- 1(h) Three hits were registered in this area, one building was seen to explode as a result of Lt(jg) W. M. KNOBLES, USNR, accurate bombing.
- 4(h) A near miss on this target is credited to Lt(jg) C.R. MESTER, USNR on this target.

* Refer JICPOA Bulletin No. 80-44
Targets WA-2;02, 34, 05, 27

(p) Were Photographs Taken? Yes, forwarded with photographic assessment.

Photographs of Damage, When Taken, Should Be Attached By Staple.

⁽o) RESULTS: (For all hits claimed on ship targets and for land targets of special interest, draw diagram, top or side view or both, as appropriate, showing type and location of hits. For all targets give location and effect of hits, and identify by numbers above. Use additional sheets if necessary).

OPERATIONAL

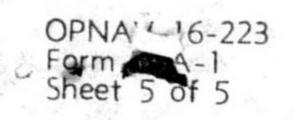

Navigation Homing Rendezvous Recognition, Ships Communications Flight Operations Search and Tracking Base Operations Maintenance

Targets were located visually with difficulty due to the atoll's natural topography and make up. The attack group, composed of 12 VF, 14 VB and 9 VT approached the target area from the northwest at an altitude of 10,000 ft, using evasive tactics during the approach. A high speed break-up was made over the lagoon and 70° dives were made. The release altitude was 3000 ft and recovery was made at 1500 ft. A little strafing was done during the dive. Retirement from the target area was made in all cases in a direction normal to the beach. Evasive tactics were employed during retirement, and rendezvous of the group was made ten miles north of Toki Point.

Extensive use of revetments and sand covering and wovered buildings.

It is felt that the photos provided for this strike were very poor and positive target identification very difficult as a result. Photos taken by VFP-94 planes were excellent and if our squadrons had possessed photos as good as these, results would have been much better.

Satisfactory.

Satisfactory. 3 Bombs not dropped on target area dut to pilot error.
