Classification of occupations and industries in this and following tables is in accordance with the Cabinet Instruction No. 3 issued in 1930. In view of the conditions characteristic of the postal savings business, however, figures for students and school-children are given separately from "No occupation," while shrines, temples, schools and other corporations, falling under none of the enumerated heads, form one head specially added for that purpose. 2. The statistics were taken from depositors' accounts in Japan Proper, as they stood at the end of March 1933. 3. The figures as shown in this table were obtained by the Method of Sampling, namely, depositors whose pass-book Nos. terminate in 251 or 751 were inquired of, as representatives of depositors, about their occupations, etc. direct by the Head Office of this Direction General, or by the branch offices, and their replies and, in the case of depositors giving no reply, the result of the investigation by post offices, were made the basis of percentage of each of occupations, industries, etc. against the whole, which percentages were made use of in working out the figures in this table. 4. Under the head "Unknown" are given depositors whose whereabouts are unknown, and those who failed to reply to the inquiries, further investigation on the part of the post offices having been ineffective.
