Military Organizations

Military organizations (Gunji Dentai or Gunji Kankei Dentai) always have been centers of Japanese nationalism and, if allowed to exist as such, may well continue to be so after the occupation of Japan.

The more militant of these organizations are usually composed of young Army personnel, led by officers of low and medium rank. Both the War and Navy Ministries have special subunits to foster and guide these military or semi-military organizations.

An example of known espionage activities on the part of a military organization is the NIPPON KAIGUN KYOKAI (Japanese Navy Association) and, of possible espionage activities, the TRIKOKU ZAIGO GUNJIN KAI (Imperial Reservists' Association). Members of both of these organizations in the United States are known to have assisted, if not actually engaged in, espionage and propaganda activities.
