have not reached the age when vanity is

still the distance the whole the credit

a bitter instant such as David had when he

Address - "Teacher & Student"

Parasite in Herodes as a model - see under H.

Literature & science know no country, there is a brotherhood & a citizenship of mind. American universities do well to emulate the old Greek spirit which welcomed as teachers men from all parts of the world & in these matters displayed a liberality not since equalled.

"no sovereignty - but that of mind and no nobility but that of genius" (Newman)

Need of men & the personal influence of the teacher. Not libraries not laboratories not the number of the students not even the long long bank account - these - these necessary elements - make the University desirable & renowned. It is one of these. There are but the outward shell - the kernel, the vital moving influence (the animating principle) is the intellect of the men who teach & work within its walls. Here is a passage from one of John Henry Newman's Historical Studies which expresses in terse & beautiful language - this feeling. H.S. III, 48
