Introduction

Agricultural Statistics is published each year to meet the diverse needs for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. Its tables of annual data cover a wide variety of facts in forms suited to most common use.

Inquiries concerning more current or more detailed data, past and prospective revisions, or the statistical methodology used should be addressed directly to the agency credited with preparing the table. Most of the data were prepared or compiled in the U.S. Department of Agriculture. A few tables were prepared in other Government agencies.

The historical series in this volume have been generally limited to data beginning with 1949 or 1950 or the most recent 10 years. However, many of the series carry a reference in the source note to the table in Agricultural Statistics, 1962, where comparable data for earlier years can be found. In the 1962 issue, historical tables showing totals for the United States begin with 1866 for the principal crops and with 1867 for January 1 livestock numbers and most other basic tables showing national totals begin with 1929, 1934, 1939 or 1944 (livestock and poultry tables 1 year later) depending in part on the relative need for a long series.

These two publications should provide data for enough years to meet the needs of most users.

Agricultural data for Alaska and Hawaii are included in the appropriate tables, where available. Limited information is available in Alaskan agricultural production. Certain statistics for Hawaii are found in chapter XI.

U.S. foreign agricultural trade statistics include Government as well as non-Government shipments of merchandise from all the United States and territories to foreign countries. They do not include U.S. shipments to the U.S. Armed Forces abroad for their own use or shipments between the States and U.S. territories. The world summaries of production and trade of major farm products are prepared by the U.S. Department of Agriculture from reports of the U.S. Department of Commerce, official statistics of foreign Governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers and the result of office research.

Three types of data are included in this volume. Statistics presented in many of the tables represent actual counts of the items covered. Most of the statistics relating to foreign trade and to Government programs, such as numbers and amounts of loans made to farmers, and amounts of loans made by the Commodity Credit Corporation, etc., are data of this type. A large number of other tables, however, contain data that are estimates made by the Department of Agriculture, which in many cases are supplemented by a third type of data obtained in census enumerations.

The estimates for crops, livestock, and poultry made by the U.S. Department of Agriculture are prepared mainly to give timely current State and national totals and averages. They are based on "bench mark" data supplied by the Censuses of Agriculture taken every 5 years and on sample data supplied by farmers and by people who do business with farmers, together with check data from other sources. Being estimates, they are subject to revisions as more data become available from commercial or Government sources. Unless otherwise indicated, the totals for the United States shown in the

various tables on acreage, production, numbers, price, value, supplies, and disposition are based on official Department estimates. They exclude States for which no official estimates are compiled.

For census years, many tables carry both census totals and this Department's estimates. Generally, where there are appreciable differences between the census totals and this Department's final estimates, the processes of checking and revising estimates have indicated that some sources provide more nearly complete information about some items than the census has been able to obtain. For example, this Department's estimates of tobacco production can be considered more precise than census totals, because the estimates are revised in line with actual production as shown independently by Internal Revenue records and State records of tobacco sales. Sugar beet and sugarcane production and acreage estimates are adjusted to quantities actually reported by sugar factories. Check information on peanuts and rice is available from processors for areas sometimes including several States. In a number of other instances allowances have been made for known incompleteness of coverage by the census.

For livestock and poultry, the Department's estimates of inventory numbers relate to January 1. Most recent censuses have not enumerated numbers on that date. The 1945 census was taken as of January 1, but with the trying wartime conditions, was delayed over a considerable length of time in a number of States with the result that reported inventory numbers did not always represent the actual January 1 inventory. The 1950 census was taken as of April 1 and the 1954 and 1959 censuses were taken in October and November. These situations have made it necessary to adjust census totals to a January 1 equivalent basis, taking into account changes that occurred between the January 1 date and the actual date of enumeration.

DEFINITIONS

"Farm value" as applied to crops in the various tables, is derived by multiplying production by the estimated season average price received by farmers for that portion of the commodity actually sold. In the case of fruits and vegetables, however, quantities not harvested because of low prices or other economic factors are excluded from the computation of farm value. The term is used in the inventory tables on livestock and poultry to mean value of the number of head on farms on January 1. It is derived by multiplying the number of head by an estimated value per head as of that date.

The word "Year" (alone) in a column heading means calendar year. "Ton" when used in this book without qualifications means a short ton of 2,000 pounds.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

The following table on weights, measures, and conversion factors covers the most important agricultural products, or the products for which such information is most frequently asked of the U.S. Department of Agriculture. It does not cover all farm products nor all containers for any one product.

The information has been assembled from various sources within the Department and from State schedules of legal weights. For most products, particularly fruits and vegetables, there is a considerable variation in weight per unit of volume, due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc.

Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights, as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weight. The table was prepared chiefly for use of workers in the U.S. Department of Agriculture who have need of conversion factors in statistical computations.

CONVERSION FACTORS

Commodity	Unit	Approximate equivalent
Apples	1 pound dried	7 pounds fresh; beginning 1943, 8 pounds fresh
Do	1 pound chops	5 pounds fresh
Do	1 case canned ³²	1.4 bushels fresh
Applesauce	1 case canned ³²	1.2 bushels fresh
Apricots	1 pound dried	6 pounds fresh
Brey	1 metric ton ³³	45.9296 bushels
Barley flour	100 pounds	4.59 bushels barley
Lima beans	1 pound shelled	2 pounds unshelled
Beans, snap or wax	1 case canned ³⁴	0.008 tons fresh
Buckwheat flour	100 pounds	3.47 bushels buckwheat
Doves	1 pound live weight	0.557 pounds dressed weight, 1954-63 average
Buttle	do	0.561 pounds dressed weight, 1954-63 average
Cane syrup	1 gallon	5 pounds sugar
berries, sour	1 case canned ³²	0.023 tons fresh
Chickens	1 pound live weight	0.72 pound ready-to-cook weight
Corn	1 metric ton ³³	39.368 bushels
Corn, shelled	1 bushel (56 lbs.)	2 bushels (70 pounds) of husked ear corn
Corn, sweet	1 case canned ³⁴	0.030 tons fresh
Cornmeal:		
Degermed	100 pounds	3.16 bushels corn, beginning 1946
Nondegermed	do	2 bushels corn, beginning 1946
Cotton	1 pound ginned	3.26 pounds seed cotton including trash ³⁵
Cottonseed meal	1 pound	2.10 pounds cottonseed
Cottonseed oil	do	5.88 pounds cottonseed
Dairy products:		
Butter	1 pound	21.1 pounds milk
Cheese	do	10 pounds milk
Condensed milk, whole	do	2.3 pounds milk
Dry cream	do	19 pounds milk
Dry milk, whole	do	7.6 pounds milk
Evaporated milk, whole	do	2.14 pounds milk
Malted milk	do	2.6 pounds milk
Nonfat dry milk	do	11 pounds liquid skim milk
Ice cream ³⁶	1 gallon	15 pounds milk
Ice cream ³⁶ (eliminating fat from butter and concentrated milk)	1 gallon	12 pounds milk
Eggs	1 case	47 pounds
Eggs, shell	do	39.5 pounds frozen or liquid whole eggs
Do	do	10.3 pounds dried whole eggs
Gums	1 pound dried	3 pounds fresh in California; 4 pounds fresh elsewhere
Axseed	1 bushel	About 2½ gallons oil
Rapefruit, Florida	1 case canned juice ³⁴	0.64 box fresh fruit
Oats	1 pound live weight	0.579 pounds dressed weight excluding lard, 1954-63 average
Inseed meal	1 pound	1.51 pounds flaxseed
Inseed oil	1 pound	2.77 pounds flaxseed
Almond	1 bushel (34 lbs.)	1 bushel barley (48 lbs.)
Apple sirup	1 gallon	8 pounds maple sugar
Butts:		
Almonds, imported	1 pound shelled	3½ pounds unshelled
Almonds, California	do	2.22 pounds unshelled through 1949; 2 pounds thereafter
Brazil	do	2 pounds unshelled
Cashews	do	4.55 pounds unshelled
Chestnuts	do	1.19 pounds unshelled
Filberts	do	2.22 pounds unshelled through 1949; 2.5 pounds thereafter
Pecans:		
Seedling	do	2.78 pounds unshelled
Improved	do	2.50 pounds unshelled
Pignollas	do	1.3 pounds unshelled
Pistachios	do	2 pounds unshelled
Walnuts:		
Black	do	5.88 pounds unshelled
Persian (English)	do	2.67 pounds unshelled
Ats.	1 metric ton ³³	68,8944 bushels
Atmeal	100 pounds	7.6 bushels oats, beginning 1943
Ranges, Florida	1 case canned juice ³⁴	0.53 box fresh
Oranges, California, freestone	1 pound dried	5½ pounds fresh through 1918; 6 pounds fresh for 1919-28; and 6½ pounds fresh from 1929 to date
Oranges, California, clingstone	do	7½ pounds fresh
Oranges, clingstone	1 case canned ³²	1.0 bushels fresh
Do	do	0.0230 tons fresh
Walnuts	1 pound shelled	1½ pounds unshelled
Ears	1 pound dried	6½ pounds fresh
Ears, Bartlett	1 case canned ³²	1.1 bushels fresh
Do	do	0.026 tons fresh
Walnuts, green	1 pound shelled	2½ pounds unshelled
Do	1 case canned ³⁴	0.009 tons fresh (shelled)

Rye flour.....	100 pounds.....	2.23 bushels rye beginning 1947
Sheep and lambs.....	1 pound live weight.....	0.482 pounds dressed weight, 1954–63 average
Soybeans.....	1 metric ton ²³	36,743 bushels
Soybean meal.....	1 pound.....	1.27 pounds soybeans
Soybean oil.....	do.....	5.49 pounds soybeans
Sugar.....	1 ton raw.....	0.9346 tons refined
Tobacco.....	1 pound farm-sales weight.....	Various weights of stemmed and unstemmed, according to aging and the type of tobacco. (See circular 435, U.S. Dept. of Agr.)
Tomatoes.....	1 case canned ²⁴	0.018 tons fresh
Turkeys.....	1 pound live weight.....	0.80 pounds ready-to-cook weight
Wheat.....	1 metric ton ²³	36,743 bushels
Wheat flour.....	100 pounds.....	2.30 bushels wheat ²⁷
Wool, domestic apparel shorn.....	1 pound greasy.....	0.48 pounds scoured
Wool, domestic apparel pulled.....	do.....	0.73 pounds scoured

¹ Standard bushel used in the United States contains 2,150.42 cubic inches; the gallon, 231 cubic inches; the cranberry barrel, 5,826 cubic inches; and the standard fruit and vegetable barrel, 7,056 cubic inches. Such large-sized products as apples and potatoes sometimes are sold on the basis of a heaped bushel, which would exceed somewhat the 2,150.42 cubic inches of a bushel basket level full. This also applies to such products as sweet-potatoes, peaches, green beans, green peas, spinach, etc.

² Approximate inside dimensions, 10 $\frac{1}{2}$ by 11 $\frac{1}{2}$ by 18 inches.

³ Approximate inside dimensions, 4 $\frac{1}{2}$ by 12 $\frac{1}{2}$ by 16 $\frac{1}{2}$ inches.

⁴ Approximate inside dimensions, 4 $\frac{1}{2}$ by 16 by 16 $\frac{1}{2}$ inches.

⁵ Approximate dimensions, 4 $\frac{1}{2}$ by 13 $\frac{1}{2}$ by 16 $\frac{1}{2}$ inches.

⁶ Approximate inside dimensions, 13 by 12 by 32.

⁷ Inside dimensions vary. Common sizes are 13 by 13 by 22 $\frac{1}{2}$ inches, and 13 by 15 $\frac{1}{2}$ by 23 inches.

⁸ Approximate inside dimensions, 13 by 18 by 21 $\frac{1}{2}$ inches.

⁹ Approximate inside dimensions, 13 by 13 by 22 $\frac{1}{2}$ inches.

¹⁰ This is the weight commonly used in trade practices, the actual weight varying according to temperature conditions.

¹¹ Approximate inside dimensions, 9 $\frac{1}{2}$ by 16 by 20 inches.

¹² Approximate inside dimensions, 4 $\frac{1}{2}$ by 11 $\frac{1}{2}$ by 14 inches.

¹³ The standard weight of 70 pounds is usually recognized as being about 2 measured bushels of corn, husked on the ear, because it requires 70 pounds to yield 1 bushel, or 56 pounds, of shelled corn.

¹⁴ For statistical purposes the bale of cotton is 500 pounds or 480 pounds net weight. Prior to Aug. 1, 1946, the net weight was estimated at 478 pounds. Actual bale weights vary considerably, and the customary average weights of bales of foreign cotton differ from that of the American square bale.

¹⁵ This is the average weight of cottonseed, although the legal weight in some States varies from this figure of 32 pounds.

¹⁶ Approximate inside dimensions, 9 $\frac{1}{2}$ by 10 $\frac{1}{2}$ by 15 inches.

¹⁷ Approximate inside dimensions, 13 $\frac{1}{2}$ by 11 by 16 $\frac{1}{2}$ inches.

¹⁸ Approximate inside dimensions, 11 $\frac{1}{2}$ by 11 $\frac{1}{2}$ by 24 inches.

¹⁹ In California and Arizona from 1942 through 1953 the net weights as used by this Department were 77 pounds for oranges, 79 pounds for lemons, and 65 pounds for Desert Valleys grapefruit. Grapefruit in California areas other than the Desert Valleys averaged 68 pounds. The new weights effective in 1954 reflect the shift from the "box" to the $\frac{1}{2}$ box carton as the container used.

²⁰ Approximate inside dimensions, 10 $\frac{1}{4}$ by 10, 11 $\frac{1}{4}$ by 16 $\frac{1}{2}$ inches for oranges or lemons, and 9 $\frac{1}{4}$ by 10, 11 $\frac{1}{4}$ by 16 $\frac{1}{2}$ inches for grapefruit.

²¹ Approximate inside dimensions, 9 $\frac{1}{2}$ by 13 $\frac{1}{2}$ by 16 $\frac{1}{2}$ inches.

²² Approximate inside dimensions, 4 $\frac{1}{2}$ by 16 by 16 $\frac{1}{2}$ inches.

²³ Approximate inside dimensions, 7 $\frac{3}{4}$ by 16 by 21 $\frac{1}{2}$ inches.

²⁴ Approximate inside dimensions, 9 $\frac{1}{2}$ by 13 by 25 inches.

²⁵ Approximate inside dimensions, 12 by 12 by 24 inches.

²⁶ Approximate inside dimensions vary. Common size is 4 $\frac{1}{2}$ by 11 $\frac{1}{2}$ by 16 $\frac{1}{2}$ inches.

²⁷ Approximate inside dimensions, 8 $\frac{1}{2}$ by 11 $\frac{1}{2}$ by 18 inches.

²⁸ Approximate inside dimensions, 12 by 10 $\frac{1}{2}$ by 33 inches.

²⁹ Inside dimensions vary. Ranges from 4 by 16 by 16 $\frac{1}{2}$ inches to 6 by 16 by 16 $\frac{1}{2}$ inches.

³⁰ Includes both sorghum grain (kafr, milo, hegari, etc.) and sweet sorghum varieties.

³¹ This average of 55 pounds indicates the usual weight of sweetpotatoes when harvested. Much weight is lost in curing or drying and the net weight when sold in terminal markets may be below 55 pounds.

³² Case of 24 number 2 $\frac{1}{2}$ cans.

³³ 1 metric ton is equivalent to 2,204.6 pounds.

³⁴ Case of 24 number 303 cans.

³⁵ Varies widely by method of harvesting.

³⁶ The milk equivalent of ice cream per gallon is 15 pounds. Reports from plants indicate about 81 percent of the butterfat in ice cream is from milk and cream, the remainder being from butter and concentrated milk. Thus the milk equivalent of the milk and cream in a gallon of ice cream is about 12 pounds.

³⁷ This is equivalent to 4.51 bushels of wheat per barrel (196 pounds) of flour and has been used in conversions beginning July 1, 1957. Because of changes in milling processes, the following factors per barrel of flour have been used for earlier periods: 1790–1879, 5 bushels; 1880–1908, 4.75 bushels; 1909–17, 4.7 bushels; 1918 and 1919, 4.5 bushels; 1920, 4.6 bushels; 1921–44, 4.7 bushels; July 1944–Feb. 1946, 4.57 bushels; March 1946–Oct. 1946, average was about 4.31 bushels; and Nov. 1946–June 1957, 4.57 bushels.

CHAPTER I

STATISTICS OF GRAIN

This chapter contains tables for wheat, rye, rice, buckwheat, corn, oats, barley, sorghum grain, and feed stuffs. Estimates are given of acreage, production, farm disposition, prices, farm value, stocks, foreign production and trade, and price support operations. The United States tables on acreage, yield, production, value and foreign trade for the most part extend back to 1949. Data on earlier years are available from the 1962 Agricultural Statistics. Estimates in greater detail are published regularly by the Crop Reporting Board for commodities treated in this chapter.

Tables on popcorn are placed in chapter V with "minor field crops". Corn sugar and corn sirup, however, are included in the corn tables.

Three new tables have been added to this chapter showing United States exports under specified government programs for wheat and wheat flour, rice, and feed grains.

Table 1.—Wheat: Acreage, yield, production, value, and foreign trade, United States, 1949–64

Year	Acreage seeded ¹	Acreage harvested	Yield per harvested acre	Production	Season average price per bushel received by farmers ²	Farm value	Average price per bushel, year beginning July, at—		Foreign trade, including flour, year beginning July ³

1964 ¹⁰	55,046	49,170	26.2	1,290,468	1.38	1,774,135					

¹ Includes acreage seeded in preceding fall for harvest in the year shown.

² Obtained by weighing State prices by quantity sold. Includes an allowance for loans unredeemed at the end of the crop marketing season and for quantities bought by the Government under purchase agreements when such transactions are of significant volume.

³ No. 2 Hard and Dark Hard Winter, computed by weighting selling prices by number of carlots sold, as reported in the Kansas City Grain Market Review.

⁴ No. 1 Dark Northern Spring, computed by weighting selling prices by number of carlots sold as reported in the Minneapolis Daily Market Record.

⁵ Compiled from reports of the U.S. Department of Commerce. Wheat flour converted to grain equivalent on the following basis: 1949-June 30, 1957, 2.33; and July 1, 1957 to date, 2.30 bushels of grain to 100 pounds of flour.

⁶ Includes flour milled from imported wheat. Excludes exports for relief or charity by individuals and private agencies.

⁷ Includes wheat imported for milling in bond and subsequent export.

⁸ Domestic exports minus imports for consumption.

⁹ Excludes some minor producing States and parts of other States where wheat was not asked separately.

¹⁰ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1866-1948 in *Agricultural Statistics*, 1962, table 1.

¹ Acreage seeded in preceding fall for winter wheat.² Preliminary.³ Includes Minnesota, North Dakota, South Dakota and Montana. California included, beginning 1956.⁴ Includes small quantities of durum wheat grown in States other than those specified in footnote 3.⁵ Total of acreage seeded to winter wheat and all spring wheat.⁶ Total acreage seeded less an allowance for winter wheat acreage abandoned and later reseeded to spring wheat for harvest in the same crop year. Occurs principally in the Pacific Northwest.Statistical Reporting Service. Winter wheat and spring wheat data for 1934-54 in *Agricultural Statistics, 1962*, table 2.

¹ Includes acreage seeded in preceding fall for harvest in the year shown.

² Preliminary.

³ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁴ 1962 only.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1964 is combined with preliminary forecasts for the Southern Hemisphere harvests, which began late in 1964 and ended early in 1965.

² Refers to harvested areas as far as possible.

³ Preliminary.

⁴ Yield per acre calculated from acreage and production data shown.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ U.S.S.R. official reports of production appear to be over estimated and have been adjusted.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

Table 6.—Wheat: Production, seed used, and farm disposition, United States, 1955–64

1963-----	710	2,877	89	653	4,329	0

¹ Imports of wheat of milling quality have been limited to a quota of 800,000 bushels per year since May 29, 1941, of which 795,000 may come from Canada. Quantities in excess of the 800,000-bushel quota represent quota-free imports of seed wheat authorized by Presidential Proclamation 2550, April 16, 1942.

² Imports of flour have been limited to a quota of 4,000,000 pounds per year since May 29, 1941, of which 3,815,000 pounds may come from Canada (total quota is 93,200 bushels, wheat equivalent). Flour for special experimental purposes may be imported ex-quota.

³ Consist of such products as macaroni, spaghetti and similar products, wheat cereal breakfast foods, bread and biscuits, semolina and prepared mixes.

Economic Research Service. Data for 1939–53 in *Agricultural Statistics, 1960*, table 8.

FOOTNOTES FOR TABLE 12

¹ Owned by Commodity Credit Corporation and stored in bins or other storage owned or controlled by CCC Other Commodity Credit Corporation-owned wheat included in the estimates by positions.² Include full-duty wheat, wheat imported for feed, and dutiable flour and other products in terms of wheat. Exclude wheat imported for milling in bond and export as flour.³ Included with "Interior mill, elevator, and warehouse."⁴ Preliminary.⁵ Includes flour and other products in terms of wheat.⁶ Food use is computed as follows: Total grind (commercial and noncommercial) less exports and shipments of flour and other wheat products, less military procurement, plus estimated breakfast food produced outside the flour milling industry, plus dutiable imports of flour and other wheat products.⁷ Quantity of wheat used for the production of distilled spirits.⁸ Residual item; roughly approximates total use as feed, including that used in commercial feed as well as that fed on farms.⁹ Includes procurement for military food use at home and abroad; includes military takings for civilian feeding in occupied areas in 1954.¹⁰ Excludes exports of 963,000 bushels in 1954 for civilian feeding by the military abroad which are included in military procurement. Includes exports for relief or charity by individuals and private agencies, beginning in 1955.¹¹ Shipments to U.S. territories.¹² Total disappearance represents total supply minus year-end carryover.¹³ Includes an allowance for donations of bulgur and rolled wheat not reported by Bureau of the Census.Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce and U.S. Department of Agriculture. Military procurement from the National Military Establishments. Data for 1939–53 in *Agricultural Statistics, 1962*, table 11.

¹ Markets are Chicago, Minneapolis, Kansas City, St. Louis, Omaha, and Duluth.² Basic export selling price of Australian Wheat Board, bulk f.o.b. basis. Prices are for both International Wheat Agreement quota and "free" wheat.³ Prior to 1960, short patents.

Economic Research Service. Compiled as follows: Grain Market News (C&MS); Minneapolis Daily Market Record; St. Louis Daily Market Reporter; Kansas City Grain Market Review; Chicago Board of Trade; New York Journal of Commerce; Canadian Grain Statistics; The Wheat Industry of Australia and Bureau of Labor Statistics Wholesale Price Bulletin. Minneapolis, St. Louis, Kansas City, and Chicago are weighted averages. Foreign prices are compiled in original currencies and units. Prices converted to cents per bushel of 60 pounds at current monthly rates of exchange as reported by the Federal Reserve Board. Data for 1939-54 in *Agricultural Statistics*, 1962, table 15.

¹ Percentage of the parity price as of the beginning of the marketing year, except for 1965.² Includes loans made, purchase agreements entered into and direct purchases.³ Acquisitions from crop harvested in year indicated and not acquisitions during that period.⁴ Includes price support payment of 18 cents per bushel to participants in the Wheat Stabilization Program.

⁵ Represents wheat accompanied by domestic marketing certificate, latter valued at 70 cents for 1964 crop and 75 cents for 1965 crop.

⁶ Does not include value of marketing certificates.⁷ Preliminary.

Agricultural Stabilization and Conservation Service. Data for 1949-54 in *Agricultural Statistics*, 1962, table 16.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1964 is combined with preliminary forecasts for the Southern Hemisphere harvests, which began late in 1964 and ended early in 1965.

² Refers to harvested areas as far as possible.

³ Preliminary.

⁴ Yields per acre calculated from acreage and production data shown.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ U.S.S.R. official reports of production appear to be over estimates and have been adjusted.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Obtained by weighting State prices by quantity sold.² Compiled from reports of the U.S. Department of Commerce. Buckwheat flour converted to grain equivalent on the basis of 7 bushels of grain to 1 barrel of flour.³ Includes shipments under the Army Civilian Supply Program.⁴ Domestic exports minus imports, with net imports shown by a minus sign.⁵ Excludes some minor producing States.⁶ Not separately reported, beginning January 1958.⁷ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1924-48 in *Agricultural Statistics, 1962*, table 34.

¹ Obtained by weighting State prices by quantity sold. Includes an allowance for loans unredeemed at the end of the crop marketing season and for quantities bought by the Government under purchase agreements when such transactions are of significant volume.

² Compiled from reports of the Department of Commerce. Includes corn meal converted to grain equivalent on the basis of 3.16 bushels of grain to 100 pounds of meal.

³ Includes shipments under the Army Civilian Supply Program.

⁴ Domestic exports minus imports for consumption.

¹ Preliminary.Statistical Reporting Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes. Data for 1934-54 in *Agricultural Statistics, 1962*, table 44.

FOOTNOTES FOR TABLE 43

¹ Years shown refer to years of harvest in the Northern Hemisphere.

Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which follow; thus the crop harvested in the Northern Hemisphere in 1964 is combined with preliminary forecasts for the Southern Hemisphere harvest which began early in 1965.

² Refers to harvested area as far as possible.³ Preliminary.⁴ Yield per acre calculated from acreage and production data shown.⁵ Dried corn only.⁶ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

Table 46.—Corn: Production and farm disposition, by States, crop of 1964 (preliminary)

¹ Owned by CCC and stored in bins or other storage owned or controlled by CCC.² Compiled from reports of the U.S. Department of Commerce. Imports include grain equivalent of corn meal and flour; exports are grain only.³ Terminal market and interior mill, elevator, and warehouse stocks combined beginning October 1, 1960.⁴ Preliminary. Rough allowance for 1964-65 imports.⁵ Estimated quantities (based on Census data) used in making prepared breakfast foods.⁶ Estimated quantities used in producing cornmeal, flour, hominy grits and flakes for human food and for the production of fermented malt liquors. Based on reports of the U.S. Department of Commerce and the Internal Revenue Service. Does not include corn processed for livestock feed.⁷ Starch, syrup, sugar, etc. Compiled from data of Price Waterhouse and Company and Dun and Bradstreet, New York.⁸ Compiled from data of the Internal Revenue Service. Data derived by converting grain and products to bushel equivalent.⁹ Based on acreage planted to the following crop.¹⁰ Residual; includes some other minor uses and waste.¹¹ Total disappearance, minus exports of corn and grain equivalent of products.¹² Not reported beginning 1961.Economic Research Service. Data for 1939-53 in *Agricultural Statistics, 1962*, table 47.

¹ Estimates of seeded acreage relate to the total acreage of oats sown for all purposes, including oats sown in the preceding fall.

² Obtained by weighting State prices by quantity sold. Includes an allowance for loans unredeemed at the end of the crop marketing season and for quantities bought by the Government under purchase agreements when such transactions are of significant volume.

³ Compiled from reports of the Chicago Board of Trade, average of daily quotations for No. 2 white, weighted by carlot sales.

⁴ Compiled from reports of the Department of Commerce. Oatmeal converted to grain equivalent on the basis of 1 bushel of grain to 13.17 pounds of meal.

⁵ Includes shipments under the Army Civilian Supply Program.

⁶ Includes "oats, unhulled, ground."

⁷ Domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁸ Excludes some minor producing States and parts of other States where oats were not asked separately.

⁹ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1866-1948 in *Agricultural Statistics*, 1962, table 52.

¹ Preliminary.

Statistical Reporting Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes. Data for 1934–54 in *Agricultural Statistics, 1962*, table 55.

Statistical Reporting Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 54

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1964 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1964 and ended early in 1965.

² Refers to harvested areas as far as possible.

³ Preliminary.

⁴ Yield per acre calculated from acreage and production data shown.

⁵ Production and yield reported in bushels of 34 pounds.

⁶ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁷ U.S.S.R. official reports of production appear to be over estimated and have been adjusted.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Estimates of seeded acreage relate to the total acreage of barley sown for all purposes, including barley sown in the preceding fall.

² Obtained by weighting State prices by quantity sold. Includes an allowance for loans unredeemed at the end of the crop marketing season and for quantities bought by the Government under purchase agreements when such transactions are of significant volume.

³ Price of No. 3 barley, average of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.

⁴ Compiled from reports of the U.S. Department of Commerce. Barley flour converted to grain equivalent on the basis of 22.032 pounds of flour to 1 bushel of grain. Barley malt converted to grain equivalent on the basis of 1 bushel of grain to 1 bushel of malt.

⁵ Includes shipments under the Army Civilian Supply Program.

⁶ Domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁷ Excludes some minor producing States and parts of other States where barley was not asked separately.

⁸ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1924–48 in *Agricultural Statistics, 1962*, table 61.

¹ Preliminary.

Statistical Reporting Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes. Data for 1934–54 in *Agricultural Statistics, 1962*, table 64.

Table 65.—Barley: Production and farm disposition, by States, crop of 1964 (preliminary)

Statistical Reporting Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 63

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1964 is combined with preliminary forecasts for the Southern Hemisphere harvests with began late in 1964 and ended early in 1965.

² Refers to harvested areas as far as possible.

³ Preliminary.

⁴ Yield per acre calculated from acreage and production data shown.

⁵ Estimated totals, which in the case of production, are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ U.S.S.R. official reports of production appear to be over estimates and have been adjusted.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Owned by CCC and stored in bins or other storage owned or controlled by CCC. Additional CCC stocks are included in other off-farm positions.

² Compiled from reports of the U.S. Department of Commerce. Both imports and exports include grain equivalent of barley products.

³ Terminal market and interior mill, elevator, and warehouse stocks combined beginning July 1, 1961.

⁴ Preliminary. Rough allowance for 1964–65 imports.

⁵ Compiled from reports of the Internal Revenue Service. Includes small quantities of barley grain.

⁶ Principally for food uses.

⁷ Based on acreage seeded to the following crop.

⁸ Residual; includes other minor uses and waste.

⁹ Total disappearance, minus exports of barley grain and grain equivalent of malt exported.

Economic Research Service. Data for 1939–53 in *Agricultural Statistics*, 1962, table 66.

¹ Consumption data for most grains are measured at the processing level. Total consumption is the grain equivalent of the food products processed from the grains. Excludes quantities used for alcoholic beverages. Beginning 1960, includes Alaska and Hawaii.

² Includes white, whole wheat, and semolina flour.

³ Rice consumption for year beginning August previous to the year stated.

⁴ Excludes corn and corn products used in the production of alcoholic beverages. Total corn includes an allowance for the quantity used as hominy and grits and minor food uses.

⁵ Barley consumed in food products, excluding malt beverages, expressed in terms of grain equivalent. Includes quantities used as pearl barley, flour, malt extract, and other food products.

⁶ Malt equivalent of barley grain used for food.

⁷ Preliminary.

Economic Research Service. All figures are estimates based on data from private industry sources, the U.S. Department of Commerce, the Internal Revenue Service, and other government agencies. Data for 1909-48 in *Agricultural Statistics, 1962*, table 72.

¹ Grain and sweet sorghums for all uses, including sirup.

² Includes both grain sorghums for grain and sweet sorghums for grain or seed.

³ Based on the reported price of grain sorghums. Obtained by weighting State prices by quantity sold. Includes an allowance made for loans unredeemed at the end of the crop marketing season and for quantities bought by the Government under purchase agreements when such transactions are of significant volume.

⁴ Dec. 1 price.

⁵ Dry weight.

⁶ Green weight.

¹ Based on prices of the following commodities at leading producing markets, weighted by average consumption: Soybean, cottonseed, linseed, copra, and peanut meals; bran, middlings, shorts and millrun; gluten feed and meal; hominy feed; brewers' and distillers' dried grains; alfalfa meal; rice bran, and feeding molasses.

Consumer and Marketing Service. Data for 1939–53 in *Agricultural Statistics, 1962*, table 85.

CHAPTER II

STATISTICS OF COTTON, SUGAR, AND TOBACCO

In addition to tables on cotton, sugar, and tobacco, this chapter includes tables on fibers other than cotton, sirups, sugar, honey, and beeswax. Most cottonseed data, however, are in the following chapter on oilseeds, fats, and oils.

Much of the information on cotton lint is given in terms of "running" bales. The term "running bale," when applied to weight, is the average weight of a bale as it comes from the gin, when applied to number, it is the number of bales actually ginned.

Tables showing acreage, yield, and production of sugarcane, sugar, and molasses in Cuba and Hawaii have been dropped. Cuba is no longer a supplier of sugar to the United States and data for Hawaii are included in other U.S. tables.

Table 87.—Cotton: Acreage, yield, production value, and foreign trade, United States, 1949–64

¹ Census of Agriculture figures for all periods are in running bales. U.S. Department of Agriculture figures are in 500-pound gross-weight bales for all years.

² Gross weight price, including bagging and ties, except that extra long staple cotton is included at net weight. Includes allowance for loans unredeemed at date of maturity.

³ Prices for middling grades; 15½-inch staple, through July 1956; 1-inch staple beginning August 1956.

⁴ Compiled from reports of the U.S. Department of Commerce. Equivalent bales of 500 pounds gross weight.

⁵ Excluding linters.

⁶ Preliminary.

⁷ Average price to April 1, 1965, including an allowance for unredeemed loans.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Production figures conform with census annual ginning enumerations. Data for 1866–1948 in *Agricultural Statistics, 1966*, table 86.

1965-----	6 32.60	-----	-----	-----	-----	-----	-----

¹ Basis $\frac{1}{2}$ -inch middling through 1960, average of crop for later years. The percent of the parity price is as of the beginning of the marketing year, except 1959, 1960, 1961 and 1963 as of Feb. 1, and 1962 as of Jan. 1.

² Includes loans made and direct purchases.

³ Acquisitions from crop harvested in year indicated.

⁴ Running bales.

⁵ For cotton grown by farmers electing choice A acreage allotments. Corresponding support level for choice B for 1959 is 24.70 cents which is 65 percent of parity; for 1960 it is 23.18 cents which is 60 percent of parity.

⁶ Includes price support payment to producers planting within their domestic allotment of 3.5 cents in 1964 and 4.35 cents in 1965. Price support levels established by legislation without reference to parity.

⁷ Preliminary.

Agricultural Stabilization and Conservation Service. Data for 1949–54 in *Agricultural Statistics, 1962*, table 105.

FOOTNOTES FOR TABLE 88

¹ Preliminary.

² Bales ginned, as reported by the U.S. Department of Commerce with an allowance made for interstate movement of seed cotton for ginning, rounded to thousands, by States. Cotton produced but not ginned is not included in production.

³ Gross weight price, including bagging and ties, except that American-Egyptian cotton is included at net weight. Includes allowance for loans unredeemed at date of maturity.

⁴ Average price to April 1, 1965.

⁵ Sums of acreage and production for "other States" rounded for inclusion in U.S. totals. Estimates for these States are shown separately.

⁶ Included in State and U.S. totals.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 90

¹ Years refer to crop years beginning August 1 in which major portion of crop was harvested.

² Production in bales of 480 pounds net.

³ Preliminary.

⁴ Includes estimates for minor-producing countries not listed above and allowance for countries where data are not yet available.

⁵ Malawi, formerly Nyasaland; Zambia, formerly Northern Rhodesia.

⁶ Formerly Tanganyika.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Data represent consumption during 12 reporting periods and do not necessarily agree with crop year totals shown in table 91.

² Domestic in running bales, and foreign in equivalent bales of 500 pounds.

³ Included with upland.

⁴ Not reported separately; shown under "Other".

Consumer and Marketing Service. Compiled from reports of the U.S. Department of Commerce. Data for 1939–53 in *Agricultural Statistics*, 1962, table 89.

1956	96.0	32.7	1964	92.9	32.8

¹ Computed by weighting the quantity in each grade by the 1937-39 average price per pound for such grade of 1½ inch staple. Converted to an index with "Middling White" equaling 100. For 1958 and subsequent years, constants for "Plus," "Light Spotted" and "Light Gray" set at mid-points between full grade weights.² Averages calculated on numerical equivalents of the staple-length designation. For example 3/8 inch = 28, 29/16 inch = 29, etc. Averages are in terms of thirty-seconds inches.Consumer and Marketing Service. Data for 1928-48 in *Agricultural Statistics, 1962*, table 94.

¹ Computed by weighting the quantity in each grade by the 1937-39 average price per pound for such grade of $1\frac{5}{16}$ inch staple. Converted to an index with "Middling White" equaling 100.

² Average calculated on numerical equivalents of the staple-length designations. For example, $\frac{1}{8}=28$, $\frac{29}{32}=29$, etc.

³ Illinois, Kentucky and Nevada.

¹ All prices are averages of weekly quotations, 52 weeks or less. These quotations do not include export taxes of varying amounts in effect in all the above countries during the past 5 or more years.

² Prices for Alexandria are Egyptian Cotton Commission official export selling prices since May 31, 1962. Effective July 9, 1964, Menoufi replaced Karnak which is no longer being produced.

³ Matamoros District cotton in standard density bales, ex-warehouse, Brownsville, Tex., Mexican export taxes paid. For shipside H/D add 0.64 cent a pound. Prices are for gross weight.

Foreign Agricultural Service.

¹ The cost to consumers for 25 items of clothing and household textiles divided by the number of pounds of lint cotton estimated to be required for their manufacture. Annual averages are simple averages of retail costs in March, June, September, and December.

² Estimated farm value of cotton of grades and staple lengths suitable for manufacture of the products, less allowance for value of salable spinning waste, divided by the number of pounds of cotton required. Farm value is based on average prices of cotton in central markets less one-half cent per pound estimated to the difference between central-market price and price received by farmers.

Economic Research Service. Data for 1939-48 in *Agricultural Statistics, 1962*, table 106.

¹ Includes bags and bagging for cotton (new and second-hand), webbing, padding, carpets and rugs, and yarns.² In some instances import statistics have been converted from yards to pounds on the basis of average weights.³ Prices for raw jute are for native first marks, duty-paid.⁴ Excludes Communist China, Manchuria, and U.S.S.R.; and excludes mesta and other substitutes wherever possible.⁵ Preliminary.⁶ Raw abaca and manila cordage.⁷ Prices for raw abaca are for Davao Grade I.⁸ Sisal and henequen cordage.⁹ Prices for raw sisal are for Haitian Grade A, compiled from New York Journal of Commerce.

Economic Research Service and Foreign Agricultural Service. Import data compiled from reports of the U.S. Department of Commerce; price data, except as noted, from reports of the U.S. Department of Labor. Production data prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information. Data for 1944-54 in *Agricultural Statistics, 1962*, table 112.

¹ Preliminary.

² Does not include Government payments under the Sugar Act. The U.S. average for these payments excluding abandonment and deficiency payments amounted to \$2.20 per ton in 1963 and approximately \$2.28 per ton in 1964. See table 123.

³ Less than 5 years.

⁴ Relates to year of harvest. Includes some acreage harvested in the beginning of the following year.

⁵ U.S. totals rounded to hundreds for acreage and to thousands for production.

Statistical Reporting Service.

¹ Includes Hawaii beginning 1949 for acres harvested, yield per acre and production of sugarcane for sugar and sugar production; molasses production for Hawaii beginning in 1950. Also includes Hawaii from 1959 to date for acres harvested, yield and production of sugarcane for seed. Price and value not available for Hawaii.

² The growth of 9 months in Louisiana and 12 months in Florida, and 18–24 months in Hawaii. Sugarcane harvest usually ends by December or early January in Louisiana, in Florida by March following the season of growth; and in Hawaii the harvest takes place throughout the year.

³ Preliminary.

⁴ Prices do not include Government payments under the Sugar Act.

⁵ Raw value is the equivalent in terms of 96° sugar as defined in the Sugar Act of 1948.

⁶ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.

⁷ Syrup production not included. See table 139.

Statistical Reporting Service. Of the total sugar produced in Louisiana about 25 percent consists of direct consumption sugar, marketed "as made" without further refining. Data for 1924–48 in *Agricultural Statistics*, 1962, table 122.

FOOTNOTES FOR TABLE 125

¹ Preliminary.

² The growth of 9 months in Louisiana, 12 months in Florida, and 18–24 months in Hawaii. Sugar campaign usually ends by December or early January in Louisiana, in Florida by March following the season of growth, and in Hawaii the harvest takes place throughout the year. Yield of cane for sugar used in computing production for seed in Florida and Louisiana.

³ Does not include Government payments under the Sugar Act. The United States average for these payments excluding abandonment and deficiency payments amounted to \$1.15 per ton in 1963 and approximately \$1.05 in 1964. See table 113.

⁴ Averages do not include cane for seed in Hawaii in 1958.

⁵ Raw value is the equivalent in terms of 96° sugar as defined in the Sugar Act of 1948.

⁶ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.

⁷ Includes high-test molasses made from frozen cane and edible.

Statistical Reporting Service.

1964 ³	341	303	33.4	10,123	989	195	61,548

¹ Grinding generally begins in January. December grindings are included in the following year. About one-third of the crop is 18 months' growth, two-thirds is 12 months' growth.² Raw value is the equivalent in terms of 96° sugar, as defined in the Sugar Act of 1948.³ Preliminary.Agricultural Stabilization and Conservation Service. Data for 1934–48 in *Agricultural Statistics, 1962*, table 126.

FOOTNOTES FOR TABLE 130

¹ Years shown are crop-harvesting years. Campaigns beginning not earlier than May of year shown, nor later than April of following year are included in the same crop year. The entire season's production of each country is credited to the May/April year in which harvesting and sugar production began.² Preliminary.³ Centrifugal sugar, as distinguished from noncentrifugal, includes cane and beet sugar produced by the centrifugal process, which is the principal kind moving in international trade.⁴ Includes Antigua, St. Kitts, St. Lucia, and St. Vincent.⁵ Excludes sugar from imported beets.⁶ No sugar produced prior to 1961–62.⁷ Production related to calendar years for the first of the two years indicated in crop-year heading.⁸ Formerly Tanganyika.⁹ Includes Swaziland.¹⁰ Includes Khandasi amounting to about 15 percent of total.¹¹ Noncentrifugal sugar includes all types of sugar produced by other than centrifugal process which is largely for consumption in the relatively few areas where produced. The estimates include such kinds known as piloncillo, panela, papelon, chancaca, rapadura, jaggery, gur, muscovado, panocha, etc.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

1964 ⁵	870	809	24.40	18,078	2,000	69	221	129,335	

¹ Harvesting begins in October. The length of the growing season being about 11 months.² Total harvested acreage includes acreage for both centrifugal and noncentrifugal sugar. The acreage for noncentrifugal sugar has been estimated on the assumption 1 acre of cane yields about 1.5 tons of noncentrifugal sugar for the year 1949.³ Cane production divided by harvested acreage.⁴ Prior to 1950 calculated cane production is the quantity of cane ground for centrifugal sugar, estimated on the basis of the reported yield of sugar per ton of cane. From 1950 to date the cane production is reported.⁵ As reported prior to 1950 and from 1952 to 1957. Other years computed.⁶ Preliminary.Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information. Data for 1934-48 in *Agricultural Statistics, 1962*, table 128.

¹ Raw value is the equivalent in terms of 96° sugar. Importations and domestic marketings under annual sugar requirements determinations and quotas, pursuant to the Sugar Act of 1948, as amended. These comprise all sugar marketings except importations for re-export and for livestock feed which were 62,000 tons average for 1955-59, 118,000 tons in 1962, 38,000 tons in 1963, and 36,000 tons in 1964.

¹ Expressed in raw value, the equivalent in terms of 96° sugar, as defined in the Sugar Act of 1948.

² Receipts include refiners' total offshore raw sugar receipts in continental U.S. ports, whether entered through the customs or held pending availability of quota, and raw cane sugar produced from sugarcane in the continental U.S.

^a Includes 22,000 tons delivered for export.

Agricultural Stabilization and Conservation Service. Data for 1939-54 in *Agricultural Statistics, 1962*, table 132.

FOOTNOTES FOR TABLE 133

¹ Puerto Rican direct consumption sugar included in "Importers of direct consumption sugar"; Hawaiian direct consumption sugar included in "Cane sugar refineries". Stocks include sugar in bond and in customs custody and control.

² All sugars converted to refined basis.

³ Sugar for direct consumption only. Mainland cane sugar mills stocks and production for direct consumption not separately reported.

⁴ Includes deliveries for export, either in the form of sugar or as sugar contained in manufactured products in thousand tons, as follows: 1955, 39; 1956, 114; 1957, 28; 1958, 56; 1959, 54; 1960, 43; 1961, 52; 1962, 59; 1963, 30; 1964, 21.

⁵ Agricultural Stabilization and Conservation Service. Data for 1937-54 in *Agricultural Statistics, 1962*, table 133.

FOOTNOTES FOR TABLE 134

¹ All stock carryover dates, except for January and April 1, apply to the first year mentioned at the head of each column.

² Preliminary.

³ Less than 5 years.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Production harvested within the calendar year specified. Farm sales weight is about 10 percent above dry weight which is normally reported in trade statistics.

² Preliminary.

³ Includes missing data for countries listed.

⁴ Less than 500 acres.

⁵ Includes data for countries not listed.

⁶ Formerly Northern Rhodesia.

⁷ Formerly Nyasaland.

⁸ Formerly Tanganyika and Zanzibar.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officer, results of office research and related information.

¹ July 1 for flue-cured types 11-14 and cigar types 61 and 62; Oct. 1 for all other types.

² Farm-sales weight of exports is subject to revision. Exports by rehandling trade included in totals of types from which they are made.

³ Preliminary.

⁴ Domestic disappearance adjusted to take account of some 1962 tobacco still at farm level at the end of marketing year.

⁵ Puerto Rican crop planted in the fall of the year shown and harvested the following spring.

⁶ Includes Perique.

Economic Research Service. Basic export data from the official reports of the Department of Commerce. Data for Puerto Rico from "Basic Statistics on Puerto Rico," Office of Puerto Rico. Data for 1949-59 in *Agricultural Statistics, 1962*, table 156.

1965	59.5	(4)			

¹ This table does not show total support operations for tobacco. Only burley and flue-cured are shown because they are substantially more important in the total tobacco picture than other types which are also supported.

² Exceeds 90 percent of parity for flue-cured, and for burley in 1955, because of a decline in parity after the minimum support price was announced in April 1955.

Title to tobacco obtained under the price support program is retained in most cases by the Producer's Cooperative Association handling price support loans.

⁴ Parity price no longer used to determine support level.

⁵ Preliminary.

Agricultural Stabilization and Conservation Service. Data for 1949-54 in *Agricultural Statistics*, 1962, table 163.

1963 ⁶	29.6	17.2	3.78	12.9	5.4	7.5	12.9	12.8

¹ The consumer price index for regular-size cigarettes, U.S. Department of Labor, is applied to December 1952 price per pack to compute quarterly prices. Annual retail cost per pack is simple average of prices for September, December, March, and June.

² U.S. Department of Labor. Average of list prices of three manufacturers for popular brands of cigarettes delivered to wholesalers and jobbers—adjusted for cash and trade discounts.

³ Value of 0.065 pound of leaf tobacco (farm-sales weight), calculated from seasonal prices received by growers for three kinds of cigarette-type tobacco. Auction fees have not been deducted.

⁴ Spread between farm value and wholesale price less Federal excise tax.

⁵ Retail-wholesale spread less average State tax.

⁶ Preliminary.

Economic Research Service. Data for 1939-53 in *Agricultural Statistics, 1962*, table 160.

Foreign Agricultural Service. Compiled from reports of the U.S. Department of Commerce.

CHAPTER III

STATISTICS OF OILSEEDS, FATS, AND OILS

This chapter includes information on cottonseed, flaxseed, olive oil, peanuts, soybeans, tung nuts, margarine, and fats and oils. Most butter statistics are included in the chapter on dairy and poultry statistics. Lard data are mostly in the chapter on livestock.

Table 165.—Cottonseed: Cotton acreage, cottonseed yield, production, farm disposition, season average price per ton received by farmers, and value, United States, 1949–64

Year	Harvested acreage of cotton	Cottonseed

¹ United States averages not fully representative of entire crop because of relatively small volume of seed graded in some areas.² These basic factors are combined to form indexes of quantity and quality which in turn are used to determine the official grade of cottonseed in accordance with the United States Official Standards for Grades.³ The quantity index measures the oil and cake or meal in the cottonseed, taking into account variations in the quantity of oil, protein, and linters.⁴ The quality index measures the deterioration in oil and meal and takes into account the excesses of moisture and foreign matter.⁵ The average grade is the product of the quantity index times the quality index. The base grade is 100.0.⁶ Samples graded by licensed chemists under the supervision of the U.S. Department of Agriculture.Consumer and Marketing Service. Data for 1944–53 in *Agricultural Statistics, 1962*, table 168.

¹ Years shown refer to years of harvest.

² Preliminary.

³ Includes estimates for the above countries for which data are not available and for minor producing countries.

⁴ Rhodesia (Southern Rhodesia), Malawi (Nyasaland), Zambia (Northern Rhodesia).

⁵ Formerly Tanganyika and Zanzibar.

Foreign Agricultural Service. Data for countries other than the United States, Egypt, and the Sudan were calculated from lint-production estimates.

¹ Peanuts in the shell. Southern Hemisphere peanut crops, which are harvested from April to June, are combined with those of the Northern Hemisphere harvested from September through December of the same year.² Preliminary.³ Includes estimates for the above countries for which data are not available and for minor producing countries.⁴ Planted acreage.⁵ Less than 5 years.⁶ Less than 500 acres and 500 tons.⁷ Commercial crop. Formerly, Tanganyika and Zanzibar.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Farmers' stock peanuts used for crushing included with shelled oil stock in terms of ungraded shelled peanuts.

² Crude plus refined.

³ Reported as peanut oil, edible and peanut oil, crude; in this tabulation added without converting.

⁴ Holdings at producing mills only.

⁵ Total August 1957 through December 1957; not separately reported since December 1957.

Statistical Reporting Service and Economic Research Service. Data for 1939–53 in *Agricultural Statistics, 1962*, table 187.

¹ Years shown refer to years of harvest. Southern Hemisphere crops which are harvested in the early part of the year are combined with those of the Northern Hemisphere harvested the latter part of the same year. ² Preliminary. ³ Acreage harvested for beans. ⁴ Less than 5 years. ⁵ Less than 500 acres. ⁶ Includes Rwanda and Burundi. ⁷ Quantities purchased by the Nigerian Marketing Boards for export. Local consumption is small. ⁸ Planted area. ⁹ Includes estimates for the above countries for which data are not available and for minor producing countries.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Production and price in terms of air-dried nuts in the husk.

² Preliminary.

³ Production negligible.

⁴ Less than 5 years.

Statistical Reporting Service. The yield of oil from unhusked tung nuts varies from year to year but is usually estimated at around 16 percent of the weight of the nuts. Production and supply of tung oil appear in table 206.

¹ Includes butter (fat content), lard, beef fats, cottonseed, peanut, soybean, corn and olive oils, and minor oils such as sesame. Stocks and exports also include margarine, shortening, vegetable stearine and secondary edible oils.

² Production and exports also include oil equivalent of exported soybeans, cottonseed, and peanuts for crushing abroad.

³ Chiefly coconut, palm kernel, and palm oils.

⁴ Includes shipments to United States Territories.

⁵ In some years disappearance cannot be computed from data contained in this table, as adjustments have been made because additional items have been incorporated in stock data.

⁶ Preliminary.

Economic Research Service. Compiled from reports of the Commerce and Agriculture Departments. Totals and per capita estimates computed from unrounded numbers. Data for 1934-54 in *Agricultural Statistics, 1962*, table 215.

¹ Years shown refer to the years in which the predominant share of the oils and fats was produced.² Preliminary.³ Indigenous—that is, exports from producing countries.⁴ Estimates of U.S. oil production include actual oil produced plus the oil equivalent of exported oilseeds; estimates for other countries are based on the assumption that varying quantities of the oilseeds produced are crushed for oil.⁵ Revised to include exports of "edible vegetable oils" from the U.S.S.R., and Rumania, believed to be mainly sunflowerseed oil.⁶ 1955-58 average.⁷ Net exports (exports minus imports).⁸ Production estimated on the basis of exports and information available on production and consumption in the various producing areas.⁹ Less than 500 tons.¹⁰ Production relates to rendered lard only in most countries.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Mainly salad and cooking oils. Includes all oils and fats (other than butter, lard, margarine, or shortening) used in mayonnaise and salad dressing, bakery goods, confectionery, commercial roasting and frying, etc.

² Including only the fat content of butter, estimated at 80.5 percent of total weight, and of margarine for which the fat content varies slightly each year.

³ Preliminary.

⁴ Fat equivalent of soap used in synthetic rubber, is included with "Other industrial products."

⁵ Paints, varnishes, floor coverings, oilcloth, printing inks, core oils, synthetic resins, insulation, linings, packings, coated fabrics (other than oilcloth), caulking, and other protective coatings.

Economic Research Service. Computed from reports of the Commerce, Interior, and Agriculture Departments. Totals and per capita estimates computed from unrounded numbers. Data for 1939–54 in *Agricultural Statistics, 1962*, table 221.

¹ Prices as originally quoted have been adjusted to include the 3-cent-per-pound tax on first domestic processing. Public Law 87-859 suspends the 3 cent tax imposed by section 4511 (as beginning October 1, 1957 and ending June 30, 1966).

² Less than 12 months.

³ Beginning August 1959 quoted as tanks.

Economic Research Service. Compiled from Oil, Paint, and Drug Reporter; the National Provisioner; The Journal of Commerce (New York); Wall Street Journal (Chicago edition); and the U.S. Department of Labor. Excise taxes and duties are included where applicable.

¹ Based on estimates of the Association of American Soap and Glycerine Producers, Incorporated. Excludes cleaners and liquid soaps.

² Based on factory shipments of 53 companies as reported in the Association's Sales Census who produced 79 to 83 percent of the United States total in census years, adjusted to a U.S. total basis.

³ Includes only those with characteristics and end uses similar to soap.

⁴ Includes shipments in CARE packages.

⁵ From Office of Rubber Reserve, R.F.C. through 1954. Estimated by U.S. Department of Agriculture since.

Economic Research Service. Data for 1935–48 in *Agricultural Statistics*, 1962, table 225.

Economic Research Service.

CHAPTER IV

STATISTICS OF FRUITS, VEGETABLES, MELONS, TREE NUTS, AND BEVERAGE CROPS

These crops are arranged in two major groups within the chapter: (1) Fruits and berries; and (2) vegetables, melons, tree nuts, and beverage crops (tea, cacao beans, and coffee). Also, toward the end of the second group are included summary tables on unloads of both fruits and vegetables.

Fruits and Berries

Estimates of fruit production, in general, relate to the harvested crop although in some years quantities not harvested because of low prices or other economic factors are included. Losses from natural causes, such as windstorms, freezes, etc., are not included in production. Production relates to the total crop produced on all farms, except for apples and strawberries. In accordance with Congressional enactment, the Department's estimates of apple production since 1938 have related only to the crop in commercial areas. The estimates for strawberries cover production on acreage grown primarily for sale.

The annual estimates are checked and adjusted at the end of each marketing season on the basis of shipment and processing records from transportation agencies, processors, cooperative marketing associations, and other industry organizations. The estimates are reviewed (and revised if necessary) at 5-year intervals, when census data become available. The Department's available statistics are limited to the major tree fruits and nuts and to grapes, cranberries, and strawberries, and exclude some States where census data indicate production is of only minor importance.

¹ Oranges, tangerines, grapefruit, lemons, and limes. Includes tangelos beginning with 1954.

² Commercial apples, peaches, pears, grapes, cherries, plums, prunes, and apricots.

³ Nectarines, figs, olives, avocados, dates, persimmons, and pomegranates.

⁴ Walnuts, almonds, and filberts.

⁵ Preliminary.

Statistical Reporting Service. Data for 1919-48 in *Agricultural Statistics, 1962*, table 226.

¹ Estimates of the commercial crop refer to the total production of apples in the commercial apple areas of each State.

² Excludes fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

³ Equivalent packinghouse-door returns for Oregon and Washington, equivalent returns for bulk fruit at the first delivery point for California, and average price as sold for other States. U.S. prices obtained by weighting State prices by quantity sold.

⁴ Dried and canned are converted to terms of fresh apples on following basis: 1 pound dried is equivalent to 8 pounds fresh; 1 pound canned is equivalent to about 2 pounds fresh; 48 pounds fresh equal 1 bushel. No re-exports reported.

⁵ Domestic exports minus imports for consumption with net imports shown by a minus sign.

⁶ Census returns of total harvested production of all areas in the United States.

⁷ Preliminary.

⁸ Quantities processed are priced at the equivalent processing plant door level.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns of harvested production. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1934–48, with production and value on total crop basis, in *Agricultural Statistics, 1962*, table 228.

¹ Estimates of the commercial crop refer to the total production of apples in the commercial apple areas of each State.

² For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1963 and 1964 estimates of such quantities were as follows (1,000 bushels): 1963—New Mexico, 50; Utah, 10; Washington, 300; 1964—New York, 360; New Jersey, 27; Pennsylvania, 100; Delaware, 15; Maryland, 20; Virginia, 100; West Virginia, 53; Ohio, 168; Indiana, 46; Michigan, 370; Wisconsin, 66; Minnesota, 43; Missouri, 48; Kansas, 9; Kentucky, 10; Tennessee, 10; New Mexico, 108; California, 120.

³ Equivalent packinghouse-door returns for Oregon and Washington, equivalent returns for bulk fruit at the first delivery point for California, and the average price as sold for other States.

⁴ Preliminary.

⁵ Quantities processed are priced at the equivalent processing plant door level.

⁶ Includes some States for which estimates have been discontinued.

⁷ Includes 5,000 bushels excess cullage of harvested fruit.

¹ Years shown refer to years of harvest in Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1964 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1964 and ended early in 1965.

² Preliminary.

³ Basic production data reported in units other than bushels converted to 48 pound equivalents.

⁴ Commercial crop.

⁵ Excludes cider apples reported separately.

⁶ Deciduous Fruit Board handlings.

⁷ May include some cider apples in countries not reported separately.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign sources materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Production, price, and value for California, Washington, and Utah. The 1959 census reported these 3 States as having 98.3 percent of the 1958 production. ² Excludes fruit not harvested on account of economic conditions. ³ Obtained by weighting State prices by quantity sold. ⁴ Net processed weight. ⁵ Dried apricots are 12½ percent of total dried fruit for salad. ⁶ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis of 5.5 tons fresh to 1 ton dried. Canned converted to fresh at ratio of 60 cases to 1 ton. ⁷ Beginning 1963, quantities processed are priced at the equivalent processing plant door level. ⁸ Preliminary.

Statistical Reporting Service and Economic Research Service. Exports from reports of the U.S. Department of Commerce. Data for 1924–48 in *Agricultural Statistics, 1962*, table 236.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1963, sweet cherries (tons): Idaho, 120; Colorado, 20; 1964-sour cherries (tons): New York, 2,580; Pennsylvania, 500; Michigan, 41,100; Wisconsin, 3,300; Montana, 70; Colorado, 55; Utah, 70; Oregon, 850; sweet cherries (tons): New York, 320; Montana, 30; Colorado, 60; Washington, 200.

² Preliminary.

³ Beginning in 1963, quantities processed are priced at the equivalent processing plant door level.

⁴ Includes excess cullage of harvested fruit (tons): 1963-sweet cherries, Washington, 650; sour cherries, Colorado, 20; 1964-sweet cherries, Montana, 200; Colorado, 10; Washington, 600; sour cherries, Montana, 8; Colorado, 15.

⁵ Includes some States for which estimates have been discontinued.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 247

¹ Season begins with the bloom of the year shown and ends with the completion of harvest the following year. In California picking usually extends from about Oct. 1 to Dec. 31 of the following year. (15 months). In other States the season begins about Oct. 1 and ends in early summer, except for Florida limes, harvest of which usually starts about Apr. 1.

² Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For weight of boxes see pages V and VI.

³ Excludes fruit unharvested, donated to charity, or not utilized on account of economic conditions.

⁴ Equivalent returns per box at the intake packinghouse-door for all methods of sale. When sale represents fruit sold at point other than intake packinghouse-door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold. Obtained by weighting State prices by quantity sold.

⁵ Includes quantities used for juice, concentrates, grapefruit segments and other citrus products. In some seasons, includes appreciable quantities of oranges and lemons in California delivered to processing plants which were not utilized, but for which growers received payment.

⁶ Year beginning November for oranges and lemons; year beginning September for grapefruit; year beginning July for limes. Tangerines included with oranges.

⁷ Exports reported in pounds. Converted to boxes on the following basis: Oranges, 84 pounds per box; grapefruit, 78 pounds per box; lemons, 79 pounds per box.

⁸ Imports converted to boxes on the following basis: Oranges, 90 pounds per box; grapefruit, 80 pounds per box; lemons, 76 pounds per box; limes, 80 pounds per box.

⁹ Estimates for oranges include small quantities of tangerines in California, Arizona, and Texas. Estimates for tangerines are for Florida only.

¹⁰ Production estimated as of June 1, 1965.

¹¹ Less than 500 boxes.

¹² Estimates not made prior to the 1955-56 crop.

Statistical Reporting Service and Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929-53 in *Agricultural Statistics*, 1962, table 248.

² Differences between "Production" and "Production having value" are economic abandonment.

³ Sour varieties: Includes small quantities used for juice, wine, preserves, and candied cherries. Beginning 1954, includes small quantities brined.

⁴ Sweet varieties: Includes small quantities used for juice, wine, brandy, canning, etc. Beginning 1955, small quantities frozen are also included.

⁵ Some quantities canned are included with fresh sales to avoid disclosure of individual operations.

⁶ Preliminary.

¹ Season begins with the bloom of the year shown and ends with completion of harvest the following year. For oranges, harvest in California usually starts in early November of the year shown and continues into November of the following year. In other States, harvest of oranges begins about October 1 and ends in early summer. Grapefruit harvest, for the California Desert Valleys and for all other States, begins in the fall and ends by early summer. Harvest of other California grapefruit extends from early summer, of the year after bloom, through September. California lemons are harvested from November through the following calendar year. Florida limes are picked mostly from April through December. Florida tangelos are harvested largely from October through April. Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For some States in certain years production includes quantities unharvested or harvested and not utilized on account of economic conditions, and quantities donated to charity. In 1963, estimates of such quantities were as follows (1,000 boxes): California—Navel and miscellaneous oranges, 250; Valencia, 300; grapefruit—California, Desert Valleys, 3.

² As estimated from prospects on June 1, 1965.

³ Equivalent returns per box at the intake packinghouse-door for all methods of sale. When sale represents fruit sold at point of other than packinghouse-door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold.

⁴ Navel and miscellaneous varieties in California and Arizona. Early and midseason varieties in Florida and Texas. All varieties in Louisiana. For all States, except Florida, includes small quantities of tangerines.

⁵ Net content of box varies. Approximate averages are as follows: Oranges, California and Arizona, 75 pounds; Florida and other States, 90 pounds; tangerines, 90 pounds; grapefruit, California, Desert Valleys, and Arizona, 64 pounds; other California areas, 67 pounds; Florida and Texas, 80 pounds; lemons, 76 pounds; limes, 80 pounds; tangelos, 90 pounds.

¹ Harvesting in Northern Hemisphere countries begins in November of the year shown, and in Southern Hemisphere countries begins in May following the year shown. Production in foreign countries converted to boxes of the following weights: Oranges 70 pounds; grapefruit and limes 80 pounds; lemons 76 pounds.

² Preliminary.

³ Includes unharvested production and fruit not of export variety or grade.

⁴ Production from the bloom of indicated years is harvested the two following years, i.e. crop from the bloom of 1963 is harvested in 1964-65.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Includes Canary Islands.² Year beginning July 1.³ Does not include imports into Soviet Bloc countries.⁴ Includes grapefruit.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

FOOTNOTES FOR TABLE 259

¹ Production, price, and value for California only. The 1954 census reported date production in California and Arizona, but of the total production 98.5 percent was in California.

² Equivalent returns per ton for bulk fruit at the first delivery point.³ Includes 2,300 tons not harvested on account of economic conditions.⁴ Preliminary.⁵ Quantities processed are priced at the equivalent processing plant door level.

Statistical Reporting Service. Imports from reports of the U.S. Department of Commerce.

¹ Estimates relate to Massachusetts, New Jersey, Wisconsin, Washington, and Oregon.² Includes the following quantities unharvested on account of economic conditions and/or excess cullage of harvested fruit (barrels): 1949–26,000; 1950–62,100; 1956–18,000; 1960–4,000; 1961–1,000. In 1959 includes 18,900 barrels unharvested, confiscated, and dumped which did not qualify for payment under the Cranberry Payment Program, AMM, 181a. In 1962 and 1963 includes cranberries dumped, used for charity, or used for experimental purposes under provisions of the Cranberry Marketing Order.³ Obtained by weighting State prices by quantity sold. Equivalent returns for fruit at the first receiving station. For 1959, includes returns to growers for cranberries dumped which qualified for payment under the Cranberry Payment Program, AMM, 181a.⁴ Mainly for canning.⁵ Preliminary.Statistical Reporting Service. Data for 1929–48 in *Agricultural Statistics, 1962*, table 258.

1964 ⁶									

¹ Production, price, and value for California and Texas only. Texas discontinued in 1952.

² Equivalent returns per ton for bulk fruit at the first delivery point.

³ California dried figs converted to fresh basis at ratio of 3 pounds fresh to 1 pound dried.

⁴ Obtained by weighting utilization group or State prices by quantity sold.

⁵ Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

⁶ Preliminary.

⁷ 1949–52 includes in-brine and fresh; 1952 to date dried only.

⁸ Includes shipments under the Army Civilian Supply Program.

⁹ Imports for consumption minus domestic exports.

Statistical Reporting Service and Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929–48 in *Agricultural Statistics*, 1962, table 261.

1964 ⁴					232				

¹ Includes the following quantities unharvested on account of economic conditions and/or excess cullage of harvested fruit (1,000 tons): California, 1956–12. Other States, 1950–3; 1951–2; 1957–6; 1962–200.

² Equivalent returns per ton for bulk fruit at the first delivery point.

³ Obtained by weighting State prices by quantity sold.

⁴ Preliminary.

⁵ Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

⁶ Converted on the basis of country data, using the following weight per cubic foot: Argentina and Chile, 36 pounds; Belgium and Netherlands, 10 pounds; Canada, Italy, and Mexico, 40 pounds; Spain, 24 pounds; Union of South Africa, 16 pounds; and all other, 20 pounds.

⁷ Domestic exports minus imports for consumption.

⁸ Included in total production of grapes, fresh basis; 1 ton of raisins equivalent to about 4.49 tons of fresh grapes for 1964; 4.25 tons for 1963; 4.13 tons for 1962; and 4.0 tons for years prior to 1962.

⁹ Exports and imports of raisins converted to sweatbox, or production basis at the ratio of 1 to 1.08.

¹⁰ Includes currants.

Statistical Reporting Service and Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929–48 in *Agricultural Statistics, 1962*, table 262.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions.

² Preliminary.

³ Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

⁴ Includes excess cullage of harvested fruit (tons): 1963—California, raisins, 61,000 (dried basis, 14,000).

⁵ Dried basis: 1 ton of raisins equivalent to 4.49 tons of fresh grapes for 1964; 4.25 tons for 1963; and 4.02 for the 1958-62 average.

Statistical Reporting Service.

¹ Excludes fruit not harvested on account of economic conditions and/or excess carriage of harvested fruit.² Obtained by weighting State prices by quantity sold.³ Net processed weight.⁴ Canned peaches are 40 percent of total canned fruit for salad.⁵ Dried peaches are 21 percent of total dried fruit for salad.⁶ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 6.5 pounds fresh. Canned peaches converted to terms of fresh on basis that 1 pound canned equals about 1 pound fresh.⁷ Beginning 1963, quantities processed are priced at the equivalent processing plant door level.⁸ Preliminary.Statistical Reporting Service and Economic Research Service. Italic figures are census returns of harvested production. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1924-48 in *Agricultural Statistics*, 1962, table 270.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1963 and 1964 estimates of such quantities were as follows (1,000 bushels): 1963—Georgia, 200; Arkansas, 80; Oklahoma, 50; Colorado, 20; 1964—Maryland, 10; Tennessee, 10; Louisiana, 6; Idaho, 50; Colorado, 60; Utah, 38.

² Preliminary.

³ Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

⁴ Includes excess cullage of harvested fruit (1,000 bushels): 1963—Georgia, 270; Colorado, 30; Washington, 190; California, Clingstone, 1,925; 1964—Maryland, 10; Idaho, 9; Colorado, 346; Washington, 160; California, Clingstone, 3,175.

⁵ Mainly for canning.

⁶ Includes States no longer estimated.

¹ Bushels of 48 pounds in California and 50 pounds in other States. For some States in certain years, production includes some quantities unharvested on account of economic conditions.

² Equivalent packinghouse-door returns for Oregon and Washington, equivalent returns for bulk fruit at the first delivery point for California, and the average price as sold for other States.

³ Preliminary.

⁴ Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

⁵ Includes some States for which estimates have been discontinued.

⁶ Includes excess cullage of harvested fruit (1,000 bushels): 1963—Washington, Bartlett, 80; Oregon, Bartlett, 16; 1964—Washington, Bartlett, 1,100; other, 68; Oregon, Bartlett, 50.

Statistical Reporting Service.

¹ Years shown refer to years of harvest in Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1964 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1964 and ended early in 1965.

² Preliminary.

³ Basic production data reported in units other than bushels converted to 50 pound equivalents.

⁴ Commercial crop.

⁵ Excludes cider pears reported separately.

⁶ Deciduous Fruit Board handlings.

⁷ May include some cider pears in countries not reported separately.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, report of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Production, price, and value for Idaho, Washington, Oregon, and California, excluding fruit not harvested on account of economic conditions and/or excess culage.

² Excludes fruit not harvested on account of economic conditions and/or excess culage.

³ Obtained by weighting State prices by quantity sold.

⁴ Net processed weight.

⁵ Dried prunes in salad estimated at 43 percent of total dried fruit for salad. Exports and imports of dried prunes converted to unprocessed dry weight by dividing by 1.025. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 2½ pounds fresh. Canned prunes converted to terms of fresh fruit on the basis that 1 pound canned equals 0.729 pound fresh. Otherwise prepared or

preserved, converted to terms of fresh fruit on the basis that 1 pound equals 0.899 pound fresh.

⁶ Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

⁷ Preliminary.

¹ Data for all commodities are on a calendar-year basis, except apples and pears which begin in June of year indicated and end the following year. Shipments by truck are not included but represent a large proportion of total movement, especially for some commodities. The data are not indicative of total production or total sales.

² Includes Satsumas and tangerines.

Consumer and Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1939-54 in *Agricultural Statistics, 1962*, table 294.

¹ Fresh citrus fruits are on a crop year basis. Dried fruits are on a pack year. The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by total population adjusted for members of the Armed Forces not eating out of civilian supplies.

² Excludes noncommercial apples.

³ Apricots, avocados, bananas, cranberries, figs, grapes, nectarines, peaches, pears, pineapples; and (including an estimate for noncommercial) cherries, papayas beginning 1960, plums and prunes, and strawberries.

⁴ Apples, applesauce, apricots, berries, cherries (including brined), cranberries, figs, fruit cocktail and salad, citrus sections, olives (including brined), pineapple, plums, prunes, peaches (including spiced), and pears.

⁵ Grapefruit, orange, blended orange, lemon and lime, tangerine and blend, pineapple, apple, grape and prune juices, and fruit nectars. Includes canned concentrated citrus juices converted to single-strength basis, but excludes all frozen juices.

⁶ Dried apples, apricots, dates, figs, peaches, pears, prunes, and raisins, except for unmerchantable figs, substandard prunes, and prunes used for juice and concentrate. Data are in terms of processed dried weight.

⁷ Principally cherries, apples, peaches, apricots, strawberries, other berries, and citrus juices.

⁸ Includes chilled citrus juices beginning 1955.

⁹ Chilled sections and salad beginning 1956.

Economic Research Service. Data for 1900–48 in *Agricultural Statistics, 1962*, table 303.

Vegetables and Melons

This section contains statistics on potatoes, sweetpotatoes, and commercial vegetables and melons.

For potatoes and sweetpotatoes the estimates of acreage, production, value, and farm disposition pertain to the total crop and include quantities produced both for sale and for use as food, feed, and seed on farms where grown. Potato statistics are shown on a within-year seasonal grouping of winter, early spring, late spring, early summer, late summer, and fall crops, by States. Some States have production in more than one seasonal group.

For processing vegetables, the estimates of acreage, production, and value for each of the 10 crops relate to production used by commercial canners, freezers, and other processors except dehydrators. These estimates include raw products grown by processors themselves and those grown under contract or purchased on the open market. This production and the actual or equivalent acreage harvested are not duplicated in the fresh market estimates for the same commodities. The production of those vegetables used for processing for which regular processing estimates are not made, is included in the fresh market estimates.

The Department's regular monthly and annual program of estimates of commercial vegetables for fresh market includes 27 principal vegetable and melon crops in the major producing States. These estimates relate to crops which are grown primarily for sale and they do not include vegetables and melons produced in farm and nonfarm gardens. Although the bulk of the production of the 27 principal vegetable and melon crops is for consumption in the fresh state, data for some commodities include quantities used by processors. Such crops as artichokes, broccoli, brussels sprouts, carrots, cauliflower, celery, garlic, kale, onions, and green peppers for which separate estimates for commercial processing are not prepared, are in this category. The commercial estimates of the principal crops for the years 1939 to date include local market production from areas near consuming centers as well as production from well-recognized commercial areas which specialize in producing supplies for shipment to distant markets. Estimates of commercial vegetables for fresh market prepared for years prior to 1939 are not strictly comparable with the series for 1939 and later years as the earlier series pertain largely to important commercial shipping areas and for the most part do not include local market production from areas near consuming centers.

Annual estimates of national commercial production of all vegetables are presented in table 303. For fresh market vegetables they include production for sale of (1) the 27 principal crops (28 since 1954) in the major producing States for which regular seasonal estimates are prepared, (2) the principal 27 crops in unimportant producing States, (3) greenhouse vegetables in all States, and (4) minor vegetables in all States. These figures show that the regular program of releases of commercial fresh market vegetable estimates for principal crops in major producing States account for over four-fifths of the national commercial output of all fresh vegetables and melons. The total national commercial production of each of the principal vegetable and melon crops and aggregate production of minor vegetables is published by the Statistical Reporting Service, but production estimates by States, and comparable data on acreage and value, are not available.

For fresh market vegetables and melons season average price and value beginning in 1954 are on a f.o.b. basis. For processed vegetables prior to 1964, season average price and value refer to average price received by growers at receiving point; beginning in 1964, season average price and value is at processing plant door.

The seasonal nature of the production of vegetables and melons for fresh market and their perishability created a need for information on supplies available during specific periods of the year to facilitate orderly marketing. Vegetable and melon estimates are classified according to the season or period within the season when the bulk of each crop is usually harvested. The forecasts and estimates of acreage and production therefore provide a measure of supplies available in specific seasonal periods. The seasonal groupings used are as follows:

Seasonal Classifications Used for Vegetable and Melon Crops

Dates refer to period of most active harvest

Classifications Most Commonly Used

Winter: January, February, March.
 Spring: April, May, June.
 Early Spring: April 1–May 15.
 Late Spring: May 16–June 30.
 Summer: July, August, September.

Early Summer: July 1–August 15.
 Late Summer: August 16–September 30.
 Fall: October, November, December.
 Early Fall: October 1–November 15.
 Late Fall: November 16–December 31.

Classifications Used for Certain Short Season Crops

Early Spring: April.
 Mid-Spring: May.
 Late Spring: June.

Early Summer: July.
 Mid-Summer: August.
 Late Summer: September.

In practice the beginning and ending of these seasons are not fixed dates but approximations. There is necessarily some overlapping in the marketing seasons for individual crops, and weather frequently disturbs normal harvesting schedules. Consequently, the classifications employed are less precise than the dates indicate.

¹ Commercial production, including greenhouse production, of all fresh market vegetables and melons in all States. Includes the production shown in table 304 for the 28 principal vegetables, (27 since 1953). Does not include production for home consumption in farm and nonfarm gardens. Production by States, and acreage and value data not available.

² Production in all States of the 10 principal vegetables for processing shown in table 306 plus pimiento peppers. Production of other vegetables processed included in fresh market series of estimates.

³ Beginning 1954, includes Hawaii.

⁴ Beginning 1960, includes Alaska.

⁵ Preliminary.

¹ Acreage for fresh market is acreage for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Acreage for processing is acreage harvested.

² Acreage, production, and farm value of the following 28 crops (27 since 1953), for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeyball melons prior to 1954, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons.

³ Acreage, production, and farm value of the following 10 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, pimientos prior to 1954, spinach, and tomatoes. Production of other vegetables processed included in fresh market series of estimates.

⁴ Production for fresh market includes some quantities not marketed because of low prices or other economic factors which are excluded in computing value.

⁵ Beginning 1954, value for all fresh market vegetables except garlic on f.o.b. basis. For processed vegetables, beginning 1964, value is based on average price received at processing plant door.

⁶ Beginning 1960, includes Alaska and Hawaii.

⁷ Preliminary.

Statistical Reporting Service. Data for 1939–48 in *Agricultural Statistics, 1962*, table 305.

¹ Production for fresh market includes some quantities not marketed and excluded in computing value.² Production of the following 27 crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons.³ Preliminary.⁴ Production of the following 10 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, spinach, and tomatoes. Other vegetables processed included in fresh market series of estimates.

¹ Fresh market and processing asparagus is frequently harvested from the same acreage. Therefore, it is not practical to make individual acreage estimates for these segments.

² Preliminary.

³ Mostly for processing. Includes New York, Indiana, Minnesota, Iowa, Missouri, Nebraska, Virginia, Arkansas, and Tennessee.

⁴ Fresh market includes Pennsylvania, Ohio, and Iowa. Processing includes New York, Pennsylvania, Ohio, Indiana, Minnesota, Iowa, Missouri, Nebraska, Virginia, Arkansas, and Tennessee.

Statistical Reporting Service.

1964 ⁵	1,347	1,308	185.8	242,869	3.23	786,372	4.89			

¹ The following quantities were unharvested and/or not marketed and have been excluded in computing price and value (1,000 hundred weight): 1950—741; 1951—656; 1953—3,068; 1955—1,147; 1957—534; 1958—934; 1959—248; 1961—48; 1963—333.

² Obtained by weighting State prices by quantity sold.

³ Prices are of eastern potatoes weighted by unloads, seasons September–May. Beginning 1951, price data are for Maine and Long Island potatoes only.

⁴ Domestic exports minus imports for consumption, with net imports shown by a minus sign.

⁵ Includes shipments under the Army Civilian Supply Program.

¹ Includes the following quantities not marketed and excluded in computing value: 105,000 cwt. in 1949, 50,000 cwt. in 1951, 102,000 cwt. in 1954, 110,000 cwt. in 1955, 100,000 cwt. in 1956, 541,000 cwt. in 1958, 1,000 cwt. in 1962, 1,000 cwt. in 1963, and 1,000 cwt. in 1964.

² Includes "otherwise prepared," if any.

³ Includes exports for military civilian-feeding abroad.

⁴ Beginning 1964, fresh market price and value on f.o.b. basis.

⁵ Beginning 1960, includes Hawaii.

⁶ Preliminary.

⁷ Beginning 1964, processing price and value at processing plant door.

Statistical Reporting Service and Economic Research Service, Foreign trade data from reports of the U.S. Department of Commerce, Data for 1939-48 in Agricultural Statistics, 1963, table 370.

¹ Estimated percentage of completeness for reported truck unloads for 1964: Baltimore and Chicago, 85%; Atlanta, Boston, Los Angeles and New York, 90%; Philadelphia, 90-95%; San Francisco, 95%.

² Includes Newark beginning with 1958.

³ Includes Oakland beginning with 1958.

⁴ Includes satsumas.

⁵ Includes romaine.

Consumer and Marketing Service.

¹ Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales.

² Beginning 1963, reports of rail shipments for beets, turnips, rutabagas, discontinued.

³ Includes casaba, honeydew, persian, and mixed melons. Cars of mixed melons may include cantaloups as well as other muskmelons.

Consumer and Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers, throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1939-54 in *Agricultural Statistics, 1962*, table 373.

¹ Total crop for processing converted to a canned basis by applying factors (cases of 24 No. 303 cans per ton farm weight): Cucumbers for pickles, 83 cases; cabbage for kraut, 65.9 cases; pimientos (1954-55) 35.4 cases, and since 1955, National Canners Association pack data.

² Equivalent cases of 24 No. 303 cans.

³ Preliminary.

⁴ Includes combination vegetable juices containing at least 70 percent tomato juice.

Economic Research Service. Data for 1939-54 in *Agricultural Statistics, 1962*, table 377.

FOOTNOTES FOR TABLE 374

¹ Fresh vegetable consumption computed from estimated total commercial production for fresh market including estimated greenhouse production. Does not include production for home use. Civilian consumption—obtained by dividing the total apparent civilian consumption by total civilian population as reported by the Census. All data for calendar year except dry field peas on crop year basis.

² Preliminary.

³ Close trim basis since 1954; slight trim basis in prior years.

⁴ Includes 0.1 pound of shallots through 1958; since 1958 less than 0.05 pound.

⁵ Includes farm weight equivalent of potatoes used in mixtures, flour, dehydration, chips and shoestring potatoes; these uses for the past 3 years amounted to 16 to 18 percent of the totals shown; excludes canned and frozen.

Economic Research Service. Data for 1919-48 in *Agricultural Statistics, 1962*, table 375.

Table 376.—Vegetables, canned: Civilian per capita consumption (processed basis, net canned weight) United States, 1949–64¹

¹ Excludes soups and baby food.

² Minor vegetables are included in "other".

³ Preliminary.

⁴ Based on information available for 1944–46, tomato juice comprises approximately 85 percent of the total, combination vegetable juices 13 percent, and other vegetable juices 2 percent. Combination vegetable juice contains approximately 70 percent or more tomato juice.

⁵ Includes miscellaneous greens, pimientos, potatoes, mixed vegetables, and all items for which no separate data are available.

Economic Research Service. Data for 1909–48 in *Agricultural Statistics, 1962*, table 376.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

CHAPTER V

STATISTICS OF HAY, SEEDS, AND MINOR FIELD CROPS

Chapter V deals with hay, pasture, seeds, and various minor field crops. Table 417 shows the seeding rate for a number of specified crops. The State averages represent the latest information available and are based largely on surveys made annually or every few years. The United States average rates are derived by weighting the average for each State by the acreage planted to the particular crop. Rates are not shown for States where the crop is not estimated currently.

Table 396.—Hay, all: Acreage, yield, production, value, and foreign trade, United States, 1949–64

¹ Price of hay sold baled. Obtained by weighting State prices by quantity sold.

² Includes soybean, cowpea and peanut hay but excludes grass silage made from grasses, alfalfa, clover or small grains.

³ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns for conterminous U.S. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1866–1948 in *Agricultural Statistics, 1962*, table 397.

¹ Table includes, besides the ordinary edible beans and beans grown for seed, blackeyes, and garbanzos in California. Soybeans and mung beans are not included.

² Clean basis.

³ Obtained by weighting State prices by quantity sold. Includes allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁴ Compiled from the New York Journal of Commerce.

⁵ Stocks for 1950 from official reports adjusted for U.S. Department of Agriculture holdings. Estimates for other years based on the best sources available.

⁶ Bags of 100 pounds.

⁷ Census yield and production largely uncleaned basis.

⁸ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns; census figures include all States; other figures, principal producing States only. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1924–48 in *Agricultural Statistics, 1962*, table 420.

CHAPTER VI

STATISTICS OF CATTLE, HOGS, AND SHEEP

This chapter contains information about most kinds of farm livestock and livestock products, with the exception of dairy and poultry. The information relates to inventories, production, disposition, prices, and income for farm animals, and to livestock slaughter (including horse slaughter), meat production, and market statistics for meat animals.

The term "on farms" as used in this chapter includes ranches. Estimated numbers do not include livestock not on farms.

Differences between census inventories and January 1 estimated numbers are large in years when the census relates to a date other than January 1. The census enumerations in 1940 and 1950 were taken as of April 1, the enumerations in 1945 as of January 1, and in 1954 and 1959 as of October and November. Marketings and slaughter of livestock as well as young stock born during the period between January 1 and the date of enumeration can result in some rather large differences in numbers on farms. For example, hog marketings and slaughter are seasonally big during the first few months of the year and during the last 2 or 3 months of the year. As a result, the number on farms January 1 is substantially different than for either the preceding October or the following April.

¹ Animals being fattened for the slaughter market on grains or other concentrates and expected to produce a carcass that will grade good or better. On Jan. 1, 1964, there were 445,000 and on Jan. 1, 1965, 467,000 cattle and calves on feed in 11 Southeastern States, Maryland and New York which are excluded from this table. Data for these 13 States not available for other quarters.² Preliminary.³ Includes short time average for Georgia, Florida, Kentucky, Tennessee, Alabama, and Mississippi.

Statistical Reporting Service.

Gross income is "Cash receipts from sales of cattle, calves, beef, and veal," plus "Value of cattle and calves slaughtered for home consumption."

Statistical Reporting Service.

¹ Excludes interfarm sales.

² Includes cattle shipped in from other States and from central markets but excludes intrastate shipments.

³ Adjustments were made for cattle shipped in and changes in inventory.

⁴ No adjustments made for cost of cattle shipped in and changes in inventory values.

¹ Prices are a simple average of the mean of daily range of quotations. New York quotations exclude locally dressed meats. Carcass weights 600-700 pounds.² Beginning in June 1956 Commercial grade broken into Standard and Commercial. Quotations are for Standard grade since that time as practically all steer beef formerly classified as Commercial now classifies as Standard.³ Seven-month average, June-December.Consumer and Marketing Service. Data for 1940-54 in *Agricultural Statistics, 1962*, table 475.

¹ Includes St. Louis National Stockyards, Illinois, and St. Louis, Missouri.² Totals are based on unrounded numbers.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 499

¹ Excludes interfarm sales.² Includes sheep and lambs shipped in from other States and from central markets but excludes intrastate shipments.³ Adjustments made for cost of sheep and lambs shipped in and changes in inventory.⁴ No adjustments made for cost of sheep and lambs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of sheep, lambs, mutton, and lamb" plus "Value of sheep and lambs slaughtered for home consumption."

Statistical Reporting Service.

¹ Data in this report are obtained from offices of State Veterinarians and include only inshipments reported monthly to these offices. Since there are other shipments into some of these States, these data do not represent total inshipments. Totals are based on unrounded numbers.

² Includes stockers and feeders which were bought at stockyards.

³ Includes stockers and feeders from points other than public stockyards, some of which are inspected at public stockyards while stopping for feed, water, and rest en route.

⁴ Excludes Wisconsin.

¹ Includes Alaska and Hawaii for apparel and carpet wool. Beginning 1961, includes Alaska for sheep shorn weight per fleece, production, price and value of sales.

² Includes sheep shorn at commercial feeding yards.

³ Average price is for the marketing season April–March, except 1963, which is April–December.

⁴ Production by States multiplied by season average price.

⁵ Preliminary.

⁶ Actual weight through 1951.

⁷ Apparel wool includes all dutiable wool, carpet wool includes all duty-free wool.

⁸ Production minus exports plus imports; stocks not taken into consideration.

Statistical Reporting Service and Economic Research Service. Imports and exports from reports of the U.S. Department of Commerce. Data for 1930–49 in *Agricultural Statistics, 1962*, table 515.

Table 511.—Wool: Number of sheep shorn, weight per fleece, 1958–62 average price per pound received by farmers, and value of sales, by States, average 1958–62, annual 1963 and 1964

¹ Includes sheep shorn at commercial feeding yards.
² Preliminary.
³ For Texas and California the weight per fleece is the amount of wool shorn per sheep and lamb during the year.

⁴ Price per pound relates to the marketing season April–March, except 1963 which is April–December. 1964 is calendar year price.

⁵ Production multiplied by season average price.

Statistical Reporting Service.

¹ For summary purposes wool produced mostly in the spring in the Northern Hemisphere is combined with that produced in the season beginning July 1 or October 1 of the same year in the Southern Hemisphere. Pulled wool is included for most countries at its greasy equivalent.

² Preliminary.

³ Converted "pulled wool" to greasy basis at 1.7.

⁴ Includes allowance for other minor producing countries not shown.

⁵ Includes Basutoland and South West Africa.

⁶ Rounded to five million.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Scoured wool, plus greasy wool converted to a scoured basis, using assumed average yields. Includes both pulled and shorn, foreign and domestic wool. Wool was considered as consumed (1) on the woolen system when laid in mixes (2) on the worsted system when entering scouring bowls. Consumption on the worsted system is taken as the sum of top and noil production.

² 53 weeks.

³ Preliminary.

⁴ Domestic and duty-paid foreign.

⁵ Excludes wool consumed on the cotton system and in the manufacture of felt, hat bodies, and other miscellaneous products.

⁶ Duty-free foreign.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

¹ Carcass weight equivalent of all meat, including the meat content of minor meats and of mixed products. Exports exclude shipments for military-civilian feeding in United States occupied areas. Shipments to territories include shipments to Puerto Rico, Virgin Islands, and Guam.

² Less than 500,000 pounds.

³ Preliminary.

Economic Research Service. Data on imports and commercial exports and shipments are computed from records of the U.S. Department of Commerce; those on exports and shipments by the U.S. Department of Agriculture are separately estimated from deliveries and stocks. Data for 1940-54 in *Agricultural Statistics, 1962*, table 534.

¹ A feed unit is the equivalent in feeding value of a pound of corn (or a ton of corn if data is in tons).² Feed consumed by all grain-fattened cattle divided by the number on feed January 1. The total number fattened in the year has been increasing relative to the number on feed January 1 and is now about 85 percent larger than the number on feed January 1.³ Feed for all cattle, except milk cows, divided by the net live weight production of cattle and calves. It includes the growth on dairy heifers and calves as well as all beef cattle.⁴ For each 100 pounds live weight production, about 19 pounds of wool was produced.⁵ This should not be used as a measure of increased efficiency of feeding, as much feed was salvaged from waste feed in the early years.⁶ Preliminary.Economic Research Service. Data for 1940-49 in *Agricultural Statistics, 1962*, table 544.

CHAPTER VII

DAIRY AND POULTRY STATISTICS

Dairy statistics in this chapter include series relating to many phases of production, movement, prices, stocks, and consumption of milk and its products. The two distinct series of numbers of milk cows on farms included in this publication should not be confused. One series entitled "Cows and heifers 2 years old and older kept for milk, January 1" is an inventory number of this specific age-sex classification which is estimated as one of the major groups making up the total cattle population at the beginning of the year. The other series, identified as "Milk cows on farms," is an annual average number of milk cows during the year (excluding any not yet fresh) which is used in connection with determining milk production. More animals are represented in the first series than the latter because heifers 2 years of age which have not freshened are included.

In comparing the several series of milk prices, it is important to note that prices received by farmers for all whole milk sold are for milk or milkfat content as actually sold, while certain prices paid by dealers for milk for fluid purposes or for specified manufacturing purposes may be quoted on a 3.5 percent butterfat basis, or for some types of manufacturing milk on the test of the milk used for that particular purpose.

Poultry and poultry products statistics include inventory numbers of chickens by classes; the production, disposition, cash receipts, and gross income from chickens and eggs, poultry and egg receipts at principal markets; commercial broiler production, turkey production, disposition, cash receipts, and gross income; liquid and dried egg production; and the National Poultry Improvement Plan.

The estimates of chickens and turkeys on farms in census years differ from the census figures to the extent of the seasonal disappearance in numbers from January 1 to the average date of the enumeration. Estimates relating to inventories, production, and income exclude poultry and eggs which are produced on places not classified as farms.

¹ Reflects variations in value of baled, chopped, and loose hay fed dairy reporters' herds, kinds of hay represented, proportion of hay purchased as well as cost of baling and chopping.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 546

¹ Averages for the October-May feeding period as reported by dairy correspondents.

² In computing hay equivalents, 3 tons of silage are considered equal to 1 ton of hay.

³ Seasonal average condition for April 1-Oct. 1 period.

⁴ Includes citrus pulp fed.

⁵ Data insufficient for stable average.

¹ Beginning 1960, includes Alaska and Hawaii.² Preliminary.³ Includes ice cream, milk sherbet, ice milk, and miscellaneous minor frozen products.⁴ Milk equivalent of butter and condensed milk used in ice cream.⁵ Includes dry cream, malted milk powder, dry part skim milk, dry ice cream mix, cottage cheese, and other products using milkfat.⁶ Includes net milk equivalent of butter and frozen dairy products to avoid double counting of milk from which fat was reused in making a second dairy product.⁷ Includes an allowance for fluid consumption on farms not producing milk in addition to the consumption on farms where milk is produced.⁸ Net movement of whole milk or cream into export or storage channels. A negative figure represents net imports or net out-of-storage movement during the year.⁹ Residual including miscellaneous minor uses and any inaccuracies of independently determined production and use items.Statistical Reporting Service. Data for 1940-57 in *Agricultural Statistics*, 1962, table 566.

1964 ⁵	3.37	3.92	3.26	3.68	3.29	3.76	3.29	3.74	3.74

¹ Simple average of monthly prices, by States, weighted by the number of milk cows on farms January 1 of the current year.

² Average price at average fat test for all milk sold at wholesale to plants and dealers, based on reports from milk market administrators, cooperative milk-marketing associations, whole-milk distributors, and milk-products manufacturing plants, f.o.b. plant or receiving station, whichever is the customary place for determining prices, before hauling costs are deducted and including all premiums.

³ Milk eligible for fluid market, including surplus diverted to manufacturing.

⁴ Weighted average of monthly prices, by States, weighted by the estimated quantity of fat sold.

⁵ Preliminary.

⁶ Monthly average prices and tests weighted by estimated sales in each month. Price f.o.b. factory or local receiving station, whichever is the customary place for determining prices, before hauling costs are deducted and including all premiums.

⁷ Includes milk for canned condensed milk.

Statistical Reporting Service. Data for 1940-54 in *Agricultural Statistics, 1962*, table 569.

FOOTNOTES FOR TABLE 565

¹ Includes flavored whole milk.

² Includes plain and fortified skim and part skim milk, buttermilk and cultured specialties, and flavored milk drinks.

³ Annual sales based on marketing area as defined after June 1, 1963, Indianapolis; November 1, 1963, Memphis and Central Arkansas; December 1, 1963, Delaware Valley.

⁴ Annual sales based on marketing areas as defined prior to May 1, 1964, Columbus; August 1, 1964, Western Colorado.

⁵ Represents combined sales for Boston, Springfield, Worcester, and Southeastern New England; merger effective October 1, 1964.

Consumer and Marketing Service. Compiled from reports of the market administrators.

¹ Excludes producer-handlers who purchase no milk from other producers.

² Minimum blend price in market pool; weighted average of dealers' blend prices in individual-handler pools; weighted average of base and excess payments where such payments are used.

³ Zone I.

⁴ Phoenix.

⁵ Jackson, Meridian, Meadville, and Hattiesburg.

⁶ Abilene.

⁷ 65-70 mile zone.

⁸ 0-50 mile zone (Mercedes), January-February 1963 and 0-80 mile zone (Mercedes), March 1963-December 1964.

⁹ 0-50 mile zone.

¹⁰ 20-110 mile zone.

¹¹ Memphis.

¹² Zone II.

¹³ Greenville and Columbus.

¹⁴ New Orleans and Houma.

¹⁵ Cleveland, Akron, and Canton.

¹⁶ Except for plants in Michigan or Wisconsin counties of Florence, Mariette, Oneida,

Vilas, and Forest.

¹⁷ Wichita Falls.

¹⁸ Albuquerque and Santa Fe.

¹⁹ Prices at Huntington, January-March 1963 and Charleston-Huntington, April 1963-December 1964.

²⁰ Does not include non-complying handlers.

²¹ Consumer and Marketing Service. Compiled from reports of the market admin-

istrators.

Gulfport and Pascagoula.

²² New Orleans and East Dubuque, Illinois.

²³ Classes 1-A and 1-B.

²⁴ Lincoln.

²⁵ Cleveland, Akron, and Canton.

²⁶ Except for plants in Michigan or Wisconsin counties of Florence, Mariette, Oneida,

Vilas, and Forest.

²⁷ Minidoka and Monroe.

²⁸ Springfield.

²⁹ District L.

³⁰ Wichita Falls.

³¹ Albuquerque and Santa Fe.

³² Prices at Huntington, January-March 1963 and Charleston-Huntington, April 1963-December 1964.

³³ Lincoln.

³⁴ Minidoka and Monroe.

³⁵ Springfield.

³⁶ Wichita Falls.

³⁷ Lincoln.

³⁸ Albuquerque and Santa Fe.

³⁹ Prices at Huntington, January-March 1963 and Charleston-Huntington, April 1963-December 1964.

⁴⁰ Does not include non-complying handlers.

⁴¹ Consumer and Marketing Service. Compiled from reports of the market admin-

istrators.

Ice milk ⁴	103,052	111,165	117,404	134,216	144,629	163,365	188,140	204,375

¹ Includes Alaska and Hawaii for creamery butter, cottage cheese (curd and creamed), ice cream, sherbet, and ice milk. Data for 1963 are preliminary.

² Excluding American full-skim cheese and cottage, pot and bakers' cheese.

³ Cottage cheese curd includes pot and bakers' cheese, creamed cottage cheese contains not less than 4 percent milkfat while partially creamed cottage cheese contains less than 4 percent milkfat and is not legal in interstate commerce and in many States. Cottage cheese curd and creamed or partially creamed cottage cheese should not be added together to obtain a total cottage cheese figure. While a small quantity of cottage cheese curd is sold direct for consumption without further processing a considerable part is creamed within the plant or shipped to another plant where creaming mixture is added prior to sale. Data for partially creamed cottage cheese not reported separately prior to 1957.

⁴ Less than 3 plants reporting.

⁵ Includes freezer-make milkshake in most States.

¹ Beginning 1960, includes Alaska and Hawaii. Total disappearance is based on production, imports, and change in stocks during the year. Production statistics for these commodities appear in other tables in this chapter. The total apparent civilian consumption was obtained by subtracting ending stocks, shipments, exports, and military takings from the total supply. The per capita civilian consumption for each year was obtained by dividing the total apparent civilian consumption by the number of persons eating out of civilian supplies.

² Includes both farm and factory-made butter.

³ Includes all kinds of cheese except cottage and full-skim American.

⁴ The evaporated milk is unskimmed, unsweetened, case goods. The condensed milk is unsweetened (plain condensed) unskimmed, bulk goods, and sweetened condensed milk, unskimmed, case, and bulk goods.

⁵ Preliminary.

¹ Milkfat and nonfat solids content of butter, cheese and nonfat dry milk purchased under dairy price support and related programs. Excludes milk solids content of fluid milk partly paid for by Commodity Credit Corporation under Military and Veterans milk program.

² Price increase effective April 18, 1956.

³ Price increase effective September 17, 1960.

⁴ Price increase effective March 10, 1961.

⁵ Price increase effective July 18, 1961, for product produced on and after that date.

⁶ Purchase price 0.2 cents higher for nonfat in bags with paper overstitching.

Agricultural Stabilization and Conservation Service.

¹ Does not include commercial broiler production. Beginning 1961, includes Alaska and Hawaii.

² Total chicks hatched less death loss of chickens and young chickens during the year.

³ Death loss during the year of mature chickens on hand Jan. 1.

⁴ Chickens raised less death loss during the year of mature chickens on hand Jan. 1.

⁵ Chickens consumed in households of farm producers.

⁶ Preliminary.

⁷ Value of sales plus value of those consumed in households of producers.

Statistical Reporting Service. Data for 1935-54 in *Agricultural Statistics, 1962*, table 599.

¹ Data on cross-mated flocks are not truly indicative of the situation since in several States birds in such flocks are reported under the respective purebred heading, and in some States those flocks are cross-mated only for a portion of the year to produce broilers; for the remainder of the year they are mated as purebreds for the production of purebred chicks.

Agricultural Research Service. Data for 1941-53 in *Agricultural Statistics, 1962*, table 602.

¹ Commercial broilers are young chickens of heavy breeds to be marketed at 2-5 pounds live weight and from which no pullets are kept for egg production. These figures are not included in farm production of chickens. Beginning 1961, includes Hawaii.

² Includes value of consumption in households of producers, which is less than 1 percent of total production.

³ Preliminary.

Statistical Reporting Service. Data for 1934-49 in *Agricultural Statistics, 1962*, table 603.

FOOTNOTES FOR TABLE 602

¹ Massachusetts and Rhode Island combined to avoid disclosing individual operations.

² North and South Dakota combined to avoid disclosing individual operations.

³ Includes North and South Dakota, where State data not shown separately.

⁴ Includes Delaware and West Virginia, where State data not shown separately.

⁵ Kentucky and Oklahoma combined to avoid disclosing individual operations.

⁶ South Central total includes Kentucky and Oklahoma.

⁷ Includes Montana, Wyoming, New Mexico, Arizona, and Nevada where State data not shown separately.

CHAPTER VIII

FARM RESOURCES, INCOME, AND EXPENSES

The statistics in this chapter deal with farms, farm practices, and the financial aspects of farming. Many of the series are estimates developed in connection with the research activities of the Department. Others are primarily records of operations, such as certain data from agricultural credit agencies.

For convenience, the tables have been arranged in general groups. These groups, with the beginning table indicated, are as follows:

Farm property, table 627

Population and employment, table 646

Farm production and distribution, table 652

Prices and income, table 676

Costs and expenses, table 689

Credit and loan programs, table 716

Stabilization and price support programs, table 743

Seven new tables have been added to this chapter showing production assets used in agriculture, distribution of self employed farmers' social security earnings by income levels, distribution of acreage base by size groups for the Feed Grain Program, and data by States showing the acreage diverted and payments earned under the wheat program and feed grain programs (corn, barley and sorghum grain).

Six tables have been dropped from this issue relating to number of farm allotments for basic commodities by States, acreage allotments for basic commodities by States, distribution of allotments by size groups for rice and cotton, farmers' mutual fire insurance data by States, and data relating to rent and government payments.

Table 626.—Economic trends: Data relating to agriculture, United States, 1949-64

1959	3,703,894	1,120,158	58.9	311,285	128,988

¹ 48 States, excluding Alaska and Hawaii.² Acreages are for preceding year except for 1954 and 1959. Prior to 1925, this column shows the total acreage of crops for which figures are available, except for 1920, when 14,502,932 acres of corn cut for forage were excluded (most of this was probably duplicated in the acreage of corn harvested as grain). Beginning with 1925, the figures represent the total cropland harvested.³ Estimates for 1950, 1954 and 1959 are based on a sample of farms.⁴ Estimate derived from the index of farm real estate values applied to 1940 and 1950 Census values. 1945 Census reported a total value of land and buildings of \$46,389 million.

Economic Research Service. Compiled from reports of Census of Agriculture, U.S. Department of Commerce.

¹ Acreage classified as to use in preceding year except in 1954 and 1959.² Cropland harvested, crop failure, and cultivated summer fallow.³ Before 1945 acreage included in grassland pasture.⁴ Open, or nonforested, permanent pasture in farms 1945-59. Before 1945 also includes cropland used only for pasture.⁵ Land used chiefly for grazing. Includes open or nonforested grazing land, forest and arid woodland grazed, shrub and brush grazing land.⁶ Excludes part of the forested areas in parks, wildlife refuges, military areas, recreation sites, and arid woodland, brushland, and forest land used for grazing.⁷ Includes urban, industrial, and nonfarm residential areas; parks and wildlife refuges; military lands; roads, railroads, ungrazed desert, rock, swamp, and miscellaneous other areas.⁸ Remeasurement and increases in reservoirs account for changes in total land area.Economic Research Service. Data from reports of the U.S. Departments of Agriculture, and Commerce, and public land administering and conservation agencies. Data for 1910, 1920, and 1925 in *Agricultural Statistics, 1962*, table 632.

FOOTNOTES FOR TABLE 631

¹ Cropland harvested, crop failure, and cultivated summer fallow.² Excludes cropland used only for pasture.³ Includes farmsteads, service areas, roadways, and unused areas such as open swamp, bare rock, sand dunes.⁴ Includes open or nonforested grazing land, idle grassland, forest and arid woodland, and shrub and brush grazing land.⁵ Excludes part of forest areas in parks, wildlife refuges, military areas, recreation sites, and arid woodland, brushland, and forest land used for grazing.⁶ Includes urban, industrial, and residential areas, parks, wildlife refuges, military lands, roads, railroads, ungrazed desert, rock, swamp.

Economic Research Service. Data from reports of the U.S. Departments of Agriculture, and Commerce and public land administering and conservation agencies.

Table 631.—Land utilization: Land in farms and land not in farms, by States, 1959

¹ Indexes are based on deposits of member banks of the Federal Reserve System located in places of less than 15,000 population. Annual indexes are simple averages of monthly indexes which are based on average amounts of daily deposits. In preparing indexes of groups of States the amounts of monthly deposits for each State are weighted by the cash farm income of each State in the base period. Beginning with December 1959, U.S. Government deposits are excluded from the data on which the indexes for demand deposits are based. This change in method of reporting slightly lowers the levels of the indexes.

² Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Texas, Washington, and Wisconsin.

³ Michigan, Wisconsin, and Minnesota.

¹ Average number of persons employed during one survey week each month. Survey weeks selected are the latest calendar week that excludes the last day of the month.

² Includes farm operators doing 1 or more hours of farm work and members of their families working 15 hours or more during the survey week without cash wages.

³ Includes all persons doing farm work during the survey week for pay.

Statistical Reporting Service. Data for 1910-48 in *Agricultural Statistics, 1962*, table 648.

Table 649.—Number of different persons who did any farm wage work during the year, average days worked and wages earned, United States, selected years, 1949-64¹

1964	3,370	2,398	972	2,001	156	129	129	933	

¹ Data relate to persons 14 years of age and over in the civilian noninstitutional population at or near the end of the year. No survey conducted in 1953 and 1955. This series differs from the hired workers series shown in table 648 which gives an annual average based on employment during the last week of each month.

² Beginning 1960, includes Alaska and Hawaii.

Economic Research Service. Based on data from enumerative sample surveys made by the U.S. Department of Commerce for the Economic Research Service. Data for 1945-48 in *Agricultural Statistics, 1962*, table 649.

Table 650.—Migratory farm workers: Number and sex of workers, average days worked and wages earned, United States, selected years, 1949-64¹

Year	All migratory farm workers			Migratory workers with 25 days or more of farm wage work

1964	386	280	107	272	155	120	1,581	1,083

¹ Data relate to persons 14 years of age and over in the civilian noninstitutional population at or near the end of the year. Estimates not available for intervening years. Migratory workers are those who leave their homes temporarily to do farm wage work in another county or counties. Does not include foreign nationals brought into the United States to do farm work who have left the country before the time of the survey.

² Beginning 1960, includes Alaska and Hawaii.

Economic Research Service. Based on data from enumerative sample surveys made by the U.S. Department of Commerce for the Economic Research Service.

	354,776	338,184		324,941	316,248			

¹ Includes harvested acreage of 43 crops for which separate planted estimates are not available. See footnote 7 in table 653.

² Count of 59 crops based on crops included from 1949–53. These are: all corn, all wheat, oats, barley, rye, buckwheat, flaxseed, rice, sorghum grain, sorghum forage and silage, cotton, hay, timothy seed, sweetclover seed, dry edible beans, dry field peas, soybeans for beans, cowpeas for peas, peanuts harvested for nuts, sorghum for sirup (through 1959), sugarcane, sugar beets, potatoes, sweetpotatoes, tobacco, broomcorn, artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeyball melons, honeydew melons, kale, lettuce, onions, green peas, green peppers, pimientos, shallots, spinach, tomatoes, and watermelons. Honeyball melons were dropped in 1954 and pimientos in 1956. The addition or dropping of crops generally has little effect on the total. Red clover seed, alsike clover seed, lespediza seed, and alfalfa seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage.

³ Preliminary.

Statistical Reporting Service. Data for 1909–48 in *Agricultural Statistics, 1962*, table 653.

FOOTNOTES FOR TABLE 654

¹ Does not include Alaska and Hawaii.

² Preliminary.

³ Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, pimientos, spinach, and tomatoes. Estimates for pimientos discontinued beginning with the 1956 crop.

⁴ Count of 28 crops based on crops included from 1949–53. These are: artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeyball melons, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons. Honeyball melons were discontinued beginning with the 1954 crop. The addition or dropping of crops generally has little effect on the total. Excludes farm gardens. Acreage for harvest, including mature acreage abandoned or only partially harvested because of low prices or other economic factors.

⁵ Totals are for crops shown in preceding columns. Alfalfa seed, red clover seed, alsike clover seed, and lespediza seed are included in the count of crops, but the acreage is not included because mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts harvested for nuts, has been deducted. Other crops not included are hops, spelt, hemp, velvetbeans, various legumes and other crops harvested by livestock, minor crops, and fruits and nuts. The acreage shown includes some crops harvested in succession from the same land.

⁶ Commercial apples, peaches, pears, grapes, cherries, plums, prunes, apricots, figs, nectarines, olives, avocados, cranberries, dates, persimmons, pomegranates, oranges, tangerines, grapefruit, lemons, limes, tangelos (beginning with the 1955 crop), walnuts, almonds, and filberts.

Statistical Reporting Service. Data for 1934–48 in *Agricultural Statistics, 1962*, table 655.

¹ Does not include Alaska and Hawaii.² Includes acreage planted in preceding fall for harvest in the year shown.³ Grain and sweet sorghums for all uses, including syrup, from 1949 through 1959; excluding syrup beginning with 1960.⁴ Acreage seeded in preceding fall.⁵ Preliminary.⁶ Count of 43 crops based on crops included from 1949-53. These are: rye, hay, sweetclover seed, timothy seed, soybeans for beans, cowpeas for peas, peanuts harvested for nuts, tobacco, sugarcane, broomcorn, and 29 commercial vegetables [11 for processing: asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, pimientos, spinach, and tomatoes; 28 for fresh market: artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeyball melons, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons]. Honeyball melons were dropped in 1954 and pimientos in 1956. The addition or dropping of crops generally has little effect on the total. Alfalfa seed, red clover seed, alsike clover seed, and lespedeza seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts harvested for nuts, has been deducted. The harvested instead of the planted acreage of rye is included because most of the rye acreage not harvested is planted to other crops or used for pasture. Excludes grains cut for hay because part of the acreage shown as planted to wheat, oats, and barley is included in grain hay.⁷ Includes crops listed separately in this table, plus those mentioned in footnote 6. (Sorghums counted as 3 crops—grain, forage, and syrup.)Statistical Reporting Service. Data for 1934-48 in *Agricultural Statistics, 1962*, table 654.

Total 59 crops ¹⁴				306,193	292,373	293,324							
Total 78 crops ¹⁴													

¹ Alaska and Hawaii included in commercial vegetables, but excluded from other crops. Total 59 crops harvested do not include Alaska and Hawaii.

² Preliminary.

³ Includes acreage seeded in preceding fall.

⁴ Acreage seeded in preceding fall.

⁵ Bags of 100 pounds (cleaned).

⁶ Acres grown alone, plus $\frac{1}{2}$ the interplanted acres.

⁷ Grown alone for all purposes.

⁸ All purposes.

⁹ Includes some quantities not harvested.

¹⁰ Includes syrup later made into sugar. Does not include production in nonfarm lands in Somerset County, Maine.

¹¹ Fresh basis.

¹² For breakdown between fresh market and processing, see individual crop tables.

¹³ Shelled basis; for lima beans, 2 pounds in the shell produce approximately 1 pound of shelled beans; for green peas, $\frac{2}{3}$ pounds in the shell produce approximately 1 pound of shelled peas.

¹⁴ Includes crops listed in footnote 2, table 652. Farm value also includes apples, commercial crop, peaches, pears, grapes, cherries, cranberries, oranges, grapefruit, lemons, limes, plums, all prunes, apricots, figs, olives, almonds, walnuts, pecans, maple products and hops.

¹⁵ Total values do not include revisions made after December 1964 which are shown in this table.

Statistical Reporting Service.

¹ For cattle, sheep and hogs, the quantity of net production is the live weight actually produced during the year, adjustments having been made for animals shipped in and changes in inventory.

² Excludes Alaska and Hawaii.

³ Preliminary.

⁴ Including commercial broiler production.

¹ Area in crops harvested (excluding duplication) plus acreages in fruits, tree nuts, and farm gardens.

² Acreages for exports relate to exports for year beginning July 1, or month representing beginning of crop season. Acreage includes seeds for crops and feed for livestock that are exported.

³ Includes products used by our military forces in this country and abroad, and by our domestic civilian population.

⁴ Includes persons in our military forces in this country and abroad.

⁵ Preliminary.

¹ Quantity index using U.S. average farm prices in base period for weights among commodities, 1957–59 prices used starting with 1955, 1947–49 used earlier.

² Excludes domestic use of feed (which will appear in farm value of livestock) and seed (which is not available for other utilization).

³ Includes shipments from the mainland to Alaska and Hawaii when data are available.

⁴ Minus indicates decrease in stocks.

⁵ Preliminary.

Economic Research Service. Data for 1934–48 in *Agricultural Statistics, 1962*, table 660.

Table 660.—Agricultural productivity: Index numbers of farm output per unit of input, United States, 1949–64

[1957–59 = 100]

Year	Productivity ¹	Year	Productivity ¹	Year	Productivity ¹
1949	86	1955	94	1961	106
1950	85	1956	96	1962	107
1951	86	1957	96	1963	110
1952	89	1958	103	1964 ²	108
1953	90	1959	101		
1954	91	1960	105		

¹ Productivity is the output-input ratio. The ratio is obtained by dividing the index of farm output in table 662 by the index of total inputs in table 661.

² Preliminary.

Economic Research Service. Data for 1910–48 in *Agricultural Statistics, 1962*, table 661.

FOOTNOTES FOR TABLE 662

¹ Production of livestock and livestock products for human use, horses and mules excluded.

² Includes clipped wool, mohair, honey and beeswax. These items are not included in the separate groups of livestock and products shown.

³ Cattle and calves, sheep and lambs, and hogs.

⁴ Butter, butterfat, wholesale milk, retail milk, and milk consumed on farms.

⁵ Chicken eggs, commercial broilers, chickens, and turkeys.

⁶ Includes farm gardens, production of hayseeds, pasture seeds and cover-crop seeds, and some miscellaneous crop production not included in separate groups of crops shown.

⁷ Corn for grain, oats, barley, and sorghum grain.

⁸ All hay, sorghum forage, corn silage, and sorghum silage.

⁹ All wheat, rye, buckwheat, and rice.

¹⁰ Potatoes, sweetpotatoes, dry edible beans, dry field peas, truck crops for processing, and truck crops for fresh market.

¹¹ Fruits, berries, and tree nuts.

¹² Sugar beets, sugarcane for sugar and seed, sugarcane syrup, and maple syrup.

¹³ Cotton lint and cottonseed.

¹⁴ Soybeans, peanuts picked and threshed, peanuts hogged, flaxseed, and tung nuts.

¹⁵ Preliminary.

Economic Research Service. Data for 1934–48 in *Agricultural Statistics, 1962*, table 663.

1964 ³	33.25	27.92	5.33	6.1	191.3

¹ Total persons supplied with agricultural products from United States farm production divided by farm employment. Total persons supplied in the United States is obtained by dividing value of farm production minus value of agricultural exports by per capita level of support. Total persons supplied abroad is calculated by dividing value of United States agricultural exports by per capita level of support in the United States. Per capita level of support is derived by dividing total population into value of farm production minus value of agricultural exports plus value of agricultural imports.

² Includes persons in our military forces in this country and abroad. Excludes Alaska and Hawaii.

³ Preliminary.

Economic Research Service. Data for 1820-1948 in *Agricultural Statistics, 1962*, table 672.

1962 ⁷	13,894	10,834	4,145	2,705	18,342	13,842			

¹ Includes Alaska and Hawaii.

² Reports of cooperatives are included either for the calendar year or for fiscal years ending between July 1 of the calendar year shown and June 30 of the following calendar year, with limited exceptions.

³ Includes independent local cooperatives, centralized cooperatives, and federations of cooperatives. Cooperatives are classified according to the activity in which they do more than 50 percent of their business.

⁴ Includes cooperatives whose major activity is providing services related to marketing and farm supply activities.

⁵ Includes members (those entitled to vote). Duplication exists as some farmers belong to more than one cooperative.

⁶ Charges for services in which no duplication occurs.

⁷ Preliminary.

⁸ Cooperatives report sales of each major commodity marketed, the value of each major type of supply purchased, and receipts from major types of services performed for patrons. Total marketing volume, therefore, consists only of the value of products actually marketed and farm supply volume consists only of the value of supplies purchased.

⁹ Includes intercooperative business.

¹⁰ Excludes intercooperative business.

Farmer Cooperative Service. Based on reports from cooperatives reporting to the Service. Data for 1934-49 in *Agricultural Statistics*, 1962, table 673.

Table 673.—Farmers' cooperatives: Number of marketing, farm supply, and related service cooperatives and business volume, United States, 1962-63¹ (preliminary)

Item	Cooperatives handling	Gross business (includes intercooperative business)	Net business (excludes intercooperative business) ²

Trucking, cotton ginning, storage, grinding, locker plants, miscellaneous.....	4 5,412	5 303,281	5 303,281
Total business.....	4 8,907	18,342,007	13,841,846

¹ Includes Alaska and Hawaii.² Represents value at the first level at which cooperatives transact business for farmers.³ Includes coffee, forest products, fur pelts, hay, hops, nursery stock, tung oil, and other farm products not separately classified.⁴ Because many cooperatives do more than one type of business, these totals are less than the number that would be obtained by adding the number of cooperatives handling individual items or performing individual services.⁵ Charges for services in which no duplication occurs.

Farmer Cooperative Service. Based on records from cooperatives reporting to the Service.

¹ The market basket contains the average quantities of farm-originated foods purchased annually per household in 1960-61 by wage-earner and clerical-worker families and single persons living alone.

² Retail costs are calculated from retail prices published by the U.S. Department of Labor.

³ The farm values, or payments received by farmers for products equivalent to the foods in the market basket, are calculated from prices received by farmers. The farm values of processed products are adjusted by subtracting imputed values of byproducts.

⁴ Preliminary.

⁵ Starting July 1964 the farm value and farmer's share for bakery products are based on the market price of wheat received by farmers plus 70 cents per bushel, the cost of the marketing certificate to millers and the value of the domestic marketing certificate received by farmers complying fully with the Federal Wheat Program.

Table 677.—Expenditures for farm food products: Marketing bill, farm value, and consumer expenditures for domestic farm food products bought by civilians, United States, 1949-64¹

Year	Total marketing bill ²	Farm value	Civilian expenditures for farm foods	Year	Total marketing bill ³	Farm value	Civilian expenditures for farm foods

1964 ⁶	20.8	5.1	2.7	1.4	18.7	47.3

¹ The total marketing bill is the difference between total civilian expenditures for domestic farm-originated food products and the farm value or payment farmers received for the equivalent farm products. It relates only to domestic food bought by civilian consumers and not to that sold to the Armed Forces or exported.

² Does not include the cost of labor employed in intercity for-hire transportation because payments made for transportation also are compared with the total marketing bill.

³ Includes charges for heating and refrigeration; does not include local hauling; charges for intercity transportation by water and air are a part of the "other" or residual component of the marketing bill.

⁴ Does not include profits of unincorporated firms or firms engaged in intercity transportation.

⁵ Residual component; includes other costs such as advertising, depreciation, fuel, electric power, containers, packaging materials, air and water transportation, interest on borrowed capital, rents, noncorporate profits, and taxes other than Federal income taxes.

¹ All index number series are of the weighted aggregative type. They are based upon averages of rates in effect during the year. Annual averages are computed by weighting the rates by the number of days they are in effect. In constructing the combined index, group indexes were weighted by average revenues for 1957–59.

² Beginning 1957, combined index includes soybeans, corn, small grains, wool and tobacco.

³ Beginning 1957, weights for annual average freight rates are based on 1957–59 quantity data.

¹ Season average prices for crops; weighted calendar year average for livestock and livestock products other than wool for 1963, which is April–December average. Unless otherwise noted these are averages for marketing season or calendar year computed by weighting State prices by quantities sold, or by production for those commodities for which virtually all the production is sold. ² Parity prices as computed currently using base prices in effect and indexes for months indicated. Parity prices shown are those used in connection with a price support determination when applicable, otherwise for the month preceding the start of the crop marketing season for crops and for December of the previous year for livestock and livestock products. ³ Preliminary. ⁴ Following year.

⁵ Previous year. ⁶ State annual average prices weighted by production to obtain United States averages. ⁷ Average local market price for wool sold excluding incentive payment. ⁸ Price to December 1. ⁹ Based on equivalent packinghouse-door returns for Pacific Coast States and prices as sold for other states. ¹⁰ Equivalent per unit returns for bulk fruit at first delivery point. ¹¹ Prices for fresh use for important producing States and average prices for all methods of sale for other States. ¹² Packinghouse-door returns for fresh consumption for Pacific Coast States, average prices for fresh use for New York and Michigan, and average prices for all methods of sale for other States. ¹³ Includes California dried prunes. ¹⁴ Prices include average conditional Government payments to farmers authorized by the Sugar Acts. ¹⁵ Continental U.S. only. ¹⁶ Average price to Dec. 1 for all States except Louisiana which is a season average. ¹⁷ Includes some processing. ¹⁸ Simple average of States weighted by estimated Jan. 1 head for U.S. average. ¹⁹ Sold by farmers directly to consumers.

¹ Average prices at which the Commodity Credit Corporation supported agricultural commodities during the marketing year beginning in year shown. The mandatory commodity group indicates only those commodities for which support was mandatory during the later years. The summary excludes gum naval stores, surplus almonds (1961 only) and some crops which have not been supported in recent years.

² Average support shown for commercial area only. Support outside commercial area was 70 percent of parity in 1957 and, in 1958, was 75 percent of the rate that would reflect the U.S. average level. The national average support rate in effect for farmers in the commercial area who were not in compliance with acreage limitations was as follows: 1957—\$1.10, 1958—\$1.06. For 1959 the support reflects 90 percent of the average price received by farmers (weighted by sales, by months, each calendar year) during the three calendar years 1956, 1957, and 1958, adjusted for unredeemed loans and for abnormal quantities of low-grade corn marketed from the 1957 crop.

³ Includes price support payments as follows: for 1963, corn—18¢, wheat—18¢, barley—14¢, sorghum grain—20¢; for 1964, corn—15¢, upland cotton—3.5¢, barley—12¢, sorghum grain—23¢; for 1965, corn—20¢, upland cotton—4.35¢, barley—16¢, sorghum grain—35¢.

⁴ Basis ½-inch Middling through 1960, 1-inch Middling 1961-65.

⁵ Choice A; choice B support: 1959—\$0.2470 and 1960—\$0.2318.

⁶ Support for wheat accompanied by domestic marketing certificates; if accompanied by export certificates: \$1.55; non-certified wheat \$1.30 for 1964 and \$1.25 for 1965.

⁷ Price support mandatory except in 1958 and 1959. Grade No. 2 or better, except for oats which is Grade No. 3.

⁸ Loan rates basis grade (100), except in 1963-65. Producer rate \$4.00 less per ton.

⁹ Basis grade (100) for purchases from producers with appropriate differentials for purchases from ginnerys to reflect normal handling costs. No loan program in 1963-65.

Agricultural Stabilization and Conservation Service. Data for 1944-57 in *Agricultural Statistics, 1962*, table 682.

¹ The over-all index is known as the Parity Index which is the Index of Prices Paid by Farmers including Interest, Taxes, and Wage Rates.

² Simple average of quarterly indexes seasonally adjusted.

Statistical Reporting Service. Data for 1934-48 in *Agricultural Statistics*, 1962, table 685.

FOOTNOTES FOR TABLE 683

¹ Fresh market for noncitrus and fresh market and processing for citrus.

² Includes interest, taxes, and farm wage rates.

³ Preliminary.

Statistical Reporting Service. The price series for individual commodities are averages for all classes and grades of the commodity being sold in local farm markets on or about the 15th of each month. In computing the group indexes, prices of individual commodities have been weighted by average quantities sold during 1937-41 through September 1952. From September 1952 forward, average quantities sold during 1953-57 were used. Data for 1934-48 in *Agricultural Statistics*, 1962, table 684.

Table 685.—Prices paid by farmers: Prices, by commodities, United States, average 1957-59, annual, 1961-64¹

Commodity and unit	Average 1957-59	1961	1962	1963	1964
	Dollars	Dollars	Dollars	Dollars	Dollars
Food:					
Round steak, per pound.....	0.892	0.920	0.952	0.933	0.917
Hamburger (beef), per pound.....	.526	.538	.543	.532	.520
Bologna, per pound.....	.556	.565	.564	.560	.556
Bacon, sliced, per pound.....	.638	.628	.623	.597	.594
Ham, whole, per pound.....	.642	.609	.616	.600	.593
Pork chops, per pound.....	.738	.740	.758	.726	.722
Pork sausage, per pound.....	.512	.509	.524	.510	.507
Salmon, pink, per 16 ounce can.....	.632	.742	.774	.712	.668
Lard, per pound.....	.211	.204	.197	.195	.202
Vegetable shortening, per 3 pound can.....	.915	.875	.821	.766	.764
Margarine, per pound.....	.271	.263	.259	.250	.250
Milk, fluid, per quart.....	.242	.239	.247	.246	.247
Milk, evaporated, per 14½ ounce can.....	.156	.164	.163	.160	.160
Butter, packaged, per pound.....	.756	.777	.770	.766	.774
Cheese, American, per pound.....	.587	.625	.626	.630	.634
Eggs, per dozen.....	.516	.508	.494	.523	.505
Flour, per 25-pound sack.....	2.15	2.12	2.19	2.19	2.22
Bread, white, loaf, per pound.....	.187	.198	.202	.206	.207
Soda crackers, packaged, per pound.....	.292	.289	.301	.305	.305
Corn meal, per pound.....	.0751	.0758	.0779	.0775	.0780
Corn flakes, packaged, per pound.....	.322	.350	.359	.376	.388
Rolled oats, packaged, per pound.....	.164	.179	.185	.191	.194
Rice, packaged, per pound.....	.185	.186	.193	.191	.194
Baking powder, canned, per pound.....	.249	.277	.283	.287	.292
Corn, per standard *303 can.....	.174	.189	.189	.182	.180
Peas, per standard *303 can.....	.179	.188	.192	.192	.196
Beans, dry, Navy, per pound.....	.168	.164	.166	.168	.171
Potatoes, Irish, per 10-pound bag.....	.539	.515	.536	.526	.701
Cabbage, per pound.....	.0862	.0822	.102	.0907	.0950
Lettuce, per head.....	.210	.204	.225	.214	.244
Tomatoes, fresh, per pound.....	.271	.263	.285	.199	.206
Apples, per pound.....	.156	.172	.168	.164	.159
Bananas, per pound.....	.170	.163	.166	.165	.170
Lemons, 360's, per dozen.....	.524	.552	.602	.634	.561
Oranges, per dozen.....	.550	.608	.609	.679	.638
Sugar, per 10-pound bag.....	1.10	1.14	1.14	1.38	1.25
Sirup, table, per pint (16 fl. oz.).....	.179	.204	.214	.234	.255
Candy, non-chocolate, without nuts, per pound.....	.343	.363	.366	.388	.399
Coffee, ground, per pound.....	.866	.732	.717	.708	.840
Tea, Orange Pekoe, packaged, per pound.....	1.67	1.72	1.70	1.71	1.72
Tobacco:					
Smoking tobacco, packaged, per pound.....	1.39	1.76	1.79	1.81	1.82
Cigarettes, per package of 20.....	.246	.262	.265	.266	.271
Clothing and yard goods:					
Men's clothing:					
Overalls, each.....	3.51	3.66	3.74	3.82	3.90
Shirts, cotton, work, each.....	2.02	2.14	2.21	2.25	2.31
Undershirts, sleeveless, each.....	.685	.726	.743	.742	.747
Shorts, each.....	.808	.837	.849	.857	.863
Union suits, heavy, cotton, each.....	2.79	2.95	3.03	3.07	3.14
Gloves, canvas, work, per pair.....	.360	.370	.377	.384	.392
Jackets, wool, each.....	13.70	14.60	15.10	15.30	15.80
Socks, cotton, work, per pair.....	.326	.343	.350	.356	.363
Shoes, work, per pair.....	7.87	8.57	8.68	8.74	8.84
Boots, rubber, knee-length, per pair.....	6.86	7.14	7.16	7.10	7.06
Suits, wool, 1 pair pants, each.....	43.60	45.80	46.70	47.40	48.60
Trousers, extra, woolen, each.....	11.00	11.30	11.40	11.50	11.70
Trousers, cotton, each.....	4.15	4.36	4.64	4.73	4.82
Shirts, broadcloth, each.....	3.12	3.29	3.34	3.36	3.38
Overcoats, all wool, each.....	38.40	39.20	39.40	39.20	40.00
Hats, felt, each.....	6.88	7.40	7.54	7.58	7.67
Shoes, dress, per pair.....	9.42	10.00	10.20	10.20	10.30
Overshoes, rubber, per pair:					
With buckles or zipper.....	6.04	6.05	6.02	5.98	5.90
Without buckles or zipper.....	3.30	3.59	3.70	3.79	3.81
Boys' clothing:					
Suits, wool, 0-12 years, each.....	19.70	19.80	20.20	19.80	19.70
Overalls, waist, each.....	2.28	2.46	2.54	2.60	2.64
Sweaters, pull-over, part-wool, each.....	3.67	4.59	4.81	5.09	5.33
Shoes, dress, sizes 2½-6, per pair.....	6.01	6.56	6.66	6.64	6.66

Fir, under C.....	183.00	186.00	184.00	184.00	188.00
Bevel-siding, per 1,000 board feet:					
Pine, C and better.....	185.00	182.00	181.00	178.00	181.00
Pine, under C.....	142.00	145.00	143.00	142.00	143.00
Cedar, clear.....	176.00	172.00	172.00	173.00	184.00
Cedar B.....	147.00	142.00	139.00	142.00	154.00
Flooring, per 1,000 board feet:					
Yellow pine, B and better.....	221.00	219.00	218.00	218.00	217.00
Yellow pine, under B.....	158.00	159.00	158.00	159.00	160.00
Fir, V G., B and better.....	263.00	272.00	272.00	276.00	286.00
Fir, V.G., under B.....	206.00	213.00	212.00	216.00	224.00
Shingles, wood, cedar, 16 inches per square.....	14.40	14.70	14.80	15.40	16.20
Doors, fir, 2-panel, each.....	11.50	11.60	11.60	11.60	12.40
Doors, flush, hollow-core, each.....	11.10	9.84	9.62	9.33	9.14
House windows, D. H. Unit with frames and sashes.....	20.9	22.70	22.30	22.30	22.80
Barn sash, 4-light, each.....	3.02	3.08	3.10	3.15	3.35
Nails, 8d, common, per pound.....	.166	.176	.177	.174	.174
Screen wire, galvanized, 16-mesh, 30-inch width, per linear foot.....	.238	.243	.241	.237	.235
Roofing, galvanized steel, per 100 square feet.....	13.00	13.00	12.90	12.90	12.90
Roofing, composition, per 100 square feet.....	4.32	4.31	4.28	4.20	4.16
Gypsum board, $\frac{3}{4}$ -inch, per 1,000 square feet.....	59.00	59.40	59.30	59.20	59.20
Shingles, asphalt, per square.....	9.01	8.80	8.85	9.28	9.21
Insulating board, per 1,000 square feet.....	85.10	88.80	88.20	87.70	87.60
Bricks, common, per 1,000.....	52.50	55.30	56.20	57.60	58.50
Concrete blocks, per 100.....	25.00	25.50	25.50	25.80	25.80
Portland cement, per 94 pounds.....	1.47	1.51	1.52	1.54	1.54
Paint, house, per gallon.....	6.34	6.44	6.45	6.38	6.35
Linseed oil, per gallon.....	2.84	2.95	3.01	3.04	3.05
Barbed wire, 2-point, per spool of 80 rods.....	9.93	9.83	9.73	9.57	9.56
Barbed wire, 4-point, per spool of 80 rods.....	11.00	11.00	10.80	10.70	10.70
Poultry netting, 60-inch, per roll of 150 feet.....	10.80	11.00	11.10	11.00	11.20
Posts, wood, line fence, each.....	.750	.798	.797	.786	.804
Posts, steel, each.....	1.15	1.17	1.17	1.16	1.13
Gates, farm, steel, 14 feet, each.....	28.90	30.40	31.00	31.60	32.10
Woven wire fencing, 32-inch, per 20 rod roll.....	22.70	23.30	23.40	22.90	22.60
Windmills, without tower, each.....	141.00	153.00	157.00	168.00	176.00
Iron pipe, galvanized, 1½-inch diameter, per foot.....	.445	.459	.460	.458	.459
Motor supplies:					
Gasoline, regular, filling station, per gallon.....	.309	.315	.315	.314	.310
Gasoline, tank truck, per gallon.....	.268	.276	.274	.274	.272
Kerosene, per gallon.....	.183	.189	.188	.188	.187
Tractor fuel, diesel, per gallon.....	.166	.166	.164	.163	.164
Motor oil, regular, non detergent, per gallon.....	1.22	-----	1.17	1.18	1.22
Motor oil, heavy duty detergent, per gallon.....	1.54	-----	1.47	1.49	1.53
Motor oil, all weather high detergent, per gallon.....	1.82	-----	1.77	1.78	1.83
Grease, per pound.....	.231	.222	.222	.226	.229
Tires, 6.70x15, 4 ply tubeless, each.....	23.20	-----	20.50	20.30	20.40
Tires, 6.70x15, 4 ply tubetype, each.....	19.40	-----	17.00	16.80	16.90
Inner tubes, 6.70x15, each.....	3.84	3.65	3.52	3.41	3.38
Tires, truck, 7.50x20, 10 ply, each.....	77.80	74.40	67.20	64.30	63.90
Spark plugs, each.....	.909	.936	.936	.930	.933
Storage batteries, 45 plates, 6 volt, each.....	16.70	15.60	15.20	15.00	15.30
Storage batteries, 51 plates, 6 volt, each.....	19.80	19.20	18.80	18.50	18.70
Motor vehicles:					
Autos, 4-door sedans:					
6-cylinder, each ⁴	2,300.00	2,170.00	2,180.00	2,200.00	2,200.00
8-cylinder, each ⁴	2,910.00	2,670.00	2,700.00	2,720.00	2,740.00
Trucks:					
2-ton, cab and chassis, each ⁴	3,000.00	3,080.00	3,130.00	3,180.00	3,220.00
½-ton, pickup ⁷	1,970.00	2,030.00	2,050.00	2,060.00	2,060.00
Tractors:					
Wheel, under 20 belt horsepower, each.....	1,610.00	1,660.00	1,660.00	1,620.00	1,590.00
Wheel, 20-29 belt horsepower, each.....	2,350.00	2,540.00	2,630.00	2,660.00	2,720.00
Wheel, 30-39 belt horsepower, each.....	3,070.00	3,090.00	3,280.00	3,340.00	3,470.00
Wheel, 40-49 belt horsepower, each.....	3,980.00	4,050.00	4,210.00	4,420.00	4,500.00
Wheel, 50-59 belt horsepower, each.....	5,050.00	5,180.00	5,390.00	5,620.00	5,770.00
Wheel, 60-69 belt horsepower, each.....	5,720.00	-----	6,210.00	6,360.00	6,380.00
Crawler, under 25 db. hp., each.....	3,280.00	3,660.00	3,730.00	3,730.00	3,880.00
Crawler, 25-34.9 db. hp., each.....	5,230.00	5,090.00	5,140.00	5,150.00	5,350.00
Crawler, 35-49.9 db. hp., each.....	7,260.00	7,450.00	7,620.00	7,720.00	7,990.00
Farm machinery:					
Plows, tractor, moldboard, two bottom, each.....	280.00	308.00	314.00	315.00	328.00

See footnotes at end of table.

Table 685.—Prices paid by farmers: Prices, by commodities, United States, average 1957-59, annual, 1961-64 —Continued

Commodity and unit	Average 1957-59	1961	1962	1963	1964
	Dollars	Dollars	Dollars	Dollars	Dollars
Farm machinery—Continued:					
Plows, tractor, moldboard, three bottom, each	418.00	484.00	500.00	518.00	540.00
Disk, harrows, tandem, 7 ft., each	321.00	352.00	359.00	368.00	374.00
Spiketooth harrows, steelbar, one section	36.00	42.60	43.70	45.20	47.00
Cultivators, 2-row, tractor, each	312.00	342.00	341.00	314.00	350.00
Corn planters, 2-row, plain, each	272.00	307.00	314.00	323.00	340.00
Grain drills, tractor-drawn, 16-tube, plain, each	634.00	716.00	732.00	757.00	785.00
Grain drills, tractor-drawn, 20-tube, plain, each	721.00	804.00	829.00	846.00	902.00
Mowers, tractor, 7-ft., each	394.00	452.00	468.00	485.00	502.00
Pick-up balers, automatic tie, P.T.O., each	1,820.00	1,910.00	1,950.00	1,940.00	1,960.00
Combines, self-propelled, 12 ft., each	6,326.00	6,750.00	6,930.00	7,010.00	7,230.00
Combines, 5-6 feet, P.T.O., each	1,800.00	2,020.00	2,150.00	2,220.00	2,300.00
Corn picker—huskers, 2-row, each	2,120.00	2,560.00	2,760.00	2,710.00	2,850.00
Hammer mills, each	273.00	270.00	276.00	289.00	292.00
Cream separators, electric, each:					
750 pound capacity	267.00	283.00	294.00	303.00	310.00
Single milker units, each	131.00	134.00	137.00	137.00	142.00
Farm wagons, for rubber tires, less tires, each	181.00	191.00	192.00	193.00	196.00
Power sprayers, boom type, tr. mtd., each	196.00	224.00	234.00	245.00	261.00
Gas engines, 1½ horsepower, each	61.70	52.50	50.10	48.90	47.50
Electric motors, ¾ horsepower, each	20.70	20.70	20.60	20.50	20.50
Farm supplies:					
Axes, each	6.03	6.10	6.08	6.01	6.09
Hammers, each	3.23	3.53	3.53	3.63	3.72
Pitchfork, 3-tine, each	3.66	4.02	4.16	4.22	4.36
Pitchfork, 4-tine, each	4.41	4.77	4.88	4.97	5.09
Hoes, 7-inch blade, each	2.38	2.55	2.58	2.61	2.59
Milk cans, 10 gallons, each	13.60	14.70	14.80	15.00	15.10
Milk pails, 12 quarts, each	2.21	2.48	2.55	2.48	2.56
Rope, manila, per pound	.755	.817	.826	.849	.849
Binder twine, per pound	.235	.239	.243	.247	.281
New baskets, round stave, bushel, with cover, per dozen	4.67	4.69	4.78	4.96	5.11
Lead arsenate, per pound	.377	.392	.375	.372	.365
Fertilizer:					
Mixed fertilizer:					
0-20-20, per ton	64.30	65.50	66.90	66.30	66.60
2-12-12, per ton	42.70	45.20	46.00	46.00	46.30
3-9-9, per ton	42.40	51.60	53.80	54.70	55.80
3-12-6, per ton	45.90	47.60	48.80	48.60	49.20
3-12-12, per ton	50.60	51.70	52.00	51.80	52.00
4-8-8, per ton	36.90	38.80	38.60	40.60	39.20
4-8-12, per ton	47.80	47.80	49.90	51.30	52.20
4-12-8, per ton	47.10	48.10	48.40	49.00	48.90
4-12-12, per ton	39.60	40.20	40.20	40.60	40.80
5-10-5, per ton	45.80	46.80	46.80	48.60	49.20
5-10-10, per ton	50.10	50.80	50.80	50.50	50.50
6-8-8, per ton	42.80	41.80	41.90	42.60	42.80
Nitrate of soda, per ton	59.80	59.80	59.90	60.00	60.00
Sulphate of ammonia, per ton	59.30	58.40	56.90	52.00	52.60
Ammonium nitrate, per ton	81.80	82.10	81.40	80.40	79.20
Superphosphate, 20% P ₂ O ₅ , per ton	37.00	38.20	38.40	40.30	40.20
Superphosphate, 45% P ₂ O ₅ , per ton	78.40	80.20	79.90	80.80	80.50
Phosphate rock, per ton	21.40	21.20	20.80	20.60	20.60
Ammonium phosphate, 16-20, per ton	89.60	86.40	85.90	81.90	82.00
Muriate of potash, 55% and over, per ton	52.10	52.60	53.20	53.80	53.80
Agricultural limestone, per ton	4.55	4.67	4.75	4.78	4.76
Livestock:					
Feeders and stockers:					
Cattle and calves, per 100 pounds	23.10	23.30	24.50	22.90	19.80
Lambs, per 100 pounds	20.70	15.10	16.60	17.20	18.30
Hogs, per 100 pounds	18.50	17.80	18.20	17.00	16.70
Baby chicks, straight run, per 100	13.00	13.40	13.00	13.10	12.30
Turkey poultis, each	.590	.583	.565	.562	.572
Feed:					
Alfalfa hay, baled, per ton	30.30	30.90	30.60	32.90	32.70
Other hay, baled, per ton	28.20	29.10	29.50	32.20	31.90
Cottonseed meal, per 100 pounds	3.95	4.06	4.29	4.62	4.46
Soybean meal, per 100 pounds	4.06	4.49	4.61	4.95	4.93
Linseed meal, per 100 pounds	4.14	4.36	5.04	5.20	4.92
Meat scrap, per 100 pounds	5.37	5.47	5.62	5.87	5.64
Tallowage, per 100 pounds	5.57	5.64	5.81	6.10	5.83
Bran, per 100 pounds	2.86	2.94	3.03	3.14	3.08
Middlings, per 100 pounds	2.96	2.99	3.09	3.22	3.16
Mill run, per 100 pounds	2.73	2.78	2.92	2.99	2.98
Corn meal, per 100 pounds	3.27	3.07	3.08	3.21	3.24

See footnotes at end of table.

Sudangrass, per 100 pounds.....	10.40	12.60	12.40	14.20	12.40
Timothy, per 100 pounds.....	24.20	15.30	17.30	25.80	37.20

¹ Annual average of prices at independent and chain stores. Prices paid by farmers are collected for the most part from retail establishments located in small cities, towns, and in rural areas through using questionnaires sent and returned by mail.

² Includes, standard and better.

³ Includes, utility and economy.

⁴ 1957-59 average is for 4-door sedans. 1964 model designations include Ford Falcon, Chevrolet II, Plymouth Valiant, and Rambler. Comparable model designations are included for earlier years.

⁵ 1957-59 average is for 4-door sedans. 1964 model designations include Ford Custom 500, Chevrolet Bel Air, Plymouth Fury I and Buick Special. Comparable model designations are included for earlier years.

⁶ Coverage includes Ford and Chevrolet.

⁷ Coverage includes Ford, Chevrolet, International and Dodge.

⁸ Spread on field, beginning 1962.

Statistical Reporting Service.

¹ Includes labor used on crops, livestock and overhead. Farm maintenance or overhead work includes time spent on fencing, repairs to buildings, machinery and equipment, farmwoods, pastures, general land maintenance, farm business and other miscellaneous work.

² Excludes horses and mules; includes wool and minor livestock which are excluded from separate enterprises shown.

³ Cattle and calves, sheep and lambs, and hogs.

⁴ Chickens, broilers, and turkeys.

⁵ Includes hay seeds, pasture seeds, and cover-crop seeds; farm gardens; and minor crops which are excluded from separate crops shown.

⁶ Corn for grain, oats, barley, and sorghum grain.

⁷ All hay, corn silage, and sorghum forage and silage.

⁸ All wheat, rye, buckwheat, and rice.

⁹ Potatoes, sweetpotatoes, dry edible beans, dry field peas, and truck crops.

¹⁰ Fruits, berries, and tree nuts.

¹¹ Sugar beets, sugarcane for sugar and seed, sugarcane syrup, and maple products.

¹² Soybeans, peanuts, flaxseed, and tung nuts.

¹³ Preliminary.

Economic Research Service. Data for 1910-48 in *Agricultural Statistics, 1962*, table 696.

¹ Includes Government distribution and secondary- and trace-nutrient fertilizers but not liming materials.

² Calculated from the quantities of each grade and kind of fertilizer shipped and the analyses published by Fertilizer Control Authorities for the respective States.

³ Data for 1963 preliminary.

⁴ Includes Puerto Rico. The consumption of commercial fertilizer in other possessions is negligible.

¹ Contract rates on loans through Federal land bank associations. Beginning 1961, some land banks have charged temporary rates that were lower than the contract rates. In computing the average rates, each Farm Credit district is given equal weight; within districts rates are weighted by the number of days in force.

² Based on bonds outstanding at end of each year. Beginning 1950, represents net cost to banks. Based on face rates prior to 1950. Excludes bonds owned by issuing agency.

³ Average market yields on representative outstanding issues.

⁴ Rates represent interest (less patronage refunds), service fees, cost of record searches, filing and releasing mortgages, etc., paid by borrowers, as percent of average loans outstanding during year.

⁵ Annual interest income on loans, discounts, and notes receivable as a percentage of average balance of such items outstanding during the year.

⁶ Beginning 1950, represents weighted average net cost to banks of debentures issued each year. Based on face rates of debentures prior to 1950.

⁷ Excludes rates on loans secured by CCC documents.

⁸ Represents weighted average net cost to banks of debentures outstanding at end of each year. No debentures issued prior to 1950.

⁹ Board of governors of Federal Reserve System. Annual averages of prevailing open-market rates in New York City.

¹⁰ Board of governors of Federal Reserve System. Annual ranges in discount rates on advances secured by Government obligations maturing or callable beyond 1 year and discounts of and advances secured by eligible paper.

Economic Research Service and Farm Credit Administration. Data for 1929-48 in *Agricultural Statistics, 1962*, table 709.

¹ Number of farms on which the insured crop was planted, including duplication where both the landlord and tenant are insured. Insured farms on which no insured crop was planted are not included.

² The insured's share of the planted acreage on the farm.

³ Less than 500 acres.

⁴ Includes a combination of commodities varying by counties.

⁵ Tons insured for raisins not included in total of all commodities.

¹ Excludes Alaska, Hawaii, Puerto Rico, and U.S. possessions.² Loans on regular mortgages only for 1958 and earlier years. Beginning June 30, 1959, includes purchase-money mortgages and sales contracts. Includes loans by the Land Bank Commissioner made on behalf of the Federal Farm Mortgage Corporation. Authority to make Land Bank Commissioner loans expired July 1, 1947, except for the limited purpose of refinancing loans previously made by the Land Bank Commissioner. Liquidation of Commissioner loans was completed June 30, 1955. For 1955 and earlier years, the data in this table on Federal land bank loans made differ from the data in table 729 only because Puerto Rico is excluded. Prior to 1956 the data on Federal land bank loans made in both this table and table 729 included the outstanding loan balance as well as new money advanced in a part of the cases where existing borrowers obtained additional loans. Beginning in 1956, however, an effort was made to include the outstanding balance in loans made for a larger number of existing borrowers obtaining additional loans. By 1958 the data in this table include all outstanding loan balances in cases where borrowers obtained additional financing.³ Estimates based on reports from counties including a substantial sample of farms in the United States. Includes purchase money mortgages and sales contracts to the extent they were recorded.⁴ Includes farm mortgage loans made by the Farmers Home Administration, and by miscellaneous lenders.

Farm Credit Administration. Prepared in cooperation with the 12 Federal land banks.

¹ For States included in regions, see table 721.² Excludes Alaska and Hawaii.³ Preliminary.Economic Research Service. Data for 1949–54 in *Agricultural Statistics, 1963*, table 722.

FOOTNOTES FOR TABLE 716

¹ Excludes Alaska and Hawaii, except as indicated in footnote 9.² Includes regular mortgages, purchase-money mortgages, and sales contracts. Federal land bank and Federal Farm Mortgage Corporation mortgages in process of foreclosure were estimated for 1951 and 1952.³ Loans were made by the Land Bank Commissioner. Lending authority expired July 1, 1947. On June 30, 1955, loans of the FFMC were sold to the Federal land banks.⁴ Liquidation of the joint-stock land banks was completed April 26, 1951.⁵ Includes tenant-purchase, farm-enlargement, farm-development, project liquidation, and direct soil and water conservation loans to individuals, and loans for these purposes from State Corporation trust funds. Includes rural-housing loans to farmers. Beginning October 1961, rural-housing loans were made on nonfarm tracts; these loans are included in the amount outstanding reported for Jan. 1, 1962, but excluded for 1963 to date.⁶ Compiled from reports of life insurance companies, "Best's Life Insurance Reports," "Spectator Life Insurance Yearbook," and data from Life Insurance Association of America and Institute of Life Insurance. Includes legal reserve companies only. Includes regular mortgages, purchase-money mortgages, and sales contracts; beginning 1965, excludes sales contracts.⁷ Includes all operating commercial, savings, and private banks. Also includes bank holdings of soil and water conservation loans and farm-ownership loans insured by the Farmers Home Administration.⁸ Amounts are residuals or differences between amounts reported by institutional lenders and estimates of total farm-mortgage debt. They roughly measure the farm-mortgage debt held by individuals and other non-reporting lenders.⁹ Beginning 1960, data for reporting lending institutions in Alaska and Hawaii are included. No estimates of total farm-mortgage debt for these States are available.¹⁰ Preliminary.Economic Research Service. Data for 1929–48 in *Agricultural Statistics, 1962*, table 718.

FOOTNOTES FOR TABLE 719

¹ Includes mortgages in process of foreclosure.² Includes United States legal reserve companies only. Includes regular mortgages, purchase-money mortgages, and sales contracts; beginning 1965, excludes sales contracts.³ Preliminary.⁴ Includes direct farm-ownership loans, direct soil and water conservation loans to individuals and rural-housing loans to farmers. Also includes direct farm-ownership loans made from State Corporation trust funds.⁵ Includes loans held by all operating commercial, savings, and private banks, individuals, and miscellaneous lenders. State estimates are approximate and should be used only as general indicators of the amount of mortgage debt held by this group. See table 724 for State data held by all operating banks (classified by location of bank rather than by location of security).⁶ Includes District of Columbia.

Economic Research Service.

¹ Includes loans of national and State commercial, mutual savings, stock savings, and private banks. Loans are classified according to location of bank and, therefore, are not strictly comparable with data for other lenders which are classified according to location of farm.

² Includes bank holdings of farm-ownership loans and soil and water conservation loans insured by the Farmers Home Administration.

³ Includes loans guaranteed by the Commodity Credit Corporation and certificates of interest in pool of CCC loans.

⁴ Mariana Islands, Puerto Rico, Samoa (American), and Virgin Islands.

Economic Research Service. Data from Federal Deposit Insurance Corporation.

									610,273			
										8,733		

¹ In addition to data reported in this table other loans were made to new and prior year borrowers as follows: Insured labor housing, 1 for \$2,500 in 1951, 3 for \$24,010 in 1962, 3 for \$11,560 in 1963 and 6 for \$22,240 in 1967; insured rental housing, 5 for \$183,500 in 1963 and 21 for \$816,600 in 1964. Amounts outstanding on loans advanced were as follows: Insured labor housing, Jan. 1, 1963, \$12,021; 1964, \$36,568, and 1965, \$57,251; insured rental housing, Jan. 1, 1964, \$158,063 and 1965, \$720,513. Also rural housing grants for \$8,188,975 were made.

² Includes tenant purchase, farm enlargement, farm development, building improvement, and project liquidation loans, loans primarily for refinancing purposes, and loans from Corporation trust funds.

³ Amount advanced for project liquidation loans and obligated for all other types of loans. Includes subsequent loans to borrowers who received an initial loan in a prior year.

⁴ In addition to the types of loans reported in the preceding column, includes amount

outstanding on farm development (special real estate) loans from "Loans, grants, and rural rehabilitation" funds.

⁵ Loan advances less principal repayments.

⁶ Includes tenant purchase, farm development and building improvement loans and loans primarily for refinancing purposes.

⁷ Amount obligated. Includes subsequent loans to borrowers who received an initial loan in a prior year.

⁸ Amount obligated less principal repayments for Jan. 1, 1949 and 1950; loan advances less principal repayments for Jan. 1, 1951-65.

⁹ Loans obligated from beginning of rural housing program in November 1949-December 1950.

¹ National acreage allotments proclaimed by the Secretary under the Agricultural Adjustment Act of 1938 except as follows: Cotton, peanuts, and rice national acreage allotments have been adjusted in certain years to include increases provided by special legislation; tobacco figures are a total of individual allotments, since a national allotment is not proclaimed for tobacco. In the case of wheat, entries do not include special adjustments, such as those for durum, and in 1964 and 1965 increased allotment acreages for small wheat farms, required by special legislative provisions.

² The commercial corn area included the following number of counties: 1950–837, 1954–834, 1955–805, 1956–840, 1957–894, and 1958–932.

³ Other types of tobacco generally have been and are subject to allotments.

⁴ Acreage allotments terminated.

⁵ Suspended and replaced by 51 million acres base acreage.

⁶ Marketing quotas not in effect.

⁷ Preliminary.

Agricultural Stabilization and Conservation Service. Data for 1938–48 in *Agricultural Statistics, 1962*, table 742.

Treasury as miscellaneous receipts; therefore such proceeds and costs are not reported in the operating accounts.

¹ Sales do not reflect commodity donations.
² Processed from price support butter.
³ Transferred to CCC at no cost from National Stockpile, pursuant to Public Law 85-96 and 87-548. Proceeds from sales less costs incurred by CCC are covered into the Agricultural Stabilization and Conservation Service.

Consumer and Marketing Service.

CHAPTER IX

AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Statistics in this chapter concern conservation of various resources, particularly soil, water, and timber. Data on the production, supply, and distribution of Naval Stores is included because of its close association with forestry statistics.

Six new tables have been added in this chapter relating to forest lands, net volume of growing stock and sawtimber on commercial forest land, timber cut and net annual growth, and timber drain.

Table 761.—Agricultural Conservation Program: Assistance to farmers for carrying out conservation practices, United States, by program years 1949–64¹

Program year	Assistance	Program year		Assistance
		1,000 dollars		
1949	223,855	1957	—	216,154
1950	252,006	1958	—	219,896
1951	246,100	1959	—	210,296

¹ Turpentine places under Naval Stores Conservation Program not included in "participating farms" but number of payees included in "payees." Farms participating in pooling agreements are included in "participating farms" but only the managers are included in "payees." Also includes data with respect to supplemental (emergency) practices.

² Cropland on participating farms as percentage of cropland acreage in States. Includes data with respect to supplemental (emergency) practices.

³ Does not include funds for Naval Stores Conservation Program.

¹ Includes supplemental (emergency) practices. ² Includes only the acreage across which terraces have been constructed. ³ Includes surfacing clay-forming subsoil to control wind erosion. ⁴ 500 linear feet or less. ⁵ Extent applies only to that acreage on which the practice performance completed under the 1963 Agricultural Conservation Program provided adequate drainage facilities. Does not include data relative to drainage systems damaged by flood which were restored under the Agricultural Conservation Program. ⁶ All liming materials have been converted to a standard limestone equivalent.

 2 Includes supplemental (emergency) practices.
 3 Standard ground limestone equivalent.

Agricultural Stabilization and Conservation Service, Data for 1944-63 in Agricultural Statistics, 1962, table 702.

Table 765.—Agricultural Conservation Program supplemental (emergency) practices: Type of practice and extent, 1963

Practice	Extent	
	Unit	Amount
Reservoirs for irrigation water (drouth).....	Number	11
Lining irrigation ditches (drouth).....	Rods	17,358
Installation of structures in lined irrigation ditches (drouth).....	Number	67
Debris removal and shaping flood-damaged land.....	Acres	15,476
Seeding permanent cover on flood-damaged farm land.....	do	210
Restoration of flood-damaged drainage systems.....	do	1,144
Restoration of flood-damaged irrigation reservoirs.....	Number	58
Restoration of flood-damaged livestock dams.....	do	6
Restoration of livestock watering facilities damaged by flood.....	do	7
Restoration of flood-damaged diversion ditches or terraces.....	1,000 lin. ft.	239
Restoration of flood-damaged sod waterways.....	1,000 sq. ft.	997
Healing gullies caused by flood.....	do	484
Stream and shore control (flood).....	1,000 lin. ft.	102
Restoration of flood-damaged irrigation ditches.....	Rods	50,070
Restoration of flood-damaged irrigation pipe lines.....	do	10
Restoration of flood-damaged dikes or levees.....	1,000 lin. ft.	90
Restoration of flood-damaged irrigation structures.....	Structures	57
Restoration of flood-damaged stream channels.....	1,000 lin. ft.	415
Restoration of cover on flood-damaged levees.....	1,000 sq. ft.	456
Reorganization of flood-damaged irrigation systems.....	Dollars ¹	74,581
Reorganization of flood-damaged irrigation systems (pools).....	do ¹	131,414
Relevelling irrigated land damaged by flood.....	Acres	3,870
Removal of flood debris from streams and waterways.....	Linear feet	262
Spreading earth slides caused by flood waters.....	1,000 sq. ft.	348
Relevelling irrigated land damaged by earthquake.....	Acres	255
Removal of wind-damaged trees from orchards.....	do	35,361
Removal of hurricane debris from cropland.....	do	42,557
Removal of hurricane debris from woodland and waterways.....	do	16,479
Removal of hurricane debris from stream channels.....	1,000 lin. ft.	1,804
Restoration of irrigation ditch lining damaged by flood.....	Rods	2,871

¹ Report unit is expressed in "dollars of assistance."

¹ Soil surveys of the Soil Conservation Service showing kinds of soil, slope, degree of erosion, and present land use are used to determine land capabilities for conservation planning and treatment of agricultural and non-agricultural lands, including about 526 million acres of standard soil surveys.

² Puerto Rico and Virgin Islands.

Soil Conservation Service.

¹ As authorized by the Act of Congress August 7, 1956 (Public Law 1021, 84th Congress).

Soil Conservation Service.

FOOTNOTES FOR TABLE 776

¹ Covers work in following watersheds: Buffalo Creek, Coosa River, Little Tallahatchie, Los Angeles, Poto mac, Santa Ynez and Yazoo.² These principal physical works of improvement have been installed and major fire protection equipment items acquired for watershed improvement purposes under the Flood Control Acts by the Forest Service and Cooperating State agencies.³ Involves seeding of watersheds following fire or other disaster under the provisions of Section 216 of the Flood Control Act of 1950.

Forest Service.

FOOTNOTES FOR TABLE 777

¹ As authorized by the Soil Conservation Act of 1935 (Public Law 46, 74th Congress) implemented by the watershed protection item in the Department of Agriculture Appropriation Act of 1954 and Watershed Protection and Flood Prevention Act P.L. 566 as amended in 1956 by P.L. 1018.² All of the 11 watersheds were approved December 22, 1944, however, flood control funds did not become available for works of improvement until 1946.³ Includes some basins constructed as structural measures.

Soil Conservation Service.

Table 776.—Flood prevention: Improvement works completed in authorized watersheds with assistance of the Forest Service, years ending June 30, 1963 and 1964, and cumulative to June 30, 1964¹

Practices and measures ²	Unit	Total completed or acquired		
		Year ending June 30, 1963	Year ending June 30, 1964	Cumulative to June 30, 1964
Fire protection:				
Roads and trails (constructed or rebuilt)	Miles	14.9	13.0	487.0
Fire breaks	do	24.8	30.0	339.8
Telephone lines	do			289.5
Large water-storage tanks	Number	4	2	103
Lookout towers	do			50
Building for fire protection work (barracks, cabins, warehouses, garages, oilies, misc.)	do	4	2	104
Pumps	do			18

¹ Forest land is land at least 10 percent stocked by forest trees of any size, or formerly having had such tree cover and not currently developed for non-forest use. Includes chaparral areas in the West and afforested areas. The minimum area for classification of forest land is 1 acre. Roadside, streamside, and shelterbelt strips of timber must have a crown width at least 120 feet wide to qualify as forest land. Unimproved roads and trails, streams, and clearings in forest areas are classed as forest if less than 120 feet in width.

² Commercial forest land is forest land which is producing or is capable of producing crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation. Includes areas suitable for management to grow crops of industrial wood generally capable of producing in excess of 25 cubic feet per acre of annual growth. Includes both accessible and inaccessible areas.

Forest Service. Data for 1952 in *Agricultural Statistics, 1960*, table 769.

¹ Net volume in cubic feet of live sawtimber and poletimber trees from stump to a minimum 4-inch top (of central stem) outside bark or to the point where the central stem breaks into limbs.

² Net volume of the saw-log portion of live sawtimber trees in board feet log scale, International 1/4-inch rule. Live trees of commercial species containing at least one saw log. Softwoods must be at least 9.0 inches in diameter breast height, except in California, Oregon, Washington, and coastal Alaska where the minimum diameter is 11.0 inches. Hardwoods must be at least 11.0 inches in diameter in all States.

Forest Service. Data for January 1, 1963 in *Agricultural Statistics, 1960*, table 770.

¹ Estimates of timber cut include logging residues as well as growing stock material removed as timber products. Volumes refer to growing stock inventory and are in cubic feet roundwood excluding bark and in board feet log scale International $\frac{1}{4}$ -inch rule and represent the net cubic foot volume of live sawtimber and poletimber trees from stump to minimum 4-inch top (of central stem) outside bark and the net board foot volume of the saw-log portion of live sawtimber trees (from stump to merchantable top) cut or killed in logging.Forest Service. Data for 1952 in *Agricultural Statistics, 1960*, table 772.

¹ Timber cut refers to net inventory volume cut or killed in logging and converted to timber products or left as logging residues.

² The considerable excess of cut over growth for most western softwoods is not entirely due to overcutting. Growth is at a low level partly because 8 percent of the commercial forest area consists of old-growth timber which contributes little to net annual growth, and an excess of cut over growth is necessary to achieve a more regulated forest containing a desirable balance of growing stock by age classes.

³ Includes Alaska.

⁴ Includes Hawaii.

¹ Includes national forests, purchase units, experimental areas and land utilization projects.² National forests.—Areas established as national forests by legislative or executive action. Acres shown as national forest land, and other land administered by the Forest Service include small administrative sites outside of proclaimed boundaries and those portions of land utilization projects and other areas over which the Forest Service has supervision located within the national-forest boundaries. Land utilization and other areas located outside the national forests and under Forest Service supervision are not included; such areas are listed under the classifications "Land utilization projects" and "Other areas."³ Purchase units.—Areas established by the Secretary of Agriculture with the concurrence of the National Forest Reservation Commission but not formalized by legislative or executive action. Acreage shown as national forest land, and other land administered by the Forest Service include all administrative sites outside the established boundaries and those portions of the land utilization projects and other areas, over which the Forest Service has supervision located within the established purchase unit boundaries. Land utilization and other areas located outside the boundaries and under Forest Service supervision are not included; such areas are listed under the classification "Land utilization projects" and "Other areas."⁴ Experimental areas.—Areas outside of the exterior boundaries of national forests or purchase units which have been reserved and dedicated to forest or range research and experimentation by legislative or executive action. The Massabesic Experimental Forest in Maine and the McNeill Division of the Harrison Experimental Forest in Mississippi, which have both purchase unit and experimental area status, are included only in the experimental area summaries.⁵ Land utilization projects.—Lands outside the national forests and purchase units that are administered by the Forest Service in pursuance of certain national programs of land utilization and adjustment. Does not include land utilization project lands that are managed by the States or State agencies under lease or cooperative license agreement.⁶ Lands within the unit boundaries in private, State, county, and municipal, etc., ownership, and Federal lands over which the Forest Service has no jurisdiction.

Forest Service.

ments under the Acts of May 23, 1908 (as amended) and July 24, 1956, are 25 percent of total receipts received after deducting (a) payments to Arizona and New Mexico on account school-section lands administered by the Forest Service, (b) appropriations of receipts under laws authorizing such appropriations for acquisition of specified national forests or portions thereof; and (c) receipts from an area of the Superior National Forest, Minnesota, on account of which the State (for the counties) is paid $\frac{1}{4}$ percent of the appraised valuation in lieu of 25 percent of the receipts.

Includes \$158,465 representing 25% of Tongass (Alaska) Suspense Account receipts in year beginning July 1, 1962.

Includes \$205,207 representing 25% of Tongass (Alaska) Suspense Account receipts in year beginning July 1, 1963.

Includes \$228,953 representing 25% of Tongass (Alaska) Suspense Account receipts in year beginning July 1, 1964.

¹ Rosin, not for violins; imports for consumption, as reported by the U.S. Department of Commerce.

² Drums of 520 pounds net weight for wood, 517 pounds for gum.

³ Less than 500 drums.

⁴ The breakdown between gum and wood rosin imports not available.

⁵ Reports of the U.S. Department of Commerce. Includes some modified rosin.

⁶ Total supply less exports and March 31 stocks.

⁷ The difference between domestic disappearance and reported industrial consumption is due to unreported industrial consumption; failure of some consumers to distinguish in their reports between gum, wood, and modified or derived rosins; and the inclusion of modified rosins in exports.

CHAPTER X

CONSUMPTION AND FAMILY LIVING

The statistics in this chapter deal with the consumption of food by both rural and urban people, retail price levels, and other aspects of family living of farm people. Data presented here on quantities of food available for consumption are based on material presented in the earlier commodity chapters, but they are shown here at the retail level, a form that is more useful for an analysis of the demand situation faced by the producer. Data on quantities of farm-produced food consumed directly by farm households are presented in the commodity chapters. Its value and the rental value of the farm home are given in the section on farm income, table 686.

No new tables have been included in this chapter; however, tables relating to food consumption per capita, food nutrients contributed by major food groups, and average family expenditures for food have been expanded or modified to provide added detail.

One table has been dropped: Farm operator level-of-living index.

Table 805.—Population: Number of people eating from civilian food supplies, Jan. 1 and July 1, 1949–65

Year	Jan. 1	July 1	Year	Jan. 1	July 1
	<i>Millions</i>	<i>Millions</i>		<i>Millions</i>	<i>Millions</i>

¹ Includes Alaska and Hawaii beginning 1960. Totals excluding Alaska and Hawaii are: Jan. 1963, 184.6; July 1963, 185.8; Jan. 1964, 187.3; July 1964, 188.5; Jan. 1965, 189.9; and July 1965, 191.0.

Economic Research Service. Estimates based on published and unpublished records of the U.S. Department of Commerce. Data for 1910–48 in *Agricultural Statistics, 1962*, table 794.

FOOTNOTES FOR TABLE 805

¹ Beginning 1955, quantities of individual foods, measured in pounds equivalent to the form sold at retail food stores, are combined using average retail prices in 1957–59; prior to 1955 average prices in 1947–49 were used; indexes were linked at 1955. Civilian consumption only. Includes Alaska and Hawaii beginning 1960.

² Includes edible oilfat.

³ Preliminary.

⁴ Data for melons, fresh vegetables, potatoes, sweetpotatoes, and dry beans and peas include consumption from home garden produce.

⁵ Corn sugar and syrup are included with sugars and other sweeteners.

⁶ Excludes sugar used in production of canned and frozen fruit, canned fruit juices, canned vegetables, and unskimmed sweetened condensed milk.

⁷ Excludes spices and herbs.

Economic Research Service.

¹ Quantities of nutrients computed by Agricultural Research Service, Consumer and Food Economics Research Division on the basis of estimates of per capita food consumption (retail weight), including estimates of produce of home gardens, prepared by the Economic Research Service. No deduction has been made in nutrient estimates for loss or waste of food in the home, use for pet food, or for destruction or loss of nutrients during the preparation of food. Civilian only.

² Includes estimates of quantities added to flour and cereal products.

³ Includes estimates of quantities added to margarine and to milk of all types.

⁴ Includes estimates of quantities added to fruit juices and drinks.

⁵ Preliminary.

Agricultural Research Service.

FOOTNOTES FOR TABLE 807

¹ Quantity data used in computing the per capita food consumption index, table 806. Final consumer products that are derived from a combination of primary food groups, such as bakery products, are measured and reported in the form of their primary ingredients, such as flour, shortening, and eggs. Civilian consumption only. Includes Alaska and Hawaii beginning 1960.

² Includes game and edible offal.

³ Includes 2.0 pounds per capita of game fish 1949-51, increasing 0.1 pound annually to 3.0 pounds in 1961 and thereafter.

⁴ Includes product weight of butter and margarine; other items in terms of fat content.

⁵ Preliminary.

⁶ Data for melons, fresh vegetables, potatoes, sweetpotatoes, and dry beans and peas include consumption of home garden produce.

⁷ Excludes estimated quantities of meat, poultry, and fish base soups duplicated elsewhere.

⁸ Since 1958 approximations for soya products are continued at 1.3 pounds.

⁹ Corn sugar and sirups are with sugars and other sweeteners.

¹⁰ Excludes sugar used in production of canned and frozen fruit, canned fruit juices, canned vegetables, and unskimmed sweetened condensed milk.

¹¹ Includes spices and herbs.

Economic Research Service.

¹ Percentages were derived from nutrient data which include quantities of iron, thiamine, riboflavin, and niacin added to flour and cereal products; quantities of vitamin A, value added to margarine and milk of all types; quantities of ascorbic acid added to fruit juices and drinks.

² Chocolate liquor equivalent of cocoa beans.

³ Components may not add to total due to rounding.

⁴ Preliminary.

AVERAGE FARM FAMILY EXPENDITURES FOR FOOD

75 years and over.....	5.90	8.20	9.30

¹ Estimated from food quantities shown in *Agricultural Statistics, 1965*, table 807, slightly revised in 1964, and prices paid by nonfarm families. The prices per pound of each food group are averages of those paid by families in selected income levels surveyed in 1955 adjusted to current levels by use of *Retail Food Prices by Cities* (46 cities combined) released periodically by the Bureau of Labor Statistics. Revisions in food quantities in 1964 resulted in insignificant changes in cost, except for about 10 percent increase in cost for women 20-55 years and 10 percent decrease for men 55 years and over.

² Age groups include the persons of the first age listed up to but not including those of the second age listed.

³ Ten percent added for family size adjustment.

⁴ Man and woman, 20 to 35 years; children, 1 to 3 and 3 to 6 years.

⁵ Man and woman, 20 to 35 years; child, 6 to 9 and boy, 9 to 12 years.

⁶ The costs given are for individuals in 4-person families. For individuals in other size families, the following adjustments are suggested: 1-person—add 20 percent; 2-person—add 10 percent; 3-person—add 5 percent; 5-person—subtract 5 percent; 6-or-more-person—subtract 10 percent.

Agricultural Research Service.

¹ A subsidy program to expand markets for agricultural products, maintain outlets for Section 32 commodities and support school lunch programs. Sponsors of school lunch programs are reimbursed by the Government for local purchases of food on basis of the quality and quantity of meals served. The program was started in February 1943.

² Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved Aug. 24, 1935, as amended; under Section 416, Public Law 439, 81st Congress, as amended; and under Section 6 of the National School Lunch Act, Public Law 396, 79th Congress, approved June 4, 1946. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States. Eligible recipients include school lunch programs, eleemosynary institutions, and households receiving public assistance from State or local welfare agencies or other needy persons.

³ A subsidy program to expand consumption of milk by children.

¹ Reflects retail prices of goods and services commonly bought by average families with moderate income in 46 urban areas of the United States. Beginning January 1953, this index became the official index released monthly by the U.S. Department of Labor.

² Includes apparel upkeep, beginning 1964.

Economic Research Service. Compiled from data of the U.S. Department of Labor. Data for 1934-48 in *Agricultural Statistics, 1962*, table 807.

¹ The number of farms receiving central station electric service from REA borrowers and all other suppliers as of June 30, 1964, is based on the annual estimate of electrified farms made by REA. This estimate is shown as a percentage of the total number of farms estimated for 1964 by the Statistical Reporting Service, U.S.D.A.

Rural Electrification Administration.

¹ State data are for cooperatives and commercial telephone companies which are borrowers headquartered in the State even where borrowers operate in more than one State.

CHAPTER XI

MISCELLANEOUS AGRICULTURAL STATISTICS

This chapter contains miscellaneous data which do not fit into the preceding chapters. Included here are summary tables on foreign trade in agricultural products; tables on acreage and production of world crops, weather data pertaining to farming; statistics on fishery products; tables on refrigerated warehouses and data on Hawaiian statistics on land utilization, marketings and value of crops and livestock; and livestock numbers. One weather table is included in this issue: The two tables showing monthly and annual 30-year normals, by climatic divisions, for precipitation and for average temperature, carried in the 1962 issue will be repeated about every five years. The current table showing annual averages for precipitation and temperature, by climatic divisions, will be carried annually. More complete information can be secured from the Weather Bureau, U.S. Department of Commerce.

Foreign Trade in Agricultural Products

The term "foreign trade" applies to trade between the United States, including its territories, and foreign countries. Trade between continental United States, and its territories is referred to as "shipments." Puerto Rico, Guam, and the Virgin Islands are territories. Beginning January 1, 1940, trade with foreign countries through the customs district of the Virgin Islands is not included in United States trade statistics. Data for shipments out of the territories include small quantities to other territories. In statistics of foreign trade, forest products and distilled liquors are considered nonagricultural products, as distinct from strictly agricultural products.

Separate data are not being compiled by the U.S. Department of Commerce on exports under various special economic-aid programs, but these exports are included in data appearing in this publication. Excluded from the export figures are shipments to the United States armed forces abroad for their own use, shipments between continental United States and the territories and possessions, and shipments between the territories and possessions. Effective January 1, 1950, also excluded from the dollar value is the export subsidy paid to private United States exporters on shipments of domestically produced agricultural commodities. The export subsidy programs have included the following commodities: Wheat, wheat flour, raisins, prunes, apples, oranges, canned juice, honey, cotton, unshelled filberts, and fresh pears.

Imports for consumption include imports for immediate consumption plus withdrawals from bonded warehouses. In the classification of agricultural import products into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

One new table has been included in this chapter: Value of agricultural exports under specified government-financed programs and commercial exports.

Table 825.—Foreign trade: Value of total agricultural exports and imports, United States, 1949–63

¹ Agricultural exports include "food exported for relief or charity by individuals and private agencies." These figures include a small amount of certain foodstuffs other than agricultural.

² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consists of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

³ Preliminary.

Total.	3,719,355	4,516,803	4,946,317	5,142,036	5,077,619	6,074,454	4,003,973	4,010,405	3,644,599	3,701,743	3,907,473

¹ Preliminary.² Supplementary agricultural import products consist of all products similar to agricultural commodities produced commercially in the United States, together with all other agricultural products interchangeable to any significant extent with such United States commodities. Complementary agricultural products include all others, about 95 percent of which consists of rubber, coffee, raw silk, cañao beans, wool for carpets, bananas, tea and spices.³ Imports include horses and mules for immediate slaughter and teams owned by immigrants.⁴ Less than 500.⁵ Includes olives in brine; pineapples, prepared and preserved; and mandarin oranges.⁶ Excludes corn, barley, oats, grain sorghums, and wheat (unfit for human consumption).⁷ Includes imports through customs district of Puerto Rico.⁸ Includes a small amount of certain foodstuffs other than agricultural.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

¹ Foreign donations are authorized under Sec. 416 of the Agricultural Act of 1949 and Sec. 302, Title III, P. L. 480.

² The barter program is authorized under the Charter Act of the Commodity Credit Corporation; Sec. 303, Title III, P.L. 480; and other legislation.

³ Agricultural exports excluding government programs (sales for dollars) include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) extension of credit and credit guarantees for relatively short periods, (2) sales of Government-owned commodities at less than domestic market prices and (3) export payments in cash or in kind.

* The excess of the Government portion over total agricultural exports may be attributed to lags in reporting or to differences in valuation or classification procedures.

⁴ Less than \$50,000.

¹ Sales for foreign currency, donations for disaster relief and economic aid, donations through voluntary relief agencies, barter, and long-term supply and dollar credit sales under P.L. 83-480, the Agricultural Trade Development and Assistance Act of 1954, as amended, and other legislation; and sales for foreign currency and economic aid under P.L. 665, the Mutual Security Act of 1954, as amended, and under P.L. 87-195, the Act for International Development of 1961 as amended.

² "Agricultural exports outside specified government-financed programs" (sales for dollars) include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) extension of credit and credit guarantees for relatively short periods, (2) sales of government-owned commodities at less than domestic market prices, and (3) export payments in cash or in kind.

³ Includes Trieste.

⁴ Less than 5 years. Not separately classified prior to 1958.

¹ Supplementary agricultural import products consist of all products similar to agricultural commodities produced commercially in the United States, together with all other agricultural products interchangeable to any significant extent with such United States commodities. Complementary agricultural products include all others, about 95 percent of which consists of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

² Includes the former Federation of Malaya and State of Singapore.

³ Less than \$50,000.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

¹ Includes food exported for relief or charity by individuals and private agencies.² Preliminary.³ Classified for identification of commodities subject to the variable levies which were put into effect on July 30, 1962. The classification is designed to show the overall change in exports of these commodities rather than to measure the impact of the variable levies on exports of these commodities.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

¹ Unless otherwise indicated, the years shown refer to years of harvest in the Northern Hemisphere countries. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crops harvested in the Northern Hemisphere in 1963 are combined with Southern Hemisphere harvests which begin late in 1963 and end in the first half of 1964.² Preliminary.³ Includes cider.⁴ Foreign production in equivalent boxes; oranges 70 pounds; grapefruit 80; lemons 76.⁵ Crop year October 1 to September 30.⁶ Year beginning January 1.⁷ Eight leading countries.⁸ 1956-60 average.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.
