DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

Private orphanages have often in the past declined to follow Welfare Bureau suggestions. It is thought public orphanages are of better quality in most aspects because of this. (with exceptions of course)

7. Day Nurseries were origionally designed for benefit of widows with small children and low income families to enable these people to earn an adequate living and reduce relief rolls. However our inspections find the day nursery has turned into a fashionable place for middle class families to send their children to, and the number of working mothers make up a small part of the enrollment. It is wondered if responsible persons in approving applications are either lax deliberately or otherwise and that is also if there is such a great need in the welfare program for day nurseries.

It seems quite plausable that the nurseries with their present enrollment could operate quite adequately without government subsidy-- perhaps at a reasonable profit.

8. Vagrant protection for adults provides little more than housing and meals in some cases for which a regulation charge is paid every month.or when convenient.

Inmates of mens vagrant lodging are daily laborers who on the greater part have responsible relatives and come from other prefectures. Effort is noted of Chiefs contacting responsible persons and prefectures. However, if no reply or a negative reply is received no further investigation usually follows. Reasons given amounts to lack of desire of inmates to return to original homes.

Chiefs claim improvement in inmates is seen in 6 months after entrance. Failure to move out are the usual ones-lack of housing, inability to save key money, and high cost of living.

Protection for vagrant women really comes under the boshi ryo program. in most cases. There are 4 such institutions where vagrant mothers and their children are cared for.in every detail as claimed. These places have not been found too desireable, but Welfare officials claim great improvements have been made inthese institutions and more expected. Their plan is to introduce these vagrant families to normal life again by offering a home,food, and when possible a job outside. When rehabilitation has taken hold transfers are made to other type of boshi ryo. Actual results of program are not known by writer, but Bureau men claim they are quite satisfactory.

The vagrant program of Yoikuen I do not know too much about except Mrs. Callow seems to think its program has improved greatly and is of value.

Considering the whole program the main fault lies in the method of handling vagrants. Vagrants at this late date are vagrants by choice and not so much by circumstance. Vagrancy should be forbidden by law and inforced by the police strictly enough to make vagrancy undesireable enough to clear the streets on this basis alone. I think only when this is done will the problem be solved. Coddling these people and administering to their demands is more of an encouragement for vagrancy than discouragement

Concerning these daily workerswho claim inability to live outside institutions, I think you will find other daily workers with families getting along fine without such aid.

9. Blind school --Mojin Kai Kan with its present program is in its initial stage.as a Helen Keller foundation under the direction of the Welfare Bureau. Its program involves social and school experience for the blind, braille library and braille publication, very limited over night hotel accommodation for tansient blind persons, guidance, and vocational training in massage, moxabustion, and needle therapy ( )

If its program is carried out properly it should be a great benefit

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

to the blind population and a contribution to the welfare program.

10. Old folks homes are found to be in good physical condition. Work shops have been added to some to create the feeling of usefulness of the inmates plus providing them with spending money and help pay for extras in their care. Work is not forced on inmates as work is optional.
Medical care is thought to be good

11. Feebleminded institutions inspections (CW) '49 by Miss Fuller found in files rate institutions good--a vocational and educational programs were in effect--physical aspect was good.
I have visited a feeble minded institution (branch of Yoikuen) and found it to be rather good.--orderly, clean, vocational program amounting to simple work as found in work shops in effect. Only fault found was overcrowding in living quarters.

Other mental hospitals (private having Welfare patients) visited were found in good physical condition. Inmates appeared fairly good ... qualification of staff varies.

12. Deaf & Dumb institution (combination of orphanage) is thought to be very good by Mrs. Callow. Chief's qualifications & experience are good - interest in inmates is gratifying.
