The council met in session at 5 p m, when the re-porter and all the members were present, but Dr Mc-Ferlang cuired immediately.

The following letter from the Mayor was read. ollowing letter from the Mayor was read.

The following letter from the Mayor was read.

Mayor's Office, Dec 18th.

Teathe president etc of the city council:

Gentlemen—The time drawing near when you will have to elect several corporation officers, among whom will be a ship whatinger, I think proper to all to your recollection certain observations I had submitted to the former council, at the time the ordinance of November 8th, 1834, appointing a levee wharfinger, was adopted. I remarked that by the appointment of that officer, the ship wharfinger being discharged from the most arduous part of his duties, it was but just to curtail the rate of the commission he receives on sums collected in proportion to the decrease of his duties,—Said commission amounted in 1834 to \$2000, and this year to \$2.405 47.

This subject is now most opportune, as you have increased the salary of the levee wharfinger; for such a diminution as that I propose, would establish a fair proportion between the salaries of those two officers, and also save the treasury additional disbursements. I deem it my duty to inform you that in many cases I have observed that the city printer did not fulfil his daties according to the letter and meaning of the ordinance relating to him.

On that subject I will mention a fact which I submit to your consideration. In your sittings of the 18th and 90th November last, you have adopted sundry ordinates times, I wrote on that subject to its proprietor to request him to comply with your resolutions, but received no answer.

I learned since that Mr Bayon had presented to the council a petition to obtain some explanations on some stricles of his contract.

to request him to comply with your resolutions, but received no answer.

Ilearned since that Mr Bayon had presented to the council a petition to obtain some explanations on some striptes of his contract. I wish very much you would not on said petition, so that I could in future take the nectradity steps to insure a faithful publication of the debates of the council, the opinions of its members and all-other documents submitted to you in your sittings. B. Alvang, the resolutions you have adopted in the pitting of the 14th inst, there is one which enacts that I shall be my day to transmit to the council the date of all advertisements inserted by me in the official paper. Allow see gentlemen to observe that having all ready too much to attend to, it would not be just to impose upon me this new and particular duty, as you may yourselved by a single gapee over the city paper which you receive necessarian these dates; for all advertisements sent by me to that paper are dated from the day of my signing them. I hope you will not parelist in that resolution, which I take the liberty to return to you.

There is moreover snother resolution patents in parelisments, I will only observe that each recriminations. If indeged is, would accessed in improper waste of the time we are bound to docute to the interests of our constituents. For my part I believe it will be sufficient to inform you that if in future, any of your resolutions were not founded on the text of our laws, if they are not founded on the text of our laws, if they are not founded on the text of our laws, if they are contrary to these enne laws or if they are no worded that it would either encreashed on one prorigatives, or wound my feelings as a maginerate, I shall remain sient, and consider it as neal and wold.

S. I send you a latter from Mr Edward Livingston upon which your will have to decide.

A. At the request of several members of the city council I have the honor to submit again to your appropation the following appointments.

D. Per examination of the m

Respectfully genilemen, your obt servit.

On the let part of the mayor's measure relating to the malary of the ship wherfinger, Gistave Schmidt present ied a resolution to the off-ct that the maximum of unlearly allowed said wherfinger should not exceed an animal compensation of 3000 dellars; and that he should be to thinged to account with the corporation for the surplus receipts cellected.

If Gistennie opposed this, as he believed that the facteused amount of collections dhalayed greinst activity and exhibited more trauble on the part of the collecter, and that he would by willing to give 5 per cent commission to any who would "half thousands to the city revenue.

If Schmidt contended that the missount of the collections did not depend on the wherfinger; nor is ignater frouble necessary is collecting 50 dollars duty on ships than 5 on other cruft. The council are to regulate the amount of duty, the mode of its collection and the compensation necessary. He will appose that the wharfage duty of ships amount to 100,000—whould a collector reterive the amme percentage commission on the latter as on the former? or is it owing to this exertions that the sumber of ships trading to the port and the revenue consequent, has so increased life compensation of 5 per cent on 40,000 dollars is sufficient to secure the services of an efficient efficer for collecting the wharfage revenues of the corporation, would it be heir or prudent to give him 6 wer cannot on would it be heir or prudent to give him 6 wer cannot on would it be heir or prudent to give him 6 wer cannot.

ities that not exceed in annual salary of the shill not exceed in annual salary of the shill not exceed in annual salary of the shill it was an account of not accounting the ships series collected, that the late naval officir was reasonable to the collected of the the instance of the received from his status. He believes that 2000 deliars is a typy fair compensation for the ship wharfinger, as the same salary is allowed to the wharfinger for standousts who is obliged to keep a clerk. Some limitation should be used in limiting the maximum of salary. The ship wharfinger should be obliged to become to the corporation for sil warplus receives; and as the controller receives regularly from the customhouse on account of the ship which arrive in port, it is very easy to keep a check on himmin regard to the sum that he should pay should be reason. This affords a sufficient check on himmin for the sum that he should pay should be reason. This affords a sufficient check on himmin and the amount of salary stated in the resolution is an elegate compensation to sacrife the services of a laithful and diligent officer.

Mr Berry thought that the amount of percentage on the ship of your occleted by the wharfinger does not exceed 2,200 dollars, and that it is not too large a salary. When Mr Nigh became wharfinger, the duty was only 1500 dollars, now it is upwards of 43,000—5 per cent on which is not too great. He hoped that the salary would not be altered at present, as here is no necessity for a change.

Mr Thomas moved that singuesed of 5 per sent should be the commission, on which sof being seconded, the resolution was put to the vote and rejected on a division. The subject was then referred to the sanares committee.

On the 3d part relating to the contract of the city principar, Mr Schmidt presented as no journal which he may select, all the ordinances etc of the council which the corporation printer shall refuse, delay or neglect to problem;

A memorial was reserve from the and canal bank announcing that that can exceed early in the ensuing month and a propriety of the streets leading to it be

house at to its intercourse with Rempart be paven immediately. Mr. Baldwin moved an amendment ordering Tchoupitsales from Delior to Lacourse to be paved.

Mr. Gaican é moved that the incorporation of the corry should be extended to Piety and Craps streets as low as to the lower limits of McCarry's photation.

The 2d and 3d amendments were carred—the original question was called for and fell, and with it all the amendments and subamendments.

The council adjugated till Saturday next.
