

Contribute to a top 10 website.

*MediaWiki, the software
that powers Wikipedia,
is looking for contributors.*

So, about these mad coding skillz of yours.

How about you put them to good use to:

- create a tool to show and edit music sheets in Wikipedia?
- improve support for RTL languages?
- find test cases for our new parser?
- fix an Annoying Little Bug?

Not a coder?

You can help by:

- testing MediaWiki
- validating bugs
- supporting other users
- spreading the word.
