REPORT OF THE COUNCIL.

AS READ AT THE ANNUAL MEETING, FEBRUARY 20TH, 1888.

THE Council of the Society has much pleasure in submitting its twenty-fourth Annual Report to the subscribers.

It was stated in last year's report that it was intended to make the Gardens as attractive as possible before the opening of the Exhibition and this object has been kept steadily in view. The Government was good enough to assist by placing an extra £1,000 for the use of the Society, on the estimates for 1887-8 and this has been of great assistance in carrying out needed alterations and improvements.

The following is a list of the principal works completed since the last report was published. A new Museum has been built and the old one converted into a Crocodile House, a handsome enclosure has been erected for peacocks and other gaily plumaged birds with a house in the centre, a new paddock has been enclosed for the

Wapiti deer and another adjoining for a pair of Nylghaies, purchased recently from the Adelaide Society, houses having been built in both paddocks. New enclosures have been constructed for the Ostriches, Emus and Cassowaries. A new house and enclosure has been put up for the Bactrian Camels mentioned in last year's report, which arrived safely in April last. A house has been built for the Yaks in their paddock and several smaller enclosures have been made or altered for the better. The fence round the lower pond, a large sheet of water, has recently been removed and has made it accessible to the public thus forming a very pleasant picnicing ground. This has been done to compensate visitors for the loss of the ground enclosed by some of the aforementioned enclosures. Near the pond several swings have been erected for children. The Kangaroo paddock has been divided into three compartments with a house in each, and the different varieties of large Kangaroos separated, removing a just cause of complaint, that all the Kangaroos being together, it was impossible for visitors not acquainted with the several kinds to tell one from the other. A large and handsome arch has been erected near the Wombat caves at a place where several paths meet. In addition to the works enumerated a good many minor improvements have been effected. The Native Encampment and several other important additions still remain to be completed before the opening of the Exhibition.

The Council has not been unmindful of the necessity of keeping up and extending the Zoological collection. The number of specimens in the Gardens having now increased to thirteen hundred or more. The Director personally visited Queensland some months ago principally for the purpose of obtaining the Wallaroo Kangaroo, which are most difficult to procure. Three specimens have now been secured and other animals and reptiles and a number of beautiful Queensland parrots have been received as the result of his visit. Several animals and birds have also arrived from the Calcutta Zoological Gardens and others are expected, and it is intended to send the Assistant Director again to

England to procure fresh stock in May next, when he will commence sending out his purchases as soon as the great summer heat of the Red Sea is passed, returning to Melbourne at the end of the year.

The Melbourne Zoological Gardens may now be said to have arrived at a distinct period of their history, as after a long struggle with insufficient funds, and bad means of access, the difficulties have at length been overcome and the Gardens by constant and unremitting care have now obtained a very creditable position. They have become so attractive that visitors are yearly increasing, the tramways have also been of great assistance in this direction, and by the end of the year it is hoped that the branch tramway to the Garden Gates will be an accomplished fact, as it is intended, early in the next session, to ask for the sanction of Parliament to construct it. The Council consider that the future of the Society is now assured and the efforts of the Directors will be not merely to keep the Gardens and collection of animals up to their present standard, but to increase their attractiveness to the full limit of the funds at the disposal of the Society.

The Continental Concerts under Mr. Siede's direction, were tried again this year, but after several had been given, it was found that there was not on an average sufficient visitors to make them pay and they were therefore reluctantly discontinued.

About fourteen thousand Trout Fry were placed last season in suitable rivers and creeks in different parts of the colony, which were obtained as usual from Sir Samuel Wilson's Estate "Ereildoune," through the kindness of his representative in Melbourne, Mr. Archibald Fischen. Encouraging reports have been received as to the increase of English Trout in streams either wholly or partly stocked by the Society, notably in tributaries of the Upper Yarra and the Goulburn. Large numbers of Trout Fry have also been placed in Gippsland streams, but, as yet, no reports have come to hand as to their success in those rivers and creeks. The Council would be glad to receive intimation of the presence of these fish in Gippsland waters. The

Council desire most cordially to thank Mr. C. M. Officer, M.P., for his services during the past year as President and also Mr. Purchas, the Hon. Treasurer. The following are the three members who retire, having attended the fewest number of meetings, but are eligible for re-election. Mr. Godfrey, Mr. Bruce, and Mr. Tyler.

The officers for the ensuing year were then elected, with the following result. :—President, George Bruce, Esq.; Vice Presidents, C. M. Officer, Esq., M.L.A., Charles Ryan, Esq.; Hon. Treasurer, Albert Purchas, Esq.; Members of Council, F. R. Godfrey, Esq.; and J. C. Tyler Esq., were re-elected.

On the motion of Mr. Godfrey, seconded by the Hon. C. J. Jenner, who referred in complimentary terms to the management and conduct of the garden, a special vote of thanks was unanimously passed to the Director and Assistant Director, for their valuable services to the Society, which the Director briefly acknowledged, stating that no effort should be wanting on his part, or that of his son, not only to keep the gardens up to their present standard, but to increase their attraction both in a scientific aspect and as a place of amusement year by year.

The retiring President Mr. C. M. Officer, stated on vacating the chair, that his year of office had been of the most agreeable character, in every way.
