

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

The Hindu Princess Whose Heart Was Broken

She was sixteen years old, the daughter of an Indian Prince and she had never before been outside her father's house alone. Yet—

Here she was, dressed in her brother's clothes, among the mango trees, wiping with her soft, dark hair, the feet of the man she loved who lay desperately wounded. And when he recovered consciousness *he struck her in the face!*

"Daughter of a traitor!" he cried. "Infidel! At the very hour of my death you have desecrated my whole life!"

But, after all, he didn't die of his wounds and she didn't die—she lived with a broken heart! Read this story in the February

ASIA

The American MAGAZINE on the Orient

More than 60 Illustrations—Art Insert

ON THE CALCUTTA ROAD

By Rabindranath Tagore

A great romance—a love story told against a background of misty Himalayan Mountains.

This is but one of many glowing features in a number rich in popular appeal. The magazine ASIA is the most satisfying periodical one could purchase. It specializes, in an age of specialization, on one continent, and gives a resumé of the history, traditions, religions, and romance of all those fascinating lands that form Asia. No thinking man or woman should miss it. Every issue contains a surprising fund of valuable information. The pictures that embellish the text are of rare loveliness. There is always an art insert of eight pages, beautifully printed.

Contents of the February ASIA

A Camera Man in Borneo *By Martin Johnson*

Martin Johnson's first cruise into the Seven Seas was with Jack London on the *Svark*. Since then he has adventured much and far, making pictures of strange peoples in strange lands. This is the story of how he filmed the wild men and animals of British North Borneo.

Through the Orleander *By Robert Hamilton Rucher*

With a vagabond caravan, the *sit* (lady) and the master, made a pilgrimage through the Egyptian desert. The master's record of the journey gives fascinating glimpses of the life of the people who live today in the shadow of the pyramids.

Chinese Shallows and Deepes *By John Ford*

A close-up of political and social conditions in the Celestial Republic as they are at this very hour. No man can afford to miss this illuminating study.

Long Chances in the Animal Dealer's Game

By Charles Mayer

Running a merry-go-round in Singapore, pursuing an escaped leopard in a crowded city, trapping a savage rhinoceros in Trengganu, coaxing reluctant tuskers on shipboard—these are some of the ins-and-outs of an animal-dealer's life.

The Emperor and the Silk Goddess *By L. Adams Beck*

A Chinese Humoresque—a golden story of rare beauty and charm.

The Honorable Placards Club *By Frederick Starr*

The story of an ancient society of Japan, told by the only foreigner who ever became a member of it.

Jade Butterflies *By Louis Untermeyer*

Stretch a Helping Hand Across the Pacific

35,000,000 Chinese are starving to death. Give of your abundance. Every dollar will help to save a life. \$200,000-000 is needed for adequate relief.

Send your contribution NOW to the

Chinese Famine Fund, c/o ASIA
627 Lexington Ave., New York City

The money will be forwarded to the American National Committee on Famine Relief in Peking, care of the Honorable Charles R. Crane, United States Minister to China.

ISSUED MONTHLY, 35 cents a copy. Subscription price, \$3.50 a year in the United States and Possessions, Mexico and Shanghai; \$4.00 in Canada; elsewhere, \$4.50.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Chivers Book Binding Co., Inc.

911-913 Atlantic Avenue

Brooklyn, N. Y.

BERNARD QUARITCH, Ltd.

11 Grafton Street, New Bond St., London, W.

*Bookseller, Publisher and
Agent for Public Institutions*

BERNARD QUARITCH would draw attention to the fact that he deals not only in rare and costly books, but also in every description of works in general literature, science and the arts, and that he is at all times willing to undertake the very smallest commissions for customers.

He has always made a special feature of trying to procure for customers any books they may require which may not be in stock, and makes every effort to render this important department most efficient.

Commissions for Auction Sales are faithfully executed, and he is always ready to give customers his advice on this or any other subject connected with book collecting.

Catalogues are issued monthly and forwarded to all customers who demand them.

BERNARD QUARITCH acts as agent to Learned Societies, Public Libraries and Institutions, both for the supply of books as well as for the sale of their publications.

HOLIDAY CLOSING SIGNS

*Ask to
Have a Set
Sent on
Approval,
Subject to
Return
If Not
Satisfactory*

Save innumerable telephone calls, asking if the library will be open. Advertise to non-users the library's Sunday and holiday service.

Signs are made of heavy black, smooth finish card-board with white embossed letters large enough to be easily read at a distance. Each set contains a large assortment of words, ample for building up in the black enameled holders, any kind of a sign desired.

Price \$5.00 per set, express paid.

GAYLORD BROS.

NEW PARLIAMENT BUILDINGS

Winnipeg, Manitoba

View showing three tier Snead "Standard" bookstack in library, equipped with solid panelled ends and "open bar" adjustable shelves. The second deck floor is of steel plate construction covered with cork carpet. The electric conduits are concealed in steel mouldings forming the ceiling panels.

The storeroom and newspaper stack rooms in basement are also equipped with Snead "Standard" stacks.

For years Snead products have been the preferred equipment for both large and small libraries.

Their adaptability to expansion, their unequalled compactness, and their scientific construction throughout insure perfect satisfaction and ultimate economy.

Detailed plans and description of the above, and many other notable library buildings are found in our publication "Library Planning, Bookstacks and Shelving" which also contains valuable technical articles on the planning and construction of libraries.

Some Reference Books of 1919-1920

By ISADORE GILBERT MUDGE

Reference Librarian of Columbia University

THE aim of this present article, like that of similar surveys of reference books of earlier years, is not to present a complete list of the new reference books of 1919-20, but rather to indicate, from the point of view of the general library, some of the more important, useful, or interesting of the new publications. While most of the works referred to have been published during 1919-20, mention is made also of some books of earlier date, principally foreign publications which were not received in this country in time for mention in the earlier surveys. It has been necessary to omit some French and English reference books which probably should be recorded here, because on account of the delay in importation copies have not yet been received in the various libraries to which the writer has access. As a general thing no mention is made of new volumes of established reference annuals unless some irregularity of publication or change of name, form, or scope seems to call for comment.

The classification of titles in the following record follows, in the main, the grouping in the new edition of A. B. Kroeger's "Guide to the Study and Use of Reference Books" (Chicago, A. L. A. Publishing Board, 1917), to which this present article forms an informal supplement.

PERIODICALS

The notable features about recent reference books in this field have been, in the first place, the unusual number of cumulated volumes of standard indexes, and in the second place the fact that several of these indexes, originally planned to cover only material in English, have been made more international by the inclusion of material in other languages. For general usefulness first place should probably be given to the new volume of the *Reader's Guide* (cumulated) which covers the four years 1915-1918 and indexes some 104 periodicals. The period covered shows a departure from the precedent of the three earlier volumes, all of which were quinquennial cumulations, but if any justification for this change were needed it would be

found in the fact that the four year period in this case is almost coincident with the duration of the European war which thus provides a natural limit for the volume. The list of references on the war itself covers nearly 100 pages, and furnishes a bibliography of contemporary journal literature on this subject that is both impressive and useful. A companion volume, of special importance in the large or specialized library, is the new permanent volume of the *Readers' Guide Supplement* which covers the years 1916-1919 and indexes 81 American, English, and Colonial periodicals. This number is a notable increase from the 36 indexed in the first annual volume, but more notable, as marking a distinct change in such indexes, is the inclusion of a large amount of foreign material, principally references to philological and scientific journals and transactions of learned societies. This latter change has been effected by the incorporation in the *Readers' Guide Supplement* of the indexing of periodicals so long carried on by the A. L. A. The indexing of this material is still being done by the co-operating libraries under the editorship of W. S. Merrill, but the results are included in the *Readers' Guide Supplement*, instead of being printed on cards as heretofore. This adds to the *Supplement* some 45 periodicals indexed principally from the year 1915, tho in some cases the work has been carried back to whatever years are necessary to complete the A. L. A. record. Two other Wilson indexes show cumulated volumes, the *Industrial Arts Index*, of which volume 7 is a two-year cumulation indexing some 80 periodicals for the years 1918-1919 and inaugurating a new policy for this work, by which a two-years' cumulation is to be issued regularly in each odd year, and a one-year record in the intervening even years, and the *Agricultural Index* for which a 1916-18 cumulation has been issued. In the case of the *Agricultural Index*, this first cumulation includes the material indexed from the beginning of this work, displacing the earlier annual volumes and indexing, by sub-

ject only, the contents of some 78 scientific, technical and farm journals, experiment bulletins, government bulletins, reports, etc. While only material in English is included, the geographical boundaries are wide, as Canadian, Australian and New Zealand material is indexed to some extent. No material in any language other than English is indexed in either the *Industrial Arts* cumulation or the *Agricultural*, but it is interesting to note that the 1920 issues of the *Industrial Arts Index* now include references to two French journals. A new British index established in 1915 as the "*Athenaeum Subject Index*" has issued, under its new name, the *Subject Index*, a two-year cumulation, covering the years 1915-1916. This contains some 29,000 subject entries and 14,000 author references, and indexes the contents of 530 periodicals, of which 494 are in English and the remainder in other languages, principally French and German.

When the quarterly *Index to Legal Periodicals* was established in 1908 there was a gap of ten years between it and the latest date, 1897, covered by the second volume of Jones' "*Index to Legal Periodical Literature*." This gap has now been bridged by the publication of a third volume of Jones' index, compiled and edited by Frank E. Chipman, which covers the years 1898-1908 and indexes some 512 volumes of 60 periodicals, all in the English language, but including American, British, Irish, Canadian, Indian, Australian and South African titles. The work is in two sections, a subject and title index, and an author list, and while planned especially for the law library, should be of considerable use in the large general library for many questions in social and economic subjects.

A new publication, which, tho not an index in the ordinary sense of the word, may be made to serve the same purpose, is the *Economic Review*, described more fully under the section Economics and Politics. While this is mainly a record of current events and current literature in the fields of economics and politics, it refers, in both its abstracts and its bibliographies, to many newspaper and magazine articles not included in the general indexes and is of first importance for extended or special reference work in those fields. As there is, so far at least, no alphabetical index, or cumulation of the bibliographies, it cannot be used easily for quick reference work. A similar publication in another field is the *Technical Review* which reviews many periodicals in various languages.

An important change in the *Business Digest* should be noted. From a weekly periodical which was largely a general business periodical and only in part an index, this publication changed, in September, 1920, to a regular index-

digest service divided into four sections: (1) Advertising and Selling, (2) Foreign Trade, (3) Banking and Investment, and (4) Executive Management and Accounting. The digest feature is retained, with reference to the whole article, and each section is to consist of (1) a weekly issue, (2) a monthly cumulation which displaces the weeklies, and (3) a bound annual cumulation. The list of periodicals indexed in whole or part has been raised to 120, and the service should show a proportionate increase in usefulness.

Agricultural Index, a subject index to a selected list of agricultural periodicals and bulletins, 1916-1918, ed. by N. T. Shimer. New York: H. W. Wilson Co., 1919. 1025 p. Service basis.

Business Digest Service, Oct. 1920-. New York: Arrow Pub. Corp. 1920-. Complete service: weekly, monthly cumulations (unbound), annual (bound); \$50 per year.

Industrial Arts Index, first two-year cumulation (7th annual volume) 1918-1919. A subject index to a selected list of engineering and trade periodicals, ed. by M. E. Potter and L. D. Teich. New York: H. W. Wilson Co., 1919. 940 p. Service basis.

Jones, Leonard Augustus. *Index to Legal Periodical Literature*: vol. 3, 1898-1908, by Frank E. Chipman. Boston: Boston Book Co., 1919. 549 p. \$20.

Readers' Guide to Periodical Literature (cumulated), an author and subject index to 104 periodicals and reports; vol. 4, 1915-1918, ed. by Elizabeth J. Sherwood and Estella E. Painter. New York: H. W. Wilson Co., 1919. 2193 p. \$27 n. Service basis.

Readers' Guide to Periodical Literature: Supplement, vol. 2, 1916-1919, a cumulation of annual volumes 4-7, ed. by Elizabeth J. Sherwood and Grace F. Caldwell. New York: Wilson, 1920. 798 p. Service basis.

Review of the Foreign Press. The *Economic Review*, with which is incorporated the *Political Review*. A review and bibliography dealing with finance, industry, commerce and social organization. v. 1, 1919-. London: Review of the Foreign Press, 1919-. Annual subscription, £2, 12s. 6d.

Subject Index to Periodicals, issued at the request of the Council of the Library Association, 1915-16. London: 1919. 744 p. Subscription price, £2, 10s.

Technical Review, a review and digest of the technical press of all countries and a survey of engineering industry thruout the world. vol. 5, 1919-. London: 1919-. Annual subscription, £2, 5s.

LEARNED SOCIETIES

There have been several additions to the all too small number of reference books in this field. Lasteyrie's great bibliography of French historical and archaeological societies has been completed, as to the main part, by the publication of fascicule 4 of volume 6. This completes the supplementary volume covering the period 1886-1900. There is an index of societies which gives a list of all titles of journals, and a record of what constitutes a set to 1900, but the author and subject index to the articles analyzed in the contents lists is still in the future, and is much needed. With the 10 annuals so far issued the whole work now covers the field to 1910. Somewhat the same period is covered in the new volume of

Müller's "Die Wissenschaftliche Vereine und Gesellschaften Deutschlands," which covers the period from the end of volume 1 (about 1882) to 1914. The arrangement is by place, and each society is given a list of its publications with record of what constitutes a complete set, note of indexes, and, in the case of monographic sets or series, contents by author and title. There is a classified list of societies at the beginning, and at the end an alphabetical index of titles of periodicals, names of societies, editors, etc., and in the case of the monographic sets, of authors as well. An entirely new publication which promises to be of importance for information about the history and activities of Italian societies is "Annuario Degli Istituti Scientifici Italiani." This gives some account of each society, indicates its publications, and refers to printed sources where fuller information can be obtained.

Annuario degli Istituti Scientifici Italiani, diretto dal Prof. Silvio Pivano. Roma: Athenaeum, 1918. 516 p. L. 10.

Lasteyrie du Saillant, Robert Charles, Comte de. Bibliographie Générale des Travaux Historiques et Archéologiques, publiés par les sociétés savantes de la France, dressée sous les auspices du Ministère de l'Instruction Publique. Tome 6, 4e livraison, Suppl. 1886-1900. Paris: Imprimerie Nationale, 1918. 4 fr.

Müller, Johannes. Die Wissenschaftlichen Vereine und Gesellschaften Deutschlands im Neunzehnten Jahrhundert. Bibliographie Ihrer Veröffentlichungen, 2. bd. (fortgeführt bis 1914). Berlin: Behrend, 1917. 1421 p. M. 120.

DICTIONARIES

Murray's "New English Dictionary" passed another milestone during 1919 when the second half-volume of volume nine (Su-Th) was finished, and has added during 1920 some parts to the unfinished volume ten. A 1919 issue of Webster's "New International Dictionary" is a reprint, as far as the main part is concerned, but extends the prefixed list of new words, principally by the inclusion of new words or new meanings developed during the war. Two small dictionaries which call for mention are: C. A. Smith's "New Words Self-Defined" which explains new words by the use of quotations rather than definition, and Bonnaffé's "L'Anglicisme et L'Anglo-Americanisme."

Bonnaffé, Edouard. L'Anglicisme et l'Anglo-Américanisme dans la Langue Française. Dictionnaire étymologique et historique des anglicismes. Paris: Delagrave, 1920. 193 p.

Smith, Charles Alphonso. New Words Self-Defined. Garden City, New York: Doubleday, 1919. 215 p. \$1.25.

Webster, Noah. Webster's New International Dictionary of the English Language. Springfield, Mass.: Merriam, 1919. xcii, 2620 p. \$12.

PHILOSOPHY AND RELIGION

In this field so many large sets are still in process of publication that the important items

to be recorded are new volumes or parts, rather than wholly new works. Of the great French sets which compose the "Encyclopédie des Sciences Religieuses" two have completed new volumes. These are the "Dictionnaire de Théologie Catholique" of which fascicules 48-49 complete volume 6 and carry the alphabet partly through the letter H, and Cabrol's "Dictionnaire d'Archéologie Chrétienne," which by the issue of fascicules 38-40 has completed the seventh half volume (volume 4, part 1) and begun the eighth, carrying the alphabet nearly through the letter D. Another set in this series, Vigouroux's "Dictionnaire de la Bible," completed in 1912, has announced a supplementary volume, but no parts of this have yet been issued. Hastings' "Encyclopaedia of Religion and Ethics" is now nearing completion, as volume 10 issued in 1919 carries the alphabet into the letter S, and the "Dictionary of the Apostolic Church," by the same editor has been completed by the publication late in 1918 of its second volume, which finished the alphabet and added several indexes. For the tenets, history, organization, statistics, etc., of American denominations, "Religious Bodies, 1916," prepared by the Bureau of the Census is important. This follows the line of the edition for 1906, but adds new matter and later figures. Still later statistics may be found in the "Year Book of the Churches, 1919," which is the new title of the work started in 1916 as the "Federal Council Year Book." A useful new annual in a field not otherwise covered at present is the "Foreign Missions Year Book of America" which presents up-to-date, accurate information on field of work, organizations, statistics, workers, and also includes selected annotated bibliographies. The "Encyclopaedia of Islam," necessarily interrupted during the war because of its international character, has resumed publication with numbers 22-24, dated 1916, but not listed till 1919, which carry the alphabet into the letter I. In the field of mythology mention should be made of the new volume ("Latin-American," by Hartley Burr Alexander) of the "Mythology of All Races" and of the new parts of Roscher's "Ausführliches Lexikon," which carry the alphabet to the word Theseus. For occult or psychic subjects, magic, etc., a new reference work of the "compendium" type is Spence's "Encyclopaedia of Occultism." This should prove useful for certain types of questions, but, as it contains little bibliography, does not furnish a tool for research.

Cabrol, Fernand. Dictionnaire d'Archéologie Chrétienne et de Liturgie. fasc. 38-40, Dimanche-Droit persecuteur. Paris: Letouzey, 1920. 5 fr. per fasc.

Dictionnaire de Théologie Catholique, commencé sous la direction de A. Vacant, continué sous celle de E.

Mangenot. fasc. 48-49, Gregoire-Hizler. Paris: Letouzey, 1920. 5 fr. per fasc.

Encyclopaedia of Religion and Ethics, ed. by James Hastings. vol. 10, Picts-Sacraments. New York: Scribner; Edinburgh: T. and T. Clark, 1919. 915 p. \$8. 32s.

Hastings, James. Dictionary of the Apostolic Church. vol. 2, Macedonia-Zion, with indexes. New York: Scribner; Edinburgh: T. and T. Clark, 1918. 724 p. \$6. 25c.

Foreign Missions Year Book of North America, 1920 (covering the year 1919, ed. by Roderick Beach, Assistant Director of the Bureau of Statistics and Research). New York: Committee of Reference and Counsel of the Foreign Missions Conference of North America, 1920. 345 p. \$1.

Mythology of All Races, Louis Herbert Gray, editor, vol. 11, Latin-American, by Hartley Burr Alexander. Boston: Marshall Jones Co., 1920. 424 p. \$6.

Roscher. Wilhelm-Heinrich. Ausfürliches Lexikon der Griechischen u. Römischen Mythologie. 64-67. Ifigen. Teukros-Theseus. Leipzig: Teubner, 1918-1919. 2 pts.

Spence, Lewis. Encyclopaedia of Occultism, a compendium of information on the occult sciences, occult personalities, psychic science, magic, demonology, spiritism and mysticism. London: Routledge, 1920. 451 p. 25 s.

U. S. Bureau of the Census. Religious Bodies, 1916. Washington: Govt. Print. Off., 1919. 2 v. \$2.50.

Yearbook of the Churches, 1919, covering the year 1918, ed. by Clyde F. Armitage. New York: Federal Council, 1919. 278 p. 75 cts.

ECONOMICS AND POLITICS

In the section on periodicals, reference has already been made to the *Review of the Foreign Press: Economic Review*. This weekly reference periodical developed from the official *Review of the Foreign Press* which from the second year of the war was conducted in the British War Office for the purpose of obtaining from the newspapers and periodicals of foreign countries the various technical, political, economic or medical information important for war service. When the official "Review" was discontinued, the present unofficial organization carried on much the same work, starting in November, 1919, two weeklies; the *Economic Review* and the *Political Review*, which were later combined. In its present form this is a weekly reference periodical of first importance, combining the features of index to periodical and newspaper articles and a digest and record of current economic and political events and conditions. Abstracts are given with exact reference to the whole article, and each principal subject treated has a weekly bibliography of recent books, pamphlet and periodical literature.

A useful reference handbook for questions on constitutions is Wright's "Constitution of the States at War, 1914-1918." This includes the constitutions of 23 states, duplicating to a certain extent material included in Dodd's "Mod-

ern Constitutions," but adding also new material, especially some nine recent texts not given in either Dodd, Dareste or Rodriguez. Two financial reference books which should be noted are the new edition of Thomson's "Dictionary of Banking" and Kuhrt's "Counting-House Dictionary." The latter contains very brief articles but gives the French and German equivalents of the English terms.

Kuhrt, John White. A Counting House Dictionary, containing an explanation of the technical terms used by merchants and bankers in the money market and on the stock exchange. New ed. London: Routledge, 1920. 340 p. 6s.

Review of the Foreign Press. The *Economic Review*, with which is incorporated the *Political Review*. A review and bibliography dealing with finance, industry, commerce and social organization. v. 1, 1919. London: Review of the foreign press, 1919. Annual subscription, £2, 12s. 6d.

Thomson, William. Dictionary of banking, a concise encyclopaedia of banking law and practice, with a section on the Irish land laws. 3rd ed. rev. and enl. London: Pitman, 1919. 663 p. 30s.

Wright, Herbert F. Constitutions of the States at War, 1914-1918. Washington: Govt. Print Off. 1919. 679 p.

YEAR BOOKS

Several important year books should be mentioned. An entirely new book of this type is the "Anuario Nacional Estadístico" of Bolivia, an official publication. "The Latin-American Year Book for Investors and Merchants" is an unofficial publication dealing especially with commercial and financial subjects. African titles include the official Moroccan "Annuaire Economique et Financier" of which two volumes have been issued, and an excellent new annual from South Africa, the "Official Year Book of the Union" which combines general and statistical features on the same plan as the well known "Official Year Book of Australia," and includes a useful bibliography. For latest South African statistics there is a new "Half-Year Abstract of Union Statistics," started in 1919. Mention should perhaps be made of the change in title of the Union-Castle "Guide to South and East Africa," which became in 1919 the "South and East African Year Book." This includes considerable statistical information in addition to its guide book and gazetteer features.

Two new unofficial French annuals which might be described as Statesman's Year Books for France, are the "Annuaire Général de la France" and the "French Year Book." While these duplicate each other to a considerable extent, each contains some material not to be found in the other, and both will be needed in the large reference library. The somewhat smaller library may prefer the English work. Other new titles or editions which should be noted are the "Statistical Year Book of Siam" issued regularly since 1916, the second edition (1920) of the

"Yearbook of the Netherlands East Indies" and Stewart's "Handbook of the Pacific Islands, 1919." It is a satisfaction to note also that the useful "China Year Book," which suspended publication in 1917 and 1918, reappeared in a 1919 edition. No "Russian Year Book" has been issued since 1916, but a much smaller work, the "Russian Almanac" took its place in 1919.

Annuaire Général de la France et de l'Étranger, publié sur l'initiative du Comité du livre, Association nationale sous la haute patronage du gouvernement de la République. Paris: 1919. 1222 p.

Bolivia. Dirección General de Estadística y Estudios Geográficos. Anuario Nacional Estadístico y Geográfico. 1917. La Paz: 1918.

French Year Book, Statistical and Historical, of France for 1919. Paris: Comité du Livre; London: J. Bale. 1919.

Dutch East Indies. Departement van Landbouw, Nivverheid en Handel. Yearbook of the Netherlands East Indies. vol. 2, 1920. Batavia. 1920. 276 p.

Latin American Year Book for Investors and Merchants, for 1919-20. New York: Criterion Newspaper Synd. 1919-20. 2 v. \$5.

Morocco. Annuaire Economique et Financier, 1917-1918/19. Casablanca, Imp. Rapide: G. Mercier & Cie. 1917-19. 2 v.

Siam. Dept. of Commerce and Statistics. Statistical Year Book of the Kingdom of Siam, 1916-19. Bangkok: 1916-19. 4 v.

South Africa. Director of Census. Half-Yearly Abstract of Union Statistics. Johannesburg: 1919.

—Official Year Book of the Union, nos. 1-3, 1917-19. Pretoria: 1917-19. 3 v. v. 3, 5s.

South and East African Year Book and Guide, ed. annually for the Union-Castle Mail Steamship Co. Ed. 25. 1919. London: Sampson Low. 1919. 2s. 6d.

Stewart's Handbook of the Pacific Islands, 1919, for tourists, traders and settlers, with a bibliography of island works, by Percy S. Allen. Sydney: McCarron Stewart & Co. 1919. 304 p. 6s. 6d.

TREATIES

During the past year and a half a reference book frequently asked for in various types of libraries has been the text of the Treaty of Versailles. For ordinary use in American libraries, perhaps the most convenient text is that published in *International Conciliation* for September, 1919. This gives the English text only. A better reference edition for more special purposes is that published by the British Stationery Office. This gives parallel French and English text and contains excellent large-scale maps to show all the territorial clauses. An important tool for reference work involving other treaties is the "Catalogue of Treaties, 1814-1918," prepared by the State Department, printed in 1919 as a confidential document for official use only, but in 1920 distributed to libraries. This lists over 3400 treaties, giving for each the place and date of signing and a reference to the various printed treaty collections in which the text is given. The main arrangement is chronological, with an alphabetical index by country, but no

subject index. A useful bibliography in the same field is "A Tentative List of Treaty Collections" also issued by the Department of State. For reference purposes this has added value from the fact that location of copies in certain American libraries is marked. A new collection of the text of treaties is the French "Traité en Vigueur" compiled by Basdevant.

Allied and Associated Powers (1914-) Treaty with Germany, June 28, 1919. The treaty of peace between the Allied and associated powers and Germany, the Protocol annexed thereto, the Agreement respecting the military occupation of the territories of the Rhine, and the Treaty between France and Great Britain respecting assistance to France in the event of unprovoked aggression by Germany. Signed at Versailles, June 28th, 1919. With maps and signatures in facsimile. London: Stationery Off., 1919. 453 p. incl. tables. 5 fold. maps. 21s.

Treaty of Peace with Germany. . . . New York City, American Association for International Conciliation [1919]. 265 p. 19½ cm. (*International Conciliation*, pub. monthly by the American Association for International Conciliation. Sept., 1919. no. 142) Sent on application.

France. *Traité et Conventions en Vigueur entre la France et les Puissances Étrangères*: recueil préparé par J. Basdevant. Paris: Imprimerie Nationale, 1918-20. 4 v.

U. S. Dept. of State. *Catalogue of Treaties, 1814-1918*. Washington: Govt. Print. Off., 1919. 716 p.

—A Tentative List of Treaty Collections. Washington: Govt. Print. Off., 1919. 103 p.

EDUCATIONAL INSTITUTIONS

The last regular issue of "Minerva" was that of 1914, which had appeared shortly before the outbreak of the war. Publication of this work remained suspended during the war, but has recently been resumed and a 1920 volume, much reduced in size and contents, has been issued. This gives recent lists and statistics for German and Austrian universities, museums, societies, etc., but for those of other countries gives, in the main, only an abbreviated statement of 1914 information, and is therefore much less useful than the preceding volumes. During the suspension of "Minerva" similar publications were started in both France and England. Of these neither is quite as universal in its scope as the old "Minerva," since the French "Index Generalis" is, in its first issue at least, limited to the institutions of the Allies and the neutral nations, and the English "Athena" includes only the English speaking races. The "Index Generalis" is pretty closely limited to teaching institutions, including libraries only when connected with such. but "Athena" includes libraries, museums, and learned societies, and special note should be made of its information about learned societies of the British Colonies. The new Italian annual for learned societies has already been referred to in an earlier section of this article, but mention should be made here of a new Spanish an-

nual, "Guia del Estudiante" which deals with the colleges, societies, libraries, etc., of Spain. A new edition of Baird's "Manual of College Fraternities" has been issued.

Athena, a Year-Book of the Learned World. The English Speaking Races. Ed. by C. A. Ealand. London: Black, 1920. 391 p. 15s.

Baird, William Raimond. Baird's Manual of American College Fraternities. 9th ed. James T. Brown, ed. and pub. New York: Brown, 1920. 886 p. \$4.

Guia del Estudiante, 1918. Madrid: 1918.

Minerva, Jahrbuch der Gelehrten Welt. 24. Jahrg. 1920. Berlin u. Leipzig: Vereinigung Wissenschaftlicher Verleger, Walter de Gruyter & Co., 1920. 1148 p.

Universitatum et Eminentium Scholarum Index Generalis. Annuaire Général des Universités. The Year-book of the Universities. Publié sous la direction de R. de Montessus de Ballore. Paris: Gauthier-Villars, 1919. 768 p. 30 fr.

SCIENCE AND TECHNOLOGY

Various dictionaries of technical terms in one or more languages have appeared and several of these call for special mention. The Deinhardt-Schlomann "Illustrated Technical Dictionary in Six Languages," earlier volumes of which have proved so useful, has been extended by the publication of volume 13, covering terms in building construction and civil engineering. Another international dictionary, giving terms in four languages, English, French, Italian and German, is the "Airman's International Dictionary," compiled by Mario Mele Dander. An admirable technical dictionary, the scope of which is hardly indicated by its unassuming title, is Fay's "Glossary of the Mining and Mineral Industry." This contains about 20,000 terms, including technical and purely local terms relating to metal mining, coal mining, quarrying, petroleum, and natural gas, and metallurgical works, names of minerals and rocks and geological terms, many terms relating to ceramics and the clay industry, glass making, foundry practice, railway and building construction, etc., and chemical terms relating to metallurgical practice. Its definitions are given with sufficient fullness, with reference to authorities, and in case of local terms indication of the place where used. A small glossary which might be noted is that of clock and watch terms included in Brearley's "Time Telling throughout the Ages." Reference works in chemistry include new volumes of Ullmann's "Encyklopädie der Technischen Chemie," volume 7 of which now reaches the letter M; the "Condensed Chemical Dictionary," a useful and reliable small work where compact information is needed, and another small work, Kingzett's "Popular Chemical Dictionary." Recent engineering handbooks include a new edition of Merriman's "American Civil Engineer's Handbook," and an entirely new work, the "American Highway Engineer's Handbook" edited by A. H.

Blanchard. New editions of both the "Locomotive Dictionary" and the car builders' dictionary should be noted.

American Railway Master Mechanics Association. Locomotive Dictionary and Cyclopaedia. 5th ed., 1919. Definitions and illustrations of American locomotives, their parts and equipment, together with typical illustrations of machine tools and devices used in their construction and repair . . . New York: Simmons-Boardman Pub. Co. [c. 1919] 1284 p. \$8.

Blanchard, Arthur H. ed. American Highway Engineers Handbook. New York: Wiley, 1919. 1658 p. \$5.

Brearley, Harry C. Time Telling Through the Ages. New York: Doubleday Page and Co. for Robert H. Ingersoll. 1919. 294 p. \$3.

Condensed Chemical Dictionary; a reference volume for all requiring quick access to a large amount of essential data regarding chemicals and other substances used in manufacturing and laboratory work, comp. and ed. by the editorial staff of the Chemical Engineering Catalog, Francis M. Turner, jr., technical editor. New York: Chemical Catalog Co. [c. 1920] 533 p. \$5.

Dander, Mario Mele. Airman's International Dictionary, including the most important technical terms of aircraft construction, English, French, Italian, German, with a "one alphabet" index for these four languages. London: C. Griffen & Co. [1919] 227 p.

Deinhardt, Kurt, and Schlomann, Alfred. Illustrated Technical Dictionary in Six Languages; vol. 13, Building construction, civil engineering. New York: G. E. Stechert, c. 1919. 1030 p. \$4.50.

Fay, Albert H. Glossary of the Mining and Mineral Industry. Washington: Govt. Print. Off., 1920. 754 p. 75 cts. (U. S. Bureau of Mines. *Bulletin* 95.)

Kingzett, C. T. Popular Chemical Dictionary. London: Ballière, Tindall and Cox, 1920. 368 p. 15s.

Master Car Builders' Association. Car Builders' Dictionary. 9th ed. 1919. Definitions and illustrations of American railway cars, their parts and equipment, comp. and ed. for the Master Car Builders' Association by Roy V. Wright. New York: Simmons-Boardman Pub. Co., 1919. 1334 p. \$8.

Merriman, Mansfield. American Civil Engineers' Handbook. 4th ed. New York: Wiley, 1920. 1955 p. \$6.

Smithsonian Institution. Smithsonian Physical Tables. 7th rev. ed. prepared by Frederick E. Fowle. Washington: Smithsonian Inst. 1920. 450 p. \$3.

Ullmann, Fritz. Enzyklopädie der Technischen Chemie. v. 7. Berlin: Urban, 1919.

FINE ARTS

An important reference bibliography is the Boston Public Library's "Catalogue of the Allan A. Brown Collection of Books Relating to the Stage," which lists not only the 3500 volumes in the A. A. Brown collection but also all the other books in the Public Library on the history of the stage. As the catalog is dictionary in form, it is especially useful for its subject lists, as well as for its location of copies of desired books. Another useful library list is that on the "Development of Scenic Art and Stage Machinery" compiled by W. B. Gamble. Two small handbooks in the field of music are the new edition of Annesley's "Standard Opera Glass" and the "Complete Opera Book" by Gustave Kobbé. Of greater importance is the new edition of

Baker's "Biographical Dictionary of Musicians" which is described more fully under the head Biography.

Annealey, Charles. Pseud. of Charles and Anna Tittmann. *The Standard Opera Glass*; detailed plots of 235 celebrated operas, with critical and biographical remarks, dates, etc., with a prelude by James Huneker. New York: Brentano's, 1920. 791 p. \$3.

Boston, Public Library. *Catalogue of the Allen A. Brown Collection of Books Relating to the Stage*. Boston: Published by the Trustees, 1919. 952 p. \$2.50.

Kobbé, Gustav. *Complete Opera Book*, the stories of the operas, together with 400 of the leading airs and motives. New York: Putnam, 1919. 873 p. \$5.

New York. Public Library. *Development of Scenic Art and Stage Machinery*, a list of references in the library, comp. by William Burt Gamble, chief of the Science and Technology Division. New York: 1920. 128 p. 40 c.

LITERATURE

Reference books in literature are of many kinds this year. A new venture is the "Year Book of Modern Languages" edited by Gilbert Waterhouse, which includes reports and articles on progress and development of language study during the years 1914-19, articles on special languages and periods and selected bibliographies of the most important recent publications on these subjects. For librarians these bibliographies will probably be the most important feature of the book. Bibliographies which have a distinct reference use are the first supplement to Wells' "Manual of the Writings in Middle English" giving additions to September 1918; a second revised and much enlarged edition of Arnold's "Allgemeine Bücherkunde zur Neueren Deutschen Literatur Geschichte," and a new revised edition of Brown's "Ireland in Fiction." Two library publications should also be noted for their reference value. These are the "Catalogue of the Samuel A. Jones Carlyle Collection," published by the University of Michigan Library, and "Foreign Plays in English," a list of translations in the New York Public Library, this latter arranged by languages, with a useful title index. Several author dictionaries or indexes call for mention. The most ambitious of these is the three volume "Goethe-Handbuch" edited by Dr. Julius Zeitler, which is an encyclopedia, alphabetically arranged, of Goethe's writings, and of the persons and places associated with his life and work. English dictionaries include a second edition revised, but not enlarged, of C. T. Onions' "Shakespeare Glossary," a "Geographical Dictionary of Milton" by A. H. Gilbert, and C. H. Whitman's "Subject Index to the Poems of Edmund Spenser." Ralli's "Guide to Carlyle" should perhaps be mentioned in connection with the author dictionaries, tho not dictionary in arrangement, for it contains a large amount of reference information, analysis of all the works, etc.

Arnold, Robert Franz. *Allgemeine Bücherkunde zur Neueren Deutschen Literatur Geschichte*. 2. neu bearb. und verm. Aufl. Berlin: Trübner, 1919. 428 p.

Brown, Stephen James. *Ireland in Fiction; a guide to Irish novels, tales, romances and folk-lore*. New ed. Dublin: Mausel, 1919. 362 p.

Gilbert, Allan H. *A Geographical Dictionary of Milton*. New Haven: Yale Univ. Press, 1919. 322 p. (Cornell studies in English, no. 4.)

Michigan. University. Library. *A Catalogue of the Dr. Samuel A. Jones Carlyle Collection, with additions from the general library; comp. by Mary Eunice Weed*. Ann Arbor: Univ. of Michigan, 1919. 119 p. (University of Michigan general library publications . . . no. 1)

New York Public Library. *Foreign Plays in English, a list of translations in the New York Public Library, comp. by D. C. Haskell*. New York: 1920. 86 p. 80 c.

Onions, Charles Talbot. *A Shakespeare Glossary*. 2d ed. rev. Oxford: Clarendon Press, 1919. 259 p.

Ralli, Augustus. *Guide to Carlyle*. London: Allen [1920]. 2 v.

Wells, John Edwin. *A Manual of the Writings in Middle English, 1050-1400*. First supplement . . . Additions and modifications to September, 1918. . . . New Haven: Yale Univ. Press, 1919. p. 943-1037.

Whitman, Charles Hintington. *A Subject-Index to the Poems of Edmund Spenser* . . . New Haven: Yale Univ. Press, 1918. 261 p.

Year Book of Modern Languages, 1920, ed. for the Council of Modern Language Association by Gilbert Waterhouse. Cambridge: University Press, 1920. 209 p.

Zeitler, Julius, pseud. *Goethe-Handbuch; in Verbindung mit Dr. H. Bieber, Dr. A. v. Bloedau, Dr. W. Bode* . . . hrg. von Dr. Julius Zeitler . . . Stuttgart: Metzler, 1916-1918. 3 v. M. 45.

BIOGRAPHY

New reference books on this subject include both new editions and new titles in the "Who's Who" class, and some larger works planned for longer use. In the first class should be noted the new biennial edition of "Who's Who in America" which forms volume 11 of the whole set and presents some 23,443 biographies, of which 2514 are entirely new. A second edition of "Rus, a Register of Rural Leadership in the United States and Canada" contains 4631 sketches, as against the 2746 included in the first edition (1918), and adds some new directory lists not previously included, viz. (1) National rural and agricultural societies, (2) Journals devoted to agriculture and rural life, (3) Official provincial and state departments of agriculture, (4) Colleges and schools of agriculture. A changed title which should be noted is that of the well known "Literary Year Book" which now becomes the "Literary Who's Who." A new scientific Who's Who is the "Technischer Literatur-Kalender" first published in 1918, with a second revised and enlarged edition in 1920. This includes German scientists and technologists, gives brief biographical data, indicates each man's specialty, and adds a list of his published works. A new work in a very special field, which should be useful in business libra-

ries, is the "Accountants' Directory and Who's Who."

In the other class appears a new type of work. This is "Who Was Who," a collection from various earlier issues of the English "Who's Who" of the biographical sketches of all included in that work who died during the period 1897-1916. The sketches have not been amplified, but the date of death has been added, and the great convenience of the volume as substitute for many annual issues is obvious. An important new edition of a standard work is the third edition of Baker's "Biographical Dictionary of Musicians." This is entirely revised and much enlarged, showing an increase of some 2000 articles over the first edition (1895). Another work in a very special field is Morris's "British Violin Makers, a biographical dictionary, 2d ed." Another new edition is "American Medical Biographies" by Howard Atwood Kelly and Walter L. Burrage. This is a new edition, revised, of Kelly's "Cyclopedia of American Medical Biography" and shows omission of some minor names previously included, and the addition of some new material.

For European biography there are several new titles. The "Dictionnaire Historique et Biographique de la Suisse" should be mentioned here, tho it is described more fully in the section on history. Other new titles include the "Dansk Biografisk Haandleksikon" by Svend Dahl and P. Engelstoft, and "Das Geistige Ungarn, Biographisches Lexikon" by Alexander Jásznigi and Imre Parlagi. The Danish work is still in process of publication, as it is to consist of three volumes of which only the first (A—Soren Hansen) is yet issued.

Who Was Who; a companion to "Who's Who" containing the biographies of those who died during the period 1897-1916. London: Black, 1920. 788 p. 21s.

Who's Who in America, a biographical dictionary of notable living men and women of the U. S. vol. 11, 1920-21. Chicago: Marquis, 1920. 3302 p. \$6.

ATLASES

Probably no group of reference books is in more need of revision and remaking, as a result of the war, than the general atlases, and some progress toward the needed new editions is being made. Two new loose-leaf atlases which should be mentioned are the excellent "Times Atlas" which is being issued in parts and is not yet completed, and the Hammond "New-World Loose Leaf Atlas." The Hammond atlas includes a number of temporary maps for regions where boundaries were unsettled. These are to be replaced later by permanent maps. A useful smaller work is Philips "New World Atlas."

A special work useful in the large or business library is the new "Atlas América Latina" which includes in addition to its maps and charts a considerable amount of statistical and descriptive material, the latter given both in English and in the language, either Spanish, Portuguese or French, of the country in question. A new historical atlas is the "Atlas de Géographie Historique de la Belgique" of which only two parts covering 1786 and 1794-1814, have so far appeared. A useful small atlas for the war operations is that issued by the British Ministry of Information, in connection with its "Chronology of the War," mentioned in the section History.

Essen, Leon van der. Atlas de Géographie Historique de la Belgique. Publié sous la direction de Leon van der Essen . . . avec la collaboration de François L. Ganshof, J. Maury et Pierre Nothomb. Bruxelles: Van Oest, 1919. fasc. 5-6. fold. maps.

General Drafting Co., Inc. Atlas América Latina. A geographic, economic and commercial atlas of Mexico, Central America, West Indies and South America, presenting a series of new maps, commercial charts and descriptive data of the 20 Latin American republics. . . . New York: General Drafting Co. [c. 1919] 196 p. incl. 8 col. maps. 1 col. map on 29 sheets. 21 diags. 41 cm. \$20.

Hammond, G. S. & Co., pub. New-World Loose Leaf Atlas, containing new and complete historical, economic, political and physical maps of the entire world, including the new states of Europe. New York: Hammond, 1920. 376 p. 51 cm. \$20.

Philip, George. Philip's New World Atlas; a geographical survey of the new era, dealing with territorial changes and international relations . . . with an index of 35,000 names. London: Philip, 1920. 69 p. maps.

Reynolds, Francis Joseph. Reynolds' After-war Atlas and Gazetteer of the world. New York: Reynolds Pub. Co. [1919] 364 (i. e. 360) p. incl. 230 maps. illus. 39 cm.

The Times, London. Times Survey Atlas of the World; a comprehensive series of new and authentic

maps reduced from the national surveys of the world and the special surveys of travelers and explorers, with general index of over 200,000 names. Prepared at the "Edinburgh Geographical Institute" under the direction of J. G. Bartholomew. London: The Times, 1920.

HISTORY

New reference books in history range all the way from the dictionaries of antiquities to chronologies of the Great War. In the former class should be noted new volumes or parts of several established sets. The great French work of this class, Daremberg and Saglio's "Dictionnaire des Antiquités Grecques et Romaines," which was begun as far back as 1873, was completed in 1919 by the publication of a separate index volume. The new edition of the Pauly-Wissowa "Reallexikon" is still only about half way thru the alphabet, as volume 9 (dated 1916 but received in this country in 1919) reaches the letters Ju, but a third supplementary volume has already been issued, adding material for the section A—Inglan dem. Note should also be made for the completion of Hoops' "Reallexikon der Germanischen Altertumskunde," as far as the main alphabet is concerned, and the beginning of a new edition of Schrader's "Reallexikon der Indogermanischen Altertumskunde." A useful reference handbook for modern history is the "Handbook for the Diplomatic History of Europe, Asia and Africa, 1870-1914," by F. M. Anderson and A. S. Hersey. In chronological arrangement this takes the principal events of diplomatic history from 1870, gives for each a brief statement of the main facts and a selected bibliography of contemporary and secondary sources, with some account of the value or bias of these. A useful reference manual for war history is the "Chronology" issued under the auspices of the British Ministry of Information, of which two volumes, 1914-15, 1916-17, with an atlas of illustrative maps, have so far appeared. The chronology volumes list the events of each year by date, showing in parallel columns events on the Western front, Eastern front, Southern front, Asiatic and Egyptian theatres, naval and overseas operations, and the political field. For each year there is a detailed alphabetical index. A new edition of a chronology of general European history is Hassall's European history chronologically arranged 476-1920.

For the history of separate countries or regions, several new titles are of interest. A useful new handbook for English history is Hassall's British history chronologically arranged. What promises to be a useful addition to the all too small class of good dictionaries of history is the new "Dictionnaire Historique et Biographique de la Suisse," of which five parts carrying the alphabet part of the way thru A have appeared. This covers the field of local history, biography,

genealogy, etc., shows many good illustrations, principally portraits and reproductions of maps, plans and local views, has signed articles, and many bibliographical references. In the absence of a general national biographical dictionary for Switzerland, the amount of biography included here should be noted. Other regional reference books of importance are Dr. Kerner's "Slavic Europe" a most useful reference bibliography, a new volume of Brière and Caron's "Répertoire Méthodique de l'Histoire Moderne et Contemporaine de la France," a third volume of the "Encyclopaedie van Nederlandsch-Indië" and a concluding volume (dated 1914 but distributed in 1919-20) of the Belgian "Statistique Générale de la Situation du Royaume de 1876-1900." This last work is a general descriptive as well as statistical account of Belgian social, political and economic conditions, resources, etc., for the period covered and is a mine of general information in its field.

PUBLIC DOCUMENTS

The publication of volume 12 of the "Document Catalogue" carries that work thru June 1915. A useful special index is the "Index to Farmers Bulletins, Nos. 1-1000," compiled by C. H. Greathouse on the same lines as his earlier index to bulletins 1-500. Another state has been added to Miss Hasse's "Index to Economic Material in Documents of the United States" by the publication of the first of the volumes on Pennsylvania, and the issue of the second part of the "Index to United States Documents Relating to Foreign Affairs, 1828-61," also by Miss Hasse, carries that work thru the letter Q. A new list is the "Checklist of Publications of the Government of the Philippine Islands, September 1, 1900-December 31, 1917." This is arranged by the publishing bureaus, boards, etc., with an index of government authors and another of subjects. A good Canadian list is the "Annotated Catalogue and Guide to the Publications of the Geological Survey, 1845-1917."

Canada. Geological Survey. Annotated Catalogue and Guide to the Publications of the Geological Survey, Canada, 1845-1917, by W. F. Ferrier, assisted by Dorothy J. Ferrier. Ottawa: 1920. 544 p. (no. 1723.)

BIBLIOGRAPHY

The publication of the Bibliographical Society's "Census of 15th Century Books Owned in America" is notable not only as furnishing a new and important tool for certain lines of research but as bringing to a successful end a task in which American librarians and bibliographers have been interested for the past twenty years. The work is a check list, not a detailed catalog, and its great importance is that it locates 13,200 copies of more than 6640 titles in 169 public and 246 private libraries. The importance of this service is so obvious as to need no comment. Another new publication useful for information about rare and old books is the new ten-year index to "Book Prices Current"

edited by J. H. Slater. This covers the years 1907-1916, and with the two preceding indexes make it possible to refer very quickly to a thirty years' record of auction sales. A new library catalog which promises to be useful is the "Catalogue of Printed Books" in the library of the University of Edinburgh, volume one of which carries the alphabet thru the letter F. In this connection note should perhaps be made of the progress of the great printed catalog of the Bibliothèque Nationale at Paris, which has gone on during the difficult war period with surprisingly small interruption. During the five years 1915-1919 ten volumes (v. 61-70) were published and the alphabet now extends to the word *Herkules*. With every added volume the great importance of the set as an indispensable reference tool in the large library becomes more obvious.

Through THE AMERICAN LIBRARY ASSOCIATION

W. H. BRETT MEMORIAL BOOKPLATE. See p. 22

German Discrimination Abates

THE German system of discrimination against foreign book-buyers has weakened. This is the outstanding fact of the past six months—a fact that makes a big difference in the way an American librarian should manage importations.

The scheme, signed for the Börsenverein by Arthur Meiner, Carl Siegismund, Paul Schumann, Otto Paetsch, Hans Volckmar and Max Röder, split the German book trade from the outset. In general, it was retailer against publisher, and the former yielded sullenly to the proclamation of January 15, 1920, only after long contest. Yielded to the proclamation, but for the most part did not obey it. This continued till the end of March.

The fortunes of American libraries during this period varied according to the agent employed. If he had affiliations with proponents of the measure, we paid the piper. Otherwise, not.

On April 1, the Government took charge and has since enforced compliance, by forbidding export without affixture of its stamp, which is refused unless the bill submitted shows compliance with required rates.

During April and May the scheme was carried out to the letter, while the world protested. At first the foreign price was about six times the domestic, but as the mark rose in value, this factor dropped before the end of May to 2.7.

But the foreign protests were effective, trade dwindled rapidly, the German dealers cried out in the daily press, till the authorities gave way. At the present the schedules are marked down exactly 50%.

What was the scheme?

To count the mark as nine cents in the United States, and other countries accordingly. Then to all bills, domestic and foreign, the retailer was to add a so-called "Teuerungszuschlag" of 20%. This gave the mark a value of 10.8 cents. This is based on the current list price. But if, as claimed, the domestic price has, on an average, advanced 150% since 1914, the mark becomes 27 cents on the ante-bellum basis. In other words, if a former 10-mark book now lists at 25 marks and we pay 10.8 cents per mark, the book costs us \$2.70, or 27 cents a mark at the 10-mark price.

Now when the Government took charge, the mark was down to about 1.5 cents. It was then necessary to add 500% to the domestic price to

give it a value of nine cents. But before the end of May, the mark had risen to about 3 1/3 cents, and so only 170% had to be added. Then a long decline set in, with 1.6 cents an average value for the summer. Here the highly important fact is that, despite the decline, 170% has been left unchanged till October 15, when it was raised to 250%, while the "Teuerungszuschlag" was reduced to 10%. Since the mark was worth about 1.5 cents at the time, a literal enforcement of the rule would require 500%. So the schedules are marked down 50%.

How shall libraries reap the full advantage of the situation?

To answer this, the position of the middleman must be understood. He lives on the discounts given him by the publishers. An average one is 25%. Thus, in normal times, an American agent receives \$6.00 on a consignment of books listed at M. 100. He is then on a par with his German competitor. But suppose the mark drops from 24 cents to 12 cents, the American's discount of 25 marks drops in value to \$3.00. He must, however, have his usual profit, because he is handling the same amount of material and paying the same freight. So his extra \$3.00 must come from his client. In other words, the customer must give the agent enough to settle with the publisher, and \$6.00 besides. His rate, of necessity, becomes 15 cents to the mark. But to the German agent 25 marks is 25 marks. His rate therefore is the current one, or, in the above example, twelve cents. And so on down.

Under the Börsenverein's discriminatory system, however, the two agents come back to a parity, while with the relaxation of the system above indicated the divergence once more is established. This will all become clearer from the table on the following page:

It will be observed that thruout the period subsequent to April 1, \$4.05 is set down as the proper profit for a non-German agent instead of the former \$6.00. Why?

\$1.00 is the figure resulting from the collision of two opposing principles. First, if it be true that it now takes 25 marks in Germany to buy a book that could formerly be acquired for 10 marks, then 100 marks will bring the agent just two-fifths as many books as before the war, and so involve only 40% as much labor and expense. His profit should apparently drop from \$6.00 to \$2.40.

But, in the second place, all his operations now cost more. How much more? For light, turn to French and English agents. They are found to have generally advanced their commissions to 10% from 6, that is 66 2/3%. This, then, added to \$2.40 makes \$4.00 or practically the figure in the table.

Again, it will be observed that a distinction is drawn between books antiquarian and otherwise. The former are exempt from the decree. The domestic rate here applies abroad, if the seller so desires. Here, too, the discount to the agent is lowered, and the gap between agents is the more glaring. It is but fair to

add that the term "Antiquariat" is rather elastic in the hands of the right agent. One library that has done much importing the past six months finds that nearly a third of its bills fall in this category, and that its average price per domestic mark, accordingly, has been 3½ cents.

The general conclusion to be drawn from this review is that a library loses money whenever it imports the books of one country thru an agency of another whose money has a higher exchange value. Thus, Italian books cost more if ordered from Paris, Scandinavian from London, Belgian from Holland, and German from any of these or New York, for the dollar is at the peak of international exchange. As long as this condition holds direct buying everywhere will remain profitable. No library should pay for 1921 periodicals in advance

more than 17½ cents a shilling, 6 cents a French franc, 4 cents a lira, 14 cents a peseta, plus transportation, or 6 cents a mark, delivered at the door.

The present committee is specifically charged by the President with the duty of aiding the libraries in the difficult matter of importation. They propose, accordingly, not a Conference report merely, but a service. The present statement lays the foundation. Other brief ones will follow from time to time. Send in your problems. We shall try to solve them. The presence of two public librarians will insure attention to domestic trade as well and secure continuity of policy.

The Valutazuschlag—An Explanation

To the Editor of the LIBRARY JOURNAL:

I have just received a letter (dated November 25, 1920) from Dr. Paul Schwenke, first director of the Prussian State Library, Berlin, and editor of the *Zentralblatt für Bibliothekswesen*, from which I venture to quote, in translation, the following interesting passages in regard to the German book trade:

"I realize that the 'Valutazuschlag' is not altogether agreeable to you; but there was no other way to prevent the exploitation of the supply of German books. Before the introduction of the 'Zuschlag,' and with it the control of the export trade, incredible quantities of books went to foreign countries for a mere bagatelle. In Holland, the storehouses of book dealers are simply stacked with copies of the German 'Konversationslexikons' and other big works, which were bought for a few gulden, and which we now must buy back at a high price, because new editions cannot be printed. In this manner a 'Konversationslexikon' which formerly cost about 200 marks and which the Dutch bought for not quite 10 gulden cannot be bought here for less than 2000 marks. It is true, that in the beginning the 'Zuschläge' were a bit too high, but they have been reduced very much—at the moment to 180 per cent for America—i. e., a book costing 20 marks is sold to America for 56 marks, which at the present rate of exchange equals 80 cents! It would be highly desirable

to have a firmly established rate of exchange for marks and dollars, and to make out the bills in dollars and cents—similar to the arrangement which is under consideration at present with the Scandinavian countries.

"It is, I regret to say, not to be expected that this rate of exchange would be adopted also in the sale of American books to Germany. Our budgets for the purchase of books have, it is true, been increased, in some cases even doubled, but that is hardly sufficient for the acquisition of German books, to say nothing of foreign books, as long as a five dollar book or journal costs as much as 400 marks. With the support of friends abroad and at home we hope, however, to reach a point where the most important works will be obtainable at least somewhere in Germany and made accessible thru the Bureau of Information, so that they can be made use of in every locality by means of an inter-library loan system."

Those of us who met Dr. Schwenke when he visited this country in 1912, or saw him in Leipzig at the International Book Fair of 1914, or in his splendid new quarters in what we used to know as the Königliche Bibliothek, Berlin, will be glad to have this word from one who impressed us all as a careful observer and a great organizer, a devoted friend of all librarians regardless of nationality, and whom we shall hope to be able to greet again in the near future.

THEODORE WESLEY KOCH.

Thrift

SOME REFERENCES PREPARED IN ANTICIPATION OF THRIFT WEEK, JANUARY 17-22

THE most complete list of works on Thrift is a thirty-five page bibliography entitled "Thrift and Savings: a selected bibliography" prepared by George L. Zook and distributed thru the Public Affairs Information Service, price \$1.85. This is supplemented by entries in later numbers of the *Bulletin of the Public Affairs Information Service*.

Librarians who wish shorter lists in preparation for Thrift Week will find the two following selected lists useful.

SOME BOOKS AND PAMPHLETS ON THRIFT

COMPILED BY LOUISE B. KRAUSE, librarian, H. M. Byllesby and Co., Chicago, and SUE M. WUCHTER, librarian, Continental and Commercial Bank, Chicago.

- American Bankers Association. Savings Bank Section. Encourage the establishment of school savings bank. New York: American Bankers Association, 5 Nassau Street, 1916. 32 p.
- Five practical plans for operating a school savings bank with forms, state laws and statistics. New York: American Bankers Association, 5 Nassau Street, 1916. 32 p.
- Thrift how to teach it how to encourage it. New York: American Bankers Association, 5 Nassau Street, 1916. 64 p.
- Compilation of leading addresses on thrift. Suggestive outlines for thrift talks, directions for conducting thrift campaigns and statistical information.
- Atwood, A. W. How to get ahead. Indianapolis: Bobbs-Merrill, 1917. 277 p.
- A popular treatment of individual and domestic economy and wise investments.
- Blakey, R. G., ed. New American thrift. *Annals of the American Academy*. V. 87, No. 176. Philadelphia: American Academy of Political and Social Science, 36th Street and Woodlawn Avenue, 1920. 248 p.
- Excellent papers on various phases of thrift by authorities. Contains bibliography.
- Brown, M. W. Development of thrift. New York: Macmillan, 1899. 222 p.
- The purpose of thrift and the various agencies for saving money.
- Carver, T. N. War thrift. Carnegie Endowment for International Peace. New York: Oxford University Press, 1919. 68 p.
- The fundamental principles underlying the necessity for thrift in war; applicable also in peace.
- Chamberlain, A. H., and J. F. Thrift and conservation: how to teach it. Philadelphia: Lippincott, 1919. 272 p. (Lippincott's Educational Guides.)
- Contains bibliography.
- Ely, R. T., and others. The foundations of national prosperity. New York: Macmillan, 1917. 378 p.
- Comprehensive exposition of the necessity for the conservation of human and natural resources in every stage of human progress.
- Farmer, L. A. B. C. of home saving. New York: Harper, 1916. 113 p.
- Handbook of practical suggestions for economy in the home.
- Fowler, N. C., Jr. How to save money. Chicago: McClurg, 1913. 287 p.
- A popular treatise valuable to those not familiar with financial operations, for its sound advice on the ways to save and invest money.
- Hall, Bolton. Thrift. New York: Huebsch, 1916. 247 p.
- Popular discourses on modern methods of using personal and social resources advantageously.
- Hamilton, J. H. Savings and savings institutions. New York: Macmillan, 1902. 436 p.
- A standard and comprehensive account of savings institutions in America.
- Jackson, B. B., and others. Thrift and success. New York: Century, 1919. 288 p.
- Suggestive and inspirational extracts for use in the elementary schools.
- Kemmerer, W. Postal savings. Princeton, N. J.: Princeton University Press, 1917. 176 p.
- Excellent and thoro account.
- Kimball, Ingalls. Thrift in France, its bearing upon reconstruction and what we can learn from it. New York: La France, 220 W. 42d Street, 1919. 16 p.
- Kirkpatrick, E. A. The use of money. Indianapolis: Bobbs-Merrill, 1915. 226 p.
- Very suggestive book for the training of children in the use of money.
- Kniffin, W. H. Savings bank and its practical work. 3rd ed. New York: Bankers Publishing Company. 1918. 551 p.
- MacGregor, T. D. Book of thrift. New York: Funk and Wagnalls, 1915. 349 p.
- Suggestive and practical chapters on the various aspects of the thrift movement.
- Marcossen, I. F. How to invest your savings. Philadelphia: Altemus Company, 1907. 120 p.
- Short chapters on the various kinds of available investments.
- Marden, O. S. Thrift. New York: Crowell, 1918. 92 p.
- A popular discourse on personal economy for young people.

- Mead, E. E. *The careful investor*. Philadelphia: Lippincott, 1914. 289 p.
 Good advice as to how to invest in stocks and bonds.
- National Association of Corporation Schools. *Report of Committee on profit sharing and allied thrift plans [at the] eighth annual convention*, New York, May 31-June 4, 1920. H. M. Thurston, chairman. Room 834, 15th Street and Irving Place, New York. 1920. 55 p.
- Philadelphia Chamber of Commerce. *Education Committee. Thrift: a short text book for elementary schools of Philadelphia*. 1917. 15 p.
 *Compiled and presented to the schools of Philadelphia by group one of the Pennsylvania Bankers' Association.
- Pritchard, M. T., and Turkington, G. A. *Stories of thrift for young Americans*. New York: Scribner, 1915. 222 p.
 Stories suited to children in the upper grades.
- Schooling, William. *Value for money: the influence of wise spending on national prosperity*. 2d ed. New York: Putnam, 1920. 159 p.
- Smiles, Samuel. *Thrift*. New York: Harper, 1875. 404 p.
 A very suggestive book concerning the importance and necessity of personal economy and savings institutions.
- Straus, S. W. *History of the thrift movement in America*. Philadelphia: Lippincott, 1920. 256 p. (Lippincott's Thrift Text ser.)
- Taber, C. W. *Business of the household*. Philadelphia: Lippincott, 1918. 438 p.
 Treats the financial problems of the home, budgets, standards of expenditures, accounts and investments.
- Withers, Hartley. *Poverty and waste*. New York: Dutton, 1916. 180 p.
 An excellent exposition of the economic principles underlying personal and public economy.

BIBLIOGRAPHIES

- National Education Association. *Thrift: a bibliography*. Washington. National Education Association, 1400 Massachusetts Avenue, N. W. 1917. 87 p. 25 c.
- Russell Sage Foundation Library. *Thrift and savings: a selected bibliography*. New York: Russell Sage Foundation Library, 130 E. 22d Street, 1919. 4 p. 5 c.

GOVERNMENT PUBLICATIONS ON THRIFT—A SELECTED LIST

PREPARED BY JESSIE M. WOODFORD

Head of the Documents Division of the Chicago Public Library

THE items on this list are classed under the following heads:

- General
- Personal
- Family budgets
- Education

GENERAL WORKS

- U. S. War Loan Organization. *Savings Division. Avenues to affluence*. 1919. 22 p. Mimeograph sheets.

A series of friendly personal talks by the government to the young men and women of the nation, the purpose of which is to show the duties and opportunities which confront young citizens starting out in life.

— Thrift Leaflets, Nos. 1-20.

A series of leaflets, all popular phases of subjects including clothing, fire, family budgets, savings, labor saving methods in home, lighting, food.

- Contents: 1. Is thrift worth while, Mr. American? 2. Seven steps toward saving. 3. Wise spending saves. 4. Saving time and money by simple house-cleaning. 5. Saving labor and materials by easier laundry methods. 6. How to remove stains. 7. Take care of your clothing. 8. Saving materials and money by special cleaning. 9. Thrift in lighting. 10. Thrift in the choice, use and care of kitchen utensils. 11. Thrift in the use of fuel for cooking. 12. Saving fuel in heating. 13. Saving food by proper care. 14. Inexpensive ways of keeping food cool. 15. How shall we choose our food? 16. The weekly market basket. 17. Thrift on the farm. 18. Business methods for the home. 19. Teaching thrift to children. 20. Thrift standards for boys and girls.

Withers, Hartley. *The need for saving in peace*

time. 1919. 32 p. (Great Britain. National War Savings Committee. *National Economy*. Serial No. 1.)

A timely and popular abridgement of the author's book, "Poverty and waste," 1914. It emphasizes the present need of intelligent thrift and the consumer's responsibility. Good for debates.

PERSONAL THRIFT

- U. S. Department of Agriculture. *Selection and care of clothing*. 1919. 32 p. (*Farmers' Bulletin* 1089.)

Thrift suggestions for wise buying, freshening, and remaking, and care of garments.

FAMILY BUDGETS

- U. S. Bureau of Labor Statistics. *Tentative quantity and cost budget necessary to maintain a family of five in Washington, D. C., at a level of health and decency*. 1919. 75 p. Contains helpful suggestions as to budget making.

- U. S. War Loan Organization. *Savings Division. How other people get ahead*, by F. J. Haskins. 1919. 16 p.

A brief plea for individual and family budgets with blank forms for monthly expense accounts and a summary for the year.

EDUCATION

- U. S. War Loan Organization. *Savings Division. Ten lessons in thrift*. 2d ed. 1919. 19 p.

"The lessons develop fundamental principles of saving money and its social and industrial importance, also the broader subject of thrift and its application to the

whole range of personal and community life. For women's clubs or special courses. Reading lists for adults and children."

Outline of projects which promote thrift and industry in the lives of boys and girls. 1919. 6 p. Mimeograph sheets, "For use by classroom teachers, club leaders, and supervisors of boys and girls who can earn and save money without interference with the normal activities of child life and development."

Fifteen lessons in thrift. 1919. 32 p.

Lesson prepared for young people from 14 to 20 years of age, to be used in schools or special classes. They emphasize the four aspects of thrift—earning, saving, investing and spending.

Outline of lessons to teach thrift in normal schools for teachers. 1919. 22 p. Outlines of thrift lessons in geography and English history.

Outline suggested for teaching thrift in elementary schools. 1919. 23 p. Grades 1 to 8 covered, outline arranged under headings: 1. Purpose; 2. Discussion; 3. Conclusions; 4. Ad-

ditional thrift lessons; 5. Poems and stories, or, reading; 6. Problems.

Thrift-day program for use in elementary and high schools. 1920. 46 p. Three programs for primary, upper grades, and high schools; with a play or tableau for each and recitations and declamations intended to interest boys and girls in practice of thrift.

THRIFT PLAYS

Dunlap, Henrietta F. The handmaid; a masque. (In U. S. War Loan Organization. Thrift day program. p. 20-24.)

Twelve characters (and groups of children), Grammar grades.

Ethel and the stamp. (In U. S. War Loan Organization. Thrift day program. p. 9-11.) Four characters. Primary grades.

U. S. War Loan Organization. Savings Division. When "Thrift" comes in at the door, by K. W. Hinks and K. Wicker. 1919. 5 p. Mimeograph sheets.

"A simple pantomime for schools" with eleven characters and a procession of boys and girls.

THE Cleveland Public Library is glad to exchange with individuals, libraries or other institutions the book-plates used in the John G. White Collection of folklore and Orientalia and the memorial camp library book-plate used in the campaign in Cleveland after the death of

William Howard Brett. These book-plates, as will be seen from the accompanying illustrations (which show eight of the twelve forming the set), are not mere book labels but are of real interest as book-plates. The Brett memorial plate is shown on page 16.

Copyright by Underwood and Underwood

Memorial Tree at the Library of Congress

THE staff of the Library of Congress (and others interested) gathered on the south side of the Library building at eleven o'clock on the morning of December 7, to plant a Memorial Tree (a Japanese elm) in honor of four of their associates who loss their lives in military service during the war, the four being: Corporal Charles Chambers (312th machine-gun battalion), First Lieutenant Edward Comegys (11th Aero squadron), Corporal Frank Dunkin (54th U. S. Infantry) and Corporal John Wheeler (U. S. Signal Corps).

Librarian Putnam presided at the exercises, and the Superintendent of the Building and Grounds supervised the planting. In addition to remarks by the Librarian, there were appropriate addresses by Representative Kahn, chairman of the House Committee on Military Affairs, by Col. Lester Jones (Superintendent of the Coast and Geodetic Survey) first Commander of the American Legion, and by Captain Garland Powell, of Cumberland, Md., who commanded the 22d Aero squadron in which Lieut. Comegys first served.

A section of the Marine Band furnished appropriate music, and a group of airplanes from Bolling Field circled overhead during the remarks of Captain Powell.

The Library's service flag, displayed at the

exercises, shows ninety-five stars, of which it was noted that eighty-nine represented the number of Library employees who had "enlisted" out of two hundred and fifteen men on the Librarian's rolls.

Dr. Putnam told of the service given by each of the men in whose honor the tree was planted and in conclusion pointed out the peculiar appropriateness of this memorial:

"That there should be a memorial of them here is most fitting; and of all forms of memorial a tree is the most symbolic. It is a *living* thing. It is *unselfish*: the elements that it draws to itself—warmth of the sun, moisture of earth and air—it gives forth again in beauty and in protection. We plant it, not to bury it, but to enlarge its life and opportunity. It is to *grow*: in stature, in vigor, in beauty, in service. It is to *endure*: not merely in its own generation, but in the later generations which will be its offspring.

"So the memory which it holds for us: the memory of these four men, but also—as they themselves would wish—of the cause which they served. It should be with us a living thing, a growing thing. It should have within it a power to serve. It should refresh and invigorate us in times of peace; it should steady us, and give us faith, in times of stress. And it should *endure*:

to the lasting profit of the community we serve and of that everlasting cause which, though wars may cease, will always, in some form, require of us the sacrifice of self.

"For these four men the great problem of duty has been solved finally, completely:

—"They laid the world away; poured out the rich,

Sweet wine of youth; gave up the years to be
Of work and joy, and that unhop'd serene
Which men call age; and those who would
have been

Their sons, they gave, their immortality.
Bid us remember in what hour they gave
All that mankind may give
That we might live."

The A. L. A. Sends Books to Roumania

THE Executive Board of the American Library Association recently sent to the Queen of Roumania a gift of three hundred books for the use of her people. The request from the Queen, which may be of interest to librarians and others here, follows:

"MAISON DE S. M. LA REINE,
"BUCHAREST, ROUMANIA.

"The Carnegie Library Association,
"New York, N. Y.

"Gentlemen: I have been informed by the Roumanian Commission of the American Red Cross that the Carnegie Library Association is prepared to furnish English books to localities or societies unable to secure them in any other way and that your Society is desirous of extending its educational aid in this way wherever need for this aid is found to exist.

"Since the close of the European war, there has been a great interest manifested in Roumania in the study of English. The English language is now being taught in the public schools thruout the country, as it is felt and believed that the knowledge of English will be of vast value to the people of Roumania, not only commercially but socially, because of the closer bonds of friendship that now exist between Roumania on the one hand and the United States of America and England on the other. Prior to the war, the study of English was confined largely to the upper classes of society, as the language was not taught generally thruout the schools, and it was only those of means who were able to find the opportunity to study the language. Now, however, the desire of the Roumanian Government is that the Roumanian people as a whole should acquire an accurate knowledge of English at the same time that they are instructed in their native tongue.

"The study of English being a new departure here, we lack the books and writings in English that are so necessary to the acquisition of a knowledge of the language. Should we attend upon the demand for English literature that would only come after the Roumanian people

had acquired a knowledge of and an acquaintanceship with the English language, I fear that the growth of knowledge and interest in the language would be seriously handicapped. Certainly, interest in the language would be much stimulated by the access to interesting and instructive books in English. Our national problems are so many and so great that the Government itself is not able to devote the energy and endeavor to this work that is needed. I realize and appreciate the tremendous advantages and benefits that will accrue to the Roumanian people from the knowledge of English and by an acquaintanceship with American and English authors and I want to do all that I can personally to avail my people of this help. Therefore, I am sending the request to you that you do all in keeping with your regulations to supply the wants of Roumania in this line. Books of story, travel, history and similarly interesting subjects written in simple English and varied selection of primary text books would best meet the needs of the country. The amount sent by you would depend entirely on your resources, as English books can be used here in very large quantities.

"I trust that you will carefully consider this petition and that you will advise me at an early moment just what you can do to fill this demand. In the event that you are not in position to furnish books as requested, I would greatly appreciate your delivering this letter to the proper person or society in America and informing me what has been done.

"MARIE, *Queen of Roumania.*"

WANTED

The Engineering Societies Library is anxious to obtain one or two copies of the "Manuel du Répertoire Bibliographique Universal," Brussels; Institut International de Bibliographie. Anyone having a copy for sale or knowing where one can be found, will please communicate with the Director of the Library, 29 West 39th St., New York.

The Launching of the Ala

THE ALA, the ship which on the invitation of the Emergency Fleet Corporation was named by the American Library Association, was launched on December 18th from the shipyards on Bristol on the Delaware River. The christening ceremony was, at the request of President Tyler, performed by Shirley Putnam, editor and manager of the *Greenwich Press*, and daughter of Herbert Putnam, librarian of Con-

THE ALA AND HER SPONSOR, SHIRLEY PUTNAM
gress. In a letter to Miss Tyler, Miss Putnam tells of the ceremony:

“ . . . By 8:30 Miss Lawton (of the Shipping Board), Mr. W. W. Hardwick (staff assistant), and I were being met in the shipbuilders' colony, Harriman, in Bristol, by Mr. Robertson, superintendent of the shipyard, which belongs to the Merchants' Shipbuilding Corporation.

“In a moment we are on the docks. Twelve great nests of iron girders, like a Pennell etching, piled against the sky. Workmen and wives are hurrying thru the cold to the base of a platform. Mr. Hardwick takes my arm, we mount steps all red white and blue along the balustrade, like a July Fourth Oration stand. At the top there waits the camera man (not a movie 'operator').

“But best of all, there is someone in an A. L. A. uniform grasping my hand, Miss Graffen, supervisor of the Delaware District, and Mr. Franklin Price of the Philadelphia Public Library, and a very dignified junior Price, aged about seven. (Having been so long out of the service, I thought it better not to wear my uniform, except the pin, which I showed to all the shipping people).

“I then become aware that the platform is at the foot of a silver precipice which curves outwards towards the sky. Against the sky hangs the anxious face of a sailor, and from his hand dangles a gorgeous rope of red, white and blue satin ribbon.

“Now someone is placing the object at the end of the rope in my hand—a quart bottle, cased in complete steel and swaddled in more red, white and blue ribbon. Moet and Chandon, Veuve Cliquot, California? No one could tell, except that it had been stored years ago, with forty-nine others.

“A Scotchman, Mr. Wilson, works manager, is my 'starter.'

“Hold it this way, in yourr two hands. Hit harrd; most of the ladies arr so timid they don't bbreak the bott'l. And don't forrget to speak when you hit.'

TAKING THE WATER

"More pictures,—holding bottle as if at the bat,—holding a sheaf of wonderful pink roses, and trying to make the 'ALA' on the ribbon read right side up.

"Then a sawing that has been going on below us suddenly ceases.

"'Ready!' says Mr. Wilson; 'Quick, she'll go fast!'

"Crash—'I christen thee "ALA"!' It's done in a second. I have hit the steel prow such a clip that I fully expect to see the hull spinning seaward. The 'amber liquid' blinds me, everyone laughs,—I try to watch the sailor hauling up the fragments. And there is still the sharp edged precipice, only a foot away, moving waterward with a measured glide. No hitch, no sound, only the great hull is drawn magically down the ways towards the water. She takes it buoyantly, the pennants catch the breeze, and the sun flashes on the silver side.

"OUR 9000-TON CARGO SHIP THE ALA"

"So our 9000 ton cargo ship ALA, very high in the water, makes her first step in the world, looks up the river, then swings her nose curiously towards the further shore. She may sail for the Far East, or South America or the Pacific Coast, they tell me, like any of her thirty-eight twin predecessors.

"That was the end except for hankshakes, and wishings that we might go on the trial trip some time in January. They tell me Mr. Price was talking of an ALA emblem of some sort for the saloon. Incidentally, I was assured that every ship, including this last, had been equipped with a fine library, even before leaving the yards.

"I wish to send you and the Association my heartfelt thanks for having offered me the thrill of this unusual adventure. I was so sorry that

you and other officials should not have been there to give the ship your blessing."

THOMAS VINCENT'S "CHRIST'S CERTAIN . . . APPEARANCE . . ."

To the Editor of the LIBRARY JOURNAL:

There has come to us from Massachusetts "Christ's/ Certain and Sudden/ Appearance/ to/ Judgment./ By Thomas Vincent,/ sometime Minister of *Maudlin's/ Milk-Street, London/ Heb. X. 37./ For yet a little while, and he that shall come, will come*"—the rest of the title page is torn away; as are the few pages that evidently followed p. 264. The little book measures 3½ x 5½ inches.

Evans says that Benjamin Franklin published this book at Philadelphia in 1740, but gives no descriptive details.

The Boston Athaeneum catalog gives a 12 mo. edition published at Greenfield; and the British Museum lists two other 12 mo. editions, English and Scotch.

I should like very much to know whether any other library has this little 3½ x 5½ edition and whether this is the one which was printed by Benjamin Franklin.

ASA DON DICKINSON, *Librarian.*
University of Pennsylvania,
Philadelphia.

HALF PRICE SUBSCRIPTIONS FOR THE LIBRARY JOURNAL

In reply to inquiries regarding half-price subscription rates for the LIBRARY JOURNAL:

Beginning with January 1, 1921, half rates (\$2.50 instead of \$5.00) apply to:

- (a) Copies ordered for any library having an income of \$3000 or less;
- (b) Copies for any librarian or assistant having a salary of \$1500 or less; and
- (c) All duplicate copies, whether for use of trustees or staff.

TO CONTRIBUTORS

Notices intended for publication in the LIBRARY JOURNAL should reach this office not later than ten days before the date of publication; except brief notices intended for the Library Opportunities department which may be sent so as to arrive five days before the publication-date.

Typewritten copy should be double-spaced and indistinct carbons should not be sent.

One of the best known men recently to be appointed to a library post is Charles Ponzi, the quick-rich schemer, who is librarian of the county prison at Plymouth, Mass.

THE LIBRARY JOURNAL

TWICE-A-MONTH

JANUARY 1, 1921

THE library year 1920 was not a happy one, for the library profession suffered as did all others from the aftermath of war. The American Library Association held a special meeting, the only one in its history, at the mid-winter gatherings at Chicago, preceding the well attended conference at Colorado Springs in June, and at both constitutional revision and the Enlarged Program were the chief subjects of discussion and difference. At the Atlantic City meeting and during Library Week at Lake Placid, the latter an especially happy event, informal gatherings of A. L. A. members continued discussions of the Enlarged Program, and at the latter, Mr. Carr's paper proved a storm center for rumblings which have perhaps helped to clear the air. The post card protest from over a thousand members in the spring embarrassed the work of the Enlarged Program Committee, which, at the close of the half year, turned over its work to the Executive Board. Constitutional revision was a good deal confused at both A. L. A. meetings, and President Tyler, the third woman president, whose guiding purpose is to reconcile differences and promote harmony, is already taking wise steps toward further reorganization, which will come to the front at the next Conference to be held at Swampscott near Boston, June twenty-first to twenty-seventh. The money appeal for the Enlarged Program, with these differences and public apathy both in the way, failed of success, but the A. L. A. is not in the plight of the Inter-church Federation with a serious deficit to meet, and the balance of about seventy thousand dollars on the credit side will be put to good purpose. While the rainbow hopes for a two million dollar fund for peace work have been sorely disappointed, yet the A. L. A. has the right to rejoice in what it has accomplished during the war and what it may hope to accomplish with the development of peace. Happily, much of the war work of the A. L. A. will be continued by the government itself, as in the Army and Navy and health services. The successful launching of the good ship Ala is a happy augury for the future.

★ ★ ★ ★ ★ ★ ★

DESPITE these discouragements at home, America has been doing great things

abroad in the library field. It has completed a fund of two million francs toward the rebuilding of the library of the University of Louvain, and its contribution of books is already about 25,000 volumes, well selected in correlation with the gifts from England. Unfortunately, there were no American representatives at Brussels for the twenty-fifth anniversary meeting of the International Institute of Bibliography, which was the chief continental event of the year, but the filing of the twelve millionth card in its repertory was gratifying evidence that, thanks largely to Brand Whitlock, German ruthlessness had not destroyed this valuable collection. The American Library at Paris, one of the most important survivals from A. L. A. work in the war, has started on its permanent career, with Mr. William N. C. Carlton at its head, and with good outlook as a radiating center for American influence in the library development of all Europe. The Carnegie Endowment for International Peace has sent important libraries of economic and kindred literature to several European and also to most South American capitals. The American Institute of International Education, which the Endowment supports, will probably send a trained librarian and a skilled children's librarian to do supervisory work in the devastated region of Belgium, while Miss Anne Morgan's committee has already organized several children's libraries, under Miss Jessie Carson's direction, in the devastated provinces of France. An Anglo-American committee is planning to make donations of books to promote library development on the Continent. Among the new countries, Czecho-Slovakia has taken an almost startling leap in developing, at least on paper, a complete library system, including what is practically a library commission, a library school, a systematized scheme for public libraries with standardized cataloging statistics and reports, and national bibliographies. Our English brethren held their annual meeting at Norwich in September, but little has been heard from other European library organizations, and nothing whatever from Germany or Russia.

★ ★ ★ ★ ★ ★ ★

ONE of the chief difficulties of the year has been the diminution in library personnel

because of low salaries, the competing demands for librarians in special fields and the diversion of trained helpers to other callings. The Library Workers Association was organized to deal with the question of employment, and not in rivalry with the A. L. A. There has been a general movement to obtain increased funds for salaries, with at least partial success, and at Washington the Reclassification Commission has been taking steps toward standardization, which, it is hoped, will bear fruit in adequate salaries for government librarians. New York and Brooklyn have been crippled by city appropriations, but a substantial increase was obtained in the fall which will permit assistants to be started at somewhat over a thousand dollars per year, New York accepting the city schedule, which has some serious inequalities, and Brooklyn rearranging its schedule so as to resume the practice of a yearly increase of \$60 within as well as between grades. There is already in sight a general decrease in wages as the high cost of living decreases, but library assistants have been so flagrantly underpaid that it is to be hoped that the new standards may be fully maintained. Under recent conditions, many libraries have had only two-thirds of their usual complement and have been obliged to face the closing of branches, while at Dayton there was danger that the Library might have to be closed for some months—a danger happily averted, under pressure from the body of citizenry, by adequate municipal appropriations.

★ ★ ★ ★ ★ ★ ★

IN changes of library personnel, a curious chain of circumstances occurred as the result of William N. C. Carlton's resignation from the Newberry Library to become the associate of George D. Smith, foremost as a book bidder. The sudden death of Mr. Smith soon after caused Mr. Carlton to associate himself with the A. L. A. Enlarged Program work and later to become the head of the American Library in Paris. George B. Utley resigned the secretaryship of the A. L. A. to become Mr. Carlton's successor, and Carl H. Milam was marked by his distinguished services as a war executive to be Mr. Utley's successor. Princeton University paid high honor to Professor E. C. Richardson in making him director, with leave to devote himself for half of each year to special library and bibliographical work, and his administrative position as librarian was filled by the transfer of James T. Gerould from the University of Minnesota, where Ina Ten Eyck Firkins as acting librarian takes up his work. At the Queens Borough Public Library, the third library system

of Greater New York, John C. Atwater, assistant principal of a local high school, was made director early in the year, Miss Otis being supervisor of branches. Changes have been especially many in the library school field, where Sarah C. N. Bogle left the directorship of the Carnegie Library School at Pittsburgh to become assistant A. L. A. secretary with Mr. Milam, and was succeeded by Nina C. Brotherton; Frank K. Walter who had left Albany to become research librarian for the General Motors Co. of Detroit, was succeeded by Edna M. Sanderson. A third change in library school personnel was the appointment of Elizabeth G. Thorne as vice-director of the Syracuse University Library School, and Adelaide R. Hasse became director of the new School for Business Librarians at Washington. Dorsey W. Hyde after his service with the Packard Motor Car Co., becomes assistant manager of the newly created Civic Development Department of the U. S. Chamber of Commerce, his former place as municipal reference librarian in New York being filled by Rebecca B. Rankin. It is gratifying to note that the League of Nations Library at Geneva will be administered by Americans, Florence Wilson as librarian and Helen Rex Keller as assistant librarian. There were incidental changes in other posts which are quite beyond possibility of chronicle.

★ ★ ★ ★ ★ ★ ★

DEATH laid a heavy hand on the library profession in 1920. Mary F. Isom crowned her successful career at Portland, Ore., after her war service by heroic fight against fatal disease. Agnes Van Valkenburg, associated with Miss Plummer in the Library School of the New York Public Library, passed away after brief service in Michigan. The death of Mrs. Ida A. Kidder, beloved of all her students at the Oregon Agricultural College Library, was a distinct loss to that institution. Charles Mc Lenegan, librarian at Milwaukee, died at his post and was succeeded by Matthew S. Dudgeon. Dr. Thomas M. Owen, an archivist rather than a librarian, became, nevertheless, the central library authority for Alabama, where his death left a serious gap. John C. Sickley, for thirty-eight years librarian at Poughkeepsie, will be missed, especially in the New York State Library Association. Richard Bliss, for thirty years librarian of the Redwood Library at Newport, also passed away. A promising younger man was lost to the profession in the death of Charles A. Flagg at Bangor, Me., from sleeping sickness. These are among the prominent losses which the profession mourns.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION COMMITTEES FOR 1920-1921

THE following are the names of chairmen of committees appointed to date:

- Committee to Assist in Revision of Adams' Manual of Historical Literature, A. H. Shearer.
- Committee on Bookbinding, Gertrude Stiles.
- Committee on Book Buying, M. L. Raney.
- Committee on Cataloging, William W. Bishop.
- Committee on Civil Service Relations, W. D. Johnston.
- Decimal Classification Advisory Committee, C. W. Andrews.
- Committee on Education, Harriet A. Wood.
- Committee on Federal and State Relations, J. I. Wyer, Jr.
- Committee on Finance, George B. Utey.
- Committee of Five on Library Service, Arthur E. Bostwick.
- Committee on Foreign Born, Mrs. E. E. Ledbetter.
- Committee on International Relations, Herbert Putnam.
- Committee on Legislation, W. F. Yust.
- Committee on Library Administration, F. F. Hopper.
- Committee on Library Work in Hospitals and Charitable and Correction Institutions, Miriam E. Carey.
- Committee on Library Training, Malcolm G. Wyer.
- Committee on Membership, Gratia A. Countryman.
- Committee on Preparation of a Bibliography of Humanistic Literature, William W. Bishop.
- Committee on Program, Alice S. Tyler.
- Committee on Public Documents, H. H. B. Meyer.
- Committee on Reciprocal Relations with Other National Organizations, Mary Eileen Ahern.
- Committee on Sponsorship for Knowledge, Charles F. D. Belden.
- Committee on Standardization of Libraries, P. L. Windsor.
- Committee on Travel, F. W. Faxon.
- Committee on Union List of Serials, C. W. Andrews.
- Committee on Ventilation and Lighting of Public Library Buildings, S. H. Ranck.
- Committee on Work with the Blind, Mabel R. Gillis.

THE MIDWINTER MEETING

The midwinter meeting was held in Chicago.

December 27-29 with headquarters at the Hotel LaSalle.

Two hundred and thirty-eight registered. The majority were from nearby localities, few of the leading librarians from a distance being present.

At the first meeting of the Council, a joint session with the League of Library Commissions, public library revenues were discussed. Samuel H. Ranck of Grand Rapids opened the subject by giving a clear and concise presentation of existing conditions and some of the remedies. He was followed by Judge Ora L. Wildermuth of Gary, Ind., who spoke of state laws governing the establishment and control of libraries, and drew attention particularly to laws of Iowa and Indiana which contain practically the same features, and which in the case of Iowa has been declared by the Supreme Court to be unconstitutional while in Indiana the Court has decided in favor of the library.

General discussion brought out the opinion from librarians and trustees that, while it is desirable that library budgets should be prepared and controlled by library trustees, still there is no royal road to a perfect library law applicable to all states owing to different local conditions.

At the second (open) Council meeting Henry N. Sanborn, of Bridgeport, Conn., read an interesting paper on a constitution suited to the needs of the Association. (Mr. Sanborn's paper will be given in our January 15th number.)

The discussion of the subject brought out many divergent opinions, but the suggestion that the Association might well consider seriously the possibility of having a constitution of only two or three short paragraphs received much support.

Action upon amendments of the Constitution will come up at the next annual meeting.

At a meeting of the Executive Board it was decided to hold the annual conference at Swampscott, Mass., with headquarters at the New Ocean House.

The Board adopted the final report of the Committee on Enlarged Program, to the effect that receipts from the "Books for Everybody" Campaign are fifty-one thousand dollars in cash and twenty-one thousand in pledges. Any additional receipts will be deposited in this same fund.

At an open meeting of the Publishing Board at which about thirty were present it was arranged to reduce the deficit on the *Booklist*:

and the publication of several important items was authorized, the principal of which is a second supplement to the A. L. A. Catalog, the first supplement to which, covering the years 1904-1911, was published in 1912.

JOINT COMMITTEE ON WORK WITH CHILDREN AND WORK WITH SCHOOLS

Martha C. Pritchard, chairman of the School Libraries Section and Alice I. Hazeltine, chairman of the Children's Librarians Section have appointed a joint committee to co-operate in the work of the Enlarged Program with the especial needs and interests of work with children and work with schools in mind. Clara W. Hunt, superintendent of the Children's Department of the Brooklyn Public Library is chairman of the Committee. Effie L. Power, director of Work with Children, Cleveland Public Library and Elisabeth Knapp, chief of the Children's Department of the Detroit Public Library represent the Children's Librarians Section. Sabra Vought, supervisor of School Libraries in New York State and Mary Richardson, Librarian of the Geneseo Normal School are the members from the School Libraries Section.

CHICAGO LIBRARY CLUB ROUND TABLE DISCUSSIONS

THE December meeting of the Club, held at the Chicago Public Library on the tenth, was planned in response to numerous requests for an opportunity for those librarians with similar problems to meet, to discuss policies, and to exchange ideas.

Louise Ayers of the R. H. Donnelley Corporation; in charge of plans, grouped the general subjects for discussion under the following leaders: Administration, William S. Merrill of the Newberry Library; circulation, Ida F. Wright of Evanston; work with teachers and schools, high schools, Charlotte Hartman, grade schools, Adah Whitcomb, both of Chicago Public Library; reference and special libraries, Christian Bey of the John Crerar Library; business libraries, G. A. Deveneau of the R. H. Donnelley Corporation; cataloging and classification, J. C. M. Hanson of Chicago University Library.

At the short business session preceeding the discussion, George B. Utley, chairman of a committee to investigate the possibilities of a plan to further the publicity of libraries in the Chicago district, made a tentative report of progress. The committee has in mind the preparation of a leaflet giving the salient features of the Libraries of Chicago. Thru a wide distribution of this leaflet people may be acquainted with the library resources available for their use.

VIRGINIA SAVAGE, *Secretary.*

SOUTHEASTERN LIBRARIANS CON- FERENCE

A CONFERENCE of librarians of the southeastern states was held at the Signal Mountain Hotel in Chattanooga, November 12-13. Representatives came from Mississippi, Alabama, Florida, North and South Carolina, Tennessee and Georgia. The conference was planned for a consideration of special problems of southern library development and the various papers served as a basis for general discussions. C. Seymour Thompson, of Savannah, presented a sketch of present library conditions in the Southeast; a working plan for library extension, bringing out the value of a state extension department, was discussed by Mary B. Palmer of the North Carolina Library Commission. A question of keen interest was that of library service to negroes which was opened by Ruth Barker of the Cassitt Library of Memphis. J. R. Rutland, of the Alabama Polytechnic Institute, in his talk on the public schools and public libraries brought forth, as his conclusion, that a strong county library system is the only sort which will ever be able to give adequate library service to public schools. Lloyd Josselyn, of Birmingham, Alabama, gave a convincing statement of the value of interesting business men through a strong technical and industrial department, prefacing his discussion with the information that the appropriation of the Birmingham Public Library had been increased 56 per cent this year. The growing demand for trained library workers and the need of every librarian recruiting for the service, was presented by Joseph F. Marron of Jacksonville, Florida, and continued from the standpoint of a school librarian by Charles H. Stone, of the Peabody College for Teachers, of Nashville. Plans for interesting college and high school students in the library profession were discussed. A delightful round table on recent books was conducted by Marilla Waite Freeman, of the Goodwyn Institute, Memphis. Tribute was paid to the memory of Dr. Thomas M. Owen of Alabama for his service to the library cause of the South. Guests from the outside were Sarah C. N. Bogle who brought a message from President Tyler, and spoke of problems confronting librarians, Mary E. Ahern, who added interest to a great many discussions by her ready wit and wide experience, and Franklin K. Mathiews, of the Boy Scout Organization, who dwelt on the co-operation between librarians and book sellers. An unexpected number on the program was a spirited defense of trustees by John Mahoney, chairman of the Board of the Chattanooga Public Library,

in reply to remarks concerning the indifferent trustee. The conference was ready at the close to vote Mr. Mahoney and the Chattanooga Board a model board of trustees. Interesting exhibits collected by Miss Dunlap of the Chattanooga Library were on display.

The social features were a luncheon given by the Chattanooga Library at the Knights of Columbus Club House, followed by an auto drive to the many points of beauty and historic interest in and near Chattanooga. The Signal Mountain Hotel proved to be an ideal place for a conference. Situated on the top of Signal Mountain, with wonderful views in every direction, the place in itself was an inspiration and not the least valuable discussions were those which took place on the trails thru the woods and around the blazing log fires of the hotel lobby. The committee in charge of the meeting consisted of the presidents of the seven state library associations, with Mary U. Rothrock of the Lawson McGhee Library of Knoxville, Tennessee as chairman and Charlotte Templeton of the Georgia Library Commission acting as secretary.

CHARLOTTE TEMPLETON,
Secretary for the Conference.

DISTRICT MEETINGS IN VERMONT

IN view of the fact that the usual fall meeting of the Vermont Library Association gave place this year to the all-New England meeting at the Isles of Shoals, more than usual emphasis is being placed on the district meetings. In the assignment of districts for this year, valleys and railroad lines were considered rather than county boundaries as formerly, a procedure which already appears to be justified by results.

To date, successful meetings have been held in three of the seven districts. The series opened on November 4th with a meeting at Fair Haven in charge of Mrs. H. S. Moses of Bennington, with an attendance of eleven. The topic, "Library Trustees—What They Expect of the Library—What the Library Wishes from Them," was discussed by Fanny B. Fletcher of Proctorsville; Mrs. Farnham of Poultney led the discussion on ways of reaching distant patrons, and "How I Select my Books," was told by Mary K. Norton of Proctor. "Worth-while Books of the Year," "Work with Foreigners," and "Methods of Increasing Circulation," were among the topics for general discussion, which was spirited.

The meeting at Bethel on November 5th, in charge of Desier C. Moulton of Randolph, was attended by nineteen librarians and trustees representing ten different libraries in Orange,

Washington and Windsor counties. Ways of reaching distant patrons, were discussed by Rev. L. I. Holmay of Barnard and Mary E. Whitney of Royalton; "Library Goals for 1921," by Rev. J. W. Miller of Bethel; "The Trustee and the Library," H. E. Luce of Pomfret; "Classification of European War Books," Helen M. Richards; "How We Can Observe Children's Book Week," Ruth L. Brown; "What Magazines to Buy and How to Use Them," Ruth Parker of Barre and Annie Barber of Montpelier; and "Worth-while Books of the Year," Evelyn S. Lease of Montpelier. Discussions were informal and much interest was shown.

November 18th saw the third meeting of the series in the Bixby Library at Vergennes, under the direction of Bertha Wood of the Middlebury College library. The registered attendance was twenty-one and several others came for a part of the session. Thomas Bradlee of the State Agricultural College spoke on "Library Co-operation with County Agents," Superintendent W. L. Coggins of Vergennes on "The Library and the School," Elizabeth Rogers of Burlington discussed the selection and use of magazines, and Helen M. Richards of the Commission staff outlined "Some Library Goals for 1921." Informal discussion followed on methods of reaching distant patrons, classification of European War books, Children's Book Week, and the books of the year.

RUTH L. BROWN, *Commission Secretary.*

MISSOURI LIBRARY ASSOCIATION

THE Missouri Library Association held its twentieth annual conference at the St. Louis Public Library, October 27-29, 1920, with an attendance of 149.

The meeting was opened by Harold L. Wheeler, the president. A telegram of greeting from the Kansas Association in reply to a letter of greeting on the occasion of the twentieth anniversary of both associations, was read, in which approval was expressed of occasional joint meetings of the associations of several of the mid-west states. Jesse Cunningham explained that he had talked and corresponded with various librarians of Missouri, Kansas, Nebraska, Iowa and neighboring states in regard to the possibility of such joint meetings. It was voted that the president appoint Mr. Cunningham a committee to represent the Missouri Association in making arrangements for such a meeting as soon as expedient.

The President pointed out the importance of every library worker joining the A. L. A. and the state Association, and made a very urgent appeal for such co-operation on the part of every one present.

Paul W. Brown, editor of *America at Work* spoke on undigested statistics, pointing out that statistics must be vitalized with the facts that lie behind them if they are to have meaning or value.

Henry O. Severance told of the possibilities of American library extension work in Europe, mentioning the appeals for aid and guidance that the A. L. A. has received from France, from Czecho-Slovakia and elsewhere, and the inability to meet these appeals adequately.

Irving R. Bundy, of the State Commission, described the operation of county libraries, and how they would affect Missouri and the existing libraries. Mr. Wright, for the Committee to Prepare a Revised Bill, outlined the bill as drawn, and its various features were discussed. Mr. Wheeler suggested that the most important point to be considered was not so much the features of a bill, as the practical measures toward insuring its passage, and urged active publicity with the object of actively interesting members of the legislature. He summarized the steps that had already been taken, resulting in the active co-operation of the State Federation of Women's Clubs, the State Teachers' Association, and other organizations, and suggested that certain other organizations would doubtless be glad to lend their help in the legislature.

Margery Doud, of the St. Louis Public Library, read a paper on "Recent Worth While Books," mentioning cleverly some of the best recent books in all fields and dwelling especially on current fiction.

Then followed a round table discussion of "Everybody's Problems," led by Inez Benedict of the State Commission. Some of the questions asked and discussed were the extent to which small libraries should invest in business and in technical books, the effect of standardization and certification of librarians in Missouri, and the desirability of the duplicate pay shelf in very small libraries.

A very practical talk, and one that was followed with close interest was that on the principles of book binding and repairing, by Mary E. Wheelock of the St. Louis library. Miss Wheelock's paper was followed by a visit to the Binding Department, where a demonstration was given of methods of repairing, supplies were displayed, and questions answered.

Thursday evening was left open for recreation, conferences and committee meetings.

At the last session held Friday morning, Vice-president Alice I. Hazeltine presiding, Sarah C. N. Bogle, assistant secretary of the A. L. A., gave a most helpful talk on "The Librarian's Opportunity To-day," closing with a message from the President of the A. L. A. There followed

a discussion of "Books for Everybody," led by the State Director, Harold L. Wheeler, who referred to Mr. Severance's description of the unanswered appeals for library help and guidance which Europe is making to the A. L. A., and suggested that success of the Enlarged Program appeal would have made it possible for the American library profession to meet this need and this opportunity creditably. In answer to the question, "Has the A. L. A. spent \$200,000 in order to raise \$75,000?" the point was made that the expenditure of \$200,000 was made upon the definite authorization of the Association; and, if only \$75,000 had yet been raised, it was only because the individual members of the Association had failed to make an effort to raise more.

Miss Hazeltine spoke briefly of Children's Book Week, urging its observance by all libraries in the state.

The President then resumed the chair, and the remainder of the session was devoted to business matters. Mr. Bundy reported briefly for the committee appointed to gather data as to financial support of Missouri libraries, and travel expenses of librarians to meetings of the state library association.

The nominating committee recommended that all the officers be continued for the following year. The president declined to accept the office for another year, urging, among other reasons, that he did not care to start the precedent of being president for two successive terms. Henry O. Severance, of the University of Missouri, was, therefore, nominated from the floor, and unanimously elected president. The other officers are: First vice-president, Alice I. Hazeltine, of St. Louis; second vice-president, Mary Mitchell, of Webb City; secretary, Margaret Hodges of Sedalia; and treasurer, James A. McMillan, Washington University Library, St. Louis.

Enjoyable features of the meeting were a luncheon at the St. Louis Public Library, where the Association was the guest of the Library, and an enjoyable drive around St. Louis, giving opportunity for visits to several branch libraries, Washington University, the Municipal out-door Theatre, and other places of interest.

MARGARET HODGES, *Secretary*.

IOWA LIBRARY ASSOCIATION

THE thirtieth annual meeting of the Iowa Library Association was held at Des Moines, October 12-14, with a total attendance of 177, of which 133 were librarians, 31 trustees, and 13 visitors.

The President, Maria C. Brace of Waterloo, opened the meeting after which James B. Weaver, of the Des Moines Board of Trustees welcomed

the Conference and gave an interesting account of the first home-coming of Iowa writers in May 1914, picturing Mother Iowa in her preparation for the home-coming of her authors, illustrators and journalists.

Julia A. Robinson, secretary of the Commission then read her report. Of the librarians at work in Iowa in 1903, there still remain, as well as Miss Samson who is completing her thirtieth year at Maquoketa, and Mrs. Anders, who is completing her twenty-fifth year at Iowa Falls, eight who are holding the same positions as they did at that time, and six others who have made changes in their positions; while five, no longer in the work, are still in the State. Only three persons are living to-day who attended the first meeting of the Iowa Library Society, as it was called thirty years ago.

As for "new projects" the past year has seen a favorable tax vote in two towns, Adel and Primghar, with almost a ten to one majority for the library, and an election lost at Garnaville, which, however, is not an injury to the library cause, as the population is far too small adequately to support a library. In such cases the Secretary urges a county library, if possible. There is in Iowa a workable county law which permits county extension thru contracts with county supervisors as well as township officers. Iowa, however, recognizes the fact that there are features of the law in other states which might, with advantage be incorporated in her own.

Among meetings of the year which deserve especial mention is that of the General Federation Biennial of Women's Clubs held in Des Moines in June, in which libraries had a part. At the State Fair in August this year was held the first trustees conference on such an occasion with more trustees present than were ever gathered together at one time in Iowa. And for the first time, there is to be a library round-table in connection with the State Teacher's Association. The library conference held during the summer school at Iowa City was most profitable and enjoyable.

Miss Robinson introduced the subject of county libraries, and Mrs. Loranze of Clarinda gave an interesting account of rural extension as operated from the Clarinda Public Library. An open discussion followed, when Mr. Orr, trustee of Clarinda, and representatives from Oskaloosa and Tipton led in stating prevailing conditions in their respective localities. Following, Mr. Warner, formerly trustee of Waterloo, now Secretary of the Iowa Bankers' Association, spoke on the "Difficulties in Library Extension," and open discussion followed.

Miss Robinson then spoke of the present Coun-

ty Library law and suggested certain helpful changes.

Grace D. Rose led a symposium on use of the library by industrial workers, trades-men and other branches of business. She had asked six of the business men of Des Moines, representing as many different branches of business, to speak on what the library might do for them in their work, and six librarians to respond. Mr. Baumgart, "advertising man" for *Successful Farming*, spoke from the advertiser's standpoint and gave some most helpful suggestions, among them: "If you would mail to us frequently bits of information in which you think we are interested or call our attention to helpful material that is new and that we ought to have you could help us more. In other words, 'shoot it to us in little doses.'" Miss Egan of Clinton responded. Mr. Thompson of the Metal Manufacturing Company, spoke on the need of technical books, to which Miss Shellenberger responded. Mr. Manderbaum, of Manderbaum Bros., spoke in behalf of merchants and Miss Barret of Mason City, responded. The other three business men failed to appear, but the following librarians spoke: Miss Weider of Marshalltown, on what the library can do for the grocer; Miss Harvey of Sibley, on "The Dairyman and the Library," and Miss Ditch of Ottumawa, on "The Automobile Question."

On Wednesday evening the librarians were guests of the Des Moines Public Library, the Des Moines Library Club, and of the Des Moines Chamber of Commerce at a dinner, after which J. D. Stoops, professor of Philosophy in Grinnell College, spoke of "Literature and the Changing Standards of Life." The two books upon which he based his discussion were Swinerton's "September" and Fitzgerald's "This Side of Paradise." Both books were discussed from a psychological standpoint. According to Mr. Stoops, there is in much of our fiction to-day an undercurrent that is easily detected, namely a struggle between the pagan body and the Christian soul, representing, as it were, the period in which we as a people are now living.

At the opening session Thursday morning, Mr. Brigham brought to the attention of all the question of membership in the American Library Association and urged that every library be represented at the meeting of the American Library Association. He also urged that all libraries be subscribers to the *Booklist*.

The certification report was then read by Miss Robinson and a discussion of the same followed. It was announced that the first certificate had been granted to Helen McRaith, formerly of Iowa City Library, and now of Portland, Oregon. A motion that traveling expenses of mem-

bers of the Board of Certification be paid was carried; also the motion that a committee of three be appointed by the chair to take up the matter of additional dues for another year, so as to furnish funds sufficient for this purpose.

Mr. Riley, chairman of the Legislative Committee said that while as yet the Committee had nothing definitely accomplished to report, yet it was ready to do what was asked of it, and since there was a desire to re-codify library laws, the Committee was desirous of knowing what changes were wanted. The library levy of five mills was thought inadequate, and it was thought wise to suggest a minimum.

The county library law was then discussed. Mrs. Towner, speaking in behalf of the Library Commission, urged that the appropriation be increased. It was then moved by Miss Freed of Ames and carried: That the Association endorse the request of the Iowa Library Commission for an increased appropriation, and that the legislative committee do all in its power to help in this matter.

At the suggestion of Mr. Riley, it was moved by Miss Hendee of Council Bluffs and carried: That the legislative committee be authorized to request the next legislature to re-codify library laws, with emphasis on the county library laws. It was then moved by Mrs. Towner and carried: That in view of the fact that Iowa has few large cities and that the quality of the library service in many smaller cities is very high, that the Board of Certification be asked to take under consideration the advisability of including in cities of Class I, for the purpose of certification, cities of 40,000 and over. Also that college librarians be placed under a separate classification.

The Association sent greetings to pioneers in library work in Iowa, and to Alice S. Tyler, long an Iowa worker, and now president of the A. L. A., offering the Association's congratulations and assurance of co-operation.

Resolutions were adopted, expressing the Association's appreciation of the efforts of all those who had contributed to the success of the meeting, of the State University's making possible the conference of librarians during the Iowa Summer Library School session, and of the Women's Committee of the State Fair in arranging for the Trustees' Conference held during the Fair.

It was further resolved that the Association regrets the discontinuance of a librarian for the state institutions, and recommends the matter to the attention of the Legislative Committee, also that the Association suggest to the teachers of English in the high schools of the state co-operation in the standardization of instruction in the use of the public library by high school pupils.

Other enjoyable features were the presentation of a pageant, entitled "The Legend-Bearer's Gift," and a talk on pageantry by Miss Hathaway of Des Moines, a discussion of fiction led by Grace Shellenberger of Davenport, one of non-fiction lead by Cora Hendee of Council Bluffs, and a reading and interpretation of his own poems by Carl Sandburg.

Officers for the ensuing year are: President, Charles W. Sumner, Sioux City; vice-presidents, Callie Wieder, librarian of Marshalltown, and F. V. Findlay, trustee, of Fort Dodge; Secretary, Mary E. McCoy, of Indianola; and Treasurer, Jessie Swem, of Des Moines.

DISTRICT OF COLUMBIA LIBRARY ASSOCIATION

THE annual meeting of the District of Columbia Library Association was held on October 29th, at the Public Library, with the President, Dr. Putnam, in the chair.

Dr. Bowerman gave an account of the progress of reclassification of library positions and salaries. During the summer a new classification for the library service was drafted. This was submitted to several librarians individually for approval and suggestion and was then submitted to the Reclassification Commission with the request that it be substituted for the one already incorporated in their report. A brief and demonstration of the revised classification was also filed with the Commission. The new classification reduces the number of grades from twenty-seven to ten.

The following resolutions with regard to the new classification were read and approved:

Resolved, That the District of Columbia Library Association endorses the substitute library service classification and salary schedule drafted by the Library Advisory Wage Committee since they are now made co-ordinate and comparable with the specifications, nomenclature and salary ranges of the other scientific, technical, and professional services in the Reclassification Report.

Resolved, That the Legislative and other appropriate committees of the Association be authorized to promote the incorporation of the substitute classification and salary schedule in any reclassification measures proposed for enactment.

H. H. B. Meyer gave an account of the A. L. A. Enlarged Program and announced that the drive for the endowment would be continued this fall. The President appointed Mr. Meyer chairman of a committee to represent the Association in raising the quota for the District of Columbia, with power to associate with himself any whom he may select as members of

this committee. The Association appropriated \$50.00 to be used for postage and other necessary expenses of this committee.

Joy Elmer Morgan, editor of the *N. E. A. Bulletin*, gave a most interesting account of the growth and aims of the National Education Association.

The following officers were elected for 1920-1921: President, Herbert Putnam, librarian of Congress; vice-presidents, George F. Bowerman, librarian, Public Library, and Eunice R. Oberly, Bureau of Plant Industry; secretary, Mabel Colcord, Bureau of Entomology; and treasurer, Sara Abbott, Office of the Superintendent of Documents.

MABEL COLCORD, *Secretary*.

CONFERENCE OF EASTERN COLLEGE LIBRARIANS

THE eighth annual conference of Eastern College Librarians was held at Columbia University on November 27. In addition to many libraries having a special interest in reference work, twenty-two college and university libraries were represented.

The conference was welcomed by Provost William H. Carpenter, acting librarian of Columbia University, and the morning session was presided over by Frederick C. Hicks, law librarian.

The first topic on the programme was "Differentiation of Field among the Larger Libraries," which was discussed by James T. Gerould, librarian of Princeton University, who spoke of the lack of resources in this country available for research work, and of the resources probably available if their whereabouts were known. His idea was that the universities should mutually adopt a policy of buying material, and thru the years adhere to that policy; that there should be a definite and specific study of resources in various fields, not by librarians necessarily but by students in those fields; that there should be a committee to find out what lines had been developed and in which institutions and that then each should develop consistently along the line accepted by it. In this way even a small amount of money expended yearly would build up a valuable collection; and even a small college might become noteworthy for its material on some subject. Mr. Gerould's address was followed by discussion. Provost Carpenter pointed out that libraries could not differentiate their collections unless universities would differentiate the fields of their research; and Mr. Keogh showed that embarrassing questions would arise when gifts of books and money were made by alumni and friends of the respective institutions.

Mr. Gerould was appointed chairman of a Committee on Differentiation of Field among the Larger Libraries, the members of the committee to be selected by him. Subsequently Mr. Gerould appointed the following:—Messrs. Austen, Carpenter, Keogh and Lane.

At the afternoon session Mr. Gerould reported for this committee and presented the following resolution which was adopted:

"Believing that any effective co-operation of college and university Libraries either among themselves or with other institutions and societies having similar aims depends on the active support and participation of the boards of trustees, library committees and responsible heads of such institutions, and believing further that effective results can be obtained by co-operation with the Institute of International Education; Be it resolved by the Conference of Eastern College Librarians:

"That the present Committee on Co-operation with the Institute of International Education be continued and that it be requested to act with a similar committee appointed by the Conference of Western College Librarians in bringing this matter to the attention of the American Library Association in order that we may enlist the co-operation of the official organ of American libraries in the work of the Institute of International Education.

"That the Committee be requested and authorized to assist in the work of the Institute by stimulating the production of international lists within the scope of the Institute and in bringing these lists to its attention."

Mr. Hicks presented the report of the Organizing Committee on Co-operation which the Institute of International Education appointed a year ago. In connection with this, Isadore G. Mudge reported on the list of statistical annuals which she is compiling. The need of such a list was brought out by the demands for material by various war workers, who found that certain annuals or certain desired years of annuals could not be obtained in the city. The list includes general official annuals of European and of some Asiatic and South American countries; some general unofficial annuals, international and municipal annuals; also some semi-annuals. It is hoped to add to the list various commercial and agricultural annuals. The list as it stands at present is being multigraphed by the Institute and is to be sent to the various libraries to be checked, with the expectation that from the checking will result a record of where the annuals are and of what is lacking. Mr. Hicks also told of a list of material in serial form having an international bearing, also in preparation. This list will be sent out and checked in

the same way as the list of statistical annuals.

The report on co-operation with the Institute of International Education had been multi-graphed and a copy was given to each one present at the conference. It was voted that a committee of three be appointed by the chair to consider the report and make recommendations at the afternoon session. Mr. Gerould, Mr. Green and Mr. Wyer were appointed.

Ernest J. Reece, principal of the Library School of the New York Public Library, gave a summary of literature relating to college and university libraries published since January 1, 1917. This will shortly be published in the LIBRARY JOURNAL.

Joseph D. Ibbotson, librarian of Hamilton College, spoke on the college librarian as a recruiting officer for library service. He said there ought to be some way of presenting to the undergraduates the attractiveness of library work, and told of some of his own efforts along that line. In the discussion it was pointed out by Josephine A. Rathbone, vice-director of the Pratt Institute School of Library Science, that if students desiring to go into social service work understood the opportunities for such work in public libraries they would enter the library profession.

At the afternoon session, presided over by Amy L. Reed, librarian of Vassar College, J. L. Yuan, formerly associate librarian, Tsing Hua College, Peking, China, gave a brief sketch of some of the college and university libraries in China. The Chinese word for library means "a storehouse for books," and it is only within the last few years that the libraries have been of any use to students. Not all schools and colleges have libraries, but many are beginning to organize them. Some of these have American librarians, and some have Chinese librarians who have received their library training in this country. The newer Chinese books are classified according to the Dewey decimal system and the old books according to the system of "The Compendium of Knowledge." Mr. Yuan said that some of the Chinese libraries had duplicates which they would be glad to send to some of our libraries and offered to act as agent so that a system of exchange might be started between the Chinese universities and ours. His address is Livingston Hall, Columbia University, New York.

M. Llewellyn Raney, librarian of Johns Hopkins University, discussed the "Status of German purchases and exchange." He explained the varying value of the mark, the arbitrary rates of exchange for different countries, and the discrimination against foreign countries by some publishers especially against America. His

address was followed by much discussion as to the best methods of buying German publications.

T. Franklin Currier, assistant librarian of Harvard University, spoke on the treatment of periodicals and continuations in the catalog. He said that the Library of Congress method of cataloging under the latest title a periodical that has changed its title does not work well in the larger libraries, and that it would save a great deal of recataloging if such a periodical were entered under its original title and reference cards made under the new title. He also brought up the question whether parts as they come should be added to the public catalog cards, such service being very useful but taking much time. He also said that no class of work in any library gives rise to such troublesome questions, as periodicals and continuations, and suggested that the work be so arranged that as few people as possible handle the serials and thus save delay in getting the material into circulation. Miss Roys explained the method in use at Columbia of making additions to the public catalog cards, and this started discussion as to the value of the various methods used in the different colleges represented at the conference.

Grace P. Fuller of Yale University Library spoke on history cards for organizations and corporate bodies. Miss Fuller said in part: "My suggestion is that there be organized some central body which would give us authoritative 'history cards' for organizations and the correct form of headings and subheadings for corporate bodies as authors. A bureau such as I have suggested should keep up with the headings required for new organizations, for reorganizations and combinations, and for changes in government headings, foreign, United States, and state, and should cite authorities. If it could also give notice of beginning and ending of serial publications, particularly of governments, so much the better, but that is not of first importance."

The success of the conference was shown by the fact that after tea almost all stayed and continued in small groups the discussions started earlier in the day.

ELIZABETH C. BUTTERWORTH,
Secretary pro tem.

LIBRARY CALENDAR

- Jan. 10. At the Franklin Institute, Philadelphia. Philadelphia Library Club. Alfred Ringling, librarian of the Franklin Institute, will speak on the work of the Club and its Library.
- Jan. 14. At the Chicago Historical Society Library. Chicago Library Club.
- Jan. 14. At the Municipal Building Restaurant. New York Libraries Association.

ADAMSON, Ruth E., 1916 C. P., has resigned her assistantship in the Indiana State Normal Library at Terre Haute, to become librarian of the Howell Branch and Reitz High School Branch of the Evansville (Ind.) Public Library.

ANDERSON, Alice, appointed librarian of the State Normal School, Chico (Calif.).

BAILEY, Ann Bell, librarian of the San Mateo County Free Library (Calif.), resigned to go to the Fresno County Free Library. Edna Holroyd, 1915 C., librarian of the Tuolumne County Free Library at Sonora, succeeds. Helen Rowland, 1915 L. A., succeeds Miss Holroyd.

BATCHELDER, Marion, 1919 S., appointed field secretary of the Maryland Public Library Commission, with headquarters at Baltimore, Maryland.

BURRELL, Hon. Martin, has retired from the portfolio of Minister of Agriculture in the Canadian Government to accept the position of English librarian of the Parliamentary Library at Ottawa, in succession to Martin Griffin.

CHENERY, Winthrop Holt, formerly librarian of Washington University, St. Louis, and a special student at N. Y. S., 1919-20, appointed chief of the Division of Special Libraries of the Public Library, Boston, Mass.

CHILD, Grace A., during 1919-1920 librarian of the State Normal School at Willimantic, Conn., appointed librarian for the Phoenix Mutual Life Insurance Company, Hartford, Conn.

CLARK, Elizabeth Porter, assistant in the Brooklyn (N. Y.) Public Library, became librarian of the Jacksonville (Ill.) Public Library, December 20th.

EARHART, Frances, for the past ten years librarian of the Duluth (Minn.) Public Library, resigns January 1st to become librarian for the educational branch of the War Department. She will have charge of the libraries in the seventh corps area which includes camps and posts in Minnesota, the Dakotas, Iowa, Nebraska, Kansas and Missouri, with headquarters at Fort Cook, Nebraska.

EDWARDS, Gertrude M., 1911-12 C. P., appointed librarian of the Public Library, Jamestown, North Dakota.

FAY, Lucy E., 1908 N. Y. S., went to the University of Tennessee, Knoxville, December 1st, as acting librarian for the remainder of the school year.

GARDINER, Ruth Kimball, associate librarian of the American Hygiene Association, writes on "Your Daughter's Mother" in the current number of *Social Hygiene*.

GLEASON, Eleanor, 1914 P., for some years librarian of the Hartford School of Religious Pedagogy, is doing secretarial and research work for Anson McCook, lawyer, Hartford.

HARTICH, Alice Doughty, since 1900 branch librarian, and for some years previous an assistant in the Brooklyn Public Library, died on December 10th of heart trouble.

HESS, Gertrude Fox, 1914 I., assistant reference librarian of the Seattle (Wash.) Public Library, resigned December 1st. Mrs. Hess plans to take a year's rest before taking up new work.

HITT, Eleanor, 1913 N.Y.P.L., librarian of the Yolo County Free Library, Woodland (Calif.), appointed librarian of the San Diego County Free Library in place of Mrs. Bessie Hermann Twaddle, resigned.

HUMBLE, Marion, 1913 W., is secretary "Year-round Bookselling Plan," 334 Fifth Ave., New York City.

JONES, Eleanor Louise, general secretary of the Massachusetts Free Public Library Commission succeeds John Adams Lowe as agent of the Commission. E. Kathleen Jones who has been A. L. A. field representative at Boston succeeds to the secretaryship.

KRAUSNICK, GERTRUDE, 1910-11 N. Y. S., reference librarian at Washington University, St. Louis, resigned, to fill a similar position at the University of Iowa.

LANGDON, Grace T., assistant cataloger in the Brooklyn (N. Y.) Public Library, resigned December 1st to become hospital librarian with the A. L. A.

LAWSON, Mildred H., 1915 N. Y. S., head cataloger at Trinity College Library, Hartford, Conn., resigned in November to become librarian of the New Rochelle (N. Y.) High School Library.

LILLIQUIST, Lillie C., 1916 W. R., appointed librarian of the Chisholm (Minn.) Public Library.

MCKAY, Elsie, 1911 S. Special, for some time with the Red Cross headquarters in France, has returned to the Evansville, Indiana, Public Library as assistant librarian.

MCMANUS, Rumana, 1915 W., is librarian for the Fourth Corps Area, and is at headquarters, Fort McPherson, Ga.

MATHEWS, Helen Clarke, 1903 P., of the library of the National Committee for Mental Hygiene, has accepted the librarianship of the law firm of Cravath and Henderson.

MULHERON, Anne Morgan, head of the School Libraries Department of the Portland (Ore.) Public Library, appointed librarian in succession to Mary F. Isom.

SAVORD, Ruth, 1914, W. R., cataloger of the Frick Library of Reproductions, is in London during the collection of the library.

SAWYER, Frances C., 1913 W., transferred in October to Fort Bliss, Texas, where she is librarian of a new army hospital.

Among recent appointments to the staff of the Brooklyn (N. Y.) Library are Beatrice Bromell, 1920, P.; and three librarians from Norway: Tordis Peterson and Fredrikke Bjolgerud (Christiana); Kristine Vraa (Dramen).

THE OPEN ROUND TABLE

THE USE OF PROPAGANDA MATERIAL IN LIBRARIES

To the Editor of the LIBRARY JOURNAL:

May I ask if any library public opinion has ever developed or been expressed on the subject of the flood of material published by propagandists of fake new religions and dumped on public libraries during the last few years?

Many librarians are so situated that they feel intensely dominated by interests that desire the acceptance of such stuff. Many others have little time to look into such matters, and innocently circulate attractively printed material whose real significance is unknown to them. Others proceed on the principle that all opinions must be represented in a public institution, forgetting that we all stand as censors whether we will or not, cutting out a horde of risqué, inaccurate, and demoralising stuff of all kinds. "Truth is mighty, and will prevail," but it's up to us to help it.

BASIL B. WOOD, *Librarian.*
Westerly (R. I.) Public Library.

EXTRA CHARGE FOR MAGAZINE INDEXES —A PROTEST

To the Editor of the LIBRARY JOURNAL:

The Independent magazine is inaugurating the policy of charging 15c. each for its indexes, or 50c. for a year's supply. The publishers intimate that libraries and book-binders have been extravagant in their requests for indexes and the result is that "Thousands of copies have been

printed that have never been used." If this is true, the just policy would be to charge for the extra copies furnished; each library should receive on request one copy free. Charging for these indexes is equivalent to adding 50c. a year to the subscription price of *The Independent* for those who wish to preserve it. It would be fairer to raise the subscription price so that the burden of paying for these indexes would rest equally on all. Libraries should protest against this scheme. Soon other magazines will do likewise, and the cost of our periodicals will be materially increased.

University of North Dakota,
Grand Forks.

BALLOTING BY MAIL IN THE A. L. A.

To the Editor of the LIBRARY JOURNAL:

In your editorial in the current number of the LIBRARY JOURNAL you say that balloting by mail is apt to be as perfunctory as any other sort, unless there is actual division of opinion as to policies or persons, in which case any method of voting will bring out the votes.

Isn't that the crux of the whole question? Will any method bring out the votes? Will anything but a ballot by mail elicit full expression of opinion of the members of a national association? Will anything interest members of the Association more effectively in its policies than carefully prepared referenda in regard to them?

We cannot all travel long distances to register our opinion even upon questions of the greatest importance to us professionally, and as a matter of fact we do not, as I have pointed out elsewhere.

On the other hand the officers of the Association would, I am sure, feel readier to undertake additional service of a national character if the majority of the members had put themselves on record as favoring it.

I hope that this question will receive further consideration from the Committee on Revision of the Constitution and from the members of the Association.

Perhaps the question would be a good one to submit to a referendum.

W. DAWSON JOHNSTON, *Librarian*.
St. Paul (Minn.) Public Library.
December 13, 1920.

"THE INARTICULATE ASSISTANT"

To the readers of the LIBRARY JOURNAL:

The LIBRARY JOURNAL in its issue of June 15, 1920, published an article on the inarticulate library assistant. That article was the first indication I have seen in standard library publications that aside from a generally recognized inadequacy of salary, all is not well in library relations. Yet my own observation in one library and occasional gleanings from others incline me to believe that there is considerable discontent on various grounds. I should like to suggest my impressions to the readers of the JOURNAL, in order if possible to determine whether they are representative, and if so how the basis for them may be removed.

What are some of the incidents which seem to give occasion for discontent? First, as to salaries. In many libraries these are not standardized. A certain degree of secrecy is maintained, sometimes to the extent of asking an assistant who has just received an increase not to mention the fact, lest others apply in their turn. An assistant reporting an offer of a position at a higher salary is given an equivalent increase as an inducement to remain. Various perplexities result. Must one be a good fighter as well as a good librarian in order to succeed? Is strategy of a rather unpleasant sort a necessary tool? I have known more than one "nice girl" to ponder these things; I know they do not make for confidence nor harmony. And where standardization is the rule: one assistant may enter under the regulations, another with a specially created office. Does this perchance mean a special salary as well, and if so, does it any more than the former method promote content?

Aside from salaries, however, many questions

arise. An assistant goes into war work with the understanding that she is on leave of absence, and returns to find her position filled. Another claims overtime to which the authorities state that she is not entitled. Both cases result in an acute sense of injustice. Yet both could be easily and fairly settled by the examination of carefully kept records by representatives of both executives and staff. Of course, these are troubled times, with suspicion in the air. Perhaps that is why some of us wonder whether all notices directed to the attention of the staff reach the bulletin board, and all offers of positions, the assistant for whom they are intended; whether administration statements to the staff are always accurate; whether staff meetings encouraged by the administration, be they regular or occasional, are seriously intended to have any effect other than that of a sedative.

These are the things I see and hear, about which little is apparently said. But what of our turnover? Statistics of the number of persons taking positions, leaving and being replaced, are not available; in itself a significant fact. Nevertheless we all know that this number, even now that the war is over, is large, the probability being that the percentage is particularly high in large libraries where the personal relation between the chief administrators and the staff does not exist. It is in the large libraries, too, that conditions in industry are most nearly approximated. Why should not similar methods be successful in improving them? In many manufacturing plants committees of employers and employees have been formed, to deal with matters of mutual concern; the balance of power has been fairly distributed; both sides have had access to the data necessary to an intelligent decision; and, most important of all, the scheme works.

In addition to the "Don'ts for librarians" listed by Miss Doud in her article, I should like to make a positive suggestion for assistants. Since the individual appeal in cases such as I have described is unpleasantly personal and unsatisfactory, why not adopt some plan of joint agreement in the libraries; some committee for complaints on which both sides are represented? Only in such a way, it seems to me, can the underground discontent be fairly brought to the surface, and permanently removed. Only when the assistants feel that they are getting a square deal and giving of their best, can we hope to give really good service to the public.

Will not the inarticulate assistant break her silence, to let us know her thoughts?

EUNICE H. MILLER.

New York City.

Notable Forthcoming Books

- THE FINANCIAL ORGANIZATION OF SOCIETY.** By H. G. Moulton. A study of the financial aspects of modern society. Money, credit facilities, and our financial institutions are closely interwoven with the entire economic organization. Ready January 3. \$4.00, postpaid \$4.25.
- THE ORIGIN AND DEVELOPMENT OF THE NERVOUS SYSTEM FROM A PHYSIOLOGICAL VIEWPOINT.** By Charles M. Child. This book is a consideration in the light of recent experimental investigation of certain of the physiological conditions which antedate the appearance of the nervous system, and with which its appearance and development appear to be closely associated. Ready January 15. \$1.75, postpaid \$1.90.
- INTRODUCTION TO THE SCIENCE OF SOCIOLOGY.** By Robert E. Park and Ernest W. Burgess. This book is based on the belief that the use of concrete material makes possible a clearer understanding of the principles of sociology than has been possible with the method of presentation in the past. Ready February 1. \$4.50 net.
- MODERN TENDENCIES IN SCULPTURE.** By Lorado Taft. An important volume in the series of Scammon Lectures at the Art Institute of Chicago. This book by the famous Chicago sculptor discusses the work of Auguste Rodin and other European sculpture, and Augustus Saint-Gaudens and American sculpture. Profusely illustrated. Ready March 1. \$5.00 net.
- THE GRAPHIC ARTS.** By Joseph Pennell. A new volume in the series of Scammon Lectures at the Art Institute of Chicago. Deals with the modern development of all the graphic arts and is richly illustrated. The chapter headings are Illustration: Wood Cutting, Wood Engraving, Modern Methods; Etching: The Etchers, The Methods; Lithography: The Artists, The Methods. Ready March 1. \$5.00 net.
- THE PRESS AND POLITICS IN JAPAN.** By Kisaburo Kawabe. The purpose of this work is to show the influence of the press upon the political life of Japan. It is a mine of information about the Japan of the past and of today. Gives a clear and comprehensive history of the development of political life in the Sunrise Kingdom. Ready March 1.

IN THE LIBRARY WORLD

MASSACHUSETTS

Boston. The Corporation of Simmons College has announced a bonus for this year to all members of the instructing staff and of the library staff who have been with the College for one year. The rate of increase is 15%, except where that would bring the total beyond the salary limit of the grade.

NEW YORK

Albany. The New York State Library School senior elective course on library extension, conducted by Anna G. Hall, opened on December 1st with a trip to Cobleskill, where the class attended a public meeting held in connection with a campaign to start a public library, afterwards visiting the prospective quarters of the new library. The class was given the problem of equipping the rooms for library service.

Greater New York. Appropriations made by the Board of Estimate and Apportionment for 1921 to the city libraries are:

New York Public Library total appropriation \$1,120,037 of which \$820,227 goes to personal service (librarians, clerical and house staff) and \$100,000 for the purchase of books and periodicals.

Brooklyn Public Library, total appropriation \$709,679 of which \$491,041 is for personal service and \$85,000 for books and periodicals.

Queens Borough Public Library, total appropriation \$252,806, being \$164,737 for personal service and \$36,500 for books and periodicals.

Manhattan. Detailed programs of some of the open courses to be conducted by the Library School of the New York Public Library are now available, and may be had on application to the Principal. Louise G. Hinsdale, librarian of the East Orange (N. J.) Public Library, will conduct many of the round tables which form the course in library administration.

Brooklyn. A report from Florence E. Merville, cataloger of the McGregor Public Library, Highland Park (Mich.) shows that nineteen Pratt Institute people (including six librarians) in Detroit, lunched recently together and effected an informal organization. It was decided to hold similar meetings from time to time during the year.

MARYLAND

Baltimore. A new branch library building at Mount Washington has recently been completed. It is one of the Ench Pratt system of free libraries and will be known as No. 21.

GEORGIA

Atlanta. The Cheston King library, donated last spring to Oglethorpe University by Dr. Cheston King of Atlanta, for the use of the English department of the University, and valued at \$20,000, will be housed in the new Lupton Hall of Oglethorpe. The library was purchased in Germany, and consists of the private collection of books relating to English scholarship left by the late Professor Vietor, of Marburg.

A \$50,000 branch library for the negroes of Atlanta is assured for next May. The Carnegie Corporation gave \$25,000, Atlanta and Fulton counties appropriated \$10,000 each, and the remainder came from citizens of Atlanta. This library will be the first to provide library facilities for Atlanta negroes.

OHIO

Youngstown. "A tax levy of two-tenths of a mill, effective January 1, 1922, and amounting to approximately \$60,000 per year, was voted by a considerable majority of the voters of Youngstown, Ohio, on November 2nd. This with other sources of revenue will give the library an operating fund, beginning 1922, of about \$70,000 per year."

Cleveland. At Western Reserve Library School Sue Northey, assistant principal of the Cleveland Kindergarten Training School is giving a course of eight lectures in child psychology to the class in children's work.

The recent publication of the Cleveland Recreation Survey made by the Cleveland Foundation, made the lecture by Rowland Haynes, Director of the Recreation Council, especially timely. Mr. Haynes spoke of the recreation program for the City and the library relation to it, and emphasized the important part the library has, as shown in the volumes on "Wholesome Citizens and Spare Time" and "Public Provision for Recreation."

INDIANA

Indianapolis. The Public Library opened the third year of its Training Course on October 4th, with fourteen students. The "Suggested Reading List for Prospective Librarians" printed in the November 15th LIBRARY JOURNAL was prepared for those desiring to prepare for the entrance examination admitting students to this course.

A teachers' room for reference and study has recently been opened. Elizabeth Ohr is in charge, with Wilma Reeve as first assistant. Be-

**The Reader and the
Advertiser**

THE LIBRARY JOURNAL is of continuing service to its subscribers, as the many enthusiastic letters to the publishers attest. This appreciation of the editorial efforts of the magazine also extends, we are confident, to the advertising pages.

A practical way for the reader to help in the development of THE LIBRARY JOURNAL is to patronize the advertisers who by their presence demonstrate their belief in the merit of the magazine. An added service is performed if the reader mentions THE LIBRARY JOURNAL in connection with such patronage.

R. R. Bowker Company

Publishers

62 WEST 45TH STREET - NEW YORK

cause of its proximity to the children's room, the two collections of books supplement one another. Upper shelves of the book cases are reserved for exhibits of manual training and art departments of the schools.

Bi-monthly conferences at nine o'clock twice a month will be held from December 6th thru May 16th, following the general plan of devoting the first twenty minutes to the exchange of library ideas and developments; twenty minutes to a staff discussion of interesting new books on a specified subject; and twenty minutes for a special speaker. Some of the subjects for the year are travel, story-telling, play writing and the "little theatre," the modern novel, music and composers, modern poetry, county libraries, new developments in education, the modern drama, library publicity and nature. The last meeting will be a library breakfast.

WISCONSIN

Milwaukee. A new salary schedule just adopted by the Board of Trustees of the public library, provides for increases of somewhat less than \$10 a month for employees in the higher grades, and the salary of the assistant librarian has been advanced to \$275 a month.

A collection of books chiefly on social and political science has been placed in the City Club by the Milwaukee Public Library. The assistant civic secretary who is in charge of the books, reports that the circulation has been large.

CALIFORNIA

San Francisco. A charter amendment, recently passed by an overwhelming majority, gives to the public library an increased appropriation for 1921 of \$75,000. The present law gives the Library a minimum of one and half mills and a maximum of two and half mills which provides only about \$140,000 a year. The new appropriation will strengthen the book fund which has suffered most from the shortage of funds.

Los Angeles. Seven students of the Library School of the Los Angeles Public Library volunteered to assist in bookstores or in the children's room during Children's Book Week. It was an interesting experience to make exhibits of approved books and to note the popularity of Elsie Dinsmore and of the Bungalow Boys in some of the department stores.

UTAH

During the last six years, Utah has added 28 to the number of its tax-supported libraries, bringing the total up to 46. Of these, 10 have been added during the period covered by the last biennial report (1918-1920), while a num-

ber of towns have collections of books and reading rooms and are soon to be tax supported. The number of counties without tax-supported libraries has been reduced to 3. There are 24 Carnegie libraries either in existence or soon to be built, and many towns have libraries in temporary quarters, for which buildings will soon be requested. Eleven libraries have taken advantage of the county library law of May 1919 (L. J., v. 44, p. 332). The library in the Department of Public Instruction has been reorganized and gives stimulus to libraries and schools all over the state. School library development is progressing rapidly and will soon be state-wide. There are 62 librarians who have had short courses in library training, including 9 who have done advanced work.

CANADA

Montreal. The Summer Library School at McGill University, which was not held during the War, was re-opened last June. This School, which is the first of its kind in Canada, was founded in 1904 by the late Charles H. Gould. The registration this year was fifteen, of whom seven were professional librarians. The course was under the direction of the University Librarian, assisted by Mary M. Shaver, of Vassar College Library, Harriet R. Peck, of Rensselaer Polytechnic Institute, and Hilda C. Laird of Yale University Library, and special lectures were given by Laura A. Young of the Circulation Department and Elizabeth G. Hall of the Traveling Library Department of the University Library, by Mary S. Saxe of the Westmount Public Library, and Charlotte Houston of the High School Library. The course included one hundred and fifty hours of lectures and practice work.

Winnipeg. The new Manitoba Provincial Library is the subject of a paper by Elizabeth Parker in the December *Canadian Bookman*. The library is now situated on the south front of the unfinished Parliamentary building and occupies the whole of the second floor of the south front. The main room, which is across the corridor from the Chamber of the Legislature, is 71 feet long, 28 feet wide and 28 feet high. There is steel shelving sufficient for 25,000 volumes in this room and beneath is the main stack room with shelving for some 60,000 volumes, while a storeroom beneath the stack accommodates bound newspapers. On each side of the main reading room are rooms, 92 x 24 feet, the one on the west for current periodicals and newspapers, and that on the east for reading and writing.

The first mention of the Provincial Library is in the report of the Public Works Department in

Allows the magazine to open flat.

Will hold one thick or a number of thin magazines Made in all sizes and styles of binding

WM. G. JOHNSTON & Co., Pittsburgh, Pa.

DEAR SIR:—

We have been using several of your Keyless Lock Binders for several months and find them perfectly satisfactory. We have had no more trouble with the "Magazine Thief" and the old numbers look as good as "the new" when taken from the binders.

They improve the looks of the reading table, keep the magazine in better condition and are so reasonable in price that EVERY Association can afford them.

Your sincerely General Secretary.

A Sample for Examination with Catalog Upon Request

WM. G. JOHNSTON & CO.

Pittsburgh, Pa.

Originators of the Spring Back Magazine Binders

1871. The library was then in the attic of the small building which was used as the Parliament building. In 1884, when the government moved into the first Parliament House proper, John Palmer Robertson was appointed librarian, and, starting with a nucleus of 1200 books, developed the library, until at the time of his death in 1919 he had accumulated a library of 60,000 volumes. The collection is particularly rich in

works touching the discovery, exploration and history of British North America, and there is a good representative collection on science, jurisprudence, philosophy, religion, economics, history, biography, poetry and fiction. After Mr. Robertson's death the office of the librarian was vacant for a year, until W. J. Healy, editor of the *Grain Growers' Guide* accepted the office, as already announced (L. J. v. 45, p. 654).

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department

POSITIONS OFFERED

Wanted, cataloger at Yale Law School Library, New Haven, Conn. Salary \$1,000.

Wanted, cataloger, salary \$1350, for college library in the middle west. Write to Library Workers Association, 5 Washington Street, Newark, N. J.

Wanted, a trained assistant cataloger, in an eastern college library. Two months vacation. Minimum salary \$1200; more for person with experience. Address, F. 1, care of the LIBRARY JOURNAL.

City library near Boston desires a general cataloger at \$1200, also a children's librarian at the same figure. Address N. F. 1, care of the LIBRARY JOURNAL.

The Brooklyn Public Library has vacancies in:

(1) Grade 2, general branch work. Salary: \$1200. Qualifications: (a) Certification of Graduation from High School, and at least two years of experience in an accredited library, or (b) College Graduate with one year of experience in an accredited library, or (c) Certificate of graduation from a library school.

(2) Grade 2, children's librarian. Salary: \$1200. Qualifications: (a) Certification of graduation from an accredited training course for Children's Librarians, or (b) Satisfactory experience in library work with children in an accredited library.

(3) Grade 3, children's librarian. Salary: \$1500. Qualifications: Similar to those for Grade 2 together with experience in a position of responsibility as a Children's Librarian.

(4) Grade 2, cataloguing department. Salary: \$1200. Qualifications: Similar to those for Grade 2, General Branch Work together with a knowledge of at least one foreign language.

Some time in January the following examinations for public library positions will be held by the City Civil Service of Milwaukee, Wis.:

1.—An examination for admission to Grade 2, included in which grade are all junior assistants.

2.—An examination for Grade 2 which includes positions as senior assistants and junior catalogers.

3.—An examination for Grade 3 including reference second assistants, branch librarians, advanced senior assistants, and senior catalogers.

4.—An examination for Grade 4 which includes senior branch librarians, and head for the department having charge of the distribution of books to the schools and stations in city and county.

Members of the staff in the lower grades are eligible to take these examinations as well as those outside the staff. Credit will be given for experience and good records in library service as well as for general education and personality.

POSITIONS WANTED

Librarian with seventeen years experience desires position in special library as organizer or as first assistant. Address: H. M. 1, care of the LIBRARY JOURNAL.

A cataloger of nearly fifteen years' experience, mostly in college work, and with a good knowledge of languages, would like a position in the East, preferably in a college library. Address: A. O. P., care of the LIBRARY JOURNAL.

Library school graduate with B. L. S. degree desires a position as head cataloger in a university or public library, or as librarian of a special or business library. Thoroughly familiar with all modern systems of business filing and indexing. Address: D. V. 1, care of the LIBRARY JOURNAL.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

JANUARY 15, 1921

The Field and Functions of a National Professional Organization*

BY HENRY N. SANBORN

Librarian of the Bridgeport (Conn.) Public Library.

AT the Colorado Springs Conference in discussing the action to be taken upon the Enlarged Program, I twice stated that the really fundamental question for the American Library Association to decide was whether it was a professional organization or a welfare organization. This question, to my knowledge, has never been considered by the Association. I still feel that consideration of the purpose of a national library association is of great importance, and I believe that the President of the A. L. A. must share this belief, since she has devoted a session of the Council to the consideration of the field and functions of a national professional association.

This subject will need some definition before it can be discussed intelligently.

A professional organization is very evidently an association of individuals following the same profession. Most professional organizations admit to memberships only those who are members of the particular profession, and many of them, for notable example the American Bar and the American Medical Associations examine carefully the qualifications of all applicants for membership. The membership is clearly professional.

A welfare organization, such as the Red Cross, is an association of interested individuals organized to render some direct service to humanity as a whole, or to some particular class of society. Its members are largely laymen, but its work is carried on by paid professionals, in some cases assisted by voluntary laymen. A welfare

organization is primarily a service organization.

An examination of the constitutions and by-laws of several of the leading professional associations, shows that their purposes are very definitely the improvement and advancement of the professions which their members follow. For the purpose of being more specific, it will be worth while to quote from several of these Constitutions, those sections setting forth the objects of organization.

The Constitution of the American Institute of Architects states: "The objects of this Institute shall be to organize and unite in fellowship the Architects of the United States of America, to combine their efforts so as to promote the aesthetic, scientific, and practical efficiency of the profession, and to make the profession of ever increasing service to society."

The American Medical Association is organized, its constitution says, ". . . to promote the science and art of medicine and the betterment of public health."

The American Bar Association by its constitution provides that: "Its object shall be to advance the science of jurisprudence, promote the administration of justice and uniformity of legislation and of judicial decision thruout the nation, uphold the honor of the profession of the law, and encourage cordial intercourse among the members of the American Bar."

The National Education Association is perhaps most similar to the American Library Association in the character of the profession and in the fact that schools and libraries are largely supported by public funds. Its charter provides: "That the purpose and object of the said corporation shall be to elevate the character

* Paper read at the open meeting of the A. L. A. Council at Chicago, December 29, 1920. Slightly abridged.

and advance the interests of the profession of teaching, and to promote the cause of education in the United States."

According to the 1909 Constitution, "The object of the American Library Association shall be to promote the welfare of libraries in America."

These quotations set forth the purposes of a few of the leading professional associations of the United States. It is evident that the object of none of them is to render direct professional service to the public as a whole or to any special group of the public, except the profession itself. It is doubtless true that certain clauses in these statements of purpose might be so construed as to make direct service constitutional. For example the American Medical Association might decide that its constitutional object, "the betterment of public health" warranted its establishing public hospitals, dispensaries, and clinics. It might decide to support this direct service by assessment upon the members or by an appeal to the general public or private individuals for funds. But in fact, the American Medical Association has apparently held that the care of public health as far as depended on actual service was the care of each community. To advance the study of public health, to educate the public in intelligent interest in public health, and to encourage the proper professional training of health officers has been its object. Even those larger problems of laboratory investigation and medical service which communities themselves could not care for, the Association has left to medical schools, the Rockefeller Institute or the American Red Cross.

Within the limits of this discussion, there is not time nor is there need to recite the exact functions of these various associations. It is sufficient to group their activities, as can easily be done, into a few divisions.

In the first place they all hold at least one annual conference for interchange of ideas, reports on the work of the association and the committees, and for the transaction of necessary business. To supplement the exchange of ideas in conference, many societies publish also an official professional journal, the subscription for which is included in the annual dues. Some associations for the purpose of still further informing the members of their professions issue other professional publications in book or pamphlet form.

The function which seems generally to be regarded as of next in importance is some standardization of professional service, and of the agencies for professional training.

The matter of professional fees and compensation a few of the associations have made a part of their active program. The American Institute of Architects, for instance, designates a fee which architects may but are not required to charge. The National Education Association agitates for better salaries and for pension systems for teachers. These later activities are evidently still looked at askance as welfare work by some associations. For instance in the *Engineering News-Record* for June 1920, Mr. Charles W. Baker, in urging united action on the matter of compensation laments that "There are conservatives who hold that it is undignified for a professional society to deal with matters of compensation and to attempt to limit compensation among its members. One hears always the stock argument that "you are going to make our society a labor union."

Another general function of these bodies is the promotion of legislation favorable to the profession or to the objects for which the profession works; such as housing laws, state laws for examination of those practising the profession, better school laws, laws providing special educational facilities. The present organized action of the N. E. A. for securing the passage of the Smith-Towner bill is an example at hand.

Finally, there is the attempt of an association to educate the general public as to the value of the services a profession can render. The public is to be taught that when building it is cheaper and better in every way to employ an architect in new building. Or the public should be educated to the value of vocational education, or public health departments. Lectures, periodical articles, and other obvious methods of publicity are used. To sum up then, the functions found in the professional associations, we find: 1. Conference of members. 2. Publications of professional literature for members. 3. Standardization of service. 4. Standardization of professional training. 5. Standardization of compensation and working conditions. 6. Promotion of progressive legislation. 7. Education of the public as to the value of the profession.

The A. L. A. up to June, 1917, followed the methods of other professional organizations.

Before that time, librarians as members of an association seem not to have contemplated direct library service. If we may judge from the charter, no such idea was in the minds of the founders. Let us read again a part of the charter of 1879. Certain individuals, we read, "have associated themselves . . . for the purpose of promoting the library interests of the country by exchanging views, reaching conclusions, and inducing co-operation in all departments of bibliothecal science and economy; by disposing the public mind to the founding and improving of libraries; and by cultivating good will among its own members . . .". With these purposes of the founders in mind, the constitution was framed and revised.

Immediately upon the entrance of the United States into the World War, librarians realized the importance of books in building the morale of our army and navy, and, at Louisville, the A. L. A. enthusiastically undertook a program of direct service.

We are not concerned to-day with anything except the fact of this action. We are not concerned that the National Education Association did not see fit to establish schools in the camps for teaching the illiterate and the foreign speaking soldiers to read English; or that the American Chemical Association did not as an association raise money to experiment with processes for making dyes or actually to produce dyes. The truth is every one of us is proud of the war service of the American Library Association. In this emergency we were undoubtedly by the nature of our professional tools more like a welfare organization than were most professional associations. Books are physical objects which may be distributed like food or clothing or cigarettes.

But if we are not concerned with the fact, we are to-day necessarily deeply concerned with the results of our extra-charter, and extra-constitutional action, because they have shown us the need of revision of our constitution.

As soon as we were launched on our war service career, we began to realize that our constitution was not devised for such work. In his presidential address at Asbury Park, Mr. Bishop showed that we were not well organized for efficient and expeditious service, and that our constitution needed revision so that our officers could act more quickly.

In the meantime, many of those most closely connected with the war work had had a vision.

There was no question of the value of the service we had been giving. Why not raise more money and carry on?

The significance of this ambition is that the result was the Committee of Enlarged Program, and the fact that this Committee very properly saw that there must be more centralization of power, which could be secured only by a revision of the constitution. So quick action was imperative. There was called the special meeting at Chicago a year ago. Here the Association was asked to adopt a program of action and to consider a revised constitution, which can, I think, truthfully be said to have been in large part suggested by the Committee on Enlarged Program. So much history is necessary merely to understand our present position.

It was when confronted by the Enlarged Program that the Association, I believe, failed to realize that the adoption of this program meant the permanent changing of the Association from a purely professional organization to a welfare organization, or at least to a combination of the two. Whether or not such a change is desirable, it is not the purpose of this paper to consider. We are concerned only with the administrative and other difficulties this change would involve, and here we must return momentarily to the fundamental differences between the two types of organizations.

The members of a professional association have become members because they actually follow the profession and are personally interested in the welfare and progress of the profession as a profession. Altho they admittedly vary in extreme degrees in experience, ability, and judgment, each rightfully assumes that he can form and express an expert opinion on professional matters and on the policy and management of the association. Otherwise, he would not be admitted to active membership. In a welfare organization, on the other hand, the members have joined the association either because they have a general conviction that the public service of the organization deserves support, or because they feel that they personally will benefit in the way of privileges or services from the organization. Membership in the Red Cross means the former; membership in the Y. M. C. A. means either the former or the latter. These members are not professionals or experts in social service. Most of them do not suppose themselves capable, except in the most general way, of having an intelligent idea of what the

management or policy of the association should be. In brief, a member of a professional organization makes a voice in determining the policy of the association, at least thru a delegate, but the member of a welfare organization becomes a member because he accepts the general policy, and he ceases to be a member when he disapproves of the management and policy.

Brief attention to methods of financing will bring this comparison of welfare and professional organizations to a close. If the object of an association is professional betterment, it must naturally look to the profession itself or to some individual benefactors for financial support. Mr. Carnegie may have been enough convinced of the value of the library profession to endow the A. L. A., but Messrs. Smith, Brown and Jones will be difficult to interest, altho they may be persuaded to donate to their local library, or to buy books for blind soldiers. Mrs. Russell Sage could see the value of trained social workers and, accordingly, endow a school of philanthropy, but Smith, Brown, and Jones, again, prefer as objects of their benefaction, the direct service which the worker trained in Mrs. Sage's school can render. Because of its tangible direct service, a welfare organization can appeal to the general public for funds. Because of its indirect service, even tho more fundamental, a professional organization must depend for support upon its members or upon a few far-seeing individuals.

That the common mind of the A. L. A. has felt this distinction tho only in a vague and very subconscious way, I believe the history of the Enlarged Program has shown. At our special meeting here last winter, we found ourselves in a state of mental confusion which we could not explain. After surprisingly little discussion at one session, but with evident timidity, we voted to raise \$2,000,000 for an enlarged program. We were told a very obvious truth which we all agreed to; that to carry out an Enlarged Program to expand our activities, we must revise our constitution. If millions were to be spent effectively and many activities were to be carried on, the direction and the power to make decisions must be in the hands of a few. If things were to move with anything like promptness, there could not be constant delay for a referendum to the membership at large. So we considered a revised constitution; and here we showed our confusion. We had voted to be-

come a welfare organization, but we wanted the constitutional *modus operandi* of a professional association. The majority of us were not willing to entrust to a small board, constantly changing, both the forming and the executing of association policies. The council was more representative and even the membership at large must have a voice. We are all professional experts, and if association with our peers means anything, it means a voice in the management and policy making of our affairs.

This much, I think, we have all learned from our experience of the last year: our constitution needs revision. I believe that in this revision we shall, indirectly it may be, make our decision as to the future character of the A. L. A.

We are to revise our constitution I take it, so as to provide less ponderous machinery and at the same time preserve the democratic character of our functions. Perhaps it will help us to examine the mechanism of other organizations. Before doing so, however, let us consider in general the constitutional provisions necessary for operating the business of an association.

1. There must be active members with some voice in the management. There may be also associate and honorary members.

2. There must be officers.

3. There must be some executive body of which the officers may be the whole or they may be assisted by additional members.

4. There must be a policy making or legislative body. This may be the membership as a whole; or a body appointed or elected from the membership as a whole; or it may be a house of delegates so constituted as to insure both numerical and geographical representation.

5. There will probably be committees to conduct investigations and make recommendations on some phase of professional work that affects the whole national work; and there will be sections dividing the general membership along the lines of special interests and of geographical location.

6. There must be some provision for financing the work of the association; by dues, assessments, contributions or endowment funds.

In revising our constitution we shall need, of course, to consider in detail all six of these necessary provisions. But our most careful attention will have to be given to the provisions needing the most drastic revision: I mean the executive body, the legislative body, the sections, and the powers of the membership at large.

I said before that in revising our constitution, we must preserve the democratic character of

our association. The A. L. A. must be a democracy, but an organized democracy, so organized as to be as efficient as a democracy can be. We shall have to sacrifice something of the efficiency of an oligarchy and something of the individual power of pure democracy. In the purest form of democracy, the supreme example of which is the New England town meeting, each individual member has an equal vote with every other member on every question of policy, taxation and expenditure. Ideal as such a system is, it will work satisfactorily only in a restricted locality where all voters can easily meet.

An association which must determine its policy and conduct its business by an appeal to the vote of its individual members must act very slowly; and where its members are widely scattered, it must provide for voting by mail or it must make its quorum so small that a proposal may be carried by an insignificant minority against the judgment of a large part of the members. Both methods were tried during the last year in the A. L. A. A year ago less than one hundred members voted for Dr. Putnam's resolution to inaugurate a campaign for \$2,000,000. Later in the year about 1200 members voted by mail to delay the campaign. In neither case did the vote represent one-half the total membership. A vote by mail is liable to represent misunderstanding. Action carried by a small minority gives opportunity for a few enthusiasts to commit the association to a policy which the majority may not approve.

In political systems when a unit of government becomes too large for popular referendum, the representative form of government is adopted. Individuals express their opinions thru delegates, representing localities and numerical divisions. This body of delegates is their legislative and their policy-forming body. Their executives they elect separately to carry out their policies as formed by their body of delegates.

Some such system of representative government has been adopted by many national associations. All of the associations mentioned previously in this paper have some more or less elaborate form of representative government. The N. E. A. as recently as last summer completely reorganized along representative lines. Accordingly, after having made a careful study of these principles, I shall attempt to present to you those common to all, and the chief variants that may have bearing upon our own problems.

All of these associations are constituted upon the principle of federation. The American Medical Association quotes the definition of a federation as "A federation or union of several states under one central authority, consisting of delegates from each state, in matters of general policy, but self-governing in local matters." In short, the business and policy of the association is determined not by individual members in conference, but by a house of delegates voting for their constituents.

The methods of federating these separate units vary. It is obviously not possible to give certain individuals who are members of a unit and not of the national organization full powers. In only one Association, the American Medical Association, are all members of constituent associations automatically members of the national body, but this is only a nominal privilege, because a distinction is made between members and fellows—a fellow being one who pays dues to the national association and subscribes to the *Journal*. The American Institute of Architects in its constitution as amended in May, 1920, exercises a control by the Institute over the membership of the chapters. Those already members of chapters shall not lose their chapter privileges even if they do not become members of the Institute, but no more may in the future become members of a chapter except as they do so automatically by becoming first members of the Institute. Chapters may change their own initiation fee and dues, and may receive "associate members" who may not hold office, but may serve on local committees and vote on purely local questions.

It should be noted here that all these associations, including the N. E. A. have strict qualification requirements for membership, which the A. L. A. does not have. My opinion is that the A. L. A. also should admit to active membership only those actually engaged in library work.

It goes without saying that only active members or fellows are eligible as delegates to the representative body. It is also evident that there must be some basis of representation. In determining this basis, three things have to be considered, locality, number of members in the unit represented, and the special divisions of professional service.

Geographical divisions are easily established, state associations being the common unit, but provisions are often made for smaller local units in some associations, and others subordinate the

local society to the state association. The principle of numerical representation is merely the principle of majority rule essential to a democratic system. It is arrived at variously. The N. E. A. allows a delegate for each 100 members or fraction thereof. The American Medical Association limits its house of delegates to 150, and after allowing the army, the navy, the U. S. Public Health Service, and each scientific section one delegate, apportioning the others to the state association; reapportioning all delegates every three years.

The principle of allowing what we in the A. L. A. call sections to have a delegate is not actually universal, but is in effect practically so. Its purpose is, of course, to give representation to each special interest in the profession. Mr. Hadley's proposed amendment would, I think, be improved by some such provision. Public libraries so far outnumber other libraries, and head librarians are so naturally more prominent in the profession than assistants, that representation by sections would make sure that the libraries other than public and those engaged in some special branch of library work have a voice, and would also safeguard the house of delegates from becoming a body with onesided interests.

One other provision is desirable in order to insure democratic legislation by this council. The quorum should be fixed not by the actual number of delegates present, but with reference to their geographical distribution. This would prevent delegates from one section of the country controlling the policy of the Association. If the number of delegates allowed a federated association is to be based upon the number of members of the A. L. A., then the larger state Associations will probably have the largest number of delegates, and it might so happen that the majority at council quorum voting would be from a few states all in one section of the country. The N. E. A. provides for this contingency by requiring representatives from twenty-five states and territories to constitute a quorum.

The powers of these representative assemblies are comprehensive and final. The complete management of the association is in their hands, at least for approval. There may be smaller bodies as board of directors, board of trustees or executive committees, but they exist for carrying out the policies of the assembly. An executive committee may prepare the budgets,

but the assembly must approve them. The election of officers is generally the duty of the assembly. In no case have I found that election of officers is left to a direct vote of the members. My own opinion is that with a representative body to determine the policies and program of action for the association, and to approve the budget, the election of officers could advantageously be left to the vote of the entire membership, on the same principle upon which we elect the President and the senators of the United States. Members could vote by mail for officers without the danger of misunderstanding that arise in mail voting upon questions of policy. Such a provision would give each member an additional sense of having a voice in the affairs of the association, and with the increased probability under this arrangement of more than one ticket, there would possibly be an end of a condition where the president is elected by seventy-eight votes out of a possible 3000 or more.

Our present by-laws with regard to sections and affiliated associations putting this matter in the hands of the Council seem in keeping with the procedure of other associations and entirely satisfactory.

The appointment of committees could still be safely left in the hands of the president and the executive committee. There is no uniformity of practice in this appointing function in the Associations I examined.

The methods of financing these organizations also vary. As none of them carry on direct free public service, the demands for money are for holding conferences, for publishing, for investigations of professional standards and practices, for promoting legislation, for publicity, and for administration. These necessary funds are raised by dues or assessments upon the members, by the sale of publications, and by gifts to endowment funds. I have learned of no case where a professional association has made an appeal to the general public for funds. Dues and assessments—the American Medical Association may assess its members to the amount of \$10.00 each per annum—care for current association conferences and administration, and also as a rule for committee investigations. The N. E. A. provides that unless the representative assembly vote otherwise, ten per cent of the gross annual income shall be added to the endowment, and that the interest on the endowment shall be spent for investigations. The

American Institute of Architects sets aside fifteen per cent.

Publications pay for themselves, and are generally sold at cost to members. Many of these associations publish a professional journal, the subscription for which is included in the dues. It has often seemed to me, with no thought of criticism of the quality of usefulness of the LIBRARY JOURNAL and *Public Libraries*, that the A. L. A. might publish its own professional periodical, including, perhaps, the *Booklist*. Certainly there is at present much space devoted in our professional periodicals to proceedings of the A. L. A. and state meetings, to reports of committees and to association business which members receive in the *A. L. A. Proceedings* and *Bulletin*. Why should I pay three subscriptions to read the president's address printed in three places? Other features which these periodicals contain under proper editorship might be included in an official journal. If this official publication were the only place to read A. L. A. papers, announcements and business, there would be a considerable added inducement to membership.

One other suggestion I should like to make as to the financing of part of the work of the A. L. A., that of its function as a clearing house for positions. It seems hardly business-like to expect the general membership to pay dues large enough to maintain an effective employment department at headquarters, and yet such a department is to my mind, and if the establishment of the Library Workers Association is a true indication, to the minds of many, one of the most essential activities of our national headquarters. I suggest that we commercialize this service, and I think commercialize is not here an opprobrious word. A librarian wishing a position would like a teacher be willing to pay a reasonable per cent of his salary as a fee, and any library in need of an assistant would most certainly be willing to pay a like amount. From these fees a far-reaching, competent, and reliable service could be maintained.

In spite, to quote the death-bed apology of Charles II, of the "unconscionable time I have been in dying," I have given but a very general review of the field and functions and functionings of other professional organizations. But I have myself given these careful examination, and in at last closing this paper, I should like to sketch in barest outline a revision of our constitution which in my purely individual judgment

would give us a smoothly working and yet democratic form of government. The revised constitution now before us for consideration would doubtless be easily worked, but it is oligarchic and not democratic. We all felt this in our discussion of a year ago.

I would suggest then, for consideration, a revision that would provide for:

1. A federation of geographical and professional sections, which should be represented by delegates in an assembly, like our present council, except that, reorganized, this council should have greater rather than less power. All policies, budgets, and legislation should be requested or approved by this body.

2. The officers, probably including the members of the executive board, should be elected directly by the membership, either by those present at an annual conference or, better, by votes by mail also, giving each member a vote.

3. An executive committee, including the officers whose duties should be solely the administration of the business of the association as planned by the council or representative assembly.

These administrative duties should include all the activities of the Association, conference, committee investigations, publishing, employment exchange, and so forth. Having received the instructions from the council with an approved budget, the executive committee should have a free hand, but they should not be able to commit the Association to new policies or programs. The membership should not have power even by the vote of three-fourths or all of the members present at a meeting to commit the Association in any way, but should have only the power to make recommendations to the council for action.

A constitution with these fundamental principles worked out in logical detail, would in my humble opinion, correct the evils that Mr. Bishop found particularly irksome in his administration, and at the same time be so democratic that it would awaken a new interest in members of the profession who now in too great numbers feel that the affairs of the Association are in the hands of a few.

A library of two thousand volumes, donated by the Carnegie Endowment, dealing with American history, institutions and literature has been dedicated at the University of Paris by Hugh E. Wallace, the American Ambassador.

Wisconsin Certification Plan

IT is to be noted that this report provides for certification in four grades, based first on academic education, formal library training and library experience; and second, it provides that there may be substituted for the academic education and formal library training, equivalent attainments as demonstrated in examinations, held by the State Certification Board. The report is in general terms and not in language suitable for legislation. This certificate plan is intended to apply to public libraries only.

The State Library Certification Board consists of five members, two appointed by the Governor from nominees selected by the Wisconsin Library Association; one library trustee appointed by the Governor; one member from the Wisconsin Library Commission staff selected by the Wisconsin Library Commission; and one member from the University faculty, nominated by the President of the University and not to be connected with library work.

The Grades of Certificates are:

First grade—Three years college work; one year in an accredited library school; two years successful experience.

Second grade—Three years college work; one year in an accredited library school; two years successful experience.

Third grade—High school graduation; six weeks in an accredited library school; one year's successful experience.

Grade four—High school—graduation and such additional requirement as shall satisfy the Certification Board that the candidate is able to do successful library work in the position to which such certificate shall make him eligible.

Examinations. When candidates do not have academic and library school training as heretofore prescribed, the Certification Board, if it satisfy itself by examination and otherwise that the candidate has attainments substantially the equivalent of such required education and training and that all other conditions are met, may grant a certificate of any grade.

Certificates for Wisconsin Librarians. Nothing herein shall be construed as to prevent any person in a public library position on January 1, 1923, from continuing in such position without certificate. Any person who has occupied

any public library position in Wisconsin for one year at any time before January 1, 1923, may be granted a certificate of any grade without examination, if the Certification Board shall satisfy itself that such person has demonstrated his ability to do successful library work in a library position in which the desired certificates would authorize his employment, provided such application for such certificate be made prior to January 1, 1925.

Licenses. The Certification Board shall be empowered to grant to any person who presents the requisite academic and library training qualifications, but lacks the experience required, a license for one year.

If at the end of that year, evidence of successful work for that year be presented to the Board, the Board may renew this license for one year in cases where two years' experience are required to qualify for the certificate.

Employment of Librarians and Assistants. After January 1, 1923, no public library, receiving any public funds, shall employ to fill a vacancy or in any new position created, any librarian or assistant who does not hold a library certificate; no public library, receiving any public funds, in a city of 8000 or over, shall employ to fill a vacancy or new position as librarian in charge of that library any person who does not hold a first grade certificate; and, no public library receiving any public funds, in a city of 2000 to 8000 population, shall employ to fill a vacancy or new position as librarian in charge of that public library, any person who does not hold at least a second grade certificate.

Permits to Library Boards. If the Certification Board shall satisfy itself that any library board in a city of 2000 population or over is unable to secure a librarian, who holds the requisite certificate, to place in charge of its public library, the Certification Board may grant to such library board a permit to employ a person without the required certificate for a period not exceeding six months and such permit in case of emergency may be once renewed for a period of six months.

Dr. and Mrs. B. T. Vincent of Denver have given 1500 volumes to the library, including a number of first editions of standard American authors.

* Report presented at the Wisconsin Library Association meeting at Madison, October 11th.

Consolidation of Railroads

A LIST OF REFERENCES TO MATERIAL DISCUSSING PLANS FOR CONSOLIDATION OF RAILROADS IN THE UNITED STATES, IN CONNECTION WITH THE TRANSPORTATION ACT OF 1920.

Special Libraries in New York City

A CLASSIFIED LIST COMPILED BY REBECCA B. RANKIN

President New York Special Libraries Association

THIS Classified List of Special Libraries, it is felt, will serve as a directory for the use of special librarians of the city. It was impractical at this time for the Association to attempt a directory with detailed information concerning the collection of each library. The subject under which the library is classified will, at least, give a suggestion as to its collection of books and the type of information they can furnish.

In most cases, the libraries which are included are intended for the service of that particular corporation or association. However, the librarians or persons in charge are willing to give information and assistance to other *special li-*

brarians insofar as the regulations of their organization will allow. But in no sense are these *public* libraries. The names of some special libraries have not been included at all because the libraries are exclusively for the use of members or of the organization and they do not feel their facilities enable them to give any assistance to other special libraries. The special divisions of the public libraries and the university libraries have been included.

The New York Special Libraries Association presents this as its first attempt of this kind. It, undoubtedly, has omissions and errors, and any corrections or additions sent will be welcomed.

Accountancy

1. American Institute of Accountants	135 Cedar St.	Louise Miltimore	Rector 4936
2. Haskins & Sells	469 Fifth Ave.	Helen M. Johnstone	Vanderbilt 488 Cortland 1465
3. Pace & Pace	30 Church St.	Audienne Graham	Hanover 7980
4. Price, Waterhouse & Co.	54 William St.		

Advertising

5. Associated Advertising Clubs	110 West 40th St.	(Mrs.) May Thayer	Bryant 8380
6. Association of National Advertisers	15 East 26th St.	Dorothy Hogen-camp	Md. Sq. 8362
7. Barton, Durstine, Osborne, Inc.	25 West 45th St.	Mary Louise Alexander	Bryant 9020

Librarians in Who's Who in America

THE number of librarians listed in "Who's Who in America" for 1920-21 is 242.

This total includes those calling themselves librarians, bibliographers, archivists, editors of library periodicals, teachers in library schools, and those retired from these occupations. Those who have been librarians but who are now in some other business are not included, except those whose biographies show that they have spent practically their whole life in library work and have won their reputations in this field.

Of the total of 242, 196 are men and 46 women, and 25 are listed as "retired." Only 159 are listed as being members of the A. L. A.; but the A. L. A. Handbook for 1919 lists 193 of the 242. Libraries represented are: public, 82; college and university, 40; special, 31; state government, 30; federal government, 15; school, 2; library school teachers, 4; editors, 4; and miscellaneous, 9. Nearly one-third (82) of the total were educated at library

schools: 54 at Columbia and New York State School; 12 at Armour Institute and the University of Illinois; 8 at Pratt; and 8 at other schools.

MARY J. BOOTH, *Librarian*,
East Illinois Normal School,
Charleston, Ill.

A STAFF LIBRARY

Noting the sad fact that librarians are apt to become mere passers of books to other readers, rather than readers themselves, the Detroit Public Library has set aside a small fund for the purchase of a staff library, duplicates of the most important of the new books. A certain amount of time is allowed each member of the staff during service hours to read these books, and so better to prepare himself to be advisor to the public in the matter of reading.

Once read by the entire staff, they will be put into the general collection of the Library.

The Nation and the Schools*

HERE is a book whose emphasis on the nation's part in American educational progress is both significant and timely: significant because it reveals ample precedent for doing the things that need to be done to correct the egregious shortcomings in our educational system which the war brought into bold relief; timely because there is every indication that Congress soon will set up the machinery required to insure essential equality of educational opportunity throughout the Nation.

The scope of the book is indicated clearly in the introduction as follows:

"The first part briefly outlines the historical development of the policy of Federal aid, with the attempt to show how this policy, well-intentioned but defective at the outset, has been gradually refined thru progressive legislation to the point where its much wider extension in the form of national subventions is clearly justified. Following this historical survey, the present situation is analyzed and the deficiencies revealed by the war are traced to their causes. The measures now before Congress looking toward the remedy of one or more of these deficiencies are then considered. Of these, the Smith-Towner bill, as representing the most comprehensive proposals, is selected for detailed treatment and the remaining chapters are devoted to a study of its provisions and of the educational conditions which they seek to improve. In this connection the two most serious weaknesses of American education—the rural schools and the policies and agencies for the preparation of teachers—are given especial emphasis and attention. The book concludes with a discussion of the proposal to restore the present Federal Bureau of Education to its original status as a department of the Government, and to make it an executive department with a cabinet officer—a Secretary of Education—at its head."

Attention is called to the deep-lying forces that have wrought sweeping transformations in the spheres of government, transportation, mining, banking, manufacturing, and agriculture, as the boundaries of the neighborhood have widened until the Nation itself has become one great community with its own large interests and peculiar problems.

The book is thoroly documented. Important tables show amounts and dates of Federal land

grants given in support of education; distribution of the surplus revenue from the Federal Treasury in 1837 and the use that was made of it by the various States; the amount of aid that the Smith-Towner bill would provide for each State for the reduction of illiteracy, for Americanization, for physical and health education, and for the equalization of educational opportunities. Appendix C is the text of the bill itself.

In style "The Nation and the Schools" is pleasing and readable as would be expected of any book from the hands of its well-known authors. It is attractive mechanically.

Librarians are interested in "The Nation and the Schools" because they are interested in education not only in school but beyond school and in its relation to the whole fabric of modern society. Libraries not only help promote the educational advance by fostering a better understanding of things educational; they are the direct and immediate beneficiaries of any elevation of the intellectual life of the community. Adequate schools which stress continuing education and professional teachers make library work rich and delightful.

Librarians are interested in "The Nation and the Schools" for a more direct and personal reason. The Smith-Towner bill which is the major theme of the book provides for "the extension and adaptation of public libraries for educational purposes" as one of the objects of \$50,000,000 for the equalization of educational opportunity. National interest in libraries is certain to grow larger and more definite as their true significance is better understood. Any provision which the national Government makes for their promotion may be expected to become correspondingly more satisfactory. Just as the present emphasis in the school movement is on teaching—on educational service and leadership—rather than on the mechanical plant, the emphasis in the library movement will come more and more to be upon the professional librarian, trained not only in the essentials of bibliographic technique and library management but broadly trained in educational sociology and economics and above all in community leadership. It may easily be seen that Federal subventions for teacher training and for teachers' salaries imply similar aid for library training and for the salaries of librarians.

JOY E. MORGAN.

Roads to Childhood*

THERE is something about a road that is very kindling to the imagination. It suggests the pioneer who blazes the way, the pilgrim who travels over it to his goal and equally the pleasure seeker who wanders here and there without definite purpose, ready to follow bypaths and side trails and to discover for himself beauties not set down in the guide books.

Miss Moore has chosen her title well. Her main traveled road leads backward into her own childhood and forward into the grown-up life of the children who have been her friends. The crossroads take us into the world of books leading almost anywhere.

When these papers first appeared in *The Bookman* their timeliness in relation to recent publications implied that they were of temporary interest, magazine material perhaps, rather than the stuff for a book. Amplified and slightly altered, enriched by the addition of two introductory chapters, they are found to possess standards and principles of permanent value. We believe they contain in large measure Miss Moore's articles of faith on the subject of children's reading.

Since the book is written out of her own wide experience with the likes and dislikes of children far apart in tastes and opportunity, the range of allusion and illustration is varied and stimulating. Pleasant glimpses into memories of a childhood upon which the more informal elements of an individual's education is based, introduce the theme of writing for children. No cut and dried formula, no universal prescription, can be offered for this. To rid oneself of the idea that it is an easy matter to write for children, is the first step. Ability to recall one's own childhood with vividness and understanding is almost imperative, study of the best models is invaluable.

Sincere treatment of a children's book is all too infrequent, hence the sound reviewing in "Roads to Childhood" may well serve as example to those who attempt to give critical estimates of so-called "juveniles." We should be spared the long, inclusive and indiscriminating summaries of the "books of the year" in which holiday periodicals abound, if the writer would or could follow this lead.

To the parents and other relatives for whom the matter of book selection is a perplexity Miss Moore has indicated points of view that will undoubtedly be illuminating. That there are no "Best Books for Everychild" is a fact to be heeded. Children's interests are no more cast in the same mould than those of older people and we shall do well if we allow freedom of choice, opportunity to taste and appropriate, to each according to his needs.

If Miss Moore allows anywhere personal prejudice to creep into these chapters we should say it is in her attitude toward books as sources of information. After all there have to be such books, and for some children the approach to the kingdom of the imagination is thru the use of a book to which they have gone for answer to a definite question. That such books are too often mechanical and perfunctory, lacking in charm, in originality, in literary value is granted. But that the search for information may not be as worthy a motive as random reading, we are not willing to admit.

This expression of preference is, however, in no sense a blemish in a book which presents matter of so much value not only to writers and reviewers, but to parents, teachers and librarians. The student wishing to obtain a survey of recent books for children will find it here, and will meet at the same time references to many of those whose names stand for definite accomplishment in the realm of real literature.

Withal, the book is pleasant reading, to be taken up and dipped into in the assurance of finding comment that makes one turn at once to re-read an old favorite or make the acquaintance of a new.

The index is worthy of special mention. It confines itself to the names of books and the names of people and is a most convenient and useful adjunct.

ALICE M. JORDAN.

The Herkimer (N. Y.) Free Public Library will give to anyone willing to pay for transportation *The Portfolio*, v. 1-2, 4, 5-6 and 13; *The Emporium of Arts and Science*, v. 2; *The Quarterly Review*, the *Edinburgh Review* and the *Westminster Review*, some 6 volumes, about the year 1835. All these are bound in leather. For further particulars address: Edith M. Sheaf, librarian.

*Roads to Childhood. By Annie Carroll Moore. Doran, 1920.

A Tale of Two Cities

WITH the lira down to three and one-half cents, why not buy German books thru Italy? Thereby hangs a tale. While we in America can get new publications at about 5.7 cents a mark, or (if domestic prices have advanced during the war 150%) at about one-half the ante-bellum rate, the Italians are today paying 125 lire for 100 marks worth of German books, just as they did before the war—and getting just 40% as much for their money. To the Italian, German books have been extremely high since October 15, 1920.

The bills of an Italian and a German agent would run thus:

	Italian	German
List price	Mk. 100.00	Mk. 100.00
Valutazuschlag ...	175.00	250.00
	275.00	350.00
Teuerungszuschlag		
10%	27.50	35.00
	302.50	Mk. 385.00
Commission 10%....	30.25	
	Mk. 332.75	

The former excludes, the latter includes, transportation, etc. The two are thus about on a par of cost, with the advantage of quicker delivery as well as heavy underselling in anti-quarian items lying with Germany.

The same is true of English, French, Swiss, and Dutch dealers. This will appear clear from the following table of percentages to be added in foreign bills according to the schedule of October 15 (first column), with which may be compared (second column) what they would have been if the originally announced values had been adhered to. (1 Mk.=.70 French francs, .50 Swiss francs, 5 d., .24 gulden, .80 lire, .45 pesetas, 9 cents):

	As it is	As intended
England	250	400
France	220	200
Holland	245	400
Italy	175	110
Spain	250	385
Switzerland	265	435
U. S.	250	500

To which add 10% Teuerungszuschlag in all cases.

In other words, the only way found effective against raids thru countries with markedly

depreciated currency was the erection of a virtual tariff wall; and, conversely, "U. S. A." are the initials of the lad for whom Leipzig has come to set her cap. The 50% reduction is just for him.

The Committee's advice in its first Bulletin to trade directly remains sound. (See LIBRARY JOURNAL of January 1).

What a far cry is this from the program at that famous meeting of the Verlegerverein in April, 1918, when, on the eve of assured military triumph, the publishers gathered in imperial conclave to divide up the world's trade and make New York a satrapy of Leipzig.

THE MOST POPULAR BOOKS

THE six works of fiction most in demand at the public libraries during November, according to the list compiled by Frank Parker Stockbridge in co-operation with the A. L. A., and published in the January *Bookman* are:

The Top of the World. By Ethel M. Dell (Putnam).

The Valley of Silent Men. By James Oliver Curwood (Cosmopolitan).

The Age of Innocence. By Edith Wharton (Appleton).

Harriet and the Piper. By Kathleen Norris (Doubleday, Page).

This Side of Paradise. By F. Scott Fitzgerald (Scribner).

Kindred of the Dust. By Peter B. Kyne (Cosmopolitan).

During the same month the best sellers, compiled and arranged in the order of their popularity from reports of leading booksellers in every section of the country, published in the January *Books of the Month* are:

The Valley of Silent Men. By James Oliver Curwood (Cosmopolitan).

A Poor Wise Man. By Mary Roberts Rinehart (Doran).

The Age of Innocence. By Edith Wharton (Appleton).

The Trumpeter Swan. By Temple Bailey (Penn Pub.).

The Top of the World. By Ethel M. Dell (Putnam).

In Chancery. By John Galsworthy (Scribner).
General books in demand at the public libraries in the order of their popularity were:

White Shadows in the South Seas. By Frederick O'Brien (Century).

Now It Can Be Told. By Philip Gibbs (Harper).

Vagabonding Thru Changing Germany. By Harry A. Franck (Harper).

Memoirs of the Empress Eugenie. By Comte Fleury (Appleton).

"That Damn Y." By Katherine Mayo (Houghton).

An American Idyll. By Cornelia S. Parker (Atlantic).

The best sellers in general literature were:
Roaming through the West Indies. By Harry A. Franck (Harper).

White Shadows in the South Seas. By Frederick O'Brien (Century).

Theodore Roosevelt and His Time. Ed. by J. B. Bishop (Scribner).

The Autobiography of Margot Asquith (Doran).

Now It Can Be Told. By Philip Gibbs (Harper).

The Outline of History. By H. G. Wells. (Macmillan).

BOOKS FOR STEERAGE PASSENGERS

A STRONG plea for libraries for the use of steerage passengers is made by a social worker, C. B. White, in several of the New York dailies. "No one," he says,

"can blame the steamship companies for flinching from the task of equipping a library for the polyglot mob below decks. On our boat, in the third cabin, twenty-five languages were spoken. And yet, just because of the babel and the motley, a library is needed there more than anywhere else. They have not the recreations offered to the passengers above decks. For them the voyage is a long monotony. Ten days is the average duration, oftentimes made longer, when they are detained on board in port, awaiting transshipment to Ellis Island.

Those ten days present a priceless opportunity to reach to these newcomers the history and literature of America, her geography, the mechanism of our government, the life story of foreigners who came here and made good. In that moment the immigrant is in a teachable mood. The adventure into a far country has excited all the nerves of his mind. He is awake as he never was before.

"To provide so many tongued a library and reach it forth to so varied a host is a job beyond the competency of the ship's crew. It would have to be done by men specially trained. The Carnegie Fund would doubtless provide the books. But the librarian would have to be a man of vision and leadership, such as our library schools and neighborhood houses are turn-

ing out, which would mean a steerage library association, supported by gifts from the socially minded. That the steamship companies would co-operate with such an association need hardly be questioned. To make the ocean trip more enjoyable and lift the tone of life on board for both passengers and crew would be quite to their advantage. . . .

" . . . A library steward would be invaluable. He would be America's hand of fellowship stretched out. As head worker in institutes of social service in New York, I have known the difficulty of straightening out these newcomers, once the warping into a gnarled and tangled knot has taken place. We must make contact with the immigrant while he is voyaging hither. For that contact, could anything be more fitting than books, helpfully chosen and courteously proffered? The movement of peoples into America is a fact in universal history. I fear that at present we are doing but little to humanize this migration of the multitude."

REQUIRED COURSES IN LIBRARY SCIENCE

To the Editor of the LIBRARY JOURNAL:

The U. S. Bureau of Education Bulletin on "Requirements for the Bachelor's Degree" (1920 no. 7) records only one course in bibliography, that in Pennsylvania state college, 1 semester hour, or .76 per cent of the total semester hours required; and one in library methods, that in the University of Oregon, 2 semester hours, or 1.66 per cent of the total semester hours required.

As chairman of a committee of our state library association on library instruction I should like to learn whether there are similar required courses in other colleges or universities. I do not refer to courses given as a part of required courses in history or English, but courses for which separate credit is given.

W. D. JOHNSTON,
Librarian.

St. Paul (Minn.) Public Library.

A St. Louis corner newspaper stand which is often temporarily deserted by its proprietor bears a notice which shows an appreciation of the distinction between the free library and a purely commercial enterprise:

CROOKS AND OTHERS.

PUT YOUR MONEY IN THE BOX.

THIS IS NOT A FREE LIBRARY.

Reprints of W. J. Hamilton's summary of the county library laws in the various states (published in the October 1 LIBRARY JOURNAL) may be secured by writing to Miss Anna May Price, Secretary of the League of Library Commissions, care of the Library Extension Commission, Springfield, Ill.

THE LIBRARY JOURNAL

TWICE-A-MONTH

JANUARY 15, 1921

THE mid-winter meetings at Chicago brought together a larger number than was expected, tho the attendance was confined chiefly to those from nearby localities. The Council discussions dealt largely with constitutional revision, stimulated by Mr. Sanborn's interesting paper, printed on other pages. One suggestion which has been made seems to meet with rather wide acceptance—that of biennial meetings and a presidential term of two years. This scheme would give opportunity in off years either for regional meetings or for meetings of affiliated societies and sections, leaving the A. L. A. Conference to be occupied chiefly by general sessions of the entire body. The proposal is certainly an interesting one and demands consideration thruout the profession before the Swampscott Conference of 1921.

★ ★ ★ ★ ★ ★ ★

BOSTON, which, at the third Conference of the American Library Association held there in 1878, was the library centre of the country, is resuming so much of its old leadership under the administration of Librarian Belden, that it is peculiarly gratifying that the 1921 Conference should be held in its vicinity under Boston auspices. Swampscott, on one of the lovely beaches stretching from Boston along the North Shore, will be most inviting in the last week of June, and Chairman Faxon of the Travel Committee, here on his home base, expects to provide at the New Ocean House and its neighborhood for a banner convention of fifteen hundred woman and man power. Our hosts at Boston are already planning excursions during or after the Conference, which will take visiting librarians, especially those from distant points, to the shrines of New England history, especially interesting at this tercentenary period. While the arrangements are not yet definite, it is hoped that there may be a steamboat excursion to Plymouth for one day and an auto excursion along the Paul Revere road thru Cambridge to Lexington and Concord, while another half day may be given to Marblehead and historic Salem. Harvard College holds its commencement Thursday, June 23, which should attract the many Harvard graduates in the profession, tho it may lose them from the Conference for that day. While the

great body of attendants will naturally be from New England, with its exceptional number of libraries and librarians, it is to be hoped that every region of the A. L. A., from Canada to Texas and from the Pacific coast and the outposts beyond where the American library spirit is in evidence, will be fully represented at a Conference which should reach the high-water mark alike for attendance and interest.

★ ★ ★ ★ ★ ★ ★

THE proposal to organize state library associations into state chapters and local clubs into local chapters of the A. L. A., which has been more or less discussed, met with a check because of a considerable drawback in the fact that members of chapters would necessarily be members of the A. L. A., while both state and local associations, with their lesser dues, include many non-A. L. A. members. There would not be the same objection to regional chapters, comprising A. L. A. members in half a dozen distinct regions, which are already on their way toward organization, as illustrated in the New England meetings, Library Week in New York, the Atlantic City joint meetings, others in the mid-west states and the Pacific Northwest Association. These might be so shaped as to include both A. L. A. members and non-members, as they would not involve payment of dues. It is evident that the reorganization of the A. L. A. is a very live question, and the suggestion that there should be the simplest constitution, like the charter of an incorporative company, and that all the problems should be thrown into the by-laws, offers only a technical solution.

★ ★ ★ ★ ★ ★ ★

LIBRARY building was almost at a standstill during 1920, and the Carnegie Corporation made no new grants. The University of Michigan opened its splendid building in January, and this will have a worthy companion in that in which Mr. Clements is to house the generous gift of his remarkable American collection. Detroit and the John Crerar Library of Chicago postponed their openings until the new year, which gives promise of new work and revived building in large measure, in which it is to be hoped Philadelphia and Brooklyn will share.

FOREMOST in the field of library economy was the tenth edition of the Decimal Classification with a scheme of sub-division for the World War and an expansion of the section on agriculture. A comprehensive classification scheme for landscape architecture by Henry Vincent Hubbard and Theodora Kimball is a companion to the classification for material on city planning by Miss Kimball and Professor Pray, published in 1913. James Duff Brown's "Manual of Library Economy," largely rewritten by W. C. Berwick Sayers so as to cover the problems of the larger library, is published in this country by the H. W. Wilson Company. "Rules for Shelf Listing," prepared by H. A. Titsworth and Carl T. Jacobsen of the University of Chicago Libraries handles points not covered by the Library of Congress printed rules. An edition of Martha Thorne Wheeler's "Indexing: Principles, Rules and Examples," revised by Mary Ellis, has been published by the University of the State of New York. New library periodicals are the *Harvard Library Notes*, edited by George P. Winship for the use of the staff of the Harvard Libraries and the *Savannah News Notes*, issued by the Savannah Public Library, while the *Booklist of Revised Braille Grade One and One-Half*, published by the A. L. A. Committee on Work With the Blind, and *News Notes of Government Publications*, issued by the Boston Public Library in connection with its new documents information department, have completed their first year's service.

★ ★ ★ ★ ★ ★ ★

LIBRARY work abroad and at home are described in "Les Livres à la Guerre," a translation of Theodore Wesley Koch's "Books in the War," with additions including a preface by Marshal Foch. "Some Principles of Business-like Conduct in Libraries" are discussed by Arthur E. Bostwick in a pamphlet in the A. L. A. Handbook series, and nearly sixty of his essays and addresses many of which have been contributed to library and other periodicals, have been collected and published in two volumes under the titles "A Librarian's Open Shelf" and "Library Essays." Frances Jenkins Alcott's "Story-Telling Ballads" forms a companion volume to her "Wonder Garden," published in 1919, as does Morris Jastrow's "The Book of Job" to his "Gentle Cynic." In "The New World Order," Frederick C. Hicks discusses international organization. Henry E. Dunnack's "Maine Book" may lead to similar compilations which will answer many of the questions addressed to the information divisions of other state libraries.

AMONG the most important bibliographies is "2400 of the year's Business Books," a third edition with many new features of "1600 Business Books," prepared by Linda H. Morley and Adelaide C. Kight. The Newberry Library completed the publication of two lists begun in 1918: one on English poetry and one on the book arts. The New York Public Library brought out in its *Bulletin* a valuable list of New York almanacs of 1694-1850. Library of Congress reference lists include one on "The Treaty Making Power of the United States" and a second edition of the American and English genealogies of 1910. "The Booklist Book 1919," response to the demand for a short selected list of books, was published by the A. L. A., as was Sophy H. Powell's "Eight Hundred Useful Books." The A. L. A. has also reprinted a third edition of "The Buying List for Small Libraries," edited by Caroline Webster and issued by the New York State Library. Joseph L. Wheeler's after-war reading courses prepared for the A. L. A. were distributed by the federal Board of Education to newspapers and were thus widely circulated. Annie C. Moore's "Roads to Childhood" devoted to views and reviews of children's books, contains much valuable bibliographical material. "Industrial Democracy 1848-1919" is the subject of an extensive bibliography, compiled by the Library Employees Union of Greater New York.

★ ★ ★ ★ ★ ★ ★

MANY bibliographical publications on which work has gone forward during the year are announced for an early date, among them the check-list of "Pacific Northwest Literature," edited by Charles W. Smith; and a volume of descriptive summaries and bibliographies on "Modern Social Movements" by Savel Zimand, one section of which has been reprinted in the LIBRARY JOURNAL, while "The Union List of Serials in Libraries of the Middle West," edited by C. W. Andrews, and the Fiction Section of the Standard Catalog under the editorship of Corinne Bacon are in preparation. The A. L. A. Publishing Board has authorized many new items including a third and enlarged edition of Kroeger's "Guide to Reference Books" by Isadore G. Mudge, some material toward which was contributed to the last number of the LIBRARY JOURNAL; a second supplement to the "A. L. A. Catalog" to cover the years 1904-1920; "Viewpoints in Biography" by Katherine Tappert which will be a companion to Josephine Adams Rathbone's "Viewpoints in Travel" published in 1919; and a second "Booklist Book" covering 1920.

LIBRARY ORGANIZATIONS

WISCONSIN LIBRARY ASSOCIATION

THE twenty-ninth annual meeting of the Wisconsin Library Association, held at Madison, October 11th-13th, was unquestionably the most successful in point of members (registration 208) subjects considered and spirit prevailing.

COUNTY LIBRARIES

Harriet C. Long of the Library Commission opened the discussion on county libraries, basing her remarks upon her California experience. She urged librarians to believe in the possibility of the county library, to learn the needs and resources of the county and then to persuade the board and ultimately the people of the county. While heartily endorsing the state service, Miss Long summed up the advantages of the county service as follows: "The opportunity of borrowers to be near the main library; this personal service is the great reason why county service is better than state service. It is nearer the people and the people are nearer the books." Miss Long then propounded and met the criticisms and objections likely to be raised, and concluded her most helpfully suggestive paper by saying, "Let the movement for the county library come from the people of the county rather than from you. A few enthusiastic residents in various parts of the county can soon stir up action in a case like this. In many counties, the Red Cross chapters are now taking up library facilities as one of their aims. Get them interested in county library possibilities and they will be splendid agents to push the work. The county agent has excellent opportunity to help, in his visits to farmers in various parts of the county. Then, when the time comes to go before your county board, have enthusiastic, representative citizens from all parts of the county present their wishes. Whenever county boards feel that their constituents earnestly desire this county library, then will the county libraries come into existence; for county boards are elected at the will of the people and must heed their wishes."

Following Miss Long, A. L. Sawyer, president of the Menominee (Mich.) Library Board, told of the successful establishment of county library service by that Library.*

In discussing the social organization of the rural districts, Professor Kolb of the College of Agriculture, stressed the point emphasized

*A paper by Mr. Sawyer describing this forms the leading article in the December 15th LIBRARY JOURNAL.

by Miss Long, namely, that the demand for county libraries must come from the farmers themselves, rather than from the city people, and emphasized the need of rural work—in which the county library is included—and the awakening realization of this need by the farmers themselves, as evidenced by the Farmers' Bureau, the American Society of Equity, the Non-Partisan League and the thirteen hundred rural social organizations listed in his office.

The report of the Committee on County Libraries was presented at this session and at a later business meeting adopted by the Association as a basis for legislation at the 1921 session. Suggestions from the floor were referred back to the Committee for further consideration before the actual drafting of the bill.

The following is the suggested plan accompanying the report and adopted as a basis for drafting for legislative action:

ORGANIZATION

County boards may create, establish and maintain a public library system for the county; appoint a board of not more than five, including county superintendent; erect or purchase necessary buildings and acquire and maintain all necessary material, or acquire and take over an existing library, with consent of authorities controlling the same; make and enforce all necessary rules and regulations for use, management and preservation of library system.

Or county board may contract for service of existing library. (Section 43.31.)

Or county board may appropriate to an existing library rendering extension service in county. (Section 43.31.)

County board extending financial aid to an existing library in return for service shall appoint a representative on the library board whenever such aid equals one sixth of net annual income of library. (Section 43.31.)

SUPPORT

Or county board may levy and collect a tax for maintenance of public library system. Upon application any taxing unit may be exempted from this tax if it is already expending for library service an amount at least equivalent to the amount which it would have to pay if taxed for the county system.

By contract or appropriation, as above provided. (Section 43.31.)

In its discretion, a county board expending money for a public library service may provide for charges back to each town, city or village a share of such money in proportion to the service rendered, as is now provided in the Milwaukee law.

STAFF

County board may provide for appointment by library board of necessary library staff and employees, and for fixing compensation.

In case of use of existing library staff is appointed as now by library board. (Section 43.29.)

If certification law is adopted, the librarian in charge of a new county system shall hold a first grade certificate.

COUNTY TRAVELING LIBRARY

A county traveling library system established by the county under the old law (Section 43.17) may be discontinued and its property turned over to county library system established under this law, upon vote of the county board.

ADVICE

The Free Library Commission shall give advice and assistance in the establishment and administration of county library systems. (Section 43.09.)

REPORT

County library shall report to the county board and to the Free Library Commission. A local library rendering county service and receiving financial aid shall report to the county board.

EXISTING LIBRARIES

Existing public and school libraries may be affiliated with county system under contract. (Section 43.31.)

TEACHER-LIBRARIANS

In opening the discussion on the teacher-librarian, O. S. Rice of the State Department of Education called attention to the enrichment of the course of study both in the graded schools and the high schools during the recent past. "Hardly a generation ago," he said, "physiology and hygiene were made part of the common school course of study and the same is true of physics. These subjects now have an assured place in all schools. Similarly in the high school domestic science and manual training have even more recently found a place." Mr. Rice then suggested that the time has come for school librarians and instruction in the use of books and libraries to be given an assured place in our school system.

Following, Mary D. Bradford, superintendent of the Kenosha schools, dealt with the value of the high school library as demonstrated by the service of the Kenosha High School, established with a trained librarian in charge only a year ago. The library facilitates the "problem method" of teaching in history and other subjects, and gives assurance that when work requiring the use of the library is assigned, the books are accessible to the students.

Ruth Rice, librarian of the Madison High School, supplemented Mrs. Bradford's theme by a paper on the present high school situation in the United States. This paper was based upon a questionnaire sent to all trained high school librarians in the United States and upon a paper covering the same subject presented by Irma Walker at the meeting of the library department of the N. E. A. at Salt Lake City. One of the striking situations disclosed was that of the 12,000 high schools in the United States only about three hundred have a high school librarian in charge, or a librarian or a teacher-

librarian who has had even a minimum of library training, and that nearly a third of these schools are located in Wisconsin. About sixteen per cent of the high school librarians are employed either by the public library or jointly by the library and the school.

STANDARDIZATION AND CERTIFICATION

The Committee on Standardization and Certification presented its report thru its chairman, Mary A. Smith of Madison. This report is printed elsewhere in this issue.

SALARIES

Clarence B. Lester gave facts and figures of Wisconsin librarians' salaries, which compared the salaries paid in 1918 and 1920, taking the highest, lowest and average percentage of increase. Cities were grouped according to population (census of 1910) as follows: A, 25,000 or over; B, 10,000 to 25,000; C, 5,000 to 10,000; D, 2,000 to 5,000; E, 1,000 to 2,000; F, under 1,000. It was found that in cities A to D, inclusive, the percentage of increases ranged from 56 to 88: A, 56; B, 74; C, 88; D, 55.

The percentage of increases in the book budget for the same period was about one to four per cent.

WORK WITH CHILDREN

In the discussion of library work with children, under the leadership of Mrs. T. E. Coleman of Madison, interest centered upon co-operation and publicity for the coming Children's Book Week. Miss Canton of Racine, told of the close co-operation between her library and McClurg, of Chicago, during the Book Week of 1919; Miss Dousman, of Milwaukee, of the Boston Stores' co-operation with her, and Miss Buest of work in LaCrosse where the book seller took the suggestive book list prepared by the librarian for her exhibit, and ordered titles; at the time of the exhibit orders were taken from the parents by the library and sent to the book shop.

Many excellent suggestions were made and the general conclusion arrived at was that a library's value in Children's Book Week was as a publicity agent for the book seller, a link between the parent and the book seller.

ROUND TABLES

Round tables were conducted by Lilly M. C. Borressen for "larger librarians," Jessie Wellas for "smaller librarians," Walter M. Smith for college and normal school librarians, and William J. Anderson for trustees.

The trustees section discussed the financing and advertising of the library. Mr. Dexter of Elroy, presented a plan for stimulating interest which had been successfully tried out in Elroy

and may be helpful as suggestive to other communities. Prizes were offered for the best essays of one hundred words or less by high school students on the subject, "What the library has done for me," and the best essays were published in the local papers. It was moved by Mr. Dexter and carried: That it was the sense of the meeting that salaries of head librarians should be on the same scale as salaries for high school teachers. It was further moved by Mrs. F. W. Dickey, and carried: That the trustees present go on record as in favor of raising the standard of qualifications of librarians.

Lilly M. E. Borrissen, chairman of the Committee on Change in Membership of the Wisconsin Library Commission, presented the following amendment:

"The Free Library Commission shall consist of the president of the State University, the State Superintendent of Public Instruction, the Secretary of the State Historical Society and two additional members appointed by the Governor for a term of five years each. One of these additional members shall be appointed by the Governor from a list of three names submitted by the State Library Association, on or before January 1st of each year in which an expiration of the term of any such member of the Free Library Commission shall occur."

Among other topics discussed were: "Dollars and Ideals," by John H. Leete of Pittsburgh; the relation of various state departments and other service to the citizens of the state thru the channels of the public library, by Mrs. Glen Turner of the State Board of Education; the work of the Community Council, by Mrs. E. C. Thompson; the value of education and the debt due to libraries, by Henry Churchill King, president of the Oberlin University, and the writing of the history of the present, by Professor F. L. Paxton of the University of Wisconsin.

Mr. Dudgeon moved that a Legislative Committee be appointed to look after measures pertaining to library welfare during the coming session. Motion carried.

At the business meeting there were adopted a resolution of regret of the death of Charles McLenegan of Springfield, last year's president of the Association, and resolutions of thanks to all who had contributed to the success of the meeting. The following officers were elected for the coming year: President, Gladys M. Andreosos, Marinette; vice-president, Edith K. Van Eman of Oshkosh; secretary, S. J. Carter, Milwaukee; treasurer, Marian E. Bryant of Chipewa Falls.

CAROLINE W. D. VOSWINKEL,
Secretary.

NEW JERSEY LIBRARY ASSOCIATION A CORRECTION

To the Editor of the LIBRARY JOURNAL:

May I correct a statement on page 1038 of the LIBRARY JOURNAL, December 15.

At the meeting of the New Jersey librarians last November, Miss Pratt of Passaic asked me a question about the salaries of graduates of any of the library schools belonging to the Association of American Library Schools. After answering it I spoke of the relation of local salaries to local expense as suggested in the personal budget itemized in the report of the Committee of Standardization and Certification to the New York State Association, and the practicability of the application of some of the suggestions in that report to conditions in New Jersey.

Evidently thru some misunderstanding my words were reported as applying to conditions in New York city.

I also spoke of the courses in the Library School of the New York Public Library which are open to experienced librarians, saying that the continuance of such courses would, of course, depend upon the use made of them. I did not speak of the advanced courses which lead to the School diploma and which have been an intrinsic part of our school work since its foundation.

MARGARET JACKSON,

*In charge of open and of advanced courses.
Library School of the New York Public
Library.*

AKRON LIBRARY CLUB

THE Akron Library Club has just completed its first year's activity. The object of the club is to increase good fellowship among its members, promote professional spirit and foster public interest in library matters. Monthly meetings have been held during the year with the exception of the summer months.

The officers are: President, Joseph A. Cushman; vice-president, M. Pauline Edgerton, and secretary-treasurer, G. M. Shorthill.

NORTH DAKOTA LIBRARY ASSOCIATION

THE fifteenth annual meeting of the North Dakota Library Association was held at Jamestown, September 20th and 21st.

Clarence B. Lester, director of the Wisconsin Library Commission and representing the A. L. A. spoke on the "Outlook of Library Development." Clara F. Baldwin, library director of the Minnesota Department of Education, gave an able and practical address on the "Why

and How of County Libraries," a subject of special importance to the Association which is working steadily toward the establishment of County Libraries. Blanche Hedrick, director of the North Dakota State Library Commission, spoke on the present aims and future needs of the library commission.

Margaret Green of Minot, chairman of the County Library Law Committee, gave a report of the proceedings of that committee and read a draft of the new library law to be placed before the Legislature this Winter, which will include a complete revision of the old law and allow for the establishment of county libraries in North Dakota.

Clara A. Richards, librarian of the Masonic

Grand Lodge Library of Fargo, explained the constructive work of that library in a delightful paper.

Inspiring and able addresses were made by William E. Roe of Jamestown College on "The Librarian in the Present Crisis," and by Professor T. J. Golightly, also of Jamestown College, on "The Library and the Modern Educational Ideal."

The following officers were elected: President, A. D. Keator, Grand Forks; vice-president, Clara A. Richards, Fargo; secretary-treasurer, Florence H. Davis, Bismarck.

The meeting for next year will be held at Bismarck.

HELEN GRIFFITHS, *Secretary*.

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department

POSITIONS OFFERED

Wanted, cataloger. Salary \$120 to \$125 a month. Library school training and experience desired. Address Public Library, Seattle, Wash.

Wanted, in a western city of 15,000, a children's librarian. Give age, qualifications, references. Address: B. M. 2, care of the LIBRARY JOURNAL.

There is a vacancy in the catalog department of the Kansas City, Missouri, Public Library. Applicant must be good at detail and revision. Salary \$1500.

The Adriance Memorial Library of Poughkeepsie, N. Y. wishes the services of a cataloger. Experience absolutely necessary and library school training desirable. Apply, giving full information, to the Librarian.

A library in New York City wants an assistant who has a knowledge of the Dewey classification and experience with library shelves. Salary \$1500 to \$1800. Address D. G. 2, care of the LIBRARY JOURNAL.

Wanted, a first assistant in the reference department who has had one year of library school training. Initial salary \$1300, annual increase \$100 to \$1500. Address: Henry N. Sanborn, librarian, Bridgeport Public Library, Bridgeport, Connecticut.

Wanted, cataloger and reviewer, in a professional library in New York City. Experience with financial and economic literature required. Must possess initiative. Give full particulars,

including salary desired and religion. Address: M. G. 2, care of the LIBRARY JOURNAL.

POSITIONS WANTED

University and library school graduate with five years' experience seeks special library or editorial position in New York, Boston, or Chicago. Address: M. M. 2., care of the LIBRARY JOURNAL.

College woman, with nine years' library experience and special work with children, desires new connection. Details of service and recommendations sent upon request. Address: S. E. G. 2, care of the LIBRARY JOURNAL.

College man, with five years' library experience, including junior year 1916-17 at New York State Library School, and with knowledge of foreign languages, desires position preferably in a law, business or college library. Address: G. V. M., care of the LIBRARY JOURNAL.

A librarian who has had a college education and library school training, in addition to six years' administrative work, wishes a change of position. Would like a position as librarian or head of a department in a library in Iowa, Wisconsin or Indiana. Address: A. Y. E. 2, care of the LIBRARY JOURNAL.

A trained librarian holding A. B. degree would like to change location. Has had five years experience in cataloging and reference work in college library of 200,000 volumes, and six years' experience as librarian of small city library of 30,000 volumes. Address G. M., care of the LIBRARY JOURNAL.

How Shall We Make

an

American Citizen ?

Compiled by Margaret Swain Pratt

NATIONAL COSTUMES of the SLAVIC PEOPLES

This book gives accurate studies of Slavic life and costumes in all their wealth of detail. Text describing the materials of the costumes accompanies the drawings. Keyed references to the chart of true Slavic colors make the book as serviceable as a far more costly book of colored plates.

In addition to the charts there is given a list of the holidays and festivals of the Slavs—and the whole book is compiled with the idea of giving to workers with the foreign born a greater respect for the art of the Slavic nation by giving them a better knowledge of the people's customs.

For any who are interested in producing plays or pageants, this book will be indispensable as it is the only one of its kind.

IN THE LIBRARY WORLD

MASSACHUSETTS

Malden. During the year ending December 31st, the Public Library circulated 291,028 volumes for the use of a population of 49,100. This represents an increase of 54 per cent in circulation and of ten per cent in population during the past ten years. Of the total circulation 69,802 volumes were issued by two branches open three times a week from two to half past eight o'clock: the Maplewood Branch (with a book stock of 2800 volumes) circulating 44,089 at a cost of \$2276, and the Linden Branch (book stock 1500) issuing 25,713 at a cost of \$1548. Expenses, including those of branches totaled \$28,879, divided as follows: Salaries, \$15,889; purchase of books and magazines, \$5,765; binding, \$1760; light and fuel, \$2112; miscellaneous, \$2674. Accessions for the year were 3470 and the total number of volumes in the Library is 76,352.

NEW YORK

Rochester. Annual appropriations made by the city for the Rochester Public Library show a steady advance from \$10,000 in 1911 to \$83,931.70 in 1918, with \$94,000 derived from local taxation in 1919, as evidenced in the library's recently published "Seven Year Survey." Six branches, all in temporary quarters, have been opened: three in city-owned buildings, one at Exposition Park in a building formerly belonging to a state reform school, one in the Municipal Building, and one at Charlotte in an old fire house. The Library employs 40 full-time employees, all appointed in accordance with municipal civil service rules. Of the regular staff 18 are college graduates and fifteen have had a year or more of library school training.

Buffalo. The report of the Grosvenor Library for its sixty-first year (1919-1920) shows gratifying activity. The attendance in the medical and main buildings totaled 39,252, being an increase of 10,393 over the attendance for 1918-19. Purchases (7592) and donations (1648) added 9240 volumes to the library, bringing the total number of books up to 138,958. Expenditures for salaries were \$20,882; for maintenance and operation, \$24,713; and for book collections, \$21,350.

Ogdensburg. The estate of George Hall has made an offer to the trustees of the Public Library to erect a fire-proof library building on the site of the present library and also to transfer to them the residence of the late George

Hall to be used as a Gallery for the paintings and bronzes and the Indian collection presented by the late Mrs. Frederic Remington to the Library. The offer, involving some \$100,000 expenditure, is made on condition that the town provide for the maintenance of the building, which would require little more than is required for the upkeep of the present building. The income from a trust fund given by Mrs. Remington will be available for maintenance use.

Brooklyn. The newly organized Brooklyn Public Library Staff Association held its first meeting on the morning of December 23. Officers for 1921 are: Theresa Hitchler, superintendent of the Cataloging Department, president, and Fannie C. Boies, secretary.

The Staff Committee reported on the desirability of librarians being included in the New York City Employees' Retirement System. After a discussion of pensions and retirement systems, Hedwig Roghé and Miss Mathews were appointed as a special pension committee to continue investigation of the question.

Brooklyn. The Pratt Institute Free Library reports for the year ending June 30th: Volumes lent for home use to 4790 borrowers were 220,830, of which 126,977 were fiction. Prints lent for home use totaled 5279. The total number of registered borrowers is 59,232, and the number of persons using the Library for reading and study was 64,236. Expenditures were: Salaries, \$29,798; purchase of books, \$6018; periodicals, \$1109; and binding, \$1144. At the beginning of the year there were in the library 120,834 volumes; 4145 were added by purchase; 431 by gift or exchange and 226 by binding; 2189 volumes were lost or withdrawn during the year, making the total number of volumes at the end of the year 123,696.

PENNSYLVANIA

Philadelphia. The Drexel Institute Library School Alumnae Association held its annual dinner on December 6th, at the College Club, Philadelphia. Twelve members were present at dinner with several additional persons in attendance at the business meeting which followed it.

Officers elected for the coming year are: President, Mary P. Farr; vice-president, Mrs. Theodora C. Blodget; secretary, Susan Edith Black; and treasurer, Caroline B. Perkins.

A letter was read from George B. Utley acknowledging the gift of \$50.00 for the A. L.

FOR PUBLIC, COLLEGE AND SPECIAL LIBRARIES

THE HISTORY OF CUBA

By Dr. Willis Fletcher Johnson, of New York University

Tells all about Cuba, History, Politics, Industry, Commerce, Finance and everything else. One volume devoted exclusively to the resources and business possibilities of Cuba.

THE HISTORY OF CUBA reads like a romance—it doesn't possess a dull line, and it is loaded with facts.

"A notable addition to the annals of the continent."—*Cleveland Plain Dealer*.

"Covers the entire range of Cuban History."—*New York Times*.

"A scholarly and comprehensive presentation of a subject until now neglected. Invaluable for the use of American capitalists and men of business."—*Boston Transcript*.

COL. GEORGE HARVEY writes of Dr. Johnson's work:

"It is of special interest as an introduction to all American history, showing, as it does so clearly, the essential relation between Cuba and the settlement and political development of this Continent, and also the close connection that there has been from the earliest times between Cuba and the United States. Your comprehensive exposition of the present state of Cuba, in politics and in economics, seems little short of indispensable to anyone who wishes to know what that country really means to the United States and to the world."

Profusely Illustrated and Richly Bound

COL. JAMES HILTON MANNING,

President The National Savings Bank, Albany, N. Y.

"To readers and students it provides the essential key to the whole history of the Western Hemisphere, while to men of affairs and to the industrial, commercial and financial interests of the United States it is an indispensable work of reference upon both the history and the varied resources of Cuba. It is the one available source of the authentic information which Americans need concerning their sister Republic."

It is interesting to note that, while the Drexel Institute Library School has ceased to exist as a school, it has more than seventy active members in its alumnae association.

SUSAN EDITH BLACK, *Secretary.*

DISTRICT OF COLUMBIA

Washington. During the year ended June 30th, the Public Library of the District of Columbia served a population of 437,571 (census of 1920) thru 154 agencies consisting of the central library, 1 branch, 1 college, 1 university, 127 schools, 19 stations, 3 home libraries, and 1 playground. Volumes lent for home use totaled 898,513, of which 511,782 were works of fiction, and prints lent numbered 66,849. 15,853 adult borrowers and 3688 children registered during the year, bringing the total number of borrowers up to 61,627. Receipts amounted to \$143,169 of which \$128,464 were derived from Congressional appropriation (one half from the Federal Treasury and one half from the District of Columbia), \$8664 from fines and \$1463 from the duplicate pay collection. Of this sum \$85,520 were expended for librarians' salaries, \$9804 for janitor service, \$17,156 for books, \$1937 for periodicals, \$8737 for binding, heat, \$2091, light, \$3303, and other maintenance, \$10,134. The staff numbers 98 persons, 51 of whom are professional, 8 on the administrative and clerical staff, 21 messengers and pages; 13 on the building force and 5 bookbinders.

There were 216,270 volumes in the library at the beginning of the year; 17,199 were added by purchase, 2241 by gift or exchange, 221 by binding, 12,415 were lost or withdrawn, making a total of 223,516 volumes in the Library at the close of the year. The valuation of the Library property (exclusive of the site) is \$650,000.

WISCONSIN

Madison. The report of the library of the Wisconsin Historical Society shows that in 1919 both the total number of accessions and the number of volumes of newspapers added were the greatest for any year in the Society's history, notwithstanding the decreased purchasing power of the book appropriation. In the Newspaper Division there are 25,433 volumes of American newspapers; 1517 volumes of English papers; 605 volumes of foreign papers (other than English); and 420 index volumes. Four hundred and fifteen volumes of American papers are of earlier date than 1800, and 409 more fall within

the years 1801-1820. The best informed authority in the country on early American newspapers has given the informal opinion that if the year 1800 be taken as a closing date, the Society's collection of American newspapers ranks fourth, and if the year 1820 be taken, third in importance among existing collections.

Milwaukee. At its December monthly meeting the Milwaukee Public Library Board voted to grant three weeks leave with pay, in addition to the regular vacation, to not more than six members of the staff who desire to take a six weeks summer course in library science at the University of Wisconsin or at some other accredited school, the selection to be made by the librarian from those who have served acceptably at least one full year in the library.

MICHIGAN

Detroit. So many unemployed men are spending their time at the Public Library main building and branches that it has been decided to set apart any room that can be spared not only for library purposes but for social and recreational activities as well. The demand on the facilities and accommodations of the library exceeds any previous experience, and the percentage of men visiting the buildings exceed any showing during recent years.

WASHINGTON

Tacoma. At its meeting December 23rd, the Board of Trustees of the Tacoma Public Library adopted the following salary schedule for the year 1921 and revised its rule relative to salary increases as follows: "If service is satisfactory in every way salary increases may be considered as ordinarily automatic within a given grade, provided that in the judgment of the Board the budget will permit the increase."

The new salary schedule adopted beginning January 1st, 1921, is as follows:

	<i>Monthly.</i>
Heads of departments	\$130-\$175
Heads of divisions }	\$105-\$130
Branch librarians }	\$100-\$120
First assistants }	\$ 75-\$100
Senior assistants	\$ 75-\$100
Junior assistants	\$ 75-\$100

Hereafter annual increases when granted shall be uniform thruout the staff and at the rate not to exceed \$90 per year.

The budget of the Library for the year 1921 will total \$60,834.

BIBLIOGRAPHICAL NOTES

The library of Millard Fillmore, thirteenth President of the United States, forms the second of a series of articles about the private libraries of Buffalo, begun in the June number of the *Grosvenor Library Bulletin*.

The December number of the *National Municipal Review* devotes its department of publications to a bibliography on Civic Literature compiled by Rebecca B. Rankin, New York Municipal Reference Librarian.

Recent reprints from the *Bulletin of the New York Public Library* are Frank Weitenkampf's "Christ in Art," being notes on the John Powell Lenox collection, followed by a list of references; and Elbridge Colby's "The Echo-Device in Literature," which appeared in the Nov.-Dec. issues of 1919.

The Booklist of Revised Braille, Grade One and One-half, v. 1, no. 3, has just appeared. This list includes all books (about 70) which have been issued since the earlier number of this booklist was published [April, 1920]. About a dozen of these titles have been published thru the efforts of the A. L. A.

A new and revised edition of the four lists "What Shall We Read Now?" for grades 1-2, 3-4, 5-6, and 7-8 has been published by the H. W. Wilson Company. The revision has been done by Mildred Maynard of the children's department of the East Orange (N. J.) Public Library.

The American Social Hygiene Association issues monthly notes on recent publications dealing with social hygiene, in the hope that librarians and other book buyers may find them of assistance in selecting books in this field. Detailed evaluation of any book listed will be sent on application to the Association.

A "Guide to the Use of Libraries," a manual for students in the University of Illinois, prepared by Margaret Hutchins, Alice S. Johnson and Margaret S. Williams, is intended to serve as a textbook basis for problems in the course on the use of books and libraries as given at the University for freshmen and sophomores. It is in its present form a development from outlines and lecture notes used in this course for a number of years past.

As a souvenir of the Pilgrim Tercentenary celebration the Free Public Library of Jersey City has published a twenty-page pamphlet giving a brief history of the Pilgrims and the founding of the Plymouth colony. This pamphlet was compiled by the Librarian for the use of the schools. It was distributed in large numbers in the local schools where it was used by the teachers and children in studies and exercises connected with the celebration. The Library has also published a twelve-page reading list on the Pilgrims. Libraries may obtain copies of these pamphlets on request.

"The History of the New York Public Library" Chapter 5, by Harry Miller Lydenberg, appears in the November, 1920, *Bulletin of the New York Public Library*. Previous chapters of this history, which have already appeared in the *Bulletin* are: "The Astor Library," July-August, 1916; "The Lenox Library," September, 1916; "The Tilden Trust," February, 1917; "New York Free Circulating Library," April, 1917. The publication of part five, which deals with the Harlem Branch, fittingly coincides with the end of the first quarter century of the New York Public Library.

"A List of Books and Articles, Chiefly Bibliographical, Designed to Serve as an Introduction to the Bibliography and Methods of English Literary History," compiled by Tom Peete Cross, designed primarily to serve as a basis of observations by the instructor and as a guide to students in Bibliography and Methods of English Literary History in the Graduate School of the University of Chicago, will prove useful to other investigators also. An introductory list covers books and articles on bibliography. This is followed by one on treatises on methods of research; then come universal bibliographies, bibliographies of bibliographies, general catalogs; periodicals and society publications, dissertations, encyclopedias and lists of reference books; biography, anonymous and pseudonymous literature and auxiliary subjects—comparative literature, folklore myth and custom, and history. The sections on literature are subdivided into bibliographies and treatises arranged by period and by type. Numerous cross references, an index, a good choice of types and an abundance of blank paper interleaved with the text contribute to making this compact little book attractive.

LORD, Marion R., formerly of the Boston Public Library, and recently chief cataloger and assistant to the librarian of the Quartermaster's Library of the United States War Department, has joined the staff of the H. W. Wilson Company as indexer for the *Industrial Arts Index*.

NOLAN, Edward James, for fifty-eight years recording-secretary and librarian of the Philadelphia Academy of Natural Sciences died on January 9th, aged seventy-four. Dr. Nolan was a member of the American Medical Association, the Philadelphia Art Club, the College of Physicians and a charter member of the A. L. A. in which he numbered many friends.

RANDALL, Marie, 1914 S., instructor in the Library School at Simmons College, resigns February 1, but will return during the third term to carry the course in public documents and to give some lectures in the special libraries course.

RAY, Mary K., 1908 W., of the Nebraska State Library appointed assistant in the Law Department of the California State Library at Sacramento.

TOOMBS, Helen, 1909 S., appointed head of circulation at the State College of Washington at Pullman.

WOOTTEN, Katharine Hinton, formerly librarian of the Carnegie Library of Atlanta, Ga., and more recently on the library staff of Smithsonian Institution, appointed librarian of the Air Service Library, War Department, Washington, D. C.

AUTOMOBILE ELECTRICAL SYSTEMS

By MORETON and HATCH

This book gives a complete discussion of all of the various starting, lighting and ignition systems as found on the many different makes of motor cars.

The first chapter is devoted to a detailed and systematic discussion of the proper method to be followed in reading wiring diagrams so that each and every electrical circuit on the car may be easily traced.

The F. A. starting and lighting system, now standard equipment on the Ford car, is described in detail.

The many different standard makes of electrical equipment are described and many special wiring diagrams are given to illustrate the actual installation. A chapter is devoted to maintenance, repair, testing equipment, locating faults, etc.

Special electrical specification tables are given for all makes of cars and for different years, so the owner or repairman may easily select the proper replacement parts, such as lamps and fuses, without any guesswork.

PRESS NOTICES.

CHRISTIAN WORLD—This is a timely, impersonal, dispassionate, analytical unanswerable discussion of the weaknesses and inconsistencies of the Christian Science Church. It overflows with facts which provide the ground-work of the author's incisive argument . . . and is as clear as sunshine and as irrefutable as the decalogue.

THE EVANGELICAL MESSENGER—The spirit in which his exposures of inconsistencies in the organization are made is very commendable, and adds merit and pungency to his arguments and forceful statements. It is the only book of its kind on the market as far as we have any knowledge.

Raffia Basketry as a Fine Art

Ashley—\$2 00

Basketry in its highest development is described in the above. Beautiful colors and interesting designs are shown in the many illustrations. Many copies sold in Camp Libraries or wherever Basketry is taught.

BOOKS.—All out-of-print books supplied, no matter on what subject. Write us. We can get you any book ever published. Please state wants. When in England call and see our 50,000 rare books. **BAKER'S GREAT BOOKSHOP**, 14-16 John Bright Street, Birmingham, England.

FOR LIBRARIES

The **BISSELL** ELECTRIC SUCTION CLEANER

The BISSELL presents the most thorough and inexpensive method for cleaning libraries.

Dirt, that collects on floors trod by many feet; books, that pass from hand to hand; dust, that settles on tables and shelves, are a menace to health. The only way to clean *thoroughly* is to *suck up all the dirt*.

With the BISSELL you can clean every part of the library without moving the furniture. It is light and easily portable. Women operate it readily.

You have 100% of the power right at your work; all the power of the stationary plant, but none of its disadvantages.

You can take up pins, hairpins, clips and bits of paper and other objects without harming any part of the machine.

Write to-day for a demonstration. Our nearest representative will get in touch with you promptly. This incurs no obligation to buy.

We are in no way connected with the Bissell Carpet Sweeper Company, Grand Rapids, Mich.

Reduction in Prices

Owing to better labor conditions, a slight decrease in the cost of raw materials and the installation of improved machinery, we are able to announce a reduction in prices on the following supplies: All pamphlet and magazine binders, book cards, book pockets, book marks, mounting papers, posters, and many other items.

This does not necessarily mean that all prices will be as low as those quoted in our No. 23 Catalog of Library Supplies issued in June, 1920, but there will be a substantial downward revision from the "increase in price" sheet which went into effect last October.

All orders received after February 1st will be entered at the reduced rate.

Fifth Annual Edition

Montgomery's Tax Procedure, 1921

- Vol. I Federal Income Tax Procedure 1921**
Vol. II Federal Excess Profits Tax Procedure 1921
Vol. III New York State Income Tax Procedure 1921

**Answer Any Tax Question
Immediately**

These volumes bring together for instant reference, the law, Treasury Department rulings and interpretations, Court decisions, accounting procedure, and Mr. Montgomery's invaluable personal counsel on hundreds of doubtful points. Each of the volumes will give instantly, a definite, reliable answer to any tax question. Mr. Montgomery is a Certified Public Accountant and an Attorney-at-law. His work is the pre-eminent authority and the product of unremitting study of and practical work with the tax laws.

**Of Definite Usefulness In
Every Public Library**

For four years, this work has been depended upon by thousands of business men. They have come to rely upon its clear, authoritative guidance in the preparation of tax returns. The 1921 manuals are entirely new and contain many 1920 Treasury Department rulings and Court decisions. The library which is equipped with these volumes, will add to the definite usefulness of its service to business men. Every Public Library should have a set of Montgomery.

Send for and Examine These Manuals

We will send these manuals to librarians for thirty days' examination. They may be returned within that time if they are not entirely satisfactory. Prices: Volume I (1200 Pages), \$8.00; Volume II (400 Pages), \$4.00; Volume III (450 Pages), \$5.00. Volumes I and II together, \$10.00. The complete set, \$15.00, subject to Library discount. Order from your bookseller or direct from us.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Sources and Responsibilities for Public Library Revenues*

I. BY SAMUEL H. RANCK

Librarian of the Grand Rapids Public Library

EVERY civilized nation in the world to-day is seeking, every responsible financial and governmental official everywhere is thinking about, new sources of revenue, new ways of raising more taxes, in order to meet the existing and the growing needs for public expenditure. The pressure of the burden of greatly increased and increasing public expenditure and the necessary taxation it involves, are just beginning to be felt by the masses of the people of this country. So let us begin by trying to realize our present condition with reference to taxes and compare the condition at the end of 1920, with that of 1914, before the war. In any consideration of revenues for libraries we must recognize these new conditions, for in matters of taxation we can get somewhere only by keeping our feet on the ground, by knowing and understanding the facts. Otherwise we get nowhere, or into far greater difficulties than those that now confront us.

In this paper I shall first of all, try to make you visualize the increase in taxation in this country in terms of people and work, and what this means to the people who pay taxes and to institutions supported by taxes; for we are dealing with fundamental facts that reach into the pocket-book, and often into the mouths, of every man, woman and child in the United States.

I shall present to you a study of the increase in taxation in the city of Grand Rapids, in the County of Kent, Michigan (of which Grand Rapids is the county seat), in the State of Michigan, and in the United States as a whole, from 1914, to the last year for which accurate data is available, either 1919 or 1920. I take Grand Rapids, Kent County, and Michigan because I know most about them, and because I think they are approximately an average of the

country as a whole, for there are many cities, counties and states where the per capita rates of taxation are very much higher, as well as others that are lower.

First of all let us remember that taxation, in and of itself, is not necessarily an evil, even the many may so regard it, especially when they get their tax bills. Taxes support government, and when wisely expended such money is the most fruitful, the most productive of good results, of any money that can be spent. As someone has remarked, the chief difference between the civilized man and the savage is that one pays taxes and the other does not. It is not the size of one's tax bill that is of importance, but what really matters is whether the taxes collected are spent in a productive or a destructive way, whether they increase or decrease the happiness, the welfare, and the productive power of the people as a whole.

The per capita taxation for municipal purposes in the city of Grand Rapids in the year 1914 was \$15.34, based on the population of that year. The amount of money per capita levied for city purposes in 1920 was \$28.69, almost double that of 1914. This means that the average taxation for Grand Rapids alone, in terms of families (the average family being recognized as five), last year was \$143.45, an increase in these six years of nearly \$70 per family for city purposes only.

The corresponding figures for Detroit are 1914, \$21.21; 1920, \$35.31, as the per capita taxation, an increase of a little over \$70 for the average family. This is an exceedingly good showing when one remembers that Detroit in the last decade has had to take care of one of the most extraordinary growths of population in a large city ever seen in this country, the population more than doubling in the decade. The foregoing does not include the amount of money raised from licenses, fines, special im-

*Paper read before joint meeting of the A. L. A. Council and the League of Library Commissions.

provement taxes (street, sewers, etc.) levied directly on the property in the district benefitted, etc., and other special taxes, but only what is put in the general tax budget.

The per capita taxation levied for county purposes in Kent County in 1914 was \$1.34; in 1920, \$3.23.

The state of Michigan in 1914 raised thru its general tax, and its specific taxes \$3.75 per capita; in 1920, \$7.33. This does not include indirect taxes, paid by the people no less than property taxes, such as licenses, etc.

It will be noticed from the foregoing that the per capita taxes for city, county, and state purposes as shown above are not quite double in 1920 what they were in 1914. The increased number of dollars collected is just about equal to the depreciated value of the dollar in 1920 as compared with 1914. Considering purchasing power the per capita taxation in 1920 was about the same, or if anything a little less, in 1920 as compared with 1914.

Let us now examine the taxation for the United States government. The total amount of money raised by the United States government from customs and internal revenue taxes (which include income and excess profits taxes) for the year ending June 30, 1920, was \$5,722,685,804. The total amount raised by taxation in 1914, was \$672,361,048.81—an increase in six years of over five billions of dollars. Putting this in terms of population, the per capita taxation for the Federal Government based on the population of 1914 was \$6.83 or \$34.15 per family. For the year ending June 30, 1920, it was \$54.13 per capita, (nearly 8 times as much as in 1914) or something over \$270 per family, an increase in national taxation in six years of \$47.30 for every man, woman and child in the United States, or \$236.50 per family.

Let us now summarize the taxes paid by the people of Grand Rapids (who, as already stated, fairly represent the average of the whole country) for the year 1920: \$28.69 for municipal purposes, \$3.23 for county purposes, \$7.33 for state purposes, and \$54.13 for the national government, making a total of \$93.38 per capita as the taxation for all purposes last year. Putting this in terms of the family as the unit, we have a total taxation of \$466.90 per family. The per capita increase in taxation from these four sources in the last six years is \$66.12, or \$330.60 per family, as compared with a total family tax for city, county, state, and national purposes of \$136.30 in 1914.

Stating this in another way the increase in taxation for the whole country in six years on account of the war, is more than \$1 a day for

the average family for every working day of the year. This is a great price to pay, but what we fought for was worth the price. However, we must not blink the issues that arise from paying the price.

Still another way of stating this is to say that the head of a family earning \$5 per day last year in Grand Rapids (and this is less than the average wage for adults in the state) had to work 94 days to pay his taxes, city, county, state and national, as compared with 27 days at the same rate of wages 6 years before. But as a matter of fact his wages were not more than about half six years ago, so that then it required about 50 days work to pay all taxes. Allowing for the difference in wages, it will be seen that the worker in order to pay his taxes contributed nearly twice as many days' work in 1920 as compared with 1914. Another way of stating this fact is to say that the wage earner head of the average family contributed in taxes one day's work out of six in 1914, and one day's work out of every three he worked in 1920.

Let me weary you with a few more figures in order that you may thoroly understand the enormous increase of the tax burden in this country in the last six years. There are two internal revenue districts in the state of Michigan with headquarters in Detroit and Grand Rapids. These districts collected in the fiscal year ending July 30, 1920, over \$283,000,000, or nearly as much as the total expenditures of the United States government for all purposes within the memory of some who are here today. The people of the state of Michigan contributed in taxation last year for the national government and for state, county and city government nearly as much as the total expenditures of the United States government in the year I graduated from college. Another way of stating this fact is to say that less than four million people in Michigan in 1920 paid nearly as much money in taxes as 65 millions of people paid to the United States government during the last year of the administration of Benjamin Harrison.

A few more words with reference to taxation before I go on to more interesting things. It will be seen from the foregoing that the great increase in taxation in this country in the last six years has been for the national government. It is worth while to stop for a moment to analyze the expenditures of the national government with this enormous amount of money that has been taken from the people, some \$54 per capita.

One of the most illuminating studies on this whole subject was that of Dr. Edward B. Rosa, of the Bureau of Standards, in an address before the Washington Academy of Sciences at the Cosmos Club in Washington last May, in which

he demonstrated that of the appropriations (I may add that the appropriations were almost equal to the collections, referred to above, and therefore for our purposes we may consider them as identical) of the national government for the fiscal year ending June 30, 1920, 93 per cent (92.8 per cent to be exact) was for war purposes, past, present and future, and 7% for public works, for the primary functions of government, and for research, education, and development purposes, this last group—research, education, and development—only one per cent. Putting this in other terms, over \$50 was collected for every human being in the United States by the national government last year for war purposes, past, present, and future and less than \$4 per person for all other purposes of the national government. Again putting this in terms of an average family of five, over \$250 last year per family was spent for war purposes and less than \$20 per family for all other functions of the national government.

In any consideration of sources of increased revenue for library and other educational purposes we must give most serious consideration not only to the possible sources of revenue old and new, such as income taxes, inheritance or death taxes, mining royalties, penal fines, licenses, general property taxes, the single tax, levies on capital, etc., for the non-remunerative enterprises of government, and the possibility of the government taking over and operating at a profit, for the purpose of lessening the direct burden of taxation, certain remunerative enterprises, such as transportation, mining, community heating, light, etc.; but we must also give most serious consideration to the way the present taxes levied on the people are being spent. The total per capita taxation in the United States in 1920 for city, county, state and national purposes outside of war purposes plus the total per capita taxation for national purposes in 1914, was less than the per capita taxation of the United States last year for war purposes, past, present and future. When we once get the masses of the people of this country to realize that the per capita expenses of the country for public libraries last year was 17c. and the per capita expenses for war purposes for the national government alone over \$50, I am sure that we shall find that decreasing war expenditures will be found to be one of the most fruitful sources of revenue for library and educational purposes.

I feel very strongly that everyone interested in the onward march of education and civilization must take a most vital interest in the whole problem of a world organization, which will cut out as soon as possible these enormous expenditures for war purposes which are just be-

ginning to sap the life blood of the people of the United States, and which have already sapped, yes, almost exhausted, the life blood of the people of many of the countries of Europe; for we must remember that in the long run taxes are paid out of production, and that when they become so burdensome as seriously to interfere with production, as is the case in a number of countries, the foundation of the state and of society is seriously impaired. The ultimate elimination of this war expense will be the greatest source of revenue for education and constructive social work that this or any other country can find. The salvation of our civilization, of mankind itself, demands its elimination.

Until some such solution is found for this problem of taxation we may rest assured that all questions of governmental expenditure will receive vastly more consideration in this country than ever before. Interested parties will put forth every effort to shift the direct incidence of taxation to a much greater extent than ever before, and we shall witness the greatest buck-passing game with reference to taxation in the whole history of our country. Some of these interests are going to set up a great "holer" about the cost of education and they will actively and secretly oppose every effort to increase taxation for schools and libraries because of the cost to the taxpayer, while at the same time talking loudly about 100 per cent Americanism and the need of increased appropriations for war purposes—for preparedness. Let us preach the gospel that the development of the common good is the best kind of preparedness, and that wealth in men—in people—is vastly more important than wealth in things, for educated, trained men and women are the real assets of a nation, in peace time as well as in war time.

It is only a few years ago that the United States adopted the income tax as a part of its fiscal policy (a tax that was fought tooth and nail for two decades) thru an amendment to the constitution and this is now the great sheet anchor of the national government as a revenue producer, for last year nearly four billion dollars was raised from this source and that of excess profits. States have taken up the income tax either by legislative enactment or by amendments to their constitutions, and others are considering it, inasmuch as they have found that the former sources of revenue do not have the ability to produce sufficient money for the purpose of government. In every method of taxation great consideration must be given to the ability of individuals and classes of property to pay, for there is a point beyond which higher rates of taxation produce less revenue or may be

even so high as to produce practically no revenue. As an illustration of this fact permit me to recall to you the circumstance that the state of Michigan a few years ago held more acres of land which had reverted to it for the non-payment of taxes than are contained in the whole state of Massachusetts.

Educational institutions—libraries, if you please—in many places are going to be confronted with the immediate problem arising from the high cost of idleness (for it costs nearly as much to maintain a man or a machine in idleness as at work), the idleness growing out of the slump in industry which will result in a great decrease in the ability to pay taxes, especially income taxes. In tens of thousands of cases this next year there will be no income subject to tax, or at best it will be a very greatly reduced tax. In raising taxes from income the power to produce is vastly more important than the amount of property owned. And here it may be remarked that the right use of the right kind of libraries adds enormously to the power to a community to produce, and therefore its ability to pay taxes. Mr. J. A. Hobson has happily expressed this idea in his recent work on Taxation in the New State, when he says, "The cultivation of the mind of the nation for the creation, selection and application of new productive ideas is the most profitable of all uses of revenue."

Public libraries in the past have depended almost entirely for their revenues on local general property taxes. In Michigan, school district libraries receive thru the action of the state constitution certain penal fines, but these are not regarded as taxes properly, for they are not spread upon the tax rolls, and they are at best a most variable and uncertain source of revenue. The local general property tax has always been, and is likely to be in the future, the main source of public library revenues. For this reason it is the business of the librarian to develop thru the service the library renders the community, the greatest possible local support.

I am not unmindful of the fact that many libraries in this country owe their establishment and sometimes much of their support to the gifts of buildings and funds for endowment or other purposes. The possibilities of library revenues from private sources, especially in the form of endowment funds with the income to be devoted to a specified purpose, are very great and I am convinced that very few, if any, libraries in the country have developed this source of revenue to its fullest extent. One need recall only the special funds which the Boston Public Library and the New York Public Library have received as gifts, to mention only two of the best

known institutions in the country which have been favored in this respect.

By way of further illustration of this thought I may add that in Grand Rapids we have already built up notable collections of books from gifts and the income therefrom on such subjects as books by and about American painters (which includes prints of their paintings), picture books in colors for children, reference works in political science, and Michigan history. On some of these subjects we have at this moment more income than there are books in sight to be purchased to absorb it. However, it is always advisable to have funds in hand for any special collection that may turn up. As a librarian there is nothing more delightful than to be able to purchase everything worth while on a subject, regardless of cost. There is also a great joy for a librarian to be consulted from time to time by persons making their wills. Such things fill one with "good hopes." Incidentally library trustees are in a better position than librarians to encourage people in the community to provide such funds for the library.

In a number of states there are grants for public libraries received from the state, tho the grants are usually a very small part of the revenue of a library of considerable size. As a general proposition such state grants should not be so large as to paralyze local effort. No community should depend wholly on money received from the state at large for its library support. The moral value of such grants is often greater than the mere financial aid they offer to the local library. Much may be said in favor of such grants, for they enable the state to exercise a certain supervision or control over library matters, fixing the minimum of library income or service just as it has done with the schools. Of very much more importance, however, is the fact that such grants tend to equalize the financial resources of the state, thereby enabling a community having a low per capita property value to get a service more nearly equal to that of a community having a high per capita property value.

The unit of library service and of library income should be the number of people to be served rather than the amount of property available for taxation purposes. Where the states have fixed a minimum income for library purposes it is always (I think I am still safe in saying *always*) on the basis of a percentage of the assessed valuation of property. This, of course has certain advantages, for it expands the library income somewhat automatically with the growth of the community in wealth, and it enables a library to plan several years ahead to the greatest economical advantage. There is,

of course, always the danger that such a minimum may become the maximum in actual practice. Many Carnegie libraries have been hampered in this way. A combination of these two ideas—basing the minimum income on the number of people to be served and on the assessed valuation—would be a happy solution.

Unfortunately most of the states having legislation with reference to the amount of money to be raised by taxation for libraries have limited the maximum amount that can be raised, sometimes having no minimum. State legislation on this subject should fix the minimum, leaving it to the local community, which pays the tax, to fix the maximum.

In every state there are vast differences of property resources in the several communities, as compared with the number of people in the communities, for wealth, as is well known, tends to concentrate in and around cities, and in some cities much more than others. State grants levied on all the property of the state equalize to a certain extent the ability to pay on the part of the various communities. The same argument holds true with reference to the national government, for the difference in the ability to pay on the part of the different states in the Union is very great, so much so that the amount of property per child available for taxation for school purposes in one state may be nearly twenty-four times as much as in another. This means that for every thousand dollars available for taxation purposes in some communities there are others where there are \$24,000 for each child. The child with the taxable income of \$1,000 does not have the same full and equal chance as the child with \$24,000 worth of property back of it for educational purposes. The child, the human being, should be the unit always kept in mind and not the dollar.

Public libraries are an essential part of the public education machinery of the state and nation, and education, as has been recognized in the legal and general policy of the various states, is a matter of vital state concern rather than of purely local concern. Education, therefore, being a matter of state concern must depend on state legislation for its revenues and the libraries of the country must look, I believe, to general state legislation for the remedy of existing evils as relating to library incomes. We may safely follow the parallel of the schools in the best states of the Union where the state fixes a minimum to be raised by local taxation, and supplements this by grants from the state for the purpose of equalization, based on the number of children, or schools to be served, instead of on the assessed valuation of property.

The Province of Ontario has recognized this situation in its recent library legislation better

than any state in the United States so far as my knowledge goes, for the recent general library law enacted by this province provides that where a public library is established the library authorities may claim a rate for its support of 50c. per capita of the population in the community that is to be served and this rate may be increased by the local legislative body: in other words, the amount of revenue for library purpose is based on the number of people to be served rather than on the amount of property in the community. Local taxation under this act is supplemented by Provincial grants.

At a recent meeting of the Michigan Library Association I applied the Ontario law to the cities of Michigan containing 10,000 or more population. Of such cities in this state, of which there are 24, only 6 reported expenditures of money raised by taxation equal to or in excess of 50c. per capita. Michigan, in its ability to support public libraries, is certainly fully equal to the Province of Ontario, and yet the libraries of this state fare very much worse than the libraries of Ontario in view of this recent legislation.

The reasons for a policy of the fostering of libraries by the state are admirably set forth in the beautiful language of that great document which "has produced effects of a more distinct and marked and lasting character than any law ancient or modern," to use the words of Webster—the Ordinance of 1787—when it says, "Religion, morality, and knowledge being necessary for good government, and the happiness of mankind, schools and the means of education shall forever be encouraged." The public library as a means of education is necessary for good government, for the safety and preservation of the state. Therefore the state as a whole is responsible for its proper financial support. We as librarians, must seek to create an enlightened public opinion which will function thru the legislatures of our states to provide an adequate and continuous source of public library revenue so that the public library as one of the greatest means of public education, especially adult education, "shall forever be encouraged."

MADE-IN-INDIANAPOLIS EXHIBITS

In an effort to sell Indianapolis to her own people the Indianapolis Public Library has been co-operating with the Chamber of Commerce by showing "Made-in-Indianapolis" products each week in the Delivery Room. A recent exhibit was that of books written by Indianapolis authors, published by an Indianapolis firm and shown in book cases made in Indianapolis.

Sources and Responsibilities For Public Library Revenues*

II. BY ORA L. WILDERMUTH

THE discussion of this topic may be limited, I assume, to the revenues of the public libraries dependent upon public support. The writer has had no experience worth recounting in the management of libraries privately endowed or supported. Most of the public libraries are supported, I believe, at the present time by some sort of a public tax and it is with this tax that I further assume we are most interested.

It has seemed in most cases wise to place the control of our public libraries in the hands of boards of directors, trustees or managers who are appointed by some public official. In this day when the agitation of the short ballot is quite common it would not seem proper to encourage the selection of the members of library boards by popular election. But the most serious objection to the election of library boards is that such a method would place the public library in politics and it would seem wise to keep the library out of politics as much as possible. True, the appointing power is usually held by a political officer, but the Board, if appointed, is at least one step removed from direct political influence and I believe it would be well to keep it there.

This condition presents or gives rise to a legal situation that has given the friends of the public library no small amount of worry.

It is generally considered as a fundamental principle of our form of constitutional government that taxes must be levied by public officials elected by and directly responsible to the people.

Cooley's "Constitutional Limitations" says (page 24):

"Did Parliament attempt to levy taxes in America; its people demanded the benefit of that maxim with which for many generations every English child had been familiar; that those must vote the tax who are to pay it."

Again the Supreme Court of Illinois (in *People ex. rel. vs. Chicago*, 51 Ill. 17) said that corporate authorities vested with the power to tax must be understood as "those municipal officers who are either directly elected by the people to be taxed, or appointed in some mode to which they have given their assent."

And again the same court said (in *Harvard vs. St. Clair etc. Co.*, 51 Ill. 130).

*Part of an address given at the A. L. A. Midwinter Meeting at Chicago. Judge Wildermuth further discussed the subject extempore, and answered questions raised in the general discussion following.

"The power of taxation is of all the powers of government the one most liable to abuse, even when exercised by the direct representatives of the people and if committed to persons who may exercise it over others without reference to their consent, the certainty of its abuse would be simply a question of time. No person or class of persons can be safely entrusted with irresponsible power over the property of others, and such a power is essentially despotic in its nature, and violative of all just principles of government. It matters not that, as in the present instance, it is to be professedly exercised for public use, by expending for the public benefit the taxes collected. If it be a tax, as in the present instance, to which the persons who are to pay it have never given their consent and imposed by persons acting under no responsibility or official position and clothed with no authority of any kind by those whom they propose to tax, it is to the extent of such tax, a government of the same character which our forefathers thought just cause for revolution."

And the Federal Court (in *Parks vs. Wyandotte County Commissioners*, 61 Federal 436) said among other things: "Can a tax be arbitrarily forced upon the tax payers of a county either by the individuals or by the officials in whose appointment they have no voice. The power of taxation is a power inherent in all government. In a constitutional government the people by the Constitution conferred it on the Legislature. It is one of the highest attributes of sovereignty. It includes the power to destroy. It appropriates the property and labor of the people taxed. Unrestrained power of taxation necessarily leads to tyranny and despotism. Their (taxing agencies) powers are limited by organic laws; and they should be so selected as to be directly answerable for their official acts to their local constituents or districts to be taxed. . . ."

"Self taxation or taxation by officers chosen by or answerable to those directly interested in the district to be taxed is inseparable from that protection of the right of property that is either expressly or impliedly guaranteed by all written constitution under our system of government. Of all the powers of government, the one most liable to abuse is the power of taxation. If placed in hands irresponsible to the people of the district to be taxed its abuse is a mere question of time."

From these authorities it is plainly seen that the nature of our government in America is such

that it can hardly be said that the power of taxation can be placed legally in the hands of a board not elected by the people. It is true that in some states of the Union the power to levy taxes for library matters has been placed finally with the library board even tho the board is appointed. Notable instances of that sort of a law is to be found in Iowa and Indiana.

In Iowa the law was held unconstitutional by the Supreme Court of that State and the Court had this to say in passing upon the validity of that law. (State ex. rel. vs. Des Moines, 103 Iowa 76, 39 L. R. A. 285):

"We say then that there is implied limitation upon the power of the Legislature to delegate the power of taxation. This of necessity must be so, otherwise the Legislature might clothe any person with the power to levy taxes regardless of the will of those upon whom such burdens would be cast and such persons might be directly responsible to no one. . . .

"Counsel have cited no instances in the legislation of this state and we have found none where the power to tax was conferred upon a Board of officers not elected by and immediately responsible to the people and we are unwilling to extend the right to delegate such power to any body or person not directly representing the people. The danger which lies in delegating such power to any person or board not directly responsible to the tax-payers is so forcibly set forth in the citations we have made that we need not to enlarge upon it. . . .

"The levy and collection of a tax is a taking of the property of the tax payer against his will and such a necessary, arbitrary and far reaching power ought not to be conferred upon a body of persons who are not the direct representatives of the people and who are not elected by them and who therefore are not directly responsible to them unless the people assent thereto."

This Iowa law provided for the establishment of public libraries in cities of that state and for their control, government and management by a board of trustees to be appointed by the mayor by and with the consent of the common council, and the law further provided that the library board was annually to determine the tax necessary for the support of the library and that when so determined they should certify the tax to the common council, who should then levy that tax together with other municipal taxes and certify them to the county auditor. The use of the word "shall" in reference to the duties of the common council made it mandatory upon that body to levy the taxes fixed by the library board so that in reality the tax was fixed finally by the board.

In Indiana, the law is very similar, and the constitutionality of that act was questioned in that State, but the Supreme Court of Indiana in passing upon that question decided that the Indiana Statute was constitutional. In passing upon the question, however, the court rendered its opinion upon the theory that the public libraries of the state were a necessary and proper part of the public school system of the state, and inasmuch as the constitution of the State of Indiana had specifically provided for a system of public education, the library law was constitutional.

The opinion of the Iowa Court follows the better legal reasoning, but there has been a tendency of recent years to break away from the old time honored precedent, which I have heretofore stated and it does not seem impossible that the courts of other states may take the position that even tho the power of taxation is an important one that it can be safely delegated to an appointed body. With our branches of government becoming more complicated every day, it is quite impossible that we as electors should vote directly for all of our governmental agencies and perhaps it will be possible to get away from this constitutional limitation on the power to tax. It is devoutly to be hoped that such a condition may arise for the benefit of the public libraries of the country, for I believe it can be safely said that the libraries are not upon a sound financial basis until the library boards themselves are given the power definitely and finally to determine the tax that is to be levied for their support. The library boards as a rule are made up of men and women who are all willing to sacrifice their time and energies for the welfare of the people and it is not at all likely that the powers delegated to them will be unfairly or improperly used. But it seems to me certain that the welfare of the libraries cannot be said to be taken care of so long as the power to fix their revenues is to be determined by a body politic such as a city council. Such men are usually interested in keeping taxes down as low as possible so that they may go back to their constituents and seek re-election, and again they are inclined to minimize the requirements of the library and to provide a larger revenue for those departments of government such as the police force and the street cleaning department whence political influence is most likely to come.

But perhaps the coming of woman suffrage presages a better day for the library, for does not now a woman librarian have as much political power as does a policeman or a white wing? But, really, I believe the salvation of the library lies in being given the right to fix its own tax.

This power has often been delegated to school boards even tho they are appointive and it is not unreasonable to hope that the time may come when the library will be recognized as an institution important along with the school. The school from the first grade to the end of the university generally provides training for the individual for about sixteen years and then the school system has nothing further for him. The library serves him, not only for these sixteen years, but for all the remainder of his allotted span of life. Its influence has a wider range than the school.

Libraries have gone thru about the same course of development as have schools. Like the school, the first library was a private one where only the fortunate owner could profit. And next came the subscription library and the community school in each of which the payment of dues was a prerequisite to its use. The first library society in America was organized by Franklin in Philadelphia in 1732 and incorporated in 1742 under a law exempting such a library from taxation. More altruistic views later prevailed and out of these grew the library association whose libraries were open to the public but maintained by private subscriptions. In the next stage we find libraries maintained by general taxation but the establishment of such libraries and taxes for their support are generally left to the judgment of the local community. Our school systems have gone a step further ahead and now the state usually takes a hand and the establishment and maintenances of schools is compulsory. Is it too much to hope that we may some time have the establishment and maintenance of a public library compulsory upon every community?

Such a condition might require some change of attitude on the part of our courts, but our judiciary changes as the exigencies of time require. Some of the pronouncements of our courts today would have shocked the legal mind of Justice Marshall. I would like to trace the development of some tax laws if time permitted but I can only refer briefly to them. Ditch and drainage laws generally provide for the spreading of a tax or special assessment by a commissioner or board appointed by a court and these laws were first assailed vigorously as being in contravention of a constitutional guaranty. Our country road laws had the same history and they were frequently held unconstitutional, notably in *Board vs. Abbott*, 52 Kan. 148 in 1893, in which case there was an able dissenting opinion. This decision was overruled in the same state in *Wulf vs. Kansas City*, 77 Kan. 358, in 1908. In the latter case the appointed Park Board of Kansas City was given the power to levy taxes

for park purposes but the court took the position that the constitution limits rather than confers power and that having created a legislature its power was complete except insofar as it is limited by the constitution and there was no constitutional requirement that taxes be levied by elective officers.

POST OFFICE REGULATIONS

Publishers of the LIBRARY JOURNAL:

Gentlemen:

The Department at Washington has acknowledged the receipt of the letter of this office transmitting a copy of the December 15, 1920, issue of the LIBRARY JOURNAL with respect to the classification under the Act of October 3, 1917, of the matter appearing on pages 1019, 1020, 1046, 1048, and 1050 of that issue under the headings "What to Read on Social Hygiene" and "Recent Bibliographies," such articles containing in most cases the prices of the books referred to, some of the publishers of the books also being advertisers in the publication, and the following advice has been received from the Acting Third Assistant Postmaster General in a letter dated January 8, 1921:

"You are advised that while there would appear to be some reasons for regarding matter like that referred to, consisting of lists of books, the prices of which are given in many instances, and in connection with some of which concise comments in the form of reviews, also appear, as advertising matter chargeable with the second-class zone rates of postage prescribed by the Act of October 3, 1917, for such matter, nevertheless, for the present where the books listed or reviewed in a publication are selected by the publisher or editor thereof and such matter is inserted exclusively for the information of its readers and not in connection with any understanding or agreement with anyone interested in the sale of the books the matter will be regarded as other than advertising for the purpose of determining the postage chargeable on the publication, provided the prices of the books are not given and the lists or reviews are otherwise free from features tending to give them the appearance of being designed to promote the sale of the books.

"You may in this instance, however, accept postage on the issue in question on the basis of the markings made by the publishers."

J. G. PATTEN.

United States Post Office, New York.

Books by Twentieth Century American Poets

A LIST SELECTED BY THE POETRY SOCIETY OF AMERICA

THE Committee on Library Lists of the Poetry Society of America presents in the following titles its selection of the volumes of poetry by American authors which it considers all libraries should own in order that their readers may be informed to date as to the progress of poetry in their own country. Lists have been prepared annually since 1914, the first of them having covered the ground from 1900 to 1913. The members of this Committee are selected from among the poets, editors, reviewers, librarians, and college and university professors who are members of the Poetry Society. The lists have in the past been found of use not only to libraries but also to the general purchasers of poetry, a company that seems to be enlarging daily. The columns of the LIBRARY JOURNAL afford the only public printing of this List, but the *Bulletin* of the Poetry Society gives place for a copy and the Syracuse Public Library also repeats it in its *Bulletin*. A transcript of the combined lists since 1914, called "Eighty-seven Poets," was published by the Syracuse Public Library in 1919 and may be obtained by librarians and others on request.

The Committee appeals to writers and publishers of poetry and all interested persons, for co-operation in the difficult work of keeping tally of the books of poetry published in this country. It will be glad to have its attention called to privately printed or other works of poetry which might otherwise escape its attention. Communications on this subject should be addressed to: Mrs. Martha Foote Crow, 418 Central Park West, New York City, who is chairman of the Committee.

INDIVIDUAL WORKS

- Adams, Franklin P. *Something Else Again*. Doubleday.
Humorous pieces in clever verse poems, and classic parodies.
- Aiken, Conrad. *The House of Dust*. Boston: Four Seas Co.
One poem with sections; transcripts from life in lyrical verse.
- Benét, Stephen Vincent. *Heavens and Earth*. Holt.
Narrative, humorous and other poems in rhymed metres.
- Benét, William Rose. *Moons of Grandeur*. Doran.
Short poems romantic and varied in subject.

- Bodenheim, Maxwell. *Advice and Other Poems*. Knopf.
Short poems in free forms.
- Bradford, Gamaliel. *A Prophet of Joy*. Houghton.
One continuous poem in stanzas. A social satire.
- Brown, Abbie Farwell. *Heart of New England*. Houghton.
Short poems in standardized forms; Pilgrim Ode included.
- Burt, Maxwell Struthers. *Songs and Portraits*. Scribner.
Poems and sketches in standardized forms.
- Bynner, Witter. *A Canticle of Pan and Other Poems*. Knopf.
Varied poems in both free and metrical forms.
- Carlin, Francis. *The Cairn of Stars*. Holt.
Irish ballads and lyrics.
- Carpenter, Rhys. *The Plainsman and Other Poems*. Oxford Univ. Press.
Short poems, partly inspired by modern Greek life.
- Cone, Helen Gray. *The Coat without a Seam*. Dutton.
Sonnets and lyrics of war and peace.
- Conkling, Grace Hazard. *Wilderness Songs*. Holt.
Lyrical verse; contains songs of Old Mexico.
- Conkling, Hilda. *Poems by a Little Girl*. Stokes.
Free verse forms by a child of eight.
- Corbin, Alice. *Red Earth*. R. F. Seymour.
Free verse poems, chiefly of New Mexico.
- Cromwell, Gladys. *Poems, new Edition*. Macmillan.
Posthumous publication. Brief lyrics; one of the prize-winning volumes of the P. S. A.
- Eliot, T. S. *Poems*. Knopf.
Satirical verse with an ultra-modern note.
- Farrar, John Chipman. *Forgotten Shrines*. Yale Univ. Press.
One of the Yale Series of Younger Poets.
- Flexner, Hortense. *Clouds and Cobblestones*. Houghton.
A first volume; lyrics and sonnets on varied themes.
- Gibran, Kahlil. *The Forerunner*. Knopf.
Poetic parables of the Orient.
- Guiterman, Arthur. *Ballads of Old New York*. Harper.
Poems illustrating historical incidents of New York, humorous and serious.
- *Chips of Jade*. Dutton.
Clever maxims and aphorisms from the orient, done into Guitermanian verse.
- Hillyer, Robert. *Alchemy*. Brentano's.
One long poem of classic type, in cantos.
- Johns, Orrick. *Black Branches*. Pagan Pub. Co.
Poems in free verse; including also three free verse plays.

- Kemp, Harry.** Chanteys and Ballads. Brentano's.
Out-door poems both of sea and land, done in swinging rhythms; including also a group of poems about Christ.
- Kenyon, James B.** Harvest Home. J. T. White Co.
Poems in standardized forms. Collected edition.
- Knibbs, H. H.** Songs of the Trail. Houghton.
Book of western (cowboy) poems, lyric and narrative.
- Kreymborg, Alfred.** Blood of Things. Nicholas Brown.
Ultra-modern and somewhat fantastic verse.
- Le Gallienne, Richard.** The Junkman and Other Poems. Doubleday.
Short poems in the poet's flawless technique; partly in "French forms."
- Leonard, William Ellery.** The Lynching and Other Poems. Huebsch.
Poems of impassioned social import, in standard forms.
- Lindsay, Vachel.** The Golden Whales of California. Macmillan.
Short poems in the author's customary and highly individual rhythms.
- Markham, Edwin.** Gates of Paradise and Other Poems. Doubleday.
The fourth volume of an established poet. Songs of a social and religious nature.
- Masters, Edgar Lee.** Domesday Book. Macmillan.
Narrative poems in a free type of blank verse, centering about one character.
- Millay, Edna St. Vincent.** A Few Figs from Thistles. Frank Shay.
Brief, epigrammatic poems.
- Morley, Christopher.** Hide and Seek. Doran.
Lyrical verse, chiefly written with a light touch.
- Oppenheim, James.** The Solitary. Huebsch.
Philosophical verse in free measures.
- Pound, Ezra.** Umbra. Elkin Mathews.
Partly a reprint from the author's earlier work.
- Reese, Lizette Woodworth.** Spicewood. Norman Remington Co.
New poems by a poet of established reputation.
— A Branch of May. T. B. Mosher.
New edition with foreword by J. B. Rittenhouse.
- Robinson, Edwin Arlington.** Lancelot. Thomas Seltzer.
A narrative poem, which won the five hundred dollar prize of the Lyric Society.
— The Three Taverns. Macmillan.
Collection of psychological poems, chiefly character studies.
- Robinson, Edwin Meade.** Piping and Panning. Harcourt.
Volume of humorous verse.
- Sandburg, Carl.** Smoke and Steel. Harcourt.
Poems in free forms: partly on social problems.
- Sarett, Lew.** Many, Many Moons. Holt.
Interpretations of Indian life. Introduction by Carl Sandburg.
- Schauffler, Robert Haven.** The White Comrade and Other Poems. Houghton.
Poems, containing author's work for last decade.
- Scollard, Clinton.** War Voices and Memories. J. T. White Co.
Poems written during 1917 and 1918, chiefly concerning America, Italy and the Orient.
- Seiffert, Marjorie Allen.** A Woman of Thirty. Knopf.
Poems of modern type, in free forms.
- Teasdale, Sara.** Flame and Shadow. Macmillan.
Fourth book by this poet: brief singing lyrics, chiefly of love.
- Thompson, John R.** Poems. Scribner.
Newly collected edition of a southern poet well-known since before the Civil War.
- Van Dyke, Henry.** Poems. Scribner.
Collected edition of the well-known poet.
- Van Dyke, Tertius.** Songs of Seeking and Finding. Scribner.
Sonnets and lyrics in standard forms.
- Walsh, Thomas.** Don Folquet and Other Poems. Lane.
A tale of knighthood in verse.
- Wells, Winifred.** The Hesitant Heart. Huebsch.
Lyric verse: a first volume.
- Wilkinson, Marguerite.** Bluestone. Macmillan.
Poems on varied themes, in both lyrical form and in unrhymed cadence.
- Wood, Clement.** Jehovah. Dutton.
A poem in narrative and lyric forms, presenting a modern conception of some Biblical themes.
- Woodberry, George E.** The Roamer and Other Poems. Harcourt.
One long philosophical poem, and a group of sonnets called "Ideal Passion."

COLLECTIONS

- Braithwaite, Wm. Stanley.** Anthology of Magazine Verse for 1920. Small Maynard.
- The Book of Modern British Verse. Small, Maynard.
- Frothingham, Robert.** Songs of Dogs. Houghton.
— Songs of Horses. Houghton.
- Kreymborg, Alfred.** Others for 1919; anthology of the new verse. New York: Nicholas L. Brown.
- Miscellany of American Poetry.** Unpublished poems by various poets. Harcourt.
- Stork, Charles Wharton.** Contemporary Verse Anthology. Dutton.
- Untermeyer, Louis.** Modern American Poetry. Harcourt.
— Modern British Poetry. Harcourt.
- Wells, Carolyn.** The Book of Humorous Verse. Doran.
- Widdemer, Margaret.** The Haunted Hour. Harcourt.

College Library News, 1917-1920

A SUMMARY OF THE LITERATURE RELATING TO COLLEGE AND UNIVERSITY LIBRARIES PUBLISHED BETWEEN JANUARY, 1917, AND NOVEMBER, 1920. PREPARED BY THE STUDENTS AND EDITED BY THE PRINCIPAL OF THE LIBRARY SCHOOL OF THE NEW YORK PUBLIC LIBRARY FOR THE CONFERENCE OF EASTERN COLLEGE LIBRARIANS HELD AT COLUMBIA UNIVERSITY ON NOVEMBER 27, 1920.

THE ground covered in this summary consists of the English and American professional periodicals, the American periodical indexes, the American Library Association's *Proceedings*, and, as far as was possible, the book and pamphlet literature of the period. No claim to completeness is made. The material noted groups itself roughly under three heads, namely, that which has to do with the broader aspects of administration, that which pertains to technical organization, and that which is of a bibliographical nature.

The treatments of administrative matters found reflect certain perennial problems of the college librarian. Fundamental among them is the place of the library in the college organization: Mr. Drury has discussed this, emphasizing the function of the library as a co-ordinate department serving all others but independent of all, and urging the importance to the librarian of dean's ranking and freedom from control on the part of his colleagues. As a supervising body which he believes would operate satisfactorily, Mr. Drury suggests a library committee of seven¹—two trustees, two professors, and as ex-officio members the president, comptroller and librarian—to meet quarterly for the purpose of passing upon appointments, appropriations and policies. Another phase of relations with the college is treated in the pamphlet report on departmental libraries issued by a University of Chicago committee.² This represents an enquiry extending over some three years, and embodies findings as to usage in several other institutions, with recommendations tending toward centralization and strengthening of the general library; it does not, however, go as far in this direction as the original proposals of the committee might have indicated.

So far as equipment and visible facilities have a part in good service some criteria bearing upon them are essential. These are touched upon in

W. H. Allen's "Self Surveys by Colleges and Universities";³ and again in articles by Mr. Bishop. In speaking of reading room accommodations Mr. Bishop advises liberal allowance for growth, and urges that seating capacity be twenty per cent of the enrollment.⁴ Again, after discussing general needs,⁵ he stipulates 100,000 volumes as the minimum collection possible in a college aiming to give modern work in the humanities and in science, that 100,000 to 150,000 volumes per 1000 students is a fair average in any institution, and that the library should receive six to ten per cent of the total college income; and states that the most vital need of American scholarship is not the so-called endowment of research, but the provision of the materials for research in university libraries, and adequate quarters.

The records show that college librarians as well as public librarians are giving thought to the professional strengthening of their group. Mr. Severance urges certification as a means to this.⁶ Mr. Henry emphasizes the salary situation,⁷ and says that we must either content ourselves with the standards of stupid service which low salaries impose, reconcile ourselves to unionization and trade conditions, or increase salaries to decent living possibilities. Adolf C. Noé⁸ and J. T. Jennings⁹ lay stress upon the need of greater opportunity and encouragement for the library worker to better his scholarly equipment. Mr. Noé asserts that administrative technique has been developed at the expense of productive scholarship; and that immediate practical service has tended to crowd out the ideal of broad national and professional usefulness on the part of the library and its personnel.

Much thought has been given to plans of preparation for the forms of work represented in

college and university libraries. Subsequent to a discussion of the matter at this conference three years ago Dr. Lichtenstein dealt with it in an article,¹⁰ approving the idea of a graduate library school but questioning its power to draw students; and Mr. Keogh and Miss Emma Baldwin contributed very carefully considered papers to the literature of the American Library Institute. Although not entirely germane at this point it is interesting to note that Sir William Osler¹¹ speaking in 1917 before a summer library class at Aberystwyth, Wales, advocated the starting, as a department of at least one university in each division of the United Kingdom, a "school of the book," and that a School of Librarianship is now in its second year at the University of London. Being British, it tends to emphasize bibliography and the other forms of library interest which are prominent in the college library, and includes a course in paleography in its curriculum.

Only a few library buildings have been erected in the last four years, but, as usual, their dedications have occasioned descriptions setting forth the ideas and experiments involved. The Massachusetts Institute of Technology came first, with its section of a building devoted to the library, this and the collections it houses being treated in the LIBRARY JOURNAL.¹² Amherst College held exercise in connection with the opening of the Converse Memorial Library in November, 1917; Dr. Putnam spoke at this time, and an article reporting the occasion includes floor plans.¹³ Leland Stanford Junior University began the use of its new building in 1919, and we have as commemorating this not only periodical reports but a 40-page book, published by the university and including a history of the library.¹⁴ Notre Dame's building, presumably occupied before 1917, is described in an article¹⁵ published within the years covered by this summary. Finally the new Michigan building was formally opened on January 7, 1920, the main features of the day being Mr. Bowker's address, "The library, democracy and

research," and exhibits by Mr. Voynich and from the Clements collection of Americana.¹⁶

A few libraries have in the period under examination issued manuals or handbooks; there are to be mentioned that prepared at the University of Chicago in 1917,¹⁷ and that published by Princeton University in the same year.¹⁸ These are of interest chiefly as examples, altho it is worth noting that the first printing of this edition of the Princeton manual had in view the post-conference visit of A. L. A. members to Princeton in 1916.

The stated meetings of college librarians, here, and at Chicago in mid-winter, and in connection with the A. L. A. conferences, have gone on with little interruption. These have produced the usual quota of discussion, the reports of which in this paper are considered topically.

As librarians we grow to be internationally minded, and passing mention should be made of Mr. John Ansteinnson's description of the library of the University of Christiana¹⁹; of the article²⁰ upon Chinese libraries by Mr. T. C. Tai, librarian of Tsing Hua College, Peking; of Mr. Dickerson's report concerning the library of the University of Beaune²¹; and of the numerous articles relative to the library at the University of Louvain, telling of its destruction and of plans for its rebuilding²².

Turning to the details of method and of internal organization there seem to be few items to report. In the field of pure technique, for example, there have been no startling innovations. Miss Gibbs has given us a review of the needs and of the situation as regards a union serial list.²³ Mr. Currier has told of the Harvard rules for counting pamphlets,²⁴ and has discussed possible economies in cataloging²⁵.

Mr. Hanson has presented the need of co-operation in the cataloging of monographs and composite collections not touched by Library of Congress and A. L. A. cards.²⁷ Miss Patton has dealt with the methods of treating gift pamphlets at the University of Illinois.²⁸ Miss Greenhalgh has described the Columbia system of accounting.²⁹ And an article reporting a discussion at this conference in 1916 furnishes the results of the test as to comparative costs of cataloging at Columbia and at Yale.³⁰

Formal instruction to students in the use of the library calls for discussion under the head of methods. An article published in 1918 contains a digest of the course of this kind given by Miss Gertrude Bucks at the Kansas State Normal School.³¹ Mr. H. O. Severance's reprinted book "A library primer for high schools"³² contains some things that would be helpful in college instruction, notably, explanations as to the parts of a book and as to classification. The manual prepared and just published by Misses Hutchins, Johnson and Williams at the University of Illinois, which has grown out of their experience in teaching library methods to college students, contains material which may make it a standard work.³³

Upon advertising, and upon accustoming students to use the library, there seems little to be said or written after Mr. Drury's compilation of a year ago.³⁴ An earlier article by Mary I. Carpenter had cited methods in vogue in certain women's colleges,³⁵ and Mr. William E. Martin, librarian of Bucknell University, discussed subsequently the conduct of a formal advertising department.³⁶ Consideration for students' cultural reading is a phase of this matter, and it is gratifying to find emphasis upon the interest of the college librarian in encouraging the reading of literature other than that which is required,³⁷ and the buying of good

books. Mr. Clarence Sherman has laid stress upon the latter point.³⁸

Extra-campus work on the part of college libraries is not highly developed, but a number of institutions report instances of it. Berea College (Kentucky) has for years sent travelling libraries and gifts of books into the mountains, and now carries on the distribution by means of a book wagon.³⁹ The University of Texas library has a well developed extension division, which makes possible serious study in remote sections by means of package libraries.⁴⁰ Less definite as news items than the above, but none the less interesting, are Mr. John Ridington's plea for travelling library collections of material bearing upon university courses, for the benefit of ex-service men who are unable to attend the university⁴¹; Miss Ernestine Noa's description of the library in the seminar room of the Rural Social Science Department at the University of North Carolina, which presumably is designed for state-wide use⁴²; and the package library service conducted by the Extension Division of the University of Indiana—supposedly in co-operation with the University Library—and available to every resident of the State.⁴³

The third division of this resumé, and the most interesting one, concerns itself with lists and descriptions of notable collections. The accumulation here within the four years seems rather significant. First of all, there have appeared a few working compilations, restricted in interest but valuable for their own purposes, such as the printed catalog of Augustana College Library,⁴⁴ the list of serials in the University of Arizona Library,⁴⁵ the pamphlet on the Bixby books and other recent gifts to Emory University Library,⁴⁶ the six-page leaflet descriptive of Quak-

criana in the Haverford College Library," and Princeton's joint finding list of foreign newspapers."

Technical and semi-technical collections have received some mention. There are descriptions of the library of the United States Naval War College at Newport," and of valuable material, including works on medical history, in the library of Transylvania College." Yale University has published a list of medical serials in Connecticut libraries," enlarged from a list of similar material in the Yale Library issued in 1912. The Liautard" and Salmon" veterinary libraries are described. Mr. Ralph Power, writing from Europe, tells of the proposal to assemble special commercial collections for use in connection with business courses recently established at the University of London."

The accumulation and care of war material seems to have been an universal problem. Dr. Richardson has led the way in contributions to this, Princeton having published at least two printed lists of its European war literature—one alphabetical," in 1917, and one classified," in 1918—and two photostat lists—one of books and pamphlets on the economic aspects of the war," and one of posters." Mr. L. N. Wilson compiled a list of the war collections of Clark University, and devised a classification for posters." Mr. Lydenberg and others discussed the arrangement of war material at a recent meeting of the college and reference section of the A. L. A." And Mr. Power has told of the war library and museum at Paris," established by M. Camille Block and Madame Block in 1914.

Scholarship, like business, has turned its eyes to the south in recent decades, and a number of valuable Latin-American collections in North American universities is one result. Yale has 40,000 volumes, made up chiefly of the libraries of Hiram Bingham and H. R. Wagner, and including newspapers. Columbia has 4500 volumes, as well as much related material classed under literature and language. Harvard possesses 19,000 volumes, made up partly of private libraries. Brown boasts of the George Earl Church collection, and there are many relevant pieces in the John Carter Brown Library. Notre Dame has come into ownership of the South American library of J. A. Zahm. The Bancroft collection at Berkeley should not be overlooked, for altho broad in its scope it is rich in Spanish manuscripts. All of these collections, and in addition some which are not parts of university libraries, are described in recent LIBRARY JOURNAL articles."

Where collections in this country are concerned presumably nothing can compete with Americana in interest. It is sufficient merely to mention two significant events of the last four years in this field, namely, the appearance of the first part of the new John Carter Brown catalog," and the gift of his collection to the University of Michigan by Mr. W. L. Clements."

Records, printing and literature remain to be considered. G. A. Barton prepared, and the Yale University Press published, in 1918, parts one to three of the description of the Haverford College Library collection of cuneiform tablets." M. M. Shaver has annotated a list of rare books, manuscripts and autographs in the Vassar College Library, which is mentioned here because of its emphasis on the history of printing." Vassar College has also published a brochure, listing with black and white illustrations the printer's marks in the windows of the Frederick Ferris Thompson Memorial Library."

Among the more strictly literary items there stands out the work of A. S. W. Rosenbach on the Harry Elkins Widener collection—the general two-volume catalog," the Dickens catalog," and the catalog of works illustrated by the Cruikshanks"—all of which bear date 1918. Also, Mary Eunice Wead has compiled and the University of Michigan has published a catalog of the Jones Carlyle collection." Major G. W. Littlefield has bought and presented to the University of Texas the Wrenn Elizabethan library, and altho no catalog of this is to be listed a note concerning it appears in the LIBRARY JOURNAL." Finally, there should be mentioned Yale's publication of facsimiles and reproductions of items in the Speck collection of Goethiana," the University of California library's pamphlet descriptive of its library of French thought," and Hall-

dor Hermannson's catalog of runic literature in the Fiske Icelandic collection at Cornell."

Under the heading of contemporary bibliography only one considerable item for which a library is responsible has come to notice. This is Mr. George D. Brown's list of the works of Woodrow Wilson from 1910-17, continuing Mr. Clemon's compilation for an earlier period."

Lines of inclusion in such a summary as this are difficult to draw, and it is realized that much material of interest to college library workers and some contributions coming from them, altho not touching collections actually under their care, has been passed by. If any excursions beyond the limits set are permissible, they would be to mention Miss Mudge's periodical reviews" of new reference books and her plans for a new edition of Kroeger's "Guide"; Mr. Hicks' informational book, "The new world order""; the work of Mr. Keogh for the "Inquiry," of Mr. Bishop as president of the A. L. A., and of Dr. Raney on importation problems and Library War Service negotiations of all of which the printed record is naturally scant; and the labors of Mr. Koch as historian of the A. L. A. Library War Service."

A Librarian's Golden Jubilee

The American librarians, constituting the so-called Northern Party of the projected library invasion of Europe in the summer of 1914, an invasion cut short by the outbreak of the European War, will recall with pleasure, their visit to the University of Christiania Library. Particularly will they recall the venerable Chief, A. C. Drolsum, and the stately, but genial manner in which he received the guests and explained to them the administration, and the various departments of the National Library.

From a communication to *Nordisk Tidsskrift for Bok-och Biblioteksväsen*, 1920, Nr. 2, just received in this country, it will be noted that on March 23, 1920, Mr. Drolsum completed fifty years of continuous service in the University Li-

brary, having entered its service of 1870 and having been Chief Librarian since 1876.

For a member of our profession to have completed fifty years of continuous service is in itself an achievement sufficiently rare to warrant mention; in the case of Mr. Drolsum it is particularly noteworthy because of the institution which he has served, and the important work in history and politics for which he has found time aside from his library duties.

J. C. M. H.

The Detroit Public Library, at the request of the symphony management, will contribute music notes to the programs of the Detroit symphony concerts this year.

Going Down

ITEM 1. "For the United States, thrice the domestic price, beginning New Year's," is now the word from Leipzig. That is to say, list price plus 200% Valutazuschlag (instead of 250% since October 15, 1920) plus 10% Teuerungszuschlag, for books in print. The rates for other countries are not yet at hand. Antiquarian items will, of course, continue to be exempt.

This result appears to have been brought about by a revolt of prominent scientific publishers who disbelieve in the principle of discrimination against foreigners. The present measure is a compromise. More will probably follow, especially if the mark continues to rise.

Every such reduction widens the gap between the German agent and his competitors in other countries. In this situation librarians should be on guard against tricky bills. For example, an Italian invoice for German publications recently examined was found, while apparently 22% below the Leipzig schedule, actually to be built upon a domestic price 80% inflated.

Item 2. In view of continually shifting conditions, libraries will find it wise to require that agents submit bills for periodicals only on occasion of delivery of initial numbers. Any other course is a gamble with somebody probably losing, and that somebody is pretty sure to be the library.

Item 3. Except in the case of very large consignments libraries will find it advantageous to have European material dispatched by parcel post rather than freight, unless, of course, vol-

umes are too heavy for the mails. Six per cent will about cover such carriage, whereas boxes, except big ones, will come higher and travel far more slowly.

If, however, freight be utilized, it is well to have the shipper prepay ocean charges. Landed collect in American harbors, the steamship companies are apt to bill transportation of cargo in gold at the ante-bellum rates of exchange.

Use the postal route always, where possible, for German consignments, since it is easy to find agents who will meet the cost of stamps, but none will cover freight, not to mention quicker delivery.

Item 4. The publishers of the *Encyclopædia Britannica* announced that the three new volumes supplementary to the eleventh edition would appear on India paper only. They have, however, now yielded to widespread demand, supported by this Committee, and agreed to an edition on ordinary book paper as well. Furthermore, if enough requests are received, they will bind this in buckram with the A. L. A. reinforcement.

All purchasers of these three volumes should at once give them notification of (1) the paper desired—whether India or ordinary, and (2) the binding preferred—whether cloth or special buckram.

A NEW VOTERS' HANDBOOK

ILLINOIS Voters' Handbook" published by the Woman's City Club of Chicago, 1920, deserves the hearty commendations which are being received by the publishers for its timely appearance, attractive form, practical arrangement, clear and concise text, reliability, and absence of legal phraseology. The subject matter collected under six chapter headings—Technique of voting and information for citizens; Citizenship; City and village government; County government; State government; Federal government, has been tested by experts in municipal, state and national laws, and the editing committee (composed of civic workers, several

of whom have national reputation) has done careful and excellent work, and produced a helpful manual, printed on good paper, in clear type. It has marginal indexing, brief lists of references to up-to-date material, a good subject index, and is illustrated by charts and maps. It appeals to the reader by its straightforward and direct information, is a handbook of practical use to new voters, women's clubs, civics classes, and a tool which librarians have found to be of more than usual helpfulness.

While published for the convenience of the women of Illinois and Chicago, it will also interest students at large, for it contains information of national import in the chapters devoted

to the "Technique of Voting"; "Citizenship"; and "Federal Government." Designed to meet the needs of citizenship classes preparing for intelligent voting at the recent election, it was issued in two forms, viz., as a pamphlet of 110 pages, and by chapters, with separate cover, title-page and introduction, punched for fastening with paper fasteners. This latter form allows for replacing parts which will be revised as laws are made or amended; and will be par-

ticularly useful to libraries maintaining package-libraries, or pamphlet-files, for the parts can be used separately under direct subject. The price is 60 cents for the complete pamphlet; 10 and 15 cents each for the various chapters, or 70 cents for the complete "loose-leaf" form. A discount of 10% is allowed on lots of 25 or more. Address: Woman's City Club of Chicago, 16 North Wabash Ave, Chicago, Illinois.

J. M. W.

Teaching The Use of a High School Library

A SELECT LIST OF BOOKS PREPARED BY MRS. JESSIE LUTHER
Reference Librarian, Kellogg Library, Kansas State Normal School, Emporia.

Connolly, Louise. *How to Use a Library.* 1917. H. W. Wilson Co., N. Y. Bds. \$1.30; pa. \$1.00. (Modern American Library Economy.)

Prepared for use of teachers, librarians and normal and high school classes. The questions and exercises are practical.

Fay, Lucy E., and Eaton, Anne T. *Instruction in the Use of Books and Libraries;* 2d ed., 1919. F. W. Faxon Co., 83 Francis St., Boston. \$3.25. (Useful Reference series, no 23.)

Part I: On the use of books; part II: Selection of books and children's literature; part III: Administration of school libraries.

Valuable source of material in preparation for this work.

Hopkins, Florence M. *Reference Guides that Should be Known and How to Use Them.* 1913. Willard Co., 479 Sixth St., Detroit. Cloth, \$1.50.

This 1913 edition is a more practical book for teachers than the later edition listed below. The groups of lessons discussed can be given in connection with English courses in high and normal schools.

Reported by the author as out of print and not to be reprinted.

— Reference Guides that Should be Known and How to Use Them, rev. ed. 1919. Willard Co., Detroit. 11 parts, pa., 25c. each.

A series of eleven graded lessons, each in a separate pamphlet. The complete series constitutes a second edition of "Reference guides that should be known." Contents: 1: Webster's New International Dictionary; 2: New Standard Dictionary; 3: Encyclopedias; 4: Parts of a book; 5: Atlases, City directories, gazetteers; 6: Concordances; 7: Library classifications and card catalog; 8: Indexes to periodical literature; 9: Year-books; 10: Commercial indexes; 11: Important publications of city, state and federal governments. Pamphlets 1, 3, 7, 8, are most usable for high school classes. The inclusion of specimen pages from reference books and the illustrative examples are valuable features of these guides.

Kroeger, Alice Bertha, and Mudge, Isadore Gilbert. *Guide to the Study and Use of Reference Books;* 3d ed., 1917. American Library Association Publishing Board, 78 E. Washington St., Chicago. \$2.50.

A standard book for verification, that should be in the library, but too detailed for use by students.

Lowe, John Adams. *Books and Libraries; a Manual of Instruction for their Use in Colleges.* 1916. F. W. Faxon Co., 83 Francis St., Boston. pa. 50c. (Useful Reference series, no. 16.)

A practical aid in class instruction and for supplementary reading. Includes exercises on the catalog, magazine indexes, general and special reference books.

Ward, Gilbert O. *Practical Use of Books and Libraries;* 3d ed. 1917. F. W. Faxon Co., Boston. \$1.25. (Useful Reference series, no. 17.)

A textbook for use with high school classes.
— Suggestive Outlines and Methods for Teaching the Use of the Library. 1919. F. W. Faxon Co., Boston. (Useful Reference series, no. 21.) \$1.50.

A book for teachers. Supplements the author's "Practical Use of Books and Libraries."

Wisconsin. Department of Public Instruction. *Lessons on the Use of the School Library.* 1918. C. P. Cary, State Supt. Pub. Instruction, Madison, Wis. pa. 5c.

Intended for elementary school classes but is useful in high schools in giving library instruction outlined that has not been given in the grades.

— Library Lessons for High Schools. 1918. C. P. Cary, State Supt. Pub. Instruc., Madison, Wis. pa. 5c.

A guide in giving definite lessons on the use of the high school library. Specific references are given to Connolly, Fay and Eaton, Kroeger, Hopkins, and Ward. (See above.)

Wiswell, Leon O. *How to Use Reference Books.* 1916. American Book Co., Chicago. 80c.
This book is especially helpful for the detailed discussion of Webster's New International Dictionary.

The American Library Association has recently sent to the Havana Post Number One, American Legion, Havana, Cuba, a collection of books which will serve as a foundation for a Post Library.

ELYRIA BRANCH LIBRARY

Denver's New Libraries

THREE new buildings—two branch libraries and a community house—were opened this last month under the auspices of the Denver Public Library. They were built in the latter half of 1920 during the period of the highest cost of materials and labor in Denver and show certain restrictions which this imposed, but the two new branch library buildings in particular show several fairly new features in construction details.

The two new branch libraries, Park Hill and Elyria, were gifts from the Carnegie Corpora-

tion. The Park Hill building, measuring 64 by 32 feet, cost \$26,000 complete and furnished and the Elyria building, 52 by 26 feet in area, cost \$16,000 complete and furnished. Both buildings are of the same general plan—an open interior on the main floor with auditorium and work rooms on the basement floor.

The Park Hill branch library building is Spanish in type and is built of rough troweled cement over brick. The rough exterior walls are buff in color and the roof is of Spanish tiles in grays and terra cotta. The cornice, trim and exterior decorations are of cast stone and the entrance door which is of Spanish design, is in two shades of red. The under-cornice is stenciled in terra cotta and old blue and the lanterns at the entrance are of wrought iron, screened with heavy isinglass. The leaded windows are high in the front and in the rear and are low in the end walls of the building.

The interior is unusually open and spacious in appearance. The librarian's room on the main floor is outlined by double faced floor cases which are only a foot higher than the delivery desk.

The interior walls and ceilings in the building are of rough troweled gray plaster and the ceiling is a beamed one. The wall cases are

IN THE PARK HILL BRANCH, SHOWING WINDOW SEATS CONCEALING RADIATORS, CHILDREN'S ROOM

sunk into the rough plaster walls which gives an attractive appearance and also an effect of unusual solidarity.

In the adult reading room there is a large bay with window seats while in the children's room two window seats flank the cast stone fire place. In the chimney breast is sunk a stone plaque of "The Ancient Mariner," modeled by Robert Garrison, the sculptor.

The lighting fixtures are somewhat unique both in design and cost in that they are wrought iron brackets which hold the glass cylindrical globes. These globes originally were electric battery jars converted for lighting purposes by cutting out the bottoms and inverting the jars. The lighting fixtures complete each cost only eleven dollars.

Unbroken wall space for book shelving has been secured in the Park Hill and three other branch library buildings in Denver, by sinking heat ducts in the walls back of the book cases which bring the heat to the tops of the cases or at the top of window seats directly under the windows where the heat is most needed.

The steam heat radiators are placed under reading seats or under the reading ledge which projects from the wall cases. They are screened from view either by metal or wooden grills which are on hinges so the radiators can be

THE PARK HILL BRANCH

reached for adjustment or repair. The heating ducts which are slightly longer than the radiators themselves, are sunk in the walls and are five or six inches deep. In the Park Hill library building the ducts vary from five and a half to eight and a half feet long and are five inches deep. The backs of the book cases make the fourth wall for the heating ducts. This is covered with thick sheets of asbestos which make so excellent a non-conductor of heat that the backs of the bookcases themselves are only slightly warm. The ducts open at the tops of the wall cases or at window sills and these

TWO CHILDREN'S ROOMS: AT THE LEFT THE PARK HILL BRANCH, AT THE RIGHT THE ELYRIA BRANCH

CONCEALED HEAT-DUCTS OPEN AT WINDOW SILLS

openings are covered by metal grills of one inch mesh.

The heat ducts have several advantages. They give unbroken wall space for books—a great advantage in small library buildings—they conceal from view the unsightly heat radiators, and they bring the heat where it is most needed, at the windows. This is true particularly when the windows are the casement type, for even with weather stripping, such windows admit some outdoor cold on windy days.

The librarian's room at the back of the delivery desk on the main floor of the Park Hill library accommodates a desk, typewriter, telephone and filing cases. The low doublefaced floor cases which enclose this room, permit perfect supervision of the reading room from the librarian's own desk.

The Park Hill auditorium on the basement floor has 165 folding chairs. An outside entrance in the rear of the building opens to the landing on the stairway from the floor above and so avoids the necessity of two stairways to the basement floor.

The Elyria branch library building is smaller than the Park Hill building, but resembles it in its general arrangement and in details of construction, such as the concealed heating ducts, built-in furniture in the librarian's private room, outside basement entrance, etc.

The Elyria building is constructed of white cement over brick walls, with a Spanish tiled roof and an entrance door paneled with Spanish tiles. All the windows are high except the two large leaded ones in the front wall which reach to the floor. The cornice brackets and outside railings are of wrought iron.

In the children's room there is a fireplace of brick and old tiles. Over it and in the opposite wall at the other end of the building are recessed spaces in the plaster. These will be

filled later with two decorative wall paintings by Albert Olsen, which decorations will be gifts to this branch library from the Denver Union Stockmen's Association.

The Park Hill and Elyria branch buildings were designed by two Denver architectural firms—Hoyt Brothers and H. J. Manning.

The third new building opened within a month is the Globeville Community House. The Denver public library does not believe that it is the best administrative authority to handle this community activity, but its financing and partial control have been placed under the library for the time at least. The needs in Globeville, one of Denver's two foreign districts, have been emphasized by the Denver public library for several years and last spring William P. McPhee of the Library Board started a building fund with a \$2,500 gift. The Denver Real Estate Exchange then conducted a two hours' campaign and raised the fund to \$14,000.

With this money a one-story brick building was erected. At the left on entering are the library quarters—an attractive reading room with space for 3,500 books, and the librarian's own room. To the right of the entrance hall is an auditorium with 250 folding chairs and a flat floor of hard maple for supervised community dancing. The auditorium is equipped for a moving picture machine and for theatrical entertainments. It is also provided with light gymnastic apparatus, boxing paraphernalia, etc. and has shower baths adjoining this room. In the rear of the building, connected both with the entrance hall and the auditorium, is a classroom with accommodations for forty people. The Extension Department of the University of Colorado has agreed to conduct here free classes in home economics, American history, etc. This room will also be used by the Visiting Nurses' Association for free clinics for babies.

Since no Denver city department was in a position to handle this work, the mayor of Denver appointed a special committee of which Frederic R. Ross, president of the Library Board, and the librarian of the Denver Public Library are members, to supervise this new activity. The mayor has asked the Denver Public Library to finance this work for the current year, during which time a transfer of funds to the library will be made to permit this. The new community house makes possible unusual possibilities for co-operation between the Denver Public Library and other activities.

CHALMERS HADLEY.

Library Beginnings in the Virgin Islands

DECEMBER TENTH, 1920, should be a red letter day for St. Thomas in the Virgin Islands of the U. S. A. On the evening of this day the first library in the history of the Islands was formally opened to the public.

Since the purchase by the United States of the Virgin Islands, efforts have been made to improve the sanitary and health conditions and to extend better educational opportunities. Those most interested felt that public libraries in the three towns of the islands would do much to stimulate the desire for self-improvement and offer, too, a center where the various classes of people could find a common ground free from partisan, sectarian or race divisions.

The government was not ready to undertake the establishment of public libraries, the individual towns were not in position to do so. The American Library Association, which was appealed to, was interested, but could not finance the project, and so it was the Junior Red Cross which agreed to defray the expenses of books, supplies and services of an organizer to be selected by the A. L. A. Later the Red Cross agreed to defray the traveling and living expenses of an additional A. L. A. representative, Miss Eleanor Gleason, who volunteered her services as an assistant.

Miss Gleason and I arrived at St. Thomas, November 5th, and began our work the next morning in the rooms secured by the St. Thomas Library Commission, for the Public Library. Here we found the cases of books which we had ordered and which were purchased thru the Despatch Office of the A. L. A. There were also nearly 3,000 books which had been secured as gifts from the A. L. A. War Service collection, the Navy Department, the Newark Public Library and the School Division of the New York State Library.

I was able to enlist a number of volunteers from among representative women of St. Thomas, who gave material aid in the routine processes of fully preparing the books for circulation. Some native helpers were also employed. As Miss Gleason and I had our living quarters in the library, we were literally at work from early morning until late at night. We had to contend with the many delays which one finds in the tropics. Our chief limitations were those of transportation and communication. Being six days' ocean travel from the mainland has

many disadvantages. However, we were more than busy and had little time to realize our insular isolation. There were carpenters, painters and electricians awaiting supervision, cleaning women and day laborers who had to be shown what to do and how to do it. As it was impossible to secure dressed lumber, all the planks for the shelving had to be sawed and planed by hand. . . . We used the A. L. A. packing boxes as shelves, as chairs, as dressing tables, wardrobes, and writing desks. Other Americans who had difficulty in securing furniture quite envied us our A. L. A. cases.

As the time for opening the library approached, I availed myself of every possible opportunity to tell the people of St. Thomas the good news. I met with the teachers and principals, talked before four different church organizations and to two large mass meetings of the Labor Unions. Thru the efforts of Mr. Orville Kean, chairman of the St. Thomas Library Commission, the large ball room of the Grand Hotel across the street was secured, chairs for several hundred people were borrowed from the nearby Lutheran church, a platform was erected and a large flag was draped at the back of the platform. The Governor and his staff, as well as the members of the Colonial Council, had been especially invited. The Governor arranged to have the Naval Band play. By eight o'clock, when the Governor and his staff arrived, not only the room but the halls and alcoves opening from the hall were filled with interested people of all grades and classes.

Several hundred people came over to the library for the inspection. All the young people and many of the older ones stopped in the children's room charmed by the attractive books there, new and fresh in their red and green and yellow bindings, many with colored illustrations, and all of them fascinating with the promise of interesting things between their covers.

In the Women's room men, as well as women, were interested in the exhibit of West Indiana displayed on the central table. To the collection of books on the West Indies and especially on the Virgin Islands of the U. S. A. belonging to the library were added those loaned by friends of the library. There were also pictures and government publications. . . .

To look into the interested faces of that audi-

ence at the opening exercises and later, to talk with these men and women, and then to see the boys and girls as they came to claim this wonderful gift of the Junior Red Cross to them was a thrilling experience. We have faith that the experiment will work and that the opening of this first public library in our Virgin Islands will be the means of unifying divergent interests and of providing that stimulus of good citizenship which libraries everywhere are fostering and which this library is peculiarly fitted to bring about.

ADELINE B. ZACHERT.

The Popular Use of Documents in Public Libraries

A PROPOSED SURVEY

THAT the time has come for a general survey of this subject which shall gather up the results of war-time experiments and provide data of a practical nature on which to base a plan for an increased service to communities and to the nation, Mr. H. H. B. Meyer, Mr. Goddard and others interested in the wider use of government publications decided at the Colorado Springs meeting, and to make such a survey the Chairman of the Documents Round Table appointed a sub-committee and instructed them to report at the next meeting of the section. The work is under way and shortly many libraries will receive a brief questionnaire as to how public documents are used and popularized—who uses them, how extra copies are obtained, how circulated, how prepared for circulation, what classification is used, etc.

It is hoped that librarians and document department chiefs will welcome the appearance of these questions as providing an opportunity to speak freely on the subject, and in addition will offer suggestions or criticisms which summarized may be useful alike to other librarians and to the various publishing and distributing departments of government material. The Committee dares to trust that persons in the profession not included in the definitely named "public libraries" are so interested in this subject that they will be willing to share their experiences and will write, without further invitation, to any member of the Committee named below:

JESSIE M. WOODFORD, Chicago Public Library,
Chairman.

EDITH GUERRIER, Public Library, Boston, Mass.
EMMA HANSE, Public Library of District of
Columbia, Washington, D. C.

JANE P. HUBBELL, Public Library, Rockford, Ill.
ALTHEA H. WARREN, Public Library, San Diego,
Calif.

Vers Livres

I do not approve of free libraries.

At least not the way

They classify their books.

It isn't right,

And it isn't according to law and order.

Everyone knows

That when you mention the Gospels

You must say

Matthew,

Mark,

Luke and

John.

Not so the libraries.

They are independent.

They are pedantic.

They insist on

John, Luke,

Mark, Matthew.

It is because of the alphabet, they say.

They have no right to take such liberties

And alphabetize the Apostles.

Then in that matter of Mrs. Browning

(Elizabeth Barrett, that was),

She, sweet and lovely wife of history,

Is classed with English poets,

But her husband (and goodness knows, none was
more devoted)

Stands dignified and stately

Upon a shelf far off.

He has a number all his own.

Mrs. B. with trembling curls

Solaces herself in the company of Burns and
Byron

On one side,

With the two Arnolds crowding her on the other.

They were good men, but the Church of Eng-
land

Does not approve such separations.

Coleridge, Keats, Tennyson and Wordsworth

Come between this lady and her husband.

It is a cruel business.

But librarians say,

"Rules are rules."

They are a cold lot,

With no thought for sentiment.

I do not approve of free libraries,

At least not the way

They classify their books.

—MARGERY DOUD in *Life*.

THE LIBRARY JOURNAL

TWICE-A-MONTH

FEBRUARY 1, 1921

THE pendulum swings from Mr. Carr's breezy talk at Lake Placid to Mr. Sanborn's careful address at Chicago which we printed in our last number, between one extreme and the other. Mr. Carr's plea was distinctly for the A. L. A. as a welfare organization; Mr. Sanborn's plea is for a professional organization which should not attempt welfare work. Probably the true course is the happy mean, and Mr. Sanborn's citations from the constitutions of cognate national associations show that each of them has the public welfare in their respective fields distinctly in aim. The Enlarged Program evidently attempted too much, at least under present conditions, but it should still be the business of the A. L. A. to stimulate the organization of libraries as well as to heighten professional standards, and thus in both ways to give the public a better supply and a better service. It would be a pity if it should round up its half century of service with lesser or narrower aims.

★ ★ ★ ★ ★ ★ ★

IN respect to the organization of the A. L. A., Mr. Sanborn's discussion concentrates on the suggestion that the Council should be made more thoroly the representative body of the Association, thru delegations chiefly geographical which alone should have policy-determining functions. This has, in fact, been the trend of Council development in recent periods, but it would be regrettable to omit from its membership, for instance, the ex-presidents, who represent the most experienced leaders in the profession. Such discussions as Mr. Sanborn's paper contribute substantially toward reaching a consensus of opinion which will make the A. L. A. what its members in general desire. It is certainly not wise that policy should be determined by a few votes in a small meeting, and the more the responsibility of the Council is developed, the more likely will it be to attract larger attendance and more careful participation. It is to be

hoped that the A. L. A. will not narrow its limits to exclude any who are really interested in library work, as the British association does by confining itself to chief librarians and leaving library assistants to take part in a junior organization. Library trustees should certainly be invited into the fold, while, on the other hand, conferences are now so large that it is no longer desirable to invite casual membership, whose motive is chiefly the reduced rates that used to be an attraction.

★ ★ ★ ★ ★ ★ ★

WE are still nominally under war conditions and it might still be *lèse-majesté* to tell Uncle Sam how foolish are some of his ways. The administration of the Post Office Department has been notably lacking in common sense and fair play in its treatment of periodicals, and the red tape illustrated in a letter of the Department printed on another page seriously hampers service to the public without compensating benefits to anyone. It has been the practice of many literary periodicals to add the price of a book to the bibliographical particulars, for the convenience of readers, and this always without reference to the question whether the particular book by the particular publisher did or did not advertise. This has been the practice of the LIBRARY JOURNAL, but the postal authorities insist that any mention of price must be a concealed advertisement. We propose to continue this convenience to our library constituency, even tho the Post Office counts it advertising and mulcts the LIBRARY JOURNAL accordingly. Mr. Burlison has been one of the scape-goats of the present administration, and in many respects he deserves to be, but the real difficulty goes deeper still and it is to be found in bureaucratic routine which continues to become narrower and narrower, until someone comes along who overhauls methods and brings a fresh breeze of common sense into officialdom.

LIBRARY ORGANIZATIONS

ILLINOIS LIBRARY ASSOCIATION

THE Illinois Library Association held its twenty-fourth annual meeting in Springfield, October 12-14. There was an unusually good attendance.

Anna May Price in giving the report of the State Library Extension Commission laid special stress upon the success of the district meetings held during the year by the Association. There were fifteen meetings and one hundred and fifty-two librarians were represented in the attendance.

Helen Bagley gave her presidential address Tuesday evening "After the War—What?" She spoke of the spirit of unrest which held the whole world and of the necessity of the librarian's watching for books that deal with world problems frankly, honestly, and constructively; buying them and seeing that they are read. Professor Stuart P. Sherman of the University of Illinois followed with an address on "Beauty and the Puritan."

On Wednesday morning Professor Luther Robinson of Monmouth College told of the Warren County Library, the first library to be voted in under the new County Library law. Lucy W. Errett, trustee of the Kewanee Public Library, gave an excellent paper on "Getting the Board of Directors to Work." Martha Wilson, librarian of the Springfield Public Library, spoke on "Finding the Librarian's Place in Education," saying that the library was an accessory rather than a teaching agency, its work being to stimulate, accompany, and supplement definitely outlined instruction. The last paper of the morning was by Theodore Koch, librarian of Northwestern University. He talked a few minutes on his experiences: buying books in Europe since the war, and then gave a criticism of "The Art of Reading" by Emile Faguet.

Wednesday afternoon was devoted to sectional meetings. The high school librarians' section was under the direction of Rachel Baldwin, librarian of the Township High School Library, Highland Park, Illinois. Various topics discussed were: The budget, lessons in the use of the library, charging systems, methods of checking attendance, reference work, and co-operation with teachers. The children's librarians' section was led by Adah Whitcomb of the Chicago Public Library. Anne Boyd of the University of Illinois Library School read a paper on "Multiplying the Librarian's Knowledge of Children's Books." Irene Bowman talked on "Helping Children Overcome Bad Reading Habits." The

last paper was by Adah F. Whitcomb on "Some Books I Like and Why I Like Them." The trustees section was an unusually well-attended and enthusiastic meeting. There was much discussion of salaries, budgets, certification of librarians, county library law, and pensions for librarians.

Wednesday evening R. E. Hieronymous, community advisor of the University of Illinois, spoke on the development of the Community High School, and showed how the county library with community distributing centers would naturally develop and grow along with the new type of district school. Frederic G. Melcher, executive secretary of the National Association of Book Publishers, spoke on "More Books in the Home" urging that librarian and bookseller co-operate not only in placing more books on the children's bookshelves, but also in trying to improve the quality of books published for children. Arthur Bostwick, librarian of the St. Louis Public Library, then gave a most interesting paper on "Some Realists; English and American."

Thursday morning Alice Tyler, president of the A. L. A., spoke on "Our Common Task." She said that librarians had come back from the varied experiences of their war work to find that they were committed to the common task of service and that the librarian who develops to the best degree the library in her own community has accomplished the greatest task in library work and should be filled with the courage to go on and make it count still farther. She spoke of the great demand for library workers and urged that a systematic effort be made to recruit library workers in various communities.

The following officers were elected for the coming year: President, Effie A. Lansdan, Cairo Public Library; first vice-president, E. J. Verlie, Legislative Reference Library, Springfield, Ill.; second vice-president, Anna Hoover, Galesburg Public Library; secretary, Josie B. Houchens, University of Illinois Library; treasurer, Katherine Abbott, Elgin Public Library.

JOSIE B. HOUCHENS, *Secretary.*

COLORADO LIBRARY ASSOCIATION

THE Colorado Library Association held its thirtieth annual meeting in the Denver public library, December 9-10.

Since Colorado as a state had made no contribution to the Enlarged Program, Mr. Hadley opened the session with a brief statement about

this project, and its plans for a permanent endowment. C. Henry Smith of the State University described ten possible ways in which a library might raise funds; by private subscription; by enlisting the seventh amendment workers; thru women's clubs; thru a carnival, street fair or pageant; community players; lecture or lecture circuit; athletic contests; tag day; moving pictures. The two suggestions that appealed to the audience were a movie on a percentage basis with the local movie, and a play by the community players. Outdoor pageants were mentioned with the caution that one should carry weather insurance: athletic contests were also suggested. The community players seemed to appeal to the greater part of the audience and it was finally decided that each community should endeavor to raise a fund for this work.

"Why should I belong to the A. L. A.?" was the topic of Charlotte A. Baker of the Agricultural College. Miss Baker summed her paper up with a group of reasons suggested to her by Miss Van Dyne of the Newark Public Library.

The A. L. A. is the largest and oldest national library society, a society which is composed of members experienced and inexperienced, old and young, and with a diversity of ideas that is broadening to all. It has an income that allows for service and makes each member a shareholder in a growing and progressive concern. To have one's name listed in the "Handbook" is to be afforded a continuing advertisement in the library world. Finally, this membership will yield an ever increasing dividend in personal development and in opportunity for library service.

Mrs. Thomas Crawford Galbreath, of the State historical library, spoke briefly on what a library should save and reject, and on the inter-relationship of all libraries in the state regarding the collection of historical material relating to Colorado. She said the historical society would be glad to receive any Colorado material of interest or value, including current as well as early material, or information about its location so that the society might keep a record for future reference. She especially urged each community to collect and keep a record of its local material.

R. Maud Ditmars of the Colorado Woman's College continued the discussion on the saving and rejecting of material in a library, in a paper largely compiled from letters sent to experienced librarians. She suggested examining the date slips of an experimental display shelf to judge the trend of the public taste, and cautioned the librarian to remember she was buying to please the public and not the trustees or

the librarian. What is out of date should frequently be discarded. Lack of use is denial of efficiency.

On Friday morning May V. Wigginton, now of the Denver library, described her work in cataloging historical material in the public library of Louisville. She said that as the work progressed she found she was getting a panorama of frontier life and development, and gradually learning what Americanism stood for when one considered what it had cost in hardship and in the development of character. She urged all librarians to collect the records which give us our historic heritage from the past, because this is really the one common heritage that has produced our Americanism.

Mrs. Cicely Sherwood, of the University of Colorado Law Library discussed the proposed county library law for Colorado from a legal standpoint comparing the proposed bill with the same law governing county libraries in other States, and suggesting that certain sections could be improved by revision, based on the practical working out of the law in other States.

Will Collins, librarian of the Fitzsimons General Hospital, Aurora, told of his work at this recuperation camp for tubercular overseas soldiers. He spoke of books for invalids as having three purposes: pastime; recreation or occupying the mind; rehabilitation or education for entrance into a new livelihood. Reading matter for the very ill usually consisted of "funnies" in the papers, then the more attractive sheets with the brown picture sections, and, as the patient grew stronger, light-weight periodicals and books. In telling what the sick liked, Mr. Collins said that they preferred books of sustained interest, of action and of cheerfulness. He said he had labeled one class of reading "stogies" because they lasted as long as it took to smoke a cigar. On an average, men prefer books that it will take two days to read. *Outing*, *Recreation*, *Physical Culture*, and the *Cosmopolitan* were among the most popular periodicals. Books, whose plot is laid in England or abroad are not popular. The men want books written by American authors such as Beach, Gray, White, Wister, Davis, O. Henry, and Enos Mills. Popular poetry is represented by Kipling, Service and Shakespeare. Out-of-door essays, essays by Frank Crane, Crothers and Stevenson were also in demand.

Miss Stebbins of the Fort Collins Public Library started the discussion on influencing the library trustees for a larger appropriation. In Fort Collins this had been done by speaking personally to the city fathers. In the days when the city council consisted of ten men, this had

been easier than under the commission form with only three men, because two of the three may easily agree. Lucy Baker of Colorado Springs said she left all financial matters regarding budget to her trustees. It was the consensus of opinion that the trustees and influential citizens were the people who could best impress the necessity of a larger budget for the library upon the powers that be, and that this was their main work. Mrs. W. H. Scheer, a trustee from the Eaton Library, gave a history of their work, which started in 1901. This library of 5000 volumes has made it possible for the local high school to be placed on the accredited list of schools for college entrance.

The last session was given over to a talk about his collection of Coloradoana by Edward B. Morgan of Denver, who began his collection in 1887 when he was a student in Harvard. It is now a valuable collection of from 2500 to 3000 volumes and 4000 or 5000 pamphlets. "Collecting is seldom contemporary," Mr. Morgan said, "and that is the reason it is so fascinating. It has a zest of pursuit, an element of adventure that might well appeal to the hunter or angler." In answer to a question about what one should collect, he replied, "Everything; directories, theatre and church programs, ballots, letters, photographs, books. Books with a Colorado imprint as well as Colorado authors, association books or books which have belonged to Colorado people, and books about Colorado, all these should belong to this group." He suggested the possibility that Pike's personal copy of Pope's translation of the Iliad might have been the first book printed in English in Colorado. In talking about the various editions of Pike's "Explorations," Mr. Morgan called him the Christopher Columbus of Colorado. His book appeared in English, American, French and Dutch editions, but it was rumored that there was a German edition. When collectors had decided that the rumor was false, the Morgan collection acquired two copies.

It is not generally known that the territory of Jefferson which is now Colorado was an unauthorized government that separated from the territory of Kansas and proceeded to establish itself in 1859. R. W. Steele was the first governor. The manuscript copy of Governor Steele's message as well as the manuscript copies of the *Journal* and *Proceedings* of its legislature are among the treasures of this collection. The *Proceedings* of the first city council of Denver, the first map of Denver, and the first Denver directory printed in St. Louis belong to Mr. Morgan. The directory covered both Denver City and Auraria, and gave a history of the settlements on Cherry Creek. It listed fourteen lawyers. The early

election returns from Golden with its list of voters gives a census of every male over twenty-one. In those times elections did not occur in one day, but people voted when they conveniently could, and wrote the names of their candidates on any scrap of paper. Since the first establishment of the Denver mint Mr. Morgan has obtained a specimen of each coin minted. Generally speaking this has meant an arrangement with the mint and a small amount of time and outlay. However, this mint has coined money for both Mexico and of Columbia. These coins are not as easy to get, since all the metal brought into the U. S. must be returned to the government from which it comes, and the coins must be obtained abroad. This collection now has such interest that it has been exhibited in New York.

In the election which followed Mrs. Anna V. Duffield of the Loveland Public Library was elected president; Mrs. C. Henry Smith, a trustee of the Boulder Public Library, vice-president, and Lena R. Fenton of the same library secretary-treasurer. The council for the coming year will be Chalmers Hadley of Denver and Miss M. M. Boas of the Colorado Springs Public Library.

It was voted to have the incoming officers appoint a committee to take up the matter of legislation for a county library bill.

CHARLOTTE A. BAKER, *Secretary*.

LIBRARY WORKERS' ASSOCIATION

WITH the organization of the Library Workers' Association came many appeals for sectional headquarters. It was suggested that without points of contact and knowledge of conditions in various parts of the country it would be difficult to give satisfactory countrywide service. The directors felt that while this was desirable, it was hardly feasible at the outset. The result has naturally been a greater growth in sections where headquarters were first established.

Since the Association was formed for co-operative service and has received calls for workers from every part of the country, it now seems expedient and advisable to establish temporary headquarters in a new locality. The Association is still young and untrammelled. If it can successfully carry out this scheme a further development will be considered.

Our first move will be to the middle west. The Library Workers Association's address after February first and until further notice will be care of Public Library, Sioux City, Iowa. This arrangement is made possible thru the courtesy of the Director, Mr. Sumner.

MARIAN C. MANLEY, *Executive Secretary*.

AMERICAN LIBRARY ASSOCIATION COUNCIL MEETINGS

A JOINT (open) meeting of the A. L. A. Council with the League of Library Commissions was held on Tuesday, December 28th, 1920.

Samuel H. Ranck of Grand Rapids, and Ora L. Windermuth of Gary, Ind., presented the subject of "Sources and Responsibilities for Public Library Revenues" in two papers printed elsewhere in this number.

The following contributed to the discussion: Arthur E. Bostwick, Linda A. Eastman, Henry N. Sanborn, Grace D. Rose, Mary Eileen Ahern, Adam Strohm, Elizabeth Claypool Earl, M. S. Dudgeon, Wm. J. Hamilton, Wm. F. Yust, J. L. Wheeler, Frank P. Hill, Anna MacDonald, Julia A. Robinson.

In the course of the discussion varying usages and many opinions regarding the most desirable way of securing city library appropriations were brought out. Dr. Bostwick said that in St. Louis the library tax is voted directly by the people of the city, the city government having nothing to do with it. This is under the state library law, which provides a maximum, and a maximum tax voted at the polls by the people of St. Louis can be withheld or lessened only by a similar vote at the polls. Miss Eastman reported that in Cleveland the Budget Commission usually grants the conservative appropriation asked for by the Library Board. This year, however, when the Commission convened, it was decided that the public library was a part of the educational system of the city and that the school board, therefore, should pay out of its income for the support of the library. A friendly suit brought before the Court of Appeals resulted in the upholding of the action of the Budget Commission. Judge Wildermuth pointed out that there is no reason why the library board could not levy its own taxes if it were an elected board; but in most places, as in Cleveland, the board is appointed, and there is an implied constitutional limitation that the delegation of the power to tax must be to some body of men elected directly by the people. In Bridgeport the library income has been increased every year," said Mr. Sanborn, so that it is now seven-tenths of a mill instead of two-tenths of a mill. The Board of Apportionment decides upon the total amount of taxes, but there is Connecticut state law which is superior to the city charter. Under this law, the City Council may levy a tax not to exceed one and one-half mills on the dollar for library purposes. "We go to the City Council," said Mr. Sanborn, "and that is the only tax the Council can levy for libraries. They levy and the Board of Apportionment cannot touch it. It

has to be added to the total of the city." In Grand Rapids, said Mr. Ranck, the library board is elected by the people. The state law fixes the minimum taxation. A few years ago the State Board of Assessors, in equalizing the assessment throuthout the state, automatically increased the library revenue fifty per cent. Thus, the income from the city taxes, having increased, took care of the expansion of the library. If the library needs any more money for specific purposes, it goes before the city commission and asks for it for that specific purpose.

Further discussion brought out the opinion voiced by Dr. Hill and Mr. Yust that owing to different conditions in the various states there is no royal road to a perfect library law applicable to all states.

The second (open) meeting of the Council was held on Wednesday, December 29th. Henry N. Sanborn of Bridgeport introduced the discussion of the "Field and Functions of a National Professional Organization," in a paper given in full in the last number of the JOURNAL.

Opinions differed considerably regarding regional meetings and regional associations, but the suggestion that a very short and simple constitution would meet the needs of the Association received much support. H. H. B. Meyer said that he would like in any revision of the Constitution to have the regional feature emphasized, that in Washington and around Washington nothing would so advance the interest of library affairs as a local organization, a sub-division of the A. L. A. P. L. Windsor expressed himself as entirely of Mr. Meyer's opinion. "I cannot see anything better for the Association," he said, "than to have the membership read and digest and organize ourselves along the lines of this paper." William J. Hamilton said that Indiana "is very anxious to become a part of the A. L. A. with such an organic federation. We are not satisfied," he said, "to have 350 or 400 members of our Indiana Library Association and from 100 to 125 members of the A. L. A. We want to take part in some joining by which every member of the I. L. A. can become automatically a member of the A. L. A." The executive committee of the I. L. A. has been awaiting action of the A. L. A. before drafting action for the State Association next fall."

The President then introduced the question of holding conferences biennially instead of annually, and of holding, say, half a dozen regional meetings in alternate years. Julia Robinson thought that that might be a move in the right direction, as it would enable people to come in touch with the A. L. A. more readily.

Mr. Meyer said that he thought that a reduction of the total number of library meetings, by a number of states combining to have one reg-

ional meeting would be a move in the right direction. Joseph L. Wheeler pointed out that this might, on the other hand, have a tendency to cut down the attendance of librarians who have to travel long distances. Elizabeth Claypool Earl, at the request of the President, spoke of the function of the General Federation of Women's Clubs, which meets in alternate years, while the state meetings take place in the other years. This has worked admirably. Charles E. Rush raised the question as to how a proposed national democratic organizations could transact business with despatch if it met only in alternate years, and Mr. Sanborn pointed out that an executive committee and a council, both representative bodies, could meet twice or as many times a year as necessary to transact matters of business, that publication and other business should be left to the executive committee, except where there is a change of policy involved.

Reverting to the question of regional associations, Dr. Bostwick thought a mistaken impression had been taken up by some of the members. His idea was that no state associations should be done away with, but that the regional associations would come to the assistance of such states as were not strong enough to maintain their own associations, that regional organizations might profitably be formed wherever possible, not necessarily state-wide organizations.

After further discussion, the chairman announced that a committee on constitution and by-laws would be appointed immediately to bring before the annual meeting the recommendations formulated by Mr. Sanborn, so that they might be definitely discussed for inclusion in the Constitution.

Mr. Sanborn said that he thought Mr. Hill's suggestion that there should be no Constitution, except perhaps two or three paragraphs completed by a set of by-laws that could be easily changed from time to time as required, ought to be considered.

At this point the Secretary read ex-President Hadley's recommendations, based on his presidential address at Colorado Springs:

"Some preliminary suggestions for a consideration of ways and means of bringing the American Library Association and library workers into closer relation and co-operation for their mutual benefit and for promoting the welfare of libraries in America, particularly through promoting the welfare of library employees.

"It is suggested:

"First: That Section 14 of the A. L. A. Constitution be amended to read: 'The Council shall consist of the Executive Board, all ex-presidents of the Association who continue members thereof, all presidents of affiliated societies who are members of the Association, and representatives from state, provincial and territorial library associations to be elected at the annual meetings of such associations, on the basis of one representative from the association having a member-

ship of fifty or less, and one additional representative for each additional one hundred members, the representative in all cases to hold personal membership in the American Library Association.'

"Members of such state, provincial or territorial association who belong to the American Library Association shall constitute a state chapter of the American Library Association if such is approved by a vote of such association, and local groups of American Library Association members within such state or geographical division desiring to organize may become a local chapter of the American Library Association registered under the state chapter.'

"Second: It is suggested that the American Library Association issue charters for the organization of these state, provincial or territorial associations as integral parts of the American Library Association and in these charters it shall define the proper and improper activities of these working units of the American Library Association.

"Third: It is suggested that the American Library Association, thru and with the co-operation of these state, provincial or territorial associations, endeavor to stabilize and secure fair and just salaries for employees in the various grades of library service, and endeavor also to secure for all library employees proper hours of work per week, vacation and sick leave time.

"It is suggested also that recommendations made by the American Library Association on salaries, hours of work, sick leave time, etc., be made available for local use by the A. L. A. chapters, and that circular letters advocating proper salaries and working conditions be sent by the American Library Association to the individual library trustees of such library institutions as may be designated from time to time by the state or local chapters of the A. L. A.

"It is also recommended that the American Library Association give personal assistance when possible and when requested to do so, to its state and local chapters when questions affecting salaries, hours of work and the general welfare of library employees are being considered by these chapters, and that the A. L. A. assist in every possible way to advance and stabilize library salaries as the means to do so present themselves in the proposed closer relations between the American Library Association and its members."

The following took part in the discussion: A. E. Bostwick, Wm. J. Hamilton, C. W. Andrews, Henry N. Sanborn, Mary Eileen Ahern, S. H. Ranck, W. M. Smith, O. S. Rice, Adam Strohm, Linda A. Eastman, F. W. Schenk.

Dr. Bostwick thought that state chapters of the A. L. A. would be a great mistake, that they would conflict with state organizations, that the associations of which he had spoken would be in places where there are now no associations, that there would certainly be a conflict where there was a state chapter of the A. L. A. as well as a state association. Mr. Hamilton disagreed regarding the danger of misunderstanding between state chapters and state associations. He thought that a large number of state associations would be willing to merge themselves to lose their identity and to become chapters of the A. L. A.

The question having been raised as to the advisability of increasing the annual dues, a number of those present favored an increase.

The Committee on Publications (Dr. Bostwick, Mr. Root and M. G. Wyer) presented the following report:

"The committee appointed to report to the Council on the constitutionality or advisability of the employment of a publisher by the Executive Board, begs to report its recommendation that this matter be referred to the Publishing Board for such disposition as in its judgment may seem proper."

The report was approved by a vote of nineteen to one.

Mr. Tweedell, treasurer, presented a report on the status of War Service, Enlarged Program Campaign and Books for Everybody Funds, and some discussion of the War Service Continuation work followed.

At the suggestion of the President it was voted that the President appoint a Committee on Committees, to report to the Council. It was understood that the purpose of this committee is to draft a brief statement showing what is the work of each committee, and also to make recommendations as to the committees which should be created or discontinued.

FILE EXECUTIVES' ASSOCIATION OF PHILADELPHIA

At the monthly meeting of the File Executives' Association, held at the Arcadia Café on Oct. 12th, C. W. Norton of Shaw Walker Co. gave a talk entitled "Built Like A Skyscraper," dealing with the steel file cabinet in its earliest stages and up to its present state of usefulness as a file device.

At the November meeting officers elected to serve during the year were: President, Mary R. Moen of the Pennsylvania Compensation Rating and Inspection Bureau; vice-president, Lillian Guenther of the Hercules Powder Co., Wilmington; treasurer, Grace T. Chamberlain of Drexel & Co., and secretary, Helen M. Blair of the Philadelphia School of Filing.

The December meeting was devoted to an interesting paper by L. L. Schroedel of the Yawman & Erbe Mfg. Co. on "Criminal Identification Systems and Records," and Mr. Schroedel offered to take any members who were interested to see the "rogues gallery" and the criminal records on file in the City Hall.

HELEN BLAIR, *Secretary.*

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department

POSITIONS OFFERED

Wanted, trained children's librarian. Salary \$1200. St. Joseph (Mo.) Public Library.

Librarian wanted for small library to be open afternoon and evening, only. Salary \$1000. Apply, sending references, etc., to Mrs. G. M. Tooker, Port Jefferson, N. Y.

Wanted, an assistant in the reference department of the Providence Public Library, Providence, R. I.; also a general assistant. Address William E. Foster, Librarian.

POSITION WANTED

Librarian with six years' experience in cataloging and reference work wishes to hear of a position, preferably in New York State. Address: R. T. 3, care of the LIBRARY JOURNAL.

Librarian with college and library school training and many years experience wishes responsible position. Has had charge of large technical library and also experience as head

of cataloging departments. Address: A. B. 3, care of the LIBRARY JOURNAL.

A high school librarian, college and library school graduate, with five years' experience in a public library and five in a high school library of 4000 volumes, would like a change of position either to a college or high school library in the east. Address: M. B. 3, care of the LIBRARY JOURNAL.

College man, with five years' library experience, including junior year 1916-17 at New York State Library School, and with knowledge of foreign languages, desires position preferably in a law, business or college library. Address: G. V. M., care of the LIBRARY JOURNAL.

A librarian who has had a college education and library school training, in addition to six years' administrative work, wishes a change of position. Would like a position as librarian or head of a department in a library in Iowa, Wisconsin or Indiana. Address: A. Y. E. 2, care of the LIBRARY JOURNAL.

BILLINGSLEY, Mary P., 1908 I., appointed librarian of the Federal Reserve Bank of Kansas City.

BROWNELL, Lena V., 1909 W., on leave of absence for a year from the Portland (Ore.) Public Library, returned in the fall and was appointed chief of the Catalog Department.

BUDLONG, Minnie Clark, 1910 W., has given up her work in the branch libraries of Kalamazoo (Mich.), for family reasons.

CONGDON, Ferne L., 1914 W., goes from the public library at Superior, Wis., to Kalamazoo (Mich.), as cataloger in the place of Mrs. Frances Hogg Button, resigned.

EMERSON, Ralf P., 1916, N. Y. S., has succeeded Paul R. Byrne as Corps librarian of the Eighth Corps Area with headquarters at Fort Sam Houston, Texas.

GAGE, Laura Jane, 1915 W., is librarian for W. A. Gilchrist, forester, People's Gas Building, Chicago.

HOLMES, Florence I., 1912 N. Y. S., has gone to the East Orange (N. J.) Public Library as head cataloger.

HUGHES, Mary, 1914 C. P., appointed director of the children's work in the Kalamazoo (Mich.) Public Library.

MACRUM, Adeline M., 1915 C. P., technical reference librarian for the Morris Knowles Company, Pittsburgh, Pa., resigned, to become librarian of the Tuberculosis League, of Pittsburgh, Pa.

MATTERN, Johannes, assistant librarian of the Johns Hopkins University, is the author of an

exhaustive study on "The Employment of the Plebiscite in the Determination of Sovereignty," published in the Johns Hopkins University Historical and Political Science series.

METZ, Corinne A., 1907 N. Y. S., appointed librarian of the Spades Park branch of the Indianapolis Public Library.

NEUHAUSER, Anna M., librarian of the Bureau of Municipalities at Harrisburg, Pa., died in November of pneumonia.

PARROTT, Retta, reference librarian of the San Francisco Public Library, is the author of "Library Windows," being twenty-six sonnets which show the "principal changes of the seasons, as observed thru windows of the city library from the viewpoint of the reference librarian." They are published by the Harr Wagner Publishing Co., San Francisco.

RATHBORNE, Alice Lambert, acting librarian of the Denver State Library since 1912, resigned in July and is succeeded by Mrs. J. B. Hyder, who has been assistant in the library for the past two years.

RICHARDSON, Felix, librarian of the Denver Supreme Court Library since 1905, resigned last summer.

SHAW, Gertrude, 1916 S., appointed librarian and teacher at the North Attleboro (Mass.) High School.

SKAAR, Martha O., 1918 W., is librarian of the Mechanic Arts High School, St. Paul, Minn.

TOWNER, Isabel L., 1907-08 N. Y. S., resigned as classifier at the University of Minnesota Library, January 1, to become librarian of the National Tuberculosis Association, New York City.

TOWNSEND, Lenore has returned to her former position as head of the school and children's work of the Spokane (Wash.) Public Library.

WALES, Elizabeth B., is temporarily with the Kalamazoo (Mich.) Public Library. She is conducting an apprentice class and assisting with the branch libraries.

WALTER, Frank Keller, has joined the faculty of the Library School of the University of Illinois for the remainder of the school year.

YEOMANS, Ruth, head cataloger of the Spokane (Wash.) Public Library for eight years, has resigned and will retire from library work March 1, to live on her ranch at Chewelah, Wash.

ABINGDON

BOOKS of Value

IN this intense age of mass-production reading has become almost a problem of moments. Yet the need for it has increased. For it is in books—good books, that we find those essential experiences which bring to us a fuller knowledge of the relationship of Life. It is the thoughts, the truth, the reality, they awaken in us, that makes them so valuable, so indispensable.

Such are ABINGDON BOOKS—*Books of Value*.

STEPS IN THE DEVELOPMENT OF AMERICAN DEMOCRACY

By Andrew Cunningham McLoughlin

"Clarity of language, sanity of judgment, wealth of scholarship, skill of selection and construction and a truly eloquent fervor of conviction characterize the pages from first to last."—The Evening Post, New York.
Cloth. Net, \$1.50, postpaid.

MY NEIGHBOR THE WORKINGMAN

By James Roscoe Day

Chancellor of Syracuse University

"The book is a contribution to sane thought and helps to strengthen the American believer in true principles of free action in a democratic republic and not class oligarchy."—Pittsburgh Dispatch.

Cloth. Net, \$2.50, postpaid.

BERGSON AND PERSONAL REALISM

By Ralph Tyler Flewelling

This new volume by Professor Flewelling is
1st—A critique of Bergson, showing his deficiencies on the side of the Philosophy of Religion.
2nd—A constructive discussion of Personal Realism, aiming to show that Personality is the supreme metaphysical and spiritual reality.

The manuscript of this volume was prepared under the direction of the Sorbonne and in consultation with Professor Bergson.
Cloth. Net, \$2.00, postpaid.

CITIZENSHIP AND MORAL REFORM

By John W. Langdale

PROBLEMS

Post-Prohibition Problems, The New Criminology, The Family, Industrial Relations, Abolition of Poverty, Americanizing America, International Cooperation.

Studies in the relation of the preacher, as a Christian citizen and moral leader, to these problems and pending reforms.
In Press.

THE FUTURE LIFE—FACT AND FANCIES

By F. B. Stockdale

The Fallacy of the Ouija Boards and Mediums. The Foundation of Faith. Critical, Convincing, Constructive.
In Press.

THE RELIGIONS OF MANKIND

The Long-Waited-For Book on Comparative Religion.

By Edmund D. Soper

Bringing to his task the necessary equipment in scholarship, sympathetic interest and evangelical faith the author has produced a volume of great importance and outstanding value. A book that fills a vacant niche. In Press.

(Prices are subject to change without notice)

Why is Cuba the Key to all future advancement of American interests in Latin America?

What are the opportunities and possibilities for expanding American trade with Cuba?

How much greater are Cuba's imports than those of Brazil with ten times Cuba's population?

Along what lines have Americans invested many hundreds of millions of dollars in Cuban enterprises?

Why is a good knowledge of Cuban history necessary for the promotion of American interest in both Cuba and South America?

Your patrons are interested in all of these subjects.

The HISTORY of CUBA

By Dr. Willis Fletcher Johnson
of New York University

Answers all of these questions and hundreds of others equally important, commercially and historically.

Profusely illustrated. Handsomely bound in five volumes

NEW YORK CINCINNATI

IN THE LIBRARY WORLD

NEW YORK

As the result of the efforts of the committee of the New York Library Association on work with the foreign-born, the following facts as to foreign language books owned by various libraries in the state and offered by these libraries as free loans to other libraries have been compiled:

There are in all nearly six thousand volumes available for inter-library loan. Of these, 38 are in Arabic; 89 Czecho-Slovak; 17 Croatian; 47 Danish; 2677 French; 2028 German; between 60 and 70 Hungarian; 110 Finnish; 127 Greek; 21 Hebrew; 1734 Italian; 140 Lithuanian; 1246 Polish; 88 Russian; 66 Slovak; 249 Spanish; 278 Swedish; a few Syrian; and 802 Yiddish.

Albany. The New York State Library School celebrated the thirty-third anniversary of its foundation on January 5th. Melvil Dewey and Mrs. Fairchild sent greetings. The new course on the library and the community was introduced by five talks by Joseph L. Wheeler of Youngstown during the week of January 17th.

New York City. In the making of exhibitions the Prints Division of the Public Library has reached Japanese prints, which will be on exhibition until April 15, Room 321. Technique is illustrated by tools and pictures, and the application of the process shown in the choicest color prints in the Library's collection, including prints by Harunobu, Kiyonaga, Koriusai and Utamaro.

The Pratt School of Library Science reports that the class of 1920, the smallest which the School has graduated in twenty-five years, was also a class of such fine material that the initial salaries of graduates averaged \$1313, being \$224 more than the average of any previous class. A questionnaire sent out in the fall of 1919 to graduates of the School showed that in a period of three years the average salary, \$1463, had increased \$300, or 32 per cent. Very few of the graduates replying (over 300 answered the questionnaire, only 16 of the active graduate body failing to respond) do any one kind of work exclusively; for example, only 30 did cataloging alone, while 131 others did some cataloging in combination with other kinds of work; only 8 did general reference and 5 special reference work all the time, but 147 did some general and 32 some special reference work. Cataloging leads all other branches as the kind of work done by more individuals, with reference, adult circulation and children's work following in order. A

large majority of the graduates work in public libraries, there being 134 in public libraries to 47 in educational libraries and 51 in special libraries. The replies also showed distinct tendency toward shorter hours, the average being 40 hours and 48 minutes a week for public libraries, 38 hours and 40 minutes for educational libraries, 38 hours and a half for special libraries, while 64 graduates replied that no definite number of hours were required of them. Out of the 300 replying 67 had taken new positions within the past year, and 23 reported no change in positions or salaries in the last three years.

Elmira. More than three hundred alumnae of Elmira College have subscribed to Elmira College Library Bonds, the proceeds of which will be used for the building of a much-needed new library. Each bond represents a gift of \$50. Some of the bonds have been paid for in full and others are being taken on the two-dollar-a-month plan of payment or on larger instalments. In some cases Liberty Bonds have been exchanged for the Library Bonds.

NEW JERSEY

Princeton. Benjamin Strong, Jr., governor of the Federal Reserve Bank of New York, has presented to the library of Princeton University the Strong Collection relating to economic aspects of the war.

KENTUCKY

A splendid library room has been added to the equipment of the school of foreign service at Georgetown University. A library of foreign trade and allied subjects is well under way.

OHIO

Cleveland. All records of a twelve-month circulation of books at the public library were broken in 1920. A total of 3,714,456 books was issued, exceeding by more than 237,000 the largest previous total. The total number of visitors to the library during the year was 2,441,079, showing an even greater increase in the reference use of the library than in circulation. The largest circulation in any month in the history of the library was that of November, when 408,016 volumes were issued, exceeding by almost 30,000 volumes the highest previous total for any month.

About 2,400,000 of the 3,600,000 volumes loaned annually by the library are books taken for recreation. Making a moderate allowance of three hours per book, the library affords

CRAM'S MODERN REFERENCE ATLAS

THE STANDARD SINCE 1867

THE new census edition of Cram's Modern Reference Atlas is now ready. The 1920 census statistics of the United States and the new world maps, showing all territorial changes made by the war, make this edition the most valuable reference work we have issued in all the 53 years we have been publishing maps and atlases.

New Maps—New Statistics

An entirely new set of maps, large scale, clearly engraved and judiciously colored, has been specially prepared for this edition. The descriptive matter of the physical and political geography of the nations of the world has been rewritten and brought down to the present day. The index and all the statistical tables have been carefully compiled from the new 1920 census figures.

Special Features

Descriptive Gazetteer of each state and country, giving data on soil, climate, resources, industries, population, progress, etc.; 300 pages of maps, including 90 large double page maps of states and foreign countries, and of principal cities of U. S.; general resume of postal, cable and telegraph information; topographical and geological maps; biblical and historical maps; statistics on commerce and finance; carefully prepared index of 250,000 places, giving population, location on the map, etc., and indicating post offices, incorporated places, county seats, capitals, etc.

The new Modern Reference Atlas is 12 x 15 inches in size, contains 496 pages, and weighs nearly 10 pounds. It is printed on finest quality heavy map paper and bound in buckram.

The price is \$19.50—prepaid anywhere in the U. S. Descriptive circular, with sample maps, sent on request.

The George F. Cram Company
 Atlas Headquarters—Established 1867
 121 N. Market St., Chicago. 119 Nassau St., New York.

7,200,000 hours of book enjoyment annually, and placing upon amusement the very moderate price of ten cents an hour—a price for which no self-respecting movie nowadays would entertain one—the library offers yearly \$720,000 worth of amusement. The other one-third of the total number of books loaned 1,200,000 has a value to the community less easily measured, but far greater. Most of the 180,000 pupils and of the 8,000 teachers in the city's schools use the library in some way, as do clerks, mechanics, salesmen and executives of all kinds. For this service the city pays \$690,000 a year, or about seven cents a month a person.

INDIANA

Indianapolis. Because of the serious book situation in the Indianapolis Public Library, due largely to the increase in the number of library readers (there are 59,092 home readers, a 30% increase in the last three years) and an abnormally low book fund, which buys from 40% to 60% fewer books than before the war, public sentiment is being aroused which, it is hoped, will be expressed in gifts, wills, bequests and donations of the citizens to the library. To cope with the present situation, an emergency appropriation of \$10,000 has been made by the Board of School Commissioners.

The telephone is becoming an active agency in the service of the library, reference help given by telephone during December showing an increase of 125% over that given during the corresponding period last year at the central library, and 100% at the business branch.

There were 109 meetings held in the library auditorium during the month.

MICHIGAN

Alma. Alma College conducts a class in Library methods for which college credit is given. Eleven students are at present taking this course.

Detroit. The Detroit Public Library extends its service to the blind of the city, not only by a circulation of books specially prepared for the blind, but thru the services of volunteer assistants who read aloud to the blind in their homes. The library keeps a file of the names of those willing to give this service. Most of the six volunteers at present helping are employed people, and all are women with many interests and many demands upon their time, but who nevertheless devote regularly some hours weekly to this work.

MILWAUKEE

Milwaukee. The budget allowance for the Public Library for 1921 was set at \$246,258.00. This is \$41,524.00 in excess of 1920 allowance and is the amount asked for by the board of

trustees. The library has a permissive mill tax amounting to .3 of a mill of which .264 is mandatory under state statute.

The county branch system of the Milwaukee Public Library has been extended so that every resident of the county is within walking distance of a branch library. Nearly all of the rural schools in the county contain branch libraries, except in cases where they are located near one of the main branches. This county system was organized under a state law passed in 1913. In 1917 the library was authorized to levy a fee of ten cents for the circulation of each book to cover cost of operation, two and one-half cents of which goes to the librarian in charge. This is a mandatory charge upon the county board which is apportioned among the towns, villages and cities of the county according to book circulation in each division.

During 1920, 1,778,661 books were borrowed for home use from the Public Library, an increase of 115,113 over the number for 1919. This makes a daily average of 5737 for 1920 as compared with 5445 in 1919. Of the total circulation 327,443 volumes were taken from the main library, and the remainder (over 80%) thru the 66 city and county branches and the 124 smaller libraries in schools, factories, etc. There is a library in every school in the county except two which are in the neighborhood of branch libraries.

Gifts to the library totaled 4353 volumes, and 29,008 were added by purchase. Of the whole number of accessions 33,183 volumes were in English, 82 in German, 69 in French, and 27 in other languages.

WASHINGTON

Spokane. The Trustees of the Public Library have approved, to take effect January 1, a new scale of salaries as follows: Assistants, \$90 to \$115; branch librarians, \$120 to \$140; departments heads, scale not determined, but four have been raised from \$1,650 to \$1,800 and one from \$1,800 to \$1,980.

The 1921 budget carries \$48,329 for salaries, \$8,600 for expense, \$12,280 for books, \$2,900 for periodicals, \$4,000 for binding, \$550 for furniture, a total of \$76,659. The population of the city is 104,000.

NEW ZEALAND

Wellington. The library of the late R. H. Turnbull has been bequeathed to the nation. So far as it is known, there are over 40,000 bound volumes, including many rare and valuable first editions and a large number of unbound books, pamphlets, charts, original historical drawings, etchings and autographed letters by eminent men.

★
REPRINT

Of this important standard work, indispensable to librarians, collectors, museums, etc., a reprint will be shortly published. The basis will be the last or 5th edition of which Brunet himself said: "Cinquième édition originale entièrement refondue et augmentée d'un tiers par l'auteur."—The reprint will be an exact reproduction page by page and column by column of the original edition.—From a technical point of view the famous house of Brockhaus has done its best by making use of the latest improvements. The name of this firm stands for the whole production: first class print, best paper and solid bindings—For many years this standardwork, indispensable to every one who is interested in books, has been out of print and high prices have been paid for it in the antiquarian booktrade. Already much in demand in earlier years, within the last few years especially Brunet has become more and more in all countries the invaluable bibliographical dictionary which can not be replaced by any other publication. Brunet is indispensable to the bookseller and bookcollector, not less than to libraries, museums and institutes by the unparalleled careful annotations and references.

The number of copies of this reprint is limited.

Two of the U. P. C. Auto Books

Battery Service Manual

A guide for the battery repairman and shop owner in testing, locating troubles, making repairs and charging batteries, with a Trouble Chart in which all known defects are listed with the cause of the trouble and the proper remedy opposite each. Plans and layouts for battery stations, with complete information on the management of the business, forms, order systems, charging rates, etc., are included with a glossary of terms and a list of manufacturers of batteries, repair parts, tools and equipment for battery service.

One Storage Battery Trouble Chart, 24x27 ins., 170 pp., 63 Figs., Flexible Fabrikoid, \$2.50.

Electrical Equipment of the Motor Car

A practical manual on Ignition, Starting and Lighting, in which special attention has been given to the fundamental principles of electrical engineering as applied to the electrical equipment found on the modern motor car. These fundamental principles are so clearly explained that it is a comparatively easy task to trace out and locate all cases of electrical trouble in a very definite and systematic way.

The book is well illustrated and numerous special diagrams have been prepared to bring home more forcefully the subject matter under discussion.

712 Pages, 5 x 8 ins., 464 Figs., 256 Blueprint Wiring Diagrams, Flexible Fabrikoid, \$3.50.

PRESS NOTICES.

CHRISTIAN WORLD—This is a timely, impersonal, dispassionate, analytical unanswerable discussion of the weaknesses and inconsistencies of the Christian Science Church. It overflows with facts which provide the ground-work of the author's incisive argument . . . and is as clear as sunshine and as irrefutable as the decalogue.

THE EVANGELICAL MESSENGER—The spirit in which his exposures of inconsistencies in the organization are made is very commendable, and adds merit and pungency to his arguments and forceful statements. It is the only book of its kind on the market as far as we have any knowledge.

THE UNIVERSAL PATENT LOCK BINDER

Used by the New York Public Library, the Philadelphia Free Library, the Carnegie Library of Washington and other large institutions

The opinion of a Librarian:

"I may say, incidentally, that we have found these binders to be the most satisfactory of the binders we have had. We have been equipped with them for five years and we have found no reason for changing this opinion. They safeguard the magazines; they are easily adjusted and they are durable."

Write for our catalog of Handy Labor Saving Devices for Libraries.

WM. G. JOHNSTON & Co., Pittsburgh, Pa.

DEAR SIR:—

We have been using several of your Keyless Lock Binders for several months and find them perfectly satisfactory. We have had no more trouble with the "Magazine Thief" and the old numbers look as good as "the new" when taken from the binders.

They improve the looks of the reading table, keep the magazine in better condition and are so reasonable in price that EVERY Association can afford them.

Your sincerely General Secretary.

BOOKS THE PUBLIC WANT

The remarkable demand for books of self-instruction imposes an added responsibility on the librarian who, as head of the community's educational center, must be able to recommend a book that will encourage the reader's desire for knowledge.

The Clode Handbooks have, in each instance, been prepared by an authority who proves his ability to present his subject in a concise and easily-assimilated form.

The following are typical of the Clode books that every library should be prepared to supply:—

A Perfect Memory

By MARVIN DANA, M.A., LL.B., etc.

Arithmetic Made Easy

By MARVIN DANA, M.A., LL.B., etc.

Bookkeeping Made Easy

By NATHAN LEMOWITZ

Business Letters Made Easy

By PAUL W. KEARNEY

Dancing Made Easy

By CHARLES J. COLL

Drawing Made Easy

By JOSEPH CUMMINGS CHASE

Dressmaking Made Easy

By ISABEL D. CONOVER

Entertaining Made Easy

By EMILY ROSE BURT

Etiquette Made Easy

By EDWARD SUMMERS SQUIER, M.A.

French (An Easy Study Manual)

By EDOUARD DUNOIS, M.A.

Grammar Made Easy

By MARVIN DANA, M.A., LL.B., etc.

How to Develop Your Personality

By CLARE TREE MAJOR

How to Develop Your Speaking Voice

By CLARE TREE MAJOR

How to Develop Your Will Power

By CLARE TREE MAJOR

How to Train Your Mind

By MARVIN DANA, M.A., LL.B., etc.

Law at a Glance

By MARVIN DANA, M.A., LL.B., etc.

Penmanship Made Easy

By EDWARD SUMMERS SQUIER, M.A.

Public Speaking Made Easy

By ALEXANDER BURTON

Short Cuts in Figures

By A. FREDERICK COLLINS

Shorthand Made Easy

By MARVIN DANA, M.A., LL.B., etc.

Social Letters Made Easy

By GABRIELLE ROSIERE

Spanish (An Easy Study Manual)

By EDOUARD DUNOIS, M.A.

Spelling Made Easy

By MARVIN DANA, M.A., LL.B., etc.

Edward J. Clode,

PUBLISHER

New York

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Chivers Book Binding Co., Inc.

911-913 Atlantic Avenue

Brooklyn, N. Y.

Our Library Department

With its many years of experience, together with our unsurpassed stock of books of all publishers, combine to make a library service of unexcelled efficiency.

**Public Libraries, Schools,
Colleges and Universities**

have their book orders handled intelligently, expeditiously, and accurately by us, and find our prices satisfactory. We solicit correspondence from librarians not acquainted with our facilities.

"I visited with a natural rapture the largest book store in the world."

See the chapter on Chicago, page 43, "Your United States," by Arnold Bennett.

A. C. McClurg & Co.

CHICAGO.

Think of having only three titles for a Spring list - - -

But Watch For The Demand

Three titles comprise the entire *Cosmopolitan* list for the Spring of 1921.

Startling, isn't it?

Then, again, it isn't!

Because each of the three titles was selected with one end in view—

Their appeal to the great reading public.

And *Cosmopolitan* Books are in demand—always.

Our Spring list will have:

God's Country—*The Trail to Happiness.*

By James Oliver Curwood.

The strangest thing Curwood has written.

And one of the most beautiful messages of hope addressed to mankind.

It tells of the regeneration of a killer.

It reaches the heart.

Ready March 19th. Price \$1.25.

Then there comes

Find The Woman

By Arthur Somers Roche

It is the story of the *Girls of Your Dreams.*

Read and stand amazed at what happened when Clancy Deane, the country girl, was

swept into Manhattan's mad whirlpool of life.

Millions of magazine readers love the stories of Arthur Somers Roche.

Here is an opportunity for book readers to discover him at his best.

Find the Woman—*a Novel of Youth and Mystery*

4-color jacket and illustrations by Dean Cornwell.

Ready March 19th—Price \$2.00.

Now we introduce a new *Cosmopolitan* author:

Coningsby Dawson—

The Kingdom Round the Corner

His first *Cosmopolitan* novel.

Watch us put him over the top along with Peter B. Kyne and James Oliver Curwood.

The Kingdom Round the Corner is the manliest, tenderest and altogether the most charming story we've read in many a day.

And it will be advertised!

Oh yes, in the *Cosmopolitan* way.

4-color jacket and illustrations by W. D. Stevens.

Ready about May 15th. Price \$2.00.

Yes, there are only three titles in *Cosmopolitan's* Spring Books, but each is a quality product that the librarian can be as proud to offer to borrowers as we are proud to publish.

Cosmopolitan Book Corporation

119 WEST 40th STREET, NEW YORK

Coming in the Fall: *The Flaming Forest*, By James Oliver Curwood, and *The Pride of Palomar*, by Peter B. Kyne, and a \$100,000 typical *Cosmopolitan* advertising campaign.

It goes without saying---

A library is as good as its equipment plus the right organization and administration.

Library Bureau announces

A new and completely revised edition of
"A LIBRARY PRIMER"

By John Cotton Dana
Librarian, Public Library, Newark, New Jersey

Increased to 280 pages with 65 illustrations

It is an invaluable reference work for library organizers, library schools, and all who are interested in the introduction of modern ideas for all types of public, school, business, or private libraries.

Equipment, methods, and records clearly and fully described.

You can not do without this book.

Do not delay—Place your order for early delivery.

Library of Congress Classification for College Libraries*

By J. C. M. HANSON, Associate Director of the University of Chicago Libraries

AS I recall it, the main point in your letter was whether or not I consider the Library of Congress Classification as suitable for college libraries—the smaller as well as the larger institutions. My answer to this question must be “yes” and “no,” chiefly “yes,” however. My reasons for emphasizing the affirmative is that I know of no other classification system which I could recommend as preferable to the L. C. for a college or university library. The negative is inserted because, like all other classifications, the Library of Congress has its shortcomings and defects, some of them rather serious ones.

Perhaps it will make matters a little clearer if I preface my statement with a brief note on the early development and origin of the L. C. Classification, apologizing at the same time for referring to my own connection with it.

My first practical experience in classification dates back to 1890. It was in connection with the modified Dewey as applied at the Newberry Library. From 1893-1897 I had occasion to work with Cutter's Expansive Classification at the University of Wisconsin. In deciding on Cutter in preference to the Decimal at the University of Wisconsin in 1893, we were influenced largely by Dziatzko's statement in his “Sammlung Bibliothekswissenschaftlicher Arbeiten,” particularly his work on General-katalogisierung, where he finally sums up his estimate of the D. C. by saying: “For smaller popular libraries, a convenient apparatus—for large and scholarly libraries, an insufferable strait-jacket,” also by consideration of the more elastic notation provided by Cutter, and the likelihood that his new classification would avoid some of the serious errors of the D. C.,

and present a scheme more scientific in its development and more modern in its nomenclature.

Four years with the Expansive Classification convinced me that no mistake had been made by the University of Wisconsin in selecting the Expansive in preference to the D. C. Classification. However, the irregular sequence of letters, the preliminary numbers for form classes, and other features, combined with the slow progress in furnishing additional schedules, proved a serious disadvantage.

During several informal discussions on classification and notation which I had about 1896 with Miss Olive Jones, librarian of the Ohio State University Library, the defects of both the D. C. and E. C. were gone over quite thoroly. We were both agreed that a new classification with a notation representing a compromise between the two would be desirable, especially for colleges and university libraries. As for notation, we had in mind one or two letters to indicate classes, sub-divisions to be indicated by numerals, either in regular or decimal sequence.

In 1894 Harvard College adopted its own classification, rejecting both the D. C. and the E. C. In 1896 the New York Public Library, then under the directorship of Dr. Billings, did the same. In the following year there began to appear the discussions on the International Scientific Catalog, which resulted in a classification for the pure sciences with a notation resembling in its main features that which Miss Jones and I had discussed a year or two before.

In 1897, therefore, when confronted by the necessity of submitting plans for a classification for the Library of Congress, the rough sketches drawn up on 1895-1896 were again brought out and expanded.

* Letter written in December 1920 in answer to request for an opinion from a member of the Program Committee of the Middle West College Librarians.

Fortunately, the Library of Congress had secured, about this time, the services of Charles Martel, the present chief of the Catalog Division. Mr. Martel was in sympathy with the simplified notation suggested and the main work of developing both notation and schedules was assigned to him. It is mainly due to his indefatigable zeal and interest that the classification developed as it did during the next fifteen years.

It may not be without its interest to add that Mr. Spoffard, librarian of Congress since the early sixties, and assistant librarian after 1897, had personally supervised the development of the Jeffersonian Classification, then in operation. Mr. Spoffard realized as fully as anyone the need of a new system and was most generous and friendly in his attitude toward our plans. Only on one point was he inexorable: there must be no decimals.

This was one of the reasons why decimals were not more freely used at the outset. Later on, while it would have been a relatively simple matter to convert the numbers for subdivision into decimals by writing them 0000-9999, the advantage of shorter numbers for many thousands of books was thought to be of greater importance than the slight gain in symmetry and regularity, resulting from the decimal arrangement.

In 1904 Yale University Library followed the example of the other institutions previously mentioned, and adopted a classification of its own, with a notation somewhat similar to that selected by the Library of Congress, Harvard, and the International Scientific Catalog.

I am able to recall only one large library, which since 1893 has adopted the D. C.—the New York State Library, after the fire in 1911—and I understand that even in that institution, practically the home of the D. C., there was some doubt as to the advisability of selecting this as against certain other classifications.

I have mentioned these matters to show how the tendency of large libraries has been away from the D. C., and to some extent also from the E. C., particularly since the early and middle nineties.

The objections to the E. C. seem to have been largely based on its complicated notation, and the incompleteness of schedules. As for the D. C., it is only necessary to recall, that because of its restricted notation (with six figures it is possible to number 100,000 divisions, as against 7,019,299 in the Library of Congress system with the same number), it was already

at that time obvious to close students of classification, that particularly in large and scholarly libraries requiring free and generous access to the stacks, this system must in time break down and necessitate radical changes, amounting perhaps to a complete reclassification of all the books. Other defects are so well known that it may be unnecessary to go into detail. One or two illustrations should suffice:

1. General Classical Philology forms a subdivision of Greek literature; general Romance Philology of Minor Italic Languages; General German Philology, of Minor Teutonic Languages. Obviously, when the classification schedules were first outlined, these important classes had been lost sight of, and when later on, it became necessary to provide for them, the schedule-makers found themselves between the devil and the deep blue sea. That is, for Classical Philology they would either have to back up into 469, Portuguese, or provide a subdivision under 430, Greek. The latter was chosen as the lesser evil. Romance Philology could not be provided for under 439.9, Gothic, nor Germanic under 419, Hieroglyphics, so they were assigned subdivisions under 479 and 439 respectively.

2. Bacteriology, to which the Library of Congress scheme assigns an entire class (QR), was quite naturally unprovided for in the early D. C., and the only way in which it has been possible to provide for this important class is by setting aside long and awkward numbers under 612, 616, etc. The unavoidable and forced cramping of the schedules to fit the limited notation, has necessitated in many places, the separation of subjects which should have been placed together.

The difficulty in finding a place for the literature of the European War may still be fresh in the minds of some. It illustrates the problem by which the classifier is confronted whenever a new subject has to be provided for.

Both the subject classification of J. D. Brown and Hartwig's classification for the Halle University Library have much to commend them from the standpoint of a college library, but they are little known and less used in this country. Moreover, they have not figured in large co-operative enterprises, something which tends to give prestige to the D. C. and L. C. classifications.

During the twenty-odd years that I have worked with the L. C. system, its chief advantages have appeared to me to be the following:

1. A simple, but elastic notation. There is

no fear of a general breakdown, no matter how large the number of additions, or how many new subjects turn up in the future, the literature of which will have to be accommodated without extensive changes or re-arrangements of what has previously been added. An examination of the classification will show that five entire letters have been left unused, that second letters have been left open in a great many places, and that groups of numbers amounting to hundreds and sometimes thousands have been left for future development thruout the schedules.

2. Each main class has its own, separate schedule, which can be procured at a low price. Such schedules may be placed in the stacks, departments, offices or wherever needed.

3. The classification numbers appear on the L. C. catalog cards in increasing number, representing an economy in classification which only one who has had occasion to make practical tests on a large scale can fully appreciate.

4. In addition to the Library of Congress, several government departments, university and other libraries now use the classification, contributing printed cards bearing L. C. numbers. Some, as the University of Chicago and University of California libraries print cards independently, others contribute copy to the Library of Congress, the cards being printed and distributed by that institution.

5. The U. S. Government, with its national library, is back of the enterprise, and there is small danger that it will be permitted to go by the board, like so many other bibliographic ventures of equally ambitious scope.

6. Smaller college libraries, particularly, will receive their classification numbers thru the printed cards for a very large and a constantly increasing proportion of their books.

7. The country and local subdivisions in the Library of Congress Classification have been varied to fit the particular subject, and are not uniform thruout. Some may consider this a disadvantage. Personally, I look upon it as an advantage. Mnemonic features are of little consequence to the student and professor. Besides every notation tends to become more or less mnemonic as the users become familiar with it.

8. The list of subject headings serves as a temporary index to the classification. This will be supplemented by the full index now in process of compilation. This new index will probably be by long odds the most comprehensive so far issued in connection with any bibliographic undertaking.

9. The classification has been evolved by actual application to a larger number of books than has any other system now in print.

10. Subjects have been subdivided to an extent not generally found in any other system.

Of the disadvantages of the L. C. I may note:

1. In a college or university library the class bibliography may be broken up rather than kept together as has been the case in the Library of Congress scheme. At the University of Chicago a compromise has been tried out, viz., personal bibliographies; bibliography of societies and institutions have been placed with other literature about the person or institution. It is a question whether it might not have been wiser to go even farther and disperse all subject bibliography. At the same time, it should be noted that so far there have been no complaints from professors or students on this score but, on the contrary, some commendation of the grouping of Bibliography in one place.

2. Schedules are as yet incomplete. Type-written copies must be depended on in some cases. In others, e. g., Latin authors,* Inscriptions, no schedules are available at all.

3. The classification was planned specially for the Library of Congress, more space being allowed for American history and, in general, for the historical, political, economic and sociological groups, than would have been the case, had the scheme been formulated for general application.

However, the advantages have seemed to outweigh the disadvantages to such an extent that personally I have no hesitation in recommending the adoption of the L. C. Classification for college libraries, large and small, as against any other system in the field.

In conclusion, may I state that in 1910 I had occasion, on behalf of the University of Chicago, to make a rather exhaustive study to the various classification systems in print, and in that connection to seek the advice of a number of university and reference librarians, regarding the system considered most suitable for a university library. These investigations were embodied in a lengthy report. A reference to this document shows that the great majority of the librarians consulted favored the Library of Congress classification, some of them stating that were they in a position to begin over again, this system would undoubtedly be their first choice. Five or six years later, the libra-

* Since the above was written, typewritten schedules have come to hand for Accius—Charisius.

rian of a university library on the Pacific Coast made a similar investigation, sending out questions to a large number of university and college librarians. He informed me recently that the answers showed an overwhelming majority for the Library of Congress Classification.

It is hoped that the force assigned to the classification and cataloging at the Library of Congress, which I understand, has been sadly riddled during the war, may be rebuilt and reinforced, so as to permit more rapid progress in the publication of schedules than has been the case during the last four or five years. The co-operative work of which the Library of Congress printed cards and classification schedules form the foundation and ground-work, is too important, particularly to American libraries, to be permitted to lag. If necessary the librarians of the country must stand ready to back the Librarian of Congress in his efforts to secure the funds requisite for a reconstruction of the staff.

Before I had completed the above communication, there came to hand the last number of the LIBRARY JOURNAL with notice of the Fifth

International Congress of Bibliography at Brussels. One of the main decisions of this Congress was to urge the adoption and spread of the decimal classification. This may be well enough for purposes of documentation, although even here the well known defects of the notation and the schedules must in time prove so serious as to force radical changes and departures. As for application to the backs of books and to catalog cards, the Brussels notation is, for the most part, out of the question. This is an important fact which has not been given sufficient prominence by the men who are backing the Brussels modification of the D. C. as a universal classification and notation suitable for all countries, all subjects, and all time.

Note: While reading the proof of the above letter, which, at the time it was written, I had no idea would be submitted for publication, I notice in a library periodical the announcement that the League of Nations Library has adopted the Decimal Classification (Brussels Modification). I venture to state, that should that enterprise result in the upbuilding of a large collection of books on International Law, Diplomatic and Foreign Relations, Political Science, History and Economics, some librarian will in time be confronted by an extensive and expensive piece of reorganization.

Social Problems of a Library Staff

By MADELENE B. HIRTH, Detroit Public Library

UPON glancing at this title, one would wonder what social problems could possibly arise among the members of such an intellectual and more or less self-satisfied group of people. In our effort, however, to look after the welfare of the industrial groups, we have to a certain extent forgotten that the professional people may have their problems. Thru my own experience as staff secretary (social director) in the Detroit Public Library, where there is a staff of about three hundred girls and women, it has been proven that they *do* have their problems.

Since my work is comparatively new, and I believe, unique in the library field, I can write only from experience and observation.

The chief aim in opening the office of the Staff Secretary was to promote better co-operation thruout the staff. The members of the staff are scattered over the city in various departments and branches, hence they have little op-

* Thesis for Sociology 29s and 19s, University of Michigan.

portunity of knowing each other personally. May I say that we are endeavoring to remodel a secondary or institutional group into a primary

or "we"-feeling group. This is being accomplished thru occasional social affairs and democratic group meetings, or forums, as it were, where individuals may express their feelings freely, discussing situations and problems which arise thruout the system, many of which are common to all. Problems of importance are submitted to the librarian for his consideration. These group meetings fulfil a double purpose—besides promoting a feeling of goodfellowship and unity, they tend to advance individuality. One's own personality and ideals are brought to the foreground thru expression of opinion. As is taught in the study of social organization, the group is capable of expression thru its most competent members, thus thru these meetings we are able to judge better who are the competent members of the staff. The good material always stands out. Special talent may be used for both business and social purposes. One is more inclined to express tendencies and ideals in a social group than elsewhere. Expression of opinion is good training in self-control, the latter a valuable asset for library work, since it furthers one's ability to meet the public with ease.

Another aim is to promote a spirit of service. When all are working for a common interest and enter into the spirit of unity, petty jealousies are eliminated and long hoarded up ills forgotten.

To do justice to the office of staff secretary, the city librarian himself must be a broad-minded man in close touch and sympathy with his staff. A very important consideration on his part is that of salaries. If salaries are inadequate, every effort should be made to give the staff a living wage. Even the people in professions oftentimes give themselves over to their work more for the love of it than from a pecuniary point of view, it is necessary to pay them a sufficient salary to keep up with a proper standard of living. We are not desirous of employing those who would be satisfied with poor living conditions, because such people tend to lower the standard of living.

The social director also looks after the personal side of the employee's life and renders personal services of which the heads of departments would undoubtedly take care with pleasure, if they could devote their time to this sort of thing. It is a generally accepted view, nowadays, that to be working among congenial people and living under favorable, healthful conditions, everyone is better fitted to fulfil her daily tasks. A person of culture, however, is more or less reticent about complaining and begging personal assistance, so that one must understand human nature, and be entirely in sympathy with her group to know how to win the confidence of those who really need help, being careful not to overstep the mark. The professional woman has a double burden in that when she has troubles to bear, she bears them alone, and is too proud to admit of having any.

The social work in the library world is different from that in other fields. The staff is expected to be and for the most part is of high calibre morally and has had good home training. Its members would resent any dictation as to mode of dress, mannerisms, expenditure of money, etc. There are, however, a few instances when girls use poor judgment, are perhaps too elaborately dressed for business, or are untidy. In such cases one must employ careful consideration and tact in meeting the situation.

It is quite important that the staff secretary be someone chosen from among the staff, one who understands the working system of the library, and is acquainted with everyone on the

staff. One of her duties is to introduce new members upon arrival, to the librarian and to the head of the department or the staff with whom she is to work. It is also necessary that she be somewhat interested in civic affairs in order that she may efficiently handle problems which may need attention from civic authorities. For one is obliged at times to obtain legal advice in order to gain justice from penurious landladies, etc. Last winter we had occasion to apply for a writ of replevin to recover personal property withheld from an assistant by an unscrupulous person.

Exorbitant prices for rooms should be reported to the police. One woman was found renting a room to three girls, charging five dollars per week each, which netted her an income of sixty dollars per month for one room, almost the amount paid for the entire house. Many people rent rooms for eight or nine dollars per week, where there is perhaps no heat or means of ventilation. In one house where a room for rent was advertised, a cot was placed in a hallway and the occupant was expected to place her clothes in a box under the bed. In a large city girls are often obliged to live in these quarters temporarily until they can find desirable rooms.

In the staff secretary's office a room file is kept available for the use of the library staff. To begin with, letters were mailed to all landladies who had rented rooms to librarians and had proved to be congenial, asking that the office be notified in case a vacancy occurred in their own homes or should they hear of a desirable room to rent in the neighborhood. Response to these letters was very satisfactory. We find that householders enjoy sharing their homes with library assistants. The librarians themselves send us information regarding rooms, investigating them if possible. If at any time the rooms on file do not suit a particular need, we get in touch with the Board of Commerce where a room file is maintained. These rooms we investigate, however, before recommending them.

Many of our new assistants are girls who have attended library schools and are attracted to a large city to begin their careers. And, too, librarians are not prone to remain in one position all their lives—they enjoy getting experience from various sources. So we have an ever changing staff. The staff secretary corresponds with a new assistant before she comes, procures a room for her if so desired, and meets her at the depot if she has no relatives or

friends in the city to do so. It is a source of relief to the newcomer not to be obliged to spend her first few days in the city searching for a pleasant room.

A feeling of good fellowship and hospitality is encouraged among the staff members, so that when a newcomer enters the group she will be welcomed at once socially; she will be, for example, invited to have luncheon with the others. Girls have a tendency for some unknown reason to hold themselves aloof from a stranger, an attitude that makes it very uncomfortable and lonesome for the newcomer.

At Detroit we compiled and printed for the use of those who were unacquainted with the city, a list of conveniently located dining rooms and tea rooms, also a list of hotels with annotations as to price and proximity to the library. These are also used by out of town guests and lecturers. The staff secretary makes reservations for out of town guests upon request. These are usually people of especial interest to librarians, sometimes lecturers, and in order to have the staff meet them we arrange occasionally for subscription dinners or parties. Here again the staff members have an opportunity to meet one another socially.

In spite of the fact that librarians are busy all day with work of an educational nature, they enjoy spending part of their leisure time attending lectures, concerts, operas, etc. The staff secretary issues weekly for their benefit a calendar of events which includes all city activities of interest to librarians, such as concerts, lectures, art museum activities, the plays at the theatres for the week, good moving pictures, arts and crafts exhibitions, teas for noted people in the city given by such societies as the Drama League. This calendar is much appreciated.

The concert companies solicit the patronage of the library folks. When we procure a specified number of names or more of those who wish to attend the concerts, a discount on all tickets is offered. Occasionally we purchase season tickets, and by dividing the cost of the course by the number of concerts given, we are able to sell the seats for the single concerts at a lower price than they would cost at the box-office. This is done, of course, with the sanction of the concert company.

Thru this office invitations are extended to the staff to hear lecturers brought to the city by private clubs such as the Detroit Athletic Club.

These methods of spending one's leisure time are not ideal by any means. Outdoor sports would afford more healthy recreation for these mentally busy people. We are planning, therefore, for the coming year hiking parties, skating parties, etc., for those who wish to participate.

Last year we planned one big indoor party when all staff members could attend. Everyone wore an artistic pendant cut from poster paper with her name printed on it. This was a source of convenience to the introduction committee. So often in groups of this size (there were about two hundred at this party) names are more familiar than faces, because we hear about people thru what they have accomplished in their special lines of work, without having met them. Christmas gifts brought by the guests were distributed by Santa Claus with appropriate words of greeting for all. Limericks were read along with the presenting of some ridiculous gifts. Christmas stories were told from beneath a Christmas tree, and a short play was given which was written, staged, and enacted by library talent. A piano and victrola were loaned to us by a Detroit firm, and the evening was brought to a happy climax with singing and dancing.

Since the industrial revolution, people have made work too institutional, and more or less of a drudgery. Work is not part of real life as it should be. We work because it means our daily bread, and we leave our offices or places of business with a sigh of relief that the day's laborious tasks are finished. Work should be made a happy part of one's life. By fostering congenial relationships and personal sympathy among the staff, this bored atmosphere will disappear. Older members of the staff sometimes do not agree that the personal element should enter into one's work. Many of them have lived their lives in a generation when everyone had a home life to depend upon; when the daily newspaper or perhaps a neighborhood Kaffee-klatzsch provided the evening's entertainment. But this generation is not so easily entertained. The spirit is one of unrest. We must strive to calm these nervous temperaments thru the influence of well balanced leaders. Everyone is working at breakneck speed and at the end of the day is not satisfied to remain at home, which is very often nothing but a single room. We have neither the time nor the ambition to ponder over the best way to spend our leisure time. And so we take advantage of the nearest amuse-

ment parks, movie houses and dance halls. These are not to be condemned, but a steady diet of this sort is not very wholesome. If we would make the day's work more interesting, something to be anticipated with a feeling of pleasure, as in meeting one's comrades at work, or in performing the service we most enjoy, there would be less of strain and nervousness, and people could live more normal lives. Recreation hours would then be spent in playing at the things we like best. We would thereby develop the habit of choice in our daily lives.

It sometimes proves to be advantageous to working girls to group together and rent an apartment, where they may have better facilities for entertaining and may occasionally try their hands at the various domestic arts. Expenses may also be reduced in this way.

Attractive staff rooms and a well managed lunch room should be provided, and everyone should be made to feel that she has a partial ownership in them. In this way a common interest and a feeling of pride in the care of the rooms will be maintained.

We have in our library what is termed a Staff Fund to which the members of the staff contribute voluntarily each month. The purpose of this fund is to eliminate separate collections for flowers, wedding gifts, and other expenditures of the staff. Out of this, loans are made to individual members who are temporarily in need of help financially. The social director is the secretary and treasurer of this fund, keeps the records, orders the flowers, and, with the aid of a committee of friends of the recipient, the wedding gifts.

Those who are ill are visited by the staff secretary, and personal interest and attention are shown in time of bereavement.

To the newcomer who wishes to become acquainted in the city, it is well to advocate that she become affiliated with some church. All churches have social programs now-a-days, and the "get acquainted" idea is encouraged thru-out. If the young woman who finds life a bore would, herself, become interested in some form of social work, she would derive a great deal of pleasure therefrom. The recreation commission is continually calling for leaders among such organizations as the Girl Scouts, the Camp Fire Girls, and the Girls' Patriotic Leagues. It is human nature for a woman to possess a sense of devotion to home and family, and if home

and family are lacking in her life, very often the world benefits from that devotion being extended in some other direction. And she, too, reaps the fruits of her devotion in the love and confidence gained from her work among "just folks."

It is quite essential that we keep everyone busy, and particularly busy with the work for which she is best adapted. Anyone given daily tasks not equal to her mental capacity is apt to feel a lack of responsibility, and becomes more or less of a drudge.

Thru a personal contact one becomes acquainted with the general trend of a girl's life, with her ideals and the line of work for which she is best fitted. Ability in all directions may be utilized in the library, since there are so many special departments. If an assistant is interested in music and musicians, she may be useful in the music department. If she enjoys the study of art and artists, she may follow up this line of study in view of being placed in the art department. Other special departments are technology, foreign, civics, periodicals, special work with government documents, and political economy—enough varieties for everyone to labor to her liking. A personal conversation will oftentimes unearth one's personal ambitions, and a little interest manifested develops in the assistant a spirit of willingness and service with the realization of her aims in view. These ideas may be fostered, however, only after an assistant has cheerfully served her time with the inevitable routine.

WHO USES THE BUSINESS LIBRARY?

E. F. Houghton & Co. of Philadelphia, in a recent statement to employees, give the following figures as to the use made of the library:

"Thruout the entire plant 33% of all employees are making use of the library. In the sales department 21% of the entire sales force is using the library; 90% of the office force makes use of the library. The time spent by the library in rendering assistance to the various departments is also of interest: 50% of the library's force is used for the advertising department; 25% for selecting and gathering trade catalogs for the works engineering department; 10% for the leather department; 10% for the general office; and 5% for the oil department."

—Administration (Ronald Press) for January.

The Smithsonian Acts

LIBRARIES that depend on exchanges for a part of their serials, theses, etc., have been at a disadvantage during the past three years. The A. L. A. Committee on Importations could handle only subscriptions. With the armistice, the Allied and neutral countries were open again, tho some, especially Italy, have been slow to act. When, finally, the Department of State, in July, 1919, sanctioned communication with the enemy, the last barrier had apparently fallen. And yet it was not till last month that the first German consignments reached us from Washington.

The reason for this situation is not appreciated in some quarters and there have been misguided efforts to supplant the Smithsonian in this service.

The Smithsonian is an arm of the American government, and, pending the ratification of the Treaty, quite naturally felt estopped from commerce with the Central Powers. From this position it did not depart till the spring of 1920 (tho it might well have accepted the State Department's cue earlier). But freely as it did communicate with Berlin and anxiously as it strove to serve, its freedom was narrowly circumscribed, for its budget contained, or could well be made to contain, no such provision.

The reason was that for many years before the war the Amerika-Institut, in Berlin, had voluntarily taken over the duties and expense of the former Smithsonian agency in Germany, while the North German Lloyd Steamship Company without cost carried the publications involved. This item, therefore, had disappeared from the Smithsonian's budget.

War broke the connection, of course. When last spring the Smithsonian sought to re-establish this, the Amerika-Institut alleged financial embarrassment and proposed a reversion to the old arrangement of a paid Smithsonian agency in Berlin. But the Smithsonian budget for 1920-21 had already passed Congress, and, if it had not, it would have been foolhardy to ask for money with which to set up a Bureau in Germany when we were technically still at war.

Under these circumstances, the case was by agreement stated to the Institute of International Education, and the result was reported to the Colorado Springs Conference. Aid seemed reasonably well assured. But when the full esti-

mate of cost arrived, this tentative proffer was withdrawn.

As a last resort, the Smithsonian agreed to the suggestion to throw all its slender reserves into a three months' service, in the hope that the chief wartime accumulations might in this period be moved to America, while the tons of Government documents at least could get away from Washington.

The results are now beginning to show, but it is too early to announce their compass or the Smithsonian's consequent program up to June 30. We may well spare it the bombardment of questions while it is straining every resource to function in our behalf. Meanwhile for wise disposition of the Treaty, our orisons may continue to rise.

Later: The Smithsonian announces February 11 its readiness now to transmit exchange consignments to Germany.

M. LLEWELLYN RANEY.

ANNA G. HUBBARD,

PURD B. WRIGHT,

A. L. A. County Library Leaflet

An attractive illustrated leaflet on the "County Library," what it is, how it works, how it is supported, the relation between existing libraries and the county system, and how to start a public library, is published by the A. L. A. Publishing Board and can be had at the following prices: 100 copies, \$3; 500 copies, \$12; 1000 copies, \$20; 5000 copies, \$70. On orders of 500 or more, a two-line imprint may be ordered for \$1 extra; also on orders of 500 or more, the words "Public Library Commission" in the text may be changed to "State Library," or otherwise, as desirable, for an additional charge of 75c.

Orders should be sent immediately to the A. L. A. office at 78 E. Washington Street, Chicago.

The Packard Library, New York (Broadway at 39th Street) selects books and illustrations on all subjects at the various public and private libraries and museums and arranges for having this material reserved for twenty-four hours for the convenience of its clients (theatrical managers only). It arranges also for photographing plates and other illustrations from rare books. A nominal charge is made for these services.

A CORNER IN THE NEW YORK PUBLIC LIBRARY'S CO-OPERATIVE STORE

A Library Co-operative Store

“OUR Co-operative Store,” as it is familiarly called by members of the staff of the New York Public Library, is one of the activities of the New York Public Library Staff Association.

On March 31st, 1920, the Staff Association voted that the Welfare Committee be empowered to investigate co-operative buying, etc., for the members of the Staff. The Committee made a survey of the co-operative stores run in connection with the larger banking companies and business houses to serve as a basis for our own plan, and appointed a Supplies Committee to have charge of promoting the scheme. This committee, now called the Co-operative Store Committee, is composed of the following members: H. J. Grumpelt, Chairman, J. H. Fedeler, E. W. Gaillard, S. S. Haines, and Misses M. V. Leavitt, C. Leffingwell, L. E. Reichhold.

The undertaking was financed by members of the staff. Subscriptions in multiples of \$5.00 and aggregating \$4,555.00 were received from 401 employees. The maximum accepted was \$100.00. The subscriptions are returnable on thirty days' demand on surrender of the original receipt.

By courtesy of the Director and the Trustees of the Library, a room was assigned near the garage in the Central Building, not well adapted to library uses but especially desirable for this

purpose. It has been equipped with light, shelving, telephone, etc. Deliveries are made by the Library's own express service from Central Building to branches, with the regular Library deliveries.

The store was opened on June 9th, in charge of an experienced storekeeper. The hours of opening are from 8:30 a. m. to 5:30 p. m. except on Saturdays when the store closes at 1:30 p. m.

One of the greatest benefits, which was felt almost immediately, was the opportunity to secure food for lunches for the members of the staff who use our lunch rooms in the Central Building, and a special effort is made to have in the store practically everything suitable for this service.

In June, a sale was conducted of various articles of women's apparel, including handkerchiefs, waists, skirts, gloves, and hosiery; and at Christmas time, a similar sale was held. Both of these were made possible by volunteers from the staff serving in their own time.

At Thanksgiving and Christmas, 1800 pounds of turkeys were sold by the store at a saving of about 8 to 10 cents per pound.

Weekly notices appear in the *Staff News* regarding the different commodities which are on sale, thus keeping the branches in touch with new items, “specials,” or cuts in prices. The plan has always been based on self service and

a "cash and carry" system, our prices being made possible by direct wholesale purchases, and trade and cash discounts.

The store has been steadily growing in favor, and each month shows a decided gain over its predecessor. A 3% dividend was declared for the half year ending December 31, 1920.

An examination of the financial statistics discloses the fact that the average daily sales since the establishment of the store amount to about \$80.00. Exclusive of the turkey sales, which alone amounted to \$430.00 in a single day, the largest daily receipts were on December 22, when the sum of \$325.37 was taken in, of which \$234.79 was for the groceries and \$90.58 for dry goods. The largest weekly total is reported for the week ending December 18, during which the receipts totaled \$1383.40, of which \$958.11 was for groceries, and \$425.29 for dry goods. The average saving may be stated conservatively at 15%.

The financial report shows undivided profits of \$591.92. After setting up a reserve of 25% for depreciation on equipment, namely \$96.87, there remains a balance of \$495.05. This represents a margin of over ten per cent by which the subscribers' investments are secured.

The complete income account and balance sheet are as follows:

INCOME ACCOUNT

JUNE 9, 1920 TO DECEMBER 31, 1920

Gross sales	\$18,234.54
Less refunds	45.00

CHART SHOWING THE ORGANIZATION OF BROWN UNIVERSITY LIBRARY, PRESENTED BY F. K. W. DRURY AT THE EIGHTH ANNUAL MEETING OF COLLEGE LIBRARIANS AT COLUMBIA UNIVERSITY, NOVEMBER, 1920

Libraries of Philadelphia and Its Environs

COMPILED BY THE SPECIAL LIBRARIES COUNCIL OF PHILADELPHIA AND VICINITY

1. Academy of Natural Sciences of Philadelphia.
1900 Race St. Acting Ln. William J. Fox.
Hours, 9-5; Saturday 9-12. Closed all day
Saturday during July and August. Tel.
Locust 335.
Reference library with certain borrowing privileges
for members. The collection includes natural science—
unusually complete sets of serials relating to that sub-
ject—as well as collections relating to agriculture,
anatomy, anthropology, archaeology, biology, botany,
chemistry, entomology, government documents pertain-
ing to the natural sciences, mineral statistics, pamphlets,
publications of scientific societies, physiology, zoology,
travel (especially the early scientific voyages of explora-
tion).
Less complete collections in coal, coal mining, gas
(natural), horticulture, Indian languages, language,
medicine, neurology, numismatics, oil, pharmacy, phil-
osophy, physics, pomology, psychology.
The Academy includes also a large museum of natu-
ral history.
2. American Baptist Historical Society.
Chester, Pa. Ln. Dr. Frank G. Lewis. Tel.
Chester 1066-J.
Baptists, biography.
See also Crozer Theological Seminary.
3. American Baptist Publication Society, Li-
brary of Religious Education.
1701 Chestnut St. Ln. Dr. E. M. Stephenson.
Hours, 9-5; Saturday 9-12:30. Tel. Locust
530.

tory, life of Christ, religious education, sermons.
4. American Catholic Historical Society.
715 Spruce St. Ln. P. A. Kingsley. Hours.
9-5; Saturday 9-12:30. Tel. Walnut 921.
American Catholic history.
5. American Entomological Society.
1900 Race St. Ln. E. Z. Cresson, Jr. Tel.
Locust 335.
Entomology.
6. American Philosophical Society.
104 South 5th St. Ln. I. Minis Hays. Hours.
9-5; Saturday 9-1. Tel. Lombard 3606.
The library contains full files of transactions and
proceedings of the learned societies of the world and
of scientific periodicals, agriculture; archaeology, bib-
liography, geography, natural science, philology, Ameri-
can colonial and revolutionary pamphlets, valuable man-
uscript collections especially relating to Benjamin
Franklin and the Lewis and Clark expedition, and of
Indian vocabularies.
7. American Sunday School Union.
1816 Chestnut St. Ln. James McConaughy.
Tel. Locust 298.
Sunday school history and methods, Biblical inter-
pretations, Orientalisms, archaeology, travel and explora-
tions in Bible lands.
The library may be consulted by appointment only.
8. Anthracite Bureau of Information.
917 Lafayette Building. 437 Chestnut St.
Director, Edward W. Parker. Hours, 9-5;
Saturday 9-12. Tel. Lombard 691.
Coal, coal mining, mineral statistics.
9. Apprentices' Free Library.
Broad and Brandywine Sts. Ln. Elizabeth V.
Kelly. Asst. Ln. Gladys Hills. Hours, 12-9.
General library but does special work with the
student body of the city and with those interested in
mechanics and trades.
10. Athenaeum of Philadelphia.
219 South 6th St. Ln. Rev. Louis K. Lewis.
Asst. Ln. Franklin E. Whitmore. Hours, 9-6.
Tel. Lombard 4895.
General library. Philadelphia newspapers from early
19th century to date.
Private stock company and not open to the public.
11. Atlantic Refining Company.
1211 Chestnut St. Ln. W. J. MacBride.
Hours, 9-5. Tel. Walnut 5610.
Petroleum products: their applications, etc.
12. Bancroft, Jas., and Sons Co.
Wilmington, Del. Ln. Margaret Farren. Tel.
Wilmington 2601.
General information on business subjects.
- Bucknell Library, Crozer Theological Seminary,
Chester, Pa.
See Crozer Theological Seminary.
13. Bureau of Municipal Research.
805 Franklin Bank Building, 1422 Chestnut
St. Ln. Mabel Inness. Asst. Ln. Helen F.
Gruner. Hours, 9-5. Tel. Spruce 1823, Race
2530.
Municipal government, state government, constitu-
tions, charters, reports, documentary material, cost of
living, municipal finance.
14. Carpenters Company.
Carpenters Hall, 320 Chestnut St. Ln. Thomas
H. Marshall. Hours, 9-4. Tel. Lombard 167.
General library.
15. Chamber of Commerce.
Widener Building, Chestnut and Juniper Sts.
16. Christian Science Reading Room.
502 Perry Building, 1530 Chestnut St. Ln.
Beatrice Clayton. Asst. Ln. Edwin Nichols.
Hours, 9-9. Tel. Spruce 408.
Works of Mary Baker Eddy and all authorized
Christian Science literature.
17. Civic Club.
1300 Spruce St. Chairman, Countess of Santa
Eulalia. Tel. Walnut 6569. Hours, 9-5; Sat-
urday 9-1.
Civics.
18. College of Physicians of Philadelphia.
19 South 22nd St. Ln. Charles Perry Fisher.
Hours, 10-6; Wed. and Sat. 10-10. Tel.
Locust 1456.
Medicine.

Commercial Museum.

See Philadelphia Commercial Museum.

19. Corn Exchange National Bank.

2nd and Chestnut Sts. Ln. Florence G. Humphreys. Hours, 9-4:30; Saturday 9-1. Tel. Lombard 441.

Accounting, banks and banking, commerce, currency, economics, exchange, finance, foreign trade, scientific management, taxation.

Coal and oil, electricity, gas, (natural and artificial), illumination, legislation as to public utilities, municipal ownership, water power.

99. United States Naval Home.

24th and Gray's Ferry Road. Chaplain of Naval Home. Hours, 8-4:30. Tel. Locust 216. General library.

100. University of Pennsylvania Library. 500,000 volumes.

34th below Walnut St. Ln. Asa Don Dickinson. Asst. Ln. Katherine S. Leiper. Hours, 8:15-10; Sunday 2-6. Tel. Baring 100.

Main library contains the general collection, which is especially rich in the following lines: Danteana; American drama, education, Franklin imprints, Chinese books, Japanese books, Russian books, political economy pamphlets published prior to 1860; English finance pamphlets since 1700; Banking, English, French and German public documents; Semitic literature; spiritualism.

There are also in the University thirteen Departmental Libraries which are cataloged at the central library building. These sub-libraries are generally open on week days during the college year, from 9 to 5, except on Saturday afternoons. These collections are in a sense special libraries. They deal with the following subjects: archaeology (the Museum Library), architecture; astronomy (at Flower Observatory, Upper Darby), botany, dentistry, engineering, geology, hygiene, medicine, psychology, physics, veterinary medicine, and zoology. All except the Astronomy Library may be reached on the telephone by calling Baring 100.

101. University of Pennsylvania. Biddle Law Library.

3400 Chestnut St. Ln. (Mrs.) Margaret C. Klingelsmith. Hours, 8:30-10:45. Tel. Baring 100.

Law library containing 63,000 vols.

102. University of Pennsylvania. School of Fine Arts Library.

33rd St. above Spruce. Ln. Deborah Morris. Hours, 8:30-5. Tel. Baring 100.

Archaeology, architecture, art, city planning, paint, painting, lighting, landscape architecture, heating, ventilation, sanitation, biography, sculpture, engineering, building construction, civil engineering, housing, mechanics.

103. University of Pennsylvania. Wistar Institute of Anatomy and Biology.

36th and Woodlawn Ave. Ln. (Miss) C. N. Perine. Hours, 9-5; Saturday 9-1. Tel. Preston 2575.

Neurology, anatomy, biology, psychology.

104. Wagner Free Institute of Science.

17th and Montgomery Ave. Director, John G. Rothermel. Hours, 9-9. Tel. Diamond 4860.

Scientific publications, science, engineering, chemistry, botany, zoology, biology.

105. William B. Stephens Memorial Library.

146 Krams Ave., Manayunk. Ln. Katharine H. Shoemaker. Hours, 2-9. Tel. Manayunk 126.

Special reference library embracing all departments of science and technology. It is especially strong in the following subjects: biology, chemical technology, chemistry, disease, engineering, fine arts, manufactures, mathematics, medicine, periodicals, surgery.

106. Wilmington Institute Free Library.

Wilmington, Del. Ln. Arthur L. Bailey.

General library.
Delawareana.

107. Y. M. C. A. Central Library.

1421 Arch St. Ln. Catherine F. Bugbee. First Asst. Mrs. John L. Sigmund. Hours, 9-9:30. Tel. Locust 2890.

General library. Particularly strong in boys' work, general religious works, vocational education, Y. M. C. A. organization.

Restricted to the use of the members of the Y. M. C. A.

December's Favorite Books

THE fiction most in demand in the public libraries during December according to Frank Parker Stockbridge's list in the February *Bookman*, are, in order of popularity:

- The Age of Innocence. Edith Wharton. Appleton.
 The Top of the World. Ethel M. Dell. Putnam.
 A Poor Wise Man. Mary Roberts Rinehart. Doran.
 This Side of Paradise. F. Scott Fitzgerald. Scribner.
 The Valley of Silent Men. James Oliver Curwood. Cosmopolitan.
 Main Street. Sinclair Lewis. Harcourt.

For the same month the six best sellers in fiction according to the February *Books of the Month* were:

- The Valley of Silent Men. James Oliver Curwood. Cosmopolitan.
 A Poor Wise Man. Mary Roberts Rinehart. Doran.
 The Age of Innocence. Edith Wharton. Appleton.
 The Trumpeter Swan. Temple Bailey. Penn.
 Main Street. Sinclair Lewis. Harcourt.
 The Top of the World. Ethel M. Dell. Putnam.

The general books most in demand at the public libraries were:

- Margot Asquith: An Autobiography. Margot Asquith. Doran.
 White Shadows in the South Seas. Frederick O'Brien. Century.
 Now It Can Be Told. Philip Gibbs. Harper.

- The Outline of History. H. G. Wells. Macmillan.
 Memoirs of the Empress Eugenie. Comte Fleury. Appleton.
 The Americanization of Edward Bok. Edward Bok. Scribner.

- The best sellers in general literature were:
 The Autobiography of Margot Asquith. Margot Asquith. Doran.
 White Shadows in the South Seas. Frederick O'Brien. Century.
 Theodore Roosevelt and His Time. Ed. by Joseph B. Bishop. Scribner.
 The Outline of History. H. G. Wells. Macmillan.
 Roaming Through the West Indies. Harry A. Franck. Century.
 Memoirs of Empress Eugenie. Comte Fleury. Appleton.

To Catalogers

The Catalog Section of the A. L. A. is most anxious to have a complete list, of the catalogers of the country, and takes this means of getting a registration. Please send your name, address, position, education, training, experience, special line of work, etc., including, if you will, salary received and position and salary desired. If the information is sent on a catalog card, preferably typewritten, with name inverted for filing, the aid will be appreciated. Address Ellen M. Chandler, Chairman, Catalog Section A. L. A., Buffalo Public Library, Buffalo, N. Y.

The Librarian and His Work

1. "As Seen by "The Best Known Librarian in America"

"A LIFE OF GREAT PLEASURE"

IN a series on "Careers for a Young Man," John Cotton Dana is interviewed on "Library Work" in the *New York Evening Post* of February 5th.

"There is," he says, "a real opportunity for men as heads of technical libraries, and as directors of the city public libraries. An energetic man at the head of a public library can be more than a librarian to the community. He can act as a leader in public thought by speaking before meetings and as a member of various clubs of the city."

The opportunities in the Library field, he continues, "are sure to increase in number and worth. Large business houses are coming to realize the value of private libraries, and many

good positions are made available thru these libraries for trained men and women." . . . But, "A man must be born to library work. If he feels called to this field of activity, he may look forward to a life of great pleasure but of modest income. His position is generally secure and he has an opportunity to assume a place of importance in the community." . . . "It is absurd for a young man to enter this profession unless he is attached to his fellow men." . . . "He must have a sympathetic spirit and love for the community."

Mr. Dana concludes his discussion, which ought at least to bring many interested inquirers to the library, by discussing average salaries and outlining the preparation necessary, and the institutions giving training for this work.

2. "As Others See Us"

"DOCTOR PERPLEXORUM"

To the Editor of the LIBRARY JOURNAL:

Allusions in recent literature to the librarian have not always been such that we felt proud of seeing ourselves as others see us, at least as they have seen fit to characterize us, and one of the leaders of our profession has called special attention to the reluctance of authors generally to give credit to the libraries which have provided them with the means of creating their own productions to such a large extent.

There are, of course, exceptions to this practice, but the rule is quite general and somewhat surprising when it is realized that in many of our cities one-third of the population is systematically becoming acquainted with the works of these same authors thru the instrumentality of the library.

It is, therefore, unusually encouraging to find so kindly and appreciative a tribute to the profession, especially to the university departmental librarian, as appears in the notable lecture of the eminent physician and scholar, Sir William Osler, on the "Old Humanities and the New Science," delivered by him as president of the Classical Association at Oxford in 1919, practically his last public utterance.

The reference as found in the recent Houghton Mifflin edition of this lecture is as follows:

"The time, too, is ripe for the Bodleian to become a *studium generale*, with ten or more departments, each in charge of a special sub-librarian. When the beautiful rooms, over the portals of which are the mocking blue and gold inscriptions, are once more alive with students, the task of teaching subjects on historical lines will be greatly lightened. What has been done with the Music-Room, and with the Science-Room, thru the liberality of Dr. and Mrs. Singer, should be done for classics, history, literature, theology, etc., each section in charge of a sub-librarian who will be *Doctor perplexorum* alike to professor, don and undergraduate."

The librarian who is still a true book lover will find much genuine pleasure in Harvey Cushing's introduction wherein he refers to the unique volumes in the library of Sir William Osler, who was, be it recalled, some seven years president of the Bibliographical Society and "as great a lover of books as of men."

JOHN BOYNTON KAISER, *Librarian*.
Tacoma Public Library.

COURTESY AWARDS

Librarians have been recipients recently of the courtesy awards of the *New York Daily News* and the *Chicago Tribune*. The *Tribune* reporter, after having tested many people, went to the A. L. A. Headquarters at Chicago, where Miss Eva Ford, so well known to A. L. A. mem-

bers, offered to find for him what he wanted in the Chicago Public Library.

The *Daily News* prize was awarded to Miss Betty Levine of the Woodstock Branch of the New York Public Library, who explained to a visitor unacquainted with library routine how to find books, and offered to obtain for him, thru inter-branch loan that same afternoon, a book urgently needed.

"THE ADMIRABLE PUBLIC SYSTEM OF AMERICA"

"I do not suppose that 'Authors and I' could have been written week by week, without missing one Tuesday from March 12, 1919, to the present moment, had it not been for the admirable Public Library system of America. Three thousand miles away from my own books, I found, first at Westport, Connecticut, and then at the

58th Street Branch of the New York Public Library, that when I needed books I had only to explain my wants to the young lady in charge to have all the works of the author, chosen for the week, placed at my disposal. Sometimes in 58th Street it must have looked as if I was about to open a second-hand book shop. How delightful it was, by my own radiator, to linger evening after evening over an author, and to be at him again long before the morning paper arrived. This was my harvest. I gathered it in joyfully, without labour, for the seeds had been sown in the seven arduous years during which it was my privilege to be Editor of the *Academy*. So this book came into being: so the various writers with whom I lived, in spirit, week by week, composed themselves into this, my latest book—'Authors and I.'"—C. Lewis Hind (John Lane Co.)

Report of the Librarian of Congress for 1920

SERVICE hampered by low salaries or insufficient funds and expansion restricted by lack of shelving space are emphasized as in former years in the report of the Librarian of Congress for the fiscal year ending June 30, 1920. The present conditions in the Library service are declared to present a crisis that must be met in a large way if the Library is not to experience a constant depletion of the professional staffs and a fatal deterioration in scholarship. The Reading Room Staff lost 25 assistants, or more than one-third of its force during the year. The division most affected by reduced appropriations for 1921 is the Legislative Reference Service, where the reduction from \$45,000 for 1920 to \$25,000 for 1921 has necessitated a curtailment of the personnel by nearly 50 per cent, and has resulted in the practical crippling of a service to Members of Congress which cannot be furnished by any other division of the Library.

Including the Law Library, the total contents of the Library of Congress at the close of the fiscal year were: Books, 2,831,333, a gain of 120,777 over 1919; maps and charts (pieces), 166,448, as against 163,484 in 1919; music (volumes and pieces), 879,400, compared with 848,292 in 1919; prints (pieces), 418,976, as against 409,029 in 1919. Gifts from various unofficial sources aggregated 12,530 volumes and pamphlets.

The important Chinese collection was further strengthened by the addition of 498 works in

1165 volumes, which exceeded in number and value all the other Far Eastern accessions, and represented an increase of approximately 10 per cent in the number of works in the Library of Congress. The Library now probably contains the largest collection of official gazetteers to be found outside of China, and undoubtedly the largest collection of Chinese collectanea or *ts'ung shu*, works of the greatest importance, containing as they do reprints of many important works now lost or extremely difficult to secure. One of the half dozen official general gazetteers has proved to be of extraordinary interest, having been found to be a new and important fragment of the Yüan Gazetteer, apparently not known to Chinese bibliographers. The first draft of this work was ordered by Kublai Khan in 1285, and this manuscript is probably a portion of the original manuscript of 1303, a recompilation ordered and approved by Kublai Khan's grandson, Timur.

From the three collections of Hebraica and Judaica made by Dr. Ephraim Deinard selections have been made of about 3000 volumes, 350 of these written in Ladino, the vernacular of Jews in the former Turkish Empire and on the Balkan peninsula. Special value is placed on a large number of books from Russian presses before the establishment of censorship under the Czaristic régime. The Library also records for the first time in its history the addition of a Caxton, the "Golden Legend" of Jacobus de Voragine, number 30 in De Ricci's

"Census of Caxtons," printed at Westminster by Caxton about 1485.

The Division of Manuscripts continues to be the storehouse of material for writers on American history. The recently published letters of President Roosevelt were taken from the collection he placed in the library. The already large collection of the papers of President Taft has been doubled in extent, but is not open to consultation at present. Thirty letters of Grover Cleveland to Captain (afterwards Rear-Admiral) Robley D. Evans have been purchased, as well as Washington and Franklin papers of more than ordinary historical interest. A collection of letters and papers relating to the beginnings of the National Capital to be known as the Digges-L'Enfant-Morgan Papers was received from the late Dr. James Dudley Morgan. Besides the L'Enfant papers are original and unpublished letters of Washington, Lafayette, D'Estaing, Rochambeau, De Grasse, and their contemporaries.

Files of fourteen German newspapers thru 1919 were received by the Periodical Division, as well as several other files of European newspapers for the War period. The number of current periodicals received during the year was 7423 (7260 in 1919; 6712 in 1918).

The Semitic Division has rendered greater service than ever before to government departments and officials, and has been in constant communication with societies organized in this country for training scientists and technicians in order that they may apply American methods to agriculture and industry in Palestine. The Slavic Section has received a valuable collection of Russian index cards and reference material from George Kennan, the foremost living American authority on pre-war Russia.

The year brought no abatement of the unusual activities in work for the blind. The annual circulation of embossed books increased 12 per cent, and the number of blind visitors 100 per cent. The American Library Association and volunteer Braille copyists rendered material assistance in the increased production of Braille books. Practically all shipments from abroad delayed by war conditions were received during the year.

The number of volumes cataloged during the year was 82,192, of which 64,280 were new accessions and 17,912 recataloged (1918-1919: 82,335 volumes, accessions 64,034, recataloged 18,251; 1917-1918: 89,467 volumes, accessions 64,129, recataloged 25,338); or 143 volumes

less than last year. The number of volumes classified and prepared for the shelves was 83,731 (79,071 in 1919), of which 67,340 were new accessions and 16,391 were reclassified.

The portion of the Library now classified under the new classification contains, in round numbers, 1,859,000 volumes. The number of subscribers to printed cards increased from 2693 to 2877. Cash sales of cards, including subscriptions to the proof sheets, amounted to \$77,155.86, an increase over the sale of 1918-1919 of about 4 per cent. Cards for about 27,500 different titles were added to the stock during the year, including about 3200 cards printed for libraries in the District of Columbia and about 1600 for other co-operating libraries. Since the scale of prices went into effect in July, 1918, the cost of the cards when delivered by the Government Printing Office has increased about 40 per cent, and the salaries of searchers and card-drawers increased nearly 30 per cent.

Expenditures of the Library and Copyright Office for salaries and contingent expenses and for building and grounds totaled \$722,654.67 out of an appropriation of \$728,759 for 1920, as compared with expenditure of \$701,014.64 in 1919. The 1921 appropriation is \$719,025.

Congestion of the shelves has grown with the addition during the year of 120,000 volumes to the Library, a mass of material exceeded but twice in the history of the Library, altho ocean transportation is still far from normal. Systematic elimination of duplicate copies is expected to relieve the situation only slightly, and undesirable makeshifts such as breaking up groups of related material to shelve in widely separated parts of the building, and the shelving of books behind other books on the same shelves have been necessary.

COUNTY LIBRARIES: A CORRECTION

To the Editor of the LIBRARY JOURNAL:

I regret that in my article on county libraries printed in the LIBRARY JOURNAL for September 15th, I was inadvertently led into making the mis-statement that New England had no county libraries at all. The work of the Worcester County Law Library has been called to my attention and inasmuch as the books of this library are loaned to any resident of the county, my original statement should be corrected.

WILLIAM J. HAMILTON, *Secretary,*
Indiana Public Library Commission.

Books for Indian Troops

NOT the least important of the schemes for the well-being of Indian troops serving thru long periods as wardens of the marches on the North-West Frontier is the provision of books, due to the exertions of Colonel Asghar Ali.

"I have," he says in *The Pioneer* (Allahabad) "organised a scheme for the establishment of a Literary Book Bureau for Indian soldiers on a permanent and sound footing, with its headquarters at Solan (Simla Hills) and circulating libraries in the different areas, by means of which suitable literature may be freely distributed to the units, hospitals, ambulance trains, etc., in order to enable our soldiers to pass their leisure hours profitably. The scope of the plan is not limited to the frontier only, it includes all countries out of India, wherever Indian troops are serving."

To sum up the scheme: "1. Well-established circulating libraries for the free distribution of wholesome and healthy literature have been opened in different areas at the front. Every library has a librarian and is stocked with a sufficient number of amusing books, histories, novels, and with albums for illiterate men. These are printed in Urdu, Gormukhi, Hindi, Maharatti, Gujratti, Tamil and Roman. The books and albums are issued to battalions, hospitals, etc., according to the requirements of these units and are returned to the library for exchange once a month or more frequently. 2. Newspapers and periodicals are regularly supplied in sufficient number (free of charge) direct from the various presses. They are printed in different dialects and English papers are provided for the English-reading Indian staff of the Forces.

"To give some idea of the magnitude of Colonel Asghar Ali's undertaking," continues *The Pioneer*, "it may be mentioned that during last June no fewer than 3,429 copies of each issue of three vernacular newspapers were supplied to the troops on the North-West Frontier and in East Persia while during last cold weather, when the number of wounded and convalescent in hospitals was greater than is happily now the case, the number exceeded five thousand copies. There are two base libraries, one at Dera Ismail Khan and the other at Bannu, containing over four thousand volumes, from which supplies are sent to all outposts."

Open to all Interested

THE first of the Thursday evening lectures given by the Library School of the New York Public Library was given on Feb. 10th, when Hannah C. Ellis, librarian of the Hamilton Fish Branch, spoke on "Youth and the Library," and George A. Hastings, assistant secretary of the New York State Charities Aid Association, on the library's part in promoting social welfare.

There were over one hundred people present and the round table conducted by Florence Bradley was particularly well attended.

These lectures, held in room 213 of the Central Building at 8 o'clock on Thursday evenings, are open to all librarians interested, together with their friends. Preceding each lecture, beginning at 7:15 o'clock, a Round Table on books relating to the topic of the evening will be held under leadership in room 223.

Other lectures in the course are:

Feb. 17. "Three Great Victorians: Arnold, Browning and Carlyle," by John Kelman, Pastor of the Fifth Avenue Presbyterian Church.

Feb. 24. "American Ideals," by Allen T. Burns, director of the "Study of Methods of Americanization."

March 3. "The Intellectual Horizon in England" by S. K. Ratcliffe, New York representative of the *Manchester Guardian*.

March 10. "How to Choose Books on the War for Libraries with Limited Funds" by Herbert Adams Gibbons, author of "The New Map of Europe."

March 17. "The Industrial Plant Library and How It Can Be Encouraged" by Ida Tarbell.

March 24. "Suggestions to the Children's Librarian from Modern Education" by William H. Kilpatrick, professor of Education, Teachers' College.

March 31. "Some Books Dealing with Present Social and Industrial Problems" by Corinne Bacon, editor of the Standard Catalog series.

April 7. "Criticism and Reviewing" by Henry Seidel Canby, editor of the *Literary Review* of the New York *Evening Post*.

April 14. "The Newspaper," by Frank I. Cobb, editor of *The World*, New York.

April 21. "Biography versus the Biographical Novel, with a Glance at a few Biographies" by Corinne Bacon.

April 28. "The Publishing and Distribution of Books" by Lowell Brentano.

The Best Books on Advertising

A LIST of advertising books compiled by Cecil A. Ross, librarian of the Harvard University Graduate school of Business Administration, was given in *Advertising and Selling* for December 18th. In preparing the list, Mr. Ross asked an equal number each of teachers of advertising and of advertising agencies to submit a list of ten to twenty-five of the best books in this field. Lists were received from seven teachers of advertising and five advertising agencies, one list from the education committee of the large advertising club and one list from the publishers of the leading advertising periodical. These fourteen lists have been combined into a composite list of five groups according to the number of lists in which the various books were mentioned as indicated below. In addition to these thirty books, twenty-five others were mentioned, each in one list only. These are not given here.

Books mentioned in ten to twelve of the fourteen lists are:

Cherington, P. T. *Advertising as a Business Force*. (Doubleday, Page).

Hollingworth, H. L. *Advertising and Selling; Principles of Appeal and Response*. (Appleton).

Scott, W. D. *The Psychology of Advertising*. (Small, Maynard).

Starch, Daniel. *Advertising; Its Principles, Practice and Technique*. (Seltzer).

Tipper, Harry, and others. *Advertising, Its Principles and Practice*, by Harry Tipper, H. L. Hollingworth, G. B. Hotchkiss and F. A. Parsons. (Ronald Press).

Books mentioned in seven to nine lists are:

Adams, H. F. *Advertising and Its Mental Laws*. (Macmillan).

Hall, S. R. *Writing an Advertisement*. (Houghton Mifflin).

Parsons, F. A. *The Principles of Advertising Arrangement*. (Prang Educational Co.)

Scott, W. D. *The Theory of Advertising*. (Small, Maynard)

Sherbow, Benjamin. *Making Type Work*. (Century).

Books mentioned in four to six lists are:

Calkins, E. E. *The Business of Advertising*. (Appleton).

Cherington, P. T. *The Advertising Book*, 1916. (Doubleday, Page).

Farrar, G. P. *Typography of Advertisements That Pay*. (Appleton).

Hess, H. W. *Productive Advertising*. (Lippincott).

Books appearing in three lists are:

French, George. *How to Advertise*. (Doubleday, Page).

Mahin, J. L. *Advertising, Selling the Consumer*; rev. ed. (Doubleday, Page).

Russell, T. H. *Commercial Advertising*. (International Law and Business Inst.)

Shryer, W. A. *Analytical Advertising*. (Business Service Corporation).

The following appeared on two lists:

Calkins, E. E. and Holden, Ralph. *Modern Advertising*. (McClurg).

Casson, H. N. *Ads and Sales*. (McClurg).

De Bower, H. F. *Advertising Principles*. (Alexander Hamilton Inst.)

De Weese, T. A. *The Principles of Practical Publicity*. (Jacobs).

French, George. *Advertising; the Social and Economic Problem*. (Ronald).

Higham, C. F. *Scientific Distribution*. (Knopf).

International Correspondence Schools, Scranton, Pa. *The Advertiser's Handbook*. (International Textbook Co.)

Lewis, B. J. *How to Make Type Talk*. (E. M. Dunbar, Agt.)

Shaw, A. W. *Some Problems in Market Distribution*. (Harvard University Press).

Strong, E. K. *The Relative Merit of Advertisements*. (Science Press).

Trezise, F. J. *The Typography of Advertisements*. (Inland Printer Co.)

Wadsworth, G. B. *Principles and Practice of Advertising*. (G. B. Wadsworth).

In "Commercial Museums in American Colleges," which Ralph L. Power contributes to *Museum Work* for December, Dartmouth College, the University of Wisconsin, the School of Commerce of the State University of Iowa, and Boston University, are listed as possessing commercial museums, modeled somewhat on the style of the Philadelphia Museum. These museums have for the most part developed within the last ten or fifteen years and have already proved their usefulness. As a general rule, there is no regular museum staff, the work being carried on by the students or by the temporary transfer of members from library staffs.

Library Affairs in Congress

ON January 14th Senator McLean urged the passing of the Library Information Service Bill for the establishment of a Library Information Service in the Bureau of Education, which was originally reported in both Senate and House as far back as September, 1919.

As amended, the Bill would appropriate \$18,700, or "less than 2 per cent of the amount estimated to be wasted in the government publications not now available to the people of the United States," for the purpose of making these available.

In his remarks, Senator McLean pointed out the great economy in the distribution of the Government's printed material and in the time of Congressmen which would result from librarians' being able readily to supply to the public information contained in government publications. He quoted letters from Miss Linda A. Eastman and Mr. Charles F. D. Belden in support of the Bill, and instanced the useful work being done by the Government News Division of the Boston Public Library, and especially by the *News Notes of Government Publications*, issued in connection with the service of that Division.

In an impassioned address in the House of Representatives on December 29th, Mr. Fess of Ohio pointed out that Washington is "rapidly becoming the world's greatest centre for scholarship," due largely to "the library across the way."

Mr. Fess then outlined the history of the Library in its four stages: the first dating from the appropriation of \$5000 in 1800; the remaking of the Library after the fire of 1814; the coming of Librarian A. L. Spofford in 1864; and especially the remarkable organization achieved by Librarian Putnam since his appointment a little over twenty years ago. Realizing that the membership of the House is "more or less concerned with the material appreciation of the expert men that are found in this building just across the way," Mr. Fess sketched the administration and functions of the several divisions of the Library, and pointed out that the total annual appropriation for the care of the buildings and grounds is about \$720,000 per annum, or about the cost of the upkeep of a modern battleship. In conclusion, Mr. Fess told of the most urgent needs of the Library, mainly an additional book stack, additional expert service, and a salary scale sufficient to secure and

retain competent experts as against the competition of business and institutions of learning.

Mr. Fess also proved himself a good friend of libraries, when, on January 11th, in connection with the discussion of legislative, executive and judicial appropriations, he urged again the need of a fireproof building for the Nation's archives, instancing the many losses of valuable records which had already occurred due to lack of suitable storage space.

On January 17th the Smith-Towner Bill for the establishment of a Department of Education was favorably reported by the Committee on Education. It is hoped that the Bill may be voted on by both Senate and House before the adjournment of the present Congress.

"IN VIRGINIA"

"From him" [Dr. R—, a colored physician, "a shrewd capable little mountain"] I learned first that the Negro had not access to the Carnegie libraries in the South. I was surprised. Up at Baltimore, in the North, I was talking to a librarian, and he averred that the Negroes used the public library much more than white people, and that there were so many darkies that Whites did not care to go. But I travel such a very short distance South, and I find no Negro admitted at all.

"Surely that is contrary to the spirit of the Carnegie grants," said I.

"Yes, for Carnegie was a good friend to the Negro. But so it is," said Dr. R—. "And I do not think Negroes should agitate about it. It would be better for Negroes to build their own libraries. We shall have to do so. But we don't want to intrude where we're not wanted."—*"The Soul of John Brown"* by Stephen Graham. Macmillan, 1920. p. 43.

A PUBLIC LIBRARY IN 1644

"There are in it [Orleans, France, 1644] two reasonable fair public libraries whence one may borrow a book to one's chamber giving one's note of hand."—*John Evelyn's Diary*, v. 1, p. 168.

FREE ON REQUEST

The Clyde (Ohio) Public Library has a number of Civil War records which it would be glad to dispose of to any library interested. For particulars address Chella Hutchinson, librarian.

THE LIBRARY JOURNAL

TWICE-A-MONTH

FEBRUARY 15, 1921

IN taking over the service to government hospitals performed during the war by the A. L. A., it is not only necessary to furnish books and periodicals, but to provide also for adequate library service. The Bill presented to Congress appropriating \$100,000 for this purpose, should provide for competent and trained library help, but this form of expenditure has been opposed by members of Congress who do not realize that the book is only the primary need and that to give full usefulness requires personal service to the reader. Librarians under modern conditions have had this brought home to them more fully as the library system has developed, and they appreciate that salary appropriations must be larger than book appropriation, if the book is really to serve the people. The public does not yet fully appreciate the cost of this personal service, and appropriation authorities are even more apt to ignore it. It should be brought home to the community in every possible way, and especially should our legislators in Congress be informed of the real need. Without this personal service, the book is much like medicine without the doctor, who knows how and when and to whom it should be administered!

★ ★ ★ ★ ★ ★ ★

THE plan for a Library Information Service at Washington, initiated thru the work of Miss Guerrier the year before last, and embodied in a bill presented to Congress, still awaits final action, and it would be well if more librarians would lend a hand, as some have already done, thru their Senators and Representatives in facilitating its passage. It would be properly a feature of the bill creating a new Department of Education, with a cabinet officer, which will probably be part of the program of the new administration—a bill which has already been favorably reported by the House Education Committee—but it should not be dependent on this larger measure. Our government spends enormous sums in providing and printing material which

is really of enormous value, but which is so apt to be concealed in the mass of print that few can avail themselves of it. It would be a measure of economy that this material, prepared at great expense, should be made generally useful by the expenditure of the small additional sum needed for the organization of the proposed bureau which would be a means of communication between the government departments, with their publications, and the entire public thru the whole library system.

★ ★ ★ ★ ★ ★ ★

BOSTON has been an originating centre in the development of special libraries and of the business librarians who make up an ever increasing proportion of the library profession. We chronicled some months since the new feature in the Boston Public Library of a government news service with its own monthly publication, another special library within the Public Library, which has already proved its usefulness in abundant measure. An even more significant development is the organization by the Massachusetts Institute of Technology—of the Division of Industrial Co-operation and Research, financed from the contributions to the endowment fund of the great corporations, like the General Electric and American Tel. and Tel., which is modeled on library methods and includes special relations with the library field. George Winthrop Lee of Stone & Webster, one of the leading engineering firms, is to be credited with the invention of sponsors for knowledge, a scheme which gears closely into the general plan of business libraries. These facts suggest that a most proper and valuable feature of the 1921 A. L. A. Conference might be a session, perhaps held jointly with the Special Libraries Association—which happily has decided to hold its annual convention at Swampscott at the same time as the A. L. A. meeting—which would be specifically devoted to problems of business libraries and industrial research.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION FINANCIAL REPORTS, 1920 GENERAL FUNDS

Receipts

Balance, Union Trust Co., Chicago, Jan. 1, 1920	\$5,504.50	
Balance, National Bank of the Republic, Chicago, Jan. 1, 1920	250.08	\$5,754.58

Balance, Union Trust Company, Dec. 31, 1920	\$7,129.02	(See Note)
Balance, National Bank of the Republic, Dec. 31, 1920	250.00	7,379.02
Total		\$33,567.07

(Note.—Additional bills for 1920 not yet in, estimated at \$3,500.00, reduce the balance by this amount.)

BUDGET FOR 1921

ESTIMATED INCOME FROM ALL FUNDS
(not including transfer from one fund to another)

Balance on hand Jan. 1, 1921	
General Fund	\$7,379.02
Publishing Board ...	1,955.31

War Service Fund... 47,494.25	\$56,828.58
Membership dues	
Annual dues	\$11,000.00
Life memberships ...	300.00
	11,300.00
Income from endowment	
General fund	\$400.00
Carnegie fund	4,000.00
	4,400.00
Accounts receivable, Publishing Bd.	2,104.72
Publishing Board sales	
Publications	\$16,400.00
Books (review copies)	900.00
	17,300.00
Refunds, sale of equipment.....	10,537.20
United War Work Fund (anti- cipated)	60,000.00
Books for Everybody Fund (to be covered by supplementary budget)	?
Interest on bank balances	
General fund	\$80.00
Publishing Board funds..	35.00
War Service funds.....	250.00
	365.00
	\$162,835.50

Altho it is reasonably certain that the amounts given as due from the United War Work fund and some funds from the Books for Everybody fund will become available during 1921, it is not now possible to say when this will occur, and the Finance Committee therefore is not prepared to approve expenditures from them. Until these become available, the Committee recommends that expenditures be confined to the other income of the Association.

The Committee, therefore, approves the budgeting of the following amounts for expenditure for 1921:

General funds	\$19,159.02
Publishing Board	22,995.03
War funds	40,150.00
	\$82,304.05

ST. LOUIS LOCAL A. L. A. MEETING

A MEETING of members of the A. L. A. in St. Louis and immediate vicinity was held at a luncheon in the St. Louis Lunch Rooms on February 2, at 1 p. m. About sixty invitations were sent out and fifty-four members attended, including representatives from Alton and Belleville, Ill. The meeting was suggested by the agitation for local organizations of the A. L. A.

it being realized that a "get-together" gathering of local A. L. A. members was possible and proper without formal instigation or even endorsement by the general body. The invitations gave as the object of the meeting "to discuss measures for increasing the membership and influence of the A. L. A. in this locality."

New members who had sent in their applications were considered eligible for attendance, and thirty-four sent in applications from the staff of the Public Library alone, between the first notice of the luncheon and its actual date.

Dr. Bostwick presided; and after he had briefly set forth the objects of the meeting, there was a general discussion, in which W. L. R. Gifford of the Mercantile Library, James McMillen of the Washington University Library, Mrs. McNiece, Miss Doud, and Dr. Throop of the Public Library, and Miss Dolbee of Alton, took part.

Some of the objects that might be obtained by means of a local association were listed as follows by the presiding officer: To represent St. Louis to and at the A. L. A.; To represent the A. L. A. in St. Louis; For mutual improvement; For mutual acquaintance; To swell A. L. A. membership, automatically; To increase library salaries; To better library service; To increase local library prestige; To recruit for librarianship; To promote interlibrary comity.

The following resolution was unanimously adopted:

Resolved: that the Executive Board of the American Library Association be informed of the present meeting of fifty-four members of the Association living in and near St. Louis, and of the intention of the participants to hold other similar meetings in the future: and that the Board be asked to give its formal sanction to such meetings and to advise how they may best be held.

On motion, it was voted that a committee of three be appointed to call another meeting in the near future and to report at the next meeting a form of organization and suggestions for programs.

The chair named as the members of this committee W. L. R. Gifford, librarian of the Mercantile Library, chairman; Bella Steuernagel, librarian of the Belleville (Ill.) Public Library, and Harriet P. Sawyer, principal of the St. Louis Library School.

A. E. B.

INDIANAPOLIS LIBRARY CLUB

A SUCCESSFUL revival of the Indianapolis Library Club took place on Jan. 12th in the Cropsy auditorium of the Indianapolis Public Library.

Those present believe strongly that such an organization may become a real power in Hoosier library and literary circles, besides serving to help library people to become better acquainted with each other. A Saturday afternoon picnic in May and an outing in July with the Library Summer School at Butler College are proposed as annual features of the organization.

Officers elected for the year are: President, William J. Hamilton; vice president, Lyle Harter; secretary-treasurer, Elizabeth Ohr.

MIDDLE WEST COLLEGE LIBRARIANS

THE Conference of College Librarians of the Middle West was held at the LaSalle Hotel, Chicago, December 27th, in connection with the A. L. A. mid-winter meetings. There was a very good attendance at both sessions.

May L. Fairbanks of Cornell College presided over the morning meeting. Topics for discussion had been selected and were introduced by different librarians, followed by informal discussions.

Rose Ball of Albion College spoke on how to induce the right kind of student to take up library work. She emphasized the need of getting the right student interested at this time when good assistants and librarians are so scarce. She suggested extending an invitation every fall to all students interested in the work, taking a personal interest in such students, and if student assistants are used in the library to call upon these in particular; also, if an opportunity was given, to invite them to meet other librarians or persons connected with libraries.

Miss Butlin of Beloit College introduced the discussion of what have college libraries done (a) in collecting college history material (b) how cared for, by telling what Beloit College has done. One item of especial interest was the annual indexing of the student paper, which makes clipping and filing items of interest unnecessary. "Should a College Library Purchase Fiction?" was dealt with by Prof. Van Gundy of Monmouth College. There seemed to be unanimous agreement to include classics among our books, so that the discussion really centered around the question of what is or will be classic among the fiction of today. No hard and fast rules could be laid down as the amount and kind of fiction in a college library must be determined by each individual library as funds, location and demand require. Miss Nellicot of Rockford College discussed the "Care of Reserved Books and Prevention of Unauthorized Borrowing." In the discussion which followed, it became evident that about half of the librarians present used the closed reserve shelves to prevent unauthorized borrowing.

Miss Jackson began the afternoon discussion on "Newspapers in College Libraries." Because of the poor quality of paper in newspapers today, it was suggested that the most economical care of papers to be kept on file was to tie them together by the week or month and shelve them without further binding. If something better is wanted, pasteboard sides with cloth backs, costing about \$2.00 a volume at the present rate of prices, may be used.

Miss Allen of the University of Kentucky read a paper written by J. C. M. Hanson of the University of Chicago on "Library of Congress Classification for a College Library." Mr. Jacobson of Luther College, formerly of the Classification Division of the University of Chicago, was present, and answered questions and cleared up many doubts. Each one present received a mimeographed copy of opinions on the L. C. classification, pro and con, and those present separated with a more generous feeling towards the L. C., even for small libraries.

ADA M. NELSON,
Secretary, Conference Committee.

THE FILING ASSOCIATION OF NEW YORK

THE Filing Association of New York formed last winter by a few interested executives who saw the need of raising the standards and recognizing as a profession this very important branch of library work, has gradually grown

to a membership of about 100 active and associate members, many of whom are representative in special lines of such work.

Monthly meetings are held at the Washington Irving High School, and a speaker is provided who conducts an open forum at the close of each talk.

A research committee takes up problems presented to it for solution and in a short time allotted at each meeting gives members the benefit of discussion in answering such questions as may have been submitted. A service committee registers members seeking employment and has in hand the placing of clerks and executives—the club dues, \$5.00 a year, including this privilege.

The officers are: Myrta L. Mason, Mutual Life Insurance, president; Jeanne B. Foster, Kuehn Loeb, vice-president; Emma D. Bendelari, Girl Scouts, Inc., treasurer; Madeleine Scheuch, Halsey Stuart Co., recording secretary, and Elizabeth King McDowall, corresponding secretary.

Any person engaged in filing and indexing is eligible to active membership and anyone taking active interest in such work as well as all librarians may become associate members, which includes all Association privileges except those of voting or holding office. Application for membership should be made thru the Corresponding Secretary, Mrs. McDowall, 56 Irving Place.

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department.

POSITIONS WANTED

College man with two years' library experience, including certificate of Library School of the New York Public Library, desires position in reference or order department of university or public library. Address, A. S. 4, care of the LIBRARY JOURNAL.

Assistant with three years' experience in charge of loan desk would like work in circulation department in library near Boston. Address: S. L. 4, care of the LIBRARY JOURNAL.

Librarian with seven years' experience in charge of a business and technical library wishes to make a change. Desires position in which executive ability is needed in starting a library in a business house. Address A. M. 4, care of the LIBRARY JOURNAL.

Wanted, a position as librarian of a small Normal School or college library, preferably in the South, by a woman, college graduate

with three years' teaching experience, and eight years' library experience. Salary expected about \$1600. Address, B. M., care of the LIBRARY JOURNAL.

POSITIONS OFFERED

Wanted, at the Yale Law Library a cataloger. Salary \$1100. Apply to the Librarian.

Wanted, cataloger at Carleton College Library, Northfield, Minnesota. Salary \$1600. Vacation six weeks.

Wanted, circulation assistant in a business library. Person with library experience and knowledge of business books preferred. Address: A. A. 4, care of the LIBRARY JOURNAL.

Wanted, children's librarian in a small city library in the Middle West. Library School graduate with some experience preferred. Good salary and small living expenses. Address, J. I. 4, care of the LIBRARY JOURNAL.

THE OPEN ROUND TABLE

"THE FIELD AND FUNCTIONS OF A NATIONAL PROFESSIONAL ORGANIZATION"

To the Editor of the LIBRARY JOURNAL:

Five years ago I changed my status in the A. L. A. from that of an individual member to that of a life member. On that occasion I made a comparison between the A. L. A. and a similar organization to which I belong. I did this in the hope that the A. L. A. might profit therefrom by adopting some of the desirable features exhibited by this other organization. I realize now that the time was not ripe then for any change in the organization and administration of the A. L. A.; and, furthermore, as my communication evidently went no further than the Secretary's office, nothing came of it.

My statement of the outstanding features of this other organization, as compared with the A. L. A. was as follows:

It was established in 1872, for the purpose of professional advancement of its members.

The chief benefits of membership are: (a) receipt of the official organ, in return for membership dues; (b) use of the organization as a clearing-house for professional information; (c) the opportunity of contributing to the pages of the official organ unsolicited articles, and of receiving fair compensation for such articles as are accepted for publication. (Note: At the present time, 1921, the rate of compensation is about \$4.50 per page, octavo, 10-point lead); (d) the privilege of competing in an annual prize essay contest, the winner of which is awarded a prize of one hundred dollars, together with life membership in the organization. (Note: The cash prize has since been increased to two hundred dollars).

The number of members, as of date October, 1915, is 2070, as compared with over 3000 in the A. L. A. (Note: The membership of this other organization is now, January, 1921, 5123). There is no entrance fee. Individual membership cost two dollars a year, as in the A. L. A. (Note: This has since been increased to three dollars.) There is no institutional membership. The fee for life membership is thirty dollars. (Note: Since increased to forty dollars.)

The official organ is a bi-monthly magazine, averaging 350 pages an issue, illustrated, and fully satisfying the literary needs of the profession. The papers are frequently discussed by members in succeeding issues. 2800 copies of each issue were printed during the past year (1915), at a cost of \$10,000. A small amount of advertising is carried. The subscription price to non-members is three dollars a year. The

receipts from membership dues, subscriptions, and advertising during the past year (1915) was \$6000, thus leaving a deficit of \$4000, which was more than made up from the sale of books published by the organization. An issue of 5000 copies, it is said, would make the magazine self-supporting. (Note: The official organ is now a monthly, averaging about 150 pages. Discussions of articles are paid for at half the rate of originally contributed articles, or about \$2.25 a page.)

The other publishing activities of this organization are practically the same as those of the A. L. A., except that the output is exclusively composed of books. The publishing department is not endowed. Nevertheless, the profits last year (1915) permitted of wiping out the \$4000 deficit entailed by the official organ, and of leaving a good balance for investment.

There are no annual conferences of members. The annual business meeting is held at headquarters, at which all members are allowed to vote by proxy. Local conferences of small groups of members, for the discussion of professional papers, are held from time to time in various parts of the United States and outlying possessions.

I still feel that there is food for thought in the foregoing, and desire therefore to submit it again to the Association for what it may be worth.

LOUIS N. FEIPEL.

26 Brevoort Place,
Brooklyn, N. Y.

To the Editor of the LIBRARY JOURNAL:

In "The Field and Functions of a National Professional Organization," Mr. Sanborn suggests the advisability of having the A. L. A. act as a clearing house for positions. Is this not a practical suggestion of a service valuable to both library workers and to trustees. The notices of Positions Wanted and Positions Offered, published in the LIBRARY JOURNAL and *Public Libraries* have been helpful. Would not a bureau under the control of the A. L. A., conducting this work on a larger scale, be appreciated? There are many ambitious library workers who are anxious to secure better positions, but who have no means of knowing where vacancies exist. I feel certain that they would be willing to pay a fee or commission for this service. Teachers' agencies pay dividends, why may we not have one central self supporting agency?

MARY EGAN, Librarian.

Clinton (Ia.) Public Library.

BALL, Mrs. M. F., of the Harvard Library, is now on the staff of the Engineering Societies' Library in New York.

BOYD, Elmar T., of the Bangor (Me.) High School faculty appointed librarian of the Bangor Public Library in succession to the late Charles Alcott Flagg.

HIBBARD, George, who since returning from the war area in May, 1915, has been on the staff of the Grosvenor Library, Buffalo, N. Y., and who since its inception in 1918 has edited the Library's *Bulletin*, has been appointed assistant librarian.

HOSMER, James K., librarian of the Minneapolis Public Library from 1892-1904, celebrated his eighty-seventh birthday at Minneapolis on January 29th.

HUXLEY, Florence A., has given up her work with Frederick E. Kessinger, lawyer, to succeed Ellen McBryde Brown, 1916-17 N. Y. P. L., as associate editor of the *Business Digest*.

LAPP, John A., has prepared a revision of "Our America," which is published by the Bobbs-Merrill Co., 1920.

LORD, Betty Townsend, 1916, L.A., is librarian of the California Fruit Growers' Association, Los Angeles.

MAXWELL, Sadie Alison, 1916 A., appointed senior assistant in the Library of the College of Business Administration of Boston University.

MCCRAE, Bess, who up to the time of its closing was in charge of the Book Department and the New York Dispatch Office of the A. L. A.

in New York, was appointed principal of the Registration and Loan Department of the Los Angeles Public Library, February 1.

MCDONELL, Mrs. Annie F., for many years librarian of the Bay City (Mich.) Public Library, died on January 11 after a brief illness. Mrs. MacDonell helped to organize the Michigan Library Association and served as its secretary for a number of years and later as its president. In 1917, she resigned her position in Bay City and since that time lived in Morristown, N. J.

PEMBERTON, William Y., librarian of the Montana Historical Library at Helena since 1909, has resigned and is succeeded by Florence Fortune, who for a number of years has been chief clerk in the Library.

PROUTY, Gracia L., 1908 S., formerly in charge of the order department of the Engineering Societies' Library, has recently joined the staff of the engineering library of the Western Engineering Co.

SIMPSON, Medora J., who has been librarian of the Chelsea (Mass.) Public Library for fifty-one years has asked to be relieved of her duties. Miss Simpson was the library's first librarian, and has watched its progress from a little library of 3000 books to its present size and importance. In the early days she had a salary of \$300—a real salary in those days. The collection was housed in a renovated stable at first, and the present Carnegie building dates from 1909.

SMITH, Gretta, 1914 D., has resigned from the Library Association of Portland (Ore.) and will spend some months in travel before returning to library work.

TACHE, —, formerly King's Printer, Ottawa, Canada, has become French librarian of the Parliamentary Library at Ottawa, in succession to Mr. Decelles.

TAYLOR, Louise M., of the cataloging department, Harvard Library, appointed librarian of the Essex Institute, Salem, Mass.

WORTHEN, Carrie M., librarian of the Melrose (Mass.) Public Library since its establishment in 1871, has retired, and is succeeded by Elsie M. Hatch of Brookline.

PAUL GAUGUIN: His Life and Art

By John Gould Fletcher

This book announced for early spring publication, is a study of the life and art of Paul Gauguin by John Gould Fletcher, the distinguished poet and writer on art, whose work stands out pre-eminently amid the best that is done to-day. It is an authoritative and keen interpretation of one of the greatest painters of the 19th Century. It not only shows his position and influence in modern art, but also clears up definitely many of the legends which have arisen in connection with Gauguin's amazing career in the South Seas. Ten reproductions in half-tone will be included in the volume. 200 pp. Boards. \$2.00. Uniform with *Noa Noa*.

SKETCHES OF SOVIET RUSSIA

Whole Cloth and Patches

By John Varney

An unusual book by a young American who spent a good part of the turbulent years of 1918 and 1919 in Russia. The author's method of approach is neither one of condemnation nor of praise. This is especially true of the imaginary dialogue which closes the book. Here the different political doctrines which have torn Russia asunder are analyzed and opposed to each other with fine dramatic skill. Anyone interested in modern Russia and her problems, which are also a world-problem, will find this a valuable and instructive volume. *Cloth, \$2.25.*

PAUL GAUGUIN NOA NOA

The great French painter's own story of his flight from civilization and his life among the natives of Tahiti, in the South Seas.

With ten reproductions in half-tone. *Fifth Printing. Moretto Boards, \$2.*

THE BOOK OF JEREMIAH

Including *THE LAMENTATIONS*

With 15 full-page drawings in black and white by WILLIAM SAPHIER

Few books in the Old Testament can equal the Book of Jeremiah in poetic power and majesty. The drawings of Saphier are imbued with the spirit of the book, and make live for us the figure of the great prophet and the times in which he labored. The magnificent physical make-up of the volume does justice to its magnificent spirit. Edition Limited to 975 numbered copies, on antique laid, deckle edge paper, and bound in Fabriano boards with Irish linen back. *\$7.50 Boxed.*

THE MENACE OF THE MOB by Dmitri Merejkovski

Translated from the Russian, with Introduction, by Bernard Guilbert Guerney.

"Christianity," in the opinion of Merejkovski, "has grown shallow . . ." *The Menace of the Mob* deals with the spiritual ferment of Russia, of which the present turmoil is the harvest. Will it be a good harvest or an evil to the human race that is to come? Merejkovski—one of the few Christians of this age—does not merely propound the question, but has a solution to offer. His utterances are more important and illuminating than thousands of editorials and leading articles and volumes of discussion. The volume contains also "The Flowers of Bourgeoisie" and "When Christ Shall Rise Again." *Cloth \$1.50*

NICHOLAS L. BROWN, Publisher, 123 Lexington Ave., NEW YORK

BIBLIOGRAPHICAL NOTES

A fourth edition of "Mending and Repair of Books," compiled by Margaret Wright Brown, has been prepared by Gertrude Stiles, supervisor of binding, Cleveland Public Library, and has just been published by the A. L. A. Publishing Board.

The Los Angeles Public Library *Monthly Bulletin* lists the numbers of Philharmonic Symphony Orchestra programs which may be borrowed from the art and music departments of the library. Following this is an extensive classified bibliography on music.

The January 15th number of *News Notes on Government Publications*, published for the staff of the Boston Public Library, contains a list of government periodical publications which are marked "rush work" at the Government Printing Office and present the latest information possessed by the government. Many of these are multigraphed publications.

A supplement to the Handbook of the S. P. Avery Collection in the New York Public Library covering additions of prints, 1901-1920, compiled by Frank Weitenkampf, has been reprinted from the Library's December *Bulletin*.

Other reprints from the *Bulletin* are Charles F. McCombs' article on the Photostat in Reference Work, which appeared in the October *Bulletin*, and a List of New York Almanacs, 1694-1850, compiled by Alexander J. Wall, assistant librarian of the New York Historical Society, from the *Bulletin* of May-November, 1920.

A second revised edition of Martha Wilson's "School of Library Management" has just been issued by the H. W. Wilson Company. "It is an attempt to state the problem of the library in the school, particularly the smaller one, and to offer practical suggestions as to its equipment, organization and administration, and to provide a reference aid for simple library methods or school libraries." In this edition suggestions from many sources have been incorporated, especially from various articles written by Mary E. Hall and from C. C. Certain's "Standardization Report," published by the N. E. A. and the A. L. A.

A succinct and interestingly illustrated history of education is presented in a bulletin descriptive of the Maria Hosmer Penniman Memorial Library of Education, the departmental library of the University of Pennsylvania School of Ed-

ucation, prepared by its dean, Frank Pierrepont Graves. The library is particularly rich in books relating to the history of education and in specimens of old textbooks. Besides the twelve thousand books given by Dr. James Hosmer Penniman in memory of his mother during the past five years, the library includes the works on education already owned by the University, and books that are acquired thru future departmental accessions will be added.

In preparation for the celebration of the sixth centennial of the death of Dante, the Brooklyn Public Library devotes a great part of its January-February *Bulletin* to an extensive Dante bibliography. In order to take part in the world-wide commemoration, an American national committee composed of representatives of various agencies has been formed, with John H. Finley at its head. The Italian-America Society will play a leading part, and other organizations include the Dante League of America, the Dante Society of Cambridge, the Italian Inter-collegiate Association, the Italian Teachers Association, New York University, the Society Dante Alighieri, and the League of Foreign-Born Citizens.

The second part, completing volume 1 (1919) of the new catalog of the John Carter Brown Library, is in type and will soon be printed. This part includes all the works in the library printed before 1600, and also the Bry and Hulsius series. The printed catalog of 1875 ended with the same year, and likewise listed the Bry and Hulsius series. A comparison of the two catalogs shows to some extent the growth of the library in the last forty-five years: "The catalog of 1875 gave 600 items, that of 1920 gives 1336 . . . even making due allowance for the Aldine issues, which were not included in the earlier catalog, the collection has become much stronger in this earliest century of American history." The full list of the accessions of books printed before 1600 and acquired during the year is appended to the report of the library for the year ending June, 1920. This list is to be continued from year to year, and these appendices will, therefore, serve as supplements to the printed catalog volumes. The arrangement of items will be chronological, as in the catalog itself. The appendix is printed on one side only, to enable titles to be cut from it for catalog purposes. Copies of the Report may be obtained at \$1 each.

IN THE LIBRARY WORLD

VERMONT

The thirteenth biennial report of the Vermont Free Public Library Commission is issued on the "silver anniversary" of the establishment of the Commission, which met for organization in January of 1895, making Vermont the fifth state to establish a Commission and organize the work.

A detailed description of the general duties of the Commission and of specific work accomplished in 1918-1920 indicates an active two years for the staff of four, which owing to resignations and illness did not average more than three. During the four months' war period included in the report Vermont added 7,919 to the number of volumes previously collected for soldiers and sailors in camps and hospitals, making a total of 31,753, of which 8,398 were shipped from the state during 1918-19. The 1,800 books returned to the state on the demobilization of Library War Service were allotted to the Commission for distribution, and 500 of these were distributed to six posts of the American Legion. The bulk of the remainder will be placed at the disposal of the free libraries in the state.

The Commission loaned 1,391 book and picture collections during 1918-1920, a gain of 270 over 1916-1918, comprising 22,123 books and 23,793 pictures loaned. 453 stations were served in 167 towns, of which 23 are without libraries. Three thousand dollars were given in varying amounts to 68 different libraries as aid in maintenance, and 66 libraries were visited. Field work has been so hampered that there still remain 29 libraries which have not been visited since 1910 at least. Six libraries were visited for the first time since records of such visits have been kept. The Traveling Library equipment comprises 253 collections, including school and general traveling libraries, farmers' libraries, teachers' aids and high school libraries, and numbering 8,661 in the fixed collections and 7,890 in the general, or shelf collection, a total of 16,551 volumes on June 30, 1920. In addition to the preparation and purchase of the annual selection of books for the three state institutions, the House of Correction, the State Prison, and the Industrial School, each institution has been visited by the Secretary or a member of the Commission and a general supervision maintained. Total expenditures for the two years were \$15,555.43.

Returns from the 202 libraries which reported

this year to the Commission indicated progressive development, seventy libraries reporting increased circulations as against 47 decreases. In some of the smaller towns the apparent lessening use of the library is a natural result of the decreasing population shown by the last census, and the Commission considers it a fact to be faced that some of the hill towns of Vermont are tending to become too small adequately to support independent public libraries and other village machinery. Of the 43 towns in Vermont without libraries only three have populations of more than 1,000, and it is the opinion of the League of Library Commissions, as expressed at its meeting in June, 1920, that a population of 2,000 is the smallest unit warranting tax support for an independent public library.

Of the total of 239 libraries of the state, 160 are owned, supported, at least in part, and controlled by the towns or cities in which they are located; 21 more are free town-supported libraries tho not managed directly by the town. Twenty-one others are free, tho receiving no town aid, making, with the 8 college and reference and the 3 institutional libraries, a total of 212 free libraries within the state. The Commission intends to collect statistics as to school libraries as soon as possible.

MASSACHUSETTS

Boston. Under the terms of agreement between the Boston Public Library and Simmons College the latter again opened its courses in both the Library School and in the College proper to members of the library staff recommended by the Librarian. Alice M. Jordan continues her course in work with children at Simmons this session, which was attended last year by twelve members of the library staff meeting with seniors and post-graduate students of the College. June R. Donnelly has been giving a special course in reference work at the Library to a selected group of about twenty assistants, the course being intended to give information on the methods of seeking reference material, record of sources consulted and comparison of their relative value.

Forty-eight members of the staff registered last year in the course on the aims and methods of present day library work as exemplified by the practice of the Boston Public Library and other modern libraries and agencies, which consisted of thirty-five lectures held from September 25 to June 10 inclusive. The first half, a

NOW READY

The new fourth edition of "A Guide to Current Periodicals and Serials of the U. S. and Canada," compiled by Henry O. Severance, Libr'n. University of Missouri, Columbia, Mo. The work has been thoroughly revised. The present edition contains more than 12,000 titles, an increase of practically 25 per cent of the old edition of 1914. An additional feature of the Guide is the complete list of trade journals or house organs, comprising several hundred titles. Net \$6.00.

Music and Citizenship

The songs of the European folk are the great expression of the joys and sorrows, the hates and fears, the romance of the people who sing them. During her frequent visits abroad, Florence Hudson Botsford has been gathering these songs. Her book contains the music, jotted down often on odd scraps of paper at some village festival; the words in the original tongue; and translations of these words into English poetry by such artists as Edna St. Vincent Millay, Jacob Robbins, Margaret Widdemer, Edgar Lee Masters.

Unique is the value of this book in forming strong ties with the fathers and mothers of coming Americans, by teaching them English, and by showing our appreciation of the beauty they are bringing to America.

course in general library methods, was conducted by instructors from the Simmons College Library School; the second, relating to the organization and resources of the Boston Public Library system, by representatives of the various departments of the Library.

Twenty-three assistants registered in eleven general cultural courses offered at Simmons College during 1919-1920, and two of the young men of the staff availed themselves of a course in accounting offered by the School of Business Administration of Boston University as a return for courtesies extended by the Library to the University.

Cambridge. The financial statements for the year ending last June show the Harvard Library's independent income as \$144,423, and the expenditures as \$199,469. Of the income, \$40,014 came from interest on funds given to provide for the purchase of books, and \$6,280 from gifts for immediate use in buying books. The interest on funds and gifts for special purposes amounted to \$20,093 and other funds available for the general purposes of the library yielded \$48,387. The balance entered as "deficiency of general income" is \$60,723. The amount paid out for books was \$51,980, which does not include \$12,740 spent for books for the special libraries purchased by the Accessions Department and treated as a part of the college library. Salaries, services and wages amounted to over \$67,390; library expenses, \$13,553; and the upkeep of the building, \$34,801.

CONNECTICUT

New Haven. The total number of volumes in the Yale University Library at the close of the college year on June 30, 1920, was approximately 1,184,000, an increase of 27,000. Borrowers registered at the Main Library and at Linonian and Brothers numbered 3,467, and were loaned 22,084 volumes from the latter library and 19,758 from the Main Library. The receipts were \$113,338, appropriations of \$61,898, endowment funds of \$47,444 and receipts from other sources of \$3,996 going to make up this sum. On the book account \$33,264 was expended, with \$60,737 going for library service and \$2,773 for janitor service. Miscellaneous expenses amounted to \$16,564, bringing the total to \$113,338.

Thru the efforts of Professor Asakawa, who spent the years 1917-1918 and 1918-1919 in Japan and China, and the interest of the Japanese themselves, many of whom made personal sacrifices in order to make gifts to the collection, the Far Eastern Collection was notably increased and enriched, and has now reached a total of 15,696 works in 13,435 volumes.

With the creation of the new Department of Education, James H. Penniman, Yale '84, has made known his intention to present a memorial Library of Education to the Department similar to his gift to the University of Pennsylvania. It will be housed in a special room in the projected new library building.

The preliminary report of a committee appointed by the University Council to consider the co-ordination of the libraries of the University emphasized the wisdom of "defining the University Library as consisting of all the books owned by the University, whether housed in the General Library or in other University buildings"; and recommended that the Library Committee, appointed by a new method, should have definite responsibility for the care and building up of the School and Department libraries, which should be considered as branch libraries.

NEW YORK

New York. In the main exhibition room of the New York Public Library there is on view "an extensive assemblage of books, pictures, personalia, maps, views, commemoration and celebration orations, medals, cards, programs, etc., relating to the Mayflower Pilgrims in their homes and haunts in England, Holland and America down thru the entire period during which Plymouth Colony existed as a separate body politic." A leaflet describing the main points of the exhibit by Victor Hugo Paltsits has been published by the Library.

The average present salary of graduates who received the diploma of the New York Library School last June, so far as reports have reached the School, is \$1620, and the average salary of those who received certificates at the same time is \$1392.

Brooklyn. At the close of the year 1920, the Brooklyn Public Library contained 972,727 volumes, which, after deducting discarded and lost books, is an actual increase of 10,205 volumes.

For the purchase of 69,699 books, \$105,304 was spent. This represents an average cost of \$1.51 per book, an increase of 57c. on each book. Binding costs increased by 15c. per book.

Books circulated for home reading showed an increase, but the total is still 465,144 below the record year of 1917. The circulation for 1920 was 5,479,154 as compared with 5,333,671 in 1919, a gain of 145,483. A comparison of the per capita circulation of books of the public libraries in the thirty largest cities of the United States places Brooklyn seventeenth in the list, with a percentage of 2.64.

Meetings of clubs and societies to the number

Reduction in Prices

Owing to better labor conditions, a slight decrease in the cost of raw materials and the installation of improved machinery, we are able to announce a reduction in prices on the following supplies: All pamphlet and magazine binders, book cards, book pockets, book marks, mounting papers, posters, and many other items.

This does not necessarily mean that all prices will be as low as those quoted in our No. 23 Catalog of Library Supplies issued in June, 1920, but there will be a substantial downward revision from the "increase in price" sheet which went into effect last October.

All orders received after February 1st will be entered at the reduced rate.

GAYLORD BROS., SYRACUSE, N. Y.

The Reader and the Advertiser

THE LIBRARY JOURNAL is of continuing service to its subscribers, as the many enthusiastic letters to the publishers attest. This appreciation of the editorial efforts of the magazine also extends, we are confident, to the advertising pages.

A practical way for the reader to help in the development of THE LIBRARY JOURNAL is to patronize the advertisers who by their presence demonstrate their belief in the merit of the magazine. An added service is performed if the reader mentions THE LIBRARY JOURNAL in connection with such patronage.

of 22,013 were held in the various auditoriums and study rooms, and at the South branch twenty classes in charge of teachers were received and given instruction in the use of the library. Carol Park branch received an equal number of classes for the same purpose and at most branches librarians are now engaged in giving instruction in the use of the library. Through resignations the library lost 63 members of its staff as compared with 76 in 1919. Among those resigning are two specially noticeable because of their records: Grace T. Langdon, for sixteen years in the service of the library, had been absent on account of illness only fourteen days, and Alice R. Phipps lost fifty-one days during twelve years' service. The 124 vacancies existing at the beginning of the year were reduced to 87. Appointments include those of 13 former employees who were reinstated. This improved condition is to a great extent due to the salary increases made possible owing to increased appropriation.

During the last two years salaries in the graded service have been increased between 30% and 70%, and the library participated in the distribution of the \$5,000,000 appropriated by the City for the increase of salaries to city employees during the period August 20 to the end of the year, "provided that the acceptance of such money and the apportionment by the Board of Trustees of such moneys as determined by the City shall in no wise . . . be construed at any time as an admission or recognition by the Brooklyn Public Library Board of Trustees of the City's right to control its internal affairs or regulate matters of salary, etc." The additional appropriation thus obtained was on a percentage basis for all employees receiving \$2,500 or under, except that no one should receive less than \$200. Employees receiving \$2,500 to \$7,000 were given an increase of \$500 each. These increases were in no way based upon merit or length of service.

The trustees asked for an appropriation for 1921 which would provide for a minimum salary of \$1,200 for the lowest grade, advancing by \$60 steps to a maximum of \$2,160 in the highest grade. The City adopted an appropriation which would provide a minimum of only \$920. This the trustees felt to be too low, and a scale has, therefore, been worked out upon a \$1,020 minimum, or \$100 more than that allowed by the City, having in mind increasing the pay of those in the lower grade and at the same time re-establishing the schedule by which salaries were automatically increased by \$60 per annum for meritorious work and length of service. If all positions are filled under the 1921 library schedule, \$15,000 will have to be taken from the

Directors' fund in order to make up the deficit, as the library does not at the present time receive a lump sum from the city but must make requisition for salaries for so many people at so much per month.

DISTRICT OF COLUMBIA

Washington. The library of the U. S. Geological Survey accessioned during the year ending June, 1920, 13,644 books, pamphlets and maps. 572 title entries were furnished to the Library of Congress for printing, in accordance with the co-operative cataloging arrangement. 6403 books and 133 maps were loaned, and 11,358 readers consulted the library in person. The Bibliography of North American Geology for 1918 was published as *Bulletin 698*, and the bibliography for 1919 and 1920 is in preparation. Work on the cumulative Bibliography of North American Geology has progressed steadily, but no publication date can be set.

NORTH CAROLINA

There are in North Carolina, according to "Social Law and Agencies of North Carolina: a Handbook of Information," published by the American Red Cross in December, 52 public libraries, 2 of which are for the colored population. There are in addition, 32 college libraries, 8 of which are attached to negro institutions. The largest library in the state is that of the University of North Carolina, with over 88,000 volumes. Other libraries containing more than 20,000 books are: The Library of Trinity College with 55,000 volumes; the State Library with 46,000; Davidson College with 27,000; the Supreme Court Library, 22,000; and Wake Forrest College with 22,000. If every town in North Carolina had free library facilities, there would remain in the rural district a large majority of the people of the state without access to books. Books for these are supplied thru the North Carolina Library Commission's package and traveling library services, thru the Bureau of Extension of the Library of the University of North Carolina, which will loan any book from the general library which is not in use at the time that request is made, and which is not governed by special regulations requiring it to be kept in the building. The University Library is also the State library centre for the library service for public health nurses, who may also borrow from the Central Library in New York (156 Fifth Avenue). The State appropriates \$7,500 biennially towards meeting the demand for rural school libraries.

::

Lansing, Mich.

schools have been held by the St. Louis Public Library, the purpose being to impress upon them the fact that leaving school should not mean the dropping of relations with the library, and generally to arouse or maintain interest in it and its methods of public service.

The reception at the Central Library was to high-school graduates and was held on the afternoon of February 1st. Despite a very remarkable "dark day," which turned all the daylight hours into night, about thirty graduates were present. After an informal talk by Dr. Bostwick in the assembly room, those present were shown around the building by Library School students, ending with the recreation room, which was shown as a "going concern," with victrola music, etc. Tea was afterward served in the staff lunch room.

Receptions to grade-school graduates were held at the Carondelet, Crunden and Divoll Branches. At Cruden the graduates of three neighboring schools were invited. The Assistant Librarian, George R. Throop, made a short address, school songs were sung, and Mr. Rochfort, principal of Webster School, said a few words. Refreshments were served and there was dancing. About fifty pupils attended.

On the afternoon of January 28th the staff of Carondelet Branch entertained 125 graduates of the neighborhood schools. After a brief talk by the Branch Librarian, J. J. Maddox, principal of Cleveland High School, spoke informally. Four grade-school principals and five teachers were present in addition to the children. Punch and cakes were served. Committees of children served the refreshments and introduced strangers. The local Y. M. C. A. secretary assisted especially in entertaining the older boys.

At the Divoll Branch, the Clay School Mothers entertained the graduates of that school on January 27th, from 2 to 5 p. m. There was a short musical program, refreshments and dancing. Fifty-two graduates and about fifty adults were present.

MINNESOTA

St. Paul. A collection of dolls correctly dressed to represent 23 nations are being exhibited at the public library as a part of St. Paul's Americanization program. The dolls have been dressed by the Junior Housewives' League, composed of girls of the sixth, seventh and eighth grades of the public schools.

CALIFORNIA

Stanford. Herbert Hoover, a member of the first graduating class and a trustee of Stanford University, has presented to that institution the "greatest collection in existence" of secret Bol-

shevist and other European secret government documents. These records already consist of about 375,000 volumes, pamphlets and manuscripts, and more are coming from collectors in Europe. "The only record of the Bolsheviks' initial meetings and organization plans are in this collection."

Another interesting gift to Stanford is the entire private library of Professor Paul Miliukov, Russian historian and Secretary of Foreign Affairs in the Russian Government after the revolution of 1917. This library was sent out of Russia and hidden in Finland in 1914 at the outbreak of the war, and arrived at Stanford only a few weeks ago.

Librarian George T. Clark returned to Stanford last month after a year's travel round the world with the University's "want list" of 6370 items. Other volumes bring Mr. Clark's purchases for the Library up to 11,000 volumes.

Los Angeles. The open courses in library work with children and schools, administration and motion picture reference work at the Library School of the Los Angeles Public Library are now in progress with trustees from Massachusetts and Missouri as well as library workers from the middle west and California in attendance. The special libraries course this year is concerned chiefly with the needs of picture studios; Eleanor Caruthers, principal of the Art Department of the Los Angeles Public Library, gives lectures on art books and picture collections and Helen Gladys Percy, manager of the Hollywood community theater, discusses other necessary books. Elizabeth Owen Williams, registrar of the Library School, gives lessons in indexing and filing, with a practical problem in indexing Los Angeles County war activities in local newspapers for those who elect this course.

LIBRARY CALENDAR

- Feb. 23. At the National Board of the Y. W. C. A., 600 Lexington Avenue, New York. Monthly meeting of the New York Special Libraries Association.
- Feb. 25. At the School of Music of Yale University, New Haven, Conn. Annual meeting of the Connecticut Library Association.
- April 29-May 1. At Atlantic City. Twenty-fifth joint meeting of the New Jersey Library Association and the Pennsylvania Library Club.
- June 20-27. At Swampscott, Mass. Headquarters at the New Ocean House. Forty-third annual conference of the American Library Association and twelfth annual convention of the Special Libraries Association.

Two of the U. P. C. Auto Books Battery Service Manual

A guide for the battery repairman and shop owner in testing, locating troubles, making repairs and charging batteries, with a Trouble Chart in which all known defects are listed with the cause of the trouble and the proper remedy opposite each. Plans and layouts for battery stations, with complete information on the management of the business, forms, order systems, charging rates, etc., are included with a glossary of terms and a list of manufacturers of batteries, repair parts, tools and equipment for battery service.

One Storage Battery Trouble Chart, 24x27 ins., 170 pp., 63 Figs., Flexible Fabrikoïd, \$2.50.

Electrical Equipment of the Motor Car

A practical manual on Ignition, Starting and Lighting, in which special attention has been given to the fundamental principles of electrical engineering as applied to the electrical equipment found on the modern motor car. These fundamental principles are so clearly explained that it is a comparatively easy task to trace out and locate all cases of electrical trouble in a very definite and systematic way.

The book is well illustrated and numerous special diagrams have been prepared to bring home more forcefully the subject matter under discussion.

72 Pages, 5 x 8 ins., 464 Figs., 256 Blueprint Wiring Diagrams, Flexible Fabrikoïd, \$3.50.

PRESS NOTICES.

CHRISTIAN WORLD—This is a timely, impersonal, dispassionate, analytical unanswerable discussion of the weaknesses and inconsistencies of the Christian Science Church. It overflows with facts which provide the ground-work of the author's incisive argument . . . and is as clear as sunshine and as irrefutable as the decalogue.

THE EVANGELICAL MESSENGER—The spirit in which his exposures of inconsistencies in the organization are made is very commendable, and adds merit and pungency to his arguments and forceful statements. It is the only book of its kind on the market as far as we have any knowledge.

Raffia Basketry as a Fine Art Ashley—\$2.00

Basketry in its highest development is described in the above. Beautiful colors and interesting designs are shown in the many illustrations. Many copies sold in Camp Libraries or wherever Basketry is taught.

The BISSELL Electric Suction Cleaner

Cleans Libraries Immaculately at Minimum Cost

WHERE all classes of people congregate, more than usual care must be taken in cleaning.

There is no method, or apparatus, which meets the requirements for library cleaning so well as the Bissell.

With 100% power right at the point of operation, it "sucks up" all the dust and dirt no matter where it lurks.

It cleans around and under tables, desks and chairs without necessitating the moving of furniture. It sucks the dust from the tops of books

and book cases. Takes up pins, hairpins, bits of paper and string without harming any part of the machine.

And it does this not only thoroughly but quickly and inexpensively, and women operate it easily.

Write for a demonstration today. This incurs no obligation to buy. Our nearest representative will get in touch with you promptly.

The volume of air moved at high speed is the measure of cleaning efficiency. The Bissell is equipped with a one-third horse power motor. Through its orifice of one and one half inches in diameter it moves from 90 to 100 cubic feet of air at a speed of well over a mile a minute.

The Modern Motor Truck

Design, Construction, Commercial Application, Operation, Repair

By Victor W. Page M.S.A.E.

962 Pages

750 Illustrations

Price \$5.00

Covers Everything You Should Know About Gasoline and Electric Trucks

This is a new 1921 book considering all types of motor trucks and industrial tractors and trailers. It outlines features of all types of trucks, gasoline and electric and all varieties of truck bodies. This book is written in language everyone can understand and is not in any sense of the word, a technical treatise. It is a practical book that will make special appeal to the truck driver who seeks to better his position and to the mechanic charged with the repair and upkeep of trucks. The factory or business executive who wants to obtain a complete working knowledge of truck operation problems will find this book a reference work of great value. The truck salesman or automobile dealer will find that this work contains information that means money to them. All garage and service station men should have a copy of this book for reference because truck construction differs from passenger car design in many important respects. Anyone who reads this book is in touch with all that is practical and that has been tested out in real service.

**SIMPLE IN TREATMENT—AN ENCYCLOPEDIA IN SCOPE.
NOT A TECHNICAL TREATISE BUT A BOOK FOR THE PRACTICAL
BUSINESS MAN AND MECHANIC**

The Modern Gasoline Automobile, Its Design, Construction, Operation

By VICTOR W. PAGE, M.S.A.E.

This is the most complete, practical and up-to-date treatise on gasoline automobiles and their component parts ever published. In the new revised and enlarged edition, all phases of automobile construction, operation and maintenance are fully and completely described and in language anyone can understand. 1,032 pages, 1,000 illustrations. Price, \$4.00

The Model T Ford Car, Its Construction, Operation and Repair, Including the Ford Farm Tractor

By VICTOR W. PAGE

This is the most complete and practical instruction book ever published on the Ford car. A high grade, cloth bound book, printed on the best paper, illustrated by specially made drawings and photographs. All parts of the Ford Model T Car are described and illustrated in a comprehensive manner—nothing is left for the reader to guess at. The construction is fully treated and operating principle made clear to everyone. 410 pages, 153 illustrations. Price, \$2.00

Automobile Repairing Made Easy

By VICTOR W. PAGE

A thoroughly practical book containing complete directions for making repairs to all parts of the motor car mechanism. Written in a thorough but non-technical manner. This book also contains Special Instructions on Electric Starting, Lighting and Ignition Systems, Tire Repairing and Rebuilding, Autogeneous Welding, Brazing and Soldering, Heat Treatment of Steel, Latest Timing Practice, Eight and Twelve-Cylinder Motors, etc., etc. You will never "Get Stuck" on a Job if you own this book. 1,000 specially made engravings on 500 plates. 1,056 pages (5½x8). 11 folding plates. Price, \$4.00

Starting, Lighting and Ignition Systems

By VICTOR W. PAGE

A practical treatise on modern starting and ignition system practice. This practical volume has been written with special reference to the requirements of the non-technical reader desiring easily understood explanatory matter relating to all types of automobile ignition, starting and lighting systems. It can be understood by anyone even without electrical knowledge. Over 85 pages. 492 specially made engravings. New edition. Price, \$3.00

THE NORMAN W. HENLEY PUBLISHING CO.

2 West 45th Street,

New York City

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Chivers Book Binding Co., Inc.

911-913 Atlantic Avenue

Brooklyn, N. Y.

Reduction in Prices

Owing to better labor conditions, a slight decrease in the cost of raw materials and the installation of improved machinery, we are able to announce a reduction in prices on the following supplies: All pamphlet and magazine binders, book cards, book pockets, book marks, mounting papers, posters, and many other items.

This does not necessarily mean that all prices will be as low as those quoted in our No. 23 Catalog of Library Supplies issued in June, 1920, but there will be a substantial downward revision from the "increase in price" sheet which went into effect last October.

All orders received after February 1st will be entered at the reduced rate.

GAYLORD BROS., SYRACUSE, N. Y.

Spring Books For Libraries

THE NEW JERUSALEM *G. K. Chesterton*

STRING TIE BINDERS—Just what you want for your pamphlets. Size—9x6¾ inches. Price 2 cents each

DEMOCRAT PRINTING COMPANY
MADISON, WISCONSIN

**CRAM'S MODERN
REFERENCE ATLAS**
THE STANDARD SINCE 1867

THE new census edition of Cram's Modern Reference Atlas is now ready. The 1920 census statistics of the United States and the new world maps, showing all territorial changes made by the war, make this edition the most valuable reference work we have issued in all the 53 years we have been publishing maps and atlases.

New Maps—New Statistics

An entirely new set of maps, large scale, clearly engraved and judiciously colored, has been specially prepared for this edition. The descriptive matter of the physical and political geography of the nations of the world has been rewritten and brought down to the present day. The index and all the statistical tables have been carefully compiled from the new 1920 census figures.

Special Features

Descriptive Gazetteer of each state and country, giving data on soil, climate, resources, industries, population, progress, etc.; 300 pages of maps, including 90 large double page maps of states and foreign countries, and of principal cities of U. S.; general resume of postal, cable and telegraph information; topographical and geological maps; biblical and historical maps; statistics on commerce and finance; carefully prepared index of 250,000 places, giving population, location on the map, etc., and indicating post offices, incorporated places, county seats, capitals, etc.

The new Modern Reference Atlas is 12 x 15 inches in size, contains 496 pages, and weighs nearly 10 pounds. It is printed on finest quality heavy map paper and bound in buckram.

The price is \$10.50—prepaid anywhere in the U. S. Descriptive circular, with sample maps, sent on request.

ABINGDON

BOOKS of Value

IN this intense age of mass-production reading has become almost a problem of moments. Yet the need for it has increased. For it is in books—good books, that we find those essential experiences which bring to us a fuller knowledge of the relationship of Life. It is the thoughts, the truth, the reality, they awaken in us, that makes them so valuable, so indispensable.

Such are ABINGDON BOOKS—*Books of Value*

MODERNISM AND THE CHRISTIAN FAITH

By JOHN ALFRED FAULKNER

A discussion of those doctrines of the Christian religion which have been the storm-center of debate, which have seemed the most offensive to certain modern men, and which have therefore been either opposed or ignored by many even in so-called orthodox churches.

In Press.

FROM SLAVE TO CITIZEN

By CHARLES M. MELDEN

Written with ample knowledge of the facts and with discriminating judgment. A valuable and needed contribution to the literature on the Negro Question as it exists today.

In Press.

WHAT MUST THE CHURCH DO TO BE SAVED?

And Other Discussions

By ERNEST FREMONT TITTLE

What Must the Church Do to Be Saved? Christianity and Life. The Changing Conception of God. Sin Salvation. Jesus Christ—The Hope of the World.

In style and treatment these lectures challenge consideration.

In Press.

CITIZENSHIP AND MORAL REFORM

By JOHN W. LANGDALE

PROBLEMS

Post-Prohibition Problems. The New Criminology. The Family, Industrial Relations, Abolition of Poverty, Americanizing America, International Cooperation.

Studies in the relation of the preacher, as a Christian citizen and moral leader, to these problems and pending reforms.

In Press.

THE FUTURE LIFE—FACT AND FANCIES

By F. B. STOCKDALE

The Fallacy of the Ouija Boards and Mediums. The Foundation of Faith. Critical, Convincing, Constructive.

Cloth. Net, \$1.50 postpaid.

THE RELIGIONS OF MANKIND

The Long-Waited-For Book on Comparative Religion.

By EDMUND D. SOPER

Bringing to his task the necessary equipment in scholarship, sympathetic interest and evangelical faith the author has produced a volume of great importance and outstanding value. A book that fills a vacant niche.

TORONTO PUBLIC REFERENCE LIBRARY,
TORONTO, ONTARIO.

The library is equipped with the Snead Standard Stack and "open bar" adjustable shelves. The stackroom, see Fig. 244 of our catalogue has been so located and planned that it may later be extended on all three sides to provide for future growth with the minimum inconvenience and expense.

For years Snead products have been the preferred equipment for both large and small libraries.

Their adaptability to expansion, their unequalled compactness and their scientific construction throughout insure perfect satisfaction and ultimate economy.

Detailed plans and description of the above, and many other notable library buildings are found in our publication "Library Planning, Bookstacks and Shelving" which also contains valuable technical articles on the planning and construction of libraries.

MARCH 1, 1921

A Library Play Contest

By ANNA P. MASON

Librarian of the Carondelet Branch, St. Louis Public Library

THE great community event of the year in Carondelet is the School Picnic. The occasion is the annual outing of the five large schools of the vicinity. This is simply the occasion, however, the opportune season to give public expression to the spirit of the neighborhood. On this particular day in summer Carondelet realizes itself as a social entity, it gathers youth and maturity and age in one grand perspective of life and enthusiasm. It thrills with its own romance, is reminiscent with historical age and plays with the joy of eternal youth. Above all it abounds in fellowship. All places of business are closed so that whole families can participate in the festival. Not only are entire families represented but all institutions and activities which are part of the intimate daily life of the community. Churches and clubs have their headquarters on the picnic grounds and the library has its booth with books and magazines provided so that odd half hours may be spent in reading under the shade of fine old trees. The fact that this yearly carnival is more than a picnic determines the nature of the day's program and gives it distinctive character. The Library can find no better way to grow into the hearts of the people than to take a fitting share in the responsibility for making the day successful.

This year a new feature was introduced as part of the Library's celebration. Two months previous to the festal day, Louise Boette, the children's librarian, planned a contest in the writing of plays. Those competing were to be in the eighth grade and the subject was to be the value of the Library to the Carondelet residents. Each play was to have not more than two scenes and to require not more than fifteen minutes for performance. This announcement was made in the schools and the children were told

that the prize play would be presented in the park pavilion on Picnic Day. It must be confessed that the whole idea seemed a doubtful experiment. It was impossible to tell how it would be received as very little work in dramatic composition had been undertaken by the schools of the neighborhood. But Carondelet children as usual rose to the occasion. Enthusiasm spread like magic and within a week some boys turned in their work. Everywhere the contest was the subject of conversation. The young people referred mysteriously to the characters they were using, the parents spoke proudly of the various plots they had heard discussed. All the time the results continued to come in and on the closing day of the contest about thirty plays were in our hands.

Two teachers were invited to join the Branch Librarian and Children's Librarian as a committee of four to judge and grade the work. This task proved to be very diverting. It had been dreaded as a real task. It became an excursion into an undiscovered country. It was an opportunity to get at the child's conception of the library, to see the workings of his imagination, to view ourselves from his standpoint. Perhaps only in the dramatic form could such an effect be produced. Certainly every librarian knows the stereotyped form of the letter or composition written about the library. But here was something entirely new! Where we had dreaded monotony of theme we found refreshing variety of plot. We expected the characters to be lifeless: we met with live people such as come into the Branch every day. If these seemed too extraordinarily alive at times it was because they were charged with the youthful vigor of their creators.

The children could hardly wait to know the prize-winner. When this information was given

out they were all very happy. Normal children are good sports and these were normal children, glad that one of their number had won, well aware that only one could have the highest honors and that this was what gave zest to the whole thing. This attitude was well illustrated by the fact that one boy brought in his manuscript after the committee had rendered its decision. When reminded that the winner had already been selected, he said: "That makes no difference, lady, I started that play and I wanted to finish it and give it to the Library like the other fellows."

The honors were awarded to three girls of the Lyon School who in collaboration wrote "The Conversion of Ellen." This play was of an allegorical nature, depicting the conversion of a girl who did not read books and tried to discourage others from doing so. It was thought out carefully and, tho the plot was very slight, the general effect was artistic and they had managed to put considerable significance into the lines. From a scoffer, Ellen became an ardent devotee of the library, the "whole course of her life being changed" and this was accomplished by a league of the books themselves, including war stories, stories for boys, college stories, history stories, fairy tales, Indian legends and all the others.

As soon as the prize-winners were notified, they set about choosing their cast of characters and designing their costumes. They worked diligently and began rehearsals promptly. They were left entirely to their own devices as we desired spontaneity and originality above all things. Rehearsals were attended only as an encouragement and to be sure that nothing objectionable was introduced. Day after day we were consulted on this detail and that, advice being given according to the desires of the children as nearly as those desires could be apprehended, so that without interfering we might add the proper degree of importance to the affair. The local neighborhood newspaper wrote up the contest complimenting the winners and giving a roll of honor containing the names of children deserving special mention for the high character of their compositions. The printed program of Picnic Day Events contained the play announcement in large type and thousands of these were distributed among Carondelet citizens.

On the day of the celebration, it was evident that the play was considered an important part of the program. On either side of the front of

the library booth were posted bulletins announcing the hour of the performance and showing pictures of the cast of characters as they appeared at the dress rehearsal. Large groups were constantly gathered before these pictures enjoying them frankly. The *Globe-Democrat* sent a reporter down to witness the affair and a very nice little article was printed as a result. The actual performance went off without a hitch except such annoyances as are bound to be associated with large crowds and open-air performances. A committee of business men and several police were on hand to keep the pavilion cleared and the crowds orderly. The young actors did their parts perfectly and the Carondelet library staff felt more than gratified with the result. This performance will probably be repeated in the library auditorium as part of a program which will include also two or three other plays which were written during the contest. While the immediate goal of the whole idea was this final presentation, as a matter of fact the by-products were the most important part. The interest aroused in the minds of the children, the close personal contacts which grew out of the scheme, the widespread advertising which was a natural outcome were indeed valuable. Added to these may be mentioned again the insight gained into the minds of the children who in their work reflected their general reactions to school, library and social life.

Of the thirty plays received more than half were above the average, everything considered. Altho the majority could hardly be presented in the original form there is a splendid assortment of material. They are characterized by refreshing simplicity and directness of expression, pictures of ideal home life and neighborly relations, and interesting comments on topics concerned with the everyday life of the community. The titles are interesting and well chosen, among them such as these: "How I Became Proficient at my Trade," "Found, the Answer," "The Hidden Treasure," "Father's Friend," "How I Became a Wild Animal Hunter," "It's Different Now," "The Library Means More to us than Some People Realize."

Carondelet is essentially a home-loving community, so there are glimpses of intimate family life. Mother is pressed with the details of housekeeping and the care of several children who are all wide-awake, restless, vigorous youngsters, possessed with insatiable curiosity about everything. In the midst of cooking, mending,

cleaning and washing, she tries to respond to the desires of her alert offspring. Resourceful to the last degree, still she cannot satisfy them. They dog her steps until she can bear it no longer. She tries to find other employment for them, perhaps sending them out to work in the garden. And still, no rest for her, no peace in the household! The garden is a storehouse of unsolved wonders in the shape of plants and bugs.

Father comes home tired and hungry. Dinner is scarcely ready and he is met at the threshold by the children eager to propound more questions for Father will surely know how to answer them. All day the neighbors come and go and there are other interruptions, pleasant and unpleasant and many chats on various subjects.

Sometimes there are attempts to picture Father's troubles at the office. He finds new difficulties awaiting him at every turn. Sometimes he gives up one business and tries another. His business friends telephone or call and bewail their lack of knowledge. One says eloquently, "I am green and do not know where to turn."

School life naturally comes in for a lengthy discussion. Teachers put so many new ideas into the heads of their pupils. Again they find it impossible to do this and your heart is wrung by the despairing cry "You can't get anything into poor Bob's head, you just can't." Even the play hours are not neglected. Arguments will constantly arise on the rules of the game. Boys use improper language. Alas! some of them get into bad company and smoke.

Beyond all these things are the larger questions: What is going on in the world of affairs today? Which has the greater advantages for children, country or city life? For what shall the boys and girls be trained? Why are the Spaniards here? Who can help the foreign family next door? So it goes in the minds of our young playwrights. Life is interesting but there is so much doubt, so much change, so much seeking after they know not what. Where is the answer? Is there no balm in Gilead?

Then, the Grand Climax! The neighborhood library, the "Hidden Treasure" is discovered. The tired mother heaves a sigh of inexpressible relief and exclaims, "My lands! Now they won't worry me to death with so many questions." Furthermore, she finds she can "get a novel for herself, so her odd minutes won't be wasted."

When Father's business is going under the librarian calls just in the nick of time. "She shakes hands very hard with Mr. Burnfelt and says, 'I am soliciting the business men of the neighborhood to see if they do not need any information from the library for their business. Could we accommodate you with any?'" With joy he responds "You came just in time, I would not have known what to do." And, as one young author puts it, "Thereafter when his friends asked questions of him he always said, 'I could help you but to save my time and learn everything you wish to know go to the nearest library.'"

School days become a joy. No longer do the children go about with their curiosity unsatisfied and their lessons unlearned. Now they can find out what "estimation, observation, proclamation and big words like that mean, even if mother did burn the dictionary because it was too big and in the way." They can find out "what birds eat besides bugs and worms, what and where are the wild flowers, which is more important, generals or soldiers, is it good to have Chinese workmen in America, who started the world war and all kinds of current events." "When you want books all you have to do is to go to the library and *their* (sic) there, ready for use, and all the books you can read in all your life."

Often the urge to use books comes from the teacher and this influence is felt in various ways and makes its appeal often in unexpected situations. There is the queer boy who likes to study all the time and never plays with the gang. He uses the library and is head of his class. Then there is the leader of the gang who "only likes to play baseball and uses *such* grammar." The teacher tries to help him but it is useless. "If you will come to the library," she declares, "You will get pleasure and knowledge combined. I certify that it will do you much good." In some way she drags him up to the children's room against his will and oh, horror of horrors! she finds and hands him a language book. Naturally he rebels. "No grammar book in mine, believe me. Correct English never got anybody any place yet." You hold your breath at this crucial moment, but the dramatic suspense has its proper ending. "Why, dear me," says the teacher, "Look at President Wilson. Don't he have to speak correct English when he talks to the public or gives an address? Look where he got on good grammar." Needless to say the gang leader was won. "What is an address?"

he inquires, and soon he is absorbed in looking up all sorts of material which he "never guessed the library had."

Apparently, once the young people become acquainted with the juvenile collection and "the good lady in charge," they find deep satisfaction. A better testimonial to the value of proper book selection could hardly be found than the unconscious tribute offered in an occasion described as follows: An irritable child hunts thru the home bookcase until the exasperated mother cries out, "For goodness' sake settle your mind down on one of these books. Your father has a very good judgment as to the choice of books." Mary Ann replies, "But, mother, those books may be considered very good by grown people who think father has a very good judgment. But if you would ask some girls my age their opinion they would rather go to the library."

It is interesting to note how every phase of the library work has made its appeal. One grows rather weary of the continuous harping upon modern and progressive methods in vogue with professionals in the educational and social sciences. There is a temptation to think these things are all talk until some simple and natural proof is displayed such as has come out in this new experience with the young folks. We find they mention boys' clubs meeting in the assembly rooms and gathering in the child who "roamed at night on the streets." Father goes to bed early with the injunction, "Leave the door unlocked for George. No need to worry about him now, he's up at the meeting in the library."

There is a delightful picture of the friendship between "José, a Spanish boy and Tom, an intelligent boy of fifteen belonging to the Hikers' Club." Tom is sympathetically concerned with the problems of José's family. The Hikers go down to the library to look up the caves of the county in order to plan their outings and Tom suggests that the club also look up the subject of naturalization. "I have been thinking," he says, "that this club can be of some help to the foreigners that live all around us and make citizens of them." José is taken into the club and enters eagerly into all their plans. One can feel the pathos and longing in the little Spanish lad's words, "I will do my best, boys. Oh! it will be a happy day for me when my father becomes a citizen of this great Republic." Later when success has crowned their efforts, Tom asks José how it feels to be a citizen of the

United States. Joyfully he answers, "Glorious! and a deep feeling of gratitude to the boys of this club and to the good people of the library for the books they so kindly gave us."

Our Carondelet children have even presented a plea for the use of books in vocational guidance, altho it is extremely unlikely that they have as yet any idea of what that term means. It is to be hoped that when they reach High School the subject will have as real and unspoiled an interest for them as that so charmingly expressed in these youthful literary efforts. There is an account of Bud, Tom and Joe reading at the Library and so absorbed that they always have to be sent home at closing time. Many years later the three friends meet at the "Hotel Ritzmore, New York." Tom is a noted lawyer, "fresh from a big case in Philadelphia, Joe a successful electrical man, and Bud the most distinguished is a wild animal hunter in Africa." But entertains the others with thrilling tales of his life in the jungle. As his guests depart Bud delivers these significant words: "Say, boys, remember that day in the Carondelet Library? We sure made up our minds quick."

The effect of the whole contest is to give new courage and faith that, in some measure, the things the library movement stands for are coming to pass. Surely these young children are hearing things and seeing influences at work about them which they associate with books and librarians. It is most gratifying to find that they never picture any thought of compulsion in connection with their visits to the Branch. The only instances in which the characters do not come of their own free will are those where they are dragged in by other children, or "follow that queer chap to see what he does up there," or when "they are ashamed not to never know their lessons." In every case they find something which makes them come again, even if it is only "how to mix colors to paint the bird house." The librarian is that lady in the children's room who tells all about the books, or that woman who will find something for your mother, or that girl who is "so attracting." She seems however to be just a part of the atmosphere. They never feel her as an intrusion altho occasionally she is overheard to say "Those children are certainly interested in their books." Also she reminds them that it is closing time and invites them to "come again tomorrow." For the most part they accept her as naturally as they do their parents at home, surely with much

more satisfaction than some of their visiting relatives and friends.

As a closing thought in this review of a library play contest, it seems fitting to refer to a home scene with which one of the little plays comes to an end. The entire family is gathered together at the close of the day and all are reading, each one absorbed according to his particular interest. One of the children discovers Grandmother reading a Fairy book and laughs about it. The mother rebukes the daughter saying, "In Grandmother's time there were few books and even in my day we did not use the library only for stories. Now they use them

very much and read about things in several books. I think this method is best, in this they get different ideas." At this juncture, Grandfather looks up from his paper to say "Yes, now they can do that, but we had to learn everything by heart, and to learn things out of one book by heart was plenty if not too much, and after learning them by heart all the good it done us was that we forgot it in a few days. But it is not that way any more. Now there is the library for young and old in business, study and play."

May we not believe these young people when they say "The Library means more to us than some people realize?"

The Sioux City Library Hospital Service

SOME QUESTIONS ANSWERED BY ROSE A. O'CONNOR

Hospital Librarian, Sioux City Public Library.

THE hospital service of the Sioux City Public Library, called by its patrons in the hospitals "The blessed innovation," made its initial bow to the public in November, 1919, and since that time we have had various inquiries concerning our methods of operation and co-operation. We hope, in this article, to answer those queries in so far as possible and give to those interested in the establishment of such a service the benefit of our experience. Many of our questioners have been under the impression that only chronic cases in the hospitals care to read; this is not the case. The patient whose sojourn in the hospital is but a matter of a few hours or days has just as keen a desire to be lifted out of himself, and how better than thru the life giving pages of a wholesome, happy book? We find loneliness to be an early symptom of the convalescent. After the fight over illness has been won loneliness and depression retard recovery. We have also been asked if the demand for this service was created by us. Emphatically no. The demand awaited our coming with open arms; we believe that our patrons in the hospitals of Sioux City are not different from thousands of others in the health institutions of the United States and that a service such as this will find a hearty welcome in all of these hospitals, we feel assured. Another question "Do you find the demand for magazines to be greater than that for books?" Again no, patients in bed complain that many of the

magazines are over size and unwieldy and they prefer books for comfort and convenience. The convalescent, able to be up and enjoy the rest rooms and verandas, where comfortable chairs and tables abound, turns his attention to the magazines. We find on consulting our statistics for the period of our establishment that seventy-five per cent of the reading in the hospitals is from books.

Questions have also come concerning our records, method of charging, etc. These are as simplified as we could make them in order to save time. All records for this service are kept separate from those of the main library having accession books and shelf lists of its own. The collections being made up largely of fiction, what classification is used is broad. We have, too, shelf lists; the original, which is the usual form used by libraries, and a second one made on "p" slip size which carries author, title, and accession number. These last are filed under the name of the hospital in which the book may be found. In this manner we have ready information as to the whereabouts of each book. We have a plain, inexpensive book card with the name of the service at the top; these were made by a local printing company. Books left in private rooms are charged to the room number; in the wards the name of the patient is also taken. Hospital authorities and attendants have their books charged by name and department. Each book has in it a dating slip. Book cards

are filed in the usual library fashion in a tray in connection with the book truck. There is no need for penalties as books are read rapidly. Distribution of books is made in the afternoon as this is the most convenient time for hospital attendants and we are less apt to conflict with hospital business. We have received much commendation from hospital superintendents for the manner in which the work of the service is accomplished without interference with hospital rules and affairs. Thus, "Your service is such a pleasure, you come and go without confusion or inconvenience to us and we are so

classes and to each nurse, setting forth the rules which were to govern the library collections in the hospital. These were supplemented by further rulings of the superintendent to the effect that books left in rooms must be picked up by the nurse in charge and returned to the chart rooms or linen presses on each floor, where the hospital librarian could gather them up. The response to the rulings has been most gratifying. On every visit we hear "Wait a minute, I put some of your books in here." Each nurse seems to feel that the instruments for our work are just as important to us as those which she must use

A JANUARY DAY IN THE SURGICAL WARD OF THE SAMARITAN HOSPITAL, SIOUX CITY

glad to have you." This appreciation helps to make the service so much the more worth while.

In leaving books with patients the first time, we explain that they must be left in the room to which they are charged and that exchange of books between patients is not permissible. We are not always obeyed in this, but it is the exception. We find, too, that patients will hesitate about taking books until it is made clear that the service is a free one.

One patron remarked, "Free: well, I know of three things I can get for five cents, a package of gum, a box of matches, and the *Saturday Evening Post*, but anything free, impossible." The last issue of the *Post* being on the truck, we were able to reduce his list to two things for a nickel by giving him the *Post* free. The question has also arisen "How do you get your books back and do you lose many?" Thus far we have lost no books and as time goes on we have less and less difficulty in having them returned. We began by bringing to the notice of the hospital authorities and attendants the necessity for the return of the books in order that we might maintain an efficient service. Personal letters were sent to superintendents of nurses' training

in her own, and she likewise appreciates, that these books, being available to her patient sometimes brings a respite to her, because if her patient is engrossed in a good story there is not nearly the demand for unnecessary attention. We feel that we have been protected from loss of books thru the book plate in the front of each book, asking that the user will not take the book from the hospital and reminding him of the pleasure he may have derived from it. This plate also notes the source from which the book came, whether by purchase by the library or a gift from the people of the city. This little book plate, we believe, has done much to keep our collections intact for us. Books borrowed from the main library are thoroly fumigated before being returned to their places in the stacks as are all books in the hospitals and the rooms in which they are shelved. This is done as a precaution by the hospital authorities and thus the library is relieved of the responsibility. In this way we are safeguarded on all sides.

Then there is the hospital librarian. What of her? What must she measure up to? It is of course understood that she has library experience. We have had the comment made that

it takes a "peculiar type." Not at all, just a human being with humanity and sympathy her keynote. One of the most important requisites is physical fitness as she is a provider of cheer. Without good health and spirits, she must needs fall short of bringing into the sick room that happiness which is needed. She should possess poise and the ability to act quickly in emergencies as these frequently arise. For illustration: a little child, whose tonsils had been removed, was found sitting bolt upright weeping bitterly; he had awakened to find his mother gone and the nurse called elsewhere. Poor frightened bit of humanity, all alone! The hospital librarian happened to come just then. What was to be done? Look up assistance, lose time, and perchance endanger life with delay, or act on her own initiative. She chose the latter course and having staunched the bleeding soothed the child to sleep with the adventures of dear, foolish little Peter Rabbit. There is scarcely a day but some emergency of this sort arises in these busy institutions, and the hospital librarian can be of valued service if she keeps her head and uses judgment. The hospital librarian must have tact and the ability for sudden self effacement, she should have a knowledge of human nature and an interest in it; she must be able to carry in her mind the many individual cases she comes in contact with and be ready to extend her sympathy and encouragement at all times; she should be able to address her patrons by name with an added comment on improvement or other cheerful remark. Cheerfulness and kindness go far in making of her clientèle in the hospitals friends rather than mere acquaintances.

It is well to remember that this particular patient is prone to tears and discouragement or that the other one likes a bit of news from the outside. The hospital librarian must ever have her good humor and her sense of humor on tap, she keeps in mind that this woman has been in the hospital nine weeks and likes Barclay, Boshier, Rice, or Richmond, and that the ex-soldier in the bed in the corner of the ward is interested in salesmanship, electricity, or agriculture, which he expects to take up in the government school as soon as he is able to leave the hospital, and he likes Beach, Lardner, Cobb, or Connor. (Grey is invariably in the list.) And over there in the bed by the window is the Mexican boy, a victim of an accident while at work; his leg has been pierced by

a railroad spike. How far away from home and friends he is. He speaks but little English and reads it not at all. The hospital librarian carries in her mind the picture of his smile of genuine pleasure at the sight of the Spanish book she brought him on a previous visit and hears again his expression of appreciation in his best American, "Good book, you bet;" and she has remembered to bring him another "Good book, you bet." There is the little Frenchwoman who sits and waits for her husband to return to health; the librarian calls to mind her pathetic joy on beholding a book in her own beloved tongue, and so remembers to take her another. In the children's ward we have the little five year old recovering from a mastoid operation; he loves the big animal picture books and the rag and paper dolls. There is the boy who likes to cut out pictures of battleships and soldier boys and the like, and another one who wants a scout story or a thriller, and the little girls who want to bedeck themselves and their surroundings with the things they make from paper, peanuts and clothespins, etc. If the hospital librarian has versatility she adds to her qualifications a valuable asset. In summing up this peculiar type of person, the hospital librarian, can she measure up to the little poem "Pep?" by Grace G. Bostwick; if so, then all is well.

Vigor, vitality, vim and punch—

That's pep;

The courage to act on a sudden hunch,

That's pep;

The nerve to tackle the hardest thing,

With feet that climb and hands that cling,

And a heart that never forgets to sing—

That's pep.

Wanted

The Savannah Public Library wishes to obtain bound volumes of the *Weekly Sanitary Reports*, issued by the U. S. Marine Hospital Service, Vols. 1, 2, 3 and 4, and *Public Health Reports*, issued by the U. S. Public Health Service, vol. 25, part 2; vol. 26, parts 1 and 2; vol. 28, part 1; vol. 29, part 1; vol. 30; parts 1 and 2; vol 31, part 1; vol. 32, part 1; vol. 35, parts 1 and 2.

Will any librarian having copies of any of these bound volumes kindly communicate with the Savannah Public Library?

C. SEYMOUR THOMPSON, *Librarian*.

Library Work in a Tubercular Hospital

FROM THE REPORT OF THE NEW HAVEN PUBLIC HEALTH SERVICE HOSPITAL LIBRARIAN

A LIBRARY in a tubercular hospital meets two conditions which are peculiar to that kind of hospital—i. e. since the patients spend a large part of their time in the open air, the temperature has a decided effect on their reading proclivities, and the amount of reading done fluctuates with the weather; then, too, the long rest hours reduce the time for reading.

That the library is made use of by both patients and workers had a special demonstration one day during January, when in the Main Building, several patients, two doctors and a cleaning woman were selecting books from the book-cart at the same time, and on the same trip, two orderlies and a nurse also got books.

While the greater part of books going out are fiction, and the most popular taste is for western and detective stories, there are enough demands for more "meaty" reading to show a quite prevalent desire for good literature. James' "Talks on Philosophy" has found a number of appreciative readers—one man re-reading parts for the third time, so impressed was he with the thought; Emerson's essays have been much read, even to the extent of being used by one patient as a standard of comparison for subsequent reading, much of which he found trivial when measured against Emerson. In the same way, Kipling's "Light That Failed," read in close proximity to a "wild west" story, made the latter seem purposeless to another patient.

Here are a few of the special wants of a "cultural" kind:

Walt Whitman's "Leaves of Grass;" Brown's "Religio Medici;" Gibbs', "People of Destiny;" Wilde's "De Profundis;" Dante's "Divine Comedy;" Ingersoll's Works; Margot Asquith's Diary; Poor Richard's Almanac; "Yale Talks" by Dean Brown ("Brown's Mixture," one man calls them!), Italy's part in the war; ancient history; how to look at pictures, etc. One man after some consideration asked the librarian to order for him a new edition of Walt Whitman, in spite of rather excessive cost. He justified it with: "Books are my main recreation while I'm here so I'm going to get it even if it does cost a lot."

Here are some of the technical ones: Books on cartooning; commercial art; farm animals; poultry; fur-bearing animals; shorthand; photography; agriculture in Kansas; shoe and leather trade; the telephone, and forestry.

A considerable number of the patients want to familiarize themselves with the main facts of their disease, and ask for books on tuberculosis. The library's stock of such books is becoming depleted, but Major Foltz is making efforts to have more added. Many want to read the *Journal of Outdoor Life* as it comes out, and two men within the past week have asked the librarian to subscribe for it for them. More copies of this are needed and efforts are being made to secure them.

A feature of January's work was the utilizing of volunteer help in the library. A New Haven volunteer now gives two afternoons a week to the library, and is of much help in doing Public Library errands for the hospital library, as well as various pieces of work that are called for in the library. Others have offered to read aloud to any patients interested. It would seem as if volunteer help might greatly increase the library's efficiency, particularly where, as here, there is only one librarian.

The library's worst difficulty during January has been lack of funds to renew magazine and newspaper subscriptions which expired with December, and to buy new books. An appeal, however, has been made thru the local American Legion and the New Haven Public Library for donations of magazine subscriptions as well as for individual magazines when finished with by New Haven readers. There has been a very responsive spirit shown in the past by the latter, so good results may be hoped for. The New Haven Public Library is on all occasions a generous and practical friend of the hospital, making and displaying effective posters requesting books and magazines for the hospital and lending its own books with the utmost freedom and for long periods of loan.

During January forty-seven volumes were donated to the Hospital, twenty-six volumes were borrowed from the Public Library; and 1184 books and 664 magazines were circulated.

It is hoped that the near future may see a new impetus given the work by an influx of new magazines and increased book gifts—for where the same patients continue indefinitely as in a tubercular hospital, it is particularly essential that the reading stock change and grow.

LOUISE SWEET, *Hospital Librarian.*
Public Health Hospital,
New Haven, Conn.

Summer Courses in Library Science

Columbia University

COLUMBIA University in the City of New York is offering the following courses in Library Economy for the summer session of 1921.

Library Economy S-1 is a course in bibliography to be given by Charles F. McCombs of the Readers' Division of the New York Public Library. This course includes a study of the most used books of reference, and also a study of trade bibliography, and is planned primarily for school librarians and others engaged in library work. The course is open, however, to other students of Columbia University, who wish to obtain systematic instruction in the use of the library thru the study of the commoner reference books, and two points of credit may be counted for it toward degrees in all parts of the University by any one carrying it successfully.

Library Economy S-2 is a course on the administration of the school library, including book selection, and is to be given by Jessie F. Brainard of the Horace Mann School for Boys, West 246th Street, New York.

Library Economy S-3 is a course including cataloging and classification, to be given by Harriet E. Howe of the Library School of Simmons College, Boston.

Library Economy S-2 may count for two points of credit toward the B. S. degree in the Teacher's College and toward appropriate diplomas in teaching, while Library Economy S-3 may count for three points credit toward the same degree.

Library Economy S-5 is a course in indexing, filing and cataloging, as applied in business, and will be in charge of J. Grace Thompson of Chicago, a former student of Irene Warren. This course is not planned primarily for librarians, as it is to cover the various methods of filing and indexing used in business, and the application of these methods to correspondence, invoices, catalogs, sales, records, credit cards or any form of record kept in an office or shop. A study will be made also of the personnel and managing of a filing department, as well as the practical problems in filing room equipment, supplies, floor plans and cards for records.

Correspondence in regard to the various courses may be addressed to the Departmental Representative at 147 Worthington Street, Boston 17, Massachusetts.

HARRIET E. HOWE, *Departmental Representative.*

Colorado Agricultural College

THE seven weeks' session of the fourth Library Summer School will begin June 6th and close July 22nd, the last six weeks coinciding with the regular College Summer School.

The course is planned for librarians, for those who wish to take the training necessary to take charge of a small library, for teachers, and for students who wish to decide whether to take up library work.

The first week is devoted to a preliminary course in bookbinding. Students passing the final examinations are given a certificate, and those who have graduated from an accredited high school will be given college credit.

A fee of \$25 will be charged for the regular six weeks' course, and a fee of \$10 for the work in bookbinding.

The courses are:

1. Classification and Cataloging. Zelia M. Rank, cataloger at the Colorado Agricultural College. 29 lectures, 29 laboratory periods. 5 credits with course 2.

2. Library Economy. Arlene Dilts, assistant librarian of the Colorado Agricultural College; Miss Rank; and Mr. Carter, librarian, State Teachers College, Greeley, Colo. Credit with course 3.

3. Children's Work. Helen F. Ingersoll, supervisor of the children's department, Denver Public Library. Credit with course 4.

4. Reference Work and Book Selection. Harriet P. Sawyer, principal, St. Louis Library School, July 5th to 19th. 2 credits with course 3.

5. Documents. Charlotte A. Baker, librarian and chief of the College Library School, and C. F. Davis, Professor of Irrigation and Constitutional Law at the College. Credit with course 6.

6. Filing, Indexing and Business Procedure. Irene Warren, director of the Chicago School of Filing. 1 credit with course 5.

7. Business Filing and Indexing. No college credit. Fee \$5.

8. Binding and mending. Louis Williams, Evening Vocational High School, Denver. Six hours daily from June 6th to June 11th.

For further information address: Charlotte A. Baker, librarian of the Colorado Agricultural College at Fort Collins, Colo.

University of Michigan

THE University of Michigan Library announces the addition to its teaching staff in Library Methods for the summer session of 1921 of Azariah S. Root of Oberlin College and Frank K. Walter recently vice-director of the New York State Library School at Albany. The summer courses extend for eight weeks and are under the direction of William Warner Bishop, librarian of the University, who will give a course introductory to the study and practice of librarianship.

Professor Root will give a course on the High School Library and a course in Book Selection and Book-Buying for high school libraries and the smaller public libraries. Professor Walter will give courses in the elements of cataloging and of classification and an advanced course on the use, arrangement and acquisition of public documents, Federal and State.

There will be courses in Reference Work, taught by Fredericka B. Gillette; on Book-Binding, taught by W. C. Hollands, and on the use

of pamphlets and ephemeral material in the study of civic and economic subject, taught by Edith Thomas; all members of the staff of the University Library.

At least one year of University or College study is required for admission to the elementary courses, while seventy-five hours of University credits, or an equivalent, are required for the advanced courses. The work by Prof. Root in Book Selection and by Prof. Walter in Public Documents should appeal to librarians of some experience who wish to refresh their knowledge of these subjects or to study them with a view to new work in these fields. All these courses count for University credit toward a degree.

Candidates for admission to the courses in Library Methods should apply in advance of registration to the Director, William Warner Bishop, University of Michigan Library, Ann Arbor, Michigan, as only persons duly admitted to the work are allowed to register.

Certification and Special Libraries

REFERRING to the report of the A. L. A. Special Committee on Certification, Standardization and Library Training (*LIBRARY JOURNAL* for November 15, 1920, p. 938—940), *Special Libraries* points out that there are several points in this program which it might be well to consider in its application to special librarians.

"Special librarians, whether they be medical, chemical, public utility, banking, insurance, agricultural, law, or any one of a number of other branches, are essential members of the organizations employing them in direct proportion as they are able to control the information appertaining to the especial branch involved. This control may have been acquired by experience, by association or by special study. It is not conceivable that a thoroly qualified special medical librarian would be very much of an asset in a law library, and vice versa. Assuming always that a special librarian is one whose success depends on the ability to control special information, the proposal to grade special librarians on the basis of an unrelated technique must be

viewed with some apprehension. Another point to be considered is that many special librarians are employed by private concerns whose evaluation of the services they require might not in all cases coincide with that of the proposed Board.

"The suggestion is put forward for consideration by special librarians that a Board representing them in co-operation with a similar Board of the American Library Association secure standardization of special librarians by the regularly certifying organizations in each of the special branches now employing such persons. Thus a medical librarian holding the certificate of the American Medical Association, upon the recommendation of the proper library certifying body, could be called a professional librarian. Having attained this certificate and desiring to change his professional connections, nothing would prevent the holder from repeating the preparation and securing a law certificate. Another important point is that we, as a group, would be extending our affiliations with the professions and with industry, thus widening both our field. . . and our promise of development."

Popular Names of Statutes*

A TENTATIVE LIST COMPILED UNDER THE DIRECTION OF HENRY J. HARRIS, CHIEF OF THE DIVISION OF DOCUMENTS, LIBRARY OF CONGRESS, FROM THE RECORDS OF THE AMERICAN LAW SECTION, LEGISLATIVE REFERENCE DIVISION

Gifts and Bequests to American Libraries, 1920

THE following list of gifts and bequests to American Libraries includes all gifts of money, buildings, sites, books, and miscellaneous and undescribed items, valued at \$100 or more, which have been reported to the American Library Association for the year 1920.

Two of the largest single gifts of the year are for the sum of \$500,000 each. There will be established in Edgewood, Rhode Island, at an early date the William G. Hall Public Library to be supported by the bequest of \$500,000, made by the will of Mr. Hall. The Edgewood Free Public Library will be merged with the William H. Hall Public Library. The other large gift is the bequest of Mrs. George M. Jones to the library in Lynchburg, Virginia. The amount of this gift is something over \$500,000. Mrs. Jones some years ago erected a building and stocked it with books.

There was a most remarkable showing of private interest and benevolence toward the local libraries in the state of New York. Between 250 and 300 different persons gave as much as \$100 each to libraries, and 84 different libraries were benefited by such gifts, all but three of them being outside of Greater New York.

In making the summary given below no account has been taken of the very considerable gifts of books and service made to the library cause thru the A. L. A., which distributed to the Library Commissions for use in the respective states about 400,000 volumes, worth perhaps three or four hundred thousand dollars, and which supplied to the Army and Navy some 600,000 to 800,000 books as well as many thousands of dollars' worth of service.

The following is the annual summary:

Gifts of money	\$2,444,687
Number of volumes donated about..	120,744
Sites (where money value was not quoted)	13
Buildings (where money value was not quoted)	9
Miscellaneous and undescribed items	27

Unless otherwise stated the gift is to the public library of the place indicated.

CANADA

Wolfville, N. S. Acadia University. Books and periodicals valued at \$200 from various sources.

CALIFORNIA

Brentwood. Site for branch of Contra Costa County Free Library, donated by Chas. E. Sanford.

Monroe. Bequest of \$200 for purchase of books by the will of the late L. J. Bryant.

Rhineland. \$1000 given by Mrs. A. S. Shelton in memory of her husband. Income to be used for purchase of children's books.

Religious Book Week

THE week of March 13th-20th is to be nationally observed as Religious Book Week, at which time the religious press and churches are to take up the discussion of the place of the religious book in the public's reading habits. A group of the leading denominational organizations and religious book publishers in the religious field has been studying the subject of the distribution of religious books, and has come to the conclusion that there is a much wider desire for them than is generally appreciated.

The libraries of the country have always found the ministers a first-aid in bringing books to the attention of the people, and Religious Book Week ought to supply renewed point of contact between the pulpit and the library. Martha Tarbell, the author of Tarbell's "Teacher's Guide," says:

"The libraries purchase considerably more than half of the serious books which are sold, and this classification includes important works on literature, science, art, as well as religion. These serious books are duly classified and shelved where those who read such books can find them, but not where the desire to read them can be created. Why should not collections of the best religious books be sent to libraries and placed where they can be readily examined, just as the best children's books are exhibited in the libraries at Christmas time? Why should they not be sent to the churches for examination by some sort of traveling system which could be worked out by State Sunday School Associations with the help of the A. L. A.? The readiness of the latter to co-operate is seen in these words from a recent report: 'The primary interest of the American Library Association being the promotion of the widest and best use of good books, we urge that more attention be given to the encouragement and growth of the habit of book buying by the general public.'

"The eye-gate is greater than the ear-gate. The reading by the general public of the best religious books would have greater power to prevent the decline of the religious spirit than the listening to sermons and lectures by the limited few."

Increases in A. L. A. Membership

Between January 1st and February 9th, 228 new members joined the A. L. A. The St. Louis (Mo.) Public Library sent in 34 new memberships; 20 came from Cleveland; 14 came from New York City; 11 from Birmingham (the Birmingham Public Library has now 100% membership); 8 from Buffalo; 8 from Kansas City; 7 from Gary (Ind); and 7 from Fresno County (Cal.). The list includes 10 trustees, 10 institutional members, and 10 library school students.

Recruiting for Librarianship

The Alumni Association of the Western Reserve Library School has appointed a Committee on Recruiting for Library Service to co-operate with the A. L. A. Committee in its active campaign in recruiting. The members of the Committee are: Jennie M. Flexner, Louisville Public Library, chairman; Edith L. Eastman; Gladys English; Celia F. Frost; Audienne Graham; Zana K. Miller; and Alice Williams.

THE LIBRARY JOURNAL

TWICE-A-MONTH

MARCH 1, 1921

THE California State Association holds its annual meeting at Lake Tahoe June 13-15, concluding five days before the A. L. A. conference at Swampscott, which opens on Monday, June 20th. This would give opportunity for a return visit from the librarians of the coast and the mountain states, reciprocating the visits of eastern librarians to California in 1891, 1911 and 1915, to Oregon in 1905 and Colorado in 1895 and 1920. The Southern Pacific has indicated its willingness to run a special car if as many as twenty passengers can be secured, making close connection between the state and national conferences. The difficulties in the way are, as always in recent years, the high cost of living and travel on the one side, and the inadequate salaries of librarians on the other. It is to be hoped, nevertheless, that our western friends will make special effort to get together a party for the national conference, which will have a special welcome at what promises to be the largest of A. L. A. conferences and one of the most important and attractive in its papers and in its post-conference excursions. Mr. Faxon, in his home bailiwick, will be especially delighted as chairman of the Travel Committee to welcome guests and show them the like courtesies to those which have been extended so generously in the West.

★ ★ ★ ★ ★ ★ ★

A SERIOUS disadvantage to libraries on the Pacific coast is the delay in obtaining book orders from eastern publishers in addition to the high cost of post, express or freight parcels. It has been found difficult to establish a jobbing house on the coast and the natural solution seems to be the establishing of a general depository by publishers at San Francisco, which could make more prompt supply and therefore invite more library orders all the way from Seattle to San Diego. A beginning has already been made by the Houghton Mifflin Company who have themselves established a special depository in the Pacific metropolis to respond to coast demands from book sellers and librarians. It is to be hoped that this matter may have the attention of the National Association of Book Publishers and that thru the agency of this new organization, which has shown its desire

to meet the needs of libraries as well as other buyers of books, a satisfactory solution of a vexing problem may be reached.

★ ★ ★ ★ ★ ★ ★

THE public last year proved somewhat weary of giving to causes whose worthiness was urged by nation-wide campaigns, and in particular made in most places but poor response to the A. L. A. appeal for two million dollars for the extension of library work. It is especially gratifying, therefore, to find that gifts and bequests to libraries in 1920 showed a marked advance in every respect over those of 1919. Gifts of money, or property definitely estimated in money, totaled nearly two and a half million dollars as compared with less than two million 1919; gifts of books nearly doubled in number, and nine buildings were donated as compared with three in 1919. The very extensive publicity given to the library field by the A. L. A. has doubtless not a little contributed to this happy result, which, coming in a year of business unrest, may be taken as an earnest of the increased public interest and support which libraries will receive in the days to come.

★ ★ ★ ★ ★ ★ ★

IN common with other library authorities we have spoken of the Chicago special conference of the American Library Association at the close of 1919 as the first and only special meeting of the A. L. A. It is a curious lapse of memory that even those present on February 6, 1897 at the special meeting of the A. L. A. held at Columbia University in New York, have overlooked the fact of this meeting or failed to call attention to the error of speaking of the conference of 1919 as both the first and only. This meeting under Mr. Brett's presidency was called for a purpose not dissimilar to that of the 1919 conference. There was the project for the national incorporation of the A. L. A. with a view to the enlargement of its work. Only forty-nine members were present and the outcome of the meeting as recorded in the LIBRARY JOURNAL for the same month was a reference of the matter to the Executive Board—after which nothing happened. Thus there have been two instances of special meetings of the A. L. A. and it cannot be said that their result encourages further meetings of the sort.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION TRANSFER OF THE LIBRARY WAR SERVICE IN COBLENZ

THE American Library Association has transferred to the War Department all property of the American Library Association in Germany. The property consisted of 33,482 books and all equipment used by the Association in the main library, branch libraries, welfare centers and other organizations for carrying on its service in Coblenz. The Y. M. C. A. authorities assumed the direction and administration of the Library, March 1st. The service will be continued along the same general lines as the direction of the American Library Association.

Ola M. Wyeth, who has been in charge of the service under the A. L. A. will probably return to America in March. Elizabeth B. Steere, Florence Harvey and Jane E. Goldman, have been taken over by the Y. M. C. A.

LEAGUE OF LIBRARY COMMISSIONS

THE annual meeting of the League of Library Commissions was held in connection with the Council of the American Library Association at the LaSalle Hotel, Chicago, December 28th and 29th, 1920.

There were three sessions, the second held jointly with the Council of the A. L. A. The following state commissions were represented: Illinois, Indiana, Iowa, Kentucky, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Pennsylvania, South Dakota, and Wisconsin. Julia Robinson, the President, presided.

Clara Baldwin introduced the subject of "Entrance Requirements for Summer Schools." She quoted from the report on summer schools prepared by Mr. Sanborn for the A. L. A. Committee on Library Training last year. According to this report, the minimum educational requirement for all summer schools is a high-school education or its equivalent. "In the matter of requiring students to be holding or to be appointed to library positions, the schools seem to differ more widely than in other entrance requirements. Generally speaking, those schools in connection with college and university libraries tend to regard the library courses on the same basis as other summer courses and set the same requirements, simply education, for the entrance. The purpose of these schools seem rather to offer an opportunity for those interested in library work to receive elementary instruction as an entrance to such work, than to

train those actually engaged in the work for more efficient service. The schools conducted by library commissions incline to place the emphasis on improving the work of those already in the service. Here is, perhaps, the most fundamental question in considering the purpose of library schools."

In the early days of Library Commission work, Miss Baldwin continued, the summer schools were established primarily for the purpose of offering some training to those already engaged in library work. In some instances, undoubtedly, this has produced the undesirable result of intrinsching incompetent people in their positions, when students having an appointment were accepted without proper educational and personal qualifications. Conditions have changed. We are no longer nursing the inefficient little library, but are trying to raise the standards for library service, recruit suitable candidates for the library profession and build up a library system in which higher standards may be required. It is believed that higher educational qualifications are of more importance therefore than appointment to positions, altho preference should always be given to those holding positions, provided they are qualified by education and personality.

Miss Baldwin's paper called forth a general discussion. Mr. Hamilton said that Indiana accepted any one under appointment to a position if the material is good and tho the applicant is without the educational requirements. Three weeks of practical experience is required. The class is limited to forty. Miss Roberts represented Iowa. The school is supported by the University of Iowa, and must accept its requirements. Miss Price said that the Summer Library School is conducted by the University of Illinois Library School. There are two courses, one an eight weeks course. The requirements are the same as those for the regular library school, a diploma from an accredited college. The other is a six weeks course, which has been open only to those under appointment, and who have graduated from high school. The faculty has now decided to open the six weeks course to any additional applicants who have completed one year of college or normal school study. Mr. Bishop said that in Michigan, "we hold admission in our own hands. It is not a question of appointment to a library position, but of securing a class of equal qualification for class instruction. The pupils have heretofore been so uneven that instruction is difficult."

The next subject was a continuation of a discussion held at the Colorado Springs meeting on library buildings for small towns. Miss Robinson said that there were two forms of buildings especially adapted to small towns—one similar to a store building offering windows for display of books, and the other the library in connection with the community building. Mr. Hamilton said that the community building had not been satisfactory in the cases of the two Indiana libraries. There had been friction over order and rent. Mr. Yust described one of the branch libraries in Rochester, New York. It occupies the ground floor of a four-block business house. It represents a one-room library plan, the partition being made by book shelves. The library contains over 15,000 volumes. The front windows offer large opportunities for advertising. Using circulation as a basis, Mr. Yust finds this type of building the most economical and offering the best returns in investment. Miss Scott said that in Indianapolis three or four of the branches in business houses had proved satisfactory from the point of view of circulation, but not from the educational side. There was no place for meetings of club women, teachers and others.

Branch libraries in schools were also discussed.

In Youngstown, Mr. Wheeler said, branches in schools were not satisfactory, as grown people would not go to the school. Mr. Hill of Brooklyn stated that as schools were not open in the summer, they were not good places for branches. Also, teachers often interfered with the children's reading. Mr. Yust was convinced that the school library became the library for children only, and even the child after leaving school, would not go back. Mr. Bostwick thought the advisability of locating the branch libraries in schools was a local question. In Kansas City it proved profitable. In Saint Louis, he was planning an experiment of putting branch libraries in three schools in parts of the city where large library buildings were not needed.

Miss Rawson, Chairman of the Committee on Uniform Blanks, reported at the second session that a circular letter to library commissions calling for traveling library record blanks in use brought a response from 31 states. It was found that of the number responding to the letter eight have adopted the League form, five of the eight have found it sufficient for record purposes, and three are using it with supplemental forms for additional entries. Two states print forms which conform somewhat to the League blank. Seven states have adopted independent forms made by

the respective departments. Fourteen use no daily or monthly report forms, several because no traveling library systems are conducted, the remainder of this number gather annual statistics from the traveling library record cards. As a result of the comparison of the various forms and items included the committee recommended that three additional entries be made.

At the Third Session the President reported that the Executive Board had authorized the printing of the summary of the existing county library laws, compiled by Mr. Hamilton. It was the wish of the meeting that these copies be distributed free. The question of issuing a new handbook was left with the new Executive Board.

I. R. Bundy, who was to have read a paper on Proposed Library Legislation in the various states, was unable to be present. He sent his paper, but it had not been received. The President therefore asked the representatives of the states to respond to roll call by giving a short statement of their proposed legislation. In Connecticut the State Board of Education was planning to draft a bill for pension of teachers which should include pension of librarians. In Illinois the question of pensions for librarians was not to be taken up until the present pension system relating to other positions had been put upon a more satisfactory basis. A bill for certification of librarians would be introduced into the state legislature if the Legislative Committee and the Executive Board of the Illinois Library Association could agree upon a plan. The Indiana Library Commission was asking for 50% increase in appropriations, and an amendment to the county library law. The Iowa Library Commission is asking for 50% increase in appropriations, also considering asking for an increase in maximum tax for the public libraries. The work in the libraries of state institutions has lapsed. It is proposed to ask for a new supervisor. Minnesota contemplates an entire revision of all library laws. The new code will include certification of librarians and state aid for libraries. Missouri will introduce a county library bill. They have their forces better organized this year, and hope to secure the passage of the bill. North Dakota will introduce a county library bill. Pennsylvania reported that the last Legislature changed the Library Commission from a separate Commission to a Library Extension Division of the State Library and Museum. They were asking for an increased appropriation this year.

The last paper on the program was on "Indiana Minimums" by Mr. Hamilton, in which he stated: "My remarks merely supplement those

made by Miss Baldwin at Colorado Springs last summer, presenting the situation viewed from a Hoosier angle. I agree with Miss Baldwin that almost any city or town of 2000 population can afford to maintain without outside aid a public library, though I do not claim that results will be as satisfactory as if the town combined with surrounding country districts to maintain a "consolidated library." We have in Indiana 94 public libraries in towns of over 2000, 55 tax supported and 3 association libraries in towns from 1000 to 2000, with 54 tax supported and 6 association libraries in towns under 1000—altogether 203 with tax support and 9 associations. The measuring rod for the Commission of free copies of the *Booklist* in our state is an income of \$1500. We have 83 libraries on our free list and only nine of these are in towns of 2000 or above. Two things struck me in looking over the Indiana situation for this paper, the first is that the Carnegie building is not a detriment to the small town library, but it usually is a spur to better service. At least the towns with such buildings get much better community service from their libraries than do towns where a library exists without a permanent home. The second thought is how much the Indiana small town library owes to the township support act obtained from the 1911 legislature during Mr. Milam's term as secretary of the Indiana Commission."

The secretary was instructed to cast a ballot for the following list of officers: President, Wm. C. Watson, New York; first vice-president, Wm. J. Hamilton, Indiana; second vice-president, Mary P. Palmer, North Carolina; Secretary and Treasurer, Anna May Price. Members at Large, Milton J. Ferguson, Elizabeth Wales, Grace E. Kingsland.

ANNA MAY PRICE,
Secretary.

MASSACHUSETTS LIBRARY CLUB

THE mid-winter meeting of the Massachusetts Library Club was held at the Massachusetts College of Pharmacy on Thursday, January 27, 1921. The sessions were conducted in the college auditorium under the chairmanship of Harold T. Dougherty, vice-president of the club. The secretary was asked to convey to the President, Mr. Moulton, in his illness, the sympathy of the Club.

The Dean of the College, Theodore J. Bradley, cordially welcomed the Club and expressed his faith in its interests and activities. Dean Bradley described the special collection of books on pharmacy which the College owns, referring to the origin of the collection in 1824 and to its sub-

sequent growth and present value. The date of the foundation of the library makes it one of the oldest special libraries in Boston.

Following the address of welcome Mary A. Tenney, of the Boston Public Library, gave a review of the more important books on Pilgrim history, based upon the extended and valuable list which she herself had compiled as a contribution from the Boston Public Library in the Pilgrim Tercentenary year.

An address by Charles F. D. Belden, Director of the Division of Public Libraries, dealt with the topic "Some of Our Obligations." In the early part of his address Mr. Belden reported, as Regional Director for the New England States on "the outcome of the endeavor or lack of endeavor" to raise funds for the Enlarged Program. In spite of doubts and questionings Mr. Belden expressed his own belief that "the effort was not only timely but that it should have met with a large measure of success. The needs as expressed in the Enlarged Program as a whole were very real, legitimate and pressing. Some portion of the program should have made its appeal to every community in the country. . . We failed thru lack of vision and faith—faith in ourselves. I submit that under right leadership, a continuing leadership, we all might have been imbued with the vision necessary to impel success. The 'sacramental moment' came, alas, to all too few of those who make up the library profession."

During the course of a round table on new books, conducted by E. Louise Jones, recent poetry was effectively summarized by Dr. Harry L. Koopman, librarian of the Brown University Library, and recent fiction, reviewed by Grace Blanchard, librarian of the Public Library, Concord, N. H.

The psychology of spiritualism was discussed by Harlan H. Ballard, librarian of the Berkshire Athenaeum, Pittsfield, Mass. Mr. Ballard was an acute critic of many of the methods employed by spiritualist workers, but withal a genial disillusionist. Comments on a selected list of books on social science were given by Mrs. Bertha V. Hartzelt, librarian of the Social Service Library, Boston. Biographies of recent date were discussed by Galen W. Hill, librarian of the Millicent Library, Fairhaven, and books on travel were reviewed by Frank H. Whitmore, librarian of the Public Library, Brockton.

Francis K. W. Drury, assistant librarian of the Brown University Library, reported that there had been introduced in the Rhode Island legislature a measure for the certification of librarians which had been sponsored by the State Board of Education and the State Library Association.

In an address on the topic "Some Unfamiliar

The Pre-eminent Work on Corporate Finance

THE FINANCIAL POLICY OF CORPORATIONS

By **ARTHUR STONE DEWING, Ph. D.**
Assistant Professor of Economics, Harvard University

IN FIVE VOLUMES

I. Corporate Securities -- II. Promotion -- III. The Administration of Income -- IV. Expansion -- V. Failure and Reorganization

Covers Every Aspect of Corporate Finance

This work is a practical study of the financial structure and financial problems of business corporations. It covers every contingency normally arising in corporate finance. The author has had a long and active experience with representative enterprises of our time. This experience, combined with extensive research, has enabled him to present accepted principles of finance and to illustrate the work with innumerable notes and precedents. Its resulting accuracy, thoroughness, and authority make it of unusual value to all who have financial questions to decide.

Every Library Needs This Work

The predominance of the corporate form of business organization makes a working knowledge of its structure and operation essential to all business men. To a banker or corporate executive, such knowledge is indispensable. To any business man, it is necessary to protect his interests in business transactions and in making investments. This set represents one of the most exhaustive studies of corporate finance that has ever been made. It should be in active service with every Library.

Send for and Examine These Volumes

We will send these volumes to librarians for thirty days' examination. They may be returned within that time if they are not entirely satisfactory. Five Volumes, 953 Pages, Price \$12.00, subject to Library discount. Order from your bookseller or direct from us.

New York City

Aspects of the Pilgrim Story," John Clair Minot, literary editor of the Boston Herald, mentioned some interesting historical data which appears to have been quite generally overlooked. Among the outstanding books of recent date on the Pilgrim story which Mr. Minot mentioned are the following: Crawford's "In the Days of the Pilgrim Fathers," Griffis' "Young People's History of the Pilgrims," Marble's "The Women of the Mayflower," Lord's "Plymouth and the Pilgrims," Gregg's "Founding of a Nation" and Lodge's Forefather's Day address at Plymouth. In the course of an informal and spirited discussion of some of the unfamiliar phases of Pilgrim history Mr. Minot mentioned the fact that Plymouth is located on a map made by Captain John Smith in 1614, six years before the landing of the Pilgrims, that it is a mistake to think of the Pilgrims as gray-bearded patriarchs, that it

is an error to overlook the debt of the colony to the Indians and its friendly relations with the Indian chiefs, or to leave out of account the establishment of a Pilgrim trading post as distant from Plymouth as Augusta, Maine, on the Kennebec river.

Following this address Caroline M. Hewins, librarian of the Hartford Public Library, gave a detailed and helpful summary of an extended list of Children's Books.

The following committee was appointed to act in conjunction with the Executive Committee of the Club, to complete the arrangements for welcoming the A. L. A. in June; Charles F. D. Belden, J. Randolph Coolidge, Jr., William C. Lane, Edward H. Redstone, F. C. Faxon, Bertha V. Hartzelt, Anna M. Bancroft.

FRANK H. WHITMORE, *Recorder*.

BIBLIOGRAPHICAL NOTES

A second edition of "The Federal Executive Departments as Sources of Information for Libraries," compiled by Edith Guerrier, is in preparation.

A second revised and corrected edition of Falconer Madan's "Books in Manuscript: a short introduction to their study and use," is published by Kegan Paul in the Books about Books series. It is issued in this country by E. P. Dutton.

The fourth part of "A List of Geographical Atlases in the Library of Congress with Bibliographical Notes," compiled under the direction of Philip Lee Phillips, chief of the Division of Maps, is now ready for distribution. This part contains a description of atlases received in the Library from 1914 to the present date.

"Andrew Carnegie: His Contribution to the Public Library Movement," a commemorative address delivered on Founders' Day at the Library School of Western Reserve University by Charles Clarence Williamson, chief of the Economics Division of the New York Public Library, has been printed by the University.

A "Catalog of Literature for Advisers of Young Women and Girls," a classed annotated list of about 2000 titles of the most representative and useful books and articles for the use of deans and advisers of women and girls, etc., compiled by Anna Eloise Pierce, dean of the New York State College for Teachers at Albany,

is published by the H. W. Wilson Co. Dewey decimal classification numbers are assigned to each individual entry.

Librarians owning a copy of Larwood, Jacob: History of sign boards. . . Lond. 1866—who have not already seen the recent numbers of *Notes and Queries*—may be interested in an article entitled "The pseudonym 'Jacob Larwood'" appearing in the issue of Dec. 4, 1920 (12 series vol. 7 p. 441-3) in which the truth is made evident that Jacob Larwood was the pen name of van Schevichaven, a Dutchman who died in 1918. This statement is corroborated in Frederiks, F. G. & Branden, F. J. Van den—Biographisch woordenboek der Noord- en Zuidnederlandsch letterkunde. Tweede omgewerkte druk. Amsterdam. (1888-92) p. 695.

A. M. H.

The thirteenth volume of "Islandica," the annual relating to Iceland and the Fiske Icelandic Collection in Cornell University Library, is devoted to a bibliography of the Eddas by Halldor Hermannsson.

The bibliography includes all editions and translations of the Eddas and those of their individual poems or parts, and even paraphrases, while adaptations, especially for young readers, have, as a rule, been excluded. This bibliography "forms in a certain way a complement to the bibliography of the Mythical-Heroic Sagas, published in 1912," and Dr. Hermannsson hopes to be in a position some time to add to these a bibliography of Norse mythology.

IN THE LIBRARY WORLD

NEW HAMPSHIRE

The second report of the Public Library Commission of New Hampshire for the biennial period ending August 31, 1920, is the record of work accomplished by a staff of one with an appropriation of \$2000 for the second year. The Commission, established by statute in 1917, was maintained during the first two years of its existence by a small subsidy voted by the governor and council from an emergency fund. Grace E. Kingsland, formerly of the Vermont Public Library Commission, became executive secretary in New Hampshire in September, 1919.

The first summer course in library management was held at Durham during the second week of August under the joint direction of the librarian of the State College and the Secretary of the Commission, and was attended by thirty-three librarians. No tuition was charged, expenses being borne by the Commission.

Sixty libraries were visited during the year, and several recataloged in whole or in part. The traveling libraries have been increased in number and kept in circulation, altho financial inability to supply the demands that would be made has prevented a general advertisement of this feature of the Commission work.

Statistics are given for 246 public or association libraries making report to the Commission in 1920. Twelve towns are reported to be without libraries. Rollingsford, the largest of these, has a population of 1700.

RHODE ISLAND

Providence. The library of Brown University has secured the working library of William Torrey Harris, founder and editor of the *Journal of Speculative Philosophy*, U. S. Commissioner of Education from 1889 to 1906, and editor of the last revision of Webster's New International Dictionary. The collection numbers some 3000 books, besides many classified pamphlets on philosophy, education and lexicography.

NEW YORK

New York City. Fourteen students are registered for senior work at the Library School of the New York Public Library, five as candidates for the diploma in June, and nine for individual courses. Candidates for the diploma include one from Drexel Institute Library School, two from the University of Washington school, and two from the Library School of the New York Public Library.

As already announced, properly qualified auditors are admitted to certain of the senior courses, and 164 auditors have registered to date.

The courses in "Art and the Book," school library work, and business library methods are proving particularly popular, these three courses accounting for over half of the total attendance.

Brooklyn. The Children's Department of the Brooklyn Public Library has organized a class in public speaking for children's librarians which promises to be interesting and profitable to members of the class and to the library. An unusually large demand for speakers for mothers' clubs, public school assemblies, teachers' meetings, etc., is being made upon the library this winter, and some of the children's librarians have felt the need of instruction and practice in addressing an audience before accepting such invitations. In this class work the audience is composed of children's librarians who listen to the speaker, make notes and criticize the matter of the subject and its presentation.

The program of meetings to be held from February to June 1921 will illustrate the plan of the course, which will be continued during the fall and winter of 1921-1922. The meetings are to be held in the beautiful, centrally located children's room of the Pacific Branch, on Friday mornings once in three weeks. Dates, speakers and imaginary audiences are given below:

Feb. 4. Faith Allen addressed a mothers' club composed of intelligent women, in comfortable circumstances, who are truly interested in their children's education.

Feb. 25. Edith Balderston received in her children's room a public school class of 6th grade boys. The class is to come twice to the library. Miss Balderston demonstrated her procedure on the first visit.

Mar. 18. Clara Curtiss will give a story hour program to an audience composed of Brownville boys and girls about 8 to 12 years of age.

April 8. Siri Andrews will give a talk in a public school assembly consisting of about 250 pupils of the 7th and 8th grades.

April 29. Margaret Hoyt will receive a public school class of 7th grade boys and girls who have already paid one visit to the library.

May 20. Meeting open for general discussion.

The first meeting, held Feb. 4, was voted a great success. The children's librarians composing the class "pretended" to be mothers lis-

NO LIBRARY COMPLETE WITHOUT IT

tening to Miss Allen's admirable talk on children's books, and after the talk the "mothers" laid before the speaker their perplexities regarding the reading tastes of their sons and daughters.

When about an hour had been given to demonstrating a mothers' meeting, the members of the class again became children's librarians who discussed freely the speaker's matter and manner of presentation of her subject and many of the problems a librarian is likely to meet when she accepts invitations to speak in a real mothers' meeting.

The entire staff of children's librarians have entered the class except those who are already taking some other advanced course in library work with children.

This course is only the first of a number of advanced courses the library plans to offer progressive members of the staff. After the deadening effect of the war and after-war years members of the staff are feeling the happy reaction which comes with being able to plan and work hopefully for a splendid future. The salary scale recently adopted by the Brooklyn Public Library makes \$1200 the minimum and \$1740 the maximum salary of the children's librarians. This new salary scale, the chances for advanced professional training offered by the library, the marvelous opportunities which New York offers to every resident willing to accept her princely gifts: these are things which give confidence that a war-time depleted staff which has so long retarded the work may be soon filled by children's librarians of the finest sort.

DELAWARE

The ninth biennial report of the State Library Commission of the State of Delaware for 1919-20 tells a story of marked activity, notwithstanding the fact that the total appropriation for the work is only \$5200. In 1919, \$1378 was expended for books, \$2303 for book wagons, and the librarian enjoyed a salary of \$735. In 1920 the librarian's salary was increased to \$885, book wagons took \$2556, and books \$1018.

The book wagons made 451 trips, visiting 1939 families and loaning 43,060 volumes. These trips were made over 26 routes and each route covering about 25 miles was visited once a month. The service rendered thru the book wagons increased nearly 33 1-3% during the period covered by the report.

In 1919 thru the traveling libraries, 524 requests for books were handled, 83 of these were for traveling collections and 4757 volumes were loaned. These numbers include 10 traveling libraries placed in schools in Sussex County. In 1920, 101 traveling libraries containing 5007 books were sent to schools, 3 to public libraries,

and 15 to other organizations; 12 study clubs borrowed 161 books, and 640 individuals borrowed 1114, making a total of 771 requests and 7046 volumes loaned.

PENNSYLVANIA

Philadelphia. The contract for the foundation of the Free Library building at 19th and Vine Streets and the Parkway has been awarded the Standard Construction Co. for \$278,000. It has been found after a test that the piling thought desirable when a previous contract was advertised, is unnecessary, which reduces the cost by about \$150,000.

It is expected that the foundations will be completed in about six months. A total of \$3,433,016 is available for the building: \$2,433,016 from funds from previous loans, and \$1,000,000 from the loan just appropriated by the city council.

VIRGINIA

Richmond. Work on indexing the Confederate records in the Department of Archives of the Virginia State Library made steady progress thruout the last year. More than 90,000 cards of the 140,000 which it is estimated will be there when the work is completed have been filed in the index drawers. "Archival apprentices" from the Junior and Senior classes in American history at Westhampton College will be used again during the present session.

The number of investigators using the archives more than doubled, 1134 being registered as against 522 in the previous year. It is expected that the use of the department will be even more accelerated when the archives are moved into the archival annex now in course of construction. Their ultimate home will probably be in the memorial library building whose construction was authorized at the 1920 session of the General Assembly of Virginia.

The number of books, pamphlets, and bound periodicals added to the main collection during the year was 3054, of which 1047 were purchased at a cost of \$2398.05. On September 30, 1920, the library contained 124,418 volumes.

The operation of the budget law now in effect in the State proved satisfactory to the Library, which now has a fixed sum to proceed upon, altho losing its other sources of income such as funds arising from the sale of state documents, fines on overdue books and money collected for copying records.

Norfolk. Norfolk is to have the honor of being the first city in the state to have a free library for colored people. Arrangements are practically complete for this undertaking and a well-equipped library and reading room are to be ready before the end of the spring.

The Best Book on Foreign Trade

THEORY AND PRACTICE OF INTERNATIONAL COMMERCE

By Archibald J. Wolf

A Text-book for University Schools of Commerce. A handbook of Import, Export and Banking Practice.

"Deserves a place in every Public School Library as well as in the shelves of business houses specializing in export and import trade."—*The World's Market*. (Book Review Section.)

"The best and most authoritative book on foreign trade that I have seen."—DR. W. E. AUGHINBAUGH, Foreign and Export Editor, *New York Commercial*, Professor New York University.

548 pages. Price, \$5.00.

GEORGIA

Atlanta. The Carnegie Library has had its appropriation for 1921 increased by \$17,000, making the total appropriation for the year \$78,969, or an increase of 40% over the budget for 1920 and one of 100% over that of two years ago.

Of this appropriation, \$9084 is the balance due on the library for negroes, and \$6000 for the purchase and remodeling of a building to be used as a new branch library. This income will also provide for increases in salaries ranging from 10% to 25%, the largest increases being made to heads of departments.

For several weeks before the question of the budget came before the City Council, vigorous publicity had been given to the matter by the local press, so that when the public hearing on the budget came before the Finance Committee of the City Council more than a hundred citizens were present to back up the library's request for increased support.

OHIO

Freemont. Tho every other item of the City appropriation for the year 1921 was cut by the Budget Commission, the Public Library has received an appropriation of \$4475, or an increase of \$979 over the appropriation for the preceding year. Being short of funds, the City had intended to appropriate \$2000 for the library's use, but a representation to the Budget Commission of the needs of the library and its usefulness to the community brought about this gratifying result.

MICHIGAN

Detroit. The new main building of the Public Library will be completely stocked with books and opened for business about March 15th, but the formal dedication of the building will take place in May or June. Some portions of the new building are already occupied by library departments, and some of the special collections have already been installed.

There are 13 branches now operating in the library system and three more in process of construction.

MINNESOTA

St. Paul. The library of the Swedish Historical Society of America, consisting of approximately 5000 items: books, pamphlets, manuscripts and newspaper files relating to Swedish men and institutions in America, or written by Swedish-Americans, is about to be placed in the custody of the Minnesota Historical Society.

The Swedish society was organized at Chicago in 1905, and the library was located at Evans-

ton until about three years ago, when it was transferred temporarily to the Dinkman Memorial Library of Augustana College at Rock Island. About a year ago the headquarters of the Society were moved to Minneapolis, when ten of its fifteen directors were chosen from Minnesota.

The proposed budget for the Public Library for 1921 totals \$289,600, providing for expenditures of \$15,000 for new books, \$4000 for periodicals, \$14,500 for printing of catalog, booklists, placards, etc.

A thoro survey of library facilities in the schools of the city is to be made by a special committee assisting the library Advisory Board. The committee, which includes school principals and assistants and the assistant superintendent of schools, will make an investigation of the public library service to the schools also.

IOWA

Decorah. The contract for the new Luther College Library has been let to a local contractor for \$64,077, exclusive of heating, plumbing, cut stone and excavating for foundation, which items will bring the cost of the building to approximately \$100,000. The work will be begun as soon as weather permits, and it is hoped that it will be completed by early fall.

KANSAS

The state of Kansas, with an urban population of 617,964 and a rural population of 1,151,293, has 213 public or institution libraries in addition to its school libraries. In this total are 167 public libraries, 15 state institution libraries, 19 connected with colleges and universities, 5 with federal government institutions, and 7 with Y. M. C. A.'s and lodges, according to figures compiled by Willis H. Kerr, librarian of the State Normal School. Of the 167 public libraries, 86 are supported by public tax levies, and 81 by gifts and membership tickets. Of the 105 counties in the state, 44 have no tax-supported libraries, and 18 of these have not even a subscription library.

A county library bill, drafted by the Legislative Committee of the Kansas Library Association and submitted at the Salina meeting in the fall, has been slightly revised and will be proposed for adoption by the 1921 legislature. The bill is an enabling act whereby the county commissions or the voters of a county may establish a county free public library or contract with another library for service to the county. It does not interfere with existing libraries, except in so far as these wish it; and leaves the operation of a county library entirely a matter of local option. The largest unit now possible in Kansas is the township library and the Com-

PRESS NOTICES.
CHRISTIAN WORLD—This is a timely, impersonal, dispassionate, analytical unanswerable discussion of the weaknesses and inconsistencies of the Christian Science Church. It overflows with facts which provide the ground-work of the author's incisive argument . . . and is as clear as sunshine and as irrefutable as the decalogue.
THE EVANGELICAL MESSENGER—The spirit in which his exposures of inconsistencies in the organization are made is very commendable, and adds merit and pungency to his arguments and forceful statements. It is the only book of its kind on the market as far as we have any knowledge.

mittee believes that most counties in the State (and probably all of them by the two-county combination authorized in the bill) can maintain satisfactory library service thruout their areas by a considerably smaller levy than the maximum one and one-half mills authorized, probably even by a levy of from one-fourth to one-half of a mill on the dollar, provided the city libraries "join."

NEW MEXICO

Raton. The Raton Public Library in addition to extending its work in Raton itself during the year ending April 30, 1920, also placed collections of books in 13 branch stations in Colfax County. This was done by arrangement with the County Commissioners, who paid \$100 for library service to the county. The County Board of Education contracted for school service at \$5 per rural school, whereby 42 schools were served, and a circulation of 1394 reported. The Library hopes in time to furnish library service to its section of Northern New Mexico where the towns are scattered and small.

CALIFORNIA

San Marino. The opening of the Henry E. Huntington Library is to be postponed, due to delay in the delivery of the book stacks. It is expected that the opening will take place in the spring.

Riverside. A collection of books for children in the Riverside Public Library will be founded as a memorial to Dorothy Daniels, daughter of Librarian Joseph F. Daniels. Miss Daniels, who

died on January 10th, was a graduate of the Riverside Library Service School and of the University of California.

WASHINGTON

Spokane. A law library bill, which will make it possible to contain the Spokane County Law Library at the Paulsen Building, has passed both houses.

Pullman. Because of the urgent need for more librarians, and as a temporary provision, the University of Washington Library School Faculty is recommending for adoption by the University Faculty, the opening of the Library School courses to students having senior academic standing in the University, instead of the present plan whereby only graduates are admitted. The curriculum for the two classes of entrants will be identical, but a distinction will be made in the degrees granted. The students entering as Seniors will not receive the professional degree.

Slight changes have been made also in the practice work, the hours for which have been reduced, and in Children's work, which has been enlarged. Supervised study in the course in Cataloguing is another departure. An elective course on "The use of the Library" is to be open to any student in the University. It is hoped that this will arouse the interest of many who have not yet decided on their vocations, and so act as a feeder to the Library School also that it will sustain the interest of those who expect to become librarians, until such time as the main courses in the School are open to them.

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department.

POSITIONS OFFERED

Wanted, an assistant with some experience in cataloging and reference work. Address: Iowa Masonic Library, Grand Rapids, Ia.

Wanted, cataloger. Salary \$1380 or more, depending upon experience. Address, Public Library, Muskogee, Okla.

Reduction in Prices

Owing to better labor conditions, a slight decrease in the cost of raw materials and the installation of improved machinery, we are able to announce a reduction in prices on the following supplies: All pamphlet and magazine binders, book cards, book pockets, book marks, mounting papers, posters, and many other items.

This does not necessarily mean that all prices will be as low as those quoted in our No. 23 Catalog of Library Supplies issued in June, 1920, but there will be a substantial downward revision from the "increase in price" sheet which went into effect last October.

All orders received after February 1st will be entered at the reduced rate.

GAYLORD BROS., SYRACUSE, N. Y.

The Corner Stone of Countless Libraries

IN every collection of books for home, school or office, there should be one general reference work which is comprehensive, reliable, up-to-date and written so clearly that even the young folks can understand.

It thus becomes the corner-stone of every library, little or great, wherein it finds a place.

Just such a work as this is

THE NEW INTERNATIONAL ENCYCLOPAEDIA

This incomparable twenty-four volume set is indeed "the corner stone of countless libraries," for its sale began in 1902 and has steadily increased since that date, more sets having been sold last year, than during any other like period. This in itself is proof that THE NEW INTERNATIONAL is in very truth:

A Work of Vast Interest and Immense Utility

All this will appear when you own and use the set and to show you how valuable it will prove in your library and how easy it is to make it yours, let us send you, without any obligation on your part, our 80-Page Book of Specimen Pages, Illustrations, Plates in Color, Maps, with the *low price* and *easy terms* just now available.

Send the Coupon and Get the Book

As in the case of countless others you will find it worth many times its cost.

CHICAGO.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Selected Dodd, Mead Books

THE USES OF DIVERSITY

By Gilbert K. Chesterton

An idea of the diversified character of G. K. C.'s new book of inimitable essays is indicated by the following partial table of contents: On Seriousness; Lamp-Posts; The Spirits; The Domesticity of Detectives; George Meredith; Ireland and the Domestic Drama; The Japanese; On Pigs as Pets; The Futurists; Mormonism. \$2.00

PSYCHOLOGY OF THOUGHT AND FEELING

By Charles Platt, Ph.D., M.D.

Habit, thought, memory, the emotions, the mind cure, the unconscious mind with all its relations, as viewed psychologically, are some of the subjects treated in this common sense book; and with these there is, too, a study of the abnormal, both as exhibited in the individual, in mental ills and also in the socially inadequate, the criminal and the delinquent. \$2.50

DESIGNS FOR AMERICAN HOMES

By Charles M. Noble and H. G. Outwater

For those who plan to build their own homes, this book is worth many times its cost. Every plan will work; they are prepared by experienced men. The designs are typically American and represent the highest standard of accepted and tried architectural design, combined with economic methods of construction. *Illustrated with 50 sets of plans.* \$2.50

THE MINIATURE COLLECTOR

By Dr. George C. Williamson

New material on the subject of miniatures is constantly being discovered and in this book the author brings the science of miniature collecting up to date. Dr. Williamson is a collector of long standing and the information he has gathered through many years is here presented, having in mind particularly the amateur collector. *Illustrated.* \$2.50

FRAGMENTS OF TRUTH

By Richard Ingalese and Isabella Ingalese

The authors believe this book is destined to play an important part in re-shaping the thought of the world. It will be especially interesting to Christians, Jews, Christian Scientists, New Thinkers, Theosophists and Spiritualists, as it seeks to show the occult relationship of each cult. \$2.50

MORE HUNTING WASPS

By J. Henri Fabre

Fabre's books invest insect life with a genuinely epic interest. They are at the same time literature, yet accurately scientific. Fabre was not only one of the most patient and most original investigators, but a poet and a philosopher as well. This new volume is one of the few still to be offered to American readers. \$2.50

SUGGESTION AND AUTOSUGGESTION

By Charles Baudouin

A psychological and pedagogical study based upon investigations made by the New Nancy School. The practical discoveries of this school are destined to influence educational work more radically even than Freudianism can influence it. "The most exciting book since THE ORIGIN OF THE SPECIES." —*Nation, London.* \$3.50

DEATH: ITS CAUSES AND PHENOMENA

With Special Reference to Immortality

By Hereward Carrington

This remarkable book deals with the subject of DEATH from its physiological, historical and psychological aspects, and attempts to summarize everything of importance which has been written in the past on the subject, while the author has advanced an ingenious theory (to account for death) of his own. \$3.00

LAMPSHADES: HOW TO MAKE THEM

By Olive Earle

Full directions for making lampshades at home at nominal cost. Ideas and plans, from the simplest candle-shade, to elaborate arrangements of silk and fringes, are given in detail. Both the amateur and the professional will find this a practical book. *Many illustrations.* \$2.50

HEART DISEASE: ITS CARE, CURE AND PREVENTION

By J. H. Honan, M.D.

Gospels of Do's and Don'ts for those suffering from Heart, Blood-vessel or Kidney Diseases. The object of this book is to give encouragement to those who know they have heart trouble and to lead those who are unconscious that they have heart trouble to ascertain their deficiency without arousing their undue anxiety. The book gives general and special advice, and treats of habit, diet, exercise, etc. \$2.00

THE NEW PSYCHOLOGY and Its Relation to Life

By A. G. Tansley

An original and stimulating discussion of the place of the unconscious in mental life, the activities of mental complexes, repressions, dreams, the herd and sex instincts and other dominant topics in present-day psychological controversies. "Seems to be the best general survey of psychology now available." —*The New Republic.* \$4.00

MAN'S UNCONSCIOUS SPIRIT

By Wilfrid Lay, Ph.D.

Author of "Man's Unconscious Conflict," etc.

All who are interested in spiritualism or in psychoanalysis will find in Dr. Lay's book a discussion of both sides of the question. The book contains original views on consciousness and its wealth of specific qualities, on the still greater wealth and power of the unconscious, and on the relation between belief and scientific knowledge. \$2.00

A GUIDE TO THE WEST INDIES, BERMUDA AND PANAMA

Revised Edition to 1921

By Frederick Ober

This is a comprehensive guide, with all the latest information concerning the Bermudas, Panama, Bahamas, Cuba, Porto Rico, Jamaica, Haiti and Santo Domingo, the Danish, Virgin, Dutch, French, Leeward and Windward Islands, Barbados and Trinidad. It is the standard guide. *Profusely illustrated, and with many maps.* \$3.50

THE PROBLEMS OF PSYCHICAL RESEARCH

By Hereward Carrington

Author of "Modern Psychical Phenomena," etc.

This volume records experiments and theories in the realm of the supernatural as investigated by one of the best known American authorities. The book is undoubtedly one of the most interesting volumes in the field of psychical phenomena which has been published. \$3.00

SPIRITUALISM: A POPULAR HISTORY FROM 1847

By Joseph McCabe

The book describes the peculiar social and psychological conditions in which modern spiritualism arose, and carefully studies the documents relating to the early mediums. The history is then brought up to date, and the causes of the recent development of popular spiritualism, as well as the more refined efforts of recent years, are fully considered. \$3.50

B

How much is your salary?

What does it cost the community when you write a catalog card?

How much more does it cost the taxpayers when you rewrite the same card?

Any thoughtful person by a trifling mathematical process can figure out that the librarian's time is too valuable to spend doing the same thing twice.

The librarian who uses Library Bureau Standard cards finds them permanent; that they cut down the routine work, and give more time for real service to the public.

Library Bureau Standard cards have stood the test of years of actual use. They have our organization behind them. They have thousands of satisfied patrons to recommend them.

High School Library Book Selection

A Study made by a Science Teacher

By EARL R. GLENN

The Lincoln School of Teachers College, Columbia University, New York.

I. THE PROBLEM

THIS study is devoted to a discussion of "scientific service in the selection and care of books and other printed material."¹ If there is or can be any scientific service in the selection of books we desire very much to know how to obtain such service and to use it.

It is only when one attempts to gather facts to aid in intelligent book selection that the layman appreciates the chaotic state of opinions in this field. With the exception of a few book lists which contain about 2500 titles each, in which certain sections are very much in need of revision and in which some fields are neglected entirely, there is almost nothing to serve as a guide. A school wishing to select a first class collection of three thousand volumes or more (in carrying out the N. E. A. program) has no standards to guide the judgment of teachers and librarian. This state of affairs promotes the development of an unbalanced library because of the aggressive interest of some teachers and the indifference of others, the net result being that pupils leave the high school with no acquaintance with the reliable sources of information in many important branches of knowledge.

II. BOOK SELECTION IN 1913-1914

The publication entitled "A Study of the Colleges and High Schools in the North Central Association"² which was issued in 1915, gives the statistics on the libraries in approximately one thousand high schools in fifteen north central states. Not a great deal of attention seems to have been given to the library statistics in this study. However, while these figures are not entirely satisfactory, (we do not believe that such figures can be entirely accurate unless they are

furnished as the result of a careful study made by the librarian and the faculty), we have found no others so extensive that are more reliable. This study to which we refer is based upon the statistics secured (by the authorities of the Association) from the annual reports of 1000 schools of the North Central Association during the first semester of the school year of 1913-14.³ Among other questions, the following were submitted to the principals:

"Number of volumes in high school library distributed by departments:

English	
Botany	
Sewing	
Zoology	
Manual Training	
Physiology	
Mathematics	
Government reports, State.....	
History	
Chemistry	
Cooking	
Latin	
Education	
French	
Drawing and art	
United States	
Physics	
Agriculture	
Physical Geography	
German	
Fiction	
Civics	
Commercial	
Number encyclopedias for high school	
Total number volumes of all kinds added last year	
Number dollars expended last year for books..	

¹Certain, C. C., Standard library organization and equipment for secondary schools of different sizes. Proceedings of N. E. A., 1918. p. 4

²U. S. Bureau of Education, *Bulletin* 1915, No. 6

³U. S. Bureau of Education, *Bulletin* 1915. No. 6. p. 33 and 100-106

These statistics for 1913-14 are used because the schools were operating then under normal conditions. In order to exhibit a few facts on the library situation in the public high schools of fifteen north central states, we have made a graphical study of the statistics collected by the North Central Association in 1913-14. A brief explanation of the methods used will aid in the interpretation of the figures that are to follow.

In addition to the main title at the top of the figure there is a subtitle in almost every case (Fig. 1). Brief explanatory notes will be found in the upper right corner of the figure. The vertical axis on the left has the large unit divided into tenths by the short black lines. The scale unit used will vary from figure to figure but it is stated in every case in the upper left corner. The quantity represented by the vertical line at the extreme left is given in every case. The subjects which are commonly represented in the American high school library are shown on the horizontal axis in the following order: English, history, fiction, (listed as distinct from English for comparison), education, botany, physics, civics, Latin, German, chemistry, physical geography, agriculture, zoology, mathematics, physiology, domestic arts, industrial arts, commercial courses, drawing, French, fine arts, Spanish, general science, physical training, and music.

Near the middle of each figure, there is a question which may serve as a basis of discussion, or in some cases, of an investigation. These questions are only a few of the many important problems which need to be illuminated by carefully chosen facts. The graph is used to show which subjects assume importance.

In these statistics the median has been used for comparison rather than the average or the mode. The median is that point on the scale (number of books, for example) which divides the items into two equal groups. Such a median is found simply by counting. The term "average" is often used incorrectly. The expression "arithmetic average" means the quotient obtained by dividing the sum of all the items by the number of items. The average has not been used because it gives too much emphasis to the extreme ends, i. e., the small library and the very large library.

In some cases a useful measure of comparison is the mode. This is defined as the scale interval that has the most frequent item. The mode has one advantage. It eliminates the extremes. As a rule the manufacturer of ready-made clothing is interested in the mode, not in the average. The mode, however, is difficult to find by inspection in many cases because no particular type stands out. For these reasons, the median is best used in this discussion.

Figure 1 shows the facts for 89 schools in

FIG. 1. TYPICAL DISTRIBUTION BY SUBJECTS FOR 1000 OF THE BEST SCHOOLS IN 15 NORTH CENTRAL STATES

Wisconsin in 1913-1914. The median number of books reported for English is 221, history 238, fiction 92, education 21, botany 28, physics 25, civics 23, Latin 15, German 16, chemistry 9, physical geography 20, agriculture 12, zoology 9, mathematics 9, physiology 13, domestic arts 6, industrial arts 4, commercial courses 7, drawing 1. No report was submitted on the other subjects. Of the 769 books reported, 451 concern English and history. No other subject reports as many as thirty volumes. The distribution of the titles in the standard book list (1917) issued by the State Department of Education is shown for comparison. This distribution leads us to raise the question: To what extent are the various high school departments using the library?

It would help greatly to promote intelligent book selection, if the various state authorities would determine the present distribution of references in the schools having modern libraries in charge of trained librarians.

Graphs similar to figure 1 have been prepared for fifteen states and for schools of six different sizes. The curves are similar in every case. One of two conclusions must be drawn here: The individuals who furnished the data to the officers of the North Central Association did not furnish the facts; or most of the reference books deal with English and history. If

the first possibility is true, careful studies should be made by the school library people; if the second possibility is true, something should be done to build up well balanced collections of references.

Figure 2 shows the median library for all of the schools reporting. This collection of 653 volumes is distributed here by subjects. About 78 per cent of this list of 653 books is devoted to English and history. A very conservative interpretation of the report of the N. E. A. Committee on Library Organization would give:

- (a) For schools with an enrollment below 200 pupils, 1000 volumes.
- (b) For schools with an enrollment of 200-500 pupils, 2000 volumes.
- (c) For schools with an enrollment of 500-1000 pupils, 3000 to 8000 volumes.
- (d) For schools with an enrollment of 1000-3000 pupils, 5000 to 8000 volumes.

Figure 3 gives the comparison of the medium library of 653 volumes, and the number of titles per subject in two standard book lists issued by the United States Bureau of Education. Several interesting variations appear here.

III. COMPARISON OF PAST AND PRESENT PRACTICE IN BOOK SELECTION

In order to compare the distribution of references as reported in 1913-14 with the distribution in vogue in 1919-20, we sent out the following letter and questionnaire to the schools listed

FIG. 2. THE MEDIAN LIBRARY FOR 1000 OF THE BEST SCHOOLS IN 15 NORTH CENTRAL STATES (1913-1914)

FIG. 3. COMPARISON OF THE MEDIAN LIBRARY IN 15 NORTH CENTRAL STATES WITH TWO BOOK LISTS ISSUED BY THE U. S. BUREAU OF EDUCATION

in the "Directory of High School Librarians," which was compiled by Helen S. Babcock and published in the July 1919 issue of the LIBRARY JOURNAL.

Report From The Library.

Subject Number of books (Not titles) for Number of pupils taking this subject Ideal distribution for your school (see note below)

English			
History			
Fiction			
Education			
Botany			
Physics			
Civics			
Latin			
German			
Chemistry			
Geography			
Agriculture			
Zoology			
Mathematics			
Physiology			
Domestic Arts			
Industrial Arts			
Commercial Courses			
Drawing			
French			
Fine Arts			
Spanish			
General Science			
Physical Training			
Music			

- Please answer the following questions:
1. What is the total number of references (not titles) in the library?
 2. How many pupils are enrolled in your school?
 3. How many books were added to the library during the past school year?
 4. What sum was spent for books last year?
 5. How much should be spent each year for books in your school?

* This list (see table below) shows the approximate number of volumes recommended by the N. E. A. Library Committee for schools of different sizes. This program is regarded as attainable in five years.

By use of the blanks given above, will you distribute the volumes recommended for a school of your size to obtain what you consider the ideal distribution for your type of school?

1- 100 pupils	-1000	volumes
101- 200	"	-2000 "
201- 300	"	-3000 "
301- 500	"	-4000 "
500-1000	"	-6000 "
1000 and above	"	-8000 "

Date

Signed

Librarian No.

All information furnished will be regarded as confidential and will not be made public except in general terms.

About one hundred and fifty replies were received from high school librarians. Several of these reports were not complete so that about one-third of them were not used in this study.

FIG. 4. NUMBER OF REFERENCE BOOKS FOR SCHOOLS OF SMALL SIZE

The number of reports used are listed below:

Enrollment	Number of Reports
1— 100	3
101— 200	8
201— 300	11
301— 500	14
501—1000	27
1000 and above	37
Total	100

The figures submitted by these librarians in various sections of the country have been examined carefully and the most important facts are set forth in the discussion which follows. Those who desire to see all of the figures exhibited in graphical form should consult another article upon this subject. Only a few of the graphs are reproduced in this paper.

Figure 4 sets forth the situation in a small school (1919-1920) which is known to have a competent librarian and a faculty interested in the high school library. Several variations from the practice of 1913-1914 are shown. The distribution by subjects is much more uniform than is usual; there is no decided increase in the English references; Latin references do not appear; German, French, and Spanish are repre-

sented; and science, domestic arts, and industrial arts receive some attention. No report was submitted on the "ideal distribution."

(To be concluded)

An Indianapolis "Rush" Job

ONE day recently Julian Wetzel strolled into the back of his Keystone shop and found the men all frantically hustling out three or four jobs for the Indianapolis Public Library. "What's the rush?" he asked the foreman and was answered sort of peeved like, "All rush jobs." Somewhat surprised, Mr. Wetzel asked to see the proofs and all of them were marked "O. K., Rush." Then he explained to the men that that was merely the signature of the city librarian, "Charles Rush." . . .—*The Printing Art.*

At Monticello (Ind.) the public is invited on Saturday evenings to an informal "Drop in club." It has been found that little study is done on Saturday evening, so users of the library come in for informal discussion about books, authors and current events.

In the Tacoma (Wash.) *Municipal Bulletin*, "Public Library News" conspicuously occupies a front page with a double column heading.

*Glenn, Earl R., Past and present practice in high school library book selection from the viewpoint of a science teacher. *School Science and Mathematics*, Vol. 21, 1921.

French Literature in 1920

COMPILED BY ALBERT SCHINZ, Professor of French at Smith College

BOOKS ABOUT THE WAR

GENERAL

Margueritte, V. *Au Bord du Gouffre.*

Leblond, Marius-Ary. *Galliéni Parle.*

The diary of the great chief by his secretaries.

Galliéni, *Memoires.*

Bédier, J. *L'Effort Français.*

Not one battle scene, but fascinating information on the armaments, the drill, the new schemes for battle, the tactics.

Pierrefeue, Jean de. *Au G. Q. C. (Grand Quartier Général).*

Author is the man who from 1915 to 1919 wrote out every day the official War Bulletin of the French Army.

Boulenger, M. *La Cour.*

Received the Prix Stendhal.

Le Goffic. *Histoire des Fusiliers Marins. viz.*

Saint-Georges et Nieuport.

Madelin. *Verdun.*

—*La Bataille de France (21 mars-11 nov. 1918).*

Lorédan. *Lille et l'Invasion Allemande.*

Fonck, R. *Mes Combats.*

Preface by Marshall Foch.

Dorgèlès, *Croix de Bois.*

By general consent the book *par excellence* relating the hardships and heroism of the soldier of the Great War. Awarded the Prix de la Vie Heureuse.

Parmentier, Florian. *L'Ouragan.*

Barbusse, Henri. *Lueur de l'Abîme.*

Grandiloquent tirades against present society.

Lefebvre, Raymond. *La Revolution ou la Mort.*

—and Paul Vaillant Couturier. *La Guerre des Soldats.*

These two authors are disciples of Barbusse.

Maillet, A. *Sous le Front du Destin.*

Giraudoux, J. *Adorable Clio.*

Werth. *Clavel chez les Majors.*

Follows Clavel Soldat (1919).

Daudet, Mme. Alphonse. *Journal de Guerre et de Famille.*

Valdelièvre, P. *Les Bagnes d'Allemagne.*

Angles, Max. *La Geôle, Camp de Concentration.*

These two books describe terrible treatment of prisoners in Germany.

Adam, Paul. *Reims Devastée.*

Posthumous.

Merki. *Reims.*

Murel. *Littérature Allemande pendant la Guerre.*

Latzko, Andréas. *Les Hommes en Guerre.*

NOVELS

Dumur. *Nach Paris.*

Extremely realistic.

Farère, Claude. *La Dernière Déesse.*

War is the last of the deities to mankind.

Bordeaux, H. *Oeuvre de Chair.*

Rolland, Romain. *Clerembault.*

Continues his pacifist apostolate.

Erlande, A. *Vivre et Mourir Là; roman d'une Anglaise en France.*

Birabeau. *Annette et son Americain.*

Prévost, Marcel. *Mon Cher Tommy.*

Shows a refined French woman explaining her love for a little bank clerk aviator.

Des Vignes Rouges, *Sous le Brassard d'Etat Major.*

Dulac, Odette. *Faut-il?*

Case of love for a mutilated soldier.

Florin, Mary. *On Demande une Marraine.*

Cazal, Edmond. *L'Inféconde.*

de Coulomb. *Fiancée de Guerre.*

MacOrlan, P. *Bob Bataillonnaire.*

Amusing *roman d'aventure.*

Maurois, André. *Nouvelles Aventures du Colonel Bramble.*

Givry, J. de. *Fatale Servitude.*

Hirsch, C. H. *Le Chevre aux Pieds d'Or.*

Story of Mata-Hari, the beautiful dancer, a spy for Germany.

Jacques, Henry. *La Veillé de la Lune.*

Inhabitant of the moon lands on this planet during the war.

POETRY

Prévost et Dornier. *Livre Epique, Anthologie des Poèmes de Guerre.*

Lamandé, André. *Sous le Regard Clair d'Athéné.*

Awarded the Prix Nationale de Poésie.

Céard, Henri. *Sonnets de Guerre.*

Among the finest war poems published in France.

Perrin, Cecile. *Les Captives.*

Dujardin, A. *Lille Captive.*

Diary in verse form of the four years of occupation.

Drieux de la Rochelle, *Interrogation.*

—*Fond de Cantine.*

Cendras, Blaise. *J' ai Tué.*

Collections

Allard, Roger. *Elégies Martiales.*

Baron, Fr. *Sous le Casque des Lauriers.*

Arcos, R. *Le Sang des Autres.*

Moulat, J. *La Torche Enflammée.*

Richardot. *Le Tocsin Avant et Pendant la Guerre. (1891-1919).*

* This list is taken from the article on French Literature prepared by Dr. Schinz for the 1920 edition of the New International Yearbook, and is printed by permission of the publishers, Messrs. Dodd, Mead and Company. For further comment on these books the reader is referred to that article, the order of which is for the most part here followed.

Séguret. Poèmes.
 Flory. Un Coeur de Brave.
 Martins. Poèmes d'Alsace.
 Guillemar. Vers pour mon Frère (mort 1914).
 Ferval, Mme. Claude. La Trace de ses Pas.

PLAYS

Brieux. Les Américains en France.
 Played at the Odéon, Paris, and also in New York. Shows admiration for the work of American women during the war in France.
 Bourdon, G. Les Chaînes.
 Méré, C. La Captive.
 Both these plays discuss internationalism and patriotism.
 Flers, R. de and Croisset. Le Retour.
 Donnay, M. La Chasse à l'Homme.
 Problem of marriage after the war.
 Rolland, Romand. Liluli.
 Pacifist and allegorical play; not produced on stage.

LITERATURE INDEPENDENT OF THE WAR

POETRY

Bataille, Henry. Quadrature de l'Amour.
 Disappointing to critics who consider unfortunate the attempt by the famous author to be "gouailleux" on a topic that remains grave.
 Ghéon, Henry. Le Miroir de Jésus, Sur les 15 Mystères du Rosaire.
 Fargue, P. L. Poèmes.
 —Pour la Musique.
 The genre of Heine.
 Madrus, Lucie Delarue. A Maman.
 Hache, Emmanuel. Paroles d'un Amant.
 Figuières, Eugene. La Forêt sans Feuilles.
 Fabre, L. Connaissance de la Déesse.
 Garnier, A. R. Les Corneilles de la Tour.
 Gossip about the life and inhabitants of the village.
 Goyon, Edouard. Le Jardin des Dieux.
 Awarded prize by La Vie Heureuse. Author is librarian at Algiers.

POETS OF THE ULTRA-MODERN SCHOOLS

Salmon, André. Prikaz.
 Salmon is the poet of "Féeries" and "Calumet."
 Cendras, Blaise. Du Monde Entier.
 Reverdy, Pierre. Guitare Endormie.
 —Self-Defence.
 A little manifesto for Cubism.
 Moraud, Paul. Lampes à Arc.
 A Post-Cubist.
 Revel, Maurice. Le Rêve.
 Picabia, Francis. Pensées sans Langage.
 —L'Unique Eunuque.
 Disciple of the "newest new," Dadaism.
 Fourest, George. La Négresse Blonde.
 A satire on the believers in novelty at any cost.

THE NOVEL

Benoit, Pierre. Pour Don Carlos.
 In which instead of one *femme fatale* as in his Koenigsmark and l'Atlantide (1919), there are two. Benoit remains king of France in point of popularity.
 Proust, Marcel. Côté de Guemantes.

Proust was the Goncourt laureate last year with "A l'Ombre des Jeunes Filles." Nothing out of the very ordinary happens, nothing at all of importance is discussed, there is no attempt at style.

Perrochon, E. Nène.
 The new Goncourt laureate, a poor schoolmaster near Paris. Other novels considered for the prize were A. Salmon's "Négresse du Sacré Coeur;" J. Vignaud. "Saratti le Terrible;" Mme. M. Vieux, "L'Enlisée."
 Jaloux, Edmond. Incertaine.

—Au-dessus de la Ville.
 Author received the Grand Prix de Littérature Française.
 Corthis, André. Pour Moi Seule.
 Received the Grand Prix du Roman.
 Lavedan, Henri. Irene Olette.
 First part of a trilogy to be called Le Chemin du Salut.
 Hermant, A. L'Aube Ardente.
 Pictures youth with its expectations.
 —La Journée Brève.

Man in his best and not numerous years. The end of the trilogy will be "Crépuscule Tragique."
 Audoux, Marie. L'Atelier de Marie Claire.
 Lichtenberger, André. Biche.

A girl who is made to suffer by parents who are not bad but stupidly good and unduly severe.
 Rostand, Maurice. Cercueil de Cristal.

Another of Rostand's frantic attempts to become famous in spite of his father.
 Bordeaux, Henri. La Vie Recommence.
 Vigorously optimistic.

Régner, Henri de. Pécheresse.
 The same theme as that of the "Princess de Cleves."
 Anet, Ariane. Jeune Fille Russe.
 But not for the "jeune fille."

Colette. Chéri.
 First published in *La Vie Parisienne*.
 Montfort, Eugène. Coeurs malades.
 Curious transposition in our age and under European sky of the story of "Paul et Virginie."

Mauriac, Fr. Chair et sang.
 Tinayre, Marcel. Perséphone.
 Gide, André. Symphonie Pastorale.
 Ironic title for a *roman d'analyse*.

Miomandre, Fr. de. La Cabane d'Amour.
 Vaudoier, J. L. Le Dernier Rendez-vous.
 Binet-Valmer. La Passion.
 Written before the war.

Magre, Maurice. L'Appel de la Bête.
 Darin, Maurice. La Bête et l'Ange.
 Struggle between the male *bêtise* and the female *ruse*.

Laparcerie, Marie. La Fête est Finie.
 Marx, Madeleine. Femme.
 Terrible indictment of women by a woman.

Reboux, R. Romulus Coucou.
 Story of the disappointed love of a colored man for a white woman, ending duly in lynching.

Bachelin, H. Le Petit.
 Machard, A. Les Cent Gosses.
 Chiefly dialogues.
 Obey, André. L'Enfant.
 The adolescent.

NOVELS OF ADVENTURE

- Adam, P. *Le Lion d' Arras*.
An American who arrives as conqueror in an industrial district.
- Bertrand, Louis. *L' Infante*.
A beautiful historic novel; the scene is romanesque Spain.
- Reval, Gabrielle. *L' Infante à la Rose*.
- Tharaud, J. J. *Marrakech, ou Seigneurs de l' Atlas*.
Striking picture of the proud bandits of the African desert.
- Rosny, J. H. *Le Félin Géant*.
Novel of prehistoric reconstruction.
- Renard, Maurice. *Le Docteur Lerne*.
In the vein of H. G. Wells' "Island of Dr. Moreau."
- Romaine, Jules. *Dongan Tonka, ou le Miracle de la Science*.
Ridicules science as a means of conquering the world.
- Stertevens, A. *L' Apostat*.
Ridicules utopians.
- MacOrlan, Pierre. *Petit Manuel du Parfait Aventurier*.
- Arnoud, Alex. *Indice 33*.
Style of "The Three Musketeers."
- Dekobra, Maurice. *Prince ou Pitre*.
A prince who prefers to be a clown because he can act more in accordance with his own individuality.
- Bussy, Jean de. *L' Eau Ardente*.
A strong anti-alcohol plea.

SHORT STORIES

- Bourget, P. *Anomalies*.
- Mille, Pierre. *Trois Femmes*.
- Boysleve. *Nymphes Dansant devant les Satyres*.
Arétin is hero of one story, which explains the title.
- Regnier, H. de. *Histoires Incertaines*.
- Picard, Gaston. *Confessions d' un Chat*.
- Rhaïs, Elisa. *Café Chantant*.
Striking exotism.
- Bizot, René. *Peines de Rien*.
- Bernard, Tristan. *Le Taxi-Fantôme*.
As gay as ever.

PLAYS

- Magre, Maurice. *La Mort Enchaînée*.
In verse. Probably the most discussed play of the year. Same topic as Brieux's *La Foi*. (Théâtre Français.)
- Du Bois, Albert. *L' Hérodienne*.
The story of Titus and Bérénice.
- Curel, F. de. *L' Ame en Folie*.
- Frondaie, Pierre. *L' Appassionata*.
- Fabre, E. *La Maison sous l' Orage*.
- Wolf, Pierre. *Les Ailes Brisées*.
- Bernstein, H. *L'Animateur*.
- Raynal, P. *Maître de son Coeur*.
- Méré, C. *Le Conquérants*.
A modern *Roméo and Juliet*, in the industrial world.
- Lenormand, C. *Les Ratés*.
- Bernard, Tristan. *Les Petites Curieuses*.
A cynical little play.
- Bouhélier, Saint-Georges de. *Esclaves*.
A shockingly realistic play of the slums.

Frapié, L. *La Maternelle*.

From the famous novel.

Vildrac. *Paquebot Tenacity*.

Romains, Jules. *Cromedeure-le-vieil*.

Duhamel. *Les Athletes*.

The three last were given at the Théâtre du Vieux Colombier, and are printed by the *Nouvelle Revue Française*.

CRITICISM AND HISTORY OF LITERATURE

- Montaigne, Michel de. *Essais*.
Last volume of the Edition Municipale de Bordeaux.
- Nolhac, P. de. *Les Derniers Amours de Ronsard*.
- D' Urfé, Honoré d'. *Astrée*.

Fiction a Municipal Luxury!

Lamenting the fact that one-third of the lendings of the Sydney (Australia) Municipal Library are fiction, and often inferior fiction at that, the *Bookfellow* remarks that this state of affairs "ought to be stopped." "Fiction can be borrowed so cheaply that it may fairly be regarded as a municipal luxury, not a necessity. Scores of small circulating libraries offer novels at 3d. or even 2d. a book.

"Let the Municipal Library maintain its original aim of providing scientific and technical, artistic and educational books for students and apprentices. . . . Merely on the technical and educational side, it would take many years and much money before the Municipal Library is fully equipped."

"There is the service! There the profit—in helping young men and women to make themselves citizens, intelligent and useful," concludes the *Bookfellow*.

Serving New York's Black City

By ERNESTINE ROSE

Librarian, 135th Street Branch, New York Public Library

IT is in the community life of a great city that the library has its most challenging opportunity. The more homogeneous such a life the greater is the opportunity of becoming part of it, since all currents flow together, drawing one into the common whirl of experience while conflicting currents of thought and habit keep one tossing about on the surface.

One of the most interesting and least-known of such communities is New York's black city, extending approximately from Eighth Avenue to the Harlem River and from 130th to 150th Streets. Picture to yourselves a great town of some 150,000 black people, with a few alien whites as scattered shop-keepers, and old residents, clinging to their homes. This city has its own churches, its theaters, its newspapers, its clubs and social life. There are three churches, each with a parish numbering more than two thousand, in Harlem, and at least thirty others, varying in size. The Sunday School of Mother Zion Church has a membership roll of seven hundred, and an average attendance of five hundred. All denominations, from Baptist to Episcopalian, are represented; there are a large Catholic parish, several Jewish churches, and a number of Eastern and African sects.

The theaters have their own colored actors, and increasingly one sees posters featuring colored artists. There are colored Y. M. C. A. and Y. W. C. A., the latter with an entire resident apartment house. In "Liberty Hall," Harlem's town hall, of a Sunday, immense mass meetings are held. Does white New York know what is discussed there? Harlem supports six colored newspapers recognized as representing negro thought, as well as a number of lesser sheets. This negro world is swarming with clubs, societies, organizations of sorts, for the support of religious or political movements, as for instance, the Bahai faith, or Marcus Garvey's "Back to Africa" propaganda, as likewise for the mutual betterment or advancement of members.

What gives all this point is the fact that these activities are sponsored and managed, to a large extent, by colored people. The offices of the Urban League are filled by negroes, al-

tho both races are represented on the national board of directors. The colored branches of the Y. M. C. A. and the Y. W. C. A. are managed entirely by colored people. The newspaper editors are negroes, and represent negro thought exclusively. The clergy are negroes, except in the case of the Catholic parish. On the corner of 135th Street and Lenox Avenue a bank has just been erected, which is financed by colored capital, and is under colored control. A large new theater also financed by negro funds is being erected. The reading world knows of Marcus Garvey and his Black Star steamship line. Increasingly, real estate is coming under black control. Even the police and fire stations have colored men on their forces, altho the city-managed activities within the district are the most reluctant in succumbing to the inevitable tide. Until a few months ago the library had no colored assistants. Of the three public schools in this community two have colored teachers, one has fourteen on a teaching force of sixty-one, the other has only one. In this school, which faces the library on 135th Street, the registration is something over twenty-one hundred, of whom two thousand are colored. The community has also its literary and artistic life. Several artists of real worth work in Harlem, and there is a large music school, the colored director of which has given recitals at Carnegie Hall.

All this seems to spell homogeneity. Yet tho this great group is held together by the tie of color, and by the same bond is separated from its white neighbors, within itself it is crossed and divided by many conflicting lines of thought, belief and hope.

The most deeply-cut is that of nationality. Nearly half this population is foreign, from the British or Spanish West Indies. or South America. From the British West Indies comes an educated, thinking and ambitious group, interpenetrated by white blood, unused to the color line and inexpressibly galled by it. They are, perhaps, the library's best readers, but they form a separate, alien group, a bitter, proud people. Those from the Spanish possessions and from South America form as alien a group, but one which is indifferent rather than an-

tagonistic. Both their language and their color exclude them from much of American life. Those from the Islands, unused to participation in political life, do not feel the need of naturalization privileges. They came to America for a livelihood, and that end accomplished, they are satisfied with their own native life with its clubs and gambling groups, its freedom. Police estimates place the number of such alien citizens as from 20,000 to 30,000 in this district.

A second line of division is that of political thought. All colored people are not thinking alike about their problems, or their future. Distinct schools of thought exist, from that of the late Booker T. Washington, and his successor, Dr. R. R. Moton, of Tuskegee Institute, who believe in the slow advancement of their race to equal opportunity thru an initial industrial training; to that incredible movement, or dream, rather, of Marcus Garvey. This great leader, who has gathered under his banners some 4,000,000 colored people all over the world, stands for uncompromising race integrity, a return to Africa, and the establishment there of a black racial and political life. Between these two extremes is a smaller group which believes in equal opportunity along all lines, based on individual merit. The most distinguished exponent of this belief is Dr. W. E. B. DuBois, president of the National Association for the Advancement of Colored People, and author of several powerful and arresting books.

Such is a very sketchy picture of colored Harlem, New York's black city. In attempting to make the library a part of this community, and at the same time, a means of opening for its people an entrance into American life, the chief difficulty has been, and will remain, I am convinced, not in the alien and conflicting groups, but in the barrier of a separate life with distinct beliefs and aims which separates all colored people from all whites at the present time. To illustrate, let me quote from that most illuminating book, "The Autobiography of an Ex-Colored Man." The author says:

"He (the negro) is forced to take his outlook on all things not from the viewpoint of a citizen, or a man, nor even of a human being, but from the viewpoint of a colored man. . . . It is this, too, which makes the colored people of this country . . . a mystery to the whites. It is a difficult thing for a white man to learn

what a colored man really thinks; because generally, with the latter an additional and different light must be brought to bear on what he thinks. . . . It would be impossible for him to confess or explain (his thoughts) to one of the opposite race. This gives to every colored man, in proportion to his intellectuality, a sort of dual personality; there is one phase of him which is disclosed only in the freemasonry of his own race."

This is true of all racial groups, and if so, how much more so of the colored race, which is separated from the white by the barrier of a very recent servile condition and of present social ostracism.

In view of these difficulties, it might have been possible to make this branch of the New York Public Library a "colored library," by having an entirely colored staff. It may be possible still to do this as has been done in the case of Y. M. C. A. and Y. W. C. A. If so, the policy will tend to strengthen race solidarity, and an opportunity to lessen race prejudice will be lost. A more democratic procedure is that of maintaining a colored and white staff, working together for the service of the community. So far, at least, this has been our policy. There are three colored assistants on the staff, one a college and library trained woman, from Howard University, in Washington. Of the other two, who are high school graduates, one was born in the north, the other has lived there for some time, and both have had varying experience, as teachers and clerical workers. Need is felt for the representation on the staff in the near future of the British West Indians and of the Spanish negro group. The response of the community to the appointment of colored assistants has been so prompt that one cannot but expect a similar altho slower reaction from the representation of these other groups.

In answering the inevitable question as to the success of a mixed staff, I can only say that I have never known a group of people who worked together with greater personal and professional harmony. In any such experiment, of course, care must be employed in the initial choice of persons without racial prejudices, so far as this is humanly possible! Individual acquaintance and mutual understanding will do the rest, as is usually the case in dealing with mass opinions or prejudices.

One of the services which the colored assistants render the library is the knowledge of neighborhood affairs and people which they gain far more quickly than the members of the alien race, even if they entered the district as strangers at the same time. This intimacy has been of great advantage in making the library better known.

Methods of library advertising are similar everywhere, but in this district the churches furnish a particularly effective introduction. Negroes are naturally religious, and the churches of Harlem exert a tremendous influence. Moreover, they welcome the librarians at their services, particularly at those of the Sunday Schools, where facilities have been given for speaking in the various rooms and showing books to the children. The children's librarian has found that Mrs. Dana's beautiful "Life of Jesus" is received with great enthusiasm by the children, who know the stories by heart.

The most effective way of reaching the children has been thru the schools, and in the use of the children's room by classes. The children love books spontaneously, and their response is instant, tho their interest lapses quickly, as we found during the Christmas vacation.

Visiting the homes is a most effective means of advertising, for the mothers are particularly interested in what the library is offering their children, and such interest will often prompt a first visit on their part. Their surprise and pleasure at discovering books for older people, too, are rather pathetic. It is to be remembered that many of these grown people, coming from the South, have never been permitted to enter a public library. That they are welcome, and that the place is free, must continually be repeated. I place the moving picture houses on an equality with the churches as valuable advertising agents. They keep information about the library constantly before a public which we would find it difficult to reach otherwise.

The Spanish-speaking group we reach most effectively thru their leaders, and by advertising in their papers. A small collection of Spanish-American literature is being made, and we have written to Cuba and the other islands, asking the leading newspapers and magazines to place us on their mailing lists, as the Spanish papers in New York have done.

The negro editors are among the best friends of the library and it is thru them, the social workers, and other prominent individuals that

the library is extending its influence slowly but surely thru the various strata of negro life. That such strata exist I hope I have indicated. Those who wish to work effectively among negroes must realize that besides the groups already mentioned, there exists among them a stable, very real social life, quite unlike "culléd sassiety," and as unknown to most whites as "darkest Africa" was not long ago. The library must gain the interest and support of this social and professional, often wealthy, group before it can hope to become an integral part of negro life.

These people are among our best readers, and the books they read are similar to those of any cosmopolitan reading public. They are eagerly interested and curious about what the great world is doing, and keep closely in touch with it. As for the reading habits of the negro group at large, poetry and music are immensely popular, but so also are philosophy, psychology and the speculative sciences.

If there is one quality which is universally characteristic of the negro in reading, as in all else, it is his love of the beautiful, as he conceives it. Rudimentary as it often is, it furnishes the very best basis for the teaching of good reading, and, I may add, of ethics and good conduct. The children, and adults too, respond to good manners because they are beautiful. I have stood on our stairway and said gently to a tumultuous group of children pelting up towards me, "Good afternoon," and have seen them quiet instantly, smile a happy response, and walk sedately on. A frown and harsh words would have caused whoops of derision. By the same token, negroes want what is "best," in literature, even if they do not always understand it. In this sense they are ambitious, rather than in the intellectual or material way, of the Jews.

Among the children poetry and fairy tales are as popular as elsewhere, and American history has a fresh and present appeal. The most delightful thing about it all is the spontaneous enjoyment of the children. They do not look at books because they must, but because they want to! Quite the most delightful thing in the world, I am sure, is a story-hour group of these colored children, not silent and absorbed as a Jewish group would be, but eagerly responsive, on tip-toe with expectation.

An index to the constantly increasing race consciousness among negroes is their intense

interest in books by members of their own race, and in works on the negro; his history, race achievements, and present problems. Dr. Du-Bois' "Dark Water," and Lothrop Stoddard's "Rising Tide of Color," are almost equally popular. Books exploiting the old-time "darker," with his dialect and his antics, as for instance, E. K. Means, will be read, but they are resented by the thinking, self-conscious group. On the other hand, the "Uncle Remus" stories, and Dunbar's poems, are widely read and very popular. They represent the plantation negro and his life with sincerity and loving faithfulness.

No doubt, there are in Harlem members of this receding class, but the library has come very little into contact with them. Southern dialect is rarely heard, whereas the soft, perfect English of the West Indies is a revelation to most Americans.

A recent development in the thinking of negroes is evidenced by their interest in economic and social literature. The economic unrest is seeping in among our colored people, and some of the most intelligent questions I have ever heard have been asked after the lectures at our Thursday night forum, devoted to social and racial problems. So much for Mr. Madison Grant's assertion, "Negroes never become socialists."

I trust that what I have said indicates that in working among negroes, as in all other racial groups, one's preconceived opinions die of malnutrition! One is naturally slow to form new ones, but gradually I am forming several conclusions about the negro. Most deeply I am impressed with his tremendous reserve power, which, when fully called forth, will lead to ends we cannot now conceive. This is shown in his wonderful patience, in his persistent grip on what is fine and beautiful, and in his deep sense of humor, which breeds a curious sort of broad-mindedness. I listened with wonder to James Weldon Johnson's account of the Haitian outrages, and to the questions which followed, pertinent, detached, many satirical, but none hot or bitter. The impulsiveness, high spirits, and "tomfoolery," so often evident are merely effervescence on the surface of a deep, slowly moving stream, surely gathering in volume. Such is my conviction. Another is that the race, in its developing self-consciousness, is becoming increasingly sure of the necessity before it of working out its own destiny, of settling its own

problems. The majority of colored people do not, I believe, hate the whites, but they are expecting less and less from them. And irrespective of divisions, of conflicting beliefs and plans for development here in America, or race integrity in Africa, the negroes are standing together in a steadfast belief in their own destiny to be worked out within and by themselves.

In this awakening of a great people the library may bear no small share, if it can introduce them to America, and America to them. Serving as a bridge, here as always, between races, it may lead to a common ground and a basis for mutual understanding.

Per Capita Circulation

Per capita circulations of the principal public libraries in the thirty largest cities of the United States, obtained in response to letters sent out in September, 1920, by the Cincinnati Public Library were:

City	Census 1920	Per Capita Circulation
1 New York (Manhattan, Bronx & Richmond)	3131078	3.08
2 Brooklyn	2022262	2.64
3 Chicago	2701212	2.78
4 Philadelphia	1823158	1.88
5 Detroit	993739	2.17

(To be concluded)

100% Profit Plus

MANY librarians will be shocked to learn that an English book costs more than twice as much in New York as in London. Yet that is the rule in some houses.

The following titles from four international publishers are typical and recent—Putnam's and Longmans' taken from the January *Bookseller*; Macmillan's from their bulletin of November 22, and those of the Oxford University Press from their card announcements of December 10:

	PUTNAM	s.	d.
Carter & Arnold, Field Artillery Instructor	\$6.50	35.	0
Dock and Stewart, Short History of Nursing	3.50	17.	6
Dunn and Jessup, Short Golf Talks	3.00	15.	0
Goizet, Never Grow Old	2.00	10.	0
Knappen, Wings of War	2.50	12.	6
Walsh, Hispanic Anthology.....	5.00	25.	0
	LONGMANS		
Corneille, La Galerie du Palais... 1.75	5.	6	
Cuthbert, God and the Supernatural	5.00	15.	0
Heine, Buch der Lieder	2.50	7.	6
Lewis, Physical Chemistry	5.00	15.	0
Lindsay, Letters	2.40	6.	0
Stewart, Chemistry	6.50	21.	0
	MACMILLAN		
Athena	6.00	15.	0
Bearne, Cross of Pearls	1.40	3.	6
Clibbens, Phase Theory	10.00	25.	0
Laird, Study in Realism	5.50	14.	0
Lamb, Higher Mechanics	8.00	25.	0
Maxwell, Matter and Motion....	2.00	5.	0

OXFORD

Aristotle, Athen. Respublica.....	1.60	3.	6
Bacon, Secretum Secretorum ...	12.60	28.	0
Farrar, Itinerary of King Henry I	8.00	18.	0
Marvin, Recent . . . European Thought	3.00	6.	0
Nilsson, Primitive Time-Reckoning	9.45	21.	0
Shelley, Philosophical View of Reform	3.75	7.	6

An examination of these lists discloses the fact that the shilling (now worth 19 cents) is counted by Putnam at 20 cents, by Longmans at an average of 33 cents, by Macmillan at 40 cents, and by the Oxford Press at nearly 46.

In this connection it is to be recalled that between New York and London stock we should rightly expect a divergence of (say) 21%. i. e. 15% duty and 6% transportation. This would put the shilling up to 23 cents, but never to 33 or 40 or 46!

Naturally, explanations have been asked. They will be reported. It is but fair to add that large clients of Longmans, Green & Company will know that the trade lists at least in their cases do this firm a disservice. And their progressive action in establishing L. C. card service is especially commendable (see *LIBRARY JOURNAL* of September 15, 1920). But one dislikes to have the individual help pay the library's bill.

Once more the Committee's slogan: Do your own importing!

Guides and Guideposts*

AS everybody knows, a poor guidepost is sometimes worse than none at all. Many a weary hiker, with blisters on both feet and a heavy pack, has hurled anathemas at the tottering crossroads sign which points with equal indefiniteness down *both* roads of the fork, or at the succession of signs, a mile or so apart, which all proclaim with unflinching uniformity: "Green River, 3¼ miles." But picture his pleasure when he comes to such a guidepost as that at Richfield Springs—known to New York librarians at least! Standing solidly foursquare at the intersection of the four most-traveled roads in the center of the town, surmounted by a clock and illuminated by night, it names on its four sides the towns along each road, with the distance to each accurately stated. The moment its substantial and dignified lines are sighted, the traveler feels that here at last he has found a guide that can be trusted, and after consulting its printed schedules he passes on, confident that the information he has acquired is both accurate and complete, and that he need have no further fears about his course.

Now bibliographies and indices are nothing more nor less than guideposts for the traveler seeking a way thru the criss-cross roads of print, and such a checklist as this latest one from the Russell Sage Foundation Library is as welcome to the librarian and the social worker as is the Proctor guidepost to the motorist or pedestrian who is passing thru the Fenimore Cooper country.

We do not need the modest statement of Mr. Jenkins, that the list is the result of ten years' painstaking and careful work, to be assured of its accuracy, for experience has taught that every publication of the Russell Sage Foundation bears the hallmark of reliability. But we do owe a distinct debt to Mr. Jenkins and his associates in the Library for their persistency in working for ten years to achieve the added merit of completeness.

In this Guide are listed approximately 4000 institutions and organizations whose publications are on the Library's shelves, probably the most complete collection of such publica-

tions to be found anywhere in America. With Guide in hand, the contents of the collection will be easily available, and as Mr. Jenkins says in his introduction:

"The reports and serial publications of progressive institutions and organizations for social and civic welfare are source material of the greatest value to the student who may wish to know the history of any movement for human betterment. These publications not only record the work of a particular organization or body, but they often trace the entire development of an important effort from its inception to its final success or failure. The reports of the Poor Law Commissioners of Great Britain, for example, beginning with the first annual issue in 1834 and still continuing, not only trace the history of the care of the poor in Great Britain, but discuss such questions as public health, housing, town planning, and old age pensions. . . . The proceedings of local, state, national and international conferences represent another class of serial publications which not only assemble valuable data but also record development."

Great care has been taken in preparing the Guide to include only the best and most representative publications, and to this end all entries were submitted, class by class, to specialists in the different fields, while the process of compilation was going on, "in order," to quote Mr. Jenkins again, "that no institution or report that did not represent progressive social effort should be included. At the same time advice was sought in regard to other important institutions, the publications of which were not in the library and which nevertheless should be included in the list, since the aim of the Foundation is to make the Guide as authoritative as possible. Obviously, because of lack of space, not all valuable reports can be included, but the publications listed have been carefully selected and represent the best standards in the fields covered." A long list of friends who have co-operated in this way, bears witness to the thoroughness with which this reference to specialists was executed.

The physical makeup of the book is pleasing, with clear type, well spaced entries, and best of all, a binding that will stay open anywhere and let the book lie flat! A brief but clear explanatory preface follows Mr. Jenkins' introduction and sets forth the method of entry. Only such serial publications as appear with

* Rushmore, Elsie M., ed. *Social Workers' Guide to the Serial Publications of Representative Social Agencies*. With an introduction by Frederick W. Jenkins. New York: Russell Sage Foundation, 1921. 174 p. \$3.50 net

some regularity have been included, a ruling which bars out certain institutions and organizations whose publications, while valuable, are only occasional, among them being community trusts and several of the large Foundations. A footnote, however, calls attention to the fact that a bibliography of this latter material has been separately prepared and printed, and is available for a nominal sum.

The list of serials, in straight alphabetical arrangement, fills the first 114 pages of the book. The following sample entries will show their simplicity of form. The asterisk signifies that only current numbers, that is, only the last one and generally one or two immediately preceding, often valuable for purposes of comparison, are kept. A dash at the end of an entry means that the file of reports is complete from that period to date—and this form of entry is the one most frequently used.

Sharon, Mass. Sharon sanatorium for pulmonary diseases

Annual report. no. 1 (1891-92)-11, 13—

Sheffield, England. Borstal Club

Annual report. 1909-10

Sheffield, England. Health committee

Annual report. 1906, 1907, 1910-1915

Sheffield, England. School medical officer Report*

v. 13 (1913)—

1. 17, no. 6 lacking

Sioux City, Iowa. Charity bureau

Annual report. 1914-15

In 1916 this Bureau, the Visiting nurse's association, the Anti-tuberculosis society, the Safety-first league, and the Day nursery merged to form the Sioux City, Iowa, Organized charities.

The index, which fills the last sixty pages, is arranged by subject, thus bringing together for quick and easy reference all the material listed in each of the various fields, and here cross references are used quite freely. In short, it would seem that everything had been done that could be done by the compilers to achieve the threefold service for which the book is planned, namely, to enable all those who have access to the Russell Sage Foundation Library to consult its source material in any given field with full information as to what publications are available and what are not; to supply students at a distance, who cannot use the Library, with a source guide; and to encourage visits to and

studies of progressive institutions. The wonder is, how have they managed without it for so long?

FLORENCE A. HUXLEY.

Books Popular in January

THE most popular works of fiction in the public libraries in January according to Frank Parker Stockbridge's statistics in the March *Bookman*, were:

The Age of Innocence. Edith Wharton. Appleton.

The Top of the World. Ethel M. Dell. Putnam. Main Street. Sinclair Lewis. Harcourt.

A Poor Wise Man. Mary Roberts Rinehart. Doran.

The Valley of Silent Men. James Oliver Curwood. Cosmopolitan.

This Side of Paradise. F. Scott Fitzgerald. Scribner.

The general works most in demand were:

Margot Asquith: An Autobiography. Margot Asquith. Doran.

White Shadows in the South Seas. Frederick O'Brien. Century.

The Outline of History. H. G. Wells. Macmillan.

The Americanization of Edward Bok. Edward Bok. Scribner.

Now It Can Be Told. Philip Gibbs. Harper.

Memoirs of the Empress Eugenie. Comte Fleury. Appleton.

The six best sellers in fiction during the same period, as shown by special reports from 59 booksellers in 46 cities of the United States to *Books of the Month* are, in order of popularity: Grey. The Mysterious Rider. Harper.

Lewis. Main Street. Harcourt.

Wharton. The Age of Innocence. Appleton.

Curwood. The Valley of Silent Men. Cosmopolitan

Rinehart. A Poor Wise Man. Doran.

Dell. The Top of the World. Putnam.

During the same period the six best sellers in general literature were:

Asquith. Autobiography. Doran.

Wells. The Outline of History. Macmillan.

O'Brien. White Shadows in the South Seas. Century.

Gibbs. Now It Can Be Told. Harper.

Franck. Roaming Through West Indies. Century.

Bok. The Americanization of Edward Bok. Scribner.

Caroline M. Hewins is the subject of the biographical sketch in the current number of the *Bulletin of Bibliography*.

In Memoriam

Major Joseph George Rosengarten

LIBRARIANS and educators in general have lost a warm and sympathetic friend in the death of Dr. Rosengarten.

Born in Philadelphia on July 14, 1835, he graduated from the University of Pennsylvania at the age of seventeen and was admitted to the bar in 1856. After studying for a year at the University of Heidelberg he practiced in the Philadelphia courts for many years altho his interest in the latter part of his life was absorbed by the institutions with which he had connected himself. He was on the staff of General John F. Reynolds during the Civil War and proved himself a good soldier. He was the author of numerous works: "The German Soldiers in the Wars of the United States," "The German Allied Troops in the North American War of Independence," "Stories of American History in German Archives," "French Colonists and Exiles in the United States" and many more pamphlets and papers relating to history and literature. As a trustee of the University of Pennsylvania he was always ready to help any needy student and as he had ample means he often extended his aid to writers and educators older in years. As a member of the Board of Trustees of the Free Library of Philadelphia his advice and encouragement were invaluable and a splendid portrait of him by Adolph Borie now placed in the reading room of the Library is a silent token of the appreciation of his influence in library matters.

Dr. Rosengarten was connected with so many institutions that it is unnecessary to name them all. He was one of the first to be appointed by Mr. Anthony J. Drexel as a trustee of the Drexel Institute and in this capacity he encouraged the growth of the Drexel Library class which soon became known far and wide by the excellence of its teaching under Miss Alice B. Kroeger. He was an enthusiastic member of the Philobiblon Club and at the regular meeting he was generally called upon to express the appreciation of the Club of the entertainment afforded for the evening. He, himself, was a contributor to the Club's program and last winter gave a picture of the French in Philadelphia after the Revolution which drew forth the sincerest praise of every one who heard him. Altho eighty-five years of age he spoke for an

hour continuously without notes and without repetition.

In Philadelphia he will be missed as the man of all others who was chosen when a distinguished foreigner appeared to see that he was properly entertained. He spoke German and French fluently and this together with the natural courtesy of his manner immediately put the stranger at his ease.

He was a loyal friend, an intelligent citizen, fearless in everything and considerate in all things.

THOMAS L. MONTGOMERY.

Mrs. Annie F. MacDonell

MRS. MACDONELL, for so many years librarian at Bay City, died on January 11 at her home in Morristown, New Jersey. Mrs. MacDonell gave up her work about four years ago, going to Morristown to be with her daughter, Miss Mary Parsons, who is in charge of the public library.

The warm spirit of friendliness and of personal interest in the Michigan Library Association is due in largest measure to the personality of Mrs. MacDonell who was elected secretary at the first meeting in 1891 in Detroit.

Perhaps it was not very difficult in those early days to know all who attended the meetings, but the home feeling which all newcomers felt at once was quickly traced to her generous thoughtfulness, and every one seemed happy in passing it on. She was Mrs. Parsons then, and as secretary her fine business methods and her vital interest were of untold value in the struggling little association. There were practically no precedents to follow for Michigan was one of the first half dozen state organizations, and I believe Mrs. MacDonell never missed a meeting save during the few years when she withdrew from library work, the last being at Lansing in 1916. At the Ann Arbor meeting in 1915, the twenty-fifth, most fittingly, it was she who offered the resolutions of affection and regret that ill health forbade the presence of Mr. Utey. To the work of Mr. Utey with the loyal assistance of Mrs. MacDonell the State Association owes the deepest debt.

It is impossible to write of Mrs. MacDonell without paying personal tribute as well as professional to her memory. Few librarians so nearly attain the ideal as a leader in the social

and intellectual affairs of the community; few are able to attain to her high standards in the Bay City library; few women so grace every occasion which claims their interest. We remember her in the office of president and secretary, and as the queenly hostess at the annual dinner

to the guests of honor, and we think very often of the dear friend who so kindly and so generously gave us help and inspiration and a zest for all that is highest and finest in librarianship and in life.

G. M. W.

A Penny Post for Books

NOW that we are getting so far back towards normal our own home problems are receiving increased attention, and the matter of lower rates for public library books passing thru the rural mails is about to be presented in Congress. The great farm organizations are using their influence and a bill is in prospect sponsored by Congressman Houghton, member for the 27th New York district.

That the rates for public library books as fourth class matter requires modification, is recognized by everyone who has had experience in this matter. (An article reporting on a try-out of a penny a book rural delivery scheme appeared in the LIBRARY JOURNAL for June, 1919.) Books are usually sent out in packages containing but a single volume and can no more bear the excessive cost of the initial pound rate than can newspapers or magazines. Concerned with cultural matter they are entitled to something of the consideration shown second class matter, while requiring none of the subsidy granted to this class. In shape and size, they are much more convenient than is most of the material sent as parcel post. The time element which requires mailing from one point over large areas, as in the case of periodicals, does not enter, and the fact that the books are for the most part addressed to persons living at a short distance from the point of mailing makes this material especially suitable for delivery as fourth class matter.

There seems to me to be no doubt that an adjustment of rates within zone limitations could be made in such a way that the service would still pay for itself. For since this added business would be almost entirely confined to the rural mails whose notorious annual deficit is due to lack of cargo, such parcels in greater number would work not only to the advantage of the rural community but also to that of the postal revenue. At present the average rural delivery load is 25 pounds. It would seem, therefore, that any added cargo would be net gain. The same is true, tho in a lesser degree,

of the remainder of the rural mail service.

For the purpose of giving to the relatively "unbooked" forty millions of people living on farms and in isolated hamlets thruout America the privilege of frequent borrowing and return of public library books, I have recommended the following modification of the initial pound rate of the parcel post. (It should be remembered that the average book when suitably packed weighs rather more than a pound and counts, therefore, as two pounds.)

(a) Between any properly defined library and any patron of a rural delivery route within the local zone the average book ought to be carried for one or two cents;

(b) Between any library and a rural delivery route patron or fourth class post office within the first and possibly the second zone, two or three cents; and

(c) Anywhere within the third zone (300-mile limit) the book ought to be carried at such a rate as is justified by its greater convenience of mailing and transportation, as compared with the average of fourth class parcels.

There has, as yet, been little attention given this question as compared with that which has preceded every previous extension of the usefulness of the rural mail system. As already shown in the article mentioned above, the scheme has proved perfectly satisfactory in a rough hill section.

To librarians it is unnecessary to point out the extent to which such a scheme would be of assistance in extension work. May we not hope, therefore, to have from the librarians of each state such a degree of support, that this vital measure may be written on the statute books within the first year of the new administration?

ALFRED L. SPENCER.

The fifteenth "Japan Year Book," 1920-21, records that the libraries of Japan in 1918 numbered 1092: one government (the Imperial Library), 517 public and 574 private establishments, and 3 in the Imperial Universities.

THE LIBRARY JOURNAL

TWICE-A-MONTH

MARCH 15, 1921

THE suggestion that a statue or statuette of Hans Christian Andersen telling his tales to the children might be a fitting memorial or a pleasant feature of children's library rooms, has already taken concrete shape. An American sculptress, Miss Isabel R. Kimball, so welcomed the suggestion that she has made a sketch in plaster of such a group, which proves to be most charming, and it is hoped that it will be acceptable at the children's library section of the A. L. A. Conference at Swampscott. Miss Kimball's study of her subject developed the curious fact that Andersen was not fond of children, as such, but only of telling stories to them as listeners, and therefore the boy and girl are standing near him, intent on his words, the little girl holding a baby sister in her arms. The story-teller is seated in an old Scandinavian chair on which are figured in high relief suggestions from his stories, so that the statuette is interesting from the back of the chair as well as from the front of the group. Thus the frog, the kitten, the wild goose and other favorites peep out here and there, in the way of pleasant surprise to child on-lookers. It is to be hoped that some way may be found to develop this sketch in a manner that will bring it into close relation with the little people the country over.

★ ★ ★ ★ ★ ★ ★

MR. LEE'S fertile and radiating brain, which sponsored "Sponsors for Knowledge," complements that excellent plan which is as yet inadequately developed by the suggestion of voluntary curators who will bring private libraries of special character into definite relation with the public library system, and thus make them generally useful to a wide public. A happy precedent for this is found in the music collection of the Boston Public Library, whose donor made himself curator of the notable special library which he had brought together, continuing that service after he had actually transferred it to the public library. Naturally most owners of private libraries, particularly

of special collections, even tho they intend to bequeath their libraries to institutions, prefer to keep them in their own hands during their lives, and Mr. Lee's suggestion is an acknowledged relationship which would accomplish both purposes. Another suggestion that he has recently made goes still further afield, i. e., that the telephone companies should be induced to make a common denominator, as it were, for all libraries by giving to libraries the same number in different cities. The suggestion is ingenious, but is scarcely important, as the telephone service of libraries is chiefly to their immediate constituents, and a typical number would be of convenience chiefly in long distance communication, which is unusual. More and more are libraries putting their resources at the benefit of the public by answering telephone inquiries, but it must be admitted that this service is costly and that it cannot be extended to libraries with such inadequate means, that the library staff is as busy as it can be in dealing directly with the public, without the embarrassment of the insistent demands of the imperative telephone.

LIBRARY CALENDAR

- March 17. At the Westfield Atheneum, Westfield, Mass.
Mid-year meeting of the Western Massachusetts Library Club.
- March 28-29. At Toronto, Ontario.
Twenty-first Annual Meeting of the Ontario Library Association.
- April 29-30. At Atlantic City.
Twenty-fifth joint meeting of the New Jersey Library Association and the Pennsylvania Library Club and meeting of the American Library Institute.
- June 20-27. At Swampscott, Mass. Headquarters at the New Ocean House.
Forty-third annual conference of the American Library Association and twelfth annual convention of the Special Libraries Association.

LIBRARY ORGANIZATIONS

RHODE ISLAND STATE BOARD OF EDUCATION

LECTURES UNDER THE AUSPICES OF THE LIBRARY DIVISION

UNDER the auspices of the Library Division of the State Board of Education of Rhode Island a series of lectures and conferences has been held at the Rhode Island College of Education, Providence.

At the November meeting Judge Frederick Rueckert, Chairman of the State Board of Education, introduced Clara W. Hunt, superintendent of the children's department of the Brooklyn (N. Y.) Public Library who spoke on "Our Children's Reading and America To-morrow." Following her address Miss Hunt held a conference with the library workers. She urged the greatest care in the selection of books for children and those attending the lecture were provided with a list of books selected as suitable for children.

Miss Hunt suggested that parents buy for their children five of the best children's books each year, so that by the time they are 12 years old the children will have 60 books apiece. A few good books which the child will read over and over and will remember, are more useful than a large number of indifferent books.

On December 8th the Commissioner of Education, Walter E. Ranger, introduced MacGregor Jenkins, publisher of the *Atlantic Monthly* who spoke on "Literature with a Large 'L.'" "One of my theories about libraries and schools," said Mr. Jenkins "is that their usefulness increases just in proportion to the closeness of contact which they can make with human life and experience. When they can be taken as points of departure for useful and far-reaching endeavors, they justify themselves vastly more than if they are mere repositories for books or mere forcings for young minds."

At the close of the lecture many of those present attended a conference on Americanization. J. Maud Campbell, director of Work with foreigners for the Massachusetts Library Commission spoke on "The Library's Field in Americanization. . ." Mrs. Agnes M. Bacon, Rhode Island's supervisor of Americanization spoke on "What the Schools Expect from the Libraries."

During the morning a valuable and well attended demonstration in book repairing was given by Miss Sweet of the Providence Public Library.

The last lecture in the series was held on February 2nd, when Sarah B. Askew, agent for

the New Jersey Library Commission gave an address on, "The Library and the School." Miss Askew said in part, "We used to think that people got their education from schools, but now we know they do not. They get their education from life and books. In school they learn how to get these lessons. The greatest education the schools can give our boys and girls is the learning they can get from books. As a man reads, so he thinks. As he thinks, so he is. It is not always the world's greatest book from which one gets his inspiration, but the book that interests him most. It is far more important that tastes be trained in reading than to teach a pupil how to bound North Dakota." She urged her audience, many of whom were teachers, to work interesting books into their courses thru the medium of the public library.

Following the address a demonstration on inexpensive magazine binding at a small cost was given with Mr. Herbert W. Fison, librarian of the Malden (Mass.) Public Library as demonstrator, and Mrs. Smith, also of the Malden Library, as assistant. An exhibition from the A. L. A. on book repairing was also on display.

The lectures were held in the Assembly Hall of the Rhode Island College of Education. This hall seats over 300 and each time the hall was filled with librarians, library trustees, library workers, prospective teachers, superintendents and principals of public schools. Mrs. Anne W. Congdon, Library Visitor and Director of Traveling Libraries for the Library Division of the State Board of Education had charge of the arrangements for these meetings which were greatly appreciated by those attending.

CONNECTICUT LIBRARY ASSOCIATION

THE annual meeting of the Connecticut Library Association was held at the School of Music, Yale University, New Haven, February 25th, 1921.

The address of the morning was given by William Lyon Phelps who had for his subject "Some Contemporary Books Worth Reading." Professor Phelps said that doubtless Harold Bell Wright was the bugbear of librarians, but that to read his books was better than not to read at all, that a love of reading should be inculcated in children who travel faster in a book than in any other way. The speaker confined himself to books published in 1920, a remarkable year in production. "The Americanization of Edward Bok," Professor Phelps considered one of the most interesting autobiographies he had ever read, and Edward Bok one of the most public spirited men in the world, that the book was

a literary masterpiece, remarkable for the personal interviews with famous people. H. G. Wells's "Outline of History" is full of pages to arouse resentment, for he ruthlessly omits many things; but the book is written with so buoyant a spirit that it is charming. Only a great novelist would have attempted to write the history of the world in two volumes. In his discussion of the year's poetry Professor Phelps said that Vachel Lindsay was the most authentic voice of America. Among novels "Miss Lulu Bett" is remarkable for beauty of outline, in contrast with "Main Street," the construction of which is poor, altho the content is important. In closing Professor Phelps commended Archibald Marshall's novels to everyone, also a book on the Russian Revolution: "The Groping Giant," by W. A. Brown.

A delightful feature of the meeting was a recital of music for piano and voice given by students of the Yale School of Music.

An amendment to the constitution was voted, providing for not less than two meetings in each year to be held in October and May, the meeting in October to be the annual meeting.

A collection amounting to \$59.80 was taken to be sent in the form of food drafts to the staff of the Central Library in Vienna.

The following officers were elected: President, Henry N. Sanborn, Bridgeport; secretary, Laura A. Eales, Bridgeport; treasurer, Lillian E. Landgrem, Waterbury; vice-presidents, Arthur Adams, Epaphroditus Peck, Imogene A. Cash, W. E. Britton, Mary P. Wiggin.

At the afternoon session Odell Shepard of Trinity College, Hartford, spoke most interestingly on recent poetry. Altho it was not true that we are approaching a renaissance of poetry as many magazines assured us, at any rate there is a growing demand for poetry, and if America demands great poetry, she will get it. The characteristic of recent poetry is that poets are beginning to tell the truth about real things. This is strikingly illustrated by the contemporary war poetry, written by actual soldiers who saw in war no pomp and circumstance, but the grim realism of suffering. Siegfried Sassoon is perhaps the most remarkable of these. Professor Shepard considers the new poets a mutual admiration society and the newly found taste for poetry in great need of guidance. Maynard's "Twentieth Century Poetry" and Parson's "The New Poetry" he mentioned as helpful books. The speaker then discussed with careful discrimination a number of the most important anthologies and books of criticism. At the conclusion of the address the audience were allowed to ask Pro-

fessor Shepard's opinions of various poets and their works.

Corinne Bacon followed with a discussion of recent books on sociology. She said that at this time of rapidly changing conditions sociological books may need more stressing than poetry. The interest of the public in social matters is illustrated in the figures of book production for 1919, which show a loss of 643 titles over 1918, but a gain of 125 in titles on social and economic subjects. In England in 1920 books on sociology were second in popularity, while before the war they had been fourth.

The association was invited to visit the Yale University Press and many availed themselves of the privilege.

DOROTHY WHITING, *Secretary.*

AKRON LIBRARY CLUB

THE Library Club of Akron is conducting a campaign of library publicity at the request of the acting librarian of the Public Library, Maud Herndon. Carl P. P. Vitz of Cleveland has addressed the Exchange Club, and J. L. Wheeler of Youngstown, the Rotary Club, and plans are under way for other speakers in the near future.

Officers are: President, Maud Herndon; vice-president, Mary Yoder of the Goodyear Tire Rubber Company's Technical Library; secretary-treasurer, Ida B. Campbell of the B. F. Goodrich Co.

PASADENA LIBRARY CLUB

THE Pasadena Library Club held its regular meeting on Sunday afternoon, February 13 at 3 o'clock at the California Institute of Technology Library. Seventy were present.

Prof. Clinton K. Judy, head of the English Department and chairman of the Library Committee of California Institute of Technology, gave a very interesting talk on the work and the future of the Institute and E. C. Watson of the Physics Department and also a member of the Library Committee spoke of the new Norman Bridge physics building which is under construction and described especially the physics departmental library which will be located in that building.

Very interesting accounts of special libraries were given by the following librarians: Miss Scheck of the library of the First National Bank of Los Angeles, Betty Lord of the California Citrus Association library and Mrs. Vaughan of the Science and Industry Department of the Los Angeles Public Library. R. R. Bowker being in Southern California for a few days, gave a most interesting talk on the early days of the American Library Association and library work in general.

Present were representatives of the Henry E. Huntington Library, the Los Angeles Public Library, the Los Angeles County Library, the Los Angeles Public School Library, the Alhambra Public Library, the South Pasadena Public Library, the University of Southern California Library, Eagle Rock Public Library and other libraries in the vicinity as well as the Librarians of all the libraries of Pasadena.

After the program a pleasant social hour was enjoyed in the library where punch was served, presided over by Miss Howard and Miss Clemons of the California Institute of Technology. The club feels quite proud of the fact that altho it is scarcely a year old, it has nearly sixty regular members.

FRANCES H. SPINING, *Secretary-Treasurer.*

IN THE LIBRARY WORLD

NEW YORK

New York City. The Professional Committee of the New York Public Library Staff Association has a plan whereby a "scholarship" trip to the annual meeting of the New York Library Association may be awarded to one assistant in the Circulation and one in the Reference Department.

Ninety-six volunteers from the staff worked for five hours on the morning of Sunday, February 6th, to take a census of all the books in the Reference Department.

Syracuse. Eight of the manufacturing plants in the city have arranged with the Public Library for supply of books for employees. In each case a representative of the company acts as librarian and is responsible for the books at the plant.

MARYLAND

Baltimore. An appropriation of \$192,000 for the year 1921 insures a year of broadened activity for the Enoch Pratt Free Library, providing as it does for larger book purchases and an increased salary scale. Altho the establishment of a down-town business branch has been postponed again, a Fine Arts Department and possibly a Department of Pedagogy will be opened in the Central Library.

Two new branches, No. 20 at Hamilton, and No. 21 at Mount Washington were built in 1920, and it is hoped that the four more branches will be completed in 1921. The Carnegie Corporation permitted the expenditure of the average sum of fifty thousand dollars instead of twenty-five thousand on each library, so that the unused remainder of the Carnegie gift could be employed in the construction of six branches instead of the twelve remaining to be erected under the terms of the original gift. Sites for branch libraries have been given at Brooklyn and Irvington, and a movement has begun to secure a site at Roland Park. It is likely that

sites at Bayview and West Arlington will be offered in the near future. The total land area of Baltimore since the passing of the Annexation Bill of 1918 comprises 81.79 square miles.

The number of people who visited the present branches during the past year was 730,674, which is almost as large as the entire population of Baltimore. In all 389,602 books were circulated to the homes of 47,443 people from the main library and branches. Another interesting figure is that for the loss of books: one in every five hundred and sixty-four books circulated.

The change of classification to the Library of Congress notation has been the chief concern of the Cataloging Department, the work proving slow and tedious and involving much difficulty. The reclassification of older books in the library has included, for the most part, books purchased and cataloged for the branch libraries. The number of books cataloged was 15,049, of which 5043 were new books for the Central Library; 2559 were re-cataloged, and 7447 cataloged for branches. Work on the public card catalog, a union catalog which was begun in 1904, was continued thru the aid of a special appropriation made for the purpose last year.

For books, periodicals and binding \$36,061 was expended, and \$95,797 for salaries. The appropriation for last year was \$137,703, with \$2250 additional for the purchase of additional land at Mount Washington. The total number of volumes in the library at the end of the year was 389,602.

GEORGIA

Atlanta. During the week of March 28th thru April 2nd a Spring Institute will be conducted by the Library School of the Carnegie Library of Atlanta to which are invited all librarians in Georgia and the neighboring states. Several courses of lectures have been planned. Six lectures on children's literature and the ad-

ministration of a children's room will be given by Margaret Carnegie of the Carnegie Library School of Pittsburgh. Charlotte Templeton, Secretary of the Georgia Library Commission, will give five lectures on the administration of a small public library, the points covered being: The survey of the community; The librarian's survey of her own library; Publicity for the small library; Records and labor-savers; and The State Library Commission. A series of lectures on the mending and repair of books and the preparation of books and periodicals for binding will be given by Mary Ensign, formerly of the Binding Department of the Cleveland Public Library. In addition to these courses Mary L. Titcomb of Hagerstown, Maryland, Librarian of the Washington County Free Library, will lecture on April 1 and 2 on the county library, a subject of the greatest interest in the South as the county library offers this agricultural section the only possible means of bringing books to the people.

The advance attendance register shows much interest and it is hoped that a large number of librarians and assistants will be able to avail themselves of this extension of the privileges of the Library School.

FLORIDA

Jacksonville. Rising costs made it possible to purchase only 3,297 books for the Jacksonville Public Library in 1920—half as many as in 1919—but the circulation of 249,675 marked a greatly increased use of the library. Including gifts, etc., 4,882 volumes in all were added, bringing the total stock up to 57,074 volumes. The total number of borrowers registered on December 31, 1920, was 17,601, of whom 722 were colored people. The colored population of the city numbers 41,484, and a separate branch provided at the center of population best reached by them is advocated in Librarian Marron's report.

The receipts for the year were \$27,225, of which \$6,753 was expended for books, periodicals, and binding, and \$11,177 for salaries.

The total circulation of books from the Children's Department was 57,069, the non-fiction volumes outnumbering the fiction by more than 2,321. The School Libraries have 3,645 volumes which have been placed in twenty schools and had a circulation of 35,010, or 1,618 more than last year.

The library, being at the State's "gateway," is called upon by visitors for information concerning the entire state. Thru the help of the *Florida Times Union* and the *Florida Metropolis* the library has been able to furnish to the public weekly annotated lists of new additions.

KENTUCKY

Louisville. Under contract, Jefferson County residents are privileged to use the Main library and branches in Louisville, and in addition stations and classroom collections have been placed in the County outside of Louisville.

There are 142 centers for the circulation of books for home use in 82 buildings in Jefferson County outside of Louisville: 21 stations (17 white, 4 colored), 121 classroom collections (103 white, 18 colored) in 61 school buildings (44 white, 17 colored), using 10,702 volumes, with a total circulation of 54,071.

For the fiscal year ending August 31, 15,576 books were circulated among adults, of which 1327 were colored; and 38,495 juveniles went out, of which 8281 were to colored people.

OHIO

Akron. The Municipal University of Akron is conducting a training class for the benefit of the Public Library. The course covers the whole of the second semester. There are twelve students in the class, which is very gratifying, considering that no college credit is being given for the work this year.

Cleveland. So as to keep the "intermediate" in the library after he has left school, Miss Hill, the first assistant of the East 79th Street branch of the Cleveland Public Library, obtains from the Board of Education every week a list of the names of all boys and girls in the district to whom working permits have been issued during the week. She then makes visits to the homes of those who are not already using the library and tries to create interest in the library by telling about its resources and inviting the young workers to come.

MICHIGAN

Lansing. War service books to the number of 8384, sent to the State Library by the A. L. A., have been distributed to 55 points: of these 20 points are posts of the American Legion or other points especially accessible to returned soldiers, 20 are hospitals, and 15 are educational or religious institutions, reformatories, prisons, etc.

Menominee. The Spies Library added 2,061 adult and 2,106 juvenile books during the year ending August 31, 1920. Of this total nearly 3,000 volumes formed the nucleus of the county collection to be used in the twenty-five branches established between February and June, 1920, which had already circulated 11,127 books by the first of September. The total circulation was 73,047 from a book stock of 17,836 volumes for main library and branches. The total

receipts were \$13,519 and disbursements \$11,913 of which \$3,870 went for salaries and \$4,720 for books and periodicals.

ILLINOIS

Chicago. The thirty-fourth annual report of the Newberry Library is the first by George B. Utley as its librarian. The activities of the library and the service requested by the public have returned in a large degree to their antebellum status. The Genealogy and Local History Department maintained its usual popularity, while the Wing Foundation, tho in the first stages of its development has already attracted the attention of a number of students of the art of typography. Edward E. Ayer has made provision toward the establishment of an endowment fund for the maintenance of the Ayer collection, the most extensive in existence on the subject of the North American Indian. The principal clientele of the Library continues to be advanced students and teaching staffs of the local universities, high school and grade teachers, and the professional or business man or woman who is pursuing some branch of the humanities as an avocation. Readers for the year numbered 39,835.

The most notable acquisition of the year for the John M. Wing Foundation was a perfect and extremely well-preserved block book, *Apocalypsis S. Johannis* [Netherlands, ca. 1455], consisting of forty-eight leaves, printed on one side only, and the cuts afterward colored by hand. A personal representative of the library secured 243 items from the De Vinne sale, practically everything that came up for auction of the titles not already in the Library. Eighteen volumes descriptive of the books and manuscripts in the John Pierpont Morgan Library in New York were received from Mr. Morgan as gifts.

Four other noteworthy additions were: (1) *Homerus, Opera*, 2 volumes, editio princeps, printed by Bartolomeo di Libri, Florence, 1488, the Syton Park copy, in superb condition; (2) *Aquinas, Thomas, saint, Secunda Secundae*, printed by Peter Schoeffer, Mainz, the colophon dated March 6, 1467, this book being the earliest dated book of European origin in the Newberry Library collections; (3) a fine copy of the first issue of the first edition of the imperial gift book of Maximilian I, the *Teuerdanck*, Nürnberg, 1517; and (4) Schopper, Hartmann, *De Mechanicis Artibus*, Frankfort, 1574, the famous picture-book in which Jost Amman's woodcuts include views of a type founder, pressman, paper-makers and bookbinders at work, the earliest known pictures to represent those tradesmen and their tools and methods of work.

The principal acquisitions of the Ayer collec-

tion were transcripts from the Archives of the Indies at Seville, and the Mexican archives, 518 documents, consisting of 7,489 pages, and one hundred and thirty letters written by Elbridge Ayer Burbank to Mr. Ayer, while engaged in making Indian portraits. The Ayer collection now contains 40,129 volumes, pamphlets and manuscripts. The total for the whole Library on December 15, 1920, was 395,354, of which 6041 were added during the year. Books in the Wing Foundation numbered 4384.

OREGON

Portland. The report of the acting librarian of the Portland Library Association for the year ending October 31, 1920, shows the unusual total of 1,711,215 books as the circulation for the year, the highest record in the history of the library and an increase of 240,354 over that of 1919. From the Central Library 551,643 books were taken, 729,448 from the branches, 20,631 from the municipal reference branch in the City Hall, 24,778 from the deposit stations, 140,949 from the high school libraries, 230,690 from the classroom libraries in the city schools, 9,587 from those in the rural schools, and 3,479 were distributed by book wagon. The 107,729 card holders in the county represent 35.4% of the population. The per capita circulation was 6.20.

The total number of volumes on October 31, 1920, was 313,627, and of pamphlets 42,740. 19,627 books were added. Borrowers registered numbered 21,903. A budget of \$304,725 is asked for the coming year. During the library year \$262,534.36 was expended, \$43,722.02 going for books and binding and \$172,074.78 for salaries.

The instruction in the use of library books and the library was carried on as usual by the branches near the respective schools and during July a course in library use and methods was given at the Marylhurst normal school, covering a study of the Oregon state library law, classification, selection of children's literature and other topics.

CALIFORNIA

Los Angeles. The Los Angeles Public Library serves a population of 576,673 thru 222 agencies, with book stock that totaled 386,857 on June 30, 1920. Pamphlets numbered 51,013, maps, 4214 and music 5141. The circulation of 2,797,389 books was an increase of 216,175 over that of the previous year. The expenditures for books and periodicals, including binding, were \$60,482; and for salaries \$180,811. The total expenditures were \$299,658. 130,641 borrowers were registered at the close of the library

The Best Book of Synonyms
ROGET'S THESAURUS

LARGE TYPE EDITION

Revised by C. O. S. MAWSON

8vo, clothNet, 3.00 Limp leatherNet, 5.00
 Cloth, indexedNet, 3.50 Limp leather, indexed..Net, 5.50

"For well over half a century, Roget's 'Thesaurus' has been to countless literary workers a very present help, second only in usefulness to the dictionary itself. Of the long series of reissues since its first appearance in 1852, the latest is a 'large type edition,' revised and brought down to date by Mr. C. O. S. Mawson. The large type is an actuality, and the revision is of a very substantial sort—consisting in the judicious addition of numerous slang and cant expressions, Americanisms, and various new phrases and quotations. The use of thin paper reduces the 650 pages of the book to a thickness of less than an inch. Altogether, this seems to us the very best edition of the 'Thesaurus' now available."—Dial.

Ten Reasons why you should own this book

1. It will recall the word that has slipped your mind.
2. It will enlarge your vocabulary.
3. It will assist and stimulate you in the writing of themes and essays.
4. It will aid you in letter-writing.
5. Where a single word will not express your meaning, it will give you just the phrase or quotation and the author cited.
6. It is rich in *slang* and *cant* expressions.
7. It gives Americanisms colloquialisms, and newly accepted words.
8. It contains information you cannot find in any dictionary.
9. The purist and the scholar who seeks the finer shades of language will find the expression which exactly fits the need.
10. It is the most complete, scientific and accurate work of its kind in existence.

"A necessary part of the reference equipment of every writer in English."—BOSTON TRANSCRIPT.

Thomas Y. Crowell Co.

New York

year, a net gain for the year of 7868. The Library has once again outgrown its quarters and must soon have a more extensive lodging if it is to continue to expand at anything approximating its present rate of growth.

ONTARIO

A table of Ontario towns giving population and claimable library rates under the old Act and under the Act of 1920 appears in the August issue of the *Ontario Library Review*, and goes far to show the superiority and fairness of the rate clause in the New Public Libraries Act over the old. Under the terms of the old Act very few libraries were in a position to give adequate service, and in the majority of cases anything approaching half-service was impossible. Under the new act the claimable rate may yield fifty cents per capita, but the people's representatives—the public library board—may ask for as much below the claimable rate as they wish

if it is not possible to expend the full amount wisely.

Study of the table shows the peculiar working of the old clause, which provided for a municipal levy of one-fourth to one-half a mill on the assessed valuation of the property, real or personal, of any municipality. Support is now based on the amount of library service necessary to the community. Under the old act, for instance, Walkerville with a population of 6,279 was entitled to \$3,279, while Collingwood with 7,262 population could claim only \$1,751, and Cornwall with 6,918 only \$1,269. Ottawa drew \$28,308 while Hamilton with a population almost exactly the same received \$23,279. Fort William could claim \$12,400, exactly twice the amount claimable by Kitchener, a town of the same population.

The new rate limit, fixed on a logical service basis, is declared to offer equal opportunity to all boards to give good service and the opportunity of meeting a good average demand.

LIBRARY OPPORTUNITIES

POSITIONS OFFERED

Wanted, head cataloger for a college library. Salary \$1700 to \$1800, according to the preparation and experience of the applicant. Address: W. W. Foote, librarian, State College of Washington, Pullman, Washington.

Wanted, a general assistant at the Olean Public Library, Olean, N. Y. Vacancy occurs March 21st. Applicants please state training and experience also desired salary. Maud D. Brooks, Librarian.

Assistants wanted in college library: 1. Chief of order department; 2. Assistant to take charge of agricultural department library. Salary for either about \$1500. Address T. L. 6, care of the LIBRARY JOURNAL.

Wanted, a cataloger and a reference librarian for a strong college library in the middle west. One of the positions available immediately. College education, two years library school training and sufficient experience to have demonstrated executive ability required. Good opportunities and salaries for the right persons. Address: X. M. 6, care of the LIBRARY JOURNAL.

POSITIONS WANTED

Wanted by a college woman with library school training and five years' experience in a special library, a position in New York City. Address: M. N. 6, care of the LIBRARY JOURNAL.

A university man, library school graduate and with fifteen years' experience in administra-

tion and reference work desires a position as librarian of a smaller college, public or business library or assistant librarian or reference librarian in a larger one. Address: T. H. 6, care of the LIBRARY JOURNAL.

College and library school graduate who has been for fifteen years librarian of a State University library will consider a change of position carrying a salary of about \$3000. Address: V. S. D., 6, care of the LIBRARY JOURNAL.

Librarian with ten years' public library experience, two years' cataloging work and reference work in a museum library, wishes a position as assistant cataloger in a special library or high school library in Brooklyn or downtown New York. Address: L. L. 6, care of the LIBRARY JOURNAL.

University and library school graduate with six years' experience as teacher and two as librarian desires library position for September where he can obtain a variety of experience leading toward an administrative position. Address P. N. J., care of the LIBRARY JOURNAL.

Educational work desired by young man of 21, with 7 years publishing, library, and bookstore experience including book production and distribution; printing; editorial work; research; cataloging, indexing, and filing; office practice; etc. Especially familiar with educational systems and service. Disengaged in April. Address: E. B. M. 6, care of the LIBRARY JOURNAL.

Introduction by F. W. JENKINS

Librarian of Russell Sage Foundation Library

Price, \$3.50 Net.

This cloth bound volume of 175 pages is a guide to the publications of 4,000 representative institutions and organizations. It contains a list of 250 magazines backed by ten years' experimentation and found to be constantly helpful. It contains much historical data relative to organizations now out of existence and others which have merged. It is arranged alphabetically and by subjects.

BALDWIN, Emma V., formerly secretary to the librarian of the Brooklyn (N. Y.) Public Library, is spending six months in organizing the Roanoke (Va.) Public Library.

BOWMAN, Frances E., 1910 Cert. C. P., formerly head of the children's department of the St. Louis Public Library, and librarian of the Yesler Branch of the Seattle Library, has joined the staff of the Library Association of Portland.

COWING, Agnes, has been engaged by the Book Committee on Children's Libraries in Belgium and France and at Home, and sailed for Brussels on March 5th for two months' work in the interest of the children's library opened there by this Committee last September.

MATTHEWS, Etta L., 1908 Syr., library assistant in the U. S. Forest Products Laboratory at Madison, Wis., appointed librarian of the Knoxville (Tenn.) High School Library, which is operated as a branch of the Lawson McGhee Library.

MILLER, Emily D., 1910-11 N. Y. S., appointed A. L. A. librarian in charge of the Public Service Hospitals in New Orleans, La.

MOORE, Annie Carroll, supervisor of work with children at the New York Public Library, sails for France on March 26th for the purpose of visiting and reporting, as a member of the A. L. A. Committee on Library Co-operation with Other Countries, on the children's libraries in France and Belgium.

PARROTT, Retta, author of "Library Windows," was wrongly reported as reference librarian of the San Francisco Public Library in our February 1st number. Miss Parrott has never been a member of this staff.

PROUTY, Gratia L., has joined the staff of the Western Electric Co's library instead of the Western Engineering Firm as reported in our February 15th number.

PALMER, Laura E., head of the Art Reference Department of the Pratt Institute Library, completes twenty-five years of continuous service in 1921. Miss Palmer, who is the eighth staff member of Pratt to complete a quarter century, will have a six months' leave of absence in recognition of the anniversary.

ROCCE, Marie, of the Long Beach (Calif.) Public Library, appointed librarian of the Montavilla Branch of the Library Association of Portland, to fill the vacancy left by Madeline Scanlan, transferred to the central library.

ROSS, Evelyn, children's librarian at the Albina Branch in Portland, Ore., appointed librarian of this branch in December.

ROSS, Mrs. Ora Thompson, vice-president of the Rensselaer (Ind.) Public Library, has been appointed secretary of the Trustees Section of the A. L. A. to fill the vacancy created by the resignation of Thomas L. Montgomery.

SWANWICK, Mary Brice, for seventeen years librarian of the Joplin (Mo.) Public Library, died in January after a brief illness from heart disease.

ZACHERT, Adeline B., has completed her work of organizing children's libraries in the Virgin Islands and is now at work as director of school libraries for the state of Pennsylvania, with headquarters at the State Normal School, Bloomsburg. An account of the opening of the first library organized by Miss Zachert appeared in our February 1st number, and two other libraries were opened before Miss Zachert left the Islands.

This year many members of the Reference Department staff of the New York Public Library complete their twenty-fifth year of service. These are Harry Miller Lydenberg, Axel Moth, George Fraser Black, Maria V. Leavitt, Madeleine S. Thompson, Bertha Eger, Helen R. Trowbridge and Christothea Leffingwell. C. H. A. Bjerregaard is in his forty-second year of service; Frank Weitenkampf completes his fortieth year this month; Lewis S. Judd joined the staff in 1884; Wilberforce Eames, Victor Hugo Paltzits in 1888, William Elliot in 1892; I. Ferris Lockwood and Richard E. Helbig in 1893; and John Elliot in 1894.

SCRIBNER'S LIBRARY DEPARTMENT

Offers to all libraries, large or small

- I Expert and efficient service, the result of years' experience.
- II The largest discounts on the books of all publishers.

Place your orders in our hands

They will be filled accurately as to title and edition, obscure and out-of-print books collected from all over the world, English titles imported duty-free, and all shorts reported on at time of shipment. Continuations will be forwarded without reminder, and out-of-stock and not-yet-published items supplied when procurable. All this without troubling you!

We relieve you of all detail and unnecessary expense

CHARLES SCRIBNER'S SONS,**597 Fifth Avenue, N. Y. City**

LIBRARY WORK

CIRCULAR ROTATING CARRIER FOR CARDS

THE apparatus illustrated below has been devised by D. T. B. Wood of the British Museum to relieve library patrons of "the painful and grotesque attitudes inflicted upon the users of Card Catalogs by the persons who devise and supply, but do not suffer the agonies of working them," and is described by the inventor in the January issue of the *Library World* as follows: "The circle as represented in the illustration is designed for cards 5" x 3", but it could, of course, be easily adapted for cards of any size. It is of a diameter of about 36" over all, and carries about 7000 cards, that is, each of the six sections into which it is divided carries the contents of an 18-inch drawer.

"The cards are pinned by rods or wires passing thru a cut similar to that employed for the 'Duplex' rod. All or any of the cards are released instantaneously and instantaneously reattached by a touch at the side, the hand which lifts the card out being thus adjacent to that which releases, a great gain in convenience over release at the end as in drawers. The circle is

divided into six sections by fixed ends set radially, which are thus at an angle with one another of 60°. The curved floor and the ends set at an angle with one another produce automatically a fall of the cards which admits of seeing the whole card inspected without any of the usual pushing; and the cards fall over at a touch.

"The circle rotates towards the observer, and the cards, as it rotates, slip gently towards the nearer end of each section. The space at the opposite end of the section is automatically filled up; and the cards are kept packed together and hang in one solid block as they pass to the lowest position. This makes them hang on the

wires with perfect security; and their immobility guarantees them against anything but infinitesimal wear."

The circles would presumably be arranged in a row in a cupboard or under a table, with slides to expose the topmost section of each circle. A striking installation tho one not likely to be often used is: "In an ordinary knee-hole table, it is possible to install at least two, perhaps three, of these circles on either side of the writer under the table, and two at least, perhaps three, at right angles to the first-named to the right hand and left hand of the writer. This would enable him, at almost exactly the same distance from his hand and eye, without moving from his chair, to deal with at least 56,000 and perhaps 84,000 cards, a number which cannot be even distantly approached by any other means."

Objection to the circular method are answered in order. It permanently occupies about twice the space of the corresponding drawers when closed,—but provision has to be made in any case for the space temporarily occupied by the open drawers. "The time in rotation is too long,"—not necessarily, as the speed of rotation is a matter of construction and control of motion, by ball-bearings and a gear, for example. The expense need not be larger than for wooden drawers, as this apparatus is specially suited to quantity construction in metal.

CO-ORDINATION OF TECHNICAL ABSTRACTS

CLOSER and more uniform surveying of current literature in the field of engineering is suggested by A. B. Eason in an article reprinted by *Special Libraries* for December from *The Electrician*, London, of October 22, 1920. Including abstracts resuscitated since the end of the war, eleven bibliographies and abstracts of technical literature are now being published. These are: (1) *Revue de l'Ingénieur et Index Technique*; (2) *Technische Zeitschriftenschau*; (3) *Revue Générale de l'Electricité*; (4) *Les Fiches Industrielles*; (5) *Technical Review*; (6) *Institution of Civil Engineers' Abstracts*; (7) *Science Abstracts*; (8) *Industrial Arts Index*; (9) *Engineering Index*; (10) *Journal of the Society of Chemical Industry*; (11) *Engineering Management* (Cassier's Abstracts). None of these cover the field completely, some paying little attention to journals of a more popular type, while on the other hand many references are repeated, appearing under varying subject headings.

The **GREAT BOOKS and**
The
GREAT EVENTS

are reviewed and interpreted week by week in the

Manchester Guardian
Weekly

the foremost international journal of the English-speaking world.

The Manchester Guardian maintains its own special correspondents in the principal capitals of the world, thus ensuring fresh, direct, and uncolored reports of events and movements.

The broad, sane, and authoritative character of its editorial comment has made the Manchester Guardian the most frequently quoted English newspaper.

It contains weekly articles on Music, Art, and the Drama, and reviews of the significant English books by expert authorities.

The Manchester Guardian SURVEY OF THE FOREIGN PRESS is a unique summary of what other nations are thinking. It is invaluable for educated American citizens.

Address

.....

To prevent this undesirable duplication and to insure uniformity of treatment Mr. Eason proposes to: (a) Divide up the field among the various technical indexes, and increase the number of journals to be surveyed; (b) index abstracts definitely under subjects, using the Dewey system if desirable; and (c) abstract articles of the "résumé of progress" type, which do not appeal to some abstract makers, as not being directly the report of original work.

In the absence of a central building and central library for the engineering societies of

London similar to that of the United Engineering Societies of New York, the writer also recommends the formation of a union catalog in the form of a card index listing all books in the various science libraries in London which are available for the use of engineers and students. Copies of the catalog might be housed in the Patents Office Library, the Library of the Imperial College of Science, the British Museum, and the Institution of Civil Engineers, and would direct the inquirer to the nearest library possessing the book of which he is in quest.

BIBLIOGRAPHICAL NOTES

A new and thoroly revised edition of John Cotton Dana's "Library Primer" has been published by the Library Bureau.

"Training for Librarianship," by J. H. Friedel, librarian of the National Industrial Conference Board and formerly editor of *Special Libraries*, has been issued in their Training Series by the J. B. Lippincott Co.

The Library of Congress has published a reprint of its list of publications issued by the Library since 1897 with the exception of certain administrative publications now obsolete and others out of print. The topics covered are Administrative (including Classification schedules), Copy, Texts, Catalogs and Lists, Bibliographies, Co-operative Undertakings, and Miscellaneous. The Library will be glad to co-operate with the college or school librarian in supplying in particular such of the reference lists on political science and economics as are fitted to the expressed need and available for distribution.

"Standard Library Organization and Equipment for Secondary Schools," being the report of the Committee of the National Education Association on Library Organization and Equipment by C. C. Certain of the Cass Technical High School, Detroit, Mich., which was published by both the N. E. A. and the A. L. A., has now been re-issued with certain minor changes and additions, which should increase its effectiveness for local use, by the New York State Library as Library School Bulletin 45.

The second revised edition of "Material on Geography Which May Be Obtained Free or at Small Cost," by Mary Josephine Booth, librarian of the Eastern Illinois State Normal School, is issued by the School as its *Bulletin* No. 69. There are 112 pages of classified entries, in-

cluding photographs, lantern slides, moving pictures, etc., and a list of addresses from which these and the other material listed may be obtained. These bulletins are sent free of charge to librarians and teachers upon application to the State Normal School at Charleston, Ill.

In view of the number of calls which come to libraries in the pre-vacation months for travel literature, particularly information concerning the national parks, libraries generally will be glad to know that they can obtain a handsome, illustrated booklet describing Rainier National Park and its great mountain from the Rainier National Park Company, Tacoma, Wash., the company to which the federal government has granted all park concessions.

This booklet is particularly useful by reason of the fact that the federal government has ceased to print in quantity sufficient for general distribution to the public the admirable pamphlets formerly issued about the park.

J. B. K.

At the request of the Dean of the College of Teachers, the Cincinnati Public Library has printed a leaflet telling "What a Teacher Should Know about the Public Library." Having discussed the resources of the library and the arrangement of the various departments, the leaflet concludes with eight points to "Remember Especially," including a reminder that boys and girls are not capable of using all the material in the library, and that therefore it is better for the teacher to investigate the material available before sending the class and "that the library has a course of instruction in the use of the library and will be glad to give your class a lesson." Between 300 and 400 classes visited the library for such lessons in 1919-20.

THE METROPOLITAN MUSEUM
OF ART
NEW YORK

THE VERMEER
COLOUR PRINTS

REPRODUCTIONS OF FOUR
IMPORTANT PAINTINGS
IN THE MUSEUM

1. YOUNG WOMAN OPENING A CASEMENT
BY JOHANNES VERMEER OF DELFT

\$1.50 net

PRESS NOTICES.

CHRISTIAN WORLD—This is a timely, impersonal, dispassionate, analytical unanswerable discussion of the weaknesses and inconsistencies of the Christian Science Church. It overflows with facts which provide the ground-work of the author's incisive argument . . . and is as clear as sunshine and as irrefutable as the decalogue.

THE EVANGELICAL MESSENGER—The spirit in which his exposures of inconsistencies in the organization are made is very commendable, and adds merit and pungency to his arguments and forceful statements. It is the only book of its kind on the market as far as we have any knowledge.

THE OPEN ROUND TABLE

INFORMATION WANTED

To the Editor of the LIBRARY JOURNAL:

If any library has had experience in providing annually for valuation purposes an estimate on the appreciation and depreciation of its book collection, we would welcome information concerning the methods used in determining these things.

One library reports without recommending its method that one-half of one percent of the estimated value of the whole collection is deducted on the first of the current year, subtracting also the discarded books valued at twenty-five cents each. To this is added the amount spent on books the current year and one thousand dollars a year for binding.

We would also be glad to receive detailed information concerning any successful efforts that libraries have made to have school boards help the library by assisting in the purchase of books to be used in the collections sent by the library into the city schools.

I shall be glad to compile any information sent me on this subject and to give it out to others interested in the columns of the LIBRARY JOURNAL at a later date should I succeed in obtaining a number of replies.

JOHN B. KAISER, *Librarian*.
Tacoma (Wash.) Public Library.

REQUIRED COURSES IN LIBRARY SCIENCE

To the Editor of the LIBRARY JOURNAL:

In response to my letter on this subject published in the LIBRARY JOURNAL January 15th, I have received letters from Mr. W. W. Foote, Librarian of the State College of Washington and from Mr. Arthur B. Smith, Librarian of the Kansas State Agricultural College in regard to courses required in these two institutions. The former has a one-half hour course given each semester, required of all freshmen; the latter is a one hour course given each semester, required of all freshmen.

W. DAWSON JOHNSTON, *Librarian*.

THE THIRD REVISED EDITION READY MAY 1

To give practical aid to business people in the selection of business reading, distribute

BOOKS ON BUSINESS

A concise guide to the attractive business books of all publishers, with brief descriptive record of the recent books of 1920, and the books published this spring. Supplementary lists of exceptional books of earlier publication found valuable to special lines of business activity. An envelope enclosure booklist of 52 pages—with striking cover design and carrying your library imprint on the front cover. A special index to subheads, index to authors and Contents page make this booklet a good reference tool.

For Library Advertising

This booklet is designed to provide libraries with a booklist at such slight cost and in such convenient form that it can be easily and cheaply distributed to business people looking for information. It has been carefully edited in the office of the *Publishers' Weekly*.

Ready May 1. Your order can be filled only if secured in advance.

Reduction in Prices

Owing to better labor conditions, a slight decrease in the cost of raw materials and the installation of improved machinery, we are able to announce a reduction in prices on the following supplies: All pamphlet and magazine binders, book cards, book pockets, book marks, mounting papers, posters, and many other items.

This does not necessarily mean that all prices will be as low as those quoted in our No. 23 Catalog of Library Supplies issued in June, 1920, but there will be a substantial downward revision from the "increase in price" sheet which went into effect last October.

All orders will be entered at the reduced rate.

GAYLORD BROS., SYRACUSE, N. Y.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

CHICAGO BRANCH LIBRARY, CRAWFORD AVE. & WEST
MONROE STS., CHICAGO, ILL.

This library is equipped with the SNEAD STANDARD STACK and "Open Bar" adjustable shelves.

The metal bookstack equipment consists of a two tier stack with marble deck floor, placed in a stack room 30' x 72' in the first floor and a number of bookstacks in two reading rooms in the second floor.

This view shows the stacks in one of the Reading Rooms equipped with solid panelled ends, cornice cover plates and moulded bases, conforming in every detail with the architectural features of the room.

For years Snead products have been the preferred equipment for both large and small libraries.

Their adaptability to expansion, their unequalled compactness, and their scientific construction throughout insure perfect satisfaction and ultimate economy.

Detailed plans and description of the above, and many other notable library buildings are found in our publication "Library Planning, Bookstacks and Shelving" which also contains valuable technical articles on the planning and construction of libraries.

High School Library Book Selection

A Study Made by a Science Teacher

By EARL R. GLENN

The Lincoln School of Teachers College, Columbia University, New York.

Conclusion

III. (Con.) COMPARISON OF PAST AND PRESENT PRACTICE IN BOOK SELECTION

Figure 5 shows the distribution for the large high schools in 1913-1914. The general distribution here is the same as for schools of medium and small enrollment. Figures 5 and 6 should be compared. Figure 6 gives the median values for 37 of the best high school libraries in the United States for the year 1919-1920. We have every reason to believe that this graph represents about the best practice in vogue in book selection in the large high schools. The "ideal distribution" is made up from the estimates of the librarians in the large schools.

Figure 7 is added here to show the facts for a typical school of large enrollment.

IV. GENERAL SUMMARY

1. Recent progress in the development of the high school library is indicated.
 - (a) By the publication of a report on standardization of equipment and organization.
 - (b) By state aid.
 - (c) By co-operation of teachers, executives, and state high school inspectors.
 - (d) By the establishment of branch high school libraries.
2. This study shows graphically the distribution of high school reference books by sub-

FIG 5. NUMBER OF REFERENCE BOOKS FOR LARGE SCHOOLS (1913-1914)

FIG 6. NUMBER OF REFERENCE BOOKS IN LARGE SCHOOLS 1919-1920

jects for 1000 high schools for 1913-14 and 100 selected schools for 1919-20. By means of these graphs a school of any size may study its own practice in book selection and discover its errors of omission and commission.

3. Lantern slides of any or all of these graphs may be secured from the author. Duplicates of the graph paper which has been designed for this study may also be secured.

4. A well selected high school library is not the result of chance. The aggressive interest of some departments and the indifference of others result in an unbalanced collection.

5. The reports from approximately 1000 high schools in fifteen north central states in 1913-1914 show that the great majority (over 70 per cent in the median library) of references in the library are listed under English and history. Neither the size of the school, the community, the type of school, the number of units of work offered, nor any other important factor seems to have influenced the distribution of references by subjects in any of these fifteen states.

6. Unless some comprehensive plan of book selection for all subjects can be put into operation the five-year plan proposed by the Library Committee in the report mentioned above will not greatly benefit the subjects most in need of help.

7. The actual number of science references for 1100 different schools may be listed as follows:

Enrollment Pupils	Science References (Median) Reported for 1913-1914	Report 1919-1920 Actual Number (Median)	"Ideal" Number (Median)	Conservative Estimate of References Required to Fulfill Five-Year Program of N. E. A. Committee (to per cent of total for science).
1-100	52	219*	No report	100
101-200	68	80*	250*	200
201-300	71	252*	239*	300
301-500	82	155*	545*	400
501-1000	128	237	845	600
1000 and above	219	426	990	1000

* Typical report from a school of this size.

8. Standard book-lists issued for high schools show great difference of opinion in the number of titles for certain subjects.

9. Detailed reports received from librarians of 100 selected schools for the year 1919-20 have been studied in comparison with the reports of 1000 schools for 1913-14.

10. High schools in charge of librarians show a more equitable distribution of reference books. There is a great variation in opinion as to the proper distribution for a school of a given type. Some librarians use the policy of—"to him that hath shall be given," others assume that all departments should be adequately represented even in the face of indifferent teachers.

11. In many instances there is a large unexplained difference between enrollment in the subject and references for the same subjects in the best schools. The graphical methods used in

FIG 7. REFERENCE BOOKS IN A TYPICAL SCHOOL OF LARGE ENROLLMENT 1919-1920

this study show, at a glance, the condition of the school enrollment and library.

V. SOME CONSTRUCTIVE SUGGESTIONS

In discussing plans for the improvement of the public school library, we need to keep in mind certain important facts relating to the country as a whole. A few statistics (Fig. 8) for 1917-18 are given below:

1. There are 10,638 four-year high schools.
2. Secondary schools enroll 1,645,171 pupils, the enrollment having increased 710 per cent since 1890.
3. One-half of the high schools do not enroll over 50 pupils.
4. Three-fourths of the high schools do not enroll over 100 pupils.
5. Of approximately 300 pupils who enter high school,
 - (a) about 225 reach the second year,
 - (b) about 160 reach the third year,
 - (c) about 140 reach the fourth year, and
 - (d) about 130 graduate.
6. The average high school library for fully accredited (by state schools) high schools contains 1,047 volumes.
7. The average city high school (population 5000 and above) library contains 1,980 volumes.
8. The average village high school library (population 2,500 to 4,999) contains 1000 volumes.

9. The average rural high school has a library of 524 volumes.

(a) We need an up-to-date book-list of about 1000 volumes. This would serve as a guide for three-fourths of the high schools of the nation. These subjects lists should be made out with great care and thought by representative sub-committees appointed by the various organizations of teachers and checked by progressive teachers all over the country. These lists should be assembled and apportioned upon some reasonable basis of enrollment per subject and arranged in usable form by a committee of librarians and teachers. Standing committees on reference books by subjects should send in suggestions for revision each year. All of these details should be in charge of the U. S. Bureau of Education.

(b) A second list of 4000 to 6000 volumes is needed for schools of medium and large size. This list would be prepared in the manner suggested above. Apparently, there is great need also for lists of suggestions to show departments how to use a library. Graphical forms for exhibiting library facts for the benefit of pupils, teachers, and principals should be included in these book-lists.

* Mississippi Valley Historical Assn., Standardizing library work and library equipment for history in secondary schools, *School Review*, (February 1921) vol. 29, p. 135. This article is worthy of careful study by all who are interested to eliminate chance and guesswork in book selection.

 "STATISTICS OF PUBLIC HIGH SCHOOLS."
 U. S. BUREAU OF EDUCATION. *Bulletin*, 1920,
 NO. 19

It is our opinion that in order to provide adequately for such subjects as industrial arts, foreign language, domestic arts, business, drawing, fine arts, music, physical training, and other subjects, it will be necessary to reduce the percentage of English and history books from the high value shown in this study to a much lower figure.

Much money can be saved, especially for small schools, and the cause of science teaching promoted, if teachers and librarians will use the bulletins issued by state and national government. Some idea of the amount of printing done by the United States Government can be obtained from the fact that about 12½ tons of

type metal are used and remelted daily in the printing bureau. Many trade catalogues can be obtained free of charge for the library. Several science lists are added for the use of those who may be interested.

- Merchant Marine Library Association**
- A MEETING was held in the offices of the American Ship Owners Association, New York City, on March 9th, to consider the re-opening of the library service to the American Merchant Marine. The arrangements for the meeting were made by Mrs. Henry Howard of Cleveland, who was authorized by the Executive Board in December to act for the A. L. A. in this matter.
- The meeting was attended by the following persons representing the shipping interests and the A. L. A.: Mrs. Henry Howard, C. Van Rensselaer, Winthrop L. Marvin, Alfred Gilbert Smith, G. C. Wagener, Jr., Charles H. Mallory, Capt. Eugene E. O'Donnell, Clark H. Hebner, Rev. A. R. Mansfield, Mabel M. Barkley, Alice S. Tyler, H. H. B. Meyer, F. F. Hopper, J. I. Wyer, Jr., Harrison W. Craver, C. C. Williamson and Carl H. Milam.
- The preliminary steps were taken for the incorporation of an organization which will be known as the American Merchant Marine Library Association. An Organization Committee was appointed consisting of the following persons: Winthrop L. Marvin, Mrs. Henry Howard, Rev. A. R. Mansfield, Alfred Gilbert Smith.

A. L. A. Hospital Service

By CAROLINE WEBSTER

THE library service for disabled soldiers, sailors and marines in Public Health Service and contract hospitals is being continued for the present by the American Library Association.

There are 15,263 ex-service men in Public Health Service Hospitals, and 10,164 in civilian or contract hospitals—total, 25,887. The number of men in these hospitals is increasing at the rate of one thousand a month.

During 1920 the American Library Association expended in these hospitals, for books about \$15,000, for magazines about \$9,300, and for everything else \$62,311.72.

PERSONNEL

There are now (March, 1921) nineteen librarians and five assistants in the service. Several of the librarians act in the dual capacity of librarian and supervisor. This is true of Miss Caroline Jones, acting librarian at Fox Hills, Staten Island, who keeps in touch with the library needs of the contract and Public Health hospitals in New York City and State; of Miss Elizabeth Pomeroy, librarian at the U. S. Public Health Hospital No. 30 at Chicago, who supervises the work in Chicago, Ill., Waukesha, Wis., and Dwight, Ill., and of Miss Louise Singley, who, in addition to her work as librarian at Fort Bayard, N. M., a tubercular hospital of 1000 beds, supervises the work at Fort Stanton, N. M., Whipple Barracks, and Tuscan, Ariz. Mrs. Nellie K. Gravett, librarian at the Palo Alto Hospital, visits the library at the San Francisco Marine Hospital and lends books from her collection for the use of the ex-soldiers who are there. Miss Valeria Easton, librarian at the U. S. P. H. S. Hospital No. 45 at Biltmore, N. C., organized the work at Oteen, N. C., in addition to her regular work, and Miss Carrie Williams, the librarian at the Parker Hill Hospital in Boston, visits other Public Health Service Hospitals in and near Boston.

Too much cannot be said of the spirit with which the librarians have worked. The difficulties which they have encountered have been many. They have had to make a place for themselves as there was no provision in the hospital organization for a library or a librarian. It has been the librarians who have convinced

the doctors and nurses that a well-run library is an essential part of a well-administered modern hospital. The medical officers in command have learned that a noisy Red Cross House is not the place for a library, that this is at best merely a makeshift, and if adequate library work is to be rendered a separate room must be furnished where the men may have quiet for reading and study. To the librarian the supervision of the library room has been only a small part of hospital work—the ward visiting is what makes it distinctive and interesting, but likewise exhausting. Many of the Public Health Service Hospitals are the old army hospitals, large barn-like structures covering acres of ground, and in many instances the corridors connecting the various wards are miles in length. At the hospital at Fox Hills, Staten Island, for instance, the corridors are three and one-half miles long, and it takes the librarian one week to visit the entire hospital, if she visits seven wards a day.

BOOK COLLECTIONS

The wear, tear and loss of books in these hospitals has been tremendous. In most cases there has been only one librarian to organize and administer the library, do the war visiting, and follow up the missing books, so that it has been difficult to keep satisfactory records. The reports filed by the librarians November first showed that there were 45,000 volumes in the hospitals where we had representatives. A conservative estimate of the books in other hospitals would be 15,000. Owing to the shortage of A. L. A. War Service funds during the latter part of 1920, practically no books or periodicals were ordered for any of the hospitals after July 1st, 1920. The work has been carried on with books already in the hospitals. The hospitals at Fox Hills, Staten Island, and Oteen, N. C., which were opened on October 15th and November 15th, respectively, were stocked with books from the New York Dispatch Office.

CO-OPERATION WITH PUBLIC LIBRARIES

The effectiveness of the hospital service has been very much enhanced by the whole-hearted co-operation of the public libraries thruout the country.

In Houston, Texas, the librarian of the Public Library has taken an active part in the administration of the hospital library and in November when it appeared that the American Library Association might discontinue its work the librarian wrote: "I am feeling somewhat reassured about the work here. Miss Ideson and Mr. Masterson, one of the trustees of the City Library, feel that closing the library is not to be considered, and that when the American Library Association must cease to function the City must assume the expense of the library until the Government takes it over."

At Camp Kearney, Calif., which is to be one of the largest tubercular hospitals in the country, the librarian of the San Diego Public Library installed the library in the Red Cross House, with books furnished by the American Library Association.

Miss Louise Sweet, the hospital librarian at New Haven, Conn., writes in her report for January: "The New Haven Public Library is on all occasions a generous and practical friend of the hospital, making and displaying effective posters requesting books and magazines for the hospital, and lending its own books with the utmost freedom, and for long periods."

Not strictly library co-operation, and yet the sort which makes for friendliness and good feeling was that shown by Miss Cornelia Marvin, librarian of the Oregon State Library, who interested the Salem War Mothers and the American Legion of Salem, Ore., in sending Christmas presents of jams to the boys in the Fort Bayard Hospital.

The librarians of the public libraries of Cleveland, Detroit, Evansville and Pittsburgh have sent assistants from time to time to small Public Health Service Hospitals in their cities to distribute books and magazines sent by the A. L. A., and to take books from their own libraries, in response to demands on the part of patients and staff.

Practically all the libraries and library commissions when called upon have been most liberal with loans to the hospitals.

CO-OPERATION WITH OTHER AGENCIES

The library co-operation was to be expected, but the co-operation with other agencies has been equally disinterested and generous. The Public Health Service authorities have done everything in their power to make library work in the hospitals a success. Where space permitted they have given a separate room or ward

for the library, have put in shelving, decorated the room, detailed orderlies to take care of the room, and have furnished all small library supplies, thereby relieving the Association of this expense.

The Red Cross has stood by us in this work as in all our hospital experience. In November, when it appeared that the work must be abandoned because of the lack of A. L. A. War funds to continue it, Miss Ruth Emerson, in charge of the Bureau of Medical Social Service of the American Red Cross, said: "This is one of the most important parts of the medical social service; it must be continued."—and it was upon her very earnest recommendation that the Red Cross took over the salaries of the hospital department in December. (The money covering this item has since been returned to the Red Cross.)

The Red Cross also sent word to a number of the hospitals asking their workers to get from the men statements concerning the value of the work, and what it would mean if this work was discontinued. There were literally hundreds of letters sent in by the men, many of them pathetic, some humorous. One patient at the hospital in Greenville, S. C., wrote: "The thought that the library could be taken away from us comes as a bolt from a clear sky—clear in that our sole source of necessary contentment, the library, has helped so materially to shorten otherwise endless hours of waiting—waiting for what? Would you deny us such relief? Please do not."

Another patient wrote: "Let the Red Cross and the Liberty Drivers go if they want to, but I've been in hospitals for two years and nine months and I can't get along without the library."

Another: "This being a tuberculosis hospital, dissatisfaction and discontent are the elements upon which tubercle bacilli feed. We have fought to save the world for Democracy. We have contributed our dollars for the starving children of the war-torn Old World. We are now pleading to save our library to us. And, as the former will be saved, so in the name of common sense, please save the latter."

TRANSFER OF THE SERVICE

The Committee on the transfer of the service has been at work. Altho the Surgeon-General of the Public Health Service had assured the committee in the late summer of his entire willingness and expectation to take over the service,

he was unable, at the last moment to procure the approval of the Secretary of the Treasury, who was of the opinion that Congressional action was necessary before funds could be expended for this purpose. This approval was secured at the last session of Congress when an item was included in the Sundry Civil Bill which provides not exceeding \$100,000 for library books, magazines and papers, and library service, for beneficiaries of the Bureau of War Risk Insurance. This will be available July 1st.

The details of the transfer of the service have not been agreed upon. If the work is therapeutic it belongs to the Public Health Service, if educational, to the Vocational Board. Fortunately, the doctors consider it therapeutic, and the teachers educational, so one or the other or both departments may continue it as all beneficiaries of the War Risk Insurance are considered in the clause making the appropriation.

"A Union List of Periodicals and Annuals" taken by eleven representative special libraries in Boston, as of March, 1921, has been prepared by the Special Libraries Association of Boston, and may be obtained from the Secretary, Miss Leslie R. French, librarian to the Abertham Construction Company, at 27 School Street.

The libraries co-operating are: The American Academy of Arts and Sciences; the Boston Elevated Railway Co.; the Insurance Library Association of Boston; Arthur D. Little, Inc.; Lockwood Green & Co.; the Old Colony Trust Co.; the Social Law Library; the Social Service Library; Stone and Webster; Women's Educational and Industrial Union; and *Youth's Companion*.

"The Association will be glad to receive suggestions for the improvement of the union list; also corrections and additions needed to keep it up to date" with the intention of carrying the work further if possible.

A Folding Book Case

BELOW is a picture of a serviceable type of book case in use at one of the deposit stations of the Rochester Public Library located in the factory of the Taylor Instrument Company of Rochester. You have perhaps heard of folding beds. This is a folding book case. It is like an ordinary book case with doors except that there are shelves on the inside of the doors.

The one here shown is about seven feet high and five feet wide. When open it is double this width. The hinges are specially strong so as to carry the weight of the books. It is made of ordinary pine wood and painted on the outside to match the woodwork of the room. It stands at the entrance to the lunch room of the factory, so that all employees who eat there have to pass close to it going in and coming out.

The advantage of this type of case is that it enables the librarian in just a few seconds to unlock it, swing the doors back and display for examination books which are on deposit there. At the close of the lunch hour it takes only a few seconds to close the case and lock it. As the librarian is an employee of the factory, this time element is important.

This factory when operating at full capacity employs about nine hundred people. Last year our deposit station of 383 books there circulated 4,936 volumes.

WILLIAM F. YUST.

THE BOOK CASE AS READY FOR USE

Los Angeles Public Library 1872-1920

ADOPTING Byron's lines from "The Corsair," the Los Angeles Public Library invites its readers to "survey our empire—and behold our home!" The empire covers not only the city but Greater Los Angeles, extending from Port Los Angeles at San Pedro to Owensmouth, fifty miles distant. "It includes residence sections of comfortable homes; many neighborhoods of mixed racial groups, Italian, Mexican, Armenian, Russian, Yiddish; industrial centers, ranging from great shipyards, railroad plants, iron works, and oil wells to crowded city streets of factories and shops; suburban subdivisions; and scattered ranching settlements. Even the Japanese fishing village at San Pedro has its collection of Japanese books and magazines, supplied by the Public Library." The home is as constricted as the empire is wide. "The Los Angeles Public Library is today, after nearly half a century of constructive educational work and remarkable growth, the only library of importance in the United States which has never had a central building of its own or has no such building in actual prospect." The central collection of 210,000 volumes is housed and arranged on four floors of an office building, which also contain all the departments of the library and a library school. From the Loan Department on the eighth floor more than a million volumes are circulated yearly. In spite of the most careful adjustment these quarters are inadequate for the demands made on them, and the increasing yearly rental proves to be a heavy tax on the library budget. The branch libraries fare better in eight Carnegie buildings of distinctive architecture.

The organization of what is now the Los Angeles Public Library was effected in 1872, when the City was little more than "a rambling village, centering at the plaza, mingling low adobe buildings with frame structures of the box-like, high-stooped type of the late sixties, interspersed with a few 'business blocks' and churches, with the coming of the railroad still a matter of great local pride and interest, and with the atmosphere of the old Spanish days not yet displaced by the full current of American energy." On December 7, 1872, a mass-meeting was held at the Merced Theatre to consider the need of a library, and the Los Angeles Library Association was founded, with sixty-six vice-

presidents. The library was established in four small, dark rooms of the old Downey block on Temple and Spring streets, where the Federal Building now stands. An enabling act passed by the Legislature in 1874 provided for a small public appropriation thru taxation, but subscription charges and funds raised by benefit entertainments were the main support of the library for more than a decade. Under the terms of a new city charter the library, then containing some 6,000 volumes and with a subscription list of 132 members, moved in July, 1889, to quarters in the City Hall and was for the first time granted a reasonable city appropriation. At the same time the appointment of Tessa L. Kelso initiated a vigorous and able administration. In 1891 the library was made entirely free to the public. By 1895 it had grown to 42,000 volumes, with a circulation of 329,000 volumes and a registration of 20,000 readers. In 1902 a new city charter was adopted, by which the library received an annual minimum appropriation of four cents on each hundred dollars of taxable property. The minimum was increased to five cents at the general city election of 1918.

In course of time the City Hall was outgrown, and in March, 1906, the library moved to the upper floor of the Homer Laughlin annex, a fireproof business building at Third and Hill streets, which was leased for three years at a rental of \$900 per month. Here it occupied four rooms of 120x40 feet, had storage facilities in the basement, and a roof-garden reading room. In two years it was obliged to seek larger quarters, and moved to the third floor of the Hamburger department store building at Broadway and Eighth Street, taking a five-year lease at \$18,000 a year. When these quarters in turn became overcrowded, and their suitable rearrangement or extension proved impracticable, better provision for the multiplying departments, enlarging collections and growing volume of public use of the library became imperative. Arrangements were made with the Metropolitan Building then in course of construction at Fifth street and Broadway to lease the three upper floors at a rental of \$22,000 a year. Changes while the building was under construction made it possible to give a height of two stories to the circulation department on the eighth floor, providing a mezzanine or gallery floor, and sky-

lights so that excellent lighting was assured. On June 1, 1914, the library was opened in the quarters which it still occupies. The working, administrative, and staff departments and the Library School are grouped on the seventh and tenth floors. The periodical reading-room, the children's department and the school and teachers' department are the only public departments on the seventh floor. All other public departments are brought together on the eighth floor, with its circulation divisions, its reference room and its special mezzanine departments, for all of which a single public entrance and exit are provided.

The library has had twelve librarians in its 48 years of existence. J. C. Littlefield, who was in charge of the rooms in the Downey block from December 1872 to January 1879, was followed by Patrick Connolly, who remained until June 1880. Mary Foy, later one of the leaders in the state suffrage campaign held the position until 1884, and was succeeded by Jessie Gavitt, who gave place in January 1889 to Lydia A. Prescott.

In April of the same year Tessa L. Kelso became librarian, and initiated a period of development that in six years made the Los Angeles library widely known thruout the country for the progressive and original features of its administration. In 1895 Miss Kelso was succeeded by Mrs. Clara B. Fowler, who served until June 1897, when Mrs. Harriet Child Wadleigh took charge until May 1900. Her successor, Mary L. Jones (New York State Library School) was the first librarian with special professional training, and became later librarian of Bryn Mawr College. Charles F. Lummis, historian and explorer of Spanish-America and the Southwest, was elected librarian in June 1905 and held office until March 31, 1910. Purd B. Wright, formerly librarian of the St. Joseph Public Library was appointed in 1910, and resigned on March 31, 1911, to become librarian of the Kansas City Free Public Library. He was succeeded on Sept. 6, 1911, by Everett R. Perry (New York State Library School), formerly of the New York Public Library.

Summer Courses in Library Science

NEW YORK STATE LIBRARY SCHOOL

IT has been decided to omit the regular six weeks' summer course for workers in the smaller public libraries in the State and to concentrate effort on the course for school librarians, which will be lengthened to six weeks and will be held from July 6 to August 13. Sabra W. Vought, state inspector of school libraries, will be in charge assisted by members of the faculty of the Library School, and others experienced in school library work. Tuition will be free to all teachers and school librarians of the State, but a fee of \$20 will be required of non-residents. Instruction will be given in simplified methods in the technical work especially adapted to the needs of school libraries. Emphasis will be placed on book selection and reference work, the latter to include both the study of reference books and methods of instructing children in their use as library tools.

To provide for librarians who may come from larger schools or who have taken the course at a previous session, two advanced courses will be given: one in reference work and one in cataloging. The reference course will consider books found in the larger high school libraries and others which the school librarian should

know how to use in the public library. The advanced course in cataloging will take up the making of a dictionary catalog and the assigning of subject headings.

Application for registration should be made at an early date. For full information address Sabra W. Vought, School Libraries Division, State Education Department, Albany, N. Y.

IOWA SUMMER SCHOOL FOR LIBRARY TRAINING

THE twentieth annual session of the Iowa Summer School for Library Training will open June 13 and extend as usual thru the first six weeks of the University of Iowa Summer Session. The course is fundamental in character and is planned as a co-ordinate whole which will be especially helpful to students who have neither time or means required for a longer course. Students are admitted to the Summer School for Library Training on the same terms as for other work in the Liberal Arts College, preference being given to those who hold library positions. The work continues under the directorship of Blanche Watts. Grace Shellenberger returns to the staff this year to give the course in Children's Literature. Instruction in Cataloging and Classification will

be given by Greta Smith, recently of the Portland, Oregon, Library.

A second Conference for Library Workers under the auspices of the Extension Division of the University is scheduled for the second week of July.

JANE E. ROBERTS, *Resident Director*.

UNIVERSITY OF WISCONSIN LIBRARY SCHOOL

THE twenty-sixth Summer Session is announced for June 27 to August 5, 1921. Two courses will be offered—one for librarians and assistants in Wisconsin public libraries and one for teacher-librarians. The latter course carrying six university credits is open to teachers holding a state certificate or license to teach in high schools and to junior and senior students in the University and colleges of the state preparing to qualify as teacher-librarians. Because of limited quarters preference will be given to those expecting to do library work in Wisconsin.

All correspondence regarding either course and requests for complete announcement should be addressed to Preceptor, Library School, 206 N. Carroll St., Madison, Wisconsin.

UNIVERSITY OF MISSOURI

THE fifth summer library school courses of the University of Missouri will be held in the six weeks beginning June 22nd and ending August 3rd.

The courses are: classification and cataloging, bibliography, library economy, library history, children's work, reference books, book selection.

Credit will be given in the School of Education of the University for courses satisfactorily completed. Students qualified to enter the University are eligible for entrance to the library school.

For a detailed announcement of the courses offered, write to: Henry O. Severance, librarian, University of Missouri, Columbia, Mo.

SIMMONS COLLEGE SCHOOL OF LIBRARY SCIENCE

THE usual summer session will be held July 5 to August 12. Three courses of three weeks each will be offered. Florence Blunt, of the School faculty, will give one in reference and library economy, July 25-August 12. From July 5-22 Miss Grace Hill, of the Kansas City

Public Library, will conduct the course in cataloging and classification, and Miss Alice Hazeltine, of St. Louis, will carry the course in library work for children.

The applicant must send with her application a written statement in regard to her position or appointment from the president of the board of trustees or the head librarian of the library with which she is connected, or from the school principal.

JUNE RICHARDSON DONNELLY, *Director*.

Pictures Wanted by the A. L. A.

Every few days the A. L. A. Headquarters staff has an opportunity to use good library pictures for exhibits and for reproduction in magazines. It is rarely possible to meet the need if we must collect the pictures after the request comes in. We ought, therefore, to have a file of pictures on hand at all times.

To make the picture interesting, there should be people in it; and if possible, the people should look "alive" and natural, not posed.

A good size is 8 x 6 inches, but good clear-cut pictures of any size, even kodak pictures, are acceptable. They should not be mounted.

Just now there is special need for more pictures on county libraries, and for pictures on the different kinds of library work which will illustrate librarianship as a vocation. Pictures illustrating children's work, work with foreign born, work in industrial plants, libraries in county schools, etc., are always interesting and will be sure to serve a purpose sometime.

Will you help the Headquarters staff to meet the demands for pictures by sending some from your library? The cost will not be burdensome for your library and it will be good publicity for your city.

CARL H. MILAM, *Secretary*.

FREE ON REQUEST

Copies of the Proceedings of the Medical Conference, held at the invitation of the Committee of Red Cross Societies at Cannes, France, April 1 to 11, 1919, are available for distribution and may be had by addressing the Librarian, American Red Cross, 17th and D Sts. N. W., Washington, D. C.

Copies of the "War Diary of the 354th Infantry, 89th Division" compiled by Lieutenant John F. McGrath may be secured of the compiler at 1377 East 57th St., Chicago, Ill. Postage charges of 35c. should be remitted.

Training in Librarianship*

THE title imposed upon this book by its inclusion in a "training series" does not accurately describe it. It is primarily a bird's-eye view of library work, a discussion of various types of libraries, their work and the special qualifications needed for success in their service. Practically every type of library in the United States is discussed or at least mentioned. Particular but not undue emphasis is placed on the different types of special libraries.

Only one chapter is devoted specifically to "training schools and agencies." This precludes any detailed discussion but a comprehensive chart supplies many details. This is perhaps the most inclusive and up-to-date summary available tho there are some omissions even here. The summary of the Washington School for Secretaries in this chart seems to overlook the course in Business Library Methods which Miss Louise B. Krause has for several years been conducting at the Riverside Library Service School. The statement that "short intensive courses are given in the summer," even in the few states mentioned on page 192, must be qualified.

No one is so likely to appreciate the rapid changes in library conditions as he who attempts to prepare an accurate comprehensive article on any phase of library work. Errors seem to be generated spontaneously and statements and statistics grow obsolete or misleading while the article is in press. This will explain some minor inaccuracies and some allusions to the Enlarged Program of the A. L. A.

* Friedel, J. H. *Training in Librarianship*. Phil.: J. B. Lippincott Co., 1921.

and certain of its war-time activities which are no longer part of the work of the Association. During the past six months, conditions in special and business libraries have also changed, at least temporarily, more than the text indicates.

Tho the book is necessarily sketchy there are so many interesting incidental details that the lack of an index is especially regrettable. The eight illustrations are interesting in their exhibit of contrasted conditions. The type is good in style and size. The paper and—at least in the copy at hand—the uneven press work unfortunately offset the legibility of the type and make the book hard to read in a poor light.

In an introductory note Mr. Carl H. Milam says: "Experienced librarians will find in this book some useful tabulations and lists and interesting discussions of various types of libraries. They will also (inevitably) find some expressions of opinion with which they do not agree."

Both statements are true. But there is not much danger of serious disagreement on any important point. The author is conscientiously constructive in viewpoint and treatment. He insists on special training as well as natural aptitude. His desire to advocate a professional attitude and a general method common to all librarians is evident.

The book is probably the best single treatment of the subject for the vocational adviser in high schools. It explores no new territory and reaches no new goal. It does go by a somewhat different route and for that reason it is a welcome addition to the literature of its subject.

FRANK K. WALTER.

Recruiting for Librarianship

A CONSTANTLY growing interest in librarianship as an attractive profession is being shown by college men and women. The following reading list will be of service to college librarians. By having the books and pamphlets assembled and easily accessible to students the busy librarian may further the work of the local vocational director, co-operate with the A. L. A. Committee on Recruiting for Library Service, and direct the individual student to a vocation of almost unlimited possibilities. Association of American Library Schools.

The library periodicals contain various articles on library training both inspirational and practical. *Papers and Proceedings* of the American Library Association should be consulted also. The *Encyclopedia Americana*, edition of 1919, vol. 17, p. 393-394 gives helpful information.

The circulars of the various library schools should be added to this selected list.

The New Library Primer

JUST as in the old story of the man's pocket knife, which with two new blades and a new handle still remained in his fond esteem the same dear old knife which had gladdened his boyish heart, so this new edition of the "small librarian's" *vade mecum* will continue to hold first place on the shelves of the "beginners, ambitious assistants and managers of small libraries" for whom it is specially designed, altho of the original edition very little remains except the author and title and the color of the binding! As Mr. Dana very frankly says in the preface to the present edition, he has "omitted all contributions from others, has rewritten or dropped nearly all of his own work, has added much, and thus has made an entirely new volume." There can be no doubt, with the book as with the pocket knife, that the thoro overhauling has resulted in an infinitely better tool for working purposes, under present-day conditions.

In the 1909 edition, for example, the chapter on "Rooms, building, fixtures, furniture" occupies but four and one-half pages, and the subject is covered. In the 1920 edition there are nearly twenty-four pages given to the same topics, and suggestive floor arrangements for rooms of different size and shape, as well as pictures of simple library furniture, illustrate the text. In much the same way all the other chapters in the older edition have been expanded and rearranged. Where the earlier edition gives less than two pages (including an illustration)

to the care of pamphlets, and advocates their filing in Library Bureau pamphlet boxes, the new edition devotes thirteen pages to the development of an information file from pamphlets, with instructions and illustrations telling how to arrange a vertical file for their care, or, if preferred, how to use the color band method. Similarly "Museums and Libraries" has grown from two paragraphs to three pages. Diagrams, sample forms, and reproductions of successful booklists and other publicity are freely used to illustrate the different chapters. New chapters cover the Library Workers' Association, special libraries, and county libraries, while a supplement gives lists of dealers in library supplies and equipment, books and articles on library laws, library schools and training classes, state and provincial library commissions, reference books and periodicals for a small library, things needed in library work, and a number of short bibliographies on allied subjects.

FLORENCE A. HUXLEY.

FREE ON REQUEST

The Bankers' Loan and Securities Co. of New Orleans, La., issued in 1916 four booklets on Cuba, dealing with "General Conditions, Government, etc.;" "Agriculture;" "Industries;" and "Investments."

The Company wishes to place these in libraries in which they can be useful.

Application for them should be made to the librarian, Howard Memorial Library, New Orleans.

Problem melodrama of the slums; from story by Frank L. Packard.
- YES OR NO.** First National. 6 reels. Star: Norma Talmadge.
Society romance; from novel by Charles B. Davis and play by Arthur Goodrich.

Frank Keller Walter, vice-director of the New York State Library School at Albany until 1919, has been appointed librarian of the University of Minnesota Library at Minneapolis, in succession to James Thayer Gerould.

Mr. Walter is a graduate of Haverford and has the M. L. S. of the New York State Library School. After spending some years teaching, part of the time at Haverford, Mr. Walter became reference assistant in the Brooklyn Public Library which work he gave up to become assistant to the Director of the New York State Library and, in 1908, on the appointment of James I. Wyer, Jr., as director of the Library School. He gave up this work to organize the Information Department of the General Motor Corporation at Detroit, but a general policy of retrenchment following business depression last year prevented the development of the service as originally planned and Mr. Walter left the Corporation. The good wishes of a large circle of friends go with him to his new work.

THE LIBRARY JOURNAL

TWICE-A-MONTH

APRIL 1, 1921

LIBRARY affairs have been much in the legislative eye, both Federal and state, for the past few weeks, and important measures proposed are about to go into effect. Of national interest is the passing of the Sundry Civil Appropriations Bill for the year beginning July 1st, which provides a sum of "\$100,000 for library books, magazines and papers for beneficiaries of the Bureau of War Risk Insurance." This provides for the continuance of the Hospital Library Service, the value of which has been ably demonstrated by the American Library Association. Whether this work is to be carried on by the Vocational Board or the Public Health Service has not yet been decided; but the fact that the former regards this work as educational and the latter as therapeutic speaks well for the good service rendered by the A. L. A. and augurs well for its future.

★ ★ ★ ★ ★ ★ ★

COUNTY library laws are among the high points of the measures passed by the Kansas and Missouri legislatures. The passing of the Missouri Bill brings to a happy end the long continued effort of the Missouri Library Association, which has introduced the county bill into each legislature since 1915. For a long time it seemed that this bill was to meet the same fate as the others, but vigorous support from librarians, from the State Teachers' Association, various chambers of commerce, many women's clubs and others, were finally successful in having the law passed on the last day of the session by a legislature which also did the state a good service in killing a bill designed to abolish the State Library Commission and merge it in a much mutilated form in the Education Department. Still another happy enactment of this legislature is the amendment of the St. Joseph city charter so as to increase the minimum which the Common Council must appropriate for the Public Library from four-tenths of a mill to eight-tenths of a mill. Due also to the persistent efforts of librarians and especially of the legislative Committee of the State Library Association and its able chairman, Willis H. Kerr, is the enactment of the Kansas County Library Law. While this measure provides for the service to

rural Kansas the passing of a library tax increase specifying one mill instead of one-half mill as the maximum levy for the library fund in cities of the second and third class will make possible better service to the town dwellers.

★ ★ ★ ★ ★ ★ ★

WHILE these laws are soon to become of active benefit to the library world, there are others to which librarians should lend hearty support. In Wisconsin and Illinois certification bills approved by the respective state library associations have been introduced. Before the Illinois legislators are also two revenue bills which would increase the tax levy for village, township and city public libraries, while in Rhode Island a bill for a state subsidy for library work and one for the certification of librarians are awaiting action. In Ohio a bill just introduced is designed to reorganize all the work of the state, making for greater concentration of authority in the hands of the Governor, and contains important sections relating to the State Library Board which look toward a more worthy state library service than Ohio has had, especially in recent years.

★ ★ ★ ★ ★ ★ ★

THE correlation of library courses as component parts of a formal course of instruction analogous to the plan by which units for a college degree may be obtained thru correspondence, extension, or summer school courses, is discussed editorially in the February *Journal of the Library Workers' Association*. "Could a plan be devised whereby library school courses could be standardized so that units of work in one would be recognized in another and so that experience in any subject that reached the library school standard would be accepted as credits by the library school? Could not summer school, correspondence and extension courses be developed along these lines? Could training classes be brought into line and awarded their proportionate value? Would not such an arrangement place a library school degree within reach of the ambitious worker, to the advancement of professional standards?" Discussion of this pertinent question is invited.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION SWAMPSCOTT CONFERENCE

THE A. L. A. will hold its forty-third annual conference at Swampscott, Mass., June 20-27, 1921.

The following Associations, Sections and other groups are expected to meet during the week: College and Reference Section, Trustees Section, Catalog Section, Children's Librarians Section, Professional Training Section, Agricultural Libraries Section, School Libraries Section, Lending Section, Librarians of small Libraries Round Table, Training Class Instructors, Librarians of Religion and Theology, Public Documents Round Table, National Association of State Librarians, League of Library Commissions, American Association of Law Libraries, Special Libraries Association, A. L. A. Council, Association of American Library Schools, and Library Workers Association.

HOTEL ACCOMMODATIONS

The New Ocean House, one of the most up-to-date and exclusive hotels on the Atlantic Coast, will be headquarters. Here and in the fireproof assembly hall on the grounds, will be held the general sessions and all other meetings. This hotel, facing the ocean, and the adjoining, connected, seven-story concrete section, will accommodate approximately seven hundred people. Five cottages on the hotel grounds will house nearly one hundred more. All meals will be in the hotel dining room, American plan, for those having rooms in the hotel or its cottages. Only persons staying five days or more will be assigned to the New Ocean House. Those staying less than five days will apply for rooms in the other hotels or rooming houses. Rates (American plan):

No single rooms will be available June 20th to 25th, and a minimum stay of five days must be booked by those applying for rooms here. These restrictions are made by the local committee that the greatest number possible may be housed at Headquarters. Prices granted us are about two-thirds regular rate, and same menu is given as during the season.

Two in a room, twin beds, private bath, each \$8.00 per day.

Four in two rooms, twin beds in each, bath between, each \$8.00 per day.

Three in a room, twin beds and cot, private bath, each \$7.50 per day.

Six in two rooms, twin beds and cot in each room, private bath between each \$7.00 per day.

Eight in two very large parlor front rooms, twin beds and two cots in each room, bath between, each \$6.50 per day.

Two in a room, twin beds, without bath, each \$6.25 per day.

Two in a room, double bed, without bath, each \$6.00 per day.

Three in a room, twin beds and cot, no bath, each \$5.75 per day.

Cottage rooms for two, without bath, each \$5.50 per day.

Hotel Preston, directly on the ocean, in the exclusive residential section of the North Shore Summer Colony, one mile from the New Ocean House, accommodates two hundred and fifty, and a free bus service will be provided for those assigned there, giving quick transportation to and from the conference meetings. It is an up-to-date hotel, and will be chosen by those who enjoy the quiet rest outside headquarters. Rates (American plan, and including free bus service to and from meetings):

Two in a room, twin beds, private bath, each \$8.00 per day.

Four in two rooms, twin beds in each, bath between, each \$7.50 per day.

Three in a room, twin beds and cot, private bath, each \$7.50 per day.

Six in two rooms, twin beds and cot in each room, bath between, each \$7.00 per day.

Two in a room, double bed, without bath, each \$6.00 per day.

Single room, without bath, each \$6.50 per day.

Hotel Bellevue, fifteen minutes' walk from Headquarters, and on trolley line running every fifteen minutes directly to the assembly hall on the New Ocean House grounds (fare 10c or 15 rides for \$1.00), will accommodate about fifty. Rates (American plan):

Two in a room, with bath, each \$7.00 per day.

Two in a room, without bath, each \$5.50 per day.

The Willey House and cottages, nearer headquarters, and also on the trolley line, will provide for one hundred persons. Rates (American plan):

Two in a room, without bath, each \$5.00 per day.

Two in a room, with bath, each \$6.00 per day.

Single room, without bath, \$6.00 day.

Private Houses. For those desiring to attend the conference at a minimum of expense, as many rooms will be provided in near-by private houses as may be desired. For these apply to Clarence E. Sherman, librarian, Free Public Library, Lynn, Mass. Rates: \$1.00 per night per person. Delegates in private houses may obtain special meals at New Ocean House cafeteria: Breakfast 50c; Lunch 75c; Dinner \$1.00.

One-day Visitors. Transient delegates coming to Swampscott for the day only, and not remaining over night, may also get meals in the cafeteria. A few can be accommodated in main dining room, where lunch will cost \$1.50 (regu-

lar rate \$3.00) and dinner \$2.50 (regular rate \$4.00).

HOW TO MAKE RESERVATIONS

Reservation of rooms should be made as soon as possible. Assignments will be made after April 10th. If all cannot be given the accommodation requested, preference will be given older members and those from outside New England. For all hotel and cottage reservations write to the American Library Association, care of New Ocean House, Swampscott, Mass., the management of which will acknowledge all letters, and, assisted by Mr. F. W. Faxon of the local committee, will make all assignments.

For rooms in private houses, address Clarence E. Sherman, Free Public Library, Lynn, Mass., who has undertaken to arrange that part of the rooming.

The reduced rates made for the conference week at New Ocean House, will be available for several days before June 20th, and will hold for those who wish to remain after the meeting is over, until the afternoon of Friday, July 1st.

TRAVEL NOTICE

No reduced railroad rates will be possible from New England points to Swampscott next June, but the Trunk Line Association, Passenger Department, has decided to sell round-trip tickets for the conference from points in New York, New Jersey, Delaware, Maryland, District of Columbia, West Virginia, most of Pennsylvania, and part of Virginia.

The rate of one and one-half fare to western gateways of New England Passenger Association Territory, plus double the one way fare therefrom, will be available to members of the A. L. A. and dependent members of their families, when identification certificates are presented. Those who take advantage of this rate must go and return by same route and must reach original starting point not later than June 30, 1921. Tickets will be on sale June 18th to 20th.

It is hoped that other passenger associations will grant similar rates, but it is not expected that any rates will be granted in New England territory.

For convenience of delegates and others the present regular railroad and Pullman one-way fares are here given. Upper berth is approximately 80 per cent of the lower.

	Fare	Pullman Lower Berth
New York	\$ 8.92	\$ 4.05
Philadelphia	12.42	4.05
Washington	17.71	6.08
Atlanta via New York	42.93	14.58
Pittsburgh	25.97	6.89

Dallas via St. Louis	71.84	21.87
Birmingham via Cincinnati ..	46.26	15.80
New Orleans via New York ..	61.16	19.44
Denver	79.89	22.68
Buffalo	19.33	4.86
Detroit	29.89	8.10
Cleveland	26.41	6.89
Cincinnati	36.28	9.72
Chicago	39.64	10.94
St. Louis	47.02	12.96
Memphis via Cincinnati	52.90	15.80
St. Paul	55.05	13.77
Minneapolis	55.46	13.77
Omaha	59.00	15.80

Chicago party. Following the custom of former years, a special train out of Chicago is planned, providing a sufficient number (125) signify their intention of joining the special party. Should there be an insufficient number to meet the railroad requirement for special service, separate Pullman sleepers will be provided, to be attached to regular train for the accommodation of those who register with the travel committee before June 10th. (Address: John F. Phelan, Chicago Public Library).

COMMITTEES

Travel. Frederick W. Faxon, 83 Francis St., Boston; Charles H. Brown, Bureau of Navigation, Sixth Div. U. S. Navy Dept. Washington, D. C.; John F. Phelan, Chicago Public Library.

Nominating. P. L. Windsor, University of Illinois library, Urbana, chairman; June Donnelly, Theresa Hitchler, Grace D. Rose and Everett R. Perry.

Program. President, First Vice President and Secretary.

Local. C. F. D. Belden, J. Randolph Coolidge, Anna M. Bancroft, Wm. C. Lane, Mrs. Bertha V. Hartzell, Edward H. Redstone, F. W. Faxon.

COMMERCIAL EXHIBITS

Space for commercial exhibits will be available in unlimited proportions on the main or office floor of the New Ocean House. Applications should be made directly to the management of the hotel. Price will be determined on basis of amount of space requested up to May 1st. Rate will vary from \$3.00 to \$5.00 per running foot for the entire meeting. No less than six feet will be considered.

POINTS OF INTEREST ACCESSIBLE FROM SWAMPSCOTT

The attractions of Boston and vicinity will undoubtedly bring large numbers from all parts of the country in spite of the high cost of traveling, and the Program Committee is planning to allow ample time for excursions to points of historical and literary interest.

SWAMPSCOTT. A typical old-time village, is

twelve miles from Boston, and one of the most exclusive sections of the North Shore of Massachusetts. It is on the Boston & Maine R. R., about a mile beyond Lynn. It may be reached from Boston by motor via Revere Beach and thru Lynn, over the Metropolitan Parkway system, which follows the water practically all the way. Train service is frequent, time required about thirty minutes. Puritan Road, on which the New Ocean House is situated, is a continuation of the Shore Boulevard, established in 1629. This is the oldest and most famous highway along the North Shore, and was originally the Indian trail called The Path of Peace.

MARBLEHEAD. Distance 5 miles. Famous harbor and yachting center.

NAHANT. 2 miles. Lynn Woods. 4 miles. Fine wild woodland.

SALEM. 4 miles. Founded 1626. The "Witch House" and "House of the Seven Gables" still to be seen here.

REVERE BEACH. 5 miles. The Massachusetts Coney Island.

BEVERLY. 6 miles. Historic North Shore settlement.

PRIDES CROSSING. 10 miles. Fine summer homes.

MANCHESTER. 18 miles. Famous summer resort.

DANVERS. 15 miles. Has many colonial homes of historic interest.

MAGNOLIA. 20 miles. Fashionable resort.

LEXINGTON. 25 miles. Very rich in historic sites.

CONCORD. 27 miles. First battleground of the Revolutionary War. Home of Hawthorne, Emerson and Louisa Alcott.

SUDBURY. 30 miles. The Wayside Inn is here.

METHUEN. 25 miles. Has many historic homes.

GLOUCESTER. Greatest fishing port in America. Settled in 1623. 25 miles.

PLYMOUTH. 50 miles. Landing place of the Pilgrims. Has fine collection of authentic Mayflower relics.

The local committee hopes to arrange for a large party visit to Plymouth, probably Sunday, June 26th; also, motor excursion on some other day to cover Lexington, Concord, and return via the Wayside Inn at Sudbury; and an auto trip is planned for one afternoon during Conference week along the North Shore to Marblehead and Beverly.

THE WHITE MOUNTAINS. About 100 miles north of Swampscott. If applications are received from 25 or more persons, Mr. Faxon will plan to conduct a post-conference party, spending about three days in Jackson, whence trips

would be made to North Conway, Intervale, Upper Bartlett and Crawford Notch, leaving Jackson, travel by motor to Randolph for a three-days' stay, and from that headquarters an all day trip will be made covering Bretton Woods, Profile Lake and the Flume of Franconia, returning via Jefferson. The estimated cost of trip covering June 27th to July 4th, including railroad, hotel meals and motor trips, as outlined, would be \$58 for the eight days.

INDIANA AND KENTUCKY LIBRARIANS AND TRUSTEES JOINT MEETING

AN unusually interesting district meeting, one of the most successful of the year, was that at which the librarians and trustees of Southern Indiana and Central Kentucky were entertained by the librarian and staff of the Louisville Public Library, March 10th. A dozen Indiana libraries and about the same number of Kentucky institutions were represented, about one hundred people being present at each session.

The morning program was given over to the problems of extension work. George T. Settle of the Louisville Public Library, presided and after a gracious welcome introduced Mrs. Herbert W. Mengel, a member of the Kentucky Library Commission who discussed the new Kentucky County Library Law, which is similar to the Indiana law. Mrs. Mengel urged a greater interest in the provisions and possibilities of the law and spoke of the active campaign in Scott County, Kentucky.

Jennie O. Cochrane, head of extension work in the Louisville Public Library, presided over a round table discussion on County Library work, outlining first the active service of the Louisville Library in Jefferson County. Permelia Boyd, Secretary of the Scott County (Indiana) Library Board, gave a witty and helpful talk on "Serving a County from a Small Town Library." Georgia Stockslager of the Corydon (Indiana) Public Library, spoke of township work and Mayme C. Snipes of the Indiana Public Library Commission, told of the results obtained by a township library book wagon, the increase of borrowers from twenty per cent of the resident families to eighty per cent, and a deeper interest in good reading. Bernice Bell of the Louisville Children's Department, spoke of the work in the schools in the county and Thomas Blue discussed the service in the colored stations of the county.

The staff of the Louisville Library entertained the guests at a jolly luncheon served in the art gallery, an informal discussion of new and old favorite books taking the place of toasts. Before the afternoon session the guests had an opportunity to visit the art exhibit and the in-

teresting exhibit on book mending prepared by the Louisville staff.

The afternoon session was presided over by William J. Hamilton of the Indiana Public Library Commission. An altogether delightful talk on contemporary fiction was given by Mrs. Ira Sayre Barnett. Her keen sense of values, her charming humor and her occasional sly digs at the listening librarians were very much enjoyed by all. Mrs. Elizabeth Claypool Earl, president of the Indiana Public Library Commission, gave the closing talk on "The Librarian's Opportunity and the Trustee's." This was an appeal for a better appreciation of the library's work on the part of the public, and for an active and working interest on the part of library trustees in helping the library to serve every community interest.

After the formal program the guests were taken to the Western Colored Branch Library where Mr. Blue and Mrs. Harris of the staff told of its work and the results obtained. A final treat was the telling of a group of stories by two colored children who have taken part in the story telling contests held at the branch.

REGIONAL LIBRARY CONFERENCES IN ILLINOIS

DURING February and March, there were fourteen regional library conferences held in Illinois under the joint auspices of the Illinois Library Association and the Illinois Library Extension Commission. Anna May Price, secretary of the Commission represented the commission at each of the meetings, while the Association was represented at different meetings by its president, Effie A. Lansden, of Cairo, Helen A. Bagley, a former president, Anna F. Hoover and Mary J. Booth.

The meetings held were as follows:

Evanston, February 1, Helen Bagley, chairman; DeKalb, February 9, Mrs. E. B. Murray; Savanna, February 10, Anna May Price; Ottawa, February 11, Vera Snook; Bushnell, February 17, Anna May Price; Peoria, February 18, Anna F. Hoover; Momence, February 19, Bertha A. Durham; University of Illinois, Urbana, February 21, Ethel C. Kratz; Effingham, February 22, Margaret Gramesley; Springfield, February 24, Effie A. Lansden; Alton, March 7, Bella Steuernagel; Anna, March 8, Helen L. Grear; Paducah, Ky., March 9, Fannie Rawson; Mt. Carmel, March 10, Mrs. Edgar Foster.

Great interest was taken in all the subjects discussed at the different meetings, and particularly in "Library Legislation for 1921" and "Library Incomes and Present Prices."

The topics discussed were—"Standardization of libraries," "Library incomes and present

prices," "County libraries," "Library legislation for 1921," "Keeping the Carnegie contract," "Ten best books of the season," "Current fiction and the rented shelf as an aid to its solution," "What makes the juvenile book bad or mediocre," "Summer courses for the librarian and assistant," "Our responsibility to the Illinois Library Association," "Periodicals—selection, use and binding," "Book mending and reinforced bindings" "Care of pamphlets," "Increasing the number of borrowers," "Our professional periodicals," "Co-operation of the public library in compiling war records," and "Use of the victrola and piano in the public library."

At the joint meeting with Kentucky at Paducah, Fannie C. Rawson, secretary of the Kentucky Library Commission, spoke on Kentucky's new county library law, Anna May Price of the Illinois Commission spoke on the different phases of the loan desk routine, and Effie A. Lansden of Cairo, Illinois, president of the Illinois Library Association, discussed the relation of the librarian to the state association and also spoke on the professional periodicals.

One special feature of the meeting at Springfield on February 24, was the presence of Vachel Lindsay, Springfield's poet, who entertained the librarians present with the reading of an unfinished poem called "Gypsies." He also spoke on the value of a library to a community and its help in its growth.

All of the meetings were well attended and manifest interest was shown in all of the discussions, which were mostly informal.

DISTRICT OF COLUMBIA LIBRARY ASSOCIATION

MEETINGS of the Association have been held on January 5, and February 24.

At the January meeting Dr. Bowerman spoke briefly of the present status of the Reclassification Bill. In the revised classification library work has been put on a par with other professions—a distinct step forward, he said, altho those who sponsor the classification realize it is still far from perfect.

The program of the evening was "Brief talks on some phases of library work, scientific, technical and educational." Clara Herbert of the Public Library spoke appreciatively of the educational aspect of library work as she found it in a great public library, touching upon the education derived from book selection and from the reference work, in which one dealt with such varied subject matter. From these she came to the splendid co-operative work between libraries and schools, noting the great stimuli gained from contact with books, from advice given and received as to books, and from the making of

reading lists on all manner of subjects. Miss Herbert looks forward to the time when lists suitable for children of all ages, on up thru all the grades to adult years, will be the common thing and effective co-operation between libraries and university extension work will be in operation.

Laura Thompson of the Department of Labor then gave a most interesting account of the work of the Labor Department Library shortly to be published in the *LIBRARY JOURNAL*.

At the meeting held on February 24th, Dr. Putnam presided, and Waldo G. Leland of the Department of Historical Research in the Carnegie Institution of Washington, gave a most instructive lecture on archives and archive buildings. Mr. Leland showed pictures of buildings used for the storage of state archives in Connecticut, New York, Pennsylvania, Virginia (where a new building has just been constructed), North Carolina, Kansas and Iowa and of a building erected by the Canadian Bank of Commerce in Toronto especially for the purpose of housing its records, and the most perfect archive building in North America. He showed also a number of views of the national archive buildings of Great Britain, France, Holland, Belgium, Austria and Germany. He said that America owed a great debt to the custodians of

the British archives for the warm welcome always extended to American students and the valuable assistance to those who work in the Public Record Office and other depositories. He pointed out that if the archives of France and Great Britain and Spain were in the same situation as the archives of the United States in Washington it would be impossible to write the early history of the United States!

Views also showed conditions among the records of the various departments in Washington in some of which documents were seen stored in annexes and cellars and along the public corridors and in close proximity to steam pipes. Mr. Leland said that American archives have suffered untold losses through sheer neglect, and pointed out that the only remedy lies in the erection of a special building for the national archives. He showed some preliminary studies made in the Office of the Supervising Architect for a national archives building and expressed the hope that within the next ten years the United States might rise to the level of such countries as Belgium and Switzerland in the care of its records.

Speaking of classification of archives, Mr. Leland said that the system of classifying and filing the state records in Iowa is a model which is now being followed in many of the states.

MABEL COLCORD, *Secretary*.

LIBRARY OPPORTUNITIES

POSITIONS WANTED

Young man, law graduate, with five years of library experience and a knowledge of Latin and modern languages wishes to hear of a position preferably in a business, law or college library. Address: M. G. 7, care of the *LIBRARY JOURNAL*.

Head of a normal school library in South-East would like to hear of college or normal school library position within fifteen hours of Dallas, Texas. College and library school training and about two years' experience. Address: Y. Y. 7, care of the *LIBRARY JOURNAL*.

A university man, library school graduate and with fifteen years' experience in administration and reference work desires a position as librarian of a smaller college, public or business library or assistant librarian or reference librarian in a larger one. Address: T. H. 6, care of the *LIBRARY JOURNAL*.

Position wanted: As librarian or head of department in university, college, or special li-

brary, reference or research work preferred. Education: University graduate with A.M. Degree and library training. Experience: Three years as teacher in high school, and four years as librarian in public, high school, and university libraries. Have worked in all departments, including reference, science, and catalog. California preferred. Address: L V 7, care of the *LIBRARY JOURNAL*.

POSITIONS OFFERED

Wanted, for Flagstaff, Ariz., librarian for a library recently taken over from the Woman's Club by the city. Population 4000, good climate. Salary \$1200. Address, Mrs. T. A. Stahl, Secretary, Public Library, Flagstaff, Ariz.

Wanted, An assistant with experience in children's work to take charge of a branch library in a town of 17,000. Position will also include extension work with schools and clubs. Salary \$1200 with good opportunity for advancement. Address, Librarian, Levi Heywood Memorial Library, Gardner, Mass.

New and Distinctive Business Books

Practical Bank Operation

Prepared by L. H. LANGSTON,
under the direction of the Educational Committee of
The National City Bank of New York.

This highly specific working manual describes in full detail all the operations of banking as they are carried out in The National City Bank of New York, one of the world's largest and most highly organized banks. It covers all the characteristic functions of banking—deposit, note-issuing, exchange, loaning, and the fiduciary and trust functions. It also explains the auxiliary operations such as accounting, purchasing, personnel management, etc., and is profusely illustrated with working forms. Ample and conveniently indexed for reference.

This manual will be of definite use in both large and small banks. It will make an instant appeal to bankers, bank employees, accountants, and all business men.

Two Volumes, Blue Cloth, 713 Pages, Price \$8.00.

Practical Accounting Problems

Theory, Discussion, and Solutions

By PAUL-JOSEPH ESQUERRE,

C. P. A., head of The Post-Graduate School of Accountancy in New York City.

Contains twenty problems which have been developed from the author's extensive experience in actual business situations and in preparing men for C. P. A. examinations. Gives a clear statement of each problem, a full discussion of the accounting theory involved, and a complete solution showing how that theory is applied.

The problems are so explained and presented that the reader who solves them acquires the ability to solve not merely these particular problems, but any of a similar type. Of unique value to accountants, and to students preparing for C. P. A. examinations.

Flexible Binding, Size 8½ x 11, Typewriter Type, Price \$10.00.

Send For and Examine These Works

Both of these works will be of immediate and practical service in the Library. They will be sent to librarians for thirty days' examination, and they may be returned within that time if not entirely satisfactory. Order from your bookseller or direct from us.

New York City

IN THE LIBRARY WORLD

DELAWARE

Wilmington. A bill authorizing the Mayor and City Council of Wilmington to raise \$200,000 by bond issue passed the Senate on March 17th.

NEW JERSEY

The year ending June 30, 1920, was an unusual one in the library history of New Jersey, in that the increase in the circulation was more than a million over that of 1917, which is chosen as representative rather than 1918, when influenza and coal famine closed many libraries. Along with the increased use of libraries has come the desire of many communities for libraries of their own. The American Legion has been a great factor in this awakening, having formed a group in each town which has been the nucleus for library development. New Jersey's share of Library War Service books was five thousand volumes, a few hundred of which have been turned over to any Legion post which has been willing to aid in the establishment of libraries as the beginning of such a library.

Libraries were opened during the year at Glassboro, South River, Milltown, Fort Lee, North Bergen, Rumson, Frenchtown, Oxford, Yorkship, Noreg Village, Glen Rock, Swedesboro, Roebing, Ringwood, Hohokus, Spring Lake, Bordentown, Neshanic, and Stirling, nineteen in all, and the high-water mark for the number of libraries established in any one year since the establishment of the Commission. Five subscription libraries have been made free and thoroly overhauled, the money for this being furnished by public subscription. The communities served by the Commission thru traveling libraries aggregated about 217,300 population, but the work is still in its first beginnings, as there are over 500,000 people in New Jersey living outside of incorporated places, besides many hundreds of small towns. Books are circulated from 691 stations, 68 having been added during the year. From the central office 78,600 books have been sent to these stations in 1,572 libraries, with a total circulation of approximately 354,400.

With the \$11,000 available for purchase of books 11,869 were added to the collection during the year at an average cost per book of 91 cents, an average which was secured only by utmost care in purchasing and by purchasing in quantity during the first two months of the year before the second increase in book prices was made. 5,321 books were discarded, making the

total gain 6,548. The discarded books were sent to prison road camps, boys' and girls' camps, isolation wards in hospitals, and to Traveling Library stations to be given away after being circulated a few times. There are now 65,264 books in the Commission's collection. The appropriation for the year 1920-1921 will not suffice for the purchase of books for current needs and provides for no replacement or extension of work. Double the present book appropriation is asked for the year 1921-1922.

Calls for special books, especially for technical books and books on Americanization exceeded those of any previous year. 37,737 books were sent out. Extension of the interloan system played an important part here, as the Commission was able to borrow many expensive and much-needed books thru the aid of the larger libraries of the state and the New York Public Library.

Rural schools to the number of 127 were visited, their libraries examined and talks made to the pupils. In Cape May County 32 out of 41 rural schools are provided with small but well-selected libraries, and every school in Camden County has a good, if small library. The number of schools in which library instruction is being given is increasing.

A departure from the regular Summer School proved successful. Library classes were held in different parts of the state with a course calling for one day a week for eight weeks, thus reaching many librarians who could not take six weeks for a summer school. Three of these courses were elementary, the fourth being a special course of ten weeks given for the Commission by the Newark Public Library. The total enrolment was 107.

Toward the end of the calendar year Burlington County voted by a large majority to establish a county library. The campaign was conducted by representative citizens and by the heads of county organizations.

Middletown township in Monmouth County with eleven communities voted for a township library.

NEW JERSEY

Newark. The Newark Public Library lent for home use in 1920 643,272 volumes. The average daily use from the main library was 1,624 in the adult department and 306 in the children's room. The total live registration was 11,718. From the income of \$200,080 there was spent for salaries \$127,679; \$23,537

ABINGDON

BOOKS of Value

IN this intense age of mass-production reading has become almost a problem of moments. Yet the need for it has increased. For it is in books—good books, that we find those essential experiences which bring to us a fuller knowledge of the relationship of Life. It is the thoughts, the truth, the reality, they awaken in us, that makes them so valuable, so indispensable.

Such are ABINGDON BOOKS—*Books of Value*

The Portrait of the Prodigal

Life Studies in the Experiences of the Prodigal Son
By Joseph Nelson Greene

A new treatment of an old subject—The Prodigal. A study of the underlying motives and their relations to life. A valuable contribution to the literature on the Parables.

Price, net, \$1.50, postpaid.

Citizenship and Moral Reform

By John W. Langdale

This book discusses complex and controverted questions dealing with the vital interests of the people. The writer believes that much evil persists because well-meaning people evade the duty of seeing and doing recognized good; and it is his aim to stir up the Christian people of the land to a recognition and a performance of their high obligations. Net, \$1.25, postpaid.

Rural Social Organization

By Edwin L. Earp

A book which gives in outline some of the rural social organization principles which may guide the rural social leader in building up a community, and a like treatment of the social functions of those rural institutions that we must reckon with in building up an enduring civilization in our vast domain. In Press.

The Prophetic Movement in Israel

By Albert C. Knudson

Following an opening chapter on Prophecy as an Institution, the author presents a general account of four groups of prophets, viz., the pre-literary prophets; the eighth century prophets; the prophets of the Babylonian period; and the prophets of the Exilic and post-Exilic periods. In the latter half of the book he presents an exceedingly enlightening and stimulating discussion of the service of the prophets to the religious life and thought of Israel. The book will render an important service as an introduction to an intensive study of the prophets and their writings. In Press.

Elements of Personal Christianity

By William S. Mitchell

This discussion of the elements of personal religion is "a frank approach" to a consideration of the Christian experience, testimony and obligation in which "conventional phraseology has been avoided, and the effort made to look at the vital problems through the eyes of youth, facing them, as youth faces every other problem of life, with the sincere question as to their inner truth before commitment to them as a principle of life. In Press.

Books As a Delight

By Bishop William A. Quayle

Under the cheerful guidance of Bishop Quayle, and yielding quite willingly to the charm of his literary personality, the reader is treated to a unique exposition of the lure of books. The fascination of books that has made captive of the author is made to fasten itself likewise upon the reader, who is grateful for the added attractiveness that is here presented in the fellowship of books.

Price, net, 35 cents, postpaid.

THE ABINGDON PRESS
NEW YORK CINCINNATI

NEW CENSUS EDITION NOW READY

Size, 12 x 15 inches. 496 pages. Weight 10 pounds. Printed on finest quality heavy map paper, bound in buckram.

CRAM'S MODERN REFERENCE ATLAS

THE STANDARD SINCE 1867

A COMPLETE reference work on all subjects of geographical information and commercial statistics. The 1920 census statistics of the United States and the new world maps, showing all territorial changes made by the war, make this edition of Cram's Modern Reference Atlas an especially valuable work.

New Maps—New Statistics

An entirely new set of maps, large scale, clearly engraved—and judiciously engraved, has been specially prepared for this edition. The descriptive matter of the physical and political geography of the nations of the world has been rewritten and brought down to the present day.

Special Features

Descriptive Gazetteer of each state and country, giving data on soil, climate, population, resources, industries, products, government, etc.; 300 pages of maps, including 90 large double page maps of states and foreign countries, and of principal cities of the United States; topographical and geographical maps, biblical and historical maps; statistics on commerce and finance; carefully prepared index of 250,000 places, giving population, location on the map, etc., and indicating post offices, incorporated places, county seats, capitals, etc.

The new Modern Reference is offered at the very unusual price of \$19.50—prepaid anywhere in the U. S.

Descriptive circular, with sample maps, sent on request.

The George F. Cram Company

Atlas Headquarters—Established 1867

117 N. Market St., Chicago. 119 Nassau St., New York.

for books and \$8,116 for binding. Rent, light and incidentals for the business branch totaled \$5,508. This branch circulated 9,641 books. The library added 37,094 volumes during 1920, and at the end of the year had a book stock of 249,233 volumes. The Main Library and the Branch became members of the Chamber of Commerce during the year, by which it is hoped that the Library may keep in touch with the activities of the city and take a more active part in helping its business men.

NORTH CAROLINA

An increase in the annual appropriation of the Library Commission from \$8000 to \$17,500 has been granted by the General Assembly of North Carolina. The increase is retroactive to December 1, 1920.

OHIO

A bill (House Bill no. 249) to reorganize the government of Ohio, just introduced in the State Legislature contains important sections regarding the State Library Board:

Extract from House Bill No. 249.

Sec. 154-48. The department of education shall have all the powers and perform all the duties now vested in the superintendent of public instruction (excepting with respect to the determination of preliminary educational qualifications of applicants for licenses to practice professions), and those vested in the state geologist.

Sec. 154-49. A state board of vocational education is hereby established in the department of education, in order to carry out the provisions of the law accepting the acts of Congress providing for co-operation with the states in the promotion of such education. Such board shall be composed of the director of education, the director of commerce, the director of agriculture, the director of industrial relations, and the director of examination. The director of education shall be chairman and executive officer of the board. Upon the recommendation of the director of education, the board may employ such technical assistants as may be necessary and prescribe their duties and compensation. In all other respects, the state board of vocational education shall exercise the powers and perform the duties vested in the state board of education by sections 367-5, 367-6 and 367-7 of the General Code.

Sec. 154-50. The director of education shall be ex-officio a member and secretary and executive officer of the board of trustees of Kent State Normal School and of the board of trustees of Bowling Green State Normal School. The membership in each of such boards herein pro-

vided for shall be in addition to the membership thereof as otherwise provided by law.

Sec. 154-51. A state library board is hereby created in the department of education, to be composed of the director of education, as chairman, and four other members. The members other than the director of education shall be appointed by the governor. The first appointments under this section shall be as follows: One member for a term of two years, one member for a term of four years, one member for a term of six years and one member for a term of eight years, thereafter one member shall be appointed each two years for a term of eight years. The members other than the director of education shall receive no compensation, but shall be paid their actual and necessary expenses incurred in the performance of their duties.

Sec. 154-52. The state library board shall appoint and may remove a state librarian, who shall, under the direction and supervision of the board, be the head of the library service of the state, with power to appoint and remove all assistants and heads of departments in the state library service.

Sec. 154-53. The state library board shall make such rules for the government of the state library, the use and location of the books and other property therein and the transfer thereof as it deems necessary. It shall organize the library service of the state into departments and determine the number of assistants and other employes therein.

Sec. 154-54. The state librarian shall be secretary of the state library board. Under the direction and supervision of the state library board and subject to the rules and regulations established by it, he shall, thru such departments as may be created by the board, exercise all powers and perform all duties vested by law in the state board of library commissioners, the librarian heretofore appointed by the state board of library commissioners, the library organizer heretofore appointed by the state board of library commissioners and the legislative reference department and the director thereof.

Sec. 154-55. The director of education shall be a member of the board of trustees of the Ohio Archaeological and Historical Society, in addition to the members constituting such board under the other laws and regulations pertaining to the membership thereof. No moneys appropriated for the use or support of the Ohio Archaeological and Historical Society shall be withdrawn from the state treasury for such use until the board of trustees of said society, as constituted when this section takes effect, shall consent to the provisions hereof and file dupli-

ART MUSEUMS IN REVOLUTION

Joe Pennell dares to say that our greatest American Museum of Art should proceed to do something besides gathering foreign and ancient works of art and archaeological and ethnographic curios.

Joe Davidson more than hints at the same thing.

Forbes Watson says our most aristocratic art-promoting association is the mother of the commonplace!

The Metropolitan Museum which declined a few years ago to show modern work-shop products as being too "commercial," now shows factory products, if they are designed after the Metropolitan's own "real art" specimens.

From many points come daring suggestions that museums should be part of every-day life and help to make it more attractive and enjoyable, and should be patrons of overalled mechanics as well as of be-smocked oil painters.

The elements of all these suggestions and the facts which show their excellence, are found in four of our publications, to wit:— (and note the dates!)

THE NEW MUSEUM, 1917. \$1.50

THE GLOOM OF THE MUSEUM, 1917,

first published, in effect, 1910 and 1913. \$1.50

THE INSTALLATION OF A SPEAKER,
1918.

This brings museum installation (which is really the shop-keepers' window-dressing) right into every-day life. \$1.50

A PLAN FOR A NEW MUSEUM, 1920.

(First draft, 1916.) \$2.00

All by John Cotton Dana, for eleven years director of the Newark, N. J., Museum Association, and for twenty years Librarian of the Newark Library. Consult also his pamphlet, "Museums and Industries," the story of a museum's first ten years and of the experiments it tried, 1919.

THE ELM TREE PRESS WOODSTOCK, VT.

cate certificates of such consent in the offices of the secretary of state and the auditor of state.

Sec. 154-56. The director of education shall be a member of the board of trustees of the Ohio State University, with power to speak but not to vote therein. The membership in said board hereby created shall be in addition to those provided for by section seven thousand nine hundred and forty-two of the General Code.

ILLINOIS

Two revenue bills which have been introduced into both houses of the legislature would provide for increase in the tax levy for all city, village and township libraries with a population of less than 100,000, from one and one-third mills to two mills; and in cities of over 100,000, from two-thirds of a mill to one mill.

It also includes a clause exempting the library tax from the scaling under the two per cent reduction clause of the Juul Act.

The certification bill was introduced into the House last week, and is to be introduced into the Senate this week. This bill, which was drafted by the Illinois Legislative Reference Bureau and Professor Fairlie of the University of Illinois, has been approved by the Legislative Committee (Anna May Price, chairman), and the Executive Board (President, Effie Lansden, Cairo) of the Illinois Library Association and by the regional library conferences, reported elsewhere in this issue.

MISSOURI

The Missouri legislature, which has just adjourned, passed certain measures affecting library extension. The first of these is an amendment of the St. Joseph city charter, which increases the minimum which the Common Council must appropriate for the support and maintenance of the public libraries of the city from four-tenths of a mill on the assessed valuation to eight-tenths of a mill. This change in the law will increase the funds of the city library by about \$21,000 annually beginning April 15th next.

The main provisions of the county library law are:

Sec. 1. Upon petition of 100 voters, the county court must submit the county library proposition to the voters at an annual election, specifying a tax rate of not over two mills. If the vote is favorable, the county library must be established. In the same way it may be voted to discontinue the tax and the library.

Sec. 2. Creates a county library board and outlines its duties, which are similar to those of a city library board.

Sec. 3. Authorizes donations and bequests to county libraries, the same as for city libraries. Also authorizes the county library board to purchase or lease grounds and to erect a building.

Sec. 4. Provides for library service by contract.

Sec. 5. Residents of a city or town already supporting a public library may not vote on the county proposition, may not be taxed for its support, and are not entitled to its service; but—

Sec. 6. After the establishment of the county library, the common council of such town or city may notify the county court that the city desires to become a part of the county system; in which case the city library enters the system, the county tax and the county service extend to the people of the city. This would give the people of the city or town much better service and many more books at no greater cost. The city may also withdraw from the county system if it wishes.

Sec. 7. A county which has voted to establish a county library, may, upon petition of 100 tax-paying voters, vote for or against an additional levy of not over one and a half mills for a limited period, for a library building. This is an extension to counties of the same privilege that now is accorded cities.

Sec. 8. County librarians must attend state and district library meetings.

Sec. 9. Service must be freely accessible to all parts of the county.

Sec. 10. County libraries shall be visited at intervals by representatives of the state library commission, for the study of conditions, and to render such assistance as may be needed.

WISCONSIN

The bill for the certification of librarians has been introduced into the Wisconsin legislature, and it is expected will be favorably reported by both the Senate and House Committees within a short time.

KANSAS

Two items of library legislation just passed will greatly contribute to library extension in Kansas: The library tax increase, providing for a one-mill tax for cities of the second and third class, sponsored by Representative Clark Conkling, which has been signed by the Governor, and the county library bill passed by the House on March 8th and the Senate on March 16th.

Of this latter bill (House Bill No. 492, sponsored by Mrs. Grinstead, and Senate Bill No. 588 by Senator Badger), the principal provisions

Sec. 1. The board of county commissioners may establish and maintain a county library are:

Instructors, Students, Libraries

No other books of a like character are on the market today. For class room work and as references they are invaluable.

PRESS NOTICES.

CHRISTIAN WORLD—This is a timely, impersonal, dispassionate, analytical unanswerable discussion of the weaknesses and inconsistencies of the Christian Science Church. It overflows with facts which provide the ground-work of the author's incisive argument . . . and is as clear as sunshine and as irrefutable as the decalogue.

THE EVANGELICAL MESSENGER—The spirit in which his exposures of inconsistencies in the organization are made is very commendable, and adds merit and pungency to his arguments and forceful statements. It is the only book of its kind on the market as far as we have any knowledge.

Have you seen "The Open Hearth?"

This new book by Victor Windett and a corps of metallurgical engineers gives the latest data on The Open Hearth furnace, its design, installation and operation. Every student and reader of books on metallurgy will be interested in it. Let us send a copy for your inspection, prepaid at 15% discount, subject to return if you don't want it.

THE HISTORY OF A LIE

By Herman Bernstein

is an authoritative and intensely interesting exposé of one of the most dangerous literary forgeries, by which anti-Semitic propagandists have endeavored to injure and discredit the Jews throughout the world.

Mr. Bernstein shows by documentary evidence how the so-called "Protocols of the Wise Men of Zion" have been forged.

It is a work that is bound to attract widespread attention, for it deals with a question that is discussed at the present time all over the world.

84 pages, illustrated. Price, bound in cloth, 75 cents. Paper bound, 50 cents.

J. S. OGILVIE PUBLISHING COMPANY
57 Rose Street NEW YORK

after an affirmative vote of the voters of the county. Or, on presentation of a petition signed by ten per cent of the tax payers of the county, the county commissioners shall submit the county library proposition to the voters of the county. Voters residing in towns or cities already maintaining public libraries do not vote on the county library proposition. The amount of tax may not be more than one-half mill on the dollar annually. All property in cities or townships already maintaining libraries by public tax is omitted from the county library levy, unless such cities give formal notice that they wish to participate in the county library and pay the county library tax.

Sec. 2. The service of the county library shall be reasonably and freely accessible to all parts of the county.

Sec. 3. The county library board of three members is to be appointed by the county commissioners for three-year terms. No compensation is to be paid the directors, but actual expenses of attending meetings will be paid.

Sec. 4. The board suggests the amount of county library levy needed, but county commissioners vote it, within the maximum set. The county library board has exclusive control of expenditures and makes all necessary rules.

Sec. 5. A county library may buy library service for the county by contract with any existing city or township public library within the county or in an adjacent county, or by contract with the county library of an adjacent county. It may sell library service to any city or township public library in the county or in an adjacent county, or to any school district or county library of an adjacent county.

Sec. 6. All county library funds are to be kept separate and apart, solely for the use of the county library.

Sec. 7. Power is granted to purchase or lease grounds, erect or lease buildings, and appoint a suitable librarian and assistants.

Sec. 8. The librarian shall administer the library and its branches in accordance with approved library practice, under the supervision of the board, shall advise the board in selection of books, shall make annual report to the board, and with the approval of the board shall attend state and district library meetings with necessary expenses paid.

Sec. 9. An annual report of the county library board is to be made to the county commissioners.

Sec. 10. County library boards may accept donations of money, lands, etc.

Sec. 11. The property of the county library is exempt from taxation.

Sec. 12. Power is granted to accept temporary loans of books, works of art, etc.

Sec. 13. This act is to take effect and be in force from and after its publication in the statute book.

ARIZONA

Tucson. A collection of about 1000 volumes dealing chiefly with the history of Arizona, New Mexico and Old Mexico has just now been cataloged and forms a valuable addition to the Library of the University of Arizona.

CALIFORNIA

The Annual Statistics number of *News Notes of California Libraries*, dated October, 1920, lists all libraries in California except elementary public school and church libraries and those which belong to private individuals. These are arranged alphabetically by place under counties, also arranged alphabetically. In the main statistics are for the period from July 1, 1919, to June 30, 1920. Any distributing point thru which service is given directly from headquarters is counted as a branch. For example, in a school with several classrooms, if service is given directly to each classroom separately, each room served is counted as a branch. However, if a school district has joined and both school and community service, are given from one location, such service is counted as two branches.

California contains 44 county free libraries, of which 41 are in operation; 5 library district libraries; 4 union high school district libraries; 138 libraries supported by city taxation; 56 towns or districts with free public libraries that are included in county free library service; 67 law libraries, of which 55 are county law libraries; 58 county teachers' libraries; 369 libraries in educational institutions, of which 6 are universities, 7 colleges, 7 normal schools, 286 public high schools, 63 private schools and other institutions; 50 miscellaneous institution libraries and 68 association or society libraries, and 30 subscription libraries. In connection with these libraries are 4196 branches and deposit stations. There are 208 library buildings, 168 of these being gifts, and of these 142 are Andrew Carnegie gifts.

The reports of County Superintendents of Schools show a total of 3,772 school districts, 3,453 elementary and 319 high. For books for elementary schools \$254,136 was spent, and \$174,912.45 for high schools. The elementary schools contain 2,906,433 volumes, and the high schools 625,241.

THE METROPOLITAN MUSEUM
OF ART
NEW YORK

THE VERMEER
COLOUR PRINTS

REPRODUCTIONS OF FOUR
IMPORTANT PAINTINGS
IN THE MUSEUM

1. YOUNG WOMAN OPENING A CASEMENT
BY JOHANNES VERMEER OF DELFT

QUALITY——SERVICE

Public, College and University libraries should write us for prices and samples before sending out their binding order. It should be remembered, however, that the original outlay is not the determining factor in your binding costs, but its wearing qualities and appearance. In other words, the number of times your books are circulating after rebinding, and the standing up of your bound periodicals under severe tests tells the tale. Always glad to bind free samples.

W.M. G. JOHNSTON & Co., Pittsburgh, Pa.

DEAR SIR:—

We have been using several of your Keyless Lock Binders for several months and find them perfectly satisfactory. We have had no more trouble with the "Magazine Thief" and the old numbers look as good as "the new" when taken from the binders.

They improve the looks of the reading table, keep the magazine in better condition and are so reasonable in price that EVERY Association can afford them.
Your sincerely General Secretary.

THE ECONOMIC SLAVERY OF THE AMERICAN OFFICE EMPLOYEE

READ

"The Underpaid White Collar Class"

The first book of its kind to champion the cause of the men and women who stand midway between Labor and Capital

By J. LARA

Latin-American publicist; connected for a number of years with the largest firm of international merchants in the world

The author of this book, following the recent precedent set by the eminent Spanish novelist, Blasco Ibáñez, in his two months' study of the Mexican situation, has written this treatise as the outcome of a special study of social and economic conditions in the United States, with particular reference to the status of the men and women comprising the Office Employee Class.

Mr. Lara's research covers not only a period of two months, but of ten years, which is a significant fact from a critical point of view.

Those who may question the alien's right to criticize the institutions of any other country, should bear in mind that the foreign observer looks at things from a detached point of view and has a perspective that is unaffected by partisan sympathies or antipathies.

This book is divided into three parts and the subjects discussed are as follows:

- Chapter
- PART ONE*
- I.—Right of foreigners to discuss labor and social issues.
 II.—Modern loafers and a new class of money makers. A crew of industry wreckers.
 III.—The right to strike when welfare of people is at stake.
 IV.—A dilemma: Will education suffer from high wages to laborers or from low salaries to teachers?
 V.—Is the black and yellow peril looming up?
 VI.—Present wages of laborers compared with salaries of office help.
- PART TWO
- VII.—Employers having ideas of the last century.
 VIII.—Signing time-sheet or punching clock, a shop-like system.
 IX.—"Slave drivers" in business offices, an obnoxious type.
 X.—Why blame employees who change positions?
 XI.—Union of employees for protection purposes, a necessity.
 XII.—Profit-sharing system and insurance of employees, eminently indispensable.
- PART THREE
- XIII.—Influence of high prices on social unrest.
 XIV.—A few suggestions to employees to reduce the H. C. of L.
 XV.—Summing up. The author draws a moral.
 Appendix "A"—Let us start at once an Employees' Association like the "Brain Workers' Union" of France.
 Appendix "B"—Incontrovertible facts showing the unequal distribution of wealth in the United States.
 Appendix "C"—How to dispose of the retired rich.
 Appendix "D"—A letter to the Secretary of the A. F. of Labor and his reply.

* In the year 1920, when Part I of this book was written, the average American workingman was enjoying unparalleled prosperity. In the meantime, conditions have changed considerably, but this altered situation does not affect the validity of the author's conclusions as set forth in Parts II, III and Appendices.

The Library Department of Putnams

OFFERS ALL LIBRARIES AN OPPORTUNITY TO SECURE
ALL BOOKS OF ALL PUBLISHERS
FROM ONE SOURCE.

Being the only American house handling library business that has its own London branch store, English books are supplied as easily as American, and *duty-free*.

The stock of our Retail Store is available for library orders and includes books of every description.

All orders, large or small, are handled quickly, intelligently, and accurately, and our prices will be found satisfactory.

CORRESPONDENCE SOLICITED

Putnams Library Department
2 West 45th Street, New York City
Just West of 5th Avenue

Reduction in Prices

Owing to better labor conditions, a slight decrease in the cost of raw materials and the installation of improved machinery, we are able to announce a reduction in prices on the following supplies: All pamphlet and magazine binders, book cards, book pockets, book marks, mounting papers, posters, and many other items.

This does not necessarily mean that all prices will be as low as those quoted in our No. 23 Catalog of Library Supplies issued in June, 1920, but there will be a substantial downward revision from the "increase in price" sheet which went into effect last October.

All orders will be entered at the reduced rate.

GAYLORD BROS., SYRACUSE, N. Y.

*A new type of business
book that fits these times*

SELLING SERVICE WITH THE GOODS

By Warren O. Woodward
and George A. Fredericks

☐ A complete analysis and synthesis on the Planning, Designing, Construction and Installation of Window Displays and includes valuable working chapters upon the Psychology of Window Displays, Color Harmony, Lithography, Store Window Lighting, Salesmanship and Advertising Economics.

☐ The illustrations and diagrams of the most modern and successful displays are given in line, half-tone and color. The good and bad selling points are analyzed. This in itself makes SELLING SERVICE WITH THE GOODS indispensable to all who deal in commercial commodities.

For Advertisers, Retailers, Students and Salesmen.

PRICE \$4.50

EXPORTING TO THE WORLD

By A. A. Preciado

Author of "America's Monopoly in Foreign Trade," "Foreign Trade a Necessity," "How Export Shipments are Financed," etc.

This book is recognized as a valuable manual for all who are interested in foreign trade. Three of the largest American Universities have recently bought the book for class-room work. But it is just as useful for the manufacturer or exporter who wants to strengthen his working knowledge of world trade.

"Presents the technique of exporting In addition it has chapters on American banks in foreign investments, our merchant marine, how the government helps the exporter, the world's market, foreign trade mark requirements and publicity in foreign countries. Contains also many useful lists and statistics."—*A. L. A. Booklist, Jan. 1921.*

"Salesmanship, Credits, Shipping, and many other topics are separately treated, supplemented by reproductions of various documents used in financing and making shipments. A valuable feature of the book is the incorporation of the various abbreviations for export quotations recommended for use by the National Foreign Trade Council, Chamber of Commerce, and other commercial bodies, with explanations of their legal significance."—*Factory.*

Numerous Illustrations, Diagrams, Documents, etc.

What Business

Men Say:

"SELLING SERVICE WITH THE GOODS by Woodward and Frederick is very interesting and I am sure that this volume will prove invaluable to progressive sales and advertising executives, since it covers in a concise and able manner the subject of getting dealer's distribution through direct window display and counter display."—R. D. Keim, General Sales Manager, E. R. Squibb & Sons, Mfg. Chemists, New York.

"SELLING SERVICE WITH THE GOODS should be very helpful to manufacturers. It should also prove valuable to advertising men who are endeavoring to get results for their clients. We compliment you on the book."—Arthur D. Peterson, Carters Tested Seeds, Inc., New York.

"I have examined SELLING SERVICE WITH THE GOODS and I am glad to say that it gives promise of being very helpful."—H. C. Bursley, Murphy Varnish Company, Newark, N. J.

"I visited with a natural rapture the largest book store in the world."

See the chapter on Chicago, page 43, "Your United States," by Arnold Bennett.

Our Library Department

With its many years of experience, together with our unsurpassed stock of books of all publishers, combine to make a library service of unexcelled efficiency.

Public Libraries, Schools, Colleges and Universities

have their book orders handled intelligently, expeditiously, and accurately by us, and find our prices satisfactory. We solicit correspondence from librarians not acquainted with our facilities.

A. C. McClurg & Co.

CHICAGO.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Chivers Book Binding Co., Inc.

Brooklyn, N. Y.

Do You Believe in Service?

*On the battle front of the profession,
spreading the doctrine of Library Service*

The post-war business depression has created a unique opportunity for constructive Library Service to American commercial and industrial establishments. There are to-day over 1000 business Libraries, and new firms are evincing interest day by day. The cry is for accurate fact information to guide the wheels of business on its way.

If, as Librarians, we are to utilize this opportunity to the full we must work as a unit to develop professional standards and to perfect special Library technique. There is need for teamwork and salesmanship if we are to gain for Library Service proper recognition in business office and factory.

The Special Libraries Association offers you this opportunity to work with other special Librarians to advance the best interests of the profession. Dues are \$4.00 per year, with "Special Libraries," and \$2.00 without. Prompt payment of obligations is the first essential to professional integrity; the second is volunteer committee service.

TEAR OFF AND MAIL THIS FORM TO

Special Libraries Assn.,

Long fibre cards vs. Short fibre cards

Every one knows that homespun will fray and ravel at the edges long before broadcloth, and that broadcloth has a much longer wearing quality.

For the same reason the longer the fibres in card stock, the softer the card and the more it loses snap and wearing qualities.

Library Bureau Standard library cards are made of short fibred stock, and may be compared in durability to closely woven broadcloth.

These are extremely important matters to consider in buying card stock

Public Libraries and New Fiction

By LOUIS N. FEIPEL

Editor of Publications Brooklyn Public Library

THE selection of new fiction titles by public libraries is admittedly a troublesome question. Any light, therefore, that can be thrown thereon ought to be welcomed by the profession.

In the writer's opinion, a comparative survey of the practice in vogue in various public libraries in this matter is very much needed; and in the absence of any reasonable hope that such a central agency as the American Library Association will supply this want in the near future, the writer has undertaken to make such a comparison himself, to the best of his ability. The results thus far have been most gratifying, and have encouraged the writer to pursue his investigations further.

An investigation of this sort plainly requires two things—first, a list of public libraries showing the new fiction titles approved by them for purchase, and secondly, a list of new fiction titles showing the public libraries which have approved them for purchase. For the present writer, comprehensiveness in either direction was out of the question, because of the handicaps under which the investigation has been conducted. Nevertheless, with the limited means at hand, a representative list was secured in both cases. These means consisted of the lists of new books added to various public libraries, as printed in their respective "Bulletins."

The new fiction published in 1919 was made the point of departure; and altho data have also been gathered on more recent titles, the present report confines itself to such 1919 titles, because some 1920 titles may yet reasonably be expected to appear in the published lists of certain libraries under consideration.

Altogether, then, 181 fiction titles of the year 1919 have been considered, this being 44 more than were found listed in the additions of any one library on the list. The number of libraries covered by the survey was 41, ranging in size from those of New York, Brooklyn, Chicago,

Philadelphia, and St. Louis, down to such comparatively small ones as those of Norwich, Conn., and Fairhaven, Mass.

The complete roster of libraries, in the approximate order of the respective populations served, is as follows:

New York Public Library (Circulation Division—Boroughs of Manhattan, The Bronx, and Richmond); Chicago Public Library; Brooklyn Public Library (Borough of Brooklyn); Pratt Institute Free Library (Borough of Brooklyn); Library Company of Philadelphia; St. Louis Public Library; Boston Public Library; Cleveland Public Library; Enoch Pratt Free Library (Baltimore); Carnegie Library of Pittsburgh; San Francisco Public Library; Toronto Public Library; Public Library of the District of Columbia; Free Public Library of the City of Jersey City; Providence Public Library; Library Association of Portland, Oregon; Worcester Free Public Library; New Haven Free Public Library; Scranton Public Library; Omaha Public Library; Grand Rapids Public Library; Hartford Public Library; Free Public Library, New Bedford, Mass.; Public Library, Lynn, Mass.; City Library Association, Springfield, Mass.; Wilmington Institute Free Library, Wilmington, Del.; Osterhout Free Library, Wilkes-Barré, Pa.; Brockton Public Library, Brockton, Mass.; Malden Public Library, Malden, Mass.; Haverhill Public Library, Haverhill, Mass.; Salem Public Library, Salem, Mass.; Thomas Crane Public Library, Quincy, Mass.; Oshkosh Public Library, Oshkosh, Wis.; New Rochelle Public Library, New Rochelle, N. Y.; Otis and Peck Library, Norwich, Conn.; Brookline Public Library, Brookline, Mass.; Evanston Public Library, Evanston, Ill.; New Brunswick Public Library, New Brunswick, N. J.; Medford Public Library, Medford, Mass.; Carnegie Free Library of Allegheny, Pittsburgh (N.S.), Pa.; Millicent Library, Fairhaven, Mass.

The localities of importance which had to be omitted, owing to the fact that no printed lists or additions were available from their public libraries, were: Detroit, Buffalo, Milwaukee, Cincinnati, Newark, N. J., New Orleans, Los Angeles, Minneapolis, Kansas City, Mo., Seattle, Indianapolis, Louisville, Rochester, St. Paul, Denver, Columbus, O., Toledo, Atlanta, Oakland, Syracuse, Birmingham, Memphis, Richmond, Paterson, Fall River, Dayton, Nashville, Lowell, Cambridge, Spokane, Bridgeport, Albany, Trenton, San Antonio, Reading, Camden, Salt Lake City, Dallas, Des Moines, and Lawrence, Mass.

The list of fiction titles of 1919, arranged in the order of their representation in the 41 libraries under consideration, is as follows:

1. Day, Holman. *The Rider of the King Log*. In 37 libraries. 35.
2. Jerome, Jerome K. *All roads lead to Calvary*. 35.
3. Marshall, Archibald. *Sir Harry*. 35.
4. Knibbs, H. H. *The Ridin' Kid from Powder River*. 35.
5. Johnston, Mary. *Michael Forth*. 34.
6. Curwood, James Oliver. *The river's end*. 34.

 180. George, W. L. Blind Alley. 2.
 181. Lockhart, Caroline. The fighting shepherdess. 1.
- The average fiction title, according to the above summary, would therefore appear to be one that was approved by at least seventeen of these representative public libraries. In other words, all of the titles down to and including Oyen's "Big Flat" (No. 89) would have to be considered average library fiction titles, or better than the average.
- Turning now to the libraries themselves, we find that, according to their inclusion of the above 181 new fiction titles, they rank as follows:
1. New Haven, 137;
 2. Jersey City, 124;
 3. Chicago, 121;
 4. Providence, 111;
 5. Toronto, 109;
 6. Brockton, 107;
 7. Boston, 105;
 8. Hartford, 103;
 9. St. Louis, 100;
 10. New York, 91;
 11. Philadelphia, 90;
 12. New Bedford, 89;
 13. Springfield, 84;
 14. Omaha, 84;
 15. Norwich, 83;
 16. Lynn, 83;
 17. Cleveland, 82;
 18. Malden, 81;
 19. District of Columbia, 80;
 20. Pratt Institute, 75;
 21. Brooklyn, 75;
 22. San Francisco, 73;
 23. Worcester, 73;
 24. Quincy, 69;
 25. Wilkes-Barré, 61;
 26. Salem, 61;
 27. Oshkosh, 60;
 28. New Brunswick, 60;
 29. Wilmington, 56;
 30. Pittsburgh, 55;
 31. Fairhaven, 53;
 32. Portland, 52;
 33. New Rochelle, 51;
 34. Grand Rapids, 50;
 35. Brookline, 47;
 36. Medford, 47;
 37. Haverhill, 47;
 38. Evanston, 40;
 39. Allegheny, 31;
 40. Scranton, 19;
 41. Baltimore, 7.
- The average library, according to the above summary, would therefore appear to be one that had approved 72 or more of the fiction titles under consideration. This would include all the libraries on the above list down to Worcester, and exclude all those beginning with Quincy.
- The data now before us provide abundant food for comment. For instance, should the libraries which head the above list be regarded as ideal, and those in the middle as falling short of the ideal, and those at the bottom as very far from the ideal? Or should the first group be

considered radical in their inclusion of new fiction titles, and the second group as liberal, and the third group as conservative? Similarly, should those fiction writers appearing at the head of our list of titles be considered as first-rate, and those about the middle of the list as second-rate, and those at the bottom as third-rate? Or should we regard only those as first-rate who appear to be approved only by the average number of libraries, that is, those represented in the neighborhood of seventeen libraries?

Again, taking the six leading titles, would it not be interesting to know why the few libraries which apparently do not contain these titles had rejected them? Thus, in the case of Holman Day's "Rider of the King Log" (no. 1), our query would appear to have to be directed to the Boston Public Library, the St. Louis Public Library, the Oshkosh Public Library, and the Carnegie Free Library of Allegheny—these seemingly being the only libraries in which this popular novel is lacking. So, too, Jerome K. Jerome's "All Roads Lead to Calvary" (no. 2) was not found on the lists of the Enoch Pratt Free Library, the Scranton Public Library, the Evanston Public Library, the Medford Public Library, and the Carnegie Free Library of Allegheny. Archibald Marshall's "Sir Harry" (no. 3) was not found on the lists of the Cleveland Public Library, the Library Association of Portland, the Providence Public Library, the Thomas Crane Public Library (Quincy), the New Rochelle Public Library, and the Carnegie Free Library of Allegheny. H. H. Knibbs' "Ridin' Kid from Powder River" (no. 4) appears to have been rejected by the Brooklyn Public Library, the Enoch Pratt Free Library, the Library Association of Portland, the Scranton Public Library, the New Bedford Public Library, and the Carnegie Free Library of Allegheny. Mary Johnston's "Michael Forth" (no. 5) was apparently approved by all of our libraries except the Enoch Pratt Free Library, the Library Association of Portland, the Public Library of the District of Columbia, the Scranton Public Library, the Worcester Public Library, the Evanston Public Library, and the Carnegie Free Library of Allegheny. And James Oliver Curwood's "The River's End" (no. 6) similarly by all except New York, Enoch Pratt, District of Columbia, Portland, Omaha, Osterhout (Wilkes-Barré), and Allegheny.

The probability is great, however, that there was some error in checking these titles with respect to the libraries in question. That this is so would appear from the fact that Marshall's "Many Junes," a 1920 publication, is listed among the additions of the Thomas Crane Public

Library (Quincy), the New Rochelle Public Library, and the Carnegie Free Library of Allegheny, altho his "Sir Harry," as above noted, was not so found. And yet, in the case of James Oliver Curwood, his rejection by the libraries above mentioned appears to hold good also of his "Valley of Silent Men" (1920).

Turning, now, to the bottom of the list, one wonders what induced the New Bedford Public Library to add Caroline Lockhart's "Fighting Shepherdess" (no. 181) to its collections, when no other library on our list appears to have done so. The same holds true of the Brooklyn Public Library and the San Francisco Public Library, which appear to have been the only libraries to approve Harold Begbie's "An English Family" (no. 178); and the New York and Boston Public Libraries with respect to Walter De La Mare's "The Three Mulla Mulgars" (no. 179).

Marie Conway Oemler's "A Woman Named Smith" (no. 7) was approved by 33 of our 41 libraries. The eight libraries which apparently rejected it were: Boston, Pittsburgh, Baltimore, Portland, Scranton, Grand Rapids, New Brunswick, and Haverhill. These same libraries appear also to have continued their rejection of this author in the case of her 1920 novel, "The Purple Heights."

Berta Ruck is one of several writers who have two 1919 novels on our list. Her "Disturbing Charm" (No. 8) appears to have been approved by 32 libraries, and her "Sweethearts Unmet" (no. 71) by only 20. The libraries which approved the first, but not the second, are: New York, Cleveland, Toronto, Portland, Norwich, Wilmington, Springfield, Haverhill, Malden, Fairhaven, New Brunswick, San Francisco, Medford, and Oshkosh. Those which approved the second, but not the first are: Boston, and District of Columbia. Pittsburgh, Baltimore, Scranton, Worcester, Grand Rapids, Evanston, and Allegheny appear to be the only libraries which have rejected both titles.

Of the 31 libraries which approved Zona Gale's "Peace in Friendship Village" (no. 10), the following appear not yet to have approved her 1920 novel, "Miss Lulu Bett": St. Louis, San Francisco, Portland, Scranton, Springfield, Brookline, Haverhill, Medford, New Brunswick, Evanston, Oshkosh, and Allegheny. On the other hand, the public libraries of Philadelphia, Cleveland, New Bedford, Quincy, Fairhaven, and Poughkeepsie, which have approved "Miss Lulu Bett," appear not to have approved "Peace in Friendship Village." Pittsburgh, the District of Columbia, Baltimore, Worcester, and Norwich appear to be the only libraries which have rejected both.

Of the 30 libraries which approved Eden Phillpotts' "Storm in a Teacup" (no. 12), the following appear not yet to have approved his "Miser's Money" (1920): San Francisco, Scranton, New Bedford, Evanston, Haverhill, Wilkes-Barré, Medford, Omaha, and New Brunswick. On the other hand, Boston, St. Louis, the District of Columbia, Brookline, and New Rochelle appear to have approved "Miser's Money," but not "Storm in a Teacup." Pittsburgh, Baltimore, Portland, Oshkosh, Fairhaven, and Allegheny appear to be the only libraries which have rejected both titles.

B. M. Bower likewise has two novels on our 1919 list, namely, "Rim o' the World" (no. 14), approved by 30 libraries, and "The Thunder Bird" (no. 56), approved by 21. These may well be compared with each other, as also with the author's 1920 novel, "The Quirt." Of the libraries which approved "Rim o' the World," the following apparently rejected "The Thunder Bird": New York, St. Louis, Pratt, Portland, Wilmington, Brookline, Evanston, Haverhill, Philadelphia, Wilkes-Barré, Allegheny, and Grand Rapids. On the other hand, Toronto, Quincy, and Malden approved "The Thunder Bird," but apparently rejected "Rim o' the World." The libraries which approved both, and also "The Quirt," are: Chicago, Cleveland, Boston, Jersey City, Omaha, Hartford, Lynn, Springfield, New Bedford, Fairhaven, New Haven, Norwich, Brockton, and Omaha. Those which apparently rejected all three are: Brooklyn, Pittsburgh, Baltimore, Scranton, Salem, Medford, and New Rochelle.

O. Henry's "Waifs and Strays" (no. 16) was found listed by only 29 libraries. The twelve libraries apparently not owning this volume are: Boston, Baltimore, District of Columbia, Scranton, Springfield, New Haven, New Bedford, Brookline, Worcester, Haverhill, Fairhaven, and New Rochelle. This is hardly credible, and we rather suspect that there has been some error either in listing by the libraries in question, or, perhaps, in checking by the writer.

Ethel M. Dell's "The Lamp in the Desert" (no. 18) was apparently rejected by 12 libraries, namely, Cleveland, Boston, Pratt, Pittsburgh, Baltimore, Portland, Malden, Haverhill, Fairhaven, New Rochelle, Wilkes-Barré, and Allegheny. Of these, Boston, Pratt, Fairhaven, New Rochelle, and Allegheny have approved Miss Dell's succeeding novel, "The Tidal Wave" (1920); Fairhaven has also approved her latest novel, "The Top of the World" (1920); while Malden, Cleveland, Pittsburgh, Baltimore, Portland, Wilkes-Barré, and Haverhill appear not to have approved any of the three. Philadelphia, St. Louis, Jersey City, New Haven, Norwich,

New Bedford, Lynn, and Salem are the only ones that have apparently approved all three novels; New York, Chicago, Omaha, District of Columbia, Wilmington, Hartford, Brookline, Brockton, and New Brunswick seem to have approved "The Lamp in the Desert" and "The Tidal Wave," but not "The Top of the World"; Brooklyn, Toronto, Providence, Quincy, and Worcester appear to have approved "The Lamp in the Desert" and "The Top of the World," but not "The Tidal Wave"; Fairhaven has approved "The Tidal Wave" and "The Top of the World," but apparently not "The Lamp in the Desert"; while Pratt, Boston, San Francisco, Springfield, Grand Rapids, Scranton, Evanston, Oshkosh, Medford, and Allegheny have each approved one or another of the three titles, but in no case any two of them.

Of the 26 libraries which approved Peter B. Kyne's "Green Pea Pirates" (no. 29), New York, Cleveland, San Francisco, Pittsburgh, District of Columbia, Omaha, Evanston, Quincy, Oshkosh, and Allegheny appear not to have approved his 1920 novel, "Kindred of the Dust"; while of 23 libraries which have approved "Kindred of the Dust," Chicago, Portland, Brockton, New Rochelle, New Bedford, Malden, and Worcester appear not to have approved "The Green Pea Pirates." The libraries which have apparently not approved either of the two titles are: Baltimore, Scranton, Salem, Wilmington, Haverhill, New Brunswick, and Medford.

Cleveland, Pittsburgh, Grand Rapids, Omaha, Salem, and Fairhaven, altho approving "Patricia Brent, Spinster" (1918), apparently did not extend their approval to "The Rain-Girl" (no. 34), by the same author.

J. S. Fletcher's "The Middle Temple Murder" (no. 42), despite the high recommendation it received at the hands of President Wilson, was yet apparently approved for purchase by only 24 libraries on our list. These are: New York, Chicago, Brooklyn, Philadelphia, Boston, Cleveland, Pittsburgh, Pratt, Toronto, Providence, Salem, Wilmington, Worcester, Springfield, Brookline, Brockton, Malden, Fairhaven, Norwich, Wilkes-Barré, Jersey City, Hartford, New Haven, and New Bedford.

W. Somerset Maugham's "The Moon and Sixpence" (no. 92), despite its rather strong condemnation in some quarters, was yet approved by at least 16 of our libraries. They are: Chicago, Philadelphia, Pittsburgh, Portland, San Francisco, Providence, Hartford, New Haven, New Bedford, Lynn, Worcester, Brockton, Haverhill, Norwich, Evanston, and Allegheny. James Branch Cabell's "Jurgen" (no. 174), however, appears to have been approved by only

three of our libraries, namely, St. Louis, Norwich, and Evanston.

Similar apparent discrepancies and inconsistencies could be shown in many other instances. But enough titles have doubtless already been selected to indicate the scope and extent of the comparative survey which can be made with the aid of a graphic chart such as has been used by the writer in the present investigation.

The inferences to be drawn from the list of libraries showing the order of their inclusiveness of titles, and giving the number of titles approved by each, are no less interesting and provocative of comment. The first apparent inconsistency in this direction presents itself in the case of New Haven (no. 1 on the list) and Jersey City (no. 2), which outrank New York (no. 10) and Chicago (no. 3) in the number of new fiction titles provided for their respective communities. Why, indeed, should the public library users in New Haven be able to obtain 46 more new fiction titles than the library-using public of New York (i. e., the Boroughs of Manhattan, The Bronx, and Richmond)? And why should Chicago and Jersey City be so nearly alike in the number of such titles approved,—121 and 124 respectively?

Again, why should the public library users of New York (i. e., Manhattan, The Bronx, and Richmond) be provided with 91 new fiction titles, and those of the neighboring Borough of Brooklyn (no. 21) with only 75? And in Brooklyn itself, altho the Brooklyn Public Library (no. 21) and the Pratt Institute Free Library (no. 20) run nearly neck and neck in the number of new fiction titles added, yet the actual titles selected are by no means the same. The titles approved by both libraries are the following:

Day. Rider of the King Log.
 Marshall. Sir Harry.
 Diver. The strong hours.
 Johnston. Michael Forth.
 Beresford. The Jervaise comedy.
 Ruck. The disturbing charm.
 Jerome. All roads lead to Calvary.
 Boshier. His friend, Miss McFarlane.
 Phillpotts. Storm in a teacup.
 Curwood. The river's end.
 Dawson. The test of scarlet.
 Gale. Peace in Friendship Village.
 Bindloss. Wyndham's pal.
 Bojer. The face of the world.
 Fletcher. The Middle Temple murder.
 Oemler. A woman named Smith.
 Henry. Waifs and strays.
 Birmingham. Up, the rebels!
 Bottome. A servant of reality.
 Malet. Deadham Hard.
 Andrews. Joy in the morning.
 Bojer. The great hunger.
 Jordan. The girl in the mirror.
 Kyne. The green pea pirates.
 Terhune. Lad: a dog.

Dix. Hands off.
 Hurst. Humoresque.
 Harry. Little daughter of Jerusalem.
 Hewlett. The outlaw.
 Lefèvre. Simonetta.
 Mackenzie. Poor relations.
 Underwood. Short stories from the Balkans.
 Orczy. His Majesty's well-beloved.
 Austin. Outland.
 Chekhov. The bishop.
 French. Best ghost stories.
 Malet. The tall villa.
 Dostoyevsky. An honest thief.
 Hichens. Snake-bite.
 Ruck. Sweethearts unmet.
 Maxwell. Glamour.
 Jacobsen. Niels Lynhe.

The titles approved by the Brooklyn Public Library, but not by the Pratt Institute Free Library are:

Dell. The lamp in the desert.
 Orczy. League of the Scarlet Pimpernel.
 Swinnerton. September.
 MacGrath. The private wire to Washington.
 Cohen. Polished ebony.
 Kaye-Smith. The four roads.
 Aumonier. The Querrils.
 Tagore. The home and the world.
 Benson. Robin Linnet.
 Porter. Across the years.
 Bertrand. The call of the soil.
 James. A landscape painter.
 Hall. The man nobody knew.
 Harper. Off duty.
 Porter. The tie that binds.
 Maxwell. Life can never be the same.
 Porter. Tangled threads.
 Robinson. "Smiles": a rose of the Cumberlands.
 Hergesheimer. The lay Anthony.
 Tracy. Strange case of Mortimer Fenley.
 Chambers. The crimson tide.
 Korolenko. Birds of heaven.
 Smith. The other side of the wall.
 Hedges. Iron City.
 Bates. Sigurd, our golden collie.
 Clarke. Eunice.
 Isaacs. Under the Sabbath lamp.
 Couperus. Small souls.
 Almquist. Sara Videbeck.
 Couperus. Old people and the things that pass.
 Couperus. The twilight of the souls.
 Begbie. An English family.
 Cournos. The mask.

Those approved by the Pratt Institute, but not by the Brooklyn Public Library, are:

Knibbs. The Ridin' Kid from Powder River.
 Mundy. The ivory trail.
 Buchan. Mr. Standfast.
 Bower. Rim o' the world.
 Burt. The branding iron.
 Norton. Drowned gold.
 Hay. The winning clue.
 Sinclair. Burned bridges.
 (Anonymous) The rain-girl.
 Mulder. The outbound road.
 Williams. The sea bride.
 Wodehouse. A damsel in distress.
 Packard. The night operator.
 Williams. All the brothers were valiant.
 O'Higgins. From the life.
 Gregory. The bells of San Juan.

Steiner. Sanctus Spiritus & Co.
 Bartley. A woman's woman.
 Bercovici. Dust of New York.
 Pertwee. The Old Card.
 Sackville-West. Heritage.
 Cannan. Mummery.
 Gregory. Yellowleaf.
 Hanshew. Riddle of the purple emperor.
 Post. Mystery at the Blue Villa.
 Ogden. Land of last chance.
 Packard. From now on.
 Futabatei. An adopted husband.
 Richardson. The tunnel.
 Goldring. The fortune.
 Keller. Seldwyla folks.

Johnson. John Stuyvesant—Ancestor.
 Macfarlan. The inscrutable lovers.

The foregoing queries and comments would seem to be sufficient to show that a comparative survey such as this was intended to be, is very much worth while. But until ways and means are provided to make such a survey all-comprehensive, the conclusions drawn therefrom can at best be only tentative. Only the hearty co-operation of all of our public library systems would conduce toward that end. In the writer's humble opinion, this is a "consummation devoutly to be wished."

Semen Afanasevich Vengerov 1855-1920

IN November last the sad news reached this country of the death of the Russian bibliographer, Professor Semen Afanasevich Vengerov. To every intelligent Russian, to whom this noble and modest personality was known, and who was familiar with the great life work of this man, the news of his death was too painful to be accepted at first. Later information, however, confirmed the news. Professor Vengerov died of typhus, the epidemic which is raging in Russia as the result of famine in the wake of over six years of war, civil war and economic blockade. One of his daughters, who assisted him in his bibliographical work also died a victim of the epidemic, and one of his sons was killed in the war. Up to his last day Professor Vengerov remained at his post as head of the Department of Bibliography (Knizhnaia Palata), a government institution created during the revolution for publishing National bibliographies and carrying on book exchanges.

Vengerov was a professor at Petrograd University and the author of many works on the history of Russian literature, but the most important, that which he regarded as his life work, was the collecting of material for a complete Russian national bio-bibliography. And this great work he carried on at his own expense, devoting all his spare time to it. In 1886 he published the first volume of his "Critico-biographical dictionary" (Kritiko-biograficheskii slovar), which gives in alphabetical order all Russian scientific men, scholars and writers, including journalists, compilers and translators, with full biographical and bibliographical data, and critical reviews of the works of prominent writers. The new publication was received in Russian literary circles with high appreciation, but the financial result was most disappointing;

the author was able to publish only as far as the third letter of the Russian alphabet, when his private finances were exhausted and he had to turn to more remunerative literary work to make up for his losses.

His ardor, however, unshaken, the enthusiastic young professor continued the registration of Russian authors and books. He was in constant correspondence with the living writers and scientists, collecting autobiographical notices and portraits of them. In 1895 the Russian collector and book lover Yudin subsidized the publication of the first three volumes of Professor Vengerov's "Russian Books, 1708-1893" (Russkii Knigi, 1708-1893). For financial support for the continuation of this publication he applied to the Academy of Sciences. His application was favorably received and it was expected that the needed appropriation would be granted by the Minister of Finance, Count Witte. But once again Professor Vengerov was to meet a fresh disappointment: at a personal interview with Count Witte, the latter declared that a bibliography of Russian books was of no "national significance," and the appropriation was not granted.

In spite of this set-back, and notwithstanding the great personal expense in money and time the self-denying idealist continued his work keeping his bio-bibliographical card catalog up to date. In 1912 he succeeded in obtaining a loan from one of the Petrograd banking houses and was able to proceed with the preparatory work for the publication of the second revised and illustrated edition of the "Critico-biographical dictionary of Russian men of letters and science from the beginnings of Russian literature to our own days." The first three volumes of the work were to be a preliminary list of

the writers, scientists, journalists, translators and compilers. The first volume of this preliminary list was published in 1915. It gives full names, pseudonyms, profession, places and dates of birth and death, etc.

In the preface of this volume the compiler tells the history of his life work and gives the following data about his collection: The autobiographical archive contains some thirty-five hundred autobiographies of famous Russian men of letters and science; if printed in book form this would make a work of fifteen volumes of five hundred pages each; the card catalog contains about two million cards. The autobiographical archive, the portrait files and card catalog fill up six rooms, from floor to ceiling, leaving only narrow spaces for passage in between. He refers also in the preface to the fact that being already in his sixtieth year he would probably not live to see his work completed in print, for the printing of the whole work would take at least twelve years, and he expresses some anxiety about the guardianship of his literary treasures after his death.

The revolution relieved him of this anxiety; it recognized the national significance of his life work and created the Department of Bibliography for the publication of the national bibliography at state expense. Professor Vengerov was up to his last days the head of this department. We have no information as to whether the publication of his work is being continued; we rather doubt it, knowing that the Russian people besides shortage of food feel great want of paper, type and printer's ink—articles for which Russia prior to the war and the blockades depended largely on foreign imports. But we are glad to know, that the literary treasures of this great scholar have not perished, but are safeguarded in a public institution.

HENRIETTE M. DERMAN,

*Classifier and Cataloger of the
Russian Collection, Library of Congress.*

Correcting a writer who mentions the New York Society Library, established in 1754, as the oldest library in the United States, Mrs. Walter Horstmann of Philadelphia writes to the *New York Times* drawing attention to the fact that the Darby Library, Delaware County, Pa., was established in 1743, and gives as her authority Smith's "History of Delaware County, Pa.," page 561.

Library Needs of Immigrants

Library needs of immigrants are discussed in "A Stake in the Land," by Peter A. Speek, published March 25th, by Harper and Brothers as the fourth of eleven Americanization studies made under the auspices of Carnegie Corporation of New York. "As time passes and his mastery of English grows," says Dr. Speek, "he (the immigrant) begins to read items in the daily papers and stories in the Sunday editions. Later he takes up the reading of books, perhaps first those related to his trade, or the subjects which are connected with his future plans in America.

"Still later he begins to read books about America in general, its history, geography, nature, social life, etc. An immigrant seldom takes to American fiction. He ardently tries to be practical, being mainly interested in that which is useful and helpful. When he reads general literature about America he does this for the purpose of learning to know his new country, knowledge which would help him to make a success here.

"The writer has often been approached by immigrants with requests that he recommend literature on, for instance, making a certain kind of candy, or pickles, or on hog raising or concrete building. Frequently he has had to translate or assist in the interpretation of various formulas and receipts.

"A demand of this kind for literature by the immigrants indicates three problems in connection with their education thru the printed word: first, the immigrant should be advised in his selection of publications, told which might be the most useful to him. He is quite unable to make this selection for himself; second, the means for acquiring the desired publications should be supplied.

"As a rule the immigrant has little money to spare for books; third, there should be encouragement and cultivation of the reading habit among the immigrants as an efficient means of their general education and, thru this, of their Americanization.

"All these problems can be met thru the institution of the public library—a great agency for socializing knowledge in a modern democracy. Tho America is one of the countries most advanced in the development of public libraries, still the development has not kept pace with the requirements.

"This is especially true in regard to the rural communities. Particularly in rural immigrant colonies visited by the writer during the past year about thirty had no library facilities at their disposal, while the remaining ten were able to pride themselves on some sort of a library, either school or parish."

TO HIGH SCHOOL LIBRARIANS

THE Library Department of the National Education Association is compiling a list of trained high school librarians. A questionnaire has been sent to all such librarians whose names and addresses are known. If any one has failed to return the questionnaire, he is asked to do so at once. Others who have not received a copy are urged to send for it, addressing Miss Charlotte E. Smith, Librarian, Harrison Technical High School, Chicago, Ill.

The A. L. A. Library in Coblenz

IN the area served by the A. L. A. library at Coblenz there are approximately 15000 men not to mention the many officers' families and the large number of welfare workers with the Y. M. C. A., Salvation Army, Red Cross and the five in our own organization. This group, known officially as the A. F. in G., the men have nicknamed "Allen's Family in Germany," General Allen being the Commanding Officer.

The Coblenz members, make up a small American city which has developed its own activities and is practically independent of the German element except for a certain amount of manual labor. The same is true of those stationed in Andernack, Mayen and, to some extent, those in the small towns thruout the occupied area. In all these places, families have been supplied with housekeeping apartments in German homes, the soldiers are comfortably quartered in barracks formerly occupied by German troops while the rest of the personnel is accommodated in several big hotels which have been commandeered for the purpose. Material needs from fresh vegetables to clothing and shoes can be supplied by the American commissary, which is probably the most complete institution of its kind ever maintained by the Army. Its advertisers call it "the foremost American store in Europe." The splendid Festhalle, formerly the headquarters for the town's social life, has been turned over to the Y. M. C. A. which maintains reading rooms, writing rooms, billiard and pool rooms, etc. and conducts a cafeteria which does a flourishing business. Every evening some sort of entertainment is offered, either movies depicting the familiar scenes of daredevilry from our mythical Wild West or a dramatic performance by an American stock company. The Coblenz symphony orchestra is permitted to play one night a week for the benefit of the Germans who fill the great hall, the galleries alone being reserved for Americans.

The educational system of the Army has been advertised well enough so that it is not necessary to dwell on that in detail. Sufficient to say that twenty-five hundred men are now taking courses in the schools and over four thousand waiting their turn. In addition to this, a school is maintained by the "Y" for American children

with courses provided for every age from kindergarten thru High School.

Religious instruction is not neglected, but is well looked after by a corps of chaplains and volunteer Bible class instructors. The chief place of worship is in the Church of the Palace, one of the many residences of the ex-Kaiser.

In such a community it is unnecessary to point out the necessity for a library. Can you imagine a city in the United States with that number of adult inhabitants carrying on successfully without a library? Yes, there are a few such, but how much effort is being spent on teaching them the error of their ways! Think then, how much more necessary it is in a city of this kind where English books and magazines are not available in any other way. Fortunately, a good library came here with the first troops and has become an indispensable adjunct of the community. It was moved into its present location in September, 1919. From that time, it has resembled a public library much more than a camp library as we grew to know them in the States.

A former German Officers' Club makes an ideal building for the purpose. It is so arranged that all the rooms open into one central hall where the delivery desk is located. Two small rooms are used respectively for a reference room and an Officers' reading room, one large room contains the stacks and the ball room looks as tho it had always been intended for a big, comfortable reading room for American soldiers. Even two German officers who came to Coblenz on a visit and asked permission to see their former lounging place could not repress their feeling of admiration and wonder at the transformation. Polished floors, comfortable chairs, big, soft davenports and artistic lights give an air of luxuriousness to the place and invite one to linger in it to enjoy its comforts. For an Army post, it is certainly a library "de luxe."

Evenings are the popular times and often every available seat is taken and a steady procession coming and going. Many of the same faces are seen every night, enlisted men studying for a commission, or for entrance to West Point or in some of the various educational courses, officers and their wives, the former to

bury themselves in the *Army and Navy Journal* and the latter to pore over *Good Housekeeping* and the *Ladies' Home Journal* in an effort to vary the daily menu from the somewhat limited repertoire of the German maid. Often the children come and carry off books from our small collection of juveniles.

Many are the reference questions asked which would be so simple to answer if one were in the smallest community in America, but are truly baffling in a foreign land. Who would think that it would be a problem to find a picture of a turkey which could be copied for Thanksgiving cards? No farm journal, poultry book or general magazine could produce what we wanted until the November *Century* appeared a little too late to be of use. The *Amaroc*, the daily newspaper published by the forces here, depends on the library for much of its information for its special articles, but a request for anecdotes as to how the A. E. F. spent its first Xmas in Europe could not be met, as our newspaper and magazine files only go back as far as August, 1919. "Can a man become President of the United States if born of American parents temporarily residing in Europe at the time of his birth?" We all had our ideas on the subject but there were no documents available to settle the question. Sometimes we are more fortunate, however. We considered it a real streak of luck to receive a Sigma Nu quarterly wrapped around a book which came in just at a time when one of our steady patrons was ambitious to have his fraternity seal engraved on a signet ring. Notwithstanding the many posers, our reference collection is remarkably good and many a really important question has been solved with its help.

"I'll tell you a man who writes good books. I don't know whether you know about him or not. His name is Zane Grey." This original remark greeted me soon after my arrival when I was taking my turn at the desk. After having spent sixteen months in Army camps and hospitals in the States, I could hardly believe that a man in the Army had yet to read any of those popular books. This author still holds his own, nevertheless, and no matter how many copies we get, we have not enough. The charm of medieval romances is much enhanced by the local setting, and Stanley Weyman and Robert Barr have many readers. Even Caesar's Gallic War is in great demand, as well as books

on medieval history. With a ruined castle on every hill as mute testimonials of an ancient civilization, the narratives in these books take on a new meaning.

The war is still being fought in retrospect and the chronicles of the German contestants, especially Hindenburg, Von Tirpitz, etc., are reserved weeks and months ahead.

Never were magazines distributed so generously to any other community, yet there are never enough, and it is a hard matter to decide the relative merits of the different organizations asking for them. In some of the outposts there are not more than a dozen men but the magazines must mean more to them than to a larger number near enough the base of supplies to get what books they want when they want them.

Every "Y" hut in the area is equipped with a collection of our books and supplied regularly with magazines. In addition we have three flourishing branch libraries in the larger places in the area where our men are stationed. Each one of these could keep one librarian busy full time, but it has only been possible to give them two days a week, the libraries being left in charge of enlisted men the rest of the time. The Hospital has its librarian for half the time and the patients receive that same personal attention which met with such approval in the Army and Navy hospitals in the U. S. Many individual companies have their own recreation rooms where collections of books have been placed, so that a man has little excuse for not reading if he wishes to, no matter where he is located.

To say that the library is appreciated is putting it mildly. Since the announcement that the A. L. A. would soon withdraw, there have been scores of people each day, who have come to the library, stopped us on the street, interrupted us at meals, to ask us, "Why? When? What can we do about it? Why not have a local drive?" etc. One soldier even made the rash statement that the Army would turn Bolshevik if the library were taken away, which is what they seem to think is inevitable if the A. L. A. withdraws its support.

And our Allies! The British and the French, of whom there are many here, are the most eager readers and can never say enough in praise of the American people who have made this library possible. One British patron is so enthusiastic that he succeeds in getting long articles on the subject into the *Cologne Post*

periodically, and what's more, the information he gives them is accurate. For most of our French books we must thank M. Tirard of the French mission, who generously donated a good-sized collection for the use of those who can read the language.

The Germans who read English look on this institution with particular longing. The Army will not permit us to extend to them the privileges of the library and many are the subterfuges they employ to convince us they are eligible. "My wife is English," is a very common contention in spite of international law which makes a wife share her husband's nationality.

Those who lived in Canada and were re-

patriated during the war seem to feel they have a special claim on us, but perhaps the most original contention to date was that of a man who proclaimed himself an American and when questioned more closely said he had once lived in America, but had neglected to take out his naturalization papers but was an "American by principle."

When it is our aim in life to spread the gospel of good reading, it seems hard to refuse anyone the opportunity to get it, but the time has not yet come when the two nations can meet on a common footing.

OLA M. WYETH, *Librarian.*

A. L. A. Library, Coblenz, Germany.

The Question of Importations

Letter from G. P. Putnam's Sons

To the Editor of the LIBRARY JOURNAL:

In your issue of March 15th you print an article headed "100% Profit Plus," signed by the A. L. A. Committee on Book Buying.

In this article it is stated, "Many librarians will be shocked to learn that an English book costs more than twice as much in New York as in London. Yet that is the rule in some houses." Further on there are certain figures quoted as to importing.

Our house has been importing books from London for three-fourths of a century. We have never been able to figure the incidental costs of importing at less than eight per cent, and these costs in our experience run from eight per cent to twelve per cent. During the years when we were paying huge war risk insurance, plus abnormal ocean freights and other abnormal charges, the costs ran still higher.

There is no longer war risk insurance. Ocean freights, however, are still quite different from the rates under pre-war conditions, and there are other items of expense which are apt to be overlooked in making up a cost sheet.

For instance, up to recent times, we have been paying from fourteen shillings to twenty-two shillings each for packing cases which in 1913 cost us five shillings. However, it is not with the details of importing that we are at present concerned.

Following the general statement about prices six titles are quoted from the Putnam London

catalog, with the corresponding New York prices as follows:

"Carter & Arnold, Field Artillery			
		s.	d.
Instructor"	\$6.50	35.	0
"Dock & Stewart, Short History			
of Nursing"	3.50	17.	6
"Dunn & Jessup, Short Golf			
Talks"	3.00	15.	0
"Goizet, Never Grow Old"	2.00	10.	0
"Knappen, Wings of War"	2.50	12.	6
"Walsh, Hispanic Anthology" ..	5.00	25.	0

Now all six of these publications are *American* books made in this country and exported to London. We note below the comparative net cost of these books to American libraries when bought here, with the library discount of ten per cent to twenty-five per cent, and when imported. We are assuming the lowest possible importing cost:

"Carter, Artillery" \$5.85 to \$4.88.	
	If imported. . \$7.00 to \$8.75
"Dock, Nursing" 3.15 to 2.63.	
	If imported. . 3.50 to 4.40
"Dunn, Golf" 2.70 to 2.25.	
	If imported. . 3.00 to 3.75
"Goizet, Grow Old" 1.80 to 1.50.	
	If imported. . 2.00 to 2.50
"Knappen, Wings" 2.25 to 1.88.	
	If imported. . 2.50 to 3.15
"Walsh, Hispanic" 4.50.	
	If imported. . 5.00 to 6.25

Undoubtedly there is an occasional instance where an English publication bought here, either in an imported edition or in a reprint, will cost a library somewhat more than if imported specially to order. Such instances are rare. In nearly every instance, however, the American price is less, and often much less when the library discount is taken into consideration.

Excepting the cheap secondary reprints of American fiction, we do not think there are any instances where American made books bought in England at the English price will not cost considerably more than copies of the American edition bought here.

Respectfully,
(Signed) G. P. PUTNAM SONS.
by Irving Putnam, Vice-Pres.

Further Word from Dr. Raney

"100 % PROFIT Plus" has drawn the desired fire. In this issue of the LIBRARY JOURNAL is to be seen an impressive display of it, tho not quite typical. As wholly responsible for that outburst, I think I owe my committee colleagues the unasked shelter of an observation post while this particular counter is delivered. Hence the personal signature.

Mr. Putnam either got his bearings mixed or miscalculated the velocity of the wind, for he has poured a terrific volley into the ranks of his own allies. They will not enjoy his contribution a bit, for he says that if he were importing six of his books listed at £5.15.0 in London he would sell them in New York at \$23 to \$28.80, or 20 to 25 cents a shilling, an average of 22.5 cents a shilling. Yet my outside price of 23 cents was supposed to be under bombardment!

Mr. Putnam was led into this misadventure by the assumption that I was advising libraries to buy his American issues in England. Not at all. His titles were cited for quite another purpose. The article under discussion was a photograph, not a description. The interpretation, as said, was to follow. What the snapshot of his house at that particular angle of time showed was his commendable custom of selling his American books to the British at a shilling for 20 cents. Glad of it. Had the camera a voice, it would have said, "Do as much for Americans."

Mr. Putnam figures the incidental costs of importing at from eight to twelve percent, as

against my six. He ought to know, for he pays the bills. But we pay them, too, and my figure was not set down at random. I had examined a long file of invoices for parcel post shipments from London, covering the past year. Carriage proved to cost six percent of the charge for books. I submitted that figure to an importing publisher, whose name would command respect, were it called. He said he had been counting it at twelve percent, but when the case was re-examined he found we were both right, only his percentage was based on the wholesale price to him, while mine was on the retail price to us. Perhaps my critic has fallen into the same pit.

Longmans, Green & Company, as already hinted, have special schedules for steady customers, which make library patronage of their importation list under the best terms not inadvisable, except in the case of large orders, where time is of less moment, but the same cannot be said of their list prices to individuals.

The Negro in the wood pile is discovered in the comments of The Macmillan Company and The Oxford University Press. The wide disparity between the English and American prices is maintained out of regard for the bookseller. Most of the books listed at 40 cents a shilling and over "have their major sale thru bookstores where a discount of more than 20% has to be given to the dealer for quantity orders." Macmillan claims that, in view of this discount, the cost of freight, duty, etc., the forty cent rate is not excessive. They add that not all their English books are so priced; as, e. g., Lamb's Higher Mechanics, in my list, which is retailed to libraries at \$6.40, or 26 cents to the shilling, the English list price being 25 shillings. But this does not drown out the cry of \$16.50 for Who's Who 1921, brought from London for two guineas.

The Oxford University Press, tho establishing a rate of 28 cents a shilling for libraries, admits that this is too high and concludes with this statement:

"We are glad to advise you, however, that we are in communication with our London house regarding the whole question of prices; and hope it will result in our being able to purchase books at a lower figure, which will in turn enable us materially to reduce our selling price."

Thus, the authenticity of the picture is not questioned. The prices cited are those charged individuals, and with varying discount to libraries as well. In general those requiring these

publications are students, investigators and libraries—those who can least easily support this pyramid of expense. The excuse for this tax on brains is that a bastard second dealer may be introduced into the chain of inheritance. When a jobber orders an English book thru the American house of its publisher, the customer contributes to three pockets. There should be no profit whatever to the American house in such a transaction, so that the temptation of the lazy jobber to use it would be rebuffed, with a consequent clipping of 20% and

upward from the list prices of importations.

To the international publisher here is a concrete proposal: Charge to libraries your English importations at the English price, converted at the current rate of exchange, plus two cents a shilling to cover carriage to New York.

Pending the acceptance of that proposal, we, whether individuals or institutions, will order from London if we are wise.

M. LLEWELLYN RANEY.

Baltimore, Md.*

The Loose Leaf Index to Legislation*

“THE many requests for ‘all the statute law’ on various subjects, have resulted in an accumulation of lists which it is believed should be made generally available.

“Those who have attempted to compile lists of citations such as these, will at once recognize their incompleteness. The almost utter hopelessness of ever accomplishing a complete index to the statute law of all the states, has suggested the ‘loose-leaf’ method of putting forth such citations as have been assembled. The ease with which this method lends itself to revision and extension leads to the hope that there may eventually result a useful guide to ‘some of the law’ which will lighten the labors of investigators in the field of legislation.

“The plan of printing on but one side of a leaf has been adopted in order that the leaves may be cut to standard card size and inserted in a catalog if desired. Standard library cards containing the same citations are printed concurrently with the Loose Leaf Index.

“Unless otherwise indicated, citations are to the periodical publications of state legislation known variously as Acts, Laws, Session Laws and Statutes.”

Since the above preface was written in 1919, the interest shown by users of the *Index* has led to an enlargement of program and lists of more pretentious nature are in progress. The issuance of the first sheets was an experiment: their continuance is now assured.

The *Index* may be had as a whole by subscribing to all sheets or cards as issued, at a

cost of about six dollars per year for sheets (five cents per sheet) or about twelve dollars per year for cards (five cents per card). Citations for individual subjects may be had at the same rate. Those who do not desire to subscribe to the *Index* as a whole, may receive for fifty cents a year, lists of the subjects as issued, from which sheets or cards may be selected if desired.

As the Germans See Us at Coblenz

Here is a German appreciation of the A. L. A. library system in the Coblenz region. It appears in the initial number of *Bücherei und Bildungspflege*, the new title of *Blätter für Volksbibliotheken*. It is contributed by the Direktor of the Landes-und Stadt-Bibliothek at Düsseldorf, Dr. Constantin Nörrenberg, who felt sufficiently interested to pay the Library three visits in the course of a year. Incidentally, he testifies to uniform courtesy of reception.

The history of the project and its operations are given, together with statistics of accession and circulation. He was especially impressed with the publicity methods employed, seeing, he says, placards everywhere wooing the soldiers in. The conclusion of the whole matter he gives thus (in free translation):

“It was depressing to see a foreign military establishment in a German officer’s casino, on German soil, which is for years to be in foreign possession, but candor compels the confession that the American Army, in conjunction with the American Library Association, has organized its provision of reading material for the troops in model fashion (in mustergültiger Weise).”

*“Loose Leaf Index to Legislation. Compiled and published by G. Elstner Woodard, of the Bureau of Government, University of Michigan, Ann Arbor, Mich. This note is sent in response to the editor’s request for a note on this service which is still unknown to some reference workers.”

Recent Motion Pictures Based on Fiction or Drama*

- ALL SOULS' EVE.** Realart. 6 reels. Star: Mary Miles Minter.
A romance; taken from play by Anne Crawford Flexner.
- BIG PUNCH, THE.** Fox. 5 reels. Star: Buck Jones.
A western melodrama; story and scenario by Jules G. Furthman.
- BLACK PANTHER'S CUB, THE.** Ziegfeld Amusements. 8 reels. Star: Florence Reed.
Parisian melodrama; taken from the story by Ethel Donoherm.
- BOYS WILL BE BOYS.** Goldwyn. 5 reels. Star: Will Rogers.
Comedy-drama; taken from Irvin Cobb's story.
- BRANDED SOUL, THE.** Stoll. 5 reels.
Romantic melodrama; taken from the novel by Eliza Humphreys, "The Iron Stair."
- CALL OF YOUTH, THE.** F. P. Lasky. 5 reels.
English romance; taken from play by Henry Arthur Jones
- CHICKENS.** F. P. Lasky. 5 reels. Star: Douglas McLean.
Comedy-drama; taken from the story "Yancona Lilies" by Herschel S. Hall.
- CONNECTICUT YANKEE AT KING ARTHUR'S COURT, A.** Fox. 8 reels. All star.
Comedy; taken from story by Mark Twain.
- DON'T NEGLECT YOUR HUSBAND.** Goldwyn. 6 reels. Star: Mabel Scott.
Domestic drama; taken from story by Gertrude Atherton.
- EXTRAVAGANCE.** Metro. 6 reels. Star: May Allison.
Domestic romance; taken from story by Ben Ames Williams.
- FAITH HEALER, THE.** F. P. Lasky. 7 reels. Stars: Milton Sills and Ann Forrest.
Drama of the power of faith; taken from play by William Vaughn Moody.
- FIRST BORN, THE.** Robertson-Cole. 6 reels. Star: Sessue Hayakawa.
Chinese marriage and social drama; taken from the play by Francis Powers.
- FLAME, THE.** Stoll. 5 reels. Star: Evelyn Boucher.
A drama; taken from novel by Olive Wadsley.
- FOUR HORSEMEN OF THE APOCALYPSE, THE.** Metro. 11 reels. All star.
South American French war drama; from novel by Vicente Blasco Ibañez.
- GREAT DAY, THE.** F. P. Lasky. 5 reels. Star: Arthur Bouchier.
English drama; taken from play by George R. Sims and Louis N. Parker.
- KENTUCKIANS, THE.** F. P. Lasky. 6 reels. Star: Monty Blue.
Romance of feud and politics; from story by John Fox, Jr.
- LYING LIPS.** Associated Producers. 7 reels. Stars: House Peters and Florence Vidor.
Drama of engagement and marriage; taken from story by May Edington.
- MAD MARRIAGE, THE.** Universal. 5 reels. Star: Carmel Myers.
Romantic drama; taken from novel "Cinderella Jane" by Marjorie Benton Cooke.
- MISTRESS OF SHENSTONE, THE.** Robertson-Cole. 6 reels. Star: Pauline Frederick.
English romantic drama; taken from story by Florence Barclay.
- OFF-SHORE PIRATE, THE.** Metro. 6 reels. Star: Viola Dana.
Comedy romance; taken from story by F. Scott Fitzgerald.
- OUT OF THE CHORUS.** Realart. 5 reels. Star: Alice Brady.
Society drama; taken from story by Harry Chandler and Wm. B. Laub.
- PLAYTHING OF BROADWAY, THE.** Realart. 5 reels. Star: Justine Johnstone.
Romance; taken from the story "Emergency House" by Sidney Morgan.
- PRICE OF POSSESSION, THE.** F. P. Lasky. 5 reels. Star: Ethel Clayton.
English society romance; from story by Winifred Bogga.
- ROADS OF DESTINY.** Goldwyn. 6 reels. Star: Pauline Frederick.
Romantic melodrama; taken from the O. Henry story and Channing Pollock's play.
- SCRAMBLED WIVES.** First National. 7 reels. Star: Marguerite Clark.
Society romance; taken from stage play by Adelaide Matthews and Martha M. Stanley.
- SOCIETY SECRETS.** Universal. 5 reels. Star: Eva Novak.
Romantic drama; taken from story by Christine Bennett.
- STRAIGHT IS THE ROAD.** F. P. Lasky. 7 reels. Star: Matt Moore.
Romantic melodrama; taken from story by Ethel Watts Mumford Grant.
- TAVERN KNIGHT, THE.** Stoll. 6 reels. Star: Eille Norwood.
English romantic drama 1651; taken from story by Raphael Sabatini.
- TIDAL WAVE, THE.** Stoll. 5 reels.
Romance; taken from novel by Ethel M. Dell.
- TRUANT HUSBAND, THE.** Hodkinson. 6 reels.
Comedy drama; taken from Albert Payson Terhune's story.
- WHAT EVERY WOMAN KNOWS.** F. P. Lasky. 7 reels. Stars: Conrad Nagel and Lois Wilson.
Domestic comedy; taken from play of Sir James Barrie.
- WITCHING HOUR, THE.** F. P. Lasky. 7 reels. Star: Elliott Dexter.
Drama of the power of suggestion; taken from Augustus Thomas' play.
- YOUR DAUGHTER AND MINE.** C. B. Price. 6 reels.
Social problem; taken from Stanley Houghton's play "Hindle Wakes."

Since the beginning of the year, the *Wilmington Evening Journal* has printed for the Free Library short lists of technical books relating to the various trades. A list has appeared each day, and within an hour or so after the *Journal* has been published, the library assistants can tell what list has appeared, from the demand at the desk.

Twenty-five cents will be paid for copies of the *JOURNAL* for Jan. 1 and Feb. 1, 1921, returned to this office.

*From photoplays reviewed by the National Board of Review since January.

Library Assistants and the Summer School

IS the library school necessarily the best place for the young library assistant to spend the summer in study? Will it surely give her the most desirable returns from her investment of time, energy and money? Upon consideration it appears that there are some cases in which these questions must be answered in the negative.

The short summer courses in library methods have supplied such a definite need in the profession that it has been easy to take for granted that the library course is the one to be followed by any library worker who goes to summer school, whatever her position, or whatever the type of library in which she is employed.

The courses of study of the library summer schools are planned to cover hastily the rudiments of library practice in the various kinds of work—order, accession, classification, cataloging, loans, reference, etc.—which must be done in every library. As at present conducted these courses are primarily helpful to the librarian in charge of the smaller library who has to plan and carry out all the various activities of her library, without direction, and who must find the solution to her own problems. To such a librarian the summer short course is of maximum value, giving her a better perspective in her work, and a better knowledge of simplified but efficient methods in the different departments.

This kind of training is relatively not so valuable to the young assistant recently from high school, holding a subordinate position in a larger library, if that library is well organized and administered in a professional way. In such a library the routine is systematized and all technical work is done under the supervision of experienced people. In a comparatively short time the new assistant can be taught the routine of such technical work as will be entrusted to her. She can gain a fairly intelligent conception of the interrelation of the departments of that library after a few months' experience. The problem for her is not to introduce new methods or devise systems, but to follow those already established. The mastery of the detail in the various departments may be left until she comes to work in them. In answer to the argument that the library cannot afford the expense of giving this instruction to its assistants, there is the fact that actual

details of the methods as followed in any specific institution must be taught anyway, even to the assistant who has had the summer school work.

In almost every case, on the other hand, the possibilities of usefulness and development are limited for the high school graduate by her lack of knowledge of books and of affairs. She needs more than a high school education to meet successfully the demands that will be made on her as a library worker. The majority of adverse criticisms of library assistants, made by library users are based, not on poor technical work, but on ignorance of the insides of books and what is going on in the world. Even the newest assistant must at times work in a position where she will meet the public, and from her the casual borrower will form a judgment of the efficiency of the whole library.

It is even more necessary for her to have a good educational equipment of a general nature than for her to understand the technicalities of all the various library processes. A fairly broad acquaintance with literature and with history are essential to any satisfactory work at the circulation desk; the most elementary reference work is very likely to involve a knowledge of the important economic questions of the day; in the catalog department even the helper needs some acquaintance with languages; every assistant needs to know something of the fundamentals of sociology if she is to have an intelligent grasp of the larger function of her library and its proper place in the community. In whatever department the young assistant is placed, she will make more satisfactory progress and develop greater usefulness to the institution if she can bring to her work preparation in some of the cultural and informational subjects embraced in the college curriculum.

Many library assistants have attended summer schools at considerable personal sacrifice. Often paying all of their own expenses, sometimes sacrificing their entire vacation, and not always with any definite prospect of better remuneration on their return to their libraries, the investment of time, money and strength is a large one. The question may well be raised in the mind of the prospective student, and in the mind of the librarian with whom she is associated, as to how this investment may be made to bring the highest possible returns.

On the subject of summer schools, Miss Plummer said in her "Training for Librarianship":

"The case of the small library was at once improved not only by the greater efficiency of those librarians or assistants who had taken the summer courses, but by the general arousing of ambition and stirring of interest among librarians by the new opportunity and new knowledge. The broadening effect was at once perceptible."

It is not the intention of this article to question that statement, nor to attempt to discount the value of summer training for library work. It is its purpose merely to present the question whether, in the specific case of the young assistant who has not continued her education beyond the high school, and who is working under the direction and supervision of those capable of instructing her in the details of library routine, it is not more than possible that she may better serve her profession, her library, and herself by taking summer courses in literature, history, economics, sociology, or other subjects of general educational importance, than by devoting herself for a few weeks to a survey of the rudiments of library practice.

JOHN S. CLEAVINGER, *Instructor.*
University of Illinois Library School.

Library Service to Business Men

IN his book, "Business Research and Statistics," (Appleton, 1920), Justus George Fredrick says, "Public libraries are of only minor value, because of the fact that they are so largely repository for books which are years old, and because of the lack of up-to-date completeness; but more than all because of the utter lack of existence of much of the data which business most desires.

"Even without special funds libraries might readily make a more up-to-date collection of trade directories, business catalogs, pamphlets and data of current and general value to business men. They do not even maintain good collections of business books. Data on specific industries and specific business problems of general applications should be coupled as a considerable and increasing volume of data exists but is not assembled for practical use. This is the service a library is intended for, and the delusion that the interests of the community lie in fiction, government reports and

stale literature generally is a costly one to the public. Greater support and endorsement would come once business men increased their respect for libraries by finding something else than musty out-of-date tomes in them.

"A really creative point of view on public library service to business would include an actual research staff, trained not in the narrow atmosphere of routine library practice, but in live business research such as business men desire and can use with profit. There should be a special alert telephone service available to business men, even if on a basis of nominal charges, a commercial photography service by which quick copies of tables, statistics, charts and selected contents of books could be made far more rapidly and accurately than by copying from them. There should be an aggressive effort to compile specialized data, bibliographies, extracts and summaries on business subjects, not in the lumbering library, professional style, but in business style. There should be an advisory board of business men directing such service, and bulletins should be issued endeavoring to show business men how to use the library for their profit.

"It is a definite community loss when business men fail or succeed only indifferently at their work; and it is of course a truism that if they had better information they would succeed better. The public library can be a very important link in the chain for greater local business prosperity by placing the results of other men's business knowledge and experience at the ready command of those who can profit most. Unfortunately for the community and themselves, the men who most need the benefits of business research are the most indifferent to it."

Wanted: A Library Smoking Room

Writing to the editor of the *Detroit Free Press*, A. F. advocates a provision for a smoking room in the new Public Library building.

"The day," he says, "of the closed shelf and the turnstile barrier in our library has happily passed." . . . "Today our library is a place of social and cultural intercourse with the living as well as communion with the dead. We welcome the freedom, the bookish browsing and the easy chair. It is the day of flat dwellers and clubs. Give us the smokers' room and the pipe (not of the dulcet but of the fragrance of the weed) and the book."

Foreign Arts and Crafts Exhibits at Los Angeles

PRONOUNCED and unusual results from a series of exhibits, showing the arts and crafts of the predominating nationalities in Los Angeles, are being achieved by the Foreign Extension Department of the Los Angeles Public Library.

PADILLA'S DESIGN FOR THE DESCRIPTION CARDS

The response of the foreign peoples in helping to prepare these exhibits is astonishingly eager and enthusiastic and the effect of each exhibit seems to be that of waves washing out into all parts of the city, bringing back every sort of people, artists,

writers, social service workers, night classes with their teachers; and a perfect flood of foreign born, their faces so bright with pleasure that they seem like torch bearers.

Recently a Mexican exhibit, planned several months ahead, awakened such interest among

the Mexican colony that an artist, Padilla, who is going back to his forefathers, the Aztecs, for inspiration, formed a committee among his friends and these young men worked several days until midnight along with the Principal of the Foreign Extension Department and topped off their evenings of eager and loving labor with little tortilla suppers.

This artist made an original design for the descriptive cards and with his friends printed a special circular which was sent out to the Mexican people, telling them about the exhibit and asking them to contribute their most precious articles. As a result more than one thousand curious and beautiful examples of Mexican arts and crafts found their way to the Library, including Aztec idols, a copy of an old Aztec calendar, paintings done in carbon by Alt, mosaics made of grass loaned by Marah Ellis Ryan, laces, dolls made from corn husks, hand-tooled leather, scroll saw work, and a set of bone chessmen carved especially in Mexico for this exhibit. But most arresting were the ordinary household necessities made by the common people of Mexico, showing their deft ingenuity in sieves made from horse hair, dishes from horns and bridles neatly and beautifully woven from rope.

The bulletin board above the overflowing cases was draped with an historic Mexican flag

MEXICAN DOLLS MADE FROM CORN HUSKS

THE AZTEC CALENDAR CARVED IN WOOD

made in San Francisco in 1821 to celebrate the independence of Mexico, the center painted in a cellar by two prisoners who had only a candle for light. An American flag and shield done in Mexican feather work swung from the other side and a caption said in white lettering, "Mexico's Contribution to America."

A bank on one of the city's busiest corners was induced to make a window display of some of the pieces, calling attention to the exhibit at the Public Library by means of posters, done by the company's commercial artist. The head of the Americanization Department of the Y. M. C. A. borrowed articles from the exhibit for a display and asked the Foreign Extension Department for closer co-operation, while thru the visits of the night classes sometimes as many as thirty Spanish people registered in one evening, and even on Sundays and holidays tall, swarthy men in sombreros would be seen in the corridors looking for the Mexican exhibit.

But most noticeable was the interest of Los Angeles business men, who expressed again and again their appreciation, saying, "That's it, we've got to get acquainted with these people and act as their interpreters for the rest of the United States—we're the gateway to Mexico and Latin America, just as Seattle is the gateway to Alaska."

And in this way the real goal of these exhibits is being won—by bringing the foreign born and the American to see the best instead of the worst of each other.

MONICA SHANNON.

In Favor of Library Workers Unions

"WHAT of the Librarians?" is the title of a paper by Chester A. S. Fazakas, financial secretary of the Library Employees' Union No. 16,113, Boston, in the *American Federationist* of February.

The article is an argument in favor of library workers becoming members of a union, as a part of the American Federation of Labor. The author states that his starting point is the grim reality of low wages, of which there are many causes, among which he mentions the following:

1. A pernicious system with which library men and women enter library service for a short time either without pay, or with a pittance.

2. A system is in vogue in many libraries where extra hours, Sundays and evenings obtain, so that by working Sundays and evenings a man can meet most of his obligations.

3. Colleges and library schools graduate girls and also men who are content to work for wages that a boy starting in the business world would receive, anywhere from \$11 to \$15 a week.

4. There are mighty few promotions from the ranks.

5. The method of "keeping the employees separated."

The author states that the above five causes are only a few of the reasons which impelled library workers to unionize. He states that departmental heads are eligible, but they are not very anxious to have them come within the midst of the union because experience has taught that all constructive thought and ideas are stifled by the presence of these chiefs.

Many criticisms are made in the article against library boards and library administrators. Among others is that boards of trustees frequently pass measures on faith alone.

Another abuse that is complained of is the system of library examinations for entrance into library work and for promotions. The author advocates municipal civil service, and takes a whack at the A. L. A. by saying that it is diametrically opposed to this form of fairness.

The author also implies that libraries purchase many books from ulterior motives, and that after they are purchased the books are permitted to leave the city, especially if they happen to be popular books, to go into the homes of non-residents.

Another criticism of the present-day library administration is that it shows a lamentable lack of recognition of ability and originality.

The final criticism that the author makes against library administration and librarians is the unaccountable and distinctly un-American spirit of fear which seems to hold the majority of librarians within its grasp.

The front page of a recent number of the Artgravure Section of the *Providence* (R. I.) *Sunday Journal* is devoted entirely to the Providence Public Library, showing in ten "views and glances" something of how the people's university serves knowledge to Providence readers.

"What Our Public Library Has For You," by Mary B. Day, appears in the March 7th *National Safety News*—one of the very frequent articles reminding National Safety people that the library is there for their use.

Recruiting for Librarianship

THE UNIVERSITY OF WASHINGTON

WITH a view to securing recruits for the library profession, the directors of the University of Washington Library School sent to all seniors in the University the following letter:

As you expect to graduate at the end of this year and may not have decided upon an occupation, I wish to call your attention to the excellent opportunities for useful and pleasant service in librarianship.

Salaries are fair and growing better. Positions are numerous and varied. The supply of trained librarians is very limited. The work is interesting and attractive to persons who are fond of books and who enjoy working with people.

Three quarters of successful work completes the preparation—October to June—and positions have always been awaiting our graduates. Positions once secured and successfully filled are as permanent as one cares to make them.

Admission to the Library School is open to

“Graduate students who hold the baccalaureate degree from any college or university of good standing, and whose undergraduate work in either or both high school and college has included the equivalent of at least twenty college credits in each of two modern foreign languages, German and French preferred. Slight deficiencies in the languages, however, may be accepted as conditions, but must be removed within the period of study in the Library School. Upon the completion of forty-six credits in Library Science, and the removal of any language conditions, the candidate will be granted the degree of Bachelor of Science in Library Science.”

If this matter interests you, I shall be glad to talk it over with you personally at any time you desire to call at my office.

Sincerely yours,
WILLIAM E. HENRY,
Director.

Addressed to juniors, Mr. Henry sent out the following letter:

As you will be a senior next year and may not yet have decided what special work you will undertake, I wish to call your attention to the excellent opportunities in library work.

Beginning with October, 1921, we shall admit those “Students who have qualified for senior standing in the College of Liberal Arts—having earned 147 credits, including 12 credits in Physical Education, and including all required work. Such students may finish the curriculum in three quarters, provided their undergraduate work in either or both high school and college has included the equivalent of at least twenty college credits in each of two modern foreign languages, German and French preferred. The completion of forty-six credits in Library Science shall constitute a major and satisfy the requirements of the degree of Bachelor of Arts.”

Our reason for extending admission to undergraduates is that the demand for librarians over the entire country is very much greater than the supply.

Salaries are fair and the work is especially well suited to young women who enjoy working with people and with books. There are many specific lines of library work so that individual taste may be satisfied.

If you are interested and think you might take up library service, I shall be glad to discuss the matter

with you at any time you find it convenient to call at my office.

Sincerely yours,
WILLIAM E. HENRY,
Director.

This letter reaches the student body at the moment of decision of the Faculty and Advisory Board of the Library School to change the entrance requirements so that in future seniors as well as graduates may be admitted to the School.

THE UNIVERSITY OF PENNSYLVANIA

At the University of Pennsylvania students are invited to confer with Librarian Asa Don Dickinson in the paragraph which closes the very readable “Hand-book of the Library”:

“LIBRARY WORK AS A VOCATION

“There are not enough librarians to go round. As in the case of teachers, the demand far exceeds the supply. Young people of good education who wish to continue in close association with the world of books, but do not feel the call to teach, will do well to consider librarianship as a life work. The Librarian will be glad to confer with anyone who has the subject under consideration.

LOS ANGELES LIBRARY SCHOOL

A committee on recruiting for librarianship has been appointed by the Alumni Association of the Los Angeles Public Library. Its members are: Sarah M. Jacobus, Pomona, chairman, Clara B. Dills, Solano County, Frank R. Hout, Oregon State Library, Margaret Newman, Kern County, Lulu Littlejohn, Pasadena, Alice M. Scheck, First National Bank, Los Angeles, Marjorie Van Deusen, Los Angeles High School, Ruth Ann Waring, Pasadena High School, Charlotte M. Brown, University of Southern California.

“She was thin, brisk, colorless. . . . She might have been under or over thirty, but must have looked an old maid at twenty. . . . She never talked—never, despite an habitual tension about the thin, prim mouth.” . . . But she who “knew nothing of smart ways or smart clothes and who was a nonentity on the street, had the divine gift of grace.” She also had a passion for dancing and she was librarian of Sunbury.

Librarians may find interesting her story, as told in the April *Red Book Magazine*.

Organizing a School Library

A SELECT LIST OF BOOKS AND PAMPHLETS
COMPILED BY THE KELLOGG LIBRARY, KANSAS
STATE NORMAL SCHOOL, EMPORIA.

Fay, Lucy E., and Eaton, Anne T. *Instruction in the use of books and libraries*, 2nd ed., 1919. F. W. Faxon Co., 83 Francis St., Boston, Mass. \$3.25. (Useful reference series, No. 23).

Chap. 14, *The high school library*. Chaps. 24-31, *Administration of school libraries*.

The lists of references in this book are especially helpful for teachers without library training who wish to read on the subject of school library administration and who have to buy books and other library equipment.

(The) *High school library*. *Teaching*, No. 47, September, 1919. Kansas State Normal School, Emporia. Free on application to Kellogg Library, K. S. N., or Extension Division, K. S. N.

Contains helpful directions for organizing school libraries and suggested lists of books for senior and junior high school libraries, of magazines, reference books for first purchase, and high school library aids.

Severance, Henry O. *Library primer for high schools*. 1917. Missouri Book Co., Columbia, Mo. \$1.25.

Formerly issued as a University bulletin.

Furnishes helpful suggestions for teachers who wish to organize high school libraries.

Standard library organization and equipment for secondary schools of different sizes. Report of the Committee on Library Organization and Equipment of the National Educational Association and of the North Central Association of Colleges and Secondary Schools. C. C. Certain, chairman. 1920. American Library Association, 78 East Washington St., Chicago. 40c.

This report gives school administrators a national standard for high school library development.

Wilson, Martha. *School library management*. 2nd rev. ed. 1920. H. W. Wilson Co., 958 University Ave., N. Y. 80c.

"An attempt to state the problem of the library in the school, particularly the smaller one, and to offer practical suggestions as to its equipment, organization, and administration." (Preface).

Recommended for first purchase.

Library Workers Association

REVISION OF DUES

SINCE the organization of the L. W. A. the question of dues has been a decidedly debatable one. Now that the other details of the organization have been perfected, this point has been submitted to the vote of the whole association. The three schedules to be voted on are as follows:

1. Yearly dues: \$2 for those with salaries under \$1200; \$5 for salaries between \$1200 and \$1800, and \$10 for salaries over \$1800.

2. Yearly dues: \$1 for those with salaries under \$1200; \$3 for those between \$1200 and \$1800, and \$5 for salaries over \$1800.

3. Yearly dues: flat rate of \$3.

The results from this will not only give the final decision of the whole association on this question but will demonstrate the feasibility of votes by correspondence.

To Instructors of Training Classes

THE instructors of training classes in public libraries are planning to organize in some formal way, in order to have some center from which they may distribute information in regard to such courses of training. Discussion of the proposed form of organization will be the main part of the program at the Round Table to be held at the A. L. A. Conference at Swampscott in June.

Will all training classes and instructors who wish to be registered with such an organization, in order to obtain suggestions and help with regard to their problems, please send their names and addresses as soon as possible to the Chairman of the Round Table of Training Class Instructors? Address: Miss Julia A. Hopkins, Supervisor of Staff Instruction, Brooklyn Public Library, Brooklyn, N. Y.

David Foster Estes, who has been librarian of Colgate University Library for twenty-three years, has resigned and will retire at the end of this year.

Dr. Estes who is a graduate of the University of Vermont and of Newton Theological Seminary, became Professor of New Testament Interpretation at Colgate in 1891 and is the author of several books on theology as well as a contributor to theological reviews. In 1898 he was appointed librarian of the University, the collection of books then numbering about 25,000. The library now contains about 100,000 volumes and, under Dr. Estes' administration, its use by the student body has increased in even greater proportion than its size. A man of unusual personality and wide culture, he has been a wise and efficient administrator, liberal in his policies, broadminded in his selection of books, and devoted and self-sacrificing in his service to the University. It is with the keenest regret that the library staff as well as the faculty and students see Dr. and Mrs. Estes leave for their new home in Southern California.

The new building of the John Crerar Library is now open, and the formal dedication will take place about the middle of May.

Some Recent Reference Books*

GENERAL

Nielsen, Lauritz. *Dansk Bibliografi 1482-1550. Med Særligt Hensyn til dansk Bogtrykkerkunsts Historie.* Kjobenhavn, 1919. xlvii, 248 p. 4°.

Bibliography with special reference to history of the art of printing in Denmark during period included. Full collation and long bibliographical notes. Gives libraries in which books described are contained. Number of facsimile pages from various books. Alphabetical arrangement; titles also listed according to place of printing and printers.

Reference Catalog of Current Literature, containing the full titles of books now in print and on sale with the prices at which they may be obtained at all book-sellers; and an index containing about two hundred thousand references. London: J. Whitaker & Sons, Ltd., N. Y.: R. R. Bowker. 1920. 3 vols. obl. 12°.

The volumes were not delivered until 1921 and the date 1921 is stamped on the outside of the cover. This is the latest edition of this well known English trade catalog, the previous edition having appeared in 1913.

Vicaire, Georges. *Manuel de l' Amateur des Livres du xix. Siècle, 1801-1893; Tome huitième, table des ouvrages cités.* Paris: Librairie A. Rouquette, 1920. 646 p. 8°.

A title index to Vicaire's well known work, the seventh volume of which appeared in 1910. Inasmuch as Vicaire lists the more important French works of the nineteenth century, at least from a collector's point of view, this index should prove useful to the bibliographer and reference worker.

Legrand, Emile. *Bibliographie Hellénique; ou description raisonnée des ouvrages publiés par des Grecs au dix-huitième siècle.* Paris: Jean Maisonneuve et fils, 1918. tome 1. 563 p. 8°.

Scholarly work, extensively annotated, giving description of Greek works of 18th century in European libraries. In many cases minute collation. Chronological arrangement, first volume extending to 1759. Index of names, and chronological table.

Tercentenary Handlist of English and Welsh newspapers, magazines and reviews. London: The Times, 1920. (213)+1+216-324+xxxv p. 8°.

A checklist of English and Welsh newspapers, magazines and reviews appearing between 1620 and 1920, arranged chronologically giving date of issue of Vol. 1, no. 1, and expiration date, or indicating if still in progress. In two sections: I, London and Suburban; II, Provincial. Each section is indexed separately, the first section in the middle of the volume. Printer or distributor given in case of some of the earlier corantos. Omits annuals and year-books; periodicals classed under the heading "academies etc." in the British Museum Catalog; local church magazines of limited appeal; and official periodicals printed during the war. "In no case has a conjectural date been given to a periodical." "Bulk of the date has been taken from the British

Museum Catalogues." "The list is believed to be practically exhaustive as regards the seventeenth and nineteenth centuries. The eighteenth-century list, however, is far from complete." List is based upon collections at the Museum, which are divided into two main sections: periodicals and newspapers. The historical collections of Thomason and Burney, the first extending from 1641-1660, and the other from the earliest times to 1812 have been used fully.

Severance, Henry Ormal, comp. *A Guide to the Current Periodicals and Serials of the United States and Canada.* 4th edition, 1920. Ann Arbor, Mich.: George Wahr, publisher, 1920. 564 p. 8°.

A new edition of a well known work, mentioned here because it does not appear at regular intervals. The last previous edition was that of 1914. The compiler states that the work is thoroly revised; that all titles have been verified, or appear in late lists of current periodicals; that government publications of the war period are retained even if no longer published; and that the present edition contains 12,000 titles, an increase of 25% over the third edition. An additional feature of Part II is a list of trade journals and house organs.

Newberry Library, Chicago. *Book arts.* Chicago, 1919. 2 parts. 8°.

Part 1. Bibliography, printing, bookbinding, publishing and bookselling, national and local bibliography.

Part 2 in two fascicules: 1st, subject bibliography; 2nd, author and title and subject index.

A comprehensive and well arranged bibliography; well indexed.

COMMERCE

Annuario de Sociedades Anónimas; estudio económico-financiero de las existentes en España; edición de "Ilustración Financiera"; director, José Garcia Ceballos; Años 1-3, 1918-1921. Madrid: Rodriguez San Pedro, 1919-21. 3 volumes.

A new Spanish financial year book, three volumes of which have appeared since the war. Similar to Poor or Moody's Manuals except that the information is not so detailed. The first 50 to 100 pages is devoted to a resumé of the financial situation during the year just passed including agriculture, mines, industry commerce and navigation, banks, stock exchange railways, treasury department, and the public debt. Contains a classified index.

Iron Age Catalogue of American Exports. v. 1. New York: Iron Age Publishing Co., 1920. 1236 p. 4°.

The first issue of a combination multilingual condensed trade catalog showing manufactured products and prices of the various American exporters with text in English, Spanish, Portuguese, French, and Russian. Well illustrated. Indexed. v. 2, 1920, is announced as in preparation. It is to contain additional names and products.

Fayle, C. Ernest. *Seaborne Trade, vol. 1. The cruiser period; with maps.* London: Murray, 1920. 8°. 441 pages. (History of the Great War based on official documents, by direction of the historical section of the Committee of Imperial Defence).

The first of the volumes by Fayle to be devoted to the distinction of Commerce during the war. A portfolio of maps accompanies the volume. Author had access to official records. Reference value enhanced by tables in appendix including losses of British, French, Russian, German, and Austrian shipping by periods; losses by mines; entrances and clearances of

*This list is adapted from the "Interesting Recent Additions" lists prepared by Carl L. Cannon for the *Bulletin of the New York Public Library* for January to April, with the addition of a few entries of earlier date for material in special fields. By kind permission of the *Bulletin* the list is here given in the hope that it may be of use in purchasing. Hereafter these additions will be listed in the LIBRARY JOURNAL at short intervals.

cargoes; imports and exports; increase and decrease of tonnage; grain freights; wheat prices, monthly average; weights and average import values of typical imports. Two indexes, one general and one to ships and squadrons.

SOCIOLOGY

Gea, Philip. *ed.* *The Employers Year Book.* (May, 1920) London, 246 Temple Chambers, 1920. 8°. 412 pages.

The first issue of what is planned as an annual for employers of Great Britain contains many articles on trade and trade associations of the United Kingdom. A very fair summary of the industrial situation of the year may be found under such headings as: The Whitley Councils; Co-partnership and Profit Sharing; The Housing Problem; Coal Nationalization; Defects in Trades Disputes Act; etc.

International Labor Office. *Labor Conditions in Soviet Russia; systematic questionnaire and bibliography prepared for the mission of inquiry in Russia.* London: Harrison and Sons, [1920]. 8°. 294 cxlii pages.

Systematic and thoro altho perhaps somewhat biased study of conditions under a Bolshevik régime. Information based on documents and publications of the Russian Government. Good bibliography, some titles with critical notes. Unindexed.

Allen, Frederick J. *A guide to the study of occupation; a selected critical bibliography of the common occupations with specific references for their study.* Cambridge: Harvard University Press, 1921. 183 p. 8°.

A bibliography of educational and vocational guidance for public school classes, college students, and libraries. Consists for the most part of analyticals from books and reports. Under occupations arranged by classes. An alphabetical list of books with information sufficient for ordering and critical notes form a third of the volume. Material is given on the following occupations each subdivided:

Agriculture; Forestry and Animal Industry; Extraction of Minerals; Manufacturing and Mechanical Industries; Transportation; Trade; Public Service; Professional Service; Domestic and Personal Service; Clerical occupations. Indexed.

Cannons, H. G. T. *Bibliography of Industrial Efficiency and Factory Management.* London: Routledge, 1920. 167 p. 8° (Routledge's efficiency books.)

A bibliography of recent material in books, periodicals, and transactions of societies, dealing with industrial efficiency and factory management. Books are analyzed. Contains about 3,500 references. Arranged under 63 headings in logical sequence with key to arrangement and also a subject and an author index. by the author of *Bibliography of Library Economy.* Contains much American material.

Ayres, Leonard P. *An Index Number for State School Systems.* New York: Department of Education, Russell Sage Foundation. 1920. 7 p. 12°.

Comparative facts of the educational systems of the various states with index numbers showing rank during four decades ending with 1918.

Sampter, Jessie E. *Guide to Zionism.* New York: Zionist Organization of America, 1920. 262 p. 8°.

A reference book on the Zionist movement and on Palestine as the proposed home of the Hebrew race. The movement is considered in its historical, political, social, legal, and economic aspects. Resources and institutions of Palestine described. Zionist chronology and bibliography. Indexed.

DICTIONARIES

Budge, E. A. Wallis. *An Egyptian hieroglyphic dictionary; with an index of English words, king list and*

geographical list with indexes, list of hieroglyphic characters, Coptic and Semitic alphabets, etc. London: John Murray, 1920. 1356 p. 8°.

A comprehensive dictionary by an eminent Egyptologist, easy to use, and well indexed. Excellent as an example of book making and bound for hard usage.

Malaret, Augusto. *Diccionario de provincialismos de Puerto Rico.* San Juan, P. R.: Tip. Cantero Fernandez and Company. 1917. 151 p. 8°.

Porto Rican provincialisms defined in the Spanish language. Also tells by whom and on what occasions used. Those which have been recognized by the Academy are so designated.

SCIENCE

Henderson, J. F. and Henderson, M. A. *A dictionary of scientific terms; pronunciation, derivation, and definition of terms in biology, botany, zoology, anatomy, cytology, embryology, physiology.* Edinburgh and London: Oliver and Boyd, 1920. 8°. 354 p.

The editors state that the work was undertaken to provide an up-to-date work somewhat on the lines of Stormouth's *Manual of Scientific Terms*, the last edition of which appeared in 1903. "It contains definitions of 10,000 terms including several hundred lately coined expressions, many of which have not heretofore appeared in any dictionary." Greek words have been transliterated. The branch of science in which the word is used is also designated.

United States Geological Survey. *World Atlas of Commercial Geology. Part 1, Distribution of Mineral Production.* Washington: 1921. obl. 12°. 88 p. 72 plates.

"To set forth graphically and to describe concisely the basic facts concerning both the present and future sources of the useful minerals is the purpose of this atlas." The output of essential minerals in 1913 has been used to show the distribution of production. Statistics of 1918 given in the case of the United States. Text with information and statistics accompanies maps which show location of mineral deposits. "The 72 plates are arranged in groups of eight, each group including maps of three kinds (1) a map of the world, on which the production and for major commodities the consumption of countries are shown in percentages of the world's output in 1913. . . (2) maps of continents, on which the production is shown of countries, districts or fields, again in percentages of the world's output in 1913, and (3) a map of the United States on which more geographic detail is possible and on which production is shown by states, fields, or districts in percentages of the output of the United States in 1918."

La Touche, Thomas Henry Digges. *A bibliography of Indian geology and physical geography, with an annotated index of minerals of economic value; published by order of the government of India.* Calcutta: Office of the Geological Survey; London: Kegan Paul, Trench, Trubner and Company, 1917-18. 2 v. 4°.

Mostly material from government documents and reports, and scientific periodicals. First volume arranged by author. Second volume constitutes a subject index with informative notes of an encyclopedic character.

USEFUL ARTS

Goodale, Stephen L. *comp.* *Chronology of iron and steel; ed. by J. Ramsey Speer.* Pittsburgh: Pittsburgh Iron and Steel Foundries Company, 1920. 294 p. 16mo.

Chronology of the invention and use of iron and steel, together with the business aspects of its manu-

facture, allied interests such as mining and political events affecting its use in war. The progress of discoveries in prehistoric and early historical times are given comparatively brief treatment, but beginning with "the steel age" (1856-1900) detailed information is included. Indexed. A useful reference book.

Webster, F. B., editor. *Shipbuilding cyclopedia*; a reference book covering definitions of shipbuilding terms, basic design, hull specifications, planning and estimating, ships' rigging and cargo handling gear, tables of displacement of commodities, arrangement and working drawings of modern vessels. New York: Simmons-Boardman Co., 1920. 1119 p. 4°.

In part a reference, in part a text book. First 149 pages contain an excellent glossary of shipbuilding terms. Remainder of work largely tables and designs for the ship builder.

MUSIC

Quarry, W. Edmund. *Dictionary of musical compositions and composers*; with a copious bibliography. London: George Routledge & Sons, 1920.

An alphabetical list of titles of the more important operatic, orchestral, instrumental choral and lyric compositions, giving name of composer, kind of work, and date of composition. Proposes to include any musical composition that can claim some degree of musical value, fame, or permanent notoriety, and any work that may be of interest to the music student or antiquary. A second section is devoted to biographical sketches of prominent musicians and a third to a very good musical bibliography of fundamental works.

LITERATURE

Cambridge History of American Literature, ed. by W. P. Trent, John Erskine, S. P. Sherman, and Carl Van Doren; in four volumes. N. Y.: G. P. Putnam's Sons, 1921. Vols. 3 and 4.

The last two volumes of this important work, the first two of which appeared in 1917-18 are divided into Later National Literature: part II (volume 3) and Later National Literature; Part III (volume 4). Literature is considered in its broadest scope as in the first two volumes, including such topics as newspapers and magazines and giving attention to such purely American literary manifestations as "Cowboy Poets," "Gold in California" and George M. Cohan's plays. About half of volume 4 is devoted to bibliographies of the subjects covered by the various chapter headings of the whole work. An important section of the bibliography is devoted to "Non-English Writings." Index to last two volumes in V. 4, but none to the bibliography.

Elton, Oliver. *A survey of English literature 1820-1880*. London: Edward Arnold, 1920. 8°. 2 volumes.

Supplements a survey of English literature published in 1912, covering period 1780-1830 by the same author. Plan and arrangement the same as the previous work. Critical rather than simply historical. Indexed.

Davis, Franklyn Pierre, ed. *Anthology of Newspaper Verse for 1919 and Year Book of Newspaper Poetry*. Enid, Oklahoma: The F. P. Davis Company, 1920. 162 p. 12°.

An attempt to cull from the great mass of verse which appears yearly in the press of the United States that which seems worthy of preservation. Of doubtful literary value but if continued would probably prove of reference value. An index to poets and poems, a biographical index, and the "year of newspaper poetry, 1919" are included.

Wells, Carolyn, comp. *The Book of Humorous Verse*. New York: Doran, 1920. 8°. 986 pages.

A large collection of humorous verse both ancient and modern by known and anonymous authors. Con-

tains much fugitive newspaper and magazine verse. Classed table of contents and index by author and title.

Mantle, Burns. *The Best Plays of 1919-20*; and the year book of the drama in America. Boston, Small Maynard Company, 1920. 8°. 474 pages.

A new year book of the drama following the lead of the annual anthology of verse and of the best short stories. Edited by the dramatic critic of the *New York Evening Mail*. "The body of the book contains excerpts, or descriptive synopses, of the ten best plays of the year." Includes work of foreigners. Supplements include "where and when they were born." "Bibliographical facts about living actors," "Prominent stage people who have died." "Long runs on Broadway" and "The Season in Paris."

Livingston, Flora V. Swinburne's proof sheets and American first editions; bibliographical data relating to a few of the publications of Algernon Charles Swinburne, with notes on the priority of certain claimants to the distinction of "editio princeps." Cambridge, Mass.: Privately printed, 1920. 31 p. 12°.

Intended as a supplement to the bibliography of Swinburne compiled by Thomas J. Wise, London, 1919. Material in the Harvard College Library, The Boston Public Library, the private collection of Mr. E. K. Butler of Jamaica Plain and owners of collections in New York City, unknown to Mr. Wise, have been described here.

Shay, Frank. *The bibliography of Walt Whitman*. New York: Friedmans', 1920. 46 p. 12°.

Chronological arrangement. No index. Titles and imprints follow typography and punctuation of the originals, except changes for sake of coherence. Full bibliographical notes with contents notes in some cases.

Wise, Thomas J., comp. *A bibliography of the writings of Joseph Conrad (1895-1920)*. London: Printed for private circulation only by Richard Clay and Sons, 1920. 107 p. 8°.

Necessarily incomplete but very carefully prepared bibliography giving full description of all of Conrad's writings which have appeared to date. Includes editions principes, uncollected contributions to periodical literature and "Conradiana" consisting of complete volumes of biography and criticism. Information by Conrad himself sent in response to the author's request is given for some of the more important works. One of a series of bibliographies of English men of letters prepared by Mr. Wise, who announces six more in preparation.

TRAVEL AND DESCRIPTION

Buffalo, America's Gateway To and From the Great Northwest; 1920 year book of industrial, commercial, financial, educational, civic Buffalo. Buffalo: J. W. Clement Co., 1920. 190 p. 8°.

Facts about Buffalo presented in somewhat popular form. Particularly useful in describing the city's governmental organization and institutions. Illustrated.

Table of contents, but no index. Good map of Buffalo.

Rees, John E. *Idaho: Chronology, Nomenclature, Bibliography*. Chicago: W. B. Conkey Co., 1918. 125 p. 8°.

First section is a chronological table; second section contains origin and reason for state names; third section a bibliography of only seven pages consisting mostly of historical matter with some material on Indians and the geology of the region.

Trelles, Carlos M. *Biblioteca geográfica cubana*. Matanzas: Oliver, 1920. 340 p. 8°.

One of a new series by this author of which *Biblioteca científica cubana* has already been published

and of which *Historica* (2 volumes), *Literaria* (1 volume) and *Prensa* (2 volumes) are yet to appear. The first series entitled *Bibliografía cubana* in 12 volumes covered the period 1600-1916. The latest volume, *Biblioteca geográfica*, includes titles in different languages, although most are in Spanish. Classified arrangement with index.

Filsinger, Ernst B. Commercial travelers' guide to Latin America. Washington, 1920. 8°. 592 pages. (United States Department of Commerce. Bureau of Foreign and Domestic Commerce. Miscellaneous Series No. 98).

A handy reference and guide book for salesmen in South America by the author of "Exporting to Latin America." Contains general information under such chapter headings as: "The salesman's equipment," "Cables and Mails," "Health precaution," "Wardrobe," etc. A good deal of space is devoted to transportation, and the largest portion of the book to detailed information for canvassing Latin America including facts about each town of importance. Has also trade statistics, names of United States consuls and a bibliography.

Anglo-South American handbook for 1921 (incorporating Mexico and Central America) ed. by W. H. Koebel. London: Fisher Unwin Ltd., [192-] 929 p. 12°.

Published under the auspices of the Federation of British Industries with the purpose of serving persons or firms established in South America, those in Great Britain who have business relations or propose to establish connections with South America, and the general public. The first issue of what is planned as a commercial year book with much detailed and general information, arranged by country and well indexed. Contains also a directory of selected firms and a bibliography.

Muirhead, Findlay, ed. England. London: Macmillan, 1920. 598 p. 8°. (The Blue guides.)

The second of this series of guides intended as a competitor of the Baedeker set. On similar lines. Seventy-five maps and plans. Descriptions based on normal conditions rather than abnormal conditions due to the war. Hotels are not starred and no scale of charges in some cases. Indexed.

Garey, Enoch Barton, and others. The American guide book to France and its battlefields. New York: Macmillan & Co., 1920. 331 p. 8°.

Guide book intended for the tourist who visits French battlefields. Information concerning passports, France, Paris, brief history of the war, description of the various battlefronts, and divisional histories of American combat divisions. Chronology and general information in appendix. Maps. Indexed.

Deutsches Kolonial-Lexikon, herausgegeben von Dr. Heinrich Schnee, Gouverneur. Leipzig: Von Quelle und Meyer, 1920. 3 v. 4°.

An exhaustive work planned and partly executed before the world war changed colonial ownership. Arranged on the order of an encyclopedia with signed articles in alphabetical order. Good bibliographies follow articles. Illustrations and many maps.

BIOGRAPHY

Lutrell, Estelle, comp. Mexican writers; a catalogue of books in the University of Arizona Library with synopses and biographical notes. Tucson, Arizona, 1920. (University of Arizona. Record Vol. 13, no. 5. Library Bibliography no. 5.) 8°. 83 pages.

The authors mentioned are mostly modern standard writers in the field of literature as distinguished from the field of scholarship. Novelists, poets, and dramatists predominate. Valuable for biographical

data and summaries of the novels listed. Index of names and titles.

Hispanic Society of America. Hispanic notes and monographs, essays, studies and brief biographies issued by the Hispanic Society of American. Hispanic American Series. New York: G. P. Putnam's Sons; Buenos Aires: The Hispanic Society of America 1919-1920. 8 vols.

A useful series in English containing the biographies of South Americans. Edited by William Belmont Parker. Titles so far published or announced are: Argentines of Today (2 vols.); Paraguayans of Today; Cubans of Today; Bolivians of Today; Peruvians of Today; Chilians of Today. Contain on an average 600 pages to a volume, with from 100 to 400 brief biographies of the leading living men and many portraits.

Muzzio, Juio A. Diccionario historico y biografico de la Republica Argentina. Buenos Aires: Librería "La facultad" de Juan Roldan, 1920. 2 vols. 8°.

A useful but somewhat popular historical and biographical dictionary of Argentine, with more emphasis on the biographical than the historical. Articles are brief and unsigned. No bibliographies. Contains some good maps and many portraits. Arranged alphabetically with no index.

Who's who in Philadelphia in war time. Vol. 1, 1920. 248 p. 8°. Philadelphia: Stafford's National News Service, 1920. (Keystone State Notables. The Philadelphian and his city.)

Brief biographies and photographs of prominent Philadelphia professional and business men.

HISTORY

Sanchez Alonso, B. Fuentes de la historia española; ensaña de bibliografía sistematica de las monografías impresas que ilustran la historia politica nacional de españa excluidas sus relaciones con America. Madrid. Junta para ampliacion de estudios e investigaciones científicas. Centro de estudios historicos, 1919. 448 p. 8°.

A bibliography which the compiler hopes will do for the student of sources of Spanish history what Dahlmann's Quellenkunde der deutschen Geschichte does for the student of German sources or Langlois's Manuel de Bibliographie Historique, for the French. The character of the work is selective and critical rather than inclusive, and is arranged with evident care. It lists 6783 titles or considerably less material than the works above mentioned. It excludes histories of a general character but takes in special material which is arranged under chronological period headings. Includes monographs, documents, and some legends, romances and historical fiction, and works about historical personages. Excludes manuscripts of questionable authority. Cataloged after the practice followed by Spanish libraries. Compiler attempted to examine all material listed and has preferred original to translation. Many analyticals from serials are given to which exact reference is made. Separate indexes for authors, subjects and abbreviations and a detailed table of contents. Items are numbered. As indicated by title it includes Spanish foreign relations excepting those with the Americas.

Richardson, Hubert N. B. A dictionary of Napoleon and his times; with maps, plans, a chronological table, and a classified bibliography. London: Cassell and Company, 1920. 489 pages. 8°.

"Aims to present in popular yet exact form for ready reference a general survey of the Napoleonic period both as regards its central luminary and the numerous satellites, scarcely less brilliant, who circled around him."

THE LIBRARY JOURNAL

TWICE-A-MONTH

APRIL 15, 1921

A MOST gratifying appointment has been made by the new administration in the naming of George H. Carter as Public Printer. Mr. Carter has had a long experience as Clerk of the Joint Congressional Committee on Printing, and has shown himself fully equipped and heartily in accord with the revision of printing methods, in line with the best principles of business administration. In this respect, he has worked in thoro co-operation with the Committee on Public Documents of the American Library Association, and it will be gratifying to the profession that this appointment has been made. The post of Superintendent of Documents is only second in importance to that of Public Printer, and it is to be hoped that Alton T. Tisdell, who has been the actual administrative officer of the Documents Division during the ups and downs of political appointments, may have the post as Superintendent for which his experience so fully fits him. President Harding's administration considers the business reorganization of the government one of its chief features of policy, and the appointment of Mr. Carter, especially if seconded by the appointment of Mr. Tisdell, should be an earnest that in one very important field this plan will be fully carried thru.

★ ★ ★ ★ ★ ★ ★

A GOOD beginning has been made in St. Louis on the initiative of Dr. Bostwick in starting a "local" of the American Library Association, and it is to be hoped that the plan will work out so well as to furnish an example for those in other localities to follow. It has been pointed out that the difficulty in the way of making state associations and local clubs chapters of the A. L. A. is that the membership of chapters should be constituted from members of the A. L. A., whereas many of the lesser organizations include those who are not A. L. A. members and are useful in this respect as feeders for the national association. It should be possible to obviate this difficulty by some sensible arrangement, which would still permit a wider membership in

the local body and make it a vestibule, as it were, for entrance to the open door of the A. L. A. It will be a boon if the St. Louis plan will point the way to such solution.

★ ★ ★ ★ ★ ★ ★

AN unfortunate twist was given to Dr. Raney's report on behalf of the A. L. A. Book Buying Committee by his heading of "100% Profit Plus," which implied that importers were receiving this extravagant and extortionate remuneration for their services. Oftentimes a clever and striking heading like this is remembered by those who do not read what follows and who do not follow up the subject by hearing the other side. The other side is presented in this issue, but the fact is that the importation problem is one in which it is most difficult to generalize with accuracy. Whether the direct cost of importation is counted as 6% or 12%, this reckoning does not take into consideration the indirect expenses of rent, salaries, accounting, etc., which would be necessary in any importing plan, whether commercial or co-operative—a consideration which gave pause to the scheme of forming a co-operative book buying organization as a feature of the A. L. A. program. Moreover, except in the case of the individual buyer, the list price is subject either to book-trade or library discount. We are quite sure that no importer makes 100% or anything like it, quite aside from the "Plus." In questions arising among the distributors of books, whether on the library side or the commercial side, it is most important that the facts should not be overstated and misunderstandings provoked. Perhaps the fairest generalization that can be made is that on pick-ups or individual orders 40 cents to the shilling, less discount and duty in the case of libraries is a fair price, while in the case of imported editions anything above this is scarcely defensible, and a price between 30 and 40 cents to the shilling would be fair, varying with the size of the edition and the actual price in the London market.

LIBRARY ORGANIZATIONS

ONTARIO LIBRARY ASSOCIATION

TWENTY-FIRST ANNUAL MEETING

COMING of age is an important event in the life of an association as well as an individual. The Ontario Library Association felt that it must, therefore, celebrate this auspicious occasion, and accordingly special features marked this year's annual meeting. The Souvenir Program, placed in the hands of the delegates at the opening session, was a twenty-four-page program, illustrated with cuts of the eighteen presidents and the secretary. The other distinguishing feature was the banquet held on Monday evening in the Auditorium of the Y. M. C. A. It was a bit of fairyland which greeted the eyes of the two hundred and fifty banqueters, and the same skill that made the Auditorium so beautiful was seen in the preparation of the Menu Card. The heading read, "A Reader's Guide to the Menu," and everything on the bill of fare was dressed up in library and literary garb.

After the banquet, the Rev. W. A. Bradley, chairman, and president of 1908, proposed the first toast to the King. This was followed by the toast of the Ontario Library Association, proposed by W. T. J. Lee, a member of the Toronto Public Library Board for more than twenty-five years, and now chairman of the Board. Mr. Lee was one of the small group of Canadian delegates in June, 1900, who attended the meeting of the American Library Association in Montreal. This small group gathered in the office of the late Charles H. Gould, the librarian of McGill University, and discussed the possibility of launching a Canadian library association. It was Mr. Lee who moved that such an association be formed. It was, therefore, eminently fitting that Mr. Lee should propose this toast. The Secretary of the Association, who has been in office continuously since the formation of the Association in 1900, responded to the toast and paid a tribute to the work of the library and to the workers in the library field, many of whom were men and women of high culture and fine character. The toast to our guests was proposed by Mary J. L. Black, Fort William, President of 1917, and responded to by Dr. Frank P. Hill, ex-President of the American Library Association.

At the evening session, W. J. Robertson of St. Catharines, President of 1905, took the chair, and B. Mabel Dunham of Kitchener in her presi-

dential address discussed, in a very able fashion, "Library Work as a Profession for Canadian Women." Miss Dunham ranks library work as one of the high callings for women, inasmuch as it presents an opportunity for service to the community and for building up one's own character and personality.

The chief papers of the opening session of the conference on Monday afternoon were on "How to Get People to Read Better Books," and "The Plain Opinions of a Plain Outsider." The latter topic was presented by Mrs. W. H. Becker, Toronto, in a sympathetic and clever study of library service from the standpoint of an onlooker. Hazel Tanner of London, and Samuel P. Zavitz of Coldstream, presented the former topic, the one from standpoint of children's librarian of the city, and the other from the standpoint of the adult in the rural district.

On Tuesday morning Frederick Cook, of Ottawa, chairman of the Editorial Committee of Government Publications, gave the delegates some exceedingly good advice as to the right methods of securing Government publications. G. W. Rudlen, Sault Ste. Marie, discussed in detail "The New Library Legislation and the Budget," and Mr. B. W. N. Grigg, B.A., Waterloo, gave a talk on "Henry David Thoreau" as an apostle of originality and devotion of high ideal.

The attendance at this annual meeting broke all the records, eighty-eight public libraries being represented by two hundred and thirty delegates, while the representatives from the nine other libraries and publishing firms brought the total up to two hundred and fifty.

Among the resolutions adopted by the Association two may be noticed. One expressed the judgment of the Association that the time was coming when the librarian would be placed upon a par with the teacher as a member of a recognized learned profession. The other urged the consideration by Canadian authors of the writing of books especially suited for Canadian boys and girls.

The officers for the coming year are as follows:—President: William J. Sykes, Carnegie Library, Ottawa; first vice-president: W. H. Murch, Public Library, St. Thomas; second vice-president: W. Briden, B.A., Public Library, St. Catharines; secretary-treasurer: E. A. Hardy, 81 Collier Street, Toronto.

E. A. HARDY, *Secretary*.

THE ATLANTIC CITY MEETING

THE twenty-fifth annual meeting of the New Jersey Library Association and the Pennsylvania Library Club will be held at Atlantic City on April 25th and 30th, with headquarters, as usual, at the Hotel Chelsea. The American Library Institute will also hold a meeting. There will be five sessions, as follows:

Friday, April 29th, 10 a. m., under the direction of the American Library Institute. Chairman, Ernest C. Richardson. "An Old New England Method of Book Distribution" by Arthur E. Bostwick of St. Louis; "The Economics of Library Architecture" by Clement W. Andrews of the John Crerar Library, Chicago; "Bibliographical Catalog and Short-Title Catalog" by Henry B. Van Hoesen, assistant librarian, Princeton University, and "Personal Specifications for Library Work: a Project" by Charles C. Williamson, chief of the Economics Division of the New York Public Library. "The College Reading of men who afterwards became Famous" by Harry Lyman Koopman of Brown University.

Friday at 3 p. m., under the direction of the New Jersey Library Association. Chairman, Edward L. Farr, vice-president of the Association. Business meeting followed by discussion of "The Library's Part in Community Health" by Florence Bradley, librarian of the National Organization for Public Health Nursing.

Friday at 8:30 p. m., under the direction of the New Jersey Library Association. Edward L. Farr, chairman. "How to Choose Books on the War for Libraries with Limited Funds" by Herbert Adams Gibbons of Princeton University.

Saturday, April 30th at 10 a. m., under the direction of the Pennsylvania Library Club. Chairman, Frank G. Lewis, librarian Crozer Theological Seminary, Chester. "The Newspaper 'Morgue,' a Big Factor in Modern Journalism" by Joseph F. Kwapil, librarian *Public Ledger* Company, Philadelphia; "Establishing Libraries in the Virgin Islands" by Adeline B. Zachert, director of school libraries in Pennsylvania, Harrisburg.

Saturday 8 p. m., under direction of the New Jersey Library Association and the Pennsylvania Library Club. Chairman, Thomas Lynch Montgomery, Pennsylvania State Librarian. "The Courageous Reader" by Agnes Repplier, and "America's House of Dreams" by Henry R. Rose of Newark.

There will also be a meeting of the New Jersey School Librarians' Association at the

Atlantic City High School at Pacific and Ohio Avenues on Saturday at 2 p. m., and at 2:30 p. m., at the Hotel Chelsea, corner conferences of the New Jersey Library Association.

Rates: One person in a room without bath, \$6 a day; two persons in a room without bath, each \$5.50 a day. One person in a room with bath, \$8 a day; two persons in a room with bath, each \$6.50 a day.

ST. LOUIS LOCAL OF THE A. L. A.

THE organization meeting of the St. Louis Local of the American Library Association was held at the St. Louis Public Library on March 22. The general plan and purpose of this local were outlined by the Organization Committee. No great attention is to be paid to drawing up a Constitution. Instead all agreed upon the following course of action:

"Four regular meetings are to be held in the period from October to May and there will be no meetings from June to September. Special meetings may be called at any time at the discretion of the Committee in charge.

At each regular meeting the committee in charge announces the appointment of a new committee, by naming the chairman and two other members. Each committee makes arrangements for the meeting of which it has charge, including place, date, subjects of discussion, etc.

A secretary chosen by vote at the meeting of the 22d of March, 1921, is to serve until May, 1922, or until his successor be chosen. The secretary shall keep a brief record of each meeting; shall prepare reports, when desirable for publication in library periodicals, and shall make all necessary announcements of meetings at the direction of the committee in charge."

James A. McMillen, Library of Washington University was elected secretary, and the Committee appointed to take charge of the May meeting is composed of Misses Dowd, Fisse and Ludwig, all of the St. Louis Public Library.

After the permanent organization had been determined upon the rest of the hour was spent in the discussion of recent books. The books treated were Chesterton's "The New Jerusalem," Marriott's "Modern Movements in Painting," Macaulay's "Potterism," Gibbs' "People of Destiny," and Luttig's "Journal of a Fur-Trading Expedition on the Upper Missouri, 1812-1813," a book recently published by the Missouri Historical Society, St. Louis, and edited by the Librarian of the Society, Stella M. Drumm, a member of the local A. L. A. organization.

JAMES A. McMILLEN,
Secretary.

IN THE LIBRARY WORLD

PENNSYLVANIA

Philadelphia. The Free Public Library of Philadelphia with its branches circulated 3,419,181 volumes during the year 1919, and in the same period 1,900,352 persons used the reading rooms. The number of volumes in the system at the end of the year was 579,125, in addition to 313,740 pamphlets in the Department of Public Documents, and in the Municipal Reference and Pamphlet Divisions. The Main Library contained 125,008 volumes in actual use on December 31, 1919, with 14,050 volumes in the branches and 6,776 in the Department of Traveling Libraries. 1,403,593 volumes were borrowed for home use from the Children's Rooms in the Main Library and branch buildings. Traveling Libraries circulated 34,597 volumes. A new branch, the Kingsessing Branch Building, on Fifty-first Street between Chester and Kingsessing Avenue, was opened to the public on November 29, 1919. 71,578 borrowers were registered, bringing the total to 195,206.

The total receipts were \$500,926; the disbursements \$442,919. For salaries \$264,057 was paid and \$61,508 for books and periodicals for the Library and Branches together. For binding \$22,184 was expended.

DELAWARE

Wilmington. The Delaware State Legislature has passed an Act authorizing the City of Wilmington to raise \$200,000 by bond issue to enable the Wilmington Institute Free Library to erect the new building for which plans have been ready since 1918. This sum will be added to the \$300,000 already in hand. Under the terms of the Act, the Wilmington Institute, which is a private corporation, will deed its new site to the city and in return the city will give a perpetual lease of the building.

MICHIGAN

Jackson. The publishing of a ten year (1910-1920) comparison of library statistics has brought very satisfactory results to the Jackson Public Library.

Last September when the 1921 budget was passed, no increases in salary were allowed as the City Commission believed that the decreasing cost in living would more than make up for the usual increase. The library staff was not satisfied with this decision and compiled the following statistics to support their claim for better salaries and increased facilities for doing their work.

	1910	1920	Percent Gain	Total 1910-20
Budget	\$13,238	\$17,929	35.4	\$ 132,181
Staff	7 full time	9 full time	28.5	
	2 part "	2 part "		
Volumes	33,962	48,637	43.5	
Borrowers	5,165	11,235	117.5	
Total Circulation ..	90,477	205,891	127.5	1,597,507
Useful arts Circulation	31,433	48,374	53.9	
Juvenile Circulation ..	21,109	62,472	195.9	474,475
Population Circulation	31,434	48,373	53.9	

This table not only brought the desired salary increases, but moved the City Commission to pass the following salary classifications:

Assistants with high school training	\$ 720—\$ 960
Assistants with normal, college or library school training	1200— 1600
Librarian	2500— 3000

Furthermore, the sum of \$3,000 was granted for the finishing of a new room for the children. This room will be about 30x60 feet, and with the window seats will accommodate 100. It is hoped to make the room equal to any Children's Department in the state, outside of Detroit.

MISSOURI

St. Louis. The St. Louis Public Library is conducting a weekly reading of extracts from recent literature, in the Assembly Room of the Central Library. Each reading is conducted by some member of the staff who volunteers for the purpose, and the public is invited. At the close of the reading those present are invited to take out the books for home use and they are charged on the spot.

These meetings are an experiment in utilizing response to oral stimulus in interesting readers as a supplement to the visual stimulus thru written and printed lists that is now depended on for this purpose.

A. E. B.

CALIFORNIA

The report of Milton J. Ferguson, State Librarian of California, to the trustees of the California State Library covers the biennial period from July 1, 1918, to June 30, 1920. During that period the Library fund has remained at the level set by the Legislature of 1917 (\$250,000), and as this is not adequate under present conditions an increase is asked of the Legislature.

THE MEASURE; a monthly journal of poetry

The Editors are Padraic Colum, David Morton, Genevieve Taggard, Frank Hill, Maxwell Anderson and Others.

Contributions by Robert Frost, Lola Ridge, Robert Hillyer, Hortense Flexner, Conrad Aiken, Alfred Kreyborg and Other American Poets.

First, Second and Third Numbers now ready.

ASIA

The American MAGAZINE on the Orient

More than 60 illustrations Art insert of 8 pages

The Asia of today is a continent struggling, as we have struggled, out of the mists of centuries toward freedom and expression.

The cries of camel drivers are still heard, but across caravan routes and over mountain passes echo the sounds of modern civilization—railroads, motor cars, airships.

Great developments, agricultural, mining, industrial and educational, are as fascinating a part of the Orient as are the quaint structures that served the country yesterday.

A New Asia is being born.

Month by month this renaissance is recorded in ASIA through authoritative articles, fiction and beautiful pictures.

THE ONLY AMERICAN MAGAZINE TREATING EXCLUSIVELY OF THE ORIENT

ASIA is emphatically a magazine for every public library. Readers who wish to keep abreast of the times expect it to be on file.

ASIA PUBLISHING COMPANY
627 Lexington Ave. New York City

The Agamemnon of Aeschylus

By **GILBERT MURRAY** \$1.25
A translation into English rhyming verse uniform with his well-known translations of Euripides.

The Ways of Life

By **STEPHEN WARD** Net \$2.00
A study in ethics dealing with the whole of life written in admirably clear English. An original work of the greatest interest.

A Philosophical View of Reform

By **PERCY BYSSHE SHELLEY** Net \$3.75
The prose work, now first printed, reflects Shelley's ideas on the subject of Government and are remarkably applicable to the present unrest.

The Sounds of Standard English

By **T. NICKLIN** \$1.35
Detailed but not technical treatment of the problems of pronunciation.

At all booksellers or from the publishers.

OXFORD UNIVERSITY PRESS

American Branch

35 West 32nd St., New York

Mr. T. Fisher Unwin

Publisher, 1, Adelphi Terrace, London, W. C., England, would like to get into communication with Authors, Librarians and Publishers having MSS. or published works available—fiction, poetry, philosophy, travel, science and other branches of literature—with a view to publication in Great Britain.

T. FISHER UNWIN, Ltd.

1, Adelphi Terrace London, England

The Library finds difficulty in housing its collection since the building of the Capitol Extension buildings still remains at deadlock, due to the increase in construction costs and the difficulty of selling four per cent bonds, and several thousand volumes have been removed from rooms in the Capitol, as the girders supporting the floors over the senate and assembly chambers were beginning to buckle under the load.

The main library including Law and California departments, contained 219,718 volumes at the end of the year, which with the 11,600 volumes in the library for the blind and the Sutro collection in San Francisco of 79,310 made a grand total of 310,628 volumes as against 284,873 in 1918. 18,252 books were cataloged; 187,071 cards were received and filed in the union catalog, and 27,918 cards typed and filed in the official catalog.

The circulation of books for the blind grew from 27,390 in 1918 to 43,475 in 1920, an increase attributed partly to the efforts of home teachers and to interest in the new uniform type—Revised Braille grade one and a half. At the request of the Federal Board for Vocational Education the home teachers found and helped several blinded soldiers.

Three county libraries were put into operation: Amador, Napa, and San Luis Obispo. The latter two were established as long ago as 1916 and 1915 respectively, but had not appointed a librarian or begun to circulate books to any extent. Orange county was again obliged to appeal for help in reorganization. El Dorado and Placer counties remain comparatively inactive, and Shasta and Sonoma altogether so. Forty-four counties have adopted the county library system in the last ten years, and forty-one have it operating. The total income for the fiscal year ending June 30, 1920, was \$718,984 as against \$539,458 two years ago; the book accumulations were 1,519,331 volumes as against 945,856; the branches, 3,584 as against 2,890; the school branches, 1,982 as against 1,549.

The total income of the State Library was \$260,493, and the expenditures \$255,908. Administrative expenses were \$48,422; general expenses \$124,886; and \$16,702 was expended on the Law and Legislative Reference Department and \$18,328 on the Sutro Branch.

FRANCE

Strassburg. The University of Strassburg is to receive from the Carnegie Foundation the gift of a collection of books dealing with American literature, art, history, political and economic affairs, similar to that recently presented to the University of Paris.

This gift is due largely to the initiative of Dr. Richard Gottheil of Columbia University and Director of the Oriental Division of the New York Public Library, who is at present an exchange professor at Strassburg, and to Dr. Nicholas Murray Butler.

Paris. The collection of books and manuscripts dealing with the world war at the Musée de la Guerre already amounts to more than 100,000 volumes and almost as many pamphlets. A considerable amount of this material has been received as gifts.

Paris. The Comédie Française has been authorized to accept the donation made by Auguste Rondel of Marseilles, consisting of a library of about 100,000 volumes and pamphlets on the theatre and the history of the theatre.

GERMANY

Berlin. The American Institute in Berlin, founded in 1910 for the promotion of scientific interests of America and Germany, occupies a suite of rooms in the State Library at 8 Universität-Strasse. Of these, five are devoted to the distribution of material interchanged between America and Germany, such as the Smithsonian exchanges, and four to the library, which now numbers about 15,000 volumes relating mainly to economic, social and political conditions in the United States. It is the aim of the library to make its collection informally and easily available and to supplement the resources of other Berlin libraries.

"The funds required to start the Institute were turned over by the Ministry of Education from money left at its disposal for general educational purposes by the late Jacob Schiff of New York City and by James Speyer. There is no state appropriation, the Institute is dependent on private contributions for its current expenses," says *Transatlantic Trade*.

LIBRARY CALENDAR

April 29-30. At Atlantic City.

Twenty-fifth joint meeting of the New Jersey Library Association and the Pennsylvania Library Club and meeting of the American Library Institute.

May 6. In Cincinnati.

Southwestern Section of the Ohio Library Association, followed by a visit to the Cincinnati Public Library on Saturday the 7th.

The Third Revised Edition Ready May 1

To give practical aid to business people in the selection of business reading, distribute

BOOKS ON BUSINESS

A concise guide to the attractive business books of all publishers, with brief descriptive record of the recent books of 1920, and the books published this spring. Supplementary lists of exceptional books of earlier publication found valuable to special lines of business activity. An envelope enclosure booklist of 52 pages—with striking cover design and carrying your library imprint on the front cover. A special index to subheads, index to authors and Contents page make this booklet a good reference tool.

For Library Advertising

This booklet is designed to provide libraries with a booklist at such slight cost and in such convenient form that it can be easily and cheaply distributed to business people looking for information. It has been carefully edited in the office of the *Publishers' Weekly*.
Ready May 1. Your order can be filled only if secured in advance.

ARMSTRONG, Hazel E., Wis. 1917, is supervisor of branches, Fairbanks Memorial Library, Terre Haute (Ind.).

ARMSTRONG, Emma G., of the Canadian Pacific Railway Co. at 1270 Broadway, formerly of the Bureau of Information and librarian, has been transferred to the Bureau of Publicity.

BAKER, Adaline M., 1902 I., appointed head cataloger of the Newberry Library, succeeding Linn R. Blanchard. Miss Baker has been at the Newberry Library since 1916, and was previously cataloger at Northwestern University and Kansas State Agricultural College.

BOWMAN, Frances E., was wrongly described in our issue of March 15, as "formerly head of the Children's Department in the St. Louis Public Library." Her position was children's librarian in the Central Library building.

BROWN, Mabel, librarian of the National Committee on Mental Hygiene, has resigned, and is succeeded by Dorothy E. Morrison.

CALKINS, Ruth H., formerly assistant librarian of the Montague Branch, Brooklyn, N. Y., is now head of the General Reference Division of the Seattle Public Library.

CHAFFIN, Isabelle, S. 1915, appointed librarian of the new Public Library of Dearborn, Mich., April 1st.

DICKEY, Philena A., 1914-16 N. Y. P. L., librarian of the Sinclair Consolidated Oil Corporation, has resigned, and will take a six months' rest before again taking up library work.

EASTMAN, Mary, formerly with the New Jersey Zinc Co., is now in charge of the Reference Department of the Kansas City Public Library.

GRIFFIN, Martin U., Parliamentary librarian of the Canadian House of Commons since 1885, died in Ottawa, March 20th, aged 74.

HARWOOD, Annie E., is cataloging an engineering collection for the Cleveland Public Library.

JOHNSON, Esther C., librarian of the Wellesley Free Library, has been appointed to succeed Medora J. Simpson who has retired on pension after fifty-one years' service as librarian of the Chelsea (Mass.) Public Library.

LANG, Nan, 1911 Wis., children's librarian at the Wilmington (Del.) Institute Free Library, has organized a Story-Tellers' League in that city.

LEITCH, Harriet, recently librarian of the Lakeside Hospital at Cleveland, and formerly librarian of the Yesler Branch of the Seattle Public Library, has returned to Seattle as head of the Deposit Station Division.

MELDEN, Angie, librarian of the National Board of the Y. W. C. A., New York City, resigned March 1st to be married.

REELY, Mary Katharine, managing editor of the *Book Review Digest* since 1917, has just entered on a year's leave of absence, and is replaced by Marion A. Knight, 1900 N. Y. S.

SHEARER, Edith, is now librarian of the Western Union Telegraph Co. at 195 Broadway, New York.

SMITH, Edward Robinson, artist and formerly librarian of the Henry O. Avery Memorial Architectural Library at Columbia University, died at his home in Stamford, Conn., March 22nd, aged 67.

SMITH, Thomas H., assistant librarian and chief of the cataloging department of the New Haven (Conn.) Public Library, died March 13th after a short illness. Mr. Smith had been connected with the library since its foundation in 1887.

TAFEL, Leonore A., 1914 D., 1917-18 N. Y. P. L., of the American Cotton Oil Co., edits a house organ for that corporation.

WALLACE, Eugenia, formerly a librarian and recently head of the Employment Bureau of the Y. W. C. A., has resigned to become assistant director of the Gibbs Secretarial Schools.

ZACHERT, Adeline B., supervisor of School Libraries for the State of Pennsylvania should be addressed at the Department of Public Instruction, Harrisburg, Pa., and not at the State Normal School at Bloomsburg.

NEW CENSUS EDITION NOW READY

Size, 12 x 15 inches. 496 pages. Weight 10 pounds. Printed on finest quality heavy map paper, bound in buckram.

CRAM'S MODERN REFERENCE ATLAS THE STANDARD SINCE 1867

A COMPLETE reference work on all subjects of geographical information and commercial statistics. The 1920 census statistics of the United States and the new world maps, showing all territorial changes made by the war, make this edition of Cram's Modern Reference Atlas an especially valuable work.

New Maps—New Statistics

An entirely new set of maps, large scale, clearly engraved, and judiciously colored, has been specially prepared for this edition. The descriptive matter of the physical and political geography of the nations of the world has been rewritten and brought down to the present day.

Special Features

Descriptive Gazetteer of each state and country, giving data on soil, climate, population, resources, industries, products, government, etc.; 300 pages of maps, including 90 large double page maps of states and foreign countries, and of principal cities of the United States; topographical and geographical maps, biblical and historical maps; statistics on commerce and finance; carefully prepared index of 250,000 places, giving population, location on the map, etc., and indicating post offices, incorporated places, county seats, capitals, etc.

The new Modern Reference is offered at the very unusual price of \$19.50—prepaid anywhere in the U. S.

Descriptive circular, with sample maps, sent on request.

A woman of training and experience wishes work during the summer as substitute in a reference department, or to take entire charge of a small library. Would organize and catalog an unorganized library. Work with children not desired. Address: M. P. 8, care of the LIBRARY JOURNAL.

INDUSTRIAL ALCOHOL

By **F. B. WRIGHT**

This American book gives full directions and is illustrated with original drawings of the necessary apparatus for the manufacture of what is considered by many to be the coming fuel for automobiles, motor boats, heating, cooking, lighting. It should be a valuable addition to the technical library or to any library catering to the special needs of industrial enterprises.

Note—The sale of this book to libraries does not conflict with the provisions of the National Prohibition Act.

BIBLIOGRAPHICAL NOTES

The newly established house organ of the Birmingham (Ala.) Public Library is *Staff Stuff*.

A catalog of the collection of paintings, drawings, and engravings by John Gadsby Chapman and his son, Conrad Wise Chapman, in the Virginia State Library occupies a delayed issue of the Library's *Bulletin*, dated July, October 1919. A well-known work of the elder Chapman is the "Baptism of Pocahontas" which is in the rotunda in the Capitol at Washington.

In response to many requests for lists of books of special interest to colored readers, the Louisville Free Public Library has prepared an attractively printed list of books and pamphlets, music, magazines and newspapers by negro writers, composers and editors. The compilers are Thomas F. Blue, head of the colored department, and Rachel D. Harris, who is in charge of the school and extension work for colored readers.

A third and revised edition of "How to Appreciate Prints" by Frank Weitenkampf, chief of the Prints Division of the New York Public Library, has just been published by Charles Scribner's Sons. This is the seventh printing (the first was in 1908, when the work was published by Moffat, Yard & Co.) and, as on the occasion of each reprinting of the work, various corrections and additions have been made.

Librarians may find useful the following reference sent by C. G. Abbott, assistant secretary of the Smithsonian Institution to Charlotte A. Baker, librarian of the Colorado State Agricultural College:

"Referring to footnote 1 on page 54 of Smithsonian miscellaneous collections, vol. 60, No. 23, I beg to advise you that the complete reference is as follows: Bull. 175, Office of Experiment Stations, U. S. Department of Agriculture, 1904, page 235."

"News Notes of the Boston Public Library" forms a part of Bulletin 14 (March 15th) of the *News Notes on Government Publications*, published for the staff of the Library. This first installment of Boston news notes is devoted to the Vocational Information Service, which is an important recent addition to the facilities of the information office of the library. Established by the Association of Col-

legiate Alumni with the co-operation of the Woman's Municipal League, the Y. W. C. A. and the Girls' Trade Education League, it aims to make accessible the latest available information on the various vocations.

"Under the title of *Library Windows*, the Syracuse Public Library continues the periodical bulletin which has been issued by the library for the past fourteen years. What architects call fenestration is what we are after," says the library in the February number (v. 14, no. 1), "providing a convenient and well designed opening whereby those in the library can reach out and those outside can see in." The first number of the new series is a business students' number.

"The Subject Index to Periodicals," 1917-1919, Part F, has been issued by the Library Association from Stapley House, 33 Bloomsbury Square, London, W. C. 1.

This part is devoted to Education and Child Welfare, and the scope of the list has been extended by the inclusion of material on the rehabilitation of the disabled, etc., hitherto included in the list on "Historical . . . Sciences." There are 2154 entries selected from 242 English and foreign periodicals.

The annual publication of the class lists is resumed this year.

"The Guide to Serial Publications Founded Prior to 1918 and Now or Recently Current in Boston, and Cambridge and Vicinity" has progressed to the point of having five hundred titles in type in galley proof.

This catalog, tho much of it is still in crude condition from the publication point of view, has for several years been helpful to research workers and others, and is valuable for free consultation by those who, either personally or by letter apply to the editor and compiler, Thomas J. Homer (in the Barton-Ticknor room of the Boston Public Library).

The collection, it is believed, consists of more than 21,000 titles and is steadily growing.

There is a separate section for publications founded in 1918 or later, and hence, too recent to be within the scope of the printed work.

Incidentally, many other resources have been assembled, including catalogs published in various parts of the world and several specimens of serial publications which are scarce.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, Of the LIBRARY JOURNAL, published Twice-a-month, at New York, N. Y., for April 1, 1921.

STATE OF NEW YORK,
COUNTY OF NEW YORK, ss.

Before me, a Notary Public in and for the State and County aforesaid, personally appeared J. A. Holden, who, having been duly sworn according to law, deposes and says that he is the Business Manager of the LIBRARY JOURNAL, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:

Publisher R. R. BOWKER CO.
62 West 45th St., New York.
Editor R. R. BOWKER
62 West 45th St., New York.
Managing Editor ELEANOR FF. DUNCAN
62 West 45th St., New York.
Business Manager J. A. HOLDEN
62 West 45th St., New York.

2. That the owners are:

R. R. BOWKER CO., 62 West 45th St., New York.
R. R. BOWKER, 62 West 45th St., New York.
MARION A. OSBORNE, Morristown, N. J.
J. A. HOLDEN, 62 West 45th St., New York.
F. G. MELCHER, 62 West 45th St., New York.
A. C. FRASCA, 62 West 45th St., New York.
A. R. CRONE, 62 West 45th St., New York.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities are:

NONE.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation, has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

J. A. HOLDEN, *Business Manager*.

Sworn to and subscribed before me
this 16th day of March, 1921.

ARMOND FRASCA,

Notary Public, New York Co., N. Y., No. 191

PRESS NOTICES.

CHRISTIAN WORLD—This is a timely, impersonal, dispassionate, analytical unanswerable discussion of the weaknesses and inconsistencies of the Christian Science Church. It overflows with facts which provide the ground-work of the author's incisive argument . . . and is as clear as sunshine and as irrefutable as the decalogue.

THE EVANGELICAL MESSENGER—The spirit in which his exposures of inconsistencies in the organization are made is very commendable, and adds merit and pungency to his arguments and forceful statements. It is the only book of its kind on the market as far as we have any knowledge.

Electrical Equipment of the Motor Car

A practical manual on Ignition, Starting and Lighting, in which special attention has been given to the fundamental principles of electrical engineering as applied to the electrical equipment found on the modern motor car.

The book is well illustrated and numerous special diagrams have been prepared to bring home more forcefully the subject matter under discussion.

712 Pages, 5 x 8 ins., 464 Figs., 256 Blueprint Wiring Diagrams, Flexible Fabrikoid, \$3.50

ERRATA

In our number for April 1 (p. 311), Mr. Fredel's book is listed as "Training in Librarianship," instead of "Training for Librarianship" and Miss Laura Thompson's talk to the District of Columbia Library Association is promised to readers of the JOURNAL instead of the paper read by Miss Mary G. Lacy at the same meeting of the Association (p. 320).

NOW READY

This important bibliography of British publications, after numerous delays, is now ready for delivery to American purchasers.

It is the English equivalent of the "Publishers Trade List Annual" and with its Index Volume is an indispensable tool for every bookman and librarian in obtaining information about books-in-print, with their prices, in the English market.

This is the first issue of the catalogue since 1913 and it will probably be four years or more before another is issued. If not already ordered send for a set at once; the edition is limited.

THE NEWS

In Spite of the Newspapers!

While many folks were shedding tears over the decadence of the press, a group of labor editors decided to get the news in spite of the newspapers and the great news agencies.

That was a year ago. Today they have an international organization with news connections on four continents, in such centers as Paris, London, Berlin, Vienna, Sydney, Auckland, Peking, Rome, Mexico City, Ottawa, Washington, New York, Chicago, and others. There are several hundred editors all over the world who are now using the service. The organization is called THE FEDERATED PRESS.

On the staff of The Federated Press are such persons as Louis P. Lochner, Paul Hanna, Laurence Todd, William Hard, Anna Louise Strong, Sanford Griffith, W. N. Ewer, M. Phillips Price, Mary Heaton Vorse, Scott Nearing, Carroll Binder, Helen Auger, Heber Blankenhorn, Mirian Allen deFord, Mary Senior, W. Francis Ahern, and others.

The Federated Press Idea

The Federated Press does not make profits. It is a co-operative association of editors who want the truth in the news. It aims to present undistorted accounts of current events free from that unofficial censorship and studied misinterpretation by financial interests, which poison conventional news-streams and shackle the American press.

Anyone Can Read the Federated Press Service

You can obtain The Federated Press Service through many newspapers, and some liberal magazines. Look for it. In addition to this, the service can be obtained by individuals or by groups, on the pledge that it will not be used for publication.

The Federated Press League

You can also help bring the news out into the light by joining The Federated Press League. If you will write to the Secretary he will tell you how the neighborhood councils of the League are organized and how you can obtain membership in the League and assist in its work. In each neighborhood, university, school, church, labor union, public forum, lodge or society, there is an opportunity to form one of these councils.

If you want the truth in international affairs,
If you want the whole truth in the industrial situation,

Fill out this coupon and mail it to

CLARK H. GETTS, Secretary,

The Federated Press League

511 N. Peoria Street, Chicago, Ill.

Samples of the Service will be sent to all who send in this application.

I wish to join

RONALD
Publications on Business

Personnel Relations in Industry

By A. M. SIMONS,

Formerly (1920) Manager of Personnel Relations Department of the Leffingwell-Ream Co.

A unique discussion of the human element in industry and of special importance in solving present capital-labor problems. Although the author has the workers' point of view constantly in mind, he makes production the criterion of every plan. From his wide experience with problems of labor management, he has classified fundamental laws, which have been thoroughly tested in shop, mill, mine, factory, and store and which, when put to every day use, will help to eliminate the waste of the "trial and error" methods of hiring, training, and keeping workers. Will make an instant appeal to executives, employees, and personnel workers.

341 pages.

Price \$3.00

Business Mathematics

By EDWARD I. EDGERTON, B. S., and
WALLACE E. BARTHOLOMEW

Gives thorough practice and training in all the calculations required in modern business. Explains clearly what the business problem is in each case and how it is solved. Designed for use by high-school and first year college students.

300 pages.

Price \$2.00

Elements of Bond Investment

By A. M. SAKOLSKI, Ph. D.,

Bond Expert of the Equitable Trust Company of New York City

Covers in a clear, non-technical way the fundamental principles of sound investment; financial statements; the field of investment; and the various classes of bonds including federal, state, municipal, railroad, public utility, and industrial. The author's wide experience as a bond statistician and investment analyst has enabled him to so present his material as to meet the needs of private investors, security salesmen, business men, and students.

158 pages.

Price \$2.00

Principles of Marketing

By PAUL W. IVEY, Ph. D.,

Professor of Marketing, University of Nebraska.

Gives an analysis of the marketing process; definite principles; and a clear, unified explanation of the various ways of getting goods to the consumer. The marketing methods of manufacturer, wholesaler, retailer, department stores, chain stores, mail-order houses, etc., are described. While this timely volume is designed as a text-book for the student of business administration, it will appeal especially at present, to all business men who are concerned with the marketing of goods.

331 pages.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

BANGOR PUBLIC LIBRARY

The stackroom is equipped with the SNEAD STANDARD STACK, "Open Bar" adjustable shelves and a deck floor of glass.

This view shows the 2nd tier, which is at the level of the main floor, prepared to receive the future 3rd and 4th tiers. The stackroom is approximately 98' long and 35' wide, and when completed will afford accommodation for approximately 280,000 volumes.

For years Snead products have been the preferred equipment for both large and small libraries.

Their adaptability to expansion, their unequalled compactness, and their scientific construction throughout, insure perfect satisfaction and ultimate economy.

Detailed plans and description of the above, and many other notable library buildings are found in our publication "Library Planning, Bookstacks and Shelving" which also contains valuable technical articles on the planning and construction of libraries.

What Is a Special Library*?

By CARLOS C. HOUGHTON

Librarian, Poor's Publishing Company, New York.

MISS DONNELLY has asked me to give a talk this morning which will outline clearly just what is a Special Library.

Definitions do not help much. We memorize them only to forget them. This morning I am going to appeal to your imagination rather than your memory. If I leave with each and every one of you a clear picture of yourself conducting a special library, I shall be satisfied. If in addition to this I say anything here this morning which you will later actually apply I shall be more than satisfied.

Is a library almost entirely devoted to finance a special library? The answer to this question is *yes* and *no*. It may or may not be. I am going to ask you to build right here with me a financial library as you would build it if you were given the task to-day. Then let's burn it and rebuild it as you would do after you finish Miss Donnelly's course.

We are all familiar with Moody's Manual—published by Poor's Publishing Company. It just so happens that I am engaged to build for this firm a special library on corporate information and finance. Why not take an actual case when the opportunity affords?

Of course, it will be impossible for me to mention all the important tasks undertaken by a special librarian in building such a library. I shall here name a few as examples and trust that in so doing I shall fire your imagination to picture many more. Just so with books. I shall mention a very few, just enough to get my thought across.

Now then, are we ready to start this library for Poor's Publishing Company?

The *Commercial and Financial Chronicle* is subscribed for. As near a complete set as possible is secured. Subscriptions are also placed

for the *Journal of Commerce*, *Wall Street Journal*, *Boston News Bureau*, *Philadelphia News Bureau*, the leading economic journals and also certain trade journals. We also place subscriptions for the *Reader's Guide to Periodical Literature*, the *Industrial Arts Index* and other reference tools. Having our periodicals ordered we next buy some books. We select the best books on finance and, of course, include a good dictionary, an encyclopedia, an atlas, an almanac, etc. Our books are classified and cataloged. Our collection is kept up-to-date and we soon are able to say we have one of the most complete financial libraries in the United States. Now let's fire this library, for if we do not we, as librarians, will be fired, for spending a lot of money in building up a collection of books and material which could be easily borrowed or consulted elsewhere.

Now we will appoint ourselves Special Librarian of Poor's Publishing Company. We spend the first month in studying the company. What does it do and how does it do it? When our study is completed we know as much about all the different departments as any other one employee. This is the secret of success as a special librarian. We next look around and see what collections are available to either employees of the Company or us as librarians of the Company. The public library facilities are noted as are those of other financial libraries in the vicinity. We immediately join the local Special Libraries Association. If there isn't one we organize one. By becoming conversant with other collections we can now decide what books and periodicals it will be necessary for us to acquire. We subscribe to the *Commercial and Financial Chronicle* for that is the backbone of any financial library. We only buy such books as will be in almost continual use and books which cannot be borrowed from other libraries. These books are minutely analyzed. Fifty en-

*Opening lecture of the Special Libraries Course for 1921 at Simmons College School of Library Science.

tries in the catalog for one book will not be uncommon. Books of interest to us not in our library but available elsewhere are noted on yellow cards and these cards filed in the catalog. Specially strong collections on subjects of interest to us are also noted on yellow cards and filed in the catalog under the proper subject. Indexes to periodicals are very poor and appear late so we make note of items of interest as they appear on green catalog cards and file them in the catalog.

Magazines and newspapers containing such articles are stamped: "Articles on following pages cataloged ———." Magazines which are thus stamped are not later destroyed until these articles are clipped. These clipped articles are filed in our subject file which contains material of an ephemeral nature on articles which taken alone are not worth cataloging. For instance, we notice a short statistical table in a magazine giving the imports into Great Britain from Germany for February. This one table is not important but it is filed in the subject file under "Germany—industry and commerce" in the hope that in time other statistics of the same nature will be brought together under that heading. When a subject is started in the subject file a cross reference is made to it in the catalog.

I mentioned throwing away magazines. "Throwing away" is one of the best little things a business librarian does. He must make a decision what is needed and what is not. He must lay down policies and follow them. For instance, do our needs require a continuous set of Thomas' Register? Do we need the back numbers of Dockham's Textile Directory? We decide we need only the last two issues and it is so noted on our shelf list card and when 1921 is received 1919 is discarded. I cannot lay too great stress on the importance of not allowing a business library to grow larger than necessary.

Two desks are used instead of one. Our chair is between them and we can swing from one to the other. We choose two desks in preference to a desk and a table because we need the drawer space in which to house our many card bibliographies, and other compilations which are ever in the making. Under the glass on our desk we have a list of these compilations and thus are reminded of them continually. We read in the *Journal of Commerce* a quotation from a house organ of the American Bottle Co. The quotation is of no consequence to us but here is another house organ to add to our card list. *Do it now!* We read some statistics on crop conditions in California and notice that credit for the statistics is given to a news let-

ter published by a bank in San Francisco. Ah—another bank letter to add to our list. *Do it now!* In this way we build up with little effort and hardly any extra time answers to future questions for surely we shall some day be asked for the names of banks which issue news letters or the names of corporations which publish house organs.

By our study of the organization we know that certain of the employees analyze business conditions. We know they will be interested in what others think so we start a series of envelopes of views of prominent men on various subjects; such, for instance, as: The foreign trade, the money market, business outlook, labor conditions, the tariff, etc. As speeches, interviews, articles, etc., are seen they are either clipped and filed in the proper envelope or a card is placed in the proper envelope referring to the particular viewpoint in question.

We also have learned by our study that certain subjects are of special interest to certain departments of the organization. In addition to paying special attention to these subjects when securing books and cataloging we place and order with one of the press clipping bureaus for all news items published on those subjects. Views of prominent men might well be included in this order, as might items regarding the opening of new banks, bond and investment houses. It is well worth the time of any business librarian to make a comparative study of the press clipping bureaus and of what service they can offer.

For instance, I am just now starting a card list arranged by subjects of sponsors of various kinds of knowledge. I expect to be furnished with a great many items by such bureaus citing a certain person as an authority on this or that subject. The very next best thing to giving a complete answer to a question is to tell the inquirer who can give him the information.

To come back to the special subjects to which we have decided to pay particular attention, we subscribe to all Library of Congress cards on these subjects. This brings all new books to our attention should we have otherwise missed noting their appearance. It also enables us to build up a complete catalog on these subjects even tho we often decide not to purchase the book.

We saw by our study that the company is continually being called upon to give opinions on the advisability of investing in particular corporations, or that it is being asked all kinds of questions concerning particular corporations. For this reason and also for the reason that the Manual which it publishes traces the control of one company over others, we find it neces-

sary to maintain a file of corporate information. A folder for each company into which we file everything published concerning that company.

We also start a card system of directors of corporations. True, there are about ten local directories of directors published but they do not give the business connections of men no matter in what part of the country they reside. Every time we note a man is chosen director of a corporation we go to this file and if we find a card in the file for him we add the name of this new company. If there is no card we put one in immediately. In time we shall have an extremely valuable file which will show the interlocking of directors—an all-important factor in the world of finance.

After we get things well under way we are able to act less like a machine and are on the alert for ideas which will make the library of greater service to the organization. We now notice that so many people in looking over our shelves say, "My, I wish I had known there was a pamphlet on this subject," or, in looking thru a trade journal, exclaim, "Just the statistics I could have used yesterday." Why not issue an office letter, we ask ourselves? On looking into the matter we find we can easily issue three one-page letters a week. These mimeographed letters will contain digests of articles in newspapers and periodicals. Books, pamphlets, etc., recently added to the library will be described. Features of the library will be written up from time to time and lists of important questions answered will be included. A little general office news, such as resignations, appointments, etc., might well be included. If such a letter is edited correctly it is sure to almost double the usefulness of the library.

If an organization has salesmen a large field of usefulness is opened up to the special librarian. He can be of great service to them and they in turn can be of service to him. It so happens that the organization for which we are building this library has a corps of salesmen. What shall we do for them? We classify the Manual published by the company which our salesmen are selling. The Manual I suppose you all know is a set of four volumes containing all the information of interest to investors and corporation officials concerning industrial, railroads and public utility corporations.

We find that one hundred iron and steel companies are included. We also find on consulting the list of subscribers that of these sixty subscribe for the Manual. Of course they have all been sent general letters, but we write the salesman in Chicago, for instance, and give him a list of ten such companies and tell him to use

the argument that if sixty companies similar to his find the Manual useful, surely his will, and that as these sixty companies have all this information about his company, surely he should want similar information about theirs.

We next classify our list of subscribers. We find that eight out of the twelve Federal Reserve Banks subscribe. What an argument for the salesman in Cleveland to use in securing a subscription from the Federal Reserve Bank of Cleveland!

We also find that companies in certain industries seem to find our Manual more useful than companies in other industries. We have built up a library of corporate information, so we, of course, have Thomas' Register, Hendrick's Commercial Register, Trow's Co-partnership Directory, a full line of trade directories, all of Donnelley's classified telephone books, state reports containing lists and reports of corporations, all the directories of directors, etc. We, then, compile lists of companies in these industries from which the Manual has received the most orders and send them to the salesmen. We invite each salesman to send in lists of companies he considers prospects and we will look up and furnish him with the names of the officers, a fact always helpful in making a sale.

We remind our salesman that he is ever running against information which we want. A new investment company starting business in his territory. A new state law which makes it necessary for banks to change a certain method—or what not. We urge him to send on those news items to us, in order that we may make use of them at home.

It might not be out of place to read here a paragraph or two from an address I recently made before the Bond Men's Club of Philadelphia on the Sources of Information. You will be surprised when I tell you that altho I mentioned the most common sources for financial information all were evidently very new to them for I am still receiving requests for copies of that address or for the exact references to these sources.

"But collecting this information alone is not enough. It must be made to work for the concern; it must be made to produce results. Herein lies the real work of the information department. One way we can do this is to co-operate closely with the salesman and fortify him with all the necessary information to sell bonds. If this is properly done, the salesman should be in a position to anticipate the objections of a possible buyer. Think how weak a salesman's position is made, when he goes in to sell a bond of a certain company and is told right off the bat by the prospect that he wouldn't buy a bond from that company because it is under fire by the Federal Trade Commission. His ignorance of this fact is fatal. Had the information department been on the job and secured this information at once,

compiled immediately arguments to offset it, dispatched the same to the salesman, in what a different position this salesman would have found himself! He could have anticipated the prospect's argument and turned what seemed to be a point against, into a talking point for the bond. For instance, he could have said: 'Why, this company has so enriched its trade mark of a certain silk, its 'would-be' competitors have become so jealous they have appealed to the Federal Trade Commission to try at least temporarily, to force this company to abandon this trade mark. He could then explain that any company can complain against another company to the Commission and if it appears in the public interest, a complaint is issued. Following this up with the fact that, therefore, a very large percentage of these complaints are dismissed, as there is every reason to believe this one will be.

"It is a splendid practice to have the salesmen meet every so often with the staff of the information and statistical departments. Such meetings should take the form of 'experience meetings,' each salesman in his turn telling the arguments he is up against and his troubles in meeting them, and giving his ideas as to the best way the department can be of help to him.

"It is my duty to collect information which will steer the company, assist the executives in forming opinions and shaping policies, answering the numerous and often very complex questions and problems put to us by our clients and last but not least, assisting our salesmen to make sales. I get out and sell every once in a while in order that I may get first hand the problems of both our clients and salesmen.

"Bond salesmen have a wonderful opportunity to help their organizations in so many ways. It isn't only the actual sales which count. The best salesman to whom I ever gave an order stopped me twice when I was talking to him, and jotted down notes in his little book, saying: 'I'll answer you the best I can in a minute. I want to get your thought down before I lose it, so that I can give it to our Information Department to work on.' He was alive to the needs of his organization and it wasn't surprising to me to learn later he was called in and given charge of an important branch office.

"This world is a magnet—charged with information. Some salesmen are like pieces of straw. They, by the very nature of their work, come into contact with this magnet at every point but are not affected one iota by the information current, while others are like pieces of steel—not only attracted by the current of information, but hold on to it until released either by force or a negative current, the negative current being conviction of the non-practicability of the idea—force being the adoption of that idea.

"The good salesman doesn't only report the sale. In the course of the selling he gathers information about the buyer of interest to his organization. He reports that also. He remembers the hardest customer is one who is purchasing his first bond. A purchaser of one bond is a good future prospect and a good salesman advises his house as to the best way it can be of assistance to this customer. In our business, probably more so than in yours, it is just as important to keep rendering service to a client as it is to sell him in the first place. Dissatisfied customers are worse than no customers. I can usually estimate the degree of efficiency of an information department by the number of cancellations received in the organization. In your business, I should say, by the number of repeat sales and the average length of time a man is held on your active customer list.

"When the day arrives, and in my opinion it is now dawning, that the straw type of salesmen are in the

minority and Information Departments are ever turning their labor into money getting arguments—the money for such work will be considered an investment and not a necessary expense and special librarians will no longer have to fight each year for a meager budget."

With these and similar points in mind I went on to state the various sources of information of interest to bankers and "bond" houses.

As a rule Government documents, both Federal and State, are used more extensively in a business than a public library. The *Monthly List of Public Documents* issued by the Superintendent of Documents and the *Monthly List of State Documents* compiled by the Library of Congress are checked thoroly for documents of interest. A business man who was once declaring to me that a library would not pay for itself in his organization made the remark that, "Maybe government documents don't cost much but it costs to have them cataloged and shelved and even if this cost be slight it is money wasted, as Government documents were valueless if for no other reason than that they are out of date by the time they are published." He should have stopped here but he didn't. He went on to say, "Now, if special librarians were also good statisticians and good executives I could use one. For instance, he could take charge of an investigation I want made. I have occasion frequently to send gravel to various cities. I want a number of docks in each of these cities described. Would you say that the usual special librarian could conduct such an investigation for me at the smallest expense." I said, "Well, if I were your librarian I could but I wouldn't; I'd spend \$1.25 of your money and furnish you with one of those worthless documents of which you were just speaking. This one is published by the Engineers' Division of the War Department and contains over 800 pages of descriptive matter on the various docks and wharves of all navigable rivers in the United States. It cost the government thousands of dollars to gather—its yours for \$1.25, your investigation is unnecessary." I later presented him with a copy of this document altho it was very scarce and told him any special librarian would have dug up the document even had he not known of it when the proposition was first put to him. He thanked me by offering me a position, the duties of which would be to build up a business library.

As this library which we are building is to be especially strong on corporate information we make a study of various papers in order to determine which ones contain the most news concerning the corporations of the country. After this study we would place subscriptions for the following: *New York Times*, *New York Tribune*, *Commercial and Financial Chronicle*,

Iron Age, Financial America, Journal of Commerce, Wall Street Journal, Oil and Gas Journal, Manufacturers Record, Boston News Bureau, New York Commercial, New York Herald, Philadelphia News Bureau, Philadelphia Public Ledger, Railway Age, Electric Railway Journal.

I do not mean to say that these are all the newspapers and trade journals we should regularly receive, but these would be received and gone over carefully for corporate news.

It is important for any business librarian to watch legislation. The very best medium for this is the *Weekly and Monthly Compendium* published by Roy Loomis of the House Document Room. It gives the number of the bill, the subject, latest action taken of both the House and Senate. It also gives the gist of Committee hearings before both houses. It lists regularly Presidential approval or veto of all bills. But I am digressing when I describe "reference tools" and books of special use to business libraries. Miss Donnelly will have the pleasure of making you familiar with them. It is my object to mention only a few in order to make you visualize the duties of a business librarian.

I could go on and enumerate many things I have in mind to do for Poor's Publishing Company but I have stated enough to show along what lines a business librarian should work.

Business librarians are growing in number but not as fast as they should. Too many corporations engage inexperienced and untrained librarians to organize and run a library for them. They are later disappointed and discredit the whole movement. A great deal of trouble lies in the fact that when a business library is just starting only one librarian is necessary, and so it happens that people who should start in the field as assistants are given immediate charge of the library.

I am glad that Simmons College is offering a Special Library Course. I hope it will be successful and each year the course made longer and harder. Your course is a short one but if you are at its conclusion sufficiently interested to enter the business library field take my advice and look for a place as assistant under a successful business librarian and remain with him or her long enough to master his or her method of procedure or until you find yourself suggesting things to be done before he or she has thought of them. Then when you do become librarian of a business concern you will have a future before you; for a business house is unlike a city government in that it pays according to what it receives in return.

There is a big future for the experienced and

trained librarian in this field—but above all else initiative and originality are necessary.

The Village Library

COMPARATIVELY few villages have libraries accessible to the general public, say W. S. Deffenbaugh and J. C. Muerman in their bulletin "Administration and Supervision of Village Schools" (U. S. Bureau of Education, Bulletin, 1919, no. 86, published 1920.) They go on to quote Harlan Douglass, who states, "The library itself as a public institution is not existent in most of the little towns. There are less than 2000 in the entire United States, and four-fifths of their readers live in the North Atlantic and North Central States." In many villages there are a few books in the school building for the use of the pupils, but as a rule these books are inferior, not adapted to the age of the pupils, and seldom used. In many village communities the churches formerly had Sunday school libraries, but this plan proved a failure in most instances from the fact that the books were poorly selected. The real depository of the village library is the public school, but if the school is to serve the community, there should be a library room full of books not only for children but for adults. There should be children's stories, fiction, history, biography, books of travel, and books on farming and other vocations. If the principal of schools is appointed for the entire year, as he should be, he could act as librarian several times a week.

The authors suggest that the first money raised for a library should be expended for books to read rather than for encyclopædias, compendiums, and books of useful facts. Reference books should be provided out of regular school funds, and most school boards can be induced to purchase such books, while it is rather difficult to persuade them to purchase story books and other reading material that appeal to children.

ON THE CARE OF PAMPHLETS AND CLIPPINGS

"Pamphlets and Clippings in a Business Library" by Virginia Fairfax, librarian of the Carnation Milk Products Company of Chicago, is published by the *Journal of Electricity and Western Industries*, San Francisco. This little book is a reprint of the series of articles by Miss Fairfax in the *Journal of Electricity*, based on the course of instruction given at the Library Service School, Riverside, Calif.

The Content of Dust in Libraries*

To the Editor of the LIBRARY JOURNAL:

Answering a number of correspondents concerning the bacterium content of dust accumulations in libraries—floors, shelves, stacks and air—specimens for examination would better be sent to the city or the county bacteriologist and not to this laboratory.

With reference to the various species of micro-organisms of indoor dust, I fear I cannot answer the question, except to say that any forms which occur in street dust will be found within the library; and the micro-organisms of specific contagious diseases may be found possibly on books that have been kept in rooms where contagious diseases exist. In such cases the books should be destroyed. Sterilization is too uncertain.

During damp, warm weather scores of species of micro-organisms may be found both in the floating dust of the air in public buildings, and in the dust which has settled. A few only are pathogenic or disease-breeding.

The bacilli of anthrax and of tetanus, or lock-jaw, are rarely found; and inasmuch as they possess but little resistance to sunlight and dry air the danger of infection is very slight. I cannot find any case of infection on record where the disease came from the dust of a public building.

The colon bacillus is quite apt to be present in indoor dust and the dust of a public library is not an exception. It is derived from horse dung and therefore is an intestinal product. When it is a part of dust content it is harmless. When found in drinking water it points to the possibility that the water may also contain the germs of typhoid fever.

The micro-organism of diphtheria is very rarely found outside of a dwelling in which the disease occurs. In a dozen or more instances books and toys handled by diphtheria patients have communicated the disease to others after periods of time exceeding six months. In one instance a picture book communicated diphtheria after a period of a little more than a year. The book had been the companion of a child who had died of diphtheria. After the lapse of

a year it was given to another child and this child likewise died of the disease. The micro-organism of diphtheria is very resistant; it may survive in books, clothing and toys for a long time. It is very rarely found in dust.

The bacillus of tuberculosis is very common in dust. I have never failed to find it in the ordinary accumulations of street dust and house dust when I looked for it; I usually find it when I do not. Tubercle bacilli are fairly resistant and will retain their virulence for several months if the air is moist. It seems highly probable that the persistence of tuberculosis so evenly spread over the eastern half of the United States is due in part, at least, to the constant presence of tubercle bacilli in wind-blown street dust. Tuberculosis is essentially a disease of modern civilization.

In one city public library two of the assistants were affected with tuberculosis. One remained at the desk until she collapsed. She was sent to a sanitarium where she died a few months afterward. The other assistant resigned before the disease had progressed to a critical stage. She died a few years afterward and tuberculosis was the cause of her death. I have a complete history of this case because of a suspicion that she might have contracted the disease from the assistant whose case is previously noted. She did not, however; she contracted it while sitting at the same desk with a tuberculous pupil, in an ill-ventilated school room.

Whether or not either of the assistants communicated the disease to others is not a matter of record. The points to be noted are two in number:

Tubercle bacilli cannot be kept out of a library building so long as they occur in the dust of adjacent streets.

They can be prevented from flying into the air by keeping them on the floors. And if the floors are properly oiled they will not get into the air.

JACQUES W. REDWAY.

*Meteorological Laboratory,
Mount Vernon, N. Y.*

IN MAINE

By the will of Annie Louise Cary, the Village of Wayne receives a bequest of ten thousand dollars for the Public Library, and the Public Library at Scarborough is to receive the income from a trust fund of five thousand dollars.

*A paper on "The Dust Problem in Libraries" was contributed to the LIBRARY JOURNAL for April 15, 1920 by Dr. Redway, a physiological meteorologist, who is director of the Meteorological Laboratory at Mount Vernon, N. Y., and who was for many years interested in library work in the West.—ED. L. J.

Libraries and Labor Education

WORKERS' education is young and cannot be said to have a library policy. But it has, of course, its problems of book administration. This account aims to tell what workers' education is and its relation to libraries.

The first National conference on trade union education was held at the New School for Social Research, New York, on the second and third of April. It was attended by over two hundred people including twelve labor officials, thirty-four trade unionists and other workers, fifty-two teachers and six librarians. The chief work of the conference consisted in the formation of the Workers' Education Bureau of America. The object of the Bureau is to act as an information center; a publicity organization; a teachers' agency; a laboratory for teaching methods and preparing texts. Its chairman is James Maurer, president of the Pennsylvania Federation of Labor, and its executive secretary, Spencer Miller, Jr., of Columbia University.

A report submitted by Abraham Epstein, who with Fannia Cohn was largely responsible for the organization of the conference, gave a detailed survey of workers' education. It covered twenty-three experiments—excluding the Rand School and United Labor Education Committee which had not replied to the questionnaire which served as a basis of the survey. These schools are located in twenty-two cities. Most of the labor colleges have been started within the last two years. There were only three schools previous to 1918. Three more were organized in 1919, thirteen in 1920, and four during the first three months of this year. Sixteen of the twenty-three schools reporting are entirely under trade union control and financed by union contributions. Classes meet in labor halls in fifteen cities, in public schools in seven, and one class in Minneapolis meets in a room of a public library. The total enrollment of the twenty-three colleges was 4670. Outside of the clothing workers' union classes in New York, Philadelphia, and other cities where young women take part, the attendance, especially in classes in smaller towns, consists largely of mature men.

Arthur Gleason, in his booklet on Workers' Education¹ has put its spirit and aims in the following words: "This is the heart of workers' education—the class financed on trade union money, the teacher a comrade, the method discussion, the subject the social sciences, the aim an understanding of life and the remoulding of the scheme of things. Where that dream of a better world is absent, adult workers' education will fade away in the loneliness and rigor of the effort."

Specific aims fall into three groups: (1) The training of leaders; (2) giving the more eager of the rank and file a social or civic education; (3) reaching the masses thru "semi-entertainment with a cultural slant." The method for the first two groups will be intensive study in small classes over a period of years. In the last "three-quarters of the time will be used in attracting people. The other quarter will contain some bit of information."

The trade unions have doubled in membership within the last few years. Bulk and motion are worth little without directing intelligence and a statesman-like program. Labor education is grouping toward definition of issues and clarifying of aims. This involves a careful study of the economic and historical background of the worker's job and a mastery of the technique of management and production.

The library experience of the schools has been limited. In 1918 the International Ladies' Garment Workers' Union had a library room in Public School 40, Manhattan. Some of the books were purchased by the Union, but most of them were loaned by the New York Public Library. A reading circle was held in connection with this library. A plan was mapped out for placing selected collections in each school where union classes were held. This has not been pushed. The public libraries have cooperated with the Pennsylvania Labor Education Committee in supplying readings in the social sciences needed by labor colleges. Paul Blanshard of the Rochester Labor College has placed a box of books supplied by the public library beside the window where union dues are paid. The Rand School has its own library used by its students and by the research department in compiling the American Labor Year Book. The New Brookwood School at Katonah, N. Y., has a collection of three thousand select books which will soon be enlarged to eight thousand. Experiments carried on in evening high schools such as Washington Irving should count on the libraries in the buildings to meet their wants. The classes at Amherst and Bryn Mawr have the university libraries to draw upon.

The Workers' Education Bureau itself has special library problems. The technique to be used will not differ greatly from that of the business library as outlined by Miss Krause.² The Bureau has the rudiments of a clipping and

¹ Arthur Gleason. *Workers' Education; American and foreign experiments.* New York: Bureau of Industrial Research. 1921. 62 p.

² Louise B. Krause. *The Business Library.* San Francisco: Technical Publishing Co. rev. ed. 1921.

pamphlet collection on labor education in various countries, with programs and announcements of schools and a bibliographic index covering the literature of the field. A book collection is planned which will include the few books giving information about workers' education, teaching methods and a collection of texts and readings recommended for use in labor colleges.

A survey will no doubt be made of the resources of various collections strong in the social sciences; source material for trade union studies at Johns Hopkins University, Wisconsin and Columbia; and the economic collections of the New York Public Library, the John Crerar, and the Library of Congress. There are dozens of jobs calling: such things as making a union list of trade union, socialist and other labor periodicals; preparation of reading lists; and the listing of sponsors for information about the various schools.

Within the last few years there have come into existence several labor research bureaus which can be counted upon to give aid to the Workers' Education Bureau. Some of these are the Bureau of Applied Economics, Washington, D. C., the Bureau of Industrial Research, New York City, the Bureau of Labor Statistics of the U. S. Department of Labor, the Labor Bureau, Inc., New York City.

The older movement for workers' education in Great Britain has made great use of the lending libraries. The Fabian Society which Arthur Gleason calls the "foster parent" of the movement in England has long circulated library boxes. Its experience is given by Edward R. Pease¹:

"We had started a lending library in boxes for our local societies, and as these died away we offered the use of it to working-class organizations, and indeed to any organization of readers or students. Books were purchased from special funds, a collection of some five thousand volumes was ultimately formed, and for the last twenty years the Society has kept in circulation anything up to two hundred boxes of books on socialism, economics, history and social problems, which are lent for ten shillings a year to Co-operative Societies, Trade Unions, Socialist Societies, and miscellaneous organizations. The books are intended to be educational rather than directly propagandist, and each box is made up to suit the taste, expressed or inferred, of the subscriber. Quarterly exchanges are allowed, but the twenty or thirty books in a box usually last a society for a year. It is a remarkable fact that altho boxes are lent freely to such slight organizations as reading classes, and are sent even to remote mining villages in Wales or Scotland, not a single box has ever been lost. Delays are frequent: books of course are often missing, but sooner or later every box sent out has been returned to the Society.

"Another method of securing the circulation of good books on social subjects has been frequently used. We prepare a list of recent and important publications treating of social problems and request each member

to report how many of them are in the public library of his district, and further to apply for the purchase of such as are absent."

The National Guilds League, which is a rebellious child of the Fabian Society, has its traveling library. Its workings are described in *The Guildsman*²:

"Members of Trade Union Branches, Trades Councils, Professional Organizations, Socialist Societies and other recognized Labor bodies may borrow any book on the following list for a period of one month on payment of 6d. per volume to cover postage. Applications should be addressed to the National Guilds League, 39, Cursitor Street, London, E. C. 4, and must come thru and be signed by the Secretary of the organization of which the borrower is a member. The organization will be held responsible for the return of the book.

"Gifts to the Lending Library will be very heartily welcomed."

The Workers' Educational Association of Great Britain, of which our Workers' Education Bureau of America is a humble counterpart, describes its library work in its *Year Book*³:

"Another great difficulty which has always confronted the Tutorial Class movement is that of the supply of books. The majority of Joint Committees have traveling libraries, but they are not nearly adequate to the demand. The W. E. A. started a small library in co-operation with Toynbee Hall in 1912, and by this means was able to give considerable help to classes, but the urgency of the problem became so obvious that in 1915, thru its honorary secretary, the Central Joint Advisory Committee made representations to the Carnegie United Kingdom Trustees for a grant to initiate a central library for students. A grant to allow of an experiment for five years was given by the Trustees, and the Central Library for Students was then launched as an entirely new and separate body. Its aim is to ensure that bonafide students coming under its notice shall be helped in their studies if they are unable to obtain the use of the necessary books elsewhere, and also 'to stimulate and develop higher study on the part of those, for the most part isolated students, who owing to the lack of facilities and of guidance in reading have been content with a lower level of knowledge than they are capable of acquiring.' The library, therefore, confines itself as much as possible to the purchase of the dearer books of reference which cannot easily be obtained thru any other channel. Altho the library has only recently issued its first annual report, the demand for books and the support it has received show that its conception as a library to meet the needs of every kind of student is the right one, and that it fills a long-felt want. If it continues to grow as it has done during its few months of existence the book problem will in a short time be approaching a solution."

These examples of the library undertakings of long established overseas work may serve as an indication of what may be undertaken in America. But it is to be expected that the

movement will build up its own practise based on its inheritance from that of American public libraries and labor research bureaus.

For those who wish to know what texts and readings the labor colleges use, a selected list of twenty-five titles will be sent on application to the Bureau of Industrial Research, 289 Fourth Avenue, New York City.

The day has not come when all the workers are storming the doors of public libraries in their eagerness for books. But with the growth of labor education the libraries can count on an increase of earnest readers of substantial works on trade unions, economics, and sociology.

FRANK AND RACHEL ANDERSON.
New York City.

An Inexpensive Binding for Magazines

A DESIRABLE binding for magazines at a low cost, is something all librarians are looking for, especially those in the smaller libraries. A few years ago, after a casual inventory of our collection of bound magazines, I found fully 10,000 of them on the shelves. The great majority of the volumes are never used, consequently they are not worth the cost of binding. I have had the opportunity to visit many small libraries and have always observed a fine array of bound magazines, representing a cost far out of proportion to the modest income of the average library of its size. Upon inquiry the librarian usually replies that "it has always been the custom to bind our magazines." No other more satisfactory reply being received, I have become convinced that the reason is simply "because."

Three years ago I decided to cut my binding bills by not sending the magazines to the binders, but to bind them myself—i. e., those we wished to preserve. As a result we began sewing the volumes together with strong twine, using a heavy kraft paper for an outside cover, the volume then being lettered and numbered on the back in the regular way and then shelved ready for use.

The sewing process is quite simple. First we remove all advertising matter and then drill five holes thru each magazine, the hole being about half an inch from the edge. These holes are two inches apart on magazines the size of *Harper's*, and are, of course, of equal distance apart on the larger size magazines. The sewing is simple, just in and out and finally back to the starting point, and securely tied. The outer edges of the cover are cut about an inch wider than the magazine, and are turned over and a half inch strip of cardboard placed between the two thicknesses of paper and all clamped with a stapling machine. This gives the edges a stiffness that prevents curling, and

also helps to keep the volume in better condition on the shelves.

The first question asked is naturally the cost, and then the material used, and who does the work?

We have been doing this work, as I said, for about three years, and it is done by a regular desk assistant during her unscheduled time, and by the apprentices, and high school girls who come in as messengers, or runners. The cost of the material, after the tools have been purchased, is about six cents per volume for magazines the size of *Harper's*, *Scribner's*, etc. For larger magazines, say the size of the *Literary Digest* and *Scientific American*, it might be well to estimate the cost at about eight cents per volume. It takes an ordinary assistant about one hour to prepare and cover a volume of *Harper's* or *Scribner's*. This includes the time taken to remove the staples and advertising matter, and doing everything necessary before the volume can be sent to the accession and catalog department.

The time was kept from the moment the assistant was relieved from desk duty until she had finished the job and put all tools and material away. No effort was made to establish a record, or to make a fine showing. The material used for covering is known as Kraft paper, 80 or 90 pounds to the ream of standard size, namely, 24 x 36 inches. Paper dealers inform me that Kraft paper is by far the cheapest and best and more durable than the red manilla rope paper that has been so commonly used, and in addition to this it is much more attractive in color, being a light brown.

Kraft paper can be obtained in heavier quality and I think that a grade weighing about 100 pounds to the ream would be even more satisfactory than the 80-pound quality, which we have been using. The price would, of course, be proportionately higher. The prices given are those furnished me in October when these

covers were discussed by the Massachusetts Library Club. Kraft paper was then selling for 17 cents a pound.

We also use it for covering the current number of magazines which are circulated. Those prepared for circulation take about ten minutes to cover and make ready. The advertising matter is not removed, only the front cover is taken off, and the title and volume which is on the back. These are re-pasted on the new cover to give individuality to the magazine, and this also identifies the magazine to the borrower.

The sewing is done with Belfast twine no. 533. The only other material necessary is a good needle, Acme stapling machine no. 2, recommended, in preference to a smaller size, with no. 18 staples, a twist drill, or Gaylord Brothers magazine drill, Success binder three-quarters of an inch wide, to line the seam of back of cover where the paper is shaped to cover. This reinforces the back and should extend over the side enough to re-inforce the sewing. Standard size Kraft paper is twenty-four by thirty-six inches, cut in single sheets, but a sheet this size has some waste for the average size magazine, such as *Harper's* for which a sheet twenty-one by thirty-six inches will cut four covers exactly, and the dealers tell me that sheets will be cut any size if orders are received for five hundred pounds or more at one time. An order of that size suggests the advisability of co-operative ordering. Several small libraries might send their order in to a single jobber and have him order the size most suitable from the mills, and then it will be cut as wanted. I suppose Kraft paper can be purchased from any paper dealer.

The cost for binding a volume of *Harper's Magazine* is:

Assistant's time, one hour.....	\$.35
Kraft paper012
Success binder, about04
Belfast twine no. 533, about 2 yards (cost about 21c. a ball)	
Paste (see Brooklyn receipt)	
Staples, about four to a magazine (cost \$2.00 for 5000)	

Total

\$.402

In this locality the binders are charging about \$1.25 for a volume of this size. As an additional offset, we saved the time lost (*by having volumes at bindery six weeks*), and the returns on the advertising matter sold, which

is about two to three pounds to each magazine.

The Brooklyn receipt for making paste:

Add a tablespoonful of powdered alum to a quart of water and set to boil. Make a cream of half a pint of sifted flour and cold water (use egg beater and do a good job). Be sure that the cream contains no lumps. When the water boils stir in the cream and cook in double boiler twenty minutes. Strain carefully and add about twenty drops of oil of clove. A little carbolic will also help to preserve the paste.

HERBERT FISON, *Librarian.*

Malden (Mass.) *Public Library.*

To Library Trustees

Frank Hervey Pettingell of the Los Angeles Stock Exchange, Los Angeles, California, chairman of the Trustees Section of the A. L. A., is arranging for a meeting of this Section at Swampscott. It will probably be held on Friday evening, June 24th.

The Trustees Section welcomes to its meetings members of public library boards, members of library committees in universities and colleges, and also business and educational executives who have library departments under their supervision.

Mr. Pettingell wishes to get in touch with library trustees who contemplate attending the Swampscott Conference, in order that he may secure their co-operation in making the meeting of the Trustees Section a success.

To Americanization Workers

"Sven-Duuva Nuarempi," the story of Sven Duuva, "the greenest rookie in the Finnish Army," has been published by John E. Rantamaki, who served overseas with the 336th Field Artillery. This novel, which is written in Finnish, is designed to aid in the Americanization of Finnish citizens. The publication price was one dollar, but libraries may obtain it for twenty-five cents from the author at 197 East 105th Street, Cleveland, Ohio.

In response to a request from the New York Public Library, a royal order was issued on March 1st directing the Spanish Ministries of Finance, Public Works, Labor and Industry to prepare statistics and other information relative to the imports, exports and other commerce of Spain, and to forward them to the United States for reference by traders desirous of consulting them. *New York Evening Post*, March 1.

The Question of Importations

Reparations and the Libraries

"That 50 per cent of what is due for German goods or such percentage as the Treasury may prescribe, shall be paid, not to Germany, but to the Treasury thru the Customs on account of German reparation."

So, according to the *Board of Trade Journal*, March 17, 1921, runs the initial clause of a bill then at second reading in Commons and since become law effective April 1. There is a similar enactment in force in France, and this is the program of Belgium and Italy also.

It will be noted that each of these Allied countries make the collection only on its own importations and at its own Customs. The policy does not, therefore, affect American libraries unless they purchase German publications thru English, French, Belgian or Italian agents. The steady counsel of this Committee, to buy directly, gets added strength from this circumstance, since nothing is surer than an attempt by the Germans to pass this levy on to the purchaser by a corresponding advance in prices.

But while the effect of these taxes can thus be obviated by American importers, the same cannot be said of the proposed 12% export duty decreed at the Paris Conference and not cancelled at the London deadlock. Levy in this case would be laid at the German boundary on all exports. The result in the booktrade would probably be a re-imposition of the Teuerungszuschlag to such amount. May 1 is the day set for this provision to go into effect. By the time these lines appear in the *LIBRARY JOURNAL*, we shall know whether the expected adjustment has been made.

A new schedule of foreign rates effective February 1 has been published by the Börsenverein. For the chief countries the following are the percentages to be added to the domestic price: For Argentina, Chile, and Brazil, 110%; for Greece, Italy and Portugal, 125%; for Belgium, France and Spain, 150%; for Denmark, England and colonies, Holland, Japan, Norway, Sweden, Switzerland, the United States, and Mexico, 185%. The intended effect of this schedule, as of its predecessor for January, is to give the Mark here a value of five cents. This schedule was, of course, promulgated before the developments above outlined.

As usual, periodicals and antiquarian items are a law to themselves. Exemption of the former has now come to be a matter of practical importance to us, for, while heretofore the publishers of nearly all the journals taken by libraries chose to apply the Börsenverein rates anyhow, there are now many sold abroad at rates substantially below the schedule.

Thus, new German publications, including periodicals, can be had now *delivered* at five cents per Mark of the domestic price, antiquarian ones at about 1.6 cents, "plus transportation" and many items at figures between these two. But these prices will be secured only by those who do their own importing and do it directly.

M. LLEWELLYN RANEY,
ANNA G. HUBBARD,
PURD B. WRIGHT,

A. L. A. Committee on Book Buying.

Further Word from Dr. Raney

To the Editor of the LIBRARY JOURNAL:

I rise at once to your editorial of April 15th.

What is your defence for essaying to enter judgment till the case is all in? I made a concrete proposal to the publishers. It would bring English editions to New York at about twenty-two cents to the shilling. Before the publishers have even a chance to read the proposal you virtually advise its rejection by saying that thirty to forty cents is fair. Now for your own enlightenment let me say that this proposal was not formulated by me, but by one of the greatest of American publishing houses, which is already using it with success.

Be consistent now and advise the libraries to abandon also the course which brings them German publications at from two to five cents a Mark in favor of one costing eight to twelve cents, for no other reason, forsooth, than that the other fellow cannot afford to do any better!

"Rent, salaries, accounting, etc." Yes, yes, and again, yes. Let me whisper you something ever so new. This is a case of selling goods from one side of a house to the other. What in the name of common sense is the enormous discount granted in such a shift good for except to cover that sacred trinity of "rent, salaries, accounting, etc."?

No "One Hundred Per Cent," let alone "Plus," you say. Suppose we admit that the title squints and change it to read One Hundred Per Cent Tax Plus. That makes you think in terms of the assessed, rather than the assessor. I must crave your pardon for having fallen into this old habit these past four years. Of course, there is no single office that gets double profit, but there is a fellow that pays it, when a ten-shilling book is sold to a library for \$3.60, or to an individual for \$4.60, for there was already a profit on the ten shillings. Keep your eye on the payer and stop counting the collectors. Otherwise scrap the system.

M. LLEWELLYN RANEY.

*Library of the Johns Hopkins University,
Baltimore, Maryland.*

"Wholesome tho Spectacular Publicity" in Chicago

THE Chicago Public Library has been forced to close nineteen of its forty-five branches, reduce the staff by one hundred and fifteen persons, shorten hours and effect other retrenchments in order to meet an inadequate appropriation. The plight of the Library has brought forth many evidences of interest from the public, not all by way of protest and complaint. The School Board has been forced by the emphatic demands of the high school faculties to take over the salaries and maintenance of the seven high school libraries, retaining the Public Library staff, and in two of the park districts similar arrangements were undertaken by the park boards to prevent closing of the branches in park field houses.

Most striking and unique among the 'unsolicited testimonials' to the place of the Library in community regard, was the reaction of the residents of Sheridan Park, a prosperous residence section, to the announcement that Sheridan Park Branch, with an annual circulation of two hundred thousand volumes, would be closed because of the exorbitant rental asked for the quarters occupied. Under the leader-

ship of the Kiwanis Club, (the local business men's organization) the sum of \$5,300 was raised at one luncheon meeting and offered to the Board, together with a new and much superior location. Acceptance of this offer was followed by the tender of moving vans and crews by five transfer concerns for the removal of the Branch on April 11th. The Kiwanis Club and the upper grade pupils of the neighboring public school turned out in force, and the 12,000 books, with furniture and equipment, were moved to the new quarters in less than three hours. The school children formed in procession and transferred 3,000 volumes by armfuls in two forced marches, while three motion picture machines recorded the scene for exhibition in the sumptuous movie palaces for which the district is famous, and a battery of newspaper cameras kept up a steady bombardment. Besides much wholesome tho spectacular publicity, the affair carried with it an altogether exceptional tribute to the esteem in which Sheridan Branch and its staff are held by its large constituency, roused to effective community action in its determination to keep its library.

Books Most in Demand in March

THE six fiction titles most in demand at the public libraries during March, according to Frank Parker Stockbridge's list in the *May Bookman*, were:

Sinclair Lewis. *Main Street*. Harcourt.

Edith Wharton. *The Age of Innocence*. Appleton.

Zane Grey. *The Mysterious Rider*. Harper.

Floyd Dell. *Moon Calf*. Knopf.

Rose Macaulay. *Potterism*. Boni.

Gertrude Atherton. *The Sisters-in-Law*. Stokes.

The general books most in demand were:

H. G. Wells. *The Outline of History*. Macmillan.

Margot Asquith. *Margot Asquith: An Autobiography*. Doran.

Frederick O'Brien. *White Shadows in the South Seas*. Century.

Edward Bok. *The Americanization of Edward Bok*. Scribner.

Harry A. Franck. *Roaming Through the West Indies*. Century.

Philip Gibbs. *Now It Can Be Told*. Harper.

During the same month the six best sellers in fiction, according to reports from seventy-one booksellers in fifty-two cities sent to *Books of the Month* for May, were:

Sinclair Lewis. *Main Street*. Harcourt.

Zane Grey. *The Mysterious Rider*. Harper.

William J. Locke. *The Mountebank*. Lane.

Gertrude Atherton. *The Sisters-in-Law*. Stokes.

Edith Wharton. *The Age of Innocence*. Appleton.

Dorothy Canfield. *The Brimming Cup*. Harcourt.

And the six best sellers in general literature were:

H. G. Wells. *The Outline of History*. Macmillan.

Frederick O'Brien. *White Shadows in the South Seas*. Century.

Robert Lansing. *The Peace Negotiations*. Houghton.

Margot Asquith. *Margot Asquith: An Autobiography*. Doran.

Philip Gibbs. *Now It Can Be Told*. Harper.

Edward Bok. *The Americanization of Edward Bok*. Scribner.

The section of the A. L. A. papers and proceedings, omitted by accident, will be mailed to all members within a short time.

Detroit's New Main Library

THE architectural beauty of Detroit's new Public Library building, both as to exterior and interior, is the first thing that absorbs the attention of the visitor. The pure and lovely proportions of the structure as seen from the outside have met with the unqualified approval of the passerby and have made the city impatient for the time when admittance could be gained and book service initiated within.

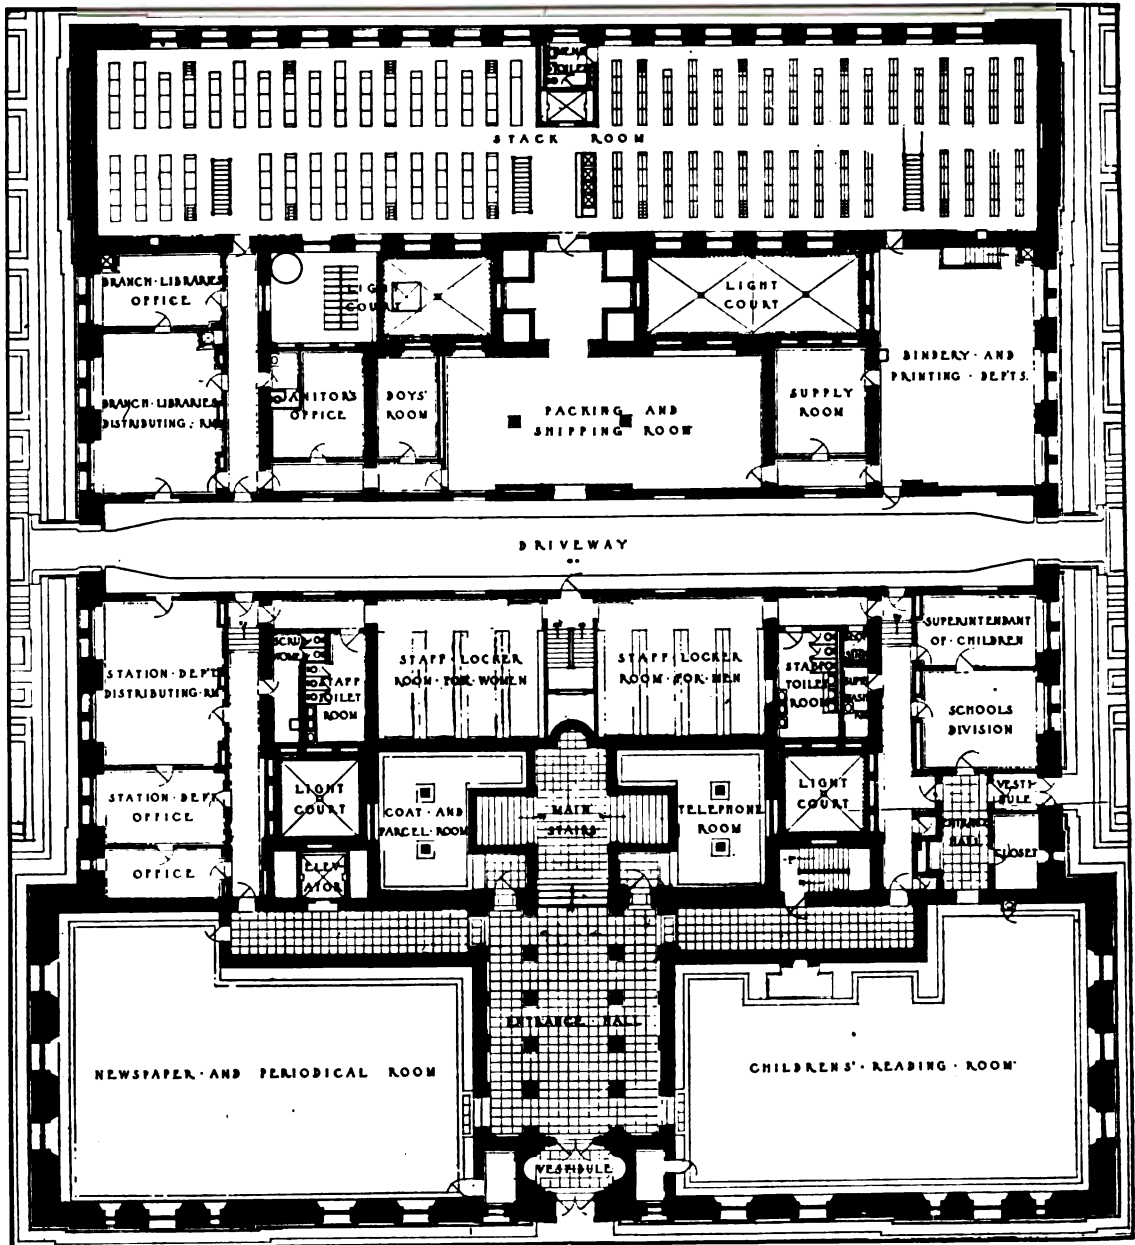

The service departments were opened to the public March 29th after two weeks of hard labor on the part of the staff in transferring the books from the old building into the new. The interior decorations are not completed yet and will not be for some time, for they are of the nature of genuine art work, wrought with care, so as to blend color and line in a harmonious arrangement that will rest and please the eye.

The mural paintings by Edwin H. Blashfield and Gari Melchers will be the crowning features of a scheme of interior decoration which is designed to correspond with the marble beauty and purity of the outside.

On the ground floor at the front of the building is the Children's Room. The most striking thing about this room is the fireplace. The designs of the tiling are scenes from favorite tales, showing characters beloved by children. The tiling and designs were made in the Pewabic pottery, a Detroit art industry. Seats are grouped around the fireplace, together with bookshelves and a rack for picture books, so that this becomes the central point of the room. In the Schools division, at the back of the Children's Room, is kept a selection of children's books, representing the best of children's literature, for parents and teachers to examine.

THE CHILDREN'S ROOM SHOWING THE PEWABIC TILED FIREPLACE

Reproduced by courtesy of Cass Gilbert, architect.

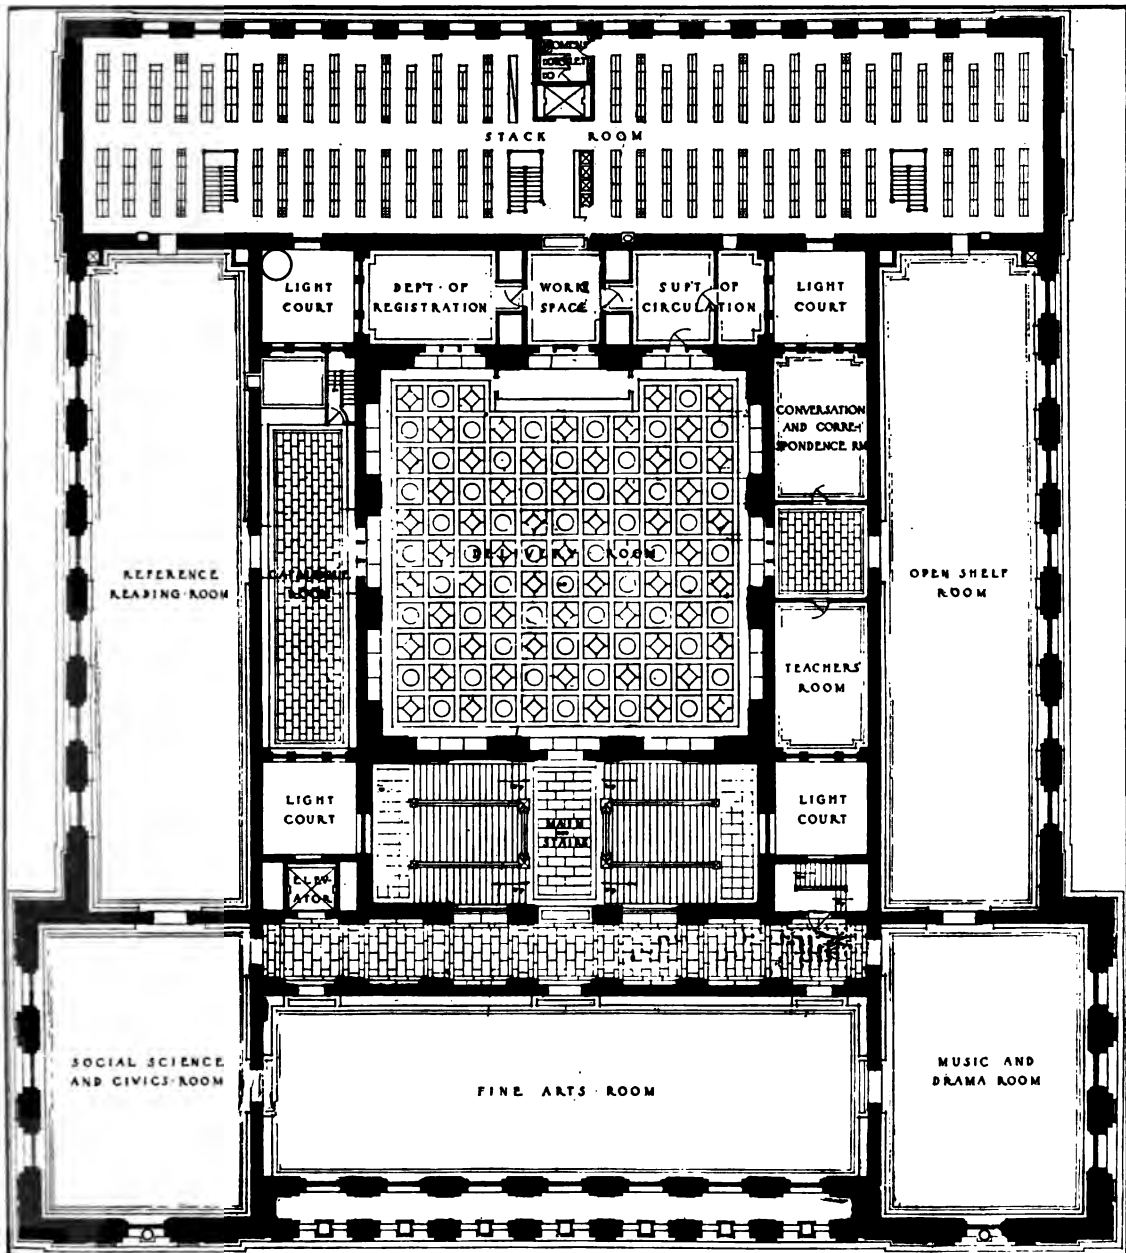

GROUND FLOOR PLAN. MINOR ALTERATIONS HAVE BEEN MADE IN THE ASSIGNMENT OF ROOMS ON THIS FLOOR

Across the hall from the Children's Room is the Periodical Room, commodious and convenient, and behind this extends the Extension department, divided into office, staff room, and shipping room for the Sub-branches division; a sorting room for branch deliveries, and office for the branch executive. The county librarian carries on her work from here also.

A driveway runs thru the building so as to provide entrance for delivery of books and supplies and shipments to and from branch li-

braries. The elevator in the stack-room is near the door of the shipping room, so that it can be conveniently used for freight purposes.

A passenger elevator leads to the upper floors. The Delivery Hall is a room with a lofty ceiling, richly ornamented and decorated. Around this are grouped the service departments in a series of connected rooms, each with its own decorative scheme. Passing thru a doorway framed and grilled with ornamental bronze, you enter a room containing the public catalog. Catalog

Reproduced by courtesy of Cass Gilbert, architect.

THE FIRST (MAIN) FLOOR

assistants are detailed here, one at a time, to aid in the use of the catalog and explain it to the uninitiated. Beyond the public catalog is the Reference Room, and opening from it is the Civics Room. Across the front of the building is the Art Room, from which entrance is afforded to the loggia. The mosaic ceiling of the loggia, depicting Shakespeare's Seven Ages of Man, excites much admiration and local pride, as it was designed by a Detroit man, and made in the city in the Pewabic pottery. The

Music and Drama Room is being equipped to keep pace with the growing interest in music, aroused by a symphony orchestra under skilled and intelligent leadership. A memorial alcove for a special collection of letters and books pertaining to the drama and famous actors distinguishes this room.

Prominent among the decorative features of the Delivery Hall is the bronze grill work which was contracted for from the John Polachek Bronze and Iron Co. of Long Island City. They

also furnished the ornamental iron work around the windows of the Delivery Hall and the handsome bronze doors of the passenger elevator. All the furniture and wood trim is of quartered oak except in the Delivery Hall where it is of American walnut.

In the Open Shelf Room, a plan of having special advisers as to the best books on subjects called for, who will assemble and make available book information to guide the reader in the direction of the more worthy and reliable books will be tried. Two members of the staff are preparing themselves to give this service.

The offices of the Librarian and the business offices, the Order and Catalog departments, and

rooms for the training class are located on a mezzanine floor between the ground floor and first floor.

Ample grounds surround the building. Work will be begun on a new building for the Art Museum just across the street this spring, and thus the civic art center will be well under way.

The old building about whose passing as the library center old residents lamented, remembering its traditions and associations, is being operated as a down town annex of the new building.

EDNA G. MOORE,

Chief of Publicity Division.

Summer Course in Library Training

UNIVERSITY OF ILLINOIS

THE University of Illinois will conduct the usual courses in Library Science during the Summer Session of 1921 beginning Monday, June 20th. Last year the attendance was forty-three, twenty-five of whom were from Illinois.

Courses of the two year Library School curriculum are offered to college graduates, and are accepted toward the B. L. S. degree; these courses extend over eight weeks. Experience as a librarian or an assistant is desirable but not required. An application blank for admission must be secured and returned to the University before the beginning of the session. These courses taken together constitute half of the first semester's work in the Library School.

The usual six weeks courses for high school graduates who are librarians, library assistants or are under appointment to these positions will also be given; applicants who have completed one full year of study in an approved college or normal school may, with the consent of the Director, be admitted to these courses whether or not they are employed in a library. These courses taken together occupy the full time of the student. An application blank should be returned to the school before registration day.

The fee is \$12; students from Illinois libraries who can matriculate, pay no fee.

P. L. WINDSOR, *Director.*

INDIANA SUMMER SCHOOL FOR LIBRARIANS

THE twentieth course of the Indiana Public Library Commission Summer School for Librarians will be held from June 15th to July 28th at the Shortridge High School, Indian-

apolis. Only those are admitted who are filling or who are under definite appointment to permanent library positions.

High school diplomas will be required of all candidates for a certificate. In rare cases individuals having the equivalent of a high school education will be accepted as special students, but will not be granted the certificate. Those who have had no library experience must serve at least four weeks in a well organized library before taking the course, unless excused by the director of the School.

Instruction will be given by William J. Hamilton, secretary of the Commission, Harriet T. Root and Mayme C. Snipes, of the Commission staff, Carrie E. Scott and Cerene Ohr of the Indianapolis Public Library. The curriculum consists of: Cataloging, 20 lessons; classification, 12; book selection, 10; administration, 8; miscellaneous, 18. Other general lectures will be given by visiting librarians.

The needs of the regular college students at the summer season of Butler College have led the college authorities to retain the residence this year for these students. On this account the Commission School will be conducted in Indianapolis one block away from the Indianapolis Public Library. Arrangements have been made to house about thirty students at the Y. W. C. A. building, and lists of rooms will be available for those desiring another location.

UNIVERSITY OF CALIFORNIA

ASUMMER course in library methods will be given from June 20th to July 30th. The course is designed as an introduction to certain phases of library work, and will be available chiefly to those having some experience in this work. Persons not holding library positions or not actually under appointment are advised

not to apply. A limited number only can be admitted, and in order that selection may be made sufficiently early to allow accepted applicants necessary time for preparation, applications must be filed not later than May 15th. Applicants will be notified of the result of the selection not later than May 30th.

The courses offered are: Classification and cataloging, including accessioning and shelf listing, 33 periods; reference work, 18 periods; current fiction, 6 periods; loan systems, 2 periods; the California library plan, 2 periods; binding and repairing of books, 1 period.

Application forms will be furnished upon request by the State Librarian, Sacramento, Calif.

CHAUTAUQUA SCHOOL FOR LIBRARIANS

THE twenty-first annual session of the Chautauqua School for Librarians will be held from July 4th-August 12th.

As in the past four years, students' records are cumulated and filed from year to year, so that those who attend four full sessions may be granted the certificate of the School.

The freshman class has regular courses in cataloging, classification, reference work and organization. Courses of the sophomore group include history of libraries and book-making, book binding, advance cataloging, classification and reference work. Classification and general reference work are finished in the second summer. The juniors have courses in subject bibliography, school and children's work, types of libraries, and elective studies in literature and history. Work of the senior class includes cataloging and reference work in public documents, general and trade bibliography, administration and work with high school, normal school and college libraries. Apart from these courses there will be special lectures given before the classes in joint session.

Only those are accepted who are already in library work or definitely appointed to positions. Application for admission should be made as early as possible to Mary E. Downey, Chautauqua, New York.

The instructors are Mary Elizabeth Downey, Library Secretary and organizer of Salt Lake City, Utah; Polly Fenton, California State Library; Edna M. Hall, Warren, (O.) Junior High School Library; Mary Belle Nethercut, Rockford College Library, Rockford, Ill.; Mae Byerley, Long Branch, New York; Mary T. Brown, Conneaut (O.) Public Library; and Grace Backus, Warren, O.

RIVERSIDE LIBRARY SERVICE SCHOOL

THE summer session will be held during the six weeks from June 20th to July 30th. For

the whole course the fee is \$30; for any one subject or a selection of subjects the fee will be quoted on request.

The subjects are:

Bookbinding, repair and library handcraft. Week of June 20. Mable F. Faulkner, in charge of the Lending Department at Riverside.

Cataloging and classification. Four weeks beginning June 27. Theresa Hitchler, superintendent of the Cataloging Department of the Brooklyn (N. Y.) Public Library.

Book criticism. Weeks of July 25. Joseph F. Daniels, director of the School.

Story telling. Week of July 25. Mrs. Faulkner and Mr. Daniels.

Reference and documents. Three weeks beginning June 20. Lillian L. Dickson, reference librarian at Riverside.

Work with young people. Week of July 11. Instructor to be announced.

High school library. Two weeks beginning July 18. Alice M. Butterfield, formerly of Riverside Girls' High School.

County library, finance and business. Three weeks beginning June 20. Mr. Daniels.

Periodicals and serials. Week of July 11. Mrs. Faulkner.

MCGILL UNIVERSITY SUMMER LIBRARY SCHOOL

THE regular session will be held from Monday, July 4th, to Saturday, July 30th.

The instruction will be given by Gerhard R. Lomer, librarian of the University and director of the School; Harriett Peck, 1904 N. Y. S., librarian of the Rensselaer Polytechnic Institute, Troy, N. Y.; and Katharine M. Christopher, 1912-14 N. Y. P. L., librarian, Julia Richman High School, New York City. Special lecturers will be Jean Cameron, assistant university librarian; Mary S. Saxe, librarian, Westmount (P. Q.) Public Library, and Charlotte Houston, librarian of the High School, Montreal.

The technical courses are: Cataloging, classification, book numbers, accessioning, shelf listing, binding and repairs, alphabeting, filing and indexing.

The bibliographical group includes: Reference work; book selection and subject bibliography; trade bibliography; history of books and printing; and periodicals and serials.

In the administrative group are: Library routine; administration; buildings, equipment, supplies; printed forms and printing; loan work.

The fee for the course is \$40. As the number of students is limited, application for admission should be made early to the University Librarian, 65 McTavish Street, Montreal, P. Q.

Statistics of City Libraries for 1919

ANALYSIS of the United States Census Bureau Financial statistics of cities for 1919, just published, shows that the expenditures of the 227 largest cities for libraries amounted to \$9,842,384, or 1.3 per cent of their total expenditure; among cities of over 500,000, 1.2 per cent, the highest being Cleveland, 2.7 per cent, the lowest, Philadelphia, .8 per cent; among cities of 300,000 to 500,000, 1.3 per cent, the highest being Minneapolis, 2.2 per cent, the lowest, Washington and New Orleans, .8 per cent; among cities of 100,000 to 300,000, 1.4 per cent, the highest being Grand Rapids, 2.7 per cent, the lowest being Akron and Norfolk, .5 per cent; among cities of 50,000 to 100,000, 1.3 per cent, the highest being Berkeley, Cal., 2.5 per cent, the lowest Chester, Pa., and Macon, Ga., .2 per cent; among cities of 30,000 to 50,000, 1.4 per cent, the highest being Gary, Ind., 3.5 per cent, the lowest Highland Park, Mich., Shreveport, La., Columbia, S. C., .1 per cent.

The average per capita expenditures for libraries was 28 cents; among cities of over 500,000 population, 32 cents, the highest being in Boston, 69 cents, the lowest, in Baltimore 16 cents; among cities of 300,000 to 500,000, 32 cents, the highest being in Seattle, 56 cents, the lowest in New Orleans, 10 cents; among cities of 100,000 to 300,000, 26 cents, the highest being in Portland, Ore., 55 cents, the lowest in Akron, 6 cents; among cities of 50,000 to 100,000, 21 cents, the highest being in Berkeley, 52 cents, the lowest, in Augusta, Ga., 1 cent; among cities of 30,000 to 50,000, 24 cents, the highest being in Pasadena, 87 cents, the lowest, in Fresno, Cal., Highland Park, Mich., and Portsmouth, Va., 1 cent.

W. DAWSON JOHNSTON.

Recent A. L. A. Publications

Recent publications issued by the A. L. A. Publishing Board are:

Booklist Books, 1920, continuing the series begun by Booklist Books, 1919. Price 35c.

A. L. A. Manual of Library Economy. Three chapters revised, viz:

Chapter 4. The College and University Library, by James I. Wyer, Jr. Edition 2. 15c.

Chapter 9. Library Legislation, by William F. Yust. Edition 2. 15c.

Chapter 13. Training for Librarianship, by Mary W. Plummer. Edition 2, revised by Frank Keller Walter. 15c.

The New Voter, a list of manuals for voters and books on citizenship, originally issued by the Cleveland Public Library. 100 copies, \$1.50; 1000 copies, \$12.

A County Library, an illustrated leaflet suitable for sending out with the imprint of the individual library. 30 copies, \$1; 100 copies, \$3; 500 copies, \$12; 1000 copies, \$20; 5000 copies \$70.

A. L. A. Bookbinding Exhibit

The A. L. A. Bookbinding exhibits have been carefully revised and freshened for the spring and summer appointments. The demand thru the winter and spring has been steady, with little loss of time between assignments. Already several requests are on file for summer library schools and institutes.

Requests for the loan of these exhibits should be addressed to Mary E. Wheelock, Public Library, Des Moines, Iowa, stating date desired.

Round Table on Library Buildings

A Round Table discussion on Library Buildings will probably be held at Swampscott on Tuesday afternoon, June 21st. All who are interested in attending such a conference should communicate with Mr. Willis K. Stetson, librarian Public Library, New Haven, Conn.

To Hospital Librarians

E. Kathleen Jones, of the Committee on Institutional Libraries, is preparing an exhibit for Swampscott Conference on Hospital Libraries. She will be glad to receive information from any libraries which are carrying on Hospital Library Service.

The hospital librarians are planning a "Get-together" meeting of some sort at the Conference—a dinner if nothing more. All hospital librarians or others interested in such a meeting are asked to write to Miss E. Kathleen Jones, care of the Massachusetts State Board of Education, Division of Public Libraries, State House, Boston, Mass.

Señor Vale, who came to Washington two years ago in connection with the Honduras boundary question, has since given much time to bibliographical research, especially in the Library of Congress and in that of the Pan-American Union, and has already got together a bibliography on Latin America of something like 20,000 titles. He is now proposing a sojourn in Mexico continuing his labors. This bibliography will be greatly to the credit of Latin America, and, with the current bibliography supplied by the excellent *Revista Bibliografica*, published by the Chile National Library, will present a remarkable approximation to completeness in dealing with early and current literature regarding Latin America.

New York Public Library's Report for 1920

THE Central Building of the New York Public Library supplied 976,164 readers with 2,243,131 books during the year 1920, the increase in readers over the previous year being 83,866, or nine per cent. The loss of about one twentieth of one per cent in the number of volumes used was more apparent than real, and was chiefly due to the rearrangement of the Divisions of Economics and of Science and Technology. Readers in the Economics Division might have accounted for about 30,000 more volumes if they had been obliged to file slips for them, and users of volumes of patents for 154,000. The total number of visitors to the building was 2,696,609, an increase of 217,976 over 1919. A large proportion of these were attracted by the public exhibitions, the exhibition of War Photographs of the Signal Service Corps drawing 71,991 visitors during the first two months of the year. 37,655 attended the Washington Irving Exhibition, and 12,216 the Pilgrim Tercentary Exhibition.

The number of volumes issued for home use by the Circulation Department thru the 43 branch libraries, the Extension Division, including six sub-branches, and the Library for the Blind, was 9,658,977, a loss of 233,671 as compared with 1919. The chief factor contributing to this loss was the impoverishment of the book stocks in the branches, where 186,713 volumes were withdrawn or discarded as worn out, as opposed to 166,231 added, leaving a net loss of 20,482. The branches need at least 175,000 books during the coming year if the damage is not to become impossible to remedy, but the reduction by the city of book appropriations by one-third will prevent the addition of more than half that number.

In both the Reference and Circulation Departments staff conditions seemed more stable at the end of the year, in spite of a shortage of children's librarians. This was largely due to increases in salary by the trustees on one hand and the city on the other. In August the staff of the Circulation Department were included in the general salary increases granted to city employees including institutions supported by the city.

The number of employees was 1215, of whom 508 were in the Reference Department, 696 in the Circulation Department, and 11 in the Municipal Reference Library. At the Central Building the Trustees determined to adopt the budget of \$984,000 in spite of its entailing a deficit of \$251,000 to provide for increases that would maintain the efficiency of the staff. Two-

thirds of the deficit has been made up by a gift of \$1,000,000 from Mrs. Stephen V. Harkness, constituting a part of the Library's endowment funds, while certain of the trustees voluntarily contributed \$115,000 to continue the reduction.

At the end of the year there were in the Reference Department 1,469,521 books and pamphlets, which with the 1,157,414 books in the Circulation Department made a grand total of 2,626,935 volumes. The Reference Department added 11,929 volumes and 7570 pamphlets by purchase, and received by gift 72,948 volumes and 60,950 pamphlets. The largest as well as the most unique gift was that of 44,869 volumes from the Mercantile Library Association of New York City on the occasion of its moving to other quarters in the same building it now occupies. In the nearly 22,000 volumes of bound periodicals were found about 400 volumes indexed in Poole which the Library had never before been able to obtain, besides 2500 volumes of other periodicals previously lacking in the Library. The Circulation Department received by gift 9563 volumes and 2163 pamphlets.

The disbursements of the Reference Department amounted to \$930,170. The main items were salaries, \$555,192; books and periodicals, \$44,059; Central Building maintenance and repairs, \$55,000; books for Central Circulation Branch, \$10,100; binding, \$3028. The last item reflects the severe economy imposed by increase in wages and increased price of materials. The normal binding demands of the Reference Department require fully 75,000 volumes, whereas it has been possible to bind little more than 20,000 volumes a year, leaving the remaining 50,000 to be withheld from use entirely or used in discreditable condition. The receipts of the Circulation Department were \$1,112,621, of which \$654,796 was disbursed for salaries and wages; \$127,453 for books and periodicals, and \$78,750 for binding. Salaries and wages for the Municipal Reference Branch totaled \$15,415, with \$1601 for books and periodicals.

The Divisions of the Reference Department that draw the largest number of readers and answer the greatest diversity of questions, such as the Divisions of Economics, Science and Technology, Genealogy and Local History, and the Newspaper Division almost without exception report increases in both respects. Important users of the Research Room in the Economics Division included the statistician and other members of the National Bureau of Economic

Research, workers from the Division of Analysis and Research of the Federal Reserve Board, and employees of the New York Edison Company. Interest has shifted from foreign commerce to the financial and economic situation in foreign states and cities, which is apparently the result of the large amount of securities floated in this country by European governments. A daily average of 346 readers registered at Science and Technology, and their studies showed paramount interest in the natural resources of the United States and other countries, especially petroleum and other minerals. Statistics of production and distribution as well as technical descriptions of processes were in great demand. Growing interest in the revolutionary theories of Einstein prompted a demand for mathematical knowledge and new developments in physical science. The interest in patents is shown by the fact that fully fifty per cent of the photostat work of the Library is confined to the copying of patent records.

The Genealogical Division is used by readers for practical purposes as well as for genealogical study and compilation, and a notable feature of the registration of readers is that a large percentage are residents of other cities and states who have heard of the Library's resources and have come to avail themselves of material difficult to find elsewhere. In the American History Division a number of the authors and staff assistants connected with the "Chronicles of America" series have been at work many months, as have members of the staff engaged on a revision of Larned's "History for Ready Reference." The following subjects were frequently represented in the books called for: Early American history and travel; Hispanic-American history and travel; American colonial and State archives; history of the Pilgrims; the Japanese question; and westward expansion and communication. In the Newspaper Room 139,838 readers were recorded, representing a daily average of 383, and consulted 170,902 volumes, an average of 468 daily.

Assistants in the Arts and Prints Division found that interest in peasant art had increased and that batik was popular. Some silversmiths showed interest in early American craftsmanship. Information about war memorials has been in demand. The stage furnished the Division more readers than the architectural profession.

The accessions of the Slavonic Division included a valuable collection of about three hundred books and magazines, mostly in Russian, dealing in the main with Siberia and the Russian prison system, which came as the gift of George

Kennan. Another gift of about one hundred pamphlets and books published in Moscow and Petrograd in 1918 and 1919 is fairly representative of the publishing activities of the Soviets. The Jewish Division, now containing about 26,300 volumes and pamphlets, received \$25,000 by the will of Jacob H. Schiff, who was interested in the Division from its beginnings. The Oriental Division had 4,802 readers, a far larger number than in any previous year.

The Manuscript Division was used by 482 readers, who consulted 817 volumes, 181 boxes, and 239 single pieces of manuscript for material for biographies and histories. The photostat has been of particular use to this division in reproducing the handwriting of famous personages for advertising purposes, as well as portraits and autographs of the members of the Constitutional Convention. Dealers consulted manuscripts to verify their own autographic specimens. The Music Division registered 19,454 readers, and the rather inadequate collection was strengthened as much by gifts as by purchases.

The Interbranch Loan Office sent out 94,591 books in response to requests from branches, an increase of 15,043 over 1919, and also loaned 1,185 volumes to fifty libraries throughout the United States, as far west as Arizona and as far south as Texas. Numerous special lists were compiled. The Children's Room was again the object of interested observation by foreign visitors, one of whom, an English clergyman, commented "The principles of utility and beauty which these American children's library rooms represent, may well be worked out in other countries." The total circulation of books to children from the children's rooms and thru the Extension Division for the year was 3,882,799.

The Library for the Blind reports a decrease in circulation on account of inadequate page service, altho the number of active readers for the year, 1,124, represented a slight increase.

Special attention was given to the development of the 135th Street Branch, chiefly used by the colored population of New York, as already described by Miss Rose in the LIBRARY JOURNAL for March 15.

The Municipal Reference Library noted a steady increase in attendance and use, readers numbering 35,198 as compared with 31,224 in 1919, and 12,500 inquiries coming in by telephone and letter. A new edition of the "Municipal Yearbook" has been prepared.

A reprint of the fifth edition of Brunet's "Manuel du Libraire et de l'Amateur de Livres," which has long been out of print, has been issued by Fraenkel & Co., Berlin.

THE LIBRARY JOURNAL

TWICE-A-MONTH

MAY 1, 1921

"AMERICA'S MAKING" is the theme which is to be emphasized in the latter part of October thru New York State at the suggestion of the State Board of Education, in school work and in libraries, and it is proposed to hold in New York City an extensive exhibition illustrating the contributions made by different nations of immigrants to our national life. The idea has been so well received in the New York schools that libraries are already finding themselves besieged for books by immigrants, or illustrating the work of immigrants in our communities, or describing the countries from which they came. It is a scheme which might well be nationalized by all public libraries at the same time. The plan should mean the bringing to the front during that period of books written by immigrant authors and calling upon the several nationalities represented in the local community to co-operate in such exhibits and become interested also in the general work of the local library. Such books as "The Americanization of Edward Bok" and "The Making of an American" by Jacob Riis exemplify one class of books which should be brought to the front, while Madame Yeziarska "Hungry Hearts," which has been one of the popular books of the day, illustrates another. Whatever may be the wisdom or unwisdom of restricting immigration under present circumstances, there ought to be increasing appreciation of the elements of value which one nationality after another has brought to the making of America.

★ ★ ★ ★ ★ ★ ★

THE Brooklyn Public Library recently advertised in several leading newspapers for candidates of high school age and training for its apprentice class, with gratifying results. Two score applications were received, most of which proved acceptable, so that the library has now an apprentice class of forty-nine, the largest in its experience, which promises substantial relief from the dearth of library workers that has embarrassed most of our library systems in the last few years. It is also sending out one of its staff to the women's colleges in nearby states for the purpose of explaining to the graduating

classes the possibilities and enticements of the library profession. This plan has been pursued with success by several library schools, and it would be well for other leading libraries to profit by this example. With the passing of recent conditions, there should be an increasing supply of library workers, for whom the demand will also be increasing. The high salaries in other callings which induced many to enter other fields, are not likely to continue, but it may be noted that library salaries were not raised to such a point that there is margin for decrease in them. In many quarters salaries have been made fairly adequate, but in no instance extravagant. In the national field, it may be added, the last Congress did not provide for the reclassification in which the library workers were to be included, but in the present Congress two bills are already on the calendar, both of which cover such provision. It is to be hoped that the better of these reclassification bills may become law, and that rivalry between the two will not endanger the success of one or the other.

★ ★ ★ ★ ★ ★ ★

IT was just twenty years ago that Charles McCarthy, who had taken his Ph.D. from the University of Wisconsin, became the legislative reference librarian at Madison, initiating a branch of library service which has had very wide development since his original work in this important field. His death, before his energetic life had completed its half century, is a loss to the library profession and to sound legislation, for most of the states as well as the national Congress owe to him the prevention of much waste of time and effort arising from the duplication of measures to the same purport or from ill considered phrasing of legislative measures, which it is the purpose of a bill drafting division to prevent. From another point of view, the legislative reference librarian contributes to the value of legislative work by furnishing legislators with the information which they need for due deliberation and wise action. It is a pity, indeed, that so important a life should have come so early to a close.

FOR the most part librarians show better longevity, and it is gratifying to note that another librarian, William E. Foster, who also has been an inventor of library methods and an originator in the library field, completes his seventh decade and is still doing his work in the Providence Public Library, which may almost be called his creation. Mr. Foster is one of the eight or nine survivors of the initial A.

L. A. Conference of 1876, forty-five years ago, and it is to be hoped that he and others of this "saving remnant" may still be with us when the A. L. A. celebrates its fiftieth anniversary in 1926. The recent death of Miss Rule, after half a century of useful service at Lynn, leaves Mrs. Melvil Dewey the sole survivor of the three women who attended the 1876 conference.

LIBRARY ORGANIZATIONS

LIBRARY MEETINGS IN KENTUCKY

LIBRARIANS from Western Kentucky and Southern Illinois met at Paducah on Wednesday, March 9th, for an all day conference.

Harriet Boswell, librarian at Paducah, opened the meeting with an address of welcome, after which Kentucky's new county library law was explained in detail by Fannie C. Rawson, secretary of the Kentucky Library Commission, who acted as chairman of the meeting. Following, Anna May Price, secretary of the Illinois Library Extension Commission, spoke on loan desk routine, and Effie Lansden, president of the Illinois Library Association, discussed the relation of the librarian to the state association, also our professional periodicals. General discussion followed a talk by Miss Price on recent books which are of value and popular with the public this year.

In the afternoon Miss Boswell spoke on "Training the Schools to Use the Library," Mary Hiss, assistant, Kentucky Library Commission, discussed "Making the Most of Magazines," and Miss Rawson, book mending.

At luncheon, the librarians were guests of the Carnegie Library Board at the Woman's Club, Mrs. E. M. Post, board member and chairman of the book committee, presiding.

OHIO LIBRARY ASSOCIATION

THE College Section of the Ohio Library Association held its fourth annual spring meeting in conjunction with the Ohio College Association, March 25th, 1921, in the Ohio State University Library, Marguerite Mitchell, associate librarian of Ohio Wesleyan University, presiding.

Mary Louise Mark, of the faculty of the Sociology Department of Ohio State University, read a paper on "The Ohio State University Library from the Standpoint of the Student." This paper was based upon the answers to a questionnaire submitted to students in Miss Mark's classes in Sociology and brought up many prob-

lems of interest not only to the Ohio State University Library but to other college libraries as well. These problems were later taken up in the round table discussion.

Charles Orr of the bookbinding firm, Beck and Orr, Columbus, talked informally on "The Advisability of a Co-operative Bindery for Ohio College Libraries." Mr. Orr was of the opinion that by owning their own plant and standardizing the materials used, the various libraries would be able to have their binding done more cheaply and efficiently than by depending upon commercial binderies. A committee of three, Azariah S. Root, Oberlin College Library, chairman; Olive Jones, Ohio State University Library; and Russell B. Miller, Ohio Wesleyan University Library, was appointed to look into the matter further and to make a report at the fall meeting of the College and Reference Section of the Association. Mr. Orr kindly offered his aid to the committee.

The question as to whether the College Section should continue to hold a spring meeting in connection with the Ohio College Association was again discussed and the meeting was of the opinion that the question should be held over until the regular fall meeting of the College and Reference Section.

The following libraries were represented at the meeting: Ohio State University, Columbus; Ohio Wesleyan University, Delaware; Otterbein University, Westerville; University of Akron, Akron; Muskingum College, New Concord; Adelbert College, Cleveland.

HELEN M. BEALE, *Secretary.*

FLORIDA LIBRARY ASSOCIATION

THE annual meeting of the Florida Library Association was held in Ocala, April 13 and 14, 1921.

The most important question under discussion at the meeting was the bill now before the state legislature creating a State Library Commission for Florida. The feeling was very strong among

those present that a state library commission would do more for library work in Florida than could be accomplished in any other way. There are many small libraries in the state and a commission would be of great assistance to them. With the organization of a state library commission the work of traveling libraries for the entire state could be started. This would mean much to the people of the small towns and the rural communities.

Joseph F. Marron took for the subject of his presidential address "Recruiting for Library Service," and stressed the need of more people, particularly the right kind of people for library work. Mrs. Ford H. Rogers outlined the field of traveling libraries and told of the work the Ocala library is doing for Marion county in the matter of sending out traveling libraries. The discussion by Helen V. Stelle of "Library Conditions and needs in Florida" emphasized even more fully the need of a state library commission. Miss Dodgen discussed the "Library Work with Children." Miss Bailey of the Palatka Public Library conducted a round table on library problems which brought out many valuable suggestions.

The following officers were elected for the ensuing year: President, Miss Stelle, Tampa Public Library; first vice-president, Miss Gamsby, Ocala Public Library; second vice-president,

Mr. Green, Bartow Public Library; secretary, Miss Bailey, Palatka Public Library; treasurer, Mr. Marron, Jacksonville Public Library.

CORA MILTIMORE, *Secretary*.

SAN ANTONIO LIBRARY CLUB

THE San Antonio Library Club of Southern California held its regular mid-winter meeting at Chaffey Union High School Library, Ontario, Cal., on February 19th. Helena Curtis, Librarian of Azusa Public Library gave reviews of memoirs of very different types. The charm and intimacy of Mrs. Aldrich's "Crowding Memories" and the vivid though somewhat inflammatory character of Mrs. O'Shaughnessey's "Intimate Pages of Mexican History" were delightfully brought out by the reviewer. Edna Hester, Librarian of Pomona High School Library, gave a well thought out talk on co-operation among libraries. She spoke of the urgent need of co-operation between the high school and the public library in stimulating an interest in wholesome reading among young people. This same subject was discussed in the Round Table conducted by Ruth Bishop of Pomona Public Library. After lunch the program was completed by an interesting talk by Miss Plant of Chaffey Union High School on the one act play.

MARION J. EWING, *Secretary*.

LIBRARY OPPORTUNITIES

No charge is made for insertion of notices in this department.

POSITIONS WANTED

Normal school graduate, holding certificates in reference work, cataloging, classification, bibliography, government documents, administration and typewriting, desires a library position by June 15th, preferably in a town in Virginia, Maryland or North Carolina. Address, Miss F. M. Hill, Venter, Va.

Librarian with ten years experience in charge of a library in a city of about 30,000 would like position in New York, New Jersey or Connecticut. Address: M. H. 9, care of the LIBRARY JOURNAL.

A thoroly equipped cataloger, with extended experience in college work, good linguist, would like a position in the East. Address: A. U. 9, care of the LIBRARY JOURNAL.

POSITIONS OFFERED

Wanted, for a college library of 40,000 volumes situated in the Southwest, a reference and accession assistant. Salary \$1500. Address: C. L. 9, care of the LIBRARY JOURNAL.

The United States Civil Service Commission announces an open competitive examination for a Research Reference Assistant on May 25th in the Bureau of Mines for duty at Pittsburgh, Pennsylvania, salary \$1600 to \$2200 a year. The subjects are: library economy, cataloging, classification and bibliography, 20 weights; French or German, 10 weights; thesis, 30 weights; education and experience, 40 weights. Applicants should apply at once for Form 1312, stating the title of the examination (Research Reference Assistant) to the Civil Service Commission, Washington, D. C.

The United States Civil Service Commission announces an open competitive examination for librarian to fill a vacancy at the United States Military Academy, West Point, N. Y., at \$3,000 a year. Applicants should at once apply for

Form 2118, stating the title of the examination desired, to the Civil Service Commission, Washington, D. C. Applications should be filed with the Commission on May 17.

IN THE LIBRARY WORLD

NEW YORK

Syracuse. Salary schedule for the Public Library staff adopted March 17th provides that the minimum for lowest grade will be \$70 a month, increased automatically to \$75 at the end of the first year of service; and minimum salary for department heads and branch librarians \$1200.

Buffalo. The Gibbs-Borkowski bill authorizing the city of Buffalo to issue \$100,000 worth of bonds for improvement of the Grosvenor Library has been signed by Governor Miller.

Buffalo. In 1920 the Buffalo Public Library circulated 1,838,195 books, of which 1,058,806 were fiction, to 147,000 borrowers, an increase of 38,667 over the figures of 1919. The number of borrowers on January 1, 1921, was 108,870, or 147,000 if the number of pupils registered in grammar schools in which class-room libraries are placed are added. Forty-three of these libraries were installed, but no other new distributing agencies were opened, altho several districts of the city are asking for library facilities and some of the present branches have outgrown their quarters. The reading rooms of the Main Building also have only standing room to offer on many days.

There was 286,386 books circulated from the Loan Desk; 272,255 from the Open Shelf Room, and 112,358 from the Children's Room, or a total of 670,999 books borrowed directly from the Main Building. The library contained 406,630 books on the first of January, 1921, of which 12,759 represented the net increase for the year. The Binding and Mending Department bound 9394 and reinforced 16,304 books. Payments for maintenance included \$39,018 for books, \$2423 for periodicals, \$7376 for binding, with \$101,281 for library salaries and \$13,390 for janitor service. Total maintenance cost \$194,316, leaving an unexpended balance of \$13,629.

All of the new members of the staff who have not had the benefit of similar work elsewhere have been enrolled as members of the Library Training Course of the University of Buffalo. These students have been transferred from one department of the Library to another to meet

the practice work requirements of the University as part of this course.

PENNSYLVANIA

The Pennsylvania Home Teaching Society and Free Circulating Library for the Blind added 107 new borrowers during 1920, making a total of 736 active borrowers of whom 292 are in Philadelphia, 225 in Pennsylvania, and 219 in other states. Forty-two titles were added to the library, making the total collection 1334. Thirty bound volumes and 25 unbound magazines and pamphlets were sent to the Carnegie Library of Pittsburgh, with which the Free Library of Philadelphia continues to co-operate in distributing embossed books, all expenses of sending them outside the city being met by the Society. The Society urges these readers who desire to read a dotted type to learn Revised Braille, grade one and one half, which is English Braille with fewer contractions and a different capital sign, but believes that the Moon type is the best and easiest for those who have become sightless in adult life, from its resemblance to the Roman letter with every unnecessary line eliminated. One of the books published in Moon type from a special fund was Roosevelt's "Letters to His Children."

GEORGIA

Atlanta. There was a gratifying response to the open series of lectures offered by the Library School during the week of March 28th. Ten librarians of small public or club libraries took the full course of lectures while five other libraries were represented at one or more of the lectures, making in all fifteen libraries represented. The highest attendance at any one of the lectures was nineteen, this being at Miss Titcomb's lecture on the County library.

The course consisted of six lectures by Margaret Carnegie of the Carnegie Library School, Pittsburgh, on phases of library work with children; five lectures by Mary E. Ensign of Chicago, on the mending and repair of books; five lectures by Charlotte Templeton, secretary of the George Library Commission, on the administrative problems of a small library; and two

by Mary L. Titcomb of Washington County Free Library, Maryland, on County library work and making the library felt in the community. A valuable part of the course was the opportunity given during the first hour of each day for individual conferences and interviews.

This was the first experiment of the school in offering an open course of lectures and the response was such that it would seem worthwhile to arrange similar courses from year to year with the untrained librarian of the small public library in mind.

T. D. B.

INDIANA

Indianapolis. The Training Class of the Indianapolis Public Library completed its six months' course in March. The thirteen students taking the examinations, all of whom have been assigned to staff positions, are as follows: Edna Bernstein, Grace Greene, Margaret Harlan, Leah Henry, Bessie Hereth, Alice Mary Johnson, Mary Kellner, Edna Levey, Mary McBride, Dorothy Phillips, Isabel Russell, Flora Shattuck, and Ione Wilson. The course included two hundred and thirty-six lecture hours and an equal amount of practice work for each student.

ILLINOIS

Chicago. Four libraries of safety research are allied with that of the National Safety Council, says Mary Bostwick Day in the December *National Safety News*. These are the libraries of the Safety Institute of America, the National Workmen's Compensation Service Bureau, the Independence Bureau, and the Pennsylvania Rating Bureau. "These five libraries have a 'round robin' system of circulating literature on accident prevention and kindred problems. Through this co-operative plan each of the five libraries receives all the material accumulated by the other four, and none of them misses any new suggestions, new safety literature, unusual articles, reports, etc., which are of interest.

The National Safety Council library is also linked up with the American Library Association, and with the Special Libraries Association whose membership includes some three hundred industrial librarians of the country.

Within a stone's throw of the National Safety Council headquarters is located the library center of the Middle West. . . . Within a few weeks the John Crerar Library. . . will occupy twelve floors. . . next door to the Council's headquarters. Around the corner. . . is the Chicago Public Library. . . . The American Library Association Headquarters are in the Public Library building, and that organization renders valuable assistance to all libraries, including that of the Council. . . . Some 10,

000 volumes are available thru the Western Society of Engineers. . . a few blocks away."

MISSOURI

The fourteenth annual report of the Missouri Library Commission shows a growth of interest in books and reading in the southern part of the state, which has been a difficult section to reach on account of poor railroad facilities. 15,955 volumes were loaned by the Traveling Library Department. Only two counties were not represented by borrowers, Mercer on the northern boundary, and Maries, an unrailed county, in the central part of the state. The Department has carried on the work inaugurated by the A. L. A. of supplying vocational books to American soldiers. Missouri's quota of books from Library War Service amounted to 7000 volumes, which were added to the Traveling Library collection, now numbering 25,027 books. The collection is divided into three fixed groups, the first containing fifty books of a general character for general community reading; thirty to fifty books in the school groups intended to supplement a collection already in the school library; and third, special groups of books on one subject. The remainder make up the open shelf or general loan collection.

New Carnegie libraries were put into operation at Aurora and Marceline. A new library building at Hamilton will soon be ready for use. Chillicothe is taking steps towards a county library. There are in all sixty public libraries in Missouri, thirty-one of which are tax supported. Seventy-three counties have no public libraries within their borders, and there are seven towns of more than 5000 population without libraries. Up to the present the Commission has been unable to employ an organizer to supervise the organization of new libraries.

The Commission asks an appropriation of \$62,875 for the year 1921-1922.

Elizabeth B. Wales, secretary of the Commission since its foundation, resigned a year ago; the work was temporarily in charge of Inez Benedict until September, when Irving R. Bundy took up the secretaryship.

St. Louis. A series of conferences on library work has been conducted this year, by the students, one of whom presides at each conference, choosing the subject for the hour and assigning the phases to be reported upon by her assistants.

At a luncheon held at the Hotel Jefferson on Thursday, April 7th, the St. Louis Library School and Training Class Alumni Association was organized and the following officers elected for the coming year: Margaret Donan, president; Phyllis Casey, vice-president; Annalil Huning, secretary.

Columbia. The Library of the University of Missouri recently acquired the valuable private library of the late Professor G. Jacques Flach of Paris. He was a French jurist, historian, and professor of comparative legislation, 1884-1919, in the College de France, and of comparative law in the Ecole des Sciences Politiques from 1877 to 1919. To qualify himself for these positions he studied the most varied civilizations, including Russia, Japan, and the antiquities of Babylon and other Asiatic countries. His chief efforts were concentrated on the history of ancient French law, and his principal work was *Origines de l'Ancienne France*, in three volumes. The collection is rich in legal antiquities, history of Alsace-Lorraine, of early France and her antiquities, including local departments such as Languedoc, and of Germany and Austro-Hungary. The library consists of 6000 volumes; 1300 of which deal with legal antiquities, comparative law, ordinances of kings of France; 400 with the history and antiquities of Alsace-Lorraine; 500 volumes with French antiquities and history and there are 150 volumes of cartularies and diplomatics. The collection contains many early printed books including a Froben, a Stephens of Paris, an incunabula, a Manuscript, several Elzevirs, a first edition of Beaumarchais's *Figaro*, and several fine bindings with the signatures of the binders.

LOUISIANA

New Orleans. A valuable little collection of autographed books, being the most part gifts of the respective authors to the late Ruth McEnery Stuart, has been presented to the Howard Memorial Library by Mrs. Stuart's sister, Sarah McEnery.

MINNESOTA

St. Paul. With the assistance of the Amherst H. Wilder Charity, the service of the St. Paul Public Library to the hospitals of the city is being greatly extended. Perrie Jones, who has been employed by the Wilder Charity to take charge of this work, is a graduate of Smith College, and had library training in the University of Minnesota summer school and in the New York Public Library School and had five years of experience in library work in Minnesota and New York City.

The Library's plans for this service have received the endorsement of the Academy of Medicine and Ramsey County Medical Association; a successful campaign for books for this service has just been concluded, and arrangements are now being made for semi-weekly visits to each of the eleven hospitals in the city.

Minneapolis. The request of the Public Library for a two-mill tax levy in place of the

one mill has been endorsed by the Charter Commission and the Board of Estimate and Taxation. An intensive campaign is planned for the six weeks preceding the municipal elections on June 13th. Requests for information on the situation are coming in from many sources such as the League of Women Voters, Woman's Community Council, Kiwanis Club, etc.

The Library Board is not making any move with regard to the new building at present; building will probably be deferred until the cost has decreased.

MONTANA

Billings. A recent report of the Librarian of the Parmly Billings Memorial Library covers the three years beginning January 1, 1918, and shows a healthy growth from a circulation of 51,510 volumes in 1915 to 95,433 in 1920, the book stock numbering 25,206 volumes at the end of 1920. The collection of bulletins, reports and other publications of the U. S. Geological Survey has been much used since the library found itself in the midst of an oil center.

Work with high schools was prosecuted successfully, and an outline of a course in library training to become a part of the school curriculum has been presented to them for consideration.

OREGON

Salem. The Salem Public Library contained 15,518 volumes on the first of the year, about double the number of books ten years ago before the library moved into a Carnegie building. The circulation also doubled, numbering approximately 60,000 loans during 1920. The methods employed in library publicity have been various, ranging from weekly lists and occasional articles for each daily newspaper and slides for the picture houses to the maintenance of two bulletin boards in the windows of the Salem Electric Company and Miller Mercantile Company to advertise new books and other library resources. Five classes came from Willamette University for instruction in the use of reference books, and the school libraries loaned 14,737 books.

The nine county libraries of Oregon serve 383,809 people. The population of towns having free public libraries not in county systems is 119,204, making a total of 508,013 having access to some sort of library, but leaving 280,272 people dependent upon the State Library for book service, which is furnished by 768 traveling library stations and by the mailing or lending department. The Oregon State Library loans books to any citizen of Oregon who requests them without the formality of an application signed by property owner or taxpayer,

and without any limit as to number. Of the 45,836 books loaned from the mail order department in the year ending September 30, 1920, but 117 volumes and clippings were lost, the total value being \$92.80, and only \$2.08 was not refunded out of \$576.63 advanced for postage during the year 1919. The number of books sent out to individuals, branches and libraries during the biennium ending September 30, 1920, was 155,581, a gain of 20,534 over the last biennium.

Library service was extended to organizations with the help of county agricultural agents, the State Board for Vocational Education, the Loyal Legion, county nurses, women's clubs, the Y. M. C. A., Monmouth Normal School, the private and independent colleges; to the various workers thru the conventions of plumbers, blacksmiths, ministers and teachers; to the lighthouse and coast guard stations thru their supervisors, and to the forest service and ships at sea.

Exclusive of periodicals, bound and unbound, the Library has approximately 190,000 volumes, or a cataloged total of 179,619 volumes on October 1. The general lending collection has 59,321 volumes, of which 27,995 are in the traveling libraries. Library War Service books to the number of 2539 were given various libraries thruout the state, while others are still held awaiting the establishment of county libraries. The annual purchase of school library books from the county school library fund amounted to \$16,085 in 1919, and \$16,371 in 1920. The legislative appropriation of \$50,000 for the biennium was divided into \$24,000 for salaries and for wages of part-time help; general maintenance, \$4700; replacements, repairs and equipment, \$2700; and books, periodicals and binding, \$18,600. The Board of Trustees requests \$79,660 for the coming biennium, which is regarded as a modest proposal when the \$262,888 appropriated by Multnomah County (which includes Portland) for library purposes for the year 1921 is considered.

CALIFORNIA

San Francisco. The Presidio Carnegie Branch of the San Francisco Public Library is now open to the public. The building, which is situated on a plot having a frontage of 137½ feet on two streets and a depth of 255 feet, is a fire-proof construction faced with terra-cotta. The cost was \$85,000 and it provides accommodation for 15,000 volumes.

Riverside. The Dorothy Daniels Memorial collection of books at the Public Library is entitled "Books for Children of Today and Those

of Long Ago." The basis of the collection now contains about two hundred and fifty volumes of illustrated books for children: modern publications, and a collection of toy books, horn books, chap books and books for children of the eighteenth and early nineteenth centuries. It contains also some monographs and treatises on books of that character. A portrait book-plate will be used. Contributions to an endowment fund have been received.

Berkeley. On Commencement Day, May 11, the following students will graduate from the Library Science courses:

Marion Anderson, Bertha Olga Biernath, Josephine Carrol Brown, Dorothy Deming, Helen Downs, Esther Dahl Hahn, Lois Chambers Howe, Mina Elizabeth Keller, Anna Pauline Kennedy, Deborah King, Helen Sullivan Lacy, Rachel Graffis Look, Mrs. Beulah Van Engelin Lucas, Ivander MacIver, Florence Anita Rhein, Dorothy Grace Squires, Mary Helen Sterrett, Nellie Lucile Stiles, Mrs. Evangeline W. Thurber, Katherine Ray Wickson.

CZECHO-SLOVAKIA

The extent of the library zeal in Czecho-Slovakia is shown by the fact that the sums voted by the cities are in many cases far in advance of the sums required by the Library Law of 1919: Vitkovice (the city of the famous iron works) has appropriated 60,000 crowns instead of 16,205; Kladno (coal mines), 27,800 crowns instead of 11,551; Brandys n. o., 13,000 crowns instead of 3660; Novy Bydzov, 8000 crowns instead of 4567; Hloubetin, 25,500 crowns instead of 1603; Libusin, 14,000 crowns instead of 2450; Breclava, 39,000 crowns instead of 4258; Plzen (the well known Pilsen), 149,105 crowns instead of 64,352; and Prague, 550,000 crowns instead of 183,389.

Detailed statistics are in preparation regarding the workings of the libraries under the first year of the law, and we hope shortly to give an abstract of these reports. The Czecho-Slovak Ministry of National Defense appropriated 220,000 Czech Crowns for general culture work among the soldiers for the year 1920. The sum of 262,000 Czech Crowns, collected by voluntary contributions from the soldiers themselves, to supplement this appropriation, is witness to the appreciation which this work has met. The 358 army libraries contained in August, 1920, a total of 106,530 carefully selected volumes which have been cataloged and classified. There are in addition 250 reading rooms which subscribe to 5000 periodicals. During the three months of May, June and July of last year 53% of the army borrowed from these libraries 186,894 volumes.

AMONG LIBRARIANS

The following abbreviations are used:

A. Library School of the Carnegie Library of Atlanta.

C. California State Library School.

C.P. Carnegie Library School of Pittsburgh.

D. Drexel Library School.

I. University of Illinois Library School.

L.A. Library School of the Los Angeles Public Library.

N. Y. P. L. Library School of the New York Public Library.

N.Y.S. New York State Library School.

P. Pratt Institute School of Library Science.

R. Riverside Library School.

S. Simmons College School of Library Science.

S.L. St. Louis Library School.

Syr. Syracuse University Library School.

Wis. Wisconsin University Library School.

W.R. Western Reserve Library School.

Wash. University of Washington Library School.

CHAPIN, Artna H., 1897 Armour, former librarian of the Redlands (Calif.) Public Library, appointed director of circulation at the Youngstown (O.) Public Library.

COLLINS, Lillian, 1914, Wash., appointed librarian of the Aberdeen (Wash.) Public Library.

DIGBY, Adele (Burnham), 1912-13 N. Y. S., died at her home in Ann Arbor, Mich., on February 28 of heart trouble resulting from an attack of influenza.

HARDY, Mary, 1910-11 S. spec., appointed librarian of the Brumback Library of Van Wert County, Van Wert, Ohio.

HILL, Grace, 1912 N. Y. S., will be one of the instructors in the Summer Session of the Simmons College School of Library Science, Boston.

JOHNSON, Ellen A., 1921 N. Y. S., appointed head of the Children's Department in the main library and instructor in work with children in the library school of the Carnegie Library, Atlanta, Ga.

KELLOW, Ethel, 1912 C. P. cert., appointed children's librarian, Detroit (Mich.) Public Library.

LUCAS, Mary R., 1919 C. P. dip. in work with children, has resigned the children's librarianship at Duluth, Minn., to become first assistant in the Children's Department of St. Paul (Minn.) Public Library.

McMULLEN, Elizabeth, 1915-16 N. Y. S., resigned her position with the Iowa State Agricultural College Library to become assistant in the Reference Department of the Des Moines (Iowa) Public Library.

RULE, Elizabeth Elkins, for more than fifty years connected with the Lynn Public Library,

died April 19. Born at Nantucket in March 1849, Miss Rule went to Lynn at the age of nine. She was educated in the Lynn High School and prepared for a teachers' career at the Salem Normal School. She never taught but instead entered the service of the Lynn Public Library as a part-time assistant in 1867. Two years later, she was given a regular position, and in 1873, the position of assistant librarian was established which she filled until she retired on a pension in March 1919. During her long period of service, Miss Rule saw the Lynn Public Library grow from a collection of 8,000 books in a small building occupied by retail stores to the present system of a Central Library and four Branches, housing a collection of nearly 120,000 volumes. She was known to a wide circle of librarians thru her many years of membership in the A. L. A., in whose first conference she was one of the three women members, and the Massachusetts Library Club.

SIBLEY, Eleanor, 1916 C. P. cert., appointed assistant instructor in story-telling in the Carnegie Library School of Pittsburgh.

TARR, Anna M., 1910 N. Y. S. former librarian at Clinton, Ia., and since 1919 director of circulation at the Youngstown Public Library, appointed acting librarian of the Youngstown (O.) Public Library during the leave of absence of the librarian.

TICHENOR, Barcus, 1919 N. Y. P. L., has resigned her position in the Catalog Department of the Indianapolis Public Library to become librarian of the Indiana State Normal School at Muncie, Ind.

THROOP, George R., Assistant Librarian of the St. Louis Public Library, has resigned to become assistant to the Chancellor of Washington University, St. Louis. He is succeeded by Charles H. Compton, Chief Reference Librarian of the Public Library in Seattle, Washington.

WALLACE, Lucie, appointed associate editor for the *Reader's Guide to Periodical Literature* and the *International Index to Periodicals* (formerly *Readers' Guide Supplement*).

WALLACE, Ruth, 1915 N. Y. S., has returned to the Indianapolis Public Library as head of the Catalog Department after a year's leave of absence.

WHEELER, Joseph L., 1909 N. Y. S., librarian of the Youngstown (O.) Public Library, has been granted a year's leave of absence beginning May 1st, and will spend this time on a farm in Vermont. His address is Fairhaven, Vt.

THE METROPOLITAN MUSEUM
OF ART
NEW YORK

THE VERMEER
COLOUR PRINTS

REPRODUCTIONS OF FOUR
IMPORTANT PAINTINGS
IN THE MUSEUM

1. YOUNG WOMAN OPENING A CASEMENT
BY JOHANNES VERMEER OF DELFT

The Constitutional Review

A quarterly magazine, founded and maintained for the purpose of "advocating the maintenance of constitutional government and recording its progress at home and abroad." Discusses the great problems of democratic, representative, and constitutional government. It stands for a firm adherence to the fundamental principles of American government as set forth in the Constitution, opposes bolshevism, socialism, and other forms of extreme radicalism.

Henry Campbell Black, Editor. Published by the National Association for Constitutional Government, and sent without charge to all members of that Association. State, municipal, college, and university libraries, and public institutions of various kinds are subscribers. Subscription price, one dollar a year.

\$1.50 net

PRESS NOTICES.

CHRISTIAN WORLD—This is a timely, impersonal, dispassionate, analytical unanswerable discussion of the weaknesses and inconsistencies of the Christian Science Church. It overflows with facts which provide the ground-work of the author's incisive argument . . . and is as clear as sunshine and as irrefutable as the decalogue.

THE EVANGELICAL MESSENGER—The spirit in which his exposures of inconsistencies in the organization are made is very commendable, and adds merit and pungency to his arguments and forceful statements. It is the only book of its kind on the market as far as we have any knowledge.

THE KEYLESS LOCK BINDER

Allows the magazine to open flat.

Will hold one thick or a number of thin magazines

Made in all sizes and styles of binding

WM. G. JOHNSTON & Co., Pittsburgh, Pa.

DEAR SIR:—

We have been using several of your Keyless Lock Binders for several months and find them perfectly satisfactory. We have had no more trouble with the "Magazine Thief" and the old numbers look as good as "the new" when taken from the binders.

They improve the looks of the reading table, keep the magazine in better condition and are so reasonable in price that EVERY Association can afford them.

Your sincerely General Secretary.

CRAM'S MODERN REFERENCE ATLAS

THE STANDARD SINCE 1867

A complete reference work on all subjects of geographical information and commercial statistics. The 1920 census statistics of the United States and the new world maps, showing all territorial changes made by the war, make this edition of Cram's Modern Reference Atlas an especially valuable work.

NEW MAPS—NEW STATISTICS

An entirely new set of maps, large scale, clearly engraved and judiciously colored, has been specially prepared for this edition. The descriptive matter of the physical and political geography of the nations of the world has been rewritten and brought down to the present day.

Size, 12 x 15 inches, 496 pages. Weight 10 pounds. Printed on finest quality heavy map paper, bound in buckram.

Price \$19.50—prepaid anywhere in the U. S.

Descriptive circular, with sample maps, sent on request.

ALBERT COYLE

OFFICIAL REPORTER
AMERICAN COMMISSION ON CONDITIONS IN IRELAND
BLISS BUILDING
WASHINGTON, D. C.

1 May 1921

Dear Librarian:

Your readers want to know the truth about the Irish crisis. They look to you to get it for them. They can not get it from inspired press reports, official communiqués, or the flood of propaganda that oozes over America.

The Irish question is of supreme interest to your readers, regardless of their differing sympathies. On the one hand, the British Government declares that the safety of the Empire demands the rejection of the principle of self-determination for Ireland. On the other hand, the Irish assert that they have been criminally misgoverned, and that the atrocities occurring in Ireland under British military rule are worse than those alleged against the German army of occupation in Belgium.

In order to secure the impartial truth, one hundred and fifty eminent Americans elected from their number a Commission On Conditions In Ireland, consisting of United States senators, noted authors, economists, and social workers, and comprising various religious faiths and political creeds. This Commission examined eye witnesses, sworn affidavits, and first-hand documents obtained by an impartial request for information to both parties belligerent. Distinguished Irish, English, Scotch, and American witnesses appeared before the Commission and gave evidence covering not only the political struggle, but also Irish agriculture, industry, commerce, education, labor movements, and actual achievements in self-government. Surely out of the mouths of so many witnesses the truth about Ireland can be established.

The Commission has made its report, detailing certain definite conclusions on the Irish question. It now releases for publication the complete testimony, affidavits, depositions, and other documents submitted in evidence, comprising in one volume of 650 pages what a prominent American scholar calls "the most valuable collection of fact data about Ireland obtainable on this side of the Atlantic." It has been carefully annotated and cross-indexed to serve as a hand-book of ready reference on all aspects of the Irish question.

Can you afford to be without these volumes on your shelves?

EVIDENCE ON CONDITIONS IN IRELAND, cloth bound, may be had for \$1.50 per copy, \$17 per dozen; and the REPORT of the Commission for 35¢ per copy, \$3.50 per dozen. May I not send them to you by return mail?

Faithfully yours,

Albert Coyle

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Library Bureau Steel bookstack

Library Bureau standard bracket stack, free standing type, showing plain tubular uprights, plate brackets, eight-inch steel adjustable shelves.

THE proper housing of books in the modern library depends not only on the arrangement of the stack room but upon the design and construction of the bookshelf itself.

Library Bureau offers the highest development in bookstack design and construction which will meet the need of any library and allow for such expansion as the library growth demands.

We will gladly consult with librarians and architects—offering the services of experienced representatives. This service will be rendered without charge or obligation.

Economics of Library Architecture*

By CLEMENT W. ANDREWS

Librarian of the John Crerar Library, Chicago

THE paper which I am to present was prepared for the Chicago Literary Club. In revising it, chiefly by elision, much of the original wording has been left. This will explain, and perhaps excuse, a somewhat lighter tone, and the inclusion of some matter which might have been taken for granted in addressing a professional audience.

Still it will have the advantage of novelty, even to you. While several books have been written on library architecture and some papers on the economical aspects of certain details, there has been, so far as I know, no general presentation of the subject.

Perhaps the complexity and variability of the conditions have prevented such a presentation, for these are complex and varied to such a bewildering degree that an ideal and truly scientific solution would require the use of higher mathematics than I have at command or you the patience to follow, even if the room had sufficient wall space for the development of the equations.

A comprehensive survey must take into account, among many other items, the expenditure of money for the construction of the building; for its maintenance, after construction; the expenditure of time by the staff in the service of the library, which is of course an expenditure of money; of effort by the staff, which is in most cases time and therefore money; and the expenditure of time and effort by the readers, which may be money to them and certainly is a factor in determining the economic return to the library for its expenditure.

These economic considerations apply to every part of the Library's service; to its circulation department; to its general and special reference work; to the routine of classification and cata-

logging; to care of readers and staff; to its systems of heating, lighting and ventilation. Indeed, it would be difficult to find a single item of library work which is not affected in some degree by the plan of the building.

Then there are the distinctions to be drawn between the various classes of readers, and these distinctions sometimes require the balancing of directly contrary forces. Thus the time of children and of those who frequent the newspaper room cannot be considered as valuable as that of older and more serious readers; yet it has been found advisable, in the modern public library, to provide for these classes space near the entrance. For the children this is desirable because they cannot be and perhaps ought not to be forced to the quiet behavior of older persons, and they would inevitably cause confusion if they circulated in large numbers thru the main portion of the building. As to the newspaper room habitués, a visit to that room in almost any public library will convince one, on the evidence of more senses than one, of the undesirability of their permeating the building.

In the same way and for equally obvious, tho very different reasons, separate provision must be made for the use of medical collections, of music collections, of maps, by investigators requiring special desk facilities or wanting to consult a large number of books at one time, and by those readers who want to consult quickly a dictionary, directory, or other reference work. It is evident that the work of arranging the rooms to secure the maximum result from the minimum expenditure of money, time, and effort is like marriage in that it is not to be entered upon lightly or unadvisedly.

Again, while some of these factors have been determined with sufficient accuracy, others have been determined only approximately, and still others are not known at all or vary greatly at different times.

Thus of major factors the minimum width of aisles in the book stacks and the maximum

* Paper read at Atlantic City, April 30, before members of the American Library Institute, the New Jersey Library Association, and the Pennsylvania Library Club.

length of shelves, factors which determine the most economical spacing of the columns, are known fairly accurately, the minimum space to be allotted each reader at the tables with somewhat less accuracy, but almost nothing is known of the relative economic value of the time of the individual readers, except that it cannot be taken at their own valuation and that it necessarily varies under different circumstances. For instance, a library built for peace conditions would naturally favor the convenience of a physician engaged in saving life over that of a chemist at work on a perfume to sweeten it. But in time of war the preference would be given to the chemist at work on a new poison gas to kill by the hundred thousand over that of the physician who could hope to save only by the score. Even then an exact solution would not be possible; for there is not on record any determination of the relative mental quickness of the chemist and physician, to decide the amount of preference to be given the one or the other in order to secure the maximum total result.

In smaller matters the same holds true. The time of the elevator run, the number of seconds required to open and close the gates, and to load and unload the car are known with sufficient accuracy to enable the architect to decide just how many elevators will give the most economical service. The service between the book stacks and the delivery desk is much less accurately known, tho in most libraries it is the more important factor. Every library has to determine the limiting conditions. No American library could follow the German plan by which the books are asked for one day and delivered the next; nor give an average service of an hour, as in the *Bibliothèque Nationale* at Paris; nor even the twenty minute service of the British Museum. The fifteen minute service of the Boston Public Library did not secure it from complaints, but I have not heard of any in regard to the ten minute service of the New York Public Library, nor that of five minutes at the John Crerar. The average service at the Chicago Public Library should be considerably less than five minutes, and one Scotch library has succeeded in bringing it down to one minute. Such rapidity of service, however, as that last mentioned, would require special arrangements which would hamper the work of a reference library too much.

Of course the time of service is not dependent solely on the means of communication between the stacks and the delivery desk. The number of attendants, their interest in the work, their age, sex, pedestrian ability and other qualifications, the number of miles of shelving which each has to cover, the number of calls which

each has to fill, the number to be filled in a given time, all affect the service and must equally affect the plan of the stacks, the number and location of the attendants' stations, the arrangement of the corridors, and other architectural features.

To all these causes of variation in library plans must be added the great differences in the financial conditions of the institutions and in the character of the sites. Where no marked differences on all these points exist, as in the case of the public libraries in small towns, built by Carnegie gifts, there is a general agreement as to the principal features of the plan. There may be noted, I think, a similar tendency toward a type in the newer university libraries, and to a less degree in the public libraries of cities of medium size. But for the larger libraries of the country there has been no uniformity in the conditions as well as great differences in the attitude of the architects toward them.

Turning now to the consideration of details, the first question is as to size, or of the time for which provision is to be made. Here it is obvious that a compromise must be found which will make provision for a considerable time, and yet not lock up too much money in space not needed at first. Even if a satisfactory Globe-Wernicke style of library architecture could be evolved, the problem would remain; for this method of construction, like the book cases, would necessarily be more expensive than the usual one. Architects estimate that the construction of a building in two portions would add at least ten per cent to the total cost.

The ground plan of the library is less likely to be considered from the economic standpoint. Perhaps it would be more accurate to say that the economic conditions affecting it are more likely to be overlooked. When libraries were used chiefly or solely in the day time or when the use of artificial light had to be kept at a minimum, either because of its injurious effect on the books or because of its cost, then the ground plan was naturally chosen so as to secure the maximum of daylight in all parts of the building. These plans have been followed long after the conditions indicating them have ceased to exist. There is now, however, a more general recognition of the change in conditions and a strong tendency toward the solid rectangle advocated by Melvil Dewey years ago.

A comparison of the economic advantages of the different ground plans of some of the larger libraries may be of interest. One of the oldest is the hollow square. It is common in Europe, but the Boston Public Library is the only conspicuous example in this country. It furnishes nearly a maximum of well lighted space for a given area, but as it has eight facades it is

NEW YORK PUBLIC LIBRARY

LIBRARY OF CONGRESS

BOSTON PUBLIC LIBRARY

B-book space; C-catalog; D-delivery; R-readers

expensive to build, maintain, and heat. Still worse, it gives the maximum dislocation of books, readers, and staff. (See Diagram.) It has been said that the farthest book on the regular shelves of the Chicago Public Library is nearer the delivery desk than the nearest in the Boston Library and it is evident that in the most unfavorable case the supply of a reader and the return may involve a combined journey of book and reader twice around the building.

Another ground plan, exemplified in the Columbia University Library and some other university libraries, is the Greek cross. (See Diagram.) It is even more expensive to build and heat and dislocates the work of the staff fully as much and the storage of the books even more, requiring, therefore, a proportionately large staff. Its only economic advantage seems to be in providing a large number of study rooms, but Harvard, with a larger library, and California, with a smaller one, have met this need in connection with a solid stack.

A less expensive plan is a Greek cross inside a hollow square, as in Library of Congress as first built. (See Diagram.) The New York

Public Library when extended will have this form. As the open spaces are not large, they do not require elaborate ornamentation and the cost of heating also is less than for the hollow square. The passages thru the arms greatly facilitate the movements of readers and staff, and the storage of books can be made convenient or even central to the delivery desk, and the catalog can be placed in the best position.

The same advantages apply in even a larger degree to a rectangle with only two light wells. In its present form the New York Public Library has such a plan, also St. Louis and Cleveland, and it seems to be the best for public libraries in larger cities. Some of the newer university libraries have adopted the same plan but with a different arrangement of the reading rooms. (See Diagrams.)

Several other forms have been used. There is a circular one at Oxford, the T shape of the old Harvard Library after the addition of 1876; and of very many small libraries; the L shape of many others; one or two triangular buildings, notably that of the Brooklyn Public Li-

JOHN CRERAR LIBRARY
(PRESENT SITE)

brary; and some of irregular shapes conditioned by the sites.

Finally, there is the solid rectangle, with a large variation in the proportion of the sides from a square to a narrow oblong. This was the form of the old Boston Public Library, the first large public library building in the country; of Gore Hall at Harvard; of the Astor; and of many others. As used in these libraries, with a lofty central hall and alcoves at the sides for the books, the dislocation of the books was very great, and the space available for them too small for the increase of the collections. These considerations led Harvard in 1876 to adopt the stack system in which the books are housed compactly in rooms used for this purpose alone. By placing these stacks in a rectangle at right angles to the reading room, a very convenient arrangement was secured. Indeed, it varies from the general plan of the modern university library only in not having study rooms around the stacks. This addition could not have been made in 1876, when gas was the only available illuminant, and the library closed at sunset.

This form gives the minimum of cost of construction and maintenance, and a maximum of compactness and accessibility. I have selected two representatives, the Massachusetts Institute of Technology because of its oddity, and the John Crerar for other reasons. (See Diagrams.)

The next factor, logically, is the height. The clear height of the stack floors is determined by the reach of the average attendant at not over $7\frac{1}{2}$ feet, and if the service floors are in contact with the stacks they should communicate on a level at every second or third floor of the stack. Personally, I would prefer every second floor, carrying the floors thru the stack, if at every floor there would not be sufficient light and ventilation for the staff, while every third floor would be unnecessarily high, causing loss of space and excessive vertical travel. The reading rooms require a greater height for proper lighting and ventilation and in addition permit closer seating without the feeling of being crowded.

A more important item is the number and arrangement of the rooms. Errors here may affect very seriously the number of attendants required and thus increase the maintenance charge. The number and position of the reading rooms is especially important. Some division is necessary, as has been pointed out already. Such divisions, however, are costly and should be avoided as far as possible. The experience of the Newberry Library on this point is enlightening. Its original plan provided for a series of departmental reading rooms, each containing the books on a given subject, and served by attendants having expert knowledge of the subject. From time to time the system has been curtailed until now there is one central reading room and one other for the genealogical collection. The objections to a multiplicity of reading rooms are now felt so generally that most large libraries would refuse a gift which would require the establishment of a separate room, unless with an endowment sufficient to compensate for the disadvantages.

Except that the salaries involved are smaller the same may be said of the arrangement of the stacks. A dispersal of these requires more attendants and lengthens the time of service and so is uneconomical.

Under this head falls also an item which may be of considerable influence on the cost of the building and its maintenance. This is the space devoted to halls and corridors. These should give ready and ample access to such rooms as require this, but anything more, at least in a northern climate, is wholly an evil from the economic standpoint. That the maintenance charge of the New York Public Library is increased considerably by the extent of its halls and corridors is evident to any one who has been in the building. That the loss of time to readers and staff is also considerable is equally certain, tho perhaps not so obvious.

In the matter of lighting, as may be inferred from what has been said, there is a conflict of forces. The more compact building will require more artificial light, and also by permitting more work require more supplies. On the

other hand, electricity is the one item of library expense which has not increased materially in cost in the last six years. Moreover, the introduction of the semi-indirect system has secured much better results than the direct for only a comparatively slight increase in the amount of current and almost as good results as the indirect for a considerable diminution in the current.

In ventilation, however, there is room for improvement. The usual method, where an artificial system is used, is to provide one sufficient for the whole building and requiring to be run as a whole. Yet this is evidently uneconomical, for the needs of different parts of the building vary greatly both as to quantity and duration.

In concluding this part of the paper let me refer briefly to a phase of the subject which on first thought might not seem to belong to it at all. This is the aesthetics of library architecture. Yet it is certain that the adoption of a style which is expensive to construct may impose too heavy a burden on the funds of the

library, that one with much ornamentation will be more expensive to maintain, that one will give more available or better lighted space than another; and on the other hand that bad architecture or an absolutely plain building in the factory style will almost certainly cost the institution the respect and perhaps the good will of all who see it and use it. In economic terms this may well mean the loss of financial support from the community either in taxes or gifts, a loss of efficiency on the part of the staff thru lack of pride in the institution, and a disregard for its property and regulations on the part of the readers.

Speaking under correction as a layman, I do not think that simplicity and unity of plan are incompatible with dignity of style, beauty of design, or suitability of material.

Does not Polonius' advice fit exactly? "Costly thy habit as thy purse can buy, but not expressed in fancy." Would not Laertes have erred equally had he bought for his studies at the university either the full dress of a courtier or the overalls of a workman?

The Catalog of the Future

THE catalog of the future—what is it to be? The catalog of the present has been developed thru many experiments to a completeness that leaves little to be desired. A librarian whose privilege it was to succeed to a school library where had just been installed a new catalog with a well-nigh perfect list of author, title, subject, analytic and cross reference cards was enthusiastic over the opportunity for inducting Junior High School pupils into its use, fore-tasting the pleasure of accustoming all those growing minds to the use of the tool that was to make them at home in any library.

Time after time she explained to individuals and to groups the use of the cards only to find them after many days starting to read the catalog thru to find a needed book or looking in the last drawer for Burns' poems or complaining there was nothing about Longfellow because the drawer chanced to read "KIP-MAN." Gradually it dawned upon her that they lacked a working knowledge of the alphabet; many of them lacked any knowledge of it. A few who were "alphabet-minded" quickly learned the order of letters and the encyclopedic sequences. But many who had come up thru the "modified Gary system" seemed powerless to grasp it and turned in discouragement from any attempt to use the catalog. The trouble was sharply

brought out when a bright boy between eight and ten years of age asked for his reader's card. In the noise of a passing class the librarian was uncertain as to the name and asked "Does it begin with B or P?" "I don't know" he replied. Thinking he had misunderstood, she said "Spell it." A look of puzzled helplessness passed over his face; then he brightened and said "I can't spell it but I can write it." Given pencil and paper he wrote in a firm clear hand "Harry Puder."

Such experiences make librarians wonder what is to become of tools based on fundamentals no longer taught in schools? Must the catalog of the future be oral (or aural) constructed on sounds not letters? Will a trained ear listen at the "SH" phone till "Shakespeare" sounds and then press a button which will click into view an indication of the location of the volume sought? Or will it be piano board style where manipulation of the keys will bring as accurate and instantaneous service as a cash register?

Whatever the new system devised to keep up with modern educational methods, there would seem to be more trouble ahead for librarians and library schools.

MINNIE CLARKE BUDLONG.

Michigan's State Library Service*

AT present Michigan's State Library** is under a Board of Library Commissioners which has five members appointed by the Governor for a term of four years. The state librarian is a member of the board and its secretary.

It is recommended:

1. That the library service be considered part of the State's educational service and placed in the Department of Education.
2. That the library board be abolished.
3. That officers responsible for promoting the State's library work, including the state librarian, be appointed by the state superintendent of public instruction or commissioner of education.

The proposal to make the library service a part of the State's larger program for public education is based upon a double desire to increase and improve library service and to strengthen the schools. Even if the State's library program were far more extensive, it is believed that association with the State's other education would do more for libraries than any independent board, no matter how competent, can easily do.

The larger part of the work of the State library service is and always will be primarily in rural and semi-urban districts, where the schools stand a better chance of receiving adequate support than does a library. There is a growing belief that the natural center for community interest is the public school building. This is true even in cities where there are more occasions for community gatherings in local schools than in a library. To combine the interest of school and library promises more for rural and semi-urban localities, even for smaller cities, than does separation of the two. Even in larger cities progressive librarians try to establish branches at public schools. No place in Michigan is rich enough to tolerate lack of cooperation between public school and public library. No school is either rich enough or poor enough to be without both a well supported public school and an adequate library accessible to the public. To make sure that neither school nor library will suffer, it is recommended:

That Michigan attempt to build up the libraries which its rural districts sadly need by increasing the responsibility of the public school system for library development.

If this recommendation is not followed, an alternative is recommended:

That central responsibility be secured by abolishing the library board and placing the obligation for promoting library service upon a library director who shall be accountable to the governor.

The reasons for substituting a single-headed officer for a board of five have been given repeatedly under other headings.

For this proposal it is believed that even library leaders can be won if the matter is taken up with them and the probabilities considered for development looking to conditions ahead in rural and semi-urban districts for the next ten and twenty years. There would still remain all that the volunteer association of library workers can do to keep a state library up to a maximum program. Stronger than any outside pressure will be the inside appeal of districts centering in the schools of the state for adequate library facilities. A stronger direction can be obtained thru pooling the library interests with education than can in all probability be obtained by trying to secure a separate salary and separate maintenance.

There will be those who believe that merging the library and educational services will jeopardize the library and make it a sort of neglected step-sister unless the law specifies a certain millage to be allowed each year for library development. That is a plausible argument that friends of various movements frequently urge. Experience shows, however, that there is a tendency on the part of public officers who are insured a certain statutory millage, to cut their program to fit that allowance instead of telling the whole of their story and expecting communities and the state to make appropriations which will fit newly seen needs. It is believed that all friends of library extension in Michigan will be more keenly alive to the possibilities of this work and will do far more to help the public see the need for it, if it is incorporated as one of the State's educational services to be supported out of special appropriations for supervision and for State grants. There are very few educational services that ever have suffered or ever will suffer because of the necessity of coming back to the people's representatives once every two years with proof that money has been well spent and that more money is needed.

* Summary of report on the analysis of Michigan's State Government Organization. Prepared by Committee to Promote Reorganization of Michigan's State Government. Chapter 26, page 146.

** The State Library itself is not in charge of this board which has jurisdiction otherwise in the library affairs of the State.—Ed. L. J.

The "Morgue" as a Factor in Journalism*

By JOSEPH F. KWAPIL

Librarian, Public Ledger Company, Philadelphia

THE "Morgue," when conducted on a modern basis, is an indispensable department of any well-regulated newspaper. It bears the same relation to the editorial force of a newspaper as the accounting department has to that of a large corporation. Instead of accounts it is responsible for items of news, biographical and prepared obituary sketches, zinc etchings, photographs, reference books, etc.

The greatness of the morgue is demonstrated to the best advantage at times when there are happenings of great importance. There may be a great shipping disaster, a mine explosion, a bomb outrage, a sensational murder, or a great conflagration. It is prepared for just such emergencies as these in which the details are often meagre. It can supply a great variety of detailed information, photographs, maps and charts to illustrate it; making it possible to "play the story" for its full value from the news standpoint. Rival newspapers, which have not developed their morgue department sufficiently to possess this material are at very much of a disadvantage.

By way of illustration: a fairly prominent person dies unexpectedly, there has been no time to prepare an obituary sketch in advance. The editor sends for all the available material. He receives an envelope of clippings, a book containing a biographical sketch, numerous photographs, and quite likely an envelope containing several cuts. From the data supplied the rewrite man is able to prepare a quite satisfactory sketch for the next edition, altho he may have had just a few minutes in which to do this. Within a half hour from the time that the message came into the office the newspaper is on the street, giving full details, which include a sketch of his life and that of his family, embellished with a good late portrait. This kind of incident is of practically everyday occurrence. While on the subject of obituaries, the well-equipped morgue has many thousands of up-to-date obituary sketches and cuts of people of local, national and international importance in its files for such an emergency, and those of special importance are prepared in advance, set in type and kept corrected up to date. These are given a number in the "galley" and the proofs are filed in the morgue.

Newspaper reporters are constantly changing from one office to another. Why this should be

it is not easy to explain. They change so frequently that it is almost impossible to be familiar with all their names. As a consequence it is often necessary to assign a new reporter to a story that has been covered on previous occasions by other members of the reportorial staff. Altho he is unfamiliar with the details or history of his story, he can get the envelope on that particular subject, study what has been previously written, and he is thus enabled to write intelligently and in accord with the policy of the paper on this particular subject.

The editorial writers use the morgue freely to ascertain and verify facts. They consult it when they are about to quote someone and want the exact wording of what he said and the occasion on which he said it. It is invaluable when it is necessary to secure the text of certain bills pending in Congress or the state legislatures, and the facts and statistics that have been used in connection with such bills.

The Sunday department is dependent to a great degree on the morgue for data and photographs to illustrate the magazine section of the paper. A high percentage of the articles used in this section is based on the material supplied by this department.

There is an important tuberculosis or cancer discovery announced in Paris. The City Editor wants to give the story a local angle, and wishes to obtain the opinions of resident specialists on this new discovery. The morgue is called upon to supply the names of such specialists and is able to do so from the news clippings filed, in which they are quoted on that subject.

The promotion branch of the Advertising Department has a request from a prospective advertiser who wants facts about automobiles, for instance. He may want the number of passenger cars, motor trucks, accessory dealers, etc., in the city. The morgue should be able to supply these facts.

The Circulation Department every day receives many letters with enclosed stamps, asking for a paper that had such and such an article, the date of which the enquirer does not recall. These inquiries are all referred to the morgue, which supplies the dates with little trouble, by means of the news index, a daily chronicle of the contents of the newspaper.

The newspaper is looked upon as a kind of public institution, and is expected to answer questions that cover almost every subject imaginable. The public looks upon it as an obligation

* Paper read before the Pennsylvania Library Club at Atlantic City, April 30, 1920.

on the part of the newspaper, rather than a courtesy. These requests for information come in the form of letters, telephone calls and personal visits. The morgue has a special department called the Information Bureau where all queries are submitted. On some days the telephone rings incessantly and the calls run into the hundreds.

The success of a newspaper morgue depends a great deal on the librarian in charge. He must be a man who is wide awake to his position and responsibilities. He must be a student of events and happenings so as to select the material to be filed. He must possess a mind for detail and organization and be able to reduce lost motion to a minimum. He must act as the connecting link between the past, the present and the future. He must be historian of contemporary events, and is supposed to have everything that has happened in the last fifty years at his finger tips. He must be thoroly familiar with persons local, national and international. To use a slang baseball expression, he is the "pinch hitter" in almost every crisis.

When a big news story "breaks," the order runs: "Get the morgue on the 'phone quick," and the morgue man is expected to be "on the job" like a fire horse. He must be persistent and determined with the tenacity of a bulldog. No task is too great or too difficult for him to tackle. The harder the task, the more he glories in it. He takes a keen pride in the department, and is most jealous of its reputation, and when it fails, even tho thru no fault of his own, he feels the humiliation deeply.

When he does the reading for the material to be filed, the whole world is as a panorama to him, he clips an item here and there with the finesse of a surgeon doing a delicate operation. By being familiar with events and happenings everywhere, from day to day, he finds it unnecessary to read this material thoroly. He has developed a fine sense of news value, and is able to judge quickly as to whether the matter is worth saving. His reading averages about one hundred newspapers daily, and every week he handles thousands of news clippings, and yet by means of his finely developed system he can lay his hand on any clipping almost instantly. Such a librarian can make his work rank with the most important in the newspaper office, while on the other hand if he lacks vision and initiative, he can keep it on the level of that of an average file clerk.

According to the modern standards of journalism, the *Public Ledger* has an excellent example of the up-to-date newspaper morgue. Several years ago when the Curtis interests purchased it, it was discovered that the morgue was

the weakest department of the whole newspaper plant. It was decided, therefore, to reorganize this department which was thus enabled to adopt the best features of the several great newspaper morgues. Where other newspapers had their material scattered in several different departments, the *Public Ledger* merged them into one central department, concentrating all authority under one head who was responsible directly to the general manager of the paper. This effected a tremendous saving in overhead expense, and at the same time speeded up the entire machine.

Vertical filing equipment was adopted in preference to the open shelf system, the vertical file being more sanitary and saving at least fifty per cent on floor area necessary for aisle space where shelving is used.

Some newspapers file their photographs and clippings together. This necessitates the use of a large manila envelope to file small clippings, and owing to the fact that the clippings far outnumber the photographs, it causes an enormous waste of drawer or shelf space. To avoid this the *Ledger Morgue* adopted a six by four inch envelope made of strong thin paper. One thousand of these envelopes measure eighteen inches. The same number made of manila paper of the kind generally used, would measure thirty inches. This saving of twelve inches of drawer space for every thousand envelopes is very important, in view of the fact that the number of envelopes runs into the hundreds of thousands. With the use of the larger envelope there is also a tendency to put too much material under one broad classification, thus causing a great waste of time at the critical moment in locating some specific material. In contrast, the smaller envelope system lends itself to more definite and direct classification, and allows subdivision of the material as occasion demands. For photographs a ten by twelve inch manila envelope is used, allowing an envelope to every person and subject filed. Before being filed every photograph is stripped and trimmed of every vestige of surplus material so as to keep down the bulk. Fully ninety-eight per cent of the photographs can be filed in this size envelope.

Many morgues use the same size of envelope to hold both one and two column cuts. But the one column cuts outnumber the two column cuts by about six to one. To save space, therefore, the *Ledger* adopted a three by five inch envelope for the one column cuts, and a five by eight inch size for those taking two columns. By doing this it is possible to file twelve thousand one column cuts in the space which would otherwise accommodate only forty-eight hundred cuts.

Very few newspapers keep a daily index of their papers, and are compelled to depend on

their clipping files to trace facts published in their paper. This involves the filing of a great deal of material of only temporary value which in a few months "clutters up" the files and lessens the value of the permanent material. To avoid this the *Ledger* established a daily index. The records are typewritten on special ruled sheets, and show the month, day, edition, page and column on which each story appeared. At the end of the year the sheets are bound in a loose leaf ledger and serve as a permanent index to the bound files for that particular year. This involves about five hours' work daily, and proves a great time saver.

By doing away with the card index for the clipping and photograph files, and by making the envelopes containing the material serve the same purpose, it was made possible to reduce almost by half the work of filing, and greatly to facilitate the quick collection of material.

For keeping record of books, negatives and cuts, the card file has certain advantages. The cards used for this purpose have special forms, each most suitable to the purpose for which it is intended. This arrangement has worked out wonderfully well and could not be improved upon.

In regard to the system of classification, it was found advantageous to subdivide the material into three main divisions: personal, geographical and general. The personal division has by far the greatest amount of material, fully sixty per cent of the material being in this division. For this five thousand subdivision guides are used. The material is filed strictly alphabetically. When there is a great deal of material on an individual, it is subdivided as required. To illustrate, the subdivisions for President Harding are as follows:

Anecdotes	Masons
Ancestry	Merchant Marine
Anglo-American relations	Messages to Congress
Appointments	Music, favorite
Armor plate trust	Nomination to presidency
Army	Obituary
Boyhood days	Presidential campaign
Cabinet	(addresses arranged chronologically)
Disarmament	Presidency
Election to presidency	Prohibition
Foreign policies	Railroads
Germany	Religious views
Golf	Recreation
Hobbies	Senatorial record
Inaugural	Signature
Ireland	Sketches
Labor	Soldiers' bonus
League of Nations	Summer home
Liberty bonds	Woman suffrage
Tariff	

Roughly estimated, there are at present about two thousand clippings on President Harding. To find some special material by this method is a simple matter. For example, we want a certain statement he made in reference to the Irish question. All that is necessary is to go to the Warren G. Harding division of clippings, run down the alphabet until we come to the "Ireland" envelope. In it will be found clippings containing parts of speeches, interviews, etc., relative to President Harding and the Irish question.

Every time a prominent person in public life delivers an address or gives an interview, the full text is filed and a duplicate is carefully read and clipped. This article may contain statements regarding the League of Nations, the Japanese question, the tariff, and, possibly, a half dozen other vital subjects. In each case the part bearing on that particular subject is filed under that subdivision under the speaker's name.

Material other than personal is filed geographically as far as possible. In this division, the major subdivisions are the countries arranged alphabetically. The system of classification is so standardized that guides are suitable to almost any country or city. As an example let us take England. The classifications read:

Army	Foreign Re-	Parliament
Aviation	lations	Railroads
Bolshevism	Labor	Strikes
Cabinet	Liquor	Tariff
Elections	Lords, House	Treaties
Estates	of	Woman suf-
Finances	Navy	rage

These subjects are subdivided again according to the material; thus, there may be under any one main head as many as fifty subdivisions. When the subjects of national importance have run the alphabet, the cities are arranged alphabetically, and the material on the cities is subdivided something like this:

Apartments	Historic	Population
Art galleries	Hotels	Prisons
Bridges	Industries	Residences
Buildings	Lighting	Schools
Charities	Libraries	Statues
Churches	Monuments	Street cleaning
Clubs	Museum	Street railways
Fires	Newspapers	Streets
Fire department	Parks	Theaters
Gas	Police	Water
		Waterfront, etc

The classification for cities varies according to the material field. For large cities there are more subdivisions than for smaller cities.

For example, there may be material on three hundred different churches. There is an envelope for each church, and these are arranged alphabetically so that there is only one place to look for material on a certain church and one can tell instantly whether there be material on it.

The general division is for material such as cannot be filed according to any geographical point. For instance, some of the subdivisions selected from the A section are: Abdications; absinthe; accidents; acetylene; acidosis; acrobats, famous; actors; actors, Equity Association; adding machines; adenoids; advertising; aeroplanes, *see* aviation; age; agriculture; air.

These, too, are subdivided according to the extent of the material filed; the subdivisions of the heading "alien," for example, being as follows: Arrests, Austrians, deportations, enemies, hoarding of money, passports, population, property, slackers, etc. In some cases there may be as many as thirty subdivisions, the material being constantly re-classified as occasion demands.

The same system of classification is used for clippings, photographs, cuts and negatives. Thus, a person familiar with the clipping files can apply his knowledge to the other branches of the department.

In the *Ledger* morgue there are six persons employed. The head librarian reads and clips newspapers and magazines, supervises the department, interviews visitors and passes judgment on material of doubtful value for filing. The assistant librarian assists with the clipping; marks and classifies the clippings to be filed, answers queries, and gets out material called for by the different departments of the newspaper. The second assistant does all the filing of photographs, cuts, clippings and negatives, assists in looking up material in the files, and waits on the public which comes to the library for information. The night librarian indexes the morning *Public Ledger*, answers queries, and gets out material as wanted by the night staff. There is another indexer who indexes the *Evening Public Ledger*, and handles some of the telephone queries during the daytime. An apprentice keeps record of the material taken out and returned, goes to the different departments of the newspaper and collects material borrowed, strips the photographs from the mounts, enters the captions, dates, etc., and does other mechanical work.

The scope of activities of the *Public Ledger* morgue are broader than that of any similar department in the country. It is responsible for the clipping, photograph, cut, negatives, and advertisement drawing files. It keeps a news

index to two papers, has charge of the reference library, the information bureau, and the exchanges. It handles about three thousand clippings, twelve hundred photographs, five hundred negatives and two hundred drawings weekly. The service calls on the department often reach three hundred daily. The department supplies material to the *Evening Public Ledger*, *Public Ledger*, *Retail Public Ledger*, the *Saturday Evening Post*, *Ladies' Home Journal* and the *Country Gentleman*.

In the files there are at present about eight hundred thousand envelopes of clipping material, of photographs about five hundred thousand, about eighty thousand negatives, and forty thousand cuts. The library consists of about ten thousand volumes. It would be difficult to estimate the value of such a department in money, as most of the material, if lost, could not be replaced.

The morgue is a big factor in modern journalism. The average editor and publisher do not realize this, and often think that almost any one can fill the post of librarian. Then they wonder why they do not get results from a department, the head of which ranks with the file clerks instead of with the editors. At a conservative estimate I should say that every dollar judiciously spent on the morgue will add at least ten to the physical valuation of the newspaper property on the whole.

WANTED—THE UNITED BANKER FOR MARCH 1911

To the Editor of the LIBRARY JOURNAL:

In preparing a bibliography of the published writings and addresses of Dr. Edmund J. James, until recently president of the University of Illinois I have been unable to verify the following reference:

"Education, a function of the nation. . . .
United Banker, Minneapolis. Mar., 1911."

Altho this particular number of the *United Banker*, Minneapolis, was published scarcely ten years ago, I have been unable to locate a file of the periodical in the following libraries: Minneapolis Public, St. Paul Public, Minnesota State Historical Society, University of Minnesota, Chicago Public, John Crerar, New York Public, American Bankers Association, and the Library of Congress.

In case that you, or any of the readers of the LIBRARY JOURNAL, are able to assist me in locating a file of the *United Banker*, containing the number for March, 1911, I should feel very grateful.

J. B. CHILDS.

University of Illinois Library, Urbana, Ill.

Book Appeal of the Indianapolis Public Library

By AMY WINSLOW
Chief of the Publications Division

OWING to the great book shortage, due to increased use of book stock, reduction in the book budget, the inelastic tax situation and the rising costs of all items in library administration, the Indianapolis Public Library found itself so seriously handicapped that service was crippled to an alarming extent. The number of home readers had increased 30% in three years. Consequently the books on the shelves were wearing out rapidly and the greater part of the book fund necessarily was expended for replacements.

Fully aware of the impossibility of obtaining from an economical legislative session a change in the tax law which limits the library income, the determination was reached to appeal directly to the citizens who own and use the library.

The first step was the careful preparation of "Fifty-seven Reasons Why the Indianapolis Public Library Needs Thousands of Books." The list was made up of brief, concise statements of particular needs which were limiting library service. These few examples are typical and indicative of the scope of the "57 Reasons."

"During certain periods of the year, particularly during the winter months, the Library has been wearing out more books than it can buy. Books worn out are naturally those most wanted and most in demand and use. The book collection is consequently becoming rapidly less adequate, useful and interesting. How long could a shoe store, a drug store or even a book store keep up under like conditions?"

"It has been utterly impossible to build up library extension work in outlying parts of the city. As an example, for over a year the Library has been appealed to again and again by delegations to establish a small book station in a certain school in the northwest section of the city. Books are greatly needed and desired in this locality but even a small beginning has been an impossibility.

"In the work with children at community houses and deposit stations the Library is forced to use books which are so dirty and worn that they have been discarded from the regular book collection. This is a pitiable situation. A dirty book has as bad a psychological influence as a dirty room or a dirty street."

Copies of these "57 Reasons" were placed in the hands of every member of the Board of School Commissioners. They carried conviction to the extent of an immediate emergency appropriation of \$10,000, official action guaranteeing future adequate book budgets, and the authorization of a special appeal to the citizens for gifts of both books and funds as a further emergency measure.

It was decided to make in February a concentrated effort to plant in Indianapolis the idea of

library bequests and endowments, at the same time awakening a public realization of the needs of the library and preparing the way for an intensive appeal for gifts of books during the week of March 13 to 19. It was felt that this appeal would not bear immediate results but would start a leaven to work which would mean much for the library in years to come. A Form of Bequest was drawn up after consultation with two or three attorney friends of the library. This was multigraphed and sent out with a circular letter to all lawyers, physicians, clergymen and trust officers in the city. The letter stated urgent library needs and suggested that the enclosed Form of Bequest be used when suitable opportunity offered in presenting the idea of library bequests to Indianapolis citizens.

These letters were followed by circular letters to clubs and various organizations, presenting the library situation and suggesting gifts of books or funds for the purchase of books along their particular lines. To patriotic organizations we presented the need of books for use in Americanization work, to scientific societies we pressed the great need and demand for up-to-date technical books and proceedings of national technical societies, and in letters to women's clubs we emphasized the need for books on every subject covered by study outlines and for children's books for use in schools. The results from these letters have been very gratifying and are still being received.

An article appearing in a recent number of *New York Libraries* entitled "Why Give to Libraries" was adapted to the local situation, multigraphed and distributed with a number of these letters.

Series of articles were carefully prepared for each of the three large newspapers and appeared intermittently during a period of two or three weeks. These dealt separately with various phases of the library's activities and dwelt on the limited service in each of these fields, due solely to lack of books. The first article in the *Indianapolis News* was a half page feature story written by William Herschell and illustrated with pictures of the most seriously handicapped branches. These articles, along with a number of editorials, aroused a great deal of interest and discussion and produced an almost instantaneous response. Gifts of books by the armload began to pour in before March had even arrived. The service rendered by the three large

dailies in the city throught the six weeks or so of concentrated effort on these appeals is almost without parallel. A total of 140 articles appeared, amounting to about 45 columns of regulation newspaper space, or nearly six solid pages, including a few cuts. These figures do not take into account the numerous articles which appeared in community papers, house organs and numerous minor publications. It was impossible to obtain an accurate count of these.

It seemed wisest to concentrate the March campaign for gifts of books in one single week, the week of March 13 to 19. No stone was left unturned to prepare the way for the week of this appeal. This was done by newspaper articles, personal talks, letters and announcements in church bulletins and from pulpits. Circular letters were sent to about sixty Indianapolis publications, including the larger house organs. These asked for co-operation and a small space, if possible, devoted to a statement of library needs. With the most important of these letters were sent copies of the "57 Reasons." These "57 Reasons" achieved a certain amount of local fame and were published serially by one of the large dailies and by one of the smaller community papers. Letters were sent to clergymen asking that they give the library all assistance possible in the way of announcements and personal influence. Copies of the "57 Reasons" were mailed with these letters also.

A regular corps of speakers was organized, including members of the library staff, the Citizens' Library Committee and many good friends of the library. In this way the most prominent literary clubs and business organizations were reached in a personal way. Two organizations volunteered the help of their whole membership, the Junior Chamber of Commerce and the Lions' Club. The Junior Chamber of Commerce sent speakers to a number of business clubs and to some of the moving picture theatres. They also circularized the senior Chamber of Commerce.

One of the most important and influential evidences of outside voluntary assistance was the offer from the Orloff Trio to give for the benefit of the book fund a recital, all proceeds to be used in the purchase of books and a part to be used exclusively for music books. The proceeds from this recital exceeded \$500. Even more important than the financial results was the widespread interest awakened in the library situation. The programs for the concert were printed at a nominal charge by the Printing School of the Arsenal Technical School and carried on the reverse side an emphatic statement of needs and appeal for gifts of books. Practically the only expense involved in the concert

was the charge made for blueprinting the one hundred posters announcing the concert. This item was not large as the work was done at a reduced rate.

Efforts for the week of the appeal were centered on the schools as they are the most strategic points for reaching the whole population. Letters were sent out over the signature of the city superintendent of schools to the principals and teachers in all the school buildings in the city explaining details and urging co-operation. Attractive little circulars were printed in large enough quantities to supply every child, including high school students, with a copy. These circulars stated concretely both what we wanted and what we did not want in the way of books. They were divided into three sections, one addressed to the boys and girls, one to the young people and one to their parents. Members of the library staff went to as many of the school buildings as possible to present the matter in person to the children. They were received with almost uniform enthusiasm and a great show of interest. In a number of instances voluntary cash contributions were made by the children. Talks were made also before a number of the parent-teacher associations. The organizing of the high schools for the campaign was left in the hands of high school principals. Local committees were appointed and each school worked out details to fit the peculiar situation there presented.

The book stores of the city offered splendid support, setting aside table and window displays for books needed by the library and selected by members of the library staff. Advertisements during Book Week urged people to buy books for the library and in three stores a discount of 15% was offered on all books purchased for the library. With the monthly statements from the W. K. Stewart Company were mailed mimeographed copies of the following appeal:

"Your Indianapolis Public Library is facing a serious shortage of books. With a net increase of 30% in the number of library readers in three years, it is embarrassed by a very inadequate book fund and no means of any immediate financial relief in sight.

"In the face of these facts the Library is appealing to the citizens of Indianapolis. During the week of March 13th to 19th the people of the city are to have an opportunity to help remedy this book situation. The Library will recommend books of which it is in desperate need. These will be displayed at W. K. Stewart's during the Library Book Week for the benefit of public-spirited citizens who will buy books for their Public Library.

"Remember March 13th to 19th. Come to W. K. Stewart's and buy books for your Library. They will reach 61,000 library readers. The needs are urgent. Help make your Indianapolis Public Library, the best of its size in the country.

"The Stewart Company's part in this campaign will

be a 15% discount on all books bought for the Public Library."

The Merchants' Association urged their members to assist the library, and as a consequence book collection boxes were placed in six large stores for the reception of books for the library. All publicity in enumerating places where books might be left mentioned these stores, school buildings and all library buildings.

Firms and individuals were generous in their offers of service. Printing was done in several cases without charge, slides for the moving picture theaters were prepared as a contribution to the campaign, the use of the electric motograph and preparation of the sign for it were donated, billboard space and posters were offered gratis, and space on the front of 200 street cars was loaned for the week for display of posters which were printed without cost to the library.

Thru the efforts of the art instructors in the schools about fifty posters were designed by school children and displayed in store windows thruout the city. A beautiful gift bookplate was designed by Frederick Polley, head of the Art Department of the Arsenal Technical School, to be placed in every book given during the campaign. The plate shows a drawing of the Central Library building and is bordered with an adaptation of the carving over the main entrance. This plate served as a great incentive to the children. The idea of having one's name in a library book as the donor aroused the giving instinct to a frenzy.

Cartoonists for two of the newspapers caught the library idea and told in pictures what editorials and library stories had been saying in type. Gaar Williams and Jim Crow achieved front page space in the *News* and *Star*, and Chic Jackson devoted two whole dramas from the life of the Bean family to appeals for books for the library.

THE LITTLE "BOOK HOUSE" FOR RECEIVING COIN

PROTECTED BOX FOR BOOKS ON THE LIBRARY GROUNDS

The following forms of publicity were used during the week of March 13 to 19:

Electric motograph (moving electric sign) over Merchants' Heat and Light building, ran the following appeal for five days: "Your public library desperately needs books. Thousands of them. We appeal to you. Give your own books! Buy new books! Ask your neighbor to give. Tell everybody! It's your library. Help make it the best in the country. Charles E. Rush, Librarian."

Cloth signs on school and library trucks.

Posters on fronts of 200 street cars:

"BOOKS! BOOKS! YOUR PUBLIC LIBRARY NEEDS BOOKS. GIVE YOURS THIS WEEK. MARCH 13-19."

Billboard posters.

Slides shown in 25 moving picture theaters.

Bulletin boards in all library buildings bearing posters relating to the book appeal.

Plainly lettered posters on collection boxes in stores placed there for receiving of books.

Letter from Mayor endorsing the appeal published in the newspapers.

Announcements in church bulletins and from church pulpits.

Large yellow box, with black lettering, at corner of Central Library grounds, for the receiving of books. This had a water-

proof covering and received several hundred books.

Little "Book House" for receipt of pennies and dimes. Titles of children's books were represented in the shingles of the little house and money was dropped in thru the chimney. This little house received over \$50.

Miniature well, with "old oaken bucket," the "bucket for ducats," in Main Delivery Room. This received over \$30.

What were the definite results? Over 32,500 books, more than \$1,250 in cash, remarkable publicity, personal book interest in the library, aroused feeling of public responsibility in support and growth of the library, new friends and patrons, individual book giving habit aroused, bequests of special collections of books (two already received), idea implanted of leaving donations, memorials, and legacies to the library (five memorials received since February), \$10,000 additional emergency book fund from the Board, and official promise of one additional cent for books at next tax levy.

CAMPAIGN BOOK PLATE

The quality of books received has been amazingly good. The percentage of discards is very low and most of the titles received have been such as the library is glad to add to its collection. The high percentage of fiction will do a great deal to relieve the shortage along that line. The books of non-fiction have included

good books of travel, history and biography. Some of the exceptionally good titles given have been: complete works of Hugo, Balzac, Dumas, Voltaire, Plutarch, Irving, Eliot, Carlyle, Kipling and Bret Harte, Harvard Classics, Proceedings of the American Institute of Electrical Engineers, LaFollette's Making of America, English Men of Letters series, Margot Asquith, O'Brien's White Shadows in the South Seas, Esaray's History of Indiana, LaSalle University Extension course on Business Administration, Burton Holmes and Stoddard travel lectures, Thayer's Life of John Hay, etc.

The campaign has "paid" beyond a doubt. To any other library finding itself in a similar situation we recommend the plan. It has aroused a negligible amount of unfavorable criticism, it has cost very little, actual expenditures being less than \$200 in all, and it has more than doubled the goal we set for it, with an extraordinary amount of helpful publicity thrown in for good measure.

Summer Courses in Library Work

NEW HAMPSHIRE SUMMER SCHOOL

THE second annual summer library school and institute conducted jointly by New Hampshire College Library and the Public Library Commission of New Hampshire, will be held at New Hampshire College, Durham, N. H., from July 18th to 29th, 1921. Tuition at this summer school will be free for New Hampshire librarians. For all others a fee of \$10 will be charged.

Among the lecturers at the school will be Frances Hobart, Cataloging and Subject Headings; Mary E. S. Root, Children's Work; Ruth Dudley, Reference Work; Caroline H. Garland, Selection of Books.

Apply for information to Grace E. Kingsland, State Library Commission, Concord, N. H., or Willard P. Lewis, N. H. College Library, Durham, N. H.

WILLARD P. LEWIS.

VERMONT SUMMER SCHOOL

A BRIEF course in library science and methods will be held at the University of Vermont at Burlington August 1-13 under the direction of the Vermont Free Public Library Commission. Frances Hobart and the Commission Secretary Ruth L. Brown, will be instructors, and August 3-5 Clara W. Hunt of Brooklyn will give a course of six lectures on children's literature. Further information may be had by addressing the Library Commission, Montpelier, Vt.

RUTH L. BROWN.

Libraries and Museums

By JOHN COTTON DANA

Librarian, Public Library and Director, Museum Association, Newark, N. J.

1. How Museums Came to be so Deadly Dull

MUSEUMS of art are not made to fill a present need. They are made in obedience to an ancient fashion. The fashion grew up several centuries ago among kings, princes and other masters of men and wealth. Early museums were not made by the common people to supply a want which they felt; and when these common people found that they had, thru taxes, money held in common and at their own disposal thru their elected servants, they decided to use some of it to buy museums for themselves. Unfortunately, no one was at hand to tell them that they would get no pleasure or profit out of the kinds of museums which kings, princes and other masters of people and wealth had constructed; and so, being ruled by precedent or fashion, as were also their rich donors, their important citizen-trustees and their architects, they voted for, or silently approved, spending public money for the old kinds of museums. They cared more to be in the fashion than they did to get something useful and enjoyable.

That is only part of the story. The mastery of people and wealth by a few came on down to modern days. Most of us prefer mastery by another to the irksome task of mastering, and being responsible for, ourselves. The supermen who held and still hold the mastery of men and things inherited the fashion of their predecessors—kings, princes and others; therefore, they copied the old style of museum even when it was their purpose to make it for the people and not for themselves alone.

Museums of science were made of a stupefying dullness to the common man, because those who inspired and directed their construction and management were natural-history enthusiasts and scientists, who loved to observe, collect, name, label and arrange, for themselves; but never gave time, study and thought to the problem of making the objects which interested them inviting and profitable to the average intelligent person. Also, they gave no heed to children, being satisfied with the conventional thought that as the children have schools they need nothing more.

That story of the way deadly dull museums have come to be part of our accepted social equipment is in broad outline only.

One important factor in the process of making them deadly dull has been already hinted at—the stupidity of the rich who knew one type

of museums only—the remote, unvisited and melancholy temple to the dead gods of art and science. This stupidity was the basis of much insistence by givers, and by complaisant trustees of their gifts and, alas! by architects, that the buildings given should be patterned after ancient, dark and uninviting temples to gods, or fortified palaces of princes, also dark.

Another factor that helps make museums of art body-wearying and soul stupefying is the exaltation of the oil painting. To tell whence and how came this exaltation would be too long a story here. It is enough to say that during all our museum-of-art development those at the forefront in that development, rich donors, well-to-do and unimaginative trustees, have assumed that the one thing essential to a museum is a long series of oil paintings, in elaborate gilded frames, hung in sky-lighted rooms. Tho many visit these long series of pretty, colored pictures and enjoy them much as they do our colored Sunday supplements, they do so because they think they ought; and they find those visits wearying to body, brain and eyes; and they carry away from them a minimum of suggestion for making daily life more entertaining and houses, homes, dress and domestic equipment more attractive and enjoyable.

What I mean is this: That the oil painting seems not to help in any discernible degree to make us more interested or intelligent in the application of decoration to daily life; but that the worship of it does seem to help to increase the number and size of soul-and-body-tiring galleries of pictures.

Among the obstacles to the development of museums which shall daily add to the agreeable reactions of all members of the community which supports them, and at the same time be helpful in broadening and enriching life thru the educational work they do, is the all-pervading convention concerning the character and location of museum buildings. This has already been touched on; but needs another word of explanation.

As kings and princes passed away, or became little more than conventions, some of the palaces they had occupied were taken over by the new government, and were turned into museums. This set the fashion of making museum buildings low, usually one story and a basement only, and of Greek or renaissance style.

The ideal museum building to-day, constructed in conformity with the precedent just noted and with the fashion that other precedents have set, is made to look as if it were of one story, with a basement; has skylighted rooms in the roof; is located at such a distance from the center of its city as to discourage visits; is grand and uninviting to the common people and within is elegantly embarrassing to most visitors.

If these preceding brief notes are in the main correct, then they sufficiently explain the average museum's unpopularity. To them should be added a further word as to lack of friendly and helpful relation between the contents of museums and the daily life of the people who maintain them.

Art, as represented by a museum of art, is thought of by museum enthusiasts and by the country at large as peculiar to itself, remote from daily life and quite unrelated to chairs, linoleum, wall-paper, bonnets, shoes and tableware as used by the world outside. This potent convention as to the isolation of art-in-a-museum from all other things has been recently aptly illustrated by the remarks of a museum enthusi-

ast in a talk on art appreciation. The assumptions the writer made were that a knowledge of art and an appreciation of it could be gained only by seeing real art, and that as real art can be seen by the non-wealthy only within the walls of a museum of art, a person who has grown up in a western town or village cannot have either art knowledge or art appreciation!

It would be difficult to add to the impression that remark makes on the thoughtful by discussion of it.

The foregoing brief mention of some of the factors that have made museums remote, unvisited and melancholy, needs modification, of course. Especially does it need mention of the fact that in the past ten or fifteen years much has been done in not a few museums to redeem themselves from the charge of being unused and unattractive. Space does not permit me to note here specific cases. If it is found possible to add other informal papers to this one, the modern movement for making museums attractive and helpful to the commonalty will be described in them at some length.

Salary Reclassification Legislation

THE chances of securing salary reclassification legislation at the present special session of Congress appear to be good. In the pending bills the librarians of the Federal and District of Columbia Libraries occupy favorable positions.

It will be recalled that the Joint Congressional Commission on Reclassification classed librarians with other scientific and technical and professional employes but when it came to the allotment of salaries the existing low pay resulted in placing librarians below other technical people tho it did give them an increase over present salaries. The Library Advisory Wage Committee, after much hard work succeeded in establishing their contention that library salaries should be made comparable with other professional workers. That is where they were placed in the Lehlbach Bill which failed of enactment with the last Congress.

The Reclassification Report with its elaborate qualifications and duties specifications proved too voluminous ever to be enacted into law entire, and the Lehlbach Bill founded on it was likewise considered too detailed to become law without simplification. The bills now before Congress are much briefer and simpler in terms and therefore much more likely to be understood by Congress and enacted into law.

There are two competing measures before Congress. One of these is the Sterling Bill (S. 13) which is based directly upon the Report of

the Joint Commission on Reclassification and the Lehlbach simplification of that report. Senator Sterling is the chairman of the Committee on Civil Service of the Senate. No House counterpart of the Sterling Bill has yet been introduced by Mr. Lehlbach, the chairman of the Committee on Civil Service of the House. It is understood that Mr. Lehlbach will shortly introduce a bill similar to or perhaps identical with the Sterling bill. The competing measure is known as the Wood-Smoot Bill; that is, identical bills have been introduced in the House by Mr. Wood (H.R.2921) and by Senator Smoot in the Senate (S.1079). This bill is also known as the Bureau of Efficiency Bill since it was drafted by that Bureau and provides that that Bureau shall participate in the allocation of individual positions and by regulations keep the measure up to date with changing conditions and the establishment of new services. The Sterling Bill makes the Civil Service Commission the allocating agency and provides that it shall keep the measure up to date.

In so far as these two competing classifications have been applied to existing library staffs they appear to run almost neck and neck in the matter of salaries. If anything the Wood-Smoot Bill is a little more favorable to technical employes, including librarians, than is the Sterling Bill.

The Sterling Bill attempts to classify the civilian positions of the Government for the purpose of the standardization of salaries. It groups employes into eleven main services: professional and scientific, subprofessional, office, messenger, nursing and attending, custodial and janitor, inspectional, police and criminal investigation, fire, skilled trades, and common and specialized labor services. In the professional and scientific and subprofessional services, in which librarians fall, educational and training standards are indicated and grades within the classes are set up.

The Wood-Smoot Bill does not call itself a classification measure but aims to "provide an equitable system for the valuation of the services of civilian employes of the Government." Its framers only claim for it that it is a revision and extension up and down of the long existing salary grades of the Government, that is clerks of class 1, \$1200; 2, \$1400; 3, \$1600; and 4, \$1800. The bill itself specifically enumerates and describes certain types of employments and fits them into its eighteen salary grades and provides that all other types and grades of employment shall be fitted into these grades by following the analogies already laid down.

The salary features of the two bills can perhaps best be shown by the tentative allocations that have been made of certain existing professional library positions in accordance with the two classifications:

Grades	Sterling	Grades	Wood Smoot
Sub-Professional			
2	\$1080-1320	5	\$1140-1500
3	1440-1800	7	1500-1860
Professional and Scientific			
1 (Junior professional)	1800-2160	9	1860-2400
2 (Assistant professional)	2340-2880	11	2460-3000
3 (Assoc. ")	3120-3840	13	3000-3600
4 (Full ")	4140-5040	15	3600-4500
5 (Senior ")	5400-6000	16	4500-5700
6 (Chief ")	6000-7200	17	5700-7500

In the Senate after a long contest between those who proposed that all classification measures should be referred to the Committee on Civil Service and those who contended that all such bills should go to the Appropriations Committee, finally a compromise was effected by which both bills have gone to the Committee on Civil Service for consideration and report, presumably as to their legislative features, and are later to go to the Committee on Appropriations for consideration and report "on the matter of salaries provided for in such bills." That is, the bills in order finally to be passed upon by the Senate require favorable report by both these committees. Those who have for so long been

working for some reclassification legislation are hopeful that these two committees will get together without undue delay.

GEORGE F. BOWERMAN.

Libraries in Education

A committee consisting of: J. I. Wyer, director of New York State Library, Chairman; Walter Brown, librarian of Buffalo Public Library; Annie S. Cutter, Public Library, Cleveland, Ohio; Lucile F. Fargo, librarian of North Central High School, Spokane, Wash.; H. A. Hollister, high school visitor, University of Illinois; Florence M. Hopkins, librarian, Central High School, Detroit, Mich.; Willis H. Kerr, librarian, State Normal School, Emporia, Kan.; C. G. Leland, superintendent of libraries, Dept. of Education, New York City; O. S. Rice, supervisor of school libraries for Wisconsin; Mary C. Richardson, librarian, State Normal School, Genesee, N. Y.; Alice Tyler, director, library school, Western Reserve University, Cleveland, Ohio; Harriet A. Wood, supervisor of schools and public libraries for Minnesota; Adeline B. Zachert, director of school libraries for Pennsylvania, recommends for adoption by the Library Department of the National Education Association at the Des Moines meeting the following resolution:

1. All pupils in both elementary and secondary schools should have ready access to books to the end that they may be trained (a) to love to read that which is worth while; (b) to supplement their school studies by the use of books other than text-books; (c) to use reference books easily and effectively; (d) to use intelligently both the school library and the public library.

2. Every secondary school should have a trained librarian, and every elementary school should have trained library service.

3. Trained librarians should have the same status as teachers or heads of departments of equal training and experience.

4. Every school that provides training for teachers should require a course in the use of books and libraries, and a course on the best literature for children.

5. Every state should provide for the supervision of school libraries and for the certification of school librarians.

6. The public library should be recognized as a necessary part of public instruction, and should be as liberally supported by tax as are the public schools, and for the same reasons.

7. The school system that does not make liberal provision for training in the use of libraries, fails to do its full duty in the way of revealing to all future citizens the opportunity to know and to use the resources of the public library as a means of education.

Library Salaries

IN their work among colleges and vocational directors some of the members of the A. L. A. Committee on Recruiting for Library Service have found that considerable misapprehension is current regarding library salaries. Those who have to do with advising college students as to choice of work frequently lack information on this point and believe salaries to be lower than they actually are. To help correct this impression Mr. Jennings, chairman of the Committee, suggested that data as to the salaries of recent graduates be secured from the library schools. The schools holding membership in the Association of American Library Schools were addressed with this in view. Nine responded, giving figures based on reports from 414 former students. Altho no figures of this kind can be absolutely complete, it is believed that such omissions as might affect the average in either direction would roughly balance each other, and that the averages are definitely significant as to what may be expected by persons who contemplate entering library work after attending a library school.

The results of the inquiry are as follows:

Report on average of present salaries of workers with library school training, who have left library school and gone into the field in and since June, 1918.

(a) Workers who have spent one year in library school:

1. Those taking positions 1918 (114 reporting), \$1422.
2. Those taking positions 1919 (87 reporting), \$1381.
3. Those taking positions 1920 (125 reporting), \$1327.

(b) Workers who have spent two years in library school:

1. Those taking positions 1918 (40 reporting), \$1742.
2. Those taking positions 1919 (19 reporting), \$1694.
3. Those taking positions 1920 (29 reporting), \$1676.

ERNEST J. REECE (*For the Committee*).

Private Control of the "Compendium"

To the Editor of the LIBRARY JOURNAL:

Librarians familiar with those invaluable guides to current national legislation known as the Compendium publications should unite in an effort to determine what is behind the sudden discontinuance of this excellent public document, and its transfer to private control. A notice recently received from the editor, W. Ray Loomis, who issued the publication from

the Document Room of the House of Representatives, informs us that with the close of the 66th Congress "it will be necessary to abolish the free mailing list . . . the new policy being to print a very limited edition for the personal use of Members of Congress only."

An inquiry, couched in terms of a protest, brought an unsigned typewritten communication suggesting that we "write to Miss Myrta B. Goodman, care National Bureau of Public Information, 405 Pope Building, Washington, D. C.," who is said to be "making arrangements to distribute the publications during the 67th Congress."

Miss Goodman replied to our letter with great promptness, giving a subscription price list of \$22.50 for the weekly and monthly Compendium together, or \$11.50 for either one separately; also for a card index service at \$150 per session, this price to include the Compendium.

Further information from colleagues nearer to the scene of action produced the significant comment from one of them, *inter alia*, that he hesitated to speak of the matter because he feared that most of his language "would be of the kind made famous by Gen. Dawes of Chicago!"

Miss Goodman writes as secretary of the aforementioned National Bureau of Public Information, on letterheads of that concern, and encloses a booklet describing the service offered. No list of officers or organizers is given. Who is behind this scheme which transforms a useful and much needed government medium for the dissemination of official news into a private "good thing"? Can the A. L. A. Committee on Public Documents find out?

CARL B. RODEN, *Librarian.*

Chicago Public Library.

Books Offered for Sale by the U. S. Navy

The Navy Department has offered 80,000 books for sale under the heading "Surplus Navy Books." These books, however, do not include volumes donated or transferred by the American Library Association for use in Naval Libraries. They do include books bought during the war in larger quantities than will be needed in peace times. Certain titles were purchased for which there was a great demand during the war but for which there is little demand at present. Altho the books selected for sale are not considered essential for naval libraries, yet many of the volumes are believed to be of value for public libraries with a more varied type of readers.

CHARLES H. BROWN.

THE LIBRARY JOURNAL

TWICE-A-MONTH

MAY 15, 1921

THE arrangements for the A. L. A. Conference at Swampscott are fast shaping themselves, and the New Ocean House already records several hundred applications for accommodation. This hotel will itself house between seven and eight hundred, but nearly double that number can be provided for in the immediate neighborhood, in many cases at substantially lower rates than those of the hotels, so that no one need stay away for fear of camping out on the beach. The tentative program which we give in this number offers material for every taste. There will be a wonderful day's trip which includes a visit to Harvard University and historic Cambridge, a ride along the Paul Revere Road to Lexington and Concord, and a reception at the Boston Public Library in the evening. This should in itself entice many, especially from the West, who otherwise might not be tempted to make the journey. Supplemented, after the Sunday rest, by a journey to historic Plymouth in the year of the celebration of the tercentenary and later by the post-conference excursion thru the White Mountains, the call to Swampscott might seem almost irresistible to those whose purses can possibly permit the expenditure which the H. C. L. in transportation and hotel charges still requires.

★ ★ ★ ★ ★ ★ ★

THE bi-state meeting at Atlantic City was especially notable this year for the excellent session of the American Library Institute, with the best program it has yet offered. This was made a meeting for all present, and the question whether the Institute has special reason for continuing existence was again raised by the facts that the papers were such as would naturally be read at a meeting of the Council or the A. L. A. and that the members of the Institute had not manifested sufficient interest in the organization to cast the votes necessary for the re-election of members and the admission of new members. The Constitution of the Institute requires the vote of three-fourths of the membership in order to elect. The Atlantic City meetings, Library Week in New York State, the Pacific North-West and other group meetings have their chief value, however, in the opportunities for conversation and consultation which they offer, in contrast with those at the larger

meetings of the A. L. A. The usefulness of these is illustrated by the fact brought out in Miss Zachert's entertaining and informing talk as to her work of library organization in the Virgin Islands, for she mentioned that she walked out of the meeting room at Atlantic City straight into the work at St. Thomas and St. Croix thru a talk with Miss Webster at that meeting. As a result, the library limits of the United States have been extended to cover its latest acquisition, and that in the most effective manner possible.

★ ★ ★ ★ ★ ★ ★

DR. WILLIAMSON'S project of "psychographs" for use in the choice of library personnel opened up a subject which is not new, but has new light thrown upon it by the modern scientific method. To fit together the work and the worker is, of course, the aim of all employers, and the scientific method contemplates a "work description" of the "job" and a psychograph of the candidate which are to fit the one upon the other, like the lid upon the kettle. The old-fashioned method of personal approach can never be ignored, to be sure, for the personal equation is always a factor of first importance, and this is better estimated face to face than by any written device. But the one method needs to be supplemented by the other, and Dr. Williamson's proposed questionnaire will afford an excellent basis for working out a most useful plan, if librarians will do him the favor and themselves the justice of answering his questionnaire. We have often had regretful occasion to point out that librarians, who should be foremost, are among the most backward in answering questionnaires, and we hope that this case may prove an exception to the rule.

★ ★ ★ ★ ★ ★ ★

A REPORT to the Michigan legislature by a commission headed by W. H. Allen of the Bureau of Municipal Research, New York City, proposes that the library system thruout the State should be put both centrally and locally in the control of the school authorities, in the interests of economy and efficiency. The report makes the singular mistake of saying that the State Library is under the Board of Library Commissioners, whereas it is the general library

organization thruout the state which is meant. The same proposal has been up in California, as well as in some other states, and results from the general trend toward concentrating authority in the hands of a few state departments, an authority often scattered among multifarious and confusing divisions. Of course, in states where this change is in process, as well as in the commission government of cities, it is proper that the library system should be affiliated with the department of education or the school system, rather than with some other with which it has no relation whatever. But while there may properly be such affiliation, this plan should not mean that the library system should actually be administered by the school authorities, as is proposed in the Michigan report, a scheme which has been adversely reported upon in California, altho efforts in that direction are still on foot. In New York State the State library takes the

place of a library commission, as is also true in California, in having jurisdiction thruout the state; but the library department in the hands of the State librarian of New York, once he is appointed by the Board of Regents of the Department of Education, has been always kept a separate organization, and its efficiency has depended upon that fact. School authorities cannot be depended upon to accept and emphasize the value of libraries, and there are still notorious examples, as under the New York school district library scheme of the last century, where considerable expenditures for libraries came to nothing because they were made under school authorities. It is not merely professional protest that opposes absorption of libraries in the school system, but practical experience, which has shown that economy and efficiency do not lie in that direction.

LIBRARY ORGANIZATIONS

Conferences at Swampscott

CONFERENCE Week will be Monday, June 20th, to Saturday, June 25th, and sight seeing trips are planned for such visitors as can remain until Monday the 27th.

The Associations meeting during the week are:

American Library Association—Forty-third annual conference.

National Association of State Librarians—Twenty-fourth annual meeting.

American Association of Law Librarians—Sixteenth annual meeting.

THE NEW OCEAN HOUSE—THE HEADQUARTERS OF THE SWAMPSCOTT CONFERENCES

League of Library Commissions.
 Special Libraries Association—Twelfth annual convention.
 Bibliographical Society of America.
 Association of American Library Schools.
 Library Workers Association—Second annual meeting.

TRAVEL, RESERVATIONS, AND POST-CONFERENCE TRIP

For announcements see LIBRARY JOURNAL for April 1, p. 361-318 and:

AUTOMOBILE ROUTES TO SWAMPSCOTT

In an attempt to keep pace with the changing times, information will be collected as to various routes and various road conditions between New York, Philadelphia, Baltimore, Washington and Swampscott. The information will be based on reports made to the American Automobile Association June 1st. Anyone desiring to travel by automobile from New York and points south to Swampscott can obtain information of the various routes, road conditions, detours, etc., by applying to Charles H. Brown, Sixth Division, Navy Department, Washington, after June 1st.

EXHIBITS

The Sub-Committee, on Popular Use of Documents is planning an interesting exhibit showing how public documents are being used in some important libraries and suggesting many uses for them not ordinarily considered.

The Committee on Institutional Libraries will have an exhibit on hospital Libraries. A hospital book wagon will be one of the features.

An exhibit of books, pamphlets, etc., of interest to those concerned with library co-operation between the United States and the Hispanic countries is being prepared by Dr. Peter H. Goldsmith, director, Inter-America Division of the American Association for International Conciliation.

Other exhibits will be made by library supply houses, publishers, etc.

SPECIAL FEATURES

Arrangements are about concluded for the presentation of a cinema of the library work being done under the direction of Miss Jessie Carson in the devastated regions of France.

Among the distinguished visitors to the Conference for at least part of the week will be the Book Caravan—under the direction of Miss Bertha E. Mahony.

A special service for members of the A. L. A. will be held at Trinity Church, Copley Square, Boston, on Sunday morning, June 26th, at 11 o'clock, and a special sermon preached by Dr. Alexander Mann, rector of the Church, and president of the Board of Trustees of the Boston Public Library.

The Managers of the Old South Association in Boston at a recent meeting voted to invite the members of the American Library Association attending the convention at Swampscott to come to the Meeting House, and voted to admit them on presentation of their official A. L. A. badges.

For Thursday, June 23, no meetings are scheduled, that day being left free for an all-day outing which will include Lexington, Concord, Cambridge and Harvard University. In the evening there will be a reception and literary entertainment at the Boston Public Library, when Mayor Peters, Amy Lowell, Joseph Lincoln and Robert Frost will speak or read from their works.

REGISTRATION

ADVANCE ATTENDANCE REGISTER

The advance attendance register will include the names of all who write to the A. L. A., care New Ocean House, for hotel rooms, or to the Lynn Public Library, for rooms in private houses. Others who are expecting to attend, even for one session, are requested to send their names, library connections and conference addresses to F. W. Faxon, 83 Francis street, Boston, in order that their names may also be included in this printed list. The list will be sent to the printer about June 15.

REGISTRATION ON ARRIVAL

All persons attending the Conference are requested to register immediately on arrival, at A. L. A. Headquarters, in the lobby of the New Ocean House. Your friends will be inquiring about you and it will be impossible for the office to answer the inquires until your name is entered on the lists of those present.

LIBRARY SCHOOL DINNERS

Friday evening, June 24

Officers of the alumni association should deal with the hotel management in making arrangements for these dinners.

INFORMATION SERVICE

The local committee, appointed to provide information service at the Swampscott convention, the week of June 20th, aims to cover a wide range of needs—beyond the routine of questions regarding session programs, excursions, etc., and changes therein—and to make special effort to respond to the more personal requests. Many people go to conventions hoping for light on some particular topic or for opportunity to exchange ideas on subjects in which they are qualified; only to return disappointed that the convention has lacked a clearing house of what's what and who's who. But it is just such a clearing house that our committee should furnish; and with this in view there will be forms to fill out for information desired, also for special in-

formation for which one is ready to stand sponsor. The committee will also be glad to receive communications in advance, which may be sent to: Information Committee, Swampscott Convention; c/o Boston Public Library, Copley Square, Boston, Mass.

G. W. LEE,

Chairman, Local Committee on Information.

AMERICAN LIBRARY ASSOCIATION

EXECUTIVE BOARD

Monday afternoon, June 20

COUNCIL MEETINGS

(Open to all members of A. L. A.)

First Session, Tuesday evening, June 21

Subject: Library Revenues.

Effect of recent legislation on library revenues—William F. Yust.

What legislation can and what it can not do.

What legislation has proved most effective in producing an adequate revenue—Frederick C. Hicks.

Should public library boards have the power to levy the library tax?

Affirmative—William J. Hamilton.

Negative—

Results of Ontario tax law—W. O. Carson.

How such a law would affect some of our libraries—Samuel H. Ranck.

Council Business.

Second Session, Saturday afternoon, June 25

Subject: Recruiting for library service.

Discussion opened by members of the Committee on recruiting—Judson T. Jennings, Chairman.

Subject: What books should public libraries exclude?

Subject: How A. L. A. Committees work. Discussion opened by C. B. Roden.

Third Session, Saturday evening, June 25

A short meeting will be held immediately following the last General Session if there is business to come before the Council.

AGRICULTURAL LIBRARIES SECTION

Tuesday evening, June 21

The contribution of librarians to agricultural research—Eunice R. Oberly, librarian, Bureau of Plant Industry, Washington, D. C.

A study of agricultural library buildings of various types—W. M. Hepburn, librarian, Purdue University.

Agricultural publications of Canada—Jacquetta Gardiner, librarian, Ontario Agricultural College, Guelph.

Official agricultural publications of Latin-America. Prepared under the direction of L. S. Rowe, director-general, Pan-American Union, Washington, D. C.

CATALOG SECTION

First Session, Tuesday afternoon, June 21

(Persons interested in training are urged to attend this session).

General topic: The catalog situation—What has become of the cataloger?

The objects of cataloging—Archibald Cary Coolidge, director, Harvard University Library.

Adventures among catalogs—Louise Fargo Brown, associate professor of history, Vassar College.

Making the dry side of cataloging interesting—Frances Rathbone Coe, head, catalog department, Massachusetts State Library.

Discussion. Among the speakers will be Charles A. Martel of the Library of Congress, Margaret Mann of the United Engineering Societies Library, New York, Anna M. Monrad of Yale University Library, Adam Strohm of Detroit, and directors and instructors from the library schools.

Second Session, Wednesday afternoon, June 22

How the Library of Congress classification works out in a public library—Jennie T. Jennings, assistant librarian, St. Paul, (Minn.) Public Library.

“Refractory material:” a symposium on methods of dealing with (but not cataloging of) music, pamphlets, maps, documents, Great War material, “easy books,” school duplicates, etc. This will include a paper on “Refractory and unusual material in the Harvard Wendell collection,” by Clara P. Briggs of Harvard College Library.

Short cuts in cataloging—Henry B. Van Hoesen, assistant librarian, Princeton University Library.

CHILDREN'S LIBRARIANS SECTION

First Session, Tuesday afternoon, June 21

Children's book week: A national movement—Frederic G. Melcher, executive secretary, American Association of Book Publishers.

A librarian's point of view—Clara W. Hunt, Brooklyn Public Library.

A book-seller's point of view—Bertha E. Mahony, Bookshop for Boys and Girls, Boston.

Report book production committee—Alice M. Jordan, Boston Public Library.

Second Session, Wednesday afternoon, June 22

The Children's librarian of to-day and tomorrow—Effe L. Power, Cleveland Public Library.

Following Miss Power's paper, there will be a discussion of everyday problems such as the book reviews, the project problem and reserve books, story-hours and clubs, staff recruiting, staff meetings, recreation for staff, attendance at the A. L. A.

COLLEGE AND REFERENCE SECTION

Friday afternoon, June 24

Preparation of reference lists—R. J. Usher, John Crerar Library, and Walter L. Brown of Buffalo.

Co-operation of University libraries in purchase of material—James T. Gerould of Princeton, *et al.*

The present status of foreign bookbuying—M. L. Raney, Johns Hopkins University Library, *et al.*

Co-operation in genealogical work—Agnes C. Doyle, Boston, *et al.*

LENDING SECTION

Saturday afternoon, June 25

Staff unity through leadership: how to meet work, fellow workers and the public—Louise Prouty, librarian, Main Library, Cleveland Public Library.

Can librarians read?—Mary Prescott Parsons, librarian, Morristown, (N. J.) Public Library.

Round table: Perennial Circulation Problems. Book losses and recovery—Marcia M. Furnas, chief, delivery department, Indianapolis Public Library.

Circulation short cuts—Grace B. Finney, chief, circulation department, Public Library of the District of Columbia.

Where is my borrower's card?—Helen M. Ward, chief of circulation, Detroit Public Library.

When is my book due?—Mrs. Jessie Sargent McNiece, chief, circulation department, St. Louis Public Library.

PUBLIC DOCUMENTS ROUND TABLE

First Session, Wednesday morning, June 22

Subject: Popular use of Documents in Libraries.

Report of sub-committee, Jessie M. Woodford, chairman.

Discussion.

Second Session, Saturday afternoon June 25

Supplementary report on popular use of documents, based on the discussion at the first session.

The new printing bill.

PROFESSIONAL TRAINING SECTION

Friday afternoon, June 24

(Joint Session with the Association of American Library Schools.)

The practical work assignments of library school students—C. C. Williamson, chief of economics division, New York Public Library.

Statement regarding the work of the Association of American Library Schools—Josephine A. Rathbone, president.

Report of the work of the A. L. A. Committee on library training—Malcolm G. Wyer, chairman.

Reports on new features of training by representatives of various library schools and training classes.

Election of Officers.

SCHOOL LIBRARIES SECTION

First Session, Tuesday evening, June 21

Topic: The school librarian.

The school librarian as an administrator—15 minutes.

What the school expects of the school librarian—15 minutes each.

Sherman Williams, state supervisor of school libraries, New York state.

(One other to be announced.)

Walter D. Hood, principal, Gilbert School, Winsted, Conn.

The relation of the college of education to the training of the school librarian. 30 minutes

—Marion Horton, principal, library school of the Los Angeles Public Library.

Second Session, Wednesday morning, June 22

Normal and Elementary Schools.

Topic: Instruction in the use of books.

Work with books in the modern school.

Demonstration lesson in teaching the use of books.

Discussion and question box.

High Schools

Third Session, Saturday afternoon, June 25

In charge of New England Association of School Libraries.

Teaching the use of the library.

How the school library can help in vocational work.

The librarian points the way. Jesse B. Davis, supervisor of secondary education, Hartford, Conn.

Our most pressing need. Adeline B. Zachert, director of school libraries for Pennsylvania.

TRUSTEES SECTION

Friday evening, June 24

Several prominent trustees are being asked to make short talks and there will be ample opportunity for informal discussion.

The Committee on pensions and benefits will make its report. It is composed of Mrs. Ora Thompson of Rensselaer, Ind., Mrs. C. Henry Smith of Boulder, Colo., and S. J. Carter of Milwaukee, Wis.

Every library trustee who expects to attend the Conference is earnestly requested to communicate with the chairman of the section, Frank Hervey Pettingell, Los Angeles Stock Exchange, Los Angeles, Calif.

LIBRARIES OF RELIGION AND THEOLOGY ROUND TABLE

Friday evening, June 24

Subject: Religious books in public libraries.

The church and the public library—Arthur E. Bostwick, librarian, St. Louis Public Library.
 The use of religious books in a library which serves both college and town—Azariah Root, librarian, Oberlin College Library.
 The need of adequate representation of religious thought in the public library.
 The service which the public library can render to religious education.

HOSPITAL LIBRARIANS

A "get-together" meeting is being planned. All hospital librarians and those especially interested in hospital libraries who expect to attend the conference are requested to notify E. Kathleen Jones, Massachusetts State Board of Education, Division of Public Libraries, State House, Boston.

LIBRARY BUILDINGS ROUND TABLE

Tuesday afternoon, June 21

A round table discussion on library buildings will probably be held at Swampscott on Tuesday afternoon, June 21. All who are interested in attending such a conference should communicate with Willis K. Stetson, librarian, public library, New Haven, Conn.

GENERAL SESSIONS

The hours arranged for the general sessions are here given. Full program in our next issue.

First. Monday evening, June 20

Dallas Lore Sharp will speak on "The Prophet and the Poet."

Second. Tuesday morning, June 21

The President will give her address.

Third. Tuesday evening, June 21

Judge H. M. Towner (of Smith-Towner Bill fame) will speak on "Libraries and the Nation."

Fourth. Friday morning, June 24

Joint meeting with the S. L. A. Subject: Cooperation between Public and Special Libraries.

Fifth. Saturday morning, June 25

Joint meeting with League of Library Commissions. K. L. Butterfield, president of the Massachusetts Agricultural College at Amherst, will speak on "Rural Libraries and Rural Life."

Sixth. Saturday evening, June 25

To-day's Tendencies in Book Publishing and Distribution. Speakers: Frederic G. Melcher, Macgregor Jenks and Glenn Frank.

AMERICAN ASSOCIATION OF LAW LIBRARIES

First Session, Tuesday afternoon, June 21

Address of welcome—Sumner Y. Wheeler, secretary, Essex Bar Association.

President's address.

Committee reports: Committee on new members; Committee on index to legal periodicals;

Committee on amendment of the constitution; Committee on check list of bar association reports; Joint Committee on national legislative information service; Committee on A. A. L. L. dinner.

Appointment of committees.

Second Session, Wednesday morning June 22
 The county law library system in Massachusetts—Howard L. Stebbins, librarian, Social Law Library, Boston.

John Himes Arnold—Edward B. Adams, librarian, Harvard Law School.

Appreciation of Alexander H. R. Fraser—E. E. Willever, librarian, Cornell University Law School.

The Bibliography of naval and military law—Arthur C. Pulling, librarian, University of Minnesota Law School.

Third Session, Friday afternoon, June 24

(Joint Session with National Association of State Libraries.)

Developments in state libraries—George S. Godard, state librarian, Connecticut.

Historical sketch of American legal periodicals—Henry E. Dunnack, state librarian, Maine.

Fourth Session, Friday evening, June 24

Present problems of law publishing—Burdett A. Rich, Lawyers Co-operative Publishing Company.

Famous and curious wills—Mrs. Gladys Judd Day, librarian, Hartford Bar Library, Hartford, Conn.

Report of treasurer.

Report of auditing committee.

Election of officers.

Annual Dinner

The annual dinner of the Association will be held at 6:30 p. m. on Friday, June 24.

SPECIAL LIBRARIES ASSOCIATION

THE twelfth annual convention of the Special Libraries Association will be held June 20-25.

The program will include three general sessions, three group meetings, and one joint session with the American Library Association. The special meeting to discuss the work of local special library associations will take place during the first half of the third group meeting. There will be no separate meetings of different business groups; the Financial group, the Street Railway group, the Government libraries group, and others will discuss their problems together at the three group meetings.

There will be no regular sessions on Thursday, June 23, this day being left free for visits to local points of interest.

GENERAL SESSIONS

*First General Session. Tuesday afternoon,
June 21*

General subject: "How Business and Technical Executives Obtain Information," will be taken up immediately after a short business session. Speakers: Leroy D. Peavey, vice-president, Babson Statistical Organization, Wellesley Hills, Mass.; Daniel N. Handy, librarian, Insurance Library of Boston, Boston, Mass. One speaker to be announced.

*Second General Session. Wednesday morning,
June 22*

Subject: The Practical Value of Special Library Information." Speakers: Frederick L. Hoffman, third vice-president and statistician, Prudential Insurance Company of America, Newark, N. J.; F. E. Barrows, of Pennie, Davis, Marvin and Edmonds, New York City; Mrs. Jeanne B. Foster, Librarian, Kuhn, Loeb and Company, New York City.

*Third General Session. Friday afternoon,
June 24*

Subject: "Business and Technical Information via the Special Library." Speakers: Francis H. Sisson, vice-president, Guaranty Trust Company, New York City; H. V. Coes, Engineering Staff of Ford, Bacon and Davis, New York City. One speaker to be announced.

*Joint S. L. A.-A. L. A. Session, Friday morning,
June 24*

Subject: "Co-operation between Public and Special Libraries." The Presidents of the two associations will preside and the speakers will be: Charles F. D. Belden; June R. Donnelly; and other speakers to be announced.

GROUP MEETINGS

The first group meeting, on the evening of Tuesday, June 21, will have for general topic: "Obtaining Information for the Special Library" and will be given over to five-minute talks and round-table discussion of ways and means to discover specialized sources and the salvaging of special library data therefrom. Group Chairman: Lewis A. Armistead. Discussion Leaders: Elsie L. Baechtold J. B. Carson, Adelaide R. Hasse, Maud A. Carabin, Helen E. Hemphill and Edward H. Redstone.

The second group meeting on Wednesday afternoon, June 22, will be devoted to ways and means of "Organizing Special Library Data," covering Filing, Classification Systems, Research Methods, Office Forms, etc. Group Chairman George Winthrop Lee. Discussion Leaders: Helen M. Rankin, M. Burnett, Louise Keller, M. C. Wells, Estelle L. Liebmann, and Wayne D. Heydecker and Guy Marion.

The third group meeting, on Friday evening, June 24, will have two parts.

First half. Subject: "Organizing the Community's Special Library Service." Speakers: Rebecca B. Rankin, president, New York Special Libraries Association; Bertha V. Hartzell, president, Boston Special Libraries Association; Helen M. Rankin, secretary-treasurer, Special Libraries Council of Philadelphia; Alta B. Claffin, president, Cleveland Club of Special Librarians; W. G. Barnstead, first vice-president, Canadian Association of Record Officers, Toronto, Canada.

The second half of the meeting, continuing the plan of previous group meetings, will be devoted to the subject: "Selling Special Library Service." Group Chairman Mary B. Day, will preside. Discussion Leaders: Miss E. M. Taylor, M. Reynolds, M. L. Alexander, Ethel Cleland, E. R. Oberly, L. R. Gibbs, Alice Rose and J. H. Friedel, Ralph L. Power.

LIBRARY WORKERS ASSOCIATION

Friday evening, June 24

The program for the meeting of the Library Workers Association is not yet complete. It is expected that the main topics will be the correlation of library courses and standards in libraries, probably discussed from the point of view of the library school, the librarian and the assistant. Besides this there will be reports of the work and discussion of the plans for the coming year.

LEAGUE OF LIBRARY COMMISSIONS

First Session. Friday afternoon. June 24

Program to be announced.

Second Session. Saturday morning. June 25

Joint meeting with the A. L. A. See p. 464.

NATIONAL ASSOCIATION OF STATE LIBRARIES

First Session, Tuesday evening, June 21

Public and school libraries of small towns and consolidated schools—W. F. Marshall, Mississippi.

Committee reports, etc.

Second Session, Wednesday afternoon, June 22

State libraries having archives departments—Herbert O. Brigham, Rhode Island.

Election of officers, etc.

Third Session, Friday afternoon, June 24

(Joint meeting with American Association of Law Libraries.)

For program see page 464.

BIBLIOGRAPHICAL SOCIETY OF AMERICA

Use of the photocopying machines in American libraries, as aids to bibliographical research and for other purposes.

Questionnaires now being collected by George W. Cole.

The Atlantic City Meeting

The twenty-fifth annual meeting of the New Jersey Library Association and the Pennsylvania Library Club was held at the Hotel Chelsea, April 29th and 30th. In addition to two programs arranged by the New Jersey Library Association, one by the Pennsylvania Library Club, and a joint session of these two, the American Library Institute had an open meeting and there were conferences of the New Jersey School Librarians' Association and of other groups.

AMERICAN LIBRARY INSTITUTE

A MEETING of the American Library Institute was held on Friday, April 29th, at the Hotel Chelsea, Atlantic City, at ten o'clock, Ernest C. Richardson acting as Chairman. The meeting was well attended, having, in addition to the Fellows of the Institute, many members of the other library organizations meeting at Atlantic City at the same time.

After the usual routine of business a letter was read from the National Dante Committee, asking the help of the Institute in giving prominence to Dante books and Dante material thruout the year in view of the six hundredth anniversary of the death of the poet. The Institute voted to pass on the letter to the succeeding meetings of the joint conference, and to ask the National Dante Committee to publish its appeal in the LIBRARY JOURNAL and in *Public Libraries*.

President Carlton, who is in Paris, cabled his greetings to the Institute, and sent as his Presidential Address "Notes on the American Library in Paris, Inc.," of which he is librarian. The paper gave a summary of the principal facts regarding the library, showing its constitution, its direction, and its use by the public. The paper went on to show the value of the Library as an outpost of the American Library Association, and as a medium for the cultivation of cordial relations between the United States and Europe. Dr. Carlton ended with suggestions for the future development of the Library and the hope that it would be possible to make the institution permanent.

Arthur E. Bostwick sent a paper on "An Old New-England Method of Book Distribution," giving an interesting account of the sale of the use of books for a stated period by auction, as he knew it in Litchfield, Connecticut, where it was used by the Litchfield Circulating Library from its foundation in 1870 until about 1880. Mr. Bostwick said that it was years after his graduation from college that he learned that this auction-system of book-distribution was anything more than a clever local idea. Then

Mr. Marrion Willcox, a New York journalist and literary man, told him that he had been familiar with it in his boyhood in Putnam, Connecticut. Mr. Bostwick said that there was something in that kind of book meeting that we do not get nowadays in our libraries, but he saw no reason why public meetings, in which library books are displayed and discussed and an opportunity is offered to those present to take them directly from the gathering to their homes for reading, should not reproduce some of its desirable features. He added that the St. Louis Public Library was now holding a series of weekly meetings of this kind, conducted by different members of the staff who have volunteered for the purpose. In the discussion Mr. Bowker recalled the trade sales carried on by the Bangs and by Mr. Leavitt, and the retail auctions carried on by the father of Mrs. McDevitt-Wilson, who was particularly successful.

Henry B. Van Hoesen of Princeton read a paper entitled: "Bibliographical Catalog and Short-Title Catalog," the object of which was not a comprehensive definition of catalog, but a rough definition or distinction of two kinds of library catalog; the one "a list, register or complete enumeration in systematic arrangement, with addition of brief particulars aiding identification and location;" the other, descriptive. Dr. Van Hoesen indicated the lines to be taken by a code of short catalog rules, following the usual outline: (1) Author and heading; (2) Title; (3) Imprint; (4) Collation and series note; (5) Contents; (6) Notes; (7) Added entries, analytical entries and references. He said that the choice between the two methods of cataloging will depend on practical considerations of use. One fundamental consideration is the relation of cataloging to bibliography. His own judgment on a questionnaire which he had sent out was that the users of a university library may be divided into staff, faculty, students, and general readers, altho all, to a certain extent, belong to the last class. The staff, with the exception of the Circulation Department, will use the bibliographical part of the cards. The professors, in his experience, will not, but come only for definite books, or even wish to disregard the card catalog altogether (not specifically the Princeton card catalog, but any catalog) and go to a class of books on the shelves. The students who come in search of books to which they have been referred by the professors, or at other times, are part of the last class, the general reader. General readers generally have recourse to the reference librarian for all sorts of information; the fullest catalog cannot hope to be his equal; and "short" may fairly ask whether it cannot be expected to do the extra work of

a "full" catalog. There was a very interesting discussion of this paper, both in print, as a preprint, and orally.

Charles C. Williamson's paper on "Personnel Specifications for Library Work" had to do with a compilation in which all the principal specialized positions or types of work in a well organized library are arranged alphabetically by title and treated as follows. The duties of each position or specialized function are first described in as brief a form as possible, consistent with accuracy and intelligibility even to the layman. Statements of this sort have come to be known in the literature of personnel management and job analysis as work descriptions. For each position this work description is followed by a descriptive analysis of personal qualifications. Under this heading full information is sought on two points. In the first place the aim is to secure as authoritative an analysis as possible of the personal qualities, native abilities and capacities which experience has shown to be requisite for the most efficient and successful performance of the duties of each position. He is seeking the basic data for the construction of what the psychologists call a psychograph. Dr. Williamson went on to discuss in detail the definition of his psychograph, the description of duties and the qualifications required for them, and the method of obtaining information as to the general education and special training, which should be considered as a standard test for applicants. His paper was a plea for the need of making a beginning in scientific personnel studies, with special reference to library work, and he asked for the fullest and frankest criticism of his project.

Harry L. Koopman of Brown University read a paper on "The College Reading of Men Who Afterwards Became Famous." This was based on an examination of the records of books issued to students at Brown for a century, showing in detail the books drawn during each year of the student's career. Mr. Koopman read lists of the books read by some of the more distinguished graduates of Brown, and commented on the relation between their undergraduate reading and their future careers. It is hoped that this paper, with its lists, will be published in full.

Dr. Richardson, who had just returned from Europe, read a paper on "The League of Nations, 'The International Organization of Intellectual Work' and International Library Co-operation." The paper was a description of the discussions in the Assembly of the League of Nations on the proposed technical organization attached to the League for the purpose of developing international co-operation in the domain of intellectual activity. Dr. Richardson

ended his paper with the request that Americans so organize the instruments of research as to quicken information and increase production; then we shall be in a position to join with other nations for the international organization of intellectual work.

Clement W. Andrews' paper on "The Economics of Library Architecture" was not received in time for reading and discussion but was read on the afternoon of the following day: The first part of this paper is given as the leading article in this number of the LIBRARY JOURNAL and the second part, which deals particularly with the new John Crerar Library building, will be given in the number for June 1.

Papers and discussion will be printed in full in the *Proceedings* of the Institute.

ANDREW KEOGH, *Secretary*.

NEW JERSEY LIBRARY ASSOCIATION

The annual business meeting of the New Jersey Library Association was held on Friday afternoon, April 29th, Edward L. Farr, first vice-president, in the chair.

The report of the Finance Committee, presented by its chairman, A. C. Mack, was prefaced by a tribute to the untiring work of Sarah B. Askew for the passage of Assembly Bill 522, which "increases to two-thirds of a mill permissible tax rate for raising money for public libraries." On the motion of Charles A. George, the report was unanimously accepted and the congratulations and thanks of the Association were extended to Mr. Mack's Committee.

The report of the special committee, appointed to assist the Finance Committee, was presented by Miss Askew, who also spoke briefly upon the five library bills recently passed. These are Assembly 522 (Chap. 191) as above; Senate Bill 189 (P. L. 1921, Chap. 161) which "increases from five to six per cent the interest on bonds issued by municipalities for library purposes"; Senate 270 (Chap. 286) which "authorizes municipalities to reappropriate to libraries moneys received from fines"; Assembly 122 (Chap. 2) which "extends the Free Public Library Act to all municipalities, including townships"; and Assembly 520 (Chap. 213) which "authorizes county clerks to deposit in public libraries, or with local historic societies, newspaper files that have been preserved as county records."

Mr. Miller moved that the Association act to have Senate bill 270 so amended that Public Library funds shall be handled as are Public School funds.

Miss Pratt suggested that Assembly Bill 270 ought to be amended to include all moneys—for example, payments for lost books, etc., as,

at present, by the Pierson Act, libraries cannot receive money in compensation for lost or injured books. It was also suggested that the difficulty under the Pierson Act might be overcome by allowing an extra amount equal to the estimated income from fines, etc., when calculating the yearly budget. William B. Bamford, of Belmar, suggested that the purpose might be accomplished by amending the Pierson Act to take Library funds out of the control of municipal budgets in the same manner as school funds. Miss Askew reminded the meeting that it would be as difficult to amend the Pierson Act as to change the League of Nations, and suggested that the motion be held over until the Fall meeting.

Mr. Mack moved that inasmuch as the Finance Committee had been honorably discharged, the President appoint a Committee to be known as the Legislative Committee to report to the Association at its Fall meeting, and Mr. Bamford supplemented the motion to the effect that this Committee consider amending the library law to increase the mandatory amount allowed libraries by a sum equal to all the moneys collected by each library during the previous year. These motions were unanimously carried.

The Legislative Committee appointed for the ensuing year consists of William B. Bamford, Wilber S. Johnson, of East Orange; and G. M. La Monte, of Bound Brook.

Miss Askew then presented her Report which was accepted and ordered spread upon the minutes.

In gathering statistics as to salaries the Committee found this subject to be so closely related to service and certification of librarians, that it recommended a committee be appointed to formulate a statement on Standardization and Certification of Library Service. It was moved and carried that the President appoint such Committee. The committee for the coming year consists of Sarah B. Askew; Louise G. Hinsdale and Thomas H. Hatfield.

Florence Bradley, librarian of the National Organization for Public Health Nursing, followed with a most illuminating talk on "The Library's Part in Community Health," outlining the work of the library departments in such organizations and making a strong plea that the public library in each community render more effort to this work and thus relieve the organizational library, which is experiencing greater demands from day to day from social workers, club women, school teachers and parents. Miss Bradley closed by urging a closer co-operation between the Public Library and the Public Health Nurse in each community. Books recom-

mended by Miss Bradley were on display, and lists were available for distribution.

Officers for the coming year are: President, Beatrice Winsor, Newark; first vice-president, G. M. La Monte of Bound Brook; second vice-president, Bessie H. Newkirk of Camden; secretary, Adeline T. Davidson of East Orange; and treasurer, Helen M. Grannis, Perth Amboy.

FLORENCE M. BOWMAN, *Secretary*.

PENNSYLVANIA LIBRARY CLUB

At a meeting presided over by Frank G. Lewis on Saturday morning, April 30th, Joseph F. Kwapil, librarian of the Public Ledger Co., Philadelphia, read a paper on "The Importance of the Newspaper 'Morgue' as a Factor in Modern Journalism." This paper is given in full elsewhere in this number.

Following, Adeline B. Zachert, director of school libraries in Pennsylvania, gave a delightful account of the work which she and Eleanor Gleason of Rochester had recently concluded in establishing libraries with modern organization in the Virgin Islands. Miss Zachert outlined the history and present condition of the dwellers in the Islands, thus making a background for her bright story of a novel kind of extension resulting in three libraries established in less than three months in a land where widely varying interests make civic center activities most difficult, and where the "Library Lady from the Red Cross" and her volunteer assistant alone of all the people in that sunny region had any idea of haste. Organizing the libraries, training staffs and creating a public went hand in hand, and publicity methods innumerable, old and new, were employed: spreading the news thru volunteer helpers, distributing hand-bills, winning space for news notes and editorials in the newspapers, talks and story telling to trades unions denominational meetings and schools, and especially the appearance of "the Lady who Hurries" at the Movie Theatre between a blood-curdling mystery serial and Charlie Chaplin! The story of the opening of the Library at St. Thomas is told by Miss Zachert in the February 1 LIBRARY JOURNAL.

The announcement of the Travel Committee of the A. L. A. given by Frederick W. Faxon, chairman, concluded this session. For particulars regarding travel, reservations, local points of interest and post conference trip and other attractions, see LIBRARY JOURNAL for April 1, p. 316-318 and p. 460 ff. of the present number.

JEAN E. GRAFFEN, *Secretary pro. tem.*

On Saturday afternoon, April 30th, a corner conference for those interested in the work with

The Thirteen Principal Upanishads

By R. E. HUME \$6.75

ASIA

The American MAGAZINE on the Orient
More than 60 illustrations Art insert of 8 pages

Through its pages you travel straight into the heart of the lands that have always beckoned.

You hear:

- The flapping of junk sails.
- The cries of camel drivers.
- The shrill bargaining of Eastern bazaars.
- The clang of trolley-bells as the cars dash through age-old gateways.
- The triumphant, new note of Oriental youth.

Good fiction.

Adventures by famous travelers.
Authentic and illuminating articles on the political, industrial and human side of Asia.

THE ONLY AMERICAN MAGAZINE TREATING EXCLUSIVELY OF THE ORIENT

ASIA is emphatically a magazine for every public library. Readers who wish to keep abreast of the times expect it to be on file.

ASIA PUBLISHING COMPANY
627 Lexington Ave. New York City

children led by Julia F. Carter, Children's Librarian of the Extension Division, New York Public Library, was attended by about thirty-five librarians, and the questions asked were of vital interest to all. The greatest problem in the work seemed to be the direction of the reading of the boys and girls of thirteen to fifteen. Several times the question was repeated: "What can be done to satisfy the requests of boys who want Zane Grey and Burroughs and for girls who are clamoring for Dell, Chambers and lurid detective tales?" Good titles of adventure of all kinds and in all countries were suggested. It would be interesting if one could follow up and see to what extent these books solve the problem. Several requests for lists of good reading for certain ages and for model libraries were made. It was the opinion of the group on the whole that such lists were impossible, that lists are excellent for use as foundations but cannot be followed rigidly, since the child's personality and environment must be taken into consideration. The group showed enthusiasm and spontaneity and in a work where friendly personality means so much, one felt that the children of New Jersey were in safe and sympathetic hands.

J. F. C.

At a joint session of the New Jersey and Pennsylvania groups on Saturday evening Dr. Montgomery presided. In place of Agnes Replier who was prevented by laryngitis from speaking on "The Courageous Reader," R. R. Bowker spoke on literary notables he had known and Henry R. Rose of Newark on "America's House of Dreams," the Library of Congress,

after which the twenty-fifth joint meeting was brought to an end by an informal dance.

ONTARIO LIBRARY ASSOCIATION.

To the Editor of the LIBRARY JOURNAL:

It is one of the easiest things in the world to make mistakes and one of the hardest to undo them. Usually one cannot undo them, but at least one can try. I sent you recently a report of the twenty-first Annual Meeting of the Ontario Library Association, which resembled Hamlet with Hamlet left out. When I learned that I had omitted reference to the chief address of the whole meeting I was thunderstruck. I was so certain that I had noted Dr. Hill's address that I could have made an affidavit to that effect.

However, the reference to that address wasn't there and it is nobody's fault but my own. Dr. Hill has been invited so often to come to our Annual Meeting and we were so delighted to have him with us at last, that my mistake is almost unforgivable. However, I know that Dr. Hill forgives, and I trust, Mr. Editor, that you and your readers, so many of whom are close personal friends of Dr. Hill, will do the same.

E. A. HARDY, *Secretary.*

INLAND EMPIRE TEACHERS' ASSOCIATION LIBRARY SECTION

LUCILLE FARGO, Librarian of the North Central High School at Spokane, is President of the Library Section in succession to Mary Brown Humphrey, Pullman, and Anna Marie Hardy of the Spokane Public Library succeeds Elizabeth T. Stout as Secretary.

LIBRARY OPPORTUNITIES

POSITIONS OFFERED

Wanted, qualified librarian to take charge of Children's Department of the Winona (Minn.) Public Library in September.

Wanted, assistant cataloger for the University of Missouri Library, Columbia, Mo. University graduate, at least one year's library school training and some experience required. Salary \$1800. Address: Henry O. Severance, librarian.

Editorial assistant with experience in briefing or digesting legal or business material: the ability to turn out a considerable amount of clear readable English and some business knowledge are essential. Salary to start \$30 a week with excellent opportunity for rapid advancement. X. B., LIBRARY JOURNAL.

A business library near Cleveland needs a young woman as assistant librarian. Some experience or training in cataloguing and reference work desired. Applicants should have pleasing personality, the usual amount of initiative, and aptitude for following reference work to completion. Salary \$115.00 per month. Address: O. R. 10, care of the LIBRARY JOURNAL.

POSITIONS WANTED

Library school graduate, expert cataloger, with ten years' experience in public and college library work would like to organize or develop a library in the Northwest. Salary, \$1800. Interview at Swampscott. Address: W. E. 10, care of the LIBRARY JOURNAL.

IN THE LIBRARY WORLD

RHODE ISLAND

H. B. 562 Substitute A, introduced by the Committee on Education, has become law as Chapter 2083 of the Public Laws of 1921. This act is an amendment of and an addition to Chapter 63 of the General Laws, entitled "Of the Board of Education" and is as follows:

"Section 1. Chapter 63 of the general laws, entitled 'Of the board of education,' is hereby amended by adding thereto the following section:

"Sec. 20. The board of education may cause to be paid annually to the free public libraries in the state whose means are not sufficient to maintain proper library service, a sum of money which shall be apportioned by said board and devoted to the salaries of the librarians in the said libraries. Said amount shall be paid only to librarians whose respective salary does not exceed the sum of five hundred dollars annually; *Provided*, that the annual payment to any one such librarian shall not exceed the sum of four hundred dollars. The general assembly shall annually appropriate such sum as they may deem sufficient and advisable for the purpose of carrying into effect the provisions of this section. . . .

"Sec. 2. For the purpose of carrying this act into effect during the fiscal year ending December 31, 1921, the sum of three thousand dollars, or so much thereof as may be necessary, is hereby appropriated. . . .

"Sec. 3. This act shall take effect upon its passage . . . all acts and parts of acts inconsistent herewith are hereby repealed."

This bill is a substitute for the bill proposed by Representative Hamilton which was designed "to promote the service of free public libraries and to provide state aid for certified librarians." The substitute bill was proposed by the House Committee on Education in consultation with the Commissioner of Education after it was plain that the original bill could not be passed. The substitute eliminates the certification feature and restricts the appropriation to the libraries paying less than five hundred dollars to their librarians. This will include about forty-six public libraries out of sixty-three.

NEW YORK

Gowanda. By the will of the late Jared S. Torrance, who died March 29th, the Free Library is to receive \$25,000 to erect a building, on condition that the city raise a like sum within two years.

Elmira. In memory of their daughter, Adelaide Bowles Maltby, well known to librarians, especially in New York City and State, Mr. and Mrs. Frederick T. Bowles have presented to the Steele Memorial Library a fine collection of illustrated children's books and a book-case in which to place them.

ILLINOIS

Mooseheart. The Ohio Moose have contributed two hundred and fifty thousand dollars for the construction of a library and kindergarten building at Mooseheart.

MINNESOTA

The Legislature has increased school library aid from \$10 per teacher to \$20 per teacher, not to exceed \$40 per building, but has failed to pass the proposed county library law.

NEBRASKA

Omaha. Book borrowers numbering 40,809 (out of a population of 191,600) took 530,103 books for home use from the Public Library during 1920. This is an increase of 101,616 or nearly 24% over the circulation for 1919, and is a circulation of 2.7 per capita. The city appropriated \$60,000 to the Library, which, supplemented by other funds, brought the total income of the Library for the year up to \$63,548.

SOUTH DAKOTA

The South Dakota Free Library Commission is charged with the task of supplying library service to 80% of the population of the state thru individual loans and traveling libraries. According to the report of the South Dakota Educational Survey taken in 1918, 75% of the population live in the open country or in towns of less than 1,000 inhabitants. The fifty-one city libraries and one county library, which is not yet in full operation, serve about 20% of the people of the state, leaving 508,509 people without any library facilities except those furnished by the Commission.

The report of the Field Librarian (Leora J. Lewis) for the biennial period ending June 30, 1920, shows that 25 new fifty volume collections and 5 twenty-five volume collections were made up for circulation and seven libraries withdrawn. There were on hand at that date 184 fifty volume libraries and 47 twenty-five volume libraries distributed thru 250 traveling library stations. During the biennial period 592 libraries were loaned, and the circulation of the

Our Library Department

With its many years of experience, together with our unsurpassed stock of books of all publishers, combine to make a library service of unexcelled efficiency.

Public Libraries, Schools, Colleges and Universities

have their book orders handled intelligently, expeditiously, and accurately by us, and find our prices satisfactory. We solicit correspondence from librarians not acquainted with our facilities.

A. C. McClurg & Co.

CHICAGO.

books, as reported by the librarians in charge of the stations, was 36,165. From the open shelf collection and package libraries 8,537 pieces were sent out by parcel post to women's clubs, high schools, rural school teachers, and ex-service men who first discovered the opportunity of using technical books at the A. L. A. camp libraries.

The Field Librarian during the two years made 113 library visits, seventy-three to public libraries, seven visits to towns without libraries to assist in plans for organization, eleven to state institutions, twelve to libraries of non-state institutions, and ten to high school libraries. Total expenditures were \$12,700, of which \$3,965 was spent for books, periodicals, and binding; \$5,063 for salaries, and \$1,155.99 for traveling expenses.

The state has a county library law, passed by the legislature in 1917, by the terms of which the county commissioners may establish a library and appoint a board of trustees if a petition asking for the establishment of a county library be filed with the auditor of the county, signed in a majority of the taxing districts by at least 20% of the legal voters as shown by the last election for governor. The trustees, on or before the first day of August, make and file with the county commissioners an estimate of the expenses of the library for the ensuing year, and providing that the tax required does not exceed one-half mill on the dollar of the assessed property valuation of the county, the levy is made covering it. This law needs amendments for its full effectiveness to be realized, as at present it is purely permissive, and also fails to make any provision for the erection of a library building.

COLORADO

Denver. The annual report of the Denver Public Library for 1920 shows that the library contains 223,412 volumes, being a net gain during the year of 10,659 books.

The home circulation of books was 949,461, a gain of 20,513. In addition to books loaned, pictures were loaned to schools and study clubs to the number of 421,051. The active cards in force numbered 54,492. The per capita circulation of books in Denver last year was 3.7. The per capita cost of the library in Denver was 43 cents. The appropriation for 1920 was \$110,000.

CALIFORNIA

Long Beach. In fifteen years the circulation of books from the Long Beach Public Library has increased from about 46,000 to over 450,000 which represents an average per capita circulation of about seven books a year for each person in the community. The collection also in-

creased from 1500 books to over 60,000. The heavy circulation makes it necessary to spend a large proportion of the total income on salaries: \$35,820 for a staff of 24 from the appropriation of \$62,212 for the current year. The library tax rate, determined each year by the city commissioners, amounts this year to 9 cents on \$100 assessed valuation. The appropriation includes \$6200 for a branch library to supplement the present three small branches.

The California Art Club, the County Museum of Art, and individual artists and owners assist in keeping the walls of the art gallery on the top floor filled, the exhibits changing usually once a month.

Riverside. The appropriation for maintenance of the Public Library, which is also the County Free Library, is about \$33,000 this year as compared with \$23,000 last year.

ONTARIO

Toronto. Altho no new branches of the Toronto Public Library were opened during 1920 the circulation of books amounted to 1,630,041, an increase of over 250,000. The fourteen branches now open all report larger circulations, as does the Reference Department. Each working day of the year 150 books were purchased and put thru for library use, and each working day 1,350 boys and girls came to borrow books, the circulation among younger readers reaching 400,122 books, or an increase of nearly 40,000.

When the librarian, George H. Locke, took office twelve years ago the population of Toronto was 325,000; its assessed valuation \$227,800,000, and the library income \$56,756. The population today is reckoned at 512,812, and the assessed valuation at \$703,646,395. The library income from Library Rates supplemented by special grants for 1920 was \$247,000. In 1908 the city had two public libraries as opposed to the sixteen of today, and the people had access to 134,000 books, whereas there are 400,000 at their disposal now. The use of books increased from less than half a million to over a million and a half.

The Library Staff, numbering more than 100 assistants, is organized into the Public Library Association which holds regular meetings on the evening of the third Wednesday of each month, for which all libraries are closed, and have also established an enviable local reputation as a Dramatic Club.

A few reprints of the New York (L. J. Jan. 15) and Philadelphia (L. J. Feb. 15) library lists and of the Popular Names of Statutes (L. J. Mar. 1-Apr. 1) are to be had from this office. Price 50 c. each.

INDUSTRIAL ALCOHOL

By F. B. WRIGHT

This American book gives full directions and is illustrated with original drawings of the necessary apparatus for the manufacture of what is considered by many to be the coming fuel for automobiles, motor boats, heating, cooking, lighting. It should be a valuable addition to the technical library or to any library catering to the special needs of industrial enterprises.

Note—The sale of this book to libraries does not conflict with the provisions of the National Prohibition Act.

BIBLIOGRAPHICAL NOTES

The publication of the *Branch Library News* of the New York Public Library, which has been issued as a quarterly for some time past, is discontinued for the present, owing to lack of funds.

The Librarian and Book World, edited and published by Alexander J. Philip and now in its tenth year, will in the future be published by Messrs. Sampson Low, Marston & Company at 100 Southwark Street, London, S. E. 1, who will also control the advertising side. "In the past librarians had to seek for information from several sources, but it is hoped to combine in future all the most important items of special interest to librarians thruout the world."

"Plays of Today" by F. K. W. Drury, assistant librarian of Brown University, is an annotated list of 100 of the best modern dramas, prepared with the object of arousing interest in the reading of drama as distinguished from the production of plays. The plays are grouped so as to bring those together which have approximately the same subject. "A very useful little 35-page pamphlet—the size of a standard catalog card." Single copies cost ten cents; lots of 100 cost eight and a half cents a copy.

William Coolidge Lane, Librarian of the Harvard College Library, is the subject of the frontispiece and biographical sketch of the current number of the *Bulletin of Bibliography*. Other items in this number in addition to the usual features are: a brief reading list on practical bibliography compiled by the class of 1921 of the New York State Library School; a selected list of references on public international law for college students, compiled by Florence C. Bell, librarian of the United States Bureau of Efficiency, and "An Index to Library Reference Lists, 1920," by Marian F. Bonner of the Providence (R. I.) Public Library, continuing this series of indexes which is printed each year in the January number of the *Bulletin*.

The following are the subjects chosen for the original bibliographies of students of the Los Angeles Public Library:

Ethelwyn Badger, English publishers.
Marie Biddle, Books about industries for children.
Roberta Bowler, California in fiction.
Mary Alice Boyd, Zionism.
Doris Crump, Women in journalism.
Lila Dobell, Cookbooks of foreign countries.
Helen Hamilton, Spanish architecture.

Katherine Folger, Art of the North American Indians.

Annice Healton, Child life in the middle ages.

Rosemary Livsey, Nature in recent verse.

Mabel Lunn, California deserts and mountains.

Elsie McCormick, Canada in fiction.

Pearl McDowell, Edward MacDowell.

Frances Matchette, Colonial costume.

Harriet Mather, New England homes.

Gertrude Mendenhall, English publishers.

Mary Miller, California missions.

Alpha Perkins, California birds and flowers.

Helen Rice, Gypsy music.

Reba Richardson, Japanese expansion policy.

Mabel Smith, Art in advertising.

Mary Marjorie Smith, Travel in Alaska.

Edna Stonebrook, Memoirs.

Winifred Skinner, Reading list for high school freshmen.

Rachel Thayer, Colonial doorways.

Christine Watson, South America in fiction.

Mabel Williams, Book illustration.

Part of this material will be used in the forthcoming Library School number of the *Los Angeles Public Library Bulletin*.

In continuation of a previous paper (in the *Gardeners' Chronicle* for May 24, 1919) Marjorie F. Warner, bibliographical assistant, U. S. Bureau of Plant Industry, contributes "Horticultural Libraries in the United States" to the early numbers of this years' *Chronicle*. (*Gardeners' Chronicle*, 3d. ser. v. 69, p. 32-33; 51; 90-91; 140. Jan.- March 1921).

The following libraries containing more or less literature of horticultural interest are noted: Library of Congress, New York and Boston public libraries, Boston Athenaeum, New York Society, Library Company of Philadelphia, Harvard College, and John Crerar. Three botanical libraries of importance in this field are those of the Missouri and New York botanical gardens and Arnold Arboretum, and the series is concluded with that of the Massachusetts Horticultural Society. The scope rather than the extent of the collections is indicated, with a few details of their history and administration, and many books of special interest, mostly of early date, are noted. While there are doubtless other libraries in the United States, . . . public or semi-public, and private, which contain a considerable quantity of similar literature, it seems probable that only a comparatively small proportion of the early horticultural books are located in this country.

PRESS NOTICES.

CHRISTIAN WORLD—This is a timely, impersonal, dispassionate, analytical unanswerable discussion of the weaknesses and inconsistencies of the Christian Science Church. It overflows with facts which provide the ground-work of the author's incisive argument . . . and is as clear as sunshine and as irrefutable as the decalogue.

THE EVANGELICAL MESSENGER—The spirit in which his exposures of inconsistencies in the organization are made is very commendable, and adds merit and pungency to his arguments and forceful statements. It is the only book of its kind on the market as far as we have any knowledge.

ELM TREE PRESS

Woodstock,

Vermont

Issues many books and pamphlets, written or edited by
J. C. DANA, Librarian Public Library and Director of
Museums, Newark, N. J.,

on Libraries, Museums and other topics, including 20 pamphlets on Library Economy, 50c. to \$1.00 each; four small volumes on Museum method, the four for \$5.00; four volumes of the Librarian's Series, being reprints of old and rare books of interest to librarians; certain books on the classics, chiefly on Horace; and has for sale a few copies of Literature of Libraries, six volumes, from Merrymount Press.

Electrical Equipment of the Motor Car

A practical manual on Ignition, Starting and Lighting, in which special attention has been given to the fundamental principles of electrical engineering as applied to the electrical equipment found on the modern motor car.

The book is well illustrated and numerous special diagrams have been prepared to bring home more forcefully the subject matter under discussion.

BACON, Virginia Cleaver, 1914, R., now librarian of the State Normal School at Arcata, Calif., has been appointed Librarian and Service Secretary to the Junior Division of the United States Employment Service, U. S. Department of Labor, at Washington, D. C.

EASTMAN, Mary, in charge of the Business and Technical Division of the Reference Department (and not Reference librarian, as announced in our April 15th number) of the Kansas City Public Library, Kansas City, Mo., has recently resigned in order to be married. Florence S. Smith is reference librarian.

GREEN, Belle da Costa, librarian of the J. Pierpont Morgan Library, has been decorated by the French Government with the highest grade of the Order de l'Instruction Publique "in recognition of her untiring services in the spread of French culture."

NORTON, MARGARET, 1906-07 I., has been granted two years' leave of absence from the Smith College Library, and will shortly sail for Constantinople to organize the library of the American College for Girls.

PARKER, John, librarian of the Peabody Institute Library, Baltimore (Md.), completed the 50th year of his service on April 24th.

PRATT, Adelene J., 1917-19 N. Y. P. L., will shortly become librarian of the Burlington County (N. J.) Free Library.

SLOBOD, Ansel A., formerly librarian of the Curtis Engineering Corporation, has for some

time been connected with the Main Library of the General Electric Company as assistant librarian in charge of reference and bibliographic work. Previous to his coming to Schenectady, Mr. Slobod spent about a year at the Engineering Societies Library on special development work particularly along classification lines.

WILLIAMSON, Charles Clarence, becomes director of the information service of the Rockefeller Foundation, June 1. Dr. Williamson resigned an associate professorship of economics and politics at Bryn Mawr in 1911 to become chief of the economics division of the New York Public Library, in 1914 he was appointed librarian of the Municipal Reference Branch, and in the fall of 1918 returned to the charge of the economics division at the central building, holding at the same time the office of statistician of the Carnegie Corporation's Americanization study. He will be succeeded as chief of the Economics Division by Rollin A. Sawyer, Jr., 1914 N. Y. S., now first assistant, who has been in the service of the Library since 1914.

Chivers' Bindings

For more than thirty-five years we have continuously bound NEW and OLD books for Public Libraries.

Chivers' bindings have won recognition because of their strength, flexibility and lasting qualities.

The books we bind will last intact as long as the pages are clean enough for service, thus effecting for the Library a saving of time, money and effort.

We supply NEW books bound in one or other of our three methods: viz.—half leather—full buckram, or publishers' covers, strongly reinforced.

During 1921 we propose to issue frequent lists of new, worth-while fiction and juveniles, carefully selected and specially priced. We will be glad to send copies to Libraries on request.

Bernard Shaw

has written a new play that caps the long list of his successes. It will go further than any of his previous works because by its very nature (aside from its artistic merit) it is of universal appeal.

Back to Methuselah

starts with the premise that three score and ten is too short a period to allow for maturity—that in the present scheme men age and die just as they are beginning to understand life's problems. From that starting point Shaw leads us into the future and shows us a race of men who live to be three hundred years old. The last act, which is laid in the future, "as far as thought can reach," discloses people who apparently know death only as the result of accident.

At first thought the astounded reader might suspect that this play was a mere *jeu d'esprit*, a merry hoax written with tongue in cheek. But in a lengthy preface Mr. Shaw proves conclusively that just such prolongation of life as he portrays is not only biologically possible but highly probable through the workings of creative evolution. \$2.25.

Dust

By Mr. & Mrs. E. Haldeman-Julius

This strong novel is the latest chapter in the mid-western epic that our younger authors have begun to write. The Haldeman-Juliuses will be remembered for their original and faultlessly written stories in *The Atlantic Monthly*. DUST is the fulfilment of the promise contained in these little masterpieces. \$1.75.

Co-operation Between Public and Special Libraries

BY DORSEY W. HYDE, JR.

President, Special Libraries Association

AN outstanding feature of commercial and industrial development in this country during the past decade is the new emphasis upon research study, and the use of fact information as a basis for the formulation of business policy and as a guide in the conduct of routine matters of administration. It is by no means uncommon for a large corporation to expend for research in one year, sums several times as large as the budgets of libraries in all but the largest cities. A dye manufacturer, for example, would not hesitate to spend thirty thousand dollars for certain types of research, and one manufacturer a year or so ago invested twice that sum in an investigation of motor truck operating costs.

Where research flourishes the special library is indispensable. Valuable data, in published and unpublished form, accumulate in quantity and must be studied, digested and arranged according to a unified plan of classification and storage. It is realized increasingly that the mere acquisition of research information is not sufficient; when such data has been obtained, provision must be made for distributing it to business executives, to the field staff, and in some cases to the patrons of the firm. When this type of continuous reference service is left to the special librarian the expert investigator is free to devote his entire time to creative work. The realization of the foregoing is now so widespread that more than five hundred concerns have established business or technical libraries and new firms are continually becoming interested.

ISOLATION *versus* CO-OPERATION

Altho it has been frequently pointed out that the present is an age of specialization, it is not realized so generally that the one and only corrective of this tendency is increased co-operation between specialists and others. The story

is often told of the two men who exchanged dollars, without either becoming the richer. In the realm of knowledge, on the other hand, when an exchange is made each man retains his original information plus that of the man with whom he made the exchange.

The experience of every special library has demonstrated that no subject can be isolated from other subjects. The bank librarian must be able to answer questions on advertising; the insurance librarian will be asked about transportation rates; the motor industry librarian will have to study accounting, road construction, market analysis as well as other subjects. Thus in every instance it is shown that one subject involves another, and that if constructive service is to be rendered the special librarian must know of other sources of information and use them to supplement his own sources.

INTEGRATING SOURCES OF INFORMATION

The question of integrating community informational sources is of such importance that it has been decided to devote to this problem a joint session of the American Library Association and the Special Libraries Association at the Swampscott convention. By way of introduction to the program for that occasion letters were sent out to about a dozen public and a dozen special librarians asking for their opinions as to the feasibility of co-operation between public and special libraries, how such co-operation would benefit each institution, whether local informational clearing houses are advisable, and similar questions.

The replies to this letter came back promptly in almost every case, and from these many interesting expressions of opinion have been obtained. The replies show that a good number of public and special librarians believe that co-operation between their respective institutions is highly desirable, and that such co-operation

will result in substantial benefits to the business world as well as to the community as a whole. As one librarian expressed it: "We believe most decidedly in co-operation between public and special libraries . . . it is our opinion that neither can give the full service that it should without the help of the other. . . . It is a definite part of our . . . policy to foster the establishment and development of special libraries and to maintain cordial relations between these several special libraries, as well as between them and the public library." Thus, in reply to the question, "Do you approve of co-operation between public and special libraries?" the ten public librarians and the ten special librarians replied "Yes" in every case, with but two who made reservations.

BENEFITS TO PUBLIC LIBRARY

All of the twenty letters were in accord as to the benefits accruing to public libraries from co-operation with special libraries. The replies to the question, "How would co-operation benefit the public library?" showed that the writers thought that such co-operation would benefit the public library because it would:

1. Increase the scope of public library service by enlarging its informational sources.
2. Enable the public library to supply highly specialized information.
3. "Sell" the public—especially business men—as to the need for increased library appropriations.
4. Make business men and the general public use the public library more.
5. Reduce public library expenditure for highly specialized books.
6. Increase the interest of public library employees and develop improved *esprit de corps*.

BENEFITS TO SPECIAL LIBRARY

Correspondents were equally agreed that co-operation of the sort contemplated would be of benefit to the special library, if only, as the jocular Mr. Lee pointed out, to "Keep it from brooding over the fact that it is a special library"! Replies to the third question ("How would co-operation benefit the special library?") indicated that, in the belief of the writers, such co-operation would:

1. Increase the scope of special library service by enlarging its general informational sources.
2. Save space and expense of books obtainable thru inter-library loans.
3. Advertise the special library to the public.
4. Put special libraries in touch with each other.

IS CO-OPERATION POSSIBLE?

Question number four, "Do you think it possible to devise some plan to integrate public

and special library service?" brought out many interesting replies. Carl B. Roden, of Chicago, said: "We think we are doing it in Chicago, and do not propose to let them get away!" Carl P. Vitz, of Cleveland, basing his reply on reports of several staff members, said: "It is our opinion that the 'will to co-operate' is more important than any standardized plan. Each community necessarily works out this problem according to local conditions."

Adam Strohm, of Detroit; Purd B. Wright, of Kansas City; Walter L. Brown, of Buffalo; Joseph L. Wheeler, of Youngstown; Rebecca B. Rankin, of New York Municipal Reference Library; Helen Hemphill of Western Electric Company; Alta B. Claffin of the Cleveland Federal Reserve Bank; George W. Lee of Stone and Webster; Savel Zimand of the New York Bureau of Industrial Research; and the Newark Business Branch, expressed their belief in the possibility of devising some plan to integrate the service of public and special libraries. Charles F. D. Belden, of Boston, thinks such integration would not be possible in "some exceptional cases." Arthur E. Bostwick states that the goal should be the consolidation or affiliation of all special libraries in the community except those owned by private business concerns in connection with their plants. Ralph L. Power, of the College of William and Mary, believes in integration "only so far as it is possible to co-operate by placing facilities at the disposal of each." Adelaide R. Hasse writes that "sympathetic co-operation is all that is needed."

Some of the replies indicated that the writers do not believe that any relationship between public and special libraries, other than general co-operation, is feasible. Mary Louise Alexander, of Barton, Durstine and Osborne, New York, doubts the possibility of such plans. Louise B. Krause, of H. M. Byllesby and Company, Chicago, points out certain definite limitations upon public and special library co-operation, and Richard H. Johnston, of the Bureau of Railway Economics, Washington, states: "I do not consider any plan is necessary."

PLANS FOR CO-OPERATION

Progress in the direction of integrating public and special library service has been made in Boston, Chicago, Cleveland, New York and other cities. Mr. Belden reports the creation of a committee on co-operation ("Extension Service Committee") which is made up of public and special librarians in Boston and which holds weekly meetings to discuss problems of co-operation. In Chicago, Mr. Roden reports a plan whereby books are distributed to special libraries in some fifty-six different firms, with a total circu-

lation in 1920 of 272,934. In Cleveland, the Cleveland Club of Special Librarians was fostered by the Public Library which for some time past has maintained public library delivery stations in special libraries and which has extended considerable aid to local special libraries in a variety of ways. The New York Special Libraries Association has been an active body for several years past and its members have co-operated with the New York Public Library thru the Municipal Reference Library.

CLEARING HOUSE PLANS

The last question asked referred to local information clearing houses and participation therein by public and special libraries. The majority of the replies endorsed the clearing house principle and expressed their readiness to take part in any reasonable plan. The persons thus recording themselves were: Mr. E. H. Anderson, of the New York Public Library, Mr. Belden, Mr. Bostwick, Mr. Wright, Mr. Wheeler, Mr. Strohm, Mr. Vitz, Miss Rankin, Miss Clafin, Miss Hasse, Mr. Zimand, and Mr. Lee. The Newark Business Branch reports a questionnaire study of local special libraries looking toward a clearing house service; Miss Hemphill is for the plan "as far as Company policy would permit"; Mr. Power believes "that such a thing is possible informally but not in a formal manner because of various necessary rules in business houses." Chicago, Mr. Roden, reports, is calling a meeting to consider the clearing house idea, and the Buffalo Public Library, according to Mr. Brown, "would certainly like to co-operate in anything which would make the Public Library more useful."

In some instances the clearing house plan was thought to be impracticable. Thus Miss Krause writes: "In regard to local informational clearing houses, such plans never seemed to be practical to many business organizations . . . not many business corporations are willing to pledge themselves to any co-operative agreement for furnishing information. They prefer to reserve the right to pass upon each request as made." Miss Alexander, similarly, asks: "If co-operation . . . would mean simply an occasional telephone call for advice or a source of information, it could easily be managed, but if it meant being listed as a place which could be relied upon for certain specialized information, how and where could we draw the line?" Finally, Mr. Johnston says: "I do not consider any plan is necessary or that any new organization such as informational clearing houses and the like would be of any assistance. . . . All that is needed is the spirit."

CONCLUSION

From the foregoing hasty resumé it would

seem to be evident that the question of co-operation between public and special libraries is a live issue at the present time. There can be no doubt, on the one hand, that limitations will be placed upon co-operation by certain firms; but it is equally true that such limitations, where too strictly applied, will work to the disadvantage of the firms in question. In every case much will depend upon the librarian's ability to "sell" his conception of library service and library co-operation to his employers. Publicity for the work of the special library in some cases will be a help, but in others a hindrance. On the whole, the survey seems to indicate that new developments looking to closer co-operation, are to be expected, and there can be no doubt but that such developments will be of special interest to all librarians, as well as a benefit to the community at large.

Conference "Scholarships"

AT the business meeting of the Brooklyn Public Library Staff Association, held on May 3rd, it was decided to send two representatives chosen from the first three grades of the service, to the A. L. A. Conference, the expenses being met by a small tax on each member, in addition to larger voluntary contributions. The names being drawn by lot, Beatrice Ginsberg and Clara L. Curtis will represent the Association.

The New York Public Library Staff Association is to send two members of the staff—one from the Reference and one from the Circulation Department—to the A. L. A. Conference at Swampscott, and two to the New York State meeting at Ithaca.

From the Reference Department Enid M. Weidinger, 1912-14 N. Y. P. L., goes to the A. L. A., and Mary A. McGowan to the N. Y. L. A., and from the Circulation Department Marie E. O'Donohue to the A. L. A., and May B. Galaghan to the N. Y. L. A.

The expenses of these scholarships are met by part of the proceeds of the very successful Thursday suppers served by the Staff Association during the season of the public lectures which formed part of the open courses given by the Library School.

A. L. A. MEMBERSHIP INCREASES 20%

The 1920 Handbook of the A. L. A. lists 4464 members of the Association. From June 1st to May 7th of this year 690 new members were added, so that the total membership of the Association is now 5154, or 976 more than at the end of 1919.

A New Way of Dealing with Government Documents

By GEORGE HIBBARD

Assistant Librarian, Grosvenor Library, Buffalo, N. Y.

THE question of the best method of taking care of government documents in a library and making use of them resembles any one of several political questions which history tells us have troubled Europe in the past. These were always unsettled and always coming up. What was true in regard to them is true as to the problem of Government publications.

The present writer has been for a number of years in a position to watch very closely the influx of Government documents into a large repository library—the Grosvenor Library of Buffalo, New York, and to follow the constant effort to dispose of them. In addition there has been the question of how to bring them to the service of the public most readily and fully. Much attention, time and labor have been given to this. To go over the story of the past conditions, experiments and expedients is not necessary. The day came not long ago when a decided change had to be made. Fortunately the experience of a number of years in trying to reach the fullest use of the government documents had suggested what appeared to be a way to meet the difficulty and to meet it successfully. Indeed the new scheme which was tried proved at once to be practical and was soon seen to be better in its working than any which had been employed before.

For more than five years an attempt had been made to keep up a regular card catalog with Library of Congress cards. When the Grosvenor became a depository library some fifteen years ago an order was sent to Washington for all the series and other cards which appeared to be needful. As a matter of fact this resulted in the acquisition of a mass of cards of which very many were unserviceable, and many of which were put aside because the documents for them had not come, or because there was not time to use them. This, however, was not the reason for the abandonment of this method. The surplus might have been reduced. There were other considerations of greater importance.

The writer had made a practice for some time of seeking the information wished by the public in the government documents by another way than by the card catalog. The fact had become evident that no possible catalog of this kind which could be maintained would serve as an indication of where to look for the answers to a

very great many of the questions. Frequently such answers could only be obtained from separate articles in serial publications, and cards for every one of these would have made an impossibly large assortment. Also the time needed for typewriting the cards and filing them was to be considered. Cards came very irregularly and often very long after the publications had been issued. Not infrequently cards came which had not been ordered while others which would be serviceable were not sent. The result was that there was an accumulation of documents for which there were no cards. Moreover, there was the accumulation of cards for which there were no documents. To make and maintain a complete card catalog of government documents would require the constant work of more than one person. Also the rise in price of cards greatly increased the expense.

As everyone knows the Government publishes the *Monthly Catalogue of United States Documents*. At the end of June of each year there is included in the issue a very full index of the author, title and subject matter of the documents published during the preceding twelve months. The serial publications are very fully analyzed. This yearly index serves not only as a complete guide to the documents, but to the subjects treated. When any matter had to be looked up and there was no definite certainty of where the facts were to be found recourse was had to this catalog. The indexes were run over beginning with the latest and going backward. Generally the inquirer had some idea of the time when the desired knowledge was published and a search for only a few years was necessary. Very often something in connection with the subject gave some hint of the period of publication. Except in the case of definite numbers of serial publications this was found to be the quickest and the most satisfactory course to follow. The thought, thereupon, occurred to the writer that since this was the actual practice in the way of using the documents there was no reason why it might not be carried further. What had proved serviceable in casual use might be regulated and worked out into an established system. This was undertaken and the result has turned out better even than was at first expected. For one thing, as soon as the method was adopted a very considerable number of documents which

had been gathering and for which no cards had come could be placed on the shelves with the certainty of being easily found.

The idea was to use the *Monthly Catalogues* as a library catalog. The procedure was as follows: The number assigned to the document was written on the margin of the *Monthly Catalogue* opposite the entry of the document. The document was then put away in the stack where it belonged. Afterward all that was necessary to do to find it was to refer to the index. There would be a reference to the document by subject and title and by the department or bureau issuing it. Turning to the page on which it was recorded the number could be found. For this purpose the Superintendent of Documents' classification has been taken. In the case where the publication is a numbered one of a regular series a line is drawn under the number and the name of the series. To help in this connection a small card catalog is used. In it are placed cards with the names and numbers of all serial publications. When the name of the series is obtained from the printed *Monthly Catalogue* this can be found in the card catalog of serials and the document obtained from the shelves. If the document is one which has been published since the last index appeared the subject will generally indicate in what department the paper or document is to be found, and instead of referring to the index the separate monthly publications are then consulted. The method makes possible the marking and putting away of almost the latest documents, for the *Monthly Catalogue* keeps up very closely with the distribution of the documents to the depository libraries.

To look up all that has been published by the Government on any subject only necessitates running thru the indexes of the different years which does not take long and which gives much fuller information than could be gained from any incomplete and inadequate catalog. For example, many subjects are treated in special articles for which the Library had not been accustomed to receive any cards. An instance occurred recently. A request came by telephone for information as to the use of cyanide gas. A member of a firm owning a large elevator wished to get some facts as to the destruction of insects by this means. A few minutes search disclosed two entries in the index to the *Monthly Catalogue of United States Documents*, July, 1915-June, 1916:

"Cyanide gas; destruction of mosquitoes, fleas, etc., fumigation of U. S. S. Tennessee by cyanide methods."

The first referred to an article in the *Public Health Reports* and the second to a paper in the

Naval Medical Bulletin. In neither case would there have been cards in the card catalog and the information would not have been available unless the *Monthly Catalogue* had been used. When in searching for information, as in this case, the use of the printed catalog was essential, its regular use in all cases seemed advisable.

The method is very simple. The numbers of the catalog are bound and the volumes kept together where they may be consulted by the public. All that is needed is to look up any author, department or subject as can easily be explained. Then the attendant can quickly bring the desired document.

To recapitulate: The time saved in the type-writing of cards and filing them is very great. The lessening in expense is considerable. A catalog made this way by using the *Monthly Catalogue of Government Documents* is much more exhaustive and more fully up to date. There are other reasons of hardly less weight which have justified the adoption of the methods just described.

Of course the publications of the Congressional Series cannot be treated in this manner, or rather the same means cannot be used, since the documents are not listed in the *Monthly Catalogue*. However, by a similar use of the *Document Index* (Consolidated Index) giving the contents of the Congressional set of each Congress, a like result can be obtained and in precisely the same way. What would be better not only for the Congressional documents, but for the other United States publications would be to use the Catalogue of Public Documents (Comprehensive Index of Public Documents), the large volumes, published for the different Congresses and "all Departments of the Government of the United States." These, however, are only issued at intervals of two or three years, and a record of documents cannot be quickly made. The best way would be to transfer the records made in the *Monthly Catalogue* and the Document Index (Consolidated Index) to the Catalogue of Public Documents as the volumes appear and this may be ultimately done by the Grosvenor.

The writer would like to give a more elaborate description of the method employed, but hesitates about taking more space. One thing may be said and that is that it would seem to be a good scheme for smaller libraries, or those which are not depositories. The subscription to the *Monthly Catalogue* is only fifty cents a year. With the use of it there is not only a means of having a record of what Government documents are in any particular library and where they may be found on the shelves, but also what Government documents on any par-

ticular subject are published. They can then be obtained if wished from Washington by the patrons of the library. The suggestion is made that two copies of the *Catalogue* might be advantageous, one for use as a catalog by the cataloger and another for the use of the public. Then if one volume is lost or destroyed the work on it would not have been in vain. The other would be always accessible.

Two objections to the plan which seem likely to be made should perhaps be answered more fully than has been done by what has been written. The criticism that looking back thru the volume of catalogs by years needs time, has already been met by the explanation that in almost all cases some fact narrows the search. What however is more important is the assurance that altho somewhat more time has been used in such a search, nothing has been missed. As has been already said, a card catalog of government documents which is absolutely complete would be impossible in almost any library because of its size. Moreover the expense in money and the expenditure in time in making such a catalog would be a greater loss for a library than the slight loss of time in going over the bound monthly catalogs, and the monthly catalogs form a really complete catalog.

In regard to what may be said about the fact that the printed catalogs and indexes come some time after the documents and that therefore the documents cannot be cataloged at once, this reply can be given. In many cases the cards were not received until as long after the documents as happens with the printed books.

The plan has the approval of the best authorities. The following is an extract from a letter received from Mr. C. H. Hastings, Chief of the Card Division of the Library of Congress:

"We have cancelled your general order for cards for government documents. If you have any improved method for making documents available without cataloging them, I should be glad to learn of it. I have frequently advised small libraries to use Library of Congress cards for the most important documents only and to rely on the catalogs of the Superintendent of Documents for the others. I wonder if this is the method which you will employ hereafter."

No claim is made that the plan now in use by the Grosvenor Library is perfect. The present writer and the Library would be glad to have suggestions and would like to know what has been the experience of anyone working along the same lines. The only plea made is that the Grosvenor plan has been found after trial to be satisfactory. The hope is entertained that it may be of use to others.

Book Titles Most Popular in April

THE six works of fiction most in demand in April at the public libraries, according to Frank Parker Stockbridge's statistics for the June *Bookman* were:

Main Street. Sinclair Lewis. Harcourt.
The Age of Innocence. Edith Wharton. Appleton.

The Mysterious Rider. Zane Grey. Harper.
The Sisters-in-Law. Gertrude Atherton. Stokes.
Potterism. Rose Macaulay. Boni.
Moon-Calf. Floyd Dell. Knopf.

The general books most in demand were:
The Outline of History. H. G. Wells. Macmillan.

Margot Asquith: An Autobiography. Margot Asquith. Doran.

The Americanization of Edward Bok. Edward Bok. Scribner.

The Peace Negotiations. Robert Lansing. Houghton.

White Shadows in the South Seas. Frederick O'Brien. Century.

Crowding Memories. Mrs. Thomas Bailey Aldrich. Houghton.

During the same month the best selling fiction, according to statistics compiled by *Books of the Month* from special reports by seventy-six booksellers in sixty-one cities, were:

Main Street. Sinclair Lewis. Harcourt.
The Brimming Cup. Dorothy Canfield. Harcourt.

The Mountebank. William J. Locke. Lane.
The Sisters-in-Law. Gertrude Atherton. Stokes.

The Mysterious Rider. Zane Grey. Harper.
Sister Sue. Eleanor H. Porter. Houghton.

The best sellers in general literature were:
The Peace Negotiations. Robert Lansing. Houghton.

The Outline of History. H. G. Wells. Macmillan.

Mystic Isles of the South Seas. Frederick O'Brien. Century.

White Shadows in the South Seas. Frederick O'Brien. Century.

Mirrors of Downing Street. Anonymous. Putnam.

Now It Can Be Told. Sir Philip Gibbs. Harper.

The *Wichita Eagle* has arranged with Julius Lucht to print every Sunday a list of articles on timely and varied subjects selected from magazines in the library. "The first list included articles on inflammatory grouch, a camera man in Borneo, a plain talk to merchants, and Carpentier and Dempsey."

The Library of the United States Department of Agriculture and Its Branches*

By MARY G. LACY

Librarian, Bureau of Markets, U. S. Department of Agriculture

THE Library of the U. S. Department of Agriculture is the largest library in the world devoted specifically to agriculture and the related sciences. It may be said to have been founded in 1839 when an appropriation of \$1000 was authorized from the funds of the Commissioner of Patents for collecting and distributing seeds, prosecuting agricultural investigations and procuring agricultural statistics. Because of the fact that the statistics of agriculture were early perceived to be a vital necessity to the young Nation, the collection of them and of the records of them in books went hand in hand, and right at this point the library began which was destined to become, in 1862, the Library of the United States Department of Agriculture, then created. This, the National Agricultural Library, now numbers 165,069 volumes, and has a catalog of half a million cards. The collections on the subject of American agriculture, including horticulture, forestry, pomology, dairying, livestock, poultry, agricultural statistics and the various agricultural crops, are most extensive. In addition it has a large and representative collection of the most important foreign agricultural books and periodicals and a collection of the publications of foreign agricultural institutions, societies, and experiment stations which is without question the largest and most complete in the United States. In the sciences which relate to agriculture, such as botany, chemistry, and zoölogy, the Library's resources compare favorably with the resources of the large college and reference libraries of the country in these subjects and along economic lines they are probably unsurpassed. It is especially strong in scientific and technical periodicals and society publications.

The great strength of the Library, however, does not lie in the size or value of its collections, notable as they are, but in the character of its catalogs, bibliographies, and records which are pre-eminent in making available the literature of the subjects covered wherever it may be located. Its specialty, therefore, is this particular form of *Service*. These catalogs form an international bibliography of agriculture, such as exists nowhere else in the world. Those who work with these catalogs all the time do not

realize how widely they differ in this respect from the ordinary catalog, until some delighted foreigner's enthusiasm spills over and he exclaims, "We have no such service as this in Europe." To explain a little more fully: The main catalog contains not only author and subject cards for the resources of the Department Library, but also the cards obtained from the Library of Congress and from other libraries of their resources in the subjects in which the Department is interested. In addition, the Library has analysed a number of the most notable foreign agricultural periodicals, and has both author and subject cards in its main catalogs for them. Subject headings are very carefully chosen, often with the help of the scientists themselves, but the wayfaring man is not allowed to err therein either, for reference cards in abundance take care of his needs. Besides this great main catalog which includes all the material in the Bureau Libraries, there are special catalogs and indexes in the Bureau libraries, such as the botany catalog, the plant pathology catalog, the catalog of veterinary science, containing about two hundred thousand cards, the index to foreign food laws, the index to economic entomology, and others which make up a grand total of more than a million and a quarter cards indexing the literature of agriculture and the allied sciences—basis for a fair claim to being an international bibliography of agriculture.

As the steps of scientific progress are recorded, first in journals and proceedings of learned societies, the most notable section of the Library's resources lies in this class. Many of the sets of foreign agricultural periodicals are probably not contained in any other library in the country. The Library receives currently about 3000 periodicals, and by means of a "Continuations List" which is unique in character, tho widely copied, it makes all the information which the Library contains concerning a periodical or scientific serial available, in one place. Each entry card is a biography of the journal represented and makes available in the hour of need all correspondence relating to it, records irregularities of issue, change of title and much other information often of the greatest value in the verification of obscure references and in other ways. When it is remembered that

* Paper read before the District of Columbia Library Association on January 5, 1921.

the Library receives currently almost three thousand periodicals, half of them in foreign languages, and almost five thousand serials of less frequent issue and that this total of eight thousand serials is covered in the most comprehensive way and with the most meticulous care in this Continuations List, it is not hard to see why it is the pride and joy of all the Department Library workers. We shall be glad to share it with any of you who need its information at any time, for in so doing we shall be no poorer, and we shall thereby vindicate our pride.

In the broad outlines of its organization the Department Library resembles that of a university with its various departmental libraries, which correspond somewhat to the branch libraries in the Department of which there are thirteen. While it is obviously impossible to speak fully of the work of these in the time allotted me, I want to mention a few of the outstanding features of some of them. The work of any one of the Bureau libraries could easily fill all our time. We can only hope to mention a few of the activities of some of them. The Bureau of Plant Industry's plant pathology catalog covers with great fullness the literature of plant diseases. The Botany catalog, filed in that Library also, consists of about two hundred thousand cards and is the result of a highly successful attempt to enlarge and co-ordinate the collections of botanical literature in the libraries in Washington. It makes available information as to all the main botanical collections in the country, notably those of the Gray Herbarium, the Arnold Arboretum, Lloyd Library, and others in addition to those of the Library of Congress, the U. S. Department of Agriculture, and the National Museum, the Smithsonian Institution, the Geological Survey, the Surgeon General's Office, and the private libraries of Dr. Edward Lee Greene and Captain John Donnell Smith. There are author and subject cards for all entries and in addition a number of scientific serials, principally those published before 1800, have been carefully analysed. The subject matter represented is much wider in scope than is justified by the strict use of the term "botanical." The allied subjects of horticulture, tropical agriculture, fibers, gums and resins, pharmacology, special crops (cacao, cotton, rubber, etc.), seed adulteration and control, are found in this catalog as well as voyages and explorations which touch upon the botany of a country or publish scientific results. The catalog is also rich in biographies and bibliographies of botanists. Other work of the Bureau of Plant Industry Library is the verification and editing of all bibliographies contained in the publications of the Bureau and in the *Journal of Agri-*

cultural Research. Last year this work comprised one hundred and twenty-eight manuscripts including two thousand one hundred and twenty-five references. An undertaking of the Library which is much appreciated is the compiling every two weeks of a list of the contents of the botanical periodicals received in the Bureau. This list is circulated to the scientists and others interested and has cut down very materially the circulation of the journals themselves, which had become such an immense piece of work that it threatened to break down of its own weight. It is no longer necessary for a scientist to see every botanical periodical issued. He receives this list instead and asks only for those journals which contain material of interest to him.

The Bureau of Chemistry Library contains the reference collection of the Department on the subject of Chemistry, and performs much interesting and important work in connection with the Bureau's activities, both in the line of research and in the administration of the Food and Drugs Act. One of the most interesting of its activities is a file of foreign food laws which it has collected in the original, translated, indexed and made available to investigators. This collection is highly valued by the chemists themselves, and by the trade which is affected by the enforcement of the Pure Food and Drugs Act. There are 17 field libraries maintained by the Bureau Library also for the laboratories of the Bureau located thruout the country.

The Forest Service Library is one of the largest and most important of the Bureau collections. It has an index consisting of more than 100,000 cards which cover not only the books and periodicals relating to forestry, lumbering and forest products of all kinds but which includes analytics of all material of interest to the Forest Service contained in trade papers, as well as much manuscript material. There are also one hundred and sixty-two field libraries maintained by the Forest Service for its workers on the national forests, at the forest experiment stations and the Forest products laboratory. Thirty-one thousand books are charged by the librarian to these stations and there is a special flavor of romance about this work when we visualize the lonely lookout stations and the isolated workers to which these libraries find their way.

The Department's collection of state and federal laws is deposited for the most part in the office of the solicitor. We should omit any mention of this branch of the Department Library as being less interesting were it not that a statement as to why this collection is necessary is of interest. The fact that the Department of Agricul-

ture enforces about fifty federal statutes, and that last year 6,000 cases of violation of these laws were uncovered and prosecuted and almost \$250,000 collected in fines is not realized by most people. The rank and file of the population think of the Department of Agriculture as existing principally for the benefit of the producer—the much heralded farmer—whereas in fact it exists just as much for the consumer. Over a third of its appropriations are devoted to regulatory work, which, of course, means the enforcement of these fifty statutes which protect your health and safety and that of every other citizen and sojourner in our land. The enforcement of these laws requires a staff of thirty-three lawyers and ten title attorneys. "Many of the criticisms of the Department in Congress and elsewhere can be traced to the sore spots left by the pressure of the laws laid upon the Department for enforcement."

Then there is the Library of the States Relations Service which has many and varied functions, two of which stand out pre-eminently—First, its part in the preparation of the Experiment Station Record, which since the establishment by law of the State experiment stations in 1888, has indexed and abstracted the great body of experimental data collected in this country, and a large proportion of that produced abroad. The Experiment Station Record is probably the most important single supplement to the main catalog. The other outstanding activity of this Bureau Library is the collection of the literature of the extension movement, which has been greatly augmented under the provisions of the Smith-Lever act. The county agent and the Farm Bureau go hand in hand, but that is another story.

The Library of the Bureau of Entomology consists of a highly specialized collection of both American and foreign works on economic entomology, as well as systematic works on American entomology and the more important foreign systematic works. Taken as a whole this collection may be said to be the best in the country on its economic side. The catalog contains over 50,000 cards and is very fully supplemented for American economic material by the Bibliography of American Economic Entomology. The first eight parts of this, covering the literature from 1860 to 1904, were published by the Department. In 1917 the Index to the Literature of American Economic Entomology 1904 to 1914, prepared in the Bureau, was published by the American Association of Economic Entomologists. Index No. 2, for 1915 to 1919, prepared in the Bureau Library, is now being published by the Association.

Then there is the Crop Estimates or Statistical Library, which is said to be one of the strongest

statistical libraries in the country, and whose votaries love and prize it beyond any words of mine to convey to you; the Library of the Bureau of Public Roads, containing a good collection on engineering, drainage, irrigation, rural sanitation, heating, etc.; the Farm Management Library dealing with the subject of agricultural economics in all its phases; except marketing and crop statistics of production and last but not least in my estimation, the Bureau of Markets Library—I know most about this because of a five months' tenure of office there and having had not the smallest thing to do with collecting or administering it before that time, no considerations of modesty would prevent my talking about it for some hours to come were it not that your hard hearted program committee has imposed a time limit upon me.

The Bureau of Markets Library collections are not large for the reason that there has not much been written on the distribution and marketing side of agriculture. In spite of the fact that as far back as 1681 canny John Houghton of the Royal Society wrote that "What the husbandman is concerned with is the *materia prima* of all trade and the finding of a vent for his commodities is as necessary to his end as it is to know the ways of tilling, planting, sowing, etc."—in spite of this early recognition of the importance of marketing in agricultural, and indeed in all, economy, no serious attempt to work out the problem was made until recent years. So the literature of the subject is not extensive and of all things is the most elusive. Eternal vigilance is the price of collecting it and I stand abashed at my predecessor's skill and that of the Department Library in accomplishing the feat. The Bureau of Markets collections number less than five thousand pieces but it is probably as comprehensive as it is possible for it to be. One of the most important lines of work carried on in the Library is the maintaining of a legislative file of all material of interest to the Bureau. The *Congressional Record* is received each morning and all work of special interest is briefed. Two copies of all bills, resolutions, and hearings of interest to the Bureau are requested daily, and filed by subject in folders so that the progress of any bill which is of interest may be followed day by day from its introduction to its final passage.

There is much omitted and much that has been touched upon has received but cavalier treatment. We hope, however, that this bird's-eye view of the great reservoir of agricultural information stored in the Library of the U. S. Department of Agriculture may tempt you to investigate for yourselves, and thus enable us to be of greater service to you than we have ever been before.

Cataloging and the Library Schools*

By ASKEL G. S. JOSEPHSON
Chief Cataloger, John Crerar Library, Chicago

THE study of cataloging must be considered as the fundamental study of all who intend to take up library work, not as a subject of interest to those only that intend to become "mere catalogers." There can be no "mere catalogers" any more than "mere reference librarians," or "mere shelf listers," or what not. The profession of librarianship, if it is to be regarded as a profession and not as a trade, must be looked upon as one profession, and as long as the student is in the school, he should be made to see the whole as a whole. If he has been led to regard cataloging as something apart from the rest, as something different, curious, inferior, it is the fault of the schools that have regarded it as such. Or is it not to regard the subject as inferior when it is made selective in the senior year? And does anyone who knows what the instruction in cataloging is and has been, wonder that, when such a choice is put before students, they will have none of it? Or when an instructor tries to make cataloging "interesting" by connecting it with social service, with the result that, when the students in the course in library extension get a taste of real social service, they again will have nothing to do with cataloging?

You cannot make cataloging "interesting" by trying to show that it really is something else, nor can you select those students that may have special aptitude for cataloging by saying to the whole senior class: "You do not need to take cataloging, if you do not care to," if nothing has been done before to bring to the students the idea that cataloging is interesting in itself, because it brings out the essential qualities in the students and separates the real librarians from the library clerks. And let me say right here that it is not *what* a library worker does, but *how* he does it, in what spirit he does it, that makes him a librarian or a library clerk. It makes all the difference in the world whether a piece of work is done in a scientific spirit or as a matter of routine.

A good way to interest the students in the school in cataloging would be to give them interesting books to catalog, not the usual cataloging "snags," but books of literary or scientific interest that present some bibliographical complications, either in the multiplicity of parts or illustrative matter, or in the sequence of editions.

*The following is the substance of a letter written to an instructor in cataloging in one of the library schools, who, in replying to a questionnaire as to what the schools are doing to interest the students in cataloging, asked me to suggest what should be done.

But what should be done to make the would-be librarian understand that cataloging is an essential, yes, *the* fundamental study preparatory to his calling? In my opinion, he should first be taught the principles of book description, history of the book, bibliography. If the student after such a study is given the usual training in the technique of library cataloging, he will understand the meaning of this technique, these "dots and dashes" which he now is likely to think is the whole thing in cataloging, as I lately was told by the instructor in cataloging in one of the schools that these were the essential, the most important thing in the whole cataloging instruction.

But these preliminary bibliographical studies are not the only background that a library student needs, he must have a definite cultural background and an appreciative understanding of the spirit of research. The minimum in this respect is usually thought to be acquired during the four years that the student spends in college. The ordinary college course does not, however, always give the particular studies that should be required as preliminary to the library course. A library school connected with a university has a good opportunity to arouse the interest of students who seem particularly adapted to library work and to encourage them early in the freshman year to consider a future library career. For such students, then, a special course should be laid out, so that they already from the beginning of their college years are able to acquire the particular knowledge that will be of aid to them when they come to take up the particular library school studies. Such a course should include a thoro study of languages, including Latin and German as a good knowledge of these languages, combined with some knowledge of comparative philology will enable one to find his way in most other languages; then history, not only political, but social and cultural, and the history of literature in its broadest sense, not only of belles-lettres, but of historical, economic and scientific literature as well.

A library school not connected with a university should require a year's careful study along these lines of all students who have not specialized already in the subjects mentioned above. I suggest tentatively the following books for such a course:

Sedgwick & Tyler: A short history of science. 1917.

Darmstaedter: Handbuch der Geschichte der Naturwissenschaften und der Technik. 1908.

Ingram: A history of political economy. 1915.

- Bücher: Industrial revolution. 1901.
 Zimmer: Engineering of antiquity and technical progress in arts and crafts. 1913.
 Iles: Flame, electricity and the camera. 1900.
 Macpherson: A century of intellectual development. 1907.
 Prothero: A memoir of Henry Bradshaw. 1888.
 Bürger: Friedrich Adolf Ebert. 1910.
 Ingold: Notice sur la vie et les oeuvres de Marie Pellechet. 1902.
 Langlois & Seignobos: Introduction to the study of history. 1898.
 Clark: The care of books. 1902.
 Literature of libraries in the seventeenth and eighteenth centuries. 1906-1907.
 Madan: Books in manuscript. 1893. New ed. 1920.
 Blades: Books in chains. 1892.
 Middleton-Wake: The invention of printing. 1897.
 Pollard: Last words on the history of the title page. 1891.
 Pollard: An essay on colophons. 1905.
 Koopman: The book lover and his books. 1917.
 Garnett: Essays in librarianship and bibliography. 1899.
 Brown: A manual of practical bibliography. 1906.
 Ferguson: Some aspects of bibliography. 1900.
 Petzholdt: Bibliotheca bibliographica. 1886.
 Langlois: Manuel de bibliographie historique. 1901-1904.
 Kroeger: A guide to the study and use of reference books. 1917.
 Wheatley: How to form a library. 1886.
 Wheatley: How to catalogue a library. 1889.

Summer Courses in Library Work

CHAUTAUQUA SCHOOL FOR LIBRARIANS

THE twenty-first annual session of the Chautauqua School for Librarians will be held on July 4th-August 12th.

Only those are accepted who are already in library work or definitely appointed to positions.

As in the past four years, students' records are cumulated and filed from year to year, so that those who attend four full sessions may be granted the certificate of the School.

The freshman class has regular courses in cataloging, classification, reference work and organization. Courses of the sophomore group include history of libraries and book-making, book binding, advance cataloging, classification and reference work. The juniors have courses in subject bibliography, school and children's work, types of libraries, and elective studies in literature and history. Work of the senior class includes cataloging and reference work in public documents, general and trade bibliography, administration and work with high school, normal school and college libraries. Apart from these courses there will be special lectures given before the classes in joint session.

The instructors are Mary Elizabeth Downey, Library Secretary and organizer of Salt Lake City (Utah), Polly Fenton, California State Library; Edna M. Hall, Warren (O.) Junior High School Library; Mary Belle Nethercut, Rockford College Library, Rockford, Ill.; Mae Byerley, Long Branch, New York; Mary T. Brown, Conneaut (O.) Public Library; and Grace Backus, Warren, O.

Application for admission should be made as early as possible to Mary E. Downey, Chautauqua, New York.

The tuition fee is thirty dollars for each summer season.

KANSAS STATE NORMAL SCHOOL

AS an introduction to library work the following courses are offered by the staff of the Kellogg Library and the faculty of the State Normal School at Emporia, beginning June 8th and closing July 20th. A certificate will be issued, but the courses (except that in children's literature) do not carry regular credit toward a teaching certificate or degree.

The courses are: Children's literature, six lectures a week, June 1st-July 28th, Faye Huffman, head of the school and children's department; Reference work, including methods of teaching and use of libraries, six lectures a week, Mrs. Jessie Luther, reference librarian; Book selection, ordering and accessioning, four lectures weekly, Anita Hostetter, research secretary; Library management, including lending systems, repair and binding, school libraries, county libraries and publicity, two lectures weekly, Maude Shaw, Head of the Circulation Department, Harriet L. Koch, and Willis H. Kerr, librarian; Classification and cataloging, six periods a week, Frieda K. Williams, head of the Catalog Department.

Further information will gladly be furnished by Willis H. Kerr, Librarian. For list of available rooms write to the Dean of Women, Kansas State Normal School, Emporia.

Library Week July 18-22 is devoted to popular afternoon conferences for school people, social workers, editors and librarians on modern uses of books and libraries, books as tools, etc.

UNIVERSITY OF WASHINGTON

THE summer library courses follow in general the same outline as of last year. These courses are intended principally for teachers who take charge of school libraries, in addition to their teaching duties, and credit for the work is given by the College of Education.

The subjects included are: Organization and

educational purpose of libraries, reference work, book selection, cataloging and classification, order and accession work, given by the regular faculty, and two courses on the theory and management of high school libraries and on daily service in the high school, given by Mildred Pope, supervisor of high school libraries in Seattle.

Act IV

COMMON sense at last begins to prevail at Leipzig. They have now definitely abandoned the scheme of basing their foreign charges on the fluctuations of exchange. Instead of dividing the world up virtually into as many classes as there are countries, there will, under the new program, be but two groups. The first, enjoying the more favorable financial position, will include Belgium, China, Denmark, Egypt, England, France, Holland, Japan, Mexico, Norway, Sweden, Switzerland and the United States. The nether group will consist of Argentina, Brazil, Chile, Greece, Italy, Portugal and Spain. The former countries will be charged double the domestic price, the latter only 60% more than in Germany. The *Teuerungszuschlag*, once 20%, later 10%, is cancelled. Now, as heretofore, antiquarian items are to be exempt. The situation, however, is left in a somewhat chaotic state because of two opposing exceptions: (1) Publishers may charge more than 100% if they like; (2) publishers may employ the domestic price if a bill totals more than M. 300. The first shows there is not yet concord in the *Börsenverein* and leaves the way to extortion still open. To the second it may not be expected that many will resort tho it is to be remembered that so prominent a publisher as Wilhelm Engelmann had already, on January 1, 1921, announced that thereafter no distinction between foreign and domestic orders would be observed in journals he published.

Thus is writ the last chapter but one in an extraordinary story of international book-selling. It has no counterpart anywhere unless we cite the so-called "service basis" upon which the H. W. Wilson Company's bibliographies are sold. The first year of Government control closes with virtual capitulation. The simple fact is that the plan never was literally enforced more than a couple of months. Nine cents, the arbitrary value assigned the mark for America at the outset, dropped in midsummer to eight, then in autumn to seven, and in January was cut to five. In fifteen months' time the American rate has dropped from 660% above the domestic price to 100% and the claim is made that Ger-

man material can now be had absolutely cheaper than before the war.

The Macmillan Company advertises Elton, Oliver. A survey of English literature, 1780-1880, in four volumes. This is but a re-issue of two works published in London by Edward Arnold in 1912 and 1920 respectively, under the titles A survey of English literature, 1780-1830; *idem*, 1830-1880. Volume two of each Arnold edition contains the index of the two volumes. Macmillan numbers the four volumes consecutively but does not correct the references in the index. The result is that in the index in volume IV. it is necessary to change every reference to volume I. by reading volume III. and to volume II. by reading volume IV. Libraries, therefore, will do well to get the Arnold edition, especially those libraries that own the Survey of 1912.

FREE ON REQUEST

Asa Don Dickinson, delegate of the A. L. A. at the recent meeting of the American Academy of Political and Social Science at Philadelphia, draws the attention of librarians to a set of charts outlining the organization, scope and accomplishments of the League of Nations, posted in the lobby outside of the conference room, which attracted a great deal of attention, and to the fact that a miniature set of these charts have been prepared which any librarian may have for his library on application to Mr. D. F. Garland, Welfare Department, National Cash Register Co., Dayton, Ohio.

"How to Organize a Library" by Zana K. Miller, librarian of the Library Bureau, has been prepared in response to frequent requests coming to the Bureau "for a brief pamphlet describing the most essential library records and the simplest methods of carrying on a small library. . . . Only the most essential records are described."

The John Crerar Library's New Building

By CLEMENT W. ANDREWS, Librarian

IN the first part of this paper (see LIBRARY JOURNAL, May 15, 1921) an attempt has been made to state the general principles of the economics of library architecture. This second part treats of the application of these principles in a rather peculiar case, that of the newly erected building of The John Crerar Library.

The question of a site for the Library was of course one of the first to engage the thoughts of the Directors. Before coming to a decision as to the most desirable location of the permanent home, temporary quarters in a central location were secured, in order to learn by experience the nature of the service the Library could best render, the classes of readers it would serve, and especially the parts of the city from which they would come. The early reports of the library contain the results of these investigations. From them it became evident that the greatest usefulness could be secured only in a central location, within the business district and accessible not only from all parts of the city but also from the railway stations. It was found that the numbers of readers coming from each division of the city and directly from offices in the business district were approximately equal and that an unexpectedly large number came from out of town.

That such considerations are important is self evident, but the magnitude of the economic factors involved might well be overlooked. When the South Park Commissioners asked the Directors to consider placing the Library across the Illinois Central tracks instead of alongside the Art Institute, the President, Mr. Hughitt, pointed out to them that a removal further East of only five hundred feet would entail upon every reader an additional walk of one thousand feet. As at that time one hundred and fifty thousand readers were using the Library each year this meant that the citizens of Chicago would walk each year thirty thousand extra miles and even at the brisk pace of four miles an hour take ten years of working time for this extra walk.

Again the Directors have always laid stress on the importance of a site near the Chicago Public Library, with which The John Crerar does not compete, but which it supplements. Personally, I had not considered this very important, and was rather surprised to have the reference librarian of the Public Library tell me, the other day, that she would be very glad to have us established in our new quarters, as it would

save her much time in directing people where they could find the books they wanted. To say "across the street" would be much easier than to give the elaborate directions she then found necessary. If this saves time for her it must be a much greater economy of time and money for the readers to go across the street instead of to such a location as that of the Newberry Library.

The temporary quarters mentioned did not prove to be as temporary as was expected. Intended to serve for five or ten years at the most, they have had to serve twenty-five years with such additions as could be obtained in a building in which space has always been in great demand. Indeed some of the staff became pessimistic and referred to them as the permanent quarters. The causes of delay were beyond the control of the Directors. Until 1910 they fully expected to secure a site on Grant Park nearly opposite the Public Library. The Illinois Legislature passed two separate acts permitting this and their action was accepted by the City Council and the South Park Board in ordinances approved by ninety-five per cent of the abutters, and ratified by a large majority of the voters of the South Park District, but was negatived by a decision of the Illinois Supreme Court on the ground that the question was *res judicata*.

The Directors next proceeded to obtain a site by purchase. They announced their willingness to consider any between Twelfth Street and the river. Perhaps a score were offered and finally in 1912 they bought the property at the northwest corner of Randolph Street and Michigan Avenue. It runs one hundred and thirty-five feet north on the Avenue and not quite one hundred and thirty feet west on Randolph Street to the alley. When purchased there were on it four buildings of varying sizes, the one on the alley being of fireproof construction.

While a lay-out and partial floor plans had been made for the Grant Park building, it was with the purchase of the Randolph Street site that the preparation of plans began in earnest. Messrs. Holabird & Roche were selected as the architects. The plans now carried out are the ninth set on which estimates have been asked and many of these sets in their final form were the result of repeated modifications.

The reasons why so many plans were made are many and varied. Among them are the varying size and character of the buildings to be destroyed, the very different bonuses which would have to be paid for the cancellation of the exist-

SEVENTH FLOOR PLAN

TENTH FLOOR

ing leases; the ambition of the Kaiser; the widening of Michigan Avenue, the shifting of the millinery trade; all economic considerations not previously mentioned.

All plans have contemplated the utilization of the whole property ultimately, but the first proposed to begin with the north fifty-five feet; the second with the south eighty feet; the third to the sixth were for the temporary use of the old buildings during the war, with or without a small portion of the permanent building; the seventh and eighth proposed to use all but the alley building; while the ninth uses only about eighty feet square on the corner.

The only ones of interest now are those for the Grant Park building as illustrating the ideal; the one for the complete building as illustrating the best attainment of this ideal possible with a restricted area, and the necessity of securing income from rentals; and the actual building as showing the compromises due to the present high cost of construction.

The Grant Park building was a condensation of the New York Public Library, avoiding some of its disadvantages, but securing most of its advantages. Had this plan been carried out it would have given the Library a building admirably adapted to its use at the time. Even after twenty years it would require only a few and minor changes to adapt it to the needs of the present time.

The area of the Grant Park building would have been approximately sixty thousand square feet; that of the Randolph Street site is seventeen thousand. It is evident that a building on the latter to secure the same capacity would have to be much higher. Moreover, the fact that not only the building but the site has to be

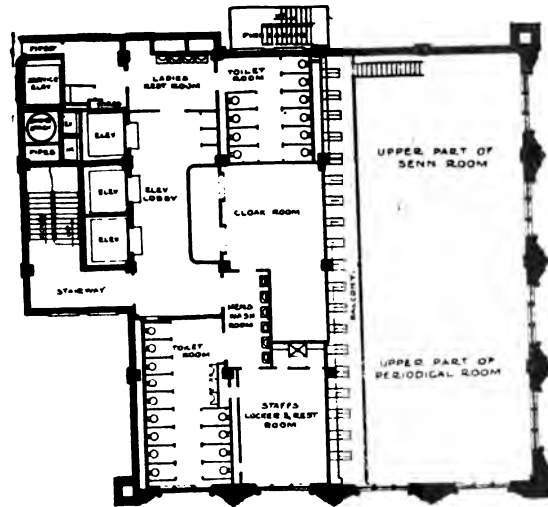

paid for from the funds of the Library made income from rentals a necessity. Fortunately, the loss in actual efficiency is more apparent than real. It is true that the ground floor no longer could be used for library purposes, but it is also true that a floor on the level of and abutting immediately on a busy street is not at all desirable for such purposes. Note in this connection the Chicago Public Library which does not use its ground floor for any of its more important rooms. Nor, if the elevator service is sufficient, does it make much difference how high the reading rooms are placed. The trip in the elevator is the smallest fraction of the time spent by a reader in obtaining his book and a seat in which to use it. It will be, I am sure, much less than that spent by the majority of readers in the larger libraries in climbing the monumental stairs so generally and generously provided by the architects.

The plans for the present site recognize these facts and also the compensating advantages of better light, purer air, and greater quiet, and place the main reading rooms at the top of the building; the subordinate reading rooms below these; the offices and work rooms below these; the stacks below these; and then reserve the two lower floors for rent. At first, also, the stacks would have been confined to the northwest corner of the lot, leaving the street fronts of these floors also free for renting.

This northwest corner, since it has insufficient light for other purposes would be the logical place for the cloak rooms, toilets, etc., but its use is barred by the fact that they must be near the reading rooms so that the building would have to be carried at once to its full height at an expense for waste space not justified by the

ELEVENTH FLOOR

THIRTEENTH FLOOR

returns. The architects have adopted, therefore, a suggestion of my own and have placed these utilities on a mezzanine floor in the center of the building between the two reading-rooms. From this floor short and easy flights of stairs lead up and down to the reading rooms. That going up is monumental in character and lands the reader immediately in the catalog and delivery room. The elevators will stop for readers only at this mezzanine floor, thus securing better supervision, quicker elevator trips, preventing the carrying of wet wraps and umbrellas into the reading rooms, and, not a small consideration in Chicago, inviting all to wash hands before using the books.

Unfortunately when the eighth set of plans, for about two-thirds of the entire building, was submitted to the contractors in July, 1919, the bids were so high (nearly \$2,000,000) that the Directors felt that the Library could not afford to carry them out. Accordingly a new set was prepared for about fifty per cent of the larger building, and approved, and estimates were secured in October of that year. The bid of the George A. Fuller Company was accepted and work was begun at once. If conditions had been normal there is no reason to doubt the completion of the building at the time set in the contract, July 1st, 1920. But conditions have not been normal unless we are to consider them as a new normal.

Strikes in the coal, steel and cut stone industries and gross failures to comply with the terms of the contract on the part of the sub-contractors for hardware and electric fixtures would have in any case delayed the work six months. The greatest delay, however, was in the stack floors and for this the Fuller Company was directly responsible, for they failed to test sam-

ples of the slabs, and allowed the sub-contractor to furnish one-half the number before ascertaining that they were not satisfactory to either architects or owner.

The building occupies an area of about six thousand square feet in the form of a square with a shallow L on the northwest. This L contains the elevators, stairs, smoke stack, and ventilating flues. The book carriers are in a much shallower projection on the north, so that the square is entirely free for library or renting purposes. The height is two hundred feet, the full height allowed by the city ordinance at the time the plans were made. The foundations and columns, however, were made strong enough to carry four more stories, if it should seem advisable to add them. It may be called a fifteen story building with basement and attic, but the statement needs qualification. Two of the regular floors have been omitted and four stack floors inserted in place of them, while on the Michigan Avenue half the thirteenth and fifteenth floors have been omitted and the space added to the height of the reading rooms. The main reading room, on the fourteenth floor is twenty-eight feet high at the center of the arch, and the lower reading rooms are twenty-four feet high. Thus there are on Michigan Avenue fifteen floors and in the rest of the building seventeen. Of these the Library will occupy all but five floors and one-half of the basement.

The foundations are twenty-eight concrete piers, eighty-four feet deep, reaching to a very hard stratum immediately above the bed rock. The columns are steel covered with concrete. This covering is a better protection than tile and occupies less space. By experiment in the temporary quarters it was determined that for a library having a large proportion of quartos

FOURTEENTH FLOOR

and folios the bracket type of stack is far more economical than the standard type and that with this the minimum distance between centers should be four feet six inches.

As the standard makes of shelving come in three foot lengths it is evident that a spacing of the columns eighteen feet each way would make possible running the stacks most economically either east and west or north and south as might be desired. This spacing is also a very convenient one for the use of structural steel. The excess of length north and south is thrown into the outside sections to secure better floor space in the stores, offices and library workroom and the deficiency east and west is concentrated in the middle section, giving by the omission of one row of stacks a wide central service aisle.

The floors are tile arches covered with cement, and this with tutti colori (art marble) in the corridors, all the base sections are art marble; the floors in the lobbies and other display portions, are covered with art marble, with cork tile in the reading rooms, and with cork carpet in the offices and work rooms. The permanent outer walls on the street fronts are of Bedford stone and when the permanent north and west walls are built they will be of the same material. The style is a modified Romanesque, which seems to be admirably adapted to library purposes, especially in a high building. The horizontal not the vertical lines are accented, and these lines indicate the different uses of the floors.

It has been stated that the temporary quarters served as an experimental laboratory for the determination of the best type of stack (in all a dozen were tested) and of the narrowest aisle width permitted. They also permitted the determination of the best type of lighting fixture. From more than a score, the "duplexalite," a

semi-indirect system, was selected by common consent of the staff, and this selection has been confirmed by experience.

The matter of ventilation is of primary importance and here the decision appears to be satisfactory on grounds of economy and efficiency. One large fan ventilates the engine room, basement and the building as a whole, as an office building of its size requires. A smaller fan ventilates the reading rooms either by exhaust alone, allowing fresh air to enter by the windows, or in very cold weather by both exhaust and intake thru heating coils. A third and small fan ventilates the Class Room alone.

The arrangement of the work space for the library staff is also unusual. The whole of the tenth floor is given to them. Each member of the staff has a window with room enough to arrange her desk at any angle desired. Between each pair of workers is a book case four feet high and twelve feet long. These furnish convenient storage space and a considerable degree of privacy. Inside these working spaces is a three foot aisle, thus accounting for the outer row of bays on the northeast and south side of the room. The interior bays are occupied on

EXTERIOR SHOWING THE PUBLIC LIBRARY AT THE LEFT

the east, which have good daylight, by the official catalog, and in the middle by provision for supplies, arrears, books in process, and reference works.

A comparatively new type of windows, the so-called austral windows, have been installed here and quite generally thruout the building. These open in the middle before opening at top or bottom. Each sash carries its own shade. The ventilation resulting from their use is very satisfactory. The arrangement of the staff is such that the books make but one trip around the room. In every respect this working space has met expectations, and I do not know of any better elsewhere.

A notable economy was secured by using reinforced concrete slabs for the stack floors. The saving was about two-thirds of the cost of marble or glass. I am inclined to think that it will be desirable to give them a coating of cement paint but so far our experience with them is quite satisfactory.

One other unusual detail may be noted. In the reading rooms the shelves are literally wall cases, being set in the walls. This was done primarily to secure deeper reveal of the window openings without diminishing the floor space. Novel and useful as the feature is it

usually has to be pointed out to visitors.

I wish that I could speak with as much enthusiasm of the provisions for the readers as I have of those for the staff. The reading rooms are dignified, perhaps beautiful, convenient in arrangement, spacious as to height, but not large enough. Moreover, the wide separation of the books from the delivery desks militates against effective service. If the book lifts and conveyor work as they ought, unfortunately still an open question, this last may not have a serious effect. And of course the deficiency in space was recognized as inevitable when it was decided to build only one-half of the building which had been planned.

The demolition of the old buildings was begun October 10th, 1919, the foundation completed by the end of the year, the frame erected by April, 1920; and the building transferred from the contractors in January, 1921. The delays already mentioned prevented the practical completion until May, 1921, and it was dedicated with suitable ceremonies on May 28th. The cost, fully equipped, has been about \$1,400,000 or about \$1.00 a cubic foot. It is hoped that those who see it and use it will confirm the belief of the Directors that it meets the desire of the Founder that it should be "tasteful, substantial, and fireproof."

Public Libraries and the New Fiction

To the Editor of the LIBRARY JOURNAL:

In fairness to the libraries concerned in my recent survey of 1919 fiction titles, I should like to have you republish the list of libraries, giving revised figures for the number of titles added by each. These revisions are based on later information either imparted by the libraries or obtained by the writer. The revised list is as follows:

1. New Haven139	titles	18. D. of C.85	titles
2. Jersey City128	"	19. Malden84	"
3. St. Louis124	"	20. Lynn83	"
4. Chicago122	"	21. Cleveland82	"
5. Allegheny121	"	22. Worcester80	"
6. Providence112	"	23. San Francisco77	"
7. Toronto111	"	24. Pratt Institute75	"
8. Brockton109	"	25. Brooklyn75	"
9. Boston105	"	26. Quincy71	"
10. Hartford103	"	27. Wilmington71	"
11. Omaha97	"	28. Pittsburgh71	"
12. New York91	"	29. New Brunswick64	"
13. Philadelphia90	"	30. Wilkes-Barré62	"
14. New Bedford90	"	31. Salem62	"
15. Norwich87	"	32. Oshkosh61	"
16. Springfield86	"	33. Portland61	"
17. New Rochelle86	"	34. Baltimore56	"
			35. Fairhaven55	"
			36. Grand Rapids55	"
			37. Brookline51	"
			38. Haverhill48	"
			39. Medford47	"
			40. Evanston42	"
			41. Scranton19	"

The librarians who have taken special notice of my article have raised several interesting

points. The Carnegie Free Library of Allegheny called attention to the discrepancy between my original figures and those now published for that library. This discrepancy was due to the fact that a complete file of that library's bulletins was not received up to the time the proofs were corrected. The same is true of the Enoch Pratt Free Library, of Baltimore, and in a less degree of others. I see now that it would have been better not to have included the Carnegie Free Library of Allegheny and the Enoch Pratt Free Library in my published account. At the same time, justice has now been done to them, and we have the benefit of their corrections.

The Pratt Institute Free Library calls attention to the fact that ten titles listed as apparently not approved by it have actually been approved, some earlier than 1919, and some later. (These are: Couperus' *Small Souls*, acquired 1914, his *Twilight of the Souls*, 1917 and *Old People*. . . . 1918; Aumonier's *The Querrils*, Cournot's *The Mask*, Swinnerton's *September*, Almquist's *Sara Videbeck*, Maxwell's *Life Can Never be the Same*, all in 1920; and James' *A Landscape Painter*, in 1921.) The librarian of Holyoke Public Library (which was not included in the survey) would apparently have liked my list of titles to be more complete. The list was intentionally made representative, rather than complete, inasmuch as it was believed that such a representative list would sufficiently serve the purpose. However, it is expected that the 1920 list will contain about twice as many titles as the 1919 list.

The librarian of another library not included in my survey wrote as follows: "Your article . . . , it seems to me, is of the kind much needed in the library world. The larger libraries have every means of keeping informed about what is going on in library affairs; but too often the smaller libraries find their only source of information, the library monthlies, filled with theoretical articles, suggestive to be sure, but not giving as much practical help as is needed. To libraries situated in cities having no large book store, and receiving library bulletins from only a few libraries, your list is most interesting, stimulating, and helpful. To us in particular it was most gratifying, since we found that of the first eighty-nine books we had purchased sixty-nine, and out of the entire list we owned one hundred volumes. If a fair proportion of my time will help in getting out a list for 1920, I gladly offer it."

Another librarian, whose library was included, writes: "Your article . . . is one of interest. The list is a guide for the purchase of 1919 fiction which I shall be glad to consider." Still another informs me that his library has O.

Henry's "Waifs and Strays," though not thus credited by me, and explains that they classed it as "Literature" instead of fiction, placing it on the shelves with O. Henry's "Collected Works." Another prominent librarian, commenting on the fact that his library has all of the 127 titles first listed, and 176 out of the entire list, remarks: "It makes me feel that we are too liberal in our supply of fiction." He would like, furthermore, to know (1) what is the average number of fiction titles purchased by different classes of libraries, (2) what per cent this is of the total number of titles purchased, and (3) what per cent this is of the total number of new fiction published.

Mr. Bowerman, of the Public Library of the District of Columbia, writes, among other things, as follows: "Our Monthly Bulletin is unfortunately very limited in space, so that we are unable to publish it in all the books added to this library. The lists of fiction are by no means complete. We simply use the space we have for a rather meager selection. No great harm has been done, but still some librarians, reading the article, might think it strange, e.g., that Mary Johnston's 'Michael Forth' should not be in this library, or Zona Gale's 'Miss Lulu Bett,' or O. Henry's 'Waifs and Strays.' Of course we have these books, and certain others that you have listed as not being here. I note that you have protected yourself by using the word 'apparently.'" In a later communication he adds: "In addition to the books of which we buy a considerable number of copies to suit demands, we get every year from one of the local newspapers a large number of titles of new fiction. A good many of them are too poor for us to put in, but others are just about good enough to accept one copy as a gift, put it in, and mark it 'Do not replace.'"

Of the libraries mentioned as having *apparently* not yet approved "Miss Lulu Bett," in addition to the D. of C., as just mentioned, the City Library Association of Springfield and the Carnegie Library of Pittsburgh have written to say that this was not so. The last-named also mentions the fact that they have "Peace in Friendship Village."

The foregoing are the salient features of the correspondence which has been elicited by this pioneer article of mine. I trust that similar pitfalls may be avoided in any future survey of this sort which I may undertake. I am still of the belief that such comparative surveys, made periodically, will go far to establish the fact that our selection of new fiction titles does not rest on scientific foundations, but is done in rather a hit-or-miss fashion.

LOUIS N. FEIPEL

The Status of the Educational Bill

WILL a Department of Education be created? The friends of education are confident. The outlook is rapidly changing. Important new developments may have occurred before this reaches its readers. The situation is this: The Smith-Towner bill was favorably reported by committees in both the Senate and the House of the last Congress. It was revised and promptly introduced into the new Congress as the Towner-Sterling bill (H. R. 7-S. 1252). It is being sponsored in the House by Congressman Towner, of Iowa, and in the Senate by Senator Thomas Sterling, of South Dakota.

Meanwhile the administration measure proposing a Department of Public Welfare has been introduced. This measure would have four divisions under assistant secretaries. The proposed divisions are: Education, Veteran Relief, Social Service, and Public Health.

The National Education Association has not opposed the creation of a department of welfare, but it has insisted that education be not submerged in such a department, which includes interests so much greater in appropriation and personnel that education would be certain not to receive adequate recognition.

The Committee on Education and Labor of the U. S. Senate and the Committee on Education of the House held joint hearings on the proposed (S 1607) Department of Public Welfare. On Thursday, May 18, the educational forces were given an entire session of this committee to make plain their position on the welfare bill.

A score of telegrams and statements by leading educators made unmistakably clear that the educational leadership of the Nation is solidly behind the position taken by the National Education Association. Many other leaders representing the interests of women and other large groups, totaling tens of millions of voters, put themselves so squarely behind the demand that education be left out of the welfare measure and erected into a separate department that the Committee was visibly impressed.

An editorial in the *Washington Herald* for May 21, after stating the situation, proceeds in this manner.

"It would seem that a solution of the difficulty is not far to seek. A Department of Education is also a department of welfare. There is not a single item in any program of so-called welfare, which does not fall within the scope of education. There is no phase of any welfare movement which, to inspire its success, does not have to be hitched to education. Whenever it has been attempted to separate welfare from educa-

tion, the result has been comparative or total failure."

This editorial indicates the general trend of opinion in favor of primary recognition for education which is certain to be more pronounced when the report of the hearing before the committee reaches the leaders of public thought. This report should be read carefully by every educator. It gives positive evidence of an avalanche of opinion in favor of a Department of Education—public-school leaders almost unanimously, seven-ninths of the leaders in higher education as indicated by a referendum of the American Council of Education, leaders from the great women's organizations, and many others who are in a position to know the sentiment of millions of voters and if need be, to unify further that sentiment in favor of the Towner-Sterling measure.

Let every friend of public education join in the effort to obtain primary recognition of education by the Nation. Members of Congress do not care for mimeographed statements and rubber stamp endorsements, but they do wish to know where their constituents stand on this important question. Careful letters and telegrams from the friends of education, who believe in the Towner-Sterling bill, to their respective members of Congress will render a distinct service just at this time when events are shaping so rapidly.

JOY E. MORGAN.

CHANGES IN THE NEW BILL

The fundamental provisions of the bill as introduced in the last Congress remain in the new Towner-Sterling bill. The following are the changes:

Sec. 2. The salary of the Assistant Secretary is left open to be determined by Congress.

Sec. 3. The Department is to include in addition to the Bureau of Education such divisions of the Government as Congress shall determine. This harmonizes the bill with the work of the committee on the Reorganization of the Executive Departments.

Sec. 5. The research work of the Department is extended specifically to include higher education.

Secs. 7-11. Section 7 of the old bill, authorizing the appropriation of \$100,000,000, has been omitted, the amounts authorized for each of the five particular purposes being named in the respective sections. Each of these sections contains a provision definitely and specifically preserving State and local control of education in language that can not be misconstrued.

Sec. 13. This section, corresponding to section 14 in the old bill, has been rewritten. Each State's apportionments are to be made on the certificate of the Chief Education Authority of the State, approved by the Governor. The action of the Secretary of Education is purely ministerial and not discretionary. The section carries a special provision which should convince any person, seeking the truth, that Federal control would be absolutely impossible under this act.

Sec. 14. The power of the Secretary of Education to withhold funds from a State is withdrawn, and instead he is authorized to report to Congress a failure on the part of a State to comply with the statutory provisions of the act.

Sec. 17. This is a new and very important section creating a National Council on Education. It has been highly commended.

HUGH S. MACILL.

CONGRESSIONAL EDUCATION COMMITTEES

The House Committee on Education consists of Simeon D. Fenn, chairman, Ohio; Horace M. Townner, Iowa; Frederick W. Dallinger, Mass.; Albert H. Destal, Ind.; Edward J. King, Ill.; Daniel H. Reid, N. Y.; John M. Robson, Ky.; Adolphus Nelson, Wis.; Clarence Coughlan, Penn.; S. A. Shelton, Mo.; William B. Bankhead, Ala.; Charles H. Brand, Ga.; Samuel N. Brinson, N. C.; D. G. Lowrey, Miss.; Tilman B. Parks, Ark.

The Senate Committee on Education and Labor is composed of William S. Kenyon, chairman, Iowa; William E. Borah, Idaho; Thomas Sterling, S. D.; Lawrence C. Thitts, Colo.; Francis E. Warren, Wyo.; Frank B. Kellogg, Minn.; Daniel M. Shortridge, Calif.; Andrieus A. Jones, N. Mex.; Kenneth D. McKellar, Tenn.; Joshua D. Wollcott, Dela.; David R. Walsh, Mass.

A Home Library

DURING the week of April 25-30 an "Own your own Home" exhibit was held at the St. Louis Coliseum. The Public Library determined to install a display and in addition to blue prints and house plans, books on home-making and manuals of interior decoration, planned to furnish a room as a suggestive library for the home. Five hundred books were chosen altho this number was subsequently reduced owing to the impossibility of procuring all the titles at brief notice.

The task of selecting the books was assigned to the library school and proved an interesting problem, the proportions of the classes and choice of individual titles varying considerably

from the practice of public library selection. A small book-case filled with children's books was of interest to parents as well as young readers.

That the "model library" proved a real attraction was shown by the numerous questions and comments it evoked. Many requests were received for lists, evidence of active interest and desire for such aids to book purchase.

In the reference collection were included Hoyle's book of games, Holt's Encyclopaedia of Etiquette and the Boston Cook Book, several visitors returning with pencil and paper to copy recipes from the latter. The most popular books in the list however, proved to be the World Almanac and the Home Book of Verse. Many evidently having never seen them before, were greatly impressed with their scope and value. Spencer's First Principles and Darwin's Origin of Species provoked adverse comment, several visitors declaring, "books like that nobody reads, and why should they be in a private library?" We were careful to explain that the list was only suggestive, and while we had endeavored to include no unsuitable books, we by no means insisted that all titles in the collection were essential to every private library.

A committee is now engaged in drawing up a tentative list of five hundred books suitable for the home, which when completed will be presented to the staff of the St. Louis Public Library for criticism and general discussion and after the final decision is made, the books will be bought and kept as a permanent collection to be shown whenever desirable. There is no intention arbitrarily to select or name the five hundred best books, and any suggestion of a "model library" is to be avoided, the purpose being merely to include interesting books suitable for home reading. Probably the list when definitely completed, will be printed.

JESSIE S. MCNIECE,

*Chief, Circulation Department St. Louis
Public Library.*

FREE ON REQUEST

The 1920 volume of George Washington Cullum's Biographical Register of the Officers and Graduates of the U. S. Military Academy at West Point has just been published, and appears to be distributed more or less on request. Libraries containing the preceding volume will do well to make their requests for this at once, of the Secretary of the Association of Graduates, West Point. Newspaper and magazine offices, and similar organizations, are so eager to obtain these volumes that very prompt action is desirable on the part of the libraries wanting them.

THE LIBRARY JOURNAL

TWICE-A-MONTH

JUNE 1, 1921

THE unusual number of 600 has been registered a month in advance for attendance at the Swampscott meeting, so that there is good hope that the Conference will prove a banner one in attendance, as well as in interest. It is to be noted that beside the all-comprehensive American Library Association, no less than seven other library organizations of national scope are to hold meetings there. These include the Special Libraries Association, the organizations of state and of law librarians, the League of Library Commissions, the Association of Library Schools, the Library Workers Association, and the Bibliographical Society—an interesting showing of the diversity as well as unity of library interests in these days. The joint meeting of the A. L. A. and the S. L. A. will be a marked feature of the Conference, and President Hyde's contribution in the present issue of the LIBRARY JOURNAL furnishes an interesting preface to the discussions at Swampscott.

★ ★ ★ ★ ★ ★ ★

DR. ANDREWS' comprehensive study of the Economics of Library Architecture should be especially useful in the planning of libraries, not least to architects and architectural advisors for library boards in illustrating the several types of libraries, with especial reference to lighting, heating and ventilation, as well as stock and reading room facilities. As he points out, the electric light and artificial ventilation have made possible today what was impossible a generation or so ago. Nevertheless, natural supply of light and air are not to be ignored. The John Crerar Library will probably furnish the best example of the office building type of library edifice, the fundamental purpose of which is, literally, to provide a financial basis for the superimposed library. The best example of this hitherto had been the New York Mercantile Library which, unfortunately, has literally fallen from its high estate, as the growth of the New York Public Library system has made its work less necessary, and now occupies quarters below stairs in the Clinton Hall building. The Cleveland and Los Angeles libraries still camp out in business blocks, but look forward to "owning their own" library at no distant date.

THE supercedure of Dr. P. P. Claxton as Commissioner of Education, thru what seems to be a political appointment of his successor, will be lamented by those who know the great service which Dr. Claxton, appointed by a Republican president, and continued by a Democratic president, has rendered to the cause of education. He has made his personal work and his office a leading factor in the educational development of the country, and this educational leadership on his part has been of vital importance. Particularly, he has recognized the growing value of libraries as an element in education parallel with the schools, and he has been most ready thru personal presence and addresses to do his part in the library field. The office is one which should be aloof from partisan politics, and while good will should be extended to the new appointee, in the hope that he will prove himself worthy of the succession, it has not become manifest that his experience and proof of fitness are the qualities which have suggested him for this office which is to a high degree responsible for the Nation's welfare.

★ ★ ★ ★ ★ ★ ★

CENTENARIES, in whatever multiple, are useful in the library field, because they give opportunity to bring to the notice of the public the works of celebrated writers or the products of notable periods. The year 1921 is the sixcentenary of the death of Dante, who died September 14, 1321, and the National Dante Committee, headed by President Finley, has issued a special appeal to libraries to utilize the opportunity by making special Dante exhibits, emphasizing particularly American contributions to Dante literature. The Committee will furnish, on application to its Executive Secretary, Irwin Smith, at the Italy-America Society, 23 West 43rd Street, New York, a Dante bibliography which will serve to check up library collections. Such exhibits representing a contribution to universal literature of the greatest of Italian writers, will fit in well with other exhibits in showing what Italy, as well as other nations, has done in the making of America, for the thought of Dante has been a potent inspiration in the work of freedom.

LIBRARY ORGANIZATIONS

AMERICAN LIBRARY ASSOCIATION SWAMPSCOTT CONVENTION

REGISTRATION

REGISTRATION for the Swampscott A. L. A. meeting is progressing rapidly, and the New Ocean House accommodations are nearly all taken up. All intending to be present at the convention should be sure to apply for rooms on or before June 10, as it is very important that the rooming committee know what accommodations must be provided.

Hotel Preston, on a bluff overlooking the ocean, is still available for a large number, and those who desire to spend only a part of the convention in Swampscott can be taken care of there for less than the five-days period if desired. Applications for all hotel accommodations must be sent to the American Library Association, care of New Ocean House, Swampscott, Mass.

Any librarians, assistants, or library trustees, who expect to be present at one or more sessions of the American Library Association at Swampscott, and who are not registered with the New Ocean House A. L. A. committee for room at one of the hotels, or with Mr. Sherman of the Lynn Public Library for outside accommodations, should send name, position and library address as soon as possible, to Frederick W. Faxon, 83 Francis St., Boston, Mass., for inclusion in the advance attendance register. Also, on arrival at Swampscott, it is necessary to go to the A. L. A. headquarters desk and have name checked, which is the official registration. Badge, program and other printed matter will be there presented. See also announcements in L. J. for May 15, p. 461.

TRAVEL NOTICE—III

For information regarding routes, rates, etc., see LIBRARY JOURNAL for April 1st, page 317, also the May 15th number, page 461.

Since these announcements were made, the following rates have been announced:

Eastbound Summer Excursion Fares From Pacific Coast

Summer excursion rates have been authorized from principal points in California, Nevada, Oregon, Washington and Western British Columbia to certain Eastern destinations, including Boston.

Date of Sale

From California, Oregon, Washington and

Western British Columbia, June 15th to August 15th, with final limit October 31st, 1921.

Stop-Overs

Stop-Overs will be allowed at all points on going and return trip, except on going trip within California, or west of Huntington, Ore., Missoula, Mont., Whitefish, Mont., Fernie, Kamloops and Prince Rupert, B. C. These fares are lower than the certificate plan.

The summer excursion rate from Los Angeles, San Diego, Oakland, San Francisco, Portland, Seattle, Tacoma, Vancouver and Victoria is \$193.40 including war tax. The A. L. A. certificate rate is approximately \$20.00 higher.

GENERAL SESSIONS

First Session, Monday evening, June 20

Address of Welcome—Dr. George Edward Woodberry.

Response by the President.

A greeting to the Association—Sarah Louise Arnold, dean of Simmons College, Boston, Mass.

The prophet and the poet—Professor Dallas Lore Sharp, Boston University.

10:00 p. m.—Reception.

Second Session, Tuesday morning, June 21

The President's address—Alice S. Tyler.

Greetings from four affiliated organizations by their presidents:

Edward H. Redstone, president of the National Association of State Libraries;

W. R. Watson, president of the League of Library Commissions;

Frederick C. Hicks, president of the American Association of Law Libraries;

Dorsey W. Hyde, Jr., president of the Special Libraries Association.

Business:

Constitution and By-Laws

Committee reports

National certification—C. C. Williamson

Recruiting for library service—

Library co-operation with other countries—Mary Eileen Ahern

Appointment of committees.

Announcements.

Other business.

Third Session, Wednesday evening, June 22

Subject: State Problems and State Progress in Library Affairs.

Program by the presidents of State Library Associations. Several short talks will be made by officers of the state organizations.

Libraries and the nation—Hon. H. M. Towner, member of Congress from Iowa.

Business:

Constitution and By-Laws.

Committee reports.

Other business.

Fourth Session, Friday morning, June 24

A joint meeting of the American Library Association and the Special Libraries Association.

Subject: Co-operation between Public and Special Libraries.

From the public library point of view—C. F. D. Belden, librarian, Boston Public Library.

June R. Donnelly, director Simmons College Library School.

Fifth Session, Saturday morning, June 25

Joint meeting of the American Library Association and the League of Library Commissions.

Subject: Library Extension: Its Scope and Methods.

The city's leadership in book distribution—Dr. Arthur E. Bostwick.

The rural library and rural life—Dr. Kenyon L. Butterfield, president of Massachusetts Agricultural College, Amherst, Mass.

Discussion of county library development—State-wide library service—Julia A. Robinson, secretary, Iowa Library Commission.

Sixth Session, Saturday evening, June 25

Subject: Today's Tendencies in Book Publishing and Distribution. Macgregor Jenks, Atlantic Monthly Press; Frederic G. Melcher, National Association of Book Publishers; Glenn Frank, Century Co.

Resolutions Committee report.

Report of Tellers of Election.

Unfinished business.

Installation of President.

Presentation of new officers.

Adjournment.

TRUSTEES SECTION

Friday Evening, June 24

What proportion of total public expenditures should public library trustees claim for their libraries?—J. Randolph Coolidge, Jr., trustee of the Boston Athenaeum. The Function of the Public Library Trustees—Henry W. Lamb, trustee Brookline (Mass.) Public Library.

"They also Serve"—George H. Tripp, librarian, New Bedford (Mass.) Free Public Library. Clarence E. Bement, trustee of the Lansing (Mich.) Public Library will also speak.

The Committee on Benefits and Pensions, appointed at the Colorado Springs Conferences, will make its report.

Every trustee who expects to attend the Conference is requested to communicate with Frank Hervey Pettingell, Los Angeles (Calif.) Stock Exchange, who is chairman of this section.

CONFERENCE OF LIBRARIANS OF COLLECTIONS ON NATURAL SCIENCES

See announcement on p.

Programs for the section meetings and for the sessions of the other organizations meeting at Swampscott will be found in the LIBRARY JOURNAL for May 15, p. 462-465.

MEDICAL LIBRARY ASSOCIATION

THE twenty-fourth meeting of the Medical Library Association will be held in Boston, June 6-8.

First session, 10 a. m., at the Boston Medical Library, 8 The Fenway. Program: Report of Committee on Standard Classification, James F. Ballard. Round table on reference aids, led by Mrs. Grace W. Myers, Treadwell Library. Association business.

General meeting at 8 p. m., Boston Medical Library. Presidential address, John W. Farlow, librarian Boston Medical Library. Some Historical Facts concerning the Catoptron by Johannes Remmelinus, by George S. Huntington of New York. Interesting Medical Medals, by Malcolm Storer of Boston.

Visits will be made to various medical libraries and other points of interest, among which: The Boston Medical Library, after the Monday morning meeting; Harvard Medical School Library, Monday, 3 p. m.; Boston Public Library (where an exhibit of rare medical items will be shown), Tuesday at 10 a. m.; Harvard College Library, Tuesday afternoon at 3; Treadwell Library, Massachusetts General Hospital, Tuesday evening at 8 (special exhibit of medical book plates); Boston Athenæum Library, Wednesday morning at 9:30.

NATIONAL EDUCATION ASSOCIATION LIBRARY DEPARTMENT

THE fifty-ninth annual meeting of the National Education Association will be held at Des Moines (Ia.) from July 3rd to 8th. The program of the library department, which will hold its sessions at the Public Library, is as follows:

Tuesday morning, July 5

Adeline B. Zachert, director of School Libraries for the State of Pennsylvania, Harrisburg, Pa., "Joy Reading in Elementary Schools"; W. H. Kerr, librarian, "State Normal School, Emporia, Kans., "The Normal School Library as a Teaching Institution"; Sherman Williams, chief

of the School Libraries Division, Education Department, Albany, N. Y., "The Purpose of the School Library"; Joseph L. Wheeler, Public Library, Youngstown, Ohio, "Home Reading with School Credit"; Ellen F. Chamberlayne, High School Librarian, Binghamton, N. Y., "Relation of the High School Library to the Other Departments of the School."

Wednesday afternoon, July 6

Joint session with the National Council of Teachers of English.

Professor A. B. Noble, Iowa State College, "Stepping Stones to Literary Taste"; Margaret Skinner, Janesville, Wis., "Recent Literature for High Schools"; Carl H. Milam, secretary, American Library Association "The Part of the Public Library in Public Education."

Friday afternoon, July 8

Business meeting. This meeting will include discussion of the proposed by-laws, discussion of statement on libraries in education, report of the survey of Normal School Libraries, and other matters of business.

There will be a library exhibit at the Public Library. All exhibits should be addressed to Grace Rose, Public Library, Des Moines, Iowa, and plainly marked Library Exhibit, N. E. A.

A library luncheon will be held at the Harris-Emery Tea Room on Wednesday, July 6, at 12 o'clock, \$1.25 a cover. All who are interested in any phase of library work are invited to be present. There will be a number of very brief talks by those whose experience and ability will guarantee a stimulating and enjoyable occasion. For reservations notify Julia A. Robinson, Historical, Memorial and Art Building, Des Moines, Iowa.

The officers of the Library Department are: President, Sherman Williams, chief of School Libraries Division, Education Department, Albany, N. Y., vice-president, M. W. Poulson, Brigham Young University, Provo, Utah; secretary, Margaret Ely, Principal, Book Selection Department, Chicago Public Library.

LIBRARY WORKERS ASSOCIATION

SO far the Library Workers Association has found its method of correspondence voting simple and effective in discovering the wishes of its members. Two matters lately brought before the members have been the election of three directors to the Board and the revision of dues.

The three schedules of dues submitted were as follows:

1. Yearly dues, \$2 for those with salaries under \$1200; \$5 for salaries between \$1200 and \$1800, and \$10 for salaries over \$1800.

2. Yearly dues, \$1 for those with salaries

under \$1200; \$3 for those between \$1200 and \$1800, and \$5 for salaries over \$1800.

3. Yearly dues—flat rate of \$3.

The vote on this was 18 in favor of no. 1, 56 for no. 2, and 26 for no. 3. This indicates the preference of a large majority for a sliding scale. The dues for the Association are therefore: Yearly dues—\$1 for those with salaries under \$1200; \$3 for those between \$1200 and \$1800, and \$5 for salaries over \$1800.

The three directors, Ruth Alexander, Carl L. Cannon, and Clarence W. Sumner, whose terms expire June 24, 1921, were re-elected.

MARIAN C. MANLEY, *Executive Secretary.*

NEW YORK SPECIAL LIBRARIES ASSOCIATION

THE New York Special Libraries Association has closed a successful year with its annual meeting on May 18th. Instead of quarterly meetings which has been the custom since its organization in 1914 the Executive Board decided on monthly meetings from October to May—the December one was omitted because of the rush of the Christmas season. In all, seven meetings were held. It was the happy thought of the President to make use of the well-known principle that an eager receptivity for new ideas follows an appreciative receptivity of a good dinner. The response to the dinner-gong summons was encouraging; the first meeting of the year had an attendance of 135, that of January, 175, and in April almost 200 were present. The minimum attendance was 90 in February and even at the annual business meeting something over 90 attended.

In May of last year the membership of the Association totaled 88. In October there were 138 members and the number continually increased until at the annual meeting the total paid membership was 290. There are thirty or forty persons who signified their intention of becoming members but they are not so recorded because the dues are not paid. In all, it is estimated that there is a possible membership of 400 if all special librarians of the City are gathered into the fold—this is the goal for the coming year.

It was soon discovered that the commercial library clan was exceedingly interested in its own family affairs but not half so interested in what the medical libraries were doing, and that the financial library clan altho the closest of neighbors in the Wall Street district never could find time to gossip down there and were eager for this few hours opportunity. Therefore this impulse toward group action was encouraged by appointing a leader for each group. This person was responsible for the librarians in that group, their attendance at the meetings and

keeping alive the interest. This work was made easy for the Association and the group leaders by the use of the Classified List of Special Libraries in New York City compiled by the President and printed in the LIBRARY JOURNAL for January 15. This Directory has been used constantly by all members of the Association and has been a useful tool.

The next development from this group activity was the demand for a knowledge of the resources of each library. This led to the program of the February meeting which was a securing of all possible data about each library. This information was put upon cards provided for the purpose and a committee has been at work organizing this data in available form for reference. This material has been loaned to the Special Libraries Association and will be incorporated in the Handbook which they are in the process of compiling.

The same help has been given to the New York Library Club which is compiling a manual for the libraries of New York City. The President has worked on that committee and has had the support and assistance of the entire membership. The Association's efforts have been given to these two organizations and to avoid duplication we shall not publish a handbook nor manual.

The Association joined with the New York Library Club in a meeting in March, and enjoyed with it the splendid address by Dorothy Canfield Fisher. Even closer co-operation was extended to the New York Library Club in that the President submitted to them a list of our members which might be used for solicitation to membership in their organization. About 80 of our members joined the local Club.

The April meeting proved most profitable and interesting. Four speakers, each interested in the development of special libraries in a certain field, gave us their ideas of our use and possibilities of greater usefulness. These men were President La Guardia of the Board of Aldermen, James Rattray, vice-president of Guaranty Trust Co., Mr. Barbour, secretary of the North British and Mercantile Insurance Co., and H. V. Coes of Ford, Bacon & Davis, Engineering. The idea of a clearing house of information received startling and unexpected support from the business world in the address of H. V. Coes. A committee of business men who are working with the Association toward such a goal was formed at this meeting.

Nearly every member has worked for the Association this year, and this has given opportunity to improve acquaintance and has awakened much interest. Particularly are thanks due to Gertrude Peterkin, secretary-treasurer, Marguer-

ite Burnett as Chairman of Social Committee, to Mary de J. Cox, chairman of Membership Committee, to Ursula Johnson of the Clearing House Committee and to the LIBRARY JOURNAL for printing the List of Special Libraries.

The officers for the coming year are: President, Rebecca B. Rankin, Municipal Reference Library (re-elected unanimously); vice-president, Carlos C. Houghton, Poor's Manual; secretary-treasurer, Elsie L. Baechtold, Irving National Bank; additional members of executive board, Marguerite Burnett, Federal Reserve Bank, and Frederick W. Jenkins, Russell Sage Foundation.

OHIO LIBRARY ASSOCIATION

THE southwestern district meeting of the Ohio Library Association was held in Cincinnati on May sixth, at the Christ Church Parish House. There were present 85 librarians, 15 from Ohio libraries outside of Hamilton County, two from Kentucky, one from Indiana, nine from special libraries in Cincinnati and 58 members of the staff of the Public Library of Cincinnati.

A short general meeting preceded the round table discussions scheduled for the morning session. The visitors were welcomed by the Chairman, Lillie Wulfekoetter, after which an impromptu talk was given by Lutje Stearns, who was an unexpected and very welcome guest. Miss Stearns emphasized the idea of service in library work, the spirit of helpfulness which was so well exemplified in the work of Mary Isom in Portland. As far as possible all barriers between books and people should be broken down, commercial advertising methods should be more generally used, and false valuations of work and overemphasis of statistics should be guarded against.

After Miss Stearns' talk three groups gathered for round table discussions. Sophie Collmann of the Public Library of Cincinnati led the discussion on present day fiction, which included a number of the newest novels. Stella Hier, librarian of Woodward High School, Cincinnati, conducted the round table on school and library, at which standards for high school libraries in Ohio and county library work in rural schools were discussed. E. Gertrude Avey, chief children's librarian of the Public Library of Cincinnati, presided over the discussion of children's work, at which such topics as publicity, fines, mutilation of books, and class instruction, were taken up.

At the close of the morning session the visitors were entertained at luncheon at the Public Library, after which they inspected an exhibit of book-mending and flexible glueing in the

bindery rooms. At two o'clock an interesting, personally conducted tour of the plant of the American Book Company was made, and at its close each visitor was presented with flowers and a copy of the Noah Webster spelling book.

At the afternoon session the first speaker was Mary Rudd Cochran, of the Cleveland Public Library, who talked on the library and the community. She emphasized the point that the library served the community fully only when it is in touch with all phases of the life of that community, using the Cleveland Public Library as an illustration of the modern library reaching out in all directions, helping the foreigner, acting as an information bureau, bringing its resources to the attention of all classes by varied methods of advertising, as well as by the entrance of its staff members into all forms of civic activity.

This talk was followed by a paper on County Library work in a rural county by Mrs. C. S. Tandy of Vevay, Indiana, for six years a trustee of the Switzerland County Library. Her paper was an account of the work done in this county, which was the first in Indiana to establish a county library. Switzerland County has no railroads, and its population of 10,000 is largely rural. Vevay, the county seat, is the center of the work, which includes eleven stations and deposits in 75% of the classrooms of the schools of the county. Mrs. Tandy's clear and practical account of the methods used and the results achieved in Switzerland County showed the value of a county library in a rural county which was particularly timely for Ohio librarians, as her paper was followed by the reading of a letter from Carl P. P. Vitz, president of the Ohio Library Association, announcing that the new Ohio county law had just passed the State Legislature. The meeting closed with a general discussion of what women's clubs are doing for libraries in their towns led by Pauline J. Fihe, librarian of the Walnut Hills Branch of the Public Library of Cincinnati.

At the evening meeting, presided over by Sophie Collmann, the speaker was Mrs. Henry Backus, Cincinnati novelist and writer of short plays, who spoke on the little theatre movement and its allies. Mrs. Backus has done much for the Little Theatre in Cincinnati, and her thoro knowledge and keen interest in her subject were shown in her scholarly presentation of the history of the movement in the countries of Europe as well as in the United States. Especially apropos to the subject was the delightful presentation of Alfred Kreyborg's *Manikin* and Minikin by students of the Schuster-Martin School which completed the evening's program.

LILLIE WULFEKOETTER, *Chairman*.

ALABAMA LIBRARY ASSOCIATION

THE Alabama Library Association met on April 14-15 at Dothan. This was the first meeting of the Association since 1918. The attendance, in spite of very inclement weather, was good and was representative of the entire state except the northern sections.

The meeting was devoted exclusively to plans for stimulation and promotion of county library systems and interest in local and small town libraries.

Among the speakers were Professor R. E. Tidwell, assistant State superintendent of Education; Marie B. Owen, Director of the Alabama State Department of Archives and History; Hortense Bissell, field director, American Red Cross for Alabama; W. Y. Fleming, Superintendent of Education of Lee County; Frances Pickett, librarian, Judson College, Marion; Fannie Taber, librarian, Alabama Girls Technical Institute, Montevallo; Marion Shivers, librarian, Alabama Methodist Woman's College, Montgomery; Laura Elmore, librarian, Montgomery Public Library; Mary R. Mullen, librarian, Alabama State Department of Archives and History; and Mrs. J. L. Bishop, chairman of the Library Committee of the Federation of Women's Clubs.

A feature of the evening session of the 14th, was an appreciation of Dr. Thomas M. Owen, made by his friend, Dr. Spright Dowell, president, Alabama Polytechnic Institute.

The 1922 session will be held in April, either at Montgomery or Florence.

LIBRARY CALENDAR

June 6-8. At Boston. Twenty-fourth meeting of the Medical Library Association. All librarians invited.

June 13-15. At Tahoe Tavern, Lake Tahoe. Twenty-sixth annual meeting of the California Library Association and twelfth annual convention of the California County Librarians.

June 20-27. Conference week at Swampscott. Meetings of the A. L. A., S. L. A., National Association of State Librarians, American Association of Law Libraries, Bibliographical Society of America, League of Library Commissions, Association of American Library Schools, Library Workers Association.

July 5-8 at Des Moines, Iowa. National Educational Association, Library Section.

Sept. 12-17. At Ithaca. New York Library Association's thirty-first annual meeting.

IN THE LIBRARY WORLD

NEW YORK

The Education Law (Subdiv. 7, Sec. 68, Chap. 21 of laws of 1909) relative to libraries and library corporations has been amended in part as follows:

1113. State library, when open; use of books. A clause added to this section provides that: **Under such rules and conditions as the regents may prescribe the state library may lend its books and printed material for a limited time to other individuals and institutions conforming to said rules and conditions. . . . Such service shall be free to residents of this state as far as practicable but the regents may, in their discretion, charge a proper fee to non-residents or for assistance of a personal nature or for other reasons not properly an expense to the state, but which may be authorized for the accommodation of users of the library.*

1117. Public and association libraries and museums.

1. All provisions of this section and of sections 1118-1134 shall apply equally to libraries, museums, and to combined libraries and museums, and the word "library" shall be construed to mean reference and circulating libraries and reading rooms.

2. The term "public" library as used in this chapter shall be construed to mean a library other than professional, technical or public school library, established for free public purposes by official action of a municipality or district or the legislature, where the whole interests belong to the public; the term "association" library shall be construed to mean a library established and controlled, in whole or in part by a group of private individuals operating as an association, close corporation or as trustees under the provisions of a will or a deed of trust; and the term "free" as applied to a library shall be construed to mean a library maintained for the benefit and free use on equal terms of all the people of the community in which the library is located.

3. The regents shall have power to fix standards of library service for every free association or public library which receives any portion of the money appropriated by the state to aid such libraries, or which is supported in whole or in part by tax levied by any municipality or district. If any such free association or public library shall fail to comply with the regents' requirements such library shall not receive any portion

of the moneys appropriated by the state for free libraries nor shall any tax be levied by any municipality or district for the support in whole or in part by such library. . . .

1118. Establishment of a public library. ". . . Whenever twenty-five taxpayers shall so petition the question of providing library facilities shall be voted on at the next election or meeting at which taxes may be voted, provided that due public notice of the proposed action shall have been given. . . .

1118-a. Contracts. Any authority named in section 1118 may grant money for the support of free association libraries provided such libraries are registered by the regents; or may share the cost of maintaining a public library or libraries as agreed with other municipal or district bodies; or may contract with the trustees of a free public library registered by the regents, or with any municipal or district body having control of such a library, to furnish library privileges to the people of the municipality or district for whose benefit the contract is made, under such terms and conditions as may be stated in such contract. The amount agreed to be paid for such privileges under such contract shall be a charge upon the municipality or district and shall be paid in the same manner as other municipal or district charges.

1118-b. County libraries. By majority vote at any election, or by vote of its board of supervisors, any county may establish a county public library with or without branches and may levy annually and cause to be collected, as are other general taxes a tax of not more than one mill nor less than one-third of a mill upon each dollar of the assessed valuation of the taxable property of such county, except that the tax shall not be less than one-half of a mill where the assessed valuation of the county is less than one hundred million dollars, to equip and maintain such library and branches or to provide buildings or rooms for its or their use; provided, however, that any incorporated city, village, town or school district contributory to the support of a free library registered by the regents, by annual taxation to a total amount equivalent to that which would be raised under the proposed county library tax in such city, village, town or school district, or which is receiving such amount annually for library purposes from invested funds or from a combination of invested funds and annual taxation, may, by majority vote at election or at a meeting of the electors duly held, or by vote of its common council any city, claim

* Matter in italics is new.

exemption from such county library tax; and such city, village, town, or school district shall not participate in the benefits of such county public library unless by contract as provided in section one thousand one hundred and eighteen-a, or until it shall elect to be included in the county tax levy for such county public library maintenance and shall make official notification of such action to the county board of supervisors. The chief administrative office of a county public library shall be located in the county seat unless another city or village in the county exceeds such county seat in population by more than twenty per centum according to the latest Federal census or state enumeration in which event the county library shall be located in the largest city or village of such county and shall not thereafter be removed to another city or village by reason of a change in population. In lieu of establishing and maintaining a county public library as herein before provided a county may enter into a contract for library service with any free library registered by the regents, upon such terms and conditions as may be agreed upon, and the amount agreed to be paid for such privileges shall be a binding charge on the county and shall be raised in the same manner as herein before provided for a county public library. Whenever twenty-five taxpayers shall so petition, the question of providing library facilities shall be voted on at the next election at which taxes may be voted, provided that due public notice of the proposed action shall have been given.

1122. *Library taxes . . . shall be levied, provided, however, that in any municipality or district in which the assessed valuation of the taxable property is one million dollars or less the rate of library tax shall not exceed two mills on each dollar; that in any municipality or district in which the assessed valuation of the taxable property is more than one million dollars and less than two million dollars, the rate of library tax shall not exceed one and one-half mills on each dollar; that in any municipality or district in which the assessed valuation of the taxable property is two million dollars or over the rate of library tax shall not exceed one mill on each dollar.*

1123. *Trustees. . . in counties shall be appointed by the county board of supervisors, in villages they shall be appointed by the village board of trustees, in towns they shall be appointed by the town board, and in school districts they shall be elected by the legal voters.*

Syracuse. The Library Institute for Central New York met at the Syracuse University Library on May 5th. There was an unprecedented

representation of libraries, 16 public, 11 educational, including 8 high school, 2 normal and Syracuse University library, 3 special libraries and one bookstore, and the attendance totaled 89 persons, nearly all of whom were actively connected with libraries. Dr. Paine of the Syracuse Public Library, Miss Stewart of the Library School, Mr. Bolton of the English department of the University, Mr. Keating of Foote's Bookstore, and others, took part in the morning program. The afternoon session centered around school libraries, when Marjorie Beal of the Sherrill Public Library spoke on "An ideal village library," and the various school librarians present discussed vital school library problems after an excellent paper on the subject by Miss Doane of the Library School faculty. Elizabeth Thorne, vice-director of the University Library School presided at both sessions.

OHIO

A County Library Law (H. B. 364 introduced by Mr. Silver and Senate Bill 209 by Mr. McCoy) has just been signed by the Governor. Under the provisions of this Law,

1. A county library district may be created in any county composed of territory therein in which free library service is not furnished to all of its citizens. . . . Upon the filing of a petition signed by not less than twenty-five per cent of the electors. . . . The Probate Judge shall fix a day for the hearing not more than thirty days after the filing of such petition. . . . and . . . shall submit the question to the electors residing in the proposed district and shall place the same on ballot at the next regular election. If a majority of the electors voting upon the proposition vote in the affirmative, the district shall be deemed and held to have been created.

2. The management of the county library district service shall be vested in a board of five trustees, two appointed by the Common Pleas Judges and three by the Commissioners of the County. . . .

3. Such board shall levy annually for library purposes a tax on all the taxable property of the county library district of not less than two-tenths of a mill and not more than one mill.

4. Any sub-division of a county maintaining a free public library. . . may . . . become a part of a county library district and be subject to all the provisions of the act applying thereto, provided that on petition of not less than fifty electors. . . filed not less than sixty days before the next general election the question of becoming a part of the county library district shall be submitted to the electors of such sub-division. And if a majority of those voting thereon shall

vote in the affirmative, such sub-division shall become a part of such county district.

5. The county library district trustees may contract with the governing body or bodies of one or more libraries within the county. . . . If the county library district trustees contract for library service with more than one library, the county library, district may be divided for such service. . . . County library district trustees may contract to furnish library service to another county library district. . . . Contracts as provided in this section may be terminated by mutual agreement or by either of the contracting parties on giving six months' notice before the beginning of the next ensuing tax year or by the failure of the county library district trustees to make the necessary levy.

6. The trustees shall serve without compensation. . . . They shall have power to receive bequests or gifts of real or personal property or of money, to purchase, lease or dispose of grounds and buildings, to construct building, and to furnish, equip and maintain the same for library purposes. They shall render efficient library service. . . . shall submit an annual report of statistics and finances to the county commissioners and the state director of library service.

7. All moneys realized from the levies made for the county district. . . . and all moneys received or collected. . . . shall be placed in the treasury of the county subject to the orders of [the] boards of trustees.

8. The librarians of the two public libraries of largest circulation in the state, the director of state library service, and two persons representing rural library work and chosen by the State Library Commission shall constitute a state board of library examiners. . . . The Board shall examine applicants for the position of county district librarian. . . . They may adopt rules and regulations for the government of the board. . . . No person who has not received a certificate of qualification from the State board of library examiners shall be employed as librarian in charge of any county library district.
