"They call the houses of the living Inns, because for a small space we inhabit these: but the sepulchres of the dead they name eternal mansions, because they continue with the gods for an infinite space. Wherefore, in the structures of their houses they are little solicitous, but in exquisitely adorning their sepulchres they think no cost sufficient."

EDITOR'S PREFACE.

The published records of the Archæological Survey of Egypt commence with this volume. Before delivering its firstfruits to the subscribers, let me for a moment pause to recall with reverence the names of the great predecessors of half a century and more ago, who laboured in the same field, and now have, one after another, passed away. Beni Hasan is a name inseparably connected with each one: each of them has viewed these painted walls with admiration, and has hastened to profit by the curious information they afford.

At the head we see Champollion, whose master-mind first penetrated the deep obscurity that had gathered during so many centuries over the mysterious records of Ancient Egypt; with him was Rosellini, the artist-leader. Then came Lepsius, the great organizer of a small but compact expedition of picked men, who by strenuous exertions brought together from every quarter of the Egyptian world a vast store of the most precious scenes and inscriptions, the latter especially copied with unexampled accuracy.

These three pioneers were supported by the Governments of France, Tuscany, and Prussia, and their labours are enshrined in most magnificent and costly folios. England, too, has contributed her worthy in Wilkinson, the genial observer and student of the ancient paintings. Here, too, we must commemorate another Englishman—one who has as yet gained but little notoriety, although he may vie with the best representatives of our science in claiming the honourable recognition of his fellow-countrymen. Robert Hay, explorer himself and patron of explorers, was content to amass in his portfolios one collection after another of detailed and often minutely accurate drawings, copies of inscriptions and plans that put to shame most of the contemporary and later work. And this he did without being able to read one line of the strange characters which he facsimiled with so much care. He was without

doubt convinced that such work would be valued by a future generation, that would read the inscriptions with ease after the monuments themselves had been defaced.

As to the new enterprise, our sincere thanks are due to the Director-General of the Administration of the Antiquities of Egypt, for the permits which have been granted to facilitate a detailed exploration of the tombs.

No more need be said, except to remind the reader of this volume that the first efforts in any great undertaking must needs be experimental: when the Survey began there existed no school of Egyptology from which recruits could be drafted to the scene of action. Men had to be found who would risk their prospects for what might seem to be a wholly inadequate reward; they had to be hastily trained, and above all they had to learn by experience in the country. We can now confidently hope that from year to year higher standards of efficiency will be reached both in the collection and in the publication of the records; thus, in future, delays will be minimized, expenditure reduced, and the annual value of the results enhanced.

Our united aim has been perfection. We are proud even of our partial success; but we are fully conscious that we have not yet raised the work to what should be its ultimate level.

F. L. GRIFFITH.

(Superintendent of the Archæological Survey.)

PREFACE.

In presenting this, the first volume of the Archæological Survey, to the public, the author desires to make the following observations.

The object of the Survey publications is to give a faithful record of the monumental remains of Egypt, as well as all local information about them that can be gathered on the spot. That such work is needed for even the most frequented and best known monuments is proved by the present volume. The tombs of Beni Hasan had been illustrated and described by more than a dozen distinguished Egyptologists, and it was thought, before the Archæological Survey Expedition started, that little that was new would result. Yet the existence of three hitherto unnoticed tombs was thereby for the first time made known to science, a large quantity of unpublished scenes and inscriptions were copied, and concurrently many errors were detected in the published texts.

In order to know exactly what had been previously done, I examined all the published matter referring to these tombs as well as the manuscript copies of the inscriptions and scenes made by Burton, Champollion, Rosellini, Hay, Nestor de l'Hôte, and Sir Gardner Wilkinson. Of these, the collection of Hay, consisting of innumerable drawings, tracings, and extracts, with plans, have been found to be the most accurate and valuable. About the year 1830 complete copies of the Tombs 2 and 3 (excepting the shrines) were made by his practised hand, aided by the camera lucida, and reproductions of them were coloured under his guidance by a French artist: much has thus been recorded that is now faded and indecipherable. As to Tomb No. 3, several of the scenes published in the present volume have necessarily been derived from this excellent source. The remaining plates of paintings and inscriptions have been reproduced from full-sized tracings or hand copies made on the spot.

x PREFACE.

The Survey party sent out by the Committee of the Egypt Exploration Fund, and comprising Mr. Fraser, myself, and our servants, reached Beni Hasan on the 25th November, 1890. On the 2nd February, 1891, the party was increased by the addition of Mr. Blackden, an artist employed to make full-sized and coloured drawings of the most interesting of the wall-paintings; on the summer setting in the Expedition returned home. Early in October Mr. Fraser left England again for Upper Egypt, and Mr. Carter (an assistant draughtsman) accompanied me thither a fortnight later. Mr. Fraser, who arrived at Beni Hasan at the end of October, was joined by us in the following week, and on the 22nd November the work of surveying the tombs and tracing the wall-paintings was completed. In January, 1892, Mr. Blackden again went to Beni Hasan in order to continue and finish his artistic work, but after a short time fell ill, and was unable to proceed with it. In January of the present year, Mr. Percy Buckman, Mr. John E. Newberry, and Mr. Howard Carter were therefore commissioned to complete the collection of coloured facsimiles, and now at length our task has been accomplished.

It was at first intended that all the materials thus collected at Beni Hasan (excluding only the coloured facsimiles) should be published together in one volume, but the quantity was found to be so great that it was decided to issue them in two parts. In all there are thirty-nine tombs at Beni Hasan: the first fourteen (counting from the north) are illustrated in the present memoir; the remaining twenty-five will appear in *Beni Hasan*, Part II.

The survey, plans, elevations, and sections have been prepared from drawings made by Mr. G. W. Fraser, which have been checked, so far as it was possible to do so, by Mr. John E. Newberry. The frontispiece is taken from a water-colour drawing kindly lent by Mr. R. Phené Spiers, F.S.A., for the purpose. The phototypes are reproduced from negatives taken by Mr. Fraser, and the coloured plates from water-colour drawings made by Mr. M. W. Blackden. The remaining plates are reductions by photo-lithography from full-sized tracings or from hand copies made by the writer.

Many of those through whose early support the Survey was made possible, will probably ask why this memoir has not been issued sooner: why, in fact, it should have taken more than two years to prepare. The writer PREFACE.

must plead in reply that it is impossible to gather (and much less digest) materials of this kind without an ample allowance of time, and he ought also to point out that there have been several hitches during the progress of the work. The beginning also of an undertaking of this kind is always attended with many difficulties, and it is hoped that in future there will be no delay in the issue of succeeding memoirs.

In conclusion, the author must thank many friends who have helped him since his appointment on the staff of the Egypt Exploration Fund, and who have sympathized with him in the difficulties which he has had to overcome. Among these he must mention the late Honorary Secretary of the Fund, Miss Amelia B. Edwards, who, alas! is no longer with us; Professor R. Stuart Poole, to whom the present volume is inscribed; Mr. H. A. Grueber; Professor W. M. Flinders Petrie; and last, but not least, Mr. F. L. Griffith. Without the ever-ready help of Mr. Griffith I could not have attempted to write the following work, and it is not too much to say that all which is of any permanent value in the present volume is due in the first place to him.

PERCY E. NEWBERRY.

THE TOMES OF BENI HASAN, January 12, 1893. Owing to a combination of circumstances and the pressure of a great variety of work upon the author, this memoir in its entirety did not come into the Editor's hands until the present month, when it was already long overdue to the subscribers; the text was then in type, and all but three of the plates had been printed off Consequently there was little of either time or opportunity for a revision that was found to be much needed, especially for the plates of scenes in the Main Chamber of Tomb No. 3.

The additions and corrections on pp. 37, 72, and elsewhere, are due principally to a comparison of Hay's MSS., 29,813, and 29,847, foll. 61, 62, the latter containing copies of short inscriptions relating to the scenes of Tomb No. 2. Unfortunately Mr. Newberry's original materials were not available, so that some slight gaps in our information still remain unfilled. The Editor has naturally abstained from tampering with the text in regard to matters of fact, excepting where the amplest evidence existed in favour of a correction.

The Editor cannot but congratulate Mr. Newberry upon his achievement in general, and looks forward with the highest hopes to future volumes undertaken with a prospect of complete success.

THE TOMBS AT BENI HASAN.

PART I.

GENERAL NOTICE OF THE TOMBS.

Situation.

1. GEBEL BENI HASAN, "the Hill of Beni Hasan," in which the tombs are excavated, is a link in the long chain of cliffs which bound the eastern edge of the Nile valley. In the map it would be found about halfway between the important towns of Minyeh and Roda. Geologists would describe it as of Eocene nummulitic limestone, and the adventurous explorer in the upper table-land would be rewarded by a collection of echini. The hill is named after a family of Arabs calling themselves Beni Hasan, "sons of Hasan," who settled at its foot, their villages after a short existence dying down and springing up again at no great distance from the original encampment. Of these villages, ruined or inhabited, there are now five.

The tombs are excavated in two ranges about half-way up the hill, being cut in thick strata of fine white limestone. The upper range is immediately below a bed of hard chert, and the great tombs in it are reached by a pathway leading from the plain, up the slope formed by the débris

from the cliff above. At the top of this slope is the lower range of tomb-pits, and the pathway continues up to a terrace, on to which all the great tombs open. From it a strikingly characteristic and picturesque view of the windings of the Nile is obtained.

2. This imposing situation must have been Object. selected by the chief inhabitants of the district as an appropriate site for their sepulchres. The inscribed tombs are of one period and belong, as usual, to men of rare wealth and dignity. The lower range possibly represents the necropolis of one or more large cities at various epochs, or may perhaps be the last resting-places of the retainers and humbler members of the great families who were interred in splendour above. The name of one city is certainly recorded in the inscriptions of the tombs as the residence of some of the deceased nobles.

This was _____ Menat Chufu, "the Nursing city of King Chufu."

Of the twelve inscribed tombs eight are of

governors of the Oryx nome, two of princes, and one of a son of a prince, of Menat Chufu; the remaining one is that of a royal scribe. The great tombs were often decorated as befitted the exalted rank of the deceased, and in Tomb No. 3 we are informed by the prince Chnemhotep that he intended thereby to record for ever the names and occupations of himself, his family, and his entire retinue.

3. The age of the group in general is that of the XIIth Egyptian Dynasty, about 2500 B.C. On reference to the survey given in Pl. ii., it will be seen that between Tombs No. 13 and No. 14 there is an interruption in the terrace and a slight change of level, the effect being sufficiently striking to have induced Lepsius to divide here the tombs of the upper range into a northern and a southern group. In the northern one are thirteen tombs, in the southern twenty-six; making a total of thirty-nine. Of these only twelve are inscribed, and but three contain cartouches of kings. Tomb No. 14 bears the cartouche of Amenembat I.; Tomb No. 2 is dated in the 43rd year of the reign of Usertsen I., and the latest date in Tomb No. 3 is the year 6 of Usertsen II. No. 21 was hewn for a son of the owner of Tomb No. 14, and consequently its date cannot be before the end of the reign of Amenembat I., or much later than that of Usertsen I.; Tombs No. 4 and 23 are nearly contemporaneous with No. 3, as they both contain inscriptions mentioning near relatives of its owner.

Thus six out of the twelve inscribed tombs are easily dated.

To ascertain the age of the remaining six is more difficult. No one, however, who studies their paintings and inscriptions, can believe that they are separated from the others by any long interval of time. The style and subjects of the paintings, as well as of the inscriptions, show a close connection. The question

therefore to be settled is, are the six as yet undated tombs to be placed earlier or later than the others; i.e. do they belong to the period immediately preceding the reign of Amenembat I. or that immediately succeeding the reign of Usertsen II., the fourth King of the XIIth Dynasty? They can hardly be contemporary, as, except in the metropolis, two families of overpowering importance would not exist in the same place.

The earlier date is the more probable. If reference be again made to the survey given in Pl. ii., it will be seen that the oldest of the dated tombs (No. 14) is situated at the extreme northern end of the southern group, and that it is probably later than its southern neighbour is shown by its plan (see Pl. xliii. and p. 83). This not being symmetrical, clearly shows that the engineer was cramped for space, owing to the presence of No. 15 already excavated in the same rock. From the relative positions, therefore, of Tombs No. 14 and 15 it may be assumed that No. 15 is the earlier. The evidence of the paintings, architecture and inscriptions points the same way. We can now proceed a few steps farther in dating the remaining tombs. Tomb No. 17, according to the inscriptions, was hewn for a son of the owner of Tomb No. 15, who was again a son of the owner of Tomb No. 27. This fixes the relative dates of three more of the six hitherto undated tombs. Of the rest the date of Tomb No. 13 is doubtful; by the resemblance of its style to early tombs at El-Bersheh, it is probably the oldest of the whole group. The chronological order of Tombs No. 29 and 33 can easily be settled, as No. 33 was made for a son of the owner of No. 29. The two tombs very closely resemble that of Remushenta (No. 27), and for certain architectural reasons it may be concluded that they belong to the period immediately preceding the excavation of Tomb No. 27.

Date.

The inscribed tombs may now be arranged in chronological order:—

Architecture. 4. The tombs of the lower range consist of mummy-pits only, which are of the same form as those in the tombs of the upper range. A plan and sections of one of the latter are shown on Pl. xxiii., but for the most part the pits of the lower range are merely perpendicular shafts hewn in the rock, with one or more sepulchral chambers formed simply by the shafts being continued in a horizontal or inclined direction. These pits were filled up with stone débris, but the greater number of them have been cleared and rifled.

The tombs of the upper range are all excavated in the mountain side (see sections on Pl. ii.), which has been cut away, and the stone dressed over a more or less extent of surface according to the intended dimensions of the tomb. A platform closed in on three sides was thus cleared in front, and a façade made, in which the door or portico was formed. They all have main chambers, in the floors of which mummy-pits are sunk. Architecturally these tombs may be divided into three groups.

I. Those with one or more halls of a square plan, but without columns or portico. To this group belong Nos. 6, 8-10, 12, 13, 19, 20, 22, 24-27, 29-31, 33, 34, 36-39. The doorways (see Pl. xli.) lead into main chambers, the ceilings of which are either flat, as in Nos. 8, 13, &c., or in the form of a roof of very flat pitch, the ridge corresponding with the axis of the tomb, as in Nos. 27, 29, 33, &c.

II. Those without portico, but consisting of a main chamber, the roof of which is supported by one or more rows of columns of the lotus-bud type (see *Beni Hasan*, Part II., Pl. x.), running transversely to the axis of the tomb. To this group belong Nos. 14 to 18, 21, 23 and 28. A view of a typical entrance is given in Pl. xlii. The ceilings are either flat as in No. 14, or in the form of a roof as in Nos. 15 and 17, but the portions between the columns and end walls are usually curved in the form of a segmental vault, the axis of which runs transversely to that of the tomb.

III. Those with an open outer court, a portico, a main chamber, and a shrine. To this group belong Nos. 2, 3, and 32. The entrance consists of a portico of two octagonal or 16-sided columns, with ceilings of curved sections. The main chambers are divided into three aisles by two rows of 16-sided fluted columns, which support curved ceilings similar to those of the portico. At the east end of the main chamber is the shrine, a small chamber with flat ceiling.

For more detailed information on the architecture, see the "List of Tombs" on p.7, and the paragraph headed "Architectural Features," in the "Descriptions."

BENI HASAN.

PART I.

(TOMBS Nos. 1-14.)

LIST OF

THE TOMBS AT BENI HASAN.

(Nos. 1-14.)

Tomb No. 1. Unfinished, a rough-hewn portice only. No inscriptions, graffiti, or mummy-pits.

No. 2. Tomb of Amenemhat (vide detailed description, p. 9).

No. 3. Tomb of Chnembotep [II.] (vide detailed description, p. 39).

No. 4. Tomb of Chnemhotep [IV.] Unfinished, with portico in antis, which consisted of two (one now destroyed) fluted and well-proportioned columns (see Pl. xxxix. and for details Pl. xl.). The main chamber is only just begun, but sufficient has been done to show that the ceiling was not intended to be curved. No mummy-pits, paintings, or graffiti. Upon the lintel of the doorway to the main chamber is incised the following inscription, naming the owner of the tomb together with his titles and mother's name:—

Hnmhtp ir n nbt pr Di[t], "The erpa-prince, the haprince, Chnemhotep, born of the lady of the house Ja[t]."

(On the relationship of Chnemhotep [IV.] with the family of Chnemhotep [II.], see further Beni Hasan, Part II., General Notice, § 7, The Family of Chnemhotep.) The tomb was first described by Champollion (Monuments, Notices, tome ii., ff. 458-459, No. 5). On Lepsius' survey it is numbered 3 (Denkmäler, Abth. i., Bl. 58).

No. 5. Unfinished, with portico in antis which consists of two 16-sided columns. The main chamber is unfinished, but was designed to contain three aisles of nearly equal width with curved roofs. No paintings, graffiti, or mummy-pits.

No. 6. Unfinished. In plan a small square chamber. No paintings, graffiti, or mummy-pits.

No. 7. Unfinished. One mummy-pit. No paintings or graffiti.

No. 8. Unfinished. In plan a small square chamber. Two mummy-pits.

No. 9. Apparently finished, but with no paintings or inscriptions. It consists of a small open outer court (with one mummy-pit), a rectangular main chamber (with one mummy-pit), and a small shrine.

No. 10. Unfinished. In plan a rectangular chamber. One mummy-pit.

No. 11. Unfinished, a portico in antis which consisted of two octagonal columns and curved ceiling. No main chamber, paintings, inscriptions, or graffiti. One mummy-pit in front of the entrance to portico.

No. 12. Unfinished. No mummy-pits, paintings, or inscriptions.

No. 13. Tomb of the royal scribe Chnemhotep (vide detailed description, p. 73).

No. 14. Tomb of Chnemhotep [I.] (vide detailed description, p. 79).

TOMB No. 2.

FORMER DESCRIPTIONS AND COPIES.

The tomb was first described by

- JOMARD in 1798 (Description de l'Egypte, Antiq., Tome iv., pp. 336-340), who notes that it was then "bien conservé dans toutes ses parties." In March, 1825, it was visited by
- JAMES BURTON (Diary, 1825, March 12-15, Brit. Mus. Add. MS. No. 25637, ff. 2, 4, 73, and Brit. Mus. Add. MS. 25657, f. 6); and three years later by the members of the Franco-Tuscan expedition under
- CHAMPOLLION and ROSELLINI (Champollion's Lettres écrits, p. 42; Monuments, pl. cccxcv., cccxcix., etc.; Notices, Tome ii., ff. 425-434 and 458: Rosellini's I Monumenti dell' Egitto e della Nubia, I. Monumenti storici, Parte prima, Tome ii., Tav. xxv., xxxiv., xxxvi., etc., II. Mon. civili, Parte seconda, Tome i., pp. 64-68, and MSS. in the Library of the University at Pisa). Small-scale copies of the paintings in the mair chamber were made by
- ROBERT HAY in 1828, and copies of these were afterwards coloured for him by Dupuy in 1833 (Brit. Mus. Add. MS. 29813, ff. Add. MS. 29858, f. 67; Add. MS. 29857, ff. 97-120).

 A few of the scenes and inscriptions were also copied by
- WILKINSON in 1834 (Manners and Customs of the Ancient Egyptians (ed. 1878), Vol. ii., p. 173, etc., and MSS. in the possession of Sir Vauncey Crewe); by
- NESTOR DE L'HÔTE in 1840 (MSS. in the Bibl. Nat. Paris, Tome iii., f. 239); and by the members of the Prussian expedition under
- LEPSIUS in 1842 (see MSS. at Berlin and Denkmäler, Abth. ii., Bl. 121, 122, 141, 152 g and h, Briefe, p. 89, 96-100).

At the time of the present survey the walls of the tomb were complete, and the scenes and inscriptions in the upper rows of the main chamber in good preservation, and apparently hardly injured since the time when Champollion and Hay made their copies in 1828. The lower rows, however, have suffered considerable mutilation since that time, and many of the inscriptions are now almost obliterated. In several places the plaster is scaling off, and the colours, owing probably to the preparations used by former copyists to bring them out, are fading fast. The inscription on and around the entrance to the shrine was covered with whitewash by the Copts, who apparently used the tomb for a church, and cut away the colossal seated figure of Amenemhat in the shrine to serve as an altar. The inscriptions and paintings in the shrine are much mutilated.

RELIGION.

Religion.

No representation of any divinities occurs in the tomb. Prayers are exclusively addressed to the two chief funereal gods, Osiris of the West, Lord of Abydos or of Dadu, and Anubis In the city of Embalmment upon his hill, or Lord of the Ta-jeser.

The following deities are named in the inscriptions:-

OFFICERS OF AMENEMHAT'S ADMINISTRATION AND MEMBERS OF HIS HOUSEHOLD.

Officers and Members of Household.

The following list of officers is arranged in alphabetical order and not according to rank. Little is known of the various duties of the officers and servants here recorded beyond what can be gleaned from the inscriptions accompanying the figures. In each instance reference is given to the plate on which the officials are named.

GENERAL DESCRIPTION OF THE TOMB.

KEY PLAN TO SCENES AND INSCRIPTIONS.

20 BENI HASAN.

ARCHITECTURAL FEATURES.

(See Plates II.-Va.)

Dromos.

Outer court.

Façade.

Main chamber.

Shrine.

Mummypits. A road or *dromos* (still distinguishable by the dark brown boulders ranged on either side) forms the approach to the tomb, and can be traced down the slope of the hill from the open outer court to the edge of the cultivated land. The entrance to this open outer court is 6 feet 8 inches in width; its front wall, which is partly destroyed, was probably never more than two or three feet in height; the floor is rough.

The façade of the tomb is cut into the side of the cliff and presents a fine architectural front. It consists of a "portico in antis," i.e. it has two columns and antae. The shafts of the columns are octagonal, and stand on large circular bases slightly raised above the floor-level and with rounded sides. The shafts, which have a slight diminution towards the top, are each surmounted by a plain square abacus, which projects beyond the upper periphery but is of the same width as the lower diameter of the shaft. The architrave, which rests upon the abacus, is of the same width and without any architectural divisions. Its apparent supports on either wall are slightly projecting pilasters corresponding to the antae in a Greek temple: they are plain and of the same width as the architrave. Above the architrave and upheld by a narrower extension of the same pilasters there is a ledge of rock, somewhat resembling a cornice, the soffit of which was sculptured with false rafter-ends, laid flat but rounded below, and corresponding to the mutules of the Doric order (see Front elevation, Pl. iv., and cf. Pl. xxii. and description, p. 52). The upper part of the cornice is too much decayed to show the original form. The ceiling of the portico is of a curved section taking the form of a segmental barrel vault, which is placed at right angles to the axis of the tomb (see Longitudinal section, Pl. iv.); the arch therefore springs from the architrave of the column on one side and from the wall which separates the portico from the principal chamber on the other. The portico is separated from the main chamber by a wall 4 feet 7\frac{3}{4} inches thick, and in this a doorway is formed, the threshold of which is raised 5 inches. The door-posts and lintel (technically the "architrave of the door") project from the wall 1 inch, and are quite flat: on this flat surface are incised the titles of the owner of the tomb given in Pl. vii. Upon the jambs (i.e. in the thickness of the wall) is incised the long biographical inscription figured in Pl. viii.: the soffit is plain. In plan the main chamber is nearly symmetrical; it is lighted only from the doorway, and originally could be shut off from the portico by a door (no traces of which, except the pivot-hole for swinging it in, now remain) opening inwards. The roof is supported by four columns in two rows, which run parallel to the axis of the tomb, and which divide the chamber into three aisles of nearly equal width. The columns support a plain architrave, from which spring three barrel vaults of a segmental section. The shafts are 16-sided, 16 feet 81 inches high, and the largest diameter is 3 feet 4 inches. The bases, like those in the portico, are raised 5.5 inches above the level of the floor and chamfered; their diameter is 6 feet 4 inches. The shafts taper slightly; are fluted the whole of their length, and are surmounted by a plain square abacus, which is of the same width as the diameter of the summit of the column. The flutes are 8½ inches broad; they have no fillets, and the deepest part of the groove is barely half an inch. One of the sixteen sides of each shaft (that parallel with the axis in the central space, see detail of column, Pl. v.) is left flat, and was probably intended for the insertion of a line of hieroglyphs. At the east end of the main chamber is the Shrine or Sanctuary, excavated deep in the rock: it is a small rectangular chamber raised a step above the floor of the main chamber, from which it was separated by double doors opening outwards (see pivot-holes in plan, Pl. iv.). At the eastern end of it is the colossal statue of Amenemhat, seated on a throne (now mutilated), and flanked by two smaller standing figures, all of which are hewn out of the solid rock. Crossing the south aisle of the main chamber are the openings of two mummy-pits, with slightly raised and rounded rims projecting 1½ inches above the floor-level; one near the western end (see plan, Pl. iv. A), the other in the middle (l.c. B); neither of them have been cleared, though both were probably rifled in ancient times.

INSCRIPTIONS.

Exterior Inscription.

EXTERIOR INSCRIPTION (see Key plan A, B, C, and Pl. vii.).—On the door-posts and lintel of the entrance to the main chamber is an incised hieroglyphic inscription of thirteen lines, giving the name and titles of Amenemhat. The flat surface of the door-posts and lintel was originally painted pink and splashed with black, dark red, and green, so as to resemble rose granite, and the incised hieroglyphs were picked out in green. The text of this inscription, of which the following is a transliteration and translation, has been published, though with several errors, by Champollion (Monuments, Pl. cccxcix.) and by Lepsius (Denkmäler, Abth. ii., Bl. 121).

On the lintel are five horizontal lines reading:-

Biographical Inscription. BIOGRAPHICAL INSCRIPTION (see Key plan D, E, and Pl. viii.). This inscription, incised on the jambs of the doorway to the main chamber, consists of five horizontal and sixteen vertical lines, the five horizontal and first eight vertical lines being on the south or right-hand jamb, the remaining lines being on the left-hand jamb. The surfaces of the two jambs are carefully worked and, like the door-posts and lintels, were originally coloured pink and then splashed with black and green in order to resemble rose granite; the hieroglyphs, which are well cut, were painted green. The inscription was first copied by Champollion

in 1828, and published after his death (in *Monumen's*, Pl. cccxcv., cccxcix.; *Notices*, Tome ii., ff. 427-430). In the same year it was copied by Robert Hay (Brit. Mus. Add. MS. No. 29813, ff. 84-85), and later by Wilkinson (in 1834, see MSS., vol. ii., ff. 22-26) and Lepsius (in 1842, see Denkmäler, Abth. ii., Band iv., Bl. 122). The first translation of the inscription was made by Dr. Birch in 1856 (Trans. Roy. Soc. Literature, vol. v., New Series, p. 212 et seq.). Translations have also been made by Brugsch (Histoire d'Egypte, 1st ed., p. 55-56) and Maspero (Recueil de Travaux, etc., vol. i., pp. 161-169).

PAINTINGS.

MAIN CHAMBER.

(Plates VI. and X.-XVIII.; Key Plan F-M.)

Ceiling.

The ceiling has already been described (p. 20) as consisting of three segmental vaults with plain curved soffits. Each of these rectangular compartments is covered with a painted pattern, and a large part of one (entire width and about one-third of the length) is shown on Plate vi. This decoration is the same in each, and represents (vide Pl. vi.), [1] a wooden beam running longitudinally down the centre of the compartment. Its colour is yellow with brown graining, and upon it, between two thick lines of dark blue, are painted two mutilated inscriptions in blue hieroglyphs starting from the centre and reading thus >>> < <=>«. They give the usual prayer to Osiris and Anubis, together with the name and titles of Amenemhat. [2] On either side of the beam the space is divided by thin black lines into small red and yellow squares containing quatrefoils which are black in the red squares and blue in the yellow. This design is continued to the edges of the ceiling at the architraves and walls; but in the centre is [3] a large rectangular space of a different pattern, crossed by the beam and bordered by two white lines

Ceiling (cont.)

enclosing a narrow black band, within which is a wavy white line. This space is divided transversely into three nearly equal compartments. In the central one, which is narrower than the others, is painted a check pattern (yellow and red); it is separated from the other compartments by narrow bands of yellow crossed with black lines. The remaining spaces are filled with imitation mat-work of plain yellow and yellow with brown stripes; the direction of the two kinds of reeds alternating in the four compartments which the beam forms in crossing the two spaces.

Frieze, &c.

The Frieze consists of the usual Khaker ornament painted in colours. Beneath the Khaker ornament and at the sides is a border of coloured rectangles (yellow, blue, red, and green), separated with black lines enclosing a white line, which forms a "framing" to the scenes. Beyond this, at the sides, is a peculiar roped (?) pattern (vide plates), and beyond this again, but not shown in the plates, is a very narrow line of blue.

Dado.

Immediately below the paintings are,

- (a) West wall (northern half), six narrow bands of colour, gray, red, white, yellow, white and black respectively.
- (b) West wall (southern half), south side of false door, two bands of colour, yellow and red respectively; north side of false door, a very narrow black band.
- (c) North wall, five narrow bands of colour, red, white, yellow, white and black respectively.
- (d) East wall, a narrow band of yellow. Around the hieroglyphs over and around the entrance to the shrine are five narrow bands (see Plate xv.), black, white, blue, white and red respectively.
- (e) South wall, two narrow bands of red and yellow.

Below all these bands of colour is a space of about 2 feet 6 inches of plain unpainted stone, excepting only where the "false door" on the west wall, Pl. xii., representing the mystic entrance to the tomb, reaches to the floor.

Style of Painting.

The style of painting varies considerably on the different walls. On the south wall the paintings are very carefully executed on a well-prepared surface consisting of a thin coat of plaster; the hieroglyphs and all matters of detail are exceedingly delicately worked (for a specimen of the painting see Pl. x.). The paintings on the north, east, and west walls are boldly but coarsely executed, many of the figures being badly proportioned. There are also several curious instances of mistaken perspective (vide calf with foreshortened neck in Row 4, North wall, &c., Pl. xiii.) The explanatory hieroglyphs on these three walls are roughly painted in green.

South Wall. (See Key Plan L, M, and Pl. xvii. and xviii.)

The wall paintings are divided into two portions by a black line running vertically from the frieze to the dado. Those on the left of this line are shown on Pl. xvii., those on the right on Pl. xviii.

Pl. Above him [B] are seven vertical lines of hieroglyphs giving his name and titles. Upon and before the altar are numerous offerings [C], and above is a long catalogue of them in three rows [D]. The procession of priests and household officers is headed by Amenemhat's son Chnemhotep [E], and above him, in a mutilated inscription, are inscribed his name and titles. SHRINE.

(Plates XIX.-XX.; Key Plan, p. 19, N-T.)

Ceiling.

The ceiling is richly ornamented with parti-coloured squares similar to, but smaller than, those of the main chamber ceiling (see Pl. vi.). Along its centre and parallel to the axis of the tomb is depicted a beam painted yellow and grained red to imitate wood, upon which is the following inscription in a vertical line, painted in blue hieroglyphs:—

Frieze.

Painted khaker ornament with coloured squares below; and at the sides, forming a "framing" to the scenes, a narrow blue band, the ordinary diamond pattern, and coloured squares.

Dado.

Immediately beneath the paintings are two bands of colour ($2\frac{1}{2}$ inches broad and red and yellow respectively) below which is a dado (2 feet $5\frac{1}{2}$ inches in height), painted red and black so as to imitate rose granite.

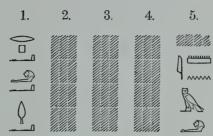

Style of Painting. The painting is finely executed on a well-prepared surface; the hieroglyphs, figures, &c., are admirably drawn, and show much detail. The colours are fairly preserved, though the paintings are now in a very mutilated condition.

Sculptures and Paintings. East Wall (Key plan, p. 19, R, S, T). In the centre (R) there formerly existed a colossal figure of Amenembat seated on a throne and carved out of the solid rock, at the foot of which were incised two lines of hieroglyphs, copied by Hay (*Brit. Mus. Add. MS.*, 29813, f. 86) and now much defaced, reading:—

- 1. ['Im3h] hr Pth skr nb pt r-p' h' im-'

- 2. ['Imih hr Ḥrw] hnt [Ḥbnw] 'Imny mi' hrw nb imih [Worthy towards Horus] within [Hebnu], Ameni, justified, possessing the reward of worth.

The whole of the body, arms, and legs of the statue have been destroyed. Above the head of it,

Sculptures and Paintings (cont.) which is now much mutilated, were originally five vertical lines of hieroglyphs; of these only the following traces remain:—

Flanking this seated figure is, on the right-hand side, a statue of Amenemhat's wife (Key plan S). She is clothed in a long white garment, and wears bracelets and anklets. Her face and body are mutilated. At her feet is incised:—

Osiris, the lady of the house, Hotept, justified."

On the wall above her head are four vertical lines of painted hieroglyphs (now much faded and mutilated), reading:—

(1) 'Imhyt hr Ḥt-ḥrw
Worthy towards Hathor

nbt Nfrw-(2)s lady of Neferus,

hr Piht towards Pacht nbt St lady of the (Speos) valley

On the left-hand side of the colossal figure of Amenemhat is a statue of his mother (Key plan, T), of similar size and proportion to Hotept, clothed in the same kind of white garment, and likewise wearing bracelets and anklets. At her feet is incised:—

Osiris, the lady of the house, Henu, justified."

Paintings (cont.)

On the wall above her head are four vertical lines of painted hieroglyphs (now much faded and mutilated), reading:—

DIAGRAM OF WALL-PAINTING.

Immediately below the frieze is, on the North wall [see Diagram, A], a line of painted hieroglyphs, — giving the prayer to Anubis for a good burial, and on the North-west wall an inscription [Aa] reading: 'Imih hr ntr i nb pt 'I[mn]y, "Devoted towards the great god, lord of heaven, Ameni." The scenes, in four rows of nearly equal height [D, Da, E, Ea, F, Fa, G, Ga], show priests performing services and bringing offerings to lay on the altar [B], as it were before the colossal statue of Amenemhat on the East wall. Above the altar, in two rows [C], is an inscription giving a brief tabulated résumé of the offerings (twenty-two in all), and a horizontal line of hieroglyphs descriptive of the scenes. This line reads: S-hpt stwpt ipdw r ht it n ki n h' I[mn]i mi hrw, "causing to be brought choice joints (and) wild fowl to the great hat (shrine) for the ka of the ha-prince Ameni, justified."

Additions and Corrections

ADDITIONS AND CORRECTIONS TO TOMB No. 2.

P. 30, 1. 21. For "2 feet 6 inches" read perhaps "4 feet 6 inches": the base of the false door is 12½ inches from the ground (Hay).

P. 34. Inscription on the base of the statue. Hay's copy indicates $nb \ \check{s}[t]yt]$ (?), and does not confirm the restoration of the second line.

Pl. vi. For "wooden beam" read "band representing a wooden beam."

Pl. xii. Hay's copy shows the right-hand lower corner more complete: in the bottom row is one more ox's head and three men are standing in the canoe; of the figures only the central one is now perfect. In Rows 6 and 7 on the left the name of Hotept is upon two boxes and the mirror.

Pl. xiii. The blundered inscription at the top is correctly copied, but the net is placed too low. There should be a broad clear space between it and the heads of the figures, leaving room for the full height of the bows. On the left, over the first dog, there should be a gazelle in the net.

Most of the small inscriptions are in linear hieroglyphs. The names and titles of the officers can be found in the text, pp. 14-19.

Additions and Corrections (cont.)

Row 6-7. Left end. Building and figures complete in Hay's copy, viz.: Row 6. Architrave on the two columns, man standing before scribe seated at a table (?), division wall, man driving the asses. Row 7. Scribe standing on the corn heaped against the division wall, gate. See also Rosell. M. C. xxxiv. 2. The hieratic inscriptions on the granaries are also copied by Champollion (Notices, ii., pp. 431-2).

Behind the large figure, the boxes are A and A a

Pl. xiv. Top row. The groups are more complete in Hay's copy: that at the right-hand end has been cut short in the printing.

Rows 4-5. On comparison with Hay's two copies, many details appear to be missing or incorrect. The perpendicular lines of the fortress walls should not be carried down to the base: several daggers, girdle ties, an axe, &c., are missing.

Row. 6. Small inscription over funeral barge, read The Hay).

Pl. xvi. The boats are more perfect in Hay's copy. In the middle of the fourth row a sheaf of arrows is lying on the ground, placed vertically between the archer and the man with a battle-axe.

Pl. xvii. A few details were more perfect in the descriptive table of the offerings; near the middle (17th line from left in lower row) read $\theta \in \mathcal{A}$ (Hay).

Pl. xxi. 4. It may save trouble if I state that the position of this is not recorded.

(FRONTISPIECE AND PLATES II., XXII.-XXXVIII.)

FORMER DESCRIPTIONS AND COPIES.

The tomb was first described by

- JOMARD in 1798 (Description de l'Egypte, Tome iv., pp. 324);
- BURTON copied the Great Inscription in 1825 (Brit. Mus. Add. MS. 25637, ff. 2, 4, and 73; and Excerpta Hieroglyphica, Pl. xxxii.); and later, in 1828, the tomb was described and several of the scenes were copied by the members of the Franco-Tuscan expedition under
- CHAMPOLLION (Papiers de Champollion in Bibl. Nat.; Monuments, Notices, Tome ii., ff. 385-425; Lettres écrits, p. 42) and
- ROSELLINI (I Monumenti dell' Egitto e della Nubia (Parte prima), Tome i., Tav. xxvi. and Tome ii., Tav. xxvi., xxxi., etc. (Parte seconda), Tome i., pp. 50-62, and MSS. in the University Library at Pisa). Small scale copies of the wall paintings and inscriptions, except those in the shrine, were made by
- HAY in 1828, and copies of these were coloured for him by Dupuy in 1833 (Brit. Mus. Add. MS. 29813, ff. 15-20; Add. MS. 29847, ff. 59-62; Add. MS. 29853, ff. 392-465). Several of the scenes and inscriptions were copied by
- WILKINSON in 1838 (Manners and Customs of the Ancient Egyptians, and MSS.).

 Small scale drawings of all the paintings and inscriptions, except those in the shrine, were also made by the members of the Prussian expedition under
- LEPSIUS in 1842, and afterwards published in the Denkmäler, Abth. ii., Bl. 123-130.

At the time of the present survey the walls of the tomb were complete, but the scenes and inscriptions of the main chamber have suffered considerably since the time when Champollion and Hay made their copies in 1828. The Great Inscription, which forms the dado to the main chamber, was, in 1888 or 1889, much mutilated by a reckless thief, who removed or destroyed all the royal names; and all the colours of the paintings are much faded, owing, apparently, to the preparations used by former copyists to bring them out. The inscriptions and paintings in the shrine are much defaced.

GENERAL DESCRIPTION OF THE TOMB.

KEY PLAN.

ARCHITECTURAL FEATURES.

(See Frontispiece and Plates II., XXII., XXIII.)

Dromos.

Façade.

The tomb was approached in ancient times by a road or dromos (still distinguishable by the dark brown boulders ranged on either side), which extended down the slope of the hill from an open outer court to the edge of the cultivated land. The façade of the tomb is cut into the side of the hill, and presents an imposing architectural front. It consists of a "portico in antis," i.e. it has two columns and antae. The shafts of the column are polygonal, and stand on large circular bases slightly raised above the floorlevel, and with rounded sides. The shafts taper slightly, are fluted the whole of their length, and are each surmounted by a plain square abacus, which projects beyond the upper periphery, but is of the same width as the lower diameter of the shaft. The architrave, which rests upon the abacus, is of the same width and without any architectural divisions. Its apparent supports on either wall are slightly projecting pilasters corresponding to the antae in a Greek temple: they are plain and of the same width as the architrave. Above the architrave and upheld by a narrow extension of the same pilasters there is a ledge of rock, somewhat resembling a cornice, the soffit of which is sculptured with false rafter-ends, laid flat but rounded below, and corresponding to the mutules of the Doric order (see Front elevation, Pl. xxii.). The upper part of the cornice is too much decayed to show the original form. The ceiling of the portico is of a curved section taking the form of a segmental barrel vault, which is placed at right angles to the axis of the tonib (see Longitudinal section, Pl. xxii.); the arch therefore springs from the architrave of the column on one side and from the wall which separates the portico from the principal chamber on the other. The portico is separated from the Main chamber by a wall 3 feet 4 inches thick, and in this a doorway is formed, the threshold of which is raised 51 inches. The door-posts and lintel (technically the "architrave of the door") project from the wall 1 inch, and are quite flat: on this surface is incised the inscription given in Pl. xxiv. Upon the jambs (i.e. in the thickness of the wall) are incised the two inscriptions figured in Pl. xxiv.: the soffit is plain. In plan the Main chamber is nearly symmetrical; it is lighted only from the doorway, and originally could be shut off from the portico by a door (no traces of which, except the pivot-hole for swinging it in, now remain) opening inwards. The roof was supported by four columns in two rows, which ran parallel to the axis of the tomb, and which divided the chamber into three aisles of nearly equal width. Of these columns, only a fragment (found at the bottom of the mummy-

Main chamber.

Shrine.

Mummypits.

Exterior Inscription pit A) now remains. This fragment belonged to the lower part of one of the columns, and shows that they were polygonal (16-sided) and slightly fluted. They supported the plain architraves, from which spring three barrel vaults of a segmental section. The bases of the columns (traces of which still remain) were probably, like those of the portico, raised a few inches above the level of the floor, and with rounded sides. The shafts also appear to have tapered slightly, and to have been surmounted by a plain square abacus, which was of the same width as the diameter of the summit of the column. The floor of the chamber, which is well finished, is sunk 41 inches below the open outer court, and is descended into by three steps, 5½, 2½, 1½ inches high respectively. At the eastern end of the main chamber is the Shrine or Sanctuary, excavated deep in the rock. It is a small rectangular chamber, and is approached by a step (43 inches high, with edges chamfered) which projects out into the main chamber, and by a doorway in which were originally hung double doors opening inwards (see pivot-holes in plan, Pl. xxiii. A). This doorway is framed by doorposts and lintel, which project 1 inch from the wall but are quite flat: on this flat surface are incised the hieroglyphs given in Pl. xxxiii. The jambs and the soffit are plain. At the eastern end of the sanctuary was originally a figure of Chnemhotep seated on a throne, but the entire statue has now been cut away and only a portion of the throne remains. The floor is well finished, and is of the same level as that of the main chamber. Crossing the south aisle of the main chamber are the openings of two Mummy-pits; one near the western end (see plan, Pl. xxii., B), the other in the middle (l.c. A). For details of the mummy-pit B see Pl. xxiii., Figs. 1, 2, and 3.

INSCRIPTIONS.

EXTERIOR INSCRIPTION (see Key plan, A, B, C, and Pl. xiv.).—On the door-posts and lintel of the entrance to the main chamber is an incised hieroglyphic inscription of fourteen lines, giving a list of the festal days on which services of funereal offerings called percheru are to be performed, accompanied by a prayer to the visitor to give offerings, and the name and titles of Chnemhotep. The flat surface of the door-posts and lintel was originally painted pink and splashed with black, dark red, and green, so as to imitate rose granite, the incised hieroglyphs being picked out in green. The text of this inscription has been published by Champollion (Monuments, Notices, tome ii., fol. 386) and by Lepsius (Denkmäler, Abth. ii., Bl. 123). On the lintel are nine lines (one vertical, the rest horizontal), giving a list of the festal days on which services of funereal offerings called percheru are to be performed, together with the name and titles of Chnemhotep.¹

The festal days noted are the following:-

¹ These titles are repeated on the door-posts, see next page.

Inscriptions on the Jambs of Doorway. Inscriptions on the Jambs of Doorway (see Key plan, D, E, and Pl. xxiv. A and B).—These inscriptions, consisting of two vertical lines (one on either jamb of the doorway), are an address to visitors. The surfaces of the jambs have been painted, like the door-posts and lintel, to resemble rose granite, and the hieroglyphs, which are incised, have been picked out in green. The two inscriptions have been published in *Champollion*, *Notices*, tome ii., p. 386, and by Lepsius (*Denkmäler*, Abth. ii., Bl. 123 f.). The following is a transliteration and translation of them:

(1) On the left-hand jamb:-

Architrave Inscriptions ARCHITRAVE INSCRIPTIONS (see Key plan, T, U, Pl. xxiv.).—On the two architraves of the main chamber are four inscriptions, giving the prayer for *percheru* offerings and several of the titles of Chnemhotep. The architraves have been painted to resemble rose granite, and the hieroglyphs have been painted in green. The text of the four inscriptions, of which the following is a transliteration and translation, has been published by Lepsius in the *Denkmäler*, Abth. ii., Bl. 123 g.

The Great Inscription The Great Inscription (see Pl. xxv., xxvi.).—This inscription, consisting of 222 vertical lines, is incised upon the dado which runs round the walls immediately beneath the paintings of the main chamber. This dado has been painted dull rosy red, then splashed with darker red, black, and green in order to imitate rose granite, and the hieroglyphs have been picked out in green. They are roughly cut and painted. The inscription was copied by Burton in 1826, and published by him in 1830 (Excerpta Hieroglyphica, Pl. xxxiii., xxxiv.); it has also been copied by Hay (Brit. Mus. Add. MS. 29813 f. 83-84, and Add. MS. 29847 f. 59-62); by Champollion in 1828 (Monuments, Notices, tome ii. p. 418-422); by Wilkinson (MSS. in possession of Sir Vauncey Crewe, vol. iii. f. 1-4; by Lepsius in 1842 (Denkmäler, Abth. ii. Bl. 124, 125, and 130); and by Brugsch in 1856 (Monuments Egyptiens, Pl. 15-17). Several reprints of the text have been made, and translations have been given by Brugsch (Histoire d'Egypte, 1st edition, pp. 58, 59, and Geschichte Egyptens, ed. 1877, pp. 139-143 and 149-150); by Birch (Records of the Past, vol. xii., pp. 65-76); by Maspero (Recueil de Travaux, &c., vol. i., pp. 161-169); and by Krebs (De Chnemothis Nomarchi inscriptione Egyptiaca commentatio, Berlin, 1890).

The inscription contains many unquestionable blunders of the scribe: such are $\stackrel{\checkmark}{\sim}$ \bigwedge for $\stackrel{\checkmark}{\sim}$ \bigwedge in line 30 (compare also S.B.A. Proceedings, xii. p. 263), as well as ill-formed hieroglyphs. It is especially faulty and difficult to understand from line 199 to line 220.

ARGUMENT.

In lines 1-13 the name of the maker of the tomb is given and the purpose which it was intended to fulfil.

¹ The inscription is interrupted by the "false door."

The Great Inscription (cont.)

The Biography of Chnemhotep [II.] follows. Lines 13-24 explain how, in the 19th year of Amenemhat II.'s reign, he obtained the princedom of Menat-Chufu, by descent from his maternal grandfather [Chnemhotep I.] This leads on to an account of the installation of [Chnemhotep I.] by Amenemhat I. in the princedom of Menat-Chufu, in the sub-nome of Dut-Herw (lines 24-46), and later in the Oryx nome (lines 46-53). The inscription goes on to relate that [Chnemhotep I.] was succeeded by his eldest son Necht, the uncle of Chnemhotep [II.]. We are then told of Chnemhotep's [II.] parentage and birth. This introduces us to an account of his installation into his inheritance (lines 71-79), his acts as prince (lines 79-99), the honours accorded to him by the King (lines 99-120), the royal favours shown also to his eldest sons Necht [II.] (lines 121-150), and Chnemhotep [III.] (lines 150-160). His filial piety is then noted (lines 161-169), and the text reverts to the subject of the tomb, and shows that Chnemhotep [II.] had, in that, followed the example of his father Nehera (lines 170-184), whose career is summarised (lines 184-192). A section follows (lines 192-221) relating to the monuments of Chnemhotep [II.]

The inscription terminates with the name of the contractor for the tomb.

¹ I.e. Chnemhotep I. (or the King, but hardly the same King Amenemhat I.).

Parents of Chnemhotep.

³ A title known only from this passage, but evidently closely connected with that of β 2 "Governor of the New towns," which is found at Tehneh (14 miles north) and at Sheikh Said (15 miles south). Neka-anch at Tehneh was the earliest of these governors that we know of (end of IVth Dynasty); Ur-arna at Sheikh Said comes next (Vth Dynasty); and lastly, Imhotep at Sheikh Said (VIth Dynasty). Nehera was probably a successor of these, and others may be found in the course of the survey.

s This title is assumed also by Chnemhotep II. (see Pl. xxxiii.). The meaning is very obscure, but as means "granite," which was found at the southern extremity of Upper Egypt, and as the name of an important locality in Lower Egypt on the north-eastern frontier (discovered by Mr. Petrie at Nebesheh), it may be that the phrase implies two extremities, A and Ω as it were. Similar phrases are not uncommon—eyes of the King of Upper Egypt, ears of the King of Lower Egypt, &c. It is hardly necessary to warn the reader that they do not imply the existence of two kings, but refer only to one king in his doublo capacity.

¹ Prof. Brugsch supposes these years to be the solar year of $365\frac{1}{4}$ days and the lunar year of 354 days respectively: in agreement with Prof. Krall we believe the solar and lunar years as modified for practical measurement of time to be more probable. See S.B.A. Proc. xiv. p. 260. The year of 360 days seems to be the most ancient, and it is possible that the reckoning with 5 extra days or "long year" had only recently been adopted. The questions involved are many, and answers to them are not yet to be found with certainty.

PAINTINGS.

MAIN CHAMBER.

(Plates XXVII.-XXXV.; Key Plan, p. 52, F-L.)

Ceiling.

The ceiling is divided into three compartments, and its decoration consists of small red and yellow squares containing quatrefoils, which are black in the red squares and blue in the yellow.

Frieze.

The frieze consists of the usual chaker painted red, blue, and green. Beneath this ornament and at the sides of the walls is a border of coloured rectangles (yellow, red, blue, and green) separated by black lines enclosing a white line, which forms a framing to the scenes. Beyond this at the sides of the walls is a peculiar roped (?) pattern (vide plates), and beyond this, not shown in the plates, is a very narrow line of blue.

Dado.

Immediately beneath the paintings are two bands of colour ($2\frac{1}{2}$ inches broad, and red and yellow respectively), which are carried around the doorway and round the tomb.

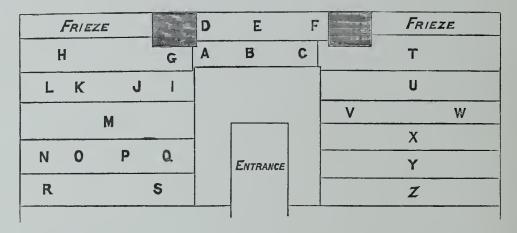

¹ Beneath these bands of colour is the Great Inscription (Pls. xxv.-xxvi.), divided at l. 160 by the "false door" on the South Wall, see above, p. 56.

Style of Painting.

The style of painting is uniform throughout the tomb. The human figure is boldly drawn and well proportioned (see for example Pl. xxvii.), and the wild and domesticated birds, the fish, and the animals are depicted with such skill that there is no difficulty in identifying the species represented. For specimens of the painting see Plates xxvii. and xxviii.

Scenes.

WEST WALL. (See Key plan F, G, and Pl. xxix.)

Over the entrance-doorway is a scene [A-C] representing Chnemhotep attended by his household servants, and above it is a painting showing a naos [F] containing a statue of Chnemhotep being drawn in procession [D, E] to the tomb of the deceased.

The paintings are arranged in six rows of nearly equal height, and may be divided into two scenes.

- Scene 1. [A-O] Shows officers and members of Chnemhotep's household and a party of foreigners, bringing agricultural and other produce to present to their lord [A], who is accompanied by one of his sons [C], an attendant [D], and three dogs. Above Chnemhotep is an inscription in four vertical lines, reading:—mit irw m mnunt nbt inw in nf m nwt-f hspt-f nt hnw Mihd nt-f (?) in rp' h' [N]hri si Hnmhtp mi' hrw, "Watching the produce, all the cattle and the contributions brought to him from his villages and his fields of the interior of the Oryx nome, namely his estate (?), by the erpa-prince, the ha-prince, Nehera's son Chnemhotep, justified."
 - Row 3. Shows a procession of foreigners [E] which is headed by the royal scribe Neferhotep, who is represented holding in his hand a papyrus roll (see Pl. xxxviii. 2), upon which is the following inscription:—Rnpt vi. hr hn n Hrw sm tiwi stn biti (H-hpr-R) rht n mwin n si h Hnmhtp hr msdmt m mm n šw rht iri xxxvii, "The year vi. under the majesty of Horus, the guide of the two lands, the King of Upper and Lower Egypt, Usertsen II., the number of Aamu brought by the son of the ha-prince, Chnemhotep, on account of the mesdemt (eye-paint, stibium or kohl), Aamu of Shu, number amounting to 37." Immediately following the royal scribe is Cheti, "the superintendent of the huntsmen," and behind him the party of foreigners (see Pl. xxxi.) headed by the hhi st 'Ibshi, "hak-prince of the desert, Abesha" (see Pl. xxviii.). Above is a line of inscription, reading it hr int msdmt in nf m xxxvii, "arrival bringing kohl which 37 Aamu bring to him."
 - Row 4. Shows a group of officers of Chnemhotep's household [G], behind whom are servants leading cattle and driving domesticated birds [H], and men fowling with clap-nets [I].
 - Row 5. Also shows officers of Chnemhotep's household [J], bulls fighting and servants fattening cattle and geese [K, L].
 - Row 6. Shows scribes registering accounts [M], men driving cattle [N] and donkeys [O].
- Scene 2. [P-W] Shows Chnemhotep [P] armed with bow and arrows and accompanied by his sons, attendants, and dogs, hunting wild animals in the desert. At the end of the second row [at W] is the "scribe of the table, Renseb's son Mentuhotep," who holds in his hand a papyrus roll (see Pl. xxxviii. fig. 1), upon which is inscribed a list of the animals killed.

Scenes (cont.)

EAST WALL. (See Key plan I-K, Pl. xxxii.-xxxiv.)

(a) North side (Pl. xxxii.).

Immediately beneath the frieze is a painted inscription giving titles and name of Chnemhotep [E].

Below is a scene occupying three-fifths of the wall [I], representing Chnemhotep fowling. He stands in a canoe, is accompanied by his wife, son, his sahutet, and one attendant, and holds in his right hand a throw-stick, and in his left three birds. In the water beneath the boat are figured several varieties of fish, a crocodile, and a hippopotamus.

The scene beneath [G] shows a party of men fishing with a net, under the direction of the "superintendent of the fishers," Mentuhotep.

(b) Centre (Pl. xxxiii.).

Immediately beneath the frieze is a painted inscription giving titles and name of Chnemhotep [D].

Below is a scene representing Chnemhotep [K] accompanied by his eldest son Necht and the superintendent of the treasurers, Bakt (the decorator of the tomb, see p. 66). The prince is seated behind a screen of reeds, and holds in his hands a cord which passes through it and is attached to a clap-net [L].

Beneath this is the entrance to the shrine, around which are three incised inscriptions [A, B, and C]. For translations of these inscriptions see p. 66.

(c) South side (Pl. xxxiv.).

Immediately beneath the frieze is a painted inscription describing Chnemhotep as "great in fish, rich in wild fowl, loving the goddess of the chase" [F].

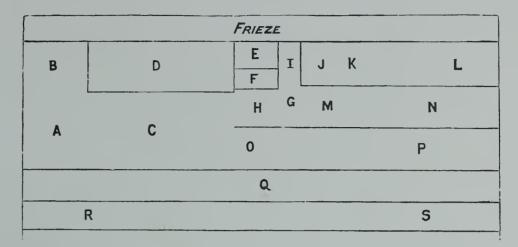

Below is a scene occupying three-fifths of the wall [J], representing Chnemhotep fishing. He stands in a canoe, is accompanied by his eldest son and an attendant, and holds in his hands a bident, with which he is spearing fish. In the water beneath the boat are several varieties of fish, a crocodile, and a hippopotamus.

The scene beneath [H] shows a party of men in canoes upon the water.

The inscription, in nine lines, reads appropriately "canoeing in the papyrus beds, the pools of wild-fowl, the marshes and the streams, by Chnemhotep, the chief canoer in the papyrus beds and pools of wild-fowl, capturing birds and fish (see Pl. xxxii.): hidden by the screen he closes the great clap-net (see Pl. xxxiii.): spearing with the bident, he transfixes thirty fish; how delightful is the day of hunting the hippopotamus!"

Scenes (cont.)

SOUTH WALL. (See Key plan L, and Pl. xxxv.)

The scene, arranged in five rows of unequal height, shows priests performing services [E and F], members of Chnemhotep's family [G, J-M], and officers and servants of the household [H, N, O-Q], bringing offerings to lay before their lord [A], who is seated in front of an altar [C], upon which are numerous offerings. Above the figure of Chnemhotep are five vertical lines of hieroglyphs, giving several of his titles, and above the altar is a list of the offerings presented (fifty-three in all). In the bottom row [R, S] are officers and servants slaughtering oxen.

SHRINE.

(Plates XXXVI. and XXXVII., and Key Plan, M-S.)

Ceiling.

Frieze.

Dado.

The ceiling is ornamented with small red and yellow squares, containing quatrefoils, \d , which are black in the red squares and blue in the yellow (compare the pattern in Pl. vi., Tomb 2).

The frieze consists of the usual chaker of painted red, blue and green. Beneath this ornament and at the sides of the walls is a border of coloured rectangles (yellow, red, blue and green), separated by black lines enclosing a white line, which forms a framing to the scenes.

The dado has been elaborately decorated (in colour only), but is now much faded and damaged. Over a narrow base, painted to imitate red granite, is painted panelling which consists of small representations of folding doors, in yellow with red framework and cross lines. The spaces between the doors are divided into narrow vertical strips, filled in with very small green and yellow squares, and with green lines on a red ground, narrow lines of green and yellow, &c., &c. Immediately above the false doors are eight horizontal divisions, filled in with various patterns, such as wavy lines, squares arranged diagonally, very small green and yellow and black and white squares, &c. Over the spaces between the false doors the patterns are somewhat simpler, consisting of coloured squares, etc. The dado is surmounted by two broad bands of yellow and red. The colours used are red, blue, yellow, green, and black, and the ground appears to have been a warm light-coloured grey. Most of the patterns have been outlined in black.

Sculptures and Paintings. EAST WALL. (Key plan, O-Q.) In the centre [P] there formerly existed a colossal figure of Chnemhotep, seated on a throne and carved out of the solid rock. The whole of the body, arms, and legs of the statue have been destroyed, but the throne is fairly preserved. Flanking this figure is: (a) on the

left-hand side [O], an incised and painted portrait (much mutilated) of Cheti, Chnemhotop's wife, above whom were several vertical lines of hieroglyphs, of which only the first signs of the first line (an now be distinguished; (b) on the right-hand side [Q], two incised and painted portraits of women, one of whom, according to a mutilated inscription above, was Bakt, Chnemhotep's mother.

NORTH WALL. (See Pl. xxxvi., Key plan, N.) Immediately below the frieze is a line of painted hieroglyphs » giving the stn htp di 'Inp formula. Beneath is a scene showing three daughters of Chnemhotep (named respectively, Bakt, Thent, and Meres) approaching the statue of Chnemhotep on the East Wall.

WEST WALL. (See Pl. xxxvi., Key plan, M and S.)

- (a) North side. A standing figure of the sahutet Djat.
- (b) South side. Too much defaced to show the scene.

South Wall. (See Pl. xxxvii., Key plan, R.) Immediately below the frieze is a line of painted hieroglyphs « giving the stn htp di 'Isir formula. Beneath is a scene representing five of the sons of Chnemhotep (named respectively, Necht, Chnemhotep, Nehera, Neternecht, and Chnemhotep) approaching a table of offerings before the statue of Chnemhotep on the East Wall. Behind the sons are three officers, the sahu Bakt, the sahu Chnemhotep, and the lector Hormaacheru.

Additions and Corrections

ADDITIONS AND CORRECTIONS TO TOMB No. 3.

P. 56. Great Inscription. The dado appears to be 48 inches high; the inscription occupies a depth of 28 inches at the top, and the false door reaches to the floor (Hay).

P. 67. Paintings. The arched spaces over the frieze, formed by the curved ceilings of the aisles, are filled with chequer and other patterns (see L. D. ii. 130, confirmed in part by Hay).

Plates xxix.-xxx, xxxii.-xxxv. from Hay and Lepsius, with some corrections on the spot, are the least successful in the book, the figures and hieroglyphs being much conventionalized and altered.

Pl. xxix. North half. Row 1. Tools on box in front of saw. Row 2. Only two patches of stalks; patch on left continues further to right, as far as foot of second man, and the large one on right is continuous. Row 4. Ropes omitted from rigging of ship; in funeral barge below hand of sm, and &r &b carries inscribed sheet (Ch. N. D. ii. 405). Row 5. Three monkeys are on the tree from which fruit is being plucked.

Pl. xxx. Row 3:

mr tst: over large figure mnmnt determinatives (1) ox, (2) goat, (3) ass. at bottom of next line omitted by Hay and Lepsius, but correctly in Ch. Not. ii. 412, an added sign.

Pl. xxxiii. Detail of pool flanked by two trees with birds is quite perfect and very beautiful. Omit the lines drawn across the central column of hieroglyphs on the architrave, and on right read without line.

Pl. xxxiv. Small animal on left of flowers has long tail pointing upwards; in the inscription read and =

Pl. xxxv. Hrlb behind sm holds roll of papyrus in left hand. Many details of offerings incorrect: stick of Chnemhotep's feather flap terminates in a hand. Bottom row Pl. xxxviii. 2. A specimen of the later graffiti from east end of the main chamber. Ch. Not. ii. 423-4, L. D. vi. 22.1.

ARCHITECTURAL FEATURES AND INSCRIPTIONS.

Architectural Features. The tomb consists of a small rectangular chamber cut in the side of the cliff, the doorway to which has plain square jambs and lintel. The plan and sections are given on Pl. xli. There is one mummy pit.

Inscriptions. EXTERIOR INSCRIPTIONS (see Pl. xli. a, b, and c). On the door-posts and lintel of the entrance to the main chamber are three incised hieroglyphic inscriptions, consisting in all of eight lines, and giving the name and titles of Chnemhotep. The texts of these inscriptions, of which the following is a transliteration and translation, have been published by Champollion (Monuments, Notices, Tome ii., p. 436) and by Lepsius (Denkmäler, Abth. ii., Bl. 142, a and c).

On the lintel are four horizontal lines reading:-

GENERAL DESCRIPTION OF THE TOMB.

KEY PLAN.

ARCHITECTURAL FEATURES.

(See Plates XLII. and XLIII.)

The façade of the tomb is cut into the side of the cliff, and in this is hewn a huge plain doorway,

Fagade.

Main
Chamber.

without architectural features (see Pl. xlii.) In plan the main chamber is rectangular and nearly square, and the east end was divided off by two columns (of the lotus bud type, see p. 3 and Beni Hasan, Part ii., Pl. x.). These columns were surmounted by a plain architrave running transversely to the axis of the tomb; of all this the architrave with remains of abaci attached, and the circular bases (of a rounded section) still exist. Where the architrave abuts against the walls are antae of very slight projection. The rock ceiling is slightly "cambered" in the form of a very flat arch. In the north-western corner occurs a slight "break" or projection (6"), owing to the rock being too thin at this point to allow of the wall being carried through in the same vertical plane. There are two mummy-pits to the tomb; one in the south-west corner of the main chamber, the other in the north-east corner; neither of them have been

cleared.

INSCRIPTIONS.

Inscriptions. HISTORICAL INSCRIPTION (see Key plan B, and Pl. xliv.). This inscription is painted on the southwest wall of the main chamber. Hardly a hieroglyph is now distinguishable without a very close and minute examination of the wall in a good light. The first two lines record titles of Chnemhotep [I.] and his noble qualities. After this follows an address to visitors and prayer for funereal offerings. In line 5 occurs the prenomen (see Key plan B, and Pl. xliv.) of Amenemhat I., and a naval expedition to is recorded. In line 7 it mentions that the king created Chnemhotep (Ha-prince of the town of Menat Chufu," for certain services which he had rendered the king.

PAINTINGS.

Paintings and Scenes.

The paintings are much faded, and in most cases can only be made out with great difficulty. The figures appear to have been boldly drawn, and the execution of the work bears a very close resemblance to that in Tomb No. 15.

West Wall. (a) South side. The upper half of this wall is occupied with the historical inscription figured on Plate xliv. Upon the lower half are traces of a boating scene too much destroyed to copy.

- (b) North side. Upon the upper half of this wall are traces of painted figures of women wearing necklaces, and in the left-hand corner are remains of a false door, upon which are painted three mutilated inscriptions:—
 - 1. Gives the Di htp stn 'Isir formula.
 - 2. Gives the Di htp stn 'Inp formula.
 - 3. Gives the prayer for percheru offerings to the ka of the imih hr Ḥrw ḥ rhyt "" devoted towards Horus smiter of the Rechit ..."

NORTH WALL. West side of pilaster (see Pl. xlvi). Along the top of the wall are traces of a chaker ornament, immediately beneath which is a horizontal line of painted hieroglyphs giving the Di htp stn 'Isir formula. Beneath this is a scene showing men hunting in the desert. Below are remains of five rows of paintings. In the topmost of these is a wine-press and some vascs. In the second and third are priests and men bringing offerings to lay on an altar which is figured immediately before large standing figures of Chnemhotep [I.] and his wife Satap. Above the figure of Chnemhotep are two horizontal lines of hieroglyphs (much mutilated), giving the name and several titles of Chnemhotep ms 1 n Bikt "born of Bakt." Behind the standing figure of Chnemhotep's wife is a vertical line of hieroglyphs giving her name and titles.

On the pilaster are traces of male and female attendants.

¹ The upper part of the female figure reading ms is effaced.

Paintings and Scenes (cont.) East side of pilaster. The paintings here can only with great difficulty be made out. At the top of the wall is a line of painted hieroglyphs reading

Below is a hunting scene, much mutilated.

EAST WALL. (Pl. xlvii.) The paintings here also are much mutilated, and the fragmentary scenes given on Pl. xlvii. are all that can now be traced from them. Along the top of the wall, immediately beneath a chaker frieze, is the following painted inscription:—

The scenes below are arranged in six rows. The first three show wrestlers in different attitudes. The bottom rows show soldiers attacking a fortress; and an interesting group of foreigners (Libyan), who are being led by an Egyptian superintendent, are figured at the south end of the fourth row (see Pl. xlvii. and Pl. xlv.).

SOUTH WALL. None of the paintings can be traced, though there are patches of colour here and there and a painted inscription in small green hieroglyphs reading $\{ A \}$

Additions and Corrections

ADDITIONS AND CORRECTIONS TO TOMB No. 14.

The above inscription, unfortunately not included in the Plate, contains several curious hieroglyphs. The above inscription, unfortunately not included in the Plate, contains several curious hieroglyphs. The supporting a cynocephalus-ape by the fore-legs, erect and facing him. It is for the usual determinative of Hathor wearing disk and horns, and holding the supporting a compound sign, a peculiar forked object upon the sign The oryx in the nome sign stands upon a mere line.
