

MASSACHUSETTS
HIGHWAY COMMISSION

1907

FOURTEENTH ANNUAL REPORT

OF THE

MASSACHUSETTS

HIGHWAY COMMISSION,

FOR THE FISCAL YEAR ENDING NOVEMBER 30, 1906.

PART I.—STATE HIGHWAYS AND MOTOR VEHICLES.

PART II.—SUPERVISION OF TELEGRAPH AND TELEPHONE
COMPANIES.

JANUARY, 1907.

BOSTON :
WRIGHT & POTTER PRINTING CO., STATE PRINTERS,
18 POST OFFICE SQUARE.

1907.

APPROVED BY
THE STATE BOARD OF PUBLICATION.

Commonwealth of Massachusetts.

To the Honorable Senate and House of Representatives of the Commonwealth of Massachusetts in General Court assembled.

The undersigned commissioners, appointed under the provisions of chapter 476 of the Acts of 1893 and of chapter 474 of the Acts of 1900, herewith submit, in Part I., their fourteenth annual report, in accordance with the provisions of chapter 47 of the Revised Laws, and, in Part II., their first annual report relative to their supervision of telegraph and telephone companies, under the provisions of chapter 433 of the Acts of 1906, both reports being for the fiscal year ending Nov. 30, 1906.

W. E. McCLINTOCK.
HAROLD PARKER.
JOHN H. MANNING.

BOSTON, MASS., Jan. 1, 1907.

PART I.

ANNUAL REPORT OF THE MASSACHUSETTS HIGHWAY COMMISSION.¹

In accordance with the provisions of chapter 280 of the Acts of the year 1903 the commission has had the sum of \$450,000 for new work during the year.

Considerable sums allotted for expenditure during the year 1905 were actually disbursed during the year 1906, unavoidable delays having prevented the completion of several contracts.

Additional lay-outs were made during 1906, amounting to 253,021 feet (47.92 miles), bringing the grand total up to 3,539,535 feet (670.37 miles). The number of miles of road finished during the year was 45, making a total of about 655 miles of completed State highway at the end of the year 1906. On most of the remaining 15 miles laid out but not completed the work is in various stages of progress, although in a few instances no work will be done under the contracts before the coming spring.

Since the passage of the "small town" act, in 1900, 108.23 miles of road in the "small towns" have been improved.

MEETINGS OF THE COMMISSION.

The commission has held 79 meetings at its office in Boston during the past year, besides many others at different points in the State.

The regular county hearings, provided for in the statutes, have been held. The attendance at these hearings was small,

¹ In accordance with the provisions of chapter 211 of the Acts of 1905 this report is made for the new fiscal year, ending Nov. 30, 1906.

and except in one or two of the counties but little interest was taken in them. There seems to be a feeling among the county and town officials that they should attend these hearings out of respect to the commission. They have but little to offer when they are there, and apparently do not feel repaid for their early start, long ride and long day's work.

CONTRACTS.

All work done by the commission must be done by contract, either with the town or city authorities, or, after due advertisement, with private contractors.

During the year 69 contracts for State highways were entered into, of which 19 were with town or city authorities and 50 with private individuals or corporations.

PETITIONS.

The total number of petitions for the location and construction of State highways up to the date of this report is 737.

During the year 1906, 29 new petitions were received. These petitions cover altogether 85.1 miles of road, and they are from 24 towns and 3 cities. The petitions received during the past year cover 72.1 miles of road not previously petitioned for.

STREET RAILWAYS.

There are at the present time street railways operating on State roads in 138 different cities and towns. In 8 of these municipalities there are two different companies.

The length of street railway track in the State on Sept. 30, 1906, according to the Massachusetts Railroad Commissioners, was 2,804 miles.

The relations between the highway commission and the officials of the different street railways operating along State roads, or roads which the commission proposed to take as State roads, have been almost without exception pleasant. The commissioners have used every effort to cause as little movement in line or grade of the street railway tracks as was consistent with good work, and the railway officials have frequently ungrudgingly made the changes asked for, often without awaiting the

hearing required by law or the formal decree of the commission. In several instances the street railway companies have united with the commission in paying their full share of the cost of bridges when such new bridges were to be permanent structures and seemed necessary for joint occupancy.

COUNTY ASSESSMENTS.

In accordance with the provisions of the statutes, the several counties in which State roads are built are required to repay to the State one-quarter of the amount expended during the year. The time of this repayment may, if desired, extend over six years from the date of the assessment; but in several instances, including some of those in which the amount of the assessment is greatest, the counties have preferred to pay the entire sum due at the end of each year. The amount assessed upon the counties during the year 1906 was \$149,451.94.

CULVERTS AND BRIDGES.

Most of the culverts and short bridges built during the past year have been of reinforced concrete.

The following bridges of reinforced concrete were built during the year:—

Becket, . . .	A 28-foot span beam, over Walker Brook.
Hatfield, . . .	A 17-foot span beam, over Broad Brook.
Haverhill, . . .	A 13-foot span arch, over Hawkes Brook at Methuen line (under construction).
Huntington, . . .	A 21.5-foot span beam, over Roaring Brook (under construction).
Mansfield, . . .	An 18-foot span beam, over Rumford River (under construction).
Medway, . . .	A 10-foot span beam, over Chicken Brook (extension).
North Brookfield, . . .	A 12-foot span beam, over Moore's Brook.
Taunton-Dighton, . . .	A 35-foot span arch, over Three Mile River.
Wenham, . . .	A 12-foot span beam, over Miles River (cost paid by town of Wenham).

In the report of last year reference was made to disintegration in spots on the surface of five or six reinforced concrete abutments built in salt water. There has been no marked

change in these abutments during the year. The concrete seems to have become thoroughly hard, and it is doubtful if any further disintegration takes place.

On all abutments of this material built during the year, a mortar made of a mixture of one part of cement to one part of sand has been used on the face to the depth of about one and one-half inches. This was placed by using a thin metal diaphragm separating the richer front mortar from the standard concrete, and withdrawing the diaphragm when the concrete was in place and before it had set appreciably.

The two bridges over the Wewantit River, near the dividing line between Wareham and Marion, built in 1901, and supported by cast-iron piles, show a still further settlement since they were raised last year. This settlement takes place under the electric street railway track, and may eventually require the driving of additional piles.

CONSTRUCTION.

No material change has been made during the past year in the method of building roads. On no State road has there been a failure of well-laid telfording foundations or any V-shaped drains.

The Legislature of 1903 appropriated \$2,250,000 for State road construction, and provided that \$450,000 should be available in each of the five succeeding years. The last installment of this appropriation will be used in 1907.

In carrying out its comprehensive plan of a system of main State roads the commission has been materially aided by these advance appropriations of stated amounts. With such advance appropriations the work can be better laid out, the engineering force can be better regulated and the various petitioners are better satisfied.

The commission respectfully recommends for the careful consideration of the Legislature the passage of an appropriation act in 1907, similar to the one of 1903, the first installment to be available in 1908. Such an act should also provide for the use of any unexpended balance of the appropriation made in 1903.

MAINTENANCE.

The law of 1900 requires a payment to the Commonwealth by each municipality in which State roads are built of the cost of maintenance of such roads but not exceeding \$50 for each mile of State road in the respective municipalities. The total cost of repairs between Nov. 30, 1905, and Dec. 1, 1906, was \$68,382.28. There will be paid back into the State treasury, on account of maintenance, the sum of \$27,531.22, or about 40.28 per cent. of the total cost.

There has been no change in the methods of maintaining the State roads. About the same roads are maintained by contract as last year. It has not seemed desirable or economical to increase the contract work, as those parts of the State which are difficult to care for by day work, on account of the peculiar condition of the labor market, are now maintained by contract. The conditions may be referred to here. It is a fact that in certain districts men cannot be had to care for the roads at the season of the year when they are most in need of care, because of more profitable employment elsewhere. The only way these roads can be cared for is by contract, thus insuring the repair man more or less steady employment throughout the year. While this method has proved very satisfactory in certain districts, it has been less successful in others, because of the greater opportunities for employment for man and beast in other lines of work, the tendency being for the contractor to neglect the road under contract, to the annoyance of the traveling public and to the detriment of the road itself.

The past year has been an exceedingly bad one for stone roads. The winter was open and the State roads were repeatedly frozen and thawed. The result was a weakened foundation in several instances, and a breaking of the bond of the surface in many other instances. Considerable work was necessary during the winter and still more in the spring to put the roads back into reasonably good condition. In addition to this, there were two quite extended dry spells which more or less disturbed the bond and caused loose stone to stand upon the surface. This last difficulty was remedied as far as was possible by the spreading of a thin coating of sand over the surface; but

even this treatment, which had in previous years proved satisfactory, did not in all cases prevent the raveling out.

The change just made in the ending of the fiscal year from January 1 to December 1 reduced the maintenance appropriation for 1906 from \$70,000, the amount asked for, through inadvertence, to \$64,166.66. The suggested appropriation was based on the annual cost of maintenance per mile and the number of miles of State roads, and since but little repair work has ever or can ever be done in the month of December, on account of the weather, the appropriation should not have been reduced to the eleven months' basis.

The maintenance fund was still further reduced by the sum of approximately \$7,500, expended for the suppression of insect pests, such as the gypsy and brown-tail moths and the elm-tree beetle. Acting on the advice of the Attorney-General, the commission carried on this work.

Owing to these unusual conditions and the extraordinary drafts upon the maintenance fund, the commission regrets to report that the State roads have not been kept up to the standard of excellence which the public demands and which the commission is anxious to maintain.

Perhaps the most important discovery of the year is the extraordinarily destructive effect upon stone roads of the large number of swiftly moving automobiles. Practically all the main roads are thus affected. It has been noted that the binder is swept from the road, the No. 2 stone ($\frac{1}{2}$ -inch to $1\frac{1}{2}$ -inch size) is disturbed, in some instances standing on the surface and in other cases left in windrows along the roadside. The number of automobiles has rapidly increased during the year, and this increase will, in the opinion of the commission, continue indefinitely.

The commission is satisfied that a material change in the methods of maintaining stone roads must be made. While the old methods have proved satisfactory in the past, they fail under the present usage. The automobile has apparently come to stay, and it must be reckoned with. The commission believes that if the roads fail under the changed traffic they must be treated in a different manner, even if the cost of maintenance be largely increased.

It must be borne in mind that this excessive wear of stone roads by automobiles is not confined to Massachusetts. Reports from the newspapers and from the United States office of public roads show that the same trouble is experienced in all parts of the United States.

The roads of England, France and other countries of Europe are also showing signs of destruction by the same agency. The commission has reports from different sources confirming the statements of the destructiveness of automobiles. Letters from Mr. Alexander G. Uptegraff and Mr. Cortlandt F. Bishop of Lenox, and from Mr. John Burnett of Boston, have been of great assistance to the commission in reaching a final conclusion as to the best treatment of stone roads to reduce to a minimum the destructive effect of automobiles. These letters describe the conditions and treatment in England and France. In those countries the use of tar is quite common and the results from its use are spoken of as good. The same material has been used successfully in some of the States of the Union. Experiments made with tar by the Metropolitan Park Commissioners on the Revere Beach boulevard, and by Mr. Charles W. Ross, Street Commissioner of Newton, on the Newton boulevard, have proved to be very successful. On these roads the dust has been laid, the raveling out prevented and the general destruction stayed.

The commission believes it is ready to treat this problem if the Legislature will make the needed appropriation. It is estimated that \$50,000 will be needed for this special work next year.

The commission recommends appropriations from the treasury of the Commonwealth of the following sums: for maintenance, \$70,000; for extraordinary repairs made necessary by automobiles, \$50,000; for the suppression of insect pests, \$10,000; subject to the provisions and limitations of section 16, chapter 47 of the Revised Laws.

"SMALL TOWN" WORK.

The good results accomplished under the "small town" act prove the wisdom of this enactment. The small towns appear to appreciate heartily the aid of the State, and almost without

exception they make additions to the allotments made by the commission.

The standard of work and the methods of repairing the roads have continually improved since 1901. The wooden culverts are rapidly disappearing, being replaced by stone culverts or iron pipe. Water bars are becoming gradually removed; and in many towns the worn-out material that has washed into the gutter, instead of being scraped back into the centre of the road as formerly, is now discarded and new material substituted therefor, which is a better practice and more economical in the end. Better drainage facilities are provided, and outlets through the banks are now built for the quick removal of water from the roads. Ledge outcroppings and bowlders have been taken out, instead of being covered up with dirt, as was formerly too often the general custom.

Roads that prior to 1901 would have been tolerated without complaint will not answer now. The old system of repairing the roads in the spring and of doing no more work on them for the ensuing year is now looked upon with contempt. In many towns the people insist that the repairs shall be made when they are necessary, which, of course, is the only correct way.

Wherever there is any completed line of road improved under the "small town" act the loads have doubled in weight and the time necessary for a trip has been lessened considerably.

One small town has bought a stone crusher. This is a very encouraging feature, brought about by the "small town" enactment, and it will be the means of securing good roads where good gravel is entirely lacking.

LYNN ROAD.

On May 26, 1902, a special appropriation of \$100,000 was made for building a road on the sea side of the Boston, Revere Beach & Lynn Railroad, and extending from Saugus River to Commercial Street in the city of Lynn.

The embankment of this road, up to grade 12 above mean low water, was finished last year, the work having been done by Fred E. Ellis, contractor.

The contract for placing the ballast and broken stone, building guard rail, paving gutters and finishing the road ready for

use was awarded to R. F. Hudson, contractor, on Jan. 30, 1906. Work was begun February 26, and finished June 30; and the road was opened to the public July 7, 1906.

There has been paid out on account of this road, under the Ellis and Hudson contracts, and including miscellaneous expenses, the following amounts, viz.:—

Ellis contract and miscellaneous items,	\$72,198 95
Hudson contract and miscellaneous items,	27,800 70
	<hr/>
Total,	\$99,999 65

This amount is exclusive of land damages. These have not as yet been settled, but are under consideration.

The principal quantities on this work, under the Hudson, 1906 contract, are as follows, viz.:—

Cubic yards earth excavation,	46
Cubic yards gravel filling,	5,134
Tons broken stone,	6,152.025
Tons broken stone, screenings for sidewalks,	269.65
Lineal feet 6-inch clay pipe,	41.4
Lineal feet guard rail,	8,796
Stone bounds,	11
Catch basins,	11
Square yards riprap,	1,661
Square yards block-paved gutters,	1,946.3
Cubic yards rock embankment,	1,682

The principal quantities under the Ellis and the Hudson contracts are as follows, viz.:—

Cubic yards excavation,	46
Cubic yards earth and gravel filling,	78,708
Cubic yards rock embankment,	17,925
Square yards riprap,	5,861
Portland cement concrete culverts,	3
Lineal feet 6-inch clay pipe,	173.4
Tons broken stone,	6,152
Tons broken stone screenings for sidewalks,	269.65
Lineal feet guard rail,	8,796
Square yards block-paved gutters,	1,946.3
Stone bounds,	11
Catch-basins,	11

The road from Revere Street, Revere, to the Saugus River, built under the direction of the Metropolitan Park Commission, was finished and opened to the public July 7, 1906. The city of Lynn is extending the road from Commercial Street, the end of the State highway, easterly into Lynn.

The completion of the Lynn section will provide a continuous drive over splendid roads from State and city park reservations on the south and west of Boston to the unsurpassed drives along the north shore.

STEAM ROAD ROLLERS AND STONE-CRUSHING MACHINERY.

The commission has now under its control 16 steam rollers and 2 portable stone-crushing plants.

The steam rollers were used 1,103.5 days on town work in 26 different towns. All requests by towns for work of this character were granted. The rollers were also used 225.5 days on State highway repair work, on 25 different roads; 272.5 days by towns contracting for the building of State roads, including the "small town" roads; 113 days by private contractors on State highway contracts; and 5 days on work done in connection with the laying of a telephone conduit on one of the State roads. The total number of days' work during the year was 1,719.5, an average of 107.5 days for each roller.

The total cost of maintenance for the year was \$2,468.96. Of this amount, \$1,725 was paid for practically rebuilding two of the rollers, Nos. 6 and 7, which have been in active service since 1896-97; and \$743.96 was expended for the ordinary repairs. Including the expense of supervision and inspection of the rollers, the average cost of such ordinary repairs has been 98½ cents per day for each roller in use.

The number of requests from town officials for the use of the rollers has been somewhat in excess of those in previous years.

One of the rollers purchased in 1896, and possibly two, will have to be sent to the shop this year for thorough repairs.

One of the portable stone crushers has been located in the town of Sandisfield, where it has done good service; the other was used in Carver and Hanson. The stone for 2.37 miles of stone road was crushed by these machines, a total of about 5,300

tons. The entire cost of operation, repairs and moving has been borne by the towns using the crushing machinery.

Mr. George E. Rayner, who had been employed for several years as inspector of steam rollers, resigned his position June 1. Mr. Ernest A. Spencer was appointed to the position so vacated, and began his duties July 2, 1906.

SURVEYS AND ENGINEERING OFFICE WORK.

During the year surveys for preliminary studies, estimates and lay-outs were made in 43 towns, a total length of 44.47 miles; and grade stakes for construction work were set in 101 towns for a length of 79.37 miles, part of these being for unfinished work in 1905.

Final surveys were made in 49 towns, a total length of 40.84 miles. Surveys for "small town" work were made in 32 towns, a total length of 14.79 miles; and about 6 miles of miscellaneous surveys were made for roads to be constructed by towns.

Plans, profiles and cross-sections were plotted of surveys in 59 towns, representing a length of 60.67 miles.

Lay-out plans have been made of roads in 70 towns, of a total approximate length of 47.78 miles. Plans to accompany decrees for street railway locations on State roads and for provisional locations have been made in 13 towns. Plans and profiles have been made for work under the "small town" act in 29 towns.

Preliminary estimates in 105 towns, representing 79.61 miles, have been made; and also final estimates in 63 towns, representing 53.39 miles.

A survey for a profile of the Newburyport turnpike, about 28 miles in length, has been made and the profile plotted.

It will be noted that surveys have been made for 6 miles of roads to be constructed by towns. Not only have these surveys been made, but, in many instances, the plans have been made, specifications drawn, the work advertised, bids opened, and the contract work generally supervised. The commission believes that by doing this kind of work it is rendering the most effective service for good roads, as it not only guides the local authorities, but increases the number of expert road builders.

TREE PLANTING.

The third year has passed since the systematic planting of trees along State highways was begun by the commission, and in all about 12,000 trees have been set out. The report of the forester (see Appendix I.) gives in detail the location and condition of these trees, and to that reference is made for such information.

The general plan of the commission, as stated in previous reports, has been followed, and the effect of lining the State roads with ornamental trees is beginning to be noticeable.

The cost of planting trees during the year (\$1.10 per tree) is somewhat more than last year, due largely to the additional cost of preparing the ground for receiving the trees. It has been found by the experience of former years that a slight additional cost in this respect is advisable. The cost of maintaining trees already planted including the cost of replacing dead or defective trees, has been approximately 16 cents per tree.

It is the purpose of the commission to use the native trees that grow along the roadsides wherever they are available, and to improve their condition and beauty by removing defective ones or by thinning them out where too thick for their successful development. It is not, however, the intention to destroy or injure the characteristic attractiveness of the New England roadsides, but to encourage the growth of the native shrubs and vines as well as trees, wherever such treatment is appropriate.

The nursery established by the commission has, by care and cultivation, become in all respects satisfactory. It is located on a gently sloping hillside, with a soil adapted to its usage. It is supplied with town water and is near the railroad station. The trees make excellent growth, and by means of it defective or sickly trees are saved.

The destruction of insect pests has been attempted under the general supervision of Mr. A. H. Kirkland, Superintendent for the Suppression of Gypsy and Brown-tail Moths, but paid for from the highway maintenance appropriation and under contracts with the commission. It is respectfully represented that this work might be more effectively carried on if the money

were placed directly in Mr. Kirkland's hands, and his work done as a whole, and not as at present, where the responsibility is divided in the same territory.

AUTOMOBILE REGISTRATION.

The increase of the work in this department has been phenomenal. The commission has continued the policy of previous years, which is to have a sufficiently large clerical force to issue the licenses and certificates of registration with as little delay to the applicants as possible. At no time during the year has the work been more than two or three days behind.

Complete card indexes have been made, showing all licenses and certificates issued and the reports received from the district courts.

It is estimated that fully 15,000 persons called during the year either for papers or for information.

The following tabulation shows the number of registration certificates and licenses to operate issued in the year 1906, between January 1 and December 1, and the amount of the fees received for the same:—

Certificates of registration:—

Automobiles,	6,572 at \$2 00,	\$13,144 00
Motor cycles,	665 at 2 00,	1,330 00
Manufacturers and dealers,	151 at 10 00,	1,510 00

Licenses to operate:—

Ordinary operators,	4,649 at 2 00,	9,298 00
Professional chauffeurs (new),	3,391 at 2 00,	6,782 00
Professional chauffeurs (renewed),	2,043 at 50,	1,021 50

Total,		<u>\$33,085 50</u>
------------------	--	--------------------

Approximately 12,922 number plates, weighing in the aggregate about 61½ tons, have been taken from their packing boxes and packed carefully in wrappers ready for delivery. About 3,000 of such packages have been sent off by express; and 5,434 badges for professional chauffeurs have been delivered.

There have also been issued 800 certificates and licenses to replace that number lost; and records have been made of 2,100

transfers of ownership, and many hundred permits for temporary number plates have been issued.

Under the provisions of the Acts of 1905, chapter 111, as amended by the Acts of 1906, chapter 412, section 5, it is required that courts and trial justices keep full records of every case in which a person is charged with a violation of any of the provisions of chapter 473 of the Acts of the year 1903, or any other act relative to automobiles or motor cycles, and to file certified copies of such records in the office of the commission. Under the law of 1905, 166 reports were filed between Jan. 1, 1906, and June 24, 1906, and between the latter date and Dec. 1, 1906, 847 reports were filed, — a total number of reports during the period covered by this report of 1,013. The copying of these reports entails a considerable amount of clerical work. A less technical and complete report would, in the opinion of the commission, be sufficient for all the purposes of the act, and an abstract of the record containing information as to the parties to the case, the nature of the offence, the date of the hearing, plea, judgment and the result, certified by the clerk of the court as a true abstract from the records of the court, would be sufficient for all ordinary purposes.

The commission therefore recommends that the law be so amended as to permit an abstract of the record to be filed instead of a certified copy of the full report, and that the abstract be made upon forms to be supplied by the commission, and to contain such information and particulars as the commission may deem necessary.

The copies of the court records received during the year, numbering 1,013, as before stated, were carefully filed and indexed. During that time 12 licenses and 6 certificates of registration were revoked because of convictions for reckless driving, intoxication, for operating so as to endanger the lives and safety of the public, or, after three convictions, for over-speeding.

During the year the commission has heard 36 complaints of careless or reckless driving, and has suspended or revoked 11 licenses and 4 certificates of registration, in addition to those just mentioned.

Many informal complaints have been investigated, and a large

number of cautionary notices have been sent to persons charged with overspeeding or other violations of the automobile laws.

In accordance with the provisions of chapter 353 of the Acts of the year 1906 the commissioners have established certain rules and regulations concerning the use and operation of motor vehicles. The commissioners believe that the present law is ample to control the operation of motor vehicles if it is wisely enforced. There is no uniformity among the different cities and towns in enforcing the law against reckless operating. Some of the towns make no attempt to enforce the law, although it is a matter of common knowledge that certain persons often drive recklessly. Other towns are making an honest effort to regulate the speed and are more or less successful in their efforts. But the really reckless operator, the man whose main idea seems to be to annihilate distance, is very rarely apprehended, as he apparently posts himself as to the location of "traps" and uses care upon roads that are watched.

The commissioners think it doubtful that the cities and towns will, unaided, succeed in accomplishing any permanent or general results. Reckless driving may be prevented on short, measured stretches of road, by watching and taking the time of all automobiles passing, but outside of these parts of roads, or even on them, unless they are guarded, there is no control of the speed.

The commissioners have given 4 hearings in towns where the selectmen have made special regulations governing automobiles. There seems to be a feeling among the officers of some towns that the passing of these special regulations is all that is required. No effort was made to enforce the law previous to the passage of the regulations, and in certain instances the opinion was expressed that nothing would be done later.

NEWBURYPORT TURNPIKE.

Chapter 93, Acts of 1906, authorized and directed the Massachusetts Highway Commission to make such studies and surveys of the Newburyport turnpike as shall determine the best future procedure of the State, and of the various towns through which it passes, relative thereto.

The commission has caused a survey of this road to be made

from its crossing of the Saugus Branch Railroad in Malden to its terminus in Newburyport, and an estimate of the cost of building.

The Newburyport turnpike was built under a charter granted by the General Court of 1803. It was to begin at the head of State Street in Newburyport and end at Malden bridge, and was "to be as nearly in a straight line as practicable." The company was authorized to erect gates and collect toll on all kinds of vehicles, and on all pedestrians and live stock. It was also required to keep the road in good condition, and to report all earnings, expenses and dividends annually to the Secretary of State.

No report of the receipts and expenses was ever made; hence it is impossible to learn anything as to the cost of building or maintaining this road. As far as can be learned by a careful search, the turnpike charter was never annulled.

Like most of the turnpikes, it was ordered to be built in as nearly a straight line as practicable. It was to be the main road between Boston and Newburyport, and over it were to pass the stages carrying through mail, freight and passengers. In its building no change of direction was made, either to avoid hills or to accommodate the population to the right or left of a straight line. The road served its purpose, probably, up to the time of the building of the railroads, but the changes thus brought about were so great that its usefulness as a through road no longer existed, and thereafter it simply served the comparatively few people living adjacent to it.

The Newburyport turnpike may be divided into three divisions; first, from Malden bridge to the crossing of the Saugus Branch Railroad; second, from the crossing of the Saugus Branch Railroad to Andover Street (east branch of the old Essex turnpike); third, from Andover Street to Newburyport. These three divisions will be discussed in detail.

First Division.

From Malden bridge to the Saugus Branch Railroad the road passes through the business centre of the city of Everett, and a fairly populous part of Malden, a district which has had a phenomenal growth during the past twenty-five years, and a

growth which is apparently destined to continue. A double-track street railway occupies the centre of the way with its tracks; water pipes are laid under the surface throughout the entire distance, and sewer and gas pipes are laid for a greater part of the distance.

Under the complications that are sure to exist if the State maintains the roadway and the municipalities the different structures beneath the surface, it does not seem wise at the present time to lay out this part of the turnpike as a State road. Moreover, the board of aldermen of neither Everett nor Malden has petitioned to have the road so laid out.

Second Division.

The Newburyport turnpike from the Saugus Branch Railroad to Andover Street, passing through a part of Malden, Melrose, Saugus, Lynnfield, Peabody and Danvers, to Andover Street, is a much used and important main road leading to Boston. There appears to be no reason why it should not properly be laid out and maintained as a State road. It is one of the roads which, if petitioned for by the different boards of aldermen or selectmen, would be considered by the highway commission and laid out and built as a State road as fast as the available funds would permit.

Third Division.

The road from Andover Street to Newburyport is improperly laid out, the grades are excessive, the population along it is sparse, the villages on either side are provided with other roads better laid out, and there appears to be no reason why it should become a State road. No part of this division has been petitioned for as a State road by the selectmen of Danvers, Topsfield, Ipswich or Rowley. A short length in Newbury and the part of it in Newburyport have been petitioned for, but the highway commission, after numerous hearings and views, determined that the community as a whole would not be best served by building over the turnpike.

Following is an estimate of the cost of building divisions 2 and 3. No estimate has been made of the cost of building division 1. The plans and profiles, together with the details of the estimates, are on file in the office of the highway commission.

Estimate of the Cost of Building the Newburyport Turnpike from the Crossing of the Saugus Branch Railroad to Newburyport, in Two Sections.

Section 1, from Saugus Branch Railroad to Andover Street in the town of Danvers, a distance of 52,400 feet, or 9.93 miles :—

21,815 cubic yards earth excavation and filling,	\$11,060 00
81,300 square yards shaping for broken stone,	2,439 00
5,700 lineal feet guard rail,	1,425 00
2,632 cubic yards rock excavation,	5,264 00
25,087 tons broken stone,	37,630 00
586 lineal feet pipe culverts,	533 00
16 concrete culverts of varying sizes,	6,389 00
Engineering and incidentals,	7,769 00
	<hr/>
Total,	\$72,509 00

Section 2, from Andover Street in the town of Danvers to Newburyport, a distance of 93,600 feet, or 17.73 miles :—

143,420 cubic yards excavation and filling,	\$66,213 00
163,386 square yards shaping for broken stone,	4,902 00
50,150 lineal feet guard rail,	12,537 00
5,010 cubic yards V drain,	5,010 00
5,375 cubic yards rock excavation,	10,750 00
48,300 tons broken stone,	72,450 00
1,494 lineal feet pipe culverts,	1,723 00
27 concrete culverts of varying sizes,	31,262 00
Bridge over Parker River,	25,000 00
Engineering and incidentals,	27,582 00
	<hr/>
Total,	\$257,429 00

An analysis of these estimates shows that the estimated cost per mile of work in section 1 is \$7,302, and in section 2, \$12,940.

A still further study shows the cost of different parts of the work to be per mile as follows :—

Section 1 :—

Excavation of all kinds and filling,	\$2,116 00
Guard rail,	162 00
Broken stone surface,	4,243 00
Culverts,	781 00
	<hr/>
Total cost per mile,	\$7,302 00

Section 2 :—

Excavation of all kinds and filling,	\$5,172 00
Guard rail,	793 00
Broken stone,	4,576 00
Culverts,	2,081 00
V drain,	318 00
	<hr/>
Total cost per mile,	\$12,940 00

ENGINEERS AND CLERKS.

The engineering work of the commission during the past year has been under the general direction of Mr. Austin B. Fletcher, secretary of the Board.

Messrs. Andrew M. Lovis and Sidney A. Parsons, first and second assistant engineers, respectively, have had charge of the surveying parties and of the office engineering work.

Messrs. William R. Farrington, John A. Johnston, Frank H. Joyner, Franklin C. Pillsbury, Warren B. Wheeler and Charles H. Howes, division engineers, have had charge of construction work in the field. Mr. Wheeler left the service of the commission April 14, 1906, and was succeeded by Mr. Howes.

The following men have been employed as resident engineers of the first class: George R. Brown, Albert D. Dadley, Percival H. Everett, Lyman L. Gerry, Charles H. Howes (3 months), Howard C. Holden, Everell J. Nichols, Hiram D. Phillips, David H. Winslow and George R. Winslow (2½ months).

The following men have been employed as resident engineers of the second class: William G. Addis, Daniel H. Dickinson, Martin W. Fisher, William P. Hammersley, Frank H. Morris, Charles H. Norton, C. Alden Welton and Wilbur T. Wilson (1½ months).

The following men have been employed as resident engineers of the third class: Emory S. Bingham (9 months), George G. Blackmer (8 months), William G. Burns (4 months), George A. Curtis (5 months), Fred H. Cunningham (8 months), Louis T. C. Loring (8 months), George D. Marshall (9 months), W. A. Rowell (7 months), William M. Stodder (10 months), Charles S. Tinkham (4½ months), Robert A. Vesper (9 months) and Arthur C. Downs (3½ months).

The following men have been employed on survey work: chiefs of party: Messrs. Emory N. Colburn, David W. Merrill, Harold R. Starbird and Fred M. Stuart. Transitmen: Messrs. Arthur L. Bridgham (1 month), Albert E. Ferguson (3 months) and E. M. Young (2 months). Rodmen: Messrs. Abram N. Ashline (5 months), William G. Burns (8 months), George A. Curtis (3 months), A. T. Edwards (7 months), Ralph W. Emerson (3½ months), Paul H. Heimer (2½ months), William J. Lumbert (3 days), Paul McClintock (2 months), Herbert C. Poore (2½ months), Leslie C. Whittemore (3 months) and Granville M. Willis (6 months).

The following men have been employed as draughtsmen and office assistants: Messrs C. Ridgley Brown, Fred H. Cunningham (4 months), Myron B. Hoyt (2 months), Arthur Larabee, Louis T. C. Loring (4 months), Edward F. Odell (7 months), Arthur L. Southworth (1 month), James H. Taylor, Charles S. Tinkham (7½ months) and William N. Wade.

The following have been employed as stenographers for the division engineers: Mr. Ernest F. Shay, Mrs. Clara C. Joyner, Mrs. Katherine Meyer Horn, and Misses Elizabeth A. Riley and Alice G. Kingston.

Mr. Elting J. O'Hara has had charge of the work in the automobile department, under the direction of the secretary, and the following clerks have also been employed in that department during the past year: Helen C. Bridge (5 months), Mary E. Burke (3 months), Hannah F. Dowd (7 months), Inez M. Felt (6 months), Madison C. Lewis (2 months), Ethelyn B. Marlatte (5 months), Agnes L. Moulton (4½ months), Ida L. Poore, Irving L. Redfield (7 months), Grace A. Robbins (3 months), Charles H. W. Woods (6½ months) and Carl J. Youngren. George G. Mann was employed 6½ months and Douglass J. Haydock 4 months as messengers.

The clerical force employed has been as follows: John M. McCarthy, assistant to the secretary; Mary A. Riley, Nellie M. Barlow, Henrietta E. Briggs (4 months) and Hannah F. Dowd (5 months), stenographers; Edward A. Austin, accountant; Alice M. Worthen, copyist; Fred Fair and George F. Murdock, clerks.

Mr. George E. Rayner, employed as inspector of road-build-

ing machinery, resigned his position June 1, 1906. Mr. Ernest A. Spencer was appointed to this position and has served since July 2, 1906.

EXPENDITURES.

The following is a summary of the expenditures of the Massachusetts Highway Commission from Dec. 1, 1905, to Nov. 30, 1906:—

CONSTRUCTION EXPENDITURES.

APPENDIX D.

STATEMENT OF CLAIMS AGAINST THE COMMISSION.

[As required by section 5, chapter 18 of the Revised Laws.]

NAME.	Residence.	Nature of Claim.
Barnes, George H., Barnes, Wm., 2d, }	Marlborough, }	Damages caused by construction of State road at Marlborough.
Bennett, J. C., . . .	Lynn, . . .	Damages caused by taking of land at Lynn.
Brennan, Ann M., . .	Westport, . .	Damages due to alleged accident on State road at Westport.
Brown, Mary, . . .	Westfield, . .	Damages due to alleged accident on State road in Russell.
Chase, Charles A., . .	Somerset, . .	Damages caused by drainage conditions on State road in Somerset.
Coleman, Martin W.,	Richmond, . .	Damages due to construction of State road at Richmond.
Crowell, T. H., ¹ . . .	Somerville, . .	Damages caused by construction of State road at Chatham.
Daly, Julia M., ¹ . . .	Abington, . .	Damages caused by construction of State road at Abington.
Donovan, J. H., ¹ . . .	Natick, . . .	Damages due to construction of State road at Natick.
Green, Arthur E., . .	Westfield, . .	Damages due to alleged accident on State road at Russell.
Griffin, John, <i>et al.</i> , . .	Natick, . . .	Damages due to construction of State road at Natick.
Merriam, Harriet M.,	Millbury, . .	Damages due to construction of State road at Millbury.
Pierce, Alice, . . .	Topsfield, . .	Damages due to alleged accident on State road at Wenham.
Salem Savings Bank, .	Salem, . . .	Damages caused by taking of land at Lynn.
Seabury, Phoebe W.,	Dartmouth, . .	Damages due to construction of State road at Dartmouth.
Sullivan, John, . . .	Westfield, . .	Damages due to alleged accident on State road at Russell.
Sullivan, Kate, . . .	Millbury, . .	Damages due to construction of State road at Millbury.
Warren, Alice E. M., ¹	Auburn, . . .	Damages due to construction of State road at Auburn.
Williams, Frank, . . .	Boston, . . .	Damages due to alleged delays in furnishing materials for State highway construction at Beverly.
Williams, Joseph, . .	Somerset, . .	Damages due to construction of State road at Somerset.

¹ The municipality is defending the action.

APPENDIX E.

COST PER MILE OF ROAD (SECTIONS COMPLETED DURING THE YEAR 1906).¹

TOWN OR CITY.	Square Yards.	Miles.	Cost per Mile.

<i>Essex County.</i>	\$6,200 00	\$4,000 00	\$10,200 00	3,750	14,700	18,450	
Danvers,	\$3,000 00	-	\$3,000 00	4,000	-	4,000	Gravel.
Essex,	-	7 \$416 00	3 416 00	-	-	-	Gravel.
Georgetown,	1,350 00	-	3 1,350 00	5,687	-	5,687	Gravel and macadam.
Middleton,	1,730 00	514 00	2,244 00	3,600	2 3,100	6,700	Gravel.
Salisbury,	1,948 00	-	1,948 00	2,150	-	2,150	Macadam.
Topsfield,	2,484 00	-	2,484 00	7,625	-	7,625	Gravel.
	\$10,512 00	\$930 00	\$11,442 00	23,062	3,100	26,162	

¹ In many instances the towns have contributed sums in addition to the allotments of the commission, thus making it possible to improve a greater length of road. The lengths shown as built represent the total length improved with all the money available.
² Built with 1905 and 1906 allotments.
³ The town contributed an equal amount.
⁴ Work not yet begun.
⁵ Town contributed \$2,000.
⁶ Built with 1905 allotment.
⁷ Work begun but not completed.

WORK DONE UNDER THE "SMALL TOWN" ACT — *Continued.*

APPENDIX I.

REPORT OF FORESTER.

CLINTON, MASS., Dec. 13, 1906.

To the Massachusetts Highway Commission.

GENTLEMEN:—The year just closing has been a favorable one for the planting of shade trees. The loss among those planted in the spring was very small. Our planting in Brewster of 534 trees was remarkable in the fact that but 1 tree died and all made a good growth.

The trees planted in the nursery were the most successful of any we have had, so that those set out this fall are likely to succeed, as they were supplied with an abundance of fibrous roots. Had the 1905 trees had the same conditions, our cost of maintenance would have been lessened, but the effect of the very dry season of last year still manifested itself this year; after this there will probably be little trouble from that source.

The dying back among the soft wooded trees was due to the very unusual warm weather of last January, which started the sap, and the trees were not sufficiently established to withstand the severe freezing that followed. These trees were cut back in the early summer, and the result was a vigorous growth from the roots that will soon make a good showing.

The spraying of the trees on the Cape was very successful in Dennis and Brewster in keeping down the fall web worm, which was so plenty last year. In some sections on the Cape the elm-leaf beetles are at work, but they can be easily kept in check by spraying, and as we now have an outfit there, the expense is very light.

One of the encouraging features of the work is the interest which individuals are showing in the State trees, and the example that they are following in setting out trees on other roads. They are also thinning out the native growth and allowing selected trees to

NORWAY MAPLES IN STATE NURSERY — SUMMER OF 1906.

remain. The result of their co-operation with the commission in their efforts will make the roads of our State still more attractive.

The conditions at the nursery are very much improved by an increased fertility of the soil, together with a good water supply.

New trees planted in 1906,	2,511
Total planted in last three years,	9,657
Trees replaced in 1906,	1,011
Trees on hand in nursery,	924
Small trees on hand in nursery,	1,129

Ground was prepared this fall for 365 trees that are to be planted in the spring.

The cost of planting the new trees this year, including the cost of tree and every expense connected therewith, has been \$1.10 each. The cost of the maintenance of trees planted previous to this year has been \$0.16 per tree, and including the cost of replaced trees, \$0.20.

Respectfully submitted,

E. W. BREED.

PART II.

FIRST ANNUAL REPORT

OF THE

MASSACHUSETTS HIGHWAY COMMISSION,

FOR THE

FISCAL YEAR ENDING NOVEMBER 30, 1906,

ON

COMPANIES ENGAGED IN THE TRANSMISSION OF
INTELLIGENCE BY ELECTRICITY.

CHAPTER 433, ACTS OF 1906.

ANNUAL REPORT OF THE MASSACHUSETTS HIGHWAY COMMISSION CONCERNING COM- PANIES ENGAGED IN THE TRANSMISSION OF INTELLIGENCE BY ELECTRICITY.

In accordance with the provisions of chapter 433 of the Acts of 1906, the commission, in July, assumed its supervisory duties over the companies engaged in this Commonwealth in the transmission of intelligence by electricity.

Inasmuch as under the law the first annual returns of the several companies are not required to be made before Oct. 1, 1907, the commission has not deemed it wise to make any special effort to include statistics in detail in this report concerning the capital, volume of business or physical plant of the companies. It is the intention to report, in a general way only, the names of the companies engaged in the business and the extent of their service to the people of the Commonwealth. Such statistics were obtained from the files of the Secretary of the Commonwealth, from the reports of the companies to their stockholders, and by correspondence with the officials of the companies and with the officials of each city and town in the Commonwealth.

The act before referred to requires the Tax Commissioner to assess each year upon each company its proportionate share of the sum appropriated by the Legislature for the expenses of the commission, said assessment to be based upon the gross earnings of the company in the Commonwealth. At the request of the Tax Commissioner, the commission furnished to him schedules of the gross earnings of the several companies, made from the sworn statements of the principal officials of the companies. A copy of these schedules will be found in Appendix A.

In the following discussion it has been deemed best to treat the telephone companies and the telegraph companies separately.

TELEPHONE COMPANIES.

Few of those who daily use the telephone realize the important part it now plays in the business and social life of the State and nation, or understand how rapid has been its growth.

The fact that human speech could be transmitted over a wire was first announced by Prof. Alexander Graham Bell in 1876. The first telephone exchange was established in New Haven, Conn., in 1878. In the early part of 1880 there were 61,000 telephones in use.

The telephone plant and business of the United States in 1902, according to the special census of that year, was as follows:—

Summary of All Telephone Systems.

Miles of wire,	4,850,486
Number of subscribers,	2,178,366
Number of telephones of all kinds,	2,315,297
Number of public exchanges,	10,361
Number of employees,	78,752
Number of messages or talks,	5,070,554,553
Capital stock authorized, par value,	\$384,534,066
Total revenue,	86,825,536
Operating expenses and fixed charges,	65,164,771
Dividends,	14,982,719
Net surplus,	6,678,046
Total assets,	452,172,546
Total capital stock and outstanding bonds, par value,	348,031,058

It will be noted, in studying these returns, that during the twenty-six years between 1876 and 1902 the telephone was introduced and had grown so as to have 4,850,486 miles of wire, 2,315,297 instruments were in use, assets of the companies to the value of \$452,172,546 had accumulated, and over 5,000,000,000 messages were sent over the wires during the last year of the period.

Massachusetts has not been behind the other States of the Union in introducing and using the telephone, as is shown by these same census returns.

The number of miles of wire in 1902 per station (or subscriber) for the United States was 2.15, for Massachusetts 2.67. The number of local messages per station per day for the United

States was 6.7, for Massachusetts 5.5. The number of long-distance messages per station per year for the United States was 53.9, for Massachusetts 101.7. The number of stations per switch board for the United States was 224, for Massachusetts 411.

A study of the above analysis shows that the length of wire per station was 24 per cent. greater in Massachusetts than the average for the United States; that the number of stations per switch board was 83 per cent. greater; and that the number of long-distance messages was 89 per cent. greater. The number of local messages per station was 18 per cent. less in Massachusetts than the average of the United States.

From the greater length of line per subscriber, it is apparent that the telephone lines were more widely diffused in Massachusetts than the average. While the local messages were less than the average, the long-distance messages were much in excess, and it would seem that the business interests fully appreciate the importance of the speed and certainty of this means of communication.

The exact census of telephones for the present year is not taken. The returns called for by chapter 433 of the Acts of 1906 will not be made until next year; hence, the figures showing growth are not available. But it can be stated, with a reasonable degree of certainty, that the growth since 1902 has been even greater than it was for any previous period of four years.

At the present time there are only 6 towns in the Commonwealth without telephone service. The population of these towns is 1,095, out of a total population of 3,003,680.

The New England Telephone and Telegraph Company, including the Southern Massachusetts Telephone Company, which it owns, and the Providence Telephone Company of Massachusetts have public pay stations or subscribers in all but 12 of the municipalities of the State. The population thus served is 2,999,290. These companies are allied with the American Telephone and Telegraph Company, which owns a controlling interest in the stock of the companies and generally dictates their policy.

The Providence Telephone Company of Massachusetts serves the towns of Attleborough, Blackstone, North Attleborough,

Plainville and Seekonk. These towns have a total population of 29,583.

Of the 12 municipalities not served by the last-named companies, 6, as already noted, have no telephone service. The other 6 are served as follows:—

Hancock, by the Columbia and Rensselaer County Telephone Company.

Richmond, by the Richmond Co-operative Telephone Company.

Hawley and Heath, by the Heath Telephone Company.

Leyden, by the Bernardston & Gill Telephone Company.

Leverett, by the Highland Telephone Company.

The Heath Telephone Company serves the towns of Ashfield, Buckland, Charlemont, Colrain, Conway, Deerfield, Hawley, Heath, Rowe and Shelburne. All of these towns, with the exception of Heath and Hawley, are also served by the New England Telephone and Telegraph Company.

The Highland Telephone Company serves the towns of Leverett, New Salem, Shutesbury and Wendell. All of these towns, with the exception of Wendell, are also served by the New England Telephone and Telegraph Company.

The Public Telephone Company, owned by Dr. C. F. Lane, serves the towns of Chilmark, Cottage City, Edgartown, Gay Head, Tisbury and West Tisbury. These towns are also served by the New England Telephone and Telegraph Company.

The city of New Bedford has the service of both the New England Telephone and Telegraph Company and the Automatic Telephone Company of New Bedford, there being 3,072 subscribers to the first and 1,093 subscribers to the second.

The city of Fall River has the service of both the New England Telephone and Telegraph Company and the Fall River Automatic Telephone Company, there being 3,158 subscribers to the first and 1,135 subscribers to the second.

The following additional towns are served by the New England Telephone and Telegraph Company, and also by private lines or by co-operative telephone companies or associations:—

Barnstable and Yarmouth, by the Cape Cod Telephone Company.

Bernardston and Gill, by the Bernardston & Gill Telephone Company.

Bolton, by the Bolton Telephone Company.

Chelmsford, by the Chelmsford Telephone Company.

Deerfield, by Lyman B. Wise.

Granby, by the Granby Telephone and Telegraph Company of Massachusetts.

Ipswich, by the Carpenter & Bailey Telephone Company.

Littleton, by the Littleton Telephone Association.

Norton, by the Farmers' Mutual Telephone Company.

Oakham, by the Oakham and Coldbrook Springs Telephone Company.

Orleans, by the Orleans Telephone Company.

Rochester, by R. McGilvray.

Rowley, by the Carpenter & Bailey Telephone Company.

Royalston, by S. C. French.

West Brookfield, by Dr. C. E. Perkins.

West Stockbridge, by the W. H. Losty Telephone Line, West Stockbridge Mutual Telephone Company, State Line Co-operative Telephone Company No. 12, and State Line Mutual Telephone Company No. 7.

Williamsburg, by the Citizens' Independent Telephone Company.

In this last group of telephone organizations, the Cape Cod Telephone Company is an independent company and covers in part ground covered by the New England or Southern Massachusetts Telephone Company. The others are private lines or rural lines operating in territory not served by the New England Telephone and Telegraph Company.

There are 4 mutual or assessment organizations, as follows:—

Chelmsford Telephone Company of Chelmsford.

Farmers' Mutual Telephone Company of Norton.

Raymond McGilvray of Rochester.

Otter River Telephone Company of Otter River, Templeton.

The company known as "the Raymond McGilvray" of Rochester constructed and maintain the lines by subscription. Each party interested owns his telephone. There are 11 subscribers.

The Farmers' Mutual of Norton was built and equipped by selling of stock in shares of the value of \$25. It is maintained by an annual assessment of about \$6. There are no dividends paid on account of stock. There are 20 subscribers.

The following companies report no earnings in Massachusetts, and the reasons may be simply stated: —

American Bell Telephone Company. (This company has been replaced so far as actual operation is concerned by the American Telephone and Telegraph Company.)

American Telephone and Telegraph Company of Massachusetts.

New England Telephone and Telegraph Company of Massachusetts.

These companies have Massachusetts charters for securing franchises and purchasing real estate in the State, the operations under the franchises being conducted under contracts or agreements by their respective parent companies, the American Telephone and Telegraph Company and the New England Telephone and Telegraph Company.

The Deerfield Valley Telephone and Telegraph Company and Charlemont Telephone Company have become a part of the New England Telephone and Telegraph Company.

The Valley Telephone Company has become a part of the Highland Telephone Company.

The Hampden Automatic Telephone Company, Home Automatic Telephone Company, Lawrence Independent Telephone Company, Metropolitan Home Telephone Company, Nantucket Telephone Company and Puritan Telephone Company have for various reasons not reached the point of transmitting intelligence by electricity.

The following companies and organizations are reported as being out of business, or, so far as the Highway Commission can ascertain, have no office and are not doing business. The commission would recommend that their charters or organizations be annulled.

NAME OF COMPANY.	Office.	Date of Charter or Organization.
Agawam Telephone Company, .	Rowley, .	Organized Sept. 23, 1905.
Blandford Telephone Company,	Blandford, .	Organized Jan. 6, 1887.
Citizens' Telephone and Telegraph Company.	Worcester, .	Organized June 5, 1900.
Drawbaugh Telephone and Telegraph Company.	- -	Chartered, chapter 149, Acts of 1894.

NAME OF COMPANY.	Office.	Date of Charter or Organization.
Eastern Telephone Company, The.	Rowley, . .	No report found.
Globe Telephone Company, .	Lowell, . .	Organized Aug. 12, 1899.
Gloucester Automatic Tele- phone Company.	Boston, . .	Organized March 29, 1898.
Merrimac Valley Telephone Company.	Lawrence, . .	Organized Sept. 1, 1880.
Old Colony Automatic Tele- phone Company.	Plymouth, . .	Organized March 2, 1903.
States Telephone and Telegraph Company.	- -	Chartered, chapter 149, Acts of 1878.
Worcester Telephone Company,	Worcester, . .	Organized June 27, 1899.
South Berkshire Independent Telephone and Telegraph Company of Massachusetts.	Great Barrington,	Organized June 16, 1902.

TELEGRAPH COMPANIES.

It is not clear just what the intent of the act is which places all companies engaged in the transmission of intelligence by electricity under the supervision of the Massachusetts Highway Commission.

The 11 telegraph companies which report their gross earnings resulting from business within the Commonwealth may well be divided into two distinct classes; first, those companies which deal directly with the public, and maintain offices and equipments for receiving and sending messages; second, those companies which do not appear to maintain such offices, and so deal with the general public.

Inasmuch as the returns from the different companies are not required to be made before next year, the commission has not deemed it wise to make any effort to obtain the detailed statistics of physical plant, capital or business for this report, but rather to report in a general way the names of companies engaged in the business, and to what extent they serve the people of the Commonwealth as a whole.

A greater part of the information which the commission has was obtained in reply to a circular letter sent to the officers of each city and town in the Commonwealth. This circular contained the following questions:—

a. Does the Western Union Telegraph Company furnish telegraph service in your municipality?

b. Does the Postal Telegraph-Cable Company furnish telegraph service in your municipality?

c. Does any person, partnership, association or corporation, other than those enumerated above, furnish telegraph service in your municipality?

Replies were received from every city and town in the Commonwealth. These replies seem to indicate that there are 3 companies doing the telegraph business of the State, viz., the Western Union, Postal Telegraph-Cable and Martha's Vineyard Telegraph companies. If there are others they have not been reported.

The Western Union Telegraph Company has offices and equipment for receiving and sending messages in each of the 33 cities and in 228 out of the 321 towns. An arrangement between the telegraph and telephone companies extends this service to several towns, by telephone from the nearest telegraph office.

The Postal Telegraph-Cable Company of Massachusetts has offices and equipment for receiving and sending messages in 25 out of the 33 cities, and in 18 of the larger towns. So far as present information goes, the Postal Company has no offices in any city or town of the Commonwealth where there is no Western Union office.

The Martha's Vineyard Telegraph Company operates in the county of Dukes County, and has offices in Cottage City and Tisbury. This company connects with the Western Union Telegraph Company at Woods Hole, their cable crossing Vineyard Sound and landing on Pasque Island, a part of the town of Gosnold.

Of the 11 telegraph companies reporting their earnings in the Commonwealth, 2 are owned by the Western Union Telegraph Company, viz., the American District Telegraph Company (of Maine) and the Mutual District Messenger Company of Boston.

The total gross earnings of these 11 companies amount to \$308,029.34. Of these gross earnings, the Western Union Telegraph Company and its allied companies, the Postal Telegraph-Cable Company of Massachusetts and the Martha's Vineyard Telegraph Company, receive \$182,206.51.

The nature of the business of the other companies, except the

Marconi Wireless Telegraph Company, with gross earnings amounting to \$125,822.83, is not definitely known, and cannot be until the returns of next year are made.

There are 13 telegraph companies that report no earnings. Four of these are owned by the Western Union Telegraph Company, and their earnings are included in the return of that company. The 4 companies are: —

American Rapid Telegraph Company of Massachusetts.

American Union Telegraph Company.

Franklin Telegraph Company.

Gold and Stock Telegraph Company.

Two of these companies report that they are not engaged in the transmission of intelligence by electricity, viz., the Municipal Fire and Police Telegraph Company and the United States Fire and Police Telegraph Company.

The cable of the French Telegraph Cable Company lands at Orleans, and all its messages are taken from or delivered to the Western Union Telegraph Company.

The American De Forest Wireless Telegraph Company reports that it is doing no business in Massachusetts.

The Ocean Telegraph Company extends from the office in Duxbury to connect with the cable of the Anglo American Telegraph Company, three miles out to sea. This company secured the franchise and real estate for the Cable Company, and the messages of that company are received and sent over the wires and cables.

The business of the Postal Telegraph Company is done by the Postal Telegraph-Cable Company of Massachusetts.

The Atlantic Telegraph Company of Massachusetts and the Stock Quotation Company do not appear to do business in Massachusetts.

The following telegraph companies could not be reached, and letters sent to their offices were returned uncalled for. The commission would recommend that their charters be annulled by legislative act.

Baltimore & Ohio Telegraph Company, incorporated June 15, 1884.

Bankers' and Merchants' Telegraph Company of Massachusetts, incorporated Nov. 3, 1883.

Boston & Cape Cod Marine Telegraph Company, chapter 120, Acts of 1856.

Boston Multiplex Telegraph Company, incorporated Feb. 1, 1884.

Boston & Portland Telegraph Company, chapter 61, Acts of 1850.

Cape Cod Telegraph Company, chapter 348, Acts of 1855.

Commercial Telegraph Company, chapter 252, Acts of 1852.

New England Printing Telegraph Company of Massachusetts, incorporated Aug. 13, 1890.

The charters of the Electro Pneumatic Despatch Company and American Typewriter Telegraph Company, both Maine corporations, have apparently been surrendered.

JOHN H. MANNING,

Massachusetts Highway Commission.

APPENDIX A.

SHOWING CERTAIN INFORMATION CONCERNING THE GROSS EARNINGS OF THE SEVERAL TELEGRAPH AND TELEPHONE COMPANIES, AS FURNISHED TO THE TAX COMMISSIONER OF THE COMMONWEALTH.

COPY.

Nov. 7, 1906.

HON. WILLIAM D. TREFRY, *Commissioner of Corporations and Tax Commissioner, State House, Boston, Mass.*

DEAR SIR:— At your request, in order that you may apportion the sum appropriated in 1906 for the additional salaries and expenses of the Massachusetts Highway Commission, under the Acts of 1906, chapter 433, as provided in section 3 of said act, the Massachusetts Highway Commission herewith submits a schedule of the gross earnings of the several companies known to be engaged in the transmission of intelligence by electricity in this Commonwealth, together with two other schedules giving certain data resulting from the investigation.

In most cases, the gross earnings shown have been sworn to by the principal officials of the companies. In some cases, and then only when the companies or individuals, with perhaps one exception, are known to be doing a very small and almost insignificant business, the earnings shown in the schedule are not supported by sworn statements. In every case the Board has attempted to get sworn returns on regular forms like the blank which is enclosed, but in the few instances above referred to it has thus far failed.

The commissioners believe that to get the sworn statements in these few cases it would be necessary to summon the officials of the companies before the Board, and that the result which would be secured by this expensive process would not be commensurate with the expense involved, particularly as it is understood that any inaccuracies or omissions in this year's list may be corrected next year.

The Public Telephone Company, Charles F. Lane, manager, of Vineyard Haven, whose business is, perhaps, the largest of any of the companies or individuals which have not made sworn returns, has been summoned to appear before the Board for examination.

In Schedule III. will be found a list of certain companies which the commission has utterly failed to get into communication with. It is probable that all of these concerns have ceased to do business.

The returns show the total gross earnings of the telephone companies to be \$7,132,545.60, and those of the telegraph companies to be \$308,029.34.

By order of the Massachusetts Highway Commission,

(Signed)

A. B. FLETCHER,

Secretary.

SCHEDULE I.

Showing the Gross Earnings of the Several Companies, etc., engaged in the Transmission of Intelligence by Electricity in Massachusetts, Nov. 7, 1906.

Telephone Companies.

AMERICAN TELEPHONE AND TELEGRAPH COMPANY. <i>President</i> , Frederick P. Fish; <i>Treasurer</i> , William R. Driver. Address, Boston.		
Gross earnings for year ending Dec. 31, 1905,	. . .	\$339,701 93
AUTOMATIC TELEPHONE COMPANY OF NEW BEDFORD. <i>President</i> , Francis T. Akin; <i>Treasurer</i> , Frederic Taber. Address, New Bedford.		
Gross earnings for year ending March 1,	. . .	27,274 13
BOLTON TELEPHONE COMPANY, THE. <i>President</i> , J. N. Pardee; <i>Treasurer</i> , Guy T. Emerson. Address, Bolton.		
Gross earnings for six months ending July 1,	. . .	131 63
CAPE COD TELEPHONE COMPANY. <i>President</i> , F. Percy Goss; <i>Treasurer</i> , Arthur G. Guyer. Address, Hyannis.		
Gross earnings for year ending Aug. 31, 1905,	. . .	2,475 53
CARPENTER & BAILEY TELEPHONE COMPANY. Sole owners, Almon E. Carpenter, Albert E. Bailey. Address, Rowley.		
Gross earnings for year ending June 30, 1906,	. . .	465 00
CITIZENS INDEPENDENT TELEPHONE COMPANY, THE. <i>President</i> , A. S. Hills; <i>Treasurer</i> , Byron Loomis. Address, Haydenville.		
Gross earnings for year ending February 1,	. . .	300 00
COLUMBIA & RENSSELAER TELEPHONE AND TELEGRAPH COMPANY. <i>President</i> , A. S. Haight; <i>Treasurer</i> , M. J. Fowler. Address, West Lebanon, N. Y.		
Gross earnings for year ending July 1, 1906,	. . .	100 00
<i>Amount carried forward,</i>	. . .	<hr/> \$370,448 22

<i>Amount brought forward,</i>	\$370,448 22
FALL RIVER AUTOMATIC TELEPHONE COMPANY. <i>President,</i> Edward B. Jennings; <i>Treasurer,</i> Bradford D. Davol. Address, Fall River.	
Gross earnings for year ending March 31, 1906,	30,383 59
FLAGG, LEVI W. ¹ Owner, Levi W. Flagg. Address, New Salem.	
Gross earnings for year ending Oct. 1, 1906,	74 00
FRENCH, S. C. ¹ Owner, S. C. French. Address, Royalston.	
Gross earnings (per year, approximate),	5 00
GRANBY TELEPHONE AND TELEGRAPH COMPANY OF MASSA- CHUSETTS, THE. <i>President,</i> George F. Eastman; <i>Treasurer,</i> W. A. Taylor. Address, Granby.	
Gross earnings for year ending Jan. 15, 1906,	1,052 74
HEATH TELEPHONE COMPANY. <i>President,</i> W. E. Kinsman; <i>Treasurer,</i> H. Newell. Address, Shelburne Falls.	
Gross earnings for year ending October 1,	7,115 76
HIGHLAND TELEPHONE COMPANY. <i>President,</i> Rawson King; <i>Treasurer,</i> Willard Putnam. Address, New Salem.	
Gross earnings for year ending July 1, 1906,	613 49
LITTLETON TELEPHONE ASSOCIATION. <i>President,</i> Frank B. Priest; <i>Treasurer,</i> J. Melom Hartwell. Address, Littleton.	
Gross earnings for year ending July,	410 00
LOSTY, W. H., TELEPHONE LINE. Owner, W. H. Losty. Address, West Stockbridge.	
Gross earnings for year ending June 30, 1906,	226 80
MASSACHUSETTS TELEPHONE AND TELEGRAPH COMPANY, THE. <i>President,</i> Fred Jones; <i>Treasurer,</i> William Shirden. Address, Boston.	
Gross earnings for year ending Dec. 31, 1905,	2,654 79
MILLER'S FALLS, MASS., TELEPHONE EXCHANGE. Owner, E. M. Partridge. Address, Miller's Falls.	
Gross earnings for year ending July 1,	1,669 89
<i>Amount carried forward,</i>	\$414,654 28

¹ No sworn statement received.

<i>Amount brought forward,</i>		\$414,654 28
NEW ENGLAND TELEPHONE AND TELEGRAPH COMPANY.		
<i>President, Thomas Sherwin; Treasurer, William R. Driver. Address, Boston.</i>		
Gross earnings for year ending Dec. 31, 1905,		6,179,565 11

APPENDIX B.

ACTS OF 1906, CHAPTER 433.

AN ACT RELATIVE TO THE SUPERVISION BY THE MASSACHUSETTS HIGHWAY COMMISSION OF ALL COMPANIES ENGAGED IN THE TRANSMISSION OF INTELLIGENCE BY ELECTRICITY.

Be it enacted, etc., as follows:

The Massachusetts highway commission to have supervision of companies transmitting intelligence by electricity, etc.

SECTION 1. The Massachusetts highway commission shall have general supervision of all companies engaged in the transmission of intelligence by electricity within this Commonwealth, and shall make all necessary examinations and inquiries and keep themselves informed as to the compliance of all such companies with the provisions of law. None of said commissioners shall be in the employ of or own any stock in any company engaged in the transmission of intelligence by electricity in this Commonwealth, or be in any way, directly or indirectly, pecuniarily interested in the manufacture or sale of any article or commodity used by such companies, or for any purpose connected with the business of transmission of intelligence by electricity, nor shall he be connected with, or in the employ of any person, partnership, association or corporation which finances any such company.

Compensation.

Each member of said commission shall receive from the Commonwealth annually fifteen hundred dollars in addition to the compensation now provided by law.

Expenses.

SECTION 2. Said commission may expend in the performance of its duties under this act for necessary statistics, books, stationery, clerical, travelling and incidental expenses, a sum not exceeding six thousand dollars annually.

Amount of expenses to be apportioned by the tax commissioner, etc.

SECTION 3. All sums of money annually appropriated for the additional salaries and expenses of the Massachusetts highway commission required by this act shall be apportioned

by the tax commissioner among the several companies engaged in the business of transmission of intelligence by electricity within the Commonwealth; and on or before the first day of July in each year he shall assess upon each of said companies its share of such sums in proportion to its gross earnings in this Commonwealth for the year last preceding the year in which the assessment is made; and such assessment shall be collected in the same manner as taxes upon corporations.

SECTION 4. Said commission shall annually, on or before the first Wednesday in January, transmit to the secretary of the Commonwealth a report to the general court of all proceedings under the provisions of this act during the period covered by the report, together with such suggestions as to the condition or conduct of companies engaged in the transmission of intelligence by electricity as the said commission may deem expedient. Annual report.

SECTION 5. Upon complaint in writing relative to the service or charges for service in, to or from any city or town in the Commonwealth as rendered or made by any company engaged therein in the transmission of intelligence by electricity, signed by the mayor of the city or the selectmen of the town, or by twenty customers of the company, the commission shall notify the company by leaving at its office or place of business in such city or town a copy of the complaint, and shall thereupon, after notice, give a public hearing to the complainant or complainants and to the company, and after the hearing may make such recommendations concerning the reduction, modification or continuation of such charges for service, or concerning improvements in the quality of the service, or concerning such other matters in the premises as the commission shall deem just and proper. Any such recommendations shall be transmitted in writing by the commission to the company complained of, and a report of the proceedings and of the result thereof shall be included in the annual report of the commission, together with a statement of the action, if any, which the company has taken on the recommendation. Hearing to be given in complaint relative to service, etc.

SECTION 6. If a company engaged in the transmission of intelligence by electricity violates or neglects in any respect to comply with the provisions of any law, said commission shall give due notice thereof in writing to such company and The attorney-general to take proceedings in certain cases. etc.

to the attorney-general, who shall take such proceedings thereon as he may deem expedient.

Supreme
judicial court
to have
jurisdiction.

SECTION 7. The supreme judicial court or the superior court shall have jurisdiction in equity, upon the application of said commission, to enforce all lawful orders of the commission and all provisions of law herein contained.

Annual
returns to be
made, etc.

SECTION 8. Every company engaged in the business of the transmission of intelligence by electricity within the Commonwealth shall annually, on or before the first day of October in each year after the year nineteen hundred and six, submit to said commission a report of its doings for the year ending on such date or dates preceding as said commission may designate, which report shall be in such form and detail as the commission may from time to time prescribe, and shall be called the "Annual Return." Such return shall be sworn to by the treasurer and by the chief accounting officer of such company, and shall include a statement of its business, receipts and expenditures within the Commonwealth during the year, its dividends paid out and declared, the amount of its authorized capital and its indebtedness and financial condition, on such date or dates as said commission may designate.

Penalty for
neglect to
make return.

SECTION 9. Any company engaged in the business of the transmission of intelligence by electricity within the Commonwealth neglecting to make the annual return required by the preceding sections shall, for the first fifteen days or portion thereof during which such neglect continues, forfeit five dollars a day; for the second fifteen days or any portion thereof, ten dollars a day; and for each day thereafter a sum not exceeding fifteen dollars a day. If any company unreasonably refuses or neglects to make such return, it shall, in addition thereto, forfeit not more than five hundred dollars for each offence. All forfeitures recovered under the provisions of this act shall be paid into the treasury of the Commonwealth.

Companies to
furnish infor-
mation, etc.

SECTION 10. In addition to the annual return required by section eight, every such company shall at all times, upon request, furnish to the said commission any information required by the commission concerning the condition, management and operation of its business within the Commonwealth, or concerning its rates or charges or the facilities afforded by

it to the public therein, and shall comply with all lawful orders of said commission; and the commission may at all reasonable times have access to the books of such company.

SECTION 11. Every company engaged in the business of the transmission of intelligence by electricity within the Commonwealth shall keep its books and accounts covering the business done within the Commonwealth in a form approved by said commission. Books and accounts.

SECTION 12. The word "company" shall include every person, partnership, association and corporation engaged in the business of the transmission of intelligence by electricity. The word "company" defined.

SECTION 13. In all investigations made by the board, and in all proceedings before it, any member thereof may summon witnesses in behalf of the Commonwealth, and may administer oaths and take testimony. The fees of such witnesses for attendance and travel shall be the same as for witnesses before the superior court, and shall be paid by the Commonwealth upon the certificate of the board filed with the auditor. Witnesses may be summoned, etc.

SECTION 14. This act shall take effect on the first day of July, nineteen hundred and six. When to take effect.

Approved May 31, 1906.
