

SITUATION

- **NARI** made landfall near Da Nang city on 14 Oct as a Typhoon. Heavy rainfall (221mm in 24h) and strong winds caused extended damage in roads and houses. As of 12:00 UTC on 15 Oct, 5 deaths were reported. Prior to landfall, 123 000 people were evacuated, mostly in Da Nang and Quang Nam. provinces. ([CCFSC](#), [MONRE](#), [AFP](#))
- On 15 and 16 Oct, **NARI**, weakened to a Tropical Depression, is expected to move over southern Lao PDR and eastern Thailand, affecting these areas with heavy rainfall. ([GDACS](#))
- At 06:00 UTC on 15 Oct, **WIPHA** was a Typhoon (max. sust. winds of 148 km/h) and its centre was located 900 km SW of Tokyo (Japan). It is forecasted to move NE, weakening slightly, and possibly passing close/over SE Honshu, near Tokyo, late on 15 Oct (UTC).
- Strong winds and heavy rains might affect parts of SE Honshu on 15-16 Oct. JRC calculations indicate a possible storm surge of the order of 0.8 m in the coastal area near Asahi, east of Tokyo (Japan) for 15 Oct evening (UTC) ([GDACS](#), [JMA](#), [AFP](#)).
- At 00:12 UTC on 15 Oct, an **earthquake** of magnitude 7.1M at a depth of 20 km hit Bohol island (Central Visayas). ([GDACS](#))
- **USGS-PAGER** indicates shaking of up to "**Severe**" for 185 000 people. No significant tsunami risk was posed by this earthquake; JRC calculations indicate a max. height of around 0.3m in Guindulman.
- As of 10:00 UTC on 15 Oct, according to the **NDRRMC**, casualties and damages are as follows:
- 67 dead (Bohol 57, Cebu 9, Siquijor 1), 164 injured; 9 150 evacuated in Bohol in 13 evacuation centres; total number of affected people 444 714; damaged roads, bridges, hospitals, ports, municipal buildings; power outages still in Bohol; All airports and most ports have resumed operations; one hospital severely damaged in Cebu, rescue in progress.
