1 July 1948

SUBJECT: Special Report on Procurement of Lumber Products

TO: Commanding General
I Corps
APO 301
Attn: Military Government Section

1. During interviews with lumber manufacturers in this prefecture, it has come to the attention of this headquarters that the unstable financial condition of such producers has been further intensified by uncertainty as to the planned and actual production requirements for procurement demand. Producers report that, since the transfer of such procurement administration from the Agriculture & Forestry Ministry to the Special Procurement Board, they have been unable to secure valid forecasts of future requirements, confirming orders for production previously directed and shipping instructions for stockpiles on hand.

2. A specific instance cited is as follows:

a. The Maroudai Moke K. K., Takayama City, Gifu Prefecture, was advised in December 1947 by the Agriculture & Forestry Ministry to prepare for large orders of plywood. Allocations of glue and other materials were made and the company invested in the raw materials for increased requirements.

b. In March 1948, the Special Procurement Board advised the company to prepare for orders totalling 18,000 sheets of plywood during the summer months. The company planned its production accordingly.

c. To date the only order received is Procurement Demand JPSY 1717, totalling 7,300 sheets of plywood for delivery from June to August. The company has been unsuccessful in efforts to determine whether further orders will be forthcoming and, if so, when. Based on the March forecast, the company is prepared to deliver 8,000 sheets at once and has additional production schedules established.

3. In view of the adverse financial straits in which most lumber producers are at the present time, due primarily to high cost factors and slow turnover because of transportation shortages and allocation difficulties, it is believed to be essential that government procurement agencies render the maximum assistance in providing the following:

Report Control Symbol 48/Z/IR/3

GHGT 091.44 1 July 1948
Subject: Special Report on Procurement of Lumber Products

a. Accurate forecast of future requirements on a periodic basis.

b. Prompt notification of producers when forecast amounts will not be required as specified.

c. Placing of orders to eliminate the growth of loss-producing stockpiles and to insure reasonable turnover for producers.

d. Releasing of forecast stocks for the general market when they are not required for procurement demand, thus enabling producers to manage a profitable turnover.

4. It is recommended that such a policy be presented to the Special Procurement Board and requested that this headquarters be advised of any policy which will be of value in instructing local producers.
