49. [Illegible]	49. [Illegible]	[Illegible]
50. [Illegible]	50. [Illegible]	[Illegible]

appeared to be flares. The light would last a few sec. then disappear.

16. Tell in a few words the following things about the object.

- a. Sound Could not hear any sound. (See my letter to Office of Special Investigation, USAF, dated November 27, 1952)
- b. Color Slightly duller than aluminum. Almost a pearl-gray luster.

17. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

No wings, protrusions, exhaust or vapor trails visible at any time.

Perfect circles when first sighted.

Somewhat flattened or elliptical in shape just before disappearing.

18. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - b. Like a bright star
 - c. Sharply outlined (when first sighted)
 - d. Don't remember

e. Other Less distinct at time of rapid acceleration.

19. IF there was MORE THAN ONE object, then how many were there? Four
 Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

Motion was quite steady, like that of intelligently guided aircraft, until about ten seconds before their disappearance, at which time the spheres accelerated much faster than any craft I have ever seen.

also see detail on enclosed map.

21. IF POSSIBLE, try to guess or estimate what the real size of the object was in its longest dimension.
20 to 30 feet.

22. How large did the object or objects appear as compared with one of the following objects held in the hand and at about arm's length?

(Circle One):

- | | |
|--|------------------|
| a. Head of a pin | g. Silver dollar |
| b. Pea | h. Baseball |
| <input checked="" type="radio"/> c. Dime | i. Grapefruit |
| d. Nickel | j. Basketball |
| e. Quarter | k. Other _____ |
| f. Half dollar | |

- 22.1 (Circle One of the following to indicate how certain you are of your answer to Question 22.)

- | | |
|--|------------------|
| a. Certain | c. Not very sure |
| <input checked="" type="radio"/> b. Fairly certain | d. Uncertain |

23. How did the object or objects disappear from view? *Almost straight up and with tremendous speed.*

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

Because of the astonishing maneuverability of these objects, their change of shape, and lack of visible means of locomotion I am quite unable to imagine how to construct one. When first sighted they looked like silvery balls on a Christmas tree, only not as shiny.

25. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
 b. In a car (*First ten seconds*)
 c. Outdoors (*Last fifty seconds*)
 d. In an airplane
 e. At sea
 f. Other _____

26. Were you (Circle One)

- a. In the business section of a city?
 b. In the residential section of a city?
 c. In open countryside?
 d. Flying near an airfield?
 e. Flying over a city?
 f. Flying over open country?
 g. Other _____

27. What were you doing at the time you saw the object, and how did you happen to notice it?

Warming up engine of my car. Heard an airplane and looked out window to the north. Spheres caught my sight before airplane.

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

28.2 How fast were you moving? _____ miles per hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

29. What direction were you looking when you first saw the object? (Circle One)

- | | | | |
|---|--------------|--------------|--------------|
| <input checked="" type="radio"/> a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

30. What direction were you looking when you last saw the object? (Circle One)

- | | | | |
|---|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| <input checked="" type="radio"/> b. Northeast | d. Southeast | f. Southwest | h. Northwest |

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North 30 degrees. *w.*
 b. From horizon 5 degrees.

31.2 When it disappeared:

- a. From true North 35 degrees. *e.*
 b. From horizon 70 degrees.

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

34. What were the weather conditions at the time you saw the object?

34.1 CLOUDS (Circle One)

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds
- e. Don't remember

34.2 WIND (Circle One)

- a. No wind
- b. Slight breeze
- c. Strong wind
- d. Don't remember

34.3 WEATHER (Circle One)

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

34.4 TEMPERATURE (Circle One)

- a. Cold
- b. Cool
- c. Warm
- d. Hot
- e. Don't remember

35. When did you report to some official that you had seen the object?

24 / 11 / 52
Day / Month / Year

36. Was anyone else with you at the time you saw the object?

(Circle One) Yes No

36.1 IF you answered YES, did they see the object too?

(Circle One) Yes No

36.2 Please list their names and addresses:

The men whose names are listed below were following me out of the factory and were at varying distances behind me, but all had a clear view.

Glendale 6, Calif.

*Los Angeles 27
California*

Canoga Park, Calif.

(Phone)

(Phone)

37. Was this the first time that you had seen an object or objects like this?

(Circle One) Yes (in flight) No

37.1 IF you answered NO, then when, where, and under what circumstances did you see other ones?

38. In your opinion what do you think the object was and what might have caused it?

My opinion is much too generalized & vague to be of the slightest use to your investigation. Sorry I can't be of any help in this matter.

39. Do you think you can estimate the speed of the object?

(Circle One)

Yes

No

IF you answered YES, then what speed would you estimate?

Don't know how far they moved. ~~They moved~~ during the 60 seconds in which we saw them, although they appeared to be within two miles and moving at about 200 m.p.h. until they accelerated so rapidly. after the rapid acceleration, speed must have been well over 2500 m.p.h.

m.p.h.

40. Do you think you can estimate how far away from you the object was?

(Circle One)

Yes

No

IF you answered YES, then how far away would you say it was?

Impossible because they were above the crest line of the Verdugo Mts. and could have been many miles away, but appeared to be within two miles.

feet.

41. Please give the following information about yourself:

NAME

Last Name

First Name

Middle Name

ADDRESS

Street

City

Zone

State

TELEPHONE NUMBER

What is your present job?

Structural aircraft assembler

Age *43*

Sex *Male*

Please indicate any special educational training that you have had.

a. Grade school _____

e. e. Technical school _____

b. High school _____

(Type) _____

c. College *Graduate* _____

f. Other special training _____

d. Post graduate _____

Excerpt from WEAPD Officer of the Day Report 24-25 November 1952

"S/ [REDACTED] Federal Bureau of Investigation, Phone [REDACTED] reported sighting of 4 unidentified objects, believed similar to flying saucers, by Mr. [REDACTED], Pasadena, Calif. The sighting was made at approximately 1550 hours at Timm Industries, [REDACTED] where Mr. [REDACTED] employed. Two other witnesses to the sighting are [REDACTED] and a person known as [REDACTED] who work in Structural Assembly at Tim Industries."

No

The observer sighted a gray object that was shaped like a double convex lens with a sharp edge. The object appeared to be about four ft in diameter and one ft thick at the center. As the object flew away, at low level, it made a high-pitched undulating whine.

COMMENTS: Nothing was reported to the Duluth City Police Department. The observer was requested to provide additional information but did not do so. Dr Hynek was requested to contact the witness but was unable to do so because she had moved and had not left a forwarding address.

UFO Case Files

Dr. J. Allen Hynek

1. Reference the attached UFO report from Duluth, Minnesota, for 19 November 1967. You may want to call [redacted] her observation. As it stands right now, the case will probably have to be evaluated as unidentified.
2. If you do not intend to take any action on the 19 Nov 67 case, please inform us so that we may take the report out of the pending category.
3. Attached is a copy of the card you requested on the 13 October 1967, Oelwein, Iowa sighting. The other reports you requested are at reproduction and will be forwarded to your office upon their return.

TYPED COMMENTS MADE BY DR. J. ALLEN HYNEK ON ¹¹ JUNE 1968

DULUTH, MINNESOTA

19 November 1967

I attempted to call Mrs [REDACTED]
Duluth, Minnesota but was told telephone had been disconnected and no
phone at all was listed for the person. Since she is a 20 year old
practical nurse, she may be itinerant and floating from job to job.
Description is that of "typical" (!) UFO, complete with "hovering"
and "hum."

This should have been followed up immediately and Johnson contacted
before she moved away. Pretty hard to trace [REDACTED]

(Original signed by J. Allen Hynek)

NOTE

These comments are entirely Dr. Hynek's and
do not necessarily reflect the views of
the Air Force.

AIR INTELLIGENCE INFORMATION REPORT

SUBJECT FLYOB RPT		
AREA REPORTED ON Canandaigua Lake, Cannett Hill, New York	FROM (Agency) Wing Training and Operations Sampson AFB, N.Y.	
DATE OF REPORT 6 February 1953	DATE OF INFORMATION 29 November 1952	EVALUATION
PREPARED BY (Officer) DONALD L. MYERS, LT., USAF	SOURCE Letter from [REDACTED]	

REFERENCES (Control number, directive, previous report, etc., as applicable)

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112-Part II.)

1. This report contains information of the sighting of "Flares" in the vicinity of Canandaigua Lake from the peak of Gannett Hill.
2. [REDACTED] New York, and [REDACTED] Court, Rochester, New York visually sighted flares at 1700 hours, 23 November 1952.
3. Mr. [REDACTED] stated in letter form the observation of what appeared to be flares. Visibility was poor due to light rain, no stars were visible. An outline of South Hill on the east side of Canandaigua Lake could be seen. Above South Hill, slightly northeast of Canandaigua Lake (directly toward Sampson AFB or north of Sampson, a distance of approximately 25 miles) four stationary extremely bright white lights were sighted. Each light would last only a few seconds then disappear and be replaced by light displaced laterally and vertically. There were never more than four visible at once and never less than one.
4. Mr. [REDACTED] explained that the observation may have been caused by an optical illusion due to refraction of light rays, however as each bright white light disappeared the after image was a cluster of six or seven red lights which faded immediately like a vision persistency phenomena. Observing from arms length (26 inches) each cluster appeared to be a 3/64 inch diameter circle. An actual circle of lights appearing so big at 25 miles (approximate distance from Sampson AFB) would be tremendous. From arm's length these lights were vertically displaced up to two inches, which would indicate altitude. There was no apparent diffusion of light or reflection on clouds.
5. Mr. [REDACTED] estimated to have seen over one-thousand lights appear and disappear before he and Mr. [REDACTED] departed Gannett Hill. Upon descending no lights were seen. Upon ascending another hill near Canandaigua, New York, nothing unusual was seen.
6. Further details concerning above information were unknown to source.

UFO Observation, 19 November 1967

Mr. [REDACTED]

1. Reference the unidentified observation on 19 November 1967 by [REDACTED] of Duluth, Minnesota. Our records indicate that the 29th Air Division at Duluth International Airport, Minnesota forwarded your office soil samples and photographs of the area in which the observation occurred.
2. Request results of soil analysis, compaction comparison (if available) and copies of the photographs.

Major Hector Quintanilla, USAF
Chief, Aerial Phenomena Office
Aerospace Technologies Division
Dept. of the Air Force
Wright-Patterson Air Force Base, Ohio 45433

Dear Hector:

Pardon me for the enormous delay in responding to your letter of December 19, asking about the test of soil samples and photographs of the area in which an observation occurred near Duluth on November 19. We have arranged to do all of the testing of samples at one time - which is about now - so we haven't done anything yet on the samples. As soon as we have results, we'll send them along to you, together with copies of the photographs as you requested.

I must say that the soil samples don't look like much. In the first place, it would be totally impossible to do compaction tests, because the sample consists of what is essentially a bottle of non-adhering dust particles. The notion of compaction in that sample doesn't seem to apply at all, though we'll try to see if, after preliminary tests, there seems to be any reason to press on with anything more elaborate.

Best wishes.

Sincerely yours,

RJL/sl

1. The Aerial Phenomena Office is in receipt of an unidentified flying object (UFO) report which occurred on 19 November 1967, at 5:10 pm, CST, slightly west of Duluth. The object appeared as a double convex lens, metallic, about four feet in diameter and one foot thick.
2. Request information on whether you received any reports on this date. We would appreciate any comments on a possible cause for this observation.
3. Thank you for your assistance in this matter.

~~TRUE COPY~~
Rochester 9, New York
November 29, 1952

OFFICER IN CHARGE OF FLARES
SAMPSON AIR BASE
SAMPSON, N. Y.

Dear Sir:

It would please me very much if you would tell me if a very large number of Flares were dropped near Sampson, Sunday evening, November 23, 1952. Here is why:

On that evening at 5 pm, the writer, ~~H. [redacted]~~, Rochester 9, N. Y., and ~~Carl [redacted]~~, ~~[redacted]~~, stopped deer hunting with bow and arrow and came out of the woods on the highest peak of Gannett Hill, west of Canandaigua Lake.

No stars were visible. It was raining lightly and visibility was poor, but we could see the outline of South Hill on the East side of Canandaigua Lake. Above South Hill were four extremely bright white lights. By compass they were slightly north of east, or directly toward Sampson, or even north of Sampson.

They looked like bright flares but did not appear to descend or move at all while lighted. Each light would last only a few seconds and disappear to be replaced soon afterwards by another light displaced laterally and vertically. There were never more than 4 visible at once and never less than 1.

But other things about them did not resemble flares. It may have been an optical illusion due to refraction of light rays, but as each bright white light disappeared, the after image, which faded immediately like a vision persistency phenomena, was not a single red light but a cluster of 6 or 7 red lights. Each cluster appeared like a $3/64$ inch diameter circle or arm's length, say 26 inches away. An actual circle of lights were displaced vertically up to 2 inches at arm's length, which would be a big difference in altitude at 25 miles to Sampson, for flares to be dropped. Also there was no apparent diffusion of light or reflection on clouds as you expect to see from flares.

I would estimate that we observed over a thousand lights come and go before we left Gannett Hill. On descending we could not see the lights. On ascending another hill near Canandaigua, we could see nothing unusual.

Please advise if we were watching normal phenomena, because we have other impressions obtained from the study which are useless and embarrassing to relate, if we were viewing a mere scattering of flares.

Yours very truly,

A CERTIFIED TRUE COPY

SPOT INTELLIGENCE REPORT

SUBJECT: Unidentified Aerial Objects
over Glendale, California,
24 November 1952, 1548 hours,
~~Informant~~

TO: Director of Special Investigations
Headquarters United States Air Force
Washington 25, D. C.

DOWNGRADED AT 3 YEAR INTERVALS
DECLASSIFIED AFTER 13 YEARS
DO NOT RECLASSIFY

1. SYNOPSIS: At approximately 1548 hours, 24 November 1952, Mr. ~~Informant~~ observed four unidentified aerial objects flying in formation over East Glendale, California, near the Grand Central Air Terminal. The objects were described as spherical in shape, size unknown, emanating light of their own, color dull gray aluminum, and were travelling from the northwest at a low altitude of approximately 2000 feet on a course of southward at approximately 200 miles per hour. Local weather conditions were unusually clear and observation of these spheres occurred over a one minute period of time. Their shape seemed to change from a spherical to a flattened or elliptical shape, disappearing from view over the city of Glendale near the Verdugo Mountains at a very high rate of speed. The movement of the spheres were noiseless. The observation was corroborated by Mr. ~~Informant~~ aircraft inspector, and another co-worker at Timm Industries, ~~Informant~~ Road, Los Angeles, the place of the observation. Informant did not believe these flying objects were weather balloons, meteorites, or reflection of searchlights.

2. DETAILS: Information pertinent to this matter was furnished by the informant to the Los Angeles office of the Federal Bureau of Investigation, and to this office, by letter, the body of which is quoted below:

"At approximately 3:48 P.M., Monday, Nov. 24, 1952, as I sat in my car, parked on Sperry St., beside the plant of Timm Industries, Inc., 5245 San Fernando Road, Los Angeles, I saw four

spherical objects approaching from the northwest at an altitude I could not estimate, though my first impression was that they were not much over 2000 feet high, and were fairly close (about two miles). The day was unusually clear, and the spheres were either emanating light of their own, or else the bright western sun was reflected on their sides as they cruised in formation in a direction which appeared generally eastward or southeastward. One sphere was flying out in front of the other three which were about equally spaced from each other. As they passed in front of me in an easterly direction an Air Force two-engine bomber crossed in front of me in a westerly direction, and between me and the spheres, and at the moment when the bomber and the spheres appeared to meet and pass I would estimate the bomber to have been only about fifteen seconds flying time from the Grand Central Air Terminal (although it was not descending for a landing there), and its altitude at about 1500 feet. If the pilot, or anyone on the right side of the bomber had been looking in the direction of the spheres they could not have missed seeing them, but the plane continued steadily toward the west. From where I stood, the spheres (all apparently identical in size) each appeared to be about as large as a nacelle on this bomber, but since the spheres were above the crest line of the Verdugo Mts. I cannot even guess their actual size.

I got out of my car, keeping the spheres in sight all the time, and soon after the apparent meeting of the bomber and the spheres, which were almost due north of me at that moment, the spheres seemed to change shape slightly and appear somewhat flattened or elliptical in shape. They seemed now to diminish in brilliance and size (probably due to a very slight haze in the north and northeast and also the rapidly increasing distance between me and the spheres), and turned somewhat northeasterly in direction and disappeared above Glendale and the Verdugo Mts., in a burst of speed so great that it seemed as though they practically melted into thin air. I could not distinguish any exhaust, nor was there anything like a vapor trail. Their movement was noiseless as far as I could determine, but the noise of the bomber could have drowned out any noise from the spheres while it was in my vicinity. The color of the spheres was gray, and duller than aluminum, though they seemed to have a peculiar lustre. Although the spheres were plainly visible I could not discern any detail, such as windows, exhaust ports, or any kind of power plant. If there were windows, or other details, they were too distant for me to distinguish. When I first saw them

9 December 1952

the spheres appeared to be cruising at about 200 miles per hour, but since I could not make a careful or reasonable estimate of their altitude or size it is impossible to guess what their actual speed was. The sighting lasted approximately one minute.

This sighting was corroborated by ~~CONFIDENTIAL~~, an aircraft inspector, and another man, both of whom work, as I do, at Timm Industries. Several of us watched for a few minutes, but the "unidentified objects" did not return, or at least we did not see them again. I immediately reported the sighting to the F.B.I., and they said they would notify the Air Force at once. I am taking the liberty of making this full, written report to your office for your information and records.

It was impossible for these spheres to have been weather balloons, because of the tremendous speed with which they disappeared. I have seen weather balloons, meteors, countless numbers of meteorites, fantastic displays of the aurora borealis, and various other strange astronomical phenomena, and this sighting could not possibly be confused with such phenomena, nor could it have had anything to do with light reflected from objects moving on the ground or in the air, or with vague "blobs" of light caused by a contact of layers of air of different temperatures. I have been watching the skies for forty years from Canada to Mexico, and from coast to coast, but this is the first time I have ever seen anything that could be definitely put in the so-called "flying saucer" category."

3. ACTION: This incident is being made a matter of record and furnished your Headquarters for your information.

U. S. AIR FORCE TECHNICAL INFORMATION SHEET

This questionnaire has been prepared so that you can give the U. S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes, and will be regarded as confidential material. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that, if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

24 11 1952
Day Month Year

2. Time of day: 3 48
Hour Minutes

(Circle One): A.M. or P.M.

3. Time zone:

(Circle One): a. Eastern
b. Central
c. Mountain
 d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
 b. Standard

4. Where were you when you saw the object?

~~_____~~ Los Angeles California
Nearest City or Town State or Country

Additional remarks: Just as on the Sperry St. side (north side) of
Timon Industries, Inc. plant.

5. Estimate how long you saw the object.

_____ 1 _____
Hours Minutes Seconds

5.1 Circle one of the following to indicate how certain you are of your answer to Question 5.

a. Certain
 b. Fairly certain

c. Not very sure
d. Just a guess

6. What was the condition of the sky?

(Circle One): a. Bright daylight
b. Dull daylight
c. Bright twilight

d. Just a trace of daylight
e. No trace of daylight
f. Don't remember

7. IF you saw the object during DAYLIGHT, TWILIGHT, or DAWN, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
 b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

8. IF you saw the object at NIGHT, TWILIGHT, or DAWN, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight — pitch dark
- d. Don't remember

9. Was the object brighter than the background of the sky?

(Circle One):

a. Yes

b. No

c. Don't remember

10. IF it was BRIGHTER THAN the sky background, was the brightness like that of an automobile headlight?:

(Circle One) a. A mile or more away (a distant car)?

b. Several blocks away?
