Fred Thomson and Silver King, the horse with a human brain. The fifth one of the Thomson group. Mystery, intrigue, romance and breathless adventure. Fast action, spirited horses, two-gun men and beautiful women. A prize fighter is haunted by the sight of a man he thinks he has crippled. A frame-up with a startling result. Another mystery play, similar to RED LIGHTS. Hairpin Annie opens banks, safes and everything with a hairpin. High-Shine Joe is a crook; so is Sea-Bass. The negro porter supplies the comedy with his fears and superstitions. See what's in the little black bag—it changes hands many times as the train plunges through the black night. "GOOSE STEP" DAY

(From the Hemet News)

The national administration does not like the term "mobilization day" which has been applied by common public consent to the army's proposal for a showing of national military strength, and a practice of national mobilization, on September 12.

Probably it will like still less the term "goose step

day," which also has been applied to it. The army calls it a "defense test;" which sounds very

much like the other terms. To get a peaceful people worked up to the point of going through the motions of staggering an enemy with a flourish of arms is the same process, no matter what it is called.

President Coolidge, in a public defense of the plan, describes it in a way tending to make it more palatable. He says that it is nothing more than an inspection of the forces that would be available in an emergency.

The president appears to have a different view of the plan than that of the army; and doubtless his view will prevail and will result in a considerable modification of the original plan.

But the original plan, as it was announced in the press matter issued from the war department, was nothing more or less than a "goose step" day, in which every citizen was to participate, probably whether he wanted to or not. That plan, if it had gone on, would have resulted, once the habit was fixed in a jail sentence or perhaps a mob scene for any body who refused to take part in this military gesture.

General Pershing, in a statement issued for publication on May 18, said:

"It is to be a day given to patriotic gathering by the citizens of every community, during which every one will learn his place and portion in the defense of his country should our security be threatened." He added: "The 'Test' will certainly have a most benefical effect on national sentiment, through which we hope to establish this system as a permanent policy." And, in closing, he said of the people "We expect them all to participate."

The whole business, name it as you will, should be accepted, if at all, for what it is. And it is, in essence, precisely the same psychological process by which the rulers of Germany transformed a pacifist people into the military mad nation that was set loose upon the world ten years ago.

The plea here is preparation for defense against attack. The plea there was preparation for defense against

And the process was a gradual interesting of the people in military plans and military development, which is precisely the "beneficial effect" which General Pershing hopes this movement will have on national sentiment. "through which we hope to establish this system as a permanent policy."

If the United States does not want this subtle psychology of interest in military growth to go on from the start of September 12, it will stop it in the beginning by abandoning the plan.

MENACE OF YELLOW JOURNALISM

Christian Science Monitor: In his telegraphed statement to President Coolidge that California is menaced more by the blazing of yellow journalism than by fire," Governor Friend W. Richardson merely said succinctly what great numbers of right-minded-citizens have felt for years.

CRIME AND PUBLICITY

Covina Citizen: There are entirely too many of our young men now-a-days who are termed "hard boiled." They are ready to embark upon a criminal car but little reflection, regarding the crime as of small consequence but objecting seriously to publicity.

To hear them dilate on the offense of publication,

one would naturally conclude that it is all right to steal but it is all wrong to mention the fact in the colums of

All of this merely confirms the idea often expressed by the editor of the Citizen that publicity is the best possible method of making crime unpopular.
