The Transcript mistakes our opinion in regard to the payment of the bills of the San Francisco volunteers, by the city fathers of Sacramento. If our hombres exceeded the Common Council standard of sherry cobblers, for men burning with chivalrous ardor, they have only to name the amount of the excess, and send the bill down here. Our folks won't repudiate. But if the Sacramento rum dealers are endeavoring to get some fat pickings out of the city, under the plea of having supplied the men "clad in the panoply of war," on the memorable occasion referred to, it is perfectly right that the footing should be closely scrutinized. However, we don't believe there was half as many "shirts" furnished as that member of the City Council pre-

FLOWERS OF CALIFORNIA.

In the course of an excursion made early in April last, from Stockton to the Mariposa, we counted one hundred and thirty-four distinct varieties of flowers in bloom, either on the pictured plain, or along the ravines and slopes of the foot hills, and high. er steeps of the Sierra. It is a glo-rious sight, those flowers! We felt like childhood again, and could have cried out with the dreamer of newyear's night, "Oh, give me back, give me back my boyhood again; give me my boyhood !" Flowers of every hue, and without thorn

then adorned the plains which are now so bare and sere. No doubt in the course of the season a fir greater number could be gathered. We found the tent of a botanist on the other side of the Mercedes, but could not

And the other day, we were most happy to find that some amasucceed in his charge of illegal voserved them in very neat packages in tin cases, neatly labelled, with brief descriptions of the flowers. A few of them may be had of Mr. John Still, in the St. Francis Hotel building, Clay St. We know of no present, except a pound of gold, which could be made from those in Califor. nia to friends at home, more accept-

REMEDY FOR CHOLERA.

The following letter, giving the exto the New York Evening Post for publication.

The method is that resorted to by meine Zeitung: lay of the eighth pair of nerves-that is to say, the nerves which commu. nicate between the brain, the stomach, showed that, by the simple compression of this pair of nerves asphyxia is produced, which can be continued till it proves mortal, and that during this asphyxia the blood becomes of a black or coal color, and that it is attended with violent efforts to vomit. The practice founded on this view of the cause of cholera is the administration of emetics. Mustard and common salt, in warm water, are sometimes given; sometimes tartar emetic, the Italian practice; sometimes ipacac; sometimes blood-warm water. This practice, and the reasons for it, have been set forth in various published papers of Dr. Turner, to whom this lelter is addressed :

and this medicine carried me through.

The medicine acts very promptly as very next day.

I have known it to be successfully used on board their ships by at least a dozen shipmasters besides myself. Its use is quite general in Liverpool, where even some of the regular doctors find it to their advantage to resort
