UNIQUE EVENTS IN 1914.

UNUSUAL happenings reported in 1914 were as follows:

WHAT is believed to be the smallest colt in Kansas was born on the farm of William Stafford, near Iola, Kan. It weighed 16 pounds and stood 14 inches high.

Mrs. Maud Vincent of Columbus, Ohio, possessed two distinct and well-formed appendices. Both were so badly inflamed that they had to be removed.

Quadruplets, three boys and a girl, were born on March 4 to Mrs. Corbett Coplinger, wife of a farmer in Flatwood, Tenn.

A record catch of Spanish mackerel was made at the last jettty in Sabine, Tex., October 3, by Messrs. Glenn Horne, W. S. Horne, P. E. Krebs and P. C. Felder, who landed 250 pounds of mackerel within two hours, during which time Glenn Horne reeled in a 35-pound tarpon.

Mrs. Hyman Schuster of Denver, Col., gave birth to triplets on March 9.

Everly Jacobs of Charleroi, Pa., was discharged from a hospital in Pittsburgh, Pa., with 80 square inches of new grafted skin. While employed in a mill he was burned and his father and nine friends gave the cuticle which saved his life.

A king snake in combat with a moccasin squeezed the life out of the latter and then swallowed the dead snake.

Indiana's smallest baby, the midget daughter of Mrs. W. B. Morrison, which weighed two pounds at birth, died at the age of 10 months, weighing eight pounds.

In a trial held in San Francisco, Cal., Lasher B. Gallagher, twenty years old, a stenographer, wrote 284 words a minute.

In Elizabeth, N. J., an apple tree had a sec-

ond crop of blossoms in October, owing, it was thought, to the dumping of mash, used in an illicit distillery, on the ground near the tree.

Henry C. Fitzgerald, an American who shot himself in London, was said to have had eight wives, all living.

Capt. Abe Hatteny of Giffords, Staten Island, N. Y., caught a 325-pound sturgeon, nine feet in length.

Suzanne and Madeline, the "Siamese" twin girls, four months old, who were joined together in the region of the stomach, face to face, had their hands swathed with cotton to prevent them from scratching one another and were operated on by a Paris surgeon and separated. Maria and Maria Ann, who had been joined together since birth by a ligament at the base of the vertebrae, were separated by an operation performed by Dr. Mignot.

Dr. George W. Crile of Cleveland, Ohio, in an address said he had kept some subjects "alive" eleven hours after the heads had been cut off.

A newly-born girl weighing only 17 ounces was taken to Bellevue Hospital, New York City.

William W. Taylor, Jr., 11 years old, of Montclair, N. J., against a strong wind and in rough water, swam across Greenwood Lake and made the distance in 34 minutes.

It was published that Ferdinand Eglinski, aged 53, a tailor of Ahlbeck, Germany, who married successively two sisters, had 35 children, 26 of whom are still living—nineteen boys and seven girls.

It was reported in Baltimore, Md., that sight had been given to the left eye of David Kane,

nine-months-old child of Mrs. Herman Kane of Gettysburg, Pa., through the grafting of the cornea of a pig's eye to the child's eyeball. The disease from which the child suffered is known as staphyloma of the cornea.

Mme. Theodore Amet, the mother of 22 children, all of whom are living, was proposed to President Polcaré for the Cross of the Legion of Honor.

It was discovered that a male inmate, 19 years old, of a hospital at Interlaken, Switzerland, had two stomachs.

Scoring five and a half hits out of seven shots, the cruiser California established a new world's record for torpedo firing, off the coast of San Diego, Cal. The firing was at a range of 3,000 yards, the cruiser steaming 10 knots an hour.

H. P. Nelson, at Astoria, Ore., caught the largest royal Chinook salmon, weighing 87 pounds.

Henry F. Washburn is said to be the largest man in White County, Ind. He is 23 years old, 6 feet 1-2 inches tall and weighs 400 pounds.

Charles Carter, at Warsaw, Ind., landed a pike measuring 44 inches in length and weighing 17 pounds.

S. H. Adkisson of Nashville, Tenn., displayed a sweet potato which weighed four pounds.

Mrs. Bertha Drury, wife of a farmer in Taylorville, Ky., gave birth to five children on February 12.

Isaac Cooley, who died in Escambia County, Fla., March 16, was reputed to be 114 years old. He had more than 100 grandchildren.

Making a new record in target practice with big guns, the battleship North Dakota, on October 23, at Norfolk, Va., made 53 hits out of 60 shots with 12-inch guns at long range. The best work was made when her gunners fired 12 shots in two minutes and 35 seconds, making 12 hits.

A watermelon 25 inches long and 31 inches in circumference at its mid-section and 53 inches in circumference at its ends was raised in a rose-bed.

Joe Murray of Westville, Ct., owned a cat which had two noses, two mouths and three eyes. Both mouths had to be fed.

Mrs. Marshall Tanner displayed her children in a Brooklyn, N. Y., police station. They were Allen, three and one-half years old, weighing 173 pounds; Maynard, two years old, weighing 82 pounds; Harold, five years old, weighing 187 pounds, and Doris, six months old, weighing 63 pounds. Mrs. Tanner declared that her other child, Mary, was seven years old when she died, and weighed 302 pounds.

Prof. Tuffler, in Paris on May 27, revealed a sturdy individual with a thick, black beard reaching to the waist, but the personage was really a woman. She possessed all the feminine attributes until the age of 40, when she began to assume a masculine aspect owing to what the professor termed "extraordinary hypertrophy of the cerebro-natal glands." In addition to a beard, the woman has developed muscles like a boxer.

THE BLIND.

THE total number of blind in the United States in 1910 was 57,273,—whites, 47,566; negroes, 8,849; males, 32,443; females, 24,830; native-born whites, 37,647; foreign-born whites, 9,939; Indians, 805; Chinese, 23; other colored, 10.

THE DEAF AND DUMB.

THE total number of deaf in the United States in 1900 was 89,287, of this number 51,871 were deaf from childhood. The total includes 51,861 persons not totally deaf. The number of males among the deaf was 46,915 and the number of females, 42,372; 84,361 were white and 4,926 colored; of the whites, 69,865 were natives, 13,786 were foreign-born, while for 710 the nativity was not reported. At the census of 1910 the number of persons returned as deaf and dumb was 44,519.

THE FEEBLE-MINDED.

THE number of feeble-minded in institutions on January 1, 1910, was 20,731, on January 1, 1905, the number was 15,318. The total number of feeble-minded in the United States has been estimated at not less than 150,000. Of the feeble-minded in institutions 47.2 per cent. were under twenty years of age, and 76.4 per cent. were under thirty years of age.

THE INSANE.

From a report for 1908 issued by the Commissioner of Immigration, the number of inmates of institutions for the insane in the United States were: Aliens, 25,610; naturalized citizens, 25,130; native-born persons, 121,450; total, 172,190. These figures include 100 insane persons in institutions in Alaska, 210 in Hawaii, and 340 in Porto Rico.

The total number of insane in the United States enumerated at the Census of 1890 was 106,485, of whom 74,028 were in hospitals. In the collection of statistics of the insane in 1903 (Census Special Report), only the insane in hospitals were considered. These had increased to 150,151 on December 31, 1903, and to 187,791 on January 1, 1910 (a ratio of 204 per 100,000 population). The number of hospitals for the insane increased from 162 in 1890 to 328 in 1903 and to 367 in 1910.

In 1910 the number of insane males in hospitals was 98,695, and insane females 89,096. The maximum concentration was on the ages from thirty-five and forty-nine years. Female insane live longer than male insane, and white insane than negro insane.

More than one-eighth, 12.7 per cent. of the hospital insane had been inmates less than one year, more than one-tenth, 10.8 per cent. had been in hospitals at least twenty years, 21.7 per cent. were engaged before admission in manufacturing and mechanical pursuits; 20.7 per cent. in agriculture; 14.9 per cent. in domestic service; 7.6 per cent. in trade and 5.3 per cent. in professional service. Of the hospitals for the insane, 250 were public and 117 private in character.

The number of insane persons in England and Wales in 1908, according to Webb-Mullhall, was 126,084, or 356.7 per 100,000 population—Germany (in 1901), 120,870; France (in 1906), 94,400; Belgium (in 1905), 16,940; Holland (in 1906), 9,670.

MOTHER'S DAY.
SECOND SUNDAY IN MAY.

Its object—An all-nations' and simultaneous observance for the well-being and honor of the home.

How observed—Through some distinct act of kindness, visit, letter, gift or tribute, show remembrance of the Mother and Father to whom grateful affection is due. Mother's Day is equally a Father's Day, and is designed to deepen and perpetuate all family ties. The day is so-called because in most countries no national celebration is in special honor of the home and noble motherhood.

Its slogan—In honor of "The Best Mother Who Ever Lived" the mother of your heart. The badge is a white carnation. Time of observance is the second Sunday in May by churches of all creeds, etc. Schools celebrate on Friday, and business and other organizations on Saturday preceding second Sunday in May.

On May 10, 1913, a resolution passed the United States House of Representatives and the Senate commending Mother's Day for observance by the House and Senate, the President of the United States and his Cabinet and other heads of Government departments. In 1913 the Legislature of Nebraska made Mother's Day a State flag day in honor of the patriotism of Nebraska's true homes and mothers.

In 1914, Hon. J. Thomas Heflin, at the request of the founder of Mother's Day, Miss Anna Jarvis, introduced in the House of Representatives a joint resolution (which was agreed to) whereby the President of the United States should designate, through an annual proclamation, the second Sunday in May as Mother's Day, and "request the display of the American flag on all Government buildings, homes and other suitable places."

President Woodrow Wilson issued the first national Mother's Day proclamation on Saturday, May 9, 1914, asking that Sunday, May 10 (second Sunday in May, 1914), be observed as Mother's Day in accordance with the joint resolution of the House of Representatives. This official recognition of Congress of the Mother's Day Movement was the culmination of years of work to permanently establish a day for sons and daughters of all lands to honor their homes. The United States is the first nation of the world to give such a national, patriotic honor and tribute to its homes as "the fountain head of the State," and to its sons and daughters "for their work for the home, moral uplift and religion" for the good of the Government and humanity.

For several years it has been the custom of the Governor of almost every State in the Union to issue a Mother's Day proclamation, asking citizens, churches, homes, and organizations to enter into the spirit of the day. Since 1912 Governor Colquitt of Texas has made it a practice to pardon a number of prisoners on Mother's Day.

MOTHER'S DAY INTERNATIONAL ASSOCIATION—This association was organized to promote and protect the celebration of Mother's Day and its work in the United States and foreign countries. Any son or daughter of any country is eligible to membership in the Mother's Day Association.

In the United States the association has among its honorary national officers President Wilson and ex-Presidents Roosevelt and Taft, and Governors, or other prominent citizens of the various States. Miss Anna Jarvis, 2031 N. 12th Street, Philadelphia, is the active President.

FATHER'S DAY.

The State of Delaware in 1913 granted a charter to Charlotte K. Kirkbride and B. Carrie Sternberg and others for the celebration under the laws of that State of "Father's Day" on the first Sunday in June of each year. In accordance with the request of these incorporators, Representative J. Hampton Moore of Pennsylvania, on October 2, introduced a bill in Congress providing that: "The first Sunday in June in each and every year hereafter be designated as Father's Day, upon which, as an expression of sentiment corresponding to that of Mother's Day, the rose, irrespective of color, shall be regarded as the emblem."

VITALITY OF LAST CHILDREN.

The old belief, still common among the laity, that first-born children are endowed by nature with greater vitality and longevity than last-born, has induced Dr. Alfred Ploetz of Munich, Germany, to make an exhaustive study to ascertain if this were true. He compiled the returns from a very large number of families of the nobility, and his figures show, generally speaking, that the vitality of first to ninth-born children varied very little, but that from the tenth to the nineteenth-born the mortality was markedly greater. Dr. Ploetz's figures, published in the "Archiv für Rassen und Gesellschafts-Biologie," appeared in a recent issue of the Journal of Heredity of the American Genetic Association.

In the following table Dr. Ploetz has made groupings of first-born children, second-born, and so on, and it was his object to find out how many of these died before the fifth year. Order of birth, number of children, and per cent. died, as follows:

First-born	614	26.4	Fifth-born	311	26.0	Tenth to nineteenth-	
Second-born.....	539	24.9	Sixth-born.....	249	26.1	born.....	302 34.4
Third-born.....	455	26.4	Seventh to ninth-				
Fourth-born.....	386	25.6	born.....	463	26.3		3,319 26.7

WILLS.

A WILL OR TESTAMENT is a final disposition of a person's property, to take effect after his death. A codicil is an addition or alteration in such disposition. All persons are competent to make a will except idiots, persons of unsound mind, and infants. In many States a will of an unmarried woman is deemed revoked by her subsequent marriage. A nuncupative or unwritten will is one made orally by a soldier in active service, or by a mariner while at sea.

In most of the States a will must be in writing, signed by the testator, or by some person in his presence, and by his direction, and attested by witnesses, who must subscribe their names thereto in the presence of the testator. The form of wording a will is immaterial as long as its intent is clear.

AGE at which persons may make wills is in most of the States 21 years. Males and females are competent to make wills at 18 years in the following States: California, Connecticut, Hawaiian Islands, Idaho, Montana, Nevada, North Dakota, Oklahoma, South Dakota, Utah; and in the following States only females at 18 years: Colorado, District of Columbia, Illinois, Maryland, Missouri, Washington, Wisconsin.

In the following States persons of 18 years may dispose of personal property only: Alabama, Arkansas, Missouri, Oregon, Rhode Island, Virginia, West Virginia; in Georgia any one over 14 years and in Louisiana any one over 16 years is competent to make a will. In Colorado persons of 17 years, and in New York males of 18 and females of 16 years may dispose of personalty. **WITNESSES**—Most of the States require two witnesses, except in Connecticut (3), Maine (3), Massachusetts (3), New Hampshire (3), South Carolina (3), Vermont (3).

HUMAN CREMATIONS IN AMERICA.

(From the institution of the first crematory in 1876 down to and including the year 1913. Compiled for the Cremation Association of America by Harry G. Samson, Secretary, Pittsburgh, Pa.)

THE FOURTH INTERNATIONAL CONGRESS OF SURGERY.

(Held in New York City, April 13-16, 1914.)

The International Congress of Surgery holds its meetings triennially. The previous meetings had been held in Brussels. The membership of the congress is limited, a certain proportion being assigned to each country, and these are nominated by a special committee from each country. The change of meeting place, as also the less convenient time, the Spring, chosen, gave rise to apprehension regarding the success of the congress. The attendance was somewhat smaller than previous meetings, but it was the unanimous opinion that the congress fully equalled its predecessors in importance, interest, and results accomplished. The President of the congress was Prof. Antoine Depage of Brussels; the Chairman of the International Committee, Prof. Charles Willems of Ghent; the General Secretary, Prof. L. Mayer of Brussels; the Local Secretary, Dr. J. P. Hoguet of New York; the American Committee, Dr. L. L. McArthur of Chicago, Chairman; Dr. C. L. Gibson of New York, and Dr. R. H. Harte of Philadelphia.

The congress was opened by an address of Surgeon-General W. C. Gorgas, who spoke on Sanitation in the Tropics. Addresses were also made by Dr. William J. Mayo, President of the American Surgical Association, Prof. Willems, and Dr. McArthur and President Depage, who spoke on the surgery of war, giving an outline of the experience gained in the Balkan wars and recommending international agreements for the more humane conduct of war. The scientific work of the congress was limited to the discussion of three main subjects:

First, *Technique of Amputations*—The discussion was introduced by papers from Witzel of Düsseldorf, Kuzmlik of Budapest, Binnie of Kansas City, Ranzl of Vienna, Durand of Lyons, and others. The trend of opinion was toward the necessity of extending the field of conservative surgery and the improvement desirable in prosthetic apparatus. Bunge's method, resulting in painless leg stumps, was much favored, and the wonderful artificial arms exhibited by Binnie attracted much attention.

Second question, *Ulcers of the Stomach and Duodenum*—This topic was introduced by papers of De Quervain of Bâle, Hartmann and Lecene of Paris, W. J. Mayo of Rochester, Minn., and Fayr of Leipzig, and gave rise to very animated discussion by Lambotte of Antwerp, Sonnenburg of Berlin, Bevan and Murphy of Chicago, Rodman of Philadelphia, Gerster and Gibson of New York. This question is one of great interest and importance to-day, and was particularly valuable in bringing the sometimes conflicting views of the European surgeons on one side and the Anglo-Americans on the other. It was generally agreed that the diagnosis of duodenal ulcer is far from being so accurate as used to be believed. Warnings were heard against misinterpretation of radiographs. The unreliability of statistics of medical treatment was emphasized, and the formal exclusion of the pylorus after gastroenterostomy did not find favor. It was also brought out that the proportion of duodenal ulcers seen in America was much larger than those occurring in Europe.

Third question, *Grafts and Transplantation of Organs*—This subject was introduced by Morestin of Paris, Villard of Lyons, Ullman of Vienna, Lexer of Jena, and Carrel of New York. This question again excited the greatest interest and represented the very latest developments of this very modern work. The report of Lexer was particularly valuable and was one of the most striking demonstrations of the congress. The subject was further elaborated by the discussions of Murphy of Chicago, President Depage, Leonte of Bucharest, Stelthal of Stuttgart, Freeman of Denver, Porter of Boston, and McKenzie of Portland, Ore. The discussion was particularly valuable in demonstrating the enormous and recent progress of this department of surgery and clearing up a good many cloudy and inexact views. It demonstrated particularly the great progress realized in reparative surgery and arthroplasty. On the other hand, it was shown, particularly by Carrel and Ullman, that the transplantations of organs, with the exception of arthroplastic implantations, have to-day no actual value.

The scientific work of the congress was supplemented by numerous clinics and demonstrations in New York City. Subsequently the foreign members made an excursion to Philadelphia, Baltimore, Chicago, Montreal, and Boston, where they were given many opportunities for an intimate appreciation of American surgery and institutions.

The next congress is scheduled to be held in Paris, September, 1917, under the Presidency of Dr. W. W. Keen of Philadelphia. The following subjects will be considered: Surgery of the Heart and Blood Vessels, including Thrombosis, Embolism, and Blood Transfusion; the Treatment of Tumors with X-Ray and Radium; Examination of the Blood and Biological Reaction in Surgical Disease; Fracture of the Lower Leg and Ankle. Additional: Diagnosis and Treatment of Tetanus.

THE AMERICAN MEDICAL ASSOCIATION SESSION OF 1914.

(BY V. C. VAUGHAN OF THE UNIVERSITY OF MICHIGAN.)

THIS association held its sixty-fifth annual session at Atlantic City, N. J. The keynote of all their work was the advancement of scientific discovery and the utilization of facts thus learned in the cure and prevention of disease. The presidential address on "The Service of Medicine to Civilization" was a historical review in which it was shown that so long as a people remain in comparative health, it develops intellectually and morally, but when borne down by pestilence, man tends to lapse into barbarism. Disease has been a most potent factor in the overthrow of the civilizations of the past, and there is no surety that it may not have a like effect in the future. A full-time health officer in every densely populated county was recommended. This man should have a laboratory and competent assistants in both scientific and field work. He should find every case of infectious disease and of feeble-mindedness in his jurisdiction. The complete eradication of every infirmity of body, mind, and morals should be the object. If medicine is to render its highest and best service, the time must come when all citizens will seek a thorough physical examination once a year or oftener, and disease should be prevented or detected while yet curable. In the past century fifteen years have been added to the average of human life, and a like addition could be secured were well established hygienic laws obeyed.

Marked advances in our knowledge of immunity, metabolism, and pathology were reported. The action of medicine and vaccines in cancer was discussed, and while no definite conclusions have been reached, workers are confident that important progress has been made. The consensus of opinion among those best informed is that surgical procedure is the only reliable treatment of cancer at present, and that since cancer always begins as a local disease, its early recognition is of the greatest importance. Radium, so far, has proved of value only in epithelioma and other superficial manifestations of malignancy. Vaccines have apparently proved of value in the prevention of return and metastasis after surgical operation. Any person, especially any one over forty years, with the slightest suspicion of a tumor should consult a competent medical man.

The etiology of pellagra thus far remains unsolved; but research is being carried on and progress has been made. Vaccination for typhoid fever, tried on a large scale in the United States of America, has proved highly efficient.

BENEVOLENT INSTITUTIONS IN THE UNITED STATES.

(From a Report issued January 29, 1914, by the Census Bureau, based on the Thirteenth Census.)

Of the total number of 5,408 benevolent institutions reported in the United States in 1910, 2,492, or 46 per cent., were institutions for the sick; 1,435, or 27 per cent., were institutions for the care of children; 1,151, or 21 per cent., were homes for adults or adults and children; 205, or 4 per cent., were societies for the protection and care of children; and 125, or 2 per cent., were institutions for blind and deaf.

Not all these institutions reported inmates at the close of 1910, but in the 4,420 that did make such report there were 339,571 inmates, of whom 116,228, or 34 per cent., were in homes for adults or adults and children; 111,514, or 33 per cent., were in institutions for the care of children; 96,390, or 28 per cent., in institutions for the sick, and 15,439, or 5 per cent., in institutions for blind and deaf.

A total of 2,960,000 persons of all classes were received in 4,815 of these benevolent institutions during the year 1910, 1,953,000, or 66 per cent., of whom were received in institutions for the sick, the remaining 33 per cent. being divided among the other three classes of institutions. In this connection the report calls attention to the fact that among persons received in these institutions there were a number who were only indirectly recipients of benevolence, being pay inmates who met the regular charges for treatment.

All classes of benevolent institutions in the United States reported in 1910 for 4,281 institutions a total income of \$118,380,000, with expenses of \$111,498,000; while 3,871 showed property valued at \$643,878,000. This income of \$118,380,000 was divided among the different classes of institutions as follows: Hospitals, 60 per cent.; homes for adults or adults and children, 20 per cent.; institutions for the care of children, 16 per cent.; institutions for the blind and deaf, 5 per cent.; societies for the protection and care of children, 2 per cent.; dispensaries, 1 per cent.

Benevolent institutions in New York State reported a total income of \$28,000,000; in Pennsylvania, of \$15,000,000; in Illinois, \$12,000,000; in Massachusetts, \$7,000,000; and in California, \$5,000,000. New York reported the valuation of its benevolent institutions at \$188,000,000; Pennsylvania, \$117,000,000; Massachusetts, \$62,000,000; Ohio, \$34,000,000; Illinois, \$30,000,000; and California, \$16,000,000.

The number of institutions for the blind and deaf in the United States in 1910 was 125, of which 72 were State and 53 were private. The total number of inmates at the close of that year was 15,439, of whom 10,658 were in State institutions and 4,781 were in private. The valuation of the property of these institutions was reported as being \$33,160,000 at the close of 1910. The institutions for the blind and deaf, under private management, are almost entirely in the Eastern States, chiefly Massachusetts, New York, and Illinois. One institution alone in Massachusetts, the Perkins Institution for the Blind, reported 292 of the 794 inmates for that State.

FOURTH OF JULY ACCIDENTS.

THE *Journal of the American Medical Association* has kept a record of the accidents in the United States, due annually to the celebration of Independence Day.

The decrease from 466 deaths in 1903 to 32 in 1913 was due to more intelligent methods of celebration, the most marked decrease taking place in States where the agitation for restrictive measures was strongest.

Legislation of New York in 1914.

LIST OF THE MORE IMPORTANT LAWS PASSED BY THE NEW YORK STATE LEGISLATURE OF 1914.

THE Legislature of New York in 1914 in addition to passing laws, approved of a proposed amendment to the Constitution, amending section 4 of Article VII. of the Constitution by adding to it the following provision:

In case any annual tax heretofore imposed for the payment of a debt authorized by vote of the people under the Constitution will, if continued, provide for the payment of the interest on such debt as it falls due and also the payment of the principal of such debt before it becomes due, the Legislature may amend the law by reducing the rate of such tax provided that the same shall not be reduced below a sum sufficient to pay the interest on such debt as it falls due and also the principal of such debt when it becomes due.

The Supreme Court shall have jurisdiction to direct the Comptroller or any officer of the State to impose a tax sufficient to comply with the provisions of this section for the protection of any sinking fund of the State.

The above amendment must again be submitted to the Legislature before it is incumbent on the State officers to submit it to the people at the polls.

The list of the more important laws passed by the Legislature of 1914 is as follows:

Chapter 5—Amending the Election law by providing that nominations of party candidates for city offices to be filled at an election to be held at a different time from the general election, shall be made in the manner prescribed for party nominations for all offices to be filled at general elections, except that nominations shall not be made at the Fall primary and that the primary election for such nominations shall be an unofficial primary.

Chapter 7—Creating a commission to endeavor to secure appropriate Federal legislation to remedy existing conditions in the State as to the alien insane.

Chapter 16—Requiring that all premium rates of every employers' liability corporation or association except the State Insurance Fund, as administered by the State Workmen's Compensation Commission, shall be approved by the Superintendent of Insurance.

Chapter 21—Adding a new section to the Labor law by permitting a male child over twelve years of age, between the close of school and 6.30 P. M., and a male child over fourteen years, between 5.30 and 8 o'clock in the morning, to carry newspapers on a route in a city or village if the child is permitted to do no other work during that time. The District School Superintendent must issue the permits.

Chapter 28—Amends the Agricultural law by providing that the owners of animals condemned and slaughtered as provided in the act shall be entitled to interest on the amount due from and after thirty days of the time when the animals are slaughtered.

WAR TAX.

AN ACT TO INCREASE THE INTERNAL REVENUE, AND FOR OTHER PURPOSES' AS ENACTED BY CONGRESS AND APPROVED OCTOBER 22, 1914.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be levied, collected and paid in lieu of the tax of \$1 now imposed by law, a tax of \$1.50 on all beer, lager beer, ale, porter, and other similar fermented liquor, brewed or manufactured and sold, or stored in warehouse, or removed for consumption or sale, within the United States, by whatever name such liquors may be called, for every barrel containing not more than thirty-one gallons; and at a like rate for any other quantity or for the fractional parts of a barrel authorized and defined by law. Any person having possession of unaffixed stamps heretofore issued for the payment of the tax on fermented liquors shall present the same to the collector of the district who shall receive them at the price paid for such stamps by the purchaser and issue in lieu thereof new or imprinted stamps at the rate provided in this act.

SECTION 2. That upon all still wines, domestic and imported, when sold or offered for sale or consumption, there shall be levied and collected taxes as follows: On each bottle containing one-fourth pint or less, one-fourth cent; on each bottle containing more than one-fourth pint and not more than one-half pint, one-half cent; on each bottle containing more than one-half pint and not more than one pint, 1 cent; and on each bottle containing more than one pint and not more than one quart, 2 cents; and on still wines in all other containers, not herein specially provided for, the tax shall be at the rate of 3 cents per gallon.

That upon all domestic and imported champagne and other sparkling wines, and upon all artificially carbonated wines when sold or offered for sale or consumption, there shall be levied and collected taxes as follows: Upon each bottle containing one-half pint or less, 5 cents; on each bottle containing more than one-half pint and not more than one pint, 10 cents; on each bottle containing more than one pint and not more than one quart, 20 cents; and on all other containers at the rate of 20 cents per quart; and on all liqueurs, cordials, or similar compounds, domestic and imported, by whatever name sold or offered for sale, there shall be levied and collected a tax on each bottle containing not more than one-half pint, 1 1-2 cents; more than one-half pint and not more than one pint, 3 cents; more than one pint and not more than one quart, 6 cents; and on larger containers a tax at the rate of 24 cents per gallon.

All of the taxes imposed in the preceding paragraphs of this section shall be paid by stamps to be affixed to each bottle or container in which such still wines, champagne wines, carbonated wines, liqueurs, or cordials, or similar compounds are sold or offered for sale: *Provided*, That when such still wines, champagne wines, carbonated wines, liqueurs, cordials, or similar compounds, taxable under the provisions of this section, are sold or delivered by the producer, importer, or dealer in wholesale quantities to other dealers, including rectifiers, manufacturing chemists, and druggists, the dealer receiving and selling, or offering the same for sale or consumption to any person other than a dealer, shall affix thereto the stamps hereinbefore prescribed: *And provided further*, That the stamp tax herein imposed shall not be collected on any still wine used by any rectifier, manufacturing chemist, or druggist in the manufacture of any liqueur, cordial, or compound subject to any internal revenue tax imposed by this act.

The Commissioner of Internal Revenue shall cause to be prepared suitable and special stamps denoting the tax herein imposed, to be affixed and cancelled in such manner as he, with the approval of the Secretary of the Treasury, may prescribe; and in the absence of such stamps from any bottle or container containing wine, liqueur, cordial, or compound taxable under the provisions of this section, sold or offered for sale or consumption, shall be prima facie evidence that the tax thereon has not been paid, and all such wines, liqueurs, cordials, or compounds shall be forfeited to the United States.

There shall be levied and assessed against the maker or producer of all wines fortified under the provisions and conforming to the requirements of the sections of the Tariff act of October 1, 1890, a tax of 55 cents on each taxable gallon of grape brandy or wine spirits used by him in the fortification of such wines. Nothing herein contained shall be construed as exempting any still wines, cordials, liqueurs, or similar compounds from the payment of any stamp tax provided for in this section.

SPECIAL TAXES.

SEC. 3. That on and after November 1, 1914, special taxes shall be, and hereby are, imposed annually as follows, that is to say:

1. Bankers shall pay \$1 for each \$1,000 of capital used or employed, and in estimating capital surplus and undivided profits shall be included and computed on the basis of preceding fiscal year: *Provided*, That any postal savings bank, or savings bank having no capital stock, and whose business is confined to receiving deposits and loaning or investing the same for the benefit of its depositors, and which does no other business of banking, shall not be subject to this tax.

2. Brokers shall pay \$30: *Provided*, That any person having paid the special tax as a banker shall not be required to pay the special tax as a broker.

3. Pawnbrokers shall pay \$50.

4. Commercial brokers shall pay \$20.

5. Custom House brokers shall pay \$10.

6. Proprietors of theatres, museums, and concert halls, where a charge for admission is made, having a seating capacity of not more than 250, shall pay \$25; having a seating capacity of more than 250 and not exceeding 500, shall pay \$50; having a seating capacity exceeding 500 and not exceeding 800, shall pay \$75; having a seating capacity of more than 800, shall pay \$100. Every edifice used for the purpose of dramatic or operatic or other representations, plays, or performances, for admission to which entrance money is received, not including halls or armories rented or used occasionally for concerts or theatrical representations, shall be regarded as a theatre: *Provided*,

That whenever any such edifice is under lease at the passage of this act, the tax shall be paid by the lessee, unless otherwise stipulated between the parties to said lease.

7. The proprietor or proprietors of circuses shall pay \$100. Every building, space, tent, or area where feats of horsemanship or acrobatic sports or theatrical performances not otherwise provided for in this act are exhibited shall be regarded as a circus: *Provided*, That no special tax paid in one State, Territory, or the District of Columbia shall exempt exhibitions from the tax in another State, Territory, or the District of Columbia, and but one special tax shall be imposed for exhibitions within any one State, Territory, or District.

8. Proprietors or agents of all other public exhibitions or shows for money not enumerated in this section shall pay \$10: *Provided*, That this paragraph shall not apply to Chautauquas, lecture lyceums, agricultural or industrial fairs, or exhibitions held under the auspices of religious or charitable associations.

9. Proprietors of bowling alleys and billiard rooms shall pay \$5 for each alley or table. Every building or place where bowls are thrown or where games of billiards or pool are played, and that are open to the public with or without price, shall be regarded as a bowling alley or a billiard room, respectively.

10. Commission merchants shall pay \$20: *Provided*, That this provision shall not apply to commission houses run upon a co-operative plan.

TOBACCO DEALERS AND MANUFACTURERS.

SEC. 4. That on and after November 1, 1914, special taxes on tobacco dealers and manufacturers shall be and hereby are imposed annually as follows, the amount of such annual taxes to be computed in all cases on the basis of the annual sales for the preceding fiscal year:

Dealers in leaf tobacco whose annual sales or transfers do not exceed 50,000 pounds shall each pay \$6. Dealers in leaf tobacco whose annual sales or transfers exceed 50,000 and do not exceed 100,000 pounds shall pay \$12, and if their annual sales or transfers exceed 100,000 pounds shall pay \$24: *Provided*, That dealers in leaf tobacco whose annual sales or transfers do not exceed 1,000

Manufacturers of tobacco whose annual sales do not exceed 100,000 pounds shall each pay \$6.

100,000 to 200,000 pounds, \$12.	1,000,000 to 5,000,000 pounds, \$300.	10,000,000 to 20,000,000 pounds, \$1,200.
200,000 to 400,000 pounds, \$24.	5,000,000 to 10,000,000 pounds, \$600.	Exceeding 20,000,000 pounds, \$2,496.
400,000 to 1,000,000 pounds, \$60.		

Manufacturers of cigars whose annual sales do not exceed 100,000 cigars shall each pay \$3.

100,000 to 200,000, \$6.	1,000,000 to 5,000,000, \$150.	20,000,000 to 40,000,000, \$1,200.
200,000 to 400,000, \$12.	5,000,000 to 20,000,000, \$600.	Exceeding 40,000,000, \$2,496.
400,000 to 1,000,000, \$30.		

Manufacturers of cigarettes whose annual sales do not exceed 1,000,000 cigarettes shall each pay \$12.

1,000,000 to 2,000,000, \$24.	5,000,000 to 10,000,000, \$120.	50,000,000 to 100,000,000, \$1,200.
2,000,000 to 5,000,000, \$60.	10,000,000 to 50,000,000, \$600.	Exceeding 100,000,000, \$2,496.

In arriving at the amount of license tax to be paid hereunder, and in the levy and collection of such tax, each person, firm, or corporation engaged in the manufacture of cigars, cigarettes (including little cigars), or tobacco shall be considered and deemed a single manufacturer.

And every person who carries on any business or occupation for which special taxes are imposed by this act, without having paid the special tax herein provided, shall, besides being liable to the payment of such special tax, be deemed guilty of a misdemeanor, and upon conviction thereof shall pay a fine of not more than \$500, or be imprisoned not more than six months, or both, at the discretion of the Court: *Provided*, That the special taxes imposed by this act and payable during the special tax year ending June 30, 1916, shall be collected and paid proportionately for the period during which such taxes shall remain in force during said year.

SEC. 11. That any person or persons who shall register, issue, sell, or transfer, or who shall cause to be issued, registered, sold, or transferred, any instrument, document, or paper of any kind or description whatsoever mentioned in Schedule A of this act, without the same being duly stamped, or having thereupon an adhesive stamp for denoting the tax chargeable thereon, and cancelled in the manner required by law, with intent to evade the provisions of this act, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not exceeding \$50, or by imprisonment not exceeding six months, or both, in the discretion of the Court.

SEC. 12. That hereafter no instrument, paper, or document required by law to be stamped, which has been signed or issued without being duly stamped, or with a deficient stamp, nor any copy thereof, shall be recorded until a legal stamp or stamps, denoting the amount of tax, shall have been affixed thereto, as prescribed by law.

SEC. 13. That it shall not be lawful to record or register any instrument, paper, or document required by law to be stamped unless a stamp or stamps of the proper amount shall have been affixed and cancelled in the manner prescribed by law.

SEC. 14. That no instrument, paper, or document required by law to be stamped shall be deemed or held invalid and of no effect for the want of a particular kind or description of stamp designated for and denoting the tax charged on any such instrument, paper, or document, provided a legal documentary stamp or stamps denoting a tax of equal amount shall have been duly affixed and used thereon.

SEC. 15. That all bonds, debentures, or certificates of indebtedness issued by the officers of the United States Government, or by the officers of any State, county, town, municipal corpora-

tions, shall be exempt from the tax herein imposed on dealers in leaf tobacco.

Dealers in tobacco, not specially provided for in this section, whose annual receipts from the sale of tobacco exceed \$200, shall each pay 80 cents for each store, shop, or other place in which tobacco in any form is sold.

Every person whose business it is to sell, or offer for sale, manufactured tobacco, snuff, cigars, or cigarettes shall be regarded as a dealer in tobacco: *Provided*, That no manufacturer of tobacco, snuff, cigars, or cigarettes shall be required to pay a special tax as a dealer in manufactured tobacco, snuff, cigars, or cigarettes for selling his own products at the place of manufacture.

tion, or other corporation exercising the taxing power, shall be, and hereby are, exempt from the stamp taxes required by this act: *Provided*, That it is the intent hereby to exempt from the stamp taxes imposed by this act such State, county, town, or other municipal corporations in the exercise only of functions strictly belonging to them in their ordinary governmental, taxing, or municipal capacity: *Provided further*, That stock and bonds issued by co-operative building and loan associations, mutual ditch or irrigating companies, and building and loan associations or companies that make loans only to their shareholders, shall be exempt from the tax herein provided.

SCHEDULE A—STAMP TAXES.*

Bonds, debentures, or certificates of indebtedness issued on and after the first day of December, 1914, by any association, company, or corporation, on each \$100 of face value or fraction thereof, 5 cents, and on each original issue, whether on organization or reorganization, of certificates of stock by any such association, company, or corporation, on each \$100 of face value or fraction thereof, 5 cents, and on all sales, or agreements to sell, or memoranda of sales or deliveries or transfers of shares or certificates of stock in any association, company, or corporation, whether made upon or shown by the books of the association, company, or corporation, or by any assignment in blank, or by any delivery, or by any paper or agreement or memorandum or other evidence of transfer or sale, whether entitling the holder in any manner to the benefit of such stock, or to secure the future payment of money or for the future transfer of any stock, on each \$100 of face value or fraction thereof, 2 cents.

Upon each sale, agreement of sale, or agreement to sell, any products or merchandise at any exchange, or board of trade, or other similar place, either for present or future delivery, for each \$100 in value of said sale or agreement of sale or agreement to sell, 1 cent, and for each additional \$100 or fractional part thereof in excess of \$100, 1 cent.

That no bill, memorandum, agreement, or other evidence of such sale, or agreement of sale, or agreement to sell, in case of products or merchandise actually delivered at the time of sale or while in vessel, boat, or car, and actually in course of transportation, shall be subject to this tax, provided such bill, memorandum, agreement, or other evidence of such sale, or agreement of sale, or agreement to sell shall be accompanied by bills of lading or vouchers showing that the said products are actually in course of transportation as aforesaid.

Promissory notes, except bank notes issued for circulation, and for each renewal of the same, for a sum not exceeding \$100, 2 cents; and for

each additional \$100 or fractional part thereof in excess of \$100, 2 cents.

Telegraph and telephone messages: It shall be the duty of every person, firm, or corporation owning or operating any telegraph or telephone line or lines to make within thirty days after the expiration of each month a sworn statement to the collector of internal revenue in each of their respective districts, stating the number of despatches, messages, or conversations originated at each of their respective exchanges, toll stations, or offices, and transmitted thence over their lines during the preceding month for which a charge of 15 cents or more was imposed, and for each of such messages or conversations the said person, firm, or corporation shall collect from the person paying for the message or conversation a tax of 1 cent in addition to the regular charges for the message or conversation, which tax the said person, firm, or corporation shall in turn pay to the said collector of internal revenue of their respective districts.

Bond: For indemnifying any person or persons, firm, or corporation who shall have become bound or engaged as surety for the payment of any sum of money, or for the due execution or performance of the duties of any office or position, and to account for money received by virtue thereof, and all other bonds of any description, except such as may be required in legal proceedings, not otherwise provided for in this schedule, 50 cents.

Certificate of profits, or any certificate or memorandum showing an interest in the property or accumulations of any association, company, or corporation, and on all transfers thereof, on each \$100 of face value or fraction thereof, 2 cents.

Certificate: Any certificate of damage, or otherwise, and all other certificates or documents issued by any Port Warden, Marine Surveyor, or other person acting as such, 25 cents. Certificate of any description required by law not otherwise specified in this act, 10 cents.

Contract: Broker's note, or memorandum of sale of any goods or merchandise, stocks, bonds, exchange, notes of hand, real estate, or property of any kind or description issued by brokers or persons acting as such, for each note or memorandum of sale, not otherwise provided for in this act, 10 cents.

Conveyance: Deed, instrument, or writing, whereby any lands, tenements, or other realty sold shall be granted, assigned, transferred, or otherwise conveyed to, or vested in, the purchaser, when the consideration or value of the interest or property conveyed, exclusive of the value of any lien or encumbrance thereon, exceeds \$100 and does not exceed \$500, 50 cents; and for each additional \$500 or fractional part thereof in excess of \$500, 50 cents: *Provided*, That nothing contained in this paragraph shall be so construed as to impose a tax upon any instrument or writing given to secure a debt.

Entry of any goods, wares, or merchandise at any custom house, either for consumption or warehousing, not exceeding \$100 in value, 25 cents; exceeding \$100 and not exceeding \$500 in value, 50 cents; exceeding \$500 in value, \$1. Entry for the withdrawal of any goods or merchandise from customs bonded warehouse, 50 cents.

Insurance: Each policy of insurance or other instrument, by whatever name the same shall be called, by which insurance shall be made or renewed upon property of any description (including rents or profits), made by any person, association, or corporation, upon the amount of

premium charged, one-half of 1 cent on each dollar or fractional part thereof: *Provided*, That purely co-operative or mutual fire insurance companies or associations carried on by the members thereof solely for the protection of their own property and not for profit shall be exempted from the tax herein provided: *And provided further*, That policies of reinsurance shall be exempt from the tax herein imposed by this paragraph.

Each policy of insurance, or bond or obligation of the nature of indemnity for loss, damage, or liability issued, or executed (except life, personal accident, and health insurance, and insurance described and taxed or exempted in the preceding paragraph and excepting also workmen's compensation insurance carried on by the members thereof solely for their own protection and not for profit), and each bond guaranteeing titles to real estate or mercantile credits executed or guaranteed by any liability, fidelity, guarantee, or surety company upon the amount of premium charged, one-half of 1 cent on each dollar or fractional part thereof: *Provided*, That policies of reinsurance shall be exempt from the tax herein imposed by this paragraph.

Chewing gum or substitutes thereof: For and upon each box, carton, jar, or other package containing chewing gum of no more than \$1 of actual retail value, 4 cents; if exceeding \$1 of retail value, for each additional dollar or fractional part thereof, 4 cents.

Sec. 24. That the provisions of this act shall take effect on the day next succeeding the date of its passage, except where otherwise expressly provided: *Provided*, That on the day after the 31st day of December, 1915, the taxes levied under this act shall no longer be levied and collected, but all taxes arising or accruing before said date shall continue to be collectible under the terms of this act.

* Commissioner of Internal Revenue, on November 12, 1914, decided that under the terms of the War Tax act no stamps need be affixed to certificates of ownership filed with coupons for collection of interest on bonds.

CLAYTON TRUST BILL.

AN ACT TO SUPPLEMENT EXISTING LAWS AGAINST UNLAWFUL RESTRAINTS AND MONOPOLIES, AND FOR OTHER PURPOSES.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That "anti-trust laws," as used herein, include the act entitled "An act to protect trade and commerce against unlawful restraints and monopolies," approved July 2, 1890; sections 73 to 77, inclusive, of an act entitled "An act to reduce taxation, to provide revenue for the Government, and for other purposes," of August 27, 1894; an act entitled "An act to amend sections 73 and 76 of the act of August 27, 1894, entitled 'An act to reduce taxation, to provide revenue for the Government, and for other purposes,'" approved February 12, 1913; and also this act.

"Commerce," as used herein, means trade or commerce among the several States and with foreign nations, or between the District of Columbia or any Territory of the United States and any State, Territory, or foreign nation, or between any insular possessions or other places under the jurisdiction of the United States, or between any such possession or place and any State or Territory of the United States or the District of Columbia or any foreign nation, or within the District of Columbia or any Territory or any insular possession, or other place under the jurisdiction of the United States. *Provided*, That nothing in this act contained shall apply to the Philippine Islands.

The word "person" or "persons" wherever used in this act shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State, or the laws of any foreign country.

SEC. 2. That it shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly to discriminate in price between different purchasers of commodities, which commodities are sold for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, where the effect of such discrimination may be to substantially lessen competition or tend to create a monopoly in any line of commerce: *Provided*, That nothing herein contained shall prevent discrimination in price between purchasers of commodities on account of differences in the grade, quality, or quantity of the commodity sold, or that makes only due allowance for difference in the cost of selling or transportation, or discrimination in price in the same or different communities made in good faith to meet competition: *And provided further*, That nothing herein contained shall prevent persons engaged in selling goods, wares, or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade.

SEC. 3. That it shall be unlawful for any person engaged in commerce, in the course of such commerce, to lease or make a sale or contract for sale of goods, wares, merchandise, machinery, supplies or other commodities, whether patented or unpatented, for use, consumption or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, or fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement or understanding that the lessee or purchaser thereof shall not use or deal in the goods, wares, merchandise, machinery, supplies or other commodities of a competitor or competitors of the lessor or seller, where the effect of such lease, sale, or contract for sale or such condition, agreement or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

SEC. 4. That any person who shall be injured in his business or property by reason of anything forbidden in the anti-trust laws may sue therefor in any District Court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

SEC. 5. That a final judgment or decree hereafter rendered in any criminal prosecution or in any suit or proceeding in equity brought by or on behalf of the United States under the anti-trust laws to the effect that a defendant has violated said laws shall be prima facie evidence against such defendant in any suit or proceeding brought by any other party against such defendant under said laws as to all matter respecting which said judgment or decree would be an estoppel as between the parties thereto: *Provided*, This section shall not apply to consent judgments or decrees entered before any testimony has been taken: *Provided further*, This section shall not apply to consent judgments or decrees rendered in criminal proceedings or suits in equity, now pending, in which the taking of testimony has been commenced but has not been concluded, provided such judgments or decrees are rendered before any further testimony is taken.

Whenever any suit or proceeding in equity or criminal prosecution is instituted by the United States to prevent, restrain or punish violations of any of the anti-trust laws, the running of the statute of limitations in respect of each and every private right of action arising under said laws and based in whole or in part on any matter complained of in said suit or proceeding shall be suspended during the pendency thereof.

SEC. 6. That the labor of a human being is not a commodity or article of commerce. Nothing contained in the anti-trust laws shall be construed to forbid the existence and operation of labor, agricultural, or horticultural organizations, instituted for the purposes of mutual help, and not having capital stock or conducted for profit, or to forbid or restrain individual members of such organizations from lawfully carrying out the legitimate objects thereof; nor shall such organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade under the anti-trust laws.

SEC. 7. That no corporation engaged in commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital of another corporation engaged also in commerce, where the effect of such acquisition may be to substantially lessen competition between the corporation whose stock is so acquired and the corporation making the acquisition, or to restrain such commerce in any section or community, or tend to create a monopoly of any line of commerce. No corporation shall acquire, directly or indirectly, the whole or any part of the stock or other share capital of two or more corporations engaged in commerce where the effect of such acquisition, or the use of such stock by the voting or granting of proxies or otherwise, may be to substantially lessen competition between such corporations, or any of them, whose stock or other share capital is so acquired, or to restrain such commerce in any section or community, or tend to create a monopoly of any line of commerce.

This section shall not apply to corporations purchasing such stock solely for investment and not using the same by voting or otherwise to bring about, or in attempting to bring about, the substantial lessening of competition. Nor shall anything contained in this section prevent a corporation engaged in commerce from causing the formation of subsidiary corporations for the actual carrying on of their immediate lawful business, or the natural and legitimate branches or extensions thereof, or from owning and holding all or a part of the stock of such subsidiary corporations, when the effect of such formation is not to substantially lessen competition.

Nor shall anything herein contained be construed to prohibit any common carrier subject to the laws to regulate commerce from aiding in the construction of branches or short lines so located as to become feeders to the main line of the company so aiding in such construction or from acquiring or owning all or any part of the stock of such branch lines, nor to prevent any such common carrier from acquiring and owning all or any part of the stock of a branch or short line constructed by an independent company where there is no substantial competition between the company owning the branch line so constructed and the company owning the main line acquiring the property or an interest therein, nor to prevent such common carrier from extending any of its lines through the medium of the acquisition of stock or otherwise of any other such common carrier where there is no substantial competition between the company extending its lines and the company whose stock, property, or an interest therein is so acquired.

SEC. 8. That from and after two years from the date of the approval of this act no person shall at the same time be a director or other officer or employe of more than one bank, banking association or trust company, organized or operating under the laws of the United States, either of which has deposits, capital, surplus, and undivided profits aggregating more than \$5,000,000; and

No private banker or person who is a director in any bank or trust company, organized and operating under the laws of a State, having deposits, capital, surplus, and undivided profits aggregating more than \$5,000,000, shall be eligible to be a director in any bank or banking association organized or operating under the laws of the United States. The eligibility of a director, officer, or employé under the foregoing provisions shall be determined by the average amount of deposits, capital, surplus, and undivided profits as shown in the official statements of such bank, banking association, or trust company filed as provided by law during the fiscal year next preceding the date set for the annual election of directors, and when a director, officer, or employé has been elected or selected in accordance with the provisions of this act it shall be lawful for him to continue as such for one year thereafter under said election or employment.

No bank, banking association or trust company, organized or operating under the laws of the United States, in any city or incorporated town or village of more than two hundred thousand inhabitants, as shown by the last preceding decennial census of the United States, shall have as a director or other officer or employé any private banker or any director or other officer or employé of any other bank, banking association or trust company located in the same place: *Provided*, That nothing in this section shall apply to mutual savings banks not having a capital stock represented by shares: *Provided further*, That a director or other officer or employé of such bank, banking association, or trust company may be a director or other officer or employé of not more than one other bank or trust company organized under the laws of the United States or any State where the entire capital stock of one is owned by stockholders in the other: *And provided further*, That nothing contained in this section shall forbid a director of Class A of a Federal reserve bank as defined in the Federal Reserve act from being an officer or director or both an officer and director in one member bank.

That from and after two years from the date of the approval of this act no person at the same time shall be a director in any two or more corporations, any one of which has capital, surplus, and undivided profits aggregating more than \$1,000,000, engaged in whole or in part in commerce, other than banks, banking associations, trust companies and common carriers subject to the act to regulate commerce, approved February 4, 1887, if such corporations are or shall have been theretofore, by virtue of their business and location of operation, competitors, so that the elimination of competition by agreement between them would constitute a violation of any of the provisions of any of the anti-trust laws. The eligibility of a director under the foregoing provision shall be determined by the aggregate amount of the capital, surplus, and undivided profits, exclusive of dividends declared but not paid to stockholders, at the end of the fiscal year of said corporation next preceding the election of directors, and when a director has been elected in accordance with the provisions of this act it shall be lawful for him to continue as such for one year thereafter.

When any person elected or chosen as a director or officer or selected as an employé of any bank or other corporation subject to the provisions of this act is eligible at the time of his election or selection to act for such bank or other corporation in such capacity his eligibility to act in such capacity shall not be affected and he shall not become or be deemed amenable to any of the provisions hereof by reason of any change in the affairs of such bank or other corporation from whatsoever cause, whether specifically excepted by any of the provisions hereof or not, until the expiration of one year from the date of his election or employment.

Sec. 9. Every president, director, officer or manager of any firm, association or corporation engaged in commerce as a common carrier, who embezzles, steals, abstracts or wilfully misapplies, or wilfully permits to be misapplied, any of the moneys, funds, credits, securities, property or assets of such firm, association or corporation, arising or accruing from, or used in, such commerce, in whole or in part, or wilfully or knowingly converts the same to his own use or to the use of another, shall be deemed guilty of a felony and upon conviction shall be fined not less than \$500 or confined in the penitentiary not less than one year nor more than ten years, or both, in the discretion of the court.

Sec. 10. That after two years from the approval of this act no common carrier engaged in commerce shall have any dealings in securities, supplies or other articles of commerce, or shall make or have any contracts for construction or maintenance of any kind, to the amount of more than \$50,000, in the aggregate, in any one year, with another corporation, firm, partnership or association when the said common carrier shall have upon its board of directors or as its president, manager or as its purchasing or selling officer, or agent in the particular transaction, any person who is at the same time a director, manager, or purchasing or selling officer of, or who has any substantial interest in, such other corporation, firm, partnership or association, unless and except such purchases shall be made from, or such dealings shall be with, the bidder whose bid is the most favorable to such common carrier, to be ascertained by competitive bidding under regulations to be prescribed by rule or otherwise by the Interstate Commerce Commission. No bid shall be received unless the name and address of the bidder or the names and addresses of the officers, directors and general managers thereof, if the bidder be a corporation, or of the members, if it be a partnership or firm, be given with the bid.

Any person who shall, directly or indirectly, do or attempt to do anything to prevent or any one from bidding or shall do any act to prevent free and fair competition among the bidders or those desiring to bid shall be punished as prescribed in this section in the case of an officer or director.

Every such common carrier having any such transactions or making any such purchases shall within thirty days after making the same file with the Interstate Commerce Commission a full and detailed statement of the transaction showing the manner of the competitive bidding, who were the bidders, and the names and addresses of the directors and officers of the corporations and the members of the firm or partnership bidding; and whenever the said commission shall, after investigation or hearing, have reason to believe that the law has been violated in and about the said purchases or transactions it shall transmit all papers and documents and its own views or findings regarding the transaction to the Attorney-General.

If any common carrier shall violate this section it shall be fined not exceeding \$25,000; and every such director, agent, manager or officer thereof who shall have knowingly voted for or directed the act constituting such violation or who shall have aided or abetted in such violation shall be deemed guilty of a misdemeanor and shall be fined not exceeding \$5,000, or confined in jail not exceeding one year, or both, in the discretion of the court.

Sec. 11. That authority to enforce compliance with sections 2, 3, 7, and 8 of this act by the persons respectively subject thereto is hereby vested: In the Interstate Commerce Commission where applicable to common carriers; in the Federal Reserve Board where applicable to banks, banking associations and trust companies, and in the Federal Trade Commission where applicable to all other character of commerce, to be exercised as follows:

The jurisdiction of the Circuit Court of Appeals of the United States to enforce, set aside, or modify orders of the commission or board shall be exclusive.

Such proceedings in the Circuit Court of Appeals shall be given precedence over other cases pending therein, and shall be in every way expedited. No order of the commission or board or the judgment of the court to enforce the same shall in any wise relieve or absolve any person from any liability under the anti-trust acts.

Sec. 14. That whenever a corporation shall violate any of the penal provisions of the Anti-Trust laws, such violation shall be deemed to be also that of the individual directors, officers, or

CLAYTON TRUST BILL—Continued.

agents of such corporation who shall have authorized, ordered, or done any of the acts constituting in whole or in part such violation, and such violation shall be deemed a misdemeanor, and upon conviction therefor of any such director, officer, or agent he shall be punished by a fine of not exceeding \$5,000 or by imprisonment for not exceeding one year, or by both, in the discretion of the court.

Sec. 17. That no preliminary injunction shall be issued without notice to the opposite party.

Sec. 19. That every order of injunction or restraining order shall set forth the reasons for the issuance of the same, shall be specific in terms, and shall describe in reasonable detail, and not by reference to the bill of complaint or other document, the act or acts sought to be restrained, and shall be binding only upon the parties to the suit, their officers, agents, servants, employés, and attorneys, or those in active concert or participating with them, and who shall, by personal service or otherwise, have received actual notice of the same.

Sec. 25. That no proceeding for contempt shall be instituted against any person unless begun within one year from the date of the act complained of; nor shall any such proceeding be a bar to any criminal prosecution for the same act or acts; but nothing herein contained shall affect any proceedings in contempt pending at the time of the passage of this act.

Approved, October 15, 1914.

WORLD'S CROPS.

In October, 1914, the International Institute of Agriculture at Rome, Italy, announced its estimates of world-crop production as follows:

Wheat, 2,697,000,000 bushels, total production in twenty-one countries.

Rye, 1,478,000,000 bushels, total production in seventeen countries.

Barley, 1,164,000,000 bushels, total production in nineteen countries.

Oats, 3,286,000,000 bushels, total production in sixteen countries.

Corn, 2,800,501,390 bushels, total production in five countries, comprising United States, Italy, Russia in Europe (sixty-three Governments), Spain, and Switzerland, the names being given in the relative order of importance in production. The crop of Italy is estimated at 102,356,429 bushels; that of Russia in Europe at 72,075,118.

Rice, 21,602,399,085 pounds, total production of four countries. The estimated rice production for Japan, Spain, and Italy is respectively 17,808,000,000 pounds, 1,568,000,000, and 1,146,392,000 pounds.

The September issue of the institute's "Bulletin of Agricultural and Commercial Statistics" estimates the total beet-sugar production in thirteen countries for 1913-1914 as 9,389,000 short tons, or 99 per cent. of the preceding year (1912-1913). This production is expressed in terms of "raw" sugar.

GOVERNMENT SECURITIES.

AVERAGE ANNUAL NET PRICE OF GOVERNMENT BONDS OF ENGLAND, FRANCE, GERMANY AND UNITED STATES.

The quotations for English consols, French rentes and German imperial loans from 1882 to 1905 are taken from the "Materialien zur Beurteilung der Zusammenhänge zwischen dem öffentlichen Schuldwesen und dem Kapitalmarkt," Berlin, 1908. Figures for more recent years compiled by the Bureau of Foreign and Domestic Commerce from returns of the Bank of England and data given in the Statistisches Jahrbuch des Deutschen Reichs. The quotations for United States bonds were compiled by the United States Treasury Department.

NATIONAL AND STATE INDEBTEDNESS: 1870-1913.

The following report on National and State indebtedness and funds and investments from 1870 to 1913 was issued by the Bureau of the Census in July, 1914.

According to this report, the total debt of the forty-eight State Governments on June 30, 1913, amounted to \$422,796,525. Of this total, \$403,366,569 represented funded debt, and \$19,429,956 represented floating debt. Of the funded debt, \$364,836,427 are represented in bonds and \$38,530,142 are special debt obligations to public trust funds. As an offsetting item against this total debt, the forty-eight States reported \$76,980,571 in sinking fund assets, leaving their debt (less sinking fund assets) \$345,942,305. The per capita debt for the forty-eight States amounted to \$3.56 on June 30, 1913.

In contrast with the debt of the forty-eight State Governments, the National Government had a total debt on June 30, 1913, of \$2,916,204,914. Of this total the funded debt amounted to \$2,540,523,329, while the floating debt amounted to \$375,681,585. Of the funded debt, the bonded indebtedness amounted to \$967,366,160, while the special debt obligations amounted to \$1,573,157,169. The sinking fund assets, or cash in the United States Treasury available for the payment of debt, consisting of accumulated trust funds, gold and silver and general Treasury cash, not only were sufficient to eliminate entirely the special debt obligations but also to reduce the bonded debt. The National debt, less cash in the Treasury available for the payment of debt, amounted to only \$1,028,564,055, or a per capita debt of \$10.59.

The net debt of the National Government represents three times the total net debt of the State Governments. Of the total per capita debt of \$14.15 (National and State), the debt of the National Government is \$10.59, or 75 per cent., while the debt of the State Governments amounts to \$3.56, or 25 per cent. of the total.

HOLDINGS OF STOCK EXCHANGE SECURITIES.

(From M. Neymark's Report.)

At present Great Britain, Germany, and France hold more than 330 milliard francs (franc = 19.3 cents; hence this sum = \$63,690,000,000) of paper securities out of the 570 to 600 milliards (\$110,010,000,000 to \$115,800,000,000) which belong to the various nations inhabiting the various countries of the globe. These 330 milliards taken at 4 per cent. bring them in a minimum interest of 13,200,000,000 francs (\$2,509,000,000). On their markets more than 600 milliards are negotiable of the 815 milliards of the negotiable securities quoted in the different markets of the world.

The following table shows the holdings of the Stock Exchange securities held by the peoples of the leading countries of the world:

COUNTRIES.	End of 1908.		End of 1910.	
United Kingdom.....	\$25,090,000,000	\$26,055,000,000	\$27,020,000,000	\$27,406,000,000

Taking the highest figures, the wealth of the world expressed in Stock Exchange securities alone would thus amount to the huge figure of \$115,800,000,000, in which the share of the United States would be \$25,476,000,000.

NATIONAL ASSOCIATION OF CREDIT MEN.

The National Association of Credit Men has for its object the improving and safeguarding of the conditions under which credit is extended through the co-operation of its 18,300 members. It aims to secure the enactment of laws beneficial to the honest debtor and creditor. It strives for better mercantile agency service, the prevention of commercial fraud, the bettering of credit department methods, the dissemination of literature of general interest to credit men and the education of its customers in the use of the financial statement, observance of discount terms, etc.

The work is done through a number of standing committees appointed by the national organization, who work with the co-operation of similar committees appointed by one hundred and five affiliated branches. A number of the local branches operate bureaus for the exchange of credit information between their members, and bureaus for the friendly adjustment of insolvent estates.

* "Lawful money" includes gold coin, silver dollars, United States notes and Treasury notes. United States notes are by regulation receivable for customs so long as they continue redeemable in coin. There are still in use small amounts of \$1 and \$2 national bank notes; also \$500 and \$1,000 silver certificates. Treasury notes were issued for purchases of silver bullion which was coined into dollars wherewith the notes are being redeemed as rapidly as practicable. The issue of national bank notes is practically dependent upon the market price of United States bonds. When the premium is high it is not profitable to issue notes.

** "Emergency" issues based upon other bonds and upon commercial paper are authorized under certain conditions beyond the amount of the capital, under act of May, 1908, expiring May, 1914.

The above table was revised for THE WORLD ALMANAC by the Director of the Mint.

COST OF MEMBERSHIP IN LEADING EXCHANGES.†

THE *Investment Guide* of Henry Clews & Co. gives the following table of cost of membership in the leading exchanges of the world, as of November 1, 1913:

Baltimore Stock Exchange.....	\$3,500	New Orleans Cotton Exchange.....	\$2,050
Berlin Bourse (entrance fee, not transferable).....	750	New York Coffee Exchange.....	1,425
Boston Stock Exchange.....	16,000	New York Cotton Exchange.....	14,000
Chicago Stock Exchange.....	1,200	New York Produce Exchange.....	400
Cincinnati Stock Exchange.....	3,100	New York Stock Exchange.....	41,000
Cleveland Stock Exchange.....	1,000	Paris Bourse (appointments made and controlled by French Government).....
Consolidated Stock and Petroleum Exchange, New York.....	750	Philadelphia Stock Exchange.....	6,000
Liverpool Cotton Exchange.....	6,000	Pittsburgh Stock Exchange.....	1,800
London Stock Exchange (entrance fee, not transferable).....	2,000	St. Louis Stock Exchange.....	2,500
Montreal Stock Exchange.....	30,000	Toronto Stock Exchange.....	17,000
		Washington Stock Exchange.....	4,500

The value of a membership in an exchange depends in a large measure upon the prevailing state of business and the market level of securities. † Owing to war in Europe and closing of the Exchange above quotations stand as of date noted.

NEW YORK STOCK EXCHANGE SEATS.

The following table prepared by Dow, Jones & Co., Publishers of *The Wall Street Journal*.

Sale of a seat on the New York Stock Exchange on July 17, 1913 for \$37,000, lowest since 1899.

Before 1868, seats on the New York Stock Exchange were not transferred by purchase and sale. An initiation fee of \$3,000 was, however, required from members duly elected by the board. In 1868, the transfer of seats began to have a market valuation, for in that year the present system of transfer was instituted.

LIFE INSURANCE PROGRESS IN THE UNITED STATES.

It is within the past seventy years that the vast business of life insurance in the United States has been developed. The experimental stage was ended and the era of advance was opened when, in 1843, the Mutual Life Insurance Company of New York began business, its first policy having been issued on February 1 of that year.

Since then a large number of life insurance companies have been established. The following list includes those now transacting business which had their inception between 1843 and 1860 inclusive, arranged according to the date of the first policy issued:

Mutual Life Insurance Company, 1843, February 1; New England Mutual Life Insurance Company (1), 1844, February 1; New York Life Insurance Company, 1845, April 17; Mutual Benefit Life Insurance Company (2), 1845, May 6; State Mutual Life Assurance Company (3), 1845, June 1; Connecticut Mutual Life Insurance Company, 1846, December 15; Penn Mutual Life Insurance Company, 1847, June 25; Union Mutual Life Insurance Company, 1849, October 1; National Life Insurance Company of Vermont, 1850, February 1; United States Life Insurance Company, 1850, March 4; Aetna Life Insurance Company, 1850, August 1; Manhattan Life Insurance Company, 1850, August 1; Massachusetts Mutual Life Insurance Company, 1851, August 2; Phoenix Mutual Life Insurance Company, 1851, September 11; Berkshire Life Insurance Company (4), 1851, October 27; Northwestern Mutual Life Insurance Company, 1858, November 25; Equitable Life Assurance Society, 1859, July 28; Washington Life Insurance Company, 1860, February 2; Home Life Insurance Company, 1860, May 1; Germania Life Insurance Company, 1860, July 16.

How life insurance has progressed since the early part of 1843 is shown in the subjoined table by periods of years as indicated, assessment insurance not being included.

* Annual statements of the fire insurance companies are rendered to the Insurance Departments during the month of January; therefore the statistics of condition January 1, 1915, were not ready when this publication went to press.

† The New York law requires a deposit of \$200,000 from foreign companies with the Insurance Department. This is treated by the department as "deposit capital," and the surplus stated in the next column is "surplus beyond deposit capital" and other liabilities.

(b) Estimated. (c) Included graded earth roads.

The gain in Georgia is largely attributed to the use of 5,500 prisoners on the public roads of the State.

The gain in South Carolina, Alabama and Florida is due largely to the fact that sand-clay roads are being built and that this is very cheap and satisfactory.

ROWING.

YALE VS. HARVARD—VARSITY EIGHTS.

YALE and Harvard eights have rowed forty-eight races, beginning in 1852 on Lake Winnipisseege to three miles, when Harvard won. In 1855 the course was changed to Springfield and lengthened to four miles. Lake Quinsigamond was the scene for nine years, and Lake Saltonstall for 1869. After an interval of seven years the crews in 1876-77 went to Springfield, Mass., when the four-mile course was inaugurated. In 1878 the crews changed again to New London, Ct. For records prior to 1889 see 1914 ALMANAC.

YACHTING.

YACHT racing in both the large and small classes continued to increase in popularity during the season of 1914. Lack of space prevents recording any but the most important events.

The principal attraction of the season was the trials for selection of the American defender of the America's Cup against Sir Thomas Lipton's Shamrock IV., which arrived from England in August. However, the races for the cup were postponed until 1915 on account of the European war.

Dimensions of the three aspirants:

In spite of the exceedingly destructive war in Europe, which caused a sudden and complete stoppage of the demand for motor cars in that quarter of the world, 1914 will be marked in history of automobilism as one of the most successful ever enjoyed by the industry. That such should have been the case is considered extraordinary by those who are familiar with the conditions that existed in the early months of the year. For the first six months, with only a few exceptions, the manufacturers appeared to be facing a disastrous season. Reports of record crops appeared to mark the turning point, for July, August and September were marked by a flood of orders that in some cases swamped the facilities for production. It is estimated that the output of motor cars by American factories during the year reached the enormous total of 500,000, which, added to the total of approximately 1,400,000 cars which were in use at the beginning of the year, brings this country within reaching distance of the two-million mark, a staggering total for a type of vehicle which must be regarded as quite as much of a luxury as a utility.

The war broke out at a time when exports of motor cars were extremely heavy, cutting off a huge source of income to the American manufacturers. For the eight months up to August 1 the value of cars exported to foreign countries amounted to about \$25,000,000. More than 90 per cent. of the cars exported were absorbed by Great Britain and her colonies and Continental Europe. Except from Canada and Australia the demand ceased at once, and even the overseas dominions of Great Britain evinced conservatism, due to the magnitude of the struggle in which they were so greatly interested. There was left, therefore, only South America as a foreign buyer of American cars, and in the closing months of the year there were indications that the Argentine Republic, Brazil and other southern automobile-using countries, with their supply from Europe shut off, would prove good customers of the American makers of motor cars.

On the other hand, the war brought unexpected good fortune to the motor truck division of the industry—a division that had been far from prosperous. Early in the great struggle Germany utilized motor-driven vehicles to wonderful advantage in the advance on Paris, and the allies found them equally valuable in the transportation of troops, light artillery and supplies, both for guns and men. At the end of two months, however, the constant grind over rough roads and fields had begun to tell on efficiency, and orders were issued to replenish the supply. During the first week in October representatives of France and Great Britain purchased nearly 2,000 motor trucks from American manufacturers, an outlay of over \$6,000,000, and negotiations then under way indicated that the various warring nations would take many thousands additional as soon as they could be supplied.

The importation of automobiles to the United States, which had been growing gradually smaller, almost ceased with the start of the war. After August 1 no more cars were received from France, Germany and Belgium. Italian factories were allowed to continue their export business, thereby helping to meet the comparatively small demand for foreign cars. Finding the Continental market closed to them, Great Britain sent a few passenger cars here, and found a ready demand.

All records for motor car production were broken in the twelve months up to August 1 by a Detroit manufacturer of small, low-priced cars, whose distribution in that period was in excess of 255,000. Four years ago the whole world did not produce so many cars in a season. This same maker has announced a rebate in cash to his customers if, in the next twelve months, he sells 300,000 cars, and there is no doubt that the mark will be reached.

It had been anticipated that 1914 would be marked by an extraordinary advance in the production and sale of very small light cars and of cycle cars, the latter being a vehicle of less than normal width and of light weight. This, however, failed to eventuate, the public appearing to prefer either the small machines of normal type at a slightly higher price, or the motorcycle, with or without a side attachment for carrying an extra passenger. Just what the future of the cycle car will be is difficult to predict, but at any rate the motor-wise public of 1914 found little merit in it.

The one drastic departure from accepted automobile practice during the year was the offering toward the end of the season of an eight-cylinder car by an American concern. This did not, however, mark a departure from accepted practice, as a French manufacturer had been marketing a similar car for some years. In this country, however, the multi-cylinder idea had progressed to only six, and the innovation was received with intense interest as marking a radical change in type that might some day prove dominant. The popularity of the innovation, like all those which are introduced in the making of automobiles, cannot be gauged for six months or a year.

In the cars brought out during the last twelve months there has been a very noticeable change in appearance, due to the almost universal adoption of the so-called stream-line body, by which is meant a body in which there are as few angles as possible. Every effort has been made to obtain flowing lines from front to rear, and to eliminate, as far as possible, the piling up of accessories of one kind or another, on the running board, etc. As a result the hood over the motor in the new cars shows a slope from the radiator upward to the dash, which also slopes, its top merging into the flowing lines of the body, giving a most pleasing effect to the whole.

Racing during 1914 continued on about the same plane as in the two or three years previous. The great road classics—the Vanderbilt Cup and Grand Prix—were again contested at Los Angeles, the former being won by an American car that had previously been little heard of, and the latter, also by a domestic creation, but one that had been extremely successful in high-speed contests. The 500-mile race was renewed on the Indianapolis Motor Speedway, and resulted in a decisive victory for French machines, which filled the first four places at the finish, with René Thomas, a Frenchman, showing the way. There were no fatalities during the race, although thirty cars participated, and only one serious accident. Abroad the Grand Prix was renewed in France, and that country's industry was humiliated when three German cars of the same make filled first, second and third places.

Death took its usual toll among racing drivers during the year, the list including Spencer Wishart, one of the best of the younger school of American drivers, who was killed at Elgin, Ill., in the running of the Elgin National race, and Jules Goux, one of the most famous of French pilots, and winner in 1913 of the 500-mile race at Indianapolis. Goux was killed in France while practicing for the Grand Prix.

It had been expected that there would be great activity during the year in the building of motor speedways, but such was not the case, only one two-mile oval in Sioux City, Iowa, being opened. The efforts to furnish New York with high speed motoring through a medium of this kind came to naught, but there are indications that the metropolis may have a speedway at least by the Fall of 1915, negotiations being under way to transform one of the old horse-racing tracks to such a use.

Touring in automobiles was greater in the year just ended than ever before, thousands upon thousands of motorists electing thus to spend their vacations on the good roads to be found throughout the Eastern States. New England, especially the White Mountain district, was again the objective of the majority, but there was shown an increasing trend toward the Middle West, while a greater number than ever made the trans-continental journey between New York and Pacific coast points. The run from ocean to ocean has, in fact, become so common as hardly to excite any comment, and it is expected that many thousands will utilize the motor car in their journeys to the Panama-Pacific Exposition at San Francisco this year.

The good roads movement, which got under way strongly about five years ago, continued to gain strength during 1914, and thousands of miles of highways were built or improved in various parts of the country. The Lincoln Highway, which eventually will be a first-class trunk line between New York and San Francisco, made distinct progress, and it is not too much to hope that within two years it will become a delightful reality for the tourist.

WORLD TOUR OF NEW YORK NATIONALS AND CHICAGO AMERICANS, 1913-1914.

Since the tour began at Cincinnati, October 18, 1913, the teams have figured in fifty contests, forty-six between the globe-touring teams and four with native teams in Japan and Australia. The White Sox won twenty-four games against the Giants. McGraw's men won twenty, and two ended in ties—at Los Angeles, Cal., on November 9, and at Cairo on February 1. In the games against native teams the Giants won their two games, the White Sox won one, and a combination of players from both teams won the other.

Of the fifty games played, thirty-one were played in the United States and nineteen, including the four games against native teams, were played abroad. Rain interfered with only three games scheduled before sailing for Japan—at Abilene, Tex.; Sacramento, Cal., and Seattle, Wash.

Financially the tour has exceeded the expectations of the promoters. It was announced when first arranged that an even break would be considered satisfactory, but the games in the United States brought in almost \$100,000 at the gate. Receipts were almost \$75,000 above the expenses.

Following are the games played and the scores of each:

October 18, Cincinnati, Ohio.—Giants 11, White Sox 2. October 19, Chicago, Ill.—Giants 2, White Sox 1. October 20, Springfield, Ill.—Giants 6, White Sox 4. SUNDAY WORLD ATHLETIC MEETS.

(From Official Report of Public Schools Athletic League.)

MORE than 60,000 boys from the grammar grades of New York public schools competed in the athletic games of the Ninth Annual Season of SUNDAY WORLD Field Days that began on April 11 and concluded October 18. This goes beyond the record of any previous year for these games and forms an unparalleled chapter of achievement in public school athletics. While the number of competitors in the meets were but a few thousand more than in 1913, the number of children who actually participated in the day's recreation this year in the field days of very many of the schools included practically the entire school, with mass drills, gymnasium callisthenics and folk-dancing added to the regular programme of athletic events. If the children who participated in these exhibitions were included in the quota of participants in each school's Field Day this year the number would not be less than 100,000.

One hundred and seventy-four schools of the city took full advantage of the offer this year to assist them to each have a day of athletic sports for their grammar grade boys.

The prizes provided for these games consisted of 3,872 medals—1,936 of silver and a like number of bronze—174 banners awarded as class trophies and 15 special banners. The SUNDAY WORLD printed programmes for each event, containing the numbered lists of all the contestants officially entered for games.

Early in the year the SUNDAY WORLD made its usual offer to the Public Schools Athletic League to assist 150 of the elementary schools of the city to each have a field day of athletic games during the Spring term of school as preliminaries to the grand final meet in October. Though the offer was at first limited to 150 schools, the demand proved so much greater than this that 176 schools were finally admitted to the privilege of entering

SUNDAY WORLD ATHLETIC MEETS—Continued.

for the field days. Of these 174 schools held meets between April 1 and June 27. As a few of the larger schools, having entry lists that in some cases went beyond 1,000 contestants, held more than one meet, the actual number of meets held for the prizes this year was 181.

At many of the meets this year there were added events for girls, run separately from the boys' events, and usually for prizes given by the school athletic organizations, though the SUNDAY WORLD contributed for these events 250 bronze pins and a number of banners.

In the 181 meets of the year more than 1,600 teachers acted as officials of the games. The principal of the school in most cases was referee of his school's games. The athletic contests were witnessed by no fewer than 250,000 children.

The entry lists from very many of the schools were large this year as compared with their total enrolment of grammar grade boys. Some schools had more than 90 per cent. of their boys in the games and more than 50 schools entered 75 per cent. of their enrolment.

Some huge meets were held by the larger schools of the city. Following are some of the schools that had great numbers of contestants in their games, the figures given being the actual number of boys who were entered and competed in the events, and do not include those taking part only in mass drills, baseball games or other events not on the regular programme of athletic contests.

PUBLIC SCHOOL NO. 188 WINS CITY PLAQUE.

The SUNDAY WORLD All City Plaque again goes to P. S. No. 188, Manhattan. This plaque is awarded each year to the school in the city that wins the point score in all the year's field days. These points are counted, first for largest percentage of entries as compared with school enrolment, and second for scores made in the

games as compared with P. S. A. L. records. These scores must be verified by an official of the district league. Last year P. S. No. 188 won this trophy. It then had an entry list of 1,350 boys in its games, 94 per cent. of the grammar grade enrolment of the school. With the enlargement of the school registration it increased its entry list in this year's games to 1,922, a number never before equalled by a single school in a single set of athletic games in this city. The register in the grammar grades at P. S. No. 188 this year is 2,140, so its 1,922 competitors in its field day comprise more than 90 per cent. of the registration.

SUNDAY WORLD FINAL MEET—1913-14.

The Public Schools Athletic League conducted the Tenth Annual New York SUNDAY WORLD Final Meet on Saturday afternoon, October 18, at the Brooklyn Athletic Field, Avenue K and East Seventeenth Street, Brooklyn. This meet was the final of 167 individual school meets held during the Spring of the year. It has been estimated that 60,000 boys actually competed in the preliminary meets, and 250,000 children witnessed these games. The final meet was composed of only those schools (167) which had held a SUNDAY WORLD field day during the year. An entry of 1,400 was received for the various events and about 6,000 spectators were present. The athletic performances of the contestants surpassed any of the former records made at final meets.

The city championship was won by P. S. No. 10, Manhattan, with a score of 45 points; P. S. No. 62, Manhattan, scored 25 points, and P. S. No. 9, Brooklyn, was third, with 8 points.

The points were scored on a basis of 5 for firsts, 3 for seconds, 2 for thirds, 1 for fourths. The schools scored in the following order: P. S. No. 10, Manhattan, 45; P. S. No. 62, Manhattan, 25; P. S. No. 9, Brooklyn, 8; P. S. No. 164, Brooklyn, 7; P. S. No. 43, Manhattan, 7; P. S. No. 69, Manhattan, 6; P. S. No. 184, Manhattan, 6; P. S. No. 186, Manhattan, 6; P. S. No. 147, Manhattan, 5; P. S. No. 89, Brooklyn, 5; P. S. No. 144, Brooklyn, 5; P. S. No. 11, Queens, 5; P. S. No. 171, Manhattan, 5; P. S. No. 40, Manhattan, 5; P. S. No. 19, Manhattan, 5; P. S. No. 64, Manhattan, 4; P. S. No. 168, Brooklyn, 3; P. S. No. 5, Manhattan, 3; P. S. No. 77, Manhattan, 3; P. S. No. 14, Richmond, 3; P. S. No. 183, Brooklyn, 3; P. S. No. 157, Brooklyn, 3; P. S. No. 58, Queens, 2; P. S. No. 123, Brooklyn, 1; P. S. No. 43, Brooklyn, 1; P. S. No. 26, Brooklyn, 1; P. S. No. 42, Bronx, 1; P. S. No. 20, Queens, 1; P. S. No. 43, Bronx, 1; P. S. No. 20, Manhattan, 1.

Borough winners: Manhattan, P. S. No. 10, 45 points; Brooklyn, P. S. No. 9, 8 points; Queens, P. S. No. 11, 5 points; Bronx, P. S. Nos. 42 and 43, 1 point each; Richmond, P. S. No. 14, 3 points.

PUGILISTIC CHAMPIONS AND RECEIPTS.

ALL attempts to designate and classify the pugilistic champions and title holders are more or less arbitrary because of the fact that few such champions won and defended the championships at the same weight. Among the lighter weight boxers it is not at all unusual for a pugilist to be forced from one class into the next higher by growth and increased weight. The following list, dating from 1890, is generally accepted by critics and boxers as being the correct classification, although holders did not always win title from previous champions:

HEAVYWEIGHTS (over 158 lbs.)—1890-1892, John L. Sullivan; 1892-1897, James J. Corbett; 1897-1899, Robert Fitzsimmons; 1899-1906, James J. Jeffries; 1906-1908, Tommy Burns; 1908-1914, Jack Johnson.

MIDDLEWEIGHTS (158 lbs.)—1890-1897, Robert Fitzsimmons; 1897-1907, Tommy Ryan; 1907-1908, Stanley Ketchel; 1908, Bill Papke and Stanley Ketchel; 1908-1910, Stanley Ketchel; 1911-1913, claimed by Frank Klaus, Mike Gibbons, Ed McGorty and Geo. Chip; 1914, M. Gibbons and L. McGorty.

WELTERWEIGHTS (145 lbs.)—1890-1893, no recognized champion; 1894-1896, Tommy Ryan; 1896-1897, Kid McCoy; 1898-1900, Billy Smith; 1900, Rubie Ferns; 1901, Matty Matthews and Rubie Ferns; 1901-1904, Joe Wolgast; 1904-1908, Dixie Kid; 1908-1912, no legitimate claimants.

LIGHTWEIGHTS (133 lbs.)—1890-1894, Jack McAuliffe; 1894-1899, Kid Lavigne; 1899-1902, Frank Erne; 1902-1908, Joe Gans; 1908-1910, Battling Nelson; 1910-1911, Ad Wolgast; 1912, Ad Wolgast and Willie Ritchie; 1913, Willie Ritchie; 1914, Freddie Welsh.

FEATHERWEIGHTS (122 lbs.)—1890-1892, no recognized champion; 1892-1897, George Dixon; 1897, Solly Smith; 1898, Solly Smith and Dave Sullivan; 1898-1900, George Dixon; 1900-1901, Terry McGovern; 1901-1904, Young Corbett; 1904-1908, Tommy Sullivan; 1908-1911, Abe Attell; 1911-1914, Johnny Kilbane.

BANTAMWEIGHTS (116 lbs.)—1890-1892, George Dixon; 1892-1894, no recognized champion; 1894-1898, Jimmy Barry; 1898-1901, no recognized champion; 1901-1903, Harry Forbes; 1903-1905, Frankie Nell; 1905-1907, no recognized champion; 1907-1913, Johnny Coulon; 1914, Kid Williams.

CHESS.

CONSIDERING that war broke out in mid-Summer, the year 1914 was fairly prolific of chess activity abroad and at home. When hostilities broke out the international masters were in session at Mannheim, Germany, but on August 1, with the competition not quite two-thirds finished, a halt was called and the prizes distributed in accordance with the standing of the players at that stage of the contest. It was the first time in the annals of chess that this had happened. The annual championship meeting of the British Chess Federation, on the other hand, was brought off in August, according to schedule. But there were notable absentees. The outstanding feature of the year was the championship tournament at St. Petersburg, which brought Dr. Lasker and J. R. Capablanca face to face in the international ring for the first time. Capablanca led most of the time, but the world's champion overhauled him by defeating him in the crucial game. Shortly before, the Cuban expert had taken up his residence in the Russian capital as a member of the staff of the Cuban Consulate. The Gambit Tournament at Baden, near Vienna, was won by Rudolph Spielmann, the hero of Abbazia, who thus proved himself to be the greatest gambit player of the day. Hopes had been entertained of an international tournament in Cuba, but at the last moment it was declared off by the Mayor of Havana. The Western championship tournament, held at Memphis, and the various State and college competitions held the steady attention of chess followers in this country. In New York and vicinity the revival of the Metropolitan Chess League did much to keep interest alive, supplemented as these inter-club matches were by the important club championship tournaments. The younger generation were also well looked after in the many scholastic league games that were arranged for them. Correspondence chess continued to hold its own, the most important competition being the King's Gambit Tournament, with over one hundred players, arranged by the *American Chess Bulletin* of New York. Other contests were held by the National Association, the Chess-by-Mail Correspondence Bureau, the Greater New York League, and the Illinois, Ohio and Pennsylvania associations. The literature of the game received several important additions during the year, among them being the German Handbook, by Carl Schlechter, of Vienna; the St. Petersburg Congress Book (German edition), by Dr. S. Tarrasch, of Nuremberg; "Chess Swindles," by F. J. Marshall, of New York, and the "Rice Gambit," by O. Duras, of Prague.

Twenty-second Intercollegiate Tourney—New York, December 22, 23 and 24, 1913. Won by Yale, after a tie with Columbia, with totals of 6½—5½. Yale won the play-off on January 3 and 4 (2 matches) by totals of 5½—2½. Other scores: Princeton, 6—6; Harvard, 5—7. The

winning team was: R. Beach, '14; D. A. Quarles, '16; G. C. Job, '14; T. A. Lightner, '14. The record: Columbia and Harvard, each 9; Yale, 2; Princeton, 1. In addition, Harvard and Yale tied in 1909. It was not played off.

Fifteenth Triangular College Chess League Tourney—New York, December 29, 30, 31 and January 1. Won by Pennsylvania, with totals of $1\frac{1}{2}$ — $4\frac{1}{2}$; Cornell, second, with $10\frac{1}{2}$ — $5\frac{1}{2}$; Brown, third, with 2—14. The winning team: R. Sze, Ch. E., '14; M. J. Teitelbaum, Law, '14; H. Houzate, Wh., '16; R. Levin, Law, '14. The record: Pennsylvania, 8; Cornell, 5; Brown, 0. In addition, Pennsylvania tied once, with Brown and once with Cornell. Pennsylvania won outright the third trophy placed in competition by Prof. I. L. Rice, of New York. The annual Harvard-Yale team match on ten boards was won by Harvard by 6—4. The record: Harvard, 12 matches; Yale, 1; tied 1. In total games Harvard leads by 88—52.

Western Intercollegiate Tourney—Chicago, December 22-26, 1913. Tie between University of Chicago and Armour Institute, with totals of $6\frac{1}{2}$ — $5\frac{1}{2}$; University of Illinois, third, with 5—7.

Intercollegiate League Match—Brooklyn, April 4. Triangular League (Cornell, Pennsylvania and Brown), 5; Quadrangular League (Columbia, Harvard, Yale and Princeton), 1.

Graduate Club Matches—New York, February 25 and March 11. Harvard Club, 9; Yale Club, 3.

New York State Championship—Rice Chess Club, New York, February 22, 23 and 24. Championship tournament won by R. T. Black, of Brooklyn, after a tie with J. Rosenthal, with scores of $3\frac{1}{2}$ — $\frac{1}{2}$; F. J. Marshall, third, with 3; O. Chajes, fourth, with $2\frac{1}{2}$. General tourney—H. Liebenstein, first, with $3\frac{1}{2}$; second class, tie between H. Ring and J. Vinze, each 2.

New Jersey State Championship—Newark, February 22. Tie between F. Sager and C. E. Armstrong. Play-off won by Sager by 2—1.

Minnesota State Championship—Minneapolis, February 23. Won by D. D. Barkuloo, of St. Paul with 3—0; M. W. Testa, second, with $2\frac{1}{2}$ — $\frac{1}{2}$. Minor tourney won by A. Harrington, of Minneapolis. Oklahoma State Championship—Won by J. B. France, of Lawton, from Charles J. Luja, of Thomas. Score: France, $31\frac{1}{2}$; Luja, $1\frac{1}{2}$.

* Made in handicap.

A handicap record from scratch is recognized as competition record if the time made is better than has been made in any scratch race of the same distance. One hour, 28 miles 19 yards, W. Hedspeth, Dayton, Ohio, July 31, 1902.

Note—The fastest time ever made in competition in a half-mile contest was done by Frank L. Kramer, from scratch in a handicap, at the Newark Velodrome (Vailsburg), Sept. 16, 1914. He was officially clocked at 0.53 flat, but as he did not finish in first position his time does not count as a competition record.

IMPORTANT CYCLING EVENTS.

The World's Championships for 1914 were to be run at Copenhagen, Denmark, starting August 2. As war broke out in Europe at that time the championship meets were declared off after some of the preliminary amateur heats had been run.

Paul Gulgnard holds the 100-kilometre paced record, made at Munich, September 15, 1909, in the time of 59m. 1s. Gulgnard also holds the 1-hour professional paced record, made the same time and place, of 63 miles 189.8 yards. At Munich Gulgnard, on July 23, 1909, rode 31 miles 1,195 yards in the half-hour (a record).

The amateur 1-hour motor-paced record is 56 miles 1,128 yards, and was made by François Cuzin at Munich, September 30, 1909. Cuzin completed 100 kilometres in 1h. 5m. 45 2-5s.

Oscar Egg, at the Velodrome Buffalo, Paris, in June, 1914, rode 27.50 miles unpaired in the hour. Arthur Van der Stuyft made a two-hour paced record at Leipzig, Germany, October 11, 1908, of 106 miles 1,498 yards. Joe Noe of the Century Road Club of America reduced the record from New York to Philadelphia and return to 13h. 58m. on August 22, 1910.

Six-day race, Boston, Mass., November 2 to 7, 1914, ten hours a day. Final score—Goulet-Hill, 1,383 miles 5 laps; McNamara-Moran, 1,383 miles 5 laps; Lawson-Drobach, 1,383 miles 5 laps; Lawrence-MacIn, 1,383 miles 4 laps; Anderson-Mitten, 1,383 miles 4 laps; Thomas-Ryan, 1,383 miles 4 laps; Carmen-Cameron, 1,383 miles 4 laps; Kopsky-Hansen, 1,383 miles 4 laps; Walthour-Root, 1,383 miles 4 laps; Logan-Piercy, 1,383 miles 3 laps; Madonna-Rudi-Russe, 1,383 miles 1 lap.

Six-day race, held at Madison Square Garden, N. Y., November 15 to 21, 1914. Final score, 142d hour—Goulet-Grenda, 2,758 miles 1 lap, 67 points; Lawson-Drobach, 2,758 miles 1 lap, 61 points; McNamara-Moran, 2,758 miles 1 lap, 53 points; Egg-Verri, 2,758 miles, 1 lap, 50 points; Fogler-Hill, 2,758 miles 1 lap, 50 points; Cameron-Kaiser, 2,758 miles 1 lap, 34 points; *Magnin-Lawrence, 2,735 miles 5 laps; *Root-Clark, 2,735 miles 5 laps; *Piercy-Milton, 2,734 miles.

Former record for 142 hours, 2,751 miles, no laps, by Goulet and Fogler in 1913.

*Not tied with leaders at the end 141 hours, therefore not in last hour of sprinting.

Compiled by R. F. Kelsey, Chairman Board of Control, National Cycling Association.

H. Livingston of the Pittsburgh Field Club established a record for the United States by scoring three consecutive centuries in one week in a tournament held in Chicago in August, 1907; a similar feat was performed by H. N. R. Coblett in Canada in a tournament held in Vancouver, British Columbia, in August, 1906. H. V. Hordern of the University of Pennsylvania established a record for the United States and Canada by securing 213 wickets during 1907. J. B. King and F. F. Kelly are the only two bowlers who have taken over 2,000 wickets. A. C. MacLaren scored 424 for Lancashire vs. Somerset at Taunton, England, July, 1895—the record in a first-class match. A. E. J. Collins, playing at Clifton June, 1899, for Clarke's House against North Town, scored 628, not out—the record in any match. Melbourne University scored 1,094 runs against Essendon at Melbourne (Australia), 1898—the highest authenticated record. In a match between A. E. Stoddart's English team and New South Wales 1,739 runs were scored—a record in first-class cricket. The longest partnership on record was 623 runs by Captain Oakes and Private Fitzgerald, First Royal Munster Fusiliers vs. Army Service Corps at Currah, 1895. In a small match in Australia F. R. Spofforth bowled down all 10 wickets of his opponents in each inning—a feat without parallel.

Best records in the United States and Canada are by G. S. Patterson eleven playing against A. M. Woods eleven at Philadelphia, scored 659 runs in 1894. Australians against Vancouver scored 653 for 8 wickets in 1913. J. B. King scored 344 runs for Belmont against Merion B. in 1906. W. Robertson, 206, not out, and A. G. Sheath, 115, not out, scored 340 runs in partnership without the loss of a wicket at San Francisco in 1894. Smallest score, Americas 0 against Roseville at Guttenberg, N. J., in 1897. The smallest score in international match in United States, West Indians 13 against Australians, 1913. Smallest score in Canada, Winnipeg 6 against Australians, 1913. Largest score in the Metropolitan District Cricket League Championship, New Jersey Athletic Club 385 runs for 5 wickets against Manhattan, at Bayonne, N. J., 1897.

Seven centuries in a season, P. J. Higgins of Los Angeles in 1912, 159, 100, 100, 121, 182, 110, 240. G. S. Patterson of the Germantown C. C. scored 1,748 runs in season of 1892—a record for the U. S. Rev. F. W. Terry of Toronto C. C. scored 1,509 runs in season of 1892—a record for Canada.

MOTOR BOAT RACING, 1914.

RACES for the Harmsworth Trophy and world's championship, although the American challenger, Disurber IV., arrived in England, had to be abandoned on account of the war. The Philadelphia-Bermuda race was declared off. Results of most important races follow:

March 30, St. Augustine, Fla.—Southern Championship Speed Boat Races for 1914. The first event, a half-mile trial against time, was won by the Hydro-Bullet of Chicago, which travelled at the rate of 43.9 miles an hour. Earl O. Deakin is the Hydro-Bullet's owner. The first heat in the contest for boats of the 20-foot class, six laps over a 2½-knot course, was won by Wisconsin Kid, owned by S. T. Brock of Portland, Ore. The final event, a 15-knot handicap race, was won by Hydro-Bullet in 29m. 38s.

March 31, St. Augustine, Fla.—The Hydro-Bullet won the first heat of the event for boats of the 26-foot class, covering 15 knots in 25m. 41-2s. The same boat also finished first in the six-lap handicap race over a 2½-knot course. Over a limited course the Wisconsin Kid won the speed trial event, making an average of 45 miles an hour.

April 1, St. Augustine, Fla.—The Hydro-Bullet won scratch event.

April 3, St. Augustine, Fla.—Hydro-Bullet won the second trial for speed boats of the 26-foot class in the 15-knot handicap event of the Southern championship speed boat races.

April 4, St. Augustine, Fla.—Final heats of the championship handicap at 30 nautical miles were won by the Jane S., with the Hydro-Bullet second and the Impudence Junior third. Time—1h. 16m. 4s. Hydro-Bullet would have won if she had not bent her rudder. The Hydro-Bullet won the speed championship of the South and established a new record for the Matanzas course. She won every event she entered except the Southern handicap. The Wisconsin Kid won the final in the 20-foot class; the Hydro-Bullet won the final in the 26-foot class, and the Impudence Junior won the 15-nautical-mile handicap. Time—1h. 15m.

National Amateur, Class B Championship, 18.2, played at New York City, January 11-13. Walter Leonard, Scranton, Pa., won by winning all five games; he also won the high single average prize with 9 21-31; Chas. Connors, Philadelphia, second; H. A. Coleman, holder, third, and winner of high run prize with 59.

National Amateur, Class C Championship, 18.2, played at New York City, January 6. Final won by C. B. Terry, defender, against F. S. Appleby, 200 to 140.

Foreign Championship. The tournament for the

championship of France, which began on April 15, was won by Guy. The series for the championship of the world began May 4 and resulted in a victory for Sels, of Antwerp, Belgium.

Only four players—Guy, Agassiz, Renaud and Reddeer—competed for the French championship. The winner had never before played in a tournament, and his assignment to Class A and his success were unprecedented surprises. He is a young man whose execution and steadiness promise a brilliant future. Nevertheless, he was fortunate. His best run was 76, best single average 11.11 and his grand average 8.72.

Agassiz, with a high run of 54 and a best single average of 13.79, had a grand average of 9.99. Renaud played the best billiards of the tournament. He scored a high run of 114, a single average of 13.79 and a grand average of 12.44. Reddeer, who did not win a game, ran 61, made a high single average of 9.83 and a grand average of 7.78.

Guy, Agassiz and Renaud each won two games and lost one. Then Renaud forfeited, and in the play-off Guy defeated Agassiz. The figures of the play-off game have not been transmitted.

In the games for the championship of the world,

France was represented by Agassiz, Renaud, Reddeer and Levrier. Other participants were Sels and Rudelshelm, Belgians. Alfred Mortier, author and artist, who had earned first honors in the international tournaments of 1911, 1912 and 1913, was unable to compete because of close application to literary pursuits.

The performances were far superior to those of the French tournament, as is shown by the appended table:

ODD AND MISCELLANEOUS EVENTS.

DOG RACING.

FEBRUARY 20—Liverpool, England. The Waterloo Cup, the "Derby for Greyhounds," was won by Dilwyn, a fawn bitch nominated by A. F. Pope. The runner-up was Leuceryx, a black dog puppy nominated by Major Robert McCalmont. Both hounds were outsiders, the betting before the first courses were run being 20 to 1 against Dilwyn and 50 to 1 against Leuceryx. The coursing took place over the famous flats of the Aitcar Club. The winner takes the cup, value \$500, given by the Earl of Sefton, and a prize of \$2,500. The event is open to 64 subscribers at \$125 each, and is run off in five rounds.

March 3—Nome, Alaska. Fred Ayer finished first in the Solomon Derby dog race that was run from Nome over the snow trail to Solomon and return. His time for the 64 miles was 6h. 30m. 4s. John Johnson, winner of last year's Derby, was a close second with his team of Siberian wolves, and finished two minutes after Ayer. The five teams that entered the race started under clear skies from Nome at

10 A. M., but a wind and snow storm that reached the proportions of a blizzard developed as the race progressed, and the heavy going destroyed chances of lowering time records of other years. Johnson's time last year, which fixed the record for the course, was 5h. 47m. 24s.

April 17—Nome, Alaska. John Johnson, holder of the record for the 412-Mile-All-Alaska sweepstakes dog team race, became the winner in the 1914 classic when he drove his 18 Siberian wolves into Nome after having covered the 412 miles over the snow trail from Nome to Candle and return in 8h. 3m. Johnson's time was seven hours slower than the record set by himself in 1910, when he drove the Siberians over the course in 74h. 14m. 20s. The racers were handicapped this year by stormy weather.

COACHING MARATHON.

June 6—London. The coaching marathon from Bussey Park to Lympia was won by W. A. Barron. Judge Moore, of New York, was second, and A. G. Vanderbilt, of New York, was third.

AVIATION.

THE great European war which began on July 28 with Austria's declaration of war against Serbia and soon entangled Germany, Russia, Great Britain, France, Belgium, Japan and Turkey offered the first comprehensive opportunity for the use of aircraft in actual warfare on a large scale. Almost all the nations engaged were represented by large fleets of aeroplanes, spherical and dirigible balloons, and some hydroaeroplanes. These were immediately called into use with varying success. In some respects the general aircraft did not equal the brilliant forecasts which preceded the entry of this new arm of the service into war. Of the various types the aeroplane, both armored and unarmored, proved to be the most effective. For scouting purposes it was extremely effective. Carrying one or two officer-observers in addition to the aviator, these machines flew for miles over the armies and positions of the combatants, returning with reports within a few hours that it would have required days to secure under the former methods. With these reports as guides it became possible to shell concealed positions, rush reinforcements to threatened quarters, follow closely the tactics and manœuvres of the enemy.

In the actual destruction of life and property, however, the aircraft in war did not reach the point of effectiveness previously predicted. German dirigibles of the Zeppelin type made several night attacks on Antwerp, dropping bombs which killed approximately a score of persons and wrecked several buildings. Numerous battles in the air between rival aviators and attacks on dirigibles by aeroplanes were reported, but no authentic list of casualties or captured machines are available at press time. Occasional accounts of damage done by aviators dropping bombs on active combatants are also reported, but the chief use of the aircraft in the early months of the war was that of scouting, and in this department of aviation the aeroplane proved of great value in the titanic battles in Belgium, France, and Poland.

Within the past two years the War Departments of the nations of the world adopted the policy of refusing to disclose the number and equipment of their aerial navies and the sums expended for this arm of the service. The following tables, therefore, are based on estimates made by various aeronautical organizations and experts. While not absolutely official or correct in all cases, they show approximately the aerial strength of the nations of the world including in particular those now at war:

ARMY AVIATION.

The act of Congress approved July 13, 1914, created an "Aviation Section" in the Signal Corps, authorizing an addition to that corps of sixty officers of the grades of captain and first lieutenant, and 260 enlisted men. The officers are to be charged with the duty of operating or supervising the operation of all military air craft and all appurtenances belonging thereto and in the instruction of the enlisted men. The officers are to be selected from the next lower grade in the line of the army and are to be rated as military aviators and junior military aviators. Those to be rated as military aviators shall not exceed fifteen and to be selected from the junior military aviators after three years' service with that rating. The act also provides that there shall be attached to the aviation section a sufficient number of aviation students to make, with the aviation officers actually detailed in said section, a total number of sixty aviation officers and aviation students.

Military aviators receive 75 per cent. increase in their pay, and junior military aviators 50 per cent. increase, and aviation students 25 per cent. increase while on duty requiring them to participate regularly and frequently in aerial flights. Aviation enlisted men, while on duty that requires them to participate regularly and frequently in aerial flights or while holding the rating of aviation mechanic, the number of which shall not at any time exceed forty, shall receive 50 per cent. increase in their pay.

AEROPLANE AND BALLOON RACES.

THE European war caused the abandonment of many of the aeroplane and balloon races scheduled for the closing months of 1914 both in Europe and the United States, including the international races for both types of aircraft. The results of the principal events held will be found in the appended tables.

NOTABLE PERFORMANCES, ACCIDENTS, ETC.

February 8-10—Hans Berliner in a spherical balloon with two companions travelled from Bitterfeld, Germany, to Bissertsk, Russia, a distance of 1,897 miles establishing a world's record. The balloons were tried on the charge of landing in Russia without Government permission, found guilty, and sentenced to pay a fine of \$1,000 or serve six months' imprisonment.

May 22—Zeppelin dirigible L-3, built for the German Navy, in its trial trip cruised from Friedrichshafen over Frankfurt, Metz, Bremen, Heligoland and return to Potsdam, being in the air continuously for thirty-four hours fifty-nine minutes, at a speed varying from sixty to ninety miles per hour. While over Heligoland the L-3 was in wireless communication with the dirigible LZ-24 over Friedrichshafen.

June 20—The destruction of the Austrian dirigible M-III, was one of the worst aeronautical catastrophes recorded, causing a loss of the lives of nine aeronauts. The Körting airship set out from Fischamend, near Vienna, and soon after a biplane piloted by Lieut. Platz set off in pursuit. The aeroplane overtook the dirigible when the latter was at a height of 400 metres. The aeroplane appeared to attempt to rise over the airship, but in some way the two aircraft collided. The aeroplane capsized and fell to the ground, while a great gash was made in the envelope of the airship, and an explosion followed. The seven occupants of the car of the airship, Capt. Hanswirt, Lieuts. Hofstetter, Breuer and Hardinger, Corporal Hadima, Private Weber, and civilian engineer Kammerer, were all killed and burned to an unrecognizable extent. The aeroplane fell not far from the wreck of the airship, and both the pilot, Lieut. Platz, and his passenger, Naval Lieut. Puchta, were killed instantly. The M-III, built in 1911, was 65 metres long, of 3,600 cubic metres gas capacity.

June 28-29—The French military dirigible Adjutant Vincenot, piloted by Georges Joux and carrying eight passengers, established a new world's record for continuous navigation by dirigibles, remaining in the air for thirty-five hours and twenty minutes. The Adjutant Vincenot left Toul, France, June 28 and covered a wide circuit, including Paris, and landed late on the night of June 29. The German dirigible Zeppelin L-3 established the previous record of thirty-four hours and fifty-nine minutes on May 22 in a flight from Friedrichshafen, as noted above.

August 24—A German Zeppelin sailed over the city of Antwerp, Belgium, late at night and dropped eight bombs. Observers thought that the bombs were aimed at the palace of King Albert, but the missiles missed the palace by several hundred yards. One bomb partially wrecked the hospital of St. Elizabeth, which contained no patients at the time of the explosion. A number of private houses were wrecked, however, and close to a score of men and women killed. Reports of the capture of a Zeppelin and its crew on the Belgian border a few hours later were never officially verified.

GREAT BRITAIN'S AERONAUTICAL APPROPRIATION.

FRENCH AERONAUTICAL RECORDS FOR 1913.

At the annual meeting of the Aero Club of France, held on March 27, 1914, M. Besançon, the Secretary, stated in his report that during 1913 the distance covered in the air by aviators over French territory was about 13,040,000 kilometres, or, taking the kilometre as five-eighths of a mile, 8,150,000 miles, as against 3,000,000 kilometres (1,875,000 miles) flown in 1912. The number of hours of flight in 1913 was 133,800 instead of 39,000 in 1912, and the number of passengers carried was 47,900 instead of 12,200. There was in 1913 a decrease in the number of aeroplanes constructed in France, as the total was 1,148 aeroplanes and 146 hydroaeroplanes, as against 1,423 aeroplanes in 1912. There was also a decline in the number of aviation pilots' certificates by the Aero Club of France last year, as it was 384 as against 489 in 1912.

GERMAN AERONAUTICAL RECORDS FOR 1913.

The official reports of the aerodrome authorities at Johannisthal, the centre of German aviation, which, not as complete as those of the Aero Club of France, show the following records as compared with those of 1912: Miles flown—1913, 205,000; 1912, 98,300. Flying days—1913, 336; 1912, 317. Hours in air—1913, 4,039; 1912, 1,966. Number of flights—1913, 36,817; 1912, 17,651. Machines broken—1913, 320; 1912, 165. Fatalities—1913, 12; 1912, 5.

NATIONAL ASSOCIATION OF PATRIOTIC INSTRUCTORS.

President—John B. Lewis. *Secretary*—Mrs. Elizabeth Robbins Berry, 8 Forest Street, North Cambridge, Mass. *Treasurer*—Geo. D. Kellogg, Newcastle, Tenn. *Objects*—The objects of this association shall be to afford all persons interested in the promotion of patriotism and good citizenship an opportunity for acquaintance and interchange of ideas and experiences; to study systematically the best methods for the advancement of patriotic work; by unity of effort to secure the enactment and enforcement of such laws as will safeguard our American institutions and protect our flag from insult or desecration, or displacement by any other banner, also of laws in every State for the flying of the flag over public buildings and schoolhouses. Headquarters, 101 Tremont Street, Boston, Mass.

PATRIOTIC INSTRUCTORS' ASSOCIATION.

President—Joseph H. Barker. *Vice-President*—Joseph W. Clymer. *Treasurer*—James S. Pierce. *Secretary*—James De La Montanye. *Headquarters*—314 West Fifty-third Street, New York City.

The object of the association is to enroll the members of the Grand Army of the Republic and other patriotic societies for the purpose of reaching the boys and girls in the public schools and other educational institutions of the United States and to endeavor to inculcate a true patriotic spirit, thereby establishing a permanent bulwark for the safeguarding of the Nation, knowing that this influence will lead to better citizenship.

Any person is eligible to membership who is a member of the Grand Army of the Republic, associate societies and auxiliaries thereto, all patriotic societies, teachers in the public schools, and any citizen of good repute.

The annual meeting, at which officers and directors for ensuing year shall be elected, will be held in the city of New York at the regular January meeting. Membership 600.

*Militia basis or system. †Estimated. ‡Under the new law, in addition to the regular army, there are to be available 450,000 men, distributed in the First and Second Reserves and territorial army. A National Guard has about 70,000 men. As the population is only 2,631,952 in Greece with probably 6,000,000 in adjacent countries, there is a total of 8,631,952. Assuming one-half of the population to be males, there would be 4,315,976, of whom about 40 per cent. would be of military age, there would be a military force of 1,726,390. With a military force of 470,000 in a total military population of 1,726,390, makes the percentage 27.2, which would seem rather high, considering that Greece is not a military country; the percentage for the German Empire being only 8.3 per cent. a Average. b No reliance is to be placed upon the untrained yet available men. c Every able-bodied man is liable for military duty. d War and peace strength of Great Britain do not include forces exterior of the British Isles.

ORGANIZATION OF THE ARMY.*

The Army in active service as now organized under the acts of Congress of February 2, 1901, January 25, 1907, April 23, 1908, and March 3, 1911, comprises 15 regiments of cavalry, 765 officers and 14,148 enlisted men; 6 regiments of field artillery, 252 officers and 5,513 enlisted men; a coast artillery corps, 170 companies, 715 officers and 19,019 enlisted men; 30 regiments of infantry, 1,530 officers and 34,128 enlisted men; 3 battalions of engineers, 1,942 enlisted men, commanded by officers detailed from the corps of engineers; the Porto Rico Regiment of Infantry, 32 officers and 591 enlisted men; staff corps, Service School detachments, Military Academy, Indian scouts, recruits, etc., 7 officers and 10,624 enlisted men, and a provisional force of 52 companies of native scouts in the Philippines, 182 officers and 5,733 enlisted men. The total number of commissioned officers, staff and line, on the active list, is 4,823 (including 99 first lieutenants Medical Reserve Corps on active duty, 60 dental surgeons, and 231 additional and detached line officers), and the total enlisted strength, staff and line, is 85,965, exclusive of the provisional force and the hospital corps. The law provides that the total enlisted strength of the army shall not exceed at any one time 100,000. * For Military Departments and Commands, see Index.

ENLISTMENT LAW FOR THE UNITED STATES ARMY.

The Army act of August 24, 1912, prescribes a seven years' term of enlistment in the Army after November 1, 1912, in lieu of the previous term of three years, the first four years with the colors in active service, and the remaining three years on furlough, without pay, and attached to the Army Reserve established by the same act. The Army Reserves are subject to be called into active service only in the event of actual or threatened hostilities.

A soldier after four years' continuous service, either under a first or any subsequent enlistment, may be re-enlisted for seven years and receive a final discharge from his prior enlistment, or after three years' continuous service may, upon his written request, be furloughed and transferred to the Reserve. Enlistment periods for service pay are counted as four years. First enlistments are confined to men between the ages of 18 and 35 years. All soldiers receive, in addition to their pay, rations, clothing, bedding, and medical attendance while with the colors.

The monthly pay during first enlistment ranges from \$15 to \$18 for privates. For non-commissioned officers the rates are \$21, \$24, \$30, \$40, \$45, \$50, \$65 and \$75, respectively, according to grade, arm or corps, and nature of duties. Master electricians of the signal corps and the Coast Artillery Corps, and chief musicians of bands, receive the highest rate, \$75 per month.

Additional pay of from \$1 to \$4 per month for continuous service is allowed during each enlistment period of four years, after the first, up to and including the seventh. In addition to all other pay, qualified or expert gunners, riflemen, sharpshooters and marksmen receive from \$2 to \$5 per month. Casemate electricians, plotters, planters, loaders, gun commanders, gun pointers, etc., of the Coast Artillery Corps receive from \$6 to \$9 per month additional. Twenty per cent. increase of pay is allowed for service in the Philippines and China.

Enlisted men may be retired after 30 years' service, with three-fourths of the pay of their grade, and \$15.75 per month additional in lieu of clothing, subsistence, quarters, fuel and light. Unmarried soldiers under 30 years of age of not less than two years' service may compete in examination for promotion to second lieutenant.

UNITED STATES MILITARY ACADEMY AT WEST POINT.

EACH Senator, Congressional District, and Territory including Porto Rico, Alaska, and Hawaii, is entitled to have one cadet at the Academy; the District of Columbia, two cadets. There are also forty appointments at large, specially conferred by the President of the United States. The law, however, provides that for six years, from July 1, 1910, whenever any cadet shall have finished three years of his course at the Academy his successor may be admitted.

Appointments are usually made one year in advance of date of admission, by the Secretary of War, upon the nomination of the Senator or Representative. These nominations may either be made after competitive examination or given direct, at the option of the Representative. The Representative may nominate two legally qualified second candidates, to be designated first and second alternates. The alternates will receive from the War Department a letter of appointment, and will be examined with the regular appointee, and the better qualified will be admitted to the Academy in the event of the failure of the principal to pass the prescribed preliminary examinations. Appointees to the Military Academy must be between seventeen and twenty-two years of age, free from any infirmity which may render them unfit for military service, and able to pass, unless a satisfactory certificate is submitted, a careful examination in English grammar, English composition, English literature, algebra through quadratic equations, plane geometry, descriptive geography and the elements of physical geography, especially the geography of the United States, United States history, the outlines of general history. The Secretary of War is authorized to permit not exceeding four Filipinos, to be designated, one for each class, by the Philippine Commission, to receive instruction at the United States Military Academy at West Point; Provided, That the Filipinos undergoing instruction shall receive the same pay, allowances, and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations; And provided further, That said Filipinos undergoing instruction on graduation shall be eligible only to commissions in the Philippine Scouts. Serve for 8 years, unless sooner discharged.

The course of instruction, which is quite thorough, requires four years, and is largely mathematical and professional. The principal subjects taught are mathematics, English, French, drawing, drill regulations of all arms of the service, natural and experimental philosophy, chemistry, chemical physics, mineralogy, geology, electricity, history, international, constitutional, and military law, Spanish, civil and military engineering, art and science of war, and ordnance and gunnery. About one-fourth of those appointed usually fail to pass the preliminary examinations, and but little over one-half the remainder are finally graduated. The discipline is very strict—even more so than in the army—and the enforcement of penalties for offences is inflexible rather than severe. Academic duties begin September 1 and continue until June 4. Examinations for cadets not having made satisfactory progress in studies are held in each December and June, and cadets found proficient in studies and correct in conduct are given the particular standing in their class to which their merits entitle them.

From about the middle of June to the end of August cadets live in camp, engaged only in military duties and receiving practical military instruction. Cadets are allowed but one leave of absence during the four years' course, and this is granted at the expiration of the first two years. The pay of a cadet is \$709.50 per year, and, with proper economy, is sufficient for his support.

Upon graduating cadets are commissioned as second lieutenants in the United States Army. The whole number of graduates from 1802 to 1914, inclusive, has been 5,312. It is virtually absolutely necessary for a person seeking an appointment to apply to his Senator or Member of Congress. The Superintendent is Colonel Clarence Page Townsley, Coast Artillery Corps, U. S. A., and the military and academic staff consists of 136 persons.

THE TRIPLE ALLIANCE AND THE TRIPLE ENTENTE.

Of the several triple alliances that have been formed in Europe, probably the one better known is the one entered into by Germany, Austria-Hungary, and Italy, which was concluded and signed May 20, 1882. It appears that the aim of Italy in joining the alliance was to protect herself and to isolate her enemy, France, in Europe. There was in existence a defensive treaty between Germany and Austria-Hungary, which was signed October 7, 1879, but not made public until 1888.

The establishment of a protectorate over Tunisia aroused considerable resentment in Italy as imposing a menace to the South Italian and Sicilian coasts, and undoubtedly hastened the formation of the Triple Alliance. This compact was to last five years, and on March 17, 1887, it was renewed. It was a defensive alliance, and specified the disposition of the military forces in the event of an attack by either France or Russia, or by both simultaneously, but contained (in the renewal) no provision for offensive warfare; thus the terms in regard to an offensive demonstration by Italy were modified. In March, 1891, it was renewed for a period of twelve years, and on June 26, 1902, it was again renewed for a period of twelve years, terminating in May, 1909. It appears that in the early part of December, 1912, it was renewed.

Germany and Russia, by a secret convention concluded in September, 1884, guaranteed to each other "a benevolent neutrality" in case of hostilities between Russia and Great Britain.

In order to secure the consent of Italy to a renewal, Germany made certain conciliations in regard to the commercial products of Italy. Thus the signature of Italy insured European peace and guaranteed German security. Of recent years there has been quite a change of feeling on the part of Italy toward France, tending to an amicable settlement of disputes.

Great Britain, noting the increase in the naval programmes of the several countries, and having adopted the two-power standard for her navy, entered into agreements with France and Russia to secure the balance of power and maintain the peace of Europe. The Anglo-French agreements were signed April 8, 1904, published April 12, 1904, and ratified by France November 13, 1904. It defined the spheres of influence in regard to Egypt, Morocco, Newfoundland, West Africa, Siam, Madagascar, and the New Hebrides. The Anglo-Russian agreements were signed August 31, 1907, but its full terms were not published until September 24, 1907. The spheres of influence in Asia were thus practically defined in view of the Anglo-Japanese Alliance.

Great Britain, maintaining a large fleet in the Mediterranean by reason of its interests, has always fostered a friendliness toward Italy. The conclusion of a commercial treaty with France, coupled with her friendliness for Great Britain, has thus practically isolated Germany in Europe. The understandings reached by Italy with Great Britain and France have caused the Triple Alliance to lose much of its practical importance, and enables Austria-Hungary and Italy to assume a more independent attitude toward Germany.

The formation of the Balkan League has injected another disquieting feature into European politics, especially those of Germany and Austria-Hungary.

The Triple Entente, comprising Great Britain, France, and Russia, and the friendliness of Italy, is formed of nations having a common interest and who are friendly toward each other, amounting to a reciprocal regard, whereas the Triple Alliance is formed of nations who have nothing in common and who, furthermore, are mortal enemies. It is to be noted in this connection that Germany was the only nation that DID NOT offer condolences in regard to the catastrophe caused by the eruption of Vesuvius.

The aims of the Triple Entente are substantially as follows: 1. To maintain a balance of power. 2. To preserve peace and the *status quo*. 3. To further the interests of peace by means of treaty laws. 4. Disarmament and the lessening of the expenditures for armaments.

The mobilization of the land forces of the Triple Entente would place approximately 11,503,128 men in the field, excluding those of India and the colonial possessions of Great Britain, with about 29,803,050 untrained men available for duty but unorganized. The Triple Alliance could mobilize about 12,380,200 men, with about 4,363,060 untrained men available for duty but unorganized. It would seem probable that the Balkan League would ally itself to the Triple Entente in order to preserve their own integrity.

The naval forces of the Triple Alliance and the Triple Entente are as follows:

MILITARY SMALL ARMS.

COMPILED FROM LATEST AVAILABLE DATA. CHANGES ARE FREQUENTLY MADE, AND IT IS DIFFICULT TO PRESENT ACCURATE STATISTICS.

About 1880 all the civilized countries began arming their troops with magazine rifles of small calibre, using high power cartridges with smokeless powder. Modifications and improvements in these as well as in carbines and pistols, have materially added to their effectiveness. At the present time no great difference exists in the effectiveness of the kinds of rifles with which the armies of the great powers are supplied with regard to their ranges and shooting qualities. It is well known that the effectiveness of any arm depends greatly on the experience and skill of the men who use it, and that, other things being equal, the troops most thoroughly instructed and drilled in the use of the rifle are the most efficient in battle.

An automatic rifle will be, doubtless, the military weapon of the near future. The United States and nearly all of the principal countries of Europe have been experimenting with rifles of this type. It seems, however, that, as yet, no automatic shoulder rifle has been brought forward that is considered to be sufficiently reliable and effective for war purposes to justify the great expense of adopting it in the place of those now in use.

A few years ago the Mexican Government ordered some 4,000 rifles of the automatic type, known as the "Mondragon," with which to arm part of its army. This gun has the same calibre and uses the same cartridge as the German Mauser, with which the Mexican troops are mostly armed, but information as to the result of this experiment of introducing an automatic rifle to actual military use is lacking.

Germany adopted an automatic pistol for military use in 1908. The United States has adopted for the army and navy, in place of the service revolver, the Colt automatic pistol, after extended experiments and tests. This is regarded as a very effective weapon. Its length is 8.5 inches; length of barrel, 5 inches; weight, 2 lbs. 7 oz.; calibre, .45; cartridges in magazine, 7. The German automatic pistol has a length of 8.54 inches; length of barrel, 4.02 inches; weight, 1 lb. 13½ oz.; calibre, .35; cartridges in magazine, 8.

The core of the bullet used in the above mentioned rifles is hard lead, except the German bullet, which is soft lead. The French, copper, and the United States, lead and tin. Mostly all the bullets are pointed. The pointed bullet was first adopted by the French some years ago.

MILITARY EDUCATIONAL SYSTEM OF THE UNITED STATES.

THE military educational system of the United States, exclusive of the Military Academy at West Point, comprises the following:

I. The Army War College, Washington, D. C., under the management of a President and directors detailed from officers of the army. The course of instruction is for one year, beginning September 1. A limited number of officers not below the rank of captain, selected on account of exceptional efficiency and fitness, are detailed annually for instruction. The purpose of the college is to make practical application of knowledge already acquired, not to impart academic instruction.

II. The Army Service Schools. The group of schools established at Fort Leavenworth, Kansas, consisting of the Army School of the Line as the basic school, the Army Staff College, the Army Signal School, the Army Field Engineer School, and the Army Field Service and Correspondence School for Medical Officers as special affiliated schools, are designated the Army Service Schools, and are under the direction of a Commandant not of lower grade than that of a Brigadier-General.

The course of instruction at the schools, except as otherwise stated, is included in one term from September 1 to June 30 of the following year.

1. The Army School of the Line. The object of this school is the instruction of selected officers from the line of the army in the leading and care of troops in time of war and their training in time of peace. The Assistant Commandant of the Army Service Schools is also the Director of the School of the Line.

Upon graduation, the student class are graded, in order of merit, as "honor graduates," "distinguished graduates," and "graduates," respectively.

2. The Army Staff College, for the instruction of officers detailed annually from the highest graduates of the latest class of the School of the Line, recommended by the Academic Board of that school. The object of this college is to impart instruction to officers in the duties of the general staff of an army; to prepare them for the Army War College and to investigate military inventions, discoveries and developments.

The Commandant, Assistant Commandant, Secretary and Senior Instructors of the School of the Line hold corresponding positions in the Staff College.

3. The Army Signal School, for instruction of officers of the Signal Corps in their duties, including aeronautics; for instruction of officers of the line, who are designated therefor, in signal duties, and to make research and experiments in subjects pertaining to the work of the Signal Corps. The school is under the general direction of the Commandant of the Army School of the Line.

4. The Army Field Engineer School, for the instruction of officers of the Engineer Corps, not exceeding ten, and engineer officers of the National Guard.

5. The Army Field Service and Correspondence School for Medical Officers, for the instruction of officers of the Medical Corps and of the National Guard. Part one of this school requires attendance in person for a graded course of study, and part two for a course by correspondence. The course of instruction is eight weeks, from April 1 of each year. Students who complete the course satisfactorily receive certificates of proficiency.

III. The Army Medical School, Washington, D. C., for the instruction of medical officers of the army, candidates for appointment in the Medical Corps, and medical officers of the National Guard. The faculty consists of a President and Instructors. The course of instruction is for eight months, from October 1 each year. Graduates receive diplomas.

IV. The Coast Artillery School, Fortress Monroe, Virginia. The object of this school is to enlarge the field of instruction of the garrison schools for Coast Artillery officers by advanced courses of study and practical training in technical duties; to prepare specially selected officers for the more important positions in the Coast Artillery; also to educate and train selected enlisted men for the higher non-commissioned staff grades in the Coast Artillery. The courses of instruction for officers and enlisted men are each comprised in one school year, from January 3 to December 1. Special courses in ballistics are also provided.

Officers who are graduated are furnished with diplomas, as "honor graduates," "distinguished graduates," or "graduates," according to their standing.

V. The Engineer School, Washington Barracks, D. C. This school is under the control of the Chief of Engineers. Its object is to prepare junior officers of engineers for the active duties of their corps; to make experiments and recommendations, and to give instruction pertaining to the civil engineering work of the army. The course of instruction is one year, beginning September 1. Diplomas are given to students who successfully complete the course.

VI. The Mounted Service School, Fort Riley, Kansas, is under the command of a general officer, who also commands the post of Fort Riley. The object of the school is to give practical instruction to field and company officers of cavalry and field artillery, and to farriers and horse-shoers. The courses for field officers begin April 1 and October 10; the course for company officers is from September 25 to June 30, following, and for farriers and horse-shoers two courses of four months each. Company officers who are graduated receive diplomas.

VII. The School of Fire for Field Artillery, Fort Sill, Oklahoma, for practical instruction in field artillery firing. Courses of instruction are prescribed: A, for captains and lieutenants; B, for field officers of field artillery; C, for non-commissioned officers, and D, for officers of the militia. Officers and enlisted men who complete any course satisfactorily receive certificates of proficiency.

VIII. School of Musketry, Fort Sill, Oklahoma, for instruction in small-arms firing.

IX. Garrison Schools, one at each military post, for the instruction of officers of the army and the National Guard, in subjects pertaining to their ordinary duties. The course covers three years and the annual terms five months each, from November 1. Certificates of proficiency in each subject of study are given to those who pass the prescribed examination therein.

X. Post Schools for Instruction of Enlisted Men in the common branches of education and military subjects.

XI. Schools for Bakers and Cooks, at The Presidio of Monterey, California; Washington, D. C., and Fort Riley, Kansas, for the instruction of selected enlisted men.

Officers of the National Guard are admitted to most of the Army Schools, under the Militia law of January 21, 1903, and regulations prescribed by the War Department. They must be nominated by the Governors of their States. Those admitted to any of the schools receive mileage and money commutations for subsistence, quarters, etc. A considerable number of militia officers enter these schools, notably the garrison schools, annually.

THE ORGANIZED AND UNORGANIZED MILITIA OF THE UNITED STATES.

(Compiled for THE WORLD ALMANAC from the latest official reports.)

The Militia law of January 21, 1903, as amended by the act of May 27, 1908, provides; "That the militia shall consist of every able-bodied male citizen of the respective States and every able-bodied male of foreign birth who has declared his intention to become a citizen, who is more than 15 and less than 45 years of age, and shall be divided into two classes—the organized militia, to be known as the National Guard or by such other designations as may be given them by the laws of the respective States or Territories; the remainder to be known as the reserve militia."

(a) No organized militia. Alaska has no militia, though provision is made for such if need arises. Guam and Samoa have each a small provisional force, used more for police purposes than for military. The Philippines have a constabulary force which can be used either for police or war purposes, provided the latter is on the islands. Porto Rico has a regiment of eight companies of infantry which is a part of the army. The enlisted men of this regiment are natives of Porto Rico. The reserve militia in the Southern States is assumed to include negroes capable of bearing arms.

COST OF MAINTAINING ARMIES AND NAVIES.

(Does not include special or war emergency appropriations incidental to the present war).

The cost of the British Army, according to estimates for 1914-15, amounts to \$143,331,350. The estimates for the Navy for 1914-15 are placed at \$256,150,026. The United States Army appropriations for 1914-15 amount to \$894,229,047, not including the expenditure by the several States on their National Guard or the enormous sums paid for pensions to ex-volunteers. The Navy appropriations for 1915 amount to \$147,161,320. The estimated military expenditure of the German Empire in the budget for 1914-15 amounts to \$293,289,155. The German Naval estimates for 1914-15 amount to \$113,918,367. The military budget of France for 1914 shows an estimated expenditure of \$202,141,122. The Navy estimate for 1915 amounts to \$96,255,733. Italy during 1914-15 spends about \$50,600,000 on her Navy, and about \$80,025,234 on her Army. The military budget of Russia for 1914-15 calls for \$393,193,808 and the Navy expenditures in 1914-15 amount to about \$129,298,966. The Army estimate of Austria-Hungary for 1914 was \$47,571,755, and for the Navy \$35,975,338. The military expenditure of Japan for 1915 will be about \$47,037,809. The Navy estimates for 1914-15 amounts to \$50,000,000.

* This does not include cost of fortifications, Military Academy, etc., but only for the Army. † This includes construction of ships, Naval Academy, Navy Yards, etc. ‡ Excluding cost of Colonial troops not serving in France.

(a) Figures to the nearest dollar. The base pay in all armies is increased for length of service by percentages similar in all. In European armies officers receive extensive allowances in addition to their pay. The laws and regulations in the different countries about pay and allowances are so voluminous and cover so many varying conditions that a simple comparison of the amounts received either in pay or allowances is very difficult. The table gives, however, approximately the minimum pay for the grade.

(b) Grade of Lieut.-General discontinued in United States by act of Congress, March 2, 1907.

(c) In the British army and many others the grade of Brigadier-General is not a permanent grade, but is temporary and ex-officio only.

(d) In United States pay is increased with each enlistment to the seventh. Enlisted men may retire on thirty years' service with 75 per cent. of pay and allowances.

NOTE.—The United States and Great Britain are the only countries having volunteer armies, and the United States the only one having a thoroughly democratic army in which both officers and men are drawn from all walks of life and which, therefore, has to offer monetary inducements in competition with the wages of labor.

In a memorandum for the Secretary of War on the subject of the pay and allowances of the different countries Brig.-Gen. M. M. Macomb, President of Army War College, made the following remarks:

"In order to make intelligent comparison of the figures given it is necessary to take into account—

1. The purchasing power of a dollar, or the cost of living in different countries.

2. That the United States and Great Britain are the only countries adhering to a volunteer system and hence having to offer monetary inducements for soldiers in competition with the wages of labor.

3. That as regards officers, the United States has the only democratic volunteer army. Its officers are drawn from all walks of life, and it is supposed that their salaries are sufficient to support them and their families.

In Great Britain officers are drawn almost entirely from the upper and wealthier classes, and it is not supposed that their salaries are sufficient to support them. For example, second sons and remittance men generally, if possible, become officers of the army or navy, enter the diplomatic service or the clergy.

In Germany an officer before receiving permission to marry must show that he or his wife has sufficient private income to maintain himself according to his position.

In the matter of pay a simple comparison of the figures in this table, without having in mind the preceding remarks, can only lead to erroneous conclusions.

ALLOWANCES.

In the matter of allowances, all soldiers in all armies receive quarters, clothing, and rations. All officers receive quarters or allowance in lieu

thereof. All mounted officers receive allowances for horse and equipment. Beyond these the allowances in different armies are impossible of comparison. In the United States officers receive allowances for fuel and light, extra pay when on aviation duty, and both officers and soldiers receive additional pay for tropical service.

In European armies the pay for different duties and the allowances for different circumstances are so many that books are required to cover them. In Russia, for example, the subject of pay is covered only in four volumes.

In England additional pay is given for foreign service, for command, for armament pay, for engineer pay, for corps pay, and allowances for fuel, light, servants, mess, official entertainments, etc.

In France additional pay is given for children, for belonging to the Legion of Honor, for prison duty, for marches and manœuvres, for being stationed in Paris (on account of the high cost of living), etc., and allowances for service expenses incident to commands, office expenses, etc.

In general, the allowances in Europe for officers are relatively greater than in the United States and the pay less. But the allowances are so varied, not only between different grades but between officers and soldiers of the same grades, and the whole subject so comprehensive that any attempt to reduce the allowances of the armies of the world to a uniform basis so that they can be compared in a table is an impossibility.

AMERICAN TRUTH SOCIETY.

This society was organized January 18, 1912, in New York City and incorporated February 9, 1912, under the laws of the State of New York.

The object of this society is: "To propagate a spirit of pure Americanism; to preserve the traditions of the United States inviolate; to oppose and resist by truth all attempts of corporations, societies and individuals to dominate the public opinion of the United States for the purpose of discriminating in the interests of any one race by means of legislation, literature, education or organized propaganda; to propagate the History of the United States and the States comprising the United States amongst the people of the United States, and to combat with truth all attempts to garble, falsify, misrepresent or suppress the History of the United States or the States comprising the United States, anywhere within the State of New York and the United States."

THE BIG BROTHERS' MOVEMENT.

The object of the movement is to assist and guide unfortunate boys to good citizenship and respectable living, particularly boys coming before the Children's Court, by personal influence and assistance. While organizations and institutions are utilized, the emphasis is placed on personal helpful relations. During the year ending September 30, 1913, 3,640 boys were cared for by Big Brothers. Only 63 of these were again before the court; 578 men are working as Big Brothers; 1,460 personal visits were made to boys' homes; 412 boys were sent to Summer camps; 1,562 boys called at the office of the movement for advice and guidance, and 262 boys obtained employment. President—Franklin C. Hoyt. Vice-Presidents—Luther H. Lewis, Robert L. Gerry. Chairman Executive Committee—Ernest K. Coulter. Secretary—Charles A. Tausig. Treasurer—Francis J. Danforth. General Secretary—R. C. Sheldon. Headquarters, 200 Fifth Avenue, New York City. Eight hundred and eight boys came through the Children's Court; 324 boys came through parents, social workers, etc.; total new cases for the year, 1,132; 48 cities have actually started the movement along the same line.

SOLDIERS' HOMES.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.

President of the Board of Managers... Major James W. Wadsworth, 346 Broadway, New York City.
Secretary..... Lieutenant Oscar M. Gottschall, Dayton, Ohio.

There are branches of the National Home at Dayton, Ohio; Millwaukee, Wis.; Togus, Me.; Hampton, Va.; Leavenworth, Kan.; Santa Monica, Cal.; Marion, Ind.; Danville, Ill.; Johnson City, Tenn., and Hot Springs, S. Dak. The aggregate number of members cared for is about 35,000.

REQUIREMENTS FOR ADMISSION.

1. An honorable discharge from the United States service during a war in which it was engaged.
2. Disability which prevents the applicant from earning his living by labor.
3. Applicants for admission will be required to stipulate and agree to abide by all the rules and regulations made by the Board of Managers, or by its order; to perform all duties required of them, and to obey all the lawful orders of the officers of the Home. Attention is called to the fact that by the law establishing the Home the members are made subject to the Rules and Articles of War, and will be governed thereby in the same manner as if they were in the Army of the United States.
4. A soldier or sailor must forward with his application for admission his Discharge Paper, and when he is a pensioner, his Pension Certificate, which papers will be retained at the branch to which the applicant is admitted, to be kept there for him, and returned to him when he is discharged. This rule is adopted to prevent the loss of such papers and certificates, and to hinder fraudulent practices; and no application will be considered unless these papers are sent with it. If the original discharge does not exist, a copy of discharge, certified by the War or Navy Department, or by the Adjutant-General of the State, must accompany the application.

There are State Homes for disabled volunteer soldiers provided by the States of California, Colorado, Connecticut, Idaho, Illinois, Indiana, Iowa, Kansas, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Dakota, Vermont, Washington, Wisconsin, and Wyoming.

UNITED STATES SOLDIERS' HOME FOR THE REGULAR ARMY.

The United States Soldiers' Home in the District of Columbia receives and maintains discharged soldiers of the regular army. All soldiers who have served twenty years as enlisted men in the army (including volunteer service, if any), or who have served in any war, and all soldiers of less than twenty years' service who have incurred such disability, by wounds, disease, or injuries in the line of duty while in the regular army, as unfits them for further service, are entitled to the benefits of the Home.

A pensioner who enters the Home may assign his pension, or any part of it, to his child, wife, or parent, by filing written notice with the agent who pays him. If not so assigned, it is drawn by the treasurer of the Home and held in trust for the pensioner, to whom it is paid in such sums as the governor of the Home deems proper while he is an inmate of the Home, the balance being paid in full when he takes his discharge and leaves the Home.

Inmates are subject to the Rules and Articles of War, the same as soldiers in the army. They are comfortably lodged, fed, and clothed and receive medical attendance and medicine, all without cost to them. There are 1,462 men now receiving the benefits of the Home.

Applications for admission to the Home may be addressed to the Board of Commissioners, U. S. Soldiers' Home, War Department, Washington, D. C., and must give date of enlistment and date of discharge, with letter of company and number of regiment for each and every term of service, and rate of pension, if any, and must be accompanied by a medical certificate showing nature and degree of disability if any exists.

THE BOY SCOUTS OF AMERICA. ORIGIN AND GROWTH OF SCOUTING

LIKE many other things showing permanence and power, the Scout movement can be traced back to widely separated sources where constructive ideas came to boy workers and were tested with varying degrees of success. In America there were a number of originators of methods, plans, and principles that have proved effective. In Great Britain, Lieut.-Gen. Sir Robert S. S. Baden-Powell became active in organization work based largely on the ideas and methods of American workers. He did this so successfully that the enrolment of British Boy Scouts soon grew into the hundred thousands, with the emphasis, not on the military note, but on peace virtues and learning practical trades. Then the movement spread to Germany, France, Italy, Australia, and New Zealand, to Canada and the United States; to South American republics; in short, almost the world over, since it is already established in twenty-seven different countries in addition to the numerous colonial possessions of Great Britain and the United States. Everywhere it has shown adaptation to new fields and nationalities.

In Germany the boys have engaged in the work with such enthusiasm and in such numbers that the Prussian and Bavarian authorities are giving the movement financial aid. But it has been left to the United States to show what the system of scouting can accomplish, when it returns to the land in which the larger number of its working ideas and principles originated. While the number of Boy Scouts enrolled throughout the world is estimated as not less than two millions, one-sixth of the whole number are in the United States. The emphasis and ideals of the movement belong here also to the highest plans—that of efficient citizenship, service, and character-building.

"The Boy Scouts of America," the name under which the movement in the United States was incorporated February 8, 1910, has as its Honorary President the Hon. Woodrow Wilson, President of the United States, and Hon. William H. Taft and Col. Theodore Roosevelt as its Honorary Vice-Presidents. Associated with these in approval and promotion of the movement are eminent citizens from all walks of public life, who are members of the National Council and of the local councils in the cities and towns of the whole country, and a host of others who earnestly co-operate in the work.

A group of men, representing the various religious and civic organizations of the community that are engaged in boys' work, are brought together as a local council for the promotion of Scout work. This local council receives a charter from the national organization, giving them full authority to deal with all questions relating to scouting in that district and to pass upon all Scout Masters' applications. In many cases this council engages a boys' work director, to be known as the Scout Commissioner, to take charge of the work in that community. He is responsible to the local council for the direction and promotion of the work. He is the leader of the Scout Masters, and as such gives such instructions and help as may be necessary, arranges inter-troop meets, games, camps, and in general makes uniform the plan of work conducted in that community. The Scouts are organized in patrols and troops. Eight boys constitute a patrol, one of whom is chosen as the Patrol Leader. Three patrols make up a troop. The Scout Master is the adult leader of the troop. Already there are about 700 local councils in as many cities throughout the United States and under the direction of each there are from five to one hundred and fifty Scout Masters in charge of troops.

The Scout programme is proving practicable as a civic enterprise. There are many cities so thoroughly organized that every phase of boy life in the community is being reached by Scout activities. The movement is adapting itself not only to the wealthy classes, but to the boys of the slums, to the newsboys and to foreign boys alike. Over six thousand Scout Masters are already registered with the national organization, representing about 300,000 boys that are being reached by the movement. Work to some extent has been started in practically every city in this country having a population of 4,000 or over, besides in the Hawaiian Islands, the Philippine Islands, Porto Rico and Guam. Any boy, of any class or creed, over 12 years of age, is eligible to become a Scout. The initial requirements are that he know the Scout salute, sign and laws, and that he take the Scout oath. By meeting certain requirements, he is in line to become a Tenderfoot, Second-Class and First-Class Scout.

Scouting means outdoor life, and so health, strength, happiness and practical education. By combining wholesome, attractive outdoor activities with the influence of the Scout oath and law, the movement develops character and worth-while ability.

Scoutcraft includes instruction in first aid, life saving, tracking, signalling, cycling, nature study, seamanship, campcraft, woodcraft, chivalry and all the handicrafts.

It is one of the principal purposes of the Boy Scout movement, abroad as well as in our own country, to teach boys that to create is better than to destroy, and that peace, not war, will make a great nation. This claim is amply borne out by the splendid first aid and other humanitarian services of the most practical nature rendered by the Scouts in the present European war.

The national organization is largely maintained by public subscriptions. Sustaining and Contributing Memberships are issued to men and women throughout the country who are financially assisting in the development and promotion of this organization among boys.

The United States Marine Corps is an independent branch of the military service of the United States, serving generally under the direction of the Secretary of the Navy. The corps may be detached by order of the President for service with the army, and on various occasions parts of the corps have so served.

Marines served on shore and on board vessels of the navy throughout the Revolutionary war, two battalions having been authorized by the Continental Congress November 10, 1775, but the present organization dates from July 11, 1798, when an act of Congress was approved for establishing and organizing a marine corps to consist of 1 major, 4 captains, 16 first lieutenants, 12 second lieutenants, 48 sergeants, 48 corporals, 32 drums and fifes and 720 privates.

The authorized strength of the corps (September, 1914) was 346 officers and 9,921 enlisted men, as follows: 1 major-general commandant, 11 colonels, 12 lieutenant-colonels, 28 majors, 107 captains, 97 first lieutenants, 90 second lieutenants, 12 sergeant-majors, 79 quartermaster sergeants, 1 drum major, 114 first sergeants, 86 gunnery sergeants, 480 sergeants, 897 corporals, 124 drummers, 124 trumpeters, 1 leader of the band, 1 second leader of the band, 30 first-class musicians, 30 second-class musicians and 7,942 privates.

The following duties are assigned to the marine corps: To garrison the different navy yards and naval stations, both within and beyond the continental limits of the United States. To furnish the main line of the mobile defence of naval bases and naval stations beyond the continental limits of the United States. To man such naval defences, and to aid in manning, if necessary, such other defences as may be erected for the defence of naval bases and naval stations beyond the continental limits of the United States. UNITED STATES NAVAL ENLISTMENT.

The term of enlistment in the Navy is four years, except for boys under eighteen, who enlist for minority, with the consent of parents or guardian. Minors over eighteen are enlisted without the consent of parents or guardian, but they must furnish a birth certificate or verified written statement of parent or guardian as to their age. Only American citizens of good character who may reasonably be expected to remain in the service are enlisted, and every applicant must pass the required physical examination, be able to read and write English and take the oath of allegiance. No boy under seventeen can be enlisted except by special permission from the Department.

Information regarding rates, with pay, opportunities for advancement, allowances, etc., can be obtained by addressing: BUREAU OF NAVIGATION, NAVY DEPARTMENT.

NAVY RECRUITING SERVICE.

On July 1, 1910, publicity offices were established at New York, N. Y. (153 W. 23d St.) for the Eastern district, and Indianapolis, Ind. (P. O. Bldg.) for the Western district, where full information regarding the pay, opportunities, etc., of service in the United States Navy may be obtained. Inquiries from the different States should be sent to the nearest of the two districts enumerated above. Address "Publicity Office, Navy Recruiting Service, 153 W. 23d St., N. Y.," or "Indianapolis, Ind.," as the case may be. All inquiries will be promptly answered by an officer of the navy. Better still, if you are in a position to do so, call at the nearest station and get all information first hand from the enlisted men who have seen service in our Navy.

The origin of the Navy Department may be said to date from October 13, 1775, when Congress authorized the equipment of two cruisers, mounting respectively 10 and 14 guns. Before the end of that year 15 more vessels of from 20 to 36 guns were authorized. The affairs of the Navy were at that time intrusted to a "Marine Committee." In 1798 the present department was formally created, and Benjamin Stoddart appointed the first Secretary.

NAVY YARDS.

1. New York Navy Yard, Brooklyn, N. Y.
2. Boston Navy Yard, Boston, Mass.
3. Norfolk Navy Yard, near Norfolk, Va.
4. Portsmouth Navy Yard, Portsmouth, N. H.
5. Philadelphia Navy Yard, Philadelphia, Pa.
6. Mare Island Navy Yard, near San Francisco, Cal.
7. Washington Navy Yard, Washington, D. C.
8. Puget Sound Navy Yard, Bremerton, Wash.
9. Charleston Navy Yard, Charleston, S. C.

There are naval stations at Key West, Fla., and New Orleans, La.; a torpedo and training station at Newport, R. I., a training station on Yerba Buena Island, Cal., and a training station at No. Chicago, Ill., and the Naval War College, Newport, R. I.

Naval stations have been established at Tutuila, Samoa; Island of Guam; Guantanamo, Cuba; Honolulu, H. T.; Cavite, and Olongapo, Philippine Islands. The latter has become an important naval base for the Asiatic Fleet.

OLD VESSELS.

There are in the Navy a small number of old vessels which are unserviceable for war purposes. A number of these vessels are in service as receiving ships at the principal navy yards.

TUGS.

There are 45 tugs in the Naval Service, of which the Ontario and Sonoma have a displacement of 1,120 tons, and the two smallest, the Chickasaw and Waban, 100 and 150 tons respectively. These vessels are distributed among the various naval stations in the United States and the Philippine Islands.

a. In the United States and nearly all other countries, Admiral is the highest naval grade. *b.* Base pay or pay proper of officers. For increase for length of service, etc., see Navy Pay Roll. *c.* Pay proper; does not include allowances. *d.* Does not include table money. *e.* Data for enlisted personnel not available. * This table gives, approximately, the correct average of pay of each grade. It is practically impossible to give the exact amounts received by officers because of differences of pay of the same grade under varying conditions.

UNITED STATES NAVAL ACADEMY AT ANNAPOLIS.

THE students of the Naval Academy are called Midshipmen. Two Midshipmen are allowed for each Senator, Representative, and Delegate in Congress, two for the District of Columbia, ten each year from the United States at large, and fifteen each year from the enlisted personnel of the Navy, who have been one year in the service. The appointments from the District of Columbia and ten each year at large are made by the President, while the fifteen each year from the enlisted personnel of the Navy are made by the Secretary of the Navy after a competitive examination. One Midshipman is allowed from Porto Rico, who must be a native of that island. The appointment is made by the President, on the recommendation of the Governor of Porto Rico. The Congressional appointments are equitably distributed, so that as soon as practicable each Senator, Representative, and Delegate in Congress may appoint one Midshipman during each Congress. The course for Midshipmen is four years at the Academy, when the succeeding appointment is made, and the examination for graduation takes place. Midshipmen who pass the examination for graduation are appointed to fill vacancies in the lower grade of the Line of the Navy, in the order of merit as determined by the Academic Board of the Naval Academy. The act of June 29, 1906, prescribes that the Secretary of the Navy shall as soon as possible after June 1 of each year preceding the graduation of Midshipmen in the succeeding year, notify in writing each Senator, Representative, and Delegate in Congress of any vacancy that will exist at the Naval Academy because of such graduation, and which he shall be entitled to fill by nomination of a candidate and one or more alternates therefor. The nomination of candidate and alternate or alternates to fill said vacancy shall be made upon the recommendation of the Senator, Representative, or Delegate, if such recommendation is made by March 4 of the year following that in which said notice in writing is given, but if it is not made by that time the Secretary of the Navy shall fill the vacancy by appointment of an actual resident of the State, Congressional District, or Territory, as the case may be, in which the vacancy will exist, who shall have been for at least two years immediately preceding the date of his appointment an actual and bona fide resident of the State, Congressional District, or Territory in which the vacancy will exist, and of the legal qualification under the law as now provided. Candidates allowed for Congressional Districts, for Territories, and for the District of Columbia must be actual residents. Candidates at the time of their examination must be physically sound, well formed and of robust constitution. Attention will also be paid to the stature of the candidate, and no one manifestly under size for his age will be received at the Academy. The height of candidates for admission shall not be less than 5 feet 2 inches between the ages of 16 and 18 years, and not less than 5 feet 4 inches between the ages of 18 and 20 years; and the minimum weight at 16 years of age shall be 100 pounds, with an increase of not less than 5 pounds for each additional year or fraction of a year over one-half. Any marked deviation in the relative height and weight to the age of a candidate will add materially to the consideration for rejection. Candidates must be unmarried, and any Midshipman who shall marry, or who shall be found to be married, before his graduation, shall be dismissed from the service. All candidates must, at the time of their examination for admission, be between the ages of 16 and 20 years. The pay of a Midshipman is \$600, beginning at the date of admission. The regulations regarding places and times of examinations and subjects of examinations may be obtained by addressing the Chief of the Bureau of Navigation, Navy Dept., Washington, D. C.

POINTS CONCERNING UNCLE SAM'S NAVY.

To provide for the welfare and comfort of the officers and enlisted men of the Navy during the fiscal year of 1915, it is going to cost Uncle Sam just \$40,050,724. Of this amount \$10,555,644 is required to pay the officers on the active list, while the retired officers receive the sum of \$3,099,433.

The perquisites allowed officers of the Navy will aggregate about three-quarters of a million dollars in 1915. Of this amount \$500,000 will be spent in providing quarters for those officers who cannot be accommodated in buildings or houses maintained by the Government, and \$225,000 for the item of heat and light for officers using other than Government quarters and in Government quarters where no heating and lighting plant is maintained by the Government; also the item of rations for enlisted men and certain officers, which figured at 30 cents a day amounts to nearly \$5,500,000. The sum of \$540,000 is required to pay the midshipmen under instruction at the Naval Academy.

The pay of the enlisted men of the Navy is divided into the following items. Pay of 48,000 petty officers, seaman, etc., \$22,465,873; 3,500 apprentices under training, \$742,637; 423 retired enlisted men, \$359,127, and 1,000 enlisted men in prisons undergoing sentences of court-martial, etc., \$353,930.

Each man in the Navy holding an honorable discharge receives a bounty. This item will cost the Government \$964,812 in 1915. There is also required the sum of \$34,568 for interest on the deposits held by Uncle Sam for the enlisted men of the Navy. One hundred and sixteen thousand, five hundred and eighty dollars is required to pay the Female Nurse Corps of the Navy and \$15,120 is allowed them for commutation of quarters.

Each officer or enlisted man in the Navy who dies from wounds or disease contracted in the line of duty is entitled to have paid to his beneficiary a sum equal to one-half of his annual pay. For this purpose the sum of \$75,000 will be required for the fiscal year 1915.

MORTALITY OF THE NAVY AND MARINE CORPS.

For comparison with civil mortality statistics, the following data concerning the mortality of the United States Navy and Marine Corps were supplied by the Surgeon-General of the navy:

The low rates as compared with those of the registration area are, of course, dependent upon the special age distribution of the naval force, which is for the most part composed of men in the most favorable periods of life. The marked reduction in the mortality of the entire service from 8.88 in 1900 to 4.08 in 1912 is notable. Comparative figures for the English Navy, 1911, are as follows: Average strength of service afloat, 117,100; total deaths, 366, or 3.12 per 1,000; deaths from diseases, 260 or 2.22 per 1,000; deaths from violence, 106 or 0.90 per 1,000.

The officer in the Navy Department, Washington, having charge of Naval Militia matters is Commander F. B. Bassett, Jr., U. S. N.

Principal Battleships of Naval Powers.

(Compiled from the latest authentic sources of official information. Only the principal and more modern battleships are given. Most of the principal powers possess powerful armored cruisers equal to or in greater number than battleships, and in addition many vessels of smaller and older types.)

Following Great Britain, the first naval power, Germany now ranks second, the United States third, France fourth, Japan fifth, Russia sixth, Italy seventh, and Austria eighth.

THE COLORADO STRIKE.

In all the history of labor troubles in the United States there is no chapter to equal that which must, eventually, deal with the coal miners' strike in the State of Colorado. That strike has been the most stubborn, the most prolonged and, as regards human life, the most brutal on record. Beginning on September 25, 1913, when the United Mine Workers of America ordered out over 10,000 men, it has continued uninterrupted ever since, presenting scenes nothing short of civil war within the area of a sovereign State. By degrees the operations of the strike were confined to the southern coal fields of that State, of which the town of Trinidad is the centre. Verified reports give the number of killed in engagements between the State Militia and the armed strikers as 175. No complete record has yet been made, and the miners' leaders claim the total killed is nearer 200. Women and children were among the killed.

More lives were sacrificed in a three-day engagement between the militia and the miners than at the occupation of Vera Cruz. Machine guns mowed down the ranks of the strikers, and the rifles of the strikers killed many guardsmen. On April 27, 1914, the tent colony of the strikers at Ludlow was swept by fire.

The basic factors in the dispute are essentially the same as in any previous strike, whether in the hard coal or the soft coal regions—wages and the union, coupled, of course, with such minor grievances as compulsory trading at the company-owned stores. They are essentially the same as prevailed in Southern Colorado during a previous strike, when a large percentage of the present strikers, imported from Greece, Italy, Slavonia, etc., took the places of citizen-miners. They went into those fields as non-unionists, but were soon won over to the union by union leaders. The United Mine Workers of America has spent above \$1,000,000 in the struggle. The Colorado Iron and Fuel Company, owned by the Rockefeller, and the Rocky Mountain Fuel Company and the Victor American Fuel Company, alleged to be subsidiaries of the former, have spent close to \$2,500,000 in support of their contention. The total loss of business to these concerns has been estimated at \$10,000,000. The State of Colorado has expended close to \$800,000.

In this respect the annual report of the Colorado Fuel and Iron Company for the fiscal year ending June 30, 1914, is interesting. It shows that the gross earnings from operation were \$17,803,025.21, a reduction of \$6,512,862.50, compared with the previous year. The reduction in sales of iron and steel was \$3,505,497.93, and of fuel, \$3,007,364.57. Operating expenses were \$16,729,255.25, and net earnings from operations, \$1,073,769.96, being a reduction of \$2,546,496.38. Income from other sources was \$577,477.39, making a total net income of \$1,651,247.35. Bond interest, taxes, sinking funds and other charges against income amounted to \$2,557,215.78, resulting in a deficit of \$905,968.43.

At a Federal Inquiry J. D. Rockefeller, Jr., declared that his company would spend "the last dollar" rather than recognize the union. The Rockefeller interests dismissed all suggestions of compromise. On April 28, 1914, the Federal troops took the place of the State Militia. With their arrival bloodshed ceased.

Early in September of 1914 President Wilson proposed a truce of three years, during which the questions at issue were to be submitted before local grievance committees, a Federal commission to act as a sort of court of appeal. The United Mine Workers accepted the proposal, but it was rejected by the coal operators. Modifications were suggested by the President of the Colorado Fuel and Iron Company but have not been accepted by the President.

Briefly, the demands of the union are: (1) Recognition of the union; (2) 10 per cent. advance in wages on the tonnage and day-wage scale; (3) eight-hour day for all classes of labor in and around the mines and at coke ovens; (4) pay for all narrow work and dead work; (5) check wel hmen at all the mines to be elected by the miners; (6) the right to trade in any store; (7) enforcement of the Colorado mining laws and abolition of the mine-guard system.

President Wilson, on November 29, announced the appointment of a commission of three to settle future differences between operators and miners. The commission will consist of Seth Low of New York, Charles W. Mills of Philadelphia, and Patrick Gilday of Clearfield, Pa.

Review of the War in Europe.

THE GENERAL SITUATION.

ON July 28, 1914, Austria declared war upon Serbia. This act proved to be the match which should ignite a general European conflagration, the sparks from which have reached the Orient. A conflict, encompassing the principal nations of Europe and surpassing in magnitude any war the world has hitherto seen, is being staged upon two great theatres of war—Europe and the Orient. In the European theatre, Russia, England, France, Belgium, Serbia, and Montenegro, on the one hand, are arrayed against Germany and Austria-Hungary on the other. Italy has maintained her neutrality. In the Orient, Japan and England, her ally, are engaged in carrying the war into the Teutonic possessions.

THE CAUSES OF THE WAR.

General—Underlying the concrete acts which precipitate a war are certain basic potential influences—often subtle and indeterminate. The fundamental influences underlying the present great struggle, aside from any attempt to place responsibility, are to be sought in the long continued, ever increasing and divergent Slavic and Teutonic interests and aspirations—racial and political.

Racial—Russia, as a Slav nation and a great power, had long exercised a predominant influence in the Balkans. Acting under this influence, Serbia secretly fostered aspirations in the direction of a Pan-Slavic propaganda with the apparent object of not only lessening Austrian influence in the Balkans but of breaking up, through internal defections, the Austrian Empire; from the accomplishment of this Serbia hoped to profit. The Dual Monarchy of Austria-Hungary contains a mixed population, chiefly Teuton where it is not Slav. The Teutons, by racial ties and sympathetic interests, are closely allied with Germany. The Slavs, by the same token, are closely allied with Russia. The spread of Pan-Slavism, with its persistent, intangible and secret agitation, constituted a menace to the very existence of the Dual Monarchy. The growth of German and Russian aspirations directed at expansion through the Balkan States had, therefore, a direct connection with the racial element of which Pan-Slavism was but one manifestation. As an evidence of the spread of the doctrine of "Pan-Slavic Unity" and of the bitterness of the racial antipathy which it engendered, the Austrian Archduke Francis Ferdinand and his wife, the Duchess of Hohenberg, were assassinated on June 28, 1914, at Sarajevo, the capital of the Austrian province of Bosnia.

Political—Europe had viewed with anxiety the progress of the Balkan wars, fraught with danger to the peace of Europe, lest they precipitate the general conflict which for years had been the dread of Europe and of the civilized world. The geographical readjustments following upon the close of the Balkan wars led to the growth of new and conflicting interests that imposed restraints under which the powers of Europe chafed. A latent feeling of unrest, laden with potential danger, grew until all Europe was as a mass of tinder ready for the lighting. The focus of these basic potential influences centred in the Austro-Serbian situation. Relations between these two states, never cordial, were strained to the elastic limit by the assassination of June 28 at Sarajevo. The Austrian Government charged that if not the Servian Government, men in close connection with it procured this crime. In this Austria was supported by Germany. As a result diplomatic exchanges ensued which culminated in an ultimatum, or *demarche* as Austria chose to designate it, presented on July 23 by Austria to Serbia. A resumé of the terms of this demand, together with Serbia's action thereon, is given below.

Summary of Austria's demands upon Serbia and of the Servian reply thereto:

Presented at 6 P. M., July 23. Reply demanded by 6 P. M., July 25, 1914.

(1) That the Servian Government give a formal assurance that it condemns Serb propaganda against the Monarchy. ACCEPTED.

(2) That a declaration expressing this condemnation be published on the front page of the Servian *Official Journal* of Sunday next. ACCEPTED.

(3) That the declaration shall also express regret that Servian officers and officials participated in the anti-Austrian propaganda. ACCEPTED.

(4) That the Servian Government promises to proceed with the utmost rigor against all who may be guilty of such machinations. ACCEPTED.

(5) That this declaration be simultaneously communicated by the King of Serbia to his army as an order of the day and be published in the official bulletin of the army. ACCEPTED.

(6) That all Servian publications which incite to hatred and contempt of Austria-Hungary be suppressed. ACCEPTED.

(7) That the society styled the *Narodna Obrana* (National Union) be dissolved and its means of propaganda confiscated. ACCEPTED.

(8) That teachers and methods of education in Serbia which tend to foment feeling against Austria-Hungary be eliminated. ACCEPTED.

(9) That all officers and officials guilty of propaganda against Austria-Hungary be dismissed from the service, the Austro-Hungarian Government reserving to itself the right to communicate to Serbia the names and doings of such officers and officials. ACCEPTED.*

(10) That representatives of Austria-Hungary shall assist Serbia in suppressing in Serbia the movement directed against the territorial integrity of the Dual Monarchy and take part in the judicial proceedings on Servian territory against persons accessory to the Sarajevo crime. REJECTED CONDITIONALLY.

(11) That Serbia furnish the Austro-Hungarian Government with explanations in regard to the utterances of high Servian officials in Serbia and abroad who ventured to speak ill of the Austro-Hungarian Government after the Sarajevo crime. ACCEPTED CONDITIONALLY. †

* Subject to proof. † If reply be deemed unsatisfactory, arbitration or mediation is proposed. By the presentation of this ultimatum the Austro-Serbian dispute assumed a serious aspect and the great powers of Europe immediately entered into diplomatic exchanges in the interest of peace. The potential possibilities of the question were of vital interest to Germany and to Russia, between whom lay the main issue. The other powers of Europe were interested not only as the allies of either one or the other of those countries, but it may be said that Europe at the end of July, 1914, was in a state of unstable equilibrium formed of two groups of forces, the powers composing each of which had plans and desires which conflicted more with the hopes and aspirations of those of the other group than they did with those of their allies. The Russian attitude indirectly affected the interests of England and France, who had with Russia formed a coalition known as the Triple Entente. The German attitude similarly affected the interests of Austria-Hungary and of Italy, who had with Germany formed a coalition known as the Triple Alliance.

In the course of the diplomatic exchanges, preceding and following Austria's declaration of war upon Serbia, Russia made known that she considered her own interests as inseparably bound up in those of the smaller Slavic state and that she could not allow Austria unopposed to crush Serbia and become the predominant power in the Balkans. That an attack by Austria upon Serbia would not be viewed with indifference by Russia, whose troops would mobilize the day Austria crossed the Servian frontier. (British "White Papers," No. 17, July 25, 1914, and No. 72, July 29, 1914.) Germany announced her attitude as in favor of localizing the dispute; that she approved of the

stand taken by Austria, whose value as an ally was in danger of being undermined. To the powers Germany issued a general warning that she could not tolerate interference with Austria in her purpose of chastising Servia. Of Russia she demanded that an alleged mobilization of Russian troops should forthwith cease. Of France she demanded to be at once informed of that country's attitude in the event of a Russo-German war. The replies to these demands were not reassuring, and were followed on August 1, 1914, by a declaration of war by Germany upon Russia. By this act Germany extended the area of disturbance to include, on the one hand, her own allies of the Triple Alliance, and, on the other hand, the allies of Russia in the Triple Entente.

Subsequent events followed rapidly upon Germany's declaration of war against Russia. Italy proclaimed her neutrality and informed Germany that she construed the declaration of war by her as an act of aggression which released Italy from her obligation under the terms of the Triple Alliance. Circumstances soon involved first France and then England, as the allies of Russia, in war against Germany and brought from Germany's ally, Austria, a declaration of war against Russia. Austria's declaration against Russia was followed by declarations of war by France and England, in the order named, against Austria-Hungary. Japan, as England's ally, assumed her treaty obligations in the Far East and declared war against Germany, which act brought from Austria-Hungary a declaration of war against Japan. In each case the motive actuating the several allies was to be found in treaty obligations, with, in the case of England, the double obligation of the guaranteed neutrality of Belgium, as other guarantors were already in a state of war. The war thus assumes the aspect of a Russo-German war in which the allies of each are active partisans.

Chronology of events leading up to military operations and during the first and second phases of the campaign:

June 28—Archduke Francis Ferdinand, heir-apparent to the throne of Austria-Hungary, assassinated at Sarajevo, capital of Bosnia.

July 23—Austria presents to Servia a *demarche* with a time limit of forty-eight hours.

July 25—Servia replies to the Austrian *demarche*.

July 26—Germany warns other powers not to interfere with Austria in her purpose of chastising Servia. Sir Edward Grey, British Foreign Secretary, suggests to the powers that representatives of each meet in London to discuss means to avert complications.

July 28—Germany and Austria refuse the proposition of Sir Edward Grey. Austria declares war upon Servia.

July 29—Austria bombards Belgrade. Russia begins a partial mobilization. Germany prepares for mobilization without public order.

July 30—Germany demands that Russian mobilization cease.

July 31—Imperial decree declaring state of war throughout German Empire. Holland and Belgium mobilize to defend their neutrality.

August 1—Germany declares war upon Russia. France orders mobilization. Italy notifies Germany that she will remain neutral.

August 2—German troops enter the Duchy of Luxemburg. French frontier violated by German troops without declaration of war. German troops appear before Liège, Belgium. Germany demands safe passage through Belgium, which is refused.

August 3—German Ambassador to Paris demands his passports; French Ambassador to Berlin recalled. War declared between France and Germany. Germany invades Belgium. Belgium appeals to Great Britain for aid as one of the guarantors of Belgian neutrality.

August 4—Great Britain declares war upon Germany. House of Commons votes war credit of \$525,000,000. Reichstag votes \$1,252,000,000. Germany notifies Belgium of a state of war. United States proclaims neutrality.

August 5—Germans attack Liège. Lord Kitchener becomes Secretary of State for War in the British cabinet.

August 6—Austria-Hungary declares war upon Russia. British cruiser *Amphion* sunk by a mine; 131 men lost. Parliament votes an additional \$500,000,000.

August 7—German troops enter the city of Liège; the forts of Liège still hold out.

August 8—British troops land in Belgium. Portugal announces herself an ally of Great Britain. French troops enter Alsace-Lorraine. French and German troops clash in the Vosges.

August 9—German submarine U-15 sunk.

August 10—France declares war on Austria-Hungary. French and German covering troops clash around Longwy, Spincourt, and other points in that vicinity.

August 12—Great Britain declares war upon Austria-Hungary. Germans temporarily repulsed by the Belgians at Haelen. French War Office announces that troops are in contact from Holland to Switzerland, about 240 miles.

August 13—Japan sends an ultimatum to Germany.

August 16—German cavalry appears before Brussels.

August 18—Belgian Government moved from Brussels to Antwerp.

August 19—Saarburg evacuated to the French.

August 20—Germans enter Brussels unopposed.

August 22—Namur invested by Germans.

August 23—Battle from Mons to Luxemburg.

August 24—Allies retire.

August 25—Five Namur forts fall. German line extends from Maubeuge to Donon, a mountain of the south Vosges.

August 27—Longwy and Namur taken.

August 29—German army corps sent from western to eastern theatre of operations. Paris prepares for siege.

August 30—Allies retire, but garrison of Maubeuge remains.

September 3—French Government moved from Paris to Bordeaux.

September 6—High tide of German invasion.

September 7—Germans retire.

September 11—Germans make stand on the River Aisne.

THE STRATEGIC SITUATION.

Geographically the Teutonic states are contiguous and lie at the centre of the European theatre of war, an advantage in the movement of troops and supplies, a disadvantage when interior resources are exhausted and outside supply is stopped. In the neutral states contiguous to its borders the Teutonic coalition possesses avenues of ingress for supplies from the neutral states of the outside world.

Irregularly disposed about the perimeter of the Teutonic area are the hostile states of the Russian coalition, a geographical dispersion that hinders mutual co-operation, and exterior lines of communication that render difficult the maintenance of armies directed upon an invasion of the Teutonic area. On the other hand, with control of the sea, the exterior position renders easy the replenishment of exhausted resources, and the allies are in a better position to continue a long and exhausting war than are the Teutonic states.

The Teutonic coalition is homogeneous. Unity of action is therefore easier than is the case with the Russian coalition of different races, speaking different tongues. Russian Poland is a salient, a sort of promontory projecting from Russian territory into the hostile Teutonic area. Strategically it exposes Russian forces operating therein to attack upon their flank and rear—a danger of being thus cut off. The Belgian-French frontier offers no natural barrier, and none is found short of the interior. The French-German frontier presents the barrier of the Vosges Mountains.

Topographically the Teutonic frontiers are naturally strong. On the east, the rivers, lakes, swamps, forests, and sandy wastes of East Prussia and, in a lesser degree, of Posen and Silesia, with the Carpathian Mountains of Galicia, offer formidable barriers to invasion. On the west the Vosges Mountains and the River Rhine similarly obstruct invasion. The seacoast of the north possesses

few good harbors, but many inlets. Modern seacoast defences render invasion from the sea a hazardous undertaking. The southern frontier is bordered by no hostile state of sufficient strength to constitute a serious menace.

In the Teutonic coalition, especially in Germany, national defence has been the determinant factor in the interior economy of railways and manufacturing plants which supply munitions of war. The states of the Russian coalition, while less advantageously equipped in this particular, are still sufficiently well equipped for all practical purposes.

Interior defences, seacoast defences, armament, and equipment of all belligerents are the results of evolution under the best military direction the country afforded. The results of the war alone can determine their relative efficiency. The Kiel Canal greatly strengthens the potentiality of the German naval forces.

COMPOSITION OF ARMIES.

Armies are composed of a convenient number of integral units, each complete in itself. The basic integral unit is the division; the next is the army corps, composed of from two to four divisions. Several army corps, acting as a single command, constitute an army. The companies, battalions and regiments, with which we in the United States are most familiar, may for convenience be designated as fractional units of army organization.

The standing army of Germany, at the beginning of mobilization, was distributed among twenty-five army corps. The normal army corps had a strength of about 30,000 men of all branches.

The standing army of France was distributed among twenty army corps of approximately the same size as those of Germany.

Great Britain's small standing army was of barely sufficient strength to make up, when joined with the French forces, for the German advantage in numbers.

The standing army of Russia, at the beginning of mobilization, was distributed as follows: 850,000 quartered in Europe, 250,000 in East Asia, 70,000 in the Caucasus, and 30,000 in Turkestan. About 60,000 Cossacks variously located.

Excluding the frontier guards and certain independent brigades of foot and horse, this force is distributed among thirty-seven army corps and twenty-four cavalry divisions. The normal army corps, excluding reserve divisions, numbers thirty-two battalions, six squadrons, fourteen batteries; total war strength 44,000 men, 12,000 horses; combatant strength 30,000 rifles, sixty-four machine guns, 103 field pieces, and 1,000 sabres. The normal cavalry division has two cavalry brigades each of two regiments of six squadrons, eight machine guns, two batteries of horse artillery. In all 4,500 men and 4,800 horses, with a combatant strength of 3,500 sabres, twelve field guns, and eight machine guns. In addition to the twenty-four cavalry divisions of the standing army, provision existed for placing ten Cossack divisions in the field. The Cossacks alone are capable of placing 1,000 squadrons in the field. A Russian army is composed of four or five army corps. Military districts become in war, army commands; for example, Warsaw, Vilna, Moscow, Kiel, Odessa.

MOBILIZATION.

Gathering and preparing for the field the forces available for military service affects not only the final fitting out of the standing army, but more particularly of re-enlisting, equipping, and organizing of men who have ceased to form a part of the standing army. The plans for carrying out such operations are carefully prepared in time of peace. In countries like Germany, France, and Russia, where military service is compulsory, the standing army constitutes a training school for the male population; its graduates upon passing into civil life constitute a great reserve force which is divided, generally speaking, into three classes—the first, second, and third—which in Germany are designated respectively (1) the reserve, (2) the landwehr, (3) the landsturm. To the third class belongs also that portion of the male population of which, for one reason or another, no military service has been required. The reserve is composed of those men most recently graduated from the standing army and who after a fixed period of assignment to this class pass into the landwehr. Allowing for national difference in nomenclature, the German system is exemplary of the system in operation in all European countries where military service is compulsory.

In Great Britain, where a voluntary system like our own is in operation, the method is necessarily somewhat different and more difficult of operation. In Russia a system of expansion of the natural resources in men to a war footing was reorganized as late as 1908. It was estimated in Russia that a period of about eight years would see the new system in full operation. It is significant that only six years have elapsed. The Russian system of expansion, while more complex than the German, still adheres to the three general classes of reserve forces.

France pursued practically the same system as the Germans.

CONCENTRATION.

The operation of uniting the mobilized units into armies and placing them in their zone of operations is the next step in the operations of war, and the time required depends in general upon the objective in view and the means of transportation available.

MILITARY OPERATIONS.

Plans—Offensive operations began on August 2, 1914, in the western theatre of operations with an invasion of Luxemburg by Germany. Germany was one of the guarantors of the neutrality of Luxemburg. Relying upon her guaranteed neutrality, Luxemburg possessed no troops and offered no resistance beyond remonstrance.

The Luxemburg invasion was made by troops despatched from Treves without being completely mobilized. The same day German covering troops of the seventh army corps from Aix-la-Chapelle appeared on the German frontier opposite Liège, Belgium, and in the name of the German Government demanded the unobstructed passage of German troops through Belgian territory. Belgium met this demand with refusal, appealed for aid to Great Britain—the one guarantor of Belgian neutrality not yet at war—blew up the bridges across the Meuse, and prepared to resist attack. On August 5 the Germans attacked Liège by an assault which marked the beginning of the bloody and almost continuous series of conflicts which have since occurred. Succeeding operations have clearly marked out the strategic plans underlying the war plans of the several belligerents. Strategic war plans have as an object the achievement of the greatest possible potential fighting power. An outline of such plans, prior to tracing the course of operations, will materially elucidate the latter. With the Germans committed to the offensive the French plan naturally first presents

itself for examination. The northern frontier of France, generally speaking, is naturally weak and but lightly fortified. Behind this frontier the lines of the River Aisne, the River Marne, and the River Seine are encountered in order. Of these the River Aisne presents the disadvantage of lying obliquely to the line of retirement toward the interior; it is also short. The Marne and the Seine are much stronger. The eastern or German frontier presents the Vosges Mountains, their spurs, and the Moselle River. Naturally strong, this line has been further strengthened by the fortified Verdun-Nancy-Epinal-Belfort lines, an unfortified gap having been left between Toul and Epinal. From Belfort to Verdun is practically a right line. The unfortified condition of the Belgian frontier has commonly but erroneously been attributed to French reliance upon the neutrality of Belgium. It is impossible to at once fortify and attempt to hold an entire frontier; to do so is to tie up, within fortifications, a disproportionately large number of the forces available; to commit such forces to a policy of inert defence which may check but cannot destroy the invader, Frederick the Great has laid it down as a principle that "By attempting to cover everything we end by covering nothing." Napoleon has corroborated this. The problem therefore was to determine which section of frontier, if any, should be fortified. By fortifying a strong frontier—making a strong line stronger—the French possessed from Verdun to Belfort a containing line as strong as it was humanly possible to make it. The strongest fortifications known to military science would have been unequal to the task of making the northern frontier the equal in strength of the fortified Verdun-Belfort line. The selected point of concentration for the national forces of France was at Neufchateau, directly opposite the Toul-Epinal gap in the Verdun-Belfort line. By this arrangement the French accomplished two important objects: First, in the event of invasion by the German frontier, potentiality for resistance was at its maximum—France could do no more; second, in the event of what actually has occurred, France was in a position to hold, with a minimum of men, the Verdun-Belfort line and, pivoting about Verdun, to either advance or retire as circumstances should require. Both points are in perfect accord with sound strategy.

The French plan involved falling back from the north before an invading army of greater or equal numbers than her own until the line of the Marne or the Seine should be reached, and from that point launching a counter-offensive move. As invasion from the north involved a violation of Belgium's neutrality which England was under treaty obligations to resist. The British plans had been prepared in conjunction with the French General Staff and co-ordinated with the French plans in the Belgian situation. England's expeditionary force was barely sufficient to practically offset German superiority in number.

The German plan in the event of war with both France and Russia was based upon the assumption that German mobilization and concentration could be effected somewhat more rapidly than the French and much more so than the Russian. Their plans contemplated, therefore, holding Russia on the eastern frontier with a force of from three to five of their total of twenty-five army corps, rapidly massing the remaining corps on their western frontier in three great armies—the army of the Meuse on the Belgian frontier, the army of the Moselle in Luxemburg, and the army of the Rhine from Metz to Strassburg. With the Metz-Strassburg line as a containing line similar to the French Verdun-Belfort line the two northern armies pivoting about Metz were to be rushed through Belgium and Luxemburg and so crush the French in detail before the latter could complete their concentration.

With the French army crippled or destroyed, the bulk of the western forces would be available for use against Russia and in conjunction with the Austrian forces on the eastern frontier.

Time was thus a vital element in the success of the German plan. Returning to the situation at Liège before considering the Russian plan, the resistance offered by the forts surrounding the town was of a most determined character. Liège was protected by a group of twelve concrete, steel-turreted forts. These turrets were operated from underground concrete structures and, themselves lying low to the surface of the ground, offered small and inconspicuous targets impervious to the light field pieces which were all the Germans had in the beginning. While waiting for the heavy siege howitzers which were destined to reduce these forts, the Germans continued to deliver sanguinary though unsuccessful assaults upon them. It was not until August 19 that the Germans had sufficiently reduced some of the forts of Liège to permit of investing the remainder and proceeding with the masses of their troops toward Brussels. Three things connected with the siege of Liège stand out as having an important bearing upon subsequent events. First and foremost, for seventeen days the Germans were held in check and so were nearly three weeks behind a schedule in which time was an important element. Second, the arrival of their siege howitzers first exposed what was later emphatically demonstrated, that the guns of the strongest forts had no chance when pitted against that type of mobile siege gun. Thirdly, that the reduction of a fortified place was not essential to the safety of the rear of such enormous armies as the Germans possessed, for the reason that the investment of a fortified place effectually prevented its use as a base for offensive action and the force necessary to invest it required but a small percentage of the huge force available. On August 20 the Germans entered Brussels, levying a war indemnity of \$40,000,000 upon that city and one of \$10,000,000 upon Liège. German cavalry in great force had appeared before Brussels as early as August 16, having cut loose from their communications and crossed the Meuse at the town of Vise. On August 20 they had entered Brussels unopposed. Vise lay just beyond the range of the guns of Liège, about four miles from the Dutch-Belgian frontier, and at this point the Germans held the bridge over the Meuse. While the attack upon Liège was progressing the French executed two moves, the results of which were so important as to have a marked effect upon the early campaign. On August 8 a small French raiding force entered Alsace by the south of Belfort and, overcoming German resistance, entered first Altkirch and later Mülhausen. The latter point several times changed hands. Two days later a second and larger French expedition, turning the Vosges Mountains by the north, entered Lorraine, penetrating as far as Saarburg on the main line of railways connecting Metz and Strassburg. On August 11 and 12 this move was met by German counter moves directed against the flank and rear of the French raiding force and causing its withdrawal. This French invasion has been variously attributed to both political and sentimental reasons. Be that as it may, the results were those of reconnaissance in force. The first raid found the country south of Metz-Strassburg but weakly held; the second disclosed the absence of German masses behind Metz-Strassburg. The two raids together indicated that the attack through Belgium was real. Leaving the Germans at Brussels for the moment, the Russian General Staff announced mobilization completed on August 18 and her troops in motion. The Russian plans had to consider the difficult topographical features of East Prussia, the danger of the Polish salient, the fortified frontier of Posen, and the Carpathian Mountains. Her plans contemplated expeditions in the nature of raids against both the first two sufficiently strong to prevent German forces of any size being sent to the assistance of Austria while Russia herself should mass enormous armies behind both the River Niemen and the city of Warsaw. While this was proceeding a third enormous force was to be directed into Galicia to seize the passes of the Carpathians, reduce Przemysl and, turning the Austrian fortress of Cracow, make a wide turning movement about the German right and rear. Such a plan is of bold conception, but if successful it will prove decisive. In this theatre lies the greatest field for strategic employment of the enormous forces which must be there gathered. August 20 the first Russian raid into East Prussia occurred.

Returning to the situation in the western theatre, the occupation of Brussels firmly established German troops on Belgian soil, and the German plan of campaign was fairly launched. It is

necessary to view broadly the campaign which followed in order to avoid confusion by the maze of detail which recency thrusts in the foreground. The salient features, which at intervals stand out prominently, mark phases of the campaign. Hostilities began with the German attack on Liège August 5, 1914. The first phase terminated with the battle on the Marne September 6, 1914. The second terminated with the German stand on the River Aisne September 11. The third terminated with the fall of Antwerp on October 3, 1914. At date of writing no event has occurred to mark the termination of the fourth phase. The fall of Namur in the first phase, of Maubeuge in the second, and of Antwerp in the third emphasized the potency of German heavy siege artillery and methods of attack on fortified places.

Having reached Brussels, the German forces of the Meuse proceeded to move their columns southward toward the French-Belgian frontier, forming a line parallel to it. While this force was engaged in the taking of Namur, the force of the Moselle, with Luxemburg as a base, took the French fortified town of Longwy and, reaching out to the west, effected a junction with the forces of the Meuse. The combined forces were composed of five armies: First, the army of General von Kluck; second, the army of General von Buelow; third, the Saxon army; fourth, the army of the Bavarian Crown Prince; fifth, the army of the German Crown Prince.

In pursuance of their plan, the French forces steadily retired before the German advance, giving battle on August 23 on a line extending from Mons to Luxemburg. The first expeditionary force from Great Britain occupied, in this battle, the left of the French line, and in the ensuing retirement from Mons were hard pressed by greatly superior numbers. Their retreat was conducted with great skill, however, and though their losses were severe they were extricated from danger without being disorganized.

The steady German advance and allied retirement continued until September 6, by which date the allies rested on the line of the Marne, with Paris on the French left and on the British right. The Germans were almost within range of the guns of Paris, which city had been hurriedly prepared for defence, garrisoned by a newly organized army of defence and the seat of Government moved to Bordeaux. At this juncture General von Kluck, commanding the German right, was confronted by the necessity of choosing one of three alternatives: Pressing to the west of Paris, laying siege to the city, or passing to the east of it. The first alternative would separate him from the centre; the second was a long and costly operation without commensurate recompense. The third subjected his right flank and rear to attack by the combined British and Paris defence armies. He chose to attempt a passage to the east of Paris, with the result that his right flank was attacked and forced to retire. The flood tide of German invasion had been reached and the ebb had set in. Three times acted to bring about the German retirement: Long and difficult lines of communication, an enveloped flank, and a superior allied position. The second phase of the campaign was a reversal of the first. When the necessity for a retirement became evident the Germans had prepared an entrenched line of resistance along the River Aisne. This position was reached on September 11. So strongly were the Germans entrenched and so skillfully had their retreat been conducted that the allied pursuit was checked and operations assumed the aspect of a siege in which the allies were the besiegers of the German position. Meanwhile the allies began a turning movement which resulted in a slow but steady bending back of the German line until its right wing ran northward toward Antwerp. Continuous but indecisive fighting marked this phase of the campaign until, on October 8, Antwerp fell after ten days of siege by the Germans.

Chronology of events of third phase of campaign:

September 12—German retreat from the Marne continues.

September 13—Belgian sortie from Antwerp against German communications.

September 14—Allies cross the Aisne near Soissons

September 15—Russian southern force threatens Przemysl. German cruiser Heia sunk by British submarine

September 16—Russian northern army forced behind the River Niemen.

September 17—Several divisions of British East Indian army en route to theatre of war.

September 20—German cruiser Königsberg disables British gunboat Pegasus.

September 21—Western theatre: Germans retire to Noyon.

September 22—British cruisers Aboukir, Hogue, and Cressy sunk by German submarine.

September 24—Russians pass Przemysl.

September 28—Japanese-British forces attack outer works of Tsing-Tau.

September 29—Germans invest Antwerp.

October 1-7—No change.

October 8—Germans enter Antwerp. The garrison of Antwerp escapes. Small part of British contingent crosses Dutch frontier and is interned.

THE CAMPAIGN IN THE EASTERN THEATRE.

On August 20, while the German triumphal entry into Brussels was being staged in the western theatre, the curtain had already risen upon the events of the eastern theatre. On August 18, more than two weeks before the calculated time, Russia announced her mobilization complete and a forward movement begun. By August 20, even while the German occupation of Brussels was taking place, strong Russian forces were crossing the German frontier into East Prussia on the north and were approaching the Austrian frontier of Galicia on the south. Russia's first move was thus to place a strong force both to the north and to the south of her Polish salient. Manifestly her object was flank protection for a prospective central force in Russian Poland. Events following have been somewhat obscured by contradictory reports from Russian, German, and Austrian sources and in consequence can be reviewed but broadly at best. Certain salient features, however, have been clearly revealed. The early mobilization of Russian troops and the invasion which promptly followed acted to relieve the pressure of German superiority of numbers upon the allies in the western theatre of operations. Germany's dream of a rapid conquest of France was troubled by the spectre of an invasion of German soil by the Russian hordes. General von Hindenburg and two German army corps were detached from the west and hurried by rail to Danzig. Two Austrian corps, loaned to the western German operations, were hurriedly returned to Austria. Five additional German army corps were later added to the forces on the eastern frontier.

It must be remembered that in accord with the Russian plan the mission of the northern army was to hold as large a German force as possible in East Prussia, the while protecting the flank of the central Russian force. The mission of the southern force was one of aggressive invasion. By September 1 the southern Russian force had taken and occupied the Galician town of Lemberg. On the same date the northern force, which had penetrated to the vicinity of Königsberg, met defeat near Allenstein at the hands of the Germans, losing two of its corps cut off amongst the lakes and swamps of that region. Following this reversal the northern Russian force retired into Russian territory behind the River Niemen, terminating the first phase of the northern campaign. The next presence, however, of a large Russian force in that vicinity was a sufficient menace to the flank and rear of any German force attempting flank operations against the right of a Russian army of the centre.

While these events were taking place in the north, the Russian advance in the south continued to progress. Overcoming Austrian opposition, the Russians penetrated as far as Tarnow, which they invested, having turned the fortified place of Przemysl by the north and effectually covered it. Meanwhile strong cavalry forces sought out and seized the principal passes of the Carpathians. In the western theatre the tide of German invasion was beginning to recede—the detachment of

troops to the east was being felt by the Germans. The investment of Tarnow threatened Cracow, and the cutting off of Przemysl effectually protected the left flank for the initial advance of the Russian army of the centre, the covering troops of which began to appear upon the frontier of Posen. With the advance of this central Russian force General von Hindenburg attempted to cross the Niemen near Grodno, with the apparent object of assailing the flank and rear of that force. The attempt was severely repulsed and the Germans driven behind the forest of Augustowo.

By the end of September all Russian advance seems to have ceased and a veil of strict censorship and conflicting official reports covered actual occurrences. The fall of Antwerp in the west diverts, at this juncture, the attention to that theatre and affords a pause in which to complete the perspective of the general situation to October 8 by a brief review of the campaign in the Orient and of the war upon the sea.

The Campaign in the Orient—With the entry of Japan into the conflict the theatre of war was extended to include the Far East, with the German fortified seaport of Tsing-Tau, China, as the objective of operations. Allied Japanese-British forces have invested this place, the ultimate fall of which may be expected. Japan has disclaimed to the world any intention of acquiring territory, stating that her sole object is one of compliance with treaty obligations in protecting the commerce of her ally in the East and the expulsion of the Germans from Chinese territory, which is to revert to China. The prosecution of her plans has forced Japan to seize several islands of the Pacific. This occupation Japan has declared to be of a temporary character.

The War Upon the Sea—Nothing of importance beyond the destruction of commerce upon the sea has as yet taken place. The engagements between vessels of war have been of a minor character, mere incidents so far as their results are concerned. Such incidents are listed in the chronology of events.

THE WEEK OF OCTOBER 9-15.

The salient features of this period are the German advance to the Belgian coast, the check to the Russians in East Prussia and in Galicia, the revolt in British South Africa.

The failure of the Russian southern forces to invest Cracow after having reached the vicinity of it can only mean a check to the Russian arms. This conclusion is borne out by the undisputed reports from German sources of German successes in Russian Poland, where they claim to have advanced to the vicinity of Warsaw. Such an advance would threaten the flank and rear of the Russians in Galicia.

The strenuous efforts of the German forces in Belgium to seize the Channel ports are probably aimed at the object of so shortening their lines as to permit of strengthening them at some crucial point. It suggests an attack on the French lines near Verdun or near Lille, or both. Rumors of a contemplated invasion of Great Britain may be dismissed as untenable—the hazard to the German cause would be too great.

Future developments only can disclose the proportions of the disaffection in South Africa.

THE WEEK OF OCTOBER 16-22.

The unopposed occupation of Ostend by the Germans, reported to have occurred on the fifteenth of the month, is the only event of significance since last week. The importance of this event remains in the future. Chronology of events:

October 16—British cruiser Hawke sunk by a German submarine.

October 17—Russia resumes offensive operations in the east.

October 18—British sink four German torpedo boats in North Sea.

October 19-22—No change of importance.

No additional light has been thrown upon the new German plan begun last week. This lull in the march of events affords an opportunity to review the lessons and new features which the war has thus far disclosed. The great lessons which lie apparent on the surface are: (1) Successful national defence means rapidly in mobilizing the entire nation, which in turn means thorough organization; (2) the greater the size of the forces involved the more important become the initial strategical moves of the war plans; (3) the difficulty of moving enormous forces unobserved has resulted in the disappearance of strategical moves upon the battlefield.

The new features which stand out are: Mobile heavy siege artillery, auto-transport, aerial craft, and wireless telegraphy. Machine gun fire has been used to such an extent and with such effect as to forecast a complete change in infantry organization and to warrant the prediction that with the appearance of a light and reliable automatic rifle each fractional infantry unit will be made up of rifle bearers and ammunition carriers in double their number to serve them.

THE PERIOD OF OCTOBER 23-NOVEMBER 10.

The outstanding events of the period are: The check to the German offensive on the Belgian coast; Russian successes in resuming the offensive in the east; the entrance of Turkey into the war on the side of the Teutonic coalition; the fall of Tsing-Tau before the combined British-Japanese attack; the German naval victory off the coast of Chile; the destruction of the German cruiser Emden.

In broadly reviewing the trend of events, it is best to begin with those causes which have led to the alterations that have taken place in the situation previously existing. The enforced Russian retirement in Galicia and Russian Poland afforded Germany the opportunity to repeat what she has so often done before in her prosecution of this war—to transfer troops from one frontier to the other. With the passing of an immediate emergency German forces in the western theatre were reinforced by troops released from the operations in Poland, and the German offensive again became effective in an effort to move southward from Ostend toward Dunkirk. From Nieuport to Lille the allied positions were attacked with an intensity exceeding anything that had hitherto taken place. Germany was making a stupendous effort to accomplish her purpose before the Russians could recover from the setback administered to them. The allies had one weapon, however, which frustrated the German attempt. The country from the sea to the Lys was flooded by the opening of dikes and sluices. Russia was not long in recovering her lost initiative, however, and returned to the offensive with renewed energy and augmented numbers. At date of writing Russia has recovered lost territory in Galicia and along the East Prussian frontier, and has advanced her central force up to and beyond the River Warthe. Germany has not as yet sufficiently succeeded in the west to permit of again transferring reinforcements from that theatre to the east. She has, however, by stupendous effort, forced back the allied line and retaken the town of Dixmude. Nothing has occurred to suggest any alteration in the Russian plan as previously outlined, and while it is evident that new strategical motives underlie German operations in the west and her immediate purpose is clear, the ultimate object has not as yet been disclosed. It is significant to note that German forces have desperately clung to St. Mihiel, which they acquired early in the third phase of the campaign. The possession of St. Mihiel forms a salient in the German line. The town lies but a short way from Metz on a direct line to Paris, and is possessed of excellent railways from Metz—one of the German bases. If the German attack along the coast succeeds the allied left will be forced back and St. Mihiel may be the next point of a concentrated attack, which, if successful, will not only afford Germany a gateway to the heart of France but will also result in breaking the allied line and endangering that portion which now lies between the sea and Verdun—just northeast of St. Mihiel.

It is probable that such a possibility has been considered by the allies and that strong reserve forces are being held where they can be hurriedly pushed to both points, and if the German attempt succeeds it will be because she has outfought her opponents.

The entrance of Turkey into the war presents at present less a military problem than a political one. What effect the tempting prize of Constantinople will produce upon those members of the Russian coalition whose interests are affected by its future ownership is problematical. The influence which Turkish participation may bring to bear upon the thus far neutral Balkan States is likewise an open question. Moslem sympathy and allegiance to Turkish religious control may result in a holy war which will affect Great Britain in Egypt, and Italy and France in Tunis and Morocco.

The fall of Tsingtau was a foregone conclusion and leaves Japan in the position of a nation at war with Europe but without a hostile enemy in the Orient. Here again the political factor enters. Whether Japan will rest content to remain a sympathetic onlooker or whether her forces may soon appear upon some zone of active operations future events alone can decide.

The German naval victory off the coast of Chile and the destruction of the cruiser Emden are two closely allied events. From the inception of hostilities a small number of fast German cruisers had been at large. Cut off from Wilhelmshaven by the superior British fleets, they had no choice but to rove at will and to do what damage to hostile commerce and hostile warships they might; coaling and provisioning were hazardous but necessary operations. It was a foregone conclusion that nothing short of a German sortie from Kiel and a miraculous German naval victory could save these vessels from ultimate destruction. Viewed in this light, the achievements of these individual vessels in general, and of the Emden in particular, have been little short of marvellous. Wireless telegraphy and great speed have been the means of not only permitting them to escape hostile pursuers but also made possible the concentration of five of these vessels off the coast of Chile at a moment so well timed as to effectually corner and decisively defeat three British ships under Admiral Sir Christopher Cradock. Of the British ships, the Good Hope and Monmouth were sunk, and the Glasgow crept into port badly disabled.

Though the Emden did not participate in this naval battle, she had to her credit the destruction of a long list of merchant vessels and some war vessels belonging to each of her enemies. She was finally overtaken and destroyed on November 10 by the Australian cruiser Sydney, a vessel of her own class but slightly superior in armament and speed.

THE PERIOD OF NOVEMBER 11 TO NOVEMBER 20.

The progress of events leads more and more to the conclusion that in the eastern theatre a decisive campaign is being conducted, the result of which will have a marked effect upon the final outcome of the war. There has been every reason to believe that from the beginning an understanding has existed between the allies that operations in both the east and in the west were co-ordinated by mutual agreement. Nothing has hitherto occurred, however, which might serve as a basis upon which to synthetically reconstruct such a plan. The nebulous outline of a common policy, superimposed upon the war plans of the French-British-Slavic alliance, is just now becoming apparent. That the allies in the west have been content to remain upon a virtual defensive at times when a preponderance of force seemed to warrant an offensive; that such aggressive action as they have resorted to was seemingly timed to relieve a threatened check to Russian operations; that Great Britain, with a vast amount of captured shipping available as transports, should continue to train her volunteer army, a half million of whom must by now be the equal of landwehr troops in the early days of the war; all these things point to the existence of a common understanding based upon a plan aimed at the destruction by one great blow of the German armies.

That the contingencies upon which such a plan may be based have been fully considered by the Germans may be accepted as beyond question.

The great expanse of the eastern theatre, as compared with the western, offers a better field for strategic operations. On that field the Russian hordes have an advantage of homogeneity of organization and of control, while in the west the advantage rests to even a greater degree with the Germans. Having effected a flank protection for the Polish salient, the Russian central force has acquired a freedom of action. The mission of the northern force is to cut off Königsberg and Danzig, at the same time threatening the left of the German force operating against Poland. The mission of the central force is to hold, and as far to the east as possible, the same German force while the southern Russian force gains control of that portion of Galicia which lies between the Carpathians and the Russian boundary. The latter will then be in a position to either effectually divide the German and Austrian forces or to roll the Austrian force back into Silesia. In the former case superiority of numbers will afford the Russians every opportunity of defeating each in detail. In the latter case the plains of Hungary are open for invasion. Either case will force a reduction of the German forces in Belgium, which is England's opportunity to land her newly organized force in France and accomplish on that field what Russia plans to accomplish on the other. It is quite within the bounds of possibility that it is to assail England's fleet of transports upon the sea that Germany is accumulating and preserving a great fleet of Zeppelins equipped with searchlights and apparatus for dropping enormous quantities of high explosives. It was probably with a view to testing the Zeppelin qualities under fire that the attack on Antwerp was made, as such an attack could serve no other useful purpose.

At the moment of writing, the situation in the west remains virtually as it has for weeks past. In the east the situation has in some respects altered. Despatches from that field indicate that in the northern zone Russian forces are at Goldap, just north of the lake region in East Prussia, and at Soldau, about sixty miles slightly southeast of Danzig. In the central zone the forces which last week had closely followed the rapidly retreating Germans have fallen back some thirty-five miles before a German counter-attack and are now before Warsaw. In the southern zone Przemyśl is cut off, its defensive troops retreating; Cracow is invested and in flames, with the main Russian forces still advancing. In general the situation is much as it was at the height of the first Russian occupation of Galicia, with these exceptions. Cracow had not then been actually invested and the Russian foothold in East Prussia was not so secure. The Germans are again making the type of attack which before forced the Russian southern force to fall back, but under these disadvantages: The Russian central force is now able to offer, when it chooses, a more effectual resistance, and the threat from the northern force is a greater menace.

It is quite evident that so long as the Russian arms are victorious over the Austrians and so long as the central force is able to offer a sturdy resistance to the German advance the latter cannot affect the operations of the southern Russian force. Events will probably show that the Russian retirement was less the result of German force than of Russian strategy, for with the southern force safe the further the Germans can be lured into Poland the more effectually will they be crushed should the southern Russian force succeed in turning Cracow.

The approach of Winter will in all probability retard operations in a latitude several degrees farther north than our northern boundary, but should the Russian arms prevail in the prosecution of the plan thus far successfully carried out the end is not far. Should the Russians suffer a reverse, however, greater endurance alone can determine the final outcome.

Meanwhile Great Britain continues to raise and organize volunteer armies. Parliament has just passed an act authorizing an additional 1,000,000 men to augment the 1,500,000 already or-

ganized. She was fortunate indeed that France, her ally, possessed the first line behind which she might raise and train her volunteers in comparative security.

Thus far only the Russian plan and its possibilities, in conjunction with the plans of Russia's allies, have been considered. As previously stated, it cannot for a moment be supposed that all possible contingencies have not been fully considered by Germany. The greatest difficulty which confronts the Teutonic allies is a political one. Should Austrian forces, in falling back before a Russian advance, maintain contact with German forces it means that Austria-Hungary lies unprotected before the invader. Should, on the other hand, the Russian central force again force back the Germans from the lower Vistula the latter must, if they are to maintain contact with their Austrian ally, uncover Silesia—a thing abhorrent to Germany. Strategical reasons demand unbroken contact, and in the face of successful and overpowering numbers this can only be maintained by the retirement of the entire Austro-German line. Such a retirement means the yielding of East Prussia on the north and offering a new resistance from the Danzig-Thorn-Posen-Glogau-Neisse line by the Germans and the yielding of Cracow by the Austrians. Russia's enormous resources in men constitutes a serious problem. In her excellent railway system, which will enable her to readily reinforce any part of her line, Germany possesses an invaluable resource. By its aid she may be able to indefinitely frustrate the accomplishment of the Russian plan. It remains to be seen whether the blows she shall receive will crush the Teutonic coalition or will weld it into a closer unit.

Turkish military operations will probably prove to have but little effect upon the present campaign in Europe. The Asiatic theatre is such that Turkey's efforts can probably produce but little effect upon Russia. From Egypt comes the report, however, that the Khedive has cast his lot with the Sultan. The reports from German sources of victories over the British in Egypt are probably gross exaggerations. The topography of the country is such that the movement of bodies of troops of any size is an undertaking of incredible difficulty. It is not likely, therefore, that in so short a period that engagements of any consequence have taken place.

The loss of the British first-line battleship Audacious, reported during November 14, occurred October 27, over two weeks prior to the release of the information. An eminent naval authority states the opinion that the destruction was caused by a German submarine torpedo boat. The commonly accepted cause is the striking of a submarine mine. Great Britain's loss of vessels through one or the other of these two causes has been high, but not without considerable cost to her enemy. The Audacious is the first battleship of importance lost to the British.

On November 16 a launch from the United States cruiser Tennessee, while entering the harbor of Smyrna, was fired upon by the Turkish batteries. The incident serves to indicate the violently disturbed condition of Turkish internal affairs. In the absence of any well defined policy of hostility toward the United States, the incident is not likely to prove of any consequence.

The necessity for going to press concludes the review of the war. It is impossible to leave untouched the subject of the wise policy determined upon by our forefathers, an adherence to which has kept us thus far from entanglement in European alliances. One cannot view the ghastly struggle now in progress without the thought intruding of our own state of preparedness—not to inflame but to ward off such a catastrophe. The question as to the adequacy of our land and water forces demands serious consideration.

THE MEXICAN SITUATION.

THE Mexican revolution which ended, theoretically, at least, with the occupation of the Capital by Venustiano Carranza on Aug. 20, 1914, had kept Mexico drenched with blood for four years, and was the most comprehensive of the long series of revolts against the Científico control of Mexico. The primal cause of the uprisings was the desire of the poor classes for land of their own, which under the Científico system of government established and maintained by Porfirio Diaz was impossible. The Diaz idea of scientific government was to build up a governing class of the ablest and wealthiest people of the country. This he did, and thus control was always in the hands of a very small coterie. On the Diaz accession to power Mexico was impoverished, but had, and still possesses, immense natural wealth. Instead of parceling out the agricultural and mineral sections of the country to its own people under proper homestead laws, foreign capital was called in and concessions of immense tracts made to foreign corporations. These were developed with native labor recruited from the peons and from people imprisoned for crimes under contracts which practically deprived the natives of any semblance of personal liberty. The majority of them have lived their lives without ever seeing money, obtaining for their labor only sufficient supplies to maintain a wretched existence. Outbreaks against this system have been more or less constant, but until recent years they were quickly stamped out by the military forces under Diaz. In 1910 the spirit of revolt had grown so great it had touched some of the wealthy land-owning class and in that year Francisco I. Madero, a member of one of the wealthiest families in Mexico, announced himself a candidate for the Presidency against Diaz. Diaz had him locked in prison, which was the usual fate of any who opposed the Government, but because the world generally was looking a little closer into Mexican conditions did not have him executed, as was the usual rule in such cases. Later Madero escaped from prison, went into Texas and organized a revolution. The moral support of the United States was thrown to Diaz, and advocates of the reform movement were arrested in various parts of the United States. Public opinion in the United States, however, favored Madero, and toward the end the American Government discontinued its activity against the revolutionists. Madero's revolution progressed so rapidly that Diaz soon found his position untenable, and on May 25, 1911, resigned and was escorted to Vera Cruz by a detachment of soldiers under Gen. Victoriano Huerta. As Diaz went into exile Madero assumed the provisional presidency and was later elected President. The old Científico crowd, however, was not yet beaten and fomented revolt all over the republic. The most important of these revolts was that conducted by Pascual Orozco, who had been one of Madero's most successful leaders in the north. This was broken up when the Federal troops, under Gen. Huerta, gave the rebels smashing defeats at Rellano May 23, 1912, and at Bachimba July 3. A revolution under the leadership of Gen. Bernardo Reyes in the north proved a fizzle and Reyes was arrested. In September following there were anti-Madero parades in Mexico City, but the effort to start a violent revolt failed. Then Felix Diaz, a nephew of the deposed President, started a revolution and took Vera Cruz without opposition on Oct. 16, but this, too, was a weak effort, and on Oct. 23 he surrendered to Federal troops commanded by Gen. Joaquín Beltrán. He and Reyes were confined in the penitentiary in the capital. On Sunday, Feb. 9, 1913, a sudden revolt broke out in the capital under the nominal leadership of the pupils of the military college, who released Diaz and Reyes and rode behind these two officers to the President's palace and demanded his surrender. A volley was fired and Gen. Reyes was killed. Diaz and his forces took refuge in the citadel and were joined by most of the Federal troops in the capital. The President summoned Gens. Huerta and Blanquet from the north and a nine-day battle, in which heavy artillery was used, was fought between the revolted in the Ciudadela and the Federals in the palace. There was immense loss of life, largely among non-combatants. Finally Henry Lane Wilson, the American Ambassador, arranged a meeting between Gen. Diaz and Gen. Huerta in the American

THE MEXICAN SITUATION—Continued.

Embassy, as a result of which Huerta and Blanquet turned traitors to Madero, deposed him and placed him, as well as his officials, under arrest. Feb. 19 the President's brother, Gustavo Madero, financial adviser to the administration, was murdered by Federal troops in the yard of the penitentiary. Huerta seized control of the Government and on the night of Feb. 23, 1913, Madero and Pino Suarez, the Vice-President, were shot to death by soldiers while being transferred from the palace to the penitentiary. On Feb. 20 Madero's followers in various sections declared themselves in revolution against the usurpation of Huerta, one of these being Venustiano Carranza, Governor of Coahuila. March 26 representatives of ten States met and adopted the "plan of Guadalupe." This was an agreement by which they pledged to support the Carranza revolution until Carranza had been made Provisional President and called an election and to support with arms the President chosen at such an election. The revolution smouldered along with various minor successes, while Huerta endeavored to secure the recognition of his Government by the United States. This, however, President Woodrow Wilson, who had meantime been inaugurated, flatly refused to grant, placing himself and the United States on record as unqualifiedly opposed to the system of "government by assassination," more or less common in Latin America. In September, 1913, the revolutionists in the north, who had secured a proper supply of arms and ammunition, became very active under Gen. Francisco Villa, who developed into something of a military genius. He never lost a battle, and captured such fortified places as Chihuahua, Torreón, Monterey, Ojinaga and Zacatecas in battles in which he showed a high order of strategic ability. The battles of Torreón and Zacatecas were particularly fierce, and the defeat of the Federals here made Huerta's position in the capital untenable. But meantime Huerta had become involved with the United States. On April 9, 1914, several bluejackets in command of a paymaster, were taken by the Mexicans from a navy launch flying the American flag at the Iturbide bridge at Tampico. Admiral Mayo, in command of the American fleet off Tampico, demanded their immediate release, and that by way of apology the Mexicans fire a 21-gun salute to the American flag. The men were released, but Huerta stubbornly refused the salute. The entire Atlantic fleet was sent to the east coast of Mexico and on April 21 Admiral Fletcher, in command of the American fleet off Vera Cruz, learning that the German ship Kronprinzessin Ceclle was about to land a big consignment of arms for Huerta, sent marines and sailors ashore and took possession of the city. A rear guard of Mexican troops, citizens in houses and criminals released from prison and armed for the purpose attacked the Americans, killing four and wounding twenty. For several days, and until a house-to-house search of the city had resulted in the confiscation of all arms, there was "sniping" in which the total of Americans killed was increased to nineteen. April 27 a brigade of American troops under Brig.-Gen. Funston relieved the naval forces and took possession of Vera Cruz. When Zacatecas fell, on June 24, Gen. Huerta was in a position to resist no further and on July 15, he and Gen. Blanquet resigned and went into exile. Francisco Carbajal, one of the most eminent jurists in Mexico, had charge of the Government in the interim between Huerta's departure and its surrender to Gen. Obregon, representing Carranza on Aug. 12.

For several months during the Summer the Ambassador of Brazil and the Ministers from Argentina and Chile, acting as a board of mediation, endeavored to solve the Mexican problem in a series of conferences at Niagara Falls, Ontario, but because Carranza would agree to no armistice, but persisted in his plan of taking the capital by force, not a great deal was accomplished, and as Huerta's enforced resignation became inevitable the need of mediation lessened and the conferences were adjourned.

Throughout both the Madero and Carranza revolutions the Zapata brothers maintained a force in arms in Southern Mexico, mostly in the State of Morelos, which they controlled, though at times they operated right up to the suburbs of the capital. They were never regarded, by foreigners generally, as serious revolutionists impelled by patriotic motives, though both Madero and Carranza so recognized and treated with them.

The peace which followed the accession of Carranza soon gave way to a dispute between Carranza and Villa, the old one revived. Villa issued an ultimatum that Carranza must retire, and a convention of all the revolutionary chiefs was called for Aguascalientes October 10 to decide upon the best way to proceed in the establishment of a government. The majority sentiment of this convention favored Villa, and it was announced Carranza had resigned and that Villareal had succeeded him, but Carranza refused to give up control of the government. The convention remained in session and early in November the convention proclaimed Gen. Eulalio Gutierrez Provisional President of the Republic. Gen. Villa immediately took steps to see that Gutierrez was installed in office, though Carranza continued to give signs of opposition. Both Carranza and Villa mobilized their military forces, and Villa began his march on the capital. The Carranzistas were hopelessly outnumbered in the territory between Aguascalientes and the capital, and the stronghold of Queretaro surrendered to Villa without a fight. Carranza immediately thereafter abandoned the capital, taking his forces toward Vera Cruz, when it had been expected the American troops would be removed. The American soldiers were embarked November 23 and the actual military occupation of the Mexican seaport was ended, though the North Atlantic fleet remained in the harbor for the protection of American and other foreign interests in the troubles which seemed to be threatening.

With the capital menaced by Zapata's forces, Gen. Carranza evacuated the City of Mexico November 21, all of his loyal officers accompanying him except Gen. Lucio Blanco, who took over supreme command in order to ward off the Zapatistas and police the city. Blanco evacuated the city November 24 and the Zapata troops moved in without the great disorder which had been feared. November 26 Carranza occupied Vera Cruz and proclaimed it the capital, and the following day Villa's troops began to move into the City of Mexico to install the Government decided upon by the Aguascalientes convention. Thus the lines were drawn for the struggle between Carranza, the deposed First Chief, and the majority of his former generals who had preferred to support the governmental ideas of Gen. Villa.

THE COST OF WARS.

The following table has been prepared by an eminent statistician. It is doubtful whether it can be relied upon, as the cost of war is too complex to be expressed in terms of dollars. It is believed that the following formula will give the cost, but, although correct in theory, the figures to be employed in it will inevitably depend upon the point of view of the man who attempts to solve the problem:

1. The net cost of a war equals
(Net loss of production) plus (Net increase in waste and consumption).
- A B
- A Net loss of production equals
(Average peace rate of production minus average war rate of production) multiplied by
(Duration of the war).
- B Net increase in waste and consumption equals
(Average cost of maintenance of armies and navies in war) minus (average cost of maintenance in peace) minus (decrease in expenditure for luxuries).

* The army of Great Britain is a volunteer army like that of the United States; all others have compulsory service and so are able to maintain five to six times the number of Great Britain's standing army and at less cost. The Government that relies upon voluntary enlistment to obtain its men is forced to compete with the labor market. Upon the keenness of such competition depends the number and class of men obtained and the wage that must be paid. Other Governments may rightly account that the benefit to the individual constitutes a large portion of his recompense for his service.

CONTRABAND LIST.

THE revised British list of contraband was delivered by the British Foreign Office to Ambassador Page in October, 1914, who cabled it to the State Department in Washington. The revised list is as follows:

The Declaration of London lays down the rule that a vessel cannot be deemed aware of a declaration of contraband when the declaration is made after she leaves port.

ABSOLUTE CONTRABAND.

Arms of all kinds, including arms for sporting purposes and their distinctive component parts.

Projectiles, charges and cartridges of all kinds and their distinctive component parts.

Powder and explosives specially prepared for use in war.

Sulphuric acid.

Gun mountings, limber boxes, limbers, military wagons, field forges and their distinctive component parts.

Range finders and their distinctive component parts.

Clothing and equipment of a distinctively military character.

Saddle, draught and pack animals suitable for use in war.

All kinds of harness of a distinctively military character.

Articles of camp equipment and their distinctive component parts.

Armor plates.

Haematite iron ore and haematite pig iron.

Iron pyrites.

Nickel ore and nickel.

Ferrocchrome and chrome ore.

Copper, unwrought.

Barbed wire and implements for fixing and cutting same.

Warships, including boats and their distinctive component parts of such a nature that they can only be used on a vessel of war.

Aeroplanes, airships, balloons and air craft of all kinds and their component parts, together with accessories and articles recognizable as in-

On November 17, 1914, the House of Commons justified the Government's action in declaring oil and copper contraband of war.

The American view of the way absolute contraband should be treated by a belligerent was announced in the informative statement issued August 15, 1914, by the State Department as follows:

When absolute contraband is destined to one of the countries at war, whether to the Government or to an individual of that country, it is subject to seizure and confiscation by any of the opposing belligerents when beyond the territory of the neutral Government from which it is shipped. The nationality of the vessel in which contraband of war is shipped is immaterial; it is subject to capture and destruction whether shipped in a neutral or enemy vessel.

The same position is set forth in Article 37 of the Declaration of London in this language:

Absolute contraband is liable to capture if it is shown to be destined to territory belonging to or occupied by the enemy, or to the armed forces of the enemy. It is immaterial whether the carriage of the goods is direct or entails transshipment or a subsequent transport by land. Article 39 of the Declaration of London says that contraband goods are liable to condemnation. Article 42 declares that goods which belong to the owner of the contraband and are on board the same vessel are liable to condemnation.

INTERNATIONAL PEACE FORUM.

To promote peace among the nations of the world, by encouraging a systematic study of the causes of war and the best methods to effect its abolition:

1. By the maintenance of a literary bureau for the moulding of public opinion regarding the various phases of the peace movement and the appalling nature and consequences of war;
2. By conducting a speakers' bureau to secure representative men for mass meetings, religious and patriotic services, conferences, conventions, chautauquas and congresses;
3. By organizing in every State in the Union and throughout the world, auxiliaries of the forum, to be controlled and directed from the international headquarters;
4. By the speedy discovery and execution of the means best calculated to unite the nations of the earth in a proclamation establishing compulsory arbitration and consequent abolition of war;
5. Also to work for the establishment of peace in the industrial world, by diffusing information relating to economic questions, and thus safeguard the rights of life, liberty and property—securing such conditions of industrial and economic competition as are fundamental to the peace of the world.

The forum in endeavoring to bring about industrial peace is striving for the enactment of a measure which will make illegal the calling of a strike until the lapse of a fixed period of time for the purpose of investigation by an impartial tribunal, which shall render a report on the merits of the controversy. Official Organ "The Peace Forum," published monthly.

Honorary President—Hon. William H. Taft; President—John Wesley Hill; Vice-Presidents—Charles W. Fairbanks, Alton B. Parker; Treasurer—Henry Clews, Headquarters, 13 East 41st Street, New York City.

Owing to the war now involving many nations the statistics here given are subject to radical changes because of losses and conquests incidental thereto.

COST OF THE BRITISH ROYAL FAMILY.

The annuities paid by the British people to the royal family for its support are as follows: The King and Queen, \$2,350,000; Queen Alexandra, \$350,000; Princess Christian, \$30,000; Princess Louise (Duchess of Argyll) \$30,000; Duke of Connaught, \$125,000; Duchess of Edinburgh, \$30,000; Princess Beatrice, \$30,000; Duchess of Albany, \$30,000; Duchess of Mecklenburg-Strelitz, \$15,000; Trustees for King Edward VII.'s daughters, \$90,000; total, \$2,790,000. The King also receives the revenues of the Duchy of Lancaster. During recent years these have amounted to about \$300,000 per annum. The Prince of Wales has an income also from the revenues of the Duchy of Cornwall, amounting to about \$400,000 per annum. When the royal children marry dowries are usually provided for them. The last of the children of the late Queen Victoria to marry, Princess Beatrice, received \$150,000 as dowry from the British people by Parliamentary grant.

REIGNING FAMILIES OF THE PRINCIPAL EUROPEAN COUNTRIES.

NOTICE—Exact information concerning the European governments and royal families was not obtainable (because of the war) at time ALMANAC went to press. The data herein printed is believed, however, to be approximately correct, excepting such changes arising from losses and conquests incidental to the war, e. g., the occupation of Belgium by Germany.

AUSTRIA-HUNGARY.

Francis Joseph I., the Emperor of Austria and King of Hungary, was born August 18, 1830, and was proclaimed Emperor of Austria after the abdication of his uncle, Ferdinand I., and the re-inauguration of the crown by his father on December 2, 1848. He was crowned King of Hungary June 8, 1867. He married, in 1854, Elizabeth, a daughter of Duke Maximilian of Bavaria. She died by the hand of an Anarchist in Geneva, September 10, 1898. They had issue:

1. Archduchess Gisela, born 1856; married to Leopold, son of Prince Luitpold of Bavaria.
2. Archduke Rudolf, late heir-apparent, born 1858; died by suicide, 1889. He married, 1881, Stephanie, daughter of the late King of the Belgians, and had issue one daughter, the Archduchess Elizabeth Marie, born 1883; married, 1902, Prince Otto Windisch Graetz. The widowed Crown Princess Stephanie married, March, 1900, Count Elmer Louyay.

3. Archduchess Marie Valerie, born 1868; married, 1890, Archduke Francois-Salvator. The Emperor's eldest brother was Archduke Ferdinand (Maximilian), Emperor of Mexico from 1864 to 1877, when he was shot at Queretaro. His widow, Marie Charlotte, survives him.

On the death of the Crown Prince, in 1889, the right of succession to the throne passed to the Emperor's second brother, the Archduke Charles Louis, who was born 1833 and died 1896; he married, 1862 (second marriage), the Princess Annunciata, daughter of King Ferdinand II. of Naples, and had issue the Archduke Francois Ferdinand, born 1863, who was the heir-presumptive to the throne (married,morganatically, 1900), Countess Sophie Chotek, who had title Duchess of Hohenberg conferred upon her October, 1909, and renounced the claim of his issue by her to the throne). Prince Charles Napoleon, brother of the late Cardinal Bonaparte, who died February 12, 1899, was the last representative of the eldest son of Napoleon's brother Lucien, in the male line. He was born 1839, was married, and had two daughters—Marie, wife of Lieutenant Gotti, of the Italian Army, and Eugénie, unmarried. He had three sisters, married respectively to the Marquis of Roccagiovine, Count Primoli and Prince Gabrelli, who have descendants.

Prince Roland Bonaparte is the only living male cousin of Prince Charles Napoleon. He is a son of the late Prince Pierre Napoleon Bonaparte; was born 1858; married, 1880, the daughter of Blanc, one

of the proprietors of the Monte Carlo gambling-hell. His wife died in 1832, leaving him a daughter, who is married to Prince George of Greece. He has one sister, Jeanne, born 1861, and married to the Marquis de Villeneuve, who died in 1910.

Ex-Empress Eugénie, widow of Emperor Napoleon III., was a daughter of Count Cyprien de Montijo, a Spanish grandee, and was born May 5, 1826. She married 1853. Became a widow, 1873. Her only son, Prince Louis Napoleon, was killed in Zululand in 1879.

BOURBON—ORLEANIST.

Philippe, Duke of Orleans, born 1869, succeeded his father, the late Count of Paris, in 1894, as the head of the royal family of France. He married, in 1896, the Archduchess Marie-Dorothea, daughter of the Archduke Joseph, cousin of the Emperor of Austria. His mother (still living) was the Spanish Infanta Louise of Montpensier, and he has one brother, the Duke of Montpensier, and four sisters—Princess Amélie, married the late King Charles of Portugal; Helena, married to the Duke of Aosta, nephew of the late King Humbert of Italy; Isabel, married to the Duke of Guise, son of the Duke of Chartres, and Louise, married to Prince Charles of Bourbon, grandson of King Ferdinand II., of Naples.

The only uncle of the Duke of Orleans, who died 1910, was the Duke of Chartres, born 1840, and married to a daughter of the Prince of Joinville. The issue are two daughters and two sons, the eldest son being Prince Henry, born 1867 (died at Saigon, Cochín-China, in 1901); the second, the Duke of Guise, who had issue three daughters and one son; the eldest daughter, Princess Marie, being married to Prince Waldemar of Denmark, and the second daughter, Princess Marguerite, being married (in 1896) to Patrice MacMahon, Duke of Magenta.

The granduncles of the Duke of Orleans (who were the sons of King Louis Philippe) are all dead. They were the Prince of Joinville, born 1818, died 1900, married to a daughter of Pedro I. of Brazil, and had one daughter who married the Duke of Chartres, and had one son, the Duke of Penthièvre, born 1845; Henry, Duke of Aumale, born 1822, died (childless) 1897; Anthony, Duke of Montpensier, born 1824, died 1890 (married, 1846, a sister of Queen Isabel of Spain, and had a daughter, the wife of the Count of Paris, and a son, Prince Anthony, born 1866, who married, 1888, his cousin, the Infanta Eulalie of Spain), and Louis, Duke of Nemours, born 1814, died 1896. He was the father of two daughters, the Princess Cratorkyska, deceased, and Princess Blanche of Orleans, and two sons, the eldest being the Count of Eu, born 1842, married to a daughter of Pedro II. of Brazil, and having three children, and the second the Duke of Alençon, born 1844, and married to a Bavarian princess (who was burned in the Paris bazaar fire in 1897), and having two children.

By the death of the Count of Chambord, in 1883, the elder line of the Bourbons of France became extinct, and the right of succession merged in the Count of Paris, grandson of King Louis Philippe, representative of the younger, or Orleans, line.

THE BRITISH PARLIAMENT.—(See foot note.)

THE supreme legislative power of the British Empire is, by its Constitution, vested in Parliament. This body consists of two houses, the Lords and the Commons.

THE HOUSE OF LORDS.

The House of Lords is composed of the whole Peerage of England and of the United Kingdom, and of certain representative Peers of Scotland and Ireland, but many members of these latter have also English titles which give them seats in the House. The Duke of Buccleuch sits as Earl of Doncaster, and the Duke of Leinster as Viscount Leinster. The House at present consists of 3 Princes of the Blood, 2 Archbishops, 21 Dukes, 25 Marquesses, 122 Earls, 45 Viscounts, 24 Bishops, 353 Barons, 16 Scottish Representative Peers elected for each Parliament, and 27 Irish Representative Peers elected for life—in all, 638 members.

The Lord Chancellor of England is the Speaker of the House of Lords.

ESPERANTO, THE INTERNATIONAL LANGUAGE.

Esperanto is an artificial language invented by the Russian Dr. L. L. Zamenhof, of Warsaw, Poland. It has only one object in view, namely, to serve as an international auxiliary language; it is not in the least intended to replace the national languages. The first book in the new language was published in 1887.

The Esperanto words are mostly of Latin, but to some extent also of Anglo-German origin, so that at the first glance Esperanto has the familiar appearance of a Roman language.

The great success of Esperanto, which is now known and studied all over the world, is chiefly due to the facility with which it may be mastered. The pronunciation is strictly phonetic, making the study of spelling unnecessary. The grammar does not admit of any exceptions to the rules, and is so logical and simple that it may be learned completely in a few hours by any person who is familiar with the grammar of his mother tongue. The vocabulary consists of about 2,500 root words, a large majority of which is known to any one whose language contains a great number of Latin roots—for instance, English.

In spite of this small number of root words Esperanto has been made rich in words and expressions by the adoption of certain affixes and certain methods of word combination. By these simple and easy means a considerable vocabulary may be obtained. Esperanto is a well-sounding language when spoken.

Esperanto is now used for all civilized purposes by many hundreds of thousands of persons in all civilized countries. It made its appearance in the United States in an organized form in 1905, when the first society for its study was formed in Boston, and this was followed soon afterward by societies in New York and Philadelphia. It is now promoted by a large and flourishing national association, the "Esperanto Association of North America."

Esperanto has a large literature, over a hundred periodicals, including a number in the United States, being published and a large and powerful "Universal Esperanto Association" maintains a regular system of consulates all over the world, to facilitate the transaction of all kinds of legitimate business for its members by means of the common tongue.

International congresses of Esperantists have been held at Boulogne, Geneva, Cambridge, Dresden, Barcelona, Washington, Antwerp, Cracow and Berne. The last was attended by delegates representing the Esperantists of forty different nations and languages.

The Esperantists of America have established in Boston an office from which may be obtained without charge, any desired information of the movement. Address "Esperanto Office," West Newton (Boston Postal District), Mass.

THE UNION OF SOUTH AFRICA.

A FEDERATION of four British Colonies in South Africa, namely, the Cape Colony, Natal, the Transvaal and Orange Free State, was formed provisionally in 1909 by a convention held at Capetown. The federation was confirmed by an act passed by the British Parliament August 16, 1909, and the date appointed for the establishment of the Union was fixed for May 31, 1910. Viscount Gladstone was appointed Governor-General and assumed office on that date.

The act of Union vested the executive government in the King and his successors, a Governor-General advised by an executive council and ministers of state. Legislative power was vested in a Parliament composed of the King, a Senate of forty members, eight nominated for ten years by the Governor-General in council, and eight for each original province elected for ten years by the two houses of the Colonial Legislature sitting together, and a House of Assembly, consisting of members chosen as follows: From the Cape Colony, 51; Natal, 17; Transvaal, 36; Orange Free State, 17. The Governor-General has the power to summon, prorogue and dissolve Parliament, and that body shall sit annually.

Provision is made for an Administrator for each province for five years, appointed by the Governor-General, and a Provincial Council elected for three years.

Pretoria, in the Transvaal, is the seat of Government of the Union, and Cape Town the meeting place of Parliament. The English and Dutch languages are both official. It is provided that the British South African Company's territories may be received into the Union and the government of native territories may be transferred to the Union Government.

The area of the Union of South Africa is as follows, in square miles: Cape Colony, 276,995; Natal, 35,290; Transvaal, 110,426; Orange Free State, 50,389. Total Union, 473,100.

The population is as follows: Cape Colony, 2,564,965; Natal, 1,194,043; Transvaal, 1,686,212; Orange Free State, 528,174. Total Union, 5,973,394.

THE COMMONWEALTH OF AUSTRALIA.

The Commonwealth of Australia consists of the six original Australian colonies: New South Wales, Victoria, Queensland, South Australia, Western Australia and Tasmania. Each of these is a self-governing State, except as to the powers reserved to the Confederation. The Commonwealth of Australia was proclaimed at Sydney, January 1, 1901. Legislative power is vested in a Federal Parliament, consisting of the King—represented by a Governor-General—a Senate and a House of Representatives. The Senate consists of thirty-six Senators—six for each State—chosen for six years. The House of Representatives consists of seventy-five members, distributed as follows: New South Wales, 27; Victoria, 22; Queensland, 9; South Australia, 7; Western Australia, 5; Tasmania, 5.

The legislative powers of the Federal Parliament embrace commerce, shipping, finance, defence, post-office, telegraph, census and statistics and conciliation and arbitration in industrial disputes extending beyond the limits of any one State. Authority is given to the Commonwealth to assume jurisdiction regarding railways, lighthouses, marriage and divorce, and emigration and immigration. The executive power is vested in the Governor-General, assisted by an Executive Council of responsible Ministers. There is also a Federal Judicature. The present seat of Government is at Melbourne, the Federal capital (Canberra) being in process of building. The area of the Commonwealth, with the Territories (Northern Territory, Papua), and Federal District (Canberra), is 3,063,041 square miles, and the population (census, 1911) is 4,918,707.

Each of the States has its own Parliament, Governor, Ministry and Judiciary.

CHINA.

CHINA, the oldest of monarchies, became a republic on February 12, 1912.

The Government is composed of a President, a Vice-President, a Senate of 274 members who serve for six years (one-third of the members retiring every two years), elected by the various Provincial Assemblies and Electoral Colleges, and a House of Representatives of 596 members who serve for three years, the number for each province—Thibet, Kokonor, and Mongolia—being proportional to the estimated population, one representative being elected for each 800,000 of the

population. Male citizens are eligible to vote if they are twenty-one years of age or older and if they possess any of the following qualifications: (a) payment of direct tax of \$2 per annum or over, (b) possession of immovable property of the value of \$500 or over, (c) graduate of an elementary or higher school, (d) possession of an education equivalent to (c). Opium smokers are disqualified. The administration is carried on by the following Ministries: (1) Foreign Affairs, (2) Interior, (3) Finance, (4) Education, (5) War, (6) Marine, (7) Agriculture and Commerce, (8) Communications, and (9) Justice. The affairs of Mongolia and Tibet, formerly under the control of the Ministry of the Colonies, are now under the Department for Mongolia and Tibet.

President of the Republic—Yuan Shih-kai (Honan), born 1859, elected October 6, 1913, inaugurated October 10, 1913. The Presidential term is five years. The President can be re-elected but for one other term only. Three months prior to the expiration of the term the new President will be elected.

Vice-President—Li Yuan-Hung (Hupei), Peking, elected October 7, 1913.

Parliament met on April 8, 1913. The committee for drafting the Constitution, consisting of sixty members, thirty appointed from each house, met on July 21; the draft Constitution of 113 articles was completed and passed on October 25, 1913. A constitutional struggle broke out between the President and Parliament to determine the powers of the President, which are regarded as unduly restricted in the draft Constitution; on January 11, 1914, the President formally dissolved Parliament and the Provincial Assemblies, and has taken all power into his own hands (April, 1914).

The following are members of the Cabinet (February, 1914):

Premier and Minister of Foreign Affairs—Sun Pao-ch'i (Chekiang).

Minister of Finance—Chow Tzu-ch'i (Shantung).

Minister of Education—Tong Hua-lung (Chihli).

Minister of War—Twan Chi-Ju (Shantung).

Minister of Justice—Chang Tsung-hsiang (Chekiang).

China proper (or the eighteen provinces) contains an area of over 1,500,000 square miles. Its length from north to south is 1,860 miles, and its breadth 1,520 miles, and its population, according to the latest Chinese estimates, exceeds 400,000,000. The civil government of the eighteen provinces is entrusted to viceroys and governors, and under them each province is subdivided into circuits superintended by taotais or intendants, and again into prefectures and districts. All the territorial officials are appointed by the Imperial Government, and the provincial viceroys and governors, though free to act independently in many matters of local detail and finance, are responsible to the Central Government at Peking in all important questions, and especially so in foreign affairs. The administration of Mongolia and Turkestan is entrusted to the military lieutenant-governors, who, with the Chinese officials in Tibet, are under the direction of the Mongolian Superintendency, or Colonial Office, in Peking.

Foreign relations with the Chinese Empire have existed for many centuries. In the thirteenth century the Venetian merchant-adventurer Marco Polo resided in Cambaluc (the present Peking), and was employed by the Mongol Emperor Kublai Khan as adviser. In the seventeenth century Jesuit missionaries had attained considerable influence, but their power aroused jealousy and they were expelled. The Dutch and Portuguese traders had for centuries maintained commercial dealings with the port of Canton, but toward the end of the eighteenth century they were largely displaced by the British East India Company, and when the company's monopoly was withdrawn in 1833 the position of British merchants in Canton became a national question and contributed toward the first Chinese war of 1840. A treaty was signed at Nanking as the result of these operations, ceding Hongkong to Great Britain and opening five ports to foreign trade and residence; but the principle of extra-territoriality was maintained and foreigners remained amenable only to the laws of their own countries. The continued exclusiveness of the Chinese Government led by a long chain of events to the war of 1860, when British and French troops captured Peking and burned the Summer Palace. From this date the development of foreign trade began to be most important, and for many years Great Britain's share of it was greatly predominant. In 1894 China fought a disastrous war with Japan, resulting in the loss of Formosa and the establishment of Korea as an independent state.

On the conclusion of the war between Russia and Japan in 1905 a treaty and additional agreement relating to Manchuria were entered into between Japan and China. By the former the Chinese Government consented to all the transfers and assignments made by Russia to Japan in Manchuria; and by the latter the following cities and towns in Manchuria were opened as places of international residence and trade: Feng-huang-ch'eng, Liao-yang, Hsin-mintun, Tung-chiang-tzu (on the Liao River), and Fa-ku-men in Fengtien Province; Ch'ang-ch'un, Kirin, Harbin, Ninguta, Hunch'un, and Sansing in the Kirin Province; and Tsitsihar, Hallar, Aihun, and Manchuli in the Heilungekiang Province.

Latest estimates of the foreign residents at the open ports of China are as follows: British, 10,140; Japanese, 65,434; Americans, 3,176; Russians, 49,395; Germans, 4,106; French, 1,925; Portuguese, 3,377; Spaniards, 400; Italians, 274; Danes, 260; other nationalities, 3,381; the total being 141,868. Out of a total of 3,239 foreign firms in China 601 are British, 1,601 Japanese, 238 German, 100 American, 110 French, 57 Portuguese, and 84 Spanish.

Commerce—The foreign trade of China, by percentage, was as follows in 1912: Great Britain 13, Hongkong 30, India 6, other British dominions 2, Japan 17, United States 8, Europe (excluding Russia) 14, Russia 8, other countries 2.

Railways—About 5,900 miles, inclusive of the Manchurian lines.

Shipping—The mercantile marine (1912) consisted of sixty-eight vessels over 100 tons register (fifty-eight steam), with a total net tonnage of 90,420 tons. In 1912 the total tonnage of vessels entered and cleared at the treaty ports was 88,206,497. Of these 44 per cent. were British, 20 per cent. Chinese, 7 per cent. German, 22 per cent. Japanese, 2 per cent. French.

Telegraphs—Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. The total length of line in operation at end of 1910 was 49,000 miles.

Customs and Posts—Letters can be sent all over the eighteen provinces at a uniform rate of 3 cents for twenty grammes. The number of Chinese post-offices is 5,352; 421,000,000 postal packets and 4,237,000 parcels were handled in 1911.

Revenue (1912), £38,200,000; expenditure (1912), £38,200,000; debt (1912), £170,000,000.

Imports (1912), £64,760,000; exports (1911), £50,121,000; (1912), £51,090,000.

* Land and water included in area. † Alberta and Saskatchewan were erected into provinces in 1905. By the Extension act of 1912, the area of Ontario was increased by 146,400 square miles, Quebec by 354,961, and Manitoba by 178,100.

High Commissioner in London, England (vacant).

The Dominion of Canada has an area of 3,729,665 square miles (excluding the Hudson Bay, the Gulf of St. Lawrence and all tidal waters) and comprises one-sixteenth of the land surface of the globe. It is the largest of all the British possessions, Australia, the next in size, containing 2,946,691 square miles. The Government of Canada is federal, centred at Ottawa, which city is the capital of the Dominion, while the provinces have their respective local Legislatures. The head of the Federal Government is the Governor-General, appointed by the King of Great Britain, and holding office for five years, his salary being paid by the Dominion Government.

The Lieutenant-Governors of the several provinces are appointed by the Federal Government for a term of five years. The Legislatures are elected by the people of each province. The highest court in the Dominion is the Supreme Court, composed of a Chief Justice and five Judges, each of whom receives a salary of \$9,000 per annum, except the Chief Justice, who is paid an additional \$1,000. From the decisions of this court the only tribunal to which appeal can be made is to the Judicial Committee of the Imperial Privy Council of Great Britain. The only other Federal court is the Exchequer Court, presided over by a single Judge, for trying cases connected with the revenue. Salary \$8,000. All others are of a provincial character, limited to jurisdiction in their respective provinces only.

FINANCES.

Revenue (financial year ending March 31, 1913), \$168,689,903 of which \$111,764,699 was from customs, \$21,447,445 from excise, \$12,051,729 from post-office, \$13,158,078 from public works, including Government railways; miscellaneous, \$10,267,952. The revenue in 1912 amounted to \$136,108,217, and in 1911 it was 117,780,410.

The expenditure on account of consolidated fund was \$112,059,537, of which \$12,605,882 was for interest; \$5,109,459 for civil government; \$1,335,243 for administration of justice; \$1,379,130 for legislation; \$2,260,207 for lighthouse and coast service; \$1,952,525 for mail subsidies and steamship subventions; \$1,818,186 for Indians; \$921,953 for fisheries; \$800,589 for department of mines and scientific institutions; \$2,647,878 for arts, agriculture and statistics; \$9,114,533 for militia and defence; \$14,154,876 for public works; \$13,211,800 for subsidies to provinces; \$10,882,805 for post-office; \$14,433,537 for railways and canals; \$3,150,777 for collecting customs revenue; \$1,123,728 for ocean and river service; \$1,275,562 for immigration; \$783,888 for mounted police; \$2,086,049 for naval service.

In 1914 the revenue amounted to \$163,174,395, and the expenditure to \$127,384,473. (Details not available when ALMANAC went to press.)

DOMINION OF CANADA—Continued.

NATIONAL DEBT.

The gross public debt of Canada on March 31, 1914, amounted to \$544,391,369. The total assets counted against gross public debt amounted to \$208,394,519.

DEFENCE.

Every Canadian citizen is liable to service in the militia from the age of 18 to that of 60. Militiamen are enrolled for three years to the "active" militia. The actual training varies in length, according to the branch of the service, from 12 to 16 days.

It is provided that if the embodiment of the militia becomes necessary, the men, both active and reserve, would be called out in four classes or levies; first, the unmarried men and widowers (without children) from 18 to 30; secondly, the unmarried men and widowers (without children) from 30 to 45; thirdly, the married men and widowers (with children) from 18 to 45; fourthly, all the remaining men up to 60. In the case of a *levée en masse*, all male inhabitants capable of bearing arms may be required to serve without regard to age, class or distinction.

The active militia includes the "permanent force," which furnishes the personnel of the training schools, and some nucleus units of garrison artillery, etc. There are various schools of military instruction which are established in the six divisional areas and the three military districts into which Canada is now divided. A proportion of the officers are trained at the Royal Military College at Kingston. Total active militia in 1913 was:

The present Constitution of Mexico bears date February 5, 1857, with subsequent amendments. By its terms Mexico is considered a Federative Republic, divided into States, nineteen at the outset, but at present twenty-seven in number, with three Territories and one Federal District, each having a right to manage its own local affairs, while the whole are bound together in one body politic by fundamental and constitutional laws. The powers of the Federal Government are divided into three branches—the legislative, executive, and judicial. The legislative power is vested in a Congress, consisting of a House of Representatives and a Senate; the executive in a President, and the judicial in Federal Courts. Representatives elected by the suffrage of married males if eighteen years of age and twenty-one years of age if unmarried, at the rate of one member for every 40,000 inhabitants or fraction exceeding 20,000, and hold their places for two years. The qualifications requisite are to be twenty-five years of age and a resident in the State. The Senate consists of two members from each State, of at least thirty years of age, who hold their places for four years. Senators are elected indirectly, half of the Senate being renewed every two years. The members of both Houses receive salaries of 3,000 pesos each year.

The President is elected by electors popularly chosen in a general election, and holds office for six years. In case of his sudden death or disability, the Vice-President, who is also permanent President of the Senate, officiates in his place. Congress holds two regular sessions annually, from September 16 to December 15, and from April 1 to May 31, and a permanent committee of both Houses sits during the recesses.

For the year ending June 30, 1913, the value of imports was \$97,886,169, an increase of \$6,555,014. The exports for 1913 on the same basis amounted to \$150,202,803, a gain of \$1,308,244 over the previous year.

In view of the perturbed political conditions of the country, Mexico's commerce suffered less than might have been expected. The total foreign trade for the fiscal year ending June 30, 1912, was only 18,976,472 pesos (peso equals about \$0.50 U. S. currency) less than for the preceding year, and the reduction was confined altogether to imports, the exports being 4,235,489 pesos in excess of the year ending June 30, 1911. The gain of total trade in the fiscal year 1912-13 amounted to \$1,208,243 in excess over previous year.

ARMY AND NAVY.

The full strength of the army in September, 1912, was stated to be 107 generals, 6,236 officers and 49,332 men.

There are six gunboats of from 1,000 to 1,300 tons, armed with rapid-firing four-inch guns and with rapid-firing six-pounders; a transport of 1,600 tons, armed with 57 mm. guns; another transport of 900 tons; two training ships, one of steam, 1,300 tons, armed with 12 cm. and 57 mm., and the other a sailing ship of 700 tons. There are, also, several small revenue cutters watching the coast on both oceans; a naval school, a navy-yard, a floating dock at Vera Cruz, a dry-dock at Salina Cruz and a shipyard at Guaymas. The Military School is at Chapultepec.

NATIONAL DEBT.

According to the report of the Under Secretary of Finance to the Mexican Congress on December 14, 1913, the public debt for the fiscal year 1912-13 was as follows: Debt payable in foreign currency, face value of bonds in circulation, \$310,105,945.74; debt payable in Mexican currency, face value of bonds in circulation, \$134,197,810.00; floating debt, uncollected balances of past budgets, \$666,986.22. Grand total, \$444,970,741.96.

INTERNAL IMPROVEMENTS.

Miles of railway in operation, 16,000; miles of telegraph line, 50,000; post-offices, 2,964. This information about Mexico was furnished by the Pan-American Union, Washington, D. C.

BRAZIL.

The Republic of the United States of Brazil is the largest of the South American countries and the second largest of the American Republics, extending over an area of 3,218,130 square miles, or about 400,000 square miles less than the United States of America with Alaska. It is situated between 4° 22' north and 33° 45' south and longitude 34° 40' and 75° 15' west, and touches every other South American Republic with the exception of Chile; besides, it is bounded by British, Dutch, and French Guiana.

Brazil has a population of 24,000,000, equal to 6.4 per square mile, or about a fifth the population per square mile of the United States of America proper. The language of the country is Portuguese. Under the Constitution Brazil is a Federal Union of States, republican and representative. The Union is composed of twenty-one States, one National Territory, and the Federal District. The peace strength of the regular army is 32,000, but as every Brazilian citizen between twenty-one and forty-five years of age is liable to military service, the war strength of the Republic probably exceeds 300,000 men. The navy consists of thirty-one vessels, among which are three battleships, four protected cruisers and fifteen torpedo boats.

It is announced that the Brazilian Government presented to the National Congress the following budget for 1915: Estimated receipts, \$61,152,000 gold and \$108,508,000 paper; expenditures, \$48,288,000 gold and \$125,966,000 paper.

Total trade, 1912, \$671,038,582; total trade, 1913, \$641,593,196; decrease in 1913, \$29,445,386. Imports, 1913, \$326,428,509; exports, 1913, \$315,164,687; total, 1913, \$641,593,196. Exports of coffee in 1913, \$198,180,994; exports of rubber, 1913, \$49,753,583.

ARGENTINA.

ARGENTINA, the third largest of the American Republics, is situated between latitude 22° and 56° south and longitude west of Greenwich 53° and 57°, being bounded by the Republics of Chile, Bolivia, Paraguay, Brazil, Uruguay, and the Atlantic Ocean. It has an area of 1,153,413 square miles, equal to over one-third the total area of the United States of America, and a population of 9,000,000 (estimated in 1914), or 32+ per square mile, as against 32.08 per square mile in the United States of America.

It is a Federal Republic of fourteen provinces, ten Territories, and one Federal District. The provinces and Federal District are represented in the National Congress, composed of a Senate and Chamber of Deputies. The permanent army numbers about 22,000 men, and there is a reserve army of trained men of about 150,000. The navy aggregates about sixty vessels, of which two are battleships, four armored cruisers, and three protected cruisers.

Commerce, 1913: Exports, \$468,999,410; imports, \$408,711,966; total, \$877,711,376. The total length of railroads in operation at the close of 1914 was 20,502 miles, representing a capitalization of \$1,120,210,000. In 1913 there were 2,980 post-offices, 2,600 telegraph offices and about 43,202 miles of wire; 7,183 public schools for primary instruction, with an enrolment of 746,725 pupils, aside from the numerous schools supported by the provinces, and schools of higher education.

CHILE.

AREA, 291,520 square miles. Population, 4,000,000 (estimate 1914). The Republic of Chile extends over more than 38 degrees of latitude, from 17° 57' to 55° 59' south, stretching from the Samu River to Cape Horn, and occupying a long, narrow strip of land between the Andean mountain range and the Pacific Ocean, with a coast line of 2,625 miles and an average width of 90 miles. The Republic has a single republican form of government, with the customary division into legislative, executive and judicial branches. There are twenty-three provinces and one Territory.

Foreign commerce for 1913: Exports, \$144,653,312; imports, \$120,274,001; total, \$264,927,313. The principal exports are nitrate of soda, copper, wheat, iodine, borate of lime, oats, bran, wool, etc. The principal imports are textiles, mineral products, coal oils, etc., machinery, hardware, carriage, etc., vegetable products, animal products, paper, and manufactures; wines, liquors, and other beverages.

THE PAN-AMERICAN SOCIETY OF THE UNITED STATES.

The objects of this society are: To promote acquaintance between representative men of the United States and those of Latin-American republics; to show hospitality and attention to representative Latin-Americans who visit the United States; to take such steps, involving no political policy, which the society may deem wise to develop and conserve good understanding, true friendship, and mutual knowledge of each other among the American republics and peoples. *President*—Henry White. *Vice-Presidents*—Lloyd C. Griscom, Cabot Ward, John Barrett. *Secretary-Treasurer*—Frederic Brown. Headquarters, 15 Broad Street, New York City.

PAN-AMERICAN UNION.

THE Pan-American Union was organized for the purpose of promoting friendship and commerce between the twenty-one American Republics, each of which contributes to the maintenance of the institution in proportion to its population. The building in which the Union is housed stands upon land provided by the United States at the cost of \$200,000, the cost of the building (\$1,000,000) having been defrayed as to three-fourths by Andrew Carnegie, and as to one-fourth by the twenty Republics of Latin America. The address is 17th Street, Washington, D. C.

UNION OF INTERNATIONAL ASSOCIATIONS.

This association was founded in Brussels in 1910. At the first congress 132 organizations took part. The object of the World's Congress of International Associations is the study of the international in all branches of knowledge and under all its forms: science and art, law and political organization, social work and economies.

The international organization is due to a vast and continuous movement. Secular in its origin, it has, of late years, acquired an immense development. It tends toward much greater co-operation between similar groups in all countries; to the extension of a greater acquisition of knowledge and of technique throughout the world; to the unification of methods and to international agreements on all points, where possible, and recognized as desirable.

International associations have become the centralizing organs of this movement; whether official or private, created by the union of States, or formed by the drawing together of national federations of free initiative, it is to them that we owe the results which have transformed the world's mode of living; the universal post; the extension of the decimal metrique system to all relations; the co-ordination beyond the frontiers of railway services and navigation; the international law applicable to all the judicial relations of persons and property; the arbitration between nations substituting the reign of peace to the decisions of war; the interparliamentary discussions of great world's interests; co-operation, charity, and assurance, extending to all countries the sphere of solidarity and fraternity; the shelter to the public health from great scourges, gained by concerted hygienic measures; the works of art and books protected internationally, exchanged, lent, and the documentation universalized; science studied in common, and by the contributions of partial results obtained by workers in all countries, constituted into a universal synthesis of knowledge.

CONSULAR SERVICE.

C. G., Consul-General; C., Consul; V. C., Vice-Consul; D. C., Deputy Consul; C. A., Consular Assistant.

To insure prompt attention letters upon consular business should be addressed "To the American Consul at.....". Such letters are opened and attended to by the person who happens to be in charge of the office. If addressed to the consul by name they are forwarded to him unopened if he should be absent, and a delay thus intervenes; if he should in the mean time have gone out of office they may wholly escape attention.

Consuls at the principal places in the world are given here. Where there are a consul and vice or deputy consul at the same place only the consul is given. Consular officers are *ex-officio* notaries for all the States of the United States.

MILITARY ORDER OF THE CARABAO.

A military organization composed of those officers of the United States Volunteer or Regular Army, Navy, Marine Corps, Philippine Scouts, or as a Naval cadet or midshipman, or as acting assistant surgeon, contract surgeon, contract dental surgeon, or any person who served as an enlisted man in the United States Army, Navy or Marine Corps and subsequently received a commission for appointment in any of the above named classes, and accredited war correspondents who served in the Philippine Islands between May 1, 1898 and July 4, 1902. Members of the order are known as Carabao. The oldest lineal male descendant of a Carabao is eligible for membership. The order is composed of a main body at Washington known as the Main Corral and bodies in other cities known as corrals.

The order was created for the purpose of fostering a high standard of military and social duty and to perpetuate the memories and associations of military service in the Philippines during the early days of American occupation. The origin of the order grew out of an idea conceived at a dinner at the Officers' Club in Manila shortly after the return of troops from China in 1900. The name was suggested by Major George L. Byram, United States Army, in recognition of the services rendered to the American forces by the faithful carabao, the principal beast of burden in the Philippines. The emblem of the order is a carabao's head on a pendant. The officers of the Main Corral are elected each year.

Officers of Carabaos at time ALMANAC went to press: *Paramount Carabao (President)*—Rear-Admiral Hugo Osterhaus. *Patriarch of the Herd (First Vice-President)*—Brig.-Gen. M. M. Maccomb, U. S. A. *Bull Carabao (Second Vice-President)*—Col. George Richards, U. S. M. C. *Lead and Wheel Carabao (Secretary and Treasurer)*—Dr. Joseph M. Heller. *Main Guy*—Col. H. O. S. Heistand, U. S. EXAMINATIONS FOR THE CONSULAR SERVICE.

IN pursuance of the Executive order of June 27, 1906, whereby the President promulgated regulations governing appointments and promotions in the consular service, the following rules have been adopted by the Board of Examiners, who, under that order, have been designated to formulate rules for and hold examinations of applicants for admission to the consular service whom the President shall have designated for examination to determine their eligibility for appointment therein:

1. The examinations will be the same for all grades and will be to determine a candidate's eligibility for appointment in the consular service, irrespective of the grade for which he may have been designated for examination and without regard to any particular office for which he may be selected.

2. The examinations will consist of an oral and a written one, the two counting equally. The object of the oral examination will be to determine the candidate's business ability, alertness, general contemporary information, and natural fitness for the service, including moral, mental and physical qualifications, character, address, and general education and good command of English. In this part of the examination the applications previously filed will be given due weight by the Board of Examiners, especially as evidence of the applicant's business experience and ability. The written examination will include those subjects mentioned in the Executive order, to wit: French, German, or Spanish, the natural, industrial and commercial resources and the commerce of the United States, especially with reference to possibilities of increasing and extending the foreign trade of the United States; political economy, and the elements of international, commercial and maritime law. It will likewise include American history, government, and institutions; political and commercial geography; arithmetic (as used in commercial statistics, tariff calculations, exchange, accounts, etc.); the modern history, since 1850, of Europe, Latin America, and the Far East, with particular attention to political, commercial and economic tendencies. In the written examination, composition, grammar, punctuation, spelling and writing will be given attention.

3. To become eligible for appointment, except as student interpreter, in a country where the United States exercises extra territorial jurisdiction, the applicant must pass the examination outlined above, but supplemented by questions to determine his knowledge of the fundamental principles of common law, the rules of evidence, and the trial of civil and criminal cases.

4. The examinations to be given candidates for appointment as student interpreters will follow the same course as in the case of other consular officers, provided, however, that no one will be examined for admission to the consular service as a student interpreter who is not between the ages of nineteen and twenty-six, inclusive, and unmarried; and, provided further, that upon appointment each student interpreter shall sign an agreement to continue in the service so long as his services may be required, within a period of five years.

5. Upon the conclusion of the examinations the names of the candidates who shall have attained upon the whole examination an average mark of at least eighty, as required by the Executive order, will be certified by the board to the Secretary of State as eligible for appointment in the consular service, and the successful candidates will be informed that this has been done.

6. The names of candidates will remain on the eligible list for two years, except in the case of such candidates as shall within that period be appointed or shall withdraw their names, and of candidates holding subordinate positions in the consular service, when eligibility shall not expire until appointment to consular rank or until separation from the service. Candidates whose names have thus been dropped from the eligible list will not again be eligible for appointment unless upon fresh application, designation anew for examination, and the successful passing of such second examination.

DUTIES OF CONSULAR OFFICERS.

Consular officers are expected to endeavor to maintain and promote all the rightful interests of American citizens, and to protect them in all privileges provided for by treaty or conceded by usage; to visa and, when so authorized, to issue passports; when permitted by treaty, law or usage, to take charge of and settle the personal estates of Americans who may die abroad without legal or other representatives, and remit the proceeds to the Treasury in case they are not called for by a legal representative within one year; to ship, discharge, and, under certain conditions, maintain and send American seamen to the United States; to settle disputes between masters and seamen of American vessels; to investigate charges of mutiny or insubordination on the high seas and send mutineers to the United States for trial; to render assistance in the case of wrecked or stranded American vessels, and, in the absence of the master or other qualified person, take charge of the wrecks and cargoes if permitted to do so by the laws of the country; to receive the papers of American vessels arriving at foreign ports and deliver them after the discharge of the obligations of the vessels toward the members of their crews, and upon the production of clearances from the proper foreign port officials; to certify to the correctness of the valuation of merchandise exported to the United States where the shipment amounts to more than \$100; to act as official witnesses to marriages of American citizens abroad; to aid in the enforcement of the immigration laws, and to certify to the correctness of the certificates issued by Chinese and other officials to Chinese persons coming to the United States; to protect the health of our seaports by reporting weekly the sanitary and health conditions of the ports at which they reside, and by issuing to vessels clearing for the United States bills of health describing the condition of the ports, the vessels, crews, passengers, and cargoes; and to take depositions and perform other acts which notaries public in the United States are authorized or required to perform. A duty of prime importance is the promotion of American commerce by reporting available opportunities for the introduction of our products, aiding in the establishment of relations between American and foreign commercial houses, and lending assistance wherever practicable to the marketing of American merchandise abroad.

In addition to the foregoing duties, consular officers in China, Turkey, Siam, Maskat, Morocco, and a few other so-called un-Christian countries, are invested with judicial powers over American citizens in those countries. These powers are usually defined by treaty, but generally include the trial of civil cases to which Americans are parties, and in some instances extend to the trial of criminal cases.

THE HALL OF FAME.

MARCH 5, 1900, the Council of New York University accepted a gift of \$100,000, afterward increased to \$250,000, from a donor, whose name was withheld, for the erection and completion on University Heights, New York City, of a building to be called "The Hall of Fame for Great Americans." A structure was built in the form of a terrace with superimposed colonnade connecting the University Hall of Philosophy with the Hall of Languages. On the ground floor is a museum 200 feet long by 40 feet wide, consisting of a corridor and six halls to contain mementoes of the names that are inscribed above. The colonnade over this is 600 feet long with provision for 150 panels, each about 2 feet by 6 feet, each to bear the name of a famous American.

Only persons who shall have been dead ten or more years are eligible to be chosen. Fifteen classes of citizens were recommended for consideration, to wit: Authors and editors, business men, educators, inventors, missionaries and explorers, philanthropists and reformers, preachers and theologians, scientists, engineers and architects, lawyers and judges, musicians, painters and sculptors, physicians and surgeons, rulers and statesmen, soldiers and sailors, distinguished men and women outside the above classes. Fifty names were to be inscribed on the tablets at the beginning, and five additional

names every fifth year thereafter, until the year 2000, when the 150 inscriptions will be completed. In case of failure to fill all the panels allotted, the vacancies are to be filled in a following year.

In February, 1904, the plan was announced of the Hall of Fame for Women, with places for 50 names, of which Hall the foundation was begun in October, 1912, and the North Colonnade completed in 1913.

The rules invite nominations from the public. Every nomination seconded by a member of the Senate will be submitted to an electorate of one hundred eminent citizens selected by the Senate. Chancellor Emeritus MacCracken presides in the Senate when the Hall of Fame is considered. Address University Heights, New York City.

In October, 1900, the University Senate received the ballots of the electors. Of the one hundred judges selected ninety-seven voted. The number of names which had been submitted to them was 252. Of these each judge returned a vote for fifty. The rule required that no candidate receiving less than fifty-one votes could be accepted. The returns showed that but twenty-nine candidates received the required number and were chosen. These were as follows: George Washington, Abraham Lincoln, Daniel Webster, Benjamin Franklin, Ulysses S. Grant, John Marshall, Thomas Jefferson, Ralph Waldo Emerson, Henry W. Longfellow, Robert Fulton, Washington Irving, Jonathan Edwards, Samuel E. B. Morse, David G. Farragut, Henry Clay, Nathaniel Hawthorne, George Peabody, Robert E. Lee, Peter Cooper, Eli Whitney, John J. Audubon, Horace Mann, Henry Ward Beecher, James Kent, Joseph Story, John Adams, William E. Channing, Gilbert Stuart, A. S. Gray.

In October, 1905, under the rules named above, the Senate received the ballots of 95 Electors out of 101 appointed, of whom only 85 undertook to consider the names of women. A majority of 51 was demanded, but in the case of the names of women, a majority of only 47. The following persons were found to be duly chosen: John Quincy Adams, 59; James Russell Lowell, 58; William Tecumseh Sherman, 58; James Madison, 56; John Greenleaf Whittier, 53; Alexander Hamilton, 58; Louis Agassiz, 83; John Paul Jones, 54; Mary Lyon, 58; Emma Willard, 50; Maria Mitchell, 48.

The Hall was dedicated May 30, 1901, when twenty-five or more national associations each unveiled one of the bronze tablets in the colonnade, and on May 30, 1907, the eleven new tablets were unveiled, orations being given by the Governors of New York and Massachusetts.

Since the Deed of Gift was amended to admit memorials to famous foreign-born Americans, the roll of electors has been amended in like manner, Mr. Andrew Carnegie, a native of Scotland, succeeding to the place of ex-President Grover Cleveland, deceased.

In October, 1910, the next ballot was taken, the number cast being 97 and the number required for a choice being 51. The following persons had the requisite number of votes: Harriet Beecher Stowe, 74; Oliver Wendell Holmes, 69; Edgar Allan Poe, 69; Roger Williams, 64; James Fenimore Cooper, 62; Phillips Brooks, 60; William Cullen Bryant, 59; Frances F. Willard, 56; Andrew Jackson, 53; George Bancroft, 53; John Lothrop Motley, 51. There were 211 nominees.

THE PALISADES INTERSTATE PARK.

THE State of New York possesses several forest reservations and also several parks. One, the Niagara Reservation, comprises the land about the great cataract, purchased at a cost of \$1,000,000. The State Forest Preserve in the Adirondack region on October 1, 1913, contained 1,495,257.29½ acres, and the Catskill Forest Preserve on the same day contained 112,750.15 acres. There are also Letchworth Park, about the falls of the Genesee River; John Boyd Thacher Park, about the Indian Ladder in Albany County; and Islands in the St. Lawrence River.

Lastly, there is the Palisades Interstate Park, partly in the State of New Jersey and partly in the State of New York, extending along the Hudson River in its Palisades region, and extending north so as to include Bear Mountain. The development of this park to its present great dimensions began in 1910 when Mary D. Harriman, widow of the late Edward H. Harriman, informed Governor Hughes of New York that, following the wishes of her husband, she was willing to convey 10,000 acres of land in the counties of Orange and Rockland to be used as a park, and also give \$1,000,000 toward the park project.

The Palisades Park Commission had the same year collected \$1,625,000 for the same purpose. Previously the commission had acquired by gift of land and of money to the amount of \$300,000, a contribution of \$400,000 from the State of New York, and \$50,000 from the State of New Jersey, the face of the Palisades from Piermont to Fort Lee. It was also proposed in 1910 that the State of New York should appropriate \$2,500,000 for a further purchase of land for the Palisades Interstate Park. Subsequently, in 1910, this proposal was ratified by the voters, and consequently the Palisades Interstate Park, which will cost nearly \$6,000,000, was authorized.

The Commissioners of the Palisades Interstate Park since 1910 have been busily engaged in developing the park. The State of New York is preparing to build the last end of Route 3, north of the New Jersey State line, so that ultimately there will be a State highway from the State boundary line of New Jersey and New York along the west shore of the Hudson River north to Newburgh. The Commissioners have also co-operated with the State of New York and Orange County, New York, in securing the construction of Route 3 of the New York State highway system along the Hudson River through the United States Reservation at West Point and around Storm King Mountain. The park roads, when built, are to connect with the main State highways of New York and New Jersey. There is a "Henry Hudson Drive" under the Palisades and a road from Bear Mountain on the Hudson River to Southfields, both of which are on park properties. The commission is advancing the Englewood approach to the Henry Hudson Drive. The drive, when completed, will be located under the Palisades in the State of New Jersey, with a number of approaches or spurs connecting the drive with the roads on top of the cliff.

A camp has been established at Blauvelt for the use of working girls, which is used by girls of all nationalities and religious denominations. A large number of people in 1914 used the portion of Palisades Park at Bear Mountain, which is located on the west shore of the Hudson River about forty-five miles from New York. This property was originally bought by the State of New York for a prison site and abandoned as such in 1910, and was then transferred to the Palisades Park Commission for park purposes. The commission arranged for a day-boat service to Bear Mountain in the Summer of 1914. A large number of excursions visited Bear Mountain and also the picnic groves under the Palisades. The camp privileges granted by the commission in 1914 proved very popular, a large number of people camping at Bear Mountain and at Car Pond in the Harriman lands. At Bear Mountain a playground has been completed, having an area of more than ten acres. There have been placed at Bear Mountain fifty picnic tables, 300 park benches, and 300 chairs. In 1913 the New York College of Forestry at Syracuse University offered to co-operate with the Palisades Interstate Park Commission in making a preliminary study and plan of management for the forest land within the park. This offer was accepted and the work has since been in progress.

By steambot from New York City, 22,596 persons visited Bear Mountain from June 19 to September 7, 1913. A camp of the Boy Scouts of America was maintained at Car Pond during 1913.

Eleven miles of the Palisades are within a few miles of the largest cities of New York and New Jersey. It is estimated that over one million people in 1913 visited this portion of the park.

Geographical Research in 1914.

BY CHARLES H. HUGHES.

IN GENERAL.

THE war in Europe between Germany and Austria on one side and Great Britain, France, Russia, and several of the Balkan States on the other seriously affected the plans of many expeditions that were contemplated being sent out to various parts of the world. Not only were expeditions cancelled, but in some instances parties in the field were summoned home to fight.

At the time this section was compiled war was still in progress, and it seems as if when peace is declared there will be changes made in the boundaries of many of the countries in Europe and also in their colonial possessions.

AFRICA.

The formal amalgamation of northern and southern Nigeria under one administration took place on January 1, Sir F. Lugard becoming the first Governor-General of the united territory.

An expedition for the exploration of the Libyan desert was sent out in charge of the German geographer, Dr. Ewald Banse. He reported having made his way to the Siwa oasis by a new route.

The results of the Nigeria-Kamerun Boundary Demarcation Commission of 1912-1913 were published in the *Geographical Journal* for June.

The Robt. Chabot expedition to Angola returned to France in March after visiting many of the least known parts of southwest Africa. The basin of the Kunene was explored and its tributary, Kakulovor, ascended.

The Government of Egypt provided the lower lying parts of the Nile Delta with improved facilities for drainage and authorized a survey of the land.

Soundings were made in Lake Tanganyika by Mr. Strappers, a Belgian explorer, establishing its maximum depth as 4,425 feet. From the soundings it appears that the lake is traversed from east to west by a ridge varying in altitude above its bed from 400 to 1,900 feet.

The Congo expedition of the American Museum of Natural History, New York, which has been carrying on active field work in Central Africa for the past four years, returned.

The Sudan Government completed the survey of a proposed railway from Suakim to Tokar, the latter being the centre of a great cotton growing district.

The hill men of Kabylia, the little-known people living in the far north of Algeria between the Djurdjura Mountains and the Mediterranean Sea, were described in the September number of *Travel*.

ASIA.

The work of exploration and survey of the northeast frontier of India was continued. A small expedition entered the country of the Akras, the most westerly of the Abor Mishmi group of tribes. The Akra country had not been visited by an English party since 1884.

A preliminary agreement was signed in Peking on January 21, between the Minister of Communications and the Banque Industrielle, providing for the extension of the French-Yunnan Railway to Chungking on the Yangtse River.

The French traveller, Dr. Legendre, started on a new expedition to the western borderlands of China.

Reports from the Thibetan conference that was held at Simla, between English, Chinese, and Thibetan envoys, state that nothing definite was accomplished toward the settlement of the boundary between China and Thibet.

A volcanic outburst of unusual violence occurred in January near the southern end of Klushu, Japan, culminating on the twelfth in a terrific eruption of the volcano Sakura Shima, on an island in the Gulf of Kagoshima, which had been dormant for 130 years.

A short account of an attempt made by Mr. F. K. Ward to penetrate southeastern Thibet from Yunnan was published. Owing to political troubles he was able to visit only a few of the little known tribes on the frontier.

Reports were received from Dr. F. de Filipp's Asiatic expedition at Leh, Ladakh, that a gravimetric station was established at Wozel Hadur, a narrow terrace on the Vale of Burgi La.

Mount Indrapura or Korinchi, a volcano 12,700 feet high, the highest summit on the Island of Sumatra, was ascended by a party con-

sisting of Mr. C. B. Kloss and Mr. H. C. Robinson, Director of Museums, Federated Malay States.

An interesting paper on the marked fall in the level of the Caspian Sea was published in the *Annales de Geographie* for March.

The main object of Sir Aurel Stein's expedition to Central Asia was the exploration of the region around Lop-nor. Many interesting antiquarian finds and physical observations were made which have thrown fresh light on the hydrography and early occupation of the Lop basin.

Captain Shakespear, a British resident at Koweit on the Persian Gulf, crossed the little known part of northern Arabia from Koweit to Suez.

The Russian Ministry of Agriculture planned to construct a new town, to be named Amu-Darjinsk, in the Hunger Steppe of Central Asia.

A physiographic study of Canberra, the new capital of Australia, was published in the April and May numbers of the *Geographical Journal*.

After an arduous journey in the dangerous country of the Abors Captains Bailey and Morshead returned to India and announced that they have conclusively proved that the Tsangpo and Brahmaputra to be one river, and that the supposed falls of the Tsangpo do not exist.

The linking up of the survey of India with the Russian triangulation in the Pamirs was accomplished after five years of work.

At the suggestion of the Royal Society, the meteorological service of India began investigations of the upper air, which are expected to extend over a period of ten years.

A new volcanic island appeared in the Bonin group three miles east by south of Iwojima Island.

Valuable information of the little known State of Bhutan, in the lower Himalaya Mountains, was given in the *Geographical Journal* for April.

AMERICA.

An expedition under the joint auspices of Yale University and the National Geographical Society left in May to make a geographical reconnaissance of a portion of southern Peru, including the Cordillera Vilcabamba and portions of the Apurimac and Urubamba watersheds.

The Department of Colonization, Mines and Fisheries of the Province of Quebec issued a well illustrated publication on the geography of the territory of New Quebec.

Particulars were received from Mr. W. S. Routledge of an examination made by him of one of the many little known channels which the land is broken by in the region of the Straits of Magellan.

A party of meteorologists left Buenos Ayres, Argentina, in January for the South Orkney Islands.

The phenomena of floating islands, both periodic and permanent, were discussed in the January number of the *Bulletin of the Geographical Society of Philadelphia*.

The American Geographical Society and the Association of American Geographers held their first joint meeting in April in New York City.

The Roosevelt expedition to the western part of Brazil discovered a new river, which has been named by the Brazilian Government Rio Theodoro in honor of Colonel Roosevelt.

A society was organized with headquarters at Knoxville, Tenn., which will be known as the Southern Geographic Society.

Some of the least known districts on the borders of Brazil and Guiana were visited by Dr. W. C. Farabee of the University Museum of Philadelphia. The districts were thinly populated, many of the tribes never having seen a white man.

A party from the Carnegie Department of Terrestrial Magnetism completed early in July a magnetic exploratory trip across Chile and Bolivia, from the Pacific coast to Corumbá, Brazil.

The Bureau of Fisheries, Washington, D. C., sent a party to the Grand Banks off the coast of Labrador to make microscopic observations of plant and animal life.

Elaborate scientific investigations in Porto Rico, to cover a period of four years, were begun by the New York Academy of Sciences. The reforestation of parts of the island is one of the practical problems to be investigated.

The Brazilian expedition of the University of Pennsylvania returned after exploring many tributaries of the Amazon River and the highlands lying on the frontier between Brazil and the Guianas.

A new peak was discovered in the northern Canadian Rockies by Miss M. L. Jobe and party of New York.

EUROPE.

By an imperial order on September 1 the name of the capital of Russia, viz., St. Petersburg, was changed to Petrograd.

At the meeting of the International Geographical Congress at Rome, Italy, a resolution was passed that all maps, whether issued separately or accompanying scientific memoirs, should be provided with a detailed statement of the scale and the system or projection adopted.

An important paper on the climate of South-east France was published by Mons. E. Bénévent of Paris.

The non-magnetic yacht *Carnegie* of the Carnegie Institute left New York in June on a magnetic surveying cruise along the coasts of Norway and Iceland.

A thorough investigation of the many small lakes strewn over the surface of the diluvial deposits of Schleswig, Germany, was made by Dr. G. Wegemann of Kiel.

An international institute for geographical exploration was established at Christiania, Norway.

The influence of the tide on the water of the Adige River was investigated in connection with the water supply system of Chioggia, Italy, by Dr. A. Manuelli.

An earthquake took place on the southeast flank of Mount Etna on May 8. The meliz-selsmal area was small, being about three square miles, but within it all villages and houses were destroyed.

Plans were made for establishing a national oceanographical institute at Edinburgh, Scotland, as a memorial to the late Sir John Murray.

An elaborate study of the growth of a maritime plant of the order Chenopodiaceae at Blakeney Point, Norfolk, England, was published in the *Journal of Ecology*. The object in view was to show the possibilities of shore protection by artificial planting.

The International Congress of Tropical Agriculture met at the Imperial Institute, London, England, in June.

A study of the coastal border of southwestern

France, from the Sevre River to Biarritz, was published in the May number of *Annales de Geographie*.

In June, Prof. H. Hansen, Director of the Marine Biological Station at Bergen, Norway, left Plymouth for a two months' cruise to study the temperatures and currents in the North Atlantic Ocean.

A new publication, *Zeitschrift für Vulkanologie*, devoted to problems pertaining to volcanoes, was started by Herr L. Friedländer of Naples, Italy.

The Carnegie Museum of Pittsburgh, Pa., issued a complete catalogue on its collection of fossil fishes from Monte Bolca, Italy; Cerin, France, and Solenhofen, Germany. The Carnegie collection is one of the largest in existence.

POLAR RESEARCH.

Dr. Mawson, with six companions, reached Port Adelaide, South Australia, late in February. His expedition to the Antarctic regions, from a scientific standpoint, was very successful. Several specimens of the rare Ross seal were secured.

It was reported that Mr. O. Olsen of Denmark offered to finance a North Pole expedition in charge of Mr. Knud Rasmussen. The expedition is expected to start in the Summer of 1915.

A monument erected to the memory of Captain Scott and his comrades who perished in the Antarctic regions in 1913 was unveiled at Lautaret in the Alps of Dauphine on February 5.

An Anglo-Swedish Antarctic expedition was organized to explore Graham Land and to continue the work of Dr. Otto Nordenskjöld. The expedition will leave in the Fall of 1915 and will remain in the field for five years.

Dr. W. S. Bruce left Edinburgh, Scotland, in July for hydrographic and geological research in Wybe Jansz Water, or Stor Flord, Spitzbergen.

Members of the Stefansson Canadian Arctic expedition completed a coast survey from the Alaskan boundary to the Mackenzie River, while others made tidal observations at Demarcation Point, Martin Point, and Humphrey Point which may throw additional light on Arctic tides.

Fossil floras of the Arctic regions indicate climatic conditions unlike the present. A complete discussion of this subject was given in a paper entitled "Jurassic Flora of Cape Lisburne," published by the United States Geological Survey.

The surviving members of the Arctic expedition headed by Lieutenant Sedoff, which left for the north in 1912, arrived at Archangel late in August, 1914.

The northern Siberian expedition, with representatives from the University Museum of Philadelphia, Oxford University, Moscow Academy, and St. Petersburg Academy, left Krasnoyarsk on the Yenisei River late in June.

Several members of the Stefansson Arctic expedition were saved from their ship *Karluk*, which was crushed by ice.

Sir Ernest Shackleton and party left London in September for the Antarctic regions. The main object of the expedition will be to cross the South Polar continent from sea to sea.

Review of Scientific Progress in 1914.

ARCHAEOLOGY.

Remarkable discoveries were made at Abydos, Egypt, by Mr. E. Naville. He found a great rectangular reservoir which is believed to belong to the period of the Temple of the Sphinx.

The remains of a prehistoric man were discovered in German East Africa by Dr. H. Reck of the Berlin University. The man discovered, it is estimated, lived 150,000 years ago.

Almost a complete skeleton of a dwarf horned dinosaur was unearthed in the State of Montana, U. S.

A new form of Pacific Ocean seript was discovered on the little Island of Oleai or Uleiai, one of the most westerly of the Caroline group, by Prof. J. M. Brown.

A burial place of the Stone Age was unearthed in the Valle Ibrata, Province of Abruzzi, Italy. The bodies were laid in small cabins, and with a

single exception rested on one side with the knees drawn up.

The site of the ancient city of Canopus, the predecessor of Alexandria on the Bay of Aboukir, Egypt, was claimed to be discovered by Daninos Pasha.

On the west side of the Butte Montmartre, Paris, workmen came across a fragment of a building dating from the Roman occupation of Gaul. The above is noteworthy, as Roman remains are rare in Paris.

A new poem by Sappho was found by members of the Egypt Exploration Society at Oxyrhynchus, Egypt.

Remarkable discoveries were made behind old wall papers in Cardinal Wolsey's lodgings at Hampton Court, England. Ornamental cornices worked by Sir C. Wren, and stone doors were uncovered.

The bones of a prehistoric lion and mammoth were found when excavating for the foundations of a new building in Fleet Street, London. From this and other discoveries it appears that what is now Fleet Street was at one time a vast swamp or forest.

Important archaeological discoveries were made in the excavations at Alise Sainte Reine, France, the ancient stronghold of the Gauls, which was defended by Vereingetorix against Cæsar.

At Leuk, Switzerland, on the main Simplon line, workmen found tombs which date back to the early part of the fourteenth century.

On the site of Antinoë in Upper Egypt there was unearthed, by a party working under the auspices of the Egypt Exploration Fund, several leaves with numerous fragments of a papyrus book once containing the Idylls of Theocritus.

After many years' work the Ohio State Archaeological and Historical Society published an "Archæological Atlas of Ohio," which is the first book of its kind published by any State.

The Department of Archaeology of Phillips Academy, Andover, Mass., sent a party to Maine for the purpose of tracing the limits of the so-called red paint culture and to map prehistoric sites.

An exhibition of particular interest to Egyptologists was held in the rooms of the Society of Antiquaries, London. Among the exhibits was a number of pages of Theocritus, which is the only example of Theocritean manuscript so far found in Egypt.

According to a translation of an inscription on a Sumerian tablet by Prof. Langdon of Jesus College, Oxford, the deluge preceded the fall of man.

ASTRONOMY.

From studying the perturbations of Neptune and Uranus, a French astronomer, Mons. H. L. Lau, believes that there is a planet beyond Neptune.

Contracts were awarded for a 72-inch reflecting telescope for use of the Dominion Astronomical Observatory, Ottawa, Canada. The telescope will be erected on Saanich Hill, near Victoria, B. C.

The most important work done at the Yerkes Observatory, Williams Bay, Wis., was the publishing of the parallaxes of a number of the brighter stars.

A partial eclipse of the moon took place March 11, and was visible all over the United States.

A new photographic chart of the moon was published by M. C. Le Mowan, a French astronomer.

The meteorological observatory at Vladivostok, Siberia, was made the centre of several observation stations in eastern Siberia, which will maintain a storm warning and general weather forecasting service.

A new solar observatory was endowed by Mr. T. Cawthorn of Nelson, New Zealand, to be erected near Nelson.

At Mount Wilson Solar Observatory, Mount Wilson, Cal., considerable attention was given to the study of the sun. The presence of a general magnetic field in the sun was confirmed, the sun being a magnet with its poles at or near the poles of rotation.

The 30-inch refracting telescope of the Allegheny Observatory was completed in August. This telescope promises to be the best in the world for certain kinds of research.

A total eclipse of the sun took place on August 21, the last previous one occurring in 1896. The phenomena was only visible along a narrow strip of about 100 miles extending from northwestern Europe to southern Asia.

A new comet (1914 a Kritzinger) was discovered by Kritzinger at Bothkamp, Germany, on March 29 in the northern part of the constellation of Scorpio. Another comet (1914 b Zlatinsky) was discovered by Zlatinsky at Milan, Italy, on May 17, and still another (1914 c Neujmin) by Neujmin at the Kiel Observatory on July 1. This latter comet was found in the constellation

of Serpens, a little south of Eta. Besides the above, other comets were reported to have been discovered by Mr. Delavan and Prof. C. T. Haggerty.

Some extraordinary high velocities in the line of sight have been observed among certain stars at Mount Wilson Solar Observatory. One star with a motion of 195 miles a second toward the earth was found.

An international determination of the difference in longitude between the United States Observatory at Washington D. C., and the Paris Observatory was made by the co-operation of American and French astronomers and navy and army officers of the respective Governments.

A paper was published on improved appliances for the measurement of the earth's magnetic elements by magnetic and electric methods by Prof. L. A. Bauer of the Carnegie Institute, Washington, D. C.

The mirror for the 100-inch reflecting telescope to be erected at the Mount Wilson Solar Observatory has been figured to a perfect sphere, and work started on its parabolization.

CHEMISTRY.

A new substance was discovered in the mountains of Namangan, Ferghana (Russian Central Asia) having properties eclipsing those of radium. The substance is an unknown metal of a dirty brown color and very heavy, and from the experiments made on it at Moscow surprising results were secured.

The annual report of the International Committee on Atomic Weights was published in the August number of the *Journal of the American Chemical Society*.

An ingenious method of analysis, for the estimating of substances susceptible of being precipitated in liquids, was brought out by Mons. M. Dienert, head of the Water Department of Paris. Briefly, he has combined the calorimetric process of Dubosq with the projection lantern.

A new process of clarifying palm saps was devised by members of the Bureau of Agriculture of the Philippine Government.

Investigations made during the past three years at the Bureau of Standards, Washington, D. C., on the subject of gas calorimetry were published in a paper entitled "Industrial Gas Calorimetry."

Osmium-platinum, a new alloy, was brought out by Mr. F. Zimmerman. The alloy is acid resisting and possesses great hardness and tensile strength.

The field of use of infusorial earth, which is extensively mined in California and Nevada, has grown. It is largely used as an abrasive in the form of polishing powders and scouring soaps and in various cements.

Two new modifications of phosphorus were found by experiments carried on at the Jefferson Physical Laboratory, Harvard University. The first is a new modification of ordinary white phosphorus, and the second is black phosphorus.

An important method for the rapid estimation of zinc in coinage bronze and similar alloys was described in a paper read before the Society of Chemical Industry (Vol. XXXIII.).

The Philippine Bureau of Science investigated a newly discovered oil-bearing seed found abundantly on the Island of Catanduanes. The oil has been tried in the manufacture of soap and proved to make a good commercial grade.

A rich deposit of phosphate was discovered in the valley of the Huasco River, about 300 miles from Valparaiso, Chile.

An improved lining for concrete tanks which are subject to the action of sulphuric acid was brought out by the Chile Exploration Company, Chuquicamata, Chile.

A new method for determining the specific heats of liquids was described in the *Chemical Trade Journal* of August 22.

The use of non-condensed sparks for metal spectra as a new method of forming flame spectra was developed by Herr A. Harnack, a German chemist.

The results of experiments on the ignition of mixtures of air and the gases or vapors of methane, ethane, propane, ethyl alcohol, and benzene by direct and alternating currents of electricity were published in the "Proceedings of the Royal Society."

A new iron-copper-nickel alloy was brought out. The alloy contained twelve parts of iron, six of copper, four of nickel, and one of aluminum by volume, had a white color that took a high polish, was soft, and resisted the action of acids to a remarkable extent considering the large amount of iron.

Experiments made by Messrs. Klein and Reinau showed that plants do not obtain a full supply of carbon dioxide from the atmosphere.

GEOLOGY.

A valuable bibliographical and critical index to Indian geological terminology was prepared by Sir T. H. Holland.

An important treatise on the geological structure and history of the Falkland Islands was published in the *Bulletin of the Geological Institute of the University of Upsala*.

For the benefit of visitors to the Panama Exposition to be held at San Francisco, the United States Geological Survey will publish a bulletin on the geology and physiographic features of a strip of land about twenty-five miles wide along the Santa Fé Railroad from Kansas City to Los Angeles.

An elaborate study of the peculiar lenticular structure known as ballstone, occurring in the Wenlock limestone of Shropshire, England, was published in Vol. 25 of the *Proceedings of the Geologists' Association*.

The Mining Bureau of the Ministry of Agriculture and Commerce of China has engaged four foreigners and two Chinese as mining advisers, with a view of developing the mineral resources of China.

The mineral character of the lands of the Colorado River and Yuma Indian Reservations were examined and classified by the United States Geological Survey.

Members from the Division of Mines of the Philippine Government spent several months in northern Luzon in collecting fossil plants and marine tertiary fossils.

Florida coral reef tracts compared with other coral reef area was discussed in Vol. 4 of the *Journal of the Washington Academy of Science*. The author believes that the final subsidence occurred after uplift following the close of the Pliocene, and notes that Pleistocene terraces rise to 600 feet in Cuba and 1,000 feet in Barbados.

A study of the vegetation which grew in South Carolina and Georgia during upper Cretaceous and Eocene times, several million years ago, was published by the United States Geological Survey.

South Georgia, a remote island in the Antarctic Ocean about 900 miles south and 80 degrees west of the Falkland Islands, was visited by representatives of C. Salveson & Co. of Leth, England. The geological features were studied, the island appearing to consist mainly of sedimentary rocks which are highly indurated, folded, and in places metamorphosed.

An occurrence of pillow lava in the Andes of Peru and Bolivia, with several unusual features, was described in the *Journal of the Geological Society* for April.

The United States Geological Survey sent a member to study and prepare a report on the eruptions of Mount Lassen, in Shasta County, Cal.

The Colorado Geological Survey had two parties in the field preparing a general topographic and geologic map of the carbonate districts in the Western part of the State.

An interesting paper on the geology of Madagascar was read before the Academy of Sciences at Paris. The author noticed sandstones and felspathic slates, 200 metres thick, with visible layers of coal in the region of Benombra.

The disputed question of the origin of the

Chiltern (England) wind gaps was discussed in the April number of the *Geological Magazine*.

A pamphlet on the geology and mineral deposits of the Tulamen district, British Columbia, was published by the Canadian Department of Mines.

A most complete classification of rocks on a genetic basis was given in Professor Grabau's book, "Principles of Stratigraphy."

ENGINEERING.

The Panama Canal was opened to vessels drawing not more than thirty feet August 15. The official opening of the canal will be in March, 1915.

The Grand Trunk-Pacific Railroad, by laying the last mile of rail at the Nechaco River crossing in British Columbia in April, became a trans-continental line.

An important irrigation scheme for Australia, utilizing the Murray River, was officially sanctioned at the annual premiers' conference held in April.

The Berlin-Stettin Canal was opened, thus connecting Berlin with a seaport on the Baltic Sea. The canal is sixty miles long, and can be used by ships of 600 tons burden.

It is expected that the erection of the centre span of the Hell Gate Bridge over Hell Gate, New York, will be completed in 1915. The span will be 1,017 feet, making it one of the longest in the world.

The Cape Cod Canal, connecting the waters of Cape Cod Bay and Buzzard's Bay, was opened July 30 to vessels not exceeding fifteen feet draught. It is contemplated that in 1915 the canal will be opened for its entire length of eight miles to a depth of twenty-five feet.

Work on the Roger Pass Tunnel of the Rocky Mountain Division of the Canadian Pacific Railroad has progressed favorably. When completed it will be five miles long, and will be the longest tunnel in America.

According to a despatch from Copenhagen, Denmark, a railroad sixty miles long will be built in Iceland. At present there is not a mile of railroad on the island.

One of the largest pumping installations in the world is being installed by the Egyptian Government to drain Lake Mareotis, near Alexandria.

A difficult piece of engineering work was accomplished by the completion of a new lighthouse on Fastnet Rock, off the coast of Ireland. The light, which is produced by incandescent burners and intensified by mirrors, can be seen on a clear night twenty miles.

A rope railway, seventy-five miles long, over the Himalaya Mountains, connecting the Vale of Kashmir with the plains of Punjab, was put in operation. It is claimed to be one of the longest railways of its kind in the world.

It was officially announced that after January 1, 1915, the maximum draught of ships using the Suez Canal, which is at present twenty-nine feet, will be increased to thirty feet.

The Snoqualmie Tunnel, about two miles long through the Cascade Mountains at the summit of Snoqualmie Pass, was completed. This tunnel greatly reduces the grade on the Chicago, Milwaukee and St. Paul Railroad between Rockdale and Keechelus, sixty miles east of Seattle, Wash.

The building of the Barge Canal, New York, has progressed favorably. Of the 346 miles of canal between Albany and Buffalo, about 70 per cent of the work has been completed. Contracts for many of the terminals have been awarded.

New York Subways, see Index. New York Water Supply, see Index.

The new viaduct for the Lackawanna Railroad over the Tunkhannock Creek, about twenty-two miles northwest of Scranton, Pa., will on completion be one of the largest concrete structures in the world. The viaduct will eliminate many curves and grades, and will shorten the running time between New York and Buffalo.

Work was started early in 1914 on an extensive harbor development at Toronto, Canada. The development includes new piers, the creation of a new industrial district, and of a large park.

The returns of the Grand Lodges of the United States and British America for 1913 were as follows: Whole number of members, 1,567,799. Gain in membership over preceding year, 103,628. These Grand Lodges are in full affiliation with the English Grand Lodge, of which the Duke of Connaught is Grand Master, and the Grand Lodges of Ireland, Scotland, Cuba, Peru, South Australia, Mexico, the Netherlands, Belgium, Sweden, Norway, Denmark, New South Wales, Victoria, and also with the Masons of Germany and Austria. They are not in affiliation and do not correspond with the Masons under the jurisdiction of the Grand Orient of France; they, however, affiliate with and recognize Masons under the jurisdiction of the Supreme Council. Freemasonry is under the ban of the Church in Spain and other Catholic countries and the membership is small and scattered.

ANCIENT ACCEPTED SCOTTISH RITE MASONS.

SUPREME COUNCIL OF SOVEREIGN GRAND INSPECTORS-GENERAL OF THE THIRTY-THIRD AND LAST DEGREE.

The officers of the Northern Jurisdiction are: *M. P. Sovereign Grand Commander*, Barton Smith, Toledo, Ohio. *P. G. Lieutenant-Commander*, Leon M. Abbott, Massachusetts. *Grand Minister of State*, Amos Pettibone, Ill. *Grand Treasurer-General*, Leroy A. Goddard. *Grand Secretary-General*, James H. Coddling; office, 299 Broadway, New York City.

The officers of the Southern Jurisdiction are: *Sovereign Grand Commander*, George F. Moore. *Secretary-General*, J. H. Cowles, 433 Third Street N. W., Washington, D. C. These grand bodies are in relations of amity with the Supreme Councils for France, England, Scotland, Ireland, Belgium, Brazil, Argentina, Uruguay, Paraguay, Peru, Portugal, Italy, Mexico, Colombia, Chile, Central America, Greece, Canada, Cuba, Switzerland, Egypt, Turkey, Spain, Serbia, Equador and The Netherlands.

SUPREME COUNCIL OF SOVEREIGN GRAND INSPECTORS-GENERAL OF THE THIRTY-THIRD AND LAST DEGREE OF THE ANCIENT AND ACCEPTED SCOTTISH RITE, AS ORGANIZED BY JOSEPH CERNEAU, THIRTY-THIRD DEGREE, IN THE YEAR 1807.

M. P. Sovereign Grand Commander, Andrew J. Provost, N. Y. *Grand Secretary-General*, Alfred C. Dupont, M. D., N. Y. The Sovereign Grand Consistory has had a continuous existence of one hundred and seven years, with its Grand Orient at New York, where, under the ægis of the Grand Orient of France, it was organized by M. J. Joseph Cerneau, thirty-third degree. The Supreme Council has fraternal relations with the Supreme Councils of Great Britain and Ireland, Canada, Italy, Egypt, Cuba, Argentina, Australia, New Zealand, Mexico, Belgium, Germany, Switzerland, Greece, Austria-Hungary, and other Grand Orientals. It has jurisdiction over seventy-three subordinate Consistories of Sublime Princes of the Royal Secret, which are subdivided into Lodges of Perfection, Councils of Princes of Jerusalem, Chapters of Rose Croix, and Consistories, with a membership of many thousands. The two Consistories in Manhattan are Cerneau, No. 1, with over a thousand Sublime Princes, and Giordano Bruno, No. 66, working in the Italian language. Official address, No. 320 Temple Court, Beekman Street, New York City.

The International Order of Good Templars is a world-wide brotherhood of over 600,000 total abstainers, banded together for mutual protection and co-operation in temperance work.

The Order of Good Templars first sprang into existence in 1851 in Ouelda County, N. Y. State. One of its most radical features was the recognition of women's rights.

The last report of the International Secretary returned the number of grand lodges as seventy and the membership in both adult and juvenile branches, 620,000. Grand lodges exist in nearly all States of the Union, in England, Ireland, Scotland, Wales, Denmark, Germany, Sweden, Norway, Switzerland, Hungary, Holland, the various provinces of Canada, the West Indies, East, West, and South Africa, Australia, New Zealand, British India, Iceland, and other countries.

ORDER OF THE SONS OF TEMPERANCE.

NATIONAL DIVISION OF NORTH AMERICA.

M. W. Patriarch—Rev. R. Hensley Stavert, Harcourt, New Brunswick, Can.; *M. W. Associate*—Horatio B. Wood, Newport, R. I.; *M. W. Scribe*—Hoss Slack, 4539 N. 20th Street, Philadelphia, Pa.; *M. W. Treasurer*—M. M. Eavenson, Camden, N. J.

The Order of the Sons of Temperance was organized in the city of New York September 29, 1842. It is composed of subordinate, grand, and national divisions. It has five national divisions—one for North America, one for Great Britain and Ireland, two for Australia, and one for New Zealand. It has been introduced in India and South Africa. In the course of its existence it has had nearly four million members on its rolls. Its present membership in North America is 25,000, of whom 12,200 are in the United States. Its fundamental principle is total abstinence from all intoxicating liquors.

The 71st annual session of the National Division of North America will be held at Charlottetown, P. E. I., July 21, 1915.

* The totals are given to the nearest hundred thousand, and include Christians not separately specified. For countries outside Europe, Roman Catholics are not separately specified, but are included under the heading "Others." It is estimated that there are about 89 million Roman Catholics outside Europe, thus making a total in the world of about 268 millions, as against 177 million Protestants. Greek Catholics numbered 119,300,000. Buddhists and Brahminists about 550 millions. † Including Greek Catholics. ‡ Readjustment of boundaries owing to the European war has doubtless affected the figures given in table.

(b) The London *Jewish Year Book* for 1910 estimated the number of Jews in the United States at 1,903,926; Russia, 5,082,243, and in the world, 11,625,656. (c) Including countries not enumerated.

The aggregate of 38,058,428 represents actual church membership, and includes all Catholics (communicants, but not unconfessed minors). It does not give all persons affiliated by family ties to Protestant bodies. The larger of the Protestant bodies may claim twice the number of their communicants as nominal adherents.—EDITOR OF THE ALMANAC.

SEATING CAPACITY OF CHURCHES.

The total seating capacity of church edifices reported in 1906, according to the Census Bulletin of August 20, 1909, was 58,536,830, an increase over 1890 of 14,976,767, or 34.4 per cent. The seating capacity reported for the Protestant bodies was 53,282,445; for the Roman Catholic Church, 4,494,377; and for the remaining bodies, 760,008. The rate of increase was practically the same for both the Protestants and the Roman Catholics, being 33.6 per cent. for the former, and 33.3 per cent. for the latter. The increase in the seating capacity of churches has kept pace with the increase in population, the seating capacity being 69.2 per cent. of the population in 1890, compared with 69.5 per cent. in 1906.

The average seating capacity per organization for the Protestant bodies taken together was 317, and for the Roman Catholic Church, 436. With the single exception of the Roman Catholic Church, all the denominations showed an average seating capacity considerably in excess of the average membership. For the Protestant bodies the average seating capacity was three times the average membership per organization, while for the Roman Catholic Church the average membership was almost two and one-fourth times the average seating capacity.

SEVENTH-DAY ADVENTISTS.

The following statement has been prepared by H. E. Rogers, Statistical Secretary of the General Conference:

The doctrine of the second coming of Christ was preached extensively in the United States and Europe during 1840-1844, and found adherents in many denominations. The circulation of books and journals on this question deepened the interest, and this study and agitation brought about the formation of a movement which assumed definite form in 1846 in the New England States and was later organized as the Seventh-Day Adventist denomination. The chief tenets of this body are a belief in the literal, personal second appearance of Christ, yet without ever setting a time for that event, and the observance of the seventh day of the week as the Sabbath. They believe that the dead sleep until Christ's second coming; that the righteous dead are then raised to life, and that the living righteous are made immortal. Their total communicants throughout the world is 122,386. They have 126 organized conferences, 101 mission fields, 3,589 churches, 70 advanced educational institutions, 510 primary schools; total enrolment, 17,769.

Beginning in 1894, active work was begun in non-Christian lands, and has been continued until the present, so that a segregation of the work conducted in non-Christian and non-Protestant lands, from the foregoing figures, indicates the following: Mission work is carried forward in 67 countries, with a total force of 1,606. There are 696 churches, 20,355 adherents, 9,610 pupils in 206 schools taught by 362 foreign and native teachers.

The headquarters is in Washington, D. C.

THE LATTER DAY SAINTS.

The Mormons is a term applied to the members of the Church of Jesus Christ of Latter Day Saints. This church was organized April 6, 1830, with six members, by Joseph Smith, at Fayette, Seneca County, N. Y. After being driven by mobs from various places in Missouri, Ohio, and Illinois, they settled at Great Salt Lake, Utah, under the leadership of Brigham Young, in 1847. The total church membership is about 450,000, and the number of missionaries, about 2,000.

LATTER DAY SAINTS' REORGANIZED CHURCH.

The Reorganized Church of Jesus Christ of Latter Day Saints is a separate body, having its headquarters at Lamoni, Iowa. Its membership now numbers 71,702. It has about 1,000 active ministers in the field, 33,062 Sunday-school members and 637 Sunday-schools. It claims to be the church in succession to the one founded by Joseph Smith in 1830. It was reorganized in 1860, and is presided over by Joseph Smith, of Independence, Mo., son of the Prophet. *Presiding Bishop*—Edmund L. Kelley, Independence, Mo. *General Church Secretary*—Richard S. Salyards, Lamoni, Iowa. The only church of this denomination in New York City is at Park Place and Schenectady Avenue, Brooklyn, N. Y. *Pastor*—E. B. Hull, 1339 Prospect Place, Brooklyn, N. Y.

MISSIONARY EDUCATION MOVEMENT.

Chairman—Fred P. Haggard. *Vice-Chairman*—Samuel Thorne, Jr. *Recording Secretary*—F. C. Stephenson. *General Secretary*—Harry W. Hicks. *Treasurer*—James S. Cushman. Headquarters, 156 Fifth Avenue, New York City.

YOUNG PEOPLE'S SOCIETY OF CHRISTIAN ENDEAVOR.

President—Rev. Francis E. Clark, D. D. *General Secretary*—William Shaw, L. L. D. Each society is in some local church, and in no sense outside. It exists simply to make the young people loyal and efficient members of the Church of Christ. It is the church training the young. Its motto is, "For Christ and the Church." In July, 1914, there were more than 75,000 societies, with a membership of about 4,000,000, chiefly in the United States and Canada, and in Australia, Great Britain, China, India, Japan, and in all missionary lands. It is found in about the same proportions in all the great evangelical denominations and in all their sub-divisions. Headquarters, Christian Endeavor House, 31 Mount Vernon Street, Boston, Mass.

AMERICAN SUNDAY-SCHOOL UNION.

The First Day Society, founded in Philadelphia in 1791, still active, led to the formation of the Philadelphia Sunday and Adult School Union in 1817. With other similar societies it was changed to the American Sunday-school Union in 1824. Its object is twofold: To establish and maintain Sunday-schools; to publish and circulate moral and religious publications. It is a voluntary union of Christians of different denominations to teach the truths of our common Christianity as they are taught in the Bible.

Its great field is the rural districts. The Philadelphia Union began with one juvenile book in 1817, and one missionary in 1821. The American Sunday-School Union now issues a thousand works and nine periodicals. In ninety years it has circulated \$12,000,000 to \$15,000,000 worth of Bibles, testaments and religious works. In ten years it founded 24,614 Sunday-schools, with 943,930 members; resulting in 97,076 hopeful conversions and 914 churches. In ninety years the Union has founded 127,720 Sunday-schools, with 5,677,970 members. It employs Sunday-school missionaries, who have organized an average of four new Sunday-schools for each day of the last ninety years. Its benevolent work costs \$225,000 yearly. Officers: *President*, Martin L. Finckel; *Vice-Presidents*, Richard Ashhurst, Clarkson Clothier, James F. Stone, M. D.; *Recording Secretary*, William H. Hirst; *Treasurer*, John E. Stevenson. Headquarters, 1816 Chestnut Street, Philadelphia Pa.

NATIONAL WOMAN'S CHRISTIAN TEMPERANCE UNION.

The National W. C. T. U. was organized in Cleveland, Ohio, in 1874, and is the sober second thought of the great woman's crusade. It is now regularly organized in every State of the Union.

There are about 12,000 local unions, with a membership and following, including the children's societies, of about half a million. The W. C. T. U. has forty distinct departments of work, presided over by as many women experts, in the national and in nearly every State organization. All the States have laws requiring the study of scientific temperance in the public schools, and all these laws were secured by the W. C. T. U.; also the laws forbidding the sale of tobacco to minors. The first police matrons and most industrial homes for girls were secured through the efforts of this society, as were the refuges for erring women.

The World's W. C. T. U. was founded by Frances E. Willard in 1883, and has auxiliaries in more than fifty countries and provinces. The white ribbon is the badge of all the W. C. T. U. members, and is now a familiar emblem in every civilized country.

The headquarters of the National organization is The Willards Rest Cottage, Evanston, Ill. The following are the officers: *President*, Miss Anna A. Gordon, Evanston, Ill.; *Corresponding Secretary*, Mrs. Frances P. Parks, Evanston, Ill.; *Treasurer*, Mrs. Elizabeth P. Hutchinson, Evanston, Ill.

THE VEDANTA SOCIETY.

The Vedanta Society of New York was established in 1894 by Swami Vivekananda of India and was regularly incorporated in 1898 by Swami Abhedananda. The object of the society is to explain through logic and reason the spiritual laws that govern our lives; to show that the True Religion of the Soul is not antagonistic to, but in harmony with, philosophy and science; to establish that Universal Religion which underlies all the various sects and creeds of special religions; to propagate the principles taught by great seers of Truth and religious leaders of different countries; and to help mankind in the practical application of those principles in their spiritual, moral, intellectual and physical needs.

The present headquarters of the society with its Circulating Library, Reading Room and Meditation Room is at 135 West Eightieth Street, New York City.

The officers of the society are: *President*—W. N. Goodyear. *Vice-President*—R. D. Davidson. *Secretary*—Wm. T. Williams.

The society has a large publishing department and issues a catalogue containing nearly forty titles of works on the Philosophy and Religion of Vedanta. Within the last five years it has sent out from its headquarters 39,876 books and pamphlets written by Swamis of India. There are also centres in Pittsburgh, San Francisco, Los Angeles and Washington, D. C., besides a Peace Retreat in the mountains of Santa Clara County, Cal. These organizations in America are affiliated with hundreds of Vedanta Societies throughout India and Ceylon.

THE DAUGHTERS OF THE KING.

The Order of the Daughters of the King was organized on Easter evening, 1885. It is desired by its promoters that a careful distinction shall be made between the Daughters of the King and the King's Daughters. This is the older organization, and differs from the King's Daughters in many important particulars. In the first place, it is an order, and is distinctively Episcopal. Its work is definite, and is "for the spread of Christ's kingdom among women," and the "active support of the rector's plans in the parish in which the particular chapter may be located." Its emblem is a cross of silver, a Greek cross fleury, and its motto is "Magnanimiter Crucem Sustine" and its watchword "For His Sake." Its colors are white and blue—white, the old royal color of Israel, and blue, the color of the Virgin Mary, the "blessed daughter of Israel's King, the Mother of the King of Kings." Its Constitution is framed, as far as is possible, in the terms of that of the Brotherhood of St. Andrew, the work of the two organizations being similar. The officers of the Council are: *President*—Mrs. A. Adam Denmead, Baltimore, Md. *General Secretary*—Emma E. Behlendorf. Office of the Council, Church Missions House, 281 Fourth Avenue, New York.

UNITED BRETHREN CHRISTIAN ENDEAVOR UNION.

The union was organized June 5, 1890. It is a union of all forms of young people's societies within the Church of the United Brethren in Christ. There are now 2,147 societies, with 86,051 members. Each conference is called a Branch and holds its annual conventions, when a review of the year's work is made and new plans formed. The *Watchword* is the organ of the union. Dr. H. F. Shupe, D. D., Dayton, Ohio, is editor. The *General Secretary*—Rev. O. T. Deever, Dayton, Ohio, is elected by the General Conference to serve for Quadrennium. The work is under the supervision of a Board of Control. Rev. J. G. Huber of Dayton, Ohio, is Chairman of the Board and also Chairman of the Executive Committee of the Board, having direct supervision of the Christian Endeavor work.

CHRISTIAN SCIENCE.

The Christian Science Committee on Publication contributes the following statement: Christian Science is a religion based on the Bible, which was founded by Mary Baker Eddy in 1866. Her interpretation of the Scriptures, which she named Christian Science, is set forth in a book entitled "Science and Health, with Key to the Scriptures," first published in 1875. Since then it has been often reprinted, with occasional revisions of its wording, before her decease. Other works by the same author are "People's Idea of God" (1856), "Christian Healing" (1856), "Unity of God" (1857), "Retrospection and Introspection" (1891), "Rudimental Divine Science" (1891), "No and Yes" (1891), "Church Manual" (1895), "Miscellaneous Writings" (1896), "Christ and Christmas" (1897), "Christian Science Versus Pantheism" (1898), "Pulpit and Press" (1898), "Messages to the Mother Church" (1900, 1901, 1902), "The First Church of Christ, Scientist, and Miscellany" (1913).

The First Church of Christ, Scientist, in Boston, Mass., founded in 1879 and known as "The Mother Church" is the parent organization of the Christian Science denomination. Local churches, known as branches of "The Mother Church," are situated in towns and cities throughout the world, but mainly in countries where the English language is spoken. "The Mother Church" is governed by a board of five directors, while the branch churches are self-governed, subject only to a limited supervision by "The Mother Church" as defined in the Church Manual. At present the number of local organizations is 1,471, a considerable number of which have beautiful and costly church edifices.

In the Church of Christ, Scientist, the place of preaching is taken by the reading of a "lesson-sermon" composed of selections from the Bible and from "Science and Health, with Key to the Scriptures" by Mrs. Eddy. The remainder of the Sunday service consists of hymns, a solo, silent prayer, the Lord's Prayer, and a responsive reading from the Bible.

The Wednesday night meeting includes a shorter "lesson-sermon," hymns, silent prayer, the Lord's Prayer, and testimonies of Christian Science healing from voluntary speakers. Formerly the congregations were largely made up of women, but at present this church claims to be attended by a greater percentage of men than is apt to be the case in other churches.

The Christian Science Publishing Society, under the auspices of "The Mother Church," issues a quarterly periodical named "The Christian Science Quarterly Bible Lessons;" a monthly periodical, "The Christian Science Journal;" a monthly, "Der Herald der Christian Science;" a weekly, "The Christian Science Sentinel," and a daily, "The Christian Science Monitor," the latter being a daily newspaper of general circulation devoted to clean journalism, but including in each issue an essay or article on Christian Science.

Christian Scientists are unique among religionists by reason of the extent to which they rely on the practice of their religion for the prevention and cure of disease. For this they assign several reasons. They have found Christian Science most effective and reliable for this purpose; they believe it to be the same method of healing that was used and taught by Christ Jesus; they expect that this method of dealing with evil, as it becomes better known and more generally practised, will abate and ultimately abolish sin and mortality.

In this way the Church of Christ, Scientist, is regarded as a necessary agency in the restoration of original Christianity and the realization of the highest ideal in religious hope and faith.

THE THEOSOPHICAL SOCIETY.

The Theosophical Society was founded in New York City on November 17, 1875, by Mme. H. P. Blavatsky and Col. Henry S. Olcott, but its headquarters was removed in 1879 to Adyar, Madras, India, where the President, Mrs. Annie Besant, resides. Its objects are three: (a) To form a nucleus of the universal brotherhood of humanity, without distinction of race, creed, sex, caste, or color; (b) to encourage the study of comparative religion, philosophy and science; (c) to investigate unexplained laws of nature and the powers latent in man. It has now twenty-three territorial sections, each presided over by a General Secretary, three by Presidential Agents: America, England, Wales, India, Scandinavia, Holland, Hungary, France, Italy, Germany, Australia, Cuba, Finland, Russia, Bohemia, South Africa, Scotland, Switzerland, Belgium, Dutch East Indies, Netherlands, Finland, Burma, Austria, Norway, and New Zealand. Three non-sectionalized countries with Presidential Agents: South America, Spain and Ireland. During the 39 years of its existence it has admitted 30,000 members and chartered over 1,405 branches. The membership at present of the American section is about 4,665; there are 153 branches. Although there is but one dogma in the society, namely, the belief in the Universal Brotherhood of Man, yet Reincarnation and Karma are among some of the basic stones of the Theosophical system. *General Secretary*—A. P. Warrington, Krotova, Hollywood, Los Angeles, Cal., contributes the above statement.

THE NATIONAL SPIRITUALISTS' ASSOCIATION.

Organized September 28, 1893; incorporated November 1, 1893, at Washington, D. C. The object of said association shall be the organization of the various Spiritualist societies of the United States into one general association for the purpose of mutual aid and co-operation in benevolent, charitable, educational, literary, musical, scientific, religious, and missionary purposes and enterprises germane to the phenomena, science, philosophy, and religion of spiritualism.

Active working local societies, 1,000; State associations, 24; other local societies meeting at irregular intervals, 400; public meetings not organized as societies, 500; camp meeting associations, 32; academy for liberal education, 1; churches and temples, 200; membership of avowed Spiritualists, 600,000; unidentified with organized societies, but believers in the philosophy and phenomena and frequent attendants upon public services, 1,500,000 to 2,000,000; number of public mediums, 1,500; private mediums, many thousands; ordained ministers, 500; total valuation of church, temple and camp meeting property, \$6,000,000.

President—Dr. George B. Warne, 749 Oakwood Boulevard, Chicago; *Secretary*—George W. Kates, 600 Pennsylvania Avenue S. E., Washington, D. C.; *Treasurer*—Cassius L. Stevens, Pittsburgh, Pa. Headquarters, 600 Pennsylvania Avenue, Washington, D. C. The next annual convention will be held in Rochester, N. Y., October, 1915.

THE UNIVERSAL BROTHERHOOD AND THEOSOPHICAL SOCIETY.

The Universal Brotherhood and Theosophical Society, founded by Mme. H. P. Blavatsky in New York, 1875, continued after her death under the leadership of the co-founder, William Q. Judge, and now, under the leadership of their successor, Katherine Tingley, has its international headquarters at the world's Theosophical centre, Point Loma, Cal.

This organization declares that brotherhood is a fact in nature. The principal purpose of the organization is to teach brotherhood, demonstrate that it is a fact in nature, and make it a living power in the life of humanity, establishing Raja Yoga schools throughout the world, and creating a new literature. Its subsidiary purpose is to study ancient and modern religion, science, philosophy, and art, to investigate the laws of nature and the latent divine powers in man. It declares in its Constitution that every member has a right to believe or disbelieve in any religious system or philosophy, each being required to show that tolerance for the opinions of others which he expects for his own.

The official publication of the organization is *The Theosophical Path*.

Secretary—Mr. J. H. Fussell, Point Loma, Cal.

THE BROTHERHOOD OF ANDREW AND PHILIP.

This organization, founded by Rev. Rufus W. Miller in Reading, Pa., in 1888, held its first federal convention in the city of New York in 1893. It is composed of members of twenty-six evangelical denominations, among them the Reformed Church in America, the Reformed Church in the United States, the Congregational, Presbyterian (North, South, Canadian, and United), Methodist Episcopal, Methodist Protestant, Baptist, United Brethren, Lutheran, Reformed Episcopal, Church of Christ, Progressive Brethren, Friends, United Evangelical, Free Baptist, Federal, African Methodist Episcopal, and Evangelical Association. It has chapters in Australia and Japan, China and England. Its objects are embodied in the statement that "any man can belong to the brotherhood who will promise to pray daily for the spread of the kingdom of Christ among men, and to make an earnest effort each week to bring at least one man within the hearing of the Gospel." The number of chapters of the brotherhood in the United States is 1,000, and the membership 30,000; 102 boys' chapters enrolling 1,972 members. The office of Rev. R. Howard Taylor, General Secretary, is at 1328 Chestnut Street, Philadelphia, Pa.

THE BROTHERHOOD OF ST. ANDREW.

"The Brotherhood of St. Andrew is an organization of men in the Protestant Episcopal Church. Its sole object is the spread of Christ's kingdom among men. It works under two rules, known as (1) The Rule of Prayer: To pray daily for the spread of Christ's kingdom among men, especially young men, and for God's blessing upon the labors of the brotherhood, and (2) The Rule of Service: To make at least one earnest effort each week to lead some man nearer to Christ through His church." There are now 1,500 active chapters with a membership of about 15,000 men.

The Brotherhood of St. Andrew in the Church of England in the Dominion of Canada has been formed, with 500 chapters and 4,500 men. A similar organization has been formed in the Scottish Episcopal Church. In the West Indies there is a membership of 1,000 men, and there is also a national organization in Japan. June 12, 1896, the Brotherhood of St. Andrew, in the Church of England was formed, and now has a membership of 1,200. It is also well organized in New Zealand.

The brotherhood in the United States includes a Junior Department. It has 500 chapters in the United States, with about 6,000 members.

The officers are: *President*—Edward H. Bonsall. *Editor of St. Andrew's Cross and General Secretary*—Hubert Carleton, Broad Exchange Building, Boston, Mass.

THE NATIONAL COUNCIL OF CONGREGATIONAL CHURCHES

The Epworth League was organized at Cleveland, Ohio, May, 1889, by the union of five societies then existing in the Methodist Episcopal Church. These several societies held under their jurisdiction 1,500 local societies, with a membership of about 800,000. Its official organ, the *Epworth Herald*, has a circulation of over 100,000.

Officers of the Epworth League of the Methodist Episcopal Church South: *President*—Bishop J. H. McCoy, D. D. *General Secretary*—Rev. Fitzgerald S. Parker, D. D. *Junior League Secretary*—Ada Trawick. The general organ of the league is the *Epworth Era*, published monthly by the publishing agents of the Methodist Episcopal Church South, Nashville, Tenn., Dallas, Tex., and Richmond, Va. The league in the Methodist Episcopal Church South was provided for by the General Conference of 1890, and in December of the same year its organization was effected. It came under the supervision of the Sunday-School Board. The General Conference of 1894 created it a separate connectional board and elected a General Secretary. The Epworth League includes an organization for adolescent boys called the Knights of Ezeloh, and a parallel organization for girls called the Girls of Epworth. It has now 3,838 chapters, with a total membership of 133,108.

CATHOLIC EDUCATIONAL ASSOCIATION.

The Catholic Educational Association was organized at St. Louis in 1904. It consists of three general departments, the Seminary, College, and School and embraces in its membership representatives from all the Catholic Educational Establishments in the United States. It issues in November a report of the year's work and of the annual convention held each year in the last week of June. The Eleventh Annual Convention was held in Atlantic City, N. J., June 29 to July 2, 1914. An enormous spread of sectarian education was indicated in the reports submitted to the Board of Trustees, showing that 1,700,000 children were being instructed in the parochial schools at an annual cost of from \$12 to \$17 a child, as compared to a public school average ranging from \$34 to \$35. The disparity was attributed to the fact that nuns who act as teachers received from \$10 to \$25 a month, practically giving their services free. *Honorary President*—James Cardinal Gibbons. *President-General*—Rt. Rev. Thomas J. Shahan, D. D., Rector of the Catholic University at Washington. *Secretary-General*—Rev. Francis W. Howard, LL. D., 1651 East Main Street, Columbus, Ohio. Office of the association is at Columbus, Ohio.

The objects of this society are to develop the missionary spirit in the clergy and people of the Catholic Church in the United States. To assist in the erection of parish buildings for poor and needy places. To support priests for neglected and poverty-stricken districts. To send the comfort of religion to pioneer localities. In a word, to preserve the faith of Jesus Christ to thousands of scattered Catholics in every portion of our own land, especially in the country districts and among immigrants.

 SOCIETY OF ST. VINCENT DE PAUL.

This great Roman Catholic organization, founded in Paris, France, in which its head office is located, has branches in every part of the civilized world. Its principal mission is the care of the poor in their homes to the end that the unity of the family may be preserved, but it conducts many other works of charity, such as free employment bureaus, Summer homes, boys' clubs, hospital and prison visitation committees, etc.

The local or parish branches of the society are known as conferences; these conferences are grouped in sections under the jurisdiction of Particular and Central Councils, and the latter, in the United States, are under the jurisdiction of four Superior Councils. The office of the Superior Council of New York is located at No. 375 Lafayette Street, New York City. New Orleans, La., St. Louis, Mo., Chicago, Ill., Philadelphia, Pa., and Boston, Mass., also have Superior Councils.

The officers of the Superior Council are as follows: *Spiritual Director*—The Rt. Rev. Denis J. McMahon, D. D. *President*—Thomas M. Muiry. *Secretary*—Edmond J. Butler. *Treasurer*—Michael J. Scanlan.

The Catholic Missionary Union was incorporated under the laws of the State of New York, November, 1896. Its object is to arouse the Catholic people and clergy of the United States to greater missionary activity; to train priests to be Home Missionsaries; to establish bands of Diocesan Missionaries in the United States, and to present the truths of the Catholic Church to all the people in a purely expository manner, without any controversy or religious rancor. Its home and training college is the Apostolic Mission House on the grounds of the Catholic University, at Brookland Station, Washington, D. C.

THE CATHOLIC FOREIGN MISSION SOCIETY OF AMERICA.

The Catholic Foreign Mission Society of America is incorporated under the laws of New York State to train missionaries for heathen lands.

In connection with its work it publishes books, pamphlets and other reading matter, including a monthly periodical, *The Field Afar*.

Its incorporators include His Eminence John Cardinal Farley, Very Rev. James A. Walsh, Superior of the society; Rev. Thomas F. Price, Vice-President; Rt. Rev. Patrick J. Hayes, D. D.; Very Rev. John J. Dunn; the Hon. Victor J. Dowling, Major John F. O'Rourke and Michael Maginnis.

Although having its centre in New York the work is a national one, being organized under the protection of the entire American hierarchy.

Its offices and seminary are located on a large tract of land, "Maryknoll," reached from the Ossining railroad station, and situated part in Ossining and part in New Castle, N. Y.

THE GUILD OF THE LOVE OF GOD.

Object: To unite all faithful Catholics by prayer and service, and to promote mutual recognition and friendship by the adoption of a distinctive badge.

The guild admits to membership only those who go to confession. Members are pledged to help other members anywhere, at any time, and therefore isolated and lonely Catholics are especially invited to join this guild.

Sub-Warden—Rev. C. T. Pfeffer, Laurel, Del. *Secretary-General*—Rev. F. S. Devona, St. Clair, Mich. A quarterly magazine entitled *Caritas* is published by the society.

LAKE MOHONK CONFERENCE.

Secretary—H. C. Phillips, Mohonk Lake, N. Y.

LAKE MOHONK CONFERENCE ON THE INDIAN AND OTHER DEPENDENT PEOPLES.

The First Annual Conference was held in 1883, when Mr. Albert K. Smiley, who was a member of the Board of Indian Commissioners, invited a number of those interested in Indian affairs to a meeting at Mohonk Lake to confer regarding measures affecting the interests of the Indians. On Mr. Smiley's death his brother, Daniel Smiley, succeeded him as host of the conferences.

In 1904 the scope of the conference was enlarged to include the peoples of the Philippines, Porto Rico and other dependencies of the United States.

The conference seeks to clarify public opinion on these great questions through free discussion by those having first-hand knowledge of existing conditions.

LAKE MOHONK CONFERENCE ON INTERNATIONAL ARBITRATION.

The first of these annual conferences was held in 1895. The purpose is specifically to create and direct public sentiment in favor of international arbitration and an international court, and generally to encourage the substitution of pacific methods for war in settling disputes between nations. The conference maintains a permanent office.

THE FEDERAL COUNCIL OF THE CHURCHES OF CHRIST IN AMERICA.

The Federal Council was organized as the chief consummation of the National Federation of Churches at its first meeting, held in Philadelphia, December 2-8, 1908. It is the delegated congress of thirty leading Christian bodies which are constitutionally federated for the purpose of providing this congress, through which to realize their fellowship and united action. The Federal Council, through its Commissions and Secretaries, seeks to organize efficient State and local federations, to secure co-operation in home missionary work, and to promote moral reform and social service by the churches throughout the United States.

The following churches are represented in this Federal Council: Baptist (North), Free Baptist, Christian, Congregational, Disciples of Christ, Evangelical Association, Evangelical Synod, Friends, Lutheran General Synod, Methodist Episcopal, Methodist Episcopal (South), German Evangelical Synod, Colored Methodist Episcopal, Methodist Protestant, African Methodist Episcopal, African Methodist Episcopal Zion, Mennonite, Moravian, Presbyterian, Presbyterian (South), Welsh Presbyterian, Reformed Presbyterian, United Presbyterian, Protestant Episcopal, Commissions on Christian Unity and Social Service, Reformed Church in America, Reformed Church in the U. S. A., Reformed Episcopal, Seventh-Day Baptist, United Brethren in Christ, United Evangelical, National Baptist Convention.

RELIGIOUS EDUCATION ASSOCIATION.

The Religious Education Association was organized on February 12, 1903, at the close of a three days' convention held in Chicago, called to consider the improvement of moral and religious education. Its object is the promotion of moral and religious training in existing educational agencies, in homes and through the press. It has no theological platform. It now enrolls over 3,000 members, including laymen, college Presidents and professors, pastors, teachers and parents interested in the problem of reverent, scientific, effective character training.

The officers are: *President*, Bishop Charles D. Williams, Detroit, Mich. *Secretary*, Henry Frederick Cope, D. D., 332 S. Michigan Avenue, Chicago, Ill.

LUTHER LEAGUE OF AMERICA.

President—Wm. C. Stoever, Philadelphia, Pa. *Secretary*—Luther M. Kuhns, Omaha, Neb.

The first National Convention of the Luther League of America was held at Pittsburgh, Pa., October 30 and 31, 1895. The League is a Lutheran organization, linking together the Lutheran young people who are laboring for the good of the church by means of many individual societies of various names and styles of organization, each within its own immediate church. The Constitution declares that its objects shall be "to encourage the formation of the young people's societies in all Lutheran congregations in America, to urge their affiliation with their respective State or Territorial leagues, and with this league to stimulate the various young people's societies to greater Christian activity and to foster the spirit of loyalty to the church." The fundamental principles are federation and co-operation, and it is non-synodical in character. The membership of the various organizations is over 100,000. These are comprised in twenty-five States, fourteen of which already have permanent State organizations, and four foreign countries. The first local organization adopting the title of "The Luther League" was organized by delegates of six Lutheran Church societies in the city of New York, April 19, 1888, also in Canada, Porto Rico, Japan, China and India.

WORLD'S PURITY FEDERATION.

This federation and the committee out of which it grew have been at work since November, 1900, and represents the largest and first real organized movement in North America, in a national and international sense, for the eradication of the traffic in women (white slave traffic); for the annihilation of public vice; for a higher and single standard of morals, and for the safe and sane instruction of the young in sex hygiene. Departments of work are maintained covering every phase of social purity work. An International Purity Congress is held every two years. This congress meets July 18-24, 1915, at San Francisco in connection with the Panama-Pacific Exposition.

The International headquarters is at La Crosse, Wis. The officers are: *President*, B. S. Steadwell, La Crosse, Wis.; *First Vice-President*, Rev. T. Albert Moore, Toronto, Canada; *Second Vice-President*, Dr. Emma F. A. Drake, Colorado; *Secretary*, Herbert E. Gernert, Brooklyn, N. Y.; *Treasurer*, Dr. W. D. Lawrence, Minneapolis, Minn.

AMERICAN UNITARIAN ASSOCIATION.

This Association was organized in Boston, Mass., May 25, 1825, and incorporated in 1847. Its objects, as defined in the report of the Committee on Organization, are as follows:

1. To collect and diffuse information respecting the state of Unitarian Christianity in our country.
2. To produce union, sympathy, and co-operation among liberal Christians.
3. To publish and distribute books and tracts, inculcating correct views of religion, in such form and at such price as shall afford all an opportunity of being acquainted with Christian truth.
4. To supply missionaries, especially in such parts of our country as are destitute of a stated ministry.
5. To adopt whatever other measures may hereafter seem expedient—such as contributions in behalf of clergymen with insufficient salaries, or in aid of building churches.

President—Rev. Sumner A. Eliot, D.D., Boston, Mass. *Secretary*—Rev. Lewis G. Wilson, Boston, Mass. *Treasurer*—Henry M. Williams, Boston, Mass.

CHRISTIAN AND MISSIONARY ALLIANCE.

THE VOLUNTEERS OF AMERICA.

The Volunteers of America is a philanthropic, social and Christian movement. It was inaugurated in March, 1896, in response to a number of requests on the part of American citizens. It was subsequently incorporated on November 6, 1896, under the Membership act of the State of New York. It is organized in military style, having as its model the United States Army, but in conjunction with military discipline and methods of work it possesses a thoroughly democratic form of government. Its constitution and by-laws are framed by a Grand Field Council, which represents the minor councils of officers throughout the country annually. Though only eighteen years old, the Volunteers have representatives and branches of their benevolent cause in almost all the principal centres of the United States.

The Volunteers have some 43 principal homes and institutions of benevolence, many of which are Volunteer property, and are open for poor and deserving people in different sections of the country. During the past year the commissioned workers in their vocation called upon and aided, in one form or another, no less than 26,957 families. This was primarily in the poorer sections of the large cities. In the different permanent philanthropic homes and institutions no less than 240,046 free lodgings have been given, and 299,891 have been paid for by work and other means, while 628,775 free meals were given, and 411,381 meals were distributed to persons who paid for them, many doing so by work.

In their latest undertaking, which has proved a large responsibility, that is, the Volunteer Hospital work, which hospital is located at Beekman and Water Streets, New York City, in the shadow of the Brooklyn Bridge, there have been 1,184 ambulance calls, 362 major operations, 5,529 days' treatment given to patients in the surgical and medical wards, 11,230 new cases treated, 17,855 old cases treated, and a total during the year of not less than 34,644 cases of all kinds surgically and medically treated in the institution. In addition, physicians connected with the hospital made visits to 102 homes.

The Volunteer Prisoners' League has embraced upward of some 81,000 members since its inauguration. It has leagues in nearly 30 State prisons, and over seventy per cent. of those having left the prisons are, through their Hope Halls, living reformed and honest lives. Through the Fresh Air branch of the work many thousands of mothers and children have been taken from crowded cities for a change in the open air amid hills and lakes, rivers and dales. From the regimental reports of Volunteer centres, it is carefully calculated that 831,815 persons were gathered to their indoor services, while 1,892,555 persons were listeners in God's natural cathedral, their open-air stands. By these services 5,253 were led to promise that they would lead a new life.

In addition to the Volunteer reading rooms, thousands of copies of Christian literature are circulated in the State prisons, jails, hospitals, soldiers' homes, and children's homes. In connection with the Volunteers there are also sewing classes, hospital nursing, temporary financial relief departments, fresh air camps, Thanksgiving and Christmas dinners, and many other worthy undertakings. The headquarters of The Volunteers of America is at 34 West Twenty-eighth Street, New York City. The principal officers are General and Mrs. Ballington Booth, Presidents; General Edward Fielding, Vice-President; Colonel Walter J. Crafts, Treasurer, and Colonel James W. Merrill, National Secretary. (The above statement was prepared by General Ballington Booth).

UNITED CHRISTIAN CONFERENCE OF THE DISCIPLES OF CHRIST.

This is a new department of the denomination commonly known as the Christian Church, or Disciples of Christ, otherwise called "Campbellites." This "Church of Christ" is, in the United States, divided into about three parties: the "Antis," or Reactionary party, about 150,000 in numerical strength; the "Conservatives," or Conventional sort, 800,000 strong, and the "Progressives," or Conference kind. The latter, about 50,000 in numbers, having organized a national office at Portland, Ore., when, in 1911, the American Convention met at that place in national convention and a bishop was elected with headquarters in Portland, Ore. Soon after this the new department was incorporated in the name of the "United Christian Conference of the Disciples of Christ," and the Rt. Rev. St. D. Martin was selected as their bishop. The *Christian Century*, a weekly organ published at Chicago, is recognized as their journalistic leader. They also have Eastern headquarters at Newark, N. J., and a bishop at that point who supervises the affairs of the Eastern States, the Rt. Rev. J. D. Meade.

THE AMERICAN CROSS OF HONOR.

President—Thomas H. Herndon, 2904 Thirteenth Street N. W., Washington, D. C. *Vice-President*—
Secretary—Harry A. George *Treasurer*—Richard Stockton. Headquarters, Washington, D. C.

This order was organized in 1898 and incorporated by act of Congress in 1906. The regular membership is composed of persons upon whom the United States Government has conferred the life-saving medal of honor, and its object is to encourage and promote the saving of life throughout the world, both through individual effort and by advocating the principles of universal peace.

Bronze crosses of honor are conferred in certain cases where great heroism is shown in saving human life. A gold cross of honor is awarded in exceptional cases to persons who by great daring have greatly distinguished themselves in saving life, and this cross is conferred biennially upon some person nominated by the Royal National Life-Boat Institution of Great Britain, for the most heroic service in saving life.

The President of the United States is Honorary President of the order. M. Armand Fallières, ex-President of France, the German Emperor, the King of Great Britain, the King of Italy, ex-Presidents Roosevelt and Taft, and Andrew Carnegie are honorary members.

SOCIETY OF COLONIAL WARS.

Governor-General—Howland Pell, New York. *Secretary-General*—Clarence Storm, Room 1306, 43 Cedar Street, N. Y. *Treasurer-General*—Wm. Macpherson Hornor, Philadelphia, Pa.

The Society of Colonial Wars was instituted in 1892 to "perpetuate the memory of these events and of the men who, in military, naval, and civil positions of high trust and responsibility, by their acts or counsel assisted in the establishment, defence, and preservation of the American Colonies, and were in truth the founders of this Nation. With this end in view it seeks to collect and preserve manuscripts, rolls, and records; to provide suitable commemorations or memorials relating to the American Colonial period." Eligibility is confined to an adult male descendant of an ancestor who fought in battle under Colonial or British authority, from the settlement of Jamestown, Va., in 1607, to the battle of Lexington, in 1775, or who served as Governor, Deputy-Governor, Lieutenant-Governor, Member of the Council, or other high civil officer in the service of the Colonies, or under the banner of Great Britain.

THE ORDER OF THE POUNDERS AND PATRIOTS OF AMERICA.

Governor-General—William Cary Sanger, Sangerfield, N. Y. *Secretary-General*—Henry S. Kissam, New York Society, 25 Madison Avenue, New York City. *Treasurer-General*—George E. Scranton.

The order was founded in 1896, its object being "to bring together and associate congenial men whose ancestors struggled together for life and liberty, home and happiness, in the land when it was a new and unknown country, and whose line of descent from them comes through patriots who sustained the Colonies in the struggle for independence in the Revolutionary war; to teach reverent regard for the names and history, character and perseverance, deeds and heroism of the founders of this country and their patriot descendants; to discover, collect, and preserve records, documents, manuscripts, monuments, and history relating to the first colonists and their ancestors and their descendants, and to commemorate and celebrate events in the history of the Colonies and the Republic." Eligibility—Any man above the age of twenty-one years, of good moral character and reputation, and a citizen of the United States, who is lineally descended, in the male line of either parent, from an ancestor who settled in any of the Colonies now included in the United States of America prior to May 13, 1657, and whose intermediate ancestors in the same line during the Revolutionary period adhered as patriots to the cause of the Colonies. There are State societies in New York, Connecticut, New Jersey and Pennsylvania. The Governor of the New York Society is Geo. C. Batcheller, 130 Fifth Avenue, New York City. *Secretary*, Eugene J. Grant, 189 Montague Street, Brooklyn, N. Y.

SOCIETY OF TAMMANY, OR COLUMBIAN ORDER.

Grand Sachem—John R. Voorhis, *Sachems*—Louis F. Haffen, George W. Loft, Thomas F. McAvoxy, Edward C. Sheehy, John J. Scannell, Charles F. Murphy, Julius Harburger, John F. Ahearn, Asa Bird Gardiner, George W. Plunkitt, Wanhope Lynn, William Dalton, Thomas Darlington. *Secretary*—Thomas F. Smith. *Treasurer*—William Sohmer. *Sagamore*—Bryan P. Henry. *Wiskinkie*—John A. Boyle.

This organization was formed in 1789, being the effect of a popular movement in New York having primarily in view a counterweight to the so-called "aristocratic" Society of the Cincinnati. It was essentially anti-Federalist or democratic in its character, and its chief founder was William Mooney, an upholsterer and a native-born American of Irish extraction. It took its first title from a noted ancient, wise and friendly chief of the Delaware tribe of Indians, named Tammany, who had, for the want of a better subject, been canonized by the soldiers of the Revolution as the American patron saint. The first meeting was held May 12, 1789. The act of incorporation was passed in 1805. The Grand Sachem and thirteen Sachems were designed to typify the President and the Governors of the thirteen original States. William Mooney was the first Grand Sachem. The society is nominally a charitable and social organization, and is distinct from the General Committee of the Tammany Democracy, which is a political organization, and cannot use Tammany Hall without the consent of the society.

Society of the Cincinnati.

GENERAL OFFICERS.

President-General.....	Hon. Winslow Warren, Mass.
Vice-President-General.....	Hon. James Simons, LL.D., S. C.
Secretary-General.....	Hon. Asa Bird Gardiner, LL.D., L. H. D., R. I.
Assistant Secretary-General.....	Mr. John Collins Daves, N. C.
Treasurer-General.....	Mr. Charles Isham, Ct.
Assistant Treasurer-General.....	Mr. Henry Randall Webb, Md.

The historic and patriotic Order of the Cincinnati was founded by the American and French officers at the cantonments of the Continental army on the Hudson at the close of hostilities in the War of the Revolution for American Independence, May 10, 1783.

In forming the society it was declared that, "To perpetuate, therefore, as well the remembrance of this vast event as the mutual friendships which have been formed under the pressure of common danger, and, in many instances, cemented by the blood of the parties, the officers of the American army do hereby, in the most solemn manner, associate, constitute, and combine themselves into one Society of Friends, to endure as long as they shall endure, or any of their eldest male posterity, and in failure thereof the collateral branches who may be judged worthy of becoming its supporters and members."

For convenience, thirteen State societies were formed, and one in France, under the direct patronage of Louis XVI., which was dispersed at the Reign of Terror in 1793. Upon the roll of original members appeared the names of all the great historic military and naval characters of the Revolution, and upon the roll of honorary members, elected for their own lives only, appeared many of the signers of the Declaration of Independence.

THE RIGHT TO MEMBERSHIP.

All Continental officers who had served with honor and resigned after three years' service as officers, or who had been rendered supernumerary and honorably discharged, in one of the several reductions of the American army, or who had continued to the end of the war, and all French officers who had served in the co-operating army under Count d'Estaing, or auxiliary army under Count de Rochambeau, and held or attained the rank of colonel for such services, or who had commanded a French fleet or ship of war on the American coast, were entitled to become original members, and upon doing so were required to contribute a month's pay.

STATE SOCIETIES.

The Cincinnati is organically *one* society in membership, but for convenience in admission of members and in its charitable and patriotic objects is subdivided into State societies there being thirteen. Four dormant societies were restored to membership at the triennial meeting of 1902.

Membership descends to the eldest lineal male descendant, if judged worthy, and, in failure of direct male descent, to male descendants through intervening female descendants.

The general society when legislating for the good of the Order is composed of the general officers and five delegates from each State society, and meets triennially. In 1854 it ruled that proper descendants of Revolutionary officers who were entitled to original membership, but who never could avail themselves of it, are qualified for hereditary membership, if found worthy, on due application.

MILITARY ORDER OF FOREIGN WARS.

The Military Order of Foreign Wars of the United States was instituted in the city of New York December 27, 1894, by veterans and descendants of veterans of one or more of the four foreign wars which the United States had been engaged in, to wit: The war of the Revolution, the war with Tripoli, the war of 1812, the Mexican war, "to perpetuate the names and memory of brave and loyal men who took part in establishing and maintaining the principles of the Government" in said wars, and "to preserve records and documents relating to said wars, and to celebrate the anniversaries of historic events connected therewith." Since the institution of the order the United States has fought two foreign wars (war with Spain and China campaign). By an amendment to the Constitution all American officers who participated in the war with Spain, or any future foreign campaign recognized by the United States Government as "war," are rendered eligible to membership as veteran companions.

State commanderies now exist in New York, Pennsylvania, Connecticut, Illinois, California, Massachusetts, Maryland, Ohio, Missouri, Vermont, Virginia, Rhode Island, Louisiana, Indiana, Wisconsin, Michigan, Texas, Colorado, New Jersey and the District of Columbia.

The *Confederate Veteran*, Nashville, Tenn., established by S. A. Cunningham, is the official organ. This association was organized at New Orleans, June 10, 1889. Its avowed purpose is strictly social, literary, historical, and benevolent. Its Constitution says that it "will endeavor to unite in a general federation all associations of Confederate veterans, soldiers, and sailors now in existence or hereafter to be formed; to gather authentic data for an impartial history of the war between the States; to preserve relics or mementoes of the same; to cherish the ties of friendship that should exist among men who have shared common dangers, common sufferings, and privations; to care for the disabled and extend a helping hand to the needy; to protect the widows and the orphans, and to make and preserve a record of the services of every member, and, as far as possible, of those of our comrades who have preceded us in eternity." State organizations are authorized, and are called Divisions. The permanent headquarters of the association is at New Orleans, La. Number of Camps, 1,796. Number of members, according to last report, estimated about 40,000 to 50,000. The last reunion of the veterans was at Jacksonville, Fla., in 1914, and the next will be held at Richmond, Va.

ARLINGTON CONFEDERATE MONUMENT ASSOCIATION.

During the administration of President McKinley the Confederate dead buried in the city of Washington, D. C., and vicinity were removed to the National Cemetery at Arlington, Va., the old home of Robert E. Lee, where they were reinterred in a plot of ground set apart by the President for that purpose, and designated "The Confederate Section."

The Arlington Confederate Monument Association was formed for the purpose of erecting in this section a suitable monument to the dead there buried, and to stand, in a larger sense, as a memorial to all those who lost their lives in defence of the Confederacy, as well as to the cause they represented. It is formed as a committee of the United Daughters of the Confederacy, the President-General of which is the President of the association.

SOCIETIES OF THE WAR OF 1812.

THE VETERAN CORPS OF ARTILLERY OF THE STATE OF NEW YORK.

The Veteran Corps of Artillery of the State of New York was instituted in New York City, November 25, 1790, exclusively by officers and soldiers of the war of the Revolution, and was duly confirmed as a separate corps in the organized militia of the State by Governor George Clinton, March 3, 1791. Congress, in its militia laws of 1792, 1874, 1903 and May 27, 1905, enacted that it should retain "accustomed privileges" as a component part of the organized militia, supplemental to the National Guard and the status of the corps, as part of the active militia, has also been embodied in several State statutes.

When composed wholly of Revolutionary veterans, it was in the military service of the United States, June 25 to July 2, 1812, and September 2, 1814, to March 2, 1815, and afterward recruited exclusively from veterans war of 1812, until 1890, when the surviving veteran original members amended their regulations to admit male descendants of original members or male descendants of those who served honorably in the war of 1812 and the war of the Revolution, which limitation was fixed by law March 9, 1895.

On January 8, 1826, the Military Society of the War of 1812 was formed at New York City exclusively by officers of the regular army, navy and volunteer services of that war, and consolidated January 8, 1848, with the Veteran Corps of Artillery, and was constituted by law the Civic Associ-

ation of the Corps for 'patriotic and other laudable purposes'. Its last Revolutionary member, Daniel Spencer, died March 4, 1854, aged 95; its last war of 1812 member, Hiram Cronk, died May 13, 1905, aged 105.

The officers are: *Colonel-Commandant*—Asa Bird Gardiner. *Vice-Commandant*—John Hone. *Brig.-Major*—Charles Eliot Warren, 60 East 42d Street, New York City. *Quartermaster*—Walter Lispenard Suydam. *Paymaster*—James Mortimer Montgomery. *Chaplain*—F. Landon Humphreys.

The officers are commissioned, and the Corps, with the National Guard, form a part of the active militia of the State.

THE GENERAL SOCIETY OF THE WAR OF 1812.

Composed of federated State societies in Pennsylvania, Maryland, Massachusetts, Connecticut, Illinois, District of Columbia, New York and New Jersey, the members of each of which State societies are borne upon the membership roll of the general society. Any male person above the age of twenty-one years who participated in, or who is a lineal descendant of one who served during the war of 1812-14 in the army, navy, revenue marine, or privateer service of the United States, offering satisfactory proof to the State society to which he makes application, and is of good moral character and reputation, may become a member. In case of failure of lineal descendants of an actual participant in said war, one collateral representative who is deemed worthy may be admitted to membership. *President-General*—John Cadwalader, Pennsylvania. *Secretary-General*—Herbert M. Leland, 10 Post-Office Square, Boston, Mass. *Registrar-General*—Henry Harmon Noble, Essex, N. Y. *Treasurer-General*—George H. Richards, M. D., Orange, N. The Sixty-second Congress of the United States, Second Session, enacted the following law incorporating the Naval History Society:

Sec. 2. That the object of such corporation shall be to discover and procure data, manuscripts, writings, and whatever may relate to naval history, science, and art, and the surroundings and experiences of seamen in general and of American seamen in particular, and to preserve same by publication or otherwise.

Sec. 4. That said corporation shall have the right to hold meetings at any place in the United States, but annual meetings for the election of officers shall be held in the city of Washington, where the principal office of said corporation shall be.

Sec. 5. That the said corporation shall have the power to take and hold, by gift, grant, purchase, or devise, real and personal property not exceeding in value five hundred thousand dollars, which shall not be divided among the members of the corporation, but shall be used and administered as a trust for the purposes of the corporation, and so far as unexpended transmitted to their successors for the further promotion of such purposes.

Sec. 6. That the government of such corporation shall be vested in a board of eleven managers, to be elected by the members of such corporation, and the corporation shall have such officers as its Constitution and by-laws may prescribe.

NAVAL ORDER OF THE UNITED STATES.

The Naval Order of the United States is composed of a General Commandery and Commanderies in the States of Massachusetts, Pennsylvania, New York, California and Illinois. The General Commandery meets triennially on October 5, and the State Commanderies meet annually in the month of November. The Massachusetts Commandery is the parent Commandery, and was organized at Boston on July 4, 1890. The General Commandery was established three years later, on June 19, 1893. The Companions of the Order are officers and the descendants of officers who served in the navy and marine corps in any war or in any battle in which the said naval forces of the United States have participated.

THE CARNEGIE INSTITUTION OF WASHINGTON.

The Carnegie Institution of Washington was founded by Mr. Andrew Carnegie, January 28, 1902, when he gave to a board of trustees \$10,000,000, in registered bonds, yielding 5 per cent. annual interest. In general terms, he stated that his purpose was to "found in the city of Washington an institution which, with the co-operation of institutions now or hereafter established, there or elsewhere, shall in the broadest and most liberal manner encourage investigation, research and discovery, show the application of knowledge to the improvement of mankind, and provide such buildings, laboratories, books, and apparatus as may be needed." Mr. Carnegie added \$2,000,000 to his gift in 1907, and \$10,000,000 in 1911, making a total endowment of \$22,000,000.

By an act of Congress, approved April 28, 1904, the institution was placed under the control of a board of twenty-four trustees, all of whom had been members of the original board referred to above. The trustees meet annually, and during the intervals between such meetings the affairs of the institution are conducted by an executive committee, chosen by and from the board of trustees, acting through the President of the institution as chief executive officer.

The Administration Building is situated on the S. E. corner of 16th and P Streets N. W., Washington, D. C.

Trustees of the Institution—*Chairman*, Elihu Root; *Vice-Chairman*, Charles D. Walcott; *Secretary*, Cleveland H. Dodge; Robert S. Brookings, Simon Flexner, William N. Frew, Henry L. Higginson, Charles L. Hutchinson, Seth Low, Andrew J. Montague, William W. Morrow, Wm. Barclay Parsons, Henry S. Pritchett, Martin A. Ryerson, William H. Taft, Henry P. Walcott, William H. Welch, Andrew D. White, Henry White, George W. Wickersham, Robert S. Woodward.

President of the Institution—Robert S. Woodward.

THE CARNEGIE CORPORATION OF NEW YORK.

The Carnegie Corporation of New York, incorporated by an act passed by the New York Legislature June 9, 1911, was organized November 10, 1911.

The purposes of the corporation, as stated in the charter, are as follows:

"Section 1. Andrew Carnegie, Elihu Root, Henry S. Pritchett, S. H. Church, Robert S. Woodward, Charles L. Taylor, Robert A. Franks, James Bertram, and their successors are hereby constituted a body corporate by the name of Carnegie Corporation of New York, for the purpose of receiving and maintaining a fund or funds and applying the income thereof to promote the advancement and diffusion of knowledge and understanding among the people of the United States, by aiding technical schools, institutions of higher learning, libraries, scientific research, hero funds, useful publications, and by such other agencies and means as shall from time to time be found appropriate therefor."

The incorporators met at Mr. Carnegie's house, Friday afternoon, November 10, 1911, accepted the charter, adopted the Constitution and By-Laws, and elected the following officers:

President—Andrew Carnegie. *Vice-President*—Elihu Root. *Treasurer*—Robert A. Franks. *Secretary*—James Bertram, 576 Fifth Avenue, New York City.

Mr. Carnegie transferred to the corporation, for its corporate purposes, \$125,000,000 par value first mortgage gold bonds of the United States Steel Corporation.

The business of founding and aiding libraries and educational institutions, which has been carried on by Mr. Carnegie as an individual for many years, has been turned over to the corporation.

THE CARNEGIE HERO FUND.

In April, 1904, Andrew Carnegie created a fund of \$5,000,000 for the benefit of the dependents of those losing their lives in heroic effort to save their fellow men, or for the heroes themselves if injured only. Provision was also made for medals to be given in commemoration of heroic acts.

The endowment known as "The Hero Fund" was placed in the hands of a commission composed of twenty-one persons, residents of Pittsburgh, Pa., of which Charles L. Taylor is President, and F. M. Wilmot, Secretary and Manager of the fund.

In his letter to the Hero Fund Commission Mr. Carnegie outlined the general scheme of the fund thus: "To place those following peaceful vocations who have been injured in heroic effort to save human life, in somewhat better positions pecuniarily than before, until able to work again. In case of death, the widow and children or other dependents are to be provided for until she remarries, and the children until they reach a self-supporting age. For exceptional children, exceptional grants may be made for exceptional education. Grants of sums of money may also be made to heroes or heroines as the commission thinks advisable—each case to be judged on its merits."

The fund applies only to acts performed within the United States of America, the Dominion of Canada, the Colony of Newfoundland, and the waters thereof, and such acts must have been performed on or after April 15, 1904, and brought to the attention of the commission within three years of the date of the act.

Applications should be made by letter addressed to the manager, Oliver Building, Pittsburgh, Pa. The commission has awarded 972 medals—602 bronze, 354 silver and 16 gold. In addition to the medals, \$1,061,387 has been awarded for disablement benefits, and for educational and other special purposes, and for the dependents of heroes who lost their lives, including payments made to December 31, 1914, on monthly allowances. Pensions in force as of this date amount to \$72,720 annually. The commission has also awarded \$169,462 for relief of sufferers from disasters—at Brockton, Mass., \$10,000; from the California earthquake, \$54,462; at Monongah Mines, Monongah, W. Va., \$35,000; at Darr Mine, Jacobs Creek, Pa., \$25,000; at Lick Branch Mine, Switchback, W. Va., \$10,000; at McMurtain Mine, McMurtain, Okla., \$15,000; at Jed Mine, Jed, W. Va., \$10,000, and for relief of Ohio and Indiana flood sufferers, \$10,000.

CARNEGIE ENDOWMENT FOR INTERNATIONAL PEACE.

ON December 14, 1910, Andrew Carnegie of New York transferred to a Board of Trustees \$10,000,000 in 5 per cent. first mortgage bonds, the income of which is to be devoted to "hastening the abolition of international war." The methods by which the annual income can best be expended for this purpose were left to be determined by the Trustees. The Board of Trustees consists of the following members:

Ellhu Root.
Robert S. Brookings.
Thomas Burke.
Nicholas Murray Butler.
*John L. Cadwalader.
Joseph H. Choate.
Cleveland H. Dodge.
Charles W. Elliot.
R. A. Franks.
* Deceased.

Arthur William Foster.
John W. Foster.
Austen G. Fox.
William M. Howard.
Samuel Mather.
Andrew J. Montague.
Henry S. Pritchett.
George W. Perkins.
J. G. Schmidlapp.
James Brown Scott.

James L. Slayden.
*Albert Keith Smiley.
Oscar S. Straus.
Charles L. Taylor.
Charlemagne Tower.
Andrew D. White.
John Sharp Williams.
Robert S. Woodward.
Luke E. Wright.

The vacancy caused by the death of Mr. Smiley has been filled by the election of Hon. Robert Bacon.

The officers of the endowment are Senator Ellhu Root, President; Hon. Joseph H. Choate, Vice-President; Dr. James Brown Scott, Secretary, and Hon. Charlemagne Tower, Treasurer. These officers have been annually re-elected. The Executive Committee consists of the President, the Secretary, the Treasurer, and Messrs. Butler, Fox, Montague, and Pritchett. The headquarters of the Endowment are at Nos. 2 and 4 Jackson Place, Washington, D. C., which property has recently been purchased. The trustees operate under a series of by-laws.

They have divided the work of the endowment into three divisions, viz.: Division of Inter-course and Education, President Nicholas Murray Butler of Columbia University, Acting Director; Division of Economics and History, Prof. John Bates Clark of Columbia University, Director; and Division of International Law, of which Dr. Scott, the Secretary, is the Director.

The first division has established a European Bureau at 24 Rue Pierre Curie, Paris, of which M. Jules-Jean Prudhommeaux is Secretary-General. A European Advisory Council has also been established, of which Baron d'Estarkles de Constant is the President.

This division has conducted its work of propaganda by co-operation with other existing peace organizations in this country and in other countries; by a series of international visits of representative men to and from this country; and by a series of publications for gratuitous distribution, the most important of which thus far are "Some Roads Toward Peace," by Dr. Charles W. Elliot, containing observations and impressions in China and Japan in 1912; and the report of an international commission appointed to conduct an inquiry into the "causes and conduct of the two Balkan wars."

The second division, the purposes of which are "to promote a thorough and scientific investigation and study of the causes of war, and of practical methods to prevent and avoid it," works in co-operation with a Committee of Research, consisting of nineteen of the leading economists of Europe, Japan, and the United States who have blocked out an elaborate schedule of researches, to be carried forward by well known students and professors. More than a hundred studies of this character have been arranged for, and several of these are about to be published, including a large volume on "Armaments and Armament Industries of the Leading Nations."

The Division of International Law has for its purpose "to aid in the development of international law and a general agreement on the rules thereof, and the acceptance of the same among nations to establish a better understanding of international rights and duties and a more perfect sense of international justice among the inhabitants of civilized countries; to promote a general acceptance of peaceable methods in the settlement of international disputes." This division is now engaged in the preparation of a collection of all known international arbitrations and a companion work consisting of all known arbitration treaties. It has published a treatise on the neutrality laws of the United States, and has other similar studies in preparation. The Institute of International Law has accepted its invitation to act as the advisor of the division regarding the conduct and development of its work. The trustees have approved a plan for the maintenance of a Summer or vacation school of international law at The Hague, of which teachers and students of the subject from all countries may take advantage.

The main activities of the endowment are thus arranged on scientific lines, the results of the activities and researches of the latter two divisions to be utilized and popularized as a part of the propaganda of the first division. The plans of the trustees contemplate a world-wide international co-operation in each branch of the endowment's work. While these plans have been seriously interrupted, and may be somewhat modified by the European war, the outbreak of that war enormously emphasizes and illustrates the importance and the necessity of its work.

The annual meeting of the trustees is held at Washington on the second Friday of April, and a special meeting of the board occurs on the second Friday of November in each year.

The offices of the first two divisions are at 407 West One Hundred and Seventeenth Street, New York City. The Division of International Law occupies the headquarters building of the endowment in Washington.

CARNEGIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING.

An institution founded by Andrew Carnegie in 1905, and incorporated by the Congress of the United States in 1906. The institution is endowed with \$15,000,000, to provide retiring allowances for teachers and officers of colleges, universities, and technical schools in the United States, Canada, and Newfoundland, and with \$1,250,000 to provide for educational inquiry and publication. By the eighth annual meeting of the trustees in 1913, 315 allowances were being paid to teachers, and 83 pensions to widows of teachers, at an annual cost of \$616,470. The amount of the average retiring allowance is \$1,703.51, the average age of retirement being about seventy years.

In the administration of its endowment, the foundation has restricted its allowances to professors and officers in a list of seventy-three institutions selected for their educational standing, and has published a series of widely influential reports and bulletins concerning educational conditions. The President of the foundation is Dr. Henry S. Pritchett; Secretary, Clyde Furst; address, 576 Fifth Avenue, New York City.

THE UNION SOCIETY OF THE CIVIL WAR.

The society was founded in 1909 "To perpetuate the memory of those loyal officials who, outside the military and naval service of the United States, rendered invaluable aid and assistance to the National Government and Union cause during the civil war." *Eligibility*—Any loyal Union man who between April 12, 1861, and April 9, 1865, served as President, Vice-President, Justice of Supreme Court, Cabinet Officer, Minister Plenipotentiary abroad, Senator, Member of House of Representatives, Special Commissioner or Executive Secretary of the United States, citizens who received by name the thanks of Congress for valuable services rendered to the Government during the civil war, Loyal Governor of Loyal State, Lieut-Governor, Secretary of State, State Attorney-General, State Treasurer, Commissioned Officer, Governor's Military Staff, President of State Senate, Speaker of House of Representatives, Executive Secretary, State Executive, Counsellor, Office of State Provost Marshal's Department on recruiting duty for United States Military or Provisional Governor of secession State. Any other loyal Union man may be elected to membership who outside the military or naval service of the United States between the aforesaid dates, rendered services to the National Government and Union cause, which may be considered by the General Board of Managers to have been of sufficient value to warrant his election to membership in the society. Any man twenty-one years of age is eligible to membership who is descended from any of the foregoing classes provided he may be found worthy.

GEORGE WASHINGTON MEMORIAL ASSOCIATION.

President—Mrs. Henry F. Dimock, New York. *Treasurer*—Mrs. Frank Northrop, New York. *General Secretary*—George Milbank Hersey, 701 Publicity Building, Boston, Mass.

To furnish our National Capital with a building which will provide facilities for the holding of congresses and conventions—both national and international. The building will also provide office accommodations for the many societies of National scope devoted to the advancement of mankind which require National headquarters, such as the patriotic, scientific, educational, art, literary, sociological and civic virtue organizations. It will also set apart a room for each State (which appropriates its quota of the total amount to be raised) so that a permanent exhibit of the State's resources may be accessible to the vast number of people visiting the National Capital. It is to cost \$2,000,000 and will have an endowment fund of \$500,000 for maintenance. The building may also be used for inaugural receptions and special public meetings authorized by Congress. The structure which is to embody this idea is to be known as the George Washington Memorial. In a broader sense it will fulfil Washington's wish expressed in his Farewell Address, to "promote as an object of primary importance institutions for the general diffusion of knowledge." President Taft signed the bill on March 4, 1913, giving the association permission to erect this building in the north end of the reservation known as Armory Square, bounded by Sixth and Seventh Streets West, and B Street South, Washington, D. C. The Governors of forty States have accepted the Honorary Chairmanship of Advisory Councils being organized or appointed in their respective Commonwealths.

THE UNITED STATES HAY FEVER ASSOCIATION.

President—Rev. Guy Roberts, Bethlehem, N. H. *Vice-President*—William M. Patterson, New York. *Secretary-Treasurer*—Percy F. Jerome, 125 East Twenty-seventh Street, New York City.

Forty-one years ago the United States Hay Fever Association came into existence as a joke. But very soon it was discovered that real service might be rendered hay fever sufferers through organization. The "joke" became a "practical" one and has so remained to date. The forty-first annual convention of the association was held at Bethlehem, N. H., on September 2, 1914. The object of the association is the seeking for information which will serve to relieve sufferers with hay fever and their mutual benefit and comfort. Not only hay-feverites, but the townspeople and proprietors of hotels of places exempt from hay fever, the manufacturers of remedies for hay fever, and especially physicians who have made a study of this disease are invited to become members of the association, that all may work together for the best results.

Col. M. Richard Muckle of Philadelphia, who was for seven years President of the association and who is ninety years of age, claims to be the oldest hay fever sufferer. He has had the disease seventy-six years.

NEGRO RURAL SCHOOL FUND, JEANES FOUNDATION.

The Negro Rural School Fund, amounting to \$1,000,000, was established in 1907 by Miss Anna T. Jeanes, a resident of Philadelphia. NATIONAL ASSOCIATION FOR THE STUDY AND EDUCATION OF EXCEPTIONAL CHILDREN.

"This association, which was founded by Dr. Maximilian P. E. Groszmann, has approached the problem of exceptional development from the point of view of the normal, or potentially normal, child as representing an actual, positive asset in human society. In doing this, this association has endeavored to elaborate a suitable and scientifically tenable classification and terminology which would enable students of this problem to understand the different types of exceptional development in their true perspective. It is the purpose of this association to evolve methods by which this human waste can be avoided, just as modern processes of manufacture and industry have led to saving what was formerly waste material and what is now often turned into products more valuable than the original object of production." Organized in New Jersey in 1905.

President—Dr. Ira S. Wile, New York City. *Vice-President*—A. A. D'Ancona, San Francisco, Cal. *Secretary and Treasurer*—Waldemar H. Groszmann, Plainfield, N. J. *Educational Director*—Dr. Maximilian P. E. Groszmann, Plainfield, N. J.

THE AMERICAN-SCANDINAVIAN FOUNDATION

Consists of a self-perpetuating board of trustees, incorporated in 1911, to hold in trust and administer an endowment of more than \$500,000, given by the late Niels Poulsen, and other funds which may be entrusted to their care in order to cultivate closer intellectual relations between residents of the United States and the Scandinavian countries. The foundation carries out this end by granting stipends to students, and aids to educational undertakings by publishing the Scandinavian classics, Scandinavian monographs, and the American-Scandinavian Review, and by maintaining a bureau in New York. In the Scandinavian countries it is represented by Advisory Committees appointed by the Kings of Denmark, Norway and Sweden. Headquarters, 25 West 45th Street. *Secretary*, Henry Goddard Leach.

AMERICAN CIVIC ALLIANCE.

The specific objects of the American Civic Alliance are to encourage the co-operation of all civic and non-partisan interests, in every part of the nation, in improving the standards of American citizenship, in increasing the efficiency of American institutions for the service of popular welfare, and in preserving and promoting distinctively American ideals.

Annual fees, \$10, \$5 or \$2 a year. Life membership, \$100. Annual meeting, the last Monday in December. Headquarters, 135 Broadway, N. Y.

THE RHODES SCHOLARSHIP AT OXFORD UNIVERSITY.

CECIL RHODES, statesman, who died at Cape Town, South Africa, March 26, 1902, directed in his will, dated July 1, 1899, that a part of his fortune should be applied to the creation of a fund for the support of a certain number of scholarships covering a three years' course at the University of Oxford. He directed that the selection of the recipients of this gift should be made from three to nine from each of the British Colonies, two from each State and Territory of the United States, or one hundred in all, and fifteen from Germany. Mr. Rhodes desired that in awarding the scholarships account should be taken of different qualities—literary and scholastic attainments, love of outdoor sports, strong, manly qualities such as courage, generosity, kindness, etc., high moral character, and desire to serve in public affairs.

The agencies for final selection vary a good deal. Scholars from Cape Colony are chosen by the individual schools to which the scholarships are especially assigned. In several of the Canadian provinces it has been decided that an appointment shall be made in rotation by the leading universities. The five German students for whom annual provision is made are nominated, according to the terms of the will, by the Emperor himself. In most of the States of the Union, in outlying colonies like Bermuda, Jamaica and Newfoundland, in provinces of Canada, in New Zealand and the States of Australia, the final choice of the scholar is left in the hands of a Committee of Selection. Great care has been taken in the constitution of these committees, as it has been felt that on the wise and impartial exercise of their judgment depends more than upon anything else the full success of the scheme.

The conditions regulating the award of scholarships in the American States provide that the candidates shall have satisfactorily completed the work of at least two years in some college of liberal arts and sciences. The upper age limit must be twenty-four years at the time of entering upon the scholarship at Oxford. To be eligible the candidate must be a citizen of the United States, or the son of a citizen, and must be unmarried. Each student receives an allowance of £300 a year, which is equivalent to \$1,500, payable in quarterly instalments, which is just enough to enable a man to pay the expenses of vacations as well as terms. The first instalment is not payable until the student has actually gone into residence at Oxford, so he should go abroad with one or two hundred dollars in his possession.

The full number of scholarships, when all are filled, is, as at present, 189; and this number should be maintained from year to year, vacancies being filled as the men complete their three years' course. The last examination in the United States took place in October, 1913. The next qualifying examinations will be held in all States of the Union in October, 1915.

Hitherto scholars have been elected in all States of the Union in two successive years, while in each recurring third year none were chosen. In the future the election of Rhodes Scholars will be spread over three years. To effect this change, scholars will hereafter be elected from 32 States each year. The 48 States have for this purpose been divided into three groups (A, B and C) of sixteen each.

For the year 1916 scholars will be elected from groups A and B; for 1917 from groups A and C; and for 1918 from B and C, and subsequently in the same combination year by year.

The qualifying examination will be held *each year* (in the month of October) in all the States of the Union.

The division of the States into groups for the purpose above mentioned is as follows:

A.	A.	B.	B.	C.	C.
Maine.	Maryland.	California.	Michigan.	Arizona.	North Carolina.
New Ham'shire.	New Jersey	Washington.	Missouri.	Delaware.	North Dakota.
Vermont.	Virginia.	Oregon.	Iowa.	Florida.	Oklahoma.
Massachusetts.	Ohio.	Colorado.	Georgia.	Idaho.	South Carolina.
Rhode Island.	Indiana.	Nebraska.	Texas.	Louisiana.	South Dakota.
Connecticut.	Kentucky.	Kansas.	Alabama.	Montana.	Utah.
Pennsylvania.	Illinois.	Minnesota.	Arkansas.	Nevada.	West Virginia.
New York.	Tennessee.	Wisconsin.	Mississippi.	New Mexico.	Wyoming.

The examinations are not competitive, but qualifying. Inquiries as to particulars by intending candidates may be addressed to any college. Information may also be obtained from The Rhodes Trust, Seymour House, Waterloo Place, London S. W., or from F. J. Wylie, Secretary to the Rhodes trustees, 9 South Parks Road, Oxford, England.

National Municipal and Civic Organizations.

NATIONAL MUNICIPAL LEAGUE.

President—William Dudley Fouke, Richmond, Ind. *Vice-Presidents*—Chas. Richardson, Philadelphia, Pa.; J. H. McFarland, Harrisburg, Pa.; Miss Jane Addams, Chicago; Chester H. Rowell, California; John Stewart Bryan, Richmond, Va.; Dudley Tibbits, Troy, N. Y.; A. Lawrence Lowell, Cambridge, Mass.; George McAneeny, New York City; C. G. Kidder, New Jersey. *Treasurer*—George Burnham, Jr., Philadelphia, Pa. *Secretary*—Clinton Rogers Woodruff, 703 North American Building, Philadelphia, Pa. *Chairman Executive Committee*—M. N. Baker, Montclair, N. J. The league is composed of individuals and associations formed in cities of the United States, and having as an object the improvement of municipal government. It has no connection with State or National parties or issues, and confines itself strictly to municipal affairs. Any association belonging to the league may withdraw at any time.

LEAGUE OF AMERICAN MUNICIPALITIES.

President—John J. Ryder, Omaha, Neb. *First Vice-President*—Chas. L. Willerts, Buffalo, N. Y. *Secretary*—Robert E. Lee, Baltimore, Md. *Treasurer*—Chas. J. Steiss, Ft. Wayne, Ind.

The objects of the League of American Municipalities are as follows: The general improvement and facilitation of every branch of municipal administration by the following means: First—The perpetuation of the organization as an agency for the co-operation of American cities in the practical study of all questions pertaining to municipal administration. Second—The holding of annual conventions for the discussion of contemporaneous municipal affairs. Third—The establishment and maintenance of a central bureau of information for the collection, compilation, and dissemination of statistics, reports, and all kinds of information relative to municipal government. The membership of the league includes nearly all of the important cities in this country and Canada. (Report of 1913.)

THE MODERN HISTORIC RECORDS ASSOCIATION.

Founded by Alexander Konta in 1911. Its specific objects include the use of the photographic plate as the most durable means of preserving records and documents; of the phonograph for the preservation of the utterances of celebrities; of moving picture machines in obtaining records of important events; and the application of all other suitable means for transmitting to posterity a vivid and comprehensive record of the life and civilization of the day. The association is not a commercial body. *President*—Herbert L. Bridgman. *Secretary*—Wm. George Jordan. *Treasurer*—E. M. Cravath. Headquarters, the National Arts Club, Gramercy Park, New York City.

AMERICAN CIVIC ASSOCIATION.

C. *Treasurer*—William B. Howland, New York City.

The American Civic Association was formed by merger of the American League for Civic Improvement and the American Park and Outdoor Art Association, June 10, 1904. The association seeks to combine and make efficient the country-wide effort for civic betterment. It has led in the effort to prevent the destruction of Niagara Falls for power purposes; it advocates a Federal Bureau of National Parks; it is inaugurating a campaign for the restraint and reduction of objectionable outdoor advertising as a defacement of nature, and it urges community beauty. It fosters parks, playgrounds, and outdoor recreation; it arouses communities, and leads them toward betterment; it conducts a city planning department, and directs a national crusade against the "typhoid" fly. A lantern-slide service is maintained, and many bulletins are issued.

SOCIETY OF BUILDING COMMISSIONERS AND INSPECTORS.

President—James G. Houghton, Inspector of Buildings, Minneapolis, Minn. *Executive Officer*—F. W. Fitzpatrick, 4200 16th St., Washington, D. C. The International Society of State and Municipal Building Commissioners and Inspectors is an association of the chiefs of the Building Departments of the United States, Canada and Mexico, the principal cities of Europe, Australia and China, to promote the "improvement of building methods; the revision and perfecting of building ordinances and securing their more thorough enforcement; the lessening of our appalling fire losses; mutual assistance, the interchange of ideas, and the binding in closer union of the building bureaus of the several cities with the view of ultimate uniformity of building laws."

INTERNATIONAL REFORM BUREAU.

International Reform Bureau, 206 Pennsylvania Avenue S. E., Washington, D. C. *President*—Rev. W. R. Wedderspoon. *Secretary*—Rev. Henry Anstadt. *Superintendent and Treasurer*—Rev. Wilbur F. Crafts, Ph. D. Devoted to the repression of intemperance, impurity, Sabbath-breaking, gambling, and kindred evils, by lectures, letters, legislation, and literature; also giving special attention to anti-opium work in China, and the suppression of liquor selling among native races in Africa and elsewhere. The bureau has drawn fifteen laws that have passed Congress. Is now promoting bills for Federal censorship of motion pictures and prohibition of interstate telegraphing of race gambling bets.

NATIONAL HOUSING ASSOCIATION.

CHAUTAQUA INSTITUTION.

Chancellor—John H. Vincent. *President*—George E. Vincent. *President of Trustees*—Clement Studebaker, Jr. *Secretary*—Arthur E. Bestor. *Treasurer*—Fred W. Hyde. *Director*—Arthur E. Bestor. The *Chautauqua Assembly*, now *Chautauqua Institution*, was organized in 1874 as a result of the joint plan of Lewis Miller and John H. Vincent. The annual assembly during July and August at Chautauqua, N. Y., is a sixty-day programme of lectures, addresses, concerts, recitals, and various forms of platform entertainment, out-of-door recreation, and highly organized social group life. Local assemblies patterned after the parent Chautauqua in the United States number nearly 3,000.

The *Chautauqua Summer Schools* (Percy H. Boynton, Principal of Summer Schools) are annually conducted during six weeks of the assembly season. Faculty, 115; courses, over 200. In fourteen departments; six in academic subjects usually pursued in academies and colleges, eight in special professional work in Library Training, Domestic Science, Music, Physical Education, Arts and Crafts, etc. Over 3,500 students annually.

The *Chautauqua Literary and Scientific Circle* (E. H. Blichfeldt, Manager), organized at Chautauqua in 1878, continues the educational influence of the assembly throughout the year. More than 50,000 members have been enrolled. Individual readers may pursue the course alone, or local circles may be formed. The time required is about one-half hour daily for nine months. Diplomas are granted to those who complete the course. Any one may become a member of the C. L. S. C. by sending \$5 for the unit (four books, membership book and magazine for one year), to Chautauqua Institution, Chautauqua, N. Y.

NATIONAL SOCIETY FOR BROADER EDUCATION.
