What we do?

Education

GLAM

Outreach (diversity, wikidata..)

How we do it?

Education

- Collaboration with schools

Most successful events are

- Workshops about school subjects
- WikiClubs

What works for us:

- Talking with teachers on how to get Wikipedia on their weekly education plan
- Organize a Wikipedia workshop every time the class had a “Free Class” or when they had a “research” homework
- We visit a Museum with students/pupils, then a workshop about the museum objects/history
- We visit Public Libraries
- Workshop where students meet and work with librarians

What is not working for us:

- 2 UG in Albania, hard to get a permission from Ministry of Education without monopolizing the project, a lot of logistics.
- Long term contributors, after they finish high school.

How we do it?

GLAM

- Collaboration with GLAM institutions

Most successful events are:

- International campaigns
- Photo walks (groups and individuals)

What works for us:

Not organizing international campaigns, Wiki Loves..every year.

Doing group and individual photowalks for the monuments/views that are not in commons yet

What is not working for us:

Getting permission for donated pictures/data from public institutions

Main reason - lack of CC license knowledge on their part

How do we sustain Wiki Clubs?

- School Building Community: Increasing the Wikipedia awareness and sense of community among Wikiclubs
- Content creation and improvement
- Setting specific goals for content creation and improvement by aligning them with school objectives

2023 statistics (only during trackable events): for both countries:
