AG 474 - BA

SUBJECT: Manufacture of Japanese Air Rifles

TO : See Distribution

1. The following information, extracted from correspondence received by Headquarters Eighth Army, from the Supreme Commander for the Allied Powers, is forwarded for your information and guidance. This information was furnished by the Supreme Commander for the Allied Powers to the Japanese Home Ministry on 17 January 1947.

a. The manufacture of guns whether they be firearms or air rifles, is prohibited by Japanese law unless prior governmental approval is secured. Since January no permission has been granted. Therefore, any manufacture of air rifles has been in violation of the law. One such case of illegal activity is now being tried in Nara Prefecture.

b. A further check on air rifle production will be instituted with the forthcoming promulgation of Economic Stabilization Board Regulation No. 6. This prohibits the use of certain critical raw materials for manufacture of commodities considered non-essential. The air rifle is specifically listed as a prohibited item.

c. The Ministry of Agriculture and Forestry is licensing all air rifles under Ordinance Number 28 of 1911, a Hunting Regulation.
