
Dorothy Canfield. The Brimming Cup. Harcourt.
Eleanor Porter. Sister Sue. Houghton.
Zane Grey. The Mysterious Rider. Harper.
Coningsby Dawson. The Kingdom Round the Corner. Cosmopolitan.
Hull. The Sheik. Small.

And the six best sellers in general literature were:

Frederick O'Brien. Mystic Isles of the South Seas. Century.
H. G. Wells. The Outline of History. Macmillan.
Robert Lansing. The Peace Negotiations. Houghton.
Mirrors of Downing Street. Putnam.
Robert W. Service. Ballads of a Bohemian. Barse.

German Periodicals of the War Period

AT the meeting of the College and Reference Section at Swampscott on June 24th the recommendations of the Committee on Importation of Foreign Periodicals were adopted. Libraries wishing to follow the recommendations of the Committee will find them set forth in full in the printed report presented at the Conference.

The recommendations are, in brief, that co-operating libraries send to the Institute for International Education, 419 West 117th Street, New York City, by July 15, or as soon thereafter as possible, two lists, each in duplicate, typewritten on sheets of standard size (8½ by 11). The first list should record the German periodicals for which the library has incomplete files for the war period. Each title should head a separate paragraph; below the title should appear, in each case, the name of the library and a statement that it lacks certain years or volumes with a detailed record of the separate issues needed to complete its files.

The second list should contain, in similar form, the record of German periodicals for the war period held in duplicate and available for exchange with other American libraries or with German libraries that are willing to contribute from their duplicates toward completion of American files.

H. M. LYDENBERG, *Chairman*
J. T. GEROULD
WILLARD AUSTEN

THE LIBRARY JOURNAL

TWICE-A-MONTH

JULY, 1921

IT was indeed the banner conference. No previous record had approached one thousand five hundred and twenty-five advance registration, nearly nineteen hundred total registration, an attendance of fifteen hundred from day to day at several of the general sessions, a final session with nearly a thousand present and a convocation at which there were more than fifty different sessions of the several organizations represented. It is interesting to note that the banner attendance has been reached each time at Atlantic shore conferences—Magnolia in 1902 with one thousand eighteen, Asbury Park in 1916 with one thousand three hundred and eighty-six registered. Cleveland sent two special cars with over sixty loyal supporters of president Tyler whose leadership during a difficult year and whose vigorous handling of convention sessions won general praise for her as an executive. No special "key note" was struck at this conference nor were the papers so salient or polemic as to provoke discussion which indeed was difficult in so large meetings. Rather it was a conference of harmony and good will in which dissensions over the Enlarged Program or the Constitution were happily forgotten. The Constitution was finally adopted, tho a new scheme for further amendment was simultaneously presented. The New Ocean House won golden opinions from the six or seven hundred whom it crowded into its rooms as well as from the many hundred more for whom it provided meals. Boston outdid itself in hospitality, providing each member with abundant descriptive literature, especially the condensed guide for which local librarians co-operated under the editorship of Mr. Seaver of Woburn, and the list of one hundred and seventeen special libraries which invited inspection. For the Paul Revere ride passing thru Cambridge on Harvard's Commencement Day, more than five hundred automobiles, many provided by library trustees of Boston and adjoining towns carried in relays nearly fifteen hundred delighted people thru the historic and literary scenes of Lexington and Concord—a day fitly rounded by the delightful reception in the illuminated court of the Boston Public Library. Never, never was there such a conference of the A. L. A. as this.

* * * * *

FIFTY and more meetings within four working days, each with crowded programs,

proved a plethora inviting mental indigestion and perplexed even more than heretofore those conscientious members who wanted to hear everything they ought to hear. The A. L. A. authorities have keenly appreciated this difficulty, but have been powerless to remedy it. President Hicks speaking to the law librarians, made the happy suggestion that the law and state librarians might usefully come together, for these two associations practically duplicate personnel and have most subjects, notably legislative reference bureaus, in common, while state libraries which like New York are really also library commissions find this class of relationship covered in the League of Library Commissions. There are other special fields in which there is duplication of personnel and subjects of discussion. The Association of Library Schools, meeting on Monday morning at Simmons College, the only library organization behind closed doors, covers much the same ground as the Professional Training Section of the A. L. A.—except for its decisions as to the recognition of other library schools, a question of standardization which should be decided by the A. L. A. committee rather than by the schools themselves—and would perhaps be the gainer by open discussions. Another suggestion which has found some favor is that the A. L. A. Conference proper should be biennial instead of annual and that the alternate years should be given to special meetings held at a place and time to be designated by the A. L. A. Executive Board in the general interest. Incidentally, it is becoming most difficult to find any single hotel which can accommodate the present attendance and furnish rooms for special meetings—the latter a difficulty which proved very serious at Swampscott where considerable numbers were excluded from their own special meetings for lack of room, while in the larger cities, which accommodate such vast throngs as the N. E. A. or the Christian Endeavor Society bring together, it is extremely difficult to provide for section meetings in reasonable proximity to each other.

* * * * *

AMERICAN library schools have sent forth their graduates, as library missionaries, even to the ends of the earth, and these are to-day doing great service in the Scandinavian countries, in the new republics of Eastern Europe

and in such older countries as China and Japan. Naturally, in the converse, this country should welcome students and library helpers from anywhere in the world. Unfortunately the Department of Labor has thrown a wrench into the machinery of international library relations by ruling that a library worker from New Brunswick who had come here to take a position offered her in the New York Public Library must be deported under the Contract Labor Law, altho this law specifically exempts members of professions. Two vital questions are raised by this outrageous decision in a case which has been pending for some months and should therefore have had deliberate attention. The contract labor law reaches a *reductio ad absurdum* in this meticulous application of its provisions. But beyond this is the question whether the library calling is or is not a profession. It is well that the A. L. A. at the Swampscott conference, accepted the challenge of the Department of Labor, and if it cannot obtain a reversal from this Department, under the present administration, it should fight out the issue if necessary to an ultimate decision in the Supreme Court. It is to be hoped that the trustees of the New York Public Library, of which Elihu Root is an honored member, may stand with the A. L. A. in making this fight in its own behalf and in behalf of the profession.

* * * * *

OUR national library, which in scope of service and efficiency of operation is foremost, and in size is third, in the world, with the advantage of including the Copyright Office, thru which all copyrighted works must be deposited, for its shelves, needs both for library purposes and for copyright record the best of cataloging

work. Its catalog cards then serve a third and not less important purpose in furnishing at cost of duplication to libraries thruout the country the standard Library of Congress cards which give co-operatively, to the smallest library the best possible catalog material, thus saving the immense expenditure involved in doing the same work in a thousand different libraries. The Library of Congress has suffered, not least in its cataloging division and in the Copyright Office from the mistaken parsimony which refuses to recognize, that especially in competition with present business demand, technical skill must be fairly if not highly paid, and the Catalog Section of the A. L. A., backed by the Council, has done well to ask the attention of Congress to this matter, so vital to the library interests thruout the country. Unfortunately, Congress is unlikely to give attention at this session to any other questions than the tangles of tariff and tax issues which are perplexing it; but it is to be hoped that in the reclassification measure which must sooner or later have its attention such needs as those of the Library of Congress may receive careful and adequate attention. Mr. Leffingwell, late assistant-secretary of the Treasury, has pointed out that the policy of employing fifty clerks at a thousand or so a year instead of a ten thousand dollar official who can organize the work under him so that twenty-five clerks at higher salaries could do better work for less money is equally contrary to efficiency and economy. It is a national scandal that such posts as that of the Librarian of Congress and the Registrar of Copyright are not more adequately paid and that these officials are not given a freer and better support in obtaining technical skill of the highest quality.

LIBRARY OPPORTUNITIES

POSITIONS OFFERED

Wanted at Cornell University Library, Ithaca, N. Y., a junior cataloger. Salary in accordance with training and experience.

Wanted, extension librarian for library beginning county work. Salary to depend on training and experience. Apply, Public Library, Rochester, Ind.

Wanted, a library worker who would spend a few weeks in helping to organize a southern mountain community's library. Remuneration small. Address R. K. 13, care of the LIBRARY JOURNAL.

POSITIONS WANTED

Wanted, by mature woman with experience, background and training, position as school or college librarian. Address R. E., care of the LIBRARY JOURNAL.

Librarian, with excellent experience in college or university library work, desires a position as librarian or reference worker, preferably in the East, Address: P. S. 13, care of the LIBRARY JOURNAL.

Wanted, an assistant with library training to take charge of an agricultural branch library in a college in Virginia. Position must be filled

by September 1. Address E. I. J. 13, care of the LIBRARY JOURNAL.

Position wanted as assistant to reference librarian by man. College graduate, literary tastes, experienced as assistant in college library. References. Address D. K. S. 13, care of the LIBRARY JOURNAL.

Lady desires position as librarian or assistant librarian in commercial organization in New York City or nearby. Three years experience in technical library of large manufacturing company. Salary \$1700. Address L. C. K., 13, care of the LIBRARY JOURNAL.

Cataloger, with four years' experience in college and public library work, and with knowledge of French, German and Spanish, wishes position in the East in August or September. Address, S. O. 13, care of LIBRARY JOURNAL.

College man, last eight years in charge of

department in large city library, has also college library experience, desires position as assistant librarian or reference librarian in special or large city public library. Address R. D. H. 13, care of the LIBRARY JOURNAL.

University and library school graduate, certificated by state examination, with teaching experience in university and normal school and with library experience in city, county and school libraries, desires position. Good executive ability. Address, V. C. 13, care of the LIBRARY JOURNAL.

College woman, trained librarian with five years' experience, wants library position in California in August or September. She *likes* cataloging, is capable of filling librarianship in high school or small public library, or will do reference or general work. Address F. N. Y. 13, care of the LIBRARY JOURNAL.

IN THE LIBRARY WORLD

NEW YORK

Albany. The closing exercises for the New York State Library School class of 1921 were held at the School on Friday, June 10. The address to the graduates was made by Dr. A. H. Brubacher, president of the New York State College for Teachers, who characterized the librarian as the custodian of the wisdom of the ages and as an indispensable link in our connection with the past. James I. Wyer, Jr., the director of the school, presided, and Frank B. Gilbert, acting President of the University of the State of New York, conferred the B. L. S. degree on the following eight members of the Class of 1921 and three students from earlier classes: Ruth Graeme Gentles, Rochester, N. Y.; Hung Yu-Feng, Nanking, China; Ellen Armistead Johnson, Knoxville, Tenn.; Lucile Kelling, Centralia, Wash.; Gudrun Moe, Christiania, Norway; Ralph Munn, Denver, Colo.; Rae Stockham, Des Moines, Iowa; Winnifred Wennerstrum, Chariton, Iowa; Glyde Maynard, Class of 1919, Los Angeles, Calif.; Edith Lounsbury, Class of 1917, New York City; Faith Edith Smith, Class of 1900, Los Angeles, Cal. Florence Grace Walker, 1921, who has taken the two-year course in one year, had not quite finished on June 10, but completed her work during the following week and was granted the degree *in absentia*.

Buffalo. The University of Buffalo has given certificates in library science to ten students, half of whom had accomplished the work in one

year. Five of the certificate holders are at the Grosvenor Library, one at the new Municipal Reference Library, one at the new City Hospital Library, and two continue their university studies for degrees while substituting in libraries.

GEORGIA

Atlanta. The closing exercises of the Library School were held on May 28th in the class room. Arthur E. Bostwick, of St. Louis, gave the address on "Libraries and National Service." W. W. Orr, president of the Board of Trustees, delivered the certificates.

PENNSYLVANIA

Pittsburgh. The Carnegie Library School graduation exercises were held on June 18, in the class room of the Library School. Arthur E. Bostwick of St. Louis gave the commencement address. Diplomas in Library work with Children were presented to: Claire Ursula Cable, Carnegie, Pa.; Dorothy Cleve Cady, Edgewood, Pa.; Agnes Marie Emilie Dureau, Le Mans, France; Ruth B. Miller, St. Joseph, Mo.; Mary Campbell Oliphant, Trenton, N. J.; Catherine L. Van Horn, Springfield, Ill.; Frieda Voltz, Cincinnati, Ohio; Elizabeth Whittaker, Huntington, W. Va.; and diplomas in general library work to: Rose M. Barber, Slippery Rock, Pa.; Myrtle Crockett, Celina, Ohio; Mary Jessie Crowther, Rutland, Vt.; Winifred Dennison, Pittsburgh, Pa.; Irene Franklin, Munhall, Pa.; A. Grace King, Pittsburgh, Pa.; Grace Latta, Antigo, Wis.; Edith

HORACE TRUMBAUER, *Architect.*WILLIAM COOLIDGE LANE, *Librarian.*

WIDENER MEMORIAL LIBRARY, HARVARD UNIVERSITY

View showing an intermediate tier of SNEAD STANDARD STACK and carrells or private study rooms incorporated in the main stack. The advantage of this arrangement is obvious.

College and University Librarians are realizing the useful and serviceable feature of this combination.

Snead Standard Stack and carrells are now used in such libraries as the Widener Memorial Library, Harvard University, Notre Dame University, and University of Michigan, etc.

Long experience in equipping libraries of all sizes has given our experts a fund of available information on library construction and arrangement, which is available without charge or obligation to the Library officials and architects.

Detailed plans and description of many notable library buildings are found in our publication "Library Planning, Bookstacks and Shelving," which will be sent free wherever it will be useful in the promotion of scientific library construction.

SNEAD & COMPANY

92 PINE STREET, JERSEY CITY, NEW JERSEY

Canadian Branch: 250 Richmond, West, Toronto, Canada.

Robinson Rex, Pittsburgh, Pa.; Clara L. Seager, Wilksburg, Pa.; Donna E. Sullivan, Owosso, Mich.; Dilla Lavina Whittemore, Sioux City, Iowa; Isabella O. Young, Pittsburgh, Pa.

OHIO

Cleveland. Commencement exercises of all of the professional schools of Western Reserve University were held June 16th, the commencement address being made by Sir Auckland Geddes, British Ambassador to the United States. Twenty-eight students of the Library School received certificates, nineteen being for the general course and nine for the special course in Library Work with Children.

ILLINOIS

Library tax rates in Illinois have been increased by an amendment to the library act, passed by the General Assembly to the effect that, beginning with 1922, all tax supported public libraries in cities of over 100,000 population (Chicago only) shall receive a rate of eight-tenths of a mill, and libraries in cities, towns and villages under that figure, one and six-tenths mills. This is an increase from six and two-thirds tenths, and one and three-tenths mills, respectively or, nominally, about twenty per cent. Actually, however, the added library revenue amounts to at least fifty per cent, as the amendment eliminates libraries from the operation of a scaling law which annually reduced the tax rate to a minimum considerably under the indicated figure, changing from year to year. This scaling law wrought particular havoc in Chicago and Evanston and, this year, created a shortage that made drastic curtailments necessary. The reaction of the library constituencies in these two cities as well as elsewhere thru the state was most wholesome and gratifying. Subscriptions to keep branches open, together with many expressions of interest, regret and appreciation, were received in both places. (See LIBRARY JOURNAL for June 15, p. 535 and for May 1, p. 404). A strong and very vociferous volume of public opinion supported the library directors in their application to the General Assembly and made itself heard and felt to such good effect that the latter body, tho overwhelmed with demands for higher taxes, practically gave the library bills the right of way and passed them almost without a dissenting voice. In Chicago the public library income, reduced this year to \$830,000, will amount to more than \$1,300,000 hereafter on the present assessed valuation, and will rise as valuations increase. In the smaller places the increase will be relatively in the same proportion. By these generous provisions for public library support, the state of Illinois has made a very distinct place

for itself on the library map.

Another law, passed at the present session of the legislature, makes it compulsory for Boards of Directors of public libraries in cities over 100,000 maintaining employees' pension funds (i. e. Chicago), to appropriate all moneys collected from book fines to the pension fund. Such appropriation had heretofore been made as a voluntary donation and was omitted several times when, as in the current year, the library budget needed re-enforcement. The discretionary gift has now been made obligatory and given legal sanction.—C. B. R.

WISCONSIN

Madison. Commencement exercises of the University of Wisconsin Library School were held on Wednesday evening, June 15. Justice Burr W. Jones of the Wisconsin Supreme Court gave the address speaking to the subject "Women in Public Life." President Birge gave the charge to the graduates and granted the diplomas.

MISSOURI

St. Louis. Commencement exercises of the St. Louis Library School were held on Friday, June 10th. Otto Heller, professor of German Language and Modern European Literature at Washington University, spoke on "The Reader at Sea." Certificates were awarded to sixteen students, eleven of whom are from St. Louis, two from Illinois, two from Oklahoma, and one from Zurich, Switzerland. Twelve of these graduates are already under definite appointment, the remainder preferring some months' rest before taking up work. The entire class joined the A. L. A.

TEXAS

Austin. The first students to complete all the courses of the University of Texas School of Library Science have just finished their work, which has been made more interesting by reason of the many University social and recreational facilities available. The Wrenn Library (on the same floor with the School) furnished the students with good examples of early printing, publications of private presses, fine bindings and other material on the history of printing and bookmaking, and the small practical press of the University presented the other extreme of the "how" of less ambitious printing.

One full and two half courses are being given by the Principal in the Summer School, which will be held from June 14th to July 23rd. The subjects are: Classification, book selection and library administration. While these courses are given primarily for high school teachers without library training, librarians of small libraries and library assistants are also admitted.

BANES, Mary, 1914 C. P. cert., appointed high school librarian of Hughes High School, Cincinnati (Ohio).

BERCAW, Louise, 1916 A., has resigned her position in the Savannah Public Library to return to her former position of librarian of the Carnegie Library, Cordele, Georgia.

BURGESS, Alice P., 1914 C. P. cert., appointed children's librarian at Madison (Wis.).

BURBANK, Jane L., 1919 N. Y. S., formerly chief of the Circulation Department of the Trenton (N. J.) Free Public Library and recently senior assistant in the Reference Department of the Newark (N. J.) Free Public Library, appointed librarian of the Dyer Library at Saco (Me.).

BURNEY, Mary Vick, 1920 A., has resigned her position of librarian of the State Normal School, Fredericksburg, Va., to become head of the reference department of the Public Library, Dallas, Texas.

CARTER, Julia, 1919-20 N. Y. S., has resigned as librarian of the Holland Library, Alexandria Bay, N. Y., to succeed Ruth L. Brown as secretary of the Vermont Public Library Commission.

CLARK, Elizabeth K., 1907 P., cataloger of the library of the University of Idaho, has accepted the position of chief cataloger in the Minnesota Historical Society at St. Paul.

CRUMLEY, Susie Lee, who has held the position of assistant librarian of the Atlanta (Ga.) Public Library and chief instructor in the Library School, has given up her connection with the library and will become principal of the Library School.

DOXSEE, Roberta M., 1919 P., formerly on the staff of the Pratt Institute Free Library, has been appointed acting librarian of the Bound Brook (N. J.) Public Library.

FULLER, Lucy T., 1916 C. P. cert., appointed librarian of the Harris County Library, Houston (Tex.).

FOWLER, Eva May, state librarian of Illinois, has resigned to become a member of the staff of the Peru (Ind.) Public Library. The consolidation bill recently passed transfers the control of the Illinois State Library to the Secretary of State.

HEMANS, Ida M., 1905-06 N. Y. S., has resigned from the Wells College Library staff to become first assistant cataloger at the Rochester Public Library.

HOPKINS, Jessica, 1906 A., 1916 N. Y. P. L., appointed assistant librarian of the Atlanta (Ga.) Public Library. Miss Hopkins will also carry a course in the Library School.

HUNT, M. Louise, in charge of reference and loan work of the Newark (N. J.) Free Public Library, resigns August 1st and in September goes into partnership with Anna Nott Shook, inventor of the Homekraft Looms, and will take charge of the Homekraft studio for hand-weaving at 55 West 37th Street, New York City.

HYDE, Mary E., 1902-03 N. Y. S., instructor in classification, cataloging and subject headings in the New York State Library School, has resigned in order to complete a text-book on subject headings on which she has been at work for some time.

JEMISON, Margaret, 1914 A., has resigned as head of the reference department of the Dallas Public Library to become librarian of the Emory University Library, Atlanta, Georgia.

KRAUSS, Bertha K., 1911 P., has accepted the position of chief cataloger in the Carnegie Free Library of Allegheny, Pittsburgh, Pa.

MOORE, Dora, 1906-07 N. Y. S., has resigned as head cataloger at Colgate University Library to accept a similar position at Ohio Wesleyan University.

MOULTON, John G., librarian of the Haverhill (Mass.) Public Library and president of the Massachusetts Library Club, died July 7th of Bright's disease. Mr. Moulton graduated from Harvard in 1891 and from the New York State

The Constitutional Review

A quarterly magazine, founded and maintained for the purpose of "advocating the maintenance of constitutional government and recording its progress at home and abroad." Discusses the great problems of democratic, representative, and constitutional government. It stands for a firm adherence to the fundamental principles of American government as set forth in the Constitution, opposes bolshevism, socialism, and other forms of extreme radicalism.

Henry Campbell Black, Editor. Published by the National Association for Constitutional Government, and sent without charge to all members of that Association. State, municipal, college, and university libraries, and public institutions of various kinds are subscribers. Subscription price, one dollar a year.

Chicago, Illinois

ELM TREE PRESS

Woodstock,

Vermont

Issues many books and pamphlets, written or edited by **J. C. DANA,** Librarian Public Library and Director of Museums, Newark, N. J.,

on Libraries, Museums and other topics, including 20 pamphlets on Library Economy, 50c. to \$1.00 each; four small volumes on Museum method, the four for \$3.00; four volumes of the Librarian's Series, being reprints of old and rare books of interest to librarians; certain books on the classics, chiefly on Horace; and has for sale a few copies of Literature of Libraries, six volumes, from Merrymount Press.

Library School in 1894. After three years' work at the Quincy (Ill.) Public Library, he returned East to take service in the Brockton (Mass.) Public Library and soon thereafter was appointed to the librarianship of Haverhill, a post which he filled for twenty-two years. During the war Mr. Moulton volunteered for library service and was sent first south and then overseas, serving for a year at the American Embarkation Center at Le Mans (France). When the A. L. A. undertook to raise funds for its Enlarged Program, he assumed the directorship for Massachusetts. He was an active member of the Massachusetts Library Club since his joining it in 1898, having been secretary six of the past ten years, for two years its vice-president and for the last two years its president. A member of the A. L. A. since his library school days, he was present at sixteen conferences, and it was largely due to him that the Association held this year's conference at Swampscott.

MUSE, Benonine, 1920 N. Y. S., for the past year reference librarian at the University of Texas Library, has resigned to accept a similar position with the Public Library of Dallas, Texas.

PAXSON, Ruth, for the last three years registrar and teacher at the Carnegie Library School of Pittsburgh, appointed head of the Schools Department of the Portland (Ore.) Library Association.

RHODES, Isabella K., 1909 N. Y. S., since 1911 of the Reference Department of the New York State Library, appointed instructor in classification, cataloging and subject headings at the Library School in succession to Mary E. Hyde, resigned.

SCHAANNING, Hedvig, 1916-17 N. Y. S., librarian of the Norwegian Information Bureau of Trade, has been given a year's leave of absence to serve on the staff of the League of Nations Library at Geneva, Switzerland.

SEYMOUR, May, 1888 N. Y. S., died in New York on June 14 of pneumonia, after a few days' illness.

TRIMBLE, Katharine M., 1913 D., appointed assistant to Adeline B. Zachert, director of school libraries for Pennsylvania.

WHEELER, Harold J., has resigned the librarianship of the Missouri School of Mines at Rolla (Mo.)

The following appointments of members of the class of 1921 of the New York State Library School have been made: Hung Yu-Feng returns to his former position as associate librarian of

the University of Nanking, Nanking, China; Ellen A. Johnson, librarian of the children's department and instructor in the library school, Carnegie Library, Atlanta, Ga.; Ralph Munn, head of the reference department, Public Library, Seattle, Wash.; Anna May Shepard, assistant cataloger, University of Missouri Library, Columbia, Mo.; Ruth G. Gentles, Gudrun Moe and Winnifred Wennerstrum have temporary positions in the New York State Library and Miss Stockham in the Circulation department of the New York Public Library. Members of the class of 1922 have been appointed as follows: Dorothy A. Abrams, general assistant, University of North Dakota Library, Grand Forks, N. D.; Gilbert H. Doane, assistant librarian, University of Arizona Library, Tucson, Ariz.; Ingrid Heum, acting librarian, Norwegian Information Bureau of Trade, Christiania, Norway; Aage Jakobsen, assistant, Public Library, Copenhagen, Denmark; Sallie B. Kappes, in charge of in High School Branch of the Public Library, Morristown, N. J.; Kathrine Malterud, branch assistant, New York Public Library; Doris M. Reed, reference assistant, Columbia University Library; Katherine E. Schultz, assistant cataloger, Vassar College Library; Helen M. Vincent, reference assistant, Wilmington (Del.) Institute Free Library. Of those who expect to return for the second year, Misses Jakway and Martin and Mr. Spettigue have summer appointments on the staff of the New York Public Library and Miss Perry at Dartmouth College Library.

Members of the classes of 1921 of the Library School of the New York Public Library are holding or will occupy positions as follows: Graduates: Grace Walton Hardie, 1st assistant, Circulation Dept., New York Public Library; Ann Helene Klauder, assistant, Circulation Dept.; Marjorie Jeannette Zinkie, children's librarian, Circulation Dept. Elizabeth Gillette Henry and Elfreda Stebbins are serving temporarily in the Circulation Department of the N. Y. P. L., intending to return to positions in the West after securing some months of experience here. Certificate holders: Florence Anna Briber, assistant, Denver Public Library; Ida Nathalie Brown, assistant, Economics Div., N. Y. P. L.; Jean Lowrie Edmonds, assistant, Preparation Div., N. Y. P. L.; Esther Elizabeth Frank, assistant, Detroit Public Library; Laurie Louise Gray, reference assistant, Univ. of Arizona Library; Louise Guerber, assistant, Circulation Dept., N. Y. P. L.; Olive Hensley, assistant, Denver Public Library; Archibald Ferrier Jamieson, assistant, Reference Dept., N. Y. P. L.; Edgar Weld King, will serve as reference

New
**HOW
IT
WORKS
Book**

The announcement of a new "Things to Make" volume by Archibald Williams is always of interest to Librarians and Vocational Teachers. The books in this series average over 500 pp. each, with many illustrations and easily understood scale drawings. "THINKING IT OUT" was published last fall. The other volumes in this series, now in stock are,

Made in all sizes and styles of binding

WM. G. JOHNSTON & Co., Pittsburgh, Pa.

DEAR SIR:—

We have been using several of your Keyless Lock Binders for several months and find them perfectly satisfactory. We have had no more trouble with the "Magazine Thief" and the old numbers look as good as "the new" when taken from the binders.

They improve the looks of the reading table, keep the magazine in better condition and are so reasonable in price that EVERY Association can afford them.

Your sincerely General Secretary.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

The Children's Librarian of To-day and To-morrow*

By EFFIE L. POWER, Cleveland Public Library

WHEN the topic of this paper was announced, a friendly letter came out of the West saying, "I am glad you are going to discuss the children's librarian of to-day and to-morrow. It has been suggested to me here that she is extinct but I am trying to inject some cheerfulness about it." This depression regarding the dearth of children's librarians is general and is very serious. But it is a hopeful sign and we shall rise to meet it. The call to-day is for children's librarians and catalogers. This in itself is a recognition of special training, altho it has been forced to some extent by the withdrawal of trained children's librarians from the ranks for financial or other reasons and by the fact that in their case at least, training facilities have never been adequate to meet the demand.

That there is interest in training for children's work among persons well prepared educationally has been proved to me by the letters which have passed over my desk during the past year and by many personal conferences with candidates and workers over a number of years. The leading question has not changed: What is the future in children's work? Is there an opportunity for the development of one's executive ability within the special field or must one leave it after a few years for general work? If so why should I specialize? My answer is that work with children is largely assistant work but that it offers the opportunity to develop executive ability within its specific field in libraries where it is recognized as special work; that training and experience in children's work is needed in many general executive positions and that one is not necessarily giving up children's work by moving toward the normal school and the library school as instructor in children's literature, or toward the children's book shop;

that there should be the opportunity which many children's librarians prefer, to remain in a children's room and advance along lines of literary appreciation and accomplishment, and more extensive child welfare work.

Continued service in a children's room immediately brings up the question of grades and salaries. The Cleveland Public Library is working into a new schedule which is expected to solve this problem. This schedule grades each member of staff according to his fitness for his own line of work, e. g., there is no rule that the salary of a children's librarian in a branch shall bear a fixed relation to the salary of the first assistant, and the assembling of suitable working groups in each library unit is left as an administrative problem. Also, the groups are large and inclusive and the terms used to designate grades are broad. Every children's librarian and every other special librarian has his special grade and a rising place in the ranks as well.

Children's librarians have said to me, "I prefer to work in a children's room but I cannot live indefinitely on a children's librarian's salary." I have also heard more than once, "I do not consider this change in position a promotion but the head of my library is willing to pay me a larger salary in adult work and I must have the money." Also, after many years of recognized special work, when I was recently open to a position, I found that the salaries offered me for work for which I had not been specially trained were so much larger than those first offered in children's work that my heart sank within me until two great public librarians gave me new courage and bade me stick to my job because it was worth while.

But a new era is before us. Children's librarians are in demand, salaries are becoming commensurate with that demand. Are we going to forget our growing pains and meet the present

*Paper read before the Children's Librarians Section of the A. L. A. at Swampscott, June 22, 1921.

situation? Work with children as it is organized to-day has developed slowly during twenty-five years in the greatest public libraries of the world under great public librarians. It has its weak places but surely its basis is sound and its methods past the experimental stage. Let us take stock of ourselves and our resources:

A careful scanning of the membership list of the American Library Association as given in the handbook and the May supplement shows one hundred and ninety-six children's librarians. This includes all so-called children's librarians in children's book shops and school librarians where it could be ascertained that they were directly carrying on elementary or junior high school work. This was approximately four per cent of the total membership of the Association. Of these sixty-two are graduates of the Carnegie Library School. A list of so-called children's librarians recently prepared by Miss Hunt for this Section gives 472. This was compiled from a questionnaire sent to fourteen Library Schools, of which thirteen responded; twenty-six city libraries, of which twenty-three responded, and the library commission in twelve states, eight of which responded. It does not include school librarians unless ranked as children's librarians, children's librarians who have become branch librarians or chief librarians, or former children's librarians now engaged in other work in book shops, etc. Of the four hundred and seventy-two listed, one hundred and fifty-eight were members of the A. L. A. on May 1st and one hundred and eighteen or twenty-five per cent of these are graduates of the Carnegie Library School.

A study of the catalog of the Carnegie Library School shows three hundred and sixty-six children's librarians graduated in classes 1901 to 1920 inclusive. This is an average of nineteen annually. Of this number ninety-eight have married and have retired from active work, eleven have died and thirty-two are not employed or their employment is not indicated. There remain two hundred and twenty-five at work, and of these eighty are in adult or other special work and one hundred and forty-five or sixty-four per cent of those working are actively engaged in work with children in libraries or schools. This one training school has been counted on to meet the demand for children's librarians the world over.

This year the Western Reserve University Library School and the Cleveland Public Library conducted jointly the former Cleveland Public Library Training Class in children's work. Nine children's librarians were certificated in

children's work by the University on June 16th. Of these four will remain in Cleveland, four will go to three other libraries in this country and one returns to Norway. Seventeen students have been accepted for next year which taxes the present physical equipment. This course is not a basic one and in many cases draws temporarily from the field since it requires for entrance one year in a general library school or not less than three years' approved experience. The former Training Class in children's work has, after twelve years, fifty-eight graduates now active, and of these thirty-one are in the Cleveland Public Library. The Brooklyn Public Library has gone far in training for its own staff as have also the St. Louis and other libraries, but the conclusion must be that many more workers are needed. The movement toward further training which must come from the library world in general is gaining in impetus. What would happen if this Section of the A. L. A. were suddenly called upon to make up faculties for a number of Training Schools for children's librarians and to appoint field workers able to attract college women of fine personality and vision as students? This is not so imminent as to cause a sudden panic among us but we well know that when a majority of the administrators of public libraries are fully persuaded that more children's librarians are needed, they will see to it that sufficient facilities for training are available and when that time comes the conduct of the training will be our responsibility.

When talking to young women who are considering work with children, show a little sentiment, provided it is honest. The new generation of workers seems afraid to show much feeling toward children. Perhaps those of us who have trained them have too often warned them against gush and sentimentality. We talk sincerely about an educational ideal, we tell of humorous sayings and situations which brighten and lighten the day's work, but after all it is the daily personal responses and confidences which come to us from the children when we have earned them, about which we say nothing, that make the work worth while. Have you ever looked long at the dull lines of a church window from the outside and used your imagination to picture its quality of beauty from within? When you find a likely candidate for children's work, put her to work for a while, or, if she enters training immediately, give her plenty of first-rate field work with the children. No one likes children's work until she tries it. The outsider sees not too clean children, crowds, evening work, Saturday work, discipline prob-

lems, the insider sees "the magical human chance for adventure."

So far this discussion has been directed toward the field of children's work and the responsibility of the children's librarian of to-day toward the children's librarian of to-morrow. Let us now turn to the intimate problems of administration and introduce some debatable topics. Granted a children's librarian who is neither a "flitter," nor, like Tony of Goop fame, "a good beginner," our next concern is the book collection. The old plan of obtaining books on approval is a good one but it needs to be supplemented by more informed, critical, possibly co-operative book reviewing which will enable us to keep sufficiently up to date and at the same time maintain our permanent standards. The type of review needed is a presentation of the new book against a background of the old which will guide those libraries where the number of new titles purchased each year is determined chiefly by the quality of production during the year. Children as a rule do not need the newest book, but the immediate recognition of a new title which is worth while is a powerful incentive to both author and publisher and an enthusiastic word or review promptly given is sometimes very far-reaching. The first appearance of Hudson's "Little Boy Lost" in this country was unnoticed and its popularity to-day is due in a large measure to its prompt acceptance by children's librarians when it reappeared a few years ago and to the advertising given it by them. On the other hand a much appreciated artist's most wonderful illustrations have not carried over a version of the Robin Hood ballads generally disapproved for children's libraries.

During the war children's librarians were so overworked that the regular cycle story hours were omitted in many libraries, probably in yours. Are you having a hard time to return to the old method and are you questioning it? Our difficulty in Cleveland is that we are always very busy and that the new children's librarian who has never lived with the children in a great piece of literature over a number of months sees chiefly the hours of required preparation. Also there is an unsettled condition among the children which is difficult to counteract. But we are working slowly back believing that this oral presentation of world literature is fundamental. This is the day of the socialized school, the socialized recitation and the socialized library, but let us try to keep "the listening child."

The children's librarian of to-day continues to recognize the social value of library clubs and is turning their attention separately and collectively toward great civic movements. There

is a strong tendency among the boys and girls toward dramatics which if directed will lead to wholesome self-expression and the writing of plays by the children. This may counteract to some extent the influence of the movie.

The growth of the departmental elementary school and the almost complete change to the project method in teaching in all schools has increased the volume of library reference work and made larger reference collections very necessary. It is no longer possible to buy a sufficient number of books of information to allow of much home circulation without cutting the amount of money needed for books in the literature classes. A good plan is to hold many so-called circulating books for reference use in the children's rooms or lend them for short periods to the class room for reference use there. This may result in some loss in circulation but it seems to be the only practical way to take care of the school call and at the same time provide for the voluntary reader who is our particular responsibility. There has been an increased demand during the past three or four years for reference material on topics which are covered only in books and pamphlets beyond the range of children's reading interests; such topics as the Russian revolution, Americanization, great world treaties, capital and labor, the League of Nations, Japanese immigration, discontinuing airplane mail service, and the progress of Mexican civilization. The topics cited were gathered in one children's room. We do not wish to load the juvenile shelves or catalog with adult books, especially since the topics change constantly. The only way I know to meet this problem is to reason with the teachers who make the assignments.

Reading for credit in school and reading for a place on the honor roll in the children's room is being more and more emphasized and needs to be handled thoughtfully. We must not allow the demand for books on required reading lists to absorb our funds and make our book collections look like sets of supplementary reading. We do not want to over-emphasize atmosphere and the "library manner" of introducing books to children, but we hold a high ideal which has grown out of definite observation and experience. Children's rooms have been in existence long enough for some of us to be meeting a second generation and the memories which lie in the minds of the parents who bring their children to me would not lend themselves to scientific measurement. They are the green-covered book seen and not read, a hero story told, a friendly assistant, a discussion of books

or ideals of life, a seat on the top of a high step-ladder.

Walter Pater, in his "Child in the House" says: "So the child of whom I am writing lived on there quietly; things without thus ministering to him, as he sat daily at the window with the birdcage hanging below it, and his mother taught him to read, wondering at the ease with which he learned, and at the quickness of his memory. The perfume of the little flowers of the lime-tree fell through the air upon them like rain; while time seemed to move ever more slowly to the murmur of the bees in it, till it almost stood still on June afternoons. How insignificant, at the moment, seem the influences of the sensible things which are tossed and fall and lie about us, so or so, in the environment of early childhood. How indelibly, as we afterwards discover, they affect us . . . early experiences of feeling and thought, which abide with us ever afterwards, thus, and not otherwise . . . and never afterwards quite detach themselves from this or that accident, or trick, in the mode of their first entrance to us."

Teaching methods are becoming highly scientific and library methods should lend themselves to standards of measurement which will correlate with other lines of educational work; but let us keep in mind that children's rooms have been planned primarily to influence the informal voluntary reading of the individual child. As Mr. Yeomans, in his "Shackled Youth" suggests. Let us go into the school after its educational machinery has stopped humming.

The last point I wish to make is that children's librarians should become more active professionally. It has been suggested at these meetings that we may be able to reorganize our Section to better advantage, that we shall write our experience and theories for publicity and teaching purposes, that we shall advertise our standards of book selection more aggressively, that we shall play a larger part in the general library movement. If our present membership in the A. L. A. is four per cent, can we make it eight per cent by 1922?

There was a fisherman who left his home near early dawn to draw his nets. As he pulled from the shore his little home under the cliff remained in darkness but above on the high mountain he saw reflected a brightness which sent him back with full faith in a rising sun and another new day. The children's librarian of to-day has her problems, but she occasionally needs to get far enough away from the every day routine to get a perspective and new enthusiasm, and this

is what the A. L. A. and these meetings should do for her.

Bibliotheca Chemico-Mathematica

ONE can understand enthusiasm for a mail-order catalog or for a "seed book"—especially if these are supplied gratis. Henry Sotheran & Company's catalogue at sixty-three shillings might strike the lay reader as quite preposterous—that is, before he examines the book. Truly the book is expensive, but it is also alluring and informing.

Begun in 1906 and designed to include about three hundred pages, it has grown to two sizable volumes numbering altogether nine hundred and sixty-four pages, with one hundred and twenty-seven attractive facsimiles of portraits, title pages, and drawings from rare volumes. The 17,397 entries cover a period of nearly six centuries and embrace practically all of the standard works and most of the earlier works of historical importance.

Bibliographical descriptions, current prices and, in many cases, informative notes are given. We learn, for example, that Bombelli in 1572 laid the foundations of our knowledge of imaginary quantities. The forty-one titles of Robert Boyle testify to the industry and erudition of this remarkable scientist. Item number 730 refers to Salomon de Caus's celebrated "Les Raisons de Forces Mouvantes," the first work said to contain the discovery of the steam engine. Item 1199 quotes the first printed edition of Euclid at £28, 10 s. Items 2056-2067 and the accompanying illustrations arouse an interest in the scientist Huygens and his work. (It was he who in 1690 propounded the theory of elementary light waves). Twenty-five titles for Sir John Herschel, ten for Lavoisier, eighteen for Johann Glauber, fourteen for Descartes, ten for Johann Lambert, fifteen for Laplace, ten for Napier, twenty-nine for R. A. Proctor, and ten for Sir Charles Siemens broadly suggest the character and scope of the catalog.

A subject index of nearly 100 pages, with numerous cross references, serves as an excellent guide to the history of science. Under alchemy are noted 58 titles; early mathematics, 122; bridge building, 47; mineralogy, 72; the moon, 46; theory of tides, 52; general chemistry, 87.

An unusually valuable contribution to bibliography and a useful library reference.

WILLIAM B. GAMBLE.

*Bibliotheca chemico-mathematica: Catalogue of work in many tongues on exact and applied science, with a subject index. Compiled and annotated by H. Z. [eitlinger] and H. C. S. [otheran]. . . London: Henry Sotheran & Co., 1921. 2 v. illus. 8°.

Library Book Buying*

WITH this report the Committee on Book Buying comes of age. It was formed in 1901 as a Committee on Relations with the Booktrade to combat the raised prices of the net system. This system had been introduced the preceding year with the organization of the American Publishers' Association and the American Booksellers' Association in the attempt to check ruinous price-cutting under which publishers were failing and bookstores were going rapidly out of existence. The new order fixed the retail price of a book for the first year after its publication. From this price the libraries received on non-fiction a discount of but 10% as against the usual third off. In inaugurating the system the publishers promised such a reduction in the list price as to result in an actual advance of but 8% in the cost of such books to libraries. Widespread observation, however, seemed to show an average advance of 20 per cent. Hence the A. L. A. Committee.

At the same time similar agitations were being conducted in England and Germany, tho over there no discount at all was allowed. Consequently there was much wigwagging between New York and London. For two years the American committee tried negotiation with the A. P. A., without apparent result, tho the Chairman of that day claimed imminent success was spoiled only by the untimely resolutions of certain library organizations. Then came a new committee pledged to strong action. Frontal attack, however, produced no more evident result than had the policy of conciliation; the committee's name after a year was changed to its present title, and it entered upon an energetic program of instruction in economic buying, issuing from 1903 to 1908 a series of thirty-five card bulletins, reprinted in library periodicals, and sent to 3000 addresses as a sort of correspondence course for small libraries. They counseled importation, delayed purchase, use of second-hand catalogs, remainder sales and auctions; they sought to arrange concerted buying, and checkmated adverse legislation at Washington. In the press this was known as the Librarians' Strike.

Then followed a lull of five or six years, with new attempts at a rapprochement, and then final dissolution of the A. P. A. in 1915, following certain court actions in allied cases which seemed to indicate that the publishers had been acting in restraint of trade and therefore violat-

ing the Sherman Act. These decisions led quickly to a run on Congress for legislation in the interest of price maintenance. In one instance the libraries' right of discount was at once involved. So for six years the Stephens Bill (H. R. 9671) and its precursor have been of concern to us all. Official representation led to amendment excluding libraries from its application.

Finally, as war's aftermath, last year's Committee denounced the German Börsenverein's system of inflated prices against foreign countries on the basis of their monetary exchange status, and particularly the instances of special discrimination against the United States.

In view of this record it becomes the first duty of the present Committee to report that the Stephens Bill still reposes in committee only amended in our favor. It seems certain to remain thus dormant during the present Extra Session of Congress. The libraries' argument for exemption lies, of course, in the fact (1) that they are educational institutions, mostly supported by public taxation, and (2) that they are virtually wholesale purchasers.

This Committee's positive program during the six months of its existence has centered on foreign buying. This was suggested in the letter of its appointment. It became, thus, the residuary legatee of the war-time Committee on Importations. It has, however, had nothing to buy or sell. Its service has been advisory and, harking back to an early model, the advice has been given in a series of eight bulletins appearing in the following issues of the LIBRARY JOURNAL: January 1 and 15; February 1 and 15; March 15; April 15; May 1; and June 1, 1921.

Two questions have been handled and by their nature they have of necessity chiefly interested the larger and the technical libraries, tho they ought to concern all. One is as old as the Association and will doubtless outlast it; the other is unique in our annals, as the War, its progenitor, is happily so.

The former covers the practice of American publishing houses' charging unduly high prices for their imported English issues. Time and again in past years has this Committee published in London and New York prices of the same editions, and advised importation as a steady habit. When there seemed danger that we would shake off sloth or timidity and act wholesale on such sound advice, the attempt was made in copyright revision to cut off our privilege of importing free of duty. So again in

*Reprint of the report of the A. L. A. Committee on Book Buying for 1920-1921.

the LIBRARY JOURNAL of March 15 (see also April 15), the deadly parallel was drawn, showing, on the one hand, three large houses listing their English titles at 74-142 per cent higher in New York than in London and, on the other hand, the fourth selling its American books in London at the New York prices. These list prices are the ones charged individuals; to libraries they ran 31-90% cheaper when imported than when bought in New York. A difference of 21 per cent can be explained for this is the sum of 15 per cent duty plus 6 per cent ocean transportation. The wide divergence is accounted for by the indefensible practice of American houses adding to the price of their imported books a sufficient sum to cover resale to agents, instead of taking this out of the liberal discount London gives them. Thus the library pays the profit of publisher, importer and jobber. The proper source of the agent's supply is London unless New York contributes the agent's discount, and the librarian should order no English issue from its New York house on terms higher than the following, which now lie before the publishers as this Committee's proposal: English price converted into American money at current rate of exchange and two cents a shilling for ocean carriage, plus carriage from New York to library. Importing direct from England is cheaper still, but if time is an important factor, here is a substitute, the highest defensible one. As for personal orders, librarians ought to find it a pleasure to save as many of their clientele as possible from paying \$3.30 to \$4.60 for a book to be got for \$2.30, fresh from the press, and cheaper still in a year or two perhaps.

The other situation which has commanded the Committee's attention grew out of the demoralized condition of international exchange. Foreign money in general, compared with our dollar, fell below par. The American importing agent's profit fell proportionately; for if, as an example, the shilling came to be worth, not twenty-four cents, but eighteen, the value in American money of the discount granted in English money to the importer by the English publisher shrank thus 25 per cent. If he were to make his usual profit he must add 25 per cent to his usual charge, with the result that the library lost the gain that the enhanced purchasing power of the dollar in England ought to have brought. Quite evidently the Committee had no honorable alternative to advising the libraries to undertake their own importing.

If such were the case with English purchases, how much greater the gain in buying directly from France, when the franc fell from 19.3 cents to 6 cents, or Italy, with the lire melting

from 19.3 to 3.5 cents, or Germany, seeing the mark drop from 23.8 cents to 1.5 cents. There was a time, for instance, when certain jobbers were charging twice the Paris price and eight times that of Leipzig, tho 25 per cent above the French rate and five times the German one would have yielded the antebellum profit.

In Germany this relatively simple situation was complicated by an extraordinary measure adopted by the Börsenverein der deutschen Buchhändler at the close of 1919 which has no counterpart in the history of international book-selling and has now virtually exploded, as set forth in the Committee's final bulletin. Its peculiarity lay not in the heightened prices charged foreigners but in fixing this surplus charge against the several countries each week according to the status of their exchange. Thus while nine cents was the arbitrary value assigned the mark for the United States in the schedule of February 1, 1920, or 660 per cent above the actual value, only 570 per cent was set down against England, 380 per cent to France, and 370 per cent to Italy, plus a Teuerungszuschlag of 20 per cent in all cases.

The scheme was formulated by certain powerful publishers. They were a year in getting its acceptance by the Börsenverein, in which the retailers have a majority. But for once the Börsenverein's decree was defied by numerous important exporters, and it remained a dead letter till April, 1920. On that date the Government, on appeal of the publishers, assumed the enforcement. From that time onward its authority was respected, but less than two months were required to show the authorities that trade would not move under such a condition. Accordingly, tho the mark was dropping thruout last summer, America's percentage was kept at 170. This was changed to 250 in October, reduced to 200 in January, to 185 in February. For details see the Committee's first bulletin.

And now comes word that the system of having prices obey the fluctuations of money is abandoned. Instead the world is now divided into two classes according to their exchange status. In the upper group stand Belgium, China, Denmark, Egypt, England, France, Holland, Japan, Norway, Sweden, Switzerland, and the United States. In the lower group are placed Argentina, Brazil, Chile, Greece, Italy, Portugal and Spain. Under this arrangement the former countries will be charged double the domestic price, the latter only 60 per cent more than in Germany. The Teuerungszuschlag is cancelled. Now, as heretofore, antiquarian items are to be exempt. The situation, however, is left in a somewhat chaotic state by two opposing exceptions: (1) Publishers may charge

more than 100 per cent if they like; (2) publishers may employ the domestic price if a bill totals more than M. 300. How the new measure will work out, time alone can tell.

Finally, the Committee lent its support to a widespread demand that the three new volumes proposed as supplements to the Eleventh edition of the Encyclopedia Britannica be issued on

ordinary as well as the India paper alone announced, and in buckram with special stitching, as well as commercial bindings. The first plea was successful and the second will be allowed, also, if enough support it.

M. LLEWELLYN RANEY, *Chairman*.

ANNA G. HUBBARD,

PURD B. WRIGHT.

Plain English—and American

"LET'S compromise," say the Oxford University Press and the Macmillan Company. "No terms published," answer G. P. Putnam's Sons. Such were the declarations of the international publishers to the A. L. A. at Swampscott, while the head of Longmans, Green & Company, in New York, is abroad at present.

The Committee, it will be recalled, had found that English books in general, including those of the houses above mentioned, could be imported directly by the libraries at English list price plus about six per cent (or roughly one cent per shilling) for postage and packing. To save time, however, in the case of publishers with establishments on both sides of the water, we proposed that they supply from New York stock at English list price, converted into American money at current rate of exchange, plus two cents a shilling to cover ocean carriage and duty.

The Oxford University Press was seen to be listing its titles at forty-five to fifty cents a shilling, tho the shilling has for a year hung around nineteen cents. To libraries a special rate of twenty-eight cents was offered. As a result of criticism, a fresh offer is made now: viz., (1) to supply from New York stock at English list price, converted into American money at current rate, plus four cents to the shilling to cover duty and importation charges; (2) to bring from London at English list price, similarly converted, plus two cents a shilling. The first clause represents a cut of eighteen per cent. Each library will decide for itself whether in specific instances it is advisable to pay an extra three cents a shilling for the sake of prompter delivery. The latter clause will, of course, be summarily rejected, since better terms may be had of either American or English dealers. Twenty-one or twenty-three cents to the library, forty-five or fifty cents to the individual!

Macmillan's list price was found generally to be forty cents a shilling. To libraries a discount of twenty per cent was given, leaving thirty-two cents as the shilling rate. Now a circular has been sent out offering to supply

from London English books published by Macmillan & Co., A. & C. Black, the Society for the Promotion of Christian Knowledge, and the Cambridge University Press, at the English selling price, converted at current rate, plus carriage charges—"which practically meets your suggestion," they add. The libraries could already do as well. This but adds another agent to the list of those already available in New York and London. As for selling *from stock* in this country, "surely you cannot, however, expect us to revise our entire method of publication," they say. Yes, if library trade is wanted; for the system of marketing their English wares adopted by these two great houses is fundamentally faulty.

As for Longmans, Green & Co., we can but repeat that they have several selling schedules. If the individual library can secure adhesion to our formula of English price plus two cents a shilling, it will in general prove advantageous to order from the New York house, especially as L. C. cards can be supplied with the book. This will cost about six per cent more than if imported, but the time saved will, except in the case of large orders, usually be worth the difference.

In the case of G. P. Putnam's Sons, their bona fide English publications are of negligible quantity. The great majority of their issues are American works printed on this side and perhaps reprinted on the other. Yet one fiction of theirs needs to be challenged. G. P. Putnam's Sons, they say, do not sell to libraries, but the Putnam Retail Store does, and this department buys from its brother on the same terms as outside jobbers. Yet despite such left-handed delivery this is a competent establishment, and for large or steady business it has terms that a competent librarian will secure to advantage.

Now what is the difficulty at bottom? The bookseller. The necessity and benefit of booksellers we all recognize. There is no desire to minimize or pauperize them. Conditions must be such as to justify their stocking

new publications. But in the stocking of books issued by the international publishers, an indefensible system has been set up. This consists in having the New York house act as middleman between London and the American jobber, with consequent double profit to the publisher.

In such transactions, the London house is believed to grant the New York branch a discount of forty to fifty per cent and yet find profit. The duty of fifteen per cent is levied on the "market price," the law says. "Market price" is a flexible term. For two years past the Treasury has interpreted this as two-thirds the original list price in the case of bound volumes, and in the case of books imported unbound in sheets the price named in the consular invoice. The duty, therefore, is in reality only ten per cent on bound volumes and less on unbound ones. Ocean carriage we have found to be about six per cent of the list price—the publishers say eight to twelve per cent (of the wholesale price).

Apply these figures to the concrete case of a 10 shilling book:

	s.	d.
List price	10	0
45 per cent discount.....	4	6
	—	—
	5	6
Duty 15 per cent of 6s. 8d.	1	0
	—	—
	6	6
Ocean carriage, 6 per cent of list price		7
	—	—
Net to publisher	7	1

This 10 shilling book, sold to individuals by the Macmillan Co. for \$4.00, to libraries for \$3.20; by the Oxford University Press for \$4.50, or \$5.00 to persons, \$2.80 to libraries, has not of necessity entailed upon them an average direct outlay of more than \$1.35 for a year past.

And yet the LIBRARY JOURNAL says "100 per cent profit (i. e., surcharge) plus" is an overstatement. The fact is that the big surcharge is added to tempt jobbers to stock from New York, whereas this stocking should be done from London, or the publishers should be content with one profit, no matter at which end of the line taken. As for libraries, they should not only be content with nothing less than a close approximation to the London price, but those connected with educational institutions should see to it that their faculties are duly enlightened on this subject, so that a professor

should not pay \$4.00 or \$5.00 for a book easily to be had for less than \$2.50.

M. LLEWELLYN RANEY,
ANNA G. HUBBARD,
PURD B. WRIGHT,

A. L. A. Committee on Book Buying.

Books Popular in June

THE six fiction titles most in demand in the public libraries during June, according to Frank Parker Stockbridge's list in the August *Bookman*, were:

Sinclair Lewis. *Main Street*. Harcourt.
Zane Grey. *The Mysterious Rider*. Harper.
Dorothy Canfield. *The Brimming Cup*. Harcourt.
Gertrude Atherton. *The Sisters-in-Law*. Stokes.
Eleanor H. Porter. *Sister Sue*. Houghton.
Floyd Dell. *Moon-Calf*. Knopf.

The general books most in demand were:
H. G. Wells. *The Outline of History*. Macmillan.
Margot Asquith. *Margot Asquith: An Autobiography*. Doran.
Edward Bok. *The Americanization of Edward Bok*. Scribner.

Frederick O'Brien. *Mystic Isles of the South Seas*. Century.
Robert Lansing. *The Peace Negotiations*. Houghton.
Anonymous. *The Mirrors of Downing Street*. Putnam.

During the same month the six best sellers in fiction according to reports from sixty-three booksellers in fifty-one cities sent to *Books of the Month* for August, were:

Sinclair Lewis. *Main Street*. Harcourt.
Dorothy Canfield. *The Brimming Cup*. Harcourt.
Coningsby Dawson. *Kingdom Round the Corner*. Cosmopolitan.
Booth Tarkington. *Alice Adams*. Doubleday.
Zane Grey. *The Mysterious Rider*. Harper.
E. Phillips Oppenheim. *The Profiteers*. Little, Brown.

And the best sellers in general literature were:

Frederick O'Brien. *Mystic Isles of the South Seas*. Century.
H. G. Wells. *Outline of History*. Macmillan.
Robert W. Service. *Ballads of a Bohemian*. Barse.
Bernard Shaw. *Back to Methuselah*. Brentano's.
Robert Lansing. *The Peace Negotiations*. Houghton.
Anonymous. *The Mirrors of Downing Street*. Putnam.

FOR FREE DISTRIBUTION

To the Editor of the LIBRARY JOURNAL:

I have at my disposal for free distribution a number of copies of the University of Pennsylvania's "Biographical Catalogue of the Matriculates of the College . . . 1749-1893," containing about 5000 entries, and I will gladly send one of these books to any library wanting it badly enough to pay for transportation. The weight is two and half pounds.

ASA DON DICKINSON, *Librarian*
University of Pennsylvania
Philadelphia, Pa.

Library Co-operation with Latin America*

COMMUNICATION—both material and intellectual—between the United States and the Hispanic American Countries is daily becoming more easy . . . Interest in the intellectual, social, political, and economic life of the Hispanic-American peoples is keen everywhere in the United States and Canada.” How to forward intercourse between the United States and these peoples and especially by strengthening relations with the centers of book production and distribution is the subject of a report by the A. L. A. Sub-committee on Library Co-operation with Latin America, designed to accompany the remarkable display illustrative of Hispanic-American periodicals exhibited at the Swampscott conference.

Among the chief agencies mentioned by the Sub-Committee for the promotion of a good understanding and for the exchange of ideas between the United States and the other American countries are the Pan American Union, which while it has not emphasized the library aspect of the intellectual life of America has tended to foster intercourse, the exchange of publications and the general dissemination of knowledge; the International Exchange Service of the Smithsonian Institution; the Hispanic Society of America, which has begun of late years to devote attention to the Hispanic countries of America as well as those of Europe; and last, and most important, the Interamerican Division of the American Association for International Conciliation, a branch of the Carnegie Endowment for International Peace.

This Association concentrates its thought and activities upon the effort to “make America, in the broadest sense of the word, acquainted with herself, and to establish relations of friendship and co-operation between the American peoples.” In the summer of 1920 it opened correspondence with some one hundred and forty Hispanic-American libraries with a view to inducing them to join the American Library Association and to co-operate with the libraries of the United States and Canada.

Besides publishing and distributing, in the main gratuitously, the magazine *Inter-America*, it is publishing and distributing a series of works, the Biblioteca Interamericana (composed of translations of important United States books into Spanish) to the leading libraries, universities, colleges, normal schools, learned

societies, ministries of public instruction, government officials, men of letters, newspapers and magazines and important individuals in the southern countries.

An equal number, five thousand copies, of the Interamerican Library, made up of translations of important Hispanic-American books into English, will be distributed in the same manner in the United States.

A particularly useful feature of the report is a list of Hispanic American book publishers and dealers. The Latin-American cities in the first rank as publishing centers are Mexico, Buenos Aires, Rio de Janeiro, Santiago de Chile, Montevideo, Habana, Bogotá, Lima, Caracas and Quito; in the second, are São Paulo, Guayaquil, La Plata, Asunción, San José de Costa Rica, Guatemala, San Salvador, Panamá, La Paz, Sucre, Managua, Tegucigalpa, Rosario, Santiago de Cuba and some of the larger cities of México and Brazil, such as Guadalajara, Puebla, Guanajuato, Zacatecas, and Monterey; and São Salvador (Bahia), Recife (Pernambuco) and Bello Horizonte (Minas Geraes).

Altho not in America, Madrid and Barcelona are important centers for the publication of Hispanic-American books.

The principal Hispanic American publishers and booksellers are:

The sub-committee is of the opinion that a permanent committee ought to be created and the scope of the committee should be so enlarged as to include the Hispanic nations of Europe, as well as those of America, under the name of The Committee on Library Co-operation With the Hispanic Peoples.

Such a committee would serve as a medium for exchange of thought between libraries and library organizations of the respective countries and would inform librarians of the United States and Canada and of the Hispanic countries regarding development of publications in other countries, new publishers and booksellers, books and periodicals published in the respective countries, and would serve as a link between the A. L. A. and other organizations interested.

The Roosevelt Memorial Association, Inc., is collecting a library about Roosevelt, and would be glad to receive any material or information regarding material which should belong to such a collection. Address: R. W. G. Vail, Assistant Director, Bureau of Research and Information, Roosevelt Memorial Association, 1 Madison Avenue, New York City.

Correlation of Library Science Courses*

A S lack of time and funds prevented the Committee on Library Training from executing the whole duty prescribed it by the by-laws, to "investigate the whole subject of library schools," it has concentrated on the formulation of standards for library training classes and summer schools, and on a report on the character of instruction in cataloging given by library schools as a possible factor in the present situation of dearth of catalogers. The latter report is summarized elsewhere in this issue.

The purpose of this first report is to "evaluate and to seek to correlate the courses of instruction offered in training for library service by the various library training classes and summer schools of the country, thereby presenting a uniformity of standards and a basis for staff grading and certification in secondary education in library work." The Committee was further impelled to undertake this evaluation by a communication from the Library Workers' Association, which wished to see some system established whereby summer correspondence and lecture courses may all be brought into their proper relation to a library school degree, feeling that until the opportunity to take a course in library training is open to everyone that the standards in the profession can not be expected materially to advance.

The Committee believes there is a place in the system of library training for thoro, carefully prepared and properly supervised correspondence courses in certain branches of library work, especially if sponsored by a library school and if regular school credit could be granted for such work, and that some of the regular library schools granting admission by examination might well offer summer courses for which the same credit is given as for equivalent courses in the regular school, such courses, for instance, as are now open to college graduates at the University of Illinois Library School. The Committee is, however, convinced that the library schools should first adopt a uniform system of evaluating the credit granted for the various courses, as there is no uniformity in present practice, some schools assigning courses a certain number of credits, others a certain number of periods and others a certain number of hours. A unit of credit similar to the "semester hour" of the standard colleges and universities is recommended.

*Summary of report of A. L. A. Committee on Library Training, Malcolm G. Wyer, Chairman; W. W. Appleton, Emma V. Baldwin, Mary E. Hazeltine, John A. Lowe, Margaret Mann, Carrie E. Scott, Frank K. Walter.

The Sub-Committee reporting on the comparative value of training for library service given by training classes and summer schools, consisting of Carrie E. Scott (Chairman) and Frank K. Walter, elucidates these differences by a series of definitions and parallels.

Training Class. A library training class is one conducted by a library for the purpose of training students in library science for efficient service in the local library, and of developing in each individual desirable qualifications for general library work. The technical courses are presented from the viewpoint of the local organization and conditions, and the study of books, both general literature and reference, is emphasized. The course, usually six months in length and preparing for the first grade of library service, is given over for the first half to lectures and preparation of assigned work, and for the second to required practice work in various departments and branches of the library. The total hours of work for study and practice should cover about 7½ hours a day for five days in the week, or about 37½ hours a week. Apprentice classes, in which individuals are given instruction in the routine work of the library unaccompanied by any lectures or problems on the basic principles of library science, should not rank with a training class, and no certificate should be given for such work.

Summer Library Schools, conducted by State Library Commissions and a number of universities and colleges for the purpose of offering intensive courses in library science, usually for a period of six weeks, of about forty-two hours, vary in the scope of the courses given with the purpose of the institution giving them. Several universities and colleges offer general elementary courses, covering the whole field of library science, while in others, according to the report made by Henry N. Sanborn in 1920, "the aim is not so much a general birds-eye view of the field as training in one division of library science."

In the matter of entrance requirements, the minimum educational requirement for both the training class and summer school should be a complete high school course or its equivalent. Since emphasis in the majority of summer schools is placed on improving the work of those already in the service, a paid position as librarian or assistant or a definite written appointment should be an entrance requirement. Some university and college classes require college degrees or credit for at least one year's college work. Most libraries require an en-

trance examination for their training classes. Miss Welles in a paper read before the library training section in the 1917 A. L. A. conference at Louisville recommended college entrance examinations as a fair basis, if adapted to local high school standards, with technical questions omitted. One paper of one hundred points, forty on literature, thirty on history and thirty on general information would be an adequate test, and a "personality mark" should count fifty per cent toward an entrance credit. In the absence of entrance examinations to summer schools, there should also be a personality mark and an informational test, credit for which should be counted with the general average.

For both training classes and summer school the major courses in library technique require instructors with library training from accredited library schools. One instructor for every eight to twelve students is about the average in the summer schools. The Sub-Committee recommends as the essential courses to be included in the curriculum of both training class and summer school, and the minimum hours to be devoted to each: Cataloging, not less than 20 hours; Classification, 12 hours; Order work and Trade Bibliography, 5 hours; Loan Work, 5 hours in training class, 2 hours in summer school; Shelf-Listing, 2 hours; Accession, 2 hours; Book Numbers, 1 hour; Mechanical Preparation for Shelves, 1 hour; Reference Work, 12 hours; Children's Work, including juvenile Book Selection, 10 hours; Administration, at least eight lectures, with subject matter more general for summer school students than for those in training class, where the organization and scope of the local library will naturally receive more emphasis; and adult Book Selection, at least ten hours in summer school, and one lecture period a week thruout the six months of the training class.

The training class also has the advantage of cultural courses, such as sociology seminars and the study of current periodicals and newspapers, which cannot be given in the restricted time of a summer school. The summer school student, consequently, should be required to complete a year's course in reading, including standard books in general literature, fiction, history, sociology and current literature, and based on some officially recommended course, after he has taken the summer course, and to be examined on this course of reading before he is granted a certificate from the summer school.

System of Grading. A uniform system of grading should be followed, in order to get uniform standards established. The following scheme for grading manuscripts and making out averages is suggested as a basis for discussion: A or E, 95-

100; B or G plus, 90-94; C or G, 85-89; D or F, 80-84; P, 75-79; Failure, below 75. In determining the general average, in order to equalize the value of the short and long courses the course of study should be divided into three units, each worth 300. Averages should be made for each group and the general average obtained by adding these three averages and dividing by three. The relative value of the different courses is suggested as follows: Unit 1: Cataloging, 100%; Classification, 100%; Trade Bibliography and Order, 50%; Binding and Mending, 25%; Shelf-listing, 25%; average, 300%. Unit 2: Reference, 100%; Children's Work, 75%; Administration, 75%; Loan, 25%; Poster, 25%; average, 300%. Unit 3: Fiction, 100%; General Book Selection, 100%; Current Events, 100%; average, 300%; general average, 100%. Any number of courses may be included in the unit provided the sum of percentages is not more than 300.

College Credits. For the general course in training class and summer school a college or university should give at least three hours credit. Practice varies in middle-western colleges, as Butler College and Oberlin College give three hours' credit, while Miami University gives five hours.

Practice Work. For the training class Miss Welles recommends fifty per cent practice and fifty class work and study. In the summer school, if the student is inexperienced a month's practice under the direction of a trained librarian should be required.

School Library Control in Michigan

To the Editor of the LIBRARY JOURNAL:

Referring to an article appearing in the LIBRARY JOURNAL of May 15, 1921, page 442, permit me to say that neither the State Library nor the State Board of Library Commissioners have had any control of school libraries in this state. The penal fine money is devoted to the school library fund apportioned to schools maintaining libraries on the basis of the school census. The school board of each school district purchases books for the school library from a preferred list selected by the State Librarian and the Superintendent of Public Instruction. The county commissioner of schools acts in an advisory capacity with the teacher and the school board in the selection of the books from the preferred list.

The state library has charge of the traveling libraries which are sent to schools or other educational institutions; this, however, has nothing to do with school libraries.

MARY C. SPENCER, *State Librarian.*

"The Catalog Situation"

WHY are not more catalogers available? What qualities are required in catalogers which are not supplied? Do the graduates of library schools adequately meet the needs? Are catalog departments so organized as to give catalogers independent work? Do catalogers give any time to other branches of library work? Is routine work actually confined to clerical workers or are trained catalogers obliged to attend to details of typing, etc.? Letters covering these points were sent by the A. L. A. Sub-Committee on the Training of Catalogers to six college libraries, two special libraries, the Library of Congress, the H. W. Wilson Company, seven large public libraries, and to the Secretary of the Massachusetts and Minnesota Library Commissions, who sent in reports from the libraries of these two states.

Answers to the letters have cast much light on the four factors selected by the Sub-Committee as contributing to and influencing cataloging: (1) Selection of students who enter the library schools; (2) Methods of instruction in library schools; (3) Attitude of librarians towards the subject and towards their catalogers; (4) Attitude of the profession towards the subject.

There seems to be a tendency to lay too much stress in the selection of library school students on their "personal charm," or ability to meet the public generally, and what the Sub-Committee calls "the mouse type" is thought best fitted for work in the cataloging department where little or no contact with the public is necessary.

But if this type has come to be synonymous with the catalog type there is no hope for the expansion of the subject. A cataloger with executive ability put into certain catalog departments could bring new life into the whole library and probably cut the cost of administration. Since library work, combining the demand for business and scholarly attainments, requires a combination of talents often difficult to find in one individual, it is very necessary that those who select persons to enter the profession should study the demands as well as the individual. The research and bibliographical side of library work should be given the same consideration as is given to the social or public side. It should receive its proper emphasis and be so presented to prospective librarians as to give it its true value in the library scheme.

*Summary of report of A. L. A. Sub-Committee on the Training of Catalogers, Margaret Mann, chairman.

The Sub-Committee suggests that a pamphlet should be prepared with this in mind, showing what cataloging really is: its administrative bearing on the library scheme, its relation to research and its interest as a profession, but omitting as far as possible the mechanical methods of constructing a catalog. The library schools could give this pamphlet to prospective students.

"There is a tendency in library schools to tie up all questions of the detail of form, accuracy, neatness, narrowness, legibility, style, orthography and punctuation with the instruction in cataloging." This method of teaching, however, is likely to result in an abiding dislike for cataloging on the part of students who have executive ability but are unwilling to spend time and effort on mastering so much detail. It has been found that a large majority of library school graduates who do take up cataloging are well grounded in this technique, but are also often lacking in the ability to discard iron-clad rules when necessary and to apply reason to a case not covered by rules; also that the manufacture of technically perfect catalog cards looms larger before them than the problem of getting the books before the reader in their true significance. Since much library school instruction lays heavier stress on the author side than the subject side of cataloging, graduates are not altogether to blame for their frequent inability to grasp the problems of subject headings. It is more important for them to know this in view of the fact that probably seventy-five per cent of the users of a catalog are in search of information from the subject side rather than from the author side.

The teaching and drill of technique can be removed from cataloging exclusively by bringing it into relation with the curriculum as a whole. Tests of accuracy, neatness, spelling, punctuation, etc., can be given which will soon disclose the strength or weakness of the student in these particulars, without making the test an exercise in writing catalog cards. Such details are as essential in the preparation of any other manuscript or copy, and might equally as well be linked up with reference work, bibliography or the course in library printing. In this way more time can be given to the larger and broader considerations of the subject. Catalogers' time need not be wasted in doing the work which a typist can do, and they can study the demands made upon the special library with which they are connected, and so master the

books making up the collection as to make available all the information they contain.

The variety of the demands made on the cataloger in the large and small libraries would make it seem wise for the library school to offer an advanced elective course in cataloging. By offering advanced work and by segregating the unnecessary detail from the elementary course there would be opportunity for more emphasis on subject headings, reference books and actual cataloging experience.

The results of the investigation of the Sub-Committee would go to show that the work of catalogers is appreciated in most libraries, and that there is an effort made to give catalogers every consideration, tho it is also probably true that they are underpaid except in instances where they combine a certain amount of executive ability with their special subject.

Most libraries, even those of medium size, reported that the work is so organized that catalogers are relieved of minor details.

The catalogers' intensive knowledge of all material that enters the library is not used in other departments of the library as much as it might and should be. But Yale reports that "the catalogers do assist at the Reference Desk, answer questions which come thru the mail, in the subjects which they are handling, assist in the arrangement of exhibitions, call the attention of the order department to books needed, etc." If libraries would find it possible so to arrange the staff as to make an interchange of work between departments, there would undoubtedly be an improvement in all branches. Under prevailing conditions there is little opportunity for personal distinction in cataloging work, as the work of the individual cataloger is anonymous. Some library administrators, influenced by their trustees, are frequently apt to consider the expense of cataloging without also taking into consideration the dependence of all other branches of library work on the catalog, and without realizing that catalogers are creating an instrument which is to last as long as the library lasts, which shows the results of the analytical tests of books and without which the reference assistants could not fulfill their part of the service which they are supposed to give.

The attitude of the profession towards the subject is, to a great extent, the fault of the catalogers themselves. The profession in general wants results without too much discussion of the methods employed to obtain these results. Little is gained by such discussion, and much may be lost. It has already furnished a target

for some writers in and out of the library profession who regard catalogs and catalogers as fair game, and it is likely to create an entirely false impression of the really solid and valuable work of the cataloger. "So much attention has been focused upon minor, tho important, qualifications of the cataloger that few have discovered the real significance and reward of this work."

So the Sub-Committee further suggests:

That librarians study the organization of the library with a view to greater opportunities for catalogers to develop and use the information they have to give. Assistants can derive neither pleasure nor profit from their work without inspiration from the head of the institution.

That the members of the library profession inform themselves about the subject of cataloging, that they may estimate it from its results rather than from its methods.

Recruiting for Library Service*

THE A. L. A. Committee on Recruiting for Library Service, appointed by President Tyler November 24, 1920, has concentrated its efforts on the presentation of library work as a desirable vocation to the undergraduates of American colleges and universities. No attempt was made to reach high school students, as the Committee considered such recruiting as more within the province of local libraries and library associations.

In January the committee, thru Headquarters office, circularized two hundred college and university librarians with letters containing three suggestions as to how the librarian might present librarianship as a calling to undergraduates: attractively written articles in student publications; talks by convincing speakers, such as the librarian of the college or an alumnus who is a librarian, to student assemblies; personal interviews with students who seem adapted to library work. Vocational advisors in the same institutions were also sent letters, while the A. L. A. headquarters provided them with ammunition in the shape of literature free or at cost. Approximately three thousand copies of "Books and a Vocation," published by the Association of American Library Schools, have been distributed to date.

Funds are lacking to make more publications of this kind entirely free for distribution by vocational advisors and from the desks of college libraries thruout the country, but it is expected

*Summary of report of A. L. A. Committee on Recruiting for library Service, Judson T. Jennings, chairman.

that literature can be supplied in sufficient quantity to be loaned at least to interested students.

Letters have also been sent to a selected list of writers on vocational subjects and to vocational guidance associations, assuming their interest in librarianship as a profession, stating the need for educated, trained and experienced workers, and referring the writers to the local librarians, to whom a copy of the letter was sent, for further information. The letters to associations asked that a definite place on their program be provided for the presentation of library work as a desirable vocation.

A feature not yet developed but likely to bring results is the preparation of articles on library work for periodicals and magazines.

Headquarters circularized the college papers, sending material which could be used editorially or as a news story, and individual requests for information by editors personally interested or follow-up "interviews" with the college librarian showed that some impression had been made.

Committees were appointed by the following schools:

Library School of the Carnegie Library of Atlanta, Library School of the Los Angeles Pub-

lic Library, Chautauqua School for Librarians, Library School of the University of Wisconsin, Library School of Western Reserve University, New York State Library School, Syracuse University Library School, University of Illinois Library School, University of Washington Library School, Library School of The New York Public Library.

In the last-named school the work was assigned to the Alumni Council, which consists of a representative of each class which has been enrolled in the school, and already has machinery set up for carrying out thru Regional Chairmen such plans as fit in with the work of the A. L. A. Committee. An attractive poster, the expense of which was met by the school, was prepared to be sent out for posting on school and college bulletin boards. Information on salaries to be expected by library workers with one or two years' training in library schools was compiled by Ernest J. Reece (LIBRARY JOURNAL, May 15) to enable advisors and vocation directors to answer with confidence one of the most embarrassing of the objections raised by students against taking up library work as a career.

PROPOSED NEW BUILDING FOR THE LIBRARY OF THE UNIVERSITY OF LOUVAIN; WARREN AND WETMORE, NEW YORK, ARCHITECTS. THE CORNER STONE WAS LAID ON JULY 27TH BY PRESIDENT NICHOLAS MURRAY BUTLER

A. L. A. Presidents 1876-1903

These portraits of the presidents of the A. L. A. from 1876 to 1903 were collected by Mrs. Henry J. Carr.

Top Row, Left to Right: Justin Winsor, 1876-85; William Frederick Poole, 1885-87; Charles Ammi Cutter, 1887-89.

Second Row, Frederick Morgan Crunden, 1889-90; Samuel Swett Green, 1891; William Isaac Fletcher, 1891-92; Melvil Dewey, 1892-93.

Third Row: Josephus Nelson Larned, 1893-94; Henry Munson Utley, 1894-95; John Cotton Dana, 1895-96.

Fourth Row: William Howard Brett, 1896-97; Herbert Putnam, 1898; William Coolidge Lane, 1898-99; Reuben Gold Thwaites, 1899-1900.

Fifth Row: Henry James Carr, 1900-01; John Shaw Billings, 1901-02; James Kendall Hosmer, 1902-03.

The New Abridged Decimal Classification*

THERE has been a great increase in recent years in the number of small libraries in this country, caused by the normal development of public libraries and the growth of school and special libraries. There has been at the same time an inevitable increase in the size and cost of the full tables of the Decimal Classification. Both the earlier abridged editions were too old to make provision for the newer topics which form a large part of the present day library, so that a new edition of the Abridgment is welcome.

The Explanation has in the main been brought up to date. "Name catalog," a survival of the old days of separate author and subject lists, has been retained however when "catalog" would be better. The section on book numbers admits that many librarians no longer consider them necessary but their use is assumed thruout. Under Fiction, p. 11, for example, we read "Omit the class number entirely and use merely the book number." As a matter of fact, when book numbers are abandoned they are usually dropped first of all from fiction. Under "Sizes on shelves," p. 5, the symbol for over-size is to be prefixed to the book number, tho even when book numbers are used many librarians prefer to prefix the size symbol to the class number.

The present work, unlike the earlier editions, is not merely an abridgment of the full tables but a simplification as well. One has only to compare, for instance, the sections on 570, biology, in the two cases to see how much clearer the new edition is, especially to the untrained and inexperienced classifier. Some of the new notes, like the one under 900, history, are so helpful that one wishes there were more of them.

What might be called "synonymous numbers" have in general been helpfully treated. For example, under 214, Providence, the note "See 231 for Christian view" is enlightening. There have been retained from the full tables, however, many references that simply send the classifier from one heading to another, with no explanation. For example, under 391, one reads, "See 646 Clothing," and under 646 "See also 391

Costume and care of the person." (One wonders incidentally why "See" in one place and "See also" in another.) The novice is quite as likely to be puzzled as helped by this and would still be in doubt as to which number should be given to a book discussing, let us say, the principles of artistic dress; nor in this case would the index help him out. There are too many references of this sort which explain nothing and are clear only to the experienced classifier. The directions under 390 would seem to be adequate for books on modern customs, but every beginner is puzzled to know where to class material on the daily life of ancient people; e. g. the Greeks or Romans, and nowhere in the book could he find any help.

Under individual biography the use of the number 92 is advised and no mention is made of the shorter and more frequently used B.

As this abridgment is intended especially for small libraries it is difficult to understand why the elaborate "Table for school and college publications" should be retained, as it is seldom used even in large libraries. There are very few small libraries that would have enough material on the geology of Europe, Asia, or Africa to warrant printing the geographical subdivisions under these heads. In general, however, the large garment has been cut down intelligently to meet the needs of the smaller stature.

It is a pity that there is nowhere a suggestion of the possibility of an alphabetic as an alternative to a numerical arrangement. Most small libraries would find their material on American geology more useful if arranged alphabetically by states rather than by the groups given in the tables. It would have been well too to suggest various alternatives in literature; such as combining 814 and 818, 824 and 828, etc. instead of keeping the separate group of miscellany. In an open shelf library this facilitates the finding of the works of a prose writer. Many libraries too would like to consider the possibility of arranging all poetry written in English in one alphabet, and all plays in another, regardless of whether the author was born in Australia, Canada, England, or the United States. This arrangement has as many advantages for poetry and plays as for fiction.

*Dewey, Melvil. Abridged Decimal Classification and Relativ Index. . . Ed. 3 Revised. Forest Press, Lake Placid Club, N. Y., 1921.

The index shows a gratifying number of new topics, tho X-rays and Women's Clubs are missing here as they are from the index to the full tables. In a work which will undoubtedly be much used in school libraries, it would be well to have entries under Montessori method and Gary system.

The new work contains not quite so many pages as the former editions, but this is due to economy in printing, as there is an increased number of entries, especially in the index. Legibility has in no case been sacrificed and the book is pleasing to the eye and easy to consult.

MARY L. SUTLIFF.

Library Service for Schools*

ONE of the difficulties which has stood in the way of the proper development of school libraries, has been the task of getting information concerning them before the people who should be most interested. The library sections of the educational associations are attended by librarians. Discussions of school libraries appear in the library periodicals, and are read by librarians. The fact that teachers fail to "co-operate" causes the school librarians to wring their hands and almost to despair of being able to attain the ideals they have set for themselves. No doubt teachers would gladly co-operate if they understood what librarians are trying to do, or if they knew how much help they could receive not only from the school library, but from the local public library and the state library.

A recent *Bulletin* of the Department of Education of the Commonwealth of Massachusetts is a manual for teachers and librarians on the library service which the state is able to render to the schools. Prepared by librarians and educators of experience, it not only sets forth clearly and in untechnical terms the library resources of the State of Massachusetts, but it discusses school library problems and devotes two-thirds of its eighty pages to information which is of value to teachers and school librarians thruout the country. Without going deeply into the technical side of the work, enough space is devoted to the catalog and the classification to show their use.

The major part of the *Bulletin* is devoted to the selection of books for the school library, and to an outline for teaching the use of the library. Several excellent annotated book lists are given, covering both general reference material and magazines, as well as books and mag-

azines on education. Brief bibliographies at the ends of chapters add much to the value of the *Bulletin* for general use.

The authors have taken a distinctly advanced point of view in their treatment of the school library. Almost all the printed matter of recent years dealing with the question of the library and the school, has practically ignored the elementary school and confined discussion to the problems of the high school. The majority of school systems giving library instruction at all, give it in the high school, neglecting entirely the grades where all the children could be reached, because all of the children pass thru the grades and only a small minority of them thru the high school. The outline given here for the instruction in the use of the library, gives quite as much attention to the grades as to the high school. The importance of library work in the grades will be recognized more and more in the future. The work of the high school library will be greatly simplified when the school library is unified and the instruction is carried on from the first grade under the supervision of a trained librarian who will be the school librarian instead of the librarian of the high school. This *Bulletin* points the way to an excellent development of the school library, and might well be used as a manual in other states. Massachusetts, which has long held the standard for the rest of the country of "a public library in every town" once more sets an example which could be followed with profit in many states which are now doing little or nothing to promote school library interests.

SABRA W. VOUGHT.

FOR SALE

The Library of the U. S. Marine Hospital, New Orleans (La.) has for sale several bound volumes and odd numbers of the *Century*, *Forum*, *Harper's*, *Open Court*, *Popular Science Monthly*, *Scribner's*, and *Dial*.

For prices and other particulars write to the librarian.

*Library service for schools, a manual for teachers and librarians, to be kept in the school or library. Prepared by Martha C. Pritchard, former librarian State Normal School, Bridgewater, Mass.; Florence E. Damon, librarian of the State Normal School, Bridgewater, Mass.; E. Louise Jones, field secretary of the Division of Public Libraries, Department of Education; Clarence D. Kingsley, supervisor of secondary education, Department of Education.

THE LIBRARY JOURNAL

TWICE-A-MONTH

AUGUST, 1921

ONE of the interesting features of the Swampscott conference was the presence of Melvil Dewey, unusual at recent conferences, as a representative of the founders, and he was decorated by Mrs. Carr with the gold ribbon which is meant to celebrate attendance at twenty-five A. L. A. conferences. We were in error in speaking recently of Mrs. Dewey as the only woman survivor from the 1876 meeting, and the Swampscott conference did itself honor in sending its greetings and appreciation to Miss Mathews, still a resident of Lynn tho for some years past retired from the active world by serious and sad illness. The conference also sent its sympathy to John G. Moulton, in well deserved tribute to one who had done great service to the library profession by his leadership in Massachusetts, who had done more than his bit in A. L. A. war work abroad, who had been largely responsible for the choice of Swampscott for a meeting place, and who in every way had earned the respect and affection of the many hundreds of friends who were saddened a few days later by the word of his untimely death.

★ ★ ★ ★ ★ ★ ★

THE report of Dr. Raney on book buying pre-printed for the Swampscott conference and reprinted on another page, was especially interesting for its summary of the previous history of his committee and its predecessor which fought out with the American Publishers' Association the battle over library discounts. It was a serious disappointment to librarians that the estimate was not confirmed which gave eight per cent as the actual increase of cost to libraries when the net price system came into vogue, and this necessarily led to sharp contest in defence of library interests. The cost of marketing books, whether by publisher, importer or retailer, is so great, as librarians have reason to know from their own costs of housing and circulation, that the economical method in the case of imported books is to cut out the middleman or men and import direct from London, as the Committee advises. Under the present conditions of exchange this is especially economical. The reaction is, however, not to be over-

looked, that the loss of library purchases from the American market may make it impracticable to import the small editions of those books which are of professional rather than popular sale, thus withdrawing many books from American attention. It is these "overhead costs" which Dr. Raney overlooks in reiterating in the discussions at Swampscott his formula of "100 Per Cent Profit Plus" and challenging our statement that between thirty and forty cents to the shilling is a fair advertised price. This takes into account the discount necessary for the retail bookseller to keep stock and do business, as well as library discounts and when these are deducted and actual overhead costs to the importer reckoned there is no such thing as 100 per cent profit, unless it be on the few copies the importer himself sells at advertised retail price. Thruout the discussions on the pricing of books such facts should not be ignored, and it is to be hoped that all classes interested in the distribution of books may recognize their common aim, as illustrated in the welcome given by vote of the A. L. A. to the recently organized National Association of Book Publishers.

★ ★ ★ ★ ★ ★ ★

THE Fordney Tariff bill which has passed the House, but is likely to receive extensive modification in the Senate, changes the tariff on books to twenty per cent, removes old books and books in foreign languages from the free list and makes American prices instead of foreign costs the basis of valuation. The changes in valuation and duties do not affect libraries, tho they emphasize the difference between costs and prices to libraries and those to the book-trade and individual purchasers. But libraries are seriously involved in the proposal to make old and foreign books dutiable because they must provide the necessary documents for free entry in these cases as well as with respect to English books. This would be a serious burden. Moreover, the new rule would prevent the importation of collections of old and rare books for American sale and thus limit the opportunity of libraries to make purchases. The A. L. A. committee should take prompt steps to make its voice heard in protest.

AN interesting question of library policy is on trial before the public opinion of Brookline. The trustees of the Brookline library declined to purchase Professor Chafee's "Freedom of Speech" or to receive it as a gift, on the avowed ground that it had made mis-statements in respect to a contemporary trial which the author had failed to correct when his attention was called to them, and that the character of the book had been impeached in a petition of eminent lawyers who had asked the Harvard Overseers to discipline the Professor. Professor Chafee had replied that he had corrected errors called to his notice, and as a result of the hearings held by a special committee of the Harvard Board of Overseers, the Board has declined to take the desired action and has given the petitioners "leave to withdraw." The question whether a particular book or periodical should be included in a library is one for the local board to determine; but an appeal to local public opinion from such a decision is properly in order, altho it is some times difficult to get a fair poll of public opinion in such a matter. When Henry Ford's *Dearborn Independent* was excluded from the Lynn library because of its anti-Jewish propogandism its editor made a violent attack upon the librarian which was not at all in order. As a complement of free speech

and free press, freedom of action on the part of responsible officials and local boards should be equally respected.

★ ★ ★ ★ ★ ★ ★

AN extraordinary tempest in Seattle arising from the action of the three women members of the library board who alleged that their ideals "cannot be comprehended by a majority" of the four men members, has been quelled by a firm letter from the Mayor supporting the majority and removing the minority, who announced that there would be no compromise with the majority. The storm center was an "aggrieved and discharged" employee who seemed to have been removed for cause, and an investigation by the Municipal League supported the majority in its action while a Civic Betterment League, which the women claim to represent, was said to be created for the occasion. The Mayor pointed out that the majority of the board must rule and that those who took individual rather than institutional views must give way. The defiant ladies are therefore to be replaced, the library board and the librarian, who was also attacked, have been vindicated, and for the time being "order reigns in Warsaw" altho the disputants are still on the war-path.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION

OFFICERS elected for the Convention year 1920-1921 are: President, Azariah S. Root, librarian of Oberlin College; first vice-president, Samuel H. Ranck of Grand Rapids; second vice-president, Claribel R. Barnett, librarian of the U. S. Department of Agriculture; Executive Board, Gratia Countryman, Carl B. Roden, George S. Godard and H. H. B. Meyer.

AGRICULTURAL LIBRARIES SECTION

The annual meeting of the Agricultural Libraries Section was held on the evening of June 21st with Malcolm G. Wyer of the University of Nebraska in the chair. There were twenty-seven persons present. Before proceeding to the regular program H. W. Wilson was given an opportunity to present the problem of financing the *Agricultural Index* which he stated was not paying expenses. After some discussion the chair was authorized to appoint a committee of three to meet with Mr. Wilson and endeavor to arrive at a solution of the problem.

Eunice R. Oberly of the Bureau of Plant Industry then read her paper entitled "Contributions of Librarians to Agricultural History and Research."

Alice M. Dougan of Purdue University Library read Mr. Hepburn's paper on "A Study of Agricultural Library Buildings." This was followed by discussion and Charles A. Green of Massachusetts Agricultural College exhibited the plans for his prospective new building.

Owing to the lateness of the hour the reading of the last two papers on Latin-American Agricultural Periodicals and Agricultural Publications in Canada was omitted. The chairman also spoke of the numerous suggestions for reform in the publication of agricultural bulletins which had been sent to the Section for action. It was voted to refer these to the Editorial Association.

The following officers were elected: President, Lucy E. Fay, University of Tennessee Library, Knoxville, Tenn.; secretary, Mary G. Lacy, Department of Agriculture Library, Washington, D. C.

WILLARD P. LEWIS, *Acting Secretary.*

CATALOG SECTION

"The Catalog Situation" and simplified cataloging were the main subjects discussed at the meetings of the Catalog Section. Papers were presented by Archibald Cary Coolidge on "The Objects of Cataloging"; by Louise Fargo Brown of Vassar College on "Adventures Among Catalogs"; by Frances Rathbone Coe on "Making the Dry Side of Cataloging Interesting"; by Mrs. Jennie T. Jennings on "How the Library of Congress Classification Works out in the Public Library"; by Clara P. Briggs on "The Handling of Refractory and Unusual Material in the Harvard Wendell Collection"; and by Henry B. Van Hoesen on "Short Cuts in Cataloging."

Referring to Dr. Coolidge's suggestion that occasional works in out-of-the-way tongues should not be fully cataloged at most libraries, Mrs. Jennings said that in the St. Paul Public Library only the author card is made for such works, but as soon as a demand arises for sub-cataloging, the books are cataloged by subject.

Suggestions as to remedies for the catalog situation were offered by Miss Mann, who spoke along the lines of the report of the Subcommittee on Library Training of Catalogers of which she is chairman. This report is summarized elsewhere in this number.

Referring to the isolation of the cataloging staff in many libraries, Miss Rathbone said that "until the cataloger is not only recognized, but . . . given a chance to work with the public . . . we are not going to be able to turn people in that direction."

Myra Poland said that at the Wilkes-Barre Public Library the catalogers have each two evenings in the reference room and can also go to the children's room.

Referring to Mrs. Coe's suggestion of organizing the catalog staff "along scientific lines rather than along purely routine lines," Miss Mann said that at Princeton it is done very satisfactorily, but it is rather difficult to arrange in every library.

Harriet B. Gooch of the Pratt School said that "in the last nine years, one-sixth of the people [at Pratt] have become catalogers," that people like cataloging but do not like a cataloging position, that in reply to a question put recently to twenty-four students, all but three said they liked cataloging, but all but three also said they would not like a cataloging position. As a rule, the reason given was the impossibility of contact with the public.

Mary Baker, speaking from the standpoint of the cataloger in charge of a catalog department, thought that it would be difficult to arrange for satisfactory transfers between dif-

ferent departments and that the problem might be largely solved if variety were provided in the cataloger's work. To be good at record work is not enough; the cataloger must grasp the public point of view as well. From her experience as an instructor in cataloging, Miss Baker agreed with Miss Gooch that students enjoy cataloging.

Phineas L. Windsor pointed out that administrative positions had attracted many of the best people and that "catalogers are pretty largely to blame for whatever there is in the present situation which is unsatisfactory. . . . I wish you would take up your work and when anything interesting in the relation of cataloging to the outside world comes up, be sure you have some hand in that work, and do not let the head librarian go ahead and do it, while you just sit meekly by."

T. Franklin Currier told of the successful ways in which the Harvard catalog department had been utilized in managing some special phase of work—for example, the making of a special list or the handling of a special collection—appropriation for these special tasks being provided. The cataloger of today does not, or ought not do mechanical work such as was necessary in the early days. A wide, and, still more, a specialized kind of knowledge is wanted today, and the cataloger in a special subject ought to be able to read the latest books on that subject, much as a college professor or instructor does, during, not after, a long working day.

Anna M. Monrad pointed out that librarians do not appreciate the value of cataloging; that the work of the reference library in the war received little recognition compared with that of any other kind of library; and that, with a view to minimizing the amount of routine work, the Catalog Section should aim at promoting more co-operation in book buying and in union lists. Referring to organizing cataloging by topics, that is done at Yale, as far as cataloging and classification are concerned, and somewhat in special reference work. The great difficulty in organizing the catalog department by topics is that there is insufficient appropriation. Catalogers cannot do a full day's cataloging work and keep abreast with any special subject, nor are salaries offered sufficient to entice college graduates to enter library work while pursuing their studies.

Mary E. Hyde, from her five years' experience as a cataloger and several years' teaching of cataloging, thought that the solution of the catalog difficulty is, to some extent, in the hands of the cataloging teachers who can awaken interest, but that many difficulties are outside the

teacher's control. The student interested in cataloging hears cataloging spoken of slightingly by people who have never cataloged. Then, too, cataloging departments are often in undesirable quarters, and "some of the people at the head of the cataloging department are not blessed with good dispositions," and are, furthermore, unable to arrange the work so as to provide the variety necessary to hold interest.

Miss Hyde thought that a new edition of the A. L. A. list of subject headings or a modified and simplified L. C. list would be enormously encouraging to the catalogers of this country.

On the suggestion of J. C. M. Hanson, sent by mail, the Section considered how to rally around the Library of Congress in its effort to secure trained catalogers. After hearing from Mr. Martel that the difficulty is largely one of salary, a communication on this subject was sent to the Council and the Association adopted a resolution endorsing this, and approving the sending of the communication to the chairman of the Congressional Joint Committee on Civil Service and the petition that the Executive Board consider sending a representative to Washington to argue such action as would enable the Library of Congress to compete successfully with other large libraries and with business houses in securing capable assistants.

CHILDREN'S SECTION

The Children's Section held two general sessions and two business meetings during the conference week.

The first general session was held Tuesday afternoon, June 21, with Alice I. Hazeltine presiding. The topic discussed was Children's Book Week, from three points of view—those of the publisher, the librarian and the bookseller. Frederic G. Melcher spoke on "Children's Book Week: a National Movement." Mr. Melcher told enthusiastically of the results of Children's Book Week in 1920, and of the hearty co-operation which had been given and would be given again in 1921 by women's clubs; Boy Scout organizations; churches; State Library Commissions; book stores; authors; magazine editors; moving picture managers; state and county fairs and newspapers. Replying to the suggestion that the slogan for Book Week be "better" rather than "more" books in the home, Mr. Melcher said that it was thought best to avoid any "uplift" propaganda; that the aim of the publishers and booksellers in their co-operation is to produce and sell the best books for children. The librarian's point of view was given by Clara W. Hunt, who emphasized the opportunity for publicity which this book week affords, reminding us at the same time that it

must be so used as to advertise the worth-while books, not the mediocre and undesirable. The bookseller's point of view was given by Bertha Mahoney of the Bookshop for Boys and Girls, Boston, who pointed out that permanent interest in book buying and reading can be aroused by this week of intensive advertising and urged all forces interested to unite in an effort to secure better reviewing and advertising of children's books. A fifteen-minute general discussion followed, opened by Franklin K. Matthews, of the National Boy Scout organization, who said that this week will be successful "in proportion as we put brains and conscience into it."

The report of the Book Production Committee was read by Alice Jordan, chairman. This committee is to be continued with the same personnel.

The second general session was held Wednesday afternoon, June 22. Elva S. Smith of the Carnegie Library of Pittsburgh, speaking on "Present Day Problems in Book Selection," advocated maintaining high standards in our selection of books for children, keeping the best of the old and choosing from the new only those which have intrinsic merit.

Effie L. Power's paper on "The Children's Librarian of Today and Tomorrow" is given in full in this number.

Following Miss Power's paper there was discussion of various problems and phases of work: Book Reviews by Lenore Power and Marion Cutter, who pointed out that the magazines and newspapers which give the best book reviews do not give enough space to reviews of children's books, that reviews should not be made a medium for one's own interpretation and that we need more reviewers and more "discriminating" reviews; "The Project Problem and Reserve Books" by Jean Rose and Julia Carter; "Story-telling and Club Work" by Lillian Smith, who spoke enthusiastically of the results of both activities and their influence upon children, and by Nina C. Brotherton, who spoke in regard to training for story-telling to children, mentioning the three "essentials" to be obtained thru training: (1) instruction in selection of stories; (2) instruction in adaptation of material; (3) instruction in methods of presentation, with practice under supervision before groups of children; "Reading for Credit" by Marion Schwab who warned against making reading an obligation rather than a pleasure to school children; and "Attendance at the A. L. A.," by Miss Day who urged attendance at meetings because of the benefit and inspiration obtained from this general discussion of problems which confront us all.

At the close of this session a film was shown of the children's library work in France. This was done thru the courtesy of the American Committee for the Devastated Regions of France, and the report of the work from Jessie Carson, director, Library Department, was read by Mary E. Ahern.

At the business meeting, committee reports were presented, committees appointed, and two new committees created. The Booklist Committee is to be continued and Elizabeth Knapp and Janet Jerome were appointed members, Miss Knapp as chairman with power of appointing other members as may seem necessary. The new committees created were: (1) A Committee on Book Evaluation, to be made up of five members of the section, to serve for one year each; (2) A Publicity Committee, to develop work with children, to have three members, both committees to be appointed by the incoming chairman.

The following officers were elected: Chairman, Clara W. Hunt, superintendent of the Children's Department of the Brooklyn Public Library; vice-chairman, Gertrude E. Avey, Chief Children's Librarian of the Cincinnati Public Library; secretary, Lenore St. J. Power of the New York Public Library.

GRACE ENDICOTT, *Secretary.*

COLLEGE AND REFERENCE SECTION

The college and reference section met on the lawn on Friday afternoon, June 24th. About two hundred and fifty attended. Augustus H. Shearer of the Grosvenor Library presided.

M. Llewellyn Raney of Johns Hopkins University spoke on "The Present Status of Foreign Book-Buying." A great many people were especially interested, as they had read the bulletins of the committee, and the report. Dr. Raney drew freely on these and on his forthcoming bulletin, but was able to go more intimately into certain phases than he had done in print. He took up first the book trade with Germany and went into the different plans of the German publishers, the Boersenverein, the booksellers and the government. The general advice was that twice the domestic rate plus ten per cent was a very fair price. As to English books, Dr. Raney defended his Bulletin entitled "100% Profit Plus" and gave figures and reasoning which showed that some American publishers had evidently made much more than 100% profit. He then went on to show how some houses had come down and advised acceptance of the rate of the English price at current exchange for the shilling plus two cents per shilling for expense, or direct importation

if the book could be waited for. Parcel post was advised in preference to freight always. The proposition of the Agence des Libraires et des Publications (A. L. P.) was discussed at length, with regard to new books, periodicals and antiquities. Comments will appear in Bulletin 9.

Nathaniel L. Goodrich of Dartmouth College gave a statement of some fairly extensive buying in Germany. Dartmouth had some free money, and a member of the faculty going to France undertook to go to Germany to purchase books. Altogether, he had \$4,077 in marks and francs to spend. The cables and transportation cost about \$1,000, that is, a total of about \$5,077. The material is not yet all unpacked or counted, and the number of "volumes" may be larger, but 5,105 volumes at least were secured, many or most of them of sets of scientific periodicals. At present there is another man doing the same thing, whose expenses are being paid, and it is estimated that the total expense will be about \$1.35 a volume. Mr. Goodrich confirmed the statement of Dr. Raney about mails being preferable to freight.

Franklin F. Hopper, chairman of the A. L. A. Committee on Administration, spoke on the subject of the A. L. A. questionnaire for library statistics. This was first sent out in 1914 for information for A. L. A. headquarters and for the libraries themselves, and about seven hundred libraries reported. It was sent out again in 1921 with additional items, mainly about salaries. The trouble felt was that it was not applicable to college and reference libraries. Is the form suitable? Can it be revised to apply to both reference and circulating libraries, or shall there be a separate form for the former? Upon the conclusion of Mr. Hopper's statement of the problem, it was moved that a committee be appointed from the section to work with the Administration Committee.

Herbert O. Brigham of the Rhode Island State Library presented the plans of the Information Section of the National Research Council. The Council was organized during the war and has been continued, receiving \$5,000,000 from the Carnegie Corporation, in part for a building, \$500,000 from the Rockefeller Foundation, and other amounts from the General Education Board, the Commonwealth Board, and several corporations. Bulletins, Reprints and Circulars are issued. The organ is the *Proceedings of the National Academy of Science*. The purpose is to assist research in various ways, to encourage research in universities and colleges, to link industrial concerns with research work, to urge the sup-

port of special libraries, to publish papers, to prepare bibliographies. The Information Service is a clearing house for scientific information to co-operate with informational sources, including libraries, laboratories, research institutions and individuals. It obtains information about problems and work in process, and issues bulletins with information about laboratories and funds available for research. Inquiries are answered without charge, but there is a fee for special research. The Council is independent of the government and of any commercial organization. The Research Information Service is headed by Dr. Robert M. Yerkes and has its headquarters in Washington.

Clement W. Andrews of the John Crerar Library stated that two members of the Council were present, Harrison W. Craver and himself, and added two points of interest to libraries—that the Council had exerted influence on the Smithsonian to reissue Bolton; and hoped to take a census of American libraries for research. Eunice R. Oberly of the Bureau of Plant Industry said that there was proposed the establishment of a clearing house for duplicate separates and duplicate periodicals. It has also been suggested that there should be co-operation with reference libraries in reproducing at cost of time short reference lists.

At this point, a letter was read from Robert J. Usher of the John Crerar Library on brief lists of references on specific questions.

Walter L. Brown of the Buffalo Public Library followed, and speaking from the standpoint of the public libraries, said they were in especial need of short lists backed by authorities. Such lists would count for a great deal more than lists made by public libraries themselves. Selected books have greater circulation than the mass of books. Learned libraries take pride in making lists, but the question is, does the public get the benefit? Mr. Brown spoke, by request, of a list just published by his library, "The United States," compiled in response to a demand, but reiterated in closing the need for brief lists from authoritative sources.

Harry M. Lydenberg presented the work of the Committee on Foreign Publications, and read parts of its report. One part referred especially to relations with G. E. Stechert and Company, and another to the possibility of making lists of duplicates available for international exchange, together with periodicals wanted, such lists to be sent to the Institute of International Education. Mr. Sloog of the A. L. P. referred to certain possibilities of filling in periodicals, and Dr. Andrews in his discussion said that of one hundred and fifty-one periodicals for which 1917 and 1918 num-

bers were still lacking, Hassarowitz had reported fifty-three dead, so that it might be found that gaps in American libraries were not so serious as feared.

Jennie Welland, editor of the *New York Times Index*, presented the suggestion of a monthly issue of the *Index*, with an annual cumulation, and asked for serious consideration by members of the section in event of a questionnaire being sent out by the *Times*.

May Lamberton Becker of the *New York Evening Post*, editor of the Reader's Guide of that paper, indicated how the list was used, how made up and its relations with libraries. Mrs. Becker concluded with the query, "What does the American reader want?" with the answer deduced from her own experience.

Mary A. Hartwell of the Superintendent of Documents' office, who was present, was asked two questions of interest to college and reference librarians: When will volume two of the Checklist of U. S. Documents be issued? and what can we do about it? Her answer was, "I don't know," but she went on to say: "The Checklist was issued in 1911 and the catalogers who were working on the Checklist then turned their attention to the completion of other office publications which had been delayed while the Checklist was being compiled. Then the war came on and our catalogers began to leave to accept positions either in other government departments which paid higher salaries than ours for similar work, or else to accept positions in commercial houses at greater salaries than are provided for us by law. Salaries are so low that we can neither hold our assistants nor attract catalogers to fill vacancies which have existed for several years. Our turnover during the war period was very high. It is a wonder to us all that we have been able to keep up to date the *Monthly Catalogues*, the indexes thereto, and the series of *Document Indexes*. But the Document Catalogues have fallen seriously behind. We are now working on the 64th Congress Document Catalogue for the two years ending June 30, 1917, which will probably be ready to go to press either this fall or winter. Before leaving Washington, I asked Mr. Tisdell, our new Superintendent of Documents, what I should say in case I were asked about the Checklist, and he said that nothing could be done about the Checklist until we had caught up on the *Document Catalogues*. This means that it will necessarily be several years. Conditions in our office can only be relieved by securing from Congress increased appropriations to hold our present force, to fill vacancies, and to build up an additional force for compiling what the librarians need so much:

namely, a supplement to the *Checklist* and an index to the *Checklist* and supplement. You librarians must help by proving to senators and representatives, particularly the Appropriations Committees, the necessity for increased appropriations for our office. The librarian of the Bureau of Mines, Washington, D. C., suggests that you write individually to your Congressmen."

Later, Mr. Tweedell made a motion, which was carried, to the effect that the chairman of the section should also write to the proper authorities at Washington, letters of appreciation of the catalogs and indexes of the Superintendent of Documents' office and asking that the necessary steps be taken to hasten the preparation of the *Document Catalogue* and to compile the needed Checklist supplement and index.

Agnes C. Doyle of the Boston Public Library read a paper on the necessity for a co-operative index of coats-of-arms. She spoke of the increasing interest in heraldry of Americans, of the time spent in libraries concerned in genealogical research in investigating coats-of-arms for readers, in the many false readings of heraldic signs and the few excellent books on the subject, and made the general proposition of a "co-operative index of coats-of-arms, found in authentic works, arranged on an easy plan," thru co-operation of libraries under any one of a number of proposed plans.

George B. Utley of the Newberry Library said he believed in co-operative measures, but asked: "Is it desirable? Is it worth all the effort? Can enough copies of such an index be sold?" A committee would have to decide on these points. As to preparation of copy, many co-operative affairs have been put thru, but his opinion was that it was becoming harder to do more. William S. Merrill of the Newberry Library and Miss Katharine P. Loring of Beverly also spoke.

C. J. Barr of Yale spoke in reference to the checking of the pamphlet, "Serials of an International Character," *Bulletin 3* of the Institute of International Education, and F. K. W. Drury of Brown presented an example of reducing costs of binding to a minimum by stapling certain kinds of works.

The following committee for the conduct of the section was elected: Charles J. Barr, Yale, Chairman, W. E. Henry, University of Washington, E. D. Tweedell, John Crerar.

AUGUSTUS H. SHEARER.

LENDING SECTION

The meeting of the Lending Section was held on Saturday afternoon June 25th, Jennie Flexner of the Louisville Public Library presiding.

Louise Prouty, supervisor of stations, Cleveland Public Library, spoke of "Staff Unity thru Leadership: how to meet work, fellow workers and the public."

Miss Prouty said that all ideas of unity had been given to them by Mr. Brett, for he had set the standard and maintained it thru personal acquaintance with his staff. Cleveland has developed along civic center and community ideas with the library as an active civic organization, and not as a "passive hand-maiden in seclusion." The library people meet their public thru the Open Shelf system. Theoretically the librarian meets the public thru clubs, outside organizations and committees, but in reality part of this is necessarily done by assistants selected according to their fitness. The distances in the city render difficult close staff unity, but thru meetings at a weekly Round Table at which books are discussed, routine details smoothed out, local affairs reported upon and out of town visitors received, this problem is, to some extent, solved.

The question: "Can Librarians Read?" was then discussed by Mary Prescott Parsons, librarian of the Morristown (N. J.) Public Library, a paper emphasizing the value of the librarian's personal knowledge of books and of methods used by various libraries in bringing books to the attention of the readers. With a forty or forty-two hour working week, spent largely in the actual administration or routine work of the library, it is impossible for the librarian to have an intimate acquaintance with the contents of the books handled. What is wanted is for some one library to try the experiment of having a greatly increased staff, so that each staff member who serves the public directly should have time for reading—an idea not likely to be realized in the very near future.

Marcia M. Furnas, chief of the Delivery Department of the Indianapolis Public Library, then gave a resumé of replies to a questionnaire sent out to twelve libraries on the subject of "Overdue and Messenger Work."

1. How many overdue notices are sent? Two libraries reported one notice, and then a messenger after 5 days, and ten libraries reported two notices.

2. Is there a messenger? Seven reported "yes," and five "yes, off and on."

3. Qualifications of messenger and salary? These replies varied from a page at 30c. an hour, a janitor with more than usual qualifications; to a special investigator with a salary of two thousand a year and power of representing the library at Court.

4. If the messenger failed, what was the next

step taken? The majority of cases referred the matter to the police.

5. If the borrower had moved, the messenger tried to get information at the house. After that the library appealed to the business address and the employer, and to the reference.

6. When are the books taken from the library records? The reports varied from two months to two years.

7. Percentage of recovery of messenger books? The reports showed that from five to nine percent were recovered.

The open discussion which followed brought forth many suggestions. In Washington, D. C., members of the staff make personal visits, and are most successful in obtaining overdue books. In Cambridge, Mass., after two notices have been disregarded, a personal letter in a plain envelope often recovers the book. Minneapolis has a court of conciliation wherein problems involving anything of less value than twenty-five dollars are settled. On definite dates there is a library day and overdue book problems are settled at this time. In Tampa, Florida, the police furnish a car and a chauffeur to take a member of the staff about recovering overdues. Several libraries have a maximum limit for fines; Pasadena thirty cents; Chicago sixty cents; while Toronto has the price of the book. Queensboro, N. Y., writes and asks the borrower either to return the book by parcel post or to pay the price of the book. This method has been quite successful. Pawtucket hands over the overdue records to the police after two months.

In "Circulation Short Cuts" Grace B. Finney, chief of the Circulation Department of the District of Columbia Public Library, told of cutting detail work so as to serve the public satisfactorily and as quickly as possible, in spite of a depleted staff. Only one form of member's card is used. If necessary it is stamped "teacher" or "special" as the case may be. A page stands by the discharging desk ready to get from the stacks the reader's request. A trained typist is employed, and Miss Finney pointed out that the employment of skilled clerical work saved half of the librarian's day. A list of material on special subjects is kept on small catalog-cards at the reference desk in order that difficult problems may not be looked up more than once, and that all available material may be readily at hand without hours of searching.

For the system described in "Where is My Borrower's Card?" Helen M. Ward, Chief of Circulation at the Detroit Public Library, claimed no originality or perfection, but merely convenience and simplicity. The reader registers in the usual way and receives in lieu of a member's

card an identification card bearing the reader's number. When the reader desires to borrow books, he presents his identification card and his books are stamped and given to him, his number being written upon the book cards. This method is not used for children. In reply to questions Miss Ward stated that there had been no difficulty with losses and duplicate numbers. In the case of fines of less than ten cents, the amount is written upon the identification card. If the fine is more than that amount, a note is clipped to the identification card, and the card kept on file.

In "When is My Book Due?" Mrs. Jessie S. McNiece, chief of the Circulation Department of the St. Louis Public Library, made a strong plea for the stamping of date due on the dating slip rather than that on which the book is issued. The amount of the pains necessary that the right stamp be used is more than offset by the reader's knowledge of the date when the book should be returned.

Officers elected were: Chairman, John A. Lowe of Brooklyn; vice chairman, Edith Vermeule of Seattle; and secretary-treasurer, Mary Rothrock of Knoxville, Tenn.

JULIA F. CARTER, *Secretary pro tem.*

PROFESSIONAL TRAINING SECTION

The meeting of the Professional Training Section was held as a joint session with the Section and of the Association of American Library Schools. This arrangement was the result of a plan for an open meeting on the part of the Association of American Library Schools, and of the realization that a line is difficult to draw between those topics on the one hand which are of common interest to the Association and to the profession at large, and those on the other hand which naturally and logically fall within the scope of the Section. The program was planned by consultation on the part of the officers of the two organizations.

Ernest J. Reece, principal of the Library School of the New York Public Library, and chairman of the Section, presided. Eva Leslie, of the Cleveland Public Library, served as secretary in place of William J. Hamilton, who was unable to attend the meeting of the Section. Josephine Adams Rathbone, retiring president of the A. A. L. S., told of the purposes and work of the Association, of the manner in which the Association came to be organized, of the standards to which the member schools conform, and of the fact that meetings are ordinarily not open because the programs are largely technical and concerned with the mechanics of library school management.

The report of the A. L. A. Committee on Recruiting for Library Service was then presented by Mr. Reece. This report is summarized elsewhere in this number.

Malcolm G. Wyer, chairman of the A. L. A. Committee on Library Training, then discussed the work of that Committee. This included consideration not only of the general subject, but of the activity of two sub-committees, one of which, under Carrie E. Scott, dealt with the comparative value of training for library service in training classes and in summer schools, and the other of which, under Margaret Mann, the training of catalogers. These reports are summarized elsewhere in this issue. Discussion followed, and was resumed after the closing of the formal session by those particularly interested in the points raised by Miss Mann's suggestions.

Time did not permit the receiving of reports on new features of work at the various library schools and training classes. Marion Horton, however, speaking for the School Libraries Section, told of the interest of that section in the preparation of candidates for school library work, and of the compilation of data as to the content of library school courses with a view to its bearing upon this.

Officers of the Section for 1921-22 were elected as follows: Chairman, Sidney B. Mitchell, University of California Library School; vice-chairman, Lucy Morgan, Detroit Public Library; secretary Edna Hull, Chautauqua Summer Library School.

EVA G. LESLIE, *Secretary pro tem.*

SCHOOL LIBRARIES SECTION

There were three meetings of the School Libraries Section and the attendance at each showed the active interest now broadcast in this growing field, not only among school librarians themselves but among all progressive public library people.

The topic of discussion at all three meetings was the school librarian, her training and the large number of openings for people properly prepared for school work. The Section has for two years been studying the necessary content for a course particularly designed for training school librarians. A report was made on the questionnaire this year sent out to the library training schools to ascertain how much time was being given to preparation for school positions and what subjects were considered basic for all types of library work, whatever the field of specialization. The replies to the questionnaire bring together a full account of the content of all the accredited library training courses in the country and will shortly be published in the LIBRARY JOURNAL.

It will be remembered that the report of the Section meeting at Colorado Springs included a recommendation as to content for a course designed to send out well-equipped school librarians. This year the recommendations looking to further study of this subject by the School Section are as follows:

Since the school library is growing in importance by reason of the wider use of books in each subject of the curriculum, and because of the Certain and Hoxic reports; and since the demand for teacher librarians has increased beyond the supply wherever the Certain recommendation has been adopted; and since schools of education will be obliged to train these teacher librarians unless graduates of library schools are ready for the positions, it is recommended that:

(1) Library schools, which have not done so, consider the possibility of training students definitely for school library work thru (a) A course showing modifications of technique necessary in school libraries; (b) Courses in schools of education (teachers' colleges, universities, etc.) open to students who are preparing for school library work and who have not had pedagogy in college before entering library school.

(2) Library schools be sent reports of this survey and each school be asked to report to the section before the meeting next year: (a) The demand for graduates of that school in school libraries; (b) The preliminary education in pedagogy of students who prepare for school library work; (c) The feasibility of co-operation with a teachers' college or school of education.

A recruiting committee was also appointed to work especially for school library candidates in conjunction with the plans of the A. L. A. Committee on Recruiting.

The officers for the year 1921-22: Chairman, Marion Horton, Los Angeles Public Library School; vice-chairman, Jessie Tompkins, School Division, Detroit Public Library; High School Representative, May Ingles, Omaha, Neb.; Normal School Representative, Bertha Hatch, Cleveland, O.; secretary, Frances H. Kelley, Pittsburgh, Pa.

MARTHA CAROLINE PRITCHARD, *Chairman.*

ROUND TABLE ON LIBRARY BUILDINGS

The Round Table on Library Buildings, held on June 21, was under charge of Willis K. Stetson, librarian of Free Public Library, New Haven, Conn.

Edward L. Tilton, architect, of New York city, spoke in answer to the following questions: 1. Should the plan of a library building provide

that practically all the departments for adults should be on the main floor, and in case of the smaller libraries also the administrative offices and workrooms, (a) for reasons of economy in the number of attendants required, (b) for the convenience of the users of the library, (c) increased ease and efficiency and administration resulting from concentration of most of the staff on one floor? 2. Should all structural partitions be omitted when possible (a) in order to allow an equitable and desirable division of space originally between the different departments and activities, (b) re-arrangement of space as might be desirable later, (c) economy in the number and salaries of staff needed? His answer in general was in the affirmative. Partitions are needed when noise must be shut out, and when in the work-rooms odors such as come from the use of hot glue, for example, must be excluded. For partitions book cases often serve acceptably. It is a simple matter to put in partitions later.

Arthur L. Bailey showed the plans of the proposed building for the Wilmington (Del.) Institute Library. The site is 90 by 210 feet. The building will be rectangular about 80 by 190 feet. All the departments for adults and the administration offices and cataloguing rooms are on the main floor. The only permanent partitions are those enclosing stairways and vestibule. The entrance is at the middle of the longer side. The delivery desk is immediately opposite the entrance, and back of it are the fiction cases. The delivery room is 70 by 28 feet. One end of the main floor is occupied by the periodical reading room, 36 by 44 feet, on one side of this room the cataloguing room, 17 by 44 feet and on the other side the librarian's office also 17 by 44 feet. These rooms are shut off by book cases. The other end of the main floor is occupied by the reference room, one portion for reading tables is 70 by 44 feet, the other part by a book stack which will be two tiers in height. Each tier is to be seven shelves high.

Hiller C. Wellman of the Springfield (Mass.) City Library Association and Bernard Steiner of Enoch Pratt Free Library in Baltimore, spoke in favor of book cases nine shelves high as they increase the book capacity greatly. Mr. Wellman stated that a continuous step along the front of the book case made it easy to reach the books on the top shelves. This step does not make a wider aisle necessary between the book cases.

In the Wilmington plans it is proposed to have a mezzanine floor above the librarian's office and the cataloging room, for book cases. The main floor has a ceiling 20 feet high. The storage book-stack is below the main floor and will be

two tiers high. Stairs near the delivery desk lead down into the stack. The children's room, 70 by 44 feet is in the basement, but the slope of the ground puts it mostly above ground. On the upper floor are the Howard Pyle memorial room and the art rooms. There is also an auditorium 50 by 44 feet and smaller rooms, including, staff room and rest room on the upper floor.

Many questions were asked during the explanation of the plans. Some regarding lighting were answered by Clement W. Andrews of the John Crerar Library, who advocated the Siplelite made by the General Electric Co as very efficient, tho not handsome. For table lighting he said the Eye Comfort light gave the softest light.

Mr. Wellman, asked to speak of the plan of the Springfield Library, said that the principles of the plan were so similar to those of the Wilmington plans that it was not necessary to speak of them in detail. One special feature was the provision for over 100,000 volumes in a two tier radial stack in the reference room, it having been found desirable to have this large number for use in reference, tho most of them circulate also. J. Randolph Coolidge, Jr., architect, of Boston, spoke at some length on the great desirability of having books on open shelves, and especially of provision for considerable privacy and comfort for those who wanted to read books in the library building, altho to secure this the building must be somewhat larger and more costly. Mr. Wellman mentioned a compromise in this matter adopted in the Springfield library where reading tables were placed near the windows at the ends of the book cases.

No one present made any remarks in criticism of the principles of the plans of the Wilmington and Springfield libraries.

WILLIS K. STETSON

ROUND TABLE ON WORK WITH COLORED PEOPLE

A round table discussion for workers among colored people was arranged for Wednesday morning in response to a considerable demand.

The discussion brought out different points of view, differing methods, and widely divergent conditions. Ernestine Rose opened the discussion by describing the work of the 135th St. Branch of the New York Public Library which the world, and where the experiment of a staff including both white and colored workers is being tried with apparent success.

George T. Settle and Jennie Flexner told of the two colored branches in Louisville, and of the school for the instruction of their colored work-

ers. In this school colored girls are being trained for various library positions throuout the country but particularly in the South.

Mary Pretlow told of a colored branch to be opened in July in Norfolk, Va.

Mary Rothrock spoke of the difficulties attending colored representation on the governing board of the library. This subject was discussed somewhat at length, several librarians believing in a less formal participation of colored opinion, for instance, in an advisory capacity only.

In Jacksonville there is a room for the colored people in the main library, an arrangement far from satisfactory in Librarian Marron's opinion.

The type of reading done by negroes, their capacity for intellectual development, the social status of colored workers on the staff, and the problems attending their position as co-workers with white assistants, were all discussed with lively interest.

It was interesting to note that the N. A. A. C. P., which is co-operating in a friendly manner with the work in New York, and is considered there a beneficial and moderate agency, where it stands out in opposition to more radical organizations, is viewed with distrust in the South, where its propaganda is particularly active. Quite as interesting, is the fact that Marcus Garvey's strikingly radical ideas for a back to Africa movement have gained little ground in the South, but apparently flourish better in the fertile soil of the developing race consciousness visible in the North.

Leonora Herron, librarian of Hampton Institute, contributed a description of her work at Hampton.

Those present voted unanimously to establish a permanent round table dealing with this work and its problems.

ERNESTINE ROSE, *Temporary Chairman.*

MEETING OF NAVAL LIBRARIANS

An informal meeting of Navy Librarians, past, present and future, was held June 22nd. The gathering included several representatives of public librarians who still retain their interest in naval libraries in spite of the termination of hostilities. Routine was discussed with the general conclusion that the short-cuts used during the war and the omission of many standard library methods, while necessary and effective at that time, were not suitable as permanent practices. A return to the dictionary catalog, readers' cards, shelf list, etc., was deemed desirable. The only deviation desirable from standard library practice is in the case of re-binding popular fiction, which is not thought necessary at present.

The question of books for children of officers and men brought up the point that such books could not be purchased from government appropriations. At some stations officers transferred had donated their children's books to the station library, in other cases officers had raised a fund for such books. Public libraries and state library commissions had loaned travelling libraries. In many cases such as Parris Island, Haiti and San Domingo, the stations were isolated and the officers' families had few educational or recreational opportunities.

There has arisen at many stations a demand for exceptional books which would not be needed for more than one or two individuals at the station. It was found that in many cases the nearest public library was glad to make such loans upon request. In particular the Free Library of Philadelphia has been very generous in loaning books and in purchasing books especially needed for occasional use at the Navy Yard.

Attention was called to the fact that of the three hundred employees taken over by the Navy from various organizations two years ago there were continued for the coming year in the Field Establishment only the sixteen librarians. All these sixteen librarians qualified under the recent Civil Service examinations and fifteen will receive their permanent appointments at once.

CHARLES H. BROWN.

ROUND TABLE OF LIBRARIES OF RELIGION AND THEOLOGY

The Round Table of Libraries of Religion and Theology was held on Friday the 24th, Elima A. Foster, chairman of the section, presiding. Religious books in public libraries was the topic of discussion, which was opened by Arthur E. Bostwick with a paper on "The Church and the Public Library, in which it was pointed out that among the groups of citizens which the library serves the religious group is not the least.

Following, Azariah Smith Root told of the religious book service of the Oberlin College Library, which serves both college and town.

Rev. Willard I. Shattuck of Boston University then spoke of the service which the public library can render to religious education, more especially that relating to Sunday Schools, and Miss Foster urged the need of adequate representation of religious thought in the public library: In an earlier generation books on religion were largely records of personal emotional experience, but the field now has enormously widened and the literature of religion is to-day an important contribution to social science.

LEAGUE OF LIBRARY COMMISSIONS

A meeting of the League of Library Commissions was held June 22-25 in Swampscott, in connection with the A. L. A. The first session convened June 22 with the President, W. R. Watson, in the chair. As the annual meeting of the League occurs at the time of the mid-winter meetings, the time was devoted to papers and discussions.

The relationship between the central library and branch libraries of a county system was discussed by Sabra Nason, librarian of the Umatilla County Library, Pendleton, Ore., in a paper which was read by W. J. Hamilton.

Having reviewed the special fitness of the county unit of administration to provide the best reading for the greatest number at the least cost, Miss Nason told of the working of her own library.

The second paper was a chapter in the history of the small city library by Elizabeth Blackhall, librarian of the Huntington Memorial Library, Oneonta, N. Y., illustrated by a very interesting account of her work in her own library.

Fanny Rawson of Kentucky, chairman of Publications Committee, gave her report recommending changes in the uniform blank for traveling library statistics. The recommendations were accepted and the blanks ordered printed.

Representatives from the different library commissions were called upon to report on library legislation. Most of the commissions reported substantial increases in their own appropriations. The Governors of New Jersey and Oklahoma even added to the amount asked for, telling the commissions they were too modest in their requests. New Jersey has an annual appropriation of \$45,500 and Oklahoma a biennial appropriation of \$41,000. Generally these appropriations are made in a lump sum. Mrs. Earl pointed out that appropriations so allowed went much farther than when made on the budget plan.

The consolidation of the library commission with some other state department has come up in several states. In Illinois the Commission was consolidated with the State Library and three divisions made mandatory, the state library division, the library extension division, and the archives division. In Maine the Library Commission was united with the State Library and is called the Bureau of Library Extension. In Tennessee the director of County Library Extension is under the supervision of the State Library. The question of consolidating the commission with several other state departments of Oklahoma was discussed but no law

was passed. As a matter of economy, the Michigan legislature eliminated the board of library commissions and the work formerly done by that commission combined with the activities of the state library, but no adequate appropriation for the work was made.

New York and Wisconsin both passed laws for certification of librarians. Reports on these laws have been printed in the state bulletins and other publications.

County library laws were passed by Kansas, Missouri, New York and South Dakota. Indiana and Wisconsin amended their county library laws. An old county library law in Oklahoma was made workable by a recent supreme court decision.

Illinois and New Jersey reported an increase in the maximum tax levy rates allowed public libraries. Illinois' increase was from one and a third to one and eight tenths mills; New Jersey's from one-half to one mill.

Many other states reported minor changes in library laws.

The rest of the session was devoted to a round table discussion conducted by Caroline Webster, on whether the state library commission can aid institution libraries.

Mrs. George T. Rice of the Board of Managers of the State Reformatory for Women at Framingham, Mass., spoke on the "Beginning of Library Work in a State Reformatory," telling of her experience and that of Mrs. Hodder (in charge of the institution at Framingham) in trying to procure funds for the establishment of the library on a more permanent basis. Mrs. Rice emphasized the great necessity of educating the general public previous to any definite appeal. She also warned against the policy of making the professionals help procure support and funds, which smacks too much of self-interest.

"The Library in a General Hospital" was ably presented by Mrs. Herbert Gurney, trustee of the Massachusetts General Hospital, who emphasized the need of good library service in hospitals, and the fact that the library is a distinctly efficient therapeutic agency. She spoke of the impression that was made upon her when she first entered Foxborough State Hospital by the carefully chosen pictures and beautiful flowers, and said that the books in the same way were a necessity. Altho people are ill, they are not mentally sick thru and thru, and they need the same kind of environment that would normally surround them. An occasional person may be affected by color and beauty, but all are affected by inactivity of mind.

Anna C. Jammé, director of the Bureau of Registration of Nurses, State Board of Health,

San Francisco, sent a paper on the "Development of Libraries in Schools of Nursing thru Existing State and County Agencies," which outlined briefly the types of reference material essential in libraries connected with schools of nursing—medical literature, material on social reform, ethics, psychology, therapy, and good fiction—and drew attention to the aid obtainable from county and state agencies, and from such national sources of information as the Public Health Nursing Association and the National Association of Nurses. California was given as an instance of the best type of co-operation, and an appeal was made to the other state commissions to develop similar co-operation.

E. Kathleen Jones, secretary of the Massachusetts Library Commission, then presented her paper on "The Library Commission's Responsibility in State and County Hospitals," bringing out the definite function that the state has in the development of this work. She cited the work of Iowa, Minnesota and Nebraska, and spoke also of the necessity of getting the active interest and co-operation of the other organizations allied to the institutions from the various other angles. She then read a letter from Commissioner Sanford Bates of the Department of Correction of the Commonwealth of Massachusetts, in which he states that the money for libraries in penal institutions is available if efficient and intelligent assistance can be procured.

Miss Webster closed the meeting by speaking of the recognition of the library service in the Navy and that this was the only type of welfare service now to be continued under government supervision.

A second session was held as a joint meeting with the American Library Association, Saturday morning, June 25th.

ANNA MAY PRICE, *Secretary*.

AMERICAN ASSOCIATION OF LAW LIBRARIES

THE sixteenth annual meeting of the A. A. L. L. was held at the New Ocean House, Swampscott, Mass., from June 21st to 24th, President Frederick C. Hicks, of the Columbia University Law Library, presiding. One of the sessions was a joint session with the National Association of State Libraries.

The papers which were presented at the meeting were: Address of Welcome, Sumner Y. Wheeler, secretary of the Essex Bar Association; President's Address, Frederick C. Hicks; "The County Law Library System in

Massachusetts," Howard L. Stebbins, librarian of the Social Law Library, Boston; "John Himes Arnold," by Edward B. Adams, librarian of the Harvard Law School; "Appreciation of Alexander H. R. Fraser," by E. E. Willever, librarian of Cornell University Law School; "The Bibliography of Naval and Military Law," by Arthur C. Pulling, librarian of the University of Minnesota Law School; "Developments in State Libraries," by George S. Godard, state librarian, Connecticut; "Historical Sketch of American Legal Periodicals," by Marion Brainerd of the Maine State Library; "Present Problems of Law Publishing," by Burdett A. Rich, Lawyers' Co-operative Publishing Company; "Famous and Curious Wills," by Mrs. Gladys Judd Day, librarian, Hartford Bar Library.

The report of the Committee on New Members showed the addition of forty-four new members within the past year, and the Committee was continued with its present membership.

Franklin O. Poole gave a thoro report on the work of the Committee on the Index to Legal Periodicals, and the Committee was directed to continue its negotiations with the American Bar Association concerning the matter of co-operation in its publication. Another motion empowered the Committee to rearrange the schedule of subscription prices on a service basis in order to meet or reduce the existing deficit.

A committee was appointed to confer with a similar committee from the National Association of State Librarians on the question of closer co-operation between the two associations.

Four amendments to the constitution were adopted.

The annual dues of the association were increased from two to three dollars.

A. J. Small, chairman of the Committee on Checklist of Bar Association Reports, submitted a tentative compilation of such works. Frank B. Chipman reported that when labor conditions were more settled his company would be willing to undertake the publication of the Checklist. The question of arranging for the printing of the Checklist was left to the Executive Committee with power to act.

The following resolutions were presented and adopted unanimously: (1) Resolution to send message of greeting to John Himes Arnold, forty-one years law librarian of the Harvard Law School Library; (2) Resolution of regret at the resignation of Elias J. Lien, formerly State Librarian of Minnesota; and (3) Resolution concerning the death of Columbus Will Shaffer, formerly State Law Librarian of Washington.

A joint resolution was adopted endorsing the early publication of a Supplement and Index to the *Checklist of United States Public Documents*.

The report of the Joint Committee upon the National Information Service was accepted, and the committee continued.

Officers of the Association were elected as follows: President, Gilson G. Glasier, librarian, Wisconsin State Library, Madison; first vice-president, Andrew H. Mettee, Library Company of the Baltimore Bar, Baltimore, Md.; second vice-president, Mrs. Maud B. Cobb, State Librarian, Atlanta, Ga.; secretary, Mary S. Foote, librarian, New Haven County Bar Library, New Haven, Conn.

MARY S. FOOTE, *Secretary pro tem.*

SPECIAL LIBRARIES ASSOCIATION

THE Twelfth Annual Convention of the S. L. A. opened at two o'clock, June 21, in the ballroom of the New Ocean House at Swampscott. In a brief presidential address Dorsey W. Hyde, Jr., reviewed the work of the Association during the past year, pointing to the increase in membership emphasizing the need for continuing effort, and appreciating the value of the work performed by the Executive Board, the vice-presidents, the Secretary, the Editor of *Special Libraries*, the committee chairmen, and other officers and members of the Association. Announcement was made by the President that the national "Special Libraries Directory"—containing over 1,300 institutions—is now being printed.

Reports of Association officers and committees were next called for. The financial report by Estelle L. Liebmann and the membership report by Mary de J. Cox brought forth applause, as did also the report of Adelaide R. Hasse, Editor of *Special Libraries*. William F. Jacob being absent, the President reported on the good work of the Census Committee and the printing of the national directory. The President also thanked the Committee on Methods, Mary B. Day, chairman, for its effective service during the past year.

The first general session of the Convention was called to order at three o'clock and the Chairman introduced Edwin E. Slosson, director of Science Service of the National Research Council. Dr. Slosson referred in glowing terms to the new type of service being rendered by present-day special librarians, indicated the great opportunities for this kind of work and emphasized the need for a "scientific central" for the exchange of technical and other information. In closing he described the work of Science Service in popularizing scientific information and outlined the big service now being

carried on by the Information Service of the National Research Council of which Robert M. Yerkes is chairman.

Leroy D. Peavey, vice-president of the Babson Statistical Organization, the next speaker on the program, described "How Business Men Get Facts and Figures" to aid them in arriving at administrative decisions. Mr. Peavey pointed to the large number of business failures due to lack of accurate fact information and emphasized the importance of the special library in helping the business executive to avoid the pitfalls awaiting the uninformed. "Business men," said Mr. Peavey, "are searching for facts and figures as never before—we are facing today a turning point in the industrial history of the United States and you special librarians have a wonderful opportunity."

Daniel N. Handy, of the Insurance Library Association of Boston, discussed "How Business and Technical Executives Obtain Information," outlining the essential sources of information with which all special librarians should be conversant in order to render high-grade service. Mr. Handy's talk was delivered just prior to the opening discussions of the first group meeting, which was in charge of Lewis A. Armistead.

The second general session, on Wednesday morning, was opened with a forceful talk by Charles C. Parlin, Research Manager of the Curtis Publishing Company, who imbued every member of the Association with a firm belief in the practical value of research information in building up new business for any concern. Frederick L. Crum of the Prudential Insurance Company then presented the very interesting paper of Dr. Frederick L. Hoffman, who was unable to attend. Dr. Hoffman insists that the business librarian "must correlate available information to meet current human needs, with a reasonable assurance that the results derived therefrom will permit the forecasting, with considerable certainty, of the course of events in the near future."

The second group meeting, Wednesday afternoon, was combined with the meeting of the National Association of State Librarians, and the meeting opened with a valuable paper on "Information Services" by Herbert O. Brigham, Rhode Island State Librarian. George Winthrop Lee, group chairman, then took up consideration of the problem of "Organizing Special Library Data." The designated special librarians on this occasion made particularly successful presentations of the special aspects of the problem under consideration. The data presented should be of particular value in connection with the work of the Association's Committee on Methods.

After recovering from Thursday's visit to local points of historical interest, the Convention was again assembled Friday morning for the Joint Session with the A. L. A. The meeting was called to order by Alice S. Tyler, president of the A. L. A., with Louise B. Krause, A. L. A. vice-president, also on the platform. After stating the purpose of the Joint Session and making courteous reference to the affiliated Association, Miss Tyler turned the conduct of the meeting over to Mr. Hyde, S. L. A. president, who expressed the good wishes of the S. L. A. to all members of the convention and talked for a few moments upon the relationship between public and special libraries and how one type of library service could be used to supplement the other to the benefit of the library profession as a whole.

Charles F. D. Belden then gave a searching presentation of the problems involved in public and special library relationship, pointing out the need for mutual understanding and good will. Mr. Belden's talk was followed by a paper full of cogent statements by R. R. Bowker, which was read by George F. Bowerman. The meeting terminated with a most interesting paper by June R. Donnelly, director of Simmons College Library School, in which were discussed certain aspects of the problem of training for special library work.

The third general session was called to order immediately after luncheon and the President introduced J. George Frederick, president of the Business Bourse, who stated that the special library has a very important future in making more widely available the information and knowledge obtained as the result of business and industrial research. Following, Harold V. Coes of Ford, Bacon and Davis, emphasized the need of the modern business executive to know where to turn to secure information on a multitude of subjects. "You librarians," said Mr. Coes, "have an excellent opportunity to do a really constructive piece of work." Frank E. Barrows, of Pennie, Davis, Marvin and Edmonds, gave a particularly instructive paper illustrating the application of library procedure in the service of large firms of lawyers. Mrs. Jeanne B. Foster, of Kuhn, Loeb and Company, spoke for the large financial concern in its library work and the meeting closed with an interesting talk by N. P. Winchel, Jr., editor of the *Industrial Digest*, in which he told something of the plans of this publication.

The third group meeting was preceded by short talks by the presidents of the local Special Libraries Associations of Boston, New York, Philadelphia and Cleveland, after which Orrena L. Evans, group chairman, called the group

meeting to order. The evening's topic, "Selling Special Library Service," was discussed by a number of designated special librarians and was followed by a general discussion. The success of this meeting was due in no small degree to the interesting outline of the problem drawn up in advance by Miss Evans' officers.

DORSEY W. HYDE, JR.

LIBRARY WORKERS ASSOCIATION

THE second annual meeting of the Library Workers Association was held at Swampscott at nine o'clock on the evening of June 24 in the Sun parlor of the New Ocean House. Catherine Van Dyne, a director, presided in the absence thru illness of the President, Mary G. Peters of Bayonne, N. J. Due to the lateness of the hour and the necessity of getting to the important subjects of discussion, the secretary, Marian C. Manley, limited her report to showing how the Association had lived up to its claim of being a democratic and flexibly organized one, and announced that a detailed written report would be made to the members and that copies would be furnished to those wishing it.

The discussion of "Library Conditions and Staff Relations" was opened by a paper on standards in libraries by Emma V. Baldwin which brought up for consideration the possibility of working out standards for the various library processes, thus affording a real basis for criticism or approval, and also the adaptation of satisfactory schedules of salaries, such, for example, as those for teachers, where the library was new or in process of reorganization.

Following, Ruth Alexander talked on the response given by assistants when they were allowed to go thru one developing experience after another rather than kept continually in the same limited field of work.

Carl L. Cannon, chief of the Acquisitions Division of the New York Public Library, then spoke of the necessity of securing some permanence among junior assistants by affording them assurance that they would be able to advance to more interesting work and to better salaries in proportion to their capacity and length of service. It should be possible by means of experience gained in the library and by remedying defects in education and in technical training, either within or outside library hours for junior assistants to advance within certain limits. He spoke of Dr. Williamson's pointing out in his investigation of standardization, that there are two general classes of work, professional and clerical, with various grades in each, and said that the L. W. A. was now

attempting to discover the best means of making possible advancement from the lower to higher grades while realizing that intellectual work can be over-standardized and that the question must be approached with caution as well as with confidence.

In the general discussion following, Dr. Shearer spoke of the Grand Rapids system which allows a certain number of hours a week for college classes and Miss Manley told of the system in effect there of adding to the salary for each year of college or library school training. Azariah S. Root described somewhat similar methods practiced at Oberlin. He said further that schedules were arranged as far as possible to permit the library assistant to take advantage of the educational opportunities offered by the College.

Following this came the main topic, the correlation of library training courses. This was first discussed by Clarence W. Sumner who emphasized the value which a combination of courses leading to a library school diploma but available thru correspondence, summer and extension courses, would have for the librarian who could with perfect justice require work toward a library school diploma and make increases in salary to some extent dependent on this. Efforts along this line need not always mean the loss for a year or more of a valued assistant.

Charles F. McCombs then urged the necessity of a correlation of courses, and emphasized that the requirements for entrance to these courses should be as strict, and the ground covered as comprehensive, as that of a regular library school course. While advocating the establishment of a system that would put the librarian's opportunities for advancement in training on a par with that of teachers, he was insistent that such a course should parallel the requirements of a recognized school.

Following, Miss Manley spoke of the effect which such correlation of courses would have on the many assistants, who, instead of putting summer after summer into sporadic sessions with no recognition, could, instead, take them in a logical sequence leading to a definite goal. The individual courses would also be more satisfactory.

In the general discussion Mr. Bliss questioned the possibility of correlating these in a satisfactory manner and called to mind the fact that much that was vital would be lost by spreading the work over such a long time. Mary E. Downey contributed an account of her experience with the Chautauqua School. The question of credit for experience in certain fields came up, and P. L. Windsor described the meth-

od at Illinois University School of excusing students from attendance at certain classes, such students as had satisfied the entrance requirements for the library school and had passed satisfactory examinations in the subjects in which they had most experience. Paul M. Paine, Elva S. Smith, Josephine A. Rathbone and June R. Donnelly also took part in the discussion.

MARIAN C. MANLEY, *Secretary.*

BIBLIOGRAPHICAL SOCIETY OF AMERICA

THE annual meeting of the Bibliographical Society of America was held Wednesday afternoon June 22 at Swampscott, C. L. Nichols presiding. The meeting was an interesting and valuable contribution to the subject of the use of reproducing processes in bibliographical work.

George Watson Cole's presidential address gave a brief review of the work of the society and the reason for the importance of the general subject of the meeting. The paper by Lodewyk Bendikson, *The Photostat—A Photographic Copying and Reproducing Apparatus*, gave a careful account of the technic of the apparatus, together with some illustrations of its use.

The Photostat in Bibliographical and Research Work—a symposium, collected by Dr. Cole, summarized the work and results in different institutions, among them: Harvard; Boston Public; Massachusetts secretary of State, where the photostat is used for copying any legal papers; Connecticut State; Yale; Columbia, where considerable use has been made in copying Chinese books; Engineering Societies Library, New York State Department of Education; New York Public Library, from which Wilberforce Eames reported in detail on large enterprises and on costs; New York Historical Society; Cornell; Princeton; University of Minnesota; Library of Congress; University of Michigan; Hispanic Society.

The Photostat as a Means of Distributing Copies of Unique or Very Rare Works, by Worthington Chauncey Ford, went into detail especially from the experience of the Massachusetts Historical Society on some of the subjects referred to in the symposium.

The Photostat and the Huntington Library, by Chester March Cate, referred especially to the detection of bibliographical difference in rarities by means of reproductions of copies in widely separate parts of the world. Comment followed. Bernard C. Steiner referred to the possibility of identifying documents owing to marginal notes or marks being reproduced from certain copies. He also spoke of the impossibility of reproducing mended copies where the

View showing an intermediate tier of SNEAD STANDARD STACK and carrels or private study rooms incorporated in the main stack. The advantage of this arrangement is obvious.

College and University Librarians are realizing the useful and serviceable feature of this combination.

Snead Standard Stack and carrels are now used in such libraries as the Widener Memorial Library, Harvard University, Notre Dame University, and University of Michigan, etc.

Long experience in equipping libraries of all sizes has given our experts a fund of available information on library construction and arrangement, which is available without charge or obligation to the Library officials and architects.

Detailed plans and description of many notable library buildings are found in our publication "Library Planning, Bookstacks and Shelving," which will be sent free wherever it will be useful in the promotion of scientific library construction.

SNEAD & COMPANY

Founded 1849

92 PINE STREET, JERSEY CITY, NEW JERSEY

Canadian Branch: 250 Richmond, West, Toronto, Canada.

text has been covered with silk. With reference to the acceptance in court of photostat copies where photographs are not accepted, George P. Winship and others spoke of the possibility of altering or faking photostat copies. With regard to a question of H. M. Lydenberg's as to permanency of reproduced copies, H. H. B. Meyer said that naturally paper chemically treated would not have the life of other paper, but that so far the results had not proved unsatisfactory. A photostat copy of a card bibliography was exhibited by representatives of the Department of Agriculture.

Mr. Winship pointed out that large libraries could not afford to subscribe to all the reproduction projects proposed, partly from expense, especially since the cost is not appreciably lowered by the number of copies made, and partly from the impossibility of finding room on the shelves for all such issues. Since negatives must always be made, he trusted that eventually a central clearing house could be established where negatives could be kept, and that upon demand by scholars and investigators, a library could borrow negatives or secure positives.

The question came up as to whether reproduced items were cataloged the same as originals. The Department of Agriculture spoke of its practice of supplying copy to the Library of Congress for cards for all such reproductions, and in such copy annotations are made as to any additions or supplements.

Mention was made of work on a new kind of paper, much quicker and cheaper, and not needing chemical treatment for development.

The papers were referred to the Committee or Publications.

The Treasurer reported a balance in all accounts, with provision for publication of the 1920 and 1921 Papers and Proceedings. He reported that bills had not been sent out for 1921 owing to the fact that no publication had been issued in 1920 and since there were so many institutional members, their membership was largely conditioned on that fact.

Mr. Winship for the Publication Committee reported that the publications had been held up successively by questions about one or two papers, then by the cost of printing, then by strikes, but that the material was ready and would be published probably in two or three months.

Officers elected for the coming year: President, W. W. Bishop, first vice-president, H. H. B. Meyer, second vice-president, Victor H. Paltsits, secretary, A. H. Shearer, treasurer, F. W. Faxon, Councillor for term commencing 1921, E. C. Richardson.

A. H. SHEARER, *Secretary*.

N. E. A. LIBRARY DEPARTMENT

MEETINGS of the Library Department of the N. E. A. were held at Des Moines on July 5, 6 (a joint session with the National Council of Teachers in English) and 8.

At the first session Adeline B. Zachert's paper on "Joy Reading in Elementary Schools" was read by Sherwin Williams, president of the Department, who also gave an address on "The Purpose of the School Library." Papers were also contributed by Willis H. Kerr on "The Normal School Library as a Teaching Institution," Ellen F. Chamberlayne on "The Relation of the High School Library to Other Departments of the School" and by Joseph L. Wheeler.

At the joint session on July 6, Johnson Brigham made an announcement regarding the *A. L. A. Booklist*, explaining that it is the official A. L. A. book-buying guide, and telling of the way in which it is compiled and the various particulars included. All future numbers will contain a short list of books especially useful for high school libraries. It was voted that the Library Department of the N. E. A. and the National Council of Teachers in English endorse the *A. L. A. Booklist* and recommend its use as an aid in book selection, for use on the reading tables in all high schools and in courses of English as a basis for current book evaluation.

Other papers contributed at this meeting were: "Stepping Stones to Literary Taste" by Professor A. B. Noble of the Iowa State College; "The Vestibule to the Palace Called Library" by Milton J. Ferguson; "Recent Literature for High Schools" by Margaret Skinner, Director of Reading at the Stout Institute, Menominee; and "The Part of the Public Library in Public Education" by Carl H. Milam, secretary of the A. L. A.

At a business meeting on July 8 the by-laws of the Association were discussed and modified. In Article 7, Section 1, the word "president" was changed to "officers." It was voted to strike out Section 8 of Article 7, making the new Article 7 read: "All funds shall be turned over to the N. E. A. and credited to the Library Department." Article 9 was changed to read: "These by-laws may be amended at any annual meeting by a majority vote of those present, provided a written notice of the proposed amendment or amendments has been presented to the members of the Department thirty days before such action is taken." It was voted that the by-laws be accepted in their new form. The report of the statement regarding libraries in education was accepted. (See LIBRARY JOURNAL for May 15, p. 457.) It was further voted:

SCRIBNER'S LIBRARY DEPARTMENT

Offers to all libraries, large or small,

- 1 Expert and efficient service, the result of years' experience.
- 2 The largest discounts on the books of all publishers.

Place your orders in our hands

They will be filled accurately as to title and edition, obscure and out-of-print books collected from all over the world, English titles imported duty-free, and all "shorts" reported on at time of shipment. Continuations will be forwarded without reminder, and out-of-stock and not-yet-published items supplied when procurable. All this without troubling you!

We relieve you of all detail and unnecessary expense

CHARLES SCRIBNER'S SONS,

597 Fifth Avenue, N. Y. City

The Agamemnon of Aeschylus

By GILBERT MURRAY \$1.25
A translation into English rhyming verse uniform with his well-known translations of Euripides.

The Ways of Life

By STEPHEN WARD Net \$2.00
A study in ethics dealing with the whole of life written in admirably clear English. An original work of the greatest interest.

A Philosophical View of Reform

By PERCY BYSSHE SHELLEY Net \$3.75
The prose work, now first printed, reflects Shelley's ideas on the subject of Government and are remarkably applicable to the present unrest.

The Sounds of Standard English

By T. NICKLIN \$1.35
Detailed but not technical treatment of the problems of pronunciation.

Folk Songs of Many Peoples

compiled by Florence Hudson Botsford

The songs of the European folk are the great expression of the joys and sorrows, the hates and fears, the romance of the people who sing them. During her frequent visits abroad, Florence Hudson Botsford has been gathering these songs. Her book contains the music jotted down often on odd scraps of paper at some village festival; the words in the original tongue and translations of these words into English poetry by such artists as Edna St. Vincent Millay, Jacob Robbins, Margaret Widdemer, Edgar Lee Masters.

Unique is the value of this book in forming strong ties with the fathers and mothers of coming Americans, by teaching them English, and by showing our appreciation of the beauty they are bringing to America.

Vol I. JUST OUT. Introductory price \$2.75
Contains 145 songs of the Balkan, Baltic and Slavic peoples.

Vol II. Price to be announced
Represents the folk songs of twenty peoples, including those of the peoples of the Near and Far East, of the Latin Nations, of Germany, Great Britain, India and the Americas.

Bookshops Everywhere or **The Womans Press** 600 Lexington Ave. New York City

That officers of the Association be instructed to give the statement all possible publicity.

The report of the survey of normal school libraries was read by Willis H. Kerr and was accepted; also, the recommendation "That the Committee on Normal School Libraries be authorized (1) To proceed with the survey of normal school and teacher college libraries; (2) To present at the next annual meeting a formal report and statement of standards of organization and equipment for such libraries; (3) To seek opportunity to present such report and statement of standards at least in preliminary form before the Department of Normal Schools at the next mid-winter meeting; and the further recommendation that the N. E. A. be requested to vote \$300 to the Committee for the purpose of this survey during the year 1921-22.

The final report of the N. E. A. Elementary School Committee was presented in the form of a "List of Children's Books for Departmental Library Work in Elementary and Junior High Schools," with the hope that it would be possible to have it printed. As it is not possible for the N. E. A. to print it, it was voted that the report be transferred to the A. L. A. Executive Board with the idea of their printing it.

A library luncheon was held on July 6, at which about 150 people were present, and short talks were given by President Fred M. Hunter of Oakland, Cal.; M. Wilford Poulson, Provo, Utah; Joy E. Morgan, editor of publications for the N. E. A.; Cecelia M. Troy of Chicago; and C. W. Swain of Cedar Falls, Ia.

A high school library exhibit was held at the public library and was well attended. Scrap books of high school libraries thruout the country, showing various library methods, pictures of equipment and "the library in action" were on display, and a high school library map showed, by means of colored pins, places having trained high school librarians.

Officers elected for the coming year are: President, Sherwin Williams, chief of the School Libraries Division, New York State Library, re-elected; vice-president, Grace D. Rose, librarian of Des Moines Public Library; and secretary, Margaret E. Ely, Book Selection Department, Chicago Public Library.

MARGARET E. ELY, *Secretary*.

NEW YORK LIBRARY ASSOCIATION

ARRANGEMENTS are being made for the thirty-second annual meeting of the Association at Cornell University, Ithaca, for the week of September 12th. Prudence Risley Hall can house the delegates, but those who prefer a hotel will find the New Ithaca and Clinton House satisfactory.

The Association wants an original song, to be used at the scholarship presentation dinner. The poem is not to have less than sixteen or more than twenty-four lines, must be capable of being sung to some well-known tune, the writer indicating the proper tune. Address entries to Mary C. Richardson at the New York State Normal School, Geneseo, N. Y.

PACIFIC NORTHWEST LIBRARY ASSOCIATION

THE twelfth annual meeting of the Association will be held at Spokane, September 1-3, with headquarters at the Devonport Hotel.

The program will specialize on the problems of the small and medium-sized library: Budgets, organization, books, the profession of librarianship.

The Canadian Pacific Railway is arranging a circuit tour with stop-over privileges, which will include an opportunity to attend the opening of the Peace Portal at Blaine on September 6.

UPPER PENINSULA LIBRARY ASSOCIATION

THE ninth annual meeting of the Upper Peninsula Library Association was held in Iron Mountain on June 2-3. The first session of the round table took place in the Pine Grove Country Club, Thursday noon, where the visiting librarians were very cordially welcomed by Mrs. Lenore C. Carpenter, Librarian of the Iron Mt. Public Library. Following this, a delightful luncheon was served by the library staff members, thru the courtesy of the school board, after which a business meeting was held and the regular papers read, discussions following each. The subjects discussed were: How to get the books in the library across to the Public, by Mrs. Mellie Brayton of Ishpeming, and A year's experience with county work in Menominee, by Helena LeFevre.

In the evening, the meeting was opened by an enjoyable talk by G. M. Walton, librarian of the State Normal College of Ypsilanti, on "English Schools and Schoolmasters." Following this there was a reception.

At the Friday morning meeting the subjects discussed were: The Best of the Recent Popular Novels, by Florence Kronlund of Ironwood; Book Selection and the Business Side of Book Buying, by Marion Dahl of Escanaba; and Library Budgets, by Gladys M. Andrews of Marinette.

The following are the officers for the ensuing year: President: Helena S. LeFevre, Menominee; vice-president, Frances H. Scott, Houghton; secretary-treasurer, Gertrude Kelly.

GERTRUDE KELLY, *Secretary*.

The Constitutional Review

A quarterly magazine, founded and maintained for the purpose of "advocating the maintenance of constitutional government and recording its progress at home and abroad." Discusses the great problems of democratic, representative, and constitutional government. It stands for a firm adherence to the fundamental principles of American government as set forth in the Constitution, opposes bolshevism, socialism, and other forms of extreme radicalism.

Henry Campbell Black, Editor. Published by the National Association for Constitutional Government, and sent without charge to all members of that Association. State, municipal, college, and university libraries, and public institutions of various kinds are subscribers. Subscription price, one dollar a year.

THE KEYLESS LOCK BINDER

Allows the magazine to open flat.

Will hold one thick or a number of thin magazines

Made in all sizes and styles of binding

WM. G. JOHNSTON & Co., Pittsburgh, Pa.

DEAR SIR:—

We have been using several of your Keyless Lock Binders for several months and find them perfectly satisfactory. We have had no more trouble with the "Magazine Thief" and the old numbers look as good as "the new" when taken from the binders.

They improve the looks of the reading table, keep the magazine in better condition and are so reasonable in price that EVERY Association can afford them.

Your sincerely General Secretary.

A Sample for Examination with Catalog Upon Request

The Latest and Best **AUTOMOBILE BOOKS**

THE MODERN GASOLINE AUTOMOBILE, ITS DESIGN, CONSTRUCTION, OPERATION.

By **VICTOR W. PAGE, M. S. A. E.** This is the most complete, practical and up-to-date treatise on gasoline automobiles and their component parts ever published. In the new revised and enlarged 1921 edition all phases of automobile construction, operation and maintenance, are fully and completely described and in language anyone can understand. 1032 pages. 1000 illustrations. Price \$4.00

THE MODEL T FORD CAR, Its Construction, Operation and Repair, Including the Ford Farm Tractor. The F. A. Starting and Lighting System and the Worm-Drive One-Ton Truck.

By **VICTOR W. PAGE.** This is the most complete and practical instruction book ever published on the Ford car and Fordson Tractor. A high grade, cloth bound book, printed on the best paper, illustrated by specially made drawings and photographs. All parts of the Ford Model T Car and Fordson Tractor are described and

illustrated in a comprehensive manner—nothing is left for the reader to guess at. The construction is freely treated and operating principle made clear to everyone. 425 pages. 153 illustrations. Price \$2.00

QUESTIONS AND ANSWERS RELATING TO MODERN AUTOMOBILE CONSTRUCTION, DRIVING AND REPAIR.

By **VICTOR W. PAGE.**

A self-educator on automobiling without an equal. This practical treatise consists of a series of thirty-seven lessons, covering over 2000 questions and their answers—the automobile, its construction, operation and repair. The subject matter is absolutely correct and explained in simple language. 701 pages. 187 illustrations. 3 folding plates. 1921 edition. Price \$2.50

AUTOMOBILE REPAIRING MADE EASY.

By **VICTOR W. PAGE.**

Tells how to overhaul and repair all parts of all automobiles. The information given is founded on practical experience, everything is explained so simply that motorists and students can acquire a full working knowledge of automobile repairing. Contains over 1000 illustrations on nearly 450 plates. 1056 pages. 1921 edition. Price \$4.00

AUTOMOBILE STARTING, LIGHTING, and IGNITION SYSTEMS.

By **VICTOR W. PAGE.**

This practical volume has been written with special reference to the requirements of the non-technical reader desiring easily understood explanatory matter relating

to all types of automobile ignition, starting and lighting systems. Over 800 pages. 492 illustrations. 1921 edition. Price \$3.00

HOW TO RUN AN AUTOMOBILE.

By **VICTOR W. PAGE.** This treatise gives concise instructions for starting and running all makes of gasoline automobiles, how to care for them, and gives distinctive features of control. Describes every step for shifting gears, controlling engines. 178 pages. 72 illustrations. Price \$1.50

AUTOMOBILE WELDING WITH THE OXY-ACETYLENE FLAME.

By **M. KEITH DUNHAM.** Explains in a simple manner apparatus to be used, its care and how to construct necessary shop equipment. Proceeds then to the actual welding of all automobile parts, in a manner understandable by everyone. 167 pages. Fully illustrated. Price \$1.50

THE MODERN MOTOR TRUCK, ITS DESIGN, CONSTRUCTION, OPERATION AND REPAIR.

By **VICTOR W. PAGE.** Just off the press and treats on all types of motor trucks and industrial tractors and trailers. It considers all types of trucks, gasoline and electric and all varieties of truck bodies. This book is written in language everyone can understand and is not in any sense of the word a technical treatise. It is a practical volume that will make special appeal to the truck driver who seeks to better his position and to the mechanic charged with the repair and upkeep of trucks. The factory or business executive who

wants to obtain a complete working knowledge of truck operation problems will find this book a reference work of great value. The truck salesman or automobile dealer will find that this work contains information that means money to them. All garage and service station men should have a copy of this book for reference because truck construction differs from passenger car design in many important respects. Anyone who reads this book is in touch with all the practical features that have been tested out in real service. 1921 edition. Cloth, 6 x 9. 800 pages. 750 illustrations. Price \$5.00

GASOLINE AND KEROSENE CARBURETORS, CONSTRUCTION, INSTALLATION AND ADJUSTMENT.

By **VICTOR W. PAGE.**

All leading types of carburetors are described in detail. Special attention being given to the forms devised to use the cheaper fuels such as kerosene. 89 illustrations. 320 pages. Price \$2.00

Any of these books sent prepaid on receipt of price.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Library Legislation in 1921*

By WILLIAM F. YUST

Librarian, Rochester (N. Y.) Public Library and Chairman, A. L. A. Committee on Legislation.

ESTABLISHMENT

NEW YORK state, where there has been no general revision of library law in about thirty years, secured various amendments relating to organization, operation, gifts, transfer of property, abolition of library, eliminating obsolete provisions, simplifying and clarifying others, expanding some which were too restrictive and enlarging others, all to promote the establishment and maintenance of public libraries. Distinction is made between "public," "association" and "free" libraries and a definition of each is given.

One of these provides for library service by contract with a library registered by the regents or with the municipality or district maintaining such library.

An Iowa amendment provides that a contract for rural library service shall remain in force until terminated by a majority vote of the electors. Formerly it could continue only five years without renewal.

TRUSTEES

An Illinois amendment specifies that library directors in villages under the commission form of government shall be appointed by the Mayor with the consent of the Commissioners.

Iowa remedied a defect in her law by providing that vacancies on library boards are to be filled by the mayor with the approval of the city council. Formerly such approval was not specified, as it was in the case of original appointments.

A New York amendment provides that public library trustees shall be appointed in cities by the mayor, in counties by supervisors, in towns

* This digest is based on actual examination of the printed laws, tho not always in their final form. As it goes to press final reports from several states are still lacking. There will therefore be a few omissions as well as possible corrections. It is the intention to collect and publish these in a supplementary report.

by town board, in villages by trustees; in school districts they shall be elected. A member of a municipal body appointing library trustees may not be a trustee. Trustees must meet at least quarterly. The chief executive officer of an association library shall be elected by the trustees from their own number.

TAX LEVY

A New York state amendment fixes two mills as the possible maximum library tax in municipalities with an assessed valuation of one million or less; one and one-half mills on more than one million and less than two millions; one mill on two millions or over.

In New Jersey one amendment increases the permissive maximum library tax rate from one-sixth to two-thirds of a mill. This is in addition to the mandatory rate of one-third mill. Another removes the limit of \$1,000 which a union of municipalities may raise annually by tax for library purposes.

Illinois passed an amendment increasing the possible maximum library tax levy in cities under 100,000 to one and eight-tenths mills (formerly one and one-third mills) and in cities over 100,000 to eight-tenths mill (formerly two-thirds mill). It also excepts libraries from the scaling under the two per cent reduction clause of the Juul act. Another bill amends the Juul act to permit this exception.

In Missouri an amendment increases the mandatory minimum tax levy in cities of the first class from four-tenths to eight-tenths of a mill. This was introduced at the instance of the St. Joseph Public Library, but applies to all first-class cities. Another law amends the charter of the city of St. Joseph by increasing the minimum library tax which the council must appropriate from four-tenths to eight-tenths of a mill. This will increase the library's annual income about \$21,000.

Kansas passed an amendment raising the permissive maximum library tax from one-half mill to one mill in cities of second and third class. Cities of first class already had authority to levy one mill if population was under 40,000; over that, one-fourth mill. The chairman of the Kansas Library Association Legislative Committee says, "This ought to bring a new era in Kansas public libraries."

Wyoming failed to pass an introduced bill fixing the minimum and maximum county library tax levy in counties with an assessed valuation of twenty-five millions or more at three-eighths to one-half mill (now one-eighth to one-half mill for all counties).

Indiana has the unique distinction of passing the only law reducing the library tax levy. An amendment fixes the minimum county library tax at two-tenths of a mill. It was formerly five-tenths, which is no longer necessary on account of a tremendous increase in assessed valuation. The library board still has power to fix the rate and may levy five mills, if that amount is needed. Another Indiana amendment prescribes that the county library tax shall be continued so long as the library is used by ten per cent of the inhabitants of the district concerned. Previously it was ten per cent of the entire county.

In Cleveland an interesting situation developed. The public library there is one of about twenty-five libraries in the state operating under boards appointed by boards of education. The library trustees appointed by the board of education certify to the board of education annually the amount needed for the library during the ensuing year. The board of education up to 1920 transmitted such amount not exceeding one and one-half mills with its own budget which it is authorized to levy for school purposes.

A budget commission reviews the estimates presented by each taxing body and may reduce any and all items so as to keep the total tax levy within the fifteen mill limit prescribed by law. (Originally the limit was ten mills (one per cent). The law was, however, amended to fifteen mills although it is still familiarly referred to as the Smith one per cent tax law.) Last fall this budget commission decided that the amount certified for library purposes could not be in addition to the amount certified for school purposes but must be a part of it. This meant that the entire appropriation for the library, \$894,000, was deducted from the amount levied for school purposes. This action was taken to the Court of Appeals, but the decision of the Budget Commission was sustained. Instead of an appeal to the Supreme Court, the

Board of Education accepted the decision for the one year and sought a remedy in legislation.

As a result, an amendment to the library law was secured which provides that the amount certified by the library board shall be in addition to all other levies authorized by law, but not to exceed one and one-half mills and subject to no other limitation on tax rates. This amendment puts this group of libraries in a very favorable position as to adequacy and certainty of income. It means that the levy made by the library board and certified to the board of education cannot be reduced either by the board of education or by the budget commission. It is so advantageous that these libraries will need to use it wisely. The trustees of the Cleveland Public Library feel this responsibility keenly and the Ohio Library Association is urging this same restraint on the remaining libraries. The Cleveland Public Library for next year is asking an amount only about one-third of that permitted by law.

BONDS FOR BUILDINGS

A special New York act authorizes the city of Buffalo to issue \$100,000 worth of bonds "to construct, enlarge, extend, improve, alter, remodel, repair, rebuild and equip the buildings of the Grosvenor Library."

A local law in Delaware authorizes the city of Wilmington to raise \$200,000 by bond issue to purchase from the Wilmington Institute a site for a library building. This site is to be leased to the Institute. The Institute is to use this money together with its own building fund of about \$300,000 to erect a library building. The law also stipulates that the Institute must use the income from all its other property, that is, its old building, for maintenance. The Institute is a private corporation to which the city is not allowed by the state constitution to appropriate funds. The procedure outlined obviates the constitutional difficulties and makes possible a new \$500,000 library building.

New Jersey passes an amendment extending the provisions of the public library act relating to bonds for building purposes to all municipalities (formerly paid to cities) and permitting them to issue such bonds at six per cent (formerly five.)

BOOK PURCHASES

Oregon passed an amendment making it unlawful for libraries with income under \$2,500 to buy or make accessible books except those recommended by the A. L. A. or the library or school department of the state. This is a new development in the restriction of local power. It is common practice where state aid is given to local libraries to permit the state grant and

its local equivalent to be spent only for books approved by the state.

The Oregon law has no reference to state subsidy. Its object is to provide for the proper expenditure of the book fund in small libraries which cannot afford the services of a trained librarian. It was introduced by a senator who is a library trustee. It is intended also as a protection against the importunate book agent and the promiscuous gifts which are placed on the shelves to please the donors. The limitation fixed is not narrow but the nature of the restriction is important. The *Library Occurrent* of Indiana calls it "the last word in paternalistic library legislation. . . . In the long run education, counsel and experience are much more valuable than 'Thou shalt not.'"

GIFTS

A New York amendment permits acceptance upon terms stipulated in the gift of a conditional gift for library or kindred educational, social and civic agencies when affiliated with a library. Heretofore a strict interpretation of the law made impossible the acceptance of a conditional gift for library purposes, if the gift included any activities other than those pertaining to a library.

BOOK THEFT

New York state secured a much needed amendment to the penal law relating to the buying of stolen or wrongfully received property, making it include library books and other library property acquired by second-hand dealers. Heretofore it has been practically impossible to convict a book seller because the burden of proof rested so heavily upon the state. This law makes it a crime to buy such books "without ascertaining by diligent inquiry" that the seller has a legal right to dispose of them. It provides a maximum penalty of five years in prison or a fine of one thousand dollars or both according to the value of the property.

FINES AND PENALTIES

North Carolina has made it a misdemeanor "wilfully or maliciously to detain a book" fifteen days after notice of expiration of time limit has been mailed or delivered in person.

Wyoming passed the usual type of law making it a misdemeanor to mark or damage books, etc.

New Jersey authorizes re-appropriation to the library of money received from fines, which is to be in addition to the regular appropriation. Heretofore such money was turned over to the municipality and included in anticipated revenue.

SALARIES

Information received on this subject is very incomplete, due in part to modesty of reporters. A Wyoming law says the salary of the county librarian in counties having assessed valuation of twenty-five millions or more shall not be over \$2,400. Formerly it was not fixed by law.

California has legislation pending on this subject.

In New York state a number of local acts show the disposition of the legislature to increase the salaries of court librarians: Elmira supreme court, from maximum of \$800 to \$1,200; Utica supreme court, from \$1,000 to \$2,400; Bronx county law, not specified, to \$3,500; New York city court, not specified, to \$5,000.

CERTIFICATION

The certification of librarians, which has been one of the chief topics of discussion at library meetings for many years, has entered the legislative stage. It has been a feature of the California county library law for ten years, an example which has been followed in the county library laws of Illinois, Montana, Texas and Utah and this year in Ohio, South Dakota, Tennessee and Wisconsin. In Minnesota the certification feature had much to do with the defeat of various amendments to the county library law.

This year New York state has prepared the way for certification of librarians in public libraries by authorizing the regents to fix standards of service in state-aided or tax-supported libraries. Any library failing to comply with the requirements shall receive no state aid and no local tax shall be levied for it. This principle has been advocated for five years by the state library association through its standing committee on the subject. The report of this committee has each year become more definite, until last year it included a complete plan which was approved and recommended to the regents. The legislation necessary for making the plan when put into operation effective has now been secured.

The recommendation of the association included a system of service grants from the state, which were intended to make the certification plan more acceptable, that is, a small state appropriation to be paid toward the salaries of librarians in places employing certificated librarians. In view of the pronounced economy program of the state administration, it was thought best not to urge the service grants at present.

In Rhode Island a bill was introduced authorizing the state board of education to issue certificates to librarians and establish rules and regulations regarding the service and efficiency

of libraries. It also provided service grants to libraries conforming to the rules. This bill failed, but a substitute was passed providing state aid, which is expected ultimately to lead to certification.

The Illinois certification law also failed. It prescribed the requirements for various grades of certificates and established an examining board. Certificates were to be issued by the state department of registration and education, which already has charge of the certification of a dozen or more professions, trades and occupations. It had the active support of the state library association, which claims that the plan will raise standards, equalize competition, provide systematic advancement and increase salaries.

A law like this which outlines in detail its method of operation naturally meets more opposition than the short paragraph in the New York law, which merely gives the regents permission to put the principle into effect.

The Iowa Library Association has established a system of voluntary certification with a view to future legislation. The intention is to test the plan by actual experience and thus prepare the way for its enactment into law. Similar plans are under consideration in Minnesota and South Dakota.

Wisconsin enacted a complete certification law substantially in the form recommended by the state library association. "The plan had been worked out on three principles, the establishment of distinct grades of service, the safeguarding of the rights of those already in library work and the opportunity for anyone to enter library work by tests of his education, training and experience." It creates a public library certification board of five members, two librarians and one public library trustee appointed by the governor, one a member of the state library commission selected by the commission and one from the faculty of the state university selected by the president of the university.

There are to be four grades of certificates varying in academic and library school training and experience required. The board may issue a certificate to an applicant who does not have the prescribed training but has attainments substantially equivalent to such education and training.

The board may issue a certificate without examination to anyone who has served as librarian or assistant for one year prior to January 1, 1923, if in the opinion of the board such person has demonstrated sufficient ability. A person having the required academic and library training but lacking experience may obtain license for one year and then for a second

year in order to gain the experience necessary to qualify for a certificate.

After January 1, 1923, boards of public libraries supported in whole or in part by public funds, except in cities of the first class, shall not employ a librarian or a full time assistant who does not hold a library certificate. Librarians employed at that time may continue to serve without a certificate.

Librarians appointed after January 1, 1923, in cities of eight thousand or over, except in cities of the first class, must have first grade certificate; in cities of four to eight thousand, at least second grade; in cities of two to four thousand, at least third grade. The board may permit the employment of a librarian without certificate for six months, if one with certificate cannot be secured.

Public libraries maintained wholly or in part at state expense are exempt from the mandatory features of the law.

RETIREMENT SYSTEMS

In Connecticut any city, borough, town or subdivision thereof may retire with pension or other reward any employee of any public library within its limits. This is a specific interpretation of the home rule statute. Its promoters thought it best to ask only for permissive legislation at this time.

An Illinois amendment directs cities of over one hundred thousand to add all fines for overdetention of books to the employees' pension fund.

In Michigan a librarians' pension bill introduced by the Detroit Public Library failed. It was opposed by the Detroit City Commission on the ground that the precedent thus established would sooner or later be applied to all municipal employees.

In New York state the same purpose was defeated in a different way. There a local bill was introduced to amend the greater New York charter by extending its pension provisions to employees of all public libraries of the city. The bill died in the Cities Committee of the Senate.

Another New York state amendment authorizes the appellate division of the third and fourth departments of the supreme court to retire on half pay law librarians who have become incapacitated after twenty-five years of service. One per cent of their salary is to be paid toward a retirement fund. This amendment extends to librarians a law which has heretofore applied to clerks and stenographers since 1914. A similar law for the second department (New York City) was passed in 1913 except that under it no salary deduction is made toward a retirement fund.

These laws are practically private pension bills in view of the small number of employees

who are affected thereby. The passage of one this year seems the more strange and unnecessary because these law librarians were already entitled to the benefits of a general law passed last year.

That law established an optional retirement system for all employees in the state civil service, which includes all librarians in the state service. It creates various funds by state appropriation and deduction from salaries in accordance with actuarial computations. It provides for disability and superannuation retirement. The latter may take place at sixty and must at seventy. Payments are to be made in the form of annuities, pensions and retirement allowances to the possible aggregate extent of one-half salary. This is regarded by experts as one of few scientific and sound pension systems.

STATE LIBRARY COMMISSIONS

Several state library commissions were on the defensive. In Missouri a bill was introduced to abolish the commission and place its work in much curtailed form under a bureau in the new education department. It was thought by some that the work could thus be done better. It has not been ascertained who the real promoters of the scheme were. Owing to the vigorous opposition by the commission itself and the librarians of the state the bill failed to pass.

In Oklahoma a bill was defeated which aimed to consolidate the library commission, the state library and the historical society. According to the legislator introducing it, this was done at the wish of the library association and the historical society, but neither of them was in favor of it.

The South Dakota commission law received an amendment providing for restoring library property in case of fire, making the emergency building fund applicable to the state library commission, which is in temporary quarters pending erection of a new office building.

The Vermont law was extended to permit the commission to lend books to individuals as well as to groups.

State library commissions were entirely abolished in the following states, the date of establishment being given in each case: Illinois, 1909; Maine, 1899; Michigan, 1899; Ohio, 1896; Washington, 1903. In each state the powers and duties of the commission are transferred to the state library. Considered purely from the standpoint of organization, this ought to be an improvement. A single state agency for libraries should be sufficient and may be more economical and efficient than two. It may also be just the opposite. State libraries had existed in some states for many years prior to

the establishment of library commissions, but most of them were intended merely for the use of the legislature and politics dominated their personnel and their methods. Many of them were therefore not regarded as competent to perform that larger service for the state as a whole which came to be recognized as the proper function of a library commission. Meanwhile state libraries have improved, but it remains to be seen whether they have grown sufficiently in ability and vision to carry on this important work and also whether this different form of organization is more economical and efficient.

STATE LIBRARIES

A number of state libraries were hit by the reorganizers. For some it means enlargement of their power and responsibility, for some a curtailment and for some just a change. In Illinois the powers and duties of the abolished library extension commission are vested in the state librarian, who is the secretary of state. He shall establish a general library division, library extension division, a division of archives and others as he chooses. A significant change is that heads of divisions are exempt from civil service, whereas the entire executive staff of the abolished commission was under state civil service.

This act is in accordance with the general movement toward consolidating commissions and offices in Illinois. A thoroughgoing consolidation would have included the supreme court library, the state historical library and the legislative reference bureau, but political considerations played their part there as they did in the civil service exemptions. As the personnel of the new executive staff is practically the same as that of the two offices which are combined, it probably does not for the present mean much change in the work now being done.

Maine also enacted a law consolidating the state library and the library commission. State librarian as formerly to be appointed by governor and council for five (formerly three years), salary \$2,800 (formerly \$1,800 plus \$300 as secretary of library commission).

It provides for legislative reference bureau and index bureau, which two had existed before, and bureau of library extension. The library commission is abolished and its activities without change transferred to the extension bureau. The commission was established in 1899 "to encourage the establishment of free public libraries, to select the books to be purchased for traveling libraries and to advise the state librarian in reference thereto." These duties were enlarged in 1911. Under the former law the state librarian served as secretary of the commission. The new arrangement therefore

does not mean a change in activities but a simpler and more effective organization under one board instead of two.

A resolve was passed appointing a committee of four which shall at an expense not exceeding \$5,000 procure plans, specifications and estimates for a state library building.

In Ohio, where the position of state librarian has been a "political football" for ten years, the state library association has been vigorously active in behalf of a change. In reply to the demand from all sides to "take it out of politics," both candidates for governor last fall had made statements to the association that in their appointments to the commission and the librarianship only training and experience would be considered, rather than political expediency.

Then came the governor's plan for a fundamental reorganization of the entire state government subordinating all the work of the state under eight or nine heads. The reorganization code was passed but may still be subject to a referendum.

This reorganization code creates in the department of education a state library board composed of the director of education and four others appointed by the governor. The board has power to appoint and remove the state librarian, who is to be in charge of the library service of the state with power to appoint and remove assistants. Under the board he shall exercise all powers and perform all duties formerly vested in the state board of library commissioners and the legislative reference department.

This plan is in keeping with the Ohio law under which about twenty-five of the large libraries of the state, including the largest, operate under school boards, the library board being appointed by and responsible to the school board. But the law does not make the new state library board responsible to the education board. The possibilities of politics in the state library remain inasmuch as the governor still appoints four of the five members of the state library board. The sincerity of his campaign promise will be tested when the first appointments are made.

Washington, "to promote efficiency, order and economy," made a radical change in her state government, passing "the administrative code," which grants wide powers to an administrative board. It places the state library under an administrative committee consisting of superintendent of public instruction, commissioner of public lands and state treasurer (formerly the state library commission consisting of governor, judges [9] of the supreme court and attorney general; also an advisory board consisting of

superintendent of public instruction, two persons appointed by the governor on his own initiative and two others, one recommended by the state historical society and one by the state federation of women's clubs.)

It abolishes sixty-five or more boards, commissions, etc., including the library commission and the advisory board and transfers to the new committee all powers and duties of the former commission and the advisory board except those relating to the state law library.

Ex-officio library boards or committees do not usually make for efficiency and yet this change simplifies administration by making the state librarian responsible to one body of three members instead of two boards with a combined membership of fifteen. The new committee has organized with the superintendent of public instruction as president, the former state librarian continuing as secretary. The state library will therefore function as a sub-division of the education department. As such it is expected that its work will be placed on a par with that of the schools and not serve as a school library annex.

A separate administrative committee, made up of the justices of the supreme court, the attorney general and the secretary of state, is to succeed the state library commission in the management of the state law library, the state law librarian acting as secretary of the committee.

In California the state board of library trustees is abolished and the library placed in the department of finance. The head of this department succeeds to the powers of the state board of control, which with the civil service had left little authority to the library board. The change therefore means practically no difference in the administration of the state library.

STATE AID

Rhode Island amended her education law to provide state aid in the form of salaries to libraries with "means not sufficient to maintain proper library service." It is to be paid to librarians whose salaries do not exceed \$500 and not over \$400 to any librarian. An appropriation of \$3,000 is made for this purpose. This amendment was passed as a substitute for the certification bill, which is noted under that head.

A Vermont amendment empowers the state library commission to take possession of books bought with state money where a town or village fails to make the annual library appropriation required by law.

COUNTY LIBRARIES

The county library has received more consideration than any other library subject. A

complete county law was passed for the first time in Kansas, Missouri, New York, Ohio and Tennessee. Failures of a complete law are recorded in Idaho and Washington, and of amendments in Iowa and Minnesota. In Washington, however, the new administrative code makes it possible for county libraries to be established under the rules of the state library.

Bills to establish county libraries were ready but were not introduced because the prospect was not promising in Oklahoma, Georgia, which has tried once and failed, and Colorado, which has tried twice and failed. Georgia will try again this summer to get the necessary constitutional amendment which will permit the levy of a county library tax. Then efforts will be made for a county library law.

In Indiana two amendments were passed relating to the county library tax. These are noted under the heading "Tax Levy." Another increases the number of county library commissioners from seven to nine to relieve quorum difficulties which had existed.

South Dakota secured several important amendments making establishment mandatory on petition of forty per cent of voters, petition to be signed in at least sixty per cent of taxing districts affected (formerly it was permissive on petition of twenty per cent of voters); county librarian shall act as secretary of county library board and have qualifications and training approved by state commission; when a local library serves the county under contract, the county shall have two representatives on the library board, if it pays twenty per cent of the maintenance cost.

Wisconsin, which was one of the first to legislate on the county library, 1897, added a number of important amendments. These are in the form of additions to a general law relating to libraries which is applicable to other political units such as city, village and town. The more important features are: (1) a new provision for the establishment and maintenance of a new library system including appointment of staff. A county board extending financial aid to an existing library in return for service shall appoint two representatives on the library board when such aid equals or exceeds one-third of library's income (formerly one representative for one-sixth of income); (2) exempting upon application a taxing unit which is giving adequate aid to a local library; (3) county board may use Milwaukee system of charging back in proportion to service rendered; (4) county librarian to hold first-grade certificate; (5) old county traveling library may be transferred to system established under new law.

A Wyoming amendment provides for establishing branches and book distributing stations for people living out of town, wherein the county library is located. This is to be done on petition of ten electors who must agree to provide accommodations and proper trusteeship for property entrusted to them. Another law is noted under salaries.

Comprehensive laws were passed in Kansas, Missouri, New York, Ohio and Tennessee. They are uniform on only a few points: all provide for a contract system; all exempt districts with libraries, if they desire it; all but Kansas require annual reports to the state library agency; all but New York specify that the librarian shall attend library meetings at library expense (in Ohio the library pays only railroad expenses); all but New York specify that the library fund shall be in the custody of the county treasurer (in Tennessee the county trustees) subject to the order of the library board (in Tennessee the county librarian). These points of agreement should be borne in mind and added to the variations in the laws of these five states. The variations are as follows:

Kansas. County commissioners may establish county library or contract for use of an established library after majority vote by county. Question shall be submitted to vote on petition of ten per cent of taxpayers. May levy tax of not over one-half mill except on territory already taxed for a local library. Library to be controlled by board of three members appointed by county commissioners. Librarian is appointed by board.

Missouri. On petition of one hundred taxpayers county court shall submit question of establishment and levying of tax of not over two mills to voters outside of places already maintaining libraries.

On a majority vote a county library board of five members shall be appointed consisting of county superintendent of schools and four appointed by county court. On majority vote a special tax of one and one-half mills may be levied for five years for library building fund. State commission to visit county library and make report on library to county board.

This bill was introduced by the state library association into each legislature since 1915. It almost failed again, but thru the efforts of numerous organizations it was passed on the last day of the session.

New York. The New York law is in the form of an amendment to the general education law relating to libraries and some of its provisions are common to all public libraries, such as those relating to the number of members (five)

on the library board and the certification of librarians.

A county library may be established by vote of electors or of board of supervisors. Vote shall be taken when twenty-five taxpayers so petition. May levy library tax of one-third mill to one mill, shall levy not less than one-half mill in county with assessed valuation under one hundred million dollars. Chief administrative office to be in county seat unless another city has twenty per cent larger population; not to be moved by reason of change in population.

County libraries have been possible in New York for ten years, but none have been established on account of the double taxation they would impose on cities already having libraries.

Ohio. County library may be established on majority vote of electors. Election to be held on petition of twenty-five per cent of the electors. To be managed by board of five trustees, two appointed by common pleas judge and three by county commissioners. Library board shall levy annual library tax of two-tenths mill to one mill. County librarian must have certificate from state board of library examiners, consisting of librarians of the two public libraries of the largest circulation, director of the state library service and two persons chosen by the state library commission.

Tennessee. County court may establish county free library for territory outside of cities and towns with libraries. A state board of library examiners is created consisting of state librarian, state superintendent of education, public librarians of four leading cities and president of state library association. County librarian must have certificate from this board.

A board of supervisors of the county library is established consisting of judge and clerk of county court and mayor of county seat; this board shall elect four persons, who with the county superintendent of schools as the fifth member, shall serve as county library board and supervise the library. County libraries shall be under the general supervision of the state librarian, who shall visit them and call annual meetings of county librarians. County court is to levy annual library tax of not over one mill.

In the LIBRARY JOURNAL of September 15, 1920, 45:727-31, W. J. Hamilton has a valuable article in which he states twelve points which he regards as desirable in a good county library law. Measuring these seven enumerated laws according to Mr. Hamilton's standard gives these results:

1. Library board to fix tax rate: Yes, with fixed limit in Kansas and Ohio.
2. Tax rate with fixed minimum: Yes, in New York and Ohio.

3. Establishment mandatory under certain conditions: Yes, after election in Kansas, Missouri and Ohio.

4. Permanence of library once established: Yes, in Kansas, Ohio and Tennessee; Missouri and New York provide for disestablishment.

5. Provision for new county library or contract with city: Yes, in all.

6. County representation on city board under contract: Not provided by any.

7. Certification of county librarians: Yes, in Ohio and Tennessee; authorized in New York.

8. Exemption of districts with libraries if they desire it: Yes, in all.

9. Required attendance of librarians at state and district meetings at county expense: Yes, in all except New York.

10. Right of Library Board to borrow money for building purposes: Not specified by any.

11. Permission for difference in tax rates in central community and outlying county: Not specified by any.

12. Annual report to state library agency: Yes, in all but Kansas.

FEDERAL LEGISLATION

There is an unusually large amount of federal legislation pending which if enacted will affect libraries and librarians. On account of its volume and the uncertainty of its passage only a brief statement about each is here included.

Hospital Library Service. The sundry civil appropriation bill passed by the last Congress includes \$100,000 (available July 1) for library books, magazines and papers for beneficiaries of the Bureau of War Risk Insurance. This provides for continuing the hospital library service inaugurated by the A. L. A.

Navy Appropriation Bill. This includes \$589,500 for educational training and libraries for the navy. Among the objects specified are "Instructors and equipment for vocational training, the maintenance of libraries ashore and afloat including salaries of necessary librarians, purchase of books, magazines, newspapers and library supplies."

Library Information Service. A bill creates a Division of Library Service in the Bureau of Education. Its duties will be to increase the efficiency of American libraries by providing current information concerning government activities; collect and organize information regarding printed matter issued by the federal government and provide digests of this material.

This service existed six months in the Interior Department under the emergency fund. The bill as amended calls for an appropriation of \$18,700. It has been thrice endorsed by the A. L. A., by the League of Women Voters, by

numerous civic organizations, as well as by two secretaries of the Interior and Vice-President Coolidge. It is the one so admirably defended in the Senate, Jan. 14, 1921, by Senator McLean of Connecticut.

Towner Sterling Bill. This creates a federal department of education with a secretary in the President's cabinet. Its object is to encourage the states in the promotion of education including "the extension and adaptation of public libraries for educational purposes."

Reclassification of Government Service. Two competing bills on this subject are before Congress, each classifying the civilian positions of the government for the purpose of standardizing salaries. Each of these embodies to some extent the recommendations from committees of the various divisions of the public service concerned. They both provide substantial increases of salary. The passage of either would improve the status of librarians in the capital city and probably have a good effect on library service in general.

RECENT LEGISLATION AND LIBRARY REVENUES

The laws summarized under the heading "Tax Levy" in the preceding report do not warrant much generalization. They do show a disposition to permit libraries to adjust themselves to changing conditions and to provide more liberally for their support. The Indiana amendment providing that the county tax shall be continued so long as the library is used by ten per cent of the inhabitants of the district concerned calls attention to the fundamental principle that support depends on service. This principle needs emphasis. Whatever may be the form of its state law, a library's support will ultimately depend upon the nature and extent of the service which it renders to the community.

Considerable discussion has revolved around the question as to whether a library board should have the power to levy the library tax. The two states in which this question has been differently decided are Iowa and Indiana. Altho the decisions are many years old, they are frequently referred to and for this reason a brief outline of each case is here given.

In 1896 the board of trustees of the public library in Des Moines, Iowa, fixed a tax rate of one mill for library maintenance and a tax of three mills to create a sinking fund for the purchase of a lot and the erection of a building. In so doing it acted in accordance with a law passed by the general assembly which authorizes the library trustees to fix the rates

given for the purposes stated and "cause each of the rates so determined and fixed to be certified and the council shall levy the taxes necessary to raise said sums respectively for such year."

The library board certified these amounts to the city council, which refused to levy the taxes. When carried to the supreme court of the state the act of the general assembly was declared unconstitutional.

The court held that the right to fix the tax rate was equivalent to the right to levy a tax. But the power to levy a tax cannot be delegated by the legislature to a board or officer not elected by and immediately responsible to the people or the taxpayers. Similar laws violating that principle had been declared unconstitutional in Illinois, Kansas and Michigan.

In 1906 a case involving this principle came from Marion, Indiana, to the supreme court of the state, which decided that the delegation of the power of taxation to a library board appointed by the council was lawful. In its decision it cited the state constitution, which says: "Knowledge and learning, generally diffused thruout a community, being essential to the preservation of a free government, it shall be the duty of the general assembly to encourage, by all suitable means, moral, intellectual, scientific and agricultural improvement, and to provide by law for a general and uniform system of common schools, wherein tuition shall be without charge equally open to all."

The court declared: "It may, with propriety, be said that a law providing for the organization and maintenance of public libraries is a part of the educational system of the state and that boards organized under the provision of said act exercise the whole power of the municipality in respect to public libraries.

"It is to be remembered that the trustees of a school city are appointed in the same manner as are trustees of library boards appointed under the provisions of said act, and no objection could be urged against the authority of a library board so appointed to levy taxes, pursuant to legislative authority, which might not be urged with equal force against the levy of taxes by school boards. Our statutes contain many provisions authorizing school boards to levy taxes for certain purposes, some of which have been upon the statute books for nearly half a century."

Two important principles are involved in these decisions: one whether a board not elected by the taxpayers should have the power to levy a tax; the other whether in a given municipality

there should be more than one tax-levying body. On these points there is no agreement among different states, nor among courts within a single state, not even among different divisions of the same court as illustrated this year in New York state.

The city of Buffalo has the commission form of government, but retains its board of education. In 1919 a state law was passed authorizing and directing boards of education to make large increases in teachers' salaries. The board of education this year submitted its budget for over five million dollars. The common council cut this estimate \$345,629.

The appellate court decided that the council had no authority to make this reduction. It held that the entire management of schools being placed in boards of education, gave them power to compel the council to levy the necessary tax.

The argument stated that "The tendency of legislation in recent years has been in the direction of enlarging the powers and authority of boards of education to the end that the educational facilities of the state should be taken away from the control of municipal authorities, and thus remove them as far as possible from political influence and place them in charge of boards of education composed of persons selected because of their supposed familiarity with educational matters."

When taken to the court of appeals this decision was reversed on the ground that the council has the sole power to raise by a general tax the funds necessary to carry on the city. While admitting the enlarged powers of independent boards of education, it denies that those powers are unqualified.

The court said: "It would seem unfortunate if in a city of the size of Buffalo, a body however able and devoted, not elected, not removable by the appointing power, not even with a tax budget of its own so that its action would be brought sharply to the attention of the public, might command the allotment to it of whatever part of a limited revenue it thought best to the sacrifice of other interests perhaps as essential. Such a board has no detailed knowledge of other public needs. It knows nothing of the number of police required, or of the demands to safeguard the public health. Its view is limited to its own department, of course important, but likely to be regarded as of unique importance by those who have its interests at heart. In all governments, in the nation, the state, the city, the problem is to reconcile a hundred pressing needs so that the total of the appropriations shall not be excessive."

These conflicting decisions show that the court battles of a century have not settled this question of taxation. One learned body hands down a solemn decision and another equally learned body reverses it. There is therefore strong argument as well as high precedent in favor of as well as against the library tax being levied by the library board, tho very few library boards have this power. Therefore the new edition of the A. L. A. manual chapter on legislation recommends that the tax rate be fixed by the library authority within the limits, if any, set by law.

Century Magazine. v. 53-80; v. 81, nos. 1-2; Nov., 1896, to Dec., 1910. Unbound. Jessie L. Arms, Iowa City, Ia.

A rotary organization, with George T. Settle of Louisiana as president, Charles E. Rush of Indianapolis as sergeant-at-arms and Paul M. Paine as secretary was formed during the Swampscott Conference. In preparation for future library meetings all Rotary libraries are asked to send their names to Paul M. Paine at the Syracuse (N. Y.) Public Library.

Libraries and Museums, III

BY JOHN COTTON DANA

Librarian of the Public Library and Director of the Museum Association, Newark, N. J.

First Steps Toward Museum Founding

WHAT has thus far been said should make it clear that I feel that the usefulness of museums to the general public may be frankly questioned. I have tried to show that utility is a museum's only excuse for being; that a test of its utility lies in its use; and I have hinted that its use as a collection of objects which are available in "visual instruction" has not been proved to be of great value. Hence, why museums at all?

To all this the retort can be made that only a stupid or dull or narrow and bigoted mind can fail to see the profit to the world, in the long run, of the collection, identification and safe storage of the tools and adornments of human life, and of a like treatment of all objects that lie in the realm of science—meaning here well-nigh everything that man can touch and see. To this retort comes the reply that I am speaking of museums for the average person, old and young; and freely and gladly admit that all the "storage" and all the "gazing" museums in existence find a certain slight degree of usefulness, today, and will ultimately find more thereof. The argument for the establishment of general collections of objects, so chosen, so described, so intelligently presented by curators, so freely lent and so open to study so as to be obviously useful and obviously pleasure-giving—this argument may be confused by vague allusions to the general uplift given by exterior and content of a gallery of fine art, and to the high value to students of the marvellous regiments of objects in a museum of science, and to the high duty of the men of to-day to collect for the men of to-morrow all that they can gather of records of the past. But the confusion thus produced does not go beyond confusion of mind and does not affect the argument. Indeed I present, strictly speaking, no argument at all. I make merely the statement that a new type of museum is here and now in process of development; that it finds the cause of its existence in the fact that museums of the old type do not render the service which those of the new type purpose to render; that it denies neither the propriety nor the value—in the long run—of museums of the manner now dominant, and admits that its coming may irritate the advocates and workers in many of the existing museums; and will probably lead to an insistent demand

that these latter change some of their ways.

I dwell so long on making it clear that we should turn some at least of our thoughts and our energies to a new kind of museum, and on making it clear that in so doing we are not forgetful of the good things that may be said of the old museums, because of the existence of an ancient, stupid and unjust custom of charging the advocates of the new with a wholesale condemnation of the old. As an abstract proposition we are all ready to agree that progress involves change, and, conversely, that where there is no change there is no progress. But in real life change is usually accompanied by pain, in our minds or in our sensibilities or in both, and the proponent of change is usually condemned as a cause of that pain.

If the subject of museums is of interest to you, then you have already examined casually the museums of your town; but if you purpose to use your library, and your position as a library worker, as aids in local museum development, then you should proceed to examine them critically. You should visit them, examine their contents and their methods of administration, their finances, their annual cost to your city and what the return for that cost in influence on the lives of citizens, old and young.

I assume that you know something of the use of objects and pictures in the practice of teaching. You find about a thousand times as many visits are paid to movies in your town in a year as are paid to your museums. Your movies practice visual instruction; your local museums may vaguely wish to practice it; but succeed in doing little more than giving to a few, on rare occasions, opportunities for idle gazing. A few inquiries will probably show you that new methods will not be seriously considered by your museums. Let us assume that you ask if you can put slips into your books on art and science referring to objects in your museums and saying that old and young will be conducted over them and shown the things each may wish particularly to see; that you ask for objects to display in your library; that you ask that readers, notably teachers, having borrowed books from your library to aid them in their work, may borrow from the museums objects which will make their classroom work more instructive and more interest-

ing. To all these queries the answer will be, in most cases, no.

Your interest in visual aids to education continues, and you find that the literature of the subject is interesting, and leads you to the conclusion that the use of such aids is well worth while. I have hinted that in my opinion the value of these aids has not been thoroughly demonstrated; but that very fact makes me the more keen to see the subject more widely studied and visual aids more used. Only by use and observation can the question of value be answered.

You probably have already a collection of pictures from which many borrow examples for a score of uses. That teachers use them freely is indicative of their utility to them in their present stage of pedagogic knowledge. That designers, movie men, newspaper men, decorators, architects, and others use them is ample evidence that they are useful to the community at large, even tho their utility in educational work is not yet definitely proven.

If you have a collection of pictures, which you do not lend, then you have in your library the foundation of a museum of the old type. It is still more definitely of the old type if the pictures are under glass, can be examined only with a certain quantum of back and neck twisting, and of eye-strain, can be seen only up to 5 p. m., and only by walking carefully a goodly distance on hard and polished floors, and only by prolonged standing—comfortable seats not being of the essence of gazing museums.

If your pictures may be freely handled, may be examined and used by the student or the pleasure-seeker when seated in a chair at a convenient table, and if they may be borrowed in quantity for use at home, or in office, shop or school, then you have in your library the beginnings of a museum of the new type. All doubts about the value of visual aids, as giving pleasure and profit to your community, as a whole, are nearly forgotten in the presence of the simple fact that they are used, and with evident enjoyment.

Having shown by your success in founding and conducting a museum of pictures that you have already certain of the qualifications of a museum manager, you are perhaps moved to go further and begin a collection of objects. You are convinced that such a collection, directed as are your pictures, will be useful, and you have found that the museums of the neighborhood will not lend objects and do little or nothing to make themselves attractive, pleasure-giving and of influence on the tastes, thoughts and aims of your community. If you learn these things in no other way you can almost surely learn them from the

one fact that visitors to them are few—few absolutely, and also few relatively to the money that has been spent on their foundation and maintenance.

At this period, beware of the benevolent museum founder; especially of him who has made a collection of objects of art and curiosity and wishes to present them to your city, thru your library, on condition that they be kept forever in certain rooms of their own, that the rooms be always plainly marked with the name of the donor and that they be always open to the public. Collections and even whole museums, including the buildings that house them, are not uncommon as gifts of well-meaning persons to their respective communities, and are in nearly all cases entirely dead as soon as they are set up. A finished museum is a corpse, and so is a finished collection. In common with all other institutions, a museum to be of any value must grow; and it must do more than that—it must change its objects, their manner of presentment and its methods of management, that it may meet the ever changing needs of a changing order of society. A librarian is peculiarly well fitted to see the truth of that statement, for he is familiar with the library's recent history and has noted the radical changes it has undergone. A few years ago libraries were as are museums of the old type today, with bound books for adults as almost their sole objects of collection, and these rarely lent and under many restrictions, with no access to them by their owners save thru a catalog and an attendant, and with the slightest of a clientele. To-day we have, in our libraries, books for all ages, journals, maps, pictures, pamphlets, clippings, music records and movie films. These objects may all be freely handled and examined; all ages and all classes use them; skilled attendants serve as "docents" concerning them to all comers, and they are borrowed under few and simple rules.

Do not, then, think of the museum you may hope to help establish in your library, or with its aid, as something which will ever be complete. Think of it always as a beginning, as an ever-changing series of collections, administered in ever-changing ways.

After what has been said it is not necessary to suggest that your collections be not encumbered with mere curios, objects that derive all their interest from such facts as age, origin, ownership, cost or former use. A bit of stone may be of value in a museum; but not because it was picked up on Bull Run battlefield, or was once in the pocket of Abe Lincoln, or cost the owner a million dollars. Among the friends of the museum enterprise which I assume you are ser-

iously contemplating will be a few who will offer you curios of the kind just suggested. It may be wise to accept them in most cases; but not to pay for them with promises of their display or eternal preservation.

If your thoughts go so far as to the formation of a museum organization, let this wait until you have still further examined the field. Just as the teachers of the city are the persons most ready to exalt your position as librarian by a commendable use of your books; so are they the persons most inclined to approve of the idea of a local museum, with a quality of service like that

of the library, and to make good use of it.

At a meeting of teachers then, with the approval of the superintendent of schools, you may well present in rough outline a scheme for a museum. If you put first the fact that it will collect objects to lend to teachers as aids in school work—the objects to be examined and lent just as are the library's books and pictures—you may then well add that the museum shall be, so you hope, adapted as it grows to the needs and wishes of the whole community, including the arts, fine and applied, the sciences, trades and manufactures, commerce and society.

The Transportation Tax*

Fordney, Joseph W. Fordney is against all rail rate tax. Would repeal levies in the revenue revision bill now being prepared. *New York Herald*, July 31, 1921.
New York Herald. [Editorial]. Kill the transportation tax. *New York Herald*, Aug. 2, 1921, p. 6.
New York Herald. [Editorial]. A million a day clerk waste. *New York Herald*, Aug. 3, 1921, p. 6.
Amount collected by transportation tax offset by salaries of useless government clerks.
Railway Age. [Editorial]. The tax upon transportation. *Railway Age*, v. 70: 1428; June 24, 1921.
"Obviously if the railways are injuring business by charging rates that are too high, then the government is still farther injuring it by adding a tax to these rates."

- Transportation tax tender spot among railroad men. Admittedly high rates could be lowered somewhat without impairing source of revenue. *Wall Street Journal*, May 5, 1921, p. 2, col. 5.
- U. S. Congress. House. Committee on Ways and Means. Revenue revision. Hearings . . . [Dec. 13, 1920-Jan. 17, 1921]. Washington: Govt. Print. Off., 1921. 270 p. 8°.

- Transportation tax discussed by Thomas S. Adams, Tax Advisor to the Treasury Dept., p. 42.
U. S. Treasury Dept. Letter from the Secretary of the Treasury to the Chairman of the Committee on Ways and Means. April 30, 1921. [Washington, Govt. Print. Off., 1921]. 8 p. 4°.

- Repeal or reduction of the transportation tax: p. 4.
Williamson, William. Extension of remarks . . . in the House of Representatives, July 21, 1921. (*Congressional Record*, daily ed., v. 61: 4443-45; July 21, 1921).

- "The transportation tax should be abolished, as it has been clearly demonstrated that it is a burden that the traffic should not be called upon to bear. While it is not paid by the transportation companies, it has hung like a millstone about the neck of the transportation business and helped make rates prohibitive for many of the products of primary production."—p. 4444.

A. L. A. HANDBOOK AND PROCEEDINGS

More than one thousand new members have joined the A. L. A. since the beginning of this year, and new members continue to join in considerable numbers. Altho it may not be possible for new members to have their names inserted in this year's Handbook after the first of September, it is still possible for new members to join for 1921 and thus obtain the 1921 *Proceedings and Handbook*. Those who wish to join for 1921 and to receive the *Handbook and Proceedings* should send their names without delay with a remittance of \$3 to Secretary Carl H. Milam, 78 East Washington Street, Chicago, Ill.

An annotated subject bibliography on "Vocational Guidance" in the June number of the *St. Louis Public Library Bulletin* is the work of the class of 1921 of the *St. Louis Library School*.

Library Buying thru the "A.L.P."

THE following circular has been sent to libraries thru the American agency of the "Agence de Librairie et de Publications" in New York in accordance with the plan of the A. L. A. Committee on Book Buying.

"We submit to you the following plan of purchasing all books and publications thru the 'A. L. P.' (Agence de Librairie et de Publications), which has been endorsed by the Committee of Book Buying at the Swampscott meeting of the A. L. A., and which will appear in the regular report of the Committee:

"1—*Publications* will be charged at the publishers' prices reduced to dollars and cents at the rate of exchange prevailing at the time of invoicing, plus 10% (ten per cent) commission.

"2—*Out of Print Books Ordered From Catalogue* will be charged at the invoiced price of the dealer, plus shipping and packing expenses, reduced to dollars and cents at the rate of exchange prevailing at the date of invoicing plus 10% (ten per cent) commission.

"3—*Out of Print Books Necessitating Research Work* will be charged at the invoiced price of the dealer plus shipping and packing expenses, reduced to dollars and cents at the rate of exchange prevailing on the date of billing, plus 5% (five per cent) for research work, plus 10% (ten per cent) commission.

"4—*New Books* ordered and shipped directly from Europe or Latin America will be charged at the net price of the publisher (list price less discount), plus packing and shipping expenses, reduced to dollars and cents at the rate of exchange prevailing on the date of billing, plus 10% (ten per cent) commission.

"5—*New Books* purchased from the New York stock will be charged at the list price reduced to dollars and cents at the rate of exchange prevailing at the date of billing, less 10% (ten per cent) discount.

"Our proposition, as you will see, covers every point raised by the Committee of Book Buying, and can be resumed as follows:

1—Import books instead of paying a high profit to the jobbers.

2—Have your books shipped by mail or by parcel post which is the cheapest way to-day.

3—Do not pay more than 10% commission to your agent for his services.

"Furthermore, we shall add to this, that if you will turn over to us your orders you will save yourself the trouble of writing, explaining, and complaining to your agent abroad.

"Send Us Your Orders and We Will Do the Rest!"
"The 'A. L. P.'"

MAURICE SLOOG, *American Representative.*
New York, July 25, 1921.

Prices of English Books

To the Editor of the LIBRARY JOURNAL:

We have noted the controversy going on between the librarians and the booksellers regarding the American price of English publications. We do not think the librarians' stand is quite fair to the American book trade as the latter have been under very great expenses during the last few years owing to the enormous increase in cost, not only on book manu-

facturing but also on circulars, advertising, and such like publicity, which the librarians do not seem to figure into the cost at all. We do think, however, that all business in the United States should be placed with American firms and not put into the hands of cut-throat book agents in foreign countries. However, looking into the affair from a broad standpoint, we are re-figuring all our prices and trust that the librarians will see the justice in our claim that all American business should go to American firms who, by their advertising and publicity work, create the demand for foreign manufactured books. Without such advertising our librarians would know nothing about the books in question.

Lessons in the Use of Books and Libraries

A NEW edition of the *Lessons on the Use of the School Library*, first published by the Wisconsin Department of Public Instruction, has recently been issued by Rand-McNally.

Ole S. Rice, the author, is Supervisor of School Libraries of the State of Wisconsin. He has well said in the introduction that the lessons "should be given in those classes to which they are naturally allied because of their subject matter." The contents suggests, beside each chapter heading, the class in which the material may well be introduced. No mention is made of using science classes for any such instruction, and yet, for general science courses, in junior high schools and even in nature study still earlier, the dictionary, encyclopedia, year books, public documents, arrangement of books on the shelf and use of card catalog are all necessary aids to modern class room methods.

The cuts illustrating the making of a book and newspaper, the forms of catalog cards, shelf arrangement, and sample pages from reference books are a useful addition to the original text.

Author numbers are so little used in libraries now that the section on call numbers might have omitted mention of them.

There is still need for a handbook of this kind which will go a step further and give suggestive lesson plans wherein the use of reference material in working out projects in nature study, history, geography and literature will be shown as an integral part of the child's daily school activity.

Los Angeles' Library Campaign

By MONICA SHANNON,

Director of Publicity of the Los Angeles Public Library.

THE Los Angeles Public Library has never had a central library building. With the exception of early years in the City Hall, it has always been housed in rented quarters in the business district. It now occupies three floors of the Metropolitan Building, on one of the city's busiest corners.

Los Angeles is said to be one of the fastest growing cities in the United States, but during the last ten years the Public Library clientele increased twice as quickly as did the City, so that the carrying on of the work in crowded office quarters, reached only by elevators, became daily more difficult. The Library also faced a greatly increased rental at the expiration of its present advantageous lease in 1924. The Board of Directors appealed therefore to the City Council on April first for the inclusion of a library bond issue on the spring ballot.

The City Fathers, whether influenced or not by the old tradition of April first, put a \$2,500,000 bond issue for a library building and site on the June 7th ballot, together with a sewer bond proposition of \$12,250,000; viaduct bonds \$1,000,000; fire and police bonds \$1,250,000; water bonds \$2,500,000; and harbor bonds \$4,800,000. Then having done their duty, they sat back and smiled, and all the prophets foretold failure for the Library Bonds.

But immediately an outline of all possible points of attack was drawn up for the library campaign and committees appointed from the staff to make the attack at strategic points. The outline covered the following mediums of publicity: Newspapers, suburban, technical, religious, fraternal, school, as well as five city

dailies; business and technical societies and associations, department stores and factories, scientific and agricultural associations, trade unions and civic and fraternal associations, clubs, schools, churches and religious organizations, foreign colonies, motion pictures, theatre programs and menu cards, and advertising within the Library. Committees were also appointed to reach political candidates, provide speakers and arrange for distribution of the printed material, and a set of "Facts and Figures for Campaign Workers" kept each member of the staff posted.

The printed matter was the next consideration. It had to be prepared as quickly as possible because the election was only a few weeks ahead. A chart of the printed matter was made showing size, material and quantity required. Posters, placards, banners, stickers for automobiles, "dodgers" to be left at every home, a printed postal to be mailed by staff members and friends with a personal message, were decided upon. The poster design was donated by a commercial artist and the "dodgers" had a clever cartoon by Gale, the well-known cartoonist of the *Los Angeles Times*. The post card read as follows:

"Friend of the Library:

"Win Votes for Library Bonds June 7.

"The Public Library has been FIFTY YEARS WITHOUT A HOME. Los Angeles is the only large city in the United States which has never owned its own Central Library Building.

"RENT IS WASTE. During the last fifteen years the Public Library has paid \$265,000 for rent.

"Library Bonds will only cost 2c. on every \$100 worth of assessed valuation of property.

"Let us build a Library such as San Francisco has and take our place with progressive cities!

"VOTE YES Proposition No. 3, June 7.

The placards said:

"Los Angeles!

"YOU NEED A LIBRARY.

"VOTE YES Proposition No. 3, June 7.

"Own your own Public Library."

Large banners were swung from all of the branch libraries. Those on contented Carnegie branches had the slogan:

"Branch will not grow unless Main Trunk flourishes.

"Wake up! Vote for a Main Library Building June 7."

The slogan used for the other branches was:

"The Public Library for Everybody, Everybody for the Public Library Building."

"Vote Yes on Proposition 3, June 7."

A banner was also hung across the entrance of the Metropolitan Building.

"Vote Yes on Proposition 3, June 7."

And at the corner of the entrance the eyes of each passer-by read:

"Wake up, Los Angeles.

"Vote for a Library Building and take your place with progressive cities."

There were posters in the elevators and banners and posters in all parts of the Library. The bulletin boards contained pictures of fine library buildings in the United States, and an unobtrusive but active publicity was done over the charging desks by quiet remarks to patrons. All the magazines, newspapers and outgoing mail were stamped: "Friend of the Library. Win Votes for Library Bonds" and slips "Vote Yes on Proposition 3, Own your own Public Library" or "Save Money, Stop paying rent. Own you own Public Library. Vote Yes Proposition 3, June 7" went out with all books.

A large Los Angeles department store designed a special circular and enclosed it in their packages. The Library had copies made and induced the other stores to use it as an enclosure. Several of the leading stores and banks had window exhibits and the former also ran library publicity in their newspaper advertisements. A billboard company presented the Library with eleven hundred dollars worth of space and forty billboards were posted in prominent places.

The motion picture producers made a special film showing the crowded conditions in the Library, and this was run at all the principal down town theatres. Clubs and state societies were reached by letter and all the large clubs gave the Library a place on their programs, some appointed special committees to work with the Library and in their monthly bulletins printed earnest appeals to their members to support library bonds. Even the smallest eating houses on the East Side ran "Food for Thought. Vote Yes on Proposition 3, Own your own Central Library Building" on their menu cards; and big down town theatres printed slogans on every page of their programs. At an international exhibit planned by the Federation of Women's Clubs, different nationalities donated space on the programs asking their people in Greek or Spanish, as the case might be, to "Vote 'Yes' on Proposition 3, June 7." A Czech artist donated a remarkable and striking poster urging all people wherever born to vote for a library building. This poster was displayed in the window of a big furniture store on Broadway.

Talks were made at the Labor Temple, at a street dance and political rally, to laundry work-

ers during their noon hour, at community sings, before the Audubon Society, the Llewellyn Iron workers, the Musicians' Club and the Apartment House Association—in fact in every place into which it was found possible to squeeze a speaker.

Articles appeared in house organs, technical journals, church calendars and in foreign and negro newspapers. The work with the negroes was most effective. Early in the campaign a negro, on the editorial staff of one of the evening papers, addressed a signed letter to hundreds of prominent people of his race, using the editorial letterhead of his paper. The letter was multigraphed and the envelopes addressed by the Library.

The five big city dailies stood together on this one bond issue and gave effective space most generously, especially in view of the fact that a big political battle for the mayoralty was being waged at the same time. Editorials and persistent articles of direct publicity appeared in all the daily papers. One evening paper ran a large copy of the Library's poster, and a morning Sunday edition had a photographic sheet showing the crowded conditions in the main Library. The leading ministers of the city in Sunday sermons urged their congregation to vote for a library building, and these earnest appeals were printed on a half sheet of one of the morning papers.

Statements were secured from leading educators, clergymen, financiers and other men and women of affairs, giving their understanding of the meaning of the public library in the life of the city, and these letters, together with the endorsements of clubs and associations, were compiled into newspaper publicity.

Only the Library Bonds and the Harbor Bonds carried. The Library polled 63,852 favorable votes and the Harbor issue, which was backed by big business, 56,172. The victory was due to concentrated unflagging zeal on the part of Library Board, Librarian and Staff, and the generous interest of the people of Los Angeles.

"TRUMPETER SWAN" PRIZE CONTEST

The winners of the Penn Publishing Co. librarians' prize contest on the "Trumpeter Swan" are: First prize, Nellie M. Rowe, Greensboro (N. C.) Public Library; second prize, Mary A. Eastman, Kansas City (Mo.) Public Library; third, Mildred C. Graham, Atlantic City (N. J.) Public Library; fourth, Grace Blanchard, librarian of the Concord (N. H.) City Library; fifth, Katherine Reed, Lombard College Library, Galesburg (Ill.)

KEEP THE LIBRARIES OPEN FOR THE CHILDREN

Amendment 2 Will Do It

OUR CHILDREN ARE ENTITLED TO EVERY POSSIBLE OPPORTUNITY

Good books for children—

Broaden the knowledge
Quicken the imagination
Furnish recreation
Teach principles of right living
Inspire love for country

ALL THE CHILDREN SHOULD HAVE GOOD BOOKS
ALL THE TIME

Our Schools and Libraries make this possible

SAVE THE SCHOOLS AND LIBRARIES
VOTE YES ON AMENDMENTS 1 AND 2

Be sure to vote because not voting counts "No".

SCHOOL AND LIBRARY CAMPAIGN IN MINNEAPOLIS

An amendment to the city charter increasing the legal maximum tax for libraries and schools in Minneapolis was passed in June. A committee of citizens voluntarily undertook a publicity campaign in order that all voters might be informed, with the result that "not even the great state campaign last year for good roads was so well conducted and so thoroly carried thruout the city." Every child wrote a letter to his parents under the teacher's direction, every parent and teachers' organization was addressed, as were all the commercial clubs. Street meetings were held during the last week in many downtown points. At the centrally located campaign headquarters windows were filled with effective figures, pictures and displays. A real library station was kept running in one of the windows thruout the campaign. The vote in favor of the increased levy was overwhelming, and the possible tax maximum for the library was doubled. The library has asked for twenty-five per-cent budget increase for the present, which will provide an income of \$350,000 and which will permit of the re-establishment of extension work and the reorganization of the staff on a better salary schedule.

INFORMATION ON BOTANICAL COLLECTIONS IN THE UNITED STATES

To the Editor of the LIBRARY JOURNAL:

We would like to make a correction, or at least an amplification, of one point in Miss Mary G. Lacy's article: "The Library of the United States Department of Agriculture" (LIBRARY JOURNAL June 1, where she says (p. 494) that the botanical catalog of the Bureau of Plant Industry "makes available information as to all the main botanical collections in the country, notably those of the Gray Herbarium, the Arnold Arboretum, Lloyd Library, and others in addition to those of the Library of Congress, the U. S. Department of Agriculture, and the National Museum, the Smithsonian Institution, the Geological Survey, the Surgeon General's Office, and the private libraries of Dr. Edward Lee Greene and Captain John Donnell Smith." Altho present when the paper was read, we did not at that time realize the implications, with reference to the Gray Herbarium, Arnold Arboretum, and Lloyd Library, of this statement, which as it appears in print seems either to underestimate the importance of these libraries, or to imply considerable presumption on the part of the makers of our botanical catalog, neither of which, of course, was Miss Lacy's intention.

The fact is that the so-called "botanical catalog," actually the main catalog in the library of the Bureau of Plant Industry, is supplemented by many other lists and sources of information. Very full and excellent catalogs have been published by the Arnold Arboretum and the Massachusetts Horticultural Society, and these of course we have on file, together with those of the British Museum (Natural History) and other notable European botanical collections. The Bibliographical Contributions of the Lloyd Library of Cincinnati, also, cover a large portion of its botanical literature, but for many of the botanical libraries there are no printed catalogs, and no matter how much we desire a union card list of all botanical literature in America, it is at present an impossibility.

There is, however, great demand for old botanical works which are not in Washington, and in canvassing the country for these, as well as by some personal work in checking up desiderata in many different libraries, we have obtained an idea of the general scope of collections, as well as data on individual books. Thus we have entries in a separate catalog for rare books in the New York and Boston public libraries, the Missouri and New York botanical

gardens, the Gray Herbarium and the Greene collection at the University of Notre Dame, Indiana, and a few from many scattered sources. We have also the cards printed by the John Crerar for botanical works, as well as those of the "American libraries" printed by the Library of Congress. Thanks to these records and to the many and varied courtesies of the several botanical librarians and bibliographers of the country, we are able to furnish information on a large proportion of the needed and rare books which we do not have in the city of Washington. We would like to use this occasion to recognize, on behalf of the scientists of this bureau, and also visiting botanists who have used our facilities at various times, the generous co-operation of the botanical and other scientific libraries which have made their resources, in books and information, so freely available for the needs of botanical research.

MARJORIE F. WARNER

"READ ONLY APPROVED BOOKS"

To the Editor of the LIBRARY JOURNAL:

In a recent number of a library periodical is noted, *with approval*, the fact that the state law in Oregon has been amended so that the smaller public libraries are prohibited from buying or from making accessible to the public any books except as recommended in the booklists issued by the American Library Association, or any state library or school department.

This is the last straw! In many parts of this country of ours we may now wear only approved clothes, drink only approved beverages, witness only approved moving pictures, and if the new idea spreads, read only approved books, and think only approved thoughts! By the shades of Milton, Mill, and Jefferson, the "founding Fathers," and all other apostles of liberty, what has our country come to? Is this the America we once proudly called "the land of the free"?

X. X.

THE NEW LIBRARY AT LOUVAIN

A DISTINGUISHED company including the King and Queen of Belgium was present at the laying of the corner stone of the new University Library at Louvain by President Nicholas Murray Butler of Columbia University on July 28th.

Preceding the ceremony speeches were made in the great auditorium of the Collège du Pape by Cardinal Mercier, president of the adminis-

trative committee of the university, President Butler, chairman of the United States Committee for the Restoration of Louvain, Raymond Poincaré, president of the International Restoration Committee, Eusebie Allamandola, representing the Italo-Belgian League and the Italian National Committee for the Restoration of the Library, Henry Carton de Wiart, Belgian premier, and Professor-emeritus Helleputte of Louvain, and greetings were received from President Harding, from the University of Prague and from Whitney Warren, the architect.

A sketch of the new building was given in our August number.

WANTED: SLIDES AND FILMS ON LIBRARY WORK

To Librarians:

Please send to American Library Association Headquarters, 78 E. Washington Street, Chicago, a record of any moving picture films or lantern slides in your possession, or known to exist, on any phase of library work.

Requests come to Headquarters constantly for films and slides for use in municipal library, county library and library building campaigns, and for children's book week publicity. The latest request is from Czechoslovakia, where library laws are under revision, and there is a desire to profit by America's experience with county libraries. Another recent request was from a southern city in which plans are being made for celebrating a children's library and book publicity week.

The Los Angeles Public Library has recently contributed a copy of the film used during the bond issue campaign. If other libraries can make similar contributions of films or slides A. L. A. Headquarters will soon have a collection which will be of value to other libraries working in similar fields. But even if you cannot send the films or slides themselves, I hope you will send a report of what you have.

CARL H. MILAM, *Secretary A. L. A.*

FREE ON REQUEST

The Bureau of Railway Economics Library, Washington, D. C., will send any of the following odd volumes to any library with incomplete sets at the cost of carriage to the benefitting library:

- Nansen: *Farthest North*. Harper, 1897, v. 2.
- Bartley: *The Rhine*. Coates, 1899, v. 2.
- Edwards: *History of British Colonies in West Indies*. London, 1793, v. 2.
- Whitney: *History of Utah*. Salt Lake City, 1892, v. 1.

THE LIBRARY JOURNAL

TWICE-A-MONTH

SEPTEMBER 1, 1921

PERHAPS the most striking tribute ever paid by the people to the peoples' library is the referendum vote by which Los Angeles approved a bond issue of two and one-half millions for its library building, with 63,000 votes, while the pet project of harbor development received but 56,000 votes and other proposals for bond issues were rejected. This was partly the result of good campaigning by the library board, the staff and special friends of the library, with the slogan "Own Your Own Library" placarded all about the city, but the response showed that the Los Angeles library had won a strong place in public estimation without which the appeal would have fallen on stony ground. It is to be hoped that a suitable site may be found for the new building which will not only be in the heart of the city but such as will display the building to best advantage to the public view. For some years past the library has occupied the upper floors of an office building and its triumph at the polls is the more notable because of the disadvantage of making no visual appeal to the community. Minneapolis also has scored a triumph for the library, scarcely less notable, in a joint educational campaign with the schools which resulted in a popular vote authorizing the doubling of the maximum limit of taxation for school and library purposes.

★ ★ ★ ★ ★ ★ ★

ASERIOUS condition is brought to light thru the resignation of Charles R. Green as librarian of the Massachusetts Agricultural College for which, as for the whole agricultural field, he has done such splendid library work thru these thirteen years past. The difficulty is that the control and conduct of the institution have been taken out of the hands of the Board of Trustees and placed under charge of the new Department of Education and that a clerical assistant in the office of the Supervisor of Administration practically makes decisions as to the salaries of professors in the College. President Butterfield has appeared before the recently appointed special Commission on State Administration and Expenditures to protest against this change of control which is causing the most valuable instructors and officials to feel that their work will no longer be properly ap-

praised and is leading them to seek other fields of usefulness where there will be greater encouragement. Mr. Green himself finds a new field of large tho scarcely greater usefulness in the richly endowed public library provided for in Amherst, but it will be difficult for the Massachusetts "Aggie" to replace him with a librarian of equal enthusiasm, experience and effectiveness in the special field.

★ ★ ★ ★ ★ ★ ★

THE condition disclosed in Massachusetts by this episode is unfortunately symptomatic, and is particularly exemplified in New York City where the endeavor of the present municipal administration is to take the control of personnel and salaries out of the hands of the trustees of the three library systems and leave their determination to municipal officials less acquainted with the facts and less capable to deal with them. The report of the Committee on Library Legislation prepared for the Swampscott conference and printed in full in this issue shows that this plan of making library control subordinate to state or municipal departments is extending thruout the country. It is the result of an excellent plan to stem the confusion which comes from multifarious divisions of authority and responsibility in the political system, but sometimes the plan, however excellent in general, involves incidental disadvantages. In California the control of the State Library has been put under the Department of Finance, which is entirely illogical, tho the change is nominal rather than real, as its board of trustees has had little more than nominal authority. In other states state commissions have been merged with the state library, a plan which has worked well in New York, California and elsewhere, but which would be unworkable in several of the states, especially where political or personal pulls are still effective.

★ ★ ★ ★ ★ ★ ★

IT is gratifying that Mr. Yust, who did pioneer service years ago, in reporting on library legislation has again undertaken the responsibility of this work and his report is one of the most extended and valuable ever presented to the A. L. A. in this field. So many states held

biennial sessions this year and so much attention has been attracted to library development that no year has been so fruitful as 1921 in library legislation. This is partly perhaps the result of A. L. A. service in the war. Most of the legislation is progressive, but some is rather reactionary. The movements for county library systems and for certification have shown results in several states and it is especially gratifying to note that in some of the legislation at least care has been taken to avoid too much restriction on recruiting the profession from among capable outside people. On the other hand, there has been one extraordinary piece of restrictive legislation—that in Oregon where local

boards are prohibited from buying books except those approved in the *A. L. A. Booklist* or by other prescribed authorities. The purpose is good and the authorities are also good, but the method is bad. It thwarts the local responsibility which is essential to library growth, and incidentally it prevents the purchase of new books when the public wants them. The careful work done by the co-operation of librarians in the *A. L. A. Booklist* renders it impracticable to make entries until six or eight weeks after publication. This is a serious detriment in the case of libraries which desire to keep up to the times day by day or week by week.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION

TRUSTEES' SECTION

A MEETING of the Trustees Section was held on Friday evening, June 24th, Elizabeth Claypool Earl presiding.

J. Randolph Coolidge, Jr., of the Boston Athenæum spoke on "What Proportion of Total Expenditures Should Public Library Trustees Claim for Their Libraries?" His answer to this question was 1½ per cent. The proportion of library expenditures to total municipal levies was given for the following cities: Boston, 1.6 per cent; Salem, 1.55 per cent; Canton, 1.1 per cent; New Salem, just over ½ of 1 per cent; Brookline, 2 per cent. He said in conclusion: "We are citizens as well as trustees. We ought to know, and we do know, the population, the valuation of the section served by our libraries, how many books we have, and we know all too well how many books we want and cannot get. In Massachusetts we have a high standard of service, and we must insist that that standard of service be maintained by public appropriations unless the library is sufficiently endowed. It is not right—as I found in a New Hampshire city—to have a scale of payment for full time service in a library that is less than one-half what is paid a woman teacher in the high school in the same town. . . . So, if you will take the trouble to do some figuring on your own account in your own districts, you may reach the conclusion that the average expenditure in Massachusetts for library purposes, one and one-half per cent, is a minimum, at least, for your library, wherever it may be. The maximum in figures, in amount

and in appropriation, you should always be trying to obtain."

W. T. J. Lee of the Public Library Board of Toronto, Canada, speaking on the duties of a library trustee, urged that all trustees join the A. L. A. and that every board of trustees send a delegate to every annual conference. He spoke of the experience of the Toronto Library Board during the last several years in compelling the city council to make the tax levies necessary for the development of the Toronto Public Library.

"From the Outside In" was the title of the address of Clarence E. Bement of the Lansing, Michigan, Public Library Board. Mr. Bement emphasized the service of the library in providing education for those no longer in schools. . . . "The important element is the library patron, and he is sometimes lost sight of. . . . The statistics of circulation and attendance mean much to the librarian, but very little to the general public, yet the community contains both your stockholders and your customers. Your weapon in lieu of competition is propaganda. You have something to sell, and publicity will sell it. . . . Every library large enough to justify it should have an advertising department."

Henry W. Lamb of the Brookline Public Library Board compared the trustee's functions to those of a legislator, judge and diplomat. "The trustee is able to tell the librarian or the board how a project is likely to strike that part of the outside public that does not use the library and especially that part of it which has to be asked to make appropriations. He is like a diplomat who may be called upon to negotiate a treaty

but finds it his first duty to report on the state of feeling that he is likely to encounter." Mr. Lamb emphasized the need of having on every board some men who are men of affairs and of wide acquaintance in the community rather than only members of the scholarly professions.

Rev. Alexander Mann of the Boston Public Library Board said that a trustee should set an example to the library staff by his perfect confidence in the librarian. He should not go into petty matters or go behind the man who is in charge. The library must have the full confidence of the board.

George H. Tripp of the New Bedford Public Library said that neither the librarian nor the trustee should be a specialist in any line. The library should be kept out of politics and the librarian should be unhampered in administration. He suggested that a library board might be made up of one-third business men, one-third professional men, and one-third men of letters.

Officers for the coming year are: President, Frank Harvey Pettingill, Los Angeles, California; Secretary, Mrs. Ora Thompson Ross, Rensselaer, Indiana.

C. P. OVERFIELD, *Secretary pro tem.*

ST. LOUIS LOCAL OF THE A. L. A.

THE final meeting of the St. Louis Local for the year 1920-21 was held at the St. Louis Public Library on May 24th. The meeting, conducted by Margery Doud of the St. Louis Public Library, consisted of discussion of: Fiction in public libraries; Membership in local chapters of the A. L. A.; Method of voting in A. L. A. elections; Advisability of having more than one ticket in the field; Selection of places of holding the annual A. L. A. conferences.

The following resolution was unanimously adopted: Resolved, that this body go on record as opposed to that section of the proposed Constitution of the American Library Association whereby people may become members of the local chapters of the A. L. A. without joining the A. L. A. itself.

It was also resolved that this body go on record as requesting that the next meeting of the A. L. A. be held somewhere in the Middle West within twelve hours of St. Louis—"The City surrounded by the U. S."

The next meeting of the Local will be held in October. The committee to take charge of that meeting consists of: James A. McMillen, Washington University Library, and Elizabeth Summersby and Ruth Overman of the St. Louis Public Library.

The chapter has sixteen new members, the en-

tire membership of the class of 1921 of the St. Louis Public Library School.

JAMES A. McMILLEN, *Secretary.*

NEW ENGLAND HIGH SCHOOL LIBRARIANS

THE New England Association of School Libraries held its annual meeting at the High School Library, Waltham, Mass., May 21, 1921.

The theme of the morning session was "Introducing Boys and Girls to Books." This was discussed from three view points. Catherine S. Hazeltine of the Public High School, Hartford, Conn., told how the English Department, co-operating with the school librarian, allows the pupils to choose their required outside reading from a selected list of modern books. For instance, when the class was studying Macaulay's "Life of Johnson" each member read a recent biography and gave the rest of the class the value of his reading, often inspiring other members to read the book reviewed. The teacher was included in their number and also read something new which could be given to the class. The pupils were introduced to modern essays, poetry, and drama in the same way while studying the same style of literature. Elinor Whitney of the Book Shop for Boys and Girls, Boston, reviewed eight of the new books which could be recommended for young people. Elizabeth A. Dike of the Winsor School, Boston, told how their list of required summer reading was compiled through co-operation of teacher and pupil.

In the afternoon Dr. J. M. Brewer of Hartford University in an address on "What librarians can do to help in vocational guidance" urged his hearers to more intensive work in this field. The talk was made practical by detailing the steps to use when directing the young person. Names of books for boys and girls and for teachers to be used at each of these stages were given. In conclusion Dr. Brewer gave some practical suggestions: A faculty committee can aid in spreading library propaganda. A student library committee chosen by the pupils can spread library interest among their number, and arouse a spirit of pride in the library which may result in increased care of library property. Meetings arranged in order to examine books and pamphlets on vocations and to talk over problems with teacher and librarian produce results and the librarian with the teacher may plan debates on vocational subjects and secure speakers who are authorities in their occupations.

The program was concluded by Mrs. Louisa C. James' reading of Wilde's "Pawns."

Officers elected were: President: Mary H. Davis, Brookline, Mass.; vice-presidents: Mary E. Robbins, director of the School of Library

Science, Rhode Island College of Education; Clarissa Stowell, Meriden, Conn.; secretary-treasurer: Edith K. Coulman, Quincy, Mass.

EDITH K. COULMAN, *Secretary.*

NEW YORK LIBRARY ASSOCIATION

THE week of September 12 is "Library Week," to be held this year at Cornell University at Ithaca.

Prudence Risley Hall will house the delegates. Three dollars daily will cover board and lodging. If three hundred and fifty return certificates are secured a return fare of one and one-third the original fare will be allowed.

Certification of librarians will be discussed by the President, C. C. Williamson. Anna G. Hall will conduct a symposium on county libraries in New York State. To the session devoted to work with the foreign-born will contribute John Foster Carr, Henry Neuman, Zaidee Griffin, who will tell of how a public library and a Czecho-Slovak community worked together in building up a library department, and Blanche Yarka, whose subject will be the artistic contribution of the Czecho-Slovaks to American Life. Franklin F. Hopper will conduct a symposium on "Library Recruiting and Employment." Other speakers will be: Henry Seidel Canby, on aims in book reviewing; Dean Arthur R. Mann, who will outline the bases of agricultural progress upon which he is working; Mrs. Arthur W. Smith, who will tell of the ideals and programs of the Farm and Home Bureaus; Frank B. Gilbreath, George A. Works, Liberty Hyde Bailey and George Lincoln Burr.

Noon hour conferences in charge of specialists will be held.

The entertainment committee has planned boat and motor trips and hikes, and the staff of the New York Public Library will present William B. Gamble's new play "Eggs, a Library Play in Two Breaks."

THE PAST YEAR WITH THE NEW YORK LIBRARY CLUB

IT is safe to say that the metropolitan club of library people embraces in its membership the greatest variety of interests relating to the service of print existing anywhere. This is the natural consequence of the infinite diversity of activities assembling in a vast cosmopolis. The New York Library Club exists to bring these many interests of the book-in-action into a united interest of the workers together. In the months just past the Club has gone from strength to strength; its membership has greatly increased; its treasury has been fortified; its sessions have been "largely attended" to the point of crowding.

The season opened last fall with "In Bashu Boo," a play by William B. Gamble, presented by the New York Public Library Staff, as a gentle satire on formal librarianship. It was received with glee by an understanding audience.

The Thirty-fifth Anniversary Dinner in December was a historic event, signalized by the presence of a group of the few surviving founders of 1885.

Corinne Roosevelt Robinson in January, and Dorothy Canfield Fisher in March, thrilled their hearers with moving appeals, each in the line of her life's devotion.

The annual meeting in May met by invitation at the Grolier Club in its new Club House, the shrine of the Book's most sacred traditions.

The Club set its hand to a "serious undertaking" this year—the preparation of a Manual, the first since 1917, which should embody as its principal feature and reason for being, a Directory of New York's libraries, not attempted since 1902. The preparation has proceeded with diligence thru the year, and much of the copy is now ready for the printer. But the Club's ambition to produce in the Directory a most responsible document, by a thoro searching out of every collection of value (all the more difficult that there are so many and such different ones), made expedient the postponement of actual publication till the autumn.

The Club's Bulletin as a family newspaper is said to have found some readers.

The New York Special Libraries Association has had its own place in this city for the great number of specialists into which librarianship has differentiated itself in a complex environment. But the emphasis on the common cause, with the response to the professional call, has made the New York Library Club representative of every type of activity in which intensified librarianship has found expression. So much so that the president-elect was chosen as a prominent special librarian for both his specialty and his prominence. Thus the opening new year is entered into with assurance of that unity which is the guaranty of professional attainment.

EDWARD F. STEVENS,
President, 1920-1921.

1921 DISTRICT MEETINGS OF THE INDIANA LIBRARY ASSOCIATION

FIFTEEN district meetings were held in Indiana during the spring of 1921, the series proving to be one of the most interesting and profitable ever conducted in the State. In most of the communities arrangements had been made by the entertaining library to have a local church society serve luncheon (Dutch treat by

request), and the dainty and bountiful meals could not have been bettered.

The meetings were held as follows: Angola, April 28; Bedford, February 16; Bluffton, April 26; Evansville, February 3; Grandview, May 11; Hammond, March 17; Indianapolis, March 23; Lafayette, April 7; LaPorte, May 19; Louisville (Ky.), March 10; Noblesville, May 4; Terre Haute, April 6; and Warsaw, March 3. All were well attended both by librarians and by library trustees. The programs had been planned in every case to include a round table discussion by trustees and the arrangement proved both happy and profitable. At five of the meetings there were over twenty trustees present and the attendance of trustees never fell below eight.

The topics treated by the trustees were numerous and varied, tho the one that seemed to arouse most discussion was "How to make the district meeting more interesting to the library trustee." For the sake of program committees in other States the list of trustees topics is given here. "How to make a Board meeting interesting," "Preparing a budget of library activities as well as library finance," "Sunday opening," "The Board members' part in a library's success," "The community rest-room as a trustee's problem," "Business hints for trustees," "Why I am a trustee" and "Problems of the new library building." Only two or three of these topics were used at each meeting, and the leaders and "seconds" were arranged in advance with a knowledge of the strong trustees in each section of the State. The trustees proved to be as keenly interested as the librarians in queries drawn from "question boxes" and suggested solutions.

At several of the meetings, Harriet Root of the Public Library Commission presented an extremely helpful paper on "Books for children—standards of their selection." The discussions which grew out of this were both stimulating and profitable. An enjoyable and practical paper, "The library and the farmer," was presented at Noblesville (county library and book wagon location) by the county agricultural agent. Other topics handled at various meetings by librarians included "Apprentices in small libraries," "Decorations for special holidays," "Encouraging reading of standards," "Local history collections," "Library problems in industrial towns," "Keeping ahead of the small town job," "Supervising rural township stations," "Book wagon results and problems," "County library methods and forms," "Library instruction in schools," "Care of pamphlets and fugitive material," "Cataloging problems in small libraries," "Fitting the book to the

reader" and "Contemporary novelists."

WILLIAM J. HAMILTON.

SAN ANTONIO LIBRARY CLUB

THE annual meeting of the San Antonio Library Club of Southern California was held in Claremont on May 28, with Mrs. L. O. Robinson, the custodian of the Claremont branch of the Los Angeles County Library, presiding.

Helen E. Vogelsson of the Los Angeles County Library gave a most interesting talk on the ideals and accomplishments of the California county library system, dwelling particularly on the Los Angeles system with which she was most familiar. She spoke of its remarkable growth in the eight years since it was organized and of how much there was still to accomplish in making it possible to send out books to every one desiring them. Even in as progressive a county as Los Angeles this often means carrying books by pack mules over wretched roads. An interesting discussion of county methods especially in relation to work with the schools followed Miss Vogelsson's talk.

The following officers were elected: President: K. A. Monroe, Librarian of Ontario Public Library; Secretary, Mrs. Isabel N. Neales-Chaffey-Union Library.

MARION J. EWING, *Secretary*.

LIBRARY CALENDAR.

- Sept. 1-2. At the Denver Public Library.
Thirty-first annual meeting of the Colorado Library Association.
- Sept. 1-3. At Spokane, Wash.
Twelfth annual meeting of the Pacific Northwest Library Association.
- Sept. 12-17. At Cornell University, Ithaca.
Thirty-second annual meeting of the New York Library Association.
- Sept. 27-29. At Eagles Mere.
Twenty-first meeting of the Keystone State Library Association.
- Oct.—At Ames.
Annual meeting of the Iowa Library Association.
- Oct. 10-12. At Milwaukee.
Annual meeting of the Wisconsin Library Association.
- Oct. 11-13. At the University of Illinois, Urbana.
Annual meeting of the Illinois Library Association.
- Oct. 13-14. At Keene, N. H.
Meeting of the New Hampshire Library Association.
- Oct. 26-28. At Muncie.
Annual meeting of the Indiana Library Association.

IN THE LIBRARY WORLD

NEW HAMPSHIRE

In addition to an increase in the salary of the Secretary of the Library Commission, appropriations for the work of the Commission have been made as follows: Clerical expenses, \$500; traveling libraries, \$500; library institute, \$250; incidentals, \$750. The same amounts, plus \$100 for incidentals, are granted for the following year. The *Bulletin of the New Hampshire Public Libraries* appropriation is raised to \$350, an increase of \$100.

Durham. The second annual summer library school and institute conducted jointly by the New Hampshire College Library and the New Hampshire Library Commission was held at the College Library in Durham, from July 18th to July 29th, under the direction of Willard P. Lewis. As this was only the second year of the school and the course had been lengthened from one week to two weeks, it was still somewhat in the nature of an experiment. Nineteen enthusiastic students from seventeen libraries and four visitors attended. Of the students all are employed in New Hampshire public libraries, thirteen being librarians and the others assistants. Six had attended the first session last year. Again as in 1920 the Public Library Commission financed the school with an appropriation and the College Library furnished the equipment.

Frances Hobart taught cataloging, shelf-listing, subject-headings, binding and mending. Helen Cushing of the College Library staff taught the D. C. classification. Mrs. Mary E. S. Root of the Providence Public Library gave four lectures on children's work in addition to conducting a round table and a story hour. Caroline Garland of the Dover Public Library gave three talks on book selection and Ruth Dudley of the Manchester Public Library lectured on reference work, pamphlets and documents, emphasizing particularly those of interest to New Hampshire libraries. Grace Kingsland, secretary of the Commission, taught accessioning, loan work and community service, while Willard P. Lewis lectured on book-ordering.

NEW YORK

Freeport, L. I. Ground has been broken for a \$70,000 library in honor of world war heroes.

DELAWARE

Wilmington. The contract for the erection of the new public library has been awarded to the

Du Pont Engineering Company for the sum of \$386,666. It is announced that the work will be started as soon as building material and equipment can be obtained.

PENNSYLVANIA

Williamsport. By a vote of three to one, the electorate approved last November an annual library tax of not less than two-tenths of a mill. This action closed the six or seven years' fight on the part of the Library Trustees to secure assistance from the municipal authorities.

The Library was a gift under the will of James Vanduzee Brown. The building cost about \$145,000 and the endowment fund provided produced about \$8,500 a year. Every year since its opening it has been necessary to secure private contributions to keep the institution open. As expenses mounted during the war period, the book item was cut out and service reduced. City Councils repeatedly refused either to make an appropriation or to put the matter to the vote of the people. Thereupon a petition for a ballot on the question which made it obligatory under the law for Councils to order an election was prepared and the requisite number of signatures secured. The campaign, owing to the opposition of the city authorities, was probably the most elaborate ever waged for such a tax. The election being won, the deficit accumulating between the time of the election and the time when moneys will be received from the tax, has been assumed by the Trustees personally.

An experiment in the purchase and selection of technical books is announced by Librarian Thomson in a report covering the fourteen years of operation and the prospects for the immediate future: "Included in the 'Book, Binding and Magazine' appropriation is an item of \$450 for technical books and magazines which sum will be contributed by the different manufacturing firms of the city. . . . Each industry contributing to it will appoint an engineer or other representative and these representatives will form a council which, with the Librarian, will select all the books and magazines purchased out of the fund. Not only will the Library be enabled to help the mechanics, students and business men to an extent possible to few libraries in cities of this size, but thru the council it will be able to select for purchase, books chosen by practical experts in all lines of industry. . . ."

NORTH CAROLINA

During 1919-1920 the general loan collection of the North Carolina Library Commission was augmented by the gift of six thousand books from Library War Service, of which 2500 were divided among the public libraries of the state in inverse ratio to the number of volumes in each library. Special traveling libraries were prepared for the American Legion posts, and letters sent to all the Post Commanders extending to them the free use of these books either thru the traveling libraries or the public libraries of their towns.

The Commission, established in 1909, has an appropriation of \$8000 with which to serve the book needs of a rural population of two millions who have no access to the 51 public or 24 college libraries. During the biennium, 831 traveling libraries were sent to 628 places in 92 counties; 372 new stations were established; and some form of traveling library service was given to every county except Yadkin. The circulation for traveling and package libraries during the biennium is estimated at 175,000. Publicity work was continued thru the Home Demonstration Agents and women's clubs, and the North Carolina Press Association adopted a resolution pledging its support to the library movement.

The special session of the General Assembly held in 1920 passed a bill providing for adequate quarters for the Library Commission in the new building for the Agriculture Department. Mrs. Minnie Letherman Blanton, secretary of the Commission from its inception, resigned August 1, 1919, and was succeeded by Mary B. Palmer, for eight years librarian of the College Library of Charlotte and instructor in the Library School of the Carnegie Library of Atlanta, 1918-1919.

Only three new libraries were opened during the biennium, but a \$40,000 Carnegie building at Durham is slated for early opening. The county will pay one-third towards its maintenance and the city the remainder. The entire amount allowed by law, ten cents on the one hundred dollars and thirty cents on the poll, was voted by the people of Rockingham on May 6, 1919, with only twenty-five dissenting votes. The library has a lot, and will endeavor to secure a Carnegie building when building grants are resumed by the Carnegie Corporation. The Pack Memorial Public Library deeded to the city of Asheville by the Pack Memorial Library Association on the first of January, 1919, was leading the state with a circulation of 69,979 by the end of the year.

According to the *Library Bulletin* of the North Carolina Library Commission for March,

1921, there are thirty-eight free libraries in the state, including the three libraries for colored people, and four libraries free to members, five subscription libraries, and three subscription libraries free for reference. All but three of the free libraries were established within the present century, as were all but eight in the whole total of fifty-two libraries.

The Olivia Raney Library at Raleigh has the largest annual income, \$7,517, but has only 16,236 volumes as compared with the 18,439 volumes of the Greensboro Public Library, which with an income of \$6,412 stands sixth in that category.

The Carnegie Public Library of Winston-Salem is second with an income of \$7,081 and 11,854 volumes.

The Carnegie Library of Charlotte has 10,952 volumes and an income of \$7,003; the Durham Public Library, 7,707 volumes and funds amounting to \$6,928; and the Pack Memorial Library at Asheville an income of \$6,862 and a collection of 10,416 volumes. School and college libraries, including such institutions as the State Library, Peace Institute, and the Supreme Court listed for convenience under this heading, number thirty-one inclusive of the six colored institutions maintaining libraries.

The University of North Carolina, Louis R. Wilson, librarian, leads in number of volumes with 93,914, followed by Trinity College with 56,953 and the State Library with 49,107 volumes.

GEORGIA

The Georgia Library Commission finished its first year of active work on December 1st, 1920. The appropriation of \$6,000 made by the legislature of 1919 was available for use in January, when the secretary, Charlotte Templeton, began work with Helen Mathewson as assistant. The commission had been in existence since 1897 but was helpless from lack of funds, and such extension work as was done in the state was carried on by the Carnegie Library of Atlanta.

The earlier months of the year were spent in organizing the work of the office, ordering and preparing books for circulation and in collecting data on library conditions in the state, for which particular end the secretary also visited forty public libraries to gain first hand knowledge and establish relations between them and the Commission. Statistics gathered thru a double post card sent to all towns already on the commission's list and thru clippings from a clipping bureau indicated at the end of the year that there are in Georgia at least 66 libraries, including both free public libraries and the club and subscription libraries. Thirty are supported in whole or in part from public funds,

five of which also charge a fee for use. Twenty-three occupy Carnegie buildings. Seven counties contribute to the support of public library service, while one hundred and three have no public library of any sort within their borders. Of the 26 cities of Georgia of over 5,000 population fifteen support libraries wholly from city funds and three give partial support, leaving eight cities of over 5,000 which do not appropriate any money for library purposes. Savannah is the only city to maintain a negro public library in a separate building, and has a Carnegie building with a book collection of 4,000 volumes. A negro branch costing \$50,000 will soon be opened in Atlanta, and there are libraries in most of the negro colleges and books in some public schools.

The Commission cataloged and prepared for circulation 2,580 volumes, expending \$1,772 on the purchase of books, and \$2,720 in salaries. The A. L. A. Library War Service furnished seven thousand volumes, of which two thousand were added to the Commissions shelves for its parcel post reference work and the remainder sorted for distribution to the libraries of the state. Obligated to move with some caution and no advertisement for fear of being swamped with demands, which it would be unable to fill, the Commission in the last five months of the year made 42 loans consisting of 963 volumes. The complete supply of books for general reading has been sent out. The loan record of a package of twelve volumes sent to a teacher in Habersham County showed that they had been borrowed sixty-nine times in seven weeks.

MICHIGAN

Saginaw. Work on an \$83,000 extension to the Hoyt Library is proceeding. Furniture and other equipment will bring the cost of the extension up to about \$130,000.

IOWA

Kalamazoo. The appropriation for the Western State Normal School, made at the close of the last legislature, will permit of the building and equipment of a new library at a cost of \$300,000.

Iowa City. The second Annual Conference for Library Workers at the State University of Iowa was held on July 7-8. This Conference is arranged annually thru the co-operation of the Extension Division of the University and the Summer School for Library Training. In addition to the training class, which numbered thirty seven students, a goodly number of librarians from various parts of the state attended. The programs of these annual conferences are planned to contribute inspiration and to present

the aims and ideals of library work. Timely book talks by experts are also included. Prominent library workers of the country and members of the university faculty co-operated in making the recent Conference a most successful undertaking.

J. E. R.

NEBRASKA

The combined reported income by tax of the 116 libraries in Nebraska is \$210,726, Lincoln and Omaha furnishing \$78,261 of this amount. This leaves \$132,465 to provide library facilities for a population of 1,292,502. The total amount spent for the purchase of books during the biennium ending November 30, 1920 was \$40,839, and there are 133,129 volumes in the public libraries of the state. Thirty-five counties in the state are without libraries in their county seats. The past biennium has not been a favorable one for the establishment of libraries, and only Scottsbluff has a building under consideration, having been promised \$14,000 by the Carnegie Corporation before the period of restriction.

The Secretary of the Commission made 107 public library visits during the biennium and 47 to institutional libraries. Charlotte Templeton, who had been Secretary for thirteen years resigned in December 1919 to go to Georgia, and Nellie Williams was made Acting Secretary for a period of one year the succeeding May. The Commission served 86 counties with traveling libraries and sent books to 798 towns, loaning 7,597 more books and filling 895 more requests than during the previous two years. Instead of exhibits at the State Fair attention was centred on county and district fair advertising, and a letter inserted in the widely read *Nebraska Farmer* explaining the method of obtaining books from the Commission brought "prompt and overwhelming" returns from Nebraska and a few requests from adjoining states. Nebraska's quota of Library War Service books amounted to 3,162, part of which were added to the reserve collection and others distributed to American Legion posts and institutional and public libraries.

The most notable work with institutional libraries has been accomplished at the Ingleside Hospital for the Insane, where a room 30 by 50 feet open six hours a day furnishes library facilities to patients and employees. The Commission circulated in all 70,634 books to a possible patronage of 3,175 in the thirteen institutions where libraries are maintained.

The library of the Commission contained 21,309 volumes on November 30, 1920, and \$5,328 was spent for books, with \$1,061 for binding. The appropriation for 1919-1921 was \$23,000.

THE MAYFLOWER PRESS

6 Garrison Building, Pittsburgh, Pennsylvania

The following is quoted from a letter from

Calvin Coolidge

Vice-President of the United States:

"Boys and young men need the stimulus and guidance of literature that inspires their finer motives and portrays a true picture of the obligations of personal service.

"THE OPEN ROAD' is clean, animated, and of genuine inspiration for courageous living. It seeks to convey a sense of the nobility of honest effort and the joy of achievement without pedantry.

"Its tone and quality make it a welcome force in the educational life of our country. You are performing a real service to America when you prepare in such an interesting way, literature that helps to turn aside the dangerous desires of distorted minds and that provides such direct stimulus to real Americanism."

Very truly yours

(Signed) CALVIN COOLIDGE.

OKLAHOMA

Norman. The summer course in library service in the University of Oklahoma was attended by eighteen librarians. Mrs. J. R. Dale, secretary of the Oklahoma Library Commission secured appropriations to aid the university in financing this course and was instrumental in bringing the work to the attention of the librarians of the state. The teachers were Ruth Sankee, Helen U. Ginsberg, and Mrs. John Bass. This is the second summer course given by the University, and as both the demand for the work and the facilities for giving it are increasing, the continuance of the work is practically assured.

TEXAS

Dallas. The Dallas Public Library with 65,238 volumes and its branch, the Oak Park branch, with 7,000, circulated 254,299 volumes in 1920, an increase of 44,589 and an average increase per month of 3,700. The increase may be attributed to open shelves and a more liberal number of books issued each borrower. There are 36,669 live registrations from a population of 174,025, or less than twenty per cent. The privileges of the library are also open to county residents, who, however, do not take much advantage of their opportunity. \$9,060 was expended for 4,202 books, and \$16,245 for the salaries of the library staff and janitor force. Local taxation contributed \$27,300 to the total receipts of \$32,560.

The Dallas Advertising League and the Dallas Retail Merchants' Association have been kept supplied with classified lists of books and periodicals at the library of interest to their members.

UTAH

Salt Lake City. The year 1920 marked an increase in circulation for the Public Library of Salt Lake City of 46,000 volumes, the total recorded use being 723,755. A new branch, the John D. Spencer Branch (formerly the West-side) was completed and will be opened as soon as furnished. It was erected with library funds on a lot leased the Library Board by the Board of Education for ninety-nine years at a rental of one dollar. The Chapman Branch occupies a Carnegie building, the only one in the system. The Sprague Branch held the record for branch circulation, loaning 44,845 books. The Neighborhood House Branch is a small branch open three afternoons a week.

The report, fully illustrated, lays particular stress on the extension activities of the library. Hospital library service, modelled on that of the Sioux City Public Library, was inaugurated in the three city hospitals, where books are taken

once a week from ward to ward and room to room on trucks furnished by the hospitals, with a different librarian for each hospital. Deposits of books were made in the two telephone exchanges, the Charity Organization Society rooms, in Walker Bros.' Department Store, in St. Peter's Mission and in the Domestic Science Department of the West Side High School. The Children's Room carried on extension work thru the agency of playgrounds, the State Fair, Wasatch Domestic Science School, Uintah Training School and the public schools.

The library has 100,206 volumes and serves a population of 117,258. Receipts for the year were \$93,552, of which \$68,394 was derived from local taxation, and expenditures \$89,678, \$37,006 of this for salaries and \$19,627 for books, periodicals and binding.

CALIFORNIA

Pomona. This year the Annual Inspection of the Pomona Public Library took place in the form of a commercial luncheon. Those invited were the mayor and council, the clerk, assessor, and attorney, and representatives of the press. The Library was closed for two hours, so that all the staff were free to meet the Library Board and guests. A. T. Richardson of the Library Board spoke in happy fashion of the place occupied in community activity by the Library, making his points by quotations from the annual report. A. M. Dole, also of the Board, suggested that even tho the department heads were personally known to the guests, their work might not be. In witty jingles he introduced each, and each responded with a sentence or two about her work, or her plans for next year. As a pleasant surprise came the declaration by members of the Council that whatever might be done about other city departments, the full budget as submitted by the Library Board would be allowed.

Riverside. The Summer Session of the Riverside Library Service School closed on July 29th. The instructors were: Theresa Hitchler, Bessie Graham, Alice M. Butterfield, Joseph F. Daniels, Lillian L. Dickson, Mabel F. Faulkner.

CANADA

Montreal. The McGill summer course of Library service closed a successful session of five weeks on July 30th. The school was in charge of Harriet R. Peck of the Rensselaer Polytechnic Institute, Troy, N. Y.; Catherine M. Christopher, librarian of the Julia Richman High School, New York, gave instruction in cataloging and Mary S. Saxe of the Westmount (P. Q.) Public Library gave lectures on books and their classification and on "Meeting the Public."

**Your Library
Should Have These New
Business Books**

The following important new Ronald business books will be in demand by the business men among your readers this fall and winter. These five new volumes are thoroughly representative of the Ronald line.

ACCOUNTANTS' REPORTS

By WILLIAM H. BELL, M.C.S., C.P.A., member of the firm of Haskins and Sells, New York.

Shows the value of uniformity in the form, arrangement and contents of Accountants' statements. The 50 forms in facsimile will be of value to every executive and accountant. Just published, flexible leather, 250 pages (8½" x 11") \$6.00.

ACCOUNTING THEORY AND PRACTICE, Vol. III.

By ROY E. KESTER, Ph.D., C.P.A., Associate Professor of Accounting, School of Business, Columbia University.

Volume I and II of this 3-volume work form a graded course in accounting principles. Volume III applies to sixteen specific industries the principles laid down in the first two volumes. Volumes sold separately. 3 Volumes, cloth (Vol. I, published 1917 [3rd printing, 1921], 607 pages, \$3.00) (Vol. II, published 1918 [7th printing, 1920], 796 pages, \$4.00) (Vol. III, ready Sept. 25th, 600 pages, \$5.00).

MATHEMATICS OF ACCOUNTING AND FINANCE

By H. A. FINNEY, Ph.B., C.P.A., Professor of Accounting, Northwestern University and SEYMOUR WALTON, A.B., C.P.A., formerly Dean of the Walton School of Commerce.

An unusually fine and clear explanation of all the mathematics required in accounting and financial work. Just published, cloth, 285 pages, \$4.00.

WILLS, ESTATES AND TRUSTS

By THOMAS CONYNGTON of the New York Bar.

A complete non-technical discussion of all the complex problems that come up in the handling of estates in trust. Ready Oct. 1, two volumes, cloth, 800 pages, \$8.00.

GETTING THE RIGHT JOB

By N. G. SHIDDLE.

Valuable tips to the young man who is looking for a position. Ready Sept. 30, cloth, about 200 pages, \$2.00. Get them for 30 days examination, library discount applicable.

BACKUS, Joyce, 1920 S., assistant librarian of the Washington State Normal School at Ellensburg, resigned to become head of the Circulation Department of the State College Library, Pullman.

BLANCHARD, Maria G., 1914 C. P., librarian of the Homewood Branch of the Pittsburgh public library is on leave of absence to act as reference librarian of the University of Notre Dame Library, Notre Dame, Indiana.

BISHOP, William W., librarian of the University of Michigan, has been appointed official delegate of the A. L. A. to the Annual Conference of the Library Association, to be held in Manchester, England, during the week of September 12th.

COTTER, Arthur, journalist, educator and author, appointed for the purpose of building up a library, educational and research department of the California Bank, Los Angeles.

GALBREATH, Mrs. E. McN., librarian of the University of Denver resigned July 1st and is succeeded by Linda M. Clatworthy.

JEFFERS, LeRoy, of the Circulation Department of the New York Public Library, has been made Chevalier of the Order of St. Charles by the Prince of Monaco in recognition of his work for mountaineering. Mr. Jeffers is Secretary of the Bureau of Associated Mountaineering Clubs of North America and Librarian of the American Alpine Club.

KUDALKAR, Janardan S., curator of libraries in the State of Baroda, died a few weeks ago. Mr. Kudalkar was principal assistant to William

Allenson Borden during his time as director of the Baroda Library Department, and, on the return of Mr. Borden to this country in 1913, was appointed director of the Department, the Central Library of which now possesses a stock of some 80,000 books and manuscripts, and circulates about 75,000 books a year in the city of Baroda alone. He was also editor of the Gaekwar's Oriental Series, established to give to the world rare and important manuscripts in Sanskrit, Prakrit, old Gujarati, etc., hitherto unpublished, and of the *Library Miscellany*, a journal in English, Marathi and Gujarati for the spread of the library movement in India. He was president of the All-India Library Conference held in Madras in 1919, and in the same year, on the occasion of the Viceroy's visit to Baroda, wrote an illustrated historical work on the Baroda library movement.

NELSON, Ina F., 1904 D., head cataloger of the Riverside (Calif.) Public Library and instructor in the Library Service School, appointed cataloger at Miami University, Oxford, O., and is succeeded by Alice M. Butterfield, 1913 R.

NOLL, Amy W., for the past two years Librarian of the County High School of Missoula, Montana, appointed to the staff of the James J. Hill Reference Library, St. Paul, Minn.

POWER, Ralph L., since 1914 librarian of the Boston University College of Business Administration, has joined the faculty of the University of Southern California.

VAIL, Charles Delamater, librarian of Hobart College died July 25, aged 84.

Additional appointments of members of the N. Y. P. L. School class of 1921 are: May Conklin, to be assistant in the N. Y. P. L., and Lily B. Voegelein, to be assistant librarian at the Moorehead State Teachers' College at Moorehead, Minn.

Among appointments of the members of the 1921 class of the Riverside Library Service School are: Bertha Hole, acting librarian of the Whittier (Calif.) Public Library, during the year's leave of absence of Miss Harris; Cleo Robbins, assistant in the Whittier (Calif.) Public Library; Mabel E. Davis, formerly teacher at the Fillmore (Calif.) High School, librarian of the Santa Barbara High School; Ruth Lewis, assistant in the Lewiston, (Mont.) Public Library; Mildred Howard, assistant in the Fresno (Calif.) Public Library.

Folk Songs of Many Peoples

compiled by Florence Hudson Botsford

The songs of the European folks are the great expression of the joys and sorrows, the hates and fears, the romance of the people who sing them. During her frequent visits abroad, Florence Hudson Botsford has been gathering these songs. Her book contains the music jotted down often on odd scraps of paper at some village festival; the words in the original tongue and translations of these words into English poetry by such artists as Edna St. Vincent Millay, Jacob Robbins, Margaret Widdemer, Edgar Lee Masters.

Unique is the value of this book in forming strong ties with the fathers and mothers of coming Americans, by teaching them English, and by showing our appreciation of the beauty they are bringing to America.

Vol. I. JUST OUT. Introductory price \$2.75
Contains 145 songs of the Balkan, Baltic and Slavic peoples.

Vol II. Price to be announced
Represents the folk songs of twenty peoples, including those of the peoples of the Near and Far East, of the Latin Nations, of Germany, Great Britain, India and the Americas.

CURRENT LIBRARY LITERATURE

A new edition of "Facts for the Public" has been issued by the New York Public Library.

"How to Teach Agriculture: A Book of Method" by Ashley V. Storm and Kary C. Davis, Lippincott, 1921, contains a chapter on How to Organize an Agricultural Library.

"The School Use of Cleveland's Public Library" is an 8-page illustrated pamphlet published by the Cleveland Board of Education as No. 15 in a series on "The Work and Interests of the Cleveland Public Schools."

Part 3 (R.-Z.) of the "Index to United States Documents Relating to Foreign Affairs, 1828-1861" by Adelaide R. Hasse completes this Index the first part of which was published in 1914 and the second in 1919.

Architecture for July is a Detroit Public Library number in which the leading article is by Librarian Adam Strohm entitled The Detroit Public Library—A Municipal Temple of all Faiths. William B. Stratton writes on The Architecture of the Library, and there are 35 illustrations.

A revised edition of the handbook of the Russell Sage Foundation Library, by Frederick W. Jenkins, librarian, has been issued. The contents are: History and organization, scope of collection, building and equipment, methods and results, and other collections in New York City of interest to social workers.

The subjects for the bibliographies prepared by the Western Reserve Library School class of 1921 were as follows: 1. Selected list on Japan; 2. Selected list on Russia up to the outbreak of the World War; 3. Selected list on Mexico; 4. Revolutionary Russia; 5. The economic condition of Japan considered as a basis for its present position in international affairs.

The May number of *New York Libraries* contains a topics and outlines for library institutes, 1921, prepared by the Institute Committee of the New York Library Association, Asa Wynkoop, chairman. This list of topics has been issued as a separate.

After War Reading Courses, 11-16, recently issued by the U. S. Bureau of Education, in cooperation with the A. L. A., are: "France and Her History," "Heroes of American Democracy," "Steamship Navigation and Marine Engineering," "Iron and Steel," "Shipbuilding" and "Machine Shop Work."

"Index to Material on Picture Study," by

Mary Josephine Booth, (Boston, Faxon, 1921, 92p.) "is designed to help in locating information about material on pictures frequently studied in schools." Since pictures are entered under different names in different books, cross references are freely made from different titles to the main entry.

A new edition of the "Catalogue of Books in the Children's Department of the Carnegie of Pittsburgh" is ready. The first edition was published in 1909. This edition, revised to 1919, contains about 3300 titles, including some out-of-print titles, of which the Library has several copies, and others likely to be reprinted. Volume 1 is an author list; volume 2, the subject index.

"The Book Shelf" is the title of the quarterly of the Lynn (Mass.) Public Library. Volume 1, Number 1, dated April, gives a brief library directory, library rules and a list of books added to the library during three months. The cover and alternate pages of this 28-page list as well as a part of the text pages, are filled with advertising.

A second edition of the Directory of Special Libraries, in Boston and Vicinity, compiled by the Special Libraries Association of Boston, was printed by the City of Boston for the Swampscott meeting, in compliment to the A. L. A. This list includes for the most part only those libraries willing to extend to other librarians the privilege of consulting the library.

Part G—Fine Arts and Archaeology and Part H—Music of the "Subject Index to Periodicals, 1917-19" issued by the Library Association (London, the Association, Stapley House, Bloomsburg Square, W. C. 1) are ready. Part G contains 3857 entries from 315 periodicals out of a total of 600 examined, and Part H, 1490 entries from 315 periodicals out of a total of 600 examined. Annual publication of the class lists will be resumed in 1921.

Beginning with the October issue the *A. L. A. Booklist* will contain each month a short list of books selected especially for the high school library. As already reported in the *LIBRARY JOURNAL* the Library Department of the N. E. A. and the National Council of Teachers of English, in joint session at Des Moines on July 7, endorsed the *Booklist* and "recommended its use as an aid in book selection, for use on reading tables in all high schools and in courses of English as a basis of current book evaluation."

**THE MEADOW FOLKS
STORY HOUR**

NEW AND SECOND-HAND BOOKSELLERS

96 Mount Street,

London W1, England

"Pacific Northwest Americana," a checklist relating to the history of the Pacific Northwest, compiled by Charles W. Smith, associate librarian of the University of Washington Library, is published by the H. W. Wilson Co. This list is based upon a similar checklist published by the Washington State Library in 1909. The new catalog contains some 4500 items, many of which are annotated, symbols are added to show in which of the fifteen co-operating libraries the item is to be found. These libraries are the public libraries of Boise, Idaho; Portland, Ore.; Seattle; Spokane; Tacoma and Walla Walla; the libraries of the Universities of British Columbia, Montana, Oregon and Washington; the Whitman College Library; the state libraries of Washington and Oregon; the Provincial Library of British Columbia and the Library of the Oregon Historical Society.

Recent A. L. A. publications are:

Plays for Children. An annotated index. Rev. ed. by Alice I. Hazeltine, supervisor of children's work, St. Louis Public Library. A useful reference tool for the school and the public library. 116 pages, cloth \$1.50.

Viewpoints in Biography. By Katherine Tappert. (Second title in the Viewpoint Series). Groups biographies according to the essential interest. Aims to create demand for good biographies in any college, public or school

library. Useful as a buying list and for circulation. 60 c.

McCutcheon Cartoon Poster. By John T. McCutcheon, cartoonist for the *Chicago Tribune*. Reproduced elsewhere in this issue. For use in shops, clubs, schools, store windows, libraries and elsewhere. Size, 13½ x 20½ inches. Price: 5, 50c.; 10, 90c.; 15, \$1.20; 25, \$1.75; 50, \$3.00; 100, \$5.00; 500, \$20.00; 1000, \$35.00.

Book Wagons, The County Library with Rural Book Delivery. Eight page pamphlet with six pictures, illustrating book wagons in counties, townships and cities. For distribution to the general public. Single copy, 15c; 10 copies, \$1.00; 30, \$2.50; 100, \$7.00. Special prices on larger quantities.

The Catalog. By Harriet E. Howe, assistant professor of library science, Simmons College. (A. L. A. Manual, Chapter 19). Covers form, preparation, subject headings, equipment and use of the library catalog, with paragraphs on the ideal cataloger, and the organization of the catalog department. Selected bibliography. Single copy, 20 cents; 25 or more, 8 cents each.

Workshops for Assembling Business Facts. By Dorsey W. Hyde, jr., president of the Special Libraries Association. Tells the why and how of special libraries in business. Written for the business man. Attractively printed. 24 pages, 20 cents. Special prices in quantities.

Made in all sizes and styles of binding

WM. G. JOHNSTON & Co., Pittsburgh, Pa.

DEAR SIR:—

We have been using several of your Keyless Lock Binders for several months and find them perfectly satisfactory. We have had no more trouble with the "Magazine Thief" and the old numbers look as good as "the new" when taken from the binders.

They improve the looks of the reading table, keep the magazine in better condition and are so reasonable in price that EVERY Association can afford them.

Yours sincerely, General Secretary.

Orders for this should reach A. L. A. Headquarters before October 1st

THE UNITED STATES

A short reading list of popular books on American history, government, ideals and literature; descriptions of the country and special regions; American resources, opportunities and occupations; lives of some interesting Americans; some fifty titles of historic and characteristic fiction.

Prepared by the Buffalo Public Library in response to a request for a list of books which would "aid in developing understanding and the spirit of devotion and loyalty to this country."

This list will be reprinted by the A. L. A. for general distribution if a sufficient number of advance orders are received before October 1st to cover the cost of printing. It will be a 20 page pamphlet about 5½ x 7½ inches in size.

NEW YORK

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

The Objects of Cataloging*

BY ARCHIBALD CARY COOLIDGE

Director of Harvard University Library

LET me preface my remarks by admitting that the following observations are not based on principles of theoretical perfection, that is to say on unlimited funds. Nor are they altogether applicable to highly specialized collections like those of the John Carter Brown Library or the library of Mr. Henry E. Huntington, where we naturally expect cataloging to be more analytical and more minutely descriptive than when it has to cover a greater number of subjects. I am looking at the question from the standpoint of a large general library whose books deal with an infinite number of topics and are in many languages, and which has to regard its catalog, not as a work of art, but as the best makeshift it can provide with the resources at its disposal. The fact that we do not think certain things worth our doing does not prevent us from being glad to have others do them for us on L. C. cards or elsewhere. Each library has to face for itself the question of how, given its own conditions and budget, it can catalog the books in its possession in such a way as to make them most useful to its public. Amidst the continual application of numerous rules, torn between our desire for the utmost service and the urgent need of economy, it is sometimes well to get back to first principles and to ask oneself what the object of it all is. Who are the public we are trying to serve and what do they really need from the catalog?

A class to be considered apart is the library staff itself, even when that staff consists of but one. The ordering department needs all sorts of bibliographical knowledge and means of controlling information, especially in dealing with rarities. The date, the printer, the number of pages, the exact wording of a complicated title may be of much importance to it and the results of a mistake may be serious.

The reference librarian naturally desires as many aids as possible. The more analytical and subject cards and added entries of all kinds that he can turn to, the easier it is for him to answer the countless miscellaneous questions with which he is assailed. As for the cataloging department, it is moved by the laudable desire to do its work as well and thoroly as possible and to avoid some of the reproaches which will be showered upon it by every even imaginary person who cannot find just what he is looking for in the shortest possible time. All this is as it should be, but whoever is responsible for the budget of the library, has to remember that the wishes of the staff represent a counsel of perfection and cannot be given exclusive consideration.

Most people come to a library either to get a particular book or to look up some topic. Those who are hunting for a particular book are comparatively easy to deal with, provided they have got the author and title straight. When they have not, as all too often happens, they need to be helped out. For their purposes a good bibliography, if it exists, may be better than the subject catalogs, but they will probably have to be told about it and perhaps assisted in their consultation of it. This class of people should be kept in mind by the cataloger, for they force themselves on the reference librarian and they are by no means confined to the ignorant or careless. Many works will be remembered only by the title with an approximation to the name of the author, hence the utility of title cards. Good cross references are always desirable, and popular as well as official titles should be recognized. For instance, someone comes in to seek a certain number of an English Blue Book. He neither knows nor greatly cares, except at the moment, what the exact wording of the official title of a Blue Book is, so he naturally turns to the popular name. He should find under that name a card

* Read at the meeting of the Catalog Section of the A. L. A., June 21, 1921.

that will guide him in his further researches. Likewise it should be made easy for him to find a publication of some learned society or other serial publication even if he does not know just exactly what it is called.

The people who wish to look up a subject present a much more difficult problem. The task of meeting their requirements is complicated enough at its best and we should ever be alert to simplify it when possible. There are certain limitations which should be recognized from the start. One of them is that in many cases the best library catalogs can be only a very imperfect bibliographical instrument. It will often represent merely a collection of monographs on subjects which have been treated better in other than monographic form. For instance, Mr. James Ford Rhodes's *History of the United States*, if we chose to analyze it, could doubtless furnish fifty good subject headings of material as useful as some of the listed special works dealing with the same topics; a similar statement could be made about various important works of general science, yet we cannot afford to analyze their component parts to more than a very slight degree any more than we can those of a cyclopedia or a biographical dictionary. We are frequently unable to bring out even by title all the works in the nature of monographs that we receive. We can only refer people to a few bibliographical tools like the *Reader's Guide* or the *Cumulative Book Index*, but for us to catalog fully all the articles contained in the many hundred, not to say thousand, volumes of serials, reports of learned societies, *Festschriften* and other composite works that are received annually by a large library is out of the question. This should not discourage us from trying to have as good a catalog as we can, but we must entertain no illusions about it. Reflection also suggests that if we cannot attain completeness in a catalog, there is one less reason for taking full note of all the rubbish in our stock.

Cataloging—and I am using the term in its broadest sense to include classifying and other ancillary processes—is the way of conveying to the public as well as circumstances permit, the knowledge of the resources of the library. It cannot be exhaustive any more than a handbook of a science tells all that is to be learned of that science, and the attempt to make it so is one of the commonest of the pitfalls that beset its path. Like much other valuable work, it implies a process of selection and one of the most important qualities demanded is sound common sense. Similarly the power of quick decision and of distinguishing the important from the unimportant count for more in the long run than technical training and they are

harder to acquire. There is a call for comprehension and even for imagination. While the fundamental object, that of making knowledge accessible, will always be the same, the extent and the way this shall be done will vary greatly. For instance, in a library whose shelves are freely open to the public, the classification may be the matter of prime importance. The books on each great topic may be carefully arranged according to the system that suits that topic best and in a manner quite different from those dealing with other topics. In such cases the working out of the classification, the adhering to it, the making of modifications when they are desirable, and the best treatment of books—there will always be plenty that refuse to fit in quite with any system—all these things may count for much more than the subject headings on the cards. Also the proper relation of the subject cards in the catalog to the arrangement of the books on the shelves and the extent to which the one can supplement or enable us to dispense with the other will offer puzzling problems. It is obvious, too, that certain things worth doing in a small library would not be wise in a larger one and vice versa. A small library may well find it profitable to keep a separate list of all its French fiction, a large library will not.

Even the same book should not necessarily be cataloged from the same point of view in different libraries. Its aspects will vary in importance according to the library that possesses it, particularly if that library is a specialized one. A fifteenth century volume on general science will be of interest for certain things to a botanical library, for others to a zoölogical one, for others to a medical one and still for others to a collection of early imprints. There is no reason why they should all catalog it in a uniform way. Not that I scorn uniformity. I am grateful to have L. C. cards do so much work for us; indeed I do not see how we could get on without them. But, after all, we still have to decide more than two-thirds of our cases for ourselves and a large general library, if highly classified, is at the same time a collection of special ones which we may wish to treat in various ways. We cannot solve our problems by mere mechanical devices or fixed rules, but must use our heads, which is a reason why the job is interesting.

There is one truth which may be painful to our pride but which we shall do well to accept without wincing. The subject cards of the catalog are for the general public and will seldom be of much service to the specialist save for casual convenience. He will get his knowledge of the bibliography of his specialty from his general reading and from following his scien-

tific periodicals. The idea that a library catalog can add much to his information is apt to strike him as ridiculous. To be sure it may be useful to him in showing him what are some of the resources of the library or to set him on the track of good books not in his field, but there he is merely one of the general public. Let me add that I have come to this conclusion after many years of experience, both of teaching and of directing the work of students and of pursuing my own studies as well as taking part in the administration of a large university library. I am convinced that the great majority of my colleagues in the faculty regard the subject portion of the catalog as little more than a means and often not the best means for the undergraduate, to find material for writing theses, and certainly not as of particular value to themselves. They know and it is their business to know and keep up with the bibliographical aids in their own field and the same is true of visiting scholars. What they wish to find out is not what books exist that deal with a given topic but only what ones of whose existence they have already heard are to be found in a given library.

I shall not enter here into the disputed question of how much the existence of an increasing number of bibliographies diminishes the necessity for full cataloging. It almost seems as if some day cataloging would consist largely of references to bibliographies, most of them more or less out of date. But we have not got to that yet.

Of course it is much easier to agree in theory to the necessity of differentiation in cataloging than it is to formulate wise and workable rules to apply in specific cases. All I can try to do here is to make a few scattered suggestions. To begin with a point which has not attracted the attention it deserves, I believe that in practice every library with books in many languages makes some distinction in the thoroughness of the way it catalogs them. But libraries and catalogers are quite loath to admit in theory that the medium thru which knowledge is conveyed affects the intrinsic value of that knowledge or its claim to recognition. Yet it stands to reason that for public utility a general library in an English-speaking country should as a rule catalog most fully its works in English. We can also see that its works in French, German, Spanish and Italian will be more needed, except for special reasons, than let us say those in Swedish or Portuguese or Polish, and that these last will be more worthy of full cataloging than ones in Armenian or Chinese. Be it remembered, too, that even for most of the European languages the work of preparing the

library cards will be done by catalogers who have a very slight knowledge, if any, of those languages. It is a painful fact that taking central Europe alone, from the North Cape to the Straits, there are today seventeen (if not more) independent states, no two speaking the same language and each one fiercely jealous of its linguistic rights, and with a mania for publication. Doubtless too the Library of Congress will, according to habit, insist that the same first name of their respective authors shall be written in seventeen different ways. But looking up in a dictionary each word of a title and guessing at case endings is a time-consuming and expensive process. Seriously speaking, why should most libraries expend much labor over books in out-of-the-way tongues. What value for an average catalog has an accidentally acquired Bohemian arithmetic or an Arabic poem or a New Testament in Hawaiian? If the library is unable or has not the courage to give them away, it should at least waste little effort in decking them out with full cataloging. Why not face the question frankly and make rules, tho I admit it is not easy, such as that for many languages only an author, or an author and a title card, should be prepared. Sometimes the nature of the subject treated might be taken into consideration. For instance, there would seem to be more reason for cataloging fully a Spanish work dealing with the history of Argentina than one dealing with the history of aeroplanes. The author would be more likely to have special competence in his subject and the would-be reader would be more likely to know Spanish. It is also not infrequently worth while to pay more attention to translations than to works in the original language. For students of literature, we may wish to bring out on the shelves and in the catalogs such groups as translations of Persian poetry or of Chinese fiction. People who can read the originals are not likely to get at them thru most of our catalogs.

The same sort of reasoning as to the greater or lesser probable utility of a work to the public and the consequent desirability of full cataloging may be applied in other ways. The date at which a book has been written often greatly affects its value. This is particularly true of scientific works which are apt quickly to become obsolete. Why should we catalog fully a text book on physics written a generation ago and of scant interest save to some student of the history of pedagogy, who will very possibly be able to get at it in the stack? Why should we do anything but short cataloging for scientific works more than fifty years old, or for those in any but the most important European

languages? Also, are we not guilty of much unnecessary duplication? Cross references should not be overdone but when wisely used they save many cards. There is no reason why all the books on relations or treaties between England and France should be placed under both countries, any more than that lives of George III should be placed both under his name and also under his reign in English history. There are many suggestions that might be made following the same line of thought. All would admit that if a library has one hundred and fifty editions of a work it need not make out full subject cards for all of them. On the other hand it has a right to favor certain specialties which it is known to possess and for which people are likely to consult it. It should never be afraid of charges of inconsistency when it is acting from sound reasons.

The necessity of restrictions indeed affects only the negative side of cataloging. On the positive there are plenty of precepts to keep in our minds and ways in which we can be helpful. Here I can only touch upon one or two matters which will doubtless be familiar to many of you and which there is not time to discuss in detail.

I believe that however complicated a great catalog fundamentally is and must be, one of its objects should be to present an outward appearance of simplicity. It can hardly hope to attract the public but it should repel as little as possible. The terms used should be simple and as free as may be from library jargon. We must keep in mind how easy it is to create terminology with which we quickly get so familiar that it seems commonplace, but which looks meaningless or absurd to those not in the profession. I suppose, for instance, we must stick to "Horatius" and "Homerus" instead of Horace and Homer, but I hate them. I must confess too that after many years, I am still enough of an outsider to feel that some of the things typed at the tops of certain cards are a rigmorole not worth the trouble of deciphering and when I see proper names struck off a Library of Congress card, my natural reaction is to suppose that this is to correct an error, not to facilitate cataloging, etc. I believe, too, that there should be plenty of good guide cards, that when the number of cards under one subject gets more than a few inches thick, it is time to be thinking of subdivision, for this is an impatient age. It is wise, also, for a catalog to avoid irritating people or appearing ridiculous.

These last two points need a word of explanation. The average person using a catalog will, I think, submit with some patience, unless

it happens too often, to finding instead of what he is looking for only a reference to somewhere else. But he is apt to feel it would have been as easy to give him what he wanted as to send him further, and if the second place, after perhaps giving partial satisfaction, directs him to a third, and so on, he loses his temper. A catalog can indeed be an irritating thing and those that use it are often short tempered, with or without reason.

It can also make itself ridiculous. For instance, when in a large library, under what seems a reasonable and important subject heading we find only two or three entirely miscellaneous cards. It is true the topic may be quite adequately looked after elsewhere. In that case the heading had better be suppressed. Another futile thing is to put in two or three random cross references when a dozen others would be equally good.

The question of subdivisions is one that deserves care and thought. I will take up only one type of question with which I happen to be familiar. We find among the subject subdivisions under names of countries, states, etc., used by the Library of Congress, besides "description and travel," "civilization," "intellectual life," "moral conditions," "social conditions," "social life and customs." We also find "commerce," "commercial policies," "economic conditions," "industries," "manufactures." Now all these headings may be worth keeping for special works and for works preponderantly on one or two topics, tho there will be much overlapping. But they should be sparingly used and it is sheer waste of time and energy for the cataloger to pore over some ordinary volume of travel and description about, let us say, France, and try to determine whether one should bring out its "civilization" or "social conditions," "intellectual life" or "industries." Anybody of intelligence studying one of these particular subjects would naturally turn also to general works about the country or at least could be told to. The division that should be made and carefully made is by date. France since the World War is different from the France of ten years ago. The France of Louis XVIII was not the France of Louis XVI before the Revolution, and this was a different France from that of Francis I, which in its turn differed from the France of the Middle Ages. Descriptions of France and of other countries should be divided according to periods, and this is even truer of the shelflist than of the catalog. In most cases it should not be done by centuries, the easiest way, and one giving an appearance of consistency, but one betraying ignorance and laziness. Each country should have its di-

visions based on its own historical development, for instance, to quote only the most obvious, for the Latin American states, their colonial and their independent periods, for Japan the time before and the time after the arrival of Perry. Another sort of division which may well be made by a large library in dealing with modern historical events, about which it possesses a rich literature, is to divide contemporary accounts from later descriptions. The line is not very easy to draw, especially when we come to reminiscences, but it is real. Tho we are hardly ready to apply it just yet to the World War, it does very well for the French Revolution.

But when one gets down to details of this

sort, one could go on indefinitely, so I will end by returning to my main contention. The object of cataloging is to make knowledge available to the public, and, as in the case of writing books, the best results can be attained only by clearness of thought, skillful arrangement and wise restriction. Like an unreadable book, an unworkable catalog fails in its object. The fact that its chief faults may have been due to over ambition may soften our criticism but does not affect the result. On the other hand, a good library catalog is a thing to be proud of. It renders a very real service to the public and takes an honorable place among the agencies that contribute to the progress of our civilization.

Statement as to Tariff on Books in the Fordney Bill

1. The Tariff Bill as passed by the House of Representatives imposes a duty on *all* books (with minor exceptions) of foreign origin regardless of the language in which they are printed. Under the Acts of 1909 and 1913 all foreign books were exempt except those in the English language published within twenty years before the date of importation.

2. The duty is raised to 20% from the 15% (4 cents per pound for children's books) of the present law.

3. While libraries, by making affidavit, can, as heretofore, get their books in duty free, the number of copies is reduced to a maximum of two as against two in any one invoice, allowed by the Acts above cited.

4. Libraries and books of persons from foreign countries, which, with similar household effects, have been exempt under preceding Acts, are here subject to duty when exceeding two hundred and fifty dollars in value.

These provisions constitute a tax on knowledge and yet can hardly yield revenue of any consequential amount. Nor can protection to domestic industry thus be alleged, for discouraging the work of foreign genius does not automatically give birth to similar genius here. This measure affects libraries disadvantageously, as well as American science and scholarship in general, with which they are allied in advancing public education.

It concerns libraries because,

1. This duty will be the reason or excuse for a sharp advance in the prices of all foreign books, just as the present duty of 15% on recent English books (along with increased costs of transportation) has operated to raise the price of such books to the American buyer

to a figure greatly in excess of the price in England, in some cases to more than double that price.

2. American dealers will be discouraged from buying up European stocks from which we might select, at a time of special opportunity due to the dispersal of private libraries and the depreciation of foreign exchange. These stocks are highly important as the source material in which our libraries are necessarily inferior to old European collections.

3. In restricting the libraries' privilege of free importation to two copies of a book as a maximum, the Bill thus requires large libraries to pay duty on all copies imported in excess of two. This seems an unnecessary hardship. There is no indication that the privilege has been abused. It has saved the taxpayers of our cities much money by permitting free public libraries to supply all their branches (in some cases as many as thirty or forty) with important new books.

4. Affidavits will be required of every library for every book imported, if foreign (i.e., non-English) books are taken from the free list. This means an enormous amount of clerical work added to the already heavy burden of library administration. We have been freed from this burden for twelve years, and shrink from the thought of going back to it. While seemingly a minor detail, it is in reality a very serious addition to the routine work of libraries.

This Bill is of concern to American scholars and scientists because,

1. Foreign books upon which the (increased) duty is laid are imported chiefly for

the use of university and college professors and instructors, a salaried class whose purchasing power is admittedly much lower than in earlier years, and who will be hampered and stopped in much of their work, if the bill becomes a law. The revenue accruing to the Treasury from this duty would be out of all proportion to the inconvenience and positive loss which it will cause.

2. The limit laid upon the size of an immigrant's library that may be brought in without duty seems an unwise hardship to impose. We certainly have nothing to gain from impeding the entry of a family of such character as to own a valuable library.

The Executive Board of the American Library Association, therefore, respectfully but emphatically protesting against reimposing a tax on knowledge in the shape of a duty on foreign language books, begs to request the following amendments to Tariff Bill H. R. 7456:

1. In Par. 1310, lines 9 and 15 change "20 per centum ad valorem" to "15 per centum ad valorem."

2. To Par. 1529 prefix the following from Par. 425 of the Act of 1913 (agreeing with Par. 517 of the Act of 1909):

"Books, maps, music, engravings, photographs, etchings, lithographic prints, bound or unbound, and charts, which shall have been printed more than twenty years at the date of importation, and all"

3. To Par. 1530 prefix the following from Par. 426 of the Act of 1913 (agreeing with Par. 518 of the Act of 1909):

"Books and pamphlets printed wholly or chiefly in languages other than English; also"

4. In Par. 1531, line 9 insert "in any one invoice" after the word "exceed" (as per Acts of 1909 and 1913).

5. In Par. 1532, line 17 strike out the words "and not exceeding \$250 in value" (as per Acts of 1909 and 1913).

It is confidently expected that this statement of the case is a sufficient argument. If, however, the Senate Committee in Finance desires to hear arguments in favor of this contention, the Association will be glad to appear by special representatives.

The A. L. A. Committee on Federal and State Relations, and that on Book Buying have lodged the above joint protest with Senator Boies Penrose, Chairman of the Senate Committee in Finance, against those sections of the Fordney Tariff Bill which affect adversely the interests of libraries and of education in general. These Committees urge all

libraries immediately to communicate in similar vein with their individual Senators, so that as large a volume of protest as possible may face the Senate when it reconvenes on September 20. Similar expression is being arranged with the National Education Association, Association of American Universities, Association of Urban Universities, and American Association of University Professors.

JAMES I. WYER, *Chairman,*
Committee on Federal and State Relations.

M. L. RANEY, *Chairman,*
Committee on Book Buying.

Books Popular in July

FICTION titles most in demand in the public libraries in July, according to Frank Parker Stockbridge's list prepared for the September *Bookman* were:

Sinclair Lewis. *Main Street.* Harcourt.
Dorothy Canfield. *The Brimming Cup.* Harcourt.
Edith Wharton. *The Age of Innocence.* Appleton.
Gertrude Atherton. *The Sisters-in-law.* Stokes.
Zane Grey. *The Mysterious Rider.* Harper.
Floyd Dell. *Moon-Calf.* Knopf.

The titles in general literature most in demand were:

H. G. Wells. *The Outline of History.* Macmillan.
Margot Asquith. *Margot Asquith: An Autobiography.* Doran.
Frederick O'Brien. *Mystic Isles of the South Seas.* Century.
Frederick O'Brien. *White Shadows in the South Seas.* Century.
Edward Bok. *The Americanization of Edward Bok.* Scribner.

Anonymous. *Mirrors of Downing Street.* Putnam.
Best sellers in fiction during the same month, according to reports prepared by sixty-four booksellers in fifty-five cities for the September *Books of the Month* were:

Sinclair Lewis. *Main Street.* Harcourt.
Dorothy Canfield. *The Brimming Cup.* Harcourt.
Joseph C. Lincoln. *Galusha, the Magnificent.* Appleton.
Edith M. Hull. *The Sheik.* Small.
Booth Tarkington. *Alice Adams.* Doubleday.
Coningsby Dawson. *The Kingdom Round the Corner.* Cosmopolitan.

Best sellers in general literature were:
H. G. Wells. *The Outline of History.* Macmillan.
Frederick O'Brien. *Mystic Isles of the South Seas.* Century.
Lytton Strachey. *Queen Victoria.* Harcourt.
The *Mirrors of Downing Street.* Putnam.
George Bernard Shaw. *Back to Methuselah.* Brentano.
Robert W. Service. *Ballads of a Bohemian.* Barse

WANTED: LIBRARY JOURNAL

Twenty-five cents will be paid by this office for copies of the LIBRARY JOURNAL of January 1 and of January 15, 1921.

A Reading List of Books on Social and Labor Problems for Workers' Classes

COMPILED FOR THE WORKERS' EDUCATIONAL BUREAU OF AMERICA BY FRANK AND RACHEL ANDERSON

MANY calls for lists of books suitable for use in workers' classes have led to the preparation of this list. Lesson outlines and readings were collected from the various experiments in America and Great Britain. Many classes issue no outlines and many outlines give no recommended readings. This list is therefore incomplete, but it is hoped that submission of a tentative list to teachers, librarians and students of industry will lead to the making of a more valuable selection later. Books recommended by only one school have as a rule been omitted. The classes using each book are indicated in brackets. Where no sponsor is given, the book has been recommended by an authority, for possible future use. Some of these have appeared since the publication of the various lists consulted. Some seem to fill gaps in the circle of industrial problems of special interest to workers. A few American books are included because they correspond to those found helpful in British study groups.

No attempt has been made to include fiction and drama titles valuable in the interpretation of industrial problems.

Criticism of this list, with suggestions for future inclusion or omission will be welcomed by the compilers.

The classes using the books are keyed as follows:

Amherst. Amherst College. Classes for workers. Amherst, Mass.

Cole. G. D. H. Cole. Books recommended in his "British Labour Movement; a syllabus for classes and study circles." London. Labour Research Dept. 1920. 30 p. (Syllabus ser. no. 1).

Co-op. League. Co-operative League of America. 70 Fifth Ave., N. Y. City.

Daniels. Dr. Margaret Daniels, teacher of psychology and trade union history for the Garment Workers.

DeLeon. Solon DeLeon, teacher for the Garment Workers and the Rand School.

Garment Workers. International Ladies' Garment Workers' Union. Educational Dept. 31 Union Sq., New York. Fannia Cohn, Sec.

Martin. Everett Dean Martin. Director of People's School of Philosophy, New York and Associate Director of the People's Institute, N. Y.

Penn. Pennsylvania Education Committee. (Pennsylvania Federation of Labor. Educational Committee). Harrisburg, Pa.

Plebs. Plebs League (Great Britain) and Labour College (London) formerly Central Labour College.

Rand. Rand School of Social Science. 7 East 15th St., N. Y. Algernon Lee, Director. Bertha Maily, Sec.

W. E. A. Workers' Educational Association. (Great Britain).

W. T. U. L. National Women's Trade Union League, Chicago Training School for Women Labor

Leaders. 311 South Ashland Boulevard. Alice Henry, Educational Director.

1. Ablett, Noah. Easy outlines of economics. London: Plebs League, 1919. (Plebs.)

2. Adams, H. C. Description of industry. N. Y.: Holt, 1918. (Rand.)

3. Adams, T. S., and H. L. Sumner. Labor problems. 6th ed. N. Y.: Macmillan, 1909. (Penn.)

4. American Federation of Labor. History encyclopedia, reference book. Washington: A. F. of L., 1919.

5. American labor yearbook. v. 1—date. N. Y.: Rand School of Social Science, 1916—date. (Rand.)

6. *Andrews, J. B. Labor problems and labor legislation. N. Y.: American Association for Labor Legislation, 1919. (Rand.)

7. Arch, Joseph. Joseph Arch. The story of his life, told by himself and ed. with a preface by the Countess of Warwick. 2d ed. London: Hutchinson, 1898. (Cole.)

8. Arnot, R. P. Facts from the coal commission. London: Labour Research Dept., 1919. (Cole.)

9. — Further facts from the coal commission. London: Labour Research Dept., 1919. (Cole.)

10. — Trade unionism: a new model. London: Independent Labour Party, 1919. 16p. (Cole.)

11. Ashley, R. L. American government. rev. ed. N. Y.: Macmillan, 1910. (Rand.)

12. Ashley, W. J. Economic organization of England. N. Y.: Longmans, 1914. (Cole. W. E. A.)

13. Barnes, C. B. Longshoremen. N. Y.: Russell Sage Foundation, 1915.

14. Bartholomew, J. G. Atlas of economic geography. Oxford, 1915. (Garment workers. W. E. A.)

Cleveland's New "Reading Factories"

THE new building of the Superior Branch of the Cleveland Public Library, which was opened recently, is the final one planned to be built with the last of the Carnegie gifts to Cleveland, which was \$125,000 for four branch buildings. The East Seventy-ninth Street Branch was completed and occupied in July, 1915, Jefferson Branch in December, 1918, and Brooklyn Branch in January, 1919. Building costs have increased so greatly since these buildings were first projected, that more than half of the cost of the Superior building, and all of its furnishings, have had to be paid for from current library income. All four branches had been occupying temporary quarters which had become so inadequate, however, that it seemed imperative to proceed with the buildings in the face of the war and post-war prices.

These four branches represent a quite different type of building from the other Cleveland branches. About the time that Mr. Legler was working out his plan for the Woodlawn Branch building in Chicago, Mr. Brett was studying the same problems, of which these last Cleveland buildings present a somewhat different solution. They provide, in congested or rapidly growing

districts, inexpensive buildings which will meet the need for some years to come, and which will be readily convertible into stores or to other business uses, should they be outgrown or a change of location become desirable in the future.

They are located at or near local business centers. Three of the four are on inside lots, which they cover to the lot line on either side, allowing windows only at the front and back of the building. The windows are so supplemented, however, with abundant skylights of the saw-tooth variety, that they are about the most satisfactory of our buildings in the matter of daylight and ventilation. The East Seventy-ninth Street building is sixty feet wide and eighty-two feet in length; Jefferson, sixty-five feet by seventy-eight; Brooklyn, sixty-five feet by eighty, and Superior, seventy by eighty. The first three branches built to the same general plan, in three longitudinal structural units, could easily be extended forward to the sidewalk and divided into three long store rooms. The entrance corridor and loan desk occupy the front of the central section, and the reference room the rear. On one side is the children's room,

SUPERIOR BRANCH OF THE CLEVELAND PUBLIC LIBRARY. TO THE LEFT THE CHILDREN'S ROOM WITH SAW-TOOTH SKYLIGHT

with a smaller room opening into it from behind thru wide double doors, which serves as little children's room, story-hour room and club room combined. On the other side is the adult circulating room, behind which are the staff, toilet, locker and work rooms and the basement stairway; the small wing into which the staff room extends at the rear makes windows possible on two sides of this attractive little room, the back ones being large French windows opening out on the garden. French windows also lead from the little children's room to the garden which can be used for an out-door reading room and story hour room in the summer. The Brooklyn Branch, which is on a corner lot, has windows on the side of the children's room also.

These buildings, compact to the last degree, provide all of the essentials for branches of their size, tho they have had to be rigorously pruned of all non-essentials. The one fire-place which is needed in extremely cold weather and between seasons, is in the reference room opposite the front entrance where it gets its fullest architectural value. Supervision is made easy by the use of glass partitions. A different treatment of the facade gives a little individuality to each building.

The construction, which is entirely fire-proof, is in reality a combination of library, store and factory construction, and our building superintendent has not inaptly called them "reading factories."

The Superior Branch is in a large and rapidly growing district of American and Jewish readers, where larger accommodations are necessary, hence several modifications were made in the plan for this building. Experience shows that a very long, narrow children's room is difficult to administer, therefore most of the additional width was put into this room. The adult circulating room was extended the full length of the building, and the staff, toilet, locker and work rooms put on a mezzanine floor which is carried across the rear of the building and which contains also two club rooms twenty-one by twenty-two and a half, and twenty-one by twenty-seven feet in size respectively. These are connected by accordion doors which, opened up, throw these rooms into one.

When, a little over a year ago, it was decided to proceed with the building of this last branch, another feature was added, new, so far as I know, in its application to library rooms. This is the sound-proofing of the ceilings. The building is on East One Hundred and Fifth Street, a busy cross-town thoroughfare whose clanging street-cars are hardly conducive to quiet reading, and it seemed a desirable opportunity for testing the merits of the sound-absorbing

treatment. In the test of actual use of the building day after day, it gives every indication so far of being most successful.

These four buildings, while more or less architectural hybrids, are proving so practical that if they need any apology it should be accompanied by the statement that the type has made possible four buildings instead of two, or at most three, of the earlier type of branch libraries which might have been built with the same funds. In filling the book needs of many thousand more readers, largely foreigners who would otherwise be bookless, they do perhaps suggest the name "reading factories," and in so doing justify themselves.

LINDA A. EASTMAN.

A Library for the Masses

A "CHILD'S LIBRARY FOR ADULTS" is Garry C. Meyers idea of a popular library for the use of the "intermediate masses" who cannot be at ease among card catalogs and who are self-conscious and uncomfortable in the children's room. "The libraries of to-day that ordinarily are considered the best," he says in the December *Education*:

"are for two classes of people, the savants and children. Of the former there are perhaps ten or twenty per cent of the population; of children perhaps another ten per cent of the total population. For the remaining seventy or eighty per cent of the people of America the public library makes practically no appeal, nor does it offer service.

"What is most needed now is a library for the masses, a library of books which can be read by children from six to fourteen, but which are not in a room labeled Children's Library, nor frequented by children.

"Perhaps fifty per cent of the literate or partly literate people of a given community would enjoy most of the books now found in a children's library or children's section of a main library, if those books were not stamped by their location as strictly children's books. . . .

"This library for the masses would contain, of course, the elementary readings with the strictly childish things omitted. The best appeals to the human fancy in all literature would be there; biographies that set forth human struggles and human sacrifices would make up the major part. Books designed to disseminate facts would be in simple form and appeal in a strictly human fashion. Whatever would appear, there would prevail in all a paramount appeal to the imagination.

"Picture the average man with the pick, the man on the lathe, the girl at the counter or stitching-machine, the street vender, the cobbler, the average shop-girl, the fifty million men and women who have never dared to look into a reading room—picture them in a library, among others of their educational level, lost in books that are worth while, or maybe at their home reading from such books in silence, or reading to the baby brother, baby sister, or aged parents. That picture realized would be a great step toward a more complete democracy."

The Fiction of 1920—A Library Survey

By LOUIS N. FEIPEL

Editor of Publications, Brooklyn Public Library

HEREWITH is presented a comparative survey of the new fiction titles of the year 1920, based on findings obtained from thirty-six representative American public libraries.

The number of new fiction titles considered in the preparation of this article was 778, as compared with 181 considered in the 1919 survey. Of these, 626 were found to be contained in one or more of the libraries under consideration, and 152 were titles apparently not represented in any of those libraries. Owing to lack of space titles admitted to less than nine, or twenty-five per cent of the libraries reporting, are not included in this list.

The list of libraries, arranged in the order of their inclusion of the titles, and showing also the proportion of the leading 99 titles owned by each, as also the source of information on which the findings are based, is as follows:

Abbreviation	Library	Number of titles	First 99 titles
NH	New Haven (Conn.) Public Library ²	427	98
St	St. Louis (Mo.) Public Library ⁴	393	99
JC	Jersey City (N. J.) Public Library ¹	385	98
Brc	Brockton (Mass.) Public Library ¹	314	96
T	Toronto (Canada) Public Library ¹	312	91
Ph	Library Company of Philadelphia ¹	291	95

Sa	Salem (Mass.) Public Library ⁴	122	73
GR	Grand Rapids (Mich.) Public Library ¹	114	67

In connection with this table it ought to be mentioned that the New York Public Library's *Branch Library News* was discontinued in January, 1921, and that even so the titles of new books given therein never constituted a complete list; that the *Bulletin* of the Public Library of the District of Columbia does not pretend to keep the accessions listed up to date; that the Cleveland Public Library, for various reasons, does not publish certain new fiction titles in its *Open Shelf* bulletin; and that the *Bulletin* of the Wilmington Institute Free Library is, according to a statement made by its librarian, "not a good guide as to all the books that we purchase."

The 99 leading titles referred to in the above table, together with the libraries containing them, are as follows:^a

1. Oppenheim. The great impersonation. (In all 36 libraries.)
2. Locke. The house of Baltazar. (do.)
3. Lincoln. The Portygee. (do.)
4. Fox. Erskine Dale—Pioneer. (do.)
5. Gale. Miss Lulu Bett. (do.)
6. Rinehart. A poor wise man. (do.)
7. Lewis. Main Street. (do.)
8. Grey. The man of the forest. (In all but Po.)
9. King. The thread of flame. (In all but GR.)
10. Bailey. The trumpeter swan. (All but Po.)
11. Wharton. The age of innocence. (All but Blin.)
12. Schauffler. Fiddler's luck. (All but Do.)
13. Snaith. The adventurous lady. (All but Wm.)
14. Galsworthy. In chancery. (All but Blin.)
15. Marshall. Many Junes. (All but Cl.)
16. †Macaulay. Potterism. (All but NBr.)
17. Farnol. Black Bartlemy's treasure. (All but Sa.)
18. *Parker. No defence! (All but Ch and WB.)
19. Oemler. The purple heights. (All but Pi and Po.)
20. Ferber. Half portions. (All but Pro and Q.)

^aWhere authors' names are starred it signifies that those titles have not appeared in the *A. L. A. Booklist*. † indicates a "first" novel.

21. Brown. The wind between the worlds. (All but NBr and GR.)
22. Poole. Blind. (All but Q and WB.)
23. Walpole. The captives. (All but J and Q.)
24. Dillon. The farmer of Roaring Run. (All but T and Wm.)
25. Howells. The vacation of the Kelwyns. (All but J and NBr.)
26. Nicholson. Blacksheep, blacksheep! (All but Bo, M, and WB.)
27. Singmaster. Basil Everman. (All but Sp, J, and Blin.)
28. Lynde. The wreckers. (All but Pi, Po, and GR.)
29. Ervine. The foolish lovers. (All but No, NBr, and Sa.)
30. Norris. Harriet and the piper. (All but Wo, Blin, and WB.)
31. Bindloss. The wilderness mine. (All but Pra, Po, and Sa.)
32. Deland. An Old Chester secret. (All but M, WB, and GR.)
33. Watts. The noon-mark. (All but T, No, and O.)
34. Hope. Lucinda. (All but Bkln, Po, and GR.)
35. White. The killer. (All but Bo, O, Q, and Do.)
36. Cutting. Some of us are married. (All but F, Q, Do, and WB.)
37. Haggard. The ancient Allan. (All but O, Q, Blin, and WB.)
38. Porter. Mary Marie. (All but Cl, NY, Pi, and Po.)
39. Day. All-Wool Morrison. (All but Bo, Pra, Pi, and Po.)
40. Paine. Ships across the sea. (All but Ch, Po, Q, and NBr.)
41. Curwood. The valley of silent men. (All but Cl, Blin, Do, and WB.)
42. McCutcheon. West wind drift. (All but Pra, DC, Blin, and GR.)
43. Mason. The summons. (All but Bkln, L, Sa, and GR.)
44. Sedgwick. Christmas roses. (All but No, J, F, and GR.)
45. White. The Rose Dawn. (All but Sp, DC, Pi, and Wm.)
46. Phillpotts. Miser's money. (All but NBe, Pi, F, Po, and NBr.)
47. MacGrath. The man with three names. (All but M, Cl, Pra, Po, and GR.)
48. Oppenheim. The Devil's paw. (All but M, Cl, Po, O, and WB.)
49. Sedgwick. The third window. (All but Pro, No, Q, Blin, and WB.)
50. Vachell. Whitewash. (All but NBe, No, NBr, Do, and GR.)
51. Sherwood. A world to mend. (All but T, J, Wm, Do, and WB.)
52. Dawson. The little house. (All but L, O, NBr, Do, and Sa.)
53. Gibbs. Wounded souls. (All but J, F, Po, O, and Sa.)
54. Lynde. The girl, a horse, and a dog. (All but Pro, NBe, DC, Pi, and Po.)
55. Yezierska. Hungry hearts. (All but JC, Brc. No, Wm, and GR.)
56. Turner. A place in the world. (All but Ch, J, L, NBr, Sa, and GR.)
57. Kyne. Kindred of the dust. (All but Bo, Cl, DC, J, WB, and GR.)
58. Raine. Oh you Tex! (All but Ph, NBe, NR, DC, Po, and WB.)
59. Train. Tutt and Mr. Tutt. (All but Pro, No, DC, J, WB, and GR.)
60. McFee. Captain Macedoine's daughter. (All but Wo, J, O, NBr, Sa, and GR.)
61. Morley. Kathleen. (All but Bo, Pra, DC, Q, NBr, and Wm.)
62. Montgomery. Further chronicles of Avonlea. (All but Ph, Cl, Pra, DC, Q, and Blin.)
63. Sinclair. Poor Man's Rock. (All but Ch, Bkln, DC, O, Wm, and Blin.)
64. Sawyer. Leerie. (All but Ph, DC, Pi, Wm, Sa, and GR.)
65. Brown. Homespun and gold. (All but Brc, M, NBe, Wo, L, and Wm.)
66. Martin. Children in the mist. (All but Ph, M, NBe, Wo, Do, and GR.)
67. Adams. Wanted—a husband. (All but NBe, J, P, Po, Q, Wm, and WB.)
68. Oldmeadow. Coggin. (All but Pro, NBe, No, Bkln, Po, Wm, and GR.)
69. Williamson. The second latch-key. (All but Bo, Cl, F, Po, Do, WB, and Sa.)
70. Rinehart. Affinities. (All but Bo, Pra, Q, Wm, Do, WB, and Sa.)
71. Lincoln. The red seal. (All but Bo, Cl, H, Po, Q, Do, and GR.)
72. Cobb. From place to place. (All but Q, NBr, Wm, Blin, Do, WB, and GR.)
73. Wodehouse. The little warrior. (All but Bkln, DC, J, Pi, Po, Sa, and GR.)
74. Harris. Happily married. (All but NBe, No, F, Q, NBr, Wm, Blin, and Sa.)
75. Hutten. Happy house. (All but T, H, Pi, F, Po, Wm, Sa, and GR.)
76. Bower. The quilt. (All but Pro, M, Bkln, DC, Pi, Po, Q, and Do.)
77. Couperus. The tour. (All but T, Wo, F, NBr, Wm, Blin, Do, and Sa.)
78. Bazin. Pierre and Joseph. (All but NBe, No, F, O, NBr, Wm, Do, and GR.)
79. Benson. Queen Lucia. (All but NBe, J, L, F, O, NBr, Sa, and GR.)
80. †Fitzgerald. This side of Paradise. (All but M, Bkln, F, Q, Blin, Do, WB, and Sa.)
81. Lee. The Chinese coat. (All but T, NBe, Pi, L, Po, O, Wm, and Sa.)
82. Lucas. Verena in the midst. (All but M, No, Bkln, J, F, O, NBr, and GR.)
83. Merwin. Hills of Han. (All but Cl, Wo, Pra, NBr, Blin, WB, Sa, and GR.)
84. *Farnol. The geste of Duke Jocelyn. (All but Sp, Wo, Pra, F, NBr, Blin, Do, and Sa.)
85. Kerr. Painted meadows. (All but No, Bkln, Pi, O, Q, Do, WB, and Sa.)
86. Terhune. Bruce. (All but Bo, Cl, NBe, Pra, F, O, NBr, and Do.)
87. Harker. Allegra. (All but M, No, NR, Bkln, J, Pi, Q, NBr, and GR.)
88. Widdemer. I've married Marjorie. (All but Ch, H, Pra, DC, Pi, Po, Wm, Blin, and GR.)
89. Connolly. Hiker Joy. (All but T, Bo, No, DC, J, F, Po, O, and Q.)
90. Fletcher. The Paradise mystery. (All but Pro, Bo, Bkln, Po, O, Q, NBr, Do, and GR.)
91. *Balmer. Resurrection Rock. (All but NH, Ch, Sp, Bo, Pra, L, Q, WB, and Sa.)
92. Daviess. The matrix. (All but T, Cl, Bkln, DC, Pi, Po, Wm, Blin, and GR.)
93. Mundy. The eye of Zeitoon. (All but Pro, NBe, Pra, Bkln, NBr, Do, WB, Sa, and GR.)
94. Widdemer. The boardwalk. (All but Ch, Sp, Bo, NY, DC, Pi, Q, Wm, and Do.)
95. *Dell. The top of the world. (All but Ch, Sp, M, Cl, J, Pi, Blin, Do, and WB.)
96. Hewlett. Mainwaring. (All but Brc, M, Wo, F, O, NBr, Wm, Do, and GR.)

97. **Stringer.** The prairie mother. (All but Bo, M, Cl, H, No, Pra, Pi, Blin, and Sa.)
 98. **Spofford.** The elder's people. (All but NR, Bkln, J, F, Po, Q, NBr, Wm, and Blin.)
 99. **MacGrath.** The drums of jeopardy. (All but M, Cl, H, DC, Po, Blin, WB, Sa, and GR.)

The foregoing 99 titles represent those that have been added by 27 or more of the 36 libraries covered by this survey. Further titles, in the order of frequency, are as follows:

IN 26 LIBRARIES

- ***Gibbs.** The splendid outcast. (In NH, St, JC, Brc, T, Ph, Pro, Sp, Bo, A, M, NBe, H, No, Wo, NR, NY, DC, Pi, L, F, Po, O, Q, NBr, Blin.)
Fletcher. The Talleyrand maxim. (NH, St, JC, Brc, T, Ph, Pro, Ch, Sp, Bo, A, M, NBe, H, No, Wo, NR, NY, Pra, Bkln, L, F, Q, Blin, WB, Sa.)
 †**Dodd.** The book of Susan. (NH, St, JC, T, Ph, Pro, Ch, Sp, Bo, A, M, NBe, H, No, Wo, NR, NY, Pra, Bkln, Pi, F, O, NBr, Wm, Do, WB.)
Raine. The big town round-up. (NH, St, JC, Brc, T, Ph, Ch, Sp, Bo, A, NBe, H, No, Wo, NY, J, Pi, L, F, O, Q, NBr, Blin, Do, Sa, GR.)
Weston. Mary minds her business. (NH, St, JC, Brc, T, Ph, Pro, Ch, Sp, Bo, A, M, NBe, H, No, Wo, NR, DC, J, L, O, NBr, Blin, Do, Sa, GR.)
Ashford. Daisy Ashford: her book. (NH, St, JC, Brc, T, Ph, Pro, Ch, Sp, Bo, A, M, Cl, NBe, H, NY, Bkln, DC, J, Pi, L, O, Wm, Do, WB, GR.)
Austin. No. 26 Jayne Street. (NH, St, Brc, T, Ph, Pro, Ch, Sp, Bo, A, M, Cl, H, No, NY, Bkln, DC, J, Pi, L, Po, O, NBr, Wm, Sa, GR.)
Buckrose. Young hearts. (NH, St, JC, Brc, T, Ph, Pro, Ch, Sp, Bo, A, M, Cl, NBe, H, Wo, NR, NY, Bkln, DC, J, F, Po, Q, Wm, Blin.)
Rice. Turn about tales. (NH, St, JC, Brc, T, Ph, Pro, Ch, A, Cl, H, No, Wo, NR, NY, Pra, Bkln, DC, J, L, F, Po, NBr, Blin, WB, GR.)
George. Caliban. (NH, St, JC, Brc, T, Ph, Ch, Bo, A, M, Cl, NBe, H, No, Wo, NR, NY, Bkln, DC, J, Pi, L, Po, O, Q, Wm.)
Howells. Great modern American stories. (St, Brc, T, Ph, Pro, Ch, Sp, Bo, A, M, Cl, NBe, H, Wo, NR, NY, Pra, Bkln, DC, J, Pi, L, Po, Q, Blin, WB, Sa.)

IN 25 LIBRARIES

- Dell.** The tidal wave. (NH, St, JC, Brc, T, Ph, Ch, Bo, A, NBe, H, No, NR, NY, Pra, Bkln, DC, J, L, F, O, NBr, Wm, Blin, Sa.)
 ***Castle.** John Seneschal's Margaret. (NH, St, Brc, T, Ph, Pro, Ch, Sp, Bo, A, M, Cl, H, No, Wo, NR, NY, Bkln, DC, Pi, Po, Q, Blin, Do, WB.)
Hall. Steel preferred. (NH, St, JC, Brc, T, Pro, Ch, A, Cl, NBe, H, No, Wo, NR, Pra, DC, J, Pi, F, O, Q, Wm, Do, WB, Sa.)
Dodge. Whispers. (NH, St, JC, Brc, T, Ph, Ch, Sp, A, NBe, H, NR, NY, Pra, DC, L, Po, O, Q, NBr, Blin, Do, WB, Sa, GR.)
Marshall. The voice of the pack. (NH, St, JC, Brc, T, Ph, Pro, Ch, Sp, A, M, H, No, Wo, NY, Pra, DC, J, Pi, L, Po, Q, NBr, Do, WB.)
Webster. Mary Wollaston. (NH, St, JC, Brc, T, Ph, Pro, Ch, Sp, A, M, H, No, Wo, NR, NY, J, Pi, L, F, DC, J, L, F, Po, Q, NBr, Wm.)
Cullum. The heart of Unaga. (NH, St, JC, Brc, T, Ph, Pro, Ch, Sp, A, M, H, No, Wo, NR, NY, J, Pi, L, F, O, Q, NBr, Wm, WB.)

*Boyer. Johnnie Kelly. (NH, St, JC, T, Sp, Bo, NBe, Pra, Bkln, F.)
Capes. The skeleton key. (NH, JC, Pro, Cl, H, NR, NY, Pi, Wm, WB.)
*Carswell. Open the door. (NH, Ph, Ch, A, M, No, NR, NY, DC, Pi.)
Dingle. Gold out of Celebes. (NH, St, JC, Ph, Sp, M, Cl, No, NR, F.)
*Dowst. The man from Ashaluna. (NH, Brc, Sp, Bo, M, Cl, No, Wo, Bkln, Do.)
Lowndes. The lonely house. (NH, St, JC, Brc, Ph, A, M, NBe, Pra, Blin.)
*Titus. The last straw. (NH, St, Brc, T, Pro, Sp, F, O, NBr, GR.)
White. Ambush. (NH, St, Brc, Sp, Bo, M, H, Wo, Pi, Q.)
*Woodworth. In the shadow of Lantern Street. (St, Brc, T, Ph, Bo, M, NBe, NY, L, O.)
*Wright. The disappearance of Kimball Webb. (JC, Brc, T, Bo, NBe, No, NY, L, NBr, Wm.)

*Baxter. The parts men play. (NH, St, T, Ph, Pro, Ch, Sp, Pra, Bkln, Pi.)
*Burroughs. Tarzan the Untamed. (St, Pro, Ch, NBe, No, DC, J, L, O, Do.)
*Crockett. The light out of the East. (NH, St, JC, Brc, T, Ph, H, NR, Bkln, J.)
Gatlin. Missy. (NH, St, T, Ch, Sp, Bo, M, NBe, Wo, F.)
Harben. The divine event. (NH, St, JC, Ph, Ch, H, No, NR, Bkln, DC.)
*Holland. The man in the moonlight. (St, JC, Ph, Bo, A, Cl, No, J, F, O.)
Hughes. Momma. (NH, St, Brc, Ch, M, Cl, NR, Pra, Bkln, DC.)
Luehrmann. The triple mystery. (NH, St, JC, Brc, T, Pro, A, Cl, Pi, Wm.)
Mix. At fame's gateway. (NH, Pro, Ch, A, Cl, NR, Pra, L, Do, Sa.)
*Ogden. The Duke of Chimney Butte. (JC, Brc, T, Ch, Sp, Cl, No, Wo, DC, NBr.)
*Rowland. Duds. (NH, JC, Brc, Ch, No, NR, NY, J, Q, Wm.)
Barcynska. Rose o' the Sea. (NH, JC, Brc, T, Bo, NBe, Pra, F, O, Blin.)

IN 9 LIBRARIES

*Benoit. The secret spring. (St, JC, Brc, T, Ch, Cl, NY, DC, Po.)
Abbott. Happy House. (JC, T, A, M, NR, J, O, NBr, WB.)
†Agate. Responsibility. (NH, St, JC, Ch, Bo, H, Pra, DC, Pi.)
Anderson. Poor White. (NH, St, JC, Ch, Sp, Cl, Pra, Bkln, DC.)
Barbour. Joan of the Island. (St, Ch, Bo, M, NR, L, Po, O, WB.)
Bartley. The Gray Angels. (NH, JC, Pro, Bo, A, M, Wo, NY, J.)
Couperus. The inevitable. (NH, St, JC, Brc, Ph, Ch, NBe, Bkln, Po.)
England. The flying legion. (NH, JC, Ph, Ch, No, NR, NY, Q, Do.)
*Forrester. The dangerous inheritance. (NH, St, T, Sp, NBe, H, No, Pra, F.)
Forster. Where angels fear to tread. (NH, T, Pro, Ch, H, DC, J, Q, Sa.)
*Irwin. Poor dear Theodora! (NH, JC, Brc, Pro, Bo, M, Cl, No, Wo.)
Lamb. Marching sands. (NH, St, JC, T, Pro, A, M, Cl, L.)
*Leblanc. The secret of Sarek. (NH, St, Brc, Ph, Pro, Ch, A, NBe, NR.)
*Mason. The flying bo'sun. (NH, JC, Brc, Pro, M, NBe, J, Blin, GR.)
*Morris. Hannah Bye. (NH, JC, Brc, T, Ph, NBe, Pi, O, NBr.)
Pedler. The House of Dreams-Come-True. (NH, JC, Brc, Ph, Bo, Pra, DC, O, NBr.)
*Richardson. Pagan fire. (NH, Brc, Ph, Pro, Ch, Sp, H, Pra, WB.)
*Rickard. Cathy Rossiter. (NH, St, T, Ph, Bo, A, H, Wo, NBr.)
"Rita." Diana of the Ephesians. (NH, JC, T, Ph, Sp, M, NBe, No, Bkln.)
Sharp. A pawn in pawn. (NH, JC, Brc, T, Pro, Ch, Bo, A, WB.)
Spears. The river prophet. (NH, St, JC, Brc, Ch, Sp, M, Cl, Wo.)
*White. Storm Country Polly. (NH, JC, Brc, T, Ph, M, NBe, No, L.)
Williams. The witness of the sun. (NH, St, JC, T, Pro, Sp, M, H, No.)
O'Kelly. The golden barque. (NH, St, JC, Ch, Bo, M, H, Pra, Po.)

A Book-Lover's Protest

BY JULIAN ABERNETHY

WHEN I become a reformer I purpose to institute a Society for the Prevention of Cruelty to Books. Offences of an incontrovertibly criminal character, tho not specifically indicated in the calendar of the courts, are committed against books, the perpetrators of which should be punishable in varying degrees of severity from fine and prohibition to hanging. There are the people, for example, who turn down the corners of the leaves for their memories to rest upon; who wet their fingers to turn the pages, leaving indelible finger-prints as a permanent betrayal of their criminal habits; who cut the leaves with a pencil or hair-pin, giving the edges a hatched and dog-eared aspect of disgrace; who scribble their comments on the margins, to assail the attention of future readers with their impertinent wit and wisdom; and many other similar insults perpetrated against the dignity and unprotected innocence of a book.

A punishment of peculiar torment should be invented for those who wrench a book open and throw it down upon its outspread covers until they break its back. The poor thing cannot live, of course, with its back broken, and with a few more jerks and twists at its covers by the heartless reader it collapses in a general paralysis and is soon consigned to the merciful peace of the waste-paper bin. Many people even with irreproachable intentions, are as awkward and ungainly in handling books as a man is with a friend's baby in his arms. Such people are as dangerous in a library as is a bull in a china shop; they are, if not *in actu* certainly *in posse*, brutal bibliocides whom the bibliophile must watch with anxious eye, nervously expectant of calamity.

But it is not against the careless, clumsy, and ignorant book habits of the "general reader" that I am uttering my humble protest. It is the official guardians and protectors of books, the "trained" librarian and the expert cataloger, whose consciences I would arouse to a more sensitive realization of their malefactions against helpless books. Several of the sins of which I complain are committed in the name of some hyperefficient system of "library economy," one function of which seems to be to waste the substance of that for which it is presumed to econ-

omize. For example, a book cannot be placed on the shelf without first having its back daubed with a splash of varnish and white paint to indicate its shelf position, a process of branding books as the Texan ranchman brands his horses with a hot iron, disfiguring the beautiful animals for life. A book with delicate and artistic binding that has been treated in this manner is a painful sight. Apparently there is no reason for this form of mutilation except the assumed necessity of making the identity of the book on the shelf so conspicuous that it can be snatched on the run by library attendants. Some people treat their friends with a similar sort of ignominy, in base conformity with the principle, "Time is money."

Again, in the interests of "library economy," there is the card pocket pasted inside the cover, ornamented with a jazz arrangement of dates stamped in black, blue, red, and purple inks, a most forbidding and unsightly spectacle as one opens the book. And on the fly-leaf is deposited a miscellany of cataloger's notes—accession number, shelf number, date of purchase, name of bookseller, etc. And the title-page, too, must be decorated with the ingenious cataloger's informing pencillings, dots and dashes and underlines and other hieroglyphics. By the way, when an author prefers to have his name appear on the title-page with initials, why does the cataloger presume to correct his taste and judgment by writing in the full name? The information is not important, and is easily obtainable in the card catalog, its proper repository; the reader naturally cares only for the name by which the author chooses to be known.

At this point in my grumbling I pause to say frankly that under stress of expert demonstration I should most likely admit that some of these disfigurements which assail the eye of the reader when he opens a book are a necessary evil; but even so, it is an evil that can in some measure be mitigated. I modestly suggest, for instance, that this bibliographical paraphernalia, if it must all go into the book, be placed at the back of the book instead of the front. The entrance to a book should be kept as clean and tidy as a Holland housewife's front door-step.

Another practice that is even more reprehensible and disturbing to the nerves of book-lovers

is the reckless and excessive use of the library stamp, on title-page front and back, on margins and chapter endings thruout the book, and—horror of horrors! on the face of engravings. An ignorant boy or idle janitor would seem to have been set to stamping a new book, and to have gone thru his task like a contented barbarian, leaving his dirty tracks everywhere, blue on one page and purple on the next, hitting indifferently white margin or clear text with his smutchy rubber instrument. To deface a beautiful engraving with this daub of blue ink is, I venture boldly to assert, absolutely inexcusable. The New York Public Library is one of the libraries which does better than this by stamping engravings on the back. Of course the plea for this barbarism is that plates and books would otherwise be stolen. That is to say, every reader is a presumptive thief—an attitude of questionable morality when maintained in an institution devoted to the higher humane culture. In my judgment, it would be far better to lose by theft a book or engraved plate occasionally than to officially and deliberately mutilate all books and plates as a safeguard against possible pilfering. That it is necessary to disfigure a work of art in order to protect it is an indefensible proposition.

Perhaps my most smarting grievance is against the professional catalogers who exasperatingly insist on writing their notes inside the front cover or on the fly leaf, "first edition," "collated," "presentation copy," "author's corrections, p. 69," etc., etc. It possibly saves the cataloger a half minute to dump in these conspicuous places information presently to be used in a printed catalog, instead of placing it on a slip that can be inserted temporarily between the leaves of the book; and it costs the purchaser of such a bescribbled book an hour of ill-tempered labor to erase these records of his shabby convenience. As if directed by a malicious fate, the careless cataloger manages to use a soft pencil on paper with a spongy surface, which absorbs the carbon when treated with the eraser and acquires a permanent muddy splotch, and a hard pencil on glazed papers that leaves ineffaceable furrows on the cleaned page. And even the fiendish blue pencil is sometimes used, whose marks as every bookman knows it is practically impossible to remove. It is an unwarrantable imposition upon the purchaser of a precious old book to force him to clean up the destructive litter of this lazy habit.

I suppose I am a perfectionist, and in a society which is ruled by commerce and regulated by compromise, which patronizes culture instead of promoting it and regards utility as incalculably superior to beauty, a perfectionist is a nuisance, especially if he insists upon propagating his aesthetic foibles. In the whirlwind of "practical efficiency" he stands little chance of attracting attention to his nostrums of culture with no cash profits to recommend them. But there is a certain sanctity investing a book that should command the respect of even the most abandoned Philistine. A good book is the dwelling place of an immortal soul; treating it with indignity is like laying unclean hands on the Ark of the Covenant. "He who destroys a good book kills the image of God," says Milton. The books one has abused are sure to rise up in judgment against him, testifying to the coarse grain of his culture. The surface as well as the substance of a book is an index to the character of the possessor. He who abuses a good book abuses himself.

Functions of A. L. A. Committees

THE Committee on Committees,* appointed by the President upon the vote of the Council at the Midwinter Meeting in Chicago on December 29, 1920, "That the President appoint a Committee on Committees to report to the Council," "showing what is the work of each Committee and making recommendations as to the committees to be created or discontinued" has opened its report with a searching investigation into its own constitutionality. It queries:

1. Has the Council the constitutional right to create committees, or to request or instruct the President of the American Library Association to appoint committees?
2. Assuming this right, should committees so created or appointed be made up of persons who are not members of the Council, and have they any authority, jurisdiction or power whatsoever, except in such matters as are expressly delegated to the Council in Section 16 of the present Constitution?
3. Are the examination of and report upon the functions and performances of the standing or special committees of the American Library Association itself among the matters so delegated to the Council in Section 16?

The Constitution itself is of little use in answering these questions.

The Committee concludes that the Council, if it be anything else than a voluntary association, is a standing committee and nothing more. As such its appointments should be limited to the creation of sub-committees of its own membership. It has, of course, the right to recommend to the Association and the Executive Board that

*C. B. Roden, Chairman; Chalmers Hadley; T. W. Koch.

committees of larger scope and wider membership be created, but it has not the authority to vote such creations, and the parliamentary amenities as well as the co-ordination of committee activities would be materially served if this view of its powers were accepted and the committee-appointing power for the A. L. A. centralized, perhaps, in the Executive Board. It is imperative that Committees should not only know the source of their authority and be able to trace their title back to the Association itself as the only real fountain of authority, but also know the extent of their authority, and to this end they are entitled to a specific written statement, such as a clause in the by-laws or a positive enactment by the Executive Board, framed at the time of their creation, to serve as a charter or warrant for their activities.

After admitting its own clouded title to authority the Committee proceeds to examine the origin and functions of each committee and to suggest when necessary what may be done for its betterment. Very little overlapping or duplication was found. The only clear case of duplication occurs in the Committee on Foreign Publications, originated at the Mid-winter Meeting of the Middle Western University Librarians, 1919-1920, for the purpose of securing better service for libraries in the completion of files of periodicals issued in Germany and Austria during the war period, whose problems are already fully comprehended within the scope of the Book Buying Committee.

The Committee on Library Co-operation With Other Countries, created by the Executive Board, 1921, to respond to calls from abroad, i. e., from municipalities and other official bodies for assistance and advice in the application of American library methods, needs to be endowed with more explicit authority if this important activity

is to be covered by a committee instead of being controlled from headquarters.

The work of the Committee on Reciprocal Relations with Other National Organizations, appointed to advance the possibility and arrange for the establishment of co-operation between public libraries and various activities and interests represented in national organizations, should be transferred to the Secretary's office as soon as provision can be made for it, as the Committee's activities are of a more or less clerical nature not requiring the attention of a special group of members acting as a committee. The Secretary's office is also the logical haven for the Committee on Publicity, created as a special committee by the Executive Board, 1917, and changed to a standing committee in connection with the Enlarged Program, altho that Committee might be still left the work of conference publicity, which it has conducted more than capably in the past.

As an apparent defect in the committee system is noted the custom of submitting reports in writing, to be printed in advance of the annual or mid-winter meetings, and dispensing with oral presentation except by special arrangement or for especially important subjects. The Committee recommends that all committee reports save those dealing with business routine, such as travel, program, etc., be accorded a fixed place on the program either of the Association or the Council. Among the duties allotted to the latter body it is thought the receipt and consideration of all important committee reports might be included as a profitable and appropriate function.

WANTED: MATERIAL ON GROTIUS

To the Editor of the LIBRARY JOURNAL:

BOOK WAGON OF THE MILTON (MASS.) PUBLIC LIBRARY

On behalf of the "Union Académique Internationale," which is about to publish the complete writings of Hugo Grotius, the eminent Dutch Statesman and author (1583-1645), I desire to locate in American libraries and collections original letters of Hugo Grotius.

I will be greatly obliged for any information on such material to be sent to
(Professor Dr.) A. EEKHOF,
Leyden University,
Leyden (Holland).

Library Extension in El Paso

THE Public Library at El Paso, Texas, opened its remodeled building in April.

The additions consist of a new upper floor, two outdoor reading porches, and many changes on the main floor and in the basement for the comfort and efficiency of the service. The Children's Department has been enlarged by the addition of two more rooms, a story hour room and librarian's office, also one of the reading porches is devoted to the use of the children. The new floor houses the reference collection and the department of science and technology. A successful ventilating and air-washing system keeps the building cool during the hot summer months, this system being especially efficient in dry climates.

In the past two years the Library has greatly extended the use of its mining and geological department, serving the mining men locally as well as in the neighboring states and Mexico.

There are now 21,000 books in the circulating collection and 10,000 volumes in the reference department. The circulation averages 12,000 a month.

MAUD DURLIN SULLIVAN, *Librarian.*

Architect and Librarian

To the Editor of the LIBRARY JOURNAL:

The following extract is from an article by C. Matlack Price in the *Century Magazine* for September, entitled "The Trend of Architectural Thought in America:"

"The building of the Library of Columbia University falls into a somewhat similar class of architectural achievement. Not so literally a temple as the Scottish Rite, it is nevertheless based on the temple-of-learning idea, and entirely fulfills its architectural destiny in being a beautiful temple. It has no need to be anything else. . . ."

I now quote from the report of the Acting Li-

THE ADULT READING PORCH OF THE EL PASO PUBLIC LIBRARY

PART OF THE CHILDREN'S ROOM

brarian of Columbia University for 1920:

"Under the circumstances at hand, as they have often been reviewed, the Library has been obliged to adopt as a principle the development of departmental libraries. This had to follow by reason of the nature of the main building itself, no less than thru the needs of instruction. There is no place in the Library building for any general reserve system, which means both shelving enough for many copies of many books and seats enough for the readers who desire to use them, and unless the book required for use is reasonably near the lecture room or laboratory, there is an inconvenience and a waste of time in securing it. . . ."

EARLE F. WALBRIDGE, *Librarian.*
Harvard Club of New York City.

THE LIBRARY JOURNAL

TWICE-A-MONTH

SEPTEMBER 15, 1921

THE memorial of the American Library Association against the extension of the "tax on knowledge," prepared jointly by the Committee on Book Buying and the Committee on Federal and State Relations should not be without its effect upon the Congress, altho this has seemed reluctant to accept any suggestions from outside for reduction of duties. The removal from the free list of books more than twenty years old and books in foreign languages does not directly affect libraries as to cost, because of the duty free privilege, which is comprehensive, but it does mean waste of time and hence of money in the red-tape "rigmarole" necessary for free entry. In the long run this adds to the cost of books and a tax on these two classes of books can scarcely be defended either from revenue or protection viewpoints. Perhaps a more serious matter to libraries which is less emphasized by the memorial is that the bill would check the importation of important collections en bloc to be sold by auction or otherwise in this country. Under present economic conditions abroad such collections, of great value and consisting chiefly of books more than twenty years old, naturally find their way to this country and afford a rich mine for library purchasing. It would be a boon to libraries as well to individual readers if the taxes on knowledge could be altogether dispensed with, as the revenue from them is not great and "free art" is already a feature of our tariff legislation, but this is scarcely to be expected. It is fairly to be expected, however, that there should be no extension of these taxes in directions where nothing is to be gained that is worth gaining and where added inconvenience is put in the path of making important collections of books in our great libraries.

★ ★ ★ ★ ★ ★ ★

"THE object of cataloging is to make knowledge available to the public, and, as in the case of writing books, the best results can be attained only by clearness of thought, skillful arrangement and wise restriction." This is the summation of the valuable contribution on the problems of cataloging presented by Professor Archibald Cary Coolidge, director of Harvard University libraries in general, at the

Swampscott meeting. It is the result of long and double experience as a professorial user of books and catalogs and as one dealing with the making of catalogs, and the suggestions are well worth heeding. It is the more important because it represents developments from the actual work in one of the greatest of university libraries, which has been famous for its catalog, a catalog which was a pioneer in scope and method among those of both university and public libraries of the first rank.

★ ★ ★ ★ ★ ★ ★

THOSE present at the Atlantic City meeting last Spring will recall the important distinction between cataloging and bibliographical work which was developed in the discussion on Dr. Van Hoesen's suggestive paper. Mr. Solberg brought out the view that the library catalog should be confined to stating in the simplest manner what books are in the library, while bibliographies should be chiefly relied upon to give specific and comparative information, these being always the better if coming from the hands of one specially equipped to deal with the subject of his specific bibliography. Certainly much time is wasted in adding to catalog cards information not needed by most of those who immediately consult them, while, on the other hand, as was pointed out, thoro information available somewhere as to the nature and collation of a book will often save much time and effort in going to the shelves for particulars which can instantly be jotted down in the process of cataloging. The happy mean, it was suggested, might be to put on the card all the information which is easily available and which might be useful, without taking valuable time for chasing up difficult details of information. Here, as everywhere, theoretical considerations must be mitigated by common sense, and the professional spirit must not be exercised to the extent of wasting time and effort on unnecessary minutiae.

★ ★ ★ ★ ★ ★ ★

THE reduction in building costs tho not yet as substantial as it should be either in material or labor, is having its effect in stimulating preparation at least for library building. Cleveland is already making progress with its

"reading factories" and Wilmington plans to start at once on its work. Philadelphia's foundations are nearly completed, but Brooklyn is hindered by the unwillingness of the present municipal administration to grant further funds for its unfinished wing which is wasting public money because what is already built cannot be utilized. It is to be noted with gratification that all these buildings have fine sites which are an advantage literally from two points of view.

One is that a building seen from parks or wide avenues adds visually to a city's architectural features and thus exploits the palaces of the people. The other is that the library, thus brought to public view, becomes self-advertising and automatically extends its clientele of readers and its influence. It is short-sighted indeed to retard this class of building enterprise, even if costs are not yet at bottom level.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION

COMMITTEES, 1921-1922

Bookbinding.—Mary E. Wheelock, Public Library, St. Louis, Mo., chairman; Florence Dowden; Sarah L. Munson.

Book Buying.—M. L. Raney, Johns Hopkins University Library, Baltimore, Md., chairman; Anna G. Hubbard; Purd B. Wright. *

Cataloging.—W. W. Bishop, University of Michigan General Library, Ann Arbor, chairman; T. F. Currier; J. C. M. Hanson; Sophie K. Hiss; Theresa Hitchler; Harriet E. Howe; A. G. S. Josephson; Charles Martel; Axel Moth.

Civil Service Relations.—W. D. Johnston, Public Library, St. Paul, Minn., chairman; C. F. D. Belden; George F. Bowerman; M. J. Ferguson; Carl B. Roden; P. L. Windsor.

Committee on Committees.—Carl B. Roden, Public Library, Chicago, chairman; Chalmers Hadley; T. W. Koch.

Constitution and By-Laws.—Henry N. Sanborn, Public Library, Bridgeport, Conn., chairman; M. S. Dudgeon; Malcolm G. Wyer.

Council Program.—A. S. Root, Oberlin College Library, Oberlin, Ohio, chairman; S. H. Ranck (1 year); Bessie Sargeant Smith (2 years); C. F. D. Belden (3 years).

Decimal Classification Advisory Committee.—C. W. Andrews, John Crerar Library, Chicago, chairman; Corinne Bacon; W. S. Biscoe; Jennie D. Fellows; George W. Lee; Julia Pettee; Mary L. Sutliff.

Education.—Harriet A. Wood, Minnesota Department of Education, St. Paul, chairman; Harriet K. Avery; Duncan Burnet; C. C. Certain; Annie T. Eaton; Alice I. Hazeltine; A. D. Keator; Mary Lytle; Martha Pritchard; O. S. Rice; Mary E. Robbins; Sherman Williams; Adeline B. Zachert.

Federal and State Relations.—J. I. Wyer, N.

Y. State Library, Albany, chairman; Claribel R. Barnett; Johnson Brigham; M. S. Dudgeon; Edith Guerrier; H. H. B. Meyer; C. Seymour Thompson; Martha Wilson; Elizabeth H. West.

Finance.—George B. Utley, Newberry Library, Chicago, chairman; H. W. Craver; Carl B. Roden.

Foreign Periodicals of the War Period.—H. M. Lydenberg, Public Library, New York City, chairman; Willard Austen; J. T. Gerould.

Hispanic Countries.—Frederick C. Hicks, Columbia Univ. Law Library, New York City, chairman; Peter H. Goldsmith.

Institutional Libraries.—Miriam E. Carey, Minn. State Board of Control, St. Paul, chairman; F. W. Jenkins; E. Kathleen Jones; Harriet Leitch; Julia A. Robinson; Louise Singley; Clarence W. Sumner; Charlotte Templeton; Caroline Webster; Nellie Williams.

International Relations.—Herbert Putnam, Library of Congress, Washington, D. C., chairman; E. H. Anderson; R. R. Bowker; W. N. C. Carlton; John Cotton Dana; T. W. Koch; George H. Locke, E. C. Richardson.

Legislation (Appointed by Council).—W. F. Yust, Public Library, Rochester, N. Y., chairman; W. O. Carson; Mary E. Downey; M. J. Ferguson; W. J. Hamilton; Frederick C. Hicks; John B. Kaiser; C. B. Lester; S. H. Ranck; Fannie C. Rawson; Mary U. Rothrock; C. P. P. Vitz; O. L. Wildermuth.

Library Administration.—F. F. Hopper, Public Library, N. Y. City, chairman; Jeannette M. Drake; Ethel F. McCollough.

Library Co-operation with Other Countries.—Mary Eileen Ahern, editor, *Public Libraries*, Chicago, chairman; W. W. Bishop; Alexander Calhoun; Mrs. H. L. Elmendorf.

Sub-committees.—Far East: Cornelia Marvin, Oregon State Library, Salem, chairman; Children's Work in Other Countries: Annie Carroll Moore, Public Library, New York City, chairman; Jessie Carson.

Library Revenues.—S. H. Ranck, Public Library, Grand Rapids, Mich., chairman; H. C. Wellman.

Library Service (Committee of Five).—Arthur E. Bostwick, Public Library, St. Louis, Mo., chairman; Florence Overton; A. S. Root; Henry N. Sanborn; Bessie Sargeant Smith.

Library Training.—Malcolm G. Wyer, Nebraska University Library, Lincoln, chairman; W. W. Appleton; Emma V. Baldwin; Mary E. Hazeltine; John A. Lowe; Margaret Mann; Effie L. Power; Carrie E. Scott; F. K. Walter.

Library Workers Association.—Edith Tobitt, Public Library, Omaha, Neb., chairman; June R. Donnelly; Edna B. Pratt.

National Certification and Training.—C. C. Williamson, Public Library, New York City, chairman; J. F. Hosic; Dorsey W. Hyde, Jr.; Cornelia Marvin; Everett R. Perry; Josephine A. Rathbone; Julia A. Robinson; P. L. Windsor.

Preparation of a Bibliography of Humanistic Literature (In conjunction with a Committee from the American Association of University Professors).—W. W. Bishop, University of Michigan General Library, Ann Arbor, chairman; E. H. Anderson; Andrew Keogh; H. H. B. Meyer.

Program.—A. S. Root, Oberlin College Library, Oberlin, Ohio, chairman; S. H. Ranck; Carl H. Milam.

Public Documents.—H. H. B. Meyer, Library of Congress, Washington, D. C., chairman; Tommie Dora Barker; W. O. Carson; Gratia A. Countryman; Alice J. Haines; Clarence B. Lester; S. H. Ranck.

Publicity.—W. H. Kerr, Kansas State Normal School Library, Emporia, chairman; A. L. Bailey; C. H. Compton; M. J. Ferguson; Mary Frank; Elizabeth Knapp; John H. Leete; Paul M. Paine; S. H. Ranck; Charles E. Rush; Ida F. Wright.

Reciprocal Relations with Other National Organizations.—Mary Eileen Ahern, editor *Public Libraries*, Chicago, chairman; Marilla W. Freeman; John H. Leete.

Recruiting for Library Service.—J. T. Jennings, Public Library, Seattle, Wash., chairman; Irving R. Bundy; F. K. W. Drury; Frances E. Earhart; Alice M. Jordan; Florence Overton; Annie A. Pollard; Ernest J. Reece; Rena Reese; Flora B. Roberts; Grace D. Rose; Charles H. Stone; Althea Warren.

Revision of Adams' Manual of Historical Literature.—A. H. Shearer, Grosvenor Library, Buffalo, N. Y., chairman; H. H. B. Meyer; C. W. Reeder.

Sponsorship for Knowledge (Appointed by Council).—Charles F. D. Belden, Public Li-

brary, Boston, Mass., chairman; George W. Lee; George H. Tripp; Hiller C. Wellman; Frank H. Whitmore.

Standardization of Libraries (Appointed by Council).—P. L. Windsor, University of Illinois Library, Urbana, chairman; Helen E. Haines; Margaret Hickman; Julia A. Robinson; Mrs. Carl B. Roden; R. K. Shaw; Asa Wynkoop.

Travel.—F. W. Faxon, 83 Francis St., Boston, Mass., chairman; C. H. Brown; John F. Phelan.

Union List of Serials (Appointed by Council).—C. W. Andrews, John Crerar Library, Chicago, chairman; Arthur E. Bostwick.

Ventilation and Lighting of Public Library Buildings (Appointed by Council).—S. H. Ranck, Public Library, Grand Rapids, Mich., chairman; C. W. Andrews; E. D. Burton; D. Ashley Hooker; H. M. Lydenberg.

Work with the Foreign Born.—Mrs. E. E. Ledbetter, Broadway Branch, Public Library, Cleveland, Ohio, chairman; J. Maud Campbell; Hannah C. Ellis; Josephine Gratiaa; Marion L. Horton; Margery C. Quigley; Adelaide C. Rood.

BAY PATH LIBRARY CLUB

THE Bay Path Library Club held its annual meeting in the Holden Public Library on June 9.

Mrs. Frederick W. Smith of the Malden Library assisted by representatives from the Lancaster and Leominster libraries, gave a practical demonstration showing the actual working out of Mr. Fison's inexpensive plan for binding magazines. (See LIBRARY JOURNAL for May 1).

Miss Keyes, president, called the meeting to order for a short business session. The reports of the secretary and treasurer were read and accepted, the latter showing a balance of \$67.48 to the credit of the club. A leaflet giving a record of the use of the traveling library purchased by the club, was shown by Miss Keyes, and Mrs. Whittemore reported that several books in this library had been rebound at the expense of the club.

The following officers were elected: President, Emily Haynes; first vice-president, Edith M. Gates; second vice-president, Albert Hinds; secretary, Mabel E. Knowlton; treasurer, Grace M. Whittemore.

The afternoon session opened with a short discussion as to the advisability of continuing the box lunch plan, after which Miss Grace Barr of the educational department of M. Steiner & Sons, Boston, gave a most entertaining talk on "How history has influenced the music of this country," illustrated by victrola records.

Following, Miss Wheeler conducted book reviews, arranged on the community plan, by which each member present was asked to give a short review of some book or books read.

MABEL E. KNOWLTON, *Secretary*.

LIBRARY CALENDAR

Sept. 27-29. At Eagles Mere.

Twenty-first meeting of the Keystone State Library Association.

Oct.—At Ames.

Annual meeting of the Iowa Library Association.

Oct. 10-12. At Milwaukee.

Annual meeting of the Wisconsin Library Association.

Oct. 11-13. At the University of Illinois, Urbana.

Annual meeting of the Illinois Library Association.

Oct. 13-14. At Keene, N. H.

Meeting of the New Hampshire Library Association.

Oct. 20-21. At Litchfield, Conn. Headquarters at the Phelps Tavern.

Annual meeting of the Connecticut Library Association.

Oct. 26-28. At Muncie.

Annual meeting of the Indiana Library Association.

Dec. 29-30. At Chicago.

Mid-winter meeting of the A. L. A. Council.

BACON, Virginia C., R 1915, formerly librarian of the Humboldt State Normal School, Arcata, Calif., recently librarian and service secretary to the Junior Division of the U. S. Employment Service, United States Department of Labor, appointed librarian of Park College, Parkville, Mo.

COOK, Grace L., 1915-16 N. Y. P. L., catalog librarian, Columbia University Engineering Library, is to go to the Library of Erasmus High School, Brooklyn, and is replaced by Juliet A. Handerson, 1908 W. R.; 1915 N. Y. P. L., on leave from the Cleveland Public Library.

KIMBALL, Florence B., 1907 N. Y. S., appointed acting librarian of the Massachusetts Agricultural College, Amherst, pending the selection of a librarian to succeed Charles R. Green, resigned.

PATTERSON, Lilla, 1910 W. R., for the last four years assistant in the Municipal Reference Branch of the Cleveland Public Library, has accepted the position of reference librarian of Mount Union College Library.

ROSS, Cecil A., has resigned the librarianship of the Harvard University Graduate School of Business Administration to enter the senior year of the N. Y. S.

SOHN, Howard B., 1920 I., leaves the Youngstown, (Ohio) Public Library to become librarian of the high school at Canton, Ohio.

TRIMBLE, Katherine M., appointed supervising librarian of the Virgin Islands libraries, organized by Adeline B. Zachert, and not assistant to Miss Zachert at Harrisburg as announced in our August number.

WING, Alice L., 1904 I., has resigned from her position as organizer with the Michigan State Library Commission, to become assistant in the Library of Ohio Wesleyan University at Delaware.

Among appointments of members of the class of 1921 of the University of Illinois Library School are: James B. Childs, a member of the staff of the University of Illinois Library for three years, has accepted a position in the John Crerar Library; Ethel Blum, formerly an assistant in the Illinois State Historical Library, to be librarian of the State Normal School at Bowling Green, O.; Ruth Sankee, formerly librarian of the East Texas State Normal School, to be librarian of the new high school of the University of Illinois.

IN THE LIBRARY WORLD

MAINE

Portland. The Portland Public Library, with a book stock of 79,161 and a staff of eleven, circulated 105,386 books during the year 1920, a gain of about three thousand over the circulation of the previous year. The Children's Room circulated 24,871 books. Receipts from general sources and library funds were \$17,375, of which \$7,000 was received from the City of Portland and \$500 from the State of Maine. An increase in the use of government documents was noted, especially on the part of one of Portland's largest business houses. The reference and delivery rooms had special exhibits at the time of the Maine Centennial celebration.

MASSACHUSETTS

Woburn. The Woburn Public Library with no branches or stations circulated 86,647 books in 1920, representing a per capita circulation of five, and an increase over the previous year of 4702 books. Books were also loaned to the citizens of North Woburn thru the Eunice Thompson Memorial Library in that town. The Woburn library contains 51,592 volumes. About 23 per cent of the population of 16,574 are borrowers.

Effective publicity has taken the form of a weekly column conducted by the Librarian, William N. Seaver, in the Woburn *Daily Times*, entitled "Your Public Library." The library's file of Woburn newspapers and the index to them are now complete from the year 1840, with the exception of a few of the early years.

Salem. In 1920 the Salem Public Library loaned 161,075 books, the largest circulation in its history. The population of Salem is 42,529. The increase in circulation also increased the difficulties of the library in making replacements and serving its public with a book appropriation of about \$4,000 and in cramped quarters at the East and North branches. The library contained in all 70,483 volumes at the end of the year. Total receipts were \$30,129, and \$16,304 was paid out in salaries.

Newton. On a basis of the 1920 population figure for Newton of 46,054 the total circulation of books from the Newton Free Library for the year was 8.2 volumes per capita. At Chestnut Hill and Newton Lower Falls, served mainly by book wagon, the per capita circulation was 12 and 18 volumes respectively. House to house delivery continued all year without interruption, the library substituting a sleigh for its automobile during the three weeks of the worst

winter weather. Almost ten per cent of the total circulation of 378,393 volumes were delivered in this way directly at the homes of the patrons of the library.

At the end of the year there were 108,528 volumes in the library; the total registration 16,636 borrowers. Receipts from endowment funds and the city appropriation were \$59,599, and \$13,116 was spent for books, periodicals, and binding, with \$28,083 for salaries. In 1915 the City Treasury expended 8.6 cents for each book circulated, and in 1920 it expended 12.2 cents per book, representing the relatively moderate increase of 42 per cent in the cost of each book circulated.

RHODE ISLAND

Elmwood. By the will of Edith Wright, the Elmwood Public Library Association receives a bequest of \$125,000.

CONNECTICUT

Bridgeport. The fortieth annual report of the Bridgeport Public Library, for the year ending May 31, 1921, shows a circulation of 741,516 volumes, a per capita circulation of 5.1 volumes. In the three years since reorganization was begun, the circulation has increased 376 per cent, from 197,196 to 741,516 volumes. In spite of increased costs of service, books and supplies, the cost of maintenance has been reduced from 18 cents to 12 cents for each volume circulated. The Library has now 133,660 volumes. 26,015 volumes were added by purchase in the year. The library tax netted \$107,640, and the expenditures from this fund were \$92,689.12. \$46,724.87 was spent for salaries and \$26,010.38 for books.

The Library has now four branch buildings opened in the last three years, and is erecting two more at a combined cost of \$90,000.

NEW YORK

New York City. A review of the year ending June 30, 1920, by the Acting Librarian of Columbia University, William H. Carpenter, shows a relatively normal use of the resources of the library after the unusual demands made upon it in various directions by the war and the conditions that immediately followed it. The total recorded use of books, including volumes supplied from the loan desk for outside use and for use in the building and from the reading rooms for the same purposes, amounted to 1,066,387. The loan desk in the General Li-

brary in particular supplied 25,500 more volumes to readers than in the previous year. The General Library and Departments added 22,694 volumes; the School of Law, 4,184; the School of Medicine, 2,079; Barnard College, 895; Teachers' College, 3,470; and the College of Pharmacy, 82, making a total of 33,404 volumes and a grand total for the Library of 794,852 volumes. The estimated number of unbound pamphlets was 50,000.

The acute lack of room in the main library has made obligatory the development of departmental libraries in spite of the large administrative expense and the duplication of equipment and material involved by that policy. At the time of the report there were five departmental libraries of varying sizes on the various floors of Schermerhorn Hall and five more in Philosophy Hall. The suggested remedy is a policy of "local centralization." One large room in each building would decentralize sufficiently for convenience of use and centralize sufficiently for effective administration. Rooms that connect or alcoves that separate could readily preserve the distinction of subjects with a unity of supervision. The single reading room of the building would be provided with encyclopædias, dictionaries, atlases and general reference books in a much smaller number than is necessary under a system of many rooms.

The facilities of the College Study have grown yearly less adequate to meet the increasing demands for service. In 1914-15, in most respects a normal year, the total use of books there was 69,651; in 1919-20, the total was 106,122. The condition has been materially relieved by the assignment of 301 Hamilton Hall as additional quarters for the Study. Another pressing need is for greater reading facilities for Extension students, numbering that year 12,873, who use the General Reading Room in ever increasing numbers. Two of the three openings of this room into the surrounding corridor were closed in a successful effort to check the heavy loss of books from the open shelves, only a single exit and entrance being retained.

A card known as a "Library card" was issued every student using the library upon presentation of the proper credentials, which provides for his signature, address, and the School of the University where he is in attendance. The card is accepted in all departments of the University Library as evidence of the holder's privilege to borrow books during the period it specifies.

Expenditures for salaries totaled \$68,862; for books and serials, \$22,448, and for binding, \$7,799. Total expenditures amounted to \$172,817.

Chautauqua. The twenty-first session of the Chautauqua School for Librarians was attended by 58 students from 15 states as follows: Ohio, 11; Indiana, 1; Utah, 8; New York, 6; Pennsylvania, 5; Missouri, 5; Michigan, 3; Maryland, 2; West Virginia, 2; and one each from Connecticut, Florida, Nebraska, New Jersey, Texas and Wyoming. The libraries represented by the students are: Public, 30; county, 9; high school, 6; college, 6; university, 2; special, 2; township, 1; agricultural college, 1; state library, 1. Eleven students completed this year the fourth year of the course and are therefore graduates of the second class.

Norwich. The Guernsey Memorial Library reported a steady volume of work for the library year ending June 30, 1920, in spite of the handicap of an inadequate and even unsafe library building, which was closed for ten days early in 1920, while repairs were made to safeguard the lives of library users. Cost of construction has prohibited the erection of a new library building, for which the Board of Education was authorized in 1919 to raise funds.

Out of a population of 8,345 there were 5,477 registered borrowers, who took out 44,867 books during the year. To the twenty-four schools in Chenango County 446 volumes were loaned thru teacher-librarians.

OHIO

Toledo. The report of the Toledo Public Library for the fiscal year ending December 31, 1920, covers the forty-sixth year of the library and the sixth year of the administration of Librarian Herbert S. Hirshberg. The main library and its branches, Birmingham, Jermain, Kent, Locke, Mott and South, circulated 973,922 books, a gain of 97,202 over 1919, or four books for every inhabitant of Toledo, "regardless of age and literacy." The main library circulated 280,059 books, the branches 592,791, and deposits 101,072. A branch was opened in January in a second-floor room of the East Side Community House operated by the National Catholic War Council, but open to all without respect to creed. The branch was immediately taxed to its capacity and was moved in the spring into more spacious quarters in front. The Schools Division placed books in 157 rooms in 51 schools. Approval by the voters of the \$11,000,000 school bond issue will expedite the construction of new school buildings, and if the library program is carried out in connection with the new school buildings rapid expansion of the library is also expected. The branch libraries in these buildings will to a great extent take care of neighborhoods not now provided for.

The Polish Educational Association offered the Library Board the use of the balance in their treasury amounting to more than \$2,000 for the purchase of Polish books for the library. The books will be placed in Mott Branch and in the Main Library until such time as a library branch is opened in the Polish district along Lagrange street.

The expenditure for the year from city funds was \$118,352, slightly less than the appropriation of \$118,650. The total receipts from taxes, fines, etc., amounted to \$108,545. The original appropriation for the year at first included no appropriation for new books, the intention being to provide the book money thru a bond issue after the balance of about \$5,000 from the bond issue fund of 1919 had been spent. Financial conditions made it impossible to sell bonds, and an ordinance was passed in May voting an additional appropriation for new books of \$14,000. \$15,874 was spent in all for this purpose, and \$71,512 for salaries. Beginning with 1921 the bonus of 10 per cent on all library salaries instituted the previous April was removed, but the old salary schedule of July, 1919, was raised, making the initial salary for training class graduates \$80. The first class to graduate from the training course conducted by the Board of Education under the new plan numbered twelve, all of whom are employed as assistants in the library. Marie A. Newberry's instruction was supplemented by courses in children's work and cataloging conducted by Miss Wright and Miss Riggs of the library staff and by lectures by other members of the staff.

Akron. A report of the Acting Librarian of the Akron Public Library, Maude Herndon, covers the use, facilities, and special and routine activities of the library during 1920, more particularly since the resignation of the former librarian, Mary P. Edgerton, on June 1, 1920.

In July, at the request of the Library Board, the Akron Bureau of Municipal Research made a survey and reported on the work and facilities of the library. Herbert S. Hirshberg, librarian of the Toledo Public Library, was asked to assist the Library Board in making up the budget for 1921, which he recommended should be estimated at \$131,000 to provide branch libraries in the four compass sections of the city. The budget, however, was cut to \$35,000, making branch development in 1921 out of the question. In the course of the library publicity campaign inaugurated by the Akron Library Club in the fall, Arthur E. Bostwick of the St. Louis Public Library spoke before the Akron Chamber of Commerce and the College Club, commenting on the fact that Akron was spending millions of dollars for public improvements while setting

aside only a small amount for improvements in the library.

The assessed valuation of the city in 1920 was estimated at \$350,000,000, and the population was 208,435. 20,866 borrowers were registered at the end of the year. The net circulation increased from 108,698 in 1919, the largest previous year, to 139,579 in 1920, or 20.4 per cent. The main library circulated 113,475 volumes; the Firestone Park Station, with a book stock of 807 volumes, 2,894; the Mason School Station, with 1,025 books, 4,496; and the three classroom deposits, 18,714.

Both the Firestone Park and the Mason School Station were opened for the first time late in the year. Other sections of the city have asked for book service. Three different groups of citizens, representing the business men, the schools and residents of East Akron; the citizens club from North Hill; and ten schools thru the superintendent and principals and representatives from the Home and School League have all applied for service which could not be given. The library added 5,756 books during the year by purchase, bringing the total number of volumes to 40,365. \$33,439 was spent in library service. The rate of tax levy for library purposes was .158.

The Acting Librarian recommends an increase in the book supply and the discarding of much of the present shabby and out-of-date stock; the establishing of branches, additional stations, and classroom collections; the placing of additional stacks in the mezzanine floor of the main library; separation of the general reading room from the reference room, and more extensive advertising of library opportunities.

ILLINOIS

Chicago. On June 30, 1920, there were 599,492 volumes in the University of Chicago libraries, with unaccessioned volumes estimated at 85,000 and about 200,000 pamphlets.

Readers to the number of 1,137,123 were registered, and there was a total recorded use of books of 520,013. At the beginning of the year covered by the report a new Card Department was organized with a staff of nine persons. This step seemed warranted by the importance of the work of producing and procuring cards for the various catalogs of the library, including as it does typewriting, multigraphing, printing, proof-reading, ordering from other libraries, receiving and distributing cards, and sending out copies of the library's own cards to twenty-one other institutions, to which only complete sets are furnished.

Large additions were made to the loan libraries within the year. Books are lent for special

fees in three different ways: (a) A set of books including all those required for the course is lent for the quarter. (b) A number of the most important books, or even single volumes, are lent for the quarter. (c) Single volumes are lent by the day. Sets vary in number from three to twenty-five titles. The fee is low, but is sufficient to cover the cost of the books, the not of the service.

WISCONSIN

The thirteenth biennial report of the Wisconsin Free Library Commission rehearses the varied services which the Commission is prepared to render to any individual, group of individuals, or institution in the state. Any citizen who desires a book which he does not own or cannot obtain can usually get it by writing to Madison, and any five citizens can secure a traveling library of fifty volumes by applying to the Commission, which also makes a special effort to provide teachers in the rural schools with books. During 1919-1920 nearly eleven thousand requests were filled by twice as many volumes thru the parcel post. The state traveling libraries reach 1,893 communities, while sixteen county libraries supply 553 more. A total of 22,309 volumes are sent out from the county headquarters to library stations. The Commission in 1919-1920 sent out in all 81,835 volumes in traveling library boxes and by parcel post from the traveling libraries and thru study clubs. The annual appropriation for its work was \$32,000 in 1919 and \$41,500 in 1920, with \$21,800 each year for the legislative reference department. In the last legislative session 132 out of the 133 assemblymen and senators called upon this department for drafting services, and filed 1984 requests for drafts of bills, resolutions, and other legislative documents.

The Commission has made special efforts to place books at the disposal of ex-service men in the various hospitals of the state, and books used in occupational therapeutics have been furnished for the psychiatric institute at Mendota where large numbers of shell shocked men are receiving treatment. Twenty traveling libraries are also set aside for the sole use of tuberculosis sanitariums, with the state sanitarium at Statesan as the center of the system.

The Commission recommends that a law applicable to Milwaukee only be made applicable to the other counties in the state. Under this law the city library serves the entire county thru branches and deposit stations, with the expense paid in the first instance by the county but subsequently charged back against the various towns, cities, and villages, each paying in proportion to the amount of library service actually

rendered. The Commission also recommends that further provision be made permitting a direct contract between the county and the public library for county library service, to be paid for out of general county funds, and suggests that a law permitting the establishment of an entirely new county library system should be enacted to be used in those counties where no adequate library facilities are within reach.

MINNESOTA

The first report of the State Board of Education and the twenty-first biennial report of the Department of Education of the State of Minnesota is also the first to describe the work of the Library Division. The Division was added to the Department of Education August 1, 1919, succeeding the Public Library Commission, whose existence as a separate board terminated, and whose functions, powers and duties were vested in the newly created State Board of Education.

The total number of public libraries in the state is 150, of which 109 are organized under state law and supported wholly or in part by taxation, and 41 maintained by library associations, civic leagues, community clubs or study clubs. With a few exceptions every municipality in the state of over 2,000 people has established a public library, but more than one-half are in villages of less than 2,000 people. There are 12 counties in the state which have no public library, and only 40 of the 86 counties have libraries of 5,000 volumes. No county libraries have been organized as yet under the county library law passed in 1919.

In all the public libraries of the state there are 1,263,732 volumes. School libraries own 2,306,481 volumes, and traveling libraries 31,950. \$82,525 was spent for books and periodicals in public libraries, as against \$143,595 for the schools. Total salaries amounted to \$313,171; total expenditure \$762,930. From public libraries 4,728,398 volumes were drawn, and 561,773 from those in the schools.

The new Division has continued the work of the old Commission in encouraging the organization and development of public libraries in communities. During the biennial period a total of 131 visits were made by members of the library staff to 85 towns and two rural schools in 51 counties. Addresses were made at 49 library and educational meetings, 8 county school institutes and 31 meetings of county officers, students, and other groups. *Library Notes and News* was sent quarterly to all public and institution libraries, to county superintendents, and to high, graded, and consolidated schools. and library exhibits were held at the State Fair. at the State Conference of Charities and Correc-

A BALANCED RATION FOR THE MIND

MEN cannot live by art, or politics, or literature or anything else alone.

If he specializes to the exclusion of the subjects that go to the making of a complete thinking being, or if he dedicates himself to a single point of view, he becomes one-sided.

THE FREEMAN offers a weekly balanced ration for the mind that wants to "see life steadily and see it whole."

Its point of view is proof that modern taste and classic standards are compatible.

H. S. CANBY, editor of the Literary Review of the New York Evening Post, says:

"We gladly pay our tribute here to the Freeman, a weekly which apparently specializes in good English, since one can read its pages (irrespective of what one thinks of the ideas expressed) with a sense of pleasure as of a walker on a mountain who finds a path."

THE FREEMAN is the phenomenon of American journalism. Now only in its second year its subscription list reaches into 26 foreign countries. Its book-reviews were almost at once included in the Book Review Digest. It is quoted far and wide; it is to be found in homes, colleges, clubs, public libraries where only the best is tolerated.

Is it on your periodical list? If not, let us send you a sample copy.

THE FREEMAN
116 W. 13th St., New York. N. Y.

\$6.00 a year.

Dr. Charles W. Eliot,

President-Emeritus of Harvard University, says:

"THE OPEN ROAD is a clean, live, easy-to-read, serious purpose magazine. It wants to serve ambitious, clear-eyed boys and young men who mean to become serviceable citizens.

"Although the magazine is instinct with the spirit of youth, and is intended for boys and young men, it will be found to be excellent reading for the whole family circle.

"It is an additional merit of THE OPEN ROAD that it admits no unwholesome or misleading advertisements. It is not an advocate of any specific reform in public theory or practice, but on the other hand it never holds up to derision serious attacks on the physical and moral evils which threaten the life of the race."

(Signed) CHARLES W. ELIOT.

THE OPEN ROAD

249 BOYLSTON STREET, BOSTON 17, MASS.

SCRIBNER'S LIBRARY DEPARTMENT

Offers to all libraries, large or small,

- 1 Expert and efficient service, the result of years' experience.
- 2 The largest discounts on the books of all publishers.

Place your orders in our hands

They will be filled accurately as to title and edition, obscure and out-of-print books collected from all over the world, English titles imported duty-free, and all "shorts" reported on at time of shipment. Continuations will be forwarded without reminder, and out-of-stock and not-yet-published items supplied when procurable. All this without troubling you!

We relieve you of all detail and unnecessary expense

CHARLES SCRIBNER'S SONS,

597 Fifth Avenue, N. Y. City

tions, and the State Federation of Women's Clubs.

The Traveling Library department loaned 6,973 books and 25,718 pamphlets during the biennial period. The assistance of the St. Paul Public Library has increased the effectiveness of these package libraries, which are sent to any responsible person in the state on payment of postage. Foreign books were sent to individuals or to small libraries serving a foreign-born population, the languages including Finnish, French, German, Norwegian, Polish and Swedish. The 4,000 War Service books received as

Minnesota's share were sorted and distributed to the smaller libraries of the state, added to the collection of the Library Division, or given to special technical libraries where they would be of use. Thirty collections numbering 3,671 volumes were sent out.

The Summer School for Library Training, omitted in 1919 during the period of reorganization, was held in 1920 at the University Farm, and 38 students completed the course, equally divided between school and public libraries. The course totaled 97 hours, with special emphasis on book selection.

LIBRARY OPPORTUNITIES

POSITIONS WANTED

Wanted, position by librarian experienced in publicity, organizing and school work. Address F. I. K., care of the LIBRARY JOURNAL.

Cataloger with experience in Canada and the United States desires position in Canadian library, doing cataloging and general library work. Residence and naturalization intended. Address A. C. 15, care of the LIBRARY JOURNAL.

College and library school graduate with nine years' varied library experience, chiefly administrative, wishes interesting executive position by October 1st. Would go to any section of the country and prefers hard work. Lowest salary \$2100. Address H. M. 15, care of the LIBRARY JOURNAL.

Young man, college graduate, with library school training and seven years' college and library experience, wants to find position as librarian of public, college or normal school library, or would like to hear of interesting temporary position. Address N. P. L. 16, care of the LIBRARY JOURNAL.

College and library school graduate with six years' experience in cataloging, having knowledge of Latin, French, German, and Italian, wants position as cataloger or assistant cataloger in a Rocky Mountain, Pacific Coast, or southwestern state. Address E. C. 16, care of the LIBRARY JOURNAL.

Young man, born in Russia. Jewish Theological Seminary in Russia; came to this country 1913; in Texas and Louisiana, writing and teaching, 1913-20; Tulane University, two

courses; University of Buffalo 1920—date (including summer 1921) A.B., reading, speaking and literary knowledge of Russian, Hebrew, Yiddish, English. Reading and writing knowledge of Polish, German, Ukrainian, Aramaic, and acquaintance with other Slavonic languages and Greek. At University of Buffalo he took the three-hour course (one year) in Library Science, so has a general knowledge of library work. References supplied. Address, M. Y., care of Dr. Augustus H. Shearer, Grosvenor Library, Buffalo, N. Y.

POSITIONS OFFERED

Wanted, assistant to take charge of serials and binding department in a college library in the Middle West. College degree, library school and some experience required. Address C. S. I. 16, care of the LIBRARY JOURNAL, stating salary required.

Wanted, assistant reference librarian in Middle West state university library. Salary \$1400-\$1600 according to training and experience. Address A. Z. 15, care of the LIBRARY JOURNAL.

The first of September finds the American Library Association employment service unable to meet all the requests for recommendations for library positions. Librarians are needed in almost every field of library endeavor. Librarians who desire change of position will greatly facilitate the work of the Association by registering very promptly should they desire to avail themselves of the opportunities now open. Children's librarians are particularly in demand.

SARAH C. N. BOGLE, *Assistant Secretary*.
78 East Washington St., Chicago.

How to Select Your Proper Vocation

Have you discovered the position in which you will achieve the greatest success?

APPLIED GRAPHOLOGY

is a new book that tells you how to investigate your talents and enables you to pick the job for which you are best suited and from which you will profit most. Stop experimenting. Make sure by purchasing a copy of Applied Graphology. "Probably the most thorough-going and authentic volume ever produced on this subject."—The Bookseller, Newdealer & Stationer.

Price, \$2.60 at your bookstore or sent postpaid upon receipt of price. Gregg Publishing Company, New York, Chicago, Boston, San Francisco, London.

THE BOOKPLATE ANNUAL FOR 1921

This valuable reference book should be available in every library. The material forms a comprehensive survey of the year in bookplates, composed of articles ranging in interest from the newly discovered earliest American bookplate to the 1921 Exhibition of Contemporary Bookplates. The book is fully illustrated, printed on Old Stratford paper, and substantially bound. A complete description will be sent on request.

Scott's Standard Postage Stamp Catalogue

1922 EDITION

Presswork has now begun and we are able to announce that the publication date will be between

November 1st and 15th, 1921

This new edition has been thoroughly revised both as to listing and prices, and all new issues included up to the time of going to press.

Although this year's book will contain more pages than any previous edition, we are glad to say lower cost of paper enables us to keep the price the same as last year.

CLOTH BOUND \$1.50

CLOTH BOUND, with Thumb Index 2.00

Forwarding charges extra. Shipping weight 2 lbs.

We urge placing your order early, as the first printing of the 1920 edition was oversold before the book appeared.

SCOTT STAMP AND COIN COMPANY

NANCY AND NICK BOOKS Five Volumes

Olive Roberts Barton

Knowing the endless appetite of children for "another story," Olive Roberts Barton has written the Nancy and Nick Books. Full of characters dear to the hearts of children in a wonderful land of make believe. Just the right mixture of things familiar and things unknown. **NANCY AND NICK IN SCRUB-UP-LAND, NANCY AND NICK IN THE LAND OF DEAR-KNOWS-WHERE, NANCY AND NICK IN THE LAND-OF-NEAR-BY, NANCY AND NICK IN HELTER-SKELTER-LAND, NANCY AND NICK IN TOPSY-TURVY-LAND.** Illustrated throughout with Color Jackets and Covers by E. R. Higgins. Each, net, \$1.00

JACK-IN-THE-BOX BOOKS Four Volumes

Marion Ames Taggart

The adventures of four happy children at the age when clubs, pass-words, and country adventuring, the mysteries of the dark attic and the delights of a playhouse in the trees are the golden legends of life, by the author of "The Little Grey House," "Six Girls and the Tea Room," and "The Daughters of the Little Grey House." The volumes of this new series are illustrated in color and black and white by Anne Merri-man Peck. **AT GREENACRES, THE QUEER LITTLE MAN, THE BOTTLE IMP, and POPPY'S PLUCK,** Illustrated throughout and with Color Jackets by E. R. Higgins, Each, net, \$1.50

Illustration from "Plotting in Pirate Seas."

THE BOY JOURNALISTS AROUND THE WORLD SERIES

Francis Rolt-Wheeler

Every boy and girl with a spirit of adventure will want to follow the adventures of Stewart Garfield fighting the mysterious plot which began with his father's disappearance in the West Indies, will want to go with him to hunt treasure in the Andes. **PLOTTING IN PIRATE SEAS, Volume I, HUNTING HIDDEN TREASURE IN THE ANDES, Volume II.** Illustrated in Black and White, with Full Color Jacket by C. A. Federer. Each, Net \$1.50

THE ROMANCE HISTORY OF AMERICA SERIES

Francis Rolt-Wheeler

History more wonderful than any fairy tale—more interesting than any piece of fiction. That is the idea which prompted the writing of this series. The first volume is a fascinating story of the making of this continent from the dawn of the world down through the ages of continental convulsions. The second book tells of the arrival of the white man in America.

IN THE DAYS BEFORE COLUMBUS, Volume I, THE QUEST OF THE WESTERN WORLD, Volume II. Illustrated in Black and White, with Full Color Jacket by C. A. Federer. Each, Net, \$1.50

Illustration from Jack-in-the-Box Books

Selected STOKES Books You Will Want in Your Library

MR. PUNCH'S HISTORY OF MODERN ENGLAND

In Four Volumes: Volumes I and II now ready; Volumes III and IV in Spring, 1922

England's history drawn in its essentials from the pages of the world-famous *Punch*. A presenting of events *as they happened day by day*, a mine of information on the manners, customs and fashions of the Victorian age—literally a history of the Victorians written by themselves—your history shelf will be incomplete without it. Order by set only. Volumes I and II will be sent you at once. Volumes III and IV next Spring. Remit for the entire set with order, or for two volumes now (\$10) and for two in the spring (\$10).

AN ARGOSY OF FABLES

Edited by **FREDERIC TABER COOPER**
Illustrated by **PAUL BRANSOM**

The only comprehensive collection of fable literature available. From the rich fund of original material and the best translations the fables have been carefully selected, translated or edited and arranged in historical sequence. The impressive beauty of the twenty-four full page color plates by Mr. Bransom combine with the text in a truly important achievement. *Cloth, 4to, boxed, net \$7.50. Autograph edition, 365 copies, signed by Mr. Bransom, \$25.00.*

Stokes' Books for Young People

DAYS OF THE DISCOVERERS

By **L. LAMPREY**

Events in the period of great discoverers vitalized by the use of new material and put into story form woven about historical characters. The author, seeing the events through the eyes of boys and girls who lived in the times pictured, is strictly accurate as to fact and succeeds in creating a true-to-life historical atmosphere. This is the first volume in the "Great Days in American History" Series. With 4 illustrations in color and 11 in black-and-white by FLORENCE CHOATE and ELIZABETH CURTIS. *Cloth, 8vo, net \$2.50.*

THE CHINESE FAIRY BOOK

By **FREDERICK H. MARTENS**

The most comprehensive and varied collection of oriental tales ever made available for American readers—seventy-three stories of fresh charm and infinite variety. *With 6 illustrations by George Hood. Cloth, 12mo, net \$2.50.*

THE SWEDISH FAIRY BOOK

By **FREDERICK H. MARTENS**

Tales from the best original sources of Swedish folklore, in the simple, naive manner which the traditional rendering demands. *With 8 striking illustrations by George Hood. Cloth, 12mo, net \$2.50.*

A POPULAR SCHOOL GIRL THE PRINCESS OF THE SCHOOL

By **ANGELA BRAZIL**

Stories that combine the busy, happy life of every day with the excitement of special schoolgirl adventures in a wholesome, natural way. *Each, illustrated, cloth, 12mo, net \$1.75.*

PRINCE AND ROVER OF CLOVERFIELD FARM

By **HELEN FULLER ORTON**

True-to-life stories of the busy, happy life of an old-fashioned home on a farm, told and retold by a mother to her little boys until they begged that she write them down for other children to read. *With 8 full-page illustrations and chapter head-pieces in two colors. Cloth, 8vo, net \$1.00.*

Marshall Jones Juveniles

A DAY IN A COLONIAL HOME

By DELLA R. PRESCOTT
 Edited by John Cotton Dana

An account of a successful experiment in the New-ark, N. J., Library in arousing interest in the home. It is no exaggeration to say that every library should have copies. \$1.25

THE STORY OF JESUS

Compiled and arranged
 By ETHEL NATHALIE DANA

Containing forty five-color reproductions of paintings by Italian Primitives and Bible text. Generally recognized as the best available influence in creating a lasting impression of Christ's life on the minds of children. Price, \$16.50
 Unbound sheets, \$15.00

INKLINGS FOR THINKINGS

By SUSAN HALE
 (Sister of Edward E. Hale)

An unusual book for little children. A photographic reproduction of the original manuscript written in 1863. Useful in helping children to draw. Illustrated. \$2.00

THE PILGRIM SPIRIT

By GEORGE P. BAKER

Written for the Pilgrim Tercentenary Commission and produced at Plymouth. Valuable from its historical and patriotic standpoint. Widely used by schools. Over 17,000 copies sold within four weeks from publication.

Illustrated edition, cloth, \$1.50; paper 50 cents

UP THE MAZARUNI FOR DIAMONDS

By WILLIAM J. LAVARRE

Introduction by Anthony Fiala

An interesting account of travel and adventure in a little known section of South America by a veteran scout who has just returned from a second trip in the same region. Of permanent library value.

Illustrated. \$1.50

GUS HARVEY, THE BOY SKIPPER OF CAPE ANN

By CAPT. CHARLTON L. SMITH

A good sea and boat-building story that every boy likes. Glossary and illustrations, wholesome and in every respect a desirable book. \$1.65

MARSHALL JONES COMPANY, (Publishers) 212 Summer Street, Boston

PUTNAM'S' LIBRARY DEPARTMENT

OFFERS ALL LIBRARIES AN OPPORTUNITY TO SECURE
ALL BOOKS OF ALL PUBLISHERS
 FROM ONE SOURCE.

Being the only American house handling library business that has its own London branch store, English books are supplied as easily as American, and *duty-free*.

FREDERICK WARNE & CO., LTD.
26 EAST 22nd ST. NEW YORK CITY

NEW BOOKS FOR OLD

One expensive picture book will do the work of two or three if worn-out copies are rehabilitated in our Children's Scrapbooks. Price 17c up. Write us or see catalog No. 24 for particulars.

GAYLORD BROS., Syracuse, N. Y.

Chivers' Bindings

For more than thirty-five years we have continuously bound **NEW** and **OLD** books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply **NEW** books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

FIVE

New *Volland* Books Good for Children

MOTHER GOOSE—*New Popular Edition*

Paintings by Frederick Richardson

A charming new popular priced edition of the famous Volland MOTHER GOOSE, with twenty-four of the same imaginative color illustrations by Frederick Richardson. Page after page of the beloved rhymes, strikingly decorated, with cover and end-sheets in full color—sturdily bound, for hard everyday use—with an authoritative foreword by Eulalie Osgood Grover. In a handsome gift box... Price \$1.35 each, net.

AMERICAN INDIAN FAIRY TALES

Compiled by W. T. Larned. Illustrated by John Rae

W. T. Larned, after months of research into their enchanting lore and traditions, has gathered the best of the American Indian Fairy Tales into this Volland Book, and John Rae, illustrator of FAIRY TALES FROM FRANCE, has made them live again in pictures that glow with the primitive colors of the race. Bound in boards. In an artistic gift box Price \$1.35 each, net.

THE CHRISTMAS STORY—*The Ideal Christmas Gift*

From the Bible. Illustrated by John Rae

The simple, beautiful story of the first Christmas, told in the exact words of Luke and Matthew, in either version: Douay (Catholic) or King James (Protestant). Exquisitely illustrated in full color by John Rae, illustrator of AMERICAN INDIAN FAIRY TALES. It is a gift book of universal appeal to parents, children, relatives, friends and mere acquaintances. Presented in a colorful gift box. Price \$1.00 each, net.

EDDIE ELEPHANT—*A New "Sunny Book"*

Written and illustrated by Johnny Gruelle

Here is another Volland "Sunny Book" by the creator of RAGGEDY ANN and RAGGEDY ANDY and THE LITTLE BROWN BEAR. It is a gem of juvenile story and illustration by that whimsical genius, Johnny Gruelle. In full colors and packed in a handsome gift box..... Price 75 cents each, net.

TALES OF LITTLE DOGS—*Another New "Sunny Book"*

By Carrie Jacobs-Bond. Illustrated by Katherine Sturges Dodge

A companion book to the famous "Tales of Little Cats," by the same author. Charming verses on dog playmates, with a merry musical swing. With full page illustrations by Katherine Sturges Dodge, who painted the pictures for "How Sing Found The World Was Round." Like all of the other Volland "Sunny Books," it is printed artistically, bound substantially, decorated in full color and tucked in an attractive gift box Price 75 cents each, net.

Brownies wash their hands quite clean,
 A dirty book they've never seen.
 Brownies do not show their greed
 By eating candy when they read.

Brownies do not mark their books,
 For this they know would spoil their looks.
 Brownies put their books away;
 They find them on the shelf next day.

Copyright.

By **MARY DOUSMAN**, Children's Librarian, Milwaukee Public Library.

Printed in black on a soft tan cover paper, 14x22 inches. Hand-colored, like Miss Dousman's original, it makes a most attractive and valuable poster for the children's room.

Uncolored.....50c Hand-colored.....90c

You'd think a child was sub-normal if he didn't like Brownies, wouldn't you?

If you haven't one of these posters for your Children's Room, you'll want one of course.

THE LIBRARY JOURNAL

TWICE-A-MONTH

OCTOBER 1, 1921

Some Children's Librarians

By R. R. BOWKER

WHAT would Mother Sanders think if, within half a century after the beginning of her work with and for children, she could re-visit in spirit an A. L. A. conference of these later years? Here she would witness the Children's Library section in full vigor of operation, with more to talk about than there was time to talk in and larger than the A. L. A. conferences of her time. She would see hundreds in attendance, a large proportion of them graduates of library schools, which did not even exist in her day! Happily, Miss Hewins is still with us to rejoice in the progress that has been made since her own pioneer work helped to set the pace. From the early work of these two, as has already been recorded in the LIBRARY JOURNAL, has arisen the remarkable development thru the American library system of work with the children, work emphasized as even more important than that with adults, because it looks forward toward the future instead of reminiscing of the past or limiting effort to the present. A full generation indeed has passed since the early work, so that, as in the experience of Mrs. Root at Providence, some of those who enjoyed the benefit of library facilities in their childhood days are now "grown ups." Indeed fathers and mothers rejoice in the help and stimulus which they had and therefore are the more anxious that their own children should have the full benefit of the newer facilities which have come with the new times.

There are now-a-days few libraries in our cities which have not children's rooms and many of the rural libraries are not far behind in their work for children. Pittsburgh developed years ago a library school for children's librarians, Cleveland has the honor of the first branch devoted especially to children, in the charmingly remodeled house with its grotesquerie furnishings and reminders of fairy tales so pleasant to children, and Brooklyn boasts the initial Carnegie building built exclusively for children's use in the Brownsville Branch

which duplicates the branch library in the same Yiddish district which the children have now left to the adults.

The New York Public Library has in its Central Building, its forty-three branches and six substations forty-eight children's rooms each under charge of a children's librarian, so that Miss Annie Carroll Moore as supervisor of children's work represents in a single person over a hundred children's library workers. Incidentally it may be said that she has taken over some of Miss Plummer's relations in the continuing intimacy with the "fairy godmother" Miss Shedlock whom Miss Plummer induced to come to this country from England to tell fairy stories to American children in our libraries and for whom Miss Moore has in turn stood as godmother. When Miss Shedlock departed for the home country last year it was Miss Moore who freighted with tokens of good wishes the fairy ship which was presented to Miss Shedlock as testimony of the esteem in which children's librarians and children themselves remembered her and her work. Miss Moore graduated from the Pratt Library School in 1896 and with the exception of her work for children in the Pratt Institute Library from 1896 until 1906 all of her 25 years of library work have been spent in the work with children of the New York Public Library. Incident to that work she has done many good things of a special nature in addition to her co-operation with Miss Shedlock, as her organization of the lectures on children's literature given in the N. Y. P. L., her promotion of the library development in Miss Anne Morgan's work for the devastated regions of France when she made it possible for Miss Greene and Miss O'Connor to undertake pioneer work there, and in the book which gives the results of her experiences, "Roads to Childhood," published last year by G. H. Doran.

Brooklyn comes second only to Manhattan, in Greater New York and thruout the country in having in its thirty-four branches and sta-

tions thirty-two children's rooms all under the supervision of Miss Clara Whitehill Hunt as superintendent of the Children's Department. Miss Hunt had no sooner graduated from the New York State Library School in 1898 than she began to devote herself to this specialty of children's work in the Apprentices' Library in Philadelphia. Dr. Hill, however, immediately commandeered her in October, 1898, for like work in the Newark Public Library and in 1903 Brooklyn having robbed Newark of its head, he in turn brought Miss Hunt to the Brooklyn Public Library where in the 18 years she has developed the children's work from a start at zero into one of the foremost features of this library system, culminating in the opening of the Brownsville Children's Branch in 1914. Miss Hunt has been recognized as one of the foremost authorities of the A. L. A. in the Children's Library section and in 1913 gave to librarians, teachers and parents the benefit of her experience in the little manual "What Shall We Read to the Children" published by Houghton Mifflin Company in that year. Miss Hunt has also, besides contributing on library and educational topics to the professional journals, done not a little literary work directly for and about children as in "About Harriet" and "The Little House in the Woods."

CLARA WHITEHILL HUNT

EFFIE LOUISE POWER

The work with children in the Boston Public library was started by Herbert Putnam immediately after the opening of the present building in 1895. Hence, the children's room there is one of the oldest in the country and celebrated its twenty-fifth anniversary last year. Miss Alice M. Jordan has been identified with the room since 1902 when, because of previous teaching experience and work as a reference assistant, she was asked to undertake this special form of library service. She admits entering upon it with reluctance, feeling that the reference department offered greater interest and opportunity, a feeling early abandoned. First as chief of the Children's Department, and later as supervisor of the work with children thru out the library system, Miss Jordan has built up this side of the activities of the Boston Public Library, aiming to connect it with the other educational forces in the city and make it a strong factor in the lives of boys and girls. To-day there are thirty-one centers making provision for the youth of the community and these with the schools having class-room libraries and certain other institutions, make a total of two hundred and thirty-six points of contact between the Public Library and children. With the enlargement of school work thru class in-

ALICE M. JORDAN

struction and thru direct association with parents and teachers have come the removal of the age limit and the establishment of story telling as a library function. Miss Jordan has long been on the Literature Committee of the National Congress of Parent-Teacher Associations and prepared for it a list of "One Thousand Books" which is published as a document of the Bureau of Education. Beside training assistants needed by the Boston Public Library for children's work, Miss Jordan has for a number of years given the course at Simmons College in work with children and has lectured at the Library Schools in Pittsburgh and New York.

Providence has had the good fortune of enjoying the services of Mrs. Mary E. S. Root ever since the beginning of its children's work more than twenty years ago. She studied art before her marriage but devoted herself to the study of children's literature after the birth of her two children, one of whom is now a graduate of the New York State Library School. She organized the Children's Room in 1900 when children's libraries were few and aids to book selection fewer so that she had to try out things for herself. In her service for the Playground Association she picked up two important facts:

one that the library was near a ward in which juvenile delinquency was greatest; the other that there were so many bookless homes in the city. This led her to emphasize the importance of class-room visits to the library and it can now be said that each child in school in Providence is brought to the library by the teacher at least once in every year. She has had the felicity of finding what this library work has meant in practical outcome. One little chap who began with fairy tales, turning thence to the Iliad and Odyssey and Greek myths, found his vocation when Mrs. Root acquainted him with Norse folk-tales and brought out from the stack William Morris' "Sigurd the Volsung." Since he graduated from Brown and refused an offer as instructor he has made his way to Norway on the urgency of the Scandinavian Foundation and is devoting himself to the study of Scandinavian literature. Another early reader who was much interested in books on electricity is now at the head of an educational film company and recently suggested the desirability of a film showing "What a Library Meant to Mr. Man," starting with the first experiences in the children's room. Mrs. Root has done her bit in most of the welfare associations in Providence but is most proud of her service as chairman of the Recreation Committee in the Child Welfare exhibits organized after the war. She started the summer courses on children's work in the Simmons College Library School, delivered last year at Yale

MARY E. S. ROOT

an instructive lecture on the subject and has been especially useful in giving practical illustrations when she visited other libraries of her method of training children in the use of a book, by catechising them as to what are table of contents, index, etc., and how to find this or that in the library. She has always worked out lines of her own which her colleagues have found a most useful pattern and inspiration.

Cleveland and its public library have a loyal daughter in Miss Effie Louise Power who has returned from flights afield to her home for increasing opportunities of usefulness. She began her library career in 1895 as apprentice in the Cleveland Public Library and of course owes her inspiration to that chief of beloved memory William Howard Brett, the best of men in endowing all his associates with loving affection for their calling. After a brief period as school librarian of the Central High School of Cleveland she returned to take charge of the so-called "Juvenile Alcove" under Mr. Breet's supervision and encouragement, opening the first children's room and thus becoming the first children's librarian in the Cleveland system. In pursuing her development in this special field she became a member of the staff of the Carnegie Library at Pittsburgh and after attendance at its library school for a year was given its diploma in 1904. For a while she was the head of the children's department in the St. Louis Public Library, a position which she has also occupied at Pittsburgh where in later years she has been a member of the faculty of the library school. She performed a further service for her adopted place in acting five years as instructor in children's literature in the Cleveland City Normal School. Relinquishing her Pittsburgh relationship she is now Director of children's work in the Cleveland Public Library where she initiated the work in the old days. She has had a wide experience in lecturing to library schools in every part of the country and has been especially successful in developing work with public schools. She has been President of the Library Department of the National Education Association and chairman of the Children's Section of the A. L. A. She is the author of "How the Children of a great City get Their Books" and a handbook on story-telling. Thus school and library are equally indebted to the inspiration which she received from Mr. Brett and has in turn kindled in the newer generation.

This article dealing with pioneers in the Eastern field is to be continued in a second paper on other children's librarians, chiefly in the West.

Children's Book Week Club Program

THE following suggestions for a Club Program to be used during Children's Book Week, November 13th to 19th, have been sent out by Mary Lemist Titcomb, chairman of the Division of Library Extension of the General Federation of Women's Clubs.

1. Poems children love.

Coleridge. Kubla Khan.
Whittier. Barbara Frietchie.
Riley. The Name of Old Glory.
Scott. Lochinvar.
Browning. The Pied Piper of Hamelin.
Byron. Night Before Waterloo.

Note: The above are merely suggestive. If possible have this subject covered by a mother who can tell from personal experience her children's favorites.

2. Robert Louis Stevenson, born November 13th.

- (a) A short sketch of life.
- (b) Books which the children like:
Kidnapped.
Black Arrow.
Child's Garden of Verse.
Treasure Island (Illus. by Wyeth).
Prince Otto.

3. Children's books of an older generation.

- (a) Tuer—Pages and Pictures from Forgotten Children's Books.
- (b) The New Boy and the Old Book. (*Literary Digest*, vol. 67, Dec. 2, 1920.)

4. The Book Beautiful.

What has been done in the making of books for children. Examples from editions illustrated by Arthur Rackham, N. C. Wyeth, Charles Robinson, Maxfield Parrish, Howard Pyle, Jessie Willcox Smith and others.

5. Louisa May Alcott, the Alcott Home and the Alcott Books.

6. The books my children choose themselves:

- (a) Books the boys choose.
- (b) Books the girls choose.

7. How shall I choose my children's books?

Lowe, O. Literature for Children.
Moore, A. C. Roads to Childhood.
Olcott, F. J. Children's Reading.
Hunt, C. W. What Shall We Read to the Children.

8. The story hour, a pathway to the book.

Bryant, S. C. How to Tell Stories to Children.
Wiggin and Smith. The Fairy Ring.
Lyman. Story telling: What to Tell and How to Tell It.
Olcott, F. J. Books of Elves and Fairies.
Houghton, L. Telling Bible Stories.

It is not expected that an entire afternoon will be given to the discussion of children's reading, and consequently a variety of topics is presented for choice.

MARY L. TITCOMB, Chairman, Division of Library Extension, General Federation of Women's Clubs.

FREE ON REQUEST

The Birmingham Public Library has a run of the Birmingham News, January, 1919, to March, 1920, lacking September and November, bound by months, 13 volumes in all, which it will give to any library willing to pay transportation charges. Address: Reference Department, Public Library, Birmingham, Ala.

The Carnegie Library School—A Bit of History

By ELVA S. SMITH

Cataloger and Annotator of Children's Books, Carnegie Library, and Instructor in the Carnegie Library School, Pittsburgh

THE full importance of library work with children is just beginning to be realized; the opportunities for its development, at home and abroad, are greater in number and more varied in character than ever before; but the supply of trained workers has not kept pace with the increasing demand and the number of children's librarians available at the present time is quite inadequate for the needs. If these conditions continue to prevail, standards of service will be materially lowered and the quality of children's work must inevitably deteriorate. This disparity in supply and demand has naturally directed attention, not only to the necessity of attracting recruits to this form of social work, but also to the existing facilities for training.

The Carnegie Library School was the first to enter the field and for twenty years it has specialized in the training of children's librarians. For its origin one must go back to the early history of the Carnegie Library of Pittsburgh. In the eighteen-nineties work with children was a new phase of the public library movement and no special provision for young people was made in the original building; but in February, 1896, a few months after it had been opened to the people, one of the rooms designed for periodicals was transformed into a children's reading-room and in April, 1898, a separate department was created for the purpose of organizing and systematizing the children's work. Development was amazingly rapid. New children's rooms were opened, reading circles formed, and story-telling introduced as a library method. Collections of books were sent to the schools and playgrounds, and home libraries and clubs started in sections of the city not easily reached by the other agencies established.

To carry on these varied activities, trained workers with children were urgently needed, but they were not available. As an experiment, the library turned for its supply of children's librarians to the Pittsburgh and Allegheny Kindergarten College. This innovation was an improvement over the employment of untrained assistants, for the kindergartners were original, resourceful, and accustomed to dealing with children; but they lacked a knowledge of technical library methods and of children's literature. It was evident that some other provision

must be made for the future needs of the rapidly expanding department and so, in October, 1900, a training class was organized, five students being selected from the twelve applicants. Other libraries were quick to recognize the value of special training for the new line of work and they began to apply for students to fill positions. Thus the Training School for Children's Librarians came to birth and began its first year as an organized school in September, 1901, with a class of thirteen.

The chief assets of the new school were the recognition of the immediate need, a vision of great and far-reaching possibilities, "library spirit" in fullest measure, and unlimited enthusiasm. It had no separate quarters of its own, no special funds except the small amount received for tuition fees, and only a very meager equipment. The library had outgrown its building within two years of its opening and the lecture hall was the only space available for the students. Individual desks and a small table transformed one end into a makeshift study and class room, at least for the hours when it was not in use for public lectures or entertainments. As the room served also for overflow exhibits from the Carnegie Museum, the earnest student might ponder upon the mysteries of the human frame, or study the intricacies of the muscular system, by way of diversion, when catalog problems were particularly perplexing. At the other end of the long room was the desk of the assistant director, ever ready to give needed information, reassure the timid as to the safety of the "incline" or direct the student, bewildered by the strange and unaccountable topography of Pittsburgh, to Mulberry Way or Negley Run. As a by-product of the training, one acquired a knowledge of the city scarcely equalled by that of the Oldest Inhabitant.

Being a pioneer in a specialized field, there was no well-trodden path to follow and the new school had, perforce, to blaze its own trail. In addition to a knowledge of library technique, it was obvious that a competent children's librarian needed sympathy with children, ability to deal with them individually and in groups, a knowledge of children's books, and an understanding of the educational and social agencies with which she must needs co-operate; but the best methods of approach, the comparative values of different studies, and the proper correlation of

separate courses could only be determined by experience. The first curriculum was, necessarily, experimental in character. The instruction in technical subjects and library methods was carried on by the heads of departments and branch librarians, who gave generously of their time and knowledge that the new undertaking might be a success. Other lectures were given by the faculty of the Kindergarten College and the course for the first few years had a strong tinge of Fröbelism. Every stray bit of philosophy that chanced to come one's way, any quaint morality encountered in one's reading was sure to find a place, sooner or later, in a "Mother Play" abstract. As for the intellectual joys of "The Education of Man," these were reserved for senior and special students.

According to early library school pedagogy, knowledge might be a treasure, but practice was the key to it; and the lectures were therefore supplemented by actual experience gained in the different library agencies, each student being required to give twenty-one hours of work weekly, a total of eight hundred and forty hours for the first year of training. This practical mode of teaching or "glorified apprentice course" was necessitated at first by financial conditions; the work serving as compensation to the library for the time given to the class by members of its staff, but great stress was laid upon its value for the student also. Perhaps the large amount of time was a hardship; but, if so, the pioneer classes were too much in earnest, too interested and enthusiastic to realize it, and the plan had certain definite merits. Students worked out their own salvation, as emergencies arose in home library, club, or deposit station, thus developing initiative and self-reliance. Moreover, they became a real part of a remarkably live institution, were brought into close contact with those who were formulating its policies and shaping its course, and acquired from the first a personal responsibility for their work and a professional attitude toward it.

In the intervals of lectures, problems and practice, there were "Games" and "Occupations" and an appalling list of books to be read. Incidentally, also, one must strive to master the much-to-be-desired "library hand"; but painful recollections of weekly copies to be written long after one's associates had acquired that useful accomplishment forbid more than a passing mention. Proficiency in the art of typewriting and in the making of picture bulletins was also considered highly desirable. For general culture and to counteract the influence of an immoderate number of children's books, there were University Extension lectures, not then an "elective;" and the proper community spirit

was inculcated by required attendance at various educational and civic gatherings. Certainly all reasonable precautions were taken to prevent the prospective librarians from getting the "cameelious hump" that comes "from having too little to do."

It is unnecessary to follow the history of the school in detail; but a few milestones, here and there, along its way of progress may well be noted.

In 1903, Mr. Carnegie, who had become interested in the work, asked to be permitted to contribute to its support. His generous gift enabled the school to provide needed books and supplies, to recompense its teaching staff, and to supplement its regular courses by additional lectures by prominent librarians, educators, and other social workers. This financial aid was continued until in 1916 it became a department of the Carnegie Institute, a separate but affiliated institution, endowed by Mr. Carnegie for educational purposes. At this time the name was officially changed to Carnegie Library School and an increased endowment was granted, but it remained under the direction of the Director of the Library as before.

During the period of rebuilding in 1905 and 1906 the school led an itinerant existence, at one time finding a temporary home in the basement of an apartment house, at another occupying the upper balcony of Carnegie Music Hall. Not until February, 1907, did it have suitably equipped rooms of its own. With the increasing number of students these quarters soon proved inadequate, and in 1917 a new study hall and class room were provided on the second floor of the library building. A student house was opened in 1907 and has been maintained ever since.

An interesting feature of 1907 was an exhibit prepared for the Social Economy section of the Jamestown Exposition. It consisted of photographs, placards, and other material illustrating library work with children in Pittsburgh and other cities, and won for the school a gold medal. The jury also awarded a bronze medal for its installation. The exhibit not only attracted attention to the library school and the opportunities for training which it offered, but it aroused interest in the children's library movement and gave to many people a new conception of its meaning and its educational value. Librarians, school superintendents, supervisors of education, directors of museums, and students interested in economic problems—people from all parts of the United States and many foreign countries—visited the booth and took away printed matter. Talks on children's work were given by the assistants in charge and free story

hours held for the children visiting the Exposition or attending schools in the neighboring towns. One international story hour included the little Greeks, Syrians, Egyptians, Hungarians, Filipinos, French, Japanese, Indians and Eskimos on the grounds. A similar exhibition of local work at the Western Pennsylvania Exposition held in Pittsburgh not only advertised the school, but gave the people of the city a better idea of what the library was doing thru its different branches and other agencies.

Space does not permit mention of the names of all those who at different times have been numbered among the faculty of the school and have thus contributed to its success; but among the prominent librarians who have been identified with it for a considerable period are E. H. Anderson and Frances Jenkins Olcott, to whose initiative and foresight the school owes its origin; Henrietta St. Barbe Brooks and Marion A. Knight, who first organized the technical courses in cataloging and classification; Jessie Welles, for many years instructor in the principles of lending systems; and Elisa May Willard, whose inspirational lectures on reference work will long be remembered by her students. A later group includes Harrison W. Craver, Sarah C. N. Bogle, Effie L. Power, Margaret Mann, and Bertha T. Randall.

As the years passed, the scope of the work was broadened. Students had always been trained for school positions as well as for assistants and heads of children's rooms or departments; but the increasing demands for librarians prepared for specialized work in high schools and normal schools led, in 1917, to the addition of a separate course for school library work. In 1918 a one-year course in general library work was added and the following year, by co-operation with the Carnegie Institute of Technology, the school was able to offer for the first time a four-year course leading to a degree. According to this plan, the instruction for the first three years is under the direction of the Institute of Technology, those subjects being presented which are considered to give the best general preparation for library work. For the fourth year, students may elect any one of the three courses given by the library school. In 1920 a similar arrangement was made with the University of Pittsburgh.

Tho the course in library work with children has also been altered and expanded from time to time, the present curriculum is based upon the inheritance of the past and the fundamental principles have remained unchanged. The child, the book, the library, and the community are still the foci about which instruction centers; but subjects which experience proved to be non-

essential have been eliminated, important courses correspondingly strengthened, and additional lectures included to keep pace with changing conditions in libraries and new developments of the work. Class instruction is still supplemented by required practice work in different departments of the library, but the financial independence of the school makes it possible to arrange assignments with special regard to the individual needs of students and the amount of time has been reduced to three hundred and forty-five hours.

Education does not insure infallibility, and no one will claim that it is possible in a one-year course to give all the training, general and special, theoretical and practical, that might be desirable; but, on account of the great demand for children's librarians who had completed one year of work, not many were left to take an advanced course. The expenditure of time was great in proportion to the size of the class, and in 1918 it seemed advisable to discontinue the senior work until conditions of library service were such as to warrant its reinstatement. Many of the lectures, however, were incorporated into the revised one-year course.

The number of students that could be accepted has sometimes in the past been limited by the lack of sufficient accommodation, entrance requirements have been raised from time to time, and personal fitness has always been considered an essential qualification. Registration has, therefore, never been large; but it continued to increase until 1917, the banner year of enrollment, when forty-three students were registered. The conditions brought about by the European war adversely affected library schools as well as other educational institutions and have resulted in a decreased enrollment for the last three years. The number of those actually receiving instruction has, however, always been much larger than the registration would indicate. Before the addition of the course in general library work, technical lectures were open to members of the library staff and special courses have in later years been arranged for their benefit. Visiting lecturers have also given fresh interest and inspiration, not only to the students and staff in Pittsburgh, but to the librarians and assistants in the libraries of adjoining towns, and an occasional "teachers' evening" has brought a large representation from schools and social organizations to listen to some prominent speaker.

But the influence of the school has been spread far beyond its immediate neighborhood by the children's librarians whom it has sent into the field. They have been an important factor in the development of children's work in

different sections of the United States and in Canada and have helped to introduce American library methods into Norway, Denmark, France, and other countries. Whether they have held important administrative positions, taught in training classes and library schools, organized high school and normal school libraries, or specialized in story-telling or in some other line, they have carried into their work high ideals of social service and fine professional standards. The total number of graduates is now three hundred and ninety, of whom two hundred and thirty-six are still engaged in library work. The school may well look with pride upon their achievements and rest its reputation upon what they have accomplished.

Foreign Periodicals of 1922

THE time to place subscriptions to foreign periodicals for 1922 is now near at hand. Librarians in the habit of using their budget money to the best advantage have but a very simple rule to remember. Any journal published abroad can be had delivered regularly at one's door for the price named thereon, converted into American money at the current rate of exchange, plus 10% commission.

At the moment this means (including commission):

For England	about	20	cents	a	shilling.
" France	"	8	"	"	franc
" Italy	"	5	"	"	lira
" Spain	"	14	"	"	peseta

In the case of Germany the same rule holds, tho it is to be remembered that the price to the United States is twice the domestic price (see the Committee's bulletin in the LIBRARY JOURNAL of June 1). With the mark hanging round a cent, German periodicals can thus be had for about 2 cents per mark of the domestic price. A handful of publishers charge more; two handfuls charge less. The great majority follow the rule above given.

Heretofore such terms could be had only in direct dealing with the several countries involved. Now, however, at least one firm in America announces its readiness to supply at the desired rate—a daring offer (see the LIBRARY JOURNAL, Sept. 1, p. 702). The last barrier falls.

In this connection, an error in the Committee's bulletin of June 1, repeated in its annual report, is to be recorded. It was stated that under the new regulations German "publishers may employ the domestic price if a bill totals more than M. 300." For "bill totals" read "volume costs."

A supplement to the Catholic Encyclopedia has been announced. Unfortunately two editions of this circular are in the field. They differ in a sentence, but it is an important difference. One says,

"It will also duplicate the original work in material, make-up and mechanical finish, in paper, press-work, maps, numerous fine illustrations, binding, and in form; but in size it will exceed the present volume by about 200 pages."

The other says,

"It will also duplicate the original volumes in material, make-up and mechanical finish, press-work, maps, numerous fine illustrations, binding and form; printed on bible paper it will bulk less in size, though it will number about 200 pages more."

The publishers state that these two paragraphs were meant to convey the same impression, since most of the sets sold were printed on thin paper. However, in view of our stressing the unsuitableness of bible paper for reference works, and because of the Britannica's agreement to an ordinary paper edition of its Supplements, the publishers write that "if the libraries in ordering the Supplement of the Catholic Encyclopedia insist on getting heavier paper, and if enough of them order it, no doubt this Company would take into consideration an edition printed for them on heavier paper."

Libraries should make known their wishes promptly to the Encyclopedia Press, Inc., 119 E. 57th St., New York City.

"THE ONLY REAL READERS"

"As a writer of books it is my opinion that children, or at least young persons, are the best readers; indeed, the only real readers. Grown-up adults are badly damaged. They read in an inattentive way, with no real effort of mental power to fuse the picture before them into the white heat of imagination. They read and forget. They would pass by Weller and never see him. They would forget Huck Finn's name overnight. Their judgments are the standard of education and their admiration lies dead in the grave of their childhood. For real literary success let me tell a fairy story to the listening ears and the wondering face of my little son of four."—STEPHEN LEACOCK

The Third Annual Children's Book Week

November 13-19, 1921

“**M**ORE books in the home” means better reading by children in the library. The children's librarian who studies the problem of selling children's books to grown-ups understands more intelligently some phases of her work in the library. It is worth while to take part in this movement which should grow every year.” Thus wrote a prominent librarian in his report to the Committee of Children's Book Week, 1920. His prophecy was true, for the circle of organizations and individuals taking part in this national concentrated attention upon boys' and girls' reading has widened amazingly and even now a greater expansion in 1922 can be foreseen. Canadian librarians and booksellers, perhaps inspired by the Toronto Children's Book Week of many years' success, are having a Dominion-wide Children's Book Week this year, simultaneous with the Week in this country.

One of the most notable features of the 1921 Week is the gift to the Committee of the design of Thomas Bailey Aldrich's book case, which is mentioned in “The Story of a Bad Boy” and now hangs in the Aldrich memorial, the Nutter house at Portsmouth, N. H. Mrs. Aldrich has graciously allowed the design to be duplicated so that librarians and booksellers can use it to encourage boys to build bookcases for their own personal libraries. A “home” bookcase hung in the children's or open shelf department filled with “A Library for a Boy's Room” or “A Library for a Girl's Room” will attract attention, invite comparisons, and inspire personal libraries. Book case making contests can be arranged with the co-operation of manual training classes.

Last year many librarians spoke before local women's club meetings on the subject of children's books. In some communities, a special “Club Day” in the library was a feature of the Week. This year further co-operation will be possible because of a club program outline for Children's Book Week prepared and sent out to clubs by Miss Mary L. Titcomb, Chairman of the Division of Library Extension, General Federation of Women's Clubs, and printed elsewhere in this number. Librarians will be able to collect reference material on the subjects suggested, and on other allied subjects, and make them easily accessible to local clubs. Exhibits of children's books recommended as gifts are often effective if placed at a club meeting, in charge of the children's librarian.

The National Board of Review of Motion Pictures, 70 Fifth Avenue, New York, has prepared

for the use of those working for the Week a list of “Films well made, drawn from books for boys and girls.” Undoubtedly the interest of children in motion picture versions of books can be drawn to the books themselves and to other books on like subjects. Librarians can co-operate with exhibitors in getting and advertising these films, and in advertising Children's Book Week. The Newark Public Library last year prepared a colored slide announcing Children's Book Week, using a reproduction of the Jessie Willcox Smith poster, which was shown by exhibitors all thru the Week.

The first day of the Week this year falls on the birthday of one beloved by children—Robert Louis Stevenson. Exhibits of his books and talks about his life will have a special interest.

The best means of getting co-operation of local organizations is thru definite suggestions of how they may take part in calling attention to children's reading. The schools are realizing more and more that closer connection must be established between instruction in reading and stimulation to the reading habit. Talks in the schools by authors, story hours and book talks by children's librarians, plays and tableaux based on book characters (like the “Friends in Bookland” prepared by the New Jersey Library Commission, “The Magic Gift” used in the Louisville, Kentucky, Library, and “A Night in Bookland” given in the Endicott, N. Y., library), contests in book case making and in poster and book-plate designing—these things dramatize the subject of reading, and in the hands of wise teachers can be used to turn children's interests to books themselves. A Philadelphia school principal wrote about the Week a letter which might well be used as a text for other schools.

“A taste for good books is being formed as the result of the reading of prose literature for appreciation in our new course of study in English. All during the fall we have been urging our pupils to spend the long evenings reading good stories from the Public Libraries. On the first day of Book Week I again presented the subject and asked how many had a book borrowed from the library, how many read one story book a week and two stories a week. I asked how many owned a good book and I was not surprised to find that very few did. Then I told them of the joy to be gotten from the possession of good books and I spoke enthusiastically of my own library. The English teacher in the Departmental classes hung the poster in her room and did splendid ‘follow up’ work with her classes as did also the Sixth Grade teachers. The teachers gave good advice as to the selection of the books and urged their pupils to bring the books they purchased to school so that all might see them. They not only brought in

their books, but they told where they had purchased them and how much they had paid for them.

"We have kept the subject so alive that at least eighty-five per cent of our sixth, seventh and eighth grade pupils are now collecting a library. The individual libraries number anywhere from one to seven books.

'Dreams, books, are each a world, and books, we know
Are a substantial world, both pure and good,
Round thee, with tendrils strong as flesh and blood,
Our pastimes and our happiness will grow.'

One of the boys had five books for his shelf and the other had seven.

"If you knew the homes from which our children come and the absence of reading habits among this group of people, you would understand why we are so happy over our success and you would rejoice because you had sent us the little poster which inspired the drive."

The Children's Book Week Committee, at 334 Fifth Avenue, New York City, has the following material ready to help those who take part:

A handbook of suggestions.

The Jessie Willcox Smith poster, four colors, 14x22 inches.

"Stickers," poster design, two colors.

Cards, 3x5 inches, poster design, four colors, reverse side blank for local printing of invitations, lists, etc. At cost, \$1.00 per hundred, plus postage.

Drawings of Thomas Bailey Aldrich Bookcase. At cost, 25 cents per hundred.

Outline for club program, prepared by Mary L. Titcomb, Chairman, Division of Library Extension, General Federation of Women's Clubs.

List of book films for boys and girls, prepared by National Board of Review of Motion Pictures.

All plans for the Week might well be talked over with representatives of local newspapers, and their interest enlisted. A committee with representatives from library, bookstores, schools, churches, clubs, press, motion picture theaters, etc., is often the most effective means of making plans.

Here is an Oklahoma plan:

"We are organizing a Book Week contest through the school system of Oklahoma. In this the boy or girl from each county writing the best essay is to receive first award in the county. These prize essays from the counties are sent to the State contest in which the Library Commission will give three prizes: first, \$25; second, \$15; and third, \$10-worth of Better Books.

"We will use the Children's Book Week stickers on our letters to teachers. About 16,000 teachers will be reached with announcements of the contest."—Mrs. J. R. Dale, *Oklahoma Library Commission*.

Many interesting accounts of the libraries' work during the Week in 1920 have been re-

ceived. A few are quoted here as suggestive of plans for this year.

"We feel that thru Children's Book Week the Library has had more advertisement than thru any other method that has been put in operation. Its observance embraced a very wide field of community activities.

"Signs on front and rear of the street cars, outside, read

Children's Book Week

Read a Book a Week

Get it at your public library

"A very large share of the city's population heard talks given by the librarians before women's clubs, at Parent-Teachers Association meetings, at the branch libraries, and in every school in the city. The luncheon clubs, a feature of Portland's business life, also gave space on their programs for library speakers.

THE THOMAS BAILEY ALDRICH BOOKCASE

"At the schools the children were especially urged to 'Read a book *this week*.' Statistics kept for the Week show that out of 28,000 children in the grades above the second, 16,977 responded to the suggestion.

"Book review contests in the high schools, a special evening program in the library with tableaux illustrating book characters, exhibits of books in store windows, and talks in the book stores by children's librarians, were additional features.

"Two special lists of books were issued, one general 'Children's Books—Old and New,' of which five thousand were distributed during the Week, and a special one on 'Moral and Religious Education.' The latter was sent to all ministers and laymen in the Federation of Churches, as a basis of suggestions for talks at

the Sunday services. This Federation had endorsed Children's Book Week as forming part of their regular program of religious education."—*Library Association, Portland, Ore.*

"The Supervisor of Children's Work presented the subject of 'More Books in the Home' at the Chapel exercises of the Community Training School for Church Workers on Monday evening, November 15. Several hundred Sunday School Workers are enrolled in this school which holds its sessions one night a week and which offers a large number of well-organized courses in the study of the Bible and in the science of teaching.

At the request of the Book department of the Stix, Baer and Fuller store, a list of about one hundred titles of children's books for sale in the department were chosen as approved by the Children's department of the Public Library. This list was published in one morning and one evening newspaper as part of the store advertisement and was used as a purchase list by some customers during the week. It was also advertised that a children's librarian would be present in the department book shop from ten o'clock until half past four the last four days of the week to advise and assist in the selection of books for children."—*St. Louis Public Library.*

"Much was done to advertise the Week beforehand. A short invitation was sent by all the school children in the City to their parents inviting them to visit the Library. The ministers of all the largest churches announced the Week in their churches the Sunday previous. The two largest bookstores in the City allowed the Library to make selections from their books and these were used in table displays in their stores and marked 'Recommended by the Public Library.' Both newspapers in the City wrote up the program of the Week in papers earlier in November and a reporter was sent to visit the Children's Department while the Children's Week program was being carried out. Jessie Willcox Smith's beautiful posters and other signs were scattered thruout the City. Mention of the Week was also made at Mothers' Clubs. Further to advertise the Week, bookmarks were used as place cards at the Rotary and Kiwanis Luncheons.

"Each day had its special program. One day was 'Fairy Tale Day,' another 'Boy Scout Day,' 'Girl Scout Day,' 'Twin Day,' and Saturday had its special Story Hour. The bulletin boards and tables were arranged with books and posters suggestive of the day.

"With the closing of Book Week at the Library, the exhibit and material were taken out

to the State Fair where as great a success was achieved."—*Public Library, Jacksonville, Fla.*

"Under the direction of the art instructor of the public schools the children made many attractive posters which they, themselves, hung in the children's room. We also had an exhibit of books. The posters especially brought the children. Notices were typed for the Boy Scouts to read in the various churches; a notice was read at the meeting of the Woman's club; and lists of desirable books were published in the city paper each evening of the Week. A prize was offered by the Library to the boy making the best bookshelf under the direction of the manual training department, the contest to begin the Week of November 15, and the prize to be given the week of Christmas."—*Public Library, Freeport, Ill.*

"We started the Week by asking the drawing classes in the local schools to co-operate by making posters. In the majority of cases the children came to the Library for pictures to put on their posters. The posters when finished proved to be most effective and original and were placed by us in the stores thruout the town.

"On Sunday, members of our staff spoke in all the Sunday Schools of Endicott and Union (twin villages). The ministers also co-operated with us by making announcements in their churches.

"On Monday, we formally opened Children's Book Week with the play, 'Little Women,' adapted by us from Louisa M. Alcott's book and given by the staff. Our audience was so large that we were unable to accommodate all at one performance and rather than turn them away we repeated it the same evening.

"On Wednesday evening we gave an original musical entertainment entitled 'A Night in Bookland,' in which we advertised such books as *The Wonderful Adventures of Nils*, *Treasure Island*, *the Prince and the Pauper*, *Mother Goose*, *Italian Twins*, *Huckleberry Finn*, *Andersen's Fairy Tales*, *Alice in Wonderland*, etc. A Night in Bookland was done by our folk-dancing classes. In this way we utilized all the various branches of our library work.

"One evening our local moving picture manager gave a matinee and evening performance of *Treasure Island*, at which movie one of our children's librarians made a successful speech regarding Children's Book Week."—*Free Library, Endicott, N. Y.*

Films Based on Books for Boys and Girls

SELECTED BY THE NATIONAL BOARD OF REVIEW OF MOTION PICTURES

THE following list of well made films drawn from books for boys and girls is issued by the National Board of Review of Motion Pictures:

- TREASURE ISLAND. Famous Players Lasky. 6 reels. R. L. Stevenson.
- HUCKLEBERRY FINN. Famous Players Lasky. 7 reels. Mark Twain.
- HUCK AND TOM. Famous Players Lasky. 5 reels. Mark Twain.
- TOM SAWYER. Famous Players Lasky. 5 reels. Mark Twain.
- MRS. WIGGS OF THE CABBAGE PATCH. Famous Players Lasky. 5 reels. Alice Hegan Rice.
- UNCLE TOM'S CABIN. Famous Players Lasky. 5 reels. Harriet Beecher Stowe.
- LITTLE WOMEN. Famous Players Lasky. 5 reels. Louisa May Alcott.
- DADDY LONG LEGS. Famous Players Lasky. 8 reels. Jean Webster.
- REBECCA OF SUNNYBROOK FARM. Famous Players Lasky. 6 reels. Kate Douglas Wiggin.
- SEVEN SWANS, THE. Famous Players Lasky. 5 reels. Fairy Story.
- SNOW WHITE. Famous Players Lasky. 5 reels. Fairy Story.
- PRINCE AND THE PAUPER. Famous Players Lasky. 5 reels. Mark Twain.
- BLUE BIRD. Famous Players Lasky. 5 reels. Maurice Maeterlinck.
- COPPERHEAD, THE. Famous Players Lasky. 7 reels. Incident of Lincoln and Civil War.
- CONQUEST OF CANAAN. Famous Players Lasky. 7 reels. Booth Tarkington.
- SENTIMENTAL TOMMY. Famous Players Lasky. 8 reels. J. M. Barrie.
- LAMPLIGHTER, THE. Fox. 6 reels. Maria F. Cummins.
- CONNECTICUT YANKEE IN KING ARTHUR'S COURT. Fox. 8 reels. Mark Twain.
- TALE OF TWO CITIES. Fox. 7 reels. Charles Dickens.
- EVANGELINE. Fox. 5 reels. Henry W. Longfellow.
- OVER THE HILL. Fox. 11 reels. Will Carleton.
- JACK AND THE BEANSTALK. Fox. 5 reels. English Fairy Tale.
- ALI BABA AND THE FORTY THIEVES. Fox. 5 reels. Arabian Nights.
- VICAR OF WAKEFIELD, THE. Pathe. 5 reels. Oliver Goldsmith.
- LITTLE ORPHANT ANNIE. Pioneer. 6 reels. James Whitcomb Riley.
- BLACK BEAUTY. Vitagraph. 7 reels. Anna Sewell.
- POLLYANNA. United Artists. 6 reels. Eleanor Porter.
- THREE MUSKETEERS, THE. United Artists. 10 reels. Alexander Dumas.
- MAN WITHOUT A COUNTRY, THE. Universal. 6 reels. Edward Everett Hale.
- SINBAD THE SAILOR. Universal. 8 reels. Arabian Nights.
- LAST OF THE MOHICANS. Associated. 6 reels. James Fenimore Cooper.
- LION'S DEN, THE. Metro. 5 reels. Orrin Bartlett.
- SERVANT IN THE HOUSE. Film Booking. 8 reels. Charles Rann Kennedy.
- ANNE OF GREEN GABLES. Realart. 6 reels. Lucy M. Montgomery.
- BEFORE THE WHITE MAN CAME. Atow. 6 reels. Historical.

- COURTSHIP OF MILES STANDISH. Argonaut. 5 reels. Henry W. Longfellow.
- ALICE IN WONDERLAND. Es-kay Harris. Lewis Carroll.
- WIZARD OF OZ, THE. Es-kay Harris. L. Frank Baum.
- JULIUS CAESAR. New Era. 6 reels. Historical.
- KNIGHTS OF THE SQUARE TABLE. New Era. 4 reels. Boy Scouts.
- RICHARD III. Lea Bol. 5 reels. Shakespeare.
- MASTER SHAKESPEARE. University of Wisconsin. 5 reels. Shakespeare.
- LIFE OF SHAKESPEARE. Univ. of Wis. 6 reels. Shakespeare.
- DAVID COPPERFIELD. Univ. of Wis. 7 reels. Charles Dickens.
- SILAS MARNER. Univ. of Wis. 7 reels. George Eliot.
- RIP VAN WINKLE. Univ. of Wis. 5 reels. Washington Irving.
- RIP VAN WINKLE. Hodkinson. 7 reels. Washington Irving.
- ADVENTURES OF ULYSSES. Atlas. 2 reels. Classical.
- LADY OF THE LAKE. Atlas. 3 reels. Walter Scott.

- TEMPEST, THE. Atlas. 2 reels. Shakespeare.
- PETER POINTS THE WAY. Industrial Com., Y. M. C. A. 5 reels.

The Bray Pictographs. One reel each (Goldwyn Distributing Corporation). Every one contains informative material, well put together for boys and girls.

Bill and Bob Series. One reel each (Pathe Exchange, Inc.). Trapping the raccoon; the timber wolf; the badger; the cougar; the skunk; the lynx; the fox; the civet cat.

Pathe Review. One reel each. Any one of the series from No. 1 to No. 130 contains interesting scenic, scientific and informative material for boys and girls.

Wanted: Information on Library Training

SOME recent investigations in the historical development of the idea of library training have convinced me that organized attempts at library training have not always been given the credit they deserve. There is a dearth of accessible material except for a few well-known schools on training and apprentice classes. Even in these cases there is a lack of much beyond the bare facts dealing with the content of the courses. I shall be grateful for any personal reminiscences or written or printed data relating to this subject. Any references to proposals for library training previous to 1887 or to any interesting or unusual experiments in it, successful or otherwise, at any period or in any place, will be much appreciated.

If the study I propose to make is completed, due credit will, as far as practicable, be given to all contributors.

FRANK K. WALTER, *Librarian.*
University of Minnesota Library, Minneapolis, Minn.

The Hans Andersen Festival of Los Angeles

IN Los Angeles a spring-fête known as the Hans Andersen Festival is given each year for the children. Its simple, wholesome characteristics savor of the folk-spirit of other lands where for generations the youths and maidens have danced and frolicked on the village green. In new America, where there has not been time for customs to be handed on nor for atmosphere to be created in the complicated modern life of a large city, the community play spirit of children is seldom allowed expression.

The fundamental plans underlying the fairy festival are very simple and the colorful spectacular results out of all proportion to the energy expended. Some half dozen city departments share the responsibility and each working in its own field bring to pass a magic day for the children. For the past eight years this democratic and co-operative affair, increasing in proportion with each presentation, has represented the combined efforts of the schools, the library, the playground and park commissions working with the Drama League.

Thruout the year the committee for the Hans Andersen Festival obtains reports on dramatic activities here and there thruout the schools. The schools which have given especially successful plays suited for outdoor performance, are invited to repeat them at the Festival. The school orchestra which is considered the best, is asked to play, and the Boy Scouts are asked to help in directing the crowds. The Drawing Department makes posters advertising the day and altogether many have a share in making in their festival.

Early on Saturday morning, the last of April, the children gather and wander over the hills of beautiful Elysian Park, small brothers with sister guarding the lunch, teasing tormenting big boys richly endowed with freckles and endless energy, mother with her own little ones and the next door children, all bedecked in whatever fanciful costumes are available, some borrowed, some outgrown and some dilapidated, but all giving the magic glamor which children love. "pretending" to be someone else. There are Indians in the guise of Hiawatha and Pocahontas; fairies and brownies and elves; Mother Goose and Cinderella, King Arthur and Robin Hood with bluebirds and robins, sunflowers and Jack Frost hobnobbing with a pirate-chief; Uncle Sam and Miss Liberty, Alice in Wonderland, all gaily trooping over the hills for a holiday.

First there are the stories under the trees in some thirty or more places, directed by the Children's Department of the Library. Stories for the very little folks; stories about fairies,

animals, knights; boys' stories of Norse heroes; and funny stories are told in a variety sufficient to satisfy the most exacting appetite.

Later in the morning there are games directed by the playground leaders. After lunch all children in costume and those to take part in the folk dances and pantomimes form in line for the processional to the wooded canyon which is used as the amphitheatre. Led by the Pied Piper, they wind rhythmically around the brow of the hill, down the slope, in and out among the manzanita and finally with fluttering wings and twinkling toes, cross the stage beautifully outlined with tall eucalyptus trees.

Here it is we see Woodland Fairies waken and discover it is spring, then comes the crowning of the May Queen and later the sprightly dance about the Maypole. Sometimes we behold Robin Hood and his Merry Men,
"Rake away the gold leaves, rake away the red
And wake Will Scarlet from his leafy forest
bed.

Friar Tuck and Little John come riding down
together,

With quarter staff and drinking can and grey
goose feather."

Again the scene changes from Rumpelstilzen to Snow White and The Seven Dwarfs, or The Ugly Duckling, or Sleeping Beauty, or The Queen of Hearts Who Made Some Tarts, or The Princess Who Never Laughed.

It is a day of wholesome recreation into which the commercial spirit does not come. It is as free and natural as the sunshine and the blue sky. Not even an ice cream cone or a peanut vendor demanding money in exchange for his treasures, is permitted to enter the park and distinguish between those who have nickels and those who have none.

The Hans Andersen Festival is now a part of Los Angeles, encouraging artistic effort, stirring the imagination, and with it all cultivating a democratic community playtime among all kinds and conditions of children.

About 100 copies of DeWitt Mackenzie's "Awakening of India" showing conditions there in 1917. Will not need binding. Will be sent to any library which will pay postage. Howard Memorial Library, New Orleans.

A pamphlet giving suggestions useful to those planning to have a Robert Louis Stevenson day during Children's Book Week. Ready shortly. (Charles Scribner's Sons.)

Hans Christian Andersen Statuette for Children's Rooms

THE following letter addressed to the Children's Librarians Sections at the Swampscott Conference tells the story of the statuette illustrated herewith. The statuette was not shown at Swampscott as poor Andersen lost his head on the way by decapitation of the express company and has yet to be re-headed by the sculptress.

To the Secretary of the Children's Librarians Section.

American Library Association Conference,
Swampscott, Mass.

Dear Madam:

I have had sent for inspection by the Children's Library Section an unfinished sketch in clay of Hans Andersen telling his tales to the children, which came about in this way. At a birth-day Andersen celebration in New York when the "fairy godmother" was reciting some of his tales, it occurred to me that a plastic sketch of the great story-teller, sitting on a bench with a little girl on one knee and a boy standing beside him, the bench ornamented with low reliefs from his stories, would be interesting and very fitting in connection with the children's library movement. The suggestion came to the knowledge of a New York sculptress, Miss Kimball, who volunteered to work out the idea. In looking up the pictures and studying the biography of the long, lank Dane, Miss Kimball found to her surprise that he was not fond of children but only of telling tales for them. Accordingly, she has placed the children at arms, or rather legs length from him and has seated him on an old Scandinavian chair of which she found a picture in a museum collection, on which are modelled in high relief some of the figures from his tales. She wishes it made clear that the group here exhibited is only a sketch in the rough yet to be worked into proper proportion and is only to be judged as such. My thought was that the group might be reproduced in the present size to be duplicated for Children's Library rooms at reasonable cost, somewhat in the fashion of the Rogers groups of Civil War days, almost forgotten by the present generation, or still better it might in larger size be made a memorial as a contribution from the children's librarians and library children of America to that really remarkable woman, "Mother Sanders," (Mrs. Minerva W. Sanders, whom we used to call "Mawtucket of Pawtucket") who I believe was the very first to let little feet patter into a real public library and invite dirty hands to be washed and look over the picture books. She was, I think, a real founder of the children's

library movement of the present day which is spreading from America the world over. If such a memorial could one day be placed within or on the grounds of the Pawtucket Public Library, which she lived to see replace the poor rooms in which she began her work for the children, it would seem a superb embodiment of appreciation and gratitude.

The appreciation of Andersen, both as a mere story-teller and as a deep satirist, has of late years had immense growth and on the Pacific Coast the library children of Los Angeles make a special feature of Andersen's birth-day. To link his name with the memorial to the woman

SKETCH OF THE HANS CHRISTIAN ANDERSEN GROUP

who brought children into the public library and gave to so many the vision of Andersen, would indeed be an achievement.

If my suggestion commends itself to you and it should be your pleasure so to do, it might be well to appoint a committee of children's librarians who would take up the matter, consult with Miss Kimball and see in what shape this interesting embodiment of a casual thought might be made effective in your work.

Truly yours,

R. R. BOWKER.

Joseph Francis Daniels 1865-1921

JOSEPH F. DANIELS, librarian of the Riverside Library at Riverside, California, and founder of the Riverside Library Service School, passed away at his home on Friday, September 16, after a paralytic stroke. A poignant sorrow had come to him early in the year in the death from tuberculosis of his daughter, Dorothy, but this he met with surface cheerfulness and a stout heart. His married daughter, Mrs. W. G. Hamilton had shown signs of the dread disease but it was hoped that this might be avoided. On September 6th came her death and the double sorrow was more than the tender parent heart of the affectionate father could bear.

The son of a master mechanic of the Boston and Lowell railroad, Mr. Daniels learned from his father the habits of industry and of practical application which marked his successful career at Riverside. He graduated from the grammar school at Somerville in a class which still holds together, and his first venture in practical work was in architects' offices in Boston. He was interested in libraries and taught night school from the time of apprenticeship in architecture. Later he became a teacher and when he went to Colorado his library knowledge was called upon and for seventeen years he served as librarian, first in the Greeley Public Library, then in the Normal School which became the State Teachers' College, and later of the State College of Agriculture, being thus interested and versed equally in educational and library affairs. It was in 1910 that he succeeded Miss Kyle at Riverside where the Carnegie Library building has steadily advanced in usefulness under his administration. Last year the trustees were able to purchase the remainder of the block-face on the main avenue of Riverside including an old family mansion which is to be used for the Riverside Library Service School and another residence which he rented as his home.

Mr. Daniels had become one of the leading citizens of Riverside, interested in all its affairs. He established the Junior Chamber of Commerce for the young men and boys which has done remarkable service in training the younger folk to citizenship and business, and was this year elected president of the Riverside Chamber of Commerce. The library was by contract the county library for Riverside County and thus his influence permeated that county and was indeed felt thruout southern California as well as in the many places in which graduates of the school are filling positions of importance. It will be difficult indeed for Riverside to find for

its librarian any one who will so fit into its municipal life and his passing is mourned by every class in that city. The grief stricken wife and mother survives husband and children, with a son younger than the sisters as the sole remnant of the happy family of a year ago.

ONE of the outstanding figures of American librarianship passed when Joseph F. Daniels, died on September 16. Librarian, businessman, teacher, good citizen, caustic philosopher—Daniels impressed his unique personality on all with whom he came in contact. One could like him or dislike him; one could never ignore nor forget him.

In his Riverside Library Service School, impatient of standards and of received methods, he experimented in various directions, endeavoring to express in terms of library training the various strivings and longings of the modernists in pedagogy. The result was something unique, not comparable with other institutions, or of a kind to affiliate readily with them, but able to offer facilities and suggestions of its own to those fitted to make use of them. The Riverside Library School reminded one of a medieval university—the teachers, summoned by Daniels from thousands of miles for a season's service, were the brightest minds of the profession; the opportunity to profit by them was there; the horse had been at least led to water; if he did not choose to drink, that was his own fault. These methods, while they were a stumbling block to some, were those of the intellectual pioneer. Seed has been sown in them; Daniels saw the buds, perhaps the blossom; the fruitage is of years to come.

Yearly the graduates, new and old, of this school assembled at luncheon in the Mission Inn—that wonder and delight among hostleries—and it was then that Daniels stood forth in his right relationship to his city and to his sister institutions. It would have been a revelation to some of the old recluse librarians to see the affectionate regard in which he was held by the officers, the merchants and the educators of the region round about. Here at least a librarian was a civic force to be reckoned with; and it warmed the cockles of any alien librarian's heart to see it, to hear it spoken and to realize it.

Daniels died in harness. His active life was a struggle with many adverse influences, but he was one of those men who strive hardest when there is something to struggle against. His was the character that builds on idiosyncrasy and

rises above it. California will not forget him, for she will not be able.

ARTHUR E. BOSTWICK.

THE death of Joseph F. Daniels means a definite loss to the library profession. No one who has known him at all personally, not to say intimately, could fail to realize his sterling worth, his many endearing qualities and his love for his work, underlying the superficial oddities which were largely the result of his genius. For genius he had, tho he cloaked it and the best in his nature from the chance few, allowing only those he held dear occasional glimpses into the deeps.

It has been my privilege to call him friend and I feel personally bereft at his going. But I am but one among many. The people at Riverside all knew him and loved him and no one hesitated or feared to ask a service of him. "Service" was his watchword. His service to his community cannot be overestimated. Nothing was ever too much for him to undertake, usually at the expense of his own time and vitality.

The Library at Riverside served its public wholeheartedly and so far as I could see no one was ever turned away discontented, dissatisfied or unsatisfied. The Staff to a unit followed the example and the wishes of its Chief and turned the library, sometimes itself inside out to procure some desired book or information. While the members of the Staff have had to work hard, the lovable qualities of their librarian and his own never flagging industry and inspirational demeanor kept alive their interest and made labor a delight.

As a teacher in the Summer School, it was always my good fortune to find him open to suggestions, with a broad and practical conception of the work, even tho this was not laid down on professionally approved library school lines. The spirit of co-operation was strong in him. His theory, carried into effect, was to turn out well-rounded and self-reliant librarians, who not only received a practical training in the details of their chosen profession, but who, under his constant supervision, gave thought to the importance of their physical well-being besides, and were constantly prodded to dig up whatever their natures contained of initiative, reasoning power and the love of books, and develop them to the utmost.

His whole life in Riverside was devoted to this his work and to his friends and family. All of us are poorer for the part of him that died.

THERESA HITCHLER.

JOSEPH F. DANIELS, an honest man, capable, efficient and trustworthy, who served the Riverside Library with zeal as librarian for eleven years, has gone to "the undiscovered country from whose bourn no traveler returns."

Mr. Daniels in his chosen field was an unqualified success, for his library and the service it rendered were known beyond the confines of his adopted state.

Locally he was as much an institution as is the Mission Inn of Riverside; both were assets of great advertising value. Because of the close relations between the Millers and Mrs. Richardson of that Inn and Mr. Daniels, I doubt if any librarian ever had such a wide acquaintance or so many friends.

As a librarian he was not always in accord with the customs prevailing in the library world, but he had the courage of his convictions and was not afraid to express them.

It was my privilege a few years ago to spend a month in Riverside as lecturer at the Library School. Before going there I had been told of the topsy-turvy manner in which the school was run, so I was prepared for anything.

After a study of the situation I became a supporter rather than a critic of the school, and when I left Riverside it was with the feeling that Mr. Daniels had established the right kind of school. He never tried to compete with library schools which required a college degree for entrance, nor did he give too much attention to bibliography or the technicalities of the profession; rather did he try to give such inspiration and practical instruction as would best fit the young men and women who came to his school for the duties which would be theirs as assistants holding minor positions.

He succeeded in a gratifying manner, and I can say, from my knowledge of him and his work, that I wish there were more like him.

FRANK P. HILL.

William A. Hillebrand, formerly librarian of the New York Historical Society, says Arnold Levitas in the *Mount Hope School Journal*, is the collector and custodian of a library on dramatic subjects of over fifteen thousand volumes and pamphlets, at 21 Montgomery Street, in Jersey City, N. J. Besides hundreds of scrap-books containing engravings of actors of another day and others filled with thousands of theatrical clippings from American periodicals, there is a collection of material relating to Jenny Lind and her work numbering more than one hundred items. Mr. Hillebrand is the founder of the Jenny Lind Memorial Association.

THE LIBRARY JOURNAL

TWICE-A-MONTH

OCTOBER 1, 1921

"CHILDREN'S Book Week" for which effective preparations are making this year as last year has, we hope, come to stay, for it not only marks a new service to the children but forms a tie between the librarian and local bookseller as engaged in the common work of the distribution of better books. It should never be forgotten by librarians that "better than a book borrowed is a book owned." Public libraries should never take the place nor minimize the importance of private libraries and this is as true of the children's room and the children's bookshelf. The comic supplements of the Sunday papers are a constant menace to the artistic and literary taste of children and the powerful antidote for these should be the charming picture-books and really good juveniles which come abundantly from the press. Next to the comic supplement in harmfulness is the miscalled "boy scout book," reeking with impossible or foolish adventure which is really our old enemy the dime novel in camouflage. One of the best developments in recent education is the organization of Parent-Teachers' Associations thruout the land, and librarians and booksellers should complete a quadrilateral of effective effort in assuring that the children have the best books that can be had alike in the library, the schoolroom and, most of all, in the home.

★ ★ ★ ★ ★ ★ ★

THE children's library movement had its beginnings nearly half a century ago but its effective development has been within the quarter century since 1895 when the library schools began to send out graduates who have made their mark in children's work and developed that to an unprophesied importance. This importance cannot be too much emphasized, especially for those who have the knack of dealing with children because they love children. The calling of children's librarian should not be entered upon excepting by those who really do love children, for otherwise it would not be love's labor lost but labor lost without love. Only those who love to nurse can be good nurses and the like is true in serving the children in our libraries. With the development of work in

children's rooms, as Mrs. Root's experience has shown, and as Miss Jordan has found in Boston, there are innumerable points of contact with children and parents as well which should give the most ambitiously altruistic their full opportunity of service. This thought perhaps diverted Miss Jordan from reference work to that of children's librarian for, tho work in the reference department seems more scholarly, a virtue which it shares with the cataloging department, no division of a great library compares in influence with that which should radiate from the children's room. It is to be hoped that the salaries of children's librarians may ultimately recognize this value so that the best of library personnel may not be switched off from children's work by the temptation of higher remuneration in less productive fields.

★ ★ ★ ★ ★ ★ ★

A GREAT advance in librarianship for children was of course made with the organization of the Carnegie Library School in Pittsburgh, of which an account is given in this number of the LIBRARY JOURNAL. This is published in this number, somewhat out of its place, in a proposed series of papers on the several library schools which are in plan. For this one on the pioneer school, now that of the New York State Library, is already in hand, while Mr. Dewey has promised to contribute the story of how the thought of the library school was inspired in his mind as one of the necessities of the library profession. The series will not be confined to the schools which are in the Association but will include also a paper on the Riverside Library Service School as seen by the editor during a recent stay in California. This school is especially notable because it has adopted and adapted from the "new education" the "project" system of teaching and training which has come so much into vogue recently in our schools. It is unique for the simple and single reason that it came out of the unique personality of its founder and head.

★ ★ ★ ★ ★ ★ ★

THE death of Joseph F. Daniels of Riverside removes from the sphere of earthly work one who was indeed a unique figure within the

profession. Only those who penetrated beneath the chestnut burr of his brusque oddities to the loving and aspiring heart of him really knew what his life meant and only those who have come to know Riverside and its community can really know what he did for that community and how thoroly he was backed by it. He was perhaps the most misunderstood man in the profession and unfortunately he never took pains to correct that misunderstanding. His death by paralytic shock on September 16 was the natural outcome of the two sorrows which had come to him within the year, the deaths a few months ago of a home daughter who also had made her

mark in Riverside and only a fortnight since of the married daughter who had also been combating the threat of tuberculosis. For some time he kept a bold front against his sorrow but at last it became too much for his loving and affectionate nature. We print in this number of the LIBRARY JOURNAL some tributes which may surprise many of the profession by their appreciation of the real character and value of this lost leader. Nowhere in the country is a community which is or could be more loyal to its librarian than was Riverside to Joseph F. Daniels.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION

COMMITTEES, 1921-22

The following committees have been appointed since the publication of our number for September 15.

Editorial. Hiller C. Wellman, City Library Association, Springfield, Mass., chairman; Matthew S. Dudgeon, Josephine A. Rathbone, Carl B. Roden, George B. Utley.

Membership. William J. Hamilton, Indiana Public Library Commission, Indianapolis, Ind., chairman; Tommie Dora Barker, Zaidee Brown, Lila May Chapman, Isabella Cooper, H. T. Dougherty, Alice R. Eaton, Alice G. Evans, H. L. Hughes, Clara F. Hunt, Julia Ideson, Sabra L. Nason, Alice L. Rose, Mrs. J. A. Thompson.

**Reciprocal Relations with other National Organizations.* Marilla W. Freeman, Goodwyn Inst. Library, Memphis, Tenn., chairman; John H. Leete, Clarence W. Sumner.

LIBRARY CALENDAR

- Oct. First week. At Salt Lake City.
Utah Library Association.
- Oct. 11-13. At the University of Illinois, Urbana.
Annual meeting of the Illinois Library Association.
- Oct. 13-14. At Keene, N. H.
Meeting of the New Hampshire Library Association.
- Oct. 12-14. At Ames.
Iowa Library Association.
- Oct. 5-7. At Detroit.
Michigan Library Association.

*The membership of this committee as here listed corrects that previously published.

- Oct. 10-12. At Milwaukee.
Annual meeting of the Wisconsin Library Association.
- Oct. 19-20. At Ludlow.
Vermont Library Association.
- Oct. 13-14. At Mammoth Cave.
Kentucky Library Association.
- Oct. 17-20. At Yellow Springs. Headquarters at Antioch College.
Ohio Library Association.
- Oct. 18-21. At Hutchinson.
Kansas Library Association.
- Oct. 20. At Webster, Mass.
Bay Path Library Club.
- Oct. 20-21. At Litchfield, Conn. Headquarters at the Phelps Tavern.
Annual meeting of the Connecticut Library Association.

West Virginia Library Association.
- Nov. 10-11. At Indianapolis.
Indiana Library Trustees Association.
- Nov. 10-11. At Greensboro.
North Carolina Library Association.
- Other meetings planned are the Florida Library Association's annual meeting at Tampa in April; that of the Idaho Library Association at Boise in April; Ontario Library Association on Easter Monday and Tuesday, 1922; New Jersey Library Association at Atlantic City, April 28, 1922.

*the most important book for boys
and girls published in this decade*

The Story of Mankind

By HENDRIK WILLEM VAN LOON, A.B.PH.D.

With over 100 black and white line cuts, eight four-color pages, twenty animated maps, sixteen full page half tones; index, reference tables and bibliography.

SEVEN years ago, Dr. Van Loon began to gather material for this "primer" history of the world. Last fall, "Ancient Man," the first volume of a series appeared. It was a startling success both from a historical and a publishing point of view. The papers of the country were filled with enthusiastic comments. Heywood Broun called it "the most fascinating book for children which we have seen in years." The *New York Times* said, "This is the way to tell history to children—and to the rest of us." Mrs. Dawson in the *New York Globe* wrote "one of the most original books ever published. When Mr. Van Loon's work is completed, we will have an outline even more fascinating than Wells'."

Many educators and booksellers have come to us and said: "Why wait several years with the other volumes? Why not make one large book out of the whole history?" They told us that everyone who had read "Ancient Man" wanted to have

Van Loon's interpretation of what happened thereafter "right away."

So here is "*The Story of Mankind*" which explains how events developed from the earliest times and grew along the lines which lead up to our present era. In short, the sequence of human progress is the main topic of this new kind of history. The first pages tell us of original man in the wilds of Europe and then we are taken through the Classical World, the Middle Ages, the Rebirth of Civilization, the Conquest of New Worlds, the Conquest of Knowledge, the Beginnings of Freedom, the Age of Invention, and the last pages show modern man and explain how he was bound to develop into the sort of creature we find him to be.

This new kind of a history book contains the facts which a certain father, who happened to be a historian by trade, wrote for his own two intelligent boys. And which he confides may be profitably read even by college graduates. It is unquestionably one of the real achievements in contemporary publishing.

A profusely illustrated and beautifully bound gift book. A wonderfully delightful history in story form for boys and girls of almost all ages. (Size 6¼" x 9½") \$5.00.

BL **BONI & LIVERIGHT** **MODERN LIBRARY**
NEW YORK

IN THE LIBRARY WORLD

MASSACHUSETTS

Boston. One hundred and twenty-two full time students have so far registered for the coming session of the Simmons College School of Library Science. Of these, thirty-six are freshmen, twenty-five sophomores, twenty-four juniors and sixteen seniors, six are students transferring from other colleges, with credit of from one to three years of academic work, fifteen are graduates of other colleges, and there are seven part-time students admitted to one technical course each, because they are members of library staffs in greater Boston. This brings the total registration to 129.

During the last fifteen years, registration has fluctuated between 100 and 125, except for the two war years when it dropped abruptly to between eighty-two and eighty-six. Many of the students registered, even those of freshman year, have had some library experience, especially the freshmen, who have come from high schools having libraries of their own.

New Bedford. Books taken out for home use from the New Bedford Free Public Library in 1920 approached the half-million mark, numbering 480,000 volumes, and 348 meetings were held by thirty-nine different organizations at the library building. The Art Room circulated 84,000 pictures, largely for use in the schools. The Pedagogical Room in the Reference Department was rejuvenated, and promptly showed results in a circulation in one month exceeding its circulation for the entire year of 1919. The Juvenile Department gathered several hundred books which were sent to Dr. Grenfell for use in Labrador. The library has 173,778 books; serves a population of 130,626 thru the Central Library and three branches; registers 42,918 borrowers; and paid out \$32,616 in salaries. \$3,175 was received from the Dog Fund.

NEW YORK

Albany. The New York State Library School opened on September 21 with thirty-four full time students and two specials registered for partial work. In addition to New York State, which leads with thirteen students, ten other states, China, Norway and the Philippine Islands are represented. An unusually wide range of colleges and universities is noted, thirty-two being represented by bachelor's degrees and six by graduate work, including the Universities of Christiania, Geneva and Grenoble. All but four students have had library experience, eleven

have devoted some time to teaching, five to secretarial work and three to social welfare service.

New York City. The total registration for the junior class of 1922 of the Library School of the New York Public Library is forty-one. Fifteen states are represented: New York, by eleven students; New Jersey, five; Ohio, four; Pennsylvania and Indiana, two each, and West Virginia, Missouri, North Carolina, Connecticut, Minnesota, Georgia, Kansas, Oregon, California and Wyoming, one each. There are seven students from foreign countries: three from Norway, and one each from Canada, Chile, Japan and France.

Twenty-three hold college degrees and three have foreign education, roughly the equivalent of college work here, six have had some college work and two normal school work. Only six of the total of forty-one have had no library experience.

Brooklyn. The Pratt Institute School of Library Science class of 1922 numbers at present 24 students. Geographically they stand: New Jersey five, Connecticut three, Pennsylvania three, New York two, Maine, Rhode Island, Alabama, Kentucky, Iowa and Kansas one each, two from Canada, one each from Belgium, from the West Indies and from Japan. Educationally there are representatives of Queen's University, Vassar, Wellesley, Randolph-Macon, Grinnell College, and the Alabama Technical Institute and College. All but one of the students have had some practical experience since leaving school, fifteen have been in library work in the public libraries of Bangor, Waterbury, Newport, New York, Newark, East Orange, Leavenworth, and in several college and high school libraries. Seven have taught, their experience ranging from a country school to Newnham and Girton colleges, Cambridge; four have had secretarial and four business experience, and seven have done special work.

PENNSYLVANIA

Philadelphia. During the A. L. A. conference at Swampscott the Drexel Institute Library School Alumnae Association held a dinner at New Ocean House on June 24, with twenty-one persons present. Following dinner a special meeting was called by the President, Mary P. Farr, who stated that there is a possibility of the Drexel Library School's being revived and asked whether the association cared to take any action concerning it. A committee, consisting of Grace

ABINGDON

Vital BOOKS

TRANSCENDING the thousand writings of a day are those rare, enduring works which mark in the progress of man another step to greater things. Such works hold within their covers a vital force eternal as the fire in a flawless diamond.

To people who discriminate, who seek the pure metal and discard the dross, the name Abingdon is a guarantee of this vital force.

Abingdon Books are sold at all good Book Shops.

THE UNITED STATES AND CANADA A Political Study

By *George M. Wrong*

"A discussion of the common interests of the two countries with a view to a better understanding."—*Indianapolis News*.

Price, net, \$1.25, postpaid.

JOHN RUSKIN, PREACHER And Other Essays

By *Lewis H. Chrisman*

In this book we have a presentation of Ruskin as an interpreter of the things of God, but there are ten other essays of breadth, beauty, virility, keen analysis and marked interpretive value in the book.

THE OPINIONS OF JOHN CLEARFIELD

By *Lynn Harold Hough*

John Clearfield is a person of unusual intellectual virility, vivacity and vision. He has had much to say about books, but there are many other items of interest and value upon which he renders "opinions" that are worthy of careful consideration.

Price, net, \$1.25, postpaid.

LINCOLN AND PROHIBITION

By *Charles T. White*

The author's purpose in writing this book is "to set forth in connected and logical form a brief but comprehensive record of Abraham Lincoln's efforts for the suppression of intemperance."

GERMAN CHILDREN'S BOOKS

BRENTANO'S
BOOKSELLERS TO THE WORLD
Fifth Ave. and 27th Street
Paris NEW YORK Washington

D. Rose, Sarah C. N. Bogle and Caroline F. Webster, was appointed to communicate with the committee of the A. L. A. on training and with the Carnegie Corporation on professional training to ascertain the need for more library schools. A motion, presented by Miss Snyder, recommending a change of the annual meeting from December to the time and place of the A. L. A. was passed. The matter was referred to the annual meeting to be held in Philadelphia for further consideration.

Pittsburgh. Thirty-three students have registered in the school this year. Eight states, British Columbia and Shansi, China, are represented. Students have come from the following colleges and universities: University of Pittsburgh, Carnegie Institute of Technology, Elmira College, Pennsylvania College for Women, Wilson College, Goucher College, Grove City College, Simmons College, and the Woman's College, Tokyo, Japan. In addition several members of the class have had normal school training and summer courses in universities.

OHIO

Cleveland. The Western Reserve University Library School opens this year with the largest attendance in its history, taking into consideration the enrollment in the general course and in the special course in work with children. In the general course there are twenty-six students, including a few taking part time or special work. Of this number eight have college degrees. The range of experience varies as follows: Eighteen have had general public library work; one college library work; one children's department work; one commercial library experience, while five have had the minimum required preliminary practice. In the class in Work with Children seventeen students are enrolled. The majority of these have had either Summer Library School training or have finished Public Library Training Courses. Three have completed full year Library School Courses and one has the degree of B. L. E. In addition to having had special children's room experience, several have filled general library positions.

GEORGIA

Atlanta. The Library School of the Carnegie Library of Atlanta opened on September 12th with a total registration of twelve regulars and one special student. The members of the class come from Alabama, Georgia, North Carolina and Virginia. Four of the students have had experience in library work and three of them have A. B. degrees. Of the others, five have had some college work, two of the five being graduates of junior colleges of high standing.

S. L. C.

ILLINOIS

Urbana. For the third year, the University this summer conducted both eight weeks library school courses for college graduates, and six weeks elementary courses for high school graduates, the latter courses being similar to the courses commonly given for many years in summer library schools. Twenty-four students registered in the eight weeks course, and twenty-seven in the six weeks.

Of the fifty-one students enrolled this summer, twenty-four were from Illinois; eight from Indiana; three from Minnesota; two each from Arkansas, Kansas, Michigan, Ohio, and South Dakota; and one each from Iowa, Kentucky, Nebraska, Oklahoma, Tennessee, and Washington.

Five of the eight weeks students were attending their second or third summer session here; these have now completed half or more of the first year's work in the Library School.

The principal instructors, Mr. Cleavinger, Miss Bond and Miss Boyd, of the Library School faculty, were assisted by Miss Houchens of the University Library staff, Miss Price, of the Library Extension Division of the Illinois State Library, Miss Cloud, of the Ashland (Wisconsin) High School, and by Miss Anell and Miss Arie, students in the Library School.

The enrollment for the school for 1921-1922 is at present thirty-nine, fifteen being seniors and twenty-four juniors. At this time last year the enrollment was thirty-one.

P. L. W.

WISCONSIN

Madison. The enrollment of twenty-three students in the University of Wisconsin Library School class of 1922 covers a wide geographical distribution, representing ten states, the District of Columbia, and two foreign countries. Five are registered from Wisconsin, three from Michigan, two each from Iowa, Massachusetts, Missouri, and Montana, and one each from Indiana, Illinois, Kansas, New York, the District of Columbia, Canada, and Norway.

The educational qualifications are distinctly higher than for several years, indicating both a return to normal conditions since the war, and the advantage of admitting college graduates without the formal written examination. Speaking academically, seven are of graduate rank, one having a master's degree, seven are upper classmen, three being seniors in the College of Letters and Science, University of Wisconsin, who will receive their bachelor's degree and the certificate of the Library School at the June

HIAWATHA PICTURES

By
REV. A. T. KEMPTON

THIRTY superb pictures illustrating the Hiawatha Story as presented by the Ojibway Indians, to whom this story is an epic, and who enact the scenes of the poem with the same religious enthusiasm as characterizes the periodical presentation of the Passion Play in Europe. Mr. Kempton visited Debarats, Ontario, and spent a long time studying the Ojibway Indians as they produce the great drama of Hiawatha, and made these photographs at the time. He thoroughly absorbed their spirit, and familiarized himself with their traditions and customs. These pictures reproduce in a most realistic way the main events in the great poem of Hiawatha.

We offer these exceptionally beautiful and suggestive helps to a complete understanding of Longfellow's Hiawatha, thirty pictures, size 10 x 12. The set for \$3.00. No school or library Children's Room can afford to be without them.

THE PALMER COMPANY

GLUEY PASTE

*"Sticks like
a brother"*

A light-colored paste of super-strength. Dries extremely fast. Used in binderies in place of hot glue. Unexcelled for drawing on magazine covers and all library repair work. Clean, efficient, economical, it affords a timely opportunity of saving something on supplies.

Gluey is growing in popularity among the library users and is guaranteed to be a revelation in paste.

Gluey is packed in attractive gallon stone jars, economy self-sealing glass jars, in friction-top tin cans and pails.

THE PERFECT PASTE

That Solves Your Pasting Problems

Let us submit price and sample.

The Commercial Paste Company

COLUMBUS, OHIO

commencement; four are juniors, two sophomores, and freshmen. The colleges represented are the Universities of Wisconsin, California, Iowa, Michigan, and Missouri, and Smith, Ripon, Coe, and Missouri State Teachers' College, and Baker University.

Professionally, the class brings a good basis of library experience or preliminary training upon which to build the year's course. Fifteen have had at least a year's experience, four having had apprentice or short courses in library methods. One has had ten years of library work, and another five years; two have had four years; three, three years; six, two years, and two, one year. The others have met the prerequisite requirement of a month's apprenticeship. Ten have had valuable experience as teachers and five had the advantage gained from business positions.

M. E. H.

MISSOURI

St. Louis. The registration for the St. Louis Library School class of 1922 is twenty-one. Two are from Iowa, one each from Illinois, Indiana and Oklahoma, one from Kristiania, Norway, and the rest from Missouri. Ten have had experience ranging from eight months to three years. This practical work has been done in the following libraries: One year in the Burlington (Iowa) Free Public Library; two years, Greenville (Ill.) Public Library; one to three years (four students) in the St. Louis Public Library; one year in the Sioux City ((Iowa) Public Library; eight months in the Evansville (Ind.) Public Library; one year in the High School Library, Sapulpa (Okla.); and three months in the Riksarkivet and one and one-half years in the Deichmanske Bibliotek, Kristiania, Norway.

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department. Replies should be addressed directly to the ADVERTISER, either at the address given or under the key letter in care of this office.

POSITIONS OFFERED

The first of September found the American Library Association employment service unable to meet all the requests for recommendations for library positions. Librarians are needed in almost every field of library endeavor. Librarians who desire change of position will greatly facilitate the work of the Association by registering very promptly should they desire to avail themselves of the opportunities now open. Children's librarians are particularly in demand.

SARAH C. N. BOGLE, *Assistant Secretary*.
78 East Washington St., Chicago.

Wanted, an experienced cataloger and catalog reviser. Salary \$1,300-\$1,500. Newberry Library, Chicago, Ill.

Wanted, a trained librarian to take charge of the order department in a college library in central Ohio. A good position for right person, available at once. Address, R. M. 17, care of the LIBRARY JOURNAL.

"ONCE UPON A TIME"
A BOOK OF OLD TIME
FAIRY TALES

A new volume in the 1921 list. The fascinating tales of long ago are again told and their enchantment and beauty enhanced by one hundred and twenty illustrations in full color by Margaret Evans Price. The volume is edited with introduction by Katharine Lee Bates of Wellesley College, colored paster and wrapper by Milo Winter.
Cloth, 10 x 12 inches, 132 pages.
\$2.50

**"HERO STORIES
FROM THE
OLD TESTAMENT"**

RETOLD FOR YOUNG PEOPLE by Zoe S. Loveland, illustrated with twelve reproduced masterpieces of Biblical paintings, colored wrapper. These stories, specially selected, have been retold in a way that makes the vital note in each one vibrate in harmony with the great truth intended to be taught by them in the Bible itself, and at the same time in a way most attractive and appealing to young people. Size of book, 5½ x 7½ inches, 320 pages, cloth. \$1.50

Edward J. Clode, Publisher, New York

The following is quoted from a letter from

Dr. John J. Tigert

U. S. Commissioner of Education

"There has long been a need for clean, wholesome literature that will stimulate the minds and ambitions of young men just entering upon business careers.

"I have been delightfully surprised to learn about THE OPEN ROAD, which to my mind furnishes an incentive of the kind so much needed for those young Americans who are at this critical stage. I do not know a more neglected and, at the same time, a more important function to be performed than this one of "fertilizing" the minds of our virile young men at this transition age.

"It will be gratifying to me to see the scope and influence of THE OPEN ROAD extended and permanently established in the length and breadth of the nation."

(Signed) **JNQ. J. TIGERT**
Commissioner of Education

FOREST PRESS
 Lake Placid Club, New York

THORNE, Elizabeth G., assistant librarian of the Syracuse University Library, appointed librarian and director of the Library School in succession to Dr. E. E. Sperry, who will henceforth devote all his time to the history department of the University.

TOPPING, Elizabeth R., 1920 N. Y. S., first assistant in the Monterey County Free Library, appointed librarian of the Ventura County Free Library, to succeed Julia Steffa.

TYLER, Alice S., director of the Western Reserve University Library School, has been granted a sabbatical leave and will be absent during the first semester, and possibly until the early spring. Thirza E. Grant, for several years associated with the School, will serve as acting director.

VAUGHAN, Nancy, 1920 L. A., appointed librarian of the Metropolitan Life Insurance Company, New York City.

WALKLEY, Anna M., 1919 W. R., is to be a member of the faculty of the Western Reserve Library School this year as assistant instructor and advisor.

WINTON, Grace, 1917 P., assistant librarian of the Cass Technical High School, appointed librarian of the North Western High School, Detroit.

WORDEN, Mrs. Dorothy Clarke, 1915 C., librarian of Amador County (Calif.) Free Library, appointed librarian of Colusa County Free Library.

Among appointments of members of the Class of 1921 of the University of Washington Library School are: Margaret S. Gill, assistant in the Reference Department of the Carnegie Public Library, Vancouver, B. C.; Jerusha G. Meigs, first assistant in the Whitman College Library, Walla Walla, Wash.; Latta Snider, Circulation Department of the Seattle Public Library; E. Fay Woolsey, first assistant in the Jackson County Library, Medford, Ore.

The following appointments of graduates of the class of 1921 of the New York State Library School have recently been made: F. Grace Walker, librarian of the Public Library, Kankakee, Ill.; Winnifred Wennerstrum, librarian of the Warren County Library, Monmouth, Ill.; Gudrun Moe, acting librarian of the Elmira Free Academy Library, Elmira, N. Y., for the school year; Lucile Kelling, assistant in the Newark (N. J.) Free Public Library; Birgit Foss, 1919-'21, has resigned as first assistant in the branch service of the Cleveland Public Library to take up similar work with the New York Public

Library; and Mrs. Elsie A. Weaver, 1920-'21, is to be first assistant in the "Popular Library" of the Cleveland Public Library.

The following appointments have been made of graduates of the class of 1921, Los Angeles Library School: Ethelwyn Badger, librarian, Montavilla branch, Library Association, Portland, Ore.; Lila Dobell, librarian, Trinity County Free Library, Weaverville, Calif.; Doris Crump, assistant, Santa Clara County Free Library, San José; Annice Heaton, assistant, Pomona Public Library; Mary Marjorie Smith, librarian, elementary school, Detroit; Edna Stonebrook, assistant, University of Washington, Seattle; Rachel Thayer, assistant, Long Beach Public Library; Roberta Bowler, Helen Hamilton, Reba Richardson, assistants, Pasadena Public Library; Mary Alice Boyd, Rosemary Livsey, Mabel Lunn, Elsie McCormick, Harriet Mather, Gertrude Mendenhall, Alpha Perkins, Mabel Smith, assistants, Los Angeles Public Library.

Members of the class of 1921 of Simmons College School of Library Science have been appointed as follows: Rosanna C. Bagg, children's librarian, Oneonta Public Library, Oneonta, N. Y.; Eleanor M. Barker, librarian, Rogers High School, Newport, R. I.; Ruth A. Bean, branch librarian, West Side Library, Evansville, Ind.; Marian W. Brace, first assistant in branch of the Detroit (Mich.) Public Library; Marie L. Brookes, assistant in the Reference Department of the Detroit Public Library; Gladys Brown, cataloger, Chelsea (Mass.) Public Library; Elinor Childs, assistant, Children's Department, New York Public Library; Mildred B. Cooper, general assistant, Greensboro (N. C.) Public Library; Ena Crain, assistant in charge of Legislative Reference Department, Wyoming State Library; Gertrude Davis, assistant cataloger, Carleton College, Northfield, Minn.; Madeleine A. Egge, children's department, Providence (R. I.) Public Library; Doris S. Fairbanks, assistant librarian, Skidmore School of Arts, Saratoga Springs, N. Y.; Anna J. Gay, branch librarian, Detroit (Mich.) Public Library; Helen Y. Hough, assistant in charge of reading room, Grinnell College, Grinnell, Iowa; M. Ruth Lloyd, assistant, Williams College Library, Williamstown, Mass.; Laura B. Mallett, loan desk assistant, Haverford College Library, Haverford, Penn.; Alta M. Osgood, assistant in children's work, New York Public Library; E. Lucille Palmer, assistant in charge of reference room, Adelbert College, Cleveland, Ohio; Marian E. Reynolds, librarian, Portage Branch, Kalamazoo (Mich.) Public Library; Louise E. Sheldon, assistant librarian.

Just Published

Bibliotheca Chemo-Mathematica:

Catalogue of Works in Many Tongues on Exact and Applied Science, with a Subject-Index. Compiled and annotated by H. Z. and H. C. S. With 127 Plates, containing 247 Portraits and Facsimiles. 2 vols., large 8vo, comprising xii. x 964 pages (including 96 pp. of Index), bound in red linen-buckram, carmine top edges. Price £3 3s. net.

"The index has been compiled with great care. It is not a mere classification of the works described, but an analytical index to the salient features of a very extensive collection of books annotated with a wealth of references. A collection of over 17,000 entries of works relating to the pure and applied sciences of mathematics, chemistry, and physics, illustrated with over 100 facsimiles and portraits, establishes the claim of these volumes to a place in any representative Library of Science."—*Library Association Record.*

"Superficially, this catalogue seems to appeal to a very restricted and exceedingly technical class of collectors and librarians, but its amazing index of nearly 100 double-column pages shows how closely the books here described touch on an infinite variety of subjects of immediate human interest. . . . This catalogue will for many years rank as an indispensable work of reference in every technical library, public and private."—*The Times Literary Supplement.*

"An historical catalogue of very great value, and eminently satisfactory from the bibliographical point of view, as well as with respect to the multitudinous bibliographical and historical references which are on every page. . . . The index forms a very remarkable and comprehensive bibliography of exact science, the like of which, for its catholicity of character, is hardly to be found."—*Saturday Westminster Gazette.*

OUTSTANDING JUVENILES

GIRLS OF HIGHLAND HALL

By Carrol W. Rankin

These girls were once *The Girls of Dandelion Cottage* (which has gone through over twenty printings). In this new book Mrs. Rankin has at last yielded to the many requests to tell what befell these buoyant youngsters in boarding school. They have many lively experiences. Illustrated, \$1.75.

MANY TRAILS

By H. Mortimer Batten

Delightful stories about wild animals, and some domestic pets. Written with a great sympathy for the outdoors, by one who knows the trail and the ways of woodfolk, and understands the ever-changing drama in the life and habits of the denizens of forest and stream. All of these animal characters seem such real personalities that one follows their fortunes with true friendly interest. With eleven beautiful illustrations, \$2.00.

WHEN LIGHTHOUSES ARE DARK

By Ethel Claire Brill

A stirring tale of young folk thrown on their own resources among wild Northern woods and waters. Three boys and a girl, who is the sister of two of them, drift in a fog on to a Lake Superior island, where there are only fishing shacks, summer cabins and discontinued lighthouses. Owing to the suspension of navigation, they are marooned there for the winter, the launch on which they came having broken down. Their ingenuity, their adventures and the makeshifts to which they are forced are very interesting. Illustrated, \$1.75.

HOW AND WHY STORIES

By J. C. Branner

President Branner was brought up in the Old South, as he says, "fo' de wah." These stories of the creation of the animals and man he heard himself from his old negro "aunts" and "uncles"; and he has set them down as he heard them, in full dialect, with all their humor and gentle sentiment. Reminding us of *Uncle Remus*, of course, they are obviously less "doctored." No attempt is made to introduce a continuous fictional element supplied by the author, but each story, "How the Snake Lost His Legs," "Why the Crawfish Goes Backward," "How the Birds Got Their Colours," "Why the Cat Has Nine Lives," etc., stands as a unit, makes a most delightful bit for fireside reading. The whole furnishes unique material of the first importance to the lover or student of American folk-lore. Profusely illustrated, \$2.25.

ANNOUNCEMENT

Having recently installed additional equipment we are now able to accommodate more libraries with our famous "Universal *Re-bindings*."

Our reputation has been established by **quality work** and **SPEEDY delivery**. If you are tired of having 15% of your books laying in the bindery it will pay you to get in touch with us, as we operate the "*world's greatest economic bookbindery*" with a capacity of two million volumes per year, and can serve you to your satisfaction. All orders given attention whether large or small.

We specialize in reproducing bindings for rare volumes. Holliston cloth and buckrams used.

Send us a copy of a 12mo book today to rebind as a sample.

UNIVERSAL PUBLISHING SYNDICATE

QUALITY—SERVICE

It is poor economy to get anything but the best in Library Binding.

Our Experience, Expert Service, the use of the Best of materials the market affords, gives our work a quality of its own, in fact, the best to be had. Samples bound free of charge.

Write for prices.

Wagenvoort & Co.

Library Bookbinders :: "Our binding outwears the book" :: Lansing, Mich.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Try this eraser test on your catalog cards

Take one of your catalog cards. Write on it in ink. Then rub out. Write on it again. If the ink blurs, it means that the card will not stand up under constant daily fingering.

If the ink does not blur, it proves that you have a card made of the same quality all the way through; a card made from finest quality rag stock only—probably a Library Standard card.

Library Standard cards will withstand the eraser test *until worn through*. Put them to this or any other test. It will prove to you what many libraries, including the Library of Congress, have learned from experience—that Library Standard cards are one quality *all the way through*. That is why, in actual use, they have given service for 25 years.

THE LIBRARY JOURNAL

TWICE-A-MONTH

OCTOBER 15, 1921

The American Library in Paris, Inc.

By WILLIAM N. C. CARLTON

Recently Director, American Library in Paris, Inc.

THE subject of the American Library in Paris is one in which many members of the American Library Association are keenly interested in view of the intimate relationship existing between the American Library and our Association which created it in Paris during the war service period, and last year deeded it as a free gift to the patriotic and far sighted men and women there who were loath to see such a valuable collection dismantled when its original reason for being had ceased.

The principal facts regarding the Library as it is to-day may be briefly summarized. It is owned and controlled by a Society incorporated under the laws of Delaware under the name of the American Library in Paris, Incorporated. The membership of this Society is constituted as follows:

A. **PATRONS:** being all persons who have contributed 5000 francs or more to the funds of the Corporation.

B. **LIFE MEMBERS:** all persons who have contributed 2000 francs.

C. **ANNUAL MEMBERS:** all persons who pay an initial fee of 100 francs and annual dues of 100 francs.

D. The American Library Association.

The immediate direction of the Library is in the hands of a Board of fifteen Trustees, ten of whom are elected by the members of the Society, and five appointed by the Executive Board of the A. L. A. Nine members must be American citizens. The Librarian is nominated by the A. L. A., but the nomination must be approved by the Board of Trustees.

The Library may be freely used by all who come to it, but a nominal charge is made for the privilege of borrowing books. The present charges are: 20 francs per annum for the use of one borrower's card, 40 francs for two cards, 50 francs for three cards, 60 francs for four cards, and 70 francs for five cards, which is the

maximum number allowed a subscriber. There are now about 4,000 persons who are card holders and the circulation averages from 10,000 to 11,000 volumes per month.

It is estimated that the annual cost of maintaining the Library on its present scale will be from 250,000 to 300,000 francs a year, and the Trustees and members are making every effort to secure an endowment sufficient to produce this income. The indications are that the greater part of the sum required must be raised in the United States and the Trustees are planning the formation of an American Committee with headquarters in New York City to aid them in this endeavor.

There is a widespread interest in the institution thruout Paris, especially in French official, literary and educational circles, as is evidenced by the fact that a most distinguished group of Frenchmen gladly consented to become members of an Advisory Council and sponsor it before the French public. Among these were: Ex-President Raymond Poincaré, Marshals Joffre, Foch and Lyautey, M. René Viviani and Baron d'Estournelles de Constant; Henri Bergson, Paul Bourget, Emile Boutroux, M. Brieux, Gabriel Hanotaux, and Marcel Prévost, all members of the French Academy; Alfred Croiset Levy-Bruhl and Camille Saint Saëns, members of the Institute of France, and André Tardieu, the well-known member of the Chamber of Deputies.

Whether or not a sufficient endowment fund can be raised is a question that must be left for the future to decide. Here I wish only to discuss the general questions: Is there a public for an American Library in Paris? Are the needs and character of this public of a kind to justify the effort to secure a permanent endowment sufficient to maintain and increase such a Library? What should be the fundamental aims and purposes of such a Library?

There is a curious divergence of opinion as to the number of British and Americans who are more or less permanent residents of Paris. No satisfactory official statistics exist covering this

*Abridged from a paper read before the Atlantic City meeting of the American Library Institute, April 29, 1921.

point. After careful comparison of the data available I am of opinion that a conservative estimate would place the number between 20,000 and 25,000 persons. Broadly speaking the library needs of these persons run parallel to those of an American community of the same size. Among the clearly defined groups now making active use of the collection are (1) officers and employees of the British and American Embassies and the governmental commissions engaged in clearing up and liquidating war-time activities; (2) the personnel of welfare organizations like the Red Cross, Y. M. C. A., etc.; (3) the employees of the American and English banks, commercial houses, and industrial corporations which have large branch establishments in or near Paris; (4) English speaking students in the university and other educational institutions; (5) newspaper correspondents, translators and writers resident in Paris; (6) tourists who have sufficient time to do some reading or studying; and (7) the wives and children of the officials and business men residents here.

The French clientèle comprises: (1) students and teachers of English in the lycées and normal schools; (2) university professors and students whose courses are concerned with English and American History, Literature, Language, etc.; (3) journalists, translators, and men of letters; and (4) an increasing number of French men and women who read English and are desirous of informing themselves on current events and tendencies in the English-speaking world.

During 1920 the character of the books circulated followed much the same lines as those of the average public library at home. As usual fiction and juveniles were in the lead, their numbers representing some 70 per cent of the total circulated. History and literature were next in rank, with philosophy, travel, biography, sociology and useful arts following in substantial proportions.

No statistics are kept of the reference use of the collection. From the close personal observation I have made of this side of the library's activities, I am convinced that the services it is rendering are extremely valuable, that they reach a very appreciative and important audience, and that it is in this direction that the French students, teachers, literary workers and readers are making the most constant and effective use of the Library. It is here also that the differences between American and European methods of service are very clearly marked and receive the warmest praise from those to whom our practices are a revelation.

It may then be confidently stated that there is a definite public in Paris which needs the

service an efficient American public library can render, which is already using the present collection actively and seriously and whose demands and requirements are increasing in number and variety every day. French, British, and Americans of all classes, vocations, and interests form naturally the bulk of this public, but it also includes a not insignificant number of students of many other European nationalities. Probably never before in history has European interest in America, American ideals and tendencies, and American current events, been so keen and searching as it is to-day, and the American Library in Paris, Inc., is at this moment perhaps the most effective means of responding to this interest that the Continent affords. But its collections and administrative facilities represent only the nucleus or the beginnings of what they ought to be if a really adequate response is to be made to this clearly evident European need and desire for an authoritative, and disinterested source of information regarding the English-speaking world.

Just as a fundamental rule of rhetoric prescribes that a discourse should be adapted to the time, place and audience for which it is intended, so the primary purposes and objects of a library should be dictated and conditioned by the character and needs of its known and potential users. In the case of the American Library in Paris its audience divides easily into certain well-defined categories: (1) our old friend the so-called "general public"; (2) journalists, men of letters, publicists, and public officials; (3) teachers and students of all ranks from the elementary school to the University; (4) trained specialists and investigators working independently or as graduate students and professors in the University and other higher institutions of learning.

Under these circumstances and assuming a steady growth and development of the library during the next fifty years, I should recommend that the Trustees of the Paris Library take as its working models such institutions as the present New York and Boston Public Libraries. Its program then would be: (1) The gathering of a carefully selected, well-balanced circulating collection representing all subjects of legitimate human interest; (2) The concurrent development of a fine Reference or Reading Room collection similar to those in Bates Hall, the New York Public Library, and the Library of Congress; (3) The securing thru gift, bequest, or separate endowment of special collections on subjects within its defined scope, collections so complete or representative that they would provide adequately for advanced investigation and original research.

Further, save for necessary reference books and the customary tools of research, I would, for a long time to come, restrict the acquisitions of the library to *printed books in the English language*, illustrating, recording, documenting, relating to and treating of the origin, progress, institutions, history, arts, sciences, characteristics, and ideals of the English-speaking peoples and their contribution to what we call modern civilization.

The governing purpose of the directorate and of all benefactors should be to make an *addition* to the intellectual resources of Paris and France, and *not a duplication* of any institution or book collection large or small already existing on the Continent. The libraries of Paris are magnificently equipped with books and manuscripts in ancient and modern languages on a wide variety of subjects, but their resources in books in English are notably weak and insufficient. I have made earnest inquiry to assure myself of the truth of this last statement and French scholars and librarians of the highest authority assure me that it is so. The funds of the Bibliothèque Nationale and the Library of the Sorbonne are utterly insufficient to provide an adequate representation of even the current book production of Great Britain and the United States and there is not the slightest prospect that this condition will improve within a generation or two.

The existence in Paris of a fine general and special library of works in English on the subjects above referred to would fill a want now acutely felt and increase the educational resources of this great center of learning. Its mere presence here would stimulate the study of our history and institutions as no other single thing could do, and students would be attracted to it from all parts of Europe and the Near East. The results of their studies, disseminated thru books, reviews, newspaper articles, lectures and teaching could not fail to result in a far greater and better understanding of the English-speaking races than exists to-day. Such a gift to France would be both practical and idealistic. It would be as unique of its kind as the Statue of Liberty given us by France was, and as symbolic within its own sphere. I am fully aware of the fact that such a plan as I have sketched would be very costly, but I am unwilling to believe that the cost factor alone would cause its failure or be the reason for disapproving it.

As a member of the American Library Association I should hope that the methods of administration, technical processes and spirit of un-

selfish public service that characterize our libraries at home would always be represented and exemplified by the Paris Library both for its own success and welfare and for the library world of Europe to visit and study as a model. Its Director and principal Heads of Departments should be products of American library training and experience. To represent properly A. L. A. standards, its professional staff even now should comprise (1) Director, (2) Head of Circulation Department, (3) Reference Librarian, (4) Chief Cataloger and Classifier, (5) Children's Librarian. The best qualified one of these four chiefs might well perform the duties of Assistant Librarian if that position should be necessary. But each one of them ought to be a real expert in his special work and together they should be able to train thoroly all other assistants the Library might require. Collectively also, this expert group could be organized into a little teaching staff conducting a training class for candidates for the library service, and for a limited number of others, English, American, or foreign who might desire a brief course of systematic instruction in library work and practice. I wish that in some way an arrangement might be worked out whereby under the sponsorship of the A. L. A. a highly trained personnel and adequate salaries for these five pivotal positions might be guaranteed to the Trustees of the American Library in Paris. Such a connection would seem to me to be the most logical and fitting way in which the constitutional relationship of the A. L. A. to the Paris Library might be maintained and our professional interest conserved.

With such a staff acting as intermediaries numerous reciprocal services could be rendered American and European libraries and other institutions of learning. Arrangements could be made for the photographing of books and manuscripts, for international loans, the establishment of closer relations between libraries and dealers and publishers, inspection of collections offered for sale, etc. The experience of the past year shows that there is ample opportunity here to supply to European inquirers varied and important information regarding American publications of every sort, and our American correspondence shows similar needs at home regarding European books and periodicals. Librarians and educational officials come to examine the catalogs, the system of classification, book cards, shelf marks, steel stacks, etc., to inquire how to obtain Government and State publications, the publications of American Universities, etc. The range of inquiry seems infinite. The opportunity for a bureau of information

is wide open and gaping. All these things could be fulfilled and accomplished if only the requisite personnel in number and quality and adequate financial means were at hand.

Altho to some the idea may seem to have a too commercial tinge, I should also much like to see one or two rooms of the Library building fitted up for the systematic and attractive display of typical American Library furniture and equipment, and representative exhibits of the standard sets, series, and chief publications of the leading American publishers. If they will pardon my using their names in this public way I should like, for example, to see installed in these rooms sample sections of the Art Metal, Borden, Library Bureau, and Snead stacks; exhibition cases containing samples of Gaylord Brothers' many and valuable library aids, labor saving devices, pamphlet holders, etc. And, on the shelves of the sample stacks I should like to see displayed exhibition sets of the standard educational series published by Scribners, the Century Co., Appleton, Houghton Mifflin, Ginn and Co., Heath and Co., the American Book Company; a set of all the editions of Webster's Dictionary from the twenty-five cent issue up to the Unabridged; the same for the Standard Dictionary; sets of our leading American encyclopedias; the Atlases of the Rand-McNally and Hammond Companies; the scientific books of Wiley, McGraw-Hill, and others; the H. W. Wilson publications, the Ronald Press books, etc. The *ensemble* thus constituted would be an informing exhibit of standard or typical American productions intimately connected with library activities. All necessary information regarding them could be given by the library staff, the devices explained and their uses demonstrated to all visitors or inquirers interested in such matters.

Such are some of the aims, purposes and definite activities that an American library in Paris could pursue and carry out to the fullest extent of the means provided. They are purposes and activities which would surely have far reaching effects for good not merely in the library world, but in far wider national and international circles.

A Joint Health Library

AN interesting experiment in library co-operation is being made in New York (370 Seventh Avenue) where the separate libraries of the National Tuberculosis Association, the National Committee for Mental Hygiene, and the American Social Hygiene Association, and the National Organization for Public Health Nursing have been brought together in one collection under the administration of the Common Service

Committee, which consists of the executive officers of these four organizations and the acting executive officer of the National Health Council.

For the present, the component parts of the Common Service Committee library are to be treated as unit departments so far as cataloging and classification are concerned, but if the experiment proves successful, it is planned to adopt a common classification and a joint catalog. A marked economy is already apparent in doing away with duplication in book-buying and with overlapping of work by the library force. Many major and minor subjects are covered in the collections. The tuberculosis section merely touches on the pathological side of the problem, but is very complete on the sociological side—care and treatment, sanatoria, statistics, surveys, etc. In the mental hygiene section, psychology, psychiatry, nervous and mental diseases, with causes, prevention and care are the chief subjects. The American Social Hygiene Association collection covers sex education, marriage, the family, reproduction, prostitution, public health, and the venereal diseases in their social aspect. Specific problems of community nursing and child welfare, as well as other obvious subjects are included in the Public Health Nursing department.

Much of the material in the joint collection is in clipping and pamphlet form and for this reason, while all the divisions are available for reference purposes, lending privileges in some subjects are somewhat restricted. Special concessions are made to nurses, students, physicians, social workers, and teachers, however, and the American Social Hygiene Association maintains a special lending service for lay readers. Material on the legal aspects of included subjects forms a valuable part of each department, and the joint reading room is supplied with the most important American, Canadian and British, medical, psychological and general health periodicals with certain selected Continental magazines. Bibliographies on subjects connected in any way with the joint collection will be supplied on request. A weekly index to health literature found in these periodicals is being issued by the Library. At present, this is distributed only to the staffs of the co-operating organizations.

ISABEL F. TOWNER, *Reference Librarian.*
National Health Council.

FOR COUNTY LIBRARY CAMPAIGNERS

In the November *Good Housekeeping* (ready about October 20) Anne Shannon Moore tells under the title "When Women Will" of the fight made for a county library for Pendleton, Oregon.

The County Library System of California

By R. R. BOWKER

THE county library system of California has been indeed a triumph of that state. From the small beginnings at Hagerstown under the Maryland law of 1898, where in 1901 Miss Titcomb made a county service notable thru her book wagon and other devices, and the less known experiment at Van Wert, Ohio, about the same time, the idea of a rural library system, of which the county should be the unit, has developed in more than half of the states, which now have some kind of county law. But California has carried forward the plan farther than any other under its county library law of 1911 and subsequent legislation. The ingenious post card, sown broadcast by the California State Library to awaken public opinion thruout the unorganized counties, illustrates graphically the great achievement that more than two-thirds of the counties of California have already county library systems—a splendid record of progress within a single decade.

Indiana was, in one sense, the pioneer state in this regard, for its initial constitution of 1816 included a requirement that the General Assembly in organized new counties should set aside 10 per cent of the proceeds from town lots in the county seat for a public library, and should also provide for associations to conduct such libraries. Four counties, Pike, Davies, Jennings and Sullivan, made what proved to be false starts under the allotments and organizations which the General Assembly did provide for immediately after the adoption of the constitution, and in Scott County a fund from the sale of town lots accumulated until a county public library was organized a century later. The provisions were really for privately managed libraries for public use. The constitutional provision was dropped in the revision of 1857, but a general law took its place, and under this law, there survives a small library at Marion County court house, as a relic of the past. Thus, Indiana is entitled to historical rather than practical credit until the passage of its modern county library law of 1917.

James L. Gillis was appointed State librarian of California in 1899, and being without professional experience, he decided in 1903 on a journey to the East, whence he returned with the traveling library system in mind. This did not prove adequate as a solution of California problems and a first county library law was passed in 1909. In another visit east Mr. Gillis

discussed with library friends at the Mackinac Island Conference in 1910 the development of the county system with the result that the original act was superseded by that of 1911 which with slight modification has remained the basic law, and this he put into practical and successful execution before his lamented death in 1917. Milton J. Ferguson, his assistant and successor, took up his work with equal enthusiasm and effectiveness, and under their continuing administration, the county library system has grown in California to its present proportions.

The California county library law is permissive, not mandatory, authorizing county boards of supervisors to establish a library at the county seat with branches in such parts of the counties as may desire library service but excepting localities which furnish separate library facilities. These may, however, join the county library system and become branches. The supervisors, who have the taxing power for the county, may impose a library tax within a maximum of one mill on the dollar. They may also levy a special library tax to provide for library buildings. They appoint the county librarian and make other appointments on the recommendation of the county librarian, who has a salary originally placed at not less than \$500 nor more than \$2400 per annum, but since substantially increased under amendments to the law, the maximum under the amendment of 1921 being \$4000.

The county librarian has direct charge of the selection and purchase of books and of the establishment and administration of branch libraries. The county librarian must pass an examination and receive a certificate from a board of library examiners consisting ex officio of the state librarian as chairman, and the librarians of San Francisco and Los Angeles. Librarians are required to attend an annual meeting called by the state librarian. The state library is charged with the general supervision of the entire system.

Of California's 58 counties, 42 have put the county library scheme into practical operation, the latest, Orange, so late as August 1, 1921; in San Francisco city and county are co-terminous, and 2 counties, Shasta and Sonoma, have adopted the county scheme, but have not yet put it into practical working. The other 13 counties are sparsely settled, but it is in such as these that the county system is specially needed. There are at last report 3584 branch

libraries, meaning libraries large or small associated in the county system, of which 1982 were for school districts out of a total of 2917 school districts in these counties. In the last reported year, ending June 30, 1920, \$718,984 appropriations were made for library service by the counties utilizing this system, and 1,519,331 books were in the collections.

Los Angeles County with its enormous area of nearly four thousand square miles, larger than Delaware and Rhode Island together, or almost as large as Connecticut, a million population, and over a billion and a quarter wealth, is the banner county with 313 branches, including 129 school district branches out of 193 school districts in the county, with \$101,000 annual income and with 256,581 books. This covers all libraries within the county, except the Los Angeles Public Library, with its many branches, and a few separate local libraries in small places. The distinction between the city and county library is illustrated by the fact that a branch of the city library is placed for local use, by understanding with the county library system, in the Hall of Records, where that system has its headquarters.

Los Angeles County, in fact, supplies the most interesting example of the workings of the county system in association, but not under contract, with a great city public library. The county librarian Miss Celia Gleason, had been assistant librarian of the Los Angeles Public Library almost thru its entire existence from the administration of Miss Kelso into that of Mr. Perry. She is an executive of immense and intense energy and devotion, caring for every detail of the libraries under her charge, which have accordingly the less need and motive for self-development. Outside the city of Los Angeles, there are still several smaller public libraries which have not come under the county system, involving sometimes difficult details of territorial adjustment. Of the larger libraries which are branches of the county system, that at Venice has special interest because it is now housed in a sort of community house and there is likelihood of the gift of a separate library building from the estate of the projector of this Los Angeles suburb. The fact that local boards of trustees are advisory only and have no real administrative power, possibly acts to dampen private generosity and public support of a local library. At the other extreme, are the branches which are practically stations, as on the fruit ranches, where a collection of perhaps a hundred volumes, well assorted as between books of general or reference character, and books relating to local industries are placed

under charge of a competent person, perhaps the foreman of the ranch, who is paid a small monthly sum for care of the books and report upon their circulation. These books are for the general public use of the community, but practically are utilized chiefly by the people on the ranch. No other system would meet so well the needs of the rural communities in the counties, and the spirit in which the service is conducted and appreciated leaves nothing to be desired.

Section 16 of the law authorizes contract by county authorities with a city library within the county but does not provide in that case for representation of the county on the city board, or for separate accounting for city and county books, as is the case in some states. Twelve counties made contracts with city libraries, but eight of them later adopted the separate county system leaving Riverside, Santa Barbara, Santa Cruz and San Joaquin as the remaining contract counties. Riverside County reports sixty-four branches, including thirty-two school districts out of a total of eighty-three, receives \$9000 from the County, as against \$18,000 from the City, and makes no specific collection of county books. Santa Barbara reports one hundred and twenty-five branches, including sixty school districts out of seventy-two, and \$15,260 county income, and makes no separate report of county books, which are together on the shelves, altho separately purchased and marked. Santa Cruz reports eighty-four branches, including forty-five school districts out of fifty-six, \$3000 county income, and makes no separate report of county books. San Joaquin reports sixty-eight branches, including twenty-two school districts out of ninety-five, and \$14,756 county income, but makes no report of county books. This average of \$10,500 county support on the contract system does not compare favorably with the average of \$17,800, or, omitting Los Angeles county, \$15,500 on the straight county system. One criticism against the contract system is that where books are not required to be separately purchased and segregated accordingly, the county owns no books in case it desires to divorce itself from the city contract, but where the county appropriation, as in Riverside County, is so small in proportion to the service, the Riverside answer that only service is paid for seems to be a fair reply.

In the words of State Librarian Ferguson: "Library service on the part of the State is not hydraheaded; it is centered in the State Library which therefore carries on all the work sometimes divided in other states among several commissions or institutions," which "acts as a clearing house and finishing school for library assistants" and "is a sort of guide, philosopher and

friend to all the libraries of the state. It lends its 300,000 volumes—not fiction or juvenile books—thru libraries, in order that the individual may not lack for expensive, serious, infrequently demanded, etc., publications, and in order that by such co-operation injudicious buying may be eliminated.”

It is the paternal nature of this supervision and control by the State library, coupled with the enthusiastic belief of the past and present State librarians, that the county system, pure and simple, is the right method for California that forms the chief basis of criticism of the system in its practical workings. There seems, in fact, danger that local responsibility will be discouraged and the organization of city or town libraries under local boards of trustees checked, and the development of individuality in local librarians retarded under the system. While the multiplicity of local boards unsupported by public sentiment and uninterested in their task is an evident evil, yet there is definite value in the community spirit which comes with “owning your own library” rather than being a “branch” of a larger organization.

There has been some criticism of the California library law because it is only permissive and county boards of supervisors are not required to act either by the law, or by petition of citizens, or by mandate at an election. Possibly such mandatory provision might strengthen the law, altho the missionary activity of the State library organization in developing the county system has perhaps been more effective in California than a mandatory law would have been. One good feature of the law is its flexibility, permitting almost any relation between local libraries and the county system, from absolute independence all the way to practical absorption, a form of local option which has probably avoided many difficulties that would otherwise have arisen. The Oregon law is quoted as having one additional feature of flexibility, which permits state or county authorities to assist existing local libraries which are independent of the county system. The limitation of the maximum tax of a mill on the dollar also meets with criticism as involving in some cases inadequate support, but this is mitigated by the authority to levy a special tax for library buildings.

There have been two endeavors to modify the present county library legislation, both of them defeated by vigorous opposition from the advocates of local autonomy. One of these was the repeal of Section 16, which repeal would have prevented contractual relations, except in the case of existing contracts. The other was the proposal that municipal librarians should be

required by the state to hold certificates from the Board of Library Examiners, which was opposed partly on the ground that the ex-officio nature of that Board, including librarians whose libraries had library schools or training classes, might tend to prevent the development of other library schools not orthodox in character. As a result of this defeat, the California State Library Association has proposed another scheme of certification, of unofficial character, which involves the appointment of a committee of five by the State Association.

On the whole, the triumph of the California library system has been one of the great elements of library progress in this country, as setting the pace for other states, while the minor criticisms upon it in its practical workings are most useful in throwing light upon proposed legislation in other states.

Files of German Periodicals for the War Period

THE Committee on completing files of German periodicals for the war period has, with the help of the Institute for International Education, sent to the Notgemeinschaft deutscher Wissenschaft a list of desiderata in files of German periodicals for the war period in certain American libraries. It is hoped that, thru the Notgemeinschaft, German libraries with duplicate issues of these periodicals will be able to help in filling the gaps.

The Committee expects to receive, about the middle of November, a similar list of desiderata in American periodicals on file in German libraries and hopes to be able to fill many of these gaps from the duplicate stock owned by American libraries.

The Committee has started on a round of American libraries a list of duplicates of German periodicals held by American libraries, and available for exchange. The eighteen libraries furnishing lists of duplicates are as follows:

Amherst College
University of Chicago
Cornell University
University of Idaho
State University of Iowa
John Crerar Library
Massachusetts Agricultural College
Michigan University Library
New York Public Library
New York State Library
University of North Carolina
University of North Dakota
Princeton University

Stanford University
University of Texas
Vassar College Library
Williams College Library
Yale University

The Committee has received from G. E. Stechert a list of German periodicals that have ceased publication. This list is as follows:

- Alemannia. vol. 44, no. 3.
Arbeiterfreund. 1914, no. 4.
Architectur-Welt, Berliner. vol. 20.
Judsche Archiv. no. 9.
Archiv fuer Kunstgeschichte. vol. 2, no. 4.
Archiv fuer slav. Philologie. vol. 37, no. 4.
Archiv fuer Schriftkunde. vol. 2.
Archiv Internat. fuer Schulhygiene. vol. 9, nos. 3-4.
Archiv fuer Sexualforschung. vol. 1, no. 2.
Asien. end of 1919.
Balkan-Revue. 1920, vol. 6.
Bauzeitung, Allgemeine. vol. 83, no. 4.
Berichte ü. Handel and Industrie. vol. 23, no. 5.
Bibliographie Allg. d. Staats and Rechts-wissenschaften Puttkammer and M. 1914, nos. 11-12.
Bibliotheca Mathematica. vol. 15.
Bühne und Welt. end of 1918 issue.
Centralblatt fuer Röntgenstrahlen. end of 1920.
Zentralblatt fuer Volksbildungswesen. vol. 14, no. 13.
Concordia. end of 1920.
Das Groessere Deutschland. end of 1917.
Eisenbahn Zeitung, Oester. 1919, no. 12.
Erde, Deutsche. vol. 13, no. 8.
Frauenbewegung. 1919, no. 24.
Fremdenblatt Illustrated War Chronicle in English. 1917, no. 27.
Gartenstadt, Mitteilungen d. Dt. Gartenstad. etc. vol. 8, no. 11.
Hegel Archiv. vol. 3, no. 2.
Himmel u. Erde. Jrg. 27., no. 12.
Interieur. vol. 15, no. 12.
Jahresbericht, Theologisher. vol. 33.
Katholik, Der. 1918 no. 10.
Deutsche Konkurrenzen. no. 393 (vol. 33).
Marine-Rundschau. 1914 August (1920).
Marine-Zeitung, Deutsche. June 30, 1919.
Memnon. vol. 7.
Miscellanea musicae bio-bibliographica. vol. 3, no. 4.
Mitteilungen ueber Gegenstaende Artill. u. Geniewesen. vol. 48, no. 12.
Mitteilungen u. Jahrbuch d.k.k. Centralloomm. etc. vol. 16, no. 1-2.
Mitteilungen, Mineralogische. vol. 34, no. 6.
Mitteilungen a.d. Gebiete d. dt. Seewesens. 1914, no. 12.
Volkswirtschaftliche Mitteilungen aus Ungarn. 1916, no. 12.
Monatsschrift f. deutsche Beamte. end of 1919.
Monatsschrift f. Handelsrecht u. Bankwesen. end of 1919.
Monatsschrift, Oesterr, f.d. Orient. 1918 (Oct.)
Die Musik. vol. 14, no. 24.
Nachrichten K. K. Minist. d. Innern Berr. Unfall Versicherung. end of 1919.
Rundschau, Deutsche f. Geographie u. Statistik. Jrg. 37, no. 12.
Rundschau, Theologische. Dec. 1917.
Wiener Schachzeitung. 1916, no. 8.
Sitzungsprotokolle des Ständigen Arbeitsbeirathes. 1920.
Zeit. f. Gymnasialwesen. end of 1921.

Libraries and Museums

By JOHN COTTON DANA

Librarian, Public Library, and Director, Museum Association, Newark, N. J.

IV. The Literature of Museum Management

MUSEUMS are much like libraries. The latter have far outstripped the former in the pursuit of public utility. Libraries began, as did museums, under a demand from scholars and a desire on the part of the rich and powerful for acquisition and preservation.

A few founders of libraries and a few librarians, several centuries ago, asked that their collections be open for general use; but not until the early years of the American Library Association, 1876 to 1895, did the wish to secure public utility lead to definite efforts to enlarge the circle of library users and to that open-access atmosphere in which the idea of service now vigorously flourishes.

The development of museum management will probably take the same course as has that of library management. The former is even now taking on quite rapidly many of the features of the latter. The librarian who examines, even slightly, the literature of museum history and museum management will almost surely find the facts to be as just stated, and will conclude that the best library method of to-day is a method which is astonishingly well fitted to become the museum method of tomorrow.

The literature of museums is meager. The American Association of Museums published the proceedings of its annual meetings in pamphlet form from 1907 to 1917, and since the latter date in a journal called *Museum Work*. These proceedings and this journal should be in every library of moderate size, and in small libraries whose towns have the question of a local museum under consideration. They can be purchased for about twelve dollars complete to date, of Harold L. Madison, editor, Cleveland Museum of Natural History, Cleveland, Ohio.

Mr. Paul M. Rea, to whom all museum workers owe a large debt for his volunteer work in compiling these proceedings, prepared in 1913, 1914 and 1915, and the U. S. Commissioner of Education published, studies of the growth of a closer contact between museums and the public, under the title, "Educational Work of American Museums." Tho now seven years old they set forth admirably the present status of museum management.

A brief report on the same subject was compiled in 1914 for the Newark Museum Association by Louise Connolly and is sold for fifty cents.

Four small volumes on museum method have been written by me, and published at my own expense. I venture to mention them here because they are quite unprofitable, to me; and because in No. 1 is a list of Books and Articles on the Elements of Museum Management, and in No. 2, another list in which references to museum print are arranged under the subjects with which they deal; and because in No. 1 is a list of "Museums that can Help you"; and because they contain the observations and conclusions and forecasts of one who seems quite keenly to feel that progress in all things, and therefore in museum management, is possible only thru changes, and finds that changes in museum method are unnecessarily slow. The four books, sold by the Elm Tree Press, 14 Mt. Prospect Place, Newark, N. J., cost a dollar and a half each, or five dollars for the four. Their titles are:

No. 1. "The Gloom of the Museum. How to Remove the Gloom." With a digest of the best of the literature of museum management. No. 2. "The New Museum." On the museum as a definitely educational enterprise, with references to recent literature on this subject. No. 3. "Installation of a Speaker." One who addresses an audience should be given an appropriate setting and all the apparatus for handling manuscript or displaying objects or pictures; that is, should be as carefully "installed" as is a highly prized object in a well-conducted museum. Illustrated and with full directions for preparing needed material. No. 4. "A Plan for a Museum." A plain statement of the kind of museum that it will profit any town or city to possess.

The Final Report of the Committee (appointed by the British Association for the Advancement of Science) on Museums in Relation to Education, 1920, can be purchased for a few cents. It is a thin pamphlet of sixteen pages only, but is a most enlightening bit of print on museum method. Of the work of a "local museum," which these notes have chiefly in mind, it says: "The general public should look to the local museum for information on all the various activities going on around them. If they are sure of that, their powers of observation will be stimulated. They will go to the museum to learn what ought to be seen, its why and its wherefore. If they see anything new, they will

go to the museum for information. Both museum and public will thus be mutually benefited."

Of museums and schools it says: "System and purpose must govern the use of the museum by schools. The aimless wanderings of groups of children about the galleries is sheer dissipation, a nuisance to the staff and to the public A keen teacher will find something helpful even in a dead museum, and a living museum will lay itself out to seek the advice and help of teachers in the attempt to play its part in the educational service of the locality." "We may especially note the possibilities, which have so far been only slightly developed, in the provision of circulating sets of illustrative objects designed for school use. It is essential, however, that such sets should avoid the error of over-systematization, especially for use in primary schools."

I made a brief report, in 1919, on the first ten years of what I call a "group of experimental museums," under my charge as director of the Newark Museum Association. It was printed in pamphlet form under the title "The New Relations of Museums and Industries," and is sent free on request to the Association. In it is described briefly, as part of an apologia for the museum methods we have adopted in Newark, the origin and purpose of the "British Institute of Industrial Art." This organization was established during the war thru the co-operating activities of the British Royal Society of Arts, the (National) Board of Trade and the (National) Board of Education. It is now at work, holding exhibitions, bringing together artists, designers, craftsmen, manufacturers, dealers and the products of factories and of individual workers. Also it is establishing a museum, not finding in existing museums the objects and methods it needs, of the type which it finds most essential to its main purpose, which is, "To raise and maintain the standard of design and workmanship of works of industrial art produced by British designers, craftsmen and manufacturers, and for stimulating the demand for such works as reach a high standard of excellence." The existence of this organization is a powerful argument in favor of the promotion in this country of local museums of the type these notes of mine are advocating.

This quotation, from the pamphlet called "New Relations of Museums and Industries," tells of the attitude of our museum toward the schools.

"The best of museums, no matter how diligently it try to be attractive and useful, is quite minor in its influence compared with the schools. We have tried to adjust ourselves to

this fact. We have known that what we can do in the teaching line with young people should be looked on as experimental. If we are successful in discovering a few boys and girls who are born to become students, collectors and organizers in any field whatever of science, art, society or industry—and we have been remarkably successful herein, in view of our limits of income, space, equipment and staff—then we can do little more. The schools, we have a right to assume, will take advantage of our modest discoveries, and pursue them. This assumption applies also to such success as we have had in meeting the calls of teachers for objects that they can use in their classrooms to make more attractive, more easily understood and more impressive the topics their text-books expound. We lend, of objects gathered for this purpose, several thousand each year. . . . A school museum can be far more effectively and far more economically maintained as a part of a general museum of art, science and industry, than as an independent institution."

Professor William Rothenstein, principal of the English Royal College of Art, and himself an artist, recently gave an address before the Royal Society of Arts, published in its *Journal*, March 18, 1921. (Price one shilling.) The address is on "Possibilities for the Improvement of Industrial Art in England," and is of value to any student of the museum problem. In speaking of museums, Professor Rothenstein says:

"We (industrial art promoters) feel that the whole attitude of the museum has been becoming more and more of an acquisitive attitude, and less and less of a creative attitude, and one of the ways in which I believe a beginning has got to be made some day, when we have thrashed the subject out, is a complete reconsideration of the place the museum has in the community. The museum of recent years has tended more and more in the direction of the wealth collector. It has become a place whose directors try to acquire more objects than the museums of neighboring countries possess; they feel that because a thing is very rare they must find a home in their own particular museum for that most expensive of all objects, and they require ever larger sums of money for acquiring rare objects, forgetting one of the principal reasons for the existence of museums in our midst, i. e., to help creative people and the manufacturers thruout the country to solve their own difficult problems. . . .

"When we try to discover what particular purpose those museums in big cities really serve to-day, I think we shall find that my profession (the painter's) has got hold of them with a good deal of success, and that the limit of the

ideals of most of our great municipal authorities is to provide heterogeneous collections of pictures which people may look at and discuss, and in which they may possibly find some pleasure. The main object of the museum, which is really to set the old with the new, to compare the possibilities of to-day with the possibilities of the past, and the powers of contemporary craftsmen with the powers of those of the past, has not been attained—that active side of the museum has scarcely yet come into being. . . . That is the first suggestion I would put before you, the serious consideration of how the past is going to help the present.”

Lord Sudeley has published several articles in recent years advocating an increase of educational work in British museums. His last appeared in the *Nineteenth Century* for July, and was printed in pamphlet form by Constable, London. Lord Sudeley will, I am sure, send to any inquirer a complimentary copy on request. It is an excellent statement of the shortcomings of museums, yet makes due acknowledgement of their achievements.

The Commercial Museum of Philadelphia is in many respects our most advanced institution in the museum field. It has for its “sole object the development of the international commerce of the United States. . . . It does this by encouraging individual manufacturers who are equipped to handle the business, to extend the market for their wares to foreign countries, and then by assisting them in a very practical manner in inaugurating and developing that trade. The assistance given is in the nature of live and practical information on every phase of export trade, its elementary features as well as its technicalities. . . . Its library of commerce and travel. . . is one of the most complete of its kind in the world, of great assistance to the manufacturer and business man, the general reader and investigator, and invaluable to the staff of the institution. . . The exhibits installed in the main buildings of the institution cover the commercial materials of the world, the imports and exports, and illustrate the manners and customs of foreign countries. The main purpose of these exhibits is to portray in a vivid fashion the products and peoples of foreign lands.

“There have been distributed among the schools of the state more than three thousand miniature museums, comprising commercial products, photographs, maps, etc.

“There has also been developed a system of daily illustrated lectures to the schools, delivered in the Lecture Hall of the institution by members of the staff. Free illustrated lectures on topics connected with geographical description

and travel are offered weekly during a large part of the year.”

This museum has a long list of publications, sold at low prices, many of which should be found in public libraries.

The American Museum of Natural History, New York, says of itself that it is “Devoted to natural history, exploration, and the development of public education thru the museum.” Were it by any one said that “the museum of public utility” is a thing to be desired yet nowhere to be found, a sufficient answer to the statement lies in the existence and activities of this museum. Those who may be planning the humblest of museums in the smallest of communities will find in the methods of this institution, as set forth in their many publications, much information and suggestion of the greatest value; and were our largest museums, especially those of art, to adopt in a general way its methods they would vastly increase their “public utility.” Its monthly journal, *Natural History*, is attractive, popular in a good sense of the word, scientific and instructive. Its long list of publications includes much material that should be in every library and much that one beginning a study of museum method will find helpful.

“Educational Work of the Commercial Museum of Philadelphia,” is the title of a pamphlet which well describes, with text and pictures, all that its title claims for it. It is Bulletin, 1920, No. 13 of the Bureau of Education, Washington, D. C., and can be bought of the Superintendent of Documents for 15c.

Bulletins or monthly publications of our art museums are attractive and in many cases of no small value to those who are interested in the fine arts. The model on which nearly all of them are based is that of the Metropolitan Museum, New York. This, like most of its followers, is chiefly concerned with acquisitions and says little of museum method. An appendix, issued at stated intervals, reports on the museum educational work with children.

The Children’s Museum of Boston publishes a bulletin on its special field. All libraries of moderate size should get for their readers at least a few of these bulletins, say, the two already mentioned, and those of the museums of Cleveland, Minneapolis, Detroit and of the Art Institute of Chicago.

The annual reports of the leading museums of the country should be found in all large libraries, and, like their bulletins, should be studied with care by those who are planning to enter on museum work.

“Institutes of Visual Instruction” is the name which, as some suggest, should be given to what

we now call museums; and with the new name goes the further suggestion that museums should live up to its demands. The suggestion has at least the value of calling attention to an important part of the work that all museums will inevitably pursue when they strive for greater "public utility." A "Course in Visual Instruction," was given, June 20 to July 29, 1921, in the summer session of the Cleveland School of Education. It was well attended by teachers and museum workers, and gave to its pupils much pleasure and profit. A report on its methods and accomplishments can probably be obtained from Harold L. Madison, Park Museum, Providence, R. I.

I hope I have made it plain that the suggestions found in these papers are not to be thought of as new. Nearly all of them were definitely

made or broadly suggested long ago. They are here repeated partly because they seem to have been heeded by the managers of a few museums only. Of the rather early pleaders for the public utility of museums, two at least should be noted:

"Essays on Museums," by Sir William Flower. Macmillan, 1898 (12s. net) contains seven essays on Museum subjects.

"Memorial of George Browne Goode," with a selection of his papers on museums, etc., being Part 2 of the Annual Report of the U. S. National Museum for 1897 (\$1.25). Dr. Goode exerted a profound influence on museum development in this country and abroad. This volume contains his "Principles of Museum Management," and his "Museums of the Future."

Where Shall the Burden Rest?

By WILLIAM E. HENRY

Librarian, Washington State University

WHATEVER the faults or failings of a democracy, it must always be held in mind that they exist in the people and that they must be cured there. Our most serious fault is indifference to individual duty—personal neglect of social welfare. These facts manifest themselves in our tendency to "let George do it," and to question, "Why does not 'someone' look after this matter?"

These thoughts come to me at this time because of the common tendency to make public attacks upon free public educational institutions, ostensibly to cut operating expense. This is clearly apparent in the public schools—in the grades, still more in the high schools, and reaching its height in state universities. It is also quite as marked in public libraries.

The attack is so specifically against all free educational institutions that it causes me to question whether there be not a concerted and well-directed, yet well-concealed, conscious opposition to free public education, because educated groups are a little difficult to manage. I can scarcely permit myself to believe what is implied in the preceding sentence yet many indications point in that direction.

Whatever the ultimate motive behind the overt acts it is clear that there is war against tax-supported educational institutions, one and all. If a well planned attack, the best time for its success has been chosen—a time of high taxes which serves as an admirable camouflage for the motive behind the movement.

If not a vicious and a concerted movement,

the period of high taxes has attracted attention to all public outlays, and the institutions here mentioned are most frequently and most readily attacked because these institutions are most apparent to all the people and the facts concerning them most readily obtained by "A Taxpayer." This individual always starts the disturbance and, when traced to his hiding, is either not a taxpayer, or is one who has legal possession of what he did not earn and who pays a considerable sum in taxes—the only social service he performs and that only by compulsion.

Our present interest is the cut being made in library budgets, whether it be a part of a general movement against education, or whether because it is a budget that is easily attacked and one that has few friends. There is much at stake in this activity, and its ramifications are in many directions. I can hope to point out but two or three of the more apparent ones.

The cutting of library budgets must lower the book supply; lower the staff members in number; or lower the individual efficiency of the staff members. It may do all these things, and probably will.

Usually any cut into a library budget strikes directly at the book fund. We must have some fairly definite number in the staff to keep the library open to its public. Certain operating expenses—heat, light, janitor service, staff—must be provided, or the institution closes its doors. Whether in the institutional library or the public library, the first cut is always on

books. Those persons who are either instinctively or traditionally library patrons will continue the use of the library with almost any cut in the book fund. These are the people who compose the bulk of library patrons—upon these the library lives.

The staff number can sometimes be cut to some degree but not much. Certain posts and positions must be *occupied*, whether *filled* or not, and the library cannot usually operate with smaller numbers. The cut, then, that remains to be made, so far as staff is concerned, is usually a cut in quality, in preparation, in efficiency. As strong members drop out for any reason their positions are filled by less well prepared, less efficient, less well paid persons. The staff deteriorates at once. The public scarcely distinguishes the difference, and the library goes on badly crippled, but not noticeably limping.

This is precisely what is happening just now in many of the larger libraries. The library is failing, but the public does not recognize the fact and it goes by slow degrees from bad to worse. Trained librarians drop out, apprentice help comes in, and the level of efficiency is lowered, professional knowledge and spirit decay. We take one more downward step, we fill once professional positions with "clerical assistants," and the profession of librarianship is dead and years of prayer and evangelization will be required to awaken the spirit that many of us have known—of a profession built upon learning and the love of learning with social welfare as its goal.

The kindly-souled, short-sighted, and missionarily inclined librarian says, in conduct, if not in words: "We librarians must keep the positions filled and the whole machine running whether we have adequate funds or not. The people have withdrawn the funds, but the people must be served as before." Thus we librarians carry the burden of public parsimony instead of throwing it back upon the people where it belongs. If the people were made to suffer for their sins, they would cease sinning. That is the theory of all punishment. But so long as librarians will act in that vicarious capacity the people move on wholly indifferent to what has happened. People are not to be censured for economizing, even if unwisely done. But if they do economize, they should not be surprised nor hurt if the results fall back upon themselves. The people have no legal nor moral right to a service that they are not willing to pay for.

I do not oppose clerical help in the larger libraries. I am quite in favor of it, and have so advocated on many occasions. There is much

work in the larger libraries, that trained and educated people cannot afford to do. However, when well prepared persons are permitted or encouraged to leave a position that it may be filled by a "clerical assistant," then the profession decays and the people will suffer—but unconsciously.

One consideration that must not be lost sight of is this very important fact. The "clerical assistant," having no preparation, no professional comprehension, or appreciation, takes no responsibility. The few real librarians remaining in the staff must assume all responsibility and not only carry their legitimate burdens, but they must assume those that belong to others. This is the load that kills.

Then what shall we do when funds are cut? The reply in brief is: Cut the service to the people just in proportion to the cut in the budget by the people. Then the burden will fall precisely where it belongs. If the funds have been cut one-sixth, for example, then cut the number of the staff accordingly, and close the library one-sixth of the time. Then shall we the people know where we are hit and how badly we are hurt. We shall find it out in no other way.

If a "clerical" can occupy (not fill) the place of a well-prepared person, it is only a question of time when most of the staff will be made up of clerical material. The cheaper will drive out the dearer here as elsewhere. This is already happening, and the devotion of years to preparation goes for naught. And yet we wonder why more people do not devote years and money to preparation, and why salaries are low.

Let us consider the following point for a moment. If our budget has been cut, say, twenty thousand dollars, and we continue to give the public, so far as it sees, just as good service as it had before, it is a tacit admission on the part of the board and the chief librarian that their administration has not been efficient. If they can give the good service for twenty thousand dollars less than before, why were they not honest enough to save the twenty thousand dollars without being driven to do so. If they might have done so and did not, then they are proved inefficient executives by their own testimony. We do not dare to give as good service for less money without the tacit admission that we are either inefficient, or dishonest. Which shall we admit? The public must see and feel that it is less well served before it can be made to believe it.

Let us consider these things carefully. The education of the public must be injured by every cut in budget else the funds have not been wisely and honestly expended. Not only

is the education of the public being injured, but the profession of librarianship, which has been built up with care and labor, devotion and sacrifice, is crumbling because the very foundations are being dug from under it, in the attempt to give to the public what it is unwilling to pay for and which it does not deserve.

We as librarians cannot carry the people's just burden—we can only deceive both ourselves and them to the injury of both, by even trying to do so.

Let us give them all they are willing to pay for. Let us not bear their burden to their injury.

Best Books of 1920 for Children

THE following table represents the vote of twelve of the leading children's librarians of the country as to the best books published in the year of 1920 for the children's shelves of a public library, the vote being based on a tentative list, selected and presented by the book selection section of the New York State Library. The titles are given in the order of number of favorable votes received by each. The sign ++ indicates books which in the voter's judgment should surely be included; + books which are good and deserving favorable consideration;— books which are judged not worthy of inclusion.

—New York Libraries for August.

The Decimal Classification

After some months of unavoidable delay the work of editing the Decimal Classification has been taken up by Jennie Dorcas Fellows, who will carry it on at the New York State Library, Albany, N. Y., and to whom correspondence regarding the subject matter of the work should be addressed. Orders for the volume should, however, still be sent to Forest Press, Lake Placid Club, N. Y.

State Appropriations for Library Purposes in 1921

THIS table is prepared as a supplement to the Review of Library Legislation in 1921, printed in the LIBRARY JOURNAL for September 1. The statistics in each case are furnished through the courtesy of the library agency of the state. In most states the legislature meets biennially and the amounts appropriated are for a period

department. The name in the last column also varies, as historical commission, historical department. It will be noticed that many states have liberal appropriations for this purpose, especially those which are actively engaged in collecting their war records.

The difficulty of making correct and fair com-

State	Years covered	State Lib.	Lib. Commission	State Law Lib.	Legis. Ref. Bur.	Hist. Soc.
California	2	\$304,900	—	—	—	—

Wisconsin	1	16,000	51,500	—	31,000	—
Wyoming	2	15,000	—	—	—	—

of two years. In a few states the period covered by the appropriation is different, as appears in the second column. Six of the southern states had no legislative session.

In some states the state library and in others the library commission performs one or more of the functions included in the other columns. In some of the states represented under "Library Commission" the library agency has a different name, such as library division of the education

department. The name in the last column also varies, as historical commission, historical department. It will be noticed that many states have liberal appropriations for this purpose, especially those which are actively engaged in collecting their war records. The difficulty of making correct and fair comparisons by states is greatest in those states where the library agency is a division of the education department, as is the case in Connecticut, Massachusetts and Minnesota, and where the appropriations for library purposes are not definitely stated. For this reason New York and Utah state that they are unable to give their figures.

Where a column is left blank it does not necessarily mean that there is no activity of that

kind but that the work may be performed by some other department or that the person reporting did not have the information.

NOTES

Colorado. Commission, is for Traveling Library Commission; Law, is for librarian's salary. Fees from borrowers, approximating \$5,000 in two years, constitute the law book fund.

Connecticut. Commission. Of this amount \$30,000 is for school libraries and apparatus, \$35,000 for grants to public libraries and \$15,000 for the Public Library Committee of the State Board of Education.

Illinois. Also \$7200 for General Superintendent, \$11,700 for State Archives Department and \$40,750 for State Museum.

Indiana. Legislative Reference. Of this amount \$40,000 is for the preparation and publication of the Indiana Yearbook and \$4300 for agricultural statistics. The amounts for state library, law library and historical department are independent of salaries and general expenses.

Kansas. State Library. Also has \$5000 for new book stacks next year. The law library also has the exchange of the state supreme court reports amounting to \$5000 or more each year.

Maine. For other library purposes \$9300.

Minnesota. Amount given for Library Division (Commission) is an estimate. There is also an appropriation of \$6000 for traveling libraries, and \$64,000 for state library aid to schools.

North Carolina. Law Library. Includes estimate of \$2880 annually from law licenses. For rural school libraries the education department appropriates annually \$7500. Legislative reference is a department of the historical commission.

Oklahoma. Also \$10,000 for State Industrial Chemical Library.

Pennsylvania. Division of Public Records has \$23,040.

Rhode Island. Commission. \$10,500 for books for free public libraries, \$3000 toward salaries and \$3000 for traveling libraries and library visitor. The \$2500 is divided between two historical societies.

Virginia. About \$7250 spent last year on law library. \$5000 appropriated for War History Commission and \$5000 for state aid in establishing school libraries.

Washington. Of the \$37,600 the state library receives \$13,600 and traveling libraries \$24,000.

Wisconsin. The appropriations given are annual and continue until changed by the legislature, which may be for years. The Historical

Society has \$83,625 for the year ending next June and \$83,625 for the following year. It also has other sources of revenue.

Wyoming. Also has income from two land funds from which about \$10,000 was spent last year.

New York State Library School

By JAMES I. WYER, Director

THE New York State Library School was the first institution ever established for the professional training of librarians. That it was started in 1887 at the Library of Columbia College does not mean that Columbia was deliberately a pioneer in this form of professional education nor that in any strict sense the new enterprise owed its real initiative to the college authorities. The truth is that any renown which may properly accrue to Columbia from the fact that the first library school in the world was started there, is rather thrust upon the college by the zeal and persistence of its then chief librarian, Melvil Dewey. The Library School was started at Columbia merely because Dr. Dewey happened at that time to be Columbia's librarian. It would have been started as surely wherever else he might have been. Indeed when in 1889 Dr. Dewey went to Albany as secretary of the University of the State of New York the Library School was taken over by the Regents and established at the New York State Library at Albany, with which it has ever since been closely affiliated, the Director of the State Library being also Director of the Library School.

Among those of the forty-four members of the first two classes held at Columbia College who are still active in library work are George Watson Cole, librarian for Henry E. Huntington, Annie Brown Jackson, for many years trustee of the Public Library at North Adams, Massachusetts, Ada Alice Jones and Florence Woodworth, members of the staff of the New York State Library and still connected with the faculty of the School, Frank C. Patten, for nearly twenty years librarian of Rosenberg Library, Galveston, Texas, Elizabeth G. Baldwin and Harriet B. Prescott, who have never moved from the Columbia campus and who are today respectively librarian of Teachers College and head of the catalog department in Columbia University Library, Nina E. Brown, for many years an officer of the American Library Association and now on the Harvard Library staff, Edith E. Clarke, whose pioneer work with government documents was a notable contribution to American library activity, Gardner M. Jones of the Salem, Massachusetts, Public Library and for many years treasurer of the A. L. A., Mary Medlicott, for many years with the Springfield, Massachusetts, City Library, Caroline M. Underhill, of the Utica Public Library, Dr. George E. Wire of Worcester and Ama H. Ward

of the Harris Institute, Woonsocket, Rhode Island.

No mention of the early classes would be complete without a word as to Mary Wright Plummer, who, after a life devoted to library training and full of collateral activities and usefulness, too soon ended, was chosen president of the American Library Association for 1915-6.

Tho not of the first two classes there is no graduate of the school held in more affectionate regard, not alone by its alumni but by his many librarian friends, than its Grand Old Man, William R. Eastman. It is given to few to enter a new calling at fifty-five, to make a conspicuous success in it, to earn a solid reputation for authority in a special field and to give to it a generation of unbroken service. Mr. Eastman lectured on library buildings for twenty-six consecutive years at his library alma mater and for several years these lectures were given to four or five different schools each year. At eighty-five his interest in library matters is still keen.

A comfortable and attractive suite of six rooms in the New York State Education Building provides for the School of today a study room with desk space for about seventy persons, two class rooms, a seminar room, an office and a typewriting room. Besides the fully available half million volumes in the State Library, the School has extensive practice and seminar collections of its own.

It offers a two year course (of thirty-six weeks each) leading to the degree of Bachelor of Library Science granted by the Regents of the University of the State of New York to graduates of the School. Candidates for admission must be graduates of colleges registered with the New York State Education Department and must meet certain standards of character and fitness for the work.

The work of the first year gives a well-balanced general introduction to librarianship. The second year is devoted to further study of special subjects (in which there is a considerable range of electives offered) and to comparative study of library methods and administration. Details as to the courses of instruction appear in the School's annual Circular of Information.

Over nine hundred students have matriculated in the regular two year course, six hundred of whom are still in active service. Of these, seven hundred twenty-six have been

women and one hundred and seventy-eight men. Five hundred and thirty-six others have received training in the summer sessions which are held each year and which offer to those working in small New York libraries elementary but thorough instruction for a few weeks. For the last three or four years the summer sessions have been devoted to school library work with high school libraries especially in mind. The average annual enrollment in recent years in all courses has been between sixty and one hundred students.

Partly because it was a pioneer and partly because of its standards, it has been necessary to place special emphasis on training for administrative positions. At the same time, thorough training is given in the details and routine of the different phases of library work. Many of its former students are successfully serving as specialists in bibliography, cataloging, reference, business libraries, school libraries and other special lines. The scholarly or research side of library work is encouraged as well as the popular public library side and every effort is made to cultivate knowledge of books as well as to teach administrative methods.

The School has a national and even an international reputation and students have come to it from all parts of the United States and from many foreign countries. Over thirty students from Norway and Denmark have been trained here. Two or three from China have returned to enthusiastic out-post duty in that country. Its former students hold positions in an even greater range of territory and in all kinds of libraries. The outlines and published bulletins relating to the School's work are in constant request from other library schools and apprentice classes. Many of these trace their origin directly to the New York State Library School and are now or have been in charge of its graduates.

During its third of a century, the School has had but three directors and but four vice-directors, the latter having always served as its active executive officer. Its directors have been Melvil Dewey (1887-1905), Edwin H. Anderson (1906-8), James I. Wyer (since 1908) and its vice-directors Salome Cutler Fairchild (1889-1905), James I. Wyer (1906-8), Frank K. Walter (1908-1919), Edna M. Sanderson (since 1920). To Mrs. Fairchild especially, thru her long and devoted service, the School owes much in ideals, sound judgment and the development of its curriculum during peculiarly difficult formative years. Mr. Walter's years with the School were notable for abundant and inspiring teaching, for sound constructive work in keeping the School abreast of the changing

phases of library work and for a special interest and effort in business and school libraries.

Public Libraries in French Reconstruction*

BEFORE you see these pictures I should like to remind you that you are going to be shown villages which were invaded by the German army in 1914. Some of them, notably Anizy-le-Chateau, were occupied by them until the armistice. The other villages were recaptured by the French and in some cases houses were repaired, fields were cleared of the signs of battle and recultivated, and in 1918 the German army advanced again and destroyed all the work of reconstruction and left more horrible scars than had been made by the first invasion.

Several divisions of the American Army helped to recapture this section in July, 1918. The first and second divisions of the regular army and the thirty-second division of the National Guard from Michigan and Wisconsin were conspicuous in this attack, if one may judge from the numbers of graves of men of these divisions which are in the two cemeteries near Soissons.

When people so often ask me if the French express dislike of us I must answer that I have never seen the slightest sign of it, but many signs to the contrary. They are, of course, impatient with all the people who made money and lived in comfort during the war and are not now paying their share of taxation to repair its damages.

These people of the Aisne turned to the American Committee for Devastated France for help to rebuild and furnish their houses, to sterilize milk for their babies and to nurse their sick. And soon after they had a roof to cover their heads, beds to sleep in, a garden planted and a few rabbits sheltered they asked the Committee for books to read.

Miss Jessie M. Carson** was asked in June,

1920, to organize and direct libraries to serve the people in the one hundred and twenty-five towns and villages in the four cantons of the Aisne which the French government had assigned to the care of the Committee. Miss Carson had left her position in the New York Public Library early in the war to work for the National League for Women's Service, and in the Spring of 1918 went to Paris as assistant treasurer of the American Committee, which position she held until the library department was needed.

This film shows the result of only nine months work. Five libraries serve as centres for more than fifty traveling and station libraries. Three of these have been in charge of workers from the New York Public Library, Isabella M. Cooper at Blerancourt; Marian Greene at Anizy-le-Chateau, and I at Soissons. Lenore Greene, also from the New York Public Library, is in charge of the classification and cataloging of the books for all the libraries. The library buildings were built and furnished by plans and specifications made by Miss Carson who is director of the whole library system, the furniture being made from Library Bureau designs in the workshop of the American Committee at Blerancourt operated by Frenchmen, many of them badly wounded in the war. The French books were selected, bound, classified and cataloged and six French women trained to take charge of the work. One young French

*The substance of a talk explaining the film shown at the Ithaca meeting of the New York Library Association.

**Miss Carson, who is a graduate of the Pittsburgh Library School, has held positions in the Carnegie Library of Pittsburgh, the Tacoma Public Library and the New York Public Library.

THE CHILDREN'S END OF THE SOISSONS LIBRARY

woman, whose work at Soissons was brilliant, entered the New York Public Library School last month.

Altho American Library methods have never been practiced in French libraries our policies are strongly advocated by several leading libraries of France. M. Ernest Coyecgue, inspector of the libraries of Paris and of the Department of the Seine, has asked permission to include photographs of these libraries in his annual report of the work of the libraries under his direction. It is only lack of funds and trained personnel which prevent the French from furnishing as free use of books as we do in the United States.

Miss Carson showed this film and addressed the meeting of the British Library Association at Manchester on September 16th and has been asked to talk to the trustees of a fund for books for small villages in England.

all especially well qualified because of their intimate knowledge of French, acquired during their childhood in Switzerland.

ALICE KEATS O'CONNOR.

Seward Park Branch New York Public Library.

Books Popular in August

F ICTION titles most in demand in the public libraries in August, according to Frank Parker Stockbridge's list prepared for the October *Bookman*, were:

Sinclair Lewis. *Main Street*. Harcourt.
Joseph C. Lincoln. *Galusha the Magnificent*. Appleton.
Dorothy Canfield. *The Brimming Cup*. Harcourt.
Booth Tarkington. *Alice Adams*. Doubleday.
Knut Hamsun. *Growth of the Soil*. Knopf.
Floyd Dell. *Moon-Calf*. Knopf.

The titles in general literature most in demand were:

H. G. Wells. *The Outline of History*. Macmillan.
Edward Bok. *The Americanization of Edward Bok*. Scribner.
Margot Asquith. *Margot Asquith: An Autobiography*. Doran.
Frederick O'Brien. *White Shadows in the South Seas*. Century.
Lytton Strachey. *Queen Victoria*. Harcourt.
Anonymous. *The Mirrors of Washington*. Putnam.

Best sellers in fiction during the same month, according to reports prepared by seventy booksellers in fifty-seven cities for the October *Books of the Month*, were:

Sinclair Lewis. *Main Street*. Harcourt.
Dorothy Canfield. *The Brimming Cup*. Harcourt.
E. M. Hull. *The Sheik*. Small.
James Oliver Curwood. *The Flaming Forest*. Cosmopolitan.
Gene Stratton-Porter. *Her Father's Daughter*. Doubleday.

Joseph C. Lincoln. *Galusha, the Magnificent*. Appleton.

Best sellers in general literature were:
Anonymous. *The Mirrors of Washington*. Putnam.
Lytton Strachey. *Queen Victoria*. Harcourt.
H. G. Wells. *The Outline of History*. Macmillan.
Anonymous. *The Mirrors of Downing Street*. Putnam.
Frederick O'Brien. *Mystic Isles of the South Seas*. Century.

George Bernard Shaw. *Back to Methuselah*. Brentano's.

OFF TO THE STATION LIBRARIES

Assisting Miss Carson in this work are five Frenchwomen (as well as one who is spending the year in Library School). Miss Isabelle Cooper of the New York Public Library who returns to New York in November, and the Misses Marian and Lenore Greene, also formerly of the New York Public Library, and

Some Recent Reference Books

The Buffalo Foundation, *comp.* Social Service Directory of Erie County; first ed. January, 1921. Buffalo: The Buffalo Foundation, 1921. 206 p. 12°.

Includes all agencies, official and voluntary, state and federal, schools and churches, in the county containing the city of Buffalo, with addresses, officials and considerable information concerning their history, organization and function.

The Cleveland Foundation, *comp.* The Cleveland Year Book, 1921. Cleveland: The Cleveland Foundation, 1921. 311 p. 12°.

Projected as one of a series of annual summaries of events and progress in Cleveland. "As completely as possible in its condensed shape, it aims to serve all persons who need accurate and concise information about the city. This first volume includes much historical and explanatory data."

British Optical Instrument Manufacturers' Association. Directory of British Scientific Instruments. London: Constable & Co. 1921. 335 p. 8°.

Besides a comprehensive dictionary of terms used in the description of scientific instruments, contains a sketch of the British optical instruments industry, an account of navigating instruments, some facts about British optical glass, and notes on the work of the Royal Meteorological Society and the Royal Observatory at Greenwich. Illustrations of about 250 instruments.

Ratel, C. *Bibliographie Mondiale Moderne (1910-1920) de la plupart des ouvrages et documents parus durant cette époque concernant exclusivement la préparation mécanique des matériaux et minéraux et toutes branches s'y rattachant directement.* Paris: Chez L'Auteur, 1920. 344 p. 8°.

Closely classified bibliography of minerals and mining including material to be found in the books, documents and periodicals of France, America and England. Titles given in the original and in French translation. Periodical references include the approximate number of pages and illustrations. An attempt is made to give prices. Emphasis placed on the commercial side and much space given to labor conditions. The mechanical rather than the chemical aspect of mining is selected for inclusion. Indexed.

Recke, W. and A. M. Wagner. *Bücherkunde zur Geschichte und Literatur des Königreichs Polen.* Leipzig: Verlag der Deutschen Staatsdruckerei in Polen, Warschau. 1918. 242 p. 8°.

For German speaking and reading investigators of Polish history, literature, and spiritual life. Intended to supplement the work of Von Finkel and Estreicher. Preponderance of references are modern. Classified arrangement including headings on general works, political history, state development, finance, law, church, industries, and literature by periods. There is an index to authors.

Joannidès, A. *La Comédie-Française de 1680 à 1920; tableau des représentations par auteurs et par pièces.* Paris: Plon-Nourrit et Cie, 1921. 138 [5] p. 8°.

Lists authors whose plays have been presented at the Comédie-Française, the number of times each was produced, and the year. The second section of the work gives a table of presumed authors, collaborators, etc., and the third an alphabetical list of plays produced during this period. First edition extended only to 1900.

Wagner, Henry R. *The Plains and the Rockies; a*

bibliography of original narratives of travel and adventure, 1800-1865. San Francisco: John Howell, 1921. 4°. 193 p.

Particularly useful because of the long notes which are really a digest of the contents of the book described with an historical account of the author's mission. Attempts to be a complete bibliography of books containing personal experiences of authors between the dates given, with frequent reference to books printed after 1865. Titles are fully cataloged. Has a good index.

Thorpe, A. Winton, *ed.* *Burke's Handbook to the Most Excellent Order of the British Empire*, containing biographies, a full list of persons appointed to the order, showing their relative precedence, and colored plates of the insignia. London: The Burke Publishing Company, Ltd. 1921. 704 p. 4°.

Biographies of a large proportion of the Knights, Commanders, Officers and members of the Order of the British Empire, a new order founded in 1917 primarily to reward the non-combatant war worker for distinguished service. Also includes a military branch. Since the membership of the order totals 25,419 and since it is democratic in inception, including women as well as men, the work forms a useful biographical supplement to *Who's Who*.

The Times of Ceylon Green Book; a directory of Ceylon, 1921. Colombo, Ceylon: The Times of Ceylon, Ltd., 1921. 800 p. 12°.

First issue of what is planned as an annual publication. More than a directory, since it also includes general information, institutions and clubs, and a necrology. Additional information is planned for succeeding numbers. The directory is classified to include the official and professional and mercantile classes, estates and companies, men's section, ladies' section and foreign section. Indexed.

The Times Diary and Index of the War, 1914-18. London: Hodder & Stoughton, 1921. 324 p. 8°.

A good chronology and index to dates for the war period. Better for British events and participation than for the Allies. Includes peace conference and a few settlements of major importance in 1919 and 1920. Tabular appendices include casualties, British transport and troops, naval losses, airship losses, etc. Index references are to dates and consequently could be used with any newspaper or periodical.

A LIBRARY IMPOSTOR

IT has been reported to us that recently a woman presented herself at the Detroit Public Library as a Miss Kiefer saying that she was employed in the Popular Department of the Cleveland Public Library. She was described as a large woman about thirty-five years of age. She asked to be shown thru the building and the members of the staff who conducted her about decided, in the course of their conversation with her, that her claim to connection with the Cleveland Public Library was doubtful.

As no person answering to the description of her is, or has been, connected with the Cleveland Public Library, this statement is made to guard other libraries against this mysterious visitor.

LINDA A. EASTMAN.

*From Carl L. Cannon's List of Reference Books prepared for the *Bulletin* of the New York Public Library.

THE LIBRARY JOURNAL

TWICE-A-MONTH

OCTOBER 15, 1921

HOW shall a librarian prove to the public and especially to the taxpayer that more rather than less money is needed from year to year by the library? It is a serious and very general problem, for which Dr. Bostwick has one answer and Mr. Henry another. The former urges that when revenue is cut under present conditions, the librarian and his staff do their best to give the same public service as before. The latter urges that the need of funds should be turned into an object lesson by diminishing library facilities proportionally when revenue is cut. The latter course is not without serious objection. To reduce quality of service would be unfortunate indeed. On the other hand, to require members of a staff, already worked to capacity, to nerve themselves to work beyond normal power, would automatically lower the quality of work and produce unfortunate permanent conditions. Perhaps the best way out is either to close one or more branches or to lessen the number of hours, or close the library one day in the week so that without diminishing the quality of service, the public is definitely notified that it cannot get more than its money's worth by overworking the library staff. To diminish the amount spent for books is by no means a wise course as in this way the library promptly deteriorates in quality. In every live library field, demand and the need of supply, tend to increase doubly, first with the growth of population and secondly with the amount of work per capita of population as an improving library service reaches a larger proportion of the community.

★ ★ ★ ★ ★ ★ ★

THE endeavor to prevent waste in the government service by avoiding duplication of bureaus doing like work, of which there are scores scattered thru the different departments, is closely connected with the work of the Re-classification Commission and represents one of the best tendencies of the times. For instance, it is proposed to reshape the Interior Department into a Department of Public Works, centralizing all constructive divisions under a capable engineering head, and leaving such agencies as the Bureau of Education to go elsewhere, as in this case, in a proposed Department of Education. A current suggestion is that

all scientific work should be brought under the Smithsonian Institution, which is really a governmental service despite its name. At once the problem of cross lines in systematic classification which puzzles the catalogers confronts the reorganizers. The promoter of the last named plan proposes to include the Library of Congress, the Reclamation Service and many Bureaus of the Department of Agriculture into a scheme which would be as incongruous as the present lack of system. The Bureau of Standards is properly a scientific department, but the national library could not properly be subordinated in this wise. Librarians should keep themselves informed on the development of all these schemes for federal reorganization, since their calling makes them more or less experts in such matters.

★ ★ ★ ★ ★ ★ ★

IN connection with the proposed repeal of the manufacturing clause in the Copyright Code, the question of permitting importations of copyrighted books has come very much to the front. The American Publishers' Copyright League which now merges itself into the National Association of Book Publishers, passed as its last act a resolution calling for the repeal at the same time of the clause (Section 31 D of the current code) permitting incorporated institutions and individuals to import single copies of a copyrighted work without the assent of the copyright owner. This is on the ground that since copyright involves the exclusive right to sell for a specific territory, the right to import lodges with the copyright proprietor. Librarians have felt, to the contrary, that a library using public funds and serving the public ought to be able to import an English edition of a work copyrighted in this country, provided it is an authorized edition which recognizes the author's right to receive compensation for his book. It is probable that publishers will confine any effort to secure repeal of these exceptions to that giving individuals that privilege, but it is necessary that librarians should be on the alert to preserve their present rights, and doubtless the committees on Book-buying and on Federal Relations will show their usual vigor in combating this encroachment upon the present system.

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department. Replies should be addressed directly to the ADVERTISER, either at the address given or under the key letter in care of this office.

POSITIONS WANTED

Cataloger with twenty years of valuable experience in New England, desires position as librarian or assistant librarian. Address V. E. 17, care of the LIBRARY JOURNAL.

Cataloger, library school graduate with two years' college work and six years' experience in public college and special libraries, wants position in New York City. Address C. H. 18, care of the LIBRARY JOURNAL.

College graduate with year's course in library science, one year's experience in Peabody College Library, also experience in Alabama State Normal School Library, desires position. Address Anne Dudley Gibbs, Grenada, Miss.

Library school graduate with six years experience in a responsible executive position desires to make a change. Work with children and schools preferred. Address C. C. 17, care of the LIBRARY JOURNAL.

Librarian, experienced in public, financial and corporation libraries and in research work, desires position in business or special library in New York City. Address W. 17, care of the LIBRARY JOURNAL.

Librarian with one year's training and fifteen years' experience—8 in public and 7 in industrial library work, would like to hear of an opening in public or special library. Address E. M. P. 18, care of the LIBRARY JOURNAL.

Experienced cataloger with library school training wishes responsible position as head cataloger or work with Government documents. Language equipment: Latin, Greek, French, German, Italian. College library preferred. Address X. Y. 18, care of the LIBRARY JOURNAL.

Wanted, position as librarian. College and library school, man with seventeen years' library experience. At present employed as assistant librarian in large library. Reason for change desirous of opportunity to assume full charge. Address P. R. 18, care of the LIBRARY JOURNAL.

Library school graduate, for past three years in charge of college library in middle west, desires to change location to south or east. Prefers college, reference or museum position.

Is also graduate of Boston Art Museum School. Address I. F. S., care of the LIBRARY JOURNAL.

Part time educational or literary work solicited by young man. Seven years publishing, library, and bookstore experience, including book production and distribution, printing, editorial work and research, cataloging and indexing, compiling lists, etc. Especially familiar with educational systems and service. Address S. L. 18, care of the LIBRARY JOURNAL.

Wanted, by special librarian and filing expert with fifteen years experience, position as business librarian, or charge of extensive filing bureau. Public library work would be considered. Can give the highest references to any concern or institution desiring a live man with special adaptation for his work. Address C. A. C., Box 224, Great Kills, Richmond Borough, New York City.

POSITIONS OFFERED

Wanted, general assistant for six months work in Public Library, Tampa, Fla., beginning December 1st. Helen Virginia Stelle, librarian.

Wanted, library school graduate as assistant in technical library. Salary depending on experience. Address: Library, New Jersey Zinc Co., Palmerton, Pa.

Wanted, by the Vermont State Library, Montpelier, Vermont, an experienced cataloger. Salary satisfactory. Address State Librarian, Montpelier, Vermont.

Wanted, cataloger for college library. Both college and library school training required. with small minimum of practical experience. Salary \$1400—\$1600 to start, with annual increase to \$2400. Address, Library of the College of the City of New York, 139th St. and Convent Avenue, New York City.

The U. S. Civil Service Commission announces an open competitive examination for statistician at \$3600—\$5000 a year. Competitors will not be required to report for examination, but will be rated: Education, 30 weights; Experience, 40 weights; Publication, report or thesis, 30 weights. Applicants should apply at once for form 2118, stating the title of examination desired, to the U. S. Civil Service Commission, Washington, D. C. Receipt of applications closes November 1st.

The United States Civil Service Commission announces an open competitive examination for library assistant on November 17, 1921.

The entrance salary within the range stated (\$900 to \$1400) will depend upon the qualifications of the appointee. All citizens of the United States who meet the requirements, both men and women, may enter this examination. Competitors will be rated on the following subjects: 1. Library economy, 20 weights; 2. Cata-

logging, classification, and bibliography, 30 weights; 3. Modern languages, 15 weights; 4. Education and experience, 35 weights. Applicants should at once apply for Form 1312, stating the title of the examination desired (Library Assistant) to the Civil Service Commission, Washington, D. C.

AMONG LIBRARIANS

The following abbreviations are used:

- A. Atlanta School of the Carnegie Library of Atlanta.
- C. California State Library School.
- C.P. Carnegie Library School of Pittsburgh.
- D. Drexel Library School.
- I. University of Illinois Library School.
- L.A. Library School of the Los Angeles Public Library.
- N.Y.P.L. Library School of the New York Public Library.
- N.Y.S. New York State Library School.
- P. Pratt Institute School of Library Science.
- R. Riverside Library School.
- S. Simmons College School of Library Science.
- S.L. St. Louis Library School.
- Syr. Syracuse University Library School.
- U.C. University of California Course in Library Science.
- Wis. Wisconsin University Library School.
- W.R. Western Reserve Library School.
- Wash. University of Washington Library School.

BIEN, Corabel, reference and periodical librarian of the University of Oregon library resigned recently to spend a year in travel and study.

HEMPHILL, Helen E., librarian of the Engineering Department Library of the Western Electric Company, New York, is now making a comprehensive study of the Engineering Department files preparatory to correlating the central engineering index with the library service.

HERD, Mary I., formerly of the Carnegie Library of Pittsburgh, has joined the staff of the Cleveland Public Library as library statistician.

JENNINGS, Jennie Thornberg, assistant librarian of the St. Paul (Minn.) Public Library has been appointed acting librarian.

JOHNSTON, W. Dawson, since 1914 librarian of the St. Paul (Minn.) Public Library, has upon nomination of the Executive Board of the A. L. A., been appointed by the Trustees of the American Library in Paris, Inc., librarian of that library, and will take office early in November.

KATZ, Louise W., 1902-03 N. Y. S., has resigned as reviser in the catalog department of

the University of Minnesota Library. Miss Katz returns to California, and will join the catalog staff of the Leland Stanford University Library.

PORCHER, Anne Allston, 1910 D., formerly assistant librarian of the Clemson College Library and later in the library of Debarcation Hospital no. 52, at Richmond, Va., appointed librarian of the Charleston (S. C.) Museum, will have charge also of the Children's Room of the Museum.

POWLISON, Edris, 1916 R., appointed assistant librarian in the library of Price and Waterhouse Company, public accountants, New York City.

PROUTY, Gratia L., has been placed in charge of the Engineering Department Library of the Western Electric Company, Inc., 463 West Street, New York City. Genevieve Pratt has recently joined the staff of the Library.

SISLER, Della J., is now giving her full time to instruction in cataloging and classification to the University of California library practice class.

STEEL, Evelyn, librarian of the Oakland Technical High School, is giving the courses in book selection to the University of California library practice class.

Members of the Class of 1921 of the University of California Courses in Library Practice have been appointed as follows: Marian F. Anderson and Rachel A. Look, California State Library; Bertha O. Biernath, Standard Oil Library, San Francisco; Dorothy Deming, acting librarian, University Farm, Davis; Helen Downs, Mina E. Keller, Anna P. Kennedy, Mary H. Sterrett, assistants Fresno County Library; Lois C. Howe, Federal Reserve Bank, San Francisco; Nellie L. Stiles, Kern County Library; Evangeline W. Thurber, Department of Education Library, University of Chicago; Esther Hahn, Deborah King, Ivander MacIver and Katharine Wickson are all at the University of California Library and Florence A. Rhein at the Oakland Public Library.

LIBRARY ORGANIZATIONS

KEYSTONE STATE LIBRARY ASSOCIATION

THE Twenty-first annual meeting of the Keystone State Library Association was held at Eagles Mere, September 27-29, 1921.

Isabel McC. Turner, president, in the opening address said that the Association had been founded by idealists—people who considered service above self. She urged that “service,” which has always been the keynote of the Association, should continue to be held above self and should not be commercialized.

Daniel Casey, director of Field Service Bureau, Pennsylvania State Chamber of Commerce, gave an able address on “Some New Aspects of Civic Co-operation,” emphasizing the possibilities of a close co-operation between chambers of commerce and libraries—two organizations which seek the greatest good for the community—emphasizing the point that “taxation properly applied is an investment, not an expenditure.”

The second day opened with an address by Adeline B. Zachert, on school libraries. Miss Zachert gave a resumé of the work that has been done by the Pennsylvania School Libraries Department, and outlined programs to be carried out, so as to meet the need of a “book laboratory” in every school.

Mary L. Titcomb, in an illustrated lecture on county libraries proved to us that the county library is the most economic and efficient form of book distribution and its possibilities are bounded only by appropriations and vision.

The afternoon was given over to round-tables conducted by Ada F. Liveright, Adeline B. Zachert and Edith Patterson. In the educational section Elizabeth Gendell spoke on “How to Teach the Use of School Libraries to Pupils in the Grades.” In the Philadelphia Normal School instruction in the use of the library begins in the kindergarten with a library game. Lessons with books begin in third grade and are continued thruout the grades so that the boys and girls will enter high school with a library habit already formed and some knowledge of the use of reference books. In the Normal school conference the teacher-librarian courses to be given at Millersville and Kutztown were outlined. In the children’s section Miss Patterson in a clever and amusing address pointed out that a children’s library without a children’s librarian is “neither practical nor possible.”

“The Living Poetry of the United States” was the subject of a lecture by Charles Wharton

Stork on Wednesday evening. Dr. Stork spoke first of the experiment in free verse which originated in the United States with Walt Whitman, and then discussed briefly new popular poetry, the imagists and religious poetry.

The meeting closed on Thursday morning with an address by William R. Watson on “Certification and What It Means.” Mr. Watson presented arguments both for and against certification and discussed the boards that would have it in charge showing that a national board would be more advantageous than state boards.

The following officers were elected for the ensuing year: president, Anna A. MacDonald, Library Extension Division, Harrisburg; vice-president, Grace Steele, Bradford; secretary, Margaret Carnegie, Pittsburgh; treasurer, Alice Willegerod, Hazleton.

INEZ CRANDLE, *Secretary.*

NORTHERN ILLINOIS HIGH SCHOOL LIBRARIANS’ ASSOCIATION

AT the teachers’ institute of Kane and Kendall counties, held at Elgin, Ill., a small group of High School Librarians formed themselves into an association to be known as the Northern Illinois High School Librarians Association.

Carrie Niliford, librarian of the Elgin High School, was elected president and Ethel F. Edes of the Lyons Township High School, secretary. For further particulars write to

ETHEL F. EDES, *Secretary.*

MONTANA STATE LIBRARY ASSOCIATION

IN place of the usual meeting in the State, the Montana Library Association held a short session on September 2nd in connection with the 1921 gathering of the Pacific Northwest Library Association in Spokane, Washington. Eleven librarians from Montana attended the meeting, which was held at the North Central High School, Mrs. Henry E. Garber, Jr., of Billings, presiding. Sabra Nason, of the Umatilla County library, Pendleton, Oregon, gave an informal talk on the county library system of Oregon.

Following a general discussion of library conditions in Montana, it was agreed to continue efforts to secure adequate support for a library school in the state. It was voted that the officers of the Association continue in office until the next meeting.

LUCIA HALEY, *Secretary.*

"LIBRARY WEEK" AT CORNELL UNIVERSITY

THE thirty-first annual meeting of the New York Library Association was held at Cornell University, Ithaca, during the week of September 12th, Prudence Risley Hall, as in 1914 housing the guests. There was a registration of two hundred and fifty.

At the opening session, under the presidency of Willard Austin, librarian of the University, welcome was extended by Professor Liberty Hyde Bailey, who spoke briefly of the librarian's rôle as a book distributor, and by Dean Thomas Frederick Crane who told of some of the more notable treasures of the Dante collection in the Cornell Library and of some of the principal items in the exhibit, which was open during the entire week at the Library. Further welcome came from Professor George Lincoln Burr who on the following evening spoke entertainingly on some of the book treasures of the University Library, and pointed out how a careful librarian can often preserve for the world a book which has become valuable due to marginal and other notes therein. Dr. Burr was at home at the Library every afternoon to show to visitors the rarities mentioned and many others.

NATIONAL AND STATE CERTIFICATION OF LIBRARIANS

Dr. C. C. Williamson in his presidential address on "Professional Standards" discussed certain aspects of the proposed national certification scheme for librarians, which is to be one of the principal topics for discussion at the mid-winter meeting of the A. L. A. He spoke particularly of the need for high standards if the national voluntary certification system is to fulfill its purpose and if library work is to take its rightful place with other so-called learned professions.

Special attention was given to the relation of national certificates to library school credentials. "There is evidently a strong feeling on the part of many members of our Library Associations," said Dr. Williamson, "that the label of the library school gives to the individual who wears it too great an advantage over his untrained colleagues, an advantage which neither his ability nor the character of his work justifies." He pointed out that the plan presented by the A. L. A. committee on national certification has been specifically designed to give full professional recognition to capable and successful workers who lack library school training or formal training of any kind.

The Library Workers Association, it was asserted, would accomplish more in aiding its members to overcome their disadvantage in com-

petition with library school graduates by promoting certification and opportunities for training in service than by conducting an employment bureau.

Continuing the discussion of certification on Tuesday morning, Anna G. Hall said that the main point of difference between the New York State legislation for certification and that of other states is that in New York the grading is in the hands of the Regents. Terms of grading are still under discussion.

Regarding national certification Dr. Shearer suggested the postponement of the granting of the higher certificates, so as to give notice of the scheme of requirements, as is done in the medical and dental professions. The lowest certificate might be granted immediately to all who qualify, the class two certificate might then be awarded after five years, and no certificate of the highest class be given until ten years have elapsed. In this way opportunity would be given to all to qualify together and those unwilling or unable to qualify could drop out. President Williamson pointed out that ten years is a long time and that it would be difficult to arouse interest in a scheme to take effect so far off, and that furthermore, certification of the professions referred to by Dr. Shearer is obligatory, whereas this proposed for librarians is merely voluntary.

WORK WITH THE FOREIGN BORN

A morning's discussion of library work with the foreign-born, presided over by Esther Johnston of the Seward Park Branch of the New York Public Library, was pleasantly opened by a brief talk on "The Artistic Contribution of the Czechoslovaks to American Life" by Teresa Prochazka who wore the Czech national costume and sang several of the songs of the peoples living in the new Republic. Too often, Miss Prochazka said, these artists are classed as German due to the fact that German publishers first made their work known. Among the most important are:

Wood Engravers, Etchers, etc. Rud. Ruzicka, who is "without a peer in the United States as a wood engraver," and who will have an exhibit this autumn; J. C. Voudros, professor at Wentworth Institute, Boston—known for his war posters; Svoboda: Emanuel Nadberry, for twenty-five years illustrator for the *New York Herald*; Jan Matulka, who was awarded the Pulitzer prize at the Academy of Design; and Alfons Mucha, who held exhibits in New York and Chicago some months ago.

Writers. Alois Jirosek; Bozena Nemcova Machar; Vrchlicky.

Musicians. (It is thru music that the Czechoslovaks are mostly known in the United

States). Bedrich Smetana, whose symphonic works are given by good orchestras thruout the United States, and whose opera "The Bartered Bride" was produced at the Metropolitan Opera House about nine years ago; Antonin Dvorák; Zelenko Fibich; Vitezslav Novak, who represents modern Czech music, and Emmy Destinn, of the Metropolitan Opera House, Otokar Sevcik of the Ithaca Conservatory of Music, Jan Kubelik and Erika Morini.

"To love, understandingly and genuinely, the soul of America," said in part Dr. Henry Newman of the Brooklyn ethical culture society, "one must know at first hand the ideals which it has seen fit to set forth in the beauty of song and story. The immigrant's attachment to his native land is a matter of spiritual associations; it is an affair of memories of folk-lore, legends, songs, poetry, traditions, of fun, of romance, of pride in a certain national or racial nobility. It is always about these ideal things that the warmest feelings center. . . . To make real the impulses by which typical Americans have been moved "the foreign-language press can perform a notable service by printing from day to day the best American literature in translation. Eventually of course the immigrant should learn to read and speak English. His children do this gladly. They go to the public library. It would be excellent for the parents to go also. In the meantime, why not make use of the newspapers which the foreign-born now read? Few instruments can be found so effective for winning them over to a genuine attachment to the ideals of our republic. No allegiance is so strong as that which is won on its own merits without being forced."

Alice O'Connor told interestingly of the cooperation between associations and individuals of the Czecho-Slovakian nationalities—speakers, artists, musicians—in building up the book, print and music collections of the Webster Branch of the New York Public Library (Zaidee Griffin, librarian) which serves a large Czecho-Slovak population on the upper east side of Manhattan. The book collection carefully conserved during the war and added to recently numbers now about nine thousand, giving service which is a happy link between the old world homes of these peoples and the new.

Following came discussion of a tentative list of books illustrating American life and suitable for translation into foreign languages. This list, selected by the Committee on Work with the Foreign-born (Esther Johnston, New York Public Library, Chairman) is given in full elsewhere in this number and the committee will welcome criticism and suggestions.

COUNTY LIBRARIES

"County Libraries" was the topic of the Wednesday afternoon session, presided over by Margery C. Quigley of the Endicott Public Library. The chairman read abstracts from the county library law recently passed by the New York Legislature (see LIBRARY JOURNAL for September 1, p. 693-694) and drew attention to material useful to those interested in county library work: posters and illustrated folders to be obtained from the A. L. A. and an article by Julia Wright Merrill in the July *Wisconsin Library Bulletin* on what to read on county libraries; and asked that clippings, telling of work done in establishing county libraries, be sent to A. L. A. headquarters for the use of other workers in this field. A short paper by Milton J. Ferguson contrasted the well-to-do small city library relying entirely on its own resources with a town library with limited funds functioning efficiently as part of a county system.

Mary L. Sutliff of the New York Public Library School then outlined the requisites for the county librarian: a strong adaptable body capable of long endurance; considerable executive ability for the organization of what is often a complicated piece of work; knowledge of the country to be covered—the granges, the schools, the churches and other organizations; familiarity with library methods, so that technique takes its proper place as the servant and not the master; an intelligent love of books, especially children's literature, and a love and understanding of people.

Following, Mrs. Kate D. Andrews, librarian, and Mrs. George Diven, trustee, of the Elmira Public Library, told of "Campaigning for a County Library in Chemung County," in accordance with the new county library law (tho Ezra Cornell, as Irene Earll pointed out, endowed a county library in Ithaca for Tompkins County, so that the Tompkins County work antedates both that of Van Wert and of Hagerstown.) One-half mill is proposed as an issue for the next election of county supervisors.

The last contribution was a paper on "The County Library and Its Branches" by Anna G. Hall, showing how Minerva County, a "typical" county of 600 square miles with a population of 50,000 and an assessed valuation of about fifty million dollars and having in existence various independent libraries, established a county library system, and how the local libraries lost nothing in the way of initiative or local pride and interest but benefited greatly in administration thru freedom from much annoying detail.

AMERICAN LIBRARIES IN FRANCE

John Adams Lowe presided over the evening session, which opened with the running of a

two-reel film showing nine months work of the libraries established by the American Committee for Devastated France.

Mrs. Jennie B. Tracy of Highland Falls, who was directrix of personnel for the Committee, told something of the Committee's early work in this region during the period when shelter, utensils and farm stock were the greatest needs and of the welfare work following which the library service formed a part.

Alice Keats O'Connor of the Seward Park Branch of the New York Public Library, who had charge of the Soissons library, explained many of the details shown in the film, which is to be shown at several of the state library associations' meetings during the autumn. A resumé of Miss O'Connor's talk is given elsewhere in this number.

BOOK REVIEWING

Book Reviewing was then interestingly discussed by Henry Seidel Canby, editor of the *Literary Review of the New York Evening Post*. Dr. Canby said in part:

"Without question a literary review of the first order can now be successfully edited in the United States, provided the necessary support is forthcoming. If it can be done only at a loss, the time is not ripe; but in my judgment the time is ripe. My experience so far has shown that we have an abundant supply of thoroly competent critics who are available; and in some respects an American review is better able to secure for its criticism the best books in all languages than is a European magazine.

"What should be the character of such a review? It should I think review all books not extremely technical or merely trivial. It should provide the accurate facts about books, coupled with definite opinions as to their value. If this is done in brief reviews, librarians apparently would be satisfied. But I believe that the facts about books are not in themselves sufficient without critical background. This background must be provided by essays, lengthy reviews, and articles which, so to speak, feel the pulse of contemporary literature and the intellectual movements of the time. Such criticism the American public needs as much as, and probably more than, facts. And librarians need it too. They, with teachers and booksellers, are the most direct mediation between the author and his public. They must know more about a book than what is in it.

"Such a critical review should be regarded as a liaison between the librarian and the public. It should be read and criticised by the first and its ideas, and whenever possible the paper itself, passed on. For vigorous reading depends upon a mind that is stimulated and made dis-

criminating, and in the infinitely extensive world of books, only a magazine can satisfactorily discharge the office of general critic and interpreter.

"In *The Literary Review of The New York Evening Post* it is our desire first of all to establish better standards of criticism and more reliable criticism; next, to cover the whole field of important books, giving the facts at least about each significant book. We believe that both objectives can be held in view at once, but full attainment of the latter must wait upon the proof of support. In the meantime, we can begin by supplying the needed criticism, and at least reviewing more books more accurately than any general American review has attempted in the past; and thus make an honest bid for the interest of librarians."

TRAINING FOR SCHOOL LIBRARIANS

The growing need of trained school librarians was pointed out by Martha C. Pritchard, librarian of Teachers College, Detroit. The N. E. A. Library Department advises two trained librarians for normal schools with more than three hundred students, and there are over three hundred normal schools thruout the country; in some states which have declared for trained high school librarians there are some hundreds of high schools; and certain cities, Detroit for example, aim at having a trained librarian for each elementary school. To meet this need some of the library schools have given courses in school work, but few students have specialized in this line; some normal schools have offered elective teacher-librarian courses, and a study of the subject has been made by a committee of the A. L. A. School Librarians Section as the result of a conference held in New York last year. The results of this study summarized by Marion Horton will shortly be given in the *LIBRARY JOURNAL*. At the Swampscott Conference this Section recommended that a letter explaining a proposed plan of training be sent to the library schools and their neighbor-colleges, with a request for information as to how far cooperation is possible or advisable. The Section recommended also certain modifications in the school libraries courses.

LIBRARY WORK WITH INSTITUTIONS

The report of the Committee on Libraries in Institutions, presented by Florence Bradley of the National Organization for Public Health Nursing, spoke of the need of broadening the scope of this work, of giving more attention to the institutional problems of public libraries, rather than merely to the problems of the institutional library. Until more institutional libraries can be organized and developed, public libraries must carry the burden of the local needs, and the public librarian must extend not

only material help but also moral support in the setting up of library standards for the institution.

Many libraries are extending definite forms of service to local institutions. Mary J. Thackeray told of how the Brooklyn Public Library is extending library service to prisoners. A paper by Miss Thackeray on this subject will be given in an early number. Miss Baumler told of work in Utica Hospital, where there is a library open all the time to nurses and once a week to patients. In this hospital an appropriation for a librarian's salary is asked for each year, but so far without success. The Syracuse Public Library, as reported by Miss Lane, distributes framed pictures to the city hospitals.

THE ENRICHMENT OF RURAL LIFE

The problem of the enrichment of the life of the rural population was presented by three speakers. Professor George A. Works outlined a unit for rural school administration, aiming at the provision of (1) elementary schools as fully equipped to meet the needs of the country child as are the city and village schools to meet those of the urban child, having well-qualified teachers, professional supervision and adequate buildings and equipment; (2) high school education for every child while living in his own home; and (3) adult education thru reading circles, lectures and library facilities. At present the three units of rural school administration are the district, the township and the county, but Dr. Works pointed out that it seemed as if in New York State there would be a distinct gain by developing a unit based on the communities already existent in the state and constituting the economic, social and religious centers for the rural population. "In addition, each of these units should be made large enough, so that there is something in the way of high school education available within its boundaries. In many cases this will undoubtedly be only a high school of junior grade. Within these primary units would be attendance districts, with such elementary school facilities as would meet the needs of the younger pupils. . . ." In order to arrange for adequate supervision, it would be necessary to group these primary units together, and in determining the boundaries of both the primary and secondary units, such political divisions as the township and the county would be ignored unless they coincided with the boundaries of the natural units.

Dean Arthur R. Mann outlined Some Bases of Agricultural Progress, showing how increased agricultural production upon which industry depends is in turn dependent on education.

Mrs. Albert Smith, state leader of the home

bureau organization, told of the methods of organization of the farm and home bureaus thruout the state and some of the results obtained, and pointed out that librarians could contribute not a little to the life of the farm worker, and especially of the farm woman, who, in her capacity as cook, marketer, laundress, seamstress, governess, cleaner, practical nurse, hotel keeper, poultry-garden-and-dairy-worker, and general manager, earns (but seldom gets) about \$83 a week. And the farm dwellers will welcome the librarian's contribution. "If you want," said Mrs. Smith, "the organized help of about one hundred thousand of New York's leading farmers and home makers, I dare to prophesy that the cause of more and better books more available, promised in the plans for county libraries, would appeal to the county farm and home bureaus as another avenue lending aid in public service."

LIBRARY LEGISLATION IN NEW YORK STATE

At the Friday morning session, presided over by Paul M. Paine, William F. Yust enumerated the chief points of this year's library legislation in New York State. Mr. Yust's more extended summary of these points will be found in the LIBRARY JOURNAL for September 1, p. 687-690; 693-4; and in the present number 845-846.

RECRUITING FOR LIBRARIANSHIP

Mary Aileen Ahern then opened the discussion of recruiting for librarianship. Miss Ahern said in part: "In recruiting for library service, librarians need to be careful that the pleasure and profit in library service promised are at least equal to the expectations aroused in the candidates." Attention should be paid to the physical and mental fitness of the recruit, and it should be remembered that "no amount of delight in reading, comely geniality, or even desire to please, will make up for lack of real scholarship." The war conditions are largely to blame for the scarcity of good workers, a good share of the blame must be laid upon head librarians, who expect their staffs to work for less than a living wage, and especially upon those "who are willing to accept advancements in their own salaries . . . while refusing a much smaller and much more necessary advance to members of their staffs. . . . There is no question that if the head librarians of the country took the same interest in the salary schedules of their libraries that the school principals and superintendents have taken in the salaries of their teaching staffs, the results would be more to the credit of all concerned. . . ."

Edward F. Stevens spoke briefly of the obligation of the library schools to select only the best people for the profession, quoting the report of the New York State School that libra-

rianship is too easy to get into and giving some pitiful lay conceptions of the profession. Florence Overton spoke of recruiting methods and results in the New York Public Library, which has found the high school a poor hunting-ground for assistants of permanent value but which has found college students interested in summer substitute work which will doubtless in many cases lead to a joining of the ranks. The Brooklyn library as reported by Mary Case-major has had similar experience.

What constitutes an attractive field vocationally considered, and how far these conditions are met in New York State was the topic dealt with in Anna G. Hall's paper. The essential points are: many and frequent openings, allowing for variety of experience and for increase in responsibility and remuneration, recognition of training and experience, opportunity for leadership and display of initiative and for pleasant social and intellectual life, and, finally, adequate salary.

Cities with a population of from 10,000 to 50,000 should afford the best field. In New York State there are forty-eight third class cities, and of these two have no library while one is just opening a library. One library has an income of \$1.30 per capita, two have 50 cents, seven have 40-48 cents, six have 30-36 cents, thirteen have 20-29 cents, nine from 10-19 cents, two have 5 cents, one has 4 cents and one has 2 cents per capita.

Of the chief librarians in these libraries, twenty-one are without college or library training, three have college, but no library training, while of the staffs, only six members have had library training and this includes summer courses.

There are twenty-eight librarians having salaries under \$1200, three of whom have had a year's training, six a summer course, and nineteen no training; seventeen have salaries over \$1200, four of these having a year's training, eight a summer course and five no training; three have salaries of over \$2000. Of the four hundred and twenty-five village librarians in the State, eighteen have attended summer school and fourteen have had regular library school training.

Better conditions will doubtless be brought about by a combination of school library and public library salary for one trained person, and by the establishment of county libraries.

"The Library Workers Association," wrote in part its executive secretary, Marian C. Manley, "thinks of the business of recruiting for library work and of the work of an employment bureau in much the same light. Both involve putting the people best fitted for certain kinds of work in

touch with the opportunities along those lines. The Association's idea is to present library work as a field offering many opportunities to the mentally alert, when that quality is combined with broad interests, a background of general culture, and some degree of forgetfulness of self in favor of devotion toward the common good. When we meet possessors of these qualities, regardless of their college or professional training, they are shown the opportunities in library work together with the means by which they may acquire additional formal training and education while engaged in the work. These people, when discovered, should be urged to go into the profession. The necessity for professional training should not be dwelt upon to the discouragement of good material. The library schools graduate only a limited number of people each year—not enough to fill the many thousand positions in the profession. In the meantime, they must be filled. Let us urge college students to take summer work in libraries; young people leaving college to consider the library field and others of like qualifications to come into the profession. When opportunities for professional training are more accessible the inducements for good people to enter the profession will be notably increased. Often in the past good material has been rejected because of a lack of formal equipment and others naturally less gifted have been accepted with the letter of professional training, but without the spirit. Librarians need to know whether the proposed assistants are fitted to do the particular jobs that they wish done. How many of them ask questions that will produce answers giving some insight into the applicant's capacity for clear thought and direct action? Are assistants asked what opportunities they see in the positions?

"After all, the number of degrees taken is not what makes for success in library work, but the individual's ability to see opportunities and take them, and to win friends for herself and the library. Additional education and professional training may be acquired, provided the qualities are the right kind. That is what we must remember when recruiting for library service."

SCHOLARSHIP DINNER

Paul M. Paine presided at the scholarship dinner on Wednesday evening when Azariah Smith Root made an address on the responsibilities of librarianship as a profession: the obligation to bring the right people into the profession, to educate them so as to fit them for seizing the opportunities for progress which the profession should increasingly offer, and to give expression to appreciation of good work done—an appreciation of which the Association's scholarship scheme is a happy example to be

Notable New Books

Modern Tendencies in Sculpture

By **Lorado Taft**

Lovers of art have given it a cordial welcome. A charming and instructive volume written in the inimitable style of the creator of the Fountains. Four hundred twenty-nine illustrations. \$5.00, postpaid \$5.20.

The Graphic Arts

By **Joseph Pennell**

A study of the processes of the graphic arts: drawing, printing, engraving, etching, lithographing. The author is the greatest living authority on the subject. Ready soon. One hundred fifty illustrations. \$5.00, postpaid \$5.20.

Evolution, Genetics, and Eugenics

By **H. H. Newman**

Most thoughtful people are interested in these subjects. Historical survey and present status of doctrines. Illustrated. \$3.75, postpaid \$3.90.

Business Administration

By **L. C. Marshall**

Designed to help the modern business man solve his problems of policy, organization, and operation. In dealing with concrete situations it "gets down to brass tacks." Ready in December. \$4.00, postpaid \$4.20.

Introduction to the Science of Sociology

By **Robert E. Park and Ernest W. Burgess**

Nothing better for the person who desires a foundation for real sociological understanding. \$4.00, postpaid \$4.70.

Madeline McDowell Breckinridge

By **Sophonisba P. Breckinridge**

An inspiring biography of a noted social worker. Ready in November. \$2.50, postpaid \$2.65.

Dante: Poet and Apostle

By **Ernest H. Wilkins**

Ready in November. \$1.00, postpaid \$1.10.

followed by other groups. In this connection Professor Root announced that the Ohio Library Association has in hand \$500 for a scholarship fund.

The following are the scholarship winners:

Class A. (Less than 500 Population). Mrs. Maud R. Squires, Livonia; Florence E. Hawley, Sherman; Esther Smith, Lisbon.

Class B. (Between 1,000 and 2,000 Population). Mrs. C. B. Rogers, Randolph; Christina McLennan, Fayetteville; Adelaide E. Harrington, Sherburne.

Class C. (Between 2,000 and 5,000 Population). Mrs. Alma D. Custead, Patchogue; Harriet B. Corson, Palmyra; Edna J. Dinwiddie, Bath.

Class D. (Between 5,000 and 10,000 Population). N. Louise Ruckteshler, Norwich; Mrs. Louise VanDuser, Newark; Marcia Dalphin, Rye.

At Large. Ella E. Pease, Norwood; Helen Marjorie Beale, Sherrill; Ruth B. Drake, Chazy.

THE LIBRARY TRUSTEE

The rôle of the library trustee in the development of the Oneonta Public Library was told on Thursday evening by Professor Arthur M. Curtis of the Normal School, Oneonta.

FOLK LORE IN HISTORY

A talk on folk-lore in history by Augustus H. Shearer opened the last evening session. Scientific history, the history written for the last fifty years, with its exhaustive investigation of sources has resulted in the writing of monographs on smaller fields, discrediting many of the stories which previously passed current as history and which, while not fact, help to interpret history. Among examples given were the stories of Charlemagne, of William Tell, of Jefferson, and the hatchet story from Weems' account.

MOTION STUDY IN LIBRARIES

The last paper was an introduction by Frank B. and Lillian M. Gilbreath* to motion study in libraries as a means of eliminating waste. To avoid repetition the authors referred the audience to their published works and proceeded to the explanation of the process charts: the functional chart which records the division of the work of the library into functions and the organization chart which records the members of the staff and their relation to each other. Process charts made in connection with a preliminary survey at the Engineering Societies Library were shown. Recommendations were made: To library associations, to undertake the promulgation of standards for measuring or testing activities and for providing for the universal use of the best standards available; to library schools, intensive preparation of special students to apply to libraries the science of management; to libraries, appropriations for such work; to librarians, the recording of work done and the finding out of the best practice known;

*Frank B. Gilbreath, Inc., Consulting Engineers, Montclair, N. J.

and to all associated with library work welcome to any who offer help. In this connection the authors offered, not only their own services, but felt free to "pledge the Management Section of the American Society of Mechanical Engineers, the Society of Industrial Engineers and perhaps the Committee on the Elimination of Unnecessary Fatigue as having already collected available data and the Taylor Society wherever their members are . . . as subject to call in library work."

RECREATION

The afternoons were left free for recreation, which was offered in great variety—a hike thru the Ithaca gorges, a boat ride on Lake Cayuga, a motor trip to Enfield Falls by invitation of the Ithaca Chamber of Commerce, and a drive thru Watkins Glen. The Dante sixcentenary exhibition at the Library attracted many visitors, as did also the White collection, many of the treasures in which were shown for an hour each afternoon by Prof. Burr. Food fit for the gods was "Eggs": A Play in Two Breaks, scrambled by William B. Gamble and served by a cast from the staff of the New York Public Library—a near tragedy with a happy ending—in which the youthful enthusiast who sacrifices comfort and a position on the staff of "Hammond's" (Succulent Scrapple makers) for that of page at the public library (and without library training, too) thru his article in the LIBRARY JOURNAL, attracts the attention of Congress, occupies many pages of the *Congressional Record*, and eventually is offered the librarianship of Congress. Pleasure and business were most happily combined in Dr. Hill's auctioning of the books sent by the H. R. Huntting Co., which realized \$64 for the scholarship fund.

BUSINESS

Officers elected for 1921-1922 are: President, Joseph D. Ibbotson, librarian of Hamilton College, Clinton; vice-president, John A. Lowe, assistant librarian, Brooklyn Public Library, secretary, Margery Quigley, librarian of the Endicott Free Library; treasurer, Wharton Miller, librarian of Union College, Schenectady (re-elected).

Votes of thanks were passed for the many acts of hospitality which had so greatly contributed to the pleasure of the meeting: To the Ithaca Chamber of Commerce, to the management of the Cornell residential halls, and especially to Mrs. Greider, Miss Monroe and their assistants who had anticipated the needs of the conference; to Dr. Crane and Professor Burr and to Librarian Austin; to all who had made possible the scholarship awards, including anonymous individual donors and the business houses of Gaylord, Huntting and Wilson; and to the staff

The last word in the science of Character Reading
CHARACTEROLOGY

By L. HAMILTON McCORMICK

This is in many respects the most remarkable study that has ever been offered the peoples of the world.

For the first time, Character Analysis has been removed from the sphere of uncertainty and made an exact science. Mr. McCormick's rules for reading character are so simple and so true that anyone who studies this subject seriously can become an expert reader of character.

Mr. McCormick's work is remarkable not only for what it contains but also for the manner in which it was conceived and written.

Forty years were spent in gathering material, including ten solid years devoted to the actual writing. The first edition was revised and entirely rewritten more than forty times before released to the publisher.

"Characterology" is a work of 700 pages. It is illustrated with charts and a unique collection of photographs of life and death masks of renowned and notorious individuals, with biographical and analytical readings.

It takes up every feature and tells you what each different type signifies—the contour of the head; profile indications; the different types of heads, foreheads, eyes, eyelids and eyebrows, the different types of noses; the mouth, lips and teeth; ears, cheeks, jaws and chin; hair and neck, brain and cranium; complexion.

\$5 at all first class book shops.
RAND, McNALLY & COMPANY
 536 S. Clark St., Chicago

Milton's Prosody

By ROBERT BRIDGES \$5.65
 Mr. Bridges's final word on this subject. Various chapters are devoted to Paradise Lost, Paradise Regained, Samson Agonistes, Obsolete Mannerisms and Accentual Verse.

Courage in Politics and Other Essays

By COVENTRY PATMORE Net \$3.75
 Some forty essays, now collected for the first time, the basis being Patmore's own copies of articles intended for reprinting.

A Book of Verse from Langland to Kipling

By J. C. SMITH \$1.60
 Palgrave's *Golden Treasury* is a collection of lyrics, but there are many non-lyrical poems in English that readers will enjoy equally with those in *Golden Treasury*. The present volume is composed almost entirely of these.

The Court Painters of the Grand Moguls

By LAURENCE BINYON \$28.35
 A remarkable work on a little known phase of Indian art, illustrated with splendidly coloured plates of choice examples.

At all booksellers or from the publishers.

Business Men
 Will Ask for These
Business Books

Among the non-fiction readers of your library there will be many who will want to read the following new business books.

Wall Street Accounting

By Frederick S. Todman, M.C.S., C.P.A.

The only complete treatment of the business of brokerage. Every man who is interested in trading on the stock or commodity exchanges will receive valuable information from it. Particular attention is given to the accounting methods and records used. This is a thorough revision of the author's former work "Brokerage Accounting."

Published 1921, 352 pages, cloth binding.

Price \$6.00.

Science and Common Sense
In Working with Men

By Walter Dill Scott, Ph.D., President Northwestern University and Mary H. S. Hayes

Should be as popular as the previous works by this well known author. Deals with a problem that is important to everyone in business or professional life. Makes the subject clear both from the point of view of the superior and from that of the subordinate.

Ready October 15. 160 pages, cloth binding.

Price \$2.00.

Time Study and Job Analysis

By W. O. Lichtner, Member of the firm of Thompson & Lichtner Co., Consulting Engineers.

Job standardization is widely recognized as a vital factor in modern methods of production. In this volume you will be able to offer—for the first time—an authoritative manual that supplies the demand for specific procedure in job standardization.

Ready September. 397 pages, cloth binding.

Price \$6.00.

Send for these books and when they arrive show them to the business men who come in. If you are not satisfied that they will be of value, they may be returned within thirty days of their receipt.

 MANAGEMENT ENGINEERING

associations of the libraries which, at their expense, sent delegates to the meeting.

It was also voted that Whereas: The Library Extension Division was obliged to refuse more than five hundred requests for traveling Libraries last year, where they were urgently needed, because the supply of books was inadequate, owing to lack of funds; and Whereas: The staff of the Library Extension Division is being constantly weakened by resignations due to low salaries; and those who have remained in the service are doing so at a personal sacrifice; Therefore be it resolved: That these facts be brought to the attention of the Board of Regents and the members of the State Legislature with the urgent recommendation that a more adequate appropriation for books and salaries be made for the Library Extension Division.

It was moved and seconded that the following recommendation be called to the attention of the incoming officers of the Association; that It was the sense of those present that an amendment should be proposed at the next annual meeting to provide an annual institutional membership and an annual individual membership with larger dues than the present membership.

Other meetings planned are the Florida Library Association's annual meeting at Tampa in April; that of the Idaho Library Association at Boise in April; Ontario Library Association on Easter Monday and Tuesday, 1922; New Jersey Library Association at Atlantic City, April 28, 1922.

IN THE LIBRARY WORLD

MASSACHUSETTS

The Massachusetts Free Public Library Commission became the Division of Public Libraries of the Department of Education by the Acts of 1919, chapter 350, consolidating the state departments. Its new quarters in the Department of Education are so cramped that work of all kinds has been hindered and delayed, particularly the handling of Library War Service books on foreign languages. E. Louise Jones was appointed agent on November 17 after serving as acting agent since the resignation of John A. Lowe in December, 1919, and made eighty-eight visits to libraries in the course of the year.

Collections of books were furnished to 123 libraries, and small libraries were furnished with collections on the Pilgrims for use during

the tercentenary. Other assistance rendered included yearly subscriptions to magazines to ninety-two libraries; the *Booklist* to eighty-one; Audubon bird charts, recataloging supplies, and mending kits. Frances S. Wiggin recataloged, reclassified, and installed new charging systems in the libraries at Hampden, Norwell, Southampton, and Hanover. Appropriations totaled \$22,700, of which \$8,111 was spent for books, pamphlets, and magazines.

Several useful appendices conclude the report, giving details of library progress in the several towns and cities, statistics of the free public libraries, a roll of honor of donors, a list of towns visited, and a list of the "Advisory Visitors" who report conditions and needs of the libraries in their bailiwick to the Board of Free Public Library Commissioners.

Sarah C. N. Bogle

Ass't Secretary of the A. L. A. says:

"THE OPEN ROAD—a monthly periodical suitable for boys from fourteen years up. The exceptional boy under fourteen will enjoy it. Articles are well selected, clean and wholesome. Outdoor sports are given first place but fiction is included. Stories of adventure are virile but not too bloody.

"Editorials are a bit 'preachy' but on the whole the magazine takes a place not filled by any other. Advertising is free from objectionable material.

"Would include in collections for all medium and large libraries and in small libraries doing much work with men and boys."

(Signed) SARAH C. N. BOGLE.

Specimen copies of this magazine may be had free of charge by addressing

THE OPEN ROAD

249 Boylston St., Boston 17, Mass.

A new thing under the sun!

THERE are two methods of keeping in touch with what is going on in the world. On the one hand, such periodicals as the *Literary Digest*, the *Review of Reviews*, and *Current Opinion* apprise us of the march of events of conspicuous men and measures.

The other way is more subjective. There is a growing public that wants more than mere happenings; it wants all of its reading about politics and economics, about art, literature and music, to bear internal evidences of the modern point of view. This is not to be construed as slighting classical standards or the legacy of the past, because progress in every activity is entirely compatible with respect for other times and other ideals.

THE FREEMAN

is a weekly magazine that meets the demands of this thinking group which is moulding American opinion. The FREEMAN circulates in every State and in twenty-six foreign countries. Authors and publishers turn eagerly to its book reviews, publicists to its editorials, and cultivated people, generally, read the whole paper because of its cosmopolitan variety, chosen with taste and presented in well-balanced proportions. The FREEMAN has proved a revelation to thousands and it awaits your coöperation to make it an inspiration to the culture of your community.

Red Letter Day Plays

By Margaret Getchell Parsons

A collection of short impromptu plays to be given by teen age girls including the "Rainy Day Plays," "Jack 'I the Green and The Potentate of Weatherdom." There are in addition some entirely new plays suitable to special holidays such as April Fools Day and Valentine's Day.

Price to be announced.

Recreation

The Ice Breaker Herself

By Edna Geister

Miss Geister has helped thousands of people all over the country to break the ice. In her new book she tells us how she learned to do it and outlines her methods,—which have always made parties of old, young or indifferent social events. Price 75 cents.

The Folk Songs of Many Peoples

By Florence Hudson Botsford

Mrs. Marx O. Oberdorfer, National Chairman of the Division of Music, National Federation of the Womens Clubs, says:—"I thank you very much for the song book, I think it is perfectly splendid and certainly do congratulate you on publishing such a splendid collection, I will do everything in my power to bring it to the attention of the clubs." Cloth \$3.25

Vol I NOW OUT Paper \$2.75
Contains 145 folk songs of the Baltic, Balkan and Slavic peoples.

American- ization

Bookshops Everywhere or **The Womens Press** 600 Lexington Ave. New York City

CONNECTICUT

Hartford. The Hartford Public Library in the year ending June 14, 1921, circulated substantially 100,000 volumes. The Dwight Branch, overcrowded like all other departments of the library, nevertheless led the list with 24,596 volumes. The circulation for the year at the main library and the boys' and girls' room amounted to 259,313. Books, periodicals and binding consumed \$14,195 and salaries for a staff of thirteen \$27,350 of the total income of \$45,053. The unemployment situation was responsible for an increase in the number of readers of magazines and newspapers, but the quality of these readers seemed to be an improvement over that of the ordinary "lounger and sleeper" who frequents libraries. These victims of enforced idleness have manifestly been improving their leisure time by serious study of practical and vocational subjects.

NEW YORK

Syracuse. Outside of the main library, the North and South Branches and the sub-branch in Delaware School there are seventy-six other distributing points in Syracuse for the public library, ranging from the West Genesee sub-branch set up for the service of the public in the neighborhood of Porter School to the small traveling libraries in fire engine houses and hospitals. Nine new stations were opened during the year. The extension department of the library accounted for 331,630 volumes in a total circulation of 760,852, which is more than four books per capita of the population of the city and a gain of about ten per cent over the circulation of 1919.

The library had in all 156,012 volumes at the end of the year, adding 10,835 volumes and losing or withdrawing 5,286, the losses including all missing in a three-year period. A staff of 34 drew \$41,768 in salaries, and \$13,553 was spent for books and binding.

MISSOURI

St. Joseph. The book circulation of the St. Joseph Public Library, Jesse Cunningham, librarian, reached the three hundred thousand mark for the first time in the history of the library, in the year ending April 30, 1921. The circulation of children's books amounted to 153,664, or 48 per cent of the total. The population of the city, according to the 1920 census, was 77,743.

The system now includes, besides the main library and the Carnegie Branch, the first branch building erected west of the Mississippi river, the Washington Park Branch and thirteen school stations. The success of a station at

the Bartlett School for colored children indicates the possibility of enlarged service at this school to the colored population and the eventual development of a branch library. The extension of the library idea into the smaller communities was evident from the increase in inquiries for information and material from the districts within easy reach of St. Joseph. Club women, school officials, teachers and pupils of northern Missouri and the Kansas side of the river made liberal use of the library's facilities all year.

At the instigation of the Library Board an act was introduced and passed by the Missouri State legislature at the session at the beginning of January, 1921, and approved by the Governor, amending a provision of the city charter to provide for a minimum appropriation of eight-tenths of a mill instead of four-tenths. At the time of the passage of the amendment, the increase was estimated at about forty per cent, but with an increased valuation of property which has been made in Missouri, this percentage of increase has been raised and the actual annual appropriation will be about \$26,000 in excess of that granted during the last two years.

The Central Library, two branches, seven sub-stations in the schools and classroom libraries in six additional schools in the outlying districts were operated during the fiscal year by sixteen assistants, nine less than were employed in 1914-1915, and only one more assistant than was employed in 1909-1910, when only the Central Library and one branch were open. Over-due Book Day was observed Saturday, April 16, when persons who were retaining books on which fines had accumulated were permitted to return them and have the fines cancelled on this date.

Total volumes at the end of the year were 90,264, an increase of 4,554 volumes. For books, periodicals and binding \$12,127 was spent, and \$18,963 for salaries. Total receipts were \$38,121.

CALIFORNIA

Berkeley. From a very large number of applicants for the University of California courses in library practice the present class of thirty has been chosen, that being the number which can be trained with the present facilities. Twelve of these are university graduates, the remainder all seniors who have little to do to graduate but to complete the twenty-four units allowed them for the courses in Library Practice. To avoid creating a demand which could not be satisfied no effort has been made to interest undergraduates.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, Of the LIBRARY JOURNAL, published Twice-a-month, at New York, N. Y., for October 1, 1921.

STATE OF NEW YORK,
COUNTY OF NEW YORK, ss.

Before me, a Notary Public in and for the State and County aforesaid, personally appeared J. A. Holden, who, having been duly sworn according to law, deposes and says that he is the Business Manager of the LIBRARY JOURNAL, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:

- Publisher R. R. BOWKER Co.
62 West 45th St., New York.
- Editor R. R. BOWKER
62 West 45th St., New York.
- Managing Editor ELEANOR FF. DUNCAN
62 West 45th St., New York.
- Business Manager J. A. HOLDEN
62 West 45th St., New York.

2. That the owners are:

- R. R. BOWKER Co., 62 West 45th St., New York.
- R. R. BOWKER, 62 West 45th St., New York.
- MARION A. OSBORNE, Morristown, N. J.
- J. A. HOLDEN, 62 West 45th St., New York.
- F. G. MELCHER, 62 West 45th St., New York.
- CAROLYN T. BOWKER, Brooklyn, N. Y.
- A. C. FRASCA, 62 West 45th St., New York.
- A. R. CRONE, 62 West 45th St., New York.
- ELEANOR FF. DUNCAN, 62 W. 45th St., New York.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities are:

NONE.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation, has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

J. A. HOLDEN, *Business Manager.*

Sworn to and subscribed before me
this 16th day of September, 1921.

Branches: Chicago, London
271 Ninth St. Brooklyn, N. Y.

The training given does not consist of casual courses open to any student but a carefully arranged group, covering in scope and content the instruction given in one year library schools, that is, twelve hours instruction with practice and problems each week. To conform to the university conditions the term "school" cannot at present be used to embrace these courses, but students are accepted only for the complete work and none are recommended for positions unless they satisfactorily finish the course.

Los Angeles. The Los Angeles Library School opened September 26 with a class of twenty-four, seven of whom came from the middle west and New England and the others from California. Thirteen are college graduates and the others have had two years of college or library experience. All the students have had at least two weeks preliminary library practice, and fourteen have had from one to seven years experience in college, public, special or camp libraries.

Riverside. Nineteen students have registered for the long course 1921-22 of the Riverside Library Service School. Of these twelve are "regular" students (four college graduates) and seven "special" students. "Regular" students are those who have two years of college or its equivalent. "Special" students are those who have less than two years of college, but are graduates of high schools, and show adaptability and a fitness for the work.

The winter school or short course will begin January 9 and continue for ten weeks. Following is a list of the teachers and their subjects: Mary E. Hyde, cataloging and classification; Louise B. Krause, the business library; Lillian L. Dickson, reference and documents; Alice M. Butterfield, high school libraries, and periodicals and serials; W. Elmo Reavis, book bind-

ing and repair work; Zulema Kostomlatsky, book selection and loan work; library law, business management, lecturer to be announced.

ONTARIO

Ottawa. The circulation of books from the Carnegie Public Library of Ottawa showed a decided gain in 1920, relieved of the handicaps of influenza and early closing schedules of 1919. From 249,858 in 1919 it rose to over 260,000. At the end of 1920 there were 20,679 borrowers' cards in force. The gains were made largely in the branches, West End and Ottawa South, and the four deposit stations.

In 1919 the Mayor at the request of the Library Board made application to the Carnegie Corporation of New York for funds to erect two branch buildings, one in Ottawa South and the other in Lower Town. The request was refused at the time and later, so that, as no other source of funds for library buildings appears available, further development of branches is at a standstill. The Library has in all its departments about 73,000 volumes, ten thousand of these juveniles. The two branches have about five thousand and three thousand books respectively.

The library finished the year 1919 about \$2,800 in debt under the working of the old quarter-mill rate, but is now assured of a reasonable income with the new law providing for a tax on the municipality of fifty cents per capita, the population being now well above one hundred thousand. In that year \$14,873 was expended in staff salaries and \$5,455 for books and binding; in 1920 salaries took up \$20,326 and books and binding \$8,926. The staff numbers twenty-two, including assistants at branches and deposit stations and part-time assistants.

The Science of Fruit Growing

The fourth edition of the SCIENCE OF FRUIT GROWING and the ART OF CULTIVATION, by VIRGIL BOGUE, of Albion, N. Y., is now ready for distribution. It expresses his philosophical conclusions of fifty years study and practice as a nurseryman, gardener, farmer and fruit grower in the center of the Western New York fruit belt. It is suited to the needs of the amateur as well as the professional. It explains the cause of pear blight and apple tree crown rot, its treatment and how to prevent it, and many other favorable and unfavorable conditions affecting the production of fruit and grain. The book is indexed and is now four times its original size. It will be a valuable addition to any library's shelf of rural science books. Price \$3.00, postpaid.

Make the most of
Children's Book Week
November 13-19, 1921

These items will help.

AN EXHIBIT ON CHILDREN'S READING

Ten placards 20 x 26 inches in size, comprising 14 real photographs and appropriate wording. Printed on heavy, gray cover stock.

For use at county fairs, conventions, club meetings, teachers' institutes and meetings, in the library and elsewhere.

Price \$10.00 for the set of 10 panels. Postage or express extra.

CHILDREN'S BOOKS FOR CHRISTMAS PRESENTS

A new buying list for parents and others who make gifts to children. Compiled by Sarah C. N. Bogle.

For distribution by libraries, schools and book stores.

One hundred titles with prices and brief descriptive notes. Attractively printed in two colors. 16 pages, about 3½ x 6 inches.

Your imprint will appear on title page. No credit will be given to compiler or publisher. It will be your list.

Our price for one thousand is about one-third or one-half what it would cost you to print one thousand for yourself.

Order enough to last until Christmas. Begin distribution during Children's Book Week.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

VIEW IN CHILDREN'S ROOM. NEW YORK PUBLIC LIBRARY

The wall shelving shown is of metal 4'6" high equipped with 9" "Open Bar" adjustable shelves.

The main stack room and 43 other rooms in this library are all equipped with SNEAD STANDARD STACKS, the total book capacity of same being 3,500,000 volumes.

Long experience in equipping libraries of all sizes has given our experts a fund of valuable information on library construction and arrangement, which is available without charge or obligation to the library officials and architects.

Detailed plans and description of many notable library buildings are found in our publication "Library Planning, Bookstacks and Shelving," which will be sent free wherever it will be useful in the promotion of scientific library construction.

Certification and Civil Service Control

By JOHN COTTON DANA,
Librarian, Newark Free Public Library

SEVERAL States have "Commissions" which examine, standardize and certify persons who wish to enter library work. These commissions have not given to libraries satisfactory service; indeed, librarians who have had direct experience with them seem to be almost unanimous in the opinion that they interfere with the wise and proper selection and employment of assistants, slow up library work and lower the quality of library staffs.

On first thought it is surprising to find librarians, individually and at their conferences, crying out for more of this very thing toward which they have long been hostile. They cry out now for another "Commission of Interference" which shall examine not only those persons who seek library employment, but also most of those already employed; which shall "standardize" all who are "examined," and shall "certificate" such as in their wisdom they find worthy to work in libraries. This is "Civil Service," is it not? If civil service is not approved of in its present form, why do we ask for the same thing in a new form?

The obvious and brief answer is too impolite for statement here. The involved and courteous answer is two-fold: 1, Librarians are of an ovilious habit; and, 2, Librarians have that ancient affection, governmentitis.

I am sure it is quite an idle task, and especially for one who has, with a few others, been frankly rejected by librarians at a national conference, to try to turn the stream of library appeal away from a call for more of government supervision, away from a call for more management of libraries by State and federal authorities, and toward more of management by those who care most that their libraries be managed effectively and know they can be so managed—that is, by librarians, trustees and the communities they serve. But it can do no harm to register the protest of at least one librarian against the inroads of the itch for supervision by uninformed outsiders which has

attacked my colleagues, and there is a remote possibility that a few others may wish to join in my protest.

Here are a few of the facts that give body to the charge that governmentitis now possesses librarians:

The law of a certain western State says that smaller public libraries shall buy, or make accessible to the public, only books recommended in booklists issued by the American Library Association.

The county library laws of nine States make a feature of "certification," this obviously meaning that in all these States workers in county libraries are to be selected, not by those for whom and under whom they are to work, but by a State commission with full civil service powers.

In one State the libraries which do not comply fully with the laws for "certifying," by and thru outside agencies, all who work in them, are penalized for their display of independence by being refused both State aid and the power to accept aid from local taxes.

For more than three years librarians have voted at meetings of their State and national associations, and almost unanimously, and on almost every occasion that offered therefor, in favor of the extension of civil service interference with their work. They seem keen to establish a national labor union of library workers, whose members shall be chosen by State commissions; and to make all libraries "closed shops" to all save members whose tickets bear the approval of a remote board of examiners. It seems not to disturb them to learn that the examining boards, who are to pass upon the qualifications of those who may wish to work in their libraries, will be in most cases quite ignorant of the special qualities that make good workers in libraries, and of local conditions; and will be keen to exalt their duties; and will in many cases be appointed

not because of fitness for their tasks but for purely "political" reasons.

We now have, as these few facts show, the stream of State civil service interference with library management in full spate, and the great body of librarians are rejoicing in its flow and in its steady rise.

New York State, long famous for the character of its governmental machinery, gives us a note which should be added to the facts which have been briefly stated. In the 34th annual report of its library school, published this year, are the following paragraphs, under the heading "Librarianship and State Certification." To the quotations I have added certain comments, printed in italics.

"Library work is too easy to get into." So are open shops; therefore, form Unions and issue cards to members.

"This entire absence of standards or requirements for practising librarianship (save such as a few libraries have voluntarily fixed for themselves) not only keeps at a hopelessly low level the educational and personal qualifications of librarians, but (as a logical result) keeps salaries small." It is not easy to get funds to pay for workers now; by what magic will funds appear to pay higher wages?

"And this condition operates in another way. It makes professional training seem unnecessary and thus reduces the number of those who are disposed to attend the few library schools." Who will prove these statements? So the new laws will at least fill our library schools! And are the schools therefore the eager advocates of those laws?

"Why spend time for library training when without it there is immediate employment on every hand?" Consider the advantages of owning a union card, and, thru it compelling librarians to have you whether they like you or not!

"Looking to the closely allied teaching profession for a convincing analogy, the point in library development would seem to be reached, perhaps passed, when a system of state certification shall give a wholesome stimulus to library personnel and thru it of course to all library development and usefulness." State certification gives jobs to many; but that it has given a wholesome stimulus to the personnel of any calling has yet to be shown.

"To the certification plan proposed the committee has coupled the proposal for a small state appropriation to be paid to libraries which employ certified librarians." It appears that the excellencies of state certification are not seen by all; therefore, those who are so blind as not to see them are to be penalized for their myopia!

Arguments against the general theory, on which is based the demand my associates make for more governmentalism, are easily found; but would not be heeded if here presented. The trend of public sentiment is toward a more and more penetrating and a wider and wider socialism. Thru it Germany rose to its high estate, under Prussian guidance. "Verboten" was its magic word, and in this country we accept each year more readily the command "Obey," "Obey," "Obey"; and honestly expect to find, in the power that gives us a command and in our ready and eager submission to it, the key that will open the door to that greater social effectiveness that, for a few short generations, we of this new land believed could be found only in individual responsibility coupled with individual reward for responsibility well borne.

As I have already said, protests are useless, as such. But let me add a few quotations which at least hint at the reasons for the faith that is in me.

J. A. Hobson, an English writer of good standing, in a review of a recent book by Graham Wallas says that Wallas discusses fully the claims of guild socialists, syndicalists, and others to fasten the supremacy of professionalism or vocational organization upon society and to endow it with much, if not most, of the constitutional power vested in territorial democracy. Wallas combats this tendency by means of a searching inquiry into the dangers and defects of professionalism as illustrated in law, medicine, and teaching. The professions tend to mechanical routine, excessive conservatism, and a tyrannous attitude toward the public. Especially in teaching (and I venture to add, in libraries, J. C. D.), it is essential that parents and representatives of the general public schools retain a real voice in choice of teachers, subjects to be taught, the allocation of public funds to various grades of education, and general administrative arrangements.

Mr. Wallas's appeal is made this very day. A like appeal was made nearly half a century ago by one who seems now to have had quite the prophet's vision. He wrote somewhat as follows:

Just as the system of voluntary co-operation by companies, associations, unions, to achieve business ends and other ends, spreads thruout a community; so does the antagonistic system of compulsory co-operation under State-agencies spread; and the larger becomes its extension the more power of spreading it gets. For example: Laws to check intemperance, not having done what was expected, there come demands for more thoro-going laws, locally preventing the sale altogether; and in America these will

doubtless be followed by demands that prevention shall be made universal! (Written 40 years ago, and time has proved it true! J. C. D.)

Every extension of the regulative policy involves an addition to the regulative agents—a further growth of officialism and an increasing power of the organization formed of officials (and it is now claimed that the organized body of Civil Service appointees of New Jersey is the most powerful political body in the State! J. C. D.) having common interests . . .

An organization of officials, once passing a certain stage of growth, becomes less and less resistible. . . . The more numerous public instrumentalities become, the more is there generated in citizens the notion that everything is to be done for them, and nothing by them. . . . The socialist speculation is vitiated by an assumption like that which vitiates the specula-

tions of the "practical" politician. It is assumed that officialism will work as it is intended to work, which it never does!

The belief of the socialists is that by due skill an ill-working humanity may be framed into well-working institutions. It is a delusion. The defective natures of citizens will show themselves in the bad acting of whatever social structure they are arranged into. There is no political alchemy by which you can get golden conduct out of leaden instincts.

And do we library people really believe that we, not having ourselves made, by our own zeal and ability, the calling of librarianship of the high standing we desire, can cause it to be made of the desired high standing by and thru the machinery of an unskilled civil service commission, which new laws will set up?

How to Import

THE smaller libraries want to know why and how to import. Let one of their number tell them. Here is a bill for twenty-five new English books recently purchased by a Western library of 50,000 volumes from a well-known London dealer. In parallel columns are set the prices asked by the American handlers of these stocks. Both columns are bona fide, the one based on an actual invoice, the other upon quotations given on request. Both include carriage. The list follows:

for \$76.07. Taken from stock in this country, they would have cost \$119.58, or nearly sixty per cent more.

That's why. An attractive menu, certainly. But how prepare it? It must take a smart cook, some may say. Not at all. There is no mystery about this business. It is just as easy to mail an order to Europe as to New York, and just as simple to draw a cheque for pounds or francs as for dollars and cents. And to the librarian there is no "concealed expense" in it,

Twenty-five English titles are seen thus to have been secured from their normal source

as one apologist for the old order suggests. Here is the entire process:

1. Order from dealers, not publishers. The latter may merely transfer the account to America. The following agents, in the five countries from which libraries draw most of their foreign books, are favorably known in the United States:

For England, E. G. Allen and Son, Ltd., 12-14 Grape St., Shaftesbury Ave., London, W.C. 2; B. F. Stevens and Brown, 4 Trafalgar Square, London, W. C. 2.

For France, Librairie Terquem, 1 Rue Scribe, Paris.

For Germany, Otto Harrassowitz Buchhandlung, 14 Querstrasse, Leipzig.

For Italy, Libreria Liberma, Via Francesco Crispi 81, Rome.

For Spain, Victoriano Suárez, Preciados 48, Madrid.

Addresses in other countries may be given on request.

2. Import by post, not by freight. The latter is slow, costly and troublesome. There is a tariff on English books published within twenty years, but libraries are exempt. Book parcels are delivered like other mail, without any formality, if addressed to the library.

3. The bill is rendered in foreign money. To settle it, a draft or money order (preferably the former) can be secured from any office of the American Railway Express Company. A local bank, too, may be the medium. The post office, however, should not be employed, because its rates of conversion exceed current values, and, besides, are not available at all for certain countries. Thus, in the above list, a postal money order cannot now be sent to Germany or Spain, while for Italy the sender must make his own conversion. For England \$4.00 is charged for a pound sterling (\$3.75 being the present value), and only 11 French francs (instead of the current 14) are given for \$1.00. The Express Company settles with the library in dollars, and gives a cheque or money order to be sent to the foreign agent. That's the whole transaction.

4. As libraries find it useful to have regular lists of new publications from which to select their American purchases—the *A. L. A. Book-list*, *Cumulative Book Index*, *Publishers' Weekly*, etc.—so they may desire similar European trade bibliographies. For the same five countries mentioned above, the following are available:

For England, (a) The Bookseller (monthly), 10 s.; (b) English Catalogue of Books (annual), 15 s.

For France, Bibliographie de la France (weekly), 60 fr.

For Germany, (a) Wöchentliches Verzeichnis . . . des deutschen Buchhandels, 198 M., (b) Halbjahresverzeichnis der . . . Bücher [etc.], 154 M.

For Italy, Bollettino delle pubblicazioni italiane (monthly), 14 fr.

For Spain, Bibliografia Espanola (monthly), 15 pes.

If critical reviews be wanted, one will begin by adding the (London) *Times Literary Supplement*.

The Committee has received a communication, dated October 25, 1921, from the present manager of the Agence de Librairie et de Publications ("A. L. P.") Mr. J. Delbourgo, disavowing the offer published in the LIBRARY JOURNAL of September 1, 1921 by his predecessor. New terms in detail are not yet to hand. Libraries therefore will proceed with caution.

A. L. A. Committee on Book Buying.

A Serious Appeal

COMETH now the Publicity Committee of the A. L. A., headed by Willis Kerr of Kansas, and at his side Arthur L. Bailey, Charles H. Compton, Samuel H. Ranck, and other Citizens of Standing, with an appeal to Librarians for True Tales which May be Told for the Glory and Advancement of the Library Service.

These Men and Women know of many Fair Communities in our Great Country where the blessings of Library Service are not known. From these Famine Stricken Areas Arises Now and Again a Cry, "Tell us What a Library Can Do! To What End Should We Essay to Raise up a Library?"

Therefore Willis Kerr and his Fellow Workers in the Vineyard of Publicity urge upon all to Tell Tales out of Libraries, Tales that May Prove how Libraries Can Help Business, Advance Education, and build Men and Women of the Stature of Mind and Soul Needed in this Republic.

Paul M. Paine, of Syracuse, in the Commonwealth of New York, Asks the Honor of Receiving and Editing such Tales for the Common Welfare of Library Service.

W. H. KERR.

The October number of the *Bulletin of the Haverhill Public Library* is devoted entirely to the Library's picture collection. Last year 32,187 pictures were circulated, the majority of which were used in the schools. The whole collection numbers about 40,000 pieces.

National Certification and Training*

A PLAN for a national certification system presented to the Association in very general outline at the Asbury Park Conference in 1919 was informally approved at that time and referred to the Council. Subsequently it was considered by the committee in charge and embodied in the Enlarged Program. Altho it later became necessary to abandon the major part of that Program, the certification proposal has survived as the one feature aiming at the advancement of the library profession which must not be abandoned, but carried forward at all hazards. In spite of the general approval it has won and some impatience to see it put into effect, your Committee considers it advisable in a matter of such far-reaching importance to proceed deliberately. Last year the plan was carefully considered by a special committee appointed by the Executive Board. The report of this committee recommending the establishment of a National Board of Certification for Librarians was adopted at the Colorado Springs Conference and forms the basis of the study which has been given to the subject by the present Committee.

FUNDAMENTAL PRINCIPLES INVOLVED

The proposed national certification plan is based fundamentally on the principle that it is not only the right but the duty of the American Library Association to formulate standards of fitness for professional library work; and this principle carries with it as an inevitable corollary the right and duty of the Association to cause to be created, and even to contribute to the financial support of, some properly constituted body for accredited training institutions which maintain the standards of instruction deemed necessary for efficient and progressive library service.

The principle of accrediting educational institutions, thru voluntary organizations, both academic and professional, is well established. Tremendous advances in medical education, for example, have resulted from the application of this principle. By its action a year ago, the American Library Association put itself definitely on record in favor of national certification and the use of the accrediting device to secure professional progress and progressive efficiency in library service. It is a notable step the Association has already taken, but we still have before us the more difficult practical task of financing and organizing the Certifica-

tion Board. Until that body is actually at work, little can be done to remedy the conditions which have so long made library work the most underesteemed and underpaid of all public services.

A WARNING

. . . We must be on our guard to distinguish between attacks born of selfish and unworthy motives and the sincere questionings of those whose judgment may differ from our own.

VOLUNTARY VERSUS COMPULSORY METHODS

The situation in the library profession demands that emphasis be laid at this time on voluntary rather than compulsory methods. The need for compulsory standards of fitness cannot be as readily demonstrated to the layman as in such professions as medicine or law, where danger to life and health or loss of property are the direct and manifest result of incompetence. . . .

Perhaps the principal advantage of the national voluntary system lies in its second feature—co-ordination and accrediting of training agencies. Following the modern system of certification of teachers, it may be assumed that it will be found desirable to certify without examination the graduates of approved training schools. In teacher training the state is traditionally a self-sufficient unit, and can properly be so because of the large number of teachers required. The number of professional library workers, on the other hand, is so much smaller that many states cannot be expected to support adequately their own professional library school. They will necessarily recruit workers, particularly for specialized types of work, from schools located in other states, but how futile it would be for each of the forty-eight states to make its own examination and accredited list of the twelve or fifteen, or more, library schools in all parts of the country, and how confusing to schools to be subject to the separate and inexpert scrutiny of forty-eight states, to find themselves accredited perhaps by some states and not by others. The only sensible thing is evidently to provide one central accrediting agency. . . .

RESPONSIBILITY RESTS ON CERTIFICATION BOARD

The proposed National Board will be responsible for working out the details of the certification and accrediting system. It must be made up of the ablest and most experienced members of the profession, whose minds will be open to all helpful suggestions and who will go about their important work with the single purpose of doing the constructive and helpful thing.

* Report of the Committee on National Certification and Training, 1920-1921, abridged.

The Board will not pass back to the Association the responsibility for making decisions in matters of detail. . . .

ADVISORY COMMITTEE SUGGESTED

Qualifications for professional library work are essentially the same in every part of the country. . . . While it is entirely practicable, therefore, to set up standards for the entire country, it may well be found advisable for the Certification Board to organize advisory committees in various sections of the country to assist in the application of those standards. In the opinion of the present Committee, one of the earliest tasks of the Certification Board should be the formulation of a plan for advisory committees so constituted as to be representative of the best professional ideals and practice of the states. Upon such advisory committees the Board should rely for much of the information on which to base its judgments in all cases requiring first-hand knowledge of conditions. . . . They would keep the National Board closely in touch with local conditions in all parts of the country, would serve to bring the work of the Board to the attention of state and local associations, and would be of the greatest assistance in securing the adoption of national standards by state and local authorities.

PLAN OF CERTIFICATION TENTATIVELY SUGGESTED

Little further progress can be made until funds are available to carry on the activities of the Board. . . . Until an annual income of at least \$10,000 is in sight, it would, in the opinion of your Committee, be unwise to proceed with the organization of the National Board of Certification of Librarians.

In the meantime, it may be profitable to examine the project from as many angles as possible. This committee would not presume to prepare a detailed plan for the use of the future Certification Board. There can be no objection, however, to suggesting the outlines of a tentative plan merely for the purpose of giving a clearer understanding of the implications and possibilities of the principles already adopted. Tho the Board, when organized, may not see fit to be guided by suggestions offered here, they may contribute to the clarity of our thinking, and even help in finding financial support.

It is in this spirit that your Committee wishes to submit for discussion a tentative scheme of certification illustrative of what the Board may eventually adopt. . . .

OUTLINE OF TENTATIVE SCHEME Class I

Education: Same as for Classes II and III.

Experience: Notably successful experience of

at least ten years in library administration or in professional library work requiring special technical skill and involving considerable responsibility.

Types of Positions to Be Filled by Holders of Class I Certificates: Chief librarian, and occasionally assistant librarians, of large libraries—municipal, state, university, college, endowed libraries, etc.; head of department in large libraries, where position requires special technical qualifications, or broad knowledge of library work, with supervisory or administrative responsibilities; directors of library schools and the successful professors and instructors in library schools; officials of state library commissions.

Class II

Grade A. Education: (1) Graduation from approved college, with reading knowledge of at least one modern language other than English; and (2) not less than one year's successful study in an approved library school, with recommendation of school faculty.

Experience: Not less than five years' successful experience after taking library school course, except that one year of approved specialized or advanced study may be substituted for two years of the experience required for Class II certificate.

Grade B. Education: (1) Not less than one year of successful study in approved college, or the equivalent, including reading knowledge of at least one modern language other than English; (2) one year's study in approved library school, with recommendation of school faculty, or passing of examination in library economy, and such other tests as may be prescribed by Certification Board.

Experience: Ten years' successful experience, less one year for each full year of study (beyond the first year) in an approved college, and for one year of study in an approved library school.

Types of Positions: Head of public libraries in smaller cities, smaller state libraries, less important college and university libraries; assistant librarians in such libraries; heads of departments in libraries of all sizes; branch librarians; reference librarians; librarians of important school libraries; heads of important special libraries; teachers in library schools.

Class III

Grade A. Education: (1) Graduation from approved college, with reading knowledge of at least one modern language other than English; and (2) not less than one year's successful study in approved library school, with recommendation of school.

Experience: None required.

Grade B. Education: (1) Not less than one year of successful study in approved college, or equivalent, including reading knowledge of at least one modern language; and (2) one year's successful study in approved library school and recommendation of school faculty; or, passing of examination in library economy and such other tests as may be prescribed by Certification Board.

Experience: None required.

Types of Positions: Professional assistants in all departments; heads of small libraries; heads of minor departments; branch librarians of smaller branches.

Class IV

Grade A. Education: Four-year course in approved high school; instruction in approved training class or other approved training agency, as may be required by the Certification Board.

Experience: None.

Grade B. Education: Four-year high school course, or equivalent to be determined by the Certification Board; and passing of examination in library technique and such other tests as may be prescribed by the Certification Board.

Experience: At least one year of approved library work.

GENERAL EXPLANATION OF PLAN

The distinction between the three classes of professional certificates is based primarily on successful experience, professional achievement and demonstrated fitness for some branch of professional library work. . . .

Advancement from Class III to Class II and from Class II to Class I should probably not be automatic. Mere length of service should not qualify for the higher certificate. The Board should require some definite test of success. . . .

SPECIAL CERTIFICATES

In addition to these three classes of general professional certificates, a group of special certificates should be provided for. In the beginning these should probably be at least equal in rank to Class II certificates and call for special qualifications in addition to those required for general professional certificate of Class II. . . . Among the special certificates which will probably be found desirable from the beginning, the Board may issue one which will stand for special skill in cataloging. . . . Other special certificates should stand for similar special ability and success. Certificates for high school work, children's work, and business library work are types that readily suggest themselves as among the first to be used.

CERTIFICATE FOR UNLIMITED TERM RECOMMENDED

It will be observed that differentiation between certificates of higher and lower rank is not based on the length of time for which they are valid. . . .

SUB-PROFESSIONAL CERTIFICATE

In addition to the three general professional classes and the various special certificates of professional rank, a Class IV, or sub-professional, certificate is provided in this suggested scheme. This Class IV is not to be considered as an entrance door to the professional classes.

. . . The general confusion of the professional and clerical grades of service is one of the conspicuous defects of library organization at the present time, and this confusion tends to be carried over into the work of training agencies.

The Class IV certificate is provided, therefore, to give conspicuous recognition to the distinction between the professional and clerical types of library work, and to make it clear that both types are essential, that both require special, tho not the same, qualifications, education, and training. . . .

Class IV, then, will make evident to all the difference between the two types of trained library workers. . . .

The Class IV certificate will also serve a useful purpose in enabling the Board to standardize training classes, summer schools, and other agencies engaged in training for the sub-professional services. The product of approved training classes, and other agencies of the same grade would be granted a Class IV certificate without examination in the same way that it is proposed to give Class III certificates to graduates of approved professional library schools.

APPLICATION TO LIBRARIANS NOW IN SERVICE

The suggestions sketched above look upon the national certification system as a going concern—a condition that probably cannot be reached inside of two or three years. After the general plan has been worked out and adopted, the Board will be confronted with two problems requiring much constructive imagination and no small amount of tact and judgment. The first is the problem of classifying and certifying librarians now in service and bringing them into the system. The second is the classification and accrediting of training agencies, since entrance to the system will from the start be partly thru the library schools.

It should be clearly understood that the system proposed is designed primarily to apply to those entering library service in the future, yet it is desirable from the very first to bring in at least the larger part of workers now in service. Nothing else is so certain to insure the success

of the plan. As the system is purely voluntary, it will be the task of the Board to create an interest and a desire to participate in it. It is not opposition but indifference that the Board will have to contend with in the beginning.

Obviously the standards designed for future entrants cannot be applied literally to the existing body of workers. It would seem that the procedure of the Board should be somewhat as follows: A system of certification having been formulated and adopted, it will be given wide publicity and carefully explained. Each library worker will be able at once to form a pretty accurate estimate of the place in the scheme to which he is entitled by his present work and responsibilities. He will then make application to the Board for the certificate to which he considers himself entitled, or will apply simply for certificate, leaving the matter of class entirely to the judgment of the Board. The blanks provided would ordinarily give the Board the information necessary to pass on the application; in doubtful cases it would seek the assistance of properly constituted advisory committees.

No applicant now in service would be subjected to examination other than the statement of facts submitted in making formal application for certification. Examinations come into play only in dealing with future entrants who cannot offer the required credentials from approved institutions of general and technical education and as a basis for promotion from class to class. Each worker should be accepted and certified on the basis of what he is now doing and not made to suffer any unnecessary disadvantage for lack of formal technical training. This is all that anyone can ask. The whole system when once established should go far toward wiping out the present more or less artificial distinctions between those who get their training by experience and those who arrive via the schools.

CERTIFICATION WILL AID IN RECRUITING

It may appear that the setting up of the certification system, with higher standards for future entrants to professional positions, will have a tendency to increase still further the shortage of competent workers. A moment's reflection will show, however, that such is not likely to be the result. Libraries will have exactly the same workers they had before. Some of them may not be certificated and some may not have as high a professional certificate as may be desirable for the position held, but no organization is any worse off than it was before. The difference is that under the certification system each library knows exactly where it stands. For a time it may have to get on with a larger pro-

portion of workers of sub-professional rank than it should, but the system gives a definite goal towards which to work.

In the long run the fixing of standards, by fostering professional spirit and increasing efficiency, will raise salaries and attract more and better recruits which improved and enlarged training agencies will bring into the certification system and relieve the existing shortage of competent workers. . . .

BOARD NOT CONCERNED WITH SALARIES

It is probable that in the course of time each class of certificate will come to stand for a definite range of salaries. A Class III certificate, for example, might stand for a salary of \$1,500 to \$2,400; a Class II for \$2,000 to \$4,000; and Class I, \$3,000 and upwards. Salaries for the different classes of certificate holders would necessarily overlap and the range for each would have to be quite extensive to allow for differences in local conditions. Standardization of salaries to correspond with standard grades of professional rank is no part of the present proposal and will not come within the scope of the duties or powers of the National Board.

RELATION TO A. L. A. EMPLOYMENT SERVICE

It is evident, however, that there should grow up at once an intimate relation between the Certification Board and the A. L. A. employment service. The records of the Board in regard to each certificated member will be far more complete than the employment service can hope to bring together for its own use.

COMPOSITION OF CERTIFICATION BOARD

. . . The committee reporting last year recommended the creation of a board of nine members, five to be elected by the Council of the American Library Association, one representing a public library with a training class, one a small public library, one a state or federal library, one a college or reference library, and one with library relations not specified. The four other members were to be elected by the Council upon nomination by each of the following organizations: the Association of American Library Schools, the League of Library Commissions, the National Education Association, and the Special Libraries Association.

After thoro consideration the present committee endorses this plan in principle, but raises the question as to whether it would not be advisable to bring in also a representative of institutions primarily engaged in the work of professional education in general. Many of the library schools are now more or less closely affiliated with universities, and the tendency is clearly in that direction. If library work and training are to be put on a par with other

professions the presence of a representative of the American Association of Universities of the National Association of State Universities might prove to be of very great assistance. To make room for such a member in a board of nine, it has been suggested that the League of Library Commissions might be omitted, since the interests represented by the commissions are fully cared for by other members of the Board. The problem is to secure in the membership of the Board a proper representation of all the library and educational interests which will come within the influence of its activities. . . .

The present committee also wishes to call special attention to the importance of a suggestion made by last year's committee in regard to incorporation of the Certification Board. It is clearly essential that such a body should have a high degree of independence and not be subject to the exigencies of Association politics or endangered by such a drive as might readily be engineered by a small but active and discontented element. It must be able to maintain a consistent policy and program over a long period of years. The Board should also be in a position to deal without fear or favor with all present and future library organizations as well as with all other professional and educational organizations having any interest in standards of library service and training. A Board incorporated by Congress or one of the states, with a membership constituted in some such way as recommended by last year's committee, would be sufficiently amenable to the real opinions and desires of the library profession. The American Library Association by appointing a majority of its members will have adequate control over its activities and as an independent incorporated body, its dignity and authority would be insured.

COMPARISON WITH BRITISH SYSTEM

The national certification system will secure for American librarianship the advantages, without the disadvantages, which the British Library Association derives from its scheme of examinations and certificates, coupled with its system of classified membership. Roughly speaking, the three classes of certificate holders in our proposed plan would correspond to the fellows, members, and student members of the British Association. The British system of association dues also gives a hint as to a method for financing the work of our National Board. Fellows pay dues of £2 2s a year, and members £1 11s a year, while student members pay only 10s 6d. It would seem to be quite fair and entirely practicable to assess holders of Class I certificates \$10 a year, Class II \$5 a

year, Class III \$2 a year, and Class IV \$1. Such a scale of annual fees in addition to examination and entrance fees would go far toward meeting the expenses of the Certification Board after the first few years. Some such scale of dues would correspond approximately to salaries received and be much fairer than the low flat rate which is the only practicable method under the present conditions of A. L. A. membership. The committee makes no recommendation on this point but offers the suggestion for consideration.

RECOMMENDATION

In view of the fact that no practicable means of financing the activities of a Certification Board are yet in sight and it is therefore unwise and inexpedient to proceed at once with the organization of the Board, your committee recommends that the Executive Board be empowered to appoint another temporary committee whose duties shall be to give the subject continuous consideration in general and especially (1) to seek financial support, (2) to prepare articles of incorporation, and (3) to proceed immediately with the incorporation and organization of a Certification Board whenever funds are available to carry on its work with a reasonable assurance of permanency.

FREE ON REQUEST

"The New York Public Library has received from Colonel Arturo Santana of Caracas, Venezuela, a number of copies of his "La Campana de Carabobo (24 de Junio de 1821) Relacion Historica Militar." The volume is in Spanish, unbound, quarto, has 392 pages and contains numerous portraits of distinguished South Americans, maps and illustrations. Considerable of the matter has to do with Simon Bolivar. The weight of the volume is four pounds wrapped. A copy will be sent to libraries requesting one upon receipt of postage to the zone indicated."

A revised edition of the New York Public Library handbook has been issued and is on sale at the central building, price twenty-five cents.

*Mr. Hyde signed this report in his personal capacity and not as president of the Special Libraries Association.—Ed. L. J.

Some Recent Reference Books*

Annuaire des ventes de livres; guide du bibliophile et du libraire; publié par Léo Delteil; 1re année (Octobre 1918-Juillet 1920). Paris: A L'Agence Général de Librairie et de Publications [1921]. 421 p.

A new manual of French book auction records which fills a long felt need. Outside of two or three sporadic attempts, no guides to the current values of French books have been published and unless the books have been sold at auction in the United States, England or Germany, none can be established. The work is well executed and gives a rather fuller physical description of the books than the American or English auction records. Author alphabetical arrangement. Leo Delteil, the editor, has recently attempted a similar venture, an annual, giving print auction records.

Graham, Bessie. The bookman's manual; a guide to literature. New York: R. R. Bowker Co. 1921. 434 p.

Consists of material expanded from a course of lessons on book salesmanship given at Philadelphia and is reprinted from chapters which appeared serially in the *Publishers' Weekly*. Intended as a summary of the best books in most fields of general knowledge and literature. Intended for booksellers, but contains some material of interest to librarians particularly the information and comments about modern American novelists, poets, dramatists, and about editions of the classics. Weak in some departments; e.g., gives no space at all to Italian, Spanish, Scandinavian, or Dutch literature. Arranged in classified chapters with systematic presentation of material. Indexed.

Williams, Reginald G. A manual of book selection for the librarian and book lover. London: Grafton & Co. 1920. 132 p.

A text-book of book selection. Chiefly useful for assistants desiring promotion thru examination or students who wish to familiarize themselves with the elementary aids to book selection in the various fields of knowledge. The methods of classifying and recording purchases given, might also be of use to the librarian of a small library. References are almost entirely to British works.

Master printer's annual and typographical year book, 1921; ed. by R. A. Austen-Leigh and Gerard T. Meynell. London: Spottiswoode, Ballantyne & Co., Ltd., [1921]. 448+54 p.

First issue appeared in 1920. An annual review of industrial conditions, directory, and who's who of the printing trade in England. The directory feature includes associations, alliances, trade unions, and benevolent societies, and a trade directory of stationers. Includes also a bibliography for practical printers, and a chronological list of printers who have occupied prominent positions as King's printer, etc.

Handbook of local government for England and Wales, prepared for the use of Councillors; with special sections on matters of immediate importance. . . . London: Labour party [and] George Allen and Unwin, 1920. 265 p.

Systematic treatment in encyclopedic form of the organization and powers of local government in England, with emphasis on what may be termed the

public welfare side. Directory of the Labor Party offices and officers. Bibliography. Not indexed.

The Labour international handbook [1921]; ed. by R. Palme Dutt. London: The Labour Publishing Company, Ltd., and George Allen & Unwin, Ltd., 1921. 320 p.

Prepared as a continuation and extension of the *Labour Year Book* by The Labour Research Department. "Part I consists of reviews of the leading issues of international affairs and foreign policy from a labour standpoint. Part II is intended as a guide to the international labour movement." Contains chapters on: The Peace Treaties; International Government (including the League of Nations) Economic conditions after the war; Russia and the World; Problems of Racial Conflict; International Socialism; International Trade Unionism; International Co-operation; Labour abroad, and a Directory of International Labour. Indexed.

Artschwager, Ernst and Edwina M. Smiley. Dictionary of botanical equivalents; French-English, German-English. Baltimore: Williams & Wilkins Co. [1921.] 137 p.

Translation of technical botanical terms not commonly found in dictionaries. "List of plant names includes important economic plants, farm weeds, and the Latin equivalents for the larger plant groups." Does not aim at complete compilation. German section which is by far the largest portion of the book is based on Schneider's *Illustriertes Handwörterbuch der Botanik*. Only 15 of the 137 pages in the book are devoted to French terms.

Haynes, Edwin, comp. and ed. Timber technicalities; being definitions of terms used in the home and foreign timbers, mahogany and hardwood industries, the sawmill and wood-working trades, as well as those employed in connection with architecture and building construction. London: William Rider and Son, Ltd., [1921]. 191 p.

A useful glossary of terms used in the description of timber, timber working and building. Commercial and shipping terms also included. Additional features are: a bibliography of timber; contractions and abbreviations in use in commerce; tables showing the gain in freight on planed wood; the actual measurement compared with the nominal; approximate weight per cubic foot of English, and official weights of American hardwood lumber; and a glossary of terms in five foreign languages.

MacCába, Alasdair (Alexander MacCabe), ed. *Leabhar nah Eireann*. The Irish Year Book and world directory. Dublin: The Kenng Press, 1921. 160 p.

Reappearance in new form of the first *Leabhar nah Eireann* which ceased publication. Contents consist chiefly of short signed articles on different phases of Irish art, industry, literature, education, and government. Strongly nationalist in treatment. The world directory feature contains little that cannot be found in an ordinary almanac.

Great Britain. Naval Intelligence Division Admiralty. A manual of Netherlands India (Dutch East Indies). Comp. by the geographical section of the Naval Intelligence Division, Naval Staff Admiralty. London: H. M. Stationery Office, [1920]. 548 p. (I. D. 1209.)

Encyclopedic information in condensed form about the Dutch East Indies. Similar in treatment to *Statesman's Year Book*, but of course, much fuller. Topography, climate, administration, health, history, agriculture and industries are all included. Indexed.

*From Carl I. Cannon's List of Reference Books prepared for the *Bulletin of the New York Public Library*.

Certification of Librarians*

CERTIFICATION of librarians, with all deference to its promoters, is an undesirable thing. Heretofore, when about to spill printers' ink, we have deliberately kept our hands off this subject. It was the one activity listed for the enlarged program which we could have seen die without regret and we even fatuously hoped it might; but recent developments indicate that it is about the only one of those activities which today is thoroly, even lustily, alive. And when the chairman of the A. L. A. committee on national certification brings in, at Ithaca, a report on which no discussion is desired, presumably as tho the matter were already settled for all time, we realize that the danger is rolling very near indeed. We doubt if our words will carry much weight, for such is the penalty that the purposely facetious is apt to suffer when occasion finds him in downright earnest. But we will risk it.

Libraries need and want college graduates, library school graduates and trained people of experience. They have always needed them; but poverty and the ignorance of trustees, city fathers and the public itself have caused many institutions to grow up without these trained administrators with results in which both good and bad have played their parts. But the days in which we did not know our needs are rapidly receding into the past. Before long—certainly during the lifetime of most of our present incumbents (and every certification plan we have seen makes provision for retaining these)—it will be the exception when a community will have to be told what sort of person it should employ in the office of librarian, and the problem will resolve itself into the ultimate one under all circumstances of finding and paying the right person. And, say what we may to the contrary, it will be the call of the job and the satisfaction of adequate remuneration which will have power to attract the right person, rather than the glory of the certificate.

But while we need the trained librarian much we need the born librarian more, non-graduate tho he or she may be. Certification schemes take some notice of this fact but only in so far as to permit the employment of non-graduates who have demonstrated their ability before the date on which the law will take effect; they provide no opportunity for the testing of an about-to-be-born-librarian's mettle. Such, we are told, should add the indispensable degrees to their birthright. So they should if possible, and if they know in time; but if the negligence of one's forbears, or the occasionally honest

absence of dollars and cents stands in the way of such degrees, the library and the born librarian will never meet, or will meet but to part. Certification will then have succeeded in excluding the fittest, for natural bent, since it may not be acquired, must remain our biggest single asset.

Exclusion of the unfit, which is certification's strong card, is, similarly, a matter of enlightenment, of money and of the courage to dismiss, and is not to be assisted by making it also a matter of law. Enlightenment spreads more surely and successfully thru suggestion than thru force, and suggestion and recommendation are rapidly doing their work. The very fact that the certification idea is taking hold spontaneously in so many places, is proof that we know our needs and are willing to go to considerable length to supply them. That it also shows our tendency to seize precipitantly upon the first remedy offered, is a less encouraging sign.

The mediocre will come among us, of course, whatever happens; but certification, if it does anything at all, will help to cripple us here. Under it the mediocre will climb in grades and will automatically draw increased pay for unimproved service. Few of us have any difficulty in recalling the proportion of this type who "got thru" in our own student days; and it is a careful library school which does not graduate its quota annually. In fact no normal (in its common meaning) class can be without them; and to them alone certification will prove a boon. Precisely after the manner of civil service will certification function in this particular.

Even New York State, which is headed direct for certification, having just given its regents autocratic power over library appointments, admits in its replies to objectors, that some of the reasons against are founded on possibilities. That there is a "real danger" that certification is likely to place too much value and emphasis on mere technical training and thus make the operation of libraries more a process of machinery than an expression of ideals and personality, New York allows, but holds that this is only to be feared when the "tests are too mechanical or technical." But tests that are neither mechanical nor technical are extremely difficult to formulate into law and quite as difficult to apply when legalized. The only adequate provision here would be so loose a one, in the legal sense, as to permit us to exercise

*From the *Boston Evening Transcript* of October 12.

our pre-certification liberty of choice. And if this be so, why the red tape of the law at all?

Again, to the charge that certification must be operated by State officials and tends to add to the authority and autocratic power of such officials, New York replies that "this is, perhaps, inevitable," as it is with licenses issued to other professions; but that "any board having charge of such certification, being a creature of the State, will be kept in authority only so long as its service is satisfactory to the State as a whole." With this latter statement, we differ radically. The interest which the State as a whole will have in the everyday workings of a librarians' certification committee, will be practically nil. What, now, does the State as a whole care for the difficulties and vexations of spirit, the hold-ups, hindrances and nullifications that libraries under civil service undergo? The State as a whole, or the city as a whole, has had impressed upon it that civil service is a panacea for many evils. So it fixes civil service by law, impartially, where it will do the most good and where it will do the most harm, and then quietly goes to sleep under its rule. And if, perchance, a library protest grows so loud as to reach its somnolent ears, it grumbles, with a sense of just irritation, that librarians are a fussy lot who do not know a good thing when they have it. So the State as a whole turns over and goes to sleep again. And if this is true of civil service which no library ever desired, it will be still more true of certification laws which are backed by the libraries themselves.

The small number of good applicants for library work in comparison to the demand is our present greatest hardship. Certificationists say that when requirements are fixed by law this dearth will cease and as soon as librarians become a licensed class they will also become a numerous one and a better one. Judging from analogies in the other professions, we doubt it. To the ordinary mind a license is a necessary nuisance intended to keep out impostors and to keep up statistics. We seldom trouble to verify its possession by the physician or the lawyer of our choice. Instead we look for personal qualities, places of education and past records of achievement. There is no field in library work for imposture, and it ought to be self-evident that we shall continue to prize ourselves and others will continue to prize us, in the future as in the past, because we are librarianly-born, or Albany-bred, rather than because we hold a regent's permission to work in New York or a certificate in Wisconsin.

It is possible that more of the mediocre will flock to library schools when such attendance

is demanded by law, but we are not of the opinion that this will elevate the profession. To be condemned to the deadly dullness of a ground-out product is not a cheerful prospect.

We trust New York is going to like its law now that it has one. A town within its limits may not use its own tax money for a public library unless it hires a librarian to suit the State Regents, which latter are given discretionary, and apparently unlimited, powers! To put it mildly, this is going some, we think. It is even going more than Wisconsin, which has its cut and dried stipulations for four grades of certification. We hope they will both enjoy the fruits of their labors; but we hope much more earnestly that all the other States, and the nation, will hold off for a very long time to watch results in certified quarters. And such as have bills pending will be wise, indeed, if they can drop them in committee into those particular pigeonholes, possessed of all Government committees, that open on the bottomless pit.

THE BOOKMAN'S JOURNAL AND PRINT COLLECTOR

THE publishers of the LIBRARY JOURNAL announce that they have arranged to be joint publishers of the *Bookman's Journal and Print Collector*, a new monthly magazine in the collecting field, edited by Wilfred G. Partington. The edition for both countries will be printed in London, and the subscription price will be six dollars a year. This monthly, the only periodical in the field, succeeds a weekly of the same name, which in less elaborate form has run thru four volumes. The new form starting as volume five, number one, is dated October 1921. The editor has enlisted a strong corps of contributors, and in the first number is the beginning of a series of reminiscences by Clement K. Shorter, an article on "The World and the Artist" by John Drinkwater, on "Gold-Tooled Bookbinding in England" by Cyril Davenport, the leading writer in this field, an article on the Roger Bacon manuscript by Herbert Garland, one on James McBey, master etcher, by Malcolm C. Salaman, reviews of important books in the field of collecting, the beginning of a series of bibliographies by Henry Danielson, and records and notes of English auction sales in both the book and print fields.

BACK NUMBERS OF THE LIBRARY JOURNAL WANTED

Twenty-five cents each will be paid for numbers of the LIBRARY JOURNAL for April 15, 1920, and January 15 and February 1, 1921, returned to this office.

The Riverside Library Service School and Its Founder

By R. R. BOWKER

THE Riverside Library Service School is *sui generis* because Riverside is a *sui generis* place and even more because its founder Joseph Francis Daniels, was very *sui generis* indeed. The word "Service" in the name of the School represents the spirit of his life. Coming to the Riverside Public Library in 1910 with ample and varied experience both as librarian and educator, he promptly recognized the need for library training in California and in 1912 he started the school. After school graduation he had chosen architecture as his profession and in arranging the collection of professional books in the architect's office which he first entered, he heard of the Decimal Classification, went to Amherst to learn about it, and thus happened upon his later library career. Leaving an architectural partnership in Boston, he went in 1893 to the Chicago Exposition and thus to Colorado and in seventeen years' service in the Greeley Public Library and the Normal School and the Agricultural College of the state, laid the foundation for his larger work in Riverside. In Colorado he was a student and investigator on many subjects, preparing in particular the research reports for the Kansas-Colorado water suit, one of the most important legal settlements on that question. Evidently he was always an odd genius, and one of his trustees told me of his first appearance at Riverside when most of the trustees were rather taken by his nonchalant and unusual personality, but feared that he might not pass the scrutiny of the sedate and conservative president. It was not long before he made his mark in and on Riverside. He started the "Kind Words Club" as contradictory as his own personality, for the "kind words" meant good-natured obloquy on the members who lunched together at the Mission Inn from time to time. For a brief time he took a Sunday School class which developed into a remarkable boys' organization and ultimately into the Junior Chamber of Commerce. One of the subjects he put up for discussion was "What sort of wife do you think you want?", which was followed up by "What sort of husband do you think she will get?" Last year he was elected president of the Chamber of Commerce itself and at once devised a Town Conference which was to bring all interests together into useful co-operation. All this illustrates the freshness, virility and versatility of

the man, without whom no circle in Riverside thought itself complete. "Joe Daniels" was known and loved by every one in that community and its loving affection was symbolized in the "resolve" which one of the associations sent to its absent member on his sick-bed—"God bless you, Joe." It was this man's different character which made the Riverside Library Service School different from others.

The Riverside Library School does not conform to regulation principles. It is not orthodox enough to be included in the Association of American Library Schools. It is not entered in the A. L. A. library handbook "Training for Librarianship," with the thirteen therein described. This is because it had not accepted the formulas that a proper library school must have separate school quarters, tho it now has such, permanently assured finances, and a separate staff of permanent teachers. Mr. Daniels' experience in educational work taught him to look upon another method as preferable. He spoke of his own plan as the "group system" based on "projects" and in line with what is known as the "new education." This means in collegiate parlance a seminar system, with practical instead of book work, rather than a classroom system of general teaching. In the new quarters of the school Mr. Daniels intended to banish desks and "fixed location," and to continue practice work as the general method of the school. There was to be a stated person in permanent charge of the school and perhaps one or two permanent teachers, but Mr. Daniels preferred as far as possible to bring people from actual library work to do the teaching from time to time rather than to employ teachers whose methods become fixed as their work is fixed by standardization. It is the old problem in the colleges of breeding in or breeding out, and Mr. Daniels generally preferred breeding out. He used to tell of a well-known library teacher and lecturer who incidentally talked on library architecture, and after she had gone he had from his own practical architectural knowledge to undo most of her work. He pursued the plan of bringing to the school not only some of the best known librarians, as Dr. Bostwick and Dr. Hill, to lecture on general library problems, but also some of the most practical specialists as Theresa Hitchler, Louise B. Krause and Adelaide R. Hasse, to give courses respectively in cataloging, business librarianship and public documents.

It seemed sometimes rather difficult to find the library school in the Riverside Public Library. This was because the groups were for most of the time in different parts of the library engaged in project work. This, by the way, is a Carnegie building, also *sui generis* because it is in the Mission style prevalent at Riverside, which presently is to be considerably extended by a new \$25,000 grant from the Carnegie Corporation. Within the past year the trustees have been able to purchase the rest of the block-face on the main avenue of Riverside, including the Allatt family mansion which is to be the future home of the library school and another residence, which was rented to the librarian. In fitting up the separate building for the school it was Mr. Daniels' purpose still to avoid classroom appearance and strike out on new lines. He believed that there ought to be more library schools and that the new ones ought to cultivate unoccupied fields and try new methods. Mr. Daniels' thought for the school can best be explained by a quotation from a letter sent within the year to the Chairman of the A. L. A. Publishing Board, Dr. Bostwick.

"When I speak of projects everyone from the library world replies, 'What do you mean by projects?' A project in a child's hands in school means building a wagon or mending a book or work of that sort, or even play. From those simple things it moves up to more complex projects as the child grows older. You will say, 'That is what we do every day,' but the truth is, we don't, because we do not view the thing from that angle. Unless we have the project as a purpose in mind we are not doing project work. C. A. McMurray's book 'Teaching by Projects' goes into this matter.

"Project work cannot be done well in classes and must be done in groups. From that we have developed our group captains and stations and projects. We suspect that beyond this lies some newer and better plan and the new thing will grow out of the experimenting with projects.

"We believe that projects will completely change the floor of a classroom and in our new building we are planning for office rooms where students will spend most of their time. We shall use no desks such as you see in library schools, and we shall reduce the lecture system to a minimum; that is, we shall reduce the talk and increase the work. This plan abolishes the examination system completely and in place we substitute weekly reports from everybody concerned, even the student herself, as in a factory system. Slowly those reports will take on the form of reports of projects just as the engineers who built the Panama Canal must have made their reports. These projects of course, will

swing around the applications of library service in its pertinent and obtrusive phases. It may result in an attack on a well tried and standardized department system of a library. For example, the registration and charging system of a public library in my opinion should be completely remodeled, somewhat on the lines of a credit system of a department store, with mechanical devices now almost unknown in libraries. We must have these devices. We think that we see this as a project as we have worked year after year in group problems.

"The development of a student's mind under the project system is remarkable. Not only the executive ability and the thing we call responsibility, but the genius of the individual is brought out as it never can be in a classroom dominated by a teacher in the good old fashion of desks in rows and slots.

"It seems to me that we hold to these old things because such things produced us, they must be pretty good, and moreover, it is easier to do things in the old way. . . . I should note that I think it is apt to be more expensive to carry on a school after a plan of this sort.

"I have another idea which I should like to see brought before schools or heads of schools. Let us take Louise B. Krause, who comes to us from H. M. Bylesby and Company to teach the business library four weeks each year. She is very good at it. She does excellent work and the results are good and we need business librarians everywhere. We need them with special training and with her point of view, but I wouldn't give much for Louise B. Krause or any other woman, were she the best teacher in the world, if I could not have her fresh from her work in Chicago. I mean to say that if we had a teacher on any subject that is technical at all, I should want that teacher fresh from the technical applications and from the problems that actual service have brought to her. Now, if she were to remain with me year after year she would not continue to be the teacher that I want.

"I want one good woman to take charge of my girls in this new home of ours, but I want a variety of teachers direct from the work and it costs a great deal to get them. I want them from East and West. I want a procession of them if I can have them. Yes, there is danger of damage to a curriculum, but the present dangers are greater.

"Take the best woman in the world in technical matters and take her out of her daily work and give her nothing but teaching year after year, and she is not the person to whom I could entrust projects of any kind, and that after all is the great test in teaching technical subjects.

"All the professional schools have to do it, as you know. I do not mean casual lecturers who are a convenient sort of sprinkling thru a course; they are usually inspirational and good, but I am talking of the teaching. A teacher employed for four or five weeks in the year and then sent back for her work, comes back to us as fresh as ever and with a stronger personality and much more of the information we want."

The Riverside school, started in 1912, has in the nine years of its existence sent forth with its certificates thirty-seven students as graduates in the regular course, forty-seven special students in the long course, one hundred and twenty who have taken the summer and ninety-four the winter short course. Of the one hundred and twenty summer school students forty-four submitted two years of college. Of the ninety-four in the winter school, thirty-one submitted two years of college. Fifteen other students not counted in these lists did not finish and were not given certificates, of which eight were long course and seven short course students. Regular students are those who come with an equipment of two years of college training in addition to four high school years, while special students are those who take the long course but are without this college equipment. The full course extends for eleven months from October and includes seventeen hundred hours of work, usually extending to eighteen or nineteen hundred. The shorter courses in summer and winter are usually of from six to fourteen weeks duration.

In applying for admission to the Riverside school, the would-be student fills out an entrance application which contains the general information required at other library schools. As the student's work progresses, reports are made by those in charge, particularly by the group captain, with respect to specific branches of the student's work. It is therefore true that there are no examinations at all and that there is constant examination. At the end of the course reports from the several captains and instructors are brought together and summarized in connection with the certificate of graduation. The certificate contains space for a brief report on the student's standing in oral and written English and of reported reading, and brief summaries of the student's work and results in each of sixteen branches as follows:

1. Bibliography
2. Bookbinding and library handicraft
3. Book selection
4. Business management, library methods and organization
5. Cataloging and classification

6. County service
7. Filing and indexing
8. Library law
9. Periodicals and serials
10. Public desk service
11. Reference and documents
12. School libraries and young people
13. Story-telling
14. Typewriter practice
15. Miscellaneous: Visiting branches; Business office records; Laboratory in short courses
16. Lectures in long courses: Education; Philosophy; Criticism; History of books and printing; Fine arts; Administration, etc.

The more detailed reports are kept on file in the office of the school. Thus a librarian seeking someone to fill a specific library position can learn from the careful specifications definite information as to the student's equipment in the several branches in which she has worked out projects. The endeavor is to arrange these projects so as to give the student a fair general knowledge of library work. In a sense this means the absence of a general curriculum and perhaps the best criticism on this scheme would be that by a Japanese of our "civilized music." To the Oriental ear music consists of continuous sound without intervals, whereas modern music as we hear it makes use not only of intervals but of pauses. The view of the Japanese was that our music is "full of holes" and the same criticism may be passed on the elective system, at least in the extreme, in our colleges. How far the criticism is actually applicable to the graduates of the Riverside school it is difficult to say, but they seem to have proved well fitted for the work, and the method emphasized doubtless develops alertness and appetite for extending knowledge outside the immediate field of school training.

Some Children's Book Lists

THIS list makes no attempt at completeness and does not include recognized bibliographies of children's books such as the H. W. Wilson's Standard Catalog and the Pittsburgh Library Catalogue of Children's Books. The aim of the compiler is to bring out shorter lists of children's books on a variety of subjects and representing libraries, schools, book-shops and other agencies working in the interests of children.

Illustrated Editions of Children's Books, a selected list. 1915. Carnegie Library of Pittsburgh.

Favorite Books of Well-known People when they were Boys and Girls. 1918. Carnegie Library of Pittsburgh.

Books for Boys and Girls, a selected list, compiled by Caroline H. Hewins. 1916. American Library Association.

Books to Grow on, an experimental intermediate list selected from the Open Shelf Room. 1916. Buffalo Public Library.

English Reading Lists, compiled by the Department of English, Haaren High School. 1921. 25 cents. Hubert and Collister St., New York City.

Two Lists of Books for Children—Some First Books: Some Later Books. In Roads to Childhood by Annie Carroll Moore. 1920. \$1.50. G. H. Doran.

Books for Vacation Reading, compiled by the Lincoln School of Teachers' College. Practically all these books have been selected and most of them annotated by the pupils in the seventh, eighth, ninth and tenth grades. 1919. The Lincoln School of Teachers College. New York City.

Science and Technology, books for the High School Library, compiled by Edith Erskine. 1919. Chicago Public Library.

Heroism, a reading list for boys and girls. 1914. The New York Public Library.

Out-of-Door Books, a list of specially readable books for young people in high school or college, compiled by Marion Horton. 1918. Bookshelf for Boys and Girls. 264 Boylston St., Boston.

Reference Reading for Girl Scouts. In Scouting for Girls, Official Handbook of the Girl Scouts. 1920. Girl Scouts, Inc. 189 Lexington Ave., N. Y. C.

The Book Shelf for Boys and Girls, selected and annotated by Clara W. Hunt, Franklin K. Mathews and Ruth G. Hopkins. 1921. 10 cents. R. R. Bowker Co. 62 West 45th St., New York City.

A List of Books for Boys and Girls suggested

for Purchase, offered by Marian Cutter of the Children's Book Shop, compiled by Jacqueline Overton. 1921. 35 cents. 5 West 47th St., New York City.

Books for Boys and girls, a suggestive Purchase List, compiled by B. E. Mahoney. Revised 1917. The Bookshop for Boys and Girls. 264 Boylston St., Boston.

Stories to Tell to Children, a selected list with stories and poems for holiday programs. 1918. Carnegie Library of Pittsburgh.

A Graded List of Stories and Poems for Reading Aloud, compiled by Harriet E. Hassler. 1915. American Library Association.

Favorite Stories of Library Reading Clubs. 1915. New York Public Library.

Lists of Stories and Programs for Story Hours, edited by Effie L. Power. 1915. H. W. Wilson Co. New York City.

Plays for Children, an annotated index by Alice I. Hazeltine. 1921. American Library Association.

Suggestions for a Christmas Program, prepared by the Drama Department. New York Community Service. 1920. 25 cents. 370 Seventh Ave., N. Y. C.

A Graded List of Pantomime for all amateur production, with an historical article on the pantomime by Elizabeth Hanley, prepared by the Drama Department, New York Community Service. 1920.

A List of Pageants, Masques and Festivals, prepared by the Drama Department, New York Community Service. 1920.

LEONORE ST. JOHN POWER, *Librarian.*

*Central Children's Room,
New York Public Library.*

"TWENTY-FOUR UNUSUAL STORIES"

"Twenty-four Unusual Stories for Boys and Girls" have been collected, arranged and re-told by Anna Cogswell Tyler, for the past twelve years in charge of Story Telling in the New York Public Library, and published by Harcourt, Brace and Company. The stories chosen are those which have proved to be of the greatest interest to the children who have heard Miss Tyler's stories. They have been drawn from many sources: Greek mythology, Indian legends, Hallowe'en and mystery stories and the folk lore of many lands. Some of the stories are not easily found elsewhere and they are thus collected in an attractive volume, illustrated by Maud and Miska Petersham, for the use of boys and girls and of story-tellers in search of stories for special occasions.

Standardization of the Federal Library Service

By W. DAWSON JOHNSTON,
Librarian, St. Paul Public Library*

THE Library advisory committee of the Joint Congressional Commission on reclassification of salaries has made a contribution to library economy which is of even greater importance as a study in the standardization of library service and in the personnel and administration than as a study in wage adjustment. It is, indeed, the first serious effort which has been made to standardize the federal library service. The history of its work is interesting.**

PRELIMINARY REPORT

The librarians temporarily transferred to the staff of the Commission from different government libraries drew up a scheme of classification of the library service based upon the questionnaire returns received from each person doing strictly library work. This provided for (a) general classes common to two or more libraries, (b) general classes peculiar to departmental libraries, (c) special classes peculiar to the Library of Congress, and (d) special classes peculiar to the Public Library.

This scheme was submitted to a library advisory committee appointed by the Congressional commission consisting mainly of members of the District of Columbia Library Association. This suggested some changes in detail and some additions, but approved its main features, and the scheme in its revised form was published in the report made to Congress by the Commission, March 12, 1920.

This scheme defined the general scope of library service by including only persons rendering the service peculiar to a library, that is, by excluding not only copyists and others engaged in purely clerical work, but also janitors, pages, and others, and in the brief submitted by the Advisory Committee, made a clear distinction between professional and sub-professional serv-

ice; but with its total of thirty-seven classes, of which twenty-one were clearly single position classes, the scheme was in fact a description of the organization of the libraries of the Government rather than a scheme of classification, or, to use library parlance, in part a classification of the library service and in part a catalog of library positions. As Dr. Bowerman, chairman of the Advisory Committee said at a later time, a broader classification was needed, one that would reflect progressively degrees of education, training, experience, and administrative responsibility, without trying to set forth the minutiae of close specialization.

REVISED SPECIFICATIONS

The publication of the report of the Commission gave the library advisory committee an opportunity to compare its scheme of classification with those recommended by other branches of the professional service and to revise both its terminology and its content in such a way as to make it conform more nearly to the schemes recommended by them. The Committee took full advantage of this opportunity, and in the autumn presented to the Commission a revised classification.¹ This provided for ten classes instead of thirty-seven. Of the ten classes three were still single position classes.

The seven general classes were: Library aid, senior library aid, junior librarian, assistant librarian, associate librarian, librarian, senior librarian, the three individual classes: Librarian, Public Library; assistant librarian, Library of Congress and director of legislative reference, Library of Congress. The impossibility of placing these three titles of positions under any of the foregoing general classes, together with the difficulty of finding satisfactory titles for the general classes led to the abandonment of the effort to give titles to classes. In the Lehlbach bill introduced into the House on December 18, 1920, the classes were designated simply by number under two group headings: Library assistant group and librarian group. Under the former were two grades, and under the latter six, a total of eight; and under each class were given the titles of the different positions included. Similarly in the bill introduced by Mr. Lehlbach on May 18, 1921, the group headings were changed

* Dr. Johnston will assume charge of the American Library in Paris early in November.

**This is given in detail in the following articles in the LIBRARY JOURNAL: "Librarians' Salaries in the District of Columbia" by G. F. Bowerman, January 15, 1920, p. 63-66; "The Washington Report on Reclassification of Library Salaries," March 15, 1920, p. 264-66, "Washington Library Reclassification Substitute," September 1, 1920, p. 687-90; "Salary Reclassification Legislation," May 15, 1921, p. 456-57, and in articles by Eunice R. Oberly, entitled "Certification and Special Libraries as Related to the Reclassification Problem of Government Libraries," *Special Libraries*, March 1921, and "The Library Service in the Report of the Congressional Joint Commission on the Reclassification of Salaries," *Special Libraries*, May 1920.

¹"Washington Library Reclassification Substitute," by G. F. Bowerman, LIBRARY JOURNAL, September 1, 1920, p. 687-90.

to "sub-professional service" and "professional and scientific service," the scheme was made to apply to all branches of the service alike, and the same classification was preserved. But in the specifications for each class the details characteristic of the earlier schemes of classification were omitted, even to the titles of positions.

These specifications are of such value that I give them herewith in as far as they relate to library service. The sub-professional service included in Grade 2 positions, the duties of which are confined to simple library work not requiring professional training, salary \$1,080 to \$1,320; in Grade 3, positions the duties of which involve the performance of important routine library work not requiring professional training, salary \$1,440 to \$1,800. The professional service includes all positions the duties of which are to perform routine, advisory, administrative, or research work requiring professional training equivalent to that represented by graduation from a college of recognized standing, as follows: Grade 1, the junior professional grade including all classes the duties of which are to perform under immediate supervision the simplest kinds of work requiring professional training, salary \$1,800 to \$2,160; Grade 2, the assistant professional grade, including all classes of positions the duties of which are to prepare under general directions assigned professional work requiring professional training and previous experience but not the exercise of independent judgment, salary \$2,340 to \$2,880; Grade 3, associate professional grade, including all positions the duties of which are to perform independently or with a small number of subordinates, responsible professional work requiring considerable successful previous experience, salary \$3,120 to \$3,840; Grade 4, full professional grade, including all positions the duties of which are to perform independent and highly important professional work, or to be responsible for the administration of a major division of an organization, salary \$4,140 to \$5,040; Grade 5, senior professional grade, including all positions the duties of which are to act as assistant head of a large professional organization, or as administrative head of a major division of such an organization, salary \$5,400 to \$6,000; Grade 6, chief professional grade, including all positions the duties of which are to act as head of a major bureau, salary \$6,000 to \$7,000.

ALLOCATION OF POSITIONS

The omission of the details of specifications, including titles of positions, qualifications and duties, as set forth in the report of the Commission made it very important that proper pro-

vision be made for carrying the law into effect, and especially important that proper provision be made for the allocation of positions. Indeed, it is only by this means that the success of the classification or reclassification of the service can be guaranteed.

With this in view, the Fairfield Bill, introduced on April 12 (H. R. 2487), embodied the recommendations of the report of the Commission, and provided that the Civil Service Commission should designate the class within which the position of each employee should be placed in accordance with the duties of such position, and transmit its designations to the head of the department together with copies of all the records in its possession relating to the length of service of each employee. The head of the department shall review such designation, and in case of disapproval shall certify to the Commission the facts upon which such disapproval is based.

Both the Sterling-Lehlbach bills and the Smoot-Wood bills, on the other hand, gave the power of allocation of positions to heads of departments, but with this difference, that in the former case it is subject to revision by the Bureau of the Budget and to rules and regulations to be formulated by the Civil Service Commission, fixing the qualifications with respect to the training and experience necessary for eligibility for appointment; and in the latter it is subject to such rules and regulations as the President might prescribe, with the provision that the Bureau of Efficiency shall aid the President, upon request, in the preparation of rules and regulations for carrying the act into effect and in the enforcement of such rules and regulations.

The effectiveness of any program depends so much upon the personnel of the bureaus entrusted with the execution of it that it is difficult to say which of the methods of procedure is the best. Theoretically, it would be better to entrust to the Civil Service Commission the formulation of the employment policies of the government. This is in line with the most approved practice in concerns having a large number of employees, and any appointing officer would certainly be glad to delegate his powers of appointment to anyone competent to exercise them. In practice, however, legislative bodies whether federal, state or municipal have seemed disposed to give civil service commissions power to hamper administrative officers in their duties, but not power to help them.

Perhaps it is a fear that the Civil Service Commission has not the power to allocate positions properly that has led the sponsors for the Sterling-Lehlbach and Smoot-Wood bills to

give the power of allocation to heads of departments, but there is no apparent reason why the Civil Service Commission should not be given the power. I mean power, not mere authority.

We cannot, perhaps, afford to give state and municipal commissions such power at the present time, but we cannot afford to give the federal commission less.

EFFICIENCY RATING

If the initial success of this program depends upon the proper allocation of positions, its continued success depends equally upon a proper system of efficiency rating. The Fairfield bills and Sterling-Lehlbach provide for this as follows: The Civil Service Commission, after consultation with the heads of departments, shall establish a uniform system of efficiency rating, which shall set forth (1) the standard of efficiency which must be maintained by employees within the same class to whom the same rate of compensation is paid and below which no employee may fall without being paid such lower rate of compensation prescribed for such class to which his efficiency rating entitles him; (2) the higher standard of efficiency of an employee which, in the judgment of the commission, will entitle him to receive annually compensation at the next higher rate prescribed for the class in which his position is placed; (3) the standard of efficiency for a class below which no employee may fall without being dismissed for inefficiency.

ADVISORY BOARD

Another interesting feature of the report of the Commission embodied in the Fairfield bill but not in the others is the provision for the establishment of a Civil Service advisory council and the formation of personnel committees in each department. The advisory council is to consist of twelve members, six appointed by the President from among employees of or above the grade of division chief, two elected by and from among manual employees, two among clerical employees, and two among scientific, technical and professional employees, annually. Its duty is to advise the commission by means of formal reports in regard to all questions referred to it by the Commission and in regard to recommendations presented by one or more personnel committees affecting more than one department.

The council may provide for the formation of personnel committees in each department or unit thereof, one-half of the members to be selected by and from among employees exercising supervising powers. It is to be the duty of such committees to make recommendations as to service regulations, the organization and

methods of work, and working conditions, and to exercise such powers of conciliation in the case of any grievance, dispute or other matter as the Civil Service Commission may authorize.

There is little that is novel about this. Every successful executive, especially in institutions of learning, consults his associates, and certainly every department and bureau chief would be glad to have them consulted by Civil Service authorities in the formulation of employment policies. It is because the specialist has not been more frequently consulted that so little progress has been made in the application of civil service principles.

Indeed, it is difficult to understand why any executive should prefer to have the employment policy of his department or bureau formulated by an outside body without the advice of his professional associates, or why a parliamentary body should object to the adoption of parliamentary methods in the formulation of civil service rules and regulations. If there is any executive who is without a body of colleagues competent to act as such an advisory body, he should be given them. It may tend to curtail his authority, but it will add to his power, and at the same time that it adds to the efficiency of the employment management it will add to the efficiency of the department or bureau in his charge.

Whether the Civil Service Commission is strengthened by the enactment of the above described features of the Fairfield and Sterling-Lehlbach bills, or whether it is decided to add to the powers of the Bureau of Efficiency—it may be possible to make the latter a civil service commission with substantial powers, even if it is not possible to make the former a real bureau of efficiency—all bills alike mark a substantial step forward in the employment policy of the government.

And the library service makes equal gain with other branches of the service. For the first time a clear distinction is made between library service and clerical and other forms of service in libraries, for the first time a distinction is made between the professional and sub-professional grades of service, and for the first time professional library service is graded with other forms of professional service.

These general features of the proposed legislation will commend themselves to every librarian and to every civil service official. The details of the classification and various methods proposed for making it effective should also command their attention. They affect or may affect not only the six hundred or more li-

brarians and library assistants, in federal employment, but all librarians thruout the country, for as the national library service is organized so more or less must the state library service

and the municipal library service in the larger cities be organized, and as the library service in the larger cities is organized so will that in the smaller cities be.

What Do Prisoners Read?

THE *Publishers' Weekly* some time ago devoted many pages to an interesting discussion of what people read. In the numerous articles, however, no mention is made of the reading of one set of people whose problems have proved of much interest to the librarians of Brooklyn who have been working among them. The question "What do prisoners read?" is one which the Brooklyn Public Library, thru its Extension Department has been attempting, for the past two years, to answer in the library placed in the City Prison where the weekly library period is now an established custom, and where, thanks to the interested co-operation of the prison officials, every opportunity is given the workers for effective library service.

A news item of recent date with the heading "Three months' hard reading" states that a New York magistrate has sentenced a boy for street loafing to three months of library attendance with orders to report again to the Court after the period has expired. In Brooklyn the condition is reversed. To the men sentenced to confinement a library is brought, this being somewhat more in accordance with library ideals than the scheme planned by the magistrate.

In one way conditions for library work in the prison are unique. No other type of library

can show borrowers who, altho in perfect health, have unlimited time on their hands. For, unfortunately, at this prison no work shops exist. The women prisoners are assigned various duties but the men and the boys are confined in their cells twenty-four hours of the day with the exception of three exercise periods daily.

It is at the noon exercise period that the librarians pay their weekly visit. On a table at one end of the long corridor between the cell tiers the books are displayed while the men are at liberty in the corridor. The prisoners who desire books make their own selection and are allowed to take as many books as they desire. Two librarians are at hand to help in the selection of the books when needed and to care for the clerical routine. This routine is made as simple as possible, only the most rudimentary registration and charging system being used. The registration, merely name and cell number, gives the librarian an opportunity for acquaintance with the prisoner and provides a natural opening for him to ask her help if he desires it.

A more diversified set of tastes would be hard to find in any public library even of the largest size. From the college graduate who wishes to make use of his enforced leisure by reading the Greek classics in the original to the Chinaman

"STONE WALLS DO NOT A PRISON MAKE"

who, begging in broken English for "book in Chinee" seems doomed to disappointment until a happy thought of the librarian sends him away with gleaming eyes and bowing profuse thanks with a copy of the *National Geographic* filled with pictures of China clasped in his arms, the men, one and all, are eager for books. The lack of formality in routine combined with the stimulus provided by the sight of so many of their better-educated comrades availing themselves of the privilege results in applications for books from even the most illiterate of the prisoners, men, who under normal circumstances, would never enter a public library. The old negro, old enough to remember slave times, asks for "Uncle Tom's Cabin." The gamin, confined with the juveniles, expresses a wish for "something snappy" but is made content with an Altsheler or "Treasure Island" or a book about western life. Many copies of Custer's "Boy General" have been worn to shreds by applicants of this type. Books about seafaring life are very popular and a most unusual demand for travel books of all kinds exists, due to the fact that so many of the prisoners represent seafaring men whose horizon of experience is therefore broader than that of the average public library reader.

Many foreign seamen find themselves in trouble for small offenses as soon as they reach these shores. This is due in part to their lack of knowledge of the language. Here is an opportunity, or rather an obligation, which the library has not been slow to accept. Books in civics, simple American histories and books on English for foreigners are provided and are in constant use. The chief difficulty is to find books in language simple enough for the foreigners. As it is impossible to furnish books especially written for each language encountered it is necessary to provide books, wherever possible, where the English word appearing under its appropriate picture makes the use of the book possible for the foreigner ignorant of even one word of English. A conversation between the librarian and a man who wants help of this sort is likely to be a lively one. The librarian may know some French, some German, some Italian, some Spanish and even some Yiddish but her linguistic ability usually fails her entirely in conversation with a Greek, a Syrian or a Chinaman. Usually half a dozen or more volunteer interpreters offer their services but, as the interpreters are frequently as difficult to understand as the original applicant, the final resort is to sign language which becomes more violent the more eager the desire for the book and the larger the number of interpreters.

This spirit of co-operation and mutual helpfulness seems characteristic of most of the men.

Those of better education with formed reading habits are ever ready to advise and to help the others in the choice of books. One man, whose custom it had been to take ten books, meanwhile persuading some friend of equally bookish tastes to take the same number with the idea of a mid-week exchange, undertook the strenuous task at one time of reading the books of Dr. Eliot's five foot shelf library aloud to another prisoner with the explanation to the librarian "his mind needs to be taken off himself." The librarian, dubious in regard to just how well this result would be attained if some of the more substantial classics on the list were chosen, tried to lead the altruistic friend toward a choice of some of the lighter volumes of the set, the result seeming satisfactory until the release of the well meaning friend left the first man to his own resources in the reading line, whereupon he promptly relapsed into the "good novel" reading class.

In addition to the regular recreational reading there has developed from the first a steady demand for text books of different sorts, histories, especially American histories, arithmetics and especially technical books of all kinds, the men in many cases realizing that their enforced leisure may be put to advantage for their future good. The urgent need for help of this type is emphasized in the latest report of Commissioner Kennedy on the conditions in the prisons of New York State. The library has realized the need and is helping to the best of its ability. It has been unable to accomplish all it would like to do in this line because of the difficulty of procuring enough text books and up-to-date technical books to supply the demand, but the profitable use made of the books which have been provided seems to indicate that some slight progress, at least, has been made toward the desired end.

MARY J. THACKERAY.

*Department of Library Extension,
Brooklyn Public Library.*

Heard recently in a New York library: "Have you 'The Dance of the Divine Comedian'?"

And in an English library, as reported by *The Watchman*: "I am searching for a book called 'The Dentists Infirmary'."

The Merchant of Venus,
Macbeth in concentrated form (inquirer a foreign chemist) and
Tales of a Little Lamb.

Films and Books for Children

LIBRARIANS and booksellers have never fully realized the possibilities of advertising books in connection with book films—especially to children. It is perhaps true that the adult seeker for entertainment on the screen does not leave the film version of "Disraeli" and hunt for a bookseller who will sell him the book. Possibly a few people who enjoy historical films read up on English history after seeing "Deception" at their favorite theater, but more are content to accept the screen version of the story of Henry VIII and Anne Boleyn.

With children, however, it is another matter. Booksellers and librarians alike have reported "no copies left" on many a day during the exhibition in town of "Treasure Island," "The Prince and the Pauper," "Black Beauty," "The Last of the Mohicans" and other popular films based on books. This demand has not been due to any effort or advertising on the part of librarian or bookseller, but to the children's interest.

The National Board of Review of Motion Pictures is co-operating this year with the Children's Book Week Committee by sending out a list of "films well-made drawn from books for boys and girls." (See L. J. Oct. 1, 1921, p. 798.) This list has been sent to hundreds of exhibitors, and has been given publicity in newspapers and moving picture trade journals. At least one producer—the Maurice Tourneur Studio, producer of "The Last of the Mohicans"—is co-operating by sending to exhibitors and newspapers announcements of the Week, suggesting the use of their film.

The librarian can make the most of these plans by having exhibits in windows and on tables, not only of the book screened, exhibited in a local theater, but also of books on allied subjects, and made attractive with photographs from the film version. These photographs can usually be borrowed from the theater manager, who will undoubtedly run a slide calling attention to the book display, in return for the display of his pictures with the books. During the showing of "The Last of the Mohicans," for instance, a window exhibit featuring the attractive editions of the book, other books of Cooper's, and other books on American pioneer history, as well as other pioneer history stories, ought to attract many boys and girls who have liked the film story. The "Treasure Island" film could, in the same way, be used to advertise many other books of adventure. Travel and historical films, especially, make interesting centers for book exhibits. Co-operate with the

local moving picture exhibitors in arranging displays.

Among Library House Organs

Library Life, the Staff Bulletin of the Boston Public Library is to be issued on the fifteenth of each month under the direction of an editorial board of three, assisted by sixteen sub-editors representing the various departments of the Library. Vol. 1, no. 1, dated October 15, is a twelve-page number of which the editorial board (Frank H. Chase, chairman; Christine Hayes and Lucien E. Taylor) may well be proud. Alice M. Jordan's article on the Swampscott Conference has a drawing of the Library Courtyard by Eleanor M. Mulcahey; other articles and news items are contributed by Horace L. Wheeler, W. H. C[henery]; Theodosia E. Macurdy, H. W. M. and the editors. Ernest W. Chapin edits a department on "Our Neighbor Libraries"—which neighbors now number well over 100; Francis P. Znotas' department "With the Juniors" carries on the spirit of *The Library Bugle* of last spring; and there are sections devoted to Departments and Branches and to announcements. *News Notes on Government Publications* continues under the able editorship of Edith Guerrier, and, beginning with Bulletin 18, appears as a separately paged supplement to *Library Life*.

In October *Public Library News* issued by the Savannah Public Library resumed publication (suspended with the March number, v. 1, no. 6.) The bulletin will now appear bi-monthly instead of monthly and each number will contain double amount of matter contained in the monthly numbers.

With its third number (September) the monthly news letter of the New York Public Library Staff Association adopts *The Page* as its title.

Literature on Disarmament

A revised and enlarged edition of Mary Katharine Reely's "Selected Articles on World Peace," including international arbitration and disarmament, is to be issued by the H. W. Wilson Co., in the Debaters Handbook Series early in November.

A list of references on naval disarmament, with special reference to Great Britain, Japan and the United States, compiled by the Library of Congress, may be obtained from the Public Affairs Information Service (11 West 40th St., New York City) for sixty cents. (P. A. I. S., October 15.)

THE LIBRARY JOURNAL

TWICE-A-MONTH

NOVEMBER 1, 1921

THE question of certification is so all important at this stage of library progress that we give special space to it in this issue. The report of Dr. Williamson, as chairman of the A. L. A. committee, pre-printed for the Swampscott conference, has not received adequate attention and it is therefore reprinted with the omission of such portions as can well be spared from a document so lengthy and so detailed that it has rather repelled the consideration which its carefulness deserves. The proposed national certification on a national scale by a national board would practically supercede state action. The four grades proposed cover nearly all classes of administrative positions, from the executive down, and qualifications are based largely on graduation from professional schools. There are loopholes for others than library school graduates, but such are rather grudgingly admitted. It is not expected that any such scheme can be put into immediate or even early application, as the report frankly states. Meantime New York has almost completely adopted a certification system, Wisconsin has for some time had it in operation, and California is disposed to apply it thruout its county system. The usefulness of our state organizations, as we have often pointed out, is that individual states may experiment on new methods and produce definite results for the benefit of other states or in preparation for a national action. At the Ithaca meeting the subject was presented by Dr. Williamson but no adequate discussion followed. There has been in fact too much taking for granted and too much apathy on this subject but there is evidence that the profession is awaking to the need for a thoro debate which shall present *contras* as well as *pros*.

★ ★ ★ ★ ★ ★ ★

MOOTED questions of standardization and certification may indeed give rise to a merry war such as raged in English library circles once upon a time over open shelves. Mr. Dana states with his usual vigor the objections to going too far in centralizing authority and compelling universal standardization in the library field as well as in others. A note of warning is also sounded by "The Librarian" of the *Boston Evening Transcript* in defence of

the born instead of school-made librarian. There is much to be said on both sides. We have often urged that the library calling should not be made an exclusive profession, barring out those who have not professional training but who have the natural gift for the work. Justin Winsor, one of the greatest of American librarians, came to his work thru apprenticeship as a trustee only, Dr. Poole and John Edmands had library training during their student days in the society libraries of Yale college and in starting what became famous as Poole's Index, but other great librarians had not even this much of professional training, for there were then no library schools and naturally no library standards. Nevertheless, in the development of the American library system, the heads of most great libraries have learned the need of an efficient method of examination, in the practical application of the merit system both for entrance and promotion in library service. As always the truth is between. The main point to be insisted upon is that in examinations for library positions, especially if by civil service boards, librarians should be participants in the preparation and conduct of examinations and that personal character and fitness for the work should have a very large place in any final decision. There is no calling in which personality counts for more. What is decidedly to be resisted is the tendency of civil service boards, municipal, state or federal, to insist that libraries which are large enough to have excellent methods of their own should be generalized into a larger system which naturally takes less note of the specific needs of the profession, and it is a fair question whether conventionalized routine, even within the profession itself, may not develop ill as well as good results.

★ ★ ★ ★ ★ ★ ★

A PROMISING feature of the program of New York's "Library Week" was the presentation by Frank B. Gilbreth of a paper on "Motion Study in Libraries," introducing into the library field the subject of industrial efficiency. When Frederick W. Taylor, from whom the Taylor Society takes its name, after his varied apprenticeship thru all the divisions of the Midvale Steel Company,

initiated his plans for greater industrial efficiency which he developed ten years ago in his book on "The Principles of Scientific Management" he started an industrial reformation which has been felt in most branches of industry. Library shelves are or should be well stocked with the numerous volumes on this subject but in practice the plan has not yet worked into libraries. Mr. Gilbreth's paper was in the nature of an appeal to librarians to enter upon this work, but tho it went into considerable detail it did not present concrete and practical proposals. These perhaps will be the outcome of experiments in the Providence Public Library and in the Engineering Societies Library in New York where Mr. Gilbreth has made preliminary studies without as yet going forward to practical results. When these are reached we shall hope to give some account of them in the LIBRARY JOURNAL. If motion study can save work and prevent fatigue on the part of the library staff as Mr. Gilbreth hopes, it will be well worth while for our larger library systems to obtain and pay for expert service in utilizing the results of such study and it is to be hoped in the interest of the profession that Mr. Gil-

breth will pursue his studies in the two libraries mentioned to a practical conclusion.

★ ★ ★ ★ ★ ★ ★

"CHILDREN'S Book Week" November 13-19, is close upon us and the preparations made by co-operation between librarians and book dealers promise an even greater success than in previous years—which is saying a good deal. The plan has proved one of the best that has been proposed to better children's reading and it is not its least valuable feature that it has a commercial basis. If librarians can induce booksellers to induce parents, in turn, to buy better books for their children, half of the aim of the children's room is already accomplished. The home soil is the best of all for the cultivation of good reading for children in giving the child an appetite for the best books, both in childhood and when the child becomes a grown-up. Educators and clergymen have cordially recognized this fact and emphasized the importance of Children's Book Week, and librarians everywhere, in small rural libraries as well as in the great city systems, should make the most of it.

IN THE LIBRARY WORLD

MASSACHUSETTS

Boston. The time has come, in the opinion of the Examining Committee of the Boston Public Library, for the library to abandon a "reserved and expectant" attitude, and to enter upon the field of active missionary effort to acquaint the people of Boston, especially the population of certain backward districts, with the opportunities the Library has to offer them. A continuous campaign of publicity is advocated. The Committee has discovered after examination of annual reports and other information furnished them by Librarian Charles F. D. Belden, that eighty-five per cent of the circulation is from the branch libraries, and that the Central Library with its 900,000 volumes has a relatively small home circulation; that probably eighty-five per cent of the card holders are women and minors, and that there is a wide variation in the patronage of the branches in different parts of the city, ranging from six per cent of the population in East Boston to twenty per cent or more in the Back Bay and Hyde Park. Since only 22,596 males over sixteen are registered as borrowers, it is apparent that not more than one man in fifteen in Boston holds a library card. That small proportion consists

largely of members of the student and professional classes. Mechanics, clerks, salesmen and business men do not take books out for home reading to any great extent. The best way to combat this indifference would be to buy technical books in greater quantity and, more especially, to project the proposed Business Men's Branch as soon as possible and locate it in the new Chamber of Commerce building.

Notable steps already made toward the extension of library service are the establishment of the Information Office and Open Shelf Room in the Central Building on the ground floor adjoining the room devoted to Federal and State Document Service established last year. The Information Office, under the immediate direction of the Supervisor of Circulation, contains besides the usual tools for quick reference a clipping and pamphlet file and a valuable collection of vocational literature, assembled under the direction of the Association of Collegiate Alumnae with the co-operation of the Women's Municipal League, the Y. W. C. A., and the Girl's Trade Educational League. The Open Shelf Room contains a constantly changing collection of general literature and new purchases of non-fiction for circulation of about 3500 volumes.

BOOKS FOR BOYS AND GIRLS

**The Jessie Willcox Smith
Little Mother Goose**

This is the most attractive moderate price edition of the Mother Goose jingles obtainable. The print is large, and the book is durably bound, in a convenient size for children to handle. *With 12 colored illustrations and many other drawings by Jessie Willcox Smith.* \$1.50

**Left Half
Harmon**

By RALPH HENRY BARBOUR, author of Many Popular Books for Boys

The sixth title in a series of up-to-the-minute football stories that will appeal to every live youngster. Life in a "prep" school is related with the relish and enthusiasm that may be expected from this popular author. *Illustrated, \$1.75*

**The Boys' Book
of Railroads**

By IRVING CRUMP, editor of *Boys' Life* (the Boy Scouts' Magazine)

The author tells of the work of the engineers, conductors, firemen, the members of the train crews, the yardmasters, trackmen, and all the many men who take care of us when we travel, not forgetting the "railroad king" himself who labors for eighteen hours at a stretch when necessary. *Illustrated, \$1.65*

Paul and Rhoda

By FANNIE KILBOURNE

A first-rate story of high school life, with its fun and study, its frats and sororities, its sports and dances, and all the activities that make these years so memorable and interesting. *Illustrated, \$1.75*

**The Boys' Library of
Adventure and
Heroism**

By CHARLES GILSON

Clean, thrilling tales of adventure in remote corners of the world, full of action and yet containing much information of value for the young mind. *Titles now ready:*

Held by Chinese Brigands.

The Scarlet Hand.

Illustrated in color, each, \$1.75

Old Time Stories

Illustrated by W. HEATH ROBINSON

Stories which by long usage have become favorites with children, beautifully illustrated by one of the foremost artists of the day. Sumptuously printed and bound, this handsome volume will prove one of the leading gift books of the season. **Boxed, \$5.00**

On His Toes

By IRVING T. McDONALD

The story of Dan Dixon, who, starting in the humblest capacity in a moving picture studio, works his way up through all departments of this interesting profession. *Illustrated, \$1.75*

**The Book of
Nature Stories**

By H. WADDINGTON SEERS

Each one of these stories has been chosen with a definite aim, either because it is the life story of some very familiar plant or animal, or because it has been found by the author to be peculiarly attractive to the child-mind. *Illustrations in color, \$2.50*

**A Princeton Boy
Under the King**

By PAUL G. TOMLINSON

A story of student life at Princeton in the middle of the eighteenth century. The narrative is historically correct, but the main emphasis is on the story itself. *Illustrated, \$1.75*

**Favourite French
Fairy Tales**

With 8 illustrations in color by R. CRAMER

An attractive collection of the good old favorites—CINDERELLA, GOLDILOCKS, SLEEPING BEAUTY, PUSS IN BOOTS, RED RIDING HOOD, DIAMONDS AND TOADS, SNOW WHITE, etc. The illustration work is imaginative, dainty and refined, while at the same time rich in coloring. **\$2.50**

John Martin's Read Aloud Book

By JOHN MARTIN, author of *The John Martin Annual, etc.*

John Martin has put his best work (or rather play) into this remarkable book, which radiates with love of little childhood. Each tale is just long enough to please little tots from four to seven and short enough to consider Mother's time and strength. *Many illustrations, \$2.00*

DODD, MEAD & COMPANY, NEW YORK.

PUBLISHERS SINCE 1839

For the first time in the history of the library books easily available are among the objects first seen by a person entering the Central Library. The thoro overhauling of the Bates Hall Reference Department has continued all year, and the changes in the collection aggregated 1829 volumes covered by 1371 titles.

During the fiscal year 59,731 volumes were added to the library system, or 5957 more than in the previous year. Of these 10,806 were gifts and 46,809 purchases. The total amount expended for books, periodicals, newspapers, photographs and lantern slides was \$78,954, or considerably more than ten thousand dollars over the expenditure of the preceding year. The purchases included about 20,000 volumes of children's literature, of which 2000 were placed in the Central Library, 2941 in the Deposit Collection, and 15,059 in the branches and reading rooms.

Of the total number of volumes bought, 35,722, or 73 per cent, were placed in branches, reading rooms, and in the Central Deposit, and 11,087 in the Central Library. The total number of volumes available for public use at the time of the report was 1,224,510.

The year's circulation of books was 2,448,776; 319,369 from the Central Library and 2,129,407 from the branches. The increase over the previous year was 148,044. All the branches but one and all the reading rooms but three showed gains. The circulation of children's books during the year was 1,102,608, or nearly one-half of the total circulation. To this must be added the circulation of 43,196 books sent on deposit to the schools.

The budget estimates of the Trustees for the maintenance of the library for the coming year amount to \$786,688, of which \$550,000 is for personal service and \$236,688 for general maintenance. The estimate for salaries includes \$30,703 to provide for twenty-seven additional assistants, but, by direction of the Mayor, no allowance was included for increases in salaries over the present rates. The salaries for permanent employes last year amounted to \$335,107, and for temporary employes \$89,723. The Trustees also ask for \$100,000 for the purchase of books, an increase of \$40,000 over the amount asked last year. In this connection the librarian points out that since, in general, the new books, fiction and non-fiction, now purchased are insufficient to meet the present call for them, the demand resulting from a vigorous campaign of deliberate publicity would only lead to greater embarrassment on the part of Central and Branch librarians.

The Branch Department consists of sixteen branches and fourteen reading rooms, in num-

ber the same as the year before. The subsidiary agencies include fifty-eight fire engine houses, thirty-six other institutions, seventeen parochial schools, and one hundred and seventy-six public schools. The total number of agencies therefore remains at three hundred and seventeen.

One entirely new aspect in the relation of the Library to the City was the assistance the Public Library has rendered the Children's Wards at the City Hospital. The Children's Department shared in the establishment of the Hospital Library under the direction of the Social Welfare Department of the Hospital.

NEW YORK

Albany. As a result of the rapid development of school library work and the new Regents rules relating to the certification of school librarians, a special course for teacher-librarians has been arranged by the New York State Library School with the co-operation of the New York State College for Teachers at Albany and is open to juniors and seniors of the college. The greater part of the instruction will be given by the Library School faculty, credit for the course will be granted by the State College and certification as a school librarian by the University of the State of New York on satisfactory completion of the work. The entire course, made up of five separate courses (children's work; reference; administration; cataloging, classification, subject headings; selection of books) aggregates eighteen hours, and meets the "minor" requirement of the State College for the bachelor's degree. Practice work will be furnished at the libraries of the State College and the Albany High School.

Because the course is limited to the two upper classes at the College, the number of candidates for it was necessarily small. The four students will devote their time this year to the courses on children's work and reference work, leaving the three other courses for next year. Mary E. Cobb, librarian of the State College, is in charge of the course on Children's work and Margaret S. Williams of the library school faculty and Sabra W. Vought of the School Libraries Division are giving the reference work.

Syracuse. The Syracuse University Library School opened on September 12th with a registration showing a gratifying increase of fifty per cent over that of last year and students of unusually interesting personality. Since that date two members of the Syracuse Public Library staff have registered for special work.

PENNSYLVANIA

Homestead. The Carnegie Library of Homestead circulated 214,154 books in 1920. Four-year statistics show that the circulation has

ABINGDON

The True Gift of Value

AMONG the book-offerings of today, there are none of such consistent excellence as Abingdon Books. "Treasures of the mind" and "Unfailing sources of inspiration" many have called them. "In keeping with the profounder meaning of Christmas" others have written.

It is but natural then that people, who weigh value not by the dollar but rather by its capacity for giving happiness, should find in Abingdon Books the True Gift of Value.

UNITED STATES CITIZENSHIP

By George Preston Mains

The author, a careful student of the signs of the times and a skillful interpreter of them, discusses "fundamentally and informingly some of the larger relations of the citizen to his government," with due emphasis upon "the supreme need and imperative importance of an intelligent and loyal suffrage."

Net, \$2.00, postpaid.

CROSS LOTS And Other Essays

By George Clarke Peck

From cover to cover are drollery and gentle irony, flashing scimitar-like strokes of truth, with a pervasive sympathy. Sometimes the author will remind you of Mark Twain; again of Emerson; still more frequently of Boreham. Most times, however, he will remind you of himself, who is still the preacher, but, in this volume, a preacher-on-holiday.

Net, \$1.25, postpaid.

THE UNCOMMON COMMONPLACE

By Bishop William A. Quayle

Here we have, out of the throbbing heart of this amazing man, a group of essays that go to the very soul of things human, a gathering of poems, that he calls "A bunch of flowers," and a sheaf of tender tributes to "Some Friends of Mine in Paradise," and after that "The Story of Margaret."

Net, \$2.00, postpaid.

THE STORY OF THE AMERICAN HYMN

By Edward S. Ninde

This book traces the development of the American hymn from its earliest appearance up to the present, and does for American hymnology what Duffield does for English hymnology. The book traverses a new and rich field, and is finely illustrated.

In Press.

LINCOLN AND PROHIBITION

By Charles T. White

That Lincoln was committed to the movement to rid the land of the curse of strong drink is proved abundantly by the evidence accumulated by Mr. White and based upon documents whose genuineness cannot be challenged successfully.

Net, \$2.00, postpaid.

THE ENGLISH BIBLE

By James S. Stevens

This volume is intended as a textbook for classes in the study of the English Bible, and is admirably adapted to the needs of high schools, secondary schools and colleges. The author has had large success in teaching this text to his classes in the University of Maine.

fluctuated to a marked degree, as 222,202 volumes were issued the previous year, and 248,018 in 1917. The lowest mark was in 1918, with a circulation of 193,031. The library has increased its collection from 43,818 books in 1917 to 47,015 in 1920. The total attendance was 90,897 as opposed to 92,258 in 1919 and 93,260 in 1917.

MICHIGAN

Grand Rapids. March 31 closed the library year of the Grand Rapids Public Library. New books to the number of 11,950 were added, making the total collection 210,286, and 575,739 books were issued for home use, an increase of 27,561 over the circulation of the previous year. For books and periodicals \$18,284 was expended, \$59,923 in salaries for library service, the total expenditure amounting to \$97,202.

Due to the lack of trained assistants the Library was able all the year to operate the branches in school buildings on a schedule of three days a week only, instead of six days a week as in the first half of the preceding year, so that the large increase in circulation was attained under adverse conditions.

WISCONSIN

Milwaukee. The latest report of the Milwaukee Public Library covers the forty-first to forty-third years of the library's existence under its charter, or up to the end of 1920. The present librarian, Matthew S. Dudgeon, assumed office in 1920 following the death of Charles E. McLenegan, librarian since 1910. The library serves a city population of 457,147 and a county population of 81,322, a total of 538,469. The total number of agencies is 213, including the central library, 12 branches, of which 3 are in branch buildings, 4 stations, the Municipal Reference Library, 72 county libraries, 75 schools, and 47 other agencies. The library had 411,248 volumes at the end of 1920. The total number of volumes lent for home use in 1920 was 1,801,907, of which 1,162,001 was fiction; 1,688,675 in 1919 and 1,509,430 in 1918. The registration was 18,513 in 1918 and 32,028 in 1920. In the latter year the receipts were \$243,410, including \$172,251 from the city tax levy and \$20,320 from Milwaukee County for library service. Of this sum books, periodicals, and binding consumed \$47,142 and salaries for library and janitorial service \$101,004.

MINNESOTA

Minneapolis. Thirty-six students completed the regular six weeks' course in library training, which was given this year at the State University, and six others registered for a supple-

mentary course in reference and subject cataloging, which covered three weeks. The regular course totaled eighty-five hours. Instruction was given in cataloging by Alma M. Penrose, in book selection and reference by Laura C. Hutchinson, in children's books by Harriet A. Wood, preparation, mending and binding of books by Miss Shaw, and library administration by Clara F. Baldwin and Miss Wood.

Mankato. Under the direction of Alice N. Farr, librarian, a half credit course for rural teachers was given at Mankato Teachers' College for the first time during the summer. Twenty-five students registered, and many more wished to take the work.

Northfield. The associated director of Carlton College Library, Alma M. Penrose, plans to give two courses in library training during the coming year: one a teacher's course in library administration, re-established last year, the other a new course of twelve lessons incorporated in a course on "How to Study," which is elective.

St. Paul. A semester course of three hours a week in library science is announced by St. Catharine's College.

MISSOURI

St. Louis. The St. Louis Public Library issued for home use during the year ending April 30, 1921, 2,208,090 volumes, an increase of 197,163 and much the largest circulation in the history of the library. Of these 1,254,277 volumes were circulated from the branches and stations. This increase is attributed in large measure to the unemployment situation and closer relations of the library with the schools, with the influence of the moving pictures, which rouse the interest of children in adult books, greater use by the office force of nearby industrial plants, and the increased cost of books cited as additional factors. The agencies through which books are distributed now number 228, including branches and sub-branches, delivery and deposit stations and travelling libraries. The Travelling Library Department circulated for home use during the year, thru non-public or semi-public agencies, such as schools, clubs, associations, hospitals, churches, and commercial and industrial plants, 395,719 volumes, an increase of 87,670 over last year. In addition 193,320 volumes were used in the schools and other centers to which they were sent. The Children's Department circulated 1,189,654 volumes, an increase of 155,334.

The Library contained 607,617 volumes at the end of April, including 92,123 unaccessioned books, a gain of 27,672. The active registered users numbered 121,801, or a gain of 2,613. The staff included 272 persons, of

The Freeman

is a weekly magazine that meets the demands of the thinking group which is moulding American opinion. The FREEMAN circulates in every State and in twenty-six foreign countries. Authors and publishers turn eagerly to its book reviews, publicists to its editorials, and cultivated people, generally, read the whole paper because of its cosmopolitan variety, chosen with taste and presented in well-balanced proportions. The FREEMAN has proved a revelation to thousands and it awaits your cooperation to make it an inspiration to the culture of your community.

The following is quoted from a letter from

Rev. Ernest J. Dennen,
*Archdeacon of the Episcopal Church,
Boston Diocese:*

"As a critical yet sympathetic reader of THE OPEN ROAD since the first number appeared, I want to tell you that I know of few if any publications that more persistently and consistently meet their own aims and the expectations of their readers than THE OPEN ROAD.

"In its pages is found romance, adventure, tales of mystery, conceived in the right spirit and written both to entertain and uplift. Travel, exploration, current events, science, citizenship, and keeping fit are given a place on its pages and made attractive to the young man's mind.

"I cannot too warmly commend THE OPEN ROAD as a magazine of high quality deserving of the unique place it has won for itself in a short time as a magazine of the first class."

(Signed) ERNEST J. DENNEN.

whom 94 were men and 178 women.

Staff salaries amounted to \$226,372. For books, periodicals and binding \$90,895 was expended. Heating cost \$13,181, and delivery expenses \$11,053. The total receipts were \$642,736.

COLORADO

Denver. The home circulation of books from the Denver Public Library, Chalmers Hadley, librarian, is beginning to approach the million mark, as 949,461 volumes were circulated in 1920. The increase over 1919 was 20,513. The entire collection numbered 222,206 volumes at the end of the year, including the year's accessions of 14,009 books. The per capita circulation of books in Denver for 1921 was 3.63, the per capita cost 46 cents. The staff included seven heads of departments, five senior assistants, and thirty-two junior assistants, and the salary roll was \$53,421. For books and periodicals \$23,306 was expended, \$5,168 for binding, \$5,086 for furniture and fixtures, and \$16,030 in wages. Total receipts were \$125,917.

The library's distributing facilities were increased during the year by the completion of the Park Hill and Elyria branch library buildings (LIBRARY JOURNAL, February 1, 1921) and the Globeville Community House. The branch libraries, erected thru gifts from the Carnegie Corporation, cost \$26,000 and \$16,000 respectively, complete and furnished. The Globeville Community House was erected with the money collected by the Denver Real Estate Exchange, added to the initial gift of \$2,500 given by the McPhee family in memory of Miss Marguerite McPhee, a devoted friend of Globeville for many years.

CALIFORNIA

Santa Barbara. "The Santa Barbara Free Public Library owes its beginning to several sources," says John R. Southworth in his *Santa Barbara and Montecito* (Osborne's Book Store, distributors, Santa Barbara, \$2.50 net). "In 1870 Dr. Harry W. Bellows of All Souls' Unitarian Church, New York, sent out a box of two hundred books and wrote to Miss Sara A. Plummer: 'It is a happy thought to take up the work of establishing a public library.' This enterprise became a combination of public and circulating library and literary center. In the course of a few years a collection of books, some 2000 volumes, was purchased from the Odd Fellows and for a time served the needs of the city. But in 1882 Santa Barbara took steps to establish a free public library supported by taxation." . . .

"The first library occupied rooms in the Odd Fellows' building. It was moved to more com-

modious quarters in the Clock building in October, 1884, and in May, 1891, took possession of its own building in Carrillo Street, now the Chamber of Commerce. Thru twenty-five years, the work of the library steadily increased until the old building became inadequate and in August, 1917, the new building was opened."

"The building is in the style of the Spanish Renaissance, presenting a façade unbroken except with an entrance arch, while each of the sides consists of great windows, expressing the large reading room. Only the furniture and use divide this room, which is 134x78 feet. To the right is the children's section; beyond is the department of ready reference; in the center of the room are the current magazines and the whole left end is a book room, having a mezzanine floor over its area. By the windows of the book room is a 'browsing strip' comfortably seated for those who wish to read in the north light. Opening out of the main room is the stone-paved canopied reading court."

"The cost of the building with site and furnishings is approximately \$100,000. The Carnegie donation to the building was \$50,000."

"The first annual report gave the total number of volumes as 3473 with a circulation of 5633; the thirty-eighth annual report, for the year ending June, 1920, showed that the 65,188 volumes of the Library had a circulation of 241,028."

"The Library serves all the residents of Santa Barbara County. In 1910, the County Department was established under contract with the Board of Supervisors. Twenty-seven branches are maintained in the County towns and sixty-one branches in schools."

JAPAN

An extract in English from the annual report of the Imperial Library of Japan for 1919-1920 states the number of books in the library on March 31 as being 341,818, of which 81,333 are in languages other than Japanese and Chinese, and proceeds to arrange the collection by classes, among which a group comprehensively entitled "History, Biography, Geography, Travels and Voyages" with 61,771 volumes is second only to Literature and Language with 63,941. Of this latter class 47,322 titles are in Japanese and Chinese, and the remainder in various European languages. The 238,886 readers who visited the library in that year consulted 192,431 books in the Literature and Language group, with books on Mathematics, Science and Medicine, and on Arts, Industry, Engineering, Military and Naval Arts following with records of 138,059 and 128,953 volumes used. A daily average of 730.5 readers read in all 726,218 books.

GLUEY PASTE

*"Sticks like
a brother"*

A light-colored paste of super-strength. Dries extremely fast. Used in binderies in place of hot glue. Unexcelled for drawing on magazine covers and all library repair work. Clean, efficient, economical, it affords a timely opportunity of saving something on supplies.

Gluey is growing in popularity among the library users and is guaranteed to be a revelation in paste.

Gluey is packed in attractive gallon stone jars, economy self-sealing glass jars, in friction-top tin cans and pails.

THE PERFECT PASTE

That Solves Your Pasting Problems

Let us submit price and sample.

ADAMS, Leta E., 1909 N. Y. S., who has been consulting librarian for Gaylord Bros. since 1916 has resigned her position and will return to the strictly professional field of library work. After Nov. 1st, she will be with her family at 2128 E. 100 St., Cleveland, Ohio.

ADAMSON, Ruth E., 1916 C. P. cert., appointed high school librarian, Fond Du Lac, Wis.

BACKUS, Joyce, 1920 S., by error reported as head of the Circulation Department of the State College of Washington, Pullman, is reference assistant at the State Library of California.

BEATTY, M. Irene, 1914-15 N. Y. S., has resigned as head of the Circulation Dept. of the St. Joseph (Mo.) Public Library to take charge of a branch of the public library at East Cleveland.

BETTS, Gladys, 1919 P., has been transferred to the Branch Department of the Library Association of Portland, where she will have charge of the stations work in the city and county.

BLACKBURN, Bertha, of the catalog department of the University of Illinois Library, appointed head cataloger at the University of Tennessee Library.

BLODGET, Theodora C., 1898 D., appointed first assistant in the Burlington Co. (N. J.) Free Library.

CHILDRESS, Lillian H., formerly librarian of the Cherry Street Branch Library at Evansville will have charge of the colored branch of the Indianapolis Public Library.

COMAN, Carol, station librarian U. S. Naval Training Station, San Francisco, Calif.,

transferred to Parris Island, S. C., to be the station librarian.

DAY, Rebecca, of the U. S. Naval Hospital, Fort Lyons, Colo., transferred to the Navy Yard, Mare Island, Calif., as station librarian.

DICKSON, Lillian L., appointed acting librarian of the Riverside Public Library.

ECCLES, Mary W., 1916 C. P. cert., of Homestead, resigned to become school librarian at Cleveland Heights, Cleveland, O.

FOSSLER, Anna K., 1901 N. Y. S., who has been head of the technical department of the Library Association of Portland for the past five years, resigned in October. Miss Fossler goes to Los Angeles where she has accepted the position of first assistant in the library of the southern branch of the University of California.

GAMMONS, Abbie, S. 1910, resigned October 1 as first assistant in the catalog department of the Library Association of Portland, to fill a similar position in the Detroit Public Library.

KANE, Annise, 1910 S., appointed cataloging and reference librarian of the Jones Memorial Library at Amherst, Mass.

LUTHER, Jessie, reference librarian of the Kellogg Library, Kansas State Normal School, Emporia, has prepared a table of contents and alphabetical index to Burns Mantle's Best Plays of 1919-20 and the Yearbook of the Drama in America (Small, Maynard, 1920.) The tables, covering fourteen mimeographed pages, may be obtained from the Library for ten cents each.

MAST, Maude L., transferred from the Navy Yard, Mare Island, Calif., to the Eleventh Naval District, San Diego, Calif., to have charge of the station libraries in that district.

METZ, Corinne A., 1907 N. Y. S., has resigned the librarianship of the Spades Park Branch Library, Indianapolis, to take charge of County Library work at Fort Wayne, Ind. She is succeeded by Jessie E. Logan, 1921 Wis., formerly in charge of county extension work at Logansport.

MIDDLETON, Katherine, 1915 S., is indexing the Archives of Dartmouth College.

SAUER, Julia L., secretary to the librarian and supervisor of the apprentice class of the Rochester (N. Y.) Public Library, appointed head of the Children's Department and supervisor of branches and stations of the same library.

COOKING Without Mother's Help
CLARA I. JUDSON

What I Can Do With My Hands Books
by
Clara I. Judson

SEWING Without Mother's Help
CLARA I. JUDSON

In a recent issue of the Official Organ, New York State Educational Dept. (Library Division) appeared the following: under caption, "Recent Books Worth Buying," Mary E. Eastwood, compiler, of "Best Books"

"SEWING WITHOUT MOTHER'S HELP; by C. I. Judson. Nourse \$1.

Simple directions with diagrams for making practical garments for the child, and clothes for her doll. The economical devices for using scraps of material and half-worn clothing are suggestive. By following instructions a little girl, who knows how to handle her needle, can make the articles without further assistance."

COOKING WITHOUT MOTHER'S HELP
Another book by Mrs. Judson

THE NOURSE CO., Inc.
114-120 East 23rd Street New York

"Of great value to teachers."—*Educational Foundations*.
"The most adequate volume on Yosemite yet published."—*St. Louis Republic*.

Yosemite and its High Sierra
By JOHN H. WILLIAMS, author of "The Mountain that Was 'God,'" "The Guardians of the Columbia," etc.

New Edition, revised and greatly enlarged, Imperial 8vo. (10 x 7 in.), 194 pages, with colored frontispiece, 4 maps, and 260 halftones.

EDITION DE LUXE, ooze leather, gilt top, boxed—\$5.00 net; express, 20 cents.

LIBRARY EDITION, in stout art crash, with color tip on front cover,—\$3.00 net; express 20 cents.

"Much of the text has been rewritten, important matter added, and more than 50 new illustrations, with two new maps, included. . . . An artistic and superbly illustrated book, the first attempt to describe the Yosemite National Park in full with the aid of splendid illustrations."—*San Francisco Chronicle*.

"Nowhere in America is the story of glacial action written more legibly into mountain scenery than in the Sierra Nevada. On no part of that great range have the ancient ice-streams stamped their record with such beauty and grandeur as in the Yosemite country. And no other book yet published has described and illustrated this colossal sculpturing of the California upland so clearly as the new and enlarged edition of 'Yosemite and its High Sierra.' The only volumes comparable with it are Mr. Williams' own books about the great mountains of the Northwest. Such a book cannot but have tremendous interest for every student of physical geography and geology. It should well find place in public, private and all school libraries."—*Sierra Educational News*.

"An admirable and artistic work."—*New York Sun*.

NEW BUSINESS BOOKS FOR THE LIBRARY

The following important new business publications selected from our November list will appeal to the business men among your readers. Send for them on approval; if you are not satisfied they will be of value they may be returned within thirty days of their receipt.

AUDITING, THEORY and PRACTICE

By ROBERT H. MONTGOMERY, C. P. A.,
of Lybrand, Ross Bros. and Montgomery.

This work, in its previous editions, has proved to be the standard manual of constructive business analysis and financial and accounting policy. The new edition, entirely rewritten and enlarged incorporates recent developments of such great importance that every business man, auditor, and accountant will want to see it. This

new edition is in two volumes—the first dealing with the theory and practice of auditing; the second with many special classes of audits. Volumes sold separately. Two volumes, 1300 pages (5¾x8½) cloth binding, price \$10.00. (Volume I ready about December 1st, 800 pages, \$6.00.) (Volume II ready about February 1st, 500 pages, \$4.00.)

PRACTICAL ACCOUNTING PROBLEMS, VOL. II

By PAUL-JOSEPH ESQUERRÉ, C. P. A.,

head of the Post-Graduate School of Accountancy, New York; Author of "Applied Theory of Accounts."

Every accountant and student of accounting will want this second volume of Mr. Esquerré's problems. Volume one is proving of real value in libraries as a reference book. Each of the thirty problems of Volume II brings

out a particular accounting situation and shows how it is handled. Men preparing for C. P. A. examinations will find just the material they need. Ready about January 1st., flexible binding, about 350 pages (8½x11).

BANKING, PRINCIPLES AND PRACTICE

By R. B. WESTERFIELD, Ph.D.,

Asst. Professor of Political Economy, Yale University.

This work fills a need that has long been felt in the banking and financial world and will be welcomed by bankers, banking students and business men generally. It covers for the first time the complete theory of banking and its application in sound practice. The author is widely recognized as a high authority and the broad scope of his work and the thoroughness of its treatment make this a highly important addition to every library's equipment. Ready November 1st., five volumes, over 1600 pages (5¾ x 8½) cloth binding, price \$12.00.

20 20-MINUTE LESSONS IN BOOKKEEPING

By F. L. BEACH, C. P. A.,

Auditor, Hibernia Commercial and Savings Bank, Portland.

There are many business men who want just such a short and practical presentation of the principles of bookkeeping as this handy volume offers. It will be of value also to students, and prospective students of accounting. Its attractiveness lies largely in its conciseness and in the exclusion of lengthy rules and theories. Ready November 1st., cloth binding, about 90 pages (5 x 7½), price \$1.50.

GAYLORD BROS., Syracuse, N. Y.

HIAWATHA PICTURES

By
REV. A. T. KEMPTON

THIRTY superb pictures illustrating the Hiawatha Story as presented by the Ojibway Indians, to whom this story is an epic, and who enact the scenes of the poem with the same religious enthusiasm as characterizes the periodical presentation of the Passion Play in Europe.

Mr. Kempton visited Debarats, Ontario, and spent a long time studying the Ojibway Indians as they produce the great drama of Hiawatha, and made these photographs at the time. He thoroughly absorbed their spirit, and familiarized himself with their traditions and customs. These pictures reproduce in a most realistic way the main events in the great poem of Hiawatha.

We offer these exceptionally beautiful and suggestive help to a complete understanding of Longfellow's Hiawatha, thirty pictures, size 10 x 12. The set for \$3.00. No school or library Children's Room can afford to be without them.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Re-writing cards means double expense— how you can avoid it

Every Library worker recognizes the false economy of inferior cards. Poor cards soon "dog-ear," sag under usage and quickly have to be replaced. Result: added expense of new cards, plus the lost time of transcribing.

Library Standard catalog cards are made of 100% rag stock. They retain their crispness—will not bend at corners or get pulpy at the top, even after years of severe usage.

Another excellent card used extensively by libraries throughout the country is our Commercial Standard card made of 70% rag, 30% wood pulp.

In spite of the superior quality of L. B. cards you will find that their prices are surprisingly low. Efficient quantity production makes this possible. It will pay you to investigate before ordering your next supply.

Teaching Cataloging*

By MARGARET MANN**

Cataloger, Engineering Societies Library, New York City.

THE teaching of any subject, especially in a professional or vocational field, demands a knowledge of the requirements of that special line of work in actual practice. The schools preparing students to enter the business world must know the demands met when theories are to be put into practice. This means that the methods of instruction may have to change with the development of the practical field.

There has been a steady growth and change in the practice of cataloging. This has come thru several channels. Each year the field of bibliography has been strengthened so that library catalogs have come to be supplementary to these bibliographies rather than forerunners of them. A few years ago we did not have the U. S. Catalog, the *Reader's Guide* and a great number of special bibliographies which I shall not take time to mention. These printed catalogs necessarily make it less essential to include in our library catalogs the multiplicity of bibliographical detail which was essential before these were accessible.

The privilege offered by the Library of Congress has had the greatest influence in cataloging. By our ability to purchase printed catalog cards the problem of cataloging the small library has surely been lessened and the large libraries have, thru their use, been able to accumulate a reference tool which is invaluable to the cataloger and solves many problems formerly answered only after consulting many reference books.

These cards have introduced an executive angle into the cataloger's routine and have changed

the organization of the work by eliminating certain elements and adding new and different ones. They test the cataloger's adaptability and her judgment. Routines of cost accounting enter in, new methods of checking must be devised and a general change is necessary if the work is to conform to Library of Congress practice. By this co-operative cataloging details of form and technique have become fixed and the time formerly spent in our fussy efforts to compile a catalog uniform with that of our neighbor library can be devoted to other and broader lines. Some have been slow to see the great advantages which come with this splendid achievement of standardization, but the cataloger who does not avail herself of these cards is not running her department on an economic basis; nor is she producing a catalog equal in quality to one she can prepare with their use.

Librarians, influenced by their trustees, are making greater demands on catalogers to reduce cost, and are requiring more definite arguments as to the reasons for the expenditures pertinent to this line of work.

Specialists are reaching out for more assistance in their research work. This is demonstrated by the establishment of special libraries and research departments connected with industrial plants.

The cataloger can no longer serve in the rôle of one who makes a list of books. She is today making a catalog for people who live in a very busy world. She must understand that these people are busy and that they have little time to delve into the books. What they want is that the delving be done for them. Their literary food must come to them predigested. In other words the cataloger must be the research worker and must perpetuate the results of her efforts.

We must meet our clients on their own terms, try to speak their language and get their point of view. A cataloger must have more imagination than a story teller, because she must put

*Read before the Association of American Library Schools. Boston, 1921.

**This paper expresses the views of only one person. It has been printed at the suggestion of the President of the Association of American Library Schools. It was written rather to provoke discussion than to advance any one method, and the LIBRARY JOURNAL and the writer will welcome contributions from those who may be interested in answering or furthering some of the ideas here advanced.—M. M.

herself in the place of the person who is seeking all kinds of knowledge.

If we are to show results and convince the library board of our right to exist we must be alive to every need. To be a bit personal, I am at present trying in every way to convince engineers that they need to spend a large sum of money in installing a standard system of indexing and classifying their society library, and my one effort is to translate my arguments into engineering terms. For example, all engineers are interested in testing laboratories—they test everything from concrete to glue, and I am inclined to call our catalog department “the testing laboratory for books” so that the engineers may see that we have a method in our analysis of books, and that by this scientific method we parallel their work along other analytical lines.

Cataloging has its scholarly side and its business side. Its methods are two-fold, they require the knowledge of an expert, and the technique possessed by a good clerk. The time of the trained cataloger is no longer given to manifold cards. She devotes her time and efforts to the scholarly side of the work, leaving the routine and details to clerks and typists. All libraries, even the smaller ones, report in answer to a questionnaire, that trained catalogers do no detailed work beyond writing the first main card. All supplementary work is done by clerks and typists.

What field shall the library schools cover in their instruction?

All library workers, no matter in what branch of the work they may specialize, need a knowledge of cataloging. The catalog is the one instrument which spreads out the contents of the library. It is a quick and direct road to sources, and in order to apply it, or any tool, intelligently we must know how it works and the extent of its power. If this is true all students must have some knowledge of cataloging.

Starting with this premise the next question is to plan a course which may prepare: (1) All to use a catalog. (2) Some to make a simple catalog for a small library. (3) Some to become expert catalogers.

Library school instructors are always confronted with the perplexing question of specialization. The demands made upon the schools are as varied as are the sizes of the libraries and it is of course impossible to answer each and every requirement. Those who have struggled to please all know that it is quite impossible, and that all that can be done in a one-year course is to find the fundamentals of each subject and so to inculcate these underlying principles that the student can adapt, develop and build as necessity arises.

The vital thing is to find the essentials of each subject and build up a well balanced curriculum giving proper and equal emphasis to each course, and to see that each course is presented by one who is a staunch believer in her subject, thoroly versed in her specialty and thoroly informed as to the demands to be made upon her students when they go into the field.

The cataloger's field is books—books of every kind and covering every subject—written by every type of author, be he man, woman, corporation, institution or government. She must so present these books that the average user of a library will find not only what he is seeking, but be led into new fields. This is a large order.

What do students who enter the library school know about books? We take blindfolded students into a dense forest of books, remove the bandage and say these are yours to be recorded so that anybody and everybody can use them; and what do we meet? Students dumbfounded at the quantity before them. They have no conception of subjects in the large. They know there are books on chemistry but when they are asked to tell you the various kinds, as organic, inorganic, analytical, etc., they are quite at sea, nor is it surprising when we realize that in no other branch of education or work, unless it be in a book store, have they had even the opportunity to see and handle books in quantities. I believe that just here is where we should stop, get their interest, and help them to blaze the trail by introducing them to subjects. It is necessary to study the contents of the storehouse before presenting it in its true value.

Each class of literature has certain types of subjects and these types present certain problems. An experienced cataloger soon learns to watch for certain characteristics and certain pitfalls. She knows what subjects overlap, what subjects are changing, what subjects are becoming obsolete. She should know what the approach is to certain subjects, how certain types of books are asked for, where they fall in the library scheme, etc. If we can show students the meaning of books from the library standpoint without introducing the technique, books will continue to be books and not dreadful problems in cataloging, and if they get an idea of the extent of their field they will soon realize how necessary it is to have some well defined system for putting this mass of information over. Given the conception of the need, the method is not so likely to be questioned.

The study of subjects, or rather groups of subjects, would be a valuable preface to the study of any system of classification and cataloging and would, I believe, give students a better conception of both of these courses. This

study would involve the use of the catalog, use of the shelves and use of the general reference books. May I give an example of how such a course could be conducted?

Take the group including Education, Psychology, Educational psychology, Child study, Kindergarten, Montessori method.

Introduce such questions as these:

1. How would you divide the subject of education?
2. What relation has psychology to education?
3. What is educational psychology and how does it differ from child study? Bring in definitions from Baldwin's Dictionary of Philosophy and Psychology.
4. What kind of information do you find in Monroe's Dictionary of Education?
5. What are text-books? Select ten from the library.
6. Do text-books show you *how* to teach? If not, why not?
7. What is the difference between the Froebel system of education and that of Montessori?
8. What are the limits of elementary education? Of secondary education?
9. Would you want books on the teaching of a special subject to stand with that subject or with the books on teaching, for example, books on the teaching of architecture? Give arguments.
10. Would you expect to find back numbers of college catalogs in a library?
12. Where would you expect to find a life of Froebel? Do the books contribute to his life or his system?

I believe such subjects would interest students and give them the incentive to think, and after all is not that the main purpose of any education? These lectures—say ten of them—should be shorn of all technique. No mention should be made of Dewey or of any code of rules. Of course the instructor would naturally build up the course along the natural library classification schemes, but if students are required to tackle both subjects and technique at the same time one is sure to suffer, and when it is not possible to do a thing well the interest is sure to lag.

Following these lectures on subjects or classes of books, the practical application of books from these fields could be introduced and students asked to study means for presenting them to readers. Having made a survey of the field the problem of presentation can next be approached.

Now as to the technique.

Much criticism is heard about the emphasis placed upon technique in our library schools.

In answer to the questionnaires mentioned above, the opinion generally expressed was that the emphasis in teaching cataloging is misplaced; too much being given to technique and too little to the broader side of the work. Some say this emphasis has killed the interest in the subject, made catalogers narrow and fussy, and crushed individuality. Library instructors, on the other hand, are quite likely to say that this drill is necessary to insure accuracy and carefulness—two qualities essential to the cataloger. But according to results culled from these same letters we find that one of the elements most lacking in library school students is accuracy. This would rather go to prove that our methods may not be accomplishing the results they are supposed to bring.

I myself believe it is not all in the emphasis, but rather the fault of a poorly balanced curriculum. It has been customary in library schools to link this whole subject of technique with cataloging. It is in this course that the student is tested as to her accuracy, neatness, narrowness, slowness, quickness, writing, spelling and many other petty branches of our science: If she shows a dislike for detail she is considered a bad cataloger and is encouraged to drop this subject and turn her efforts to the broad and more interesting side of library work. Is a curriculum a well balanced one which crowds into one course the technique which is common to *all* branches of library work? And, on the other hand, is it just to the cataloging so to wrap it in red tape that it is in danger of being taught as a craft rather than as a science? The writing of the catalog card is only a means to an end. It is important in the same way that it is important for a newspaper to print a legible and attractive sheet, but the mechanic's end should not overbalance the creator's end. How can technique be divorced from cataloging? In actual practice it is a part of cataloging and cannot be divorced from it any more than the use of capital letters can be cut out by the librarian when he writes his annual report. But in the library school curriculum I believe there should be a short course in technique peculiar to *library* work, not peculiar to cataloging. Such a course should include tests in accuracy, neatness, ability to write and print legibly, ability to prepare and correct copy. In other words it should include about what is given to students in a printers' school in the preparation of copy, and a good text to follow would be the "Style Book" issued by the University of Chicago Press. The criticism may be raised that only by *doing* can students really become familiar with the necessity for accurate and painstaking work. My answer to this is

that there is not time to present both the minute and broad side of cataloging and if this is true must we not make a choice? Take for example the subject of form. This has been fixed by the Library of Congress. There is no longer any question of form except to show a few short cuts in the use of Library of Congress cards and every library has its own way of cutting. What we want in catalogers is the judgment to cut when it is necessary, not the technical skill to change the order of notes, for example, according to a rule learned in the library school. No matter what form the library school teaches, the students must adapt their work to the rulings of the libraries into which they go, and what we want in catalogers is education, reliability, quickness, clearness of judgment and sound thinking, a proper conception of the use, purpose and extent of a catalog, together with a sufficient knowledge of the technique to direct clerical workers and typists.

My experience in teaching leads me to differ with some practical catalogers in thinking that the library schools should teach everything a cataloger ought to know. I fully realize that this is impossible. One of the criticisms most frequently heard, and one emphasized in the answer to the question "Wherein are library school students lacking?" is in language equipment. I agree that this is lacking in many catalogers, but I do not believe that library schools can give instruction in foreign languages. But if a student matriculating has an unusual language equipment that student should be encouraged to train for bibliographic work, and I think more foreign books should be introduced into the cataloging practice so that students may know for example, that the omissions in a title are likely to change the grammatical construction of that title and that accents are omitted from French title pages if the title page happens to be printed in capital letters.

Surely with the limit of time given to each subject one can only expect grounding in the principles peculiar to that subject, but with this there must be the ability to think, reason and make intelligent application.

Library of Congress cards should be used even in teaching cataloging. Students must be familiar with Library of Congress practice, must know how to order, check and supplement these cards. Introduce into the laboratory practice a certain proportion of books for which Library of Congress cards can and cannot be obtained and let these be cataloged in conformity with Library of Congress practice. The use of the unit card is now accepted without question as being the most economical, satisfactory and uniform. Students are frequently unaware of the

work necessary to supplement the purchased cards, such as the making of reference cards, etc.

Would it not be feasible for a working catalog to be in the cataloger's laboratory? This could be built up with Library of Congress cards with little expense and furnish a working tool into which students may fit the books they are required to catalog. Very few catalogers begin with no catalog when they enter the practice field and often they lack the ability to contribute intelligently to a catalog which is already functioning. Furthermore they should use a catalog properly guided, labeled and alphabetized rather than go out with the idea that their own individual sample catalog is a model. By contributing to a common catalog they will get a more correct conception of the necessity of uniformity, accuracy and consistency.

In teaching I believe the method should be books followed by rules not rules followed by books which have been chosen to illustrate a definite rule. My experience has been that greater interest can be aroused by this method and more work covered in a given time. Place books in the hands of students and let them reason out the best way to present these books by putting themselves into the place of the reader. For example I tried this with a class for one week and at the end of the week I checked books against the rules and found that students had covered, learned and digested ten rules and could formulate these rules without difficulty, and they had access to no code. Surely in teaching cataloging the real benefit to student comes from class discussion *after* they have cataloged, not before.

The A. L. A. code is not a text-book and should not be used as such. A lawyer would not use the Revised Statutes in teaching law students. I do not mean to belittle the A. L. A. code; it is an excellent tool and one to which reference must constantly be made, but it was not written to be used as a text in teaching cataloging.

One splendid test of accuracy, judgment and decision is to have students revise the work of others. By conducting the practical period of the cataloging lessons as one would conduct a catalog department, the practice in this, as well as in executive work, could be introduced. Allow each student to serve as class reviser—subject of course to revision by the instructor, have student make one card and add dictations to this card by which the cards could be manifolded, return cards to students to proof-read and revise, let them see their own mistakes. This will reveal the student's ability to dictate so that another can copy and will also give em-

phasis to mistakes, a thing which always drives home the real meaning of carefulness. The students should also take a turn as typist, and so see the work from this angle. Let class discussion follow the practical work at which time a perfect set of cards will be selected for the catalog.

Just a word as to the order of subjects in the curriculum. My own opinion, reached after both teaching and using the products of teachers, is that classification, subject headings and cataloging should run as parallel courses and should, if possible, be given by one and the same instructor. Books should not be left incomplete even during instruction. I think this leads to loose correlation and inefficient work. The same books should be carried thru the three courses—classify today, assign heading tomorrow and catalog the next day. If the plan of giving a course in subjects is followed, as was suggested early in this paper, less time need be spent in these specific courses, because the background has already been worked in.

Advanced cataloging which is required by the large libraries can only be given, I believe, as an elective and should consist almost wholly of

carefully directed practice work followed by free class discussion.

I have tried to make the following points:

1. Offer a course in subjects divested of all technique.

2. Eliminate much of the technique now taught as a part of cataloging and give it as library technique, not as cataloging.

3. Let method be books followed by rules, not rules followed by books.

4. Use Library of Congress cards in instruction and let students contribute to a catalog already functioning.

5. Conduct the course so that students may have experience in revision, executive work, etc.

Love for and interest in books is one of the reasons most frequently given for taking up library work. If this reason be a real one the way to satisfy it is to catalog books. No other side of the work brings one into such close and intimate relation with all fields of knowledge. It offers unlimited pleasure, profit and interest and if it has its just share of appreciation, and proper emphasis is given to its scope and purpose I believe it would attract the best students, and by so doing would dignify our work and add power to our efforts.

The Cleveland Library Bond Issue

ON September 23rd the Board of Trustees of the Cleveland Public Library decided to ask the electors to vote on November 8th on a bond issue of an additional \$2,000,000 to enable it to proceed to build the Main Library building.

The fact that Cleveland is dangerously near the limit of its bonded indebtedness, that it is one of the industrial cities which is feeling the effects of the financial depression very seriously, and that rigid curtailment of public expenditures was the chief talking point of several of the seven candidates for mayor, made this an exceptionally difficult time to ask for authorization of such a bond issue.

Arrangements with the Board of Elections and other preliminaries consumed a couple of weeks, and left just about one month for a publicity campaign. Metaphorically speaking, the chairman of the special committee of the Board and the staff took off their coats and went to work. The following outline partially indicates the special activities of the month:

Library branches keep card lists of all organizations in their districts, with names of officers or members to be reached. These were followed for whatever co-operation they would give.

Public schools asked to co-operate as far as they could.

Community centers and all meetings of adults in school buildings reached.

All churches asked to read letter from pulpit and put notices in bulletins. Federation of Churches addressed at a big meeting. The Chancellor of the Diocese gave permission to use his name in letter to Catholic churches.

Business, social and other clubs, societies, lodges, unions, etc., reached thru their bulletins, meetings, etc. A special letter asking for endorsement and support, sent from office, with sample to branches for information in following up.

Co-operation of all merchants and storekeepers asked for in any way they could give it; ten thousand window-cards used and many thousands of circulars distributed by storekeepers.

Special appeal made to the employees, thru business firms where there are library stations and others.

Slides or films shown in the moving picture houses for a week before election.

Classes in public speaking at the University, Y. M. C. A., etc., furnished with sample speech on Library Bonds for practice work. These classes at the "Ad." Club and the University furnished volunteer speakers for many meetings.

Newspapers, neighborhood and school papers, house-organs and all other Cleveland publications furnished with "copy," and co-operation of editors, feature writers and reporters obtained.

Foreign-language newspapers, churches and societies followed by a special committee.

Over a quarter of a million leaflets and dodgers printed, and distributed with library books, in packages, at meetings, etc.

Volunteers utilized in all ways that could be devised. Among organizations the Recreation Council, the women's study clubs, the Camp Fire Girls and the Boy Scouts were particularly helpful.

Letters were written to selected lists of several thousand individuals.

Window exhibits arranged in many banks and stores.

Speakers booked for every meeting of every organization which could be asked and would give time; talks varied from five to thirty minutes.

Cloth runners, sixteen feet long, on library branches and several on site of building. Runners on several other buildings and on library machines.

Windshield stickers distributed for automobiles.

House to house canvass in many neighborhoods. Dodgers distributed to crowds boarding street cars at the Public Square and other downtown terminals.

Library staff endeavored to "sell" the idea that Cleveland must have a Main Library *now* to every adult talked to in and out of the Library, and to ask every friend of the Library to do the same. (Practically all of the objections encountered were on the ground of high taxes and hard times.)

A donated truck toured the city during the last week, decorated as a float, carrying an immense book, printed with slogans in giant type which he who ran might read.

Many individual "objectors" not convinced by staff members were written to by the librarian, or in a few special cases by a trustee.

Finally, on election day, the staff and volunteer helpers manned the polls during the busiest hours to speak a last word and distribute sample ballots, as the Board of Elections had provided a ballot with wording unfortunately obscure.

Election returns show 140,484 ballots cast on the Library Bond Issue; of the eight ballots voted on, this was the largest number of ballots cast, excepting that for mayor. The Bond Issue was carried by a majority of over twenty thousand. The one other bond issue asked for, an additional two million dollars for the Criminal

Courts and Jail building, was defeated for the fourth time by an overwhelming majority.

The election figures are interesting in comparison with those for the bond issue for the first two million dollars in the spring of 1912, when the total number of votes cast was only 34,113, and the majority but 1477.

The first bonds were sold in 1916 and with the premiums and the interest since accumulated, the funds in hand are now about two and a half millions and the new bond issue will give a total of four and a half million dollars. The Board framed the question so that any surplus may be used for branch buildings.

A sample set of circulars, letters, posters, etc., and of newspaper and other printed publicity so far as available is being prepared by request for the office of the A. L. A.

LINDA A. EASTMAN.

Cleveland, November 9, 1921.

Library Buying Thru the "A.L.P."

IN August last, this office underwent a change of management, and the present Agent is J. Delbourgo.

Due to the uncertainty and constant fluctuations of the rate of exchange, we find impractical the offer made on July 25th, appearing in the September 1st issue of the LIBRARY JOURNAL.

Our terms hereafter, and until further notice, will be as follows:

1. Publications purchased from New York stock will be charged at list price in francs at the current rate of exchange, plus two and a half cents to the franc, less five per cent for cash.

2. New books ordered and shipped from Europe or Latin America, directly to the Libraries without our handling, will be charged at the list price in francs converted at the current rate of exchange plus two and a half cents to the franc, less five per cent for cash.

3. Out of print books ordered from catalogs will be charged at the invoiced price of the dealer, plus shipping and packing expenses, reduced to dollars and cents at the rate of exchange prevailing at the date of invoicing plus ten per cent commission.

4. Out of print books necessitating research work will be charged at the invoiced price of the dealer plus shipping and packing expenses reduced to dollars and cents at the rate of exchange prevailing on the date of billing, plus five per cent for research work, plus ten per cent commission.

J. DELBOURGO, Agent.

The Pratt Institute School of Library Science

By JOSEPHINE ADAMS RATHBONE, Vice-director

THE library school at Pratt Institute, the second to be started, has just completed the thirtieth year of its life, and it is glad to celebrate its birthday by giving an account of itself.

Begun by Miss Margaret Healy, then director of the library, in the autumn of 1890, to train assistants primarily for and entirely by the staff of the Pratt Library, it soon came under the fostering care of Miss Mary W. Plummer who was appointed librarian a few months later. In 1895 it was reorganized, emerging from the status of a training class to that of a school, with Miss Plummer as director and with a regular faculty made up of those members of the staff who showed a special aptitude for teaching. On the opening of the present library building in 1896 the school acquired a physical setting worthy of its aspirations.

Miss Plummer was head both of the library and the school until 1904, the two organizations having unity but not identity. In 1904 she resigned the librarianship, retaining the directorship of the school which became a separate entity, but upon the resignation of Miss Plummer in 1911 to develop the Library School of the New York Public Library, provided for by Mr. Carnegie, the school and library were again united under the directorship of Mr. Edward F. Stevens who had been made librarian the year before. Miss Rathbone, chief instructor, who had been connected with the school since 1893 was made school executive with the title of vice-director, Miss Harriet B. Gooch, of the class of 1898, was appointed instructor in cataloging and other record work, and Miss Justine E. Day, formerly director's secretary, was made secretary of the school. This organization has continued with no change of personnel since 1911.

The school has graduated six hundred and twenty-five students during the thirty years of its life—six hundred women and twenty-five men. Of these about four hundred are still in active library work. Our last available figures are for 1919; but at that time one hundred and thirty-eight graduates were in public libraries, fifty-four in special libraries, forty-eight in educational libraries, and fourteen in state and county libraries.

Geographically our students are drawn from all sections of this country, including many from the Pacific Coast, and of late years a number have come from abroad: Sweden, Norway, Denmark, Russia, Germany, Italy, Belgium, India, Japan, the Philippines, Canada, and the West

Indies all having sent representatives to the school. The map in the school office shows an almost equally wide distribution of our graduates.

So much for the outward facts in the history of the school. What have been its ideals, its purposes, its standards, and what special characteristic has it developed? To understand these it is necessary to know something of Pratt Institute of which it is a part and of the library which environs it. The two mottoes of Pratt Institute derived from its founder, the elder Charles Pratt, "Be true to your work and your work will be true to you" and "Help the other fellow" have worked out to produce in the Institute from the trustees, thru the faculty, the instructors, down to the very janitors, a respect for good work and a spirit of helpfulness. This is felt by the students in every department of the Institute, and thru the library this spirit is carried to the community at large.

From the beginning the Pratt Institute Free Library, organized in 1887 while the Brooklyn Library was still a subscription library and the Brooklyn Public Library which later absorbed it had not yet been started, was a free circulating and reference library for the people of Brooklyn, and many of the newer ideals of public service were developed here. In this environment the school acquired that bent toward public library work that it has always shown. It is fortunate, too, in that its students see functioning daily around them a library small enough to be readily comprehended and at the same time large enough to afford practice in the usual departments found in the average library—circulation, general reference, technical and art reference departments, periodical room and children's room. The library staff is composed largely of graduates of the school, and the practical work as planned and supervised by the department heads and assistants supplements the class room instruction and also tests it. If, for example, the students do not know the classification numbers it soon shows in their work in the circulating department and the teacher is made aware of it. Another great advantage of having a large part of the practical work done in the same building is the saving in time: students can be scheduled for work during the heart of the afternoon, from half past three to five, when they get the best experience, and yet have two hours and a half unbroken time for studying before their assignment. Then, too, the students learn the processes of regis-

tration, charging and discharging before they take up the theory of charging systems; they have found out how this library is arranged before they study classification; they have helped the reading public before they begin the fiction seminar and they have a concrete realization of what many of the problems are before learning how to solve them. They work in the library for two weeks before class room instruction begins and thereafter they are scheduled for some practical work each week, and in the third term they work in the library practically as members of the staff. It is this intimate relation between the library and the school that has necessitated limiting the size of the class. Twenty-five new people a year are all that the library can assimilate. The question of increasing the size of the class, with the consequent dilution of the practical work, or of increasing the tuition was referred to the class last year and they unanimously favored the proposal that the school be restricted to twenty-five students and the tuition be increased fifty per cent.

The curriculum has always been subject to change to meet changing conditions, and we have sought and used the advice and experience of our graduates thru the medium of a triennial questionnaire wherein they are invited to make suggestions as to the course. By means of these questionnaires we have kept in close touch with the working conditions of our graduates. We know what kinds of work they are doing, the types of libraries they are working in, as well as their hours, vacations, and salaries, and whether they desire a change of position or of kind of work. We are thus able to judge whether the course is really fitting our graduates for the work they are called on to do. When we find, as we did, recently, that few of our graduates do one kind of work only, but that most of them do work executive in nature, involving some cataloging, reference, circulating and children's work, in that order, in libraries preponderatingly public in character, we feel that we are justified in confining ourselves to a general, well-rounded course in which the methods and problems emphasized are those of public libraries.

We are not, however, without opportunities for specialization. For those who incline toward children's work, courses in story-telling and children's work are offered, and they are given more work in our own and other children's rooms. The applied science room affords excellent experience for special library work, and those inclining toward that branch are given more practical work in that department. Many types of libraries in New York are willing to receive our students for practical work and they

are encouraged to avail themselves of such chances to acquire special experience.

Being in New York enables us to do a good deal of field work. In addition to the usual spring trip, when we visit in a triennial circuit New England, Pennsylvania and Washington, the class is taken to see many types of libraries in and about New York city. When, as often happens, the librarians are Pratt graduates, there is added a special interest and the visit is a visual demonstration of how the theory taught works in practice and may be adapted to local conditions.

The school keeps in very close touch with its graduates in other ways, also. It has a graduates' association to which ninety-one per cent of the graduates in active library work belong and in which nearly half of those who are married retain their membership. Because of the large number of graduates in and about New York, it is possible for the graduates to come together frequently and for the class to meet the graduates, thus feeling while still in the school that they are part of a larger fellowship than that of the class room.

The school has fortunately been able to overcome in great measure a disadvantage common to one year courses. It has been able, thanks to the close association with its graduates and to the unusual measure of continuity in the personnel of the staff and of the faculty, to build up a body of tradition and to preserve and hand on from year to year the "Pratt spirit" as a living force, the reality of which is felt by all who pass thru the school.

"PATHETIC FIGURES." Fontaine Fox in the *New York Globe*

Library Work with the A. E. F. on the Rhine

An Appreciation and An Appeal

I HAVE just spent a day and a half in the "occupied area" in charge of the American forces, chiefly visiting the Library in Coblenz and the various "huts" conducted by the Y. M. C. A. I can not refrain from expressing publicly to my colleagues my enthusiastic appreciation of the work being done under Miss Steere's competent direction in the main library and in the huts. We at Michigan, and the Library War Service Headquarters people, knew Miss Steere was a good librarian, but it took this work to show how good she is. The building was crowded on Sunday, the circulation records are fine, magazines and books are kept going to about twenty out-lying centers; and the women and children are not forgotten. As one officer said to me "This library is a perfect God-send to us!"

But the work is being sadly hampered by a lack of *new and interesting books*. In fact Miss Steere feels that her work will lose its grip on the American boys unless she has a goodly supply right soon of new fiction by popular authors. No matter who is to blame—it's red-tape in some office—there is no money for new books just now and no prospect of any for months. And I think it's up to American librarians to get those books to Miss Steere at once. The men and women who sent millions of volumes across the seas and to our camps aren't going to be balked by a paltry five hundred or thousand volumes!

Consider those American boys set down in little German villages or the small city of Coblenz. The pressure and drive of the war are gone—gone also the incentive of struggle and battle and the race for time. They are simply there—drilled a bit and kept as fit as possible, but with much idle time on their hands. Their pay buys an incredible number of German marks. The low sort of drinking place and many worse resorts are on every side. They are conquerors amid an alien population. They are literally surrounded by temptations known at home only to the gilded youth of fabulously wealthy parents. And they are a decent lot of youngsters, most of whom keep straight despite odds which are hardly fair. And every hour they spend in reading or in the "Y" huts is an hour well spent. Shall we let them get tired of coming and asking for new stories they haven't already read? That is exactly what is happen-

ing now. I beg American librarians to go out and get good, honest, *new* stories and tales for them. It's a poor librarian and a poor staff who couldn't afford to send at least one such book. We begged books from others for our boys in the war. Let's go out and give these books ourselves. Just go to the nearest bookstore and get a rattling good one you know the boys will like—no high-brow stuff—it's there in plenty—and mail it today to Miss Elizabeth B. Steere, Y. M. C. A. Library, Coblenz. Of course they could be sent by "Y" transportation—but why wait? Your Uncle Sam is a pretty cheap postman, and there's no red-tape about a book dropped into the mail box. The American librarians responded to every appeal we made in the war. Let's get busy for our own work in peace!

And I want to say a word for the "Y" girls. I take off my hat to these "Y" women in the occupied area. They are mostly running the various huts, and doing it tremendously well, too. They are clear-eyed, direct, business-like women, fearless, tactful, kind, human. They don't "baby" and coddle the men—they are as direct and keen as any man could be. But they are all of them distinctly feminine, and therein lies their power. The rooms are pretty and clean and homelike. They have that touch of womankind which was so sadly lacking in the "Y" huts we recall in the war. They have time now to do things well. The women in charge are mainly college graduates—proven and tried since early in the war. They know, too, what they are up against in their fight with evil for our boys. They have the calm, quiet air of competence which comes from the knowledge of good and evil. It's these girls I am asking you librarians at home to help thru our own Miss Steere who is now one of them. I am not easily moved by sentiment, but when I think what these women have given up to live in little villages in the Rhine valley, working day and night for the sake of keeping straight the boys in our Army, I can only bow in reverence. And the least I can do is to tell my colleagues at home how it looks to me.

WILLIAM WARNER BISHOP,
Coblenz, Germany, November 1, 1921.

The A. L. A. and Books for Coblenz

To the Editor of the LIBRARY JOURNAL:

A few days ago I received the following telegram: "Miss Steere Coblenz needs five hundred

new fiction to hold men, we cannot abandon work we began, please help thru Milam.

WM W. BISHOP, *Librarian*,
University of Michigan."

I replied that the A. L. A. had funds with which to provide books for these men even tho the work had been turned over to the Government.

Yesterday a letter appeared in the *New York Times* signed Paul T. Hickling asking that readers send magazines, books or other reading matter to Public Health Hospital No. 60, Oteen, N. C.

These two communications appear to indicate that the American Library Association is not meeting its obligation to subscribers to the funds raised for providing books to Soldiers, Sailors and Marines.

If I have read the reports of the Treasurer aright there is a surplus in our Special Funds which should care for the hospital service, and most assuredly should supply books to the men at Coblenz.

With others I am somewhat disturbed over this matter because of a letter received last August by one of our branch librarians asking if we could send books to the men at Coblenz as the supply was exhausted.

At my suggestion this request was turned over to the Secretary of the A. L. A. and a reply received to the effect that the War Department had taken over the Library Service and that the letter of inquiry would be forwarded to L. L. Dickerson, development specialist for libraries, War Department, Washington.

No reply was received from the War Department until September 16th after a second inquiry had been sent. The answer was to this effect:

"Since the American Library Association withdrew from Germany last January the library activities have been under the administration of the Y. M. C. A."

It appears that the Y. M. C. A. budget did not contain an amount sufficient to carry on the work of supplying books to the men and no appropriation had been made by the War Department for this purpose.

To my mind this situation is very unfortunate for the American Library Association. It seems to me that so long as there is a balance in the A. L. A. War funds subscribed by the public for the purpose of providing books for soldiers the officials of our Association should supply such reading matter as may be necessary to meet the requirements, even tho the War Department, the Y. M. C. A. or any other organization fails to do it.

Publicity is given to this letter in the hope that the members of the Association will realize the obligation which is still upon us to supply books to the Army and Navy and particularly to those men who are stationed in the Rhine district.

FRANK P. HILL.

Brooklyn Public Library.

Transfer of A. L. A. War Activities

To the Editor of the LIBRARY JOURNAL:

Dr. Hill has sent a copy of his letter of November 2d to the American Library Association and it seems appropriate that the following statement should be presented in the columns of the JOURNAL with Dr. Hill's letter:

On November 1, 1920, the American Library Association informed the Secretary of War that the War Service Funds would be practically exhausted by the 1st of January and that we "would (apparently) be obliged to terminate our library service to the American Forces in Germany" some time before December 31st.

The Adjutant General, on November 10th, telegraphed that the Commanding General of the American Forces in Germany had been cabled "for his recommendations as to handling library service in Germany."

On November 12th, we telegraphed the Adjutant General that we had received "reasonably definite assurance some further funds" and that we could continue Coblenz service somewhat longer than previously anticipated.

A letter from the War Department, dated December 4th, indicated "that if the American Library Association is to withdraw from Germany in the next few months it would be about as well to do so on January 1, 1921, as later, if there are no special reasons for continuing a longer period."

On December 2d, the Adjutant General wrote "that the War Department will be very glad to accept the books and equipment now utilized by you in maintaining library service in Germany upon the termination of your service, and that the Commanding General, American forces in Germany, has been notified to take over from your organization in Germany these books and equipment with a view to continuing the library service as far as is possible under the circumstances. Unfortunately, the shortage of funds for recreational purposes within the Army forbids making an allotment to the Commanding General of the American Forces in Germany for this purpose, and he will be compelled to operate the service with the material that you turn over and the personnel that he has available within his command. This will naturally preclude the

employment of any civilian personnel by the Army and will restrict the library service."

On the 31st of December, 1920, the formal transfer of books and other property was made by our representative, Miss Ola M. Wyeth. The work is being carried on at the expense of the Y. M. C. A. under Army supervision. Miss Elizabeth B. Steere, one of the A. L. A. representatives, has been continued in the service of the Y. M. C. A. The number of books transferred to the Army was estimated at 33,482.

On receiving the telegram quoted in Dr. Hill's letter, the A. L. A. Headquarters immediately referred it to me as Chairman of the Committee on the Transfer of Library War Service Activities, with the suggestion that I take the matter up with Mr. Dickerson of the War Department. I was very promptly informed that steps had been taken and that the Y. M. C. A. had appropriated \$9000 for the library work there and that they were prepared to do everything that could be expected of them. Mr. Dickerson also assured me that he would take the necessary steps to follow up the matter thru proper channels.

The officers of the A. L. A. have recognized the special claims of the sick and disabled men in hospitals and have tried to make certain that sufficient funds were at all times retained to assure the continuance of the hospital library service until it is finally taken over by the Government.

The transfer is now in process, all of the personnel excepting the Director of the Service have been taken over, and are being paid by the Government. The government officials raised the question of the salary of the Director. For three months her salary was paid by the Government at the same rate as was paid by the A. L. A., but since the question was raised about October 1st her salary has been continued by the A. L. A. and she has been acting in an advisory capacity to the Director placed in charge by the Government. An adjustment of this salary question will complete the transfer of the hospital library service to the Government.

At this writing I have no late information concerning Public Health Hospital No. 60 at Oteen, N. C. Librarians of experience know that such requests come from the most unlikely sources. A. L. A. headquarters is constantly receiving requests for books from citizens of large cities in the United States in which the very best of public library service is maintained. This experience has been exactly paralleled in the hospital library service. Requests to newspapers such as the one quoted by Dr. Hill should, of course, be considered seriously, but investigation will probably show, not that the

library service has failed, but that some possible readers are without reading matter, not because reading matter is not available, but because the possible reader has failed to get into touch with the established facilities.

In closing let me say that the Government authorities in taking over anything of this kind, may move a little slowly, and cause us to lose patience, but they generally move thoroly and completely.

H. H. B. MEYER, *Chairman, Committee on Transfer of Library War Service Activities.*

Washington, D. C., November 10, 1921.

Why A Library Workers Association?

THE Library Workers Association exists to help library assistants. It proposes to study their problems and to make recommendations concerning them either to the American Library Association, or direct to librarians or to library boards. Such problems include employment, training, promotion and working conditions. It is in no sense a labor union. It is not composed of radicals or the disgruntled. It seeks information for its members with a view to their improvement, which implies, and means, improved library service. A questionnaire dealing with training has been prepared, and will be sent out soon to libraries and to library schools.

A great many librarians, after learning what the L. W. A. stands for, ask "Why cannot you attain your ends thru membership in the American Library Association?" The answer is that the American Library Association has seen fit to devote little or no attention to the question of personnel. Many members of the L. W. A. are also members of the A. L. A. and the younger association has sought affiliation with the older organization so that the L. W. A. cannot be charged with a feeling of dissatisfaction toward the aims and ideals of the A. L. A.—so far as they go. But the A. L. A. is without question an organization of head librarians who look at library questions wholly from the administrative point of view. A glance at the programs of the A. L. A. Conferences, and at its committees, show that while library administration and library methods receive full attention (and rightly so) problems of personnel are wrongly neglected. It is true that there is a committee on Library Recruiting but conference papers have shown that library recruiting as discussed by the A. L. A. is limited to attracting young people into the library profession. The L. W. A. believes that attention may be paid with profit to personnel problems as

well. Some librarians who evidently believe the A. L. A. fills every professional need and satisfies all shades of opinion, have, indeed, misinterpreted the aims of the Library Workers Association. They have charged that it is seeking the material advantage of its members at the sacrifice of the spirit of service. The one need not at all follow the other. It is true that some members of the L. W. A. believe that too much emphasis has been laid, in libraries, on the spirit of sacrifice. They believe that material considerations, perhaps as much as professional ideals, influence administrators who when filling library positions wire the applicant "How much will you come for?" instead of stating "The position is worth so much. What are your qualifications, education, and experience?"

The L. W. A. believes that from the administrative point of view, as well as from that of the assistant, from the standpoint of professional progress as well as from that of public service, a way should be found to promote assistants systematically from the junior to the senior grades. It believes that library recruiting is hypocritical if it seeks to attract ambitious young people into the library profession without offering means of promotion and growth. Such questions will be still more pressing if national certification is adopted and the lines of cleavage between the different grades of service are more definitely drawn. The L. W. A. does not oppose certification for librarianship. It does believe, however, that means should be found to prepare junior assistants for advancement *while they are in service*. It has been done in the U. S. Navy and in many private business corporations. Instruments for this purpose are to be found in library training classes, summer school short courses, and library schools. The instrumentalities at present, however, are far from satisfactory. Only some libraries have adequate training classes. Brooklyn has one that trains college graduates. The library schools tend to oppose single course students or "specials." The reason most frequently given is lack of room. Library schools also oppose granting credits for work done in summer schools. If these objections are valid, and it is still found that the best interests of both assistants and administrators require such training, some means must be found for removing the obstacles to attainment. To the study of this question, as well as to problems of employment and conditions of work, the Library Workers Association is committed. It seeks light, not heat, and plans to place the results of its investigations at the service of the library profession as a whole.

CATHARINE VAN DYNE, *President L. W. A.*

Lindsay Swift, 1856-1921

LIBRARIANS will all share the sorrow which is felt at the death of Lindsay Swift, editor of the *Bulletin* and other publications of the Boston Public Library. The men and women, and they are few in number, whose work in libraries is similar to his, must feel an especial regret to hear of his death, and an especial admiration for a man of such strong and independent character, and of distinguished attainment. Mr. Swift's writings include a biography of William Lloyd Garrison, the volume on Benjamin Franklin in the "Beacon Biographies," a book on "Literary Landmarks of Boston," and another on "Brook Farm." By his power of vigorous expression, his kindness, and his fine gift of irony, he could make a letter, or even a brief note, become an event to the recipient, and there must have been many who, like the writer of this, never had the privilege of meeting Mr. Swift in person, and yet regarded him as an honored friend. The sentences which follow are quoted from a letter from F. W. Burrows to *The Weekly Review* of September 24.

"Swift was one of the strongest journalistic writers in Boston. He was a free lance, except for his profound love and unswerving loyalty to Harvard University, which was not always well-defined as to his group affiliations; but when he was sure of his adversary his spear rang true on the center of the shield. He was of the old school of Boston radicals—which means that he was a conservative who believed himself to be a radical. His radicalism consisted in hostility to the conservative state of mind; toward any of the lines of thought that to-day would be recognized as radical, he was even more hostile. . . .

"He found for himself a retreat in the editorial chair of the Boston Public Library, where he had the most retired office in the building—one for which the elevators must make a special stop. There he gradually gathered more unfinished work than almost any other man in the city. He was fortunate enough to be somewhat deaf, and this added to his retirement; it was quite possible to pound on that door *ad libitum* without eliciting a response or disturbing his serenity. But when he emerged to do battle, it was with a firm hand, a steady eye, and a flashing blade. Few men ever undertook to answer one of Swift's attacks.

"Now, a man is not what I have sketched without at the same time being a great deal more.

"In the first place, the unrecognized group (at least unrecognized in American life) among

whom Swift must be numbered, is that to which the most decent and the most highly cultivated have always belonged. In the second place, no man can write as Swift wrote without being a ripe scholar, a clear thinker, and a man of fine literary taste. All of this Swift was. His permanent contributions to American history are considerable; as a publicist he performed many a valiant service for righteousness and truth. But to his friends he gave more than his pen ever gave to the world. I do not insinuate that this is a cause for regret. It is easy to overestimate the importance of fame and its contribution to civilization. It is not easy to overestimate the contribution of a man like Lindsay Swift to his own circle and his own day."

The New York Public Library.

Farewell Reception at St. Paul for Dr. Johnston

THE St. Paul Public Library was the scene of a farewell reception given October 6th, to the Librarian, Dr. Dawson Johnston, and Mrs. Johnston by the Library staff, before their departure for Europe. Members of the Twin City Library Club were invited.

Dr. Johnston spoke on ideals of Library service especially in St. Paul, and of his plans for his work in Europe, where he is to assume the duties of Librarian of the American Library in Paris, and European representative of the American Library Association.

The following tribute was read and at the close of the meeting Dr. Johnston was presented with an illuminated copy bearing the signatures of staff members.

To Our Librarian, Dr. Dawson Johnston:

We, the members of the Staff of the Saint Paul Public Library wish to express our deep regret at your approaching absence from Saint Paul, altho we appreciate the high honor that has come to our library and our city by your appointment as Librarian of the American Library in Paris and European representative of the American Library Association.

During your administration the library has made remarkable growth, in spite of the fact that the serious fire of 1915 practically destroyed its collections, and that later it suffered from conditions incident to the War and the subsequent period of reconstruction.

In spite of these conditions, under the inspiration of your leadership the central library and three branch buildings have been completed, a collection of nearly three hundred thousand volumes of the most up-to-date character has been made, the number of card holders increased from 33,000 to over 75,000, and the annual circulation of books from 488,000 to over a million and a half (with one exception a larger per capita circulation than that of any other city in the country)—in short, it has been transformed from a small library to a great library.

We recognize that these results have been attained chiefly because of your broad vision of what a public

W. DAWSON JOHNSTON

library should be, and your intelligent and untiring labor in working toward this end. Your unselfish devotion to this ideal of making the public library serve all the people has endeared you to its patrons and has been an inspiration to your associates.

As a staff we feel that Saint Paul has been doubly fortunate in having as librarian a man who has great vision of growth and service, as well as one of fine culture and discriminating literary taste, a man whose ambition has been to have the best library rather than the largest library.

While your character and ability have won the respect and admiration of the members of the staff, your unflinching courtesy and kindness have won their affection, and your sense of humor has made association with you a pleasure. Every member of the staff, no matter what his position, has always been made welcome to your busy office, and has been given generously of your time and counsel.

As members of your staff we desire to carry forward during your absence the policies of expansion and service which you have inaugurated, and we can do this more heartily and with better courage if we may look forward to the possibility of your return. We, therefore, take this opportunity to express our earnest hope that you will return to the Saint Paul Public Library, thus enriching our city with the new breadth of experience and vision gained in your work abroad.

But even if you are absent from us, the results of your labor and the inspiration of your high ideals will remain with us and will not be forgotten. And whether you return to us or not, our sincere affection and our heartfelt wishes for your success and happiness will be with you.

JENNIE T. JENNINGS.

Designation of Library Degrees

FROM the report of the Committee on Academic and Professional Degrees presented at the 1920 meeting of the Association of American Universities, one learns that an attempt is being made to bring about uniformity in the granting of higher degrees, and that consideration is being given to the proper designation for professional degrees. Representatives of various professional schools—medicine, law, business administration and public health—appeared before the Committee “with the view of arriving at a solution of degree problems of common interest, which may meet the needs of the professions and will conform with the principles regarding academic and professional higher degrees adopted by the Association of American Universities.”

The librarian looks in vain for a representative from the Association of American Library Schools at this meeting. Yet no profession has greater need for uniformity in and proper designation of degrees than does the library profession. It further needs the recognition of its professional degree which acceptance by the Association of American Universities would bring.

At present in the United States the degree Bachelor of Library Science (B. L. S.) is granted by certain library schools, at the end of two years of graduate work; at another school at the conclusion of a one-year course. There should be different degrees granted for these two types of courses.

Library schools are singularly unfortunate in having adopted the degree Bachelor of Library Science. It is confusing and meaningless to require the bachelor's degree for admission to a course and to grant the bachelor's degree at the end of two years' work. The use of the Bachelor as a professional degree should be discontinued.

The university librarian, altho he may have spent two years in graduate study at a library school, holds only a bachelor's degree. He is at a decided disadvantage compared with his colleagues on the faculty, who hold doctors' or at least masters' degrees.

There should be at least one library school in the United States which confers a degree equivalent to the Doctorate. University librarians and instructors in our library schools should be holders of this degree. It is certain that if library schools connected with institutions of higher learning are to hold their place with other technical and professional schools,

the instructors must hold a degree higher than that granted to graduates of these schools.

I should like to see the Association of American Library Schools consider the subject of degrees and to bring the result of its deliberations before the Association of American Universities.

EDITH M. COULTER, *Reference Librarian.*
University of California Library.

The Special Libraries Directory

THE Special Libraries Association has recently issued a valuable directory of business and other special libraries. It is edited by Dorsey W. Hyde, president of the Association, and contains an interesting editorial on the “Special library status as shown by the survey.” The directory is the result of the first extensive survey ever undertaken in this field and lists more than thirteen hundred collections of specialized information in the United States. In New York City alone there are three hundred and thirty of them; in Washington, one hundred and eighty-eight; in Chicago, forty-eight; in Boston, seventy-eight; in Philadelphia, ninety-three. The special library movement is only about ten years old and thus the Directory stands as the record of a very recent growth. The impetus given to industrial and scientific research during the war will result in the establishment of libraries, as soon as business conditions improve, by organizations which have hitherto been without them. The business depression itself has taught many a manufacturing corporation the importance of accurate and timely information as the only reliable means of ascertaining the proper relation of production to prevailing market conditions.

The Directory contains first an annotated list of special libraries arranged by subject. About four hundred are described in considerable detail. This list is a useful contribution to one's knowledge of authoritative sources of specialized information and notes, among other things, whether the library in question is open to the public or only to a limited clientèle. In the latter case, the librarian frequently indicates a readiness to co-operate with other libraries in the matter of supplying material. There is also a geographical list by cities and a subject index to the geographical list.

There is a large demand for the Directory, copies of which may be obtained from the Special Libraries Association, 3363 Sixteenth St., Washington, D. C., for two dollars. It is the intention of the Association to keep this handbook up-to-date by issuing revised editions in the course of time.

H. E. H.

THE FREMONT BRANCH OF THE SEATTLE PUBLIC LIBRARY

THE Fremont branch of the Seattle Public Library was opened on July 27, 1921. The building is constructed of rough white plaster over hollow tile. Daniel R. Huntington, city architect, planned the building and describes its architecture as Italian farmhouse style. On the main floor there is a large undivided reading room for children and adults. The basement contains an auditorium and story hour room.

The building cost \$35,000 and was built from Carnegie funds. The site cost \$10,000 of which \$7,000 was raised by residents of the district.

Seattle now has eight branches in permanent buildings and one in temporary quarters.

The Aims of the L. W. A.

To the Editor of the LIBRARY JOURNAL:

In the report of the New York State Library Association meeting, in your number for October 15th, I see that Dr. Williamson mentioned the Library Workers Association in his address, as follows: "The Library Workers Association, it was asserted, would accomplish more in aiding its members to overcome their disadvantage in competition with library school graduates by promoting certification and opportunities for training in service than by conducting an employment bureau."

Evidently, we have not kept Dr. Williamson as well posted on our work as we had supposed, so I would like to correct any misunderstanding that may have arisen from his remarks.

The statement of the work of the Association distributed at the A. L. A. and since, gives clearly our purposes and our work. It is as follows: The Association is a co-operative employment clearing house that offers special consideration of personal problems. It works along definite

lines toward the improvement of library standards. The Association urges the correlation of work in summer, extension, correspondence and library school courses, so that these may count toward a library school degree. This, with credit for experience, will make such degrees accessible to all interested workers. It insists that not only the qualifications of people, but the qualifications of positions be considered and that libraries give more attention to making attractive the opportunities they offer. It urges careful consideration of the fact that there is a moral obligation to refuse a low salary at home when a better salary abroad is offered. It supports all progressive library movements, but it is primarily for the consideration of staff problems and welcomes the comments or questions of the lowest or highest salaried member of the profession.

In view of this statement, of the fact that the annual meeting at Swampscott (see LIBRARY JOURNAL August 1921, p. 665-666) dealt primarily with correlation of courses to make library training *available* for every one, of the communications addressed by the L. W. A. to the A. L. A. committee on training and included by that committee in its report at the 1921 meeting, and of the oral and written remarks along these lines by its officers, it is obvious that the work of the Association deals to a great extent with the problem of lifting library training to a higher standard and making it available for everyone. And this is done not for the benefit of our members alone, but also, it is hoped for the whole library profession.

MARIAN C. MANLEY,
Executive Secretary, L. W. A.

An Exterior Show-case for Book Display

STOCKTON FREE PUBLIC LIBRARY
STOCKTON, CALIFORNIA

THE Stockton Public Library has recently been experimenting with exterior show-cases for displaying books on the side-walk front, as a way of catching the attention of pedestrians.

Altho the show window is a commonplace for the merchant who has goods to market—in fact, a prerequisite for any successful retail business—it appears to be but rarely utilized as a means of marketing the goods of a public library and for creating a desire for such goods in the minds of prospective customers. Possibly this reason alone, the novelty of a library show-case—explains the amount of attention aroused in this instance, the traffic occasionally becoming quite congested at this point on Market Street, and some people even crossing the street to explore.

Industrial, technical and business books, the existence of which in a public library is usually unknown to a large percentage of non-users of the library, have been in this way brought to the attention of a public ignorant of the fact that books and magazines relating to special lines of work and to hobbies might be had for the asking.

There has been sufficient evidence that the display has done more than excite a passing curiosity, for the books displayed have been asked for constantly, and frequent replacements in the cases have been necessary. New applicants have appeared to take their first borrowed books from these cases, now and then expressing surprise that such books might be taken home. One passer lifted the glass front of the case, scooped up the entire contents of one shelf, took them into the building, registered and carried home his collection, which, curiously enough, related to advertising, insects on the farm, char-

acter analysis and septic tanks. Many Stocktonians are in this way learning for the first time what the building on the corner of Hunter and Market streets is used for, having previously been under the impression that it had some connection with the old county jail.

Newspaper publicity, poster advertising, the movie slide, the mere talk, the cartoon, the informational book-plate and other forms of advertising, have each their value; but the most cogent appeal to the prospective book user is the tangible presence of the book itself.

H. O. PARKINSON, *Librarian.*

Stockton (Calif.) Public Library.

Who Can Supply These?

Stephen P. Duggan, director of the Institute of International Education calls attention to a request recently received for the following books and magazines to be used at the University of Estonia. If any readers of the LIBRARY JOURNAL can furnish these publications, they should be sent to the names noted in each case:

American Journal of Psychology, James' "Principles of Psychology," Tichener's "Experimental Psychology," to Professor J. Vabalas Gudaitis, Dukanto gve. 5, Kowno, Lithuania.

American Journal on Ophthalmology, to Professor Peter Avizonis, Keistucis, gve. 36, Kowno, Lithuania.

American Medical Journal, to Dr. Mazulis, Red Cross Hospital, Kowno, Lithuania.

Dr. Duggan will be obliged if any one able to send these books will notify him in order that he may know that these requests have been met. Address him at the Institute, 419 West 117th Street, New York.

FOR SALE

The Hackley Public Library, Muskegon, Michigan, has a large quantity of unbound duplicate periodicals, such as, *Harper's*, *Scribner's*, *Ladies' Home Journal*, *North American Review*, *Outlook*, and many others, in some cases extending back to 1870. It will be glad to dispose of these at a reasonable price. Any library interested should send a list of its wants promptly.

The library of Wellesley College has issued an attractive handbook, giving a history of the library from its days of 16,000 volumes and 100 periodicals in 1878, three years after the opening of the College, to its present 95,000 volumes and 350 periodicals, besides pamphlets. Plans illustrate the arrangement and there are chapters on the special collections.

THE LIBRARY JOURNAL

TWICE-A-MONTH

NOVEMBER 15, 1921

THE protest from the American Library Association against the proposed features in the pending tariff act relating to books have been heartily echoed by most of the learned societies thru their executive committees, and it is hoped that these numerous utterances may not be unheeded by Congress. Under the duty free privileges of the libraries, they are less directly concerned than the dozen associations which represent individual educators rather than incorporated institutions, and it is the more interesting to note that the A. L. A. is taking the lead in this endeavor. It is desirable in the interests of all book buyers that book prices in this country should be as low as practicable and that as few hindrances as possible should be placed in the way of importation, especially of the collections *en bloc* which give special opportunities to libraries to make desirable purchases and which bring to American scholarship the needed tools. During the war it was found that, taking all American libraries together, there was still a considerable dearth of printed information on subjects with which the American Commission to Paris had occasion to deal. As one result of the war, many foreign collections are offered for sale and America is the best market. Congress should not take such action as would preclude this advantage to its national constituency. The proposal for "American valuation" as the basis of tariff duties is also a feature which does not directly affect libraries, but it affects them indirectly not a little, because it necessarily increases duties and, therefore, prices on editions imported for publication in America. Under these circumstances, fewer such editions will be imported, fewer such books will be brought to the attention of libraries, and nobody will be the gainer. It should, therefore, be gratifying to the library profession that so many classes of scholars are co-operating with the A. L. A. Committee. It is suggested that librarians should obtain from their trustees resolutions of protest in which the Springfield (Mass.) Library has set a good example, and the necessary information for such protests may be found in the LIBRARY JOURNAL of September 15, p. 739-740. A steady stream of protest is flowing Washington way since the A. L. A. committees made a start and it is desirable that Congress should hear from constituencies in every quarter.

WE have received indignant protest from several quarters as to what is claimed to be discrimination against American book dealers on the part of the A. L. A. Committee on Book Buying, which should fairly have attention. The prices given in the list of American editions in the last report of the Committee were apparently ten per cent off list price, plus postage, while library purchases can be made either thru local dealers or well-known book jobbers and library agents at much lower prices. It is claimed that in presenting the comparative lists given in our last issue English costs have been stated at a minimum and American prices at a possible maximum. The three members of the Committee represent libraries which are actual buyers, and it would be interesting to note what were the prices paid in the American market by libraries other than those referred to. It may have been noted that the final paragraph in the Committee report was not the same in this journal and in *Public Librartes*. It was learned after the report had been sent to both periodicals that the Agence de Librairie et de Publications had withdrawn under new management the impracticable importation offer made to libraries by its earlier management, and the correction given in the report in the LIBRARY JOURNAL doubtless reached our contemporary too late for inclusion.

★ ★ ★ ★ ★ ★ ★

AS we have often pointed out, there should be co-operation and friendly relationship between all book distributors, as is happily the case in relation to Children's Book Week, and tho, as buyers, libraries are in a complementary relation with book dealers as sellers, there ought to be no acrimony or misunderstanding, but rather every endeavor that each side should understand and fairly treat the other. Any course to the contrary would be unfortunate to both interests. There is, in fact, immediate danger that differences which become unfriendly may lead to serious disadvantages to the libraries as a whole. Libraries have special advantages both in relation to tariff and copyright, which are really not rights but privileges, in view of the fact that they are public institutions for the benefit of the public. From the commercial side, publishers and importers feel that

they have reason to criticize both the duty free privilege in the tariff and the authority in the copyright code to import foreign editions without reference to American copyright. These privileges libraries, of course, desire to retain, and the Committee on Book Buying as well as the Committee on Federal Relations will be on the alert in their defense. But it is wise to recognize that there are two sides to such questions and to be just and friendly with those who are on the other side.

★ ★ ★ ★ ★ ★ ★

THE strong appeal made by past President Bishop, who was at the head of the A. L. A. during the most active war period, for books for our boys still in the Rhine Valley, will not go unheeded, and in fact, in response to the letter of Dr. Hill, the A. L. A. authorities have promptly cut the Gordian knot by appropriating \$1000 for books to be sent directly and im-

mediately to Miss Steere at Coblenz. It is gratifying, indeed, to have Mr. Bishop's emphatic endorsement of the work still going on thru the Y huts as a result of the earlier work of the A. L. A., and his tribute to the women who are doing that work will be read with appreciative sympathy thruout the library profession. It is, of course, to be regretted that the A. L. A. was not able to carry out the Enlarged Program, which would have provided so amply for this work, and that there was so much red tape involved in making the transfer. It looks now, however, as tho the boys at Coblenz and thereabouts will, within a fortnight or so, have all the good reading they will have time for before our troops in Germany are altogether withdrawn from the occupied territory. The purchasing has been put in the hands of Mr. Hopper of the New York Public Library that the dispatch of the books may be expedited with the utmost promptness.

LIBRARY ORGANIZATIONS

CONNECTICUT LIBRARY ASSOCIATION

THE annual meeting of the Connecticut Library Association was held in Litchfield, Oct. 20 and 21, 1921, Henry N. Sanborn, President, in the chair. The two days session, an innovation, was a big success. Much value lay in the informal exchange of ideas between people engaged in similar work which is impossible in a one-day meeting.

A fitting tribute was paid to Anna Gaylord Rockwell who resigned as Librarian of the New Britain Institute after twenty-seven years of service in building the library in its career of usefulness.

It was voted that the annual dues be increased from fifty cents to one dollar and it was recommended that consideration be given at the next meeting to provide for institutional membership at five dollars a year.

A petition was sent to the Council of the A. L. A. for affiliation of the Connecticut Library Association with that body according to the revised Constitution and By-laws. A committee was appointed to revise the Handbook annually.

A talk by E. Louise Jones, agent of the Division of Public Libraries of the Massachusetts Department of Education, opened an afternoon's discussion of "Books for Small Libraries." Miss Jones said, in part, that, as many librarians are untrained, she would suggest that library committees present once a week lists to trustees, that questionable books be read by more than one

member of the board before passing judgment. She recommended the purchase of detective stories—quoting Percival Lowell, the celebrated astronomer as a lover of these tales—wholesome, healthy, stimulating books, books on local history and by local authors, and attractive editions of children's books. For the book budget a good division is one-third non-fiction, one-third fiction and one-third books for children. John Cotton Dana's policy is twenty per cent for juveniles. Miss Jones spoke of the various booklists published by state libraries, of the *A. L. A. Booklist* and of the *Bookman's Manual* by Bessie Graham. She urged the advertising of new book titles in the local paper, advised buying from local dealers and said subscription books should never be bought by small libraries. In the matter of discarding books and weeding out collections, she suggested that gifts should not be accepted except with the provision that disposal of them should be made by the librarian, adding only to her collection titles she approved, that old scientific books, old government documents, old religious books and worn books should be thrown out at regular intervals.

The discussion in the evening was on library district meetings. Anna G. Hall of the H. R. Huntting Co., Springfield, and formerly organizer of the Library Extension Division of the New York State Department of Education, led with a talk on district meetings in New York. That state is divided according to transportation

facilities into thirty districts. The program of the meetings which occur in May and June appears in *New York Libraries*, and is arranged by the state association which voted \$200 a year for the work. The idea is to foster *esprit de corps*, to aid in book selection and to give elementary lessons in library routine, cataloging, etc. In some states the districts are changed from time to time.

The Friday morning session was devoted to a report of the work done by the American Committee for Devastated France in the building of public libraries in the district around Soissons, which was invaded by the Germany Army in 1914, and almost entirely devastated. Annie Carroll Moore, head of the children's work in the New York library system, who visited the district this spring, related her experiences in a vivid manner. Miss Moore saw a great similarity between the people of this farming district and New Englanders. She spoke of the remarkable courage of the people which rose above the desolation. The library plan has been to build in Soissons a central point with other libraries as distributing agencies to serve one hundred and twenty-five villages. The other libraries are Anizy-le-Chateau, Vic-sur-Aisne, Blerancourt, and Coucy-le-Chateau. The work was under the direction of Jessie M. Carson, Miss Moore's assistant in the New York Public Library. The plan was to have an American librarian with a French assistant. Snapshots and pictures were shown while waiting for the two-reel film showing the nine-months work. Alice Keats O'Connor of the Seward Park Branch of the New York Public Library, who had charge of the Soissons library explained many details. The substance of her talk appeared in the *LIBRARY JOURNAL* for October 15. She added that the circulation was 22,263 books from June, 1920 to April, 1921. Miss O'Connor spoke of the great appreciation of the French people for the Americans who had saved France.

Votes of thanks were passed for the many people who contributed to the pleasure of the meeting; to the speakers; to the Proprietor of Colonial Hall; the Connecticut George Junior Republic; the Rector of St. Michael's; the manager of Phelps Tavern; the citizens of Litchfield who furnished automobiles to the Library; the Litchfield Historical Society and to the owner of the Playhouse.

Officers elected for 1921-1922 are: President, Arthur Adams, librarian of Trinity College, Hartford; secretary, Helen Scarth, librarian, Public Library, Farmington; treasurer, Lillian Landgren, reference librarian, Silas Bronson Library, Waterbury, (re-elected).

LAURA A. EALES, *Secretary*.

BAY PATH LIBRARY CLUB

THE Bay Path Library Club held its autumn meeting in Webster in the new Corbin Memorial Library building on October 20th, with a registered attendance of sixty-eight.

Emily Haynes, president, introduced Clarence Nash, chairman of the Board of Trustees of the Webster Public Library, who welcomed the club and gave a brief sketch of the Chester C. Corbin Memorial Foundation.

Book reviews, in charge of Barbara Smith of the Levi Heywood Memorial Library at Gardner, brought forth informal comment and discussion and the hour proved both interesting and helpful.

The first number on the afternoon program was a paper by Eva March Tappan, entitled "On Building Americanism in the Hearts of Boys and Girls thru Books" read by Robert K. Shaw of the Worcester Public Library.

Rev. Herbert E. Lombard of Webster then gave a talk on bookplates exhibiting many specimens and explaining the good and bad points of each. He advocated bookplates for library books, maintaining that a bookplate increases the respect in which books are held by the patrons of the library.

Resolutions were passed thanking the librarian and staff, the ladies of the church and all who had contributed to make the meeting a success, and a message was sent to Miss Tappan regretting her illness and thanking her for the paper which she sent.

MABEL E. KNOWLTON, *Secretary*.

NEW ENGLAND HIGH SCHOOL LIBRARY ASSOCIATION

THE fourth fall meeting of the New England School Library Association was held in the library of the High School of Commerce, Springfield, Mass., on October 8th, Mary H. Davis presiding.

The theme of the morning session was "Practical Problems." C. A. Cockayne of Springfield told of the plan for outside reading used in the Technical High School. Clara F. Palmer of the Chicopee High School told of a fine working school library, developed under unfavorable conditions. The faculty members are in charge. A librarian from the Public Library gives two afternoons a week to advice on the book purchases and library methods. The librarian has organized a class of boys and girls and is training them as assistants. To each department is assigned a table, where books or illustrative material for special work may be assembled. Every pupil is assigned to the library two periods a week.

Florence G. Henry of the Springfield Public

Library outlined the instruction given by that library to all the schools in the city, beginning with the seventh grade, and including the Continuation Schools. Helen G. Bliss told of the lessons given High School students.

Mary C. Richardson, librarian of the Normal School, Geneseo, N. Y., spoke on "The Teacher's Part," summarizing the reasons for a school library as follows: Modern methods of teaching necessitate the use of more than one text, school work should be made as vital and interesting as possible, the child should be taught therefore how to read, and to use a library intelligently, then he should be trained in the reading habit and the library habit. The requirements of a well organized school library were detailed under the headings: Someone in charge who is really interested, the right kind of room, and proper equipment. The use of bulletin boards, and exhibits of pictures, supplementary material of various kinds, and collections of autographs were suggested as means of stimulating the interest of pupils.

Jesse B. Davis, supervisor of secondary education for Connecticut, spoke on "The Possibilities," urging librarians to keep in mind the seven objectives of secondary education in order to make the library contribute in preparing boys and girls for life.

EDITH K. COULMAN.

WESTERN MASSACHUSETTS LIBRARY CLUB

THE fall meeting of the Western Massachusetts Library Club was held Tuesday, October 18, at North Wilbraham, with sixty librarians representing twenty-one libraries in attendance.

The program dealt principally with methods of library advertising. John A. Priest of the Chapin, Burnett, and Foye Advertising Company of Springfield, Mass., spoke on "Library Advertising from the Business Man's Point of View." His advice to librarians was to know their goods or books, to bring them before the public by all kinds of advertising and in this way "sell" the valuable information they contain. The general discussion that followed developed many useful suggestions. New and original methods of advertising employed in a small mill-town store library in southern New York were described in a talk by Anna G. Hall, formerly organizer for the Extension Division of the New York State Department of Education, and now connected with the Henry R. Hunting Company, and Hiller C. Wellman of Springfield compared some successful and unsuccessful advertising methods.

The main address was given by Franklin K.

Mathews, chief librarian of the Boy Scouts of America, at the afternoon meeting, held in the chapel of Wilbraham Academy, who discussed Children's Book Week, the history and progress of the movement, and the clean-up work which has been accomplished in juvenile books by publishing houses and booksellers thru the cooperation of libraries and the Children's Book Week Committee. Every children's librarian, said Mr. Mathews, might do well to persuade her local bookseller to display one table of books labelled "Recommended by the Children's Department of the Public Library" in a conspicuous part of the store. The books would soon prove to be the best sellers.

MERIBAH E. KEEFE, *Secretary*.

NEW YORK SPECIAL LIBRARIES ASSOCIATION

THE New York Special Libraries Association began its year's activities with a meeting on Friday, October 28th, which had an attendance of one hundred and thirty-one. Following dinner a discussion of plans for the year was led by Rebecca B. Rankin, president, and entered into by a majority of the members present. Many splendid suggestions and ideas for future meetings were presented and will undoubtedly be followed during the year. Meetings will be held on the last Friday of the month, following last year's plan in having dinner meetings at half past five.

NEW YORK LIBRARY CLUB

THE New York Library Club entered on its winter program on October 20th when two hundred members met at the Y. W. C. A. Building at 610 Lexington Avenue to hear Dr. Charles C. Williamson speak on Certification for Librarianship.

"Dr. Williamson gave a brief historical outline of the progress of the idea, starting with the Asbury Conference of the American Library Association in 1919, the action taken at Colorado Springs in 1920, and the report made at Swampscott in 1921. He said that the question will be discussed at the Chicago mid-winter meeting of the American Library Association, and hoped that the Council at that time would reindorse the principle of certification for librarianship and express its willingness to have the American Library Association adequately represented on the proposed National Certification Board. The speaker said the proposal emphasized national not state certification, and urged voluntary action rather than a federal law. He objected to the implication that standardization would make librarians 'As like as peas in a pod.' He also stressed strongly the point that certification would not

affect incumbents in office; that experience would receive recognition, and that the plan was so drawn that education plus special aptitude would make possible rapid advancement. He said that the objections raised by some in contrasting library school training with experience and ability, can best be answered by a careful reading of the requirements for each certificate, and by comparing the library profession with other professions."

The motion that: "The New York Public Library Club expresses to the American Library Association its sympathy on the subjects of certification and standardization" was carried unanimously.

SPECIAL LIBRARIES COUNCIL OF PHILADELPHIA AND VICINITY

THE special librarians of Philadelphia and vicinity held their first meeting of the season on Friday, October 28, 1921, in the Board Room of the Philadelphia Chamber of Commerce.

"The Library as a Business Asset" was the subject of an address by Henry P. Megargee, of the American Railways Association. Mr. Megargee dwelt on the need for varied knowledge which exists in a public utility corporation, and the ideal manner of meeting it. The library organization of the Philadelphia Rapid Transit Company was outlined, as well as the information file under his own charge. Mr. Megargee believes that the potential value of a special library working in co-operation with other libraries is incalculable.

General discussion followed, as to various methods used in meeting the needs for this specialized information.

The following officers were elected for the ensuing year: Chairman, Louise Keller, librarian, Independence Bureau; vice-chairman, E. Mae Taylor, librarian, Philadelphia Electric Company; treasurer, Florence G. Humphreys, librarian Corn Exchange National Bank; secretary, Helen M. Rankin, Municipal Reference Division, Free Library of Philadelphia.

HELEN M. RANKIN, *Secretary*.

GEORGIA LIBRARY ASSOCIATION

THE Georgia Library Association held its annual meeting in Albany on October 26th and 27th. This was the first time that the Association had ever met south of Atlanta, altho most of the public libraries in the state are in south Georgia. There was an attendance of twenty-one librarians, representing thirteen public and four college libraries, the State Library and the Library Commission. In addition there were four trustees present, the chairman of the State Library Commission, and two club

chairmen making a total attendance of twenty-eight.

Four sessions were held. At the first session, held in the city auditorium on Wednesday afternoon, Nell Reese, librarian of the state Agricultural College, gave a talk on books on home planning and household decoration, telling of the collection on this subject in her library which is used by the students in home economics. Miss Reese distributed valuable bibliographies, one, a selected list of books on the subject and the other, a list of material, mostly in pamphlet form, which can be obtained free. The rest of this session was given over to reports from the librarians present and proved to be one of the most profitable of all the sessions, as the special features of the work of the different libraries were brought out, which provoked interesting discussion. From the reports given it seems that five counties in the state are operating county library systems, the most complete organizations existing in Crisp and Ben Hill counties. A unique method of distribution has been developed in these counties, which consists of using sacks to send the books in instead of boxes, the sacks being sent out by parcel post.

At the evening session, presided over by Mrs. John K. Ottley, chairman of the State library commission, the discussion centered around the subject of the library and the community with special reference to the relation of the club women to the library movement. Mr. Redfern, president of the Albany library board, spoke a few words of greeting to the Association and Mrs. Redfern, president of the Albany Woman's Club, also spoke. Other speakers were Louise Hays, trustee of the Thomasville library; Mrs. Chapman, a trustee of the Quitman library; Mrs. E. H. Kalmon, chairman of library extension of the Albany Woman's Club; Tommie Dora Barker, chairman of library extension of the fifth district federation of clubs.

The morning session on Thursday, held in the Albany library, was devoted to practical demonstrations of library work. Charlotte Templeton, secretary of the Library Commission, talked on advertising, pointing out what was effective advertising and showing examples of good newspaper publicity of libraries in the state. Susie Lee Crumley, principal of the Atlanta library school, gave a mending demonstration, showing processes and materials. Loretta Chappell, children's librarian of the Columbus Public Library, talked on organizing work with children, telling what methods had proved successful in her own work and showing a collection of excellent printed aids.

Discussion of the county library filled the afternoon session. Mrs. R. G. Hall of Cuthbert

gave the results of a very complete survey which she had made of book conditions in Randolph county where she found that many schools had no library at all, the text-books being the only books to which the children had access. With a view to arousing some interest, she had sent a letter to each teacher suggesting that a library day be held during Children's Book Week and enclosing a program with the material for carrying it out. She hoped that the stimulation of interest coming from this together with the influence of the books loaned by the State Library Commission would result in a concerted effort to establish a county serving library. Mrs. Gordy of Columbus told how she got her county appropriation; Louise Bercaw of Cordele described her library exhibit at the county fair; and Louise Smith, of Fitzgerald described her methods of book delivery, which employs sacks and the parcel post instead of cases and the express.

A resolution in favor of holding next year's meeting as part of a conference of Southeastern librarians, as was successfully done last year at Chattanooga, was passed and a suggestion forwarded to the presidents of the associations of North Carolina, South Carolina, Tennessee, Florida, Alabama, Mississippi and Kentucky that they serve as a committee to make arrangements for such a meeting in accordance with a vote passed at the Chattanooga Conference.

The following officers were elected: President, C. Seymour Thompson, librarian, Savannah Public Library; first vice-president, Charlotte Templeton, secretary, Georgia Library Commission; second vice-president, Mrs. Corinne Gordy, librarian, Columbus Public Library; secretary-treasurer, Louise Bercaw, librarian, Cordele Public Library.

TOMMIE DORA BARKER, *Secretary*.

OHIO LIBRARY ASSOCIATION

THE twenty-seventh annual conference of the Ohio Library Association was held at Antioch College, Yellow Springs, on October 17-20. The historic environment of the College is still permeated with the spirit of its first president, Horace Mann, is filled with literary associations, and is now pioneering under the leadership of its new president, Arthur E. Morgan, into wide fields of cultural and vocational education. Over two hundred and eighty librarians and trustees registered. On the first evening the president, Carl P. P. Vitz of the Cleveland Public Library, opened the session with remarks on "The Librarian Comes Out." The address of the evening was "Eyes and Ears and History," by Hendrik Willem Van Loon.

Library advertising, special libraries, and chil-

dren's literature were the topics of the second day.

Gilbert O. Ward, technical librarian, Cleveland Public Library, spoke on "Planning to Make the Public Library Known," and Louise E. Grant discussed "The Special Library, Local Industry and the Public Library."

The afternoon session was a joint meeting with the Yellow Springs Library Association, when Dr. Van Loon again spoke.

A paper by Lucy E. Keeler, author, essayist, and library trustee at Fremont, Ohio, on "Listeners in Literature" at the evening session was a series of delightful and discursive reminiscences of authors and books.

E. Gertrude Avey, head of the children's department of the Cincinnati Public Library considered "Some Recent Juvenile Books," and a general discussion followed in which children's librarians and others from Dayton, Toledo, Cleveland, and elsewhere participated.

Wednesday was county library day. President Vitz and the Legislative Committee had secured the passage of the County Library bill for Ohio during the year, and the possibilities resulting from this were particularly stressed.

"Survey for Service," by Grace Stingley, librarian of the Rochester (Ind.) county library and "The Transplanting of a Buckeye," by Corinne A. Metz, county librarian of Allen county, Fort Wayne (Ind.) were two papers that fitted well together when presented at the afternoon session. The first was full of practical suggestions for the work of organizing a county library; the other a delightful account of Miss Metz's work in Oregon.

Section meetings were held in the morning.

At the College and Reference Section, Bertha M. Schneider, head cataloger of the Ohio State University Library, led off with a paper in "The Library of Congress Classification for Small College Libraries," a discussion of Mr. Hanson's article on this subject in the LIBRARY JOURNAL of February 15.

Robert E. Stauffer, librarian of Mt. Union College, Alliance, conducted a round table on the budget of the small college library, and the committee on co-operative binding for Ohio college libraries reported.

The School Libraries round table, led by the chairman, Stella Hier, librarian of the Woodward High School, Cincinnati, developed a discussion of unusual interest on the work of the class room library and recreational reading of young people as stepping stones to good taste.

At the Small Libraries round table Mrs. E. E. Ledbetter, librarian of the Broadway branch of the Cleveland Public Library and chairman of the A. L. A. Committee on Work with the

Foreign-Born read her paper on "Books for the Foreign Born," which was also the report of the O. L. A. Committee on Americanization.

Bessie H. Shepard, head of the reference division of the Cleveland Public Library, led the discussion on how to choose public documents for the small library.

The President of the American Library Association, Azariah Smith Root, librarian of Oberlin College, gave the conference its fitting climax in the evening with an address on "The Human Factor in Library Service," after which the Library Players of Cleveland presented Susan Glaspell's one-act play "Suppressed Desires."

The officers for the coming year are: President: E. I. Antrim of Van Wert; vice-presidents, C. W. Reeder, Columbus, Maud Horndon, Akron Public Library, and Lucy Keeler of Fremont; secretary, Alice B. Coy, Cincinnati; treasurer, Gilbert O. Ward, Cleveland.

MARGARET DUNBAR, *Secretary*.

MICHIGAN LIBRARY ASSOCIATION

THE Michigan Library Association met in Detroit October 5-7, with a registration of two hundred and forty-four. The meetings were held in the new Main Library, to see which was one of the objects of the meeting.

Adam Strohm, the librarian, welcomed the Association and told a little of the history of the new building. The President made a fitting response and then called for reports. The Round Table Committee reported that with only \$275 to spend eight meetings had been held touching seventy libraries. A representative had also been sent to the meeting of the Upper Peninsula Association.

Divie B. Duffield, president of the Detroit Library Commission, described the attempt of the Commission to secure from the last Legislature a bill for a Library Retirement Fund. He said the theory of the fund should be this: that there shall be contributed from year to year a sum of money which at the end of a fixed period, will produce and will give in hand a sum of money, which at an agreed rate of interest will produce, by careful investment, the amount of retirement pay. He said that the public should contribute a certain portion of the sum, and that whatever is contributed by the individual should belong to that individual under certain conditions. That is, if a member resigned and retired from the library field before the age specified the amount he had contributed with its accumulations should belong to the individual but not the part contributed by the public. He thought it should not be obligatory. The bill introduced failed to pass because the Detroit Common Council was opposed

to it, thinking it would lead to retired pay for everybody in the public service, and because the Legislature considered it simply a Detroit measure. If the librarians of the state desire such a bill they should take it up in such a way that it would come from all over the state and not appear to be a local measure.

Samuel H. Ranck, chairman of the Legislative Committee, spoke on, "Some Recent Library Legislation in Michigan. Is it Progressive?" His conclusion was that so far as legislation is concerned the last session of the Legislature made conditions for getting adequate library service to the majority of the people of the state a little worse than they were before. Lent P. Upton, director of the Bureau of Government Research, Detroit, explained the position of the Bureau and showed where some of the action taken was the result of its recommendations but not in accordance with it. After an animated debate the Committee on Resolutions was directed to prepare a memorial to be sent to the Governor and to the Administrative Board of the State of Michigan.

The main address Wednesday evening was made by Azariah S. Root, librarian of Oberlin College Library, and president of the A. L. A. Among other things he said that he was much impressed by the title of one of Edna Ferber's books, "Personality Plus." "That, it seems to me, is the sort of thing we librarians need. We need to throw into our work every ounce of interest, every ounce of personal response, every particle of personal magnetism and personal influence that we have in order that the person with whom we are dealing shall feel that we are profoundly interested in finding out exactly the thing that he wants."

On Thursday morning George B. Utley, librarian of the Newberry Library, spoke on "Topics for Library Meetings. What Subjects are Most Worth While?" He urged that more space on the program be given for discussion. Some of the strong doctrinal points that have proved most valuable have been brought out during informal discussions. While it has been claimed that it is not possible to have profitable discussion in a large meeting, he said that the more difficult it was not impossible, and spoke of the habit of persons attending A. L. A. meetings of slipping out during the reading of a paper and coming back afterward while it was being discussed. He spoke of a meeting he attended in England at which there was a large number of trustees and where the discussions grew very warm. He said trustees wanted something else than to hear librarians talk. The object of attending a meeting is to get inspiration, and that should not be temporary, but

something that should be vital six months afterward. Discussion spontaneously arising is more likely to be remembered. That topic is most worth while which best lends itself to discussion. Speakers from outside the library profession should treat their own specialty and not attempt to discuss points of library technique.

Following this talk a series of Round Tables were held at which circulation and loan problems, general administrative problems, new books, and technical books were discussed.

In the afternoon an opportunity was given to visit some of the branch libraries, the Ford Motor factory, the Pewabic Pottery, the *Detroit News*, and other points of interest. At the MacGregor Public Library in Highland Park the Association, in addition to enjoying the hospitality of Miss Sleneau, the Library Board, and the Staff, had an unusual opportunity to see a library which had been built up from the beginning in two years.

On Friday morning C. M. Burton, consulting librarian of the Burton Historical Collection of the Detroit Public Library spoke on, "Know Your Country." His ambition is to have everything in Detroit about Detroit history so that one need not go all over the state for information.

Votes of thanks were passed to all who had assisted in the entertainment of the Association; to Dr. Root, Mr. Duffield, Mr. Upson and Mr. Utley for their addresses; to Miss Olson for her wholehearted efforts as president and to Miss Walton for arranging the Round Table programs. It was also resolved that this Association is opposed to any effort to abolish the use of penal fines for library purposes without concurrent adequate substitute for library support; that the Association go on record as favoring the matter of a retirement fund for librarians, while leaving the whole matter with the Legislative Committee; and that the Association instruct and empower the Legislative Committee to use the resources of the Association and whatever other means may be available, in drafting library laws for Michigan, which will insure for the State adequate library service, supervision and extension. Finally, that the Association heartily commend the work of the Detroit Library Commission in its extension of adequate library service to all parts of Wayne County and earnestly urge the support of that policy and the continuation of said service as an inspiring example for the extension of such work thruout the State.

The following officers were elected for the ensuing year: President, Flora B. Roberts, Kalamazoo; first vice-president, Agnes Jewell, Adrian; second vice-president, Jessie C. Chase,

Detroit; secretary, Earl W. Browning, Jackson; treasurer, Rose Ball, Albion College.

MARY E. DOW, *Secretary*.

MISSOURI LIBRARY ASSOCIATION

THE Missouri Library Association held its twenty-first annual conference at Ha Ha Tonka, October 17-19, in the center of the Ozark Mountains, twenty-five miles from the nearest railroad, and perhaps, the most beautiful spot in Missouri. Members attending were housed in cottages and feasted together on fried chicken and other good things in a common dining room. The meetings were all held outdoors, the last night around a camp fire in the woods. The afternoons were given up to hikes. Near the camp was a beautiful lake, and a precipitous canyon about three hundred feet high furnished some difficult climbing and wonderful views of autumn foliage. A large part of this region consisting of approximately eight square miles is cut up by caves and underground rivers. On the second afternoon the librarians explored one of the largest of these caves.

The first two sessions were given up largely to publicity problems. In the first session Alfonso Johnson, business manager of the *Columbia Evening Missourian* dealt with "Publicity in a Small Library." The paper was established by graduates of the School of Journalism of the University of Missouri, and is almost entirely administered by students of the school. Mr. Johnson who has had wide newspaper and publicity experience in this country and in Japan, suggested and emphasized close co-operation with local papers, the necessity of librarians preparing copy in a presentable form, and the need for closest personal contact between librarian and patron in supplementing all other methods of publicity. Sarah N. Findley, librarian of Lindenwood College, spoke on "Publicity for the College, Normal and University Libraries," describing methods which she had used both inside and outside the library in interesting the students in better reading.

On Tuesday morning Mr. Johnson addressed the librarians on a "Book Week in Missouri." Among other methods which he recommended were co-operation of booksellers and newspapers, obtaining free advertising space in newspapers on open house in the library (which he especially favored), the co-operation between library and churches, and a library float. A resolution was passed unanimously that a book week be held in Missouri and that a committee be appointed by the President to carry this out. James A. McMillen, chairman of the committee, brought in a comprehensive report on certification for librarians, making specific recom-

mendations for such a plan in Missouri. It was voted that the committee be continued and be instructed to bring before the Association at its meeting in 1922 a further report with a draft of a bill to be presented to the legislature in 1923. In the evening J. Kelly Wright, Farmer's Institute lecturer of the State Board of Agriculture, gave an interesting illustrated lecture on Missouri. This was given outdoors with the curtain hung between two trees.

The Wednesday morning session was opened by Purd B. Wright in his address on "What Next in County Library Development." Mr. Wright was active in obtaining the passage of a county library law at the last session of the Missouri legislature, and his account of methods which were used to obtain this result were suggestive in illustrating what is now needed to put county libraries in operation in Missouri as rapidly as possible. Irving R. Bundy, secretary of the Missouri Library Commission, reported on counties which were already taking preliminary steps toward the establishment of county libraries. He said that the plan of the A. L. A. for having a library book truck as a means of arousing communities to see the need of county libraries did not at present seem practical in this state, but might later prove an excellent publicity method. A resolution was passed that a committee be appointed by the President to assist Mr. Bundy in spreading the county library idea thruout the State. Alice I. Hazeltine of the St. Louis Public Library then presided during four-minute book reviews.

In the evening Sula Wagner of the St. Louis Public Library surveyed "Public Library Progress in Missouri" while Mr. McMillen gave a corresponding survey of college and university library progress in Missouri. It was voted that copies be sent to the State Library Commission in order to maintain as complete a permanent record of the library history of the state as possible.

The following officers were elected: President, Irving R. Bundy; first vice-president, Sula Wagner; second vice-president, Mary A. Ayres; secretary, Jane Morey; treasurer, Artie West.

CHARLES H. COMPTON.

SOUTH DAKOTA LIBRARY ASSOCIATION

THE fifteenth annual meeting of the South Dakota Library Association was held on the morning of September 29, at Rapid City Library, under the presidency of Ada M. Pratt. The librarians had not met in the Black Hills for seven years, and, because of the distance from the more thickly settled eastern portion of the state, not quite so many were present as last year.

This was an "all South Dakota meeting," and the outstanding features of the program, besides the technical topics, were the delightful talk on western poets by our own Black Hills poet, Charles Badger Clark, with readings from his own works, and the evening address on the history of the Black Hills, given by President C. C. O'Hara, of the South Dakota School of Mines.

Ella Laurson's brief talk on what a library should do for a community was inspiring; Ethel E. Else gave a helpful demonstration of book-mending; and there were good discussions on the following topics: How to get county libraries started, by Jessie Bartholomew; Short cuts in cataloging, by Sarah N. Lawson; Keeping the library before the people, by M. E. Livingstone; The library from the trustee's point of view, by Mrs. F. D. Smith; and Interesting children in good books, by Minnie Shannon. Leora J. Lewis of the Free Library Commission, gave an interesting account of the A. L. A. meeting at Swampscott, which was supplemented by comments from Mr. Powers. Marian Manley of the Library Workers Association, who was unable to be present, sent a communication which was read by Doane Robinson.

Hospitable Rapid City people contributed much to the pleasure of the meeting: Dr. O'Hara arranged for a visit to the State School of Mines; the Public Library trustees planned a motor trip and dinner and local ladies entertained the delegates on the "Harvard plan."

Officers elected for the coming year are: President: Ella McIntyre, Huron; vice-president, Myrtle Francis, Redfield; secretary, Ethel E. Else.

MAUD R. CARTER, *Retiring Secretary.*

COLORADO LIBRARY ASSOCIATION

THE thirty-first annual meeting of the Colorado Library Association was held in the Denver Public Library on September 2-3.

Mrs. Duffield's paper on interesting others in the State Library Association gave, in a few words, some practical ideas. Katherine Craig, state superintendent of schools, made her audience feel the interest that should exist between librarians and teachers. She spoke of the growth in usefulness of the library, formerly a receptacle for knowledge whose usefulness was restricted by rules and regulations for the protection of its books, now, one of the greatest mediums for distributing material for the education of the people.

The association had been looking forward eagerly to the report of the work in France of Rena Reese, assistant librarian of the Denver Public Library. Miss Reese's call was to the

American Library at Coblenz, but the ground she covered in her talk extended over the principal libraries of France. "Impressions of a Western Librarian in an Eastern Library" by Elfreda Stebbins, of Fort Collins, who has just spent eight months in the New York Public Library, gave an idea of the vastness of that institution compared to our own smaller spheres of usefulness.

Still another of our librarians had wandered to foreign fields this past year, Helen Ingersoll, of the Denver Public Library, who has been engaged in children's work in the Denver Public Library. Miss Ingersoll held before us a high ideal of the "Children's Librarian" whose duty is to foster friendliness, to take part in the social activities of one's community, to create a better taste for better books in the home, and better books in the movies.

A lively discussion on "Rental Shelves: 'Do they pay?'" led to the conclusion that they did. The librarians present all charge rental for new books of fiction. The Denver Library also puts popular non-fiction on this shelf, believing that people are attracted to something for which they have to pay. C. Henry Smith, librarian of the University of Colorado, gave a clear and concise idea of "How to Take an Inventory," which in his estimation, is an undertaking consuming time and money not justified by its usefulness to the library. A pleasant break in the business discussions was provided by the subject, introduced by Dr. and Mrs. George Reynolds, of the University of Colorado, of "Some Phases of the Modern Drama," illustrated by Mrs. Reynolds' reading Maurice Baring's play "Katherine Parr." An afternoon meeting was held at the new Park Hill Branch library, whose attractions visiting librarians viewed with envious eyes.

The following officers were elected for 1922: President, Rena Reese, Denver Public Library; vice-president, Mary Weaver, Rocky Ford Public Library; secretary-treasurer, Lena R. Fenton, Boulder Public Library.

LENA R. FENTON, *Secretary*.

NEW HAMPSHIRE LIBRARY ASSOCIATION

THE thirty-second annual meeting of the New Hampshire Library Association was held at Keene on October 13-14. The attendance was larger than ever before, fifty-three librarians and trustees being registered, as well as a large number of the townspeople.

At the Thursday morning business session, President Caroline B. Clement, in the chair, reports of the secretary and treasurer were read and received, following which the neighborhood leaders reported seven meetings held during the

year. Affiliation with the A. L. A. was discussed and it was voted to become a chapter. It was voted also to amend the constitution to include a new membership program with contributing, life, sustaining, associate and regular memberships.

At the afternoon session, after welcome from Mayor Orville E. Cain and Dr. H. R. Faulkner, Evelyn Warren of Townsend, Mass., gave an interesting paper on the duties and rewards of a village librarian. Next came brief notes on recent books, Mrs. Thomas Marble, of Gorham, discussing recent fiction; Alice M. Jordan, of Boston, children's books, and Winifred Tuttle, of Manchester, non-fiction.

On Friday morning sixty or more gathered in the library hall to hear J. Randolph Coolidge, Jr., speak on "The Trustees Trust." It was well worth hearing. Following, Willard P. Lewis of Durham spoke on certification of libraries and librarians. Informal discussion followed and a committee was appointed consisting of Willard P. Lewis, F. Mabel Winchell of Manchester and Grace E. Kingsland, secretary of the Library Commission.

At this meeting Miss Kingsland announced that a friend of the association had given the necessary funds to establish a scholarship to enable some librarian from a small town to attend the annual meeting or the summer school.

The following officers were elected: President, Caroline B. Clement, Manchester; vice-presidents, Lillian Wadleigh, Meredith and Willard P. Lewis; secretary, Winifred Tuttle, Manchester; and treasurer, Annabel C. Secombe, Milford.

In addition to the exhibits of library supply houses there were interesting exhibits of free material and suggestions for Good Book Week, arranged by Miss Kingsland; and a Bookbinding exhibit by the A. L. A.

Visits to the New Hampshire Pottery Works, an automobile trip to Peterborough by invitation of residents of Keene, a visit to the MacDowell Colony and, not least, the reading from his own works by Judge Henry A. Shute contributed greatly to the enjoyableness of the meeting.

SARAH GILMORE, *Secretary*.

Thomas Lynch Montgomery, librarian of the Pennsylvania State Library since 1903 and director of the State Museum, has resigned to become librarian of the Historical Society of Pennsylvania, Philadelphia, on December 1, succeeding John W. Jordan who died last spring. He is succeeded at Harrisburg by Rev. George P. Donehoo of Coudersport, secretary of the State Historical Commission since its inception in 1911.

Library Book Binding

HOLLISTON Library Buckram has been recognized for years as the most durable cloth for book binding, consequently this book cloth has been adopted by Librarians and Library Binders as the standard cloth for rebinding.

The work of the following Library Binders and others that use Holliston Book Cloth may be recommended for dependable quality and genuine service.

John Cotton Dana

who bought for the Newark Public Library a set of Sherbow's Type Charts for Advertising, says:

"Public Libraries which make any pretense of supplying business books should buy a set of your Type Charts and make them accessible to all comers.

"Every man, whatever his business, upon whom the duty falls of laying out for production any kind of printing whatsoever, should find your Charts of great value; and, in case he needs them only occasionally, may reasonably expect to find them in his local public library."

Sherbow's Type Charts for Advertising

consist of four volumes, in which are visualized more than 1200 type combinations for use in booklets, catalogs, house organs, posters, dealer helps, car cards, mailing folders, window cards, newspaper, trade paper and magazine advertising.

\$70,000 worth of these Charts have been bought by advertising agencies, manufacturers, merchants, printers, publishers, libraries, universities, etc., etc.

You may have a set on ten days' FREE TRIAL without obligation of any sort.

ALEXANDER, William A., dean of Swarthmore College, appointed librarian of Indiana State University in succession to William E. Jenkins, who is spending this year traveling in Europe and will return to the University next year as professor of English. Mr. Alexander was assistant in the University Library previous to his appointment as registrar and dean of Swarthmore. He has served as publicity director of the National Educational Association, as a member of the committee which in 1917 devised a uniform college certificating blank for colleges and universities in the middle Eastern states and for the last year of the committee which determines the official list of accredited colleges in the middle Eastern states.

BROWN, Greta E., 1900 D., is Anna G. Rockwell's successor as librarian of the New Britain (Conn.) Institute.

BUDLONG, Minnie Clark, is acting temporarily as pastor of the People's Church, Kalamazoo, Mich., during the illness of her daughter, Rev. Julia Budlong.

BROWN, Jane, formerly army librarian at Camp Knox, Ky., appointed naval librarian at the U. S. Naval Hospital, Great Lakes, Ill.

CLARKE, Elizabeth Porter, has resigned the librarianship of the Public Library of Jacksonville, Ill., to become State Organizer with the Iowa State Library Commission at Des Moines, November 15th.

COMAN, Caryl, of the Portland, (Ore.) Public Library was appointed librarian of the Naval Training Station, San Francisco, Calif., and

later transferred to the U. S. Marine Barracks, Parris Island, S. C., to succeed Irene Dayton.

COOPER, Isabella M. 1908 N. Y. S., after a year's library work with the American Committee for devastated France has returned to the charge of the Central Circulation Branch of the New York Public Library.

CORWIN, Belle, for twenty-six years librarian of New York University, resigned in October.

COWGILL, Ruth, 1911 P., formerly librarian of the Public Library, Boise, Idaho, has been appointed librarian at the U. S. Marine Barracks, Quantico, Va.

DAY, Rebecca, formerly librarian at Longmont and later librarian of the Naval Hospital, Fort Lyon, Colo. has been transferred to succeed Maude L. Mast as librarian of the 12th Naval District, with headquarters at Mare Island, Calif.

DAYTON, Irene, 1911 D., transferred from the Library of the U. S. Marine Barracks, Parris Island, S. C., to succeed Miss Duren as librarian of the Naval Training Station, Great Lakes, Ill.

DONNELLY, June R., director of the Simmons College School of Library Science will spend part of her Sabbatical year, from Christmas to Easter, in a study of present-day library conditions and of the Library of Congress classification system.

DUREN, Fanny, librarian at the U. S. Naval Training Station, Great Lakes, Ill., for the last three years, has resigned in order to take a much needed rest.

FLEMING, Ruth, 1915-16 N. Y. P. L., appointed librarian of the Humboldt State Teachers College, Arcata, Calif.

FREEMAN, Marilla Waite, who received the degree of LL.B. from Memphis University in June and was admitted to practice at the Tennessee Bar, has resigned the librarianship of the Memphis Institute which she has held for the past ten years to accept an executive position in the Foreign Law Department of the Harvard Law Library, Cambridge, Mass.

GODDARD, Frances H., for over thirty years on the staff of the Boston Public Library, resigned in the summer and has sailed for an extended visit abroad.

JOHNSON, Mildred Noë, 1918-19 N. Y. P. L., is assistant editor of *Safety Engineering*, New York City.

AS EVERY LIBRARIAN KNOWS,
 there are many books on business
 letter writing, but no other covers the
 fundamentals of the subject in so direct
 and forceful and interesting a way as
BETTER LETTERS. It is not a dull
 commercial manual or a textbook on
 "good English," but a lively and stimulat-
 ing aid for those who want to know the
 essential factors in correct, persuasive,
 efficient, successful business letters.
BETTER LETTERS must be counted a
 simple necessity in every public library.

WHAT OTHERS SAY ABOUT THIS BOOK

"**BETTER LETTERS** is
 admirable. I am very glad
 indeed to have a copy."
JOHN COTTON DANA,
 Librarian Newark (N. J.)
 Public Library.

"One of the most
 thoroughly practical exposi-
 tions of the art of letter
 writing which I have
 seen." **JESSE H. NEAL,**
 Executive Secretary, The
 Associated Business
 Papers, Inc., New York.

"The most valuable col-
 lection of ideas on this
 subject that I have had the
 privilege of reading." Rear
 Admiral **SAMUEL Mc-**
GOWAN, Paymaster Gen-
 eral U. S. Navy, Washing-
 ton.

"During the years I have
 been in the publishing busi-
 ness I have examined a
 good many books on letters
 and letter writing, but none
 that I have seen can com-
 pare with **BETTER LET-**
TERS. It gives all
 the essentials in a com-
 pact, attractive, stimulating
 form." **H. H. HOWLAND,**
 Secretary, The Bobbs-
 Merrill Company, In-
 dianapolis.

"**BETTER LETTERS**
 tells more in a better way,
 in a shorter space, than any
 other book on the subject
 that I know of." **A. H.**
McQUILKIN, Editor "Nati-
 onal Builder," Chicago.

The regular published price of **BETTER LETTERS** is \$1.50. To introduce the book to librarians, we will fill their immediate orders at the rate of **ONE DOLLAR** a copy postpaid—a discount of one-third. Send at once for as many copies as you can use—this special offer may not appear again.

THE ACADEMY PRESS
 BOX 509, WYOMING, NEW YORK STAT

KELLER, Helen Rex, recently of the League of Nations Library at Geneva and formerly in charge of the library courses at Columbia University, has returned to New York.

LAMMERS, Sophia J., 1911-12 N. Y. P. L., appointed librarian, Public Library, Mankato, Minn.

LITTELL, Grace A., assistant librarian of the General Theological Seminary, New York city, resigned to become librarian of St. Stephen's College, Annandale-on-the-Hudson.

SCOVIL, Elizabeth A., assistant librarian of the Metropolitan Life Insurance Company, and previously librarian of the International Law Section of Colonel House's Inquiry succeeds Grace A. Littell as assistant librarian of the General Theological Seminary, New York City.

STEINER, Bernard C., librarian of the Enoch Pratt Free Library of Baltimore is author of a

life of Chief Justice Roger B. Taney, soon to be published by Williams and Wilkins of Baltimore.

THOMAS, Sarah, formerly army librarian at Fortress Monroe, Va., appointed navy librarian of the U. S. Naval Training Station, Newport, R. I.

ULRICH, Carolyn F., 1918 P., who has had charge of Central Circulation of the New York Public Library during Isabella M. Cooper's absence, appointed chief of the Periodicals Division in succession to Annie C. Tompkins, deceased.

WAYLAND, Annie E., for fourteen years a member of the Bangor (Me.) Public Library staff and for some time past head of the Reference Department died in September, at the age of thirty-three.

IN THE LIBRARY WORLD

NEW YORK

Buffalo. The University of Buffalo Library Science Course opened on September 28th with thirty-four new students, who, together with those who started their work last year, make about fifty candidates for a certificate. Several from New York State, outside of Buffalo and others are from Pennsylvania, Wyoming, Ontario, China and Russia. Eleven are graduates—two of Peking, three of Smith, one each of Vassar, Syracuse, Mt. Holyoke, Buffalo, Minsk, Trinity—and others have had college work at Michigan, Pittsburgh, Carnegie, Elmira, Buffalo, Wyoming, Oberlin, William Smith, Charkov, Tulane.

NORTH DAKOTA

The outlook for good library legislation in North Dakota is bright. R. A. Nestos, the new governor, is the head of the Minot Public Library Board, an ex-president of the North Dakota Library Association, and a member of the County Library Law Committee of that Association; and Sveinbjorn Johnson, the successful candidate for the office of attorney-general, at one time was legislative reference librarian at Bismarck, and has always retained a deep interest in library affairs, being at present a member of the Grand Forks Public Library Board.

WASHINGTON

Seattle. The University of Washington Library School opened September 28th with a

registration of nineteen, the largest class, except one which has ever entered. Of these eight are graduate students. All but one (who comes from Oregon) are residents of the state of Washington. Registration has been probably curtailed somewhat by the excessive fees levied by the last State Legislature against students from outside the State, as there were many more than the usual number of inquiries from non-residents.

CALIFORNIA

Alameda. With a book stock of 54,047 volumes at the beginning of the library year on June 30, 1920, and augmented by 2,402 volumes, the Alameda Free Library in the past year circulated 172,480 books and registered an increase in circulation of 13,685 over the previous year. The staff numbered eight, and their salaries totaled \$8,622. \$4,117 was expended on books. The attendance at the West End Reading Room was 28,889. The practice of advertising the new accessions in the *Times-Star* proved popular with the reading public.

The county library of Monterey County is ranked among the most important educational agencies in the county by Arthur Walter, Superintendent of the Salinas City Schools and Chairman of the Monterey County Board of Education, in his report dealing with the school finances of Monterey County, published March 7, 1921.

SCRIBNER'S LIBRARY DEPARTMENT

Offers to all libraries, large or small,

- 1 Expert and efficient service, the result of years' experience.
- 2 The largest discounts on the books of all publishers.

Place your orders in our hands

They will be filled accurately as to title and edition, obscure and out-of-print books collected from all over the world, English titles imported duty-free, and all "shorts" reported on at time of shipment. Continuations will be forwarded without reminder, and out-of-stock and not-yet-published items supplied when procurable. All this without troubling you!

We relieve you of all detail and unnecessary expense

**What
I Can Do
With
My Hands
Books**
by
*Clara I.
Judson*

In a recent issue of the Official Organ, New York State Educational Dept. (Library Division) appeared the following: under caption, "*Recent Books Worth Buying*," Mary E. Eastwood, compiler, of "*Best Books*"

"SEWING WITHOUT MOTHER'S HELP;
by C. I. Judson. Nourse \$1.

Simple directions with diagrams for making practical garments for the child, and clothes for her doll. The economical devices for using scraps of material and half-worn clothing are suggestive. By following instructions a little girl, who knows how to handle her needle, can make the articles without further assistance."

COOKING WITHOUT MOTHER'S HELP

Beautiful illustrations

**A monthly magazine of exceptional
quality. Should be included in all lists for
both junior and adult reading rooms.**

*For free specimen copy
address*

THE OPEN ROAD

249 Boylston St., Boston 17, Mass.

In his opinion it is probable that no institution in the county gives such large returns in proportion to the cost, which amounted in 1920 to \$15,016, or nearly \$12,000 more than when the library was established in 1914. At that time it had eleven branches and 1,942 books, but in 1920 ninety-three branches and 31,976 books, and was serving approximately 541 borrowers as opposed to 6,805 in 1920. The expenses of the library as given do not include the salary of the county librarian, who is paid from the general salary fund, but includes the salaries of all the assistants and those of the branch librarians.

Riverside. The ten-weeks "winter school" of the Riverside Library Service School will begin on January 9th. The courses will be: Book-binding, W. Elmo Reavis, about forty-eight hours; Reference and documents, Lillian L. Dickson, about sixty hours; Cataloging and classification, Mary E. Hyde, twenty-five periods (about 100 hours); Book selection, 10 periods, and Loan Work (5 periods), Zulema Kostomlatzky; High school library, ten periods, and Periodicals, five periods, Alice M. Butterfield; Library administration, five periods, Theodore R. Brewitt; Business library, fifteen periods (about sixty hours), Louise B. Krause; Library law, lecturer to be announced.

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department. Replies should be addressed directly to the ADVERTISER, either at the address given or under the key letter in care of this office.

POSITIONS OFFERED

Wanted, a children's librarian for large Pennsylvania library. Must have a training school certificate and experience. Salary \$1590. Address C. P. 20, care of the LIBRARY JOURNAL.

Wanted, a chief of circulation with experience and one year library school training. Initial salary \$1600, maximum \$1800. Address: Henry N. Sanborn, Librarian, Public Library, Bridgeport, Connecticut.

Cataloger, with at least four years' training in college and library school and one year's experience in cataloging, may have an unusual opportunity for development in the Library of the College of the City of New York, 139th St. and Convent Ave., with good prospects of promotion to responsible charge of cataloging and classification. One interested or specialized in classification preferable. Initial salary \$1600, with \$100 yearly increase to \$2400. Age limits, 24 to 32 years.

POSITIONS WANTED

Position wanted in a library in New York city by a library school graduate, with fourteen years of practical experience. Cataloging preferred. Address J. K. 20, care of the LIBRARY JOURNAL.

College and library school graduate with several years experience in different kinds of libraries desires executive position. No restriction on place or kind of work. D. J. E., care of the LIBRARY JOURNAL.

Librarian with one year's training and fifteen years' experience—8 in public and 7 in industrial library work, would like to hear of an opening in public or special library. Address E. M. P. 18, care of the LIBRARY JOURNAL.

Assistant librarian would like to hear of similar position, preferably in New England. Has had all round library experience including administrative work. Address F. N. 20, care of the LIBRARY JOURNAL.

Young man, college and library school graduate, having college and public library experience, would like to find position as librarian of public, college or normal school. Address G. G. 20, care of the LIBRARY JOURNAL.

Expert linguist with experience in university library and university and library school training wishes position, preferably in reference or catalog department of college or large public library. Address John W. Rice, 361 Union St., Rockland, Mass.

Library school graduate with seven years' experience in scientific, technical and general reference work wants position in professional or commercial field in New York City or within commuting distance. Address E. N. 20, care of the LIBRARY JOURNAL.

Experienced cataloger with library school training wishes responsible position as head cataloger or work with Government documents. Language equipment Latin, Greek, French, German, Italian. College library preferred. Address X. Y. 20, care of the LIBRARY JOURNAL.

Yosemite and its High Sierra

By JOHN H. WILLIAMS, author of "The Mountain that Was 'God,'" "The Guardians of the Columbia," etc.

New Edition, revised and greatly enlarged. Imperial 8vo. (10 x 7 in.), 194 pages, with colored frontispiece, 4 maps, and 260 halftones.

EDITION DE LUXE, ooze leather, gilt top, boxed—\$5.00 net; express, 20 cents.

LIBRARY EDITION, in stout art crash, with color tip on front cover,—\$3.00 net; Ex., 20c.

"Much of the text has been rewritten, important matter added, and more than 50 new illustrations, with two new maps, included. . . . An artistic and superbly illustrated book, the first attempt to describe the Yosemite National Park in full with the aid of splendid illustrations."—*San Francisco Chronicle.*

"Nowhere in America is the story of glacial action written more legibly into mountain scenery than in the Sierra Nevada. And no other book has described and illustrated this colossal sculpturing of the California upland so clearly and abundantly as the new and enlarged 'Yosemite and its High Sierra.' The only volumes comparable with it are Mr. Williams' own books about the great mountains of the Northwest. . . . It should well find place in public, private and all school libraries."—*Sierra Educational News.*

"An admirable and artistic work."—*New York Sun.*

"GLUEY" PASTE

"Sticks Like a Brother"

"Gluey" is a light colored paste of super-strength made from the highest grade materials imported from Asia and Australia. It dries extremely fast, does not penetrate and because it adheres so tightly it is growing in favor among librarians. It is clean, efficient and economical.

ABINGDON

The True Gift of Value

AMONG the book-offerings of today, there are none of such consistent excellence as Abingdon. It is but natural then that people, who weigh value not by the dollar but rather by its capacity for giving happiness, should find in Abingdon Books the True Gift of Value.

THE OPINIONS OF JOHN CLEARFIELD

By Lynn Harold Hough

John Clearfield is a person of unusual intellectual virility, vivacity and vision. He is a magnetic center of true culture and one feels the uplift of his presence at once upon coming within the sphere of his influence. He has much to say about books, but there are many other items of interest and value upon which he renders "opinions" that are worthy of careful consideration.

Net, \$1.25, postpaid.

THE HOME OF THE ECHOES

By F. W. Boreham

The Australian preacher-essayist has again poured out the rich treasures of his mind and heart in this new book. His devotees—and they are more than can be numbered, and are found everywhere under the shining sun—will rejoice and be glad over this latest product of his genius.

Net, \$1.75, postpaid.

JOHN RUSKIN, PREACHER

And Other Essays

By Lewis H. Chrisman

In this book we have a presentation of Ruskin as an interpreter of the things of God. But there are ten other essays of breadth, beauty, virility, keen analysis and marked interpretive value in the book.

Net, \$1.25, postpaid.

SOCIAL REBUILDERS

Mendenhall Lectures, Seventh Series, DePauw University, 1921

By Charles Reynolds Brown

These five lectures by the dean of the Divinity School of Yale University are a study in reconstruction with certain ancient leaders of biblical history as the outstanding figures, and the present situation of the world, as an aftermath of the war, as the chief point of application.

Net, \$1.25, postpaid.

THE UNTRIED CIVILIZATION

By J. W. Frazer

This is a scholarly study of the principles of Christianity in their relation to the demands of modern civilization.

Net, \$1.00, postpaid.

THE MEANING OF EDUCATION

By James H. Snowden

A scholarly and valuable study of the psychology of education. Professor Snowden treats of the education of the individual as an entire unit: the education of the body, the intellect, the sensibilities, the will, the spirit, and admits into the range of his discussion matters that are segmental but cognate, and that complete the great circle of education.

Net, 75 cents, postpaid.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

SNEAD STANDARD STACK

This view shows section through stack floor, top and bottom of typical range, wide fixed bottom shelf, "over-sized" adjustable shelves, standard adjustable shelves, shelf label holders, hanging card frames, back stop and book supports.

The Snead Standard Stack equipment is the preferred equipment for both large and small libraries. Their adaptability to expansion, their unequalled compactness, and their scientific construction throughout insure perfect satisfaction and ultimate economy.

Detailed plans and descriptions of many notable library buildings are found in our publication "Library Planning, Bookstacks & Shelving," which will be sent free wherever it will be useful in the promotion of scientific construction.

THE LIBRARY JOURNAL

TWICE-A-MONTH

DECEMBER 1, 1921

Yiddish Literature

The A. L. A. Committee on Work with the Foreign Born is making a definite effort to bring together such information as will be helpful to librarians, and to make it available for the widest possible usefulness. The following group of articles on Yiddish literature is the first results of our work to be published. They will be followed at brief intervals by articles on other literatures and on methods of work with various immigrant groups. The second article, on library work with the Poles, will probably appear in the January 15th number of the LIBRARY JOURNAL.

David Pinski is probably the most distinguished Yiddish writer and we are very fortunate to be able to present an authoritative article from his pen. Jennie Meyrowitz is a member of the staff of the Rivington Street Branch of the New York Public Library. Miss Meyrowitz has compiled also a list of Yiddish books now available for purchase in this country. Librarians interested in this list or in other aspects of Yiddish work are invited to write to the Chairman of the Committee, Eleanor E. Ledbetter, at the Broadway Branch Library, Cleveland.

Modern Yiddish Literature

BY DAVID PINSKI

MODERN Yiddish literature is the youngest of all literatures, tho the people creating it is the oldest of all peoples. The man known as its founder died only recently and is affectionately called by all "Grandfather." Unique, indeed, is the progress it has made. The first essay on Yiddish literature, which appeared in a German-Jewish magazine in 1900, enumerates a scant dozen names of Jewish writers. By the year 1917 the list had grown to nearly two hundred.

The Yiddish language is quite old. It is a middle high German dialect whose beginnings go back to the distant obscurity of the Middle Ages, mixed mainly with Hebrew, to which have been added many Slavic and occasional English, French, and even Spanish words. Also as a written language it is ancient. An anthology of five hundred years of Yiddish poetry, recently published, contains poems written in Yiddish five hundred years ago.

But as a literary language, as a language in which literature is being created, the works of the written human word, which direct themselves to the soul and heart of man in artistic form æsthetic in tone and style, it made its debut in 1863, in a story by the "Grandfather," Sholom Jacob Abramowitz, who is better known under his *nom de plume* of Mendele Mocher Sphorim (Mendele the Bookseller).

For fully twenty years Mendele stood almost alone, childless. All that was written during that period was trashy and worthless. Just ten years after the appearance of the first book by Mendele the literary market began to be flooded with stories and novels by the father of the Yiddish dime novel, Nochum Mayer Shaikewitz, known under his pen name as Shomer. Not only did the Yiddish language during that period fail to grow to more beautiful forms and greater wealth, but it actually degenerated into complete formlessness and particular ugliness. But in 1883 Mordecai Spektor and the highly gifted Solomon Rabinowitz (Sholom Aleichem, whom efforts were made to impress upon the minds of the Americans by the nickname of the "Jewish Mark Twain") made their appearance. These two joined the "Grandfather" in the work of spinning the thread of Yiddish literature. These two also have to their credit the publications of almanacs which served as a center for the rallying of the best creative forces in Yiddish. But it was in the brilliant and highly cultured J. L. Perez, a man with wide horizons and great universality, that Yiddish literature won in 1891 a power which by its stimulating and inspiring effect raised it to its present level.

In its substance Yiddish literature is purely Jewish. It takes its themes from Jewish life, from the present as well as from Jewish history,

Jewish joys and Jewish sorrows, the joys and sorrows of the individual Jew as well as those of the people collectively. Rarely does a Jewish poet drift into a foreign life, and very few are those who have done so.

In its form Yiddish literature has during its short history passed thru the most varied schools, from the simplest naturalism to the most misty and hazy symbolism. The "Grandfather" began in 1863 as a chastising and moralizing preacher. Spektor and Sholom Aleichem succeeded him as realists, the former scant in colors, the latter very rich, but J. L. Perez alone represents several schools, several tendencies. He is realist, romanticist, symbolist, mysticist. His successors divided his heritage and took different courses. The only new trails opened since his advent are the historical drama and the historical sketch. Ancient Jewish history is the only field not touched by Perez as an artist.

The short story predominates in Yiddish literature. The "Grandfather" and his two disciples, Spektor and Sholom Aleichem, began their literary activities with longer stories and novels. But J. L. Perez had patience for the short story only, and those who have followed him have likewise failed to develop energy for larger works. But of late years the Yiddish novel has begun to come into its own. In Russia David Bergelson and Sholom Asch are its prominent progenitors; the novel of the latter, "Motke the Vagabond," has just appeared in English translation. In America we have David Ignatof and J. Oppatshu.

Yiddish literature is very rich in lyrics, rich in quantity as well as in quality. The number of poems received by an editor of a Yiddish publication is quite formidable. One might almost assume that all Jews are writing poems. But it is not an exaggeration to say that there are more than a score of high-grade talents, God-inspired poets. The non-Yiddish world heard first of Morris Rosenfeld, but he has long been outdistanced by many highly gifted poets.

Yiddish literature is poorest in its drama. In Russia, the motherland of the modern Yiddish literature, the Yiddish theater was forbidden by the Czar's régime. That, naturally, did not have the effect of encouraging the writing of dramas. Besides, Yiddish literature has developed under the influence of the Russian literature, which is more epic than dramatic. Russian literature attained its position among the literatures of the world by its great novels, not by its dramas.

It was in 1899, after a few years as a student in Berlin University, where I became closely acquainted with German literature, which is more dramatic than epic, that I escaped from the yoke of the novelette and took up the drama. Later

came Perez Hirschbein, who for a long time was exclusively a playwright; and also J. L. Perez and Sholom Asch soon applied themselves to the drama. In America, where the Yiddish theater was as free as any other and where the Yiddish stage offered great commercial opportunities, Jacob Gordin began his career as playwright in the middle of the '90s.

Geographically Yiddish literature is divided into two parts, the Russian and the American. But they are not as separate and distinct literatures as are the English and the American. They are one literature going thru one course of development. The American-Yiddish writers are without exception immigrants from Russia, Poland and Galicia. They take their themes and plots largely from their old homes. The lexicon of Yiddish literature, which was published in Warsaw in 1914, shows no distinction. We are closely bound with one aim and purpose: To stand among the literatures of the world independently and self-sustainingly as a distinct Jewish literature.

Present Day Yiddish Literature

By JENNIE MEYROWITZ

WITHIN the last decade, a new school of writers has arisen, the so-called "Young" group, so named after a periodical, *Jugend* (Youth), of which only the first three issues appeared. Those gathered around it were young writers who strove to break away from the old traditions of Yiddish literature. According to them, that literature had been too objective; it had given too little expression to the personality of the author and had suffered from a lack of intimacy between the author and his reader. It had also been too narrowly nationalistic. We are not only Jews, they argued, since we have absorbed much of the culture of the European nations among whom we dwelt for centuries; and it is not only the Jewish but also the non-Jewish world whose aspirations we voice. They strove to emancipate themselves from the proletarian tendencies of earlier Yiddish literature in America and made theirs a movement of art for art's sake. After the appearance of *Jugend*, this group crystallized and published larger almanacs, until with the publication of *Shriften* they began to exert a marked influence on Yiddish literature in Europe and America.

Of the writers of fiction, the following are most prominent. David Ignatoff, as editor of *Shriften*, is the representative of the group. In his first novel, the Whirlpool, the hero moves between dream life and reality to such an extent that the border line between the two is almost effaced. Tho his plans are thwarted by

the force of circumstances, he nevertheless reaches his goal in the land of dreams, the land of all lands. This philosophy of the "Land of Dreams" is the credo of David Ignatoff.

I. Raboi is noted for his love of the land that breathes thru his novels. In a rugged, primitive, almost biblical way, he writes about the farmers of the West and of New England. He also writes much and lovingly about animal life in which field he has no rival in Yiddish literature.

"J. Opatoshu," to quote the Cambridge History of American Literature, "is not a traditional Ghetto writer. He has been called the originator of the Yiddish historical novel."

M. Chaimovitch is an eloquent, fluent writer. His field is the psychological novel.

The "Young" school is strongly represented in poetry and has produced several highly talented writers, among whom Mani Leib ranks first. He is the most lyrical of the Yiddish poets of today and has brought the Yiddish language to its highest perfection.

Zisho Landau writes about subjects of everyday life but often chooses daring themes, as does also M. L. Halpern, whose power of language is remarkable. Others to be noted are Joseph Rolnik, the idyllic poet, and H. Leivik, poet-mystic, who is by some considered the foremost poet of the "Young" school.

Translations from foreign literatures have always made a strong appeal to the Yiddish reading public. Many of the standard works of fiction, drama, sociology, etc., have been translated. The Yiddish reader is very responsive to the best in foreign literatures as well as in his own, and therefore only the best should be offered him.

As far as book-making is concerned, the make-up of Yiddish books in America is far superior to anything that has been done in Europe in that respect. Practically all Yiddish books published here are issued in cloth covers, tho many of them may be had also in paper covered editions. The almanacs "Shriften" are illustrated by men of modernist tendencies and have set a new standard in the artistic make-up of Yiddish books.

Yiddish Papers and Periodicals

COMPILED BY JENNIE MEYROWITZ

THE Yiddish newspaper occupies a very important place in the life of the Jewish community. The majority of the readers of Yiddish do not read any other literature and as a consequence the Yiddish dailies, besides carrying the regular news and devoting much space to Jewish and international problems, print nov-

els, short stories, articles on popular science, literary criticism, etc. The aim of these newspapers is to give their readers a general education.

Library Publicity Material

By CARL H. MILAM

AT a meeting of the Chicago Library Club last winter several men and women, not librarians, talked about libraries. There were speakers representing various civic, welfare, and educational organizations, a preacher and the vice-president of a steel company. The Program Committee had wisely informed them that they were not being invited to say nice things about libraries; they were to make constructive criticisms.

It was something of a surprise to hear them, one after another, make just one point, namely, that libraries should advertise. Some called it publicity, some propaganda, some advertising, and various methods were suggested, but the theme was the same in each talk. All were impressed with the extent and usefulness of the library collections in Chicago—they had evidently looked up some statistics—but they were convinced that the men in the shops, the women and men in the offices and stores, the women in the homes, did not know what the libraries were prepared to do. And each speaker made it clear that in his opinion it was the business of the library, even of a reference library, to make itself known.

Most librarians present at that meeting seemed to agree with the speakers. Perhaps librarians everywhere now accept that point of view. At any rate much publicity material has recently been brought into being to meet the existing demands for it.

It is undoubtedly true that the best library publicity is that which is based on local news. And that cannot often be manufactured outside of the local community. Nevertheless there is a big opportunity for united effort. In nearly every progressive library community some placards, posters, book marks and reading lists are now to be found which were prepared and printed elsewhere, either as a commercial venture or by some library or other educational agency for the good of the cause. Where such things can be used to advantage it usually means a considerable saving in expense to the library and—what is more important—in the time of the library staff.

I have listed below some of the important items which are now available. Any librarian who wishes to promote the use of his library, or the distribution of good books generally, and any person who wishes to further library establishment and extension will find something here which he can use.

For prices and further information about the material mentioned write to the agencies named.

LIBRARY ESTABLISHMENT

See also County Libraries.

How to start a public library, by G. E. Wire. A. L. A. Ten pages of suggestions for anyone interested in starting a municipal public library movement.

Why do we need a public library? Material for a library campaign, by Chalmers Hadley. 49 p. A. L. A.

The place, the man and the book, by Sarah B. Askew, 22 p. H. W. Wilson Co. Interesting story about the usefulness of books.

Workshops for assembling business facts, by Dorsey W. Hyde, Jr. 24 p. A. L. A. Introduction by Herbert Hoover. Tells the why and how of special libraries in business. Written for business men.

Standard library organization and equipment for secondary schools of different sizes, by C. C. Certain. 58 p. A. L. A. A construction program of high school library development to be put into the hands of school authorities.

Libraries in education. A statement of school library standards, approved by the Library Department of the N. E. A. and by the A. L. A. Copies for distribution to school authorities can be obtained free of charge from Sherman Williams, chief of the School Libraries Division, New York State Education Department, Albany, N. Y., and president of the Library Department of the N. E. A.

Lantern slides on various phases of library work, suitable for use in illustrating a lecture or talk on the desirability of establishing a public library, can now be furnished by the A. L. A.

Photographs illustrating various phases of library work, suitable for illustrating newspaper or magazine articles, can be furnished by the A. L. A.

A few pictures are available also on business libraries and school libraries.

LIBRARY SUPPORT

Two scrap books have been prepared illustrating with clippings, and other publicity material, the campaigns that have recently been made in Evanston, Illinois, and Minneapolis, Minnesota, for better financial support. These scrap books will be lent on request.

COUNTY LIBRARIES

A County Library. A. L. A. A four-page illustrated leaflet, for distribution in any community where it is desired to create or stimulate interest in the establishment of a county library.

Book Wagons, the county library with rural book delivery. 8 p. A. L. A. This pamphlet also is for use as county library propaganda.

County library exhibit. A. L. A. Comprises fourteen panels, 20"x26" in size, attractively printed on heavy gray cover stock. Thirty photographs are mounted on the panels with appropriate captions. The exhibit was prepared for use at state and county fairs, conferences of social workers, teachers, librarians and church workers and at farmers' institutes, agricultural colleges and many other places. Many of the state library commissions now own sets of this exhibit and they will presumably be lent to libraries throughout the state.

Lantern slides on county library work. The A. L. A. now has a small number of slides on county library work to illustrate a talk on this subject.

Photographs illustrating county library work are avail-

able at A. L. A. Headquarters for use in illustrating newspaper or magazine articles.

CHILDREN'S READING AND CHILDREN'S LIBRARIES

An exhibit on children's reading. A. L. A. Ten placards 20"x26" in size, printed on heavy gray cover stock. Fourteen real photographs are mounted on the panels. For use at county fairs, conventions, club meetings, teachers' institutes and meetings in the library and elsewhere.

An exhibit on books and childhood. National Child Welfare Association, Inc., 70 Fifth Avenue, New York City. Ten colored posters on children's reading have been prepared. They will be found useful in many libraries. Some of the other posters for sale by this organization illustrate well known fairy tales. Many of them will have an appeal for children.

Children's books for Christmas presents. Compiled by Sarah C. N. Bogle. 16 p. A. L. A. A new buying list for parents and others who make gifts to children. For distribution by libraries, schools and bookstores. Includes about one hundred titles with prices and brief descriptive notes.

Book shelf for boys and girls, compiled by Clara W. Hunt, Ruth G. Hopkins, and Franklin K. Mathews. 48 p. R. R. Bowker Co. A reasonably long list for distribution by libraries, book stores, or schools.

Short reading lists for distribution to children, parents and teachers. H. W. Wilson Co., 958 University Ave., New York City. The following subjects:

Boy Scouts of America.

Eighty tales of valor and romance for boys and girls.

Fairy stories to tell and suggestions for the story teller.

Lists of stories and programs for story hours.

Seventy-five books of adventure for boys and girls.

Things I like to do: for boys and girls.

What shall we read now?

Book marks as follows: Chivalry tales, stories for girls (1), stories for girls (2), stories for boys (1), stories for boys (2), Brownies book mark (illus.), books for girls, books for boys, first and second grade, third grade, fourth grade, fifth grade, sixth grade, seventh grade, eighth grade. Democrat Printing Company, Madison, Wis.

Several of the large public libraries sell their brief lists to other libraries.

Book marks for children's library publicity. Gaylord Brothers.

Posters and placards. Gaylord Brothers and Democrat Printing Co.

Lantern slides, illustrating children's library work. A. L. A.

Photographs of children's library work for use in illustrating magazine and newspaper articles. A. L. A.

Children's book week publicity material. The very best of children's book and library publicity is that furnished by the Children's Book Week Committee, 334 Fifth Avenue, New York City.

It includes a beautiful poster, plans for a Thomas Bailey Aldrich bookshelf, suggestions for observing Children's Book Week, etc.

RECRUITING FOR LIBRARY SERVICE

A placard reading: "After college what—Have you considered library work? If interested, talk with the librarian." A. L. A. Free.

Books and a vocation. An eight page pamphlet about library work and the facilities for library training. Distributed by the A. L. A. free of charge.

Library work an opportunity for college women, by June R. Donnelly. 8 p. Distributed by the A. L. A. free of charge.

The above material is especially suited for use in colleges and universities.

The library schools issue announcements which can be obtained for anyone interested in library training.

READING LISTS

See also Children's Reading.

The United States, by Theresa W. Elmendorf. 20 p. A. L. A. A short reading list of popular books on American history, government ideals and literature, descriptions of the country and special regions, American resources, opportunities and occupations, lives of some interesting Americans, some fifty titles of historical and characteristic fiction.

The new voter. 8 p. A. L. A. A reading list of forty or fifty titles. For distribution to those men and women who have only recently begun to vote and to young men and women who will soon exercise the privilege of voting for the first time.

Book marks listing selected titles on the following subjects:

Southern stories, Humorous books, Historical novels, Tales of mystery, Western stories, Some good novels, Tales of adventure. The U. S. and the war, Books on Evolution, Better babies, Our Flag. Democrat Printing Company.

MISCELLANEOUS PUBLICITY MATERIAL

McCutcheon cartoon poster by John T. McCutcheon of the Chicago *Tribune*. A. L. A. Caption:

Buried treasures in public libraries.

Why are some folks all puffed up because a great man has spoken a few words to them?

When they can go into the nearest Public Library and enjoy by the hour the finest thoughts of the greatest men who have ever lived.

Size 13½"x20½". For use in shops, clubs, store windows, schools, libraries and elsewhere.

McCutcheon cartoon book mark. A. L. A. Same as poster, except 2½"x5½" in size. For distribution with local correspondence, at meetings, thru high schools and colleges and in books as they circulate.

Library posters. Gaylord Brothers. This firm now has for sale a large number of placards or posters covering various phases of library service and suitable for use in all sorts of places, outside as well as inside the library.

Lantern slides. Gaylord Brothers. Slides can be furnished to duplicate all of the library publicity posters.

Bookmarks for library publicity. Gaylord Brothers. Posters. Democrat Printing Co.

Don't be a quitter; a little story from life for life by S. H. Ranck. 4 p. H. W. Wilson Co. A bit of inspirational literature, suitable for distribution to students leaving school.

Photographs on library activities. A. L. A. Gradually a collection of photographs covering various phases of library work is being assembled at A. L. A. Headquarters. Any pictures in the files will be lent to any library for use in illustrating library articles in magazines and newspapers, or for other publicity.

Lantern slides. A. L. A. Only a few subjects have been covered. Others are being added as opportunity offers.

Material for newspaper and magazine articles. A. L. A. Headquarters can furnish this in a very limited way, but requests are welcome and every effort will be made to meet the needs of the person who makes the request.

Lantern slides illustrating some library publicity methods are being assembled at A. L. A. Headquarters with the thought that they may be useful at meetings of librarians.

Gleanings from Experience in Business Librarianship

By NANCY VAUGHN

IN speaking about business libraries and particularly about "aids" for the business librarian, I would say first that I have been in special library work for five years and can positively state that the first and greatest aid to all business librarians is the public library. I do not see how any business library could get along without the public library, the Library Bureau and the *Publishers' Weekly*. In my own library work the cart has been before the horse, as I had several years experience before I had any real library training; and I felt very strongly that a business librarian should have all the training possible. Training alone, however, is not enough, unless one can adapt one's self to any and all circumstances, for, generally speaking, business men want what they want at once and they want it done in their own way without being told even by a "trained librarian" how it should be done. One of the very first things a business librarian has to learn is that men want results, not excuses—no matter how much time or effort the results mean on your part.

It seems to me now that the best background for the business librarian is: All the education possible, thoro library training, some business training, if possible, and several years in either the science and industry or the sociology departments of a large public library, where one learns the quickest way to get information and is brought constantly in touch with keen men. Personally I love public library work—even if I did have a question like this asked over the telephone the first night I was alone at the desk, with several patrons awaiting attention: "What makes a motorcycle kick out on one cylinder and cut out on two with the throttle open?"

And the flattering part was that the man expected me to know at once; tho he naïvely said he had searched in vain thru all the motorcycle books.

When I was offered charge of the Erie Railroad Library in New York City I knew nothing more about library work than that my sister was a children's librarian and I lived across the street from Mr. Dana. He very kindly allowed me to spend a little time in the Business Branch of the Newark Library and both he and Miss Ball were very helpful with suggestions for books for first purchase. As I had several friends who were bookmen I had been brought up on the *Publishers' Weekly*; but the *Reader's*

Guide, the *Industrial Arts Index* and government publications were unknown to me.

For the Erie Railroad Library, we were given a large room in the Hudson Terminal Building and a free hand to build up a library for use of the officials and employees of the Erie Railroad. The room was beautifully furnished with green velvet carpet and mahogany desk, tables and chairs, with shelves all around the walls and a large magazine rack. I had a trained librarian help me for a month ordering and getting the books ready for the shelves, and then started in with far less trepidation than I would now at a similar undertaking. I should hate to remember how I bothered both the Library Bureau and the New York Public Library, if it were not that I am always glad to recall how patient and how very helpful they both were to me. The nicest thing about our profession is the co-operative spirit that exists within it. Mr. Hicks told us in one of his lectures that it is the only profession where there are no secrets, and I can testify that I have always found everyone not only willing but eager to pour out knowledge.

Our Erie library started in with three hundred novels from the Newark "List of One Thousand Novels," a really good engineering collection and for encyclopedias we were rich with both the International and the Britannica. We had yearbooks, dictionaries, atlases, a full set of Baedeker, about a hundred books of general interest and, of course, a good selection of railroad books. Among other books we had Bartlett's Concordance to Shakespeare, Stevenson's Home Book of Verse and the Bible; and you would be surprised how much they were all used. In the five years I was with the Erie Railroad and the Metropolitan Life Insurance Company, I am sure that not a day passed without a call for the Bible. We subscribed to about fifty magazines which were in constant circulation. The Erie has about six thousand employees in the Hudson Terminal Buildings and we gradually worked up a circulation of about thirty-five hundred books a month. The library was open half an hour before and half an hour after office hours and at noon the rush was similar to that described by Miss Warren as seen at the Sears, Roebuck Library in Chicago. After this noon rush it took hours to put the books away. While we did not begin to do the work we could have done had I been a truly "trained librarian," I like to tell about my little library for I had the real pleasure of planning

*Talk given before Pasadena Library Club, February 13, 1921.

and developing it and of seeing it grow. One of my thrilling moments came when the President of the Erie Railroad (and you may be sure that all business librarians look up to their presidents with great awe) sent his secretary down to find out the location of a small town in France—of course he wanted the information immediately. It seemed a simple request, but after looking thru Rand-McNally, Harmsworth and the Baedekers, I began to feel a trifle panicky. I called up the Information Desk of the New York Public Library. (The secretary was waiting all the time). But it could find no record of the town. Then I called the Western Union with no better result. Finally I remembered the French Cable Office and they were able to tell me that it was one of the new base hospitals of the American Army—too new then to be known. The whole thing took perhaps thirty minutes, tho it seemed hours, but it was a keen satisfaction to be able to furnish the information. It is a dreadful thing to fail your President!

Our books were very simply taken care of. We had no cataloging except author, title and subject, and I did not know the meaning of an analytic. Library work makes you realize how little you really know and leads you to want to know more, so in about a year I went to Columbia University at night and took a course in Library Economy. Later when their librarian went abroad to do canteen work, the Metropolitan Life Insurance Company offered me charge of their library, which was about twelve years old and occupies large quarters on the fifth floor of the Metropolitan Life Insurance Building. Here they have about thirty thousand books and pamphlets and a staff of sixteen, and have created a fine special library—tho they do no advertising. They borrow from both the New York Public Library and the Russell Sage Foundation; but only books not in their own collection. The library is really two libraries in one: the general library which contains fiction, a good collection in natural science and useful arts, all kinds of material on housing and hygiene, books of general interest, a good selection of reference books and a number of magazines—all very much like one of the large branches of a public library; and the insurance division, which is kept thoroly up-to-date and contains state reports, all journals pertaining to insurance, and vital statistics from all countries. The collection on social insurance is very complete, and tho largely in pamphlet form is in practically every language. A special classification has been adapted for this from Dewey's 368's, which divides the subject into its great divisions of Accident, Health, Invalidity, Unemployment, etc., and further provides for regional distinc-

tion. Pamphlets which are too small to stand well on the shelves and are not worthy of present binding are kept in vertical files or in dust-proof boxes, in their regular order, and both pamphlets and books are cataloged. The library is used by general employees, all officials, and is vital to the Statistical Bureau. Its staff tries to see that all officials and departments are notified regarding information which will be of interest to them or pertinent to their work, and to discover all the information available thru books, pamphlets, reports, magazines, society journals, newspapers and forthcoming government reports. One of the greatest advantages is the closeness of the librarian in charge to the vice-president and his willingness to co-operate in every way, and the thoroly delightful freedom from all red tape. The expenses of the library are watched closely and all bills are checked first by the librarian and then by the vice-president; statistics are kept and an annual report made up, but there is no library budget.

Lists carefully checked are the monthly lists of government and state publications, P. S. King's list from London and publisher's lists, and magazines and society publications are examined. The great problem is to keep moving the stream of material that comes in and to see that it is recorded briefly and passed on immediately to those interested without waiting to have it cataloged. Sometimes it is easier to start this stream than it is to keep track of it. Very few business men realize the importance of a single copy of a magazine, tho they all want complete files.

Besides the splendid work of the library, the Metropolitan now issues a *Monthly Digest*. This *Digest* has an editor, and, while entirely separate from the library, is of great help to it, as it is compiled from current literature on insurance, health, industrial problems, finance and miscellaneous topics. All the publications and books referred to are received by the Metropolitan library. In this way the busy officials are kept in touch with what is being published.

Bullock's, one of the largest department stores of Los Angeles, felt the need of centralizing all their magazines and engaged me as librarian. The "library" merely consisted of a small deposit from the Los Angeles Public Library and a desk in Bullock's Research Office, and was really a clipping bureau. All the trade journals were carefully marked for clipping and the articles of interest were routed. The Research Office is part of the Retail Research Association, a co-operative association of non-competitive stores in different cities, with headquarters in New York City. The New York

office and foreign offices are constantly issuing reports which have to be circulated thru the store and then filed for future reference. Very few of the clippings are kept after being circulated, for their value lies in their timeliness. It is tremendously important to get hold of a rumor of a drop in denim, for instance, before the event, but of no value after the drop. Important articles were marked in Babson's *Reports*, the *Financial Chronicle*, *Dun's Review*, and the *Journal of Commerce*. Bank reports were carefully read and each week a Commodity and Market Report was made out which was stencilled and circulated thruout the store. It is very interesting work, but after my assistant was thoroly trained I felt the need of some public library experience, which I believe is the best background.

The Metropolitan Life Insurance Library now occupies large quarters on the fifth floor and has a staff of sixteen. The collection is very much larger, having grown to 37,491 volumes. The daily average circulation is 476 with a registration of 3,400. In addition to the special collections already mentioned there has been added all reports and information obtainable of welfare work in industry of various companies in the United States, including their house organs. The library has an efficient organization and all the material is cataloged the same day it is received and before it is routed.

The library not only serves the employes for recreational and educational purposes but cooperates with all the various departments of the company. The reference work has grown steadily and offers great opportunities for development. It would take much time and space to tell of the splendid growth of the library but, after visiting many special libraries all over the country, I am convinced that our Metropolitan Life Insurance Company Library ranks among the first and I am very glad to be back as assistant librarian in charge of the reference work. [At the time of writing this paper Mrs. Vaughn was in the Science and Industry Department of the Los Angeles Public Library. Her return to the Metropolitan Life Insurance Library has already been reported. Ed. L. J.]

"My thesis . . . is this, that the American Library Association, that the library profession generally, will go no farther and no faster and to no greater ultimate goal than the general convictions, the general enthusiasm and the general backing of the library profession carry them. . . ."—AZARIAH SMITH ROOT, *President of the A. L. A.*

Children's Book Exhibits at Pittsburgh

THE Carnegie Library of Pittsburgh held an interesting exhibit of children's books during October, which attracted unusual attention. This was a display of illustrated books, ranging in time from 1600 to 1921. Beginning with a collection of fables from the press of Christopher Plantin and ending with "Howard Pyle's Book of Pirates," recently published, there were examples of early wood-cuts, the hand-colored pictures of the first toy-books, "elegant" copper-plate and steel engravings, lithographs, halftones and modern color-plates. Tho the greater number of books were of English or American origin, France, Italy, Germany and other countries were represented and all the principal illustrators for children from the time of Thomas Bewick to the present.

The famous "Orbis Pictus" of Comenius, generally known as the child's first picture-book, was shown in an English edition of 1777 with a copy of James Greenwood's "London Vocabulary" of 1749, while a New England primer bound in modern covers occupied an honored place. The quaintness of the chap-books, the simplicity and charm of the early toy-books caused many a grown person to linger long over the cases in which they were displayed and several people becoming interested in the collection brought in treasured volumes of their own to be added to the exhibit.

Seventy of the books were loaned for the occasion by Mr. Wilbur Macey Stone of New York, others were loaned by the Carnegie Library School and these were supplemented by a representative selection from the Library of more recent books to show modern developments in illustration.

The annual Christmas exhibit of children's books opened November 14. This includes old favorites in attractive editions and also the new books which the Library is recommending as gifts for boys and girls.

The September number of the *North Carolina Library Bulletin* contains a check list of North Carolina publications compiled by Mary Thornton of the University of North Carolina Library, and checked in the departments of Raleigh by Mrs. Frank Nash of the Library Commission. "It was not possible to compile a complete list. The variety and nomenclature in other departments has made uniformity difficult. Repetition of department addresses occurs so as to make it quite clear where the various publications can be secured."

The Fordney Tariff Bill Reactionary

THE Fordney Tariff measure, which passed the House quickly several months ago, still lies before the Senate Committee on Finance, with hearings not yet begun and little prospect of passage before spring. There has thus been time abundant to examine it. How retrogressive are its book sections may be gathered from the following considerations:

1. Its authors propose to lay an impost of twenty per cent on the immigrant's library, if exceeding \$250 in value. For precedent, we must go back beyond August 10, 1790. On that date the American Congress, in its second tariff enactment, declared the immigrant's books and other household effects free of duty, and so they have remained to this day. Not till 1921 had any statesman arisen to dispute the wisdom of not penalizing the entry of a family that owned a library.

2. The proposal, further, is to exact similar tribute from libraries in cases where they import more than two copies of a work. The like of this has not been seen in the United States for over a century. It was on April 27, 1816 that we lifted the duty from books, maps, charts, etc. "specially imported by order and for the use of any society incorporated for philosophical or literary purposes, or for the encouragement of the fine arts, or by order and for the use of any seminary of learning." In fact it was not till 1872 that any limit was placed even on the number of copies that could be imported in any one *invoice*. Never till now has a maximum been set.

3. If the Bill passes, the individual will pay duty on all his foreign books, no matter what the date or language. That he has not had to do for fifty-one years. The Act of July 14, 1870, removed books as much as twenty years old from the dutiable class. By the Act of October 1, 1890, this free list was swelled by the addition of books in languages other than English regardless of date, thus leaving only the English books of twenty years subject to duty. So they have remained unbroken.

4. "Textbooks used in schools and other educational institutions" vanish from the section that holds them in the Act of October 3, 1913.

5. Replacing the invoice as rendered with an arbitrary American valuation is, of course, revolutionary, but the times, too, are unmatched. So there may be two opinions as to the wisdom of this feature. Its serious effect on book prices, however, is not open to question, applied, as it would be, to all imported books.

6. Since 1890 four general tariff measures have been enacted—equally divided between the two parties. But in the matter of book importation there has hardly been a shadow of partizan division. Democrats and Republicans have vied with each other in liberalizing the law on this score. If McKinley freed the rest of foreign language books and made like provision for the blind, W. L. Wilson countered by adding hydrographic charts, learned society publications to subscribers, government documents, gratis private copies, and even "scientific books and periodicals devoted to original scientific research" (an item that disappears in subsequent Acts, however). Dingley advances by including in the free list the "exchanges by scientific and literary associations or academics," while Underwood answers with an expansion of the free blind schedule, the addition of textbooks, and lowering the book duty, when assessed, to fifteen per cent from the twenty-five per cent that had obtained ever since July 30, 1864.

Thus the pending measure seeks to reverse the liberal tendencies steadily operative in America for the last fifty years, and in some respects flies in the face of almost our whole history as a nation. It is inconceivable that the attempt will succeed.

Meanwhile the A. L. A. memorial lies in Washington stirring like yeast, for it has been endorsed by the American Association for the Advancement of Science, American Association of University Professors, American Chemical Society, American Economic Association, American Historical Association, American Philological Association, American Physical Society, American Political Science Association, Association of American Colleges, Association of American Universities, Association of Urban Universities, College Art Association of America, Geological Society of America, Modern Language Association of America, National Education Association, and scores of university and college presidents. A hearing is being arranged in conjunction with the American Council on Education. If there be librarians who have not addressed their home Senators, let them read that statement in the LIBRARY JOURNAL for September 15, and *Public Libraries* for October, and act without delay. Protest cannot be heaped too high.

M. LLEWELLYN RANEY, *Chairman*

PURD B. WRIGHT

A. L. A. Committee on Book Buying.

The University of Illinois Library School

By FRANCES SIMPSON, Assistant Director

IN point of age the University of Illinois Library School ranks fourth, having been preceded by the New York State School at Albany, that of Pratt Institute in Brooklyn, and that of Drexel Institute (now discontinued) in Philadelphia. Like the School at Albany, the Illinois School, tho born in one environment, has grown up in a different one. In 1893, when Armour Institute was established in Chicago by the late Philip D. Armour, provision was made from the very first for instruction in librarianship, and the Department of Library Science was organized with twelve students and with Katharine L. Sharp as director of the courses and librarian of Armour Institute.

Early in the history of the School the director felt the need of a broader academic connection and of a better and more thoro preparation for its students as well as a more generous equipment and support than the authorities at Armour Institute felt justified in providing. Consequently, when, in 1897 communications came almost simultaneously from the University of Wisconsin and the University of Illinois, offering a home to the young Library School, they were welcomed by the director. The decision was finally made in favor of Illinois, largely because of a library building, just erected, which would provide ample and suitable accommodations for the School, an offer which Wisconsin at that time was unable to make, tho the Illinois offer of an administrative and staff connection to the director and faculty also undoubtedly carried weight. In September, 1897, consequently, with the good will of Armour Institute, the Library School moved part of its faculty, its students and its technical equipment to the University of Illinois.

No record of the early history of the Illinois School would be quite complete which did not include a grateful recognition of the help always cordially and generously given by the director and staff of the Library School to the pioneer school in the Central West.

At the outset the entrance requirements had been set at high school graduation plus a competitive entrance examination; but upon removal to the University, the completion of two years of college work was made the basis of admission and the entrance examination was discontinued. In 1903, the formal entrance requirements were raised to three years of college work and in 1911 to four years, or the possession of a Bachelor's Degree in Arts or Science. The course of study, at first covering but one year, was early felt to be inadequate and was lengthened in 1895 to two

years, the first two-year class graduating in 1896. After the connection with the University of Illinois was established, the course remained a two-year one, and to those who have completed it, the University has granted the degree of Bachelor of Library Science (B. L. S.).

This is not the place for discussing in detail matters of the curriculum; suffice it to state that the work of the first year (the junior year) has been basic, giving fundamental principles and practices, but offering no opportunity for electives or specialization. So far as preparation for library work is concerned, it may, in general, be regarded as comparable to the work of most of the one-year library schools, tho the individual courses are probably not identical with those of any other school. The work in the second or senior year, on the other hand, is partly historical, and includes advanced courses in some of the junior subjects. It has emphasized reference, including courses in federal, state and foreign documents; it offers some chance for electives, and owing to the School's connection with the University departments and departmental libraries, it affords opportunities for specialization along several lines, such as commerce, education, agriculture and chemistry. Opportunity has been given in several cases, in connection with the library economy seminar, to pursue investigations along various lines of research under the direction of the School faculty. A compilation of war work accomplished by Illinois libraries and librarians, a bibliographical study of the rubber industry, a selection of several hundred books and magazine articles in general science for use by high school students are some of the subjects chosen recently by individual students.

During the twenty-eight years of its existence, the School has registered six hundred and ninety-four students in the courses of the regular academic year (not including those registered in the summer sessions) six hundred and fifty-seven of whom are still living; of this number, three hundred and six have completed the two years' curriculum and received the degree of Bachelor of Library Science. Approximately four hundred are now engaged in professional work in various parts of the country. Almost every state in the Union has furnished its quota of students, and has received in return library workers from the School. Three hundred are members of the American Library Association.

In 1911, yielding to demands from the libraries of Illinois, the School began its first summer session, giving elementary instruction for six

weeks to persons already holding library positions or under appointment. For these courses, which in no way duplicate the work of the School during the academic year, two hundred and forty-two students have registered.

In 1919, the University offered eight weeks' summer courses in library training to college graduates who could meet the entrance requirements for the regular courses in the Library School. Courses given in this eight weeks' session are chosen from the curriculum of the junior year and receive full academic credit. Fifty-six students have registered in the three eight weeks' sessions, nineteen of whom have returned to the School for work in the regular academic year. Ten have been registered for more than one summer session. Attendance for two consecutive summers enables a student to complete one-half of a year's work in the Library School.

The faculty of the School has increased from a director, one teaching assistant and clerical help of the Armour Institute days to a staff of a director, an assistant director, four instructors and a reviser, most of whom give all of their time to the work of the School. Since its foundation, Illinois has had two directors, Katharine L. Sharp, 1893-1907, and P. L. Windsor, 1909 to the present time; the late Albert S. Wilson filled the office of acting-director from 1907 to 1909.

Slightly more than half of the alumni and former students of the School are filling positions in libraries connected with educational institutions, the connection of the School with a large university and the possibility of using the University Library as a laboratory affording a reasonable explanation of the fact; about one-third are working in public libraries. A large majority are in the Mississippi Valley and Pacific states, with a goodly number in New York City. The School has frequently been asked to recommend instructors for other library schools and at present graduates are filling faculty positions in six schools.

With the rest of the University, the Library School has shared the benefits of access to a library of over four hundred and fifty thousand volumes, having eleven well organized branches, and administered by a staff of fifty trained and experienced workers. This forms an excellent laboratory for practise and must be regarded as an essential part of the School's equipment.

The graduates and former students of the University of Illinois Library School have formed an alumni association which has been of service in many ways. One of the most practical of these has been the establishment of a loan fund to aid students. This fund now

amounts to over nine hundred dollars and has been in constant use since it was voted in 1913. The alumni have also subscribed as individuals toward a memorial of Katharine L. Sharp. This has taken the form of a bronze portrait tablet in low relief designed and executed by Lorado Taft, which will be presented to the University in the near future.

The A. L. A. to the "Unnamed Soldier"

THE A. L. A. was invited by the War Department to send a delegation of five to represent it at the ceremonies at Washington in honor of the "Unknown Soldier." President Root and Secretary Milam, unable themselves to attend, arranged for representation by certain librarians conveniently at Washington, headed by James I. Wyer, as former Chairman of the A. L. A. War Service Committee.

The delegation thus consisted of James I. Wyer, Herbert Putnam, H. H. B. Meyer (representing the Executive Board), George F. Bowerman and L. L. Dickerson.

The first ceremony was in the rotunda of the Capitol on the morning of November 10th, where in the name of the A. L. A. the delegation formally deposited a floral wreath bearing the following inscription:

The American Library Association
to
The Unnamed Soldier:
in reverent tribute
from those who gave something
to those who gave
All
and, Mortal, in that very Gift
Found Immortality.

"They are not dead, who die
In a great cause . . . Their Spirit
Walks abroad—conducts
The world at last to freedom."

The second participation was in the formal procession on the morning of November 11th from the Capitol to Arlington, and in the ceremonies attending the interment, perhaps the most dignified, the most appropriate, and the most solemn ever held on any occasion in this country.

H. H. B. MEYER.

Emily Van Dorn Miller, librarian U. S. Marine Hospital No. 14, New Orleans, La., represented the A. L. A. at the meeting of the American Country Life Association in New Orleans on November 10-12. Leaflets about county libraries were distributed and an exhibit on county libraries was displayed in the St. Charles Hotel.

Books Popular in September and October

F ICTION titles most in demand in the public libraries in September and October, according to Frank Parker Stockbridge's statistics prepared for the *Bookman*, were:

September:

Fiction:

Main Street. Sinclair Lewis. Harcourt.
The Brimming Cup. Dorothy Canfield. Harcourt.
Alice Adams. Booth Tarkington. Doubleday.
Galusha the Magnificent. Joseph C. Lincoln. Appleton.
Her Father's Daughter. Gene Stratton-Porter. Doubleday.
Growth of the Soil. Knut Hamsun. Knopf.

Titles in general literature most in demand were:

The Outline of History. H. G. Wells. Macmillan.
Queen Victoria. Lytton Strachey. Harcourt.
Margot Asquith. An Autobiography. Margot Asquith. Doran.
The Mirrors of Downing Street. Anonymous. Putnam.
The Mirrors of Washington. Anonymous. Putnam.
Mystic Isles of the South Seas. Frederick O'Brien. Century.

October:

Fiction:

Main Street. Sinclair Lewis. Harcourt.
The Brimming Cup. Dorothy Canfield. Harcourt.
Her Father's Daughter. Gene Stratton-Porter. Doubleday.
Helen of the Old House. Harold Bell Wright. Appleton.
The Flaming Forest. James Oliver Curwood. Cosmopolitan.
Alice Adams. Booth Tarkington. Doubleday.

General literature:

Outline of History. H. G. Wells. Macmillan.
Queen Victoria. Lytton Strachey. Harcourt.
Mirrors of Washington. Anonymous. Putnam.
Americanization of Edward Bok. Edward Bok. Scribner.
The Mirrors of Downing Street. Anonymous. Putnam.
Mystic Isles of the South Seas. Frederick O'Brien. Century.

Best sellers in fiction during September as reported by fifty-eight booksellers in forty-seven cities for the November *Books of the Month* were:

Her Father's Daughter. Gene Stratton Porter. Doubleday.
Helen of the Old House. Harold Bell Wright. Appleton.
The Flaming Forest. James Oliver Curwood. Cosmopolitan.
Main Street. Sinclair Lewis. Harcourt.
The Master of Man. Hall Caine. Lippincott.
If Winter Comes. A. S. M. Hutchinson. Little.

Best sellers in general literature were:

Mirrors of Washington. Anonymous. Putnam.
Queen Victoria. Lytton Strachey. Harcourt.
The Outline of History. H. G. Wells. Macmillan.
The Mirrors of Downing Street. Anonymous. Putnam.
The Glass of Fashion. Anonymous. Putnam.

The Americanization of Edward Bok. Edward Bok. Scribner.

October best sellers in fiction according to one hundred and one booksellers in seventy-five cities were:

The Pride of Palomar. Peter B. Kyne. Cosmopolitan.
Her Father's Daughter. Gene Stratton Porter. Doubleday.

Helen of the Old House. Harold Bell Wright. Appleton.

If Winter Comes. A. S. M. Hutchinson. Little.

The Sheik. E. M. Hull. Small.

The Obstacle Race. Ethel M. Dell. Putnam.

And in general literature:

Mirrors of Washington. Anonymous. Putnam.

The Outline of History. H. G. Wells. Macmillan.

Queen Victoria. Lytton Strachey. Harcourt.

Mirrors of Downing Street. Anonymous. Putnam.

The Americanization of Edward Bok. Edward Bok. Scribner.

The Glass of Fashion. Anonymous. Putnam.

Anthology and Bibliography of Niagara Falls

A NTHOLOGY and Bibliography of Niagara Falls, by Charles Mason Dow. 2 v., 1423 pp. The State of New York, Albany, 1921.

This unusual and most attractive compilation justifies thoroly its accurate and descriptive title.

In a dozen chapters, it notes with full and careful bibliographic detail, and in chronological order, every scrap of literature, great and small, that its industrious compiler could discover relating to Niagara Falls. It begins, of course, with the periods of French and English discovery and is especially full and interesting in its liberal excerpts from the journals of these pioneers and of those travelers who became so numerous, and frequently so voluminous, after the American Revolution. Then passing on thru the flora, the fauna, the geology, etc., of the Falls, with more than one hundred pages on the latest and most unattractive industrial exploitation, we come at last to chapters on music, poetry, fiction, maps, pictures, guidebooks, etc. The liberal quotations are selected with judgment and brief notes are made as to the personality of authors. The volumes are illustrated with more than forty full-page reproductions of early and notable prints, and four maps, excellent ones, add to their value. The whole forms a most attractive reading and reference compilation.

At the end of the second volume, covering one hundred and fifty pages, is an alphabetical list of all authors, articles, poems, etc., cited thruout. This offers the more formal, but of course far less interesting, bibliography as contrasted with the preceding predominating anthology. The captious or the careful may easily discover technical irregularities and oddities of entry and description.

The catalog of almost any large library will certainly reveal items of more or less importance that have been overlooked. For example, Vachel Lindsay's striking poem "Niagara" does not appear, nor is there any single entry describing the notable series of Reports of the New York State Niagara Reservation Commissioners. Albert H. Porter's "Historical Sketch of Niagara from 1678 to 1780" is missing, altho there are items noted by the same author. A thirty-six page quarto illustrated booklet by Moses Foster Sweetser, 1893, is omitted, altho many far less important items are noted. All this, however, is inevitable, and detracts very little from the value and not at all from the interest of the books. In these days he who attempts a complete bibliography is sure to fall short. Any apparent criticism which these observations may suggest is more than counter-balanced by the gratitude which all will feel for this impressive and presumably definitive compilation by a former commissioner of the State Reservation at Niagara who thru many years gave liberally of his own time and money not only to the physical welfare of the Falls and their park but to the quieter but perhaps no less important work which has resulted in the present volumes.

An edition of 5,500 copies has been printed by the State of New York, 3,000 of these, by legislative resolution, have been delivered to the New York State Library for disposition. They will be distributed free to all public and college libraries in the state and to a selected list of such libraries without the State as are in equivalent exchange relations with the State Library. To other libraries and to individuals the volumes are offered for sale at \$2.50 per set.

JAMES I. WYER, *Director.*

New York State Library.

The Bookman's Manual

The Bookman's Manual, by Bessie Graham. New York: R. R. Bowker Co., 1921.

I have used the Manual ever since the material appeared in *Publishers' Weekly*. It seems to me quite as valuable for librarians as for booksellers. The entries are extremely well selected and the annotations interesting as well as informative. I know no other work that covers as much ground in such concise and workable form. We have a copy for reference use at the Circulation Desk and the assistants refer to it constantly in their work with the public. They find its greatest use in answering the question "What is the best" biography of Gladstone or History of France or compendium of philosophy? It is also invaluable for suggestive reading for club programs.

I think it should be part of the equipment of every information desk.

JESSIE SARGEANT MCNIECE,
Chief of Circulation.

St. Louis Public Library.

Why not World War?

"European War," we librarians call the recent great struggle; "World War," says everyone else. European War, 1914-1919, or just European War, 1914, is the heading on our catalog cards; "European War" the caption in our indexes and bibliographies. The war of course was European when it began in 1914, but was to use our catalog phraseology, continued as World War.

The U. S. War Department, it seems, was undecided whether to designate the conflict as Great War or World War. On November 18, 1920, the War Department made public an official order declaring that the war against the Central Powers of Europe should hereafter be designated in all official communications and publications as "World War." The Public Affairs Information Service for 1920 tells us this under the heading "European War—Terminology." It, however, disregards this bit of information to the extent of not giving a "See" reference from "World War" to "European War." The *New York Times Index* October-December, 1920, uses both "World War Veterans" and "European War Veterans." Somehow it is easier to call the war European than "the boys" European War Veterans. I have at hand the *July Monthly Catalogue of U. S. Public Documents*, and I expected that it, at least, would adhere to "World War." (Last year's *Monthly Catalogue* used "Great War.") But no, italicized under War Department is the caption "Records of World War." It seems that we are irrevocably committed to "European War." Will not "Records of World War" listed under "European War, 1914," cause more such remarks as the one instanced at the A. L. A. by Dr. Louise Fargo Brown, "Catalogers' minds don't work the way ours do?"

Why don't we change to World War?

SADIE ALISON MAXWELL.

*College of Business Administration Library,
Boston University.*

The "Party Room" is the latest development at the Homestead (Pa.) Public Library. This is a room which young people whose homes are inadequate for entertaining may engage for an evening. With the room are given facilities for serving refreshments, a piano, and a chaperon. The plan has already become quite popular.

THE LIBRARY JOURNAL

TWICE-A-MONTH

DECEMBER 1, 1921

THE mid-winter meetings at Chicago will present a positive attraction this year, in addition to the program, because they will be held in the new Hotel Sherman on the north side instead of the overcrowded and difficult hostelry previously utilized. Besides the usual meetings of the cognate organizations, the Council will hold three meetings, two of them for discussion of problems of organization, and the third, involving a general discussion of the important question of certification, in which Dr. Williamson will represent the proponents. An error in a recent editorial note on this subject which referred to the Wisconsin certification scheme as already in operation, should be corrected, as the law altho passed in 1921 does not become operative until January 1, 1923. It is well that the problems incident to this feature of standardization should have such thoro discussion as is implied in scheduling it on the Council program.

★ ★ ★ ★ ★ ★ ★

THE solemn ceremonies in honor of the unnamed soldier, symbolizing the heroic sacrifices of the World War, were worthily participated in thru the A. L. A. committee provided for by President Root. The War Department had requested the appointment of a delegation of five only, duly "robust" for the march to Arlington and return. It was accordingly made up of the Librarian of Congress, the chairman of the A. L. A. War Service Committee, a representative of the Executive Board in Mr. Meyer, Washington's librarian, and the advisory librarian of the War Department. It was regretted that the limitation to five prevented the inclusion of the representative of the Navy Department and representatives of the women who did the larger share of the actual A. L. A. work abroad, especially as Miss Barnett, vice-president of the A. L. A., and Miss Caroline Webster were both in Washington. After the A. L. A. delegation there came similar delegations from the other organizations in the Seven Sisters of Service, but these were extended by the men and women who donned their uniforms and "fell in" without invitation. This explanation is made because the smallness of the A. L. A. delegation and the absence of women from

it may otherwise be misunderstood. On the day previous, while the body lay in state in the Capitol, Dr. Putnam, for the delegation, laid a wreath with a fitting inscription on the casket, reading it quietly as the two lines of those who filed by in honor of the dead passed silently on either side. The presence of representatives of the Seven Sisters of Service on both occasions made a worthy finale to their work in the war.

★ ★ ★ ★ ★ ★ ★

THE after war work of the A. L. A. abroad has been rounded up by the dispatch, completed by Mr. Hopper just before Thanksgiving, of \$1,000 worth of new books for the boys on the Rhine, in accordance with the appropriation by the Executive Board and Finance Committee. It is interesting evidence of the value of books as the best means of recreation during the unoccupied leisure of the boys who no longer have the inspiration of war duty to keep them in line, that so loud a call was voiced for their supply as an antidote to the temptations which beset men who have more time than they know what to do with. These conditions are to be found, also, in the standing army which remains for domestic service, as well as in the Navy, and it is gratifying that both the War and Navy Departments have fully appreciated this and that the initiative of the A. L. A. during wartime will thus have its effect thru the succeeding years of peace.

★ ★ ★ ★ ★ ★ ★

THE rise of special libraries in this country is interestingly illustrated in Mrs. Vaughn's paper, instancing the development of the great insurance library of the Metropolitan Life Insurance Company in New York, to which she has now returned. The contrast between the beginnings which she knew and the great library which has again enlisted her more experienced service is indeed remarkable. The most notable of previous insurance collections was that of Cornelius Welford, a leading book collector as well as insurance authority in England, editor of the insurance cyclopedia, who housed his collection in his London mansion. In his library rooms he permitted neither gas nor electric

lighting, but one evening he went to his library for some special book and started a fire, which, however, was easily quenched. His library was sold to the Equitable Life Assurance Society in New York and went up in flames when that building was destroyed—a curious incident in the history of an insurance library. The Metro-

politan collection is now only one of several important insurance libraries, and the insurance libraries are an example in their special field of what is going on all over the country in making special libraries a part of the necessary apparatus of business development in all important fields.

LIBRARY ORGANIZATIONS

MID-WINTER MEETINGS

Chicago, December 29, 30, 31, 1921

THE Mid-Winter Meetings will be held at the Hotel Sherman, Chicago, December 29, 30 and 31.

There will be

Two executive sessions and one open session of the A. L. A. Council

Two or more meetings of the Executive Board
A meeting of the Editorial Committee

A meeting of the Committee on Education

Two meetings of the League of Library Commissions (one of them open to non-members)

A meeting of the Bibliographical Society of America

And informal round table conferences of

University librarians

College librarians

Normal school librarians

At the meetings of the A. L. A. Council questions which involve the policies of the Association will be presented in the form of committee reports, accompanied by resolutions embodying the judgment of the committee. These the Council will be asked to consider and adopt or reject. So far as possible the resolutions proposed by the committees will be submitted to the members of the Council in advance of the meeting. Because of the seriousness of the business which is to come before the Council at the Mid-Winter sessions the President of the Association is urging a full attendance.

The tentative programs follow. Additions or corrections will appear in our December 15th number.

A. L. A. COUNCIL

First session (*For Council Members*) Thursday, December 29, 10 a. m.

10-10:20. Affiliation of State Associations. Other business.

10:30-12:30. Subject: Library Revenues. Definite proposals will be submitted by S. H. Ranck, chairman of the Committee on Library Revenues. Discussion lead by Hiller C. Wellman.

Second Session (*For Council Members*)

Thursday, December 29, 2:30 p. m.

2:30-3:00. Council business.

3:00-5:00. Subject: Function of A. L. A. Committees. Recommendations will be submitted by Carl B. Roden, chairman of the Committee on Committees.

Third Session (*Open to all A. L. A. Members*), Friday, December 30, 10:00 a. m.

10:00-11:30. Subject: Certification. Recommendations will be submitted by Dr. C. C. Williamson, chairman of the Committee on National Certification. Discussion opened by Paul M. Paine.

11:30-12:30. Subject: Copyright Legislation. Discussion opened by M. Llewellyn Raney, chairman of the Committee on Book Buying, and Frederic G. Melcher, secretary of the National Association of Book Publishers.

BIBLIOGRAPHICAL SOCIETY OF AMERICA

Friday, December 30, 8 p. m.

Frederic Ives Carpenter, trustee of the Newberry Library, will speak on the photographic reproduction of rare books and manuscripts.

Pierce Butler, custodian of the John M. Wing Foundation, Newberry Library, will speak on the Typographical Library, the scope of its collection, its anticipated activity of the future and some of its acquisitions.

John C. Bay, of the John Crerar Library, will speak on rare and fine imprints of Chicago.

(George B. Utley, of the Newberry Library, Chicago, is making arrangements for this meeting.)

COLLEGE LIBRARIANS OF THE MIDDLE WEST

Friday, December 30, 2:30 p. m.

Topics for discussion:

A talk on the College Library from the standpoint of the President, by some representative of the Association of American Colleges.

Building up of a college library outside of the immediate book needs of the instructor.

How can the college library management help to stimulate research work on the part of the student?

Relation of the college librarian to the college faculty.

How to make best use of pamphlets.

Apportionment of the Book Fund among departments.

First editions in a college library.

Library deposit system to cover fines.

Use of student help.

Exchange of periodicals and magazines.

How to avoid loss of books and yet allow access to the stacks.

Creation of a desire for reading among college students.

Saturday, December 31, 10:00 a. m.

Joint Session with the University Librarians.

(Chairman, Ada M. Nelson, Knox College Library, Galesburg, Ill.)

A. L. A. COMMITTEE ON EDUCATION

Saturday, December 31, 2:30 p. m.

Harriet Wood of St. Paul, chairman of the Committee, is arranging an informal meeting. Members or other representatives of state education committees are invited to attend.

One of the Normal School Librarians sessions will be a joint session with this committee.

LEAGUE OF LIBRARY COMMISSIONS

Friday, Dec. 30, 2:30 p. m. (*Open Meeting.*)

School and public library co-operation as exemplified in Minnesota.

Annual reports of officers and committees.

Saturday, December 31, 10:00 a. m.

(*For commission workers and officials only*)

Transaction of business of annual meeting.

Informal discussion of problems of commission workers.

(President, William R. Watson, New York State Education Department, Albany, N. Y.)

NORMAL SCHOOL LIBRARIANS

Friday, December 30, 2:30 p. m.

Conference with State Supervisors of School Libraries.

School Libraries and School Success, by O. S. Rice, Supervisor of School Libraries of Wisconsin.

Fitting Library Service to School Needs, by Della Frances Northey, School Library Organizer, Indiana Public Library Commission.

The Pennsylvania Program for School Libraries, by Adeline B. Zachert, Director of School Libraries of Pennsylvania.

Saturday, December 31, 10:00 a. m.

Subject: Children's Literature and Library Science.

Standards in Children's Literature, by Charles M. Curry, professor of literature, Indiana State

Normal School, and chairman of the Indiana Education Commission.

Maximum Results and Minimum Instruction, by Mrs. Winifred L. Davis, University of Wisconsin Library School.

The Normal School Library and Children's Reading, by Bertha Hatch, librarian-teacher, Cleveland School of Education.

Round table discussion.

(Chairman, Arthur C. Cunningham, Indiana State Normal School, Terre Haute, Ind.)

UNIVERSITY LIBRARIANS

Saturday, December 31, 10:00 a. m.

Joint Session with College Librarians.

Experiences in book-buying in Europe, by William Warner Bishop.

Messages from Book-Buying Committee.

Report from Committee on Co-operative Cataloging.

After the war atlases.

Saturday, December 31, 2:30 p. m.

(*For librarians and members of the staffs of University libraries.*)

Pamphlets and the vertical file.

Care of maps, prints, pictures and slides—by library or department interested?

Arrangement, classification and cataloging of government documents.

Reserve book collections.

What shall be included in the annual report?

College catalogs—their preservation and service.

(Chairman of Committee on Arrangements, T. W. Koch, Northwestern University Library, Evanston, Ill.)

VERMONT LIBRARY ASSOCIATION

THE joint meeting of the Vermont Library Association and the Free Public Library Commission was held at Ludlow October 19-20.

The following program was given on Thursday: Business meeting, "Local Vermont History in Hemenway's 'Gazetteer,'" by Caroline Royce; "Present Day Problems in Book Selection," by Florence Robinson; "What Makes the Juvenile Book Bad or Mediocre?" by Iva Young; "Library Publicity," by Joseph Wheeler; memorial service for Elizabeth Hills; "The Collection, Handling and Use of Local Historical Material in a Small Library," by Harold G. Rugg; "The Library; the Community's Opportunity," by Jasper Wright; informal discussion of Vermont poets, introduced by Fanny Fletcher; "Studies in Contemporary Poetry," by Grace Hazard Conkling.

On Wednesday evening a banquet was given by the business men of Ludlow to the visiting librarians.

JULIA CARTER, *Secretary.*

ILLINOIS LIBRARY ASSOCIATION

COLLEGE AND REFERENCE TOPICS

A COLLEGE and Reference Round Table was held at the Illinois State Library Association meeting at Urbana and had an attendance of over one hundred who evinced a lively interest in the subjects discussed.

THE MAKING OF A DICTIONARY

In a talk on "The making of a dictionary," Amanda Flattery, of the University of Illinois Library, narrated her experience as a definer on the editorial staff of the Standard Dictionary. The equipment of each definer and the difficulties encountered in the work were discussed. The work was traced thru the successive stages of defining, reviewing, attaching quotations and editing. Facsimiles of galley proofs and page proofs were exhibited. The purpose of the talk was to give an insight into the mechanical details of dictionary making. Side lights revealed the fact that even so serious and prosaic a task as making a dictionary may abound in humorous situations.

CURRENT INFORMATION REFERENCE FILE

Alice S. Johnson, reference librarian, University of Illinois, speaking on the use of an information or reference file in the reference room said that such a file of pamphlets and clippings facilitated finding on short notice information difficult to locate in books and too recent to be indexed in the *Readers' Guide* and other indexes. In the University of Illinois library a selection is made for the reference file from the pamphlets currently received by the Gift and Exchange department. The *New York Times* is also clipped for whatever may be useful, including speeches by prominent men, documents and articles on topics which the students may select for argumentative themes or debates. After the subject headings are written on the margins of these clippings and pamphlets they are put into manila folders, with the subjects printed or written on the tabs and filed alphabetically in legal cap size vertical files. As a rule the *Readers' Guide* is followed in deciding on the form of subject heading because it indexes the same sort of material. A typed alphabetical list of all the subject headings in the file with spaces for additions, has proved to be of much assistance in arranging the material.

UNIVERSITY RENTAL COLLECTIONS

In the absence of J. C. M. Hanson, Mr. Frederick W. Schenck presented certain facts in regard to collections in college and university libraries. The rental of books by the University of Chicago Libraries originated about 1911 when the Classical Department purchased six Greek and six Latin dictionaries at a cost of

seven dollars a copy and rented them to students in Greek and Latin courses for seventy-cents per quarter.

During the last ten years the system of so-called reserved books, by which as many as twenty copies of a book were placed on reserve, has been many times expanded. The experiment of purchasing several sets of a selected list of books required for two courses in English literature, and renting a set for a small fee to one or more students for the quarter was tried during the autumn quarter, 1913. "The object was twofold; first, to provide the student with his required reading so that it might be done under the best possible conditions, and, second, to reduce the demand for these books from the reserve book desk." These sets were not accessioned, classified or cataloged. They were placed in boxes and the student renting paid the fee and gave a receipt for the set. The demand for rental books has spread until the departments of Biblical Literature, Commerce and Administration, Economics, History, Political Science, Romance and Sociology are also represented in this collection. In 1915-1916 there were in all 104 sets or libraries which were available for rental. In 1916-17 the total number of sets loaned were: Summer quarter 49, autumn quarter 65; winter quarter 73; spring quarter 58; total 245. In 1917-1918 these sets were rented to students in the Correspondence Department for the first time. During the present quarter there are available nine hundred and fifty-seven sets for thirty-seven courses. The number of single volumes loaned by the day (three cents rental per day) is steadily increasing.

Books are now rented in three different ways.

(a) A set of books including all those required for the course is loaned for the quarter. (b) A number of the most important books, or even single volumes, are loaned for the quarter. (c) Single volumes are loaned by the day.

The basis for the fee for the rental of the first sets was one-eighth of the cost price of the sets; this has been raised to one-fifth of the cost price. The collection is not intended to make a profit; and no overhead expenses are figured. All that is expected is that in time the sets will pay for themselves. The fund available is a loan from the general fund of the University, and is not charged against the library book budget. The cost of the books purchased is debited to the loan fund and the fees collected are credited to the fund.

The advantages of the Rental System are: The demand on the library to supply required reading in large classes is to some extent relieved; the library is not required to purchase

many duplicates which might later be discarded; the student is more likely to do his required reading.

Mr. Schenk's account of the rental collection plan to university library patrons led Mr. Roden to hope that the same expedient might serve to relieve somewhat the difficult situation confronting the Chicago Public Library with reference to students of the so-called University College. The latter comprises a series of courses given by members of the University of Chicago faculty in downtown quarters in the evening or late in the afternoon. They are largely attended by public school teachers and others, and are admirable and much appreciated. The various instructors supply the Library with lists of their required readings. The Library assembles as many of the titles as it is able to spare—usually but one copy of each; sometimes none at all—and these are kept together for the duration of the respective courses. They can be used only in the reading room, this provision being by way of trying to serve as many readers as possible with the books available. Obviously this plan serves but a small portion of possible readers and these at the expense of convenience and time in restricting the use of the books to the Library. Mr. Roden thought that it would be very interesting to adapt the university rental plan to the needs of these students in the downtown classes. The Public Library has for years conducted a supplementary rental collection of current popular books, both fiction and non-fiction, with great success and public approbation, and it would seem quite feasible to include such books as above mentioned. At any rate, the experiment will be made.

INTER-LIBRARY LOAN

Continuing, Mr. Roden said that a reference problem in urgent need of solution is that of the so-called 'inter-library loan'. A clear definition of this term, and a general acceptance of such a definition would be most timely. At present some of our smaller library neighbors appear to entertain the idea that 'inter-library loan' covers all requests for material desired by local patrons and not available in local collections. Few large libraries are in a position to spare the time and help for the service asked of them, and it would seem proper for the State Library Association to formulate something in the way of a definition, setting out the limits of the accommodation reasonably to be expected, as well as the limits of reasonable requests, which should govern and might be invoked in these very one-sided transactions. It is pleasant to be looked to for help in time of trouble by one's neighbors, but, after all, no municipal public library has any legal right whatever to send

its books out of the city, or to transfer their custody to a similar institution elsewhere. Only an emergency of particular stress could serve to give even the color of justification to such a procedure, and this very strict and illiberal construction of the term 'inter-library loan' should at least be borne in mind, even if it is not always closely observed.

THEODORE W. KOCH.

WISCONSIN LIBRARY ASSOCIATION

THE thirtieth annual meeting of the Wisconsin Library Association was held in the lecture room of the Milwaukee Public Library October 10 to 12.

The address of welcome was delivered by Matthew S. Dudgeon of the Library, who, emphasized the democracy of the modern public library, more democratic and accessible than our schools, "more democratic than democracy" itself.

Gladys May Andrews in her presidential address discussed the increasing complexity of library problems and the function of the association as a forum for their discussion. Deploring the "paltry" membership of two hundred and twenty-seven after thirty years of activity, she recommended a membership committee with a slogan of five hundred members, fuller co-operation with other associations, including joint state meetings, biennial elections, co-operation with the A. L. A., and a representative of the Association in A. L. A. conferences.

Carl H. Milam, secretary of the A. L. A., described work of that association and said that it is ready and willing to render valuable aid to libraries in their publicity programs. He acknowledged the common public indifference to the proper support of libraries. Schools, good roads, and other forms of public service have established themselves in accepted programs of enlargement; there is no reason why libraries should not do the same. The library can best be advertised to the public by good service. Poor service does endless harm.

Frederic G. Melcher described the progress already made in extending the influence of the Children's Book Week movement among churches, clubs, parent-teacher associations, etc. Mr. Melcher spoke again in the evening on the library work of the American Committee for Devastated France which was illustrated by moving pictures. The place being made in the popular mind for the "bibliothèques populaires" was strongly emphasized. In the evening, also, Carl Sandburg discussed the new poetry, and entertained the audience with extensive readings from his own works and with examples of

American balladry sung to the accompaniment of the guitar. He described the new poetry as not a movement, but a phenomenon. Various in form, the non-metrical, rhythmic form prevails, altho this form is no newer than the Old Testament. Poets today, as always, are realists or romanticists. Mr. Sandburg believes that the future opera of America will be built upon the folk music that now exists, or is in process of formation, such as negro melodies, cowboy songs, gutter-songs, etc.

RECRUITING FOR LIBRARIANSHIP

Mary E. Hazeltine followed with an address on recruiting for librarianship, in which she said that the appeal of the work of the librarian should be made clear to prospective recruits. Librarianship has an established place as a profession: national headquarters, association literature, library schools, a variety of professional tasks, specialized work, opportunities for promotion, and no fear of unemployment. Recruiting may be unconscious, thru advice, explanation and belief, or conscious, thru direct encouragement and persuasion. For years the demand for trained librarians has exceeded the supply. During the last fiscal year the Wisconsin Library School received two hundred and ninety-eight requests for trained people, whereas the school has a total of only three hundred and forty-five graduates in actual service. The school can accommodate thirty-five students each year, but the actual attendance since the establishment of the school has averaged twelve each year. Miss Hazeltine suggested the possibility of each of Wisconsin's seventy-one counties sending one student every two years, or of each of the forty-one cities of five thousand or more population sending one student each year.

LEGISLATION

The Thursday morning session was opened by Clarence B. Lester with a discussion of progress in library legislation, reporting that practically everything which had been proposed two years ago has now been accomplished. The County Library bill was passed at the last session with practically no opposition. Changes made in the original draft of the bill were noted as follows: (1) Provision for the exemption from county tax, of local units so desiring; (2) necessary costs to be charged back from the county to the local unit served; (3) provision for the five-member board; (4) extension of the general principle of representation on board of units served by the central system. Some parts of the county library law, as now existing, are in the nature of mere inclusion of the county with other local units, in special provisions.

A system already established in a county may be turned over to administration under the new county library law.

The Library Commission asked for changes in the Revision Bill to eliminate inconsistencies, and to harmonize the various acts and simplify the statement of the law as a whole. The function of the revisor has, however, been extended to cover the inclusion in the law of actual practice in effect generally among libraries in the state. Recognition has been given to the practice of levying money from general funds by special appropriation. An effort has been made to clear up the confusion prevailing in the organization of library boards.

Provision was also made for the substitution of schedules for the vouchers, in submitting bills for audit.

CERTIFICATION

Mary A. Smith, in speaking of the certification law, introduced in January and passed in June, took occasion to condemn the A. L. A. certification plan as "snobbish, undemocratic, and impractical," whereas "the Wisconsin plan is based on actual qualifications for entrance into library service," and has a good sound working basis. Cities of the first class are exempted from its provisions, as Milwaukee's Civil Service Commission opposed the act.

BOOKS AND READING

May Masee, editor of the *Booklist*, discussed some of the year's new books, including "Queen Victoria," "The New World of Islam," "The Manhood of Humanity," "New Voices," "The Bookman's Manual," "Three Soldiers," "To Let" and "Liliom."

Peter Wolter considered "Some Price Problems," emphasizing the primary fact that manufacturing costs keep up book prices. Paper and binding materials have declined somewhat in price, but printers are not willing to submit to reductions and binders usually follow the lead of the printers. While all costs have more than doubled since 1914, publishers' prices have not as a rule increased to any such extent. Publishers are laboring under great difficulties; there is need of a larger volume of business, and librarians are urged to help by getting more readers.

Professor C. R. Rounds spoke entertainingly on Wisconsin authors, more than one hundred and fifty of whom have attained notable positions in the field of literature. He urged the cultivation of pride in the "family tradition" of authorship, and the help of librarians in bringing to light the literary history of Wisconsin, and in stimulating present day literary activity.

THE BOOK WAGON

In the afternoon Ida Faye Wright of Evanston gave an account of her book wagon experiences. The peculiar geographical and social situation of Evanston, with no east to west transportation lines, called for more than ordinary methods to furnish library service to the factory workers in the western section of the city. Hence the book wagon. Eleven hundred dollars was raised by popular subscription to inaugurate the work.

The library has benefited by the development away from the "institutional" idea and the creation of a democratic and sociable atmosphere, and this "locomotive branch" is economical as compared with regular branch service.

Sylvanus J. Carter spoke briefly on pensions for librarians, characterizing the prevailing type of pension plan as unsound and based on false principles. Latest authorities were cited to show what is the modern and approved actuarial method of establishing retirement systems.

On Wednesday morning the groups meeting for the discussion of administrative problems and for the school libraries section were combined for a joint session, when Harriet Long spoke on "The Library and the Study Club." The relations between the two have always been intimate; in fact, libraries have sometimes grown out of study clubs. Librarians should keep in closest touch with clubs, by helping to make up programs and by furnishing material. Systematic programs should be recommended to the clubs rather than miscellaneous topics. The commission and traveling libraries should be used in furnishing material, and the requests should come thru the local library, as the material will be sent thru this agency in any case.

COUNTY LIBRARIES

Julia W. Merrill discussed progress in county library work in Wisconsin. Milwaukee and Antigo are the only counties having established county library systems. The matter has been brought before many county library boards and agitation started for the project, with varying success in the following counties: Brown, Taylor, Portage, Jackson, Rusk, Winnebago, La Crosse, Eau Claire, Rock, Marinette, Iowa, Shawano, Lincoln, Merrill, and Wausau. Marinette county is planning for a county book automobile. Iowa County has had valuable assistance from the Red Cross in its campaign.

The chief difficulties met with in attempting to introduce county libraries are that the large size of county boards makes them unwieldy and difficult to convince; the good roads movement absorbs their interest and funds to the exclusion of books; confusion exists in the minds of members between the old county traveling library system and the new plan. There is fear

that the city is going to get something from the county without making adequate return.

The discussion that followed showed that at least twenty cities give free library service to their respective counties. It was suggested that free service might be desirable to stimulate a desire for library service, so that when the county system question is brought before the county board the people will know the meaning of the movement and support it. Jealousy between rival cities in the same county was mentioned as a factor in forcing free library service in case one city offered it.

DUPLICATE PAY COLLECTIONS

Leila Janes discussed "Books 'Never in.'" The remedy, of course, is duplication of copies, but the question arises as to how far libraries should go in purchasing duplicates. The practice in Fond du Lac is to buy a second copy when there are three reserves in for a book, and to continue for each additional three until five, or in certain cases ten, copies have been added. One copy is always kept for the regular shelf and is not held on reserve. When there is much demand for a book after this duplication still more copies are added, for people want their new books directly and not even small libraries can wait long for a book to be approved before buying. Miss Smith gave an account of her "Renting Collection Annex," composed of expensive non-fiction books in great demand. Thirty weeks are allowed for a renting collection book to pay for itself, the cost price is divided by thirty, and the renting fee charged accordingly. This may be fifteen or fifty cents. The new collection is advertised in the newspapers, and within twenty-four hours not a book remains on the shelf, showing the willingness of the public to pay.

The Historical Society library has the greatest number of requests for genealogies, and it has been necessary to rule that genealogical books may not be sent out, as it badly cripples the service to do so, but the library gives to those requesting them the service of a trained genealogist.

WORK WITH SCHOOLS

The Racine system of reaching children thru the schools was described by Miss Caton.

The librarian makes personal visits to the schools at least twice a year, explaining what a library is, telling stories in the lower grades, and telling upper grades the extent of the library, its support by the city and its use to pupils and others. Another visit is made in the spring to each class to talk of books and stimulate reading. There has been no difficulty in giving these talks in the parochial schools.

Annie Nunns spoke on the University and its

lending problems. Complete co-operation between Madison libraries enables the University to give especially efficient lending service. Requests are referred to the library that can best fill them.

Lucy Thatcher spoke on the function of the normal school librarian, and Mr. Rice on teaching library work in schools. This instruction should be made definite, not incidental. The teacher librarians now being fitted for this work will be most efficient in giving children this necessary training.

TRUSTEES' SECTION

The program of the Trustees' Section was opened by William Pieplow, president of the Board of Trustees of the Milwaukee Public Library, and chairman of the section. C. B. Lester spoke on "The Budget," saying that a fair average percentage value of the four principal items of a budget would be: Salaries, forty-five per cent; books, periodicals and binding, twenty-five per cent; general operation, twenty-five per cent; maintenance and permanent improvements, five per cent. Mrs. A. P. Lovejoy discussed vacations, and Mary Shinnick made a detailed report of the "by-laws" as in effect in the library of Watertown. William J. Anderson, in presenting the subject of salaries, said that he did not believe it to be the function of the library trustee to guard the public treasury. There are properly constituted officials for that purpose. It is rather the trustee's business to promote the service of the library, and with this in view he will not seek to drive a hard bargain with library employees. He distinguished between a purely industrial or financial organization and an institution of the professional character of the library, and believed that professional services should be recognized and paid for. Speaking for the city of Madison, he told of considerable advances in library salaries and indicated that further increases were probable.

Officers were elected for the coming year as follows: President, Matthew S. Dudgeon, Milwaukee; vice-president, Jessie W. Bingham, Rhinelander; treasurer, Florence C. Day, Appleton; secretary, Vivian C. Little, Watertown.

SYLVESTER J. CARTER, *Secretary*.

KANSAS LIBRARY ASSOCIATION

THE twentieth annual meeting of the Kansas Library Association was held at Hutchinson October 17-20, with the largest attendance of librarians and trustees in the history of the K. L. A., there being one hundred registered and eighty-four present. The program was interesting and inspiring and the hospitality of Hutchinson much enjoyed and appreciated.

On Monday evening at the Public Library, President Mary C. Lee of Manhattan, presiding,

a word of welcome was given by the president of the Hutchinson Library Board, Mrs. F. D. Wolcott, to which Miss Lee responded. The address of the evening was delivered by Chancellor E. H. Lindley of Kansas University, his subject being "Wealth."

On Tuesday morning the report of the Committee on Legislation was given by W. H. Kerr, chairman. On suggestion of Mr. Kerr, Judge Freeman moved that a committee of five be appointed to plan the work of the Association in initiating the county library law thruout the state. Mr. Heffefinger moved to amend that the committee be made three instead of five and that the committee not only make the plan but carry it out. The committee appointed was W. H. Kerr, chairman, Minnie J. Grinstead, and J. B. Heffefinger. A committee was also appointed to make suggestions to the state codification committee on amalgamation of library interests in the state. Committee, Grace Derby, Judge Ruppenthal and Mr. Bigger. Much appreciation was expressed of the work of the committee on legislation in getting passed at the 1921 session of the legislature the county library law and the increase in library tax for cities of the second and third class.

Nora Daniel led an interesting discussion on "County Libraries—the Next Step in Kansas."

Julius Lucht spoke on "Raising the Standard of Librarianship." He said that librarians should have standards as do doctors and lawyers, and he presented a tentative plan outlined by Maud Shore by which librarians might obtain first, second or third class certificates. So strong was Mr. Lucht's appeal that Mr. Kerr moved that a committee of five be appointed to bring in a report at the next K. L. A. meeting giving a standard of certification of librarianship in Kansas, for consideration and adoption.

At noon a luncheon was given in the Tea Room, at which the librarians were divided into groups and held round-table discussions on their special lines. In the afternoon Minnie J. Grinstead of Liberal spoke in an interesting manner on the "Influence of the Public Library in the Community." J. B. Heffefinger gave an informing talk on "Apportioning the Budget," saying that from forty-four to fifty-four per cent of the library income should be spent for salaries and from twelve to sixteen per cent for books. At four-thirty an automobile ride was enjoyed thru the courtesy of the Hutchinson Library Board. In the evening an address on "The Renaissance of Reading" was given by Frederic G. Melcher. Following the address Mr. Melcher showed a motion picture film of the work of the American Committee for Devastated France in establishing libraries.

On Wednesday morning the president, Miss Lee, gave an address full of helpful suggestions and outlined a definite program for the proper functioning of the Association. She suggested revision of the constitution, a standing publicity committee, a permanent committee on the appraisal of subscription books, the organization of a Kansas Library Commission, and an exchange of librarians for several months or a year. Mr. Kerr moved that a committee of three be appointed on revision of the constitution with Miss Lee as chairman. The motion was carried, and the names of Delia Brown and Clara Francis were added.

For the committee on the Kansas List of Children's Books, Miss Burgess, Wichita, chairman, reported, and a copy of the list of books selected by the committee was handed to each person present. Mr. Lucht read a very interesting report on District Meetings. Four one-day sessions had been held with a total registration of 115. The meetings proved a success in every way. Affiliation with the A. L. A. was explained by Mr. Manchester, who moved that the K. L. A. apply to the A. L. A. to become a chapter according to the new plan of membership. Mr. Kerr reported for the committee on Appraisal of Subscription Books, and said that it would be a good thing if every library board passed a law forbidding their purchase.

The afternoon program was devoted to books and reading. Miriam Clay read an excellent paper on "Selection of Books for Children." This was followed by an address on "Religious Books in the Public Library," by Rev. Seward Baker, of Hutchinson. Mrs. McCaughey spoke briefly on "Encouraging Children's Reading" and Miss Romig told what they had done and what they were planning to do for Children's Book Week in Abilene. Mr. Lucht moved to accept the invitation of St. Joseph, Mo., to meet in joint session with Missouri, Iowa and Nebraska for the next meeting in 1922. In the evening the K. L. A. enjoyed a banquet and dance at the County Club given by the Hutchinson Public Library Board.

Dora Kershner spoke on Thursday morning on how to care for and mend books. Florence Cass read a paper on "The Librarian's Own Reading." Mrs. Cass believed that every librarian should belong to some study club and take part in the program. Delia Brown of Salina was then given a short time for her question box, which brought out many problems of librarians.

Resolutions were passed thanking Chancellor Lindley, Mr. Melcher, Mrs. Grinstead, and all others who contributed to the rendering of a most successful program.

The Association gratefully acknowledged the work done by the committees on publicity and legislation, by whose untiring efforts the County Library Law became an accomplished fact, and recorded its recognition and full appreciation of what the Traveling Libraries Commission has meant to the K. L. A.

The nomination committee reported the following nominations: President, Willis H. Kerr; vice-president, Delia Brown; secretary, Mable Parks; treasurer, Odella Nation; member-at-large, Lida Romig.

ROBERTA T. MCKOWAN, *Secretary*.

NEBRASKA LIBRARY ASSOCIATION

THE twenty-seventh annual meeting of the Nebraska Library Association was held in Grand Island, October 13-17, with a good attendance from all parts of the state, including trustees as well as librarians.

Some progress has been made in the direction of county libraries, altho none have been organized at the present time. Jessie Glass, librarian of the Lincoln High School, reported that the publicity committee appointed at the last meeting, had sent letters to all the county superintendents in the state, in an effort to arouse interest in county libraries. Only a small percentage responded, and lack of funds prevented a further effort.

Anna V. Jennings, librarian at the Kearney Normal School, reported that a list of books for elementary schools, particularly selected for use in rural districts, had been compiled by herself and Lila Bowen of the Extension Department of the Omaha Public Library. This list was to have been printed by the State Department of Education, but since lack of funds prevented, it was made a bulletin of the Nebraska State Teachers' College, at Kearney.

A large portion of the time of this session was devoted to a discussion of rural problems in Nebraska, since library service is so inadequate for such communities. The subject was discussed from the standpoint of the county superintendent of schools, the county agent, the farmer and the librarian, in very helpful and inspiring talks. Prof. J. O. Rankin of the State University gave statistics compiled from a survey showing the amount and kind of reading matter in farm homes of the state. Prof. H. C. Filley of the State University gave an excellent list of books on farm economics, in the course of an inspiring talk on "The Farmer and the Library."

The program included a round table for trustees as well as one for librarians, this year. At both meetings there were very helpful discussions of current problems.

The Association was fortunate in its visitors this year. At one session, Keene Abbott, Nebraska author, gave a delightful reading of his story, "The Wind-Fighters," which is a keen and beautiful appreciation of life on the plains in the early days. The story may be found in the *Outlook* for January 12, 1916. Frederic G. Melcher of New York gave an inspiring talk, "A Book Renaissance," which was especially interesting to us who are so far from the center of book publishing.

At the closing business session it was voted that Nebraska co-operate with Missouri, Iowa and Kansas in an effort to have an inter-state library meeting next year. Considerable interest was also shown in plans for district meetings within the state, following the report given by Nellie Williams, on the district meeting held in Fairbury last spring. A committee was appointed to carry on the publicity work started during the past year. An attempt will be made to interest an influential citizen in each congressional district of the state, and work thru him. The ultimate aim is the county library.

Nebraska voted to apply for affiliation with the A. L. A. under the new ruling. It is also planned to carry on a campaign for A. L. A. membership among the librarians in the state.

The following officers were elected for the coming year: President, Loretta Murphy, North Platte; first vice-president, Merlyn Anderson, Beatrice; second vice-president, Sara Gosselink, Fremont; secretary-treasurer, Czarina M. Hall, Omaha.

CZARINA M. HALL, *Secretary*.

UTAH LIBRARY ASSOCIATION

THE Utah Library Association held its ninth annual meeting in the Governor's Board Room, State Capitol, October 22, President Mary E. Downey, presiding. Sixty-five librarians and trustees were in attendance, the largest number at any meeting yet held by the Association.

The first Handbook of the Association to be printed, containing dates of organization and annual meetings, names of Presidents, lists of officers for 1921, constitution and by-laws, and the list of active members, followed by a list of members by towns and libraries, was distributed.

Preliminary to the program the following pertinent matters were suggested for consideration thru the day intervening before the Business Meeting and to be discussed at that time: the new by-laws relating to State Association affiliation with the A. L. A.; importance of the Handbook as a means of increasing membership; appointment of a membership committee; larger state association membership the fore-

runner of increased A. L. A. membership; suggestions to executive and other committees to follow constitution and by-laws; alteration of section five of the constitution to include only last three ex-presidents, instead of all, on the Executive Board, as the increasing number is becoming impractical.

In her president's address, "An Eastern, a Middle-West and a Western Problem in State Library Extension," Mary Elizabeth Downey gave her twenty-year study of the subject, illustrated by the states of Massachusetts, Ohio and Utah, showing differences in developing State extension work in various parts of the country, due to population, classes of people, area, climate, topography, transportation, cost, effort, affiliating agencies, appropriations, and departments of state thru which the work is done. She said that no common pattern could be used from state to state but that there must be adaptation in every case to suit the particular conditions, and ended by telling the varying conditions in the State of North Dakota, to which she had recently gone.

Reports of progress by librarians followed from county, public, corporation, secondary and normal school, college, agricultural college, and university libraries. While time could be given for samples only of what might have been told by all present, this part of the program was one of the most welcome to all listeners. G. Y. Cannon, due to illness of W. E. Ware, to whom the topic was assigned, gave the "Essentials in a Small Library Building," illustrating his talk by points in Utah libraries designed by the firm of Ware, Treganza and Cannon. Esther Nelson then described the University Library loan work thruout the state, which for the most part is done with the university graduates teaching in high schools, and extension correspondence students. The University is willing to meet any request so far as limitations permit. Discussion showed that like service was being rendered by Brigham Young University Library, the county and public libraries, and the agricultural college libraries.

The afternoon session opened with a talk by Mrs. Robert Forrester on "Co-operation Between the Branch Library and a Near-by Public School" in which she told of the work of her library with an adjoining school thru its principal. Lessons on the use of the library are planned and given to the children by the librarian. Orpha Keyser spoke of the "Classroom Libraries in the Salt Lake Schools" showing the development of the School Department of the Public Library recently established. Prof. J. E. McKnight gave an able address on what the teacher should know about a library and what

the teacher has a right to expect from the librarian.

Joanna H. Sprague in telling "What the Salt Lake Library is Doing for the Business Man," said that the staff addressed letters to people in the classified part of the City Directory mentioning books in the Library on the respective subjects and asking for recommendations of others. The result was a greatly increased use of the books in these classes both in the circulation and reference departments. Julia T. Lynch followed with an account of "The Spencer Clawson Music Collection," the first memorial collection of music books in the State, giving its history, contents and use. Prof. M. W. Poulson, speaking on "The Trustee and the Library," said the library trustee should have vision to plan for the future, co-operate with the librarian, understand the value of books and libraries, realize that the communities are composed of people with varied interests, and to have a budget, using money for service, not extravagance, but seeing that the money be spent and not put by for savings.

Apropos of Children's Book Week, Mrs. A. C. Blanchard gave a reading from her book "Carita," and Hester Bonham read an excellent paper on "The Coming Children's Book Week."

The report of the Resolutions committee in reference to Miss Downey said: "We congratulate the State of Utah for having had the valuable and efficient services of Miss Mary Elizabeth Downey who has acted as State Library Organizer and Secretary for the past eight years. Under her supervision our libraries have developed from a few unorganized book collections to more than fifty libraries with tax support. The movement for a book to every child, suited to his grade, in every school room, has swept the state. Due to her efforts we have made an enviable record in County Library organization, thirteen county libraries already being established. The service of many of our school libraries has been greatly increased. Because of her stimulus the secondary schools are in the midst of promising library development. We take this occasion to express our deep regret at her leaving our state and congratulate the State of North Dakota in securing her efficient services. We trust that the splendid foundation so well laid in Utah, will be continued with no less efficiency."

Other resolutions passed included expressions of appreciation to all who had contributed to the success of the meeting, and to the compilers of the Handbook. There was also one recording that the Association "favors the making of more adequate provision for our public schools for

the systematic teaching of the use of books and literature," and one deploring "the publication of juvenile books, the physical make up of which tends to endanger the eyesight of children," and recording the Association's pledge "to purchase and give shelf room to as little of such reading material as possible."

Officers elected for the coming year are: President, Prof. M. W. Poulson, Provo; first vice-president, Julia T. Lynch, Salt Lake; second vice-president, Cora Clark Stevens, Ogden; secretary-treasurer, Ireta Peters, Brigham; executive board, Ruth Kingsbury, Salt Lake; Amy Pratt, Kaysville.

IRETA PETERS, *Secretary*.

PACIFIC NORTHWEST LIBRARY ASSOCIATION

THE twelfth annual conference of the Pacific Northwest Library Association was held in the Davenport Hotel, Spokane, Wash., September 1st to 3rd, and can be regarded as a success in every essential respect.

The P. N. L. A's territory embraces the states of Washington, Oregon, Idaho, Montana and Utah, the Canadian province of British Columbia and the territory of Alaska. The majority of the librarians enrolled in its membership, however, are located on the Pacific slope, and the decision to hold the Conference at the eastern side of Washington naturally precluded as large an attendance as in the three past years, when the Association met at Seattle, Vancouver and Portland. Nevertheless, more than a hundred librarians were in attendance.

The program, principally built around the needs and aims of the smaller libraries, was interesting in the subjects chosen, and these were placed in competent hands; the discussions were vigorous, and often entertaining. The Association was fortunate in having in President Stewart a stimulating and tactful personality, while Librarian Fuller, and the Spokane Library Board, planned such arrangements for the social entertainment of visitors as made the Conference memorable.

The address of the President, Helen G. Stewart, dealt principally with library budgets, their necessity, and their proportionate relations to other municipal expenditures. If libraries are to be centres of stimulation, of leadership, they must ignore the snare of the merely obvious; both the books added and the policies pursued must reflect, not merely the "safe and sane"—and commonplace—but something of the spirit of adventure that refuses to reject the new because of its novelty. Librarians should gauge

their profession in terms of its community responsibilities. They should adjust themselves to the needs of the mental, social, political and spiritual unrest of the present day, and work for, the day when people will make adequate appropriations for libraries with the same cheerfulness, the same sense of necessity and value, as they today do for utilities not any more requisite for the good of the community.

C. W. Smith presented the report of the Committee on Pacific Northwest Bibliography (see *LIBRARY JOURNAL*, 1921, p. 722), and a cordial vote of thanks was extended him for his labors.

Lucile Fargo, of Spokane, in the absence of Mildred Pope, reported for the School Library Committee. The work of the Committee, the report showed, had taken two directions during the year, (1) the carrying out of the program of the A. L. A. Committee on Education, (2) regional follow-up work of the P. N. L. A. Committee of the preceding year. In prosecuting the former, questionnaires had been sent to all colleges, normal schools, public and state libraries, and state departments of education throughout P. N. L. A. territory, and the results forwarded to Harriet A. Wood, chairman of the A. L. A. Committee on Co-operation between the Library and the School. The Committee's report has been published in that of the Puget Sound English Teachers' Association, and its recommendations made a part of the new English course for high schools in the State of Washington.

One of the most valuable Committees of the P. N. L. A. is the Subscription Book Committee, of which Ruth Rockwood has for several years been chairman. The Committee recommended the quarterly publication of its findings, and suggested an effective and economical plan for doing this, which the Conference unanimously adopted. The report on War Records, by Miss Marvin, Oregon state librarian, recommended the continuation of the work, and the compilation of a check list of diaries and other war material for each of the states included in P. N. L. A. territory. Mr. Fuller reported that Spokane County had voted \$1,000 to the local Historical Society for this work. Miss Marvin also reported on the proposed joint conference of the P. N. L. A. and California Association. This has been a topic of common interest for three years, and it is hoped that arrangements may be made for Ashland, Medford or Crater Lake in 1923.

Mrs. H. E. Garber, Jr., of the Parmly Billings Library, Montana, brought to the Association the greetings of that State, explained the physi-

cal conditions that made speedy library progress difficult, and gave as the present outstanding needs an effective state organizer, and the development of the county libraries. Greetings from Idaho were presented by Jessie Fraser, of Twin Falls library, who stated that the library association of that state was six years old, and had drafted and promoted a state library law, defeated, however, last January.

At the Monday afternoon session, the President brought forward for discussion the suggestion that trustees of libraries that are institutional members of the Association automatically become members, qualifying on the institutional dues paid. The suggestion was adopted.

The topic for the afternoon was "Budgets," led by John Boynton Kaiser, Tacoma, with a paper on "New Financial Boundary Lines." Mr. Kaiser's conclusions were, that if librarians could justify their claims for increased financial support in terms of service—quantitative, qualitative and potential—they could retain their faith in the judgment of the people, who, after the submission of proper proof, would give libraries the necessary funds for enlarged and improved service.

Elizabeth B. Powell, Missoula Public Library, attempted an answer to the question "What Should we Do if our Appropriations were Trebled?" She believed the staff should be the first consideration. Salaries should be graded upward. Then she would advertise much more widely and systematically than is now possible. A mail order department should be inaugurated, the telephone service of the reference room be made better known. Enlarged work could be done with schools. No limit should be set on loans to adults. Hundreds of good, tho not new, books are in every library; these should be put in circulation—empty the shelves, rather than build more stacks! The items of upkeep being fixed, a great proportion of the increased revenue would naturally go to book purchases.

W. V. Vincent, of the Spokane Library Board, discussed library revenues and expenditures, using the Spokane library system as the basis and material for his presentation of underlying principles, and devoting his address largely to the bearings that income has on investment, expenditures and circulation. These points were clearly visualized in three large charts, in each of which circles were divided into segments, showing the proportions of total revenue each cost the citizens. Thus, the Spokane library investment is roughly, \$356,000, and of this the main library represents \$233,000, or 65.3 per cent, the three branches \$105,600, or 29.6 per cent, the five stores \$11,000—3.2%—and the

The STEREOGRAPH puts one into that same intimate touch with the interesting places and peoples of the world as actual travel; in other words, "What the telephone does for the ear the stereograph does for the eye."

Very attractive handpainted sets on Wild Flowers, Birds and Costumes have recently been added to our material especially adapted for library use.

A busy, happy corner in the Public Library, Ft. Wayne, Indiana.

Scenes similar to this take place daily in libraries throughout the country.

To remain ignorant of these great subjects of nature is to be palpably behind the times

Our World

A Sketch of Origins according to Science

By CHARLES HARVEY PECK

A BOOK that might fitly be called the "Outline of Science." It presents the chief features of physical science, from the origin of the earth to the evolution of mind, without technical details that prevent a clear and comprehensive survey of this great subject.

From nebula to man is a long road, but it has been travelled; and the unbroken story of that journey, as revealed by modern science, is therein told concisely and in plain terms. The greater divisions of science—astronomy, geology, physics and chemistry, biology and psychology—supply the stages and the climaxes of that story graphically sketched in broad outline and in the natural sequence of evolution as understood by the leading men of science of our day.

This subject, as a whole, has never before been treated in the compass of one volume.

schools \$7,000, or a little less than 2 per cent. The 1921 budget called for an income of \$75,847, of which the main library would absorb about \$52,000, the three branches \$17,748, and the five branch stores \$5,385. The percentages of cost in the main library were: office and order department 9.7; cataloging 5.4; reference 18.6; circulation (adult) 16.3; (juvenile) 9; janitors and upkeep 10.5. The total circulation of the system was 512,646, and it was notable that some of the sections that cost the citizens least in investment and upkeep were doing a proportionately large share of the circulation. Thus the five stores, with only 3.2 of municipal investment, and 7.1 of this year's expenditure, were doing 24 per cent of the system's circulation.

President Stewart read a paper by W. E. Henry, librarian of the University of Washington, "Where Shall the Burden Rest?" printed in full in the LIBRARY JOURNAL of October 15.

In the discussion that followed these addresses Mr. Munn, of Seattle, pointed out the wisdom of securing, by special service, the co-operation of business men and city officials. There was general agreement that a per capita revenue of 50 cents was inadequate. President Stewart suggested that libraries might legitimately develop forms of specialized service, charging for them in the same way as duplicate book collections are loaned on a special fee, and that thus libraries need not be wholly dependent on taxation. Mrs. Garber pointed out that tho many library users were not tax payers, there was objection to library service being other than "free to all." Mr. Ridington stated that widely varying systems of assessment made a millage tax give widely varying library revenues in cities of similar population in the Canadian province of Ontario, and this fact led last year to the introduction of a per capita system of library tax.

The principal feature of the next day was an address by the Hon. Chas. M. Fassett, recently appointed Professor of Government in the University of Kansas, and for several terms Mayor of Spokane. He maintained that the facts of social, educational, economic, industrial and national history were all in support of his contention that the world is growing better, not worse, and he believed that the optimists should, as a matter of duty, challenge the assertions of the pessimists, and compel them to abandon their position.

"Country Libraries" was the general topic of the fourth session. The report of Cornelia Marvin, State Librarian, Oregon, was in her absence read by Miss Blair, and was, on the whole, a record of substantial achievement and progress.

"Three Unsolved Problems" were next dealt with—Montana, by Lucia Haley, University of Montana; Idaho, by Marian Orr, Idaho Falls; and British Columbia, by Herbert Killam, secretary of the British Columbia Library Commission. All had features in common—public indifference due to imperfect information, inability to carry on progressive library work because of lack of money, temporary and partial cessation of effort because of local conditions, and the difficulties imposed by vast geographical extent and costly and inadequate transportation facilities. In spite of these, reports of progress along certain and different lines came from each. Miss Orr reported forty-nine libraries in Idaho, and that the chief lack was of central state organization, while in British Columbia the lack of a taxable unit, and the absence of social cohesion due to so many small and separated communities living in remote valleys, had of necessity imposed a library policy which concentrated on the more thickly populated lower mainland.

Judson T. Jennings' report for the State of Washington, read by Ralph Munn, told of the activities during the year of the committee appointed by the Washington section of the P. N. L. A. at the last Conference for the enactment of a county library law for Washington. Two laws had been submitted, one by the Committee, another by Mr. Elliott of Walla Walla, but died in the Committee of the Senate, so that the library law of Washington to-day remains as it was in 1915. Mr. Jennings suggested that future work be undertaken from a different starting point. Instead of a county library law being advocated by librarians, the requests for enactment ought to come from such organizations as the State Federation of Women's Clubs, the State Grange, farmers and country residents who desire and need library service.

Anne M. Mulheron, Library Association of Portland, then spoke on "Specialization, its Fitness and its Future in Relation to Public Libraries." There is to-day, perhaps a tendency to over-specialization, over-balancing normal library work by trying to give special service to too small groups. In the larger cities, where special libraries exist there should be cordial co-operation with the public library. In planning specialties in a public library, the size and arrangement of the building are important factors, some library systems, such as Cleveland, being in a large measure the outgrowth of the limitations and opportunities imposed or afforded by the physical plant.

Fanny E. Reynolds, Seattle Public Library, next discussed "Books for the Blind," and strongly advocated centralization of the books for

the blind in one or two libraries for each state in the whole P. N. L. A. territory, as individual libraries have inadequate collections. She suggested that a union catalog be prepared, in both printed and embossed type, and that every blind reader be provided with a copy in the embossed, and every library one in the ink, print. Miss Reynolds suggested the appointment of a committee to select titles of new purchases, and thus prevent duplication, and she was appointed by the President to act as head of a committee, to report before the close of the Conference. This committee endorsed her suggestions, and recommended the Washington State Library as a clearing house.

Ralph Munn, reference librarian, Seattle, discussing "Business Libraries," gave as the reason that smaller libraries hesitate to inaugurate a special service for business men the general belief that such a service would be too expensive. But there is no need, in a small library, to undertake the work on the large and costly scale of Newark and Indianapolis, because a large part of the enquiries of the business men of smaller cities can be answered from the ordinary reference tools. He emphasized the importance of government documents, which, tho "about as popular as influenza in a small library," cost almost nothing, and contain information not to be found in the most expensive books. He strongly urged that, to offset the disadvantage under which the small library labors in having no way in which it can learn of the publication of this valuable free material, the *A. L. A. Booklist* should publish selected lists of free publications.

Miss Fossler's paper on technical libraries was read by Mrs. Segrist. It was a carefully compiled compendium covering the scope and opportunities of such libraries, with explanatory illustrations from the Portland Library system.

M. H. Douglass, librarian of the University of Oregon, surveyed "The Extension Activities of State University Libraries." It costs the various states, on an average, something over \$600 per head for each student within the state universities. Consequently, Mr. Douglass asserted, it is good ethics, good politics and good economics for these institutions to be of the greatest possible value. Hence all of them are emphasizing and developing extension work. In this the university libraries are doing their share. The University of Oregon library, in the first half of 1921, sent thru the mail 562 packages, containing 1875 books. Either directly, or thru the State library, the municipal or county libraries draw on the University library to meet exceptional demands, such as foreign language

books, and special book material on exceptional subjects. Twice a month the University of Oregon Library mails to all libraries in the state a list of its new accessions, and from time to time issues complete or selected lists of books it has on certain subjects.

A committee was appointed consisting of Mr. Hitt, Miss Mulheron and C. W. Smith, to consider the affiliation of the P. N. L. A. as a regional section of the A. L. A.

Group sections, each dealing with some phase of library organization, administration or technique held meetings. The Small Libraries section was in charge of Mrs. Garber, that on Branch Library Problems of Edith Vermeule, Seattle, of Circulation, Ora Maxwell, Spokane, and Reference Work, Marie Hardy, Spokane.

Pauline Madden, Chouteau County Free Library, Fort Benton, discussed "The Trained Assistant" on Friday afternoon. She dealt with the personal as well as the professional qualifications, and emphasized the necessity of careful choice, because in many cases finances would prevent the appointment of more than one trained assistant. She recommended that library schools should recognize in the county library a field requiring special consideration in their curricula, and that lecturers with practical knowledge of all phases of county work, and real understanding of local conditions in the various states, should prepare students to meet the new conditions imposed by, and inherent in, all county library work.

Next followed one of the principal addresses of the Conference, given by Rt. Rev. F. W. Keator, Bishop of Olympia. Modestly disclaiming any intention or right to "hold the mirror up to nature," and speaking simply as a lifelong advocate and friend of the library movement, Bishop Keator discussed libraries and librarians with knowledge, sympathy, and genial humor. He said that, on the social side, the library is one of democracy's surest safeguards. The world is not suffering, as some assert, from too much education, but from forms of education that emphasize the selfish and the partial rather than the true and the universal. The librarian thru whose spirit flow the wide currents of humanity, whose sympathies are in contact with all points of view, can accomplish much in these days of difficulty, and thru professional service can render a notable contribution to human progress.

George W. Fuller, librarian of Spokane, followed with "Some Reflections on the Library Profession," a paper that ably discussed some fundamental aspects of present day librarianship, sketched the development of the profession in recent years, and set forth his own attitude

to the problems of the present and the near future.

A book review symposium was conducted by Rebecca Wright, of the Seattle Public library in the evening. Two minute annotations of "Books That Have Given Me a Jolt" were given by a score of librarians, and eight or ten citizens of Spokane.

At the final session, on Saturday morning, affiliation with the A. L. A. was authorized, and the incoming president instructed to appoint a delegate. Trustees of libraries that are "institutional members" of the Association are henceforth, and automatically, members of the P. N. L. A. The suggested appointment of a County Library Committee was held over for further consideration. Olympia, Wash., was decided on as the meeting place of the next Conference. Miss Nason presented the report of the Committee on Membership, which recommended the compilation of a membership list by states, to be included in the next Proceedings. This was adopted.

John Ridington, chairman of the Resolutions Committee, presented its report, which consisted largely of appreciation and thanks to all the Spokane institutions and citizens whose kindness and hospitality had done much to make the Conference successful and enjoyable, and to the invited speakers, Hon. C. H. Fassett and Rt. Rev. Frederick W. Keator, Bishop of Olympia, for their addresses.

Officers for the coming year are: President: Judson T. Jennings, librarian, Seattle Public Library; first vice-president, Anne M. Mulheron, librarian, Library Association of Portland, Ore.; second vice-president, Pauline Madden, librarian, Chouteau County Library, Fort Benton, Mont.; secretary, M. H. Douglas, librarian, University of Oregon Library, Eugene, Ore.; treasurer, Elena A. Clancy, Order Department, Tacoma Public Library.

PENNSYLVANIA LIBRARY CLUB

THE first meeting of the Pennsylvania Library Club, for the year 1921-1922 was held Monday evening, November 14, at the H. Josephine Widener Branch of The Free Library of Philadelphia, Asa Don Dickinson, the president, in the chair.

Mr. Dickinson spoke of the great loss to the library world of Philadelphia, and to the scholarship world in general in the death of Dr. Morris Jastrow, and suggested that all the members of the Pennsylvania Library Club who could do so, attend the Jastrow Memorial Meeting, the object of which is to make plans to raise funds that the portrait of Dr. Jastrow, now on

exhibition in the University Library, might be purchased for the University of Pennsylvania.*

Mr. Dickinson then introduced George H. Rigby, who related some of his experiences as a dealer in old books, from his early days as a bookseller's assistant, up to his final setting up in business for himself. Mr. Rigby said that Edward Newton had in the *Atlantic Monthly* referred to him as "The eccentric bookseller of Philadelphia." Mr. Rigby said he was glad that Mr. Newton had added "in Philadelphia," as it made him feel less lonesome, and if, by "eccentric" was meant "personality," then he had no objection to the term.

In these days of contracted living quarters and vest pocket editions, folios and large books generally have had a hard blow, Mr. Rigby said, and yet during the last six months he has sold two sets of Napoleon's "Egypt," in twenty-one gigantic volumes, "Versailles Gallery" in nineteen imperial folio volumes, and Roberts' "Holy Land," in six folio volumes.

Mr. Rigby's inclination towards illustrated books was given a great impetus by the advent of the Clarke sale in 1910, one of the most interesting collections of books ever amassed by citizens of Pennsylvania. In this collection was to be found all the grand old folios, the great monumental works of the past, such as Napoleon's "Egypt," Kingsborough's "Mexico," "Boydell Gallery," Owen Jones' "Alhambra," a complete set of Piranesi, Du Sommerard's "Middle Ages," Taylor's "Picturesque Voyages in France," which Mr. Rigby purchased for The Free Library of Philadelphia. In this Clarke collection was also a set of Motley's "Dutch Republic," upon which Mr. Clarke had expended some \$35,000, no doubt the most costly extra-illustrated work ever attempted. Mr. Rigby bought this last named set for Mr. Clarke's son, at a cost of \$1,000 a volume, a total cost of \$28,000 for the set.

Many factors, Mr. Rigby said, enter into the matter of the price of a book, such as auction records and dealers' prices. These again are affected by the number of copies issued, the frequency with which they come into the market, again by the briskness or dullness of trade and by weather or other conditions removing competition.

The president warmly thanked the speaker and a reception followed.

MARTHA LEE COPLIN, *Secretary.*

*Dr. Jastrow died suddenly on June 23rd. At the memorial meeting on November 22nd the portrait referred to above, which was painted by Wayman Adams was presented to the University by friends of Dr. Jastrow. John Ashurst and Asa Don Dickinson represented the Pennsylvania Library Club.—Ed. L. J.

THE OPEN ROUND TABLE

"GOVERNMENT SUPERVISION AND A PROCRUSTEAN BED."

To the Editor of the LIBRARY JOURNAL:

I wish to endorse most heartily the words of Mr. Dana in the LIBRARY JOURNAL of November first on the subject of the certification of librarians.

It used to be the pride of modern libraries that the chains were removed from books and no longer would we see in the present day fetters attached to folios as were pictured in the mediaeval libraries, but unfortunately the tendency has lately increased to put the fetters on the librarians that were removed from the books. More and more governmental supervision and a Procrustean bed is being used as a standard of measurement for those who work in public libraries. It was a shock to my conception of free democratic American institutions when at the Mount Washington library conference in 1909, when the subject of revising the constitution was considered I found that the rank and file of the members of the A. L. A. were prohibited from making any motions in meetings of the Association except a motion to adjourn, or a vote of thanks to the speaker. It seemed to me at the time, and still seems, a most undemocratic and unnecessary regulation. I protested at the time, but it was a *vox clamantis in deserto*. It made no impression on the audience who were more deeply impressed with the *ipse dixit* of certain leaders in the library world who showed the way—it was for others to follow. Any matter of importance was first to be presented to the Council, and if the superior wisdom of this body deemed it wise, it could be brought to the attention of the meetings for discussion. I appreciate the reasons that dictated this rule; to avoid long-drawn discussion on the introduction of matters more or less trivial, or revolutionary material which might be carried with a rush against the sober better sense of the Association, but in spite of these more or less cogent reasons, I strongly feel that the great body of the librarians in convention assembled are not given free enough rein, and it certainly is an ostensible badge of inferiority when they are practically told they must not speak until spoken to. Since then the bands have been tighter drawn, and we now find that in some parts of our land of the free no books are to be bought for the libraries unless they receive the sanction and the distinction of being listed in the *A. L. A. Booklist*, and now

later comes the proposition, swallowed "hook, bait, and sinker" by the association that every worker in the library shall perforce spend at least one year in a library school. I have no disposition to criticize the training as given in the library schools. They are useful institutions and are doing good work. I have had occasion to use to advantage assistants who have had the benefit of library school training, and with satisfactory results. I have also had in certain positions in the library those who have not had the advantage of special library school training, and they in their places have held their own to the satisfaction of the library and the public; but, to make a hard and fast rule that no one shall be eligible for library work without the training as given in library schools and being certificated by a State board is to my mind obnoxious in the highest degree, and I cannot believe that the sober second sense of the people in the Association, and out of it, is going to stand for it. Governmental machinery has invaded our methods of living, and even the constitution of the United States has been burdened with one or more amendments restricting our liberties. I thoroly believe that the libraries should set an example of domestic self-government not interfered with in its administration by force from above. We do not care to have meddling, even with best intentions, carried to the degree that will rob a community of its liberty of action.

GEORGE H. TRIPP, *Librarian*.
New Bedford, Mass.

From a friendly letter to the Editor we quote the following:

"I do not expect to return to St. Paul, but I do expect to find enough to keep me busy for several years in Paris. . . .

"Each bit of experience seems more interesting than the last—my Washington novitiate more interesting than my work as a university instructor; my university librarianship more interesting than my federal service, and my work as city librarian more interesting still.

"And in it all I owe more to Dr. Putnam and you than to anyone else. Dr. Putnam has been my leader; the JOURNAL has been my teacher."

W. DAWSON JOHNSTON.
Librarian.
American Library in Paris,
10, Rue de l'Élysée.

BARNES, 1907 S., Librarian of the Auburn (Ind.) Public Library has resigned, and is succeeded by Mrs. Charles Manuel, 1911 S.

BARNETT, Claribel R., vice-president of the American Library Association, represented the A. L. A. at a conference of organizations supporting the Towner-Sterling Educational Bill on October 1st and 2nd in Washington.

BOSTWICK, Arthur E., has been appointed trustee to represent workers in the library field for the Foundation for the Blind which will hold its first meeting in New York City on November 28th.

CLARK, Gertrude, 1921 S., is working on the organization of the library school collection of the New York Public Library Library School.

CRAIGIE, Annie, 1916 S., has been made librarian of the Fredonia (N. Y.) Public Library.

ENDICOTT, Edith, 1913 C. P., appointed instructor in the Carnegie Library School of Pittsburgh, with charge also of the apprentice class conducted by the Library.

FORBES, Leila G., 1911 P., librarian of the Randolph-Macon Woman's College, Lynchburg, Virginia, appointed librarian of the State Normal School at Montclair, N. J.

GIBLIN, Esther, 1916 P., appointed librarian of St. Francis College, Brooklyn.

GLASGOW, Stella R., 1915 W. R., appointed librarian at Fort Sheridan (Ill.).

GRAVEZ, Clara, 1916 P., of the Cleveland Public Library staff, appointed assistant libra-

rian of the Technical Library of the New Jersey Zinc Company, Palmerton, Pa.

HEILMAN, Lura F., 1912 C. P., has gone to Portland, Oregon, as librarian of District 6 of the United States Forest Service.

LEAVITT, Luella Katharine, has resigned her position as librarian of the People's Library, Newport, R. I.

MCBAIN, Margaret, for fifty years librarian of the Owosso (Mich.) Public Library, resigned at the end of October. The Library organized shortly after the Civil War, by the Ladies' Library Association, was taken over by the City in 1912, and in 1913 a \$20,000 Carnegie Building was erected. Frances Jones succeeds Mrs. McBain.

MCDOWELL, Ella, 1914 S., appointed municipal reference librarian of the Seattle (Wash.) Public Library.

McKINSTRY, Ruth E., 1917 P., librarian of the World's Student Christian Federation, becomes assistant librarian of the New Jersey Public Library Commission, Trenton, on January 1.

MARSHALL, Mary K., 1914 W. R., appointed classifier in the Detroit (Mich.) Public Library.

MOON, Edith C., 1913 C. P., appointed head of the school libraries of Evanston (Ill.)

OBERLY, Eunice Rockwood, librarian of the Bureau of Plant Industry, U. S. Department of Agriculture, died from diphtheria on November 5. Born in 1878, she graduated from Vassar in 1900, immediately after which she entered library work in the U. S. Department of Agriculture Library. Her charge of the Bureau of Plant Industry Library, which she developed into one of the largest and most important of the department's libraries, dates from 1908. Her bibliographical work on plant pathology was published currently in *Phytopathology*, her list of plant pathology references in the publications of the Department of Agriculture appeared as a publication of the Department library, and she was working on a list on the same subject covering the State Experiment Stations' publications at the time of her death. Her readiness to give her energy and enthusiasm for the public service was known to her many associates outside the profession, as it was to librarians, who will remember her contributions to the professional journals and to the discussions of the national and local library organizations of which she was a valued member.

L

It Pays— Investigate L. B. Commercial Standard Cards

Granted that Library Standard cards—made of 100% rag stock—are unsurpassed in quality and durability, many librarians have found that L. B. Commercial Standard cards fill a very definite and important need in library work.

Made of 70% rag, 30% wood pulp. Analyses and tests maintain uniform weight, texture and erasive qualities. Rotary cutting and careful inspection assure unvarying size, and a clean-cut working edge, which takes years of punishment and which always responds briskly to flying fingers.

Prices are surprisingly reasonable. Fine quality makes them doubly economical. Do not fail to send for samples and price list.

THE LIBRARY JOURNAL

TWICE-A-MONTH

DECEMBER 15, 1921

A Co-operative Index of Coats-of-Arms*

By AGNES C. DOYLE

Reference Department of the Boston Public Library.

THE Tercentenary Celebration of the landing of the Pilgrims at Plymouth, undoubtedly has caused the genealogical wave to rise all over the country, especially from the Middle West and the Pacific Coast. To "get into" "The Mayflower Descendants," "Colonial Dames," and "Sons" and "Daughters of the Revolution" before the end of the Summer was the objective.

Connecting links having been found, dates ascertained, papers accepted, applicants admitted, the next step is to find out where the original ancestor came from, and to display his coat-of-arms.

Of course, in a republic, such symbols of a dead and gone political system, should not be considered of any value, but the fact remains that the American people have an insatiable desire to hang up somewhere, in some part of their houses, a representation of such an hereditary device, whether it really belongs to them or not.

In England and other European countries, a coat-of-arms is as much a piece of property as land or a house, and subject to well-regulated laws.

Not so in America.

The American Smith, Jones, Brown or Robinson has a copy made from some book, framed, and hung up in the same manner as a diploma from a school, college or fraternal society, in the "living room" or "parlor" and proudly points to it as "our shield."

In former days I was frequently consulted as to "which I thought the prettier colors, red and gold, or blue and silver?"; blue and silver would "go" so much better with the furniture of the parlor, altho red and black would be so nice for the den.

It was a little bit difficult to point out tactfully to the inquirer that much correct genea-

logical investigation was necessary to connect up his or her family to the brilliantly colored arms chosen haphazard from some book, and labelled with the family name.

Not long ago a man asked me: "Say, where can I get a monogram of the _____ and _____ families?" "A coat-of-arms?" "Yes, that's it," he replied. I hunted up the genealogies of the families, found a color plate in one and gave it to him. This was unsatisfactory, however, as the name was "not spelled his way." I suggested other works, but to no avail, then, after a little search, pointed out to him that the same arms covered both spellings.

This desire of displaying hereditary devices in the United States has been very much discussed.

Many gentlemen of a past generation toiled severely over the subject and wrote many articles published in the Massachusetts Historical Society's *Proceedings* and in the New England Historic Genealogical Register. I am afraid they took the subject too seriously. One of these gentlemen, Mr. William S. Appleton, printed a pamphlet entitled "Positive Pedigrees and Authorized Arms of New England" containing the names of the only families in New England (thirty-two in number) authorized to own arms.

This caused much wrangling among these learned gentlemen, which today is occasionally quoted. To be sure, some of the first settlers were people of quality, and as such were authorized to use their family arms. Others in New England, not so well-born but with a desire not to be outshone by their neighbors, hired a man named John Coles, who had a copy of "Guillim's Heraldry," a book published in London in 1660. For a guinea he would take any coat from "Guillim" that bore a name having some resemblance to the applicant's, and copy it on a piece of paper about fourteen inches by ten. If no crest was found in "Guillim" he usually raised on the torse, the American flag. He put the name beneath, and it became the "arms" of

*Paper read before the College and Reference Section of the A. L. A. at Swampscott, June 24, 1921.

the family. Unnecessary to register it in any Herald's College. Many of these old drawings were proudly handed down from one generation to another, and probably some of them were carved on tombstones.

If our American people must have coats-of-arms, and ask librarians all over the country to supply them, it behooves us, as honest toilers, to give them as nearly correct ones as possible. Our mission is to be educators and we have to begin at the beginning and tell them that the use of coat-armour, especially in England, (I am now referring to New England families, the subject with which I am most familiar), dates back to a very early period. The right to use heraldic insignia was a privilege granted by the sovereign, in the exercise of his princely prerogative and was a royal recognition for the achievement of some important and distinguished public service. The ulterior design was to attach to the sovereign and his government, his most prominent and influential subjects among the yeomanry. In the early centuries the granting of coat-armour was apparently subject to few conditions and controlled by no fixed rules. When the population expanded chartered rights became necessary, and a corporation known as the Herald's College was organized and chartered. This took place in the reign of Richard III—about 1483 or 1484. Similar institutions were established in Scotland and Ireland. To these organizations, as representatives of the sovereign, are committed the grant, the design, the blazon, and the registration of coat-armour.

Since the incorporation of the Herald's College, all arms legitimately granted are recorded in the Herald's Office.

In 1867 an attempt was made to establish in the United States an equivalent to the Herald's College in England. John W. Chanler, of New York, offered in the House of Representatives a resolution requesting the Committee on Ways and Means to levy a tax on family crests and coats-of-arms actually in use as ornaments or on vehicles or household furniture. Fifty dollars was to be paid as a preliminary step, into the Treasury of the United States, then a yearly tax was to be paid, for the privilege of bearing arms, also, an annual license, for the engraved plate, or seals, or paintings of the arms which he was entitled to use.

This scheme, however, died an early death. Some of our legislators may resurrect it as another form of additional taxation.

Wars have been the producers and preservers of these hereditary emblems, as in the war thru which we have just passed, the various divisions of our own army adopted devices to differentiate their bodies of men. Says Charles

Boutell, an authority on the subject, in his "Heraldry Historical and Popular," "the idea of symbolical expression coupled with a love of symbolizing appear, indeed, to constitute one of the component elements of the human mind, as well in the rude condition of savage life as in every progressive advance of civilization and refinement. Thru the agency of such figurative imagery the mind is able both to concentrate a wide range of thought within a very narrow compass, and to give to the whole a visible form under a simple image."

Devices of all kinds have been used, singly and in combination, objects animate and inanimate, beasts, birds, fishes, flowers, trees, stars, moon, sun, the human body as a whole and in parts, agricultural implements, wells, fountains, geometrical devices, household utensils, bridles, spurs, saddles, water bags, guns, cannon and implements of trades.

Unlike the soldiers of our recent war, who were clothed to be as inconspicuous as possible, so as to fade into the landscape during battle, the knights of old and their retainers wore over their armour, rich surcoats glowing with color, on which were displayed their personal emblems. Their shields were painted in the same gorgeous hues and pennants waved in the wind above tossing crests which crowned helmets whose vizors were down to conceal the features. Only by such signs could bodies be distinguished during a battle and mobilized after an onslaught. Truly a splendid sight to our modern eyes to see one of these glorious figures, horse and rider gaily caparisoned, charge into the fight and rally with a wave of his sword his weakening retainers! Sun flashing on glittering metal and glorious color, as the wind tossed feathers like so many birds of gay plumage in flight! When the war was over and the knight returned to his castle, his mantle was hung on the wall of the great hall, against it his shield, and above that his helmet, surmounted by its crest. In time, as the real articles wore out they were replaced by sculptured or painted representations, used architecturally, in walls, above the great doorways and iron gates, and as the finishing touch to the immense mantels in the various rooms of baronial halls. From very simple devices, thru intermarriage with families privileged to bear coat-armor, very elaborate quarterings were evolved. The crest was used on seals, rings, silver, note-paper, carriages, harnesses and other personal equipment and as time went on this luxury was taxed, and became a source of revenue to the government.

As wealth and leisure have come to our own people in America, the desire for such devices, especially in architecture, or as decorative de-

sign, grows, and the correct sources must be placed at the disposal of those who seek and desire to obtain accurate information. The earlier days of ignorance are passing away, and we receive fewer of the ridiculous requests above quoted.

A number of years ago, I conceived the ambitious plan of examining in my own library, the Boston Public Library, the general works relating to the heraldry of all countries—English county, town and parish histories and visitations; as well as separate family genealogies—for plates, in color, if possible, of coats-of-arms. I intended to index them, by family name, to be readily accessible, at my desk or in a small card catalog. I devoted a summer to the project, and assembled about six hundred titles. This special work, as is usual in a busy reference department, had to be laid aside for the more pressing demands of every day, and as my index was as yet not made, I had to depend on my general knowledge of sources. Memory, however, is a treacherous thing, and a card or printed list is better.

I had in my mind's eye, a glorified "Burke's Armoury," plus a Rietstap's "Armorial Général" alphabetically arranged, with colored illustrations of every name contained therein, to be placed on the reference shelves for easy access, and to be handed out to the most exacting inquirer. Of course, this was an absurdity, a mere dream of short-cuts after a hard battle hunting thru dozens of books for a "picture of my arms," failing to find one, and in desperation taking a piece of paper and from the description in "Burke" or "Rietstap" drawing a sketch, giving a lesson in heraldic terms, "gules means red, sable means black, azure means blue, proper means just as it really looks, etc., etc.," and sending off a satisfied inquirer.

But dreams sometimes come true and perhaps this one may, tho not on such a large scale as the combination of Burke and Rietstap, if the library forces of the country co-operate.

My suggestion is that a co-operative index of coats-of-arms found in authentic works, arranged on an easy plan, similar to the great works already so helpful to libraries, be compiled under the direction of the American Library Association.

It may be that various libraries unknown to each other have already for their own convenience made such individual lists, either on cards, typewritten or printed. To help bring these together under one headship for redistribution so as to avoid unnecessary duplication is my object in appearing to-day before the College and Reference Section of the A. L. A.

Various methods might be used to achieve

such results. A paid commission, volunteer aid from library schools and colleges, the indexing counting as work toward a degree, and a system of loaning by the larger and richer libraries, the books to be analyzed by libraries which have the time but not the books. I am aware that this work appeals to a limited class, but it is surprising to see how history is clarified by a knowledge of genealogy which includes heraldry. In England especially, the rise of great governing families and their political powers, depended almost wholly on carefully arranged marriages.

I would suggest as a library school thesis an index to the great set of Johann Siebmacher's "Grosses und Allgemeines Wappenbuch" in fifty volumes. This contains most valuable information, but is, as librarians know, almost worthless, for want of an index. It would give the students exercise in German as well, and count towards two courses, language and indexing.

The Library of Congress might be induced to look after the plates in separate family genealogies, since it has recently compiled and published an excellent work on the subject and likewise has facilities for printing on a large scale.

Above all, I would suggest using first sources, when possible, books without a shadow of doubt as to the authenticity of the illustrations.

So many ridiculous mistakes are perpetrated and put upon an ignorant American public, that they should be reduced to a minimum.

I was quite surprised in looking over a very expensive work in three volumes, "Historical Families in America," edited by Walter Spooner (New York, The Historic Families Publishing Co. Association, 191—, \$300) to find "fool" illustrations. Opening the first volume by chance at page 147 under "Ronse," I found a black and white drawing of the arms of the "Wright" family. The description given was "Arms or, on a chevron azure, between three grey hounds sable, as many trefoils argent." The illustrator evidently got mixed in his symbols for he had lined the ordinary (representing gules) instead of dotted, for or, the three black greyhounds were right, but stuck all around them were what were supposed to be trefoils, five above the chevron, and four below, nine in all, instead of placing merely three on the chevron, as the description called for. On the following page "Mott" was the name and the description, "Sable, a crescent argent." The shield was divided horizontally, with black above and red beneath (instead of all black), the only correct thing being the crescent.

"America Heraldica" is another work of the same type. The late William H. Whitmore, an authority on genealogy and heraldry, whose own work the "Heraldic Journal" is absolutely accurate and dependable, called it "crazy heraldry" in *The Nation* for May 5, 1887. He says "E. de V. Vermont . . . simply chopped up various books, picked up facts and errors, and placed the result before the public in a manner provocative of examination and censure. . . . a book like this is an unmitigated nuisance."

"Ancestral Records and Portraits," a compilation from the archives of Chapter 1, *The Colonial Dames of America* (Grafton Press, New York, 1910), has on p. 603-604 a bad drawing—the "Ridgley" arms. The description reads "Argent, on a chevron sable, three mullets pierced, of the field." The illustrator has put on the chevron, the symbol for purple, not black. Other mistakes might be quoted if time permitted.

In direct contrast, however, to these are the splendid plates to be found in the "Miscellanea Genealogica et Heraldica," edited by Joseph Jackson Howard. This has no collected index, but it contains many fine full page color illustrations and color fac-similes of grants of arms with decorative borders. Pedigrees done in family-tree style are also included.

This would be an excellent work to index for a beginning of the co-operative index.

The great general works, such as the "Fox-Davies" and the "Peerages and Baronetages" should be left to the last, as these are well-indexed and easily accessible.

I suggest also many splendid English county histories, of which I have a list, also works on monumental brasses. Of the latter, "John Sell Cotman's Engravings of Sepulchral Brasses in Norfolk and Suffolk, London, 1839," has two fine color illustrations, one of Sir John Blennerhasset, and the other of Lady Katharine Howard. This method of color enamelling was in use at Limoges, France, and reproductions of examples are difficult to find, most brasses being in yellow and black.

"A History of the Ancient Parish of Leek, in Staffordshire; including Horton, Cheddleton, and Ipstones, by John Sleigh, London, 1883" has many fine color plates, twenty to a sheet. It is a work not very well-known, and contains accurate illustrations, as well as pedigrees.

W. H. St. John Hope's "Stall Plates of the Knights of the Order of the Garter, 1348-1485" (Westminster, 1901) is another example of fine workmanship in its beautifully colored plates.

Of the foreign works, I would draw attention to the work in eight volumes of "Amato Amati,"

entitled "Dizionario Corografico dell' Italia." This is really a gazetteer, but has in the text hand colored coats-of-arms of every city and town in Italy. It is a little known set, but for the working reference librarian a very valuable one.

"Francisco Piferrer's Archivo Heraldico, Armas, Timbres y Blasones de Nuestra Noblesá Espanola (Madrid, 1863-66, 2 v. in one) is another little known work which has splendid color plates of Spanish families.

Library Service at Oteen

To the Editor of the LIBRARY JOURNAL:

In my letter of November 10th, for want of late information, I did not say anything concerning the library service at Public Health Hospital No. 60 located at Oteen, N. C.

From Mr. Hickling's letter of October 23d to the *New York Times* it might be inferred that there were no library facilities at Oteen. According to the October report of the Librarian, Miss Helen Harris, there were in the Library, 9,177 books to meet the needs of about 900 patients. In addition this library has the privilege of borrowing books from the North Carolina State Library Commission at Raleigh, N. C. These facilities are superior to the public library facilities in a good many cities throughout the United States. The present librarian, Miss Harris, took up her duties on October 5th, succeeding Mrs. Eliza J. Rankin. These names are a sufficient guarantee for professional and devoted library service.

Mr. Hickling's letter has resulted in a good deal of embarrassment to the Commanding officer and to the Postmaster, who has been deluged with publications of all sorts. There is a real need at Oteen, and elsewhere for current numbers of popular magazines. No fund is sufficiently large to meet this demand completely. The men in the hospitals are just as eager to get current numbers as other citizens, and it is a waste of effort to send back numbers. Current numbers therefore or a subscription which will ensure current numbers are welcome anywhere.

H. H. B. MEYER,

*Chairman, Committee on Transfer of
Library War Service Activities.*

The Manual of the New York Library Association, 1921, lists seven honorary members, three permanent institutional members, five life members, seventeen annual institutional members, and five hundred and fifty-two active members, making a total (previous to the thirty-first annual meeting) of five hundred and eighty-four.

The Atlanta Library School

By TOMMIE DORA BARKER, Director.

THE establishment of the Atlanta Library School is coincident with the movement for the establishment of municipally supported libraries in the South.

This movement had its beginning in 1899 when Atlanta received an initial gift of one hundred thousand dollars from Mr. Carnegie for a library building and the city appropriated five thousand dollars for the maintenance of a free public library. The Young Men's Library Association, which had been in existence since 1867 and had accumulated a considerable property, generously turned its collection of books over to the city and purchased a lot for the library from the sale of its own building. This marked the beginning in the South of the public library as a municipally supported institution. Other cities were quick to follow Atlanta's example and within a few years most of the larger cities of the southern states had established free public library service.

As new libraries were built or old ones reorganized a demand was created for trained librarians and technical experts. When the Carnegie Library of Atlanta was reorganized in 1899 as a free library a graduate of a technical school was put in charge of the catalog department but untrained assistants had to be employed thruout the system. An apprentice class was then organized after the plan worked out by Miss Electra C. Doren at the Public Library in Dayton, Ohio, Miss Doren having modeled her course on that used in Los Angeles, established by Miss Tessa Kelso.

Miss Anne Wallace, in her admirable paper, given before the American Library Association in 1907 on "The Library Movement in the South since 1899," summarized the events of these early years as follows:

"By the time the Carnegie Library was finished (1902) a competent staff was trained. But here our troubles began. No sooner had we a model shop than our neighboring cities began to call on us for trained assistants. Other Carnegie libraries were in process of erection, institutional and private libraries were being reorganized, and a steady demand for library service was created. Early in this demand were the libraries of Montgomery, Charlotte, and Chattanooga. Their librarians came to study methods and each returned with one of our assistants tucked under her arm. Assistants were lent to the libraries of the Georgia School of Technology, Agnes Scott College, and to the University of Georgia; to the public libraries

of Dublin, Newman and Albany, Georgia; to Ensley, Selma and Gadsden, Alabama. Assistance was claimed by the state libraries of Mississippi and Georgia, and by the projectors of newly planned buildings not yet erected. It is impossible to see how we did it so as not to cripple our own library, but finally the demand reached even the limit of inter-municipal courtesy, and Mr. Carnegie was appealed to. Again he came to the aid of the work in the south and established a technical library school as a part of the work of the Carnegie Library of Atlanta, in May, 1905."

The curriculum of the Atlanta Library School is designed to give thoro training and instruction in the fundamentals of library work. The school does not feel that a one year course offers much room for specialization but it has made certain adaptations to suit local conditions. Special attention is given to the administrative side of the library, one of the requirements for graduation being the presentation of an acceptable thesis on the organization and administration of a public library. The school also gives special attention to practice work, as it is considered highly important that the students be thoroly grounded in library details as most of them go to libraries that have never been organized or that have only one trained person who must organize the routine and impart the knowledge of the details to an untrained staff.

The work of this school has been peculiar in that it has engaged in many activities ordinarily outside the limits of a professional training agency owing to the special conditions that have existed in the South. When the school was first started few southern states had library commissions, so that it became a bureau of information in regard to library matters for communities seeking help and advice in establishing libraries. It was called on to select architects, plan buildings, compile book lists, and, in fact, to perform all the functions of a library commission in addition to maintaining a ready supply of trained workers. With the establishment of library commissions in most of the southern states these more or less extraneous activities have become fewer from year to year and with the organization of the Georgia Library Commission in 1920, the school was finally relieved of the demand for this form of service. However, it was an important contribution that the school made in these formative years by furnishing expert advice on library technique.

With the demands of the foregoing character taken care of thru regularly established agencies, the school was able to consider how it could further adapt its work to meet local needs. To this end, in April, 1921, an institute week was held offering lectures on children's work, the mending and repair of books, and problems in library administration. The course was open to all those engaged in library work in the southeastern states and the response was such that the school feels that in addition to offering its regular course it can render a distinct service to the untrained librarians of small public and institutional libraries by giving from year to year longer courses similar to that held in 1921.

Another experiment that is being tried this year is the giving of a short course of lectures to the students of the Atlanta Normal Training School in an effort to give to those who will take charge of school libraries a minimum of technical knowledge.

The school has one hundred and fifty graduates. Of this number eighty-nine are engaged in library work, principally in the southern states. Of the sixty-one not now in the work, forty-one have married, nine have taken up other work, six are at home, and two are deceased.

The school is one of the agencies for the development of libraries in the South set in motion thru the efforts of Miss Anne Wallace, librarian of the Carnegie Library of Atlanta from 1899 to 1908 and director of the Library School from 1905 to 1908. It is only with the passing years that the full measure of Miss Wallace's contribution to library progress in the South can be gauged. Her work was concerned not only with the question of setting the machinery in motion, such as securing proper legislation for the support and control of libraries, creating a library commission, organizing a state association, and establishing a professional training agency, but it was also concerned with the more difficult matter of creating a public sentiment in a naturally conservative society for libraries supported from public funds. After the principle was accepted by one community it simplified the situation enormously for others so that when, in 1899, Atlanta appropriated funds for a public library it meant that an important precedent had been established in the south for accepting the free library as a legitimate activity of government. But the acceptance of this principle was only the result of years of educational work on the part of Miss Wallace.

Miss Wallace was the pioneer and organizer. In working out the details of the curriculum for the school Miss Wallace was fortunate in having associated with her Miss Julia T. Rankin

and Mrs. Percival Sneed, both graduates of the two years' course at the Pratt Institute School of Library Science. Miss Rankin succeeded Miss Wallace as director in 1908 after having been chief instructor from the inauguration of the school; when Miss Rankin resigned in 1911, Mrs. Percival Sneed became principal of the school and its executive officer until her resignation in 1915. Mrs. Sneed was succeeded by Miss Tommie Dora Barker as director. Associated with Miss Barker have been Miss Mary Esther Robbins, who served as vice-director from 1916 to 1918, and Miss Susie Lee Crumley, who served as chief instructor and assistant librarian of the Carnegie Library of Atlanta, from 1915 to 1921 when she became principal and school executive.

Another Library Impostor

To the Editor of the LIBRARY JOURNAL:

A middle aged man recently appeared in a New England library representing himself as connected with a historical society in New York state and inquired for the names of the officers of the local historical society. He later called on one of these and told a story of an emergency need for a small sum of money to enable him to continue his journey.

It appears to have been an impostor. The description of the stranger and his methods recall the amiable gentleman who, a dozen years ago, victimized many librarians and museum curators in a manner so artistic and graceful that many of the victims felt repaid for the small loans extracted.

It may be well, however, for librarians to be on their guard in case officers of historical societies should not possess so keen a sense of humor.

X.

And Another

To the Editor of the LIBRARY JOURNAL:

Someone has been visiting libraries in Brooklyn and in New England, representing himself as my brother, or as the agent of the Syracuse Public Library, and asking for money. It is flattering to think that one's name is considered negotiable in this manner, but I am obliged to say that the Syracuse library has no agent nor have I a brother either in Brooklyn or New England. The man is an impostor.

PAUL M. PAINE.

An edition of sixty-five thousand copies of Alice A. Blanchard's attractive Children's Book Week List was financed by the publishers on a prorata basis, and distributed widely thru Los Angeles stores, schools and library centers during the week.

College Library News

A SUMMARY OF THE LITERATURE RELATING TO COLLEGE AND UNIVERSITY LIBRARIES PUBLISHED BETWEEN NOVEMBER, 1920, AND NOVEMBER, 1921. PREPARED BY THE STUDENTS AND PRINCIPAL OF THE LIBRARY SCHOOL OF THE NEW YORK PUBLIC LIBRARY FOR THE CONFERENCE OF EASTERN COLLEGE LIBRARIANS HELD AT COLUMBIA UNIVERSITY ON NOVEMBER 26, 1921.

AS was the case with the similar report presented at this conference a year ago, this summary does not claim completeness, but the hope is that most of the important news of the year has been included; and a few items of 1920 are incorporated which were either overlooked or unavailable last November. If college library interests seem to be broadly interpreted, it is to be remembered that the work of the college librarian is a branch of a large service, and that it cannot be justly discussed without frequent excursions among subjects which concern the library profession as a whole.

Now that international matters are to the fore it is perhaps not unfitting to begin with mention of some things that are happening in college library circles abroad. We have lately read newspaper accounts of the laying of the cornerstone of the new university library at Louvain, and of the participation in the event by American educational leaders.¹ This is not only symbolic of the sympathy between American and European scholarship, but of efficiently organized effort toward its expression. The Division of Intercourse and Education of the Carnegie Endowment for International Peace tells, in its annual report² dated March 16, 1921, of the action which largely made this possible, namely the gifts in 1919 and 1920 of \$107,000 by the Endowment toward the fund sought by the National Committee of the United States for the Restoration of the University of Louvain, upon which apparently the library is being made a first charge. In the same report there is recorded the appropriation by the Endowment of \$100,000 to provide a new library building for the University of Belgrade,³ a decision reached after considering the claims of the Academy of Sciences of Belgrade, and in view of the serious handicaps under which the University Faculty was laboring by reason of loss of books and damage by shells to the building in which the library was housed. In pursuance of a policy of some standing the Endowment has also given collections of books of about two thousand volumes each on American history and institutions to the general library of University College,

London, to the Library of the University of Paris, and to libraries in Peking, Rome, Zurich and Tokio, and similar collections have been in process of assembling for the Universities of Strassburg and Belgrade.⁴

Coming to English university library affairs, Cambridge libraries and the work of Henry Bradshaw are discussed by Sir Geoffrey Butler in the *Edinburgh Review*;⁵ and the *Living Age*⁶ brings news that the International Institute of Bibliography was made the subject of unfavorable comment at the recent meeting of the Library Association, being criticised for falling far short of its aims and for failing to command the universal support which is essential to its success. One of the remedies proposed may be startling to librarians in the United States, for a speaker advanced the belief that any bibliographical bureau of this kind should be located at Washington "because the Americans are a great nation of bibliographers."

For information about new books of interest to the college or reference librarians we turn to Miss Mudge's usual compilation in the *LIBRARY JOURNAL*,⁷ covering this time the reference books of two years, 1919 and 1920; and as paralleling this to Mr. Cannon's lists,⁸ published first in the *Bulletin of the New York Public Library* and subsequently in the *LIBRARY JOURNAL*. Possible improvements of tools in the reference field are discussed by A. B. Eason in an article on engineering literature originally appearing in the *Electrician* and reprinted in *Special Libraries*;⁹ and in an address before the Massachusetts Library Club by Dr. Ira M. Hollis, President of Worcester Polytechnic Institute, who comments that there are few well-written technical treatises in the United States, the need being for greater completeness, thoroughness, and regard for scientific fact outside the immediate subject but cognate with it.¹⁰ Mr. Hicks' "Modern Medusa," read

at Colorado Springs in 1920 and printed in the A. L. A. *Proceedings* of that year, but not reported upon in the last summary, is most helpful as giving the background of our present periodical index facilities and as carrying a reminder that the pioneers in librarianship had much less with which to work than have we.¹² To the extent that any central information agency will benefit them, college librarians are naturally interested in such proposals as that for the establishing of a library information service at Washington, the work of which is, according to recent reports, to be directed by Mr. Carter of the Government Printing Office instead of being lodged in a new bureau.¹³

Probably the most heralded special collection added to an American University library in 1921 is that deposited at Leland Stanford, consisting of the secret European government documents, numbering 375,000 pieces, given by Mr. Hoover, and of the private library of Prof. Paul Miliukov, minister of foreign affairs in Russia in the Kerensky régime.¹⁴ Yale reports a material increase in its Far Eastern collection as a result of the efforts of Professor Asakawa;¹⁵ Harvard is richer by the receipt of files of German revolutionary papers of 1918 and 1919, as well as of files of official military journals and official newspapers published in Germany in the war period.¹⁶ The medical library of the University of North Dakota has received a valuable collection by the will of Dr. Samuel Howard Irwin.¹⁷ The University of Arizona library has issued a catalog of the books in its collection relating to modern Mexican literature, which doubtless will be helpful as a guide to other libraries interested in such material.¹⁸ Writing in *Museum Work*, Mr. Ralph L. Power calls attention to the growth of the commercial museum idea, and to its spread to the universities, mentioning collections at Dartmouth, the University of Wisconsin, the State University of Iowa, and Boston University;¹⁹ Georgetown University's library of foreign trade and allied subjects is perhaps comparable, at least in purpose, to these.²⁰ Among collections of lesser importance acquired by gift is that on Mary Queen of Scots at the University of Southern California; part of the Stanton library, concerned chiefly with ornithology and art, at Bates College; the Charles I and Cromwell newspapers at the Uni-

versity of Minnesota; the Sibley collection of three thousand musical scores and commentaries at the University of Rochester; and the material on North Carolina history and funds for strengthening this collection at the University of North Carolina.²¹ Abroad the *London Mercury* tells of a gift to University College, London, of fifty-eight editions of Castiglione's "Courtier," ranging from the Aldine edition of 1528 to Opdycke's translation of 1902;²² while the *Aberdeen University Review* records the receipt by Aberdeen University of two valuable 17th century theses, and of a collection of ostraca from Thebes, ranging in date from the second century B. C. to the seventh century A. D.²³

Two general publications about books are to be mentioned. One is a second edition of Falconer Madan's "Books in Manuscript,"²⁴ published by Kegan and by Dutton. The other is Mr. Koch's summary of Emile Faguet's "Art of Reading" in *Illinois Libraries*, indicating how reading must be approached if it is to be pleasurable and profitable alike, and giving special attention to the relation of the printed to the spoken drama.²⁵ Wellesley College Library has this year added its influence to that of the many who seek to arouse the interest of students in books as books by opening the Brooks Memorial "browsing" room.

The general range of college library administration has been covered for us anew within the year by Mr. Wyer's revision of his chapter on this subject in the A. L. A. Manual of Library Economy.²⁶ A graphic scheme of college library organization, exhibited at this conference by Mr. Drury a year ago, was published in the LIBRARY JOURNAL in February.²⁷ Beyond these items of pre-eminent technical interest are few. The outstanding thing was the discussion as to methods of cataloging and of cataloging instruction, as carried on in the periodicals,²⁸ and at Swampscott in the sessions of the Cataloging and Professional Training Sections,²⁹ and at Boston in the sessions of the Association of American Library Schools; all of this derived special interest by reason of what lay behind it,—the dearth of

catalogers. An article in *News Notes of California Libraries*²¹ by Roxana Johnson, of the University of California Library, summarized the literature of classification and cataloging for the period January, 1920, to April 15, 1921. Miss Johnson refers to various articles, including Mr. Hanson's on the advantages of the Library Congress Classification and Dr. Raney's on the Longmans Green cataloging service, and calls attention to the sections relating to cataloging in general books published newly or in revision, such as Miss Krause's "The Business Library," Miss Wilson's "School Library Management," Mr. Friedel's "Training for Librarianship," and Mr. Dana's "Library Primer." The work of the A. L. A. Committee on Book Buying has gone on thru the year, the points of chief interest being the dispute as to alleged extortionate charges on the part of American branches of international publishing houses in the importing of foreign books,²² the filling of gaps in German periodical sets, and lastly, the protest made jointly with the A. L. A. Committee on State and Federal Relations relative to the book provisions of the Fordney bill.²³

University faculties and executives continue to accord increasing acceptance to the library as a tool of investigation and a necessity of instruction. President Kinley of the University of Illinois argues, in the *Proceedings* of the National Association of State Universities, for ample provision for research, suggesting that there should be devoted to this purpose a sum at least one-third as great as that required for the conduct of the university as a teaching institution, and including by implication the demands of the library.²⁴ A somewhat similar note of need from across the water appears in an article in *Nature* on university grants.²⁵ This of course is the heart of college library administration. Given means, all else depends on enlightened policy. Some of the possibilities are indicated in Father Foiks' plea, before the Indiana Library Association, for making the library more of a factor in student life;²⁶ and by Mr. Walkley's address on "Our Business" at the Isles of Shoals meeting in 1920, in which the library's opportunity in shaping public opinion is emphasized.²⁷

In the way of library buildings there is little

to report. Yale presumably is going ahead with its plans, and Luther College, Decorah, Ia., let contract in the spring for a \$100,000 structure to be completed, it was hoped by the fall.²⁸ The University of Wyoming Library is contemplating a \$200,000 building or building unit. The most conspicuous money gift for the year is that of \$75,000 by the Carnegie Corporation to Hamilton College, which is to be applied as endowment.²⁹ Only one library handbook has been reported as issued within the year, namely the comprehensive and well arranged manual descriptive of the Wellesley College Library.³⁰

More and more our libraries are finding that they live not unto themselves alone, no more pointed illustration of this being possible than the discussion of the division of labor among university libraries at this conference a year ago, led by Mr. Gerould, and presumably based on his paper before the National Association of State Universities.³¹ Great as are the difficulties in any complete sharing of facilities, readiness to work together and consult as far as conditions permit are possible, and the least that should be expected. As regards the work of college librarians for the profession at large, it is interesting to note that Mr. Kerr continues as a kind of unofficial library commission for Kansas, functioning as Mr. Windsor did in Texas while at the state university there, and to a certain extent as Dr. Canfield did at one time thruout the east; that Mr. Bishop served as official delegate of the A. L. A. at the annual conference of the Library Association, held at Manchester in September; and that in the election of Mr. Root the A. L. A. has again turned to the college ranks for a president. The bas-relief of Katharine L. Sharp, one time librarian of the University of Illinois and founder of its library school, which was planned by the alumni association of the Library School and executed by Mr. Lorado Taft, has been completed and is to be placed in the University of Illinois Library.³²

There remains one topic or group of topics which in importance outshines for the time being everything that may be said about reference work, and books, and administration, and personnel, and even about the international aspects of library work. Within the year problems of recruiting, training and professional status have commanded attention as never before in the history of librarianship. The first of these topics was touched in discussion at this conference a

year ago;⁴⁸ and about the same time the A. L. A. Committee on Recruiting for Library Service was getting under way. This committee sought to interest properly qualified young people in library work as a profession, working thru librarians and library organizations generally, but principally thru college librarians and the alumni of library schools. In addition to the statement of this committee, set forth at length in the report of the secretary of the A. L. A. for 1920-21, there have been various articles touching the subject in the *LIBRARY JOURNAL*⁴⁹ and *Public Libraries*;⁵⁰ it has been discussed in various meetings; and a number of pamphlets designed to disseminate facts about library work have been prepared and distributed.⁵¹ The Association of American Library Schools, while looking upon recruiting as a matter of general professional interest, has tried to do its share in the emergency, thru committee effort. It is obvious that the burden of recruiting must ever lie with those who stand in the strategic positions, and who are best situated to reach college students thru addresses, periodical presentation, and conversation. It should be emphasized too that a recruiting program is as necessary under ordinary conditions as in times such as those thru which we have just passed. Library work should be held before college students for what it is, an attractive calling worthy of thoroly trained young men and women, to the end that, as soon as accessions to the ranks are normal, standards may be raised. When this becomes a steady policy such topics as the dearth of catalogers may soon drop from our conference programs.

Training in the broad sense and professional status are inextricably bound today as the guiding stars of our professional advance. This was recognized in Dr. Williamson's⁵² Asbury Park paper in 1919, and by implication in all that he and others have done before and since that time to promote the fixing of standards of library service. It appears in the agitation of the Library Workers Association for more liberal training facilities.⁵³ It underlies the growing willingness of the universities to give their library staffs academic ranking, and shows itself now and again in such action as that of the Simmons College corporation in 1921 in voting bonuses to its library workers as well as to its instructional force.⁵⁴ It finds expression in the

recent petition of a district meeting of the California Library Association for the financial strengthening of the Library School of the University of California;⁵⁵ and of the Minnesota Library Association for the initiating of courses in library methods at the University of Minnesota.⁵⁶ It is not lacking even in the utterances of the Library Employees' Union, in spite of the unfortunate tendency of that organization to judge fitness by length of service alone.⁵⁷ College and university libraries should be the first to be interested in schemes of service based on education, experience, and achievement. They may find a given plan of standardization difficult to apply, but they are committed to the principle by the traditions and ideals of the institutions with which they are connected. Every librarian owes it to himself to be informed as to the various recent plans for standardization and certification—from the background of chaotic professional conditions out of which they arose, thru the years of seemingly barren discussion, down to the specific proposals of recent times and their varying adoption by official and unofficial groups. The report of the A. L. A. Standardization and Certification Committee at Swampscott,⁵⁸ and the act of the 1921 New York legislature authorizing the Board of Regents to fix standards of library service⁵⁹ are the examples nearest to hand; bodies in ten states other than New York have approved certification plans in some shape, however, so that the movement is no longer local. If librarianship is to cease being formless, unknown and unrecognized, the adoption of definite standards would seem to be the way out.

The Chicago Public Library 1871-1921

THE fiftieth anniversary of the great Chicago Fire of 1871 revives memories of the beginnings of the Chicago Public Library, as the city had no library previous to the fire and no revenue to support one. The founding of the library was, according to the *October Book Bulletin*, directly due to the kindly impulse of a group of prominent Englishmen, headed by "Tom Brown" Hughes, and including the entire British literary and social world. The appeal issued by Thomas Hughes was signed with him by Queen Victoria, Gladstone, the Duke of Argyll, Disraeli, Carlyle and other distinguished persons.

"The library to be established," according to this circular, "would be regarded as a token of that sentiment of kinship which, independently of circumstances, and independent of every other consideration, must ever powerfully affect the different branches of the English race."

"... While the home literature of the present day and the last hundred years will form an important portion of the New Library, the characteristic feature of the gift will consist in sending to the Americans works of the thirteen preceding centuries, which are the common inheritance of both peoples."

The collection which soon formed as a result of this effort included the works of all the great British authors of the day, in many cases with autograph inscriptions. Publishers and learned societies gave complete sets of their productions, the universities of Oxford and Cambridge providing sumptuous bindings of polished calf for many of the more important. The British government presented the complete Patent Reports since 1617, a gift that has continued to date, as have also the great series of historical reprints, calendars of state papers and archives issued by the Master of the Rolls.

The gift descended upon a city quite unprepared to house it. Mayor Joseph Medill referred the matter to a committee composed of the Hon. Thomas Hoynes, E. C. Larned, J. M. Walker, D. L. Shorey, S. S. Hays and Henry Booth, who secured an abandoned iron water supply reservoir as a temporary store room for the books. "The Tank" stood on a thirty-five-foot high masonry base in the rear of the temporary city hall hastily erected at La Salle and Adams streets. The Tank was circular in shape, with a diameter of sixty and a height of thirty feet, and had recently demonstrated that it was "superlatively fireproof." Herein were stored the gift books as they arrived.

The second step of the Committee was to se-

cure the enactment by the Illinois General Assembly of a law enabling municipalities to establish public libraries and to levy taxes therefor. The law was passed in March, 1872, and is the statute under which all Illinois public libraries are organized. Eleven days later an ordinance of the City Council established the Public Library under the new law. For lack of more suitable quarters the Directors proceeded to convert the Tank into a book room by cutting a skylight in the roof and lining its walls

A LIBRARY IN A TANK—THE FIRST HOME OF THE CHICAGO PUBLIC LIBRARY

with shelves, having a capacity of 18,000 volumes. A temporary new story was added to the City Hall connecting with the book room by a bridge, and here, on New Year's Day, 1873, a library reading room was opened to the public with 3,517 volumes upon the shelves. Circulation of books for home use was not begun until May, 1874, after removal to more convenient quarters at Wabash Avenue and Madison Street.

The first librarian was Dr. William Frederick Poole, secured from the Cincinnati Public Library, who guided the new institution thru its critical period of growth for the next fifteen years.

The home circulation of books for the first year, May 1, 1874, to May 1, 1875, is recorded as 88,682 volumes, and the number of volumes in the library was 17,355. Twenty-five years later the 258,498 volumes had a circulation of 1,749,755, and today 1,792 agencies effect a circulation of 8,000,000 for the 1,100,000 books owned by the library.

Exhibits of Books on World Peace in December

A PLAN to make this Christmas a great peace Christmas is being carried out by all the national organizations interested in the limitation of armaments and in the success of the international Conference now meeting at Washington.

The libraries of the country are asked to share in this plan by arranging at Christmas time shelves of books concerning world peace and the subjects being discussed at the Conference. A great variety of books would come under this head but world peace might be made the dominant note.

The National Council for the Limitation of Armaments, 532 17th Street N. W., Washington, D. C., of which Frederick J. Libby is executive secretary, will supply posters to go with this Christmas exhibition upon request. Carefully selected bibliographies have also been prepared. The National Council is composed of thirty-five national organizations with a membership of nearly seven million. Its vice-chairmen are: Julius H. Barnes, Julia C. Lathrop, Will Irwin, Mrs. Maud Wood Park, Anna A. Gordon, John Grier Hibben, William Allen White, Mrs. Harriet Taylor Upton, Mrs. Lucia Ames Mead, James R. Howard.

The A. L. A. Represented at the Co-operative League Conference

THE A. L. A. was represented at the meeting of the Southern Co-operative League in Chattanooga, November 6-9, by Margaret Dunlap, librarian of the Chattanooga Public Library. In addition to attending the meeting and representing the Association personally, Miss Dunlap placed a county library exhibit which had been sent by the A. L. A. (supplemented with local county library material) and distributed copies of "A County Library" leaflet supplied by A. L. A. Headquarters.

Among the resolutions adopted by the conference two are of special interest:

"Second. The league indorses the forward educational movement in the south in its appeal to the intelligence and conscience of the general citizenship. It particularly notes with satisfaction the laymen's support of rural circulating libraries and the crystallizing of public opinion on the theory that the upper limit of taxation for schools should be determined solely by each local community for itself." And

"Twelfth. The League adopts as its educational slogan: Double public educational appropriations in five years."

P. P. Claxton, former U. S. Commissioner of Education and now associated with the University of Alabama, is president of the League.

The A. L. A. Bookbinding Exhibits

THE two bookbinding exhibits have been used at fifteen places since June 1st. Seven of these appointments were for summer library schools, and two were for state meetings, in Iowa and New Hampshire. One exhibit was displayed during the meeting of the National Education Association at Des Moines in July, and the other at the Iowa State Fair in August, in connection with the exhibit of the Iowa Library Commission. Three individual libraries have used them, one as an attraction in its program of publicity. One of the exhibits has recently been used in the New York State Library School at Albany.

During the latter half of December and January the exhibits will be more readily available than at most other times of the year, when more definite dates are to be met.

Requests for the loan of these exhibits should be addressed to Mary E. Wheelock, Public Library, Des Moines, Iowa, with date or approximate date desired.

Lectures on Bookselling for Librarians

A COURSE of twelve lectures on bookselling, arranged by the New York Booksellers' League and given in connection with the Library School of the New York Public Library, is to be offered at 8 p. m. on twelve consecutive Friday evenings beginning January 6, 1922. The object of the course is to set forth the fundamental principles of bookselling and to explain the best methods of looking up books and getting them, with a brief survey of the world's best literature. The class will be conducted by Bessie Graham, and one-half-hour addresses will be made by men prominent in the several fields of the book business.

The planning of this course is in pursuance of a need long felt in the book-selling world, resulting from the lack of information about technical details which commonly hampers new workers, and from the difficulty which employers find in giving the necessary time to the instruction of assistants. Librarians generally have also felt an interest in the subject, realizing that the knowledge about books required by librarians and book sellers is to some extent the same.

The Index to vol. 46 will be issued with the LIBRARY JOURNAL for January 1.

THE LIBRARY JOURNAL

TWICE-A-MONTH

DECEMBER 15, 1921

AT this Christmastide, the fourth after the armistice, the thoughts of men at last turn toward a permanent peace, in assurance of great result from the Disarmament Conference at Washington. In 1910, when the Library, Bibliographical and other congresses were held at Brussels, in connection with its world exposition, men and women meeting there said to each other that the international ties with which the associations of scholars and workers had knitted the world together gave abundant assurance of peace, and on the field of Waterloo there was the kindly thought that not the centenary of the battle with France, but the hundred years of peace with French neighbors should be celebrated in 1915. Alas, the shadow and the contrast then! When the war came, the intellectuals of Germany backed up the Kaiser's war and the reliance of scholars was sadly disappointed. Nevertheless, it remains true that such associations as those like the American Library Association, which have nationalized our own country and gone forth into other lands, in thought of the brotherhood of common work and common aim, should do much to bring together not only allied but enemy countries into fresh and lasting relationship of peace. The Nobel Peace Prize has, in fact, been awarded this year to the Scandinavian professor who has made it his business to go into Germany and seek to establish among its scholars the basis for a resumption of friendly relations. When peace has really come to stay and economic relations are somewhat adjusted, it is to be hoped that the international relationship of English-speaking librarians with their continental brethren may be resumed and that thus new ties of brotherhood may be formed around the world. It is also to be hoped that American libraries generally will respond to the appeal, printed elsewhere, for the display at Christmastide of books relating to world peace.

* * * * *

AFREED Germany ought indeed to give opportunity for a wider library development, especially needed in a country where thus far

more has been done in the direction of service to scholars rather than to the people. The old spirit was sadly shown in a declaration of a participant in a German library meeting in 1890. "Meetings of librarians, and examinations for admissions to the library service . . . suit American conditions well enough, and are more or less practicable in England, but they would be quite out of place in Germany. Majority votes, such as take place at these conferences, would here have no meaning. . . . The course often pursued by the Prussian Government in the decision of important library matters, that, namely, of requiring a written opinion from some distinguished expert, secures the desired result far more simply. . . . In view of the more favorable state of affairs with us the example of other nations is of no importance." This was the Prussian spirit, a spirit incompatible with the spirit of the free library. France, which blazed a trail for popular libraries in the middle of the last century, is again turning toward people's libraries as a chief factor in democratic education. The new countries, like Czecho-Slovakia, are making strides in the same direction, and it is left for Republican Germany to do likewise, while Russia must await the return of a real democracy before the wonderful progress, initiated just before the war, may again take up the onward march.

* * * * *

IT was interesting and timely that the meeting of the university and college librarians of the Northeast at Columbia University last month should have opened its meeting with a paper on international relations. The plea of Mr. Edwin Bjorkman, the director of the publicity service for the League of Nations, for the organization of the world's intellectual work opens a subject of very great importance to all scholars and librarians. The mid-winter meetings at Chicago will include sessions of the university and college librarians of the Mid-west, as well as of normal school librarians, and it is to be hoped that the former, especially, will give attention to the broader aspects which open

new vistas of co-operation. Such work is properly complemented by closer organization within each country, and thus Mr. Gerould's suggestions as to the differentiation of library equipment and scope in our greater university libraries fitted in admirably. There could be no better aim at the present day than to obtain an organization on a world scale in which each country would do its part and in which the several elements within each country would take their lesser but not less important share.

* * * * *

WHILE the library profession has had the highest appreciation of Commissioner Claxton's work as the late head of the Bureau of Education, especially in his high regard for libraries, and lamented that this non-political post should have been made the subject of partisan change, it is none the less ready to welcome and appreciate the new Commissioner, who promises the same devotion to his work and interest in libraries that his predecessor had. Commissioner Tigert was born a college man, literally, on the campus of Vanderbilt University at Nashville, where his father was a professor; he was a Rhodes scholar at Oxford and traveled thruout Europe as far East as Budapest, and he has been Professor and President of universities in Kentucky, from which State he was appointed. He has accepted an invitation to make the address at the semi-centenary of the Grand Rapids Public Library which will be celebrated in January, and the library profession will await with interest his initial utterance in the library field.

* * * * *

WHEN the A. L. A. turned over nearly two million dollars worth of books and other property to Uncle Sam at the close of the war, unconditionally, setting the rest of the "Seven Sisters of Service" an excellent example, it was with the understanding that the Government would continue library work for soldiers and sailors into the times of peace. Consequently, two experienced librarians, Charles H. Brown for the Navy, and Luther L. Dickerson for the Army, were appointed in advisory or administrative relation with these Departments and the work promised well. It has been good work in both Departments, and the naval appropriations for the coming year insure somewhat over one hundred thousand dollars for books and service, while Mr. Brown has just started for the Pacific to make sure that the stations and ships in that part of the world receive the same consideration hitherto accorded on the Atlantic. Unfortunately, the work for the army is likely to be practi-

cally crippled for lack of requisite appropriation in the new budget. At most of the army posts the old "post exchange" or canteen has been happily replaced by a service club for the boys, where a hostess is on hand to make it possible for them to meet good women instead of the wrong kind, and a librarian is ready to give them the best of books and of service, and thus insure that leisure hours shall not be worse than wasted. An appropriation of one hundred and twenty-five thousand dollars for each of these two branches of cognate work was included in the estimates, but was ruthlessly cut out by an Assistant Chief of Staff in the task of pruning for the budget, doubtless without appreciation of what these features really meant. This sum involves the expenditure of only one dollar a year for the one kind and one dollar a year for the other kind of service in safeguarding the boys from the temptations of peace leisure—the best of insurance for the *morale* of the army—and it is to be hoped that some way may be found to restore the proposed appropriations in the budget.

* * * * *

CONSIDERING the number of men and women who have done great library service after passing the "retiring age," it is doubly to be lamented that a test of years rather than of service should be applied without consideration in such professional fields. An order just promulgated at the Naval Academy at Annapolis peremptorily retires any member of the staff who has reached the age of sixty-five, and this includes Arthur N. Brown, librarian of the Academy, who had made his mark in the library field before he began his excellent service at Annapolis. The action is the more unfortunate since there is no provision for retiring allowance or pension, and while the rule has been promulgated on the authority of the Secretary of the Navy, it seems scarcely possible that such cases as are here involved have been brought to his attention. The retirement law permits the retention in service for further periods of two years each of those whose services are specially valuable, all the more valuable because of the years of experience, and in the Library of Congress no less than seven efficient public servants have thus been continued, one of them a clerk in the Copyright Office eighty yers old, who, the Register of Copyright certified, was doing as good service at his desk as he did when he came into the Office a generation ago. It would, indeed, be a shame if, when a public servant is doing service of increasing value because of such experience of years, he should be turned out into the community as useless because of mistaken application of law.

LIBRARY ORGANIZATIONS

MIDSUMMER MEETINGS A. L. A. COUNCIL

PROGRAMS of the Council meetings were given in the LIBRARY JOURNAL for December 1.

The following resolutions to be offered are here given for the convenience of those attending the meetings:

Resolution Proposed by C. B. Roden, Chairman of the Committee on Committees for the Consideration of the Council.

Resolved: That the Council transmit to the Executive Board the accompanying report of the Committee on Committees, together with the following recommendations:

1. That the observations and conclusions concerning the several committees, embodied in the report, be considered in detail with a view to determining the proper status of each as a standing or specific committee.

2. That a by-law be formulated and submitted to the Association for adoption, creating and enumerating the several committees to be known as standing committees of the A. L. A. and defining their powers, duties and jurisdiction.

3. That the committees heretofore appointed by the Council, or by the President upon request of the Council, which are listed among committees of the Association and are performing duties or exercising powers for and in behalf of the Association, be reconstituted, reorganized or reappointed by the Executive Board, either as standing or special committees, or that they be merged with other existing committees or discontinued, as the Executive Board may determine. And be it further

Resolved: That committees created by the Council, or by its presiding officer upon request of the Council, are limited, as to functions, to consideration of, or assistance in, the business of the Council; and, as to membership, to persons who are members of the Council.

Submitted by the Committee on Committees.

Resolution Offered by Dr. Raney.

Whereas, The Authors' League of America proposes national legislation, including repeal of the so-called "manufacturing clause" in the present copyright law, in order to pave the way for the United States' entry into the International Copyright Union; and

Whereas, The American Publishers' Copyright League (now the Bureau of Copyright of the National Association of Book Publishers) went on official record at its last session as supporting such legislation only on condition that libra-

ries and persons be prohibited by law from importing the foreign (tho authorized) editions of works copyrighted also in the United States, except by permission of the American copyright owners;

Be it resolved, That the Council of the American Library Association records its pleasure at the prospect of authors' securing, without expense or formality, the international protection that is their admitted right;

Resolved, further, That the Council reaffirm, however, the Association's wonted disapproval of any measure that would curtail or cancel the existing privileges of importation, supported, as they are, by American precedent and violative neither of the Federal Constitution nor of foreign practice;

Resolved, That the Committee on Book Buying and that on Federal and State Relations be and are hereby instructed to take every proper and feasible measure toward rendering these resolutions as effective as possible.

Resolution Offered by the Special Committee on National Certification and Training.

Whereas, special committees of the American Library Association appointed for the purpose of studying and reporting on the proposal for a system of national certification for librarians have at two successive annual conferences reported unanimously in favor of the establishment of some such voluntary certification plan as has been presented in considerable detail in their successive reports and,

Whereas, in the system of national certification as projected, the A. L. A., as the principal body of professional librarians in the country, will naturally have a preponderant influence, and

Whereas, it is desirable that such a certification authority, in order to maintain a consistent policy and program over a long period of years, should possess the highest degree of independence of thought and action consistent with amenability to the matured judgment of the members of the library profession, and

Whereas, no practicable means of financing the activities of a voluntary certification board are yet in sight, and it is therefore inexpedient to organize such a board at once.

Therefore, be it resolved that the A. L. A.

1. Approves in principle the plan and purpose of voluntary certification of librarians, as set forth in the report of the special committee on national certification presented to the Council of the A. L. A. at Swampscott, Mass., and

printed in the volume of Annual Reports of 1920-1921, p. 78-88, and

2. Empowers and directs the Executive Board of the Association to appoint forthwith a special committee, which committee, in co-operation with representatives of other bodies interested in standards of library service, shall be charged with the following specific duties and be required to report at the next annual conference of the Association, to wit:

a. To prepare, with the aid of competent legal advice, articles of incorporation for state or federal charter for a national certification board for librarians, in which board the A. L. A. shall always have the power to appoint a majority of the members; and,

b. To report on ways and means of financing the activities of such a certification board.

CONFERENCE OF EASTERN COLLEGE LIBRARIANS

THE ninth annual Conference of Eastern College Librarians was held at Columbia University on November 26, 1921, about one hundred and fifty being in attendance, representing thirty different colleges, universities and reference libraries. Frederick C. Hicks, of the Columbia Law Library, called the meeting to order, after which a brief address of welcome was made by Provost William H. Carpenter, acting librarian of the University.

The first speaker was Edwin Bjorkman, director of the League of Nations News Bureau. His subject was "Organizing the World's Intellectual Work." He said that he spoke necessarily from the viewpoint of the League of Nations. The League was to take over the international associations of every kind all over the world, especially those which have public recognition. A survey has been made showing there are about five hundred recognized international associations and innumerable others. As a beginning three bureaus were taken over; the International Association of Assistance in Paris, to assist foreigners of every country; the International Hydrographic Bureau, to conduct research in the oceans of the world; and the Union

of International Associations of Brussels. This last had long ago begun the task of organizing the world's bibliography. It already has an index of 12,000,000 cards. How much work and time such an index means can be understood by librarians; and yet it represents only the beginning of a common mind for the world. Several organizations have been started, among them the International University, which met for the first time in 1920, with an attendance of about 147 students and 100 professors, apparently to the satisfaction of both groups. When many groups are working independently there is bound to be duplication of work; therefore in 1920 many leaders in medical work planned a complete research program. If this program is carried out research work in medicine all over the world will dovetail, and that of one organization will not duplicate that of another. There is a plan to appoint a committee of twelve men and women representing different nations to work out a system for organizing the world's intellectual work. It is to be hoped that when this committee is appointed, it will come together on an economic platform so that no personal sacrifice will be necessary.

Mr. Hicks, as chairman of the committee on Co-operation with the Institute of International Education, reported the publication in pamphlet form of a list entitled "Serials of an International Character," this list, compiled in the Columbia University Law Library, having been printed and distributed by the Institute of International Education. Mr. Lydenberg of the New York Public Library reported a second tangible evidence of co-operation, this being a joint list of German periodicals for the war period, lacking in American libraries. The clerical help for making this list was furnished by Dr. Duggan of the Institute. The Conference voted to send a message of appreciation and thanks for this help.

Mr. Lydenberg also requested that any inquiries about this list be sent to him and not to Dr. Duggan.

The report of the Committee of Differentiation of Field among the larger libraries was given by James T. Gerould of Princeton. Works on special subjects not available in one library may be available in another, and it is the work of the committee to find out what the holdings of the libraries actually are. When this is known, it can be decided which specific line each institution must develop. There are two methods to pursue to accomplish this: First, thru the institutions themselves. Libraries as a rule are too individual and are not developed as instruments of research as they should be. The present cost of books, of their cataloging, and

*No reply received to date indicating approval of this resolution.

housing may tend to correct this by forcing libraries to co-operate and to avoid duplicating each other's research material. Second, thru men in different fields. The committee has sent letters to the American Historical Association, the American Chemical Association, the Modern Language Association, the American Philosophical Association and the American Psychology Association, asking them to study their own fields and to base on that study a program of collection which would be available to all libraries. Most of these associations have not had their annual meetings as yet and not much has been accomplished. Mr. Gerould asked those present to take up the idea, which he is confident can be carried out, altho it may take years to show positive results.

In the discussion which followed, Mr. Goodrich of Dartmouth expressed himself as being ready to start on a small scale if he were sure that what he was doing would be acceptable to the committee. Provost Carpenter suggested that the problem might well be brought before the Association of American Universities. The same committee, with Mr. Gerould as chairman, was reappointed for another year.

M. L. Raney of Johns Hopkins spoke about two important bills now before Congress; one, the Fordney tariff bill, having certain provisions affecting duties on importation of books, the other concerning copyright. As a result, the following resolution, proposed by Miss Borden of Vassar, was passed:

Whereas, the Tariff Bill now before Congress (a) removes all foreign books from the free list—contrary to the practice of fifty-one years; (b) lays a duty upon institutions, when importing more than two copies—contrary to custom since 1816; (c) makes dutiable the immigrant's library if exceeding 250 dollars in value—contrary to the nation's policy since the second year of its existence; (d) removes textbooks used in schools and other educational institutions from the free list, where they are now properly placed, as a natural corollary to institutional freedom of importation; (e) raises the duty to 20 per cent ad valorem from the existing 15 per cent ad valorem; (f) and substitutes an American valuation for that of the invoice; and

Whereas, in the book sections, all the tariff enactments of a generation, no matter by which Party sponsored, have tended steadily to increasing liberalism; and

Whereas, this measure, as drawn, would raise prices, and check importations at a time of special opportunity, thus hindering the work of education, science, and scholarship, without compensating advantage to the government, or benefit to American industry,

Be it Resolved, That the Conference of East-

ern College Librarians, in regular annual session, records its disapproval of the Bill in these respects and urgently requests the amendments necessary to maintain the provisions now in force.

Important action has been taken relative to U. S. copyright revision, the details of which may be found in the *Publishers' Weekly* for October 1 and October 8, 1921.

The interest of college librarians in professional library degrees was the next subject. J. I. Wyer of the State Library, Albany, read a communication from Edith M. Coulter, relative to the academic standing of librarians, and asked that the Association of American Universities be asked to evaluate the degree of B. L. S. (Text in full in *LIBRARY JOURNAL* for November 15, p. 942). It developed in discussion that altho not all universities do not recognize the B. L. S. degree, some do; also that the Association of American Universities is opposed to adding any more degrees to an already long list of approved degrees.

After luncheon at the Faculty Club, the afternoon session, presided over by Mr. Keogh of Yale, opened with a paper by Edward F. Stevens of the Pratt Institute Free Library on "Contributions of College and University Librarians to General Literature." The predominance in the list of works on theological and religious subjects, especially up to thirty years ago, led to a speculation as to whether there might be any connection between librarianship and the religious life. Mr. Stevens' paper will appear in an early number of the *LIBRARY JOURNAL*.

Next came Ernest J. Reece, Principal of the Library School of the New York Public Library, with a digest of periodical literature relating to college and university libraries. This digest is given in the present number.

In "How About Those Subject Entries?" Asa Don Dickinson of Pennsylvania threw an unexpected bomb, in his revival of the question whether most of the subject entries in our catalogs might not well be dispensed with, greater use being made of "printed, annotated, cumulative bibliographies," and thus the expense of cataloging, the size of the catalog, and the labor of the seeker for material be reduced. The discussion, led by W. Coolidge Lane of Harvard and participated in by Ernest C. Richardson (Princeton), Isadore G. Mudge (Columbia), Mr. Filson (Lafayette), Harry Lyman Koopman (Brown), Henry E. Bliss (C. C. N. Y.) and others, was overwhelmingly against giving up the subject cards since this action would remove one of the most valuable tools of the reference librarian and others who need an inclusive rather than a selective list.

The final topic on the program, "Bookbinding

Costs," was presented by F. K. W. Drury of Brown, with an exhibit of Brown's use of the Gaylord binder as a substitute for regular buckram) binding on the one hand or tying in bundles on the other, for the less used periodicals. Mr. Drury's talk will appear in an early number. Bertha E. Blakely of Mount Holyoke reported that some of the regular assistants in the Mount Holyoke library had treated certain of their periodicals similarly, at even less cost.

On motion of Mr. Barr of Yale that the thanks of the Conference be extended to Columbia University for its continued hospitality, the formal meeting adjourned, being pleasantly continued informally for another half hour, during which tea was served.

ELIZABETH C. BUTTERWORTH
MARGARET ROYS

Secretaries pro tempore.

NEW JERSEY LIBRARY ASSOCIATION

A SPECIAL meeting of the New Jersey Library Association was held Tuesday, November 15th, in the Free Public Library, East Orange, with about one hundred and forty members present.

Shall the Association adopt a plan for the standardization and certification of librarians in the state? Shall the Association go on record as approving disarmament? Are branch libraries in school buildings desirable? What is the New Jersey Library Commission accomplishing? Do we as librarians need more facts or more criticism in our book reviews? Stated as questions, these were the main features of the meeting.

For the Committee on Standardization and Certification Louise G. Hinsdale, librarian of the East Orange Public Library, gave a resumé of plans and legislation in operation in a number of states at the present time, in conclusion asking whether legislation embodying certification and standardization would result in a repetition of the disadvantages of civil service as applied to librarians. Could not this be avoided by safeguarding the selection of the personnel of boards of certification and standardization? What would happen in states where there is already existing a Civil Service Commission? (Word had been unofficially received that the New Jersey Civil Service Commission would accept certificates granted by a State Board of Certification and Standardization in lieu of Civil Service examinations.) In any case, is not a voluntary system of standardization and certification rather than legislation advisable at the present time?

For the Committee, also, Thomas F. Hatfield,

librarian of the Hoboken Public Library, said that he had outlined a suggested plan for certification and standardization and had sent it to thirty librarians in the state asking them certain questions. Few replies had been received and these few had not been favorable. It was evident that more general information was needed.

In view of the great importance of the whole subject of standardization and certification, Beatrice Winsor, president of the Association, urged its further consideration before any action is taken, and suggested the advisability of devoting the greater part of the meetings at Atlantic City next spring to discussion of certification and standardization. The Association voted the adoption of this suggestion.

Mr. La Monte, vice-president of the Association, who had come directly from Washington, where he had been an interested observer of the Disarmament Conference, spoke most enthusiastically of the Conference and made a motion which was carried unanimously, putting the New Jersey Library Association on record as approving the Conference called by President Harding to consider the question of the Limitation of Armaments.

Edna B. Pratt, librarian of the Passaic Public Library, gave the experience of Passaic in operating branch libraries in school buildings, emphasizing the value of the use of school buildings where economy was imperative. The discussion that followed showed that in some cases where this same experiment had been tried various objections had developed.

Everett T. Tomlinson, president of the New Jersey Library Commission, told some interesting facts about the work of the Commission during the past year. Four hundred and twenty-three visits had been made; forty-five meetings held, nineteen of these in connection with library boards; 11,465 books had been purchased and 686,800 circulated.

"Fact and Opinion in Reviewing" was the subject of the talk given by Henry Seidel Canby, editor of the *Literary Review* of the *New York Evening Post*. After surveying the background of reviewing in this country, Mr. Canby pointed out the limitations of the general reviews of today, showing the real need of a critical review such as the *Literary Review*. A critical medium is needed by the general reader and by the librarian, the two kinds of readers to be considered. This critical review must contain both facts and criticism, but of the two criticism is the more important. Before evaluating a book, or the general reviews of a book, the reader often needs a critical background of the subject discussed. In other words, the reader must know the rela-

tionship of this particular subject to other subjects or to the larger subject of which this is only a part. Hence the need of the critical review. In conclusion Mr. Canby urged the use in every library of some such critical review. Such a review is needed to establish a liaison between the publishing world and the library's patrons.

Mary P. Parsons opened the discussion that followed Mr. Canby's address, showing how reviews in an individual periodical indicate the bias of that periodical, and urging the consideration of certain definite points by librarians before buying books.

ADELINE T. DAVIDSON, *Secretary*.

KENTUCKY LIBRARY ASSOCIATION

THE annual meeting of the Kentucky Library Association was held at Mammoth Cave, October 13-14.

The address of welcome by Florence Edwards, Horse Cave, was responded to by George T. Settle of Louisville, and was followed by the president's address, "Why a State Library Association?" by Florence Ragland of Bowling Green. James Watt Raine, professor of English language and literature at Berea College, talked on "Books and Culture." A symposium on books most in demand at the public libraries of the United States, selected from the list in the September *Bookman*, was conducted by Elizabeth Tunis, Danville.

At the afternoon meeting Charles D. Rush, librarian of the Indianapolis Public Library, discussed "Literary What-nots," and A. M. Stickle, professor of history at the Western State Normal School at Bowling Green, spoke on "Students and Books." The keynote and title of a talk by George Clovin, superintendent of public instruction, Frankfort, was "Understandest Thou That Thou Readest?"

Conferences were held Friday morning on large libraries and on college and school libraries. The first group was led by Jennie Flexner, Louisville. Harriett Boswell, librarian Carnegie Public Library, Paducah, discussed "Training Schools to Use the Library;" Susannah Bishop, librarian of the Carnegie Free Public Library, Owensboro, "The Elementary School," and Margaret I. King, librarian of the University of Kentucky, "The University Library." The High School was discussed by Ella C. Warren, librarian, Louisville Girls' High School, and Edna Grauman, librarian of the Louisville Male High School. Euphemia Corwin of Berea led the conference on college and school libraries, in which such topics as staff organization, care of reserved books, inventory, and the relation of the library to the faculty

were considered. The round table on small libraries was led by Fannie C. Rawson, Frankfort, who talked on practical ways of increasing the library fund. Florence Edwards, Horse Cave, spoke on "The Value of Book Reviews;" Beverly Wheatcroft, Frankfort, on loan work routine; while Mrs. Massie Allen of Bloomfield discussed "The Woman's Club and the Library," and Mrs. Mattie Henderson of Georgetown "Work for the Library Board."

The absence of Miss Rawson, Secretary of the Kentucky Library Commission and Secretary-Treasurer of the K. L. A., was regretted by all. She was prevented from attending by illness. The officers elected for the ensuing year are as follows: Euphemia Corwin, librarian Berea College, president; George T. Settle, librarian, Louisville Public Library, first vice-president; Mrs. Mattie Henderson, librarian; Georgetown Library, second vice-president; Harriett Boswell, librarian, Public Library, Paducah, secretary-treasurer; Beverly Wheatcroft, assistant, Kentucky Library Commission, member at large.

HARRIETT BOSWELL, *Secretary*.

IOWA LIBRARY ASSOCIATION

IOWA State College at Ames is always a busy place, but on October 12, 13, and 14th it was unusually so, for the Iowa Library Association was in session. There were in attendance one hundred and fifty-one librarians, twenty-eight trustees and assistants and thirteen visitors, making a total enrollment of one hundred and ninety-two, fifteen more than were present a year ago in Des Moines.

On Wednesday afternoon the meeting was called to order by the President, C. W. Sumner of the Sioux City Public Library. The association was welcomed to Ames by Dean Byers, due to the enforced absence of Dr. Pearson; to this hearty welcome Mr. Brigham gave a timely response. Greetings were sent to the Illinois and Wisconsin Library Associations then in session, also to the Parent-Teachers Association in session at Mason City.

Next came the report of the Iowa Library Commission by Julia Robinson, secretary. Thruout this report emphasis was placed on county libraries. Miss Robinson said that the number of towns in Iowa large enough to support a library has been almost reached and few more tax supported libraries can be expected, so that extension in the future must be in other directions. Ames was the only public library to stage a real campaign for a county tax, during the past year, but the effort was unsuccessful. Interest, however, in the county library idea is being shown by other libraries

and county fair exhibits have been used to call attention to the subject. Miss Robinson urged all librarians to give prominence to the county library idea when opportunity presented itself, but the present is a hard time to try to secure the tax. At the biennial meeting of the Iowa Federation of Women's Clubs in May at Clinton, a resolution pledging the assistance of women's clubs in the promotion of county libraries was passed and both the president and vice-president of the Federation referred to this resolution in their addresses before the district meetings held during October. Miss Robinson uses every opportunity given her of speaking at the various club meetings. She also recommended the adoption and putting into effect of a school library program which shall define the relations of public and school libraries and advance the school libraries of the state to a place approximating that held by public libraries.

The president's address followed, the theme of which was "Promotion of Library Interest in Iowa." According to Mr. Sumner, this could be the more easily accomplished by a larger Iowa Library Association membership of not only libraries and librarians but of assistants and trustees. In order that greater work may be accomplished in Iowa, there should be a definite plan or program of work, including among other activities an intensive campaign for one hundred per cent membership, organization of a trustees' section within the association, and appointment of a special committee to make a careful survey of all existing county library laws including recent ones passed in Missouri, Kansas and other states, with instructions to report and recommended to this Association at the next annual meeting such changes in the Iowa law as it deems wise and best. The Association should stand behind the proposed legislation in such a way that it may become law, when the Association should direct systematic and intensive effort toward securing operation of the law and its benefits thruout Iowa. He also urged membership in the American Library Association.

On Thursday morning Professor Noble read a most interesting paper on "Stepping Stones to Literary Taste." The theme of his talk was "How can we help people distinguish between poor books and good books? How can students be led to appreciate something better?" Under direction or compulsion they will read what they are asked to, but the big question is "What do they read alone?" Tracing the evolution of the art of fiction from the impossible to the improbable, from the probable to the inevitable he went on to show that the inevitable is true and the probable approaches truth, and since

lies impede progress, the hope of the future depends upon the amount of truth we can make ours.

Rose O'Connor, hospital librarian at Sioux City, spoke on "Hospital Library Work." She traced the history of hospital library work in general, and specifically, the Sioux City work. As a testimonial to the splendid work done in the Sioux City hospitals, John Ellis, an American soldier who had spent four months in a Sioux City hospital and who was then a student at Ames, told what the library service had meant to him while in the hospital.

"Why Belong to the Association?" was then discussed from the standpoint of a trustee, a librarian, and an assistant. J. J. Grove, trustee at Ames, E. Joanna Hogey, librarian at Cedar Rapids, and Eleanor Moody, assistant at Keokuk, all agreed that membership resulted in a greater spirit of co-operation, and that it ought to mean better state meetings, more funds available, and in all better service.

Round tables for various departments followed. In the afternoon a most interesting and enlightening address was given by Frederic G. Melcher on the library service that is being undertaken in the devastated regions of France. There, American libraries have organized for the first time public libraries which are a "joy to the children and a marvel to the grown-ups." Mary Emogene Hazeltine, preceptor of Wisconsin Library School, spoke on "A Shelf of Books and What Can Be Done with Them." The shelf was filled, not with the popular fiction or best-sellers of the day, but with books that introduce the greatest people and the highest ideals. The first two that Miss Hazeltine considered were Strachey's "Queen Victoria" and Trowbridge's "Queen Alexandra," and she linked with them Mrs. Robinson's "My Brother, Theodore Roosevelt."

Mary E. Wheelock discussed "Problems of Binding and Repairing."

The general book discussion that afternoon and the next morning had as its chief topics non-fiction, led by Grace D. Rose of Des Moines and assisted by four others; fiction, by Helen E. Allen of Onawa; reference books, by May M. Clark of Dubuque, and children's books, by Ruth Barlow of Clinton. Time did not permit Gertrude Haley of Fort Dodge to discuss children's books and reading. Her report will be printed in the *Quarterly*. Marian C. Manley, secretary of the Library Workers Association, spoke on the "Education and Training of Library Workers." Open and heated discussion followed.

The principal address of Friday morning was given by Carl H. Milam, secretary of the A. L.

A., on "County Libraries." Mr. Milam made the statement that the library work is forty years old, yet less than half the people of the United States have adequate book service. Unless those who are most interested in the library movement rouse themselves a bit more in the near future, Hawaii will have universal library service before we do, because Hawaii has a County Library law, the second great unit in the world to have such a law, Czecho-Slovakia being the first. California and Indiana have made the biggest strides in county library work of any states in the union, but other states are making splendid beginnings. Consolidated schools form a convenient nucleus from which to spread the county library idea. County surveys reveal the dire need of books. The Farm Bureau is another organization that should be reached.

Professor Wallis of the Department of Engineering Extension of the Ames Farm Bureau spoke of the reference work the college is now prepared to do for individuals as well as for libraries. This consists of package libraries made up in accordance with the requests for information. Professor Wallis stated that the material furnished in this way would in most cases be one or two years ahead of book publications on the same subject and in a few cases ahead of even pamphlet or magazine material. This will undoubtedly prove of inestimable value to libraries as much of the reference work done is concerned with recent technical developments or agricultural experiments.

One of the important steps taken in the business meeting was affiliation with the A. L. A. After a letter was read by Secretary Milam explaining affiliation, Mr. Brigham moved that we become a chapter of the A. L. A., and the motion was unanimously carried. A letter was read from Jesse Cunningham, librarian of St. Joseph Public Library, in regard to the proposition of a sectional meeting of the state library associations of Iowa, Kansas, Nebraska and Missouri to be held in St. Joseph in 1922. The matter was left to the executive committee, decision to be postponed till the district meetings of the spring.

Reports of committees followed. The legislative committee, W. F. Riley, chairman, prepared and caused to be introduced into the last session of the legislature new laws and amendments to existing laws, but many of them fell by the wayside. The net results, however, were to eliminate the former five-year contract provision for township libraries and to secure additional financial support for the library commission.

New officers were elected as follows: Presi-

dent, W. F. Riley, Des Moines; first vice-president, Grace Shellenberger, Davenport; second vice-president, E. W. Stanton, Ames; secretary, Mary E. McCoy, Indianola; treasurer, Mae Anders, Des Moines.

Social features of the state meeting included a tea the first afternoon, held in the Home Economic tea room, and was followed Wednesday night by a reception given by the Faculty Woman's Club, held at "Old Farm House," the home of Dean and Mrs. Curtis, and the oldest residence on the campus. On Thursday evening Zona Gale read from her "Peace in Friendship Village." Those who remained over Friday afternoon were delightfully entertained at tea by Mrs. Munn.

INDIANA LIBRARY ASSOCIATION

THE twenty-ninth annual meeting of the Indiana Library Association was held at Muncie, October 26-28, with a registration of over three hundred.

Mary Torrance welcomed the association members in behalf of the Public Library Board and the city of Muncie. Miss Torrance referred to the A. L. A. meeting at Swampscott as having been marked by strong inspirational qualities, and spoke of the closer union and the added strength which would come from affiliation of the state with the national organization.

Announcements were made concerning the banquet to be held on Thursday evening, which was to celebrate the thirtieth anniversary of the founding of the Indiana Library Association. Of the organizers of the Association only Mary E. Ahern and Mr. Cunningham were present at the meeting.

Azariah S. Root spoke on "The Human Factor in Library Service." He said that there are four essential factors in library work—the place, the books, the reader, the librarian. We need for librarians intelligent men and women with education and vision who will recruit others to the service thru their own demonstrations of its desirability. Librarians must see that recruits have suitable training. Library schools will be found ready to modify programs when constructive criticism is offered. One year's training is enough for college graduates, two years are necessary for high school students. A library assistant needs variety in work in order to gain breadth and development. Staff meetings should develop *esprit de corps*. The assistants should share in the new plans, new efforts of the chief. Staff meetings should be democratized; here methods and policies should be worked out. The Library Workers Association demonstrates the fact that there is an underlying feeling that privates in the ranks do

not have their full rights. Train people, make them happy, give recognition to work well done.

The Wednesday evening program opened with music, followed by an address by Dr. Paul Reinsch, of Washington, D. C., on "America and the Far East."

The college section, Johanna Klingholz, chairman, met on Thursday morning. Dr. Root opened the program with a talk on "The Qualifications and Salaries of College Librarians." The essential qualifications are first, business ability, that is, the ability to handle the routine machinery and deal with many people in a systematic manner; second, ability to organize—and here Dr. Root emphasized the necessity of having a manual or code book for the library setting forth definite fixed rules so that each assistant knows the reason for everything that is done; third, library training—because of the greater breadth of vision thereby gained; the value of the wider acquaintance with people of similar age and experience working in the same field, and the opportunity it affords for advancement; fourth, an intensive knowledge of books; fifth, knowledge of and sympathy with people, ability to work well with both faculty and student. In conclusion Mr. Root said that the library should be considered a department of the school and the librarian should rank as any other head of a department both in faculty standing and salary. If the library is such a large department that it employs as many almost as the whole faculty, then the librarian should rank as Dean as at Yale. Furthermore, the assistants should have a corresponding ranking just as in the faculty. This is absolutely the only way to insure the proper standing of the library. If the assistants are ranked as stenographers and clerks, then the library is not part of the educational work; it is only a part of the machinery of administration.

Mr. Cunningham of the Terre Haute State Normal School expressed his entire agreement with all that had been said. He stated that since 1892 the librarian there had been recognized as a head of a department.

Then followed Miss Wolfe's talk, on whether college students are able to use even the most elementary library tools. Her experience was that they did not even know how to use the dictionary properly. This year a questionnaire was given to the Freshmen asking how many of them came from high schools that had libraries, how many knew how to use a card catalog, how many could use the *Readers' Guide*, etc., and ended with the question of how many were willing to come Saturday nights to receive instruction. The result shown by the questionnaire was that few students really knew any-

thing at all about how to use a library but that a great many students wanted to learn and were willing to come Saturday nights.

Dr. Root described a course he gives at Oberlin which is a two-hour course for one semester. There are usually from forty to fifty but sometimes as many as ninety students in this class. Miss Klingholz told of the two-hour course she was giving at Evansville College for credit, and Mr. Lindley of Earlham told of several schemes they had tried, all, however, without credit, and the conclusion was drawn that a great deal of work on the part of the students is necessary if they are to benefit by the course, and not much work can be required without giving credit. It was decided that the ideal would be a course required of all the Freshmen for credit.

The Round Table on library assistants had Hazel Armstrong of Terre Haute as chairman. Orpha Peters, Gary, discussed "Cultivating the Library Spirit." Miss Peters said that there is always some kind of spirit, good, bad or indifferent, in any kind of store, corporation, institution, or individual. Spirit means animation, courage, vivacity, synonymous with life. Library spirit should mean all this and more. It means that sympathetic something that sends the patron away with what he wants or something he likes better. At staff meetings local conditions and outside interests should be discussed.

Miss Abraham, of the Indianapolis Public Library, spoke on "Keeping in Touch With Other Departments of the Library." The supreme purpose is growth. The policy of the library should be to allow reasonable time and progressive steps for growth. Exchange of positions is advantageous. Indianapolis has a system which includes five grades of service and a special grade which takes in branch librarians.

Miss Root considered "Library Assistants' Reading." The assistant's reading should not be very different from that of the librarian. Assistants *must* read. Reading at random is not the surest way for results. Wise reading is guided reading. Miss Winslow's compiled list for Indianapolis Public Library staff, offers good suggestions. The Wisconsin Apprentice Course outline is full of practical suggestions. The new books, book reviews, *Publishers' Weekly*, and A. L. A. *Booklist* are just as important for assistants as for the librarian. How many assistants are reading the *LIBRARY JOURNAL* and *Public Libraries*, as well as books of professional interest?

Cerene Ohr, Indianapolis Public Library, gave a short talk on their staff meetings. There are two groups: branch staff meetings and general staff meetings. At the branch staff meet-

ings last year they considered various classes of books, had outside speakers, and kept up with new books in each class, also the old time favorites. This year they are discussing publishers. The staff also gives reviews on books of advertising, music, nature, etc. At smaller staff meetings there is discussion of books issued that week and of what is being purchased and why, the why being important.

Della M. Northey read report of the committee on work with schools. Questionnaires were sent to six hundred schools in the state, to which few replies were received. There is little co-operation between the public library and the school and great need for a definite program.

Miss Scotten, head of the English Department of the Muncie High School, spoke on "What the Teacher Expects." It is her opinion that the librarian should visit the school to talk to the pupils and invite them to the library. At the library the children should find an atmosphere of welcome and friendliness, a special effort being made on the part of the assistants to make the children feel at home. In Muncie the librarian visits every fresh English class giving this instruction. She also makes a diagram of the library, showing location of the children's room, catalog and general classes of books on the shelves and distributes pages from the *Readers' Guide* torn from old copies. The teacher follows up this instruction with problems to be worked out by the pupils.

"What the Public Library Can Do for the Public Schools of Indiana" was discussed by L. H. Hines, president of the Indiana State Normal School. Mr. Hines stated the purpose of work with the school to form reading habits and prepare for study and investigation. The librarians' efforts should always lead the children to the best literature, in other words "To keep the dust off the standards."

"Some Obvious Flaws" was the subject of a talk given by O. H. Williams, supervisor of Teachers' Training. One of the problems which educators meet today is loose thinking due to loose reading and lack of concentration. Of the six hundred and fifty high schools of the first grade in the state, only one hundred and fifty have fair beginnings of high school libraries. The others have only scattering collections and no organization. This situation is due to lack of interest on the part of patrons and parents and lack of understanding and appreciation on the part of school administration. Some of the needs are a conception of standards and a definite program of co-operation, legislation thru well organized leadership and laws that provide adequate resources to carry on the work in the best way.

This talk was followed by a discussion by the librarians as to whether the work of organizing high-school libraries should be done by the librarians of the public library, and whether the library or the school should bear the expense of maintaining school and high school libraries. Mr. Hamilton expressed the opinion that a strong library service should cover the school service and not have the school service a separate thing. There should be one collection of books, one staff and one machinery to perform the city and school work. A motion was carried that the Executive Committee of the I. L. A. appoint a committee to confer with the Library Commission, the State Board of Education and the General Education Board, now making a survey in Indiana, on the matter of a definite program for co-operation in school work.

Miss McAfee opened the Thursday afternoon session with a statement concerning the brief life of the county library movement in Indiana, which, tho it had placed us high in the roll of states, has left us with much still to accomplish, since only thirteen of our ninety-two counties are giving full county library service. The work is yet without standardization, and the great obstacle to this is that there are many individualities with which to deal. The county librarian needs to be a student of the signs of the times, since, in the troubled, unstable condition of affairs, the county library runs the risk of playing the part of the innocent bystander in inevitable explosions. Most important of all, the county librarian needs to establish strong co-operation with county leaders, especially with teachers. Mrs. Isaac Palmer Caldwell, librarian at North Vernon, Jennings County, talked on "Co-operating with Other County Agencies." Mrs. Caldwell spoke of the value of connections with the county health officer, with the rural education board, the meetings of the Farmers' Federation, etc., mentioning the help she received from the County School Attendance Officer in selecting suitable locations for county libraries. The county church and Sunday school also offer great opportunities for library extension to the intelligent librarian. In closing, Mrs. Caldwell said that in 1920 the twenty-six stations in the eleven townships of Jennings County circulated a total book stock of 4,884 volumes, 51,590 times.

Esther Hamilton, librarian at Liberty, Union County, spoke on "Records for Librarian and Teacher," taking the view that teachers will not take the responsibility of keeping statistics, and should not be required to do so. This view was challenged on the ground that the library is an educational institution whose work parallels that of the school, and that accurate, classed statis-

tics are not too much to ask of teachers who are trained to keep records, since this brings a scientific knowledge of the reading needs of a community.

Della M. Northey, of the Public Library Commission, spoke on "The County Library and the County School," reviewing methods and citing examples in California, Oregon and Indiana, and touching upon the necessity of salvaging material already in schools and making this usable.

William J. Hamilton, Secretary of the Commission, gave a brief, spirited charge to librarians, in a talk entitled, "Putting in the Peg for 1922." Mr. Hamilton spoke of the hard, intelligent work which must back up the "charming smile" at the desk. The county librarian must be alive to the activities of others, with the feeling that new developments are possible to her community also. School service does not mean responsibility alone, but also opportunity. Personal contact which comes from visits is more important than desk details. The help of the librarians now operating in the thirteen counties of the state, was called on to bring to successful issue the library question in the remaining nineteen counties.

After the County Section, Alice Hazeltine of St. Louis read a most delightful paper which she called, "I Want a Good Book." She said we need to clear our shelves of the "harmless" book, the mediocre story, and keep there only the best. Children are really the best readers, many grown ups are "damaged." Poetry, hero stories, fairy tales, all minister to the child's needs. The young child is not so hard to fit, but the older boy and girl are very difficult. Books for this age should be most carefully selected and all new titles measured with the classics.

At the Trustees' Round Table, led by Mrs. W. A. Denny, Anderson, Harry Guthrie, president of the Muncie Library Board, spoke on "The Library on a Business Basis."

The banquet on Thursday evening marked the thirtieth anniversary of the Association.

On Friday morning E. H. Hyman, secretary of the Muncie Chamber of Commerce, gave a vigorous talk on "The Library and Business," in which he said that the business man does not realize the value of the library as a rule, because the public library does not interest itself in the business man. To create this interest visit the merchant personally and give his clerks books on salesmanship.

Gretta M. Smith, of the Publicity Department of the Indianapolis Public Library, spoke on "Selling the Goods." Miss Smith said that last year the papers had printed 1,480 publicity items which included lists of new books, exhibits, library teas, stories from the reports, etc. The

library has increased business without materially increasing investment. Outside organizations and interests reached include automobile shows, clubs, concerts and teachers' institutes. Signs on street cars were found useful, as were bulletins in dressing rooms at theaters.

In making her treasurer's report Miss McNitt called attention to the fact that about eighty new members had been added to the Association thru the personal efforts of Miss Torrance during the past year.

The Committee on Education for Librarianship by correspondence and conference has considered four subjects for report, as follows: 1. Recruiting for Library Service. Changed economic conditions have affected somewhat favorably the applications for library work, relating, however, mostly to the lower grades of service. The situation in this state may well be left to local handling. If lecturers are required in special instances the President of the I. L. A. or the Public Library Commission should be willing to recommend speakers. Personal vigilance on the part of librarians will be more effective, as well as more dignified, than promiscuous advertising. The larger aspects of the problem may well be left to the National Committee of the A. L. A. 2. An Indiana Library School. Owing to the fact that the meeting of the State Legislature will not come until January, 1923, it was deemed advisable to postpone a detailed report upon requirements as to funds, instructors and courses of instruction, affiliation, etc., to the coming year. A general consideration of the subject has led the committee to the following tentative conclusions. The present summer school should be continued. The school to be established should offer a full nine month course of instruction with certificate for its successful completion. It would preferably be conducted in Indianapolis, for there it would have the co-operation of a modern public library system, high school libraries, a state library, a college library, and law, legislative, reference and other special libraries; these should be available also as a field for practice work. There would also be available nearby county and township extension systems. It should be conducted by the Public Library Commission, or, as has been previously suggested in other quarters, it might be placed under a State Board of Library Commissioners, established to supervise and co-ordinate the work of the State Library and the Public Library Commission. 3. Certification of Librarians. In view of the present lack of knowledge as to the workability and success of certification systems and of the absence in Indiana of training for other than elementary grades it seems best that consideration of defi-

nite plans be held in abeyance for the present. We urge upon librarians generally the adoption of definite grades of service, with requirements as to training and efficiency until a state wide system can be developed. 4. Training of Teacher-librarians. The committee looks with considerable favor upon the work undertaken at the Terre Haute State Normal School in their courses upon the use of the library in public school work and on the organization and management of school libraries. It is to be hoped that these courses may be very successful and as they develop afford models for similar instruction in other normal schools.

Mr. Rush moved that the I. L. A., desirous of becoming a chapter of the A. L. A., authorize the president to appoint a committee of ten members who are also members of the A. L. A. to request affiliation, the nominating committee to name a delegate and an alternate, and the treasurer to pay the chapter dues. Motion carried.

The Committee on District Meetings reported meetings held as follows: January, Frankfort, Princeton, Whiting; February, Columbia City, Franklin, Marion; March, Rochester, Danville, Ill., Greencastle; April, Mishawaka, Cambridge City; May, Orleans, Aurora, Tell City.

The Committee on Resolutions extended the sincere appreciation of the Association to all who contributed to the comfort and happiness of the conference.

Officers for the coming year are: President, Winifred F. Ticer, Huntington; vice-president, Alice D. Stevens, Logansport; secretary, Elizabeth Ohr, Indianapolis; treasurer, Bertha Ashby, Ladoga; delegate to A. L. A. Council, Winifred Ticer; alternate, W. J. Hamilton, Secretary of Commission.

MINNESOTA LIBRARY ASSOCIATION

THE twenty-ninth annual meeting of the Minnesota Library Association was held at the St. Paul Hotel, St. Paul, October 31st to November 2nd, with a fine attendance of trustees and librarians of public and school libraries.

The first session opened with a short address by the President, Ruth Rosholt, followed by the reports of the standing committees. Clara F. Baldwin gave a resumé of library legislation. The new law presented to the legislature having failed to pass, several changes in the law were suggested and upon motion made by Miss Baldwin, supported by Miss Frost it was voted "That the president appoint a committee to formulate changes in the library law and consult with the Interim Committee on Education of the Legislature." Members of the Interim Committee are: Lt.-Governor Collins, Senators Jack-

son, Benson, Gooding and Soging, and Representatives Nolan, Christiansen, Hitchcock, Martin and Wallworth. The Membership Committee reported \$123 collected for M. L. A. dues, and \$14 for A. L. A. The membership totals 310, of which 36 are institutional members.

Miriam E. Carey of the Hospital Libraries Committee introduced Perrie Jones, who gave a most interesting talk on her work in the hospitals in St. Paul. Attractive posters that had been used in the campaign for books and also to advertise the project were most effectively displayed. Miss Jones presented a personal account of her work, told what the men asked for, and wanted, and what they were supplied with, and also gave an outline of the plan of organization as it had been worked out in St. Paul. Following Miss Jones' address mention was made of the work being done in the Minneapolis hospitals and also in the Mayo Hospital at Rochester. At the luncheon, held in the Palm Room, Mrs. James Forrestal of St. Paul, and Gratia Countryman of Minneapolis, spoke most enthusiastically on "Business Women's Clubs."

The afternoon session was opened with a roll call of libraries, each library being given two minutes in which to report some important thing that had been accomplished during the past year. The gathering was fairly transported to Swampscott with Mrs. Jennings' talk on the meetings of the A. L. A., and Charlotte Matson's vivid and amusing account of a motor trip to the conference. Elizabeth Robinson, reporting for the A. L. A. Committee on Education, made the following points, gathered from a questionnaire sent out to the libraries in the state: More cooperation between schools and public libraries; help in standardizing methods, and higher standards for high school libraries; standardized course of instruction for all state teachers' colleges and the need of a course at the university to give thoro library training. The following suggestions were gleaned from reports of other states and were emphasized by the committee: Know your Library Division of the State Department of Education and use it; rank and salary of librarians in universities and colleges should equal that of teachers; definite, uniform courses of instruction should be given in all normal schools, as well as courses in children's literature with emphasis on inspirational reading.

In general it was suggested that as a means toward the end in view every effort should be exerted to "sell yourself and your library" by building up your collection, by allowing adequate quarters in your building for expansion, by exhibiting your wares wherever and whenever possible, by attending and participating in meet-

ings, by presenting convincing budgets and rendering every possible assistance to patrons.

Miss Countryman gave a brief comparison of the progress that had been made by the Association from its beginning in 1892 with a few people to its present membership. She also outlined the new A. L. A. plan of affiliation, but as time was pressing action was deferred until Wednesday, when the Association voted to affiliate with the A. L. A., electing Margaret Hickman the M. L. A. delegate, with Harriet Wood as alternate. The Twin City Library Club acted as host to the Association at a dinner at the Woman's City Club, at which Miss Gold, who had recently returned from an extended visit to China, gave an interesting talk on library affairs in the orient. The day's activities closed with a visit to the beautiful James Jerome Hill Reference Library, which is soon to be opened to the public, and a reception held in the Art Gallery of the St. Paul Public Library at which Mrs. C. L. Atwood gave an interesting talk.

On Tuesday morning the session opened with a report of the Certification Board, by Miss Baldwin. Considerable discussion took place as to plans toward aiding in certification. The Association approved recommendations that the proposed scheme be modified to harmonize with the plan proposed by the A. L. A., granting certificates in Classes 1, 2, 3 and 4 for different grades of positions (see LIBRARY JOURNAL, July, 1921, p. 604); that the statement from the report of the A. L. A. Committee on Certification be adopted as follows:

"No applicant now in service would be subjected to examination other than the statement of facts submitted in making formal application for certification. It is now believed that each worker should be accepted and certified on the basis of what he is now doing and not be made to suffer any disadvantage for lack of formal training;" and that an annual registration of librarians be made in order to keep records up to date. It was voted that the Legislative Committee and the Certification Board formulate a law to be reported at the next state meeting and upon action of the association at that time to be sent to the next legislature. The report of the Standardization Committee was briefly summarized and it was recommended by the chairman of the committee that the committee be discontinued and their findings turned over to the Certification Board.

Mrs. Jennings of St. Paul reported on the work of the Committee for the purpose of inaugurating a course in library science at the university of Minnesota. The report suggested that the entrance requirements be the same as for General Arts Course, and the first two years of

the course the same as the Arts Course; that the third year courses be chosen from those especially helpful in library work, e. g., languages, literature, history, sociology, economics and science; that a reading knowledge of French and German be required for admission to the fourth year, which will be devoted to library science; and that the completion of the four year course lead to the degree of Bachelor of Arts or Bachelor of Science.

It was recommended that the standards of instruction adopted by the Association of American Library Schools be accepted. These are, in substance, that the faculty shall aggregate at least two full time instructors, and at least two of the instructors shall have had one year of training in a library school.

The following definite recommendations are submitted to the President and Board of Regents of the University of Minnesota for their consideration: (1) That early provision be made to offer a course in the use of books and libraries; (2) That a course in library work in schools be offered. (This was given by the College of Education during the year 1915-16 by Miss Wilson, state supervisor of school libraries, and similar arrangements might be made with the State Department of Education at this time); (3) That provision be made by the University for the continuation of the summer school for library training established by the State Department of Education, thus ensuring university credit for satisfactory work done in this school.

The report was signed by W. Dawson Johnston, St. Paul, Chairman; Jennie T. Jennings, St. Paul; Gratia Countryman, Minneapolis; Alma Penrose, Carleton College, Northfield; Harriet Wood, State Department of Education.

Frank K. Walter and Ina Firkins, librarian and assistant librarian of the University of Minnesota, while heartily in sympathy with the movement for library training in the State of Minnesota, did not feel that as members of the university faculty it would be proper for them to join in direct recommendations from organizations outside the university in regard to matters which require action by the University authorities, and did not vote.

The Association voted to make a strong resolution to be presented to Dr. Coffman, urging the inauguration of a course in library science at the university. It was also moved and supported that the Resolutions Committee and the Committee on Courses in Library Science draw up resolutions to be submitted to the university authorities.

Miss Carey discussed recruiting for librarianship and urged a renewed effort and impetus for attracting the best talent into the profession.

The Resolutions Committee advocated an extensive campaign in their report. "Training Students in the Use of the Library" was an account of the work that Ruth Ely has done with student teachers at the Duluth State Teachers College, and of some of the aims and aspirations in this field. It was suggested that a resolution embracing the establishment of library courses in state teachers colleges and high schools with full credit for work done be made. This was referred to the Resolutions Committee and was embodied in their report. Alma Penrose, of Carleton College, and Mary A. Tawney of Minneapolis, gave accounts of the work which they had done with college and high school students, respectively.

At the luncheon session, Mrs. Walter J. Marcle presented some striking facts about war and arms, in a clear and vivid talk, which was followed by a short description of what the League of Women Voters is doing in their program of educating women for citizenship. Gladys Harrison, representing the League, gave this address, while Sophia Hall told what the Municipal Reference Bureau of the University is doing. The President was authorized to send a telegram to President Harding informing him that the Association approved the reduction of armaments and the prevention of future wars. An appropriate resolution was also presented by the Resolutions Committee and approved.

The afternoon was devoted to a round table discussion on eliminating non-essentials, with Miss Wood presiding. Some of the topics brought up were useless books on the shelves, out-of-date and worn-out books, misfits, mistakes in purchase, short service and gift books. Government documents received notice as well as the types of accession books, shelf list and catalog cards used. Short cuts in circulation and registration were mentioned by various librarians who were using new schemes.

The St. Paul Association entertained the Library Association with a most enjoyable motor trip around the city, visits being made to several branches of the St. Paul system. Dinner was served at the Gopher Inn, after which a tour of the Capitol was made. The dinner speakers were Frank K. Walter of the University Library and J. M. McConnell, of the State Department of Education. Later in the evening the visitors toured the Historical Building, where many treasures were displayed for their especial benefit. An illustrated lecture on Minnesota history was given by the Curator of the Museum, W. M. Babcock, Jr.

The Trustees Section opened on Wednesday morning with a paper by Mrs. R. H. G. Netz of the Owatonna Library Board who strongly

urged budgets on a standardized basis. Trustees from Red Wing, Stillwater and Eveleth gave short talks. Nelle Olson of International Falls told of what her library was doing for the men of her community. Social service as well as personal and library service plays a large part in the successful development of any up-to-date library nowadays. "Books for Business Men" was ably handled by Mary W. Dietrichson, who talked on what the Business Branch of the Minneapolis Public Library is doing. "Selling the Public Library From a Publicity Man's Point of View" was the topic assigned to W. E. Lunnis of the Greve Advertising Agency. Two important factors that Mr. Lunnis emphasized were the "psychology of inducement" and the "power of visualization." E. W. Randall, president of the St. Paul Association, addressed the association at the luncheon held in the Palm Room of the St. Paul Hotel. Mr. Randall's greeting was appreciated as was also the hospitality that the St. Paul Association had given. A film picturing library work in the devastated regions in France was shown.

The afternoon session was a joint meeting with the School Libraries Section of the M. E. A. and was presided over by Bessie Scripture. The program consisted of a book symposium, and was opened with "Books for Teachers" by Miss Beatryce Finn of Hibbing. Miss Finn reviewed several books that would make an appeal to teachers as well as students. An admirable paper on children's reading was given by Claire Nolte of Virginia. Miss Nolte appealed for the purchase of better editions of children's books, even tho they were more expensive, in place of several copies of the popular titles that most libraries supply. "Should Librarians Read?" by Lucy Lee Powell, reviewed a short but enticing list of biography, poetry, travel, essays and fiction. Interesting lists supplementing all three addresses were distributed. Miss Scripture gave a short report of "Libraries in Education," the report having been submitted by Sherman Williams, president of the Library Department of the N. E. A. A motion was made and seconded that the M. L. A. joint session approve the report of "Libraries in Education."

The Resolutions Committee, besides bringing in for approval the resolutions already mentioned, and extending thanks to all organizations and individuals contributing to the comfort and pleasure of the association, resolved that a Committee on Legislation be appointed to study proposed changes in the State Library Law, and confer with the Interior Committee on Education. It was also resolved, "That we deeply regret the loss of Dr. W. Dawson John-

ston, Librarian of the St. Paul Public Library, who has rendered a distinct and valuable service to the library profession of the state by his furtherance of library training, his work for raising the standards of the profession and his steady encouragement of high ideals. We congratulate the American Library Association on having secured him, realizing that our loss is its gain, and we rejoice that so distinguished an honor has fallen to one of our members in receiving this appointment, even tho we can scarcely hope to fill his place."

By courtesy of the Hospitality Committee of the Woman's Subdivision of the St. Paul Association, the last session of the conference was held at the Athletic Club, where a dinner was served to 350 guests. Dr. Richard Burton introduced Carl Sandburg, the speaker of the evening. Mr. Sandburg gave a most interesting exposition and interpretation of the new poetry movement, defining the new poetry and reading from his own poems and last of all singing some American folk songs. Mr. Sandburg delighted his hearers for more than an hour with his readings from "Smoke and Steel," "Cornhuskers" and "Chicago Poems." His story soon to be published by Harcourt, Brace and

Co., called "How the Thumb on the Nose of Bimbo the Sniff Was Fixed," proved most amusing.

The following officers were elected: President, Alice M. Dunlap, Duluth; first vice-president, Nelle Olson, International Falls; second vice-president, Mrs. Claude Perkins, Pine Island; secretary-treasurer, Grace Stevens, Virginia; ex-officio member, Ruth Rosholt, Minneapolis.

MARGARET HICKMAN, *Secretary.*

AMERICAN MERCHANT MARINE LIBRARY ASSOCIATION

THE American Merchant Marine Library Association's plan for "A Library on Every Ship" in the Service has been endorsed by the American Steamship Owners' Association and an effort is being made to collect from ship-owners and others interested \$20,000, which will secure a grant from the Carnegie Foundation. Most of the quarter million books taken over from the A. L. A. merchant marine service are in good condition for use by this new Association which has its headquarters at 82 Beaver Street, New York City.

THE OPEN ROUND TABLE

STANDARDS AND CERTIFICATES

To the Editor of the LIBRARY JOURNAL:

It was very gratifying to read the article in the LIBRARY JOURNAL for November 1, and find one of the leaders in our library world voicing so pointedly the objections to a certification plan which, to some of us in applied libraries, seems to mean the eventual outlawing of most of our associates.

Personally I feel that library work is far too much standardized already. We can standardize parts of locomotives and parts of cars; but the government's experience sets at rest the question of standardizing locomotives and cars. Not even cars intended for the same class of traffic can be standardized. We can standardize cataloging rules, but who will standardize the cataloger or standardize the administration of business, university, state and city libraries? How can we standardize the city library of Pittsburgh with that of Washington, D. C.?

In short, what we look for and employ is personality, plus education and experience, plus technical training—and the greatest of these is personality. In the smaller libraries, of the

class with which I am associated, educational training and experience come next—and training we may or may not get. One of the little group in this library has had the very highest grade of training, another had never seen the inside working of a library before she came to us—yet we would not willingly part with either.

As a people we are regulated almost to death. For the boil on the body politic we can think only of the poultice of a statute! Our constitutions read like essays, our laws have become by-laws, if not by-words, and all because individuality—that prime essential in a republic—is not led and instructed, but tramped on. "All we like sheep" race to the legislature. The influence of the press, of the pulpit, of the rostrum, of our many educational institutions, lies unheeded. If a citizen does wrong, "Pass a law," we say, "so that we can put him in jail. Why waste time trying to make him a man who won't want to do wrong!"

And so with our little legislative rubber stamp on the members of our craft we shall keep out any who dare enter save by the appointed route.

How absurd it is to apply the parallel of certification to the examinations required of doctors and lawyers before they are permitted to practice. These examinations may protect the citizen from employing one not adequately prepared to do medical or legal work. But what board of trustees, or what librarian would employ any person, no matter how plastered with certificates, as a citizen employs a doctor who lives around the corner? In considering the employment of a library worker, inquiry is made into personal qualifications, before and above all else, and in most cases personal interviews are necessary before a selection is made. The candidate could be certified with as many degrees as a thermometer and yet not be satisfactory; and so, why certification?

We should, of course, strengthen the schools all we can; raise their standards and widen their scope; invite into the profession those trained in science and economics as well as literary specialists. But certification will tend to keep out the scientifically trained and those of economic bent, and will read out of the profession many libraries which are aiding very substantially in spreading information. The years during which a man secures his scientific or economic training are usually those which the library school graduate spends in learning library methods. If he cannot get into the library craft without spending additional time he is lost to us.

The notion that a librarian can be a pure executive without knowing much about the application of books is fading in library circles

as it faded some time since in the business world. Yet there still persists the feeling that unless one knows the Shakespeare folios or can quote from George Bernard Shaw he is not a librarian; and that if a man is informed and works in economics he is not a librarian—he is an economist. I have no sympathy with this feeling, or with the implied limitation of our professional scope; yet I see its influence in certification; and the irony of it is that we seem to have lost Dr. Williamson himself in this very shuffle!

RICHARD H. JOHNSTON, *Librarian.*

*Bureau of Railway Economics,
Washington, D. C.*

To the Editor of the LIBRARY JOURNAL:

I wish to say Amen to the opinions expressed in Mr. Dana's article on Certification and Civil Service Control recently published in the LIBRARY JOURNAL. New York State, thru the activities of those high up in the State University, has passed a law whereby Boards of Trustees are hereafter to be appointed by the Mayor, Selectmen, etc.—and thus cities whose Trustees are now appointed by the Board of Education, find their libraries another plum for the politician and Civil Service exploitation. And so it goes from bad to worse—librarians applauding the manoeuvres of the “certifying,” “examining,” “investing,” “standardizing” committees.

R. W. TOWER, *Curator of Library,*

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department. Replies should be addressed directly to the ADVERTISER, either at the address given or under the key letter in care of this office.

POSITIONS WANTED

Library school graduate with college preparation and over ten years' experience wants position in public library. Cataloging or reference work preferred in East or Central West. Can begin immediately. Address Z 22, care of the LIBRARY JOURNAL.

Librarian's secretary with twelve years' experience under two librarians in two cities desires further experience elsewhere. Has had experience in order work and catalog typing also. Best references. Address M. M. 22, care of the LIBRARY JOURNAL.

POSITIONS OFFERED

The Montana State College, Bozeman, wants someone to work half time as assistant cataloger and half time as desk assistant. Salary \$1,800. College graduate with at least one year in a recognized library school. Address Elizabeth Forrest, librarian.

The Cleveland Public Library desires applications for positions as junior assistants and assistants for vacancies in the Main Library, in Branch Libraries, in Catalog, School and Children's departments. Applicants should have had one year in library school or a number of years library experience, and a good general background, a genuine interest in public library work and the capacity to develop. Initial salaries, \$1,200 to \$1,600.

AMONG LIBRARIANS

The following abbreviations are used:

- A. Library School of the Carnegie Library of Atlanta.
- C. California State Library School.
- C.P. Carnegie Library School of Pittsburgh.
- D. Drexel Library School.
- I. University of Illinois Library School.
- L.A. Library School of the Los Angeles Public Library.
- N.Y.P.L. Library School of the New York Public Library.
- N.Y.S. New York State Library School.
- P. Pratt Institute School of Library Science.
- R. Riverside Library School.
- S. Simmons College School of Library Science.
- S.L. St. Louis Library School.

- U.C. University of California Course in Library Science.
- Wis. Wisconsin University Library School.
- W.R. Western Reserve Library School.
- Wash. University of Washington Library School.

CAMPBELL, J. Maud, director of work with foreigners for the Library Division of the Massachusetts Department of Education, becomes librarian of the Jones Memorial Library of Lynchburg (Va.) in January.

COOLIDGE, Archibald Cary, Director of the Harvard University Library, is in Russia in connection with the work of the American Relief Expedition.

CORDINGLEY, Nora, 1911-12 N. Y. P. L., formerly assistant in library of the Metropolitan Insurance Co., appointed cataloger Research Bureau of the Roosevelt Memorial Association.

ELLINWOOD, H. Della, librarian of All Saints School, Sioux Falls, South Dakota, died suddenly of heart failure on October 18th.

FERCUSON, Kate Dorothy, is now head of the Branch Department of the Fresno (Calif.) County Library.

HEDRICK, Blanche, recently secretary of the North Dakota Library Commission, is now chief of the Cataloging Department of the University of Michigan Library at Ann Arbor.

HEDRICK, Ellen, chief classifier in the University of Michigan Library at Ann Arbor, is spending a year's leave of absence at work with Mary E. Downey at the North Dakota Library Commission.

HICKS, Frederick C., law librarian of Columbia University, is author of "Men and Books Famous in the Law," published by the Lawyers Co-operative Publishing Company, Rochester, N. Y.

HUBBARD, Anna Gilkeson, chief of the order department of the Cleveland Public Library, was married to William Ruggles Watterson on December 9th. Mr. and Mrs. Watterson will live at 12388 Cedar Road, Cleveland, Ohio.

IVANOVSKY, Catherine, is making a list of works in Russian dealing with Russian history, folk-lore, economics and fine arts in the Harvard Library. She is also assisting in the catalog department.

JEBSEN, Elisa, who left the Harvard University Library in 1919 to act as librarian at the Statistiska Centrebureau in Christiania has returned to Harvard and is working on the formation of the union catalog of Scandinavian books which is being compiled for the American-Scandinavian Foundation.

KENNEDY, Kathleen A., associate librarian of the Lynn (Mass.) Public Library, has resigned to become librarian of the town library of Wellesley.

MCNEAL, Louise, succeeds Mrs. Adrian L. Greene, who was for many years secretary of the Kansas Traveling Libraries Commission and who died in May after several months' illness.

NETHERCUT, Mary B., 1913 Wis., librarian of Rockford College, Rockford, Illinois, appointed librarian of the College of Emporia.

ORVIS, Caroline, 1916-1917 I., has recently been made secretary of the Information Bureau of the Extension Division, University of North Dakota.

OSBORN, Mary L., 1913-15 N. Y. P. L., librarian of the Art Department of the Cheney Silk Co., appointed librarian of the Towson (Md.) State Normal School.

RANEY, M. Llewellyn, librarian of Johns Hopkins University and chairman of the A. L. A. Committee on Book Buying, will represent officially the American Council on Education, the A. L. A. and other organizations, at the Tariff hearing before the U. S. Senate Committee on Finance, on December 21.

SKARSTEDT, Marcus, who resigned the librarianship of the Evanston (Ill.) Public Library to join the firm of Reuben H. Donnelly, is now a member of the California State Polytechnic School at San Luis Obispo.

SNYDER, Mary B., 1912-13 N. Y. P. L., appointed librarian of the Michigan City (Ind.) Public Library.

IN THE LIBRARY WORLD

MASSACHUSETTS

Boston. The city has named the intersection of Cambridge, Troy, and Chambers Streets Krigel Square, in honor of Frank J. Krigel, who was a member of the staff of the Boston Public Library and who died in January, 1919, while in service overseas.

RHODE ISLAND

Recent gifts to public libraries include: \$500,000 bequest of the late William H. Hall to the William H. Hall Public Library, which in February absorbed the Edgewood Free Public Library established in 1896; \$125,000 from the estate of the late Edith Knight for the Elmwood Public Library, established in 1915, and a bequest of \$75,000 from the same estate for the Pontiac Free Library.

NEW HAMPSHIRE

Nashua. A library for children was opened recently under the charge of Edna Ledger. This is the first library for children in New Hampshire.

NEW YORK

A series of comprehensive tables of all public or association libraries of New York State making reports to the Library Extension Division of the New York State Library, arranged in six groups according to the population of the community, is a feature of the issue of *New York Libraries* dated February, 1921. The population of the community in 1920, library quarters (owned, rented, rent-free, etc.), the value of library buildings and sites, number of volumes in library, circulation in 1920, circulation of fiction, receipts from local tax and other sources, expenditures for salaries and for books, periodicals and binding, and the average cost per volume of circulation are tabulated.

The population given for each place is for the city, village or district in which the library is immediately located, without taking into account the indubitably larger but indefinite territory served by some libraries. For public libraries in the cities, the numerical data for all the branches are merged in single sums and only gross figures are indicated. Each registered branch, however, is recognized as a library by Regents Rules, and in counting the number of branches in each group each such branch counts as one. In arriving at the "average" for the different items of each group only places or libraries contributing a positive part to the whole are taken into account. Several libraries are supported by private persons or families

who make no statement as to amount contributed or expended. The omission of such figures from the totals and averages makes these totals and averages appear somewhat lower than they actually are, but the difference is not great. University and college libraries are not included, even tho they give a certain amount of free service and are registered by the Regents, except in one case where the university library is the only public library of the community.

LIBRARIES. With these reservations it is found that the total number of cities, villages and hamlets in New York State having public libraries is 471, and that the total number of public libraries, including registered branches, is 599. There are in the places of the first group (over 200,000 population) one hundred and fifty-six public libraries; in the second (between 5,000 and 20,000), fifty-nine; in the third (between 2,000 and 5,000), eighty-eight; in the fourth (between 1,000 and 2,000), eighty-one; in the fifth (between 500 and 1,000), sixty-four; in the sixth (below 500) one hundred and eighteen. Ten incorporated places with population over 5,000 have no public library; twenty-eight between 2,000 and 5,000 population; thirty-eight between 1,000 and 2,000 population; sixty-four between 500 and 1,000 population, making in all one hundred and forty incorporated places with a population over 500 without a public library.

POPULATION SERVED. Since the total population of the state is 10,384,144 and the population of all places having public libraries is 8,737,552, there remains a population of 1,646,593 having no public libraries, or a number equivalent to the combined populations of Maine, New Hampshire and Vermont.

TAX SUPPORT. Three hundred communities give tax support to four hundred and nineteen public libraries and one hundred and seventy-one have one hundred and seventy-nine libraries but give no tax support. In the first group of cities only one, having a population of 38,917, provides no library support from local tax; in the second, eleven, with a total population of 136,713; in the third, twenty-two, with total population of 70,470; in the fourth, twenty-eight with total population of 35,951; in the fifth, forty-three with total population of 31,314 and in the sixth, sixty-four with total population of 17,892. The total population of the 171 places having libraries but yielding no tax support is 324,057, which, added to the 1,646,593 having no public libraries, gives a total

population of 1,970,650 paying no library tax. The total population paying a library tax is 8,423,491, and the total amount thus raised \$2,299,062. The average amount per capita paid by communities having tax-supported libraries is twenty-seven cents. The average per capita tax for cities in the first group is thirty cents; for places in the second group twenty-one cents; in the third, twenty-eight cents; in the fourth, twenty-seven cents; fifth, fifty-six cents; and sixth, thirty-nine cents.

CIRCULATION. The average per capita circulation for all libraries in 1920 was 3.21 volumes; for libraries of the first group, 3.02; the second, 3.14; the third, 4.93; fourth, 7.66; fifth, 9.15; and sixth, 8.78 volumes.

INCOME. The total income available for all libraries was \$3,734,825. The income per capita for the entire population having libraries was forty-four cents; for the first group, 45.1 cents; second, 28.5 cents; third, 46.6 cents; fourth, 63 cents; fifth, \$1.07; and sixth, \$1.00. The general average of income available for libraries of all the groups was \$6,312; for the first, \$22,822; second, \$2,696; third, \$1,496; fourth, \$874; fifth, \$653; and sixth, \$291. In addition \$1,435,763 was received from other sources than local tax; of this sum those in cities of the first group receive \$1,367,525. The value of library buildings for all places is \$49,703,380, in cities over 20,000 population, \$45,904,682.

BOOK STOCK. There were 8,637,159 volumes in all libraries; in cities over 20,000 population, 6,531,682. These cities circulate 23,210,506 of the total circulation of 28,061,009 of which 19,163,657 is fiction.

EXPENDITURE. Libraries spent in all \$2,271,926 in salaries and \$864,587 for books and binding. Libraries of the first group spend \$2,080,686 and \$747,479 respectively on these items. The percentage of total income applied to salaries in the first group was 59.8; second, 50.3; third, 41.2; fourth, 37; fifth, 31.9; sixth, 27.2; and the percentage applied to books, periodicals and binding in the first group was 21.5; second, 24.2; third, 23.6; fourth, 25.8; fifth, 28.3; sixth, 28.3.

New York. The Columbia Law School is approaching its century mark and a plan has been inaugurated to enlarge its library so as to make it the equal of the largest law libraries in the world, instead of the fourth as it now stands, having a total of 95,581 volumes. A Columbia University Law Library Association has been formed. Librarian Frederick C. Hicks is president and Lawrence H. Schmelh secretary-treasurer. The objects of the Association are to fos-

ter interest in the Library, to encourage donations of books and collections, to build up a loan collection, and to protect the Library's collections from careless and unfair use.

NEW JERSEY

Newark. An appropriation of \$1,000,000 has been made by the city for two branches for the Newark Free Public Library.

MICHIGAN

Kalamazoo. The Kalamazoo Public Library combines an annual report of one sheet with an account of practical service rendered the community and an invitation to business men to make more extensive use of its resources.

The year ending July 1, 1921, saw 16,159 registered borrowers, or thirty-two per cent of the population, and 236,884 books loaned.

Children borrowed 95,746 books from the Central Library, the three branch libraries, Portage, East Side, and Northwest, and the five school stations.

About fifty-four per cent of the children of Kalamazoo are registered borrowers.

ILLINOIS

Chicago. Until May 1, 1920, the John Crerar Library was in its old quarters and furnished practically normal service. From May 3d to August 28 it was closed to the public and routine work was partially suspended while the library moved into temporary quarters. The space on the seventh floor of the Marshall Field and Co. Building was given up in April, that on the fifth floor during July, and the sixth floor at the end of July, after possession of over a quarter of a century, from July 1, 1895. The temporary quarters were established in the building at 158-162 North Michigan Avenue, belonging to the Library and adjoining the new building, with which it was later connected. Routine work was assigned to the top or fifth floor, and the other floors used for storage of books and furniture. In August the third floor of the new building, with an area of 5,000 square feet, was equipped as a temporary reading room and on August 30th opened to the public from 9 a. m. to 5:30 p. m., offering the use of current periodicals both general and medical, of the most used reference books, also both general and medical, of the public catalogs, and a limited but constantly increasing use of the books in the stacks. In December the removal to the permanent quarters was begun, the first book being placed in the new stacks on December 6th.

The bulk of the books were removed in thirty-four trucks constructed by the janitor, seven of which were held in reserve. Each truck con-

sisted of three boxes, three feet long, eighteen inches wide and eighteen inches high placed one over the other on their sides, screwed together and the bottom one secured to a frame mounted on four wheels. A waterproof cloth cover fastened over the open side. The cost of the material was only about six dollars for each truck. Each box contained exactly two shelves or about one hundred and thirty-five volumes. The dray used held nine trucks or about one thousand two hundred volumes and seven dray loads made the work of a day of eight hours. The principal factors in determining the speed of the work were the capacity and availability of the elevators. Three hundred thousand volumes were moved in less than forty working days, together with some furniture. To accomplish this, the force employed was eight men, two each at the shelves, the elevator, on the dray, and emptying the trucks.

The total number of visitors recorded from January 1 to May 1 was 42,635, and from August 30 to December 31, 5,885, the total for the eight months being 48,520. The recorded use covered only the period from January 1 to May 1, inclusive, when the calls for books were 65,325, being a daily average of 622 and a slight increase over the figures for the same period in 1919. Visitors admitted to the stacks during this period numbered 1,148, an increase of 441 or 60 per cent. Part of the increase is attributed to the removal of war-time restrictions, and part to the concentration of research work in anticipation of the closing of the library. There were granted 842 requests for 1,017 volumes from 127 libraries, and 1,073 requests from 401 individuals. In all the total use of the library for the year might reasonably be estimated at nearly if not quite one-half the average of recent years.

The Library followed the example of Harvard University and the University of Chicago in increasing the price of its printed cards, on account of the great increase in the cost of printing. Cards distributed totaled 157,852, of which 65,651 were sent to the depository libraries, 1,228 sent as gifts, and 90,973 sold or sent in exchange. The union catalog held 1,063,923 cards at the end of the year. The public catalogs contain 1,097,956 cards and guides, and of the 218,500 titles about 127,500 are on cards printed by the Library.

Total receipts were \$189,842, and total maintenance \$224,788. For salaries \$83,097 was expended, and \$43,409 for books, periodicals and binding. The number of volumes in the Library at the close of the year was 425,565, and of pamphlets 177,836. Accessions for 1920 num-

bered 13,587, of which 3,488 were received as gifts.

KANSAS

Emporia. The Carnegie Corporation of New York has made a grant of \$50,000 to the College of Emporia for library endowment and will pay the interest annually to the College while the College raises an equal amount for the same purpose. This assures a library fund of \$2,500 a year at once and eventually of \$5,000 a year.

CALIFORNIA

Berkeley. The cornerstone of a library for the Pacific Unitarian School, costing \$45,000, has been laid. The 16,000 volumes and about an equal number of pamphlets form a working theological library, which is the most complete collection of Unitarian writings, so far as is known, in the world.

Riverside. The \$30,000 addition to the Riverside Public Library is nearly completed and will be ready for occupancy by January first. The Carnegie Corporation gave \$25,000 towards this addition and \$5,000 was contributed by a few prominent citizens of Riverside.

ENGLAND

Oxford. The memorable event of 1920 for the Bodleian Library was the gift of £50,000 from Walter Morrison, the largest monetary gift ever received by the University, and particularly welcome as coming at a time when the state of the Library funds had become a matter of grave concern. Chief among the donations of printed books was a copy of the Tu Shu Chi Ch'eng, a Chinese Encyclopædia in five thousand volumes, large paper Palace copy, and probably the only complete one in existence. This was added by Sir Edmund Backhouse to his previous gifts of Chinese books. Falconer Madan presented fifty-three more editions or issues and six works connected with the "King's Book," and 1,021 miscellaneous Oxford books, pamphlets, etc. The Bodleian received in all 27,251 printed and manuscript items by gift or exchange, and 45,366 under the Copyright Act, and purchased 4,280 new and 411 second-hand items at a cost of £1,608. The stipends of the Librarian and staff amounted to £8,605. Total receipts were £17,129 and expenditures £16,860.

The number of new readers admitted was 1,195, or 229 less than the previous year, the larger number in the previous year being attributed to the matriculation of ex-service men who received grants to take a shortened course. The number of visitors who paid fees to visit the Bodleian building exceeding 12,000, but actually the number was much greater since members of the University in academical dress have the privilege of introducing visitors.

CURRENT LIBRARY LITERATURE

Volumes 8 of the New York *Municipal Reference Library Notes* will begin with the first number for January. Volume 7 has been extended to include the issues from September to December of this year so that each volume in the future may cover a calendar year.

The Subject Index of Periodicals, 1917-1919, issued by the Library Association (33 Bloomsbury Square, London W. C.) has now reached part I; Language and Literature. Part 1 (2s. 6d. net), Classical, Oriental and Primitive; and Part 2 (5s. net), Modern European.

A series of descriptive articles "Libraries of Los Angeles" of more than fifty libraries, public, private, business, scientific, religious and other types, edited by Ralph L. Power of the University of California is published by the University of Southern California Press. (Price \$1.00; bound in boards, \$1.35.)

The September-October number of *Special Libraries* is a 52-page double number containing the proceedings of the Twelfth Annual Convention of the Special Libraries Association at Swampscott. The topic of the convention was "Collecting, Organizing and Distributing Information" and practically all the papers of the conference are given in full.

The John Rylands Library, Manchester, England, celebrates its coming of age by reprinting "A Brief Record of Twenty-one Years Work: 1900-1921," first published in the January issue of the library's *Bulletin*. It is reprinted in its present form with some additional matter in the shape of illustrations in honor of the visit of the Library Association to Manchester in September.

The Ottawa (Canada) Carnegie Library, with the co-operation of librarians interested, has compiled a Union List of Periodicals, chiefly of scientific and technical character, in the libraries of eighteen government offices in Ottawa. It is planned to issue supplementary lists from time to time and a fuller and more exact list later.

A copy of "Hints on Export Translations," prepared by Alexander McQueen of the Foreign Trade Department of the 5th-3rd National Bank of Cincinnati, will be mailed gratis to any address on application to the bank. "This little volume is prepared in the hope that it may encourage the production of larger and more adequate works on foreign correspondence, especially by qualified writers."

"The rules of alphabetical filing of cards in the Dictionary Catalogue of the Library together with 'Manchester,' a specimen of such filing suitable for use in arranging a dictionary catalogue" (8 mim. p.) was prepared by James B. Childs as part of the work for a course in advanced classification in the University of Illinois Library School, and may be procured from the School.

The library of the University of Upsala celebrates its tercentenary by issuing a handsome 620-page quarto compiled and edited by the staff. The first chapter consists of brief biographies, in many cases with portraits, of twenty-seven of the librarians of the University. There are also chapters on the incunabula and other rare books, and on the autograph collections and other treasures.

The *Proceedings* of the Annual Conference of the A. L. A. at Swampscott tells where papers presented at the conference but not printed in the *Proceedings* may be found. To this may be added the following which have appeared since the publication of the proceedings: "Problems of Book Selection," by Elva S. Smith, in the December *Public Libraries*, and "A Co-operative Index of Coats of Arms," by Agnes C. Doyle in the present number of the *L. J.*

The second edition of *Chemical Literature and Its Use*, compiled and published by Marion E. Sparks, library assistant of Chemistry in the University of Illinois Library, is ready. This edition includes more data on certain works, and some new books and serials have been added. These notes are compiled to serve as a brief guide to the increasing flood of chemical literature. They are prepared for the use of students having a reading knowledge of French and German, and two years of college Chemistry. (\$1.00 postpaid.)

In compiling their "Children's Literature; a Textbook of Sources for Teachers and Teacher-Training Classes," Charles Madison Curry and Erle Ellsworth Clippinger, professors of literature in the Indiana State Normal School, have aimed at collecting in one volume sufficient material for a minimum basic course in children's literature. Each of the eleven sections, beginning with Mother Goose Jingles and ending with Biography and Hero Stories, is prefaced by an introduction and bibliography. The later sections include many unacknowledged selections from modern copyright literature. (Rand, \$3.50.)

FOUR and TWENTY TOILERS

By E. V. LUCAS

24 full-page colored drawings by F. D. Bedford. Small folio, opening lengthwise. Bound in art linen, reinforced in accordance with the requirements of the A. L. A.

Portrays various occupations, such as those of the ship-builder, gardener, knife-grinder, carpenter and cobbler.

"An example of a perfect picture book."

CLARA WHITEHALL HUNT of the
Brooklyn Public Library.

New Edition \$3.00

McDEVITT-WILSON'S, Inc.

30 Church Street,

New York

Russian Festivals and Cos- tumes for Pageant and Dance

CHALIF'S new book, will be a welcome addition to the art shelves of every library. The art student, the pageant builder, the costume designer—if his subject be Russian—will find his needs all met within its covers.

A Wealth of Pictures

On 130 of its pages, beautiful examples of Russian peasant art in costume, embroideries, furnishings and architecture are displayed.

Descriptions

In well condensed text are clear descriptions of the picturesque religious and secular festivals of old Russia. The long-drawn-out wedding celebrations are minutely pictured, and the tenderly quaint Christmas feast which awaits the rising of the "Star."

SCRIBNER'S LIBRARY DEPARTMENT

Offers to all libraries, large or small,

Expert and efficient service, the result of years' experience.
The largest discounts on the books of all publishers.

Place your orders in our hands

They will be filled accurately as to title and edition, obscure and out-of-print books collected from all over the world, English titles imported duty-free, and all "shorts" reported on at time of shipment. Continuations will be forwarded without reminder, and out-of-stock and not-yet-published items supplied when procurable. All this without troubling you!

We relieve you of all detail and unnecessary expense

CHARLES SCRIBNER'S SONS,

597 Fifth Avenue, N. Y. City

The November number of the *Spectator*, the Louisville Male High School publication, gives a prominent place to the library. One whole page is devoted to library lyrics. A collection of library notes is good "selling" material for the library. Library and librarian are included in the bright rhymes which conclude the number.

The school library is a branch of the Louisville Free Public Library and Miss Edna Grauman is a member of the library staff as well as of the school faculty.

Recently we chronicled the appearance of the quarterly *Bookshelf* published by the Lynn (Mass.) Public Library. Number 2, dated October, is a substantial 64-page number, half of which is devoted to the first installment of the Lynn War Service Record. The library's lists of new books, formerly printed in the bi-monthly *Bulletin*, will henceforward appear in the *Bookshelf*. Now appears *Lynn Library Service* (Vol. 1, No. 1, November), which "will assume the task of bringing to the attention of the people announcements of new books, special classes of books, and statements concerning the work and service of the Library system." It will appear monthly except July and August.

The Eau Claire Book and Stationery Company, Eau Claire, Wisconsin, has issued an 80-page revised edition of its "Books for the Young," which has been "carefully compiled from the various authoritative lists of what are regarded as the best books by children's departments of the public libraries of Pittsburgh, and Buffalo, the list prepared by the Oregon Library Commission, the Department of Education of Minnesota, the books recommended by the Wisconsin Department of Public Instruction, and the excellent subject list of children's books compiled by Helen T. Kennedy, formerly of the Wisconsin Library School. . . ."

Only such editions are listed as have been approved for library use. The entries are classified and with each title is given the grade or grades for which the book is best suited. Nearly all the books have descriptive notes.

Sources of English history of the Seventeenth Century, 1603-1689, in the University of Minnesota Library has been compiled by James Thayer Gerould "with the purpose of placing at the disposition of the students of the period which began with the coming of the first James out of Scotland and which ended when William the Conqueror came from the Low Lands, the resources of the Library of the University of Minnesota; and of unlocking for other libraries the material contained in reprinted collections such as Somers Tracts and the Harleian Miscellany. . . . It is in no sense a general bibliography. . . . In a few cases the titles represent books in the Public Library of Minneapolis and the Minneapolis Athenaeum, as there the works are in every sense as available to the student at the University as if they were in its Library."

The Third Supplement to the Children's Catalog, which is just ready, has been compiled by Corinne Bacon and Mertice James. It includes 950 titles, about 700 of which were listed in the Second Supplement issued in 1919. Some seventy titles issued prior to 1916 have been included in this supplement because fresh testimony as to their worth has been received. It has been impossible to list many of the 1921 books on account of the difficulty in getting quick and authoritative information on juveniles. About one-fourth of the one hundred and sixteen titles analysed are either history or biography. Two lists are appended. One, "Some Books in French for Boys and Girls," is compiled by Marguerite Clément, and the second "Aids to Story-Telling" is an annotated list of eight titles.

Producing in Little Theatres

By CLARENCE STRATTON

Author of "Public Speaking," and the Plays,
"Ruby Red," "Bombito," etc.

The fullest, most up-to-date and helpful book on its subject. It should, with its wealth of pictures of stage settings and groups from recent productions, appeal not only to those active in Little Theatres, but to all intelligent theatre-lovers. The contents include Choosing the Play—Rehearsing—Creating the Stage Picture—Lighting and Equipment—Organizing an Amateur Group—Some Specimen Programs—Artistic Amateur Settings—Costumes and Make-up—Educational Dramatics, etc. He includes carefully chosen lists of one hundred full-length and one hundred one-act plays, with brief comment on each. *With Some Sixty Illustrations.* \$2.90

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Chivers Book Binding Co., Inc.
