MSA No. 22 (CF)

June 20, 1950

To: Chief, Maritime Branch, PSD, G-2, SCAP

From: Director, Maritime Safety Agency

Subject: Use of the Harbor Boat "MANJU Maru"

1. The harbor boat "MANJU Maru" at Moji was to be abandoned on account of bad conditions under your approval.

2. She was used, however, at Moji, before she was transferred to the Ministry of Finance, up to September 21, 1949 when she collided with the "No. 8 SEKI Maru" of the Taiyo Fishery Co. and was sent to the bottom, as was reported to you before.

3. But, the "Manju Maru" had been insured and received the insurance money. The money was used for refloating and repairing her by the Taiyo Fishery Co., and the result is that she can be used for maritime safety activities as before.

4. We wish not to abandon the "Manju Maru" but use her under the following number as a harbor boat at Moji again. Your approval therefor is humbly requested.

Number	Name	Base	Gross Tonnage	Engine	H.P.

MSB NO.882 (LO)

April 28, 1949

To : Chief, MB, PSD, G-2, GHQ, SCAP.

From : Director-General, Maritime Safety Board

Subject: Re Disposal of "RASHU" Maru, former Lighthouse Supply Vessel.

1. The "RASHU" Maru, the descriptions of which are given in the paper annexed, was attacked by four G - F6F's on March 19, 1945. Three direct hits stranded and sank her 500 meters off the coast of Ura-Mura, Awajishima Island. The ship has been left intact ever since.

2. Lying on the bottom of about 10 meters deep, the ship is feasible to be refloated. However, the work is not worth while doing as she is 49 years of age. Further, even if the refloatation be effected, she can not be employed as an MSB ship according to the Maritime Safety Board Law having displacement of over 1,500 tons.

3. By reason of the above, MSB has decided to take the necessary procedure to have the ship handed over to the Ministry of Finance applying for the disuse of government property. It is probable that the Ministry of Finance will sell the property to some private enterprise, but we are not concerned in the disposal.

Re: Sea Duty Rescue Service.

As previously reported MSB acquired 5 tugs thru M of 7. Original arrangement by CNFE to relieve them of the burden of furnishing this service.

Two of the tugs have such small bunker capacity as to restrict their radius to a point unsuitable for sea rescue. Study developed fact bunker capacity could not be increased.

At MB suggestion the two referred to in preceding para are replacing two tugs presently used for harbor berthing, having good cruising radius. And the latter two being assigned the rescue service.

Also at MB suggestion tugs in the rescue service are to be designated "STR" instead of "HB".

MARITIME SAFETY AGENCY
MINISTRY OF TRANSPORTATION

MSA No.1232(PF) January 7, 1950

To : Chief, Maritime Branch, PSD, G-2, SCAP.

From : Director, Maritime Safety Agency.

Subject : Approval for Purchasing the "Yusei Maru".

In regards to the purchase of the "Yusei Maru" the following history and registry is hereby submitted for your approval and reference:

1. The hull was laid in May 1944 by Mitusbishi Heavy Industory Co., and now called Yokohama Zosen. At the time of Japan's surrender the boat was approximately 50 % completed.

2. The engine was built by Niigata Foundry Works in July 1943 and purchased by Yokohama Zosen in May 1944 for this hull.

3. Mr. M.Udow chief Liaison Office of Yokohama Zosen purchased it from his company. (at that time this boat was called as "Anone")
In July 1947 work was resumed and the boat rebuilt according to the specification and design of S.Miyata, completed early in 1948, and registered as the Yusei Maru with Maritime Bureau.

4. Transfer of title, ownership and registry of the Yusei Maru from M.Udow to S.Miyata was made in December 1949.

In view of the foregoing facts which we investigated and found to be true, we feel that the purchase of this boat is in order and therefore would like to have your approval.

no objection to purchase of "Yusei Maru" for 5 million yen.
8 DR

for T. OKUBO
Director,
Maritime Safety Agency.

Remarks : Difficulties for the installation of W/T. upon the hull.

1. Big alterations should be executed upon the hull to install the wireless and rooms for oprators.

2. It is difficult to na e Dynamo installation.

3. It is difficult to have the antenna mast newly and if installed it makes tug capacity poor.

4. Cost of alteration ¥ 700,000 approx.for each (excluding for the appatatuses.)

Basis for Estimation of Fuel needed for Trial Run and Navigation of MIURA-maru

Name of Ship	Gross Tonnage	Speed (economical)	Horse-power	Engine	Fuel	Rate of Mixed Burning	Fuel needed to produce 1 Hp per hour — Mixed Burning
MIURA-maru	590 G/T	9	1100 x 2	2 Reciprocating Steam Engine	Coal, Heavy Oil	Coal 6 H. O. 4	Coal 0.336 Kg. H. O. 0.224 l.

1. For Trial Run

a) Run by mixed buring for 16 hours.

Heavy Oil 0.224 x 2200 x 16 = 7,884.8 = 8 Kl.

Coal 0.336 x 2200 x 16 = 11,827.2 = 12 ton

b) Trial burning of boiler and trial for auxiliary engines.

Lubricating oil allocated

for 4% against heavy oil = 1,920 l. classified as (Mobile oil 1,700 l. / Cylinder oil 70 l. / Dynamo oil 150 l.

2. For Navigation

Distance: 1,455 nautical miles

Speed: 9 knots

Time taken for navigation: 1455 ÷ 9 = 162 hours

Heavy oil 0.224 x 2200 x 162 = 79,833.6 = 80 Kl.

Coal 0.336 x 2200 x 162 = 119,740.4 = 120 ton

Lubricating oil (80 + 120) x 0.04 = 8 Kl. classified as (Mobile oil 6,850 l. / Cylinder oil 800 l. / Dynamo oil 350 l.

Limit of loading: Coal 170 T. Heavy oil 92 Kl.

Total:

Heavy oil	88 Kl.	Cylinder oil	0.87 Kl.
Coal	160 ton	Dynamo oil	0.5 Kl.
Mobile oil	8.55 Kl.
