(o) RESULTS: (For all hits claimed on ship targets and for land targets of special interest, draw diagram, top or side view or both, as appropriate, showing type and location of hits. For all targets give location and effect of hits, and identify by numbers above. Use additional sheets if necessary).

1. One string of bombs was laid across the runway; all others hit in the dispersal areas. Four S/B planes previously damaged received additional damage from strafing and rocketing. One of these may have been operational prior to the attack the others were not. One damaged S/B plane was destroyed completely by a direct rocket hit. A small building in the dispersal area was damaged by strafing. A large fire started in the dispersal area but it burned only a few minutes.

2. All rockets hit in dispersal area with results unobserved. Two S/B planes which may have been operational were strafed but did not burn. A damaged barracks building received additional damage from strafing and one probable rocket hit.

(p) Were Photographs Taken? Yes Photographs of Damage, When Taken, Should Be Attached By Staple.

V.U. 32.1.1 was assigned the mission of neutralizing the **Ishigaki** airfields, relieving **V.U. 32.1.3** of that task for this one day. The strike groups were organized, one to strike **Niyara** and the other to strike **Ishigaki**. The **SABRE** DAY (VC-53 aboard), and the **REGATE** DAY (VC-99 aboard) were assigned to the second strike group. The VC-53 and VC-99 planes proceeded to the target area as one group but just before reaching **Ishigaki** broke into two separate strike groups, with VC-99 striking **Ishigaki** airfield, and VC-53 striking **Niyara** Airfields as its primary target and **Regina** Airfield as its secondary target. Five strikes were scheduled for the day, this one being the first.

Prior to take-off pilots had been briefed on the following target priority: (1) operational aircraft, (2) operational runways (3) aircraft service facilities, (4) AA positions around dispersal areas, with boats and shipping, if present, having high priority. Based on the previous experience of **VU 32.1.3** pilots were also told to expect intense AA and instructed to stay above 2500 feet.

Upon arrival at **Niyara** Airfield, both strips were found to be wholly inoperational and pitted with innumerable bomb craters. There seemed to have been no effort to repair either strip. One pilot dropped a string of bombs across the northern end of the north-south strip, which seemed to be a little less damaged than the rest of the strips. The VF made a strafing run first, then the VZ and VY went in together for a strafing and bombing run, with a few planes also firing rockets. Ten or twelve aircraft were seen in revetments or around the edge of the field but they were clearly not operational, most of them in fact being so battered as to be not much more than debris. One S/X plane which may have been operational was strafed heavily and one damaged plane was destroyed completely by a direct rocket hit. A few scattered bursts of medium AA and very meagre light AA was encountered but it was very inaccurate and did not cause any trouble. There was no aerial opposition whatsoever.

Since the pickings were so lean at **Niyara**, the attack moved over to **Regina** but there too the airfield was found to be wholly inoperational as a result of previous attacks. A few wholly inoperational aircraft were seen along the edge of the field but the target did not appear to be at all profitable. Here too, the VF went in first on a strafing run, then the VY and VZ went in together on a strafing and bombing run. Two S/X planes which may have been operational were strafed and a damaged barracks building was further damaged by rockets and strafing, but no other damage was observed except that all the bombs hit in the dispersal area. Only very meagre and light AA was encountered.

The flight then returned to **Niyara** airfield and made a strafing and rocket attack there but the results could not be observed. Several small fires were started but they did not last very long.

To confuse any enemy radar controlled AA window was dropped on the first bombing run. Drops were made at five second intervals from 2-3 minutes before push over until bombs were dropped.

VY Pilots: Lieut. R.S. BOOMER; Lieut. (jg) R.H. SCHAFER, R.R. THUNDALE
W.H. HURSTON; Ensigns P.A. McLEOD, J. KICK, F.P. McKEOI
J.J. MEAGHER, Jr.

VZ Pilots: Lieut. H.H. WORLEY; Lieut. (jg) V.R. ALMERS, R.G. PERRY
C.H. BAKER; Ensigns W.O. GUNDLACH, C.W. JONES.
