TABLET TRITURATES

PREPARED BY

FRASER & CO., NEW YORK CITY.

TABLET TRITURATES From TRITURATIONS.

TABLET TRITURATES From TINCTURES.

These are the finest and most carefully made Triturations, moulded into an elegant and convenient form for bedside and office dispensing. The Tincture Triturates contain one-half, one or two minims of the Mother Tincture, or official Tincture of the drug it represents. The Tablets are soluble and exact, and a trial of their medical value together with their great convenience, will make them a favorite with the progressive physician.

Non-Alcoholic Fluid Calendula

Excellent as a Dressing for
Inflammatory & Catarrhal Conditions of the Female Reproductive Organs.

ALSO FOR

Catarrhal and Inflamed conditions of any of the Mucous surfaces. For
Wounds, Bruises, Lacerations, Burns and Scalds, Malignant, painful and
corroding Ulcers, Boils or Carbuncles, Old Sores, Excoriations
and Chafings, Bleeding from any part of the body,
Chapped Hands, and Sore Lips.

Use External and Internal.

Extracts from a few letters received in regard to this preparation:

CHICAGO, ILL., June 12, 1885.

Dear Sirs:—I find your Non-Alcoholic Fluid Calendula to act admirably
in all cases of Muco-purulent discharges from the uterus: even in cancerous
ulceration. It soon changes the foetid irritating discharge into a bland non-
foetid and unirritating one. I apply it on cotton tampons to erosions and abra-
sions of the os, and also to the contiguous parts by means of a cotton and
wrapped probe. Mixed with fluid Hydrastis or Muriate of Hydrastine *it cannot
be equaled by any other medicine in all vaginal disorders.*

Yours Truly, E. M. HALE, M. D.

607 North Fourteenth St., ST. LOUIS, MO.

To the Luyties Pharmacy Company:

I have used for many years past Calendula in tincture as a vulnerary and I
find your new aqueous extract a very excellent preparation and in many in-
stances preferable to the tincture. I regard it as a very efficient pharmaceuti-
cal extract.

T. GRISWOLD COMSTOCK, M. D.

OFFICE J. MARTIN KERSHAW, M. D.

Luyties Pharmacy Co.,

Gentlemen:—I can testify to the superior qualities of your very elegant
preparation of Fluid Calendula. I have used it with great satisfaction to myself
and patients. It is especially useful as an application to the genitals after
child-birth.

Very Truly Yours,

J. MARTIN KERSHAW, M. D.

IDA GROVE, June 15, 1885.

Your Non-Alcoholic Fluid Calendula is decidedly the best preparation I
have ever used. I shall use it exclusively hereafter. Yours,

Physician's Pocket Reagent Case.

CONTAINING

A Complete Set of Chemical Apparatus and Reagents for Bed-side Urine Analysis, qualitative and quantitative.

The case contains, in addition to the series of urinary test papers issued by Parke, Davis & Co., a comprehensive book of instructions for the use of Dr. Oliver's bedside tests, and all the necessary apparatus for making the qualitative and approximate quantitative analysis of abnormal urine.

The apparatus consists of

1. Two test tubes, one of which is graduated.

2. A graduated minim pipette.

3. A set of six specific-gravity beads, corresponding with specific gravities respectively of 1,005, 1,010, 1,015, 1,020, 1,025, and 1,030. These will be found more convenient to use than the ordinary urinometer which is, moreover, a very fragile instrument.

A more compact arrangement it would be difficult to devise, and the physician cannot well forego the convenience of such a vest-pocket chemical laboratory.

Price of case with reagents complete, paper, \$1.00. Leather, \$1.50.

By Morton M. Eaton, M. D., Cincinnati,

AUTHOR OF "EATON ON DISEASES OF WOMEN," PROFESSOR DISEASES OF WOMEN, PULTE MEDICAL COLLEGE; MEMBER OF THE AMERICAN INSTITUTE; MEMBER ADHERENT DU CONGRESS MED. INTERNATIONAL DE PARIS, FRANCE.

"This big, handsome book pleases the eye at a glance, and is evidently written for the better classes, and one cannot take it up for a moment's reading without learning something useful." *St. Louis Clinical Review*, May 1882.

"Eaton covers a broader field than his predecessors. Physicians may safely speak a kind word for the Domestic Practice of our genial and accomplished Clinical colleague." *Medical Counsellor*, June 1882.

"It is a handsome, well printed, well bound volume, is profusely illustrated and will find favor with the public." — BOERICKE & TAFEL, New York.

PEPTONIZED COD LIVER OIL AND MILK.

Physicians who use Cod Liver Oil, or who have discontinued its use in consequence of its offensiveness or its injury to digestion, should not fail to give this preparation consideration. It is so far in advance of the Emulsions and all former preparations of the Oil that they bear no comparison with it.

1st. It contains 52 per cent. of pure Cod Liver Oil combined with Condensed Milk.

2d. Both the Oil and Milk are perfectly digested and wholly assimilable and consequently will agree with the most delicate stomach, while the use of the plain Oil or the Emulsions soon injures digestion to such an extent that but a small portion is assimilated.

3d. It is so palatable that many Physicians administer it to delicate patients as a preparation of cream.

4th. A trial of PEPTONIZED COD LIVER OIL AND MILK will convince any Physician that its reconstructive properties will prove five times greater than plain Oil or Emulsions now in use.

Beef Peptonoids!

THE ONLY PERFECT FOOD EVER PRODUCED!

The Nutritive Constituents of Beef and Milk with Gluten.

Each ounce of Powder represents 10 ounces of Beef, Wheat and Milk.

1st. BEEF PEPTONIDS, as now prepared, is both pleasant to the *taste* and *smell*.

2d. There is no food preparation that compares with it in nutritive properties.

3d. It contains over 98 per cent. of nutritious matter.

4th. One ounce of BEEF PEPTONIDS contains more nourishment than five pints of beef tea prepared from eighty ounces of beef.

5th. BEEF PEPTONIDS is the only preparation, rich in nitrogenous matter, that is pleasant to the taste.

Prof. John Atfield, London: "Beef Peptonoids is by far the most nutritious and concentrated food I have ever met with. Indeed, a palatable and in every way acceptable article of food, containing nearly 70 per cent. of purely nutritive nitrogenous material, has never before, to my knowledge, been offered to the medical profession or to the public."

Beef Peptonoids

Received the only Gold Medal and Highest Award at the International Health Exhibition, London, 1884, after a critical examination of a large number of Beef Products by a Jury composed of the best Chemists in Europe.

KENOSHA WATER CURE.

A Homœopathic and Hygienic Institute.
KENOSHA, WISCONSIN, ON LAKE MICHIGAN.

A quiet, home-like resort for those needing rest or treatment. *Summers remarkably cool,* and climate invigorating. Physicians having patients who require the influences of a well-regulated Sanitarium are invited to correspond. For circulars address,

N. A. PENNOYER, M. D., or

E. PENNOYER, Proprietor.

HARD RUBBER UTERINE INSTRUMENTS.

These are the only Spring Stem Uterine Supporters. The spring lies beneath the cup, and yields to every pressure from above or below. It is put in or taken out by increasing the cup. The gums (SS), or external support, are pure gum, and thus the support has a double elastic motion.

Physicians' Prices.—On abdominal supporting belt X, \$7.00; on waist belt Z, \$6.00.

A Physician's first purchase (claimed in the order) is guaranteed. Thus \$5.00 are refunded if the hard rubber parts only, or their exchanges, within 6 months of purchase.

Shell Globe B.—These are all sizes, light, hard rubber balls, with cords attached for ready removal. Two inch is commonly required in ordinary prolapse. Price, \$1.50 each.

Catalogues.—Free to all Physicians mentioning this *Directory*. It comprises over 150 size and style uterine examining and supporting

instruments. The hard rubber parts have an unlimited exchange and interchange privilege. No where else is the physician's responsibility thus secured.

THE HAHNEMANNIAN MONTHLY:

— PUBLISHED BY —

The Hahnemann Club of Philadelphia, Penn.

This well-established Homœopathic Medical Journal is now in its twentieth year, and has a large and increasing circulation in homœopathic circles.

Among its subscribers and contributors are the most intelligent minds of both continents, so that there is a demand for eminently practical articles, useful hints, valuable gleanings, and current medical news, all of which it supplies. It is the aim of the management to elevate medical literature, keep up with the times, maintain an independent stand, and, in short, to edit a journal the need of which shall be felt by every member of our school. The best writers are furnishing us articles for the current volume. In the advertising department will be found matters of special interest to homœopathic practitioners, and advertisers desirous of reaching the profession will find this Journal the best means of so doing. The price is \$3.00 per annum in advance; single numbers, 30 cents. Specimen copies free.

(E. A. FARRINGTON, M. D., Contributing Editor.
J. PEMBERTON DUDLEY, M. D., General Editor.

AND THE

BRAIN

AND

NERVOUS

SYSTEM.

CROSBY'S

VITALIZED PHOS-PHITES,

*Composed of the Nerve-giving Principles of the Ox-brain
and the Embryo of the Wheat and Oat.*

This is a standard preparation with all physicians who treat mental or nervous disorders. The formula is on every label. Its chemical composition is superintended by a Professor of Chemistry. As it is identically in its composition with brain-matter, it is rapidly absorbed, and quickly relieves the depression from intellectual efforts, fatigue, loss of memory, or mental irritability. Sleeplessness, irritation, nervous exhaustion, inability to work or study, is but a *brain-hunger* in urgent cases, *brain-starvation*. This brain nutriment quickly feeds the hungry nerves and restores brain-power. It is a cure for nervous disorders and debility. It aids in the growth of the brain, the bones, the teeth, the skin, and nails of children. It directly aids a child to learn. *Brain-workers need Brain food.*

E. W. BALL, BUSINESS MANAGER.

"I would like to call the attention of the members of this Society to one of our younger journals which, in my opinion, merits hearty support, and is fast establishing for itself a reputation as one of the best exponents of the doctrine '*similia similibus curantur*.'" I refer to the Medical Counselor, Dr. H. R. Arndt, editor. It is a semi-monthly magazine, enterprising, liberal—perhaps it were better to say 'tolerant'—yet orthodox, and seems always to give in its editorial department the sober second thought on all subjects of interest to the profession." *Report of the Committee on Medical Literature, of the State Homoeopathic Medical Society, Nov. 1884.*

BARRY'S ^a Clinical THERMOMETER.

Patented Sept. 9th, 1884.

This instrument embodies the following improvements (reference being had to the annexed cut): The tube is of a similar shape, through which constant motion it is not liable to roll, and breakage is prevented. Besides, being broad and flat, the lines and figures are made more prominent, and are readily seen, both when the instrument is held vertically or when it lays flat on a table. It is a fact known to all responsible dealers, Thermometers that are made and finished new, lose one degree of accuracy in one year. This is due to the natural contraction of glass before it assumes an absolutely homogeneous state. I will fully guarantee the quality of these Thermometers, as they are WELL SEASONED BEFORE THEY ARE MADE UP. Should you at any time desire this instrument for any instrument of my manufacture, tested, I will do this, if sent to me direct or through those from whom you receive them. In either case, I will forward information as to their varied condition. Your attention is especially called to the above cut: **a** indicates the contracted part of the tube, and **b** an enlarged cross-section thereof.

The patent covering this instrument bears date Sept. 9, 1884, covering broadly all Clinical Thermometers having a flat back, a face semi-circular or nearly so, containing the graduations, etc., as therein described. **NOTE**—E. I caution the public to beware of imitations whether such be offered in plain, colored or twisted glass for sale. Please note if my name and date of patent be on each instrument.

Price, \$15.00 per Dozen.

Your attention is also called to my STANDARD THERMOMETERS for Chemists, Incubators, and all other thermometrical instruments.

Tinctures.

We make a specialty of our Tinctures. Each Tincture is made with the menstruum peculiarly adapted to it, and which has been found by years of experience to possess the most solvent properties. We guarantee our tinctures to give perfect satisfaction. Prices, with few exceptions — 1 pound, \$1.50; 8 ounces, 95 cents; 4 ounces, 60 cents.

Triturations are all Hand-Made.

A full hour to each Triturate, and the best German Sugar of Milk used. We offer any 3x triturate, *in bulk*, at \$1.60 per pound; smaller quantities in proportion, or, in 4 ounce vials at 50 cents each. Many of the more common 2x triturations at same rate.

Crude Drugs

Have always been sold at a high rate. Send us a list of what you want, and obtain prices that will astonish you. We carry a line of C. P. Acids, Essential Oils, Powdered Drugs, Chemicals, etc. Physicians who make their own triturations from crude materials, will do well to write to us for prices before purchasing elsewhere.

We Mean Business,

And we know we can show you how to save money. All goods are conscientiously prepared from pure materials and the products warranted.

Glass-Ware.

We have the largest stock of Glass-ware of any Pharmacy in Michigan, and offer such ware at low rates.

JOHNSTONE'S IMPROVED ADAPTABLE POROUS FELT SPLINTS

AHL'S SPLINT MANUFACTURING COMPANY, Limited,

123 & 125 South Eleventh St.

PHILADELPHIA, PA.

THE ADAPTABLE POROUS SPLINTS, invented and improved by W. H. JOHNSTONE, have been tested extensively in both civil and military practice for a number of years, and have been endorsed and recommended in the most unqualified manner by the celebrated and distinguished Surgeons of America.

Their porosity is a peculiar and a valuable property. While the material is firm and insoluble, it permits readily the passage of air and fluids, so that, on one hand, the heat from the inflamed surface, the perspiration, and the morbid exhalations, are not confined to the detriment of the patient, as is the case in every other kind of splint, but pass off freely; and on the other hand, lotions of cold or warm water, medicated or not with weak alcohol, carbolic acid, arsenic, tincture, solutions of the sulphates, etc., can be constantly applied without disturbing the dressings. This, it will readily be seen, is a most invaluable property when the parts are bruised, lacerated, filled with extravasated blood, or oozing, and give these splints a conspicuous advantage over all others.

From FRANK H. HAMILTON, M. D., Professor of Fractures and Dislocations in the Bellevue Hospital Medical College, author of "A Treatise on Fractures and Dislocations," etc.

Having examined carefully JOHNSTONE'S IMPROVED ADAPTABLE POROUS FELT SPLINTS, I feel warranted in recommending them to the Profession as superior to all other manufactured splints now in use. They possess all the essential qualities of a good splint, having firmness, pliability and lightness.

FRANK H. HAMILTON, M. D.,

Prof. Military Surgery and Fractures and Dislocations, Bellevue Hospital.

From PROF. D. HAYES AGNEW, Prof. Surgery, University of Penna.

1611 CARESTONE STREET, PHILADELPHIA, February 6th, 1870.

The Adaptable Felt Splints, formerly known as those of Dr. Ahl, with the improvement now made by W. H. Johnstone which renders them in every way superior to the former, I regard as very excellent appliances in the treatment of fractures.

D. HAYES AGNEW,

Prof. Surgery, University of Pennsylvania.

Cuts illustrating the different Splints constituting a Complete Set.

SPECIAL NOTICE TO THE PROFESSION AND TRADE.

Our policy heretofore in the introduction of JOHNSTONE'S IMPROVED ADAPTABLE POROUS FELT SPLINTS, has been to confine the sales and business negotiations directly to the Doctors themselves, declining in every case to sell our goods through Dealers; we having assured the Profession generally, both through our agents and catalogues, that JOHNSTONE'S IMPROVED SPLINTS could only be obtained by subscription.

We wish to announce, that owing to the large demand for our goods and the constant importunity on the part of Surgeons everywhere to place our Splints on sale with their Instrument Dealer or Druggist, to afford them greater convenience and facility in obtaining the pieces in duplicate, we have at last acceded to that request, and hereafter JOHNSTONE'S CELEBRATED FELT SPLINTS can be obtained at most dealers in Instruments and Drugs throughout the UNITED STATES, at the same price which they were heretofore sold, viz:

A complete set, embracing *ANY* (30) pieces—twenty-five for adults and twenty-five for children—in thirty (\$30) dollars. Extra or duplicate pieces can always be obtained from your DEALER, at one dollar each.

JOHNSTONE'S CELEBRATED SPINAL JACKET, for Curvatures and Deformities, have met with unparalleled success, and, from their merit, secured the unqualified endorsement and approbation of our celebrated orthopedic specialists, and particular expression of gratitude from the patients who are wearing them. For full information, send for Descriptive Circulars.

Should your Instrument dealer fail to have a supply of our Splints, and decline to carry them in stock, orders sent to us will receive prompt attention.

PHILLIPS' PALATABLE COD LIVER OIL-Emulsion

L. H. WITTE, Homœopathic Pharmacy

350 Superior St., - CLEVELAND, OHIO.

(Witte's Triturator, Patented March 17, 1885.)

Perfect

TRITURATIONS

AND

Pure Alcohol.

Witte's Triturator is the *only* perfect tritulating machine in use. When in operation each machine is covered to *effectually* prevent contamination from neighboring machines *not the case with any other*. All other tritulating machines have some fault that compromises the value of the product. This can be demonstrated.

The best extra tritulated 1 x trituration of Lycopodium of a prominent Philadelphia pharmacy was found by Dr. W. H. Winslow to have only *ten per cent.* of the spores broken (see *Hahnemann-Monthly*, July, 1882), while Witte's ordinary 1 x trituration of Lycopodium was found by Prof. J. Edwards Smith and Prof. A. Y. Moore to have *all* the spores broken (see *N. Y. Medical Times*, Sept., 1882), showing the relative superiority of Witte's tritulating.

The Milk Sugar used is *better* than that used by anyone else. (See TRANS. AMER. INST. OF HOM. for 1883.)

PRICES OF 2X OR HIGHER.

Four ounces, in a package,	-	-	-	-	30 cents.
Four ounces, in a bottle,	-	-	-	-	35 cents.
Four ounces, free by mail,	-	-	-	-	40 cents.

With a few Exceptions.

There are no Hand-made Triturations offered for Sale that are properly trituated.

The alcohol exclusively used and sold is *perfectly* purified exclusively by mechanical means as it should be. No soda ash, or any other chemical is used in purifying or sweetening it. Especial attention is called to the fact that *oxidized* alcohol is supplied to homœopathic pharmacies in Pennsylvania, Maryland, New York and Illinois, and that the proprietors of these pharmacies give as full tests for impurities in alcohol the tests only for fusel oil. As the fusel oil in their alcohol has been destroyed by oxidation, as a matter of course their alcohol will stand the tests they give. Only an expert can detect it by odor. Oxidized alcohol is sweet in smell and heightens the odor of tinctures made with it. The impurities in it are compounds of *valerianic*, *propylic* and other acids in varying proportions. They cannot be removed by redistillation.

HOMŒOPATHIC PUBLICATIONS

OF

F. E. BOERICKE,

↔ Hahnemann Publishing House, Philadelphia. ↔

A System of Medicine, based upon the Law of Homœopathy.
H. R. Arndt, General Editor. In three volumes. Price, per volume, bound in cloth, \$7.50; bound in half morocco or sheep, \$8.50.

The first volume will be sent out in the second week of March, and will be delivered without delay to those who have subscribed for the work. It is a very attractive volume of 964 pages, printed in the best style, and *well* bound in either binding.

The succeeding volumes will follow at reasonable intervals; the second to come into the hands of the subscribers during the summer, and the third during the fall of *this* year.

The Publishing House takes much pride in laying before the profession the first volume in a style substantial and handsome in every way and unexceptionably fine in point of typographical execution.

As to the contents, in order to give a general idea of the volume and the whole work, we cannot do better than quote from the Preface:

"After nearly three years of unceasing toil, of constant anxiety and of endless correspondence," the general editor writes, the completed work is at last submitted "to the criticism of his colleagues, trusting that the judgment to be passed upon it will be based not only upon justice but upon generosity also."

"The editor possesses one great advantage over the majority of the progenitors of new books in that he needs not enlarge upon the *raison d'être* of this publication. The entire homœopathic school have, for years, experienced the want of a work on 'Practice,' which should take the place of the very excellent, but now old, treatises of Baehr, Kafka, and others. It was justly argued that none of these works are sufficiently comprehensive to serve our students as a satisfactory text-book, or our practitioners as a reliable guide for consultation and a safe authority in times of perplexity and doubt. In the course of time the matter was brought to the notice of the publishers and of medical men likely to be especially interested in an undertaking of this nature. . . .

"The list of contributors embraces many of our ablest writers and teachers, and, in the aggregate, represents a very large amount of special study and valuable clinical experience. . . . To utilize fully the value of clinical experience of each contributor, no restraint has been placed upon the members of the editorial corps outside of the observance of such general rules as were necessary to insure a desirable unity of the entire work. In each instance, then, the reader has

placed before him the result of actual experience gained by observation at the bedside, a feature of the work which becomes of great importance in those portions which deal with the *treatment* of special pathological conditions.

"After a careful examination of the various methods of arrangement of contents employed by different authors, the editor adopted the general grouping of Reynolds, subdividing, however, each section upon an anatomical basis. Thus, the section upon Diseases of the Organs of Digestion is divided into diseases of the mouth, œsophagus, stomach, intestines, peritoneum, liver, and pancreas. Each of these is again similarly subdivided. Thus, the Diseases of the Mouth are treated in the following order: diseases of the gums, teeth, tongue, salivary glands, tonsils, uvula, mucous membrane of the mouth.

"The treatment of each topic is based upon a desire to make every chapter of the greatest possible value to the reader. It has been the aim of contributors to give just enough space to aetiology, pathology, differential diagnosis, and so forth, to make the article complete, and to furnish a clear summing-up of the present status of pathological knowledge of the subjects enumerated. . . .

"Particular pains have been taken with the 'treatment' of the various diseases herein discussed. The remedies in most cases have been arranged, not alphabetically, as has been the custom, but in the order of their clinical importance. . . .

"The indications for remedies are of necessity given with reference only to symptoms which occur in direct connection with the disorders treated; concomitant symptoms usually are ignored, because a work like this cannot be made to take the place of a work on symptomatology. In order to further increase the usefulness of this work, the chapters on 'Treatment' were not limited in range to therapeutics, but were made to embrace extensive observations on hygiene, nursing, dietetics, the use of hot and cold baths, electro-therapeutics, and the various means and agencies with which the intelligent medical man at this day combats disease and relieves suffering."

Contents of Volume I: General Introduction—Chapter on Physical Diagnosis—Diseases of the Respiratory Organs—Diseases of the Organs of Circulation—Diseases of the Organs of Digestion. Contributors to Vol. I: Drs. H. R. Arndt, H. C. Clapp, Lucius D. Morse, J. S. Mitchell, A. K. Crawford, E. M. Hale, A. R. Thomas, W. T. Laird, C. M. Conant, A. C. Cowperthwaite, J. C. Gilchrist, E. U. Jones, W. H. Dickinson.

Hering, Dr. Constantine. Condensed Materia Medica. Third edition, more condensed, revised, enlarged and improved. 968 pages. Large 8vo. Half morocco. \$7.

This well-known standard work on *Condensed Materia Medica* needs no array of flattering press notices to recommend it anew to the rising homœopathic profession. It has nobly stood the test, and for many years to come will, no doubt, take the lead among the works of its class. The important task of revising the text for this, the third edition, was entrusted to Dr. E. A. Farrington, Professor of Materia Medica, whose able editorship has resulted in all that could be desired.

We quote from the editor's preface :

"In the preparation of this . . . edition . . . additions have been made, and a few typographical errors corrected, but, in justice to the lamented author, no alterations have been made in the substance of the text as he left it.

"More than twenty new remedies, arranged after the plan of the book, are given in full; and over forty partially proved drugs, with brief but distinctive indications, are added to the sections on 'Relationship.' Besides all this, about six hundred choice and well-attested symptoms have been incorporated in their proper place in the text. All the late works have been drawn upon for the new material, and even private sources have been unsparingly taxed; but still, great caution has been used in making selections. The plans and purposes of the work demand clinical as well as pathogenetic symptoms. But of the former sort only those have been employed which agree with the provings, and which show

every evidence of genuineness. Such discrimination demands the exercise of one's best judgment, and the expenditure of much time. But, it is believed, the benefits to be derived far outweigh the trouble. The book is now offered to the profession and to students, not as a rival of other works, but as a rich treasury full of information common to homœopathic literature, and also of gleanings from the vast collection which Dr. Hering made during a busy half century of medical study and labor."

The "New Remedies," referred to above are as follows: *Abies canadensis*, *Abies nigra*, *Aralia racemosa*, *Carduus marianus*, *Chininum sulphuricum*, *Collinsonia*, *Crotalus*, *Dioscorea villosa*, *Elaterium*, *Ferrum iodatum*, *Guaphalium*, *Grindelia*, *Kali bromatum*, *Lycopus virginicus*, *Myrica cerifera*, *Natrum arsenicatum*, *Niccolum*, *Pareira brava*, *Ptelea trifoliata*, *Senega*, *Viburnum opulus*, *Xanthoxylum*, *Zizia*.

Helmuth, Dr. W. T. A System of Surgery. Illustrated with 568 engravings on wood. By *William Tod Helmuth, M.D.* Third edition. Pp. 1000. Sheep, \$8.50.

This standard work, for many years used as a text-book in all homœopathic colleges, still maintains its rank as the best work ever brought out by our school on the subject. Ever since it was issued, the necessity for the student or practitioner to invest in allopathic works on the subject ceased to exist. It is up to date, and abounds in valuable hints, for it gives the results of the author's ripe and extensive experience with homœopathic medication in connection with surgical operations. In elegance of diction our author has never been approached.

. . . . "We have, in this work, a condensed compendium of almost all that is known in practical surgery, written in a terse, forcible, though pleasing style, the author evidently having the rare gift of saying a great deal in a few words, and of saying these few words in a graceful, easy manner. Almost every subject is illustrated with cases from the doctor's own practice; nor has he neglected to put before us the great advantage of homœopathic treatment in surgical diseases. The work is, in every respect, up to the requirements of the times. . . .

"Taken altogether, we have no book in our literature that we are more proud of.

"One word of commendation to the publishers is naturally drawn from us as we compare this handsome, clearly-printed, neatly-bound volume with the last edition. The difference is so palpable that there is no necessity of making further comparisons."—*Homœopathic Times*.

Allen, Dr. Timothy F. The Encyclopedia of Pure Materia Medica; a Record of the Positive Effects of Drugs upon the Healthy Human Organism. With contributions from Dr. Richard Hughes, of England; Dr. C. Hering, of Philadelphia; Dr. Carroll Dunham, of New York; Dr. Adolph Lippe, of Philadelphia, and others. Ten volumes. Price, bound in cloth, \$60.00; in half morocco or sheep, \$70.00.

Copies of this valuable work—without which no homœopathic library is complete—are still to be had at the reasonable price above quoted. It is the most complete and exten-

sive work on *Materia Medica* ever attempted in the history of medicine—a work, to which the homœopathic practitioner may turn with the certainty of finding the whole patho-genetic record of any remedy ever used in homœopathy, the record of which being published either in book form or in journals.

“With the Volumes IX and X—now before us—*Allen's Encyclopædia of Pure Materia Medica* is completed. It comprises all remedies proved or applied by homœopaths. With truly wonderful diligence everything has been carefully collated from the whole medical literature that could be put under contribution to homœopathy, thus enabling any one who wants to make a thorough study of *Materia Medica*, or who wants to read up a special remedy, to find what he needs and where to look for it. . . . As regards printing, paper, and general get-up, the house of Boericke & Tafel has fully upheld its old established reputation.—*From the Allgemeine Homœopathische Zeitung.*”

Berjeau, J. Ph. **The Homœopathic Treatment of Syphilis, Gonorrhœa, Spermatorrhœa, and Urinary Diseases.** Revised, with numerous additions, by *J. H. P. Frost, M.D.* 256 pages. 12mo. Cloth, \$1.50.

This valuable little book, compiled from the results of the experience of the best homœopathic authorities, by Dr. Berjeau, of London, in 1856, has since been revised and enlarged by *J. H. P. Frost, M.D.*, and is now, perhaps, the best and most concise presentation of the subject to be had.

Hart, Dr. C. P. **A Treatise on Intracranial Diseases.** By *Charles Porter Hart, M.D.*, Honorary Member of the College of Physicians and Surgeons of Michigan, etc. 312 pp. 8vo. Cloth. \$2.00.

The Author's *Nervous System*, with above as Supplement, bound in one. Price, \$4.00.

“Well bound, beautifully printed, up to the times in pathology, replete with homœopathic therapeutics, supplemental and complotory of the author's work on *Nervous Diseases*—these are its qualifications.”—*Hahnemannian Monthly*, April, 1884.

“It is written in Dr. Hart's elaborate manner, clear and unambiguous, and will prove a valuable guide to the proper understanding and treatment of inflammatory, organic, and symptomatic affections of the brain and its membranes.”—*American Observer*.

“We are glad to observe how closely our author adheres to the rigid (and hence successful) homœopathic method of prescribing. Even in *insomnia*, where the temptation to use chloral, etc., is so pressing, we have given us the truth—to the exclusion of empirical nonsense.”—*Homœopathic Physician*, April, 1884.

“The author gives within a moderate compass, and in a very readable manner, the present views on cerebral pathology, prefacing this with a section on the physiological functions of the cerebrum, cerebral ganglia, and medulla. The section on disease embraces not only the better known but rare and obscure conditions, and these are so lucidly described as to have almost the value of a clinical lecture. The therapeutic part is full, discriminating, and as far as our experience will permit us to judge, accurate. The index deserves an especial note of commendation.”—*American Homœopath*, for March, 1884.

HOMŒOPATHIC • FRATERNITY!

DEAR DOCTOR:—

If you desire to save 25 per cent. of your annual outlay for Medicinal Supplies, at the same time securing preparations equal to those manufactured by any other firm, you will do well to send us your orders.

Owing to our low prices and excellent quality of our manufactured products, our business for the year ending June 1st, 1885, was 107 per cent. larger than the previous year. Our goods are becoming better known every day and are likewise giving entire satisfaction. The transportation rebate which we allow results, in the majority of cases, in delivery of goods free of cost to purchasers.
