<sup>1</sup> This table, containing material available in 1936 for the first time, is given here by way of interpretation of the historical tables. Since the table contains data by ages, these ages can be considered in terms of the dates at which the persons were of school age. Thus those from 10-24 in 1936 were at school age in 1931, and so on, and although some of these were not in the province at these dates, the information is still useful.
