# NEW FRENCH CANNAS.

It is hardly necessary to repeat to the florist trade what we have said before in regard to the increasing demand and value of the new named Cannas from M. Crozy, but many of our Florist customers may not realize the fact that even the best known of these sorts have, until the present time, been so high in price as to almost prohibit retail demand. We believe none of the well-known variety Madame Crozy have retailed the present year for less than \$1.00 each. This, as every one knows, shuts out the great mass of retail buyers. When this variety can be sold at 50 cents each, as it can be the coming spring, and still make a good profit, will not the retail demand be enormous, and when the same plants can be sold the following year at, perhaps, 20 to 30 cents at retail, can we not expect a still greater demand? What is true of the Madame Crozy is equally true of the numerous other handsome additions to this class, like Alphonse Bouvier, J. D. Cabos, Secretary Stewart and others. In the variety Florence Vaughan we have a yellow, spotted red, with very large flower, equal to or exceeding Madame Crozy in size, and one which we believe will become nearly, if not quite as popular as that variety. We also call special attention to our new varieties Gustave Sennholz and Explorateur Crampbell.

## MINIATURE CALLA. ELLIOTT'S LITTLE GEM. TRUE.

Originated in the Guernsey Islands, off the coast of England and purchased by our agent last season. We have grown and flowered it the past winter. A specimen shown by us at a meeting of the Chicago Florists' Club attracted much attention.

This variety is in appearance a true miniature specimen of the old Calla, and when in flower a perfect specimen plant, 8 inches high with full developed foliage presents a striking appearance. We know of no plant which will be so readily and universally recognized as unique—a well grown plant, cannot fail to attract the admiration of every flower-lover in your neighborhood. (Remember, this is not the old Calla Nana also known as "Gem," but which grows 18 to 20 inches high.) Price, each, 50c.; doz., \$5.00.

## DOUBLE RUSSIAN VIOLET.

NEW HARDY VARIETY FOR OPEN GROUND CULTURE.

We again have much pleasure in offering this fine hardy Violet, the entire stock of which was placed in our hands by Mr. R. J. Donovan, and first sent out by us last fall. The demand for this plant has been good, and we have sold it in large quantities all over the whole country.

The style and habit of the plant is similar to M. Louise. The leaves, however, are more or less smooth or glaucous. Flowers large, very double, deliciously fragrant, and of a very deep shade of blue—darker than M. Louise—one or two petals in each flower being dotted with red.

This Violet has been grown at Chicago for five years, planted in the open ground with no protection beyond covering the beds in late fall with forest tree leaves. Grows well in any soil except stiff clay,—likes sandy loam best. Leaf mould is a good addition where it can be procured without too much expense but it is not a necessity.

Propagate in cold frame or open ground in June or September. It is best to make regular cuttings instead of dividing the plants or using rooted runners, as thereby we get a more compact plant.

This Violet will not force to advantage under any conditions. It flowers well only when grown naturally; flowering at Chicago about April 15th to 20th and finishing about May 20th. Do not attempt to crowd them by putting glass over the beds.

PRICE, Dozen, \$1.50; per 100, \$8.00; per 1000, \$70.00.

## FOR THE FAIRS.

We have grown on our grounds at Western Springs large blocks of Dahlias, which we expect will be in bloom during September. Customers who want cut blooms of these for exhibition at the Fairs will do well to arrange with us. We can give a fine selection and make prices reasonable.

### NEW EVER-BLOOMING BEGONIA "VERNON."

THIS beautiful new Begonia has been universally accepted as the most useful and really meritorious seed novelty introduced for years. In habit and freedom of bloom it quite resembles the well known Begonia Semperflorens; its numerous flowers are of a brilliant deep carmine color and the foliage of a fine green color, spotted and margined with bronzy red, which grows more intense with the advancing season; the staminate flowers with their bright yellow centers give the last note of color, and contrast admirably with the brilliant red flowers and metallic foliage. Above all, it blooms with the greatest profusion throughout the entire summer, and is destined to be one of the most popular of bedders for parks and lawns as well as highly satisfactory for pot culture. It is of very easy cultivation and quite hardy. Trade pkt., 25c.

# PANSIES.

**PANSIES ARE ONE OF OUR SPECIALTIES** and we take special pride and extraordinary pains to have the *Very Best Seed* obtainable, regardless of cost, and we believe that the increasing demand for our seeds, proves that these efforts are appreciated, and we ask you *to try our Seed and be convinced* of the above facts if you have never seen our Pansies in bloom.

The Pansy seed offered below is that of crop 1892, which will be ready in July and August. Orders received before the new seed arrives will be booked and filled as soon as possible, unless last year's seed is wanted, in which case it should be so stated on the order.

## VAUGHAN'S INTERNATIONAL MIXTURE.

**WE** have made personal inspections of the Pansy seed farms and trial grounds of England, Germany, France and America. The result of our observation of the various strains produced and of the favorites in our market, prompted us to prepare and introduce in 1888 our **International Mixture**. It has proven more popular than we could reasonably expect and we may honestly claim it to be to-day *not only the best but the most widely known and admired*. It contains besides all the leading kinds of commerce, seeds of the Giant Bugnot, Cassier and Trimardeau with its flowers measuring three inches and more in diameter, and such beautiful colors as golden bronze, silver edged, marbled, mahogany spotted, claret red and many others.

### GARDENING

is a new semi-monthly paper edited by Wm. Falconer, and published at Chicago. The first number issued Sept. 15th gives promise that it is to be a practical, ever-day journal for all who make gardens. Our florist customers are often asked for just such plain, practical instructions as this Semi-Monthly proposes to give, and it will be a great saving of time to refer such a periodical to customers. It will be conducted entirely free from any business alliances and will not recommend either persons or stock in its columns. Subscription, \$1.00 per year, (24 Numbers) may be sent to us as agents at New York or Chicago.
