8 October 1947

SUBJECT: Integrated Facilities in Army and Navy Arsenals

TO : Commanding Officer, Kyushu Mil Govt Region, APO 929

1. A negative report, letter 387.6, subject: "Integrated Facilities in Army and Navy Arsenals," this headquarters dated 8 August 1947, was submitted for HitaArsenal, Plant 30-3. A recent check on the arsenal revealed that three power sub-stations which appear to meet the criteria set forth in paragraph 1, 11c (10) of Operational Directive 5/9 for 1946, Headquarters Eighth Army dated 15 July 1947, were not reported.

2. In order to keep units intact, one code number was given to the complete set, for instance four transformers are inventoried as one item, 30-3-4088.

25 September 1947

SUBJECT: List of Arsenals and Dispersal Areas, Oita Prefecture

TWX : Commanding Officer, Kyushu Mil Govt Region, APO 929

TO : Commanding General, I Corps, APO 301

1. Reference is letter, AG 004 - M, subject: "List of Arsenals and Dispersal Areas," Headquarters I Corps, dated 9 September 1947.

2. Listing of arsenals and dispersal areas for Oita-ken is not consistent with the manner in which machinery is inventoried and marked, in the following respects:

a. Plant #3, Mita Branch, Kokura Arsenal:

(1) All machinery is inventoried as of plant no.3, and no distinction is made between areas A and B as indicated in the list.

(2) Machinery at the Kobe Steel Works, Nakatsu, was inventoried as belonging to the Mita Plant, as it was originally understood to have been dispersed from there. Present personnel of this headquarters have no knowledge of any interest of the Arao Branch, 2nd Tokyo Military Arsenal, 21-02, in this machinery.

3. To restate the above, all machinery of the Mita Plant is inventoried as plant No. 3, with no letter subdivisions, listed dispersal areas, nor any connection with other arsenals.

FOR THE COMMANDER:

LOTHAR G. JONES, JR.
Captain, TC

19 September 1947

SUBJECT: Destruction of Reparations Machinery by Fire at Hita Arsenal, 30-3.

THROUGH: Commanding Officer, Kyushu Mil Govt Region, Hq & Hq Det, APO 929

TO : Commanding General, Right Army, APO 343
Attn: Mil Govt Section

1. Preliminary report was made by this Headquarters on 8 August regarding a fire at the Hita Branch, Kokura Military Arsenal. This report overestimated the extent of damage.

2. In accordance with ltr AG 004 (Rep) - BA, Hq. I Corps, subject, "Corrected Inventory Sheets", dated 12 August 1947, report is submitted on damage to individual machines.

3. The classification of machines assigned the following numbers is not changed, but the inventory sheets should bear the notation, "motor missing":

30-3-420	579	635	645
422	582	636	646
423	624	637	647
436	626	638	648
437	629	639	649
438	630	640	650
440	631	642	651
577	633	644	652
			653

4. Classification of the following machines should be changed to "Scrap":

(a) From class 1 to scrap, 30-3-70, 87, and 177.

(b) From class 2 to scrap, 30-3-71 and 309.

5. Classification of the following machines is changed from class 1:

(a) to class 2:

30-3-78 81 82 83 86 89.

(b) to class 3:

30-3-261.

BASIC: Ltr, Oita Mil Govt Team, 387.6, subj: "Destruction of Reparations Machinery by Fire at Hita Arsenal, 30-3, dtd 19 September 1947.

6. Request that this Headquarters be advised if inventory sheets at the Reparations Section, SCAP, are changed, so that we may then change copies of sheets held by the Governor, Oita Ken.

8 August 1947

387.6

SUBJECT: Destruction of Reparations Machinery by Fire at Hita Arsenal

TO : Commanding Officer, Kyushu Military Government Region
Hq & Hq Detachment, APO 929

1. A fire destroyed buildings #171 and #172 of the Hita Branch, Kokura Military Arsenal, on 4 August 1947.

2. Preliminary surveys place the loss at one million yen based on current prices.

3. The fire will necessitate the filing of new inventory sheets, making the following changes:

a. Twenty-two machines previously in category one will be reclassified three.

b. Three machines will be reclassified from two to three.

c. Three machines in categories one and two are damaged beyond repair, and are of value only as scrap.

d. Thirty-three machines now have motors missing.

4. Cause of the fire was the overheating of a furnace being used to dry out electric motors, due to negligence of two Japanese employees. These men were laborers who had been operating the furnace for several months under the supervision of a qualified engineer. On the day of the fire, the engineer was unable to report for work, and the laborers decided to continue the work without him. They failed to check the two thermometers provided to control the heat.

5. Ordinarily there is water in a nearby stream which workmen might have used to extinguish the blaze, but the stream is dry at the present time. One drum and several small buckets of water were thrown on the fire, but were insufficient.

6. Furnace will be rebuilt in an area where fire protection will be better, and will not be operated except under qualified personnel in the future.

7. New inventory sheets will be submitted within a few days.

FOR THE COMMANDING OFFICER:

LUTHER G. JONES, JR.
Captain, TC
Adjutant

SUBJECT: Custody, Control and Protective Maintenance of Japanese Aircraft Plants, Arsenals and Laboratories

FROM : Mikuma Truck Transportation Co. Oaza, Takoda-matchi, Hita, Kyushu Japan (Applicant)

28 May 1947
Date

TO : Commanding Officer Oita Military Government Team

1. Reference is made to memorandum for the Imperial Japanese Government, dated 20 January 1946 (SCAPIN-629), and memorandum for the Imperial Japanese Government, dated 28 May 1946 (SCAPIN 967), both subject as above.

2. It is desired that permission be granted to move equipment and/or machinery of aircraft factories, Army and Navy arsenals and laboratories as taken into the custody and control of the Supreme Commander for the Allied Powers.

3. The following information concerning the desired movement is submitted:

a. Owner of equipment and/or machinery: Japanese Government

b. Present use of equipment and/or machinery: Not in use, held by Applicant pending return to reparations plant.

c. Use intended for equipment and/or machinery after movement: Storage for reparations purposes

d. Exact present location of equipment and/or machinery: Mikuma Truck Transportation Co. Oaza, Takoda-matchi Hita, Kyushu, Japan

e. Exact location to which movement of equipment and/or machinery is desired: Hita Branch of Kokura Arsenal

f. Exact description of each type of equipment and/or machinery and number of items of each type to be moved are given in list attached.

g. If approval is granted, movement of this equipment and/or machinery will be accomplished between the following dates: 1 June to 30 June 1947

4. The attached list of personnel will perform the movement.

5. The proper safeguarding and maintenance of this equipment and/or machinery is my personal responsibility.

BASIC: Ltr, Oita Mil Govt Team, Serial No. 7157, subj: "Reparations Machinery Inventory", dtd 13 Nov 46.

387.7 1st Ind LAW/enh

KYUSHU MIL GOVT REGION HQ & HQ DET, APO 929, 21 Nov 1946

TO: Commanding Officer, Oita Military Government Team

1. Clarification is desired of the statement made in paragraph 1 of basic communication "At the time of inventory this machine was not listed on the inventory sheet because it was classified as Class 3 (unserviceable)".

2. Is this headquarters to assume from the nature of this statement that no Class #3 machines were inventoried in any plant selected for reparations within your area of jurisdiction? If this be the case, full explanation is requested of your headquarters as to the basis of your decision to not inventory Class #3 machines.

3. Appendix B to Inclosure 1 to Operational Directive Number 5/4, Headquarters Eighth Army, includes a number of sample inventory sheets properly executed. It will be noted that three of the four sample sheets are prepared for Class 3 Machines, further emphasizing the particular attention that shall be given Class 3 machines particularly as pertains to "I. Brief Reasons Why Unserviceable".

4. If this machine was considered a salvage item and no inventory sheet prepared, your attention is directed to Operational Directive 5/4, Headquarters Eighth Army, Inclosure 1 which contain instructions for the inventory of reparations plants. Section III H of this inclosure contains this statement: "Salvage Items: Those items that are obviously of only salvage value because of structural damage will not be inventoried. Their approximate number should be indicated on the cover sheet, see Par #6a, GENERAL REMARKS."

a. Accordingly, these items should have been referred to in your cover sheet, in the event you considered them "Salvage Items".

5. Attention is directed to paragraph 8, letter 383.7, this headquarters, dated 13 July 46. Subject: Reparations Inventory Procedure which states in part: "when in doubt, the machine will be placed in the lower classification". After machinery has once been inventoried and the inventory and plant cover sheets forwarded, it is not intended that changes should later be made in the reported classification condition of machines (Par H of Inventory Sheet).

BASIC: Ltr, Oita Mil Govt Team, Serial No. 7157, subj: "Reparations Machinery Inventory", dtd 13 Nov 46.
(Contd)

6. It is not easily comprehended how a machine can be changed from an unreported salvage category to a "Class 1" machine, particularly in view of the limited servicing and repair necessitated by SCAPIN - 1219. Accordingly, it is desired that due consideration be given existing instructions before listing any machine a "Class 1". A "Class 1" machine can be compared only with a new or completely rebuilt machine which has had little usage since being rebuilt.

7. Attention is further directed to paragraph 5c and d of Operational Instructions 1/1, Headquarters I Corps, 17 June 46 as concerns the proper routing in disposition of Inventory Sheets and Plant Cover Sheet and Inventory Verification Report. The inclosure erroneously contains inventory sheets but no cover sheets for Plant 3a.

SERIAL NO: 7157

SUBJECT : Reparations Machinery Inventory

TO : Commanding Officer, Kyushu Military Government Region
Hq & Hq Detachment, APO 929

1. The machinery listed on the attached inventory sheet was loaned from the Hita Arsenal to Niigata Iron Works. At the time of inventory this machine was not listed on the inventory sheet because it was classified as Class 3 (unserviceable).

2. Since that time the Niigata Iron Works has repaired this machine and is now classified as Class 1 (serviceable).

3. The attached inventory sheet is forwarded through channels for proper disposition as required by SCAP directives.

FOR THE COMMANDING OFFICER:

PATRICK C. MAGINNIS

"Hoan" No. 203

16 Nov 1946

From : Governor of Oita Prefecture.

To : Commanding Officer, Oita Military Government Team

Subject : Re-investigation into the Kokura Military Arsenal about its transactions

In compliance with your instructions, No.7,071, dated Oct. 21, 1946, we, hereby, beg to submit to you the following report on the results of our re-investigation into the Kokura Military Arsenal about its transactions:

(Signed by) /s/ T. Hosoda
Tokuju Hosoda,
Governor of Oita Prefecture

A.

(1) The annexed list No.1 has an English version of the Army Secret Order (The original of the Order has been handed over to Lt. Co. Straction (?) Nakatsu Detachment of the Occupation Forces, in January this year. This English version, therefore, is from a copy kept by the winding-up office of the Military Arsenal.)

(2) The Kokura Military Arsenal had its headquarters at Hita City. The Commanding General of the Arsenal was Lt. Gen. Kisaburo Osachi. And the following high-ranking Army officers were on the staff to aid the commanding general in his functions.

Major General	Saburo Tsutsui (Vice Commanding-general)
Lt. Col.	Tosuke Horinouchi
Ditto	Hajime Yamamoto
Major	Kan Nakai
Ditto	Wataru Nagano
Ditto	Takeshi Saimizu
Ditto	(Name unknown) Hamano

The Arsenal had the following two factories at Hita City.

The 2nd Factory (Commanding General-Maj. Gen., Giichi Dogane)

The Kasuga Factory (Commanding Officer-Colonel, Kiyoshi Katsura)

There were three other factories, under the command of Lt. Gen. Osachi, respectively situated at Kokura City, Itoguchiyama Village and Bajo Village.

It was immediately after the termination of hostilities that Lt. Gen. Osachi had bogun to dispose of the Military properties, with the aid of his subordinates.

(It was alleged that the dispositions had been commenced in conformity with an oral order issued,on Aug. 17th, by an Army liaison officer despatched from the War Department.)

Soon after that, the Lieutenant General was in receipt of the Army Secret Order, stated in (1) above, and, consequently, he went on with the dispositions. Following were formalties necessary to dispose of the military properties.

Petition for release of machines had, first, to be filed with the technical affairs office of the Arsenal. Petitions for tools, with the working affairs office. And petitions for release of materials in general, with the fiscal affairs office.

All petitions, through the above channels, had to be forwarded to Maj. Gen. Soutsui, who would select appropriate petitions from among all those filed. The selected pttitions, then, had to be presented to Lt. Gen. Osachi, for final decision. Petitions, thus approved by the Lieutenant General, were to be sent to the commanding general or officer of the factory concerned, who would hand over the petitioned properties to respective petitioners.

(Postcript) the Army officers in charge of technical affairs (including Lt.Col. Yamamoto) took charge of deciding the respective prices.

Lt.Col.Horibouchi and other officers in charge of fiscal affairs
were held responsible for collecting the prices.
The annexed list No.4"List of Persons in receipt of the ex-military machines",
is listing those persons who have been in receipt of the ex-military machines.
(Including the machines listed in the annexed list, there are some other
persons who are in receipt of the ex-military machines disposed of by the
Kokura, Itoguchiyama and Bajo Factories.)
To government office, the military properties were transferred free of cost,
while private enterprises had to make payment for each receipt of the ex-
military properties.)
Major Nagano, as a revenue officer, was in charge of receiving the payment
from such private enterprises.
As stated in the annexed list No.3, the revenue officer received a sum of
¥626,687. There is another sum of ¥451,729.80 for the dispositions
made by the Kokura, Itoguchiyama and Bajo Factories.
After all, the revenue officer received a total sum of ¥1,079,416.80.
The above total sum, in the name of the Commanding General of the
Arsenal, has already been paid in the Bank of Japan, to replenish
the national revenue.
The machines, once disposed of by the Arsenal, have been returned
to the Arsenal, although there are some machines, the use of which
has been newly approved by the Financial Board.
Both of the machines are alike subject to reparations.
And the annex list No.4,"List of machines disposed of", is
stating locations and inventory-numbers of such machines.
B. (1) The annexed paper has an English version of the "Disposal Suspension
Order."

(As the original of this order, as in the case of (1), has already been handed over to Lt.Col. Straction(?), it was translated from its copy)

(2) In accordance with the suspension order, those who were responsible headed by Lieutenant-General Osachi, seemed to have stopped the general disposition of the machinery. However, in the light of the fact that they loaned or disposed of machines and instruments totaling 306 items, for the period from August 30 to November 12 to the Hita Agency of Oita-ken Automobiles Repair and Sales Company Limited and 3 other persons, and further that they informed the Chief of Military Army Administration Headquarters of the receivers and items of them without taking any due steps as to collection, it may well be said a violation of the said suspension order.

These mistreatment were done through such route as in the attached list No.7, the details of which are as follows:

(a) Wataru Nagano, Major
Motomi Tao, Captain
Yataro Shishido, Lieutenant

Being financed by Tokizo Nagano, President of the Asahi Wooden Clogs Company Limited, above listed three men planned to set up a wooden clogs plant using the machines in the Arsenal, and had the permission of Lieutenant-General Osachi for loan of 25 items of machines and disposition of 58 items of materials in the name of the Asahi Wooden Clogs Company Limited throught Major-General Akagane and Major-General Tsutsui, both of whom were their superiors, around October 2, 1945, having obtained the machines and materials as are described in the "List of Loan of Machines and Disposition of Materials" of the attached list No.7. But they were collected afterwards, when the establishment of the plant was ceased.

Among the above mentioned items; 9 machines are now kept at the Asahi

Wooden Clogs Industrial Company Limited which have been earmarked for the reparation articles. Their numbers of index are as mentioned in the attached list No.6.

(b) Kunio Sato, Captain
Toshio Miyazaki, Engineer

being financed by Yoshimi Terakawa, managing director of the Hita Industrial Company Limited, above listed two men planned to set up a farming tools plant as their own workshop using the machines in the Arsenal and had the permission of Lieutenant-General Osachi for loan of 26 items of machines and disposition of 16 items of materials in the name of the Hita Industrial Company Limited through Major-General Akagane and Major-General Tsutsui, both of whom were their superiors, around October 22, 1945, having obtained the machines and materials for tools as are described in the attached list No.6. After that they were decided to be collected, and the materials for tools were returned. But the machines are now being used to make farming tools after having the official permission of the Occupation Forces and the Financial Affairs Bureau by the Hita Industrial Company Limited which was set up newly.

Those machines, too, have been earmarked for reparation articles and their numbers of index are as mentioned in the attached list No.6.

(c) Makito Matsumoto, Captain

Financed by Urata Ito, President of the Ito Clog Company Ltd., and others, Matsumoto intended to establish a clog factory jointly, using the machines kept in the Arsenal, through the agency of Ex-Major-General Dogane and Tsutsui, bothe the former higher officer of him, he got permission from Ex-General Osachi under the name of the Ito Clog Company Ltd., on about November 11, 1945, to get loan of thirteen articles of machines and to buy 39 articles of materials. Thus he obtained the machines and tools shown on the annexed list No.6. After this, it came to pass that these goods were withdrawn, and so the materials and tools were all given to the

Arsenal.

Of these machines nine articles are being used for making agralian implements by the newly established Hikuna Agralian Implements Factory with permission of the Occupation Forces and the Japan's Financial Bureau authorities.

These machines are involved in the inventory of the reparations goods, and their inventory numbers are shown on the annexed list No. 5.

(d) Sangire Hikoe, Lieutenant

helped the Nagasaki Dockyard Co. Ltd. which is run by his father to buy the machines in the Arsenal. In concert with the company he got permission on about November 2, 1945, to get loan of the seven articles of the machines from Lt. General Ushachi under the name of the Nayashikano Dockyard Co. Ltd., through the agency of Major-General Tsutsui, the former higher officerof him. And thus he got the machines shown on the annexed list No.6. These machines are being used for repairing fishing-boat by the Company after having got the permission of the Financial Bureau formally. They are involved in the inventory of the reparation goods and their inventory numbers are shown on the annexed list No.6.

(e) In ad ition, about Sept. 27, 1945, Lt-General Usachi and other responsible persons actually handed over 8 kinds of machines, which had got through the same contract about Aug. 23, 1946, to the Oita Ken Auto Repair and Sale Co., as listed in the attached list No.6.

These machines have been employed anew by the same company for repairing of automobiles under the permission of the Financial Affairs Bureau. Furthermore, they sold 13 kinds of machines and 101 kinds of materials lent as listed in the attached list No.6 nearly from Sept.3 to No.10 in the same year, to the Kyushu Electric Works Co.Ltd., Hita Branch, the Misumi Cooper Factory and the Mii Agricultural School.

Afterwards, these machines and materials were withdrawn and returned to the authorities concerned. But 4 kinds of machines have been employed

Again by the M( ) Agricultural School for the pu[ ]se of the Agricultural practise of students under the permission of the Financial Affairs Bureau.

All these 4 machines have been included in the items of the reparations properties, but, with no list-number checked.

C.

(1) Major Wataru Nagano
Captain Motomi Yao
1st Lt. Yataro Shishodo
Engineer K[ ]nio Sato
" Mahito Matsumoto
1st Lt. Bunjiro Nakabe

The foregoing 7 persons made arrangement for setting up of a factory, being financed by civilians in order to get their own positions after their resignation from the military services, or tried to procure certain sorts of machines in behalf of the firm managed by father. From this point of view, they can be said to have behaved for their own benefits.

But there are no evidences that they were actually rewarded money for their conducts of assistance or earned some money by selling other machines. Some of these machines have been now employed by the firm concerned newly under the permission of the Financial Affairs Bureau. Captain Sato, Captain Matsumoto, 1st Lt. "akabe have got their positions in these firms, which have been employing these mac.ines of the Army Arsenal Depot, to earn their salary for supporting of their livelihood. But they have been given no more allowances than their salary.

(2) As the machinery and equipments were afterward designated as reparation properties, it was decided to take measures to withdraw those taken out of the factory. In jan. this year, Chief of District office, in compliance with the order of O.F., distributed "Order Sheet to Return" from house to house, and in collaboration with Chief of Hita Police Station, all properties capable of being withdrawn were

returned to the factory.

As to the machinery already in use and liable to no theft, Financial Bureau granted permission to use them temporarily, made inventory of existing properties and still permits to use after they were numbered & entered in the list of reparations properties.

(3) There are no commissioned officers mentioned before or other employees of ex-military arsenal who are stockholders of companies that use machinery and tools released from the Arsenal, but there are three such persons who are in the employment of such companies as officials or clerks. The names of those persons and those of the companies are shown on List 3, the List of Investigation into Employment of commissioned officers.

D.

(1) The respects that the commissioned officers assisted the companies having close connection with them to procure machinery and materials after receipt of order of suspension, and that those persons from Lt. General Osachi down to officers in responsible position rented machinery and released materials in negligence of the order from authorities, are concluded to be contrary to the order.

However, the properties released in an unlawful way have all been withdrawn and the officers, with a few exceptions, left no traces to illegal profits. Therefore, this circumstance may be taken into consideration in treating them. But there seems to have been some commissioned officers who made efforts to dispose of the properties or to rent them from the ignorance of the main point of the order of suspension above mentioned. Considering thus, it is difficult to judge whether it is right to hold all of them responsible for their deeds, but at least Lieutenant General Osachi, Maj. General Tsutsui, Colonel Matsura should be held responsible for this affairs as persons in the position of leaders in the establishment.

(2) The opinion of the procurator-in-chief of Oita District Court concerning the matter is that, since Lt.General Osachi down to those officers concerned disposed of the national properties kept by them in custody for business purpose, their deeds may be interpreted "Usurpation on business" provided for in Art. 253 of Criminal Law. But as is stated previously there is a room for consideration of circumstances in this affairs, so that it cannot be decided in a hasty way to prosecute them for it unless direct investigation by procurators are carried out.

(3) On the other hand judges cannot express their opinion as they are not allowed to do so before the matter is actually brought into the court.

E. Other matters for reference.

The state of repayment of prices for machiner (materials excepted) disposed of for consideration by Military Arsenal (including Hita, Kokura, Itoguchiyama and Bajo) is as shown on Lists.8. As is seen on this List, application for repayment have been submitted by a few companies, but no repayment has been made yet.

Some companies has not even applied for it, and up to the present no companies have been paid.

1. Reference: Letter, Headquarters Oita Military Government Team, subject: "Release of a Part of the Hita Branch, Kokura Arsenal, Oita Ken", dated 6 August 1946, Oita Serial No. 6715, and subsequent indorsements thereto, particularly 3rd indorsement, your headquarters, dated 30 August 1946.

2. Information contained in above refernced basic communication revealed that release of the Hita Branch of the Kokura Arsenal to be an unusual case, inasmuch as the land on which the arsenal was built was not owned by the Japanese army but was rented from a private citizen. Reparations machinery located in the subject area had been centralized in another part of the installation, and nothing remained except land and empty buildings. Above referenced basic communication recommended that the buildings be dismantled for use in rehabilitation work in Oita Prefecture, and that the land be released through the Home Ministry (for the purpose of determining title) to the original owner. It was pointed out that the land and buildings could not be released under provisions of Operational Directive 28/12, since the area was privately owned, and also was listed as a reparations selection which are specifically exempted by paragraph 3 (17d) of Operational Directive 28/12. Subsequent indorsements approved interpretation of the Oita Military Government Team, and 3rd indorsement, your headquarters, referenced above, approved the release of the land and building.

BASIC: Ltr, Oita Mil Govt Team, serial No. 6970, subj: "Release of Parts of Hita Branch, Kokura Arsenal", dtd 30 Sept 1947, (con'd)

3. After the release had been accomplished by the Military Government Team, basic communication of this corresponsdence was forwarded to your headquarters for notification that the property had been released. No OGA form 1's were accomplished was returned by 3rd indorsement, your headquarters, dated 16 October 1946, for execution of OGA form 1 in compliance with Operational Directive 28/12. Present correspondence has been pending at Headquarters Oita Military Government Team since 1 November 1946. However, the Oita Military Government Team has been unable to accomplish OGA form 1's inasmuch as the Japanese government is reluctant to buy the land as captured enemy property, since it was owned by a private citizen.

4. It is the recommendation of this headquarters that the release made by the Oita Military Government Team by inclosure to basic communication of this correspondence be declared sufficient, and that this release be considered as final. It is further recommended that a definite policy be established regarding future instances of this type in which property privately-owned by an individual or corporation, and used during the war by the Japanese army or navy, be considered exempt from the provisions of Operational Directive 28 as amended. In the event that this policy is not formulated, the interpretation of Oparational Directive 28 would become thoroughly confused, inasmuch as there are several thousand privately-owned shipyards, warehouses, factories, schools, shrines, temples, and geisha houses which were used by the Japanese armed force during the war. However, it would be difficult to process and return all such installations under the procedure outlined in Operational Directive 28 as amended.
