ALASKA'S FOREST PRODUCTS INDUSTRY SAWMILL DIRECTORY. U.S. Department of Agriculture, Forest Service, Alaska Region, Division of State and Private Forestry (Pouch 6606, Anchorage, Alaska 99502), in cooperation with the State of Alaska, Department of Natural Resources, Division of Lands, State Forester's Office. September 1978, Series No. R10-39.

ERRATA

The volume noted under the column "Daily Capacity" in table 6 - 10 is not correct. It should be "thousand boardfeet measure."

The USDA Forest Service neither guarantees nor warrants the standards of the products produced by the firms noted in this publication. Also, the use of firm names by the USDA Forest Service does not imply approval of the firms' products to the exclusion of others which may be equally suitable but inadvertently not included in the listing.

Cover: The Annette Hemlock Mill (Louisiana-Pacific Ketchikan Pulp Company) at Metlakatla, Alaska, is the State's southernmost sawmill.

ALASKA'S FOREST PRODUCTS INDUSTRY

Sawmill Directory

INTRODUCTION

This directory was prepared as a part of the Cooperative Forest Management Program of the U.S. Department of Agriculture, Forest Service, Alaska Region, Division of State and Private Forestry, and the State of Alaska, Department of Natural Resources, Division of Lands, State Forester's Office. This program offers assistance in forest management and forest products utilization to the forest products industry and to the general public.

To make this directory as accurate, complete and timely as possible, it was reviewed by several interested groups. Any omissions or errors are accidental, and the inclusion of a listing implies no endorsement. The last edition of the directory was published in January 1976. And, although this edition has been updated, we would appreciate hearing of any errors, omissions, and needed changes.

A simple listing of all sawmills in the State would provide a misleading picture of the forest products industry in Alaska. Many of the State's sawmills are small and operate only sporadically, contributing little to the overall production in Alaska. This directory includes only sawmills that have operated recently and have commercial potential. This edition has also been expanded to give more details regarding the sawmills.

LOGGERS IN ALASKA

For a current list of loggers in Alaska, contact:

Alaska Loggers Association
Suite 200
111 Stedman Street
Ketchikan, Alaska 99901

Telephone: 907-225-6114

Figure 1.--Much of Alaska's timber output is produced in the Tongass National Forest, shown above, and to a lesser degree in the Chugach National Forest. The Tongass is the Nation's largest national forest, and the Chugach is the second largest.

Figure 2.--These men are holding the "first board" produced by a Native sawmill under a sawmill improvement program of the USDA Forest Service and other agencies in Alaska.

End Product Value

The end product value of forest product exports for the entire State was an estimated \$149.5 million in 1976, up from \$133.5 million in 1975 (State Department of Economic Development). Recent totals are:

Year	Value, by million dollars
1970	112.700
1971	118.100
1972	109.800
1973	137.800
1974	145.600
1975	133.520
1976	149.457

Stumpage Rates

TABLE 2--Average stumpage returns for selected species on State land, 1973-76

Tree	1973	1974	1975	1976
	<i>Dollars per M bm</i>			
Birch.....	3.14	5.48	5.67	6.42
Cottonwood.....	4.29	10.28	16.12	10.00
Hemlock.....	5.48	14.31	11.00	---
Sitka spruce.....	5.16	16.00	12.75	16.25
White spruce.....	19.98	41.02	34.58	35.56

TABLE 3--Average stumpage returns for all species on lands of major agencies, 1974-76

Agency	1974	1975	1976
	<i>Dollars per M bm</i>		
USDA Forest Service.....	28.81	23.21	25.34
State of Alaska.....	30.02	17.44	21.72
Bureau of Indian Affairs.....	50.80	13.49	---
Bureau of Land Management.....	6.15	57.72	20.00

The average stumpage price should be viewed with caution, since prices received for individual sales may vary significantly from the averages stated. This is because of species mix, quality, road costs, logging and processing costs, size and length of sales, number of bidders, and other related price determinants.

Market

SAWMILLS IN ALASKA

Explanation of Listings

All of the listings in tables 6 through 10 are alphabetically arranged under the five major geographical regions of Alaska: Southeast; south-central; western; interior; and arctic (fig. 3). The industry classifications are loggers, sawmills, consultants, scaling bureaus, and other forest industries.

The term "primary" is used to describe that industry which uses or processes wood in its round or rough state, whether on the stump or in the form of a log, bolt, or pole. Included in this classification are loggers, sawmills, shake or shingle mills, cant mills, and pulpmills.

The term "secondary" is used to describe those industries that remanufacture the products of primary industry. Wholesale and retail yards, millwork concerns, and the like are listed herein.

The term "support" industry is used to describe services proved to both primary and secondary industries. These would include consultants, scaling bureaus, and technical assistance programs.

LOG SCALING SERVICES

Scaling is the determination of the gross and net volume of logs by the customary commercial units for the product involved. Volume may be expressed in terms of boardfeet, cords, cubic feet, linear feet, or numbers of pieces. Scaling is not guessing; it is an art founded on applying specific rules in a consistent manner, based on experienced judgement as to how serious certain external indicators of defects are in a specific locality.

Increased activity in the industry has generated an interest in third-party scaling. Third-party scaling is mainly an independent agency that represents both the buyer and seller of forest products. These agencies are generally called log scaling and grading bureaus. Services and charges are typically contract scaling by month or volume, daily rate, hourly rate, utility scaling by volume, water scaling by volume and/or piece rate.

The Pacific Northwest is represented by five bureaus; but only one bureau is operating within Alaska: Puget Sound Log Scaling and Grading Bureau, P.O. Box 11343, Tacoma, Washington 98411. The other four bureaus are: Southern Oregon Log Scaling and Grading Bureau, 948 S.E. Mill Street, Roseburg, Oregon 97470; Northern California Log Scaling and Grading Bureau, 1180 8th Street, Arcata, California 95521; Columbia River Log Scaling and Grading Bureau, 2260 Oakmont Way, Eugene, Oregon 97401; and Grays Harbor Log Scaling and Grading Bureau, 504 8th Avenue, Hoquiam, Washington 98550.

NATURAL RESOURCES CONSULTANTS

This 1978 listing of consultants is published as a service to the public. The State of Alaska and the USDA Forest Service do not endorse this listing nor do they assume responsibility for actions of individuals or firms listed.

Wm. H. Adams
Wildfire Management Inc.
P.O. Box 941
