Nineteen Thirty-Two Greetings

In preparing this, our Nineteen Thirty-Two Manual and catalogue, two primary thoughts were in mind—(1) That the prices must be as low as possible without any sacrifice of quality. The economies made necessary, by the present so-called depression, must be shared with our customers. (2) That the “Home” vegetable and flower garden is getting to be more and more of a national institution and that the “amateur gardener,” as a factor for providing food for the nation, is one of extreme importance.

With these two thoughts in mind, a careful study of costs was made with the result that the prices shown herein reflect the most careful economies. The prices shown for different quantities of the same item only reflect the difference in the cost of packing and handling.

This manual is prepared for the professional and amateur gardener, indexed for quick reference, contains the latest and best information on the subject it is intended to cover and should help you to materially improve vegetable, fruit, flower and field production.

Steckler's Seeds, Bulbs, and Plants are of the best quality and prices. We solicit your orders and inquiries.

Sincerely,

STECKLER SEED CO. INC.,

J. J. Steckler, President.

You Want Prompt Delivery

So Help Us Give It by Following these Directions in Ordering

ORDER EARLY. It will be greatly to your advantage to send us your orders as soon as you have had the time to make your selection. This assures you prompt shipments from our complete stocks and avoids any possible delays incident to the "Rush Season."

IN ORDERING follow catalog prices. They include prepayment of postage on all seeds ordered by packet, ounce, quarter-pound, pound and five-pound lots, unless otherwise specifically stated. If the order is to be sent by express or freight, deduct five cents per pound from prices given. Larger quantities than five pounds will be sent by express or freight, the customer paying such charges. To figure the cost of postage on flowering plants and trees, add 15 per cent to the list price.

THE POSTAGE TO FOREIGN COUNTRIES must be added to the cost of the goods selected in this catalogue, or the order will be reduced to allow for the postage. These rules will also apply to orders from the United States where no postage allowance is made for mailing, or we will send by express.

As all shipments by boat must be prepaid, customers not known to us must remit enough to cover freight.

Crops are dependent for success or failure on so many factors besides the seeds themselves that it is impossible for us to give any warranty. This does not mean that we lack confidence in the seed we sell, but we have no control after they leave our possession. If we should warrant or guarantee our seeds, we would be held responsible for the crop, regardless of cause and this is a responsibility that we cannot and will not accept.

NON-WARRANTY. The Steckler Seed Co., Inc., gives no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds (bulbs, or plants), it sells and will not be responsible for the crop.

Steckler's Cotton Seed

Selected Varieties

Delfos Cotton

Planting time, March and April. One bushel is required to plant one acre. Thoroughly break and prepare the ground early. Rows should be 3½ to 4 feet apart and hills 12 to 14 inches apart in the row. When the cotton comes up it should be off-barred deep while it is small in order to let the heat of the sun strike the beds. As the plants get larger, shallow down and towards the last, cultivate very shallow. Always keep the top crust of the ground broken in dry weather, as it prevents it from losing its form. Never stop plowing for wet weather until the ground turns in slices; then quit immediately until it dries off. Never lay-by until the middle of August. The first week in April has been found to be the best time for planting cotton.

NOTE:—All of our Cotton Seed is free from Boll Weevil. These are all good varieties which have been thoroughly tested and recommended by Agricultural Colleges and Experiment Stations of the Southern States.

Steckler's Grass Seeds---Field and Lawn

We have the finest and best assortment of Field and Lawn Grass Seeds offered in the South. These selected varieties are grown for us by the best growers in the United States. Our 100 years of experience is behind our selection of seeds and growers.

BERMUDA GRASS. Plant from February to September, 20 pounds per acre for lawns and 30 lbs. for Golf Courses and 40 for Levee protection. Bermuda is used more extensively than any other grass on lawns, Golf Courses and Levee protection. It has a narrow, thin leaf of dark green color. Spreads quite rapidly and grows very well in the South. It dies down with a heavy frost in the fall but comes up in the Spring. It does not do well in the shade but is very hardy where it has sunshine. Takes about 30 days to start. Lb. 50c; 5 lbs. \$2.25, postpaid.

CARPET GRASS. Plant from February to September, 20 lbs. per acre for lawn and 30 lbs. for Golf Courses. This is a much coarser grass than Bermuda but will stand drought and hot weather better and also stays green longer in the Fall. It is a natural perennial grass in Louisiana. It is used very extensively in lawns, golf courses, railroads and parks. It stands more shade than Bermuda. Takes about 30 days to start. Carpet Grass is also used extensively for meadows and pastures in the South. Lb. 40c; 5 lbs. \$1.75, postpaid.

CLOVER—Steckler's Matchless Alfalfa. This is the most widely planted of all clovers. It produces an extremely long root, stands drought exceedingly well. It will produce 4 or 5 crops of hay a year and it enriches the soil. Its very long branching roots loosen the subsoil. A very profitable field crop for the farmer. Plant January to April for Spring and September to November for Fall at the rate of about 30 pounds per acre. Lb. 40c; 5 lbs. \$1.75, postpaid.

HAIRY PERUVIAN ALFALFA. Sow thirty pounds per acre, from January to April for Spring and September to November for Fall. Lb. 40c; 5 lbs. \$1.75, postpaid.

CLOVER, Alsike. Sow in Spring from Feb. on, 12 lbs. to the acre. This is exceptionally good for wet lands, very similar to Red Clover, except smaller plant and leaves. Makes excellent pastures and hay. Succeeds in impoverished and acid soils. This is a Perennial Clover. Lb. 50c; 5 lbs. \$2.25, postpaid.

LESPEDEZA or JAPAN CLOVER. One of the best clovers that can be planted in the South. Planted at the rate of one bushel to the acre from December to May. If sown on sod the land should be first scarified with a disc harrow in order to give the seed a good seed bed. Thrives on very poor soils and continually improves them, at the same time yielding a highly profitable and nutritious forage. 1 bushel to the acre. 25 lbs. to the bushel. Lb. 35c; 5 lbs. \$1.50, postpaid.

RED CLOVER. Sow in Spring or Fall, fifteen pounds to the acre. This variety is most universally grown throughout the country. On fertile soil and especially where hay is desired, it has only one superior, and that is alfalfa. Lb. 55c; 5 lbs. \$2.50, postpaid.

WHITE BLOSSOM SWEET (Melilotus Alba or Bokhara.) Sow 20 pounds per acre from February to April for Spring and September to December for Fall. STRAWBERRY SHOOKS OR DIRT BANDS. Eggplants, Muskmelons and Early Cucumbers pay well if they come early into the market. These are placed in a frame and filled up with good rich soil, and five or six seeds in each box; when the plants come up, thin them out to one or two in each box. Steckler's Flower Seeds

Put up in 10c Packages—3 for 25c; 14 for \$1.00, postpaid, except where noted.

Flower seeds require a little more care in sowing than the vegetable seed. The ground should be well pulverized and light enough not to bake after a rain. Some of the more delicate and finer varieties are better sown in boxes or seed pans, where they can be handled and protected from hard rains or cold weather, the other kinds do not transplant well, and are better sown at once where they are to remain.

All flower seeds in packages are mailed free of postage to the purchaser. Where there is more than one color, we generally import them mixed, as we find that most of our customers do not wish to purchase six packages or more of one variety to get all colors. One package of Asters, Zinnia, Phlox, Chinese Pink, Stocks, Petunia, Portulaca and others will always contain an equal mixture of the best colors.

Wormoids

WORMOIDS
 For Worms in Poultry. Most flocks are infected with worms. These parasites sap the health and vitality of the fowl, interfere with laying, stunt development and cost the poultry raiser thousands of dollars every year. Symptoms are drooping plumage, general weakness, loss of flesh or "going light," oftentimes paralysis and death. **Wormoids** is an individual treatment that is prompt, sure and safe. It comes in capsule form and is easily administered to every bird, usually at the same time the flock is culled, banded or treated for lice. Costs no more than flock treatments and is of course more sure and satisfactory. Come in following sizes:

Landscape Service

We offer a complete landscape service to our customers. Our Landscape Architects will draw a planting plan to meet your particular requirements from sketches and information furnished by you. A nominal charge of \$2.00 is made for drawing a planting plan for the average size city lot. If the plants for this plan are ordered from Steckler Seed Co. Inc., this \$2.00 is deducted from the bill. From out of town customers whose property cannot be visited by our representative we should have the following information:

Make a sketch of property on a suitable piece of paper and show location of house, garage or any other building on the lot, give dimensions of the property and size of each building, sketch it all, drives, walks, etc. Indicate location of doors and windows and height from ground. Make location of any trees or shrubs now on place. Draw a line showing North and South directions, also if there is a terrace or slope, indicate it.

Make use of this free service by expert landscape architects and you will have assurance that your grounds are planted so as to give the best possible permanent effect. We will be glad to consult or correspond with you on your planting requirements.
