Price, 25 lbs., \$2.00; 50 lbs., \$3.50; 100 lbs., \$6.50; 500 lbs., \$30.00; 1,000 lbs., \$55.00; ton, \$104.00.

BONE AND BLOOD (Tankage). Recommended for mixing with potting soil, application to soil on benches for carnations, chrysanthemums, etc. Use one pound to bushel of soil for potting soils, one-fourth pound to square yard as top dressing. BALL'S WHITE ASTER

THE seed of this splendid Giant Aster of the Late Branching type—the product of twelve years' selection to develop the ideal of a perfectly double flower, of flawless color—is offered in 1921 for the first time.

In the Fall of 1908, George J. Ball, a Sweet Pea and Aster specialist, selected a plant among his Late Branching White Asters on which the flowers were solidly double, so much so that from eight to ten flowers only fifty seedlings were grown the following year.

It has been grown and the seed carefully selected every season since. In 1918, three-quarters of an acre netted \$2,320. An exceptionally good market helped, but this variety has always sold for 50 % more than ordinary White Asters.

The flowering season comes between the Royal and Late Branching types, filling in between the early and late glut of flowers. It grows to a medium height with full, distinctively centered blossoms, ideally formed for long distance shipping.

ASTER. American Beauty Rose. 2½ ft. Is similar in type of flower and growth to the well-known Late Branching Asters, but differs in that all the large blossoms are produced on much longer and heavier stems. The flowers are fully double to the last and are a most lovely shade of bright carmine-rose, almost identical with the World-Famous American Beauty Rose. Trade pkt., 25c; ¼ oz., 50c; oz., \$1.80.

American Beauty. Purple. Same as above, but a beautiful rich velvety purple. Trade pkt., 30; ¼ oz., 55c; oz., \$2.00.

Lavender Beauty. Beautiful clear lavender. Trade pkt., 35c; ¼ oz., 65c; oz., \$2.40.

Sept. Beauty. Delicate soft shell pink. Price, same as Lavender Beauty.

Mammoth, Non-Lateral Branching White. This is, without doubt, the largest Aster on the market. Many of the flowers will measure four inches in diameter. The plants grow about two feet high with a low-branching habit, and the flowers which are borne on non-lateral stems, are full, with petals curled and incurved, making the flowers appear like a cross between an Ostrich Feather and a Giant Branching, which has a very pleasing effect. Trade pkt., 35c; ¼ oz., 55c; oz., \$2.00.

Mammoth, Non-Lateral Branching Blue. 2 ft. Very like the preceding except the flowers are a medium shade of blue. Trade pkt., 35c; ¼ oz., 55c; oz., \$2.00.

Heart of France. This opens red as the purest ruby, deepens with age and retains its remarkable color to the very end. The petals appear strikingly changeable, showing now a glow and sheen quite unique, now a soft warm velvety texture. In any light, natural or artificial, Heart of France is startlingly beautiful and will command instant admiration. Trade pkt., 35c; ¼ oz., 55c; oz., \$2.00.

CLEVELAND CHERRY. This is an improvement on Jerusalem Cherry. Differs from it in habit of growth, which is dwarf and compact and the larger number of berries produced. One of the best house plants for window decoration. Trade pkt., 50c; ¼ oz., \$1.00.

DIDISCUS Coeruleus, Lavender Lace Flower. 3 ft. An unknown plant which ought to be grown more frequently. Long stemmed lavender flowers; look like blossoms of Queen's Lace Handkerchief. A constant bloomer. The culture is not at all difficult, only the seed is somewhat slow in germinating. To be sown in a medium hot frame, like Phlox or Verbenas in February or March. Seed will germinate in about 4 weeks. Keep frame closed until the seedlings form their leaves, then give plenty of air when weather permits. To be planted out in May in partial shade. Trade pkt., 35c; oz., \$2.00.

GOMPHERNA. Orange. (Globe Amaranth). A showy everlasting with clover-like heads. Blossoms resemble a ripe strawberry in color and markings. Start in sandy soil in gentle bottom heat. Trade pkt., 25c; oz., \$1.00.

The seed of this Aster is about two-thirds the size of ordinary varieties. It is sold in ¼-ounce packets, containing about 4,000 seeds, at \$3.00.

Chicago, November 9th, 1920.

MR. GEO. BALL, Glen Ellyn, Ill. Dear Sir—We feel impelled to tell you the high praise that we have received from our customers concerning your White Asters. In addition to its magnificent form, it also has the advantage of being an excellent keeper and one of the best sellers we have to offer. We take pleasure in recommending this variety to anyone for either commercial or private growing as it is superior to any White Aster.

Very truly yours,

THE CHICAGO FLOWER GROWERS' ASSOCIATION.

LILIUM REGALE. (The Regal Lily.) It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink, with a beautiful shade of canary yellow at the center, and extending part way up the trumpet. Blooms out of doors early in July, and seedling bulbs will flower the second year. 250 seeds, \$1.25; 1000 seeds, \$10.00.

PETUNIA. Copper Rose. Enormous flowers of wonderful color with a deep white throat deeply veined—a shade that attracts and holds your attention. The substance of the petals is firm with a velvety surface. Free-flowering but shy seeder. Trade pkt. (1000 seeds) \$1.00; 5000 seeds for \$4.50.

Balcony Queen. Pure "Elk"—purple flower of good size with a white throat. Fine for window and porch boxes. Trade pkt. (1000 seeds) 50c.

Dwarf California Giants. The habit of the plant is very dwarf, flowers very large and of the finest substance, very fine range of color. Trade pkt. (1000 seeds) \$1.00.

STOCK. Mammoth Ten Week, Heatham Beauty. A new and quite distinct color in this grand class of Ten Week Stocks. The plant is of pyramidal habit with very large flowers of a rich mauve, shaded terra-cotta. Really an Empress Victoria Augusta on cream ground. Trade pkt., 35c; ¼ oz., 70c.

NEW SWEET PEAS

Annie Bownass. Standard and wings pure deep pink, flushed salmon, might be called a coppery salmon. A good seller. Oz., 60c; ¼ lb., \$2.00; lb., \$8.00.

Hawmark Pink. The most wonderful and glorious pink. Trade pkt., 50c; oz., \$1.80; ¼ lb., \$6.60.

Hercules. A great improvement on Countess Spencer. A wonderful light pink. Oz., 50c; ¼ lb., \$1.50; lb., \$6.00.

Mascot White. A large waved white, good substance. Trade pkt., 50c; oz., \$1.80.

ZINNIA. Buttercup. Buttercup is identical with the other Giant Zinnias, color, pleasing deep primrose, which holds its color in bright sunshine. A wonderful cut-flower. Trade pkt., 30c; oz., \$2.80.

WE SUGGEST Trying out the following, which furnish splendid cut-flowers, either if grown in a cool house or out-doors:

Annual Delphinium. Double stock flowered type in separate colors.

Hunnemannia. (Bush Escholtzia.) Flowers keep a week.

Helicrysum. (Strawflowers.) Flowers sell well fresh and dried, also those of Arocrochium, Rhodanthe and Xeranthemum.

Tall French Marigold. These are fine for cutting and pot culture.

Zinnia Colossal. Separate colors. Fine for cutting. Pinch the seedlings when they are about eight inches high to make them branch out.

HOW VAUGHAN'S SEED STORE MAINTAINS ITS STANDARDS

Forty-four years ago,

Vaughan's Seed Store was established in response to a demand from market gardeners for purer and more fertile seeds than they could obtain elsewhere. Since then, through technical improvements in testing seeds and proving types, higher purity and germination standards have been established and with them Vaughan's Seed Store, through its officials and employees has constantly kept pace.

The latest methods for cleaning and storing seed, testing for germination and analyzing for purity are practiced; while at the same time the advantages acquired from forty-four years in business are retained. Particular care is taken with flower seed, as Vaughan's Seed Store is the recognized headquarters for flower seed in this country. Our stock is purchased from the growers of the best strains in localities most favorable to seed production; and all are tested and analyzed. It is well known among florists that if you fail to get what you want everywhere else, you can count on Vaughan's

A Scene in Our Seed Laboratory Where All Seeds Purchased Are Tested for Purity and Germination Under Supervision of a Government Trained University Graduate.

While keeping up his supply of tried varieties, the seedsmen must be ever on the lookout for new; and the house which values its reputation carefully avoids recommending novelties which have not been thoroughly proved. This requires expensive trial grounds. In Vaughan's seed farms in Michigan and Illinois, all novelties not proven on the grounds of the introducer are tested for one or more years before being catalogued, and here, also, seed of the old varieties are tried out year after year to make sure that our stocks are suffering no deterioration.

Here, also, we grow much of the seed we sell, of varieties for which the soil and climate are favorable. Peas, beans, melons, cucumbers, sweet corn and gladioli are grown on our Michigan farm.

At our greenhouses and nurseries at Western Springs, Ill., which supply our trade with indoor and outdoor flowering plants, the same expert care is exercised as in the seed departments.

Vaughan's Cannas

OUR EXPERIENCE WITH CANNAS

Our Canna fields at Western Springs when in bloom during August and September make a grand showing and present a wonderful blaze of color. They attract thousands of visitors, both professionals and amateurs. Last year we grew over ten acres of standard sorts and novelties, besides 1,000 seedlings. Canna culture is one of our main specialties now as it has been for over thirty years.

Our Cannas have won important prizes wherever exhibited—(Many Gold Medals), Chicago, Omaha, Buffalo and St. Louis, and at the Panama-Pacific Exposition.

We ought to know something about Cannas, and realize that many so-called novelties are being sent out every year whose only claim for existence in many instances is a new name. We had to pay dearly in discovering that ignorant and unscrupulous growers give almost any name to their stock of Cannas, as long as the color is somewhere near correct. To them any red is a "New Chicago," any yellow a "Florence Vaughan," etc.

Our Cannas are true to name, and furthermore, the stock we use for propagation has been specially selected on points of vigor, true type, color, size of flowers.

In our list of sorts will be found all the good old standard kinds, and many of the best novelties, the inferior varieties being discarded every year as the merits of the newer ones are proven.

Prices are for Dormant Roots up to APRIL 1st, after which Pot plants are ready.

DAHLIAS

In the following list we offer what we consider the very best of the foreign and American Dahlias, which we observed in our extensive trials last season. While roots may generally be planted by April 15th, it is hardly wise to set out the growing plants until May 10th to 15th. Contrary to popular opinion, we maintain that Dahlia plants are always superior to dry roots, and are willing to take the responsibility of recommending them. Prices are for growing plants from 2½-inch pots, ready April 15th.

Vaughan's VIGOR Strawberries

Our plants are grown under ideal conditions in Northern Michigan. Note illustration for root development of a single specimen. They have been developed from selected plants. We expect to make "Vaughan's Vigor" Strawberry Plant the standard for the country. We know you will be pleased. Varieties below are up-to-date.

Write for pamphlet on Strawberry Culture.

AROMA. (Per.) Late. One of the most popular late varieties. Fruit large to very large; holds its size well throughout all the pickings. Berry is roundish, conical, smooth and perfect in form and of a beautiful bright glossy red in color; very firm and of high quality. Its rich aromatic flavor has suggested its name. The habit of spreading which this variety possesses opens the way for the sunlight to reach the crown. The leaves are broad, clean and smooth and of a dark green color.

Price, 100, \$1.00; 1000, \$8.50

BIG JOE. (Per.) Late. Fruit large roundish, conical, even in size and shape and holds its size well until the last picking. Dark glossy red, firm and of excellent quality, adapted to practically all conditions of soil and climate. A splendid producer. A good pollerizer for the late imperfect blossoming varieties. Also known as the Joe Johnson. Price, 100, \$1.25; 1000, \$9.00.

CHARLES I. This variety has proven itself one of the very best early berries, yielding more quarts of fine, large berries than any other early variety. It is more widely grown than any other early variety and has given satisfaction wherever grown. The berries are extra large, regular in form, a good color and quality. Plants are medium in size, vigorous, healthy, and a good plant maker. Per 100, \$1.00; 1000, \$8.50.

BRANDYWINE. (Per.) Medium late. Large deep red fruit, and a fancy market product. Flesh firm and red all the way through. The flavor of Brandywine is very distinctive. A general favorite because of its many fine points and its high productivity. Foliage dark green, roots deep, enabling it to endure more dry weather than most varieties. It thrives in any kind of soil and under any reasonable climatic conditions. Price, 100, \$1.00; 1000, \$8.50.

DR. BURRELL. (Per.) Medium early. The berries are large, delicious and beautifully formed. The surface of the berry is a deep glossy red only a trifle lighter in color than the Senator Dunlap. The meat is solid and rich. Its long and heavy root system makes it a splendid drought resister. The foliage is large and of a dark green, having a tough leaf tissue insuring freedom from leaf spots. Price, 100, \$1.00; 1000, \$8.00.

GIBSON. (Per.) Medium early. Berries are large and regular in shape, holding their size well to the end of the season. Color rich red. Flavor is neither sweet nor sour, but just right for canning. Extremely productive, in fact we know of no variety that will produce more quarts of berries per acre than the Gibson. It makes a strong vigorous plant that withstands adverse conditions admirably. This variety seems to embody every requirement necessary for a profitable berry. We recommend it and know you will not make any mistake in planting Gibson. Price, 100, \$1.00; 1000, \$8.00.

KELLOGG'S PREMIER. (Per.) Early. Berries are large, beautifully formed, red through and through; flavor delicious. A splendid shipper. The deep heavy rooting system makes the plant a strong drought resister, and it is especially adapted to any soil or climate, giving you a big crop of fancy berries which will sell at highest prices. Where extra fancy early fruit is wanted we advise this. Price, 100, \$1.25; 1000, \$9.00.

SENATOR DUNLAP. (Per.) Midseason. The fruit is dark red with glossy finish, shading to a deep scarlet on the underside. The meat is a bright red all through and exceedingly juicy. It succeeds everywhere and with everybody—the new beginner as well as with the veteran grower—but should not be allowed to mat too thickly. For a medium sized productive early to midseason berry you need not hesitate to plant Dunlap. One of the best and most popular. Price, 100, 85c; 1000, \$7.50.

PROGRESSIVE. (Fall bearing.) You can have strawberries just as easily in the Fall as in the Spring by planting the Progressive which is the best of all Fall or Everbearing Strawberries. This is the strongest growing plant of all the Fall-bearing varieties we have tried. The plants are very large and heavily rooted, producing a phenomenal crop of medium to large fruits of a dark red color, both inside and out, and of sweet mild flavor. Think of having all the berries you can use on your table during the months of September, October and November, and later, if not killed by freezing weather. Price, of Fall bearing, 100 for \$1.75; 1000 for \$15.00; by express at buyer's expense.

SPECIAL OFFER No. 19. A Strawberry collection, 100 fine strong plants (Spring delivery only) in four good sorts, our selection, postpaid, for \$1.15.

One of the first varieties of Primulinus blood in America to receive a name. This variety, which we introduced in 1914 for the first time, is a cross of select yellows from the Primulinus Mixture, with the variety Sulphur King. Its strong growth and clear yellow color mark it for a leader in this class. The graceful form of all the Primulinus class insures their popularity in our best American gardens as soon as they become known. Price, First size, 100, \$7.00; per 1,000, \$65.00.

CHICAGO WHITE (Vaughan's Introduction)

It has great value for flower designs, the spikes are just large enough, full and white for quick and effective making up of all Floral Works. There is a fixed demand for this variety for early use, both indoors and out. Price, First size, per 100, \$4.00; per 1,000, \$35.00. Medium size, per 100, \$3.50; per 1,000, \$30.00.

Price, First size, Per 100, \$6.50; per 1,000, \$60.00. Medium size, per 100, \$5.75; per 1,000, \$55.00.

THE KING

The habit is similar to the popular Giant Branching, vigorous in growth, long stiff stems. In form the flower is entirely distinct from any other variety; petals somewhat resemble the quilled varieties, but are much larger and broader, those in the center being curled and incurved, completely covering the crown. In shape and size the bloom is round, full and very large.

ASTERS

ASTER, Tall Section—Continued

AMERICAN ASTERMUM

An attractive and descriptive name for a new race of asters which belong to the Comet family. The plants are of strong upright growth with 12 to 15 strong stems 20 inches long, each carrying a flower of perfect form. The seed we offer has been carefully grown, rogued and selected.

OTHER AMERICAN ASTERS

Lavender Gem. One of the most charming sorts. The flowers are of a true lavender shade and the petals are gracefully curled and twisted, and the blooms are borne on long stems..... .25 1.40

Heart of France. Heart of France opens red as the purest ruby, deepens with age and retains its remarkable color to the very end. The petals appear strikingly changeable, showing now a glow and sheen quite unique, now a soft warm velvety texture. In any light, natural or artificial, Heart of France is startlingly beautiful and will command instant admiration..... ¼-oz., 55c .35 2.00

Peerless Pink. The flowers are enormous, globular in shape, many five inches across, of a most delightful and pleasing rich shell pink. First flowers appear about the middle of August, but the plant is at its zenith about four weeks later..... .25 1.80

Crimson Giant. This shade has been one which has seemed to lack intensity of color, but in this variety the blood-red blossom is particularly bright..... .25 1.80

Perfection White...... .25 1.80

Sensation. The reddest of all red asters, the color being a dark rich garnet or ox-blood red which glistens in the sunshine like a live coal. The plants are of the free branching habit, about 18 inches high, the double flowers averaging about 3 inches in diameter are borne freely on stems about 12 inches long..... ¼ oz., 45c .25 1.60

Soleil D'Or (Golden Sun). Best Yellow Aster..... .25

Mammoth Non-Lateral Branching White. 2 ft. This is without doubt the largest Aster on the market. Many of the flowers will measure four inches in diameter. The plants grow about two feet high with a low branching habit, and the flowers which are borne on non-lateral stems are full, with petals curled and incurved, making the flowers appear like a cross between an Ostrich Feather and a Giant Branching..... ¼ oz., 55c .35 2.00

Mammoth Non-Lateral Branching Blue. 2 ft. Very like the preceding, except the flowers are a medium shade of blue..... ¼ oz., 55c .35 2.00

American Beauty. Rose Pink. 2½ ft. Is similar in type of flower and growth to the well known Late Branching Asters, but differs in that all the large blossoms are produced on much longer and heavier stems. It is the first of a new strain of late branching habit, and of robust growth. The flowers are fully double to the last and are a most lovely shade of bright carmine-rose, almost identical with the World-Famous American Beauty Rose. Each plant forms a perfect bush... ¼ oz., 50c .25 1.80

BALL'S WHITE ASTER

A Sphere of Pure White Petals.

The seed of this splendid Giant Aster of the late Branching type—the product of twelve years' selection to develop the ideal of a perfectly double flower, of flawless color—is offered in 1921 for the first time.

In the Fall of 1908, George J. Ball, a Sweet Pea and Aster specialist, selected a plant among his Late Branching White Asters on which the flowers were solidly double, so much so that from eight to ten flowers only fifty seedlings were grown the following year.

It has been grown and the seed carefully selected every season since. In 1918, three-quarters of an acre netted \$2,320. An exceptionally good market helped, but this variety has always sold for 50 per cent. more than ordinary White Asters.

The flowering season comes between the Royal and Late Branching types, filling in between the early and late glut of flowers. It grows to a medium height with full, distinctively centered blossoms, ideally formed for long distance shipping.

The seed of this Aster is about two-thirds the size of ordinary varieties. It is sold in ¼-ounce packets, containing about 4000 seeds at \$3.00 per trade packet.

We are the introducers of this new Aster, jointly with the originator, Mr. Geo. J. Ball.

VAUGHAN'S GIANT PANSIES

VAUGHAN'S INTERNATIONAL PANSIES

Vaughan's International Pansy Mixture was first offered by us in 1889. We import from all the best European sources. Each year has added to the quality of its flowers and variety of its colors. We buy every year, novelties of known merit to improve the mixture; it is always complete, always the latest and always the best mixture. We add to all Pansy Mixtures which we now buy, more than 50 per cent of the choicest named kinds obtainable, each in correct proportion. This is one of the Specialties that has established the reputation of Vaughan's Flower Seeds, and one which we maintain most carefully. Trade pkt., 50c; 1/8 oz., \$1.50; 1/2 oz., \$5.00; oz., \$10.00.

Vaughan's Giant Pansy Mixture

Embraces, besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International Mixture. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau and the splendid, Cassier strain. Trade pkt., 50c; 1/8 oz., 75c; oz., \$5.00; 1/4 lb., \$18.00.

Vaughan's Cut Flower Mixture

This mixture is put up by ourselves and contains mostly light colored sorts. We have sold this mixture for several seasons to some of our Chicago cut-flower growers, who have realized big returns from the sale of flowers. Pansies are as easily grown as violets, require less care and bring better results.

Trade pkt., 25c; 1/8 oz., 60c; oz., \$4.00.

New Early-Flowering Giant Pansies

The new strain produces its giant flowers about four weeks earlier than other known types. In March, when the old type pansies hardly show any buds the plants of the new strain bore from 3 to 5 of their giant flowers.

Early-Flowering Giant White, with eye, Yellow, with eye, Light Blue, Dark Blue, Jupiter Purple, Mars, Cornflower Blue, North Pole Pure White, Wodan Black, and Mixed (eight colors). Trade pkt., (500 seeds) 25c; 1/8 oz., 50c; oz. \$3.00.

Chicago Parks Bedding Mixture

This is a mixture made by ourselves from 20 different and distinct varieties of this type. While the flowers of this strain do not grow as large as those of the Giant Pansies, they excel them by a much greater number of flowers to a plant.

Trade Pkt., 25c; 1/8 oz., 50c; oz., \$1.80.

Vaughan's P. P. (Popular Price) Mixture of Pansies

This mixture, like all "Vaughan" mixtures, is made up by ourselves from separate colors and strains of the Giant and Chicago Parks Bedding types and will furnish a large variety of colors with a good proportion of giant flowers.

Trade pkt., 25c; 1/8 oz., 50c; oz., \$3.00.

The Autumn Sowing of Sweet Peas Outdoors

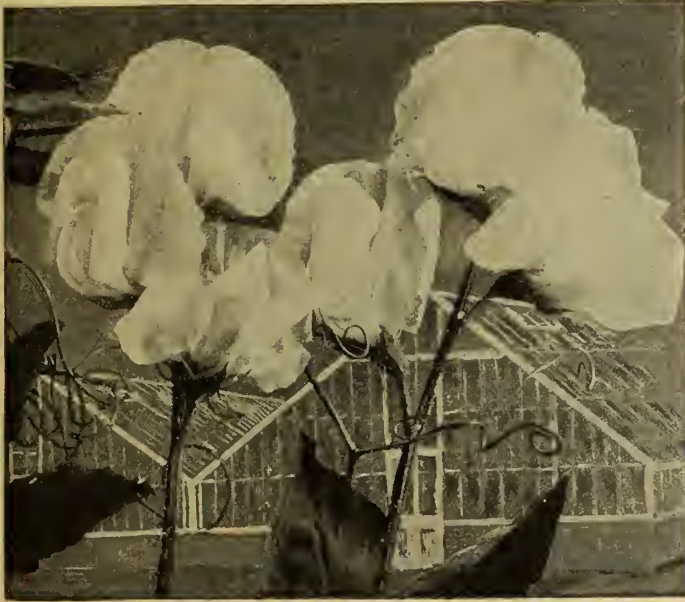

After careful and extensive trials by noted Sweet Pea Specialists, it has been proved and is now an acknowledged fact that Sweet Peas when sown at the proper time and under proper conditions in the autumn, produce in the spring healthier and more vigorous vines; but most important of all, they bloom earlier and give larger flowers and longer stems than spring sown seed.

The time for sowing varies; in southern states it may be done in September and October, but in the latitude of Chicago and New York, November and early December sowing gives the desired results.

The object in view in fall sowing is to get the seeds to germinate in the ground before frost sets in, without having them make any appearance above ground. If this occurs, the plants will winter-kill unless protected. Having germinated before frost, they lie dormant in the ground over winter and are then in a position to benefit by the first warmth of spring, starting to grow about the time that spring sowing would commence. It will thus be seen that fully three weeks or a month are gained, and on account of slower overhead growth, a much stronger root growth is produced, which will carry the plants safely through a long drouth, and secures an extended flowering season.

WE ISSUE A SPECIAL LIST OF SWEET PEAS FOR AUTUMN SOWING IN JULY. ASK FOR IT, IF YOU ARE NOT ON OUR REGULAR MAILING LIST.

SEEDS OF BIENNIALS AND HARDY PERENNIALS

Many of the biennials and perennials are now as important to florists as Asters, Sweet Peas, Verbenas, etc., are among the annuals. Some can be forced, such as Delphinium, Canterbury Bells, etc., while many others sell as readily as Geraniums if grown

in pots, not to speak of the cut-flower sorts, such as Coreopsis Gypsophila, Chrysanthemum, Shasta Daisy, Physostegia, etc. They are really needed in every florist's establishment that caters to the better-class of trade. The demand for them is increasing.

Vaughan's New Snowball

One of our Specialties. We know our strain is the equal of any that can be produced. We have tried nearly every other on the market and we have never yet come across anything superior to Vaughan's New Snowball. It is the result of years of careful selection by a most capable and painstaking gardener who grows the seed especially for us on the island of Amager, near Copenhagen, Denmark, where growing conditions are ideal for the production of perfect seed heads. Vaughan's New Snowball is the best general purpose variety for either spring or fall planting. Heads are usually 9 to 10 inches across perfectly white, solid, deep and compact.

Pkt., 25c; 1/4 oz., 75c; 1/2 oz., \$1.35; oz., \$2.50; 1/4 lb., \$10.00; lb., \$40.00.

Vaughan's Earliest Dwarf Erfurt

Pkt., 20c; 1/4 oz., 65c; oz., \$2.25; 1/4 lb., \$8.00; lb., \$32.00.

Dry Weather

For dry climate and dry seasons. Very sure heading and second early. Heads larger than Snowball and snow white.

Pkt., 20c; 1/4 oz., 75c; oz., \$2.50.

Danish Snowball

This is a grand second early. It is the result of long, careful selection, and uniformly produces even, regular heads. Through many seasons it has proven itself reliable.

Pkt., 10c; 1/4 oz., 50c; oz., \$1.75; 2 oz., \$3.25; 1/4 lb., \$6.25; lb., \$24.00.

SPHAGNUM MOSS

Many of the Sphagnum Moss swamps in the Wisconsin district have been so worked out that the remaining sections contain only old deposits, frequently full of brush, weeds and grass. Our Moss is from one of the largest and cleanest swamps in the Wisconsin cranberry region and the Sphagnum is bright, clean, of new growth, and free from brush or dead moss. Our contract requires the bales to be of the full standard size, which is 45x14x16 inches, solidly packed, and covered with new burlap. We own our moss at right prices, and on a quality basis can meet all competition. The labor situation has improved and supply is better.

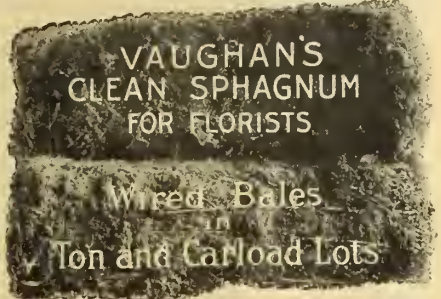

We are putting up clean Sphagnum Moss. Our bales average one-third larger than others. Buy it and compare with other grading.
