HARDY PERENNIALS
 ROCK GARDEN PLANTS
 MIDWESTERN WILD FLOWERS

W. A. TOOLE

of

Garry-nee-Dule

BARABOO, WISCONSIN

To Our Flower Loving Friends

We were much pleased during 1934 to see how interested many people were in our three exhibits at A Century of Progress. If you were one of our friends who visited the Horticulture Building, we hope you enjoyed all the many interesting gardens displayed there.

New varieties are being tried out constantly at Garry-nee-Dule, discarding some kinds and adding others to our list. This experimenting is intensely interesting, but expensive.

You will again find Tooles' plants offered in two types, small but vigorous potted plants and field grown stock. The potted plants are specially recommended for rock garden planting where they quickly establish themselves and readily become adjusted to the irregular rock or wall garden surfaces.

GUARANTEE

These plants are guaranteed to reach you in good growing condition. Complaints as to quality of plants received must be sent us within ten days of receipt of plants. We do not guarantee growth or hardiness of these plants other than above. Should any plants prove untrue to name, we are always ready to make replacements when notified.

VISITORS

Visitors are always welcome at Garry-nee-Dule where you will find many new and interesting plants in the Rock Garden, Perennial Gardens, and Nature Trail.

TERMS

Cash with order, which includes packing and delivery charges. Minimum order \$1.00.

PRICES

12 of one variety at the price of 10; 3 or more of a kind at dozen rates; write for quotations on large quantities.

W. A. Toole, of Garry-nee-Dule, Baraboo, Wis.

Varieties suitable for Rock Gardens marked *

Pot. F'ld

ACAENA (New Zealand Bur)

***Sanguisorbae.**—A spreading ground cover with shiny green foliage15

ACHILLEA

***Aizoon.**—While the clusters of white flowers are ornamental, the real attraction is the silvery foliage20

Millefolium Roseum.—A cultivated and improved form of the familiar "Yarrow" of our fields with showy rose colored flowers20

***Nana.**—Little mats of aromatic grey foliage, used as one of the flavorings of Chartreuse wine15

Ptarmica fl. pl.—Perrys Variety. A mound of button-like white flowers through the summer20

***Tomentosa.**—Low, woolly mats of grey green foliage, topped in season with heads of bright yellow flowers15

***Umbellata.**—Most effective as a silvery leaved foliage plant if the flower heads are kept sheared off15

Price: 12 of one kind at price of 10; 3 or more at doz. rates.

ACORUS

Gramineus Variegatus—Grassy foliage striped white; Our entire stock of this plant comes from the gardens of A Century of Progress where it was used around a fountain. 8—12 in. .25

ADENOPHORA

Bulleyana—A Blue flowered member of the Campanula family, growing to 2 ft. and flowering in July20 .25

***Genevensis**—6 inches; pink; invading ground cover; May-June15

***Hybrida Tottenhami**—6 inches; metallic purple leaves20

***Reptans**—6 inches; ground cover; blue; May15
One each of the above 3 Ajugas, 40c

ALLIUM

***Schoenoprasum (Chives)**—Both beautiful and useful; 8 inches; rosy lilac; May15 .20

***Stellatum**—8 inches; pink heads of starry flowers in summer20 .25

***Thibeticum**—8 inches; rose; June20 .25
One each of the above 3 Alliums, 45c

ALYSSUM

***Rostratum**—8-12 inches; yellow; July15 .20

***Saxatile Compactum**—Golden masses of flowers in May15 .25

***Saxatile Citrinum**—Lemon yellow form of the above15 .25

***Serpyllifolium**—Prostrate, gray green foliage; Lemon yellow flowers in June15

ALTHAEA (Hollyhock)

Rosea—Double mixed colors20

ANCHUSA (Bugloss)

Italica, Dropmore Variety—3-4 feet; sky blue; May-June20

***Myosotidiflora**—10-12 inches; blue, large leaves; May15 .25

ANEMONE

***Pulsatilla**—8-9 inches; purple; April15

ANTENNARIA (Pussytoes)

***Tomentosa**—2-3 inches; white; silvery foliage15

ANTHEMIS (Camomile)

Tinctoria Kelway's Variety—12-18 inches; bright yellow; June-August20

Tinctoria Perry's Variety—12-16 inches; yellow; June-Aug.15 *

AQUILEGIA (Columbine)

Canadensis—18-20 inches; red and yellow; May .15

Caerulea—Rocky Mountain Columbine; 10-12 inches; blue and white, June15

***Flabellata Nana Alba**—6-8 inches; milk white; June15 .25

Long Spurred Hybrids—18-24 inches; many colors; May-June15

Price: 12 of one kind at price of 10; 3 or more at doz. rates.

ARABIS (Rockcress)

* Alpina —6-8 inches; white; April15	.20
* Alpina Fl. Pl. —Double flowered form of above..	.15	.25
* Alpina Rosea —6-8 inches; light pink; April15	.25
* Kellereri —1-2 inches; white; April35	
* Procurans —3-4 inches; white; May15	
* Sturyi —3 inches; white; April25	

One each of the above 6 Arabis, \$1.00

ARENARIA (Sandwort)

* Grandiflora —3-4 inches; white; June-July15	.20
* Montana-Grandiflora —6 inches; white; summer ..	.15	
* Purpurascens —2-3 inches; purple; June15	.25
* Verna —Fine mossy foliage, tiny white flowers..	.15	
* Verna Aurea —Foliage golden yellow25	
* Vingi —5 inches; white; May15	

One each of the above 6 Arenarias, 90c

ARMERIA

* Alpina —Compact little tufts with heads of light pink flowers in June25	.35
* Lauchiana —4-6 inches; bright rose; all season..	.15	.25
* Lauchiana Robusta —Taller with larger flower heads than preceding15	.25
* Setacea —4-5 inches; light pink; June25	.35

One each of the above 4 Armerias, 70c

ARTEMISIA

Abrotanum —Lads Love or Southernwood15	
Absinthium (Wormwood) —A shrubby plant used for medicine and a source of absinthe15	
Frigida —10-12 inches Silky silvery foliage15	.25

Barbatus Torreyi—Tall slender spikes of flowers, some scarlet, some pink and varying shades. 2-3 feet20
 ***Watsoni**—10-15 inches. Purple flowers15 .25

BABY PHLOX

Our first trials of small potted plants were what we called "Baby Phlox" to distinguish them from field grown stock. These are vigorous young plants, grown from cuttings in the greenhouse during the winter. If given ordinary care and treatment these little plants will make a single large flower head on a short stem the first season, with several stalks of normal height the second year.

We can supply the following varieties this year at the uniform price of 15c each; \$1.50 per dozen; \$12.00 per 100, delivered, with varieties assorted as you wish.

- Apollo**—A new tall white.
Asa Gray—Rose pink, suffused crimson center.
Bridesmaid—24-30 inches; white with crimson eye.
Caliph—A very large flowered lavender.
Eclairer—3 feet dark rosy lilac; strong grower.
Elizabeth Campbell—2 feet clear salmon.
Enchantress—3 feet. Bright salmon pink with darker eye.

Price: 12 of one kind at price of 10; 3 or more at doz. rates.

- Ethel Pritchard**—A beautiful light blue on cloudy days or under morning light. Under mid-day sun a delicate mauve. Large flowers.
- Europa**—White with crimson eye.
- Firebrand**—Large bright red.
- Flora Riedy**—A very good white of medium height.
- Jules Sandeau**—Light salmon pink.
- Milly Von Hoboken**—24-30 inches; large soft pink flowers.
- Mia Ruys**—A very large flowered dwarf growing white.
- Miss Lingard**—24-30 inches. Shining green foliage, waxy white flowers in June.
- Morgenrood**—New. Deep rose red.
- Mrs. Jenkins**—A very good standard white with delicate creamy tint. 2 feet.
- Rheinlander**—A clear salmon pink with eye.
- Rising Sun**—A very good new salmon pink phlox of the type of Elizabeth Campbell but a stronger grower.
- Riverton Jewel**—Mauve pink with eye.
- Rokoko**—New. Large clear soft pink.
- R. P. Struthers**—One of the sturdiest and best varieties of Phlox. 3 feet, rose carmine with red eye.
- Rynstrom**—Clear rose pink.
- Siebold**—2 feet, deep salmon pink.
- Thor**—A large flowered deep salmon that is much admired.
- Von Hochberg**—3 feet. A fine bright crimson.
- Von Lassburg**—Large trusses of white flowers.
- Wm. Tell**—A tall bright pink with cerise eye. Of the vigorous R. P. Struthers type.

SPECIAL OFFER: BABY PHLOX

14 plants for \$1.50, prepaid. 2 each of Baby Phlox Siebold, R. P. Struthers, Miss Lingard, Rising Sun, Bridesmaid, Flora Riedy, Von Hochberg. 14 plants in all, delivered.

Pot. F'ld

PHLOX SPECIES

- | | | |
|---|-----|-----|
| * Amoena —Sun loving species. Lilac pink flowers in clusters. 6 inch | .15 | .25 |
| * Diffusa —An Alpine species from the Rocky Mountains. Mats of soft green foliage. Flowers lavender to white. 4 inch | .35 | |
| * Divaricata —A native species. Large fragrant lavender flowers on 6 inch stems | .15 | |
| * Divaricata Laphami —An improved form of the above, with blue flowers on 6 to 8 inch stems .. | .15 | .25 |
| * Ovata —Fine pink flowered species flowering in June. 7-8 inches | .15 | .25 |
| * Pilosa —Bright pink flowers on 8-10 inch stems in May and June | .15 | .25 |
| * Subulata Alba —Moss Pink. Pure white form of this well known dwarf. May | .15 | .25 |
| * Subulata Apple Blossom —A fine form with flowers of apple blossom pink in May | .20 | .25 |
| * Subulata Atropurpuria —Very compact dark green foliage, small deep red flowers. May | .15 | |
| * Subulata Brittoni —Distinct foliage. More delicate type. White with lilac eye. May | .20 | |
| * Subulata Blue Hill —New and one of the best. Deep blue flowers above a compact tuft. May | .20 | |

Price: 12 of one kind at price of 10; 3 or more at doz. rates.

	Pot.	F'ld
* Subulata Mrs. G. F. Wilson —Lavender flowers over green awl shaped leaves. May15	.25
* Subulata Rosea —Good rose flowering form with foliage of the type. May15	.25
* Subulata Vivid —A great aquisition. Deep salmon pink flowers in May25	
One each of the above 14 varieties of dwarf Phlox, \$2.00.		
PHYSOSTEGIA (False Dragon Head)		
Virginica —3-4 feet; light pink; July-August20
* Virginica Vivid —2 feet; dark pink; August-September15	.25
PLATYCODON (Balloon Flower)		
Grandiflora —Fine. Dark blue bell shaped flowers on 18 inch stems. July-August25
Grandiflora Alba —Pure white form of above. 18 inch. July-August25
POLYGONUM (Knotgrass)		
Brunoni —New. Narrow evergreen leaves, rich bronze in fall. Clear pink spikes on 6 inch stems all summer20
POTENTILLA (Cinquefoil)		
Cinerea —A dainty Alpine. Pale yellow flowers on 4 inch tufts of foliage25
PRIMULA (Primrose)		
Auricula —Fine heads of varicolored flowers on 4 inch stems25
Cashmiriana —Large ball shaped flower heads on stems 8 inches high. Flowers red, blue and lavender. May35
Cortusoides —8-10 inches, bright rose; June25
Mistassinica —Light green leaves from which spring 3-4 inch stems of delicate mauve flowers50
Polyanthus —English Primrose. Many attractive colors25
PULMONARIA LUNGWORT		
Officianalis —Dark green leaves spotted white. Light blue flowers which are pink in the bud stage. 8-10 inches. May25
PYRETHRUM		
Corymbosum —Several medium sized white flowers on an 18 inch stem in early summer25
Roseum —Persian Daisy. Single and semi-double daisies varying from white through shades of pink and rose to deep crimson. 12-18 inch. June25
Roseum Buckeye —A double flowered deep rose or red variety of great beauty35
Roseum Miami Queen —A bright pink double long blooming variety35
Roseum N. R. A. —A new double red35
Roseum Trojan —Double dark pink35
* Tchihatchewii —Turfig Daisy. A mat forming perennial useful as a ground cover on sunny poor soils. Small white daisy like flowers15
ROSMARINUS		
Officinalis —The old fashioned fragrant Rosemary. A tender perennial20
RUTA (Rue)		
Graveolens —An old fashioned medicinal herb with attractive foliage and yellow flowers. 10-12 inches15
SAGINA (Pearlwort)		
* Glabra —Bright green mossy growth for paved walks15	.25
Price: 12 of one kind at price of 10; 3 or more at doz. rates.		

SALVIA

- Azurea Grandiflora**—3-4 feet; long willowy stems with light blue flowers in early fall. A favorite of bees and other insects25
- Officinalis**—Garden Sage. A flavoring herb used in meats, sausages, etc.15 .25

SANTOLINA (Lavender Cotton)

- ***Incana**—Aromatic silvery foliage. Not hardy here15

SAPONARIA (Soapwort)

- ***Ocymoides**—Trailing; bright pink; May-June15 .25

SATUREIA (Savory)

- ***Montana**—6-8 inches; rose lilac; July. A favorite Pot Herb and good as a border edging15

SAXIFRAGA

- ***Aizoon**—6-8 inches; white; June25
- ***Cordifolia Megasea**—10 inches; flesh rose; April-May25 .35
- ***Decipiens Alba**—Mossy; 2 inches; white; May15
- ***Macnabiana**—10-12 inches; white; June25

SCUTELLARIA

- ***Alpina**—(Skullcap) Light blue and white flowers over a long season. 6-8 inches15 .25

***SEDUM (Stonecrop)**

All Sedums may be used in rock gardens.

- ***Acre**—2-3 inches; yellow; June-July15 .20
- ***Acre Aureum**—Stems golden tipped spring and fall15
- ***Acre Majus**—Stiff upright leafy stems of green. 3 inch15
- ***Acre Minor**—About half size of type15 .25
- ***Acre Minus**—Dense moss-like growth $\frac{1}{2}$ to 1 inch. Very choice15
- ***Aizoon**—8-10 inches; upright; yellow; July15 .20
- ***Album**—4-5 inches; white; June15 .20
- ***Album Brevifolium**—Small bead-like leaves. 3-4 inches15
- ***Album Chloroticum**—(Balticum) One of the tiniest Sedums15 .25
- ***Album Murale**—Rich bronze foliage, white flowers15 .20
- ***Album Tenuifolium**—Slender leaves on floppy stems15
- ***Altissimum**—Upright glaucous stems. 4-5 inches15
- ***Amplexicaule**—2-3 inches; pinkish white; June15
- ***Anglicum**—Silvery moss-like foliage15
- ***Anglicum Minus**— $\frac{1}{2}$ inch; fat little green leaves on thread-like stems15
- ***Anopetalum**—4-5 inches; yellow; July15 .20
- ***Anopetalum Elegans**—Blue green leaves of the reflexum type15 .25
- ***Dasyphyllum**—2-4 inches; pinkish white. Close tufts of fat little blue green leaves15 .25
- ***Divergens**—A western species with small fat leaves. Seems to prefer a gravelly lean soil15
- ***Ellacombianum**—5-6 inches; bright yellow; July-August. One of the best for walls or rock gardens15 .25
- ***Ewersii**—5-8 inches; rose; August-September15 .20
- ***Ewersii Homophyllum**—A dwarf compact form of Ewersii. Only 2 or 3 inches tall25
- ***Gracile**—3-4 inches; white; June15
- ***Hispanicum**—Mounds of mossy silvery foliage; white flowers. Not very hardy here15

Price: 12 of one kind at price of 10; 3 or more at doz. rates.

	Pot.	F'ld
* Kamtschaticum —10 inches; bright yellow; July	.15	.20
* Kamtschaticum Variegata —6-8 inches; variegated foliage	.15	
* Lineare Variegata —Narrow flat leaves edged with white. Lacks hardiness here	.25	
* Lydium —Bright green mossy mounds of foliage	.15	.20
* Magellense —Light green mossy foliage; not so dense as Lydium	.15	
* Middendorffianum —Bright yellow; one of the best of the medium upright group	.15	.25
* Middendorffianum Hybridum —Somewhat finer growth than the above. Foliage colors crimson in fall	.15	
* Nevi —Pale green rosettes 1-2 inches high	.15	
* Oppositifolium —3-4 inches; white; July-August; spurium group	.15	
* Oregonum —3-4 inches; vivid green spatulate leaves	.15	
* Pulchellum —6-8 inches; lilac rose; July. Biennial in nature	.15	.25
* Reflexum —5-6 inches; yellow; June. Sedums of reflexum, rupestre and anopetalum group all resemble varying types of little spruce branches	.15	
* Reflexum Cristatum —A striking crested form of reflexum	.15	.25
* Reflexum Minor —Compact type with blue-green foliage	.15	
* Rupestre —Blue green foliage, formerly sold as pruniatum fosterianum	.15	
* Sarmentosum —Free growing; creeping; light green foliage; yellow flowers. Does well in shade	.15	.20
* Sexangulare —Much like acre but finer and turns bronze in fall	.15	.20
* Sibericum —Leaves are tiny pear shaped beads of green	.15	
* Sieboldi —5-6 inches; rose; September. A very beautiful variety	.15	.25
" Silver "—Probably a form of Hispanicum with especially attractive silvery foliage	.15	
Spectabile —12-15 inches; pink; August-September	.15	.20
* Spectabile Brilliant —12-15 inches; deep rose; Sept.	.15	
* Spectabile Variegata —Leaves marked creamy white. Also sold as Alba-roseum variegatum	.15	
* Spurium —5-6 inches; pink; July. A sturdy growing variety	.15	.20
* Spurium Coccineum —5-6 inches; crimson; July	.15	.20
* Stoloniferum —Like a delicate growing spurium, yellow flowers	.15	
* Stribryni —A low-growing variety midway between acre, and reflexum in style of growth	.15	
* Telephium —15-18 inches; rose purple; July	.15	.25
* Ternatum —3-4 inches; white; May	.15	.25
* Yosemetensis —3-4 inches; bright yellow flowers	.25	
One each 25 choice sedums \$3.50. One each 50 different sedums, \$6.75.		

SEMPERVIVUMS (Hen and Chickens)

* Arachnoideum —Green leaves connected by cobweb-like hairs. Red	.15	.20
* Arenarium —A tiny variety with pointed leaves	.15	
* Brauni —Green rosettes tipped brown, medium size	.15	

Price: 1 of one kind at price of 10; 3 or more at doz. rates.

	Pot.	F'ld
* Globiferum —Round green globes tinting red in fall15	
* Calcareum —Evidently not true but a fine variety; velvety green flat rosettes 5 or 6 inches across; light greenish-yellow flowers15	
* Fimbriatum —A medium sized variety with sharp pointed leaves and many fine hairs15	
* Glaucum —Leaves glaucous with brownish spot at tip. Red flowers20	
* Doellianum —A less hairy form of <i>Arachnoideum</i>15	
* Heuffelii —Green with leaf tips tinted brown. Increases by splitting of crown instead of "Chickens"35	
* Lowns Seedling No. 60 —A rather hairy Hybrid variety with reddish marking25	
* Pittoni —Rosettes 1½ inches across. Leaves blotched and tipped light red. Flowers yellowish white20	
* Rubicundum —Large velvety rosettes lightly tinted purple25	
* Tectorum —A large form of this old favorite15	.20
* Toole's Seedlings —A variety of sizes, forms and colors, tinting beautifully in fall and spring with shades of violet-purple, brown, etc. Very fine effect in the rock garden15	.25
* Wulfeni —Rosettes 2 inches across slightly glaucous, ciliate. Flowers pale yellow20	
SCHIVERECKIA		
Bornmulleri —An early flowering crucifer resembling <i>Alyssum</i> . White flowers in earliest spring. 2-3 inches35	
SILENE (Catchfly)		
* Alpestris —3-4 inches; white; May-June15	
* Saxifraga —4-5 inches; white tinted pink; June15	
* Schafta —3-4 inches; bright carmine; September15	
STACHYS (Betony)		
* Lanata —Woundwort. 12-15 inches; pink; June; leaves silvery and very wooly15	.20
* Officinalis —10-12 inches; lilac pink; August15	
STATICE (Sea lavender)		
* Dumosa —8-12 inches; tinted white; July. new, good to dry for winter bouquets15	.25
* Latifolia —10-12 inches; lavender; August15	.25
TANACETUM		
Balsamita Costmary —An aromatic herb of the old fashioned garden15	.25
Vulgare Tansy —One of the standard old fashioned medicinal herbs. The yellow flowers and finely divided leaves are ornamental in the hardy border15	
TEUCRIUM (Germander)		
* Chamaedrys —5-6 inches; rose red; July. For the rock garden or perennial border15	
THYMUS (Thyme)		
* Aureus —Golden leaved Thyme. 5-6 inches; lilac; July15	.25
* Argento Marginatus —5-7 inches; lilac; green leaves edged with creamy white15	
* Azoricus —A low growing mossy plant that is very attractive. Not very hardy here15	.25
* Citriodorus —6-8 inches; upright plant with pleasing lemon-scented leaves. Used to flavor salads15	.25
Price: 12 of one kind at price of 10; 3 or more at doz. rates.		

	Pot.	F'ld
* Lanuginosus —Creeping, gray, hairy foliage; rarely blooms15	.25
* Nitidus —4-6 inches; upright sage green leaves with pleasing scent15	
* Serpyllum —Creeping, green foliage; lilac; July15	
* Serpyllum Album —Creeping; white; July15	.25
* Serpyllum Coccineum —Creeping; deep crimson; July15	.25
Serpyllum Odoratus —Sub-shrubby, useful for covering large rocks, very fragrant15	
* Vulgaris —Kitchen Thyme, also ornamental15	.25
One each of the above ten varieties of Thyme, potted plants, \$1.40.		
TROLLIUS (Globe Flower)		
Europeus —2 feet. yellow; May. Needs a moist and fertile soil25	
Ledebouri —Taller and later flowering than European. Flower less globular in shape25	
TRIFOLIUM		
Repens Purpurea —A most interesting and ornamental clover with bronze foliage. Grow it for luck because you can always find several four leaved clovers on an established plant15	
TUNICA (Coat Flower)		
* Saxifraga —3-5 inches; pink; July-August15	.20
* Saxifraga Fl. Pl. —Double flowered Tunica. 3-5 inches; pink; June-August25	
VALERIANA		
Officinalis —(Garden Heliotrope) 5-6 feet; white; summer. Heavily sweet scented20	
VERONICA (Speedwell)		
* Austriaca —8-10 inches; blue; June15	.25
* Corymbosa Stricta —Upright; 6-8 inches; blue; June15	
* Filiformis —Close creeper; light blue; May. Good for planting between stepping stones15	.25
* Gentianoides —10-12 inches; blue; June-July25	
* Incana —8-10 inches; intense blue; June; leaves gray15	.25
Longifolia Subsessilis —12-18 inches; deep blue; Sept.35	
* Pectinata —Trailing; wooly foliage; blue15	
* Pectinata Rosea —Trailing; wooly foliage; rose; May15	.25
* Prostrata —3-4 inches; carpeting; May15	.25
Spicata —15-20 inches; medium; blue; June-July ..	.20	
* Spicata Nana —5-6 inches; blue; July. For rock garden or border15	.25
* Spicata Nana Erica —5-6 inches; pink; July. Has much the appearance of Heather15	.25
* Teucrium —8-10 inches; intense blue; June15	.25
Virginica —3-5 feet; white; August. Our native veronica25	
VIOLA		
* Arkwright Ruby —A bright ruby red variety of great beauty15	
* Apricot —5-6 inches; yellow shaded apricot; all season15	
* Applequist Seedling —An improved Jersey Gem. Flowers very large. A new variety from the West Coast25	
* Bowle's Black —5-6 inches; tiny black flowers with violet center15	

Price: 12 of one kind at price of 10; 3 or more at doz. rates.

	Pot.	F'ld
* Jersey Gem —6 inches; flowers violet; all summer15	.25
* Jersey Jewel —6 inches; flowers larger and darker than Jersey Gem. Very free flowering25	
* Lutea —6 inches; clear yellow; all season15	
* Odorata —English Violet. The old fashioned sweet scented single blue violet15	.25
* Odorata Rosina —3-4 inches; rose, very sweet scented; flowers spring and fall25	
VINCA (Periwinkle)		
* Minor —Dark green leaves and blue flowers. A good ground cover under trees15	.25
* Minor Bowle's Variety —A compact form of the above25	
YUCCA		
Angustifolia —Narrow, long leaves, 18 inches15	
ZAUSCHNERIA		
* Californica —California Fuchsia. Scarlet Fuchsia like flowers35	

OLD FASHIONED HERBS

For several years Mrs. Toole has been much interested in our old fashioned herbs and of course I have found it expedient to trail along. As a result we offer this selection of some of the best of the varieties that you will surely want in your Herb Garden. The Herbs are divided in a general way into Aromatic Herbs, grown for their fragrance. Sweet or Pot Herbs used as a flavoring for foods, and Medicinal Herbs used in preparing old fashioned remedies. Some are hardy perennials and are indicated by the abbreviation Per. Tender perennials are so indicated and biennials as well. Annuals are indicated Ann.

Plants are out of 2½ inch pots and are ready to grow along nicely in your garden. Seeds are also offered of some kinds.

Mrs. Toole has prepared directions for the use of some of the Sweet Herbs. A copy of these directions will be included with orders amounting to \$2.00 or over.

While many will want to grow these herbs in a special herb garden, possibly in a formal design, most of them may be used as ornamental features in the rock garden or perennial border.

Chives, Germander, Lavender, Winter Savory, Rue and Thyme may well find a place in the rock garden, while practically all the balance have enough ornamental features in flowers or foliage to merit a place in a mixed border.

	Pl'ts	Seed
Anise —(Pimpinella Anisum) Sweet Herb. Ann. ..	.10	.05
Balm —(Melissa Officinale) Aromatic and Sweet. Per.15	.05

Verbena, Lemon —(<i>Aloysia Citriodora</i>) Aromatic; tender. Per.15	
Wormwood —(<i>Artemisia Absinthum</i>) Medicinal. Per.15	.05

NATIVE PLANTS OF THE MIDDLE WEST

Each year shows an increasing interest in the plants native to this section. Among them will be found varieties suited to the rock garden and the perennial border as well as the natural wild garden.

As fast as facilities and our knowledge of methods of propagation permit, we are growing these varieties in our nursery. Those plants that are collected are taken from waste places or spots unvisited by lovers of nature or where pasturing or cultivation will soon destroy existing stocks.

It may be necessary to delay shipment of some varieties until late summer or fall if spring shipment seems inadvisable.

Consulting service at moderate expense for those desiring to naturalize considerable area is available.

ACORUS (Sweet Flag)

Each

Calamus—Aromatic roots, grassy foliage, for edge of pools and open damp places20

ACTATEA (Baneberry)

Alba—18-24 inches; white flowers and ivory colored fruit with red pedicels20

Rubra—15-20 inches; white flowers in slender racemes followed by red fruit. Both baneberries love rich woods20

ACTINEA

***Herbacea**—Lakeside Daisy. A mat forming plant with yellow daisies in early spring. Open ground well drained25

ANEMONE (Windflower)

Canadensis—The white flowers on stems 15-20 inches high appear in June. Open damp places20

***Patens Var. Wolfgangiana**—(Wild Crocus) Our earliest spring wild flower. Lavender flowers followed by silky feathery seed vessels. Open gravelly soil. Not easy to establish25

ARENARIA

***Stricta**—Needle like leaves, white flowers in late spring. Open sun or light shade, sandy soil25

AQUILEGIA (Columbine)

***Canadensis**—Scarlet and yellow flowers on plants 1-2 feet high. Often found in crevices of cliffs with but little soil. May-June. At home in sun or shade, in good soil or almost none at all25

ARISAEMA (Jack-in-the-Pulpit)

***Triphyllum**—6-12 inches; brownish purple flowers in May followed by brilliant red berries. Slightly acid leaf mold. Shade20

ASARUM (Wild Ginger)

***Canadense**—Gets its name from the thickened roots strongly ginger flavored. A good ground cover for rich shade. 6-8 inches; Curious chocolate colored flowers in May20

ASCLEPIAS

***Tuberosa**—(Butterfly Weed) 12-15 inches; brilliant orange flowers in midsummer; Well drained soil in sun25

ASTER

***Linariifolius**—(Savory Leaved Aster) 8-12 inches; purple flowers in Sept. on stiff leaved compact bushy plants. Open sandy soil25

Novae Angliae—(New England Aster) Flowers purple to rose colored on 3-4 feet stems in Sept. Rich fairly moist soil25

Sericeus—(Silky Leaved Aster) Mauve flowers on stems sparsely clothed with silky leaves in September. Rather poor sandy soil25

CALTHA (Marsh Marigold)

Palustris—8-12 inches; Open bogs are often a mass of yellow with this plant in early spring. May be grown in good garden soil, not too dry25

CAMPANULA (Harebell)

***Rotundifolia**—6-12 inches; The purple bells may be found growing from crevices in rocky cliffs, on sandy hillsides, or hummocks in open swamps, but it's always attractive, all summer25

CAULOPHYLLUM (Blue Cohosh)

***Thalictroides**—10-15 inches. The bunches of blue berries in mid-summer are the conspicuously ornamental feature. Shade and leaf mold20

CLAYTONIA (Spring Beauty)

***Virginica**—2-4 inches. The rose colored flowers rise from grassy tufts in early spring. Shade, leaf mold15

CHRYSOGONIUM

***Virginianum**—From the Smoky Mountains of Tennessee. One inch golden flowers on short stems all summer25

CYPRIPEDIUM (Lady Slippers)

Acaule—Moccasin Flower. 6-10 inches; rose; June. Must have acid soil35

Pubescens—Yellow Lady Slipper. 8-15 inches; yellow; May; Not difficult to grow in shade in leaf mold35

Price: 12 of one kind at price of 10; 3 or more at doz. rates.

Candidum —Small White Lady Slipper. 6-8 inches; white; May. Not difficult in open or lightly shaded damp places50
Spectabile —Showy Lady Slipper. 2 feet. White shaded with rose; June. Needs a neutral soil, moisture and light shade35
DICENTRA	
* Cucullaria —Dutchmans Breeches. 5 inches; white early spring. Plant tiny bulbs shallow in rich leaf mold. Shade15
DODECATHEON (Shooting Star)	
* Meadia —10-12 inches; white or pink; May. Open well drained but not poor soil. One of our more beautiful wild flowers25
ERYTHRONIUM (Dog-Tooth Violet)	
Americanum —Yellow flowers and mottled leaves. Early spring. Rich shade. Fall delivery15
Albidum —White or tinted flowers, leaves somewhat mottled. Rich soil15
EUPATORIUM (White Snakeroot)	
Urticaefolium —1-3 feet. white; Sept. One of the few fall flowering plants that thrives in deep shade25
EUPHORBIA (Spurge)	
Corollata —Grows plentifully in open sandy fields. Used in quantities by florists in summertime in place of Baby's Breath. 18-24 inches; small white flowers in July and August20
EPIPACTIS (Rattlesnake Plantain)	
* Pubescens —Low rosettes of greyish green leaves that are the ornamental feature. Rich medium acid leaf mold in shade. Single rosettes. Clumps 50c15
GENTIANA	
* Andrewsi —Closed or Bottle Gentian. The dark blue of closed Gentian carries the flowering season for the wild garden into late October. 10-12 inches. moist soil, sun or light shade25
GALIUM	
* Boreale —(Northern Bedstraw) 10-12 inches. Masses of tiny creamy white flowers in midsummer. Heavily sweet scented. Sandy soil in sun25
GAULTHERIA	
* Procumbens —Wintergreen. 2-3 inches; Aromatic leathery leaves and red fruit. White flowers. Must have highly acid soil and moderate shade25
GEUM	
* Triflorum —Prairie Smoke or Old Mans Whiskers. Red flowers in May, followed by fluffy seed vessels of a smoky color. 6-8 inches; Well drained soil, sun25
HELENIUM	
Autumnale —Sneezewort. 2-4 feet yellow daisy-like flowers in late summer. Rich moist soil, open sun25
HEPATICA	
* Acutiloba —Three parted leaves pointed at tips. Easier to grow than Americana because it does not require acid soil. Evergreen leaves over winter, new leaves following the flowers. One of the loveliest little woodland flowers of early spring; varying shades of light blue, delicate pink or clear white25
IRIS	
Virginica —Our native blue flag. Found usually in wet places but does well in any fertile garden soil.	

Price: 12 of one kind at price of 10; 3 or more at doz. rates.

2-3 feet. Blue flowers with yellow spot at base of blade25
LIATRIS (Blazing Star)	
<i>Pychnostachya</i> —4-5 feet; long spikes of dark mauve flowers. Aug.-Sept. Good garden soil, sun25
<i>Spicata</i> —Shorter spikes. Well drained sandy soil. Late summer25
LITHOSPERMUM (Puccoon)	
<i>Angustifolium</i> —8-10 inches. Vivid yellow flowers in spring. Sandy soil, sun25
LOBELIA	
<i>Cardinalis</i> —(Cardinal Flower) Brilliant and showy cardinal flowers on stalks 2-4 feet high in August. Grows wild along the sides and even on the beds of creeks where it is covered with two or three inches of water part of the year. Will grow in fertile garden soil25
MERTENSIA	
<i>Virginica</i> —(Virginia Cowslip) 10-20 inches; glaucous green foliage, pink buds followed by delicate blue flowers in early spring. Sun or shade; fertile moist soil20
MITCHELLA (Partridge Berry)	
<i>Repens</i> —Trailing; pink flowers followed by red fruit in fall. One of the finest of ground covers for moderately acid soil15
MITELLA (Bishopscap)	
<i>Diphylla</i> —8-12 inches. Spikes of tiny white snowflake-like flowers in spring. Somewhat hairy maple shaped leaves. Rich leaf mold, shade25
OPUNTIA (Cactus)	
* <i>Fragilis</i> —(Small Prickly Pear) A hardy Cactus found on our rocky bluffs. Flat stems and long yellow spines. 2-6 inches. Good for dry rock gardens or cactus bowl in the house25
* <i>Rafenesquii</i> —(Prickly Pear) The flat stems are much larger than <i>fragilis</i> and may reach a height of 12 inches and will spread out over an area of 2 feet across. Yellow flowers in July, red edible fruit in fall25
PENTSTEMON	
<i>Grandiflorum</i> —One of the best of the Pentstemons. Lavender foxglove-like flowers in late spring. 18-24 inches. Requires well drained soil, sun25
PHLOX	
* <i>Divaricata</i> —(Woods Phlox) Makes a lovely carpet of blue in spring. Light shade, fertile soil and fair amount of moisture20
* <i>Pilosa</i> —Prairie Phlox. Well drained soil in open, sunny spots. Bright rose, sometimes plain magenta. It needs to be used with some care in the garden. 8-12 inches25
POLEMONIUM	
* <i>Reptans</i> —Grows in somewhat damp, shady places, ordinary soil. 10-12 inches. May-June. Bell-shaped violet-blue flowers20
POLYGONATUM	
* <i>Biflorum</i> —(Solomon's Seal) The blue-black berries hang from the under side of arching leafy stalk growing 18-30 inches tall20
RANUNCULUS	
* <i>Fasicularis</i> —(Early Spring Buttercup) A very early yellow flower growing on warm sandy slopes. 3-4 inches. April20
Price: 12/ of one kind at price of 10; 3 or more at doz. rates.	

PRIMULA

- ***Mistassinica**—(Arctic Primrose) A tiny little primrose that thrives in a soil of part leaf mold and part sand. Needs plenty of moisture but good drainage, and light shade. Tiny mauve flowers on stems 2-3 inches tall in late May or early June50

SANGUINARIA

- ***Canadensis**—(Bloodroot) The pointed buds and white flowers; clasped by the unfolding leaves appear very early in the spring. Rich leaf mold soil, preferably in light shade. 4-8 inches. April-May15

SARRACENIA

- Purpurea**—(Pitcher Plant) Curious pitcher-like leaves and odd brown flowers. Grow in acid sphagnum bogs. For the bog garden. June. 12-18 inches .35

SMILACINA

- ***Racemosa**—(False Solomon's Seal) A small panicle of creamy-white flowers in May, followed by speckled reddish brown berries. 12-20 inches. Rich leaf mold, shade25

TALINUM

- ***Rugospermum**—Found growing on, sunny, barren sandy land. Given similar conditions, it will thrive but cannot survive on good soil. The plant is but two or three inches tall with fleshy round leaves and small pink star-shaped flowers25

TRADESCANTIA

- Occidentalis**—(Spiderwort) A clear blue flower, growing on open sandy or gravelly hillsides, but found on moist soil in some sections. Effective in the sunny border, around pools or in the open wild garden. 12-30 inches. June to August25

- Grandiflorum**—(Wake Robin) Flowers white sometimes changing to pink. June. Needs rich soil and light shade. Plant the tubers a few inches deep. 10-15 inches3 for .25

- Nivale**—(Snow Trillium) A tiny variety often but 2 or 3 inches high. Small white flowers sometimes before the last snowbank has gone in late March or early April3 for .40

UVULARIA (Bellwort)

- ***Grandiflora**—Yellow, early spring; Leaf mold, shade. 8-15 inches15

VERONICA

- Virginica**—3-7 feet. Spikes of white or tinted flowers in summer. Rich soil, light shade or sun25

VIOLA

- ***Canadensis**—Canada Violet. 4-8 inches; Flowers most of summer; white tinted pink. Any fertile soil25

- ***Cucullata**—Common Violet. 3-8 inches; dark blue flowers in spring. Leaf mold, shade25

- Cucullata**—Confederate Violet. A form with violet center and tinted white flowers15

- ***Pallens**—Sweet White Violet. Tiny sweet scented white flowers. Moist shade. Leaf mold20

- ***Pedata**—Birds Foot Violet. 3-6 inches; Varying shades of lavender and purple. Sandy acid soil, sun .15

- ***Pedata**—Bicolor. Upper petals dark purple. lower petals lilac25

- ***Pubescens**—6-9 inches; yellow flowers on upright stems in early spring. Leaf mold, light shade15

NATIVE FERNS

Woodland and Swamp Ferns, indifferent to soil reaction or preferring circumneutral soil.

ADIANTUM

Pedatum—(Maidenhair Fern) Highly desirable. 1-2 feet.

ATHYRIUM

Felix-Foemina—(Upland Lady Fern) Attractive but spreads rapidly; 1-3 feet.

CYSTOPTERIS

Fragilis—(Woodland Brittle Fern) A low delicate ground covering plant; attractive but fronds short-lived; 6-8 inches.

DRYOPTERIS

Marginalis—(Margined Wood Fern) Evergreen; fine for holding soil on slopes; one of the best ferns for home gardens; 1-2 feet.

Spinulosa—Attractive, foliage more delicate than preceding; 1-2 feet.

OSMUNDA

Claytonianna—(Interrupted Fern) Large but highly desirable. 2-4 feet.

PTERETIS

Nodulosa—(Ostrich Fern) Fronds brittle, so plant where sheltered from wind; 2-4 feet.

Rock Ferns indifferent to reaction or preferring circumneutral soils.

ASPLENIUM

Trichomanes—(Rock-Maidenhair) Fine on shaded, rather moist rock,

CAMPTOSORUS

Rhizophyllus—(Walking Fern) Worth growing in any cool, shady place.

CHEILANTHES

Feei—(Lip-Fern) Tiny, wooly leaved fern growing on sunny lime rock.

CYSTOPTERIS

Bulbifera—(Bulblet Fern) Attractive on shaded rocks.

PELLAEA

Atropurpurea—(Cliff-brake) Desirable for sunny situations but must have moisture.

POLYPODIUM

Vulgare—(Rockcap Fern) Desirable as a capping for any rock.

WOODSIA

Obtusa—(Cliff-fern) Adaptable to almost any rock situation.

Rock Ferns preferring or requiring acid soils.

WOODSIA

Ilvensis—(Rusty Cliff-fern) Attractive on dry rocks of moderate acidity.

PRICES ON FERNS 25c each; \$2.50 per dozen

With each order for Ferns amounting to \$2.00 or more we will send a very interesting booklet on Native Ferns edited by Mrs. Kathryn E. Boydston, which was for sale at the Century of Progress. It contains articles by Mrs. Boydston, Dr. E. T. Wherry and other authorities on Ferns.

A Fern Bed of 36 Clumps for \$5.00. Delivered.

These 36 plants are just what you want to start your wild garden. The Fern Bed includes: 10 Ostrich Ferns; 10 Lady Ferns; 10 Clayton Ferns; 6 Maidenhair Ferns.

Half of the Fern Bed; 18 plants for \$3.00. Delivered.

Price: 12 of one kind at price of 10; 3 or more at doz. rates.
