

Park's High-Class Dutch Bulbs In Choice Collections.

Park's Window Collection of Bulbs For Poting in Autumn.

er by meil for \$2.90. Or, half of the col-lection 1 will mail for only \$1.00. With every package 1 will include cultural directions. The variety of this collection is limited, because I do not wish to include pulbs that are likely to prove disprointing. Such things as Double Tailps, Crocuses, Achimenes and Gloximas, though partially successful in the hands of the skillful amateur, are nearly always failures as winter-blooming plants, and I do not recommend them as such.

- 6 Single named Hyacinths, various colors.
 4 Double named Hyacinths, various colors.
 6 Roman Hyacinths, various colors.
 6 Single named Tullps, various colors.
 4 Trum et Mercisus, various colors.
 4 Polyanthus Marcissus, various colors.

- 2 Double Narcisson, various colors. 2 Chinese Sacred Lilies, golden, and white. 4 Campernette Jonguils.
- Allium Neapolitanum.
- 2 Babianas, assurted.
- Pine Callas.
 Fine Freesias.
- 2 Winter-flowering Gladiolus.
- 6 Spanish Iris, mixed.

- 4 Ixias, mixed. 4 Ornithogalum.
- 2 Oxalis, in variety.
- Kanunculus, assorted colors.
- 2 Sparans, assorted colors.
- 2 Bermuda Easter Lilies, large bulbs.

I offer a splendid collection of Choice

Bulbs for winter-blooming in windowpots. The entire collection I will deliv-

- 2 Zephyranthes, assorted. 2 Arums, red and black Callas.
- 2 Brodiæas, mixea colors.
- 2 Calochortus, mixed colors.
- 4 Chionodoxa giganteum. 2 Fritillaria meleagris.

2 Large-flowered Day Lilies.

2 Hemerocallis flava. 2 Variegated Gladioli.

2 Hyacinthus candicans.

- 4 Scille Siberica.
- 4 Triteleia uniflora.
- 2 California Hyacinths.

100 balbs, delivered by mail, all for \$2.00, or half the collection, 50 bulbs, \$1.00. No change will be made in these collections. Do not ask it.

Park's Garden Collection of Bulbs

For Planting out in Autumn.

I offer a very fine collection of hardy bulbs for autumn planting in beds or bor-ders. These bulbs are all large and sound, a id will give good satisfaction. The price ction,

order.

s low, for the lot, notwith tanding the	high quity of the pulbs. The entire colle
letivered by may, 2.1. Half-collection,	\$1.00. Cultural directions accompany each
0 Single named Hyminths.	4 Erarthus.
a Double named fly. ci ths.	6 Grope and Feathered Hyacinths.
10 Single Early named Tulips.	6 Iris, assorted.
6 Single mixed Tulips.	6 Lily of the Valley, single crowns.
8 Double and Parret Tulips.	2 Chinese Pæonies.
6 Late Tunps.	6 Sellas in variety.
6 Large Trumpet Narcissus, mixed.	4 Spowflakes.
f Small Trump t Narcissus.	6 Giant Snowdrops.
6 Double Narcissas, mixed.	6 Triteleias.
4 Jongulia.	4 Lilies, assorted.

4 Hardy Altiums.	4 Puschkinia scilloides.

- 4 Hardy Alliums.
- 6 Anemones.
- 2 Camassia esculenta. 6 Chionodoxa girantea.
- 2 Bleeding flearts.

These 200 splendid hardy bulbs will be delivered by mail for \$2.00. Or, half the collection, 106 bulbs, 1.00. No change allowed. Address all orders to

GEO. W. PARK, La Park, Lancaster Co., Pa.

THE MOST BEAUTIFUL TULIPS

I offer, for 15 cents, a collection of the brightest and best single, early-flowering Tulips-10 splendid named sorts, representing all colors, as follows:

Artus, bright crimson-scarlet. Adeline, dark rose, new and fine. Bizard Pronkert, scarlet, striped yellow. Bizard Pronkert, scarlet, striped yellow. Grand Duc de Russia, rosy purple, faked white. Grand Duc de Orange, yellow, famed scarlet. Joost van Vondel, cherry red, feathered white. Rosamundi Huyckman, carmine pink, flamed white. Queen Victoria, fine white, faintly tinted rose. Vander Neer, rich claret purple. Yellow Prince, bright yellow, large and fine.

These are all fine blooming-sized bulbs, imported from They are of the best varieties known, unsur-Holland. passed either for house or garden culture. The entire collection, 10 bulbs, mailed for only 15 cents.

Get up a club.—For each additional collection ordered I will send a bulb selected from the Double and Parrot collection named below. Or, for \$1.00 I will send seven collections of the above single early Tulips, enough for a gorgeous bed, and add an entire collection of the Double and Parrot Tulips (7 bulbs) offered.

DOUBLE AND PARROT TULIPS.

ba Maxima. new, pure white, very large and double; a splendid sort. Alba Lady Grandison, vermilion scarlet, extra, dcuble. Count Leicester, orange and yellow ; double.

Purple, bordered white, a showy double Tulip. Admiral de Constantinople, Parrot, dark red. Lutea Major, Parrot, bright yellow. Perfecta, red and yellow, striped.

The above collection of brilliant Double and Parrot Tulips, 7 bulbs, mailed for 15 cents, or seven collections, enough for a fine bed, for \$1.00. All are hardy, and very showy in garden groups. They are not suitable for house culture. They will be ready to mail the latter part of September. Order early, and the bulbs will be sent you as soon as ready. Address

GEO. W. PARK, La Park, Lancaster Co., Pa.

The Orchid-flowering Spanish Iris.

A splendid collection of ten named sorts, embracing all colors, together with trial of PARK'S FLORAL MAGAZINE, all for TEN CENTS.

Few persons have any idea of the beauty of a clump or bed of the fine varieties of Spanish Iris. The plants are hardy, bloom freely, and show large, rich-colored, very attractive flowers. I am anxious to have these exquisite named Iris given a trial, and also to introduce the Magazine into many new homes, so make the following offer: For only 10 cents I will send the 10 fine named Spanish Iris, including trial of Park's Floral Magazine. If already a subscriber send the Magazine as a present to some flower-loving friend, or add some bulb to your order instead. Here is the list: Here is the list:

Light Blue, Philomela, exquisite flowers. Dark Blue, Alexander von Humbold. Light Yellow, William III, fine variety. Light Bronze, Le Prophete, yellowish. Dight Bilde, i infoliera, Auftarte fibereta Dark Bilee, Alexander von Humboldt. Light Yellow, Chrysolora, large, early. Dark Yellow, William III, fine variety Light Bronze, Le Prophete, yellowish.

2c.

6c.

8c. 15c.

R All of these splendid named Orchid-flowering Iris, 10 bulbs, with trial Magazine, 10 cents. Or, if you get up a club of ten names, (\$1.00), I will send a collection free for your trouble. Only a few thousand collections on hand. Order now. This advertisement will not appear often. Address

GEO. W. PARK, La Park, Lanc. Co., Pa.

POTFULS OF NARCISSUS.

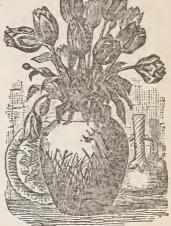

New Emperor, giant yellow flowers 10c. Pallidus Præcox, clear sulphur white, 6c. Barri conspicuus, canary, scarlet edged cup, 8c. Double Roman, double, yellow, clustered, 4c.

Double Daffodil, golden yellow flowers, Soliel d' Or, golden yellow, clustered, Pearl, pure white, equal to Joss flower, Three Choice Narcissus, our selection,

The Ten Choice named bulbs, value 59 cents. The entire collection, value 59 cents, only 35 cents, if ordered this month. If two collections are ordered I will add one bulb of the beau-tiful New Victoria Narcissus, value 15 cents. Get your neighbor to club with you. Order this month.

GEO. W. PARK, La Park, Lanc. Co., Pa.

YOU ARE TO Be The Judge

You are to be the one to say whether it is or it isn't? whether you will or you won't; whether we are right or wrong. We leave it to you entirely for you to decide. The only eridence we want to submit is a full-sized \$1.00 package of Vitae-Ore, which package we want you to try at our risk.

Ore, which package we want you to try at our risk. All ne osk is a fair verdict. We say that Vitae-Ore will cure you, that one package used by you will prove it to be The Remedy for your case and condition. If it does not, YOU TO BE THE JUDGE, we want NOTHING from you.

PARK'S FLORAL MAGAZINE.

A MONTHLY JOURNAL OF FLORICULTURE.

Vol. XXXIX.

November, 1903.

No. 11.

IN THE DAYLIGHT.

Now comes the day-light, and the clover leaflets Are open in the sun; The evening Primrose, smiling till the morning, And saucy Catch-fly, bee and insect scorning, Like some vain belles, who dance from dark till dawner.

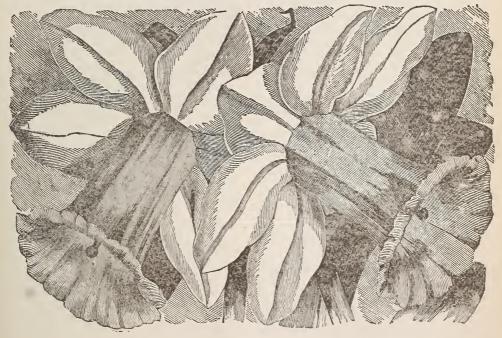

dawning, Close their petals, one by one, And sleep till set of sun.

Ina Lord McDavitt. Vineland, N. J., Sept. 1, 1903.

QUEEN VICTORIA DAFFODIL.

HE New Queen Victoria Daffodil is one of the most beautiful of the large-trumpet varieties. The flowers are of the largest size, the divisions of the perianth being the bulbs has kept the price high there, none being offered by dealers for less than thirty cents each. In this country this year fine bulbs may be purchased at fifteen cents each, a price that ought to make it popular. The plant is vigorous in growth and bears two or more of its huge, attractive flowers. It is perfectly hardy, and can be bedded out with safety at any time before the ground freezes, the soil being well impacted by treading after the bulb is covered. Once established the plant will take care of itself, and bloom freely for many years.

Sun for Hardy Bulbs .- Tulips like an open, sunny situation, and porous, well-drain-

FLOWERS OF THE NEW QUEEN VICTORIA DAFFODIL.

broad and overlapping, and pure white in color, while the long, bold trumpet is gracefully recurved at the margin, and is a clear, golden yellow. The form is fairly indicated in the accompanying engraving.

This grand Narcissus is greatly admired in England, and has been awarded a first class certificate by the Royal Horticultural Society, also by Botanic Societies, and the demand for

ed soil. In a shady place and tenacious soil the bulbs will mostly bloom well the first season after planting, but will gradually disappear afterwards until none can be found. Wet seasons are especially hard upon Tulips, Hyacinths and other hardy bulbs, and if the conditions are unfavorable whole groups and beds of the bulbs will rot and fail to again appear.

Park's Floral Magazine.

A Monthly. Entirely Floral.

Geo. W. Park, Editor and Publisher. LAPARE, LANCASTER CO., PA.

CIRCULATION.—The actual circulation proven when required, is 375,000 copies monthly. No free distribution to promiscuous lists of names. Advertising offices 713-718 Temple Court, New York City, N. Y., The C. E. Ellis Company, Managers, to whom all communications about advertising should be addressed.

SUBSCRIPTION PRICE, 45 cents for five years, prepaid. Trial subscriptions of a year, 10 cents.

THE EDITOR invites correspondence with all who love and cultivate flowers.

Number of copies printed of Park's Floral Magazine, as indicated by press counters, for October, 376.730

Editorial.

Stephanotis.-Stephanotis floribunda is a hot-house evergreen climber from Madagascar. It has opposite, thick, leathery, glossy green leaves, and umbels of pure white, tubular, sweet-scented flowers. The plants may be found in bloom at almost any seaso 1 of the year, and the cut flowers are useful for bouquets, wreaths and vases. Cuttings of the half-ripened wood inserted in moist sand and kept close, will soon strike root, after which pot in a compost of peat, loam, leaf-mould and sand. Water freely, and syringe often during the summer. It is also well to sponge the leaves with soapy water, to keep them clean. If attacked by mealy-bug, which is partial to this plant, syringe with hot quassia-chips tea.

Remedy for Ants.—A correspondent of The Weekly Florists' Review writes, "A very effective remedy for ants on lawns is to mix granulated sugar with arsenic and then with fresh bread crumbs, and sprinkle around their nests. One application is generally sufficient. Having wanted something to clean ants from lawns myself, and trying a number of recipes, I submit the above for the benefit of others similarly afflicted. Mix the sugar and arsenic thoroughly first, then add the crumbs and mix again."

Blighted Begonias.—Some of the Begonias are occasionally attacked by a fungus, which spots and dries the leaves, and ruins the beauty of the plants. When the blight appears, the affected leaves should be removed and burned, and some flowers of sulphur applied and worked into the surface soil.

CULTURE OF POLYANTHUS NARCISSUS.

HE Dutch Polyanthus Narcissus are among the most desirable of all bulbs for window culture. When well developed they can be depended upon to grow and bloom, and the care they require is trivial. The clusters of bloom are as large as those of the well-known Sacred Lily, which is a Chinese variety of Polyanthus Narcissus bearing white flowers with a yellow cup. In many respects, however, they are to be preferred to the Sacred Lily, as the flowers are of various colors, and some also show double flowers in beautiful variegation. Following are some of the best named varieties:

Grand Monarque, pure white with citron cup; flowers large and handsome, and borne in large trusses.

Gloriosa, white with orange cup; large, splendid truss; free-blooming.

States General, creamy white with yellow cup; very fine.

Soliel d'Or, rich yellow with orange cup. This is the best companion for the Sacred Lily, as it bears golden flowers in fine trusses. It is the variety that should be known as "Golden Sacred Lily."

Large-flowered Faper White, a popular sort largely grown in the South of France and imported and used by florists to force for winter flowers. It is easily grown and a desirable sort. It has rather small bulbs but blooms freely.

Double Roman, also a French-grown bulb. It bears large trusses of double flowers, variegated white and yellow.

The flowers of Polyanthus Narcissus are all very showy and very fragrant. They are fine

for window decoration either in pots or glasses and in the South the bulbs are very satisfactory when bedded out. Set them five inches deep, and mulch after planting. Even as far north as Pennsyl-

DISH OF NARCISSUS. vania we have known large beds of these bulbs to bloom well for years, when left undisturbed.

In pots of soil the bulbs should be set so that the neck will protrude above the surface, and a dark, rather warm place should be provided for them till the roots develop, when they should be brought gradually to the light. Avoid a hot, dry atmosphere. Water liberally, and place in a sunny window when the buds are ready to develop. Keep cool and away from direct sunlight when in bloom.

In glasses or dishes of water the bulbs should be so placed that the tops will stand erect. Do not let the bulbs touch the water, or at least avoid constant immersion. The base should be near to the water, but rarely touching it. Add water occasionally to replenish that used by evaporation. The dishes or glasses should be given a dark closet till roots form, then bring them to the window and encourage the bulbs to grow and bloom. Some lumps of charcoal in the water will prevent it from becoming stale, if pure water is used.

108

NARCISSUS POETICUS. (See illustration on 1st Title Page.)

ERHAPS the hardiest and most common of the Daffodil family is Narcissus poeticus. It is a native of Southern Europe, and its introduction was so remote that the best informed authorities do not venture to predict the date. The flowers are mostly borne singly, on strong scapes, early in spring, and are very fragrant, two inches across, and pure white, with a cup-like centre tinged with red. The species is mostly known as Poet's Narcissus. It forms beautiful groups or marginal clumps, and is tenacious as well as handsome.

By the efforts of various Daffodil specialists the old form of Poet's Narcissus has been greatly improved. The variety known as N. poeticus poetarum has flowers from two and a half to three inches in diameter, and blooms earlier than the type. N. poeticus ornatus is a popular sort for forcing for Easter. The flowers are pure white with a large orange cup. N. poeticus stellaris is a late-flowered variety with narrow perianth divisions. N. poeticus Burbidgei is a fine sort with white flowers, the cup edged with scarlet. N. poeticus biflorus is a fine hybrid, each scape bearing two large, handsome flowers. N. poeticus flore pleno is the double gardenia-scented variety. All of these varieties are hardy, and deserve a place in every collection. The general form of the single hardy flowers is well shown in the engraving on first title page.

Staphylea trifolia.—This is a small native tree or shrub, commonly known as Bladdernut, because of its inflated, membranaceous, bladder-like capsules. Each leaf is composed of three leaflets, ovate, pointed, slightly hairy beneath, and has a stem and a toothed margin. The flowers are white, borne in drooping, compound racemes. The capsule is in three divisions, and holds from one to three bony seeds which appear as if cut off at the base. The tree is mostly found in damp, shady woods, from North Carolina northward to New York.

Tuberoses.—Tuberose clumps should be lifted early and the bulbs well dried and stored in a dry, warm room during winter. Pot early in spring the larger bulbs that have not yet bloomed, and water sparingly till growth begins, then freely. Avoid chills, and bed out when the weather becomes warm. A bulb that has once bloomed is mostly worthless for future use. The bulblets need several years of culture before they attain blooming size.

Ice Plant.—The seedlings of Ice Plant are liable to damp off if the ground is kept too moist, or the atmosphere too close. Like all succulents the Ice Plant resents a wet soil. When a tendency to damp off appears give less water and more air. It is better to sow the seeds in a box than in a bed, as the soil and atmosphere can thus be regulated by shifting.

CRINUM AND AMARYLLIS.

NE of the floral sisters has a plant which she does not know, but thinks it may be Amaryllis belladonna. It throws up leaves two feet long and two inches broad, and bears in August a cluster of delicately-scented flowers which are white with a rosy band through the center. She winters it in the cellar, giving it a little water occasionally, and it begins to grow in February. The person who gave her the bulb called it a South American Lily. The Editor would inform her that the doubtful plant is not Amaryllis belladonna. That plant loses its leaves every year, and when growth begins the flower scapes appear first. It is not uncommon to see several scapes of bloom before the foliage appears in spring. Most of the huge longnecked bulbs sold as South American Lilies at flower stores and by fakirs upon the city streets are of the Crinum family. There are many species of this genus, and all are natives of warm or tropical lands. They should not be dried off entirely during the resting period.

Sanseviera Zeylanica.—This is a succulent plant, and must be watered sparingly, especially during the resting period. It should be repotted once a year and the foliage kept clean by sponging. It will grow in a watertight pot, if judiciously watered, but it is better to give it good drainage and a porous soil. It will thrive out-doors in summer if given partial shade. It likes a warm, dry atmosphere, but is not easily chilled. It is propagated by cutting off and inserting the leaves in sand. One leaf will often start two or more plants. When a leaf is broken by accident it is always well to remove it and plantitinsand to the depth of an inch or more. The plants rarely bloom till several years old.

Gloxinias.—On the approach of winter dry off Gloxinias and keep them in a dry room at a temperature of 50° until spring, then repot them in fresh soil, water, and encourage growth. Do not water or start growth before repotting, as to remove the new fibrous roots would prove injurious to them.

Spotted Calla.—The tubers which develop upon the sides of the Spotted Calla may remain on for two years, or may be removed, as desired. Bedded out in a sunny place in summer and well mulched with stable litter as the heated term approaches, this plant blooms freely.

Starting Geraniums.—Geranium cuttings turn black and damp off when put in clay soil and kept constantly wet. The best starting material is fresh sharp sand kept well moistened.

Ammonia.—Spirits of ammonia is a liquid useful as a fertilizer. Add a tea-spoonful to three quarts of water used in watering. Apply once a week—not oftener.

CELASTRUS AND SOLANUM.

ELASTRUS scandens is a handsome shrubby native vine found in thickets and in brakes throughout the Northern States. The trunk is very pliable, and is readily twisted to assume any desired shape. The growth is rapid and the panicles of bloom are succeeded by clusters of showy orange fruits in autumn. These burst open when touched by frost, and reveal bright scarlet seeds. These clusters often hang on the vine and are ornamental throughout the winter. The common name is Staff Tree, but it is often called Bittersweet. It belongs to the Order Celastracer, and is a near relative of Euonymus Americana, or Spindle-tree.

Solanum dulcamara is a vine from Southern Europe which has escaped cultivation and is frequently found growing along old fence rows. It has purple flowers which resemble those of the garden Tomato, and the clusters of scarlet berries, about the size of currants filled with numerous small seeds, appear later.

The plant is a hardy perennial of trailing habit, and is suitable for a trellis, or for covering an old fence or low buildings. It belongs to the Night-shade family, Solanaceæ.

Chrysanthemum Rust.—A subscriber from Maryland complains of a rust or blight which affects her Chrysanthemums when the buds are ready to open. It appears first as spots upon the under side of the lower leaves and from there spreads until the foliage is brown and lifeless. It has ruined all of her plants, both of greenhouse and garden varieties, and she asks for a remedy. It is possible that spraying the plants with bordeaux mixture would be found beneficial. An addition of flowers of sulphur to the potting soil might prove useful, as also an application stirred into the surface soil about the garden plants. The disease is evidently a fungus, and spreads by spores. It would be well to gather infected leaves and burn them as fast as they appear.

Umbrella Plant.—The Umbrella Plant, Cyperus alternifolius, should be sparingly watered during winter and kept in a cool, but frost-proof place till spring. The need of rest is indicated by the fading of the leaves in late autunm. In the spring cut off the old tops, repot in rich, well-drained soil, and keep well watered. If drainage is good there is little danger of watering to liberally. The plants are readily propagated from seeds, and when well-grown are graceful and beautiful for window decoration.

Nicotiana.—Nicotiana affinis that bloomed during the summer can be lifted, potted, its tops cut back, and a new growth encouraged for winter-blooming. The roots may also be kept over winter in the cellar and bedded out in the spring. In a mild climate the plant is hardy, and even as far north as New York it is hardy when planted in a sheltered place and given some protection during winter.

OXALIS AND RUMEX.

XALIS acetosella is the white or true Wood-sorrel. It has clover-like leaves and rather showy, five-petaled flowers, followed by somewhat egg-shaped capsules with five cavities each containing one or two seeds. It is one of two hundred and fifty species of Oxalis, most of which are natives of tropical regions. The genera belongs to the

Geranium fan ilv. Rumex acetosella is another plant often called Field or Sneep-sorrel, and on account of the specific and common names is sometimes confounded with the Oxalis. It is altogether different in character, as well as appearance. and belongs to a different Order-Polygonaceæ. It is a near elative of the Sour Dock, and has arrow-life leaves, which are very acid, and erect pan. id racemes of greenishred flowers. It is meanly found in old spouty fields, and is often called Horse-sorrel. Where it is found the land contains too much acidity to be fertile, and we farmer usually regards its appearance as a sign that an alkaline application, such as lime or potash, will be beneficial. It is a farm weed, but is not generally difficult to eradicate.

Snowdrops.—The earliest of our spring flowers are the Snewdrops. Almost before the snow is gone the little greenish white buds

appear and develop into exquisite little flowers rivaling the color and purity of the driven snow. The bulbs are perfectly hardy,

and should be planted in autumn. They may be inserted in clumps among the grass upon the lawn, or set in the margin of the garden bed or border. Elwees Giant Snowdrop is one of the most showy, but the common single and double sorts are earlier, and always admirable.

Platycodon.—This hardy perennial often is known as Wahlenbergia, and oftener as Campanula Mariesi. It is easily grown from seeds, and bears showy and beautiful blue and white flowers. The plants are tenacious, and when once started will hold their place for years. It should be in every collection.

White Daffodil.—A very handsome hardy white Daffodil is N. pallidus præcox. The color is not a clear white, but rather a pleasing sulphur white. The flower is large and graceful and has twisted perianth segments, and a handsome, serrated trumpet. It is a desirable and worthy variety.

Spring Flowers.—Don't fail to plant a bed of hardy bulbs this autumn. The flowers will delight you in early spring, almost as soon as the snows disappear. With these bulbs you are sure of success.

Cacti and Odd Plants.

ODDITIES IN CACTI.

WISH I were artist enough to draw a picture of a Cactus which I received under the name of Brain Cactus. I think it is a contorted form of Echinocactus Simpsonii. The spines are yellowish and white with a red line through the center of any lenghthened part and a red spot in the center of any round part. It is very beautiful to a Cactus admirer. Another oddity is Cereus formosus monstrosus which I have grafted, and it does extremely well, as well as on its own roots. Its fine yellow spines render it more attractive than Cereus Peruvianus, whi h rivals it closely in its curious, coxcomblike nanner of growth. A handsome and desirable Cereus, and one which retains its beautiful blue color well, is Cereus Hankeanus. Still another curious plant of another family is Opuntia Ursina, which, with its long white hairs, reminds one of Pilocereus senilis, which latter is acknowledged by all to be one of the principal curiosities of Nature's king-Mrs. H. A. L. dom.

Queens Co., N. Y.

Mammillarias .- It is a mistake to suppose that the Mammillarias are all small, as my Mammillaria nogalensis weighs several pounds, and with its interlacing yellow and white spines is very pretty. If a person cares for yellow spines let them choose M. erecta and M. eriacantha. M. elegans nivea is a marvel of white daintiness, and let its com-panion be M. lasiacantha. M. macromeris or Button Cactus is both curious and pretty-one of my plants having two distinct centers with new growth of snow-white spines. M. decepiens is not a handsome plant, but is desirable on account of its large, clear, lemon-colored blossoms, which are quite lasting. The blooms of many of this species such as M. applanata are insignificant, but are followed by a beautiful red berry or seed pod which brightens a whole collection. Many have longer spines and large pink flowers. A collection of Mammillarias alone is very at-tractive. Mrs. H. A. L.

Queens Co., N. Y.

Cane Cactus.—I have a Cactus which is an inch and a half in circumference, and eight feet tall. I train it in rings and arches, and any way I want to. It is a curiosity to very many people. The bloom is as large as a saucer. We call it the Cane Cactus. I do not know the proper name. A Flower Lover.

Montgomery Co., Ind., Nov. 18, 1902.

[ANS.-The Cactus described is probably the Nightblooming Cereus -C. grandiflorus. The stock is usually fine-ribbed, and the flowers nocturnal, large, pearl white, with yellow sepals. Cereus triangularus is somewhat similar, but having a three-ribbed stalk, prickly bristles, and large white flowers with green sepals.-ED.]

Floral Miscellany.

SUNDRY HINTS ON PLANT CUL-TURE.

AVING lost many small plants by reason of the furnace heat in the house drying out the soil in two and three inch pots, the plan is now followed of placing three thumb pots in a four-inch saucer and keeping a supply of water there.

A pudding dish six inches in diameter, filled with moist sand serves for starting about two dozen slips at one time, and is very manageable and interesting.

Colors may be sorted out in a bed of mixed Tulips or Gladioli by clipping a leaf aslant for red, straight across for white, arrow shape for pink, notched for something else, etc. A little ingenuity will provide a distinct mark for every sort that is to be separated when lifting time comes.

Among many hardy Roses, Gabriel Luizet, pink, Margaret Dickson, white, Paul Neyron, large pink, are the finest in the bed. The best effect is produced by half a dozen or more of one sort together. The rose bed does well to be permanent, with a clay subsoil and fertile loam on top. With some care, Tulips, Gladioli and Asters can be planted in the rose bed, and make it a beauty through the whole season, and the necessary cultivation will prove beneficial.

A small vegetable garden hedged with Pæonies and Sweet Briar Roses on one side and Currants and Chrysanthemums on the curve of the other side seems to encourage the early Peas and the Lettuce to greater luxuriance.

A box of road-sand sunk on the north side of the house to get only the morning sun, is a good place to start slips in summer time. When the vigor of the plant is all going to leaf formation it is not so good a time to make slips as before or after. Leaving the half-cut slip hang for a week before detaching and planting, will make a strike of roots more certain.

Hardy shrubs can be propagated by slips quite generally, but root division gives a larger plant more quickly.

For removing from rose shoots their devouring swarms of green aphis, try a small flat varnish brush to sweep them off.

Domine.

Indiana Co., Pa., Nov. 25, 1902.

Plumbago in California.—There is a very luxuriant vine, with sky blue flowers growing in clusters, which one sees everywhere here. I admired it greatly and secretly until someone spoke of it as the Plumbago. Well! Have I not raised the Plumbago in a pot at home, and did I not think it a noble plant when it attained a foot or two high. It will completely cover a porch here, and climb twelve or fifteen feet, while it is one mass of bloom. Georgina Townsend.

Los Angeles Co., Cal.

Floral Poetry.

DEAD GRASSES.

Only a summer ago, When the season of bloom was young. Woved by the sun's kindly glow, Into beanty and grace they sprung; Now they are bleached and whitened By the winter s trest and snow, Yet the bare brown earth they brightened Only a summer ago.

ret lovely they are, though the fingers Of Time leaves them faded and sere, For all of their gracefulness lingers, A'l of their beauty is there-Delicate fliry like beauty, Which orings once again to my sight Visions of nooks by t.elrockside, Visions of pale moonlight.

Where the plumes of feathery lightness Wave spectral and white, they seem Pale ghosts, which speak of the brightness Ot beautiful sammar's goy dream; Of beautiful samiler's bey dream; Of days running over with gladness, Now vanishel beyond recall, And they tell with elequent sodness Life's winter comes soon to us all.

And we, with the grace of the grasses, Must bow our heads to the storm, And bend 'neath the blast as it passes, Nor suffer our souls to deform. And when all life's sorrows are lightened, And the storms are all weathered at last. The scul shall in beauty be heightened After the winter is past.

Okla. Co., Okla.

Etta Dimmick Goodwin.

~~~~~ POPPIES.

Oh, weave me a garland of Poppies, dear, White Poppies, to make me sleep; For brain and heart are a-weary, dear,

As ever the watch I keep.

Sometimes I am strong as an eagle young, But today my sadness is deep.

Somtimes I can see in the Promised Land The gift of all thing I desire, And I buoyantly joarney the livelong day,

My soul sustained by its fire;

But now ob weave me a garland of sleep. For the way grows dim, and I tire!

Oh, Poppies of sleep and of breathless ease, Shelter my soul a space,

For I cannot see plainly my pathway now; 1 .ce only one dear face,

And it shute out the sight of the Ultimate Good With its oeacty, its strengh and grace.

Bessie Bellman.

Elk Co., Kans., Sept. 11, 1903.

THE NETTLE'S COMPLAINT.

The bumblebee woos the clover-field, To the Honeysuckle sails the bee. Odorous nectar they freely yield, But none woo me.

The humming-bird seeks the Lily's cup, The zephyrs kiss the flowering lea, Butterflies hesitate, pause and sup, But none woo me.

New London Co., Cinn.

Alice B. Waite.

ONE DAY.

One day

Upon the Maple tree A bird was singing merrily, And darling wife, who chanced to hear, Said, "Robin's come, now spring is near."

One day

With wife I chanced to spy A nest among the branches high. And in the nest were birdlings four. While Robin flitted past our door.

One day

That nest was empty there, And four young birds in sad despair Sat near the tree and softly cried, Because the world was all too wide.

Oneday

We saw the robins spread Their wings and vanish; sadly said Dear Wife, "Tis fall, no birds, no song To cheer us through the months so long."

One day Again the birds will come To make sweet music near our home; May angel bands on pliant wings Watch o'er us till the robin sings. Ruth Raymond. Bradford Co , Pa.

MY CHOICE.

Oh, others may seek for pleasures In the city's rush and rear, But give me the sunlit valleys And the mountains wild and hoar:

For I love the grand old forests With their leafy temples dim, Where in sweet and rhythmic measures Somber Spruces chant their hymn.

Love the scalet Maple swaying O'er the rippling, dimpling stream, Love the crash and roar of thunder, And the lightning's lurid gleam;

Lighting up the rock-strown hillside Where the white-robed birches grow, With their tattered garments flying O'er the mosses lying low.

Glad am I to learn the lessons That I'm learning hour by hour, Glad my soul to thrill with nature One with the Creative Power. Windsor Co., Vt.

Mrs. I. I. Lewis.

CHRYSANTHEMUMS.

Scentless! Yea, and rather large I am forced to own, But still, my dear Chrysanthemum, You need not stand alone. That head you droop so slightly, As if afraid of blame, May be with proud erectness held To let folks know your name. Your hue, though rather delicate, In truth is very fair, And with the best of Flora's band Will favorably compare. So now my brave Chrysanthemums I'm glad to see you here, For that bright, graceful head of yours Makes winter seem less drear. Mary M. B. Arbuckly

Norfolk Co., Mass.

Bulbous Flowers.

GIANT HYACINTH.

HERE are some varieties of Hyacinths which produce enormous trusses of closeset, graceful flowers, borne by tall, heavy stems. The larger the bulbs, the larger will be the trusses. Well-grown specimens

GIANT HYACINTH.

are often seen from twelve to fifteen inches tall, the stem and truss being in proportion to the height. These giant Hyacinths are mostly new varieties selected and grown with a view to produce mammoth bloom. Followis a list of the best, showing all the leading colors: Jacques, light pink, Cardinal Wiseman, rose; Yellow Hummer, yellow; Snowball, pure white; La Grandesse, pure white; Mas-ter-piece, black, Sir Wm. Mansfield, mauve; Potgieter, porcelaine. These are all single, and are first-class sorts for culture either in pots or glasses in the house, or for the finest display in beds during the spring. Among giant double Hyacinths might be named Kohinoor, salmon pink; Sunflower, bright yellow; Lorens Koster, dark blue; Lord Wellington, pink; La Grandesse, double white; Isabella, blush pink.

- To get the best results from the giant Hyacinths only the largest selected bulbs should be obtained. Such bulbs are usually sold at from fifteen to twenty-five cents each, and are cheap enough at that price. Given plenty of pot room and rich soil the bloom will prove a revelation to many who have grown only the common sorts.

Zephyranthes alba .-- Everyone likes Lilies, and the Fairy Lilies are favorites with us all. My beautiful new house has a long border of the white ones, which grow and multiply rapidly in our southern clime. They bloom for a long time, twice a year. To raise them in pots give them good drainage, a loam and sand soil, sun and water, and they will repay you. They are especially lovely to have for weddings, funerals, churches or anywhere where white Lilies are appropriate. I have the Rosea which are the color of a Papa Gontier Rose, but I have not seen any of the scarlet since I ruined a pail of them my mother had, when I was a young girl at home. I over watered them. Does any one have them? If so, I want to hear from them.

Zephyranthes sulphurea is a yellow one, exceedingly handsome, and larger than the white and rose. These Fairy Lilies are great pets with floral people, and if you have none you surely are missing a most satisfactory bulb.

Georgiana S. Townsend. Los Angeles Co., Cal., Mar. 10, 1903.

My Oxalis.--My Oxalis is a thing of beauty. I set it in the yard last summer. When frosts came I lifted it, put it into a pot of rich soil, cut the top all away, watered it every few days with warm water, gave it a sunny window, and oh my, how it has grown and bloomed! A perfect mound of pink! Every Mrs. Eva M. Casey. one admires it.

Laclede Co., Mo., Mar. 16, 1903.

Buttercup Oxalis.-- A large basket, or pot, of Bermuda Buttercup Oxalis in the window gives just the brightness that is needed. It is a true buttercup yellow, and blooms in great profusion all winter. Aunt Anna. Lincoln Co., Wash., Feb. 18, 1902.

Calla Lily .- When a Calla begins to show fading leaves set it away, withhold water, and give it a season of rest. After two months re-pot it in fresh soil and start it into growth. It does well with good drainage and in rather tenacious soil.

Garden Culture.

FLOWERS IN CALIFORNIA.

SNAGGY-looking shrub, with a trunk as thick as my wrist, I found to be the beautiful Lantana, so huge that I did not at first recognize it. The Fuchsias and Heliotropes, in many instances, cover whole sides of houses, and are one mass of bloom. Geraniums are not choice, such as we grow East. They are mostly scarlet. But the Pelargoniums are exquisite, every shade and combination of white, red, pink, lavender, purple and scarlet. The plant grows into a shrub, and is covered with bloom. Cannas do no better here than East, but Carnations are bounteous. They do best down by the sea, in the sand, heat and moisture. Of course every-one irrigates, and the sweet Violets bloom the entire spring, while one can have Sweet Peas all the time, by planting at intervals. Palms, Rubbers, and Grevilleas grow into immense trees. Tuberoses live the year around in the earth, and Amaryllises grow in great clumps, with scarlet, crimson, pink, white, white and red, white and lavender, and white and pink lilies. The Umbrella Plant grows enormously, and Callas bloom in hedges. The paleblue Plumbago grows into an immense vine, and the Moonflower is a handsome climber also. The fragrant yellow and white Honeysuckle covers the porches.

Ivy Geraniums are used along fences, up which they climb and cover with their pink bloom. Every one has Smilax, and succulents are used in the spaces between the walks and the streets. Papyrus grows here, and is very handsome. Bougainvillea makes an immense and handsome display, and Poinsettia is one of the oddities a stranger arways notices. Cactuses are numerous, but grow wild farther toward the desert. The Prickly Pears bloom profusely. In the parks the Cactus display is a magnificent sight. One sees few Ferns anywhere, but plants of Asparagus are grown, and make trees. Begonias do well here with the same treatment they receive in the eastern climate. During the dry season grass, as well as everything else, must be irrigated, but on the beaches there grows in spite of dryness, a dainty Sea Verbena, delicate purple, also a yellow cup, and a glistening plant, which, when trod on, gives forth a juice. And it takes a tenderfoot to ask what kind of blossoms figs have. They have none! The fruit pushes out of the twigs!

Georgina S. Townsend.

Los Angeles Co., Cal.

[Nore.—The Fig is a member of the Nettlewort family, Urticacee, and with the Rubber Tree and Southern Wall Creeper, is classed under the generic name Ficus. The fruit encloses the flowers, which vary in sex, the staminate flowers having three stamens and a three-parted calyx, while the pistillate flowers have an ovary and five-parted calyx. Both pistillate and staminate flowers are produced upon the same receptable, the lower and most numerous flowers being the pi tillate ones.—ED]

CHRYSANTHEMUMS.

FRIEND gave me a half dozen fancy Chrysanthemum sprouts. I procured a box eighteen inches deep and eighteen inches square, and filled it with rich leafmould. In it I set my plants, watering plenti-fully until I saw new leaves starting. They grew very fast, and in about three months were tall slender plants. In July I took them up and repotted them in pots, cutting off a-bout three inches of the tops of them which I reset in the box. I used the leaf-mould in the pots, with small pebbles in the bottoms for drainage. The plants in the pots having been deprived of the main top, soon put out new branches and became nice bushy plants. The tops that I cut off all rooted nicely, and bloomed a little later than those in the pots. The Chrysanthemums are so easily propagated. When once you have a start of them, they keep on increasing in number from year to year. Although the fall was very dry here, I never saw Chrysanthemums do so well. Those out-doors began blooming in October and continued through the month of November up until the first of December.

Mrs. K. B. Peck.

Clark Co., Ind., Dec. 10, 1902.

Kochia Scoparia.-People who visited the Exposition at Buffalo, N.Y., were unstinted in their praise of the plant with the above name. It was represented as growing about two feet high, and was covered for a long time with bright red blossoms nestled amongst its finely cut foliage. Whether this is a new plant or not I cannot say, but it is new to me at least. Perhaps it is an old plant brought into prominence, that has long been lost sight of. I have been trying to get seeds for the last year, or more, but did not succeed until this spring when a friend sent me some, and now I have forty or fifty nice plants ten inches in height. It is a nice, compact grower, and quite hardy for an annual, and the seeds germinate more promptly than any seed I ever planted. John.

Linn Co., Ia., June 15, 1903.

Ambrosia.-I wonder why the Ambrosia is not more generally grown. We have always had it among our hardy flowers. It is an annual, but is self seeding. It bears transplanting, so one can plant it wherever wanted. The young plants come by the dozens in the spring, from last year's seeds. It sends up its spikes of odd, green flowers almost from the first. It is a dainty green, and deliciously sweet. We always put it among our bouquets of cut flowers, and considered our bouquets incomplete without its pretty sweetness. Just the last year or two I have seen it in our garden seed catalogues, and yet it is an old-time favorite. The plant is of the easiest culture. Give an individual plant plenty of room, and rich, deep soil, and it makes a large, handsome Mrs. Olivia Gilliland. plant.

Cass Co., Mo., Dec. 12, 1902.

114

Window Culture.

FREESIAS.

HE Freesias are daintily pretty, with their creamy, waxen flowers, and their indescribably sweet fragrance. Grow them once successfully and they will become a permanent addition to your collection. The hills require but little care, and afford rich returns in bloom and fragrance just when flowers are scarcest. Plant four or five good-sized bulbs in a four or five inch pot, about an inch under ground. Use good, rich, garden soil with some sand, and have good drainagecharcoal or pebbles. Set them immediately after potting in a sunny window, and push the pot close to the glass. Don't keep them in a warm, dry room. Mine were so pretty last winter, that besides using my own bulbs I purchased a dozen and a half more this fall. Plant in August for Christmas bloom, and every two weeks for a succession of flowers. Give plenty of water after the blades begin to appear. I place a slender stake firmly in the center of the pot for a support.

Mrs. Olivia Gilliland. Cass Co., Mo., Dec. 12, 1902.

Begonias.—Begonias are my favorite window plants. Some I prize for their lovely foliage, and others for both foliage and flowers. I have a Rex with luxuriant foliage; and two flowering Begonias, occupying the same dish, are similar in foliage, but one has pure white, and the other bright red blossoms. Being nearly perpetual bloomers, the dish is verily a bouquet of itself. The bronze-leaved and spotted-leaved and the Angels Wing, with their great wealth of pink jewels, are handsome, and all very easy to care for. Just give them good, rich soil, good drainage, plenty of water, and all but the Rex, a good shower bath once a week, and trim off all the inferiorlooking leaves, and you will have beauties.

Mrs. E. D. P Susquehanna Co., Pa., Aug. 20, 1903.

Several Palms in a Pot.—When Palms are raised from seeds it is quite a scheme to put from three to five plants of the same variety in one pot. They should be fully two inches apart, and in repotting, treat as one plant. I am growing several in this way, and by so doing, expect to have creditable specimens somewhat sooner; for, by the time each plant has grown one character leaf, the whole will be equal to a well developed plant.

Flora Lee. Dutchess Co., N. Y., Nov. 14, 1902.

Asparagus.—Asparagus plumosus nanus is very lovely and fern-like in appearance, and with the climbing, feathery A. tenuissimus, adds just the touch of airy grace needed in a window greenery. The latter needs about as much water as a Fern. Flora Lee.

Dutchess Co., N. Y., Nov. 14, 1902.

CALCEOLARIAS.

WISH all lovers of odd and beautiful flowers would buy Calceolarias. I had one last spring that for nearly two months was simply gorgeous. Everyone who came in would stop, on seeing it, and inquire, "What is that beautiful flower ?" They can be grown either from seeds, or cuttings. For winter blooming start in the summer. They make lovely flowers for Easter. Give them soil composed of leaf-mould with some sand and a little garden soil mixed in. Keep moderately damp. They need rather large pots to bloom in. The flowers are of many bright colors, often bright yellow thickly spotted with red. They are so rich in color and so oddly shaped that many people first seeing them mistake them for artificial flowers. The clusters of flowers are often eight inches across.

L. M. McDonald. Hants Co., N. S., Canada.

Sanseviera zeylanica. — This plant is useful because there is always room for whatever will grow away from strong light; but give it very little water. It is always advisable to have a few plants which do not demand the best situations, yet are an ornament to the room. Flora Lee.

Dutchess Co., N. Y., Nov. 14, 1902.

BUSY DOCTOR

Sometimes Overlooks a Point.

The physician is such a busy man that he sometimes overlooks a valuable point to which his attention may be called by an intelligent patient who is a thinker. "About a year ago my attention was

called to Grape-Nuts by one of my patients," says a physician of Cincinnati. "At the time my own health was bad

"At the time my own health was bad and I was pretty well rundown but I saw in a minute that the theories behind Grape-Nuts were perfect and if the food was all that was claimed for it it was a perfect food so I commenced to use Grape-Nuts with warm milk twice a day and in a short time began to improve in every way and I am now much stronger, feel 50 per cent. better and weigh more than I ever did in my life.

"I know that all of this good is due to Grape-Nuts and I am firmly convinced that the claims made for the food are true. I have recommended it and still recommend the food to a great many of my patients with splendid results and in some cases the improvement of patients on this fine food has been wonderful.

"As a brain and nerve food, in fact as a general food, Grape-Nuts stands alone." Name given by Postum Co., Battle Creek, Mich.

Look in each package for a copy of the famous little book, "The Road to Wellville."

Floral Miscellany.

THE EXILE FLOWER.

Stray child of the woodland, thou modest exile, 'Midst rare garden flowers how sad is thy smile; So far from thy home 'midst the fern-scented bowers, Does naught bring thee joy midst my rare-colored flowers;

Must thou fade ? I but stole for thy winsome face, And hoped that thy beauty my garden would grace. Sagadahoc Co., Me. Alice May Douglass.

TURK'S CAP LILIES.

LL who have transplanted these Lilies from woods and meadows to garden nooks, or who have closely observed wild colonies, can testify to their variable color, size and shape. With age the petals of most of the flowers recurve into close coils, in true turban fashion. Again, mostly in young plants, the petals spread more widely and recurve only a little, giving the flower a much more graceful air.

Usually after transplanting, the lily stem doubles its height and number of flowers, but the color fades most disappointingly. One fine bulb that bore flowers of intense bright crimson I transplanted to a cool, moist, leafy place in the garden, only to have it fade into a dingy red. Yet the great stem towered above me with many flowers, and seemed the pieture of luxuriant vigor. Planted in a dry spot, open to full sunlight, it is less vigorous yet the flowers are brighter, something I cannot aceount for.

The more generally cultivated Turk's-caps, L. ehalcedonicum and L. martagon, are more constant in their fiery hues. They are as easily grown as the old Madonna Lily if left undisturbed, but do not seem to thrive well for a season or two after transplanting.

L. Greenlee.

McDowell Co., N. C., Aug. 10, 1903.

[Note.—The Turk's Cap Lily, Lilium superbum, is common in swamps in New Jersey and Pennsylvania. The Editor once got a plant in a swamp at Monmouth Junction, N. J., which was ten feet tall, and a pyramid of open flowers. It is certainly a Lily that should be in every garden, as it is hardy, tenacious, and handsome.—ED-]

Baskets and Ferns.—I want to tell what a pretty hanging basket I saw. The lady put low-growing, hardy ferns in the moss, so they would come on the outside, and they were lovely. In the basket she had vines trained to run up the wires and some lrooping. Those who live where hardy ferns are plentiful need never want for a pretty hanging basket. Aunt Nan.

Clark Co., Ky., May 13, 1903.

Bone Dust.—I gave a small amount of bone dust to my Otaheite Orange, and it has become a beauty. I find bone dust sparingly used very beneficial to plants.

Mrs. J. S. Hughs. Hardin Co., Ky., Dec. 16, 1902.

POPPILS FOR A BULB BED.

LARGE bed of Poppies near a hydrant, proved to be the most attractive spot in our yard. The plants grew—oh so rank, and were a solid sheet of bloom until kill-

ed by frost. A light shade of pink was beautiful, but I would always plant the mixed seeds. These would be nice to plant on a bulb bed. I planted California Poppies on a bulb bed last year, and it was a sheet of

POPPY. year, and it was a sheet of gold until very late in the fall. I planted the seeds early, scratching them in around the Tulips, before they were through blooming.

Aunt Anna. Lincoln Co., Wash., Feb. 18, 1902.

Australian Tree Fern.—The Australian Tree Fern is an ornamental foliage plant that every one should grow. Its leaves or fronds are immense, and of such an exquisite shade of green, so lacey and yet so substantial. It only requires ordinary treatment, such as one would give an Asparagus or Palm.

Mrs. J. J. M. Marlboro Co., S. C., Dee. 4, 1902.

DOCTOR KNEW Had Tried it Himself.

The doctor who has tried Postum Food Coffee knows that it is an easy, certain, and pleasant way out of the coffee habit and all of the ails following and he preseribes it for his patients as did a physician of Prospertown, N. J., one of his patients says: "During the summer just past I suffered terribly with a heavy feeling at the pit of my stomach and dizzy feelings in my head and then a blindness would come over my eyes so I would have to sit down. I would get so nervous I could hardly control my feelings.

"Finally I spoke to our family physician about it and he asked if I drank much coffee and mother told him that I did. He told me to immediately stop drinking coffee and drink Postum Food Coffee in its place as he and his family had used Postum and found it a powerful rebuilder and delicious food drink.

"I hesitated for a time, disliking the idea of having to give up my coffee but finally I got a package and found it to be all the Dr. said. Since drinking the Postum in place of coffee my dizziness, blindness and nervousness are all gone, my bowels are regular and I am again well and strong. That is a short statement of what Postum has done for me." Name given by Postum Co., Battle Creek, Mich.

Look in each package for a copy of the famous little book, "The Road to Wellville."

ARE YOUR KIDNEYS WEAK?

Thousands of Men and Women Have Kidney Trouble and Never Suspect It.

To Prove What the Great Kidney, Liver and Bladder Remedy Swamp=Root Will Do For YOU, Every Reader of Park's Floral Magazine May Have a Sample Bottle Sent Absolutely Free by Mail.

It used to be considered that only urinary and bladder troubles were to be traced to the kidneys, but now modern science proves that nearly all diseases have their beginning in the disorder of these most important organs.

The kidneys filter and purify the blood-that is their work.

Therefore, when your kidneys are weak or out of order, you can understand how quickly your entire body is affected, and how every organ seems to fail to do its duty.

If you are sick or "feel badly" begin taking the great kidney remedy, Dr. Kilmer's Swamp-Root, because as soon as your kidneys are well they will help all the other organs to health. A trial will convince anyone.

Weak and unhealthy kidneys are responsible for many kinds of diseases, and if permitted to continue much suffering with fatal results are sure to follow. Kidney trouble irritates the nerves, makes you dizzy, restless, sleepless and irritable. Makes you pass water often during the day and obliges you to get up many times during the night. Unhealthy kidneys cause rheumatism, gravel, catarrh of the bladder, pain or dull ache in the back, joints and muscles; makes your head ache and back ache, causes indigestion, stomach and liver trouble, you get a sallow, yellow complexion, makes you feel as though you had heart trouble; you may have plenty of ambition, but no strength; get weak and waste away.

The cure for these troubles is Dr. Kilmer's Swamp-Root, the world-famous kidney remedy. In taking Swamp-Root you afford natural help to Nature for Swamp-Root is the most perfect healer and gentle aid to the kidneys that is known to medical science.

If there is any doubt is known to inected science. dition, take from your urine on rising about four ounces, place it in a glass or bottle and let it stand twenty-four hours. If on examination it is milky or cloudy, if there is a brick-dust settling, or if small particles float about in it, your kidneys are in need of immediate attention.

Swamp-Root is pleasant to take and is used in the leading hospitals, recommended by physicians in their private practice, and is taken by doctors themselves who have kidney ailments, because they recognize in it the greatest and most successful remedy for kidney, liver and bladder troubles. If you are already convinced that Swamp-Root is

If you are already convinced that Swamp-Root is what you need you can purchase the regular fiftycent and one-dollar size bottles at the drug stores everywhere. Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

(Swamp-Root is pleasant to take.)

EDITORIAL NOTE.—You may have a sample bottle of this wonderful remedy Swamp-Root, sent absolutely free by mail, also a book telling all about Swamp-Root, and containing many of the thousands upon thousands of testimonial letters received from men and women who owe their good health, in fact their very lives, to the great curative properties of Swamp-Root. In writing to Dr. Kilmer & Co., Binghamton, N. Y., be sure to say you read this generous offer in PARK'S FLORAL MAGAZINE.

When I say I cure I do not mean merely to stop them for a time and then have them return again. I mean a radical cure. I have made the disease of FITS, EPILEPSY or FALLING SICKNESS a life-long study. I warrant my remedy to cure the worst cases. Because others have failed is no reason for not now receiving a cure. Send at once for a treatise and a Free Bottle of my infallible remedy. Give Express and Post Office.

Prof. W.H.PEEKE, F.D., A Cedar St., N.Y.

GOSSIP.

Dear Floral Band :-- I wish to tell you of a Lily I have. About fourteen years ago I hada white Day Lily but neglected to repot it. I lived at that time in Indiana. The pot was set out of the cellar in the spring. It did no good, of course, and did not bloom. In the fall some one set it back in the cellar. The next spring it was set it back in the cellar. The next spring it was set outside again, and in a few weeks, what was my surprise to see it bursting through the ground, but not a light green as before, but a dark green with purple spots all over the bud. I unpotted it at once and, it grew finely. The leaf stalks were sprtted, and the leaves not more than half as wide as the old white flowers, it had lilies, it for a concord fourtour any the other there sixteen on one and fourteen on the other flower Sixteen on one and fourteen on the other flower stalk, each Liy about half the size of the white. The petals well curved back, in color, white, and hlac vained, or as near that color as I can de-scribe it. It bloomed two years for me in the North. We then came here, and it has bloomed every year since, but has not changed back. This will make the tweifth year it has bloomed. Laura Eberly.

Rhea Co., Tenn., Apr. 28, 1902.

Mr. Park :—I have taken your Magazine for three years, and I enjoy it very much, for it gives so much information about caring for flovers. Mrs. Irene Elliot.

10 CHOICE HYACINTHS, 30c.

Gertrude, deep pink, immense, compact trusses. Gentrude, deep pink, immense, compact trusses. Gigantea, light pink, an extraordinary variety. Gen. Pelissice, scalet, superb for pots or beds. Baromess of Thunfl, crean white, graceful bells. Grandeur a Merceille, blush white, very fine. Paix del Europe, pure white, one of the best. Chas. Dickens, azure blue, a superb spike of bells. La Peyrouse, lavender blue, spicedid long spike. La Peyrouse, lavender blue, exceedingly handsome. Ida, bright yellow, early, best of yellow Hyacinths.

This fine collection, embracing all colors, splen-did bulbs, sure to bloom, will be mailed for 30 cents. The bulbs may be either bedded out or potted this month, and in either way will give good results. They are not the largest bulbs, but are of hardy sorts, and will improve and bloom for several sorts, and will improve and boom for several years. A fine double Hyacinth will be sent for each order you may send besides your own. Thus for a club of five (\$1.50) I will send four double Hy-acinths in four best named sorts. Nine(y-one Hyacinths for a bed, with hints for planting, mailed for only \$2.70. Address

GEO. W. PARK, La Park, Pa.

FOUND HER FORTUNE IN THE STARS

The Wonderful History of a Young Woman Who Raised Herself from Poverty to Wealth

MISS CATHERINE BENOIT.

"Some time ago I saw an announcement me thoroughly that he is an accomplished

in a paper which said that any one could have their fortune told free by corresponding with an astrologer in New York State, and one time while I was talking with some girls in the factory I told them about it. They laughed at me, and we all agreed it was a humbug, but in a spirit of jest I wrote

to the astrologer to tell my fortune. He sent me my horoscope as he agreed, typewritten es-pecially for me, without charge, and it certainly contained some wonderful things. He told me some remarkable things about my past, which I did not believe any one else living knew about, as well as several forecasts about the future which came true. I cor-responded with him further and he laid the future before me like an open book. Among the other things he told me

was that I would receive a legacy from a relative I did not know about, and that this would come to me by a trip to Boston. I did not expect at that time to go to Boston, but acting on a suggestion in the horoscope which said I would be lucky in lotteries, I took a ticket in a church bazaar which won me quite a beautiful prize. I sold the prize and in company with a friend took a trip to Boston, where I accidentally found a gentleman who turned out to be a relative of my mother's. He died some weeks afterward, leaving me the bulk of his fortune, which amounted to quite a large sum of money. Naturally, my experience got talked hamton, N. Y.

BROOKLYN, N. Y. May 15. - The about, and I was introduced to the gentlepeople of this city are wondering over the romantic story told by Miss Catherine Benoit, of 61 Pineapple Street, formerly a factory girl in this place at a salary of \$3.00 a week, now a wealthy young woman and a prospective bride. Whom I received my horoscope is Prof. Edison, of Binghamton, N. Y. He is Telling her story to a reporter, she said: | truly a remarkable man, and convinced

astrologer and knows what he is talking about. He has also sent free horoscopes to several of my friends, and they all say he is truly wonderful. I think everybody ought to write to him, as they would doubtless get information which would do them good." Further investigation

investigation of the story told by Miss Catherine Benoit reveals the fact that Prof. Edison, of Binghamton, has been an astrologer for a number of years, and that he offers to send a free horoscope, revealing the past and future of any one, free of charge, if they will but send him a 2-cent stamp to pay postage. Although it is true that a number of people do not believe in astrology, it appears that even in Binghamton, his own town, he has made people realize that it is indeed a science

Any one interested in making their future successful and in knowing what their fu-ture contains should write to Prof. Edison immediately. He will send this free horo-scope at once, without any charge, which will reveal the future certainly and without failure. He will tell you the history of your life from the cradle to the grave, what you can expect as your share of happiness and what is likely to come to you in unhappiness, unless you are in a position to avoid it. Therefore, write at once, stating sex, date and place of birth, enclosing a 2-cent stamp for postage, and a horoscope will be sent by return mail, free of charge. Address your letter to Prof. Edison, Avenue 1 L, Bing-

Specialites. Sell them at 10 ets. each. When soil, send us the \$3.00 and we will forward a Talking Machine 20 Inches long. Uses either Columbia or Victor Dike Records. We will forfelt \$100 to anrone who remits \$3.00 and can prove we do not send a Talking Machine complete with 25 points, including a Comie Song. It reproduces songs, sneeches, band music, etc., and can be used at all entertainments and concerts, in any size hall or room. It has riano finished base, with concert sound box and 14 the metal Amplifting Harr. This machine is open for inspection at our offices. Send your order at once to SAFE JEWELLEY CO., 19 Warren St., New York.

WHY FRANK QUIT TOBACCO.

I saw a notice in our paper about a new discovery that was odorless and tasteless, that ladies could give in tea, coffee or any kind of food, which would quickly eure anyone of smoking eigars, pipe or eigarcties or chewing without their knowledge. I sent for a package and gave it to him secretly and he hasn't used tobacco in any form since. Anyone can have a free trial package by aldreasing Rogers Drug & Chemical Co., 780 Fifth and Race Sts., Cincinnati, Ohio, and easily drive foul tobacco smoke and dirty spittoons from the home. I saw a notice in our paper about a new discover;

Roman Hyacinths and Narcissus.

Hyacinths, White Roman, first size, 4 cents each, 40 cents per dozen. Hyacinths, Blue, Blush, Pink and White Italian.

4 cents each, 40 cents per dozen. Narcissus, Paper White, large-flowered, 2 cents

each, 20 cents per dozen. Narcissus, Double Roman, 2 cents each, 20 cents per dozen.

These are all first-class for pots or water cul-ture, sure to bloom. The White Roman Hya-cinth and Narcissus, and the large-flowered Pa-per White Narcissus are especially valuable, and the bulbs offered are very fine. For winter flow-ers you need not fear to order liberally of these. They rarely disappoint. Address GEO. W. PARK, La Park, Pa.

Mr. Park:-We like your Magazine, it is so practical. We have taken other magazines that cost more, but none are more helpful.

Mrs. C. L. Slough. Licking Co., O., Oct. 12, 1903.

United Droduct Co. 200 Broadware N.Y. envelope. United Product Co, 200 Broadway, N. Y.

OUESTIONS AND ANSWERS.

That Cheap Collection.-Mr. Park:-Can you not offer a cheap collectin of small bulbs this fall? I think I could get the neighbors to send with me for such a collection.-Mrs. F. Hammond, Ohio.

mond, Ohio. Ans.—Agreeable to this Sister's wish I have se-cured and offer just such a collection, as adver-tised 10 bulbs for 15 cents including the Magazine a year. Thousands of my flower friends have or-dered this collection, and included the orders of their neighbors which were secured by mission-ary effort. I am grateful for these favors, and gladly aid all who work for club orders by send-ing blank lists, sample copies, booklets, etc. Let the good work go on. the good work go on.

Dear Floral Folks :- Envious, well I guess I was, and you would have been, too, to have seen a Chrysanthemum that measured sixteen inches around, and to think a man raised it. There are around, and to think a man raised it. There are so few men who care for flowers. It was a beau-ty, called the Lavender Queen. J am quite sure there was only one blossom to the plant. When I returned home I went out and picked several bouquets off my Chrysanthemums, and the en-vions thoughts were gone, for I could give so many of mine away I did not care for the mon-ster Chrysanthemum at all. Ima. Geauga Co., Obio, Dec. 17, 1902.

Cuban Lily.—I wish to know how to treat the Cuban Lily to make it bloom?—Mrs. Bishop.Ont.

WHAT FLOWER IS THIS?

The above picture does not look much like a The above picture does not look much like a beautiful spring flower, but it may suggest the name of such to the thoughtful mind. What is it? You will find the blooming plants in the mead-ows in May, the shining golden flowers making a fine show, even at a distance. The little girls often trim their hats with them, and the boys gather bouquets of them for their mother. If the fierce looking little animal represented in the picture was in the meadow, however, the bravest of the little boys would hardly venture to get the golden blooms to get the golden blooms.

Ar To any one who will during this month, send the name of the flower, together with a subscription (ten cents), for Magazine with premium of ten Spanish Iris, a packet of choice flower seeds, our selection, will be sent with the bulke as a propert for the offert bulbs as a reward for the effort.

CHILDREN'S CORNER.

Dear Mr. Park: - I am thirteen years of age. I like flowers, and live on a farm near the woods, where there are many wild flowers. I like to piece quilts and do fancy work. We have used your seeds and plants, and liked them. I like to read the Children's Corner, and mother likes to read your Magazine very much.

Ada Wright. Ralls Co., Mo., April 12, 1903.

Dear Mr. Park :- I am eight years old. My sister takes your Magazine, and I read every word a-bout flowers. Mamma says we could not raise fowers without it. I love flowers and have some of my own. I plant lots of flower seeds. We have a nice flower garden where we live. I will write and tell you about it sometime

King Co., Wash Dollie Pence.

Dear Mr. Park :-- I am a little girl nine years old. My mamma has taken your Floral Magazine for ten years. My papa is a farmer. Mamma has a Geranium that has forty-one bunches of blossoms on it now, and another Geranium that has red and white blossoms on the same plant. Esther B. F. Head.

Forest Co., Pa., July 29, 1903.

Dear Mr. Park :--I am a boy twelve years old. My mamma has taken your Magazine for three or four years, and has many flowers. I like Pan-sies, Roses and all kinds of flowers. For pets 1 have a bantam, a colt, a dog and three little white kittens. Yours as ever, Pearl Fouch. Highland Co., O., June 12, 1903.

Dear Mr. Park : - We have had the Floral Magazine for many years. Mamma has a large bay window in which she has many flowers that she bought of you, My sister loves flowers very much. Her name is Blanche. Boxelder Co., Utah. Augusta Jorgensen

A SURPRISE PACKAGE.

To anyone who will report this month about To anyone who will report this month about Park's Seeds, and recommend three kinds of flowers which were particularly satisfactory, I will mail a surprise package of several kinds of choice seeds. Write about each kind separately, or on three slips of paper. Write at once. Do not delay. The notes are wanted for publication. Address GEO. W. PARK, Lapark, Pa.

Rheumatism Cured Through the Feet.

Jackson's Man Discovers an External Cure by Analyzing Foot Sweat. Relief is

immediate.

It===FREE!

Trv

Anyone can try—without paying a cent—the famous Magic Foot Drafts, which always bring comfort and almost always permanently cure Rheumatism, either chronic or acute, no matter how severe. Hundreds of thousands of pairs of Drafts have been sent on approval all over the world and the makers are still sending them to ensure sufferer they can beer of

world and the makers are still sending them to every sufferer they can hear of. Send your name today You get the Drafts by return mail. If you are fully satisfied with the help they give you, then you can send **One** Deillar. If not, keep your money. You decide. Magic Foot Drafts work like Magic. Cured patients tell us they perform miracles. They do not. They are scientific-logical. The foot pores, the largest in the body, are located over rich nerv and vascular centers. The Draft on the foot acts through them on every inch of the the foot acts through them on every inch of the body—curing Rheumatism no matter where lo-cated. Our booklet makes the reason clear.

Sixty-eight per cent of the nitrogen of the foot sweat drawn out through the great foot pores and absorbed by Magic Foot Drafts is in the form of the poison Urea, the basic cause of Rheumatism. The poison is drawn out in ex-ceedingly small particles, but the Drafts work 24 hours a day, swiftly and surely, and when the cure is once effected, it is permanent, for the Cause of Rheumatism has been removed. The Drafts are comfortable, safe and sure. Don't suffer needlessly. You are not risking a penny and the chances are nine out of ten that the Drafts will cure you, as they have so many thousands of cases just like yours. Magic Foot Drafts cured Mrs. Leah Brum-baugh, Postmistress of Coburg, Neb., in 1901, and there has been no return of pain. They cured both Mr. and Mrs. Edward Lincoln of Rochester, New York, over a year ago. No pain since.

pain since.

pain since. R. D. Cummings of Fort Worth, writes: "I have never felt any rheumatic pains after I used Magic Foot Drafts last June (1902)." Mrs. F. N. Potter, of Shelton. Conn., writes: "I was a poor miserable object when I first ap-plied the Drafts. Now I bless the day I heard of them." It would take you many weeks to read the

It would take you many weeks to read the grateful letters of cured old rheumatics from every land on earth to the makers of Magic Foot Drafts. Try them yourself. Write today to the Magic Foot Draft Co, 1191 Oliver Bldg., Jackson, Michigan, for a pair of Drafts free on approval. Valuable booklet for rheumatics also free. Send no money only your name.

GOSSIP.

Hyacinths After Blooming. - A sister from Wayne County, Pa., writes:

After my Hyacinths have done blooming in the window, and the leaves have reached their full window, and the leaves have reached their full size, I remove them to the cellar, where they get a little light (more would be better), watering when necessary as long as the foliage keeps green and active, and the bulbs get ripe and solid. In August I shake them out of the soil and save all the larger ones until the time of planting in the border. The next season I place a few of the extra nice ones in tin cans for window culture, as I can get them earlier than those I buy, but not as fine spikes of blocm can be expected of them.

Since the discovery of a Louisville man it is no long-er necessary for any deaf person to carry a trumpet, a tube, or any such old-fashioned device, for it is

Since the discovery of a Louisville man it is no longer necessary for any deaf person to carry a trumpet, a tube, or any such old-fashioned device, for it is now possible for any one to hear perfectly by a simple invention that fits in the ear and can not be detected. The honor belongs to Mr. George H. Wilson, of Louisville, who was himself deaf, and now hears as well as any one. He calls it Wilson's Common Sense Ear Drum, is built on the strictest scientific principles, containing no metal of any kind, and is entirely new in every respect. It is effective even when the natural ear drums are partially or entirely destroyed, perforated, scarred, relaxed or thickened. It fits any ear from childhood to old age, and, aside from the fact that it does not show, it ever causes the hearer irritation, and can be used with comfort day or night. It will cure deafness in any person no matter how acquired, whether from catarrh, scarlet fever, typhoid or brain fever, measles, whooping cough, gathering in the ear, shocks from artillery, or through accidents. It not only cures but stays the progress of deafness and all roaring buzzing noises. Let every person who needs this at once send to the company for its 190-page book, which you can have free. It describes and allustrates Wilson's Common Sense Ear Drums and contains many bonafide letters from numcrous users in the United States, Canada, Moxico, England, Scotland, Trasmania, India. These letters are from people in every station in life-clergymen, physicians. Inwyers, merchants, society ladies, etc.-and tell the truth about the benefits to be derived 'from the use of this wonderful little device; you will find among them the names of people in your own any of them you wilsh and secure their opinion as to the merits of the only scientific ear drums for restoring the hearing to its normal condition. Write to-day and it will not be long before you are again hearing. Address for the free book and convincing evidence, Wilson Ear Drum Co. 1269 Todd Building, Louisville, Ky., U. S

HIS LAST SHOT.

It is to be regretted that many men who occu-py positions of great influence find pleasure in slaughtering birds and animals as sport. It seems cruel and inhuman to thus treat or mistreat poor dumb brutes, but it is possible such "pleasure" will be indulged in until we reach a higher state of civilization, or until the feelings of humanity become more refined and considerate. It is true become more refined and considerate. It is true that some indulge thoughtlessly in hunting be-cause the cruelty of the sport never occured to them. The conversion of a sportsman is told in the following translation from Lamartine: "A harmless, happy roebuck bounded joyously over the wild thyme on the verge of the wood. Now and then l could see him above the heather, burking his ears butting in play warming his

pricking his ears, butting in play, warming his dewy flanks in the rising sun, and browsing on the young shoots, in his innocent revel of soli-

the young shoots, in his innocent revel of soli-tude and safety. I am a sportsman's son and spent my boyhood with my father's gamekeepers. I had never thought about the brutal instinct that leads man to find amusement in slaughter, and to destroy without necessity, justice, pity or right, animals who might equally claim to hunt and slay him if they were as ruthless, well armed and savage in their pleasures as he is in his. My dog was on the alert, my gun pointed, the deer right ahead. I did feel a certain hesitation and remorse at cut-ting short such a life- such joy and innocence in a creature that had never harmed me, and that delighted in the same sunshine, the same dew, the same morning freshness, that I did; created by the same Providence, perhaps endowed in a sibility, perhaps bound in the same thought and sen-sibility, perhaps bound in the same theought and sendilierent degree with the same thought and sen-sibility, perhaps bound in the same ties of affec-tion and relationship-looking for his brother, waiting for his mother, his mate, his little one. But Nature's recoil from murder was overborne by the mechanical instinct of habit. I fired, The roebuck fell, his shoulder broken by the shot, and his blood reddening the turf on which he vainly struggled in his acony

The rocture terms that the turf on which he and his blood reddening the turf on which he vainly struggled in his agony. When the smoke dispersed I approached, pale and shuddering at my misdeed. The poor, lovely creature, was not dead. It looked at me, its head sunk on the grass, its eyes swimming in tears. Never shall I forget that look, to which amaze-ment, suffering, and untimely death seemed to give a human depth of feeling quite as intelligible as words—for the eye has its language, and most of all when about to close forever. That look give a human depth of feeling quite as intelligible as words—for the eye has its language, and most of all when about to close forever. That look said distinctly, with a heart-rending reproach for my wanton cruelty. "What are you? I do not know; I never offended you. Perhaps I should have loved you. Why have you struck me with death! Why have you snatched from me my share of sky and breeze, of light and joy and life? What will become of my mother, my mate, my fawn, waiting for me in the brake, to see only these torn tufts of hair and these drops of blood on the heather? Is there not above an avenger for me and a judge for you?" This is literally what the eyes of the wounded deer seemed to say.- I understood and reproached myself as if it had spoken with a voice. "Put an end to me now," it seemed to say, too, by the grief in its cyes and the helpless shiver in its limbs. I would have given anything to undo what I had done. Alas! the most merciful close to my pitiless work was to shoot my poor victim once more, and so put it out of its misery. Then I fung my gun away, and in truth shed tears of

once more, and so put it out of its misery. Then I flung my gun away, and in truth shed tears of which I am not ashamed. My dog knew some-thing of my meaning; he did not stir, but lay be-side me sad and abashed, as if he mourned with me and the victim of this cruel, wanton sacrifice. I abandoned forever the brutal pleasure of murder, the sportsman's savage despotism which, without need, right or pity, takes away the life that he cannot restore. I swore to myself never again to cut short in my caprice of an hour of sunshine enjoyed by these denizens of the woods and by the birds of heaven, who taste like us, the transient ecstasy of light and the more or less vague consciousness of existence under the same vague consciousness of existence under the same sky as ourselves."

Rupture The U. S. Gov. has granted me a patent. Safe, sure, casy, cures while you work. Sent on trial. Alex Spiers, Box 806, Westbrook, Maine.

BRIEF ANSWERS.

Catalonian Jasmine. - An esteemed correspond-Catalonian Jasmine. An esteemed correspond-ent takes exception to the Rhynchospermum Jasminoides being called Catalonian Jasmine, that the name belongs to a Spanish Jasmine known as J. multitlorum, English authorities say that the name is rightfully given to Jasmine grandiflorum, a species from the Himalayas, "a warm greenhouse shrub much like J. officinale, and their L. multiflora is a synonym of L. puber. and that J. multiflora is a synonymn of J pubes-cens, a species from China, introduced in 1759. In America the Rhynchospermum Jasminoides has been known as Catalonian Jasmine for many years, though perhaps without authority. It is only another, but common name for that lovely evergreen shrubby vine introduced from Shang-hai in 1846 and called by Lindley Rhynchosperm-um Jasminoides, from Rhynchos, snout, and sperma, seed; by Lemaire Trachelospermum, from trachelos, the neck, and sperma, and Pare-chites by Asa Gray. It belongs to the order A-pocynaceæ, the Dog-bane family, to which the well-known plants Allamanda and Nerium or O-leander belong, as well as the common Dog-bane, Apocynum. The Jas nine belongs to the Natural Order, Oleaceæ, the Olive family, which includes the Forsythia, Syringa or Lilac, Ligus-trum or Privet, and the Fraxinus or Ash. In closing our correspondent adds "But what does it matter, for both the Rhynchospermum and Jas-mine are desirable plants," to which those who know them will agree. evergreen shrubby vine introduced from Shangknow them will agree.

Aloe.—A sister writes that she has a plant that is succulent like Sanseviera, but the leaves are covered with tiny, raised silvery spots. People who see it call it Deer Tongue and Snake Cactus. It is probably a species of Aloe.

CORRESPONDENCE.

Hoya or Wax Plant.-Mr. Park:-The plant that my slip of Wax Plant came off of did not bloom much, and I was discouraged about my bloom much, and I was discouraged about my plant. It is on a frame five feet high, and from one foot to two feet in width. It covers both sides of the frame. Last year it had one cluster of bloom. It is seven years old. Last Septem-ber we repotted it, putting it in a candy bucket. You may imagine my surprise about the middle of April, when I thought I would look at it and see if there were any buds. I counted twenty-four bunches, and in about a week there were forty bunches. It is through blooming now, but bloomed for three months. It had twenty-eight clusters of bloom on it at once, and maybe you think it wasn't lovely! Oh, how sweet! I counted the stems the other day and found fifty. All bloomed once, and eighteen bloomed twice, and one bloomed three times on the same stem this summer. It is growing fast now. Is there any way to keep it pruned back? It is large e-other plants, too. I have several varieties. I am other plants, too. I have several varieties. I am glad that you told us not to pull off the flower stems, or I suppose I would have pulled them off, as I do with other plants. Mrs. Irene Elliot.

Rice Co., Kans., Aug. 10, 1903.

Ance Co., Kans., Aug. 10, 1505. [ANS.—The best way to keep the Wax Plant dwarf and convenient to handle is to avoid frequent repot-ing. The vine can be cut back, but it is likely to make more vigor us growth because of such pruning, and by cutting back many of the blooming spurs may be unavoidably removed.—ED.]

Home Treatment for Cancer.

Cured Her Husband of Drinking.

Write Her Today and She Will Gladly Tell You How She Did It.

My husband was a hard drinker for over 20 years and had tried in every way to stop but could not do so. I at last cured him by a simple home remedy which any one can give secretly. I want every one who has drunk enness in their home to how of this erd homes to know of this and if they are sincere in their desire to cure this disease and will write to me, I will tell them just what the remedy is. My address is Mrs. Margaret Anderson, Box 454 Hillburn, N. Y. I am sincere in this offer.

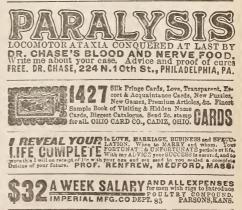

and will gladly send it to you if you will but write me to-day. As I have nothing whatever to sell I want no money.

GINSENG ^{\$25,000} made from one-half acre. Easily grown throughout the U. S. and Canada. Room in your garden to grow thousands of dol-lars' worth. Roots and seeds for sale. Send 40. for postage and get our bookte B-T telling all about it. McDowell Ginseng Garden, Joplin, Mo.

Pansies. Remer's Giant, 10 packets, embracing all known shades, 25c. PARK, Lapark, Pa.

Only 25 cents for a Fine Collection of 15 Hardy Bulbs, suitable for Cemetery Decoration.

- Iris Florentina, large, showy, fragrant, white flowers.
- 2
- 3
- Lilium Takesimum, charming, fragrant, white nowers. Lilium Takesimum, charming, fragrant, white trumpets. Leucojum æstirum, clusters of snowdrop-like white flowers. Narcissus albida stella, lovely white starry Daffodi. Narcissus Poeticus Burbidgei, superb white single Daffodi. Muscari botryoides alba, an exquisite spring-flowering sort. 2

In planting these, if you wish them in a row, set the Iris first, then 15 inches distant the Lily, then the other ten inches apart, in the order named. If you wish a square or round group place the Iris and Lily at the center, and group the others around. As a rule the cemetery lot cannot receive the attention that

As a rule the centerry for cannot receive the architecture and most plants need, and grass and drouth often do great injury to the more delicate things planted. The above plants, however, are hardy enough and persistent enough to hold their own, and can be depended upon for a fine spring and summer display for many seasons, even if neglected. They should be planted dur-

many seasons, even if neglected. They should be planted dur-ing October or November. In the spring set a few seedling MUSCARI. plants of white or purple Verbenas or white Petunias among the bulbous flowers and you will have a display of pretty and showy flowers until winter. A packet of seeds of the Petunias will be included with the bulbs. They should be sown early in spring, either in a window hox or in a sheltered bed out-doors. The bulbs offered should be set four inches deep except the Lily, which should be seven or eight inches deep, and the Iris, which should be planted so the tops will protrude above the soil. This plant is slow to ripen and cannot be mailed before November.

mill. I wind black five-thread suple. I like it. Mamma takes your Magazine, and I read it every month. My little sister has a little white rabbit named Bonny. We live on the edge of the Eliz-abeth river, and can see all of the large boats as they pass. It is nice and cool in summer, but it is very cold in winter. Mamma has a Calla Lily nearly two years old. It has bloomed four times this summer. We have lots of other flowers. We have lovely Tuberoses. Belle Powers. Mecklenburg Co., Va., Aug. 1, 1903.

Mr. Park :--I have seen so many nice letters in your Magazine and like to read them so well. I thought I would write. We have a nice flower

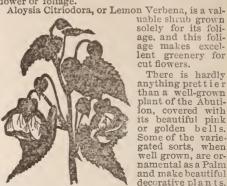

Morphine or other drugs, you don't have to pay. We will send a trial bottle free. Write to the Comstock Remedy Co. Suite F.S. Lafayette, Ind.

GREENHOUSE SHRUBS.

Dear Floral Folks:-There is hardly anything prettier than the long, waxy, white flowers of the single Bouvardia, and at night they shed a Jessamine-like fragrance that is delightful. The foliage is small and dainty, and unlike most shrubs, has no suggestion of coarseness in either flower or foliage.

cut flowers.

There is hardly anything prettier than a well-grown plant of the Abuti-lon, covered with its beautiful pink or golden bells. Some of the varie-gated sorts, when well grown, are ornamental as a Palm and make beautiful decorative plants,

ABUTILON. even when not in bloom. The new Abutilon Savitzii is dwarf, and has a more decided variegation than the well known Souvenir de Bonn.

The large showy flowers of the Hibiscus are greatly admired, and the bright foliage is very greatly admired, and the bright foliage is very attractive. This grows and blooms in either sum-mer or winter, if given sufficient warmth and sun-light. The plants are tropical shrubs, and need all the sunlight possible. The Gardenia, or Cape Jessamine, is a very pop-ular shrub, and the flowers are exceedingly

to a golden yellow with age, and the darl golden, velvety petals are beautiful. Laura Jones. Lincoln Co., Ky., Nov. 14, 1902.

CONSUMPTION CURED.

CONSUMPTION CURED. An old physician, retired from practice, had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of Consumption, Bronchitis, Catarrh, Asthma and all Throat and Lung Affections; alvo a positive and radical cure for Nervous Debility and all Nervous Complaints. Having tested its wonderful curative powers in thousands of cases, and desiring to relieve human suffering, I will send free of charge to all who wish it, this recipe, in German, French or English, with full directions for preparing and using. Sent by mall, by addressing, with stamp, maning this pa-per, W. A. Novres, 847 Powers' Block, Rochester, N. Y.

EASTEE LILY.

Oh! Easter Lily rare, Wide your open petals fair; With fragrance beyond compare, Let your perfume fill the air.

In stately beauty bright, Ye greet the Lord of light; Fill our souls with new delight, By your blossoms all in white.

Blestemblem of the day, When He, to whom we pray, Broke the bands of death away, And lives again alway.

"He is risen," let us say, On the radiant Easter day, And our Lilies let us lay On the altar where we pray.

Pottawatomie Co., Okla. Mrs. M. J. Ross.

CORRESPONDENCE.

Mr. Park :--Two years ago I got some Begonia seeds, the first I ever saw, and when they came I scarcely expected to see them come up, they were so small. I planted them in a four-inch pot and covered them with glass, and then began to watch for them to come through, which they did, much to my surprise, in about a week. How slow they were to grow until I almost gave up hopes. One day I took off the glass and left it off for an hour or more, and all my plants were gone, but I put the glass back, and in a few days some more came through. Then I thought I would not work more by guess, and gct some copies of your Magazine and read all I could find about Begonias. I succeeded in raising twelve, I kept three and gave the rest to my children and friends. Mrs. B. H. Stephens. Boone Co., Ky, Mar. 2, 1902.

THAT "FRUIT-GROWER'S" WAIL.

A Farm Journal contains the following wail about robins :

"Laws have been made protecting robins and other birds that eat both fruit and insects, on the ground that their destruction of insects was good pay for the fruit they consumed. This season, in many cases, they took the entire crop of fruit. It seems evident that the laws will have to be charged. It is the fruit grower that needs protection " What a"fruit-grower"he must be who raises no

more fruit than a few song birds will eat. Why not put in an extra tree for the birds when plant-ing. Selfish and short-sighted indeed must he be who begrudges the robin and other birds that be who begrudges the robin and other birds that destroy so many noxious worms and insects in the orchard and garden, and give a free concert every morning and evening during summer, the few cherries they eat—mostly taken from the top of the tree and inaccessible branches. The laws protecting birds are all right as far as they go. It is only to be regretted they are not stronger.

In the same paper was the following:

"Keep a good cat at the barn. This helps to clear the stables of rats and mice. I have known of some horses that were made very nervous by or some horses that were made very nervous by mice and rats chasing about their stalls."

As a rule the cat kept at the barn is neglected, and during the summer, when mice and rats are often scarce at the barn, acquire the habit of foroften scarce at the barn, acquire the habit of for-aging along the fence rows, and in fields where our insectivorous scng birds are nesting, and de-stroy more-many more birds and birdlings than they do mice and rats. Cats are useful as orna-ments in winter to lie under the stove and purr in daytime, and might be put into the barn to rid it of pests at night, if thought to be useful in that way. In spring most of them should be de-stroyed to save the birds. As a class, they are natural enemies of birds, and there ought to be a law exacting a tax on every cat owned, while the unowned, worthless, bird-destroyers would find a place as they should, "at the bottom of the sea." the sea."

In this connection the following clipping from Dumb Animals may be of interest, and it is heart-ily endorsed by the Editor as his belief also.

"If there were no birds man could not live on the earth."

'It is asserted by scientists that if only the small birds on this earth were destroyed, all veg-etation, because of the enormous increase of insects, would be eaten by them, and every human being and every animal would perish."

BY SPECIAL arrangement PROF. ASTRO, the world's famous astrologer, has decided to give every reader of PARK'S FLORAL MAGAZINE a free horoscope of their lives. Send name, address and date of birth at once, and have

by astrology; past, present and future cor-rectly treated, and success assured in love and busi-ness; all mysteries revealed. My horoscopes are said to be most wonderful diviners.
