The Political Economist.

THE BANK BETURN OF THIS WEEK.

As unfortunate accident happened to this week's Bank return. It was sent by the Bank to Somerset House at the usual time, bat, owing to a curious inadvertence, it was there suppressed for some hours. The incident is trifling enough, but it may aggest a useful reform. Why should not the Bank publish the return as soon as they can in the course of Thursday, and not be dependent on the intervention of the Inland Revenue e, which has this time proved defective ? By the Act of Parliament, it is true, the Government are to publish the scount, but the Bank can act as agents for the Government in this matter, as in many more important. At present, the Infand Revenue Office gives copies to the public at Somerset House, as soon as the account gets there; if the intervention of that department is necessary, let the clerk go down to the Bank and give the copy there. We are sure, however, that Mr Gudatone, if the matter were once brought before him, would authorise the Bank to publish the return as soon as the details on be made quite accurate. It is of some importance that the trath should be made known as soon as possible, and on this ceasion, though the account itself appeared in the papers of Friday, the comparison with the return of the last week, which is necessary to its due comprehension, could not be given for want of time. If any object were gained by delay, is value might be discussed, but where $n\sigma$ object is gained, alay is evidently injurious.

The substance of the return is much what we led our readers ast week to expect. We told them that serious causes were in operation, rendering cheap money unlikely and impossible. The present week has had singular advantages, for the accumulation of silver in Mexico, which the French had rather kept back, with some view to the sale of bills on Paris, to the amount of 1,000,000*l* or more, has now reached London. But even still, the account of the Bank is not very satisfactory. It stands :-

LIABILITIES OF BANKING DEPARTMENT.

Public deposits	5,815,742
Private ditto	18,078,751 551,224
and with the designment of them by the	

19,440,717 and the reserve is 6,891,9331-a mere trifle above a thirdand with the expectation in the course of some weeks of an unfavourable exchange. The idea of cheap money, hastily entertained by some persons because money seemed to be plentiful in Lombard street, may therefore be certainly discarded.

THE MONEY MARKET.

A SERIES OF ARTICLES FOR MEN OF BUSINESS. No. I. WHAT THE MONEY MARKET IS, AND WHY IT IS SO CHANGEABLE.

THE design of the present series of articles is peculiar. We wish to bring together in a continuous series those facts and those arguments which are most necessary to explain the peculiarities of the money market. The present time almost these arguments which are most necessary to explain the peculiarities of the money market. The present time almost requires something of the sort. The enormous growth of trade, the vast increase of credit, the quickness and the ease with which capital is sent on loan from country to country, and especially from England, where it is so rapidly saved, the altered condition of Consols and Exchequer bills in the face of new investments, the frequent changes in the value of money, the high rate of discount which, on the whole, has prevailed during the past year, and has not yet ceased, —these new facts, and others which might be mentioned, make make a new outline of the subject necessary. Our new experience ought to have taught us much, and we ought to take stock of what- it has taught us. The changes in the value of money are forcing the practical study of the money market much more than of old upon men of business. Money is not, as formerly, always to be had at 5 per cent. The investment of the large savings now made from business incomes is also a serious matter. The money market, like all other markets, is a matter of business, and any man of business who will really attend to it will comprehend it; but it needs real attention and consideration. You cannot keep a ledger in a hurry, and you cannot understand the money market in a and, therefore, we wish by a continuous series of minute ;articles to aid its study and consecutive consideration.

tended interest. There is an "Economist" in several extended interest. countries in Europe. The growing wealth of the whole Continent gives an interest to the manner in which wealth may timent gives an interest to the manner in which weath may be secured, and in which it may be made the most of. In France, the attempt of M. Pereire, by the aid of the forgotten privileges of the Bank of Savoy, to invade the privileges of the Bank of France, has elicited a crop of pamphlets like those on the "Act of 1844." A review of these questions, though principally from an English point of view, will, we have there there is interest for our continuental made

though principally from an English point of view, will, we hope, have therefore its interest for our continental readers. The money market is best described by a French phrase. It is an "organisation of credit," by which the capital of A, who does not want it, is transferred to B, who does want it. It is a vast borrowing machinery, composed of many links, and in which a vast number of persons give a surprising trust to one another. The machinery is so familiar and so useful that we forget that it is in the last degree refined. A Somersetablic farmer pays five sovereions into a Somerset A Somersetshire farmer pays five sovereigns into a Somerset-shire bank; no more trivial act, few less important people, can be conceived. Nor, indeed, has an individual act any can be conceived. Nor, indeed, has an individual act any importance. But the sum total of such acts has an indefinite importance. If the agricultural community stopped "paying "in," London would be bare, Lombard street would be ruined, and the whole community stopped in the stopped stopped in the stopped stopped stopped in the stopped stopp and the whole exchanges between England and foreign coun-The mode in which Lombard street is supplied, and the use of its being supplied, is this. A vast number of districts in Great Britain cannot employ their own yearly accumulations. You cannot create new trades, new manufactures, new wealth, upon a large scale, in a stagnant rural district. On the other hand, large districts like Lancashire or the West Biding of

THE ECONOMIST.

continually employ half as much again as they have, if only An energetic man of business continually feels they had it. "what a business he could do, if only he had money enough." The machinery of the money market gives him or tends to give him this money. The savings of rural districts—the small savings, especially, which those who saved them could not employ on the spot—are deposited in local banks, are sent by them to London, are deposited at notice or at call with the bill-brokers, and invested by them in the discount of bills from the go-ahead districts-from Lancashire and the West Riding of Yorkshire. Whatever trade is most prosperous bids highest for this spare money, and gets it.

The principle is just the same, though the machinery is a little different, if the money be lent on securities upon the Stock Exchange. Persons who have no present use for their money leave it with a banker; persons who wish to buy or hold "securities"—that is shares or *parts* of actual under-takings—railways, canals, gas works, &c., come to the banker and ask for a loan. He lends them the money his depositors lent him; he is the medium by which the money of the inactive class is divided and distributed among the enterprising class

The curious point which strikes a cursory observer of Lomthat everything is done on credit. If you bard street is deposit five thousand pounds with Messrs Overend or the National Discount Company, you deposit it by cheque, which is only a piece of paper; and when they repay you, it will be by another piece of paper. In a very few cases bank notes may be used, as where securities have to be parted with to those whose credit is not good, and the holder of these securities says, "I will part with them to you when you bring "me bank notes and not before." But even these bank notes are only, as Mr Huskisson said, "circulating credit;" they are only promises to pay-believed promises ; and on a large scale in London no coin, -- nothing not credit, -- no intrinsically valuable medium, is ever seen or thought of.

Persons who have had to do with some of our Anglo-Continental banks have had great difficulty in making foreigners comprehend the safety of this state of credit. In many countries bankers do not like to take money to be paid by cheque-money at call, because they think they could not safely use it. They think it would be asked for, and then they should not have it. Even in Paris the timidity of bankers is amazing to English-men, but the answer of the Parisian banker is intelligible. "Ah !" he says, "you do not know what 1848 was in Paris; I " do. If you knew how suddenly a revolution may come, and "how much money it makes people ask for, you would be "cautious as I am." We are so familiar with all this trust and confidence that we do not know how rare and exceptional in commercial history it is, how marvellous it seems and must seem to nations less advanced in mercantile organisation. This vast organisation of credit has, unquestionably, a most -it is based on the bullion in the Bank of England. solid basis.-This (putting aside the reserves which Scotch or Irish banks may be compelled by Sir R. Peel's Act to keep, and other may be competed by Sir A. reet's Act to keep, and other minor exceptions), speaking breadly and practically, the whole of this great machinery of credit is based on the bullion in the values of the Bank. A good cheque, in the last resort, means that, if the holder wishes, he can have an equivalent amount of that gold and take it home with him. His cheque may be on the London and Westminster Bank or a country bank, and these banks can by law compel him to take from them Bank of England paper. But this difficulty is a dif-ficulty of one step only. He can take that "paper" to the Bank, and there get change for it. Most people have a little small change about them, all bankers have coin for daily purposes in their till, but no banker and no common person keeps at hand more coin than he can help; people like to make something of their money, and coin is "barren." to make something of their money, and coin is "barren." The bullion in the Bank of England is the sole accumulated reserve, the sole come-at-able reserve of intrinsic wealth out of which our promises, if paid, must be paid, on the faith of which our credit, while good, is good.

In former times it was difficult to illustrate the dependence of the public upon the bullion store in the Bank of England. The accounts of other bankers were so secret that they could not be used to explain anything. But the success of the Joint Stock Bank system has changed all this. The Union Bank, for example, has the largest amount of liabilities

Yorksbire have a chronic craving for capital. They could of any private, of any non-National Bank in the world. What is its reserve ? it is as follows :-

	£	2
Cash in the till	721,348	_

very large reserve, but of this great aggregate only 721,3432 is money, is coin, and of that not a sixpence could probably be spared. The whole of it is doubtless wanted for the requirements of the day's business. The rest is money at the Bank, money at call, money invested in Government securities, that is, money which is *lent* to some one. Out of the 19,500,000*l* of the Union Bank's liabilities, there is only 721,000l of actual coin, of money unlent to anybody. What is true of this great Bank is true of smaller ones, as far as they go: their reserve, too, is lent or invested somehow. The bullion in the Bank is the only uninvested, unlent, tangible reserve in Great Britain.

This reserve is the fund-the only fund-we have to meet exchange payments to foreign countries. If the balance of trade goes against us-if, as is now common, we make cash loans to foreign countries-this single reserve in the vaults of the Bank is the one store, the sole accumulation, we have to pull upon.

It is very remarkable that, vastly as our credit augments. enormously as our trade develops, this cash balance, this sole available unemployed fund, does not increase. In September, 1844, the first account under Sir R. Peel's Act, the bullion at the Bank of England was

1000 000 10 the last meterem is only 10 000 0001	A.u.s 121

whereas the last return is only 12,980,0331, or two millions less than twenty years ago.

In this time, who can tell how the liabilities of the banking system of Great Britain-the liabilities against which this reserve is held-have augmented ? We cannot estimate with accuracy those liabilities, either as they were in 1844 or a they are now, but we have a test which, though not perfect, is at least approximate, and may suggest an idea sufficiently true :---

In 1844-	deposits, &c.,	London and Westminster were	2.676.741	
		London Joint Stock	2,245,330	
_	-	Union	1,591,200	
	_	London and County	1,231,412	

7,744,683 And we showed last week that the liabilities of these same banks were now 65,162,292l, or nine times as great. Doubtless these banks have gained in part by aggression upon others. Yet it is said, by people who should know, that the aggregate liabilities of the present London bankers are much greater than they were in 1844; and undoubtedly so it is with the Scotch and the English country bankers. We do not, there-Scotch and the English country bankers. We do not, there-fore, hesitate to say that the credit of the country has augmented manifold in twenty years, and yet the basis of that credit, the cash balance, has not augmented, but has diminished.

We need not show at length how the trade of the country

a business of treble the amount in the last year than it was in the first.

No wonder, therefore, that our money market is delicate, now that we understand what it is. The basis of credit has not diminished, and yet that credit has multiplied no one can say how manifold. And trade has grown, and as it grows, this demand upon our store of bullion, upon this basis of our credit, must of necessity grow too. We have to pay a balance of trade, and if the trade gets larger, if it deals in immensely bigger figures, the possible difference in any one year between exports and imports is augmented, and the amount of bullion to be paid in consequence is augmented Who, therefore, can wonder that our money market likewise. is delicate when he sees that in the last twenty years the store to be attacked has not increased, but diminished, while

1107

the attacking forces have during the same period increased so ortentously and wonderfully ?

THE DANISH PLAN OF SECURING THE REPRESENTATION OF MINORITIES.

THE British Government has just published, and the Daily News has circulated a very singular paper. It is a report by Mr Robert Lytton, British Secretary of Legation at Copenhagen, upon the structure and working of the Danish electoral It is one of a series of political reports which the cretaries of Legation all over the world have been, in the last few years, ordered to send in, and which promise to be of very spected political value. Mr Lytton's report is far too long, far too literary, and burdened with a needless discussion of objections, but it deserves the careful perusal mathematical of all who believe as we do, that the canker at the root of representative institutions is the tendency of the majority to monopolise representative power. The framers of the Danish Constitution, it appears, entrusted the preparation of the electoral law to Mr Andree, Finance Minister of the kingdom, and a man of high local repute for thoughtfulness and mathematical mowledge. This gentleman had deeply considered the prorepresentation, and had arrived at a conclusion blem of identical with that so often proclaimed by Mr Hare, that the defect of the modern representative system in all countries, is the difficulty of securing adequate expression to the views of minorities, a difficulty corrected in England, in part by wide varieties of constituency, but still so great that, to mention only one instance, the 800,000 Catholics in England can only east one member, and but for very peculiar circumstances could not even seat that one. Mr Andræ to meet this evil devised, and the King carried out a system of election which is substantially identical with that of Mr Hare, which has worked with success for eight years, and which has apparently succeeded in the end for which it was designed. It is, perhave, too complicated for adoption in this country, and is liable to some objections which Mr Lytton has not perceived, but a system of representation actually at work, which does allow for minorities, is a subject of high interest to all thou ghtful English politicians.

The scheme is based, in the first place, upon a partial but not complete rejection of the local idea, a contempt for which was one of the defects of Mr Hare's able plan. The country is divided into districts, covering a certain number of seats, and each voter sends in the names of as many persons as he likes, not exceeding the number of members, in the order of his preference. The returning officer first counts up the num er of voters, and then divides them by the number of sents, the quotient giving the number of votes which make an election sure. To make a process which looks complicated appear as simple as it is, we will transfer the scene to London, omit all details not absolutely essential to the principle of the scheme. Suppose London to have in all twenty the scheme. Suppose London to have in all twenty members, and suppose on any given election 100,000 electors ought to go to the poll. Then any person whose name is inscribed on 5,000 papers is at once declared duly elected, and there is an end of discussion as far as he is concerned. But one man—say Baron but hill and the pole man—say Baron Rothschild--may have more than his quota. If so, the returning officer stops when his quota is complete, and in all remaining voting papers carries the Baron's name to the credit of the person named first in such of the remaining papers as name the Baron also. His surplus of votes, therefore, cannot be carried to Tory credit, for no Tory would insert the name, but can be carried to credit of the person whom the Liberal voter likes next to or better than the Baron. But it may happen that the whole body of electors do not go to the poll. The law provides for that to the extent of allowing a man who is necessary to fill up the number of the seats, but who as not the proper quota of votes, to be elected if he has half. But if he has less than half, then the seat, as a punishment to voters for neglecting their duties, remains unfilled,-an anomalous and very useless provision. Under this system, it is clear that the Liberals of London, with their enormous majority, would succeed in seating a majority of the London members, but the Tories, not being beaten in detail borough by borough, would, by clubbing together, seat also a certain mber, and instead, as in London, of only one party being represented, both would seat a proportion of members varying a their strength. Indeed, a sub-variety of electors—say, for instance, the Jews—could, by all voting together, ensure the

k

le

return of their man also. If the Liberal electors, for instance, were 60,000, and the Tories 35,000, and the Jews 5,000, the Liberals would seat twelve, and the Tories seven, and the Jews one, and the minority would have precisely its due share of influence, no more and no less. The injustice which now exists, that the immense Tory population of London is totally unrepresented, put to silence as it were, and that instead of the metropolis sending representatives to Parliament, only the dominant party sends them, would then cease. This injustice, which is the one great evil of local representation, is by the Danish constitution completely corrected. Mr Hare's scheme, therefore, so far from being a theory, is there, with one important modification, a practical fact, and according to Mr Lytton, although not popular, really sends into the Rigsraad the best men of both been assured by Mr Andree that in his opinion the general parties. "standard of representative character supplied by this law is "the best and highest in the country; and that although he " does not consider that a sufficient time has yet elapsed whereby "to test the effects of the law upon the constituencies themselves, "he is nevertheless of opinion that, under its operation, the "character of the voter as a class has improved and is improv-"ing. I have every reason to believe, moreover, that bribery " is almost unknown to the constituencies for the Rigsraad. The plan, we are bound to add, is in Denmark unpopular, first, because Mr Andræ has made it unnecessarily complicated, and secondly, because the majorities feel that their monopoly of power is constantly marred by the full and adequate expression which the system gives to the will of minorities. That objection would, we fancy, be strongly felt in England also, an electoral district, say like the cotton country, grieving to find its immense liberal influence diminished by the full The objection, however, representation of its Tory minority. based, not on justice, but on feeling, and the existence in a European State, of a system of representation thoroughly liberal, allowing of local feeling, yet providing for the rights of minorities, is a fact of very high interest, and one which may one day considerably influence English politics. Englishmen are very slow to receive ideas, very quick to apprehend their action when visible in any concrete form.

THE DUC DE PERSIGNY ON FRENCH LIBERTY. THE DUC DE PERSIGNY is never tired of confuting the belief —probably rather prevalent in France—that England has a greater share of liberty than France enjoys under his master. In his elaborate speech last week, at the Council-General of the Loire, he returned to this subject, which haunts almost morbidly his political meditations, and attempted to show that, though our own system may be well enough for Eng-land, it would be fatal in France, both to wholesome liberty and firm authority. His theory appears to be, that you must in some way prevent anything like a fundamental collision between the liberty-loving elements of national life and the authority-loving elements; that the landowners in England effect this, because, not only are they on the side of authority, and indeed are themselves the actual executive authorities in all county administrations of justice, but, because they also practically control the elections, and so virtually determine the constitution of that formidable legislative body which, besides legislating for the country, chooses its own central Executive. Now, of course, in this matter the Duke is guilty of a considerable exaggeration. Admitting to the full the influence of the landed gentry in the county no means true and smaller borough elections, it is yet by either that the landed gentry have an overruling influence in Parliament, or that to them chiefly is due that respect for the principle of authority, that deference to the Executive, which, as he truly says, is the *sine quâ non* of a stable political system. If the House of Commons were elected exclusively by the larger boroughs to-morrow, no doubt it would lose very great part of its influence by ceasing to represent the landed gentry; but we doubt if it would be in the least less disposed to respect the stability of the Executive, and to be guided in all reasonable matters by the actual Administration, than it is now. All the electoral classes of England identify themselves more or less with their Government, and would as soon think of hazarding its authority as of resigning their own control over its acts and policy. No doubt this,—and not the overweening influence of the landed gentry—is the secret of our liberty. No doubt the difficulty of giving the same

THE ECONOMIST.

liberty to France is that this is not true of France,-that almost involuntary spasms of contempt for the actual administration are apt at times to rend the popular mind in France,

and endanger periodically the existing institutions. It is obvious that in every country, unless you can get those who go in for the liberties of the nation to respect authority, or those who wield the authority of the nation to respect its liberty, there can be no stable equilibrium, and we shall have either liberty upsetting authority, or authority crushing liberty, or an internecine war between the two which virtually annihilates both. If there is to be both freedom and order, you must either have representatives of liberty uppermost who hate and spontaneously avoid anarchy, or representatives of authority uppermost who hate and spontaneously avoid despotism,-or else an absolute victory of one of them over its rival,-or, finally, an equal and mutually destructive conflict between liberty and authority. We should, of course, put the English system of government among those of the first kind, where representatives of liberty (or the rights of self-govern-ment) are uppermost, who yet hate and spontaneously avoid anarchy, though the Duc de Persigny is inclined to place our Government in the second class we have named,that of a people governed by an oligarchy spontaneously making great concessions to liberty. The Government of France, we concessions to liberty. should say, is, on the contrary, half-way between the second and third classes,-that of the Governments which, while really representing in the first instance the principle of authority, is wise enough to defer a good deal to the popular wish for liberty, and of absolute Governments which have suppressed liberty.

The Duc de Persigny, however, thinks there is another The Duc de Fersigny, nowever, thinks there is another alternative, which he describes rather oddly. In the French Government, he says, liberty and authority are both orga-nised, but organised so as to be independent of each other. "As authority and liberty," he says, "cannot be in the "hands of the same class as in England, in place of subordi-" nating them one to the other, it was natural to make them " independent ; and here is the fundamental principle of our " Constitution." This sounds to us, we confess, exceedingly like saying that the hammer has been so organised as to strike wide of the anvil, and the anvil so as to miss the stroke of the hammer-an arrangement not highly practical. If authority is not to control liberty-if liberty is not to press against authority-what does either of the words mean ? and what is the function of either of the things those words represent ? The Duke goes on to explain. He appears to mean that the "independently" organised liberty may do certain acts, and certain acts only, while the independently organised authority is, in the exercise of its administrative privileges, authorised to do all that is not expressly reserved to its rival. He says: " From the moment, indeed, that a vast Administration is " with us in possession of all the instruments of authority, " and is alone charged with the duty of maintaining order " and public security, reason, good sense, and patriotism, in " accord with experience, said very emphatically that it was "necessary to assure before everything the benefits of "authority, and no longer make it the prize of the ambitions, " of vanities, and of desires which liberty can set in motion ; " in other words, it was indispensable that the independence " of the executive power, entrusted by the will of the people " to the hands of the Sovereign, should be henceforth a " reality. It was necessary, then, that the chiefs of the "various branches of the administrative hierarchy, the " Ministers, being in the exclusive nomination of the chief of " the State, should no longer be responsible before the " Chambers,--that is to say, removable by the Chambers; " that the Prince alone should be responsible to the people, " as the father of a family to his children ; and that, finally, "the man most interested in the public order and security " should be invested with the force necessary to assure this " first of all blessings to the nation. Such, then, is authority "established upon foundations solid, natural, and agreeable " to the organisation of the country. Let us see how liberty, " in its turn, is organised, and especially if the function "assigned to the Executive Government, or the inde-"pendence of authority, is established at the expense of "liberty. Universal suffrage—that is to say, the will of a "whole people—which constitutes public authority in the "person of the Emperor, produces in its turn every liberty— " communal liberty by the Municipal Council, at the side of " the Mayor, the delegate of authority; departmental liberty

" by the General Council, at the side of the Prefect; and national liberty by the Legislative Body, at the side of the Sovereign. Now, if it is considered that these public coun-" cils, which altogether form the hierarchy of liberty by the " side of the hierarchy of authority, are not only councils, but " side of the hierarchy of authority, are not any or provide a state of the enormous power of deliberative bodies; that they exercise the enormous power or prohibiting or prohibiting of " of discussing and voting budgets, approving or proh " expenses : that in consequence they are possessed of all the " means of control and influence which really constitute modern " liberty ; that, finally, it is in the hands of the principal of "these bodies that the veritable legislative power resides, "every man of sense and good faith will recognise that, in "assuring the reciprocal independence of authority and "liberty, the Napoleonic theory has virtually solved the "problem of liberty in France." Now, this sounds plaumble "problem of liberty in France." Now, this sounds plansible enough. Yet it is, unfortunately, but too visible how little true it is that these deliberative bodies, "discussing and "voting budgets," and "standing at the side of the "hierarchy of authority," are really "independently cross-Is not the other organisation first on the st " nised." and does it not preside over the organisation of its rival Is not the Mayor there already, with his "hierarchy of so thority" under him, to influence the election of the Munic Council? Does not the Prefeet, with his "hierarchy of authority," always preside, with an anxious sense of resp can Liberty, after the exercise of this vigilant and paternal authority, be said to be "independently organised ?" afraid the utmost the Duke can say for the communal, departmental, and national liberties which stand "at the side of the corresponding "hierarchies of authority" would be that they are, at least, something more than mere nomine of that authority-that, under exceptional circumstances, a recently in Paris and some of the great cities, the liberties can gain a voice, even through the obstructions which the hierarchies of authority interpose.

That the Duke, in fact, recognises how greatly the Fre authorities outweigh the French liberties, is evident, we think, from his apology for the interference of the Administration with the freedom of the Press. It cannot be said, without mockery, that that liberty is " independently organised," mockery, that that liberty is "independently organized, when may not even deliberate freely with itself as to the changes needed in the Empire and the men best calculated to cary these changes into effect. The people that is neither perwhich mitted to meet, to discuss, nor to read freely concerning p cal events has, if it has its liberty organised at all, a liberty that isorganised very dependently indeed, ---- namely, within such very narrow limits as the pre-existing "hierarchies of authority" choose to admit. Instead of keeping authority from interferi with liberty, and liberty with authority, according to the Duke's ideal, the truth is that authority defines and limits by its own arbitrary judgment the practical amount of liberty to be conceded to its rival,—and probably often concedes far less liberty than would be consistent with the wish of the spring of the whole system of government,-the will of the Emperor himself. For it is the main disadvantage of that discretionary liberty conceded spontaneously by a wise despois Government, that it must practically be doled out, not by the large thought of a man above petty considerations, but by the hands of subordinates who are far too proud of power to part with it willingly.

We do not say, though we hope and believe, that France is yet ready for any more liberal plan of Constitution ; but we do say that the Duc de Persigny in this speech did in effect throw but a thin veil of rhetoric over the actual situation. How little in reality the absolute power of the Emperor is modified by anything that deserves to be called liberty in France, the Due de Persigny is evidently only too painfully aware.

BOARD OF TRADE TABLES.

Norwithstanding the high range in the value of money in the discount market, the official returns showing the extent of our export trade continue favourable. The shipments of home goods and produce during the first seven months of the present and two previous years were valued as follows :-

		6
1862	***************************************	69,446,480
1863	*********	75,663,037
1864		92,441,950

From the above comparison, it appears that our exports this year, compared with the corresponding period in 1868, have

[Sept. 3, 1864.

THE ECONOMIST.

July 31, 1863 and 1864 :-

ed 16,778,9131. Compared with the same time in 1861, the increase amounts to 22,995,4701. The figures for July only are as under :--

 1862
 12,13,801

 1863
 13,668,840

 1864
 14,394,864

 1865
 14,394,864

 1866
 14,394,864

 1866
 14,394,864

 1866
 14,394,864

 1866
 14,394,864

 1862
 14,394,864
 745.5241, and with 1862, 2,262,5631.

In the import trade, the improvement is somewhat rapid. The six months' importations of foreign and colonial produce are thus returned in value :---

£ 69,849,574 81,208,938 98,610,176 1902 1868 1864

Being an increase, compared with 1863, of 17,401,238*l*, and with 1862, of 29,401,238*l*.

The re-exports of foreign and colonial produce in the seven enths were on a fair average scale. Those of the principal uticles were :---

	1642.	1868.		1864.	
Coffee	27,770,900	 83,895,578		41,292,924	
Dottonewts	1,131,693	 1,223,842		1,341,342	
Inickaliver	542,845	 733,811	-	1,645,588	
Rice	619,558	 879,243		1,008,857	
Pepperlbs	6,891,038	 5,898,244		6,962,108	
769	16,416,505	 12,157,765		16,986,469	
Tebacco, unstemmed	8,350,865	 4,582,954		7,723,165	

In silk, spirits, wine, and wool, there has been a deficiency supared with previous years. The following table shows the increase and decrease in the

erports of the principal articles in the first seven months of the present and past year :--

CROPS AND PROSPECTS.

<text><text><text>

THE ECONOMIST.

[Sept. 3, 1864.

and pulse-is remarkably well got up, is greatly in the stock-keeper's favour.

In this connection, it may not be amiss to refer to a discussion at the Dorchester Farmers' Club on "the relative advantages of fattening sheep, cattle, or pigs on light land farms," where the introducer of the subject and all the speakers who followed him, while admitting the importance of feeding stock on such farms, seem to have concurred in stating that, as the rule, there is little direct profit obtained from feeding any kind of stock, and that the return for the outlay thereby incurred must be looked for in increased grain crops. These points must not be overlooked when we find landowners and other non-practical people talking about stock as the substitute for grain.

Since writing the above, a run by railway to Southampton has enabled us to observe the state of the country along that lice. The smallness of the wheat stacks strikes one as a general indication of the effect of the dry summer, the barley stacks, however, on the lighter lands being in better proportion to the size of the fields. The turnip fields are here and there better planted than we expected to see, and it is obvious that, with a moderate share of rain in September, there will not be so great a deficiency of roots as has been feared. The only crops now remaining in the fields are the beens in the stronger land districts, and the second-out clover. The latter is commonly very light, but between Basingstoke and Winchester there is one field of clover as fine as possible. It is apparently intended for seed, and though the plant is not long, the "heads" are splendid, and the return of seed must be considerable. Everywhere the work is getting forward, and the stubbles are being ploughed up with great rapidity. One advantage of the dry season will be the ploughing of the stubbles in the dry weather, a process which is of immense value to the land throughout the ensuing year. The rain has ceased, and the quantity which fell on Wednesday is scarcely sufficient to afford any appreciable relief to our droughty fields.

Literature.

TRANSACTIONS OF THE NATIONAL ASSOCIATION FOR THE PRO-MOTION OF SOCIAL SCIENCE. Edinburgh Meeting, 1863. Edited by GRONGE W. HASTINGS, LL.B., General Secretary of the Association. London: Longmans. 1864.

IT was natural that the meeting of the Social Science Association at Edinburgh should have been the occasion for treating several questions more peculiarly affecting Scotland. Among these discussions, some of the most generally interesting are those relating to education. The papers of Dr George Lees and Mr Badenoch, advocating an increase of evening and elementary teaching in the Scottish universities, and the counter-papers of Dr Bryce and others, elicited instructive discussions on the proper function of universities, and their relation to the whole educational system of a nation. The tendency to over-run the highest stage of teaching with subjects belonging properly to the lower grades, and thus to overwork the professors and retard the superior class of students, was combated with much spirit and force by Professor Blackie, and its true remedy was pointed out very clearly in the paper of Dr Bryce, on "A Grammar School Bill for Scotland, the necessary complement of the Universities' Act." As Frofensor Blackie showed, the middle schools of Scotland had been neglected altogether,—those schools which, as John Knox had laid down in his "Book of Discipline," should be the necessary stepping-stone from the parish school to the university. "Scotch-mer had as for demonstrate the school to the university. men had so far degenerated that it was thought a great point of excellence that Scotch lads were able to jump from the parish school to the college. Till that idea was given up, they would have no proper university teaching;" for its consequence was that the university had to do all the work of grinding the raw youths who came up from the parish school Another phase of this who came up from the parish schools. Another phase of this subject is brought out in a very excellent paper by Mr W. S. Dalgleish, on "Local Examinations for Scotland." He states that Dalgleis Dagressi, on "Local Examinations for Scottand." It is states that there is a widely-prevailing desire in Scotland for the introduction of a system of university certificate examinations, on a similar plan to that adopted by Oxford and Cambridge; that the Universities of Edinburgh and Glasgow both passed unanimous resolutions, a few years ago, in favour of such a scheme; and that a large number of influential Scottiah merchants and manufacturers ladded their support to it. But the scheme for the parameted to the a large number of influential Scottish merchants and manufacturers pledged their support to it. But the scheme first proposed to the University of Edinburgh was disapproved by that body, and the movement has not, apparently, made much regular progress since. The desire for it is, however, still strong. Some schools even and their pupils to England to take part in the Oxford exami-nations; and the Dandee High School has entered into arrange-ments with the University of St Andrew's to have the pupils ex-amined, both in writing and ging now, by University cominger ments with the University of St Andrews to have the pupils ex-amined, both in writing and viva voce, by University examiners. Mr Dalgleish wishes to see the four Scottish Universities combine together to prepare a system of local examinations for Scotland, and to appoint a Board of Examiners, " care being taken that the

education in Scotland. There are also two interesting papers on Foreign Education, one by Mr Cornelius Walford, tracing the history of education in the United States, and giving the statistics thereof from the census of 1850 (the census for 1860 being, as yet, deficient on that head); and the other by the Rev. R. Burgess, on the education of the poor in France, especially in the Protestant communities. The details of this latter paper bear melanchelv witness to the tyranny of Church and State under the present $a_{i}a_{i}$ —a tyranny against which the conductors of the Protestant schools have made a brave stand, and with so much discretion as to achieve partial nuccess. The history of the persecutions they have encountered since 1850 reads like a page from the annals of the last century, and the motive of the authorities is only too evident, viz., to keep the populace in hopeless ignorance. The contrast afforded by this paper to the one on American schools is peculiarly striking.

paper to the one on American schools is provening the security of the one of American schools is provening the security of the spectrum is a paper by Mr J. Campbed Smith, eulogising the Scottish Marriage Law, was followed by an interesting discussion, in which the writer's arguments were ably combated by most of the speckers. Mr Hastings put the relative merits of the Scotch and English systems in a clear light by pointing out that the question between them is, which of the two reduces the chances of deception t a minimum? "Now, it seemed to him that a law which provided that a marriage contrast should be made in some recognised plate, in presence of witnesses, and at certain hours, and, above all, that it should be registered, was a law which gave much greater certainty than a law which left the contract in such a state as that it became matter of litigation or of question whether the parties were married at all." There seemed to be a general feeling in the meeting in favour of the appointment of a Boyal Commission to inquire into the subject, and report on the practicability of assimilating together the three marriage systems of England, Scotland, and Ireland into one homogeneous plan. Among the other papers will be found many valuable reports of facts and suggestions for good, which we mustlesse y philanthropists of both sexes. We cannot pass without a word of regret the opening Address of Lord Brougham. It is a clear mistake to introduce political summaries at all on such occasions, but that a President of Lord Brougham's antecedents should have gone out of his way to caluminate with blind fury a great and him dred nation in the most trying crisis of its existence, is doubly lamentable. It is to be hoped that such offensive utterances will not again disturb the calm and thoughtful deliberations of this excellent Society.

The provided of the properties could not be formed without authorisation of the Government, and without accepting veratious regulations:--commercial companies are to be relieved, in part at least, from the harassing restrictions to which they are subjected, and greater liberty to be accorded to the spirit of association in commerce--the Chambers of Commerce are to be allowed more latitude as regards the disbursement of their funds and the au-diting of their accounts---the abaliton of imprisonment for commercial and civil debts is to be effected. Finally, a com-mission has instituted inquiries into the state of merchant shipping and the result of its labours will soon be made known, and inquiries into the propriety of abolishing the usury laws, and the monopoly and the result of its labours will soon be made known, and inquiries into the propriety of abolishing the usury laws, and the monopoly of brokers are teing carried on. Such is what the Minister described as the programme of the Government. It is all that could be desired, and the steady and vigorous execution of it would render greater services to France than the maintenance of large armies and fleets, the defence of the "sacred rights of nationa-lities," and the "emancipation of peoples."

A French gentleman who has made an attentive examination of the cotton crop of Egypt of the present year, has addressed a letter to one of the newspapers, in which he states that, after taking into account all the circumstances by which it may be taking into account all the circumstances by which it may be affected, he has come to the conclusion that the yield of it will be about 2,500,000 cantars, that is one-third more than that of last year. Some authorities in Egypt, however, affirm that it will be 3,500,000 cantars, and others reduce it to 2,100,000; but the letter writer for reasons he gives holds them all to be in error. Letters from the vineyard districts of France represent that almost everywhere the vines have suffered more or less from drought, and in some places from oidium also. It is remarked that of late years the importations of wool into France has not kept pace with the export of woollen tissues. Thus in the first six months of the present year the value of wool im-ported was in round figure: \$9,500,000f; in the same period of of last year 96,500,000f, of 1862 70,500,000f; and of 1863

72,500,000f; whilst the exports of woollen tissues was in the first six months of the present year 161,000,000f; of 1863, 120,500,000f; 1862, 92,500,000f; and 1861, 83,500,000f. A project is on foot for establishing a "Societe Generale d'Avances sur titres," that is a bank for making advances on deposit of shares and other securities. The institution is ropre-sented to be a perfect novelty in banking business, and is destined to be of great utility; but the Bank of France, and all other banks public and private, already make loans on security of shares. &c. shares, Sec.

shares, &c. From Castoms returns published to-day, it appears that in the first seven months of the present year, the value of imports taken for consumption was 1,379,565,000f, and in the corresponding periods of 1863, 1,348,827,000f; of 1862, 1,283,554,000f; and of 1861, 1,381,433,000f; and that the value of exports of French production was in the first seven months of 1864, 1,702,916,000f; of 1863, 1,430,751,000f; 1862, 1,231,745,000f; and 1861, 1,090,735,000f. A steady increase in the imports and exports testifies to the excellent working of the commercial treaties and reforms; whilst the large excess of exports above imports must confound the Prohibitionists and Protectionists, seeing that they always confidently predicted the exact contrary.

seeing that they always confidently predicted the exact contrary. The precious metals are not included in the preceding totals. The following is a detail of the imports and exports in the first seven months of the present year, compared with the correspond-ing periods of the two previous years :--

THE ECONOMIST.

Deducting the excess of exports of silver from the excess of im-ports of gold, it will appear that in the first seven months the stock of precious metals increased by 2,373,746*l*. As to the amount sent to the East, it was 1,379,004*l* in gold, and 128,144*l* in silver to Egypt; 3,654,184*l* in silver to British India, and 254,400*l* in the last metal to China. In the whole, 5,315,732*l*.

The death of M. Enfantin, famous for his connection with the Saint Simonian school of political economy, is announced in the newspapers. His name will rest in the annals of France.

WHEAT.—At Paris, resterday, little was done. New wheat is now generally presented in the market. Yesterday, choice new was 29f to 29f 50c the sack of 120 kiloga; first quality, 27f 50c to 27f 75c; ordi-nary, 26f to 26f 50c. Commercial wheats went at 27f to 29f. Some new wheats were offered at 27f, 27f 50c, and 28f, but they were few

anry, 26f to 26f 50c. Commercial wheats went at 27f to 29f. Some new wheats were offered at 27f, 27f 50c, and 28f, but they were few buyers.
Corrow.—At Have, in the week ending Friday, business was languishing, in consequence of reports of a pacific arrangement being possible in America. The total sales were 6,010 bales and picula, and the arrivals were 4,200. The stock was estimated at 57,730 bales; at the corresponding date of last year it was 28,800. The brokers fixed the closing quotations at 21 hover for United States sorts, 2f to 51 lower for Surat, 5f for Tinnovelly, Madras, and China; other sorts unchanged. Low New Orleans was consequently 370f the 50 kilogs; and good ordinary sorts.—In Broach, 285f; Tinnovelly, 285f; Madras, 280f; China, 225f; Jacmel, 375f. This week, the market has been calm. Yesterday, Madras was 235f to 240f; China 225f, and for delivery 215f to 232f 50c; Omarwattee, 282f 50c; June, 3276.
Corres.—At Have, in the week ending Friday, the sales were 5,220 sucks Hayti, Port-an-Prince, Jacmel, Joremie, &c. at 81f 50c to 85f the 50 kilogs in bond; 2, 400 ditto brown, for delivery, 82f to 82f 50c; 50c; 990 Rio washed, 55f 50c to 80f; 169 ditto for delivery, 84f to 86f 50c; 990 Rio washed, 55f 50c to 80f; 169 ditto for 99f; 1,700 Rio, not washed, disposable, 78f 50c to 90f; 110 Rio Nunez, 89f; Cayes, 82; Malabar, 88f 50c. At Nantea, last week, there was as ale by auction of some damaged Hayti and 79f; Rio Nunez, 39f; Cayes, 82; Malabar, 88f 50c. At Nantea, last week, there was as ale by auction of some damaged Hayti and 79f; Rio Waner 18f 50c and 118f. At Marseelles, Rio 80f, 85f, and 84f 25c.
Stoam.—At Haver, in the beginning of the week ending Friday, but a fall of rain, which week, Rio 80f, 85f, and 84f 25c.

CONOMIST. 	An INCREASE OF Public Deposits of	527 017
	A DECREASE of Other Deposits of	640,410
	No change in Government Securities.	
	An INCREASE of Other Securities of	196,631
	An INCREASE of Bullion of	148,282
	An INCREASE of Host of	216,030
	A DECREASE of Reserve of	79,168
-		

The decline in the amount of the private deposits with the addition to the private securities, mark the change in the character of the money market, although the change is partly accounted for by the increase in the public deposits usual at the quarter. The increase in the stock of coin and bullion is 142,282*l*, but the amount of the reserve is less by 79,168*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1854 :—

In the corresponding week of 1854, intelligence had been received of the loss of large numbers of the allied troops in Varna by cholera. A severe action had been fought at Kars, in which the Russians had retained the advantage. The money market in London had become a little more active. In 1861, the Bank rate had been reduced from 6 to 5 per

In 1861, the Bank rate had been reduced from 6 to 5 per cent., the demand for money having fallen off. Shipments of warlike stores and remittances of American securities to New York were beginning to supersede the export of gold against the breadstuffs purchased after the failure of the harvest in 1862. The Italian loan for 20,000,000*l* had been opened in Turin, and was understood to have been subscribed. The promise made by the Sultan of Turkey of considerable reforms, had caused a rise in Turkish stocks. Proposals for loans had been issued by the Republic of Venezuela and by that of Peru for 1,000,000*l* and for 5,000,000*l* respectively at 63 and at 93 per cent. The further issue of 1,097,600*l* Egyptian stock had also been advertised at $84\frac{1}{2}$ per cent.

In 1863, intelligence had been received of the riots produced in New York by the effort to enforce the conscription. Apprehensions of war to which it was expected that the Polish insurrection might lead, with the various other influences under which money was rising in value, operated on the markets, and combined to depress the prices of securities. The Confederate reverses in America had also acted prejudicially on market values of stocks here. The Conference of the Princes at Frankfort-on-the-Maine had been opened. The refusal sent by the King of Prussia to the invitatory note which had been addressed to him by the Emperor of Austria and the Princes had been published. The amount of the "other" deposits, as compared with

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1854, a deficiency of 4,775,154*l*; in 1861, a deficiency of 5,505,272*l*; in 1862, a deficiency of 4,668,336*l*; and in 1863, a deficiency of 5,730,588*l*. In 1864, the deficiency is 7,090,495*l*. DISCOUNT AND MONEY MARKET.—The money market has

DISCOUNT AND MONEY MARKET.—The money market has become rather more agitated with the approach of the 4th of the month. The unfavourable tendency of the Eastern exchanges, with the prospect of shipments of coin to Egypt within a short space of time, have increased the anxiety with

which the future was regarded. The applications at the Bank "moderate," but the terms outside are to-day reported as must be regarded as $\frac{1}{2}$ to $\frac{1}{2}$ per cent. higher than those quoted last week. The current rates on paper at different periods are subjoined :-

demand for money, which has to-day commanded $6\frac{1}{2}$ to 7 per cent. from day to day on Government securities.

The following are the allowances on deposits by the discount houses and joint stock banks :---

At Hamburg, money has become rather easier, but in Amsterdam an advance in the Bank rate has been announced.

Subjoined are the discount quotations in the chief continental cities :

	SI C		

Bullion .- Of the large amounts received during the week, a comparatively small sum, including 44,000*l*, to-day, has been sent into the Bank.

The Bank of France return for the week gives the following results, as compared with that last published :-

INCREASE.	£	
Bank notes	92,220	
Treasury account	104,000	
Current accounts DECREASE.	466,640	
Cash in hand	50,000	
Advances	20,000	

ENGLISH GOVERNMENT FUNDS .- Additional heaviness has been the only feature in the markets. The deliveries of stock consequent on the extensive sales by which the dealers' books have been overloaded, press on already overburdened accounts, which are hardly affected by the small investments of the which are hardly affected by the small investments of the general public. Consols were quoted $88\frac{1}{2}$ to $88\frac{5}{8}$ on the open-ing of the markets to-day, but by a succession of sales were forced down to $88\frac{1}{4}$, at which price they close "rather buyers." Disappointment at the nature of the Bank return published this morning, and which it was expected would have been more favour able, has been alleged as the chief cause of the decline, but there can be little doubt that the extreme sensitiveness of the market is entirely owing to an over-supply of stock. For October account, Consols are quoted 883 $88\frac{2}{3}$; and for money, $88\frac{1}{4}$ to $88\frac{2}{3}$. New 3 per Cents. and Reduced, 86 to $86\frac{1}{4}$. India 5 per Cents., $103\frac{3}{4}$ to 104.

India bonds and Exchequer bills continue heavy, the sus-tained high rate of money being against securities on which so low a rate is to be realised.

FOREIGN STOCKS .- Spanish and the Passive stocks have again been in favour, and a rise of 1 per cent. in both has been established since last week. The general tone of the foreign markets has been firm, and, notwithstanding the extreme depression of the English Government stocks, there is to-day comparatively little reaction from the high quotations current last evening in foreign securities. Turkish of all de-scriptions continue good. Mexicans have varied compara-tively little. The closing quotations of stocks dealt in to-day tively little. The closing quotations of stocks dealt in to-day are subjoined:--6 per Cent. Buenos Ayres, 91 to 93; Greek, 24 to $24\frac{1}{2}$; Mexican, $28\frac{1}{4}$ to $28\frac{1}{2}$; New ditto, $25\frac{3}{4}$ to $26\frac{1}{2}$; Moorish, 92 to 94; 3 per Cent. Portuguese, $47\frac{1}{4}$ to $47\frac{3}{4}$; 3 per Cent. Russian, 1859, $54\frac{1}{2}$ to $55\frac{1}{2}$; 5 per Cent. ditto, 1862, $87\frac{3}{4}$ to $88\frac{1}{4}$; 3 per Cent. Spanish, $49\frac{1}{4}$ to $\frac{3}{4}$; Passive, $31\frac{1}{2}$ to $31\frac{3}{4}$; Certificates, 14 to $14\frac{1}{4}$; 6 per Cent. Turkish, 1854, $90\frac{1}{2}$ to $91\frac{1}{4}$; ditto 1858, 69 to $69\frac{1}{2}$; ditto 1862, 70 to $70\frac{1}{3}$; 4 per Cent. Guaranteed, 99 to 100; 5 per Cent. Italian, $66\frac{1}{4}$ to $66\frac{3}{4}$. The closing price of Three per Cent. Rentes, telegraphed from Paris this evening, is 66.75, showing an advance of nearly $\frac{1}{2}$

Paris this evening, is 66.75, showing an advance of nearly $\frac{1}{2}$ per cent. above the quotation of Friday last week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :-

RAILWAYS AND OTHER SHARES .- The settlement of the account in progress during the early part of the week, and the subsequent depression in the Consol market, have occasioned a further decline in the prices of railway stocks. Great Eastern has fallen $\frac{1}{2}$ per cent. Great Northern "A" stock is lower, and Great Western is still flat. Lancashire and Yorkshire notes } per cent. decline. London, Chatham, and Dover is steady. London and North-Western and London and South-Western are both dull. Metropolitan is lower, and the quotation of Midland has also gone back. South-Eastern notes a fresh decline.

The foreign share markets have been dull, without much alteration in prices, or much business. Indian and colonial stocks have not declined so much as

the Government securities, but the investments making are not very numerous.

Miscellaneous shares are heavy. The unsettled condition of the money market causes many realisations, and is an obstacle to the contraction of fresh loans. Hence many of the recent creations have fallen to a discount.

Subjoined is our usual list of the closing prices of the principal railway shares on last Friday and this day :

January.

EXCHANGES .- The exchanges are this evening more favourable to this country; but there was a marked indisposition to take bills in several cases, which partly accounts for the change.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion

Pirley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:— Gold.—The arrivals of gold since our hast circular of the 25th ult. have been large, and comprise.—City of Manchester, from New York, with 26,000/; Africa, from New York, with 5,500/; City of London, from New York, with 6,000/; Shannon, from West Indiee, with 437,000/. Of the above amounts, about 226,000/ consisted of eagles, and as there has not been any demand for this coin, that sum, together with about 5,060/ in fine gold, has been sent into the Bank. The balance of the imports has been taken for refining purposes. The Delhi has taken 27,900/ to Bombay, and we look forward to a resumption of shipment of sovereigns to Egypt ere long.

a coordination of the senter into the bank. The balance of the imports has been taken for refining purposes. The Delhi has taken 27,900/ to Bombay, and we look forward to a resumption of shipment of sovereigns to Egypt ere long. Silver-The Delhi has taken 413,950/ from Southampton for Bombay, and this amount will be increased to over a million sterling by the ahipments to be made at Marseilles. Our market is still very firm, and although quiet for to-day, the price is likely to be well maintained, as transactions to a considerable extent have been entered into for the next two or three succeeding mails. The Shannon has brought 192,000 from the West Indies, and the portion consisting of fine silver has been sold at 61 gd per oz standard, and the Dore at 61 13-16ths per car atandard, and these ratos may be considered decidedly firm. Maxican Dollars.—The Shannon has brought about 840,000/ from the West Indies, and the Plantagenet is reported as being off Liverpool with about 80,000 more. In spito of the high exchange reported from China, the price of dollars there was lower, and the accounts not at all favourable for the shipment of large sums. There being now over fire millions of dollars on the markst, a considerable decline in price is expected ere the whole can be placed. Exchanges on India for Bank drafts at 60 days' sight is again firmer, and may be quoted 1s 11 gd to 2s 0 gd for Calcutta, and 2s 0 gd to 2s 0 gd for Bombay. Demand bills on Bombay are 2s 0 gd. I for 5 per Cents. Quotations for Builton.—Cold.—Bar price; ditto, gold, refinable, 77s 10 per oz std, last price; Spanish doubloons, 76s per oz std; bar, 102 per oz. Silver—Bar silver, 5s 1 gd per oz std; bar, 102 per oz std; bast price; Spanish doubloons, 76s per oz std; bar silver, containing 5 grs gold, 5s 1 gd per oz. Has fild per oz. FALURES AND MERCANTLE EMBAREASMENTS.—The failure of Messrs John Willis and Co., of Liverpool, commission agents, is announced, but the liabilities are said to be small.

of Messrs John Willis and Co., of Liverpool, commission agents, is announced, but the liabilities are said to be small. At a meeting of the creditors of Messrs Ford, Curtis, and

Curtis, ship provision merchants, who recently failed, the un-secured liabilities were stated at 63,000*l*, and the assets 18,000/. An adjourned meeting is to be held on the 6th September, to consider the best means to realise the estate.

A first return of 31 per share is announced to the proprietors of the Unity Bank, by Mr Howell, the accountant to the liquidators of the Company.

A meeting of the creditors of Messrs Woodward and Pod-more, wholesale sugar dealers, whose failure was recently an-nounced, was held yesterday. The statement showed liabilities to the amount of 32,9631, and assets 16,2021. It was resolved that the estate should be wound up under inspection, and the inspectors have called on Messrs Woodward and Podmore to execute an assignment, or to make a declaration of insolvency.

The bills of Messrs Nathaniel Palmer and Co., East India and general merchants, of Cullum street, have been returned.

-The meeting of the London Bank of PUBLIC COMPANIES .-Seotland, called to confirm resolutions for an amalgamation with the Mercantile and Exchange Bank, was held on Monday. The resolutions were all confirmed.

The Alliance National Land and Investment Company (Limited) is to be altered to the Estates Bank (Limited). Resolutions approving of the change have been passed by the proprietors.

The seventy-ninth half-yearly meeting of the General Steam Navigation Company was held on Tuesday. The report of the Directors was adopted, and the usual dividend at the rate of 10 per cent. per annum declared.

At the meeting of the Ottoman Financial Association on the 30th inst., it was resolved to increase the capital from 1,000,000l to 2,000,000l, to be issued in 20,000 new shares of 50l each. 10,000 are to be distributed to applicants within the limit of the Ottoman Empire, and the rest at the discretion of the Directors.

At the meeting of the European Bank (Limited) held on Wednesday, the Directors' report was adopted, and a dividend, as recommended, of 2s 6d per share free of income tax, was declared payable.

The prospectus of the Chilian Mining and Trading Company (Limited) has been issued. It is proposed to work two copper mines of considerable value in Chili.

MISCELLANEOUS.—Messrs H. Boulton and Co. advise the General Credit and Finance Company from La Guayra, 9th August, 1864, that they have received the following amounts :--

			COIS	. 0
La Guayra, up to	Saturday,	6th August	 6,824	40
Puerto Cabello,	_	30th July	 6,618	82
Ditto,	-	6th August	 9,005	62

22,448 84 Messrs Baring and Co. announce the receipt of advice from their agent in Venezuela, under date of the 9th ultimo, as follows :-

Received on account of 55 per cent. of the import duties assigned to the bondholders :--

Messrs Baring Brothers and Co. have received as follows on

account of the Mexican debt -64,479.86 dols. 169 shares of the Riga and Dunaburg Railway have been drawn for repayment at the third drawing at Riga on the 10th-22d of last month.

The tenders sent in for 270,000l Queensland Government 6 per cent. debentures were opened on Wednesday at the Union Bank of Australia. The official minimum was declared at par, but only 33,000l had been tendered for at and over that price.

At the monthly auction of the Passive debt at Madrid on the 31st ultimo, the prices fixed by the Government were 2nd class exterior 31.50; 1st class interior, 40; 2nd class interior, 27. Tenders were made at 33.25 to 35, of 2nd class exterior, and 26.20 2nd class interior. No 1st class interior stock was offered.

At the second drawing, yesterday, of the Confederate Cotton Loan, 174 bonds, representing 66,500*l*, were drawn, and are published for redemption at par.

COMPARATIVE EXCHANGES.

COMPARATIVE EXCHANGES. The quotation of gold at Paris is about 24 per mille premium, and the short exchange on London is 55.27 per 16 stering. On comparing these rates with the English Mint price of 31 17s 104d per cunce for standard gold, it appears that gold is nearly 2-10ths per cent. dearer in London than in Paris. The course of exchange at New York on London for bills at 60 days' sight is quoted 2764 to 278 per cent.; and the premium on gold 1554 to 157 per cent. Gold still continues to arrive in moderate quantities.

The Commercial Times.

POSTAGE ON LETTERS, &C., FOR MAURITUS, BY FRENCH PACKET.-Arrangements have been made with the French Post Office by which Arrangements have been made with the French Post Office by which, on the 8th September next, and thenceforward, letters and printed papers may be forwarded to Mauritius by the French line of mail packets, at the same rates of postage as are chargeable on letters and printed papers sent via Marseilles, for conveyance by British packet. Letters, &c., intended to be forwarded by these packets, must specially addressed "by French mail packet from Marselles." The postage may either be paid in advance, or left to be paid on deliverr, at the option of the sender. sende

Interest of part and a sample for the sender. INLAND PATTERN AND SAMPLE POST.—The modified rules for the transmission of patterns and samples of merchandise, posted in the United Kingdom for delivery therein, are now in operation, the reduc-tion being one-third at each step in the previous scale of charges, the new rates being for a packet of patterns or samples not exceeding 4 oz in weight, 2d; exceeding 4 oz, but not exceeding 8 oz, 4d; 8 oz, but not exceeding 16 oz, 8d; 16 oz, but not exceeding 24 oz, 1s.

COMMERCIAL EPITOME.

FRIDAY NIGHT. The supply of English wheat on sale at Mark lane to-day, was The supply of English wheat on sale at Mark lane to-day, was very moderate, and the demand both for red and white qualities ruled steady, at full currencies. Foreign wheat, however, changed hands to a limited extent, at late rates. The barley trade was firm, and in onts-the supply of which was large-a full average business was transacted, at extreme quotations. Beans and peas were firm in price. Flour was in moderate request, at quite pre-vious rates. The week's imports amount to 11,810 quarters of wheat; 9,690 barley; 52,940 easts; and 9,860 barreis of flour. At Liverpool, this morning, the corn trade was quiet. Inferior qualities of wheat sold at 1d per cental less money. and flour was

At Liverpool, this morning, the corn trade was quiet. Inferior qualities of wheat sold at 1d per cental less money, and flour was rather cheaper. Maize was dull, on easier terms. The wheat trade at Wakefield was very inscive, at about previous rates. The Liverpool cotton market, under the influence of somewhat pacific rumours from America, has been very quiet, and the total sales only reach 39,600 bales. Of this quantity, spinners have taken 25,300 bales, exporters 10,500, and speculators 2,800 bales. Prices, however, have ruled firm, American qualities being ¹/₄d per lb dearer than on Friday last, whilst other descriptions have fairly supported this day's currency. To-day, the market closes with a dull appearance. a dull appearance. with

During the fortnight preceding July 22, the cotion trade at Calcutta was in a sluggish state, and prices declined to the extent

of 8 annas per maund. During the fortnight ending July 27, the cotton trade at Madras was very quiet. In the early part of that period, the

emistion for Western produce declined to 330 to 335 rupees per andy. Subsequently, however, prices improved, and the latest price was 344 rupees, or 19d per lb. The total export from Jan. 1 to Jane 30, amounted to 172,671 ewts., against 152,470 ewts. during the same period in 1863, and 93,234 ewts. in 1862. With respect to the probable export for the year, and the quantity of and under cotton cultivation in the Madras Presidency, Messra Dymes and Co. observe:—"The highest export as yet in any one month this seeson has been 20,000 bales, and estimating this rate up to the 15th October, would only give a total export of about 129,000 bales from the 1st January to Great Britain, against 126,530 bales in 1863 same period. Making every allow-ance, therefore, for storing, there appears little doubt that the erop is very little if at all larger than last year, notwithstanding the increased area sown. The statement of the extent of land under cultivation in this Presidency according to Government returns up to the end of May shows 1,782,345 acres against 1,301,356 acres in 1863, or an increase of 481,000 acres, which, under ordinary circumstances, should have given us a crop at last one-third larger than last year." Advices from Shanghai are to July 4. During the fortnicht

Advices from Shanghai are to July 4. During the fortnight preceding that date there was increased activity in the demand for cotton, on rather higher terms. Fair quality was quoted at 20 to 20.5 taels per picul. From the interior, very favourable accounts had been received in reference to the crop, and supplies of sew produce were expected at market at an early date.

At Yokohama, during the fortnight ending June 27, the de-mand for cotton ruled active, at 17 to 174 taels per picul.

The transactions in cotton at Hong Kong, for the fortnight ending July 11, amounted to 15,100 bales, consisting of 12,500 bales Ningpo and Shanghai—the former at 32 to 33, the latter at 31 to 32 dols; and 2,600 bales Japan, at 35 to 36 dols per picul.

The supply of good and fine cotton on sale at Alexandria, and the date of our latest advices, viz., Aug. 18, was same and the The supply of good and nue cotton on sale at Alexandra, at the date of our latest advices, viz., Aug. 18, was very small, and such commanded high rates. For inferior produce there was a steady demand, at very full prices. Inferior qualities realised 24.75d to 284; middling to good middling ditto, roller-ginned, 29.75d to 31d; good middling to fair, 31d to 31.75d; middling to good middling ditto, open-ginned, 31.75d to 32.25d per lb, free on board. The following table of exports is from Messrs Briggs and Co.'s circular :--

ars of COTTON from ALEXANDRIA from Oct. 1 to Aug. 16.

According to Messrs Ellison and Heywood's circular, the quan-According to Arcess Einson and Heywoods circular, the quan-ity of East Indian and China cotton afloat, on the 26th of August, was 559,650 bales, against 417,420 bales at the same period in 1863. The estimated stock of cotton in Europe on the 1st ult., we learn from the same source, was 358,480 bales, against \$22,050 bales in 1863, and 236,600 bales in 1862.

With the exception of plantation Ceylon coffee, the demand for which has continued steady, at quite last week's currency, the arkets for colonial and foreign grocery produce have been very quiet, and where changes have taken place in prices, the movement has been in favour of buyers. Compared with Friday last, how-ever, the rates current to-day, show no material variation.

The arrivals of new teas at the leading Chinese ports, at the date of our latest advices, were by no means extensive. The quality of the produce was but middling, and whilst good and fine teas realised somewhat enhanced prices, inferior descriptions detes realised somewhat enhanced prices, interior descriptions de-clined in value, to the extent, in some instances, of 2 taels per picel. The shipments to Great Britain, from June 1 to July 11, stood thus :--From Canton, 1,653,600 lbs; from Fuhchau, 11,226,300 lbs; from Shanghai, 7,716,900 lbs, making a total of 20,596,800 lbs, against 17,282,539 lbs last season, or an increase of 3,314,261 lbs.

From Havana, to August 4, we learn that the sugar trade was quiet. At that date, Messrs Morales and Co. quoted prices as follows :---Cucuruchos, Datch numbers, 8 to 10, 25s 4d to 25s 11d ;

ordinary yellows, ditto, 11 to 12, 26s 6d to 27s 1d; mid-ding ditto, 13 to 14, 27s 9d to 28s 4d; fine ditto, 16 to 16, 28s 11d to 30s 1d; florete ditto, 17 to 19, 30s 8d to 32s 6d; ordinary whites, 30s 1d to 31s 4d; middling ditto, 31s 11d to 33s 1d; fine and florete, 36s 1d to 38s 6d per ewt, free on board. At Madras, during the week ending July 27, the sup-plies of sugar were readily disposed of at 24s 7d per ewt; for average quality. The sugar trade at Kingston, Jamaica, on the 8th ult., was steady, at 25s to 26s per 100 lbs for fair, and 25s for very fair quality.

Letters from Columbo, dated the 1st ult., speak favourably of the new crops of coffee. The business doing, both in plantation and native produce, was very small, and prices had, in some in-stances, given way. Plantation produce was quoted at 13s 6d per bushel; native, unpicked, 50s 6d to 51s; ditto, picked and dried, 56s to 57s per cwt. The annexed table of shipments is from Messrs Fryer, Schultze, and Co.'s circular :--

Cape, W. Prov. 1 5 2 1...1 4 1 9.... In the English wool trade there is less activity, and prices have a drooping tendency. Russian hemp is in somewhat improved request, at fall prices, clean Russian being quoted at 32/10s to 35/ per ton. Flax rules firm. Jute is less freely offered, and is firm in price.

The wool trade at Liverpool, last month, write Messrs Ronald and Son, was very quiet. In prices, however, scarcely change took place. Extra public sales of East India produce scarcely any announced to be held from the 8th to the 14th inst., during which period about 12,000 bales will be offered.

Messrs Grant, non-of last month, observe :- "A fair extent of sales have been emotion in most descriptions, and the market has presented a very firm appearance, especially for good and fine classes of Western strips. Offers have been declined for fine old strips of spinning quality at or advance on outside quotations. Sales for the month may be Offers have been declined for fine out strips of spinning 1 may be an advance on outside quotations. Sales for the month may be estimated at 1,121 hhds, viz.—464 hhds Kentucky leaf, 158 hhds strips, 2 hhds Virginia leaf, 13 hhds and tierces of strips, and 484 hhds of Maryland and Ohio. Demand has been almost ex-clusively confined to good and fine qualities, and holders reluctant sellers unless at full quotations. For exportation, a steady business has been transacted. Imports, 2,018 hhds; deliveries, 1,167 hhds, instant 1 121 hhds in the corresponding month of last year; stock, against 1,131 hhds in the corresponding month of last year; stock, 16,461 hhds, against 17,820 hhds in 1868, 20,169 hhds in 1862, 26,530 hhds in 1861, 17,997 hhds in 1860, and 15,089 hhds in 1869, against 18,000 hds in 1859.

In 1859." Scotch pig iron has advanced to 58s 9d cash, mixed numbers. Tin is firmer, but for other metals the trade is quiet. The stock of spelter on the 1st inst. was 10,900 tons, against 12,090 tons on Aug. 1, 1864, and 5,384 tons on Sept. 1, 1863. The oil trade has continued flat. Tallow, however, is firmer, and P.Y.C. has rea-lised 42s 9d to 43s per cwt on the spot. The following table re-lates to Banca tin in Holland :-

In the early part of the week, cotton was in improved dema and advanced prices were paid, particularly for American, but since Tuesday the business has been very limited, and the quota-tions generally are now barely as high as on last Friday. In American, a considerable business has been done, partly for export for New York and microscher alle all the the the the n, but

In American, a considerable business has been done, partly for export to New York, and prices close fully ³/₄d per lb higher than on Friday last. For Sea Island the inquiry has been limited, at previous rates. In Brazil, Pernam has been in demand for export, and firm in price. Maceio ensier, though in fair request, while Maranham has been scarce, and rather higher. In Egyptian, there has been a fair amount of business, but prices are barely supported. For Smyrna the inquiry has been fair, without mate-rial change, but the difficulty of selling low qualities continues The demand for East India has been moderate, and, with a liberal supply on the market, a partial decline of 1d per lb has been sub-mitted to. China has been very dull, and the inferior grades are The transactions "to arrive," and for future delivery, have

increased during the last few days, to arrange sales before the close of the month, and on terms equivalent to the general course of the market, the last quotations were for Paraiba, lins quality, ship named 30 - Dhollerah and Broach, fair native, ex quay 23 - Dhollerah, fair new merchants', September delivery 23 - April and May shipment 23 - Fair new, April shipment 23

-Broach, fair new, ex quay 23. The sales of the week amount to 39,360 bales, including 2,830 on speculation, and, 10,540 declared for export, leaving 25,990 bale to the trade.

The sales to-day are about 4,000 bales, chiefly to the trade, with a dull market.

The quantity of East India cotton now affoat is about 476,000 bales, against 365,000 bales last year.

LONDON-SEPT. 2.

Sales of cotton, from Friday, 26th August, to Thursday, 1st Saptember, inclusive:—50 bales Broach, at 21d for middling fair; 90 bales Dhollera, 20d for fully middling; 70 bales Kurrachee, 15d for fully middling to 17d for good fair; 120 bales Tinnevelly, 17d for middling, 194d for fully middling fair, 204d for fair, and 28d for fully good fair; 1.737 bales Western, 174d to 184d for middling, 204d for middling fair, 204d for fully fair; 290 bales Bengal, 165d for middling fair and 164d for fully fair; 730 bales China, 18d to 184d for fair; 270 bales Japan, 16d all faults, and 20 to 204d for fully fair—total, 3,492 bales. 20d to 201d for fully fair-total, 3,492 bales.

Although a fair amount of business has been transacted, the market has been dull throughout the greater part of the week, the buying having been chiefly to meet contracts for August delivery. In public sales, yesterday, 250 bales Northern and Western Madras, mostly middling and seedy cotton, were sold without reserve at 12¹/₂d to 17¹/₂d; 15 bales sawginned were bought in at 22¹/₂d; 40 bales Western Madras were bought in at 15¹/₄d to 21d; 72 bales damaged Japan were bought in at 13³/₄d to 17d; 50 bales China were bought in at 16d; and 8 bales Penang since weld at 21d per lb. sold at 21d per 1b.

The sales in London have been 638 bales on the spot, and 500

NEW YORK-AUG. 20.

NEW YORK—Are. 20. The cotton trade at this port continues very firm. During the present week, about 5,300 bales have changed hands, and prices have advanced 7 cents per lb. The quotation for midding Upland produce is 180 cents per lb. The receipts from all quarters this week have amounted to 2,704 bales, of which 1,177 bales are from New Orleans, 7C3 from Matamoras and Aspinwall, 198 from Bombay, and 84 bales from Liverpool. The remaining quantity ame from North Carolina and by rail. The total import since Aug. 1 has amounted to 8,317 bales, and since Sept. 1 to 279,193 bales. The export, from Aug. 1 to Aug. 16, was 564 bales, squinst 186 last year. Mexican cotton has sold at \$1.75 per lb. Annexed are the quotations:—

and the the dane	NEW Yo Upland.	DEK CL	Assirio	Mobile.	Orleans Tozas.

NEW YORK-AUG. 22.

The cotton market shows increased firmness, and a further advance has taken place in prices, middling Upland being quoted at 182 cents per lb.

MARKETS IN THE MANUFACTURING DISTRICTS.

Only a limited amount of business has been transacted in goods during the present week. On the whole, however, prices are well supported. Yarns continue very high. The iron trade has been heavy, but large quantities of coals have been disposed of, at steady currencies

MANCHESTER, Sept. 1.—This market has continued very dull, and a little more weakness has become perceptible as the weak passed on. The India accounts received on Monday were just as and a little more weakness has become perceptible as the week passed on. The India accounts received on Monday were just as favourable as they were expected to be, reporting the opening of the Bombay season with a rise of about 1s per piece, thus tending to equalise that market with the rates at which business had been doing generally elsewhere. However, no impression has been produced here, werebants seeking to reduce their stocks rather than enlarge their risks, in view of the uncertainties which over-hang the end of the year. Of these, setting aside the agitation as to American elections, the most important appear to rest on the prospective receipt at an earlier period than usual, especially from Egypt, of very full season's crops of cotton. Some small sales have sgain occurred of Teloths, shirtings, and madapollams, of the better qualities, but chiefly at a slightly lower price than last week. Yara are also again the tura against the seller. COMPARATIVE STATEMENT OF THE OUTON TRAPS.

... 22 6 19 0 17 3 9 0 9 0 9 0 ards. 9 ibs BRADFORD.—The tone of the wool market is extremely quiet, but not less cheerful than last week. Buyers, however, only supply their actual needs; transactions very limited, and the price paid is in most cases a little against the seller. Yarns—Spinners ind their contracts are gradually expiring, and as their machinery is more at liberty are somewhat more willing to meet the views of buyers. Export buyers can buy in many instances more advan-tageously. Prices of all kinds of piece goods are slightly in favour of the buyer, with the single exception of alpaca lustres, for which alone there is a good demand.

LEEDS.—To same extent, buyers' operations are prevented by the scarcity of some kinds of goods. Superfine plain cloths can scarcely be met with, and the best unions are so rarely offered that there are cases in which an advance of 6d and 64 per yard has been gladly given. Of sealskins, black and brown, there is likewise by for too small a quantity to enable buyers to enter into transactions with confidence transactions with confidence

ROCHDALE.—The greatest demand is for middle and low quali-tics of flannel, of which there is little stock in the hands of pro-ducers. Manufacturers of both plain and fancy goods are fully employed. Yorkshire goods sell well, but the high prices de-manded rather check sales. The local wool trade is active, and prices very firm. LEICESTER.-

LEICESTER.—The hosiery trade continues in a very healthy and satisfactory condition. There has been a brisk demand for most classes of goods, and manufacturers are well employed finishing

goods to order. The yarn market remins very firm. NOTTINGHAM.—The lace trade continues flat. Most branches of cotton goods meet a dull inquiry. There is hardly so much doing in black silk laces and narrow edgings, and very little or no improvement in the demand for silk quillings and silk Mechlins. The hosiery trade is, on the whole, healthy. Yarns are firm at high price. high prices. BARNSLEY.-

BARNSLEY. — The inquiry for all descriptions of coal in the South Yorkshire district has been better. The inquiry for the metro-polis is good, and the tonnage for Silkstone large.

poils is good, and the tonnage for Shikstone large. BIRMINGHAM.—In the foreign department a very good amount of business is being done, much larger than is usual at this season. The colonial trade generally is good. There is a steady demand for material; the rolling mills are well engaged, and the electro-platers, tin-plate workers, edge-tool makers, and hollow-ware manufacturers are all in a similar position. In the gun trade there is more business doing. is more business doing. SHEFFIELD.—There are considerable orders in hand for files,

saws, and edge tools for Russia, and more business is being done with Germany. The French market for sheet and manufactured goods is, however, still languid. An average trade is being done with Spain, Italy, and Belgium. The home markets continue quiet

THE ECONOMIST.

Sept. 3, 1864

DUNDEE.—There is no change to notice in our flax market. Holders show rather more disposition to meet buyers, and in some cases would make some concession in prices. Jute continues quiet, but there is, if anything, a better feeling in the trade. In yarns, very little has been done. The demand for linens has been moderate, but manufacturers have still full employment on previons orders.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

MEMICAN GRAIN AND FLOUR MARKEIS. New York, Aug 20.—The recepts of flour having fallen off to a slight extent, rather more activity has prevailed in the demand for most descriptions, and prices of State and Western produce have advanced 10 to 15 cents per barrel since our last. Other descriptions are somewhat dearer, but not in the same proportion. In the whest trade there have have not in the same proportion. In the wheat trade, there has been increased animation, and good and fine spring qualities have changed hands at about 3 cents per In the wheat trade, there has been increased animation, and good and fine spring qualities have changed hands at about 3 cents per bushel more money. Corn bas moved off somewhat freely, on rather higher terms. Annexed are the prices now current:— Flour—State, superfine brands, §3.10 to §3.50; State, extra brands, §10 to §10.05; State, choice brands, §10.10 to §10.15; Ohio, common brands, §10.50 to §10.75; Ohio, fancy brands, §10.80 to §10.85; Ohio, good and enoice extra brands, §10.90 to §12; Michigan, Indiana, Wisconsin, &c., §9.10 to §10.45; Genesee, extra brands, §10.55 to §11.50; Missouri, §10.25 to §15; Canada, common, §10 to §10.25; Canada, good to choice brands, §10.30 §12 per barrel. Wheat—Chicago spring, §2.15 to §2.34; Mil-waukee Club, §2.17 to §2.34; amber Milwaukee, Iowa, &c., §2.35 to §2.38; winter red Western, §2.35 to §2.44; amber Michigan, §2.45 to §2.50. Corn—Western mixed, §1.54; unsound ditto, §1.50 to §1.53 per bushel. The amount of business doing for ex-port to Great Britain is but moderate. Freights in American vessels are very dull. The current rates for grain charters (neutral flag) are 6s for cash for orders, and 5s to 5s 6d to direct ports in the United Kingdom. NEW YORK, Aug. 22.—The supplies of wheat and flour on sale are but moderate. Although the export demand is by no means active, the trade continues firm, and prices have further improved. Corn commands rather more money. Excoust of Gans, &c., from NEW YORK from August 16.

Corn commands rather more money.

LONDON MARKETS. STATE OF THE CORN TRADE FOR THE WEEK.

MARE LARE, FRIDAY EVENTED. Since our last, very moderate supplies of home-grown wheat have come to hand, but the general condition of the supply con-tinues remarkably fine. For both red and white samples, the have come to hand, but the general condition of the supply con-tinues remarkably fine. For both red and white samples, the demand has been far from active, yet previous rates have been supported. The show of foreign wheat has been large. Good and fine qualities have moved off slowly, at about stationary prices. In other kinds, so little has been doing that the currencies must be considered almost nominal. There has been a moderate in-quiry for barley, at last week's quotations. The malt trade has not improved. Prices, however, continue to be well supported. Oats have changed hands to a fair extent, at the late improvement in value. Beans and peas have been in short supply and fair request, at very full prices. request, at very full prices.

Harvest, at very ant process. Harvest-work is now nearly concluded in all parts of England. The new wheats thrash out well, and, with very few exceptions, they are of remarkably fine quality. Barley is turning out a good The new wnears thrash out well, and, with very iew exceptions, they are of remarkably fine quality. Barley is turning out a good crop, and in many quarters outs yield a large return. Beans and peas, however, are very deficient in most counties. The continental markets have been less firm for wheat, but an

The continental markets have been less firm for wheat, but an extensive business has been doing in barley and most other kinds of produce on English account. In America, the value of wheat and flour continues to fluctuate considerably. The potato crop has improved considerably during the last ten days, and most of our correspondents state that it will be much larger than it was at one time anticipated. At present, there are no traces of disease amongst it. In Scotland, harvest-work is progressing rapidly, and most accounts agree instaing that the crops generally are an average. The various markets have been inactive, yet prices may be con-sidered steady.

The various markets have been inactive, yet prices may be con-sidered steady. There has been a moderate business doing in wheat in the Irish Other articles have realised full quota-

s, at steady rates. Other articles have realised full quota-The bulk of the grain crops has been carried in good con-

At Mark lane, to-day, there was a fair demand for r At Mark lane, to-day, there was a fair demand for most descrip-tions of English wheat, at the rates current on Monday. In foreign wheat, however, a limited business was transacted, yet prices ruled stationary. The barley trade ruled firm, at full currencies; whilst for oats, there was a steady sele, at fully late rates. Beans and peas changed hands at extreme quotations. The flour trade was steady, at full prices. Mr. George Dornbusch reports the arrival off coast of 126 vessels laden with grain. Included in that number are 36 cargoes

of wheat, 54 maize, 9 barley, and 13 cotton seed. About as an rage business has been passing in most kinds of produce; any theless, in some instances, prices have had a drooping tender Cotton seed has sold at 7! 7s 6d to 7 10s per ton. The London averages announced this day are :--

 POSTSCRIPT.
 FIGAR CVENTOR.

 Stored only a small portion found buyers.
 257 casks for hops parted by a small portion found buyers.
 257 casks for hops parted by a store only a store onl

ADDITIONAL NOTICES. Revenue Sugar. — There is no material alteration to note with respect to refined market as regards prices: the demand very moderate — if arything prices are rather in favour of buyers. Dutch crushed is very Gardi very little demand.

Gauge furt very little demand. Gauge Frurr.-Lemons support the high value received of late, and mpplies are likely to be limited for some time to come. The last cargo of West India pine apples have been received per "Jessie," landed in had condition, and sold by Keeling and Hunt, at public sale, at prices in character with the same. Barcelona nuts well supported. Par. dull. a dull.

are dull. Dar FRUIT.—New Valencia raisins have advanced 1s since the open-g price. The arrivals are very small, and the demand about takes f each cargo as it has come in. Currants are very dull, and rather wor than last week. New will be here next week. ing price.

off each cargo as it has come in. Currents in the set of the set o

son's ging

week. SIL.-Market very firm, at previous quotations. TORACOC.-Our market has presented no material change during the past week. There still exists a fair demand for American growths of ins better descriptions, both for home trade and exportation. ILLATHER AND HIDDES.-The transactions in leather during the past week how very little change; in extent they are about equal to the recent average, and the articles chiefly required are of the same description as for some time past. The supply at Leadenhall was moderate, and the articles chiefly wanted were crop hides of the lightest weights, and those of about 45 lbs, thin common English butts, English bellies, light common and light shaved hides, and light calf skins. Prices were unaltered.

METALS.—A moderate business has been done in most branches of metals during the week. Copper has been inquired for, and the cheaper parcels have found buyers. Iron is unchanged. Tin has strengthened from the depression of last week. Lead has been more in demand at 5s a ton advance. Spelter is quiet. Tin plates neglected. TALLOW.—Official market letter issued this evening:—

METROPOLITAN CATTLE MARKFT.

METROPOLITAN CATTLE MARKFT. MONDAY, Aug. 29.—The total imports of foreign stock into London, last week, smounted to 15,361 head. In the corresponding week in 1863 we received 16,797; in 1862, 11,579; in 1861, 10,988; in 1860, 13,707; in 1859, 12,659; and in 1858, 19,673 head The arrivals of beast fresh up to this morning's market were large. Selected breeds moved off steadily, at full prices; otherwise, the beef trade was in a sluggish state, on former terms. The best Scots realised 5s per 8 lbs. The supply of English sheep was very moderate, and the quality of most breeds was but middling. Downs, half-breds, Kants, &cc. sold readily, at full currencies. All inforior sheep met a dull inquiry, at last week's prices. The top figure was 55 4d; but in some instances, very prime Downs realised 5s 6d por 8 lbs. The lamb season is now nearly closed. The fow lambs on sale found buyers at 5s 6d to 6s 4d por 8 lbs. Calves, the supply of which was moderate, moved off slowly, at late rates, viz, from 4s to 5s per 8 lbs. Prime small pigs advanced 2d per 8 lbs, but large hegs were dull, at late rates. Suprements of the stock of the

HOP MARKET.

. HOP MARKET. BORGUGH, Monday, Ang. 29.—Small quantities of new growth arrive daily, and meet with buyers at prices ranging from 6/ 10s to 8/ 10s. The quality of the largest portion of the early arrival is excellent, and promises well for the character of the growth. The late rains materially benefited the healthy portions of the plantations, and will improve the quality and colour of the growth. Continental reports are more favour-able.

able. FRIDAX, Sept. 2.—The plantation accounts are more favourable, and the demand for hops rules heavy. In prices, however, compared with the last report, very little change has taken place. New hops are selling at 6/ 10s to 9/ per cwt, the quality of the crop being very fine.

POTATO MARKET.

BOBOUGH, Monday, Ang. 29.—The supply of home-grown potatoes on sale has decreased, but the imports of foreign produce, though small, are larger than for some weeks past. For all qualities the trade is firm, and prices have advanced 10s to 20s per ton. Kent and Essex Regents, 90s to 140s; Shaws, 70s to 100s; foreign, 50s to 80s per ton. FRIDAY, Sept. 2.—Moderate supplies of potatoes are on sale, for which the trade is slow, at from 80s to 130s per ton.

HAY MARKETS.-THURSDAY, Sept. 1. SMITHFIELD.-Meadow hay, 4/0s to 6/0s; clover, 5/0s to 7/0s; and straw, 1/8s to 1/12s per load. A fair demand. WHITECHAPEL.-Meadow hay, 4/0s to 6/6s; clover, 5/0s to 7/0s; and straw, 1/8s to 1/12s per load. Trade firm. CUMBERLAND.-Meadow hay, 4/0s to 6/10s; clover, 5/0s to 7/0s; and straw, 1/8s to 1/12s per load. Supply moderate.

COAL MARKET.

FRIDAY, Sept. 2.—Haswell, 19s—Hartlepol, 19s—Heugh Hall, 18s 6d —Kolloe, 18s 6d—Hetton Lyons, 17s 6d—North Pelton, 13s 9d—Bebside Hartley, 18s 6d. Ships at market, 25; at sea, 55.

WOOL

(FROM OUR OWN CORRESPONDENT.) FRIDAY, Sept. 2.—There is no change to notice in our market, as the business done this week has again been to a limited extent only. An extra series of East India sales will commence next week on the An extra series of East India shi asta series of case thing ships will commence next wook of the 8th inst., and last until the 14th inst., when about 12,000 bales will be brought forward.

CORN.

(FROM OUR OWN CORRESPONDENT.) FRIDAY, Sept. 2.—Moderate attendance. Wheat sells to a fair extent at about Tuesday's rates, some qualities 1d lower. Flour quiet and a turn easier. Indian corn slow sale, and prices lower. Beans steady. Oats aad oatmeal moderate demand.

The Gasette.

The Railway Monitor.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS .- The traffic receipts of railways in the United Kingdom amounted, for the week ending the 20th of August, == 11,400 miles, to 705,109/, and for the corresponding week of last year, on 10,900 miles, to 643,817/, showing an increase of 436 miles, and of 61,292/in the receipts. The gross receipts on the 14 principal railways an ted in the aggregate, on 8,023 miles, to 508,5091, and for the correspondent week of 1863, on 7,843 miles, to 465,770l, showing an iner 180 miles, and 42,739l in the receipts.

RAILWAY AND MINING SHARE MARKETS. LONDON.

LONDON. MONDAY, Aug. 29.—In the share market to-day, the amount of bas-ness was unimportant, and the variations from the closing prices of Saturday were few, except in the case of the banks, but in nose of the descriptions do the variations show any material average change. In English railways, Great Northern improved 1; and Blackwall and Metropolitan declined $\frac{1}{2}$ each, and Midland $\frac{1}{2}$. In colonial, Grand Trank of Canada receded $\frac{1}{2}$. In foreign, Lombardo-Venetian improved $\frac{1}{2}$; and Dutch-Rhenish declined $\frac{1}{2}$. In American, Panama Railroad (second mortgage) advanced 1; and Illinois Central paid-up shares declined $\frac{1}{2}$. In British mines, East Carn Brea improved $\frac{1}{2}$. In foreign mines, no movement occurred.

In Drivin Image, Dase Carl Dres Improved 2. In Portian Image, as movement occurred.
TUESDAY, Aug. 30.—In the share market to-day, the transactions were few, and chiefly for the account. The variations from the cleaing prices of yesterday show a slight tendency to depreciation in American railways, British mines, and the principal financial Companies, but as average alteration in the other descriptions. Of the English railways, Great Western (Western (West Midland, Oxford) advanced & ditto (Hereford) and Caledonian ½ each; and South-Eastern declined 3, North-Western 4, Great Western (original), and Lancahire 1 and Yorkshire 2 each, and Metropolitan and Midland a further 1 each. In colonial, Scinde receded 4. In foreign, Ottoman advanced 4, and Sambre and Meuse declined 4. In American, Erie shares (pair mark), south Caradon were finally quoted 20 higher, North Wheal Orofity 1 higher, and East Carn Brea a further 1 higher; and West Ston declined 7, Wheal Seton 5, East Bassett 14, and Great Wheal Vor, Th Croft, and West Bassett 2 each. In foreign mines, United Mexican improved 4, and Cape Coppor declined 4.

Croft, and West Bassett ½ each. In foreign mines, United Mexican improved ½, and Cape Coppor declined ½. WEDNESDAY, Aug. 31.—In the share market to-day, the business was of a merely nominal amount, and, except the lower quotations, are dir, in several of the English railways, banks, and miscellaneous share, the alterations in the closing prices were unimportant. Of the English lines, North-Eastern (Leeds) and ditto (York) improved ½ each, and Great Western (West Midland, Oxford) a further ½; Caledonian relapsid ½; Glasgow and South-Western declined 1, North British (Edinburg), Perth, &c.) Å, and Lancashire and Yorkshire a further ½; and the fo-lowing are now quoted ex div., viz.:-Bristol and Exeter, Great Northern (of all descriptions), North-Western, South-Western, Metro-politan, Midland (of both descriptions), North London (of all descrip-tions), South Devon, and South-Eastern. In coloinal and foreign rai-ways and foreign mines, not a single movement occurred. In American, Illinois Central shares (paid up) further receded 1, and ditto (ordinar) ½. In British mines, Grenville and East Grenville improved ½ each East Carn Brea relapsed ½, and East Lovell receded 4. In misceli-neous, Gredit Foncier and Credit Mobilier improved ½ and 1 respe-tively; National Steam declined ½, Smith, Knight, and Co. ½ at Imperial Mercantile Credit ½; Berlin Waterworks, English and Ausim-lian Copper, Rhymney Iron (of both descriptions), and Submarise Telegraph are respectively quoted ex div.; International Financial closed ½ lower at 4½ to 4½ prem, Land Securities at 4 dis. to 4 prem, General Credit 4: 10 Hyperne, Societe Generale Ottomane at 2 w 24 prem, Anglo-Egyptian Bank at 24 to 2½ prem, and Imperial Mercan Railway at 16 ½ to 17, Egyptian Trading at 15 to 15 prem., Coni-mental Union Gas at 1 to 14 prem, Societe Generale Ottomane at 2 w 24 prem, Anglo-Egyptian Bank at 24 to 24 prem, and Imperial Mercan Railway at 4 to 5 prem.

24 prem., Anglo-Egyptian Bank at 27 to 27 prem., and 19 Railway at \$ to \$ prem. THUERDAY, Sept. 1.—In the share market to-day dulness was again the chief feature, and, with the exception of a slight tendency is depreciation in banks and miscellaneous shares, there was no alteration of tone in either of the descriptions. Of English railways, Lancashir and Yorkshire recovered \$, North-Eastern (Berwick) advanced \$, an North-Western and Midland \$ each; and Blackwall, North Staffort-shire, and South-Eastern declined \$ each. In colonial, Scinde advanced \$, and Great Western of Canada shares (of both descriptions) \$ each; and Indian Branch receded \$. In foreign and American railways and foreign mines no movement occurred in the closing prices. In British mines, East Grenville further improved \$. FanDAY, Sept. 2.—The railway market was heavy to-day, and mes of the principal stocks declined in value. South-Eastern stock was prominently flat, and experienced a further fall of 5 per cent. Cal-donian receded \$, Great Northern, London and South-Western, and Midland \$, and London and North-Western, Lancashire and Yorkshire and upward tendency. Other foreign, as well as Indian and Canadian lines, ruled inactive.

PROFESSOR ANDERSON will commence his extraordinary perform at St James's Hall on Monday next.

ABRIDGED PROSPECTUS. This Company is formed for the purpose of purchasing inverking two copper mines in Chill called "Desco-tions" and "San Pedro," and of acquiring certain making freshold premises, plant, and stores, together with an existing trade in connection therewith at the prise Chanaral and Pau d'Asucar.

pete of Chanarai and Pau d'Asucar. Arrangements have been made for the purchase by the Company of the Descutridora mine for £135,000, and of the San Pedro mine and other property for fission. The vendors will sitks amount of one-fourth of the parkase money will be deforred until the titles mal be approved, and the properies actually vested in the Commany or its moninees, neording to the laws of CML. No promotion money will be paid by the Com-par.

The following is a description of the mines :-

The following is a description of the mines :--DECUBRIDORA The following is a description of the mines :--DECUBRIDORA This mile is about 18 millies from the port of Pau d'ancar, to which there is a good road. It has been which also about 28 millies from the port of Pau d'ancar, to which there is a good road. It has been out 20 to 90 feet wick. Near the surface it produced per duced about 0.--third metal. There is also an massisse of yellow subplures which yield 25 per cent. d'opper. The levels have been opened on the loads bar 20 to 90 gellow subplures which yield 25 per cent. d'opper. The levels have been opened on the loads bar 20 to 90 gellow subplures which yield 25 per cent. d'opper. The levels have been opened on the loads bar 20 to 90 gellow subplures which yield 25 per cent. d'opper. The levels have been opened on the loads bar 20 to 90 gellow subplures which yield 25 per cent. d'opper. The levels have been opened on the loads to explain about 25 no 90 feet in width, and consists the substantial solut 25 per cent. of metal. BAN PEDRO This miss is for 00 fast in width, and consists the substantial. The bottom the print of Chanaral, 10 former years ap., and has been opened to the depth of both 40 fast. It has been rich from the surface; the set of inflammed. The average width of the loads is support the spart of the loads is very rich, has the deal and four dull productive of ore of a support bay agrees shaded the tow the surface; the set of induced and the loads are of the loads is very rich, bar of a start of the load in its very rich, bar of a start of the load is a very rich, bar of the surface is a road the surface; the set of induced and four dull productive of ore of a support the spart as mass the set of the surface is a road bar of open start of the loads is very rich, bar of the surface is a road the surface of the support bar open start of the loads is of the support bar open start of the loads is a sto the support bar open start of the loads is a star

Warms two hours cany oraws the watch where the cost of drawing. The sensing the ore far more than the cost of drawing. Since the contract for the purchase was made very froundale intelligence has been received from this mine as. In entiting through some ground to expedite the sking of the new shaft a course of rich ore has been intersected through which the agent reports that 13 feet have been diven. The ore is a sold mass of the best quality, being above 30 per cont. Ta shad be stated that, independently of 'that part of the lods which yields ore of the rich quality is not ore at a lower quality, which yield from 12 to 15 per ent. of copper, and only require pressing to prepare bem for exportion. There is also a haft such from the staffs shabut 50 fathoms cast, and entirely indepen-dent of per sent workings, and wrought to a depth of these staffs fathoms, which have one a vast quantity of exet, at least equal in quality. Both these mines are held under grants from the Chilin Government. There is also a staff such that duty of £5 per cont. Is payable on all copper ore exported from the sourity. Not leas than £80,000 has been expended on the

Channe towerstates is payable on all copyes of 25 per cent. is payable on all copyes from the country. Not less than .230,000 has been expended on the plant and machinery at the mines, and on the various
