1931 Wholesale Price List

Greene, New York, February, 1931

Gentlemen:—

We take pleasure in sending you our 1931 Wholesale Price List. This Price List cancels all previous lists, and while the prices noted are those prevailing at the time of going to press, they are subject to change without notice. These prices are for Dealers only. They are not retail prices.

Our Terms of Sale are:—Vegetables and Flower Seeds. Net Cash, June 1, 1931, to firms of approved credit rating; to others C. O. D. A discount is allowed if the invoice is paid within 10 days of the date on the invoice. Onion Sets, Field Peas, Grass Seed, Etc. are Net Cash, no discount. Seed Corn, Millet, Oats, Etc. are Draft with Bill of Lading. All prices are f. o. b. Greene, N. Y. Bags are charged at value unless otherwise noted.

We give no Warranty expressed or implied as to purity, description, quality, productiveness, or any other matter of any seeds, bulbs or plants we send out, and we will not be in any way responsible for the crop.

The descriptions in this list are of necessity rather brief. For fuller details, consult our Garden Guide. Copies of this book will be mailed upon request for your own use, or for distribution to your trade.

Should you buy in quantities and desire prices on quantity lots, we will be very glad to quote you upon request.

Our representatives will call upon you during the coming months, soliciting your business for 1932 spring delivery, thus giving you the opportunity to take advantage of our low growing prices. We will be very glad to quote you on your requirements at any time.

Use the handy Order Blank enclosed and make sure of having your supply of seeds when your trade calls for them this spring, as they surely will.

If you do not have our case of packets to sell on commission, and have a call for this class of seed, turn to page 32 for our offer.

We thank all our friends who have given us their business in the past, and we trust that our service merits a continuance of the same.

Yours for Service and Quality,

THE PAGE SEED COMPANY.

Wholesale Price List

BEANS

Bush varieties of Beans are one of our leading specialties. We devote considerable acreage to them each year in New York State, where both soil and weather conditions are usually ideal. By thorough roguing we are able to keep our seed stocks to a high degree of purity, and thus our seeds are satisfactory to critical dealers and planters.

DWARF BUTTER WAX or YELLOW PODDED VARIETIES

All Beans are put up 120 pounds to the bag.

	Per lb	In bag lots
Black Wax	\$0.16	\$0.15
Early, pods round, fleshy, brittle and stringless.		
Burpee's New Kidney Wax18	.16
Pods broad, golden yellow about 6 inches long. A profitable variety for gardener and shipper.		
Currie's Rust Proof Black Wax16	.15
Early and productive. Usually ready in 64 days.		
Davis White Wax17	.16
An early and attractive variety. Good as a snap bean while young and a shell bean when overgrown.		
Golden Eye Wax		Sold out
Almost rust-proof. Also very hardy. Pods are long, straight and flat. Some string.		
Hodson Wax17	.16
Pods are yellowish-green, large in size, rather late but are rust and blight resistant.		
Pencil Pod Black Wax16	.15
Productive, pods are long, slightly curved and golden-yellow. Very fleshy, brittle and stringless.		
Refugee Wax17	.16
The latest in the season. Pods fleshy and stringless while young. Very productive, bearing until late.

Large White Pole21	.19
A standard late variety. Productive.		
Siebert's Early Pole21	.19
Early and very productive.		

PAGE'S PEDIGREED PEAS

Our strains of Peas are as uniformly true to type as soil and climatic conditions, plus human efforts can make them. All are grown under ideal conditions in sections best adapted to the variety. We do not believe that better seed can be supplied from any source.

Bag lots weigh 112 pounds

EARLY SORTS

	Per lb	In bag lots
Alaska	\$0.12	\$0.11
An extra early smooth seed variety, largely used by canners and market gardeners.		
Ameer14	
A large smooth blue pea. Larger peas and pods than Alaska. Popular with market gardeners.		
American Wonder14	.13
An excellent home garden variety. Grows 10 to 12 inches high and produces peas fit for use in about 60 days.		
Blue Bantam15	.14
A large podded dwarf variety. Height about 15 inches.		
Early Morn15	.14
An extra early variety of the Gradus type.		
First and Best12	.11
The earliest of the early white peas. Fit for use in 50 days.		
Gradus14	.13
The standard early large pea. Vine about 30 inches high. Bulk of the pods borne in 70 days.		
Hundredfold15	.14
Similar to Pioneer. Later and more productive.		
Laxtonian15	.14
The largest podded sort of the dwarf varieties. The earliness together with size of pod and quality of peas makes it a leader for market purposes.		
Laxton's Progress15	.14
One of the earliest of the large podded sorts. Is semi-dwarf. Is a heavy yielder.		
Laxton's Superb16	.14
Often called Early Bird. Very hardy and very productive. Is a semi-wrinkled sort.		
Little Gem13	.12
Produces 50% of its crop in 80 days from date of planting. Very productive. Grows about 18 inches high.		
Little Marvel15	.14
Grows 16 inches tall, pods 3 inches long, has 7 or more peas of finest quality. An ideal home variety.		
Nott's Excelsior14	.13
Often called the best early dwarf wrinkled pea. Vines average 16 inches tall and are fairly loaded with pods.		

PEAS—Continued

	Per lb	In bag lots
Peter Pan	\$0.15	\$0.14
One of the finest of the Laxtonian sorts. Height about 20 inches. Of finest quality.		
Pilot15	.14
Large podded, early, smooth pea. Height about 3 feet.		
Pioneer15	.14
One of the Laxtonian types. Similar to Peter Pan.		
Premium Gem13	.12
An Improved type of Little Gem.		
Sutton's Excelsior15	.14
As early as Little Marvel, and more productive than American Wonder or Nott's Excelsior.		
Thomas Laxton14	.13
Very popular and one of the best for home gardens.		
World's Record14	.13
An improved type of Gradus. Very productive.		

MAIN CROP VARIETIES

Admiral Dewey14	12½

Yellow Swede35	.30
Reddish above ground, yellow beneath, large.		
Yellow Ruta Baga35	.30
Large, hardy, yellow flesh. Sweet.		
Golden Neckless35	.30

LAWN GRASS

The best is none too good. There is no use in planting weeds and inert matter in a lawn, so why carry them in stock? Seed that will produce fine lawns is what every householder wants. Weeds will come regardless, and better fertilizer can be bought than that found as inert matter in many grass seed mixtures. We aim to put out seed for lawns that will be as near pure as possible. Buy and sell for quality, not for price.

	Per lb	In 100lb lots
Greene Park Mixture	\$0.30	\$0.28
As good as the best, and better than some of the mixtures now on sale. It is one of our standard. It will produce a thick velvety turf, as it contains the best grasses for the best results.		
Page's Marvelawn27	25
The mixture that sells. Composed of grasses that grow and produce fine lawns.		
Page's Fine or Special Mixture25	.23
A good mixture and will give satisfactory results under most conditions. Is not as good as Greene Park or Marvelawn, but still is of good quality.		
Page's Shady Park Mixture37	.35
The sort to be used in shady places and where other grasses do not do well. Special grasses are used and good results may be expected.

PAGE'S FIELD SEED

OATS—Marvel. A variety we placed on the market a few years ago, and found to be well adapted to our northern climate. The grains are large, thick, plump, white, the average weight of a bushel being 40 pounds. The straw is stiff, growth is the "tree form." Per bu. of 32 pounds \$1.00, 20bu. lots \$0.85 per bu.

JAPANESE MILLET. Great for green fodder, hay or ensilage. One of the most valuable of the forage plants. Yields about 20 tons to the acre. Grows on most any soil. Per 100 pounds \$4.00. In 600 pound lots \$3.75, in 1,000 pound lots \$3.65.

GOLDEN MILLET. Per 100 pounds \$5.20.

HUNGARIAN MILLET. Per 100 pounds \$4.75.

GERMAN MILLET. Late. Per 100 pounds \$5.20.

RAPE—Dwarf Essex. Per pound 10c. Per 100 pounds \$8.50.

SUNFLOWER—Mammoth Russian. Highly valued by farmers and poultry breeders as an excellent and cheap food for fowls. Per pound 10c, per 100 pounds \$8.00.

SUNFLOWER for feeding purposes not for seed. Per 100 lbs. \$5.50.

CANADA FIELD PEAS. Per bushel of 60 pounds \$3.30. Per pound in 500 pound lots 5c.

RYE—Winter. Good for a green manure crop. Per bushel \$1.30.

BARLEY—Alpha (Certified.) Per bu. \$1.70. In 25 bu. lots \$1.55.

Alpha Two Row. Per bu. \$1.40. In 25 bu. lots \$1.25.

Six Row. Write for price.

SOYBEANS (Black Wilson). Per bushel \$3.25.

PAGE'S HIGH-BRED SEED CORN

By Furnishing our customers the highest grade of Seed Corn we are able to obtain or grow, we have been able to build up a reputation that is second to none in the East. We handle only selected stock. This we test for vitality, moisture and purity. We do not handle seed that does not come up to our standard. It is poor economy to try and save on the price of Seed Corn, as good Seed Corn cannot be sold cheaply. Buy for quality, then the results will justify the expenditure. Your customers will be better satisfied. We know there are cheaper corns on the market, but do you know what they will do? Talk quality, and the price will take care of it's self. Following are a few descriptions of our best sellers.

Thepage Early Dent. A combination of white and yellow dent produced on both red and white cobs. It is well adapted for ensilage in sections of high elevation. Ears are 8 to 10 inches long, stalks from 10 to 12 feet high.

Luce's Favorite. (Northern Crown) A hybrid variety growing from 10 to 12 feet high. Ears 10 to 12 inches long. Large bright yellow kernels.

Golden Ensilage. This variety has proven to have great merit. 8 to 10 feet tall, ears 8 to 10 inches long, somewhat similar to West Branch in appearance, except the kernels are more yellow.

Cornell No. 11. Heavy yielding, matures in the northern states. Ears 9 to 11 inches long, stalks about 8 feet high. Bright yellow. One of the best for ensilage.

Minnesota No. 13. A 90 day variety producing ears averaging 8 inches in length, with 16 to 20 rows of bright, rich yellow, smooth kernels. A fine dent for northern planting.

Golden Glow. An early variety growing 8 to 10 feet high, bearing ears 6 to 9 inches long, with golden yellow kernels. Is highly recommended for ensilage.

Page's West Branch. Ears 10 to 12 inches long, about 8 inches in circumference. Golden yellow grains, some with reddish cast, some with white caps. Often yields as high as 20 tons of ensilage to the acre. Our strain is the best.

Lancaster Sure Crop. Produces an abundance of green fodder, thus making it an excellent corn for ensilage. It develops early. Kernels are orange yellow with slightly paler cap.

Early Triumph. A large grained, early variety, being a cross between a flint and a dent. Stalks, ears and kernels are of medium size. Color is bright yellow. Does well in sections of short seasons.

Page's Early Marvel. A selection of West Branch, the red kernel predominating. Possesses all the qualities of the parent stock, together with the tendency to be earlier.

Page's True Eureka. Ears are very large with clear almost transparent grain, smooth on top, except the indentation which is characteristic of all dents. Foliage dark green, almost tropical in its growth. Yields immense tonnage.

Page's Lake Erie Dent. A variety but little known outside of New York State. Earlier than Pride of the North, stalks of good size, ears contain 12 to 20 rows of reddish yellow kernels of good size. An excellent ensilage corn, which is gaining friends every year.

Early Eureka. Three weeks earlier than Page's True Eureka. Not as large, nor as many ears. Large white dent. Produces a large tonnage.

Hundred Day Bristol. Ears 10 to 12 inches long, 10 to 14 rows of yellowish straw colored kernels. White cobs, stalks 8 to 12 feet tall. Is a heavy yielder and hardy.

Northwestern Red Dent. A hybrid variety. Classed with the earliest varieties. Produces a heavy growth of stalk. Is a fine variety for fodder and growing in demand.

White Cap Yellow Dent. Ears of good size, well filled with good size grains, the tops of which are white capped, the lower part being yellow.

Early Mastodon. Stalks are of good size, usually bearing 3 or 4 ears which average about 11 inches long. Its many desirable qualities cause it to be sold as a novelty under many different names at high prices.

Page's Golden Nugget. One of the best for our northern corn district. Heavy in stalk, foliage and grain, rich in protein and oil. Ears 12 to 14 inches long, eight rows with large even kernels. 90 bushels of shelled corn or 30 tons of green ensilage have been produced per acre.

Mammoth Yellow Flint. Very productive in growth of stalk and grain. Stalks about 11 feet high, with an abundance of foliage, and the largest ears known to the flint types. The ears are 10 to 12 inches long.

Sanford White Flint. Early productive. Ears are long and slender, grain rather small and cob usually filled from end to end. Very prolific, often bearing 2 or 3 ears to the stalk.

New York State 8 Row. Without doubt the variety most in demand as a mill or husking corn. The grain is good size, light yellow, set on ears 8 to 10 inches long and arranged 8 rows to the cob.

Page's Pride of York. Matures grain early in the fall in Pennsylvania and southern New York. Stalks are large and heavy. Ears 8 to 10 inches long, with 10 to 12 rows of broad yellow kernels. Is excellent for the silo as it has produced 20 tons of green fodder per acre.

Pulverized Sheep Manureper 100lb bag \$ 3.00

Terms for all items of Antrol, Snarol, Jars and Bags are Net Cash. Snarol and Antrol are not mailable.

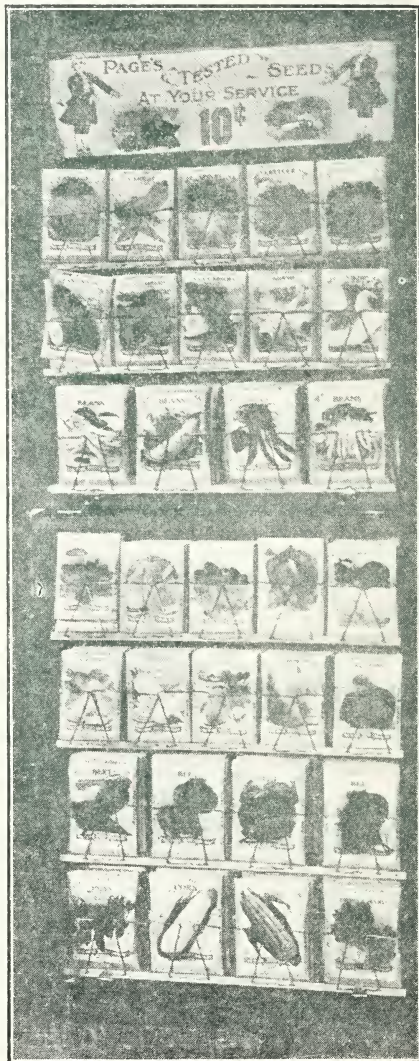

Packet Seeds on Consignment

If you do not already have one of our Display Cases, we will be pleased to send you one upon request. This case will be sent charges prepaid, on consignment, the packets to be sold for 10 cents each. We allow 50% commission on your sales. Our agent will call, collect the case and unsold packets and settle for the packets sold.

Our consignments contain tested seeds of most standard varieties of Vegetable and Flower Seeds in 300 to 700 packet assortments. When ordering specify the size assortment which you require. During the selling season display the case to advantage and order additional packets of any varieties which become sold out.

If you have call for special varieties of Vegetables or Flowers not included among our regular assortments, but listed in this Price List, notify us of the number of packets required and we will fill your order. These special packets sell for ten cents and you receive the same commission. They are returnable, but you should not order more than you believe you can sell.

The illustration shows one of our Floor Type of Display Cases which is very economical of room and gives a fine display of the packets. You may have an assortment of Flower packets in this type case if you do not wish a separate box of Flower Seeds.

Vegetable Gardens Coming Back

After the war, with its enforced vegetable growing as a war measure, vegetable gardening went into temporary eclipse and vegetable gardens which had dotted every small lot during the war days disappeared and gave place to flower gardens in a great majority of cases. The family gardening burden passing to the distaff side of the house.

The pendulum has now swung in the other direction and vegetable gardening is coming back to the place its importance normally deserves in the home grounds. In urban centers there is excellent reason for abandoning vegetable gardens. This is the fine variety of fresh vegetables carried by green grocers who are numerous, the combination of a fruit and vegetable store being a modern development.

With the movement toward the suburbs and the country, especially during the summer months, it is not so easy to telephone or step over to the store and make selections. The automobile has tended to make distance much less important than it was a few years ago.

The vegetable garden becomes a real convenience, and once established it is a home utility that will not be dispensed with, as vegetables gathered at one's own back door, saves many steps, much gasoline, and considerable time. In addition there is the one unpurchasable factor of quality. No matter how well refrigerated and cared for, store vegetables cannot have the same fine qualities as those gathered a few minutes before they go into the kettle and to the table.

Then, too, the home garden offers a choice of varieties which the market does not give. Market gardeners are conservative, trusting to staples, and productiveness is more of a criterion in selecting seeds of varieties than quality. They are slow to discard an old reliable variety for an improvement. For variety and quality, vegetables must be grown at home.—The National Garden Bureau.
