---

The game of Draughts or Checkers, as it is commonly called in this country, was introduced into Europe from Egypt about the beginning of the sixteenth century; and from monumental inscriptions it appears that the game was familiar to the Egyptians as early as the year 2000 B. C. Its antiquity is further attested by Homer in the *Odyssey*, where reference is made to games in the palace of Ulysses in Ithaca, and by Plato who, in his dialogues, makes frequent mention of it by way of illustration.

The oldest known work on Draughts was published at Valencia, Spain, in 1547, by Antonio Torquemada, and since that date various works have appeared, all devoted mainly to the elucidation of games, and none exclusively to critical positions or problems.

With the design of contributing a substantial and valuable addition to the literature of Draughts this compilation of problems, selected from the best published by players of Great Britain and America, was undertaken. A few of the problems will be familiar to the older and more experienced players, and some will be found comparatively easy of solution. In the selection and arrangement all grades of players have been kept in mind. Effort has been made in every instance, to give proper credit to the author of each problem, and this portion of the work has been at times quite perplexing; an apology, therefore, for any mistakes is here entered in advance.

The games are published only for the purpose of showing how certain problems arise in play, and it should be understood that the responsibility of the authors of the problems begins only with the solutions.

With some slight alterations the condensed exposition of the theory of The Move, the laws of the game, and the names of the openings have been taken from Anderson's second and third editions.

The problems have been arranged numerically with the view of easy reference, and the new form of index, originated and prepared for this work by Mr. R. E. Bowen, will be found of great service.

I wish to express my thanks to Mr. A. J. Dunlap of the *Turf, Field and Farm*, New York; to Mr. Robert McCall of the *Weekly Herald*, Glasgow, Scotland; to Mr. J. Hedley of the *Mercury*, Leeds, England; to Mr. J. Parker of the *Weekly Echo*, Sunderland, England; to Mr. T. Porter of the *Gazette*, Paisley, Scotland; to Mr. R. E. Bowen of Millbury, Mass., and to Mr. J. D. Janvier of Newcastle, Del., for favors which contributed in large measure to the accomplishment of this work.

Upon another page will be found an explanation of signs, instructions, and an exercise on the squares of the board for the benefit of beginners.

In submitting this volume to the public, I beg leave to express the hope that it will aid in maintaining the ascendancy of a game which has no superior in other forms of amusement and recreation for the hearth and home.

H. D. LYMAN.

# NUMERICAL INDEX.

BY R. E. BOWEN.

By the kindness of the Author we have been permitted to index this—the first of Problem Books. For many years we have had various plans in view for writing down positions, so that they might be placed in numerical order, for easy reference: but, until now, the project has never been put in practical shape, and after mature deliberation, we have concluded that the plan almost universally adopted at the present time, is the best that can be devised. First, Black men; second, Black kings; third, White men; fourth, White kings.

Figures placed at the right of the dash (—) denote kings; those at the left single men. When the dash is placed at the extreme left, as in Position No. 3, the position consists of kings only. When there is no dash all are single men, as in Position No. 1. B., denotes Black to move and win; W., White to move and win; BD., Black to move and draw; WD., White to move and draw, etc.

This fascinating branch of checkers has been much neglected among checker players. The most convenient way for a private index, is to use cards three inches square, about the quality of a postal card; draw two lines across the top, one for black men, the other for white.

Example: 11 13 21; W. 22 30—20; W. to move and win. Bennett; LYMAN'S BOOK, 163; *Glasgow Herald*, 465; *Leeds Mercury*, 88. Again, 3 7—6; W. 12 16—5; Black to move and win. Ronald; *And.* 2d, 17; *Turf*, 436; *St. Clair* 62, and Price's note to *Leeds Mercury*, 88, Feb. 26, 1881. And here you have a brief but interesting history. Place these cards edgewise in a box 3 1-8 inches wide, 2 1-2 deep and 12 or 18 inches long, in their exact numerical order, and the index will always be in complete order ready at any time for reference. A million positions can be indexed in this way, and any one of them found in half a minute. Figures should always be used. He who letters his board, or uses letters and figures combined, or signs his board, in any way whatever, in our opinion, makes a great mistake; and no plan we ever heard of excels that now in use. In short less ink, more blunders, and Greek to every one but yourself. An index may be carried to any extent, according to ones strength and lease of life. Games may be indexed at each move, the books from beginning to end, solutions to the problems at every stage, and every time the same position occurred the fact would be revealed at once. The solutions may be written upon the back of the cards. But there is much labor in this, and when one has the magazine, book, or paper from which the position was taken, a reference to these is all that is necessary, as in the index now presented for your consideration.

*Millbury, Mass., May, 1881.*

# NAMES OF THE OPENINGS

## AND HOW FORMED.

1. The "Ayrshire Lassie" is formed by the first four moves, thus:—11-15, 24 20, 8-11, 28 24. It was first played by the late Andrew Anderson against James Wyllie at their second match in Edinburgh, Aug., 1839.

2. The "Bristol" is formed by the first three moves:—11-16, 24 20, 16-19. It was so named by Anderson in compliment to the players of the city of Bristol, England.

3. The "Cross" is formed by the first two moves:—11-15, 23 18, and was so named because the second move is played across the direction of the first one.

4. The "Defiance" is formed by the first four moves:—11-15, 23 19, 9-14, 27 23, and was so named because it defies or prevents the formation of the "Fife" game.

5. The "Double Corner" is formed by the first move:—9-14 being from one double corner toward the other.

6. The "Dyke" is formed by the first three moves:—11-15, 22 17, 15-19. (Dyke, Scotch—A fence or stone wall.) The name probably arose from observed resemblance; for, at various stages of the game the pieces are formed into straight lines.

7. The "Fife" is formed by the first five moves:—11-15, 23 19, 9-14, 22 17, 5-9, and has been known by this name since James Wyllie played it against Anderson in their match at Edinburgh, Feb., 1847.

8. The "Glasgow" is formed by the first five moves:—11-15, 23 19, 8-11, 22 17, 11-16, and has been known by this name since James Sinclair of Glasgow played it against Anderson at their match in Hamilton in 1828, but this opening was the favorite of many Glasgow players for years before that date.

9. The "Irregular" is so named to distinguish a variety of openings not included under other titles.

10. The "Laird and Lady" is formed by the first five moves:—11-15, 23 19, 8-11, 22 17, 9-13. It was so

called because it was the favorite of Laird and Lady Cather, who resided at Cambusnethau, Lanarkshire, about ninety years ago.

11. The "Maid of the Mill" is formed by the first five moves:—11-15, 22 17, 8-11, 17 13, 15-18, and was so named because the daughter of a Miller in Lanarkshire was partial to this opening.

12. The "Old Fourteenth" is formed by the first five moves:—11-15, 23 19, 8-11, 22 17, 4-8, and was so called through being familiar to players as the 14th game in the original work of Joshua Sturges, published in 1800.

13. The "Second Double Corner" is formed by the first two moves:—11-15, 24 19, and is so named because the first move of the *second* player is from one double corner toward the other.

14. The "Single Corner" is formed by the first two moves:—11-15, 22 18, being from one single corner toward the other.

15. The "Souter" is formed by the first five moves:—11-15, 23 19, 9-14, 22 17, 6-9, and was so named because it was the favorite of an old Paisley shoemaker. (Scottie, souter).

16. The "Switcher" is formed by the first five moves:—11-15, 21 17, 9-13, 25 21, 8-11. The title was introduced by Mr. George Wallace of Glasgow, and this opening has been much in favor during the last three years.

17. The "Whilter" is formed by the first five moves:—11-15, 23 19, 9-14, 22 17, 7-11. The name (in Scotch) signifies an overturning, or a change producing confusion.

18. The "Will o' the Wisp" is formed by the first three moves:—11-15, 23 19, 9-13. It was named by George Wallace from the peculiarity of some of the situations, where the player is at a loss for a correct move.

# STANDARD LAWS

## OF THE GAME.

### The Standard Board.

1. The Standard Board must be of light and dark squares, not less than fourteen nor more than fifteen inches across said squares.

2. \* The Board shall be placed so that the bottom corner square on the left hand shall be black.

### The Standard Men.

3. The Standard Men, technically described as Black and White must be light and dark (say Red and White, or Black and White), turned, and round, not less than one inch, nor more than one and one-eighth inch in diameter.

### Placing the Men.

4. \* The Men shall be placed on the Black squares.

5. The Black Men shall invariably be placed upon the real or supposed first twelve squares of the board; the White upon the last twelve squares.

### Order of Play.

6. Each player shall play alternately with Black and White Men, and lots shall be cast for the color only once—viz., at the beginning of a match—the winner to have the choice of taking Black or White.

7. The first move must invariably be made by the person having the Black Men.

### Time Limit of Move.

8. At the end of Five Minutes (if the move has not been previously made), "Time" must be called in a distinct manner by the person appointed for the purpose; and if the move be not completed on the expiration of another minute, the game shall be adjudged as lost through improper delay.

9. When there is only *one way* of taking *one or more* pieces, "Time" shall be called at the end of one minute; and if the move be not completed on the expiration of another minute, the game shall be adjudged as lost through improper delay.

### Arranging the Men during a Game.

10. Either player is entitled, on giving intimation, to arrange his men or his opponent's pieces properly on the squares. After the first move has been made, however, if either player touch or arrange any piece without giving intimation to his opponent, he shall be cautioned for the first offence, and shall forfeit the game for any subsequent act of the kind.

### Touch and Play.

11. After the pieces have been arranged, if the person whose turn it is to play *touch* one, he must either play it or forfeit the game. When the piece is *not playable*, he is penalized according to the preceding law.

12. If *any part* of a playable piece be played over an angle of the square on which it is stationed, the play must be completed in *that direction*.

### Capturing Play.

13. A capturing play, as well as an ordinary one, is completed whenever the hand is withdrawn from the piece played, even although two or more pieces should have been taken.

14. When taking, if a player remove one of his own pieces, *he* cannot replace it; but his *opponent* can either play or insist on his replacing it.

### False or Improper Moves.

15. Either player making a false or improper move, shall instantly forfeit the game to his opponent, without another move being made.

\* Throughout this work, in order to make the illustrations of men and kings in the diagrams appear distinctly, the pieces have been placed on the white squares. A white square thus occupies the lower left hand or single corner.

### The "Huff" or "Blow."

16. The "Huff" or "Blow" is, *before one plays his own piece*, to remove from the board any one of the adverse pieces that might or should have been taken. But the "Huff" or "Blow" never constitutes a play.

17. The player has the power either to *huff, compel the take, or to let the piece remain on the board*, as he thinks proper.

### Crowning the Men.

18. When a man first reaches any of the squares on the opposite extreme line of the board it becomes a "King," and can be moved backwards or forwards as the limits of the board permit (though not in the same play), and must be crowned (by placing a man on the top of it) by the opponent; if he neglects to do so, and play, any such play shall be put back until the man is crowned.

### Drawn Games.

19. A Draw is when neither of the players can *force* a win. When one of the sides appears stronger than the other, the stronger party is required to complete the win, or to show, to the satisfaction of the umpire or referee, at least a decided advantage over his opponent *within forty of his own moves*—to be counted from the point at which *notice* was given—failing in which, he must relinquish the game as a draw.

### Conduct of Players and Spectators.

20. Anything which may tend either to annoy or distract the attention of the player is strictly forbidden—

such as making signs or sounds, pointing or hovering over the board, unnecessarily delaying to move a piece touched, or smoking. Any *principal* so acting, after having been warned of the consequence, and requested to desist, shall forfeit the game.

21. While a game is pending, neither player is permitted to leave the room without a sufficient reason, or receiving the other's consent or company.

22. Any spectator giving warning, either by sign, sound, or remark, on any of the games whether played or pending, shall be ordered from the room during the match, and play may be discontinued until such offending party retires.

### Match Games.

23. A match between equals, wins and draws to count, should consist of an even number of games, so that each player may have the first move the same number of times.

### Enforcement of the Laws.

24. Either player committing a breach of any of these laws must submit to the penalty, and his opponent is equally bound to exact the same.

### Unforseen Disputes.

25. Should any dispute occur not satisfactorily determined by the preceding laws, a *written statement of facts* must be sent to a disinterested arbiter, having a knowledge of the game, whose decision shall be final.

# AN EXPOSITION OF THE THEORY OF THE MOVE.

BY W. PATERSON, GLASGOW.

## The Move.

To have the move signifies occupying that position on the board, which (in playing piece against piece, without regard to the others, till one square intervenes between the pieces in each pair), will eventually cause the player who occupies that position to have the last play.

## Calculation of the move.

For convenience, the squares of the board are divided into two systems of four columns each. The columns of one system are those reckoned downward from Black's crown-head—that is, from the squares numbered 1, 2, 3, 4. The columns of the other system are those reckoned upward from the White's crown-head—that is, from the squares numbered 29, 30, 31, 32.

Reckoning downward, the squares 1, 9, 17, 25, — 2, 10, 18, 26, — 3, 11, 19, 27, — 4, 12, 20, 28, — form the columns of one system; and reckoning upward, squares 29, 21, 13, 5, — 30, 22, 14, 6, — 31, 23, 15, 7, — 32, 24, 16, 8, — form the columns of the other system. The two systems are distinguished from each other by large and small figures in the following numbered diagram:

Black side of the board.

	1	2	3	4
5	6	7	8	
9	10	11	12	
13	14	15	16	
17	18	19	20	
21	22	23	24	
25	26	27	28	
29	30	31	32	

White side of the board.

The columns of each system being situated alternately between those of the other, it is evident that one system is the reverse of the other.

When the two players have an equal number of pieces, it is obvious that the *total number* of pieces must always be even.

Now, as an *even number* can only be divided into *two even* or *two odd* numbers, it is clear that if the pieces be counted in each of the two systems separately, the numbers will in the two cases be both even or both odd.

In the course of the play each move will be out of one system into the other, and will therefore make one system count one more and the other one less; so that if both systems were before odd, they will now be both even, and after another move they will again be both odd, and so on alternately, according to the player whose turn it is to play.

To know if you have the *move* WHEN IT IS YOUR TURN TO PLAY, apply the following

## Rule.

Add together all the pieces, both Black and White in either system of squares, and if their sum is odd you have the move; but if even your opponent has the move.

## Illustration.

BLACK.

WHITE.

You play Black first and have the move, because either system contains an odd number of pieces. Lines

are introduced in the diagram to distinguish one system from the other.

To have the move is often an advantage, though to have it in some cases may occasion the loss of the game.

### Illustration.

BLACK.

WHITE.

You play Black first and have the move, but lose the game through White forcing your man on square 24 to square 28 — a confined position. The White king then has the move on your Black king, though you have the move if all the pieces are counted.

An exchange usually alters the move; consequently, when you wish to obtain the move, make such an exchange as will alter it.

Take the following position as an illustration: — Place Black men on squares 13 and 17, and White men on squares 26 and 30. You play Black and have not the move; but play 17 to 22, White takes 26 to 17, you retake by 13 to 22 and gain the move.

In a single exchange of one for one, when only one of the capturing pieces remains on the board, the move is changed.

To find what kind of exchanges do or do not change the move, apply the following rules: —

**RULE I.** — When the sum of the capturing pieces is even and in reverse systems, and the captured pieces are odd on each side, the move is changed; but if the capturing pieces are in the same system, the move is not changed.\*

Place the following as an illustration: — Black man on square 11 and king on 26; White man on 22 and king on 7. You play White and have not the move; take 7 to 16, Black takes 26 to 17, and you gain the move, because the capturing piece on 7 is in reverse system to the capturing piece on 26. Place also the following: — Black man on square 15, and king on 26; White man on 22, and king on 10. You play White first and have not the move. Take 10 to 19, Black takes 26 to 17, and this exchange does not change the move, because the capturing piece on 10 is in the same system as the capturing piece on 26.

**RULE II.** — When the sum of the capturing pieces is even and the captured pieces are even on each side, the move is not changed.

**RULE III.** — When the sum of the capturing pieces is odd and the captured pieces are even in each system the move is changed; but if the captured pieces are odd the move is not changed.

As a summary of the illustrations of the exchanges which do or do not change the move the following will be found of universal application in the most complex positions: —

**RULE IV.** — Add together *all* of the capturing pieces in both systems and if they are the same as the captured pieces in each system ( that is, both odd or both even ), the move is not changed, but if they are reverse to each ( one odd and the other even ), the move is changed.

\* You must apply the rule at the squares the pieces capture and are captured from.

Drawn. G		B. wins. G	Drawn. G	W.wins. G-2	W.wins. G-3	W.wins. G-2-5	B. wins. G-2-5			

EXPLANATION OF SIGNS.

A Black Man. A Black King. A White Man. A White King.

\* The asterisk signifies important or essential moves.

- The black dash signifies a move by the Black side, viz: 11-15, 22 18, 15-22, 25 18, as in the beginning of the "Single Corner" game. It will be observed that there is no dash between the figures representing the moves of the White side. This facilitates reference.

B. Signifies Black.

W. " White.

G-1-2. In the games figures are placed at the foot of the variations in this form. If this (G-1-2) were placed at one of the variations it would signify that variation 1 branched from the Game, and variation 2 branched from variation 1, &c., &c.

INSTRUCTIONS.

A problem is not sound which allows more than one way to win or draw at the *first move*. Any number of variations are allowed either side after the *decisive first move* is made. As an illustration take Problem No. 97. If Black could win by *first moving* 3 to 7 or 6 to 9 that problem would be defective.

EXERCISE ON THE SQUARES FOR BEGINNERS.

By Dr. T. Brown, Limerick, Ireland.

THE INTERCHANGE.

BLACK.

WHITE.

Black playing first, the positions of the men are to be reversed without giving either side a chance to capture.

SOLUTION.

PROBLEMS

The word "PROBLEMS" is centered within an ornate, symmetrical decorative frame. The frame consists of a central scrollwork border with intricate floral and vine motifs. At the top center of the frame is a small crest or floral arrangement. The word "PROBLEMS" is written in a classic, blackletter-style serif font. Small decorative flourishes are placed on either side of the word, and the entire composition is balanced and elegant.
