Four Thousand Storm Windows

The average householder feels that it is quite a task to put on ten to twenty storm windows. Our shopmen have nearly four thousand to put on each fall and take off in the spring. Yet this is only one of many jobs that must be done to prepare a street railway for our northern

Car-heating equipment must be overhauled and coal provided. This year the coal problem is a critical one as every one knows. In spite of every effort we have been able to secure only enough coal to last a few weeks. We will exhaust every proper means to replenish this supply before it is entirely consumed.

Snow-scrapers must be attached to all cars, miles of snow fences must be set up, snowfighting crews reorganized and snowplows made ready.

While we do not expect another winter such as the last one proved to be, we are taking no chances and are making extensive improvements in the electrical equipment of our snowplows. Smaller items such as brooms to clear out switches, salt and kerosene to loosen up frozen switch tongues and hand shovels to load flat cars are ready for use.

One hundred thousand of your fares go to keep up our \$50,000 investment in snowfighting equipment. Almost a million of your fares each year are paid in tribute to Old Man Winter to insure you comfortable rides and safe and reliable service.

Millions are now using this simple treatment to stop pain. Sloan's, applied without rubbing, penetrates and produces a warming sensation. It stimulates new, fresh blood to and through the aching part. This breaks up the congestion, and since congestion has caused the pain—quick, grateful relief follows. The world over, Sloan's stops rheu-

matic twinges and muscular aches. It eases aching backs and sharp, neuralgic pains. Good, too, for colds in chest. Sloan's Liniment-kills pain! 24.500

The hostess alone, a lady of great Intellect, dared to break the had plundered his castle, another that the Bulgarians had robbed his cattle, a third that the Hungarians had sacked his houses tice and that they supposed really proved

The substance of the reparations discussions is very simple; it amounts to this: England can well say that ail the sanctions proposed by France, or other powers, as conditions for the moratorlum to Germany, are difficult to exact, of doubtful result, and not without danger. But France is irrefutable when she answers that sanctions are necessary because without sanctions the respite is a remission. Germany will pay nothing

This antithesis of the two adversaries is partly right and partly wrong, it is the indication of a state of things which, from a human point of view, seems almost desperate. The reparations are an organic part of the peace as men imagined and made it in 1919. The whole system of pay; and Europe is virtually reduced to a condition of war because the treaties
