**HIERACIUM PILOSE'LA.** The systematic name of the *Auricula Muris, or Mouse-ear, Pilosella, Myosotis, (F.) Piloselle, Oreille de Souris.* This plant contains a bitter, lactescent juice; which has a slight degree of astringency. The roots are more powerful than the leaves.

**HIERAX, Accipiter.**

**HIERBOTANE, Verbena officinalis.**

**HIEROGLYPHICA, from 'ιερως, 'holy,' and γλυφω, 'I carve.'** A name given to the signs employed in medicine; and also to the folds in the hands, feet, and forehead, which afford Chiromanly its pretended oracles.

**HIEROPYRUS, Erysipelas.**

**HIMAS, 'ιμας, 'a thong of leather.'** The uvula; likewise, elongation and extenuation of the uvula. It is also called *Himantosis, Himantoma.*

**HIMANTOSIS, Himas.**

**HIP, Haunch—h. Bone, Ischium—h. Joint, Coxo-femoral articulation—h. Tree, Rosa canina,**

**HIPPACĒ, 'ιππακη.** A cheese prepared from

mare's milk. *Cu'seus Equinus,*—from 'ιππος, 'a horse.'

**HIPPANTHIRO'PIA, from 'ιππος, 'a horse,' and ανθρωπος, 'a man.'** A variety of melancholy, in which the patient believes himself changed to a horse. The Greek word 'ιππανθρωπος means the fabulous Centaur.

**HIPPASIA, Equitation.**

**HIPPEA, Equitation.**

**HIPPEUSIS, Equitation.**

**HIPPIATRIA, from 'ιππος, 'a horse,' and ιατρικη, 'medicine,' (F.) Hippiatrique.** A science, whose object is the knowledge of the diseases of the horse, and of other domestic animals.

**HIPPOCAM'PUS MINOR, Unguis, Un'cifera Em'inece, Collie'atas carca posterioris ventriculo'ram laterali'um, (F.) Ergot, Éperon.** A medullary tubercle or projection, observed in the posterior cornu of the lateral ventricle of the brain.

**HIPPOCRAT'IC, Hippocrat'icus.** Relating to Hippocrates, or concerning his doctrine,—as *Hippocratic doctrine, Hippocratic face, &c.*

**HIPPOCRATIST.** A partisan of the Hippocratic Doctrine.

**HIPPOPATHOLO'GY, Hippopathologia, from 'ιππος, 'a horse,' παθος, 'a disease,' and λογος, 'a discourse.'** A knowledge of the diseases of the horse. Pathology of the horse.

**HIPPOSTEOLO'GY, Hipposteologia, from 'ιππος, 'a horse,' οστεον, 'a bone,' and λογος, 'a discourse.'** Osteology of the horse.

**HIPPOT'OMY, Hippotomia, from 'ιππος, 'a horse,' and τεμνειν, 'to cut.'** Anatomy of the horse.

**HIPPURIS VULGAR'IS.** The systematic name of the *Horse's Tail or Mare's Tail, Equisetum minus, Equisetum, (F.) Prêle, Preste, Asprele.* It is an astringent, and frequently used, by the vulgar, as tea, in diarrhœa and hemorrhage. The same virtues are attributed to the *Equisetum arven'se, fluxial'ile, limosum, &c.*

**HIPPUS, from 'ιππος, 'a horse; a disease of the eyes, in which, from birth, they perpetually twinkle, like those of a man on horseback. Also, a tremulous condition of the Iris, which occasions repeated alternations of contraction and dilatation of the pupil.**

**HIPPIATR'IQUE, Hippiatria.**

**HIPPOCAMPE GRANDE, Cornu ammonis.**

**HIPPOCAM'PUS MAJOR, Cornu ammonis.**

**HIPPOCRAS, Claret.**

**HIPPOCRATES, CAP OF, Bonnet d'Hippocrate—h. Sleeve, Chausse.**

**HIPPOLAPATHUM, Rumex patientia.**

**HIPPOMONATHRUM, Peucedanum silaus.**

**HIPPOS, Equus.**

**HIPPOSELINUM, Smyrnium olusatrum.**

**HIPS, Sax, heopa.** The fruit of the dog-rose, *Rosa Canina.* (q. v.) They are chiefly used as a confection. See *Confectio Rosæ Canine.*

**HIRCUS, Tragus.**

**HIRQUUS, Canthus (greater.)**

**HIRSU'TIES, Hair'iness, Trichosis Hirsuties.** Growth of hairs in extraneous parts, or superfluous growth in parts; as in cases of bearded women.—Good.

**HIRU'DO, The Leech, Sanguisuga, βδελλα, Bdella.** In medicine, the *Hiru'do Medicinalis,*

*Bdella Medicinalis* or *Medicinal Leech* is employed. (F.) *Sungsuc*. It lives in fresh water, and feeds on the blood of animals, which it sucks, after having pierced the skin with its three sharp teeth. This habit has been taken advantage of, to produce local blood-letting. In applying the leech, the part must be wiped dry; and if there be difficulty in making the leech bite, a little milk or cream may be applied. When satiated, it will drop off, and by applying a little salt to its head it will disgorge the blood. A good English leech will take about half an ounce of blood, including that which flows by fomenting the part subsequently. The American takes less.

HIRUNDINARIA, *Lysinachia nummularia*.

HIRUN'DO, *χελιδων*, *Chelidon*, from *haren'du*, 'sticking;' because it sticks its nests against the houses (?) *The Swallow*. The nests of the swallow were once employed as refu- cients, boiled in vinegar.

HISPANICUM VIRIDE, *Cupri subacetat*.

HISPIDITAS, *Dystæchiasis*, *Phalangosis*.

HISPIDULA, *Antennaria dioicum*.

HIST'OS, 'ιστος, 'the organic texture.'

Hence:

HISTOGEN'IA, *Histog'eny*, from 'ιστος, 'the organic texture,' and γενεαι, 'generation.' The formation of the organic textures.

HISTOLOGY. See *Anatomy*.

HISTORY, MEDICAL, *Histo'ria Medic'ne*.

A narration of the chief circumstances, and the persons connected with them, in the progress of medicine.

HIVES, *Cynanche trachealis*. See *Vari- cella*.

HOG-LICE, *Onisci aselli*.

HOLCË, 'ολχη, a dram.—Galen.

HOARSENESS, *Raucedo*.

HOL'CIMOS, 'ολκιμος, from 'ολχη, 'a weight.' A tumour of the liver.

HOLCUS SORGHUM, *Panicum Italicum*.

HOLERA, *Cholera*.

HOLLANDS, *Gin*.

HOLLY, COMMON, *Ilex aquifolium*—h. Dahoon, *Ilex vomitoria*—h. Ground, *Pyrola umbellata*—h. Sea, *Eryngium maritimum*

HOLLYHOCK, COMMON, *Alcea rosea*.

HOLMICOS, *Alveolus*.

HOLMOS, *Mortar*.

HOLOCYRON, *Tenerium chamæpitys*.

HOLOPHLYCTIDES, *Phlyctæna*.

HOLOSTEUM ALSINE, *Alsine media*.

HOLOSTEUS, *Osteocolla*.

HOLOTON'ICUS, 'ολος, 'the whole,' and τεινω, 'I stretch.' A spasm of the whole body. A variety of tetanus. (q v.)—*Sauvages*.

HOL'YWELL, MINERAL WATERS OF.

H. is a town in Wales; and takes its name from the famous well of St. Winifred. It is a simple cold water, remarkable for its purity.

HOMAGRA, *Omagra*.

HOMEOPATHY, *Homœopathy*.

HOMIOSIS, *Homoiosis*.

HOMME, *Homo*.

HOMO, (F.) *Homme*, Man, the chief and most perfect of the mammalia; in Greek, ανθρωπος, from ανα, 'upwards,' and τρεπω, 'I turn,' because man, alone, of all animals, possesses the natural power of standing erect. He

is, also, the only animal whose incisor teeth, wedged in a projecting jaw, are absolutely ver- tical. Man is especially distinguished from other mammalia by the faculty, which he pos- sesses of classing his ideas; comparing them with each other; and connecting, representing and transmitting them by signs and articulate sounds. He possesses, in the highest degree, all the attributes of intelligence, memory, judg- ment, and imagination. He inhabits all coun- tries,—the burning regions of the torrid zone, and the chilling atmosphere of the polar climes. In different situations, he presents, in his figure, colour, and stature, some differences, which have caused the human race to be divided by natu- ralists into different races or varieties. The number of such races can only be approximated. Cuvier admits but three, the *Caucasian*, *Negro*, *Mongolian*; to these may be added the *American*. Every division must necessarily be arbitrary, and the individuals composing each variety are far from being alike.

HOMŒOPATHY, *Homeopathy*, from 'ομοιος, 'like,' and παθος, 'affection.' A fanciful doc- trine, which maintains, that disordered actions in the human body are to be cured by inducing other disordered actions of the same kind, but only much slighter in degree.

HOMOETHNIA, *Sympathy*.

HOMOGENESIS, see *Generation*.

HOMOIOPATHIA, *Sympathy*.

HOMOIO'SIS, *Homio'sis*, from 'ομοιωσις, 'I re- semble,' 'I assimilate.' An elaboration of the nutritious juice, by which it becomes proper for assimilation. (q v.)

HOMOLINON. See *Apolinosis*.

HOMOL'O GY, from 'ομοιος, 'like,' and λογος, 'a description.' The doctrine of similar parts. Thus, the two sides of the body are said to be 'homologous.' *Homologous* tissues, are those that resemble others; in opposition to the *heterologous* or *heteroelite*, which are new forma- tions.

HOMONOPAGIA, *Cephalalgia*.

HOMOPHAGUS, from 'ομοος, 'raw,' and φάγω, 'I eat.' One who eats raw flesh.

HOMIPLATA, *Scapula*.

HOMOT'ONOS, *Æqualis*, from 'ομος, 'equal,' and τωος, 'tone.' That which has the same tone. Continued fevers, whose symptoms have an equal intensity during the whole course of the disease, have been so called. See *Acma- sticos* and *Synocha*.

HONESTY, *Lunaria rediviva*.

HONEWORT, FIELD, *Sison amomum*.

HONEY, Mel—h. Balsam of, Hill's, see Mel—h. of Borax, *Mel boracis*—h. Clarified, *Mel despumatum*—h. of Roses, *Mel roseæ*.

HONEYCOMB-BAG, *Reticulum*.

HONGLANE, *Coptis teeta*.

HONTEUX, *Pudic*.

HOOK, Sax. hoec, hoec, Dutch hoek, *Uncus*, *Uncinus*, *And yra*, *αγκυρα*, (F.) *Érigne*, *Airigne*, ou *Érine*. An instrument, consist- ing of a steel wire, flattened at the middle, and having the extremities crooked and point- ed. Some hooks are furnished with a han- dle at one extremity—the other having one or two hooks;—constituting the *single* and *double* hook.

The Hook is used by anatomists and surgeons,

to lay hold of, and raise up, certain parts; the dissection of which is delicate, or which would slip from the fingers.

The *Tenaculum* is a variety of the Hook.

The **BLUNT HOOK** is an instrument which is passed over the flexures of the joints to assist in bringing down the fœtus.

**HOOPING-COUGH**, Pertussis.

**HOPITAL**, Hospital.

**HOP-PLANT**, *Humulus lupulus*.

**HOPLOCHRYSA**, from ὄπλον, 'a weapon,' and χρίσις, 'salve.' *Unguentum armarium*, *Armatory Unguent*. A salve which was supposed to cure wounds by sympathy:—the instrument with which the wound was inflicted being anointed with it.

**HOPLOMOCHLION**, ὀπλομοχλίων. The name of an iron machine or apparatus, which embraced the whole body like armour; and the figure of which is given by Fabricius ab Acquapendente.

**HOQUET**, Singultus.

**HORDEOLUM**, diminutive of *Hordeum*, *Barley*; *Sclerophthalmitis*, *Crithē*, a *Stye*, a *Styan*, *Crithidion*, *Crythē*. (F.) *Orgelet*, *Orgeolet*. A small, inflammatory tumour, of the nature of a boil, which exhibits itself near the free edge of the eyelids, particularly near the inner angle of the eye.

**HORDEUM**, *Crithē*. The seeds of the *Hordeum vulgare* or *Scotch Barley* are ranked amongst the *Cerealia*. (F.) *Orge*. They afford a mucilaginous decoction, which is employed as a diluent and antiphlogistic. The seeds of the *Hordeum distichon* and *H. hexastichon* possess similar properties. Barley is freed from its shells in mills; and, at times, is rubbed into small, round grains, somewhat like pearls, when it is called *Hordeum perlatum* or *Pearl Barley*, (F.) *Orge perlé*, and forms the *Hordei semina tunicis nudata*, of the pharmacopœias.

**HORDEUM CAUSTICUM**, *Veratrum sabadilla*.

**HOREHOUND**, *Marrubium*—*h. Black*, *Ballota fœtida*—*h. Germander-leaved*, *Eupatorium tœurifolium*—*h. Stinking*, *Ballota fœtida*—*h. Wild*, *Eupatorium tœurifolium*.

**HORMINUM**, *Salvia horminum*.

**HORN**, *Cornu*.

**HORNSEED**, *Ergot*.

**HORN Y EXCRESCENCES**, *Lepidosia Ichthyiasis cornig'era*, *Cornua cutanea*. (F.) *Cornes de la peau*. Certain excrescences, which occasionally form in some part of the skin, and resemble, in shape, the horns of animals.

**HORRIDA CUTIS**, *Goose-skin*, *Cutis asser'na*. A state of the skin accompanying the rigor of an intermittent.

**HORRIPILATION**, *Horripilatio*, *Horror*, *goizi*, *Phrice*, *Phricas'us*, from *horre're*, 'to bristle up,' and *pilus*, 'hair.' (F.) *Horripilation*, *Frissonnement*. General chilliness, preceding fever, and accompanied with bristling of the hairs over the body.

**HORROR**, *Horripilation*.

**HORSE-CHESTNUT**, *Aesculus hippocastanum*.

**HORSE CRUST**, *Crusta genu equinæ*.

**HORSE RADISH**, *Cochlearia armoracia*.

**HORSE'S TAIL**, *Hippuris vulgaris*.

**HORTULUS CUPIDINIS**, *Vulva*.

**HORTUS**, *Penis*, *Vulva*.

**HOSPITAL**, *Nosocomium*, *Infir'mary*, *Infir'marium*, *Infir'mator'ium*, *Nosodochium*. (F.) *Hôpital*. An establishment for the reception of the sick, in which they are maintained and treated medically, until their health is restored, or they are declared incurable. Hospitals were first instituted about the end of the 4th century; a period at which the word νοσοκομειον was employed, for the first time, by St. Jerome.

**HOSPITAL GANGRENE**, *Phagedæna gangræno'sa*; *Putrid* or *Malignant Ulcer*, *Gangræna Nosocomiorum*, *Hospital Sore*, *Gangræna contagio'sa*, *Putredo*, (F.) *Pourriture* ou *Gangrène d'hôpital*. Gangrene, occurring in wounds or ulcers, in hospitals, the air of which has been vitiated by the accumulation of patients, or some other circumstance. Hospital gangrene—many different varieties of which are met with, and always preceded or accompanied by fever—commonly commences with suppression of the suppuration of the wound, which becomes covered with a grayish and tenacious sanies. The gangrene then manifests itself. It extends from the centre of the ulcerated surface towards the edges; these become swollen, painful, and everted; and the patient dies with all the signs of typhus. The treatment must be varied, according to circumstances. Sometimes, it requires the use of stimulating, acid, caustic, and antiseptic applications; with, occasionally, the actual cautery, aided by the exhibition of tonics, internally:—at others, the antiphlogistic regimen and emollient applications may be necessary.

**HOSTIARIUS**, *Pylorus*.

**HOUBLON**, *Humulus lupulus*.

**HOUNDS' TONGUE**, *Cynoglossum*.

**HOUPPE NERVEUSE**, see *Papilla*—*h. du Menton*, *Depressor labii inferioris*, *Levator labii inferioris*.

**HOUSELEEK**, *Sempervivum tectorum*.

**HOUSE-SURGEON**, *Resident Surgeon*. Usually a senior pupil or graduate, who attends in an hospital, to every accident and disease, in the absence of the regular physician or surgeon. It answers, in the British hospitals, to the *Élève interne* of the French.

**HOUX**, *Ilex aquifolium*—*h. petit*, *Ruscus*—*h. Apalachine*, *Ilex vomitoria*.

**HUDSON'S PRESERVATIVE FOR THE TEETH AND GUMS**. See *Tinctura Myrrhæ*.

**HUILE**, *Oil*—*h. d'Absinthe*, *Artemisia absinthium* (oil of,)—*h. d'Acajou*, see *Anacardium occidentale*.

**HUILE ACOUSTIQUE**, (F.) *Oleum acustiticum*, *Acoustic oil*. An oil for deafness, prepared of olive oil, ʒij, garlic, ox-gall and bay-leaves, each ʒj; boiled for a quarter of an hour, and strained.

**HUILE D'AMANDES**, *Oleum amygdalarum*—*h. d'Aneth*, see *Anethum graveolens*—*h. Animale*, *Oleum animale*—*h. Animale de Dippel*, *Oleum animale Dippelii*—*h. Animalisée par infusion*, *Oleum animalizatum per infusionem*—*h. Anis*, see *Pimpinella anisum*—*h. Aromatique*, *Oleum animalizatum per infusionem*—*h. d'Aurone*, *Artemisia abrotanum* (oil of)—*h. de Cacao*, *Butter of cacao*—*h. de Carvi*, *Carum* (oil)—*h. de Cédrat*, *Oleum cedrinum*—*h. de petits chiens*,

Oleum animalizatum per infusionem—*h. de Corne de Cerf*, Oleum animale Dippelii.

**HUILE DE GABIAN**, Petroleum—*h. de Gérofle*, see *Eugenia caryophyllata*—*h. de Laurier*, Unguentum laurinum—*h. de Lis*, see *Lilium candidum*—*h. de Morelle*, see *Solanum*—*h. de Morue*, Oleum jecinatoris aselli—*h. d'Éillette*, Papaver (oil)—*h. de Ricin*, see *Ricinus communis*—*h. de Succin*, see *Succinum*—*h. Verte*, Balsam, green, of Metz—*h. Douce de vin*, Oleum æthereum.

**HUILES ANIMALES**, Olea animalia—*h. Emphyreumaticques*, Olea emphyreumatica—*h. Essentielles*, Olea volatilia—*h. Fixes* ou *grasses*, Olea fixa—*h. Fugaces*, Olea fugacia—*h. Médicinales*, Olea medicinalia—*h. Volatiles*, Olea volatilia.

**HUIT DE CHIFFRE**. Figure of 8. A bandage in which the turns are crossed in the form of the figure 8. Such is the bandage used after bleeding from the arm.

**HUMECTANTIA**. A name formerly given to drinks, which appeared to possess the property of augmenting the fluidity of the blood.

**HUMERAL**, *Humeralis*. That which belongs to, or is connected with, the arm or humerus.

**HUMERAL ARTERY**, *Arteria humeralis*. See *Brachial Artery*.

**HUMÉRO-CUBITAL**, *Brachialis anterior*—*h. Sus-métacarpien*, see *Radialis*—*h. Sus-radial*, *Supinator radii longus*.

**HUMERUS**, *Scapula*, *ὀμος*, *Omos*, *Armus* (F.) *Épaule*. The most elevated part of the arm. The bones, which concur in forming it, are;—the scapula, head of the humerus and the clavicle, united together by strong ligaments, and covered by numerous muscles.

The *Os HUMERI*, *Humerus*, or *Os brachii*, *Os adjutorium*, *Os brachiale*, *Brachium*, is the cylindrical, irregular bone of the arm; the upper extremity of which has a hemispherical head connected with the scapula; and two *tuberosities* or *tubercles*, a *greater* and *lesser*, for the attachment of muscles, between which is the *Bicipital groove* or *Fossa*. At the inferior extremity may be remarked—the *inner condyle*, the *outer condyle*; the *small head*, which is articulated with the radius; the *trochlea* articulated with the ulna, &c.

The humerus is developed by seven points of ossification;—one for the body; one for the head; one for the greater tuberosity; one for the trochlea; one for the epitrochlea; one for the epicondyle, and another for the lesser head.

**HUMERUS SUMMUS**, *Acromion*.

**HUMEUR AQUEUSE**, *Aqueous humour*—*h. Hyaloide*, *Corpus vitreum*.

**HUMEURS FROIDES**, *Scrofula*.

**HUMIDE RADICALE**, *Humidum radicale*.

**HUMIDUM NATIVUM ARTICULORUM**, *Synovia*—*h. Primum*, *H. radicale*.

**HUMIDUM RADICALE**, *Humidum primigenium*; *Radical Moisture*, (F.) *Humide radicale*. This name was formerly given to the liquid, which, by means of the circulation, was conceived to give flexibility and proper consistence to the different organic textures.

**HUMILIS**, *Rectus inferior oculi*.

**HUMORAL**, *Humoralis*. Proceeding from, or connected with, the humours.

**HUMORISM**, *Humoral Pathology*. A medical theory, founded exclusively on the part, which the humours were considered to play in the production of disease. Although traces of this system may be found in the most remote antiquity, the creation, or at all events, the arrangement of it, may be attributed to Galen, who enveloped it in metaphysical subtleties, relating to the union between the elements and the four cardinal humours.

**HUMORIST**. The Galenical physicians, who attributed all diseases to a depraved state of the humours, or to vicious juices collected in the body.

**HUMOUR**. Every fluid substance of an organized body;—as the blood, chyle, lymph, &c.

The *Humours*, *χυμοι*, *Chymi*, *Humores*,—differ considerably, as to number and quality, in the different species of organized beings; and even in the same species, according to the state of health or disease.

The ancients reduced them to *four*; which they called *cardinal humours*;—the blood, phlegm, yellow bile, and atrabilis or black bile. The modern classification of the humours is given under *Fluid*.

**HUMOUR**, **ALBUGINEOUS**, **AQUEOUS** humour—*h. Articularis*, *Synovia*—*h. Ceruminous*, *Cerumen*—*h. Doridis*, *Water*, sea—*h. Genitalis* seu *seminalis*, *Sperm*—*h. Glacialis*, *Crystalline*, *Corpus vitreum*—*h. Hyaloides*, *Corpus vitreum*—*h. Ovatus*, *Aqueous humour*—*h. Oviiformis*, *Aqueous humour*—*h. Purulentus*, *Pus*—*h. Vitreus*, *Corpus vitreum*.

**HUMP**. Perhaps from *umbo*, 'the boss of a buckler.' *Hunch*, *Gibbus*, *Gibba*, *Tuber*, (F.) *Bosse*. A prominence, formed by a deviation of the bones of the trunk. Commonly, it is formed by the spine or sternum, and is seated at the posterior or anterior part of the trunk. It may, also, be produced by deviation of the ribs or pelvis. The spine may be curved in three principal directions. 1. *Backwards*, and this is the most common case; this the ancients called *κυρτωσις*, *Cyphosis*, *gibbositas*. 2. *Forwards*, *λοφωσις*, *Lordosis*, *recurvatio*; and 3. *Laterally*, *οκλιωσις*, *Scoliosis*, *obstipatio*.

Most *curvatures* occur at a very early age, and are caused by scrofula, rickets, &c.; and, not unfrequently, they are accompanied by caries of the vertebræ. See *Vertebral Disease*.

**HUMULUS LUPULUS**, *Convolutus perennis*; the *Hop-plant*. *Nat. Ord.* *Urticæ*. (F.) *Houblon*, *Vigne du nord*. Its cones or strobiles, *Humuli strobili* (Ph. L.) are having a fragrant odour; and bitter, aromatic taste, depending on a peculiar principle, named *Lupuline*, extractive and essential oil; which may be extracted, equally by water and spirit, from the dried strobiles.

The Hop is employed as a tonic and hypnotic, and enters into the composition of ale and beer.

**HUNCH**, *Hump*.

**HUNGER**, *Fames*, *Limos*, *Peine*, *Esuries*, *jejunium*, *jejunitas*, *esuriatio*, *esuriago*. (F.) *Faim*. The necessity for taking food. Hunger is an internal sensation, which some authors have attributed to the friction between the sides of the stomach in its empty state; others, to the compression of the nerves, when the organ is contracted; others, to the action

of the gastric juice, &c. It is dictated by the wants of the system: farther we know not. See Appetite.

**HYACINTHUS MUSCARI**, *Bulbus vomitorius*.

**HY'ALOID**, *Hyaloides*, *Hyaloides*, *Vitreus*, from 'υαλος, 'glass,' and ειδος, 'resemblance.' Resembling glass.

The **HY'ALOID MEMBRANE**, *Tunica Hyaloidca*, *Membrana Arachnoidea*, *T. vitrea*, is the extremely delicate membrane, which forms the exterior covering of the vitreous humour, and transmits within it prolongations, which divide it into cells. Fallopius discovered this membrane, and gave it the name *Hyaloid*. On a level with the entrance of the optic nerve into the eye, the hyaloid membrane forms, by reflection, a cylindrical canal, which pierces the vitreous humour from behind to before, as far as the posterior part of the crystalline. To this, its discoverer gave the name—*Canal hyaloidicus* or *Hyaloid Canal*.

**HYALOS**, Vitrum.

**HYBOMA**, Gibbositas.

**HYDARTHROSIS**, Hydrarthrus.

**HYDARTHROSIS**, Hydrarthrus.

**HYDATID**, *Hylatis*, *Bulla*, *Aquila*, *Hydroa*, *Tænia hydatig'ena*, *Echinococcus luma'nus*, from 'υδωω, 'water.' This name was long given to every encysted tumour, which contained an aqueous and transparent fluid. Many pathologists, subsequently, applied it to vesicles, softer than the tissue of membranes, more or less transparent, which are developed within organs, but without adhering to their tissue. It is by no means clear, that these formations are really entozoa. They have been found in various parts of the body; sometimes in the uterus, occasioning signs nearly similar to those of pregnancy, but being sooner or later expelled. The expulsion is generally attended with more or less hemorrhage. See *Acephalocystis*.

The word *Hydatis*, *Aq'uula*, *Phlycta'nula*, *Verruca Palpebrarum*, *Milium*, was, also, given to small, transparent tumours of the eyelids.—Galen, C. Hofmann.

**HYDATIDES CERVICIS UTERI**, Nabothi glandulae.

**HYDATIDOCE'LE**, *Hydatoc'le*, from 'υδατις, 'hydatid,' and κληη, 'a tumour.' A tumour, formed by hydatids. Oscheocele, containing hydatids. The *Oscheoc'le hydatido'sa*, of Sauvages.

**HYDATIS'MUS**, from 'υδωω, 'water.' The noise, caused by the fluctuation of pus contained in an abscess.—Aurelian., Foësius.

**HYDATOCELE**, Hydatidocele.

**HYDATOCH'OLOSO**, from 'υδωω, 'water,' and χολη, 'bile.' *Aquoso-bilious*. An epithet given to evacuated matters, when mixed with water and bile.—Hippoer., Foësius.

**HYDATODES**, Aqueous.

**HYDATOID**, *Hydatoides*, *Aqueus*, *Aquosus*, *Hydatoides*, from 'υδωω, 'water,' and ειδος, 'resemblance.' Resembling water. This name has been given to the membrane of the aqueous humour; and, also, to the aqueous humour itself.

**HYDATOIDES**, Aqueous humour.

**HYDEROS**, Anasarca, Hydrops.

**HYDOR**, Water.

**HYDOR**, from 'υδωω, genitive, 'υδατος, 'water.' Hence:

**HYDRACHNIS**, see *Varicella*.

**HYDRÆMIA**, *Hydroemia*.

**HYDRAGOGUES**, *Hydragoga*, *Hydrop'ica*, *Hydro'ica*, *Aquiducta*, from 'υδωω, 'water,' and γωω, 'I expel.' Medicines, believed to be capable of expelling serum effused in any part of the body. These are generally cathartics or diuretics.

**HYDRAGOGUM BOYLEI**, *Argentii nitras*.

**HYDRALLANTE**, *False Waters*.

**HYDRAM'NIOS**, from 'υδωω, 'water,' and *amnios*. 'An excessive quantity of the liquor Amnii.

**HYDRARGYRANATRIP'SIS**, from 'υδραργυρος, 'quicksilver,' and *ατραπις*, 'rubbing in.' The rubbing in of an ointment of quicksilver. *Hydrargyrotrip'sis*.

**HYDRARGYRI ACETAS**, *Hydrargyrus acetatus*—h. *Borussias*, *H. cyanuretum*—h. *Bromidum*, see *Bromine*—h. *Calx alba*, *Hydrargyrum præcipitatum*.

**HYDRARGYRI CYANURE'TUM**, *H. Borussias*, *Hydrargyrum Cyanogenatum*, *H. Hydrocyanicum*, *Prussias Hydrargyri*, *Cyanuret* or *Prussiate of Mercury*. (F.) *Cyanure de Mercure*. This preparation has been strongly recommended as a powerful antisyphilitic, and is admitted into the Parisian codex. Twelve to twenty-four grains may be dissolved in a quart of distilled water, and three or four spoonfuls of the solution be taken daily, in a glass of any appropriate liquid.

**HYDRARGYRI DEUTO-IODURETUM**, see *Iodine* h. *Hydrargyri hyperoxides*, *Hydrargyri nitrico-oxylum*—h. *Murias basi oxydi imperfecti*, *H. oxymurias*—h. *Murias corrosivum*, *H. oxymurias*—h. *Murias dulcis sublimatus*, *H. submurias*—h. *Murias oxygenatus*, *H. oxymurias*—h. *Murias spirituosus liquidus*, *Liquor hydrargyri oxymuriatis*—h. *Murias suboxygenatus præcipitatione paratus*, *Hydrargyruin præcipitatum*.

**HYDRARGYRI NITRAS**, *Nitras hydrargyri in crystalloso concretus*,—*Nitrate of Mercury*. It is employed in syphilis; and, externally, in fungous, obstinate ulcers.

It is used in the formation of the *Soluble Mercury of Hahnemann*.

**WARD'S WHITE DROPS**,—a once celebrated, antiscorbatic nostrum,—were prepared by dissolving *mercury in nitric acid*; and adding a solution of *carbonate of Ammonia*; or, frequently, they consisted of a solution of *sublimatus with carbonate of ammonia*.

**HYDRARGYRI NITRICO-OXY'DUM**, *Hydrargyri nitrat'us ruber*, *Mercurius corrosivus ruber*, *Mercurius præcipitatus corrosivus*, *M. præcipitatus ruber*, *Aced'mum corallinum*, *Mercurius corallinus*, *Pulvis principis*, *Præcipitatus ruber*, *Oxy'dum hydrargyri completum*, *O. hydrargyricum*, *Panacea mercurii rubra*, *Pulvis Joun'nis de Vigo*, *Oxoides hydrargyri rubrum*, *Hyperoxoides hydrargyri*, *Nitric oxide of mercury*, *Red precipitate*, *Oxy'dum hydrargyri nitricum*, *Oxy'dum hydrargyri rubrum per ac'idum nitricum*, (F.) *Oxide nitrique de mercure*. It is a stimulant and escharotic, and used as such in foul ulcers; being sprinkled on the part, in fine powder, or united with lard into an ointment.

HYDRARGYRI OXYDI MURIAS AMMONIACALIS. Hydrargyrum præcipitatum—h. Oxodes rubrum, Hydrargyri nitrico-oxidum—h. Oxydum nigrum, H. Oxydum cinereum—h. Oxydum nigrum, H. oxydum cinereum.

HYDRARGYRI OXYDUM CINE'REUM, *Oxydum hydrargyri nigrum, Æthiops per se, Mercurius niger Moscati, Oxydum hydrargyrosum, Oxydum hydrargyricum præcipitatum, Oxydum hydrargyri nigrum, Pulvis mercurialis cinereus, Mercurius cinereus, Turpethum nigrum, Mercurius præcipitatus niger, Gray or black oxide of Mercury, (F.) Oxide de mercure cendre, Oxide gris ou noir de mercure.* This oxide is made in various ways. It may be formed by boiling subnitate of mercury in lime water. The dose of this *Pulvis hydrargyri cinereus*, is from two to ten grains. There are four other preparations of it in estimation, viz: *Plenck's solution*, made by rubbing mercury with mucilage. 2. By rubbing equal parts of sugar and mercury together. 3. A compound of honey or liquorice and purified mercury. 4. The blue pill and ointment. All these possess the usual properties of mercury.

The *Mercurius solubilis* of Hahnemann is formed from a black oxide of mercury. It is the *Mercurius solubilis Hahnemannii* seu *oxidum hydrargyri nigri medicinale unum* n<sup>o</sup> ex protonitrate hydrargyri præcipitatum. It is used in the same cases as the Hydrargyri Oxydum cinereum.

HYDRARGYRI OXYDUM NIGRUM MEDIANTE AMMONIA EX PROTONITRATE HYDRARGYRI PRÆCIPITATUM, Oxydum cinereum—h. Oxydum nitricum, Hydrargyri nitrico-oxidum.

HYDRARGYRI OXYDUM RUBRUM, *Mercurius calcinatus, Hydrargyrus Calcinatus, (F.) Oxide de mercure rouge, Red oxide of mercury.*

It is stimulant and escharotic; and, in large doses, emetic. Owing to the violence of its operation it is seldom given internally, but is chiefly used as an escharotic.

HYDRARGYRI OXYDUM RUBRUM PER ACIDUM NITRICUM, Hydrargyri nitrico-oxidum—h. Oxydum saccharatum, Hydrargyrum saccharatum—h. Oxydum sulphuricum, Hydrargyrus vitriolatus.

HYDRARGYRI OXYMURIAS, *Hydrargyrus murialis, Murius hydrargyri corrosivus, Murius hydrargyri oxygénatus, Sublimatus corrosivus, Mercurius corrosivus, Mercurius corrosivus sublimatus, Bichloride of mercury, Hydrargyri permuris, Supermurius hydrargyri, Murius hydrargyri basi oxydi imperfecti, Murius hydrargyri corrosivum, (F.) Muriate oxygéné de Mercure, Sublimé corrosif, Oxymuriate of mercury, Corrosive sublimate.* It is used as an antisyphilitic stimulant, in venereal complaints; old cutaneous affections, &c. gr. iij to ℥j of water forms a good gargle in venereal sore throats, or an injection in gonorrhœa. Externally, it is applied in cases of tetter, and to destroy fungus, or stimulate old ulcers. Dose, gr. 1-16 to gr. 1-8 in pill, once in twenty-four hours. White of egg is the best antidote to it, when taken in an overdose.

HYDRARGYRI PERMURIAS, Hydrargyri oxymurias—h. Proto-ioduretum, see Iodine—h. Proto-tartras, H. tartras—h. Prussias, H. cyanuretum

—h. Saccharum vermifugum, Hydrargyrum saccharatum.

HYDRARGYRI SUBMURIAS, *Calomelias, Draco mitigatus, Submurius hydrargyri mitis, Submurius Hydrargyri sublimatum, Mercurius dulcis, M. dulcis sublimatus; when precipitated, M. dulcis precipitatus, Panacea mercurialis, (when nine times sublimed.) Murius hydrargyri dulcis sublimatus, Mercurius sublimatus dulcis, Aquila, Manna Metallorum, Panchymago-gnum minerale, P. Quercetanus, mild Chloride of Mercury, (F.) Mercure doux, Protochlorure de mercure. Properties.* Antisyphilitic and sialagogue; in large doses, purgative. Dose, one or two grains given at night gradually excite pyalism. Gr. v to xx, purge. Children bear larger doses than adults.

The BLACK WASH, *Lotio Hydrargyri nigra*, is formed of *calomel* ℥ij, *Lime water* ℥j. Used to syphilitic sores.

HYDRARGYRI SUBMURIAS AMMONIATUM, Hydrargyrum præcipitatum—h. Subsulphas flavus, Hydrargyrus vitriolatus—h. Subsulphas peroxidati, Hydrargyrus vitriolatus—h. Sulphas, Hydrargyrus vitriolatus.

HYDRARGYRI SULPHURETUM NIGRUM, *Hydrargyrus vel mercurius cum sulphure, Æthiops mineralis, Hydrargyrus e sulphure, Pulvis hypnoticus, Æthiops narcoticus, (F.) Sulphure de mercure noir, Black sulphuret of mercury, Æthiops mineral.* Used chiefly in scrofulous and cutaneous affections. Dose, gr. x. to ℥ss.

HYDRARGYRI SULPHURETUM RUBRUM, *Hydrargyrus sulphuratus ruber, Mâcium purum, Minium Græcorum, Magnus Epilepsia, Ammon, Purpurisum, Cinnabaris, Mercurius Cinnabarinus, Cinnabaris, Cinnabarium, Red Sulphuret of Mercury, Cinnabar, Vermilion, (F.) Sulphure de Mercure rouge, Cinabre.*

It is antisyphilitic, but is chiefly used in fumigation against venereal ulcers of the nose, mouth and throat;—℥ss being thrown on a red hot iron. This preparation is the basis of a nostrum, called *Boerhaave's Red Pill*.

HYDRARGYRI SUPERMURIAS, H. oxymurias.

HYDRARGYRI TARTRAS, H. Proto-Tartras, *Tartrate of mercury.* Antisyphilitic. Dose, one or two grains twice a day.

HYDRARGYRIA, Eczema mercuriale.

HYDRARGYRIOSIS, Eczema mercuriale.

HYDRARGYROSIS, Eczema mercuriale.

HYDRARGYROTRIPSIS, Hydrargyrotripsis.

HYDRARGYRUM, *Hydrargyrus*, from ὑδωρ, 'water,' and ἀργυρος, 'silver;' *Mercurius, Argentum vivum, A. mobile, A. fustum, A. fugitivum, Fumus albus, Aqua arcanorum, Dadalus, Mercury, Quicksilver, (F.) Mercure, M. cru, Vif. Argent, Mater Metallorum.* A fluid, brilliant metal; of a slightly bluish white colour; fluid above—39° of Fahr. and under 656°. S. G., when liquid, 13,568 (Cavendish); easily oxidized. Metallic quicksilver does not act on the body, even when taken into the stomach. When oxidized and combined with acids, it acts powerfully. It has been exhibited in cases of constriction of the bowels and in intussusception, from a notion, that it must certainly pass through the bowels by its gravity. The water, in which mercury has been boiled, has been recommended as a vermifuge; but it pro-

bably enjoys no such property, as chymical tests do not exhibit the presence of the metal. When the crude metal is distilled in an iron retort, it forms the *Hydrargyrum purificatum*.

HYDRARGYRUM AMMONIATO-MURIATICUM, H. præcipitatum—h. Cyanogenatum, Hydrargyri cyanuretum.

HYDRARGYRUM CUM CRETĀ, *Hydrargyrum cum cretâ, Mercurius alkalisatus, Mercury with chalk*, (F.) *Mercur avec la craie, Ethiops alcalisatus*. A protoxide of mercury, formed by trituration with carbonate of lime. It is somewhat uncertain; and consequently not much employed. It possesses the properties of the black oxide of mercury, and may be advantageously exhibited in cases of diarrhœa in children, dependent upon acidity and vitiated secretions. Dose, gr. v to ʒss, twice a day, in any viscid substance.

THE HYDRARGYRUM CUM MAGNEŒIĀ of the Dublin Pharmacopœia resembles it in properties.

HYDRARGYRUM HYDROCYANICUM, Hydrargyri cyanuretum—h. Iodat, see Iodine—h. Iodat flavum, see Iodine—h. Iodat rubrum, see Iodine—h. Iodidulatum, see Iodine—h. Periodatum, see Iodine.

HYDRARGYRUM PRÆCIPITĀTUM, *Hydrargyrum ammoniâ-to-muriaticum, Mercurius cosmeticus, Murias oxidi hydrargyri ammoniacalis, Submurias ammoniaco-hydrargyricus, Calc Hydrargyri alba, Submurias Hydrargyri ammoniatum*—S. H. *Præcipitatum*—*Murias hydrargyri sub-oxygendatus præcipitatioñe paratus, Præcipitatum album, White precipitate of mercury, White precipitate*,—*Calcinatum majus Poterrii*, (F.) *Sous-muriate de mercure précipité ou Précipité blanc*.

A peroxide, combined with muriatic acid and ammonia, forming a triple salt. It is used, in powder, to destroy vermin; and, united with lard, for the same purpose, as well as in scabies and some other cutaneous affections.

HYDRARGYRUM SACCHARĀTUM, *Ethiops saccharatus, Mercurius saccharatus, Oxidum hydrargyri saccharatum, Saccharum hydrargyri vernifugum*. A mild mercurial formula in several of the Pharmacopœias of Continental Europe; formed by trituration of one part of mercury with two of white sugar. It is used in the venereal affections of children.

HYDRARGYRUS, Hydrargyrum.

HYDRARGYRUS ACETĀTUS, *Sperma mercurii, Terra foliata mercurii, Mercurius acetatus, Hydrargyri Acetatus, Acetas vel Proto-acetas Hydrargyri, Acetate of mercury*. This was the basis of *Keyser's pills*, and was once much celebrated in the cure of the venereal disease. The dose is from three to five grains, but it is not much used.

The formula for *Keyser's Anti-venereal pills* was as follows: *Hydrarg. Acet. ʒiv, Mannæ ʒxxx, Amyl. ʒij, Muc. G. Trag. q. s.* into pills of gr. vj each. Dose, two pills.

HYDRARGYRUS CALCINATUS, Hydrargyri oxidum rubrum—h. cum Cretâ, Hydrargyrum cum cretâ—h. Muriatus, Hydrargyri oxyurias—h. Nitratus ruber, Hydrargyri nitricooxydum.

HYDRARGYRUS PHOSPHORĀTUS, *Phosphuretâted mercury*. This preparation has been recom-

mended in cases of inveterate venereal ulcers, but it is now scarcely used.

HYDRARGYRUS SULPHURATUS RUBER, Hydrargyri sulphuretum rubrum—h. cum Sulphure, Hydrargyri sulphuretum nigrum—h. e. sulphure, Hydrargyri sulphuretum nigrum.

HYDRARGYRUS VITRIOLĀTUS, *Turpethum minera'le, Mercurius emeticus flavus, Calc mercurii vitriolata, Mercurius causticus flavus, M. luteus, Hydrargyri sulphas, Salsulphas Hydrargyri flavus, Oxidum hydrargyri sulphuricum, Subsulphas hydrargyri peroxidati, Turbith mineral*, (F.) *Sous-sulfate de mercure ou turbith mineral*. Two grains of this mercurial act on the stomach violently. It is sometimes recommended as an emetic in amaurosis.

HYDRARTHROS, *Hydarthrus, Hydarthrus synovia'lis, Hydrops articulorum, Hydarthron, Hydarthros, Melic'ria, Spina ventosa of Rhazes and Avicenna, Arthritis Hydarthros, Hydarthrosis, Emmy'ium articulare, Tumor albus*;—*White Swelling*; from 'υδωρ, 'water,' and 'αρθρον, 'a joint.' (F.) *Tumeur blanche, T. lymphatique des articulations*. The French surgeons apply the term *Hydarthrus* to dropsy of the articulations.

*White swelling* is an extremely formidable disease. It may attack any one of the joints; but is most commonly met with in the knee, the haunch, the foot, and the elbow, and generally occurs in scrofulous children. It consists, at times, in tumefaction, and softening of the soft parts and ligaments, which surround the joints; at others, in swelling and caries of the articular extremities of bones; or both these states may exist at the same time. The treatment consists in the employment of counter-irritants; the use of iodine internally and externally, &c.

HYDRAS'TIS CANADENSIS, *Yellow Root*. It is used in Kentucky as a *mouth-water*, and as an outward application in wounds, and local inflammations.

HYDRELE'ON, *Hydroleum*, from 'υδωρ, 'water,' and ελαιον, 'oil.' A mixture of water and oil.

HYDRELYTRON. See Hydrocele.

HYDRECEPHALOCÉLE, Hydrocephalus chronicus.

HYDRECEPHALOID, from 'υδωρ, 'water,' εγκεφαλος, 'the brain,' and ειδος, 'resemblance.' Resembling hydrocephalus. Diseases of the bowels, and exhaustion are at times attended with hydrocephaloid symptoms.

HYDRECEPHALUS, Hydrocephalus internus.

HYDRENTEROCÉLE, from 'υδωρ, 'water,' εντερον, 'intestine,' and κηλη, 'a tumour.' Intestinal hernia, the sac of which encloses fluid.

HYDRIATRIA, Hydrosudotherapeia.

HYDRIODAS KALICUS. See Potassæ hydriodas.

HYDRO'A, *Hidro'a, Aquila, Boa*, from 'υδωρ, 'water.' An affection, which consists in an accumulation of water or serous fluid under the epidermis. Some have used *hydro'a* synonymously with *sudamina*; (q. v.) others with *pemphigus*. In the first case, it has generally, however, been written *hidro'a*, from 'ιδρωσ, 'sweat,' and in the latter *hydro'a*. See Hydatid.

**HYDROEMIA**, *Hydræmia*; from 'υδωρ, 'water,' and 'αἷμα, 'blood.' The state of the blood in which the watery constituents are in a morbid proportion.

**HYDROARION**, *Hydrops ovarii*, from 'υδωρ, 'water,' and 'ωαριον, 'ovarium.' Dropsy of the ovarium.

**HYDROBLEPHARON**, *Hydrops Palpebræ*, *Blepharædema aquosum*. An œdema or watery swelling of the eyelids; from 'υδωρ, 'water,' and 'βλεφαρον, 'eyelid.'

**HYDROCARDIA**, *Hydropericardium*.

**HYDROCELE**, *Hydrops Scroti*, *Oscœocel'le*, *Oscœophyma*, *Hydror'chis*, from 'υδωρ, 'water,' and 'κ'λη, 'a tumour.' A collection of serous fluid in the cellular texture of the scrotum or in some of the coverings, either of the testicle or spermatic cord. To the first of these varieties the names—*External Hydrocele*, *H. œdematodes*, (F.) *H. par infiltration* have been given; and to the second those of *Hydrocel'le interna*, *H. tunicæ vaginalis testis*, *Hydr'elytron*, (F.) *H. par épanchement*. When the collection occurs in the envelope of the testicle, it is called *H. of the tunica vaginalis*; and the epithet *congenital*, is added, when the interior of the membrane, in which it is situate, still communicates freely with the cavity of the abdomen. When it exists in the spermatic cord, it is called *encysted*, or *diffused Hydrocele of the spermatic cord*, as the case may be. The tumour of the distended scrotum is oblong; greater below than above; indolent and semi-transparent. When it becomes inconveniently large, the fluid may be evacuated by puncturing with a trocar, but, as the fluid collects again, this operation can only be considered palliative. The radical cure consists, usually, in injecting, through the canula of the trocar, which has been left in after puncturing, some irritating liquid, as wine. This is kept in the tunica vaginalis for a few minutes and then withdrawn. The coat inflames; adhesion takes place, and the cavity is obliterated.

**HYDROCELE PERITONÆI**, *Ascites*—h. *Spinalis*, *Hydrorachis*.

**HYDROCÉPHALE AIGU**, *Hydrocephalus internus*.

**HYDROCEPH'ALUS**, *Hydroceph'alum*, *Hydroceph'alë*, from 'υδωρ, 'water,' and 'κεφαλη, 'the head.' *Water in the head*, *Dropsy of the head*, *Hydrops Cap'itis*, *Dropsy of the brain*. A collection of water within the head. It may be *internal* or *external*.

**HYDROCEPHALUS ACUTUS**, *H. internus*—h. *Externus*, *H. chronicus*—h. *Meningeus*, *H. internus*.

The **HYDROCEPHALUS INTER'NUS**, *Hydroceph'alus Acut'us*, *H. meningeus*, *Hydrops cer'ebri*, *Encephal'gia hydro'p'ica*, *Phrenicula hydroceph'al'ica*, *Hydreceph'alus*, *Feb'ris Hydroceph'al'ica*, *Apoplex'ia hydroceph'al'ica*, *Carus hydroceph'alus*, is generally seated, according to modern observers, in the meninges and surface of the encephalon, and is a *tubercular meningitis*. It is observed particularly in childhood. Its march is extremely acute and often very rapid; admitting, generally, however, of division into three stages. The symptoms of the *first stage* are those of general febrile irritation, with headache, intolerance of light and sound, delirium,

&c. Those of the *second*, which generally denote, that the inflammation has ended in effusion, are, great slowness of pulse, crying out as if in distress, moaning, dilated pupil, squinting, &c. and lastly, in the third stage;—profound stupor, paralysis, convulsions, involuntary evacuations, quick pulse, and frequently death.

The disease is of uncertain duration; sometimes, destroying in two or three days, at others, extending to two or three weeks. The prognosis is unfavourable. The treatment must be most active during the stage of excitement, and precisely that necessary in phrenitis. In the second stage, the indication is;—to promote the absorption of the effused fluid. This must be done by counter-irritants, and mercury, chiefly. On dissection, in these cases, water is generally found in the ventricles, or at the base of the brain; or there are signs of previous, vascular excitement, effusions of coagulable lymph, &c. (F.) *Hydrocéphale aigu*, *Fievre cérébrale des Enfants*.

The **HYDROCEPHALUS CHRON'ICUS**, *Hydrocephalocel'le*, *Hydrops Cap'itis*, *Hydrocephalus externus* of some, commonly commences at an early period of existence, and the accumulation of fluid, gradually produces distention of the brain, and of the skull, with separation of the sutures. It generally proves fatal before puberty.

The *Hydrocephalus externus* of some is a mere infiltration into the subcutaneous cellular tissue of the cranium.

**HYDROCHLORATE D'OR**. See Gold.

**HYDROCHLORINAS NATRICUS**, Soda, muriate of.

**HYDROCIRSOCE'LE**, from 'υδωρ, 'water,' κ'ισσος, 'varix,' κ'λη, 'tumour.' A tumour, formed by the varicose distention of the veins of the spermatic cord and by the accumulation of serous fluid in the cellular texture of the scrotum. *Hydrocirsocele*.

**HYDROCOTYLE UMBELLATUM**, *Acaricoba*.

**HYDROCYAN'IC ACID**, *Ac'idum Hydrocyan'icum*; from 'υδωρ, 'water,' and 'κυανος, 'blue,' *Prussic Acid*, *Acidum Prus'sicum*, *A. Borus'sicum*, *A. Zoö'ticum*, *A. Zoö'tin'icum*. This acid exists in a great variety of native combinations in the vegetable kingdom, and imparts to them certain properties, which have been long known and esteemed; as in the *bitter almond*, *Cherry laurel*, leaves of the *Peach tree*, *kernels of fruit*, *pips of apples*, &c. When concentrated, it is liquid, colourless, of a strong smell and taste, at first cool, afterwards burning. Its s. g. at 7°, centigrade, is 0.7058. It is very volatile and enters into ebullition at 26°·5, Cent. It speedily undergoes decomposition, sometimes in less than an hour, and consists of a peculiar gaseous and highly inflammable compound of carbon and azote, to which the name *Cyanogen* has been assigned; and of hydrogen, which acts as the acidifying principle—hence its name *Hydrocyanic acid*. According to Magendie, the acid, prepared after Scheele's method—the one in common use—is of irregular medicinal power; he, therefore, recommends Gay Lussac's acid, diluted with 6 times its volume, or 8.5 times its weight of distilled water, for medicinal purposes, and this he calls *Medicinal Prussic Acid*.

Dr. Ure has proposed, that the specific gravity should indicate that which is proper for medicinal exhibition; and, after comparative experiments of the gravity of the acids, obtained by different processes, he states, that the acid, usually prescribed, is of s. g. 0.996 or 0.997. Great caution is, however, necessary. One drop of pure prussic acid instantly destroys, and the animal shows hardly any traces of irritability, a few moments after death. It has been advised in tracheal phthisis, in tubercular phthisis, pulmonary inflammation and irritation, dyspepsia, uterine affections, hectic cough, cancer, chronic rheumatism, and mania, and as a local remedy in impetiginous affections; but, although possessed of powerful sedative properties, it is so unmanageable and the preparation so uncertain, that it is not much used.

The *Dose* of Scheele's *Acid*, or of the *Medicinal Prussic Acid* is from a quarter of a drop to two drops.

**HYDROCYS'TIS**, from *ὑδωρ*, 'water,' and *κυστις*, 'a bladder.' A cyst containing a watery or serous fluid.

**HYDRODES**, *Aqueus*.

**HYDRO-ENTERO-EPIPLOCE'LE**, *Hydro-epiplo-enterocœlē*; from *ὑδωρ*, 'water,' *εντερον*, 'intestine,' and *επιπλοον*, 'omentum.' Entero-epiplocele, the sac of which contains a serous fluid.

**HYDRO-ENTERO-EPILOMPHALUM**, from *ὑδωρ*, 'water,' *εντερον*, 'an intestine,' *επιπλοον*, 'the caul,' and *ομφαλος*, 'the navel.' Umbilical hernia, the sac of which contains intestine, epiploon, and serum.

**HYDRO-ENTEROM'PHALUM**, *Hydrenterom'phalum*; from *ὑδωρ*, 'water,' *εντερον*, 'an intestine,' and *ομφαλος*, 'the umbilicus.' Hernia umbilicalis; the sac of which contains intestine and serum.

**HYDRO-EPIPLO-ENTEROCELE**, *Hydro-entero-epiplocele*.

**HYDRO-EPIPLOCE'LE**, from *ὑδωρ*, 'water,' *επιπλοον*, 'omentum,' and *ζηλη*, 'a tumour.' Hernia, formed by omentum; the sac of which contains serum.

**HYDRO-EPILOMPH'ALUM**, from *ὑδωρ*, 'water,' *επιπλοον*, 'the omentum,' and *ομφαλος*, 'the umbilicus.' Umbilical hernia; the sac of which contains epiploon and serum.

**HYDRO'GALA**, from *ὑδωρ*, 'water,' and *γαλα*, 'milk.' A mixture of water and milk.

**HYDROGASTER**, *Ascites*.

**HYDROGEN**, *Hydrogē'nium*, *Inflam'mable air*, *Phlogiston*, *Principle'ium hydrogeneticum*, *P. hydroticum*, from *ὑδωρ*, 'water,' and *γεννω*, 'I produce.' This gas, when breathed, kills the animal, by depriving it of oxygen. When diluted with two-thirds of atmospheric air, it occasions some diminution of muscular power and sensibility, and a reduction of the force of the circulation. It has been respired in catarrh, hæmoptysis, and phthisis.

The **CARBURETTED HYDROGEN**,—obtained by passing the vapour of water over charcoal, at the temperature of ignition, in an iron tube—has been found possessed of similar properties, when diluted, and has been used in like cases.

The **SULPHURETTED HYDROGEN**, *Hydrothi'on*, *Gaz hepaticum*, *Gaz hydrogen'ium sulphuratum*, *Meplitis hepatica* may be disengaged from any

of the sulphurets by the addition of a strong acid. It is a violent poison, but has been recommended to be inhaled, diluted, to allay the increased irritability which occasionally exists after diseases of the lungs. See *Hydro-sulphuretted Water*.

**HYDROGENESES**. Baumes gives this name to diseases which he fancifully considers to depend upon disturbed *hydrogenation*. In it he includes intermittent and remittent fevers.

**HYDROGENO-SULPHURETUM AMMONIACÆ LIQUIDUM**, *Ammonia sulphuretum*.

**HYDROGLOSSA**, *Ranula*.

**HYDROLÆUM**, *Hydrelæon*.

**HYDROLAPATHUM**, *Rumex hydrolapathum*.

**HYDROLA'TA**, *Aquæ distillatæ*.

**HYDROLATS**, *Aquæ destillatæ*.

**HYDROLOGY**, *Hydrolog'ia*; from *ὑδωρ*, 'water,' and *λογος*, 'a discourse.' A treatise on waters. By the term *Medical Hydrology* is meant that part of physics, whose object is the study of water, considered as it respects medicine; and consequently embracing that of mineral waters. *Medical Hydrography* comprises the study of the influence exerted by the sea or by navigation on the health of man.

**HYDROLOTIF**, *Lotion*.

**HYDROMA'NIA**, from *ὑδωρ*, 'water,' and *μανια*, 'mania.' A name given by Strambi to Pellagra, in which the patient has a strong propensity to drown himself.

**HYDRO-MEDIASTI'NA**. Effusion of serous fluid into the mediastinum.

**HYDROM'ELI**, from *ὑδωρ*, 'water,' and *μελι*, 'honey.' *Aqua mulsa*, *Melites*, *Mulsum*, *Melic'ratum*, *Braggart*, *Medo*. A liquid medicine, prepared with an ounce and a half of honey and a pint of tepid water. It is used as a demulcent and laxative, and is generally known under the name *Simple hydromel*, *Vinose hydromel*, *Mead*, *Hydromel' vinosum* is a drink made by fermenting honey and water. It is much used in some countries.

**HYDROMETER**, *Areometer*.

**HYDROME'TRA**, *Hydrops u'teri*; from *ὑδωρ*, 'water,' and *μητρα*, 'the womb.' *Dropsy of the womb*. A disease, characterized by circumscribed protuberance in the hypogastrium,—with obscure fluctuation,—progressively enlarging, without ischury or pregnancy. If it ever occur, it must be a rare disease.

**HYDROM'PHALUM**, *Hydrops umbilicalis*, *Exom'phalus aquosus*, from *ὑδωρ*, 'water,' and *ομφαλος*, 'the navel.' A tumour, formed by the accumulation of serum in the sac of umbilical hernia; or simply by distention of the navel in cases of ascites.

**HYDROMYRIN'GA**, from *ὑδωρ*, 'water,' and *myringa* or *myrinx*, 'the membrana tympani.' Dropsy of the drum of the ear; giving rise to difficulty of hearing,—the *Dyscœ'a hydroph'ica*.

**HYDRONEPHRO'SIS**; from *ὑδωρ*, water, and *νεφρος*, kidney. A cyst in the kidney, filled with urine, and formed owing to the obstruction of the tubes of the papillæ.—Rayer.

**HYDRONOSUS**, *Hydrops*.

**HYDROPATHY**, *Hydrosudotherapeia*.

**HYDROPEDE'SIS**, from *ὑδωρ*, 'water,' and

πιδάω, 'I break out.' *Ephidro'sis*, (q. v.) Excessive sweating.

HYDROPEGE, Water, spring.

HYDROPERICARDITIS, Hydropericardium.

HYDROPERICARDIUM, *Hydropericardia*, *Hydropericarditis*, *Hydrops Pericardii*, *Hydrocardia*.—*Dropsy of the pericardium*. (F.) *Hydropsic du Péricarde*. This is not a common disease. Palpitations; irregular or intermitting pulse; excessive dyspnoea, amounting often to orthopnoea, and dulness, over a larger space on percussion, will cause the pericardium to be suspected.

The treatment is that of dropsies in general. It is, usually, however, of the active kind.

HYDROPERIONE, from 'υδωρ, 'water,' περι, 'around,' and ωον, 'an egg, or ovum.' The sero-albuminous substance secreted in the uterus, prior to the arrival of the impregnated ovum in that cavity.—Breschet.

HYDROPHOBIA, *Paraphobia*, *Phobodipsion*, *Phu'gydon*, *Phucugoph'bia*, *Cynolys'sa*, *Phrenit'is* *l'rans*, *Lyssa cani'na*, *Pantoph'bia*, *Rabies cani'na*, *Erc'his'mus hydroph'bia*, *Clonus hydroph'bia*, *Hygroph'bia*, *Canine madness*, (F.) *Rage*, from 'υδωρ, 'water,' and φοβος, 'dread.'

The term *Rabies* is more appropriate for the aggregate of symptoms resulting from the bite of rabid animals. Hydrophobia literally signifies, a 'dread of water;' and, consequently, ought to be applied to one of the symptoms of rabies, rather than to the disease itself. It is a symptom which appears occasionally in other nervous affections. Rabies is susceptible of spontaneous development in the dog, wolf, cat, and fox; which can thence transmit it to other quadrupeds or to man; but it has not been proved that it can supervene,—without their having been previously bitten,—in animals of other species; or that the latter can, when bitten, communicate it to others.

A number of facts induces the belief, that the saliva and bronchial mucus are the sole vehicles of the rabid virus; the effects of which upon the economy appear, sometimes, almost immediately after the bite, and are, at others, apparently dormant for a considerable period. The chief symptoms are—a sense of dryness and constriction of the throat; excessive thirst; difficult deglutition; aversion for, and horror at, the sight of liquids as well as of brilliant objects; red, animated countenance; great nervous irritability; frothy saliva; grinding of the teeth, &c. Death most commonly happens before the fifth day.

Hydrophobia has hitherto resisted all therapeutic means. Those which allay irritation, are obviously most called for. In the way of prevention, the bitten part should always be excised, where practicable; and cauterized.

In some cases, symptoms like those which follow the bite of a rabid animal, are said to have come on spontaneously. This affection has been termed *nervous* or *spontaneous hydrophobia*.

HYDROPHOBUS, *Lyssodectus*.

HYDROPHTHALMIA, from 'υδωρ, 'water,' and οφθαλμος, 'the eye.' *Dropsy of the Eye*, *Hydrops Oculi*, *Buphthalmus*, *Oculus Bovi'nus*, *Oculus Bu'balus*, *Oculus Elephan'tinus*,

*Ophthalmopto'sis*, *Parop'sis* *Staphylo'ma simplex*, (F.) *Hydrophthalmic*, *Hydropsic de l'œil*. This affection is caused, at times, by an increase in the quantity of the aqueous, at others, of the vitreous, humour. In the former case, the iris is concave anteriorly, and pushed backwards:—in the latter, it is convex, and pushed forwards. Most commonly, the disease seems to depend on both humours at the same time. *Hydrophthalmia* sometimes affects both eyes; at others, only one. Children are more exposed to it than adults or old persons. The *treatment* must vary according to the causes; its longer or shorter duration; greater or less extent, &c. Hence, according to circumstances, hydragogue medicines, purgatives, general and local blood-letting, blisters, setons, moxa, cupping-glasses, fomentations, collyria, and fumigations of different kinds have been employed. When all means fail, and the disease continues to make progress, the fluid may be evacuated, by a puncture made with a cataract needle at the lower part of the transparent cornea.

HYDROPHTHALMION. Same etymon. An oedematous swelling of the conjunctiva in hydropic persons.

HYDROPHTHALMUS CRUENTUS, Hemophthalmia.

HYDRO-PHYSOCELE, *Hydropneumatocel'e*, from 'υδωρ, 'water,' φυσαι, 'wind,' and κληη, 'a tumour.' Hernia, which contains a serous fluid and gas.

HYDROPHYSOMETRA; from 'υδωρ, 'water,' φυσω, 'I inflate,' and μητρα, 'the womb,' a morbid condition of the womb, in which both fluid and air are contained in it.

HYDROPI'IC, *Hydropicus*.—*Hyphydros*, 'υφυδρος, (F.) *Hydropique*. One labouring under dropsy.

HYDROPICA, Hydragogues.

HYDROPIPER, Polygonum hydropiper.

HYDROPSIE, *Hydrops—h. de l'Œil*, *Hydrophthalmia—h. du Péricarde*, *Hydropericardium—h. des Plèvres*, *Hydrothorax—h. de Poitrine*, *Hydrothorax*.

HYDROPNEUMATOCELE *Hydrophysocèle*.

HYDROPNEUMONIA, *Hydros Palm'onum*, from 'υδωρ, 'water,' and πνευμων, 'the lung.' Infiltration of the lungs.

HYDROPNEUMOSARCA, from 'υδωρ, 'water,' πνευμα, 'wind, air,' and σαρχ, 'flesh.' An abscess, containing water, air, and matters similar to flesh.—M. A. Severinus.

HYDROPNEUMOTHORAX, from 'υδωρ, 'water,' πνευμων, 'the lung,' and θωραξ, 'the chest.' Pneumothorax with effusion of fluid into the chest.

HYDROPOΪDES, from 'υδωρ, 'water,' and ποιω, 'I make.' Watery excretions, such as sometimes take place in Hydropies.

HYDROΠOTA, *Pota'tor Aquæ*, from 'υδωρ, 'water,' and ποτις, 'a drinker.' *Water Drinker*. One who drinks only water, or drinks it in an extraordinary quantity.

HYDROPI'S, from 'υδωρ, 'water,' *Phlegmd'tia*, *Dropsy*, *Hydros*, *Affectus hydro'des*, *Hydropisis*, *Hydron'osus*, (F.) *Hydropisie*. A preternatural collection of a serous fluid in any cavity of the body, or in the cellular texture. When the cellular texture of the whole body is more or less

filled with fluid, the disease is called *Anasarca* or *Leucophlegmatia*;—and when this variety is local or partial, it is called *Œdema*. The chief dropsies, designated from their seat are:—*Anasarca*, *Hydrocephalus*, *Hydrorachitis*, *Hydrothorax*, *Hydropericardium*, *Ascites*, *Hydrometra*, *Hydrocele*, &c.

*Encysted Dropsy*, *Hydops sacculus*, *incarceratus* vel *cysticus*, is that variety, in which the fluid is enclosed in a sac or cyst; so that it has no communication with the surrounding parts. *Dropsy of the Ovarium*, *Hydops Ovarii*, *Ascites Ovarii*, *Ascites sacculus*, is an instance of this variety.

Dropsy may be active or passive. The former consists in an increased action of the exhalants, so that those vessels pour out much more fluid than is absorbed: the latter arises from a state of atony of the absorbent vessels, which allows of an accumulation of fluid. It may also be *mechanical*, or produced by obstructions to the circulation, as in cases of diseased liver.

Active dropsy, occurring accidentally in a sound individual, generally ends favourably. Those, which supervene on other diseases, or are symptomatic of some internal affection, are rarely curable.

The treatment consists in the use of all those remedies, which act on the various secretions: so that the demand being increased, the supply will have to be increased accordingly; and in this manner some of the collected fluid may be taken up by the absorbents. To this end, bleeding, if the dropsy be very active; purgatives, diuretics, sudorifics, sialagogues, &c., are the remedies chiefly depended upon.

**HYDROS ABDOMINIS**, *Ascites*—h. *Abdominis aereus*, *Tympanites*—h. *Articulorum*, *Hydrarthrus*—h. *Capitis*, *Hydrocephalus*—h. *Cavitatis columnæ vertebralis*, *Hydrorachis*—h. *Capitis*, *Hydrocephalus chronicus*—h. *Cellularis artuum*, *Œdema*—h. *Cellularis totius corporis*, *Anasarca*—h. *Cerebri*, *Hydrocephalus internus*—h. *ad Matulam*, *Diabetes*—h. *Medullæ spinalis*, *Hydrorachis*—h. *Metellæ*, *Diabetes*—h. *Oculi*, *Hydrophthalmia*—h. *Ovarii*, *Hydroarion*—h. *Palpebræ*, *Hydroblepharon*—h. *Pectoris*, *Hydrothorax*—h. *Pericardii*, *Hydropericardium*—h. *Pulmonis*, *Hydrothorax*—h. *Pulmonum*, *Hydropneumonia*—h. *Sacci lacrymalis*, *Fistula lacrymalis*—h. *Seroti*, *Hydrocele*—h. *Siccus et flatulentus*, *Tympanites*—h. *Spinæ Hydrorachis*—h. *Thoracis*, *Hydrothorax*—h. *Tympanites*, *Tympanites*—h. *Umbilicalis*, *Hydroinphalum*—h. *Uteri*, *Hydrometra*.

**HYDROPYRETOS**, from *υδροσ*, 'water,' and *πυρετος*, 'fever.' Fever with sweating. *Hydropyretos* would be more proper, from *ιδρωσ*, 'sweat.' See *Sudor anglicus*.

**HYDRORACHIS**, from *υδροσ*, 'water,' and *ραχις*, 'the spine.' *Hydrorachitis*, *Hydrorrhachia*, *Hydops Cavitatis Columnæ Vertebralis*, *Spina bifida*, *Hydops medullæ spinalis*, *Hydrocele spinalis*, *Hydrorachitis spinosa*, *Hydops spinæ*, *Spinola*. A soft, frequently transparent, tumour; formed by the membranes of the spinal marrow being distended and projecting backwards from the vertebral canal, the posterior paries of which is wanting to a certain extent. The disease is often accompanied with paralysis of the lower extremities. It is

congenital, and situate in the lumbar or sacral regions. It is almost always fatal:—the tumour rupturing, and death occurring instantaneously. On *dissection*, a simple separation or complete absence of the spinous processes of the vertebrae is perceived, with, at times, destruction or absence of spinal marrow. The treatment is the same as in *hydrocephalus chronicus*; and, as in it, advantage seems occasionally to have been derived by puncturing with a fine needle.

**HYDRORACHITIS**, *Hydrorachis*.

**HYDRORACHIS**, *Hydrocele*.

**HYDROSACCHARUM**, *Aqua saccharata*, (F.) *Eau sucrée*. Sugared water.

**HYDROSARCA**, from *υδροσ*, 'water,' and *σαρξ*, 'flesh.' A tumour, containing a fluid as well as portions of flesh. —Also, *Anasarca*, (q. v.)

**HYDROSARCOELE**, from *υδροσ*, 'water,' *σαρξ*, 'flesh,' and *χιλη*, 'a tumour.' *Sarcohydrocele*. A tumour, formed by a sarcocele, complicated with dropsy of the tunica vaginalis.

**HYDROSUDOPATHY**, *Hydrosudotherapeia*.

**HYDROSUDOTHERAPEIA**, *Hydrothy*, *Hydrosudopathy*, *Hydratri'a*, from *υδροσ*, 'water,' *sudo*, 'I sweat,' and *θεραπεω*, 'I remedy.' A badly compounded word, formed to express the mode of treating diseases by cold water, sudorifics, &c.

**HYDROSULPHURETTED WATER**, *Aqua hydrosulphurata simplex*, *Aqua hepatica*, (F.) *Eau hydrosulphurée simple*. (Sulphuret of iron 1000 parts, sulphuric acid 2000 parts, distilled water 4000 parts; add the water to the acid, and put the sulphuret of iron into a retort, to which a Wolff's apparatus of 5 or 6 vessels is adapted: the last containing about an ounce of potassa, dissolved in a quart of water. Pour the diluted acid gradually on the sulphuret: and, ultimately, throw away the water in the last vessel. *Ph. P.*) It is stimulant, diaphoretic, and deobstruent, (?) and is used in rheumatism, diseases of the skin, &c.

It has been, also, called *Œridum Hydrothionicum bifidum*.

**HYDROSULPHURETUM AMMONIACUM AQUOSUM**, *Ammonia sulphuretum*—h. *Ammonicum*, *Ammonia sulphuretum*.

**HYDROTHION**, *Hydrogen*, sulphuretted.

**HYDROTHORAX**, from *υδροσ*, 'water,' and *θωραξ*, 'the chest,' *Hydops Thoracis*, *Hydops pectoris*, *Hydops pulmonis*, *Dyspnœa et Orthopnœa hydrothoracica*, (F.) *Hydropisic de Potrine*, *H. des Plèvres*. Idiopathic Hydrothorax, termed, by Lænnec, *Hydropisic des plèvres*, *Dropsy of the Pleura*, is a very rare disease, and very difficult of diagnosis. It generally exists only on one side; which, if the fluid effused be considerable, projects more than the other. *Dyspnœa*, and fluctuation perceptible to the ear, are characteristic symptoms. When the chest is examined with the stethoscope, respiration is found to be wanting every where, except at the root of the lung. The sound is also dull on percussion.

Effusion into the chest, as a result of inflammation of some thoracic viscus, is as common as the other is rare. It is usually a fatal symptom. It has been called *symptomatic hydrothorax*.

In Hydrothorax, the course of treatment,

proper in dropsics in general, must be adopted. Diuretics seem, here, to be especially useful; probably on account of the great activity of pulmonary absorption. Paracentesis can rarely, if ever, be serviceable.

**HYDROTHORAX CHYLOSUS**, Chylothorax—h. Purulentus. Empyema.

**HYDROTICA**, Hydragogues.

**HYDROTIS**, from 'υδροσ, 'water,' and ωσ, gen. ωτος, 'the ear.' Dropsy of the ear.

**HYGEIA**, Sanitas.

**HYGIEIA**, Hygiène, Sanitas.

**HYGIEINOS**, Salutary.

**HYGIEIOLOGIA**, Hygiène.

**HYDRURIA**. See Urine.

**HYGIENE**, from 'υγίεια, 'health.' *Hygiēsis*, *Hygiē'a*; *Conservat'ca medic'na*: *Hygiēciol'gia*, from 'υγις, 'healthy.' The part of medicine whose object is the preservation of health. It embraces a knowledge of healthy man, both in society and individually, as well as of the objects used and enjoyed by him, with their influence on his constitution and organs.

**HYGIESIS**, Hygiène.

**HYGRA**, from 'υδροσ, 'water,' or 'υγρος, 'humid.' Liquid plasters. *Hygremplast'ra*.

**HYGRÉPLASTRA**, Hygra.

**HYGROBLEPHARIC**, from 'υγρος, 'humid,' and βλεφαρον, 'eyelid.' *Hygrophthal'mici*. The excretory ducts of the lachrymal gland have been so called.

**HYGROL'OGY**, Ζοοκ'ymy; from 'υγρος, 'humid,' and λογος, 'a discourse.' The anatomy of the fluids of the body.

**HYGROMA**, from 'υγρος, 'humid.' *Tumor cyst'icus ser'us*, *Cys'tis ser'osa*. Dropsy of the bursa mucosæ.

**HYGROM'ETRY**, *Hygrom'etria*, *Hygrosco'pia*; from 'υγρος, 'humid,' and μετρον, 'measure.' The part of physics which concerns the measurement of the dryness or humidity of the atmosphere. It is probable that diseases are as frequently caused by the varying moisture of the atmosphere, as by changes in its weight or temperature. The *hygrometer* ought, consequently, to form part of every apparatus for medical meteorological observations.

**HYGRON**, Liquor.

**HYGROPHOBIA**, Hydrophobia.

**HYGROPTHALMICI**, Hygrophlepharici.

**HYGROPISSOS**. See Pinus sylvestris.

**HYGROSCOPIA**, Hygrometry.

**HYGROTES**, Liquor.

**HY'LE**, 'υλη, *Mate'ria*, 'Matter.' *Materia Medica*; also, the Philosopher's Stone.

**HYLE IATRICE**, *Materia medica*.

**HYLOPH'AGOUS**, from 'υλη, 'wood,' and φαγο, 'I eat.' One that feeds upon the young shoots of trees, roots, &c. Hylophagous tribes yet exist in some parts of Africa.

**HYMASTATICS**, Hæmastaticæ.

**HYMEN**, 'υμην, which signifies 'marriage,' 'nuptial song,' 'membrane or pellicle.' *Claustum*, seu *Flos*, seu *Sigillum*, seu *Custodia*, seu *Columna*, seu *Zona virginia'tis*, *Circulus membran'osus*, *Bueton*, *Intersep'tum virgin'ale*, *Cento virginal'is*, *Argentum Integritat'is*, *Minimentum* seu *Zona Castita'tis*, *Pannic'ulus hymen'al'us*, *Eugion*, *Valcula vagi'na*, *Membran'ula luna'ta vagina*. The semilunar, parabolic, or circular

fold, situate at the outer orifice of the vagina in virgins, especially during youth, and prior to menstruation. This membrane is ordinarily ruptured by the first venereal act, and is effaced by accouchement; some irregular flaps remaining, to which the name *Carun'cula Myrtifor'mes* has been given, by reason of their resemblance to the leaves of the myrtle. Many circumstances of an innocent character may occasion a rupture or destruction of this membrane. It is often, indeed, found absent in children soon after birth; whilst it may remain entire after copulation. Hence, the presence of the hymen does not absolutely prove virginity; nor does its absence, incontinence; although its presence would be *primâ facie* evidence of continence.

**HYMEN**, Membrane—h. Diaphragton, Mediastinum.

**HYMENÆA COURBARIL**. See Anime.

**HYMENODES**, Membranous.

**HYMENOG'RAPHY**, *Hymenogra'phia*, from 'υμην, 'a membrane,' and γραφειν, 'I describe.' That part of anatomy whose object is the description of the different membranes.

**HYMENOL'OGY** *Hymenolo'gia*, from 'υμην, 'a membrane,' and λογος, 'a description.' A treatise on the membranes.

**HYMENORRHAPHY**, *Hymenorrrha'phia*; from 'υμην, 'the hymen,' and ραφη, 'a suture.' A form of Elytrorrhaphy, (q. v.), in which the operation is performed in the natural situation of the hymen.

**HYMENOT'OMY**, *Hymenoto'mia*, from 'υμην, 'a membrane,' and τεμνω, 'I cut,' 'I dissect.' The part of anatomy, which treats of the dissection of membranes. The term has also been applied to the incision of the hymen, practised in certain cases of imperforation of the vagina, in order to give exit to the blood, retained and accumulated in the cavity of the uterus.

**HYOBASIOGLOSSUS**, Basioglossus.

**HYOCHONDROGLOSSUS**, Hyoglossus.

**HYODEOGLOSSUS**, Hyoglossus.

**HYO-EPIGLOT'TICUS**. Belonging to the os hyoides and epiglottis. Some anatomists have given the name *Hyo-epiglottic ligament* to a bundle of condensed cellular tissue, which passes from the posterior part of the body of the hyoid bone to the base of the epiglottic fibrocartilage.

**HYO-GLOSSO-BASIPHYARYNGIEN**, Constrictor pharyngis.

**HYOGLOSSUS**, *Hyodeo-glossus*, *Hyo-chondro-glossus*, *Hypsiloglossus*, *Cer'atoglossus* of Douglas and Cowper: *Basio-Cerato-Chondro-glossus*. A large, thin, quadrilateral muscle, situate at the anterior and superior part of the neck. Its insertions, at three different points of the os hyoides, permit it to be divided into three portions:—the *first* (*Cerato-glossus* of Albinus) is attached to the great cornu of the os hyoides; the *second*, (*Basio-glossus* of Albinus,) arises from the superior part of the body of the same bone; and the *third*, (*Chondro-glossus* of Albinus,) arises from the lesser cornu and the cartilage, situate between the body and the greater cornu. The fibres of these three bundles are inserted into the lateral and inferior parts of the tongue. This muscle de-

presses the base of the tongue, or raises the os hyoides, when the tongue is fixed.

HYOID BONE, Hyoides, os.

HYOIDES, OS, *Os Bicoi' nē, Os hypsiloī' des, Os Lambdōī' des, Os Gull'turis, Os Lingua, Os Lingua'le, Upsiloī' des, Ypsiloī' des.* The Hyoid Bone; from the Greek  $\upsilon$  and  $\epsilon\iota\delta\omicron\varsigma$ , 'shape': having the form of the 'upsilon.' The hyoid bone is a very movable, osseous arch; of a parabolic shape; convex before, and suspended horizontally in the substance of the soft parts of the neck, between the base of the tongue and the larynx. This bone, separated entirely from the rest of the skeleton, is composed of five distinct portions, susceptible of motion on each other. The first and most central is the body of the hyoid, *Ossiculum medium Hyoidis*, which affords attachment to several muscles; the two others are lateral, and bear the name of *branches*, or *greater cornua*. The last two are smaller, situate above the other, and are known under the name *lesser cornua*. The os hyoides is ossified from five points.

HYOIDES PRIMUS, Sterno-hyoides.

HYOIDIS QUARTUS MUSCULUS, Omo-hyoides.

HYOSCY'AMUS, from  $\upsilon\varsigma$ , 'a swine,' and  $\kappa\upsilon\alpha\mu\omicron\varsigma$ , 'a bean.' *Faba suill'a, Bengi, Jusquiamus, Henbane, Hyoscyamus niger, Apollinā'ris altercum, Altercum, Ag'onē, Alterca' genon.* (F.) *Jasquiamus, Fève a Cochon, Hannebane, Potélee.* The leaves and seeds are the parts used in medicine. Their odour is narcotic and peculiar; taste insipid and mucilaginous. The virtues are yielded to proof spirit. The hyoscyamus is narcotic, anodyne, antispasmodic, and slightly stimulant. It is used as a substitute for opium, where the latter disagrees; and is applied, externally, as a cataplasm in cancer and glandular swellings. Dose, gr. iij to x of the powder.

The HYOSCYAMUS ALBUS or *White Henbane* possesses similar virtues.

HYOSCYAMUS LUTEUS, *Nicotiana rustica*—h. Peruvianus, *Nicotiana tabacum*.

HYACTICUS, Cathartic.

HYPÆMIA, from  $\upsilon\pi\omicron$ , 'beneath,' and  $\alpha\iota\mu\alpha$ , 'blood,' *Oligæ'mia*. Deficiency of blood.—Andral. Also, Extravasation of blood.

HYPAGOGÊ, Dejection.

HYPALÉIP'TRON, *υπαλειπτρον, Hypaleip'trum, Specill'um, Spatha*. A sort of spatula for spreading ointments.—Hippocr.

HYPAURO'SIS, from  $\upsilon\pi\omicron$ , 'under,' and  $\alpha\mu\alpha\upsilon\omicron\sigma\iota\varsigma$ . Imperfect amaurosis, *Meramauro'sis*.

HYPELATOS, Cathartic.

HYPE'NE,  $\upsilon\pi\eta\eta\eta$ . The beard, which grows under the chin, according to some. Also, the upper lip.—Vesalius.

HYPER,  $\upsilon\pi\epsilon\rho$ , 'above,' 'in excess.' Hence: HYPERACU'SIS, *Hyperac'os*; from  $\upsilon\pi\epsilon\rho$ , 'above,' and  $\alpha\kappa\omicron\upsilon\eta$ , 'audition.' Excessive sensibility of the organ of hearing.

HYPERÆ'MIA, *Hyperhæ'mia*, from  $\upsilon\pi\epsilon\rho$ , 'above,' and  $\alpha\iota\mu\alpha$ , 'blood.' Præternatural accumulation of blood in the capillary vessels.—Andral.

HYPEREMIA ACTIVA, Inflammation.

HYPERÆSTHESIS, from  $\upsilon\pi\epsilon\rho$ , 'above,'

and  $\alpha\iota\sigma\theta\eta\sigma\iota\varsigma$ , 'the faculty of feeling.' Excessive sensibility.

HYPERAPH'IA, from  $\upsilon\pi\epsilon\rho$ , 'in excess,' and  $\alpha\phi\eta$ , 'touch.' Excessive acuteness of touch.

HYPERAUXE'SIS, from  $\upsilon\pi\epsilon\rho$ , 'over,' 'above,' and  $\alpha\upsilon\zeta\eta\sigma\iota\varsigma$ , 'augmentation.' *Hyperæpidosis*. Excessive increase or enlargement of a part:—as *Hyperæuxē'sis Ir'idis*, an excessive enlargement of the iris so as to stop up the pupil.

HYPERBOLIC (*Altitude*),  $\upsilon\pi\epsilon\rho\beta\omicron\lambda\iota\kappa\omicron\varsigma$ , excessive. Galen, by this term, designates certain extraordinary attitudes, in which the limbs and vertebral column are in a state of complete extension or flexion.

HYPERBO'REAN, from  $\upsilon\pi\epsilon\rho$ , 'beyond,' and  $\beta\omicron\rho\epsilon\alpha\varsigma$ , 'the north wind.' A race of men, found at the extreme north of the two continents, in the vicinity of the polar circle. It includes the Thibetans, Ostiaks, Kamtschadales, Laplanders, Samoïedes, Esquimaux, &c.

HYPERCATHAR'SIS, *Hyperiné'sis, Hyperinos, Saperpurgā'tio*, from  $\upsilon\pi\epsilon\rho$ , 'in excess,' and  $\kappa\alpha\theta\alpha\rho\omicron\sigma\iota\varsigma$ , 'purgation.' Superpurgation.

HYPERCINESIA NERVOSA, see Irritable—h. Uterina, Hysteria.

HYPERCINESIS GASTRICA, Hypochondriasis.

HYPERCORYPHOSIS,  $\upsilon\pi\epsilon\rho$ , 'above,' and  $\kappa\omicron\rho\upsilon\phi\eta$ , 'the vertex;' 'the extreme point of any thing.' The lobes of the liver and lungs.—Hippocr.

HYPERCRIN'IA, from  $\upsilon\pi\epsilon\rho$ , 'above,' and  $\kappa\rho\iota\upsilon\omega$ , 'I separate.' A morbid increase in the quantity of the secretions.

HYPERCRISIS, *Hyperdiac'risis*, same etymon. *Superexer'ctio, Superævacuā'tio*. An excessive crisis, or evacuation; a flux.—A very violent, critical effort, or too copious critical evacuations.—Galen.

HYPERDIAC'RISIS, Hypercrisis.

HYPERDYNAMIA, Hypersthenia.

HYPERENCEPH'ALUS, from  $\upsilon\pi\epsilon\rho$ , 'above,' and  $\kappa\epsilon\phi\alpha\lambda\eta$ , 'the head.' A monster whose brain is situate in the skull.—G. St. Hilaire.

HYPERENDOSMOSE, Inflammation.

HYPEREPHIDROSIS, Ehidrosis.

HYPEREPIDOSIS, Hyperæuxesis.

HYPERESIA,  $\upsilon\pi\eta\eta\sigma\iota\alpha$ , 'a ministry.' This word is sometimes applied to the organs;—when it means function.

HYPERERETHISIA, from  $\upsilon\pi\epsilon\rho$ , 'in excess,' and  $\epsilon\theta\epsilon\tau\iota\omega$ , 'I excite.' Excessive irritability.

HYPERETRIA, Midwife.

HYPERGEUS'TIA, *Hypergeu'sis*: from  $\upsilon\pi\epsilon\rho$ , 'above,' and  $\gamma\epsilon\upsilon\sigma\iota\varsigma$ , 'taste.' Excessive sensibility of the organ of taste.

HYPERHÆMATOSIS, Inflammation.

HYPERHÆ'MIA, Hyperæmia.

HYPERICUM BACCIF'ERUM, *Arbus'cula gummif'era Brazilien'sis, Cau-opia*. A Brazilian tree, whose bark emits a juice, when wounded, which resembles Camboje.

HYPERICUM PERFOR'ATUM, *Fuga Dæmonum, Androsæ'mum, Co'rion, Perforated or Common St. John's Wort, Hypericum, (F.) Millepertuis ordinaire*. It is aromatic and astringent, and enters into a number of aromatic preparations; and, amongst others, into the *Falltrancks*. The *Oil of St. John's Wort, O'leum hyper'ici, Bal'sa-*

*num hyperici siniplex*, is made by infusing  $\frac{3}{4}$  iv of the flowers in a quart of *olive oil*. It is vulnerary.

**HYPERIDRO'SIS**, from  $\upsilon\pi\epsilon\rho$ , and  $\delta\iota\rho\omega\sigma\iota\varsigma$ , 'sweating.' Excessive sweating.

**HYPERINESIS**, Hypercatharsis.

**HYPERINOS**, Hypercatharsis.

**HYPERO-PHARYNGEUS**, Palato-pharyngeus.

**HYPERO'A**, from  $\upsilon\pi\epsilon\rho$ , 'upon,' and  $\omega\upsilon\sigma$ , 'a high place.' The palatine arch,—the base of the cranium.

**HYPEROA**, Palate.

**HYPEROS**, Pilon.

**HYPEROSPHERE'SIA**, from  $\upsilon\pi\epsilon\rho$ , and  $\sigma\phi\sigma\eta\rho\sigma\iota\varsigma$ , 'smell.' Excessive acuteness of smell.

**HYPEROSTOSIS**, Exostosis.

**HYPERPIMELE**. See Polysarcia.

**HYPERSARCHIDIOS**, Physconia.

**HYPERSARCOMA**, *Hypersarcosis*, *Hypersarxis*, from  $\upsilon\pi\epsilon\rho$ , 'above,' and  $\sigma\alpha\rho\acute{\alpha}$ , 'flesh.' A soft fungous excrescence, especially such as appears upon ulcerated parts.—Galen.

**HYPERSARCOSIS**, Excrescence, Fungosity.

**HYPERSARXIS**, Hypersarcoma.

**HYPERSTENICUS**, Active.

**HYPERSTHENIA**, *Hyperdynamia*, *Hyperzoödynamia*, *Status inflammatorius vcrus*, from  $\upsilon\pi\epsilon\rho$ , 'beyond,' and  $\sigma\theta\epsilon\nu\sigma$ , 'strength.' Superexcitement. A morbid condition, characterized by over-excitement of all the vital phenomena.

**HYPERTONIA**,  $\upsilon\pi\epsilon\rho$ , 'beyond,' and  $\tau\omicron\nu\sigma$ , 'tonc.' Excess of tone in parts. It is opposed to atony.

**HYPERTROPHÆMIA**, from  $\upsilon\pi\epsilon\rho$ , 'above,'  $\tau\rho\phi\eta$ , 'nourishment,' and  $\alpha\iota\mu\alpha$ , 'blood.' Plastic powers of the blood increased.

**HYPERTROPHY**, *Hypertrophia*, from  $\upsilon\pi\epsilon\rho$ , 'beyond,' and  $\tau\rho\phi\eta$ , 'nourishment.' The state of a part, in which the nutrition is performed with greater activity; and which, on that account, at length acquires considerable bulk.

**HYPERÜRESIS**, Enuresis.

**HYPERÜRESIS AQUOSA**, Diabetes.

**HYPERZOODYNAMIA**, Hypersthenia.

**HYPEX'ODOS**,  $\upsilon\pi\epsilon\acute{\alpha}\delta\omicron\delta\omicron\varsigma$ , from  $\upsilon\pi\omicron$ , 'beneath,' and  $\acute{\epsilon}\xi\theta\omicron\delta\omicron\varsigma$ , 'passing out.' An alvine discharge or flux.—Hippocr.

**HYPHÆMOS**, Subcruentus.

**HYPHYDROS**, Hydropic.

**HYPNOBASIS**, Somnambulism.

**HYPNOBATES**, Somnambulist.

**HYPNOBATESIS**, Somnambulism.

**HYPNODES**,  $\upsilon\pi\lambda\theta\eta\delta\eta\varsigma$ , from  $\upsilon\pi\omicron$ , 'under,' and  $\upsilon\pi\lambda\theta\omicron\varsigma$ , 'sleep.' One, in a state of slumber or somnolency.

**HYPNOLOG'ICA**, *Hypnolog'icæ*. The part of Dietetics which treats of sleep.

**HYPNOL'OGY**, *Hypnolog'ia*, from  $\upsilon\pi\lambda\theta\omicron\varsigma$ , and  $\gamma\omicron\gamma\omicron\varsigma$ , 'a discourse.' Same etymon. A treatise on sleep.

**HYPNOS**, Sleep.

**HYPNOTICUS**, Anodyne, Somniferous.

**HYPO**,  $\upsilon\pi\omicron$ , 'under,' 'sub.' Hence:

**HYPO**, Hypochondriasis.

**HYPOCAPNISMA**, Suffimentum.

**HYPOCAPNISMOS**, Fumigation.

**HYPOCAR'ODES**, *Subsopordus*, from  $\upsilon\pi\omicron$ , 'under,' and  $\kappa\alpha\rho\omicron\varsigma$ , 'a heavy sleep.' One

who is in a state approaching carus.—Hippocr.

**HYPOCATHAR'SIS**, from  $\upsilon\pi\omicron$ , 'beneath,' and  $\kappa\alpha\theta\alpha\rho\omicron\varsigma$ , 'purgation.' Too feeble purgation. A word opposed to hypercatharsis.—

**HYPOCAUSTUM**, from  $\upsilon\pi\omicron$ , 'beneath,' and  $\kappa\alpha\iota\omega$ , 'I burn.' A name given to a stove, or any such contrivance, to sweat in. Also, a furnace in any subterraneous place, used for heating baths:—*υποκαυστου*, *Balnearium*, *Vaporarium*.

**HYPOCERCHA'LEON**, from  $\upsilon\pi\omicron$ , and  $\kappa\epsilon\rho\chi\alpha\lambda\epsilon\omicron\varsigma$ , 'hoarse.' Roughness of the fauces affecting the voice.—Hippocr.

**HYPOCHLOROM'ELAS**, *Sub pallide nigricans*, from  $\upsilon\pi\omicron$ ,  $\chi\lambda\omicron\rho\omicron\varsigma$ , 'green,' and  $\mu\epsilon\lambda\alpha\varsigma$ , 'black.' A term applied to one whose skin is pale, with a blackish hue.—Hippocr., Galen.

**HYPOCHOILION**, Abdomen.

**HYPOCHON'DRE**, *Hypochondrium*, *Subcartilagin'um*, *Regio Hypochondriaca*, *Hypochondriac Region*, from  $\upsilon\pi\omicron$ , 'under,' and  $\chi\omicron\rho\delta\acute{\alpha}\omicron\varsigma$ , 'a cartilage.' Each lateral and superior region of the abdomen is so called, because it is bounded by the cartilaginous margin of the false ribs, which forms the base of the chest. There is a *right* and a *left* hypochondrium.

**HYPOCHONDRIAC**, *Hypochondriacus*; same etymon. Belonging to hypochondriasis. One labouring under hypochondriasis.

**HYPOCHONDRIACISMUS**, Hypochondriasis.

**HYPOCHONDRIASIS**. Same etymon. *Alusia hypochondriacis*, *Morbus hypochondriacus*, *Malum hypochondriacum*, *Hallucinatio hypochondriacis*, *Hypochondriacismus*, *Dyspcpsia hypochondriacis*, *Pas'sio hypochondriaca*, *Affectio hypochondriaca*, *Anathymid'sis*, *Hypericne'sis gastrica*, *Splenes*, *Melanchohia nervæ*, *M. flatulosa*, *Fomes ventriculi*, *Hypo*, *Spleen*,—the *Vapours*, the *English Malady*, *Low Spirits*. (F.) *Hypochondrie*, *Maladie imaginaire*, *Maladie Anglaise*. This disease is probably so called, from the circumstance of some hypochondriacs having felt an uneasy sensation in the hypochondriac regions. The disease seems really to be, as Pinel has classed it, a species of neurosis and of mental alienation, which is observed in persons, who, in other respects, are of sound judgment, but who reason erroneously on whatever concerns their own disease. Hypochondriasis is characterized by disordered digestion, without fever or local lesion; flatulence; borborygmi; extreme increase of sensibility; palpitations; illusions of the senses; a succession of morbid feelings, which appear to simulate the greater part of diseases; panics; exaggerated uncasiness of various kinds, chiefly in what regards the health, &c. Indigestion has, usually, been considered the cause of hypochondriasis. They are, unquestionably, much connected with each other: but there is every reason to believe, that the seat of the affection is really, though functionally, in the brain. The disease almost always appears at the adult age, most commonly in irritable individuals; and, in those exhausted, or rather in the habit of being exhausted, by mental labour, overwhelmed with domestic or public affairs, &c.

The treatment is almost entirely moral. The condition of the digestive function must, however, be accurately attended to.

**HYPOCHORESIS**, Digestion.

**HYPOCHYMA**, Cataract.

**HYPOCHYSIS HÆMATODES**, Hæmophthalmia.

**HYPOCISTUS**, Cytinus.

**HYPOCLEP'TICŪM**, from 'υπο, 'beneath,' and κλεπτο, 'I steal.' A chymical vessel, formerly used for separating oil from water.

**HYPOCOL'LON**, from 'υπο, 'under,' and κοιλον, 'a cavity.' A cavity, situate above the upper eyelid.

**HYPOCOPHOSIS**, Barycoëia, Deafness.

**HYPOCRANIUM**, from 'υπο, 'under,' and κρανιον, 'the cranium.' A collection of pus between the cranium and dura mater.

**HYPODERIS**, Epideris.

**HYPODERMIS**, Epideris.

**HYPODESMIS**, Bandage.

**HYPOGALA**, Hypopyon.

**HYPOGASTRIC**, *Hypogastricus*. Relating or belonging to the hypogastrium.

The **HYPOGASTRIC ARTERY**, *A. Iliaca inter'na*, *A. Iliaca post'rior*, *A. pel'viennæ*,—(Ch.) is the more internal of the two branches into which the primary iliac divides. It descends into the cavity of the pelvis and gives off a considerable number of branches, which arise, at times, separately, at others, by common trunks. These branches are, 1. The *posterior*, i. e. the ilio-lumbar arteries, lateral, sacral, and gluteal. 2. The *anterior*, i. e. the umbilical, vesical, and obturator. 3. The *internal*, the middle hemorrhoidal arteries, uterine, and vaginal in women. 4. The *inferior*, i. e. the *ischiatric arteries*, and internal pudic.

The **HYPOGASTRIC VEIN** furnishes nearly the same branches.

The **HYPOGASTRIC PLEXUS**, *Plexus sous-mésentérique* of Winslow is situate at the lateral and posterior parts of the rectum and the *bas-fond* of the bladder. It is formed by the sacral nerves and the inferior mesenteric plexus, and gives off numerous filaments, which accompany the arteries, that pass to the rectum and genital organs.

**HYPOGASTRIC OPERA'TION** of lithotomy, (F.) *Taille hypogastrique*. The high operation, or that practised above the pubes.

**HYPOGASTRION**, Abdomen.

**HYPOGASTRIUM**, *Hypogastrion*, from 'υπο, 'under,' and γαστρι, 'the stomach or belly.' *Etron*, *ητρον*, *Venter imus*, *V. parvus*, *Aqualic'ulus*, *Sumen*, *Rumen*. The lower part of the abdomen. The *Hypogastric region*, which extends as high as three fingers' breadth beneath the umbilicus, is divided into three secondary regions—one *middle* or *pubic*, and two *lateral* or *inguinal*.

**HYPOGASTROCE'LĒ**, from 'υπο, 'under,' γαστρι, 'the stomach or belly,' and κηλη, 'a tumour.' Hernia in the hypogastric region, occurring through the separated fibres of the lower part of the linea alba.

**HYPOGASTROCELE**, Hernia, hypogastric.

**HYPOGASTRORIXIS**, Eventration.

**HYPOGLOSSIS**, Ranula.

**HYPOGLOSSUM**, *Ruscus hypoglossum*, Ranula.

**HYPOGLOSSUS**, from 'υπο, 'under,' and γλωσσα, 'the tongue.' That which is under the tongue.

The **HYPOGLOSSAL NERVE**, *Nerf Hypoglosse* ou *Grand Hypoglosse*, *Hypoglossien*, (Ch.), *Lingual N.*, *Gustatory N.*, *Lingual'is M'edius*, is the ninth pair of nerves of many anatomists. It arises by ten or twelve very fine filaments from the grooves, which separate the corpora pyramidalia from the C. olivaria; issues from the cranium by the foramen condyloideum anterius; and divides, near the angle of the jaw, into two branches; the one the *cervical'is descendens* or *descendens noni*. It forms, with the cervical plexus, a large anastomotic arch, and furnishes branches to several of the muscles of the neck.

The other, the *lingual branch*, is the continuation of the principal trunk, and gives its numerous filaments to the muscles of the tongue and pharynx. The ninth pair communicates motion to the muscles to which it is distributed.

**HYPOGLU'TIS**, from 'υπο, 'under,' and γλουτος, 'the nates.' The lower and projecting part of the nates.—Goræus.

**HYPO'MIA**, from 'υπο, 'under,' and ομος, 'the shoulder.' The projecting part of the shoulder.—Castelli, Galen.

**HYPOMIA**, Axilla.

**HYPON'OMOS**, *Ulcus subtus depas'cens*, from 'υπο, 'under,' and τεμο, 'I feed.' A deep fistula or ulcer.

**HYPON'YCHON**, from 'υπο, 'under,' and ονυξ, 'the nail.' *Ecchym'oma Hyponychon*. Effusion of blood under a nail.

**HYPOPE'DIUM**, from 'υπο, 'under,' and πους, 'the foot.' A cataplasm for the sole of the foot.

**HYPOPH'ASIS**, from 'υπο, 'under,' and φαινω, 'I appear.' That state of the eyes in which the white only is seen through the opening of the eyelids.—Hippocrates.

**HYPOPHLEGMASIA**, Subinflammatio.

**HYPOPH'ORA**, from 'υπο, 'under,' and φερω, 'I carry.' A fistulous ulcer.—Galen.

**HYPOPTHALMIA**, Hypopyon.

**HYPOPTHAL'MION**, from 'υπο, 'under,' and οφθαλμος, 'the eye.' The part under the eye where œdema generally commences in chronic diseases.—Hippocrates.

**HYPOPHYSIS CEREBRI**, Pituitary gland.

**HYPOPLEURIOS**, Pleura.

**HYPOPO'DIA**, from 'υπο, 'under,' and πους, 'the foot.' Remedies, as sinapisms, which are applied under the foot.

**HYPO'PYON**, *Hypopyon*, *Hypophthal'mia*, *Pyophthal'mus*, *Empy'e'sis Oculi*, *Diapye'sis Oculi*, *Oculus purulentus*, *Lu'nell'a*, *Hypog'ula*, *Hypopyum lacteum*, *Py'osis*, *Abscessus Oculi*, *Farop'sis Staphylo'ma purulentum*; from 'υπο, 'under,' and πους, 'pus;' because the pus is under the cornea. This name has been given to small abscesses between the laminae of the cornea, as well as to different purulent collections in the chambers of the eye; hence, some pathologists have distinguished *Hypo'pyon of the chambers*, and *Hypo'pyon of the Cor'nea*. In abscesses of the chambers, the purulent matter is mixed with the aqueous humour, which it renders turbid; and is deposited particularly at the lower part of the eye; forming behind the

cornea a kind of whitish crescent, that rises, more or less, before the pupil, and closes it entirely or in part. It requires the use of local and general antiphlogistics, and sorbefacients. At times, it is necessary to puncture the cornea and evacuate the pus.

**HYPOPYUM LACTEUM**, Hypopyon.

**HYPORIN'ION**, from *υπο*, 'under,' and *ρει*, 'the nose.' That part of the beard which grows beneath the nose. The mustaches. Also, the upper lip.

**HYPOSAR'CA**, from *υπο*, 'under,' and *σαρξ*, 'flesh.' *Hyposarcidiosis*. Anasarca (q. v.) In Linné's and in Cullen's Nosology, it is synonymous with *Physconia* (q. v.)

**HYPOSARCIDIOS**, Anasarca, Hyposarcarca.

**HYOSPADIAS**, *Hypospadias*, from *υπο*, 'under,' and *σπαιω*, 'I draw.' A malformation, in which the canal of the urethra, instead of opening at the apex of the glans, terminates at its base, or beneath the penis, at a greater or less distance from the symphysis pubis. When the orifice of the urethra is very near the root of the penis, the scrotum is divided, as it were, into two great labia; and this malformation has often been taken for a case of hermaphroditism. Hypospadias is ordinarily incurable; and an idea has been entertained that it is the cause of impotence. It is not exactly so; but it renders impregnation less probable.

**HYOSPHAG'MA**, from *υπο*, 'under,' and *σφαζω*, 'I kill.' The coagulated blood, which is collected when an animal is killed and used for food. Also, an effusion of blood, especially under the conjunctiva.

**HYOSPHAGMA**, Hæmophthalmia.

**HYPOSTAPHYLE**, Staphylœdema.

**HYPOSTROPHE**, *υποστροφή*, change of position, from *υπο*, and *στροφω*, 'I turn.' Act of a patient turning himself. Also, relapse, return of a disease.—Hippocrates, *Fœsius*.

**HYPOTH'ENAR**, *Sub'vola*, from *υπο*, 'under,' and *θηναρ*, 'the palm of the hand or sole of the foot.'

The **HYPOTHENAR EMINENCE** is the fleshy projection of the palmar surface of the hand, which corresponds with the little finger, and is supported by the fifth metacarpal bone. This eminence is formed by four muscles: the *Palmaris brevis*, *Abductor minimi digiti*, *Flexor brevis minimi digiti*, and *Opponens minimi digiti*. The name *Hypothenar* has also been given to different muscles of the hand. The *Hypothenar minimi digiti* of Riolan comprehended the *Abductor*, *Flexor brevis* and *Opponens minimi digiti*; and his muscle, *Hypothenar pollicis*, corresponded to the *Abductor*, and a portion of the *Flexor brevis pollicis*. Winslow called muscle *petit hypothenar* ou *hypothenar du petit doigt*, the *Abductor minimi digiti*.

**HYPOTHENAR MINIMI DIGITI**, *Flexor parvus minimi digiti*—h. Minor metacarpeus, *Abductor minimi digiti*—h. Riolani, *Flexor parvus minimi digiti*.

**HYPOTHETON**, Suppository.

**HYPOTROPE**, Relapse.

**HYPOTROPIASMOS**, Relapse.

**HYPOUTRION**, Abdomen.

**HYPOZOMA**, from *υπο*, 'under,' and *ζωωμαι*, 'I bind round.' *Membrana succin'gens*. A

membrane or septum, as the mediastinum, diaphragm, &c.

**HYPOCRAS**, Claret.

**HYPSELOGLOSSUS**, Basioglossus.

**HYPSILOGLOSSUS**, Hyoglossus.

**HYPSOSIS**, Sublimation.

**HYPTIASMA**, Supination.

**HYPTIAS'MOS**, from *υπτιαω*, 'I lie with the face upwards.' Lying in a supine posture. Also, inversion of the stomach, as in nausea, regurgitation, or vomiting.—Hippocrates, Galen.

**HYSSOP, HEDGE**, *Gratiola officinalis*.

**HYSSOPITES**. Ancient name of a wine, of which *Hyssop* was the chief ingredient, and which Dioscorides extolled in chronic inflammation of the chest. It was regarded as diuretic and emmenagogue.

**HYSSOPUS**, from the Hebr. *Azob*, *Cassiala*, *Hyssopus officinalis*, *Common hyssop*. It has been chiefly used as an aromatic, stimulant, and pectoral, in the form of infusion.

**HYSTERA**, *υστερα*, 'υστερα', 'the uterus.' (q. v.) Hence:

**HYSTERA**, Secundines.

**HYSTERAL'GIA**, (F.) *Fortraiture*, from *υστερα*, 'the uterus,' and *αλγος*, 'pain.' Pain in the uterus. Hippocrates uses the word *Hysteralgies*, *υστεραλγεις*, for any thing that excites uterine pain; and, especially, for vinegar.

**HYSTERALGIA LOCHIALIS**, Dyslochia.

**HYSTERELOSIS**, Hysteroloxia.

**HYSTERIA**, *Hysterici's mus*, *Hysteri's mus*, *Hypericine'sia uteri'na*, *Utero adscensus*, *Suffocatio hyster'ica*, *Præfocatio matricis*, *Suspensio hysteria*, *Malum hyster'icum*, *Vapores uteri'ni*, *Vapours*, *Hyster'ics*, *Hyster'ic fit*, *Affectio hyster'ica*, *Passio hysterica*, *Strangulatio uteri'na*, from *υστερα*, 'the uterus.' (F.) *Hystérie*, *Mal de Mère*, *Maladie imaginaire*. A species of neurosis, classed amongst the spasmi by Sauvages and Cullen, and in the *Névroses de la génération*, by Pinel. It received the name *hysteria*, because it was reputed to have its seat in the uterus. It generally occurs in paroxysms; the principal characters of which consist in alternate fits of laughing and crying, with a sensation as if a ball set out from the uterus and ascended towards the stomach, chest, and neck, producing a sense of strangulation. If the attack be violent, there is, sometimes, loss of consciousness (although the presence of consciousness generally distinguishes it from epilepsy) and convulsions. The duration of the attacks is very variable. It appears to be dependent upon irregularity of nervous distribution in very impressible persons, and is not confined to the female; for well marked cases of hysteria are occasionally met with in men. During the fit:—dashing cold water on the face; stimulants, applied to the nose or exhibited internally, and antispasmodics form the therapeutical agents. Exercise, tranquillity of mind, amusing and agreeable occupations constitute the prophylactics.

**HYSTERICISMUS**, Hysteria.

**HYSTERICUS**, Hysteria.

**HYSTÉRIE**, Hysteria.

**HYSTERISMUS**, Hysteria.

**HYSTERITIS**, Metritis.

**HYSTEROCE'LE**, from *υστερα*, 'the womb,'

and κηλη, 'hernia.' *Hernia of the womb.* This is a rare disease. The womb may protrude through the inguinal or the crural canal, or through the lower part of the linea alba.

HYSTEROCELE NUDA, Prolapsus uteri.

HYSTERO-CYSTIC, *Hyst'rocyc'stiens*, from ὑστερα, 'the uterus,' and κυστις, 'the bladder.' Relating to the uterus and bladder. Some authors have called *Hystero-cystic Retention of urine*, that which is caused by the compression of the bladder by the uterus, during pregnancy.

HYSTERO-CYSTOCELĒ, from ὑστερα, 'the womb,' κυστις, 'the bladder,' and κηλη, 'a tumour.' *Hernia of the uterus complicated with displacement of the bladder.*

HYSTEROID, *Hystero'id'es.* *Hysteroi'd'es*, from ἡysteria, and εἶδος, 'resemblance.' Resembling hysteria;—as a hysteroid disease, symptom. &c.

HYSTEROLOXIA, *Hystero'lox'is, Obliq'uitas u'teri, Situs obli'quus uteri, Flexio seu versio incomple'ta uteri, Inclina'tio uteri, Metrolox'ia, Uterus Obli'quus, U. Inclina'tus*; from ὑστερα, 'the uterus,' and λοξος, 'oblique.' An oblique position of the uterus, occurring during pregnancy. *Anteversion of the uterus, Hysterolox'ia anterior, Antev'rsio u'teri, Prona'tio uteri, Venter propendens; and Retroversion of the uterus, Hysterolox'ia posterior, Retrov'rsio uteri, Re'flect'io uteri completu*, are varieties.

HYSTEROMALACIA, *Hysteramalaco'sis, Malaco'sis uteri, Putrescent'ia u'teri gravidi*, from ὑστερα, 'the uterus,' and μαλακία, 'softness.' Softness of the uterus, during pregnancy, which renders it liable to rupture in labour.

HYSTEROMANIA, Nymphomania.

HYSTERON'CUS, from ὑστερα, 'the uterus,' and ογκος, 'tumour.' A tumour of the uterus.

HYSTEROPHYSE, Physometra.

HYSTEROPHYSIS, from ὑστερα, 'the uterus,' and φυση, 'wind.' Distention of the uterus with air. *Emphysema uteri.*

HYSTEROPSOPHIA, Physometra.

HYSTEROPTO'SIS, from ὑστερα, 'the womb,' and πτωσις, 'fall.' *Prolapsus uteri.* Also *Inversio uteri*. In a general sense, a protrusion of any of the genital organs or of excrescences from them into the genital passages: *Ædoptosis.*

HYSTEROPTOSIS, Prolapsus uteri—h. Vaginæ prolapsus. Prolapsus vaginæ.

HYSTEROSTOMAT'OMUS, from ὑστερα, 'the womb,' στομα, 'orifice,' and τεμνειν, 'to cut.' An instrument invented by Coutouly, for dividing the os uteri, when it is important to deliver immediately, as in cases of convulsions.

HYSTEROTOMATOCIA, Cæsarean section.

HYSTEROTOMIA, Cæsarean section.

HYSTEROTOMUS, from ὑστερα, 'the womb,' and τεμνειν, 'to cut.' An instrument for dividing the womb by the vagina. It is a kind of *Bistouri caché*, and is intended to divide the cervix uteri.

HYSTRIASIS, Hystriciasis.

HYSTRICIASIS, *Hystriasis, Hyst'rix, Hystricis'mus, Cerostro'sis, Tricho'sis setosa*, from ὑστριξ, 'a hedgehog or porcupine.' A disease of the hairs, in which they stand erect like the quills of a porcupine.

HYSTRICISMUS, Hystriciasis.

HYSTRIX, Hystriciasis.

## I.

IAMATOLOGY, Materia medica.

IASIMOS, Curable.

IASIS, Curation.

IATERIA, Medicina.

IATRALEP'TES or IATRALEIP'TES, *Iatral'ep'ta, Med'icus Unguenta'rius*; from ιατρος, 'a physician,' and αλειψω, 'I anoint.' One who treats diseases by unguents, frictions, and by external means generally. Prodicus, a disciple of Æsculapius, was the chief of the Iatraliptes.

IATRALEIP'TICĒ, *ιατραλειπτικη τεχνη, Iatral'iptic method*, same etymon. The method of treating diseases adopted by the Iatraliptes, that is, by friction chiefly.

IATREU'SIS, *ιατρευσις*, The exercise of the healing art.

IATRICE, Medicina.

IATRINE, *ιατρινη*, a female practitioner of medicine.

IATREUSIOLO'GIA, from ιατρευσις, 'the exercise of the art of healing,' and λογος, 'a description.' The doctrine of the exercise of the healing art.—Reil.

IATRY'ON, *Iat're'on, Iatron*. The house of a physician or surgeon. Also, the physician's fee or honorarium.

IATROCHYMIA, Chymiatría, Chemistry, medical.

IATRO-MATHEMATICAL PHYSICIANS, Mechanical physicians.

IATROGNOM'ICA, *Iatrognom'icē*; from ιατρος, 'a physician,' and γινωσκω, 'I know.' A knowledge of medical objects.—Hufeland.

IATRON, Iatron.

IATROPHYSICS, Physics, medical.

IATROS, Physician.

IATROTECHNICE, Medicina, Therapeutics.

IBERIS, *Lepidium iberis*—i. Sophia, Cardamine pratensis.

IBICUIBA, *Becubia*, or *Becubia nux*. A species of nut from Brazil, the emulsive kernel of which is ranked amongst balsamic remedies.

IBIS, *ιβις*. A bird held sacred by the Egyptians. When sick, it is asserted, that it was wont to inject the water of the Nile into its fundament; whence, according to Langius, was learned the use of gylsters.

IBISCHA MISMALVA, Althæa.

IBIXUMA, Saponaria.

ICE, *Glacis, Frozen water*. (F.) *Glacc*. Iced water is much used internally, as the best re-

frigerant in fever. It is, also, applied externally, in cases of external inflammation, as well as in phrenitic, and hernial affections, &c.

ICE-COLD, *Icy cold*, (F.) *Froid glacial*. A very strong morbid sensation of cold, compared by the patient to that which would be produced by the application of pieces of ice.

ICELAND, MINERAL WATERS OF. Hot springs are found in every part of Iceland. The most noted of these is one called Geyser, two days' journey from Hecla, and near Skalholt. The diameter of the basin is 59 feet; and the height, to which the water is thrown, often more than 100. The heat of the water is 212°.

ICEPLANT, *Mesembryanthemum crystallinum*.

ICHOR, Sanics, (q. v.) *Sordes*, *Virus*, *Pus malignum*, *Tabum*. A thin, aqueous, and acrid discharge.

ICHOROIDES, Ichorous.

ICH'OROUS, *Ichorosus*, *Ichoroides*. Belonging to or resembling ichor.

ICHTHYOCOLLA, from *ἰχθυος*, 'a fish,' and *κόλλα*, 'glue.' *Colla Piscium*, *P'singlass*, *Fish glue*. (F.) *Icthyocolle*, *Colle de Poisson*. A name given to the dried fish bladder of the *Scipen'scr huso*, which is almost wholly composed of gelatine, and is employed in medicine in the formation of nutritive jellies. It is, also, occasionally, used in anatomical injections. The *English Court Plaster* is made with it.

ICHTHYOPHAGIST, *Icthyophagus*, from *ἰχθυος*, 'a fish,' and *φαγο*, 'I eat.' People, who feed habitually on fish;—generally the most uncivilized of mankind.

ICHTHYOSIS, from *ἰχθυος*, 'a fish,' from the resemblance of the scales to those of a fish—*Lepidosis Ichthyiasis*, *Lepira Ichthyosis*, *Lepidosis Ichthyosis*, *Fishskin*. A permanently harsh, dry, scaly, and, in some cases, almost horny texture of the integuments of the body, unconnected with internal disorder. Willan and Bateman have two varieties, *I. simplex*, and *I. cornea*. Alibert has three, the *I. nacrée* or *pearly*, the *I. cornée*, and the *I. pellagre* or *pellagra*.

ICHTHYOSIS PELLAGRA, Pellagra.

ICICA ARACOUCHINI. *Aracouchini* is a balsam extracted, by incision, from this tree in Guyana. The Galibis use it for healing wounds.

ICTÈRE, Icterus—i. *Bleu*, Cyanopathy—i. *des Nouveaux-nés*, Icterus Infantum—i. *Noire*, Melæna.

ICTERITIA ALBA, Chlorosis—i. *Rubea*, Erysipelas—i. *Rubra*, Erysipelas.

ICTERUS, *Icterus flavus*, *I. verus*, from *ἰκτις*, a species of weasel, whose eyes are yellow. *Morbus arcuatus* vel *arquatus*, *Aurigo*, *Aurigo*, *Morbus regius*, *Morbus lateolus*, *Cholelithia icterus*, *Cholihæmia*, *Suffusio aurigindosa*, *Œus flavus*, *I. Icteroites*, *Cachexia icterica*, *Fellis suffusio*, *Fellis obstructio*, *F Superfusio*, *Jaundice*, (F.) *Ictère*, *Jaunisse*, *Bile répandue*. A disease, the principal symptom of which is yellowness of the skin and eyes, with white fæces and high-coloured urine. It admits of various causes; any thing which, in fact, can directly or indirectly obstruct the course of the bile, so that it is taken into the mass of blood

and produces the yellowness of surface; the bile being separated by the kidneys causing yellowness of urine, and its being prevented from reaching the intestine, occasioning the pale-coloured fæces. The *Prognosis*, in ordinary cases, is favourable;—when complicated with hepatic disease, unfavourable.

The treatment is simple:—an emetic or purgative, given occasionally so as to elicit the return of the bile to its ordinary channels; light tonics; unirritating diet; cheerful company, &c.

The ICTERUS INFANTUM or *Yellow gum*, *Pædiæcrus*, *Aurigo nophytorum*, (F.) *Ictère des nouveu-nés* is a common affection and frequently dependent upon obstruction of the choledoch duct, by the meconium. It requires time; and castor oil, occasionally.

ICTERUS ALBUS, Chlorosis—i. *Melas*, *Melæna*.

ICTODES FETIDUS, *Dracontium fœtidum*.

ICTUS. A stroke or blow; *Plege*, *Plaga*, *Ictus solis*, a stroke of the sun. See *Coup de soleil*. *Ictus*, also, means the pulsation of the artery; and the sting of a bee or other insect.

ICTUS, Blow—i. *Cordis et arteriarum*, *Pulse*—i. *Solis*, *Coup de soleil*.

IDEA, *Idolum*, *idæa*, *Ideach* (? Paracelsus) *εἰδέα*. (F.) *Idée*. The image or representation of an object in the mind, from *εἶδω*, 'I see.'

IDEACH, *Idea*.

IDÉE, *Idea*.

IDEN'TITY (PERSONAL), *Iden'titas*, *Sameness*. It is sometimes a question in legal medicine to decide upon personal identity; that is, whether an individual is the same he represents himself to be. Physical marks form the great criteria.

IDEOL'OGY, *Ideolo'gia*, from *εἶδω*, 'I see,' and *λογος*, 'a discourse.' The science of ideas. Intellectual philosophy.

IDIO-MIASMATA. See *Miasm*.

IDIOCRASIS, *Idiosyncrasy*.

IDIOCTONIA, *Suicide*.

IDIOPATH'IA or IDIOPATHEIA, *Propopath'ia*, *Proprius affectus*, from *ιδιος*, 'peculiar, proper,' and *παθος*, 'an affection.' A primary disease; one not depending on any other.

IDIOPATH'IC, *Proprio habitû*, *Constitutio'nè p'opriâ pendens*, *Idiopath'icus*. Primary affections and their symptoms are so denominated.

IDIOSYNCRASY, *Idiosyncrasis*, *Idiotrophia*, *Idiocrasis*, *Idiosyncrasia*, from *ιδιος*, 'peculiar,' *συν*, 'with,' and *χρᾶσις*, 'temperament.' A peculiarity of constitution, in which one person is affected by an agent, which, in numerous others, would produce no effect. Thus shellfish, bitter almonds, produce urticaria in some, by virtue of their idiosyncrasies. Others faint at the sight of blood, &c.

ID'IOT, *Idiota*, foolish, stupid, ignorant. One who is fatuous or who does not possess sufficient intellectual faculties for the social condition, and for preserving himself from danger.

ID'IOTISM, ID'IOCY, ID'IOTCY, *Idiotismus*. Same etymon. *Mo'ria demens* *Ana'a*, *Mo'ria*, *Moro'sis*, *Fatu'itas*, *Ament'ia*. A spe-

cies of unsound mind, characterized by more or less complete obliteration of the intellectual and moral faculties. It may supervene of mania and melancholia, when it is termed *Dementia*, but more commonly depends upon original conformation. It may, also, be symptomatic of organic disease of the brain, which has come on after birth. Idiotism exists in various degrees. Some idiots are mere automata; exhibiting scarcely any sensibility to external impressions; others are capable of articulating a few words and possess certain mental emotions to a limited extent. The physiognomy is usually vacant; step unsteady, and articulation imperfect or broken. The affection is almost always incurable. †

IDIOTROPHIA, Idiosyncrasy.

IDOLUM, Hallucination, Idea.

IF, Taxus baccata.

IFFIDES, Plumbi subcarbonas.

IGNA'TIA AMA'RA. The systematic name of the plant, which affords *St. Ignatius's Bean*. *Faba Indica*, *Faba Sancti Ignatii*, *Faba febrifuga*. (F.) *Ignatie*, *Fève de Saint Ignace*. The seeds are bitter and poisonous; containing Strychnine, which see.

IGNATIE, Ignatia amara.

IGNAVIA, Inertia.

IGNIS, 'fire.' Hence:

IGNIS CALIDUS. 'A hot fire.' A violent inflammation, about to degenerate into gangrene.

IGNIS FRIGIDUS. 'A cold fire;' a sphacelus.

IGNIS PERSICUS, Anthrax, Herpes zoster—i. Sacer, Erysipelas, Herpes zoster—i. Sancti Antonii, Erysipelas.

IGNIS SAPIENTIUM. The ancient name for the heat of horses' dung.

IGNIS SYLVATICUS, *I. sylvestris*, *I. volaticus*, *I. volagrus*, *Strophulus sylvestris*, *S. volaticus*. (F.) *Feu sauvage*, *F. volage*. Probably, the *Porri'go larva'lis* or *crusta lactea* of infants. Also, a transient redness of the face and neck, sometimes observed in hysterical and chlorotic females.

IGNIS SYLVESTRIS, *I. sylvaticus*—i. Volagrius, *I. sylvaticus*—i. Volaticus, *I. sylvaticus*.

IGNIVORUS, Pyrophagus.

IGNYE, Poples.

IGNYS, Poples.

ILAPHIS, Arctium lappa.

ILECH, *Y'lech*, *Ile'as*, *Ilias'ter*, *Ylia'ter*, *Elias'ter*, *Ilias'trum*, *Ile'ados*, *Ile'id'os*, *Ile'id'adam*, *Ile'adus*. Terms, used by Paracelsus to designate the first matter:—the beginning of every thing.

ILEIADOS, Ilech.

ILEIADUM, Ilech.

ILEIAS, Ilech.

ILEIDOS, Ilech.

ILEO-DICLIDITE. See Typhus.

ILEO-LUMBAR, *Ileo-lumb'alis*, or *Ilio-lumbalis*. Belonging to the ilium and lumbar region.

The ILEO-LUMBAR or ILIO-LUMBAR ARTERY, *Iliaco-mus'cular* (Ch.), is given off by the hypogastric, opposite the base of the sacrum. It ascends behind the psoas muscle, and divides into two branches;—an ascending and transverse, which give off numerous ramifications to the neighbouring parts.

The ILEO-LUMBAR LIG'AMENT, *Ilio-lumbocor'*

*tebral* L., *Vertebro-Iliac* L., is a broad, membraniform, triangular ligament, extending horizontally from the transverse process of the 5th lumbar vertebra to the upper and posterior part of the iliac crest. It unites the vertebral column with the pelvis.

ILEON, *I'l'eon*, *Eil'eon*, *Intest'num circumvolu'tum*, from *ελεειν*, 'to turn,' 'to twist.' Anatomists have given this name to the longest portion of the small intestine, which extends from the jejunum to the cæcum. It was so called, from its forming a considerable number of convolutions.

ILEOSTIS, Ileus.

ILES, Flanks.

ILEUS, *Eil'eos*, from *ελεειν*, 'I twist or contract.' *Colica Ileus*, *Colica spasmod'ica*, *Ileus spasmod'icus*, *Chordap'sus*, *Passio Iliaca*,—the *Iliac Passion*, *Vol'vulus*, *Ileo'sis*, *Miseric'rdē mei*, *Convul'sulus*, *Tormentum*. (F.) *Colique de Misericorde*. A disease, characterized by deep-seated pain of the abdomen, stercoraceous vomiting, and obstinate constipation. It is often occasioned by hernia obstructing the passage of the feces through a part of the intestinal canal. The term Ileus has been applied to various affections—to simple nervous colic, intussusception, and to strangulation of the small intestine, &c. Various remedies have been employed;—the majority for the purpose of procuring alvine evacuations: e. g. purgatives, in draught, pill, or glyster; suppositories, tobacco glysters; pure mercury; leaden bullets; antispasmodics and narcotics; blisters to the epigastrium; ice by the mouth or injected into the rectum. Some of these have, occasionally, succeeded,—especially the tobacco glyster, and ice to the tumour, where the disease has been occasioned by strangulated hernia. It is very dangerous.

ILEUS FLAVUS, Icterus—i. Icteroides, Icterus.

ILEX AQUIFOLIUM. The systematic name of the *Common Holly*, *Aquifol'ium*, *Agri'folium*. (F.) *Houx*, *H. commun* ou *Chêne vert*. The leaves of this plant have been recommended as tonic, astringent, and antiseptic, and have been prescribed in atonic gout; intermittents; dyspepsia, &c. The *Ilicine* or active principle has also been advised. It is obtained by dissolving the alcoholic extract of the leaves of the holly in water, and successively treating it with the subacetate of lead, sulphuric acid, and carbonate of lime. The filtered and evaporated product is then dissolved in alcohol: the mixture filtered and evaporated in shallow vessels.

ILEX MAJOR. From the berries of this tree, called by the Spaniards, *Bellotas*, a juice may be expressed, which forms a slightly astringent emulsion with water, and has been recommended by some Spanish physicians in humid cough, hæmoptysis, &c.

ILEX VOMITORIA, ILEX CASINE, *Cass'ina*, *Dahoon holly*, *Apalachine Gallis*, *South-Sea Tea*, *Ev'ergreen*, *Cass'ine*, *Casse'na*, *Yaupon*, *Yopon*. (F.) *Thé des Apalaches*, *Houx Apalachine*, *Apalachine*, *Thé de la Mer du Sud*. A tree, indigenous in the southern parts of the United States. The leaves, when dried, are aromatic, stimulant, stomachic, and expectorant, and are

used as tea. When fresh, they are emetic and cathartic.

The ILEX PARAGUEN'SIS, a native of Paraguay, affords the celebrated *Mattee*, or *Maté*, drunk in place of the Chinese tea by the people of Paraguay.

#### ILIA, Flanks.

ILIAC, *Iliacus*, from *Ilia*, 'the flanks.' Relating to, or connected with, the flanks.

The ILIAC FOSSÆ are two in number: the *internal*, the depression—presented by the ilium on its interior, and at the upper part—in which the *Iliacus internus* is lodged:—and the *external*, an excavation on the outer surface of the same bone, occupied by the *Glutei muscles*.

The ILIAC CREST, *Crista Ilii*, is the upper margin of the ilium. (F.) *Crête Iliaque*. It is very thick, and curved like the italic S. It affords attachment to the broad muscles of the abdomen.

The ILIAC SPINES, or *Spinous Pro'd'esses of the Ilium*, are four in number. They are distinguished into *anterior* and *posterior*. Of the *anterior*, one is *superior*. It bounds the crista ilii anteriorly, and affords origin to the sartorius muscle. The other is *inferior*, and receives the tendinous origin of the rectus femoris.

The two POSTERIOR ILIAC SPINES are divided, like the anterior, into *superior* and *inferior*. They afford insertion to strong ligaments, which unite the ilium with the sacrum.

ILIACO-TROCHANTÉRIEN, *Iliacus internus*.

ILIACUS, I. *internus*—i. *Externus*, *Pyramidalis*.

The ILIACUS INTER'NUS MUSCLE, *Iliacus, Iliaco-trochantérien* (Ch.); *Femur moventium septimus, Iliac muscle*, is situate in the fossa iliaca, and at the anterior and superior part of the thigh. It is broad, radiated, triangular; and is attached, *above*, to the two upper thirds of the fossa iliaca, and to the internal part of the iliac crest:—*below*, it terminates by a tendon, which is common to it and the psoas magnus, and is fixed into the lesser trochanter. When this muscle contracts, it bends the pelvis on the thigh, and conversely. It is also a rotator of the thigh outwards, and prevents the trunk from falling backwards.

ILIAC ARTERIES, *Art'ria Iliaca*. This term has been given to several arteries. The *Primary Iliacs*, (F.) *A. Iliacæ primitivæ*,—*Pelvicrurales*, (Ch.) arise from the bifurcation of the aorta, opposite the body of the 4th lumbar vertebra, and descend, in a divergent manner; until, opposite the sacro-iliac symphysis, they divide into two considerable trunks,—the *internal iliac* or *Hypogastric* (which see) and the *external iliac*—*Portion Iliaque de la crurale*, (Ch.) This proceeds from the sacro-iliac juncture as far as the crural arch, when it assumes the name *Femoral Artery*. Before passing under the arch, it gives off two pretty considerable branches,—the *Epigastric* and the *Circumflexa Ilii*. This last, which is called, also, *anterior Iliac* by some anatomists,—*Circumflexe de l'Ilium*, (Ch.) leaves the external iliac at the crural arch. It ascends along the outer edge of the iliacus muscle, and divides into two branches,—an

*internal* and *external*. The *Iliac Region* is the side of the abdomen between the ribs and the hips.

The ILIACA INTER'NA MINOR vel *Ilio-lumbalis* is a small artery, which sometimes arises from the hypogastric; at others, from the beginning of the gluteal. It is sent, chiefly, to the psoas and iliacus internus muscles.

ILIADUS, Ilech.

ILIASTER, Ilech.

ILIASTRUM, Ilech.

ILINGOS, Vertigo.

ILIO-ABDOMINAL, *Obliquus internus abdominis*—i. *Aponévrosi-fémoral*, *Fascia lata muscle*—i. *Costal*, *Quadratus lumborum*—i. *Cresti-tibial*, *Sartorius*—i. *Femoral*, *Coxo-femoral*—i. *Ischii-trochantérien*, *Glutæus minimus*—i. *Lombo-costo-abdominal*, *Obliquus internus abdominis*—i. *Lumbalis*, *Ileo-lumbar*, *Iliaca interna minor arteria*—i. *Lumbi-costal* *Quadratus lumborum*—i. *Lumbo-vertebral ligament*, *Ileo-lumbar ligament*—i. *Prétibial*, *Sartorius*—i. *Pubo-costo-abdominal*, *Obliquus externus abdominis*—i. *Rotulicæ*, *Rectus femoris*—i. *Sacro articulation*, *Sacro-iliac articulation*—i. *Sacro-fémoral*, *Glutæus major*—i. *Trochantérien*, *Glutæus medius*—i. *Trochantérien petit*, *Glutæus minimus*.

ILIO-PECTINEA, belonging to the ilium and to the pecten or pubis.

The LINEA ILIO-PECTINEA, or *Linea innominata*, is the projecting line or ridge of the ilium and pubis, which forms part of the brim of the pelvis.

The ILIO-PECTINEAL EMINENCE is so called, from being formed by the junction of the ramus of the ilium with that of the pubis. It affords attachment to the psoas minor.

ILIO-SCROTAL, *Ilio-scrotalis*. Professor Chaussier calls thus the external twig, furnished by the anterior branch of the first lumbar pair of nerves. It distributes its ramifications to the muscles of the abdomen, and to the integuments of the groin, pubes, and scrotum.

ILION, *Ilium, Hanch Bone*. The largest of the three bones, which constitute the os innominatum in the fetus and child. It was probably so called, from its seeming to support the intestine ileon; or, perhaps, because its crest is curved upon itself, from εἰλεω, 'I twist,' 'I roll.' This portion of the os innominatum is usually so called in the adult. The posterior surface is called *Dorsum*, the internal *Venter*. The upper semicircular edge is the *Crista* or *Spine*: at the anterior part of which is the *anterior* and *superior spinous process*; and, below, the *anterior* and *inferior spinous process*. At the back part of the spine arc two *spinous processes*, the *posterior* and *superior*, and *posterior* and *inferior*. See *Iliac*.

ILITHY'IA, εἰλιθία, *Lucina, Juno Lucina*. The Goddess who presided over parturient females, with the Greeks and Romans.

ILLACHRYMATO, Epiphora.

ILLECEBRA, *Sedum*—i. *Major*, *Sedum telephium*.

ILLEGITIMATE, *Illegitimus*, from *in*, 'negation or opposition,' and *legitimus*, 'legitimate;' from *lex*, *legis*, 'law.' That which is contrary to law; which has not the conditions

required by law,—as an illegitimate birth—one out of wedlock, and admitting of medico-legal discrimination.

ILLEGITIMATE OR BASTARD FEVERS are those, whose progress is anomalous.

ILLICIUM ANISATUM, *Yellow-flow'ered Aniseed Tree*; *Anisum stellatum*, *Anisum Sinense*, *Semen Badian*, (F.) *Anis de la Chine* *A. étoilé*, *Badiane*. *Fam. Magnoliaceæ*; *Scx. Syst. Polyandria Polygynia*. The seeds are used like the aniseed. The same tree is supposed to furnish the aromatic bark, called *Cortex Anisi Stellati*, or *Cortex Lavola*.

ILLITIO, Inunction.

ILLOS, Eye.

ILLO'SIS, ἰλλοσις, from ἰλλος, 'the eye.' Distortion of the eyes. Strabismus, (q. v.)

ILLUSION, Hallucination.

ILLUSTRATIO, Illustration.

ILLUTAMENTUM, *Illutatio*. An ancient form for a topical medicine, with which the limbs of wrestlers and others were rubbed, especially after bathing.—Baccius.

ILLUTATIO, from *in*, 'upon,' and *lutum*, 'mud.' A word used, by the ancients, for the act of covering any part of the body with mud, with therapeutical views.

IMAGINATION, *Imaginatio*, *Figura'tio*, *Phantasia*, *Diano'ma*, from *ima'go*, 'image.' The faculty of forming in the mind an assemblage of images and combinations of ideas, which are not always in connexion with external objects.

IMBALSAMATION, Embalming.

IMBECILITY, *Imbecillitas*. Weakness, especially of the intellect.

IMBERBIS. One devoid of beard.

IMBIBITIO, Absorption.

IMBIBITION, *Imbibitio*, *Emp'tosis*, *Endosmose*, (q. v.) *Aspiration*, from *imbibere*, 'to drink, to imbibe.' The action, by which a body becomes penetrated by a liquid. See *Endosmose*. Many of the phenomena of absorption are owing to imbibition.

IMBEX NARIUM, Septum narium.

IMMERSUS, Subscapularis muscle.

IMMINENCE, *Imminencia*. Some authors have designated, by this term, the period which precedes the invasion of a disease; and when certain indications foretell its approach.

IMMISSOR, Catheter.

IMMOBILITAS, Acinesia—i. Pupillæ, Amaurosis.

IMMOVABLE APPARATUS. See Apparatus Immoveable.

IMPACTIO, *Impactio*, from *impingere*, 'to strike against.' A fracture of the cranium, ribs, or sternum, with depression of some of the fragments and projection of others externally. See *Epicisma*.

IMPEDIMENTUM, Emphragma.

IMPERATORIA, *I. Ostruthium*, *Ostruthium*, *Astralthia*, *Magistralthia*, *Masterwort*, (old Fr.) *Austruche*. The roots of this plant were formerly considered a *divinum remedium*. They are merely aromatic and bitter, and are not used.

IMPERFORATIO, *Imperforatio*, *Atr'isia*, *Atr'etis'nus*, *Cap'tus*. Absence of a natural aperture; as, of the mouth, anus, vulva, nostrils, &c. It is congenital, being dependent upon faulty conformation.

IMPETIGO, from *impeto*, 'I infest.' *Darta*, *Der'bia*, *Imp'etus*, *Peti'go*, *Ecpye'sis impeti'go*, *Phlysis impeti'go*, *Running Scall* or *Tetter*, (F.) *Dartre*. A word, used in various acceptations. In some writers, it is synonymous with itch. In others, it means a variety of herpes. Sauvages employs it as a generic term, under which he comprises syphilis, scorbutus, rachitis, elephantiasis, lepra, the itch, tinea, scrofula, &c. It forms, also, a genus in the class *Cachexia* of Cullen. In Bateman, it is the first genus of the 5th order, *Pustula*, and is defined—the *humid* or *running tetter*; consisting of small pustules, denominated *Psudracia*. It is unaccompanied by fever; not contagious, or communicable by inoculation. He has five species:—the *I. figurata*, *I. sparsa*, *I. erysipelato'des*, *I. scabida*, and *I. rodens*. See *Psoriasis*.

IMPETIGO PELLAGRA, Pellagra—i. Ulcerata, Zerna.

IMPETUS, Impetigo, Paroxysm.

IMPLICATI MORBI, *Implicati*, *complicati* *M. Diseases*, which exist in an organ; and produce, concurrently, disorder of the same function.

IMPLUVIUM, Embrocation.

IMPOSTHUME, Abscess.

IMPOTENCE, *Acratia*, *Impotentia*, (F.) *Impu'ssance*. Loss of power over one or more of the members.

Commonly, it means want of sexual vigour; incapacity for copulation, *Asty'sia*, *Asynodia*, *Adynamia virilis*. It has, also, been used synonymously with *sterility*. Impotence may be *absolute* or *relative*, *constitutional* or *local*, *direct* or *indirect*, *permanent* or *temporary*.

IMPOTENTIA, Adynamia.

IMPOVERISHED, *Eff'etus*, *Depauperatus*, (F.) *Appauveri*. 'Having become poor.' The Humorists applied this epithet to a humour, deprived of a part of its constituents, and particularly to the blood. This fluid was considered to be impoverished, when it was pale; without the proper consistence; and abounding in serum. It was, on the contrary, rich, in their opinion, when of a scarlet colour; possessing consistence; when it coagulated promptly, and the quantity of serum, compared with that of the clot, was by no means considerable. There is truth in these ideas.

IMPRÆGNATIO, Pregnancy.

IMPREGNATION, Fecondation.

IMPRES'SION, *Impres'sio*, *Pros'bolz*, (F.) *Emp'reinte*. A more or less deep indentation which certain organs seem to make on others. The inequalities observable on the bones; and which appear to be made by the suprajacent organs.

DIGITAL IMPRES'SIONS, are the depressions of various forms, observable at the inner surface of the cranium, which look, at first view, as if they were made with the fingers.

IMPUBER, *Impubes*, *Impu'bis*, *Ane'bus*, from *in*, 'negation,' and *puber'tas*, 'puberty,' (F.) *Impubère*. One who has not attained the age of puberty.

IMPUBES, Impuber.

IMPUSSANCE, Impotence.

INANI'TION, *Inani'tio*, *Inan'itas*, from *inanire*, 'to empty.' *Ceno'sis*. Exhaustion for

want of nourishment. To die from inanition is—to die from such exhaustion.

INAPPETENTIA, Anorexia.

INARTICULATIO, Enarthrosis.

INAURATION, *Inauratio*, from *in* and *aurum*, 'gold.' The gilding of pills or boluses.

INCANTAMENTUM, Charm.

INCANTATION, *Incantatio*, *Incantamentum*, *Epodē*. A mode of curing diseases by charms, &c., defended by Paracelsus, Van Helmont, and others.

INCARCERATIO, *Chatonnement*.

INCARCERATION, *Incarceratio*, from *in*, 'in,' and *carcer*, 'prison.' A hernia is said to be *incarcerated*, when, owing to constriction about the neck of the hernial sac or elsewhere, it cannot be reduced with facility. I. is sometimes used in the same sense as strangulation.

INCARVANS, *Incarvatus*, *Sarcoiticus*, *Pleroticus*, *Anapleroticus*. Medicines, which were fancied to promote the regeneration of the flesh. Certain bandages and the sutures have, also, been so called.

INCENDIUM, from *incendere*, 'to burn.' *Pyraea*, *πυρραία*, *Causis*, *Phlogosis*. A burning fever or any burning heat.—*Incendium febrile*, *Incensio*.—Willis. Inflammation, (q. v.) Phlegmon, (q. v.)

INCENDIUM SPONTANEUM, Combustion human.

INCENSIO, Incendium.

INCERATION, *Incercatio*, *Encercosis*, *εγκερσις*, from *cera*, 'wax.' The act of incorporating wax with some other body; or rather, that operation whose object is to communicate to a dry substance the consistence of wax.

INCERNICULUM, from *incernere*, 'to sift.' A strainer or sieve.

INCESSIO, Bath, half, Semicupium.

INCESSUS, Walking.

INCIDENTIA, from *incidere*, 'to cut.' (F.) *Incisifs*. This name was formerly given to medicines to which was attributed the property of cutting thick or coagulated humours. The fixed alkalies, hydrosulphurets of alkalies, sulphurous water, &c. were considered to belong to this class.

INCISIFS, Incidentia.

INCISIO, Cut.

INCISION, *Incisio*, *Encopē*, *Incisura*, *Tomē*, (F.) *Taillade*. A methodical division of the soft parts, with a cutting instrument.

INCISIVE, *Incisivus*; same etymon. The *Fossa incisiva*. *F. myrtifor-mis*, is a depression in the superior maxillary bone, above the incisor teeth.

THE INCISIVE OR INCISOR TEETH, *Dentes incisores*, *tomici*, *ctenae*, *dichasteres*, *gelasini*, *primores*, *rasorii*. The teeth which occupy the anterior part of the upper and lower jaws are so called, because they are used for cutting the food in the manner of cutting instruments.

INCISIVUS, MUSCULUS, Levator labii superioris proprius—i. inferior, Levator labii inferioris—i. Lateralis et pyramidalis, Levator labii superioris aequae nasi—i. Medius, Depressor aë nasi

INCISORIUM, *Tomion*. An operating table. A scalpel, (q. v.)

INCISURES DE SANTORINI, Santorini, fissures of.

INCISURA, Incision.

INCITABILITY, Irritability.

INCITAMENTUM, Stimulus.

INCITATIO, Stimulus.

INCLAVATIO, Gomphosis.

INCLINATIO, Decline.

INCLUSION, MONSTROSITY BY, *Emboitement*.

INCLUSUS, Wedged.

INCOMPATIBLE, from *in*, 'negation,' and *compatere*, 'to agree.' A substance, which cannot be prescribed with another, without interfering with its chemical composition or medicinal activity.

INCONTINENTIA, from *in*, 'negation,' and *contineo*, 'I contain.' 'Incontinence.' Inability to retain the natural evacuations. Abuse of the pleasures of love.

INCONTINENTIA URINÆ, Enuresis.

INCORPORATION, *Incorporatio*, *Corporeatio*, *Ensomatosis*. An operation, by which medicines are mixed with soft or liquid bodies, in order to give them a certain consistence. Also, the thorough admixture of various substances.

INCRASSANTIA, *Incrassativa*, *Inviscantia*, *Spissantia*, *Epyctica*, *Condensantia*, *Pachyntica*, *Pycnotica*. Medicines, which were formerly believed to possess the power of thickening the humours, when too thin. All mucilaginous substances were so regarded.

INCRASSATIVA, Incrassantia.

INCREASE, *Incrementum*, *Auxesis* from *in*, and *erescere*, 'to grow.' (F.) *Accroissement*. Augmentation of the size or weight of a body, by the application of new molecules around those which already exist.

INCREMENTUM, Augmentation, Increase.

INCRUCIATIO, Decussation.

INCRUSTATION, *Incrustatio*, *Comiasis*. The act of forming a crust on the surface of a body, as well as the crust itself. Also, the calcareous deposits or cartilaginous plates, which sometimes form in organs.

INCUBATION, *Incubatio*, from *incubare*, 'to lie upon.' This word, which is used in natural history for the sitting of birds upon their eggs, is employed, figuratively, in medicine for the period that elapses between the introduction of a morbid principle into the animal economy and the invasion of the disease.

INCUBUS. Same etymon. *Ephialtes*, *Ephialtes nocturnus*, *Ephialtes*, *Epilepsia nocturna*, *Asthma nocturnum*, *Pnigalion*, *Surcubus*, *Oneirodynia gravans*, *Erethismus oneirodynia*, *Nocturna oppressio*, *Epiholē*, *Nightmarc*, (F.) *Cauchemar*, *Cauchevicille*, *Cochemar*, *Oneirodynie gravative*. A sensation of a distressing weight at the epigastrium during sleep, and of impossibility of motion, speech, or respiration; the patient at length awaking in terror, after extreme anxiety. The nightmare is, often, the effect of difficult digestion or of an uneasy position of the body. At other times, it occurs in consequence of severe emotions. The sensation of suffocation was formerly ascribed to the person's being *possessed*, and the male spirits were called *incubes*—the female, *succubs*. The disease requires no particular treatment. The causes must be avoided.

INCUBUS VIGILANTIUM, *Ephialtes vigilantium*, *E. hypochondriaca*. This is produced during wakefulness; the sense of pressure being severe

and extending over the abdomen; respiration frequent, laborious, and constricted; eyes fixed; sighing, deep and violent; intellect undisturbed.

INCUNABULA, Swathing cloths.

INCUNEATIO. See Wedged.

INCURIA, Acedia.

INCURSUS ARTERIARUM, Pulse.

INCURVATIO, Gryposis.

INCUS, *Acmon*, *ακμων*, *Os incudi simile*, *Ossiculum Incudi seu molari denti comparatum*. (F.) *Enclume*. One of the small bones of the ear, so called from its fancied resemblance to a smith's anvil. It is situate in the cavity of the tympanum, between the malleus and orbiculare. Its body is articulated with the malleus; its *horizontal ramus*, which is the shortest, corresponds with the entrance of the mastoid cells, and its *vertical ramus* is articulated with the os orbiculare. The incus is composed of a compact tissue, and is developed from a single point of ossification.

INDEX, *Dig'itus indicato'rius*, *Lich'anos*, *Deicticos*, *δεικτικός*, from *indica're*, 'to point out.' The forefinger, index finger. See *Digitus*.

INDIANA (U. S.), MINERAL WATERS OF. A medicinal spring, near Jeffersonville, is much frequented. Its waters are strongly impregnated with sulphur and iron.

INDICANT, *Indicans*, *Endeicticos*, *ενδεικτικός*. (F.) *Indicatif*. Any thing which, in the course of a disease or in what precedes or accompanies it, concurs in pointing out the means to be used for its cure.

INDICATIF, Indicant.

INDICATING DAYS, *Dies Indices*, *D. Indicato'rii*, *D. contemplan'tes*. (F.) *Jours indicateurs*. Hippocrates and others have thus called the middle day of the septenary; because they imagined, that indications were sometimes given, then, of the crises which would occur in the last day of the septenary.

INDICATION, *Indicatio*, from *indico*, 'I show.' *Acusatio*, *Delatio*, *Endeix'is*, *ενδειξις*, *Bothemal'icum Seme'ion*. The object proposed in the employment of any means, which are had recourse to for the cure of disease. It may also be defined—the manifestation afforded by the disease itself of what is proper to be done for its removal.

INDICATOR, *Extensor proprius indicis*. See *Digitus*.

INDICUS COLOR, Indigo.

INDIGENCE. Want.

INDIG'ENOUS, *Indig'enus*. Whatever is native in a country, in opposition to *exotic*; as an *indigenous remedy*, *indigenous disease*, &c.

INDIGESTION, *Dyspepsia*.

INDIGNABUNDUS, *Rectus externus oculi*.

INDIGNATORIUS, *Rectus externus oculi*.

INDIGO, *Indigum*, *Indicus color*, *Pigmentum Indicum*. A dye-stuff, in small solid masses, of a deep azure blue colour and devoid of smell and taste. It is obtained, by a fermentative process, from the *Indigofera anil*, *I. argentea*, and *I. tinctoria*; and is sometimes used by the apothecary for colouring certain preparations. It has likewise been administered internally, of late, in spasmodic diseases, especially in epilepsy. The dose may be at first grains, but it may be elevated to drams.

INDIGO, *FAUX*, *Galega officinalis*—i. Weed *Sophora tinctoria*—i. Wild, *Sophora tinctoria*.

INDIGOFERA, *Sophora tinctoria*—i. Anil, see *Indigo*—i. *Argentea*, see *Indigo*—i. *Tinctoria*, see *Indigo*.

INDIGUM, Indigo.

INDISPOSITION, *Mala dispositio*. (F.) *Malaise*. A slight functional disturbance, which scarcely bears the name of disease.

INDOLENT, *Indolens*. Exhibiting little or no pain. An epithet, particularly applied to certain tumours.

INDOLENTIA, Anodynia.

INDUCTIO, *Αραγο'γή*, *απαγωγή*, from *inducere*, 'to extend upon.' It is used especially for the action of extending a plaster upon linen.

INDUCULA, Waistcoat, strait.

INDUMENTUM CORDIS, Pericardium—i. Nervorum, *Neurilema*.

INDURANS, *Sclerot'icus*. A medicine, which hardens the parts to which it is applied.

INDURATIO MALIGNA, *Scirrhus*—i. *Telæ cellulosaë neonatorum*, see *Induration*.

INDURATIO, *Induratio*, *Callositas*, *Indurescentia*, from *durus*, 'hard.' (F.) *Endurcissement*. That hardness, which supervenes, occasionally, in an inflamed part. It is one of the terminations of inflammation, and is owing to a change in the nutrition of the part. *Induration of the Cellular tissue*, *Induratio telæ cellulosaë neonatorum*, *Compact Oedema*, *Callositas Infantum*, *Induratio cellulosa*, *Scleremia*, *Scleremus*, (F.) *Endurcissement du tissu cellulaire*, is a disease which attacks infants a few days after birth, and which Chausser has proposed to call *Sclèrème*, from *σκληρός*, 'hard.'

INDURESCENTIA, Induration.

INDUSIUM, *Chitoniscos*, *χιτωνισκος*. Strictly, 'a shirt,' 'a small tunic;' but some anatomists have so called the amnios, (q. v.)

INEDIA, Fasting.

INERTIA, *Ignavia*. Sluggishness, inactivity.

Accoucheurs call *Inertia of the womb*, (F.) *Inertie de la matrice*, the diminution and even total cessation of the contractions of the uterus during labour; as well as the species of languor into which it sometimes falls after the expulsion of the fetus.

INERTIE DE LA MATRICE, Inertia of the womb.

INESIS, Cenosis.

INETHMOS, Cenosis.

INFANCY, *Infantia*, from *in*, 'negation,' and *fari*, 'to speak.' Early childhood, *Childhood*, *Nepiotes*, *Paid'ia*. (F.) *Enfance*. It generally includes the age from birth till the seventh year.

INFANS, *Paidion*, *Nepion*. (F.) *Enfant*. An infant; a child; one in infancy.

INFANTICIDE, *Infanticidium*, *Tecnoctonia*, from *infans*, 'a child,' and *ca'dere*, 'to kill.' The murder of a child newly born, or on the point of being born. It may be perpetrated by the mother, or by some other person; either by *commission*, i. e. in consequence of a direct, voluntary act;—or by *omission* of those cares, which are necessary for the preservation of the new-born.

INFARCTUS INTESTINORUM, Enteremphraxis.

INFECTION. See Contagion.

INFERNAL, *Infernus*; relating to hell. A name applied to a caustic—*Lapis infernalis*—on account of its strong, burning properties.

INFIBULATIO, *Infibulatio*, *Anteriorismus*; from *fil'ula*, 'a clasp,' (F.) *Bouclacant*. An operation, formerly practised, which consisted in passing a ring through the prepuce, after having drawn it over the glans;—in order to prevent coition.

The ancients employed infibulation with their gladiators, to preserve all their strength by depriving them of venery. In the women, to preserve their chastity, the ring was passed through the labia majora.

INFILTRATION, *Infiltratio*, from *filtra're*, 'to filter.' Effusion (q. v.) The accumulation of a fluid in the cells of any texture, and particularly of the cellular membrane. The fluid effused is ordinarily serous;—sometimes blood or pus, fæces or urine. When infiltration of serum is general, it constitutes *anasarca*; when local, *œdema*.

INFIRMARIUM, Hospital.

INFIRMARY, Hospital.

INFIRMATORIUM, Hospital.

INFIRMIER (F.) from *infirmus*, *Infirmarius*, *νοσοκομος*, *Nosokomus*, *Curator infirmorum*. One employed in a hospital or infirmary to take care of the sick.

INFIRMITY, *Infirmitas*, *Asthcnia*, *Invalutudo*. Any disease, which has become habitual, either owing to its chronic character, or its numerous relapses.

INFLAMMATIO, *Plegmon*—i. Abdominalis, *Encelitis*—*Inflammatio Cystidis fellæ*, *Cholecystitis*—i. *Faucium*, *Isthmitis*—i. *Gastritis*, *Gastritis*—i. *Hepatitis*, *Hepatitis*—i. *Interna*, *Empresna*—i. *Intestinorum*, *Enteritis*—i. *Jecinoris*, *Hepatitis*—i. *Lienis*, *Splenitis*—i. *Medullæ spinalis*, *Myelitis*—i. *Oculorum*, *Ophthalmia*—i. *Omenti*, *Epiploitis*—i. *Parotidum*, *Parotitis*, *Cyananche parotidæa*—i. *Pectoris acuta*, *Pneunonia*—i. *Prenitis*, *Prenitis*—i. *Pneumonica*, *Pneumonia*—i. *Renum*, *Nephritis*—i. *Retinæ*, *Dictyitis*—i. *Septi transversi*, *Diaphragmitis*—i. *Inflammatio Tympani*, *Tympanitis*—i. *Testium*, *Hernia humoralis*—i. *Uteri*, *Metritis*—i. *Uteri Catarrhalis*, see *Metritis*—i. *Ventriculi*, *Gastritis*—i. *Vesicæ*, *Cystitis*—i. *Vesicæ Felleæ*, *Cholecystitis*.

INFLAMMATION, *Inflammatio*, from *in*, 'within,' and *flamma*, 'flame,' 'fire;' *Phlegmonè*, *Phlogosis*, *Plegma'sia*, *Canso'na*, *Hypercondosmose* (Dutrochet), *Incendium*, *Hyperhæmatosis*, *Hyperæmia activa*, *Phlebotero'sis ephrac'tica*. It is so called in consequence of the acute or burning pain, felt in a part affected with it. An irritation in a part of the body occasioned by some stimulus;—owing to which the blood flows into the capillary vessels in greater abundance than natural, and those vessels become over-dilated and enfeebled; whence result pain, redness, heat, tension, and swelling; symptoms, which appear in greater or less severity, according to the structure, vital properties, and functions of the part affected, and its connexion with other parts, as well as according to the constitution of the individual.

The inflammations of the cellular and serous membranes greatly agree;—and those of the

mucous and skin: the former being more active, and constituting the *phlegmonous* variety;—the latter, the *erysipelatous*. Inflammation may end by resolution, suppuration, gangrene, adhesion, effusion, or induration. Each of the inflammations of internal organs has received a name according to the organ affected;—as, *gastritis*, *cephalitis*, *enteritis*, *hepatitis*, &c.

Besides the inflammations—essentially morbid, there is an instinctive kind established for the union of parts, which have been divided; whether the union takes place *immediately*, or by the aid of an intermediate body. This is the *adhesive inflammation*. See Adhesion, Calus, Cicatrix.

Broussais considers, that the term *inflammation* should include every local exaltation of the organic movements, which is sufficiently great to disturb the harmony of the functions, and disorganize the texture in which it is situate. He, farther, extends the name *inflammation* to irritations, which do not induce disorganization of the textures, and which had been previously, and are still, called *fevers*.

*External inflammation* is easily detected by the characters already mentioned:—*internal*, by disturbance of function and pain upon pressure; but the last sign is often not available. Both forms require the removal of all irritation, and the reduction of vascular excitement and nervous irritability: hence, blood-letting—local and general—sedatives, refrigerants, and counter-irritants become valuable remedies in almost all cases of inflammation.

INFLAMMATION OF THE BLADDER, *Cystitis*—i. of the Cæcum, *Typhloenteritis*—i. of the Diaphragm, *Diaphragmitis*—i. *Diphtheritic*, *Angina pellicularis*—i. of the Ear, *Otitis*—i. of the Eye, *Ophthalmia*—i. *du Foie*, *Hepatitis*—i. *General*, *Synocha*—i. *Internal*, *Empresna*—i. of the Iris, *Iritis*—i. of the Kidney, *Nephritis*—i. of the Larynx, *Laryngitis*—i. of the Liver, *Hepatitis*—i. of the Lungs, *Pneumonia*—i. *de la Matrice*, *Metritis*—i. of the Mesentery, *Mesenteritis*—i. of the Pericardium, *Pericarditis*—i. of the Peritonæum, *Peritonitis*—i. of the Pleura, *Pleuritis*—i. *Spongoid*, *Hæmatodes fungus*—i. *Spongoid*, see *Encephaloid*—i. of the Stomach, *Gastritis*—i. of the Testicle, *Hernia humoralis*—i. *des Tissus blancs*, *Angeioleucitis*—i. of the Tongue, *Glossitis*—i. *de la Vessie*, *Cystitis*—i. of the Womb, *Metritis*.

INFLAMMATIUNCULA, *Subinflammatio* (q. v.) A superficial and often insignificant inflammation of the skin, as in many cutaneous affections.—Most.

INFLAMMATORY, *Inflammat'orius*; belonging to inflammation;—as, *inflammatory tumour*, *inflammatory fever*, &c. The blood is said to be *inflammatory* when cupped or buffy.

INFLATIO, *Emphysema*, *Puffiness*, *Colica flatulenta*—i. *Parotidum*, *Cyananche parotidæa*—i. *Uteri*, *Physometra*.

INFLEXIO, *Campsis*.

INFLUENZA. The Italian for 'Influence,' *Morbus Vervecinus*, *M. Arietis*, *Cephalalgia contagiosa* (epidemics of the 16th and 17th centuries:) (F.) *Tac*, *Ladendo*, *Quinte*, *Florion*, *Coqueluche*, *Baraquette*, *Générole*, *Grippe*, *Follette*, *Grenade*, *Coquette*, *Petite Poste*, *Petit Courier*, *Allure*, *Epidemic catarrh*. A severe form

of catarrh occurring epidemically, and generally affecting a number of persons in a community. See Catarrh, Epidemic.

Gluge, from his investigations, considers that the following is the chronological order of the return of the influenza:—14th century, 1323, 1326—15th century, 1410, 1411, 1414—16th century, 1510, 1557, 1562, 1574, 1580, and 1593—17th century, 1658, 1669, 1675, 1693—18th century, 1708, 1712, 1729, 1732, 1733, 1742, 1743, 1761, 1762, and 1775—19th century, 1800, 1803, 1831, and 1833.

INFRA-ATLOIDÆUS, Sub-atloidæus.

INFRA-AXOIDÆUS, Sub-axoidæus.

INFRA-COSTALES. See Intercostal muscles.

INFRA-ORBITAR, Sub-orbitar.

INFRA-SCAPULARIS, Subscapularis.

INFRA-SPINA'TUS, from *infra*, 'beneath,' and *spina*, 'a spine.' Situate beneath the spine of the scapula.—*Infra-Spina'tis*.

FOSSA INFRA-SPINA'TA, (F.) *Fosse sous-épineuse*. A large excavation on the posterior surface of the scapula, beneath its spine. It is filled by the

INFRA-SPINA'TUS Muscle, *Grand Scapulo-trochitérien*, *Suprscapularis inferior*, (Ch.), (F.) *Sous-épineux*, which is broad, flat, and triangular. It is attached, by its base, to the three inner quarters of the fossa; and is inserted, by a long tendon, into the middle part of the great tuberosity of the humerus, (*Trochiter*.) It turns the arm outwards, and, when the arm is elevated, carries it backwards.

INFRINGENS, Corrigent.

INFUNDIB'ULUM, a Latin word signifying a Funnel:—*Chou'nè*, *Chonos*. (F.) *Entonnoir*. A name, given to many parts which, more or less, resemble a funnel. It is particularly appropriated to the following organs:—

1. THE INFUNDIB'ULUM OF THE BRAIN, (F.) *Pelvis seu Choana*, seu *Cyathus*, seu *Scyphus*, seu *Concha*, seu *Luci'na*, seu *Embotem*, seu *Aqueductus*, seu *Lubrum*, seu *Conca'vitas conchuldris*, seu *Processus orbiculdris Cer'ebri*, *Entonnoir du ventricule moyen du cerveau*—*Tige pituitaire*, *Tige sus-sphénoïdale*. A depression in the inferior paries of the middle ventricle, above the pituitary gland. It was, anciently, regarded as a canal by which the fluid, collected in the ventricles of the brain, was evacuated and poured into the nasal fossæ.

2. THE INFUNDIBULA OF THE KIDNEYS. See Calix.

3. THE INFUNDIBULUM OF THE ETHMOID BONE. It is one of the anterior cells of that bone, which is broad and expanded above, and narrow below; opening, above, into the frontal sinus; below, into the anterior part of the middle meatus of the nasal fossæ.

In *Surgery*, infundibula are used to direct steam or vapours; to conduct the actual cautery to certain morbid parts, &c.

INFUNDIBULUM OF THE COCHLEA, *Scyphus Vicussenii*, *S. auditorius*, *Cucullus*, *Canal'is Scall'rum commun'is*. This, with the modiolus, forms the nucleus around which the gyri of the cochlea pass. It is an imperfect funnel, the apex of which is common with that of the modiolus; and the base is covered with the apex of the cochlea, termed *Cu'pola*.

INFUNDIBULUM LACHRYMALE, Lachrymal Sac.—i. Venticuli, Œsophagus.

INFU'SION, *Infusio*, *En'chysis*, from *infundere*, 'to pour in,' 'to introduce.' A pharmaceutical operation, which consists in pouring a hot or cold fluid upon a substance, whose medical virtues it is desired to extract. *Infusio* is, also, used for the product of this operation,

In *Surgery*, infusion—*Chirurg'ia infusoria*, *Ars clysm'dtica nova*—is the act of introducing into the veins, medicinal substances, by aid of an instrument called *Infusor*. This mode of introducing medicines was called the *Ars infusoria*.

INFUSION OF CALUMBA, *Infusum calumbæ*, —i. of Cascarella, *Infusum cascariellæ*—i. of Catechu, *Infusum catechu compositum*—i. of Chamomile, *Infusum anthemidis*—i. of Cinchona, *Infusum cinchonæ*—i. of Cloves, *Infusum caryophyllorum*—i. of Cusparia, *Infusum cuspariæ*—i. of Foxglove, *Infusum digitalis*—i. of Gentian compound, *Infusum gentianæ compositum*—i. of Horseradish, compound, *Infusum armoraciæ compositum*—i. of Linseed, *Infusum lini compositum*—i. of Mint, compound, *Infusum menthæ compositum*—i. of Orangepeel, compound, *Infusum aurantii compositum*—i. of Quassia, *Infusum quassiæ*—i. of Rhubarb, *Infusum rhei*—i. of the Rose, *Infusum rosæ compositum*—i. of Senna, *Infusum senis compositum*—i. of Simarouba, *Infusum simaroubæ*—i. of Slippery elm, *Infusum ulmi*—i. of Tobacco, *Infusum tabaci*—i. of Valerian, *Infusum valerianæ*.

INFU'SUM, *En'chyma*. The product of an infusion.

INFUSUM ACACIÆ CATECHU, I. *Catechu compositum*—i. *Amarum vinosum*, *Vinum gentianæ compositum*.

INFUSUM ANTHEM'IDIS, *Infusion of Chamomile*. (*Anthemid. flor.*  $\mathfrak{z}\text{ij}$ . *aq. fervent.*  $\text{lbss}$ . Macerate for ten minutes in a covered vessel, and strain. *Ph. L.*) Dose,  $\mathfrak{z}\text{j}$  to  $\mathfrak{z}\text{iss}$ .

INFUSUM ARMORACIÆ COMPOSITUM, *Compound Infusion of Horseradish*. (*Armorac. rad. recent. concis. sinapis sem. cont. sing.*  $\mathfrak{z}\text{ij}$ . *aque fervent.*  $\text{lbj}$ . Macerate for two hours, strain, and add *sp. armorac. comp.*  $\mathfrak{z}\text{j}$ . *Ph. L.*) Dose,  $\mathfrak{z}\text{j}$  to  $\mathfrak{z}\text{iiij}$ .

INFUSUM AURANTII COMPOSITUM, *Compound Infusion of Orange Peel*. *Aurant. cort. sicc.*  $\mathfrak{z}\text{ij}$ . *limon. cort. recent.*  $\mathfrak{z}\text{j}$ . *caryoph. cort.*  $\mathfrak{z}\text{ss}$ . *aq. fervent.*  $\text{lbss}$ . Macerate for 15 minutes, and strain. *Ph. L.*) Dose,  $\mathfrak{z}\text{iss}$  to  $\mathfrak{z}\text{ij}$ .

INFUSUM CALUMBÆ, I. *Calombæ*; *Infusion of Columba*. (*Calumb. rad. concis.*  $\mathfrak{z}\text{ij}$ . *aq. fervent.*  $\text{lbss}$ . Macerate for two hours, and strain. *Ph. L.*) Dose,  $\mathfrak{z}\text{iss}$  to  $\mathfrak{z}\text{ij}$ .

INFUSUM CARYOPHYLLO'RUM, *Infusion of Cloves*. (*Caryoph. contus.*  $\mathfrak{z}\text{j}$ . *aq. fervent.*  $\text{lbss}$ . Macerate for two hours, and strain.) Dose,  $\mathfrak{z}\text{iss}$  to  $\mathfrak{z}\text{ij}$ .

INFUSUM CASCARI'LLÆ, *Infusion of Cascarella*. (*Cascariell. cort. cont.*  $\mathfrak{z}\text{ss}$ . *aq. fervent.*  $\text{lbss}$ . Macerate for two hours, and strain. *Ph. L.*) Dose,  $\mathfrak{z}\text{iss}$  to  $\mathfrak{z}\text{ij}$ .

INFUSUM CASSIÆ SENNÆ, I. *Sennæ compositum*.

INFUSUM CATECHU COMPOSITUM, *Infusum Catechu*, I. *Acaciæ Catechu*; *Infusion of Ca-*

*techu.* (*Catechu ext.* ʒiiss, *cinnam. cort. cont.* ʒss, *aq. ferv.* lbss. Macerate for an hour, and strain.) Dose, ʒiiss to ʒij.

INFUSUM CINCHO'NÆ, *I. Cinchonæ lancifoliae, I. Cinchonæ sine calore; Infusion of Cinchona.* (*Cinch. lanciful. cort. contus.* ʒss, *aq. fervent.* lbss. Macerate for two hours, and strain. *Ph. L.*) Dose, ʒj to ʒij. The Pharmacopœia of the United States has an *Infusum Cincho'næ cum Squâ Calcis*, and an *Infusum Cincho'næ cum Magnesiâ.*

INFUSUM CUSPA'RIÆ, *Infusion of Cuspn'ria.* (*Cuspar. cort. contus.* ʒij, *aq. ferv.* lbss. Macerate for two hours, and strain. *Ph. L.*) Dose, ʒj to ʒij.

INFUSUM DIGITA'LIS, *I. Digitalis purpurea; Infusion of Foxglove.* (*Digital. ful. exsicc.* ʒj, *aq. ferv.* lbss. Macerate, and add *sp. cinnam.* ʒss.) Dose, ʒj.

INFUSUM GENTIA'NÆ COMPOS'ITUM, *Compound Infusion of Gentian.* (*Gent. rad. concis., aurantii cort. exsicc. sing.* ʒj, *limon. cort. recent.* ʒij, *ng. ferv.* ʒxij.) Dose, ʒj to ʒij.

*Marsden's Antiscorbutic Drops*, an empirical preparation, consist of a solution of corrosive sublimate in an infusion of gentian.

INFUSUM LINI COMPOS'ITUM, *I. Lini usitatis-simi; Infusion of Linsced.* (*Lini usitat. sem. cont.* ʒj, *glycyrrh. rad. cont.* ʒiv, *aqua fervent.* lbij. Macerate for four hours, and strain. *Ph. L.*) Dose, a teacupful, *ad libitum.*

INFUSUM MENTHÆ COMPOS'ITUM, *Compound Infusion of Mint.* (*Ful. menth. sat. sic.* ʒij, *aq. fervent. q. s. ut colentur* ʒvj. Macerate for half an hour; and, when cold, strain: then add—*sacch. alb.* ʒij, *ol. menth. sat.* gtt iij, dissolved in *tinct. card. c.* ʒss. *Ph. D.*) Dose, ʒj to ʒij.

INFUSUM PICIS EMPYREUMATICÆ LIQUIDÆ. See *Pinus sylvestris*—i. *Picis liquidum.* See *Pinus sylvestris.*

INFUSUM QUASSIÆ, *I. Quassia excel'sæ; Infusion of Quassia.* (*Quassia lign. conc.* ʒj, *aq. ferv.* lbss. Macerate for two hours, and strain. *Ph. L.*) Dose, ʒj to ʒiv.

INFUSUM RHEI, *Infusion of Rhubarb.* (*Rhei rad. concis.* ʒj, *aq. ferv.* lbss. Macerate for two hours, and strain. *Ph. L.*) Dose, ʒj to ʒiv.

INFUSUM ROSÆ COMPOS'ITUM, *I. Rosæ Gallicæ; Infusion of the Rose.* (*Ros. gallic. pctal. exsicc.* ʒiv, *aq. fervent.* lbiiiss, *acid. sulph. d.* ʒij, *sacch. purif.* ʒiiss. Add the water, and afterwards the acid;—macerate for half an hour; strain, and add the sugar.) Dose, ʒiiss to lbss.

INFUSUM SENNÆ COMPOS'ITUM, *I. Cassiæ Sennæ, I. Sennæ simplex, Infusion of Senna.* (*Sennæ fol.* ʒiiss, *zingib. rad. con.* ʒj, *aq. ferv.* lbj. Macerate for an hour, and strain. *L. D.*) Dose, ʒj to ʒiv.

The *Black Draught*, *Haustus niger*, is usually formed of this infusion. It may be made of *infus. sennæ comp.* ʒv, *aq. cinnam.* ʒj, *mannæ ʒiv*, *magns. sulph.* ʒvj. Dose, a wine-glass. *Selcaij's Prepared Essence of Senna* is a concentrated infusion of the leaves, in combination with an alkali.

INFUSUM SIMAROU'BIÆ, *Infusion of Simarouba.* (*Simaroub. cort. cont.* ʒss, *aq. fervent.* lbss. Macerate for two hours, and strain. *Ph. L.*) Dose, ʒij.

INFUSUM TAB'ACI, *Infusion of Tobacco.* (*Tu-*

*baci. fol.* ʒj, *aq. ferv.* lbj. Macerate for an hour, and strain. *Ph. L.*)

INFUSUM ULMI, *Infusion of Slip'pery Elm.* This preparation, in the Pharmacopœia of the United States, is made by infusing one ounce of *slippery elm bark*, in a pint of *boiling water.*

INFUSUM VALERIA'NÆ, *Infusion of Valerian.* (*Rad. valerian. in erass. pulv.* ʒij, *aq. fervent.* ʒvij. Macerate for an hour, and strain. *Ph. D.*) Dose, ʒiiss to ʒij.

INGE'NIUM, (*Morbi.*) The genius of a disease. This word is employed, especially by the French, synonymously with *nature.* They speak, for instance, of *Génie inflammatoire, bilieux, &c.* Some, also, use *génie* in the place of *type* of an intermittent.

INGESTA. Substances, introduced into the body by the digestive passages; as food, condiments, drinks, &c.

INGLU'VIES, *Aplestia, Victus intemporan'tia*:—Gluttony, Insatiableness; also, the *Crop* or *Craw* of Birds, and the Pharynx, (q. v.)

INGRAS'SIAS, APOPH'YSES OF, the lesser alæ of the sphenoid bone.

INGUEN, *Eubon, βουβων*, 'the groin,' *Ἰδαων, αἰδοιν, Hep'atis emunctoria.* (F.) *Ainc.* The oblique fold or depression, which separates the abdomen from the thigh. It is only, properly speaking, a line that extends from the anterior and superior spinous process of the ilium to the middle part of the horizontal ramus of the pubis.

INGUINAL, *Inguina'lis*, from *inguen*, 'the groin.' Belonging or relating to the groin. This epithet has been given to various parts met with in the region of the groin or inguinal region.

THE INGUINAL or ABDOM'INAL RING, *An'nulus abdom'inis*, (F.) *Anneau inguinal*, is the inferior aperture of the inguinal canal.

THE INGUINAL CANAL is a canal, about two inches in length, proceeding obliquely downwards, inwards, and forwards at the lower part of the abdomen; through which passes the spermatic cord, in man: and the round ligament of the uterus, in women. This canal is formed, inferiorly and anteriorly, by the aponeurosis of the greater oblique muscle; posteriorly, by the *fascia transversalis*, which is joined to the preceding aponeurosis, and forms with it a deep channel, into which are received the lesser oblique and transversalis muscles. The inguinal canal has two apertures: the one, the *lower* and *inner*, is called the *inguinal* or *abdominal ring*. It is bounded by two strong tendinous pillars, which fix it—the innermost to the symphysis, the outermost to the spine of the pubis. The *upper and outer aperture* is formed by the *fascia transversalis*. From the edge of this aperture arises a membranous funnel,—a prolongation of the *fascia transversalis*,—which receives the spermatic vessels; forms their proper sheath, and accompanies them as far as the testicle. On its inside lies the epigastric artery. Above it, is the lower edge of the transversalis muscle; and, below, it is bounded by the channel of the greater oblique. By following the oblique direction of this canal, and passing, consequently, on the outside of the epigastric artery, the viscera are displaced, so as to constitute internal inguinal hernia,

The **INGUINAL ARTERY** is that portion of the femoral artery, situate immediately beneath the crural arch in the inguinal region.

**INGUINO-CUTA'NEUS.** A name, given by Professor Chaussier to the middle ramus of the anterior branch of the first lumbar nerve: because it sends its numerous filaments to the groin, scrotum, and to the skin of the superior part of the thigh.

**INHÆRENS, Inherent.**

**INHALATIO, Absorption.**

**INHÅLER, MUDGE'S,** an apparatus for inhaling the steam of hot water, in affections of the air-passages. It consists of a pewter tankard, provided with a lid, into which a flexible tube is inserted. Through this, the vapour is inhaled

**INHERENT, Inhærens,** that which adheres, or which is joined or united to any thing.

The **INHERENT CAUTERY, (F.) Cautère inhérent,** is the actual cautery, left in contact with a part until it is reduced to the state of a deep eschar.

**INHUMA'TION,** from *in'humo*, 'I put into the ground.' *Inhumatio.* The *sepulture of the dead.* This belongs to the subject of medical police.

**INION, ινιον.** Some of the Greek physicians gave this name to the occiput (q. v.) others, to the back part of the neck, and the muscles of the occiput. Blanchard says, it is the commencement of the spinal marrow.

**IN'TIS,** from *ις, gen. ιτος,* a fibre. Fibrous inflammation.

**INITIUM, Arche—i.** *Asperæ arteriæ, Larynx.*

**INJACULA'TIO,** a term, employed by Van Helmont to designate an acute pain of the stomach, with rigidity and immobility of the body.

**INJECT'ED,** from *injec'ere,* 'to throw into.' The face and other parts are said to be *injected,* when the accumulation of blood in the capillary vessels gives them an evident red colour. A subject or part of a subject is, also, said to be *injected,* when its vessels have been filled, by the anatomist, with an appropriate composition.

**INJECT'ION, Injectio, Εας'βολή, εισβολή;** same etymon. The act of introducing, by means of a syringe or other instrument, a liquid into a cavity of the body.

The liquid injected is also called an *injection.* Anatomists use injections for filling the cavities of vessels, in order that they may be rendered more apparent, and their dissection be facilitated. For this purpose they use syringes of different dimensions, and various materials. The most common injections are made of soot, wax, and turpentine, coloured with lamp-black, vermilion, &c.

There are three kinds chiefly used by anatomists,—the *coarse,* the *fine,* and the *minute.* The following are formulæ for each.

**COARSE INJECTION.**

No. 1.

- Pure yellow wax, oz. xvj.
- Bleached rosin, oz. viij.
- Turpentine varnish, by measure, oz. vj.

No. 2.

- Yellow rosin, lb. ij.
- Yellow wax, lb. j.
- Turpentine varnish, a sufficient quantity to make the mixture flexible when cold.

No. 3.

- Tallow, lb. ij.
  - White wax, oz. x.
  - Common oil, oz. vj.
  - Venice turpentine, oz. iv.
- Mix and liquefy over a slow fire or over boiling water.

To make any of these mixtures

- Red—add *vermilion,* oz. ij.
- Yellow—*King's yellow,* oz. iiss.
- White—*best flake white,* oz. vss.
- Pale blue { *best flake white,* oz. iiss.
- { *fine blue smalt,* oz. iiss.
- Dark blue—*blue verditer,* oz. xss.
- Black—*lamp-black,* oz. j.
- Green { *powdered verdigris,* oz. ivss.
- { *best flake white,* oz. iss.
- { *powdered gamboge,* oz. j.

**FINE INJECTION.**

- Brown spirit varnish, oz. iv.
- White spirit varnish, oz. iv.
- Turpentine varnish, oz. j.

To make this mixture

- Red—add *vermilion,* oz. j.
- Yellow—*King's yellow,* oz. j.
- White—*best flake white,* oz. ij.
- Light blue. { *fine blue smalt,* oz. iss.
- { *best flake white,* oz. j.
- Dark blue—*blue verditer,* oz. iv.
- Black—*lamp black,* oz. ss.

**MINUTE INJECTION.**

- Take of *transparent size,* broken to pieces, or *Isinglass,* oz. viij.
- Water, lb. iss. Dissolve.

To make this mixture

- Red—add *vermilion,* oz. v.
- Yellow—*King's yellow,* oz. iv.
- White—*best flake white,* oz. v.
- Blue—*fine blue smalt,* oz. viij.
- Green { *powdered verdigris,* oz. ij.
- { *best flake white,* dr. ij.
- { *powdered gamboge,* dr. j.
- Black—*lamp black,* oz. j.

**COLD INJECTION.**

- White lead and red lead, each oz. iv; *linseed oil,* enough to form a thick paste, when they are rubbed well together. Liquefy this paste with *turpentine varnish,* oz. viij.

The advantage of this mixture is,—that the subject need not be heated.

In order to inject the arteries, the injection must be forced from the great trunks towards their ultimate ramifications. To inject the veins, on the contrary, it is indispensable, on account of their valves, to send the injection from the smallest divisions towards the greater. The lymphatics are usually injected with mercury.

The practitioner injects, by forcing, with a syringe, liquids, such as emollient, narcotic, stimulant, and other decoctions or infusions, into different hollow organs, e. g. the rectum, vagina, nasal fossæ, urethra, tunica vaginalis, auditory canal, &c. to fulfil various therapeutic indications.

**INJECTION, MATTHEW'S.** See *Tinctura cantharidis.*

**INK, Atramentum.**

**INNATE, (Diseases.) Morbi cognati, M. congeniti, (F.) Maladies innées.** Diseases, with which the infant is born. They are not always hereditary, as hereditary diseases are not always innate.

**INNERVA'TION, Innervatio,** from *in,* 'in' and *nervus,* 'a nerve.' By this term is meant,—the nervous influence, necessary for the maintenance of life and the functions of the various organs;—an influence, of whose character and

source we are ignorant. It seems to resemble the galvanic or electric agencies. See Nerves.

INNOMINATUM, *ωνομωτορ*, from *in* priv. and *namen*, 'a name,' (F.) *Anonyme*. Having no name.

The ARTERIA INNOMINATA, *A. brachio-céphalique*, (Ch.)—*Arteria anonyma*, *Right Subclavian*, (F.) *Artère innominée*, is the trunk common to the right primitive carotid and to the subclavian. It arises from the anterior part of the arch of the aorta: ascends obliquely to the right, along the trachea; and, after a course of about an inch in length, divides into two trunks, which go off at right angles. The one is *external*—the *right subclavian proper*; the other *superior*—the *primitive carotid*, of the same side.

CAVITAS INNOMINATA. A cavity of the outer ear, between the *helix* and *anthelix*.

The VENÆ INNOMINATÆ. Viussens has given this name to two or three veins, which arise on the anterior surface and right margin of the heart; and open into the auricle, towards its right margin.

NERVI INNOMINATIVEL ANONYMI. Some anatomists have thus called the nerves of the fifth pair.

OS INNOMINATUM, *Os Coxendicis*, *Os Coxa*, (F.) *Os innominé*, *Os Coxal*, *Os anonyme*, &c. A very large, flat bone, which forms the anterior and lateral parietes of the pelvis. It is curved upon itself in two opposite directions. In the first periods of life, it is composed of three portions;—the *ilium*, *ischium*, and *pubis*, which join each other in the acetabulum. It is articulated *before* with its fellow,—*behind*, with the sacrum; and *laterally*, with the femur.

OSSA INNOMINATA MINORA,—*Lesser Ossa innominata*. Some anatomists have given this name to the three cuneiform bones of the tarsus.

FORAMEN INNOMINATUM. A foramen, near the middle of the anterior surface of the pars petrosa of the temporal bone, leading backwards, for the passage of the vidian nerve, reflected from the 2d branch of the 5th to the portio dura of the 7th pair.

INNOMINATUS, Anonymus.

INOCULATION, *Inoculatio*, *Insi'tio*, from *inoculare*, 'to ingraft;' i. e. from *in*, 'in,' and *oculus*, 'an eye.' Any operation by which small-pox, cow-pox, &c. may be artificially communicated, by introducing the virus of the particular disease into the economy, by means of a puncture or scratch made in the skin.

When the word inoculation is used alone, it usually means that for the small-pox.

INOCULATION, Cowpox, Vaccination—i. Jennerian, Vaccination.

INORGANIC, *Inorganicus*; from *in* priv. and *organum*, 'an organ.' A term applied to bodies which have no organs;—such as minerals. At the present day, naturalists admit of but two classes of bodies,—the *organized* and *inorganic*.

Parts of the body, which, like the Epidermis, are devoid of blood-vessels and nerves, have been called *anorganic*.

INOSCUATIO, Anastomosis.

INQUIETUDE, *Inquietudo*, *Jactitatio*, from

*in*, priv. and *quies*, 'rest.' Agitation or trouble, caused by indisposition. Restlessness.

INQUINAMENTUM, Miasm.

INSALIVATION, *Insalivatio*, the mixture of the food with the saliva, and other secretions of the mouth.

INSALUBRIOUS, *Insalubris*, *Nose'ros*, *Nosodes*. That which is unhealthy,—which injures the health.

INSANIA, Mania—i. Lupina, Lycanthropia.

INSANITY, *Insan'ia*; from *in*, priv., and *sanus*, 'sound.' *Mental alienation*, *Alienatio Mentis*, *Arrey'tio*, *Unsound Mind*, *Derangement*, *Deranged intellect*, *Craziness*, *Aphros'ync*, *Ephro'nia*, *Delir'ia*, *Vesania*, *Delirium* (Crichton,) *Inspic'itio*, (F.) *Folie*, *Egar'ement d'Esprit*. This term includes all the varieties of unsound mind,—Mania, Melancholia, and Idiocy, which see.

INSANITY, MORAL, Pathomania.

INSCRIPTIONES TENDINEÆ MUSCULORUM, *Intersectio'nes tendin'ae musculorum*. The tendinous portions which cross several muscles, and especially the straight muscles of the abdomen.

INSENSCENTIA, Agerasia.

INSENSIBILITY, *Anasthésia*. Loss or absence of sensibility. It is very common in cerebral affections, and may extend to every part, or be limited to one or more. Some organs are much more scensible than others. The bones, cartilages, ligaments, &c. are insensible in health, but acutely sensible in disease.

INSENSIBLE, *Sensibilitat'e carens*. That which is devoid of sensibility. This word is applied, also, to phenomena which cease to be appreciable to the senses. Thus, we say, the pulse becomes *insensible*.

INSERTION, *Inser'tio*, *Symph'ysis*, *Eno'sis*, *ενωσις*, from *inser'ere*, 'to ingraft,' (F.) *Attache*. The attachment of one part to another. Insertions occur chiefly on bones, cartilages, and fibrous organs; thus, we speak of the insertion of muscular fibres into a tendon or aponeurosis; the insertion of a tendon, aponeurosis, or ligament into a cartilage or bone. The word *insertion* has likewise been used, by pathologists, for the act of inoculating or introducing a virus into the body.

INSES'SIO, from *insidere*, 'to sit in.' This term is, sometimes, applied to a vapour bath, the person being seated in a perforated chair, beneath which a vessel, filled with hot water or the hot decoction of some plant, is placed. See Semicupium.

INSIDENTIA, *Epis'tasis*, (q. v.) Any thing which swims on, or in, the urine. It is opposed to the *Hypostasis*, *υποστασις*, or *subsidentia*.

INSPIENTIA, Insanity.

INCISIO CILIORUM, Blepharoplastice.

INSITIO, Inoculation.

INSOLATION, *Insolatio*, *Aprica'tio*, *Helio'sis*, *Siriasis*. Exposure to the sun. Exposure of a patient to the rays of the sun is, sometimes, had recourse to, with the view of rousing the vital forces, when languishing; or of producing irritation of the skin. It is occasionally used in the same sense as *coup de soleil*, (q. v.)

In pharmacy, *insolation* means the drying of chemical and pharmaceutical substances.

INSOM'NIA, *Insom'nium*, *Insom'nitas*, *Saha-*

ra, *Zaara*, *Pervigilium*, *Agrypnia*, *αγρυπνια*, *Ahyr'nia*, *απνια*, *Anyp'nia*, *Typhomania*, *Sleeplessness*, *Vigilance*; from *in priv.* and *somnus*, 'sleep,' 'absence of sleep.' This may exist alone, and constitute a true disease; or it may be connected with another affection. It is an unequivocal sign of suffering in some organ; even when the patient experiences no pain.

INSOMNIUM, *Somnium*.  
INSPIRATEUR, *Inspiratory*.

INSPIRATION, *Inspiratio*, *Empneumato'sis*, *Eisp'noe*, *Adspiratio*, *Aspiratio*, from *in*, 'into,' and *spiro*, 'I breathe.' Action by which the air penetrates into the interior of the lungs. A movement opposed to that of expiration.

As regards the average quantity of air received into the lungs at each inspiration, there is much discrepancy amongst observers. The following table sufficiently exhibits this.

|                                | Cubic inches at<br>each inspiration. |
|--------------------------------|--------------------------------------|
| Reil, - - - - -                | 42 to 100                            |
| Menzies, - - - - -             |                                      |
| Sauvages, - - - - -            |                                      |
| Hales, - - - - -               |                                      |
| Haller, - - - - -              |                                      |
| Ellis, - - - - -               | 40                                   |
| Sprengel, - - - - -            |                                      |
| Sommering, - - - - -           |                                      |
| Thomson, - - - - -             |                                      |
| Bostock, - - - - -             |                                      |
| Jurin, - - - - -               | 35 to 38                             |
| Pontana, - - - - -             | 35                                   |
| Richerand, - - - - -           | 30 to 40                             |
| Dalton, - - - - -              | 30                                   |
| Herholdt, - - - - -            | 20 to 29                             |
| Jurine, - - - - -              | 20                                   |
| Allen and Pepys, - - - - -     | 16½                                  |
| J. Borelli, - - - - -          | 15 to 40                             |
| Goodwyn, - - - - -             | 14                                   |
| Sir H. Davy, - - - - -         | 13 to 17                             |
| Abernethy and Mejon, - - - - - | 12                                   |
| Keutsch, - - - - -             | 6 to 12                              |

INSPIRATION OF VENOUS BLOOD. By this is meant the aspiration of blood towards the heart, occasioned by the approach to a vacuum produced by the dilatation of the thorax during inspiration.

INSPIRATORY. Same etymon. *Inspiratio'ni inser'viens*. (F.) *Inspirateur*. A name given to muscles, which, by their contraction, augment the size of the chest, and thus produce inspiration. The diaphragm and intercostal muscles are the chief agents of inspiration. In cases where deep inspirations are necessary, the action of these muscles is aided by the contraction of the pectoralis major and pectoralis minor, subclavius, serratus major anticus, scaleni, serratus posticus superior, &c. Most of these muscles become inspiratory, by taking their fixed point at the part which they ordinarily move, and elevating the ribs.

INSTEP, (F.) *Coade-pied*. The projection at the upper part of the foot, near its articulation with the leg—the *metatarsus*, (q. v.)

INSTILLATIO, *Enstalaxis*.

INSTILLATION, *Enstalaxis*, *Instillatio*, from *in*, 'into,' and *stilla*, 'a drop.' The act of pouring a liquid drop by drop.

INSTINCT, *Instinctus*, *Brutia*. The action of the living principle, whenever manifestly directing its operations to the health, preservation, or reproduction of a living frame or any part of such frame. The law of instinct

is, consequently, the law of the living principle, and instinctive actions are the actions of the living principle. It is natural. Reason is acquired.

INSTITUTES OF MEDICINE, see Theory of medicine.

INSUFFLATION, *Insuflatio*. The act of blowing a gas or vapour into some cavity of the body; as when tobacco smoke is injected into the rectum; or when air is blown into the mouths of new-born children to excite the respiratory functions.

INSULA SANGUINIS. See Blood.

INSULTUS, *Attack*, *Paroxysm*.

INTEGUMENT, *Integumentum*, *Tegumentum*, *Teg'amen*, *Involu'crum* seu *Velamentum corporis commu'ne*, from *teg'ere*, 'to cover.' (F.) *Tégament*. Any thing, which serves to cover, to envelop. The *skin*, including the cuticle, rete mucosum, and cutis vera, is the common integument, or tegument of the body.

INTELLECT, *Intellectus*, *Nous*, *Noc'sis*, *Syn'esis*, from *intelligere*, 'to understand,' 'conceive,' 'know.' (F.) *Entendement*, *Intelligence*. The aggregate of the intellectual faculties—perception, formation of ideas, memory, and judgment.

INTELLECT, DERANGED, *Insanity*.

INTELLIGENCE, *Intellect*.

INTEMPERANCE, *Intemperantia*; *Acrasia*, *Acold'sia*, *Ples'mone*, *Amet'ria*, *Aplestia*, from *in*, 'negation,' and *tempera're*, 'to temper.' Immoderate use of food and drink, especially the latter;—a fruitful source of disease.

INTEMPERIES. Same etymon. *Dyscrasia*. Derangement in the constitution of the atmosphere and of the seasons; bad constitution; derangement, or disorder in the humours of the body.

INTENSIVUS, *Entaticos*.

INTENTION, *Intentio*, *Propositum*. The object which one proposes.

In surgery, a wound is said to heal by the first intention, when cicatrization occurs without suppuration; union by the second intention being that, which does not occur until the surfaces have suppuration. To obtain union by the first intention, the edges of a recent wound must be brought in apposition and kept together by means of adhesive plasters and a proper bandage. Delpech has substituted, for those expressions, *Réunion primitive*, and *Réunion secondaire*.

INTERARTICULAR, *Interarticu'dris*. Parts situate between the articulations are so called; as *interarticular cartilages*, *interarticular ligaments*, &c.

INTERCADENCE, *Intercaden'tia*, *Interciden'tia*. Disorder of the arterial pulsations, so that, every now and then, a supernumerary pulsation occurs. The pulse, in such case, is said to be *intercurrent*.

INTERCALARY, *Intercal'dris*; from *intercal'dre*, 'to insert,' *Embolimos*, *εμβολιμος*, *Interpold'tus*, *Provocat'rius*. The days which occur between those that are critical. The term has, also, been applied to the days of apyrexia in intermittent fevers.

INTERCELLULAR SUBSTANCE, see Cytoblastoma.

**INTERCEP'TIO.** A bandage, by the aid of which the ancients proposed to arrest the progress of the material cause of gout and rheumatism; and which consisted in covering the affected limbs with carded wool; surrounding them, afterwards, with broad bandages, applied from the fingers to the axilla, or from the toes to the groin.

**INTERCER'VEAUX,** Interspinales colli.

**INTERCIDENTIA,** Intercidence.

**INTERCLAVIC'ULAR,** *Interclavicula'ris.*

That which is placed between the clavicles.

The **INTERCLAVICULAR LIG'AMENT** is a fibrous bundle; placed transversely above the extremity of the sternum; between the heads of the two clavicles. This ligament is flat. Its fibres, which are always longer above than below, are separated by small apertures, which are traversed by vessels. It prevents the separation of the two clavicles in the forced depression of the shoulder.

**INTERCOST'AL,** *Intercosta'lis, Mesopleu'rios.* That which is situate between the ribs. (F.) *Sous-costaux.*

The **INTERCOSTAL MUSCLES** are distinguished into *internal*,—*Inter-plévrocostaux* of Dumas,—and *external*. The former are inserted into the inner lip, the latter into the outer lip of the edge of the ribs. The fibres of the *external intercostals* are directed obliquely downwards and forwards; and those of the *internal* downwards and backwards. Both are inspiratory or expiratory muscles, according as they take their point of support on the upper or lower rib. Some small, fleshy fibres, seen occasionally at the inner surface of the thorax, descending obliquely from one rib to another, have been called *Infracostales*.

The **INTERCOSTAL SPACES** are the intervals which separate one rib from that immediately above or below it.

The **INTERCOSTAL ARTERIES** vary in number. There is constantly, however, a *superior*, *Arteria Intercosta'lis superior* vel *Intercosta'lis Subclav'ia*, which is given off from the posterior part of the subclavian, and which sends branches to the two or three first intercostal spaces; and, generally, eight or nine *inferior* or *aortic intercostals*. These arise from the lateral and posterior parts of the pectoral aorta, and ascend obliquely in front of the vertebral column, to gain the intercostal spaces, where they divide into a *dorsal* branch and an *intercostal*, properly so called.

The **INTERCOSTAL VEINS** are distinguished like the arteries. The *right superior intercostal vein* is often wanting. When it exists, it opens into the back part of the subclavian. The same vein of the left side is very large. It communicates with the *demi-azygos*, receives the left bronchial vein, and opens into the corresponding subclavian. The *right inferior intercostal veins* open into the *vena azygos*; and those of the left into the *demi-azygos*.

**INTERCOSTAL NERVE,** *Trisplanchnic N.*

The **INTERCOSTAL NERVES,** *Branches souscostales,* (Ch.) *Costal* or *Dorsal nerves,* proceed from the anterior branches of the dorsal nerves. They are twelve in number; and are distributed, especially, to the muscles of the parietes of the chest and abdomen.

**INTERCURRENT.** *Intercur'rens.* Diseases are so called, which supervene at different seasons of the year; or which cannot be considered as belonging to any particular season.—Sydenham. A disease is likewise so called which occurs in the course of another disease, as *Intercurrent Pneumonia*.

**INTERCUTANEUS,** Subcutaneus.

**INTERDEN'TIUM,** from *inter*, 'between,' and *dens*, 'a tooth.' The interval between teeth of the same order.—Linden.

**INTERDIG'ITIUM,** from *inter*, 'between,' and *dig'itus*, 'a finger.' The corns or warts, which grow between the fingers and toes, especially between the latter.—Pliny.

**INTERÉPINEUX CERVICAUX,** Interspinales colli.

**INTERFEMINEUM,** Perinæum, Vulva.

**INTERFINIUM NARIUM,** Septum narium.

**INTERFORAMINEUM,** Perinæum.

**INTERMAX'ILLARY,** *Intermaxilla'ris.*—That which is situate between the intermaxillary bones.

The **INTERMAXILLARY BONE,** *inc'isive, palatine,* or *labial bone,* is a bony portion, wedged in between the two superior maxillary bones, which supports the upper incisors. This bone is found in the mammalia; and, also, in the human fœtus.

**INTERMÈDE,** Excipient.

**INTERMIS'SION,** *Intermis'sio, Dialcip'sis,* from *inter*, 'between,' and *mittere*, 'to put or send.' (F.) *Intermittence.* The interval which occurs between two paroxysms of an intermittent or other disease—during which the patient is almost in his natural state. There is said to be *intermission* of the pulse, when, in a given number of pulsations, one or more may be wanting.

**INTERMITTENCE,** Intermission.

**INTERMITTENT,** *Intermittens.* Same etymon. That which has intermissions.

**INTERMITTENT FEVER,** *Febris intermittens, Dialcip'ura, Intermittens, An'ctus, Ague.* (F.) *Fièvre intermittente, F. d'Accès,* is a fever chiefly produced by marshy miasm, and consisting of many paroxysms, there being a complete state of apyrexia in the intervals. The chief types are the *Quotidian, Tertian,* and *Quartan.*

The symptoms of intermittents are those of a decided and completely marked *cold stage*; attended with paleness; collapse; impaired sensibility; and coldness, more or less diffused, followed by general rigors. After this occurs the *hot stage*; the heat returning partially and irregularly, and, at length, becoming universal, and much above the standard of health. The pulse becomes hard and strong; tongue white; urine high-coloured; thirst considerable. At length, the *sweating stage* makes its appearance; the moisture usually beginning on the forehead, face, and neck, and soon extending universally; the heat abating; thirst ceasing; the urine throwing down a sediment, and the functions being gradually restored to their wonted state.

The tertian type is the most common, and the quartan the most severe. The quotidian more readily changes into a remittent and continued fever. The quartan has, generally, the longest cold stage, the tertian the longest hot.

The *exciting causes* are marsh miasmata. Ague, also, occurs in districts where there are no marshy emanations. Such districts are, generally, of a volcanic nature; farther we know not. When the disease has once attacked an individual, it is apt to recur.

The *prognosis* is, in general, favourable, as far as regards life; but long protracted intermittents are apt to induce visceral obstructions and engorgements, which may end in dropsy. In some countries, however, the disease is of a very pernicious character.

The indications of treatment are, 1. To abate the violence of the paroxysm; and 2. To prevent its return. The first indication requires the adoption of the general principles and remedies required in ordinary fever. The *second* is the most important. The period of apyrexia is that for action. The means for fulfilling this indication are:—the use of emetics, purgatives, cinchona, quinine, &c., arsenic, and forcible impressions made on the mind of the patient.

**INTERMUSCULAR.** *Intermuscularis.* That which is placed between muscles.

The **INTERMUSCULAR APONEUROSES** are aponeurotic laminae or septa, situate between muscles to which they often give attachment.

**INTERNAL, Inner, Internus.** That which is placed on the inside. This epithet is given to parts that look towards an imaginary central plane, which divides the body into two equal and symmetrical portions, as well as to those which correspond with a cavity. Thus we say the *inner surface of the arm or thigh—the inner surface of the skull, &c.*

**INTERNAL DISEASES, Morbi interni,** are those which occupy the inner parts of the body. Their investigation belongs to the physician; *external diseases* falling under the management of the surgeon.

**INTERNODIA DIGITORUM MANUS,** Phalanges of the fingers—i. *Digitorum pedis,* Phalanges of the toes.

**INTERNUS AURIS,** Tensor tympani—i. Mallei, Tensor tympani.

**INTEROSSEI PEDIS, Métatarso-phalangien-latéral, (Ch.)** The number, arrangement, shape, and uses of these are the same as in the case of the preceding muscles. Four are *dorsal*, and three *plantar*; six belong to the three middle toes and one to the little toe. The great toe is devoid of them. As in the hand, they are distinguished, in each toe, into abductor and adductor.

**INTEROSSEOUS, Interosseus.** That which is situate between the bones; from *inter*, 'between,' and *os*, 'a bone.'

**INTEROSSEOUS MUSCLES.** These occupy the spaces between the bones of the metacarpus and metatarsus; and, consequently, belong,—some to the hand, others to the foot.

**INTEROSSEOUS LIGAMENTS.** Ligaments seated between certain bones, which they unite; such are the ligaments between the radius and ulna, and between the tibia and fibula.

**INTEROSSEOUS ARTERIES OF THE FOREARM AND HAND.** Of these there are several. 1. The *common interosseous artery* arises from the posterior part of the ulnar, a little below the bicipital tuberosity of the radius; passes backwards and divides into two branches: the one called

*anterior interosseous* descends vertically, anterior to the interosseous ligament; the other, called *posterior interosseous*, passes above that ligament, appears at its posterior part and divides into two great branches,—the *posterior recurrent radial* and the *posterior interosseous*, properly so called. In the hand, are—1. The *dorsal metacarpal interosseous arteries*, given off by the *dorsalis carpi*, a division of the radial artery. 2. The *Palmar interosseous arteries*, which arise from the convexity of the deep palmar arch, and give off the *middle interosseous arteries*. 3. The *dorsal interosseous of the index*, proceeding directly from the radial artery. In the foot, are distinguished—1. The *dorsal interosseous arteries*, three in number, which arise from the artery of the metatarsus, a branch of the *dorsalis tarsi*. 2. The *plantar interosseous arteries*, which are, also, three in number, and arise from the plantar arch.

The **INTEROSSEOUS VEINS** have the same arrangement as the arteries.

The **INTEROSSEOUS NERVE** is a branch, given off by the median nerve, which descends before the interosseous ligament, accompanying the artery of the same name.

**INTEROSSEUS MANUS, (F.) Masele inter-osseuz de la main—Métacarpo-phalangien-latéral sus-palmaire et métacarpo-phalangien-latéral, (Ch.)** These muscles are seven in number; two for each of the three middle fingers, and one for the little finger. Four are situate on the back of the hand, and three only in the palm. They are inserted into the metacarpal bones, and send a tendon to the tendon of the extensor communis. According to their office, they are, to each finger, an *adductor* and an *abductor*. The *index* has a dorsal adductor and a palmar one. The *middle finger* has two dorsal muscles for adductor and abductor; the *ring finger* has a dorsal adductor and a palmar abductor; and the *little finger* has only one interosseous abductor, which is palmar. These muscles produce abduction and adduction of the fingers, which they can also extend, owing to their connexion with the extensor tendons.

**INTEROSSEUS, SECUNDUS, Prior medii digiti—i. Quartus, Prior annularis.**

**INTEROSSEUX DE LA MAIN, Interosseus manus.**

**INTERPELLATUS, (Morbus),** from *interpello*, 'I interrupt.' A term, by which Paracelsus designated those diseases whose progress is unequal, and paroxysms irregular.

**INTERPLÉVRO-COSTAUX, Intercostal muscles.**

**INTERPOLATUS, Intercalary.**

**INTERSCAPULAR, Interscapularis.** That which is between the shoulders; as the *interscapular region*.

**INTERSCAPULIUM.** The spine of the scapula.

**INTERSECTION, Diac'opē.** The point where two lines meet and cut each other. The name, *aponeurotic intersection*, is given to fibrous bands, which certain muscles present in their length, and by which they seem interrupted. Aponeurotic intersections are found in the recti muscles of the abdomen; in the semi-membranosus, complexus, sternothyroideus, &c.

INTERSECTIONS TENDINEÆ MUSCULORUM, Inscriptio tendin. Muscular. INTERSEPTA HORIZONTALIA PACCHIONI, Tentorium.

INTERSEPTUM, from *inter*, 'between,' and *septum*, 'a partition,' *Cian*, *ζωον*. The uvula; (q. v.) also, the septum narium.

INTERSEPTUM NARIUM, Septum narium—i. Virginal. Hymen.

INTERSPINALES COLLI, *Spinales Colli minores*, *Spinali*, (F.) *Interépineux-cervicaux*, *Intercervicaux*, (Ch.) These are twelve in number, and occupy, in two parallel rows, the intervals between the spinous processes of the cervical vertebrae, from that of the atlas and vertebra dentata to that between the last cervical and first dorsal vertebrae. They are flat, thin, and quadrilateral. These muscles contribute to the extension of the neck and to throwing the head backwards.

INTERSPINALES DORSI ET LUMBORUM; portions of the *Transversaire-épineux* of Boyer and the *sacro-spinal* of Chaussier. These muscles are of two kinds. The one (*Muscle grand épineux du dos*, of Winslow) representing fleshy bundles of different lengths, applied upon the lateral surfaces of the spinous processes, from the third dorsal vertebra to the second lumbar. The others (*Muscle petit épineux du dos*, Winslow) are covered by the preceding. They are situate on each side of the interspinal ligament, in the form of small, short, flat bundles, which pass from one spinous process to the second, third, or fourth above it. These muscles aid in extending the vertebral column; and incline it a little to one side, when they act on one side only.

INTERSPINAL LIGAMENT, *Membra'na interspinalis*, (F.) *Ligament interépineux*. These occupy the intervals between the spinous processes in the back and loins. In the neck, they are replaced by the muscles of the same name. They prevent the too great flexion of the spine, and keep the spinous processes *in situ*.

INTERSTICE, *Interstitium*, from *inter*, 'between,' and *sto*, 'I stand,' *Diastéma*, *Intervallum*. Anatomists have given this name to the intervals between organs. The *iliac crest—crista ilii*, for example, has two *lips* and an interstice between them, which affords attachment to the lesser oblique muscle of the abdomen.

INTERSTICE, Pore.

INTERTINCTUS, Discreet.

INTERTRACHÉLIENS, *Intertransversales colli*.

INTERTRANSVERSAIRES DES LOMBES, *Intertransversales lumborum*.

INTERTRANSVERSALIS, *Intertransversarius*. That which is placed between the transverse processes of the vertebrae.

The INTERTRANSVERSALES COLLI, (F.) *Intertransversaires cervicaux*, *Intertrachéliens* (Ch.) These are small, muscular bundles; quadrilateral; thin and flat; situate, in pairs, in the intervals between the transverse processes of the neck, except between the first and second, where there is only one. They are distinguished into *anterior* and *posterior*. The former are six in number; the latter five. These muscles bring the transverse processes of the neck

nearer each other, and contribute to the lateral flexion of the neck.

The INTERTRANSVERSALES LUMBORUM, *Musculi intertransversi lumborum*, (F.) *Intertransversaires des lombes*. These are almost entirely fleshy, and ten in number; five on each side. They are similar to the preceding in general arrangement; except that they are more marked, and not placed in two rows. Each intertransverse space contains only one. They are quadrilateral, and flat. The first occupies the space between the transverse processes of the first lumbar and last dorsal vertebra; and the last is between that of the fourth and fifth lumbar vertebrae. These muscles incline the lumbar region laterally; and straighten it when inclined to one side.

INTERVALLUM, Interstice.

INTERVERTEBRAL, *Intervertebralis*. That which is situate between the vertebrae.

The INTERVERTEBRAL CARTILAGES, *Intervertebral fibro-cartilages—Ligamenta intervertebra'lia*. These organs are of a fibro-cartilaginuous nature; sections of a cylinder; flexible; whitish; resisting; and situate between the bodies of the vertebrae,—from the space between the second and third as far as that between the last vertebra and sacrum. Their form is accommodated to that of the vertebrae with which they are in connexion; so that, in the neck and loins, they are oval, whilst in the dorsal region they are nearly circular.

INTESTIN, Intestine.

INTESTINAL, *Intestinalis*. That which belongs to the intestines,—as *intestinal canal*, &c. Borden uses the term *Pouls intestinal* for a pulse, which he conceived to announce an approaching crisis by the intestines.

INTESTINE, *Intestinum*, from *intus*, 'within,' *En'teron*, *Chorda*, *Gut*, *Ned'gia*, *Pun'tices* (pl.), (F.) *Intestin*, *Bayau*. A musculo-membranous canal, variously convoluted, which extends from the stomach to the anus, and is situate in the abdominal cavity; the greater part of which it fills. In man, its length is six or eight times that of the body. It is divided into two principal portions, called *small intestine* and *large intestine*.

The former, (F.) *Intestin grêle*, *Intestinum tenuë*, *I. gracile*, constituting nearly four-fifths of the whole length, begins at the stomach and terminates in the right iliac region. It is divided into *duodenum*, *jejunum*, and *ileum*. Some anatomists give the name *small intestine* to the two latter only; which are kept in place by the mesentery, and form a *large paquet*, occupying the umbilical and hypogastric regions, a part of the flanks, of the iliac regions, and of the cavity of the pelvis. It is composed of, 1. A serous membrane, which is peritoneal. 2. Of a muscular coat, whose fibres are very pale, and are placed, in part, longitudinally; but the greater part transversely. 3. Of a whitish, mucous membrane; villous, and forming folds or valves—*valvula conniventes*—at its inner surface, and furnished with a considerable number of mucous follicles, called *glands of Peyer*. The arteries of the small intestine proceed from the superior mesenteric; its veins open into the vena porta. Its nerves proceed from the superior mesenteric plexus.

The great intestine, *Intestinum crassum*, (F.) *Gros intestin*, *Megalocolia*, forms a sequence to the small. It is much shorter, and is solidly attached in the regions of the abdomen which it occupies. It begins in the right iliac region; ascends along the right flank; till, beneath the liver, it crosses the upper part of the abdomen, descends into the left iliac fossa, and plunges into the pelvic cavity, to gain the anus. The great intestine is usually divided into three portions,—the *cæcum*, *colon*, and *rectum*. It receives its arteries from the superior and inferior mesenterics. Its veins open into the vena porta. Its nerves are furnished by the mesenteric plexuses. Its lymphatic vessels, which are much less numerous than those of the small intestine, pass into the ganglions or glands seated between the different reflections of the peritoneum, which fix it to the abdominal parietes.

The use of the intestines is;—in the upper part, to effect the chylicification of the food and the absorption of the chyle;—in the lower, to serve as a reservoir, where the excrementitious portion of the food collects; and, also, as an excretory duct, which effects its expulsion.

INTESTINORUM LÆVITAS, Lientery.

INTESTINULA CEREBRI, Anfractuosities (cerebral.)

INTESTINUM CELLULATUM, Colon—i. Circumvolutum, Ileon—i. Crassum, Colon—i. Grande, Colon—i. Laxum, Colon—i. Majus, Colon—i. Medium, Mesentery—i. Plenum, Colon—i. Rectum, Rectum.

INTOXICATIO, Poisoning.

INTRA-PELVIO-TROCHANTÉRIEN, Obstructor internus.

INTRIN'SIC, *Intrin'secus*; from *intra*, 'within,' and *secus*, 'towards.' Applied to the internal muscles of certain organs; as those of the ear, tongue, and larynx. Linnæus gave the name *Intrinseci* to internal diseases.

INTROSUSCEPTIO, Intussusceptio—i. Entropium, Entropion.

INTUBUM, Cichorium endivia—i. Erraticum, Cichorium intybus.

INTUMESCENCE, *Intumescen'tia*, *Dionco'sis*, from *intumescere*, 'to swell.' Augmentation of size in a part or in the whole body. Sauvages uses the word *Intumescen'tia* for an order of diseases, in which he comprehends polysarcia, pneumatosis, anasarca, œdema, physconia, and pregnancy.

INTUMESCÉNTIA LACTEA MAMMARUM, Sparganosis.

INTUSSUSCEPTIO, from *intus*, 'within,' and *suscip'io*, 'I receive,' *Introsuscept'io*.

In *physiology*;—the mode of increase peculiar to organized bodies. In *pathology*, like *invaginatio* and *Parisago'gæ*, it means the introduction of one part of the intestinal canal into another, which serves it as a sort of *vagina* or sheath. Generally, it is the upper part of the small intestine, which is received into the lower, when the intussusception is said to be *progres'sive*. At times, however, it is *retrograde*.

As the disease cannot be positively detected by the symptoms, it must be treated upon general principles. At times, the invaginated portion has separated and been voided per anum,—the patient recovering. The disease is, however, of a very dangerous character.

INTYBUM, Cichorium endivia.

INTYBUS HORTENSIS, Cichorium endivia.

INULA, COMMON, Inula helenium.

IN'ULA DYSENTERICA. The systematic name of the *Lesser Inula*, *Conyza me'dia*, *Arnica Sueden'sis*, *Arnica spur'ia*, *Cunila mus'cula*, *Conyza*, *Cunila'go*, (F.) *Aunée antidysentérique*, *Herbe de Saint Rock*. *Nat. Ord.* Compositæ. This plant was once considered to possess great antidysenteric virtues. The whole plant is acrid and somewhat aromatic.

INULA HELE'NIUM. The systematic name of the *El'ecampane*—*En'ula camp'na*, *Helenium*, *Common Inula*, (F.) *Aunée*. The root was formerly in high esteem in dyspepsia, cachexia, pulmonary affections, &c. It is now scarcely used.

INULA, LESSER, Inula dysenterica.

INUNCTIO, Liniment.

INUNCT'ION, *Inunc'tio*, *Illitio*, *Chrosis*, *Catcl'risis*, *Diach'risis*, *Epich'risis*, *Unctio*. *A liniment*. Also, the act of rubbing in. (F.) *Onction*.

INUNDATIO, Depuration.

INUSTIO, Cauterization.

INUSTORIUM, Canterium.

INVALETUDO, Infirmitly.

INVALID, Valetudinary.

INVASIO, Arche, Attack, Paroxysm.

INVERMINATION, Helminthiasis.

INVERSO PALPEBRARUM, Entropion—i. Uteri, Hysteroptosis, Uterus, inversion of the.

INVERSION DE LA MATRICE, Uterus,

Inversion of the.

INVISCIANTIA, Incrassantia.

INVISCIATIO OC'ULI, A morbid adhesion of the eyelids to each other, or to the globe of the eye.

INVOLUCRUM CORDIS, Pericardium—i. Corporis commune, Integument—i. Linguae, see Tongue—i. Membranaceum, Decidua reflexa—i. Nervorum, Neurilema—i. Reti comparatum, Retina.

INVOLVENTIA, Demulcents.

IODE, Iodine.

IODES, Æruginous.

IODIDE OF AMMONIUM, See Iodine—i. of Arsenic, see Iodine—i. of Iron, see Iodine—i. of Lead, see Iodine—i. of Potassium, see Iodine—i. of Quinine, see Iodine—i. of Starch, see Iodine—i. of Sulphur, see Iodine—i. of Zinc, see Iodine.

IODIDUM AMYLI, see Iodine—i. Hydrargyricum, see Iodine—i. Hydrargyrosium, see Iodine—i. Plumbi, see Iodine—i. Sulphuris, see Iodine.

IODINE, from *ιωδης*, *viol'ceus*, 'of a violet colour.' *Iodi'na*, *Iod'ium*, so called from the violet vapour it exhales when volatilized. (F.) *Iode*. It is contained in the mother waters of certain fuci, and is obtained by pouring an excess of concentrated sulphuric acid on the water, obtained by burning different fuci, lixiviating the ashes and concentrating the liquor. The mixture is placed in a retort to which a receiver is attached, and is boiled. The iodine passes over and is condensed. It is solid, in the form of plates; of a bluish gray colour, of a metallic brightness, and smell similar to that of the chloride of sulphur. Its s. g. is 4.946. When heated, it becomes volatilized and affords the

vapour, which characterizes it. With oxygen, it forms the *Iodic acid*, and with hydrogen, the *Hydriodic*.

The tincture of iodine and the hydriodates have been employed, with great success, in the treatment of goitre and of some scrofulous affections. It must be administered in a very small dose and for a long period. It is said to be apt, however, to induce cholera morbus, signs of great nervous irritability and emaciation of the manimæ. When these symptoms, collectively termed *Iodism*, *Iodosis*, and *Iodinia*, are urgent, the dose may be diminished, or it may be wholly discontinued, and afterwards resumed.

Various preparations of Iodine are employed in medicine; as, *The Iodide of Iron*, (*Ferri Iodidum*, *F. Ioduratum*, (*F.*) *Iodure de fer*, which is sorbifacient and tonic, in the dose of 3 or 4 grains: the *Proto-Iodide of Mercury*, (*Hydrargyri Proto-Ioduratum*, *Hydrargyrum Iodatum flazum*, *H. Iodidulatum*, *H. Iodatum*, *Iodidum Hydrargyrosum*, *Hydrargyri Proto-Iodidum*,) sorbifacient and antisyphilitic in the dose of 1-12th of a grain; the *Deuto-Iodide of Mercury*, (*Hydrargyri Deuto-Ioduratum*, *Hydrargyrum Iodatum rubrum*, *H. Periodatum*, *Iodidum Hydrargyricum*, *Biniodide of Mercury*,) with similar virtues, in the dose of 1-16th of a grain; the *Iodide of Starch*, (*Iodidum vel Ioduretum Amyli*, *Amylum Iodatum*,) a weaker preparation than the usual forms of iodine; the *Iodide of Quinine*, (*Iodidum Quininae*,) used in scrofulous cases, where iodine and tonics are indicated; the *Iodide of Lead*, (*Plumbi Iodidum*, *P. Ioduratum*,) used externally in strumous swellings; the *Iodide of Potassium* (in solution, *Hydriodate of Potassa*,) see *Potassæ Hydriodas*;—the *Iodo-hydrargyrate of Potassium*, (*Potassii Iodo-hydrargyrus*,) made by adding 8 grains of iodide of potassium, dissolved in 10 or 15 minims of water, to 11 grains of the deuto-iodide of mercury,—the properties of which are like those of the iodides of mercury; the *Iodide of Sulphur*, (*Ioduratum Sulphuris*, *Sulphuris Iodidum*, *Sulphur Iodatum*,) used externally in cutaneous diseases, (gr. x. to cerate ℥i.) and the *Iodide of Zinc*, (*Zinci Iodidum*, *Z. Iodatum*,) externally, (℥i to lard ℥i.) The *Iodide of Ammonium*, (*Iodidum*, see *Ioduratum Ammonia*, *Hydriodate of ammonia*, (iodide of ammonia) used in lepra, psoriasis, &c. in the form of ointment (℞j—℥j ad adipis ℥j; and the *Iodide of Arsenic* (*Arsenici Iodidum*,) given internally in similar affections (gr. 1-10th three times a day; or used externally (gr. iij ad adipis ℥j.)

IODINIA. See Iodine.

IODISM. See Iodine.

IODIUM. Iodine.

iodo-hydrargyrate of POTASSIUM. See Iodine.

IODOSIS. See Iodine.

IODURETUM AMMONIÆ, see Iodine—i. Amyli, see Iodine—i. Sulphuris, see Iodine.

ION. Viola.

IONIA, *Teucrium chamæpitys*.

IONIDIUM MARCUCCI, *Cinchuchulli*—a South American plant. *Sex Syst.* Pentandria Monogynia. *Nat. Ord.* Violariæ: said to be extremely efficacious in the Mal de San Lazaro of Columbia.

ION'THUS, *Varus*, *Violet Eruption*, from *ion*, 'the violet,' and *anthos*, 'a flower,' or *orthos*, 'foulness.' An unsuppurative, tubercular tumour; stationary; chiefly on the face. A genus in the class *Hæmatica*, order *Phlogotica* of Good.

ION'THUS CORYMBIFER, *Gutta rosea*—i. *Varus*, *Aene*.

IOTACIS'MUS, from the Greek letter *Iota*. Defective articulation,—the patient not being able to pronounce the palatals *j* and *g* soft.

IPECACUAN'HA. The pharmacopœial name of the *Cepha'lis ipecacuan'ha*, or *Callicoc'ca ipecacuan'ha*, *Cagosanga*, *Ipecacuan'ha root*, *Ipecacuan'ha radix*, *Rudix Brazilien'sis*. *Nat. Ord.* Cinchonaceæ. It is also obtained from the *Psychot'ria emetica* of Peru.

The odour of the root is faint and peculiar; taste bitter, subacid and mucilaginous; both water and alcohol extract its virtues: which depend on a peculiar principle, called *Emetine*. It is emetic in large doses; sudorific in smaller.

*Dose*, as an emetic, gr. xx to xxx, alone, or united with tartarized antimony, gr. i or ij.

The WHITE IPECACUAN'HA is obtained from different species of *Richardsonia* and *Iouidium*. The *Viola ipecacuan'ha* also affords it. It is weaker than the gray.

IPECACUANHA, *Euphorbia corollata*—i. *Bastard*, *Triosteum perfoliatum*—i. *Blanc de l'Île de France*, *Asclepias asthmatica*—i. *Blanc de St. Domingue*, *Asclepias curassavica*—i. of the Isle of France, *Cynanchum vomitorium*.

IPO, *Upas*.

IPOMEA JALAPA, *Convolvulus Jalapa*.

IRA, *Rage*.

IRACUNDUS, *Rectus externus oculi*.

IRALGIA; from *iris*, 'the iris,' and *algos*, 'pain.' Pain in the iris.

IRASCIBLE, *Rectus externus oculi*.

IRANCISTRON, *Iridancistr'on*, from *iris*, and *αγκιστρον*, 'a hook.' A hooked instrument, used by Schlagintweit in the formation of an artificial pupil.

IRIDANCISTRON, *Iriancistron*.

IRIDECTOMIA *Coretoma*.

IRIDERE'MIA, from *iris*, and *εργμος*, 'deprived of.' Absence of iris, either apparent or real.

IRIDODIALYSIS, *Coretoma*.

IRIDOPERIPHAKITIS; from *iris*, 'the iris,' *περι*, 'around,' and *phacitis*, inflammation of the lens. Inflammation of the anterior hemisphere of the capsule of the lens.

IRIDOTO'MIA, *Coretoma*.

IRIS, *iris*, *Grammè*, so called from its resembling the rainbow in variety of colours. A membrane, stretched vertically at the anterior part of the eye, in the midst of the aqueous humour, in which it forms a kind of circular, flat partition, separating the anterior from the posterior chamber. It is perforated by a circular opening, called the *pupil*, which is constantly varying in its dimensions owing to the varying contractions of the fibres of the iris. Its posterior surface has been called *uvæa*, from the thick, black varnish which covers it. The greater circumference of the iris is adherent to the ciliary processes and circle.

It has an external plane of radiated fibres and an internal one of circular fibres: which serve

—the one to dilate, the other to contract the aperture of the pupil.

The iris receives the irian nerves. Its arteries are furnished by the long ciliary arteries, which form two circles by their anastomoses; the one very broad, near the great circumference; the other, smaller, and seated around the circumference of the pupil. The veins of the iris empty themselves into the *Vasa vorticiosa*, and into the long ciliary veins.

The use of the iris seems to be:—to regulate, by its dilatation or contraction, the quantity of luminous rays, necessary for distinct vision. The different colours of the iris occasion the variety in the colours of the human eye.

Iris. See Herpes Iris.

IRIS, COMMON, I. Germanica—i. *Commun*, I. Germanica—i. *de Florence*, I. Florentina.

IRIS FLORENTINA, *Florentine iris* or *orris*. (F.) *Iris de Florence*. The root of this plant is extremely acrid in its recent state; and, when chewed, excites a pungent heat in the mouth, that continues for several hours. When dried, the acrimony is lost, or nearly so, and the smell is very agreeable. It is indebted to its agreeable flavour for its retention in the pharmacopœias, although it is ranked as an expectorant.

IRIS FÆTIDISSIMA, *Spathula fatida*, *Xyris*, —the *stinking iris*. (F.) *Iris puant*, *Glaxcul puant*. The root has been held antispasmodic and narcotic.

IRIS GERMANICA. The systematic name of the *Flower-de-Luce*, *Iris nostras*, *Aier'sa*, *Iris vulg'aris*, *Commun iris* or *orris*, *Gladiolus carnuleus*, (F.) *Iris common*, *Flambe*. The fresh roots have a disagreeable smell and an acrid, nauseous taste. They are powerfully cathartic, and are given in dropsies, where such remedies are indicated.

IRIS DES MARAIS, I. pseudacorus—i. *Nostrias*, I. Germanica—i. *Palustris*, I. pseudacorus.

IRIS PSEUDACORUS. The systematic name of the *Yellow water-flag*, *Iris palustris*, *Gladiolus luteus*, *Acorus vulg'aris*, *Acorus adulterinus*, *Pseudacorus*, *Bu'tomon*, *Acorus pulustris*. (F.) *Iris des marais*, *Faux acore*, *Flambe bâtard*, *Acore bâtard*. The root has an acrid, styptic taste. It is an errhine, sialogogue, and acrid astringent. The expressed juice is diuretic, and said to be a useful application to serpiginous and other cutaneous affections. Rubbed on the gums, or chewed, it is said to cure toothache.

IRIS PUANT, I. fœtidissima—i. *Stinking*, I. fœtidissima.

IRIS VERSICOLOR, *Blue flag*. The root of this is an active cathartic; and has been much used, as such, by the American Indians. It is reputed to be diuretic.

IRIS VULGARIS, I. Germanica.

IRITIS, *Inflammation of the iris*. The chief symptoms are;—ehange in the colour of the iris; fibres less movable; tooth-like processes shooting into the pupil; pupil irregularly contracted, with the ordinary signs of inflammation of the eye. If the inflammation does not yield, suppuration takes place; and, although the matter may be absorbed, the iris remains immovable. It is often caused by syphilis.

The general principles of treatment are, to deplete largely and exhibit mercury freely;

along with attention to other means advisable in ophthalmia. The free use of the quinine is sometimes serviceable.

IRON, Ferrum—i. Ammoniated, Ferrum ammoniatum—i. Carburet of, Graphites—i. Black oxyd of, Oxydum ferri nigrum—i. Filings, purified, Ferri limatura purificata—i. Hydrated oxyde of, Ferrum oxydatum hydratum—i. Hydrated peroxide of, Ferrum oxydatum hydratum—i. Hydrated tritoxide of, Ferrum oxydatum hydratum—i. Hydro-oxyde of, Ferrum oxydatum hydratum—i. Iodide of, see Iodine—i. lactate of, Ferri Lactas—i. Pills of, compound, Pilulæ ferri compositæ—i. Protoxide of, lactate of, Ferri Lactas—i. Protocarbonate of, Ferri Protocarbonas—i. Sulphate of, Ferri sulphas—i. Tartarized, Ferrum tartarizatum—i. Tritohydroferrocyanate of, Prussian blue—i. and Potass, tartate of, Ferrum tartarizatum.

IRREDUCIBLE, (F.) *Irréductible*. An epithet given to fractures, luxations, herniæ, &c. when they cannot be reduced.

IRRÉDUCIBLE, Irreducible.

IRREGULAR, *Irregul'aris*, *Anomalus*, *ανωμαλος*, from *in*, 'privative,' and *reg'ula*, 'a rule.' A term, chiefly applied to the types of disease; and, also, to the pulse, when its beats are separated by unequal intervals.

IRREPTIO, Attaek.

IRRITABILITAS MORBOSA. See Sub-sultus tendinum.

IRRITABILITAS VESICÆ, Cysterethismus.

IRRITABILITY, *Irritabil'itas*, from *irrit'o*, 'I provoke' *Is irritabilit'is*, *Vis Vitæ*, *Vis insita* of Haller, *Vis vitalis* of Gorter, *Oscillatio* of Boerhaave, *Tonic power* of Stahl, *Inherent power*, *Contractility*, *Excitability*, *Incitability*, &c. A power, possessed by all living, organized bodies, of being acted upon by certain stimuli, and of moving responsive, to such stimulation. It is the ultimate vital property.

IRRITABLE, *Irritab'ilis*. That which is endowed with irritability. Every living organized tissue is irritable; that is, capable of feeling an appropriate stimulus, and of moving responsive to such stimulus. I. is often used in the same sense as *impressible*, as when we speak of an irritable person, or habit, or temper. This last condition has been variously termed—*Debilitas nervosa*, *D. Erethis'ica*, *Hypereinesia nervosa*, *Neurosthen'ia*, *Neurosthen'ia*, *Sensibilitas anom'ala*, *S. morb'osa*, *S. aucta*.

IRRITAMENTUM METALLICUM, Galvanism.

IRRITANT, *Irritans*. That which causes irritation or pain, heat and tension; either *mechanically*, as punctures, acupuncture, or scarification; *chemically*, as the alkalies, acids, &c.; or in a *specific manner*, as cantharides, &c.

Irritants are of great use in the treatment of disease.

IRRITATIO, Gargale.

IRRITATION, *Irritatio*, *Erthesis'mus*, from *in*, *priv.* and *ritus*, 'the usual manner.' The state of a tissue or organ, in which there is excess of vital movement: commonly manifested by increase of the circulation and sensibility. Broussais defines irritation to be;—the condition of an organ, the excitation of which is carried to so high a degree, that the equilibrium, resulting from the balance of all the func-

tions, is broken. In this signification, he also uses the word *sur-irritation*, which he considered as a higher degree and as the essential cause of fever. Irritation is the precursor of inflammation.

**MORBID IRRITATION** or *constitutional irritation* is that excitement, which occurs after injuries done to the body, or to any part thereof;—constituting cases of *diseased sympathy*.

IS, Fibre.

ISCA, Boletus ignarius.

**ISCHÆMIA**, from *ἰσχω*, 'I retain,' and *αἷμα*, 'blood.' Morbid retention or suppression of an habitual flux of blood, as of the hemorrhoidal or menstrual flux or of epistaxis. (q. v.) See *Hæmatostatica*.

**ISCHÆMON**. Same etymon. A medicine, which restrains or stops bleeding.

**ISCHIA, MINERAL WATERS OF**. In this volcanic isle, five miles from Naples, there are several thermal waters: one of which—that of Gurgitello—raises the thermometer of Fahr. to 167°.

**ISCHIAGRA**, from *ἰσχίον*, 'the haunch,' and *ἀγχα*, 'a seizure.' A name given to ischiatic gout. *Femoro-popliteal neuralgia* (q. v.) has, also, been so called.

**ISCHIALGIA**, Neuralgia femoro-poplitæa.

**ISCHIAS NERVOSA ANTICA**, Neuralgia femoro-pretibialis—i. Nervosa Cotunnii, Neuralgia femoro-poplitæa—i. Nervosa digitalis, Neuralgia cubito-digitalis—i. Nervosa postica, Neuralgia femoro-poplitæa—i. à Sparganosi, Phlegmatia dolens.

**ISCHIATIC** or **ISCHIADIC**, *Ischiad'icus*, or *Ischiad'icus*, from *ἰσχίον*, 'the haunch;' whence the word *Sciatic*. An epithet given to parts connected with the ischium. The **SCIATIC NOTCHES**, (F.) *Echancrures ischiaticques*, are formed by this bone; the **ISCHIATIC SPINE** belongs to it, and gives attachment to the small sacrosacral ligament. The **TUBEROSITY OF THE ISCHIUM**, *Os sedentarium*, *Tuber Ischii*, (F.) *Tuberosité sciatique*, is formed by it. It receives the insertions of different muscles of the thigh, and forms the projection on which the body rests when seated.

The **ISCHIATIC** or **SCIATIC ARTERY**, *A Fémoro-Poplitée* (Ch.) arises singly from the hypogastric, or with the gluteal; and seems to be really a continuation of the trunk of the hypogastric. It issues from the pelvis, at the lower part of the great sciatic notch; and, afterwards, divides into a considerable number of branches, which are distributed particularly to the posterior and superior region of the thigh.

The **ISCHIATIC VEIN** presents the same arrangement.

**ISCHIATICUS**, Sciatic.

**ISCHIATOCELE**, Ischiocele.

**ISCHIDROSIS**, from *ἰσχω*, 'I restrain,' and *ἰδρωσις*, 'sweat.' Suppression of perspiration.

**ISCHOBLENIA**, *Ischoblen'nia*, from *ἰσχω*, 'I restrain,' and *βλεννα*, 'mucus.' The suppression of a morbid but habitual discharge of mucus.

**ISCHIO-CAVERNOSUS**. Belonging to the ischium and corpus cavernosum.

The **ISCHIO-CAVERNOSUS** muscle, *Collateralis, Director penis, Erector penis, Ischio-urétral* (Ch.) is a small, long, flat muscle, which

surrounds the origin of the corpus cavernosum. It is fixed *below* to the inner side of the tuberosity of the ischium, and *above* to the root of the penis, where it is confounded with the fibrous membrane of the corpus cavernosum. It draws the root of the penis downwards and backwards.

The **ISCHIO-CAVERNOSUS** of the female, *Erector-clitor'idis, Ischio-clitoriden, Superior rotundus clitor'idis, Ischio sous-clitorien* (Ch.), is arranged nearly as in the male, but is less bulky. It arises, by aponeurosis, from the tuberosity of the ischium, and terminates by embracing the corpus cavernosum of the clitoris, to the erection of which it appears to contribute.

**ISCHIOCELE** or **ISCHIATOCELE**, *Hernia ischiatica*; from *ἰσχίον*, 'the ischium,' and *κλήη*, 'tumour.' *Ischiatic hernia*. One in which the viscera issue by the great sciatic notch. It is a rare disease. The protruded parts must be reduced; the patient being placed in a favourable position, and they must be retained by a bandage.

**ISCHIO-CLITORIANUS**. That which is connected with the ischium and clitoris.

The **ISCHIO-CLITORIAN ARTERY** of Chaussier is a division of the internal pudic, which furnishes the two arteries of the clitoris—the *superficial* and *deep-scated*.

The **ISCHIO-CLITORIAN NERVE**, of the same professor, is the superior branch of the pudic nerve, which is distributed to the clitoris.

**ISCHIO-CLITORIDIEN**, Ischio-cavernosus—i. Coccygeus, Coccygeus—i. *Crû-tibial*, Semitendinosus—i. Femoralis, Adductor magnus—i. *Fémoro-pérouier*, Biceps flexor cruris—i. *Périneal*, Transversus perinæi—i. *Popliti-fémoral*, Semi-membranosus—i. *Popliti-tibial*, Semi-membranosus—i. *Prétibial*, Semitendinosus—i. *Sous-clitorien*, Ischio-cavernosus—i. *Sous-trochantéru*, Quadratus femoris—i. *Spin-trochantéru*, Ischio-trochanterianus—i. *Urétral*, Ischio-cavernosus.

**ISCHION**, *Ischium, Os ischii, Os coxæ d'icis, Hip bone, Seat bone*, (F.) *Os de l'assiette*. The lowermost of the three portions, which compose the os innominatum in the fœtus and young individual. The inferior region of the same bone has, also, been called *ischion*, in the adult. According to Hesychius, the ancients designated, by the word *ischion*, the capsular ligament of the coxo-femoral articulation, as well as the articulation itself. Some derive the word from *ἰσχιε*, the lumbar region; others from the verb *ἰσχω*, 'I arrest,' 'I retain;'—because that bone serves as a base or support for the trunk, when we are seated.

**ISENON**, Haunch.

**ISCHIOPAGE**, from *Ischion*, and *παγω*, 'I fasten.' A monstrous union of two fœtuses, in which they are attached to each other by the ischia.—Geoffroy St. Hilaire.

**ISCHIO-PROSTATICUS**. Winslow, Santorini, Albinus, and Sömmerring, have given this name to the fibres of the transversus perinæi muscle, which go towards the prostate.

**ISCHIOSIS**, Neuralgia femoro-poplitæa.

**ISCHIO-TROCHANTERIANUS**, *Gem'ini, Gemelli*. Part of the *Marsupial'is* of Cowper, *Cur'neum Marsupium, Ischio-spin'trochantéru*, *Secundus et tertius quadrigeninus*, (F.)

*Muscle cannelé, Accessoire à l'obturateur interne.* Two small, fleshy bundles, long and flat, which arise,—the *superior* on the outside of the sciatic spine; the *inferior* behind the tuberosity of the ischium. Both pass horizontally outwards, and are attached to the tendon of the obturator internus, which they accompany into the fossa of the trochanter. These muscles are rotators of the lower limb outwards. They can, also, turn the pelvis on the femur, in standing on one foot.

ISCHNOPHONIA, from *ισχυος*, 'slender,' and *φωνη*, 'voice.' Slenderness of voice.—Hipp., Galen.

ISCHNOTES, Emaciation.

ISCHO, *ισχω*, 'I keep back,' 'I restrain,' 'I hold firm.' Hence:

ISCHIOBLENNIA, Ischioblennia.

ISCHOCOILIA, Constipation.

ISCHOGALACTIA, from *ισχω*, and *γαλα*, 'milk.' Want of milk in the mamme.

ISCHOLOCHIA OR ISCHOLOCHIA, from *ισχω*, 'I restrain,' and *λογγια*, 'the lochial discharge.' Suppression of the lochial discharge.

ISCHOMENIA, Amenorrhœa.

ISCHURETIC, *Ischuræticum*. Same etymology as the next. A medicine for relieving suppression of urine.

ISCHURIA, *Urinæ suppressio, Stoppage of urine, Suppres'sio lotii, Pururia retentivnis*; from *ισχω*, 'I arrest,' 'I retain,' and *ουρον*, 'urine.' Impossibility of discharging the urine. Generally restricted to suppression of the secretion, or to renal Ischuria or *Anuria*.

The ISCHURIA VERA is that in which the urine having accumulated in the bladder, the patient is unable to pass it, notwithstanding the inclination, which constantly distresses him. In the *False ischuria, Pururia inops, Ischuria notha*, owing to some disease of the kidney or ureters, the urine cannot reach the bladder.

Ischuria has likewise received various other names, according to the seat and character of the obstacle, which opposes the exit of the urine: hence the expressions—*Renal, Ureteric, Vesical, Urethral, and Calculous Ischuria*. The *Vesical Ischuria* is synonymous with Retention of Urine, which see.

ISCHURIA PHIMOSICA, see Phimosicus—i. Urethralis à phimosi, see Phimosicus—i. Vesicalis, Retention of urine.

ISINGLASS, Ichthyocolla.

ISIR, Elixir.

ISIS NOBILIS. See Coral.

ISOCHRONOUS, *Isodramos*, from *ισος*, 'equal,' and *χρονος*, 'time.' That which takes place in the same time, or in equal times. The pulsations of the arteries, in various parts of the body, are nearly isochronous.

ISOCHRYSON, *Auro compar*; from *ισος*, 'equal,' and *χρυσος*, 'gold.' A collyrium, described by Galen as worth its weight in gold. Libavius has also given this name to an amalgam, made with equal parts of antimony and mercury.

ISOCRATES; from *ισος*, 'equal,' and *ζευγνυσι*, 'I mix.' A mixture of equal parts of wine and water.—Hippocrates.

ISODROMOS, Isochronous.

ISOLUSINE. See Polygala scnegæ.

ISSUE PEAS, *Aurantia curassaventia*, see Fonticulus.

ISTHME DU GOSIER, Isthmus of the fauces.

ISTHMION, Isthmus, Pharynx.

ISTHMITIS, *Inflammatio Fau'cium*. Inflammation of the fauces. See Cynanche Pharyngea and Angina.

ISTHMOS, Pharynx.

ISTHMUS, *Isth'mion*. A tongue of land, joining a peninsula to a continent; or which separates two seas. Anatomists have given the name *Isthmus of the Fauces, Isthmus Fau'cium, Claustrum Gutturis*, (F.) *Isthme du gosier*, to the strait which separates the mouth from the pharynx. It is formed above by the velum palati and uvula; at the sides, by the pillars of the fauces and the tonsils; and below, by the base of the tongue.

The ISTHMUS OF THE THYROID GLAND is a narrow band, that unites the two chief lobes composing the thyroid gland.

The ISTHMUS OF THE FOSSA OVALIS, *Isthmus Viussenii*, is the prominent arch, formed above the fossa ovalis by the union of the two pillars which bound the cavity.

ISTHMUS HEPATIS, see Lobulus anonymus—i. Viussenii, Isthmus of the fossa ovalis—i. Viussenii, see Ovalis fossa.

ITCH, Psora—i. Weed, *Veratrum viride*.

ITCHING, *Parapsis pruritus, Aurtalgia pruriginosa, Pruritus, Prurigo, Cucmos*, (F.) *Prurit, Démangeaison*. A sensation, more inconvenient than painful; seated especially at the surface of the body, and which provokes the patient to scratch the part. It may be either an external or an internal sensation; that is, produced by an external body, or by some modification in the organic actions of the part to which it is referred.

ITEA, Salix.

ITER AD INFUNDIBULUM, Vulva—i. a Palato ad aures, Eustachian tube—i. ad Quartum ventriculum, Aquæductus Sylvii—i. ad Tertium ventriculum, Vulva—i. Urinariæ, Urethra.

ITHYPHALLUS, from *ιθυς*, 'straight,' and *φαλλος*, 'penis.' An amulet, in the form of a penis, anciently worn round the neck, to which were attributed alexiterial properties.

ITINERARIUM, Conductor, Director.

ITIS; from *ιτις*, 'bold, rash.' A suffix, denoting inflammation—as *encephalitis*. Inflammation of the Encephalon. *Pleuritis*; inflammation of the pleura.

IVA, Teucrium iva—i. Arthritica, Teucrium chamæpitys—i. Moschata monspeliensium, Teucrium iva—i. Pecanga, Smilax sarsaparilla.

IVETTE MUSQUÉE, Teucrium iva—i. *Pc-titc*, Teucrium chamæpitys.

IVORY; *Ebur, Elephas*. The tusk of the elephant. It is chiefly composed of phosphate of lime, and is used for the fabrication of pessaries, artificial teeth, handles of instruments, &c. Formerly, it entered into some pharmaceutical preparations, when calcined to whiteness. It was regarded as astringent and anthelmintic, and was called *Spodinn*.

IVY, *Hedera helix, Kalmia angustifolia*—i. Ground, *Glechoma hederacea*.

IXIA, Varix, Viscum album.  
 IXINE, Atractylus gummifera.  
 IXIR, Elixir.  
 IXOS, Viscum album.

IXUS, Galium aparine.

IXYS, *Ixyē*. Used by different authors for the ilia, flanks, and loins; most frequently for the last.—Hippocr.

## J.

JACA INDICA, Thymus mastichina.  
 JACEA, Viola tricolor—j. Ramosissima, Centaurea calcitrapa.

JACK IN THE HEDGE, Alliaria.

JACOBÆA, Senecio Jacobæa.

JACOBÉE, Senecio Jacobæa.

JACOBSON'S ANASTOMOSIS. See P-trosal ganglion.

JACTA'TION or JACTITA'TION, *Jacta'tio*, *Rhipto'smos*, *Jactita'tio*, from *jacta're*, 'to toss about.' Extreme anxiety; excessive restlessness;—a symptom observed in serious diseases.

JACTITA'TIO, Inquietude.

JADE NÉPHRITE OU ORIENTALE, Nephreticus lapis.

JAGRE. See Tari.

JALAP, Convolvulus jalapa, Phytolacca dendandra.

JALAPINE. See Convolvulus jalapa.

JALAPIUM, Convolvulus jalapa.

JALAPPA, Convolvulus jalapa—j. Alba, Convolvulus mechoacan.

JALEYRAC, MINERAL WATERS OF. These waters are situate two leagues from Mauriac in France, on the road from Clermont in Auvergne. The waters contain lime and carbonate of soda, and are esteemed to be tonic, aperient, &c.

JAMAICA BARK TREE, Bursera gummifera.

JAMAICINE. See Geoffræa inermis.

JAMBES DU CERVELET, Corpora restiformia.

JAMBIER, Tibial—j. *Antérieur*, Tibialis anticus—j. *Grêle*, Plantar muscle—j. *Postérieur*, Tibialis posticus.

JAMES TOWN WEED, Datura stramonium.

JANAMUNDA, Geum urbanum.

JANIPHA, Jatropha manihot.

JANITOR, Pylorus.

JANITRIX, Porta vena.

JANON-TAREN'TISME, Tarantismus.

JARRET. Poples.

JARRETIER, Popliteus, muscle.

JARRETIÈRE, (F.) *Peris'clis*, a garter, from *garctum* or *garretum*; in low Latin, the *ham*. A kind of furfuraceous herpes, which occupies the part of the leg, where the garter is worn.

JASMIN, Jasminum officinale.

JASMINUM ARABICUM, Coffea Arabum.

JASMINUM OFFICINALE, *Jasminum*, *Jeseminum*; the *Jes'amine*. (F.) *Jasmin*. The flowers of this beautiful plant have a very fragrant smell, and a bitter taste. They afford, by distillation, an essential oil; which is much esteemed in Italy, for rubbing paralytic limbs, and in the cure of rheumatic pains.

JATROPHA CURCAS, *Ric'inus major*, *Ricino'des*, *P'ncus purgans*, *Pink'nes In'dici*,

*Faba cathartica*, *Acella'na cathartica*, *Nux cathartica Americana*, *Nux Barboden'sis*; *Physic Nut*. (F.) *Pignon d'Inde*, *Médecinier cathartique*, *Grand haricot de Pérou*, *Pignon de Barbarie*, *Noix cathartique*, *N. Americaine* ou *des Barbades*. *Nat. Order*, Euphorbiacæ. The seeds of this plant afford a quantity of oil, which is given, in many places, like the castor oil; to which, indeed, it is nearly allied. They contain a peculiar acid, the *Jatrophic* or *Igasuric*.

The seeds of the *Jatropha Multifida* are called *Purging Nuts*, and give out a similar oil.

JATROPHA ELASTICA. See Caoutchouc.

JATROPHA MANIHOT. The plant affording the *Cassa'da* or *Cassa'ra Root*, *Caca'ri*, *Cassa'vê*, *Cuza'bi*, *Pain de Madagascar*, *Ric'inus minor*, *Man'ioc*, *Magnoc*, *Man'iot*, *Yucca*, *Manihab*, *Aipi*, *Aipima cozera*, *Aipipoca*, *Junipha*. The juice of the root is extremely acrid and poisonous. What remains, after expressing it, is formed into cakes or meal; of which the Cassada or Cassava bread is formed. This bread constitutes a principal food of the inhabitants of those parts where it grows.

The fecula of the root forms the Tapioca, *Cippa*, *Foc'ula Tapioka*, which is very nutritious.

JAUNDICE, Icterus—j. Black, Melæna—j. Red, Phenigmus.

JAUNE, Yellow—j. *d'Enf*, see Ovum.

JAUINISE, Icterus.

JAW BONE, Maxillary bone.

JEAN-DE-GLAINES, ST., MINERAL WATERS OF. These waters are situate two leagues from Billom in Auvergne. They contain muriate of lime, and carbonate of magnesia; dissolved in an excess of carbonic acid.

JECORARIA, Marchantia polymorpha.

JECORARIUS, Hepateros, Hepatic.

JECTIGATIO. A word, used by Van Helmont for a species of epilepsy or convulsion.

JECUR, Liver—j. Uterinum, Placenta.

JEJUNITAS, Hunger.

JEJUNIUM, Hunger, Fasting.

JEJUNUM, from *jejunus*, 'empty;' *Nestis*, *ηστικ*. The part of the small intestine, comprised between the duodenum and ileum. It has been so called, because it is almost always found empty in the dead body.

JELLY, Gelly—j. of the Cord, Gelatine of Wharton.

JERUSALEM OAK OF AMERICA, Chenopodium anthelminticum.

JESEMINUM, Jasminum officinale.

JESSAMINE, Jasminum officinale—j. Yellow, Gelseminum nitidum.

JEUNESSE, Adolescence.

JEW'S EAR, Peziza auricula.

JIMSTON WEED, Datura stramonium.

## JOANNESIA PRINCEPS, Anda.

JOANNETTE, MINERAL WATERS OF. Several springs are found at Joannette, about five leagues from Angers, in France. The waters are both cold and warm, and contain sulphate of lime; subcarbonate of soda; muriate of soda; some iron; muriate of lime; and, sometimes, a kind of saponaceous matter. They are chiefly used as a tonic in chlorosis, leucorrhœa, &c.

JOHNE, MINERAL WATERS OF. Johne is a village near Dol in Franche-Comté, France, where is a mineral spring, which contains subcarbonate of soda, and subcarbonates of magnesia and iron. It is used chiefly as a bath in certain diseases of the skin, and other atonic affections.

JOINT, Articulation—j. Ball and socket, Enarthrosis—j. Dovetail, Suture—j. Stiff, Ankylosis.

JONC ODORANT, *Juncus odoratus*—j. Roseau, *Acorus calamus*.

JONAS, MINERAL WATERS OF. This spring is situate to the southwest of Bourbon-l'Archambault, in France. The waters contain muriate and sulphate of lime; muriate and sulphate of soda; carbonate of iron and carbonic acid gas. They are tonic and aperient.

JOUAN, ST., MINERAL WATERS OF. St. Jouan is a village, near Saint-Malo, in France. The water is a cold chalybeate.

JOUBARBE ÂCRE, *Sedum*—j. *des Toits*, *Sempervivum tectorum*—j. *des Vignes*, *Sedum telephium*.

JOUE, Genu.

JOULOS, Julus.

JOUR, Dies.

JOURS CANICULAIRES, Dog days—j. *Critiques*, Critical days—j. *Indicateurs*, Indicating days.

JUCAÏO CALLELOE, *Phytolacca decandra*. JUDÆUS, JUDAÏCUS, (*Lapis*), *Phenicites Lapis*, *Tecol'ithos*, (F.) *Pierre Judaique*. A stone, found in Judæa, Palestine, &c. Called, also, *Lapis Syriacus*. It was formerly esteemed to be diuretic and lithontriptic.

JUDGMENT, *Judicium*, (F.) *Jugement*. The faculty of the intellect, by which ideas are compared with each other, and their relative worth appreciated.

JUDICIUM, Judgment.

JUGAL PROCESS, Zygomatic process.

JUGALIS SUTURA, from *ζυγορ*, 'a yoke.' The suture, which unites the *Os Mula* or *Os Jugalè* with the superior maxillary bone. Also, the sagittal suture.

JUGEMENT, Judgment.

JUGLANS REGIA, *Juglans*, *Nux Juglans*, *Corya basilica*, *καρυα*, *Carya*. The Walnut, (F.) *Noyer* (the tree;) *Noix* (the nut.) The unripe fruit, in the state in which it is pickled, was formerly esteemed an anthelmintic. The *putamen* or green rind of the walnut has been celebrated as a powerful antisyphilitic; and used as a sort of diet drink. The *kernel* of the walnut is an agreeable article of dessert; but, like all the nuts, difficult of digestion.

JUGLANS CINEREA, *Butter Nut*, *White Walnut*. The inner bark of the root of this tree, which is abundant in the United States, is used in medicine, in the form of extract, as an effica-

cious and mild laxative, in doses of from 10 to 20 grains. It is in the secondary list of the Pharmacopœia of the United States.

JUGULAR, *Jugula'ris*, from *jugulum*, 'the throat.' Relating to the throat.

JUGULAR VEINS, *Vena Jugula'ris*, *V. sphagittides*, *V. apoplectica*, *V. sopra'dles*. These are situate at the lateral and anterior parts of the neck. They are two on each side; one *external*, the other *internal*.

1. The *External Jugular Vein*,—*Trachélosous-cutané*, (Ch.) is of less size than the internal. It descends, almost vertically, along the anterior and lateral part of the neck, from the cervix of the lower jaw to the subclavian vein, into which it opens, a little above the internal jugular. It is formed by the *internal maxillary*, *superficial temporal*, and *posterior auricular veins*. It is this vein, which is commonly opened in bleeding in the neck.

2. The *Internal Jugular Vein*, *V. Céphalique* (Ch.) *Vena apoplectica*, is much larger and more deeply seated than the preceding. It descends, vertically, along the anterior and lateral part of the neck, from the posterior part of the foramen lacerum posterius as far as the subclavian vein. It commences at the sinus of the jugular vein, and receives the blood, which returns by the *sinus of the dura mater*, and that of the *facial*, *lingual*, *pharyngeal*, *superior thyroid*, *occipital*, and *diploic veins*.

The FOSSA JUGULARIS is a cavity in the *petro-occipital suture*. It is formed by the petrous portion of the temporal bone, and by the occipital bone, and lodges the origin of the internal jugular vein. It is, sometimes, called *thimble-like cavity*.

JUGULUM, Throat.

JUGUM PENIS, *Presse-urèthre*.

JUJUBE, *Ziziphum*. The fruit of the *Rhamnus Ziziphus*, a native of the south of Europe. It was formerly ranked amongst the pectoral fruits. It has an agreeable sweet taste.

JULAPIUM, Julep—j. *Camphoræ*, *Mistura camphoræ*.

JULEB, Julep.

JULEP, *Jula'pium*, *Jule'pus*, *Zula'pium*; *Juleb* of the Persians. A sweet drink. A demulcent, acidulous or mucilaginous mixture.

JULEP, CAMPHOR, *Mistura camphoræ*—j. *Camphrè*, *Mistura camphoræ*.

JULUS, *Julos*, *Ioulos*, *ιουλος*. The first down that appears upon the chin.—Rufus of Ephesus.

JUMEAU, Gemellus.

JUMEAUX DE LA JAMBE, Gastrocnemii.

JUMELLE, Gemellus.

JUNCTURA, Articulation.

JUNCUS ODORATUS, *Andropogon chænon'thus*, *Fænum camel'drum*, *Juncus aromat'icus*—*Camel's hay*, *Sweet rush*, *Schœnan'thus*, *Cal'amus odor'atus*, *Squinan'thus*, *Gramen orient'lc*. (F.) *Jonc odorant*. The dried plant, which is generally procured from Turkey and Arabia, has an agreeable smell, and a warm, bitterish taste. It was formerly used as a stomachic and deobstruent.

JUNIPER TREE, *Juniperus communis*.

JUNIPERUM VINUM. Wine impregnated with juniper berries.

JUNIPERUS COMMUNIS, *Arcu'tos*, *The*

*Juniper tree; Akatalis, Akal'era.* Family, Coniferae. *Sec. Syst.* Dœcia Monadelphia. The tops and berries are ordered in the pharmacopœias. Their odour is strong, but not unpleasant. Taste warm, pungent. Properties dependent upon essential oil, which they yield to both water and alcohol. Dose, ℥j to ʒss, rubbed with sugar. In Holland, juniper berries are used for flavouring the gin. The oil, *Oleum juniperi*, possesses the virtues of the plant. It is called by Ruland, *Targar*. (F.) *Genérier* (the plant,) *Genièvre* (the berry.)

**JUNIPERUS LYCIA.** This plant—*Thurea, Th. virga, Arbor thurifera*, has been supposed to afford the true *frankincense*, *Cedrus, Oliv'anim, Thus Libanotos, Lib'anos, Thus mas'culum, Thus verum*. (F.) *Encens*. By some, however, it is supposed to be the produce of an *Amyris*, and by others of the *Boswellia serrata*. The odour of libanum is peculiar and aromatic: taste bitterish and slightly pungent; partly soluble in alcohol, and forming a milky emulsion, when triturated with water. It was formerly used in dysentery and hæmoptysis, but is now never employed, except as a perfume in a sick room.

**JUNIPERUS SABINA, Sabina, Savina, Sabina ster'ilis, Bruta, Cedrus baccifera, Common or barren savin; Brathu, Brathys, Borathron, Borathrou, (F.) *Sabine, Savinier*. The odour of savin leaves is strong and disagreeable. Taste hot, acrid, and bitter, depending on an essential oil. Its operation is stimulant, emmenagogue, anthelmintic, and abortive; externally, escharotic. Dose, internally, gr. v to x of the powder. As an escharotic, it is applied in powder or formed into a cerate. The oil has the virtues of the savine.**

**JUNIPERUS VIRGINIANA, Red cedar.** This tree is known throughout the United States by the name of *savine*, and is often used for the same purposes.

**JUNK, Pad.**

**JUNO LUCINA, Iithyia.**

**JUPITER, Tin.**

**JURIBALI, Euribali.** A tree in the forests of Pomerony; *Nat. Fam.* Meliaceæ. *Class,* Octandria. *Order,* Monogynia. The bark is febrifuge, and may be given in powder or infusion. (ʒi to aq. bullient O. ij.)

**JURISPRUDENCE, (Medical), Jurisprudentia Medica.** This word is often used synonymously with Legal Medicine, which see. It is now, as frequently perhaps, employed for the embodied laws and regulations that relate to the teaching and practice of medicine.

**JUS, Zomus, ζωμος.** Soup, broth, or bouillon.

**JUS COAGULATUM, Gelly.**

**JUS D'HERBES, (F)** The juice of certain vegetables administered as depuratives; as the juices of fumitory, burdock, water trefoil, &c.

**JUS JELATUM, gelly—j. de Réglisse;** see Glycyrrhiza—*j. de Vuande*, see Bouillon.

**JUSQUIAMUS, Hyoscyamus.**

**JUSQUILAUME, Hyoscyamus.**

**JUSTICIA BIVALVIS, Adulasso—j. Adhatoda, Adhatoda.**

**JUSTICIA ECBOLIIUM, Curim curini.** A Malabar plant, the root of which, and the leaves, in decoction, are considered in the country to be lithontriptic.

**JUSTICIA PECTORALIS.** A West India plant, which is slightly astringent. (F.) *Carmantine, C. Pectorale, Herbe aux Charpentiers.*

**JUVANS, Auxilium, Remedium.** A medicine or substance of any kind, which relieves a disorder.

**JUVENTUS, Adolescence.**

**JUXTAPOSITION.** The mode of increase, proper to minerals; which consists in the successive application of new molecules upon those that form the primitive nucleus. It is opposed to *intussusception*.

## K.

**K.** This letter was formerly used to designate a compound of gold.

**KAATH, Catechu.**

**KAAWY.** Ancient name of an Indian drink, prepared from maize.

**KABALA, Cabal.**

**KÆMPFERIA GALANGA.** See Marantia Galanga.

**KÆMPFERIA ROTUNDA, Zedoaria, Amomum zedoaria, Colchicum Zeylanicum, Zedoary.** (F.) *Zédoaire rond.* The roots of this Ceylonese plant have a fragrant smell, and warm, bitterish, aromatic taste. They are in wrinkled, gray, ash-coloured, heavy, firm, short pieces; of a brownish red colour within; and are stimulant and carminative. Dose, ℥j to ʒj of the powder.

**KAHINCÆ RADIX, Cincæ radix.**

**KAIB, Kayl.** A word, employed by the alchemists for sour and coagulated milk.

**KAJEPUT, Cajeput.**

**KALI, Potash—k. Acetas, Potassæ acetas—k. Aeratum, Potassæ carbonas—k. Causticum, Potassa fusa—k. Causticum cum calce, Potassa**

**cum calce—k. Chloricum, Potassæ murias hyperoxygenatus—k. Hydriodicum, see Potassæ hydriodas—k. Nitricum, Potassæ nitras—k. Oxalicum acidulum, Potass, oxalate of—k. Præparatum, Potassæ subcarbonas—k. Præparatum e tartaro, see Potash—k. Purum, Potassa fusa—k. Spinosum cochleatum, Salsola kali—k. Subcarbonas, Potassæ subcarbonas—k. Sulphas, Potassæ sulphas—k. Sulphuricum, Potassæ sulphas—k. Sulphuretum, Potassæ sulphuretum—k. Tartarizatum, Potassæ tartaras—k. e tartaro, see Potash—k. Vitriolatum, Potassæ sulphas.**

**KALICUM HYDRAS, Potassa fusa.**

**KALIUM IODATUM.** See Potassæ hydriodas.

**KALMIA ANGUSTIFOLIA, Ivy, Narrow-leaved laurel, Dwarf laurel.** This plant has the same virtues as the next.

**KALMIA LATIFOLIA, Calico bush, Broad-leaved laurel.** This plant kills sheep and other animals. The Indians use it as a poison. The powdered leaves have been applied successfully in tinea capitis; and a decoction of it has been

used for the itch. The powder, mixed with lard, has been applied in herpes.

KAMPHUR, Camphor.

KAPHUR, Camphor.

KARABE, Asphaltum.

KARABITUS, Phrenitis.

KARENA, Carena.

KASSADER, *Convolvulus panduratus*.

KASSAUDER, *Convolvulus panduratus*.

KATASARCA, Anasarca.

KATASTALTICA, Astringents.

KAVIAC, Caviare.

KAYL, Kaib.

KELOID, Canceroid.

KELOTOMIA, Celotomia.

KELP, *Varec*. The impure mineral alkali, obtained by burning certain marine plants. See Soda.

KENNELWORT, *Scrophularia nodosa*.

KENTUCKY, MINERAL WATERS OF. The Olympian Springs in this state are near the sources of Licking river. There are three different kinds, in the space of half a mile. One of these is saline, impregnated with sulphur;—another is a chalybeate, and a third a sulphureous spring. In various parts of Kentucky, there are saline waters, which are frequented by invalids. The *Salines* at Bigbone, formerly employed in the manufacture of salt, are now resorted to by invalids.

A spring, near Harrodsburg in Mercer county, is strongly impregnated with sulphate of magnesia.

KERATOGLOSSUS, *Ceratoglossus*.

KERATO-IRITIS, Aqno-Membranitis.

KERATOMUS, *Ceratotomus*.

KERATONYXIS, *Ceratonyxis*.

KERATOPHARYNGEUS, *Ceratopharyngus*.

KERATOSTAPHYLINUS, *Ceratostaphylinus*.

KERATOTOMUS, *Ceratotomus*, Knife, cataract.

KERMES OR CHERMES. One of the species of the genus *kermes* lives on a green oak, and is called *Coccus ilicis*, *Kermes animal*, *Coccum*, *Cocci granum*, *Coccum baphicum*, *infectorium*, *tinctorium*, *scarlatinum*, &c. The oak, to which allusion has been made, is known by botanists under the name, *Quercus coccifera*, and grows abundantly in the uncultivated lands of southern France, Spain, and in the islands of the Grecian Archipelago. The kermes, inhabiting it, has the appearance of a small, spherical, inanimate shell. Its colour is reddish brown; and it is covered with a slightly ash-coloured dust. This is the kermes of the shops. It is now only used in dyeing; but was formerly reputed to possess aphrodisiac, analeptic, anti-abortive, and other virtues.

KERMES MINERAL, See *Antimonii sulphuretum præcipitatum*.

KERUA, *Ricinus communis*.

KETCHUP OR CATCHUP. A pickle prepared from the liquor of the mushroom, walnut, tomatia, &c.

KETMIA ÆGYPTIACA, *Hibiscus abelmoschus*.

KEY, *Clavis*, *Cleis*, *Clavis An'glica*, (F.) *Clef de Garangrot*. An instrument, used for ex-

tracting teeth. It consists of a firm handle, with a claw at right angles to it, and moving upon a pivot. This claw embraces the tooth. It has undergone several modifications; and hence various instruments are used under this denomination. The French have the *Clef à pompe*, *Clef à pivot*, and *Clef à noix*.

KEYRI CHEIRI, *Cheiranthus cheiri*.

KHALA MI MUC, Bit noben.

KIAS'TER, *Chiaster*, from  $\chi\alpha\iota\sigma\tau\epsilon\iota\upsilon$ , 'to cross.' A species of bandage, having the form of the Greek letter  $\chi$ , which the ancients used for approximating, and maintaining in contact, the fragments of the patella, in cases of fracture of that bone. It was applied in the form of the figure 8.

KIBISTITOME, *Cystitome*.

KIDNEY. Its etymology is uncertain. Senenius derives it fancifully from Su. Goth. *qued*, the belly; and *nigh*, (*quasi*, kidney.) *Ren*, *Nephros*, *Protme'sis*. (F.) *Rein*. The kidneys are the secretory organs of the urine. They are two glands, situate deeply,—the one on the right, and the other on the left side,—in the hypochondres; at the sides of the lumbar vertebrae; behind the peritoneum; and in the midst of an abundant, fatty cellular tissue, called *Tunica adiposa*. The kidney is of a reddish-brown colour; oval form; and flattened on two surfaces. It has, at its internal margin, a deep fissure, by which the renal vessels and nerves enter or quit the organ, and the ureter issues. It resembles, pretty accurately, the haricot or kidneybean. Two substances are readily distinguishable in it;—the outer, *Secerning* or *Cortical*, *Substantia corticalis*, *S. glandulosa*, which secretes the urine; and the inner, *Tubular*, *Medullary* or *Uriniferous*, *Substantia medullaris*, *S. Tubulosa*, *S. Fibrosa*, which appears under the form of small cones or unequal papillae, each resulting from the union of small capillary tubes, adherent by one of their extremities to the cortical substance; and opening, by the other, at the summit of the cone, into *calices*, a species of membranous tubes, more or less numerous, which transmit the urine of the papillae to the *pelvis*. By this (*pelvis*) is meant a small, membranous sac, of an irregularly oval shape, at the base of which are the orifices of the calices; and the other extremity of which is continuous with the ureter. The kidney is surrounded by a fibrous membrane proper to it.

KIDNEY, BRIGHT'S DISEASE OF THE. *Morbus Brightii*, *Nephritis albuminosa*, *Granular Kidney of Bright*, (F.) *Maladie de Bright*. A granular disease of the cortical part of the kidney, which gives occasion to the secretion of urine that contains albumen, and is of less specific gravity than natural, and which destroys by inducing other diseases. It was first described by Dr. Bright of London, about ten or twelve years ago.

KIDNEY, GRANULAR, OF BRIGHT, *Kidney*, *Bright's disease of the*.

KIESTEINE, *Kiestine*, *Kiest'na*. A peculiar substance, which forms a pellicle on the urine of a pregnant female, when allowed to stand for a few days. It is whitish, opalescent, slightly granular, and may be compared to the fatty substance that swims on the surface of soups, after they have been allowed to cool. When

taken in conjunction with the other phenomena it is an aid in the diagnosis of pregnancy.

**KILOGRAMME**, *Chiliogramma*, from  $\chi\lambda\iota\omicron$ , 'a thousand,' and  $\gamma\rho\alpha\mu\mu\alpha$ , 'a gramme.' The weight of a thousand grammes—two pounds, eight ounces, one drachin, and twenty-four grains, Troy.

**KILOLITRE**, from  $\chi\lambda\iota\omicron$ , 'a thousand,' and  $\lambda\iota\tau\rho\alpha$ , 'a litre.' A measure, containing a thousand litres.

**KINA KINA**, Cinchona.

**KINANANCIE**, Cynanche.

**KINCOUGH**, Pertussis.

**KINDCOUGH**, Pertussis.

**KING'S EVIL**, Scrofula.

**KINICI ACETAS**, Quinine, acetate of.

**KININUM**, Quina.

**KINKINA**, Cinchona.

**KINO**, *Gummi Gambien'se*, *Gummi rabrum adstrin'gens Gambien'se*, *African kino*, *East India kino*, *Amboy'na kino*, *Gummi adstrin'gens Fothergill'i*. The tree, whence this resin is obtained, though not botanically ascertained, is known to grow in Africa on the banks of the Gambia. The London college ascribe it to the *Pterocarpus crinud'cea*, the Edinburgh to the *Eucalyptus resinif'era*, and the Dublin to the *Butea frondosa*. On wounding the bark, the kino flows drop by drop. Kino consists, chiefly, of tannin, gallic acid, oxide of iron, and colouring matter. It is inodorous; the taste a sweetish bitter; and it is sometimes gritty between the teeth. It comes to us in fragments of a dark ruby red colour, and is easily pulverized. Its properties are powerfully astringent. Dose, gr. x to gr. xx, in powder.

**KIONORRHAPHIA**, Staphyloraphy.

**KIOTOME**, *Kiot'omus*; from  $\kappa\iota\omicron\tau\omicron$ , 'a pillar,' 'support,' and  $\tau\epsilon\mu\upsilon\epsilon\iota$ , 'to cut.' (F.) *Coupebride*. An instrument, invented by Desault, to cut any accidental *brides* or filaments in the rectum and bladder; and which he, afterwards, used for the removal of the tonsils. It is composed of a flat, silver sheath; open at one edge. This sheath is provided with a cutting blade, which can be forced through the opening, and thus all the parts can be divided with which it comes in contact.

**KIPPERNUT**, *Bunium bulbocastanum*.

**KIRATE**. A weight of four grains according to Blancard.

**KIRRHONO'SIS**, Cirrhonosis.

**KIRRHOSIS**, Cirrhonosis.

**KIRSCHWASSER** (G.) *Cherry water*. An alcoholic liquor, obtained from cherries bruised with their stones, by subjecting them to distillation, after having caused them to ferment. See Spirit.

**KIST**. A weight of 14 grains.—Paracelsus.

**KLAPROTHII SULPHAS**, *Cadmii Sulphas*.

**KLAPROTHIUM SULPHURICUM**. See *Cadmii Sulphas*.

**KLEPTOMANIA**; from  $\kappa\lambda\epsilon\pi\tau\omicron$ , 'I steal,' and *mania*. Insanity, with an irresistible propensity to steal.

**KLOPEMANIA**, *Clopedmania* from  $\kappa\lambda\omicron\pi\eta$ , 'theft,' and *mania*, 'mania.' Monomania, with an irresistible desire to steal.

**KNEADING**, Shampooing.

**KNEE-SCAB**, *Crusta genu equinæ*—k. Encircled hoof, *Crusta genu equine*.

**KNIFE**. Sax. *cnif*. Swed. *K n i f*. Dan. *K n i v*. (F.) *Cunif*. *Culter*, *Smile*, *Cultellus*, *Tomé'ion*, *Tomcus*, *Macha'ra*, *Macha'ron*, *Macha'ris*, (F.) *Couteau*. A cutting instrument, used in surgery, to divide the soft parts, and which only differs from the bistouri or scalpel in being commonly larger.

The most common knives are the following:

**AMPUTA'TION KNIFE**, (F.) *Couteau à amputation*, *C. droit*, *Culter rectus*. This is the largest of the knives used in surgery. Formerly, they were curved; now they are straight and provided with one or two edges.

**CAT'ARACT KNIFE**, *Cerat'omus*, *Kerat'omus*, (F.) *Couteau à cataracte*. The cataract knives of Richter, Wenzel, Ward, and others, being intended to perform the section of the transparent cornea, are so shaped as to exactly fill the small wound made by them; and thus to prevent the discharge of the aqueous humour, until the section is completed. The blade of the knives of Wenzel and Ward, resembles a very narrow lancet, blunt in the posterior five-sixths of one of its edges. The blade of that of Richter is pyramidal, cutting through the whole length of its inferior edge, and also blunt in the five-sixths of the upper.

**THE CROCHET KNIFE**, *Cultell'us uncus*, (F.) *Couteau à crochet*. A steel instrument, composed of a round staff, furnished with a handle at one extremity, and at the other with a curved knife. It was formerly used to cut to pieces monstrous fætales in utero; and to open the head when necessary.

**DOUBLE EDGED KNIFE**, *Anceps cultell'us*, *Amphis'mela*, *Amphis'mile*, *Cutting*, (F.) *Couteau à deux tranchans*, *Couteau désarticulateur*, *C. interosseux*. A knife, the blade of which is straight and sharp on both sides. It is used for disarticulating bones; and for cutting the soft parts situate between the bones, in amputation of the leg and forearm.

**CROOKED KNIFE**, *Culter falca'tus*, *Culter curvus*, (F.) *Couteau courbe*. A knife, which is crooked and concave on its cutting edge. It was formerly employed in amputation of the limbs.

**CHESELDEN'S KNIFE**. A knife with a fixed handle; very convex on its edge, concave on the back, and which was used by Cheselden in *lithotomy*.

**KNIFE EN SERPETTE**, (F.) *Couteau en serpette*. A sort of knife, of the shape of a *serpette* or pruning knife, invented by Desault for dividing the bony paries of the maxillary sinus, for the purpose of extracting fungi from it.

**LENTICULAR KNIFE**, *Culter lenticula'ris*, (F.) *Couteau lenticulaire*. An instrument, used in the operation of trepanning, for removing inequalities in the inner table of the skull, which may have been left by the crown of the trephine around the opening made by it. It is formed of a lenticular button, fixed at the extremity of an iron staff, which is convex on one side, flat on the other; sharp at both edges and mounted on an ebony handle.

**LITHOT'OMY KNIFE**, (F.) *Couteau lithotome*. A name, given by Foubert to a large knife, the narrow blade of which, four and a half inches in length, was sharp in its whole extent, and made an obtuse angle with the handle. He used it in the lateral operation.

**KNOT, PACKER'S, (F.)** *Nœud d'emballleur*. A compressive bandage, used for arresting hemorrhage from the temporal artery or its branches. The *nœud d'emballleur* is made with a double-headed roller, five ells long. A graduated compress is placed over the opening in the artery, and the bandage is applied over it; the balls of the roller being carried horizontally round to the opposite temple; where they are crossed obliquely and carried back to the part where the compress is situate. The hands are then changed with the rollers, crossing them so as to form a knot, and taking one above the head; the other beneath the chin. They are then crossed again, so as to form several knots, one above the other. This bandage is called, by some surgeons, *Solar* or *oblique chevestre*, or *capistrum*.

**KNOT, SURGEON'S, (F.)** *Nœud du chirurgien*. A double knot, made by passing the thread twice through the same noose. This knot is used frequently in the ligature of arteries, in the umbilical cord, &c.

**KNOTBERRIES, Rubus chamæmorus.**

**KNOTGRASS, Polygonum aviculare.**

**KOINO-MIASMATA.** See Miasm.

**KOLERUS.** A name given by Paracelsus to dry ulcers.

**KOLPORRHAPHY, Elytrorrhaphy.**

**KOLTO, Plica.**

**KORIS, Cimex.**

**KRAME'RIA RATAN'HIA, Rhatan'ia, Nat-anhy, (F.) Ratanhie, Ratanhia.** The krameria is a native of Java. The root has a bitter taste; and is astringent, diuretic, and detergent. Dose, ʒj to ʒi.

The **KRAME'RIA IXI'NA, or Ratanhie of the Antilles**, has similar virtues.

**KREOSOTON, Creosote.**

**KUA KAHA, Curcuma longa.**

**KUTKULEJA, Cæsalpinia Bonducella.**

**KUTOOKURUNJA, Cæsalpinia Bonducella.**

**KUTUBUTH.** An Arabic name for a species of melancholy, in which the patient is never quiet at any one place, but wanders about here and there. Also the name of an insect which lives at the surface of stagnant waters, and is in a constant state of agitation. Some lexicographers imagine that it is on account of this last circumstance, that the name of the insect has been given to the disease.

**KYAPÜTTY, Caieput.**

**KYLLO'SIS, κυλλωσις, from κυλλος, 'crooked,' 'lame,' Cyllo'sis.** Professor Chaussier so

calls congenital distortion of the feet, *Club-foot, Tal'ipes, (F.) Pied bot.* Of this there are many varieties. In the first, the foot, instead of resting on the soil, by the whole plantar surface, touches it only with the metatarso-phalangian articulations. It seems as if turned backwards and broken upon the leg, (*Pes Equinus.*) In the other cases the foot is twisted inwards, (*Varus, (F.) Cagneux,*) so that it rests only on the ground on its outer edge; or it may be twisted inwards, (*Valgus*) or rest only on its inner surface. In the *flat-foot, Sar'apus, (F.) Pied plat,* the plantar surface of the foot is flattened instead of being concave.

These deformities are rarely accidental. They are almost always congenital, and may be rectified, at an early period, by proper mechanical means to strengthen the foot gradually and restore it to its proper shape and direction; and if these means fail, the tendons and muscles concerned in the deformity may be divided.

**KYNA, Pastinaca opoponax.**

**KYST or CYST, Kystus, Cystus, from κυστις, 'a bladder,' pouch,' (F.) Kyste.** This term is generally applied to pouches or sacs, without opening, and commonly of a membranous nature, which are accidentally developed in one of the natural cavities, or in the substance of organs. Many theories have been successively emitted to explain the formation of cysts, but none are entirely satisfactory. Some are formed by a thin, translucent membrane; having scarcely the thickness of the arachnoid; others of a whitish, fibrocellular membrane, more or less thick. Some contain cartilaginous or bony flakes. The greater part have but one cavity; others, on the contrary, have several; separated by complete or imperfect septa, as is frequently seen in those developed in the ovaries. The matter, contained in cysts, is sometimes limpid, serous, yellowish, white, reddish, and, at others, more or less thick, albuminous, adipous, or caseous. The tumour, formed by them, is called Encysted, which see.

**KYSTE ANEVRYSMAL, Aneurismal sac.**

**KYSTHITIS, Cysthitis, from κυσθος, 'the vagina.'** Inflammation of the vulva and of the mucous membrane of the vagina.

**KYSTHOPTOSIS, from κυσθος, 'the vagina,' and πτω, 'I fall.'** Prolapsus or inversion of the vagina.

**KYTTARRHA'GIA, from κυτταριον, 'an alveolus,' and ρηγνυμι, 'I break forth.'** Discharge of blood from an alveolus.

## L.

**LABE, from λαβανω, 'I seize,' 'I take,' Invasion.** Also, employed to denote the first paroxysm of fevers—Galen, Hippocr.

**LABIA INTERNA SEU MINORA, Nymphæ.**

**LABIA PUDENDI, Lips of the Vulva.**

**LABIAL, Labial'is, from Labium, 'a lip.'**

**LABIAL, Orbicularis oris.**

**LABIAL ARTERY.** Haller and Sabatier call

thus the *facial artery* of the majority of anatomists.

The *labial arteries*, properly so called, or *coronary arteries of the lips, (F.) Coronaires des lèvres,* are two in number. The *superior* arises from the facial, above, and very close to, the commissure of the lips. It is large and tortuous, and is distributed to the upper lip. The *lower* arises from the facial, at a considerable

distance from the commissure, and proceeds, in a serpentine course, into the substance of the lower lip, to which it is distributed.

**LABIAL GLANDS.** This name is given to a multitude of muciparous follicles, of some size; round, prominent, and separate from each other; which are found on the inner surface of the lips, below the mucous membrane.

The **LABIAL VEINS** are distinguished, like the arteries, into *superior* and *inferior*. They open into the facial vein;—a division of the internal jugular.

**LABIALIS, Orbicularis oris.**

**LABIS, Forceps.**

**LABIUM, Lip**—*I. Leporinum, Harelip.*

**LABLAB, Dolichos Lablab.**

**LABORATORY, Laboratorium, Ergasterion,** from *laborare*, 'to work.' A name given to any place for preparing chemical or pharmaceutical products, &c.

**LABORIOUS.** Delivery is said to be laborious, (*F.*) *Accouchement laborieux*, when attended with more difficulty and suffering than usual. With some, *laborious labour* means one that requires the use of instruments. See *Dystocia*.

**LABOUR, Parturition**—*I. difficult, Dystocia*—*I. Morbid, Dystocia*—*I. Pains, see Pains*—*I. Show, see Parturition.*

**LABRISULCIUM, Cheilocace, Stomacace.**

**LABRUM, Lip**—*I. Cerebri, Infundibulum of the brain.*

**LABRUSCA, Bryonia Alba.**

**LABYRINTH, Labyrinthus, Antrum lucidum.** A place, full of turnings, the exit of which is not easily discoverable. Anatomists have given this name to the aggregate of parts, constituting the internal ear, *Labyrinthus auris intima, Ultima pars organi auditus*. The Labyrinth is situate between the tympanum and meatus auditorius internus. It is composed of several cavities, which communicate with each other in the dried bone; as the *vestibule, cochlea, semicircular canals, &c.* It is lined by perosteum, and also by a *pulpy membrane*, constituting the *membranous labyrinth*, on which the auditory nerve is regularly dispersed. This membrane forms two sacs in the vestibule, called *sacculus vestibuli* and *sacculus*, (*q. v.*) respectively, which resemble in shape, that of the bony cavities containing them. Each sac contains calcareous matter, constituting the *Otolithes* and *Otoconies*. When the sac is laid open, upon the upper and outer part, a partition appears, partaking of the nature of the sac, and called by Meckel, *Septum vestibuli nervo-somembranaceum*.

**LAC, Milk**—*I. Ammoniacy, Mistura ammoniaci*—*I. Amygdalæ, Emulsio amygdalæ*—*I. Asafœtidæ, Mistura asafœtidæ*—*I. Avis, Albumen ovi*—*I. Guaiacy, Mistura Guaiacy*—*I. Gum, Lacca*—*I. Lunæ, Marga candida*—*I. Maris, Sperm*—*I. Seed, Lacca*—*I. Shell, Lacca*—*I. Stick, Lacca*—*I. Sulphuris, Sulphur præcipitatum*—*I. Terræ, Magnesie carbonas*—*I. Virginis, Virgin's milk.*

**LACCA, from lakah, Arab. Gummi lacca, Stick-lac, Gum-lac, Seed-lac, Shell-lac, (F.) Laque.** Lac is a substance formed by an insect, and deposited on different species of trees, chiefly in the East Indies. The various kinds, distin-

guished in commerce, are;—*stick-lac*, which is the substance in its natural state, investing the small twigs of the tree: and *seed-lac*, which is the same broken off. When melted, it is called *shell-lac*.

Lac was, at one time, used in the form of tincture, as a tonic and astringent; and it still forms part of particular dentifrices.

**LACERATION, Laceratio, Rhexma, Ruptura, Rupture,** from *lacerare*, 'to tear:—*Dilaceratio, Spargma, (F.) Arrachement, Déchirement, Dilaceration.* The act of tearing or rending. The breach, made by tearing or rending; as a *lacerated wound, Tresis vulnus laceratum, Laceratura, Vulnus laceratum.*

**LACERATURA, See Laceration.**

**LACERTA, Lizard.**

**LACERTI CORDIS, Columnæ carneæ.**

**LACERTULI CORDIS, Columnæ carneæ.**

**LACERTUS, Brachium, Muscle.**

**LAC'ERUM.** Same etymon. Any thing torn, or appearing as if torn.

The **FORAMEN LAC'ERUM ANTE'RIUS, (F.) Trou déchiré antérieur, Hiatus sphæno-pétreux, (Ch.)** is an irregular opening, formed by the sphenoid and petrous portion of the temporal bone. This foramen transmits the third, fourth, and sixth pair of nerves and the first branch of the fifth pair to the eye and its appendages.

The **FORAMEN LACERUM POSTE'RIUS, Foramen jugulârè, F. lacrum in Basi Cranii, (F.) Trou déchiré postérieur, Hiatus occipito-pétreux, (Ch.)** is formed by the occipital bone and the inferior edge of the petrous portion of the temporal bone. Through it, the internal jugular vein, the eighth pair of nerves, and accessory nerve pass out of the cranium.

**LACHRYMA, Tear.** See, also, *Vitis vinifera.*

**LACHRYMAL, Lacrymalis,** from *lachryma*, 'a tear.' Belonging to the tears. This epithet is given to various parts.

The **LACHRYMAL PASSAGES, Viæ lacrymales, (F.) Voies lacrymales.** The organs concerned in the secretion of tears, in spreading them over the eye, and taking them up again to transmit them into the nasal fossæ. The lachrymal passages are composed of the *lachrymal gland, caruncle, puncta, ducts, the lachrymal sac, and the nasal duct.*

The **LACHRYMAL GLAND, Glan'dula innominata Gale'ni seu lacrymalis,** is seated in a depression of the frontal bone at the upper, anterior, and outer part of the orbit. It is of about the size of an almond; and of an oval shape, flattened above and below:—its great diameter being the antero-posterior. It is composed of several small lobules, united by cellular tissue, and separated by it as well as by vessels and nerves which creep in the intervals. This gland has seven or eight excretory ducts, which open behind the upper eyelid. It *use* is to secrete the tears, and pour them on the globe of the eye by the excretory ducts.

**LACHRYMAL CARUNCLE.** See *Caruncula lacrymalis*.

The **PUNCTA LACRYMALIA, (F.) Points lacrymaux,** are two small, round, and contractile openings, situate in the centre of a tubercle, about a line and a half distant from the inner commissure of the eyelids, and continuous with

the *lacrymal ducts*. These ducts, (F.) *Conduits lacrymaux*, *Lacrymales Canaliculi*, *Canalcs* seu *Ductus lacrymales*, *D. lacrymales*, *Ductus lacrymales laterales*, *D. punctorum lacrymalium*, *Cornua lacrymalia*, *Collicia punctorum lacrymalium*, *Canaliculi lacrymalium*, *Cornua Lacrymalium*, are two in number—a superior and an inferior—which extend from the puncta to the lacrymal sac. They seem formed by a very delicate prolongation of the conjunctiva, which is continuous with the mucous membrane of the lacrymal sac, (F.) *Reservoir des larmes*:—the *Saccus* seu *Sinus* seu *Lacus lacrymalis*, *Infundibulum lacrymale*, *Saccus lacrymalis*.

The LACHRYMAL OF NASAL CANAL OR DUCT, *Canalis lacrymalis*, *Canalis orbitæ nasalis*, *Ductus nasalis orbitæ*, *Canalis sacci lacrymalis*, *Ductus ad Nasum*, is formed by the superior maxillary bone, os unguis, and os turbinatum inferius; and is seated in the outer paries of the nasal fossæ. It is lined by a prolongation of the mucous membrane of the lacrymal sac; and its inferior orifice is furnished with a valvular duplicature. This duct transmits the tears, which have been absorbed at the great angle of the eye by the puncta lacrymalia, into the nasal fossæ.

The LACHRYMAL FOSSA, *Fossa* seu *Fovea lacrymalis*, is a slight depression at the upper part of the orbit, which lodges the lacrymal gland.

The LACHRYMAL GROOVE, (F.) *Gouttière lacrymale*, is the bony channel, which lodges the lacrymal sac. It is seated at the anterior and inner part of the orbit, and is formed by the os unguis and the ascending process of the upper jaw bone.

The LACHRYMAL ARTERY proceeds from the ophthalmic; and distributes its principal branches to the lacrymal gland.

The LACHRYMAL VEINS accompany the artery of the same name, and open into the ophthalmic and palpebral veins.

The LACHRYMAL NERVE is the smallest of the three branches formed by the ophthalmic nerve. It is distributed, particularly, to the lacrymal gland and to the upper eyelid. In its course it gives off a *sphæno-maxillary* and a *malar* filament.

LACHRYMAL HERNIA OR TUMOUR, *Hernia Sacci Lacrymalis*, is when the tears enter the puncta, but cannot pass to the nose, and accumulate. By Anel, this was called *Dropsy of the Lacrymal Sac*.

LACHRYMATIO, Epiphora.

LACIS, Plexus.

LACMUS TINCTORIUS, Lichen rocella.

LACONICUM, Vaporarium. See Stove.

LACQ, Laqueus.

LACRUMA, Tear.

LACRYMA, Tear.

LACTATION, *Tithenesis*, *Thela'sis*, *Thelus-mus*, *Lactatio*; from *lacteo*, 'I suckle,' 'I give milk.' *Suckling*:—the giving of suck, (F.) *Allaitement*.

The French have four varieties of lactation.

1. *Allaitement maternel*,—*Maternal Lactation*, when the mother suckles the child.
2. *A. étranger, mercenaire*,—when another suckles it.
3. *A. artificiel*,—when the child is brought up by hand.
4. *A. animal*, when the child is suckled by some animal.

LACTEALS, Chyliferous vessels.

LACTEUS, Lactic.

LACTIC, *Lacteus*, from *lac*, 'milk,' appertaining to milk.

LACTIC ACID, *Acidum Lactcum*, *Acid of milk*. *Acidum Lactis*. This has been recommended as a therapeutical agent in atonic dyspepsia, owing to its being presumed to be one of the gastric acids secreted in health. It is given either in the form of lemonade or of lozenges. The acid is obtained either from milk or from the juice of the red beet.

LACTICA, Typhoid.

LACTICINIA, Parotid.

LACTIFEROUS, *Galactophorus*, (q. v.) *Lactiferus*, from *lac*, 'milk,' and *fero*, 'I carry.'

THE LACTIFEROUS VESSELS OF DUCTS, *Tubuli lactiferi* vel *Ductus lactiferi*, (F.) *Vaisseaux ou conduits lactifères*, are the excretory ducts of the Mammary Gland, which see.

LACTEAL OR LACTIFEROUS SWELLING. A tumefaction of the breast, supposed by Sir Astley Cooper to arise from a large collection of milk in one of the lactiferous tubes, the result of chronic inflammation of the tube near the nipple, with closure of its aperture, and obliteration of the canal for an inch or more. The tube requires to be punctured.

LACTIFUGA, *Lactifuge*, from *lac*, 'milk,' and *fugo*, 'I drive away.' Medicines which dispel milk.

LACTINIA, from *lac*, 'milk.' Food prepared with milk.

LACTIPOTOR, Galactopotes.

LACTIS REDUNDANTIA, Galactia.

LACTIVORUS, Galactophagous.

LACTUCA, from *lac*, 'milk,' so called from its milky juice. *Lactuca sativa*, *Lettuce*, *Garden Lettuce*, *Ennuchium Meco'nis*, *Thridax*, *Cherbas*, (F.) *Laituc ordinaire*. It is used as a wholesome salad. The seeds possess a quantity of oil, which, when formed into an emulsion, has been advised in ardor urinæ, &c.

The inspissated juice, *Lactuca'riam*, *Thrid'acæ*, resembles, in odour and appearance, that of opium, and is, like it, narcotic, but uncertain. Dose, gr. j to x and more.

LACTUCA GRAVEOLENS, *L. Virosa*.—*L. Sylvestris*, *L. scariola*.

LACTUCA SCARIOLA, *L. Sylvestris*, *Scariola*, (F.) *Laituc Scariote*, *L. savage*, possesses a stronger degree of bitterness than the *L. Sativa*. It has similar virtues with the next.

LACTUCA VIROSA, *L. gravecolens*, *Strong-scented Lettuce*, (F.) *Laituc viruscæ*. The odour of this plant, the leaves of which are used in medicine, is strongly narcotic, and the taste bitter. They are narcotic, diuretic, and aperient; and have been used in dropsies.

LACIUMEN, Porrigo larvalis.

LACUNA. A *Fossa* or *Ditch*. Anatomists have given this name to small cavities in the mucous membranes, the parietes of which secrete a viscid humour. Certain lacunæ are but the excretory orifices of mucous crypts. They are very visible in the rectum, vagina, urethra, &c. Sometimes, *lacuna* is used synonymously with *crypt*.

LACUNA, Fontanella.—*L. Cerebri*, *Infundibulum of the brain*, *Pituitary gland*.—*L. Folliculus*, *Crypta*.

LACUNAR VENTRICULI QUARTI SUPERIOR, Valvula Viuessenii.

LACUNE DE LA LANGUE, Cæcum foramen.

LACUS LACRYMALIS, Lachrymal sac.

LADA, Piper nigrum.

LADANUM. See *Cistus creticus*.

LADENDO, Influenza.

LADIES-MANTLE, Alchemilla.

LADIES-SMOCK, Cardamine pratensis.

LADRERIE, (F..) from *λαδρος*, 'deformed.' (F.) *Léproserie, Maladrerie*. A vulgar name for the Elephantiasis (q. v.) or Leprosy of the Arabs. Also, an hospital for the reception of the leprosy.

LADYBIRD, *Coccinella septempunctata*.

LADYBUG, *Coccinella septempunctata*.

LADYCOW, *Coccinella septempunctata*.

LÆMOS, Pharynx.

LÆSION, Lesion.

LÆTIFICANTIA, from *lætifico*, 'I make glad.' Medicines, formerly used as cordials, in depression of spirits, &c.

LAGNEIA, Coition.

LAGNESIS FUROR FÆMININUS, Nymphomania—*I. Furor masculinus, Satyriasis—I. Salacitas, Satyriasis*.

LAGOCHÆILUS, Harelip.

LAGONES, Flanks.

LAGONOPONOS, Pleurodynia.

LAGOPHTHALMIA, from *λαγως*, 'a hare,' and *οφθαλμος*, 'an eye.' *Hare's Eye, Leporinus Oculi*, (F.) *Œil de Lièvre*. A vicious arrangement of the upper eyelid, which is so retracted, that it cannot cover the globe of the eye during sleep. It has been asserted, that this condition of the eye is natural in the hare when asleep.

LAGOPHTHALMUS, Geum urbanum.

LAGOSTOMA, Harelip.

LAICHE, Sarsaparilla Germanica—*I. des Sables, Sarsaparilla Germanica*.

LAIT, Milk—*I. Advucisaut, Looch ex ovo—I. d'Anesse, Milk, asses—I. d'Amandes, Emulsio amygdalæ—I. d'Asafœtida, Mistura asafœtidæ—I. de Beurree, Buttermilk—I. de Brebis, Milk, ewes—I. Caillé, Curds—I. de Chèvre, Milk, goats—I. Épanché, L. répandu—I. de Femme, Milk, human—I. de Jument, Milk, mares—I. de Poule, see Ovum—I. de Vache, Milk of the cow—I. Virginal, Virgin's milk.*

LAIT RÉPANDU, (F.) *Lait épanché*. A popular expression in France, under which is comprehended every kind of disease (and particularly vague pains) occurring after delivery; all being ascribed to diffusion or deposition of milk.

LAITERON DOUX, *Sonchus oleraceus*.

LAITUE ORDINAIRE, Lettuce—*I. Sauvage, Lactuca scariola—I. Scariole, Lactuca scariola—I. Virgine, Lactuca virosa*.

LAKEWEED, *Polygonum hydropiper*.

LALIA, Voice, articulated.

LALLATION, *Lallatio, Lambdaeis'mus, Lullaby speech*. Sauvages uses this term for a vicious pronunciation, in which the letter L is improperly doubled, or softened, or substituted for R.

LAMBACISMUS, Lallation.

LAMBDOID OR LAMBDOYDAL, *Lambdoides*, from the Greek letter  $\lambda$ , *λαμβδα*, and

*ειδος*, 'shape,' 'resemblance.' Anatomists have given the name LAMBDOIDAL SUTURE, *Sutura lambdoidalis, S. Proræ*, to the suture, formed by the parietal bones and the occipital, because it resembles the letter  $\lambda$ , *lambda*, of the Greeks. It is the *Occipito-parietal suture*,—*Suture occipitale*, (Ch.) In this suture the ossa wormiana are most frequently met with; and the denticulations are most distinctly marked.

LAMBIVIVUM, Eclectos.

LAME, Lamina—*I. Corneæ, Tænia semicircularis—I. Ruyschienne, Ruyschiana tunica*.

LAMELLA, Lamina.

LAMELLAR, *Lamello'sus, Lamina'ed*, (F.) *Lamellex, Lamineux*, composed of laminae or leaves—as the *Lomellar* or *lam'inated Tissue*; i. e., the *cellular tissue*.

LAMELLEUX, Lamellar.

LAMENESS, Claudication.

LAMINA, *Lamel'la*, (F.) *Lame*. A thin, flat part of a bone; a plate or table, (q. v.) as the cribriform lamina or plate of the ethmoid bone.

LAMINA CRIBROSA, see *Cribell*—*I. Prima cutis, Epidermis*.

LAMINA SPIRALIS, *Septum scalæ, Septum cochleæ auditivæ*. A partition between the scalæ of the cochlea. The larger part of this, next the modiolus, is formed of bone. The remainder, or that part next the opposite side of the scalæ, is composed of a cartilaginous membrane, called, by Valsalva, *Zona Cochleæ*. By some anatomists, the lamina is divided into a *Zona ossea*, and *Z. mallis*. By others, it is considered to consist of four laminae, when examined with a strong glass: a *Zona ossea*, next to the modiolus—a *Zona cori'acea*, on the outer side of this; a *Zona vesicul'aris*—and a *Zona membran'acea*, which is, perhaps, the lining membrane of the cochlea.

LAMINÆ SPONGIOSÆ NASI, Turbinate bones.

LAMINATED, Lamellar.

LAMINEUX, Lamellar.

LAMIUM ALBUM, *Urti'ca mor'tua, Galeops'is, Archangel'ica, Dead Nettle, White Archangel Nettle*, (F.) *Ortie morte*. Infusions of this plant have been recommended in uterine hemorrhage, and in leucorrhæa. It is not used.

LAMIUM MONTANUM, *Melittis melissophyllum—I. rubrum, Galeopsis*.

LAMPOURDE, Xanthium.

LAMPSANA, Lapsana.

LAMPYRIS, Cicindela.

LANA PHILOSOPHORUM, Zincioxydum.

LANARIA, Saponaria, Verbascum nigrum.

LANCÈDE MAURICEAU, (F.) An instrument invented by Mauriceau for perforating the head of the fœtus. A perforator.

LANCET, *Lancetola, Lancetta, Schastè'ron*, (F.) *Lancette*,—diminutive of *lancea*, 'a lance.' A surgical instrument, used in the operation of phlebotomy. It is composed of two parts, the handle, (F.) *Chasse*, and the blade, (F.) *Lame*. The former is made of two small plates of ivory, bone, or shell, movable on the blade, for whose preservation they are intended. The blade is formed of well polished steel. Lancets are made of different shapes; some being *broad-shouldered*—others, *spear-pointed*. The French distinguish three kinds: 1. *Lancette à grain*

*d'orge*, which, on account of the almost oval shape of its point, makes a large opening. 2. The *L. à langue de serpent*, which is very narrow towards the point; and, 3. The *L. à grain d'avoine*, which holds a medium station between the two former, and is generally preferred.

The *Abscess Lancet* is merely a large lancet for the purpose of opening abscesses.

LANCEOLA, Lancet.

LANCETTE, Lancet.

LANCINANT, Lancing.

LANCINATING, *Lancinans*, from *lancina*—*re*, 'to strike or thrust through.' (F.) *Lancinant*, (substantive, *Élanement*.) A species of pain, which consists in lacerations or shootings, similar to those that would be produced by the introduction of a sharp instrument into the suffering part. It is especially in cancer, that this kind of pain is felt.

LANGÉAC, MINERAL WATERS OF.—Acidulous, mineral waters at Langeac, in the department of Haute-Loire, France. They are employed as refrigerant, aperient, and diuretic. They contain carbonic acid, carbonates of soda and magnesia, and a little iron.

LANGUI AQUA EPILEPTICA, *Epileptic Water of Lungius*, formerly employed against epilepsy. It was composed of the flowers of the *convallaria* and *lavender*, *Spanish vine*, *cinnamon*, *nutmeg*, *mistletoe*, *peony* and *ditany roots*, *long pepper*, *cubeb*, and *rosemary flowers*.

LANGUE, Tongue—*l. Abaisseur de la*, *Glossocatochus*—*l. de Carpe*, see *Lever*—*l. de Cerf*, *Asplenium scolopendrium*—*l. de Chien*, *Cynoglossum*—*l. de Serpent*, *Ophioglossum vulgatum*.

LANGUEUR, Langour.

LANGUOR, *Aph'esis*. (F.) *Languueur*. A species of atony, (q. v.) depression, or debility, which generally comes on slowly.

LANGUGO PRIMA, Geneias—*l.* Siliquæ hirsutæ, see *Dolichos pruriens*.

LAONICA CURATIO. A mode of treating the gout, which consisted in the employment of local applications, proper for evacuating the morbid matter.

LAOS, Tin.

LAPACTICUS, Cathartic.

LAPARA, Abdomen, Flanks, Lumbi.

LAPAROCÈLE, from *λαπαρά*, 'the lumbar region,' and *επιλη*, 'a tumour.' *Lumbar Hernia*, through a separation of the fibres of the quadratus lumborum, and a protrusion of the aponeurosis of the transverse muscle, on the outside of the mass common to the sacro-lumbalis and longissimus dorsi.—*Cloquet*.

LAPARO-ENTEROTOMY, *Lap'aro enterotomia*; from *λαπαρά*, the 'lumbar region,' the 'abdomen'; *επιτερον*, 'intestine,' and *τομή*, 'incision.' The operation of opening the abdomen and intestinal canal, for the removal of disease.

LAPAROCYSTOTOMIA. See *Lithotomy*.

LAPAROSCOPIA, *Abdominoscopia*.

LAPAROTOMY. See *Gastrotony*.

LAPATHOS, *Rumex acutus*.

LAPATHUM, *Rumex acutus*—*l.* *Aquatium*, *Rumex hydrolapathum*—*l.* *Chinense*, *Rheum*—*l.* *Oriente*, *Rheum*—*l.* *Sanguineum*, *Rumex sanguineus*—*l.* *Unctuosum*, *Chenopodium bonus Henricus*.

LAPIDIL'LUM. *Blasius* has given this name to a kind of scoop, used, in his time, for extracting stone from the bladder.

LAPIS, Calculus.

LAPIS ACCIPITRUM, *Hieracites*—*l.* *Aerosus*, *Calamina*—*l.* *Ammoniaca*, see *Ammoniack gum*—*l.* *Animalis*, *Blood*—*l.* *Armenius*, *Melochites*—*l.* *Aureus*, *Urine*—*l.* *Bezoardicus*, *Bezoar*—*l.* *Cæruleus*, *Cupri sulphas*—*l.* *Calaminaris*, *Calamina*—*l.* *Carneolus*, *Cornelian*—*l.* *Causticus*, *Potassa cum calce*—*l.* *Causticus*, *Potassa fusa*—*l.* *Collymus*, *Étites*—*l.* *Contrayervæ*, *P. contrayervæ compositus*—*l.* *Cyanus*, *L. lazuli*—*l.* *Fulmineus*, *Ceraunium*—*l.* *Hematites*, *Hæmatites*—*l.* *Heraclæus*, *Magnet*—*l.* *Infernalis*, *Argentii nitras*—*l.* *Infernalis alkalinus*, *Potassa fusa*—*l.* *Infernalis sive septicus*, *Potassa cum calce*—*l.* *Judaicus*, *Judæus (lapis)*.

LAPIS LAZ'ULI, *Lapis Cy'anus*, *Asulci*, *Laz'ulite*, (F.) *Pierre d'azur*, *Östveuer*. A stone, of a beautiful blue colour; opaque; and close-grained; fracture dull. It is composed of siliceous alumine; carbonate and sulphate of lime; oxide of iron, and water. It was formerly looked upon as a purgative and emetic, and given in epilepsy.

LAPIS MALUCENSIS, *Bezoard* of the Indian porcupine—*l.* *Nauticus*, *Magnet*—*l.* *Phænicitis*, *Judæus (lapis)*—*l.* *Porcinus*, *Bezoard* of the Indian porcupine—*l.* *Pruellæ*, *Potassæ nitras fusus sulphatis paucillo mixtus*—*l.* *Sardius*, *Cornelian*—*l.* *Septicus*, *Causticum commune*—*l.* *Septicus*, *Potassa fusa*—*l.* *Specularis*, *S. lucidum*—*l.* *Sydenitis*, *Magnet*—*l.* *Syriacus*, *Judæus (lapis)*—*l.* *Vini*, *Potassæ supertartras impurus*.

LAPPA, *Galium aparine*, *Lippitudo*—*l.* *Minor*, *Xanthium*.

LAPPULA HEPATICA, *Agrimony*.

LAPSA'NA, *Lampsa'na*, *Nu'pium*, *Papilla'vis herba*, *Dock-cresses*, *Nipple-wort*. (F.) *Lampsa'ne*, *Herbe aux Mamelles*. This plant is a lactescent bitter. It has been chiefly employed, however, as an external application to sore nipples, &c.

LAQ, *Laquens*.

LAQUE, *Lacca*.

LA'QUEUS, *Fuais*. A cord or ligature or bandage, with running knots;—a *noose*, a *loop*, *Broctas*, *Puch'etos*. (F.) *Laq* ou *Lacq*. The term is applied to a bandage or fillet of any kind, attached by means of a loop upon any part with the view of fixing it; as in certain cases of labour, where a hand or foot presents; or to facilitate extension in luxations and fractures.

LAQUEUS GUTTURIS, 'Noose of the throat.' Violent inflammation of the tonsils, in which the patient appears as if suffocated by a noose.

LARCH, *Pinus laix*.

LARD, *Adeps suilla*.

LARDA'CEOUS, from *lardum*, 'lard;' the fat of bacon. An epithet given to certain organic alterations in the textures, whose aspect and consistence resemble lard.

LARGE, *Broad*.

LARIX, *Pinus larix*.

LARKSPUR, BRANCHING, *Delphinium consolida*.

LARME, *Tear*.

LARMOIEMENT, *Epiphora*.

LARVA, Mask.

LARYNGÉ, Laryngeal.

LARYNGE'AL, *Laryngeus*. (F.) *Laryngé, Laryngien*. That which belongs to the larynx.

The LARYNGEAL NERVES, (F.) *Nerfs laryngés*, are two in number;—a superior and inferior.

The superior laryngeal nerve is given off from the trunk of the pneumogastric, at the upper and deep part of the neck. It passes downwards and inwards, behind the internal carotid artery, and divides into two secondary branches: the one, *external*, which distributes its filaments on the outside of the larynx, to the sterno-thyroid, hyo-thyroid, constrictor inferior, crico-thyroid muscles, &c. The other, the *internal*, which crosses the thyro-hyoid membrane, and gives filaments to the epiglottis, the mucous membranes of the pharynx and larynx, to the arytenoid gland, the arytenoid and crico-thyroid muscles, and ultimately anastomoses with the inferior laryngeal nerve.

The inferior laryngeal nerves or *recur'rents, Nervi reversivi, Ramæaux Trachéaux* (Chaus.), arise from the trunk of the pneumogastric within the thorax. They ascend in the furrow, which separates the trachea from the œsophagus, to be distributed on the neck, after having been reflected;—the left, around the arch of the aorta; the right, around the corresponding subclavian. They send off filaments to the cardiac plexuses; to the parietes of the œsophagus, and trachea; to the thyroid gland; to the inferior constrictor of the pharynx; the posterior and lateral crico-arytenoid and thyro-arytenoid muscles; and to the mucous membrane of the pharynx and larynx.

The LARYNGEAL ARTERIES are given off from the thyroid arteries.

The LARYNGEAL VEINS open into the internal jugular. Winslow gives the name *laryngeal* to the superior thyroid artery, (q. v.)

LARYNGE'AL, Laryngeal.

LARYNGISMUS STRIDULUS, Asthma thymicum.

LARYNGITIS, *Cynauchē laryngea, Angina laryngea*. (F.) *Catarrhe laryngien, Angine laryngée, Inflammation of the Larynx*. This disease, in some measure, resembles croup; but is usually devoid of that peculiar, sonorous inspiration, which attends the latter. There is, also, pain upon pressing the larynx; and, whilst laryngitis is a disease of more advanced life, croup attacks children. The membraniform exudation is, also, absent; probably, because the inflammation, being seated above the glottis, the coagulable lymph is readily expectorated. It requires the most active treatment.

LARYNGOG'RAPHY, *Laryngographia*; from *λαρυγξ*, 'the larynx,' and *γραφειν*, 'a description.' An anatomical description of the larynx.

LARYNGOLOG'Y, from *λαρυγξ*, 'the larynx,' and *λογος*, 'a treatise.' A treatise on the larynx.

LARYNGOT'OMY, *Laryngotomia*, from *λαρυγξ*, 'the larynx,' and *τεμεειν*, 'to cut.' A surgical operation, which consists in opening the larynx, either to extract a foreign body, or to remedy any obstruction of the glottis. The operation is, sometimes, erroneously called *Bronchotomy* and *Trachotomy*.

LARYNX, *λαρυγξ*, (a whistle.) *Caput seu Operculum seu Initium seu Finis superior seu Terminus superior seu Pars prima asperæ arteriæ*. The apparatus of voice is situate at the superior and anterior part of the neck; and at the top of the trachea, with which it communicates. It is composed of four cartilages,—the thyroid, cricoid, and two arytenoid; is moved by a number of muscles, and lined by a mucous membrane, having certain membranous reflections, constituting the superior ligaments of the glottis, &c.

PARTS COMPOSING THE LARYNX.

|                       |              |  |
|-----------------------|--------------|--|
| 1. Cartilages.        | - - - - -    | { Thyroid,<br>Cricoid,<br>Two Arytenoid,<br>Epiglottis.  |
|                       | } Extrinsic. | { Sterno-thyroid.<br>Constrictors of the<br>pharynx.<br>All the muscles of the<br>hyoid region.                          |
| 2. Muscles.           |              | { Crico-thyroid.<br>Crico-arytenoid, poste-<br>rior,<br>Crico-arytenoid, late-<br>ral,<br>Thyro-arytenoid,<br>Arytenoid. |
| 3. A Mucous Membrane. |              |  |
| 4. Glands.            | - - - - -    | { Epiglottic,<br>Arytenoid.  |
| 5. Membranes.         | - - - - -    | { Thyroid,<br>Thyro hyoid,<br>Crico-thyroid.   |
| 6. Ligaments.         | - - - - -    | { Crico-arytenoid.<br>Thyro-arytenoid.   |

The vessels and nerves of the larynx are called *laryngæal*.

The larynx is destined to give passage to the air in the act of respiration, and to impress upon it certain modifications, which constitute the voice. Its dimensions vary in different individuals. In men, it is always larger and situate lower than in women.

LASER, *Laserpitium*—*l. à Grandes feuilles, Laserpitium latifolium*.

LASERPITIUM, *Laser, Siphium, σπορος σιλφιου*. A term applied, anciently, both to a plant and its juice, with the nature of neither of which we possess any precise information. Bentley, Laurence, Geoffroi, &c. regarded it to have been the same as our *asafœtida*:—Theophrastus, Dioscorides, and the ancient Scholiast on Aristophanes, however, by assigning a sweet and agreeable flavour to the laserpitium, discountenance the idea. From whatever plant obtained, it was so rare, and consequently so costly, that the Romans deposited it in the public treasury. It was obtained from Cyrene—*Succus Cyrenæicus*—and likewise from Persia,—the latter being the most valuable. The Laserpitium is called, by Avicenna, *Al'ihit*.

LASERPITIUM LATIFOLIUM, *Gent'iana alba, White Gentian, Cervaria alba*. (F.) *Laser à larges feuilles*. The root of this plant is bitter and tonic.

LASERPITIUM SILER, *Scseli, Siler montanum; Heart-wort, Sermountain*. The seeds and roots are possessed of aromatic properties.

LASSIPUDO, Copos.

LATENS IN ORE, Pterygoideus internus.

LATENT, *Latens*, from *latere*, 'to lie hid,' 'lying hid,' 'concealed.' An epithet applied to certain diseases or states of disease, in which

the symptoms are so concealed and obscure, as to escape the observation of the physician. Thus, we say *latent inflammation, latent period of small-pox, &c.*

**LATERITIOUS**, *Lateritius*; from *later*, 'a brick.' An epithet applied to the brick-like sediment, occasionally deposited in the urine of people afflicted with fever.

**LATESCENTIS CHORDÆ**, *Palmaris longus*.

**LATHYRIS**, *Euphorbia lathyris*.

**LATIBULUM**, from *lateo*, 'I lie hid.' The focus of febrile poison; whence it spreads to every part to induce a paroxysm. See *Clapier*.

**LATICA**, *Amplimerina latica* of Sauvages. A species of quotidian remittent, whose paroxysms are very long, and which is accompanied with latent heat (?) whence its name.

**LATICES LACTEI**, *Receptaculum chyli*.

**LATISSIMUS COLLI**, *Platysma myoides*.

**LATISSIMUS DORSI**, *Aniscalptor*, *Dorsi-lumbosacro-humeral*, *Braehium movens quartus*, *Lombomèral*, (Ch.) (F.) *Muscul grand dorsal*, *M. très large du dos*. A flat muscle; broad, especially below; thin; quadrilateral; and situate at the posterior, lateral, and inferior region of the trunk. It is attached to the posterior half of the outer lip of the crest of the ilium; to the posterior surface of the sacrum; to the spinous processes of the six or seven last dorsal vertebræ, to all those of the loins, and to the last four false ribs, and is inserted by a strong tendon at the posterior edge of the bicipital groove of the humerus. Its upper fibres are almost horizontal: the middle very long and oblique upwards and outwards; and the anterior almost vertical.

This muscle carries the arm backwards, depressing it, and making it turn on its axis. It also draws backwards and downwards the prominence of the shoulder. When, suspended by an arm, we make an effort to raise ourselves, it draws the trunk towards the arm. It can, also, raise the ribs by assuming its fixed point on the humerus, and become an inspiratory muscle.

**LATTICE WORK**, *Cancelli*.

**LATUS**, Broad—*Ani*, *Levator ani*.

**LAU**. See *Spirit*.

**LAUCANIA**, *Leucania*, from *λαωοι*, 'I enjoy,' 'I take.' The fauces and œsophagus. Also, the clin.—*Gorræus*.

**LAUDANUM**. Perhaps from *laus*, 'praise;' *laudatum*, 'praised.' Every preparation of opium, (q. v.) solid or liquid, but more particularly the extract and tincture, and especially the latter.

**LAUDANUM ABBATIS ROUSSEAU**, *Guttæ Abbatiss Rousseau*, *Vinum opiatum fermentatidnè paratum*, *Abbe Rousseau's Drops*, (*Mel. Narbonnens.* §xi), *aqua calida* §bii). Set in a warm place, and, as soon as the mixture ferments, add *opium* §iv, dissolved in *water* §xij. Let it ferment for a month, and evaporate to §x: strain, and add *rectified spirit of wine* §ivss.)

**LAUDANUM FORD'S**, *Vinum opii*—*Liquid*, *Tinctura opii*—*Liquidum Hoffmanni*, *Vinum opii*—*Liquidum Sydenhami*, *Vinum opii*—*Opiatum*, *Extractum opii*—*Liquidum*, *Extractum opii*.

**LAUGH, SARDONIC**. Canine laugh

**LAUGHING**, *Risus*.

**LAUREL, BROAD-LEAVED**, *Kalmia latifolia*—*L. Cherry*, *Prunus lauro-cerasus*—*L. Common*, *Prunus lauro-cerasus*—*L. Dwarf*, *Kalmia angustifolia*—*L. Narrow-leaved*, *Kalmia angustifolia*—*L. Poison*, *Prunus lauro-cerasus*—*L. Water*, see *Prunus lauro-cerasus*—*L. White*, *Magnolia glauca*.

**LAURENT, SAINT, MINERAL WATERS OF**. A thermal spring, five leagues from Joyeuse in France. Temp. 127° Fahr.

**LAUREOLA**, *Daphne laureola*.

**LAURIER**, *Laurus*—*L. Alexandrin*, *Ruscus hypoglossum*—*L. Amandier*, *Prunus lauro-cerasus*—*L. Cèrise*, *Prunus lauro-cerasus*—*L. Rose*, *Nerium oleander*.

**LAURO-CERASUS**, *Prunus lauro-cerasus*.

**LAURUS**, *Laurus nobilis*, *Daphne*, the *Sweet Bay*. *Nat. Ord.* Laurinæ. (F.) *Laurier*. The leaves and berries have a sweet, fragrant smell, and an aromatic, astringent taste. Sweet bay has been advised as a stomachic and carminative, but is now rarely used. It is, sometimes, employed as a fomentation and in gylsters; and the berries are an ingredient in the *Emplastrum Cumini*.

**LAURUS ALEXANDRINA ANGUSTIFOLIA**, *Ruscus hypoglossum*—*L. Camphora*, see *Camphor*.

**LAURUS CASSIA**. The species of laurus which yields the *Cassia lignea*, *Cassia*, *Cassia cinnamomea*, *Cortex Canellæ Malabarica*, *Cassia lignea Malabarica*, *Xylo-cassia*, *Canella Malabarica* et *Javensis*, *Canella Cubana*, *Arbor Judæica*, *Cassia Canella*, *Canellifera Malabarica*, *Cortex erassior*, *Cinnamomum Malabaricum*, *C. Indicum*, *C. Sinerisè*, *Callicha canella*, *Wild Cinnamon*, *Malabar Cinnamon*, *Cassia*. (F.) *Canelle de Malabar* ou de *Java*, ou de la *Chine*, ou des *Indes*, ou de *Coromandel*, *C. fusse*, *C. matte*, *Casse en bois*, *Casse aromatique*. The bark and leaves abound with the flavour of cinnamon, for which they may be substituted; but they are much weaker. The unopened flower buds are used in the same manner.

**LAURUS CINNAMOMUM**, *Cinnamomum Darseni*, *Darseni*, *Cinnamon*, *Xylo-cinnamomum*, *Caurdo Canella*, *C. Zeylanica*. (F.) *Canelle*, *Baume de Canelle*, *Canelle officinale*. Cinnamon bark is stimulant and carminative, and is employed, chiefly, as a grateful aromatic, to cover the taste of nauseous remedies. Dose gr. x to ʒj. The *Flowers*, called *Cassia Flores* in the shops, possess aromatic and astringent virtues, and may be used wherever cinnamon is required.

**LAURUS CULLAWAN**. The tree that affords the *Cortex Cullawan*, *Cullitawan*, *Cortex caryophylloides*, *C. Caryophylloides Amboinensis*. This bark resembles the sassafras in appearance and properties, and is used in Java as a condiment.

**LAURUS MALABATHRUM**, See *Malabathrum*—*L. Nobilis*, *Laurus*.

**LAURUS SASSAFRAS**, *Sassafras*, *Ague-free*, *Corvus mas odora*, *Anhaiba*. Indigenous in the United States. Sassafras wood and root have been considered stimulant, sudorific and diuretic. The virtues depend upon essential oil, the odour of which is not unlike that of fennel. It has been used in cutaneous diseases, chronic rheumatism, &c.

**LAUTIS'SIMA VINA.** Wines were formerly so called, which were strongly impregnated with myrrh.

**LAVANDE**, Lavendula.

**LAVANDULA**, Lavendula.

**LAVEMENT**, Clyster, Enema—*l. Antispasmodique*. Enema fœtidum.

**LAVENDER**, COMMON, Lavendula—*l. Sea*, *Staticæ limonium*.

**LAVENDULA**, from *lavo*, 'I wash;' so called from being used in baths. *Lavendula spica*, *Common lavender*, *Lavandula*, (F.) *Lavande*, *Aspic*, *Spic*. The odour of lavender flowers is fragrant and agreeable; taste warm and bitterish—depending upon an essential oil. It has been used as a stimulant; particularly in the form of the oil,—*Oleum lavendulæ*. The dried leaves have been employed as an emmenagogue.

The French use the *Lavendula stæchas* or *French lavender*, of which they have a compound syrup, *Syrupus de stæch'adæ compos'itus*: given as a pectoral.

**LAVER GERMANICUM**, *Veronica beccabunga*—*l. Odoratum*, *Sisymbrium nasturtium*.

**LAVIPEDIUM**, *Pedilivium*.

**LAW MEDICINE**, Medicine, legal.

**LAWSONIA INERMIS**, *Alcan'na vera*, *A. Orient'alis*, *Cyprus antiquorum*, *Ligustrum Ægyptiacum*, *Smooth Lawsonia*, (F.) *Henné*. An East Indian and African plant, the root of which is slightly astringent.

In India, the root of the *Lawsonia spinosa* is employed in lepra and other cutaneous affections.

**LAX**, Diarrhœa.

**LAXANS**, Relaxant.

**LAXATIVE**, *Laxativus*, from *lax're*, 'to loosen.' *Minorativus*, *Solutivus*, *Alviducus*. A medicine which gently opens the bowels; such as tamarinds, manna, &c.

**LAXATOR AURIS INTERNUS**, *L. tympani*.

**LAXATOR TYMPANI**, *L. major tympani*, *Exter'nis mallei*, *Anterior mallei*, *Obl'iquus auris*, *Exter'nis auris* vel *Laxator inter'nis*, *Eustachii musculus*, *Sphœni-salpingo-mallei*, (F.) *Antérieur du marteau*. A muscle, which arises from the spine of the sphenoid bone and from the cartilage of the Eustachian tube, and is inserted, by a tendon, into the apophysis of Rau. It relaxes the membrana tympani.

**LAXATOR MINOR TYMPANI**. A very small muscle, which extends from the upper part of the external auditory canal, and is inserted at the inferior part of the process of the handle of the malleus. Its existence is denied by most anatomists.

**LAXATIVUS INDICUS**, Cambogia.

**LAXITAS**, Atony—*l. Ingestorum*, Lientery.

**LAXITY**, *Lax'itas*, *Lazness*. Condition of a tissue, when loose or relaxed; or of one which wants tone. We say *laxity of fibre*, *laxity of skin*, to express, that those parts have lost some of the tenseness proper to them.

**LAZARETTO**, *Lazaret*, *Lazar-house*, from (I.) *luzzero*, 'a leper.' A solitary edifice in most seaports of magnitude, intended for the disinfection of men and goods, proceeding from places where contagious diseases are prevailing.

**LAZULITE**, *Lapis lazuli*.

**LEAD**, *Plumbum*—*l. Black*, *Graphites*—*l.*

*Iodide* of, see *Iodine*—*l. Oxyd* of, semi-vitrified, *Plumbi oxydum semivitreum*—*l. Protacetate* of, *Plumbi superacetat*—*l. Red*, *Plumbi oxydum rubrum*—*l. Subcarbonate* of, *Plumbi subcarbonas*—*l. Sugar* of, *Plumbi superacetat*—*l. Superacetate* of, *Plumbi superacetat*—*l. Tannate* of, see *Tannin*—*l. White*, *Plumbi subcarbonas*.

**LEANNESS**, Emaciation.

**LEAPING AGUE**. This disease is said by the Scotch writers to be characterized by increased efficiency, but depraved direction of the will, producing an irresistible propensity to dance, tumble, and move about in a fantastic manner, and often with far more than the natural vigour, activity and precision!

**LEBANON**, MINERAL WATERS OF. The spring at Lebanon, 26 miles east of Albany, New York, is an almost pure thermal. Temp. 72° Fahr.

**LECHENEION**, Torcular herophilii.

**LE'CRAN**, Cochlearia armoracia.

**LECTISTERNIUM**. The arrangement of a bed, so as to adapt it to a particular disease. Also, a supplication, with the Romans, in times of public danger, when beds or couches were spread for the gods, as if they were about to feast, and their images were taken down from their pedestals and placed upon these couches around the altars. The lectisterium was first introduced in the time of a pestilence.—Livy. **LECTUALIS**, from *lectum*, 'a bed.' An epithet applied to a long, chronic disease.

**LECTULUS**, *Fanus*.

**LEDE SAUVAGE**, *Ledum sylvestre*.

**LEDUM PALUSTRE**, *Rasnariv'nis sylvest'ris*, *Anthos sylvest'ris*. (F.) *Lède* ou *Romarin sauvage*. *Nat. Order*. Ericinæ. *Sex. Syst.* Decandria Monogynia. This plant has a bitter, subastringent taste, and was formerly used in Switzerland in place of hops; the virtues are equivocal.

**LEE**, *Feculence*, *Lixivium*.

**LEECH**, *Hirudo*.

**LEEK**, *Allium porrum*.

**LEES**, *SOAP*, *Liquor potassæ*.

**LEG**, (Danish.) *Crus*, *Scelos*, *Cnemè*. The portion of the lower extremity, which extends from the knee to the foot. It consists of three bones;—*Tibia*, *Fibula*, and *Patella*, and, also, of a great number of muscles, vessels, and nerves. The projection, formed by the muscles at the back part of the leg, has received the name of *Calf of the leg*. It is the special attribute of man, and proves that he is destined to be biped.

**LEG**, *SWELLED*, *Phlegmatia dolens*. *Leg*, *Cochin*, see *Elephantiasis*.

**LEGITIMATE**, *Legitimus*, *Genuinus*, *Gne-sios*. An epithet, applied to things which are according to rule. A *legitimate child* is one conceived or born during marriage. *Legitimate diseases* are those which follow a regular march.

**LEGNA**, *λεγνα*, from *λεγον*, 'a fringed edge.' The orifice of the pudendum muliebre, or of the uterus.

**LEGUME**, *Legumen*.

**LEGUMEN**, from *lego*, 'I gather;' (F.) *Legumc*, *Gousse*. So called because it is usually gathered by the hand, instead of being reaped. All kinds of *pulse*, as peas, beans, &c. are thus termed.

LEICHEN, Lichen.

LEIOP'ODES, from *λειος*, 'smooth,' and *πους*, 'a foot.' Affected with *flat-footedness*, *splay-footedness*. Individuals, the soles of whose feet are flat, instead of having the concavity, which they commonly present.

LEIOPUS, *Léopus*, from *λειος*, 'smooth,' and *πους*, 'a foot.' One that is flat-footed, *splay-footed*.

LEIOSIS, Commination.

LEIPHÆMOI, Achroi.

LEIPHÆMOS, from *λειπω*, 'I want,' and *αίμα*, 'blood.' A word sometimes used adjectively; at others, substantively; either for a vicious state of blood, or rather for a sort of *anæmia*—or for the patient who labours under this condition.

LEIPO, Lipo.

LEIPODER'MOS, *Lipoder'mos*, from *λειπω*, 'I want,' and *δέρμα*, 'skin.' One who wants a part of his skin. It is especially applied to those who want the prepuce. See *Apella*.

LEIPOMERIA, Lipomeria.

LEIPOPSYCHIA, Syncope.

LEIPYRIAS, from *λειπω*, 'I want,' and *πυρ*, 'fire' or 'heat.' A species of continued fever, referred to by the Greek physicians, in which there is burning heat of the internal parts and coldness of the extremities. *Avicenna* described, under this name, a kind of *hemitritæa*.

LEMA, *Chassic*.

LEME, Lippitudo.

LEMITHOCORTON, *Corallina Corsicana*.

LEMNISCUS, Tent.

LEMON PEEL, see *Citrus medica*—l. Tree, *Citrus medica*.

LEMONADE, (F.) *Limonade*. Lemon juice, diluted with water and sweetened. See *Citrus medica*.

DRY LEMONADE, (F.) *Limonade sèche*. Citric or tartaric acid reduced to powder and mixed with sugar. *Lemonade Powders* may be made as follows:—Pound  $\frac{3}{4}$  of *citric acid*, with a few drops of essence of lemon-peel, and  $\frac{3}{4}$  i or more of lump sugar. Divide into six papers, each of which will make a glass of lemonade.

NITRIC LEMONADE. Nitric acid considerably diluted with water and sweetened.

SULPHURIC LEMONADE and TARTARIC LEMONADE are made with the sulphuric and tartaric acids.

LEMONADE, DRY, see *Citric acid*.

LENITIVE, *Lenitivus*, *Lenis*, *leniens*, from *lenio*, 'I assuage.' A medicine, which allays irritation or palliates disease; also, a laxative medicine. A *lenitive clectuary* is one that purges gently.

LE'NOS, Torcular herophili.

LENS, *Ervum lens*—l. Crystalline, Crystalline.

LENTIC'ULA. Dim. of *lens*, a lentil. A freckle. Also, the eruption of lenticular fever. See *Ephelides*.

LENTICULAR GANGLION, Ophthalmic G.

LENTICULA'RES GLAN'DULÆ, *Lenticular glands*. Mucous follicles, having the shape of a lentil, which are observed especially towards the base of the tongue.

LENTIGO, *Ephelides*.

LENTIL, *Ervum lens*.

LENTILLE, *Ervum lens*—l. *crystalline*, Crystalline—l. *Ers*. *Ervum ervilia*.

LENTIS'CINUM VINUM. Wine, impregnated with mastich; from *Lentiscus*, 'the mastich tree.'

LENTISCUS VULGARIS, *Pistacia lentiscus*.

LENTITIS, Phacitis.

LENTOR, from *lentus*, 'clammy.' A viscosity or siziness of any fluid. See *Gluten*.

LEONTIASIS, *Leontion*, from *λεων*, 'a lion.'

A name given to lepra of the face, from some fancied resemblance between the countenance of those labouring under it and that of the lion. To this kind of lepra the epithets, *le'onine* and *le'ontine*, have been given.

LEONTION, *Leontiasis*.

LEON'TODON TARAX'ACUM, *Urina'ria*, *Caput mou'achi*, *Dens leo'nis*, *Dandelion*, *Piss-a-bed*. *Order*. *Compositæ*. (F.) *Pisscilit*, *Lion-dent*. The young leaves are sometimes eaten as salad. The roots are, also, roasted and used as a substitute for coffee. The root is, moreover, reputed to be aperient and diuretic; hence its vulgar name. Its efficacy is doubtful.

LEONTOPODIUM, *Alchemilla*.

LEONU'RUS, from *λεων*, 'a lion,' and *ουρα*, 'tail.' *Lion's tail*.

LEONURUS CARDIACA, *Agripa'l'ma Gallis*, *Marrubium*, *Cardiaca crispata*, *Herba cardiaca*, *H. patæ lapinæ*, *Motherwort*, (F.) *Agripaume*. Its properties are those of a nauseous bitter; and hence it has been used in hysteria and other nervous affections.

LEONURUS LANATUS, *Ballota lanata*.

LEOPARD'S BANE, ROMAN, *Arnica montana*, *Doronicum pardalianches*.

LEPAS and LEPIS, *λεπις*, gen. *λεπιδος*, *λεπις*, gen. *λεπιδος*, 'a scale.' Hence:

LEPID'IUM, from *λεπις*, 'a scale;' so called from its supposed usefulness in cleansing the skin from scales and impurities. *Pepper-wort*.

LEPID'IUM IBERIS, *Iberis*, *Cardamantica*, *Sciat'ica cresses*. This plant possesses a warm, penetrating, pungent taste, like other cresses, and is recommended as an antiscorbutic, antiseptic, and stomachic.

LEPIDIUM SATI'VUM, *Nasturtium hortens'e*. *Garden cress*, *Dittander*, (F.) *Cresson alénois*, *Cresson des Jardins*. This plant possesses warm, stimulating properties, and is used like the last.

LEPIDOSARCO'MA, *Tumor squamifor'nis carno'sus*. A fleshy tumour, covered with scales; from *λεπις*, 'a scale,' and *σαρκομα*, 'a fleshy tumour.' *Marcus Aurelius Severinus* describes tumours of this kind in the interior of the mouth.

LEPIDOSES, Scaly diseases.

LEPIDOSIS ICHTHYIASIS, *Ichthyosis*—l. *Ichthyiasis cornigera*, *Horny excrescences*—l. *Lepriasis*, *Lepra*—l. *Pityriasis*, *Pityriasis*—l. *Psoriasis*, *Psoriasis*.

LEPIS, *Scale*.

LEPORINA LABIA, *Harelip*.

LEPORINUM ROSTRUM, *Harelip*.

LEPORINUS OCLUSUS, *Lagophthalmia*.

LEPRA, *λεπρα* or *λεπιρα*, from *λεπις*, 'a scale,' *Lepid'osis*, *Lepriasis*, *Vitiligo*, *Lepra Græco'rum*, *Leprosy*, (F.) *Lèpre*, *Mal Saint-Main*. This term has been applied to various

affections, very different in character. 1. To the *Leprosy of the Jews*, *Leuce*, *Lepido'sis Lepriasis canes'cus*. A variety of the *Alphos* or *Lepra alphioides*. The leuce was, generally, not scaly, but consisted of smooth, shining patches, on which the hair turned white and silky, and the skin, with the muscular flesh, lost its sensibility. It was incurable. 2. To the *Elephantiasis* or *Lepra of the Arabs*. See *Elephantiasis*; and 3. To the *Lepra of the Greeks*, which includes all the varieties met with at the present day. It is characterized by scaly patches of different sizes, but having always nearly a circular form.

Bateman and Willan describe three chief varieties of this lepra—1. The *Lepra vulgaris*, *Lepido'sis lepriasis vulgaris*, *Dartre furfuracée arrodie*, of Alibert, characterized as follows: scales glabrous, whitish; size of a crown piece; preceded by smaller reddish and glossy elevations of the skin, encircled by a dry, red, and slightly elevated border; often confluent; sometimes covering the whole of the body except the face.

2. The *Lepra alphioides*, *Lepido'sis Lepriasis albida*, *Alphos*, *Morpha'a alba*, *vitiligo alphas*, *Albura*, *Albaras*, *Albaros*, *Lèpre écailluse* of Alibert, *White leprosy*. An affection, characterized by white patches, surrounded by a rose-coloured areola, which appear here and there on the surface; depressed in the middle, and

3. *Lepra nigricans*, *Lepra melas*—*Vitiligo melas*, *V. Nigra*, *Morpha'a nigra*, *Lepra maculosa nigra*, *Albaras nigra*, *Melas*, *Lepido'sis lepriasis nigricans*, *Black leprosy*; in which the scales are livid; the size of half a dollar; and diffused over the body, but less widely than in the *Alphoides*. The French pathologists usually admit three species of lepra, to which they give the epithets *scaly*, (*squamense*.) *crustaceous*, (*crustacée*.) and *tubercular*, (*tuberculeuse*.) according as the skin may be covered with scales, crusts, or tubercles.

Lepra appears to be endemic in Egypt, in Java, and certain parts of Norway and Sweden. Imperfect and faulty nutrition appears to contribute to its development.

The means, best adapted for its removal, are:—a mild, unirritating diet, emollient fomentations—sulphureous baths, fumigations, &c. but, often, all remedial agents will be found ineffectual.

LEPRA ARABUM, Elephantiasis Arabica—1. Fungifera, Frambœsia—1. Græcorum, Lepra—1. Ichthyosis, Ichthyosis—1. Maculosa nigra, L. nigricans—1. Mediolanensis, Pellagra—1. Mercurial, Eczema mercuriale—1. Taurica, *Mal de Crimée*.

LÉPRE, Lepra—1. *des Cosaques*, *Mal de Crimée*—1. *Écailluse*, Lepra alphioides.

LEPROSERIE, *Ladrière*.

LEPROSY, Lepra—1. black, Lepra nigricans—1. white, Lepra alphioides.

LEPSIS, Attack.

LEPTOPHONIA, Oxyphonia.

LEPTOS, λεπτός, 'thin,' 'light.' Hence:

LEPTOTROPHIA, from λεπτός, 'light,' and

τροφή, 'nourishment.' Light nutrition.

LEPTUNTICA, Attenuants.

LEPTYSMOS, Emaciation.

LEREMA. See Dementia.

LEROS, Delirium.

LESION, *Lasio*, from *lasus*, 'hurt,' 'injured.' Derangement, disorder; any morbid change, either in the exercise of functions or in the texture of organs. *Organic lesion* is synonymous with *organic disease*.

LESSIVE, Lixivium—1. *de Tartre*, Liqueur potasse subcarbonatis.

LETHALIS, Lethiferous, Mortal.

LETHALITAS, Mortality.

LETHARGY, *Lethargus*, *Carus lethargus*, *Veter'nus*, *Lethar'gia*, *Oblivio iners*, from ληθη, 'oblivion,' and αργια, 'idleness.' A constant state of stupor from which it is almost impossible to arouse the individual; and, if aroused, he speedily relapses into his former condition.

LETHIFEROUS, *Lethif'erus*, *Letha'tis*, *Mortifer*, from ληθη, 'death,' and φερω, 'I bear.' Death-bearing, deadly.

LETHUM, Death.

LETTUCE, *Lactuca*—1. Strong-scented, *Lactuca virosa*.

LETUM, Death.

LEUCETHIOPIA. See Albino.

LEUCETHIOPS, Albino.

LEUCANIA, Laucania.

LEUCANTHEMUM, *Anthemus nobilis*, *Matricaria chamomilla*—1. *Vulgare*, *Chrysanthemum leucanthemum*.

LEUCE, Lepra (of the Jews.)

LEUCELECTRUM, Succinum (album.)

LEUCOIUM, *Lunaria rediviva*—1. *Luteum*, *Cheiranthus cheiri*.

LEUCOMA, *Oculorum albugo*, *Albugo*, *Albula*. *Leucoma* and *Albugo* are often used synonymously, to denote a white opacity of the cornea. Both are essentially different from the nebula of the cornea; the nebula being usually the result of chronic ophthalmia and an effusion of a milky serum into the texture of the delicate continuation of the conjunctiva over the cornea;—the others are the result of violent, acute, ophthalmia. In this state, a thick, coagulable lymph is extravasated from the arteries, sometimes superficially, at other times deeply, into the substance of the cornea. On other occasions, the disease consists of a firm, callous, cicatrix on this membrane,—the effect of a wound or ulcer with loss of substance. The affection is more difficult of cure in proportion to its duration and to the age of the individual; the activity of the absorbents being greater in youth. If inflammation still exists, antiphlogistics must be persevered in; and, afterwards, gentle stimulants be used to excite absorption; along with the internal use of mercury or iodine.

LEUCONYMPHÆA, *Nymphæa alba*.

LEUCOPATHIA. See Albino.

LEUCOPHAGIUM, *Blanc-manger*.

LEUCOPHLEGMASIA DOLENS PUERPERARUM, *Phlegmatia dolens*.

LEUCOPHLEGMA'TIA, from λευκος, 'white,' and φλεγμα, 'phlegm.' A dropsical habit. Some writers use the word synonymously with *anasarca*, (q. v.); others with *emphysema*.

LEUCOPYRIA, Hectic fever.

LEUCORRHOIS. See Hæmorrhoids.

LEUCORRHŒA, *Fluxus vel fluor mulie'bris*, *Proflu'vium mulie'brè*, *Cursus matric'is*, *Fluxus matric'is*, *Elythrit'is*, *Coleost'is*, *Distilla'*

*lio uteri, Fluxio alba, Fleurs blanches, Pertes blanches, Écoulement blanc, Catarrhe utérin, The whites, Perte utérine blanche, Catamenia alba, Menses albi, Menstrua alba, Menorrhagia alba, Fluor muliebris non Gallicus, Blennelytria, Gonorrhœa benigna, notha inœvera, Purgatio muliebris alba, Alba purgamenta, Cachexia uterina, Rheuma uteri, Uteri Coryza, Medorrhœa feminarum insons, Blennorrhœa seu Blennorrhœa genitalium, Ædœoblennorrhœa seu Medoblennorrhœa feminarum, from λευκος, 'white,' and ρεω, 'I flow.'* A more or less abundant discharge of a white, yellowish, or greenish mucus; resulting from acute or chronic inflammation or from irritation of the membrane lining the genital organs of the female. The *Vaginal Leucorrhœa* has been termed *Blennorrhœa* seu *Fluor albus vaginæ, Leucorrhœa, Medorrhœa vaginæ* and *Vaginitis, Elytoblennorrhœa*:—the Uterine *Leucorrhœa* has received the names *Fluor albus uteri, Leucorrhœa, Medorrhœa uteri, Metroblennorrhœa*. It is often attended with pain and a sense of heaviness in the loins, abdomen and thighs; disordered digestive functions, &c. so that, at times, the health suffers largely, although there are few females, who are not occasionally subject to moderate leucorrhœa. Attention to the general health, change of air, keeping up a perspirable state of the surface by flannel worn next the skin, the horizontal posture, &c. do more than pharmaceutical agents; which are almost entirely confined to astringent injections. These may be employed, when the discharge is so great as to require them.

*LEUCORRHŒA ANALIS*, see *Hæmorrhoids*—*I. Nabothii*, see *Parturition*.

*LEVAIN*, Ferment.

*LEVATOR ANGULI ORIS*, *Abducens labiorum, Elevator labiorum communis, Caninus, Sus-maxillo-labial, Petit sus-maxillo-labial* (Ch.) (F.) *Muscle canin*. A small, flat, long, quadrilateral muscle, which arises from the fossa canina, and is inserted at the commissure of the lips, where it is confounded with the triangularis. It raises the corner of the mouth, and draws it towards the ear.

*LEVATOR ANI, Levator magnus seu internus, Latus ani, Elevator ani, Seden attollens, Pubio-coccygien annulaire, Sous-pubio-coccygien*, (Ch.) (F.) *Releveur de l'anus*. A muscle, situate at the lower part of the pelvis. It is broad, flat, quadrilateral, and broader above than below. It represents a kind of membranous partition, which closes the outlet of the pelvis and the upper concavity of which is opposed to that of the diaphragm. It is attached, above, to the posterior surface of the body of the pubis, to the upper part of the obturator foramen, and to the spine of the ischium; and it is inserted into the coccyx, into an aponeurotic line common to it and its fellow, and into the lateral parts of the rectum. This muscle supports the rectum; raises it, and carries it upwards during the evacuation of the excrement. It can, also, compress the bladder and vesiculæ seminales, and thus favour the expulsion of the urine and sperm.

*LEVATOR ANI PARVUS, Transversus perinæi*—*I. Auris, Attollens aurem*—*I. Coccygis, Coccygeus*—*I. Menti, Levator labii inferioris*—

*Oculi, Rectus superior oculi*—*I. Proprius scapulae, L. scapulae*.

*LEVATOR LABII INFERIORIS, Levator menti, Elevator labii inferioris, Incisivus inferior, Elevator labii inferioris proprius, Musculus pnicillatus*. A portion of the mentolabial of Chaussier. (F.) *Houppes du menton, Releveur de la lèvre inférieure, Releveur du menton*. A small muscle situate before the symphysis menti. It is thick, conical; attached by its apex to a fossa at the side of the symphysis in the inferior maxillary bone. Its fibres proceed diverging and vanishing in the manner of a tuft, (F.) *Houppes*, on the skin of the chin. This muscle raises the chin, and pushes upwards the lower lip.

*LEVATOR LABII SUPERIORIS ALÆQUE NASI, Incisivus lateralis et pyramidæ, Grand sus-maxillo-labial* (Ch.) (F.) *Élévateur commun de l'aile du nez et de la lèvre supérieure*. This muscle is a fleshy, thin, triangular bundle, situate at the sides of the nose. It arises from the ascending process of the superior maxillary bone: thence its fibres descend in a diverging manner, a part being inserted into the ala of the nose, and a part losing themselves in the upper lip. This muscle raises the upper lip and ala nasi, which it draws a little outwards.

*LEVATOR LABII SUPERIORIS PROPRIUS, Musculus incisivus, Elevator labii superioris proprius, Moyen-sus-maxillo-labial*, (Ch.) *Orbito-maxillo-labial*. This thin, flat, quadrilateral muscle is situate at the middle and inner part of the face. It arises from the os malæ and the os maxillare superius and is inserted into the upper lip, which it raises, at the same time carrying it a little outwards.

*LEVATOR PALATI, Levator Palati Mollis, Petrosalpin-go-staphili-nus vel Sulpin-go-staphili-nus internus, Sulpingo-staphilinus, Pterigo-staphilinus externus, Spheno-staphilinus, Spheno-palatinus, Peristaphilinus internus vel superior, Péro-staphylin*, (Ch.) This muscle is long, narrow, and almost round above; broader and flatter inferiorly. It arises from the lower surface of the *pars petrosa*; from the cartilage of the Eustachian tube; and is inserted into the substance of the velum palati. Its use is to raise the velum palati.

*LEVATOR PALPEBRÆ SUPERIORIS, Palpebræ superioris primus, Apertor Oculi, Apriciens Palpebrarum rectus, Orbito-palpebræ*, (Ch.) *Orbito-sus-palpebræ*. (F.) *Élévateur de la paupière supérieure*. A long, small, thin muscle, situate at the upper part of the orbital cavity. By its posterior extremity, it is inserted into the little ala of the sphenoid bone, immediately in front of the foramen opticum; and, by its anterior extremity, which is expanded, it terminates at the upper margin of the tarsal cartilage of the eyelid. This muscle raises the upper eyelid; draws it backwards, and sinks it in the orbit.

*LEVATOR PROSTATÆ*, (F.) *Releveur de la prostate*. Santorini has given this name to the anterior fibres of the levator ani, which embrace the prostate.

*LEVATOR SCAPULÆ, Elevator Scapulae, Levator seu Musculus Patientie, Angularis vulgo Levator proprius, Trachelo-scapulaire* (Ch.) (F.) *Angulaire de l'omoplate, Releveur de l'oma-*

*plate.* This muscle is so called, because it is attached to the upper and internal angle of the scapula. It is situate at the posterior and lateral part of the neck, and at the upper part of the back. It is long, flat, and broader above than below. In this latter direction, it is inserted into the superior internal angle of the scapula; and, in the former, into the tops of the transverse processes of the first four cervical vertebrae. It depresses the prominence of the shoulder, by raising the posterior angle of the scapula, on which it impresses a kind of rotary motion. It can, also, draw the head to one side.

LEVATOR URETHRAE, (F.) *Releveur de l'Urethre.* Santorini describes under this name a portion of the transversus perinaei muscle.

LEVATORES COSTARUM, Supracostales. LEVEN, Ferment.

LEVER, from *levare*, 'to lift up.' *Vectis*, *Porree'tum.* An inflexible rod, moving round a fixed point, and used for moving bodies, bearing burdens, or raising them. The point, on which the lever moves, is called the *Fulcrum* or *Hypomock'ion.* The force, which moves the lever, is called the *power*; and the weight to be moved, the *resistance.* There are three kinds of levers. A lever of the first kind has the fulcrum between the power and resistance. A lever of the second kind has the resistance between the fulcrum and power; whilst a lever of the third kind has the power between the fulcrum and resistance. In the locomotive system of the human body, we have example of all the three kinds. The bones represent levers; the muscles of locomotion are powers; the weight of parts to be moved constitutes the resistance. The fulcra are, at times, the joints; at others, the ground, &c.

The head moves on the neck as a lever of the first kind; the first cervical vertebra forming the fulcrum. We rise on tiptoe by a lever of the second kind, the fulcrum being the ground under the toes; and we have examples of a lever of the third kind in the flexion of the fore-arm on the arm, in the elevation of the arm, &c.

The LEVER, *Vectis obstetri'cius*, *Vectis*, (F.) *Levier*, is an instrument, curved at the extremity, and having a fenestra. It is used to assist the extraction of the child's head, when instrumental aid is necessary.

Levers are, also, used by the dentists for extracting stumps, &c. The *Levier de l'Ecluse*, *Langue de Carpe*, is employed for extracting the molar teeth.

LEVYATHAN PENIS, *Prid'pus Ceti*, *Bale'nas.* The penis of the whale. This singular medicine was, at one time, given in powder in cases of dysentery and leucorrhœa.

LEVIER, Lever—*l. de l'Ecluse*, see Lever.

LEVIGATION, *Levigatio*, from *levigare*, 'to polish.' *Porphyrizat'ion.* An operation, by which bodies are reduced to very fine powder. It is performed by putting substances, already pulverized, into water; the coarser parts are not long in being deposited, whilst the finer molecules remain suspended in the water. The liquid is decanted into another vessel, and suffered to remain at rest, until the fine particles are all collected at the bottom of the vessel. The fluid part is then separated by decantation.

LEVISTICUM, *Ligusticum levisticum.*

LEVRE, Lip.

LEVRES GRANDES, *Labia pudendi—l. Petites*, *Nymphæ—l. de la Vulve*, *Labia pudendi.*

LEVURE, Yest—*l. de la Bière*, Yest.

LEXIPHARMACUS, Alexipharmic.

LEXIPYRETICUS, Febrifuge.

LEY, Lixivium—*l. Soap*, *Liquor potassæ.*

LÉZARD, Lizard.

LIBANOS, *Juniperus lycia.*

LIBANOTIS CORONARIA, *Rosmarinus.*

LIBIDO, Desire, necessity. Authors speak of *Libido urinae*, *Libido intestini.* Some employ it synonymously with *Prurigo*; others, with *Salac'itas.*

LIBOS, from *λεῖνω*, 'I distil.' A defluxion from the eyes.—Galen.

LIBRA, Pound.

LICHANOS, Index, see *Digitus.*

LICHEN, *λεῖχηρ* or *λεῖχη*, *Exor'mia Lichen*, *Leichen*, *Serp'i'go*, *Volu'tica*, *Sun-rash.* The cutaneous affection, described under this name by the Greek writers, is not clearly defined. Some have believed it to be the *Impeti'go*, but this is doubtful. The name is, now, generally applied to a diffuse eruption of red pimples, accompanied with a troublesome sense of tingling or pricking. Drs. Willan and Bateman define it,—"an extensive eruption of papulæ affecting adults, connected with internal disorder, usually terminating in scurf; recurrent, not contagious." One of their varieties, however, the *Lichen Tropicus*, does not accord well with this definition; for it affects children as well as adults, and is unconnected with internal disorder.

The LICHEN SIMPLEX, *Exor'mia Lichen simplex*, consists of an eruption of red papulæ, appearing first on the face or arms, and afterwards extending over the body; preceded for a few days by slight febrile irritation, which usually ceases when the eruption appears,—with an unpleasant sense of tingling during the night. It generally dies away in ten days or a fortnight.

The LICHEN PILA'RIS, *Exormia Lichen pilaris*, is merely a modification of the preceding; the papulæ appearing at the roots of the hair.

The LICHEN CIRCUMSCRIPTUS is characterized by clusters or patches of papulæ, having a well defined margin, and an irregularly circular form; continuing for six or eight weeks. These varieties require but little medicinal treatment. The antiphlogistic plan is all that is necessary.

The LICHEN AGRIVUS, *Exor'mia Lichen ferus*, *Lichen Agrivus*, *Pap'ula agria*, is distinguished by Angles in clusters or patches, surrounded by a red halo; the cuticle growing gradually harsh, thickened, and chappy, often preceded by general irritation.

In addition to antiphlogistics, a cooling ointment may be used, to allay itching.

In the LICHEN LIVIDUS, the papulæ have a dark red or livid hue, without any fever. The papulæ are more permanent in this variety. It requires the mineral acids and bark.

In the LICHEN TROPICUS, *Exor'mia Lichen tropicus*, *Ecce's'ma*, *Es'sera*, (?) *Sudam'ina*, (?)

*Prickly Heat, Summer Rash*, the pimples are bright red, and of the size of a small pin's head: with heat, itching, and pricking as if by needles. It is local; produced by excessive heat; and disappears when the weather becomes cooler, or the individual is inured to the climate.

The *LICHEN URTICATUS*, *Exor'nia Lichen urtico'sus*, is another variety. The *Nettle Lichen* consists of papule, accompanied with wheals like those of nettle rash.

*LICHEN ARBORUM*, *Lichen pulmonarius*—*L. Blanc de Neige*, *L. Caninus*—*L. Boitier*, *L. pyxidatus*.

*LICHEN CANINUS*, *Lichen cinereus terrestris*, *Muscus caninus*, *Physcia nivalis*, *Peltig'era canina*, *Ash-coloured Ground Liverwort*. (F.) *Lichen contre-rage*, *Lichen blune de neige*. This cryptogamous plant was, for a long time, considered capable of preventing and curing *Rabies canina*. It has, also, been used in mania and in spasmodic asthma.

*LICHEN CINEREUS TERRESTRIS*, *L. caninus*—*L. Carrageen*, *Fucus crispus*—*L. Cocciferus*, *L. pyxidatus*—*L. Contre-rage*, *L. caninus*—*L. Entonnoir*, *L. pyxidatus*.

*LICHEN ISLANDICUS*, *Muscus Islandicus*, *M. catharticus*, *Cladonia Islandica*, *Physcia Islandica*, *Cetraria Islandica*, *Iceland Lichen* or *Liverwort* or *Moss*. (F.) *Lichen d'Islande*. This plant is inodorous, with a bitter and mucilaginous taste. It is esteemed to be tonic, demulcent, and nutrient. Dose, ʒj to ʒiv, being first steeped in water holding in solution some carbonate of potass, to extract the bitter, and then boiled in milk. A bitter principle has been extracted from it, termed *Cetrarin*, which has been given in intermittents.

*LICHEN PLICATUS*, *Muscus arbo'reus* seu *Quere'i ni Herba*. This plant is applied, as an astringent, to bleeding vessels; and to parts which are excoriated after long journeys, by the Laplanders.

*LICHEN PULMONARIUS*, *Muscus pulmonarius quercinus*, *Pulmonaria arbo'rea*, *Lobaria pulmonaria*, *Lichen arborum*, *Oak Lungs*, *Tree Lungwort*, *Hazel Crotches*. (F.) *Lichen pulmonaire*. This plant is sub-astringent, and rather acid. It was once in high repute in curing diseases of the lungs.

*LICHEN PYXIDATUS*, *Muscus Pyxidatus*, *Scyphophorus pyxidatus*, *Musculus pyxoïdes terrestris*, *Lichen pyxidatus major*, *Lichen cocciferus*, *Cup Moss*, *Herba Ignis*. (F.) *Lichen entonnoir*, *Lichen Boitier*, *L. Pyxide*. This plant is sub-astringent, and has been used in decoction in hooping-cough.

*LICHEN ROCC'ELLA*, *Roccella*, *Litmus*, *Lacmus tinctorius*, *Orchill*, *Candry Archell*, *Chinney-weed*, *Herb Archel*. (F.) *Orseille*. The chief use of this plant is as a blue dye. It has been employed to allay cough in phthisis, &c.

*LICHEN SAXATILIS*, *Muscus Cranii humani*, *Usnea*. This moss, when found growing on a human skull, was formerly in high estimation against head affections, &c.

*LICHEN STELLATUM*, *Marchantia polymorpha*.  
**LICHENIASIS**, *Strophulus*.

**LIEBERSCHE AUSZEHRUNGS KRAUT-ER**. See *Galeopsis grandiflora*.

**LIEBERSCHE BRUSTKRAUTER**. See *Galeopsis grandiflora*.

**LIÈGE**, *Saber*.

**LIEN**, (F.) *Vin'culum*. A band, strap, or garter, used in certain operations; as to tie patients during the operation of lithotomy; to fix the apparatus in fracture, &c.; also, the Spleen, (q. v.)

**LIEN'TERY**, *Liente'ria*, from *λειος*, 'smooth,' and *ε'τερον*, 'intestine.' *La'vitas intestino'rum*, *Diarrha'a Liente'ria*, *Fluxus Liente'ricus*, *Chymorrhœ'a*, *Diarrhœ'a seu Lavitas ingesto'rum*, *D. dyspe'ptica*, *D. cum a'pepsia*, *Slip'periness of the Guts*. Frequent liquid evacuations; the food only half digested. This condition is always symptomatic of great irritation in the intestinal canal; the sensibility of which is so much augmented, that it cannot bear the sojourn of the food in it.

**LIERRÉ**, *Hedera helix*—*L. Terrestris*, *Glecoma hederacea*.

**LIFE**, *Sax. lif*, *lyf*, *Vita*, *Bios*, *Biote*, *Zoe*. (F.) *Vie*. The state of organized beings, during which, owing to the union of an immaterial imponderable principle with matter, they are capable of performing functions different from those that regulate other natural bodies; all of which functions, however numerous and diversified, work to one end. Life has only a limited duration; beyond which,—the organic functions ceasing to be executed,—the body is given up to the agency of chymical affinity. Hence Bichat has defined life to be—*the aggregate of the functions which resist death*. On account of the difference that exists amongst the vital functions, he has applied the term *Organic Life* to the functions inservient to composition and decomposition;—as digestion, respiration, circulation, calorification, absorption, secretion, and nutrition; and *Animal Life*, to those functions which connect man and animals with external bodies; as the understanding, sensations, locomotion, and voice.

**LIFE'S BLOOD**, *Sillo*.

**LIGAMENT**, *Ligamen'tum*, from *liga're*, 'to bind;' *Desmos*, *Syndesmos*, *Colliga'men*, *Cup'ulu*. A name, given to fibrous structures, which serve to unite bones, and to form articulations; hence the division of *interosseous* and *articular* ligaments. They are of a white, close texture; but little extensible, and difficult to break. The name *ligament* has, also, been given to any membranous fold, which retains an organ in its situation.

TABLE OF THE PRINCIPAL LIGAMENTS.

|  |  |

The **SUSPENSORY LIGAMENT OF THE LIVER**, *Ligamentum latum, Suspensorium Hepatis*, is a large, triangular reflection, formed by the peritoneum between the superior surface of the liver and the diaphragm. It is constituted of two layers, and is continuous, below, with another reflection, called the *Falx of the Umbilical Vein*. See Falx.

The **CORONARY LIGAMENT OF THE LIVER** is a reflection formed by the peritoneum, between the posterior margin of the liver, and the lower surface of the diaphragm. See Falx.

**LIGAMENT ARTERIEL**, Arterial ligament—1. Cervical suprascapular, see Suprascapular ligamenta—1. Costo-Xiphoid, Xiphoid ligament—1. Dorso-lumbo-suprascapular, see Suprascapular ligamenta—1. of Fallopius, Crural arch—1. Infra-pubic, Triangular ligament—1. *Interépineux*, Interspinal ligament—1. Palmar inferior, Metacarpal ligament—1. Poupard's, Crural arch—1. *Rond*, Ligamentum teres—1. *Sur-épineux cervical*, see Suprascapular ligamenta—1. *Sur-épineux-dorso-lombaire*, see Suprascapular ligamenta.

**LIGAMENTA INTERVERTEBRALIA**, Intervertebral cartilages.

**LIGAMENTA ROTUNDA UTERI**, Round ligaments of the uterus.

**LIGAMENTS CROISÉS**, Crucial ligaments—1. *Cruciformes*, Crucial ligaments—1. *Jaunes*, Yellow ligaments—1. of the Larynx inferior, Thyreo-arytenoid ligaments—1. *Ronds de l'utérus*, Round ligaments of the uterus.

**LIGAMENTUM NUCHÆ**, Cervical ligament—1. Suspensorium testis, Gubernaculum testis.

**LIGATIO**, Fascia, Ligature.

**LIGATURA**, Fascia.

**LIGATURE**, *Ligaturæ, Ligatio, Alligaturæ, Deligatio, Vineturæ, Fascia, Epidæsis*, from *ligo*, 'I bind.' This word has various acceptations. It means, 1. The thread with which an artery or vein is tied, to prevent or arrest hemorrhage. 2. The cord or thread or wire, used for removing tumours, &c. 3. The bandage used for phlebotomy. *Ligature* is, also, sometimes applied to the act of tying an artery or considerable vessel. When the artery alone is tied, the ligature is said to be *immediate*; when any of the surrounding parts are included, it is said to be *mediate*. The ligature occasions obliteration or adhesion of the arterial parietes, by cutting through its middle and internal coats; the adhesion being favoured by the formation of a coagulum, which acts, in some degree, as a barrier against the impulse of the blood, and subsequently disappears by absorption.

**LIGHT**, Sax. *leoht*, *liht*, (G.) *L i c h t*—*Lux, Lumen, Luce, Phos.* (F.) *Lumière*. An extremely rare fluid, diffused over the universe; emanating from the sun and fixed stars; traversing more than four millions of leagues in a minute; passing through transparent bodies, which refract it according to their density and combustibility; and arrested by opaque bodies, by which it is reflected at an angle equal to the angle of incidence. It is the cause of colour in all bodies; being entirely reflected by white surfaces and absorbed by black. It is decomposed in passing through a transparent prism

into seven rays, viz. into red, orange, yellow green, blue, purple, and violet.

Light acts upon the body as a gentle and salutary stimulus. It urges to exercise, whilst privation of it induces sleep and inactivity, and disposes to obesity. Hence it is, that, in rural economy, animals, which are undergoing the process of fattening, are kept in obscurity. When vegetables are deprived of light, their nutrition is interfered with, and they become *etiolated*. To a certain extent this applies to animals, and there is every reason to believe, that want of light prevents the due development of organized bodies. Edwards found that when tadpoles were deprived of light, they did not undergo the perfect metamorphosis into the frog, but that monstrosities from arrest of development were induced.

**LIGHTNING**, *Astrape*.

**LIGHTS, RISING OF THE**, *Cynanche trachealis*.

**LIGNE**, Line—1. *Apré*, *Linea aspera*—1. *Blanche*, *Linea alba*—1. *Courbe*, *Curved line*—1. *Médiane de l'abdomen*, *Linea alba*—1. *Sous trochantérienne*, *Linea aspera*.

**LIGNIN**, from *Lignum*, 'wood.' Woody fibre, or the fibrous structure of vegetable substances.

**LIGNUM ALOES**, *Agallochum*—1. *Aspalathi*, *Agallochum*—1. *Benedictum*, *Guaicum*—1. *Brasilianum rubrum*, *Hæmatoxylon campechianum*—1. *Cæruleum*, *Hæmatoxylon campechianum*—1. *Campechense*, *Hæmatoxylon campechianum*—1. *Campechianum*, *Hæmatoxylon campechianum*—1. *Campescanum*, *Hæmatoxylon campechianum*—1. *Colubrinum*, see *Strychnos*—1. *Hæmatoxyli*, *Hæmatoxylon campechianum*—1. *Indicum*, *Guaicum*, *Hæmatoxylon campechianum*—1. *Infelix*, *Sambucus*—1. *Nephriticum*, *Guilandina Moringa* (the wood)—1. *Pavanæ*, *Croton tiglium*—1. *Quassia*, see *Quassia*—1. *Sanctum*, *Guaicum*—1. *Sappan*, *Hæmatoxylon campechianum*—1. *Serpentinum*, *Ophioxylum serpentinum*—1. *Vitæ*, *Guaicum*.

**LIGNYODES**, *Fuliginosæ*.

**LIGULA** or **LINGULA**. The clavicle, (q. v.) also, the glottis, (q. v.) and epiglottis, (q. v.) Also, a measure containing 3 drachms and a scruple. Scribon. Also, a species of bandage or ligature.—Scribon.

**LIGUSTICUM FENICULUM**, *Anethum*.

**LIGUSTICUM LEVISTICUM**, *Levisticum, Lascerpitium Germanicum, Ligusticum, Lovage*. (F.) *Lièche, Ache des montagnes*. The properties of this plant are said to be stimulant, carminative, emmenagogue, &c.

**LIGUSTICUM PODAGRARIA**, *Ægopodium podagraria, Seseli ægopodium, Angelica sylvestris*, *Gout weed*. A British plant, once considered useful in cases of gout.

**LIGUSTRUM ÆGYPTIACUM**, *Lawsonia inermis*.

**LIGYSMA**, *Distortion*.

**LILI**, *Lilium Paracelsi*.

**LILIA'GO**. Dim. of *Lilium*, the lily;—*Spiderwort*;—*Liliastrum*. This plant was formerly said to be alexipharmic and carminative.

**LILIASTRUM**, *Liliago*.

**LILIUM CANDIDUM**, *Crinon, L. album*. The white lily. (F.) *Lis blanc*. The infusion of the flowers of the lily in olive oil is emollient,

and often applied externally, under the name of *Lily oil*, (F.) *Huile de lis*. The scales of the bulb, roasted, are sometimes employed as maturatives.

LILIUM CONVALLIUM, *Convallaria maialis*.

LILIUM PARACEL'SI, or TINCTURA METALLO-RUM, *Lili*. A medicine employed by Paracelsus. It was prepared by melting in a crucible four ounces of each of the following alloys: *Antimony and iron, antimony and tin, antimony and copper*, previously mixed with eighteen ounces of nitrate of potass, and as much salt of tartar. The melted mass, when pulverized, was treated with rectified alcohol, which really dissolved only the potass, set at liberty by the decomposition experienced by the nitre and salt of tartar. The *Lilium Paracelsi* was used as a cordial. It entered into the composition of the theriacal elixir, &c.

LILY, MAY, *Convallaria maialis*—l. of the Valley, *Convallaria maialis*—l. Water, white, *Nymphæa alba*—l. Water, yellow, *Nymphæa lutea*—l. White, *Lilium candidum*.

LIMACIEN, (F.) from *limaçon*, the *cochlea* of the ear. A branch of the acoustic or labyrinthic nerve sent to the cochlea.

LIMACON, *Cochlea*, *Limax*—l. *Rampes du*, see *Cochlea*.

LIMANCHIA, Abstinence.

LIMAX, *Helix*, the *Slug* or *Snail*. (F.) *Limacón*, *Colimaçon*, *Escargot*. A syrup has been prepared from these animals, which has been given in phthisis, &c. The raw snails have also been taken in consumption. They were used as food.

LIMB, Membrum.

LIMBUS LUTEUS RETINÆ, see *Foramen centrale*—l. *Posterior corporis striati*, *Tænia semicircularis*.

LIME. A fruit like a small lemon, the juice of which is strongly acid, and is much used for making punch. It is, also, used in long voyages as an antiscorbutic, &c. It is a species of lemon.

LIME, Calx—l. *Carbonate of, Creta*—l. *Chloride of, Calcis chloridum*—l. *Muriate of, Calcis chloridum*—l. *Muriate of, solution of, see Calcis murias*—l. *Sulphuret of, Calcis sulphuretum*—l. *Tree, Tilia*—l. *Water, Liqueur calcis*—l. *Water, compound, Liqueur calcis compositus*.

LIMITROPHES. See *Trisplanchnic nerve*.

LIMNE, Marsh.

LIMOCTONIA, Abstinence.

LIMON. See *Citrus medica*.

LIMONADE, *Lemonade*—l. *Sèche, Lemonade, dry*; see *Citric acid*.

LIMONIUM, *Stalice limonium*—l. *Malum*, see *Citrus medica*.

LIMONUM BACCA. See *Citrus medica*.

LIMOS, λιμος, 'hunger.' (q. v.) Hence:

LIMOSIS, from λιμος, 'hunger,' *Stomach disease, Morbid appetite*. A genus in the class *Colicæ*, order *Entericæ*, of Good.

LIMOSIS CARDIALGIA MORDENS, *Cardialgia*—l. *Cardialgia sputatoria, Pyrosis*—l. *Dyspepsia, Dyspepsia*—l. *Expers, Anorexia*—l. *Expers protracta, Fasting*—l. *Flatus, Flatulencia*—l. *Helluonum, Gluttony*—l. *Pica, Malacia*.

LIN, *Linum usitatissimum*—l. *Graines de;*

see *Linum usitatissimum*—l. *Purgatif, Linum catharticum*.

LINAIRE. *Antirrhinum linaria*.

LINAMENTUM, *Carbasus*.

LINARIA, *Antirrhinum linaria*.

LINCTUARIUM, *Electos*.

LINCTUS, *Electos*—l. *Albus, Looch album*—l. *Amygdalinus, Looch album*—l. *ad Aphthas, Mel boracis*—l. *de Borace, Mcl boracis*—l. *Communis, Looch album*.

LINDEN TREE, *Tilia*.

LINE, *Linca, Gramme*, (F.) *Ligne*. Extent in length, considered without regard to breadth or thickness.

LINEA, *Line*.

The LINEA ALBA, (F.) *Ligne blanche, Ligne médiane de l'abdomen* (Ch.) *Candidula abdominis lin'ea, Lin'ea centralis*, is a tendinous, strong, and highly resisting cord; extending from the ensiform cartilage of the sternum to the symphysis pubis, with the umbilicus near its middle. The linea alba is formed by the decussation of the aponeuroses of the abdominal muscles: and its use is to limit the movement of the chest backwards; to prevent it from separating too far from the pelvis, and to furnish a fixed point for the muscles of the abdomen, in their contraction.

The LINEA AS'PERA, (F.) *Ligne âpre, Ragged ridge, Ligne sous-trochantérienne* (Ch.) A rough projection at the posterior surface of the femur, which gives attachment to muscles.

LINEA CANDIDULA ABDOMINIS, L. alba—l. *Centralis, L. alba*—l. *Innominata, L. ilio-pectinea*.

LINEÆ TRANSVERSÆ. See *L. semilunares*.

LINAIRE, *Linear*.

The MEDIAN LINE OF THE BODY is an imaginary line, supposed to set out from the top of the head and to fall between the feet, so as to divide the body vertically into two equal and symmetrical parts.

The LINEÆ SEMILUNA'RES are the lines, which bound the outer margin of the recti muscles of the abdomen. They are formed by the union of the abdominal tendons. The lines which cross these muscles are called *Linæ transversæ*.

LIN'EAMENT, *Lin'amentum*, from *linca*, 'a line.' A delicate trait observed on the countenance, which constitutes its special character, enables us to preserve its image, and is the cause of resemblance to others. A *feature*.

Bonnet gave the name *Lineament* to the first traces of organization in the embryo of man and animals.

LIN'EAR, *Lined'ris*; from *linca*, 'a line.' (F.) *Linaire*. Pathologists apply the epithet *linear*, to fractures which are very narrow, and in which the fragments are scarcely separated.

LINGUA, *Tongue*—l. *Bovis, Anchusa officinalis*—l. *Canina, Cynoglossum*—l. *Cervina, Asplenium scolopendrium*—l. *Prognosis ex, Glossomantia*—l. *Serpentaria, Ophioglossum vulgatum*.

LINGUÆ DETENTOR, *Glossocatochus*—l. *Exoncosis, Glossoncus*—l. *Scalpium, Cure lingue*.

LINGUAL, *Lingua'lis*. Relating or belonging to the tongue.

The LINGUAL MUSCLE, *Lingua'lis, Basioglossus* (Cowper), *Glossid'nus*, is a small, long, fasciculus of fibres, hidden beneath the sides of the

tongue, between the hyoglossus and styloglossus muscles, which are on the outside, and the genioglossus, within. This muscle passes from the base to the tip of the tongue; and, at its sides, is confounded with the muscles just referred to. It shortens the tongue, depresses its point, and can carry it to the right or left side.

The LINGUAL ARTERY, *Arteria lingualis* arises from the external carotid; and, after several tortuosities, reaches the base of the tongue, becomes horizontal, and, under the name *Ranina*, advances to the tip, where it anastomoses with its fellow. In its course it gives off the *Dorsalis-lingue* and *sublingual*.

The LINGUAL VEIN follows nearly the same distribution as the artery. It opens into the internal jugular.

The LINGUAL NERVE is a name, which has been given to the ninth pair of Hypoglossus, which see.

The *Lingual nerve* is, also, a term applied to a branch given off from the *Inferior maxillary*; or third branch of the fifth pair. Near its origin it anastomoses with, or simply runs close to, the corda tympani. It afterwards gives off a considerable number of filaments, which are distributed to the tongue, and some of which are said to have even been traced as far as the papillæ;—a distribution which has occasioned it to be regarded as the *Gustatory nerve*.

LINGUALIS, Lingual muscle.

LINGULA, Ligula.

LINI USITATISSIMI SEMINA. See *Linum usitatissimum*.

LINIMENT, *Linimentum*, *Litus*, *Enchris-ton*, *Catachris-ton*, *Perieh'risis*, *Perichris-ton*, *Aleipha*, *Aleimma*, *Enchrisa*, *Fric-tum*, *Fricato-rium*, *Inunctio*, from *lini're*, 'to anoint gently,' 'to anoint.' An unctuous medicine, containing usually oil or lard, and which is used externally, in the form of friction.

LINIMENT AMMONIACAL, *Linimentum ammoniæ fortius*—*l. de Carbonate d'ammoniaque*, *Linimentum ammoniæ carbonatis*.

LINIMENT ANTIHÉMORRHOÏDALE DE SIEUR ANDRY (F.) This is formed of *Narbone honey*, *Olive oil* and *Turpentine*.

LINIMENT ANTIPARALYTIQUE (F.) Composed of *Subcarbonate of ammonia*, *alcoholized oil*; *black soap*, and *oil of rosemary*.

LINIMENT ANTISCIPI'ULOUS, OF HUFELAND, It is composed of *fresh ox's gull*, *White soap*, *Unguentum althææ*, *Volatile oil of petroleum*, *Carbonate of ammonia*, and *Camphor*.

LINIMENT CALCAIRE, *Linimentum aquæ calcis*—*l. Camphor*, *Linimentum camphoræ*—*l. Camphré*, *Linimentum Camphoræ*—*l. of Cantharides*, *camphorated*, *Linimentum e cantharidibus camphoratum*—*l. Cantharide camphré*, *Linimentum e cantharidibus camphoratum*—*l. d'Eau de chaux*, *Linimentum aquæ calcis*—*l. of Lime water*, *Linimentum aquæ calcis*—*l. de Mercure*, *Linimentum hydrargyri*—*l. Mercurial*, *Linimentum hydrargyri*—*l. de Savon*, *Linimentum saponis compositum*—*l. de Savon opiacé*, *Linimentum saponis et opii*.

LINIMENT RÉSOLUTIF DE POTT, composed of *oil of turpentine* and *muratic acid*. Used in rheumatism, swellings, &c.

LINIMENT SAVONNEUX HYDROSULFURÉ DE J. IDELOT. Composed of sulphu-

ret of *potass*  $\bar{z}$ vj, *white soap* lbij, *oil of poppy* lbiv, *oil of thyme*  $\bar{z}$ ij: used in the itch.

LINIMENT, SIMPLE, *Linimentum simplex*—*l. Soap and opium*, *Linimentum saponis et opii*—*l. Soap, compound*, *Linimentum saponis compos.*—*l. Turpentine*, *Linimentum terbinthinæ*—*l. of Verdigris*, *Linimentum æruginis*—*l. de Vert de gris*, *Linimentum æruginis*—*l. Volatil*, *Linimentum ammoniæ fortius*.

LINIMENTUM ÆRUGINIS, *Olymel* *Æruginis*, *Unguentum Ægyptiacum*, *Mellitum de aceto cupri*, *Liniment of verdigris*, (F.) *Liniment of Vert-de-gris*, *Miel d'acétate de cuivre*. (*Ærugin*, cont.  $\bar{z}$ j, *acet.*  $\bar{z}$ vij, *mellis desput.* pond.  $\bar{z}$ xiv. Liquefied, strained, and inspissated by boiling. *Ph. L.*) It is used as an escharotic and detergent;—diluted, as a gargle in venereal ulcerations and in foul ulcers.

LINIMENTUM ALBUM, *Ceratum cetacei*, *Unguentum cetacei*—*l. ad Ambustiones*, *L. aquæ calcis*.

LINIMENTUM AMMO'NIÆ CARBONATIS, *Liniment of subcarbonate of ammonia*, *Linimentum ammoniæ*, *Linimentum volatilè*; *Hartshorn and oil*. (F.) *Liniment de carbonate d'ammoniaque*. (*Solut. subcarb. ammon.*  $\bar{z}$ j, *olei. oliv.*  $\bar{z}$ ij. Shake till they unite.) A stimulating liniment, mostly used to relieve rheumatic pains, bruises, &c.

LINIMENTUM AMMO'NIÆ FORTIUS, *Sapo ammoniacalis*, *Linimentum ammoniacum* seu *ammoniacum* seu *Anglicanum*, *Sapo ammoniæ oleæ d'occi*, *Unguentum album resolvens*, *Oleum ammoniacum*, *Linimentum ammoniæ*, *Strong liniment of ammonia*, (F.) *Liniment volatil ou ammoniacal*, *Savon ammoniacal*. (*Liq. ammon.*  $\bar{z}$ j, *olei olivæ*,  $\bar{z}$ ij. Shake till they mix. *Ph. L.*) A stimulating and rubefacient soap.

LINIMENTUM AMMONIATUM SEU AMMONIACUM, *L. ammoniæ fortis*—*l. Anglicanum*, *L. Ammoniacæ fortis*—*l. ad Aphthas*, *Mel boracis*.

LINIMENTUM AQUÆ CALCIS, *Linimentum Calcis*, *Oleum lini cum calcè*, *Sapo calcarius*, *Linimentum ad ambustiones*, *Liniment of lime water*, (F.) *Liniment d'eau de chaux*, *Savon calcaire*, *Liniment calcaire*. (*Olei lini usitat.*, *aquæ calcis*, *partes æquales*. *Mix. Ph. E.*) A cooling and enollent application to burns and scalds.

LINIMENTUM ARCÆI, *Unguentum elemi compositum*—*l. de Borate*, *Mel boracis*—*l. Calcis*, *L. aquæ calcis*.

LINIMENTUM CAMPHORÆ, *Oleum camphoratum*, *Solutio camphoræ oleæ*, *Camphor liniment*, (F.) *Liniment camphré*. (*Camphoræ*  $\bar{z}$ iv, *olivæ olei*  $\bar{z}$ ij. Dissolve. *Ph. L.*) It is used as a stimulant and discutient.

LINIMENTUM CAMPHORÆ COMPOSITUM, *Ward's essence for the headache*, *Compound camphor liniment* (*Camphor*  $\bar{z}$ ij, *liq. ammoniæ*  $\bar{z}$ ij, *spirit. lavand.* lbj. *Ph. L.*) It is stimulant and anodyne.

LINIMENTUM E CANTHARID'IBUS CAMPHORATUM, *Camphorated liniment of cantharides*, (F.) *L. cantharide camphré*, (*Tinct. cantharid.*  $\bar{z}$ ss, *ol. amygd. dulc.*  $\bar{z}$ iv, *sapon. amygd.*  $\bar{z}$ j, *camphor*  $\bar{z}$ ss. Dissolve the camphor in the oil and add this mixture to the tincture and soap. *Ph. P.*) Rubefacient and discutient.

LINIMENTUM HYDRARGYRI, *Mercurial liniment*, (F.) *L. de mercure*, (*Ung. Hyd. fort.*, *adip. præp.* aa  $\bar{z}$ iv, *camphoræ*  $\bar{z}$ j, *sp. rect.* gutt. xv, *li-*

quor ammon. ℥iv. Rub the camphor with the spirit; add the ointment and lard; and, lastly, gradually add the solution. *Ph. L.*) It is used as a stimulant and discutient to venereal swellings, &c.

LINIMENTUM PLUMBATUM, Unguentum plumbi superacetatis—*L. Saponaceum opiatum*, *L. saponis et opii*.

LINIMENTUM SAPONACEUM HYDROSULPHURATUM. (*Sapon. com.* 500 p. Liquefy in a water bath in an earthen vessel; and add *ol. papav. alb.* 250 p. Mix intimately, and add dry sulphuret of potass 100 p. Beat together, and add oil of poppy-seed 750 p. *Ph. P.*) In cutaneous affections, psora, herpes, &c.

LINIMENTUM SAPONIS COMPOSITUM, *Tinctura saponis camphorata*, *Opodeldoch*, *Stcer's opodeldoch*, (F.) *L. de Saxon.* Compound soap Liniment. (*Saponis duri* ℥iij, *camphoræ* ℥j. *sp. rorismorin.* ℔j.) The following form is given by a committee of the Philadelphia College of Pharmacy (*Alcohol* Oviij, *Sapon. alb.* ℥xx, *aq. ammon. f.* ℥iv, *Camphoræ* ℥viii, *ol. Rorismarini*, *ol. Monard.* aa ℥j.) Stimulant and anodyne; in bruises, local pains, &c.

LINIMENTUM SAPONIS ET OPII, *L. saponaceum opiatum*—*Soop and opium liniment*. *Bates's anodyne balsam*, *Balsamum anodynum*, *Tinctura saponis et opii*, (F.) *L. de saxon opiace.* (*Saponis duri* ℥iv, *opii* ℥j, *camphoræ* ℥ij, *olei rorismorin.* ℥ss, *alcohol* ℔j. *Ph. E.*) Anodyne; in chronic rheumatism and local pains in general.

LINIMENTUM SIMPLEX, *Simple liniment*, (*Ol. oliv.* 4 p. *cerae albæ* 1 p. *fiat linimentum.* *Ph. E.*) Emollient, used in chaps, &c.

LINIMENTUM SIMPLEX, Unguentum cerae. FREEMAN'S BATHING SPIRITS consist of *lin. sapon. comp.* coloured with *Daffij's elixir*.

JACKSON'S BATHING SPIRITS differ from Freeman's in the addition of some essential oils.

LINIMENTUM TEREBINTHINÆ, *Turpentine liniment*. (*Cerat. resinæ*, ℔j, *ol. terebinth.* ℔ss. Melt the cerate and stir in the oil. *Ph. L.*) A stimulant; applied to burns, &c.

LINIMENTUM VOLATILE, *L. ammoniæ carbonatis*.

LINNÆA BOREALIS. This plant, called after Linnæus, has a bitter, subastringent taste; and is used, in some places, in the form of fomentation, in rheumatic pains. An infusion in milk is used in Switzerland for the cure of sciatica.

LINOSPERMUM. See *Linum usitatissimum*.

LINSEED. See *Linum usitatissimum*.

LINT, Carbasus.

LINTEAMEN, Linteum, Pledget.

LINTEUM, *Linted'men*, *Oth'onē*, *Othonion*, *Xystos*, *Achnē*. A soft, flocculent substance, made by scraping old linen cloth; and employed in surgery as a dressing to wounds, ulcers, &c., either simply or covered with ointment.

LINTEUM CARPTUM, Carbasus.

LINUM CATHARTICUM, *L. minimum*, *Chamal'num*, *Purging flax*, or *Mill mountain*, (F.) *Lin purgatif*. This plant is possessed of cathartic properties, and has a bitterish, disagreeable taste. Dose, ℥j in substance.

LINUM CRUDUM. See Apolinosis—*L. Minimum*, *L. Catharticum*.

LINUM USITATISSIMUM, *Common flax*, (F.) *Lin.* The seed, *Sen'ina lini usitatis'simi*, *Linosper'mum*, *Linsced*, *Flaxseed*, (F.) *Grains de lin*, are inodorous and almost tasteless; yielding mucilage to warm water, and oil by expression. They are demulcent and emollient. Linseed, when ground into powder, form a good emollient poultice. It is only necessary to stir the powder into boiling water. The oil, *Oleum lini*, is emollient and demulcent.

LIONDENT, *Leontodon taraxacum*.

LION'S TAIL, *Leonorus*.

LIP, Sax. and Germ. *L i p p e*, *Cheilos*, *Labium*, *Labrum*, (F.) *Lèvre*. The lips are composed of different muscular fasciculi, nerves, and vessels, covered by the skin and mucous membrane of the mouth. They circumscribe the anterior aperture of that cavity; and are inservient to mastication, pronunciation, &c.

They are distinguished into *upper and lower*—*Anoche'lon*, and *Catoche'lon*—and are placed in front of each jaw, forming the anterior aperture of the mouth between them. They unite at each side, and form what are called the *angles or commissures* of the mouth—*Chalini*. Their free edge is covered with a mucous membrane, of a more or less vivid red, according to the individual. They receive their arteries from the external carotid. Their veins open into the two jugulars. Their lymphatic vessels descend into the ganglions, situate beneath the chin. Their nerves are derived from the infraorbital, mental, and facial.

The Lips, *Labia*, (F.) *Lèvres de la vulve*, are folds belonging to the genital organs of the female, and distinguished into—

1. *Labia pudendi*, *Labia majora*, *Episi'a*, *Ala majoris*, *Crement'ni*, (F.) *Grandes Lèvres*. These are two membranous folds, thicker above than below, which limit the vulva laterally, and extend from the inferior part of the mons veneris to the perinæum. They unite anteriorly and posteriorly, forming commissures; the posterior of which is called *Fourchette*. Their outer surface is convex; formed of skin and covered with hair. The inner surface is red and covered by a mucous membrane, continuous with that lining the other parts of the vulva.

The space between the skin and mucous membrane is filled with a fatty tissue and fibrous bands, some fibres of the constrictor vaginae muscle, vessels, and nerves.

We speak, also, of the *lips of a wound*, *ulcer*, &c., when alluding to the edges of these solutions of continuity.

LIPA, λιπα, fat; also, Lippitudo, (q. v.)

LIP'ARA, from λιπαρος, 'fatty,' and λιπα, 'fat.' Plasters, containing much oil or fat.

LIPARIA. See Polysarcæ.

LIPAROLÉ, Pomatum.

LIPEMANIA, Melancholy, see Lypemania.

LIPAROCE'LE, *Lipoccele*, from λιπαρος, 'fatty,' and κλη, 'tumour.' A *Lipo'ma*, or fatty tumour of the scrotum.

LIPO OR LEIPO, λιπω, 'I leave,' 'I forsake.' Hence, *Leipopsychia*, *Leipothyrdia*.

LIPOCELE, Liparoccele.

LIPODERMOS, Leipodermos.

LIPOMA, *Lypo'ma*, from λιπος, 'fat,' 'a

fatty tumour.' A fatty tumour, of an encysted or other character.

**LIPOMERIA**, *Leipomeria*, from *λειπω*, 'I leave,' and *μερος*, 'a part.' Monstrosity from arrest of development, or from defect. Deficiency of one or more of the parts of the body; for example, where a person has only four fingers.

**LIPOS**, Pinguedo.

**LIPOTHYMIA**, Syncope.

**LIPPA**, *Chassie*.

**LIPPIA**, Adali.

**LIPPITU'DO**, *Ophthalmia chronica* of some.

*Lippitude*, *Blear eye*, *Lappa*, *Lipa*, *Xerophthalmia*, *Lema*, *Lemē*, *Glama*, *Gramia*. A copious secretion of the sebaceous humour of the eyelids, which renders them gummy. It is a state of chronic inflammation of the tarsal margins; the eyelids being generally red, tumefied, and painful.

**LIPPUS**, *Chassieux*.

**LIQUAMU'MIA**, *Adeps humanus*. Human fat.—Ruland and Johnson.

**LIQUATIO**, Liquefaction.

**LIQUEFAC'TION**, *Liquatio*, *Liquefactio*; from *liquefac'ere*, 'to cause to melt.' Transformation of a solid substance into a liquid. It is used particularly in speaking of metals and fatty bodies.

**LIQUEUR D'ALUMINE COMPOSÉE**, *Liquor aluminis compos.*—*Arsénicale*, *Liquor arsenicalis*—*L. Fumante de Boyle*, *Ammonia sulphuretum*—*L. Fumante de Boyle*, *Liquor fumans Boylii*—*L. Volatile de corne de cerf*, *Liquor volatilis cornu cervi*—*L. de Cuivre ammoniacal*, *Liquor cupri ammoniati*—*L. de Fer alealine*, *Liquor ferri alkalini*—*L. de Sousacetate de plomb*, *Liquor plumbi subacetatis*—*L. de Potasse*, *Liquor potassæ*—*L. de Souscarbonate de potasse*, *Liquor potassæ subcarbonatis*.

**LIQUIDAMBAR OFFICINALIS**. See *Styrax*.

**LIQUIDAMBAR STYRACIF'LUA**, *Liquidambar*, *Succet gum*. The name of the tree which affords the *Liquid amber* and *Storax liquida*, *Styrax liquida* or *Liquid storax*.

Liquid amber is a resinous juice of a yellow colour, inclining to red; at first of about the consistence of turpentine; by age, hardening into a solid, brittle mass. It is not used medicinally.

The *STYRAX LIQUIDA* is obtained from this plant by boiling. There are two sorts:—one more pure than the other. It is used, occasionally, as a stomachic, in the form of plaster.

**LIQUIDUM NERVEUM**, Nervous fluid.

**LIQUOR**, *Hygrom*, *Hygrotes*. (F.) *Liqueur*. A name given to many compound liquids, and especially to those the bases of which are water and alcohol.

**LIQUOR ACIDUS HALLERI**, *Elixir acidum Halleri*—*L. Æthereus*, *Ether*—*L. Æthereus sulphuricus*, *Spiritus ætheris sulphurici*.

**LIQUOR ALUMINIS COMPOSITUS**, *Aqua aluminis composita*, *Aqua aluminosa Bateana*, *Compound solution of alum.* (F.) *Liqueur d'alumine composée*. (*Aluminis, zinci sulphat.*, *sing.*  $\zeta$  ss, *aqua fercent.*  $\mathfrak{b}$  ij. Dissolve and filter through paper.) Detergent and stimulant. Used as a collyrium, when properly diluted, in ophthalmia; as an injection in gleet, and leucorrhœa, &c.

**LIQUOR AMMONIÆ**, *Liq. ammonia puræ*, *Alcali ammoniacum fluidum*, *Ammonia liquida*, *A. caustica liquida*, *A. pura liquida*, *Lixivium ammoniacale*, *Spiritus salis ammoniaci aquosus*, *Aqua ammonia*, *Aqua ammonia caustice*, *Liquid ammonia*, *Solution of ammonia.* (F.) *Ammoniaque liquide.* (*Muriat. calc.*  $\zeta$  viii, *calc. viv. recent.*  $\zeta$  vj, *aqua*  $\mathfrak{b}$  iv. Pour on the lime a pint of the water; cover the vessel and set it by for an hour. Add the muriate of ammonia and the remaining water, previously made boiling hot, and cover the vessel again. Strain the liquor when it has cooled, and distil 12 ounces. S. G. 936. *Ph. L.*) It is a stimulant, antacid, and rube-facient. Dose, gr. x to xx, in water or milk.

**LIQUOR AMMONIÆ ACETATIS**, *Alcali ammoniacum acetatum*, *Alcali volat'ile acetatum*, *Aqua acetatis ammonia*, *Solution of acetate of ammonia*, *Aqua ammonia acetate*, *Acetas ammonia*, *Spirit of Mindereerus*, *Sal ammoniacum vegetabilis*, *Spiritus ophthalmicus Mindereeri*, *Sal acetosus ammoniacalis.* (*Ammon. carbon.*  $\zeta$  ij, *acid. acct.*  $\mathfrak{b}$  iv, or add the salt till the acid is saturated. *Ph. L.*) A sudorific: externally, cooling. Dose,  $\zeta$  ij to  $\zeta$  iss.

**LIQUOR AMMONIÆ SUBCARBONATIS**, *Solutio subcarbonatis ammonia*, *Aqua carbonatis ammonia*, *Solution of subcarbonate of ammonia.* (*Ammonia carbon.*  $\zeta$  viij, *aqua distillat.*  $\mathfrak{b}$  j. Dissolve and filter through paper.) Use;—the same as that of the carbonate of ammonia, (q. v.)

**LIQUOR AMMONII HYDROTHIODIS**, *Ammonia sulphuretum*—*L. ex Ammonia et oleo succini*, *Spiritus ammonia succinatus.*

**LIQUOR AMNII**, *Aqua amnii*. The liquor of the amnios. (F.) *Eaux de l'amnios*. The fluid exhaled by the amnios, and which envelops the fœtus during the whole period of the uterogestation. It is often simply called, the *waters*, (F.) *Les Eaux*. Its relative quantity diminishes as pregnancy advances, although its absolute quantity continues to increase till the period of delivery. In some women, only five or six ounces are met with; in others it amounts to pints. It is limpid, yellowish, or whitish, exhales a faint smell, and has a slightly saline taste. It contains water in considerable quantity; albumen; muriate of soda; phosphate of lime; an alkaline substance; and a particular acid. It facilitates the dilatation of the uterus, and aids delivery by acting as a soft wedge enclosed in its membranes, &c. It is probably inservient to useful purposes in the nutrition of the fœtus.

**LIQUOR ANODYNE**, *HOFFMANN'S*, *Spiritus ætheris sulphurici compositus*—*L. Anodynus martialis*, *Alcohol sulphurico-æthereus ferri*.

**LIQUOR ARSENICALIS**, *Solutio arsenicalis*, *S. arsenicata*, *S. arseni'is kal'ica*, *Arsenical solution*, *Min'eral solvent*, *Arsenis potas'se liq'uidus*, *Arsenis potassæ aquosus*, *Fowler's solution of arsenic*, *Solobuc minerale*, *Italian poison*, *Aqua tof'ana*, (?) *Aqua toff'ana*, *Aqua della toffana*, *Aqua di Napoli*, *Acquetta*, *Tasteless ague drop.* (F.) *Liqueur arsenicale.* (*Arsenic oxyd. præp. in pulverem subtilem tritit.* *potassæ subcarbonatis*, *sing.* gr. lxiv, *aqua distillat.*  $\mathfrak{b}$  j. Boil together in a glass vessel, until the arsenic is dissolved. When the solution is cold, add *Sp. lavand. c.*  $\zeta$  iv, and as much distilled water as will make

the whole one pint. *Ph. L.* f. ʒj, contains gr. ss. of the oxyd of arsenic. Dose, gr. v, gradually increased to gr. xx.

LIQUOR BELLOSI, *L. hydrargyri nitrici.*

LIQUOR CALCIS, *Solutio calcis, Aqua calcis, Aqua benedicta, Calcaria pura liq'nida, Aqua calcaria usta, Solution of lime, Lime Water.* (F.) *Eau de chaux.* (Calcis lb ss, aq. destill. ferment. lb xij. Pour the water on the lime and stir. Let it stand in a covered vessel three hours; bottle the lime and water in stopped bottles, and use the clear solution.) It is astringent, tonic, and antacid; and is used in diarrhœa, diabetes, heartburn, &c. and as a lotion to foul and cancerous ulcers, &c. Dose, ʒij to lb ss, in milk.

LIQUOR CALCIS COMPOSITUS, *Aqua calcis composita, Compound lime water, Aqua benedicta composita.* (F.) *Eau de chaux composée.* (*Lign. guaiac. ras.* lb ss. *rad. glycyrrh.* ʒj, *cort. sassafras,* ʒ ss, *semin. coriand.* ʒij, *liquor. calcis* lb vj. Macerate for 2 days and filter.) It is stimulant, diaphoretic, and astringent, and is used in cutaneous affections.

LIQUOR CALCIS MURIATIS, see *Calcis murias* —1. *Cerericis, Cerevisia.*

LIQUOR CUPRI AMMONIATI, *Aqua cupri ammoniati, Aqua sappharina, Blue eyewater, Solution of ammoniated copper.* (F.) *Liquor ou eau de cuivre ammoniacal.* (*Cupri ammoniat.* ʒj, *aqua destill.* lbj. Dissolve and filter the solution through paper. *Ph. L.*) Corrosive and detergent. Used externally to foul ulcers; and, diluted with an equal part of distilled water, it is applied by means of a hair pencil to specks and films on the eye.

LIQUOR CUPRI SULPHATIS COMPOSITUS, *Aqua cupri vitriolati composita.* (*Cupri sulphat.* alumin. *sulphat.* aa ʒij, *aqua pura* lbij, *acid. sulph.* ʒij. Boil the salts in the water until they are dissolved; then filter the liquor, and add the acid.) Used as an astringent in epistaxis, &c. It was also called *Aqua styptica.*

LIQUOR CYRENIACUS, Benjamin—1. *Excitans, Spiritus Ammoniac succinat.*

LIQUOR FERRI ALKALINI, *Solution of Alkaline Iron.* (F.) *Liquor de fer alkaline.* (*Ferri* ʒiiss. *acid. nitric.* ʒij, *aqua destillat.* ʒvj, *liq. potass. subcarb.* ʒvj. To the acid and water mixed, add the iron; and, after the effervescence, add the clear solution, gradually, to the *liq. potassa subcarb.*; shaking it occasionally till it assumes a deep brown-red colour, and the effervescence stops. After six hours' settling, pour off the clear solution. *Ph. L.*) It is tonic, like other preparations of iron. Dose ʒss to ʒiiss.

LIQUOR FUMANS BOYLII, *Sulphuretum Ammoniac Hydrogenatum, Hydrosulphuretum Ammoniac, Tinctura Sulphuris Volatilis, Aqua Sulphureti Ammoniac.*—Boyle's Fuming liquor, (F.) *Liqueur fumante de Boyle.* It is possessed of nauseating and emetic properties, and has been given in diabetes and diseases of excitement as a *disorgenicizer!*

LIQUOR FUMING, BOYLE'S, *Liquor fumans Boylei*—1. Fuming, of Libavius, Tin, muriate of—1. Genital, sperm—1. of Hartshorn, volatile, *Liquor volatilis cornu cervi.*

LIQUOR HYDRARGYRI NITRICI, *L. Bellosi, Eau mercurielle, Eau contre la gangrène, Remède du Duc d'Antin, R. du Capucin,* (*Hydrarg.*

120 p., *acid nitr.* (33°) 150 p. Dissolve and add to the solution, *distilled water*, 900 p. (*Ph. P.*) Dose, two or three drops in a glass of water. Not much used.

LIQUOR HYDRARGYRI OXYMURIATIS, *Solution of Oxymuriate of Mercury, Liquor Sicietensis, L. Syphiliticus Turneri, Murias hydrargyri spirituosus liq'nidus, Solutio Muria'tis hydrargyri oxygenati, S. of Corrosive Sublimate, Liquor or Solution of Van Sicieten.* (*Hyd. oxym.* gr. viij, *aqua destill.* ʒxv, *sp. rect.* ʒj. Dissolve in the water, and add the spirit. *Ph. L.*) Dose, ʒss. or ʒj.

GREEN'S DROPS, and SOLOMON'S ANTI-IMPETIGENES—both nostrums—seem to be solutions of *Corrosive Sublimat.*

LIQUOR LITHARGYRI SUBACETATIS—1. *plumbi subacetatis*—1. *Lithargyri subacetatis compositus, Liquor plumbi subacetatis dilutus.*

LIQUOR OF MONRO, *Solution of Monro.* A solution used by Monro for the preservation of anatomical preparations. It is composed of alcohol at 22° or 24°, with a drachm of nitric acid to each pint.

LIQUOR MORPHINÆ ACETATIS, *Solution of Acetate of Morphine, Anodyne Drops.* (*Acetate of morphine* gr. xvj, *distilled water* ʒvj, *dilute acetic acid* ʒij.) Dose, from six to twenty-four drops.

LIQUOR NERVINI BANGII, *Tinctura æthera comphorata*—1. *Oleosus Sylvii, Spiritus ammoniac aromaticus*—1. *Opii sedativus, Haden's,* see *Tinctura opii.*

LIQUOR OPII SEDATIVUS. An empirical preparation by a London druggist, of the name of Battley. It is presumed to be a solution of acetate of morphine, or of opium, in some form in vinegar. It is devoid of many of the narcotic effects of opium.

LIQUOR OVI ALBUS, *Albumen ovi*—1. *Pancreaticus, see Pancreas*—1. *Plumbi acetatis, L. P. subacetatis.*

LIQUOR PLUMBI SUBACETATIS, *Liquor Subacetatis Lithargyri, Solution of Subacetate of Lead, Liquor Plumbi Acetatis, Goulard's Extractum Saturni, Lithargyri Actuum, (F.) Liqueur de sousacétate de Plomb.* (*Plumbi oxyd. semivitr.* lbj, *acid. acetic. congnim.* Mix and boil down to ʒvj, constantly stirring; then filter, after the feculence has subsided. *Ph. L.*) It is used externally as a cooling astringent, and discent, when diluted with distilled water.

LIQUOR PLUMBI SUBACETATIS DILUTUS, *Liquor Subacetatis Lithargyri Compositus, Aqua Saturni, Actus Plumbi dilutum alcoholicum, Diluted Solution of Subacetate of Lead, Aqua recto-mineralis, Tinctura plumbosa, Aqua Lithargyri Acetati composita, Liquor Plumbi Acetatis dilutus, White Wash, Royal Preventive.* (*Liq. plumbi subacet.* ʒj, *aqua destillat.* lbj, *spirit. tenuioris* ʒj.) Properties the same as the last, but feebler.

LIQUOR POTASSÆ, *Aqua Potassa, Aqua Kali Causticæ, Solution of Potash, Lixivium magistra'le, L. Saponarium, Soap Lees, Aqua Kali puri, Soap Ley, Lixivium causticum, Potassa liq'nida.* (F.) *Eau, solution ou liqueur de Potasse, Potasse liquide.* (*Potassa subcarb.* lbj, *calcis recent.* lb ss, *aqua destill. ferment. congnim.* Dissolve the alkali in lbj of the water, and add the remainder to the lime. Mix the whole; set aside in a close vessel, and, when cold,

filter through calico. *Ph. L.*) It is antilithic in cases of uric acid calculi, and antacid. Externally, stimulant and escharotic. Dose, grtt. x to xx.

LIQUOR POTASSÆ HYDRIODATIS, *Solution of Hydriodate of Potass.* (*Potassa hydriod.* 36 gr., *aquæ destillat.* ℥j.) Dose, grtt. xx, three times a day.

LIQUOR POTASSÆ SUBCARBONATIS, *Aqua Subcarbonatis Kali, O'leum Tartari per deliquium, Aqua Kali, Lixivium Tartari, Aqua Kali præparati, Oil of Tartar, Saline Oil of Tartar, Solution of Subcarbonate of Potass.* (*F.*) *Liqueur de sous-carbonate de Potasse, Lessive de Tartre.* (*Potass. subcarb.* ℥ij, *aquæ destillat.* ℥xij. Dissolve and filter through paper.) Dose, grtt. x to xxx.

LIQUOR, PROPAGATORY, Sperm.

LIQUOR SANGVINIS. This term has been given by Dr. Babington to one of the constituents of the blood, the other being the red particles. He considers, from his experiments, that fibrine and serum do not exist as such in circulating blood, but that the *Liquor Sanguinis*—the *Plasma*, of Schultz—when removed from the circulation and no longer subjected to the laws of life, has then, and not before, the property of separating into fibrine and serum. It is the *Liquor Sanguinis*, after the red particles have subsided, which forms the buffy coat of inflammatory blood.

LIQUOR SEMINIS. The homogeneous, transparent fluid, in which the spermatozoa and seminal granules are suspended.—Wagner.

LIQUOR SULPHURICUS ALCOOLISATUS, *Spiritus ætheris sulphurici*—*L. Swietenis*, *L. hydrargyri oxymuriatis*—*L. Syphiliticus Turneri*, *L. hydrargyri oxymuriatis*—*L. of Van Swieten*, *L. hydrargyri oxymuriatis*.

LIQUOR VOLATILIS CORNU CERVI, *L. volatilis Cornu Cervini, Volatile Liquor of Hartshorn, Spiritus Lambricorum, Spiritus Millepedrum, Hartshorn, Spirit of Hartshorn, Spiritus Cornu Cervi, Liquor volatilis ossium; Bone Spirit.* (*F.*) *Liqueur volatile de Corne de cerf.* This is a solution of subcarbonate of ammonia, impregnated with empyreumatic oil. It possesses the same virtues as the subcarbonate of ammonia. It is in common use to smell at, in faintings, &c.

LIQUOR VOLATILIS OSSIIUM—*L. volatilis cornu cervi.*

LIQUOR ZINCI SULPHATIS CUM CAMPHORA, *Aqua Zinci vitriolati cum Camphorâ, Aqua vitriolici camphorati, Aqua ophthalmica, Common Eye Water.* (*Zinci sulph.* ℥ss, *camphor* ℥ij, *aq. bullient.* ℥ij; dissolve and filter.) Used as a lotion for ulcers; or, diluted with water, as a collyrium.

LIQUORICE. Glycyrrhiza—*L.* Juice, see Glycyrrhiza—*L.* refined, *Extractum glycyrrhizæ*—*L.* Spanish, see Glycyrrhiza.

LIQUORITIA, Glycyrrhiza.

LIRIODENDRON, *Liriodendron tulipifera, Tulip Tree, Poplar Tree, Tulip-bearing Poplar, American Poplar, White Wood, Cypress Tree, (New England.) (F.) Tulipier.* The bark—especially of the root—of this noble forest tree, which is indigenous in the United States, is a strong aromatic bitter, and has been employed advantageously as a tonic. Its active principle

has been separated from it by Professor J. P. Emmet of the University of Virginia, and has been called *Liriodendrine*. It is not used in medicine.

LIS BLANC, *Lilium candidum*—*L. Asphodelle, Asphodelus ramosus.*

LISERON, GRAND, *Convolvulus sepium*—*L. des Haies, Convolvulus sepium.*

LITE, λιτή. A plaster, formerly used, made of verdigris, wax, and resin.—Galen.

LITHAGOGUS, from λιθός, 'a stone,' and αγω, 'I expel.' A remedy, which was supposed to possess the power of expelling calculi.

LITHARGE, *Plumbi oxydum semivitreum*—*L. of Gold*, see *Plumbi oxydum semivitreum*—*L. of Silver*, see *Plumbi oxydum semivitreum*.

LITHARGYRI ACETUM, *Liquor plumbi subacetatis.*

LITHARGYROS, *Plumbi oxydum semivitreum.*

LITHIA, *Lithiasis, Uriasis* (?), *Urolithiasis, Cachexia calculosa, Calculi Morbus*, from λιθός, 'a stone.' The formation of stone or gravel in the human body. Also, an affection in which the eyelids are edged with small, hard, and stone-like concretions.

LITHIA RENALIS ARENOSA, *Gravel*—*L. Vesicalis, Calculi, vesical.*

LITHIASIS, *Lithia*—*L. Cystica, Calculi, vesical*—*L. Nephretica, Gravel*—*L. Renalis, Gravel*—*L. Vesicalis, Calculi, vesical.*

LITHIC, *Lithicus*. Same etymon. Belonging to lithic or uric acid, or to stone: hence *Lithic Diathesis*: the habit of body which favours the deposition of lithic acid and the lithates from the urine.

LITHOLABON, Forceps, (Lithotomy.)

LITHOLABUM, from λιθός, 'a stone,' and λαβων, 'I seize.' An instrument for extracting stone from the bladder. It had various shapes.—Fabricius ab Aquapendente, Hildanus.

LITHONTRIP'TIC, *Lithontrip'ticus, Lithontrip'tic, Calcifragus, Saxifragus*, from λιθός, 'a stone,' and τριβω, 'I bruise,' 'I break.' A remedy, believed to be capable of dissolving calculi in the urinary passages. There is not much reliance to be placed upon such remedies. By *antilithics*, exhibited according to the chemical character of the calculus (see *Calculi Urinary*.) the disease may be prevented from increasing; but most of the vaunted lithontrip'tics, for dissolving the calculus already formed, have been found unworthy of the high encomiums which have accompanied their introduction.

LITHOPÆ'DION, *Infans lapideus, Osteopæ'dion*, from λιθός, 'a stone,' and πæ'ς, 'a child.' A fœtus, petrified in the body of the mother.

LITHOS, Calculus.

LITHOSPERMUM OFFICINALE, *Milium Solis, Gromwell, Ægon'ychon, Bastard Alkanet.* (*F.*) *Grenil officinal, Herbe aux Perles.* The seeds of this plant were formerly supposed, from their stony hardness, to be efficacious in calculous affections. They have, also, been considered diuretic.

LITHOSPERMUM VILLOSUM, *Anchusa tinctoria.*

LITHOTOME, *Lithotomus*, from λιθός, 'a stone,' and τεμνω, 'I cut.' This name has been given to a number of instruments, of dif-

ferent shapes and sizes, which are used in the operation for the stone, to cut the neck or body of the bladder. They ought, with more propriety, to be called *Cystotomes*.

The LITHOTOME CACHE of Frère Côme is the most known, and is still occasionally used. It is composed of a handle, and of a flattened sheath, slightly curved; in this there is a cutting blade, which can be forced out by pressing upon a *baseule* or lever, to any extent that may be wished by the operator.

A DOUBLE LITHOTOME was used by Dupuytren in his bilateral operation. See Lithotomy.

LITHOTOMIST. Same etymon. *Lithotomus*. One, who devotes himself entirely to operating for the stone. One who practises lithotomy.

LITHOT'OMY, *Lithotomia*, *Cystotomia*, *Urolithotomia*, *Sectio vesicalis*, same etymon. (F.) *Taille*. The operation by which a stone is extracted from the bladder. The different methods, according to which this operation may be practised, are reducible to five principal; each of which has experienced numerous modifications.

1. The *Method of Celsus*, *Meth'odus Celsiana*, *Cystotomia cum apparat'ũ parvo*, *Apparat'us Minor*, *Cutting on the Gripe*. This consisted in cutting upon the stone, after having made it project at the perinæum by means of the fingers introduced into the rectum. This method was attended with several inconveniences; such as the difficulty of dividing the parts neatly, injury done to the bladder, as well as the impossibility of drawing down the stone in many persons. It is sometimes, also, called the *Meth'odus Guytoniana*; from Guy de Chauliac having endeavoured to remove from it the discredit into which it had fallen in his time. It was termed the *Apparatus Minor*, (F.) *Le petit appareil*, from the small number of instruments required in it.

2. *Apparatus Major*. This method was invented, in 1520, by John de Romani, a surgeon of Cremona, and communicated by him to Mariano-Santo-di-Barletta, whence it was long called *Mariano's Method*—*Sectio Mariana*. It was called the *Apparatus Major*, and *Cystotomia* vel *Meth'odus cum apparat'ũ magno*, (F.) *Le grand appareil*, from the number of instruments required in it.

An incision was made on the median line; but the neck of the bladder was not comprehended in it. It was merely dilated.

The greater apparatus was liable to many inconveniences, such as ecchymoses; contusion; inflammation of the neck of the bladder; abscesses; urinary fistulæ; incontinence of urine; impotence, &c.

3. The *High Operation*, *Apparatus altus*, *Cystotomia cum apparat'ũ alto*, *C. hypogastrica*, *Epicystotomia*, *Laparocystotomia*, *Sectio seu Meth'odus Francoiana*, *S. Hypogastrica*, *S. alta*. (F.) *Haut appareil*, *Taille Hypogastrique*, *Taille sus-pubienne*, was first practised by Peter Franco, about the middle of the 16th century. It consisted in pushing the stone above the pubis by the fingers introduced into the rectum. Rousset afterwards proposed to make the bladder rise above the pubis by injecting it. The method had fallen into discredit, when

Frère Côme revived it. It is used when the calculus is very large. It was practised by opening first the membranous part of the urethra upon a catheter passed into the canal. Through this incision, the *Sonde à dard*—a species of catheter, having a spear-pointed stilet—was introduced into the bladder. An incision was then made in the linea alba, above the symphysis pubis, of about four or five fingers' breadth, and the peritoneum detached to avoid wounding it. The stilet was pushed through the bladder, and used as a director for the knife, with which the bladder was divided anteriorly, as far as the neck; and the stone extracted.

It was performed in England by Douglas, in 1719, and since by others with various modifications.

4. The *Lateral Operation*, *Cystotomia lateralis*, *Sectio lateralis*, *Apparatus lateralis*, (F.) *Appareil lateralisé*, so named from the prostate gland and neck of the bladder being cut laterally, was probably invented by Peter Franco. It was introduced into France by Frère Jacques de Beaulieu. He performed it with rude instruments, invented by himself, and improved by the suggestions of some of the Parisian surgeons. In England, it received its earliest and most important improvements from the celebrated Cheselden. It is the method practised at the present day, according to different modes of procedure. In this method, the patient is placed upon a table; his legs and thighs are bent and separated; the hands being tied to the feet. The perinæum is then shaved, and a staff is introduced into the bladder; the handle being turned towards the right groin of the patient. An oblique incision is now made from the raphe to the middle of a line drawn from the anus to the tuberosity of the ischium of the left side; and, taking the staff for a guide, the integuments, cellular tissue of the perinæum, membranous portion of the urethra, transversus perinæi muscle, bulbo-cavernosus, some fibres of the levator ani, the prostate and neck of the bladder, are successively divided. For this latter part of the operation, the knife, the beaked bistoury, *Bistouri* ou *Lithotome Caché*, cutting gorget, &c. are used, according to the particular procedure. The forceps is now introduced into the bladder, and the stone extracted.

In the operation, care must be taken not to injure the rectum, or the great arterial vessels, distributed to the perinæum.

A variety of the *Lateral Apparatus*, called by the French *Appareil latéral*, consisted in cutting into the bas-fond of the bladder without touching the neck of that organ; but it was soon abandoned on account of its inconveniences.

The *Bilateral Operation* is founded on that of Celsus. It consists in making an incision posterior to the bulb of the urethra, and anterior to the anus, involving both sides of the perineum by crossing the raphe at right angles: an incision is then made through the membranous part of the urethra, and the prostate may be cut bilaterally, either by the "double lithotome" of Dupuytren, or by the "Prostatic Bisector" of Dr. Stevens, of New York.

5. *Lithotomy by the Rectum*, *Proctocystotomia*, (F.) *Taille par la Rectum*, *Taille postérieurs*, T.

*Recto-vésicale.* This was proposed by Vegetius in the 16th century; but was never noticed until M. Sanson, in the year 1817, attracted attention to it; since which time it has been successfully performed in many instances. It consists in penetrating the bladder through the paries corresponding with the rectum, by first cutting the sphincter ani and rectum about the root of the penis, and penetrating the bladder by the neck of that organ, dividing the prostate; or by its *bus-fond*.

Lithotomy, in women, from the shortness of the urethra, is a comparatively insignificant operation.

LITHOTRIPTORS. See Lithotripsy.

LITHOTRITES. See Lithotripsy.

LITHOTRITEURS. See Lithotripsy.

LITHOTRITY, *Lithotritia*, *Lithotripsy*, *Lithotripsy*, from  $\lambda\iota\theta\omicron\varsigma$ , 'a stone,' and  $\tau\rho\iota\beta\omega$ , 'I break.' The operation of breaking or bruising the stone in the bladder. It has been performed, of late years, with success, by French, and, after them, by English and American surgeons. The instruments employed for this purpose are called in the abstract, *Lithotrites*, *Lithotriteurs*, and *Lithotriptors*. The most celebrated are those of Civiale, Jacobson, Heurteloup and Weiss. See *Brise Pierre articulé* and *Percuter à Martean*.

LITHOTRYPSEY, Lithotripsy.

LITHOXIDURIA, from  $\lambda\iota\theta\omicron\varsigma$ , 'a stone,' *oxide*, and *ουρον*, 'urine.' The discharge of urine containing the lithic or xanthic oxide.

LITHURIA. See Urine.

LITMUS, Lichen roccella.

LITRA, Pound.

LITRE, *Litra*. A measure containing a cubed decimetre, which is equal nearly to 2.1135 pints. The ancients gave the name *litra*,  $\lambda\iota\tau\rho\alpha$ , to a measure capable of containing 16 ounces of liquid.

LITUS, Liniment.

LIVÉCHE, *Ligusticum levisticum*.

LIVER, Sax. *līep*, *Hepar*, *Jecur*. (F.) *Foie*. The liver is the largest gland in the body. It is an azgyous organ; unsymmetrical; very heavy; and of a brownish-red colour; occupying the whole of the right hypochondrium, and a part of the epigastrium. Above, it corresponds to the diaphragm; below, to the stomach, transverse colon, and right kidney; behind, to the vertebral column, aorta, and vena cava; and before, to the base of the chest. Its upper surface is convex; the lower, irregularly convex and concave, so that anatomists have divided the liver into three lobes,—a *large* or *right* or *colic* lobe;—a *lesser* lobe, *lobule*, or *inferior* lobe, the *Lobulus Spigelii*, (q. v.)—and a *middle* or *left* lobe.

At its inferior surface, are observed;—1. A *Sulcus* or *Furrow*, or *Fissure*, called *horizontal* or *longitudinal*, *great fissure*, *Fossa Umbilicalis*, (F.) *Sillon horizontal*, *longitudinal*, *S. de la veine ombilicale*, *Sulcus antero-posterior Jecoris*, *S. horizontalis Jecoris*, *S. longitudinalis Jecoris*, *S. sinus ter Jecoris*, *S. Umbilicalis*, which lodges in the fœtus, the umbilical vein and ductus venosus. 2. The *Principal Fissure*, termed *Sulcus Transversus* vel *Sinus Porta'rum*, (F.) *Sillon transversal* ou *de la veine porte*, which receives the sinus of the vena porta. 3. The *Fissure of the Vena Cava inferior*, *Sillon de la*

*veine cave inférieure*, situate at the posterior margin of the organ, and lodging the vena cava inferior. 4. The *Lobulus Spigelii*, (q. v.) or *posterior portal eminence*. 5. The *anterior portal eminence*, *Aurigu* vel *Lobulus anonymus*, (q. v.) 6. Depressions corresponding to the upper surface of the stomach, gall-bladder, arch of the colon, right kidney, &c. Continued from the fossa umbilicalis, is a small fossa, called *Fossa Ductus Veno'si*, between the left lobe and Lobulus Spigelii.

The posterior margin of the liver is very thick; much more so than the anterior. The liver is surrounded by a serous or peritoneal covering, which forms for it a *suspensory* or *broad ligament*, and two *lateral* and *triangular* ligaments. See Falx. The blood-vessels of the liver are very numerous. The hepatic artery and vena porta furnish it with the blood necessary for its nutrition and the secretion of bile. The hepatic veins convey away the blood, which has served those purposes. The lymphatic vessels are very numerous; some being superficial; others deep-seated. The nerves are, also, numerous, and proceed from the pneumogastric, diaphragmatic, and from the hepatic plexuses.

The intimate structure of the parenchyma of the liver is not understood. When cut, it presents a porous appearance, owing to the division of a multitude of small vessels. When torn, it seems formed of granulations;—the intimate structure of which has given rise to many hypotheses. In these granulations are contained the radicles of the excretory ducts of the bile; the union of which constitutes the hepatic duct.

The liver is the only organ, which, independently of the red blood carried to it by the hepatic artery, receives black blood by the vena porta. The general opinion is, that the vena porta is the fluid which furnishes bile, whilst that of the artery affords blood for the nutrition of the liver. It is, probable, however, that bile is secreted by the latter vessel.

The liver is liable to a number of diseases. The principal are—*Hepatitis*, (q. v.) or *inflammation*,—*cancer*, *biliary calculi*, *encysted* and other *tumours* or *tubercles*, *hydatids*, &c., and it has, at times, been the *fashion* to refer to it as the cause of symptoms, with which it is in no wise connected.

LIVER, *Hepar*. Under this name the ancients designated several substances, having a brownish colour, analogous to that of the liver; and composed of sulphur and some other body. See Potassæ Sulphuretum or *Liver of Sulphur*.

The *Liver of Antimony* is the semi-vitreous sulphuret, &c.

LIVER SPOR, *Chloasma*—l. Wort, *Hepatica triloba*, *Marcliantia polymorpha*—l. Wort, ground, ash-coloured, *Lichen caninus*—l. Wort, Iceland, *Lichen Islandicus*.

LIVRE, Pound.

LIXIVIA TARTARIZATA, Potassæ tartaras—l. Vitriolata, Potassæ sulphas—l. Vitriolata sulphurea, Potassæ sulphas cum sulphure.

LIXIVIÆ SEU KALICUM ACETAS, Potassæ acetas.

LIXIVIAL, *Lixiviosus*; from *lixivium*, 'lee.' (F.) *Lixiviel*, *Lixivieux*. An ancient

term for salts, obtained by washing vegetable ashes,—such as the fixed alkalies.

**LIXIVIATION**, *Eliviat'ion*, *Lixiviat'io*, same etymon. An operation, which consists in washing ashes with water, so as to dissolve the soluble parts. The filtered liquor is the *lee*.

**LIXIVIUM**, *Lixiv'ia*, *Conia*, *Lec*, *Ley*, (F.) *Lessive*. Any solution containing potass or soda in excess; from *lix*, 'potash,' (q. v.)

**LIXIVIUM AMMONIACALE**, *Liquor ammoniæ*—*l. Ammoniacale aromaticum*, *Spiritus ammoniæ aromaticus*—*l. Causticum*, *Liquor potassæ*—*l. Magistrale*, *Liquor potassæ*—*l. Saponarium*, *Liquor potassæ*—*l. Tartari*, *Liquor potassæ subcarbonatis*.

**LIZARD**, *Lacer'ta*, *Lacertus*, *Saura*, *Suuros*, (F.) *Lézard*. Lizards were formerly employed in medicine as sudorifics; and were, at one time, extolled in syphilis, cutaneous affections, and in cancer.

**LOADSTONE**, *Magnet*.

**LOATHING**, *Disgust*.

**LOBARIA PULMONARIA**, *Lichen pulmonarius*.

**LOBE**, *Lobus*. A round, projecting part of an organ. The liver and the lungs have lobes.

The **LOBE**, or **LOBULE** OF THE EAR, is a soft, rounded prominence, which terminates the circumference of the pavilion inferiorly, and which is pierced in those who wear rings.

The under surface of the brain is divided into *two anterior*, *two lateral*, and *two posterior lobes* or *processes*. These Chaussier calls *lobules* of the brain: the cerebral hemispheres he terms *lobes*.

**LOBE DUODÉNAL**, *Lobulus Spigelii*—*l. Pancréatique*, *Lobulus Spigelii*—*l. Petit du foie*, *Lobulus Spigelii*—*l. de Spigel*, *Lobulus Spigelii*.

**LOBELIA INFLATA**, *Indian Tobacco*, *Emetic Weed*, *Lobelia*. The prominent virtues of this American plant are those of an emetic. In smaller doses it is sedative, and has been given as a pectoral in croup, asthma, &c. It is, also, sudorific and cathartic, and is an acro-narcotic poison. Twenty grains act as an emetic.

**LOBELIA SYPHILITICA**, *Blue Cardinal Flower*, *Ranuncululus Virginia'us*. The root of this plant, which is indigenous in the United States, is an emetic and drastic cathartic. It has been used against syphilis; hence its name. The mode of preparing it is to boil  $\frac{3}{4}$ ss of the *dried root* in ℞ij of water, until the fluid is reduced to ℥viij. Dose, ℥ss.

**LOBES**, **OPTIC**, *Quadrigenina tubercula*.

**LOBULE**, *Lob'ulus*, diminutive of *Lobus*, a little lobe.

**LOBULE DU FOIE**, *Lobulus Spigelii*.

**LOBULUS ACCESSORIUS ANTERIOR QUADRATUS**, *L. anonyms*.

**LOBULUS ANONYMUS**, *L. accessorius anterior quadratus*, *L. quadratus*, (F.) *Eminence porte antérieure*. This is situate in the liver between the passage for the round ligament and the gall-bladder, and is less prominent but broader than the *Lobulus caudatus*. From the lobulus anc-

nymus a bridge runs across the passage for the round ligament. It is called *Pons* vel *Isthmus hep'atis*.

**LOBULUS CAUDATUS**, *Processus caudatus*. This is merely the root or one of the angles of the lobulus Spigelii, advancing towards the middle of the lower side of the great lobe, and representing a kind of tail.

**LOBULUS POSTERIOR**, *L. Spigelii*—*l. Posticus papillatus*, *L. Spigelii*—*l. Quadratus*, *L. anonyms*.

**LOBULUS SPIGELII**, *L. posterior*, *L. post'icus papillatus*, (F.) *Éminence porte postérieure*, *Lobule*, *Petit lobe du foie*, *Lobe de Spigel*, *Lobe duodénal*, *L. pancréatique*, is situate near the spine, upon the left side of the great lobe of the liver, and is of a pyramidal shape, projecting, like a nipple, between the cardia and vena cava, at the small curvature of the stomach.

**LOCAL**, *Local'is*, *Topicus*. **Topical**. (F.) *Locale*, *Topique*. An affection is called local—*Morbus Local'is*,—when confined to a part, without implicating the general system; or, at all events, only secondarily. *Local* is thus opposed to *general*. A *local* or *topical application* is one used externally. See **Topical**.

**LOCHIA** OR **LO'CHIA**, *Purgament'a Puerper'ii*, *Purgat'io*, from *λοχος*, 'a woman in childbed,' (F.) *Suites de couches*, *Vidanges*. The *cleansings*. A serous and sanguineous discharge following delivery. During the first two or three days, it is bloody, but afterwards becomes green-coloured and exhales a disagreeable and peculiar odour. The duration, quantity and character of the discharge vary according to numerous circumstances.

The lochial discharge flows from those uterine vessels, which formed a medium of communication between the mother and fœtus, and it continues until their mouths become obliterated, which usually requires from 14 to 21 days. See **Parturition**.

**LOCHIODOCHIUM**, *Lochodochium*.

**LOCHIORRHÆGIA**, from *λοχεια*, and *ρρρρρρ*, 'I make an irruption.' An immoderate flow of the lochia.

**LOCHIORRHÆA**, from *λοχεια*, 'the lochia,' and *ρεω*, 'I flow.' The discharge of the lochia.

**LOCHODOCHIUM**, *Lochiodochium*, from *λοχος*, 'a female in childbed,' and *δεχομαι*, 'I receive.' An institution for the reception of pregnant and childbed females. A *Lying-in-hospital*.

**LOCHOS**, *Puerpera*.

**LOCI**, *Uterus*—*l. Mulieres*, *Uterus*.

**LOCKED JAW**, *Trismus*.

**LOCOMOTILITY**. See **Locomotion**.

**LOCOMOTION**, *Locomot'io*, from *locus*, 'a place,' and *μῶε're*, 'to move.' An action peculiar to animal bodies, by which they transport their bodies from place to place. The faculty is sometimes called *Locomotiv'ity* and *Locomotil'ity*.

TABLE OF THE APPARATUS OF LOCOMOTION.

|  |                                 |  |   |
|--|---------------------------------|--|---|
| Class I.<br>ACTIVE<br>ORGANS.          | a. <i>Exciting,</i>             | - - - - -  | } The brain.<br>Cerebellum.<br>Medulla spinalis.<br>Nerves.                         |
|  |                                 | b. <i>Acting,</i>                                |   |
|  | Class II.<br>PASSIVE<br>ORGANS. |  | 1. <i>Transmitting the action.</i>  |
|  |                                 | 2. <i>Concentrating or directing the action.</i> |   |
| 3. <i>Obeying or resisting action.</i> |                                 |  | } Long bones of the limbs.<br>Flat bones of the cavities.<br>Incrusting cartilages. |
|  |                                 | 4. <i>Facilitating motion.</i>                   |   |

The *Locomotion of an Artery* is the movement produced in a vessel with a curvature, by the impulse of the blood sent from the heart, which tends to straighten the artery, and causes the movement in question.

LOCOMOTIVITY. See *Locomotion*.  
LOCUS NIGER CRURUM CEREBRI. See *Peduncles of the brain*.  
LOCUST EATERS, *Acridophagi*—I. Tree, *Robinia Pseudoacacia*.

LODOICEA. See *Coco of the Maldives*.  
LCEMOPYRA, *Plague*.  
LCEMOS, *Plague*.

LOGIATROS, *λογιατρος*; from *λογος*, 'a word,' and *ιατρος*, 'a physician.' A physician without experience. A theorist.

LOGOS, *Reason*.  
LOGWOOD, *Hæmatoxyton Campechianum*.  
LOGY, *λογος*, 'a description.' A suffix denoting 'a treatise or description.' Hence, *Angiology* and *Neurology*, &c.

LOHOCH, *Looch*.  
LOIMOGRAPHY, *Loimographia*, from *λοιμος*, 'plague,' and *γραφω*, 'I describe.' A description of the plague and pestilential diseases.

LOIMOS, *Plague*.  
LOINS, *Lumbi*.  
LOLIACEUM RADICE REPENTE, *Triticum repens*.

LOMBAIRE, *Lumbar*.  
LOMBO-ABDOMINAL, *Transversalis abdominalis*—I. *Costal*, *Serratus posticus inferior*—I. *Costo-trachélien*, *Sacro-lumbalis*—I. *Dorso-spinal*, *Transversalis dorsi*—I. *Dorso-trachélien*, *Longissimus dorsi*—I. *Huméral*, *Latissimus dorsi*—I. *Sacré*, *Lumbo-sacral*.

LONGCHITIS, *Polypodium Filix mas*.

LONG, *Longus, Macros*. That which is much greater in length than in breadth; as the *long bones*. The epithet is, also, applied to several muscles, to distinguish them from others of similar function, when the latter are shorter. We say, for instance, *long flexors*, and *long extensors*, in opposition to *short flexors*, and *short extensors*.

LONG DU COU, *Longus colli*—I. *du Dos*, *Longissimus dorsi*.

LONGÆVUS, *Macrobiotic*.  
LONGANON, *Rectum*.  
LONGAON, *Rectum*.  
LONGAS, *Rectum*.  
LONGEV'ITY, *Longæritas, Macrobiosis*

The prolongation of existence to an advanced age. Haller collected examples of more than one thousand centenarians. He had knowledge of sixty-two persons, aged from 110 to 120 years; of twenty-nine, from 120 to 130 years; and of fifteen, who had attained from 130 to 140 years. Beyond this advanced age, examples of longevity are much more rare and less sufficiently attested.

The following list of instances of very advanced ages has been given :

|                                    | <i>Lived.</i> | <i>Age.</i>   |
|------------------------------------|---------------|---------------|
| Appollonius of Tyana, - - - - -    | A. D. 99      | - 130         |
| St. Patrick, - - - - -             | - 491         | - 122         |
| Attila, - - - - -                  | - 500         | - 124         |
| Llywarch Hên, - - - - -            | - 500         | - 150         |
| St. Coeurgne, - - - - -            | - 618         | - 120         |
| Piastus, King of Poland, - - - - - | - 861         | - 120         |
| Thomas Parr, - - - - -             | - 1635        | - 152         |
| Henry Jenkins, - - - - -           | - 1670        | - 169         |
| Countess of Desmond, - - - - -     | - 1612        | - 145         |
| Thomas Damme, - - - - -            | - 1648        | - 154         |
| Peter Torlon, - - - - -            | - 1724        | - 185         |
| Margaret Patten, - - - - -         | - 1739        | - 137         |
| John Rovin and wife, - - - - -     | - 1741        | - 172 and 164 |
| St. Mongah or Kentigen, - - - - -  | - 1781        | - 185         |

LONGIS'SIMUS DORSI, *Lombo-dorso-trachélien, Portion costo-trachélienne du sacro-spinal (Ch.)*, *Semi-spinalis*. (F.) *Long dorsal, Long du dos*, is situate vertically at the posterior part of the trunk and fills, in a great measure, the vertebral furrows. It is thick and almost square below; thin and pointed above. It is attached to the posterior surface of the sacrum, to the transverse processes of all the lumbar and dorsal vertebrae, and to the inferior margin of the last 7 or 8 ribs. It maintains the vertebral column in a straight position; straightens it when bent forwards, and can even carry it back. It also assists in the rotatory motion of the trunk.

LONGISSIMUS FEMORIS, *Sartorius*—I. *Oculi*, *Obliquus superior oculi*.

LONG-SIGHTEDNESS, *Presbytia*.

LONGUS COLLI, *Pré-dorso-cervical, Pré-dorso-atloïdien (Ch.)*, (F.) *Long du cou*. This muscle is situate at the anterior and superior part of the vertebral column. It is long, flat, and broader at its middle than at its extremities, which are pointed. It is attached to the anterior surface of the bodies of the first three dorsal and last six cervical vertebrae; to the intervertebral ligaments; to the anterior edge of the transverse processes of the last five cervical vertebrae; and to the tubercle on the anterior arch of the first. This muscle bends the cervi-

cal vertebræ upon each other and upon the dorsal vertebræ. If the upper portion acts on one side only, it occasions the rotation of the atlas on the vertebra dentata; and, consequently, of the head on the neck.

**LONICERA PERICLYMENUM**, *Peryclinenum*, *Caprifolium*, *Common Woodbine*. (F.) *Chêrre-feuille*. This common plant is slightly astringent and tonic, and was formerly much used in gargles.

**LOOCH**, *Lohoch*. Look. A linctus. See *Eclegma* and *Electos*.

**LOOCH ABSQUE EMULSIONE PARATUM**, *Looch préparé sans émulsion*. *Looch prepared without emulsion*. (*Pulv. g. trag. gr. xvj to gr. xxx, ol. amygd. dulc. ℥ss, sacchar. ℥j, aqua ℥ij, aqua flor. aurant. ℥ij*. M. by rubbing in a marble mortar.) Demulcent.

**LOOCH ALBUM**, *Looch amygdalinum*, *Linctus albus*, *L. amygdalinus*, *L. communis*, *Eclegma album*, *Eclegma gummo-so-oleosum*, (F.) *Looch blanc*, *L. b. amygdalin*, *L. b. pectoral*. (*Amygd. dulc. ℥ss, amygd. amar. No. ij, sacchar. alb. ℥iv*. Make an emulsion by gradually adding ℥iv of water. Then take *pulv. tragacanth. ℥iv of water*. Then take *pulv. tragacanth. ℥iv, ol. amygd. dulc. recent. ℥ss, sacch. ℥ij*. Add the almond milk gradually to this, and afterwards *aq. flor. aurant. ℥ij*. Ph. P.) It is demulcent and pectoral.

**LOOCH AMYGDALINUM**, L. album—*l. Blanc*, L. album—*l. cum Croco et pistaciis*, L. viride—*l. of Egg*, L. ex ovo.

**LOOCH EX OVO**, *Looch of egg*, (F.) *Look d'œuf*, *Looch rouge*, *Emulsion huileuse*, *Mixture calmante*, *Potion pectorale*, *Lait adoucissant*, *Potion seu emulsiõ seu mistu'ra le'niens seu oleo'sa*, *Looch pectoral'le le'niens*. (*Vitell. ovi recent. ℥ss, ol. amygd. dulc. ℥iss, syrup. althææ. ℥j*. Rub in a mortar, and add by degrees *aq. flor. aurant. ℥j, aq. papav. rhæad. ℥ij*. Ph. P.) Virtues the same as the preceding.

**LOOCH ROUGE**, L. ex ovo—*l. Vert*, L. viride.

**LOOCH VIRIDE**, *Look cum croce et pistaciis*, (F.) *Looch vert*. (*Syrup. Violar. ℥j, tinct. croci gr. xx, aqua ℥iv*. Mix, and add *pistacia semin. sic. ℥vj*. Ph. P.) Virtues like the last.

**LOOK**, *Looch*—*l. d'œuf*, *Looch ex ovo*—*l. Préparé sans emulsion*, *Looch absque emulsione paratum*.

**LOOSE STRIFE, CREEPING**, *Lysimachia nummularia*.

**LOOSENESS**, *Diarrhæa*.

**LOPEZ RADIX**, *Radix lopeziana*, *Radix Indica lopeziana*. The root of an unknown Indian tree, not possessed of any remarkable smell or taste, or of any appearance of resinous matter. It has been extolled, notwithstanding, in cases of colliquative diarrhæa. Gaubius compares its action to that of simarouba, but thinks it more efficacious.

**LOPHADIA**, *Lophia*.

**LOPHIA**, *Lophadia*. The first vertebra of the back.—*Gorræus*.

**LOPIMA**, *Fagus castanea*.

**LOQUAC'ITY**, *Garrulitas*; from *loquor*, 'I speak.' (F.) *Babillement*. The act of speaking with volubility. It is, sometimes, a symptom of disease, and is observable in hysteria, &c.

**LOQUELA**, *Voice*, articulated.

**LORDOSIS**, from *λῶδος*, 'curved,' 'bent.'

*Repandatio*, *Repanditas*. A name, given to curvatures of the bones in general; and particularly to that of the vertebral column forwards. See *Hump*.

**LORIND MATRICIS**, *Epilepsia uterina*, *Convulsivus uteri morbus*. A barbarous name given to a pretended epilepsy of the womb.

**LOT**, *Urine*.

**LOTIO SAPONACEA**. See *Sapo*.

**LOTION**, *Lotio*. (F.) *Hydrolotif*. A fluid external application. Lotions are ordinarily applied by wetting linen in them and keeping it on the part affected.

**LOTION, GOWLAND'S**. An empirical preparation. (*Bitter almonds, ℥j, sugar, ℥ij, distilled water, lbj*. Grind together, strain and add *corrosive sublimate, ℥ij*, previously ground with *sp. vini rect. ℥ij*.) Used in obstinate eruptions.

**LOTION, HYDROCYANIC**, *Lotio Ac'idi Hydrocyanici*. (*Hydrocyanic acid, f. ℥iv, rectified spirit of wine, f. ℥j, distilled water, f. ℥xss*.) Used with much success in impetigo, &c.

**LOTION, HANNA'S**, *Preventive wash*. This famous nostrum, for the prevention of venereal infection, was nothing more than a solution of caustic potass.

**LOTION, STRUVE'S, FOR THE HOOPING COUGH**. (*Antim. tartar. ℥j, aqua ℥ij*. Add *tinct. cantharid. ℥j*.)

**LOTIUM**, *Urine*.

**LOTUS SYLVESTRIS**, *Trifolium melilotus*—*l. Virginiana*, *Diospyros Virginiana*.

**LOUCHEMENT**, *Strabismus*.

**LOUCHES**. See *Strabismus*.

**LOUPE**, *Wen*.

**LOUSE**, *Pedicular*.

**LOUSINESS**, *Phtheiriasis*.

**LOUSY DISEASE**, *Phtheiriasis*.

**LOUTRON**, *Bath*.

**LOVAGE**, *Ligusticum levisticum*.

**LOVE**, *Eros, amor*, from *Sax. lupian*, (G.) *lic ben*, 'to love.' (F.) *Amour*. A tender and elevated feeling, which attracts one sex to the other. Love is occasionally a cause of disease, especially of insanity.

**LOVE APPLE PLANT**, *Solanum lycopersicum*.

**LOW SPIRITS**, *Hypochondriasis*.

**LOWER**, *Tubercle of, Tuberculum Loweri*. Anatomists have given this name to a small projection; the existence of which is by no means constant, and which is found in the sinus venosus, between the superior and inferior cava.

**LOXARTHURUS**, from *λῶξος*, 'oblique,' and *ἄρθρον*, 'articulation.' *Perversion de la tête des os et des muscles*. A vitious deviation or direction of the joints; without spasm or luxation, as in *clubfoot*.

**LOXIAS**, *Torticollis*.

**LOZENGE**, *Tabella*.

**LOZENGES BARK**, *Tabellæ cinchonæ*—*l. of Catechu and magnesia*, *Tabellæ antimoniales Kunckelii*—*l. Faustinus's, Faustini pastilli*—*l. for the heart-burn*, *Trochisci carbonatis calcis*—*l. Magnesia*, *Tabellæ de magnesiâ*—*l. of Marshmallows*, *Tabellæ de althæâ*—*l. of Oxalic acid*, *Tabellæ acidi oxalici*—*l. Pectoral, black*, *Trochisci glycyrrhizæ glabræ*—*l. Pectoral, of emetine*, *Trochisci emetinæ pectorales*—*l. Rhubarb*, *Tabellæ de rhco*—*l. of Scammony and senna*, compound, *Tabellæ de scammonio et sennâ*—*l. Steel*, *Tabellæ de ferro*—*l. of Steel*,

aromatic, see *Tabellæ de ferro*.—I. Sulphur, simple, *Tabellæ de sulphure simplicibus*.—I. Sulphur, compound, *Tabellæ de sulphure compositæ*.—I. of Sulphuret of antimony, *Tabellæ antimoniales Kunckelii*.—I. Worm, Ching's, *Worm lozenges, Ching's*.

LUCCA, MINERAL WATERS OF. The baths and waters, near this ancient Italian city, have been long celebrated. They are thermal, and resemble, in properties, those of *Plombières* in France, and of Bath in England. There are ten different sources, the temperature of which varies from 95° to 131° Fahr.

LUCE, Light.

LUCID, *Lu'cidus*. In medicine, the word *lucid* is particularly applied to the *intercursus* of apparent reason, which occur in mental alienation.

LUCINA, lithiæ.

LUES, Syphilis.—I. *Gutturis epidemica, Cy-nanche maligna*.—I. *Indica, Frambœsia*.—I. *Sarmatica, Plica*.—I. Syphilis, Syphilis.—I. *Syphilo-des, Syphilis pseudo-syphilis*.—I. *Veneræa, Syphilis*.

LUETTE, Uvula.—I. *Vésicale*. See Urinary bladder.

LUJULA, *Oxalis acetosella*.

LULLABY SPEECH, Lallation.

LUMBAGO, from *Lumbi*, 'the loins.' *Arthro'sia lumborum, Lumbago rheumatica, Nephral'gia rheumatica, Rhachirrhœ'ma, Rachiorrhœ'ma, Rheumatismus dorsalis*. Rheumatism affecting the lumbar region. *Lumbago psod'ica, L. apostematosa, L. ab artro'acæ*—Pains in the loins from abscess.

LUMBAGO A NISÛ. See Effort.

LUMBAR, *Lumbaris* vel *Lumbalis*. (F.) *Lombarre*. Belonging or having reference to the loins.

The LUMBAR ARTERIES are four or five in number on each side. They arise from the sides of the abdominal aorta, and pass behind the muscles situate in front of the lumbar portion of the spine, to gain the broad muscles of the abdomen. They give off, I. Spinal branches. 2. Anterior, posterior, and external muscular branches.

The LUMBAR VEINS have an arrangement analogous to that of the arteries of the same name. They communicate with the vertebral sinuses, azygous veins, &c., and pass into the vena cava inferior.

The LUMBAR NERVES are five in number, and issue from the vertebral column by the spinal foramina of the loins. The first lumbar nerve gives off three branches:—the *external or ilio-scrotal*; the *middle or inguino-cutaneous*, and the *internal or infra pubian*. Along with the three pairs below it, it forms the lumbar plexus.

The LUMBAR PLEXUS, *Portion lombarre du plexus crural*, (Ch.) *Plexus Lombo-abdominal*. This plexus is formed by the union of the *Rami communicantes* of the anterior branches of the first four lumbar nerves. It is situate behind the psoas muscle, and before the transverse processes of the lumbar vertebræ. It furnishes, besides the branches which proceed from the first pair, several filaments, that are distributed to the psoas muscle, to the iliacus, the integuments, glands of the groin; and three great

branches—the *crural*, *obturator*, and *lumbo-sacral*.

LUMBAR ABSCESS, *Psoas abscess, Aposte'ma psod'icum, Abscessus lumborum, Morbus psod'icus*. This abscess is so called from the matter being found on the side of the psoas muscle, or betwixt that and the iliacus internus. Between these muscles is a quantity of loose, cellular substance; and, when an abscess takes place there, it can find no outlet except by a distant course. Generally, it descends along the psoas muscle, forming a swelling immediately beneath *Poupart's* ligament; at times, however, it extends down the thigh under the fascia. Severe hectic follows the bursting of the abscess, and often death. Its causes are,—scrofula, injury to the loins, &c.

When, from the pain of the back continuing for some time, with other symptoms, the disease is suspected, caustics, or the moxa applied opposite the transverse processes of the lumbar vertebræ, must be recommended; and, when the abscess is ready for opening, it may be emptied by repeated discharges of the matter, through a small opening, made with a lancet or small lancet-pointed trocar. The medical treatment will consist in supporting the system, under the great restorative efforts required of it.

LUMBAR REGION, *Lumbi*.

LUMBARIS EXTERNUS, *Quadratus lumborum*.—I. *internus, Psoas magnus*.

LUMBI, *The loins, the lumbar region, Lapa'ra, Psoæ, Osphys*. The posterior regions of the abdomen, comprised between the base of the chest and the pelvis. The parts which enter into the formation of the lumbar region, are—the skin; a considerable quantity of cellular texture; broad and strong aponeuroses;—the *Latissimus Dorsi, Obliquus externus, and Obliquus internus abdominis, Transversalis abdominis, Quadratus lumborum*, and the mass common to the *Sacro-lumbalis, Longissimus dorsi* and *Multifidus spinæ*. These muscles surround the lumbar region of the vertebral column. The vessels, nerves, &c., of the loins, are called *lumbar*.

LUMBO-SACRAL. Belonging to the lumbar and sacral regions. (F.) *Lombo-sacré*. *Bichat* calls thus a very large nerve, given off from the anterior branch of the fifth lumbar pair, which descends into the pelvis before the sacrum to join the sciatic plexus.

LUMBRICALIS, *Vermicul'ris*. Resembling a *lumbricus* or earthworm. A name given to small muscles, met with in the palm of the hand and sole of the foot.

LUMBRICALIS MANUS, *Fidicina'les, Flexor primi internodii digitorum manus vel perforatus lumbrical'is, Annulicordino-phalangiens, Palmi-phalangiens*. Four small, fleshy, thin, round, long, fusiform fasciuli, situate in the palm of the hand, and distinguished into first, second, third, and fourth, counting from without to within. They arise from the tendons of the flexor communis digitorum, and are inserted at the outer and posterior side of the superior extremity of the first phalanges of the last four fingers. These muscles bend the fingers on the metacarpus, and fix the tendons of the flexor digitorum communis.

LUMBRICALES PEDIS, *Planti-tendino-phalangiens*. *Planti-sous-phalangiens*, (Ch.) They are analogous to those of the hand in form, number, and arrangement. They increase the flexion of the toes and draw them inwards.

LUMBRICUS, *Ascaris lumbricoides*—*L. Latius*, *Bothriocephalus latius*, *Tænia solium*.

LUMBUS VENERIS, *Achillea millefolium*.

LUMEN, Light, pupil.

LUMIÈRE, Light.

LUNA, Argentum, Moon.

LUNA'RÈ OS, *Os semiluna'rè*. The second bone in the upper row of the carpus.

LUNA'RIA REDIVI'VA, *Leaco'iam*, *Balbonach*, *Satin*, *Honesty*. Said, by Ray, to be a warm diuretic.

LU'NATIC, *Lunaticus*, from *Luna*, 'the moon.' That which is under the influence of the moon. *Moonstruck*. An epithet given to diseases, which are supposed to appear at certain phases of the moon; or to those who are affected by them. Usually, it is restricted to one labouring under lunacy or mental alienation.

LUNE, Moon.

LUNELLA, Hypopyon.

LUNES, Menses.

LUNETTES ORDINAIRES, Spectacles.

LUNG, Pulmo—*L. Proof*, *Docimisia pulmonum*—*L. Wort*, *Pulmonaria*—*L. Wort*, cow's, *Verbascum nigrum*—*L. Wort*, tree, *Lichen pulmonarius*.

LUPIA, Encystis, Wen.

LUPINUS. Under this term the *white lupin*, *Lupinus albus*, is meant in some pharmacopœias. The seed, which were much eaten in the days of Pliny and of Galen, are now neglected. The meal is, however, occasionally used as an antheimintic, and as a cataplasm.

LUPULINA, *Lupuline*. A substance which exists in the hop, and has been pointed out by Dr. Ives, of New York. It occurs in the form of small, shining, yellowish grains, which cover the base of the scales of the hop. It is pulverulent, and of an aromatic odour. When analyzed, it is found to contain resin, volatile oil in small quantity, and a bitter principle. It is aromatic and tonic, and—according to Dr. Ives—narcotic.

LUPUS. 'The wolf,' so named from its rapacity. *Ulcus Tuberculo'sum*, *Cancer lupus*, *Nolimita'gere*. Tubercular excrescences, with ragged, spreading ulcerations, chiefly about the *alæ nasi*, where they destroy the skin, &c. for some depth. Sometimes they appear in the cheek circularly, or in the shape of a sort of ring-worm, destroying the substance and leaving a deep and deformed cicatrix. The knife or caustic should be used to separate the sound from the morbid parts. Arsenic has been given internally with advantage.

LUPUS CANCRO'SUS, Cancer—*L. Vorax*, *Herpes exedens*.

LUSCIOSITAS, Myopia.

LUSCIOSUS, Myops.

LUSCITAS, Strabismus.

LUSCUS, *Borgne*.

LUTE, Lute.

LUTE, *Lutum*, *Camentum*, *Mud*. (F.) *Lut*. A composition employed either for closing apertures in a pharmaceutical instrument, or for covering the surface of retorts, tubes, &c. which

have to support a great degree of heat. Lutes are composed differently, according to the object to be accomplished. Commonly they are made of linseed meal and starch. The *fat lute* is formed of clay and drying oil. Sometimes, the white of egg and lime are used; and that which is employed for covering vessels, intended to be strongly heated, is made of clay, sifted sand, and water.

LUTEUS, Yellow.

LUTRON, *λουτρον*. A bath. Also, an ophthalmic medicine.—Galen.

LUX, Light.

LUXA'TION, *Elaxa'tion*, from *luxa're*, 'to put out of place.' *Disloc'a'tion*, *Olisth'e'ma*, *Apoped'asis*, *Luxa'tio*, *Disloc'a'tio*, *Ec'clisis*, *Strem'ma*, *Luxatu'ra*, *Ectop'ia*, *Egypto'sis*, *Elop'sus*, *Lygis'mus*, *Emo'tio*, *Ec'stasis*, *Ezarthr'e'ma*, *Ezarthro'ma*, *Ezarthr'e'ma luxa'tio*, *Ezarthro'sis*, *Deloc'a'tio*, *Ezarticula'tio*, (F.) *Luxation*, *Dislocation*, *Debo'tement*. A displacement of a part from its proper situation. A putting out of joint. A displacement of two or more bones, whose articular surfaces have lost, wholly or in part, their natural connexion; either owing to external violence, (*accidental luxation*,) or to disease of some of the parts about the joint (*spontaneous luxation*.)

Luxation is *complete*, when the bones have entirely lost their natural connexion; *incomplete*, when they partly preserve it; and *compound*, when a wound communicates with the luxated joint.

The general indications of treatment, are:—1. To reduce the protruded bone to its original place. 2. To retain it *in situ*. 3. To obviate any attendant or consequent symptoms.

To reduce requires extension, counter-extension, and coaptation.

LUXEUL, MINERAL WATERS OF. Saline waters, at the town of Luxeuil, at the foot of the Vosges, in the department of Haute Saône. Five springs are thermal, and two cold. They seem to contain carbonic acid, carbonates of iron and lime, and muriate of soda; and are employed as aperient, tonic, and stimulant.

LYCANCHÈ, *λυκαγκη*, from *λυκος*, 'a wolf,' and *αγχο*, 'I strangle.' *Wolf quinsy*, *Wolf choak*;—as *Cynanche* means *Dog choak*. See *Lycoides*.

LYCANTHRO'PIA, from *λυκος*, 'a wolf,' and *ανθρωπος*, 'a man': *Lupa'on*, *Insa'nia lupi'na*. A variety of melancholy, in which the person believes himself to be changed into a wolf, and imitates the voice and habits of that animal.

LYCAON, Lycanthropia.

LYCHNIS SYLVESTRIS, Saponaria.

LYCOIDES, *Lycodes*, from *λυκος*, 'a wolf,' and *ειδος*, 'form.' *Lupo sint'ulis*. An epithet for a species of cynanche, absurdly attributed to excessive retention of sperm in its reservoirs, and its passage into the blood. (?)

LYCOPERDON, from *λυκος*, 'a wolf,' and *περδων*, 'I break wind.' *L. Bovis'ta*, *Crep'itus Lupi*, *Puff-ball*, *Bull Fists*, *Mol'lipuffs*, *Bovis'ta*, (F.) *Vesseloup*. The puff-ball dries into a very fine, light, brownish dust, which is sometimes used as a mechanical styptic to arrest hemorrhage.

LYCOPERDON TUBER, *Tuber, Truffle, Agriocastunum, Trubs, Tuber cibarium, T. Gulosorum, Tubera Terræ, (F.) Truffe*. A fleshy, firm body, unknown in its mode of reproduction, which is found under ground, especially in different parts of France, Italy, &c., and is much esteemed as an aliment. It seems to belong to the Champignons, and has a particular perfume. Aphrodisiac virtues have been ascribed to it.

LYCOPODIUM, *L. Clavatum, Cingularia, Muscus clavatus, Club-moss, Wolf's-claw*. This is the largest of the European mosses. The dust, which fills the capsules of its spikes, is very inflammable, and hence has been called *Vegetable Sulphur*;—and, also, *Fari'na seu Pulvis seu Semen seu Sulphur Lycopodii*. It is used in France to roll pills and boluses in: and in Medicine, as a desiccative, in the excoriations to which infants are liable. It is collected chiefly in Switzerland and Germany for commerce.

LYCOPODIUM SELA'GO, *Muscus erectus, Upright Club-moss, Fir Club-moss, Upright Firmoss*. The decoction of this plant acts violently as an emetic and purgative; and was formerly, on this account, used as an abortive. It is also employed to kill vermin.

LYCOREXIS, *Fames Lupina*.

LYCOSA TARENTULA. See Tarantula.

LYGISMUS, *Luxation*.

LYGMUS, *Singultus*.

LYING-IN STATE, *Parturient state*.

LYMPH, *Lympha, from λυμη, 'water,' by changing ν into λ. White Blood, Lympha Nutritia*. A name given to the fluid, contained in the lymphatic vessels and thoracic duct of animals, which have been made to fast for 24 hours.

According to Chevreul, the lymph of the dog contains water, fibrine, albumen, common salt, subcarbonate of soda, phosphates of lime and magnesia, and carbonate of lime. The properties and composition of lymph vary considerably, according to the part whence the lymphatic vessels obtain it. Generally, it is under the form of a transparent, slightly alkaline fluid, sometimes of a madder-red or yellowish colour,—of a spermatc odour, and saline taste; soluble in water,—the solution becoming turbid, when mixed with alcohol. When left to itself, it coagulates. The clot or solid portion becomes of a scarlet red, if put in contact with oxygen; and of a purple red, if placed in carbonic acid.

The lymph is probably the product of internal absorption in different parts of the body; it then flows along the lymphatic vessels, uniting with the chyle, and is poured with it into the veins; thus becoming one of the materials of the blood. According to others, the blood, when it reaches the arterial radicles, is divided into two portions,—the one red, which is carried to the heart,—the other serous or white, which is absorbed by the lymphatic vessels, and constitutes the lymph. By others, again, the lymphatics are considered to be the vessels of return for the white blood sent to certain tissues.

LYMPHA MUCULENTA NARIUM, *Nasal mucus*—1. Nutritia, Lymph—1. Pancreatis, see Pancreas—1. Plastica, Fibrine.

LYMPHADENITIS: from *lympa, 'lymph,' and adenitis*; inflammation of a gland. Inflammation of a lymphatic gland or ganglion.

LYMPHÆDUCTUS, *Lymphatic vessels*.

LYMPHANGELITIS, *Angeioleucitis*.

LYMPHANGIA, *Lymphatic vessels*.

LYMPHANGIOL'OGY, from *Lymphangeon*, 'a lymphatic,' and *λογος, 'a description.'* A treatise on the lymphatics.

LYMPHATIC, *Lymphaticus, Roriferus*. That which relates to lymph.

LYMPHATIC HEARTS. The frog and several other animals are provided with large receptacles for the lymph immediately underneath the skin, which exhibit distinct and regular pulsations like the sanguiferous heart. Their use appears to be—to propel the lymph.

The LYMPHATIC SYSTEM is that particular system of organs, which is inservient to the formation and circulation of lymph. These organs are:

1. The LYMPHATIC GANGLIONS or GLANDS. See Ganglions.

2. The LYMPHATIC VESSELS, *Lymphæductus, Lymphangi'a, Lymphange'a, Venæ lymphaticæ, Ductus sero'si, and Vasa lymphatica*. These are very numerous. Arising at the surface of membranes and of the tissue of the organs, they carry into the veins the lymph from those parts. Lymphatic vessels are found in every part of the body. Wherever they are met with, however, they form two orders,—one *superficial*, the other *deep-seated*;—the two orders frequently communicating with each other.

Lymphatic vessels are generally smaller than arteries and veins. They are very thin, diaphanous, and cylindrical; but they present, here and there, more or less considerable dilata-tions, caused by valves in their interior. They are slightly tortuous in their course: their anastomoses are very numerous, and they often cross each other, forming successive plexuses. Of the arrangement of the extreme radicles we are ignorant. All the branches, before joining the principal trunks, pass through lymphatic ganglions, in which they are convoluted, or subdivide almost ad infinitum.

They are formed of an outer cellular membrane and an internal coat, similar to that of the veins: of the latter, the valves are formed. All the lymphatics of the body ultimately discharge themselves into the subclavian and internal jugular veins. Two of these trunks are considerably larger than the others: the *thoracic duct*, (q. v.) and the great trunk of the right side,—(F.) *La grand veine lymphatique droite*. The former receives the lymphatics of the abdomen, of the lower extremities, the left side of the thorax, the left upper extremity, and the corresponding side of the head and neck:—the latter receives those of the right upper extremity, and of the right side of the head, neck and thorax.

LYMPHE DE COTUGNO, *Cotunnus, li- quor of*.

LYMPHÆURYS'MA, from *lympa, 'lymph,' and ουρρω, 'I dilate.'* Morbid dilatation of a lymphatic vessel.

LYMPHIZATION. A term used to signify effusion of coagulable lymph. Gross.

LYMPHOCHÉ'ZIA, from *lympa, 'lymph,' and χεζω, 'I go to stool.'* Serous diarrhœa (q. v.)

LYMPHO'SIS. The preparation or elaboration of lymph.

**LYMPHOTOMY**, from *lymp̄ha*, 'lymph,' and *τεμνω*, 'I cut.' Dissection of the lymphatics.

**LYNCH'S EMBROCATION**. An emollient nostrum, formed of *olive oil* impregnated with *bergamot* and other essences, and coloured with *alkannin root*.

**LYNGO'DES**, from *λυγξ*, 'the hiccough.' *Feb̄ris l̄yngodes*. A species of fever, commonly intermittent, of which the hiccough is a prominent symptom.

**LYNN WAHOO**, *Ulinus alata*.

**LYNX**, *Singultus*.

**LYPEMANIA**, *Melancholy*.

**LYPOMA**, *Lipoma*.

**LYRA**, *λυρα*, 'the lyre.' *Psalt̄erium*, *Corpus Psalt̄odes*, *Lyra Da'vidis*. The under surface of the posterior part of the body of the fornix is impressed with numerous transverse and oblique lines, which have been so called from some resemblance they bear to the ancient lyre.

**LYRINGIUM**, *Eryngium campestre*.

**LYSIMACHIA NUMMULARIA**, *Creeping Loose Strife*, *Money Wort*, *Nummularia*, *Hirundinaria*, *Centimorbia*. (F) *Herbe aux ecus*. This plant was formerly accounted vulnerary. It has been considered to possess antiscorbutic and astringent qualities, and has been used in leucorrhœa.

**LYSIMACHIA PURPUREA**, *Lythrum salicaria*.

**LYSIS**, *λυσις*. Solution, (q. v.) a common suffix; also, a name given to crises, which are operated insensibly; that is, gradually and without *critical symptoms*.

**LYSSA CANINA**, *Hydrophobia*.

**LYSSODEC'TUS**, from *λυσσα*, 'canine madness,' and *δαινοι*, 'I bite.' *Hydrophobus*—*Cane rabido morsus*. One who has been bitten by a mad dog, or is actually labouring under hydrophobia.

**LYTE'RIOS**, *λυτηριος*, 'solving.' An epithet given to those signs which announce the solution of a very violent disease.

**LYTHRUM SALICARIA**, *Lysimachia purpurea*, *Salicaria*:—the *Common or Purple Willow Herb*. The herb, root, and flowers possess a considerable degree of astringency, and are used, occasionally, in the cure of diarrhœa and dysentery, leucorrhœa, hæmoptysis, &c.

**LYTTA VESICATORIA**, *Cantharis*.

**LYTTA RUBIGES**. A variety of *Lytta*, peculiar to Chili, which is more active as a vesicant than the *Cantharis*, or the *Lytta* just described.

**LYTTA VITTA'TA**, *Cantharis vittata*, *Potato Fly*. (F) *Cantharide tachete*. Four species of melec, that blister, are found in the United States. The *lytta vittata* feeds principally upon the potato plant, and, at the proper season of the year, may be collected in immense number.

The potato fly resembles the cantharides in every property, and is fully equal to them.

## M.

**M**. This letter signifies, in prescriptions, *manipulus*, 'a handful.' Also, *misc̄e*, 'mix.' See Abbreviation.

**MACAPATI**, *Smilax sarsaparilla*.

**MACARONI**. An alimentary paste, moulded of a cylindrical shape, and formed of rice or wheaten flour. It is eaten—when boiled—in soup, prepared with cheese, &c.

Also, a name formerly given to a pulverulent compound of sugar and glass of antimony, carried into France by the Italian monks, and employed at the hospital *La Charité*, in the treatment of painters' colic.

**MACEDONISUM**, *Smyrniolum olusatrum*.

**MACERATION**, *Maceratio*, from *mac̄ero*, 'I soften by water.' An operation, which consists in infusing, usually without heat, a solid substance in a liquid, so as to extract its virtues.

**MACERONA**, *Smyrniolum olusatrum*.

**MACHÆRA**, *Culter*. Knife, Penis.

**MACHÆRIDION**, *Machæridion*.

**MACHÆRIDION**, *Machæris*, *Machæridion*, *Gladius*, a knife, (q. v.) An amputating knife. Rufus of Ephesus asserts, that the Aruspices gave this name to a part of the liver of animals.

**MACHÆRIS**, Knife.

**MACHAONIA ARS**, *Medicinc*. The *Healing Art*:—so called after Machaon, the son of Æsculapius.

**MACHINAL**, *Mechanicus*. This epithet is added, especially by French writers, to the word *movement*, to express that the will takes no part in it.

**MACHINE**, *Machina*, *Machinamentum*, *Mechanē*, *Mechanēma*. A more or less compound instrument, used in physics and chymistry to put a body in motion, or to produce any action whatever. Physiologists, sometimes, use it for the *animal body*;—as the *machine or animal machine*.

**MACHLOSYNE**, *Nymphomania*.

**MACHOIRE**, Maxillary bone—*m. Diacranicne*, Maxillary bone, lower—*m. Syncranicne*, Maxillary bone, superior.

**MACIES**, Atrophy, Emaciation.

**MACRAUCHEN**, from *μακρος*, 'long,' and *αχις*, 'the neck.' *Longo collo prad'itus*.—One who has a long neck.—Galen.

**MACRE FLOTTANTE**, *Trapa natans*.

**MACRITUDO**, Emaciation.

**MACROBIOSIS**, Longevity.

**MACROBIOTIC**, *Macrobioticus*, *longævus*, from *μακρος*, 'great,' 'long,' and *βιος*, 'life.' That which lives a long time. The *macrobiotic art* is the art of living a long time.

**MACROCEPHALUS**, from *μακρος*, 'great,' 'long,' and *κεφαλη*, 'head.' *Qui magnam habet caput*, 'One who has a large head.' This epithet is given to children born with heads so large, that they seem to be hydrocephalic; but in which the unusual development is owing to a large size of the brain. Such are supposed to be more than ordinarily liable to convulsions. (?) The term has also been applied, by Hippocrates, to certain Asiatics who had long heads.

MACROGLOSSUS, from μακρός, 'large,' and γλῶσσα, 'tongue.' One who has a very large tongue. The condition is termed *macroglōssia*.

MACRONOSIÆ, Chronic diseases.

MACROPHYSOCEPHALUS, from μακρός, 'long,' φυσία, 'air,' and κεφαλή, 'head.' A word used by Ambrose Paré to designate an augmentation of the head of the fœtus, produced by a sort of emphysema, which retards delivery.

MACROPIPER, Piper longum.

MACROPNEÛA, from μακρός, 'long,' and πνέω, 'I breathe.' A long or slow respiration. *Macropneus*, *macropneosis*, for one who breathes slowly, is met with in some authors.—Hippocr.

MACROR, Emaciation.

MACROS, Long.

MACROSCELES, *Crura longa habens*; from μακρός, 'long,' and σκέλος, 'the leg.' One who has long legs.

MACROSIÆ, Chronic diseases.

MACROTRYS RACEMOSA. See *Actæa racemosa*.

MACÛLA. A spot. *Dyschroa*, *Celis*, *ζέλις*, (F.) *Tactæ*. A permanent discoloration of some portion of the skin, often with a change of its texture. *Ephelis*, *Nævus*, *Spilus*, &c., belong to the *Maculæ*.

MACULA, Molecule—m. *Corneæ*, *Caligo*—m. *Corneæ arcuata*, *Gerotoxon*—m. *Hepatica*, *Chloasma materna*, *Nævus*—m. *Matricis*, *Nævus*—m. *Solaris*, *Ephelides*.

MADAR, Mudar.

MADAROSIS, from μάδος, 'bald.' *Madarōna*, *Made'sis*, *Deplumatio*, *Milphæ*, *Milphosis*, *Ptilōsis*, *Calvities*, (q. v.) Loss of the hair, particularly of the eyelashes.

MADDER, DYERS', Rubia.

MADELEON, Bdellium.

MADESIS, Depilation, Madarosis.

MADISIS, Depilation.

MADISTERIUM, *Madistērion*, *Tricholumin*, 'tweezers,' *Volsel'ia*. An instrument for extracting hairs from the skin.

MADNESS, CANINE, Hydrophobia—m.

Raving or furious, Mania.

MADOR, Moisture.

MADREPORA OCULATA. See Coral.

MAEA, Midwife.

MAEIA, Obstetrics.

MAEIA, Obstetrics.

MAÛTRIA, Midwife.

MAGDA'LIA, *Magda'leon*, *Magdaleo*, *Magdalis*, from μαγδαλία, 'a cylinder.' Any medicine rolled into the form of a cylinder; and particularly plasters.

MAGEIRICE, Culinary art.

MAGGOT PIMPLE. See Acne.

MAGIS, μαγίς, 'a cake.' A sort of cake, composed of cloves of garlic and cheese beaten together.—Hippocr.

MAGISTERIUM SULPHURIS, Sulphur lotum—m. *Tartari purgans*, *Potassæ acetat*.

MAG'ISTERIUM, *Magistērimum*, from *magister*, 'a master.' Certain precipitates, from saline solutions, were formerly so called; as well as other medicines, the preparation of which was kept secret.

MAG'ISTRAL, *Magistralis*, *Extemporaneus*. Medicines are so called which are prepared extemporaneously. *Officinal*, are such as have

been prepared for some time before they are prescribed.

MAGISTRANTIA, Imperatoria.

MAGMA, (F.) *Marc*, from μαδδω, 'I pound,' 'I express.' The thick residuum, obtained after expressing certain substances to extract the fluid parts from them. Also, the grounds which remain after treating a substance with water, alcohol, or any other menstruum.

The *Marc of Olives* is the residuum after the greatest possible quantity of oil has been extracted from olives by making them ferment. It was formerly employed as a stimulant, under the form of a *bath*—to which the name *Boin de Marc* was given by the French.

The *Marc of Grapes*, *Brytia*, was once employed for the same purposes.

MAGNES, Magnet.

MAGNES ARSENICALIS, (*Sulphur, white arsenic*, and *common antimony*, of each equal parts. Mix by fusion.) It is corrosive. See *Magnetic Plaster*.

MAGNES EPILEPSIÆ, Hydrargyri sulphuretum rubrum.

MAGNE'SIA, *Abar'nohas*, *Chambar*, from *magnes*, 'the magnet;' because it was supposed to have the power of attracting substances from the air.

MAGNESIA AERATA, *Magnesia carbonas*—m. *Alba*, *M. carbonas*—m. *Calcinata*, *M. usta*—m. *Edinburgensis*, *Magnesia carbonas*—m. *Henry's*, *Magnesia carbonas*—m. *Mitis*, *Magnesia carbonas*—m. *Nigra*, *Manganese*, black oxide of—m. *Salis amari*, *Magnesia carbonas*—m. *Salis Ebsdemensis*, *Magnesia carbonas*—m. *Saturni*, *Antimonium*—m. *Vitriolata*, *Magnesia sulphas*—m. and *Soda*, sulphate of, see *Soda*, sulphate of.

MAGNESIA OPAL'INA. A name given by Lémery to a mixture of equal parts of *antimony*, *nitrate of potass*, and *mariate of soda*, (decrepitated.) It has emetic properties, but is not used.

MAGNESIA USTA, *Magnesia calcinata*, *Calcined Magnesia*, *Oxide of magnesium*. (F.) *Magnésie brûlée*, *Magnésie*, *M. Caustique*. This is obtained by exposing carbonate of magnesia to a strong heat. It is inodorous; taste very slightly bitter; in the form of a white, light, spongy, soft powder. S. g. 2.3; requiring 2000 times its weight of water for its solution. It is antacid, and laxative when it meets with acid in the stomach. Dose, gr. x to ʒj in water or milk.

MAGNESIÆ CAR' BONAS, *M. Subcarbonas*, *Magnesia*, (Dublin.) *M. aëra'ta*, *M. carbon'ica*, *M. alba*, *Subcarbonate of Magnesia*, *Henry's Magnesia*, *M. Subcarbon'ica*, *M. Mitis*, *M. Edinburgensis*, *M. Salis Ebshamensis*, *M. Salis amari*, *Carbonas magnes'icum*, *Lac terræ*, *Hypocarbonas magnes'icæ*, *Terra and'ra*, *T. amara aëra'ta*, *T. obsorbens mineral'is*, *T. Talco'su oxyanthracodes*. (F.) *Sous-carbonate de Magnésie*, *Magnésie aërée*, *M. blanche*, *M. crayeuse*, *M. douce*, *M. effervescente*, *M. Moyenne*, *Poudre de Scintelli*, *P. de Valentini*, *P. du Comte de Palme*. Prepared from sulphate of magnesia by subcarbonate of potass. It is inodorous; insipid; light; white; spongy; opaque; effervescing with acids; insoluble in water. Properties the same as the last. But the carbonic acid,

when set free, sometimes causes unpleasant distention.

**MAGNESIÆ HYPOCARBONAS**, *M. carbonas*—*m. Subcarbonas*, *M. carbonas*—*m. Vitriolicuin*, *Magnesiæ sulphas*.

**MAGNESIÆ SULPHAS**, *Sulphas Magnesiæ purificata*, *Magnesiæ vitriolata*, *Sal catharticus amarus*, *Sal catharticum amarum*, *Salamidrum*, *S. Anglicanum*, *Sulphate of Magnesia*, *Sal Epsomensis*, *Sal catharticus Anglicanus*, *Sal Sedlicen'sis*, *Sal Ebsdamen'sē*, *S. Seydschutzen'sē*, *Terra amara sulphurica*, *Vitriolicuin Magnesiæ*, *Epsom Salt*, *Bitter purging Salt*. (F.) *Sel admirable de Lemery*, *Sel d'Egra*. Generally obtained from sea water. Its taste is bitter and disagreeable. It is soluble in an equal quantity of water at 60°. It is purgative and diuretic. Dose, as a cathartic, ℞ss to ʒij.

**MAGNÉSIE AERÉE**, *Magnesiæ carbonas*—*m. Blanche*, *Magnesiæ carbonas*—*m. Brulée*, *Magnesiæ usta*—*m. Caustique*, *Magnesiæ usta*—*m. Crayeuse*, *Magnesiæ carbonas*—*m. Douce*, *Magnesiæ carbonas*—*m. Effervescente*, *Magnesiæ carbonas*—*m. Moyenne*, *Magnesiæ carbonas*.

**MAGNESIUM, OXIDE OF**, *Magnesiæ usta*.

**MAGNET**, *Magnes*, *Lapis heracleus*, *L. Syderitis*, *L. nauticus*, *Magnitis*, so called from *Magnes*, its discoverer. (F.) *Aimant*. The magnet or loadstone. An amorphous, oxydulated ore of iron, which exerts an attraction on unmagnetized iron, and has the property of exhibiting poles; that is, of pointing by one of its extremities to the north. This ore, by constant or long rubbing, communicates its properties to iron, and thus artificial magnets are formed. Magnetic ore is found in many countries, and particularly in the island of Elba.

The magnet is sometimes used to extract spicula of iron from the eye or from wounds. It has been employed as an antispasmodic; but acts only through the imagination. The powder has been given as a tonic. In *Pharmacy*, it is used to purify iron filings. It attracts the iron, and the impurities remain behind. It formerly entered, as an ingredient, into several plasters, to draw bullets and heads of arrows from the body—as the *Emplastrum divinum Nicolai*, the *Emplastrum nigrum of Augsburg*, the *Opodeldach*, and *Attractivum of Paracelsus*, &c.

**MAGNETIC**, *Magneticus*, from μαγνης, 'the magnet.' That which belongs or relates to magnetism;—mineral or animal.

**MAGNETIC FLUID**. A name given to the imponderable fluid to which the magnet owes its virtues. By analogy, it is applied to a particular principle, supposed to be the source of organic actions; which affects, it is conceived, the nervous system principally, and is susceptible of being transmitted from one living body to another, by contact or simple approximation, and especially under the influence of fixed volition. See *Magnetism*, *Animal*.

**MAGNETIC PLASTER**. A plaster, at present, not used. It had for its base a mixture, called *Magnes arsenicalis*; formed of equal parts of antimony, sulphur, and arsenic melted together in a glass cucurbit.

The name **MAGNETIC PLASTERS** was, likewise, given to such as contained powdered magnet.

**MAGNETINUS**, *Potassæ supertartras impurus*.

**MAGNETISM, ANIMAL**, *Mesmerism*, *Neurogama*, *Biogama*, *Biomagnetismus*, *Zoomagnetismus*, *Exoneurism*, (proposed by Mr. H. Mayo.) *Tellurismus*. Properties attributed to the influence of a particular principle, which has been compared to that which characterizes the magnet. It is supposed to be transmitted from one person to another, and to impress peculiar modifications on organic action, especially on that of the nerves. The discussions, to which this strange belief has given rise, are by no means terminated. There is no evidence whatever of the existence of such a fluid. Highly impressible persons can be thrown into a kind of hysterical sleep and somnambulism, but farther than this, the efforts of the magnetizer cannot reach. It is a mode of action upon the nerves through the medium of the senses.

**MAGNETIS**, Magnet.

**MAGNOC**, *Jatropha manihot*.

**MAGNOLIA GLAUCA**, *Small Magnolia*, *Magnolia*, *Swamp Sas'safras*, *Elk Bark*, *Indian Bark*, *White Laurel*, *Sweet Bay*, *Beaver Wood*, *White Bay*, *Cinchona of Virginia*. The bark is possessed of tonic properties, resembling those of cascarilla, canella, &c. The same may be said of the *Magnolia tripetala* or *Umbrella tree*; the *M. acuminata* or *Cucumber tree*, and the *M. grandiflora*.

**MAGNUM DEI DONUM**, *Cinchona*.

**MAGNUM, OS**. The third bone of the lower row of the carpus; reckoning from the thumb. It is the largest bone of the carpus; and is, also, called *Os capitatum*. (F.) *Grand Os*.

**MAHMOUDY**, *Convolvulus scammonia*.

**MAHOGAN FEBRIFUGE**, *Swietenia febrifuga*.

**MAIANTHEMUM**, *Convallaria maialis*.

**MAIDENHAIR**, *Adiantum capillus veneris*—*m. Canada*, *Adiantum pedatum*—*m. Common*, *Asplenium trichomanoides*—*m. Golden*, *Polytrichum*—*m. White*, *Asplenium ruta muraria*.

**MAIEIA**, *Obstetrics*.

**MAIGREUR**, *Emaciation*.

**MAILLET**, *Mail*.

**MAILLOT**, *Swathing clothes*.

**MAIN**, *Manus*.

**MAJORANA**, *Organum majorana*—*m. Syriaca*, *Teucrium marum*.

**MAL D'AMOUR**, *Odontalgia*—*m. des Ardents*, see *Ardent*—*m. d'Aventure*, *Paronychia*—*m. di Breno*, *Scherlievo*—*m. Caduc*, *Epilepsy*.

**MAL DE CRIMÉE**, (F.) *Lèpre des Cascaques*, *Lepra Taurica*. A variety of lepra in the Crimea.

**MAL DE DENT**, *Odontalgia*—*m. Divin*, *Epilepsy*—*m. d'Enfant*, *Pains (Labour)*—*m. di Fiume*, *Scherlievo*—*m. Francais*, *Syphilis*—*m. de Gorge*, *Cynanche*—*m. de Machoiré*, *Trismus*—*m. De Mer*, *Nausea marina*—*m. de Mère*, *Hysteria*—*m. de Misère*, *Pellagra*—*m. de Naples*, *Syphilis*—*m. Rouge de Cayenne*, *Elephantiasis of Cayenne*—*m. Saint Antoine*, *Erysipelas*—*m. Saint Jean*, *Epilepsy*—*m. Saint Main*, *Lepra*, *Psora*—*m. di Scherlievo*, *Scherlievo*—*m. de Siam*, *Fever*, *yellow*.

**MAL DE SAN LAZARO**, *Corobay*. A leprous

disease common in Columbia, S. America, and said to be cured by the Cuichunchulli.

MAL DEL SOLÉ, Pellagra—*m. de Terre*, Epilepsy—*m. à Tete*, Cephalalgia.

MALA, Gena—*m. Aurea*, see *Citrus aurantium*.

MALABATHRINUM. Ancient name of an ointment and a wine, into which the *malabathrum* entered.

MALABATHRUM, *Cadeji-Indi*. The leaves of a tree of the East Indies. These leaves entered into the theriac, mithridate, and other ancient electuaries. They are believed to be from a species of laurel—the *Laurus Cassia*; but, according to others, from the *Laurus Malabathrum*. The *Oleum Malabathri* is obtained from it.

MALACCÆ RADIX, *Sagittarium alexipharmacum*.

MALACIA, from *μαλαξια*, 'softness.' A depravation of taste, in which an almost universal loathing is combined with an exclusive longing for some particular article of food. If the patient desires substances that are not eatable or noxious, it constitutes *Pica*, *Piso'sis*, *Pitto'sis*, *Heterorexia*, *Cissa*, *Citosis*, *Depra'ced appetite*, *Citta*, *Limo'sis Pica*, *Allotriophagia*, *Pella'cia*, *Picacis'mus*, *Pica'tio*. (F.) *Envie*. These symptoms accompany several nervous affections,—those of females in particular. In pregnancy it is common; and is termed *Longing*.

MALACISMUS, Mollities.

MALACORIUM. See *Punica granatum*.

MALACOSAR'COS, from *μαλακος*, 'soft,' and *σαρξ*, 'flesh.' One of a soft constitution: *hab'itu cor'poris molli'ri præd'itus*.—Galen.

MALACOSIS CEREBRI, Mollities cerebri—*m. Uteri*, *Hysteromalacia*.

MALACOSTEON, Mollities ossium.

MALACTICA, Emollients.

MALACTICUM, Relaxant.

MALADE, Sick.

MALADIE, Disease—*m. Anglaise*, *Hypochondriasis*—*m. Bleue*, *Cyanopathy*—*m. de Bright*, *Kidney*, *Bright's disease of the*—*m. Glandulaire*, *Elephantiasis Arabica*—*m. Imaginaire*, *Hypochondriasis*—*m. imoginaire*, *Hysteria*—*m. Noire*, *Melena*—*m. du Pays*, *Nostalgia*—*m. Pédiculaire*, *Phtheiriasis*—*m. de Pot*, *Vertebral disease*—*m. Vénérienne*, *Syphilis*—*m. de Vénus*, *Syphilis*.

MALADIES ANNUELLES, Annual diseases—*m. Chroniques*, *Chronic diseases*—*m. Connées*, *Connate diseases*—*m. Dissimulés*, *Feigned diseases*—*m. Externes*, *External diseases*—*m. Feintes*, *Feigned diseases*—*m. Innées*, *Innate diseases*—*m. Nerveuses*, *Nervous diseases*—*m. Simulés*, *Feigned diseases*—*m. Supposées*, *Feigned diseases*—*m. Venteuses*, *Pneumatosis*.

MALADIE, Sickly.

MALADRERIE, Ladrerie.

MALADY, ENGLISH, *Hypochondriasis*.

MALÆ, OS, from *malum*, 'an apple;' so called from its roundness. *Os Jugal'e*, *Os Jugamentum*, *Os Génæ*, *Zygo'ma*, *Os Zygomaticum*, (F.) *Os Malaire*, *Os Zygomaticque*, *Os de la pommette*. The check or malar bone. This bone is situate at the lateral and superior part of the face; and constitutes the zygomatic region or region of the cheek. It is irregularly quadrilateral. Its outer surface is convex, covered by muscles

and skin, and pierced with canals, called *malar*, through which vessels and nerves pass. Its upper surface is concave, and forms part of the orbit. Its posterior surface is concave, and enters into the composition of the temporal fossa. This bone is thick and cellular. It is articulated with the frontal, temporal, sphenoid, and superior maxillary bones, and is developed by a single point of ossification.

The part of the face rendered prominent by this bone, the French call *Pommette*.

MALAG'MA, from *μαλασσω*, 'I soften.' An emollient cataplasm, and, in general, every local application which enjoys the property of softening organic tissues.

MALÅISE, Indisposition.

MALANDRIA. A species of lepra or elephantiasis.—*Marcellus Empiricus*.

MALANDRIO'SUS, *Leprous*. Affected with a species of lepra.

MALAR PROCESS, *Zygomatic process*.

To MALAXATE, *Moll'ere*, *Subig'ere*, *Malacissare*, (F.) *Malaxer*, from *μαλασσω*, 'I soften,' and *μαλασσω*. To produce the softening of drugs, by kneading them.

MALAZISSA'TUS, one in whom the testicles have not descended. It has, also, been used synonymously with *emasculatus*, and *mulieratus*.—*Castelli*.

MALE, *Mas'culus*. Of the sex that begets young. Not female. What belongs to the male sex; as the *male organs of generation*.

MALE, Axilla—*m. Organ*, *Penis*.

MALIASMOS, Malis.

MALICHORIUM. See *Punica granatum*.

MALICORIUM. See *Punica granatum*.

MALIG'NANT, *Malignus*, (F.) *Malin*. A term applied to any disease whose symptoms are so aggravated as to threaten the destruction of the patient. A disease of a very serious character, although it may be mild in appearance;—*Morbis malignus*.

MALIN, Malignant.

MALING'ERER. A simulator of disease, is so termed in the British military service.

MALIS, *Maliasmos*, *Co'e'ya*, *Cuta'neous vermin'dion*. The cuticle or skin infested with animalcules,—*Phthiriasis*, *Parasitis'mus superfieci*. In Persia, this affection is produced by the Guinea Worm; in South America, by the Chigre; and in Europe, occasionally by the Louse. See *Phtheiriasis*.

MALIS DRACUNCULUS, *Dracunculus*—*m. Gordii*, *Dracunculus*—*m. Pediculi*, *Phtheiriasis*.

MALLEOLAR, *Malleolaris*, from *Malleolus*, 'the ankle.' Belonging or relating to the ankles.

THE MALLEOLAR ARTERIES are two branches, furnished by the anterior tibial about the instep; the one—the *internal*—passes transversely behind the tendon of the tibialis anticus to be distributed in the vicinity of the malleolus internus:—the other—the *external*—glides behind the tendons of the *extensor communis digitorum pedis* and the *peroneus brevis*, and sends its branches to the parts, which surround the outer ankle, as well as to the outer region of the tarsus.

MALLEOLUS. Diminutive of *malleus*, 'a mallet, (q. v.) or hammer.' *Rasceta*, *Raste'ta*, *Sphyra*, *Tulus*, *Dial'ebos*; the Ankle. (F.) *Mal-*

*léole, Cheville du Pied.* The two projections formed by the bones of the leg at their inferior part. The *inner* belongs to the tibia: the *outer* to the fibula. The ankles afford attachment to ligaments, and each has a sort of gutter, in which certain tendons slide. See *Malleus*.

**MALLET**, *Malleolus*, (F.) *Maillet*. A kind of hammer, used, with a gouge, for removing or cutting bones, in certain surgical and anatomical operations.

**MAL'LEUS**, *Malleolus*, *Ossiculum Malleolæ assimilatum*, (F.) *Marteau*. The longest and outermost of the four small bones of the ear. It is situate at the outer part of the tympanum, and is united to the *membrana tympani*. It has, 1. An ovoid head, which is articulated, behind, with the incus, and is supported by a narrow part called the neck; this has, anteriorly, a *long apophysis*, which is engaged in the glenoid fissure, and is called the *Apophysis of Rau*, and *Processus gracilis*. It affords attachment to the *anterior mallei* muscle. 2. A *handle*, which forms an obtuse angle with the neck, and corresponds to the membrane of the tympanum, which it seems to draw inwards. It is furnished at its upper extremity, with a process—the *processus brevis*, to which the *internus mallei* is attached. This bone is developed by a single point of ossification.

**MALLEUS**, SLENDER PROCESS OF THE, *Grêle apophyse du marteau*.

**MALLOW**, COMMON, *Malva*—m. Compound decoction of, Decoction *malvæ* compositum.

**MALO DI SCARLIEVO**, *Schierlievo*.

**MALOGRANATUM**, *Punica granatum*.

**MALPIGHIA MOUREL'LA**, (F.) *Mourel-lier, Sinarouba faux*. The bark of this shrub—a native of Cayenne—is reputed to be febrifuge, and useful in diarrhœa.

**MALT**, Sax. *mealt*, Dutch *mout*, Teut. *malz*; from *μαλαττω*, 'I soften, *Mallum*, *Brasium*, (F.) *Driche*. Barley made to germinate, for the purpose of forming beer. It has been recommended in medicine, as antiscorbutic, antiscrofulous, &c.

**MALT SPIRIT**. A spirit distilled from malt. It is the basis of most of the spirituous cordials.

**MALTHA**, *Malthæ*, from *μαλατω*, 'I soften.' Wax, particularly a soft wax.

**MALTHACTICA**, Emollients.

**MALUM CANUM**. See *Pyrus cydonia*—m. Coense, *Averrhoa carambola*—m. *Cotonæum*, see *Pyrus cydonia*—m. *Hypochondriacum*, *Hypochondriasis*—m. *Hystericum*, *Hysteria*—m. *Insanum*, see *Solanum melongena*—m. *Ischiadicum*, *Neuralgia femora-poplitea*—m. *Lazari*, *Elephantiasis*.

**MALUM MORTUUM**. A species of lepra, in which the affected portions of skin seem to be struck with death.

**MALUM VENEREUM**, Syphilis.

**MALUS AURANTIA MAJOR**, *Citrus aurantium*.

**MALUS INDICA**, *Bilambi biting-bing* of Bon-tius. The juice of this East India tree is cooling, and drunk as a cure for fevers. The leaves, boiled and made into a cataplasm with rice, are famed in all sorts of tumours. The juice, mixed with arrack, is drunk for the cure of diarrhœa. The ripe fruit is eaten as a deli-

caey; and the unripe is made into a pickle for the use of the table.

**MALUS LIMONIA ACIDA**, see *Citrus medica*—m. *Medica*, see *Citrus medica*.

**MALVA**, *Malva sylvestris*, *Mulguris*, *Common Mallow*, (F.) *Mauve sauvage*. The leaves and flowers are chiefly used in fomentations, cataplasms, and emollient enmata. Its properties are demulcent.

The *Malva rotundifolia* has like virtues; as well as the other varieties.

**MALVAVICUM**, *Althæa*.

**MALVERN, WATERS OF**. The village of Great Malvern, in Worcestershire, England, has for many years been celebrated for a spring of remarkable purity, which has acquired the name of the *Holy-well*. It is a simple carbonated water; and is chiefly used externally, in cutaneous affections.

**MAMA-PIAN**. An ulcer of a bad aspect, which is the commencement of the pian; and which, after having destroyed the flesh, extends to the bones. It is also called the *Mother of Pians*;—*La mère des pians*.

**MAMEI**, *Mamee*, *Momin* or *Toddy Tree*. From incisions, made in the branches of this West Indian tree, a copious discharge of pellucid liquor occurs, which is called *momin* or *toddy wine*. It is very diuretic, and is esteemed to be a good antilithic and lithonriptic.

**MAMELLE**, *Mamma*.

**MAMELON**, Nipple.

**MAMELONS DU REIN**, *Papillæ* of the kidney.

**MAMILLA**, Nipple.

**MAMILLARY**, *Mamilla'ris*, from *Mamilla*, 'a small breast, a nipple.'

**MAMILLARY EM'INENCE** is a name given, 1. To more or less marked prominences on the inner surface of the bones of the cranium, which correspond to the anfractuosities of the cranium. 2. To white, round, medullary tubercles, of the size of a pea, situate at the base of the brain, behind the gray substance from which the *Tige pituitaire*, of the French anatomists, arises. These *Mamillary Tubercles*, *Bulbes de la coûte à trois pitiers*, *Corpora albican'tia*, *C. Candican'tia*, *Willis's Glands*, *Tubercules pisiformes*, (Ch.) *Emin'en'tia candican'tes*, *Priorum erurum for'niceis bulbi*, are united to each other by a small grayish band, which corresponds with the third ventricle. They receive the anterior prolongations of the fornix. Some ancient anatomists, taking the nervous trunks, to which Willis first gave the name *olfactory nerves*, for simple appendages of the brain, called them, on account of their shape, *Cruriculæ mamilla'res*. *Vesalius*, *Fallopius*, *Columbus*, and several others, termed them *Processus mamilla'res cerebri ad nares*.

**MAMMA**, *Masthos*, *Mazos*, *Thelæ*, *Tithos*. The female breast, (*Mamilla* being the male breast.) (F.) *Mamelle*. A glandular organ, proper to a class of animals—the *mammalia*—and intended for the secretion of milk. The mamme exist in both sexes, but they acquire a much greater size in the female; especially during pregnancy and lactation. In women, before the age of puberty, the breasts are but little developed. At this period, however, towards the central part of each breast, the skii;

suddenly changes colour and assumes a rosy tint in young females. It is of a reddish brown in women, who have suckled several children. This circle has a rugous appearance, owing to the presence of sebaceous glands, and is called *Arcola* or *Aurcola*. These glands furnish an unctuous fluid for defending the nipple from the action of the saliva of the sucking infant. In the midst of the aureola is the nipple, a conoidal eminence, of a rosy tint, susceptible of erection, and at the surface of which the galactophorous ducts open. Besides the skin, covering them, the breasts are, also, composed of a layer of fatty cellular tissue, more or less thick; of a large gland; excretory ducts; vessels, nerves, &c. See Mammary.

The breasts are called the *bosom*, (F.) *Sein*.

**MAMMARY**, *Mamma'rius*, from *mamma*, 'the breast.' Relating to the breasts.

**MAMMARY ABSCESS**, Mastodynia apostematosa.

The **MAMMARY GLAND** is the secretory organ of the milk. It is situate in the substance of the breast to which it gives shape and size.

The tissue of this gland results from the assemblage of lobes of different size, united intimately by a dense cellular tissue. Each of them is composed of several lobules, formed of round granulations, of a rosy white colour and of the size of a poppy seed. The glandular grains give rise to the radicles of the excretory canals of the mamma, which are called *galactophorous* or *lactiferous*. These excretory vessels unite in ramusculi, rami, and in trunks of greater or less size; collect towards the centre of the gland; are tortuous, very extensible, and semitransparent. All terminate in sinuses, situate near the base of the nipple, and which are commonly from 15 to 18 in number. These sinuses are very short, conical, and united by cellular tissue. From their summits a fasciculus of new ducts sets out, which occupy the centre of the nipple and open separately at its surface. The arteries of the mammary gland come from the thoracic, axillary, intercostal, and internal mammary. The veins accompany the arteries; the nerves are furnished by the intercostals and brachial plexus; the lymphatic vessels are very numerous and form two layers. They communicate with those of the thorax, and pass into the axillary ganglions.

The **MAMMARY ARTERIES** are three in number. They are distinguished into—

1. The *Internal Mammary*, *Art'ria sternalis*, *A. Sous-sternal* (Ch.), *Internal thoracic*. It arises from the subclavian and descends obliquely inwards, from its origin to the cartilage of the third rib. Below the diaphragm it divides into two branches: the one *external*, the other *internal*. From its origin until its bifurcation, it gives branches to the muscles and glands of the neck, to the thymus, mediastinum, pericardium, and œsophagus. In each intercostal space, it gives off *internal* and *external musculo-cutaneous* branches, and also, on each side, the *superior diaphragmatic*. Its two ultimate branches are distributed in the parietes of the abdomen, and anastomose with the external mammary, intercostal, lumbar, circumflexa ilii, and epigastric arteries.

2. The *External Mammary Arteries* are two

in number; and are distinguished into *superior* and *inferior*. The *superior external mammary*, *First of the thoracics* (Ch.), *Superior external thoracic*, *Superior thoracic*, is furnished by the axillary artery. It descends obliquely forwards between the pectoralis major and pectoralis minor, to which it is distributed by a considerable number of branches.

The *inferior external mammary*, the *second of the thoracics* (Ch.), *Long or inferior thoracic*, arises from the axillary artery, a little below the preceding. It descends vertically over the lateral part of the thorax; curves, afterwards, inwards; becomes subcutaneous and divides into a number of branches, which surround the breast. It gives branches to the pectoralis major, serratus major anticus, the intercostal muscles, the glands of the axilla and the integuments of the breast.

**MAMMARY SARCOMA**, *Mastoid sarcoma* of Abernethy, *Emphy'ma sarcoma mammarum*. Tumour, of the colour and texture of the mammary gland; dense and whitish; sometimes softer and brownish; often producing, on extirpation, a malignant ulcer with indurated edges. Found in various parts of the body and limbs.

The **MAMMARY VEINS** follow the same course as the arteries, and have received the same denominations. The *internal mammary vein*, of the right side, opens into the superior cava; that of the left, into the corresponding subclavian vein. The *external mammary veins* open into the axillary vein.

**MAM'MEA AMERICANA**. The systematic name of the tree on which the *mamzee* fruit grows. This fruit has a delightful flavour when ripe; and is much cultivated in Jamaica, where it is generally sold in the markets as one of the best fruits of the island.

**MAMMELLA**, Nipple.

**MAMMIFORMIS**, Mastoid.

**MAMMILLA**, Mamma (male.)

**MAMMILLARIS**, Mastoid.

**MAMOE**, Mamei.

**MANCHE D'HIPPOCRATE**, *Chausse*.

**MANCURANA**, Origanum.

**MANDIBULA**, Maxillary bone.

**MANDRAGORA**, *Atropa mandragora*.

**MANDRAGORITES**, from *μανδραγορα*, the *Atropa mandragora* or mandrake. Wine, in which the roots of mandrake have been infused.

**MANDRAKE**, *Atropa mandragora*, *Podophyllum peltatum*.

**MANDUCATIO**, Mastication.

**MANDUCATORY NERVE**. See Trigemini.

**MANGANESE, BLACK OXIDE OF**, *Tetroxide of manganese*, *Magnesia nigra*, *Manganisium vitriol'rum*, *M. oxydatum nativum seu nigrum*, *Manganisium ochraceum nigrum*, *M. oxydatum nativum*, *Manganisium oxydatum nativum*, *Molybdenum magnesiæ*, *Oxides manganis nativæ*, *Peroxydum manganisii nigrum nativum*, *Superoxydum manganicum*. This oxide is not much used in medicine. It has been advised to dust the affected parts, in tinea capitis, with the powder.

**MANGANESE, TETROXIDE OF**, *M. black oxide of*. **MANGANESH PEROXYDUM NIGRUM NATIVUM**, Manganese, black oxide of.

**MANGANESIUM OCHRACEUM NIGRUM**, Manganese, black oxide of—m. Oxydatum nativum seu nigrum, Manganese, black oxide of—m. Vitrariorum, Manganese, black oxide of.

**MANGANI OXODES NATIVA**, Manganese, black oxide of.

**MANGANICUM SUPEROXYDUM**, Manganese, black oxide of.

**MANGANUM OXYDATUM NATIVUM**, Manganese, black oxide of.

**MANGIFERA INDICA**. The *Mango tree*. (F.) *Mangnier*. A tree, cultivated over Asia and in South America. Mangos, when ripe, are juicy; of a good flavour; and so fragrant as to perfume the air to a considerable distance. They are eaten, either raw or preserved with sugar. From the expressed juice a wine is prepared; and the remainder of the kernel can be reduced to an excellent flour for bread.

**MANGO TREE**, *Mangifera indica*.

**MANGOSTAN**, *Garcinia mangostana*.

**MANGOSTANA**, *Garcinia mangostana*.

**MANGOUSTAN**, *Garcinia mangostana*.

**MANGUIER**, *Mangifera indica*.

**MANIA**, *Favor mania*, (q. v.) *Insania*, *Delirium mani'acum*, *Ephro'nia mania*, *Delirium mania*, *D. fario'sum*, *Mania universalis*, *Vesania mania*, *Raving* or *furious madness*; from *μανωαι*, 'I am furious.' With some, it means *insan'ity*. Disorder of the intellect, in which there is erroneous judgment or hallucination, which impels to acts of fury. If the raving be not directed to a single object, it is mania properly so called; if to one object, it constitutes *monomania*. This term is, however, usually given to melancholia.

Mania attacks adults chiefly; and women more frequently than men. The prognosis is unfavourable. About one-third never recover; and they who do, are apt to relapse.

*Separation* is one of the most effective means of treatment, with attention to the corporeal condition and every thing that can add to the mental comfort of the patient; and turn his thoughts away from the subjects of his delusion.

In the violence of the paroxysms, recourse must be had to the straight waistcoat, the shower bath, &c.

Separation should be continued for some weeks during convalescence, with the view of preventing a relapse.

**MANIA MELANCHOLICA**, Melancholy—m. a Pathemate, Empathema—m. a Potû, Delirium tremens—m. a Temulentia, Delirium tremens.

**MANIACUS**, Maniodes.

**MANICA HIPPOCRATIS**, *Chausse*.

**MANIE SANS DÉLIRE**, Empathema.

**MANIGUETTA**, *Amomum grana Paradisi*.

**MANIBAR**, *Jatropha manihot*.

**MANILUVIUM**, *Manulu'vium*, from *manus*, 'the hand,' and *lavo*, 'I wash.' A bath for the hands. It may be rendered stimulating by means of muriatic acid, mustard, &c.

**MANIOC**, *Jatropha manihot*.

**MANIO'DES**, *Mani'acus*. One labouring under mania, a maniac.

**MANIPULATIO**, from *manus*, 'a hand.' Mode of working in the arts.

**MANIPULUS**, (F.) *Poignée*. The quantity

of a substance capable of filling the hand. A handful. See *Fasciculus*.

**MAN-MIDWIFE**, Accoucheur.

**MANNA**, Briangon, see *Pinus Larix*—m. Calabrina, see *Fraxinus ornus*—m. Metallorum, *Hydrargyri submurias*.

**MANNEQUIN**, Fantom.

**MANŒUVRE** (F.), from *main*, 'the hand,' and *œuvre*, 'work.' *Operatio chirurgica vel obstet'rica*. The practice of surgical or obstetrical operations on the dead body or phantom.

**MANSORIUS**, Buccinator.

**MANSTUPRATIO**, Masturbation.

**MANTIA**, *mantica*, *mantice*, *μαντιαι*, *μαντιαι*, in English, *mancy*; a common suffix, denoting 'divination.'

**MANTILE**, Bandage (body).

**MANTLE**, *Panniculus carnosus*.

**MANUBRIUM**, from *manus*, 'a hand.' The handle of any thing;—as *manubrium mallei*, 'the handle of the malleus.'

**MANUBRIUM**, *Chasse*—m. *Manus*, *Radius*.

**MANULUVIUM**, Bath, hand, *Maniluvium*.

**MANUS**, *Cheir*, (F.) *Main*. The hand. The part, which terminates the upper extremity in man, and which is inservient to prehension and touch. It extends from the fold of the wrist to the extremity of the fingers.

The hand is sustained by a bony skeleton, composed of a number of pieces, movable on each other; of muscles, tendons, cartilages, ligaments, vessels, nerves, &c. It is divided into three parts—the *carpus* or wrist, the *metacarpus*, and *fingers*. Its concave surface is called the *palm*; the convex surface the *back of the hand*. The facility of being able to oppose the thumb to the fingers in order to seize objects forms one of the distinctive characters of the human hand.

**MANUS CHRISTI PERLATA**. A name, anciently given to troches, prepared of pearls and sugar of roses. They were called *Manus Christi simplicis*, when pearls were not employed.

**MANUS DEI**. An ancient plaster, prepared of *wax*, *myrrh*, *frankincense*, *mastic*, *Gum ammoniac*, *Galbanum oil*, &c. See *Opium*.

**MANUS HEPATIS**, *Porta vena*—m. *Jecoris*, *Porta vena*—m. *Parva major adjutrix*, see *Digitus*.

**MANUSTUPRATIO**, Masturbation.

**MANYPLIES**, *Omasum*.

**MAPLE**, *Acer saccharinum*.

**MARAI**, Marsh.

**MARANTA ARUNDINACEA**, Arrow root.

**MARANTA GALAN'GA**, *Amomum galanga*, *Galanga*. The smaller *galan'gal*. Two kinds of galangal are mentioned in the pharmacopœias;—the greater, obtained from the *Kæmpferia galanga*, and the smaller, from the root of the *Muranta galanga*. The dried root is brought from China, in pieces, from one to two inches in length, but scarcely half as thick; branched; full of knots and joints, with several circular rings, of a reddish brown colour, on the outside, and brownish within. It was formerly much used as a warm stomachic bitter; and generally ordered in bitter infusions.

**MARASCHINO**. See *Spirit*.

**MARASMUS**, Atrophy—m. *Phthisis*, *Phthisis pulmonalis*—m. *Tabes*, *Tabes*—m. *Tabes dorsalis*, *Tabes dorsalis*

MARATHRITES, from *μαραθρον*, 'fennel.' Wine, impregnated with fennel.

MARATHROPHYLLUM, Peucedanum.

MARATHRUM, Anethum—m. Sylvestre, Peucedanum.

MARC, Magma.

MARCASITA, Bismuth—m. Alba, Bismuth, subnitrate of—m. Plumbea, Antimonium.

MARCASITÆ MAGISTERIUM, Bismuth, subnitrate of.

MARCHANTIA POLYMORPHA, *Hepatica fontana*, *Lichen stellatum*, *Jecora'ria*, *Liv'erwort*. (F.) *Hépatique des fontaines*. This plant is mildly pungent and bitter. It is recommended as aperient, resolvent, and antiscorbutic; and is used in diseased liver, &c.

MARCHE, LA, Walking.

MARCHIONIS, PULVIS, *Powder of the Marquis*. A powder, formerly considered to be anti-epileptic; and composed of *Male pæony root*, *Mistletoe*, *Ivory shavings*, *Horn of the root of the stag*, *Spodium*, *Tooth of the monodon*, coral, &c.

MARCORES, Atrophy, Einaciation.

MARE'S TAIL, *Hippuris vulgaris*.

MARGA CANDIDA, *Lac luna*. An ancient name for a variety of spongy, white, friable marl, which was employed as an astringent and refrigerant.

MARGARETTA, Scherlievo.

MARGARITA, Pearl.

MARGARON, Pearl.

MARGINI-SUS-SCAPULO-TROCHITÆRIEN, Teres minor.

MARGO, Bord.

MARGUËRITE, PETITE, Bellis—m. des Près, grande, *Chrysanthemum leucanthemum*.

MARIGOLD, DIAMOND, FIG, *Mesembryanthemum crystallinum*—m. Garden, *Calendula officinalis*—m. Single, *Calendula officinalis*—m. wild, *Calendula arvensis*.

MARIS, *μαρις*. Ancient name of a measure, containing 83 pints and 4 ounces.

MARISÇA, Ficus, *Hæmorrhoidis*.

MARJOLAINE, *Origanum majorana*.

MARJORAM, COMMON, *Origanum*—m. wild, *Origanum*—m. sweet, *Origanum majorana*.

MARJORANA, *Origanum majorana*—m. Mancurana, *Origanum*.

MARMALADE, Marmelade.

MARMARYGO'DES, 'brilliant.' An epithet, joined particularly to the word *οφθαλμος*; a brilliant eye, a flashing eye.

MAR'MELADE, *Marmela'da*, *Mar'malade*, *Miza*. Parts of vegetables, confectioned with sugar, and reduced to a pulraceous consistence.

MARMELADE OF APRICOTS. A marmelade, prepared with two parts of ripe apricots deprived of their stones, and one part of white sugar.

MARMELADE OF TRONCHIN OR OF FERNEL. A kind of thick looch, of an agreeable taste, prepared with two ounces of oil of sweet almonds, as much syrup of violets, manna in tears, very fresh pulp of cassia, 16 grains of gum tragacanth, and two drachms of orange flower water. It is used as a laxative, demulcent, and pectoral.

MARMORYGE HIPPOCRATIS, *Hemiopia*.

MARROUTE, *Anthemis cotula*.

MAR'RIOTT, DRY VOMIT OF. This once

celebrated emetic, called *dry*, from its being exhibited without drink, consisted of equal portions of tartarized antimony and sulphate of copper.

MARRONTER D'INDE, *Æsculus Hippocastanum*.

MARROW, *Myelos*, *Medulla*, *Medullary Juice*, *Æxungia de Mum'ia*, Sax. *me'rz*, (F.) *Moëlle*, *Suc médullaire*. The oily, inflammable, whitish or yellowish juice, which fills the medullary canal of the long bones, the cancellated structure at the extremities of those bones, the diploe of flat bones, and the interior of short bones. The marrow is furnished by the exhalation of the medullary membrane. It is fluid during life, and appears under the form of small points or brilliant grains, after death. It is enveloped in the medullary membrane.

MARROW, SPINAL, *Medulla spinalis*—m. Vertebral, *Medulla spinalis*.

MARRUBE BLANC, *Marrubium*—m. *Noir*, *Ballota fœtida*.

MARRUBIUM, *Marrubium vulgare*, *M. album*, *Horehound*, *Prasium*, *Phrasum*. (F.) *Marrube blanc*. The leaves have a moderately strong, aromatic smell; and a very bitter, penetrating, diffusive, and durable taste. It has often been given in coughs and asthmas, united with sugar. Dose,  $\frac{ʒ}{ss}$  to  $\frac{ʒ}{j}$ , in infusion; dose, of extract, gr. x. to  $\frac{ʒ}{ss}$ .

FORD'S BALSAM OF HOREHOUND is made as follows:—*horehound*, liquorice root,  $\text{āā}$  lbij and  $\frac{ʒ}{vii}$ ; water, q. s. to strain, lbvj. Infuse. To the strained liquor add:—*proof spirit* or brandy, lb12; *camphor*,  $\frac{ʒ}{j}$  and  $\frac{ʒ}{ij}$ ; *opium* and *benjamin*,  $\text{āā}$   $\frac{ʒ}{j}$ ; *dried squills*,  $\frac{ʒ}{ij}$ ; *oil of aniseed*,  $\frac{ʒ}{j}$ ; *honey*, lbij and  $\frac{ʒ}{vii}$ .—Gray. It is pectoral.

MARRUBIUM, *Leonurus cardiaca*—m. *Nigrum*, *Ballota fœtida*.

MARS, Ferrum—m. *Solubilis*, *Ferrum tartarizatum*.

MARSH, *Linnē*, *Helos*, *Palus*, Sax. *mepre*, (F.) *Murais*. Marshy districts give off emanations, which are the fruitful source of disease, and the cause of great insalubrity in many countries. The chief disease, occasioned by the malaria or miasm, (q. v.) is intermittent fever. Hence it becomes important to drain such regions, if practicable. Marshy countries are, however, not so liable to phthisis pulmonalis, and it has been found, that where intermittents have been got rid of by draining, consumption has, at times, become frequent.

The most unhealthy periods for residence in a marshy district are during the existence of the summer and autumnal heats: at which times the water becomes evaporated, and the marshy bottom is more or less exposed to the sun's rays. This postulatium seems necessary for the production of the miasmata: for whilst the marsh is well covered with water, no miasm is given off.

MARSH POISON, *Miasm* (marsh.)

MARSHMALLOW, *Althæa*.

MARSUM, *Mar'sium*, *Mar'sicum*. An ancient wine of Marsia, in Italy, which was used as an astringent in certain diseases of the mouth.

MARSUPIALIS, *Ischio-trochanterianus*, *Obturator internus*.

MARSUPION, *Marsup'ion*, *Marsip'pon*, *Marsu'pium*, *Sac'culus*. A sac or bag, with

which any part is fomented. Also, the abdominal pouch in the Kangaroo, Opossum, &c. into which the young, born at a very early stage of development, are received and nourished with milk secreted from glands contained within the pouches. Such animals are termed *Marsupial* or *Marsupiate*.

**MARSUPIUM**, Scrotum—m. Musculosum, Dartos.

**MARTEAU**, Malleus.

**MARTIALIS**, Chalybeate.

**MARTIANA POMA**. See Citrus aurantium.

**MARTIATUM UNGUENTUM**, *Onguent de Soldat, Soldier's ointment*. This was composed of bay-berries, rue, marjoram, mint, sage, rosewood, basil, olive oil, yellow wax, and Malaga wine. It was invented by Martian; and was employed by soldiers as a preservative against cold.

**MARTIS LIMATURA**, Ferri limatura.

**MARUM CORTUSI**, Teucrium marum—m. Creticum, Teucrium marum—m. Syriacum, Teucrium marum—m. Verum, Teucrium marum—m. Vulgare, Thymus mastichina.

**MASCHALE**, Axilla.

**MASCHALISTER**, Axis.

**MASCHALONCUS**, from *μασχαλη*, 'the axilla,' and *ογκος*, 'a tumour.' A tumour or bubo in the axilla.

**MASCULUS**, Male.

**MASESIS**, Mastication.

**MASK**, *Larva*, (F.) *Masque*. A bandage, applied over the face, as a sort of mask, in cases of burns, scalds, or erysipelas. It serves to preserve the parts from the contact of air, and to retain topical applications *in situ*. It is made of a piece of linen, of the size of the face, in which apertures are made corresponding to the eyes, nose, and mouth, and which is fixed by means of strings stretched to the four angles.

**MASLACH**, *Am'phion, An'fion*. A medicine, much used by the Turks, and into the composition of which opium enters. It is excitant.

**MASQUE**, Mask.

**MASS**, *μαζα, Maza, Massa*, from *μασσω*, 'I mix.' The compound, from which pills have to be formed.

**MASSA**, Mass—m. de Dactylis, Paste, date—m. de Extracto glycyrrhizæ, Pasta glycyrrhizæ, &c.—m. de Gummi Arabico, Paste, marshmallow—m. de Zizyphorum fructu, Paste of jujubes.

**MASSAGE**, Shampooing.

**MASSEMA**, Mastication.

**MASSES APOPHYSAIRES**. See Vertebra.

**MASSESSIS**, Mastication.

**MASSETER**, *μασσητηρ*, from *μασσαι*, 'I eat,' 'I chew;' *Zygomato-maxillaire*. A muscle, situate at the posterior part of the cheek, and lying upon the ramus of the lower jaw-bone. It is long, quadrilateral, and is attached, *above*, to the inferior edge and to the inner surface of the zygomatic arch; *below*, it terminates at the angle of the jaw, and at the outer surface and inferior margin of the ramus of that bone. It is composed of an intermixture of fleshy and aponeurotic fibres. Its office is to raise the lower jaw, and to act in mastication.

**MASSETER INTERNUS**, Pterygoideus internus.

**MASSETERIC**, *Mas'seterine, Masseter'icus*.

*Masseter'us*. Relating or belonging to the masseter muscle.

The **MASSETERINE ARTERY** arises from the trunk of the internal maxillary or temporalis profunda posterior, and is distributed to the masseter muscle, after having passed, horizontally, through the sigmoid notch of the lower jaw-bone.

The **MASSETERINE VEIN** has the same distribution as the artery. It opens into the internal maxillary vein.

The **MASSETERINE NERVE** is given off from the inferior maxillary branch of the fifth pair. It passes through the sigmoid notch, and is distributed on the inner surface of the masseter. In luxation of the lower jaw, this nerve is strongly stretched, and considerable pain, consequently, produced.

**MASSETERINUS**, Masseteric.

**MASSULA**, Molecule.

**MASTALGIA**, Mastodynia.

**MASTEMA**, Masticatory.

**MASTERWORT**, Heracleum lanatum, Imperatoria.

**MASTESIS**, Mastication.

**MASTHELICOSIS**, Mastodynia apostematosa.

**MASTHOS**, Mamma.

**MASTICATION**, *Masticatio, Masc'sis*,

*Masc'sis, Masc'sis, Masc'sis, Manducatio, Commanducatio*, from *μασσειν*, 'I chew.' The action of chewing or bruising food, to impregnate it with saliva, and prepare it for the digestion it has to undergo in the stomach. This is executed by the joint action of the tongue, cheeks, and lips, which push the alimentary substance between the teeth; and by the motions of the lower jaw it is cut, torn, or bruised.

**MASTICATORY**, *Masticatorium, Mastema, Diuastema*. Same etymon. A substance, chewed with the intention of exciting the secretion of saliva.

**MASTICATORY NERVE**. See Trigemini.

**MASTICH**, see Pistacia lentiscus—m. Herb, common, Thymus mastichina—m. Herb, Syrian, Teucrium marum—m. Tree, Pistacia lentiscus.

**MASTICHIINA GALLORUM**, Thymus mastichina.

**MASTIGODES HOMINIS**, Tricocephalus.

**MASTITIS APOSTEMATOSA**, Mastodynia apostematosa.

**MASTIX**. See Pistacia lentiscus.

**MASTODYNIA**, *Mastalgia*, from *μαστος*, 'the breast,' and *οδυνη*, 'pain.' Pain in the breasts; a sort of neuralgia.

**MASTODYNIA APOSTEMATOSA**, *Phlegmonæ Mammæ, Masthelcosis, Mastitis apostematosa, Abscessus Mammæ, Phlegmonæ Mastodynica, Abscess of the Breast, Mammary Abscess*. Phlegmonous inflammation of the breasts, running on to suppuration. It is one of the best examples of acute phlegmonous inflammation, and requires the active use of appropriate treatment.

**MASTODYNIA POLYGALA**, Sparganosis.

**MASTOID**, *Mastoides, Mammillaris, Pappili-aut mammilliformis, Mammiiformis*; from *μαστος*, 'a breast,' and *ειδος*, 'form, resemblance.' Having the form of a nipple.

The **MASTOID OF MAMMIFORM OF MAMMILARY PROCESS**, is situate at the inferior and posterior part of the temporal bone, and gives attachment to the digastric and mastoid muscles.

**MASTOID**, *Mastoïdeus*. That which relates to the mastoid process.

The **MASTOID CELLS**, *Antrum mastoïdium*, *Mastoïd Sinus*. These are situate in the mastoid process; communicate with each other, and open into the cavity of the tympanum. Their use seems to be, to increase the intensity of sound.

The **MASTOID FOSSA**, (F.) *Gouttière mastoïdienne*, is a depression at the inner surface of the mastoid portion of the temporal bone, which forms part of the lateral sinus.

The **MASTOID AP'ERTURE**—the opening of communication between the cavity of the tympanum and the mastoid cells.

The **MASTOID PORTION OF THE TEMPORAL BONE**, is that part which bears the mastoid process.

The **MASTOID OR DIGASTRIC GROOVE**, (F.) *Rainure mastoïdienne ou digastrique*, is a groove, situate at the inner side of the mastoid process, which affords attachment to the posterior belly of the digastric muscle.

The **MASTOID FORA'MEN** is situate behind the mastoid process, and gives passage to a small artery of the dura mater, as well as to a vein which opens into the lateral sinus.

**MASTOID MUSCLE, POSTERIOR**, *Splenius*.

**MASTOIDEUS**, *Sterno-cleido-mastoideus*—m. *Lateralis*, *Complexus minor*.

**MASTOIDO-CONCHINIEN**, *Retrahens auris*—m. *Génica*, *Digastricus*—m. *Hyogénien*, *Digastricus*—m. *Oriculaire*, *Retrahens auris*.

**MASTON'CUS**, from *μαστος*, 'the breast,' and *οζος*, 'a tumour.' A tumefaction of the nipple, or of the breast itself.

**MASTRUPATIO**, *Masturbation*.

**MASTURBATION**, *Mastupratio*, *Manustupratio*, *Manstupra'tio*, from *manus*, 'the hand,' and *stupro*, 'I ravish.' *Onania*, *O'nanism*, *Voluntary Pollution*, *Self-Pollution*, (F.) *Abus de soi-même*, *Attouchement*. Excitement of the genital organs by the hand.

**MAT**, (F.) *Dull*. A dull sound, *Son mat*. The obscure noise, afforded when any part, as the chest, is percussed in several diseases. It has been compared to that produced when the thigh is struck. It is opposed to the *Son clair*, or 'clear sound.'

**MATE**. See *Ilex Paraguensis*.

**MATER HERBARUM**, *Artemisia vulgaris*—m. *Metallosum*, *Hydrargyrum*—m. *Perlarum*, see *Pearl*.

**MATERIA**, *Matter*—m. *Fibrosa*, *Fibrine*.

**MATERIA MED'ICA**, *Pharmacologia*, *Pharmacology*, *Acol'ogy* or *Akol'ogy*, *Hylē Intricē*, *Iamatol'ogy*, (F.) *Matière Médicale*. The division of medical science, which treats of the knowledge of medicines; their action on the animal economy, and mode of administration.

The study of the *Materia Medica* is one of great importance:—it is a study of the tools, with which the practitioner has to work in the cure of disease.

Much labour has been spent in contriving classifications of the *Materia Medica*. Some have arranged the articles, according to their natural resemblance: others, according to their real or presumed virtues; others, according to their active constituent principles. The *Pharmacopœias* place them alphabetically.

Perhaps the best classification would be one founded on the agency exerted by the articles on the different tissues; but this arrangement, in the present state of science, is by no means easy; and, moreover, the action of medicines is so associated with certain terms,—as narcotics, tonics, sedatives, &c., employed to denote certain operations, which they are esteemed capable of producing, that, to abandon them, would be to throw obstacles in the way of the student, without the ultimate advantage accruing to him—of possessing a better knowledge of the *modus operandi* of medicines than when a classification, somewhat resembling those usually embraced, is adopted.

The following is the classification given by the Author, in his "General Therapeutics," (Philadelphia, 1836:)

CLASSIFICATION OF THERAPEUTICAL AGENTS.

|                         |            |   |                   |
|-------------------------|------------|---|-------------------|
| I. VITAL AGENTS.        | Excitants. | Increasing action generally or locally or both. | Excitants proper, |
|                         |            |   | Tonics,           |
| II. CHEMICAL AGENTS.    | Sedatives. | Diminishing action directly or indirectly.      | Antihelmintics,   |
|                         |            |   | Astringents,      |
| III. MECHANICAL AGENTS. |            |   | Emetics,          |
|                         |            |   | Cathartics.       |
|                         |            |   | Emmenagogues,     |
|                         |            |   | Abortives,        |
|                         |            |   | Diaphoretics,     |
|                         |            |   | Errhines,         |
|                         |            |   | Sialogogues,      |
|                         |            |   | Diuretics,        |
|                         |            |   | Expectorants,     |
|                         |            |   | Solubefacients,   |
|                         |            |   | Revelents,        |
|                         |            |   | Antispasmodics.   |
|                         |            |   | Sedatives proper, |
|                         |            |   | Narcotics,        |
|                         |            |   | Refrigerants,     |
|                         |            |   | Nauseants.        |
|                         |            |   | Antacids,         |
|                         |            |   | Antalkalies,      |
|                         |            |   | Eurthitics,       |
|                         |            |   | Disinfectants.    |
|                         |            |   | Demulcents.       |
|                         |            |   | Diluents.         |

Of old, the *Materia Medica*, consisted of more articles than at present. The tendency, indeed, is, and must be, to diminish it still farther: to get rid of those articles which possess no advantages over others equally common, or whose properties are doubtful.

In a Dictionary, it becomes necessary to insert all that have been reputed to possess virtues; but the majority are unnecessary. The catalogue might be largely reduced, with impunity.

**MATÉRIAUX IMMÉDIATS**, Principles, immediate.

**MATERIES**, *Matter*.

**MATIERE**, *Matter*—m. *Extractive du Bouillon*, *Osmazome*—m. *Médicale*, *Materia Medica*—m. *Perle de Kerkring*, *Antimony diaphoreticum*—m. *Pulmonaire noire*, see *Pulmo*.

**MATLOCK**, **MINERAL WATERS OF**. *Matlock* is a village in Derbyshire, England, to which there is a mineral spring of the acidulous class. Temperature 66°. It differs but little, except in temperature, from good spring water. It is generally used as a tepid bath.

**MATONIA CARDAMOMUM**, *Anomum cardamomum*.

**MATRACIUM**, *Matrass*.

**MATRASS**, *Matracium*. A glass vessel with a long neck; and a round, and sometimes oval,

body. It may be furnished with tubulures or not. It is used in *Pharmacy* for distillation, digestion, &c.

MATRES CEREBRI, Meninges.

MATRICAIRE, Matricaria.

MATRICA'RIA, from *matrix*, 'the womb;' so called from its reputed virtues in affections of that organ. *Matricaria Parthenium*, *Parthenium febrifugum*, *Argyrochaeta*, *Chrysochalis*, *Fever-few*, *Feather-few*, *Mother-wort*, (F.) *Matricaire*. It resembles, in its properties, chamomile and tansy; and, like them, has been esteemed tonic, stomachic, resolvent, emmenagogue, vermifuge, &c. It is not much used.

MATRICA'RIA CHAMOMIL'LA, *Chamomelum Vulgarè*, *Chamomilla nostras*, *Leucanthemum of Dioscorides*; *Wild Corn*, *Dog's Chamomile*, (F.) *Camomille vulgaire*. It resembles the *Matricaria* in properties.

MATRICARIA, *Anthemis nobilis*.

MATRICE, Uterus—*m. Col. de la*, Collum uteri.

MATRISYLVA, *Asperula odorata*.

MATRIX, Uterus.

MATRONA, Midwife.

MATRONALIS, *Viola*.

MATTEE. See *Ilex Paraguensis*.

MATTER, *Materia*, *Hylè*, *Matèries*, (F.) *Matière*. Any substance which enters into the composition of a body. In *Medicine*, it is sometimes applied to the substance of evacuations; and is also used synonymously with pus.

MATURATION, *Maturatio*, from *maturare*, 'to ripen;' *Papas'nos*, *Pepan'sis*. Progression of an abscess towards maturity. The state of maturity. Coction, (q. v.)

MAT'URATIVE, *Maturans*, *Pepanticos*. A medicine which favours the maturation of an inflammatory tumour.

MATU'RITY, *Maturitas*. The state of fruits and seeds, when completely developed. State of an abscess, in which the pus is completely formed.

MATURITY, *PRECOCIOUS*, *Præotia*.

MAUDLIN, *Achillea ageratum*—*m. Tansey*, *Achillea ageratum*—*m. Wort*, *Crysanthemum leucanthemum*.

MAUVE SAUVAGE, *Malva*.

MAXILLARY, *Maxilla'ris*, from *maxilla*, 'a jaw.' Relating or belonging to the jaws; from μασσω, 'I chew.'

MAXILLARY BONE, *Maxilla*, *Mandib'ula*, *Sigogon*, 'jaw,' (F.) *Machoire*. A name given to two bones, which support the teeth, and which, by means of them, are inservient to the cutting, bruising, and tearing of alimentary substances.

The jaw-bones are two in number.

1. The upper jaw-bone, *superior maxillary bone*, *Maxilla superior*, *Os maxilla'rè superius*, *Maxilla syncrania*, *Os sus-maxillaire*, (Ch.) *Machoire syncranienne*. The upper jaw-bones are to the face what the sphenoid bone is to the cranium. They are articulated with all the portions composing it. They determine, almost alone, the shape of the face, and give it solidity. Their size is considerable; form unequal. They occupy the middle and anterior part of the face; and enter into the composition of the nasal fosse, orbit, and mouth. The chief parts observable in the upper jaw, are, I. *Externally*—The *Nasal process*, (F.) *Apophyse montante*,

*Foramen infra-orbitarium*, *Zygomatic process*, *Canine fossa*, *Myrtiform fossa*. 2. *Internally*—The *Palatine process*, *Anterior palatine canal*, and the *Antrum of Highmore*. Its circumference is very unequal, and it has behind a round, unequal prominence called the *Maxillary tuberosity*, which is pierced by the *posterior dental canal*. Anteriorly, is a notch, which forms part of the anterior aperture of the nasal fosse, and beneath, an eminence called the *anterior nasal spine*. The lower part of this circumference forms the *alveolar margin*.

Each superior maxillary bone is articulated with the ethmoid, frontal, nasal, lachrymal, palatine, inferior spongy, vomer, its fellow, the teeth of the upper jaw, and sometimes with the sphenoid bone. It is developed by four or five points of ossification.

The lower jaw-bone, *Os Maxilla're inferius*, *Machoire diacranienne*, *Maxilla inferior*, *Os maxillaire*, (Ch.) is a symmetrical, nearly parabolic bone, the middle portion of which is horizontal and called the *body*; the posterior vertical, and angular portions being termed *Rami* or *branches*. These have behind a *parotidæan edge*, which forms—by uniting with the base—the *angle of the jaw*. The branches terminate above, by two processes, separated by the *sigmoid notch* or *fossa*; the anterior of which is called the *coronoid*; the posterior, the *condyloid process* or *maxillary condyle*, supported by a *Cervix*, *Collum*, or *Neck*. The chief parts observed on the lower jaw are—1. *Externally*,—the *Symphysis menti*, *Apophysis menti*, *Mental foramen*, and the *external oblique line*.—2. *Internally*,—the *Geniophysis*, the *internal* or *Myloid oblique lines*, and the *entrance of the dental canal*.

The lower jaw has, also, an *alveolar edge*, which contains alveoli for the reception of the teeth.

The lower jaw bone is developed by two points of ossification, which unite at the symphysis of the chin. It is articulated with the temporal bones and with the teeth.

The MAXILLARY ARTERIES are three in number. 1. The *external maxillary*. See *Facial*. 2. *Internal maxillary*—*A. Guttur-maxillaire*, (Ch.) This arises from the external carotid with the temporal. It is remarkable for its complex course, and for the number of branches which it transmits to the deep-seated parts of the face. Immediately after its origin, it buries itself under the neck of the lower jaw, curving inwards and downwards. It then advances directly inwards; proceeding in the space between the two pterygoid muscles towards the *maxillary tuberosity*. It turns again, becomes vertical, and ascends into the bottom of the zygomatic fossa, until, having arrived at the floor of the orbit, it takes a horizontal and transverse direction; enters the sphenomaxillary fossa, and divides into several branches. See *Artery*. (Table.)

The MAXILLARY VEINS present the same arrangement as the arteries they accompany.

The MAXILLARY NERVES are two in number, and formed of the second and third branches of the fifth pair.

The SUPERIOR MAXILLARY NERVE, *Nervus sus-maxillaire*, (Ch.) arises from the middle of the

gangliform enlargement of the fifth pair; passes forwards and issues from the cranium through the foramen rotundum of the sphenoid bone; enters the speno-maxillary fossa, which it crosses horizontally; passes into the infra-orbital canal, which it traverses; and makes its exit to vanish on the cheek. It gives off the following branches: the *orbital*, a branch which goes to the *spheno-palatine ganglion*; *posterior dental branches*; the *anterior dental*,—and terminates in the *infra-orbital nerves*—which are divided into *superior, inferior, internal and external*.

The *inferior maxillary nerve, Nerf maxillaire*, (Ch.) is the largest of the three branches, furnished by the fifth pair. It issues from the cranium by the foramen ovale of the sphenoid. Having reached the zygomatic fossa, it divides into two trunks; the one *superior and external*, which gives off the *temporales profundi, masseterine, buccal and pterygoids*; the other—*inferior and internal*—the larger of the two, which furnishes the *inferior dental, lingual, and auricular*.

*MAXILLO-ALVÉOLI-NASAL*, Depressor alæ nasi—*m. Labial*, Depressor anguli oris—*m. Narinal*, Compressor naris—*m. Palpebralis*, Orbicularis palpebrarum—*m. Scleroticiens*, Obliquus inferior oculi.

*MAYAPPLE*, *Podyphyllum peltatum*—*m. Weed*, *Anthemis cotula*.

*MAYELLA*, *Curcuma longa*.

*MAZA*, Mass.

*MAZISCH'ESIS*, from *maza*, (with some,) 'the placenta,' and *σχεσις*, 'holding,' 'retention.' Retention of the placenta.

*MAZOS*, Mamma.

*MEAD*, *Hydromeli*, *Melizomum*.

*MEADOW SAFFRON, VINEGAR OF*, *Acetum colchici*—*m. Sweet*, *Spiræa ulmaria*.

*MEASLES*, *Rubeola*—*m. Black*, see *Rubeola*.

*MEAT, EXTRACTIVE OF*, *Osmazome*.

*MEATUS*, Canal—*m. Auditorius externus*, Auditory canal, external—*m. Auditorius internus*, Auditory canal, internal—*m. Cæcus*, Eustachian tube—*m. Narium*, see *Nasal fossæ*—*m. Seminales uteri*, *Tubæ fallopianæ*—*m. Seminars*, *Corpus highmori*—*m. Urinari*, *Urethra*.

*MECHAMEEK*, *Convulvulus panduratus*.

*MECHANE*, Machine.

*MECHANEMA*, Machine.

*MECHANICAL*, *Mechanicus*, from *μηχανη*, 'a machine.' An epithet given to irritating bodies, which do not act chymically—as a *mechanical irritant*.

*Mechanical or Iatro-mathematical Physicians*, are such as refer every function, healthy or morbid, to mechanical or mathematical principles.

*MECHANICS, ANIMAL*. That part of physiology, whose objects are to investigate the laws of equilibrium and motion of the animal body.

*MECHANISM*. The structure of a body; the collection or aggregate of the parts of a machine; the mode in which forces produce any effect, &c.

*MËCHE*, Tent.

*MECHOACANA NIGRA*, *Convulvulus jalapa*.

*MECHOACANÆ RADIX*, *Convulvulus mechoacan*.

*MECHOACHIAN DU CANADA*, *Phytolacca decandra*.

*MECON*, Papaver.

*MECO'NIUM*, from *μηκων*, 'a poppy.' *Poppy juice*. *Papaverculum*, *Purgamentum Infantis*.

The excrement passed by the infant a short time after birth, which had accumulated in the intestines during pregnancy. It is of a greenish or deep black colour, and very viscid. It seems formed of the mucous secretions of the intestines mixed with bile. See *Opium*.

*MEDEA*, Genital organs.

*MÉDECIN*, Physician.

*MÉDECINE*, *Medicina*—*m. Expectante*, *Expectation*—*m. Légale*, *Medicine, legal*.

*MEDELA*, Curation.

*MEDIAN*, *Mediānus*; from *mediūm*, 'the middle.' That which is situate in the middle.

*MEDIAN LINE*. A vertical line, supposed to divide a body longitudinally into two equal parts; the one right, the other left. *Chaussier* calls the *linea alba* the *ligne médiane* of the abdomen.

The *MEDIAN NERVE, Median digital*, (Ch.) This nerve arises chiefly from the anterior branches of the last two cervical nerves and first dorsal. The fifth and sixth cervical pairs also send it a branch, which separates from the musculo-cutaneous nerve. The median nerve descends along the inner part of the arm along the biceps muscle. Opposite the elbow joint it buries itself behind the aponeurosis of that muscle, and engages itself between the two fasciculi of the pronator teres. Lower down, it is situate between the flexors—*sublimis* and *profundus*—and passes, with their tendons, under the anterior annular ligament; it then divides into five branches, which are distributed to the muscles of the thenar eminence, to the lumbricales, the integuments of the thumb, the index, middle finger, and outer part of the ring finger. This nerve gives no branches to the arm. In the forearm, it furnishes filaments to all the pronator and flexor muscles; and one of them accompanies the anterior interosseous artery. It also gives off a filament to the integuments of the palm of the hand.

*MEDIAN VEINS*. Three of the superficial veins of the forearm are so called. The *median basilic*—the *median cephalic* and *common median* or *Funis brachii*. See *Basilic* and *Cephalic*.

*MEDIANUM*, *Mediastinum*.

*MEDIASTINITIS*, *Mesodmitis*.

*MEDIASTINUM CEREBRI*, *Falx cerebri*—*m. Cerebri*, *Septum lucidum*.

*MEDIASTINUM*, quasi, *in medio stans*, as being in the middle. *Mesod'mē*, *Mediānum*, *Septum thoracis*, *Hymen Diaphragmaton*, *Membra'na Thoracem intersepicans*. A membranous septum formed by the adossement of the pleura; dividing the chest into two parts, the one right, the other left. The mediastinum, formed by a double reflection of the pleura, extends from the spine to the posterior surface of the sternum. Its anterior part, called the *Anterior mediastinum*, *Mediastinum pectorale*, lodges, at its upper part, the thymus gland in the fœtus, and is filled below with fatty, cellular tissue. Its posterior part, parallel to the spine, is occupied by the œsophagus, vena azygos, thoracic duct,

the lower part of the windpipe, the origin of the bronchia and a number of lymphatic glands. This part is called the *posterior mediastinum*—*Mediastinum dorsale*.

THE *MEDIASTINAL ARTERIES* are very delicate arterial branches, distributed in the cellular texture of the mediastinum. They are distinguished, according to their situation, into anterior and posterior.

**MEDICAL JURISPRUDENCE**, *Medicine*, legal.

**MEDICAMENT**, *Medicamentum*, *Remedium*, *Ac'esis*, *Ac'es'ma*, *Acos*, *Medica'men*, *Pharmacum*. *Med'icine*, *Physic*, *Rem'edy*, *Alkar*, *Aux'ilium*, *Bo'ethe'ma*, from *medicare*, 'to cure or heal.' A medicine. Any substance, exhibited with the view of curing or allaying morbid action. Medicines are obtained from the three kingdoms of nature, and are divided into *internal* and *external*, according as they are administered internally or applied externally.

**MEDICAMENTO'SUS LAPIS**, *Medic'inal stone*, (F.) *Pierre medicamentouse*. A name, formerly given to a mixture of *peroxyd of iron*; *litharge*; *alum*; *nitre*; *sal ammoniac*; and *vinegar*; evaporated and calcined at a red heat for an hour. The product was regarded as eminently astringent.

**MEDICAMENTUM**, *Drug*—m. ex *Palmulis*, *Diaphœnicon*.

**MEDICAS'TER**, *Medicæstra*. An ignorant practitioner. A charlatan.

**MEDICA'TION**, from *mederi*, 'to remedy.' The change in the animal economy produced by the operation of remedies. Treatment by medicine.

**MEDIC'INA**, *Med'icine*, *Ars med'ica*. *The healing art*, *Res medica*, *Ars Machaonia*, *Iat'rice*, *Iater'ia*, *Iatrotechnicæ*, *Physic*. (F.) *Médecine*. A science, the object of which is the cure of disease and the preservation of health.

Occasionally, it is used to comprehend all the branches of the healing art; at others to comprise one great division, in contradistinction to *surgery* and *obstetries*. Medicine, in this sense, includes many branches;—the chief of which are, *Anatomy*, *Physiology*, *Pathology*, *Therapeutics*, *Hygiene*, *Materia Medica*, and *Pharmacy*.

*Medicine* is, also, used in the same sense as *Medicament* (q. v.) and for a purging potion.

**MEDICINA CONSERVATIVA**, *Hygiene*—m. *Diætetica*, *Dietetics*—m. *Efficax*, *Surgery*—m. *Forensis*, *Medicine*, *legal*—m. *Hermetica*, see *Spagirists*—m. *Operativa*, *Surgery*—m. *Sinica*, *Chinese medicine*—m. *Spagirica*, see *Spagirists*—m. *Tristitia*, *Crocus*.

**MEDIC'INAL**, *Medicina'lis*. Having a remedial power;—as *medicinal plants*, &c.

**MEDICINA'LES DIES**, *Medic'inal days*. Days on which the ancients considered that remedies might be administered; and especially evacuants. Such days were not esteemed critical.

**MEDICINE**, *Medicament*—m. *Galenic*, *Galenism*.

**MED'ICINE, LEGAL**, *Med'ical jurisprudence* of some, *Law med'icine*, *Forensic medicine*, *Medic'ina foren'sis*. (F.) *Médecine légale*. The application of medical knowledge to the solution of every question connected with the preser-

vation of the species, and the administration of justice.

**MEDICINIER CATHARTIQUE**, *Jatropha curcas*.

**MEDICUS**, *Doctor*, *Physician*—m. *Unguentarius*, *Intraleptes*—m. *Vulnerarius*, see *Deligatio*—m. *Vulnerum*, *Surgeon*.

**MEDIM'NUS**, *Medim'nos*, *μεδιμνος*. An ancient measure, capable of containing about 4 pecks and 6 pints.

**MEDITULLIUM**, *Diploe*.

**MEDIUS**. Middle, median.

THE *MIDDLE FINGER*, (F.) *Doigt du milieu*, is between the index and ring finger.

**MEDLAR**, *Mespilus*.

**MEDO**, *Hydromeli*.

**MEDOBLENNORRHŒA**, *Leucorrhœa*.

**MEDORRHŒA**, *Gonorrhœa*,—m. *Feminarum* insons. *Leucorrhœa*.

**MEDULLA**, *Marrow*,—m. *Dorsalis*, m. *Spinalis*.

**MEDULLA OBLONGATA**. *Cerebral protuberance*, *Nervous system of the senses*, (Gall.) *Cerebrum clongatum*, *Mésocephale*, (Ch.) (F.) *Moëlle allongée*. The medullary substance, that lies within the cranium upon the basilar process of the occipital bone. The anterior surface, which rests in the basilar groove, is impressed by the basilar artery. At the upper extremity, and on its posterior surface are the *Tabereula quadrigemina*. At the same extremity, the medulla gives rise to two prolongations, the *peduncles of the brain*, separated from each other by the mammillary eminences and becoming lost in the optic thalami. The lower extremity is called the *tail* or *Rachidian bulb*, and is continuous with the medulla spinalis. It is to this part only that some anatomists apply the name *Medulla oblongata*. From the posterior angles two other prolongations arise, called *Peduncles of the cerebellum*.

The medulla oblongata has several eminences—*The Pons varolii*, *Corpora pyramidalia*, *C. olivaria*, &c. (q. v.)—and it has a longitudinal fissure before, and another behind, called the *anterior* and *posterior median fissures*.

**MEDULLA SPINALIS**, *Æon*, *Notie'us*, *Medulla vertebralis*, *Processus rachidianus*, *Sacra fistula*, *Spinal prolongation*, *Vertebral marrow*, *Spinal cord*, *The nervous system of voluntary motion and tactile impression* (Gall.) *The spinal marrow*, *Medulla dorsalis*, (F.) *Moëlle épinière*, *Moëlle vertébrale*, called by *Chaussier*, *Prolongement rachidien* of the encephalon, is the continuation of the medulla oblongata. It commences at the foramen magnum of the occipital bone, and descends in the vertebral canal as low as the 2d lumbar vertebra, without filling it; presenting, in its course, several evident enlargements. It is grooved, on both its anterior and posterior surfaces, by a furrow, which divides it, in its whole length, into two great nervous cords, intimately united with each other. It terminates by an oval tubercle, whence a number of nerves set out, called *Cauda equina*, (F.) *Queue de cheval*, from its resemblance to a horse's tail. The spinal marrow has no analogy, as regards its structure, with the marrow of long bones. It is formed of two substances; one white, the other gray, presenting an inverse arrangement to that

which they have in the brain, the white being external, the cineritious at the centre. It is enveloped by a yellowish, fibrous membrane, very resisting, and which seems to be continued insensibly from the pia mater, and by two other membranes, which are merely prolongations of the arachnoid and dura mater. See Nerve.

MEDULLA VERTEBRALIS, M. spinalis.

MEDULLARY, *Medullaris*, from *medulla*, 'marrow.' Relating to the marrow or analogous to marrow.

MEDULLARY JUICE, Marrow—m. Sarcoma, Hæmatodes fungus.

The MEDULLARY SYSTEM. Bichat gives this name to the marrow and its membranes. He distinguishes two species of medullary systems; the one occupies the cellular tissue at the extremities of the long bones and that of the flat and short bones; the other is found merely in the central canal of long bones.

MEDULLARY MEMBRANE, *Periosteum Inter-num*. A vascular, areolar web of extreme tenuity, which envelops the marrow and lines the inner surface of the medullary canal of the long bones. This membrane has been considered as a species of internal periosteum of those bones. It has numerous vessels, which bury themselves in the thickness of the marrow; and others which nourish the innermost plates of the bone.

MEDULLARY ARTERIES. The arteries, which enter bones and pass to the marrow.

MEGALANTHROPOGENESIS, from *μεγας*, 'great,' *ανθρωπος*, 'man,' and *γενεσις*, 'birth.' A term, used by a French physician, named Robert, to designate the art of procreating great men; men of mind; men of genius. He considered that they may be perpetuated by always taking care to have talented men united to clever women!

MEGALOCCELIA, Intestine, great, Megaloplanchia.

MEGALOPHONIA, from *μεγας*, *μελαγη*, 'great,' and *φωνη*, 'voice.' A full, strong voice.

MEGALOSPLANCHNOS, *Megalosplanchnus*, from *μεγας*, 'great,' and *σπλanchνον*, 'a viscus.' *Megalocalia*. Hippocrates applies the epithet to those in whom the viscera, or any viscus is tumid. Some have used the substantive *Megalosplanchnia*, for the tumour itself.

MEGALOSPLENIA, Splenoncus.

MEGETHOS, Stature.

MEGRIM, Hemisrania.

MEIBOMIUS, GLANDS OF, *Follicles of M., Palpebral Follicles, Ciliary F., Glan'dula sebacea ciliaris vel Meibomia'na*, (F.) *Folliculus palpebrarum* ou *ciliaires, Glandes de Meibomius*. Small, sebaceous follicles, called after Henry Meibomius, although known long before his description of them. They are situate in special grooves in the tarsal cartilages; and are ranged by the side of each other, in the form of yellowish, parallel, and vertical lines; sometimes straight, at others, tortuous. They may be seen at the inner surface of the eyelids, through the conjunctiva, and secrete a sebaceous humour, called *Lippitudo, Gum*, (F.) *Chassie*.

MEIOSIS, *Imminutio, Minuthe'sis*. The period of a disease, in which the symptoms begin to diminish;—the decline.

MEIURUS, Myurus.

MEL, *μελι*, *Meli, Niliacum, Honey*, (F.) *Miel*. A substance, of a mucoso-saccharine nature, prepared by the *Apis mellifica* or common bee, which collects it from the nectaries of flowers. Honey is employed as aliment, condiment, and medicine. It is demulcent and aperient; and is employed as an adjunct to gargles in cyananche tonsillaris, &c. It is, at times, used as a detergent to foul ulcers. *Virgin Honey*, (F.) *Miel vierge*, is that which flows from the wax spontaneously.

HILL'S BALSAM OF HONEY is formed of *balsam. tolu. liij, honey, liij, rectified spirit*, one gallon. It was long a celebrated empirical pectoral.

MEL ACETATUM, Oxy-mel—m. *Ægyptiacum, Ægyptiacum—m. Aerium, Fraxinus ornus*.

MEL BORACIS, *Mel subboracis, Collutorium adstringens, Linimentum de Boracis*, L. *ad aphthas, Mel Boraxatum, Linctus de Boracis*, L. *ad aphthas. Honey of Borax. (Boracis contrit. ʒj, mellis despumati ʒj, M. Ph. L.)* Detergent. Applied to the mouth in aphthous affections.

MEL CANNÆ, Saccharum (non purificatum)—m. Coctum, Pelicida.

MEL DESPUMATUM, *Clarified Honey, Anaphron'eli*, (F.) *Miel clarifié*. Melt the honey in a water bath, and remove the scum. Uses the same as honey, (q. v.)

MEL ROSÆ, *Mel rosatum, Mellitum de Rosis, Honey of Roses, Rhodom'eli, Rhodostacton*, (F.) *Miel rosat, Mellite de Rosis. (Rosæ gallicæ petalor. crassæ. ʒiv, aqua ferv. liiij, mellis despum. lbv.* Infuse the roses for six hours: add the strained liquor to the honey, and boil to a proper consistence in a water bath. *Ph. L.*) Astringent and detergent. Used chiefly in gargles and washes for apthæ, &c.

MEL SCILLÆ, Oxy-mel scillæ.

HONEY WATER is a mixture of essences, coloured with saffron. A little honey is added to communicate a clamminess; the effect of which is to make it retain the scent the longer. It is used as a scent.

MELÆNA, *Melanorrhag'ia, Melanchlorus, Melanic'terus, Melas l'cterus*, from *μελας*, 'black.' The *Black Vomit*; the *Black Jaundice, Morbus niger*, (F.) *Maladie noire, Méline, l'ctère noire*. A name given to vomiting of black matter, ordinarily succeeded by evacuations of the same character. It seems to be often a variety of hæmatemesis. The *Black Vomit* in yellow fever is owing to a morbid secretion from the lining membrane of the stomach and small intestine. Melæna also signifies hemorrhage from the intestines.

MELÆNA FUNGOSA CARCINODES, Hæmatodes fungus.

MELALEUCA LEUCADEN'DRON This and the *M. Cajaputi* afford the *Cajeput Oil* (see Cajeput.) The leaves are esteemed diuretic, stomachic, and emmenagogue.

MELAMPHYLLUM, *Acanthus mollis*.

MELAMPODIUM, *Helleborus niger*.

MELANAGOGUE, *Melanago'gus*, from *μελας*, 'black,' and *αγω*, 'I expel.' A medicine, which the ancients believed adapted for expelling black bile or melancholy.

MELANCHLOROS, from *μελας*, 'black,' and *χλωρος*, 'green.' The ancients gave this

name to certain dark-coloured topical remedies. See *Melæna*.

MELANCHOLE, *Atrabilis*.

MELANCHOLIA FLATULOSA, Hypochondriasis—*m. Nerveæ*, Hypochondriasis—*m. Suicidium*, Suicide—*m. Uterina*, Nymphomania.

MELANCHOLIC, *Melancho'licus*. One labouring under melancholy. That which belongs or relates to melancholy. In popular language, one of a gloomy disposition.

MELANCHOLY, *Melancho'lia*, from *μελας*, 'black,' and *χολη*, 'bile.' *Lycma'nia*, *Monoma'nia*, *Echphro'nia Melancho'lia*, *Mania Melancho'lia*, *Mania Melancho'lia*, *Tristema'nia*, (F.) *Melancolie*. A disease, supposed, by the ancients, to be caused by black bile. A variety of mental alienation, characterized by excessive gloom, mistrust, and depression, with insanity on one particular subject or train of ideas. *Panophobia*, *Demonomania*, *Erotomania*, *Nostalgia*, &c. may be referred to this head.

*Melancholy* is also used for unusual gloominess of disposition.

MELANCHOLY, EROTIC, Erotomania—*m. Love*, Erotomania.

MELANCHRUS, from *μελας*, 'black,' and *χρως*, 'a colour.' One attacked with black jaundice. It is probably an abbreviation of *Melanchloros*.

MELANCOLIE, *Melancho'ly*.

MÉLANGE PECTORAL, *Mistura acidi hydrocyanici*.

MELANICTERUS, *Melæna*.

MELANOPIPER, *Piper nigrum*.

MELANORRHAGIA, *Melæna*.

MELANOSIS, *Melan'sis*, *nigritudo*, *carcinoma melanoticum*, from *μελας*, 'black.' An organic affection, in which the tissue of the parts is converted into a black, hard, homogeneous substance, near which ulcers or cavities form;—owing to the softening, either of this substance itself, or of some other morbid tissue,—of tubercles especially. This morbid change affects the lungs particularly. It is, also, met with in the liver and cellular texture. Its causes are very obscure. The melanosis of the lungs constitutes one of the species of phthisis of Bayle; but it is impossible to distinguish it from the other species during life.

MELANOSMEGMA. See *Sapo*.

MELANSIS, *Melanosis*.

MELANTHUM, *Nigella*.

MELAS, *Lepra nigricans*.

MELAS'MA, *Echymoma Melasma*, *Nigror*, from *μελας*, 'black.' A black spot or ecchymosis, occurring on the lower extremities of old people.

MELAS'SES, *Molas'ses*, *Melus'tum*, *Theriaca communis*, *Treacle*. The syrup, which remains after the juice of the sugar-cane has been subjected to all the operations for extracting sugar from it. In the United States, the syrup, made in the process of forming common sugar, is called *melasses*; that remaining after the refinement of sugar being termed *sugar-house melasses* or *treacle*.

MELASSES SPIRIT, *Rum*.

MELATROPH'IA, from *μελος*, 'a limb,' and *ατροφια*, 'wasting.' Wasting of the limbs.

MELCA, *μελκα*. Food, made of acidulated milk.

MELE, *Specillum*.

MELEA, *Pyrus malus*.

MELEGETTA, *Amomum grana paradisi*.

MELEI'OS, *μηλειος*, *Mel'inus*, *Melius*. A species of alum, found in the island Melos.

MELÉZE, *Pinus larix*.

MELIA, *Fraxinus ornus*.

MELIA AZED'ARACH, *Poison Berry Tree*, *Azed'arach*, *Pride of India*, *Pride of China*, *Bead Tree*. *Nat. Ord.* *Meliacæ*; *Scz. Sys.* *Decandria Monogynia*. The bark of the root—called in India *Neem Bark*—is usually given in decoction, in the proportion of 3 or 4 ounces of the bark of the fresh root to a quart of water; boiled down to a pint. The dose is one or two table-spoonfuls, every two or three hours, till free purging is induced. It is given in this manner as an anthelmintic. It is sometimes formed into an ointment, and used in *timea capitis*.

MELIA TERRA, *Creta*.

MELICERIA, *Hydrarthrus*.

MELICE'RIS, *Melifavium*, from *μελι*, 'honey,' and *κηρος*, 'wax.' *Empfy'ma encystis melice'ris*. An encysted tumour, filled with a substance resembling honey.

MELICRATUM, *Hydromeli*.

MELIFAVIUM, *Meliceris*.

MELIGE'ION, from *μελι*, 'honey.' A fetid humour, of the consistence of honey, discharged from ulcers accompanied with caries of a bone.

MELILOTUS, *Trifolium melilotus*.

MELIME'LUM, from *μελι*, 'honey,' and *μηλον*, 'an apple.' A name given to two compounds:—one of honey and quince, the other of honey and apples.

MÉLINE, *Melæna*.

MELINI SULPHAS, *Cadmii Sulphas*.

MELINUM, *μηλινον*. The ancient name of an ointment, and of several plasters; described by Dioscorides and Galen: so called from their resembling the *μηλον*, or quince, in colour.

MELINUM SULPHURICUM, *Cadmii sulphas*.

MELINUS, *Meleios*.

MELI'SSA, from *μελισσα*, 'a bee,' (q. v.) because bees gather honey from it. *Melissa officinalis*, *Citra'go*, *Citra'ria*, *Melitei'a*, *Melissob'otos*, *Melita'na*, *Melissobot'anum*, *Meliss'a citra'ta*, *Melissophyl'lum*, *Melittis*, *Cedroncl'a*, *Apiast'rum*, *Melissa cit'rina*, *Ero'tion*, *Balm.* (F.) *Mélisse*, *La Citronnelle*. *Nat. Ord.* *Labiatae*. The leaves of balm have a pleasant odour; and an austere and aromatic taste. It was formerly much used in nervous diseases, but is now only employed when made into a tea, as a diuient, in febrile affections. It is the basis of a celebrated preparation,—the *Eau des Carmes*, (q. v.)

MELISSA CALAMIN'THA, *Calamin'tha*, *C. vulgaris*, *C. officinal'rum*, *Cal'amint*. (F.) *Calamint*. This plant smells like wild mint, though more agreeably. It is used, popularly, as a tea in dyspepsia; flatulent colic; hysteria; uterine obstructions, &c.

MELISSA GRANDIFLORA, *Calamin'tha magno flore*, *C. mont'na*, *Mountain Cal'amint*. This plant resembles the last in virtues.

MELISSA HUMILIS, *Melittis Melissophyllum*.

MELISSA NER'ETA, *Calamin'tha An'glica*. *C.*

*Pulegii odorè, Nepeta agrestis, Field Calaminut, Spotted Calaminut.* Formerly used as an aromatic.

MELISSA TURCICA, Dracocephalum canariense.

MÉLISSE DES BOIS, Melittis Melissophyllum—*m. de Moldavie, Dracocephalum canariense.*

MELISSOBOTANUM, Melissa.

MELISSOBOTOS, Melissa.

MELISSOPHYLLUM, Melissa, Melittis Melissophyllum.

MÉLISSOT, Melittis Melissophyllum.

MELITÆNA, Melissa.

MELITEIA, Melissa.

MELITHOCORTON, Carallina Corsicana.

MELITITES, Hydromeli.

MELITTA, Bee.

MELITTIS, Melissa.

MELIT'NIS MELISSOPHYLLUM, *Lad'mium montanum, Melissa humilis, Melissophyllum, Bastard Balm.* (F.) *Mélisse des Bois, Mélissot.* This plant was formerly employed, like the balm, in uterine obstructions.

MELITURIA, Urine, diabetic. See Diabetes.

MELIZOMUM, from *μελι*, 'honey,' and *ζωμος*, 'broth.' Mead. *Mell'na, Melheg'lin.* A drink prepared with honey.

MELLA'GO, from *mel*, 'honey.' Any medicine having the consistence of honey.

MELLI'NA, Melizomum.

MELLYTA, from *mel*, 'honey.' Prepared honeys:—medicated honeys.

MELLITE DE ROSES, Mel rosæ.

MELLITUM DE ACETATE CUPRI, Lini-mentum Æuginis.

MELLITUM DE MERCURIA'LI COMPOS'ITUM, (F.) *Miel de mercuriale composé, Syrop de longue vie.* (*Succ. purif. mercurialis* lbij, *boraginis, anchusæ officinalis*, aa lss, *iris pseudacori radices recent.* ℥ij, *rad. sic. gentianæ* ℥j, *mellis* lbij, *vini albi* ℥xiiij. Macerate the bruised roots in the wine, for 24 hours; strain. Mix the juices and honey; boil slightly, and filter: then add the two liquors, and boil to the consistence of syrup. ℥iss of *senna leaves* may be added to the syrup. *Ph. P.*) Cathartic, stomachic, &c.

MELLITUM DE ROSIS, Mel rosæ.

MELLITUM SIMPLEX, *Syrupus de Melle, Syrup of Honey.* (*Mellis* lbvj, *aqua* lbss, *carbonat. calcis. preparat.* ℥iij. Mix the honey, water, and carbonate of lime in a silver vessel: boil the mixture, stirring, at the same time, for 2 or 3 minutes: then add *prepared animal charcoal* ℥vj, *two whites of eggs*, mixed in a pint of water. Mix all, and boil to the consistence of syrup: remove from the fire; let the syrup rest for 15 minutes, and pass through a cloth. *Ph. P.*) Demulcent.

MELOCHITES, *Lapis Armænius, Armenitcs, Armænian Stone.* A variety of blue carbonate of copper. It is found in Germany, the Tyrol, and especially in Armenia. It was formerly employed as a cardiac, and as proper for purging away melancholy.

MEL'OE NIGER, *M. Pennsylvanicus.* A blistering fly, native of the United States. It feeds upon the *Prunella vulgaris* or *Self-heal*, and *Ambrosia trifida* or *Slick-weed*. These flies resemble the Spanish flies in properties.

MEL'OE PENNSYLVANICUS; *M. niger.*

THE MEL'OE PROSCARABÆUS, *Cantarellus*, was anciently used as a diuretic and anti-hydrophobic.

MEL'OE VESICATORIUS, Cantharis.

MEL'OE'EMIA, from *μελας*, 'black,' and *αίμα*, 'blood.' A state of blood, characterized by its incoagulability, black colour, and septic properties.

MELON, *μηλον.* A disorder of the eye, in which it protrudes out of the socket. See Exophthalmia.—Castelli.

MELON, Cucumis melo—*m. d'Eau, Cucurbita citrullus*—*m. Plant, Cucumis melo*—*m. Water, Cucurbita citrullus.*

MELONGENA, Solanum melongena.

MELOPLA'CUS, from *μηλον*, 'an apple,' 'a quince.' A compound obtained by boiling *wine, honey, quince, pepper, &c. together.*—Galen.

MELOPLAS'TIC, *Meloplus'ticus*; from *μηλον*, 'the cheek,' and *πλασσω*, 'I form.' The operation for forming a new cheek when any part of it has been lost.

MEL'OS, *μειλος, Membrum.* (q. v.) A member. An organized part, composed of other parts.—Castelli.

MEL'OSIS, *μηλωσις.* The act of probing a wound, ulcer, &c.—Hippocrates.

MELOTHIRUM, Bryonia alba.

MEL'OTIS, *Melo'tris, Specil'tum Minus.* A small probe,—a probe for the ear. See Apyromele.

MELOTRIS, Melotis.

MELUSTUM, Mellases.

MEMBRA'NA VERSICOLOR. A peculiar membrane—according to Mr. Fielding, of Hull—situate immediately behind the retina, and in connexion with it. It is separable into distinct layers from the choroid, and is supplied with blood-vessels.

MEMBRANA ABDOMINIS, Peritonæum—*m. Adiposa, Cellular membrane*—*m. Adventitia, Decidua reflexa*—*m. Agnina, Amnios*—*m. Amphiblestodes, Retina*—*m. Arachnoidea, Hyaloid membrane*—*m. Capsularis testis, Albuginea*—*m. Carnosa, Dartos*—*m. Cellulosa, Cellular membrane*—*m. Cellulosa, Decidua*—*m. Circumossalis, Periosteum*—*m. Communis, Decidua*—*m. Circumflexa, Pericardium*—*m. Cordis, Pericardium*—*m. Costalis, Pleura*—*m. Costas succingens, Pleura*—*m. Crassa, Decidua reflexa*—*m. Cribrosa, Decidua*—*m. Cuticularis, Dura mater*—*m. Decidua serotina, see Decidua*—*m. Demuriana, see Aqueous humour*—*m. Derinatodes, Dura mater*—*m. Dura cerebrum ambiens, Dura mater*—*m. Epicrania, Galea aponeurotica capitis*—*m. Fascininalis, Allantois*—*m. Filamentosa, Decidua reflexa*—*m. Flocculenta, Decidua*—*m. Fætum involvens, Amnios*—*m. Interspinalis, Interspinal ligament*—*m. Intestinalis, Allantois*—*m. Linguae, see Tongue*—*m. Macilentior, Epiploon, gastro-hepatic*—*m. Mucosa, Decidua*—*m. Nervorum, Neurilema*—*m. Nictitans, Valvula semilunaris*—*m. Olfactoria, Pituitary membrane*—*m. Ossis, Periosteum*—*m. Ovi materna, Decidua*—*m. Pellucida, Amnios*—*m. Pinguedinoso, Cellular membrane*—*m. Pituitaria, Pituitary membrane*—*m. Pleurætica, Pleura*—*m. Præexistans, Decidua*—*m. Pupillariss, Pupillary membrane*—*m. Propria, see Cortex ovi*—*m. Retiformis chorii, Decidua reflexa*—*m. Semipellucida, Caligo*—*m. Sinuosa,*

Decidua—*m.* Subcostalis, Pleura—*m.* Succingens, Diaphragm—*m.* Succingens, Pleura—*m.* Thoracem intersepiens, Mediastinum—*m.* Tympani, see Tympanum—*m.* Tympani secundaria, see Fenestra—*m.* Urinaria, Allantois—*m.* Uteri interna evoluta, Decidua—*m.* Vasculosa cerebri, Pia mater—*m.* Verricularis, Retina—*m.* Wachendorffiana, Pupillary membrane.

**MEMBRANE, Membrana, Hymen, Membr.**  
A name, given to different thin organs, representing species of supple, more or less elastic, webs; varying in their structure and vital properties, and intended, in general, to exhale, absorb, or secrete certain fluids; and to separate, envelop, and form other organs. Bichat has divided the membranes into simple and compound.

The SIMPLE MEMBRANES comprise three orders.

1. The MUCOUS MEMBRANES, *Membranes folliculeuses* (Ch.), so called, on account of the mucous fluid by which they are constantly lubricated. They line the canals, cavities, and hollow organs, which communicate externally, by different apertures in the skin. Bichat refers the mucous membranes to two great divisions—the *gastro-pulmonary*, and the *genito-urinary*. The mucous membranes have a striking analogy with the cutaneous tissue, in organization, functions, and diseases. They are composed of chorion, papillæ, and epidermis; and are furnished with a multitude of follicles, which secrete a viscid humour;—mucus. They receive a quantity of arterial vessels, veins, lymphatics, and nerves.

2. The SEROUS MEMBRANES, *M. villoses simples*, (Ch.) are transparent, thin, and composed of one lamina. One surface adheres to other textures; the other is smooth, polished, and moistened by a serous fluid. They are arranged—in the form of sacs without apertures—as great, intermediate reservoirs for the exhalant and absorbent systems, and in which the serous fluid in passing from the one system carries some time before it enters the other. The serous membranes resemble the cellular membrane in structure and diseases. They facilitate the motion of the organs which they envelop, one each other. They may be divided into, 1. *Serous membranes*, properly so called; as the arachnoid, pleura, peritoneum, and tunica vaginalis. 2. *Synovial membranes or Capsules*; which belong to joints, tendons, aponeuroses, &c.

3. FIBROUS MEMBRANES, *Membranes albugineuses* (Ch.) These are almost all continuous, and terminate at the periosteum—their common centre. They have been divided into two sections.

1. *Enveloping aponeuroses, Aponeuroses of insertion, Fibrous capsules of the joints, and Fibrous sheaths of tendons.*

2. The *Periosteum, Dura mater, Sclerotica, Tunica albuginea testis, Fibrous membrane of the spleen, &c.*

The fibrous membranes are not free or moistened by any particular fluid. They always adhere by both surfaces to the neighbouring parts; are firm, resisting, but slightly elastic, and of a white colour; sometimes pearly and glistening. They are chiefly composed of the *albuginous fibre*, (see Albuginous and Fibrous.)

These vessels are numerous, in some, as in the dura mater and periosteum: in others, scarcely sensible, as in the aponeuroses. The presence of nerves has never been proved, although several circumstances, regarding their sensibility, render their existence probable.

The fibrous membranes serve, in general, to augment the solidity of the organs which they envelop; to retain the muscles in their respective positions; to favour the motion of the limbs, and that of the muscles and skin; to form canals and rings for the passage of different organs, &c.

Bichat admits three species of *compound membranes*. 1. The *Sero-fibrous*, formed of a serous and fibrous lamina, intimately adherent to each other;—as the pericardium, dura mater, and tunica albuginea. 2. The *Sero-mucous*, formed of a serous and mucous lamina;—as the *gall-bladder* at its lower part. 3. The *Fibro-mucous*, constituted of the union of a fibrous and mucous membrane; as the *mucous membrane of the nasal fossæ, gums, &c.*

Chaussier admits six kinds of membranes. 1. The *laminated*. See Cellular Tissue. 2. The *serous or simple villous*: 3. The *follicular or complicated villous*: 4. The *muscular or fleshy*: 5. The *albugineous*: 6. The *albuminous*.

**MEMBRANE ACCIDENTAL, M. false—*m.* Accidentelle, M. false—*m.* Adnée, Conjunctiva—*m.* Adventitious, M. false—*m.* Anhistons, Decidua—*m.* Caduque, Decidua—*m.* Caduque réfléchie, Decidua (reflexa.)**

**MEMBRANE, FALSE, Accidental, Adventitious membrane, Pseudo-Membrane, Pseudymen, Pseudomeninx, (F.) Fausse membrane, M. accidentelle.** Membranous productions are so called, which form on all the free, natural surfaces, and on every free, accidental surface. They are, in general, produced by the exudation of a coagulable lymph, susceptible of organization, which takes place in consequence of inflammation of the various tissues. These accidental membranes occur on the skin after the application of a blister; on mucous surfaces, as in croup; on the parietes of inflamed veins and arteries, &c. The cicatrices of wounds are formed of them.

**MEMBRANE FAUSSE, Membrane false—*m.* Germinal, see Molecule—*m.* Pseudo, M. false—*m.* Ruyschienne, Ruyschiana tunica—*m.* du Tympan, see Tympanum.**

**MEMBRANES ALBUGINEUSES, Membranes, fibrous, see Albuginea—*m.* Folliculeuses, Membranes, mucous—*m.* Veloutées, Villous membranes—*m.* Villoses simples, Membranes, serons.**

**MEMBRANES OF THE FETUS, Membranes fatum involvèntes.** The membranes which immediately envelop the fœtus, in the cavity of the uterus, and the rupture of which gives rise to the discharge of the liquor amnii. These membranes are the *decidua, chorion, and amnion*, (q. v.)

**MEMBRANEUX, Membranous.**

**MEMBRANIFORM, Membraniformis:**—resembling a membrane. A name given to thin and flat parts, which resemble membranes.

**MEMBRANIFORM MUSCLES.** Very broad and thin muscles, as the *platysma myoides, obliquus abdominis, &c.*

MEMBRANOSUS, Fascia lata muscle.

MEMBRANOUS, *Membranosus*, *Hymenodes*, (F.) *Membranæus*. Having the nature of membrane. Formed of membranes.

MEMBRANULA LUNATA VAGINÆ, Hymen—m. Nervorum, Neurilema.

MEMBRE, Membrum—m. Viril, Penis.

MEMBRUM, *Artus*, *Melos*, *Colon*, a limb a member, (F.) *Membre*. The limbs or extremities or members of animals are certain parts, exterior to the body, which are more or less apparent, long, and movable. It is by means of their limbs, that animals transport themselves from one place to another: and that they defend themselves, or attack others. The limbs are arranged on each side of the trunk, with which they are articulated. In man, they are four in number;—two upper and thoracic, and two lower, pelvic or abdominal.

MEMBRUM MULIERE, Clitoris—m. Virile, Penis.

MÉMOIRE, Memory—m. *Perte de*, Amnesia. MEMORIA DELETA, Amnesia.

MEMORY, *Memoria*, *Mneme*, (F.) *Mémoire*. The cerebral faculty, by virtue of which past impressions are recalled to the mind.

MEMPHITES LAPIS. A sort of stone, found in the environs of Memphis; which was formerly esteemed narcotic.

MENAGOGUES, Emmenagogues.

MENDESION, Ægyptiacum.

MENE, Moon.

MENECRATIS ACCIPITER, Accipiter.

MENFRIGE. See Pistacia lentiscus.

MÉNINGE, Dura mater.

MÉNINGE, Meningeal.

MENINGEAL, *Meningæus*, (F.) *Méningé*. Relating to the meninges, or merely to the dura mater.

The MIDDLE MENINGEAL ARTERY, *Arteria meningæa média*, *A. Sphæno-spinosa*, *A. Dura Matris media maxima*, *A. Sphæno-spinalis*, *Spinal Artery*, (F.) *Artère méningée moyenne*, *A. Spléno-épineuse*, *A. Épineuse*, is the largest of the branches, given off by the internal maxillary artery. It enters the cranium by the foramen spinale, and distributes its branches chiefly to the dura mater.

MENINGES, *Eilamides*, *Matres Cerebri*, *Omenta*, from *μηνιξ*, 'a membrane.' The three membranes, which envelop the brain—Dura mater, Arachnoid, and Pia mater, (q. v.)

MÉNINGETTE, Pia mater.

MÉNINGINE, Same etymon. A name given by Chaussier to the pia mater, united to the cerebral layer of the arachnoid.

MENINGINE, INNER LAMINA OF THE, Pia mater.

MENINGION, Arachnoid membrane.

MENINGIS CUSTOS, Meningophylax.

MENINGITIS. Inflammation of the meninges or membranes of the brain. See Phrenitis.

MENINGITIS, TUBERCULAR, Hydrocephalus internus.

MENINGOPHYLAX, *Custos meningis*. *Depressorium*, (F.) *Dépressoire*, from *μηνιξ*, 'a membrane,' the dura mater; and *φυλαξ*, 'a preserver.' An instrument for depressing the dura mater, and guarding it from injury, whilst the bone is cut or rasped.

MENINGO'SIS. Same etymon. The union of bones by means of membrane; e. g. the articulation of the bones of the cranium in the fœtus. Meningosis is a variety of Syndesmosis.

MENJNX, Membranc—m. Choroides, Pia mater—m. Crassa, Dura mater—m. Dura, Dura mater—m. Exterior, Dura mater—m. Interior, Pia mater—m. Media, Arachnoid membranc—m. Pacheia, Dura mater—m. Sclera, Dura mater.

MENISPERMUM COCCULUS. *Family* Menispermæ. *Sex. Syst.* Diœcia Dodecandria. The systematic name of the plant, the berries of which are well known by the name of *Cocculus Indicus*, *Indian Berries*, *Baccæ Piscatoricæ*, *Cocculus suberosus*, *Indian Cockles*, *Cocculus Indicus*, *Cocculæ officinarum*, *Cocci orientales*, *Grana Orientis*, (F.) *Coque du Levant*, *Coquelevant*. These berries are remarkable for their inebriating and destructive quality to fish. The deleterious principle appears to reside in the kernel, and in the active principle called *Picrotox'inc*. The Cocculus Indicus has only been used in decoction to kill vermin. It has, at times, been added to beer, by fraudulent tradesmen, to render it more inebriating.

MENISPERMUM PALMATUM, Calumba.

MENISPERMUM TUBERCULATUM, *M. verrucosum*, *Cocculus crispus*. A Chinese plant, an extract from the root of which is tonic to the stomach and bowels, and possesses some astringency. Dose, 5 to 10 grains.

The same may be said of the *Menispermum cordifolium*—the *Goluncha*, of Bengal.

MENISPERMUM VERRUCOSUM, M. tuberculatum.

MENOCRYPTHIA, Amenorrhœa.

MENOLIPSIS. See Menses.

MENORRHAGIA, from *μην*, 'a month,' and *αγγημι*, 'I flow fiercely.' Flow of the menses. Frequently the word is used synonymously with uterine hemorrhage or metrorrhagia, (q. v.) or for immoderate flow of the menses—*profuse menstruation*, *Parame'nia superflua*, *P. profusa*, *Menorrhagia rubra*, *Catameniorum fluxus immodicus*.

MENORRHAGIA, Menstruation, Metrorrhagia—m. Alba, Leucorrhœa—m. Difficilis, Dysmenorrhœa—m. Erronea, Menstruation, erroneous—m. Stillitia, Dysmenorrhœa.

MENOSCHESIS. See Amenorrhœa.

MENOSTASIS, Amenorrhœa.

MENOSTASIS, from *μην*, 'a month,' and *στασις*, 'stasis,' 'stagnation.' This word, according to some, signifies the retention of the menses and their accumulation in the uterus. According to others, it means the acute pain which, in some females, precedes each appearance of the menses; a pain which has been presumed to proceed from the stasis of blood in the capillary vessels of the uterus.

MENOXENIA, from *μην*, 'a month,' and *ξενος*, 'foreign.' Irregular menstruation.

MENS, Anima.

MENSES, *M. Muliebres*, *Fluxus menstruus*, *F. lunaris*, *Profluvium muliebri*, *P. genitale muliebri*, *Consuetudo menstrua*, from *mensis*, 'a month.' *Catamenia*, *Menstrua*, *Emmenia*, *Tributum lunare*, *Purgatio'nes*, *P. menstrua*, *Gynœcacia*; the *Courses*, *Menstrual flux*, *Monthly courses*, *Flowers*, (F.) *Mois*, *Règles*, *Lu'nes*, *Flu-*

*eurs, Affaires, Époques, Ordinaires, Purgations, Pleurs, Menstrues.* The sanguineous evacuation from the uterus, the monthly recurrence of which constitutes *menstruation*, (q. v.)

The first appearance of the menses is usually preceded by the discharge of a fluid, whitish matter from the vagina; by nervous excitement, and by vague pains and heaviness in the loins and thighs; numbness of the limbs, tumefaction and hardness of the breasts, &c. More or less indisposition and irritability, also, precede each successive recurrence of the menstrual flux.

In temperate climates, each period ordinarily continues from three to six days; and the quantity lost varies from four to eight ounces. The menses continue to flow from the period of puberty till the age of 45 or 50. At the term of its natural cessation, *Menolip'sis*, the flux becomes irregular; and this irregularity is occasionally accompanied with symptoms of dropsy, glandular tumours, &c., constituting the *Parame'nia cessatio'nis* of Good, and what is called the *critical time of life*; yet it does not appear, that the mortality is increased by it.

With the immediate causes of menstruation we are unacquainted. We express only our ignorance, when we assert it to depend upon periodicity;—the discharge comes from the uterus, and vagina, and seems to be a true secretion from the lining membrane. It differs from blood, by its peculiar odour, and by its not coagulating. It is arrested, as a general principle, during pregnancy and lactation. In warm climates, women usually begin to menstruate early, and cease sooner than in the temperate regions. The quantity lost is also greater. In the colder regions the reverse of this holds, as a general rule.

**MENSES ALBI, Leucorrhœa**—m. *Dolorificæ, Dysmenorrhœa*—m. Retention of the, see *Amenorrhœa*—m. Suppression of the, *Amenorrhœa*.

**MENSTRUUA ALBA, Leucorrhœa.**

**MENSTRUAL FLUX, Menses.**

**MENSTRUATION, Menstruatio, Chronog'nea.** The flow of the menses. *Menorrhægia, Fluxus menstruatis.*

**VICARIOUS MENSTRUATION** is that which occurs from other parts than the uterus. It is called *Paramenia erroris, Menorrhagia erronea, Mensium per aliena loca exeretio*. At times, the secreted fluid has all the characters of the menstrual secretion: at others, it appears to be blood.

**MENSTRUATION, LABORIOUS, Dysmenorrhœa**—m. Profuse, *Menorrhagia*.

**MENSTRUUES, Menses.**

**MENSTRUUM, (F.) Menstruc.** This name was formerly given to every substance, which possesses the property of dissolving others slowly and with the aid of heat. At present, it is used synonymously with *solvent*. Thus,—water, alcohol, either, acids, oils, &c. are *menstrua*.

**MENSTRUUM AURI, Nitro-muriatic acid.**

**MENSURATIO, Mensuratio, from mensura, 'measure.' Mensurament.** One of the means, used for exploring the state of the thoracic and other cavities. It consists in a comparative measurement of each side of the chest,

by means of a ribband extended from the median line of the sternum to the spine. When effusion exists in one side the measurement is usually greater than on the other. When, on the other hand, a portion of a lung has ceased, for some time, to exert its respiratory functions, the corresponding side of the chest becomes smaller, in consequence of the contraction of the pleura, retraction of the pulmonary tissue and greater approximation of the ribs.

**MENTA, Penis.**

**MENTAGRA, Sycosis.**

**MENTAL, from mens, 'mind;'** belonging or relating to the mind, as, *mental phenom'ena, mental diseases, Morbi mentales, &c.*

In Anatomy, **MENTAL, Mentalis, (F.) Mentonnier,** signifies that which relates to the chin; from *mentum*, 'the chin.'

The **MENTAL FORAMEN, (F.) Trou mentonnier, Anterior maxillary F.** is the outer orifice of the inferior dental canal. It is situated on the outer surface of the lower jaw-bone, opposite the second incisor or the canine tooth, and gives passage to the following vessels and nerves.

The **MENTAL ARTERY, (F.) Artère mentonnière.** This is given off by the inferior dental, and issues at the mental foramen to be distributed on the lower lip.

The **MENTAL NERVE, (F.) Nef mentonnier,** is furnished by the inferior dental nerve. It issues by the mental foramen and is distributed, in numerous filaments, to the muscles of the lower lip.

**MENTHIA AQUATICA, Menthrastrum, S-symbrium menthrastrum, Mentha rotundifolia palustris, Watermint, (F.) Menthe aquatique, M. rouge. Nat. Ord. Labiate.** This is less agreeable than the *Mentha viridis*, and more bitter and pungent. It is used like *spearmint*.

**MENTHA CERVI'NA, Hart's pennyroyal, Hys-sop-leaved mint, Pulegium cervinum, (F.) Menthe cervine.** Possesses the properties of pennyroyal, but is very unpleasant.

**MENTHA CRISPA, Colymbifera minor, Curled Mint, (F.) Menthe frisse, Menthe crépue, Baume d'eau à feuilles ridées.** Possesses the properties of peppermint.

**MENTHA GENTILIS, M. viridis.**

**MENTHA PIPERITA, Mentha Piperitis, Peppermint, (F.) Menthe poivrée.** The odour of this variety is strong and agreeable. Taste pungent, aromatic, and producing a sensation of coldness in the mouth. Virtues depend upon essential oil and camphor. It is stomachic and carminative. It is chiefly used in the form of essential oil—the *oleum mentha piperita*.

The **ESSENCE OF PEPPERMINT** consists of the *ol. mentha pip. ʒij, sp. vin. rectific.*, coloured with *spinach leaves, lbj*.

**MENTHA PULEGIUM, Pulegium, Pulegium regale, Pulegium latifolium, Glechon, Pennyroyal, Pudding grass, (F.) Pouliot.** The oil—*Oleum pulegi*—possesses the virtues of the plant. It resembles the mints in general in properties. Amongst the vulgar it is esteemed as an emmenagogue.

**MENTHA ROMANA, Balsamita suaveolens, Tanacetum balsamita**—m. *Rotundifolia palustis, M. aquatica*—m. *Saracenicæ, Balsamita*

suaveolens, Tanacetum balsamita—*m. Sativa*, *M. viridis*—*m. Spicata*, *M. viridis*.

MENTHA VIRIDIS, *M. Sativa*, *M. vulgaris*, *M. gentilis*, *M. spicata*, *Spearmint*, (F.) *Menthe sauvage*, *Baume des jardins*, *Menthe verte*, *Menthe des jardins*. Odour strong, aromatic; taste, warm, austere, bitterish. Virtues the same as those of the peppermint. The *Oleum mentha viridis* is obtained from it.

MENTHA VULGARIS, *M. viridis*.

MENTHE AQUATIQUE, *Mentha aquatica m. Cervina*, *Mentha cervina*—*m. Coq*, *Tanacetum balsamita*—*m. Crêpe*, *Mentha crispa*—*m. Frissée*, *Mentha crispa*—*m. des Jardins*, *Mentha viridis*—*m. Poivré*, *Mentha piperita*—*m. Rouge*, *Mentha aquatica*—*m. Sauvage*, *Mentha viridis*—*m. Verte*, *Mentha viridis*.

MENTHRASTRUM, *Mentha aquatica*.

MENTO-LABIAL, *Mento-labialis*. Under this name Chaussier has united the Levator labii inferioris, (q. v.) and Quadratus muscles. See Depressor Labii inferioris.

MENTON, Mentum.

MENTONNIER, Mental—*m. Labial*, Depressor labii inferioris.

MENTONNIÈRE. See Funda.

MENTULA, Penis—*m. Muliebris*, Cercosis, Clitoris.

MENTULAGRA. A convulsive erection of the mentula or penis; such as is sometimes observed in eunuchs; a hybrid word, from *mentula*, 'the penis,' and *αγκη*, 'a seizure.'

MENTUM, *Geni'on*, *Anthe'ron*, 'the chin.' (F.) *Menton*. The inferior and middle part of the face, situate below the lower lip. The chin is formed of skin, cellular tissue, muscles, vessels, nerves, and of the os maxillare inferius.

MENYANTHES TRIFOLIATA, *Trifolium palud'sum*, *T. aquaticum*, *T. palus'tre*, *T. fibrinum*, *Menyanthes*, *Water trefoil*, *Buckbean*, *Bogbean*. *Nat. Ord.* Gentianæ, (F.) *Trèfle d'eau*. The taste is intensely bitter, and is extracted by water. It is tonic, anthelmintic, diuretic, cathartic, and, in large doses, emetic. In some countries, it is used as a substitute for hops in making beer.

MEPHITIC, *Mephil'icus*; from a Syriac word, signifying 'to blow, to breathe.' Any thing possessed of an unwholesome property; chiefly applied to exhalations.

MEPHITIS HEPATICA, Hydrogen, sulphuretted.

MEPHITISM. Same etymon. Any pernicious exhalation. *Mephitis* and *Moph'eta*, (F.) *Mofette* ou *Moufette*, are old names for azote; and, in general, for all exhalations and gases that are unfit for respiration.

MERACUS, Merus.

MERAMAUROSIS, Hypamaurosis.

MERCURE, Hydrargyrum—*m. avec la cruë*, Hydrargyrum cum cretà—*m. Cru*, Hydrargyrum—*m. Cyanure* de, Hydrargyri cyanuretum—*m. Doux*, Hydrargyri submurias—*m. Gommeux de Plenk*, Syrupus de mercurio mediante gummi—*m. Muriate oxygéné* de, Hydrargyri oxymurias—*m. Oxide de, cendré*, Hydrargyri oxydum cinereum—*m. Oxide gris* de, Hydrargyri oxydum cinereum—*m. Oxide nrique* de, Hydrargyri nitrico-oxydum—*m. Oxide noir* de,

Hydrargyri oxydum cinereum—*m. Oxide rouge* de, Hydrargyri oxydum rubrum—*m. Protochlorure* de, Hydrargyri submurias—*m. Sous-muriate* de, *precipité*, Hydrargyrum præcipitatum—*m. Sous-sulfate* de, Hydrargyri vitriolatus—*m. Sulfure* de, *noir*, Hydrargyri sulphuretum nigrum—*m. Sulphure* de, *rouge*, Hydrargyri sulphuretum rubrum.

MERCURIAL, *Mercurialis*. That which contains mercury; one of the preparations of mercury.

MERCURIALIS, *Mercurialis annua*, *French mercury*. It has been estimated cathartic, hypnotic and cosmetic, and has been chiefly used by way of lavement. See *Chenopodium Bonus Henricus*.

MERCURIALIS PERENNIS, *Cynoeram'bë*, *Canina bras'sica*, *M. mont'na*, *M. Sylv'es'tris*, *Dog's mercury*. This plant is possessed of acro-narcotic properties.

MERCURI CALX VITRIOLATA, Hydrargyri vitriolatus—*m. Sperma*, Hydrargyri acetatus—*m. Terra foliata*, Hydrargyri acetatus.

MERCURIUS, Hydrargyrum—*m. Acetatus*, Hydrargyri acetatus—*m. Alkalisatus*, Hydrargyrum cum cretà—*m. Calcinatus*, Hydrargyri oxydum rubrum—*m. Causticus flavus*, Hydrargyri vitriolatus—*m. Cinereus*, Hydrargyri oxydum cinereum—*m. Cinnabarinus*, Hydrargyri sulphuretum rubrum—*m. Corallinus*, Hydrargyri nitrico-oxydum—*m. Corrosivus*, Hydrargyri oxymurias—*m. Corrosivus ruber*, Hydrargyri nitrico-oxydum—*m. Corrosivus sublimatus*, Hydrargyri oxymurias—*m. Cosmeticus*, Hydrargyrum præcipitatum—*m. Dulcis*, Hydrargyri submurias—*m. Emeticus flavus*, Hydrargyri vitriolatus—*m. Gummosus Plenkii*, Syrupus de mercurio mediante gummi—*m. Luteus*, Hydrargyri vitriolatus—*m. Mortis*, Algaroth—*m. Niger Moscati*, Hydrargyri oxydum cinereum—*m. Præcipitatus corrosivus*, Hydrargyri nitrico-oxydum—*m. Præcipitatus niger*, Hydrargyri oxydum cinereum—*m. Saccharatus*, Hydrargyrum saccharatum—*m. Solubilis* of Hahnemann, see Hydrargyri oxydum cinereum—*m. Sublimatus dulcis*, Hydrargyri submurias—*m. cum Sulphure*, Hydrargyri sulphuretum nigrum—*m. Terrestris*, Polygonum hydropiper—*m. Vitæ*, Algaroth.

MERCURY, Hydrargyrum—*m. Acetate* of, Hydrargyri acetatus—*m. Bichloride* of, Hydrargyri oxymurias—*m. Biniodide* of, see Iodine—*m. Bromide* of, see Bromine—*m. with Chalk*, Hydrargyrum cum cretà—*m. Chloride* of, mild, Hydrargyri submurias—*m. Cyanuret* of, Hydrargyri cyanuretum—*m. Deuto-iodide* of, see Iodine—*m. Dog's*, Mercurialis perennis—*m. English*, *Chenopodium bonus Henricus*—*m. French*, Mercurialis—*m. Nitrate* of, Hydrargyri nitras—*m. Nitric oxyd* of, Hydrargyri nitrico-oxydum—*m. Oxide*, black or gray of, Hydrargyri oxydum cinereum—*m. Oxide* of, red, Hydrargyri oxydum rubrum—*m. Oxymuriate* of, Hydrargyri oxymurias—*m. Phosphuretted*, Hydrargyri phosphoratus—*m. Precipitate* of, white, Hydrargyrum præcipitatum—*m. Proto-iodide* of, see Iodine—*m. Prussiate* of, Hydrargyri cyanuretum—*m. Soluble*, Hydrargyri nitras—*m. Sulphuret* of, black, Hydrargyri sulphuretum nigrum—*m. Sulphuret* of, red, Hy-

drargyri sulphuretum rubrum, Realgar—m. Tartrate of, Hydrargyri tartaras.

MÈRE DES PLANS, Pian.

MERIDRO'SIS, from *μερος*, 'a part,' and *ἰδρῶσις*, 'sweating.' A partial perspiration.

MERISIER, Prunus avium.

MEROBALANEUM, Bath, Partial.

MEROBALNEUM, Bath, Partial.

MEROCE/LE, *Merorix'is*, *Merorrhex'is*, from *μηρος*, 'the thigh,' and *κληη*, 'tumour.' *Femoral* or *crural hernia*. (F.) *Hernie crurale* ou *femorale*. In this hernia, the viscera issue from the abdomen through the crural canal; or through an opening immediately on the outer side of Gimbernat's ligament, which gives passage to lymphatic vessels. This affection is more frequent in the female than in the male, and especially in those who have had children. The tumour, formed by the merocele, is generally small, round, and more or less difficult of reduction. In other respects, it possesses all the characters of hernia. The neck of the sac has, close on the outside, the epigastric artery; above, the spermatic cord and spermatic artery in the male—the round ligament in the female; on the inside, Gimbernat's ligament; and, below, the pubes. When the obturator artery arises from the epigastric it generally passes on the outside of and below the orifice of the sac; sometimes, however, it takes a turn above and then to the inside of the opening. J. Cloquet asserts, that of 134 cases, in one only did he find the epigastric artery on the inside of the orifice of the sac.

The operation, required in strangulation of this variety, may be practised on the aponeurotic opening, by cutting downwards and inwards, on the side of Gimbernat's ligament.

MERORRHESIS, Merocele.

MERORIXIS, Merocele.

MEROS, Femur, Thigh.

MERRY ANDREW. An itinerant quack, who exposes his nostrums for sale at fairs and markets. See Charlatan. They are so called from Dr. Andrew Boorde, who lived in the reigns of Henry VIII., Edward VI., and Queen Mary, and who was in the habit of frequenting fairs and markets at which he haranged the populace.

MERUS, *Mera'cus*, *Arcatos*, 'pure, genuine;' as *Vinum merum*, unmixed wine.

MERYCISMUS, Rumination.

MERYCOLO'GIA, from *μυρκο*, 'I ruminate,' and *λογος*, 'a description.' Any work on rumination may be so termed.

MESA, Genital organs.

MESARAIC, Mesenteric.

MESEMAR, Mismar.

MESEMBRYANTHEMUM COPTICUM. See Soda.

MESEMBRYANTHEMUM CRYSTALLINUM, *M. ficoi'des*, *Di'iamond fig-marygold*, *lee plant*. (F.) *Glaciale*, *Crystalline*. It has been recommended in dysuria, ischuria, and some other affections of the urinary organs.

MESENTERIC, *Mesara'ic*, *Mesenter'icus*, *Mesara'icus*, from *μεσεντεριον*, or *μεσαραιον*, 'the mesentery.' That which relates or belongs to the mesentery.

The MESENTERIC ARTERIES are two in number, and distinguished into, 1. The *Superior*

*mesenteric*, which arises from the anterior part of the abdominal aorta, below the cœliac. It immediately descends to the left, forwards, behind the pancreas, and in front of the third portion of the duodenum,—to gain the superior extremity of the mesentery, where it makes a long curvature, the convexity of which is turned forwards and to the left. Towards the termination of the ileum, it ends by anastomosing with a branch of the *A. colica dextra inferior*. At its concavity, it gives off the three *Arteria colica dextra*, which belong to the great intestine; and, at its convexity, it sends off fifteen or twenty branches, which are distributed to the small intestine; after having formed numerous arches by their anastomoses.

2. The *Inferior Mesenteric Artery* arises from the anterior part of the abdominal aorta, an inch and a half before its termination. It descends, on the left side, behind the peritoneum; engages itself in the substance of the iliac mesocolon, forming a considerable curvature, whose convexity faces the left side. When it reaches the brim of the pelvis, it passes along the posterior separation of the mesorectum, and attains the neighbourhood of the anus, under the name *Superior hemorrhoidal artery*. It gives off no branch at its concave part; but, from the convex, the three *Arteria colica sinistra* arise.

The MESENTERIC or MESARAIC VEINS are two in number, and belong to the vena porta. They are distinguished into, 1. The *Superior mesenteric* or *mesaraic*, or *great mesaraic*. This trunk receives, from above to below and on the right side, the three *vena colica dextra* and the *Gastro-epiploica dextra*. Into its left side, the veins of the small intestine open. It passes in front of the transverse portion of the duodenum; and, behind the pancreas, unites with the splenic vein to concur in the formation of the vena porta.

The *inferior* or *lesser mesenteric vein* corresponds to the artery of the same name, and opens into the splenic, near the union of that vein with the superior mesenteric, and behind the pancreas.

The MESENTERIC PLEXUSES are furnished by the solar plexus, and have been distinguished into *superior* and *inferior*; like the mesenteric arteries which they accompany.

The MESENTERIC GLANDS are the lymphatic ganglions of the mesentery. Through them, the chyloferous vessels pass to the thoracic duct. Their uses are unknown. When diseased, nutrition is interfered with, and atrophy produced.

MESENTERIC HERNIA. If one of the layers of the mesentery be torn by a blow, whilst the other remains in its natural state, the intestines may insinuate themselves into the aperture, and form a kind of hernia. It is not known during life.

MESENTERITIS, *Empres'ma peritonit'is mesenter'ica*, *Enterit'is mesenter'ica*, *inflammation of the mesentery*. The pain is here deeper seated and more immediately in the mesenteric region. The external tenderness is less than in some of the other varieties of peritonitis. See *Tabes Mesenterica*.

MESENTERY, *Mesenter'ium*, *Mesaraion*, *Mesen'teron*, *Mesera'um*, *Mesora'um*, *Medium intesti'num*, from *μεσος*, 'in the middle,' and

εἴτερον, 'an intestine,' (F.) *Mésentère*. A term applied to several duplicatures of the peritoneum, which maintain the different portions of the intestinal canal in their respective situations; allowing, however, more or less mobility. They are formed of two laminae, between which are contained the corresponding portion of intestine and the vessels that pass to it. One only of these duplicatures has received the name *mesentery*, properly so called. This belongs to the small intestine, which it suspends and retains *in situ*. Its posterior margin, which is the smallest, is straight, and descends obliquely from the left side of the body of the second lumbar vertebra to the right iliac fossa. Its anterior margin is curved, undulating, plaited, and corresponds to the whole length of the small intestine. The mesentery contains, between the two laminae which form it, a number of lymphatic ganglions; the trunks and branches of the mesenteric vessels; the nervous plexuses, accompanying them, and many lacteals and lymphatics.

MESERA, Tutia.

MESERÆUM, Mesentery.

MESERAION, Mesentery.

MESIAMUM, Aniceton.

MESIRE. A disorder of the liver, mentioned by Avicenna, accompanied by a sense of heaviness, tumour, inflammation, pungent pain, and by blackness of the tongue.

MESMERISM, Magnetism, animal.

MESOBREGMATE See Cranium.

MESOCÆCUM. A name given to a duplicature of the peritoneum, (in some persons only,) at the posterior part of the cæcum.

MESOCÉPHALE. Medulla oblongata.

MESOCEPHALUM, Pons varolii.

MESOCION'DRIAC, *Mesochondriacus*; from *μεσος*, 'middle,' and *χονδρος*, 'cartilage.' A name given by Boerhaave to fleshy fibres situate between the cartilaginous rings of the trachea.

MESOCOLIC HERNIA. Hernia is so named by Sir Astley Cooper, when the bowels glide between the layers of the mesocolon.

MESOCOLON, from *μεσος*, 'in the middle,' and *κολον*, 'the colon.' A name given to the duplicatures of the peritoneum, which fix the different parts of the colon to the abdominal parietes. It has received different names, according to its situation. The *right lumbar mesocolon* fixes the ascending colon to the corresponding lumbar region. The *transverse mesocolon* arises from the concave arch of the colon, and forms a septum between the epigastric and umbilical regions. Its inferior portion is continuous with the mesentery. The *left lumbar mesocolon*, which contains the ascending colon, is continuous below with the *Iliac mesocolon*. The last includes between its layers the sigmoid flexure of the colon and ends in the mesorectum. Under the right kidney, it is narrow and firm, and forms the *right ligament of the colon*; at the under end of the left kidney, it forms the *left ligament of the colon*.

MESOCRANIUM, Sinciput.

MESODME, Mediastinum.

MESODMI'TIS, from *μεσοδμη*, 'the mediastinum,' and *itis*, 'inflammation.' *Mediastinitis*. Inflammation of the mediastinum.

MESOGLOSSUS, Genio-glossus  
MESOLO'BAR, belonging to the *Mésolobe* or *Corpus callosum*.

THE MESOLOBAR ARTERIES are the arteries of the corpus callosum.

MESOLOBE, Corpus callosum.

MESOMERIA, from *μεσος*, 'middle,' and *μηρος*, 'the thigh.' The parts of the body situate between the thighs.

MESOMERION, Perinæum.

MESOMPHALUM, Umbilicus.

MESOPH'RYON, *Glabella*. The part of the face between the eyebrows; from *μεσος*, 'the middle,' and *οφρυα*, 'the eyebrows.'

MESOPLEURIOS, Intercostal.

MESORÆUM, Mesentery.

MESORECTUM. A hybrid word; from *μεσος*, 'middle,' and *rectum*, 'the intestine rectum.' A triangular reflection, formed by the peritoneum, between the posterior surface of the rectum and the anterior surface of the sacrum. Between the two layers of which the mesorectum is composed are found much cellular tissue and the termination of the inferior mesenteric vessels.

MESOSCELOCELE, Hernia, perineal.

MESOSCELOM, Perinæum.

MESOTH'ENAR, from *μεσος*, 'the middle,' and *θεναρ*, 'the thenar,' 'the palm of the hand.' A muscle, which carries the thumb towards the palm. Winslow applied the term to the abductor pollicis, united to the deep-seated portion of the flexor brevis pollicis.

MESOT'ICA, from *μεσος*, 'middle.' Diseases, affecting the parenchyma. Pravity in the quantity or quality of the intermediate or connecting substance of organs; without inflammation, fever, or other derangement of the general health. The 1st Order, class *Ecritica* of Good.

MES'PILUS, *Mespilus Germanica*. The *medlar*, (F.) *Néflier*. (Fruit) *Nèfle*. The fruit and seeds of the medlar have both been used medicinally:—the immature fruit as an astringent, and the seeds in nephritic diseases. See *Cratægus Aria* and *Sorbus Acuparia*.

MESPILUS ONYACAN'THA, *Oxyacantha*, *Spina alba*, *White Hawthorn*, (F.) *Subepine*. The flowers of this common European plant are sometimes used in infusion as a pectoral.

META, *μετα*, *Meth'*, *μέθ'*, 'with,' 'together with,' 'after,' 'change of form and place.' A common prefix to words. Hence:

METAB'ASIS, *μεταβασε*, *Transitus*, *Metabolē*, *Meta'lagē*, from *μεταβαίνω*, 'I digress.' A change of remedy, practice, &c.—Hippocrates.

METABOLE, Metabasis.

METACAR'PAL, *Metacarpia'nus*, (F.) *Métacarpien*. Relating or belonging to the metacarpus.

THE METACARPAL BONES, or bones which compose the metacarpus, are five in number; and distinguished into *first*, *second*, *third*, &c. beginning from the outer or radial side.

They are articulated, by their superior extremity, with the bones of the second range of the carpus; and, by the lower, with the first phalanges.

THE METACARPAL RANGE or ROW of the carpal bones, (F.) *Rangée métacarpienne du carpe* is the lower row of carpal bones; so called be-

cause they are articulated with the bones of the metacarpus. It is composed of the trapezium, trapezoides, magnum, and unciforme.

The METACARPAL PHALAN'GES are the first phalanges of the fingers; so called, because they are articulated with the bones of the metacarpus.

The METACARPAL ARTICULA'TIONS are those by which the four last metacarpal bones are united together, at their upper extremity.

The METACARPAL ARTERY or *Art'ria dorsalis metacarpi* arises from the radial, at the moment it engages itself in the upper extremity of the abductor indicis. It descends obliquely upon the back of the hand. Its branches are distributed to the abductor indicis, and the integuments; some communicate with the dorsalis carpi.

The METACARPAL LIG'AMENT, or *Inferior palmar Ligament*, is a fibrous band, stretched transversely before the inferior extremities of the last four metacarpal bones, which it keeps in their respective positions.

METACARPEUS, Adductor metacarpi minimi digiti.

MÉTACARPIEN, Metacarpal—*m. du petit doigt*, Opponens minimi digiti—*m. du Pouce*, Opponens pollicis.

METACARPO-PHALANGÆUS POLLICIS, Adductor pollicis manus.

METACARPO-PHALAN'GIAN, *Metacarpo-phalangianus*, (F.) *Métacarpo-phalangien*. That which belongs to the metacarpus and phalanges.

The METACARPO-PHALANGIAN ARTICULATIONS are formed by the bones of the metacarpus and the corresponding phalanges. In these articulations, the bony surfaces are incrustated with cartilage, covered by a synovial membrane and kept in connexion by means of an anterior and two lateral ligaments.

MÉTACARPO-PHALANGIEN LATÉRAL SUS-PALMAIRE ET MÉTACARPO-PHALANGIEN LATÉRAL, Intercossum manus.

METACARPUS, from *μετα*, 'after,' and *carpus*, 'the wrist.' *Metacar'pion*, *Postbrachia'le*, (F.) *Métacarpe*. The part of the hand comprised between the carpus and fingers. It is composed of five parallel bones, called *metacarpal*; forming the back of the hand, externally, and the palm internally.

METACERASMA, Cerasma.

METACHEIRIXIS, Surgery.

METACHORESIS, Metastasis.

METAL, *Metalum*. A class of simple, combustible bodies; distinguished from others by considerable specific gravity; a particular splendour; almost total opacity; insolubility in water; and the property they have of ringing when struck. Metals have no effect, except of a mechanical nature, when taken into the stomach; unless they have already undergone, or undergo, in the stomach, oxidation or union with an acid; when several most deleterious compounds may be formed. Copper cents; half-pence; quicksilver; lead, have frequently been swallowed in the metallic state with impunity. Tin and mercury are the only metals used to produce a mechanical effect;—the former as an antihelminthic,—the latter, idly enough, in cases of fancied intus-susception.

MÉTAL DES CLOCHES, Bell metal.

METALLAGE, Metabasis.

METALLIC VOICE, *Tintement métallique*.

METALLUM, Metal.

METAMORPHOP'SIA, from *μεταμορφωσις*, 'I transform,' and *ωψ*, 'the eye.' *Suffusio*, *Suffusio Oculorum*. *Imagination* (Maître-Jean.) *Crupia*, *Myodesopsia*, *False sight*. (F.) *Berluc*. Aberration of the sense of sight, which transmits the image of imaginary objects. This affection sometimes depends on a slight opacity in the transparent parts of the eye; the cornea, crystalline, or vitreous humour, when it is symptomatic, and of no consequence. At other times, it appears to be idiopathic; and occurs particularly in those, who have been in the habit of constantly fixing their eyes on very brilliant or small bodies. The objects, fancied to be seen, are various. They are sometimes circular, perpetually moving, or shining or black spots, cobwebs, insects, or pieces of wood—when they are often termed *Musca volitantes*, (F.) *Mouches volantes*, and the condition *Visus muscarum*, *Scotom'ata*, *Suffusio Myodes*, *Myodesopsia*, *Myodesopsia*. These appearances sometimes continue for a few days; being dependent on the state of the nerves of the individual at the time; or they may exist for life, and ultimately impair the sight.

If the affection be symptomatic, it is of but little moment. If idiopathic, and connected with any excitement of the brain, which is not often the case, attention will have to be paid to that organ.

MÉTANGISMOS, Decantation.

METAPÉDIUM, Metatarsus.

METAPHRENON, Dorsum.

METAPHYTEIA, Transplantation.

METAPODIUM, Metatarsus.

METAPOROP'EIA, *Metaporop'ois*, from *μετα*, 'after,' *πορος*, 'a pore,' and *ποιειν*, 'to make.' The change produced in the minute pores,—in the capillary extremities of vessels,—when they pass from the morbid to the healthy condition.—Galen.

METAPTO'SIS, *Metaschematis' mus*. Mutation; change; from *μεταπτωω*, 'I digress.' Any change in the form or seat of a disease.

METASCHEMATISMUS, Metaptosis.

METAS'TASIS, *Metachore' sis*, from *μεθιστημι*, 'I change place.' *Displacement*, *Translocation*. A change in the seat of a disease; attributed, by the Humorists, to the translation of the morbid matter to a part different from that which it had previously occupied; and, by the Solidists, to the displacement of the irritation. It has also been used in the same extensive sense as Metaptosis, (q. v.) Disputes have often been indulged, whether a case of metastasis ought not rather to be esteemed one of extension of the disease. The phenomena of gout and acute rheumatism are in favour of metastasis occasionally supervening.

METASTATIC, *Metastalicus*. Belonging or relating to metastasis. *A metastatic crisis* is one produced by metastasis;—*a metastatic affection*, one caused by metastasis, &c.

METASYN'CRISIS, from *συνζηρω*, 'I compose,' and *μετα*, 'which indicates a change.' *Recomposition*. A word, employed by some disciples of Asclepiades. This physician supposed, that all animals are formed by the union

or assemblage of atoms. He designated all bodies by the word *συνγκριματα*; which signifies 'assemblage.' *Συνγκριεσθαι*, 'to be assembled,' was, with him, synonymous with 'to exist,' and *διαγκριεσθαι*, 'to separate,' was, with him, synonymous with 'to dissolve,' 'to cease to exist.' The word *Metasyncrisis* was invented to express the reposition of bodies after their momentary dissolution. Some have rendered the word by the Latin *Recorporatio*.

**METASYNCRITIC**, *Metasynerit'icus*, *Recorporati'vus*. Belonging or relating to metasyncrisis. A name, formerly given to medicines to which was attributed the virtue of producing the metasyncrisis or regeneration of the body or of some of its parts.

**METASYNCRITIC CYCLE** meant a determinate series of remedies, employed for this purpose.

**METATARSAL**, *Metatar'seus*, (F.) *Métatarsien*. Relating or belonging to the metatarsus.

The **METATARSAL BONES**, (F.) *Os metatarsiens*, are five in number, and distinguished by their number; *first, second, third, &c.*, reckoning from the outer side.

The **METATARSAL ROW**—(F.) *Rangée métatarsienne*—of the bones of the tarsus, is the second row, or that contiguous to the metatarsus; comprehending the cuboides and three cuneiform bones; some add the scaphoides.

The **METATARSAL PHALANGES** are the first phalanges of the toes; so called, because they are united to the metatarsus.

The **METATARSAL ARTICULATIONS** are those resulting from the juncture of the metatarsal bones with each other. They are strengthened, *behind*, by *dorsal*, and *plantar* ligaments; and, *before*, by a *transverse metatarsal ligament*, which is plantar, and has the greatest analogy to the *inferior transverse metacarpal ligament*.

The **METATARSAL ARTERY**, *Sus-métatarsienne* of Chaussier, arises from the *A. dorsalis Tarsi*; passes transversely over the back of the foot; and furnishes, at its convexity, which is anterior, three branches, called *A. interos'ca dorsales Pedis*. These branches are distributed in the interosseous spaces.

**METATARSEUS**. See *Abductor minimi digiti pedis*.

**MÉTATARSIEN**, Metatarsal.

**METATARSO-PHALANGIAN**, *Metatarso-phalangianus*. Relating to the metatarsus and phalanges.

The **METATARSO-PHALANGIAN ARTICULATIONS** are formed by the bones of the metatarsus and the corresponding phalanges. They bear the greatest analogy to the *metacarpophalangian articulations*, (q. v.)

**MÉTATARSO-PHALANGIEN-LATÉRAL**. See *Interossei pedis*.

**METATARSUS**, *Metatar'sium*, *Metap'edium*, *Metapodium*, from *μετα*, 'after,' and *ταπος*, 'the tarsus.' The instep. That part of the foot which is situate between the tarsus and toes, corresponding with the metacarpus. It is composed of five parallel bones; one to each toe. Like the metacarpal bones, they are developed from two points of ossification.

**METATH'ESIS**, from *μετατιθημι*, 'I change place,' *Transposi'tio*, (q. v.) An operation, by which a morbid agent is removed from one

place to another, where it may produce less disturbance in the exercise of the functions:— as, for example, in the operation of depressing cataract, or when a calculus, in the urethra, is pushed back into the bladder.

**METATOPTOSIS**, Diadexis.

**METEORISMUS**, Sublimation, Tympanites.

**METEOROL'OGY**, *Meteorol'ogia*, from *μετεωρωε*, 'a meteor,' and *λογος*, 'a discourse.' The science, whose object is a knowledge of the origin, formation, appearance, &c. of meteors. The state of the atmosphere has a most important bearing on the health of animals. The whole range of epidemic affections have their causes seated there. Meteorological observations, have, hence, ever been attended to, by the physician, for the purpose of detecting the precise character of any particular epidemic influence.

The barometer, thermometer, and hydrometer are the instruments used with this intent—to detect, as well the varying weight or pressure, and the temperature, as the moisture. Perhaps of the three conditions, the last exerts more influence, in the production of disease, than either of the others. Our knowledge, however, of this part of Physics is extremely limited and unsatisfactory.

**METER**, *μετρον*, *Metrum*, 'a measurer,' a suffix to words denoting 'a measurer,' as in *Barometer*, *Pleximeter*, &c.

**METHEMACHYMIA**, Transfusion.

**METHE**, *Temulentia*.

**METHEGLIN**, *Melizomum*.

**METHEMERINOS**, Quotidian.

**METHOD**, *Meth'odus*. This word has different acceptations in the sciences. In Medicine, *curative method* is the methodical treatment of disease.

**METHOD**, Mariano's. See *Lithotomy*.

The **NUMERICAL METHOD**, *Method of Observation* of Louis, consists in observing every case and every symptom of a case numerically, so as to ensure, as far as practicable, accuracy of observation; and to enable us by the analysis and collation of such facts to deduce general laws and conclusions.

**METHODIQUES**, Methodists.

**METHODISTS**, *Method'ical Sect.* (F.) *Méthodistes*, *Méthodiques*. A sect of physicians, whose doctrine was in vogue after that of the Empirics and Dogmatists, towards the end of the first century. According to the Methodists, of whom Themison was the chief, almost every disease was dependent on contraction or relaxation;—*strictum* or *laxum*. To these two causes, they added a third—*mixed* or *compound*—to include those affections which partook of the two characters. The doctrine resembled, in some respects, that of Brown.

**METHODOLOGY**. (MEDICAL) *Methodol'ogia Medica*. A word used, by the French more especially, to signify *method* applied to the study of any science. *Medical Methodology*, consequently, means *method* applied to the study of Medicine.

**METHODUS CELSIANA**, see *Lithotomy*—*m. Curatoria*, 'Therapeutics'—*m. Franconiana*, see *Lithotomy*—*m. Guytoniana*, see *Lithotomy*—*m. Mendendi*, 'Therapeutics.'

**METHOMANIA**, from *μεθη*, 'drunkenness,'

and *μανια*, 'mania.' An irresistible desire for intoxicating substances.

**METOPANTRALGIA**, from *μετωπον*, 'the forehead,' *ωντρον*, 'a cavity,' and *αλγος*, 'pain.' Pain in the frontal sinuses.

**METOPANTRITIS**, from *μετωπον*, 'the forehead,' and *ωντρον*, 'a cavity,' and *itis*, denoting inflammation. Inflammation of the frontal sinuses.

**METOPION**, Bubon galbanum.

**METOPODYNIA**, Neuralgia frontalis.

**METOPON**, Front, Frontal bone.

**METOPOSCOPY**, *Metoposcopya*, from *μετωπον*, 'the forehead,' and *σκοπειν*, 'to view.' The art of knowing the temperament and character of a person, by inspecting the traits of his forehead or face. See Physiognomy.

**METRA**, Uterus.

**METRALGIA**, from *μητρα*, 'the womb,' and *αλγος*, 'pain.' Pain in the uterus.—Baldinger.

**METRANASTROPHE**, Uterus, inversion of the.

**METRATRESIA**, from *μητρα*, 'the womb,' and *ατρασια*, 'inperforation.' An unnatural closure of the uterus.

**METRELCOISIS**, *Metrelcoisis*, from *μητρα*, 'the womb,' and *ελκος*, 'an ulcer.' Ulceration of the uterus.

**METREMPHRAXIS**, from *μητρα*, 'the uterus,' and *εμφρασσω*, 'I obstruct.' Obstruction of the womb. A name, under which some authors have confounded chronic inflammation of that viscus, and the different degenerations to which it is exposed.

**METRENCHYTA**, *Metrenchytes*, from *μητρα*, 'the uterus,' and *εγγυω*, 'I inject.' Injection of the uterus. Substances injected into the uterus are also called *Metrenchyta*.

**MTRHELCOISIS**, Metrelcosis.

**METRIOPATHIA**, from *μετριος*, 'tempered,' and *παθος*, 'affection.' State of an individual, whose passions are temperate.

**METRYTIS**, from *μητρα*, 'the womb.' *Febriis uterina*, *Hysteritis*, *Empresma Hysteritis*, *Inflammatio Uteri*, *Inflammation of the Uterus or Womb*. (F.) *Inflammation de la matrice*. The characteristic symptoms of this affection are:—pain, swelling, and tenderness in the hypogastric region; with heat, pain, and tenderness of the os uteri; vomiting, smallness, and frequency of pulse.

It occurs, most frequently, after delivery, when there is, generally, suppression of the lochial discharge.

The treatment must be vigorous. Bleeding early, so as to make a decided impression: followed by a full dose of opium, fomentations, blisters, &c.

Acute inflammation of the womb, seated in its internal membrane, has been called *Inflammatio catarrhalis uteri* or *Acute catarrh*, (F.) *Catarrhe aigu*, of that viscus. It is known by the discharge of a clear, stringy fluid, *per vaginam*; preceded by pains, which, from the hypogastric region, shoot to the thighs, groins, &c. with more or less fever. It requires the antiphlogistic treatment.

*Chronic metritis* sometimes succeeds the acute. To it must be referred the indurations, observed in the uterus, and many of the leucorrhœal discharges, to which females are subject.

**METROCARCINOMA**, *Cancer uteri*, from *μητρα*, 'the uterus,' and *καρκινωμα*, 'cancer.' Cancer of the uterus.

**METROCELIDES**, Nævus.

**METROLOXIA**, Hysteroloxia.

**METROMANIA**, Nymphomania.

**METROPATHIA**, from *μητρα*, the 'womb,' and *παθος*, 'affection.' An affection of the womb.

**METROPERITONITIS**, from *μητρα*, 'the uterus,' and peritonitis. Inflammation of the uterus and peritoneum. Puerperal Fever. See Peritonitis.

**METROPTOSIS**, Prolapsus uteri.

**METRORRHAGIA**, *Hæmorrhagia uterina*, *Sanguifluxus uterinus*, *Hæmorrhœa uterina*, (of some,) *Menorrhœgia*, (of some,) *Uterine Hemorrhage*, *Hemorrhage from the Womb*; (F.) *Hémorrhagie de la Matrice*, *Perte*, *Perte utérine rouge*, from *μητρα*, 'the womb,' and *ρηγγυμι*, 'I break forth.' An effusion of blood from the inner surface of the uterus, either at the menstrual or other periods; but in a greater quantity than proper.

Uterine hemorrhage may be caused by those influences which produce hemorrhage in general. It happens, however, more frequently during pregnancy, and during or after delivery, when the vascular system of the uterus is so circumstanced as to favour its occurrence more than at other periods.

The termination of metrorrhagia is usually favourable. Should it, however, be very copious, or frequently recur; or, should it happen to a great extent after delivery, death may occur very speedily; and, in some cases, without the discharge being perceptible; constituting *internal hemorrhage*.

Uterine hemorrhage may be *active* or *passive*; requiring obviously a different treatment. The general management is similar to that of Hemorrhage in general, (q. v.); as the horizontal posture; acid drinks; free admission of cool air; cold applications to the loins, thighs, and abdomen; injection of cold water, even of iced water, into the vagina; plugging the vagina, so as to prevent the discharge *per vaginam*, and thus induce a coagulum in the mouths of the bleeding vessel. Such will be the *special* plan adopted where the hemorrhage has occurred in one not recently delivered.

In uterine hemorrhage, after delivery, the same cooling plan must be followed; but, as the flow of blood is owing to the uterus not contracting so as to constrict its vessels, pressure must be made on the abdomen to aid this; and, if necessary, the hand must be introduced into the uterus to stimulate it to contraction. Should the female be excessively reduced, so as to render the accoucheur apprehensive that she may expire from loss of blood, brandy may be exhibited. The profuse exhibition of opium in such cases, is, at least, a doubtful plan.

Transfusion (q. v.) has, at times, been practised as a last resource.

**METRORRHÆXIS**, Uterus, rupture of the.

**METROTOMIA**, Cæsarean section.

**MEU**, *Æthusa meum*.

**MEULIÈRE**, Molar.

**MEUM**, *Æthusa meum*.

**MEURTRISSURE**, Contusion.

MEVIUM, Syphilis.

MEZEA, Genital organs.

MEZEREON, Daphne Mezereum.

MIASM, *Miasma*, *Inquinamentum*, *Contagium*. The word *miasm* has, by some, been employed synonymously with contagion. It is now used more definitely: for any emanation, either from the bodies of the sick, or from animal and vegetable substances, or from the earth, especially in marshy districts, (*marshpoison*, *Effluvium palustre*, *Gas palustre*.) which may exert a morbid influence on those who are exposed to its action. To these terrestrial emanations—the *Koino-miasmata* of Dr. E. Miller of New York—the Italians give the name *aria cattica*, but, more commonly, *malaria*; a word which has been adopted into other languages. The deleterious effluvia, originating from the decomposition of matter derived from the human body, have been called by Dr. Miller, *Idio-miasmata*: the epithets *Koino* and *Idio* being derived respectively from *κοινος*, 'common,' and *ιδιος*, 'personal.'

Of the miasms, which arise either from the animal body or from the most unhealthy situations, we know, chymically, nothing. All that we do know, is, that, under such circumstances, emanations take place, capable of causing disease in many of those who are exposed to their action.

MIASMATIC, *Miasmaticus*. Belonging or relating to miasmata. Sauvages, in his classification of diseases according to their etiology, has a class under the name *Morbi miasmatici*. The fevers that arise from marshy miasms, are styled *malaria*, *paludal*, *Helopyræ*, *Helopyretoræ* &c.

MICÆ PANIS. See Triticum.

MICATIO CORDIS, Systole.

MICHELIA CHAMPACA, *Champaca*, *Champacam*, *Michelia Tsjampaca*, *Tsjampaca*. An Oriental tree, much prized for the odour and beauty of its flowers. The oily infusion of the flowers is employed, in the Moluccas, in headache.

MICROCOSM, *Microcosmus*, from *μικρος*, 'little,' and *κοσμος*, 'world.' A little world. Some philosophers have given this appellation to man, whom they consider as the epitome of all that is admirable in the world. The world they call *Macrocosm*.

MICROCOSMA SCIENTIA, Physiology.

MICROCOSMOGRAPHIA, Physiology.

MICROCOSMOTIC, *Microcosmoticus*, from *μικρος*, 'small,' and *ακουω*, 'I hear.' This word, as well as *Microphonous*, from *μικρος*, 'small,' and *φωνη*, 'voice,' means any thing that contributes to increase the intensity of sound—as the speaking trumpet—by collecting the sonorous rays.

MICROGLOSSIA, from *μικρος*, 'small,' and *γλωσσα*, 'tongue.' Original smallness of tongue.

MICROLEUCONYMPHÆA, *Nymphæa alba*.

MICROPTHALMOS, from *μικρος*, 'little,' and *οφθαλμος*, 'eye.' One who has small eyes.

MICROCHIDES, from *μικρος*, 'small,' and *σχιδις*, 'a testicle.' They who have very small testicles.

MICROSPHYCTOS, from *μικρος*, 'small,'

and *σφυγμος*, 'pulse.' One who has a small pulse.

MICTIO CRUENTA, *Hæmaturia*—*m.* Inopportuna, *Enuresis*—*m.* Involuntaria, *Enuresis*—*m.* Sanguinea, *Hæmaturia*.

MICTURITION, *Mictio*, *Mictus*, from *Micturio*, 'I make water.' The act of making water.

MICTUS CRUENTUS, *Hæmaturia*.

MIDRIFF, Diaphragm.

MIDWIFE, from *μιδ*, 'with,' and *πις*, 'wife;' or, from *μιδ*, 'meed,' 'recompense,' and *πις*, 'wife.' *Matro'na*, *Obstet'rix*, *Hyperc'tria*, *Mæa*, *Macuria*, *Acces'toris*. (F.) *Sage-femme*, *Accoucheuse*. A female who practises midwifery.

MIDWIFERY, Obstetrics.

MIEL, Mel—*m.* *d'Acétate de Cuivre*, *Lini-mentum æruginis*—*m.* *Mercuriale composé*, *Mellitum de murcuriali compositum*—*m.* *Rosat*, Mel Rosæ.

MIEUTER, *Accoucheur*.

MIGRAINE, *Hemicrania*.

MIGRANA, *Hemicrania*.

MIKANA GUACO, Guaco.

MILFOIL, *Achillea millefolium*.

MILIAIRE, Miliary fever.

MILIARY (FEVER,) *Emphlysis miliaria*, *Miliaria*, *Miliaris*, *Febbris miliaris*, *Ezanthéma miliaria*, *Syn'ochus miliaria*, *Aspre'do miliaria*, *Febris esserd'sa*, *Febbris puncticul'dris*, *F. culicula'dris*, *F. ocsicula'dris*, *Pur'pura puerpera'rurum*, *P. miliar'ris*, *Febbris purpura'te rubra et alba miliar'ris*, *Pur'pura alba benign'a et malig'na*. (F.) *Miltaire*, *Millot*, *Pourpre blanc*, *Millet*. It is so called, from the eruption resembling the seed of the *milium* or *millet*. Fever, accompanied by an eruption of small, red, isolated pimples, rarely confluent, but almost always very numerous, slightly raised above the skin, and presenting, at the end of 24 hours, a small vesicle filled with a white, transparent fluid; which quickly dries up, and separates in the form of scales. Miliary fever is now rare, in consequence of the cooling practice in fevers and other states of the system. It is, almost always, brought on by external heat, and hence the prevention is obvious. The treatment is simple. It requires merely the antiphlogistic regimen, in ordinary cases.

MILII SEMINA, *Panicum Italicum*.

MILIOLUM, Diminutive of *milium*, 'millet,' *Cenchrion*. A small tumour on the eyelids, resembling, in size, a millet-seed.

MILITARIS HERBA, *Achillea millefolium*.

MILIUM, *Grutum*, *Panicum miliaceum*, see *Hydatid*—*m.* *Indicum*, *Panicum Italicum*—*m.* *Solis*, *Lithospermum officinale*.

MILK, *Lac*, *Gala*, (F.) *Lait*. A fluid, secreted by the mammary glands of the females of the mammalia.

The *skimmed milk of the cow*, (F.) *Lait de Vache*, contains water, caseous matter, traces of butter, sugar of milk, muriate, phosphate, and acetate of potass, lactic acid, lactate of iron, and one atom of earthy phosphate.

The *cream* is formed of butter, caseum, and whey, in which there is sugar of milk and salts. Cow's milk is employed for the preparation of cream, butter, cheese, whey, sugar of milk, and frangipane. It is useful in a number of cases of poisoning; either by acting as a de-

mulcent, or by decomposing certain poisons, or by combining with others so as to neutralize them. It is constantly employed as aliment, and may be regarded as an emulsion, in which butter and caseum are found in suspension. When taken into the stomach, it is coagulated by the gastric fluids, and the coagulum is digested like any other solid. The watery parts are absorbed.

MILK, ALMOND, Emulsio amygdalæ.

MILK, ASSES', (F.) *Lait d'ânesse*, considerably resembles human milk, of which it has the consistence, smell, and taste: but it contains a little less cream, and more soft, caseous matter. It is often used by those labouring under pulmonary affections.

MILK, EWES'. (F.) *Lait de Brebis*. It affords more cream than cows' milk; but the butter is softer. The caseum, on the contrary, is fatter, and more viscid. It contains less serum than cows' milk. The Roquefort cheeses are made from it.

MILK, GOATS', (F.) *Lait de Chèvre*,—resembles cows' milk: the butyraceous matter, however, which enters into its composition, is more solid than that of the cow.

MILK, HUMAN, (F.) *Lait de femme*,—contains more sugar, milk, and cream, and less caseum, than cows' milk. Its composition differs according to the distance of time from delivery.

MILK, MALE'S, Sperm.

MILK, MARES', (F.) *Lait de Jument*,—contains only a small quantity of fluid, butyraceous matter; a little caseum, softer than that of cows' milk, and more serum.

From a considerable number of experiments, Messrs. Deyeux and Parmentier class the six kinds of milk, which they examined, according to the following table, as regards the relative quantity of the materials they contain.

| Caseum. | Butter. | Sugar of Milk. | Serum. |
|---------|---------|----------------|--------|
| Goat    | Sheep   | Woman          | Ass    |
| Sheep   | Cow     | Ass            | Woman  |
| Cow     | Goat    | Mare           | Mare   |
| Ass     | Woman   | Cow            | Cow    |
| Woman   | Ass     | Goat           | Goat   |
| Mare    | Mare    | Sheep          | Sheep  |

MILK SICKNESS. A disease, occasionally observed in the States of Alabama, Indiana and Kentucky, and which affects both man and cattle, but chiefly the latter. It is attributed in cattle to something eaten or drunk by them; and in man to the eating of the flesh of animals labouring under the disease. Owing to the tremors that characterize it in animals, it is called the *Trembles*.

The symptoms of the disease are such as are produced by the acro-narcotic class of poisons—vomiting, purging, extreme nervous agitation, &c.: and the approved indications of treatment appear to be—gentle emetics and laxatives, with quiet, and mucilaginous drinks.

MILK, SNAKES', *Euphorbia corollata*—m. Sugar of, Sugar of milk—m. of Sulphur, Sulphur precipitatum—m. Vetch, *Astragalus verus*—m. Vetch, stemless, *Astragalus exscapus*—m.

Weed, *Asclepias Syriaca*, *Euphorbia corollata*—m. Wort, bitter, *Polygala amara*—m. Wort, common, *Polygala*—m. Wort, rattlesnake, *Polygala senega*.

MILLEFEUILLE, *Achillea millefolium*.

MILLEFOLBIUM, *Achillea millefolium*.

MILLEMORBIA SCROPHULARIA, *Scrophularia nodosa*.

MILLEPEDES, *Onisci aselli*.

MILLEPERTUIS ORDINAIRE, *Hypericum perforatum*.

MILLET, Miliary fever—m. Barbodoes, Panicum Italicum—m. Common, Panicum miliaceum—m. Indian, Panicum Italicum—m. *des Oiscaux*, Panicum Italicum—m. *Ordinaire*, Panicum miliaceum.

MILLIGRAMME, from *mille*, 'a thousand,' and *γραμμα*, 'a gramme.' The thousandth part of a gramme;—about 0.0154 Troy grain.

MILLIGRANA, *Herniaria glabra*.

MILLIMETRE, from *mille*, 'a thousand,' and *μετρον*, 'measure.' The thousandth part of the metre;—equal to 0.03937 Engl. inch, or about two-fifths of a line.

MILL MOUNTAIN, *Linum catharticum*.

MILLOT, Miliary fever.

MILPHÆ, Madarosis.

MILPHOSIS, Madarosis.

MILT WASTE, *Asplenium*.

MIMOSA CATECHU, *Catechu*—m. *Milotic*, see *Acacia gummi*—m. *Scandens*, *Cachang-Parang*—m. *Senegal*, see *Senegal*, gum.

MIND, ABSENCE OF, *Aphelxia socors*—m. Abstraction of, *Aphelxia intenta*—m. Unsound, Insanity.

MINERALIUM, Antimonium.

MINIMUM. A *minim*. The 60th part of a fluid drachm. This measure has been introduced by the London College of Physicians, in consequence of the uncertainty of the size of the drop, (see *Gutta*.) The subdivision of the wine pint has, accordingly, been extended to the 60th part of the fluid drachm; and glass measures, called *minim* measures, have been adopted by the London College. The proportion between the *minims* and the drops of various fluid preparations is exhibited in the following table. The results were obtained by Mr. E. Durand, a skilful *Pharmacien*, of Philadelphia, under circumstances as regards the different articles, as nearly identical as possible.

TABLE OF THE NUMBER OF DROPS OF DIFFERENT LIQUIDS EQUIVALENT TO A FLUID DRACHM.

|  | Drops. |
|--|--------|
| Acid Acetic Crystallizable, - - -  | 120    |
| Acid Hydrocyanic (Medicinal), - - -  | 45     |

MINISTER GYMNASTÆ, Pædotriba.  
 MINIU, Plumbi oxydum rubrum—m. Græcorum, Hydrargyri sulphuretum rubrum—m. Purum, Hydrargyri sulphuretum rubrum.

MINORATIVUS, Laxative.

MINT, COCK, Tanacetum balsamita—m. Curled, Mentha crispa—m. Cat, Nepeta—m. Horse, Monarda punctata—m. Hyssop-leaved, Mentha cervina—m. Pepper, Mentha piperita—m. Spear, Mentha viridis—m. Water, Mentha aquatica.

MINUTHESES, Meiosis.

MISANTHROPIA, *Misanthropy, Exanthropia*, from *μισος*, 'hatred,' and *ανθρωπος*, 'man.' Aversion for men and society. A symptom of melancholy, and hypochondriasis.

MISCARRIAGE, Abortion.

MISERERE MEI, Iteus.

MISHME TEETA, *Coptis Teeta*.

MISMAR, *Mesemar*. A name given by Avicenna to a kind of nodus, which forms on the toes as the sequel of contusion or inflammation of those parts.

MISOPTOCHOS, from *μισος*, 'hatred,' and *πτωχος*, 'poor.' That which has hatred for the poor. The gout (q. v.) has been so called by some, because it commonly affects the rich.

MIS'TLETOE, *Viscum album*.

MISTURA. *A mixture*. A mingled compound, in which different ingredients are contained in the fluid state; suspended or not by means of mucilaginous or saccharine matter. In this sense, it is synonymous with the French *Potion*. In France, however, the word *mixture* is more frequently understood to mean a liquid medicine, which contains very active substances and can only be administered by drops. A mixture, in other words, in the French sense, may be regarded as a *potion*, (q. v.) deprived of watery vehicle.

MISTURA AC'IDI HYDROCYAN'ICI, *Mixture of Prussic acid, Mélange pectoral* (Magendie.) (*Medicinal prussic acid*, 1 drachm, *distilled water*,  $\frac{3}{14}$ , *pure sugar*,  $\frac{3}{10}$ .) A dessert spoonful every morning and evening, as a pectoral, &c.

MISTURA AMMONI'ACI, *Lac ammoniaci, Mixture of ammoniac*. (*G. ammoniac*,  $\frac{3}{11}$ , *aque liss*. Rub the ammoniacum: adding the water gradually, until they are perfectly mixed. *Ph. L.*) Dose,  $\frac{3}{10}$  to  $\frac{3}{11}$ .

MISTURA AMYGDALÆ, *Emulsio amygdalæ*.

MISTURA ASAFETIDÆ, *Lac asafetida, Emulsio antihysterica, Mixture of asafetida*, (F.) *Lait d'asafetida*. (*Asafetida*,  $\frac{3}{11}$ , *aque*, liss. Rub together, adding the water by degrees. *Ph. L.*) Used where pills cannot be swallowed and as a

*Drops*. glisten in irritations during dentition and in ascariades. Dose,  $\frac{3}{10}$  to  $\frac{3}{11}$ .

MISTURA ASAFETIDÆ PRO CLYSMATE, *Eneina fætidium*.

MISTURA CAMPHORÆ, *Camphor mixture, Camphor julep, Mistura camphorata, Jula' piura e camphorâ seu camphoratum*, (F.) *Julep camphoré*. (*Camphor*  $\frac{3}{10}$ ; *rectified spirit*, 10 minims, *water* a pint. Rub the camphor and spirit; add the water and filter.) Virtues like those of camphor. See *Emulsio Camphoræ*.

MISTURA CORNU USTI, *Decoctum cornu cervini, Decoctum album, Decoction of burnt hartshorn, Mixture of burnt hartshorn*. (*Cornu ust.*  $\frac{3}{11}$ , *acacia gum*, cont.  $\frac{3}{11}$ , *aque* liss.) Boil to liss, constantly stirring and strain. (*Ph. L.*)

MISTURA CRETÆ, *Potio carbonatis calcis, Mistura creta' cea, Mucil' go creta' cea, Chalk mixture*, (F.) *Mixture de craie*. (*Creta* pp.  $\frac{3}{10}$ , *sacchar. purif.*  $\frac{3}{11}$ , *acacia gumm.*  $\frac{3}{10}$ , *aque* liss. *Mix Ph. L.*) Antacid and absorbent. Dose,  $\frac{3}{11}$  to  $\frac{3}{12}$ .

MISTURA DIABOL'ICA. A mixture under this name is kept in military hospitals for the malingerers. It is made of sundry nauseous ingredients, as aloe, asafetida, castor, &c., and is given so as to keep up a disagreeable depression on the gustatory nerves.

MISTURA EMETI'NÆ VOMITORIA, *Emetic Mixture of emetine*. (*Emetine*, 4 gr., *orange-flower water*  $\frac{3}{11}$ , *syrup*,  $\frac{3}{10}$ , *M.*) A dessert spoonful every half hour till it acts.

MISTURA FERRI COMPOS'ITA, *Compound mixture of iron*, (F.) *Mixture de fer composée, Griffith's mixture*. (*Myrrh.* cont.  $\frac{3}{11}$ , *potasse subcarb.* gr. xxiv, *aque rosæ*  $\frac{3}{10}$ , *ferri sulph. cont.*  $\frac{3}{11}$ , *sp. myristic.*  $\frac{3}{10}$ , *sacchar. pur.*  $\frac{3}{11}$ . Rub together the myrrh, subcarbonate of potass, and sugar; then add, while triturating, the rose-water, spirit of nutmeg; and, lastly, the sulphate of iron. Pour the mixture directly into a glass bottle and stop it close. *Ph. L.*) It is tonic and emmenagogue and is useful wherever iron is indicated.

MISTURA GUA'YACI, *Mixture of guaiac, Lac guaiaci, Emulsio guaiacina, Mixture guaiaci gummo'sa, M. gummi guaiaci Bergeri, Solutio guaiaci gummo'sa, S. resina guaiaci aquo'sa*, (F.) *Mixture de Guaiac. G. resin.*  $\frac{3}{10}$ , *sacch. pur.*  $\frac{3}{11}$ , *muc. acacia gum.*  $\frac{3}{11}$ , *aq. cinnam.*  $\frac{3}{10}$ . Rub the guaiacum with the sugar; then with the mucilage. Add, gradually, the cinnamon water. *Ph. L.*) Dose,  $\frac{3}{10}$  to  $\frac{3}{11}$ .

MISTURA GUMMI GUA'YACI BERGERI, *Mistura Guaiaci*—m. Leniens, Looch ex ovo.

MISTURA MOSCHI, *Musk mixture, Mistura moschata*. (*Moschi, acacia gum contus.*, *sacch. purif.*, *sing.*  $\frac{3}{11}$ , *aq. rosæ*  $\frac{3}{10}$ . Rub the musk with the sugar; add the gum, and, by degrees, the rose-water. *Ph. L.*) Dose,  $\frac{3}{10}$  to  $\frac{3}{11}$ .

MISTURA STRYCHNI'NÆ, *Mixture of strychnine*. (*Distilled water*,  $\frac{3}{11}$ , *very pure strychnine*, 1 gr., *white sugar*  $\frac{3}{11}$ , *M.*) Dose, a dessert spoonful.

MISTURA SULPHURICO-ACIDA, *Elixir acidum Halleri*—m. *Vulneraria acida, Arquibusade cau d'*.

MITELLA, Sling.

MITHRIDATE, *Mithridatium, Antidotum mithridaticum, Diasci'ci antid'otus, Confectio Dumocratis*. A very compound electuary, into

which entered—*Myrrh*, of Arabia, *Saffron*, *Agarie*, *Ginger*, *Cinnamon*, *Frankincense*, *Garlic*, *Mustard*, *Birtherwort*, *Galbanum*, *Castor*, *Long pepper*, *Opoponax*, *Bdellium*, *Gum Arabic*, *Opium*, *Centian*, *Orris*, *Sagapenum*, *Valerian*, *Acacia*, *Hypericum*, *Canary wine*, *Honey*, &c. It was invented by Mithridates, king of Pontus and Bithynia, and was formerly regarded as alexipharmic. It is little used at the present day; and, from its heterogeneous nature, should be wholly abandoned.

MITRA HIPPOCRATICA, *Bonnet d'Hippocrate*.

MITRAL, *Mitra'tis*. Having the form of a mitre; resembling a bishop's mitre.

The MITRAL VALVES, *Valvule mitra'les*, *V. episcopales*. Two triangular valves, at the opening of communication between the left auricle of the heart and the corresponding ventricle. These valves are formed by the inner membrane of the left cavities of the inner heart; and are retained on the side of the ventricle by tendinous cords, proceeding from the columnæ carneæ. They form species of valves, which permit the blood to pass from the auricle into the ventricle and oppose its return.

MITTE (F.), *Efflu'vium Latrini'rium*. An emanation exhaled from privies, which strongly irritates the eyes. It consists of ammonia, united to the carbonic and hydro-sulphuric acids.

MIXTURE, *Mistura*—m. of Ammoniac, *Mistura ammoniaci*—m. of Asafœtida, *Mistura Asafœtida*—m. *Calnante*, *Looch ex ovo*—m. *Camphor*, *Mistura camphoræ*—m. *Camphor*, *Mistura camphoræ*—m. *Chalk*, *Mistura Cretæ*—m. *de Craie*, *Mistura cretæ*—m. of Emetine, *emetic*, *Mistura emetine vomitoria*—m. *de Fer composée*, *Mistura ferri composita*—m. *de Gayac*, *Mistura Guaiaci*—m. *Griffith's*, *Mistura ferri composita*—m. of Guaiac, *Mistura Guaiaci*—m. of Hartshorn, *burnt*, *Mistura cornu usti*—m. *compound*, *Mistura ferri composita*—m. *Musk*, *Mistura moschi*—m. of Prussic acid, *Mistura acidi hydrocyanici*—m. of Strychnine, *Mistura strychninæ*.

MNEME, Memory.

MNEME CEPHALICUM BAL'SAMUM. A very compound medicine, into which entered *Balm*, *Lily*, *Rosemary*, *Lavender*, *Borage*, *Broom*, *Roses*, *Violet*, *Saffron*, *Thyme*, *Storax*, *Galbanum*, &c.

MNEMONEUICE, Mnemonics.

MNEMONICS, *Mnemon'icæ*, *Mnemoneu'ticæ*, from *μνησμαι*, 'I recollect.' The art of aiding the memory by signs; and of forming, in some sort, an artificial memory.

MOANING, from Sax. *mænan*, 'to grieve.' *Respira'tio luctuo'su*, *Myelthis' mos*. A plaintive respiration, in which the patient utters audible groans.

MOBILITY, *Mobil'itas*. The power of being moved. In *physiology*, great nervous susceptibility joined to a disposition to convulsion. Greatly developed excitability.

MOCHLIA. Reduction of a luxated bone; from *μοχλος*, a lever.

MOCHLICUS, Purgative.

MOCK-KNEES, *Crusta genu equinæ*.

MODIOLUS. One of the hollow cones in the cochlea of the ear, forming a nucleus, axis, or central pillar, round which the gyri of the

cochlea pass. The modiolus forms the inner and larger portion of the central pillar, and is the cavity seen at the bottom of the meatus auditorius internus. It lodges a branch of the auditory nerve. The central portion of the modiolus contains a number of minute canals, and is called in consequence *Tractus spiralis foraminulosus*. Into these the nerves of the cochlea enter, and pass out at right angles between the bony plates forming the *Zona ossea* of the lamina spiralis, to be expanded on the membranous portion of the lamina.

MONIOTUS also means the Crown of the trepan.

MODIUS. A dry measure, the third of an amphora, equal to the bushel.—Varro.

MODUS OPERAN'DI. This term is applied to the general principle upon which remedies act in morbid states of the body;—a subject of much interest, although involved in considerable obscurity.

The following classification will convey some idea of the ways in which different organs may be excited into action.

#### TABLE.

1. By actual or immediate contact of the remedy, and by absorption or mediate contact.
2. By an impulse conveyed by the nerves, through an impression made on the stomach or elsewhere.
3. By contiguous or continuous sympathy, or by that which is excited by mere proximity and continuity of parts.

MOELLE, Marrow—m. *Allongée*, *Medulla oblongata*—m. *Epinière*, *Medulla spinalis*—m. *Vertébrale*, *Medulla spinalis*.

MOFETTE. See Mephitism.

MOFFAT, MINERAL WATERS OF. Moffat is a village situate about 56 miles S. W. of Edinburgh. The water is a cold sulphureous; containing, in a wine gallon, 36 grains of muriate of soda, 5 cubic inches of carbonic gas, 4 of azote, and 10 of sulphuretted hydrogen. It resembles Harrogate water in its properties.

MOGILA'LIA, from *μογίς*, 'with difficulty,' and *λαλέω*, 'to speak.' Difficult articulation. This word is inaccurately written by Paul Zaochias,—*Mola'lia*, *Molilal'gia*, and *Mohal'gia*. Impediment of speech. See Balbuties.

MOHAWK TASSEL, *Eupatorium purpureum*.

MOIS, Menses.

MOISTURE, *Mador*, (F.) *Moiteur*. Simple humidity of the skin. The skin is said to be moist or in a state of moisture, when there is slight perspiration.

MOITEUR, Moisture.

MOLA, Patella.

MOLAGOCODI, *Piper nigrum*.

MOLAIRE, Molar.

MOLALIA, Mogilalia.

MOLAR, *Mola'ris*, *Mylicus*, (F.) *Molaire*, *Moulière*. That which bruises or grinds; from *molaris*, 'a grindstone,' or *mola*, 'a millstone.'

The MOLAR TEETH, *Grinders*, *Jaw Teeth*, *Molares permanentes dentes*, *Dentes molares*, *Gomphioi*, (F.) *Dents molaires* ou *mâchelières*, occupy the farther part of each alveolar arch. Their coronæ are broader than they are high; unequal, tuberculated; and the roots are more or less subdivided. They are 20 in number, 10 in each jaw.

The two first pairs of molar teeth, in each

jaw, have been called *lesser molares* or *biscuspid* (q. v.), *Dentes bicuspidati*. The coronæ have two tubercles; the external being more prominent and larger than the inner. The root is commonly simple; sometimes bifurcated.

The other three pairs have been termed, *Great molares*—*Dents multicuspidées* (Ch.) Their coronæ are cubical, rounded, and have, at the upper surface, four or five tubercles, separated by deep furrows. The root is divided into two, three, four, and five *fangs*, which are more or less curved.

The third great molaris appears a long time after the others; and, hence, has been called *Dens sapientiæ* or *Wisdom tooth*.

**MOLAR GLANDS.** Two small bodies formed by a collection of mucous crypts; seated in the substance of the cheeks, between the masseter and buccinator muscles, and whose excretory duct opens into the mouth opposite the last molar tooth.

**MOLASSES, Melasses.**

**MOLE, Mola**, from *moles*, 'mass.' *Myle*,  $\mu\lambda\lambda$ , *Zephyrius factus*, *Germen falsum*, *Pseudocycy'sis molaris*, *Graviditas molaris*. A fleshy, insensible, at times, soft,—at others, hard mass; of variable and indeterminate size, which forms in the uterus and is slightly united by vessels to that organ; from which its feeble vitality is derived. It has been conceived by some to be always owing to imperfect conception; but moles may form in the undoubted virgin. They seem to be owing to a morbid process; and certainly are generally connected with conception. At times, they contain parts of the fœtus; but commonly do not.

At very different periods, in different women, the diseased mass is expelled from the uterus, with ordinary symptoms of abortion; and the case requires similar management. See, also, *Nævus* and *Conception*, (*false*.)

**MOLECULE, Molec'ula, Mass'ula**; diminutive of *Moles*, 'a mass.' A minute portion of any body. Also, the *cicatricula, ma'cula*, *tread* of the *cock*, or embryo part of the impregnated ovum, observable by the microscope before the ovum has left the ovarium of the hen. It lies under the epidermic coats of the yolk, and upon its proper coat. If the ovum, according to Valentin, be lacerated and its contents minutely examined, the cicatricula is found like a grayish white disk, which in its whole periphery, is dense, granulous, and opaque, but in the centre presents a clear nongranulous and perfectly diaphanous point. Purkinje found, that when he removed the dark granulous mass by suction with a small tube, there remained a perfectly transparent vesicle filled with a pellucid lymph, which had a decidedly spherical form, but being extremely delicate, was easily lacerable, and then its fluid escaped. As he found this, which later naturalists have named—after its discoverer—the *Purkinjean vesicle*, in the ova of the ovary, but could not see it in ova, which had already entered the oviduct, he gave it the name *germinal vesicle*. The granulous membrane—its thickened portion, the so called "cicatricula,"—and the germinal vesicle, constitute those parts of the ovum, which pass immediately into the original foundation

of the embryo, the *blastoderma* or *germinal membrane*.

**MOLÈNE, Verbascom nigrum.**

**MOLLALGIA, Mogilalia.**

**MOLIMEN.** 'An attempt or struggle.'

**MOLIMEN HÆMORRHOÏD'ALE.** The hemorrhoidal diathesis or impulsion.

**MOLIMEN MENSTRU'ALE.** The menstrual diathesis or impulsion.

**MOLIMEN HÆMORRHAG'ICUM.** The hemorrhagic diathesis or impulsion.

**MOLLESCENCE, Mollities.**

**MOLLET, Sura.**

**MOLLIPUFFS, Lycoperdon.**

**MOLLIS MATER, Pia mater.**

**MOLLIT'IES, Molles'cenæ, Malacis'mus, (F.) Ramollissement**, from *molles'cere*, 'to become soft.' Preternatural softness of an organ or part of an organ.

**MOLLITIES CEREBRI, Malaco'sis Cer'ebri, Encephalomalacia, Mollescence**, or *softening*, or a kind of liquefaction of the cerebral substance; the remainder preserving its ordinary consistency, (F.) *Ramollissement du cerveau*. The symptoms denoting it are equivocal.

**MOLLITIES OS'SIUM, Malaco'sted'sis, Malacos'teon, Parost'ia flex'ilis, Osteosored'sis, Spina vento'sa** (of some,) *Osteomalacia, Soft'ening of the bones, (F.) Ostéo-malacie, Ostéo malaxie, et Ostéo-malaxie, Ramollissement des os*. A rare affection in which the bones are deprived of their salts, particularly of the phosphate of lime, and consist only, or mainly, of gelatine; hence they acquire a degree of suppleness, which renders them unfit for the performance of their functions. The disease generally affects all the bones; but it is especially remarkable, during life, in the long bones which assume any curvature that may be wished. Very violent pain is often experienced in them; and the urine frequently contains an enormous proportion of calcareous phosphate. The patient is compelled to remain in the horizontal posture; the bones no longer being fixed points for the muscles to act upon. The disease has, hitherto, always terminated fatally, and dissection has exhibited the gelatinous nature of the bones; which, by desiccation have become transparent, as if they had been macerated in acid.

Experience has afforded no means of relief in this dreadful affliction. The alkaline salts, earthy phosphates, &c. are of little or no use.

**MOLLUSCUM, Atheroma.**

**MOLOPS, Vibices.**

**MOLYBDÆNUM MAGNESII, Manganese**, black oxide of.

**MOLYBDOS, Plumbum.**

**MOLYNE, Anus.**

**MOMIE, Mummy.**

**MOMIN, Mamei.**

**MOMOR'DICA BALSAMINA, Balm-apple, Balsam apple.** (F.) *Balsamine, Pomme de merveille*. The fruit of this oriental tree, *Pomum hierosolymita'nus*, was formerly considered vulnery.

**MOMOR'DICA ELATE'RIMUM, Elate'rium, Cucumis agrestis, C. asini'nus, C. sylvestris, Elate'rium officina'rum, Charan'tia, Bouba'lios, Guarberba orba, Wild or Squirting cu'umber, Ecbolium elate'rium.** (F.) *Concombre Sauvage, Momordique* Nat. Order, Cucurbitacæ. The

dried sediment from the juice is the elaterium of the shops. (See Extractum Elaterii.) It is a most powerful cathartic, and, as such, has been used in dropsies. Its active principle is the *Elatin*, *Elaterine*, or *Elaterium*. Dose, gr.  $\frac{1}{4}$  to gr. j, until it operates.

**MOMORDIQUE**, *Moniordica* elaterium.

**MONAD**, from *Monas*, 'unity.' A simple particle, or atom, or unit.—Leibnitz.

**MONARDA FISTULOSA**. The *Purple monarda*. The leaves have a fragrant smell; and an aromatic, somewhat bitter taste. They are reputed to be nerve, stomachic, and deobstruent.

**MONAR'DA PUNCTATA**, *Horsemint*. *Nat. Ord. Labiatæ*. Indigenous in the United States. Stimulant and carminative. The *Oleum Monarda* is official in the United States.

**MONARDA, PURPLE**, *M. fistulosa*.

**MONDER**, (F.) *Mumda're*. To render clean or pure. In *Pharmacy*, it means to separate any substance from its impure or useless portion. In *surgery*, *monder* ou *mondifier une plaie*, is to clean or derge a wound.

**MONÆ**, Nates.

**MONDIFICATIFS**, Detergents.

**MONDIFIER UNE PLAÏE**. See *Monder*.

**MONEMERON**, *Monoëm'eron*, from *μονος*, 'one,' and *μερα*, 'a day.' A name given to several collyria, which were supposed to be capable of curing diseases of the eyes in a day.

**MONESIA**. A vegetable extract, imported into Europe from South America within the last few years, in hard, thick cakes. It is prepared from the bark of a tree, whose botanical name is as yet unknown.

It is very friable, and its fracture very much resembles that of a well-torrefied cocoanut. It is wholly soluble in water; and its taste—which is at first sweet like liquorice, sometimes becomes astringent.

It is on account of its astringent properties, that it has been prescribed in chronic bronchitis, hæmoptysis, diarrhæa, leucorrhœa, uterine hæmorrhage, &c. It has been applied locally, in the form of ointment. (*Mones*. p. 1. *Adipis*, p. vij.)

The dose of the *Monesia*, is from 12 to 40 grains a day.

**MONEYWORT**, *Lysimachia nummularia*.

**MONGO'LIAN**. Anthropologists give the name *Mongolian race* to a variety of the human species, spread over a great part of the north of Asia, in China, India, Thibet, the Moluccas, &c. The individuals composing it have the skin of a brown red, forehead flat, nose broad, cheeks prominent, and lips large. See *Homo*.

**MONKSHOOD**, *Aconitum*—m. Common, *Aconitum napellus*—m. Salutory, *Aconitum anthora*.

**MONNINA POLYSTA'CHIA**. A beautiful South American plant. *Nat. Ord. Polygalææ*. *Sex. System*, *Diadelphia Octandria*. The bark of the root is a powerful astringent, and much used in South America, in diseases of the bowels.

**MONOCEPH'ALUS**, from *μονος*, 'one,' and *κεφαλη*, 'head.' A compound monster having two bodies with a single head.

**MONOCOLON**, *Cæcum*, *Rectum*.

**MONOC'ULUS**, *Mon'ocle*, *Monoph'thalmus*,

from *μονος*, 'one,' and *oculus*, 'an eye.' A bandage, employed to maintain topical applications over one of the eyes. This bandage, called by some surgeons *Simplex oculi*, (F.) *Œil simple*, is made of a roller three or four ells long, rolled into a single ball. See *Cyclops*.

**MONOEMERON**, *Monemeron*.

**MONOGAS'TRIC**, *Monogas'tricus*, from *μονος*, 'one,' and *γαστρις*, 'stomach.' That which has but one stomach. Man is *monogastric*. Ruminating animals, on the contrary, are *polygastric*.

**MONOGRAPH MEDICAL**. *Monographia*, from *μονος*, 'one,' and *γραφη*, 'description.' An *ex professo* treatise on a single class of diseases, or on a single disease.

**MONOMACHON**, *Cæcum*.

**MONOMANIA**, *Melancholy*.

**MONOMMATOS**, *Cyclops*.

**MONOPAGIA**, *Clavus hystericus*, *Hemicrania*.

**MONOPHTHALMUS**, *Cyclops*, *Monoculus*.

**MONOPS**, *Cyclops*.

**MONOPSIA**, *Cyclopia*.

**MONOR'CHIS**, from *μονος*, 'one,' and *ορχις*, 'testicle.' One who has only one testicle.

**MONOS'TIA**, from *μονος*, 'one,' and *αισος*, 'food,' 'repast.' The habit of taking only one meal in the day.

**MONROIA'NUM FORA'MEN**. A foramen at the anterior part of the lateral ventricles of the brain, by which they communicate with each other. So called from the second *Monro*.

**MONS VENERIS**, *Monticulus Ven'ris*, *Ephebe'um*, (F.) *Mont de Venus*, *Pénit*, *Motte*, *Éminence sus-pubienne*. The more or less projecting eminence, situate at the base of the hypogastrum, above the vulva and in front of the os pubis. At the period of puberty it becomes covered with hair, formerly called *Tressoria*, (q. v.)

**MONSTER**, *Monstrum*, *Teras*. Any organized being, having an extraordinary vice of conformation, or a preternatural conversion of every part, or of certain parts only.

Three species of monsters are usually distinguished. The *first* comprehends those, that are born with an excess of parts; as with two heads on one trunk,—two trunks with one head,—with five fingers or toes, &c. The *second* includes those with a deficiency of parts,—such as the acephali, monopes, &c.;—and the *third*, those with a deviation of parts,—as where the heart is on the right side, the liver on the left, &c.

Amongst the numerous hypotheses entertained on the origin or cause of monsters, or *monstrosities*—as the state has been called—three only are worth mentioning. They have been attributed, 1. To the influence of the maternal imagination on the fœtus in utero. 2. To accidental changes, experienced by the fœtus at some period of its uterine existence: and, 3. To a primitive defect in the germs. The second seems to be the only one, that is philosophical.

As a medico-legal question, monsters, if capable of action as individuals, have the same rights as other persons.

**MONSTROSITY**. See *Monster*.

**MONT DE VENUS**, *Mons veneris*.

**MONTBRISON**, *MINERAL WATERS*

OF. M. is a town in France, in the department of the Loire; 15 leagues from Lyons. There are three cold springs here, which are highly acidulous, and used as refrigerants and aperients.

MONT-DE-MARSAN, MINERAL WATERS OF. M. is a small French town, 10 leagues from Dax; where there is a chalybeate spring, somewhat frequented.

MONT-D'OR, MINERAL WATERS OF. M. is a village 7 leagues from Clermont (Puy-de-Dôme,) at which are several mineral springs, cold and thermal. Those of the Fountain *La Madeleine*, and of the *Great Bath*, are thermal; and contain carbonic acid, subcarbonate, sulphate, and muriate of soda, subcarbonate of lime and magnesia, alumine and oxide of iron. Those of *St. Margaret* are cold, and contain much carbonic acid.

MONTECATINI, MINERAL WATERS OF. This town is situate near Borgo-Buggiano, in Tuscany. The springs are thermal; ranging from 78° to 118° Fahrenheit.

MONTHLY COURSES, Menses.

MONICULUS VENERIS, Mons V.

MOON, *Luna, Sel'nē, Menē, Sax. Mona, (G.) Mond. (F.) Lune.* The moon has been supposed to exert considerable influence over the human body, in health and disease. Such influence has been grossly exaggerated. Not many years ago, it would have been heretical to doubt the exacerbation of mania, at the full of the moon; yet it is now satisfactorily shown, that if the light be excluded at this period, the *lunatic* is not excited more than ordinarily.

MOONSTRUCK, Lunatic.

MOORBERRY, Vaccinium oxycoccos.

MOORSHEAD, Alembic.

MOORWORT, BROAD-LEAVED, *Andromeda mariana*.

MOPHETA. See Mephitism.

MORBI ACQUISITI, Acquired diseases—*m. Acuti*, see *Acute*—*m. Adventitii*, Acquired diseases—*m. Anniversarii*, Annual diseases—*m. Anni*, Annual diseases—*m. Chronici*, Chronic diseases—*m. Vitriolatus*, *Epilepsy*—*m. Vocis*, *Phononosus*.

MORCEAU DU DIABLE, see *Tuba Fallopiana*—*m. Frangé*, see *Tuba Fallopiana*.

MOR'DICANT, *Mordicans*, *Color mordicans*. A morbid heat, causing a disagreeable pungent sensation in the fingers of the physician.

MOREA, *Morus nigra*.

MORELLE, *Boletus esculentus*—*m. à Fruit noir*, *Solanum*—*m. Furicuse*, *Atropa belladonna*—*m. en Grappes*, *Phytolacca decandra*—*m. Grimpane*, *Solanum dulcamara*.

MORETARIUM, Mortar.

MORETUS, *Moretum*. Ancient name of a cordial julep, into the composition of which the syrup of mulberries entered—Schröder.

MORGAGNI, HUMOUR OF. A peculiar, transparent, slightly viscid fluid, found between the crystalline and its capsule.

MORGELENE, *Alsine media*.

MORIA, *Idiotism*, *m. Demens*, *Idiotism*—*m. Demens lerema*, see *Dementia*—*m. Imbecillis amnesia*, *Amnesia*.

MORINGA OLEIFERA, *Guilandina moringa*—*m. Zeylanica*, *Guilandina moringa*.

MORION, Genital organs.

MORIOPLASTICE, *Chirurgia curtorum*, *Ch. Anaplastica*, *Restitutio organica seu partium deperditarum*, *Transplantatio*, *Anaplastica Surgery*, *Autoplasty* or *Autoplastic* or *Plastic Surgery*, *Chirurgia plastica*, from *μοριον*, 'a part,' and *πλαστικός*, 'forming.' The restoration of lost parts. The operations for this pur-

pose have various names, according to the part concerned, as *Cheiloplastice*, *Ceratoplastice*, *Rhinoplastice*, &c.

**MORO**, from *morum*, 'a mulberry:—*Morum*. (F.) *Mure*. A small abscess, resembling a mulberry. A small tumour, of a similar appearance, particularly on the genital organs after impure coition.

**MOROCHTHOS**, *Moroχθos*. A stone, to which the ancients attributed marvellous properties, and which entered into collyria, cerates, &c. Galen.

**MOROCOMIUM**, Morotrophium.

**MORODOCHIUM**, Morotrophium.

**MOROSIS**, Fatuitas, Idiotism.

**MOROSITATES**. A generic name, given by Linnæus to an order of Vesaniæ; in which he included pica, bulimia, polydipsia, antipathia, nostalgia, panophobia, satyriasis, nymphomania, tarentismus, and hydrophobia.

**MOROTROPHIUM**, *Moroconi'um*, *Morodochi'um*, from *μορος*, 'fatuous,' and *τροφη*, 'support.' An *insane establishment*; a *lunatic asylum*; a *mad-house*. Under proper management, a valuable institution; but liable to various abuses.

**MOROXIS**, Morochthos.

**MORPHEA ALBA**, Lepra alphoides—m. Nigra, Lepra nigricans.

**MORPHIA**, Morphina.

**MORPHICA**, from *μορφη*, 'shape.' Monstrosities of birth. The 3d order, class *Typhica* of Good.

**MORPHINA**, *Morphium*, *Morphia*, *Morphine*. A solid, colourless alkali; crystallizable in beautiful pyramids, truncated and transparent; soluble in alcohol, and slightly so in boiling water. It exists, combined with meconic acid, in opium. It may be obtained by decomposing, by means of ammonia or calcined magnesia, an aqueous solution of opium made in the cold.

Morphine dissolves perfectly in the acids, which it saturates; and with which it forms very crystallizable salts, with the exception of the acetate. All these salts have a bitter taste, and act upon the animal economy in the same manner as opium, but more powerfully. The *acetate* is the salt commonly employed in medicine. It was, at one time, supposed that the Morphine is the purely sedative part of opium, divested of its irritating properties; but experience has not proved this. On the contrary, Morphine will generally disagree where opium does. Dose of Morphine  $\frac{1}{4}$  to  $\frac{3}{4}$  of a grain.

**MORPHINÆ ACETAS**, *Ac'etate of Morphine*. A salt, formed by saturating morphine with acetic acid. Dose, from  $\frac{1}{4}$  of a grain to a grain.

**MORPHINÆ SULPHAS**, *Sulphate of Morphine*. A salt, formed by saturating morphine with sulphuric acid. Dose, the same as of the acetate.

The **MURIATE** and the **CITRATE** OF MORPHINE have likewise been used, but they possess no advantages over the other salts.

**MORPHIUM**, Morphina.

**MORPHOLOGY**, Anatomy.

**MORPHOTOMY**. See Anatomy.

**MORPIO**. See Pediculus.

**MORPION**, Crabblouse, see Pediculus.

**MORS**, Death—m. Apparens, Asphyxia—m.

Putativa, Asphyxia—m. Repentina, Demotivus lapsus—m. *du Diable*, Scabiosa succisa.

**MORSULI ANTIMONIALES**, Tabellæ antimoniales Kunkelii.

**MORSULI STIBII**, Tabellæ antimoniales Kunkelii.

**MORSUS**, Degmos—m. Diaboli, Scabiosa succisa, see Tuba Fallopiana—m. Gallinæ, Alisine media—m. Ventriculi, Cardialgia.

**MORT**, Death—m. *du Chien*, Cholera—m. *aux Chiens*. Colchicum autumnale—m. *aux Panthères*, Doronicum pardalianches.

**MORTA**, Pemphigus.

**MORTAL**, *Mortal'is*, *Lethal'is*, *Leta'lis*, *Thanato'des*. That which is subject to death;—that which causes death:—as, *man is mortal*; a *disease is mortal*. Of old, it was the custom to have a division of *mortal wounds*, which gave rise to many errors in medico-legal investigations, as the mortality of wounds depends upon various circumstances; and it is often a matter of extreme difficulty, to pronounce whether or not a wound is necessarily mortal.

**MORTALITY**, *Mortal'itas*, *Lethal'itas*, (F.) *Mortalité*. This word, taken in an extended sense, expresses the condition of all organized beings,—of being subject to the cessation of life. In the sense in which it is most frequently employed, it signifies,—the proportional quantity of individuals who, in a certain population, die in a given time.

If we assume the population of the earth to be one thousand millions, and a generation to last thirty-three years: in that space of time the one thousand millions must all die; and, consequently, the number of deaths will be, by approximation,

|              |            |
|--------------|------------|
| Each year,   | 30,000,000 |
| Each day,    | 82,109     |
| Each hour,   | 3,421      |
| Each minute, | 57         |
| Each second, | 1 nearly.  |

If, on the other hand, as has been supposed, the number of deaths is to that of the births as

TEN TO TWELVE: there will be born,

|              |              |
|--------------|--------------|
| Each year,   | 36,000,000   |
| Each day,    | 98,356       |
| Each hour,   | 4,098        |
| Each minute, | 68           |
| Each second, | 1 & 2-15ths. |

It has been estimated, that the average mortality of the Pays du Vaud, is 1 in 49; of Sweden and Holland, 1 in 48; of Russia, 1 in 41; of France, 1 in 40; of Austria, 1 in 38; of Prussia and Naples, 1 in 33 to 35; of England, 1 in 58; and of South America, 1 in 30. The same rate of mortality has been given to the United States as to France; but the statistical details on all this matter have been inadequate, and—it is not improbable—inaccurate.

The following has been given as the annual mortality of some of the chief cities of this country and of Europe: (See the Author's Elements of Hygiène, p. 136: Philadelphia, 1835.) Philadelphia, 1 in 45.68; Glasgow, 1 in 44; Manchester, 1 in 44; Geneva, 1 in 43; Boston, 1 in 41.26; Baltimore, 1 in 41; London, 1 in 40; New York, 1 in 37.83; St. Petersburg, 1 in 37; Charleston, 1 in 36.50;

Leghorn, 1 in 35; Berlin, 1 in 34; Paris, Lyons, Strasburg, and Barcelona. 1 in 32; Nice and Palermo, 1 in 31; Madrid, 1 in 29; Naples, 1 in 28; Brussels, 1 in 26; Rome, 1 in 25; Amsterdam, 1 in 24; and Vienna, 1 in 22.

In the cities, the mortality under two years of age bears a large ratio. This is exhibited by the following table:

| AGES.                             | London. | Philadelphia. | Baltimore. |
|-----------------------------------|---------|---------------|------------|
| Under 1 year, }<br>From 1 to 2, } | 28.52   | 22.7          | 24.11      |
| 2 to 5,                           | 9.97    | 7.3           | 11.18      |
| 5 to 10,                          | 4.33    | 4.            | 5.         |
| 10 to 20,                         | 4.03    | 5.            | 6.3        |
| 20 to 30,                         | 6.64    | 12.           | 9.87       |
| 30 to 40,                         | 8.08    | 12.           | 10.58      |
| 40 to 50,                         | 8.89    | 10.           | 8.88       |
| 50 to 60,                         | 8.89    | 7.2           | 5.78       |
| 60 to 70,                         | 9.15    | 5.            | 4.5        |
| 70 to 80,                         | 7.83    | 3.5           | 3.         |
| 80 to 90,                         | 3.18    | 1.9           | 1.67       |
| 90 to 100,                        | 0.40    | 0.5           | 0.26       |
| 100 to 110,                       | —       | 0.09          | —          |
| 110 to 120,                       | —       | 0.013         | 0.18       |

**MORTALITY, BILLS OF;** *Bills of Necrology*, (F.) *Tables de Mortalité*. Tables, instituted for the purpose of exhibiting the number of deaths, &c. in a given time. Well kept bills of mortality are of great use to the physician and political economist. Those of London have been proverbial for their inaccuracy and insufficiency; especially as regards the complaints of which the persons have died. They are made out by the parish clerks, and the information is conveyed to them by two old women, who are appointed in each parish, and who are called *Searchers*;—their duty being to see that the deceased has died a natural death.

**MORTAR**, *Mortarium*, *Mortarium*, *Piso*, *Ac'onc*, *Pila*, *Holmos*, (F.) *Mortier*. A vessel for reducing to powder different solid substances; and for making certain mixtures. Different substances are employed in the construction of mortars;—iron, marble, glass, wedgewoodware, &c.

**MORTARIOLUM**, Alveolus.

**MORTIER**, Mortar.

**MORTIFER**, Lethiferous.

**MORTIFICATION**, *Necrosis*, *Mortificatio*, from *mors*, 'death,' and *fito*, 'I become.' The loss of vitality in a part of the body. The incipient stage of mortification, when the case is still recoverable, is called *Gangrene* (q. v.); total destruction, *Sphacelus* (q. v.) Mortification of a bone is called *Necrosis*, (q. v.)

**MORTIFICATION, ERGOT**, *Ergotism*—m. *Mildew*, *Ergotism*.

**MORTTOOTH**, *Cupri sulphas*.

**MORUM**. See *Morus nigra*.

**MORUS NIGRA**. *The Mulberry-Tree*, *Mor'ca*, *Sycami'nos*. (F.) *Mûrier Noir*. The fruit of the mulberry-tree, *Morum*, *Sycami'num*, (F.) *Mûre*, is pleasant, sweet, subacid, and abounds with a deep violet-coloured juice. A syrup is directed in the London Pharmacopœia. The bark of the root has been regarded as antihelmintic.

**MORVE**, *Mucus*, *Nasal mucus*. See *Equinia*.

**MORVE FARCINEUSE**. See *Equinia*.

**MOS**, *Habit*.

**MOSCHELÆ'ON**, *Moscolæ'a*. A compound aromatic oil, containing musk.

**MOSCHUS**, *Musk*—m. *Arabum*, *Hibiscus abelmoschus*—m. *Factitius*, *Musk*, artificial.

**MOSCOLEA**, *Moschelæon*.

**MOSQUITO** (S.) Diminutive of (S.) *mosca*, 'a fly.' A very troublesome insect in warm, moist situations. Curtains, called *Mosquito curtains*, are used in India, by way of protection. The entrance of mosquitos into the bed-chamber may also be prevented, to a certain extent, by keeping the doors and windows closed until the light is extinguished. The pain and itching from the bites are alleviated by washing them with hartshorn.

**MOSQUITA** is a name given, by the Portuguese, to small, red pimples on the skin, resembling the bites of the mosquito.

**MOSS CLUB**, *Lycopodium*—m. *Cup*, *Lichen pyxidatus*—m. *Iceland*, *Lichen Islandicus*—m. *Irish*, *Fucus crispus*.

**MOTA**, *Fagus castanea*.

**MOTAMEN**, *Motion*.

**MOTATIO**, *Motion*.

**MOTHER'S MARKS**, *Nævus*.

**MOTHER'S SPOTS**, *Nævus*.

**MOTHERWORT**, *Leonurus cardiaca*, *Marticaria*.

**MOTILITY**. *Motilitas*, from *motus*, 'movement.' (F.) *Motilité*. Faculty of moving. Moving power, contractility.

**MOTION**, *Motus*, *Motio*, *Motatio*, *Motamen*, *Commotio*, *Permotio*, *Cine'sis*. The act of changing place.

The various motions may be divided into, *first*, the *voluntary* or those that are executed under the influence of the brain. *Secondly*, The *involuntary*, which may be subdivided into 1. The *excited*, of the *reflex function* of Dr. Marshall Hall and others,—as the closure of the larynx on the contact of acrid vapours, of the pharynx on that of the food,—a function of the spinal marrow; and 2. Those that are executed under the organic and other nerves of involuntary function.

It is probable, too, that every living tissue is capable of moving responsive to its appropriate irritant. See *Irritability*.

**MOTION, CILIARY**, see *Cilia*—m. *Vibratory*, see *Cilia*.

**MOTOR**, *Motory*.

**MOTORY**, *Motrix*, *Motor*, *Motrix*. That which moves or impresses movement.

**MOTORRES Oculorum**, *Motorii Oculorum*, *Oculares communes*, *Ophthalmici externi*, *Common Oculo-muscular Nerves*, (F.) *Nerfs moteurs oculaires communs*, (Ch.) The *third pair of nerves*. This nerve arises from a depression at the inner side of the peduncles of the brain, between the tuber annulare and corpora mammillaria. It enters the outer part of the cavernous sinus, and passes into the orbitary cavity. Behind the sphenoidal fissure, it divides into two branches; the *onc superior*; and the other, *inferior*. The *former* is lost on the rectus superior oculi and the levator palpebræ superioris; the *latter*—the larger of the two—divides into three branches, which pass to the rectus internus, rectus inferior, and lesser oblique. The last furnishes a filament, which passes to the ophthalmic ganglion.

The **MOTOR OCULI EXTERNUS**, *Nervus tim'idus*,—*Nerf oculo-musculaire externe* (Ch.) *Nerf moteur oculaire externe*, or *sixth pair of nerves*, arises from the furrow, which separates the pons Varolii from the medulla oblongata. It enters the cavernous sinus; anastomoses on the outside of the carotid artery with two filaments furnished by the superior cervical ganglion; enters the orbit by the sphenoidal fissure, and is lost on the rectus externus oculi. This pair is, also, called *Abducentes*.

**MOTOS**, Carbasus, Tent.

**MOTRIX**, Motory.

**MOTTE**, Mons venereis.

**MOTUS**, Motion—*m. Compressorius*, Peristole—*m. Intestinorum*, Borborygmus—*m. Peristalticus*, Peristole—*m. Testudineus*, Peristole—*m. Vermicularis*, Peristole.

**MOUCHE**, Cantharis—*m. d'Espagne*, Cantharis.

**MOUCHER**, L'ACTION DE, Munctio.

**MOUCHES**. See Pains, labour.

**MOUCHETURE**. See Scarification.

**MOUCHOIR EN TRIANGLE**, *Couvrechef*, see *Bandeau*.

**MOUFETTE**. See Mephitism.

**MOULD**, Fontanella.

**MOULE**, *Mytilus edulis*.

**MOULEUR**, Muller.

**MOUREILLER**, Malpighia mourella.

**MOURON DES OISEAUX**, *Alsine media*—*in. Rouge*, *Anagallis*.

**MOUSE-EAR**, *Alsine media*, *Hieracium pilosella*.

**MOUSE-SIGHT**, Myopia.

**MOUSSE DE CORSE**, *Corallina Corsicana*—*m. d'Islande*, *Fucus crispus*—*m. Perlée*, *Fucus crispus*.

**MOUSSERON**. See Agaric.

**MOUSSEUX**, Frothy.

**MOUTARDE NOIRE**, *Sinapis*.

**MOUT DE LA BIÈRE**, Wort.

**MOUTH**, Sax. mu $\ddot{z}$ , *Os*, *Cavum Oris*, *Stoma*. (F.) *Bouche*. This word sometimes signifies the cavity situate between the jaws, and containing the tongue, &c;—at others, the outer orifice of that cavity. The mouth, in the first acceptation, is the cavity; bounded, *above*, by the palatine arch; *below*, by the tongue; *before*, by the lips; and *behind*, by the velum palati and pharynx. The sides of the mouth and the organs it contains are lined by a mucous membrane.

The *anterior* aperture of the mouth is, sometimes, called *facial*;—the *posterior*, *pharyngeal*. In the mouth are the teeth, gums, alveolar margins, tongue; the excretory ducts of the salivary glands, and those of a number of mucous follicles, &c. It is in this cavity, that the food is cut, torn, or bruised by the teeth; is impregnated with saliva, and formed into a mass or *bolus*, which is then subjected to the act of deglutition. The mouth contains the organs of taste: and it serves in respiration, articulation, expectoration, suction, &c.

**MOUTH** is, also, applied to the open extremities of vessels.

The condition of the mouth requires to be attended to in *Semeiology*. The state of the mucous membrane, like that of the tongue, in-

dicates the condition of the membrane of the alimentary canal generally.

**MOUTH, SORE**, *Aplhthæ*—*m. Watering*, see *Salivation*.

**MOXA**, *Moxibul'rium*. A word by which the Chinese and Japanese designate a cottony substance, which they prepare by beating the dried leaves of the *Artemisia Chinensis*,—a kind of mugwort. With this down, they form a kind of cone, which is placed upon the part intended to be cauterized, and is set fire to at the top. The heat and pain gradually increase, in proportion as the combustion proceeds downwards, until ultimately an eschar may be formed.

In Europe and this country, the same operation is practised with a cylinder of cotton wool, or with one formed from the pith of the greater sun-flower. This mode of cauterization is employed as a powerful counter-irritant; which it assuredly is. Sloughing may be, in some measure, prevented, according to Baron Larrey, by the application of liquid ammonia to the burnt part.

**MOXIBURIUM**, Moxa.

**MOXIBUSTION**, *Moxibus'tio*, *Encaul'sis*. Mode of cauterization by means of moxa.

**MUCAGO**, Mucilage.

**MUCARUM**, Mucharum.

**MUCHA'RUM**, *Muca'rum*. A barbarous term, formerly used for an aqueous infusion of roses, sweetened and evaporated to the consistence of syrup.

**MUCILAGE**, *Mucila'go*, *Muca'go*. A mixture of gum and a small quantity of matter analogous to mucus, which is found in abundance in linseed, quince-seed, &c. It is obtained by heating with water the parts, or products, of plants which contain it. It is much used in the preparation of emollient cataplasms and of the greater part of the demulcent *tisanes*.

**MUCILAGE, ANIMAL**, *Mucus*—*m. of Quince seeds*, *Decoctum Cydoniæ*—*m. Starch*, *Mucilago amyli*.

**MUCILAGINEUX**, Mucilaginous.

**MUCILAG'INOUS**, *Mucilagino'sus*, (F.) *Mucilagineux*. That which possesses the character of mucilage.

**MUCILAGO**, *Synovia*.

**MUCILAGO ACA'CIÆ**, *M. Acaciæ Arabicæ*, *M. Gummi Arabici*, *Mucilage of acaciæ*, *M. of gum Arabic*. (*Acaciæ gum. contus.*  $\zeta$ iv, *aq. ferr.*  $\text{℥}$ ss. Rub the gum with the water gradually added, and strain. *Ph. L.*) Demulcent. To allay cough; but, chiefly, to suspend insoluble matters in water, &c.

**MUCILAGO ARTICULORUM SEU JUNCTURARUM**, *Synovia*.

**MUCILAGO ASTRAG'ALI TRAGACAN'THÆ**, *M. tragacanthæ*, *M. gummi tragacanthæ*, *Mucilage of tragacanth*. (*Gummi astragal tragacanth. triti*  $\zeta$ ij, *aque bullient.*  $\zeta$ xviiij. Macerate for 24 hours; triturate till the gum is dissolved and press through linen. *Ph. E.*) For pharmaceutical purposes.

**MUCILAGO AM'YLI**, *Starch mucilage*. (*Amyli*  $\zeta$ ij, *aque*  $\text{℥}$ ij. Rub the starch with the water, gradually added; then boil till it forms a mucilage. *Ph. L.*) Demulcent. Generally given *per anum*.

**MUCILAGO CRETICÆ**, *Misturæ cretæ*—*n. Gummi Arabici*, *M. acaciæ*—*m. Seminis cydoniæ*

inali, Decoctum cydoniæ—m. Gummi tragacanthæ, M. astragali tragacanthæ—m. Tragacanthæ, M. astragali tragacanthæ.

**MUCOCELE OF THE LACHRYMAL SAC,** Fistula lachrymalis.

**MUCOR,** Euros, Mucus—m. Narium, Nasal mucus.

**MUCOSITAS,** Mucus.

**MUCOSTTY,** *Mucositas.* A fluid, which resembles mucus or contains a certain quantity of it.

**MUCOUS,** *Mucosus, Myxodes.* An epithet for all bodies containing mucilage. It is, also, sometimes used synonymously with gum. In pathology, it is occasionally employed to express the seat of a disease, as *mucous disease, mucous phlegmasia*; that is, having its seat in the mucous membrane.

**MUCOUS MEMBRANES,** Membranes, mucous—m. Web, Corpus mucosum.

**MUCRO.** The apex or point of the heart.

**MUCRO HUMERI,** Acromion.

**MUCUS,** *Mucor, Mucosus humor, Mucositas, Myxa, Animal mucus, Blenna, Animal mucilage, (F.) Muqueux animal, Morce, Mucilage animal.* A substance, analogous to vegetable mucilage; from which, however, it differs, by affording subcarbonate of ammonia on distillation. Mucus exudes through the skin, in a state of combination with a peculiar oily matter; and, drying, forms the epidermis. It constitutes, in part, the different epidermeous productions, as the hair, nails, wool, and horn of animals, feathers of birds and scales of fish. It is found at the surface of the mucous membranes, and pre-

sents some difference in its composition and properties, according to the particular mucous membrane from which it is obtained. It preserves the membranes moist; and in a state best fitted for the performance of their functions. The French give the term *gluire* to the thick, stringy mucus, secreted by the mucous membranes, when in a state of disease.

**MUCUS CATHARTICUS,** Lichen islandicus—m. Malpighii, Corpus inucosum—m. Narium, Nasal mucus.

**MUD APPLE PLANT,** Solanum melongena.

**MUDAR,** *Madar.* The *Calotropis mudarii.* In the Hindoo practice of physic, the bark of the root, as well as the concrete juice of the plant, enters into various compound formulæ for the cure of elephantiasis and many other disorders. Experiments, instituted by Dr. Duncan, jun., exhibit its properties to be like those of ipecacuanha.

**MUGUET,** Aphthæ, Convallaria maialis—m. des Bois, Asperula odorata—m. de Mai, Convallaria maialis.

**MUGWORT,** Artemisia vulgaris.

**MULATRE,** Mulatto.

**MULATTO,** (F.) *Mulatre,* (S.) *Mulata.* An individual of the human species engendered of a white and black race; from *mulus*, 'a mule.'

The following Table exhibits the proportion of white blood in the various castes,—arising from the hybridous admixture of white and black,—according to the principles sanctioned by usage.

| PARENTS.             | OFFSPRING.                                     | Degree of Mixture. |            |
|----------------------|--|--------------------|------------|
| Negro and White,     | Mulatto,                                       | 1-2 White,         | 1-2 Black. |
| White and Mulatto,   | Terceron,                                      | 3-4 ———            | 1-4 ———    |
| Negro and Mulatto,   | { Griffo or Zambo, }<br>{ or black Terceron, } | 1-4 ———            | 3-4 ———    |
| White and Terceron,  | Quarteron,                                     | 7-8 ———            | 1-8 ———    |
| Negro and Terceron,  | Black Quarteron,                               | 1-8 ———            | 7-8 ———    |
| White and Quarteron, | Quinteron,                                     | 15-16 ———          | 1-16 ———   |
| Negro and Quarteron, | Black Quinteron,                               | 1-16 ———           | 15-16 ———  |

The last two are considered to be respectively white and black, in the British West India Islands; and of these the former are white by law, and consequently free.

**MULBERRY TREE,** Morus nigra.

**MULES,** (F.) *Mule.* Chilblains on the heels.

**MULIEBRIA,** Vulva.

**MULLEIN,** BLACK, *Verbascum nigrum*—m. Broad-leaved, great, *Verbascum nigrum*—m. Yellow, *Verbascum nigrum*.

**MULLER,** (F.) *Mouleur.* A moulder. A stone held in the hand, with which any powder is ground upon a flat, horizontal stone. It is sometimes called *mullet*. (F.) *Mollette.*

**MULLIGRUBS,** Tormina.

**MULSA ACIDA,** Oxyglycus.

**MULSUM,** Hydromeli.

**MULTIFIDUS SPINÆ,** Transversalis dorsi.

**MULTITUDO,** Plethora.

**MULTIVORANTIA,** Polyphagia.

**MUMIA,** Mummy.

**MUMMY,** *Mumia.* Arab. *Moumya,* from *mum*, 'wax.' *Rebole'a, Rebo'na.* (F.) *Momie.*

A dead body simply dried; or dried after having been embalmed. The latter acceptance is the most common. Formerly, the Egyptian mummy was extolled as useful in contusions. It was presumed, also, to have healing, tonic, and resolvent properties. It is now only regarded as an archæological curiosity.

**MUMPS,** Cynanche parotidæa.

**MUNCTIO,** *Apomctis.* (F.) *L'action de moucher.* The act of blowing the nose.

**MUNDIFICATIVA,** Detergents.

**MUNGOS RADIX,** Ophiorrhiza mungos.

**MUNIMENTUM CASTITATIS,** Hymen.

**MUQUEUX ANIMAL,** Mucus.

**MUR,** Coryza.

**MURAL,** *Murd'lis,* from *murus*, 'a wall.'

Vesical calculi are so called when rugous and covered with tubercles or asperities. They are composed of oxalate of lime.

**MURE,** Moro. See *Morus nigra.*

**MURIA,** *Hal'mê, Salsila'go, Brine.* (F.) *Sarumure.* This was formerly used as a glys-

ter in dysentery; in certain inveterate neuralgicæ, &c.

MURIA, Soda, muriate of.

MURIAS AURICO-NATRICUM. See Gold.

MURIATE D'AMMONIAQUE, Ammonia muriatæ—*m. d'Ammoniaque et de fer*, Ferrum ammoniatum—*m. d'Or*, Gold, muriate of. See Gold.

MURIATICUM, ACIDUM, *Ac'idum salis*, *Spir'itus salis mari'ni*, *Sp. salis Glaube'ri*, *Acidum mari'num concentratum*, *Acidum salis culina'ris*, *Acidum salis mari'ni*, *Spir'itus salis acidus seu funans*, *Acidum hydrochlor'icum*, *Muriatic acid*, *Spirit of salt*. (F.) *Acide hydrochlorique* ou *muriatique*. The odour of muriatic acid is suffocating; taste very acid and caustic. It is nearly colourless when pure; but commonly of a pale yellow; volatile; the fumes visible. S. G. 1.160 to 1.200. 100 grains should saturate 124 grains of subcarbonate of soda. Muriatic acid is possessed of tonic and antiseptic properties. It is used in typhus, cutaneous eruptions; in gargles for inflammatory and putrid sore throats, (gtt xxx to  $\bar{z}$ vj of water,) &c. When added to a pediluvium, it renders it stimulating.

The ACIDUM MURIATICUM DILUTUM of the Ph. D. contains equal portions, by measure, of muriatic acid and water.

MURIER NOIR, *Morus nigra*.

MURIGENE, Chlorine.

MURMUR, Barboiygmus, *Bourdonnement*.

MURMUR, RESPIRATORY. The noise heard during inspirator and expiration, especially the former. It is produced by the passage of the air through the bronchial tubes and the air-cells. It has been also called the murmur of the expansion of the lungs; and, when distinctly vesicular, *Respiration of the cells* or *vesicular respiration*, (F.) *Respiration vesiculaire*.

The vesicular respiration is of course absent when the cells of the lungs have been obliterated from any cause.

When the murmur is much developed, as it is in children, the respiration is termed *puerile*. At times, also there is a *blowing* sound, (F.) *Souffle*, *Respiration soufflante*, as if some one were blowing into the auscultator's ear through a tube. This is heard in the healthy state over the larynx, trachea, and about the bifurcation of the bronchia; but when it proceeds from the lungs, it denotes disease.

The respiration, perceived over the trachea and bronchia in health, is called *tracheal* or *bronchial*, according to the situation in which it is heard.

MURRAIN, *Coryza*.

MURREN, *Coryza*.

MUSA PARADISIACA, *Musa*, *Amusa*, *Palma hu'milis*, *Ficus Indica*, *Bata*, *Plat'anus*. The *Plantain tree*. Family, Musaceæ. Scz. Syst. Hexandria Monogynia. It grows in many parts of India and South America. The fruit, which is largely eaten for bread, consists of a mealy substance. It is clammy; has a sweetish taste, and will dissolve in the mouth without chewing. The whole spike of fruit often weighs forty or fifty pounds. The leaves of the tree serve the Indians for table cloths and napkins. Being smooth and soft, they are,

also, employed as dressings after blisters. The water from the soft trunk is astringent, and is sometimes used in diarrhœa.

MUSA SAPIENTUM. The *Ban'na tree*. *Bacoba*. (F.) *Bananie*, *Bacove*. This differs somewhat from the last. The fruit is shorter, straighter, and rounder; the pulp softer and of a more luscious taste. When ripe, it is very agreeable; is eaten like the plantain, and relished by all ranks of people in the West Indies. Both varieties are natives of Guinea.

MUSC, Musk.

MUSCA HISPANICA, *Cantharis*.

MUSCADE. See *Myristica moschata*.

MUSCADIER, *Myristica moschata*.

MUSCLE, *Musculus*, *Lacer'tas*, *Mys*, *Myon*, from  $\mu\upsilon\varsigma$ , 'a rat;' because, say some etymologists, the ancients compared the muscles to flayed rats. According to Diemerbroeck, Douglas, Chaussier, &c.,  $\mu\upsilon\omega\varsigma$  comes rather from  $\mu\upsilon\epsilon\iota\upsilon$ , to close, 'to move,' &c., a function proper to muscles. This etymon is the more probable.

Muscles have been divided into those of *Animal life*, or *of the life of relation*,—*voluntary muscles*—which execute movements under the influence of the will; as the muscles of the limbs, head, trunk, &c. and into those of *organic life*,—*involuntary muscles*,—which contract under the influence of certain special stimuli; as the heart, fleshy fibres of the stomach, &c. *Mixed muscles* are those, which belong partly to each of these divisions;—as the muscles of respiration; the sphincters, &c. Muscles that act in opposition to each other, are called *antagonists*; thus, every extensor has a flexor for an antagonist, and *vice versa*. Muscles that concur in the same action are termed *congenerous*.

The muscles present numerous varieties in form, size, situation, use, &c., and have been divided, by some, into *long*, *broad*, and *short*. Each of these divisions comprises *simple* and *compound muscles*.

*Simple* or *rectilinear muscles* have all their fibres in a similar direction, and only one body—as the *Sartorius*, *Pronator quadratus*, &c.

The *compound muscles* are those, which have only one belly and several tendons,—as the flexors of the fingers and toes: or several bellies and several tendons,—as the biceps flexor cubiti, sacro-lumbalis, &c. To the compound muscles belong, also, the *radiated muscles*. Their fibres set out from a common centre, and are arranged like the radii of a circle:—such are the diaphragm, iliacus, temporal, &c.

*Pennated* or *Penniform Muscles*. Their fibres are arranged in two rows, which are united at a median line, at greater or less angles; nearly as the feathers are inserted into a quill. The palmaris longus is one of these.

*Semi-penniform Muscles*. Their fibres are oblique, as in the last case; but they are inserted only on one side of the tendon.

*Hollow Muscles* are,—the heart, intestines, urinary bladder, &c.

Much difference has existed in the enumeration of muscles. Some authors reckon them at upwards of 400. Chaussier admits only 368. The greater part of the muscles are in *pairs*. Very few are *azygous*.

Muscles have been variously named.

1. *According to their uses*, as diaphragm, buccinator, extensors, flexors, adductors, abductors, levators, depressors, &c.

2. *According to their position*, as interspinales, interossei, subclavius, popliteus, anconeus, cubitalis, iliacus, temporalis, &c.

3. *According to their shape*, as trapezius, splenius, lumbricales, serrati, digastric, deltoid, scalenus, rhomboides, &c.

4. *According to their dimensions*. Pectoralis major, rectus capitis anticus major, pectoralis minor, glutæus maximus, medius, and minimus.

5. *According to their direction*, as obliquus abdominis, transversalis abdominis, rectus femoris, rectus abdominis, &c.

6. *According to their composition*, as semi-membranosus, semi-tendinosus, complexus, &c.

7. *According to their attachments*, or the different points of the skeleton to which they are attached by means of tendons or aponeuroses; as sterno-cleido-mastoideus, sterno-hyoideus, &c. On this is grounded the nomenclature of M. Dumas, and that of Chaussier.

That end of the muscle, which adheres to the most fixed part, is usually called the *origin* or *head*, (F.) *Tête*; and that which adheres to the more movable part, the *insertion* or *tail*, (F.) *Queue*; the intervening part or *body* of the muscle being called the *venter* or *belly*: hence, the names gastrocnemii, digastricus, biceps, and triceps; according as they have two bellies, two or three heads, &c.

Muscles are formed,—1. Essentially of the *muscular* or *fleshy fibre* (see Muscular Fibre.) 2. Of *Cellular tissue*, which unites together the fibres. This cellular tissue is not very visible between the fine and loose fibres; but becomes more so, when they unite in more considerable fasciculi. It forms, moreover, to each muscle an external envelope, which unites it to the neighbouring parts, and admits of its motion. This envelope was formerly called *Tunica propria musculorum*. 3. Of *Arteries*. These proceed from neighbouring trunks, and are, generally, very large. Their size and number are always in proportion to the bulk of the muscle. With the exception of some viscera, as the lungs and the kidneys, there are few organs that receive as much blood as the muscles. 4. Of *Veins*. They follow the same course in the muscles as the arteries. Bichat asserts, that they are generally devoid of valves. 5. Of *Lymphatics*. Of these we know little, and cannot easily follow them between the fleshy fibres. 6. Of *Nerves*. These are numerous, and of different sizes. They, almost all, proceed from the encephalon; some, however, issue from ganglions, and accompany the arteries. In general, they penetrate the fleshy tissue along with the vessels, to which they are narrowly united. After they have entered the muscles, they divide and subdivide until they are lost sight of.

*MUSCLE CANIN*, Levator anguli oris—*m. Caninè*, Ischio-trochanterianus—*m. Grand fessier*, Glutæus major—*m. très large du dos*, Latissimus dorsi.

*MUSCULAR*, *Muscula'ris*. That which belongs or relates to the muscles.

*MUSCULAR ARTERIES*. Arteries that are distributed to the muscles. The name, *Muscular Arteries of the Eye*, has been specially given to two branches sent off by the ophthalmic artery:—the one, *inferior*, which furnishes branches to the rectus inferior oculi, lacrymal sac, &c., and some of the anterior ciliary arteries: the other—the *superior*, which is sometimes wanting; but when it exists, gives branches to the rectus superior oculi and levator palpebræ superioris.

*MUSCULAR VEINS*. These bring back the blood, which has been carried to the muscles by the muscular arteries.

*MUSCULAR* or *FLESHY FIBRES*. A name given to the filaments; which, by their union, form the muscles. This fibre is flat, soft, downy, linear, little elastic, more or less red; and arranged in zigzag according to its length, which is variable. It is firmer in adults than in the young or the aged; of the same size in the great and small muscles; and runs its course without bifurcation or ramification. It is but slightly resisting in the dead body, tearing readily; but, during life, it supports very great efforts without laceration. It is, itself, composed of a considerable number of fibrils, similar to each other, and subdividing almost *ad infinitum*. The ultimate filaments into which the fibre can be decomposed by mechanical means, do not seem to be hollow, as has been asserted. Their colour is red in man, and white in several animals.

A greater or less number of muscular fibres, united in fasciculi, approximated to each other, and forming a distinct mass, of very variable size and shape, the extremities being attached to bones by means of tendons,—constitutes a muscle. In this are included cellular membrane, vessels, and nerves. See Muscle.

*MUSCULAR CONTRACTION*. The exertion of the power, possessed by muscles, of shortening themselves, or of contracting to produce motion:—*Muscular motion* being the change in the situation and relation of organs, induced by muscular contraction. When a muscle contracts, its fibres assume more the zigzag direction, and the extremities approximate; but the bulk of the whole muscle is not augmented. This contraction takes place, at times, with extreme velocity: a single thrill, in the letter R, can be pronounced in the 1-30,000th part of a minute. The *force* of contraction depends upon the healthy physical condition of the muscle, combined with due energy of the brain. The *duration*, in voluntary motion, is for a certain time dependent upon the will:—contractions, excited involuntarily, cannot be so long maintained.

*MUSCULAR NERVES*. The nerves distributed to the muscles are so named. Winslow calls the 4th pair of nerves—*Nerf musculaire oblique supérieur*.

*MUSCULAR SYSTEM*. A term given to the aggregate of the muscles of the body.

*MUSCULI ACCESSORII AD SACRO-LUMBALÈM*, see Sacro-lumbalis—*m. Papillares*, *Carnæ columnæ*.

*MUSCULO-CUTANEOUS*, *Musculo-cutaneus*, from *musculus*, 'a muscle,' and *cutis*,

'skin.' That which appertains to muscles and skin.

**MUSCULO-CUTANEOUS NERVE.** This name is specially given to two nerves;—the *one*, the *External cutaneous nerve*, furnished by the brachial plexus (see *Cutaneous*):—the *other*, given off from the popliteus externus, (F.) *Nerf Sciatique, Poplitée externe*;—*Prétibio-digital*, (Ch.) It descends on the anterior and outer part of the leg, at first, hid amongst the muscles; becomes superficial about the middle of the leg; and divides into two branches, which pass superficially on the back of the foot.

**MUSCULO-RACHIDÆUS.** Belonging or relating to muscles and to the spine. A name given to branches, furnished, behind, by the intercostal, lumbar, and sacral arteries; and which are distributed to the spine and to the muscles of the neighbourhood.

**MUSCULUS ACCLIVIS**, Obliquus internus abdominis—m. Auxiliarius, Pyramidalis abdominis—m. Cutaneus, Platysma myoides—m. Eustachii, Laxator tympani—m. Fallopii, Pyramidalis abdominis—m. Patientiæ, Levator scapule—m. Penicillatus, Levator labii inferioris—m. Pyxoides terrestris, Lichen pyxidatus—m. Subcutaneus, Platysma myoides—m. Succenturiatus, Pyramidalis abdominis—m. Succingens, Diaphragm—m. Supercilii, Curvator supercilii—m. Testicondus, Cremaster—m. Testis, Cremaster—m. Tubæ novæ, Circumflexus.

**MUSCUS ARBOREUS**, Lichen plicatus—m. Caninus, Lichen caninus—m. Clavatus, Lycopodium—m. Corallinus, Corallina Corsicana—m. Cranii humani, Lichen saxatilis—m. Erectus, Lycopodium selago—m. Helminthocortos, Corallina Corsicana—m. Islandicus, Lichen islandicus—m. Marinus, Corallina Corsicana—m. Maritimus, Corallina—m. Pulmonarius quercinus, Lichen pulmonarius—m. Pyxidatus, Lichen pyxidatus—m. Villosus, Peristroma.

**MUSEAU DE TANCHE**, Os uteri.

**MUSHROOM**, Fungus.

**MUSIC**, *Mu'sien*, (F.) *Musique*. The art of producing harmonious and cadenced sounds: an art, which has, at times, been beneficially used in diseases, particularly in those of the mind; or on which the mind could act in a salutary manner.

**MUSICOMANIA**, *Musomani'a*. A variety of monomania, in which the passion for music is carried to such an extent, as to derange the intellectual faculties.

**MUSING**, LISTLESS, Aphelxia otiosa.

**MUSIQUE**, Music.

**MUSK**, *Moschus*, *Mosch* (Arab.) (F.) *Musc*. An animal substance, of a very diffusible odour, bitter taste, and deep brown colour; solid and enclosed in a sac, found near the anus of the *Moschus moschiferus* or *Musk Deer*. It is possessed of stimulant and antispasmodic properties. Dose, gr. v to ʒj in bolus.

**ARTIFICIAL MUSK**, *Moschus fletitius*, *Resina Sac'cini*. (Ol. *sac'cini rectif.* 1 part, *acid. nitric.* 4 parts. Digest;—a black matter will be deposited, which must be well washed with water.)

**MUSKGRAPE FLOWER**, *Bulbus vomitorij*.

**MUSKMALLOW**, *Hibiscus abelmoschus*.

**MUSKSEED**. See *Hibiscus abelmoschus*.

**MUSKWOOD**, *Thymiana*.

**MUSOMANIA**, *Musicomania*.

**MUSSÆN'DA FRONDO'SA**, *Bclil'la*, *Bele'son*. A decoction of this plant has been esteemed refrigerant.

**MUSSEL**, *Mytilus edulis*.

**MUSSITATIO**, *Mussionation*. A condition, in which the tongue and lips move, as in the act of speaking, but without sounds being produced. This sort of murmuring is an unfavourable sign in disease, as indicating great cerebral debility.

**MUSTACHE**, *Mystax*.

**MUSTARD**, BLACK, *Sinapis*—m. Hedge, *Erysimum*—m. Mithridate, *Thlaspi campestre*—m. Stinking hedge, *Alliaria*—m. Treacle, *Thlaspi arvense*—m. White, *Sinapis alba*.

**MUTACIS'MUS**, *Mutacism*. A vitious pronunciation; consisting, according to Sauvages, in the frequent repetition of the letters *v*, *r*, and *m*, which are substituted for others.

**MUTEOSIS**. Under this name is comprehended every phenomenon of expression, voluntary and involuntary, which impresses the sight or touch.

**MUTILATION**, *Mutilatio*, *Maiming*. The removal or privation of a limb, or of some other external part of the body. In all countries, this crime has been punished with severity.

**MUTISME**, *Mutitas*.

**MU'TITAS**, *Dumbness*, *Apho'nia*, *Ala'lia*, *Anad'ia*, *Speech'lessness*. (F.) *Mutisme*, *Mutité*. Impossibility of articulating sounds; although they can be elicited. Dumbness is often congenital, and united with deafness, of which it is an effect. In some cases, it is accidental.

**MUTITAS SURDORUM**, *Apho'nia Surdorum*, *Deaf-dumbness*. Speechlessness from deafness; congenital, or produced during infancy. The subjects of this affection are called *deaf-dumb*, (F.) *Sourds-muets*.

**MUTITÉ**, *Mutitas*.

**MUTO**, Penis.

**MUTTERKORN**, Ergot.

**MYACANTHA**, *Ruscus*.

**MYASTHENIA**, from *μυς*, 'a muscle,' and *ασθενεια*, 'debility.' Muscular debility.

**MYCE**, Occlusion.

**MYCES**, Fungus.

**MYCHMUS**, *Susprium*.

**MYCHTHISMOS**, Moaning.

**MYCHTHISMUS**, *Susprium*.

**MYCTERES**, Nares.

**MYCTEROPHO'NIA**, *Vox nasa'lis*, from *μυκτηρ*, 'the nose,' and *φωνη*, 'the voice.' A nasal voice. A nasal twang or accent.

**MYDE'SIS**, from *μυδω*, 'I abound with moisture.' In its most general sense, it means *corruption*. By some, it is used for a mucous discharge from inflamed eyelids.

**MYDON**, *μυδων*. Fungous or putrid flesh in certain fistulous ulcers.—Pollux. Also, flesh putrid from mouldiness, from *μυδος*, 'moisture.'

**MYDRIASIS**, *μυδρασις*, *Platygoria*, *Amydriasis*. A name, given by several writers to morbid dilatation of the pupil; and, by others, to weakness of sight, produced by hydrophthalmia.

**MYELITIS**, *Inflammatio medullæ spinæ liss*, *Spinittis*, *Spinodorsittis*, *Notomyelitiss*, from

μῆλος, 'the marrow,' and *itis*, denoting inflammation. Inflammation of the spinal marrow of its membranes;—indicated by deep seated burning pain in the spine, with various nervous and vascular irregularities of function. It is not common. Dr. Marshall Hall proposes to call the inflammation of the membranes of the brain *Meningitis*; that of the substance of the brain *Myelitis*.

MYELOPHTHISIS, *Tabes dorsalis*.

MYELOS, Marrow.

MYENERGIA, from *μυς*, 'a muscle,' *er*, and *εργον*, 'work.' Muscular strength.

MYGMUS, Suspirium.

MYITIS, Rheumatism, acute.

MYLACRIS, Patella.

MYLE, Patella, Mole.

MYLICUS, Molar.

MYLO-GLOSSUS, from *μυλη*, 'the jaw,' and *γλωσσα*, 'the tongue.' Winslow has given this name to muscular fibres, which pass from the posterior part of the myoid line of the lower jaw, and from the sides of the base of the tongue to the parietes of the pharynx. These fibres belong to the constrictor superior pharyngis, (q. v.)

MYLO-HYOIDEUS, from *μυλη*, 'the jaw,' and *ὑοειδης*, 'the os hyoides.' (F.) *Mylo-hyoidica*. The *Mylo-pharyngeus* of Morgagni and Sanctorini. This muscle is situate at the upper and anterior part of the neck, behind the lower jaw. It is broad, flat, and has the form of a truncated triangle. It arises from the internal oblique line of the lower jaw bone, and is inserted at the fore part of the body of the os hyoides. Its innermost fibres unite with those of the opposite side to form a raphe on the median line. The mylo-hyoidens raises the os hyoides and carries it forward, or it depresses the lower jaw.

MYLO-PHARYNGEUS, Constrictor pharyngis, Mylo-hyoidens.

MYOCEPHALON, Staphyloma.

MYOCELLIALGIA, from *μυων*, 'muscle,' *κοιλια*, 'abdomen,' and *αλγειν*, 'I suffer.' Pain in the muscles of the abdomen.

MYOCELLITIS, from *μυων*, 'muscle,' *κοιλια*, lower belly, and *itis*, denoting inflammation. Inflammation of the muscles of the abdomen.

MYODESOPSIA, Metamorphopsia.

MYODYNAMOMETER, Dynamometer.

MYODYNAMOMETER, Dynamometer.

MYODYNIA, from *μυων*, 'muscle,' and *οδνη*, 'pain.' Pain in the muscles,—rheumatism or other. Rheumatism (q. v.)

MYOGRAPHY, *Myographeia*, from *μυων*, 'muscle,' and *γραφειν*, 'to describe.' An anatomical description of the muscles.

MYOLOGY, *Myologìa*, *Surcologìa*, *Mysiologia*, from *μυων*, 'a muscle,' and *λογος*, 'a discourse.' That part of anatomy which treats of the muscles.

MYON, Muscle.

MYONARCOSIS, from *μυων*, 'a muscle,' and *ρακη*, 'stupor.' Numbness of the muscles.

MYONOSOS, *Myonuosos*, from *μυς*, 'a muscle,' and *ροσος*, 'disease.' A disease of the muscles.

MYOPALMUS, Subsultus tendinum.

MYOPIA, *Myopiasis*, *Lusciositas*, *Myosis*, *Paropis* propinqua, *Amblyopia dissitorum*,

*Dysopia dissitorum*, *Visus juvenum*, from *μυω*, 'I close,' or from *μυς*, 'a mouse,' and *ωψ*, 'the eye.' *Near-sightedness*, *Mouse-sight*, *Parblindness*, (F.) *Vue courte*. Persons who can only see objects very near. The defect is owing to the too great convexity of the eye and is palliated by wearing concave glasses.

MYOPS, *μωψ*, *Lusciosus*, *Myopus*. Same etymon. One who is attacked with *myopia* or short-sightedness.

MYOSIS, from *μυω*, 'I close.' *Phthisis pupillar'is*. Permanent contraction of the pupil. It is usually caused by iritis, and is extremely difficult of cure. When it exists to such an extent as to obliterate the pupil, it is called Synizesis, (q. v.) Also, *Myopia*, (q. v.)

MYOSITIS, from *μυων*, 'a muscle.' A name proposed by *Sagar* for inflammation of the muscles. Rheumatism.

MYOSOTIS, *Hieracium pilosella*, Rheumatism, Rheumatism, acute.

MYOTOMY, *Myotomia*, from *μυων*, 'a muscle,' and *τεμνειν*, 'to cut.' The part of practical anatomy, which treats of the dissection of the muscles. Also, the surgical operation of the division of muscles to remove deformity.

MYOTYRBE, Chorea.

MYREPSUS, Unguentarius.

MYRIAGRAMME, from *μυρια*, '10,000,' and *γραμμα*, 'gramme.' A weight equal to 10,000 grammes, or to 26 pounds, 9 ounces and 6 drachms Troy.

MYRIAMETER, a measure of 10,000 metres; equal to 16 miles, 1 furlong, 156 yards, and 14 inches.

MYRICA CERIFERA. See *Cera flava* et alba.

MYRICA GALE, *Myrtus Brabantica*, *M. Anglica*, *Myrtifolia Belgica*, *Gale*, *Gagel*, *Rhus sylvestris*, *Ac'uron*, *Elæagnus*, *E. eordo*, *Chamaeleagnus*, *Dodonæa*. Dutch myrtle, Sweet gale, Sweet willow, Candleberry myrtle, (F.) *Piment Royal*, *Thé de Simon Pauli*, *Gale odorant*. Family, *Amentaceæ*. *Sex Syst.* Diœcia Tetrandria. The leaves, flowers, and seeds have a strong, fragrant smell and a bitter taste. They are used for destroying moths and cutaneous insects, and the infusion is given internally as a stomachic and vermifuge.

MYRINGA. See Tympanum.

MYRINX. See Tympanum.

MYRISTICA MÖSCHA'TA, *M. aromatica*, *Comacon*. *Nut. Ord.* Myristicæ. The tree which produces the nutmeg and mace. (F.) *Muscadier*. The *Nutmeg*, *Myristica nucleus*, *Myristica moschat'æ nucleus*, *Nux moschat'æ*, *Nucis'ta*, *Nux myristica*, *Chrysobalanus Gale'ni*, *Unguentaria*, *As'sala*, *Nux aromatica*, (F.) *Muscade*, is the seed or kernel. It has a fragrant, aromatic odour; an agreeable, pungent taste, and is much used for culinary purposes. Alcohol extracts its active matter. It has the properties of aromatics in general; being stimulant and stomachic. The oil—*Oleum myristicæ*—possesses the virtues of the nutmeg. Dose of nutmeg, gr. v. to ℥j;—of the oil gut. iij to gr. vj.

MACE, *Macis*, *Maces*, *Flores macis*, (F.) *Fleurs de muscade*, is the involucre of the fruit; it is membranous, with the odour and taste of the nutmeg, and is possessed of similar qualities.

The *Oleum macis* is a fragrant, sebaceous substance, expressed in the East Indies. It is only used externally.

MYRISTICÆ NUCLEUS. See *Myristica moschata*.

MYRMECIASIS, Formication.

MYRMECIASMOS, Formication.

MYRMECIZON, Formicant.

MYRMEX, Formica.

MYROBALANUS, from *μυροβ*, 'an ointment,' and *βάλανος*, 'a nut;' so called, because formerly used in ointments, *Angela'ceos*, *Myrobalan*. A dried Indian fruit of the plum kind. Of this there are several varieties—the *M. Bellirica* or *Belliric myrobalan*, *Bellegu*, *Belleregi*, *Belnileg*;—the *M. chebulata* or *Chebul myrobalan*; the *M. citrina* or *Yellow myrobalan*. *Ara'ra*; the *M. emblica* or *emblic myrobalan*, and the *M. Indica*, *As'uar*, *Indiun*, or *Black myrobalan*. All the myrobalans have an unpleasant, bitterish, very austere taste; and strike an inky blackness with a solution of steel. They are said to possess laxative as well as astringent properties.

MYRON, Unguentum.

MYROPISSOCE/ŒON. A topical application in alopecia, referred to by Galen; from *μυρο*, 'ointment,' *πίσσα*, 'pitch,' and *κίρκος*, 'wax.'

MYROPCEAS, Unguentarius.

MYROPOLES, Apothecary, Unguentarius

MYROSPERMUM PERUIFERUM. See *Myroxylon peruiferum*.

MYROXYLON PERUIFERUM, *Cabureiba*. *Nat. Ord.* Leguminosæ. The tree which affords the *Peruvian balsam*. *Balsamum Peruvianum*, *Putzoehill*, *Myoxyli Peruiferi balsamum*, *Indian*, *Mexican*, or *American balsam*, *Balsamum Peruvianum*, *Cabureiciba*, (F.) *Baume de Pérou*. This balsam consists of Benzoic acid, resin, and essential oil. Its odour is fragrant and aromatic; taste hot and bitter; soluble in alcohol and miscible in water by the aid of mucilage. It is stimulant and tonic, and considered to be expectorant: as such, it has been employed in paralysis, chronic asthma, chronic bronchitis and rheumatism, gleet, leucorrhœa, &c., and, externally, for cleansing and stimulating foul indolent ulcers. Dose, gr. v. to grt. xxx.

The WHITE BALSAM OF PERU, *Naturol balsam*, *Balsamum album*, *Styrax alba*, *Balsameæon*, is obtained by incision from the *Myrospermum peruiferum*.

MYRRHA, *μύρρα*, Heb. מֵרְיָה; *Bola*, *Stactæ*, *Ergas'na*, *Myrrh*, *Culo'nia*, *Smyrna*, *Myrrha rubra*, (F.) *Myrrhe*. The exudation of an unknown plant of Abyssinia or Arabia Felix. This gum resin has a fragrant, peculiar odour; and bitter aromatic taste. It is in reddish-yellow, light, brittle, irregular tears; partially soluble in distilled water, when aided by friction. S. G. 1.360. It is stimulant; and has been used in cachectic affections, humoral asthma, chronic bronchitis, &c. Dose, gr. x. to ʒj.

MYRRHA IMPERFECTA, *Bdellium*.

MYRRHINE, *Myrtus*.

MYRRHIS ANNUA, *Athamanta cretensis*—m. *Odorata*, *Chærophyllum odoratum*.

MYRSINE, *Myrtus*.

MYRSINELÆ/ŒON, from *μυρσινη*, 'the myr-

tle,' and *ελαϊον*, 'oil.' Oil of myrtle.—*Dioscoïdes*.

MYRSIN/ŒTES, *μυρσινίτης*. Wine, in which branches of myrtle have been macerated.

MYRTACANTHA, *Ruscus*.

MYRTE COMMUN, *Myrtus*.

MYRTID/ANON, *μυρτιδανον*. An excrement, growing on the trunk of the myrtle, and used as an astringent. Also, a wine—*Vinum myrtid'anum*—made from wild myrtle berries.

MYRTIFOLIA BELGICA, *Myrica gale*.

MYRTIFORM, *Myrtiformis*; from *myrtus*, 'a myrtle,' and *farma*, 'shape.' Having the shape of a leaf of myrtle. A name given to a muscle (depressor alæ nasi, q. v.) to the fossa incisiva; to certain caruncles, (q. v.) &c.

MYRTIFORMIS, Compressor naris, Depressor alæ nasi.

MYRTITES. A name, given to a medicine prepared with honey and myrtle berries.

MYRTELE, *Myrtus*—m. Berry, *Vaccinium myrtillus*—m. Candleberry, *Myrica gale*—m. Dutch, *Myrica gale*—m. Wild, *Ruscus*.

MYRTOCHEILIDES, *Nymphæa*.

MYRTON, *Clitoris*.

MYRTUS, *Myrtus communis*, *M. communis Italica*, *Myrsinæ*, *Myrrhinæ*, *The myrtle*, (F.) *Myrte commun*. The berries of this plant have been recommended in alvine and uterine fluxes and other disorders of relaxation and debility. They are moderately astringent and somewhat aromatic.

MYRTUS ANGLICA, *Myrica gale*—m. *Brabantica*, *Myrica gale*.

MYRTUS CARYOPHYLLATA, *Cassia caryophyllata*, *Cuneifolia caryophyllata*, (F.) *Capelat*, *Cannelle girofle*. The tree which affords the *Clove bark*;—*Cortex caryophyllatus*. This bark is a warm aromatic; resembling clove with an admixture of cinnamon. It may be used with the same views as cloves or cinnamon.

MYRTUS PIMENTA, The tree which bears the *Jamaica pepper*, *Pimenta bacca*, *Pimento berries*, *Pimento*, *Piper caryophyllatum*, *Ca'culi Indi aromati*, *Piper chis'pa*, *Amomum pimenta*, *Fructus pimentis*, *Cayenne*, *Caryophyllus Americænnis*, *Piper odoratum Jamaicænsis*, *Allspice*, *Piper Jamaicænsis*, *Piper tabascum*, (F.) *Pavvre de Jamaïque*, *Toute épice*, *Assourou*. These berries have an aromatic odour; resembling a mixture of cinnamon, nutmeg, and cloves; the taste is pungent, but mixed, like the odour. Like other peppers, this is stimulant and carminative. The oil—*Oleum pimentæ*—possesses the virtues of the berries. The powdered fruit has been called *Quatre-épices* or *Four spices*. Dose, gr. v. to ʒij.

MYS, *Muscle*.

MYSIOLOGIA, *Myology*.

MYSTAX, *μυσταξ*. The hair growing on each side the upper lip in men. The *mustache* or *mustachio*.

MYSTERION, *μυστήριον*. An arcanum, nostrum, or secret preparation in general. Also, an antidote, referred to by Galen and others.

MYSTRON, *μυστρον*. A Greek measure, which held about three drachms.

MYTILUS EDULIS. The *common mussel*. (F.) *Moule*. A bivalve, the flesh of which,

when at all in a state of decomposition, is highly poisonous. When fresh, it is an agreeable article of diet

MYURUS, *Meiurus*. A pulse is so called when it sinks progressively, and becomes smaller and smaller like a rat's tail; from *μυς*, 'rat,' and *ορρα*, 'tail.' *Pulsus myurus reciprocus*, a pulse, which, after having become gradually weaker, resumes, by degrees, its former character.

MYXA, Mucus, Sebestina.

MYXODES, Mucous.

MYXOR'RHOOS, *μυζορροος*, from *μυξα*, 'mucus,' and *ρροο*, 'I flow.' One who is subject to mucous discharge. Applied to infants, that discharge a considerable quantity of mucus and saliva.

MYXOSARCO'MA, from *μυξα*, 'mucus,' and *σαρξ*, 'flesh.' A tumour which is mucocarnæous; partly mucous and partly fleshy.

MYXOTER, Nasus.

MYZESIS, Sucking.

## N.

N. This letter, in prescriptions, is an abridgment of *Numero*, 'by number.'

NABOT. *Saccharum candidum*.

NABOTHI GLAN'DULÆ. *O'cula Nabothi, Oculum Nabothi, Folliculi rotundi et oblongi, Vesiculæ seu Bullæ rotundæ cervicis uteri, Vesiculæ seminales mulierum, Corpora globosa, Corpora cula globosa, Glandulæ seu Hydatides cervicis uteri*. Some small, mucous crypts or follicles situate in the interstices of the duplicatures of the lining membrane of the cervix uteri. Naboth, from noticing them in a morbid condition, mistook them for ova; and hence they received the name *Ocula Nabothi*.

NACRA, *Nakra, Nasa*. A kind of Influenza, common in the East Indies.

NÆVUS. *Nævus maternus, Nevus, Macula matricis, M. Mater'nae, Stigmata, Metroclides, Mother's marks, Fancy marks, Mother's spots, Congenitæ notæ*, (F.) *Envie*. Spots of various kinds on the skin of children when born, which have been idly attributed to the influence of the maternal imagination on the fetus in utero. They are of various appearances, some much better supplied with blood than others. Some are merely superficial or stain-like spots. Others are prominent; and, often, have long, irregular hairs growing from them. These have usually been called *Moles, Spili, Epichro'ses spili*, &c.

When nævi are superficial, without any disposition to enlarge or spread, they need not be meddled with; but all those that partake of the character of aneurism by anastomosis, had better be removed by the knife.

NAFDA, *Naphtha*.

NAIL, Sax. *naegil*. (G.) *Nagel. Unguis, Onyx*, (F.) *Ongle*. A whitish transparent substance, similar to horn, which covers the dorsal extremity of the fingers. Three portions are distinguished in it; the *extremity*, which is free, at the end of the finger;—the *body* or middle portion adherent by its inner surface; and the *root*. The last presents two distinct parts; the one, terminated by a thin, serrated edge, is buried in a duplicate of the skin; the other, called *lu'nula*, is whitish and of a semilunar shape, seu *Semilu'nula unguinum*, and is situate above the part where the epidermis terminates. The nails are composed of a horny tissue, of the same nature as that which forms the hoofs, horns, and scales of different animals. When the nail has been torn off, the papillæ of the skin become covered by a soft, whitish lamina;

whose consistence gradually augments. New laminae are then formed underneath, and give the nail the thickness it ought to possess. The corneous substance, being thus constantly produced at the extremity of each of these laminae, the whole of the nail is pushed forwards, and it would grow indefinitely, were it not cut or worn by friction.

The nails protect and support the extremities of the fingers against the impression of hard bodies. They are, also, useful in laying hold of small bodies; and dividing those that have but little consistence.

NAIN, *Nanus*.

NAKRA, *Nacra*.

NANUS, *Pumilus, Pumilio. A dwarf*. (F.) *Nain*. An individual, who is much below the usual stature. The term is applicable to all organized beings, from man to the vegetable. Trees have their dwarfs, as the human species have theirs.

Some curious authenticated instances of human dwarfs are on record. Bebe, the dwarf of Stanislaus, king of Poland, was 33 inches (French,) and well proportioned. The Polish nobleman, Borwiaski, who was well made, clever, and a good linguist, measured 28 Paris inches. He had a brother, 34 inches high, and a sister 21. A Friesland peasant, at 26 years of age, had attained 29 Amsterdam inches. C. H. Stöberin of Nürnberg, was not 3 feet high at 20, yet he was well proportioned and possessed of talents.

NAPPELLUS VERUS, *Aconitum napellus*.

NAPHE FLORES. See *Citrus aurantium*.

NAPHTHA, *Nafda, Oleum petre album*, from a Chaldaic and Syriac word signifying *bitumen*. A bituminous substance, found in Persia, Calabria, Sicily, &c. It is liquid, limpid, of a yellowish white colour, a smell slightly resembling that of oil of turpentine, and lighter than water. It resembles petroleum in its properties, and has been chiefly used as an external application; although, occasionally, as an anthelminthic.

NAPHTHA VITRIOLI, *Æther sulphuricus—n. Vitrioli camphorata, Tinctura ætherea camphorata—n. Vitrioli martialis, Tinctura seu alcohol sulfurico-æthereus ferri*.

NAPIUM, *Lapsana*.

NAPLES, MINERAL WATERS OF. In the Quarter, Santa Lucia, near the coast, is a cold spring, rich in sulphuretted hydrogen and

carbonic acid. It is much used as an aperient tonic, and in cutaneous affections.

**NAPLES WATER, FACTITIOUS.** (F.) *Eau de Naples, Aqua Neopolitana, Aqua acidula hydro-sulphurata.* (Acidulous water, containing four times its bulk of carbonic acid,  $\zeta$ xv, and  $\zeta$ ij, hydrosulphuretted water,  $\zeta$ ix, carbonate of soda, gr. viij, carbonate of magnesia, gr. x. &c. Ph. P.)

**NAPTA, Nata.**

**NAPUS, Sinapis**—n. *Sylvestris, Brassica napus.*

**NARCAPHTE, Thymiama.**

**NARCAPHTHON, Nausephthon.** The bark of an aromatic tree formerly brought from India. By some, supposed to be that of the tree which affords the olibanum. It was used in fumigation, in diseases of the lungs.

**NARCE, Narcosis.**

**NARCEMA, Narcosis.**

**NARCISSÉ FAUX, Narcissus pseudo-narcissus**—n. *des Prés, Narcissus pseudo-narcissus*—n. *Savage, Narcissus pseudo-narcissus.*

**NARCISSUS PSEUDO-NARCISSUS.** The *Daffodil.* (F.) *Narcisse sauvage, Narcisse des prés, Faux narcissé.* The root is emetic and cathartic, in the dose of  $\zeta$ ij. The flowers are antispasmodic. Dose, 24 grains.

**NARCOTISIS, Narcotism, Nareë, Narca, Nareëna, Torpédo, Torpor, Stupor, Stupefactio.** The aggregate effects produced by narcotic substances. At times, narcotism is confined to a state of more or less profound stupor; and constitutes, in certain cases, a useful remedial condition; at others, it is true poisoning, characterized by vertigo, nausea, a state of intoxication or apoplexy, constant delirium, convulsive motions, &c. Emetics, in strong doses, and not much diluted with water; purgatives and glisters are the first means to be used in this condition. The stupor may afterwards be combated by the use of exciting and stimulating drinks.

**NARCOTICS, Narcotica, Caroëtica, Obstupefactiva, Stupefactiva,** (F.) *Stupéfactifs, Stupéfiants,* from  $\nu\alpha\rho\omega\iota$ , 'stupor.' Substances which have the property of stupefying;—as opium, stramonium, hyoscyamus, belladonna, &c. They are used in medicine as soothing agents; exerting their particular influence on the brain. In small doses, as a general principle, narcotics stimulate; in large, they act as sedatives.

The following is a list of the chief narcotics:

|              |                      |
|--------------|----------------------|
| Aconitum,    | Opium,               |
| Ætherea,     | Papaveris Capsulæ,   |
| Belladonna,  | Stramonii Folia,     |
| Camphora,    | — Semina,            |
| Conium,      |                      |
| Digitalis,   | Mental Narcotics,    |
| Humulus,     | (Appropriate Music,  |
| Hyoscyamus,  | Monotonous Sounds,   |
| Luctucarium, | or any succession of |
| Lupulina,    | monotonous impres-   |
| Morphina,    | sions.)              |

**NARCOTINE, Narcotina.** Same etymon. *Sel de Derosne, Opiane, Sel d'opium, Principe crystallizable de Derosne.* A solid, white, inodorous, and insipid substance; crystallizable in straight prisms with a rhomboidal base; fusible like the fats; soluble in boiling alcohol and ether, and scarcely soluble in water. Narcotine produces all the unpleasant effects of opium;

but, at the same time, throws the animal into a state of stupor. It is not used in medicine, on account of these objections.

**NARCOTISM, Narcosis.**

**NARD, CELTIC, Valeriana Celtica**—n. *Indica, Nardus Indica*—n. *Indien, Nardus Indica*—n. *Indique, Nardus Indica*—n. *Sauvage, Asarum.*

**NARDUM GALLICUM, Valeriana Celtica.**  
**NARDUS CELTICA, Valeriana Celtica**—n. *Montana, Asarum.*

**NARDUS INDICA, Spica nardi, Spica Indica, Indian nard, Spikenard, Andropogon nardus.**

The root of this plant is one of the ingredients in the mithridate and theriaca. It is moderately warm and pungent, and has a flavour by no means disagreeable. It is used by the Orientals as a spice:—(F.) *Nard Indien, N. Indique.* An ointment was formerly used, called *Unguentum nardinum.* It was prepared of *Nard, Malabathrum leaves, Oil of worms, Costus, Amomum, Myrrh, &c.* and was used as a detergent.

**NARDUS RUSTICA, Asarum.**

**NARES, Rhines, Cavitas Narium, Cavum seu Cava seu Caverna narium, Nasus internus, Myetes, Narium aditus, Ocheudmata. The nostrils.** (F.) *Narines.* Two elliptical apertures, situate beneath the nose, and separated from each other by the cartilaginous septum nasi. These apertures are continually open, and give passage to the air we breathe; and to the mucous fluids secreted in the nasal fossæ.

**NARES INTERNÆ, Nasal fossæ.**

The **POSTERIOR NARES, Nares postrema, Extréma nares, Ostia posteriora seu Chœane narium, Narium Exitas,** (F.) *Arrières narines, Ouvertures postérieures des fosses nasales,* are the posterior apertures of the nasal cavities, which establish a communication between those cavities and the pharynx. They are bounded, above, by the body of the sphenoid bone; below, by the palate bone, and the base of the velum pendulum; and, on the outside, by the internal ala of the pterygoid process. They are separated from each other by a septum, of which the vomer is the bony part.

**NARIFUSORIA, from Nares, 'the nostrils,' and fundere, 'to pour.'** Medicines dropped into the nostrils.

**NARINES, Nares.**

**NARIUM ADITUS, Nares.**

**NARTEX, Splint.**

**NASA, Næra, Nata.**

**NASAL, Nasalis.** That which relates to the nose.

**NASAL BONES, Ossa nasi, Ossa nasalia, Ossicula nasi, Ossa maxilla superioris quarta seu quinta seu secunda,** (F.) *Os nasoux, Os propres du nez.* These bones are situate beneath the nasal notch of the os frontis, and occupy the space between the nasal or angular processes of the superior maxillary bone. Their shape is nearly quadrilateral. They have an external or cutaneous surface; an internal or nasal, and four margins. Each is articulated with its fellow, with the os frontis, ethmoid, and superior maxillary bone. They ossify from a single point.

**NASAL PROMINENCE, (F.) Bosse nasale.** A prominence, situate on the median line at the anterior surface of the os frontis, between the two superciliary arches.

**NASAL NOTCH**, (F.) *Échancrure nasale*. A semicircular notch, situate between the nasal prominence of the frontal bone, and articulated with the nasal bones and the nasal processes of the superior maxillary bones.

**NASAL SPINES**. These are three in number. 1. The *Superior nasal spine* of the os frontis, occupying the middle of its nasal notch, and articulated before with the nasal bones, behind with the ethmoid. 2. The *inferior and anterior nasal spine*, situate at the inferior part of the anterior opening of the nasal fossæ. It is formed by the two superior maxillary bones; and 3. The *inferior and posterior nasal spine*, *Épine gutturale*, (Ch.) a process, formed on the median line by the two palate bones at the posterior part of the palatine arch.

The **NASAL FOSSÆ**, *Cavi narium*, *Nares inter'næ* are two large, anfractuous cavities, situate between the orbits below the cranium, and lined by the pituitary or Schneiderian membrane. These cavities have no communication with each other; but the various sinuses in the neighbouring bones;—the ethmoidal, sphenoidal, superior maxillary, &c., all communicate with them. The general cavity of each nostril is divided by the ossa spongiosa into three *meatus* or *passages*, which run from before backwards.

1. The *Meatus narium superior*, placed at the upper, inner, and back part of the superior spongy bone. 2. The *Meatus medius*, situate between the superior and inferior spongy bones; and 3. The *Meatus inferior*, situate between the inferior spongy bone and the bottom of the nose.

The Schneiderian membrane receives the first pair of nerves, and various branches from the fifth pair. The arteries are furnished by the branches of the *internal maxillary*, known under the names sphenopalatine, infra-orbital, superior alveolar, palatine, pterygo-palatine; by the supra-orbital, and ethmoidal branches of the ophthalmic artery, by the internal carotid, superior labial, and dorsales nasi. Its veins are little known, and generally follow the course of the arteries. The lymphatics are almost unknown. The nasal fossæ are the seat of smell; they aid, also, in respiration and phonation.

**NASAL ARTERY**. This is the largest of the two branches in which the ophthalmic artery terminates. It issues from the orbit, above the tendon of the orbicularis palpebrarum, passes above the side of the root of the nose, and anastomoses with the last extremity of the facial. Haller gave the name *nasal* to the sphenopalatine. He also called the dorsales nasi, furnished by the external maxillary, *Nasales laterales*.

**NASAL NERVE**,—*Naso-palpébral* (Ch.),—*Naso-ocul'ris* (Sömmering.) One of the three branches of the ophthalmic nerve of Willis. It enters the orbit by the sphenoidal fissure, passes along the inner paries of that cavity, and divides, opposite the internal and anterior orbital foramen, into two branches. 1. The *internal and posterior*, which passes into the *Foramen orbitarium internum anterius*, enters the cranium beneath the dura mater, and passes into the nasal fossæ, through an aperture at the sides of the *Crista galli*. It, afterwards, divides into

several filaments: one of them—the *Naso-lobar*, of Chaussier—is very small, and descends on the posterior surface of the os nasi, and ramifies in the integuments of the ala nasi. A second terminates near the septum; others descend along the outer paries of the nasal fossæ. 2. The other is *external and anterior*, and is called the *external nasal nerve*. It is distributed to the outside of the orbit. Before dividing, the nasal nerve communicates with the ophthalmic ganglion, and gives off two or three ciliary nerves:—the *Posterior Nasal Nerves*. Sömmering has given this name to the nerves, which arise from the internal part of the sphenopalatine ganglion.

The **NASAL MUCUS**, *Mucus narium*, *Macor* seu *Pituita*, seu *Blenna*, seu *Lympha muculenta narium*, vulgarly called *Snot*, (F.) *Morce*, is the mucus secreted by the Schneiderian membrane.

**NASAL CARTILAGE**, *Cartilago triangularis Nasi*. A cartilage, formed of three portions, which unite at the dorsum nasi, and are distinguished into the *cartilage of the septum*, and the *lateral cartilages*. This cartilage is continuous, *above*, with the ossa nasi; and, *inferiorly*, with membranous fibro-cartilages, which form the supple and movable part of the nostrils. They are two in number—the one before, the other behind.

**NASALIS**, Compressor naris.

**NASALIS LABII SUPERIORIS**. A small muscular slip, which runs up from the middle of the orbicularis and the lip to the tip of the nose. It lies exactly in the furrow, and is occasionally a levator of the upper lip, or a depressor of the tip of the nose.

**NAS'CALE**. A kind of pessary, made of wool or cotton, which was formerly introduced into the vagina, after being impregnated with oil, ointment, or some other proper medicament.

**NASCAPHTHON**, Narsaphthon.

**NASDA**, Nata.

**NASITAS**, Rhinophonia.

**NASITIS POSTICA**, Angina nasalis.

**NASO-PAL'ATINE**, *Naso-palati'nus*. That which belongs to the nose and velum palati.

The **NASO-PALATINE NERVE** is furnished by the sphenopalatine, which proceeds from the ganglion of Meckel. It traverses the vault of the nasal fossæ, and proceeds upon the septum between the two layers of the pituitary membrane. It enters the anterior palatine canal, and terminates at the superior angles of the naso-palatine ganglion, without attaining the mouth.

The **NASO-PALATINE GANGLION** is situate in the foramen palatinum anterius. Its greater extremity receives the two naso-palatine branches; whilst the smaller gives off two or three filaments, which reach the palatine vault, where they ramify on the membrane of the same name, anastomosing with filaments of the great palatine nerve.

**NASO-PALPÉBRAL**, Orbicularis palpebrarum.

**NASTURTIIUM AQUATICUM**, Cardamine pratensis, Sisymbrium nasturtium—n. Hortense, Lepidium sativum—n. Indicum, Tropæolum majus—n. Peruvianum, Tropæolum majus—n. Pratense, Cardamine pratensis.

NASUM DILATANS, *Pyramidalis nasi*.

NASUS. The *Nose*, *Rhin*, *Rhis*, *Organon olfactus* seu *odoratus* seu *olfactorium*, *Promontorium faciei*, *Myxoter*. (F.) *Nez*. The nose is a pyramidal eminence, situate above the anterior apertures of the nasal fossæ, which it covers; and, consequently, occupying the middle and upper part of the face, between the forehead and upper lip, the orbits and the cheeks. Its lateral surfaces form, by uniting angularly, a more or less prominent line, called the *Dorsum Nasi*, (F.) *Dos du nez*. This line terminates, anteriorly, by the *lobe*. The sides are called *Alæ Nasi*, *Pinnæ Naris*, (F.) *Ailes du nez*. The *Alveola* is the inferior part of the partition.

The chief varieties of the nose are the *aquiline*, the *flat nose*, (F.) *Nez camarot ou épulé*, and the *snub nose*, (F.) *Nez retroussé*. The nose is formed, besides its bones, of fibro-cartilage, cartilage, muscles, vessels, and nerves; and its use seems to be, to direct odours to the upper part of the nasal fossæ.

NASUS INTERNUS, *Nares*.

NATA, *Natta*, *Nasa*, *Nusda*, *Napta*. A fleshy, indolent excrescence, having the shape of the nates.

NATARON, *Natron*.

NATA'TION, *Natatio*, *Swimming*. The action of swimming, or of supporting one's self or moving upon the water.

Swimming resembles the horizontal leap in its physiology—the medium being water instead of air. The difference between the specific gravity of the human body and that of water is not great; so that but little exertion is required to keep a part of the body above water.

Swimming is a healthy gymnastic exercise, combining the advantages of bathing.

NATES, *Ephed'rama*, *Nat'ula*, *Scaphia*, *Clunes*, *Glutoi*, *Mona*; the *Bottom*, *Backside*, *Posterioris*, *Buttocks*, &c. (F.) *Fesses*. Two round projections, at the inferior and posterior part of the trunk, on which we sit. Amongst the mammalia, man alone has the nates prominent and round. They are formed chiefly by the skin, and a thick layer of cellular tissue, which covers the three glutæi muscles.

NATES ET TESTES, *Quadrigenina corpora*.

NATRON, *Natronum*, *Nat'aron*, *Nitrum*. A saline compound, very abundant in Egypt, which is almost wholly formed of subcarbonate of soda, (q. v.)

NATRON MURIATUM, *Soda*, *muriate* of—n. *Preparatum*, *Soda*, *subcarbonate* of—n. *Tartarizatum*, *Soda*, *tartrate* of—n. *Vitriolatum*, *Soda*, *sulphate* of.

NATRUM MURIATICUM, *Soda*, *muriate* of—n. *Oxyphosphorodes*, *Soda*, *phosphate* of—n. *Sulphuricum*, *Soda*, *sulphate* of.

NATTA, *Nata*.

NATULÆ, *Nates*.

NATURAL PARTS, *Genital organs*.

NATURALIA, *Genital organs*.

NAUSEA, *Nausio'sis*, *Nautia*, (F.) *Nausée*, *Envie de vomir*; from *ναυς*, 'a ship;' because those unaccustomed to sailing are so affected. Sickness. A desire to vomit.

NAUSEA MARI'NA; *Morbus nauticus*, *Seasickness*, (F.) *Mal de mer*. The sickness, vomiting, &c., experienced at sea by those unac-

customed to a sea life; and from which those who are so accustomed are not always exempt. It generally ceases when the person becomes habituated to the motion of the vessel, and not till then.

NAUSEANT, *Nauseans*. An agent that excites nausea, which is a state of diminished action. Nauseants are, hence, valuable remedies in diseases of excitement.

NAUSIO'SIS, *ναυσιοσις*. This word, besides being synonymous with nausea, (q. v.), has been used to express the state of venous hemorrhage, when blood is discharged by jets.

NAUTIA, *Nausea*.

NAVEL, *Umbilicus*—n. *String*, *Funiculus umbilicalis*.

NAVET, *Brassica rapa*.

NAVETTE, *Brassica napus*.

NAVICULAR, *Navicularis*, *Naviformis*, from *navic'ula*, 'a little ship.'

Fossa NAVICULAR'IS. *F. Scaphoides*, *Navic'ula*, *Scaph'ula*. See *Scaphoid*. This name has been given, 1. To a small depression between the entrance of the vagina and the posterior commissure of the labia majora or fourchette. 2. To a perceptible dilatation, presented by the urethra in man, near the base of the glans. 3. To the superficial depression which separates the two roots of the helix. This is also called *Scapha*.

NAVIFORMIS, *Navicular*.

NEAR-SIGHTEDNESS, *Myopia*.

NEB'ULA, *Nutes*, *Nubec'ula*, *Nephos*, *Neph'elæ*, *Nephelion*, (F.) *Nuage*, *Ombrage*. See *Caligo*. A slight speck on the cornea. A mist or cloud suspended in the urine.

NEBULOUS, *Nepheloid*.

NECESSARY, *Necessarius*. The *Necessaries of Life*, *Vitæ necessitates*, (F.) *Besoins de la vie*, include every thing requisite for the maintenance of life; and particularly food.

NECK, DERBYSHIRE, *Bronchocele*—n. *Swelled*, *Bronchocele*—n. *Wry*, *Tortioollis*.

NECKLACE, AN'ODYNE. These are formed of the roots of hyoseyamus, Job's tears, allspice steeped in brandy, or the seeds of the wild liquorice vine, to suit the fancies of the prescribers. They are employed to facilitate dentition in children, and to procure sleep in fever.

NECRODES, *Cadaverous*.

NECROLOGY, *BILLS OF*, *Mortality*, *bills of*.

NEC'ROMANCY, *Necromanti'a*, *Negromanti'a*, *Nigromanti'a*, *Necyomanti'a*, *Necromanti'a*; from *νεκρος*, 'death,' and *μαντια*, 'divination.' Divination by the dead.

NECROMANTIA, *Necromancy*.

NECROMAN, *Cadaver*.

NECROPHOBIA, from *νεκρος*, 'death,' and *φοβος*, 'fear.' Exaggerated fear of death. This symptom occurs in patients, where the disease is not mortal; as in hypochondriasis. In fevers, it is not a good symptom.

NECROPSY, *Autopsia cadaverica*.

NECROSCOPY, *Autopsia cadaverica*.

NECRO'SIS, *νεκρωσις*, from *νεκρως*, 'I mortify.' Mortification, (q. v.) State of a bone or of a portion of a bone deprived of life. Necrosis may take place without the surrounding soft parts being struck with gangrene. It is to

the bones what gangrene is to the soft parts. The part of the bone affected with necrosis becomes a foreign body, similar to the gangrenous eschar, and its separation must be accomplished by the efforts of nature or by art. When necrosis occurs in the centre of long bones, it never extends to their articular extremities. The exterior layers of bone form a canal round the dead portion or *sequestrum*; between these swollen layers and the sequestrum suppuration takes place; the matter presses against the bony canal; perforates it, and is discharged by apertures, which become fistulous.

In the treatment, the exit of the sequestrum must be facilitated by proper incisions, by the application of the trepan to the bone, &c.

NECROSIS DENTII, Dental gangrene—*n. Ustilaginea, Ergotism.*

NECROTOMY, Dissection.

NECTAR, from *νε*, 'a particle of negation,' and *κταω*, 'to kill.' A pleasant liquor, feigned by the poets to have been the drink of the gods, and to have rendered immortal those who drank of it. A name given by the ancients, to many drinks; and particularly to one made with wine, evaporated and sweetened with honey.

NÉCYOMANTIA, Necromancy.

NEDYIA, Intestine.

NEDYS, *νηδύς*. The belly; abdomen (q. v.); stomach (q. v.); womb.

NEEDLE. Sax. *nebl*, from Teut. *neten*, 'to sew.' *Acus, Bel'onē, Raphis, Raphion, Acc's'tra.* (F.) *Aiguille*. A steel instrument, used in many professions. In *Surgery*, a steel, gold, silver, or platina instrument, that may be round, flat, or triangular, straight or curved, supported or not by a handle, but having *always* a point, by means of which it penetrates the textures; and *often* having, either near the point, or, more commonly, near the other extremity, an aperture for the reception of a thread or tape, which it introduces into the parts. The *Aiguille à appareils* of the French is the ordinary sewing needle, used in the making of bandages, &c.

ACUPUNCTURE NEEDLE, (F.) *Aiguille à Acupuncture*. An inflexible gold or silver needle: conical, very delicate, four inches long; furnished with a handle, and at times, with a canula shorter than it by about half an inch. An ordinary needle, waxed at the head, will answer as a substitute for this. See *Acupuncture*.

HARE-LIP NEEDLE, (F.) *Aiguille à Bec de Lièvre*. A small, silver canula, to which is attached a spear point, that can be readily withdrawn. This needle, armed with the point, is introduced at one side of the fissure in the lip, and through the other. The twisted suture (q. v.) is then applied, and the pin withdrawn.

CATARACT NEEDLE, *Acus Ophthalmica*, (F.) *Aiguille à cataracte*. Needles of gold, silver, and steel have been used; the latter, alone, at the present day. The cataract needle is employed to depress or tear the crystalline, when opaque. This needle is usually made about 15 or 24 lines long; and is attached to a fine handle. The extremity may be, as in Scarpa's and Langenbeck's, pointed, prismatic, triangular, and curved; in Dupuytren's and Walther's, flat, curved, and sharp-edged; in Hey's, flat,

with a semicircular and sharp end; or, as in Beer's, Siebold's Schmidt's, Himly's, Gräfe's, &c., straight and spear-pointed. A mark is generally placed upon the handle to inform the operator,—when the instrument is engaged in the eye,—what side corresponds to the crystal-line.

AIGUILLE À CONTRE-OUVERTURE, (F.) *Aiguille engagée, Acus incingulata, Aiguille à guinc, Needle for a counter-opening*,—is a long, narrow instrument of steel; the point of which is fine and sharp on both sides;—the heel (*Talon*) having an aperture to receive a thread, tape, &c., provided with a flat, silver sheath, shorter than the blade, the point of which it covers when passing through parts, that have to be respected.

FISTULA NEEDLE, *Aiguille à Fistule*. A long, flat, flexible, silver instrument; having an aperture near one extremity; blunt at the other. This was formerly used for passing a seton into fistulous ulcers. On one of its sides was a groove for guiding a bistouri, in case of necessity.

Also, a long steel instrument, terminated by a point like that of a trocar, which Desault employed for penetrating the rectum, when operating for fistula that had no internal aperture.

LIGATURE NEEDLE, *Aiguille à ligature*. A long, steel instrument, sharp towards one extremity, with an eye near the other, which was formerly used for suspending the circulation of blood, prior to amputation; by being passed through the limb, so as to include the principal artery and a part of the muscles and integuments.

Also, a steel instrument of various dimensions, round towards one of its extremities, which was straight, and furnished with an aperture; curved and flat towards the opposite, which was pointed, and had a slight ridge on its concave side. At the commencement of the last century, this instrument was used to pass ligatures around vessels.

Also, a steel instrument of various dimensions, flat, regularly curved in the form of a semicircle, with a sharp or lance point, and a long eye, used with advantage in place of the last.

DESCHAMP'S NEEDLE, *Aiguille de Deschamps*, —*Paupé's needle, Aiguille à Manche*, &c., is the last described needle, fixed to a handle, the eye of which is placed near the point. It is employed in the ligature of deep-seated arteries.

SETON NEEDLE, (F.) *Aiguille à Seton*. A long, narrow, steel blade; pointed and sharp at one extremity; pierced at the other by an aperture. The *Aiguille à contre-ouverture* may be used for the same purpose.

SUTURE NEEDLE, (F.) *Aiguille à Suture*. For the twisted suture, the hare-lip needle is used; for the others, the straight or curved needle: the straight needle is preferable for stitching up the abdomen, &c., in dissection. In the suture of the tendons, a curved needle has been used; flat on both sides, and cutting only at the concave edge, in order that the instrument may pass between the tendinous fibres without dividing them.

NEEDLEBEARER, *Porte-aiguille*.

NEEDLECARRIER, *Porte-aiguille*.

NÈFLE, *Mespilus* (the fruit.)

NÈFLIER, *Mespilus*.

NEFREN'DES, *Nodoi*, νεφοί. Persons devoid of teeth. Young children, for instance, who have not cut them; or aged persons, who have lost them. This state is called *Nefrendis*, *Nodo'sia*, *Odon'tia eden'tula*.

NÈGRE BLANC, Albino.

NEGRO, *N'grita*. One of the Æthiopian race. See Homo.

NEGROMANTIA, Necromancy.

NEIÆ'RA, *Imus Venter*. The lower part of the belly.—Hippocr.

NÈIGE, Snow.

NENUPHAR, *Nymphæa alba*—*n. Blanc*, *Nymphæa alba*—*n. Jaune*, *Nymphæa lutea*.

NEO'G'ALA, from νεος, 'new,' and γαλα, 'milk.' Milk secreted immediately after the colostrum. Also, the colostrum. (q. v.)

NEOPLASTY, NEOPLASTIC: from νεος, 'new,' and πλασσω, πλαστω, 'I form.' A process or operation for the formation of new parts. It includes autoplasty, cicatrization of wounds, the formation of adhesions.—Burdach.

NEP, *Nepeta*.

NEPEN'THA DESTILLATO'RIA, *Bandu'ra*. A Ceylonese plant, the root of which is astringent.

NEPEN'THES, from ηη, negative particle, and πειθος, 'grief.' A remedy, much extolled by the ancients against sadness and melancholy.

The women of Thebes, according to Diodorus Siceliotus, alone possessed the secret of its composition; and, according to Homer, Helen introduced it from Egypt. Some suppose it to have been opium.

NEPEN'THES, Banguè—*n. Opiatum*, *Pilulæ opiatæ*.

NEP'ETA, *N. Cata'ria*, *Herba felis*, *Nep* or *Catmint*, (F.) *Herbe aux Chats*, so called, because cats are fond of it. The leaves have a smell and taste like those of an admixture of spearmint and pennyroyal. It has been recommended in uterine disorders, dyspepsia, flatulency, &c. like pennyroyal; and is much used in domestic medicine, on the American continent, in flatulencies, &c. of children.

NEPETA AGRISTIS, *Melissa nepeta*.

NEPHALIOTES, Temperance.

NEP'HELE, Emphœma, Nebula.

NEPHELION, Nebula.

NEP'H'ELOID, *Nepheloides*, *Neb'ulous*, *Nubilo'sus*. An epithet applied to urine, when it is cloudy.

NEPHOS, Nebula.

NEPHRAL'GIA, *Dolor Nephreticus*, from νεφρος, 'a kidney,' and αλγος, 'pain.' Pain in the kidney.

NEPHRALGIA RHEUMATICA, Lumbago.

NEPHRELMIN'TIC, *Nephrelminticus*, from νεφρος, 'a kidney,' and ελμινς, 'a worm.' That which is owing to the presence of worms in the kidney.

NEPHREMPHRAX'IS, from νεφρος, 'a kidney,' and εμπρασσω, 'I obstruct.' A name given, by Ploucquet, to obstruction of the kidneys.

NEPHRETIC or NEPHRITIC, *Nephriticus*, from νεφρος, 'a kidney.' That which re-

lates to the kidney. Applied, especially, to pain, &c. seated in the kidney.

The LAPIS NEPHRETICUS, (F.) *Pierre néphrétique*, *Jade néphrite ou orientale*,—a green, fatty kind of stone,—once used as an annulet against epilepsy.

In *Materia Medica*, *Nephreticum* means a medicine employed in the cure of diseases of the kidney.

NEPHRID'ION, *Pinguëdo ren'dlis*. The fat which surrounds the kidneys.—Hippocr.

NEPHRITIC, *Nephretic*.

NEPHRITIS, *Empres'ma Nephritis*, *Renum inflammatio*, *Inflammation of the Kidney*;—characterized by acute pain; burning heat, and a sensation of weight in the region of one or both kidneys; suppression or diminution of urine; fever; dysuria; ischuria; constipation, more or less obstinate; retraction of the testicle, and numbness of the thigh of the same side. It may be distinguished into *simple* and *calculous nephritis*. In the latter, the urine often contains small particles of uric acid or of urate of ammonia. The most common causes of nephritis are,—excess in irritating and alcoholic drinks; abuse of diuretics; blows or falls on the region of the kidneys; the presence of renal calculi, &c. It may be distinguished from lumbago, by the pain which attends the latter on the slightest motion, &c. In the treatment, antiphlogistics, as V.S., baths, &c., are required to the full extent; with the use of diluents, opiates, &c.

NEPHRITIS ALBUMINOSA, *Kidney*, *Bright's disease of the*.

NEPHROG'RAPHY, from νεφρος, 'a kidney,' and γραφη, 'a description.' An anatomical description of the kidney.

NEPHROLITHIASIS, from νεφρος, 'a kidney,' and λιθος, 'a stone.' The disease of calculus in the kidney.

NEPHROLITH'IC, same etymom. Belonging to calculi in the kidneys. This epithet has been applied to ischuria, occasioned by calculi formed in the kidneys.

NEPHROLOG'Y, *Nephrologia*, from νεφρος, 'kidney,' and λογος, 'a treatise.' A treatise on the kidneys. Dissertation on the kidneys and their functions.

NEPHROMETRÆ, Psoæ.

NEPHRON'US, from νεφρος, 'the kidney,' and ογκος, 'a tumour.' A tumefaction of the kidney.

NEPHRO-PHLEGMATIC, *Nephro-phlegmaticus*, from νεφρος, 'kidney,' and φλεγμα, 'phlegm.' A name given, by some authors, to ischuria produced by mucus contained in the urine.

NEPHRO-PLETHOR'IC, *Nephro-plethoricus*, from νεφρος, 'a kidney,' and πληθωρα, 'plethora.' Belonging to plethora of the kidneys. An epithet given to ischuria dependent upon this cause.

NEPHRO-PYIC, *Nephro-pyicus*, from νεφρος, 'a kidney,' and πυος, 'pus.' Belonging to suppuration of the kidney.

NEPHROS, *Kidney*.

NEPHRO-SPASTIC, *Nephro-spasticus*, from νεφρος, 'a kidney,' and σπασω, 'I draw.' That which depends upon spasm of the kidney. An epithet given to a variety of ischuria.

NEPHRO-THROMBOID, *Nephro-thromboïdes*, from νεφρός, 'a kidney,' and θρομβός, 'a clot.' That which depends upon clots of blood, contained in the kidneys or their ducts. An epithet for a species of ischuria.

NEPHROTOMY, *Nephro-lithotomy*, *Section renalis*, *S. renis*, from νεφρός, 'a kidney,' and τέμνειν, 'to cut.' Dissection of the kidneys. Also, an operation proposed with the view of extracting calculi, formed in the kidney, by means of an incision into the tissue of that organ.

NEPION, Infans.

NEPIOTES, Infancy.

NEPTA, Asphaltum.

NERANTIA. See *Citrus aurantium*.

NERF, Nerve—*n. Circumflexe*, Axillary nerve—*n. Dentaire*, Dental nerve—*n. Fessier*, Gluteal nerve—*n. Glosso-pharyngien*, Pharyngoglossal nerve—*n. Gustatif innominé*, Trigemini—*n. Gutturul*, Palatine (middle) nerve—*n. Gutturulo-palatin*, Palatine nerve—*n. Honteux*, Pudic nerve—*n. Irien*, Ciliary nerve—*n. Ischio-clitorien*, Pudic nerve—*n. Ischio-pénien*, Pudic nerve—*n. Labyrinthique*, Auditory nerve—*n. Mento-mier*, Mental nerve—*n. Moteur oculaire externe*, Motor oculi externus—*n. Oculo-musculaire externe*, Motor oculi externus—*n. Oculo-musculaire interne*, Patheticus nervus—*n. Pathétique*, Patheticus nervus—*n. Péronière branche*, Popliteal nerve, external—*Pharyngoglossien*, Pharyngo-glossal nerve—*n. Première paire trochléenne*, Occipital nerve—*n. Vertébro-digital*, Musculo-cutaneous nerve—*n. Prétibio digital*, Musculo-cutaneous nerve—*n. Prétibio sus plantaire*, Tibial nerve, anterior—*n. Radial-digital*, Radial nerve—*n. Sciatique grand*, Sciatic nerve, great—*n. Sciatique petit*, Sciatic nerve, lesser—*n. Sciatique poplitée externe*, Musculo-cutaneous nerve—*n. Sous-occipital*, Occipital nerve—*n. Sous-pubio-fémoral*, Obturator nerve—*n. Spino-eranio-trapézien*, Spinal nerve—*n. Sus-maxillaire*, Maxillary superior nerve—*n. Sus-pubien*, Supra-pubian nerve—*n. Tibiale branche*, Popliteal internal—*n. Trachéal*, Laryngeal inferior nerve—*n. Trachélo-dorsal*, Spinal nerve—*n. trois cordes*, Trigemini—*n. Tympanique*, Chorda tympani.

NERFS BRONCHIQUES, Bronchial nerves—*n. Moteurs oculaires communs*, Motores oculorum—*n. Sacrés*, Sacral nerves—*n. Sous-costales*, Intercostal nerves—*n. Trijumeaux*, Trigemini.

NERIUM, *N. Oleander*.

NERIUM ANTIDYSENTERICUM. The tree, which affords the *Codogapala Bark*, *Cones'si cortex*, *Cortex prosta'vi*. Family, Apocynæ. *Sex. Syst.* Pentandria Monogynia. (F.) *Codogapale* and *Cropale*. The bark of this Malabar tree is of a black colour, externally, and is generally covered with a white moss or scurf. It has an austere, bitter taste, and has been recommended as an astringent, in diarrhœa, dysentery, &c.

NERIUM OLEANDER, *Nérium*, *Rhododaphnis*, *Rosé'go*. (F.) *Laurier rose*. The leaves are reputed to be narcotic. The infusion is em-

ployed internally, in herpetic affections, and the powder, incorporated with lard, is used in the itch.

NERONIANA (PHLEBOTOMIA.) An epithet, given, for some cause, to phlebotomy, when more than one vein was opened on the same day.

NERPRUN PURGATIF, *Rhamnus*.

NERVE, *Nervus*, *Neuron*, (F.) *Nerf*. This word originally meant the tendons and ligaments; and hence the different acceptations of 'nervous;'—a man of nerve—a strong, *nervous* man; and a weak, *nervous* woman.

The nerves are cords of the same substance as composes the encephalon and spinal marrow. They extend from one or other of the nervous centres to every part of the body, communicating, frequently, with each other; forming *plexuses*, and, occasionally, *ganglions*; and being, at length, lost in the parenchyma of organs. There are 42 pairs, and, according to their origin, they are termed *Cranial* or *Encephalic*, and *Spinal*. Each nerve is composed of several filaments or cords placed alongside each other, and is surrounded by a *Neurilema*, (q. v.)

The encephalic nerves, except the 5th pair, have only one root in the brain, whilst the spinal arise from the marrow by two roots: the one from an anterior fasciculus of filaments, the other from a posterior, separated from each other by the *Ligamentum denticulatum*; uniting outside this ligament, and presenting, near the intervertebral foramen, a ganglion formed only by the posterior root. The two roots make, afterwards, but one nerve; and, like the encephalic nerves, proceed to their destination, subdividing into rami and ramusculi, until they are finally lost in the texture of the organs. The trunks first formed are commonly round, and proceed alone, or accompany the great vessels, being placed in the cellular spaces, which separate the organs, and are thus protected from injury. Their manner of termination we are not acquainted with; whether the nervous pulp, for instance, be distributed or lost in a membrane,—as seems to be the case with the nerves of sight, hearing, and smell,—or form papillæ. Certain it is, that there is considerable difference in the organs, as respects the quantity of nerves that terminate in them; and the particular arrangement of the nervous extremities. Some organs have numerous nerves; others seem to have none: a circumstance which influences considerably the sensibility of parts.

The *Encephalic Nerves* arise from the encephalon, or are inserted into it; (according as we consider the brain the origin or termination of the nerves;) and make their exit by foramina at the base of the skull. They are 12 in number. The spinal nerves are 30 in number, 8 *cervical*, 12 *dorsal*, 5 *lumbar*, and 5 or 6 *sacral*: the four inferior cervical being much larger than the superior, because they furnish the nerves of the upper extremities.

SYNOPTICAL TABLE OF THE NERVES.

I. Cranial or Encephalic Nerves.

Classifications of the nerves have been recommended according to their uses, in preference to the ordinary anatomical arrangement.

It has been remarked, that the encephalic nerves have but one root; while the spinal have two. Now, experiments and pathological facts have proved, that the anterior fasciculus of the narrow and the anterior roots of the spinal nerves are inservient to volition or voluntary motion: and that the posterior fasciculus and roots are destined for sensibility. Hence the spinal nerves, which have two roots, must be the conductors both of motion and feeling; whilst the encephalic, which, with the exception of the fifth pair, have but one, can possess but one of these properties:—they must be either *sensitive* or *motive*, according as they arise from the posterior or anterior fasciculus of the medulla: and, consequently, three classes of nerves may be distinguished.

- 1. *Sensitive.* { Arising, by a single root, from the posterior fasciculus of the medulla oblongata or spinal marrow.
- 2. *Motive.* { Arising, by a single root, from the anterior fasciculus of the same parts.
- 3. *Sensitive and Motive.* { Which have two roots; one from the anterior, and one from the posterior fasciculus.

According to Sir Charles Bell, the medulla oblongata is composed of three fasciculi on each side; an *anterior*, *middle*, and *posterior*. Now, whilst the anterior and posterior fasciculi produce the nerves of motion and sensation respectively; the middle, according to Sir Charles, gives rise to a third set of nerves—the *respiratory*. To this order belong:—

- 1. The accessory nerve of Willis, or *superior respiratory*.
- 2. The par vagum.
- 3. The glosso-pharyngeal.
- 4. The facial, or *respiratory of the face*.
- 5. The phrenic.
- 6. A nerve which has the same origin as the phrenic;—the *external respiratory*.

When a horse has been hard ridden, every one of these nerves is in action.

Sir C. Bell, again, has reduced the system of nerves to two great classes. 1. Those that are *regular, primitive, symmetrical*, and common to all animals, from the worm to man; which have double roots, and preside over sensibility and motion: and, 2. The *irregular* or *super-added*, which are added to the preceding, in proportion as the organization of animals offers new or more complicated organs.

To the first class belong all the spinal nerves and one encephalic—the 5th pair;—to the second, the rest of the nervous system.

Lepelletier thinks we are justified in dividing the nerves into five classes;—the *first* comprising the *nerves of special sensibility*—the olfactory, optic, lingual branch of the fifth pair, and the auditory:—the *second*, the *nerves of general sensibility*, the fifth pair; and the spinal nerves, through their posterior root;—the *third* comprising the *voluntary motors*, the spinal nerves, by their anterior roots, the *motores oculorum* or common oculo-muscular, the external oculo-muscular, and the hypo-glossal:—the *fourth*, *instinctive motors*, involuntary, respiratory, nervous of Sir Charles Bell, the pathetic, facial, glosso-pharyngeal, pneumogastric, and spinal accessory; and the *fifth*, *nerves of vital*

association and nutrition—the filaments and plexuses of the ganglionic system.

Dr. Fletcher adopts a different arrangement. He divides them into *ganglionic* and *cerebro-spinal*; the latter being subdivided into the re-

spiratory, motiferous, sensiferous, and regular; the last including those which communicate both the faculty of sensibility and the stimulus of volition. His arrangement is contained in the following table.

| GANGLIONIC.  | CEREBRO-SPINAL.           |                                    |  |                    |
|--|---------------------------|------------------------------------|--|--------------------|
|  | Respiratory.              | Motiferous.                        | Sensiferous.   | Regular.           |
| <i>Those immediately connected respectively with</i> |                           |                                    |  |                    |
| The Ophthalmic,                                      | The Pathetic,             | The Motor oculi.                   | The Olfactory.   | The Sub-occipital. |
| The Cavernous,                                       | The Facial,               | A part of the lower                | The Optic.   | The seven Cervi-   |
| The Otic,  | The Glosso-pharyngeal,    | maxillary branch of the Trigemina- | The Ophthalmic branch of the Trigemina-                | cal.               |
| The Spheno-palatine,                                 | The Pneumo-gastric.       | mus.                               | Trigemina-   | The twelve Dorsal. |

| The five Sacral, and                                 |                           |                                    |  |                    |
| The Coccygeal Ganglions.                             |                           |                                    |  |                    |

Dr. Marshall Hall, has proposed another division of the nervous system, which is calculated to explain many of the anomalous circumstances we so frequently witness. He proposes to divide all the nerves into

1. The cerebral or sentient and voluntary.
2. The true spinal or excito-motory.
3. The ganglionic or the nutrient and secretory.

If the sentient and voluntary functions be destroyed by a blow upon the head, the sphincter muscles will still contract when irritated, because the irritation is conveyed to the spine, and the reflex action takes place to the muscle so as to throw it into contraction. But if the spinal marrow be now destroyed, the sphincters remain entirely motionless, because the centre of the system is destroyed.

Dr. Hall thinks, that a peculiar set of nerves constitutes, with the true spinal marrow as their axis, the second subdivision of the nervous system; and as those of the first subdivision are distinguished into sentient and voluntary, these may be distinguished into the *excitor* and *motory*. The *first*, or the excitor nerves, pursue their course principally from external surfaces, characterized by peculiar excitabilities, to the true medulla oblongata and m. spinalis, the *second*, or the motor nerves, pursue a reflex course from the medulla to the muscles, having peculiar actions, concerned principally in ingestion and egestion. The motions connected with the first or cerebral subdivision are sometimes, indeed frequently, *spontaneous*; those connected with the true spinal are, he believes, *always excited*.

Dr. Hall thinks, too, that there is good reason for viewing the fifth, and posterior spinal nerves as constituting an external ganglionic system, for the nutrition of the external organs; and he proposes to divide the *ganglionic* subdivision of the nervous system, into 1. The *internal ganglionic*, which includes that usually denominated the sympathetic, and probably filaments of the pneumogastric; and 2. The *external ganglionic*, embracing the fifth and posterior spinal nerves.

To the *cerebral* system he assigns all diseases of sensation, perception, judgment, and volition—therefore all painful, mental, and comatose, and some paralytic, diseases. To the true

*spinal* or *excito-motory* system, belong all spasmodic and certain paralytic diseases. He properly adds, that these two parts of the nervous system influence each other both in health and disease, as they both influence the ganglionic system.

The views of Dr. Hall on the excito-motory function have been embraced by Müller, Grainger, Carpenter, and others.

The nerves are covered and united to the neighbouring parts by an abundant layer of fatty cellular texture, which sends, inwards, prolongations that separate the nervous cords and filaments from each other. The arterial trunks, which furnish them, transmit branches into their interior. The veins follow the same course as the arteries. Absorbents are not easily traced even in the greatest trunks.

NERVE, ACCESSORY OF WILLIS, Spinal nerve—n. Articular, Axillary nerve—n. Buccinator, Buccal nerve—n. *Cubito-digital*, Cubital nerve—n. Femoro-popliteal, lesser, Sciatic nerve, lesser—n. NERVINE, *Nervi*, *Neurot'ic*, *Neuril'ic*, *Antineurotic*, *Antineuropath'ic*. A medicine, considered proper for relieving debility of the nervous system.

NERVOUS, *Nervosus*, *Neurodes*. Relating or belonging to the nerves. Strong; also, weak, irritable.

THE NERVOUS DIATHESIS is termed *Atax'ia spirituum*, *Anomalia nervorum*, *Status nervosus*, *S. orthicus*, *Diathesis nervosa*, *Constitutio nervosa*.

NERVOUS DISEASES, *Morbi nervosi*. (F.) *Maladies nerveuses*. Affections seated in the nervous system.

A NERVOUS ATTACK, (F.) *Attaque des nerfs*, is an affection accompanied with spasm, pain, and different nervous symptoms, to which irritable individuals are liable.

NERVOUS FLUID, *Nervous principle*, *Flu'idum nervorum*, *Liquidum nerveum*, *Succus nerveus*, *Spiritus vitalis*. The fluid which is supposed to circulate through the nerves, and which has been regarded as the agent of sensation and motion. Of this fluid we know nothing, except that it resembles, in many respects, the electric or galvanic. It was formerly called *Animal spirits*, *Spiritus animales*. (F.) *Esprits animaux*.

NERVOUS PAIN, Neuralgia—n. Principle, N. fluid.

NERVOUS SYSTEM. The nerves of the human body considered collectively.

NERVOUS SYSTEM OF THE AUTOMATIC FUNCTIONS, Trisplanchnic nerve—n. System, organic, see Trisplanchnic nerve—n. System of the senses, Medulla oblongata—n. System of voluntary motion, &c., Medulla spinalis.

Sympatheticus medius, Trigemini—n. Timidus, Motor oculi externus—n. Tremellus, Trigemini—n. Trochlearis, Patheticus nervus.

NESTIATR'IA, *Nestitherapi'a*, from *νῆστις*, 'a faster,' and *θεραπεία*, 'treatment.' Treatment of a disease by causing the patient to fast.

NESTITHERAPEIA, Nestiatria.

NETTLE, ARCHANGEL, WHITE, *Lamium album*—n. Dead, *Lamium album*—n. Hedge, Galeopsis—n. Pill-bearing, *Urtica pilulifera*—n. Rash, *Urticaria*—n. Stinging, common, *Urtica*.

NEURAL'GIA, from *νεῦρον*, 'a nerve,' and *ἄλγος*, 'pain.' *Rheumatis'mus spir'ius nervosus*, *Neurodyn'ia*. (F.) *Néuralgie*, *Nervous pain*. A generic name for a certain number of diseases; the chief symptom of which is a very acute pain, exacerbating or intermitting, which

follows the course of a nervous branch; extends to its ramifications, and seems, therefore, to be seated in the nerve. The principal neuralgias have been distinguished by the names *facial* (of which the *infra-orbital*, *maxillary* and *frontal* are but divisions)—the *ilio-rotal*, *femoropopliteal*, *femoro-pretibial*, *plantar*, and *cutibito-digital*. A division of *anomalous neuralgiae* has likewise been admitted.

I. FACIAL NEURALGIA, *Neuralgia faciei*, *Trismus maxilla'ris*, *T. Dolorif'icus*, *Opsal'gia*, *Dolor cr'ic'us faciei*, *Hemiera'ria idio-path'ica*, *Antal'gia dolorosa*, *Tic douloureux*, *Dolor faciei*, *Dolor faciei typ'ico caract'ere*, *D. F. Fothergill's*, *Trismus clon'icus*, *Rheumatis'mus caner'osus*, *Rheumatis'mus larv'atus*, *Prosopal'gia*, *Dolor faciei period'icus*, *Febris top'ica*, *Ophthalmodyn'ia period'ica*, is characterized by acute, lancinating pains, returning at intervals; and by twinges in certain parts of the face, producing convulsive twitches in the corresponding muscles. It may be seated in the frontal nerve, infra-orbital, or in the maxillary branch of the 5th pair.

I. *Metopodyn'ia*, *Brow-ague*, *Neural'gia frontalis*, *Ophthalmodyn'ia*, *Tic douloureux*, *Dolor periodicus*, &c., commences at the superciliary foramen and extends along the ramifications of the frontal nerve that are distributed on the forehead, upper eyelid, caruncula lacrymalis, and nasal angle of the eyelids. Sometimes it is felt particularly in the orbit.

The *Neuralgia infra-orbital'ria*, *Dolor faciei atrox*, *Rheumatis'mus caner'osus*, *Trismus clon'icus*, *Prosopal'gia*, *Febris top'ica*, *Odontal'gia remittens et intermit'tens*, *Hemiera'ria sava*, *Infra-or'bital neuralgia*, *Tic douloureux*, is chiefly felt in the infra-orbital foramen, whence it passes to the cheek, upper lip, ala nasi, lower eyelid, &c.

In the *Neuralgia maxilla'ris*, *Tic douloureux*, *Trismus catarrhal'is maxillar'is*, the pain usually sets out from the mental foramen and passes to the chin, lips, temple, teeth, and tongue.

THE ILIO-SCROTAL NEURALGIA has been rarely observed. It is characterized by a very acute pain in the course of the branches of the first lumbar pair; this pain follows the crista ilii and accompanies the spermatic vessels to the testicle, which is often painfully retracted.

NEURALGIA FEMORO-POP'LITEA, *Sciat'ica*, *Schias*, *Malum ischiad'icum*, *Morbus ischiad'icus*, *Passio ischiad'ica*, *Ischiagra*, *Ischial'gia*, *Ischiod'isis*, *Cozal'gia*, *Neural'gia Ischiad'ica*, *Dolor Ischiad'icus nervosus*, *Ischias nervosa Cotunnii* vel *Cotunnii*, *Neurisch'ias*, *Ischias nervosa post'ica*, *Ischius*, *Coxagra*, *Ischias rheumat'icum*, *Ischial'ica*, *Goutte sciat'ique*. This is characterized by pain, following the great sciatic nerve from the ischiatic notch to the ham, and along the peroneal surface of the leg to the sole of the foot.

NEURALGIA FEMORO-PRETIBIA'LIS, *Ischias nervosa ant'ica*. In this, the pain, setting out from the groin, spreads along the fore part of the thigh and passes down, chiefly, on the inner side of the leg, to the inner ankle and back of the foot.

NEURALGIA PLANTAR'IS. This is rare; and the pain is confined to the course of the plantar nerves.

NEURALGIA CU'BITO-DIGITALIS, *Ischias ner-*

*vo'sa digita'lis*. In this variety, the pain extends from the part where the nerve passes under the inner condyle to the back of the hand and to its cubital edge.

Under the name ANOM'ALOUS NEURAL'GIÆ, Chaussier has included different neuroses, some of which are characterized by acute pains circumscribed within a short compass, or extending by irradiations, but not having their seat in the course of a nerve; and others which are occasioned by tumours in the course of a nerve, or which succeed contusions or incomplete division of nerves.

All varieties of neuralgiæ are obstinate, and the greatest diversity of means has been made use of:—bleeding, general and local,—emetics, purgatives, rubefacients, vesicants, actual cautery, narcotics, mercurial frictions; electricity; destruction of a portion of the nerve, &c. The most successful remedy, perhaps is the *Carbonate of iron*, given in doses of some magnitude; as, for instance, ℥ss or ℥ij, twice or thrice a day in molasses. This plan of treatment, continued for a month or two, will generally relieve and ultimately remove this much dreaded affection. The mode in which it acts is by no means clear; but it is almost as certain as any other remedy used in disease in producing its salutary effects. The bowels must be kept free; and all inflammatory symptoms be removed during its administration.

NEURASTHENIA, *Neurostheni'a*, *Debil'itas nervo'sa*. Debility or impaired activity of the nerves; from *νευρον*, 'a nerve,' and *ασθενεια*, 'debility.'—See Irritable.

NEURILE'MA, *Neurilem'ma*, *Neurily'ma*, *Neur'ymen*, *Perincu'ri'on*, *Fistula* seu *Tubulus* seu *Capsula* seu *Involu'crum nervo'rum*, *Membra'na* seu *Membran'ula* seu *Tu'nica* seu *Indumentum nervo'rum*, *Vagi'na nervo'rum*; from *νευρον*, 'a nerve,' and *λεμμα*, 'a coat.' The fine transparent, and apparently fibrous membrane that surrounds the nerves—to every filament of which it forms a true canal.

NEURILEMMITIS. Same etymon. Inflammation of the neurilema.

NEURILYMA, Neurilema.

NEURINE. The substance of which the nervous system is composed. It consists chiefly of albumen and fatty matter.

NEURISCHIAS, Neuralgia femoro-poplitæa.

NEURITIC, Nervine.

NEURITIS, (F.) *Névrite*, from *νευρον*, 'a nerve.' Inflammation of a nerve.

NEUROBLACIA, from *νευρον*, 'a nerve,' and *βλακεια*, 'stupor.' Insensibility of the nerves.

NEUROCHONDRO'DES, from *νευρον*, 'a sinew,' *χονδροος*, 'a cartilage,' and *ειδος*, 'resemblance.' A hard substance between a sinew and a cartilage.

NEURODES, Nervous.

NEURODYNIA, Neuralgia.

NEUROGAMIA, Magnetism, animal.

NEUROGRAPHY, *Neurogra'phia*; from *νευρον*, 'a nerve,' and *γραφη*, 'a description.' The part of anatomy which describes the nerves.

NEUROLOGY, *Neurolo'gia*, from *νευρον*, 'a nerve,' and *λογος*, 'a discourse.' That part of anatomy which treats of the nerves.

NEUROMETRES, Psœ.

NEURON, Nerve.

NEURON'OSOS, *Neuron'o'sos*, from *νευρον*, 'a nerve,' and *ρσος*, 'a disease.' A disease of the nerves.

NEUROPATH'IC, *Neuropath'icus*, from *νευρον*, 'a nerve,' and *παθος*, 'a disease.' Belonging to disease of the nerves, to *Neuropath'i'a* or *Neuron'osos*.

NEUROPYRA, Typhus mitior.

NEURO'SES, from *νευρον*, 'a nerve.' A generic name for diseases supposed to have their seat in the nervous system, and which are indicated by disordered sensation, volition, or mental manifestation; without any evident lesion in the structure of the parts, and without any material agent producing them. Such is the usual definition. Broussais attributes them to a state of irritation of the brain and spinal marrow.

NEUROSTHENIA, Neurasthenia, see Irritable.

NEUROTHELIC APPARATUS, Corpus papillare.

NEUROTIC, Nervine.

NEUROTICA, from *νευρον*, 'a nerve.' Diseases of the nervous function. The 4th class of Good's Nosology.

NEUROTOME, *Neurot'omos*; from *νευρον*, 'a nerve,' and *τεμνω*, 'I cut,' 'I dissect.' An instrument used, by anatomists, to dissect the nerves. It is a long and very narrow scalpel, having two edges.

NEUROTOMY, *Neuroto'mia*. Same etymon. Dissection of the nerves. Also, an incised wound of a nerve.

NEURYMEN, Neurilema.

NEUTRAL, from *Neuter*, 'neither.' Belonging to neither in particular.

NEUTRAL SALTS, *Sec'ondary salts*, (F.) *Sels neutres*. A salt, composed of two primitive saline substances, combined together, and not possessing the characters of acid or of base.

NEURALGIE, Neuralgia.

NEVRITE, Neuritis.

NEVUS, Nevus.

NEW JERSEY, MINERAL WATERS OF.

In the upper part of Morris county and in the county of Hunterdon, near the top of Musconetcong mountain, there are chalybeate springs, which are resorted to. See Schooley's Mountain.

NEW YORK, MINERAL WATERS OF.

The chief waters are those of Ballston and Saratoga, (q. v.)

NEZ, Nasus.

NICODEMI OLEUM, *Oil of Nicodemus*.

An oil made by digesting, for some time,—in a mixture of white wine and olive oil,—old turpentine, litharge, aloes, saffron, oxyd of zinc, &c.

NICOTIANA, *N. tabacum*—*n. Minor*, *N. rustica*.

NICOTIANA RUS'TICA, *N. minor*, *Priape'i'a*, *Hyoscyamus luteus*, *English tobacco*. The leaves possess the properties of tobacco, but are milder.

NICOTIANA TAB'ACUM, *Nicotiana*, *Herba tabaci*, *Tabacum*, *Petum*, *Petun*, *Hyoscyamus Peruvia'nus*, *Tobacco*, *Virgin'ia tobacco*, (F.) *Tubac*, *Nicotiane*. Tobacco is a violent acro-narcotic; its properties seeming to depend upon a peculiar principle, *Nicotin* or *Nicotianin*. It is narcotic,

sedative, diuretic, emetic, cathartic, and er-  
rhine. In incarcerated hernia, it is injected, in  
the form of smoke or infusion, but requires  
great caution. It is most extensively and ha-  
bitually used as an errhine and sialogogue.  
The infusion is used to kill vermin, and in some  
cutaneous eruptions.

**NICOTIANE**, *Nicotiana tabacum*.

**NICOTIANIN**. See *Nicotiana tabacum*.

**NICOTIN**. See *Nicotiana tabacum*.

**NICTATION**, *Nictatio*, *Nictitatio*, *Nystag-  
mus*, *Clonus nictitatio*, *Twinkling of the eye*, (F.)  
*Clignotement*, *Clignement*, *Cillement*, *Souris*. A  
rapid and repeated movement of the eyelids,  
which open and shut alternately. As oc-  
casionally performed, it is physiological; if re-  
peatedly, a disease. It seems to be executed  
chiefly by the 7th pair of nerves; but it is ne-  
cessary that the 5th pair should likewise be in  
a state of integrity.

**NIDAMENTUM**, *Decidua*.

**NIDOROUS**, *Nidorosus*, from *Nidor*, *Cnissa*,  
'the smell of any thing burnt,' &c. Having  
the smell of burnt corrupt animal matter.

**NIELLE**, *Nigella*.

**NIGELLA**, *Coptis*.

**NIGELLA**, *N. sati'va*, *Melan'thium*, *Fennel  
flower*, *Cum'num Nigrum*. *Devil in a bush*, (F.)  
*Nigelle*, *Nielle*. This was formerly used medi-  
cinally as an expectorant and deobstruent, er-  
rhine, sialogogue, &c.

**NIGELLE**, *Nigella*.

**NIGHT EYES**, *Crusta genu equina*.

**NIGHT MARE**, *Incubus*.

**NIGHTSHADE, AMERICAN**, *Phytolacca  
decandra*—n. Common, *Solanum*—n. Deadly,  
*Atropa belladonna*—n. Enchanter's, *Circæa  
lutetiana*—n. Garden, *Solanum*—n. Palestine,  
*Solanum sanctum*—n. Woody, *Solanum dul-  
camara*.

**NIGREDO À SOLE**, *Ephelides*.

**NIGRITA**, *Negro*.

**NIGRITIES OSSIIUM**, *Caries*.

**NIGRITUDO**, *Melanosis*.

**NIGROMANTIA**, *Necromancy*.

**NIGROR**, *Melasma*.

**NIGRUM OCULI**, *Pupil*.

**NIHIL ALBUM**, *Zinci oxydum*—n. *Griseum*,  
*Zinci oxydum*.

**NILIACUM**, *Mel*.

**NINDSIN**, *Sium ninsi*.

**NINSI**, *Sium ninsi*.

**NINSING**, *Panax quinquefolium*.

**NINZIN**, *Sium ninsi*.

**NIPPLE**, *Sax. nypele*. The *Teat*. *The dug*,  
*Mammilla*, *Mammella*, *Papilla*, *Thele*, *Tithê*,  
*Tithos*, *Tithion*, *Tithis*, (F.) *Mamelon*. The  
conical tubercle, situate at the centre of the  
breast. Towards the central part of each breast  
the skin changes colour, and assumes a rosy tint  
in young females, or a reddish brown in those  
who have suckled several children. This circle  
is called the *Arcola* or *Aureola* (q. v.) of the *nip-  
ple*. The nipple is capable of erection on being  
excited.

**NIPPLEWORT**, *Lapsana*.

**NIRLES**, *Herpes exedens*.

**NISUS**, *Nixus*, *Peira*, *Straining*. A voluntary  
retention of the breath; so as to force down the  
diaphragm; the abdominal muscles being at the  
same time contracted forcibly. In this manner

the contents of the abdomen are compressed;  
and the evacuation of the fæces, urine, &c. is  
effected.

**NISUS**. Effort—n. *Formativus*, *Plastic force*.

**NITEDUIA**, *Cicindela*.

**NITRAS KALICUM**, *Potassæ nitras*—n.  
*Lixivia*, *Potassæ nitras*—n. *Natricum*, *Soda*,  
*nitrate of*—n. *Potassæ cum sulphure fusus*,  
*Potassæ nitras fusus sulphatis paucillo mixtus*  
—n. *Sub-bismuthicum*, *Bismuthi*, *sub-nitrate of*.  
**NITRATE**, *Nitras*. A salt, formed of a base  
and nitric acid. Several nitrates are employed  
in medicine.

**NITRATE D'AMMONIAQUE**, *Ammoniaë  
nitras*.

**NITRE**, *Potassæ nitras*.

**NITRIC ACID**, *Acidum nitricum*, *Aqua fortis*,  
*Nitrous acid*, *Spiritus nitri duplex*, *Sp. nitri fu-  
mans*, *Sp. nitri Glauberi*, *Azotic acid*, *Dephlo-  
gistical'ed nitrous acid*, *Oxyseptonic acid*, *Spiri-  
tus nitri acidus*. Nitric acid is obtained from  
nitre—the *Nitrate of potass*. Its odour is suf-  
focating; taste very acid and caustic. It is cor-  
rosive, liquid, colourless, and transparent. S. G  
1.500. 100 grains ought to saturate 124 of sub-  
carbonate of soda.

Strong nitric acid is rarely used except as an  
application to foul, indolent ulcers, or to warts.  
When given internally, it is in the form of the  
*Acidum Nitricum Dilutum*, *Spiritus nitri sim-  
plex*, *Sp. nitri vulgaris*—the *Dilute nitric acid*,  
which, in the London Pharmacopœia, consists  
of *nitric acid*, ʒj *water ʒix*, by measure. Di-  
luted largely with water, it is used, as a drink,  
in fevers of the typhoid kind; in chronic af-  
fections of the liver; syphilis, &c., but, in the  
latter affections, it is not to be depended upon.

**NITROGEN**, *Azote*.

**NITROGEN, GAZEOUS OXIDE OF**,  
*Nitrous oxide*, *Protoxide of azote*, *Paradise gas*,  
*Intoxicating gas*, *Laughing gas*, *Dephlogis-  
ticated nitrous gas*, *Gaz azoticum oxygenatum*.  
This gas, when respired, produces singular ef-  
fects; great mental and corporeal excitement;  
and, generally, so much exhilaration as to render  
the appellation, "*laughing gas*," by no means  
inappropriate. It has not been much used in  
medicine, although recommended in paralysis.  
Its effects are too violent and too transient to  
render it a valuable remedial agent; and, in the  
delicate, it has been productive of unpleasant  
effects, inducing palpitation, fainting, and con-  
vulsions.

**NITRO-MURIATIC ACID**, *Nitro-hy-  
drochloric acid*, *Hydrochloro-nitric acid*, *Aqua  
regia*, *Aqua stygia*, *Chrysolea*, *Aqua regis*,  
*Acidum muriaticum nitroso-oxygenatum*, *Men-  
struum auri*, (F.) *Eau régale*. A mixture of the  
nitric and muriatic acids has been used in dis-  
eases of the liver, in the form of a bath for the  
feet and legs, made sharply acidulous. It has,  
also, been employed, and with more uniform  
results, in cutaneous affections. Whatever ad-  
vantage it may possess in internal diseases—  
and these advantages are doubtful—they are  
probably dependent upon the chlorine formed  
by the mixture, or upon the properties, pos-  
sessed by the mineral acids in general. See  
*Chlorine*.

**NITROUS OXIDE**, *Nitrogen*, *gaseous  
oxide of*.

**NITRUM**, Natron, Potassæ nitras—n. Antiquorum, Soda—n. Cubicum, Soda, nitrate of—n. Faetium, Borax—n. Flammians, Ammoniac nitras—n. Lunare, Argenti nitras—n. Rhomboidale, Soda, nitrate of—n. Vitriolatum Schroederi, Potassæ sulphas—n. Tabulatum, Potassæ nitras fusus sulphatis paucillo mixtus—n. Vitriolatum, Potassæ sulphas.

**NIX**, Snow.

**NIX FUMANS**, Calx viva.

**NIXUS**, Nisus.

**NOBLE**, *Nobilis*, *Principal*, *Essential*. *Noble parts*, *Partes essentialis*:—Some anatomists have given this name to parts, without which life cannot exist; such as the heart, liver, lungs, brain, &c. The organs of generation have, likewise, been so called.

**NOBLE PARTS**, Genital organs.

**NOCTAMBULATIO**, Somnambulism.

**NOCTILUCA**, Cicindela.

**NOCTISURGIUM**, Somnambulism.

**NOCTUINI O'CULI**. Gray or blue eyes.—Castelli.

**NODE**, *Nodus Emphyæma exostosis periosæ tea*; (F.) *Nodosité, Nœud*; from Hebr. נָד, 'a heap.' A hard concretion or incrustation, which forms around joints attacked with rheumatism or gout. Some include, under this name, exostoses, articular calculi, ganglions, and even the chronic swellings of the joints, known under the name of white swellings.

**NODDING**, Annuito.

**NODI DIGITORUM MANUS**, Phalanges of the fingers—n. Nervorum, Ganglions, nervous.

**NODOI**, Nefrendes.

**NODOSIA**. See Nefrendes.

**NODOSITÉ**, Node.

**NODULI ARAN'TII**, *Noduli Morgagnii, Corpora Arantii*. The small sesamoid bodies situate on the periphery of the semiluna valves of the aorta and pulmonary artery, for the better occlusion of the artery.

**NODULI MORGAGNI**, N. Arantii—n. Nervorum, Ganglions, nervous.

**NODUS**, Articulation, Hamma—n. Cerebri, Pons varolii—n. Encephali, Pons varolii—n. Hystericus, Globus hystericus.

**NOESIS**, Intellect.

**NŒUD**, Node—n. *du Chirurgien*, Knot, surgeon's—n. *Emballeur*, Knot, picker's.

**NOISETIER**, *Corylus avellana*.

**NOISETTE**, *Corylus avellana* (nut.)

**NOIX**, *Juglans regia* (nut)—n. *Americaine*, *Jatropha curcas*—n. *des Barbudes*, *Jatropha curcas*—n. *Cathartique*, *Jatropha curcas*—n. *d'Eau*, *Trapa natans*—n. *de Galle*, see *Quercus cerris*—n. *de Serpent*, see *Thievetia Ahouai*—n. *Vomique*, see *Strychnos nux vomica*.

**NOLA CULINARIA**, *Anemone pulsatilla*.

**NOLI ME TANGERE**, *Lupus*, see *Chancreux* (*Bouton*.)

**NOMA**, Cancer aquaticus.

**NOMADE**, *Nomas*, from *nom*, 'pasturage.' An epithet given to people who have no fixed habitation, and who travel with their flocks, from country to country, for pasturage. Such are the Tartars. By analogy, the word *Nomadica* has been applied to spreading ulcers.

**NOMBRI**, Umbilicus.

**NOME**, Phagedenic ulcer.

**NOMENCLATURE**, *Nomenclatio*, *Nomenclatura*, *Onomatologia*, *Onomatoecesis*, from *ονομα*, 'name,' and *καλεω*, 'I call.' A collection of terms or words peculiar to a science or art. In all sciences, nomenclature is an object of importance; and each term should convey to the student a definite meaning. The Lavoisierian nomenclature was a valuable gift to chymistry; and anatomy has derived advantages from the labours of Barelay, Dumas, and Chaussier, who have given names to parts indicative of their situation. See *Muscle*. The nomenclature of pathology has required the greatest attention; and although repeated attempts have been made to improve it, the barbarous terms that disgrace it, are still most frequently adopted. It consists of Hebrew and Arabic terms; Greek and Latin, French, Italian, Spanish, German, English, and even Indian, African, and Mexican; often barbarously and illegitimately compounded.

A want of principle in founding the technical terms of medicine is every where observable. They have been formed:—

1. From colour; as *Melana*, *Melas*, *Atrabilis*, *Leuce*, *Alphos*, *Chlorosis*, *Rubeola*, *Scarlatina*, *Purpura*, &c.

2. From duration, as *Ephemeral*, *quotidian*, *tertian*, and *quartan*, *continued*, and *intermittent*, &c.

3. From *Birds*, *Beasts*, *Fishes*, *Insects*, and *Plants*, as *Rabies canina*, *Cyranche*, *Boulimia*, *Picu*, *Hippopyon*, *Elephantiasis*, *Urticaria*, *Lichen*, *Ichthyosis*, &c.

4. From *Persons* or *Places*, as *Morbus Herculeus*, *Facies Hippocratica*, *Lepra Arabum*, *Plica Polonica*, *Sudor Anglicus*, *Morbus Gallicus*, &c., and *Ignus Sancti Antonii*, *Chorea Sancti Viti*, &c.

**NON-NATURALS**, *Non naturalia*. Under this term the ancient physicians comprehended air, meat and drink, sleep and watching, motion and rest, the retentions and excretions, and the affections of the mind.

**NONUS HUMERI PLACENTINI**, *Teres minor*—n. *Linguae musculus*, *Genio-glossus*—n. *Vesalii*, *Peronæus tertius*.

**NOSE**, *Nasus*—n. Running at the, *Coryza*.

**NOSEMA**, Disease.

**NOSEROS**, *Insalubrious*, Sick.

**NOSOCOMIUM**, Hospital.

**NOSOCOMUS**, *Infirmier*.

**NOSODES**, *Insalubrious*, Sick.

**NOSODOCHIUM**, Hospital.

**NOSOGENY**, *Nosogenia*, from *νοσος*, 'a disease,' and *γενος*, 'origin.' The department of medicine, which regards the formation of diseases.

**NOSOGRAPHY**, *Nosographia*, from *νοσος*, 'a disease,' and *γραφω*, 'I describe.' A description of diseases.

**NOSOL'OGY**, *Nosologia*, from *νοσος*, 'a disease,' and *λογος*, 'a discourse.' A name given to that part of medicine, whose object is the classification of diseases. The most celebrated nosological systems have been those of Sauvages, (1763,) Linnæus, (1763,) Vogel, (1764,) Sagar, (1776,) Macbride, (1772,) Cullen, (1772,) Darwin, (1796,) Selle, Crichton, (1804,) Parr, (1809,) Swediaur, (1812,) Pinel, (1813,) Young, (1813,) Good, (1817,) Hosack, (1818,) &c.

Besides these general nosographies, others have been published on *Surgery*, exclusively,

none of which are particularly worthy of enumeration amongst nosological systems.

Nosological arrangements have, also, been formed of single families or groups of diseases. Plenck, of Baden, is the author of two separate treatises of this kind: the one, a methodical arrangement of the diseases of the eyes, and the other, of cutaneous diseases. Dr. Willan, published an arrangement of cutaneous diseases, which was completed by Dr. Bateman, and adopted into the Nosology of Dr. Hosack. Mr. Abernethy, also, published a methodical classification of tumours, and many other partial nosological classifications might be enumerated.

NOSONOMY, *Nosonom'ia*; from *νόσος*, 'a disease,' and *ονομα*, 'name.' The nomenclature of diseases.

NOSOS, Disease.

NOSOTAXY, *Nosotax'ia*; from *νόσος*, 'a disease;' and *τάξις*, 'arrangement.' The distribution and classification of diseases.

NOSTALGIA, from *νόστος*, 'return,' 'a journey home,' and *άλγος*, 'pain.' *Nostom'nia*, *Pathopatridal'gia*, *Philopatridal'gia*, *Philopatridoma'nia*. (F.) *Nostalgie*, *Maladie du pays*. An affection, produced by the desire of returning to one's country. It is commonly attended by slow wasting, and sometimes by hectic, which may speedily induce death. M. Pinel properly regards it as a variety of melancholy.

NOSTOMANIA, Nostalgia.

NOSTRILS, Nares.

NOTAL'GIA, *Notial'gia*, (*Nostal'gia* (improperly) of Köchlin and others,) from *νότος*, 'the back,' and *άλγος*, 'pain.' Pain in the back.

NOTCH, Teut. *Nocke*, Ital. *Nocchia*, *Emarginat'io*, *Emarginatur'a*, (F.) *Echancrure*. Depressions or indentations of different shapes and sizes, observed on the circumference or edges of certain bones.

The ISCHIAT'IC NOTCHES, (F.) *Echancrures Ischiatiques*, are two in number,—the *greater* and the *less*. The *former* is large, situate at the inferior part of the pelvis, and formed by the sacrum and ilium. It gives passage to the sciatic nerve, pyramidalis muscle, and to the superior gluteal vessels and nerves. The *latter* is much smaller than the other, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

The ETHMOID'AL NOTCH, (F.) *Echancrure ethmoïdale*, is situate on the frontal bone, and joins the ethmoid.

The PAROT'ID NOTCH, (F.) *Echancrure parotidienne*, is the triangular space, comprised between the parotid edge of the inferior maxillary bone and the mastoid process; so called, because it lodges the parotid gland. The notches in soft parts are generally called *Fissures*, (q. v.)

NOTENCEPH'ALUS, from *νότος*, 'the back,' and *εγκεφαλῆ*, 'the head.' A monster, whose head, with the brain, is on the back.—G. St. Hilaire.

NOTHEUSIS, Degeneration.

NOTHIA, Degeneration.

NOTHUS, False.

NOTIÆUS, Dorsal, Medulla spinalis.

NOTALGIA, Notalgia.

NOTOMYELITIS, Myelitis.

NOTON, Dorsum.

NOTOS, Dorsum, Vertebral column.

NOUAGE DE LA CORNÉE, Caligo.

NOUÉ (*Bandage*) (F.); 'knotted.' A bandage, which has a considerable number of knots placed above each other. It is made with a roller, 6 or 7 ells long, rolled into two balls, and is used to compress the parotid region, after the extirpation of the parotid gland. Also, an epithet applied to children in whom the disease of rickets has swollen the articulations. It is, likewise, applied to the gout, when it has caused nodes on the joints.

NOUET (F.), *Nou'ulus*. A bag, filled with medicinal substances, and infused in a liquid to communicate their properties to it.

NOUFFER'S, MADAME, REMEDY, *Poly-podium filix mas*.

NOURRICE, Nurse.

NOURRICIER, Nutritious.

NOURRITURE, Aliment.

NOUS, Intellect.

NOUURE, Rachitis.

NOYAU CENTRAL DES PÉDONCULES DU CERVELET, Corpus dentatum.

NOYER, *Juglans regia*—*n. de Ceylon*, Adhatoda.

NUAGE, Nebula.

NUBECULA, *Enœorema*, Nebula.

NUBES, *Enœorema*, Nebula.

NUBILOSUS, Nepheloid.

NUCES AQUATICÆ, see *Trapa natans*—*n. Quercus*, see *Quercus alba*.

NUCHA, (F.) *Nuque*. The hinder part or nape of the neck. The part where the spinal marrow begins.

The LIGAMENTUM NUCHÆ. A strong ligament from the neck, proceeding from one spinous process to another, and inserted into the occipital bone. It is very strong in quadrupeds.

NUCISTA. See *Myristica moschata*.

NUCK, CANAL OF. A small prolongation of the peritoneum often sent into the inguinal canal of the female fœtus. So called from Nuck, who first described it.

NUCLEUS, see *Cytoblast*.

NUCULA TERRESTRIS, *Bunium bulbocastanum*.

NUMMULAR, *Nummul'ris*. Relating to money, from *nummus*, 'money.' An epithet applied to the sputa in phthisis, when they flatten at the bottom of the vessel, like a piece of money.

NUMMULARIA, *Lysimachia nummularia*.

NUQUE, Nucha.

NURSE, *Nutrix*, *Trophousa*. Sax. *nořice*. (F.) *Nourrice*, *Garde-malade*. One who suckles her own child or another's. One that has the care of a sick person.

A WET NURSE. A female, who suckles the child of another.

A DRY NURSE. One, who gives every care to the child, but does not suckle it.

NUT, BUTTER, *Juglans cinerea*—*n. Cembros*, see *Pinus cembra*—*n. Physic*, *Jatropha curcas*—*n. Pine*, see *Pinus picea*—*n. Pistachio*, see *Pistacia vera*—*n. Poison*, see *Strychnos nux vomica*—*n. Purging*, see *Jatropha*—*n. Soap*, see *Sapindus saponaria*—*n. Tree*, *Malabar*, *Adhatoda*—*n. Vomice*, see *Strychnos nux vomica*—*n. Zirbel*, see *Pinus Picea*.

**NUTATION**, *Nutatio*. Constant oscillation of the head, in which it moves involuntarily in one or more directions.

**NUTMEG**. See *Myristica moschata*.

**NUTRICATIO**, Nutrition.

**NUTRICIER**, Nutritious.

**NUTRICIUS**, Nutritious.

**NUTRIMENTUM**, Aliment.

**NUTRITION**, *Nutritio*, *Nutricatio*, *Alitura*, *Threpsis*, from *nutri're*, 'to nourish.' Nutrition is that function, by which the nutritive matter, already elaborated by the various organic actions, loses its own nature, and assumes that of the different living tissues,—to repair their losses and support their strength. Sometimes the word is used in a more extended signification, to express the whole series of actions by which the two constant movements of composition and decomposition are accomplished, in organized bodies. Nutrition, then, would comprehend digestion, absorption, respiration, circulation, and assimilation; the latter being *nutrition*, properly so called, and being operated in the intermediate system over the whole of the body,—the tissues attracting from the blood the elements necessary for their reparation.

**NUTRITION**, FORCE OF, Plastic force.

**NUTRITIOUS**, *Nutricius*, *Nutritivus*, *Alivilis*, *Trophimos*, *Trophodes*, (F.) *Nourricier*, *Nutricier*. Having the quality of nourishing: as nutritious food, nutritious lymph, &c.

**NUTRITIOUS OF NUTRITIVE ARTERIES**. (F.) *Artères nutritives*. Arterial branches, which enter the *foramina nutritiva* of long bones, and penetrate to the medullary membrane.

**NUTRITUS**, Aliment.

**NUTRIX**, Nurse.

**NUX AROMATICA**, see *Myristica moschata*—n. *Avellana*, *Corylus avellana* (nut)—n. *Barbadensis*, *Jatropha curcas*—n. *Becuiba*, *Ibucuiba*—n. *Cathartica Americana*, *Jatropha curcas*—n. *Galla*, see *Quercus cerris*—n. *Juglans*, *Juglans regia*—n. *Medica*, *Coco* of the Maldives—n. *Metella*, *Strychnos nux vomica*—n. *Moschata*, see *Myristica moschata*—n. *Myristica*, see *Myristica moschata*—n. *Pistacia*, see *Pistacia vera*—n. *Vomica*, *Strychnos nux vomica*.

**NYCTALOPIA**, *Paropsis Lucifuga*, *Nyctalopiasis*, *Caecitas diurna*, *Visus nocturnus*, *Oxyopia*, *Hemeralopia* (moderns,) (q. v.) *Amblyopia meridiana*, *Photophobia*, *Photophobothalopia*, *Dysopia luminis*, *Visus acrior*, (F.) *Vue nocturne*, *Aveuglement de Jour*, from *νύξ*, 'night,' and *οπτομαι*, 'I see.' The faculty of seeing during the night, with privation of the faculty during the day. It affects both eyes at once, when idiopathic. Its duration is uncertain, and treatment very obscure. It is, however, a disease of nervous irritability, and one of excitement of the visual nerve in particular. The indications of cure will, consequently, be—to ally direct irritation in every way; to excite counter-irritation by blisters; and to gradually accustom the eye to the impression of light.

One labouring under this affection, is called a *Nyctalope*, *Nyctalops*, *νυκταλωπ*.

**NYCTHEMERON**. See *Dies*.

**NYCTHEMERUM**, from *νύξ*, 'night,' and *μερα*, 'day.' The space of 24 hours, or of a day and night. Certain complaints continue only so long.

**NYCTOBASIS**, *Somnambulism*.

**NYCTOBATESIS**, *Somnambulism*.

**NYMPHÆ**, from *νυμφη*, 'a water nymph.' *Ala interna minoris clitoridis*, *Caruncula cuticulares*, *Ala minores*, *Collicula vaginalis*, *Myrtoheildes*, *Labia minora seu interna*. (F.) *Nymphes*, *Petites lègres*. Two membranous folds, which arise from the lateral parts of the prepuce of the clitoris, and descend on the inner surface of the labia majora; terminating by becoming gradually thinner, about the middle of the circumference of the orifice of the vagina. They are formed each of two folds of the mucous membrane of the vulva; and contain, in their substance, a thin layer of spongy, erectile tissue. Their use seems to be,—not, as was once supposed, to direct the course of the urine, which notion gave rise to their name, but to favour the elongation and dilatation of the vagina in pregnancy and labour.

The word *νυμφη* has also been used synonymously with clitoris by Oribasius, Aëtius, &c.

**NYMPHÆA ALBA**, *Leuconymphea*, *Neunuphar*, *Microrhynchonymphea*, *White Water Lily*. (F.) *Neunuphar blanc*. *Nat. Ord.* *Ranunculacæe*. *Scr. Syst.* *Polyandria Monogynia*. Formerly employed as a demulcent, antaphrodisiac, emollient, and slightly anodyne remedy.

**NYMPHÆA INDICA**, *N. nelumbo*—n. *Major lutea*, *N. lutea*.

**NYMPHÆA LUTEA**, *N. major lutea*, *Yellow Water Lily*. (F.) *Neunuphar jaune*. Used for the same purposes.

**NYMPHÆA NELUMBO**, *Faba Ægyptiaca*, *Cyranus Ægyptiacus*, *Nymphæa Indica*; *Pontic* or *Ægyptian Bean*. The fruit of this is eaten raw in Egypt and some of the neighbouring countries; and is considered to be tonic and astringent.

**NYMPHES**, *Nymphæ*.

**NYMPHOCLUIA**, *Nymphomania*.

**NYMPHOMANIA**, from *νυμφη*, 'a bride,' and *μανια*, 'fury.' *Furor uterinus*, *Uteromania*, *Lagne'sis furor femininus*, *Mctromania*, *Erotomania*, *Edæomania*, *Aidoionomania*, *Melancholia uterina*, *Nymphocluia*, *Tania*, *Symptoma turpitudinis*, *Andromania*, *Gynæcomania*, *Machlosyne*, *Entelipathia*, *Tentigo venerea*, *Hysteromania*, *Salacitas vulva*, *Uteri pruritus*, *Brachuna*, *Arsacon*, *Arsatum*, *Æstromania*, (F.) *Nymphomanie*, *Furor uterine*. An irresistible and insatiable desire, in females, for the venereal act. It occurs in those particularly, who possess a nervous temperament, and vivid imagination, especially if excited by improper language, masturbation, &c. Its course, as described, is as follows. In the commencement, the sufferer is a prey to perpetual contest between feelings of modesty and impetuous desire. At an after period, she abandons herself to the latter, seeking no longer to restrain them. In the last stage the obscenity is disgusting; and the mental alienation, for such it is, becomes complete. The treatment consists in the use of the same means as are required in the satyriasis of man. When the mental alienation is complete, solitude is indispensable.

**NYMPHONCUS**, from *νυμφη*, 'the nymph,' and *σκακος*, 'a tumour.' A morbid tumefaction of the nymphæ.

**NYMPHOTOMY**, *Nymphotomia*, *Nymphot-*

*rum Sectio*, from *νυμφη*, 'nympha,' and *τεμνειν*, 'to cut.' An operation, known and practised for a long time; and which consists in the excision of the nymphæ. The operation is had recourse to, when they are attacked with scirrhus, cancer, fungus, or gangrene; or when

they are so large as to interfere with walking or coition. *Nymphotomy* is the circumcision of the female. It is practised in some countries.

Some authors have used the term *Nymphotomy* for amputation of the clitoris.

NYSTAGMUS, Nictation.

O.

OAK, BLACK, *Quercus tinctoria*—o. Common, *Quercus robur*—o. Jerusalem, *Chenopodium botrys*—o. Lungs, *Lichen pulmonarius*—o. Poison, *Rhus toxicodendron*—o. Red, *Quercus rubra montana*—o. Sea, *Fucus vesiculosus*—o. Spanish, *Quercus rubra montana*—o. White, *Quercus alba*.

OARION, Ovary.

OARITIS, *Oöphoritis*, *Ovaritis*, from *ωαριον*, 'the ovarium,' and *itis*, the termination denoting inflammation. Inflammation of the ovarium.

OATS, *Avena*.

OBAUDITIO, Barycoia.

OBELEA RAPHE, Sagittal suture.

OBSITAS, Polysarcia.

OBESITY, Corpulentia.

OBFUSCATIO, Amaurosis.

OBLA'TÆ PURGANTES. Cathartic cakes or lozenges made of flour, sugar and some cathartic drug.

OBLIQUE, *Obliquus*. Any thing inclined:—which deviates from the vertical line. Anatomists have given this name to certain muscles, which have an oblique direction as regards the plane that divides the body into two equal and symmetrical halves. These are:—

1. The *Oblique Muscles of the Abdomen*. They are two in number, and distinguished into:

a. The OBLIQUUS EXTER'NUS ABDOM'INIS, *O. descendens externus*, *O. descendens*, *O. major*, *Ilio-pubo-costo-abdominal*, *Costo-abdominal* (Ch.) (F.) *Grand oblique*, *Oblique externæ*. One of the broadest muscles of the body. It is situate at the lateral and anterior part of the abdomen; and is flat and quadrilateral. It is attached, above, to the outer surface and lower edge of the 7 or 8 last ribs: below, to the anterior third of the external lip of the crista ili: before, it terminates at the linea alba by means of a broad and strong aponeurosis, which covers the rectus, and presents, towards its inferior part, two very solid fibrous fasciculi, which are inserted:—the one at the symphysis, the other at the spine of the pubis,—under the name of *Pillars of the Abdominal Ring*. These pillars leave between them an opening, which forms the inferior orifice of the inguinal canal.

The obliquus externus abdominis depresses the ribs, and carries them backwards, during a strong expiration. It impresses on the chest a movement of rotation; and bends the thorax upon the pelvis, or *vice versa*. It contracts, also, the abdominal cavity.

b. The OBLIQUUS INTER'NUS ABDOMINIS, *M. acclivis*, *O. ascendens*, *O. minor*, *O. internus*, *O. ascendens internus*, *Ilio-lombo-costo-abdominal*, *Ilio-abdominal* (Ch.) (F.) *Muscle petit oblique*;

ou *oblique interne*, is broad, especially before; thin; and irregularly quadrilateral, like the preceding, beneath which it is situate. It is attached, above, to the inferior edge of the cartilages of the 5th, 4th, 3d, and 2d false ribs: below, to the anterior two-thirds of the interstice of the crista ili, to the posterior part of the crural arch, and to the pubis: behind, to the spinous processes of the two last lumbar vertebræ, and to those of the two first portions of the sacrum; before, to the linea alba. Its upper fibres run obliquely upwards and forwards; the middle are horizontal; and the lower pass obliquely downwards and forwards.

These last, in the male, are dragged down through the inguinal ring, when the testicle descends; and form the two fasciculi of the cremaster.

The obliquus internus resembles the O. externus in function.

II. The *Oblique Muscles of the Eye* are two in number. They are distinguished into:—

a. The OBLIQUUS SUPERIOR OCULI, *Amatorius musculus*, *Trochlearis*, *Obliquus major*, *Optico-trochlei scleroticien*, *Grand trochléateur* (Ch.) *Circumductio'nis op'ifex*, *Longis'simus oculi*, (F.) *Grand oblique de l'œil*, *O. supérieur de l'œil*, *Amoureux (Muscle)*, is situate at the inner and upper part of the orbit. It is small, round, fusiform, and reflected upon itself in the middle of its course. Behind, it is attached to the inside of the foramen opticum; and when it arrives opposite the internal orbital process, it becomes a small, round tendon, which slides in a cartilaginous pulley, fixed to the os frontis, and is reflected, at an acute angle, to proceed downwards and outwards, and to attach itself to the outer and back part of the globe of the eye. This muscle carries the globe of the eye forwards and inwards; making it experience a movement of rotation, which directs the pupil downwards and inwards. This is conceived to be an involuntary muscle as well as the next. In sleep, according to Sir C. Bell, when the power over the straight or voluntary muscles of the organ is nearly lost, the eye is given up to the oblique muscles, which lodge the transparent cornea under the upper eyelid. At the approach of death, the same thing is observable; hence, the turning up of the eye, at such a time, is not an evidence of agony or suffering, but of insensibility.

b. The OBLIQUUS INFERIOR OCULI, *O. minor oculi*, *Maxillo-scleroticien*, *Petit Trochléateur* (Ch.) (F.) *Petit oblique ou oblique inférieur de l'œil*, is situate at the anterior and inferior part of the orbit. It is flat and attached to the inner and anterior part of the orbital surface of the

superior maxillary bone, on the outside of the lachrymal gutter; from thence it passes outwards and backwards, and terminates, by an aponeurosis, at the posterior and inner part of the globe of the eye. It carries the globe of the eye inwards and forwards; and directs the pupil upwards and outwards.

III. *Oblique muscles of the head.* These are two in number.

a. **OBLIQUUS SUPERIOR CAPITIS**, *O. minor capitis*, *Trachélo-atloïdo-occipital*, *Atloïdo-sous-mastoiïdien* (Ch.) (F.) *Muscle oblique supérieur ou petit oblique de la tête.* This muscle is situate at the sides of, and behind, the articulation of the head; it is flat and attached, on the one hand, to the top of the transverse process of the atlas; and, on the other, terminates at the occipital bone, beneath the inferior curved line, and sometimes, also, at the mastoid region of the temporal bone. It extends the head,—inclining it to one side.

b. The **OBLIQUUS INFERIOR CAPITIS**, *Obliquus major*, *Spini-axoïdo-trachéli-atloïdien*, *Axoïdo-atloïdien* (Ch.) (F.) *Oblique inférieur ou grand oblique de la tête*, is situate at the posterior part of the neck and head. It is round, fusiform; attached to the spinous process of the axis, and proceeds to terminate behind and below the summit of the transverse process of the atlas. It impresses, on the first vertebra and the head, a movement of rotation, which turns the face to one side.

**OBLIQUE EXTERNE**, *Obliquus externus abdominis*—o. *Grand*, *Obliquus externus abdominis*—o. *Grand de l'œil*, *Obliquus superior oculi*—o. *Grand de la tête*, *Obliquus inferior capitis*—o. *Inférieur de l'œil*, *Obliquus inferior oculi*—o. *Inférieur de la tête*, *Obliquus inferior capitis*—o. *Interne*, *Obliquus Internus abdominis*—o. *Petit*, *Obliquus internus abdominis*—o. *Petit de l'œil*, *Obliquus inferior oculi*—o. *Petit de la tête*, *Obliquus superior oculi*—o. *Supérieur de l'œil*, *Obliquus superior oculi*—o. *Supérieur de la tête*, *Obliquus superior capitis.*

**OBLIQUITÉ DE LA MATRICE**, *Retroversio uteri.*

**OBLIQUUS ASCENDENS**, *O. internus abdominis*—o. *Auris*, *Laxator tympani*—o. *Descendens externus*, *O. externus abdominis*—o. *Major*, *O. externus abdominis*, *O. inferior capitis*, *O. superior oculi*—o. *Minor*, *O. internus abdominis*—o. *Minor capitis*, *O. superior capitis*—o. *Minor oculi*, *O. inferior oculi.*

**OBLITERATED**, *Obliteratus*; from *obliterare*, 'to efface letters.' A vessel or duct is said to be obliterated, when its parietes have approximated and contracted such adhesion to each other that the cavity has completely disappeared.

**OBLIVIO**, *Amnesia*—o. *Iners*, *Lethargy.*

**OBLŪS**, *ὀβλος*, a weight of 9 or 10 grains.—*Galēn.*

**OBSCURCISSEMENT DE LA VUE**, *Caligo.*

**OBSERVATION**, *Observatio*, *Terēsis*, *Symptomatica*. Act of examining a thing, by means of the external senses. This word is employed in several acceptations. It expresses—1. The action of observing—2. The aggregate of knowledge, afforded by observation. In French—but not in English—it means the case

or history of the phenomena, presented by a patient in the course of a disease.

**OBSERVATION**, *Case.*

**OBSERVATION**, *Method of Numerical method.*

**OBSTETRICIANS**, *Accoucheur.*

**OBSTETRICES**, from *Obstetrix*, 'a mid-wife,'

*Tokol'ogy*, *Tocology*, *Maici'a*, *Macci'a*, *Maicia*, *Ars obstetri'cia*, *Obstetricy.* The art of mid-wifery.

**OBSTETRICY**, *Obstetrics.*

**OBSTETRIX**, *Midwife.*

**OBTIPATIO**, *Constipation*—o. *Tenesmus*, *Tenesmus.*

**OBTIPATIO**. See *Hump.*

**OBTIPITAS**, *Torticollis.*

**OBTURATIO**, *Emphraxis*, *Stenosis*—o. *Pulmonum pituitosa febrilis*, *Peripneumonia notha.*

**OBTUENS**, from *obstruo*, 'I shut up.' *Oppilatus.* A medicine which closes the orifices of ducts or vessels.

**OBTUPEFACIENTIA**, *Narcotics.*

**OBTUNDANT**, *Obtundens.*

**OBTUNDENS**, (F.) *Obtundant.* An epithet applied to remedies that were supposed, according to an erroneous theory, to be possessed of the power of blunting the acrimony of the humours. A demulcent is one of these.

**OBTURAMENTUM**, *Emphragma.*

**OBTURATEUR DU PALAIS**, *Palate*, *artificial.*

**OBTURATIO**, *Emphraxis.*

**OBTURATOR**, *Obturatorius*, (F.) *Obturator*, from *obtura're* 'to close,' 'stop up the entrance.' A name given to several parts.

1. **FORAMEN OBTURATORIUM**, (F.) *Trou sous-pubien*, *F. infra-pubialnum*, *Foramen ovale*, *F. thyroïdeum*, *F. Thyroïdes*, *F. Amplum Pelvis.* A large opening of an oval or triangular form, in the anterior part of the os innominatum, on the outside of the symphysis pubis and beneath the horizontal ramus of the os pubis. This foramen is closed by a membranous ligament.

2. **OBTURATOR MUSCLES.** These are two in number. They are divided into

a. **OBTURATOR EXTERNUS**, *Extra-pelvio-pubio-trochantérien*, *Sous-pubio-trochantérien externe* (Ch.) A muscle, situate at the anterior and inner part of the thigh. It is broad, flat, and triangular; and is attached, on the one hand, to the anterior surface of the os pubis, to that of the ischium, and to the anterior surface of the obturator ligament. Its fleshy fibres converge to the tendon, which proceeds to be inserted at the inferior part of the cavity of the great trochanter. This muscle rotates the thigh outwards.

b. The **OBTURATOR INTERNUS**, *Marsupialis*, *Bursa'lis*, *Intra-pelvio-trochantérien*, *Sous-pubio-trochantérien interne* (Ch.) is seated, almost entirely, in the pelvis. It arises from the inner surface of the obturator ligament, and from the posterior part of the circumference of the obturator foramen, and is inserted, by means of a strong tendon, running between the two portions of the gemini, into the cavity at the root of the great trochanter; after having turned upon the ischium, which forms for it a kind of pulley. This muscle also rotates the thigh outwards.

3. The **OBTURATOR ARTERY**, *Sous-pubio-fé-*

*morale* (Ch.) *Arteria obturatoria, A. obturatriz,* (F.) *Artère obturatrice*, arises, most commonly, from the hypogastric. It is, however, frequently given off from the epigastric; a matter of importance to be determined in cases of femoral hernia. Of 500 obturator arteries examined by Mr. J. Cloquet, 348 were furnished by the hypogastric, and 152 by the epigastric or crural. When it arises from the hypogastric, it passes forwards and outwards, and then turns horizontally into the cavity of the pelvis, to issue from this cavity by the opening left at the upper part of the obturator membrane. When, on the contrary, the obturator artery arises from the epigastric or the crural, it descends obliquely inwards, behind the os pubis, to the obturator foramen. At its exit from the pelvis, the artery divides into two branches, a *posterior* and an *anterior*, which are distributed to the muscles of the anterior and superior part of the thigh.

4. The **OBTURATOR VEIN** has, ordinarily, the same arrangement as the artery. It is common, however, to find it arising from the epigastric; whilst the corresponding artery proceeds from the hypogastric, and *vice versa*.

5. The **OBTURATOR NERVE**, *Sous-pubio-fémoral* (Ch.) proceeds principally from the 2d and 3d lumbar nerves. It descends into the pelvis; gains the obturator foramen; gives branches to the obturator muscles, and divides, behind the adductor primus and pectinalis, into two branches; one *anterior*, whose branches are distributed to the first two adductors, gracilis, and integuments; the other, *posterior*, distributing its ramifications to the obturator externus and third adductor.

6. The **OBTURATOR LIGAMENT OF MEMBRANE** is a fibrous membrane, fixed to the whole circumference of the obturator foramen, except above, where an opening remains for the passage of the vessels and nerves of the same name.

**OBVOLVENTIA**, Demulcents.

**OCCIPITAL**, *Occipitalis*. That which belongs to the occiput.

1. The **OCCIPITAL BONE**, *Os occipitis seu occipitiæ seu occipitalæ, Os sphæno-basilaræ, Os memoiræ, Os nervosum, Os basilaræ, Os proræ, Os pyxididis, seu sextum cranii, seu lambdoïdes, seu lambda, seu lauda, seu puppis, seu nervosum, seu fibrosum, seu pelvicephalicum*, (F.) *Os occipitalis*, is situate at the posterior and inferior part of the cranium, which it assists in forming. It is flat, symmetrical, and curved upon itself. It presents, 1. an *occipital or posterior surface*, which is convex, and has, upon the median line, the *basilary surface*, the *foramen magnum*, through which passes the spinal marrow with its membranes and vessels;—the *external occipital crest*, the *external occipital protuberance*; and, at the sides, the *upper curved line*, *large rough arched ridge or transverse arch or linea semicircularis*, the *lower curved line*, the *posterior condyloid fossæ*, the *condyles* for the articulation of this bone with the atlas; and the *anterior condyloid fossæ*, pierced by a foramen for the passage of the ninth pair of nerves. 2. A *cerebral or anterior surface*. On the median line are:—the *basilary fossæ*, the *inner orifice* of the foramen magnum, the *internal occipital crest*, the *internal occipital protuberance*, the *cruciform spine*; a *channel*, which lodges the termination

of the straight sinus, and on each side, the *occipital fossæ* distinguished into *superior or cerebral*, and *inferior or cerebellous*, and separated by a groove which lodges the lateral sinus. 3. The surfaces of the occipital bone are separated by four ridges and four angles. The two superior edges are articulated with the parietal bones; the two lower join the temporal; and the anterior angle, under the name *basilary process*, is united to the sphenoid.

The occipital bone is developed from four points of ossification; and sometimes from a greater number.

2. **OCCIPITAL MUSCLE**, *Occipitalis*. Many anatomists have given this name to the posterior fasciculus of the Occipito-frontalis, (q. v.)

3. **OCCIPITAL ARTERY**. This arises from the posterior part of the external carotid, beneath the parotid. It proceeds backwards, passes between the mastoid process and the transverse process of the atlas; reaches the occipital bone and divides into two branches, which may be called ascending posterior and anterior, and are distributed to the neighbouring muscles and ligaments.

4. The **OCCIPITAL VEIN**. Its roots follow exactly the course of the branches of the artery, and unite into a single trunk, which opens into the internal jugular vein, and sometimes into the external.

5. **OCCIPITAL NERVE**, *Sub-occipital nerve, Première paire trachélicane*, (Ch.) (F.) *Nervus occipitalis os sous-occipitalis*. It arises from the upper part of the spinal marrow by eight or ten filaments, united in two fasciculi. Thus formed, it passes between the foramen magnum and the posterior arch of the atlas; and, at this place, forms a long ganglion, afterwards dividing into two branches. Of these, the *anterior*, which is long and small, makes a turn above the transverse process of the atlas, and forms an anastomotic noose with a branch of the second cervical nerve. The *posterior* branch, larger and shorter, divides into seven or eight branches, which are distributed to the muscles of the upper and back part of the neck.

**OCCIPITIUM**, Occiput.

**OCCIPITO-ATLOID**, *Occipito-atloideus*, (F.) *Occipito atloïdien*. That which has reference to the occiput and atlas.

The **OCCIPITO-ATLOID ARTICULATION** is the articulation of the condyles of the occipital bone with the superior articular cavities of the atlas. It is strengthened by two ligaments:—the one *anterior*, the other *posterior*, called *occipito-atloid ligaments*; the one extends from the anterior, the other from the posterior, arch of the atlas, to the corresponding portion of the circumference of the foramen magnum.

**OCCIPITO-AXOID**, *Occipito-axoïdeus*, (F.) *Occipito-axoïdien*. That which relates to the occipital bone and the axis or second vertebra.

The **OCCIPITO-AXOID ARTICULATION** is the connexion of the occipital bone with the axis or second vertebra, although these bones are not really articulated, but are merely retained in apposition by three strong ligaments; the posterior of which is called the *occipito-axoid*, and the two others *odontoid*.

**OCCIPITO-FRONTALIS**, *Digast'ricus cranii, Epicran'nius, Frontalis et occipitalis*. The

majority of anatomists call, by this name, the whole of the fleshy plane, with the epicranial or coronal aponeurosis, (see Calotte,) which covers the head from the occiput to the forehead. It is attached, by its posterior fasciculus, to the two outer thirds of the upper curved line of the occipital bone, and to the outer surface of the mastoid portion of the temporal; and, by its anterior fasciculus, it terminates at the eyebrow, where it becomes confounded with the superciliaris, pyramidalis nasi, and orbicularis palpebrarum.

The occipito-frontalis, by the contraction of its anterior fasciculus, draws forwards a part of the integuments of the cranium. It wrinkles the skin of the forehead transversely, and may, also, contribute to open the eye by its decussation with the orbicularis palpebrarum. The posterior fasciculus of the muscle draws backwards a part of the skin of the cranium and assists in stretching the common aponeurosis.

**OCCIPITO-MENINGEAL.** That which belongs to the occipital bone, and to the meninge or dura mater.

The **OCCIPITO-MENINGEAL ARTERY**, in Chaussier's nomenclature, is a branch of the vertebral, given off to the dura mater at its entrance into the cranium.

**OCCIPUT**, *ἰνίον*, *Opisthocranium*, *Opisthocranium*, *Prora*, *Occipitium*. The back part of the head, formed by the occipital bone.

**OCCLUSION**, *Occlusio*, *Μυεῖν*, from *occhudere*, 'to shut up.' Sometimes this word signifies, simply, the transient approximation of the edges of a natural opening—the *occlusion of the eyelids*, for example; at others, it is synonymous with imperforation, as *occlusion of the pupil, vagina*, &c.

**OCHEMA**, Vehicle.

**OCHETEUMATA**, Nares.

**OCHEIOS**, Canal.

**OCHEUS**, Scrotum.

**OCHREA**, Shin—o. Rubra, Hæmatites.

**OCHROMA**, Paleness.

**OCHROPYRA**, Fever, yellow.

**OCHROTES**, Paleness.

**OCHTHODES**, Callous.

**OCCIMUM BASILICUM**, *Basilicum*, *Beren'daros*, *Basilicum majns*, *B.citra'tum*, *Common* or *Citron basil*, (F.) *Basilic commun. Nat. Ord.* Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. This herb has a fragrant odour and aromatic taste. It is used as a condiment, and has been supposed to possess nerve properties.

**OCCIMUM CARYOPHYLLA'TUM**, *O. minimum*, *Small* or *Bush basil*. Possesses properties similar to the former. It is sometimes used as snuff.

**OCTA'NA**, *Hebdomada'ria*, from *octo*, 'eight.' A fever, whose paroxysms recur every week. A supposititious case.

**OCTARIUS**. The eighth part of a wine-gallon. It contains sixteen fluid ounces. *Ph. L.*

**OCTUNX**. A weight of eight ounces.

**OCULARES COMMUNES**, *Motore oculorum*.

**OCULARIA**, *Euphrasia officinalis*.

**OCULI PALPEBRARUM SCABIES PRURIGINOSA**, *Ophthalmia tarsi*.

**OCULIST**, *Oculista*, *Ophthalmia'ter*. One

who occupies himself, chiefly, with the management of diseases of the eyes.

**OCULISTIQUE**, *Ophthalmology*.

**OCULO-MUSCULAR NERVES**, *COMMON*, *Motore oculorum*.

**OCULUM MOVENS PRIMUS**, *Rectus internus oculi*—o. *Movens quartus*, *Rectus inferior oculi*—o. *Movens secundus*, *Rectus externus oculi*—o. *Movens tertius*, *Rectus superior oculi*.

**OCULUS**, *Eye*—o. *Bovinus*, *Hydrophthalmia*—o. *Bovis*, *Chrysanthemum leucanthemum* o. *Bubulus*, *Hydrophthalmia*—o. *Cæsius*, *Glaucoma*—o. *Duplex*, *Binoculus*—o. *Elephantinus*, *Hydrophthalmia*—o. *Genu*, *Patella*—o. *Lachrymans*, *Epiphora*—o. *Purulentus*, *Hypopyon*—o. *Simplex*, see *Monoculus*—o. *Typhonis*, *Scilla*.

**OCYTOCIC**, *Oxytocic*; from *ὄζυς*, 'quick,' and *τοκος*, 'labour.' Any thing that expedites parturition.

**ODAXIS'MUS**, from *ὀδους*, 'a tooth.' The painful itching of the gums, which precedes the appearance of the teeth. *Dentition*, (q. v.)

**ODIN**, *Pains*, (labour.)

**ODME**, *Odour*.

**ODONTAGOGON**, *Dentagra*.

**ODONT'AGRA**, from *ὀδους*, 'a tooth,' and *αγρα*, 'a seizure.' A rheumatic or gouty pain in the teeth. *Dentagra*, (q. v.)

**ODONTAL'GIA**, from *ὀδους*, 'a tooth,' and *αλγος*, 'pain.' *Odon'tia*, *Dent'ium dolor*, *Toothache*, *Odon'tia dolor'su*, (F.) *Douleur des dents*, *Fluxion sur les dents*, *Mal de dent*, *Mal d'amour*. A disease, dependent upon a variety of causes affecting the cavity of the tooth; but generally owing to caries, which exposes the cavity to the action of the air, and to extraneous matters in general.

Hence, the treatment consists in plugging the caries, or destroying the sensibility of the nerve, by powerful stimulants; and, if these means fail, in extracting the tooth.

**ODONTALGIA CARIOSA**, *Dental gangrene*—o. *Dentitionis*, *Dentition*—o. *Hæmodia*, *Hæmodia*—o. *Remittens et intermittens*, *Neuralgia infra-orbitaria*.

**ODONTALGIC**, *Antiodontalgic*.

**ODONTIA**, *Odontalgia*.

**ODONTIA DEFORM'IS**. *Deformity of the teeth*, from error of shape, position, or number.—*Good*.

**ODONTIA DENTITIONIS LACTANTIIUM**, see *Dentition*, (first)—o. *Dentitionis puerilis*, see *Dentition*, (second)—o. *Edentula*, see *Nefrendes*—o. *Excrescens*, *Epulis*—o. *Stuporis*, *Hæmodia*.

**ODONTIASIS**, *Dentition*.

**ODONTIC**, *Anti-odontalgic*.

**ODONTOGLYPHON**, *Gum lancet*.

**ODONTOGLYPHUM**, *Dentiscalpium*.

**ODON'TOID**, *Odontoi'des*, *Dentifor'mis*, *Dentullis*, *Dentoides*, *Pyrenoi'des*, from *ὀδους*, 'a tooth,' and *ειδος*, 'shape,' 'resemblance.' This epithet is given to the *Processus dentatus* of the second vertebra or axis, (q. v.)

The **ODONTOID LIG'AMENTS**, (F.) *Ligaments odontoidiens*, are two strong and short conical fasciculi, whose truncated summits embrace the sides of the odontoid process, and whose bases are fixed in the fossæ at the inner side of the condyles of the occipital bone. Their direction is obliquely outwards and slightly up-

wards. They enter into the composition of the occipito-axoid articulation; strengthen the junction of the head with the vertebral column, and limit the movement of rotation of the atlas on the axis.

**ODONTOLITHOS**, from *odontos*, 'a tooth,' and *λίθος*, 'a stone.' A sort of incrustation, of a yellowish colour, which forms at the base of the teeth, and is called *Tartar*, *Tur'urus Dentium*. It consists of seventy-nine parts of phosphate of lime; twelve and a half of mucus; one of a particular salivary matter, and seven and a half of an animal substance, soluble in muriatic acid.

**ODONTOL'OGY**, *Odontologia*, from *odontos*, 'a tooth,' and *λογος*, 'a discourse.' An anatomical treatise of the teeth.

**ODONTOPHYIA**, Dentition.

**ODONTOMEGMA**, Dentifrice.

**ODONTOTECHNY**, Dentistry.

**ODONTOTRIMMA**, Dentifrice.

**ODORAT**, Olfaction.

**ODORATUS**, Olfaction—*o*. Deperditus, Anosmia.

**ODOUS**, Way.

**O'DOÛR**, *Odor*, *Odmě*, *Osmě*. A smell. Odours are subtle particles, constantly escaping from the surface of certain bodies. They act, in some manner, by actual contact on the nerves of the Schneiderian membrane, and give occasion to the sense of smell or Olfaction, (q. v.)

**ODOUS**, Tooth.

**OD'YNE**, *odynē*, 'pain,' (q. v.) *Dolor*, *Odyne'*. A very common suffix to words; as in *Pleurodyne*.

**ODYNEMA**, *Odyne*.

**ŒCONOMIA**, Economy—*œ*. Animalis, Physiology.

**ŒDEMA**, from *οἰδῶ*, 'I am swollen.' *Hydrops cellulæ'ris ar'tuum*, *Phlegma'tia*. Swelling produced by the accumulation of a serous fluid in the interstices of the cellular texture. This swelling is soft; yields under the finger; preserves the impression for some time, and is pale and without pain. It presents the same characters as anasarca, which is general œdema. Its etiology and treatment are also the same. See Anasarca.

**ŒDEMA**, COMPACT, Induration of the cellular tissue—*œ*. Fugax, Anathymiasis—*œ*. Hystericum, Anathymiasis.

**ŒDEMA OF THE GLOTTIS**. A disease consisting of serous or sero-purulent infiltration into the submucous tissue of the glottis. The symptoms resemble those of croup; but the disease attacks the adult rather than the child. The age is, indeed, a principal means of diagnosis between the two affections.

The disease is almost always fatal. The treatment has to vary according to the accompanying general symptoms.

**ŒDEMA LACTEUM**, *Phlegmatia dolens*.

**ŒDEMA OF THE LUNGS**, (F.) *Œdème du poulmon*. Laënnec has so called the infiltration of serum into the tissue of the lung, carried to such an extent as to diminish its permeability to air. It is not an uncommon sequela of pneumonia, and the major exanthemata.

The respiration is laborious; the respiratory murmur scarcely perceptible, although the thorax is largely expanded, and there is a slight

*râle crepitant*, particularly at the base and inferior part of the lungs. The sound on percussion is clear, and on both sides equally so. The cough is attended with aqueous expectoration. In some cases, the respiration becomes puerile in a small portion of the summit of the lung.

**ŒDEMA PUPERERARUM**, *Phlegmatia dolens*—*œ*. Spasticum, Anathymiasis—*œ*. Uvulæ, Staphylœdema.

**ŒDÈME ACTIF DES NOUVELLES ACCOUCHÉES**, *Phlegmatia dolens*—*œ*. *de la Glotte*, *Angina œdematosa*.

**ŒDEMOSAR'CA**. A species of tumour, mentioned by M. A. Severinus, which holds a middle place between œdema and sarcoma.

**ŒIL**, Eye—*œ*. *de Bauß*, *Anthemis tinctoria*—*œ*. *Double*, *Binoculus*—*œ*. *de Lièvre*, *Lagophthalmus*—*œ*. *Simple*, see *Monoculus*.

**ŒILLET GIROFLÉE**, *Dianthus caryophyllus*.

**ŒENANTHÈ**, *Œ. croc'ata*, *Œ. charophyll'li foliis*, *Œ. cicu'ta facie lobel'li*, *Hemlock dropwort*. *Nat. Ord.* Umbellifera. *Sex. Syst.* Pentandria Digynia. A violent poison of the acronarcotic class. Its juice has been recommended in certain cutaneous diseases; but it is scarcely ever used. It is employed in fomentations.

**ŒENEL'EON**, *αινελαιον*, from *αινος*, 'wine,' and *ελαιον*, 'oil.' A mixture of oil and wine.—Galen.

**ŒENOG'ALA**, *αινογαλα*; from *αινος*, 'wine,' and *γαλα*, 'milk,'—a mixture of wine and milk.' According to some, wine as warm as new milk.

**ŒENOG'ARON**, *Garum vino mistum*. Wine mixed with garum.—*Œætius*.

**ŒENOMANIA**, *Delirium tremens*.

**ŒENOS**, Wine.

**ŒENOSTAGMA**, *Spiritus vini rectificatus*.

**ŒENOTHE'RA BIENNIS**, *Œ. Mollissima*, *Evening Primrose*, *Scabish*. An indigenous plant, common on the borders of fields, and in natural hedges. Octandria Monogynia, (*Lin.*) Its properties are mucilaginous and slightly acid. A decoction has been used in cases of infantile eruptions.

**ŒESOPHAGE'AL**, *Œsophagæ'us*, (F.) *Œsophagien*. Relating or belonging to the œsophagus.

**ŒESOPHAGE'AL MUSCLE**, *Œsophagæ'us*. Some anatomists have given this name to the transverse muscular fibres, which surround the œsophagus at its upper extremity.

**ŒESOPHAGEAL AP'ERTURE OF THE DIAPHRAGM**, (F.) *Ouverture œsophagienne du diaphragme*. An opening in the diaphragm, for the passage of the œsophagus.

**ŒESOPHAGEAL AP'ERTURE OF THE STOMACH**. A name, given to the superior or *cardiac* orifice of the stomach, to distinguish it from the inferior or *pyloric*.

**ŒESOPHAGIEN** (muscle), *Constrictor œsophagi*.

**ŒESOPHAGIS'MUS**. A name given by Vogel to spasm of the œsophagus. By some, used synonymously with œsophagitis, dysphagia, and contraction of the œsophagus.

**ŒESOPHAGITIS**. Inflammation of the œsophagus.—*Angina œsophagica Cyananche œsophagica*, (q. v.)

**ŒESOPHAGORRHAGIA**, *Hæmatemesis*.

**ŒSOPHAGOTOMY**, *Œsophagotomia*, from *οισοφαγος*, 'the œsophagus,' and *τεμνειν*, 'to cut.' An incision made into the œsophagus for the purpose of extracting foreign bodies from it.

**ŒSOPHAGUS**, from *οιω*, 'I carry,' and *γαστρ*, 'I eat;' *Gula*, *Fistula cibalis*, *Via stomachi et ventris*, *Fistula vel Infundibulum Vetriculi*. The *Gullet*. A musculo-membranous canal, cylindrical, and depressed from before to behind, which extends from the inferior extremity of the pharynx to the upper orifice of the stomach. At its origin, it is situate in the median line; but, beneath the larynx, it deviates to the left, and in the chest experiences different inflections. In its cervical portion, it corresponds, behind, with the spine; before, with the larynx and trachea; and, at the sides, it is close to the primitive carotids, internal jugular veins, par vagum, recurrent nerves, &c. In its inferior or thoracic portion, the œsophagus is entirely contained in the posterior mediastinum; and enters the abdomen through the œsophageal aperture of the diaphragm.

The œsophagus is composed of a very strong muscular layer, sometimes called *Tunica vaginalis gula*; formed, itself, of two sets of fibres, the *external* being generally longitudinal, the *internal* transverse or annular. 2. Of a mucous membrane which is soft, fine, thin, and white, especially at its lower part. It is continuous, above, with the mucous membrane of the pharynx. The mucous follicles, found beneath it, are not numerous, and have been called *Œsophageal glands*.

The arteries of the œsophagus proceed, in the neck, from the thyroid; in the chest, from the bronchial arteries and directly from the aorta;—in the abdomen, from the inferior phrenic and coronaria ventriculi. Its veins empty themselves into the inferior thyroid, the vena cava superior, the internal mammary, azygos, bronchial, phrenic, and coronaria ventriculi. Its lymphatics pass into the ganglia surrounding it. Its nerves are afforded by the pharyngeal and pulmonary plexuses; by the cardiac nerves; the thoracic ganglia, and, especially, by the pneumogastric and their recurrent branches.

**ŒSTROMANIA**, Nymphomania.

**ŒSTRUM**, Clitoris.

**ŒSTRUM VEN'ERIS**, *Œstrum ven'ercum*, *Œstrus ven'ereus*; from *οιστρος*, *astrus*, 'a violent impulse or desire.' An immoderate desire for sexual intercourse. With some, *astrum* signifies Clitoris.

**ŒVUS**, Ova.

**OFFICINA**, Pharmacopolium.

**OFFIC'INAL**, *Officina'lis*, from *offic'ina*, 'a shop.' An epithet for medicines found in the shop of the apothecary, ready prepared; in opposition to *magistral* or *extemporaneous*;—those prepared after the prescription of the physician.

**OFFIUM**, Afion, Opium.

**OFFUSCATIO**, Amaurosis.

**OGNON**, a Corn.

**OGNON MARIN**, Scilla.

**O'HIO, MINERAL WATERS OF**. *Yellow Spring* is a chalybeate, situate in Green county, 64 miles from Cincinnati. It is sometimes frequented.

**OIE**, *Sorbus domestica*.

**OIGNON**, *Allium cepa*.

**OIL**, *Oleum*, *Elaion*, (F.) *Huile*; from *ελαια*, 'the olive.' A collective name, under which two classes of fluids are included, very different from each other: those, belonging to the one class, are viscid; mawkish or almost insipid; those of the other are nearly devoid of viscosity, and are caustic and very volatile. The former are called *fat* or *fixed oils*; the latter *volatile* or *essential oils*, or *essences*, (q. v.)

**OIL OF ALMONDS**, *Oleum amygdalarum*—*O*. Animal, *Oleum animale*—*O*. Animal, of Dippel, *Oleum animale Dippelii*—*O*. of Bay, *Daphnolæon*—*O*. of Bays, *Oleum laurinum*—*O*. and Beeswax, *Unguentum ceræ*—*O*. of Benjamin or benzoin, *Oleum benzoini*—*O*. Benne, see *Sesamum orientale*.

**OIL, BRITISH**. An empirical preparation, often used in cases of sprains.

A committee of the Philadelphia College of Pharmacy recommend the following form for its preparation: (*Ol. Terebinth. Ol. Lini usitata*. ãã f. ʒviiij, *Ol. Succini, Ol. Juniper*. ãã f. ʒiv, *Petrol. Barbados.* f. ʒiiij, *Petrol. American.* (*Seneca Oil*) f. ʒj. M.)

**OIL OF CACAO**, *Butter of Cacao*—*O*. of the Cashew nut, see *Anacardium occidentale*—*O*. Codliver, *O. Jecinoris aselli*—*O*. of Cypress, *Cyprinum oleum*—*O*. of Dill, see *Anethum graveolens*—*O*. Dippel's, *Oleum animale Dippelii*—*O*. of Egg, see *Ovum*—*O*. Etheral, *Oleum Æthereum*—*O*. Krumholz, see *Pinus mughos*—*O*. Lily, see *Lilium candidum*—*O*. of Mucilages, *Oleum e. mucilaginis*—*O*. of Nicodemus, *Nicodemi oleum*—*O*. Olive, *Oleum olivæ*—*O*. of Pike, *Oleum lucii piscis*—*O*. Rock, *Petrolæum*—*O*. of Rue, *Peganelæon*—*O*. Distilled, see *Ruta*—*O*. of Spike, *Oleum terebinthina*—*O*. of St. John's Wort, see *Hypericum perforatum*—*O*. Salad, *Oleum olivæ*—*O*. of Scorpion, see *Scorpion*—*O*. Sulphuretted, *Balsamum sulphuris simplex*—*O*. of Tartar, *Liquor potassæ subcarbonatis*—*O*. of Turpentine, rectified, *Oleum terebinthina rectificatum*—*O*. of Vitriol, *Sulphuric acid*—*O*. of Wine, *oleum ætherum*.

**OILS, ANIMAL**, *Olea animalia*—*O*. Distilled, *Olea volatilæ*—*O*. Empyreumatic, *Olea empyreumatica*—*O*. Essential, *Olea volatilæ*—*O*. Etheral, *Olea volatilæ*—*O*. Expressed, *Olea fixa*—*O*. Fatty, *Olea fixa*—*O*. Fixed, *Olea fixa*—*O*. Fugacious, *Olea fugacia*—*O*. Grain, *Sesamum orientale*—*O*. Medicinal, *Olea medicinalia*—*O*. Volatile, *Olea volatilæ*.

**OINTMENT OF TARTARIZED ANTIMONY**, *Unguentum antimonii tartarizati*—*O*. Bay, *Unguentum laurinum*—*O*. Blister, *Cerate of cantharides*—*O*. Blistering, green, *Unguentum lyttæ medicatum*—*O*. Blistering, milder, *Unguentum lyttæ*—*O*. Blistering, yellow, *Unguentum lyttæ medicatum aliud*—*O*. Blue, *Unguentum hydrargyri*—*O*. Citrine, *Unguentum hydrargyri nitratis*—*O*. Cyrillo's, *Unguentum muriatis hydrargyri oxygenati medicatus*—*O*. Digestive, simple, *Unguentum digestivum simplex*—*O*. Edinburgh, see *Unguentum veratri*—*O*. Elder, *Unguentum sambuci*—*O*. of Elemi, *Unguentum elemi compositum*—*O*. for the Eyes, (Smellome's,) see *Ceratium resinæ*—*O*. Golden, *Unguentum hydrargyri nitrico-oxydi*—*O*. Goulard's, *Ceratium plumbi compositum*—*O*. Green, *Unguentum sambuci*—*O*. Hellebore, white, Un-

guentum veratri—o. of Hydriodate of potass, Unguentum potassæ hydriodatis—o. Itch, Unguentum sulphuris compositum—o. Itch, Bate-man's, see Unguentum sulphuratum alcalinum ad scabiem—o. Itch, Bailey's, see Unguentum sulphuratum ad scabiem—o. Itch, Helmerick's, Unguentum sulphuratum alcalinum ad scabiem—o. Issue, Dr. Physick's, see Unguentum ly-tæ medicatum aliud—o. of Lydia, Bacaris—o. Marshmallow, Unguentum de Althæâ—o. Mer-curial, Unguentum hydrargyri—o. of Nitrate of mercury, Ungentum hydrargyri nitratis—o. of Nitrous acid, Unguentum acidi nitrosi—o. of White oxide of lead, Unguentum oxidi plumbi albi—o. of Gray Oxide of mercury, Unguen-tum oxidi hydrargyri cinerum—o. of Nitric oxyd of mercury, Unguentum hydrargyri nitri-co-oxydi—o. of Impure oxide of zinc, Unguen-tum oxidi zinci impuri—o. Red precipitate, Un-guentum hydrargyri nitrico-oxydi—o. of White precipitate, Ungentum hydrargyri præcipitati albi—o. Resin, Ceratum resinæ flavæ—o. Resin, black, Unguentum resinæ nigræ—o. Soldier's, Martiatum unguentum—o. of Spanish flies, Cerate of Cantharides, Unguentum lyttæ—o. Spermaceti, Unguentum cetacei—o. of Suba-cetate of copper, Unguentum subacetatis cupri—o. of Sugar of lead, Unguentum plumbi su-peracetatis—o. Sulphur, Unguentum sulphuris—o. Sulphur, compound, Unguentum sulphuris compositum—o. Tar, Unguentum picis liquidæ—o. Tutty, Unguentum oxidi zinci impuri—o. Verdigris, Ungentum subacetatis cupri—o. Wax, Unguentum ceræ—o. White, Unguen-tum oxidi plumbi albi—o. Zinc, Unguentum zinci.

OLD AGE, Senectus.

OLEA ANIMA'LIA, *Animal oils*, (F.) *Huiles animales*. A name given to fixed oils, holding in solution the mucilaginous and gelatinous principles of certain animals, as the *Oil of frogs*, *Oil of Scorpions*, *Oil of spiders*, &c. Sometimes, also, the term *animal oils* is given to empyreumatic oils, produced during the decomposition of animal substances by heat.

OLEA EMPYREUMATICA, *Empyreumatic oils*, (F.) *Huiles empyreumatiques*. Oils which have an empyreumatic or burnt smell. They are obtained by treating vegetable or animal mat- ters by heat, in close vessels. They do not exist in organized bodies, but are formed during their decomposition by fire. The animal oil of Dippel is an empyreumatic oil.

OLEA EUROPEA, *Oli'va*, *Olea sativa*. The *Olive tree*, *ελαία*, *Ela'ia*, (F.) *Olivier*, (Fruit) *Olive*. *Nat. Ord.* Jasmineæ. *Sex. Syst.* Dian-dria Monogynia. The fruit of the olive tree, when pickled, is extremely grateful to some stomachs. Olives, as met with in the shops, are prepared from the green, unripe fruit, repeatedly steeped in water. To this, some quick-lime or alkaline salt is added, and afterwards, they are washed and preserved in a pickle of common salt and water. From this fruit is prepared the *Olive oil* or *Salud oil* of the Phar-macopœias, which is obtained by grinding and pressing the olives, when thoroughly ripe. The finer and purer oil issues first by gentle pressure, and the inferior sorts on heating what is left and pressing it more strongly. See *Oleum Olivæ*. In Calabria, an odorous resin exudes

from its trunk, which is employed as a perfume by the Neapolitans.

A gum flows from certain wild olives, in warm countries, which consists, according to Pelletier, of a resin, a little benzoic acid, and a peculiar substance, called *Olivite*. It is in yellow masses, of a slightly acid taste, and of a vanilla smell. It is called *Oleæ gummi*, *O. resi'na*, and *O. balsamum*, (F.) *Gomme olivier*,) and is esteemed astringent and detersive.

OLEA FIXA VEL PIN'GUIA, *Express'ed oils*, *Fixed oils*, *Fatty oils*, (F.) *Huiles fixes ou grasses*. All the oils obtained from the seeds or peri-carps of vegetables, without distillation, and which are viscid, but slightly odorous and sapid; lighter than water, and insoluble in alcohol. The rancidity of oils depends on the absorption of oxygen, and, therefore, they should be kept in bulk as much as possible; and in narrow-necked bottles, so that a very small surface only can be exposed to the air. All the fixed oils are emollient, and, in a certain dose, they act as purgatives and emetics. They are prepared by expressing the fruit or seed con-taining them.

OLEA FUGA'CIA, *Fuga'cious oils*, (F.) *Huiles fugæes*. A name given to oils which are so volatile that, in order to obtain them, recourse must be had to a different process from that employed for other essential oils. Such are the oils of jessamine, lily, violet, &c.

OLEA MEDICINA'LIA, *Medic'inal oils*, (F.) *Huiles Medicinales*. A name given to oils, pre-pared by macerating, infusing, or boiling me-dicinal substances in olive or any other fixed oil. These oils may then be regarded as oily solutions of certain medicinal substances; whence they can never be simple. They have, however, been divided into *simple* and *com-pound medicinal oils*. To the former belong the *Oils of St. John's wort*, of the *Solanum nigrum*, &c.; to the other,—which have often been called *Oily balsams*, (F.) *Baumes huileux*, —the *Balsams of Fioraventi*, *Metz*, &c.

Medicinal oils are, almost always, employed externally.

OLEA VOLATIL'IA, *Vol'atile oils*, *Æthero'lea*, *Ethe'real oils*, *Essen'tial oils*, *Distil'led oils*, *Es'senees*, (F.) *Huiles volatiles*, *H. essentielles*. Oils, found in aromatic vegetables and in every part of them, except in the interior of the seeds. The majority are obtained by distillation; but some by expression. They possess unctuousity, inflammability, and viscidty, like the fixed oils; but they are generally odoriferous, pungent, and acid. The greater part are lighter than water; but some are heavier, and congeal at a moderate temperature. They dissolve, in small quantity, in distilled water, by simple agitation. Almost all are soluble in alcohol.

The odour and taste are the usual tests of their goodness. To preserve them, they should be kept in a cool place, in small bottles quite full and well corked.

Volatile oils are possessed of the aromatic properties of the plant whence they are obtained. They are all, when applied externally, stimulant and rubefacient.

OLEA'MEN, *Oleamen'tum*. Any soft ointment prepared of oil.—Scribonius.

OLEANDER, *Rhododendron chrysanthemum*.

OLEC'RANON, or OLECRA'NON, *Olec'ranum*; from *ὠλεων*, 'the elbow,' and *ρανον*, 'the head.' *Acrole'nion*, *Additamentum neca'tum*, *Ancon*, *Processus anconicus*, *Glans* seu *Coro'na* seu *Coro'ne posterior*, seu *Additamentum uncatum Ulnæ*, *Verte'x Cu'biti*, *Putella fixa*, *Top of the cubit*. Head or projection of the elbow. A large process at the upper extremity of the ulna, on which we lean. When this process is fractured, it is apt to be drawn up by the triceps; and much care is required to keep the parts in apposition.

OLENE, *Ulna*.

OLEO-CERATUM AQUÂ SUBACTUM, *Ceratum Galeni*.

OLEO-SACCHARUM, *Elæo-saccharum*.

OLETTE, MINERAL WATERS OF. At Olette, in the department Pyrenées Orientales, is a thermal spring, which raises the thermometer to 190° Fahr. It is the hottest in France.

OLEUM, Oil—o. *Abietis*, see *Pinus picea*—o. *Absinthii*, *Artemisia absinthium*, (oil of)—o. *Acusticum*, *Huile acustique*.

OLEUM ÆTHE'REUM, *Æthe'ral oil*, (formed in the distillation of ether.) *Oleum vini*, *Oil of wine*, (F.) *Huile douce de vin*. It is used only as an ingredient in the compound spirit of ether.

OLEUM AMMONIATUM, *Linimentum ammoniæ fortius*.

OLEUM AMYGDALA'RUM, *Oleum amygdalæ communis*, *Oil of almonds*, (F.) *Huile d'amandes*. (Expressed from both sweet and bitter almonds;  $\frac{3}{4}$  xvj of almonds yield  $\frac{3}{4}$  v of oil.) It is inodorous, insipid, and of a pale straw-colour, and is employed as a demulcent and emollient.

OLEUM ANACARDII, see *Anacardium occidentale*.

OLEUM ANIMA'LE, *An'imal oil*, (F.) *Huile animale*. An oil, obtained by the decomposition of the immediate principles of animals, subjected to the action of heat. It is fetid, and always contains a certain quantity of subcarbonate of ammonia. See *Olea Empyreumatica*. The name, *animal oil*, is sometimes also given to the fat contained in the fatty vesicles. The composition of this fat does not, indeed, differ from that of the fixed oils.

The OLEUM ANIMA'LE DIPPE'LII, or *Animal oil of Dippel*, *Oleum cornu cervi*, *O. C. C. rectificatum*, *Animal oil*, *Dippel's oil*, *Oleum pyro-anima'le depuratum*, *O. anima'le æthe'reum*, *Pyro'leum os'simum rectificatum*, (F.) *Huile animale de Dippel*, *Huile de corne de cerf*, is obtained by distilling animal matters, especially hartshorn, on the naked fire. The subcarbonate of ammonia, which it contains, renders it partly soluble in water, and communicates to it its stimulant properties for which it is used in medicine. It is employed as an antispasmodic.

OLEUM ANIMALIZA'TUM PER INFUSIO'NEM, (F.) *Huile animalisée par infusion*, *Huile aromatique*, *H. de petits chiens*. A preparation, formerly esteemed tonic and cephalic. It was obtained by boiling new-born puppies in oil, first depriving them of their blood, skin, and intestines. When the decoction was cold, organum, thyme, pennyroyal, St. John's-wort, and marjoram were added.

OLEUM ANISI, see *Pimpinella anisum*—o.

*Balaninum*, *Guilandina moringa* (*oleum*)—o. *Balsami*, see *Amyris opobalsamum*.

OLEUM BENZO'INI, *Oil of Benzoin* or *Benz-jamin*. An oil obtained by heating, in a sand bath, the matter which remains, after benzoic acid has been separated from benzoin by the aid of heat. It has been regarded as balsamic and sudorific.

OLEUM CACAO SPISSATUM, *Butter of cacao*—o. *Cajaputi*, *Caieput* (oil)—o. *Camphoratum*, *Linimentum camphoræ*—o. *Carui*, *Carum* (*oleum*.)

OLEUM CED'RINUM, *Essen'tia de cedro*, (F.) *Huile de cédrat*. The oil of the peel of citrons, obtained in a particular manner, without distillation, in Italy.

OLEUM CICINUM, see *Ricinum communis*—o. *Cornu cervi*, *O. animale Dippelii*—o. *Fixum nucum cocos butyracæ*, see *Cocos butyracæ*—o. *Gabianum*, *Petrolæum*—o. *Gallinæ*, *Alkale*—o. *Hyperici*, see *Hypericum perforatum*.

OLEUM JECINORIS ASELLI, *O. Morrhuæ*, *O. Jecoris Aselli*, *Codliver Oil*, (F.) *Huile de morue*. The animal oil, which appears under this name in commerce, is obtained from several of the species belonging to the genus *Gadus*. The clearest sorts are generally used. It appears to have no sensible effects upon the economy; but it has been given in strumous affections, rheumatism, chronic cutaneous diseases and tumours of the inamæ. The dose for an adult is from  $\frac{3}{4}$  ij to  $\frac{3}{4}$  iss.

OLEUM JUNIPERI, see *Juniperus communis*—o. *de Kervæ*, see *Ricinus communis*—o. *Kervinum*, see *Ricinus communis*.

OLEUM LAURI'NUM, *Oleum lauri*, *Oil of bays*. An oil obtained from bayberries, and sometimes used in sprains and bruises, unattended with inflammation.

OLEUM LAURINUM, *Daphnelæon*, *Unguentum L.*—o. *Lentiscinum*, *Schinelæon*—o. *Limonis*, see *Citrus medica*—o. *Lini cum calce*, *Linimentum aquæ calcis*.

OLEUM LUCII PISCIS, *Oil of Pike*. From the liver of the *Esox lucius* an oil is spontaneously separated, which is used, in some countries, to destroy specks on the cornea.

OLEUM MALABATHRI, see *Malabathrum*—o. *Maris*, see *Fagara octandra*—o. *Melaleucæ leucodendri*, *Caieput* (oil)—o. *Menthæ piperitæ*, see *Mentha piperita*—o. *Menthæ viridis*, *Mentha viridis*—o. *Monardæ*, *Monarda punctata*—o. *Morrhuæ*, *O. jecoris aselli*.

OLEUM E MUCILAGIN'IBUS, *Oil of mucilages*. (*Rad. althææ rec. lbss, scm. lini, scm. farnygraci* aa  $\frac{3}{4}$  ij, *aquæ lbj*. Boil for half an hour, add *ol. olive lbvj*. Continue boiling till the water is nearly consumed, and pour off the oil.) Emollient.

OLEUM NEROLI, see *Citrus aurantium*.

OLEUM OLI'VÆ, *O. oliv'rum*, *Olive oil*, *Salad oil*. It is an inodorous, insipid, and transparent oil; obtained by expression from the olive, when ripe. It is demulcent and emollient,—possessing the qualities of the fixed oils in general.

An inferior kind, obtained by boiling the olives in water, and skimming the oil from the surface, is used, also, in Pharmacy. See *Olea Europea*.

OLEUM OMPHACINUM, *Omotribes*—o. *Oxydipuri viride*, *Balsam green*, of Metz—o. *Palmæ*, see *Cocos butyracæ*—o. *Palmæ liquidum*, see *Ricinus communis*—o. *Petræ*, *Petrolæum*—o.

Petræ album, Naphtha—o. Picinum, Brutia, Pis-selæum—o. Pimentæ, see Myrtus pimenta—o. Pini purissimum, O. terebinthinæ rectificatum—o. Pulegii, see Mentha pulegium—o. Pyro-aninale, O. animale Dippelii—o. Ricini, see Ricinus communis—o. Rutaceum, Peganelæon—o. Rosmarini, see Rosmarinus—o. Rutæ, see Ruta—o. Sesami, see Sesamum orientale—o. Sinapis, see Sinapis—o. Spicæ vulgaris, O. terebinthinæ—o. Succini, see Succinum.

OLEUM SULPHURATUM, *Balsamum sulphuris simplex, Sulphurated oil.* (Sulphur. lot. ℥ij, olive olei lbj. Heat the oil in a large iron pot, and throw in the sulphur, by degrees; stirring the mixture after each addition till they unite.) It is stimulating, and was formerly much used in coughs, asthma, &c., and, externally, to foul ulcers.

OLEUM TARTARI PER DELIQUIMUM, Liqueur potassæ subcarbonatis—o. Templinum, see Pinus mughos.

OLEUM TEREBINTHINÆ RECTIFICATUM, *Oleum pini purissimum, Rectified oil of turpentine, Oleum terebinthinæ æthereum, Sp. of turpentine. Common oil of turpentine, is also called Common oil of spike, Oleum spicæ vulgæ rē. (Olei terebinth. lbj, aquæ lbiv. Distil over the oil.) It is stimulant, diuretic, anthelmintic, and rubefacient. Dose. ℥ss to ℥j.*

The *Gæstonian embrocation* for Rheumatism consists of ol. terebinth., ol. oliv. āā ℥iss, acid sulph. dil. ℥ij.

OLEUM THEOBROMÆ CACAO EXPRESSUM, Butter of cacao—o. Tiglii, Croton tiglium—o. Vini, O. æthereum—o. Vitrioli, Sulphuric acid.

OLFACTION, *Olfactus, Oosphræsis, Odora'tus, Sense of smell, Smelling, (F.) Odorat.* The sense by which we perceive the impressions made on the olfactory nerves by the odoriferous particles suspended in the atmosphere. The olfactory nerve has usually been considered the great nerve of smell; and it is probably the nerve of special sensibility, general sensibility being communicated by the branches of the 5th pair, distributed on the pituitary membrane of the nose and sinuses.

OLFACTORY, *Olfactivus, Olfactorius, Oshprantios, from olfactus, 'the smell.' That which belongs or relates to the sense of smell.*

The OLFACTORY NERVES, *Ethmoidal nerves, (Ch.) Par primum Nervorum cerebri, Nervi odoratorii, Processus mamillares, Processus mamillares cerebri ad nares, P. papillares, Caruncula mamillares, —the first pair of encephalic nerves.* This nerve, which probably arises from the medulla oblongata, is observed to leave the brain, opposite the inner part of the fissure of Sylvius, by three roots; which, by their union, form a triangular knot or expansion. When it reaches the ethmoid fossa it expands and forms a triangular ganglion or grayish, soft bulb, which furnishes, from its inferior surface, the branches that have to be distributed to the nasal fossæ. These filaments are very numerous; they pass through the foramina in the cribriform plate and enter the nasal fossæ. They are distinguished into the *internal, external, and middle.* The former are distributed over the mucous membrane, covering the outer paries of the nasal fossæ; the second descend upon the septum, and the third are lost, almost imme-

diately, on the portion of the pituitary membrane, that lines the vault of the fossæ.

The OLFACTORY FORAMINA, (F.) *Trous olfactifs*, are the holes in the cribriform plate of the ethmoid bone, through which the olfactory nerve passes.

OLFACTŪS AMISSIO, Anosmia.

OLIBANUM, Juniperus lycia—o. Vulgare, see Pinus abies.

OLIGÆMIA, Anæmia, Hæmaphoria, Hypæmia.

OLIGOCH'YLUS, from ολιγος, 'little,' and χυλος, 'juice, chyle.' An epithet for food which is but little nutritive; which furnishes little chyle.

OLIGOGALIA, Agalaxis.

OLIGOPO'SIA, from ολιγος, 'little,' and ποσις, 'drink.' Diminution in the quantity of drinks.

OLIGOTRO'PHIA, *Parcior nutritio;* from ολιγος, 'little,' and τρεφω, 'I nourish.' Deficient nourishment.

OLISTHEMA, Luxation.

OLIVA, Olea Europæa.

OLIVARIS, Olive-shaped.

OLIVE, see Olea Europæa—o. Tree, Olea Europæa.

OLIVES, PICKLED, Colymbades.

OLIVE-SHAPED, *Olivæ'ris, Olivifor'mis, from oliv'va, 'an olive.' Resembling an olive.* (See Corpora Olivaria.)

The CAUTERE OLIVARE, of the French surgeons, is a cautery whose extremity is terminated by a button, having the shape of an olive.

The PROCES'SUS OLIVARIS is a small ridge, running transversely between, and a little behind, the roots of the anterior clinoid processes of the sphenoid bone, which by some has been considered as a 4th clinoid process.

OLIVIER, Olea Europæa.

OLMITELLO, MINERAL WATERS OF. A thermal spring in the Isle of Ischia. Temp. 100° Fahr.

OLOPHO'NIA, from ολλω, ολλωω, 'I lose,' and φωνη, 'voice.' Congenital misconstruction of the vocal organs.—Good.

OLOPHONIA LABII LOBATA, Harelip—o. Linguæ frænata, see Ankyloglossum.

OM'AGRA, *Hom'agra, ωμαγρα, from ομοσ, 'the shoulder,' and αγρα, 'a prey.' Gout in the shoulder.*

OMA'SUM, *Omasus, Manyplies.* The third stomach of ruminant animals.

OMBILIC, Umbilicus.

OMBILICALE, Umbilical.

OMBRAGE, Nebula.

OMENTA, Meninges.

OMENTESIS, Epiploitis.

OMENTITIS, Epiploitis.

OMENTUM, Epiploon—o. Colicum, Epiploon, colic—o. Gastro-colicum, Epiploon, gastro-colic—o. Gastro-splenic, Epiploon, gastro-splenic—o. Great, Epiploon, gastro-colic—o. Hepato-gastricum, Epiploon, gastro-hepatic—o. Lesser, Epiploon, gastro-hepatic—o. Majus, Epiploon, gastro-colic—o. Minus, Epiploon, gastro-hepatic—o. Ossium, Periosteum—o. Third, Epiploon, colic.

OMMA, Eye.

OMNIPHAGOUS, Omnivorous.

OMNIVOROUS, *Omnivorus, Omniph'agus*

*Pantoph'agus*, from *omnis*, 'all,' and *oro*, 'I eat.' An epithet for animals which eat every kind of food,—animal or vegetable.

OMO-CLAVICULAR. See Coracoclavicular.

OMOCOTYLE. See Glene.

OMO-HYOIDEUS, *Cor'aco-hyoideus*, *Scapulo-hyoïdien*, *Omo-hyoïdien*, *Omoplat-hyoïdien*, *Hyoïdis Quartus Musculus*. This muscle is situate, obliquely, at the sides and front of the neck. It is slender, long, and flat. It arises from the superior costa of the scapula, near the semilunar notch, and from the ligament that runs across it, and is inserted at the sides of the inferior margin of the body of the os hyoides. It consists of two fasciculi, united by a common tendon, and is a true digastric muscle. It depresses the os hyoides, carrying it a little backwards, and to one side, except when it acts with its fellow, when the bone is depressed, and drawn obliquely backwards.

OMOPLATE, Scapula—*o. Col de l'*, Collum scapulæ.

OMOPLAT-HYOÏDIEN, *Omo-hyoideus*.

OMOS, Humerus.

OMOTARICHOS, from *omos*, 'the shoulder,' and *ταριχος*, 'pickled.' *Salsamentum crudum*; *Salted Tunny Fish*, in particular. Properly, the neck or shoulder piece of a salted animal. Once much recommended against the bites of vipers, and in hydrophobia.

OMOTOCIA, Abortion.

OMOTRIBES, *Omphac'inum O'leum*, from *omos*, 'crude,' and *τριβω*, 'I bruise.' Oil expressed from unripe olives.

OMPHACION, *ομφακιον*, from *ομφακος*, 'an unripe grape.'—*Succus uvæ accr'væ*, *Omphac'ium*. The juice of unripe grapes. Also, *Verjuice*.

OMPHACITES (VINUM.) A name given to wine prepared from the unripe grape. *Omphac'itis*, is also the name of a small gall.—*Dioscorides*.

OMPHACIUM, *Verjuice*.

OMPHACOMELI, from *ομφακος*, 'an unripe grape,' and *μελι*, 'honey.' A sort of oxymel, made of the juice of unripe grapes and honey.

OMPHALELC'OSIS, from *ομφαλος*, 'the navel,' and *ελκος*, 'an ulcer.' Ulceration of the navel.

OMPHALOCARPUS, *Galium aparine*.

OMPHALOCLELE, *Exomphalos*.

OMPHALOMANT'IA, from *ομφαλος*, 'the navel,' and *μαντεια*, 'prophecy.' A species of divination, practised by credulous matrons, who pretend to be able to know the number of children a female will have, by the number of knots in the navel string of the child.

OMPHALO-MESERAIC, *Omphalo-mesenteric*.

OMPHALO-MESENER'IC, *Omphalo-mesenter'icus*, *Omphalo-mesara'icus*; from *ομφαλος*, 'the navel,' and *mesenterium*, 'the mesentery.'

OMPHALO-MESENERIC VESSELS, *Vitello-mesenteric*, *Vitelline vcscls*. Hailler gave this name to two very fine vessels, which spread their ramifications on the parietes of the umbilical vesicle. There is an *omphalo-mesenteric artery and vein*. The *omphalo-mesenteric artery* is a branch of the superior mesenteric;—the vein

empties itself into the trunk, or into one of the branches, of the superior mesenteric. *Velpeau* affirms, that they insculate with a branch of the second or third order of those great vessels, with those in particular that are distributed to the cæcum, and he regards them to be the vessels of nutrition of the umbilical vesicle.

They are occasionally met with in the fœtus, at the full period, under the form of whitish filaments, which extend from the mesenteric vessels to the umbilicus.

OMPHALONCUS, *Omphalophyma*.

OMPHALOPHY'MA, *Omphalon'cus*, from *ομφαλος*, 'the navel,' and *φυμα*, 'tumour.' A tumefaction of the navel.

OMPHALORRHA'GIA, from *ομφαλος*, 'the umbilicus,' and *ρηγνυμι*, 'I break out.' Hemorrhage from the umbilicus, in the new-born, in particular.

OMPHALOS, *Umbilicus*.

OMPHALOSITE, from *ομφαλος*, 'the navel,' and *σιτος*, 'nourishment.' A monster, which possesses an imperfect kind of life, that ceases when the umbilical cord is divided.

OMPHALOT'OMY, from *ομφαλος*, 'the umbilicus,' and *τεμνω*, 'I cut.' The division of the navel string.

ONANIA, *Masturbation*.

ONANISM, *Masturbation*.

ONCOS, *Tumour*.

ONCO'SES, from *ονκος*, 'a tumour.' *Tumours*, as diseases.

ONCOSIS, *Tumour*.

ONCOT'OMY, from *ονκος*, 'a tumour,' and *τομη*, 'incision.' The opening of a tumour or abscess with a cutting instrument.

ONCTION, *Inunction*.

ONDULATION, *Fluctuation*.

ONEBERRY, *Paris*.

ONEIROCRIT'ICOS, from *ονειρος*, 'a dream,' and *κρισις*, 'judgment.' One, who judges according to dreams.

ONEIRODYN'IA, from *ονειρος*, 'a dream,' and *οδυνη*, 'pain.' Painful dreams. *The Incubus* and *Somnambulism* are oneirodyniæ.

ONEIRODYNIA ACTIVA, *Paroniria*, *Somnambulism*—*o. Gravans*, *Incubus*.

ONEIRODYNIE GRAVATIVE, *Incubus*.

ONEIROG'MOS, *Oneirog'γηζ*, *Oneiropoll'esis*, from *ονειρος*, 'a dream,' A lascivious dream;—pollution, (q. v.) nocturnal pollution.

ONEIROGONOS, *Pollution*.

ONEIROMANT'IA, from *ονειρος*, 'a dream,' and *μαντεια*, 'divination.' The art of divining by dreams; of interpreting them.

ONEIROPOLESIS, *Oneirogmos*.

ONERA ALVI, *Excrement*.

ONGLE, *Nail*.

ONGLÉE, (F.) *Digit'rum stupor a gelû*. Painful numbness at the extremities of the fingers, caused by cold.

ONGLET, *Pterygion*.

ONGUENT, *Unguentum*—*o. d'Althéa*, *Unguentum de Althæa*—*o. de Blanc de baléine*, *Unguentum cetacei*—*o. Blanc de Rhazes*, *Unguentum plumbi subcarbonatis*—*o. de Cérusse*, *Unguentum plumbi subcarbonatis*—*o. Citrin contre la gale*, *Unguentum hydrargyri nitratis*—*o. Digestif simple*, *Unguentum digestivum simplex*—*o. Gris*, *Unguentum oxidi hydrargyri cinc-*

reum—*o. de Guimauve*, Unguentum de althæâ—*o. de Laurier*, Unguentum laurinum—*o. Mercuriel*, Unguentum hydrargyri—*o. Napolitain*, Unguentum hydrargyri—*o. de Nitrate de mercure*, Unguentum hydrargyri nitratis—*o. de Poix et de cire*, Basilicon—*o. de Soldat*, Martiatum unguentum—*o. de Surcau*, Unguentum sambuci—*o. de Tornamira*, Unguentum plumbi subcarbonatis.

ONION, COMMON, *Allium cepa*—*o. Sea*, Scilla.

ONIS'CUS, *Asellus*, *Cutio*, *Porcellio*. Diminutive of *ovos*, 'a small ass.' A genus of insects, very common in cellars and dark and moist places.

The ONISCI ASELLI, *Milpe'des*, *Aselli*, *Milpe'des*, *Wood-lice*, *Slaters*, *Hog-lice*, (F.) *Cloportes ordinaires*, had, at one time, a place in the pharmacopœias. They were considered stimulant and diuretic, and useful in jaundice.

ONITIS, *Origanum dictamnus*.

ONOMATOCLISIS, Nomenclature.

ONOMATOLOGIA, Nomenclature.

ONONIS ANTIQUORUM, *O. spinosa*.

ONONIS SPINOSA, *Resta bovis*, *Arresta bovis*, *Rem'ora Aratri*, *Ononis antiquorum*, *Rest-harrow*, (F.) *Arrête-bœuf*, *Bugrande épineuse*, *Bugrane*. *Nat. Ord. Leguminosæ. Sez. Syst. Diadelphia Decandria*. The root of this plant was, once, used as a diuretic.

The ONONIS ARVEN'SIS, (F.) *Bugrane des champs*, has like properties.

ONOPORDIUM ACANTHIUM, *Cor'duus toment'osus*, *Acanthium*, *Ac'anos*, *Cotton Thistle*. (F.) *Chardon aux Aines*. *Family, Cinarocephalæ. Sez. Syst. Syngenesia Polygamia æqualis*. The expressed juice has been recommended as a cure for cancer, applied externally.

ONYCHIA, Paronychia.

ONYCHOGRYPHO'SIS, *Onychogryph'osis*, *Onychogryph'osis*, from *ονυξ*, 'the nail,' and *gryphosis*, (q. v.) Curvature of the nails; such as occurs in hectic individuals.

ONYCHON'OSI, *Onychon'osi*, from *ονυξ*, 'a nail,' and *νοσος*, 'a disease.' Diseases of the nails.

ONYCHOPH'THORA, *Onychophth'oria*, *Onychoph'thora*, *Onychophth'oria*, from *ονυξ*, 'the nail,' and *φθορα*, 'degeneration.' A degenerate condition or destruction of the nails.

ONYCHOPHY'MA, from *ονυξ*, 'the nail,' and *φυμα*, 'a tumour.' A painful degeneration of the nails, which become thick, rough, and crooked. It occurs as a symptom of syphilis and of lepra.

ONYCHOPTO'SIS, from *ονυξ*, 'a nail,' and *πτωσις*, 'falling.' The falling off of the nails.

ONYCOPH'THORA, *Onychophth'oria*.

ONYX, Nail, Pterygion. Also, a collection of purulent matter between the laminae of the cornea, having the shape of a nail.

OOEIDES, Aqueous humour.

OOLOG'IA, *Ovologia*, *Ovology*, from *ovon*, 'an ovum or egg,' and *λογος*, 'a discourse,' 'a description.' A description of the ovum.

OON, Ovum.

OOPHORITIS, Ooritis.

OOPHORON, Ovary.

OPAC'ITY, *Opac'itas*, from *opac'are*, 'to obscure.' Quality of that which is opaque.

The property, possessed by some bodies, of not allowing the light to traverse them. It is opposed to transparency. *Opacity of the cornea* constitutes *albugo* or *leucoma*;—opacity of the crystalline causes cataract.

OPALINE. That which resembles the opal. A fluid is said to be opaline, when milky, and when it presents an appearance more or less like that of the opal.

OPAQUE, *Op'æus*. An epithet given to bodies, which do not permit the passage of rays of light. The *opaque cornea* is the sclerotic, in contradistinction to the *transparent cornea* or true cornea.

OPERATIO, Action.

OPERATION, *Opera'tio*, from *opus*, 'work.' The application of instruments to the human body with the view of curing disease. The object of operations is generally to divide or reunite parts, to extract extraneous or noxious bodies, and to replace organs that are wanting, by different instruments or artificial means. The principal operatory methods have been called, *Synthesis*, *Diæresis*, *Exuresis*, and *Prothesis*, (q. v.) Frequently, the most difficult subject, connected with an operation, is to decide when it is absolutely called for or advisable, and when it is improper.

A CHYMICAL or PHARMACEUTICAL OPERATION is any process, whose object is the preparation of medicines; their combinations with each other, analysis, and decomposition;—such are, *solution*, *distillation*, *sublimation*, *evaporation*, *digestion*, *maceration*, *infusion*, *decoction*, *calcination*, &c. Some of these operations are mechanical; others, really chymical.

OPERATION, BILATERAL, see Lithotomy—*o. Cæsarienne*, Cæsarean section—*o. High*, see Lithotomy—*o. Lateral*, see Lithotomy.

OPERATOR. A surgeon, who is in the habit of practising the greater operations. One who performs any operation. To be a good operator, the surgeon must be well acquainted with anatomy, and be possessed of strong nerve. See Surgeon.

OPERCULUM ASPERÆ ARTERIÆ, Larynx—*o. Ilei*, Baulin, valve of.

OPERIMENTUM PRÆVENTIVUM ABDOMINIS, Peritonæum.

OPHIASIS, Calvities.

OPHIOSGLOSSUM VULGATUM, *Echinos'oglossum*, *Lingua serpent'aria*, *Adder's Tongue*, (F.) *Langue de Serpent*. *Family, Filicoidæ. Sez. Syst. Cryptogamia*. This plant was formerly considered to be vulnerary.

OPHIOPH'AGUS, from *ophis*, 'a serpent,' and *φαγω*, 'I eat.' An epithet for animals, which feed on serpents. Pliny has called certain African tribes by this name.

OPHIORRHIZA MUNGOS, from *ophis*, 'a serpent,' and *ριζα*, 'root.' *Family, Gentianæ. Sez. Syst. Pentandria Digynia*. The name of the plant whose root has been called *Radix Serpent'um*, *Mungos Radix*. The bitter root is much esteemed in Java, Sumatra, &c. for preventing the effects that usually follow the bite of the *naja*, a venomous serpent; with which view it is eaten by the natives. It is, also, a reputed anthelmintic.

OPHIOXYLUM, from *ophis*, 'a serpent,' and *ξύλον*, 'wood.' Serpentine-wood plant.

The OPHIOXYLUM SERPENTI'NUM, *Acave'ria*, *Lignum serpenti'um*, has also been recommended in the bites of serpents, and in intermittents. It is said to be very bitter.

OPHIS, Serpent.

OPHITES, from οφίς, 'a serpent,' *Serpenti'nus*, *Serpentine* or *Black Por'phyry*. This rock was, formerly, worn as an amulet to cure diseases of the head.

OPHROSTAPHYLON, *Bryonia alba*.

OPHRY'S, *Supercilium*.

OPHTHALMAL'GIA, from οφθαλμος, 'the eye,' and αλγος, 'pain.' Pain in the eye.

OPHTHAL'MIA, *Ophthalmi'tis*, from οφθαλμος, 'the eye.' *Oculo'rum inflamma'tio*, *Cauma ophthalmi'tis*, *Ophthalmopo'nia*, *Inflamma'tion of the Eye*, *Ophthalmy*, (F.) *Ophthalmic*, *Catarrhe oculaire*. Three great varieties of ophthalmia, independently of the acute and chronic (which conditions occur in all inflammations,) may be reckoned:—the *Ophthalmia membranarum*, *O. purulenta*, and *O. tarsi*.

The first is characterized by the general symptoms of ophthalmia;—pain and redness of the eye or its appendages; with intolerance of light, and unusual flow of tears: the inflammation being seated chiefly in the coats of the eyeball. It is the *Ophthalmia tarax'is*, *Conjunctivi'tis*, *Ophthalmo-conjunctivitis*, *O. humida*, *O. vera*, *Epiph'ora* (Galen.) *Conjunctival Ophthalm'ia*, *Taraxis*, (Paulus of Ægina,) *Chemosis* (Aëtius,) *O. Chemosis*, *Lachrymose Ophthalmia*.

In the second—*Ophthalmia purulen'ta*, *Blenno'phthal'mia*, *Bleph'aroblennorrhœ'a*, *Ophthalmoblennorrhœa*—the internal surface of the palpebræ associates in the inflammation of the eyeball; and there is a copious secretion of a purulent fluid.

An epidemic and contagious (?) variety of this is the *Ægyptian Ophthalmia*,—as it was called, from its prevalence in Ægypt during the British expedition under Sir Ralph Abercromby. The inflammation, here, is rapid and destructive; granulations shoot from the tunica conjunctiva, and occasionally there is intolerable pain, often succeeded by delirium.

In new-born children, a species of purulent ophthalmia, in which the palpebræ are florid and peculiarly tumid, is by no means uncommon. It seems to be caused by acrid discharges from the mother, applied to the eye of the infant during its exit; or to the stimulus of the light, when the child first opens its eyes.

The third variety—the *Ophthalmia Tarsi*, *Blepharophthal'mia*, *Blepharot'is*, *Blepharoti'tis*, *Blephari'tis*, *Psorophthal'mia*, *O. glutino'sa*, *Oculi palpebra'rum scabies prurigin'o'sa*, *Adenophthal'mia*—is seated chiefly in the tarsus; the sebaceous crypts secreting a viscid and acrid fluid, that glues and ulcerates its edges, and irritates the eye.

The *Ophthalmia Membranarum*, when slight, requires little treatment: the antiphlogistic regimen—and, particularly, avoiding exposure to light,—being all that is necessary. When more severe, along with this, general and local blood-letting, especially by leeches to the sides of the septum narium, must be employed, so as to make a decided impression on the system: with nauseating doses of antimony, purgatives,

blisters (at some distance from the organ,) refrigerants; and astringents, cold or warm, according to circumstances, to the eye.

In the *Purulent Ophthalmia*, these measures must be still more actively employed, otherwise disorganization will speedily follow:—the granulations, which form on the adnata of the eyelids, may be removed with the scissors, and the sore touched with a solution of alum.

The *Ophthalmia Tarsi* must be treated on general principles, when severe. It usually, however, requires merely the antiphlogistic regimen, with the occasional use, especially at night, of a slightly stimulating ointment; such as the unguentum hydrargyri nitrico-oxydi, considerably reduced with lard. The ointment prevents the eyelids from being glued together, during the night, and thus obviates the irritation caused by attempts at separating them.

OPHTHALMIA CHRONICA, Lippitudo—o. Rheumatic, Sclerotitis—o. Sicca, Xerophthalmia—o. Varicose, Cirsophthalmia.

OPHTHALMIATER, Oculist.

OPHTHAL'MIC, *Ophthalm'icus*, from οφθαλμος, 'the eye.' That which relates or belongs to the eye.

The OPHTHALMIC ARTERY, *A. orbitaire*, (Ch.) arises from the internal carotid, and issues from the cranium by the foramen opticum. At first, it is situate at the outer and lower side of the optic nerve, but ascends above this nerve, and passes towards the inner angle of the orbit. It furnishes, in its course, the *lacrimal*, *centralis retinae*, *infra-orbitars*, *ciliaries*, *anterior ciliaries*, *inferior and superior musculars*, *anterior and posterior ethmoidals*, and *superior and inferior palpebrals*. After having given off these, it divides into two branches—the *frontal* and *nasal*, which furnish a number of ramifications,—some superficial, others deep-seated.

The OPHTHALMIC VEIN has the same arrangement as the artery, which it accompanies in all its divisions. It issues from the orbit at the inner part of the sphenoidal fissure, and discharges its blood into the cavernous sinus.

The name *Facial Ophthalmic* has been given to the branch, by which the facial vein communicates with the ophthalmic.

The OPHTHALMIC NERVE, or *Ophthalmic Nerve* of Willis, *Or'bito-frontal*, (Ch.) is the smallest and first of the three branches given off by the 5th pair. It proceeds along the external paries of the cavernous sinus, and enters the orbit by the sphenoidal fissure. It divides into three branches: one, *external*—the *lacrimal* nerve; another, *superior*—frontal nerve, and the last, *internal*—the nasal nerve. See *Lacrimal*, *Frontal*, *Nasal*.

The OPHTHALMIC GANGLION, *Lentic'ular G.*, *G. orbitaire*, (Ch.) is one of the smallest ganglions of the body. It is situate at the outer side of the optic nerve, near the bottom of the orbit; is irregularly quadrilateral and flat: its colour being of a reddish gray. Behind, it communicates by its posterior angles—by means of nervous filaments—with the nasal nerve of the ophthalmic and the motor oculi. Each of its anterior angles furnishes a fasciculus of small nerves. These are the ciliary nerves.

AN OPHTHALMIC OR OPTIC REMEDY, (F.)

*Toripue ophthalmique*, is a medicine employed in ophthalmia.

OPHTHALMICA, *Euphrasia officinalis*.

OPHTHALMICI EXTERNI, *Motores oculorum*.

OPHTHALMITIS, *Ophthalmia*.

OPHTHALMO-BLENNORRHEA, *Ophthalmia (purulent)*.

OPHTHALMO-CARCINOMA, from *οφθαλμος*, 'the eye,' and *καρκινωμα*, 'cancer.' Cancer of the eye.

OPHTHALMOCELE, *Exophthalmia*.

OPHTHALMODYNIA, from *οφθαλμος*, 'the eye,' and *οδυνη*, 'pain,' especially rheumatic pain of the eye. Plenck has given this name to neuralgia of the frontal nerve, in which the pain irradiates, particularly, towards the bottom of the orbit. See Neuralgia, Frontal.

OPHTHALMODYNIA PERIODICA, *Neuralgia, facialis*.

OPHTHALMOGRAPHY, from *οφθαλμος*, 'the eye,' and *γραφη*, 'a description.' The part of anatomy which gives a description of the eye. An anatomical description of the eye.

OPHTHALMOL'OGY, (F.) *Oculistique*, from *οφθαλμος*, 'the eye,' and *λογος*, 'a discourse.' The part of anatomy which treats of the eye. An anatomical treatise on the eye. A description of the eye in health and in disease.

OPHTHALMOMETER, from *οφθαλμος*, 'the eye,' and *μετρον*, 'measure.' An instrument of the nature of compasses, invented by F. Petit, for measuring the capacity of the anterior and posterior chambers of the eye in anatomical experiments.

OPHTHALMOPLEGIA, from *οφθαλμος*, 'the eye,' and *πλησσω*, 'I strike.' Paralysis of one or more of the muscles of the eye.

OPHTHALMOPONIA, *Ophthalmia*.

OPHTHALMOP'TOSIS, from *οφθαλμος*, 'an eye,' and *πτωσις*, 'a prolapse.' A word, employed by some authors in the sense of exophthalmia (q. v.); by others, in that of hydrophthalmia (q. v.)

OPHTHALMORRHAGIA, from *οφθαλμος*, 'the eye,' and *ρηγνυμι*, 'I break forth.' Hemorrhage from the tunica conjunctiva. It is rare.

OPHTHALMOS, *Eye*.

OPHTHALMOSCOPIA, from *οφθαλμος*, 'the eye,' and *σκοπεω*, 'I regard attentively.' The art of judging of the temperament, &c., of a person, by examining his eyes. The art of judging of health or disease by inspection of the eyes.

OPHTHALMOSTA'TUM, from *οφθαλμος*, 'the eye,' and *στασις*, 'station.' *Spectulum Oculi*. An instrument for fixing the eye.

OPHTHALMOT'OMY, *Ophthalmotomia*, from *οφθαλμος*, 'the eye,' and *τεμινω*, 'I cut.' The part of anatomy which treats of the dissection of the eye. It has, also, been applied to extirpation of the eye.

OPHTHALMOX'YSIS, from *οφθαλμος*, 'the eye,' and *ξυω*, 'I scrape.' A name given to the scarifications sometimes practised on the conjunctiva, in cases of ophthalmia.

OPHTHALMOXYS'TRUM. An instrument for scraping the eye. Name given to a small brush, with barbs like an ear of barley or rye,

intended to scarify the eyelids in certain cases of ophthalmia.

OPIANE, *Narcotine*.

OPIAT, *Opiate*—o. *Dentifrice*, *Dentifrice*.

OPIATE, *Opiatum*, (F.) *Opiat*, from *οπιον*, 'opium.' A medicine containing opium. A medicine that procures sleep. An *electuary*. Formerly, an electuary, which contained opium. In this sense, the *Codex* of Paris retains it.

OPIATUM FEBRIFUGUM,—*Electuarium de Kinâ-Kinâ; Electuary of Cinchona*. (*Pulv. cinch.* ʒxviij, *ammon. muriat.* ʒj, *mellis, syrup. absinth.* aa ʒij. Make into an electuary. *Ph. P.*) Given, when cinchona is indicated.

OPIATUM MESENTERICUM, *Electuarium de Aloe, Muriate Hydrargyri et Ferrô*. (*Gumm. ammon.* ʒss, *sennæ cotrin.* aa ʒij, *pulv. scammon. comp. (vulg. de tribus) rhaj.* rad. aa ʒijj, *ferrî limatur. porphyrisat.* ʒss. Bruise and mix together, add compound *syrup* of apples double the weight of the other matters, and make into an electuary. *Ph. P.*) Dose, ʒss to ʒij, in obstructions of the liver, mesentery, &c.

OPION, *Opium*.

OPISTHENAR, *οπισθεναρ*, from *οπισθε*, 'backwards,' and *θεναρ*, 'the flat of the hand.' The back of the hand.

OPISTHOCEPHALON, *Occiput*.

OPISTHOCRANIUM, *Occiput*.

OPISTHOCYPHOSIS, *Cyphoma*.

OPISTHONOS, *οπισθοστος*, *Raptus postergad'neus, Tetanus dorsalis, T. posticus, T. postergad'neus*, from *οπισθε*, 'backwards,' and *τεινω*, 'I stretch.' A species of tetanus, in which the body is bent backwards.

OPIUM, see *Papaver*.

OPIUM COLATUM, *Extractum opii*—o. *Depuratum, Extractum opii*.

OPOBALSAMUM. See *Amyris Opobalsamum*.

OPOCARPASON, *Carpasium (juice)*.

OPODELDOCH, *Opodeltoch*. An unmeaning term, frequently used by Paracelsus. Formerly, it signified a plaster for all external injuries; now, it is applied to the Linimentum Saponis Compositum, (q. v.)

OPODELDOCH, STEER'S. A liniment, called after the inventor. There are many formulæ for its preparation. The following is one. *Sap. alb.* lbj, *camphor* ʒij, *ol. rosmarinî* ʒiv, *spiritus vini rectificati* lbj. See *Linimentum Saponis compositum*.

OPOIOS, *Optic*.

OPOPONACUM, *Pastinaca oporonax*.

OPOPONAX. See *Pastinaca oporonax*.

OPOPONAXWORT, *Pastinaca oporonax*.

OPO'RICÉ, *οπιωρικη*, from *οπωρα*, 'autumnal fruits.' A medicine, composed of several autumnal fruits, particularly of quinces, pomegranates, &c., and wine. It was formerly administered in dysentery, diseases of the stomach, &c.

OPOS, *Extract*—o. *Silphion, Laserpitium*.

OPILATIO, *Emphraxis*.

OPILATIVUS, *Obstruens*.

OPPO'NENS, (F.) *Opposant*. That which faces or is put in opposition to something. The name has been given to two muscles of the hand.

OPPONENS POL'ICIS, *Flexor ossis metacarpi pollicis, Opponens pollicis manus, Flexor primæ*

*interno'dii* (Douglas), *Antith'cnar* sive *semi-interosscus pollicis*, *Carpo-metacarpica du pouce* (Ch.), *Métacarpien du pouce*, (F.) *Opposant du Pouce*. A small, flat, triangular muscle, situate in the substance of the *thenar* eminence. It is attached, on the one hand, to the anterior annular ligament of the carpus and to the trapezium; and, on the other, to the whole of the outer margin of the first metacarpal bone. This muscle impresses on the first bone of the metacarpus a movement of rotation, which opposes the thumb to the other fingers.

OPPONENS MINIMI DIGITI, *Carpo-metacarpica du petit doigt* (Ch.) *Métocarpien du petit doigt*, (F.) *Opposant du petit doigt*. This muscle has the same shape and arrangement as the preceding, but is of less size. It is situate in the hypothenar eminence. Its fibres are inserted into the anterior annular ligament of the carpus, and terminate on the whole length of the inner edge of the 5th metacarpal bone. This muscle carries the 5th metacarpal bone forwards, and outwards, and thus augments the concavity of the palm of the hand.

OPPOSANT, *Opponens*—*o. du petit doigt*, *Opponens minimi digiti*—*o. du pouce*, *Opponens pollicis*.

OPPRESSIO, *Catalepsy*—*o. Nocturna*, *In-cubus*.

OPPRESSION, *Oppres'sio*, *Thlipsis*, *Cata-thlip'sis*. A state, in which the patient experiences a sensation of weight in the part affected. When employed abstractedly, it means, particularly, *oppression of the chest*—*Oppressio Pectoris*, (F.) *O. de Poitrine*.

OPPRESSION, (F.) *Oppression des forces*, *Oppres'sio vir'ium*, is, also, used for that condition, at the commencement of fevers, &c., in which the system is oppressed rather than debilitated, and where the vascular action rises, as the obstruction to free circulation is relieved by bleeding, purging, &c.

OPS, Eye.

OPSIALGIA, *Neuralgia facia*.

OPSIONU'SI, from *opsis*, 'vision,' and *ovos*, 'a disease.' *Morbi visus*. Diseases of vision.

OPSIS, Vision.

OPSOMANIA, *Opson'anes*, (F.) *Opsomane*, from *opsis*, 'aliment,' and *mania*. One, who loves some particular aliment to madness.

OPTESIS, *Assatio*.

OPTIC, *Opt'icus*, *Opt'opios*, from *optoma*, 'I see.' That which relates to vision.

FORAMEN OPTICUM, (F.) *Trou optique*. A round opening in the sphenoid bone, near the base of its lesser ala, through which the optic nerve passes.

OPTIC NERVE, *Nervus opt'icus*, *Par secun'dum seu opt'icum* seu *visu'rium*, *Nerve of the 2d pair*, *Nervus visivus* seu *visorius*, *Ocular nerve of Chaussier*. These nerves are remarkable for their size; for their running a longer course within, than without, the cranium; and for their furnishing no branch from their origin to their termination. They do not seem to arise, as was long supposed, from the optic thalami, but from the tubercula quadrigemina. Immediately after their origin they proceed forwards; are, at first, broad and flat; but afterwards become narrower and round. In front of the fossa pituitaria, they unite and decussate, each nerve

proceeding through the optic foramen with the ophthalmic artery. The nerve passes to the back part of the globe of the eye, becomes narrower, and enters that organ to give rise to the nervous expansion called the Retina, (q. v.)

Besides its neurilema, the optic nerve is surrounded by a sheath, furnished by the dura mater. This accompanies it as far as the eye.

The optic nerve is the nerve of special sensibility of the eye.

OPTICO - TROCHLEI - SCLÉROTICIEN, *Obliquus superior oculi*.

OPTILOS, Eye.

OPUNTIA, *Cactus opuntia*.

OR, Gold.

ORACH, STINKING, *Chenopodium vulvaria*.

ORANGE, FLOWERS OF THE, see *Citrus aurantium*—*o. Tree*, *Citrus aurantium*.

ORANGEADE (F.) A drink, made with orange juice diluted with water. It is antiphlogistic, and often recommended in acute diseases.

ORANGES, see *Citrus aurantium*—*o. Curasson*, *Aurantia curassaventia*.

ORBICULAIRE DES LÈVRES, *Orbicularis oris*—*o. des Paupières*, *Orbicularis palpebrarum*.

ORBICULAR, *Orbicula'ris*, from *orbis*, 'a circle.'

The OS ORBICULA'RE seu *lenticulare* seu *Sylvii* seu *orbicula're Sylvii*, *Globulus stapedis ossis*, *Epiph'ysis cruris longioris incurvis*, is the smallest of the four bones of the ear. It is scarcely perceptible, round, convex on two surfaces, and situate between the long ramus of the incus and the head of the stapes.

ORBICULAR MUSCLES are muscles with circular fibres surrounding some natural opening of the body.

1. ORBICULARIS ORIS, *Sphincter Labio'rum*, *Semi vel Demi-orbicula'ris*, *Supra-semi-orbicula'ris*, *Constrictor Oris*, *Lobialis*, *Osculato'rius*, *Basia'tor*, (F.) *Labial*, *Orbiculaire des lèvres*. A muscle situate in the substance of the lips, and, extending from one commissure to the other. It is formed of two very distinct portions; of a semi-oval shape; one belonging to the upper lip, the other to the lower. Their extremities cross at the commissures, and are confounded with the other muscles of the parts. The use of this fleshy muscle is to bring the lips together, and to close the aperture of the mouth, by making it represent a sort of *Bourrelet* (q. v.) with radiated wrinkles. It is an antagonist to every other muscle of the lips.

ORBICULARIS PALPEBRARUM, *Orbicularis oculi*, *Orbicularis palpebrarum cilia'ris*, *Palpebrarum duo musculi*, *Maxillo-palpebral*, *Palpebralis*, *Constrictor palpebrarum*, *Sphincter Palpebrarum* seu *Oculi*, *Naso-palpebral* (Ch.) (F.) *Palpebral*, *Orbiculaire des paupières*. A muscle common to both the eyelids, and seated in their substance. It is broad, thin, transversely oval, and cleft in its great diameter. It is attached to the nasal process of the superior maxillary bone; to the internal angular process of the frontal bone, and to the orbital process of the superior maxillary bone. From these origins the muscle passes outwards, under the skin of the eyelids, surrounding the orbit in a circular manner, extending some-

what beyond it, and covering the upper part of the cheek. It is inserted into the skin of the eyelids, its upper and inner edge being intimately connected with the frontal and corrugator muscles. Its use is to close the eye, by bringing the eyelids together.

The part of the orbicularis, which covers the cartilages of the eyelids, and which is remarkably thin, is the *Musculus Ciliaris* of some authors.

ORBICULARIS OCULI, O. palpebrarum—  
—O. Recti, Sphincter ani externus.

ORBIT, *Or'bita*, *Trochia*, from *orbis*, 'a circle.' The circular cavities are so called, which lodge the organs of sight. The *orbis* or *orbital fossæ* or *cavities*, *conchi*, *κογχοί*, are situate at the upper part of the face, and are composed of seven bones, viz:—the *frontal*, above; the *palate* and *superior maxillary*, below: the *sphenoid* and *malar*, externally, and the *ethmoid* and *lacrimal*, internally.

The orbit is filled by the globe of the eye, with its different accessory parts—muscles, nerves, vessels, the lacrimal gland, &c.

ORBITAL FISSURE, SUPERIOR, Sphenoidal fissure—O. Fissure, inferior, Maxillary fissure.

ORBITAR, *Orbitarius*, *Orbitalis*; same etymon. Relating or belonging to the orbit.

The ORBITAR ARCH, (F.) *Arcade orbitaire*, is the projecting, round, margin, which separates the *frontal* and *orbital* surfaces of the os frontis; and forms part of the circumference of the orbit.

The ORBITAR APOPH'YSES or PROC'ESSES terminate the two extremities of the orbitar arch. The *external* is much more prominent, and is articulated with the cheek bone; the *internal* is thinner, and joins the os unguis.

The ORBITAR FORAM'INA. Of these there are several:—

1. The *Foramen orbitarium superius*, (F.) *Trou orbitaire supérieur*, is situate at the junction of the inner third of the orbitar arch with its two outer thirds, and gives passage to the frontal nerve.

2. The *Foramina orbitaria interiora vel interna*, *Foramina ethmoidea*. These are situate at the upper part of the internal paries of the orbit, and are formed by the union of two notches of the os frontis with two similar ones of the ethmoid; and are distinguished into *anterior* and *posterior*. The former gives passage to the ethmoidal filament of the nasal nerve and to a small artery.

The ORBITAR FISSURES, (F.) *Fentes orbitaires*. These are situate in the orbit. They are two in number: one *superior*, the Sphenoidal, (q. v.); the other *inferior*, Sphenomaxillary, (q. v.)

The ORBITAR NERVE, *Nervus orbitalis* seu *orbitarius*, is a branch given off from the superior maxillary. It enters the orbit by the sphenomaxillary fissure, and divides into two filaments; the one—*malar*—which passes over the cheek bone, is distributed to the orbicularis palpebrarum, and anastomoses with the facial nerve; the other—*temporal*—which passes to the temporal fossæ and anastomoses with the inferior maxillary and facial, to become afterwards subcutaneous.

ORBITO-EXTUS SCLÉROTICIEN, Rectus externus oculi—O. *Intus-scléroticicn*, Rectus internus oculi—O. Maxillo-labial, Levator labii superioris proprius—O. *Palpebræ*, Levator palpebræ superioris—O. *Sus-palpebræ*, Levator palpebræ superioris.

ORCANETTE, *Anchusa officinalis*.

ORCHEA, Scrotum.

ORCHEOCATABASIS, Orchidocatabasis.

ORCHEOCELE, Orchiocele.

ORCHEOTOMY, Castration.

ORCHIDOCATAB'ASIS, *Orchocatab'asis*, from *ορχις*, 'the testis,' and *καταβασις*, 'descent.' The descent of the testes into the scrotum.

ORCHIDOCELE, Hernia humoralis.

ORCHIDONCUS, Hernia humoralis.

ORCHIDOTOMY, Castration.

ORCHILL, Lichen roccella.

ORCHIOCE'LE, *Orcheocel'le*, from *ορχις*, 'the testicle,' and *κηλη*, 'a rupture.' A tumour of the testicle. Hernia humoralis, (q. v.) A name given to several diseases of the testicles and its envelopes, essentially differing from each other.

ORCHIS, Testicle—O. Butterfly, O. bifolia.

ORCHIS MAS'CU'LA, *Satyri'on*, *Male Orchis*, *Testiculus caninus*, *Cynosorchis*, *Dogs' stones*, *Male Fools' stones*. The root has had a place in some pharmacopeias, on account of the glutinous, slimy juice it contains. The root of the *Orchis bifolia* or *Butterfly orchis* has likewise been collected. It has been used as a demulcent. Its fancied aphrodisiac virtues seem to be owing to its resemblance to *ορχις*, 'a testicle,' whence its name.

The *Salep* is obtained from a variety of the orchis;—the *Orchis morio*. See *Salep*.

ORCHITIS, Hernia humoralis.

ORCHOL. See *Tarsus*.

ORCHOTOMIA, Castration.

ORDINAIRES, Meuses.

ORDONNANCE, Formula, Prescription.

OREILLE D'HOMME, *Asarum*—O. *dc Souris*, *Hieracium pilosella*.

OREILLETTE, *Asarum*, Auricle of the heart.

OREILLON, Parotis, Cynanche parotidæa.

ORELIA GLANDIFLORA, *Allamanda*.

OREOSELINUM, *Athamanta aureoselinum*—O. *Africanum*, *Bubon galbanum*.

OREXIS, appetite.

ORGAN, *Or'ganum*, *Or'ganon*. An instrument. Part of an organized being, destined to exercise some particular function. Thus—the eyes are organs of sight; the muscles are organs of motion, &c. The collection of organs, which concur in any function, is called apparatus, (q. v.)

ORGANA GENERATIONI INSERVIENTES, Genital organs.

ORGANES GÉNITAUX, Genital organs.

ORGAN'IC, *Organ'icus*, relating to an organ or organs. It is also used synonymously with *vital*, in contradistinction to *physical*.

ORGANIC DISEASES or LESIONS are such as concern the organ itself, in contradistinction to *functional*, which merely concern the function. Of course, *organic* diseases of a part are always more serious than *functional*.

ORGANISM. Same etymon. Many physiologists have used this word synonymously

with organization; but more especially to designate the aggregate of forces which govern organized beings, animals as well as vegetables.

**ORGANIZA'TION.** *Organisatio*, from *organon*, 'an organ.' The manner of structure proper to different beings. The collection of parts composing an organized body, and the laws which govern it. It is also employed in the sense of the structure of a part; as, the *organization of the heart*, &c.

**ORGANIZATION, COMPOUNDS OF, Principles, immediate.**

**ORGANIZED,** *Organis instructus*. That which is composed of organs.

**ORGANIZED BODIES,** (F.) *Corps organisés*, are those endowed with life; i. e. animals and vegetables; in opposition to *inorganic* bodies, which term comprises the mineral kingdom.—See *Corpus*.

**ORGANOGRAPHY,** *Organographia*, from *organon*, 'an organ,' and *γραφη*, 'a description.' A description of the organs of a living body.

**ORGANOLOGY,** Anatomy, Craniology.

**ORGANON OLFAC'TŪS,** *Nasus*.

**ORGASM,** *Organismus, Orgōsis*, from *organon*, 'I desire ardently.' State of excitement and turgescence of any organ whatever. Applied particularly to the genital organs.

**ORGASMUS,** Tergescence.

**ORGASTICA.** Same etymon. The second order of the glass *Genetica* of Good. Defined: diseases affecting the orgasm; organic or constitutional infirmity disordering the power or the desire of procreating.

**ORGE,** Rage.

**ORGE,** *Hordeum*—*o. Perlé*, see *Hordeum*.

**ORGELET,** *Hordeolum*.

**ORGEOLET,** *Hordeolum*.

**ORGOSIS,** *Orgasm*.

**ORICHALCUM,** *Brass*.

**ORICULAR,** *Auricular*.

**ORICULE,** *Pavilion of the ear*.

**ORIFICIUM DEXTRUM VENTRICULI,** *Pylorus*.

**ORIG'ANUM,** *Origanum vulgare, Cuni'la bubula, Marjorana manevra'na, O. heracleoticum, Zazarhen'di herba, Wild mar'joram, Common marjoram, Mancura'na*, (F.) *Pied de lit. Family, Labiatæ. Sec. Syst. Didynamia Gymnospermia*. This plant resembles marjoram in smell; and has a pungent taste, much like thyme. It is aromatic and stimulant; and its oil possesses the properties of the essential oils in general. The oil is very pungent, and is rarely given internally. It is used in toothache.

**ORIGANUM AQUATICUM,** *Eupatorium cannabinum*—*o. Creticum, O. dictamnus*.

**ORIGANUM DICTAM'NUS,** *Dictamnus Creticus, O. Creticum, On'itis, Dit'an'y of Crete*, (F.) *Dictamne de Crête*. The leaves of this plant were once recommended as emmenagogue and alexipharmic.

**ORIGANUM HERACLEOTICUM,** *Origanum*.

**ORIGANUM MAJORA'NA,** *Marjorana, O. majoranoides, Majorana, Sweet marjoram, Samp'sucus, Agriorig'num, Amar'acus*, (F.) *Marjolaine*. Its odour is strong and fragrant; taste aromatic and bitterish. Its properties are those of a stomachic and errhine. It is chiefly used,

however, for culinary purposes, and as a snuff in headache.

**ORIGANUM SYRIACUM,** *Teucrium marum*.

**ORIGINAIRE,** (F.) This term has been used, by French writers, in the same sense as *congenital*. It is particularly applied to affections depending upon faulty conformation, or to faulty conformation itself.

**ORME,** *Appetite*.

**ORME,** *Ulnus*.

**ORMSKIRK MEDICINE.** A celebrated antilyssic remedy, supposed to consist of *Puls. Crete*,  $\frac{3}{4}$ ss; *Bol. Armen.*  $\frac{3}{4}$ ij; *Alumin.* gr. x; *Puls. Inula*  $\frac{3}{4}$ j; *Ol. Anisi*,  $\frac{3}{4}$ tt. vj.

This is taken for a dose every morning for six times, in a glass of water, with a small proportion of fresh milk.

**ORNITHOGALUM MARITIMUM,** *Scilla*.

**ORNUS SYLVESTRIS,** *Fraxinus excelsior*.

**OROBAN'CHE VIRGINIA'NA,** *Virginia broom rape, Beech-drops, Cancer-root. Family, Orobanchoidæ*. This plant is astringent, and a peculiar and extremely nauseous bitter. It is most powerful when fresh. It has been used in dysentery; and, externally, to obstinate ulcers.

**OROBÉ,** *Ervum ervilia*.

**OROBION.** See *Ervum ervilia*.

**OROBOD'ES,** from *οροβος*, 'the orobus,' and *ειδος*, 'form.' Having the shape of the orobus. A name given to the sediment in urine, when of a fawn colour,—like the orobus.

**OROBUS,** *Ervum ervilia*.

**ORONGE.** See *Agaric*.

**ORPIMENT,** *Awipigmentum, Orpin, Risi-gal'tum, Cloanz, Elome, Sira, Lempius, Speculum citrinum, Yrides, Yride*. The native yellow sulphuret of arsenic. It is poisonous, but less so than the oxide. It is, also, called *Adarigo, Adarnoch, Ahusal, Altharacha, Azarnet*. The Turks prepare a depilatory with it, which they call *Rusma*.

**ORPIN,** *Orpiment*—*o. Brûtant, Sedum*—*o. Grand, Sedum telephium*—*o. Reprise, Sedum telephium*.

**ORPINE,** *Sedum telephium*.

**ORRHOPYG'ION.** The inferior extremity of the vertebral column; from *ορος*, 'extremity,' and *πυγη*, 'the nates.' Also, the raphe, extending from the penis to the anus, and separating the scrotum into two parts.

**ORRHOS,** *Perinaeum, Serum*.

**ORRIS,** *Iris florentina*—*o. Common, Iris germanica*.

**ORSEILLE,** *Lichen roccella*.

**ORTEIL,** *Digitus pedis*.

**ORTHOCOLON,** *Ankylosis*.

**ORTHOCYLLOSIS,** *Ankylosis*.

**ORTHODO'RON.** A measure with the Greeks, equal to eleven finger-breadths.

**ORTHOPÆD'IA,** from *ορθος*, 'right,' and *παις*, 'a child.' The part of medicine, whose object is to correct and prevent deformity in the bodies of children.

**ORTHOPNE'A,** *Suffocatio, Strangulatio, Præfoecatio, Pnix, Pnigmus, Angor, Apnæa*, from *ορθος*, 'right,' 'straight,' and *πνεω*, 'I respire.' Impracticability of breathing in the horizontal posture. Necessity of being in the erect posture, in order to respire.

**ORTHOPNEA CONVULSIVA,** *Asthma*—*o. Cy-*

nanchica, Cynanche trachealis—o. Hydrothoracica, Hydrothorax—o. Hysterica, Angone.

**ORTIE**, Urtica—o. *Blanche*, Lamium album—o. *Brûlante*, Urtica urens—o. *Morte*, Lamium album—o. *Morte des Bois*, Galeopsis—o. *Romaine*, Urtica pilulifera.

**ORTYX**, Tetrao coturnix.

**ORVALE**, Salvia sclarea.

**ORVIETANUM**. From the Italian *Orvieta*'no. An electuary regarded as an invaluable antidote, and composed of *Old theriac*, *Dried ripers*, *Scorzonera*, *Carlina*, *Imperatorium*, *Angelica*, *Bistort*, *Rosemary*, *Juniper*, *Cinnamon*, *Cloves*, *Mace*, *Honey*, and a crowd of other substances. Its medical properties resembled, in some respects, those of the theriac. It was so called, according to some, because invented by Orvietano, a celebrated charlatan; or, according to others, from Orvieto, a town in Italy.

**ORY'ZA**, from *Orez*, (Arab.) *Oryza sativa*, Rice, (F.) *Riz*. Family, Gramineæ. Sex. Syst. Hexandria Monogynia. A plant, almost aquatic, and indigenous in China; one of the richest productions of Egypt, and which prospers in the warmer regions of the four quarters of the globe. Its amylaceous seeds nourish more men than those of wheat and rye together. Besides being alimentary, they are demulcent and emollient.

**OS**, Bone, Mouth—o. *Acromii*, *Acromion*—o. *ad cubitale*, *Radius*—o. *Adjutorium*, *Humeri* os—o. *Alæforme*, *Sphenoid*—o. *Alagas*, *Coccyx*, *Sacrum*—o. *Amphideon*, *Os uteri*—o. *Anonyme*, *Innomiatum os*—o. *Anticum*, *Avant bouche*—o. *Arcuale*, *Temporal bone*—o. *Armale*, *Temporal bone*—o. *Asser*, *Sternum*—o. *de l'Assiette*, *Ischion*—o. *Azygos*, *Sphenoid*—o. *Ballistæ*, *Astragalus*—o. *Basilare*, *Occipital bone*, *Palate bone*, *Sacrum*, *Sphenoid*—o. *Baxillare*, *Sphenoid*—o. *Bicorne*, *Hyoides os*—o. *Brachiale*, *Humeri os*—o. *Brachii*, *Humeri os*—o. *Calcis*, *Calcaneum*—o. *Capitatum*, *Magnum os*—o. *Caudæ*, *Occipital bone*—o. *Coccygis*, *Coccyx*—o. *Coliforme*, *Ethmoid*—o. *Convolutum superius*, *Turbinated bone*, *middle*—o. *Coronale*, *Frontal bone*—o. *Coxæ*, *Innomiatum os*—o. *Cozal*, *Innomiatum os*, *Ischion*—o. *Criblerux*, *Ethmoid*—o. *Cribriforme*, *Ethmoid*—o. *Cribrorum*, *Ethmoid*—o. *Crochu*, *Os unciniforme*.

**OS CROTOPHALE**. A name, given by M. Béclard, to a bone sometimes met with at the anterior and inferior angle of the parietal bone; from *κροταφος*, 'the temple.'

**OS CUBITI INFERIUS**, *Ulna*—o. *de la Cuisse*, *Femur*—o. *Cuneiforme*, *Sphenoid*—o. *Cuneo comparatum*, *Sphenoid*—o. *Durum*, *Temporal bone*—o. *Ensiforme*, *Sternum*.

**OS EPACTALE**. A name given to one of the ossa Wormiana; particularly to one met with in the posterior fontanelle, and which has been described by G. Fischer, under the name, *Os epactale sive Goethianum*.

**OS EPACTAUX**, *Wormiana ossa*.

**OS EXTERNUM**. The entrance into the vagina, in contradistinction to the *Os internum*, or *Os uteri*.

**OS EXTRA ORDINEM CARPI**, *Os pisiforme*—o. *Fibrosus*, *Occipital bone*—o. *Foraminulentum*, *Ethmoid*—o. *Frontis*, *Frontal bone*—o. *Genæ*, *Malæ os*—o. *Gladioli*, *Sternum*

—o. *Grand*, *Magnum os*—o. *Grand*, *col du*, *Collum ossis magni*—o. *Grandinosum*, *Cuboid*—o. *Gutturis*, *Hyoides os*—o. *Hamatum*, *Os unciniforme*—o. *Hors du rang*, *Os pisiforme*—o. *Hypseloides*, *Hyoides os*—o. *Inconjugatum*, *Sphenoid*—o. *Incudi simile*, *Incus*—o. *Inferius ventriculi*, *Pylorus*—o. *Innominé*, *Innomiatum os*—o. *Intercalés*, *Wormiana ossa*—o. *Internum*, *Os uteri*—o. *Inverecundum*, *Frontal bone*—o. *Ischii*, *Ischion*—o. *Jugale*, *Malæ os*—o. *Jugamentum*, *Malæ os*—o. *Juguli*, *Clavicle*—o. *Lachrymale*, *Unguis os*—o. *Lambda*, *Occipital bone*—o. *Lambdoides*, *Hyoides os*, *Occipital bone*—o. *Lapideum*, *Temporal bone*—o. *Lenticulare*, *os orbiculare*, *Os pisiforme*—o. *Lepidoides*, *Temporal bone*—o. *Linguae*, *Hyoides os*—o. *Linguale*, *Hyoides os*—o. *Lithoides*, *Temporal bone*—o. *Magnum*, *neck of the*, *Collum ossis magni*—o. *Malaire*, *Malæ os*—o. *Maxillæ superioris undecimum*, *Vomer*—o. *Maxillaire inférieure*, *Collum mandibulæ*—o. *Memoriæ*, *Occipital bone*—o. *Mendosum*, *Temporal bone*—o. *Morsus Adami*, *Thyroid cartilage*—o. *Mucronatum*, *Xiphoid cartilage*—o. *Multangulum majus*, *Trapezium os*—o. *Multangulum minus*, *Trapezoides os*—o. *Multiforme*, *Ethmoid*, *Sphenoid*—o. *Nasaux*, *Nasal bones*—o. *Naviculare*, *Os scaphoides*—o. *Nervale*, *Temporal bone*—o. *Nervosum*, *Occipital bone*—o. *Occipitis*, *Occipital bone*—o. *Orbiculare*, *Os pisiforme*—o. *du Palais*, *Palate bone*—o. *Palati*, *Palate bone*—o. *Palatin*, *Palate bone*—o. *Papillare*, *Sphenoid*—o. *Pectinis*, *Pubis*, *os*—o. *Pectoris*, *Sternum*—o. *Pelvicephalicum*, *Occipital bone*—o. *Perone*, *Fibula*—o. *Petrosum*, *Temporal bone*—o. *Poly-morphon*, *Sphenoid*—o. *de la Pommette*, *Malæ os*—o. *Posterum*, *Pharynx*—o. *Præruptæ rupi assimilatum*, *Temporal bone*—o. *Procubitale*, *Ulna*—o. *Propres du nez*, *Nasal bones*—o. *Pro-ræ*, *Occipital bone*—o. *Puppis*, *Frontal bone*, *Occipital bone*—o. *Pyramidale carpi*, *Trapezoides os*—o. *Pyxidis*, *Occipital bone*—o. *Rationis*, *Frontal bone*—o. *du Rayon*, *Radius*—o. *Sacrum*, *Sacrum*—o. *Saxeum*, *Temporal bone*—o. *Scutiforme*, *Patella*—o. *Sedentarium*, *see Ischiatic*—o. *Semilunare*, *Lunare os*—o. *Sextum cranii*, *Occipital bone*—o. *Sous-ethmoidal*, *Turbinated bone*, *inferior*—o. *Sphæno-basilare*, *Occipital bone*—o. *Sphæcoides*, *Sphenoid*—o. *Sphænoïdale*, *Sphenoid*—o. *Sphenoides*, *Sphenoid*—o. *Spongiosum*, *Ethmoid*—o. *Spongiosum inferius*, *Turbinated bone*, *inferior*—o. *Spongiosum medium*, *Turbinated bone*, *middle*—o. *Spongiosum superius*, *Turbinated bone*, *middle*, *Turbinated bone*, *superior*—o. *Spongoides*, *Ethmoid*—o. *Squamosum*, *Temporal bone*—o. *Sur-numéraires*, *Wormiana ossa*—o. *Sylvii*, *Os orbiculare*—o. *Temporis*, *Temporal bone*—o. *Tessera*, *Cuboid*—o. *Tincæ*, *Os uteri*—o. *Triangulaires*, *Wormiana ossa*—o. *Turbinatum*, *Turbinated bone*, *middle*—o. *Turbinatum inferius*, *Turbinated bone*, *inferior*—o. *Uncinatum*, *Os unciniforme*—o. *Upsilonoides*, *Hyoides os*—o. *Varium*, *Cuboid*—o. *Vesipiforme*, *Sphenoid*—o. *Vomeris*, *Vomer*—o. *Wormiens*, *Wormiana ossa*—o. *Xiphoides*, *Sternum*—o. *Ypseloides*, *Hyoides os*—o. *Zygomatium*, *Malæ os*.

**OS UTERI**, *Os tincæ*, *Protosporos*, *Os internum*, *Os amphidæon seu amphidæum*, *Oscheon*, (F.) *Museau de Tanche*. The mouth of the womb. See Uterus.

OSCHEOCARCINOMA, Cancer, chimney-sweepers'.

OSCHEOCE/LĒ, from *σσχέον*, 'the scrotum,' and *κηλή*, 'tumour.' *Scrotal hernia*. See Bubonocèle. Sauvages uses it in the sense of *Dropsy of the scrotum*. See Hydrocèle.

OSCHEOCELE, Hydrocèle—o. Hydatidosa, Hydatidocèle—o. Seminalis, Spermatocele—o. Varicosa, Varicocele.

OSCHEON, Scrotum, Os uteri.

OSCHEOPHYMA, Hydrocèle.

OSCHEOPLAS'TIC, *Oscheoplas'ticus*, from *σσχέον*, 'the scrotum,' and *πλασσω*, 'I form.' An epithet given to the operation for restoring the scrotum when lost.

OSCHITIS, from *σσχή*, 'the scrotum,' and *itis*, 'inflammation.' Inflammation of the scrotum.

OSCILLATIO, Irritability.

OS'CITANT, (FEVER,) *Febris os'citans*, (F.) *Fèvre oscitante*. A fever, in which the patient is continually yawning.

OSCITATIO, Yawning.

OSCLATORIUS, Orbicularis oris.

OSCUS, Scrotum.

OSEILLE, *Rumex acetosa*—o. *Boucher*, *Rumex scutatus*—o. *Petite*, *Rumex scutatus*—o. *Ronde*, *Rumex scutatus*—o. *Rouge*, *Rumex sanguineus*.

OS'MAZOME, *Os'mozome*, *Matière extractive du Bouillon*, *Extractive of meat*, *Saponaceous extract of meat*; from *οσμή*, 'smell,' and *ζωμος*, 'soup.' M. Thénard has given this name to an extractive matter, contained in muscular flesh and in the blood of animals, which he considers of a peculiar nature. It has an agreeable smell and taste, and is found in *Bouillons* of meat, in the proportion of one part to seven of gelatine. Vauquelin discovered it in some fungi. It is the substance which gives the flavour of meat to soups, and hence its name.

OSME, Odour.

OSMON'OSI, *Osmon'osi*, *Morbi olfactûs*; from *οσμή*, 'odour,' and *νόσος*, 'a disease.' Diseases of olfaction.

OSMOZOME, Osmazome.

OSMUND, ROYAL, *Osmunda regalis*.

OSMUN'DA REGA'LIS, *Filix flor'ida*, *Osmund-royal*. Family, Filicoideæ. This plant was once thought to possess astringent and emmenagogue virtues.

OSORON, Opium.

OSPHRANTICOS, Olfactory.

OSPHRESIOL'OGY, *Ospresiol'ogia*; from *οσφρησις*, 'odour,' and *λογος*, 'a discourse.' A treatise on olfaction and odours.

OSPHRESIS, Olfaction.

OSPHYALGIA, Coxalgia.

OSPHY'TIS, from *οσφυς*, 'the hip,' and *itis*, denoting inflammation. Inflammation of the parts about the hip.

OSPHYS, Lumbi.

OSSA BREGMATIS, Parietal bones—o. *Convoluta inferiora*, Turbinated bones, inferior—o. *Digitorum manus*, Phalanges of the fingers—o. *Digitorum pedis*, Phalanges of the toes—o. *Epactalia*, Wormiana ossa—o. *Maxillæ superioris quarta seu quinta seu secunda*, Nasal bones—o. *Nasalia*, Nasal bones—o. *Nasi*, Nasal bones—o. *Nervalia*, Parietal bones—o. *Sincipitis*, Parietal bones—o. *Spongiosa*, Turbinated bones

—o. *Tertia maxillæ superioris*, Turbinated bones—o. *Triangularia*, Sphenoidal cornua—o. *Triangularia Blasii*, Wormiana ossa—o. *Triquetra*, Wormiana ossa—o. *Turbinata*, Turbinated bones—o. *Verticalia*, Parietal bones.

OSSELETS DE L'OREILLE, Ossicula auditus.

OSSICULA NASI, Nasal bones.

OSSIC'ULUM, *Ostarion*. Diminutive of *os*, a bone:—a small bone.

The name OSSIC'ULA AUDI'TUS, O. AURIS, (F.) *Osselts de l'oreille*, *O. de l'ouïe*, has been given to the four small bones situate in the cavity of the tympanum, and forming an uninterrupted chain from the membrane of the tympanum to that of the fenestra ovalis. They are four in number; and their series, from without to within, is as follows, *Malleus*, *Incus*, *Os orbiculare*, *Stapes*, (q. v.)

OSSICULUM INCUDI COMPARATUM, *Incus*—o. *Malleolo assimilatam*, *Malleus*—o. *Molari denti comparatum*, *Incus*.

OSSIFICATION, *Ossifica'tio*; from *os*, 'a bone,' and *fa'cere*, 'to make.' *Ostoge'nia*, *Osteogen'esis*, *Osteo'sis*. Formation of bones. Development, or increase of the osseous system. Ossification takes place in the same manner as the nutrition of other organs. The bones are, at first, mucous, and afterwards cartilaginous; the cartilage, at length, receives the phosphate of lime, and is, at the same time, replaced by a gelatinous parenchyma, when the bone has acquired the whole of its development.

OSSIFICATION, POINTS OF, *Puncta ossifica'tionis*, are the points where the ossification of a bone commences, whence it extends to other parts. Almost all the bones present a greater or less number of points of ossification.

Besides the natural ossification, which we observe in the fœtus and in the first periods of life, there are, also, *acciden'tal ossifications*, such as those frequently remarked, after the inflammation of serous membranes, in the parietes of arteries, and to which the terms *Osthex'ia*, *incrusta'tion*, or *pcrtrifac'tion* have, sometimes, been applied.

OSSIFRAGA, Osteocolla.

OSSIS SACRI ACUMEN, Coccyx.

OSSISANA, Osteocolla.

OSSIVOROUS, from *os*, 'a bone,' and *voros*, 'I devour.' A species of tumour, mentioned by Ruysch, which destroys the bone.

OS'TAGRA, *Ostagra*, from *οστέον*, 'a bone,' and *αγχα*, 'seizure.' A forceps to cut or remove portions of bone.

OSTALGI'TIS, *Osti'tis*, from *οστέον*, 'a bone,' and *itis*. Inflammation of the bones; characterized by violent shooting and lancinating pains in the bones.

OSTEAGRA, Ostagra.

OSTEALGIA, Osteocopus.

OSTEITES, Osteocolla.

OSTEMPYE'SIS, *Osteëmpye'sis*, *Ostempyo'sis*, from *οστέον*, 'a bone,' and *εμπυσις*, 'effusion of pus.' An abscess in the interior of a bone.

OSTEMPYOSIS, Ostempyosis.

OSTEOCE/LĒ, from *οστέον*, 'a bone,' and *κηλή*, 'a tumour.' A hernia, in which the sac is cartilaginous and bony. A rare case.

**OSTEOCOLLA**, from *οστέον*, 'a bone,' and *κόλλα*, 'glue.' *Glue-bone, stone or bone binder, Ossifraga, Holos'teus, Ossisid'na, Ostri'tes, Ostei'tes, Amos'teus, Osteol'ithos, Stelochi'tes.* A name given to a petrified carbonate of lime, found in some parts of Germany and other portions of the globe; so called, because it was supposed to possess the power of favouring the formation of callus in fractures. It is the *Chaux carbonatée concrétionnée incrustante* of Haüy. Not used.

**OSTEOC'OPUS**, *Osteal'gia, Osteody'nia*, from *οστέον*, 'a bone,' and *κόπος*, 'fatigue.' An epithet given to pains felt in bones, which are commonly owing to constitutional syphilis.

**OSTEODYNIA**, Osteocopus.

**OSTEOGENIA**, Ossification.

**OSTEOGRAPHY**, *Osteogra'phia*, from *οστέον*, 'a bone,' and *γραφειν*, 'to describe.' Description of the bones. The part of anatomy which describes the bones.

**OSTEOLITHOS**, Osteocolla.

**OSTEOL'OGY**, *Osteologia*, from *οστέον*, 'a bone,' and *λογος*, 'a discourse.' The part of anatomy which treats of bones.

**OSTEOMALACIA INFANTUM**, Rachitis, Mollities ossium.

**OSTEON**, Bone—o. Hieron, Sacrum.

**OSTEON'OSI**, *Osteonu'si*, from *οστέον*, 'a bone,' and *ῥοσος*, 'a disease.' Diseases of the bones. *Mor'bi ostium.*

**OSTEOPÆDION**, Lithopædion.

**OSTEOPSATHYROSIS**, Fragilitas ossium.

**OSTEO-SARCO'MA**, *Osteo-sarcosis, Sarcos-to'sis*, from *οστέον*, 'bone,' and *σαρξ*, 'flesh.' Disease of the bony tissue, which consists in softening of its laminae, and their transformation into a fleshy substance, analogous to that of cancer, and which is accompanied with general symptoms of cancerous affection. The word has often, also, been used synonymously with *spina ventosa*.

**OSTEOSARCOSIS**, Mollities ossium.

**OSTEO-STEATOMA**, *Exost'osis steatomat'osis*, from *οστέον*, 'a bone,' and *στεα*, 'suet or fat.' A name given to bony tumours or degenerations, which sometimes belong to osteo-sarcoma; at others to *spina ventosa, exostosis, &c.*

**OSTEOSIS**, Ossification.

**OSTEOT'OMY**, *Osteoto'mia*, from *οστέον*, 'a bone,' and *τεμνειν*, 'to cut.' The part of practical anatomy whose object is the dissection of bones.

**OSTHEXIA**. See Ossification.

**OSTIARIUS**, Pylorus.

**OSTITIS**, Ostalgitis.

**OSTIUM**, *οστέον*, a door. *Orific'ium*, a door or gate;—of the heart, for example. The opening between the auricle and ventricle of each side; *Ostium venosum*, that of the right side; *Ostium arteriosum*, that of the left.

**OSTIUM U'TERI**. The vagina;—the neck of the uterus.

**OSTIUM VENTRICULI DUODENALE SEU PYLORICUM SEU DEXTRUM SEU INFERIUS**, Pylorus.

**OSTOIDEA SUBSTANTIA**, See Tooth.

**OSTREA**, *Ostreum*. The oyster. The oyster is a wholesome article of diet, often advised as analeptic and easy of digestion.

The shells, *TESTÆ OSTREÆ*, (F.) *Écailles d'huîtres*, have been received into the Pharma-

copœias and used medicinally. Their virtues are similar to those of the carbonate of lime. See Creta.

**OSTREUM**, Ostrea.

**OSTRITES**, Osteocolla.

**OSTRUTHIUM**, Imperatoria.

**OSYRIS**, Antirrhinum linaria.

**OTACOUS'TIC**, *Otaeous'ticus*; from *οὐς*, 'the ear,' and *ακουω*, 'I listen.' Any instrument is so called which improves the sense of hearing,—as the different species of trumpets.

**OTAGRA**, Otalgia.

**OTAL'GIA**, *Ot'agra, Otod'ymē*, from *οὐς*, 'the ear,' and *αλγος*, 'pain.' Pain in the ear; *Dolor aurium, earache.* See Otitis.

**OTAL'GIC**, *Otal'gicus*. An epithet for remedies used in otalgia.

**OTEN'CHYTES**, *οτεγχυτης, Oten'chyta*, from *οὐς*, 'the ear,' *εν*, 'into,' and *χυω*, 'I pour.' *Sypho auricul'aris*. A species of syringe, used for injecting the ear.

**OTHONE**, Linteam.

**OTHONIUM**, Linteam.

**OTICUM**. A medicine employed in diseases of the ear.

**GANGLION OTICUM**, *Otic ganglion, Auricular ganglion, Ganglion maxillo-tympanique.* This is a small ganglion, although more than double the size of the ophthalmic, ash-coloured and pulpy like the ganglions of the sympathetic. It is situate in advance of the ganglion of Gasser, on the lower surface of the inferior maxillary nerve at the inner margin of the foramen ovale of the sphenoid bone. See Petrous Ganglion.

**OTIRRHŒA**, *Otorrha'a, Blen'notorrhæ'a*, (F.) *Catarrhe de l'oreille*, from *οὐς*, 'the ear,' and *ρρω*, 'I flow.' Discharge of a puriform liquid from the meatus auditorius externus. It is a symptom of chronic otitis. Some authors have used the term synonymously with chronic otitis.

**OTITES**. See Digitus.

**OTITIS**, *Empres'na otitis, Inflammation of the ear.* Inflammation of the mucous membrane of the ear; characterized by excruciating pain; insupportable humming in the ear, with a discharge of mucus generally from the meatus externus or from the Eustachian tube. Otitis is divided into *external* or *internal*, according as it affects the meatus auditorius, or the cavity of the tympanum. It may be *acute* or *chronic*. *Acute otitis* commonly terminates in a few days in a favourable manner, with the aid of antiphlogistics. *Chronic otitis* is almost always accompanied by a purulent discharge from the meatus auditorius. It is often incurable, and may ultimately give occasion to disease of the internal ear, and even of the brain.

**OTOCEPH'ALUS**, from *οὐς*, 'the ear,' and *κεφαλη*, 'head.' A monster, whose ears are in contact or united into one.

**OTODYNE**, Otalgia.

**OTOLYPTIS**, Earpick.

**OTOG'RAPHY**, *Otogra'phia*; from *οὐς*, 'the ear,' and *γραφη*, 'a description.' The part of anatomy which describes the ear.

**OTOLITHI**, (F.) *Otolithes*, from *οὐς*, 'the ear,' and *λίθος*, 'a stone.' A white calcareous substance contained in the membranous vestibule, and seeming to be suspended in the fluid of the vestibule by means of a number of ner-

vous filaments proceeding from the auditory nerve. Their universal presence in the ear of the mammalia would seem to show that they are inservient to audition. When of a looser consistence, they are called *Otoconies*, from *ους*, 'the ear,' and *κοινα*, 'dust.'

**OTOL'OGY**, *Otol'ogia*; from *ους*, 'the ear,' and *λογος*, 'a discourse.' The part of anatomy which treats of the ear. An anatomical treatise of the ear.

**OTOPLAS'TICĒ**, from *ους*, 'the ear,' and *πλαστικος*, 'forming.' The operation for restoring a lost ear.

**OTORRHŒA**, *Otirrheæ*.

**OTOT'OMY**, *Otolot'mia*; from *ους*, 'the ear,' and *τεμνειν*, 'to cut.' The part of practical anatomy, which teaches the mode of dissecting and preparing the ear.

**OUNCE**, *Ūncia*, *ονγγια*, a weight, equal to the 16th part of a pound avoirdupois, the 12th of a pound troy. It is composed of 8 drachms. See Weights and Measures.

**OURAQUE**, *Urachus*.

**OURLE**, *Parotis*.

**OUS**, *Ear*.

**OUTRE MER**, *Lapis lazuli*.

**OUVERTURE CADAVĒRIQUE**, *Autopsia cadaverica*.

**OVAL**, *Ovalis*; from *ovum*, 'an egg.' That which is round and oblong like an egg.

The **FOSSA OVALIS**, *Valvula seu Vestigium Foram'nis ovalis*, is a depression observed in the right auricle of the heart, on the septum, which separates it from the left auricle. It has thick and strong edges, at its upper and fore part, called *Colum'næ foram'nis ovalis*, *Isthmus Vieussēnii* vel *an'nulus fossæ ovalis*; in the fœtus called *an'nulus foram'nis* vel *fossæ ovalis*.

The fossa ovalis, in the adult, replaces the inter-auricular aperture in the septum, which, in the fœtus, is called *foramen oval*, (F.) *Trou ovale*, *Trou de Botol*.

The term **FORAMEN OVALE**, (F.) *Trou ovale*, has also been given to the foramen obturatorium, as well as to the foramen in the inner paries of the middle ear, which opens into the vestibule, and to the foramen in the sphenoid bone, through which the third branch of the fifth pair issues from the cranium.

**O'VARISTS**, *Ovists*. Those physiologists who think that the phenomena of generation, in the human species and in every species of animal, result from the development of the ova or ovula of the female, fecundated by the male. Not many of the physiologists of the present day can be classed among the ovarists.

**OVARITIS**, *Oaritis*.

**OVARIUM**. Diminutive of *ovum*, 'an egg.'

The *Ovary*, *Testis mulie'bris*, *T. femineus*, *Oar'ion*, *Ooph'oron*. The ovaries are the organs in which the ova are formed in oviparous animals. By analogy, the name has been given to the organs which the ancients called the *testicles* of the female.

They are two ovoid bodies, almost as large as the testicles in men, placed on each side of the uterus between the Fallopian tube and round ligament, and in the substance of the broad ligament. Their outer extremity gives attachment to one of the projections of the fimbriated extremity of the Fallopian tube; and

the internal is fixed to the uterus by a small ligamentous cord, called *Ligamentum rotundum ovarii*. The ovaries are composed of a very close, spongy texture, and of small vesicles filled with a clear fluid; these have been regarded as so many ova, which detach themselves from the ovarium after fecundation, and are carried into the cavity of the uterus by the Fallopian tube.

**OVARIUM NABOTHI**, *Nabothi glandulæ*.

**OVERO BUTUA**, *Pareira brava*.

**OVIDUCTUS MULIEBRIS**, *Tuba Fallopiana*.

**OVIP'AROUS**, *Ovip'arus*; from *ovum*, 'an egg,' and *pario*, 'I bring forth.' An epithet applied to animals which are hatched from eggs outside of the body.

**OVISTS**, *Ovarists*.

**OVOLOGY**, *Oologia*.

**OVULA GRAAFIANA**, *Folliculi Graafiani*—*o. Nabothi*, *Nabothi glandulæ*.

**OVULINE**, *Decidua reflexa*.

**OVUM**, *ωον*, *Oōn*, an egg. The eggs of poultry are chiefly used as food. The different parts are, likewise, employed in medicine. The shell, *Auran'cum*, *Auran'tum* (calcined,) (F.) *Coque d'œuf*, *Coquille d'œuf*, is esteemed an absorbent. The *Oil of the egg* is emollient, and is used, externally, to burns and chaps. The *Yolk of the egg*—*Vitellum ovi*, renders oils, &c. miscible with water.

Eggs, when light boiled, are easy of digestion; but, when very hard boiled or fried, they are more rebellious.

In *pharmacy*, the *white of egg*, which consists chiefly of albumen, is used for clarifying syrups, &c.

The yolk of egg, (F.) *Jaune d'œuf*, beaten up with warm water and sugar, and aromatized with orange-flower water, forms an emulsion, which is emollient, and known under the name—*Lait de poule* or *chicken's milk*.

Anatomists give the name *Ora*, (F.) *Œufs*, to round vesicles, containing a humour similar to the white of egg, which are situate in the ovaries of the female, and, when fecundated, constitute the rudiments of the fœtus. During gestation, the embryo and its enveloping membranes retain the name *Ovum*, (F.) *Œuf*.

The changes induced in the mammalia after impregnation greatly resemble those in the bird. Dr. Allen Thomson has given the following tabular view of the parts that correspond.

#### IN THE QUADRUPED.

The Ovary contains:

1. Graafian vesicles which are filled with fluid, granules, and the proligerous disc, in the centre of which is placed
2. The ovulum or vesicle of Von Baer, consisting of
3. A yolk, on the surface of which is
4. A germinal membrane, in the middle of which is placed
5. The germinal vesicle, or vesicle of Purkinje.

#### IN THE BIRD.

The Ovary contains:

1. Capsules entirely filled with ovula, there being no intervening fluid or proligerous disc.
2. The ovula or yolks, consisting of
3. A yolk.
4. A germinal membrane or cicatricula, with the
5. Vesicle of Purkinje in its centre.

OVUM HYSTERICUM. See *Clavus hystericus*.

OXALAS SUBPOTASSICUS, Potass, oxalate of.

OXALIC ACID, *Acidum oxal'num*, *A. sacchar'num*, *A. hydro-carbon'icum*, *A. acetosell'ae*, *A. oxal'icum*, *Acidum sac'chari*, *Acid of sugar*; *Acid of sorrel*, *Carbonous acid*, from οξύλις, 'sorrel.' An acid found in sorrel. It crystallizes in long, colourless, quadrangular prisms, and is generally found, in nature, united with lime or potassa. It has been proposed, in a diluted state, as a refrigerant, but it is unnecessary; and, besides, in quantity, it is a virulently acrid poison. It is largely employed for cleaning boot tops; and, as it strongly resembles the sulphate of magnesia, has often been mistaken for it. Several fatal cases are, indeed, on record. For its antidotes, &c.—See *Poison*.

OXALIDE, *Oxalis acetosella*.

OXALIS ACETOSA, *Rumex acetosa*.

OXALIS ACETOSELLA. The systematic name of the *Woodsorrel*, *Cuckoo-bread*, *Trifolium acetosum*, *Oxitriphyllum*, *Lujula*, *Allelu'ja*, *Acetosella*, *Oxyphyllon*, *Oxytriphylon*, *Panis cuculi*, (F.) *Sirelle*, *Oxalide*, *Pain a Coucou*, *Alleluia*. *Family*, Geraniæ. *Scz. Syst.* Decandria Decagynia. The plant has a gratefully acid taste, and is used in salads. It has been esteemed refrigerant, antiscorbutic, and diuretic.

OXALUM, Potass, oxalate of.

OXALME, οξύλιμη. A mixture of vinegar and salt, from οξύς, 'acid,' and 'άλς,' 'salt.'

OXALURIA, Urine, oxalic.

OXELÆON, from οξύς, 'acid,' and ελαιον, 'oil.' A mixture of vinegar and oil, used as a condiment.

OXINES, οξύνης, from οξύς, 'acid.' Wine already sour, but not yet vinegar.

OXITRIPHYLLUM, *Oxalis acetosella*.

OXODES, Acidulous.

OXOS, Aceticum acidum.

OXYA, *Fagus sylvatica*.

OXYACANTHA, *Mespilus oxyacantha*.

OXYBAPHON. See *Actebulum*.

OXYBANTHA GALENI, *Berberis*, *Berberis vulgaris*, *Spina ac'ida*, *Crespinus*, (F.) *Épine vinette*, *Vinctier*. *Family*, Berberidæ. *Scz. Syst.* Hexandria Monogynia. The *Berberis*. The fruit of the berries are gratefully acid, and moderately astringent.

By preparing an alcoholic extract of the root and adding water to it, a pulverulent brown substance is thrown down, which when dissolved in alcohol and evaporated yields the bitter principle, *Berberine*. It is an excellent stomachic in the dose of 2, 5, or 10 grains.

OXYCOCCOS, *Vaccinium oxycoccus*.

OXYCRATE, *Oxyrdum*, *Posca*, *Phusca*, from οξύς, 'acid,' and κρασι, 'I mix.' A mixture of vinegar and water; frequently used in medicine as refrigerant and antiseptic.

OXYCROCEUM (EMPLASTRUM), from οξύς, 'acid,' and κροκος, 'saffron.' A plaster, composed of *saffron*, *pitch*, *colophony*, *yellow wax*, *turpentine*, *galbanum*, *gum ammoniac*, *myrrh*, *olibanum*, and *mastic*. It was employed as a strengthening plaster.

OXYCUM, Oxygen.

OXYD, *Oxid*, *Oxide*, *Oxyde*, *Oxydum*, from

οξύς, 'acid.' A combination, not acid, of a simple body with oxygen.

OXYDATION, *Oxyd'atio*, *Oxygen'tion*. The action of oxydizing a body; that is, of combining it with oxygen; a combination, from which results an oxyd.

OXYDE D'ANTIMOINE SULFURÉ, *Oxydum stibii sulphuratum*.

OXYDE, CYSTIC. A species of urinary calculus, having the shape of confused, yellowish, semi-transparent, insipid, very hard crystals. When distilled, it furnishes subcarbonate of ammonia, like all azoted matters. It dissolves in the nitric, sulphuric, phosphoric, and oxalic acids.

OXYDERVICUS, *Oxyder'ces*, from οξύς, 'sharp,' and δεικνω, 'I see.' A medicine, which sharpens the sight.

OXYDUM ANTIMONII CUM PHOSPHATE CALCIS, Antimonial powder.

OXYDUM FERRI NIGRUM, *Black oxyd of iron*. The scales, which fall from iron, when heated, consist of iron, combined with oxygen. They have been used like the chalybeates in general.

OXYDUM FERRICUM CRYSTALLIZATUM NATIVUM, *Hæmatites*—o. *Hydrargyri completum*, *Hydrargyri nitrico-oxydum*—o. *Hydrargyricum*, *Hydrargyri nitrico-oxydum*—o. *Hydrargyricum præparatum*, *Hydrargyri oxydum cinereum*—o. *Hydrargyrosium*, *Hydrargyri oxydum cinereum*.

OXYDUM STIBII SULPHURATUM, *Hepar antimoni'i*, *Crocus metallo'rum*, *Crocus antimoni'i*, (F.) *Oxyde d'antimoine sulfuré*, *Foie d'antimoine*. This was formerly exhibited in the cure of fevers, but it is now rarely employed.

OXYG'ALA, from οξύς, 'sour,' and γαλα, 'milk.' Sour milk. The *Oxygala equin'um*, *Caracos'mos*, is reckoned amongst the delicacies of the Tartars.

OXYG'ARON, from οξύς, 'acid,' and γαρον, 'garum.' A composition of garum and vinegar.

OXYGEN, *Oxyg'enum*, *Épyp'cal air*, *Pure air*, *Vital air*, *Déphlogisticated air*, *Oxygenes*, *Oxy'cum*, *Princip'um oxyg'icans seu oxygeneticum seu acid'ificans seu ac'idum*, *Elementum acidificum*, (F.) *Air du feu*, from οξύς, 'acid,' and γεννωμαι, 'I engender,' i. e. *generator of acids*; and such it was believed to be, *exclusively*, at the period when the name was given to it. This is now known not to be the case. Oxygen is largely distributed in nature. It exists in the air, in water, in several acids, all the oxyds and all the salts, except in some ammoniacal salts, and in vegetable and animal substances, &c. It is obtained by decomposing the peroxyd of manganese or the chlorate of potassa by heat and in close vessels.

Although oxygen, in the state of admixture in which it is found in the atmosphere is of vital importance, yet it cannot be respired in a pure state with impunity. Animals die in it long before the whole of the oxygen is consumed.

The properties of oxygen seem to be stimulant. It increases the force and velocity of the pulse, and has, accordingly, been used in cases of chronic debility, chlorosis, asthma, scrofula, dropsy, paralysis, &c. It requires to be diluted with from 10 to 20 parts of atmospheric air; one to two quarts being given during the day.

OXYGENATION, Oxydation.

OXYGENÆSES. A name given by Baumes to diseases which he attributed to disordered oxygenation.

OXYGLYCUS, *Oxyglycy, Oxyglyces, Mulsu acida, Acctum mulsum dulce.* Prepared by macerating and boiling honey-comb (from which the greater part of the honey has been taken) in water, and adding vinegar. An *oxymel*.

OXYLAPATHUM, *Rumex acutus.*

OXYMEL, *Apon'eli, Mel acctatum,* from οξύς, 'acid,' and μέλι, 'honey.' Honey and vinegar boiled to a syrupy consistence.

SIMPLE OXYMEL, *Oxymel simplex,* is prepared as follows; (*Mellis despumati* ℔ij, *acidi acetici* ℔j. Boil in a glass vessel, over a slow fire, to a proper thickness. *Ph. L.*) It is cooling;—externally, detergent.

OXYMEL ÆRUGINIS, *Linimentum Æruginis.*

OXYMEL COL'CHICI, *Oxymel of meadow saffron, (F.) Oxymel colchique. (Rad. colch. recent. in laminas tenues secta* ℥ij, *aceti destillati* ℔ij, *mellis despumati.* pond. ℔ij. Macerate in a gentle heat for 48 hours. Press and boil the liquor with the honey to the thickness of a syrup; stirring with a wooden spoon. *Ph. D.*) It is expectorant and diuretic. Dose ℥j in gruel.

OXYMEL COLCHIQUE, *O. colchici—o.* of Meadow saffron, *O. colchici.*

OXYMEL SCILLÆ, *Oxymel of squill, Mel scillæ, Oxymel scilliticum. (Mellis despumati.* ℔ij, *aceti scillæ* ℔ij. Boil in a glass vessel over a gentle fire to a proper consistence. *Ph. L.*) It is reputed to be expectorant and diuretic. Dose ℥j.

OXYMEL OF SQUILL, *O. scillæ.*

OXYMYRRHINE, *Ruscus.*

OXYMYRSINE, *Ruscus.*

OXYNGIUM, *Adeps suilla.*

OXYNI'TRON, from οξύς, 'acid,' and νιτρον, 'nitre.' Name of a plaster, composed chiefly of vinegar and nitre, and recommended by Aëtius.

OXYNOSEMA, *Acute disease.*

OXYNOSOS, *Acute disease.*

OXYNUSOS, *Acute disease.*

OXYO'PIA, *Acies visus,* from οξύς, 'quick,' and ωψ, 'sight.' Excessive acuteness of the sense of sight. Instances have occurred, where persons could see the stars in the daytime. The cause is seated in great sensibility of the retina.

The term has been used synonymously with nyctalopia (q. v.)

OXYOSPHERE'SIA, from οξύς, 'acute,' and σφαιρισ, 'smell.' Acuteness of the sense of smell.

OXYPHLEGMA'SIA, οξύφλεγμοσία, *Acuta et vehemens inflammatio.* A very violent inflammation.

OXYPHONIA, *Vox acuta,* from οξύς, 'sharp,' and φωνη, 'voice.' *Paraphonia clangens, P. ulcero'sa, Leptophonia.* A shrill and squalling voice; frequently, a symptom of inorbid affection of the larynx.

OXYPHENICON, *Tamarindus.*

OXYPHYLLON, *Oxalis acetosella.*

OXYREG'MIA, *acidus ructus,* from οξύς, 'sour,' and ερευγον, 'I belch.' Acid eructations.

OXYRRHOD'INON, from οξύς, 'acid,' and ρόδον, 'a rose.' A composition of vinegar and roses. (*Ol. rosat.* ℥ij, *acet. rosat.* ℥j.) Used as a liniment in herpes and erysipelas.

OXYS, *Acetum, Acute.*

OXYSAC'CHARON, from οξύς, 'acid,' and σακχαρον, 'sugar.' A mixture of sugar and vinegar. It was called *Oxysaccharum vomitivum,* when it held in solution the glass of antimony; and *Oxysaccharum scilliticum,* when it contained squills.

OXYSAL DIAPHORET'ICUM AN'GELI SALÆ. A preparation of Angelo Sala. Acetate of potass exposed to the atmosphere; and, consequently, fallen into a state of deliquium.—Orfila.

OXYTARTARUS, *Potassæ acetas.*

OXYT'OCOS, from οξύς, 'quick,' and τικτω, 'I bring forth.' *Oxytoc'ic.* A medicine, which promotes delivery.—Dioscorides.

OXYTRIPHYLLON, *Oxalis acetosella.*

OYSTER SHELLS, *Ostrææ testæ.*

OZÆ'NA, *Coryza enton'ica, C. ozæna'sa, Coryza virulent'a;* from οζω, 'I smell badly.' (F.) *Ozène.* An affection of the pituitary membrane, which gives occasion to a disagreeable odour, similar to that of a crushed bed-bug: hence the name *Punais,* by which the French designate one labouring under ozæna. It is, sometimes, owing to caries of the bones; but is, perhaps, most frequently dependent upon syphilitic ulceration of the pituitary membrane, with or without caries of the bones of the nose.

OZENE, *Ozæna.*

P.

- P. A contraction of *Pugillus.*
- P. Æ. A contraction of *Partes æquales.*
- P. P. A contraction of *Pulvis patrum.*

} See Abbreviation.

PAB'ULUM, *Trophæ, Phorbæ, Alimen'tum.* Food, aliment.

The animal heat and animal spirits—unmeaning terms—were formerly considered the *Pubulum vitæ.*

PACCHIO'NI, GLANDS OF, *Glan'dule Dure Matris, G. dura meningis, Tubercula parva dure matris, Corp'ora glandifor'mia dura matris, (F.) Granulations cérébrales.* Small,

whitish, or yellowish bodies, sometimes separate, at others united like a bunch of grapes, which are observed in several parts of the dura and pia mater. They receive vessels, but apparently no nerves. Their texture and uses are unknown. A considerable number is observed in the longitudinal sinus, covered by the internal membrane.

PACHÆ'MIA, *Pachyæ'mia,* from παχυς, 'thick,' and αἷμα, 'blood.' Too great thickness of the blood.

PACHEABLEPHARO'SIS, *Pacheableph'ara, Pachybleph'aron, Pachyblephar'osis, Pachytes,* from παχυς, 'thick,' and βλεφαρον, 'an eyelid.'

A name given, by some authors, to a thickening of the eyelids, produced by tubercles or excrescences formed on their margins. It is the same affection as that which Sauvages designates *Cul'gò à Pacheablephar'oi*.

PACHETOS. See Laqueus.

PACHYŒMIA, Pachæmia.

PACHYBLEPHARON, Pacheablepharosis.

PACHYNTICA, Incrassantia.

PACHYTES, Pacheablepharosis.

PAD, (S.) *Pajado*, from *paja*, 'straw,' *Plumaceolas*, *Pulvillus*, *Parvum pulv'inar*;—a cushion; a little cushion; a Junk; (F.) *Cousinet*. Small bags, filled with feathers, wool, hair, bran, chaff, &c. They are used to compress or support certain parts.

In the treatment of fractures, soft pads or cushions, called by the French *Remplissages*, are placed between the splints and the fractured limb, in order that the prominent parts may not be chafed by the splints.

PADNOON, Bit noden.

PAD'UA, MINERAL WATERS OF Near Padua, in Italy, there are several thermal, sulphureous springs; the hottest of which is 188° Fahr. The chief establishments are Abano, Battaglia and Montegrotto.

PADUS, Prunus padus.

PÆDAN'CHONĒ, from *παις*, 'a child,' and *αγχο*, 'I strangle.' *Ang'na Siccæ*. Name of a fatal species of cynanche, mentioned by M. A. Severinus;—probably the *Cynanche Trachealis*, (q. v.) or *Cynanche Maligna*, (q. v.)

PÆDARTHROACE, Spina ventosa.

PÆDATROPHIA, from *παις*, *παιδος*, 'a child,' *α*, privative, and *τροφη*, 'nourishment.' Atrophy of children.

PÆDATROPHIA GLANDULOSA, Scrofula.

PÆDERAS'TIA, from *παις*, 'a boy,' and *ερω*, 'love.' The love of boys. A disgraceful passion, common in ancient times, but now unknown.

PÆDIATRIA, *Pædiat'rica*, from *παις*, 'a child,' and *ιατρεια*, 'medical management.' Treatment of the diseases of children.

PÆDICTERUS, Icterus infantum.

PÆDOPHLEBOTO'MIA, from *παις*, 'a child,' *φλεψ*, 'a vein,' and *τομη*, 'incision.' *Venæsectio puero'rum*. Bleeding performed on children.

PÆDOTRIBA, *Min'ister Gymnas'tæ*, from *παις*, 'a child,' and *τριβω*, 'I train.' In ancient gymnastics, the officer acquainted with all the prescribed exercises, and who carried them into effect, according to the directions of the superior.

PÆONIA, *P. officina'lis*, *Glycys'idē*, *Hæmog'um*, *Paony*, male and female. (F.) *Pivoine*, *Pione*. The root, flowers, and seeds were long esteemed powerful medicines. They are feebly astringent, and have been considered to be narcotic and antispasmodic. They have been given, particularly, in intermittents and epilepsy, but are not now used. The flowers are called *Rosæ benedic'tæ*, *R. regia*.

PAIDIA, Infancy.

PAIDION, Infans.

PAIGIL, Primula veris.

PAIN, (old F.) *painer*, 'to torment;' Sax. *pin*: *Dolor*, *Algos*, *Alge'ma*, *Alge'do*, *Alge'sis*, *Od'ynē*, (F.) *Douleur*. A disagreeable sensation,

which scarcely admits of definition. It is generally symptomatic, and is called *acute*, (F.) *aigüe*, when very violent: *pungent*, (F.) *pongiive*, when it resembles that which would be produced by a sharp instrument run into the part: *heavy*, (F.) *gravative*, when attended with a sensation of weight; *tensive*, when the part seems distended; *lan'cinating*, when occurring in shoots; *lac'crating* or *tearing*, when the part seems to be tearing; *burning*, (F.) *brûlante*, when resembling that produced by a burn, &c.

PAIN, see Triticum—p. à Coucou, Oxalis acetosella—p. de Madagascar, Jatropha manihot

—p. de Pourceau, Cyclamen.

PAINS, AFTER. See P. labour.

PAINS, Labour pains, *Parturient'is dolo'res*, *Odin*, *Dolo'res ad partum*, *Mal d'Enfant*, *Douleurs*. The uneasy sensations that accompany labour, and are owing to uterine contraction. The pains that precede actual delivery, and are simply employed in dilating the os uteri, are called *grinding*; those which extrude the child, *forcing*. Those which take place in the first days after delivery, and are employed in forcing away coagula, &c., are termed *After pains*, *Dolo'res post partum*, *D. puerpera'rum*, (F.) *Tranchées utérines*.

"TO TAKE A PAIN,"—"To try a pain,"—is 'to make an examination *per vaginam*, during labour, to discover its progress, character, &c.

The French term the pains, which precede and announce labour, *mouches*; those which accompany it, *douleurs*; and those which occur immediately afterwards, *tranchées ou coliques*.

PAINT, from *pinctum*, 'painted,' (I.) *pinto*, (F.) *peint*. *Pigmen'tum*, *Fucus*, (F.) *Fard*. A name given to different substances, employed for embellishing the complexion, or rendering the skin softer. The substances most commonly used for this purpose are:—the *Subnitrate of Bismuth*, (F.) *Blanc de fard*. A spirituous solution of Benzoin, precipitated by water, and forming the *Virgin's milk*, (F.) *Lait virginal*; the red or *rouge* of the carthamus; *Spanish white*, the oxides of lead, tin, and mercury, vermilion, red saunders, &c.

All paints may be said to be noxious. They injure the skin, obstruct perspiration; and, thus, frequently lay the foundation for cutaneous affections. See Cosmetic.

PAINT, INDIAN, Sanguinaria canadensis.

PALÆSTRA, Gymnasium.

PALÆS, Palate.

PALATE, *Palat'tum*, *Hyper'da*, *Uraniscos*, the *Roof of the mouth*, *Fossa Palati'na*, *Palatum stab'ile*, (F.) *Palais*. The upper part of the cavity of the mouth; a kind of parabolic vault, formed by the two superior maxillary bones and the two palate bones, covered with a thick and dense mucous membrane: bounded, before and at the sides, by the superior dental arch; and, behind, by the velum palati. A whitish line runs along the middle, from before to behind; at the anterior extremity of which is a tubercle corresponding to the inferior orifice of the anterior palatine canal. The arteries of the palate and corresponding gums proceed from the palatine, alveolar, infra-orbital, labial, and buccal branches. The veins follow a similar course. The nerves are given off from the pala-

tine, facial, infra-orbital, superior dental, and from the naso-palatine ganglion.

**PALATE, ARTIFICIAL, (F.)** *Obtuteur du Palais*. A plate of tortoise shell, silver, &c., used to close the deficiency of the palate in cases of such affections.

**PALATE, SOFT, Velum pendulum palati.**

**PALATE, Palatine, Palati'nus,** from *palatum*, 'the palate.' Relating or belonging to the palate.

The **PALATE BONE, Os Palati, Os Basilarè,** (F.) *Os Palatin, Os du Palais*, is a small bone of an irregular shape, situate at the posterior part of the nasal fossæ and palate. It seems formed by the union of two bony plates joined at right angles to each other; so that one is *inferior* and *horizontal*;—the other, *superior* and *vertical*.

The *horizontal* or *palatine portion* is quadrilateral. Its upper surface forms part of the nasal fossæ; the lower, of the palatine arch, and contains the inferior orifice of the *posterior palatine canal*. Its *anterior* edge is articulated with the palatine process of the superior maxillary bone; the *posterior* is free and sharp. It gives attachment to the velum palati, and presents an eminence, which, when joined with one on the opposite side, forms the posterior nasal spine. Its inner edge is articulated with the corresponding bone; its outer is confounded with the vertical portion.

The *vertical* or *ascending portion* has the form of a long square. The inner surface forms part of the outer paries of the nasal fossæ. Its outer surface is unequal, and is articulated with the superior maxillary bone; behind, it presents a vertical groove, which forms part of the posterior palatine canal; and, above, a small free surface, which looks into the zygomatic fossa. Its anterior edge is united with the superior maxillary bone; the posterior is unequal, and rests on the internal ala of the pterygoid process. The angle, which it forms by uniting with the posterior edge of the horizontal portion, presents a very prominent pyramidal eminence, called the *tuberosity of the palate bone*. Its upper margin is surmounted by two eminences;—the one, anterior, called the *orbital process*;—the other, posterior, the *sphenoid process*. These two processes are separated by an almost circular notch, which the sphenoid bone forms into a foramen, called the *spheno-palatine*.

This bone appears to be developed from a single point of ossification. It is articulated with the sphenoid, ethmoid, the cornua sphenoidalia, superior maxillary bone, the inferior spongy bone, the vomer, and its fellow.

The **PALATINE MEMBRANE** is the fibro-mucous membrane that lines the palate or roof of the mouth.

The **PALATINE CANALS** or **DUCTS**. These are two in number. The *anterior, Ductus incisivus*, vel *Naso-lo-palati'nus*, is situate at the anterior part of the palatine arch, and is formed by the two superior maxillary bones. It is single beneath, but opens above by two apertures, one into each nasal fossa. The foramen is called the *Foramen incisivum*, vel *F. Palatinum anterius*, *F. Alveolarè anterius*, *F. cæcum ossis maxillaris superioris*.

The *posterior palatine canal* is situate at the

posterior part of the palate. It is formed by the palate and superior maxillary bones, ascends between these two bones; and, in its course, gives rise to two or three small accessory palatine canals, which open above the tuberosity of the palate bone. It transmits the nerves and vessels which bear its name. The foramen is called, *F. Palati'nus posterius*, *F. Palato-maxillariè*, *F. Alveolarè posterius*.

The **PALATINE** or **PALATAL ARTERIES** are two in number. They are distinguished into, 1. The *superior palatal* or *palatine, Palatina descendens* or *Palato-maxillary*, which leaves the internal maxillary behind the top of the orbit; descends into the pterygo-maxillary fissure, and enters the posterior maxillary canal. Its branches are distributed to the velum palati and the nasal fossæ. 2. The *inferior* or *ascending palatine* or *palatal*, which is very small, and separates from the facial near its origin. It passes along the lateral and superior part of the pharynx, between the pillars of the velum palati, and divides into a number of ramusculi, which are distributed to the pharynx, the corresponding tonsil, the Eustachian tube, and the velum palati.

The **PALATINE** or **PALATAL NERVES, Gutturopalatins** (Ch.), are three in number; and arise from the inferior part of the spheno-palatine ganglion. 1. The *great palatine, Palatin inferior* (Ch.), is situate anteriorly to the two others, and descends into the posterior palatine canal; gives a *nasal filament* and a *staphyline filament*, and is distributed on the palate. 2. The *middle palatine, Gutturall* (Ch.), which arises behind the preceding; enters one of the accessory palatine canals, and is distributed to the tonsils and velum palati. 3. The *little palatine nerve*, situate still more backward than the last, which loses itself by several filaments in the uvula, tonsils, and follicles of the palatine membrane.

**PALATO-PHARYNGIEN, Palato-pharyngeus**—*p. Salpingeus*—*p. Salpingeus, Circumflexus*—*p. Salpingien, Circumflexus*.

**PALATO-PHARYNGEUS, Pharyngo-staphylinus, Staphylinopharyngeus, Thyropharyngo-staphylinus,** part of the *Stylo-pharyngien* (Ch.), *Hypopharyngeus*, (F.) *Palato-pharyngien*. A membranous muscle, broader at its middle than at its extremities, and situate vertically in the lateral paries of the pharynx and velum palati. It includes the peristaphylopharyngeus, pharyngo-staphylinus, and thyrostaphylinus of Winslow. When the two palato-pharyngei contract together, they depress the velum. They elevate and shorten the pharynx, and act principally in deglutition.

**PALATUM MOLLE, Velum pendulum palati.**

**PALENESS, Pallor, Och'rotes, Ochroma,** (F.) *Paleur*. Whiteness of complexion. It appears to be owing to a diminution of the blood circulating in the capillary vessels, and is often a sign of disease.

**PÂLES COULEURS, Chlorosis.**

**PALETTE** (F.), *Pal'mula, Fer'ula*. An instrument of percussion. It has the shape of a spatula with a long handle; is made of very light, white wood, and has been proposed, by Percy, for what is called the *Massage*, a kind

of pressure or kneading, exerted by the hand on the body and limbs, to excite the tone of the skin and subjacent tissues.

**PALETTE**, Cup, Xiphoid cartilage.

**PALETTE A PANSEMENT**. A small splint of thin, scooped wood; having the shape of the hand, and used to support the hand in certain cases—when burnt, for example—in order to prevent the fingers from being deformed by the cicatrices.

**PALETTE DE CABANIS**. An instrument, invented by Cabanis of Geneva, to draw out the extremity of the stylet when passed into the nose, in the operation for fistula lachrymalis. It is composed of two plates of silver, pierced with several holes, and movable on each other. To use it, the instrument must be carried into the nose, so that the holes of the two plates correspond. When the end of the stylet is received into one of these holes, it is pinched, by sliding one of the plates on the other, and is easily withdrawn.

**PALÉUR**, Paleness.

**PALIMPISSA**. See *Pinus sylvestris*.

**PALINCOTESIS**, Recrudescencia.

**PALINDROMIA**, *παλινδρομία*, from *παλιν*, 'again,' and *δρομος*, 'a course.' This word signifies, with some, a reflux of fluids from the exterior towards the interior, and, according to others, the relapse of an affection—the recurrence of a paroxysm. *Reursio, Repetitio*.

**PALINGENESIA**, Regeneration.

**PALLIATION**, *Palliatio*, from *palliare*, 'to cover, mask;' from *pallium*, 'a mantle.' The act of palliating, that is, of causing the symptoms of a disease to mitigate, without curing it. The medical art can frequently, only moderate the symptoms of a disease, prevent it from making progress, prolong the days of the patient, and diminish his sufferings. This is a *palliative treatment*.

**PALLIATIVE**, *Palliatives*, *Antipathic*, *Enantiopathic*. A remedy or mode of treatment, which only relieves a disease, without curing it.

**PALLIDULUS**, *Blafard*.

**PALLOR**, Paleness.

**PALM**, *Palma, Vola, Thenar, Ages, Agos'tus*, (F.) *Paume de la main*. The hollow or inside of the hand. It is limited, *without*, by the thenar eminence, which answers to the thumb; *within*, by the hypothenar eminence, which answers to the little finger; *above*, by the wrist-joint; and, *below*, by the four fingers.

**PALMA CHRISTI**, Ricinus communis.

**PALMA HUMILIS**, *Musa paradisiaca*.

**PALMAIRE CUTANÉ**, *Palmaris brevis*—*p. Grand*, *Palmaris magnus*—*p. Grêle*, *Palmaris longus*—*p. Long*, *Palmaris longus*.

**PALMAR**, *Palmaris*, from *palma*, 'the palm of the hand.' That which concerns the palm of the hand. The palm has, sometimes, been divided in three regions, called *palmar*. 1. The *external palmar region* corresponds to the thenar eminence. 2. The *internal palmar region* is formed by the hypothenar eminence; and, 3. The *middle palmar region* is the hollow of the hand, (F.) *Creux de la main*.

**PALMAR APONEURO'SIS**. A strong triangular aponeurosis, which arises from the inferior tendon of the palmaris brevis, and the anterior annular ligament of the carpus. It covers the

whole palm of the hand, and adheres, somewhat strongly, to the skin of the part. The *palmar ligaments* are small, very numerous, fibres fasciæ, which unite the different bones of the carpus and metacarpus.

**PALMAR MUSCLES**. These are three in number.

1. *Palmaris Magnus, Flexor carpi radialis, Radialis internus, Epitrochlo-metacarpicæ*, (F.) *Palmaire grand, Radial antérieur*. A long fusiform muscle, which passes obliquely from the inner tuberosity of the humerus to the upper extremity of the second metacarpal bone. It bends the hand.

2. *Palmaris Longus, Latescens chordæ, Ulnaris grac'ilis, Epitrochlo-carpi-palmaire* (F.) *Palmaire long, P. grêle*. This muscle is situate on the inner side of the last. It is very slender, and passes from the inner tuberosity of the humerus to the anterior annular ligament of the carpus, and to the palmar aponeurosis, which it seems to form by the vanishing of its fibres. It stretches the palmar aponeurosis, and bends the hand.

3. *Palmaris Brevis, P. Brevis vel Caro quadrata, Palmaire cutané, Carpiæus*, (F.) *Palmaire cutané*. A small, thin, quadrilateral muscle; situate before the thenar eminence. It passes from the annular ligament of the carpus to the integuments of the palm of the hand, which it wrinkles by its contractions.

**PALMAR ARCHES**, (F.) *Arcades ou Crosses palmaires*. The curved extremities of the radial and cubital arteries in the palm of the hand. There are two palmar arches:—the one *cubital* or *superficial*,—*grande Arcade palmaire* of Chaussier, furnishes, at its convexity towards the fingers, the collateral arteries of the fingers, and the internal collateral of the thumb; the other, the *radial, profound, or deep-seated*,—*Petite Arcade palmaire* of Chaussier, is deep in the palm of the hand beneath the tendons of the flexor muscles of the fingers. It gives some small branches only to the surrounding parts.

**PALMI-PHALANGIENS**, *Lumbricales manus*.

**PALMULA**, Date, Palette.

**PALMUS**, Palpitation—*p. Plumbarius, Colic, metallic*—*p. Vomitus, Vomiting*.

**PALO DE CALENTURAS**, *Calenturas*.

**PALOS DE CALENTURA**, *Cinchona*.

**PALPEBRA**, *Blepharon*, (F.) *Paupière*. The eyelids are two movable vela, situate in front of the eye; which by their separation permit the organ to receive the impression of light, or by their greater or less occlusion protect it from the influence of too great light, or from the action of extraneous bodies.

They are separated, above, from the forehead, by the eyebrows; and, below, are confounded with the cheeks. They are distinguished into *upper* and *lower*. The former is much broader and more movable than the latter. They are separated by a transverse cleft; and their edges are thick, and furnished with the cilia or eyelashes. Supported by the tarsal cartilages, they unite at the extremities of the transverse diameter of the orbit, forming two angles,—the innermost being called the *greater angle of the eye*, or *inner or greater canthus*; the other, the *lesser or external angle or canthus*.

The eyelids are formed, 1. Of a thin dermoid

texture: 2. Of a muscular membrane,—a portion of the orbicularis: 3. Of a particular fibrous membrane: 4. Of the tarsi: and 5. Of a mucous membrane,—a part of the tunica conjunctiva.

Their vessels and nerves are called Palpebræ, (q. v.)

PALPEBRÆ INFERIOR EXTRORSUM FLEXA, Ectropion.—p. Tertia, Valvula semilunaris.

PALPEBRÆ SUPERIORIS PRIMUS, Levator palpebræ superioris.

PALPEBRAL, *Palpebralis*, from *palpebra*, 'the eyelid.' That which belongs or relates to the eyelid.

The PALPEBRAL ARTERIES are those distributed to the eyelids. They are two in number; an *upper* and a *lower*. The *former* arises from the ophthalmic, a little beyond the cartilaginous pulley of the greater oblique muscle and descends towards the upper eyelid, over which it is distributed. The *latter* arises at the side of, and a little behind, the preceding, and sends its ramifications into the lower eyelid and the neighbouring parts. The palpebral veins have a similar arrangement; except that some of them open into the temporal and labial veins.

The PALPEBRAL NERVES, or *Nerves of the Eyelids*, arise, particularly, from the frontal and lachrymal branches; from the ophthalmic nerve of Willis; from the facial, nasal, and from the infra-orbital branch of the superior maxillary nerve.

The PALPEBRAL LIGAMENTS are distinguished into *superior* and *inferior*. Some anatomists, with Winslow, have described, under this name, the fibrous layer, which is attached,—on the one hand, to the outer part of the circumference of the orbit; on the other, to the tarsal cartilages.

PURIFORM PALPEBRAL FLUX. A puriform discharge, furnished by the glands of Meibomius, when inflamed; and to which Scarpa attributes fistula lachrymalis, in many cases.

PALPEBRALIS, Orbicularis palpebrarum.

PALPEBRARUM APERIENS RECTUS, Levator palpebræ superioris—p. Duo musculi, Orbiculares palpebrarum.

PALPITATIO CORDIS TREPIDANS, Cardiotromus.

PALPITATIO MEMBRORUM. A term used by Gaubius for involuntary shaking of the legs.

PALPITATION, *Palpitatio*, *Palmus*, *Palpitatio Cordis*, *Subsultio*, *Clonus Palpitatio*, (F.) *Palpitation*, *P. da Cœur*. A name, given to the pulsations of the heart, when they become stronger, more extensive, or more sensible to the individual, than ordinarily.

Palpitations occur in a number of affections. They are, sometimes, owing to organic disease of the heart, hypertrophy, inflammation, &c.; at others, to a disease in some other viscus; whilst, frequently, they are merely nervous.

PALPITATION is sometimes felt in the arteries, constituting the *Palpitatio Arterio'sa*.

PALPITATION DU CŒUR, Palpitation.

PALSY, Paralysis.

PALUDAPIUM, Apium graveolens.

PALUS, Marsh—p. Sanctus, Guaiacum.

PAMBIOA, Pambioa.

PAMPOISON, Syncope.

PAMPLE'GIA, *Panplegia*; from *παν*, 'all,'

and *πληγω*, 'I strike.' General paralysis. Palsy of the whole body.

PANACE'Æ, from *παν*, 'all,' and *ακειομαι*, 'I cure.' *Universa'le remedium*, *Panchrestos*. A pretended universal remedy. There is no such thing in existence.

PANACEA DUCIS HOLSATIÆ, Potassæ sulphas—p. Duplicata, Potassæ sulphas—p. Lapsorum, Arnica montana—p. Mercurialis, Hydrargyri submurias—p. Mercurii rubri, Hydrargyri nitrico-oxydum—p. Vegetabilis, Crocus.

PANA'DA. Diminutive of Ital. *Panc*, 'bread,' (Lat. *Panis*.) *Pana'ta*, *Panate'la*. Bread, boiled in water to the consistence of pap. Sometimes administered to the sick.

PANARIS, Paronychia.

PANARITIUM, Paronychia.

PANARIUM, Paronychia.

PANATA, Panada.

PANATELLA, Panada.

PANAX COSTINUM, Pastinaca opoponax—p. Heracleum, Pastinaca opoponax.

PANAX PASTINACEA, Pastinaca opoponax.

PANAX QUINQUEFOLIUM, *Ginseng*, *Ninsing*. Family. Araliaceæ. *Sex. Syst.* Polyandria Monœcia. This plant grows in Tartary and North America. The root is about the thickness of the little finger; an inch or two in length, often dividing into two branches; of a whitish-yellow colour; wrinkled on the surface, and of a compact, almost horny, texture. It has no smell, but a very sweet taste, combined with a slight degree of aromatic bitterness. It is much esteemed by the Chinese, who pay a high price for it. It is a gentle and agreeable stimulant.

PANBIO'MÁ, *Pambio'ma*, from *παν*, 'all,' and *βιος*, 'life.' The original animating principle. The general principle of life.

PANCHRESTOS, Panacea.

PANCHYMAGO'GUM, *Pantago'gon*, from *παν*, 'all,' *χυμος*, 'juice,' and *αγω*, 'I drive away.' A medicine, which the ancients believed capable of purging away all sorts of humours.

PANCHYMAGOGUM MINERALE, Hydrargyri submurias.

PANCCENOS, Epidemy.

PAN'CREAS, from *παν*, 'all,' and *κρεας*, 'flesh;' i. e. *quite fleshy*. *Calli'creas*, *Totum carnosum*, *Gland'ula saliv'alis abdom'inis*, *Pancr'c'ne'*. A gland, deeply seated in the abdomen, and lying transversely on the vertebral column, between the three curvatures of the duodenum, behind the stomach, and to the right of the spleen. Its left extremity is called the *tail* of the pancreas; it is smaller than the right, which is called the *head*. At its right portion, it has, almost always, a greater or less prolongation; called, by Winslow and some others, the *lesser pancreas*, (F.) *Petit pancréas*, *Pancreas of Aselli*, *Pancreas minus*.

The pancreas resembles the salivary glands in structure, and has been called the *Abdominal Salivary Gland*. It is composed of lobes and granulated lobules, distinct and united by cellular tissue. From each of the granulations of these lobes arise the radicles of its excretory duct, which are very delicate, and are united like veins. The duct itself, *Ductus Pancreat'icus*, *Canal* or *Duct* of *Wirsung* or *Wirsungus*, (F.) *Canal pancréatique*, proceeds

in a serpentine course into the substance of the organ; and, when it has reached behind the second portion of the duodenum, it becomes free, and is of the size of a crow's quill. It opens at an acute angle into the choledoch duct, or proceeds close to it, opening separately into the duodenum. The *Pancreatic arteries* are very numerous and small. They proceed from the cœliac, splenic, superior mesenteric, right gastro-epiploic, coronaria ventriculi, and left capsular. Its veins open into the radicles of the vena porta; and, particularly, into the splenic and lesser mesenteric. Its nerves emanate from the solar plexus, and its lymphatics pass into ganglions, to which it gives its name. The pancreas secretes the pancreatic juice, *Succus seu Liqueur Pancreaticus, Lympha Pancreatica*, which resembles the saliva.

PANCREATEMPHRAXIS, from *παγκρεας*, 'the pancreas,' and *εμφρασσω*, 'I obstruct.' Obstruction of the pancreas.

PANCREATIC SARCOMA OF ABERNETHY, *Emphyma Sarcoma pancreaticum*. A tumour, in irregular masses, connected by loose fibrous substance, like the irregular masses of the pancreas. Found in the cellular substance; but, more usually, in lymphatic glands: chiefly in the female breast.

PANCREATITIS. Inflammation of the pancreas;—an affection, the phenomena of which are not well known to us.

PANCREATOID, from *παγκρεας*, 'the pancreas,' and *ειδος*, 'appearance.' A tumour, resembling the pancreas in structure.—Maunoir.

PANCRENE, Pancreas.

PANDALITIUM, Paronychia.

PANDEMIOS, Epidemy.

PANDICULATION, *Pandiculatio, Scordinema* or *Scordinema*, *Scordinis mos*, *Clonus Pandiculatio*, from *pandiculari*, 'to stretch one's self,' *Stretching, Halices* (Pl.) An action, which consists in elevating the upper limbs, and throwing the head and trunk backwards, at the same time that the lower limbs are extended. This series of motions of the extensor muscles, is, in some measure, independent of the will, and is accompanied by yawning, which is equally involuntary. In the state of health, stretching occurs before and after sleep; especially when we are fatigued. It is, also, observed at the onset of certain paroxysms of fever, hysteria, &c.

PANICAUT, *Eryngium campestre*—p. *Martimo*, *Eryngium maritimum*.

PANICUM ITALICUM, *Italian Panic Grass, Indian Millet, Guinea Corn, Barbadoes Millet, Miliun Indicum, Sorghum, Holcus Sorghum*, (F.) *Millet des oiseaux*. Nat. Ord. Gramineæ. The seed—*Mil'ii Sem'ina*—are much esteemed in Italy, being a constant ingredient in the soups, and made into a variety of forms for the table.

PANICUM MILIACEUM, *Common Millet, Miliun, Cenchrus, Cenchrus*, (F.) *Millet ordinaire*. Millet seed are esteemed a nutritious article of diet and are often made into puddings.

PANIS CANICAEUS, see *Canicæ*—p. *Cibarius seu secundarius, Syncomistos*—p. *Cuculi, Oxalis acetosella*—p. *Porcinus, Cyclamen*.

PANNI, Swathing clothes.

PANNICULE CHARNU, *Carnosus panniculus*.

PANNICULUS. Diminutive of *Pannus*, cloth. A piece of fine cloth. *Pterygion*, (q. v.)

PANNICULUS ADIPOSUS, Cellular membrane—p. *Cordis, Pericardium*—p. *Hymenæus, Hymen*.

The PANNICULUS CARNOsus, *Tu'nica carnosâ, Muscular Web, Mantle*, is a general covering, found in the quadruped, and formed by a thin, subcutaneous muscle, which serves to move the skin. It exists only in certain parts of the human body; as in the forehead, where it is formed by the occipito-frontalis; in the neck, by the platysma myoides; and, in the scrotum, by the cremaster muscle.

PANNUS. A piece of cloth. This word has several other meanings, which are equivocal. It means a tent for a wound. Also, a speck in the eye, resembling a piece of rag; and an irregular nevus or mark on the skin.—Castelli.

PANOCHIA, Bubo.

PANOPHOBIA, *Pantoph'bia, Athym'ia, Pavor*, (F.) *Frayeur nocturne, Souci*, from *Pan*, 'the god Pan,' and *φοβος*, 'fear.' A panic or fear—inspired by the god Pan, according to the opinion of the ancients. Some derive it from *παν*, 'all,' and *φοβος*, 'fear.' This is sometimes morbid, and is a symptom of melancholy.

PANOPHTHALMITIS; from *παν*, 'all,' and *ophthalmitis*; inflammation of the eye. Inflammation of the whole eye.

PANPLEGIA, Pamplegia.

PANSEMENT, Dressing.

PANSIES, Viola tricolor.

PANSPERMIA, from *παν*, 'all,' and *σπερμα*, 'sperm.' The theory of *Dissemination of Germes*, according to which, ova, or germs, are disseminated over all space, undergoing development under favourable circumstances.

PANTAGOGON, Panchymagogum.

PANTICES, Intestine.

PANTING, Anhelatio.

PANTOPHAGUS, Omnivoros.

PANTOPHOBIA, Hydrophobia, Panophobia.

PANUS, Phygethon—p. *Faucium, Stomato-panus*—p. *Inguinalis, Bubo*.

PAP OF THE THROAT, Uvula.

PAPAS AMERICANUS, *Solanum tuberosum*.

PAPAVER, *P. somniferum, Mecon.* The *White Poppy, Papaver sativum*. (F.) *Pavot des Jardins*. Family, Papaveraceæ. Sez. Syst. Polyandria Monogynia.

The CAPSULE OF THE WHITE POPPY, *Codia, κωδία* or *κωδεια, Scaphion, σκαφιον, Papaveris Caput* vel *Cap'sula*, is used in fomentation, as anodyne and relaxant, to inflamed or ulcerated parts. The expressed oil of the seeds is called by the French *Huile d'Œillette*. It is from this poppy that we procure—

OPIMUM; called, also, *Opium Thebaicum, Meconium, Opion, Manus Dei, Affion, Amphium, Afium, Osoron, Laudanum*. It is the milky juice obtained, after the flowering of the plant, by making longitudinal incisions in the capsules and stalks. It is commonly obtained from the Levant or India, where the poppy grows abundantly.

Opium is a compound of morphine, meconic acid, narcotine, caoutchouc, fecula, resin, oil, and several other substances.

*Turkey Opium* is of a heavy, and slightly fetid odour. Its taste is nauseous, bitter, acid,

and warm : it is in flat pieces ; solid and tenacious ; of a dark brown colour and yellowish, when powdered ; marking a light brown, interrupted, streak on paper. In *East India Opium*, the odour is the same, and empyreumatic ; the taste is less bitter, but more nauseous, and the colour darker.

Opium is stimulant, in small doses ; sedative, in large ; narcotic and anodyne ; operating through the nervous system. It is a most valuable remedy in all painful affections and in inflammations, when given so as to produce its full, sedative effect, especially in peritonitis. In diarrhœa and dysentery, it acts as an astringent ; in intermittents, it will often prevent the paroxysm. In typhus, in small doses, it acts as a cordial ; in larger, it allays irritation and produces sleep. When applied externally, its narcotic effects are developed ; and, hence, it is a useful application to irritable sores, painful tumours, &c. Dose, gr.  $\frac{1}{4}$  to  $\frac{1}{2}$  as a stimulant ; gr. j to iv as a sedative.

PAPAVER CEREALE, P. rhœas—p. Corniculatum, Chelidonium majus—p. Erraticum, P. rhœas—p. Luteum, Chelidonium majus.

PAPAVER NIGRUM. This is merely a variety of the white poppy, producing black seeds.

PAPAVER RHŒAS. The systematic and pharmacopœial name of the *Red corn-poppy*. *Papaver erraticum*, *Papaver cereale*, Rhœas, (F.) *Coquelicot*. The heads of this species contain, also, a milky juice of a narcotic quality. A syrup has been directed of its flowers, which has been esteemed diaphoretic and slightly soothing ; but is more admired for its colour than for any other property.

PAPAVERCULUM, Meconium.

PAPAW TREE, Carica Papaya.

PAPAYER, Carica Papaya.

PAPILLA, *Thele*. The end of the breast, or nipple. An eminence similar to a nipple, (q. v.) A name given to small eminences, more or less prominent, at the surface of several parts, particularly of the skin and mucous membranes, in which latter situation they are also called Villi. See Villous. They appear formed by the ultimate expansion of the vessels and nerves, and are susceptible, in some cases, of a kind of erection. They are also called *Papillæ nervosæ*, *P. pyramidal'es*, *Nervous papillæ*, (F.) *Papilles* ou *Papilles nerveuses*, *Houpes nerveuses*.

The PAPIÏLE OF THE KIDNEY, (F.) *Mamelons du rein*, are the projections into the pelvis of the kidney of the apices of the cones of the tubular substance of the kidney. They are also called *Processus mamilla' res*, *Carunculæ papillul' res*, *Pyramides Malpighi' nae*, *Papillæ renum*.

The PAPIÏLE OF THE TONGUE are very numerous and marked. They are observed, particularly, at the upper surface of the organ, and are distinguished into—

1. The *Lenticular papilla*, *Papilla mucosæ*, *P. maxima*, *P. capitata*, *P. callata*, *P. truncata*, *P. caliciformes*. They are arranged at the base of the tongue in two oblique lines having the shape of the letter V ; and united angularly at the foramen cœum. They have, in general, an ovoid or spherical shape, and are merely mucous follicles similar to those of the palate, lips, &c.

2. The *Fungiform* or *Fungoid papilla*, *Papilla mediæ*, *P. Semilenticular'es*, are of indeterminate number, but always more numerous than the preceding. They are irregularly disseminated near the edges and the point of the tongue ; have a rounded and flattened head, supported by a short and narrow footstalk. Their tint is whitish. Of their real nature we are ignorant.

3. The *Conical*, *Conoid' dal*, or *Pyramidal papilla*, *P. min' ima*, *P. villosa*, are the most numerous of all. Their arrangement is more regular in the forepart of the tongue than behind. They resemble small cones ; the base being towards the tongue, and the apex free. The anterior are very small, and have been called *Filiform papillæ*. They appear to be produced by the terminations of the filaments of the lingual nerve, and are surrounded by an evident vascular network.

PAPIÏLÆ CALICIFORMES, see P. of the tongue—p. Capitata, see P. of the tongue—p. Conical, see P. of the tongue—p. Conoidal, see P. of the tongue—p. Filiform, see P. of the tongue—p. Fungiform, see P. of the tongue—p. Fungoid, see P. of the tongue—p. Lenticular, see P. of the tongue—p. Maxima, see P. of the tongue—p. Mediæ, see P. of the tongue—p. Minima, see P. of the tongue—p. Mucosæ, see P. of the tongue—p. Nervous, see Papilla—p. Pyramidal, see P. of the tongue—p. Pyramidales, see Papilla—p. Renum, see P. of the kidney—p. Semilenticulares, see P. of the tongue—p. Truncata, see P. of the tongue—p. Valatæ, see P. of the tongue—p. Villosæ, see P. of the tongue.

PAPILLI-AUT-MAMMILLI-FORMIS, Mastoid.

PAP'ULA. A *pimple*, *Exor'mia*. (F.) *Bouton*, *Bourgeon*. A small, acuminated elevation of the cuticle, with an inflamed base ; very seldom containing a fluid, or suppurating, and commonly terminating in scurf or desquamation.

Papulæ form the first order of Willan and Bateman's arrangement of cutaneous diseases.

PAPULA AGRIA, Lichen agrisus.

PAPPUS AMERICANUS, Solanum tuberosum.

PAQUERETTE VIVACE, Bellis.

PAR OPTICUM NERVORUM, Optic nerve—p. Primum nervorum cerebri, Olfactory nerves—p. Quintum nervorum cerebri, Trigemini—p. Secundum nervorum, Optic nerve—p. Septimum sive faciale, Facial nerve—p. Trigemini, Trigemini—p. Trium funicularum, Trigemini—p. Vagus, Pneumogastric—p. Visorius, Optic nerve.

PARA, *παρα*, a common prefix, 'by, near, contrary to, through,' (*per*;) 'above and beyond,' (*ultra*;) 'besides,' (*præter*.) In certain terms, as in *Paracacis*, *Parapsis*, *Parabysina*, &c., used by Dr. Good, *Para* means a defective or morbid condition.

PARABALANUS, from *παραβαλλειν*, 'to expose.' A name given, by the ancients, to a person who devoted himself to the service of the sick in hospitals ; and particularly during epidemics and the plague.

PARACENT'RIUM. Woolhouse has given this appellation to a small trocar, em-

ployed by Nuck for puncturing the eye in cases of dropsy of that organ.

**PARACENTE'SIS**, *Perforatio, Punctio, Punctura, Cenebatus, Cene'sis, Compunctio*; from *παράκεντω*, 'I pierce through.' The operation of *tapping* to evacuate the collected fluid in ascites, ovarian dropsy, &c.

**PARACENTESIS**, Puncturing.

**PARACENTICION**, Trocar.

**PARACEPHALUS**, Anencephalus.

**PARACMASTIC**, *Paracmas'ticus*, from *παρμαστω*, 'I decrease.' Decreasing. An epithet to a distemper, which gradually decreases. Also, according to Galen, the period of life when a person is said to grow old, which he places at from 35 to 49, after which he is said to be old,—a definition that would not suit us at the present day.—Gorræus and Castelli.

**PARACMASTICOS**. See *Acmaستicos*.

**PARACME**, Decline.

**PARACOE**. See *Cophosis*.

**PARACOUSIA**. See *Cophosis*.

**PARACOPE**, *Paraph'ora, Paracrusis*, from *παρακοπω*, 'I strike falsely.' Delirium. In Hippocrates, it means the slight delirium, which sometimes occurs in febrile diseases.

**PARACRUSIS**, *Paracope*.

**PARACRUSIS**, *Cophosis*.

**PARACRUSIS ACRIS**, *Auditus acrior, Paracrusis oxycoi'a*, from *παρα*, 'defective,' and *ακουσις*, 'the act of hearing.' Hearing painfully acute and intolerant of the lowest sounds; a symptom in otalgia, epilepsy, cephalitis, and febrile affections.

**PARACRUSIS DUPLICATA**, Double hearing—p. *Imaginaria, Tinnitus aurium*—p. *Imperfecta, Double hearing, P. perversa*—p. *Obtusa, Barycoia*—p. *Oxycoia, P. acris*.

**PARACRUSIS PERVERSA**, *P. Willisiana, P. imperfecta, Perverse hearing*. The ear only sensible to articulate sounds, when excited by other and louder sounds intermixed with them.—Good.

**PARACRUSIS SURDITAS**, see *Cophosis*—p. *Willisiana, P. perversa*.

**PARACYESIS**, *Pregnancy*, morbid, *Pregnancy, preternatural*—p. *Abortus, Abortion*—p. *Tubaria, Salpingo-cyesis*.

**PARACYNANCHE**. Inflammation of the external muscles of the larynx. According to others, a slight cyanache. (q. v.)

**PARÆSTHESIS**, *Paresthesis*—p. *Auditus flacca, Proptoma auricularum*.

**PARAGEUSIS**, *Ageustia*.

**PARAGLOSSA**, from *παρα*, and *γλωσσα*, 'the tongue.' Swelling of the tongue, *Dysphagia Lingual'sa*. Sauvages, under the term *Paraglossa deglutitoria*, means a pretended doubling of the tongue into the pharynx, (F.) *Renversement de la langue*.

**PARAGOGE**, *Adduction, Coaptation*.

**PARAGOMPHOSIS**, *Paragomphosis capitis*; from *παρα*, 'by,' 'near,' and *γομφωσις*, 'a nailing.' Wedging of the head of the child in the pelvis during labour.

**PARALAMP'SIS**, *παρалаμψις*, from *παρалаμνω*, 'I shine a little.' A cicatrix on the transparent part of the eye.—Hippocr.

**PARALLAGMA**, *Chevauchement*.

**PARALLAXIS**, *Chevauchement*.

**PARALLE'LA**. A kind of scurfy, cutaneous

eruption, affecting the palms of the hands and symptomatic of the venereal disease.—Forestus.

**PARALO'PHIA**, from *παρα*, 'near,' and *λοφια*, 'the first vertebra of the back.' The lower and lateral part of the neck, near the vertebra.—Keil.

**PARALYSIE**, *Paralysis*.

**PARALYSIS**, *Par'esis, Resolutio membrorum, Curus paralysis, Catal'ysis, (F.) Paralytic, Résolution des membres; Palsy*, from *παρалаνω*, 'I relax.' Abolition or great diminution of the voluntary motions, and, sometimes, of sensation, in one or more parts of the body.

*Palsy* is said to be *local*, when it affects only a few muscles. When it extends to half the body, vertically or horizontally, it is called *Hemiple'gia*, or *Paraple'gia*, (q. v.) It is commonly symptomatic of disease of the brain or of the nerves themselves, and is a frequent accompaniment, precursor, or successor of apoplexy. The immediate cause is, generally, pressure, either by blood effused or by serum, or by vascular turgescence. At its onset, therefore, blood-letting may be advisable; but, afterwards, the disease becomes one of nervous debility and requires stimulants—to the paralyzed parts, or to the mucous membranes:—Frictions, sinapisms, blisters, the moxa, baths, electricity, galvanism, purgatives, and the nux vomica, which last has the property of exciting movements where the will has no longer power. The disease generally admits only of palliation, and is extremely apt to recur.

**PARALYSIS**, *Primula veris*—p. *Berberia, Beriberi*—p. *Hemiplegia, Hemiplegia*—p. *Medullaris, Paraplegia*—p. *Rachialgia, Colic, metallic*—p. *Scorbutica, Pellagra*—p. *Spinalis, Paraplegia*.

**PARAME'NIA**, *παραμηνια*, from *παρα*, 'badly,' and *μηρ*, 'a month.' *Mis-menstruation*. Difficult menstruation. (q. v.)

**PARAMENIA DIFFICILIS**, *Dysmenorrhœa*—p. *Erroris, Menstruation, vicarious*—p. *Obstructionis*, see *Amenorrhœa*—p. *Profusa, Menorrhagia*—p. *Superflua, Menorrhagia*.

**PARAME'RIA**, *παραμρηια*, from *παρα*, 'about,' and *μηρος*, 'the thigh.' The internal parts of the thigh.

**PARAMESOS**, *Annular finger*, see *Digitus*.

**PARANCEA**, *Delirium, Dementia*.

**PARANYM'PHUS**, from *παρα*, 'near,' and *νυμφη*, 'a young spouse,' 'a bride.' A name given by the ancients, to him who led the bride to the house of her husband. The term was adopted into the ancient schools of medicine, to designate the usual discourse pronounced at the end of the prescribed period of study for licentiate, in which the qualifications and merits of the candidate were described.

**PARAPATHIA**, *Pathomania*.

**PARAPECHYON**, *Radius*.

**PARAPHIMO'SIS**, *Periphimo'sis*; from *παρα*, 'about,' and *φιμωσις*, 'I bride.' Strangulation of the glans penis, owing to the opening of the prepuce being too narrow. It frequently happens in persons affected with phimosis, when the prepuce has been pushed violently behind the base of the glans, during copulation, &c.

In paraphimosis, the narrow and resisting aperture of the prepuce forms, behind the corona glandis, a kind of ligature, which strangu-

lates the part, causes it to swell and inflame, and even to become gangrenous.

Attempts must be made to bring back the prepuce. These excite considerable pain, yet they must be persevered in for some time; and should they not succeed, the rings, formed by the tumefied prepuce, must be cut transverse-ly, and the antiphlogistic treatment be adopted.

PARAPHOBIA, Hydrophobia.

PARAPHO'NIA, *Clangor*; from *παρα*, and *φωνη*, 'the voice.' Affection of the voice, when its character or *timbre* is disagreeable.

PARAPHONIA CLANGENS, *Oxyphonia*—p. Gutturalis, Asaphia—p. Nasalis, Rhinophonia—p. Rauca, Rauceo—p. Ulcerosa, Oxyphonia.

PARAPHORA, Delirium, Paracope.

PARAPHRENESIS, Paraphrenitis—p. Diaphragmatica, Diaphragmitis.

PARAPHRENITIS, from *παρα*, 'near,' and *φρενες*, 'the diaphragm.' *Paraphrenēsis*. A name given to inflammation of the diaphragm (see Diaphragmitis,) which was supposed always to produce delirium:—as well as to the delirium itself, accompanying that affection.—See Phrenitis.

PARAPHROSYNE, Delirium.

PARAPHROTĒS, Delirium.

PARAPLE'GIA, *Paraplexia*, *Rhachiparalysis*, *Rhachiparalysis*, *Paralysis spinalis*, *P. medullaris*, *Curus paralysis paraplexia*, from *παρα*, dim. particle, and *πλησσω*, 'I strike.' Palsy of the lower half of the body, including the bladder and rectum. It is, generally, owing to disease of some part of the cerebro-spinal axis; especially of the spinal portion.

The ancients sometimes used the term for incomplete apoplexy. Some authors have, also, made a distinction between *paraplegia* and *paraplexia*,—using the former for a *partial apoplexy*:—the latter for *general* or *complete apoplexy*.

PARAPLEURITIS, Pleurodynia.

PARAPLEXIA, Paraplegia.

PARAP'OPLEXY, *Paraplexia*; from *παρα*, dim., and *απληξια*, 'apoplexy.' False apoplexy; a soporose state, resembling apoplexy; and, especially, that which occurs in the paroxysms of pernicious intermittents.

PARAP'SIS, from *παρα*, 'defectively,' and *απτομαι*, 'I touch.' Sense of touch or general feeling vitiated or lost.—Good.

PARAP'SIS ACRIS TEMERITUDO, Soreness—p. Experts, Torpor—p. Illusoria, Pseudæsthesia—p. Pruritus, Itching.

PARARMA, Fimbria.

PARARRHYTH'MOS, from *παρα*, 'dim,' and *ρυθμος*, 'rhythm.' An epithet for the pulse, when it has not the rhythm proper to the age and constitution of the individual.

PARARTHRE'MA, from *παρα*, and *αρθρον*, 'a joint.' Incomplete luxation.

PARASCEPAS'TRA, from *παρα*, and *σκεπαζω*, 'I cover.' A cup or bandage, which covers the whole head.—Galen.

PARASCEUE, Apparatus.

PARAS'CHIDES, from *παρα* and *σχιζω*, 'I cleave.' Fragments or splinters of a broken bone.

PARASITE, *Parasitus*, *παροσιτος*, from *παρα*, 'near,' and *σιτος*, 'coitn,' 'food.' Para-

sites are plants which attach themselves to other plants; and animals which live in or on the bodies of other animals,—so as to subsist at their expense. The mistletoe is a parasitic plant:—the louse a parasitic animal. The chief parasitic animals are the *Pediculus humanus corporis*, *P. capitis*, *P. pubis*, *Pulex irritans*, *P. penetrans*, and the *Acarus Scabiei*.

PARASITISMUS INTESTINALIS, Helminthiasis—p. Superficiæ, Malis.

PARASPADIA, from *παρα*, and *σπαω*, 'I draw.' A preternatural opening of the urethra at the side of the penis. One whose urethra opens in this manner is called *Paraspadicus* and *Paraspadias*.

PARASPHAGIS, from *παρα*, 'near,' and *σφαγη*, 'the throat.' The part of the neck contiguous to the clavicles.

PARASTATA, Epididymis.

PARASTATĒ, Prostate—p. Glandulæ, Prostatae.

PARAS'TATĒ, from *παριστιμι*, 'I stand near.' In Hippocrates, it means the epididymis. The epididymes were called by Herophilus and Galen *Vario'sæ parastata*, to distinguish them from the *glandulæ'sæ parastata* or *prostate*, (q. v.) Rufus of Ephesus called the Tubæ Fallopiantæ *Parastata vario'sæ*.

PARASTREM'MA, from *παροστρεφω*, 'I distort or pervert.' Convulsive distortion of the face, the soft parts being drawn laterally.

PARASYNANCHE, Cyanche parotidæa.

PARATH'ENAR, from *παρα*, 'near,' and *θεναι*, 'the sole of the foot.' Winslow called *grand parathenar*, *parathenar major*, a portion of the abductor of the little toe; and *petit parathenar*, *parathenar minor*, the short flexor of that toe.

PARATHENAR MAJOR, Abductor minimi digiti pedis—p. Minor, Flexor brevis minimi digiti pedis.

PARATHROMA, Elongatio.

PARATRIMMA, Chafing.

PARATROPH'Ē, from *παρα*, 'dim,' and *τροφη*, 'nourishment.' Misnutrition.

PAREGORICUS, Anodyne.

PARĒIA, Gena.

PARĒIRA BRAVA, *Cissampelos Pareira*, *Pareira*, *Butua*, *Parieta brava*, *Abu'ta*, *Abu'tua*, *Bolou*, *Caa-peba Overo butua*. Family, Menispermæ. *Sex. Syst.* Diœcia Monadelphia. The root of this plant,—a native of South America and the West Indies,—has a sweet taste with considerable bitterness and slight roughness. It has been recommended in nephritic and calculous affections; but it is not much used.

PARĒLLE, *Rumex hydrolapathum*.

PARENCEPHALIS, Cerebellum.

PARENCEPHALOCELĒ, from *παρεγκεφαλις*, 'the cerebellum,' and *κηλη*, 'a tumour,' *Hernia of the cerebellum*; a very rare disease. It occurs under the form of a soft, indolent, or slightly painful tumour, without change in the colour of the skin, and is situate in the occipital region. It is constituted of the cerebellum, which escapes through an aperture in the occipital bone. Great attention must be paid not to mistake it for an ordinary tumour, as its extirpation would be attended with fatal consequences.

**PARENCHYMA**, *Caro parenchymat'ica* seu *vis'cerum* seu *viscera'lis* seu *viscero'sa*, *Substantia parenchymato'sa*, *Procheuma*. The texture of glandular and other organs, composed of agglomerated globules united by cellular tissue, and tearing with more or less facility. Such is the texture of the liver, kidneys, &c. *Παρεγχυμα* signifies, in Greek, effusion; and it was believed that this tissue consisted of effused blood or other fluid.

**PARÆSIS**, from *παρημι*, 'I relax.' Paralysis, (q. v.) According to some, a slight, incomplete paralysis, affecting motion, not sensation.

**PARESTHESIS** or **PARÆSTHESIS**, *Sensus imperfectus*, from *παρα*, 'defective,' and *αισθησις*, 'sensation.' Congenital misconstruction of the external organs of sense. A genus in the nosology of Good.

**PARFUM**, Suffimentum.

**PARIERA BRAVA**, Pareira brava.

**PARIES**, Table.

**PARIETAL**, *Parieta'lis*, from *paries*, 'a wall.'

The **PARIETAL BONES**, *Ossa parietal'ia*, *Ossa vertical'ia*, *Ossa verticis*, *Ossa sincipit'is*, *Ossa breg'matis*, *Ossa nerva'lia*, are two fellow-bones, occupying the lateral and upper parts of the cranium, in the formation of which they assist. They have a quadrilateral shape; their external surface is convex, and presents, at its middle part, an eminence called the *Parietal protuberance*, (F.) *Bosse pariétale*. Their inner or cerebral surface, which is concave, has a depression that corresponds with the preceding eminence, and which is called the *Fossa parietalis*. Above and behind, near the superior edge of these bones, is a foramen, which does not always exist, called the *Parietal foramen*, *Foramen parietale*, through which passes a vein that opens into the superior longitudinal sinus of the dura mater. Each parietal bone is articulated *above*, with its fellow; *below*, with the temporal bone; *before*, with the frontal; *behind*, with the occipital, and by the anterior and inferior angle with the great ala of the sphenoid. Each parietal bone is developed from a single point of ossification.

**PARIETARIA**, *P. officinal'is*, *Helx'inè*, *Vit'aria*. The *Wall pellitory*, (F.) *Pariétaire commune*. Family, Urticæ. *Sex. Syst.* Polygamia Monœcia. This plant grows on old walls, and contains much nitrate of potassa. It is diuretic, but not much used.

**PARIETES**, *Paries*, (F.) *Parois*, 'a wall.' A name given to parts which form the enclosure—the limits of different cavities of the body, as the *Parietes of the cranium, chest, &c.*

**PARIS**, *P. quadrifolia*, *Oneberry*, *Truelove*, (F.) *Parisette*, *Ruisin de Renard*. It possesses narcotic properties, and was formerly considered a powerful love philter. It is emetic, and is sometimes used externally as a resolvent and anodyne.

**PARISETTE**, Paris.

**PARISTH'MIA**, *παρισθμια*. A word employed to designate the tonsils, and, likewise, inflammation of the tonsils. *Cynanche tonsillar'is*, (q. v.)

**PARISTHMIOTOMUS**, from *παρισθμια*, 'the tonsils,' and *τεμνω*, 'I cut.' An instrument with which the tonsils were formerly scarified.

**PARISTHMITIS**, Cynanche.

**PAROCHETUSIS**, Derivation.

**PARODONTIDES**, from *παρα*, 'near,' and *odontos*, 'a tooth.' Tumours on the gums; parulis, &c.

**PARODYNIA**, Dystocia—p. *Perversa*, Presentation, preternatural.

**PAROIS**, Parietes.

**PAROLE**, Voice, articulated.

**PARONIR'IA**, from *παρα*, and *νειρον*, 'a dream.' Depraved, disturbed, or morbid dreaming.

*Onciodynia act'iva*, *Erethis mus onciodynia*. The voluntary organs, connected with the passing train of ideas, overpowered by the force of the imagination during dreaming, and involuntarily excited to their natural or accustomed actions, while the other organs remain asleep.—Good.

**PARONIRIA AMBULANS**, Somnambulism—p. *Salax*, pollution.

**PARONY'CHIA**, *Par'uris*, *Redu'cia*, *Panarit'ium*, *Pandalu'tium*, *Passa*, *Dactyl'itis*, *Panar'ium*, *Onych'ia*, from *παρα*, 'near,' and *ονυξ*, 'the nail.' The ancients gave this name to an inflammatory tumour, seated near the nail. Some of the moderns have extended it to inflammation of the hand, and even of the forearm. It usually means every phlegmonous tumour of the fingers or toes, and especially of the first phalanx. Four kinds of paronychia are commonly pointed out: 1. That seated between the epidermis and skin, called in France *Tourniole*. 2. That seated in the subcutaneous cellular tissue. 3. That occupying the sheath of a tendon; and 4. That considered to be seated between the periosteum and bone. These three last are only different degrees of the same disease, constituting *Whitlow*, (F.) *Mal d'aventure*:—the worst kinds, in English, are called *Felon*.

The inflammation generally commences in the subcutaneous cellular tissue, and spreads to other parts, occasioning excessive, lancinating pain, owing to the parts being put upon the stretch; hence, the necessity of dividing them freely,—even down to the bone, when there is reason to believe that the affection belongs to the fourth division,—making use of emollient applications, the antiphlogistic treatment, and opiates to relieve pain.

**PARONYCHIA**, *Asplenium ruta muraria*—p. *Digitum*, *Digitum*.

**PAROPIA**, *Canthus* (lesser.)

**PAROPSIS**, *Dysæsthesia visualis*—p. *Amaurosis*, *Amaurosis*—p. *Cataracta*, *Cataracta*—p. *Glaucois*, *Glaucoma*—p. *Illusoria*, *Pseudo-blepsia*—p. *Lateralis*, *Dysopia lateralis*—p. *Longinqua*, *Presbytia*—p. *Lucifuga*, *Nyctalopia*—p. *Noctifuga*, *Hemeralopia*—p. *Propinqua*, *Myopia*—p. *Staphyloma*, *Staphyloma*—p. *Staphyloma purulentum*, *Hypopyon*—p. *Staphyloma simplex*, *Hydrophthalmia*—p. *Strabismus*, *Strabismus*—p. *Synezisis*, *Synezisis*.

**PAROPTESIS**, from *παρα*, dim., and *επτωω*, 'I roast.' Forcing a sweat by placing a patient before the fire, or putting him in a dry bath.

**PARORA'SIS**, from *παρα*, dim., and *ραωω*, 'I see.' Perversion of sight, which prevents the person from judging accurately of the colour of objects. *Hallucination*, (q. v.)—Galen.

**PARORCHIDIUM**, from *παρα*, dim., 'some-

thing wrong,' and *ορχις*, 'testicle.' Any position of one or both testicles, different from that which they ought to occupy in the scrotum;—whether they may not have descended through the abdominal ring, or are drawn up to the groins by the cremaster muscle.

**PARORCHIDO-ENTEROCELE**, *Hernia parorchido-enterica*. Intestinal hernia complicated with displacement of the testicle.—*Sauvages*.

**PAROSMIS**, *Anosmia*.

**PAROS'TIA**, from *παρα*, 'defectively,' and *οσσειν*, 'a bone.' Bones untempered in their substance, and incapable of affording proper support.—*Good*.

**PAROSTIA FLEXILIS**, *Mollities ossium*—*p. Fragilis*, *Fragilitas ossium*.

**PAROTID**, *Gland'ula parotidea*, *G. ad Aures*, *Parotis*, *Animel'la*, *Alimel'la*, *Lacticin'ia*; from *παρα*, 'about,' and *ους*, 'the ear.' The largest of the salivary glands, seated under the ear, and near the angle of the lower jaw. It is composed of many separate lobes, giving rise to excretory ducts, which unite to form one canal, called the *Parotid duct* or *Steno's canal*—the *Ductus superior* or *Superior salivary canal* of some. This duct, after having advanced horizontally into the substance of the cheek, proceeds through an opening in the buccinator muscle, and terminates in the mouth opposite the second upper molaris. About the middle of its course, it sometimes receives the excretory duct of a glandular body, situate in its vicinity, and called the *Accessory Gland of the Parotid*, *Socia Parotidis*.

In the substance of the parotid are found—a number of branches of the facial nerve, of the transverse arteries of the face, and the posterior auricular. It receives, also, some filaments from the inferior maxillary nerve, and from the ascending branches of the superficial cervical plexus. Its lymphatic vessels are somewhat numerous, and pass into ganglions situate at its surface or behind the angle of the jaw.

The parotid secretes saliva, and pours it copiously into the mouth.

**PAROTID, ACCESSORY GLAND OF THE**. See *Parotid*.

**PAROTIDE**, *Parotis*.

**PAROTIDON'CUS**, from *παρωτις*, 'the parotid,' and *ογκος*, 'a tumour.' A swelling of the parotid.

**PAROTIS**, (F.) *Parotide*, *Phleg'monē parotidea*, *Inflammat'io parotidum*, *Parotitis*, (F.) *Oreillon*, *Ourlle*, is, also, the name of a tumour, seated under the ear; which is reddish, hard, and attended with obtuse pain; the progress to suppuration being slow and difficult. Sometimes it is of a malignant character, sloughing, and long protracted.

**PAROTIS CONTAGIOSA**, *Cynanche parotidæa*—*p. Epidemica*, *Cynanche parotidæa*—*p. Seroso glutine tumens*, *Cynanche parotidæa*—*p. Spuria*, *Cynanche parotidæa*.

**PAROTITIS**, *Cynanche parotidæa*, *Parotis*.

**PAR'OXYSM**, *Paroxys'mus*, from *παροξυνοω*, 'I irritate.' *Impetus*, *Insultus*, *Invas'io*, *Exacerbat'io*, *Acces'sio*, *Acces'sus*, (F.) *Exacerbation* *Redoubtment*; also, *Accès*. The augmentation which supervenes at equal or unequal intervals

in the symptoms of acute diseases. Also, a periodical exacerbation or fit of a disease.

**PARS INFERIOR PEDIS**, *Sole*—*p. Naturalis medicinæ*, *Physiology*—*p. Prima asperæ arteriæ*, *Larynx*—*p. Vaga*, *Pneumogastric*—*p. Virilis*, *Penis*.

**PARSLEY, COMMON**, *Apium petroselinum*—*p. Macedonian*, *Bubon Macedonicum*—*p. Mountain*, black, *Athamanta aureoselinum*.

**PARSNEP, COW**, *Heraclium spondylium*—*p. Garden*, *Pastinaca sativa*.

**PART**, see *Parturition*—*p. legitime et illegitime*, see *Parturition*.

**PARTES GENERATIONI INSERVIENTES**, *Genital organs*—*p. Genitales*, *Genital organs*.

**PARTHENIUM FEBRIFUGA**, *Matricaria*—*p. Mas*, *Tanacetum*.

**PARTHENIUS**, (*Morbus*;) from *παρθενος*, 'a virgin.' A disease in a young female. Also, *chlorosis*.

**PARTIES, LES**, *Genital organs*—*p. Génitales*, *Genital organs*—*p. Hontcuses*, *Genital organs*—*p. Génitoires*, *Genital organs*—*p. Naturelles*, *Genital organs*—*p. Nobles*, *Genital organs*—*p. Sexuelles*, *Genital organs*.

**PARTIO**, *Parturition*.

**PARTRIDGE-BERRY**, *Gaultheria*.

**PARTS, THE**, *Genital organs*.

**PARTURA**, *Parturition*.

**PARTURIENT**, *Parturiens*, from *pario*, 'I bring forth.'

The *Parturient*, *Childbed*, or *Lying-in state* requires careful management, and is subject to various diseases.

**PARTURIGO**, *Parturition*.

**PARTURITION**, *Puerperium*, *Partus*, *Partio*, *Partur'itio*, *Partur'igo*, *Partu'ra*, *Tocos*, *To'ctos*, *Lochi'a*, *Apocye'sis*, *Labour*, (F.) *Accouchement*, *Couchc*, *Travail d'Enfant*. The delivery of the fœtus and its appendages. Labour is the necessary consequence of conception, pregnancy, and the completion of gestation. It does not take place at the full time, until after nine months of utero-gestation: the causes producing it being the contraction of the uterus and abdominal muscles. By different authors, the stages of labour have been variously divided. We may, perhaps, admit of four. The first stage comprises the precursory signs. One, two, or three days before labour, a mucous discharge, streaked with blood, takes place from the vagina, which is called the *Signum*, *Leucorrhœa Nubothi*, *Hæmorrhœgia Nubothi*, *Labour-show*, or *Show*; and, along with this, trifling grinding pains, called by the French *Mouches*, are felt in the loins and abdomen. *Second stage*:—Peculiar pains, which extend from the lumbar region towards the uterus; tension and dilatation of the neck and orifice of that organ; protrusion into the vagina of the envelopes of the fœtus, forming the *bag of waters*, (F.) *Poche des eaux*; and rupture or breaking of the waters. *Third stage*:—Contractions of the uterus and abdominal muscles; forcing pains; the head of the fœtus becomes engaged in the pelvis; the occiput being commonly situate above the left acetabulum, passes beneath the arch of the pubis. *Fourth stage*:—the head now presents at the vulva, the perineum being con-

siderably distended; at length it clears the external parts, and the rest of the body is easily disengaged. The child still continues attached to the mother by the umbilical cord, which has to be divided. In the course of fifteen or twenty minutes, trifling pains occur, and the secundines are expelled. This completes delivery. In by far the majority of cases, the head is the presenting part, the occiput directed anteriorly, and the face posteriorly. Of 12,633 children, born at the Hospital *La Maternité* in Paris, from the tenth of December, 1797, to the 31st of July, 1806, the following were the presentations:

|                                      |              |
|--------------------------------------|--------------|
| The head, with the face posteriorly, | 12,120       |
| The head anteriorly,                 | 63           |
| The breech,                          | 198          |
| The feet,                            | 147          |
| The knees,                           | 3            |
| Other positions,                     | 102          |
|                                      | <hr/> 12,633 |

The following table, drawn up from data furnished by Velpeau, gives an approximative view of the comparative number of presentations, according to the experience of the individuals mentioned:

TABLE, EXHIBITING THE RATIO OF PRESENTATIONS IN 1000 CASES.

|                                     | ACCORDING TO |        |                |                    |        |         |                          |       |
|-------------------------------------|--------------|--------|----------------|--------------------|--------|---------|--------------------------|-------|

| Of the pelvis,                      |              |        |                | 2.6                |        |         |                          |       |
| Of the foot,                        | 36           | 23     | 29             | 36                 | 47     |         |                          | 29    |
| Of the knees,                       | 12.7         | 9.4    |                | 14                 |        |         |                          | 10.3  |
| Of the breech,                      |              |        | 0.19           | 0.40               |        |         |                          |       |
| Of the trunk,                       | 23           | 13     | 18             | 22                 |        |         |                          | 19    |
| Requiring Forceps,                  |              |        | 4.6            | 5.3                | 4.8    |         |                          |       |
| Turning,                            | 6.6          | 4.7    | 4.6            | 3.4                | 3.6    |         |                          | 5.7   |
| Cephalotomy.                        | 16           | 4.7    | 7.8            | 7.2                |        |         |                          | 5.9   |
|                                     | 3.3          | 5.2    | 4.77           | 0.53               | 2.4    |         |                          | 1.5   |

Labour has received different names, according to the period of pregnancy at which it occurs, and the mode in which it takes place. It is called *miscarriage* or *abortion*, (q. v.,) prior to the 7th month; *premature labour*, between this and 8 months and a half; and *labour at the full period*,—(F.) *Accouchement à terme*,—when it happens at the end of 9 months.

Labours have, likewise, been variously divided by different authors. Perhaps the one, into *Natural*, *Præternatural*, and *Laborious*, is as common as any;—*Natural Labour* meaning, that which would occur without manual assist-

ance; *præternatural*, requiring the assistance of art, but by the hand solely; and, *laborious*, requiring instrumental assistance; which M. Capuron calls *Accouchement Mécanique*.

The French use the term *Part*, at times, synonymously with *delivery*; at others, with *fœtus*. *Suppression de part* means concealment of delivery: *Part légitime*, a fœtus which comes into the world with the conditions necessary for its enjoying advantages granted by law; and *Part illégitime*, one that does not fall under those conditions.

TABLE OF THE COURSE AND MANAGEMENT OF DIFFERENT KINDS OF LABOURS.

| I. NATURAL LABOURS;  |  |  |
|--|--|--|
| Or those in which Delivery can be effected without Assistance. |  |  |
| HEAD PRESENTING.<br>(Four Positions.)                          | 1. <i>Occiput towards the Left Acetabulum.</i>             | The head with the chin bent upon the chest clears the brim of the pelvis. Motion of rotation produced by the inclined planes of the pelvis: the occipital protuberance is carried behind the symphysis pubis, and the face towards the hollow of the sacrum.   |
|  | 2. <i>Occiput towards the Right Acetabulum.</i>            | The head attains the outlet: clears it; the occiput being first disengaged, and the face afterwards, which passes successively along the whole of the hollow of the sacrum. The shoulders enter the brim diagonally; and execute the movement of rotation. The one behind first clears the outlet. The same thing occurs with the nates. |
|  | 3. <i>Occiput towards the Right Sacro-iliac Symphysis.</i> | The same course is here followed: except that after the rotatory movement, the face passes behind the symphysis pubis, and the occiput into the hollow of the sacrum. The occiput is first extruded;—the face next.  |
|  | 4. <i>Occiput towards the Left Sacro-iliac Symphysis.</i>  | When the chin presents and is turned forwards, the face is first expelled: the head is thrown backwards. This presentation is uncommon. If the chin presents and is thrown backwards, natural delivery cannot be effected.   |

LOWER EXTREMITY  
PRESENTING.  
(Four Positions of  
the Feet, Knees, and  
Breech.)

1. *Heel, Tibia, or Sacrum towards the Left Acetabulum.*
2. *Heel, Tibia, or Sacrum towards the Right Acetabulum.*
3. *Heel, Tibia, or Sacrum towards the Right Sacro-iliac Symphysis.*
4. *Heel, Tibia, or Sacrum towards the Left Sacro-iliac Symphysis.*

The nates enter the brim diagonally: movement of rotation: the one passes behind the symphysis pubis; the other towards the hollow of the sacrum. The one behind is first extruded.

The same thing happens to the shoulders. The chin is bent upon the chest to clear the brim: movement of rotation: the occiput passes behind the symphysis pubis, and the face towards the hollow of the sacrum. The face clears the outlet first; the occiput last.

The same progress, except that after the movement of rotation, the face is towards the pubis, and the occiput towards the sacrum. The face is here again delivered first.

### II. PRETERNATURAL LABOURS:

*Or those which require Manual Assistance only.*

I. PRESENTATION OF THE  
HEAD, UPPER EXTREMITIES,  
BACK, ABDOMEN,  
&c.

1. When the labour is without any serious complication, and the head is not in a good position at the brim of the pelvis; endeavours are to be made to place it in its natural position; the hand to be introduced with the fingers united, and the long diameter of the head to be placed diagonally in the brim, if possible. Or, the lever may be fixed over the occiput, by drawing down which, a closer approximation of the chin and chest may be effected; the position of the head to the pelvis being at the same time attended to.
2. If complicated with syncope, convulsions, hemorrhage, want of uterine action, &c. the feet must be laid hold of, and the child *turned*. For this purpose, empty the rectum and bladder; and turn, if possible, prior to the escape of the liquor amnii. Generally, the female may be placed on her left side, with the breech over the edge of the bed. Use the right or left hand, according as the feet of the child are to the right or left side of the pelvis; always so introducing the hand, that the child shall be in its palm, and the back of the hand opposed to the inner surface of the uterus. The hand and arm to be introduced during an interval of pain; and they must be flattened and tranquil whilst the uterus is contracting forcibly. If both feet cannot be readily brought down, seize one, and tie a fillet around it.

If the toes point to the vertebral column or to the abdomen of the mother, the head, in its descent, will not enter the pelvis: the chin and occiput will be hitched on the pubis and promontory of the sacrum. In such case, grasp the nates as soon as they have passed the os externum; and, during a pain, endeavour to direct the toes towards either sacro-iliac synchondrosis. When the fingers can be passed along the body of the child and over the shoulders to the bend of the elbows, draw down the arms successively. When the body is expelled, and the head filling up the brim, the termination of labour must be accelerated by passing two fingers over the shoulder of the child; using moderate and steady extracting power, whilst one finger of the other hand, passed into the mouth, depresses the chin on the sternum. In this way the head may be extracted.

### III. INSTRUMENTAL LABOURS:

*Or those requiring the Assistance of appropriate Instruments.*

GENERAL OBSERVATIONS.

If the pains become feeble, or inadequate from any cause;—or if the presenting part is firmly wedged in the pelvis; or the woman is becoming exhausted, instrumental assistance may be required. In all such cases, empty the bladder and rectum; wait till the os uteri is in a fit state; afford assistance during the pains; introduce the instrument during the intervals between the pains; have the patient on her left side, (generally;) and extract according to the axes of brim and outlet, as the case may be.

1. *Short Forceps.*

Apply these to the sides of the head of the child, so that the ears and parietal protuberances may be within the fenestræ. Introduce the left-hand blade first; the index and middle fingers of the right hand guiding it to the ear. With the right hand pass the other in an opposite line, corresponding with the course of the first blade, guided by the fore and middle fingers of the left hand; the third and little finger being employed to retain the left-hand blade in place; humour the instrument so as to allow the blades to lock. The handles may now be tied gently together. The force used must be from blade to blade, with a gentle, tractile effort.

2. *Long Forceps.*

Applicable where the head does not enter the brim. The long forceps must be applied, in most cases, over the occiput and face of the child, so that the convex edges of the blades may be towards the hollow of the sacrum. When used, the power may be exerted from side to side, with moderate traction.

3. *Lever or Vectis.*

The lever is applicable to the same cases as the forceps. It must not be used strictly as a lever, but as a hook with which to draw downwards. It may be applied to any part of the head, but is generally hitched on the occiput.

4. *Fillet and Blunt Hook.*

In certain cases of breech and knee presentation, where the hand is insufficient, it may be necessary to pass over the joint a fillet, or the blunt hook, with which to exert some force of traction. The operation is very simple.

EMBRYULCIA.

Disproportionate size of head, or distorted or deformed pelvis, may require the child to be destroyed, and its bulk lessened; or the Cæsarean section or symphysiotomy, or the induction of premature labour may be called for.

The instruments required here, are the *Perforator, Crotchet, and Craniotomy Forceps*. Make steady pressure on the abdomen: pass two fingers of the left hand up to the head: feel for a suture or fontanelle; introduce the perforator and bore through, until the progress of the instrument is arrested by its shoulders. Open the handles, and turn the instrument in different directions, so

|  |   |
|--|---|
| EMBRYULCIA.  | that the opening may be large enough to admit the perforator, with which the brain must be broken down.   |
| SYMPHYOTOMY AND CESAREAN SECTION.                  | If, after this, delivery cannot be accomplished without further aid, pass up the craniotomy forceps; open the handles slightly, and introduce the blade without teeth within the cranium. On closing the forceps, a hold is obtained; and a tractive force can now be exerted during the pains; and the extrusion of the child be effected.                               |
| SEPARATION OF THE HEAD OF THE FÆTUS FROM THE BODY. | Should great difficulty exist at the brim, the bones at the top of the head may have to be removed, until the base alone remains. The chin must then be brought through first.  |
| INDUCTION OF PREMATURE LABOUR.                     | The crochet is often used instead of the craniotomy forceps, being passed into the opening made by the perforator, and hooked upon some bony projection in the interior of the skull; but it is not a good instrument. In presentations of the face demanding perforation of the cranium, the perforator should be introduced just above the nose in the sagittal suture. |
|  | When it is necessary to open the head after the lower extremities have been expelled, the perforation must be made behind the ear.  |
|  | In cases of great narrowness of the pelvis, the operation of <i>Symphysotomy</i> , (q. v.) has been adopted by French practitioners,—rarely by British or American; and in extreme cases recourse has been had to the <i>Cæsarean Section</i> , (q. v.)   |
|  | If the body of the fœtus have been forcibly separated, and the head left in the uterus, it must be laid hold of with one hand; and the forceps be applied, or the head opened and delivered as under <i>Embryulcia</i> . Should the head have been brought away, and the body left behind, the feet must be brought down.   |
|  | In cases of narrowness of the pelvis, where the fœtus, at the full term, cannot be born alive, delivery may be brought about at an earlier period, or as soon as the child is capable of carrying on its functions independently of the mother.   |
|  | The most advisable plan of accomplishing this object is merely to pass the finger round and round within the os and cervix uteri, so as to detach the decidua;—the membranes being thus left entire, and the life of the child not so much endangered, as where the membranes are punctured and the waters evacuated. Parturition usually follows within 48 hours.        |

PARTURIUM VANUM, *Fausse couche*.

PARTUS, Parturition—p. *Cæsareus*, *Cæsarean section*—p. *Difficilis*, *Dystocia*.

PARULIS, from *παρᾶ*, 'near,' and *ουλον*, 'the gum.' *Apostéma parulis* vel *paroulis*, *Gum Boil*. Small abscesses are so called, which form in the gums, sometimes without any known cause, but which often depend upon carious teeth.

PARURIA, from *παρᾶ*, 'defectively,' and *ουρεω*, 'I pass urine.' Morbid secretion or discharge of urine.

PARURIA INCONTINENS, *Enuresis*—p. *Inops*, *Ischuria*, false—p. *Mellita*, *Diabetes*—p. *Retentionis*, *Ischuria*—p. *Retentionis vesicalis*, *Retention of urine*—p. *Stillatitia*, *Strangury*—p. *Stillatitia mucosa*, *Cystirrhœa*.

PARYGRON, from *παρᾶ*, and *ὑγρος*, 'humid.' A liquid or moist preparation, for allaying topical inflammation.

PAS D'ANE, *Tussilago*.

PASMA, *Catapasma*.

PASQUEFLOWER, *Anemone pulsatilla*.

PASSA, *Paronychia*.

PASSÆ CORINTHIACÆ. See *Vitis Corinthiaca*.

PASSAGES, DIGESTIVE, *Ways*, digestive—p. *Second*, *Ways*, second.

PASSE-PIERRE, *Crithrum maritimum*.

PASSERAGE SAUVAGE, *Cardamine pratensis*.

PASSIFLORA LAURIFOLIA, *Bay-leaved passion flower*. A native of Surinam. The fruit has a delicious smell and flavour, and quenches thirst, abates heat of the stomach, increases the appetite, &c.

PASSIFLORA MALIFORMIS, *Apple-shaped Granadilla*. The fruit of this species is esteemed a delicacy in the West Indies, where it is served up at table in desserts.

PASSIO CÆLIACA, *Cælic flux*—p. *Cholerica*, *Cholera*—p. *Felliflua*, *Cholera*—p. *Hæmoptoïca*, *Hæmoptysis*—p. *Hypochondriaca*,

*Hypochondriasis*—p. *Hysterica*, *Hysteria*—p. *Iliaca*, *Ileus*—p. *Ischiadica*, *Neuralgia femoropoplitea*—p. *Pleuritica*, *Pleuritis*—p. *Ventriculosa*, *Cælic flux*.

PASSION, *Passio*, *An'imi Pathe'mata*, *Affectus*. A lively affection of the mind; as rage, terror, love, hatred, &c.

PASSION-FLOWER, BAY-LEAVED, *Passiflora laurifolia*.

PASSIVE, *Passivus*. An epithet for diseases, which seem owing to a greater or less diminution of the strength, or which are without apparent reaction.

Thus, passive hemorrhages are such as supervene in debilitated individuals or under conditions in which increased action of the arteries can scarcely be presumed. The term *passive* has, also, been given to aneurisms of the heart with extension of the parietes; in opposition to *active* aneurisms,—with thickness of the parietes—hypertrophy.

PASSULÆ MAJORES, see *Vitis vinifera*—p. *Minores*, see *Vitis Corinthiaca*.

PASSULATUM, *Uva passa*, 'raisins,' 'dried grapes.' A medicine in which the pulp of raisins is a chief ingredient.

PASSY, MINERAL WATERS OF. This village is in the vicinity of Paris. There are several springs, containing sulphates of lime, iron, and magnesia; alum; common salt; carbonate of iron; carbonic acid, &c. They are employed as tonic and astringent.

PASTA DE ALTHÆA, *Paste*, marshmallow—p. *Anygdalina*, *Confection (almond)*—p. *de Dactylis*, *Paste*, *date*—p. *Emulsiva*, *Confection (almond)*—p. *de Jujubis*, *Paste of jujubes*—p. *Regia*, *Confection (almond)*.

PASTE, *Pasta*, (F.) *Pâte*. A compound medicine like the *pastil*, but less consistent, flexible, less saccharine, and more mucilaginous.

MARSHMALLOW PASTE, *Massa de gummi-Arab'ico*, *Pasta de althæâ*. A compound of gum

arabic, sugar, white of egg, and orange flower water. Ph. P. It is demulcent.

DATE PASTE, *Massa seu pasta de dactylis*. Composed of dates, sugar, gum arabic, water, and orange flower water. Ph. P. Demulcent.

PASTE OF JU'JUBES, *Pasta de ju'jubis*, *Massa de zizyphorum fructu*: composed of *jujubes*, gum senegal, sugar, water, and tincture of lemon peel. Demulcent.

PASTA GLYCYRRHIZÆ GUMMA'TA ET ANISA'TA, seu *Massa de extracto glycyrrhizæ*. A compound of extract of liquorice, gum senegal, sugar, Florence orris root, and volatile oil of aniseed. Demulcent.

PASTE, WARD'S, *Confectio piperis nigri*.

PASTEQUE, *Cucurbita citrullus*.

PASTIL, *Pastillus*, *Diocres*, *Atic'ula Cip'ria*, *Candela funa'tis*, *Phthois*, *Plithoiscus*. A compound of aromatic substances in various shapes; used as a fumigating material, when set fire to. See Fumigation.

The French use the term *Pastille* for a solid, dry, round, oblong, square, or triangular compound, whose base is essential oil, and sugar the excipient. These pastilles are, in fact, small lozenges, and only differ from the *tablette* in their smaller size.

PASTIL'LI DE MENTHA PIPERI'TA. *Peppermint draps*. (*Sacch. alb.*, *aque mentha pip. destillat.* ãã ʒij. Boil to the consistence of an electuary. Take of fine white sugar, in powder, ʒiv, volatile oil of peppermint ʒss. Mix, and add the electuary whilst warm. Drop it then on marble, and dry the *draps*. Ph. P.)

PASTILLES, FUMIGATING. See Fumigation.

PASTILLI EMETINÆ PECTORALES, *Trochisci emetinæ pectoralis*.

PASTINACA OPOP'ANAX. The name of the plant which furnishes the *Opopanax*. The plant, whence the gum-resin is obtained, has, also, been called *Opopanacum*, *Panax heracle'um*, *Panax costi'num*, *P. pastinacea*, *Kyna*, *Her'cules-all'heal*, *Opop'anaxwort*.

OPOPANAX, *Opopanacis gummi-resi'na*, *Gezir*, *Pop'anax*, *Gummi panacis*, exudes from the roots, when wounded. Its odour is strong and peculiar; taste, bitter and acrid. It is met with in the shops, in lumps of a reddish-yellow colour, without; white, within. It has been recommended as an antispasmodic and emmenagogue; but is seldom used. Dose, gr. x to ʒj in powder.

PASTINACA SATI'VA, *Elaphobos'cum*, *Pastinaca sylves'tris*, *Ban'ica*, *Garden parsnep*. The root is sweet and nutritious, and is in esteem as an article of food. It has been used as a diuretic and demulcent in calculous affections, &c.

PASTINACA SYLVESTRIS, *P. sativa*—p. *Sylvestris tenuifolia officinarum*, *Daucus Carota*.

PASTE, Paste—p. *Arsenicale*, *Arsenical paste*.

PATELLA, *Rot'ula*, *Epigon'otis*, *Epigon'is*, *Epigou'nis*, *Mola*, *Concha*, *Oculus genu*, *Os scutifor'me*, *Supergenua'tis*, *Cavalcoid'es*, *Mylacris*, *Myle*, (F.) *Rotule*. Diminutive of *pat'ina*, 'a dish,' so called from its shape. A sort of sesamoid, flat, short, thick, rounded bone, situate in front of the knee, and enveloped in the substance of the tendon common to the extensor muscles of the leg. The posterior surface of the patella is divided into two *facettes*,

united angularly, which are incrustated with cartilage, and each of which is articulated with one of the condyles of the femur. The patella is developed by a single point of ossification. When the patella is fractured, it is difficult to produce bony union. This can only be accomplished by keeping up the fractured extremities closely in apposition.

PATELLA, Cup—p. *Fixa*, *Olecranon*.

PATHEMA, Affection, Disease.

PATHEMATOLOGY, Pathology.

PATHETIC, *Pathet'icus*. That which moves the passions. A name given to the *superior oblique muscle of the eye* (q. v.), and, also, to a nerve.

THE NERVUS PATHET'ICUS, *N. trochled'ris* seu *trochleatorius* seu *trochled'ator*, the 4th pair of nerves, *Oculo-musculaire interne* (Ch.), (F.) *Nerf pathétique*, is the smallest encephalic nerve. It arises behind the inferior pair of the tubercula quadrigenina (*the testes*) at the lateral parts of the valvula Vieussenii. Its roots unite into one thin, round cord, which makes a turn upon the peduncles of the brain, and passes into a canal of the dura mater near the posterior clinoid process. It enters the orbit by the broadest part of the sphenoidal fissure, and terminates in the superior oblique muscle of the eye, by dividing into several filaments.

PATHE, Alveolus.

PATHOG'ENY, *Pathogenia*; from *παθος*, 'a disease,' and *γενεσις*, 'generation.' The branch of pathology, which relates to the generation, production, and development of disease.

PATHOGNOMON'IC, *Pathognomon'ic*, *Signum conjunctum*; from *παθος*, 'an affection,' and *γινωσκω*, 'I know.' A characteristic symptom of a disease.

PATHOLOGY, *Pathematol'ogy*, from *παθος*, 'a disease,' and *λογος*, 'a discourse.' The branch of medicine, whose object is the knowledge of diseases. It has been defined *diseased physiology*, and *physiology of disease*. It is divided into *general* and *special*. The first considers diseases in common;—the second the particular history of each. It is subdivided into *internal* and *external*, or *medical* and *surgical*.

PATHOLOGY, HUMORAL, Humorism.

PATHOMA'NIA, *Parapathi'a*, *Moral Insanity*, from *παθος*, 'a disease,' and *mania*. A disorder of affection or feeling, as well as of those of the active powers or propensities.

PATHOPATRIDALGIA, Nostalgia.

PATHOS, Affection, Disease.

PATIENCE, *Rumex patientia*—p. *d'Eau*, *Rumex hydrolapathum*—p. *Garden*, *Rumex patientia*—p. *Rouge*, *Rumex sanguineus*—p. *Sauvage*, *Rumex acutus*.

PATIENTIA, *Rumex patientia*.

PATIENTIÆ MUSCULUS, *Levator scapulae*.

PATNE, Alveolus.

PATORNA'RIVUM. The cavity or the opening of the nostrils.

PATURSA, Syphilis.

PAULLINIA. This is an extract from a plant of the same name in Brazil. It is prepared by the Indians, and appears to possess excitant powers. In Brazil, and the neighbouring countries, it is given in the form of Tisane—the powder being mixed with cocoa—in diarrhœa and dysentery. It has been employed also as

a tonic. An extract is prepared in Brazil from the *Paullinia sorbilis*, known there under the name of *Guarana*, which is administered in similar pathological cases.

**PAUME DE LA MAIN**, Palm.

**PAUONTA**, Sedatives.

**PAUPIÈRE**, Palpebra.

**PAVANA WOOD**, *Croton tiglium*.

**PAVILION**. The French give this name to the expanded extremity of a canal or cavity, e. g. of a catheter, sound, &c.

The **PAVILION OF THE EAR**, *Auric'ula*, *Pinna*, *Ala*, (F.) *Auricule* on *Oricule*, *Pavillon de l'oreille*, is seated behind the cheeks, beneath the temple and anterior to the mastoid process. Its size varies in individuals. It is free above, behind, and below. Anteriorly and within, it is continuous with the neighbouring parts. Its outer surface has several prominences, the *Helix*, *Anthelix*, *Tragus*, *Antitragus*, and *Lobe*; and several cavities—the *groove of the Helix*, the *fossa navicularis* seu *scaphoides*, and the *Concha*. The skin which covers the pavilion, is very fine and studded with a number of sebaceous follicles. The auricle is fixed to the head by three fibro-cellular ligaments;—a *superior*, *anterior*, and *posterior*.

**PAVILLON DE L'OREILLE**, Pavilion of the ear—*p. de la Trompe*, see *Tuba Fallopiana*.

**PAVINA**, *Æsculus hippocastanum*.

**PAVOR**, Panophobia.

**PAVOT DES JARDINS**, *Papaver*.

**PAZAHAR**, Bezoar.

**PEACH BRANDY**, *Amygdalus persica*—*p. Tree*, *Amygdalus persica*.

**PEAGLE**, *Primula veris*.

**PEAR**. See *Pyrus malus*.

**PEARL**, *Perla*, *Mar'garon*, *Margarita*, *Unio*, (F.) *Perle*. A roundish concretion, of a silvery white colour, and brilliant polish, found in several shells and especially in the *Avic'ula margaritifera*, which has, hence, been called *Mater perlarum*, *Mother of pearl*, and is much used in the fabrication of handles for surgical instruments, &c.

Pearls were, formerly, given in powder as astringents and antacids. They consist of lime and an animal matter.

**PEARL ASH**, Potash of commerce—*p. Mother of*, see *Pearl*—*p. White*, Bismuth, subnitrate of.

**PEAU**, Cutis.

**PEAUCIER**, *Platysma myoides*.

**PECCANT**, *Peccans*. An epithet given, by the Humorists, to the humours, when erring in quality or quantity.

**PECHEDEON**, *Perinæum*.

**PECHER**, *Amygdalus persica*.

**PECHURIM CORTEX**. A highly aromatic bark, the produce of a species of *laurus*. It is extremely fragrant like that of cinnamon, which it greatly resembles in its properties. In Portugal, it is used in the cure of dysentery, &c.

**PECHYAG'RA**, *Pectihag'ra*, from *πρῦος*, 'the elbow,' and *αἴσα*, 'a seizure.' Gout affecting the elbow.

**PECHYS**, Elbow.

**PECHYTYRBE**, *Porphyra nautica*.

**PECTEN**, Pubes.

**PECTHAGRA**, *Pechyagra*.

**PECTINA'LIS**, from *pecten*, 'the pubes;' *Pectina'us*, *Pubio-fémoral*, *Suspubio-fémorol*

(Ch.) (F.) *Pectiné*. This muscle is situate at the inner and upper part of the thigh. It is long, flat, and triangular; is attached, above, to the space, which separates the ilio-pectineal eminence from the spine of the os pubis; and, below, by a flat tendon, to the oblique line, which descends from the lesser trochanter to the *linea aspera*. The *pectinalis* bends the thigh on the pelvis; and carries it outwards in adduction and rotation. It may, also, bend the pelvis on the thigh.

**PECTINA'TI MUSCULI**, from *pecten*, 'a comb.' The fascicular texture observed in the right auricle of the heart:—*Musculi Auric'ulae Pectinati*. Their main use probably is—to prevent the over dilatation of the auricles.

**PECTINÉ**, *Pectinalis*.

**PECTORAL**, *GRAND*, *Pectoralis major*.

**PECTORALIS INTERNUS**, *Triangularis sterni*.

**PECTORA'LIS MAJOR**, from *pectus*, 'the breast.' *Pectoralis*, *Sterno-costio-clavio-huméral*, *Sterno-huméral* (Ch.) (F.) *Grand Pectoral*. A large, flat, triangular muscle, situate at the anterior part of the chest, before the axilla. It is attached, on the one hand, by means of aponeurotic fibres, to the inner half of the anterior edge of the clavicle; to the anterior surface of the sternum, and to the cartilages of the six first true ribs;—on the other, by a strong tendon, which is inserted at the anterior edge of the bicipital groove of the humerus.

The use of this muscle is—to move the arm in various directions. If it be hanging by the side of the body, it carries it inwards and a little forwards. When the arm is raised, it depresses it and carries it inwards. It can, also, move it in rotation inwards. If the humerus be raised and fixed, the *pectoralis major* draws the trunk towards the anterior extremity.

**PECTORA'LIS MINOR**, *Serrat'us anti'cus minor*, *Costo-coracoïdion* (Ch.) (F.) *Petit pectoral*, *Petit dentelé antérieur*. This muscle is situate beneath the preceding, at the anterior and upper part of the chest. It is flat and triangular. It is attached by its base, which appears digitated, to the upper edge and outer surface of the 3d, 4th, and 5th true ribs, and is inserted at the anterior part of the coracoid process.

The *pectoralis minor* draws the scapula forwards and downwards, and makes it execute a rotatory motion, by virtue of which its inferior angle is carried backwards, and the anterior depressed. When the shoulder is fixed, it elevates the ribs to which it is attached, and aids in the dilatation of the chest.

**PECTORALS**, *Pectoralia*, *Thorac'ica*. Medicines, considered proper for relieving or removing affections of the chest.

**BATEMAN'S PECTORAL DROPS** consist, chiefly, of *tincture of castor*, with some *camphor* and *opium*, flavoured by *aniseed*. Gray gives the following formula. *Castor* ℥j, *ol. anisi* ℥j, *camph.* ℥v, *coccin.* ℥iss, *opii* ℥vj, *proof spirit*, a gallon.

A form, advised by a committee of the Philadelphia College of Pharmacy, is the following:—*Alcohol dil. cong.* iv, *Santal. rubr. ras* ℥ij, *Digerc per horas xxiv*; *cola*, et adde *Pulv. opii*, *Pulv. catechu*, *Camphoræ* āā ℥ij, *Ol. anisi.* ℥iv. Digest for ten days.

**PECTORILOQUE**, from *pectus*, 'the chest,'

and *loqui*, 'to speak.' Laënnec calls thus, one who presents the phenomenon of *Pectoriloquism*. Also a Stethoscope. (q. v.)

**PECTORILOQUIE CHÉVROTANTE**, Ego-phony.

**PECTORILOQUISM**. 'Cavernous voice.' Same etymon. *Pectoriloquia*, (F.) *Pectoriloquie*. Speech or voice coming from the chest. Laënnec has designated, by this name, the phenomenon often presented by consumptive individuals, when their chests have been examined with the stethoscope. The voice seems to issue directly from the chest, and to pass through the central canal of the cylinder,—a phenomenon owing to the voice resounding in those anfractuous cavities, produced in the lungs by the suppuration or breaking down of tubercles, which constitute abscesses or *Ulcers of the Lungs*.

**PÉCTUS**, Thorax.

**PEDAGRA**, Potassa supertartras impurus.

**PEDESIS**, Pulsation.

**PEDETHMOS**, Pulsation.

**PEDICLE**, VITELLINE. See *Vesicula umbilicalis*.

**PEDICULARIA**, Delphinium staphisagria.

**PEDICULATIO**, Phtheiriasis.

**PEDICULUS**, The *Louse*, *Phtheir*, (F.) *Pou*.

A genus of parasitic insects. The human body is infested with three kinds; the *Body-louse*, (F.) *Pou de corps*; the *Head-louse*, (F.) *Pou de la tête*, which lives in the hair; and the *Crab-louse*, *Mor'pio*, *Plat'ula*, (F.) *Morpio*, which infests the hair of the pubes. Infusion of tobacco, or mercurial ointment, or ointment of white precipitate of mercury, or the white or red precipitate of mercury, readily destroys them.

**PEDICULUS PUBIS**, Crab-louse.

**PEDICURE** Chiropodist.

**PEDICUS**, Extensor brevis digitorum pedis.

**PEDIEUX** (*muscle*), Extensor brevis digitorum pedis.

**PEDIGAMBRA**, Ysambra.

**PEDILUVIUM**, from *pedes*, 'the feet,' and *lavo*, 'I wash.' *Lavipe'dium*, (F.) *Bain de pieds*. A bath for the feet. See Bath.

**PEDION**, Sole.

**PEDIUM**, Tarsus.

**PEDONCULUS DU CERVELET**, Corpora restiformia.

**PEDORA**. The sordes of the eyes, ears, and feet.

**PEDUNCLE**, *Pedunculus*. This term has been applied to different prolongations or appendices of the encephalon. Thus, the *Peduncles of the brain* are the *Crura cerebri*; and the *Peduncles of the cerebellum*, the *Crura cerebelli*.

The **PEDUNCLES OF THE BRAIN**, called also *Crura anteriora medullæ oblongatæ*, are two white cords, about  $\frac{3}{4}$ ths of an inch in diameter, on the outside of the corpora albicantia. They arise from the medullary substance of the brain, and gradually approach, till they join the tuber annulare. They are formed, internally, of a mixture of cineritious and medullary matter; the former of which, being of a darker colour at one point than in any other part of the brain, has been called *Locus niger crurum cerebri*.

The **PEDUNCLES OF THE CEREBELLUM**, called also *Crura posteriora*, arise from the medullary

part of the cerebellum, and unite at the tuber annulare.

**PEDUNCLES OF THE MEDULLÆ OBLONGATÆ**, Corpora restiformia.

The **PEDUNCLES OF THE PINEAL GLAND** are two medullary bands or strips, which seem to issue from the pineal gland, and proceed on each side upon the upper and inner region of the optic thalami.

**PEDUNCULI MEDULLÆ OBLONGATÆ**, Corpora restiformia.

**PEGA**, Canthus (lesser.)

**PEGANELÆ'ON**, *Oleum ruta'ccum*, Oil of Rue; from *πεγανον*, 'rue.'

**PEGANIUM**, Ruta.

**PEINE**, Hunger.

**PEIRA**, Effort, Experience, Nisus.

**PELAGIA**. A kind of scaly erysipelas of the hands, sometimes of the legs, at others, of the face. *Pellagra*. (?)

**PELAGRA**, *Pellagra*.

**PELICAN**, *Pelicanus*. An instrument, curved at the end like the beak of a pelican. Its use is to extract teeth.

**PELICIDĒ**, *PeludĒ*, *Melcoctum*, Boiled Honey.—Ruland and Johnson.

**PELIDNOMA**, *Echchymoma*.

**PELIOMA**, *Echchymoma*.

**PELIOMA** from *πελος*, 'black.' A livid echchymosis.—Forestus. See *Echchymoma*.

**PELIOSIS**, *Purpura hæmorrhagica*.

**PELL'AGRA**, *Pellagra*, *Ichthyosis Pellagra*, *Elephantiasis Ital'ica*, *Tuber Pellagra*, *Lepra Mediolanen'sis*, *Mal del Sole*, *Dermatagra*, *Erysipelas perior'ica nervosa chronica*, *Mal de misère*, *Paral'ysis scorbutica*, *Scurvy of the Alps*, *Impetigo Pellagra*. A disease, particularly noticed amongst the Milanese, which consists in the skin becoming covered with wrinkles, and assuming a scaly appearance, especially in the parts exposed to the air. The strength diminishes, the intellectual faculties and sensations become obscure, and cramps, convulsions, and other lesions of muscular contractility supervene. It is a singular, endemic affection.

**PELLICULA SUMMA**, Epidermis—p. Superior, Epidermis.

**PELLIS**, Cutis—p. Summa, Epidermis.

**PELLITORY**, **BASTARD**, *Achillea ptarmica*—p. of Spain, *Anthemis pyrethrum*—p. Wall, *Parietaria*.

**PELMA**, Sole.

**PELOTE DE MER**, *Pila marina*.

**PELTIGERA CANINA**, *Lichen caninus*.

**PELUDE**, Pelicidae.

**PELVIC**, *Pelvicus*, *Pelvinus*. Belonging or relating to the pelvis.

The **PELVIC CAVITY**, (F.) *Cavité pelvienne*, is the cavity of the pelvis.

The **PELVIC SURFACE OF THE ILIUM** is that which faces the pelvic cavity.

The **PELVIC MEMBERS** are the lower extremities.

M. J. Cloquet gives the name **PELVIC APONEUROSIS**, (F.) *Aponévrose pelvienne*, to an aponeurotic expansion, of greater or less thickness, which is attached to the brim of the pelvis, being continuous with the fascia iliaca and the aponeurotic expansion of the *psaos parvus*.

This aponeurosis forms a kind of resisting partition, which effectually supports the perito-

neum, and has several apertures, through which different organs pass.

**PELVI-TROCHANTE'RIAN**, *Pelvi-trochanterid'nus*. That which relates to the pelvis and great trochanter. The *Pelvi-trochanterian region* is formed by the muscles—*pyramidalis*, *two obturators*, *gemini*, and *quadratus femoris*, which pass from the pelvis to the digital cavity of the great trochanter.

**PELVIMETER**, *Pelycom'etrum*, *Pelyom'etrum*, from *pelvis*, and *μετρον*, 'a measure.' A barbarous hybrid. This name has been given to different instruments, invented for measuring the diameters of the pelvis, and, particularly, the antero-posterior or fore-and-aft diameter of the brim. Two have been chiefly employed; especially by French practitioners—the *Compas d'épaisseur*, and the *Pelvimeter* of Coutouly.

1. The **COMPAS D'ÉPAISSEUR** or **CAL'IPERS** is formed like a pair of compasses—with blunt extremities—the branches of which can be moved at will. One of these is applied to the symphysis pubis, and the other on the sacrum. About 3 inches must be deducted from this measurement for the thickness of the *mons veneris*, pubis, and the base of the sacrum.

2. The **PELVIMETER** of **COUTOULY** resembles the instruments used by shoemakers for measuring the length of the foot. The two branches are introduced, in a state of approximation, into the vagina; and then separated, so that one touches the promontory of the sacrum, the other comes behind the os pubis. It is a barbarous contrivance, and its introduction ought never to be attempted on the living subject. It does not, indeed, seem possible to introduce it without mischief.

The finger is, decidedly, the best pelvimeter, and by it we can judge whether the base of the sacrum be unusually prominent.

**PELVIS**, *Chó'ana*, *Py'elos*, (F.) *Bassin*; so called, because fancied to be shaped like an ancient basin. The part of the trunk which bounds the abdomen below. It is a large, bony, irregular, conoidal cavity,—open above and below,—which supports and contains a part of the intestines, and the urinary and genital organs; and serves, at the same time, as a fixed point for the articulation of the lower limbs, the attachment of their muscles, and the execution of their movements. The pelvis supports, behind, the vertebral column, and is sustained, before, by the *ossa femorum*. It is situate, in the adult, near the middle part of the body, and is composed of four broad, flat, unequally thick bones, differing much in their shape, size, and arrangement, which touch, are articulated at some part of their surface, and intimately united by means of a number of ligamentous fasciæ. Of these bones, two are behind, on the median line,—the sacrum and coccyx; the two others are before and at the sides,—the ilia. They are fellows, and unite, before, with each other.

The most important parts of the pelvis, in an obstetrical point of view, are the *brim* and the *outlet*.

The **BRIM**, *Angus'tia abdominal'is*, *Intro'itus* or *Upper Opening of the Cavity of the Pelvis*, (F.) *Détroit supérieur*, *D. abdominal*, is the narrow part, which separates the greater pelvis from the less—the *false* from the *true*. In the

well formed woman, it is elliptical, and slightly inclined forwards. Its *antero-posterior* or *sacro-pubic diameter*, in a *standard pelvis*, measures  $4\frac{1}{2}$  inches, but with the soft parts,  $3\frac{5}{8}$  inches; its *transverse* or *iliae* or *lateral*,  $5\frac{1}{2}$  inches, with the soft parts 4 inches; and its *oblique* with the soft parts,  $4\frac{5}{8}$  inches.

The **OUTLET**, (F.) *Détroit inférieure*, *D. perinéal*, *Ex'itus*, *Inferior opening*, *Angus'tia perinæal'is*, forms the lower aperture of the pelvis. The antero-posterior diameter is here, on account of the mobility of the coccyx, 5 inches; the lateral, 4 inches.

The **AXIS** of the **PELVIS** is important to be known in obstetrics. The *Axis of the Brim* is indicated by a straight line drawn from the umbilicus to the apex of the coccyx:—the *Axis of the Outlet* by a line drawn from the first bone of the sacrum to the entrance of the vagina.

**PELVIS** of the **KIDNEY**, *Pelvis renal'is*, *Sinus*, *Venter seu Alvus Renum*, (F.) *Bassinet*. This is a small, membranous pouch, occupying the posterior part of the fissure of the kidney. It is placed behind the renal artery and vein; is elongated from above to below; flattened from before to behind; irregularly oval in figure; and, below, contracts considerably, to be continuous with the ureter. It receives the orifices of the infundibula, which pour the urine secreted in the kidney into its cavity.

**PELVIS AURIUM**, *Cochlea*—p. *Cerebri*, *Infundibulum of the brain*—p. *Ocularis*, *Scaphium oculare*.

**PELYCOMETRUM**, *Pelvimeter*.

**PELVOMETRUM**, *Pelvimeter*.

**PEMPHIGUS**, *Febris bullo'sa*, *vesicular'is*, *ampullosa* seu *pemphygo'des* seu *pemphingo'des*, *Exanthé'ma sero'sum*, *Morta*. *Pemphigus Helveticus*, *Pemphigus major*, *Pemphigus minor*, *Morbus bullosus*, *Pemphinx*, *Pemphix*, *Typhus vesicular'is*, *Vesicular' Fever*, *Bladdery Fever*. A disease, defined to consist of vesicles, scattered over the body; transparent, fibert-sized, with a red, inflamed edge, but without surrounding blush or tumefaction; on breaking, disposed to ulcerate; fluid, pellucid or slightly coloured; fever, typhous. It is doubtful whether any such idiopathic fever has ever existed; the probability is, that the fever and vesications have been an accidental complication.

The *Pemphigus Helveticus*, Cullen thinks, must have been malignant sore throat. If, however, such a distinct disease did exist, it was probably only as an endemic-epidemic.

**PEMPHIGUS VARIOLODES**. See *Varicella*.

**PEMPHINX**, *Pemphigus*.

**PEMPHIX**, *Pemphigus*.

**PENÆA SARCOCOLLA**, *Sarcocolla*.

**PENCIL-LIKE PROCESSES**, *Styloid processes*.

**PENETRATING**, *Pen'etrans*. A wound is so called which penetrates one of the great splanchnic cavities.—*Vulnus penetrans*.

A medicine is, also, so called, which is supposed to pass through the pores and stimulate.

**PENICILLUM**, *Compress*.

**PENICILLUS**, *Penicillum*. A tent or pledget, (q. v.) The secreting, glandiform extremities of the vena portæ, (*Acini biliosi*) have also been so termed, as well as the villous textures.

PENICILLUS, Tent.

PENICULUM, Compress.

PENICULUS, Tent.

PENIDES, Saccharum hordeatum.

PENID'IUM, *Penidium saccharatum*. A kind of clarified sugar, made up into rolls. *Barley sugar*. It is demulcent.

PENIL, Mons veneris.

PENIS, *Caulis, Coles, Caulis, Men'tula, Menta, Phallus, Posthæ, Crithæ, Prid'pus, Virga, V. viri'lis, V. genit'alis, Vere'trum, Sathë, Membrum viri'le, Membrum, Verbus, Viri'le, Pars Viri'lis, Membrum seminale seu genitale virorum, Sic'ula, Tentam, Hasta, H. nuptia'lis, Cauda salax, Cauda, Fas'cinum, F. viri'le, Muto, Nervus, N. fistulosus seu fistularis, Scapus, Vena, Contas, Telam, Gurgulio, Sceptum, Hortus, Arma Ventris, Columna adstans inguinibus, Colum'na, Pij'amis, Trabs, Spina, Catapulta viri'lis, Verpa, Mach'ra, Taurus, the Yard, Male organ, &c., (F.) Verge, Membrc viril.* This organ, the use of which is to carry the seminal fluid into the female organs of generation, is cylindroid, long, and erectile, and situate before and beneath the symphysis pubis. In the ordinary state, it is soft and pendent in front of the scrotum. During erection, it becomes elongated, upright, and assumes a triangular shape. Its upper surface is called the *Dorsum Penis*, (F.) *Dos de la verge*; and, at its inferior surface, there is a longitudinal projection formed by the canal of the urethra.

The two sides of the penis are round; and its posterior extremity or root is attached to the pelvis. Its anterior extremity is free, and presents the glans, prepuce, and orifice of the urethra.

The penis is formed of the corpora cavernosa, the principal seat of erection; the corpus spongiosum of the urethra for the conveyance of the urine and sperm, and of the glans, which terminates the canal.

PENIS CEREBRI, Pineal gland—p. Muliebris, Clitoris.

PEN'NIFORM, *Pennifor'mis*, from *penna*, 'a pen.' An epithet for muscles, whose fleshy fibres are inserted on each side of a middle tendon, like the feathers of a pen on their common stalk.

PENNYCRESS, *Thlaspi*.

PENNYROYAL, *Mentha pulegium*—p. Hart's, *Mentha cervina*.

PENSÉE, *Viola tricolor*—p. *Sauvage*, *Viola tricolor*.

PENTAM'YRON, *Pentama'ron*, from *πεντε*, 'five,' and *μυρον*, 'ointment.' An ancient ointment, consisting of five ingredients.—Paulus and Aëtius. These are said to have been—storax, mastich, wax, opobalsam, and unguentum nardinum.

PENTAPHAR'MACON, from *πεντε*, 'five,' and *φαρμακον*, 'remedy.' Any medicine consisting of five ingredients.

PENTAPHYLLUM, *Potentilla reptans*.

PENTATEUCH, (SURGICAL,) *Pentateuchus*, which signifies the five books of Moses—Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. By analogy, some surgeons have given the name *Surgical Pentateuch* to the division of external diseases into five classes:—wounds, ulcers, tumours, luxations, and fractures.

PENTATH'ETON. Name of a plaster for bruises, excoriations, &c.

PEPANSIS, Coction, Maturation.

PEPANTICOS, Maturative.

PEPASMOS, Coction, Maturation.

PEPAS'TIC, *Pepasticus*, from *πεταινω*, 'I concoct.' A medicine, supposed to have the power of favouring the concoction of diseases. Maturative, (q. v.)

PEPPER, BLACK, *Piper nigrum*—p. Cayenne, *Capsicum annum*—p. Cubeb, *Piper cubeba*—p. Guinea, *Capsicum annum*—p. Jamaica, *Myrtus Pimento*—p. Long, *Piper longum*—p. Poor-man's, *Polygonum hydropiper*—p. Tailed, *Piper cubeba*—p. Water, *Polygonum hydropiper*—p. Wall, *Sedum*—p. White, *Piper album*.

PEPPERWORT, *Lepidium*.

PEPSIS, Coction, Digestion.

PEPTIC, *Pepticus*, from *πλιτω*, 'I ripen.' A substance which promotes digestion, or is digestive.

PERCE-CRANE, Perforator.

PERCE-FEUILLE, *Bupleurum rotundifolium*.

PERCE-MOUSSE, *Polytrichum*.

PERCE-PIERRE, *Crithmum maritimum*.

PERCEPTA. A word used by some writers on Hygiene to indicate, in a general manner, the effects of the nervous action on the animal economy; in other words, the sensations, the functions of the mind, and their deterioration or privation.

PERCEPTION, *Perceptio*, from *percip'cre*, 'to conceive,' 'receive.' The sensation which the brain has of an impression made on an organ of sense.

PERCEPTIVITY. Same etymon. The power of perception.

PERCOLATIO, Filtration, (q. v.)

PERCOLATION. The term percolation, or *displacement*, has been recently applied in pharmacy to an operation, which consists in placing any substance, the virtues of which have to be extracted by a menstruum, on a funnel, having a septum perforated with holes, or its tube stuffed with cotton or tow, and pouring fresh and fresh portions of the menstruum upon it until all its virtues are extracted. The operation is used in the formation of certain infusions, extracts, tinctures, &c.

PERCUSSION, AUSCULTATORY, see Acouphonia.

PERCUS'SION, *Epicrousis, επιχρουσις, Percus'sio*, from *percutere*, 'to strike.' When *immediate* or direct percussion is made on the chest or abdomen, the more or less perfect resonance is an index of the state of the contained organs; and the physician is thus aided in his diagnosis. For this purpose, the chest may be struck with the fingers, gathered into a bundle, and their tips placed upon a level. It is better, however, to employ *Mediate percussion*, which consists in interposing, between the point of the fingers and the chest, the finger of the other hand, or the *Plexim'eter*, (q. v.,) and striking this instead of the naked chest.

PERCUTEUR COURBE A MARTEAU, (F.) An instrument used by Baron Heurteloup in the operation of lithotomy, in which a hammer is employed instead of a screw, to force

together the blades of the instrument on the foreign body.

**PERDONIUM.** In Paracelsus, a medicated wine of herbs.

**PERFORANS.** A name given to different muscles, whose tendons pass through intervals between the fibres or tendons of other muscles; thence called *perforated*. See *Flexor Longus Digtorum*, &c.

Under the name *Perforating Arteries*, are included, 1. *In the hand*—arterial branches, given off by the profound palmar arch, which traverse the muscles and interosseous spaces. 2. *In the thigh*—three or four arteries, furnished by the profunda, which pass through the openings of the adductor magnus. 3. *In the foot*—the anterior and superior branches of the plantar arch.

**PERFORANS CASSERII.** See *Cutaneous*—p. *Manus*, *Flexor profundus perforans*—p. *Profundus*, *Flexor longus digitorum pedis profundus perforans*.

**PERFORATION, Perforatio, Anatresis,** from *perforare*, 'to pierce.' An accidental opening in the continuity of organs, either from an external or internal cause.

**PERFORATION, Paracentesis**—p. *Uteri, Uterus*, rupture of the.

**PERFORATOR, (F.) Perce-cranc.** An instrument for opening the head of the fœtus in utero, when it is necessary to diminish its size. The operation is called *Cephalotomia*.

**PERFORATUS.** That which is pierced. Anatomists have given this name to muscles, whose fibres or tendons separate, to suffer other parts to pass through them. Such are the *Flexor brevis Digtorum pedis*, (q. v.) *F. sublimis perforatus*, and *Coraco-brachialis*. (q. v.)

**PERFORATUS CASSERII, Coracobrachialis.**

**PERFRIC'TIO, Catapsyz'is, Peripsyz'is,** from *perfrig'ere*, 'to be cold.' Considerable refrigeration. Great sense of cold:—shivering.

**PERFRIGERA'TIO.** See *Rigor*.

**PERFUSIO, Fomentation.**

**PERI, περι,** 'about, on all sides, round about.' An augmentative prefix. Hence:

**PERIAMMA, Amuletum.**

**PERIAPTON, Amuletum.**

**PERIBLEMA, Catablema.**

**PERIBLEP'SIS,** from *περι*, 'around,' and *βλεπω*, 'I look.' The wild look that accompanies delirium.—Fœsius.

**PERIB'OLĒ,** from *περιβαλλω*, 'I surround.' The dress of a person. Also, the translation of morbid matters towards the surface of the body.

**PERIBRO'SIS, Pericrasis,** from *περιβρωσω*, 'I eat around.' Ulceration or erosion at the corners of the eyelids.

**PERICARDI'TIS,** from *περικαρδιον*, 'the pericardium.' *Inflammation of the Pericardium*, (F.) *Péricardite*. This is, probably, the proper appellation for most of those cases, which have received the name of *Carditis, Cardipericard'itis*. Along with signs of pyrexia, the local symptoms resemble those of pneumonia. Such as point out that the pericardium is the seat of disease are the following:—pain, referred to the region of the heart, or scrobiculus cordis,—sometimes pungent, at others, dull and heavy: palpitation, accompanied with spasmodic

twitchings in the neighbourhood of the heart, shooting up to the left shoulder; pulsation, and sometimes soreness of the carotids, with tinnitus aurium and vertigo: the breathing is by catches: dyspnœa considerable: pulse jarring, jerking, peculiar: the tongue white, covered with a mucous coat, and the skin often bathed in sweat, as in acute rheumatism.

The *physical signs* during the first period, are as follows. The action of the heart is generally evident to the eye, and may be felt by the hand. There is soreness to the touch, over the intercostal spaces, and over a small surface in the epigastric region, when the pressure is directed upwards towards the pericardium. Percussion is usually natural, but at times there is dulness. On auscultation, the cardiac movements are found to be frequent, abrupt, jerking, and tumultuous; often irregular and intermittent. The pulse presents corresponding characters.

When effusion of lymph has occurred, percussion may be negative, or be but slightly affected. On auscultation, in addition to the preceding signs, there may be one or more of the rubbing or friction *bruits* (q. v.) resembling the rustling of parchment, or of a sawing or rasping character. In some cases, the sound is like the creaking of new leather. This has been supposed to be pathognomonic of effused lymph.

The most important point, in the pathology of pericarditis, is its connexion with acute rheumatism: and it forms one of the most dangerous occurrences in the latter disease. It may be *acute* or *chronic*: in either case it is, of course, formidable.

The most active depletion must be used; with large doses of opium, counter-irritants, and all the means required in the most violent internal inflammations.

**PERICARDIUM, Pericard'ion, Membrana Cor circumflex'a, Involucrum seu Ar'cula seu Capsa seu Cap'sula seu Cam'era seu Indumentum seu Pannic'ulus seu Membr'ana seu Theca seu Sac'culus Cordis, Sac or Capsule of the Heart. Arca Cordis, (F.) Péricarde,** from *περι*, 'around,' and *καρδια*, 'the heart.' The pericardium is a membranous sac, which envelops the heart, and the arterial and venous trunks that pass from or into it. It is seated in the separation of the mediastinum, above the central aponeurosis of the diaphragm, to which it strongly adheres. Its shape is triangular like that of the heart; to which it is fitted. The pericardium is composed of two membranes:—the one—*external*—fibrous; the other—*internal*—serous. The latter, having lined the inner surface of the external layer, is reflected over the heart, and covers it entirely; without, however, having the heart within it; in which arrangement it resembles other serous membranes.

The pericardium envelops the heart; retains it in position, and facilitates its movements by means of the serous fluid, *Liquor seu Aqua seu Humor seu Lympha Pericard'ii, Hydrocar'dia*, which it contains in greater or less quantity.

**PERICARPIUM, Epicarpium.**

**PERICHON'DRIUM,** from *περι*, 'around,' and *χονδρος*, 'a cartilage.' A membrane of a fibrous nature, which covers cartilages, that are

non-articular, and bears considerable analogy to the periosteum in organization and uses.

PERICHRISIS, Circumlitio, Liniment.

PERICHRISTON, Circumlitio, Liniment.

PERICHLASIS, from περι, 'about,' and κλαω, 'I break.' A comminuted fracture, with denudation of the bone. Galen, Foësius.

PERICLIMENUM, Lonicera periclymenum.

PERICNE'MIA, from περι, 'about,' and κνημη, 'the leg.' The parts surrounding the tibia:—the tibia itself.

PERICRANIUM, *Pericranion*, from περι, 'around,' and κρανιον, 'the cranium.' The periosteum, which covers the cranium externally.

PERICRISIS, Peribrosis.

PERIDES'MIC, *Peridesmicus*; from περι, 'around,' and δεσμος, 'a ligament.' Some nosologists have given this name to ischuria caused by a ligature round the penis or by stricture of the urethra.

PERIDIASTOLE. See Diastole.

PERIDROMOS, from περι, 'about,' and δρομος, 'a course.' The extreme circumference of the hairs of the head.—Gorræus.

PERIERESIS, from περι, 'about,' and αιρω, 'I take away.' A sort of circular incision, which the ancients made in the neighbourhood of large abscesses. The perieresis is now only practised in some cases of tumours.

PERIESTICOS, Salutory.

PERIGLOTTIS, Epiglottic gland. See Tongue.

PERIGRAPHĒ, from περιγραφω, 'I circumscribe.' The aponeurotic intersections of the rectus abdominis are so called.—Vesalius.

PERILYMPH, Cotunnus, liquor of.

PERIMIYSIUM, Fascia.

PERIN, περι. With some, this means the scrotum, q. v.;) with others, the testicle; with others, the perinæum; and, with others, the anus.

PERINÆOCEYLE, from περινοιω, 'the perinæum,' and κλη, 'rupture.' Hernia in the perinæum.

PERINÆUM, *Interfemineum*, *Perineum*, *Gressura*, *Plechas*, *Ant'phleps*, *Gech'deon*, *Mesos'celon*, *Perineon*, *Perinæos*, *Perineos*, *Orrhos*, *Tramis*, *Tauros*, *Interforaminum*, *Cochone*, *Plichos*, *Mesomerion*, *Fænen*, *Regio Perinæi*, (F.) *Périnée*; from περι, 'around,' and ναιεν, 'to dwell.' The space at the inferior region of the trunk, between the ischiatic tuberosities, anus, and genital organs. It is smaller in the female than in the male; has a triangular shape; and is divided into two equal parts by a median line, called *Raphe*. It is occasionally ruptured in labour. The part between the pudendum and anus is sometimes called *ant'rior perinæum*, to distinguish it from the part which extends from the anus to the coccyx, called *post'rior perinæum*.

PERINÆAL, *Perinæus*, *Perinæal'is*. That which relates or belongs to the perinæum; as *Perinæal artery*, *Hernia*, &c.

ISCHY'RIA PERINÆALIS. A name, given by Sauvages to retention of urine, caused by a tumour seated in the perinæum.

PERINÆE, Perinæum.

PERINEPHRYTIS, from περι, 'around,' νεφρος, 'kidney;' and itis, denoting inflammation. Inflammation of the external cellular and

fibrous membranes of the kidney, or of their investing adipose cellular tissue.—Rayer.

PERINEURION, Neurilema.

PERINYC'TIDES, from περι, and νυξ, 'night.' An eruption, appearing at night and disappearing by day.—Erolian.

PERIOD, *Periodus*, *Periodeia*, *Periodeusis*, *Circu'itus*, from περι, 'about,' and οδος, 'way.' *Circuit*. *Periods* are the different phases or revolutions of a disease. The epochs, which are distinguishable in the course of a disease. Three periods are commonly enumerated. 1. The *augmentation*, *increase*, or *progress* (*Incremen'tum*); 2. The *acme* or *height*, (F.) *État* (*Status*); and, 3. The *decline* (*Decremen'tum*.) Some authors reckon only the *invasion* and *termination*.

*Period* is sometimes used, in describing an intermittent, for the time between the commencement of a paroxysm and that of the next, including the fit as well as interval.

PERIODEIA, Period.

PERIODEUSIS, Period.

PERIODEUTES, Charlatan.

PERIODIC'TY, *Periodic'itas*; same etymon. The aptitude of certain physiological and pathological phenomena, in health or disease, to recur at particular periods, after longer or shorter intervals, during which intervals they cease completely. Diseases, thus recurring, are called *Periodical*.

PERIODYN'IA, from περι, and οδυνη, 'pain.' A circumscribed and acute pain.—Hippoc.

PERIONE, Decidua.

PERIOR'BITE, from περι, 'around,' and ορ'bita, 'the orbit.' An appellation used, by some, for the periosteum lining the orbit. The inflammation of this periosteum is termed *Periorbit'is* or *Periorbit'itis*.

PERIOSTEUM, *Perios'teon*, *Perios'teos*, *Perios'tium*, *Circumossa'lē*, *Membra'na ossis*, *Omen'tum ossium*, *Circumossa'lis* *Membra'na*, from περι, 'around,' and οστέον, 'a bone.' The periosteum is a fibrous, white, resisting medium which surrounds the bones every where, except the teeth at their coronæ, and the parts of other bones that are covered with cartilage. The external surface is united, in a more or less intimate manner, to the neighbouring parts by cellular tissue. Its inner surface covers the bone, whose depressions it accurately follows. It is united to the bone by small, fibrous prolongations; and, especially, by a prodigious quantity of vessels, which penetrate their substance.

The periosteum unites the bones to the neighbouring parts. It assists in their growth, either by furnishing, at its inner surface, as M. Béc-lard demonstrated, an albuminous exudation, which becomes cartilaginous, and at length ossifies;—or by supporting the vessels, which penetrate them to carry the materials of their nutrition. See Medullary membrane.

PERIOSTEUM INTERNUM, Medullary membrane.

PERIOSTO'SIS Tumour of the periosteum. Tumours are so called, which are developed on bones, and formed by their outer membrane. These tumours are more rapidly developed, have a less degree of consistence, and sooner

disperse than exostoses, which they resemble greatly.

PERIPHIMOSIS, Paraphimosi.

PERIPLEUMONIA, Peripneumonia.

PERIP'LYSIS, from περι, and πλυσις, 'the act of washing.' *Proflu'vium*. A copious discharge from any part, especially from the bowels.

PERIPNEUMONIA, *Peripleumonia*, *True peripneumony*, from περι, 'around,' and πνευμων, 'the lung.' Inflammation of the substance of the lungs.—See Pneumonia.

PERIPNEUMONIA BILIOSA. Inflammation of the lungs, accompanied with bilious fever.

PERIPNEUMONIA CATARRHALIS, P. notha—p. Pituitosa. P. notha.

PERIPNEUMONIA CATARRHALIS. Bronchitis or pulmonary catarrh, with pain in some part of the chest.

PERIPNEUMONIA NOTHA, P. spu'ria, P. pituitosa, P. catarrhalis, *Blennothorax*, *Obstructio pulmonum pituitosa febrilis*, *Bronchitis asthenica*, *False or Bastard Peripneumony*, (F.) *Péripneumonie bâtarde ou fausse*. An inexact name, under which some affections are comprised that resemble pneumonia; and, especially chronic bronchitis with pleurodynia.—See Bronchitis (chronic)

PERIPNEUMONY, BASTARD, Peripneumonia notha.

LATENT PERIPNEUMONY is that whose symptoms are so obscure as to be recognised with difficulty.

PERIPSYXIS, Catapsyxis, Perfrictio.

PERIPYE'MA, from περι, 'about,' and πυον, 'pus.' Suppuration around an organ;—a tooth, for example.

PERIRRHO'E'A, from περι, 'about,' and ρεω, 'I flow.' Afflux of fluids from every point of the body towards an organ which has to remove them from the economy. Also, Enuresis, (q. v.)

PERISCCELIS, *Jarretière*.

PERISCYPHISMUS, *Periscythis' mus*, *Periscythisis*, *Periscythis' mus*, *Periscythisis*, *Scalping*, from περι, 'around,' and Σκυθης, 'a Scythian,' i. e. 'scalping after the manner of the Scythians.' An operation, described by Paulus of Ægina. It consisted of an incision made around the cranium, and, was employed in habitual weakness of the eyes, pains of the head, &c.

PERISCYTHISMUS, Periscyphismus.

PERISP'HAL'SIS, *Circumductio*, from περι, 'about,' and σπ'αλλω, 'I move.' A circular motion impressed on a luxated bone, for the purpose of reducing it.

PERISTALTIC ACTION, Peristole.

PERISTAPHYLINUS EXTERNUS, *Circumflexus musculus*—p. Inferior, *Circumflexus musculus*—p. Internus, *Levator palati*.

PERISTERIUM, *Verberna officinalis*.

PERISTER'NA, from περι, 'about,' and στεριον, 'the sternum.' The lateral parts of the chest.

PERISTOLĒ, *Motus Peristalticus*, *M. compressorius* seu *vermicularis* seu *testudineus*, from περι, 'around,' and στελλω, 'I contract,' 'I close' The peristaltic action of the intestines, *Motus peristalticus*. It consists of a kind of undulation or vermicular movement, in appear-

ance irregular, but in which the circular fibres of the muscular membrane of the intestine contract, successively, from above downwards, in proportion as the chyme advances in the alimentary canal; so that, being compressed above, it is pushed into the next portion of the intestine, whose fibres are in a state of relaxation. When the fibres contract inversely, they occasion an antiperistaltic action.

The peristaltic action is involuntary, and is not under the immediate influence of either brain or spinal marrow. It continues for some time after death.

PERISTOMA, Peristroma.

PERISTROMA, *Peristo'ma*, *Musculus villosus*, *Crusta membrana'cca*, *Crusta vermicularis*, from περι, 'around,' and στρωνωμι, 'to spread.' The villous or mucous coat of the intestines.—Castelli.

PERISYSTOLE, from περι, 'about,' and συστολη, 'a contraction.' The interval, that exists between the systole and diastole of the heart, which is only perceptible in the dying.—Bartholine.

PERITERION, *Trépan perforatif*.

PERITESTIS, Albuginea.

PÉRITOINE, Peritonæum.

PERITOME, Circumcision.

PERITONÆRIX'IS, *Peritonæorez'is*, from περιτοναιον, 'the peritonæum,' and ρηγνυω, 'I break.' Hernia formed by a rupture of the peritonæum.

PERITONÆUM, *Peritonæum*, *Peritonæ'on*, *Peritonæ'on*, *Peritonæ'os*, *Peritonæ'on*, *Peritonæos*, *Velamentum abdominalē*, *Tunica præten'sa* seu *Operimentum prætensum* seu *Membrana abdominalis*, *Zephus*, *Ziphac*, (F.) *Péritoine*, from περι, 'around,' and τεινω, 'I stretch.' A serous membrane, which lines the abdominal cavity; extends over the greater part of the organs contained there; envelops them wholly or in part, and maintains their respective relations by means of different prolongations and ligamentous folds:—the *mesentery*, *epiploon*, *mesocolon*, &c. (q. v.) Like all the serous membranes, the peritonæum is a sort of sac without aperture, which covers the abdominal organs, without containing them within it, and the internal surface of which is smooth, and lubricated by a serous fluid.

In the male fœtus, the peritonæum furnishes a prolongation, which accompanies the testicle at the time of its descent, and, in the female fœtus, forms the *Canal of Nuck*, (q. v.) Below the neck of the gall-bladder, the peritonæum has a triangular opening, called the *Foramen* or *Hiatus of Winslow*, (q. v.) through which it proceeds behind the stomach, to form a sort of secondary cavity, called the *posterior cavity of the peritonæum*, (F.) *Arrière cavité péritonéale* ou *Cavité des Epiploons*.

PERITONITIS, *Empres'ma Peritonitis*, *Peritonæit'is*, *Cauma Peritonitis*, *Phlegmasia* or *Inflammation of the Peritonæum*. The characteristic signs of acute inflammation of the peritonæum are,—violent pain in the abdomen, increased by the slightest pressure, often by the simple weight of the bed-clothes. It generally occurs in the parturient state; and begins on the second or third day after delivery. At times, a malignant epidemic, and perhaps contagious,

variety has made its appearance, and destroyed numbers of females.

This has been described under the name *Puerperal Fever*, but it really seems to be a malignant inflammation of the peritonæum and uterus, *Metropéritonitis*.

In any form it requires the most active treatment, early employed. The appearances, on dissection, are such as occur whenever a serous membrane has been inflamed, and such inflammation has produced death:—effusion of fluid with flakes of coagulable lymph in it; appearances of vascularity, &c., in the membrane.

The treatment—in *active peritonitis*—must consist of the same course as recommended under *Enteritis*, (q. v.) In the *chronic* kind, symptoms must be combated as they arise, and it may be advisable to excite a new action in the system by means of mercury.

In the epidemic and malignant variety, unless bleeding be freely employed at the very outset, it does harm. If used early, it is of the most decided advantage. Every thing depends upon arresting the morbid process at the outset.

PERITTOMA, Excrement.

PERIWINKLE, LESSER, Vinca minor.

PERIZOMA, from περιζώννυμι, 'to gird around.' A bandage, girdle. In Fabricius Hildanus, a truss.

PER'KINISM. A therapeutical means, first employed by Dr. Elisha Perkins of Norwich, Connecticut, towards the termination of the last century, and named after him. It consisted in drawing over affected or other parts the pointed extremities of two metallic rods, called *Metallic Tractors*, each made of a different metal.

The success obtained was through the influence of the imagination; and, consequently, it ranks as high as animal magnetism (q. v.) but no higher. The operation was, also, called *Tractoration*.

PERLA, Pearl.

PERLE, Pearl.

PERMOTIO, Motion.

PERNICIOSUS, Delictorious.

PERNIO, Chilblain.

PERODACTYLEUS, Flexor longus digitorum pedis profundus perforans.

PEROMELIA, from πηρος, 'wanting,' and μέλος, 'a limb.' Congenital misconstruction, or mutilation of the limbs. A genus in the nosology of Good.

PERONÉ, Fibula—*p. col du*, Collum fibulæ.

PERONE'AL, *Peronæus*, from πηρονή, 'the fibula.' Belonging or relating to the fibula.

The *Peroneal Muscles* are three in number.

1. PERONÆUS BREVIS, *P. secundus*, *P. anti-cus*, *P. M'edius*, *Semi-fibulæus*, *Grand péronéo-métatarsien*, *Court péronéo-latéral*, (F.) *Moyen Péronier*. A muscle, situate beneath the peronæus longus. It is attached, above, to the outer surface of the fibula, and terminates, below, at the posterior extremity of the 5th metatarsal bone, after having been reflected beneath the malleolus externus. It extends the foot upon the leg, at the same time raising a little the outer edge. It may, also, act upon the leg, and extend it upon the foot.

PERONÆUS LONGUS, *Peronæus primus seu post'icus*, *P. maximus seu post'erior*, *P. primus*,

*Tibi-péronéo-tarsien*, *Long péronier latéral*, *Péronéo-sous-tarsien* (Ch.) (F.) *Muscle grand péronier*. This muscle is situate at the outer part of the leg. It is long, thick, and triangular above; thin, narrow, and flat below. It is attached, above, to the outer edge of the upper extremity of the fibula, and to the upper third of the outer surface of that bone. Below, it terminates at the outer part of the posterior extremity of the first metatarsal bone. This muscle extends the foot on the leg, turning its point outward, and raising its outer edge. It acts, also, upon the leg, which it extends on the foot.

PERONÆUS TERTIUS,—*Nonus Vesal'ii*, *Péronier antérieur*, *Petit péronéo-sus-métatarsien* (Ch.) (F.) *Petit Péronier*. A muscle, situate at the anterior, outer, and inferior part of the leg. It is long and flat, and is attached, above, to the inferior third of the anterior margin and inner surface of the fibula; terminating, below, at the posterior extremity of the 5th metatarsal bone. This muscle bends the foot on the leg, by raising its outer edge. It can, also, bend the leg on the foot.

THE PERONEAL ARTERY, or *Fibular A.*, arises from the popliteal, and is situate deeply at the posterior and outer part of the leg. It gives off branches of little importance. Near the outer ankle, it divides into two branches. 1. The *posterior peroneal*, which descends behind the lower joint of the fibula, on the outer surface of the calcaneum. 2. The *anterior peroneal*, which crosses the inferior extremity of the interosseous ligament, to be distributed on the dorsal surface of the foot.

THE PERONEAL VEIN follows the same course as the artery.

PERONÉO-LATÉRAL, COURT, *Peronæus brevis*—*p. Phalangien du gros orteil*, *Flexor longus pollicis pedis*—*p. Sous-phalangien du pouce*, *Flexor longus pollicis pedis*—*p. Sous-tarsien*, *Peronæus longus*—*p. Sus-métatarsien*, *Peronæus tertius*—*p. Sus-métarsien*, *grand*, *Peronæus brevis*—*p. Sus-phalangien du pouce*, *Extensor proprius pollicis pedis*—*p. Tibi-sus-phalangien commun*, *Extensor communis digitorum pedis*—*p. Sus-phalangien du pouce*, *Extensor proprius pollicis pedis*.

PERONIER, GRAND, *Peronæus longus*—*p. Lateral*, *long*, *Peronæus longus*—*p. Moyen*, *Peronæus brevis*—*p. Petit*, *Peronæus tertius*.

PEROSPLANCHNICA, from πηρος, 'wanting,' and σπλαγχνος, 'a viscus.' Congenital misconstruction of the viscera. A genus in the Nosology of Good.

PERPERACUTUS. Extremely acute. An epithet applied to very violent and rapid diseases.

PERRSOSIN. See *Pinus abies*.

PERSICAIRE DOUCE, *Persicaria*.

PERSICARIA, *Polygonum Persicaria*—*p. Urens*, *Polygonum hydropiper*.

PERSIL, *Apium petroselinum*—*p. d'Ane*, *Chærophyllum sylvestre*—*p. de Macédoine*, *Bubon Mæcedonicum*—*p. de Montagne*, *Athamanta aureoselinum*.

PERSIMMON, *Diospyros Virginiana*.

PERSPIRATION, *Perspiratio*, *Transpiratio*, *Diaph'atio*, *Diap'noë*, *Diap'noë*, from πηρ, 'through,' and spirare, 'to breathe, exhale.'

The *insensible transpiration* or exhalation, continually going on at the surface of the skin and membranes. Sensible perspiration is called *sweat*.

The perspiratory fluid is secreted by an appropriate apparatus, termed by Breschet *Diaprogenous*, and consisting of a secreting parenchyma, situate in the true skin, and of spiral ducts, which open obliquely under the scales of the epidermis. A certain portion of the perspired fluid is thrown off by ordinary physical evaporation.

The *Pulmonary Exhalation*, or *Transpiration*, is that which takes place in the bronchia, and is sent out with the expired air.

PERSUDATIO, Diapedesis.

PERTE, Metrorrhagia—*p. de Sang*, Hæmorrhagia—*p. Uterine rouge*, Metrorrhagia—*p. Uterine blanche*, Leucorrhœa.

PERTES BLANCHES, Leucorrhœa.

PERTURBATRIX, (*Medici'na*.) *Perturbating Treatment*. A mode of treatment in which very active means are employed, and such as impress upon diseases a different course from that natural to them. Much evil has resulted from such treatment, especially in febrile diseases.

PERTUS'SIS, *Tussis feri'na, convulsi'va, clang'o'sa, suffocati'va, clam'o'sa, spasmodi'ca, Morbus Cucul'tus, Bæorthopn'a'a, Bæ convulsi'va, Bæ theri'd'es, Whooping-cough, Whooping-cough. Chin-cough, Kin-cough, Kind-cough, (Germ. K i n d, 'a child,') (F.) Coqueluche*. A violent convulsive cough, returning by fits, (F.) *Quintes*, at longer or shorter intervals; and consisting of several expirations, followed by a sonorous inspiration or *whoop*. The fits of coughing generally recur more frequently during the night, morning, and evening, than in the day. It is esteemed contagious, and attacks the young more particularly. It is rare for it to attack an individual for the second time. The duration is various,—six or eight weeks or more. Although the paroxysms are very violent, it is not a dangerous disease. It may, however, give rise to other affections, as convulsions, pneumonia, &c., when the complication is very dangerous, as the cause cannot be removed. Those children suffer the least, who evacuate the contents of the stomach during the fit. In the treatment, all that can be done is to palliate. It must be borne in mind, that the disease will, in time, wear itself out. If there be much tense pain of the head, or fever, V. S. may be required, but it is seldom necessary. Narcotics occasionally afford relief, but it is temporary. Gentle emetics, given occasionally, when the paroxysms are long and dry, give decisive relief, and aid in the expectation of the morbid secretions. After the disease has continued for some weeks, and persists in part from habit, change of air is essential, and this, even should the change be to an atmosphere that is less pure.

PERVENCHIE, Vinca minor.

PERVERSION, *Dia'strophê, Diastrom'ma*. One of the four modifications of function in disease: the three others being augmentation, diminution, and abolition. The Humorists used this term, also, to designate disorder or morbid change in the fluids.

PERVERSION DE LA TÊTE DES OS ET DES MUSCLES, Loxarthrus.

PERVIGILIUM, Insomnia, Coma Vigil.

PES, *Pous, πους*, (F.) *Pied*, 'the foot.' The inferior extremity of the abdominal member, representing a bony arch, an elastic vault, which transmits the weight of the body to the ground. It is divided into three parts;—the *tarsus, metatarsus*, and *toes*, (q. v.)

PES ALEXANDRINUS, Anthemis Pyrethum—*p. Cati*, Antennaria Dioica—*p. Equinus*, sec Kylosis—*p. Leonis*, Alchemilla.

PESANTEUR, Weight—*p. Spécifique*, Gravity, specific.

PÈSE-LIQUEUR, Areometer.

PESSARY, *Pessari'um*, from πεισος, 'a small stone.' *Pessus, Pes'sulus, Suppositori'um uter'inum*. A solid instrument, composed of cork, ivory, or elastic gum, which is introduced into the vagina to support the uterus, in cases of prolapsus or relaxation of that organ; to keep vaginal herniæ reduced, &c. The ancients made use of medicated pessaries, which they distinguished into emollient, astringent, aperient, &c.

The form of pessaries is very variable;—round, oval, &c. according to circumstances.

PESSARY, EGYPTIAN, *Egyptius pessus*.

PESSULUS, Pessary.

PESSUS, Pessary.

PEST, Plague.

PESTE, Plague.

PESTILENTIAL, *Pestilentia'lis*. Relating to the plague. *Pestilential diseases* are those that bear some resemblance to the plague, in respect to mode of propagation, symptoms, danger, &c.

PESTILENT-WORT, Tussilago Petasites.

PESTILENTIA, Plague.

PESTIS, Plague—*p. Variolosa*, Variola.

PET, *Fart*.

PETASITES, Tussilago petasites.

PETE'CHLE, *Peti'ula, Puncti'ula, Por'phyra Græco'rum*. Small spots, similar in shape and colour to flea-bites, which occur spontaneously upon the skin, in the course of severe fevers, &c. They are, under such circumstances, signs of great prostration.

PETECHLE SINE FEBRE, Purpura simplex.

PETECHIAL SCURVY, Purpura simplex.

PETECHIANOSIS, Purpura hæmorrhagica.

PETICULÆ, Petechiæ.

PETIGO, Impetigo.

PETIT COURIER, Influenza—*p. Lait*, Serum lactis—*p. Lait d'Hoffman*, Serum lactis Hoffmanni—*p. Sus-maxillo-labial*, Levator anguli oris.

PETITE POSTE, Influenza.

PETRÆLEUM, Petrolæum.

PETRÆUM, Solidago virgaurea.

PETRAPIUM, Bubon Mæcedonicum.

PETRÉOLE, Petrolæum.

PETRO DEL PORCO, Bezoard of the Indian porcupine.

PETRO-OCIPITAL, *Petro-occipita'lis*. Belonging to the petrous portion of the temporal bone and to the occipital bone.

The PETRO-OCIPITAL SUTURE is formed by the junction of the petrous portion of the temporal to the occipital, bone. It is a deep groove separating the bones, which have between them a thin layer of cartilage.

PETRO-SALPINGO-PHARYNGEUS. A

fleshy fasciculus, which extends from the sphenoid bone, from the petrous portion of the temporal bone, and from the Eustachian tube to the upper part of the pharynx. See Constrictor.

**PETRO-SALPINGO-STAPHYLINUS**, *Circumflexus*—p. Salpingo-staphylinus, Levator palati—p. *Staphylin*, Levator palati.

**PETRO-SPHENOIDAL**, *Petro-sphenoidalis*. Belonging to the petrous portion of the temporal bone and to the sphenoid bone.

**PETRO-SPHENOIDAL SUTURE**—a name given to the small suture which is formed by the anterior edge of the petrous portion of the temporal bone and the posterior edge of the sphenoid.

**PETROLÆUM**, *Petroleum*, *Petræ oleum*, *Petroleum*, *Bitumen Petroleum*, *Pisselæum Indicum*, *Rock Oil*, *Petroleum Barbaden'se*, *Barbadoes Tar*, (F.) *Pétrole* ou *Pétrôle*, from *πετρος*, 'rock,' and *ελαιον*, 'oil.' A bituminous substance of a fetid odour, and bitter, acrid taste. It is semi-liquid, tenacious, semi-transparent; of a reddish-brown colour, insoluble in water and alcohol; combines with fixed and essential oils, and sulphur; and is partially soluble in ether. The petroleum, found at Gabian, near Béziers, in France, has been called *Oleum Gabiana'num*, (F.) *Huile de Gabian*, *Petroleum rubrum*.

**PETROLEUM BARBADENSE**, *Petrolæum*.

**PETROLEUM SULPHURÆTUM**, *Balsamum Sulphuris Barbaden'se*—composed of *petrol. barb.*  $\zeta$ xvj, *flor. Sulph.*  $\zeta$ iv.—has been used as a pectoral; and as a detergent to ulcers. It has been accounted antispasmodic and sudorific. Dose,  $\text{gr. x}$  to  $\text{xxx}$ . Externally, it is used as a stimulant and discutient.

**PÉTROLE**, *Petrolæum*.

**PETROSELINUM**, *Apium petroselinum*—p. *Macedonicum*, *Bubon Macedonicum*.

**PETROSUM, OS**. See *Temporal*.

**PETROUS**, *Petrosus*, from *πετρος*, 'a stone.' Resembling stone; having the hardness of stone.

The **PETROSAL GANGLION**, or *Ganglion of Andersch*, is formed by the glosso-pharyngeal nerve, shortly after it emerges from the jugular fossa. From this ganglion, M. Jacobson of Copenhagen traced an anastomosing loop through the cavity of the tympanum, which left branches there, and was thence reflected downwards to join the vidian nerve. See *Otic ganglion*. This has been called the *Nerve of Jacobson*, and the *inoculation*, *Jacobson's Anastomosis*.

The **PETROSAL SINUSES** are two venous sinuses of the dura mater, connected with the petrous portions of the temporal bone, and distinguished, on each side, into:—

1. The *superior petrosal sinus*. It arises from the cavernous sinus; follows the upper edge of the petrous portion, which affords it a gutter; passes into the great circumference of the tentorium cerebelli, and opens into the lateral sinus, where the latter experiences a bend, near the base of the pars petrosa. Its form is triangular.

2. The *inferior petrosal sinus* arises from the cavernous sinus at the same point as the last, with which it communicates at the moment of its origin. It descends between the inferior edge of the pars petrosa and the basilar process; and terminates in the lateral sinus, at the sinus or gulf of the internal jugular vein. It

is triangular, and broader at its extremities than middle.

**PETUM**, *Nicotiana tabacum*.

**PEUCE**, *Pinus sylvestris*.

**PEUCEDANUM OFFICINALE**, *Marathrum sylves'træ*, *Marathrophyllum*, *Pinastellum*, *Faniculum porcinum*, *Bonus Genius*, *Hog's Fennel*, *Sulphur Wort*, (F.) *Queue de Pourreau*, *Fenouil des Porcs*. Family, Umbelliferae. *Sex. Syst.* Pentandria Digynia. The root has a strong, fetid smell—somewhat resembling that of sulphureous solutions—and an acrid, unctuous, bitterish taste. It has been recommended as anti-hysterical and nervine.

**PEUCEDANUM SILAUS**,—*Saxifraga vulgaris*, *S. Anglica*, *Hippomarathrum*, *Faniculum erraticum*, *English or Meadow Saxifrage*, (F.) *Séséli des prés*. The roots, leaves, and seeds have been recommended as aperients, diuretics, and carminatives. Rarely used.

**PEUPLIER NOIR**, *Populus*.

**PEXIS**, *Concretion*.

**PEYERI GLANDULÆ**, *G. Peyeria'na*, *Peyeri Plexus glandulosi*, *Glandulæ mucosæ coaginatae seu agminatae seu muciparæ racematim congestae intestinum*, *G. intestinalis seu plexiformes seu spuria*, *Corpuscula glandularum similia seu glandulæ in agmen congregatae intestinorum*, *Enteradenes*, *Peyer's Glands*, *Lieberkühn's Glands*. Small glands or follicles, situate beneath the villous coat of the intestines. They are clustered together, and are extremely numerous.

**PEZA**, *πέζα*. This word, according to some anatomists, signifies *Malleolus*; according to others, the *sole of the foot*.

**PEZA**, *Astragalus*, *Sole*.

**PEZYSA AURICULA**, *Auricula Judæ*, *Fungus sambucinus*, *Agaricus Auricula formâ*, *Jew's Ear*. This fungus is said to be astringent; but has chiefly been used as a gargle in relaxed sore throat.

**PHAC'LITIS**, from *φακος*, 'a lens,' and *itis*, a termination denoting inflammation. *Capsi'tis*, *Capsuli'tis*, *Lenti'tis*. Inflammation of the crystalline lens.

**PHACOS**, *Ervum lens*.

**PHACOSCOTOMA**, *Cataract*.

**PHACOTOS**, *Phac'tæ*, from *φακος*, 'a scraper.' A name given by the ancients to a kind of scissors or rasp, used in cases of fracture of the skull.—J. Cloquet.

**PHAGÆNA**, *Boulimia*.

**PHAGEDÆNA**, *Boulimia*—p. *Gangrænosa*, *Hospital Gangrene*.

**PHAGEDEN'IC**, *Phagedænicus*, from *φαγω*, 'I eat.'

A **PHAGEDENIC ULCER**, *Nomē*, *Phagedæna*, *Ulcus depascens*, is one, which rapidly eats and corrodes the neighbouring parts.

In *Materia Medica*, *Phageden'ic* is a substance used for destroying fungous granulations in ulcers, &c.

**PHALACROMA**, *Calvities*.

**PHALACROSIS**, *Calvities*.

**PHALACROTIS**, *Alopecia*.

**PHALAI'A**. A barbarous term, employed by Basil Valentine, to designate a universal medicine or panacea.

**PHALANGES DES DOIGTS**, *Phalanges*

of the fingers—*p. des Orteils*, Phalanges of the toes.

**PHALANGETTIEN.** Professor Chaussier uses this term for any thing relating to the third phalanx of the fingers or toes:—*Phalangien*, for what relates to the first;—and *Phalangiën*, to the second.

**PHALANGO'SIS**, *Hispid'itas*, from φαλαγγίς, 'a row of soldiers.' An affection of the eyelids, in which the lashes are arranged in two or three rows. See *Trichiasis*. Also, dropping of the upper eyelid, from paralysis of the levator palpebræ superioris muscle.

**PHALANX**, same etymon. A name given to the small bones, which form the fingers and toes, because placed along side each other like a phalanx. They are distinguished into the *Phalanges of the Fingers*, *Ossa seu Ag'mina seu Ac'ies seu Articuli seu Scutic'ula seu Nodi seu Internodia seu Scytal'ides seu Con'dyli Digtorum Manus*, and the *Phalanges of the Toes*, *Ossa seu Articuli seu Internodia Digtorum Pedis*.

**I. PHALANGES OF THE FINGERS**, (F.) *Phalanges des Doigts*. They are, in each hand, 14,—three to each finger, and two to the thumb; and are situate one above the other. They are distinguished, numerically, reckoning from the base towards the tip of the finger. 1. The *first or metacarpal*, (F.) *Premières phalanges ou Phalanges métacarpiennes*. 2. The *second or middle phalanges*, (F.) *Secondes phalanges ou Phalanges moyennes, Phalangines*. (Ch.) 3. The *third phalanges*, *Metacondyli, Phalanges unguinis*, (F.) *Troisièmes phalanges ou Phalanges unguéales, unguifères, unguinales, Phalanges* (Ch.,) which terminate each finger, and support the nail.

**II. PHALANGES OF THE TOES**, (F.) *Phalanges des Orteils*. They are the same in number as those of the fingers, but much smaller, and of a very different shape.

The phalanges of a finger or toe are united with each other; and the first with the metacarpal or metatarsal bone. They are developed from two points of ossification; one for the superior extremity, and the other for the body and inferior extremity.

**PHALARIS CANARIEN'SIS**, *Cultivated Canary Grass*, (F.) *Alpiste*. Family, Graminæ. *Sex. Syst.* Triandria Digynia. The seed of this grass, (F.) *Graines d'aspic*, afford a nourishing meal. The ancients recommended them, for allaying pains in the kidney and bladder.

**PHALLOCARCINO'MA**, from φαλλος, 'the male organ,' and καρκινωμα, 'cancer.' Carcinoma or cancer of the penis.

**PHALLORRHAG'IA**, from φαλλος, 'the male organ,' and ρηγνυμι, 'I break out.' Hemorrhage from the male urethra. Stimatosis, (q. v.)

**PHALORRHŒA**, Gonorrhœa.

**PHALLOSO'PHIA**, from φαλλος, 'the male organ,' and ψοφος, 'a noise.' Discharge of wind from the male urethra.

**PHALLUS**, Penis.

**PHANTASIA**, Imagination.

**PHANTASM**, *Phantas'ma*, from φαντασω, 'I make appear.' A phantom, false appearance, apparition. Hallucination, (q. v.) Derangement of the sense of sight or of the intellectual faculties, causing objects to be perceived, which are not before the eyes.

**PHANTAS'MA**, Pseudoblepsia.

**PHANTOM**, Fantom.

**PHARMACEIA**, Poisoning.

**PHARMACEUM**, Apotheca.

**PHARMACEU'TIC**; *Pharmacu'ticus*, from φαρμακον, 'a medicine.' An epithet for every thing belonging to Pharmacy. Thus, we say, *Pharmaceutical preparations*, &c.

**PHARMACEUTICE**, Pharmacy.

**PHARMACIEN**, Apothecary.

**PHARMACOCATAGRAPHOLO'GIA**, from φαρμακον, 'a medicine,' κατα, 'beneath.' γραφη, 'a writing,' and λογος, 'a description.' The art of writing prescriptions.—J. J. Plenck.

**PHARMACODYNAM'ICS**, from φαρμακον, 'a medicine,' and δυναμις, 'power.' A division of pharmacology, which considers the effects and uses of medicines.

**PHARMACOGNO'SIA**; from φαρμακον, 'a medicine,' and γινωσκω, 'I know.' A division of pharmacology, which treats of simples or unprepared medicines.

**PHARMACOLOGIA**, *Materia medica*.

**PHARMACOPŒ'IA**, *Pharmacopœ'ia*, (F.) *Pharmacopée*, from φαρμακον, 'a medicine,' and ποιω, 'I make.' A work, containing a collection of formulæ for the preparation, &c., of medicines: generally published by authority.

**PHARMACOPŒUS**, Apothecary.

**PHARMACOPŒLA**, Apothecary.

**PHARMACOPŒLE**, Apothecary.

**PHARMACOPOLI'UM**, *Apothé'ca, Offici'na*. The shop of the druggist or apothecary, from φαρμακον, 'a medicine,' and πωλειω, 'I sell.'

**PHARMACOPO'SIA**, from φαρμακον, 'a medicine,' and ποσις, 'a portion.' A liquid medicine, especially one that is cathartic.

**PHARMACO'SA MEDICAMENTA**, from φαρμακον, 'a poison.' Medicines that contain poisonous substances.—Fallopius.

**PHARMACOTHE'CA**, *φαρμακοθηκη*, from φαρμακον, 'a medicine,' and τιθημι, 'I place.' A case for certain medicines.

**PHARMACUM**, *Medicamentum*—*p. Ægyptiacum, Ægyptiacum*—*p. Amatorium, Philiter*.

**PHARMACUM AD AURES**, *Ægyptium Medicamentum ad Aures*. A name given to a medicine, composed of bitter almonds, white pepper, saffron, myrrh, opium, frankincense, castor, verjuice, sulphate of iron, vinegar, pomegranate bark, unguentum nardinum, &c. It was believed to be useful for cleansing fetid ulcers in the ears.

**PHARMACY**, *Pharmac'ia, Pharmaceuticæ*, from φαρμακον, 'a medicine.' The art which teaches the knowledge, choice, preservation, preparation, and combination of medicines. It was formerly divided into *Galenical and Chymical*. The former, called after Galen, embraced the operations undertaken on medicines without analyzing them:—the latter, *Chymical Pharmacy* or *Pharmaceutic Chymistry, Pharmaco-chym'ia*, comprised the preparation of medicines, founded on the chymical action of their principles.

**PHARYS**, Pharynx.

**PHARYGATHR'ON**, Pharynx.

**PHARYNGÆ'UM**, (SAL.) A compound of cream of tartar, nitrate of potassa, burnt alum, and distilled vinegar. It was formerly employed, united with honey and plantain wa-

ter, to make gargles, which were advised in quinsy.

**PHARYNGÉ**, Pharyngeal.

**PHARYNGE'AL**, *Pharyngæus*, (F.) *Pharyngé*, *Pharyngien*. That which relates to the pharynx. A name given to the muscles, vessels, and nerves of the pharynx.

The **PHARYNGEAL ARTERIES**. These are two in number. The one—*superior* or *pterygo-palatine*, *Ramus Pharyngæus superior* of Haller—arises from the internal maxillary at the base of the zygomatic fossa, passes through the pterygo-palatine canal, and proceeds to be distributed to the pharynx and the corresponding part of the Eustachian tube. The other—the *inferior*—*Pharyngæa ascendens* of Haller—arises from the external carotid, on a level with the facial. It ascends along the lateral and posterior part of the pharynx, and divides into two branches: the one—the *pharyngeal*, properly so called—is distributed to the pharynx; the other—the *meningeal*—gives its branches particularly to the dura mater.

The **PHARYNGEAL NERVE**:—a branch sent by the pneumogastric to the pharynx. It descends behind the internal carotid; communicates with the glosso-pharyngeal; and divides, opposite the middle constrictor of the pharynx, into a great number of filaments, which anastomose, in a multitude of different directions, with filaments of the glosso-pharyngeal nerve, of the superior laryngeal branch, and of the first cervical ganglion. These different nervous filaments united constitute the *pharyngeal plexus*, the irregular meshes of which send numerous ramifications to the pharynx.

**PHARYNGETHRON**, Pharynx.

**PHARYNGEURYSMA**, Pharyngocele.

**PHARYNGIEN**, Pharyngeal.

**PHARYNGIT'IS**, Cynanche parotidæa.

**PHARYNGOCE'LE**, *Pharyngeurys'ma*, *Di-vertic'ulum* seu *Hernia* seu *Prolap'sus* *Œsoph'agi* vel *pharyn'gis*. An enlargement at the upper part of the gullet, in which the food sometimes rests in considerable quantity.

**PHARYNGO-GLOSSAL**, *Glosso-pharyngeal*, *Pharyngo-glossianus*. That which belongs to the pharynx and tongue.

The *Glosso-pharyngeal Nerve* or *Pharyngo-glossal*, *Lingua'lis latera'lis*, (F.) *Nerf Glosso-pharyngien*, *Pharyngo-glossien*—a portion of the eighth pair—arises from the superior and lateral parts of the spinal marrow, between the facial and pneumogastric nerves, by several filaments, which soon unite into a single cord, that passes out of the cranium by the foramen lacerum anterius; goes downwards and forwards, and gains the posterior and inferior part of the tongue. Immediately after its exit from the cranium, it gives a branch to the meatus auditorius externus, and receives a filament from the facial, and another from the pneumogastric nerve. It then furnishes two other filaments, which descend upon the carotid artery, and unite at the bottom of the neck with branches from the cervical ganglions and cardiac nerves, and give two filaments to the stylo-pharyngeus muscle.

The glosso-pharyngeus, after sending a twig or two to the tonsil, to the upper part of the pharynx and membrane of the epiglottis, divides

into many branches, which run partly to the margin, and partly to the middle of the root of the tongue; supplying, especially, the papillæ majores, and the parts in their neighbourhood.

By some, this nerve is regarded as the controller of the associated motions of the tongue and pharynx. By others, it is esteemed to be the special nerve of gustation.

**PHARYNGO-STAPHYLINUS**, Palato-pharyngeus.

**PHARYNGOG'RAPHY**, *Pharyngogra'phia*, from *φαρυγξ*, 'the pharynx,' and *γραφη*, 'a description.' Anatomical description of the pharynx.

**PHARYNGOL'OGY**, *Pharyngolo'gia*, from *φαρυγξ*, 'the pharynx,' and *λογος*, 'a discourse.' The part of anatomy which treats of the pharynx.

**PHARYN GOTOME**, *Pharyngot'omus*, from *φαρυγξ*, 'the pharynx,' and *τεμνω*, 'I cut.' An instrument, invented by J. L. Petit, and used to scarify inflamed tonsils, and to open abscesses, which form in the parietes of the pharynx. It is composed of a long, narrow blade with a lancet point, and enclosed in a sheath or canula of silver, slightly curved. This instrument is carried to the part to be cut, and the point of the blade is made to pass out of the sheath, by pressing on a button at the end of the pharyngotome. A spring causes the blade to re-enter as soon as the pressure is removed.

**PHARYNGOT'OMY**, *Pharyngoto'mia*; same etymon. Some authors have used this word synonymously with œsophagotomy, (q. v.) It means, also, scarification of the tonsils, or an incision, made for opening abscesses there, &c.

**PHARYNX**, *Pharyx*, *Pharus*, *Gula*, *Læmos*, *Fauces*, *Pharyn'gethron*, *Pharyn'gethos*, *Pharyngathron*, *Isthmos*, *Isth'mion*, *Inglu'vies*, *Princip'ium Gula*, *Os post'erum*, (F.) *Arrière-bouche*, *Gosier*. A species of musculo-membranous, symmetrical canal, on the median line, irregularly funnel-shaped, and situate between the base of the cranium and the œsophagus, in front of the vertebral column. It is very narrow above; but dilates in the middle, and again contracts below, at its junction with the œsophagus. Into the anterior paries of the pharynx open, successively, from above to below,—the posterior orifices of the nasal fossæ; the Eustachian tubes; the posterior aperture of the mouth, and the top of the larynx.

The pharynx is formed, externally, of a muscular coat, and, internally, of a mucous membrane, which is continuous, above, with the Schneiderian membrane; in the middle, with that of the mouth; below, with that of the œsophagus, and, at the sides, with those of the Eustachian tubes. This membrane has no villi, and presents only a few inequalities, which are owing to the presence of muciparous follicles.

The muscular coat of the pharynx is composed of the constrictor muscles, stylopharyngei, and pharyngo-staphylini. The vessels and nerves are called 'pharyngeal.'

The pharynx serves as a common origin for the digestive and respiratory passages. It gives passage to the air, during respiration; and to the food at the time of deglutition.

**PHARYX**, Pharynx.

**PHASEOLUS VULGARIS**, *Fase'lus, Fase'olus, Bona, Boona*; the *Kidney Bean*; the *French Bean*, (F.) *Haricot*. Family, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. When young and well boiled, this is easy of digestion, and delicately flavoured. It is less flatulent than the pea.

**PHASEOLUS CRETICUS**, *Cajan, Cayan*. A decoction of the leaves, according to Ray, restrains the hemorrhoidal flux, when excessive.

**PHASIA'NUS GALLUS**, (F.) *Coq*. The parts of generation of the cock, dried and pulverized, were formerly regarded proper for increasing the quantity of semen. The fat was used as emollient and resolvent; the brain, in diarrhœa; the gall, in freckles and diseases of the eyes. These phantasies are now abandoned.

**PHATNION**, *Alveolus*.

**PHATNORRHA'GIA**, from φατιον, 'an alveolus,' and ρηγνυμι, 'I break forth.' Hemorrhage from an alveolus.

**PHAUSINGES**, φανσιγγες, from φαν'ζω, 'I roast.' Spots or blisters on the legs, produced by heat; and, in a more extensive signification, by any other cause. Also, a Pustule.—Fœsius.

**PELLANDRE**, *Pellandrium aquaticum*.

**PELLANDRIUM AQUATICUM**, *Pellandrium, Fœniculum aquaticum, Cicuta'ria aquatica, Water Fennel, Fine-leaved Water Hemlock*, (F.) *Pellandre, Fenouil d'eau, Ciguc d'eau*. Family, Umbellifera. *Sex. Syst.* Pentandria Digynia. This plant is stimulant and narcotic. It has been used in intermittents and dyspepsia. It has, also, been given in phthisis pulmonalis, and in cases of scrofulous, atonic ulcers.

**PHENIG'MUS**, *Phœnig'mus*, from φœνιξ, 'red.' *Red Jaundice*. A cutaneous affection, consisting of redness diffused over the skin, without fever. Sauvages makes it a genus of his order *Ictericæ*. Also, the act of irritating a part by a stimulating application.

**PHENOM'ENON**, from φανομαι, 'I appear.' Any extraordinary and unexpected event.

In *Medicine*, it means any change, appreciable by our senses, which supervenes in an organ or function:—as the *phenomena* of the circulation, respiration, &c. It is used in pathology, synonymously with symptom.

**PHÉUGOPHOBIA**, *Hydrophobia*.

**PHÉUGYDRON**, *Hydrophobia*.

**PHIALA**. A *Phial* or *Vial*, (F.) *Fiole*. A small bottle, in which apothecaries are in the habit of sending out their mixtures, draughts, &c.: hence called *Medicine Vials*, (F.) *Fioles à Médecine*. They are usually sold in grosses, and assorted into vials of oz. 8; oz. 4; oz. 3; oz. 2; oz. 1½; oz. 1; and oz. ½.

**PHILANTHROPUS**, *Galium aparine*.

**PHILETRON**, *Philter*.

**PHILATROS**, φιλατρος, from φιλω, 'I love,' and ιατρινη, 'medicine.' An amateur of medicine. One who studies medicine.

**PHILONUM LONDINENSE**, *Confectio Opii*.

**PHILOPATRIDALGIA**, *Nostalgia*.

**PHILOPATRIDOMANIA**, *Nostalgia*.

**PHILOSOPHER'S STONE**. See *Alchymy*.

**PHILOSOPHIA CORPORIS VIVI**, *Physiology*—p. *Hermetica*, *Alchymy*—p. per *Ignem, Chymistry*.

**PHILTER**, from φιλω, 'I love.' *Philtrum*,

*Philetron, Phar'macum* vel *po'eulum amato'rium, Amato'rium venefic'ium*, (F.) *Philtre*. A medicine or drink, considered capable of causing love.

**PHIL'TRUM**, φιλτρον, in *Anatomy*, means the fossula or depression on the upper lip, beneath the septum of the nose, which seems to divide the lip into two parts.

**PHILYRA**, *Tilia*.

**PHLYMA**, *Phlyma*.

**PHIMOS**, *Capistrum*.

**PHIMOS'ICUS**. Relating to *Phimosi*.

Sauvages calls *Ischuria phimo'sica, Ischuria urethralis a phimo'si*, the retention of urine, which depends upon *phimosi*.

**PHIMO'SIS**, *Phymosis, Capistratio*, from φημοσι, 'I bind up.' A disease, which consists in a preternatural narrowness of the opening of the prepuce, so that it cannot be carried behind the corona glandis. This affection is most commonly congenital. Sometimes it is accidental, and dependent upon tumefaction of the glans, or of the prepuce, as occurs in syphilis. To remedy this state, the prepuce may be divided by means of a bistoury and director; or circumcision may be practised.

**PHLASMA**, *Contusion*,

**PHLEBARTERIODIALYSIS**. See *Aneurism*.

**PHLEBECTA'SIA**, from φλεψ, 'a vein,' and εκτασις, 'dilatation.' Dilatation of a vein, or of a portion of a vein.—*Alibert*.

**PHLEBES**, (arteries.) See *Artery*.

**PHLEBEURYSMA**, *Varix*.

**PHLE'BION**, diminutive of φλεψ, 'a vein.'

A vein.—*Hippocr. Venula*. (q. v.)

**PHLEB'TIS**, from φλεψ, 'a vein,' and ιτις, the termination for inflammation. Inflammation of the inner membrane of a vein, which sometimes follows blood-letting, and extends from the small wound, made in that operation, to the neighbouring parts of the venous system. The symptoms are, first, inflammation in the punctured part; and, afterwards, a knotty, tense, painful cord, following the direction of the vessel, and accompanied with more or less fever, according to the extent of the inflammation, the nervous symptoms, &c.

*Phlebitis*, also, sometimes supervenes on the ligature or excision of varices; after amputation, gunshot wounds, delivery, the ligature of the umbilical cord, &c. It may terminate by resolution, suppuration, ulceration, or gangrene.

**PHLEBITIS CRURAL**, *Plegmatia dolens*.

**PHLEBOG'RAPHY**, *Phlebogra'phia*, from φλεψ, 'a vein,' and γραφη, 'a description.' Description of the veins.

**PHLEB'OLITE**, *Phlebol'ithus, Vein stone*. A loose concretion, varying in size from a currant to that of a pea, occasionally found in the veins. It would seem to be formed in the blood.

**PHLEBOLITHUS**, *Phlebolite*.

**PHLEBOL'OGY**, *Phlebol'gia*, from φλεψ, 'a vein,' and λογος, 'a discourse.' The part of anatomy which treats of the veins.

**PHLEBOPAL'IA**, φλεβοπαλια, φλεβοπαλαια, from φλεψ, 'a vein,' and παλλω, 'I palpitate.' With the ancients, *pulsation*, which they conceived to be produced by the veins. See *Pulses Venarum*.

**PHLEBOPHTHALMOTOMIA**, *Ophthalmal-*

*mophlebotomia*, from φλεψ, 'a vein,' οφθαλμος, 'the eye,' and τεμνω, 'I cut.' Blood-letting in the eye.

PHLEBOPLEROSIS ECPHRACTICA, Inflammation.

PHLEBORRHA'GIA, from φλεψ, 'a vein,' and ρηγνυμι, 'I break out.' Rupture of the veins; and, in a more extensive sense, venous hemorrhage.

PHLEBORRHEX'IS, from φλεψ, 'a vein,' and ρηξις, 'a rupture of a vein.' Also, hemorrhage from a vein. *Phleborrhagia*.

PHLEBOTOMIST, from φλεψ, 'a vein,' and τεμνω, 'I cut.' A bleeder. One who practises, particularly, the operation of phlebotomy. See Blood-letting.

PHLEBOTOMUS, Fleam.

PHLEBS, Vein.

PHLEDONIA, Delirium.

PHLEGM, *Phlegma*, Πίτις, *Pituita*. One of the four natural humours of the ancients, which was, according to them, cold and moist, as atrabilis was cold and dry. It predominated, especially, in winter.

*Pituita* was afterwards applied to every aqueous or excrementitious humour, such as the saliva, nasal and intestinal mucus, serum, &c. The terms *phlegm* and *pituita* are no longer used in Physiology; the different humours having received particular names; but the vulgar still use *phlegm* to designate a stringy mucus, expectorated or rejected by vomiting. The ancient chymists gave the name 'phlegm' to aqueous, insipid, and inodorous products obtained by subjecting moist vegetable matters to the action of heat.

PHLEGMAGOGUE, from φλεγμα, 'phlegm,' and αγω, 'I expel.' A medicine, formerly believed capable of "cutting" or removing phlegm.

PHLEGMASIA, Inflammation, Phlegmon—p. of the Peritoneum, Peritonitis.

PHLEGMATIA from φλεγμα, 'phlegm.' (Edema, (q. v.) Anasarca, Hydrops, (q. v.)

PHLEGMATIA DOLENS, *P. lactea*, *P. dolens puerperarum*, *Leucophlegmasia dolens puerperarum*, *Scelon'eus*, *Anasar'ca sero'sa*, *Echyma oedemat'icum*, *Spargano'sis puerperarum*, *Echymoma lymphat'ica*, *Ischias u spargano'si*, *Ed'e'ma puerperarum*, *Ed. lacteum*, *Cru'al Phleb'i'tis*, *White leg*, *Swelled leg*, *White swelling of lying-in-women*, (F.) *Dépot luiteux sur la cuisse*, *Edème actif des nouvelles accouchées*, *Enflure des jambes et des cuisses de la femme accouchée*. It occurs, for the most part, in the second or third week after delivery:—is limited to the lower extremity, and chiefly to one side; exhibiting to the touch a feeling of numerous irregular prominences under the skin. It is hot, white, and unyielding; and is accompanied, sooner or later, with febrile excitement. After a few days the heat, hardness, and sensibility diminish; and the limb remains oedematous, for a longer or shorter period.

The disease frequently, if not generally, consists in obstruction of the iliac or other veins. Owing to the pressure of the gravid uterus—the flow of blood being obstructed—the serous part of it is thrown out into the cellular membrane of the limb. Sometimes the vein is found completely obliterated.

The treatment consists in the use of anti-phlogistics:—the application of leeches or cupping-glasses near the groin; fomentations to the limb, &c.; and, when the active state has subsided, the use of a roller, applied gently at first, but, afterwards, gradually tightened.

PHLEGMATIA LACTEA, *P. dolens*.

PHLEGMATIÆ MEMBRANOSÆ ET PARENCHYMATOSÆ, *Empresma*.

PHLEGMATOPYRA, Fever, adeno-meningeal.

PHLEGMATORRHA'GIA, *Phlegmatorrha'a*, from φλεγμα, 'phlegm,' and ρεω, 'I flow.' Stahl and his partisans gave this name to a copious secretion, by the nostrils, of a limpid and thin mucus, without inflammation. It is the *Coryza Phlegmatorrhagia* of Sauvages. See *Coryza*.

PHLEGMHYMENITIS, *Phlegmymenitis*.

PHLEGMON, from φλεγω, 'I burn.' *Phlog'osis phleg'monē*, *Phleg'monē*, *Phlegma'sia*, *Incen'dium*, *Inflamma'tio*. Inflammation of the cellular texture, accompanied with redness, circumscribed swelling, increased heat and pain; which is, at first, tensile and lancinating; afterwards, pulsatory and heavy. It terminates, most commonly, in suppuration. It requires the antiphlogistic treatment, until suppuration seems inevitable, when the suppuration must be encouraged, as the next favourable termination to resolution.

PHLEGMONE, Inflammation—p. Mammæ, Mastodynia apostematosa—p. Mastodynia, Mastodynia apostematosa—p. Parotidæa, Parotitis.

PHLEGMONODES, Phlegmonous.

PHLEGMONOUS, *Phlegmonodes*, from φλεγμα, 'a phlegmon,' and ειδος, 'resemblance.' That which relates or belongs to a phlegmon.

PHLEGMONOUS INFLAMMA'TION, is the active inflammation of the cellular membrane; in contradistinction to erysipelatous inflammation or that of the skin.

PHLEGMOPYRA, Fever, Adeno-meningeal.

PHLEGMORRHAGIA, *Blenorrhœa*.

PHLEGMORRHŒA, *Blenorrhœa*.

PHLEGMYMENITIS, *Phlegmymenitis*, from φλεγμα, 'phlegm,' υμεν, 'a membrane,' and itis, the termination for inflammation. Inflammation of a mucous membrane.

PHLEPS, Vein.

PHLOGISTICI, *Empresma*.

PHLOGISTON, Hydrogen.

PHLOGO'DES, from φλοξ, 'flame,' and ειδος, 'resemblance.' *Infla'med*, *Inflamma'tus*. An epithet employed, particularly, to express the red colour of the face.

PHLOGOPYRUS, *Sychocha*.

PHLOGO'SIS, *Incendium*, (q. v.) *Inflamma'tion*, (q. v.) Some writers use the word exclusively for external inflammations—phlegmon; others, for those that are superficial or erysipelatous.

PHLOGOSIS, *Phlegmone*, *Phlegmon*.

PHLOGOTICA, *Inflamma'tions*. The second order in the class *Hæmatica* of Good.

PHLOGIOS, Cortex.

PHLOOS, Cortex.

PHLORIDZINE, *Phloridz'ina*, from φλωος, 'inner bark,' and ριζα, 'root.' The bitter or active principle of the root and trunk of the

apple, pear, cherry, and plum tree. It is deposited from the decoction on cooling; crystallizes in silky spicula of a dead white colour, when in masses, or in long slender prisms or tables, when crystallized with care. 1000 parts of water, at a temperature of from 32° to 71°, only dissolve about one part; but at from 70° to 212°, it is dissolved in all proportions. It is very soluble in pure alcohol, but only slightly so in ether; s. g. 1.429.

It has been administered successfully in intermittents, 10 to 20 grains being generally required to arrest the paroxysm. It may be given either in the form of pill or powder.

PHLOUS, Cortex.

PHLYCTÆ'NA, *Phlyctæ'cion*, *Ampul'la*, *Holophlyctides*, *Phlyctides*, *Phly'sis*, *φλυκτιδες*, from *φλυζω*, 'I boil.' Tumours, formed by the accumulation of a serous fluid under the epidermis.

PHLYCTÆNULA. See Hydatid.

PHLYCTENOID, *Phlyctenoides*. Resembling phlyctæna. An epithet for a variety of herpes.

PHLYCTIDES, Phlyctæna.

PHLYCTIDIUM, same etymon. A circular or annular spot of inflammation of the corium, encircled by a red ring or zone, within which suppuration takes place. The genuine small pox pustule, and that produced by the application of tartar emetic ointment are examples of it.

PHLYSIS, from *φλυζω*, 'I am hot,' 'I boil.' A cutaneous eruption. An ulcerative, subcutaneous tumour: flat, tensile, glabrous; diffused, hot, throbbing; at length fluctuating with an acrid ichor.—Good.

PHLYSIS, Phlyctæna—p. Impetigo, Impetigo—p. Porrigo, Porrigo—p. Scabies, Psora.

PHLYZACION, Phlyctæna.

PHOBODIPSON, Hydrophobia.

PHOCOM'ELES, from *φωκη*, 'a seal,' and *μειλος*, 'a limb.' A genus of monsters, in which the limbs are shortened; the hands and feet appearing to exist alone, and to be inserted immediately on the trunk, as in the seals and the herbivorous cetacea.—J. G. St. Hilaire.

PHENICISMUS, Rubeola.

PHENIGMUS, Phenigmus—p. Petechialis, Purpura simplex.

PHENIX DACTYLIFERA, Date tree.

PHONA'TION, *Phona'tio*, from *φωνη*, 'voice.' The physiology of the voice.

PHONE, Voice.

PHON'ICA, *φωνικα*, from *φωνη*, 'voice.' The first order of the class *Pneumatica* in Good's Nosology. Defined:—diseases affecting the vocal avenues:—the passage of the voice impeded, or its power suppressed or depraved.

PHONON'OSI, *Phonon'osi*, from *φωνη*, 'the voice,' and *νοσος*, 'a disease.' *Morbi vocis*. Diseases of the voice. *Phonopath'ia*.

PHONOPATHIA, Phononosi.

PHORA, Gestation.

PHORBE, Fabulum.

PHORONOMIA, from *φορομαι*, or *φερομαι*, 'I put myself in motion,' and *νομος*, 'law.' The doctrine of muscular motion.

PHOROUS, from *φερω*, 'I carry.' A suffix denoting conveyance. Hence, *Galactophorous*, &c.

PHOS, Light.

PHOSPHAS CALCICUM STIBIATUM, Antimonial powder—p. *Calcis stibiatus*, Antimonial powder—p. *Natricum*, Soda, Phosphate of.

PHOSPHAT'IC, *Phosphat'icus*, from *Phosphorus*. Relating to the phosphates; hence *Phosphat'ic Diath'esis* is the habit of body which favours the deposition of the phosphates from the urine.

PHOSPHORE, Phosphorus.

PHOSPHORENESES. M. Baumes unites, under this generic name, the diseases which he attributes to disordered phosphorization; i. e. to excess or deficiency of calcareous phosphate or its decomposition. Amongst these affections he ranks rachiitis, osteo-malacia, and gout.

PHOSPHORES' CENCE, *Phosphorescent'ia*.

The property, possessed by certain bodies of being luminous in obscurity, or under particular circumstances. In the eye of the cat, something of this kind seems to occur.

PHOSPHOR'IC ACID, *Ac'idum Phosphor'icum*. A solid, colourless compound; very sapid; very soluble in water, and vitrifiable by fire. It exists in bones combined with lime. It has been employed in medicine in the form of lemonade, in passive hemorrhage, typhus, phthisis, marasmus, &c., and in injection in cases of cancer of the uterus. It does not seem preferable to other acids.

PHOSPHORURIA, Urine, phosphorescent.

PHOS'PHORUS, *Phos'phorum*, *Autophos'phorus*, from *φως*, 'light,' and *φερω*, 'I carry.' (F.) *Phosphore*. 'A light-carrier.' An elementary or undecomposed substance; not metallic; solid; transparent or semi-transparent; colourless; brilliant; flexible: of a sensible garlic odour; very inflammable, and susceptible of combining with the oxygen of the atmosphere, at even the ordinary temperature. It does not exist pure in nature, but is found frequently united to other bodies.

Phosphorus has been used in medicine, dissolved in ether or suspended in the yolk of egg, as a stimulant; but the greatest precautions are necessary in its administration, so that it is rarely employed.

PHOTODAMPNIS, Refraction.

PHOTOPH'OBIA, from *φως*, 'light,' and *φοβος*, 'fear.' Aversion to light:—intolerance of light. Nyctalopia, (q. v.)

PHOTOPHOBOPHTHALMIA, Nyctalopia.

PHRAGMOS, *φραγμος*, from *φρασσαω*, 'I enclose.' A row of teeth.

PHRASIS, Voice, articulated.

PHRASUM, Marrubium.

PHREN, *φρην*, 'the mind.' Also, the diaphragm.

PHRENES, Diaphragm.

PHRENÉSIE, Phrenitis.

PHRENESIS, Delirium, Phrenitis.

PHRENETIASIS, Delirium, Phrenitis.

PHRENIC, Diaphragmatic.

PHREN'ICA, from *φρην*, 'the mind.' Diseases affecting the intellect; characterized by error, perversion, or debility of one or more of the mental faculties. The first order of the class *Neurotica* of Good.

PHRENICULA HYDROCEPHALICA, Hydrocephalus internus.

PHRENISMUS, Phrenitis.

PHRENIT'IS, *Phren'isis*, *Phreneti'as'is*,

*Phrenitis*, *Cephalitis*, *Cephalalgia inflammatoria*, *Karabitus* (Arab.) *Sibare*, *Empresma cephalitis*, *Siriastis*, *σινιασις*, *σειριασις*, *Sideratio*, *Inflammatio phrenitis*, *Encephalitis*, *Cavna phrenitis*, *Phrensy*, *Delirium* (q. v.) *Brain Fever*, (F.) *Phrénésie*. A disease, characterized by violent pyrexia; pain in the head; redness of the face and eyes; intolerance of light and sound; watchfulness; and delirium, either furious or muttering. Its causes are the same as those of other inflammations; sometimes, however, it is induced by a *Coup de soleil*; by inebriation; violent mental emotions, &c.

Some authors have given the name *Phrenitis* and *Meningitis* to inflammation of the membranes of the brain; and that of *Cephalitis*, *encephalitis* or *Cerebritis* to inflammation of the substance of the brain: but there are no pathognomonic symptoms, which can lead us to refer the seat of the disease to either of those parts exclusively.

Phrenitis is, of course, a very dangerous affection, from the importance of the organ concerned. The most active treatment must necessarily be pursued;—bleeding *ad deliquium*; purging; the application of ice to the shaved head; a position in which the head is raised; and the avoiding of irritation of every kind;—form the remedial means during the violent stage. After this has yielded, counter-irritants to the nape of the neck or to other parts of the body will be useful adjuvants.

When the brain and meninges were affected only symptomatically, as in inflammation of the diaphragm, the disease was formerly called *Paraphrenitis*. (q. v.)

*Hydrocephalus acutus* (q. v.) is a variety of phrenitis.

PHRENITIS LATRANS, Hydrophobia—p. Vermosina, Vercoquin.

PHRENOLOGY, Craniology.

PHRENSY, Phrenitis.

PHRICASMUS, Horripilation.

PHRICE, Horripilation.

PHRICO'DES (FEBRIS), from φριξν, 'a shivering.' *Horrificus*. A fever, in which the chill is very intense and prolonged.

PHRYAGMA, Shuddering.

PHRYCTE, Colophonias.

PHRYG'ITUS (LAPIS.) An earthy matter, found in Phrygia and Cappadocia, and formerly employed as an astringent.—Gorraeus.

PH'THARMA CALIGO, Caligo—p. Cataracta, Cataract—p. Glaucoma, Glaucoma.

PH'THEIR, Pediculus.

PH'THEIRE'MIA, from φθειρω, 'I corrupt,' and αιμα, 'blood.' A state in which the plastic powers of the blood are deteriorated.

PH'THERIASIS, *Phthiriasis*, from φθειρω, 'a louse.' *Morbus pediculatus*, *Pediculatio*, *Malis pediculi*. *Lousiness*, *Lousy disease*, (F.) *Maladie pédiculaire*. A disease which consists in the excessive multiplication of lice on the human body, under conditions in which it does not ordinarily take place, and in spite of cleanliness. It has been asserted, that the affection has often caused death.

Simple and medicated baths have been recommended for its removal; lotions of the decoction or infusion of tobacco and stavesacre, mercurial frictions, &c.

PH'THEIRIUM, Delphinium staphisagria.

PHTHEIROCTONUM, Delphinium staphisagria.

PHTHINODES, Phthisicus.

PHTHIRIASIS, Malis, Phthiriasis.

PHTHIROPORON, Autumn.

PHTHIS'ICUS, *Phthinosdes*, *Tab'idus*. (F.) *Poitrinaire*. Belonging to phthisis. *Phthisical*. Also, one labouring under phthisis.

PHTHISIE, Phthisis pulmonalis—p. *Calculose*, *Calculi*, pulmonary.

PHTHISIO'L'OGY, *Phthisiologia*, from φθισις, and λογος, 'a treatise on phthisis.'

PHTHISIO'SIS, Tubercular consumption.

PHTHISIO-PNEUMONIA, Phthisis pulmonalis.

PHTHISIS, *Phthoē*, *Tabes*, *Consumption*, *Decline*, from φθιω, 'I dry,' 'I fade.' This word, taken in a general sense, means progressive emaciation of every part of the body. It is usually, however, restricted to

PHTHISIS PULMONA'LIS, *Marasmus phthisis*, *Hectica phthisis*, *Hamoptysis phthisis*, *P. pulmonaris*, *Phthisi-pneumonia*, *Tabes pulmonalis*, *Phthisis scrophulosa*, *Pneumophthoē*, *Pneumonia*, *Phthisis tuberculosa*, *Tuberculosis Pulmonum*, *Tuberculous disease of the Lungs*, *Pulmonary consumption*, *Consumption*, *Decline*, (F.) *Phthisie*, *P. pulmonaire*, *Crachement de pus*. Occasionally, this formidable disease occurs accidentally: but, usually, it is caused by a conformation obtained from progenitors. This, at least, predisposes to it; and but a slight exciting cause is required to rouse the predisposition into action. It is less a disease of the torrid zone; and, in the temperate regions of the globe, its pathology is often intimately allied with that of scrofula. It usually consists in the formation of tubercles in the lungs, which sooner or later inflame and break down. In such a constitution, ulcerations of the lungs do not readily heal; and hectic fever—the universal attendant upon irritability and debility—is established.

This persists, and gradually wears down the patient, till he ultimately expires, exhausted by the irritative fever. The chief symptoms are the following. The patient feels a sense of uneasiness in the chest, with severe fits of coughing, or a short and dry cough, with dyspnœa. This may be considered the incipient stage. The cough then becomes extremely troublesome, especially in the morning; dyspnœa is increased on the slightest exertion. The expectoration is evidently purulent, with fever in the evening, circumscribed redness of the cheeks; wasting and colliquative sweats early in the morning. This must be considered the confirmed stage. In the third or last stage, the hectic is constant, with small pulse, pungent heat, colliquative sweats, and diarrhœa. The weakness becomes extreme, and the patient exhausted.

Broussais regards the affection as a chronic inflammation of the lungs.

*Physical Signs*.—1. In the first stage, whilst there are yet scattered miliary tubercles,—the only appreciable change at the exterior of the chest, and this is not constant, is a want of freedom in the movements of the chest under one or both clavicles. Percussion will generally discover a slight diminution of sound corresponding to the summit of one lung.

In the same situation, auscultation shows that the inspiratory murmur is either weaker, rougher, or confused. The sound of expiration is more distinct. The voice and cough are rather more resonant, and wheezing or mucous *râle* are occasionally heard in the same region.

2. When the tubercular deposition has become more abundant, the motion of the chest is more markedly diminished under one or both clavicles. The loss of sound on percussion is more distinct, the inspiration, on auscultation, is bronchial, the expiration louder and more superficial, and the resonance of the voice and cough is increased. The rest of the lung is perhaps healthy, or the respiration may be puerile.

3. When the tubercles are undergoing softening,—in addition to the preceding signs, auscultation exhibits subcrepitant *râle* around the apex of the lung, decreasing from above downwards. It is most distinct during or after the cough, and at the close of a deep inspiration. As the disease proceeds, the bubbling becomes successively larger, and ultimately *gargouillement* is heard. The inspiration and expiration are cavernous or tracheal. The voice and cough indicate unusual resonance and pectoriloquy. The intercostal spaces are often depressed locally, and percussion may become gradually clearer and even tympanitic as the cavern increases.

It is only in the incipient state of this formidable disease, that advantage can be expected from any plan of treatment; and of all means that can be devised, that of removing to a climate in which air and exercise can be daily enjoyed during the autumnal, winter and spring months is the best. See Climate. If this be impracticable, the patient must be kept in a regulated temperature, taking care that the chamber be duly ventilated; and gestation in the open air be used, whenever the atmosphere, although cold, is dry.

The other indications will be: 1. To moderate inflammatory action: 2. To support the strength: and, 3. To palliate urgent symptoms.

The whole treatment indeed is palliative. Counter-irritants relieve pain: demulcents and mild opiates alleviate the cough: the mineral acids united with opium relieve the colliquative sweats: and chalk and opium the diarrhœa.

Dr. Wilson Philip has pointed out a particular species of phthisis, which is characterized, in the early stage, by a deranged state of the digestive organs; flatulent, irregular bowels; furred tongue; impaired appetite; unnatural fœces; and the epigastric region more or less full and tender on pressure. The affection of the lungs is here secondary. He calls it *Dyspeptic phthisis*.

PHTHISIS DORSALIS, *Tabes dorsalis*—p. Dyspeptic, see Phthisis.

PHTHISIS LARYNGEÆ, (F.) *Phthisis laryngæe*, *Ulcère du larynx*, is a species of consumption analogous to phthisis pulmonalis, and produced by inflammation and ulceration of the interior of the larynx, and sometimes by caries of the cartilages. *Phthisis trachealis* is a similar affection, seated in the trachea.

PHTHISIS MESERICA, *Tabes mesenterica*—

p. *Notias*, *Tabes dorsalis*—p. *Pupillaris*, *Myosis*—p. *Pupillæ*, *Synezisis*—p. *Scrophulosa*, p. *Pulmonalis*—p. *Tuberculosa*, p. *pulmonalis*.

PHTHISURIA, *Diabetes*.

PHTHOE, *Phthisis*.

PHTHOIS, *Pastil*, *Trochiscus*.

PHTHOSCOS, *Trochiscos*, *Pastil*.

PHTHORA, *Abortion*, *Corruption*.

PHTHORIUS, *Abortive*.

PHUSCA, *Oxycrate*.

PHYGETH'OLON, *Panus*, *Phypella*, from  $\phi\upsilon\gamma\omega$ , 'I broil.' Inflammation of the superficial lymphatic glands, not ending in suppuration.

PHYLACTERION, *Amuletum*.

PHYLACTERIUM, from  $\phi\upsilon\lambda\alpha\sigma\omega$ , 'I preserve.' A *Phylactery*. An amulet:—a prophylactic.

PHYLAXIS, *Conservation*.

PHYLLANTHUS URINARIA, *Binkohumba*. A plant employed in Ceylon, in decoction, as a diuretic.

PHYLLITIS, *Asplenium Scolopendrium*.

PHYMA, *Phima*, from  $\phi\upsilon\upsilon\alpha\iota$ , 'I spring up.' With the ancients, this word was used with great latitude: sometimes, in the sense of phlegmon, for tumours larger than a boil, and perfectly suppurative. In the Nosology of Sauvages, *Phymata* is an order of diseases, to which he refers erysipelas, œdema, phlegmon, emphysema, scirrhus, &c. In that of Dr. Good it is a genus, including hordeolum, furunculus, sycosis, and anthrax.

PHYMA ANTHRAX, *Anthrax*—p. *Anthrax terminthos*, *Terminthos*—p. *Sycosis*, *Sycosis*.

PHYMATOSIS, *Excrescence*—p. *Elephantiasis*, *Elephantiasis*—p. *Verrucosa*, *Verruca*.

PHYMOSIS, *Phimosis*.

PHYPELLA, *Phygethlon*.

PHYSA, *Crepitation*.

PHYS'ALIS, p. *Alkeken'gi*, *Sold'num vesicarium*, *Alchachen'ge*, *Alkeken'gi*, *Halicae'abum*, *Winter Cherry*, (F.) *Alkekenge*, *Coqueret*. *Family*, *Solanææ*. *Sex. Syst.* *Pentandria Monogynia*. The berries are recommended as a diuretic, from 6 to 12 for a dose, in dropsical and calculous cases.

PHYSALIS ALKEKENGI, *Physalis*.

PHYSCIA ISLANDICA, *Lichen Islandicus*—p. *Nivalis*, *Lichen caninus*.

PHYSCONIA, from  $\phi\upsilon\sigma\kappa\eta$ , 'a bladder.' *Ventros'itas*, *Echph'ima physcon'ia*, *Hyposar'ca*, *Emp'hract'ica*, *Visco'nia*, *Hypersar'ehidios*. A generic term, under which Sauvages has comprised every large tumour, developed in the abdomen, that is neither fluctuating nor spongy. Linnæus calls them *Hyposarca*.

PHYSCONIA BILIOSA, *Turgescencia vesiculæ felleæ*—p. *Mesenterica*, *Tabes mesenterica*—p. *Splenicum*, *Ague cake*.

PHYSEMA, *Tympanitis*, *Phycsis*.

PHYSE'ISIS, *Physe'ma*, from  $\phi\upsilon\sigma\omega$ , 'I inflate.' An emphysematous tumour. *Tympanites*, (q. v.)

PHYSETER MACROCEPHALUS. See *Cetaceum*.

PHYSIATRICE, *Vis Medicatrix Naturæ*.

PHYSIC, *Medicament*, *Medicina*—p. *Indian*, *Euphorbia corollata*, *Gillenia trifoliata*.

PHYSIC'IAN, *Med'icus*, *Iatros*, *Aces'tor*,

*Altheus*, from φυσίς, 'nature.' (F.) *Médecin*. One who has received his degree from an incorporated Institution, as Doctor (q. v.) of Medicine. The French, formerly, used the word *physicien* in the same sense. It is now appropriated to the natural philosopher.

**PHYSICS, Iatrophysics.** Physics, directly applied to Medicine: either to the explanation of the vital phenomena, the preservation of individuals, or the treatment of disease.

**PHYSIO-AUTOCRATIA, Vis medicatrix naturæ.**

**PHYSIOGNOMY, Physiognómia, Physiognómica, Physiognomíçē, Physiognómia, Physiognomoníca, Physiognomónē, Physiognomosynē, Physiognomosis, Anthroposopia, Protopomantiá, Semioticē faciē, Physiognómnia, Physiognómny, Metoposcopy, Protoposis, from φυσίς, 'nature,' and γινώσκω, 'I know.'** The art of knowing the dispositions of men from their external appearance; especially from the features.

Every inference of this kind must necessarily be extremely fallacious, and cannot be reduced to rule, as was attempted by Lavater and others.

In infantile diseases, numerous shades of expression are evident, which experience teaches how to appreciate; and which afford useful guides in the pathology of that period of existence.

**PHYSIOLOGICAL DOCTRINE—Broussaism.**

**PHYSIOLOGICE, Physiology.**

**PHYSIOLOGY, Physiología, Biología, Physiologíçē, Œcomómia animalis, Anatomía viva, Anatómē animáta, Anthropología, Microcosmograpíhia, Microcosmica scientia, Cognítio physiologíca, Pars naturalis medicínæ, Philosophía corporis vivi;** from φυσίς, 'nature,' and λογος, 'a description.' Formerly, Physiology meant the same as Physics, in its extensive signification, now does. At the present day, it includes the science which treats of the functions of animals or vegetables; an acquaintance with the phenomena the aggregate of which constitute life. It is the science of life.

It is divided into *animal* or *vegetable*, according as it considers the life of animals or of vegetables singly. *Comparative Physiology* comprises both. Physiology is, also, *general* or *special*; according as it treats of life in the abstract or in some particular species. To the latter belongs the *Physiology of Man*,—called, also, *Hygienic Physiology*, to distinguish it from *Pathological Physiology* or *Pathology*.

**PHYSIONOMIA, Physiognomy.**

**PHYSIONOMIE ÉGARÉE.** See Wild.

**PHYSIS, Sex.**

**PHYSOCELE, Pneumatocèle, Hernia ventosa;** from φυσω, 'I insufflate,' and κηλή, 'a tumour.' An emphysematous tumour of the scrotum; probably, a case of intestinal hernia, containing much flatus.

**PHYSOCEPHALUS, from φυσα, 'flatus,' and κεφαλή, 'the head.' Physoccephalus.** Emphysematous tumefaction of the head.

**PHYSOCELIA, Tympanites.**

**PHYSOMETRA, Emphysēma Uteri, Hysterophyse, Hysteropsophia, Emphysēma uterinum, Inflatio Uteri, Tympany of the Womb, Uterine tympanites, from φυσω, 'I inflate,' and**

μητρα, 'the womb.' A light, tense, circumscribed protuberance in the hypogastrium, obscurely sonorous,—with wind occasionally discharged through the os uteri.

**PHYSON, Flatulence.**

**PHYSONCUS, Emphysema.**

**PHYSOSPASMUS, Colica flatulenta.**

**PHYSOTHORAX, Pneumothorax.**

**PHYTOLACCA DECANDRA, Poke Weed, American Night Shade, Cancer root, Jucato Calleloe, (?) Jalap, Pigeon Berries, Solanum racemosum America'num, S. magnum Virginia'num rubrum, (F.) Raisin d'Amérique, Phytolaque à dix étamines, Morelle en grappes, Mechoachan du Canada. Family, Chenopodææ. Sez. Syst. Decandria Decagynia.** The leaves, berries, and roots are employed. The young stems, when boiled, are sometimes eaten at table; but when old, they must be cautiously used, as the plant is emetic and cathartic. It is most celebrated as a remedy in chronic rheumatism; and is given in the form of tincture of the ripe berries. It is, also, used in cutaneous eruptions; as tinea capitis, itch, cancerous ulcers, &c.

The root is gathered and dried in the fall.

**PHYTOLAQUE À DIX ÉTAMINES, Phytolacca decandra.**

**PIA MATER, Pia seu mollis seu tenuis Mater, Meninx interior, Meninx choroides, Inner lamina of the Meninge (Ch.,) Membra'na vasculosa Cerebri, (F.) Pie mère, Meningette.** The pia mater is a very delicate membrane, which covers the brain immediately, penetrates into its anfractuosités, and envelops, also, the cerebellum and the spinal prolongation, &c. Bichat does not regard it as a membrane, properly so called, but as a network of blood-vessels, united by a lax cellular tissue. The *Pia Mater exterior* is the portion of membrane which covers the exterior of the encephalon, and faces the arachnoid externally. The *Pia Mater interior* is that which lines the cerebral fossæ; into which it penetrates by a cleft situate beneath the posterior part of the corpus callosum and the fornix; and by two other fissures, situate between the corpora fimbriata and thalami nervorum opticorum. The pia mater contains a great number of granulations, similar to the *Glandula Pacchioni*.

**PIAN, Frambesia.**

**PIANS, MOTHER OF, Mama-pian.**

**PIAR, Pinguedo.**

**PICA, Malacia.**

**PICACISMUS, Malacia.**

**PICATIO, Malacia.**

**PICEA, Pinus abies.**

**PICERION, Butter.**

**PICOTE, Variola.**

**PICOTEMENT, Pricking.**

**PICRIA, Bitterness.**

**PICRIUM SPICATUM, Coutoubea alba.**

**PICROCHOLOS, Bilious.**

**PICROS, Amarus.**

**PICROTOXINE, Picrotoxi'na, Picrotoxi'a,** from πικρος, 'bitter,' and τοξίον, 'poison.' A vegetable alkali, discovered by M. Boullay in the *Menispermum Cocculus*. It crystallizes in quadrangular, white, brilliant, semitransparent prisms; which are excessively bitter, soluble in three parts of alcohol, and in fifteen of boiling water.

The *Cocculus Indicus* owes its poisonous properties to this principle.

**PIE MÈRE**, *Pia mater*.

**PIÈCE**, Hepatitis.

**PIED**, *Pes*—*p. d'Alexandre*, *Anthemis pyrethrum*—*p. d'Alouette des champs*, *Delphinium consolida*—*p. Bot*, see *Kyllosis*—*p. de Chat*, *Antennaria dioica*—*p. de Cheval marin*, *Cornu ammonis*—*p. de Griffou*, *Gryphius pes*, *Helleborus fœtidus*—*p. de Lion*, *Alchemilla*—*p. de Lit*, *Origanum*—*p. d'Ours*, *Acanthus mollis*—*p. Plat*, see *Kyllosis*—*p. de Veau*, *Arum maculatum*.

**PIEIRON**, *Pinguedo*.

**PIERRE**, *Calculus*—*p. d'Aigle*, *Ætites*—*p. d'Azur*, *Lapis lazuli*—*p. Calaminaire*, *Calamine*—*p. à Cautère*, *Potassa cum calce*—*p. Infernale* *Argenti nitras*—*p. Judaïque*, *Judæus*, (*lapis*)—*p. Médicamenteuse*, *Medicamentosus lapis*—*p. Néphrétique*, *Nephreticus lapis*—*p. Ponce*, *Bunex*.

**PIERRES CRAYEUSES**, *Calculi arthritic*—*p. au Fiel*, *Calculi biliary*—*p. Urinaires*, *Calculi urinary*.

**PIESTER**, *Press*.

**PIESTERION**, *Press*.

**PIESTRON**, from *πρῆξω*, 'I press.' An instrument recommended by Hippocrates for breaking the bones of the fetal head, when too large to be extracted otherwise.

**PIGAMON JAUNATRE**, *Thalictron*.

**PIGEON BERRIES**, *Phytolacca decandra*.

**PIGNUT**, *Earthnut*, *Groundnut*. The bulbous root of the *Bunium Bulbocastanum*. Called *pignuts* from the fondness of the pig for them. They have been considered to possess a styptic quality; and are deemed serviceable in certain affections of the kidney.—Hooper.

**PIGNUT**, *Bunium bulbocastanum*.

**PIGMENTARIUS**, *Apothecary*, *Unguentarius*.

**PIGMENTUM**, *Paint*—*p. Indicum*, *Indigo*—*p. Nigrum*, see *Choroid*—*p. Uruçu*, *Terra orleana*.

**PIGNEROLE**, *Centaurea calcitrapa*.

**PIGNON DE BARBARIE**, *Jatropha curcas*—*p. d'Inde*, *Jatropha curcas*.

**PIGSFLARE**, *Adeps suilla*.

**PILA**, *Sphæra*, *Ball*. A gymnastic exercise, much used by the ancients as well as moderns.—Galen. Also, a mortar and a pestle. *Aconë*.

**PILA**, *Mortar*, *Pillar*—*p. Damarum*, *Ægagrophila*—*p. Ruplicaprarum*, *Ægagrophila*.

**PILA MARI'NA**, *Sphæra Marina*, *Sphæra Thalassia*, *Halecyonium rotundum*, (F.) *Pelote de Mer*. Certain light, round, depressed, or oblong masses—inodorous and insipid—in which rushes, hairs, and the debris of shells are met with. These are found on the sea-shores, and have been regarded by Spielmann as consisting chiefly of the roots of the *Zostera Marina*. Iodine is detected in the ashes, which accounts for its success in goitre. They have, also, been given as a vermifuge.

**PILARE MALUM**, *Trichosis*.

**PILA'TIO**. Fracture of the cranium, in which the fissure is narrow, and has the appearance of a hair. A *Capillary fissure*, (F.) *Fente capillaire*.

**PILEOLUM**, *Calotte*.

**PILEOLUS**, a *Caul*, *Pileus*.

**PILEOUS**, *Pilosus*, (F.) *Pilux*. That which relates to the hair.

The **PILEOUS SYSTEM** of Bichat is that formed by the hair. It comprises the different species of hair of the human body.

**PILES**, **BLIND**, *Cæcæ hæmorrhoides*.

**PILEUS**, *Pileolus*. A shield. A nipple-like instrument, formed of various materials, and used by females for protecting the nipple during the child's sucking, when the part is painful. Also, a *Caul*, (q. v.)

**PILEUS**, *Cucupha*—*p. Hippocraticus*, *Bonnet d'Hippocrate*.

**PILEUX**, *Pileous*.

**PILEWORT**, *Ranunculus ficaria*.

**PILLER**, *Pillar*.

**PILIMICTIO**. See *Trichiasis*.

**PILL OF ALOES AND CAMBOGE**, *Pilulæ aloes cambogiæ*—*p. of Aloes and cinchona*, *Pilulæ aloes et kinæ kinæ*—*p. of Aloes and colocynth*, *Pilulæ aloes et colocynthidis*—*p. of Aloes and fetid gums*, *Pilulæ de aloë et fœtidis*—*p. of Aloes and ginger*, *Pilulæ aloes et zingiberæ*—*p. Aloes and myrrh*, *Pilulæ aloes et myrrhæ*—*p. Aloetic*, *Pilulæ aloeticæ*—*p. Aloetic and asafoetida*, *Pilulæ aloes et asafoetidæ*—*p. Aloetic compound*, *Pilulæ aloes compositæ*—*p. of Ammoniac of copper*, *Pilulæ ammoniaceti cupri*—*p. Analeptic*, *James's*, see *Analeptica*—*p. Anderson's*, see *Pilulæ de aloë et fœtidis*—*p. Anodyne*, *Pilulæ opiatæ*—*p. Antibilious*, *Barclay's Pilulæ antibiliosæ*—*p. Antibilious*, *Dixon's*, see *Pilulæ antibiliosæ*—*p. Bacher's*, *Pilulæ ex helleboro et myrrhâ*—*p. Barbarossa's*, *Barbarossæ pilulæ*.

**PILL**, **BLAUD'S**. These Pills, proposed by M. Blaud as antichlorotic, are formed as follows. Take of *Gum Tragacanth*, in powder, six grains; *water*, one dram. Macerate in a glass or porcelain mortar, until a thick mucilage is formed, and if it be desired to prevent the formation of peroxide of iron, and to make the pills similar to those of Vallet, substitute a dram of powdered sugar for the mucilage. Add afterwards of *sulphate of iron*, in powder, half an ounce. Beat well until the mixture is homogeneous, and add *subcarbonate of potass*, half an ounce. Beat until the mass becomes of a deep green colour, and of a soft consistence. Divide into 48 pills. Dose, one a day; gradually increasing to two, and afterwards three.

**PILL**, **BLUE**, *Pilulæ hydrargyri*—*p. Calomel*, *Pilulæ hydrargyri submuriatis compositæ*—*p. Camboge*, *Pilulæ cambogiæ compos.*—*p. Camboge compound*, *Pilulæ cambogiæ aloeticæ*—*p. positæ—p. Red, *Pilulæ hydrargyri submuriatis compositæ*—p. Red, Boerhaave's, see *Hydrargyri sulphuretum rubrum*—p. Rhubarb, compound, *Pilulæ rhei compositæ*—p. Rufus's, *Pilulæ aloes et myrrhæ*—p. Scotch, *Pilulæ de aloë et fœtidis*—p. of Soap and opium, *Pilulæ saponis cum opio*—p. Speediman's, see *Pilulæ aloes et myrrhæ*—p. Squill, compound, *Pilulæ scillæ compositæ*—p. Starkey's, see *Pilulæ ex helleboro et myrrhâ*—p. Storax, *Pilulæ e styrace*—p. of Strychnine, *Pilulæ strychninæ*—p. of Submuriate of mercury, compound, *Pilulæ hydrargyri submuriatis compositæ*—p. Turpentine, *Pilulæ de terebinthinâ*—p. Vallet's, see *Ferri Proto-carbonas*—p. Webster's, *Pilulæ aloes et kinæ kinæ*.

**PILLAR**, *Pila*, *Colum'na*, *Colum'ella*, (F.) *Pilier*. A name given to several parts; as the *pillars of the velum palati*, *diaphragm*, (q.v.) &c.

**PILON**, *Pilum*.

**PILOSELLA**, *Hieracium pilosella*.

**PILOSUS**, *Pileosus*.

**PIL'ULA**. Diminutive of *pila*, 'a ball.' *Sphaerid'ion*, *Catap'otion*, *Spha'rion*, *Gongyl'ion*, (F.) *Pilule*. A simple or compound medicine, weighing from one to five grains, of a firm consistence and spherical form; intended to be swallowed at once, without chewing. The *Pill* differs from the *Eolus*, in the latter being softer and larger.

Medicines are often given in the form of pill, on account of their disagreeable taste and odour. *Pilula*, also, means a *Pilular mass*.

**PILULÆ EX ALOË**, *P. aloes Compositæ*—p. de Aloë et cambogiâ, *P. aloes et cambogiæ*.

**PILULÆ ALOËTICÆ**, *Pilulæ ex Aloë et Sapo'næ*, *Aloctic Pill*. (F.) *Pilulæ d'aloës ou aloëtiques*. (*Gummi resin. aloes socotrin. in pulv. trit.; saponis*, sing. p. æ. *syrr. q. s. Ph. E.*) Dose, gr. x to xx in habitual costiveness.

**PILULÆ ALOË ET ASAFETIDÆ**, *Aloctic and Asafetida Pills*. (*Gum. res. aloes socotr. trit.; asafetida, saponis*, sing. p. æ.; *mucilag. minos. ulotica*, q. s. *Ph. E.*) Purgative and stomachic. Dose, gr. x.

**PILULÆ ALOË ET CAMBOGIÆ**, *P. de Aloë et Cambogiâ*, *P. Hydragogæ Bontii*, *Pill of Aloes and Camboge*. (*Aloës, cambog., gum. ammoniac.*, ãã. p. æ. Make into a powder. Dissolve in vinegar; pass through a cloth; express the residuum strongly; and afterwards evaporate, in a water-bath, to a pilular consistence. *Ph. P.*) Purgative: used in dropsy. Dose, gr. xij to xxx.

*Peters' Pills*—a nostrum—are formed of *aloës jalap, scammony*, and *camboge*, each equal parts.

**PILULÆ ALOË ET COLOCYNTHIDIS**, *P. ex Colocyntidæ cum aloë*, *P. Aloes cum Colocyntidæ*, *P. coccinæ*, *P. Cocchii*, *P. colocyntidis compositæ*, *P. coccinæ minores*, *Pill of Aloes and Colocyntidæ*. (*Pulp. coloc. ʒss, aloës hepat., scammon.,* ãã ʒj, *sapon. ʒij ol. caryoph. ʒj, syrump. q. s. Ph. D.*) Cathartic. Dose, gr. v. to x or more.

*Fothergill's Pills* consist of *aloës, scammony, colocyntidæ*, and *oxide of antimony*.

**PILULÆ ALOË COMPOSITÆ**, *Pilulæ ex Aloë*, *Compound Aloetic Pills*. (*Aloës spic. extract. cont. ʒj, ext. gentianæ ʒss, olei carui ʒij xl. syr. q. s. Ph. L.*) These are sometimes, also, called *Family pills*, *Antibilious pills*, &c.

**PILULÆ DE ALOË ET FÆTIDIS**, *P. Benedic'tæ Fullerii*, *Pill of aloës and fetid gums; Pilulæ*

*cephra'tica*, *Femulæ pills*, *Pilulæ aloës martial'is*. (F.) *Pilules bénites de Fuller*. (*Aloës socotr., sennæ, asafetida, galbani*, ãã ʒij, *myrrh. ʒiv, croci, macis*, ãã ʒj, *ferri sulphat. ʒss*. Reduce to powder separately, and add *ol. saccin. ʒij. viij, syr. artemisiæ* (q. s.) *Ph. P.*) Purgative, and given in hysteria. Dose, gr. xv to xx.

**PILULÆ ALOË ET JALAP'Æ**, commonly called *Anderson's Pills*, *Anderson's Scots' Pills*, *Scotch Pills*. (*Aloës Barbād. lbj, rad. helleb. nigr., rad. jalapæ, potassæ subcarb.*, ãã ʒj, *ol. unis ʒiv, syrump. simpl. q. s.*—Gray.) Dose, gr. x to xxx.

A committee of the Philadelphia College of Pharmacy recommend the following: *Aloës Barbādensis. ʒxxiv, Saponis, ʒiv, Colocyntid. ʒj, Gambogiæ, ʒj, Ol. anis. f. ʒss*.

**PILULÆ ALOË ET KINÆ KINÆ**, *P. stomachicæ*, *P. ante cibum*; *Pill of Aloës and Cinchona*. (F.) *Pilules Goarmandes*. (*Aloës socotr. ʒvj, ext. cinchon. ʒij, cinnam. ʒj, syrump. absinth. q. s. Ph. P.*) Stomachic and laxative. Dose, gr. x to xx.

*Lady Crespi'gnj's Pills*, *Lady Webster's Pills*, and the *Pilulæ stomachicæ Mesues*, *Ph. L. 1635*, resemble those.

**PILULÆ ALOË MARTIALES**, *P. de Aloë et fœtidis*.

**PILULÆ ALOË ET MYRRHÆ**, *P. Aloës cum Myrrhâ*, *P. de Aloë et Myrrhâ*, *Rufus's Pills*, *Common Pills*, *Pilulæ Rufi*, *P. conu'nes*, *Pills of Aloës and Myrrh.* (*Aloës spic. ext. ʒij, croci stigmat., myrrh*, sing. ʒj, *Syr. q. s. Ph. L.*) Cathartic and emmenagogue. Dose, gr. x to xx.

*Hooper's Pills*, according to one of Gray's formulæ, are made as follows. *Ferri sulph., aquæ*, ãã ʒviij: dissolve. Add *aloës barbād. lbj and ʒviij, canellæ albæ, ʒvj, gum myrrh. ʒij, opopanax ʒij*.

The committee of the Philadelphia College of Pharmacy recommend the following form. *Aloës Barbādensis, ʒviij, Ferri Sulphatis exsiccat. ʒij, ʒiss, vel Ferri Sulph. crystall. ʒiv, Ext. Helleb. nigr. ʒij, myrrh. ʒij, Saponis, ʒij, Canellæ in pulv. tritæ, ʒj, Zingib. in pulv. tritæ, ʒj*.

*Speediman's Pills* consist of *aloës, myrrh, rhubarb, extract of chamomile*, and essential oil of chamomile.

**PILULÆ DE ALOË ET SAPONË**, *P. aloeticæ*.

**PILULÆ ALOË ET ZINGIB'ERE**, *Pill of aloës and ginger*. (*Aloës hepat. ʒj, rad. zingib. in pulv. ʒj, sapon. hispan. ʒss, ol. ess. mentha pip. ʒss. Ph. D.*) In habitual costiveness. Dose, gr. x to xx.

**PILULÆ AMMONIURE'TI CUPRI**, *Pills of Ammonuret of Copper*, *Pilulæ Cupri*. (F.) *Pilules d'ammoniu're de cuivre*. (*Ammoniu'r. cupri in pulv. ten. trit. gr. xvj, uicæ panis ʒiv, aquæ carbonatis ammonia q. s.* Beat into a mass, and divide into xxxij pills. *Ph. E.*) Tonic and antispasmodic, in epilepsy, &c. Dose, one pill twice daily; gradually increasing the dose.

**PILULÆ ANTE CIBUM**, *P. aloës et kinæ kinæ*.

**PILULÆ ANTIBILIO'SÆ**,—*Barclay's Antibilious Pills*. (*Extract of colocyntid ʒij, resin of jalap ʒj, almond soap ʒss, guaiac. ʒij, emetic tart. gr. viij, ol. junip., ol. carui, ol. rosmarin. ãã ʒij, syrump. of buckthorn q. s., to form 64 pills.*) Dose, 2 or 3.

*Dixon's Antibilious Pills* are formed of *aloës, scammony, rhubarb*, and tartarized antimony.

**PILULÆ ANTI-SCROPHULO'SÆ**, *P. ex Oxido Stibii et Hydrargyri sulphureto nigro compos'itæ*. (*P. scammon.*, *hydrarg. sulphur. nigr.*, *aa* ʒij. *antinouii oxidi albi*, *milleped.*, *sapou. amygdalin.*, *aa* ʒij. *extract. glycyrrh.* ʒv. Make into a mass. *Ph. P.*) Dose, gr. iv. to i.

**PILULÆ ANTIHERPETICÆ**, *Pilulæ hydrargyri submuriatis comp.*—*p. Antihystericæ*, *P. galbani compos'itæ*—*p. Antispasticæ*, *P. galbani compos'itæ*—*p. Asafetidæ compos'itæ*, *P. galbani compos'itæ*.

**PILULÆ BALSAMICÆ**, *P. Doct'ris Morton.* (*Milleped. puberisat.* ʒxvii, *gum. ammon.* ʒxj, *acid. benzoic.* ʒvj, *croci.*, *balsam. Peruv.* *aa* ʒj, *balsam. sulph. anisat.* ʒvj. *Mix. Ph. P.*) Tonic, expectorant, and balsamic.

**PILULÆ BENEDICTÆ FULLERI**, *P. de Aloe et fetidis.*

**PILULÆ CAMBOGICÆ COMPOS'ITÆ**, *P. de guttâ gamandrâ*, *P. hydragogæ*, *Gamboge pills*, *Pilulæ gummi guttic aloet'icæ*; *Compound camboge pills.* (F.) *Pilules de gomme gutte composées.* (*Cambogije coutrite*, *aloes spicat. extract. contriti. pulv. cinnam. comp. sing.* ʒj, *saponis* ʒij. *Ph. L.*) Cathartic. Dose, gr. x to xx.

**PILULÆ COCCII**, *P. aloes et colocynthidis*—*p. Coccinæ minores*, *P. aloes et colocynthidis*—*p. Coccinæ*, *P. aloes et colocynthidis*—*p. Colocynthidis compos'itæ*, *P. aloes et colocynthidis*—*p. ex Colocynthide cum aloe*, *P. aloes et colocynthidis*—*p. Communes*, *P. aloes et myrrhæ*—*p. Cupri*, *Pilulæ ammoniuretæ cupri.*

**PILULÆ DE CYNGLOSSO**, *P. de extracto opii.* (*Pulv. rad. cynogloss.*, *semin. hyoscyam. alb.*, *extract. opii vinos.* *aa* ʒiv, *pulv. myrrh.* ʒvj, *oliban.* ʒv, *croci.*, *castor.*, *aa* ʒiss, *syryp. opii* q. s. *Ph. P.*) Anodyne. In cough, &c. Dose, gr. iv. to gr. viij.

**PILULÆ DEPURANTES**, *P. hydrargyri submuriatis compos.*—*p. Ecptracticæ*, *P. de aloes et fetidis.*

**PILULÆ FERRI COMPOS'ITÆ**, *Compound pills of Iron*, *Pilulæ Ferri cum myrrhâ.* (F.) *Pilules de Fer composées.* (*Myrrh. cont.* ʒij, *sodæ subcarb.*, *ferri sulph.*, *sach.* *aa* ʒj. *Mix. Ph. L.*) Tonic. Dose, gr. x to xx.

**PILULÆ FERRI CUM MYRRHÂ**, *P. Ferri compos'itæ*—*p. Fetidæ*, *P. galbani compos'itæ.*

**PILULÆ GAL'BANI COMPOS'ITÆ**, *P. asafetidæ compos'itæ*, *P. fatidæ*, *P. gummosæ*, *P. c gummi*, *Compound galbanum pill*, *Pilule antispasticæ*, *P. antihystericæ*, *P. myrrhæ compos'itæ*, *Gum pill.* (*Galban. gum.* ʒj, *myrrhæ*, *sagapeni*, *aa* ʒiss, *asafetidæ* ʒiv, *syryp.* q. s. *Ph. L.*) Antispasmodic and emmenagogue. Dose, gr. x to xx.

**PILULÆ GUMMI**, *P. galbani compos'itæ*—*p. Gummi guttæ aloeticæ*, *P. cambogicæ compos'itæ*—*p. Gummosæ*, *P. galbani compos'itæ*—*p. de Guttâ gamandrâ*, *P. cambogicæ compos'itæ.*

**PILULÆ EX HELLEBORO ET MYRRHÂ**, *P. tonicæ*, *Bacher's Pills*, *Tonic Pills of Bacher*, *Pills of Hellebore and Myrrh.* (*Ext. helleb. nig.*, *extract. myrrh.*, *aa* ʒj, *fol. cardui benedict.*, *in pulv.* ʒij. *Mix. Ph. P.*) Tonic and emmenagogue. In dropsical, cutaneous, and verminous affections. Dose, gr. iv. to viij.

*Matthews' Pills*,—*Starkey's Pills*, are formed of *rad. helleb. nigr.*, *rad. glycyrrh.*, *sapon.* *Castill.*, *rad. curcumæ*, *opii purif.*, *syryp. croci.*, *aa* ʒiv. *ol. tereb.* q. s. ut fiat massa.—Gray.

**PILULÆ HYDRAGOGÆ**, *P. cambogicæ compo-*

*sitæ*—*p. Hydragogæ Bontii*, *Pilulæ aloes et cambogicæ.*

**PILULÆ HYDRARGYRI**, *P. mercurial'es*, *Mercurial pill.* *Blue pill.* (F.) *Pilules de Mercure.* (*Hydrarg. purif.* ʒij, *confect. rosæ galkic.* ʒiij, *glycyrrh. rad. cont.* ʒj. Rub the quicksilver with the confection, until the globules disappear; then add the liquorice powder, and beat the whole into a uniform mass. *Ph. L.*) Antisyphilitic. Mercurial:—in large doses, purgative.

**PILULÆ DE HYDRARGYRO, SCAMMONIO, ET ALOE**, vulgo *MERCURIALES*, (F.) *Pilules Mercurielles ou de Mercure*, *Scammonée et Aloës.* (*Hydrarg. purif.* ʒj, *mellis* ʒxj. Rub until the globules disappear; then add *aloes socot.*, *scammon.* *aa* ʒij, *mucis*, *cinnam.*, *aa* ʒij. Make into a mass. *Ph. P.*) Uses, same as the last, but they are more purgative. Dose, gr. viij to xxx. These pills are nearly the same as the *Pastilles de Renaudot.*

**PILULÆ EX HYDRARGYRO MURIATICO MITI CUM SULPHURE STIBIATO AURANTIACO**, *Pilulæ hydrargyri submuriatis compos'itæ.*

**PILULÆ HYDRARGYRI SUBMURIATIS COMPOS'ITÆ**, *Pilulæ ex Stibio et Hydrargyro*, *P. antihypericæ*, *P. ex hydrargyro muriatico miti cum sulphure stibio aurantiaco*, *P. resolventes cum mercurio*, *P. depurantes*; *Compound Pills of Submuriate of Mercury*, *P. Hydrargyri Submuriatis*, *Calomel Pills*, *Plummer's Pills*, *the Red Pill.* (*Hydrarg. submur.*, *antimon. sulphur. precipitat.* *sing.* ʒij, *guaiac. gum. resin. contrit.* ʒiv, *spirit. rect.* ʒss. Beat together. *Ph. L.*) Mercurial, and reputed to be diaphoretic and alterative. Dose, gr. v to x.

*Leake's Pili'la salutaris* resembles these. It is used in syphilis.

**PILULÆ MERCURIALES**, *P. hydrargyri*, *P. de hydrargyro*, *scammonio et aloë*—*p. Doctoris Morton*, *P. balsamicæ*—*p. Myrrhæ compos'itæ*, *P. Galbani compos'itæ.*

**PILULÆ OPIATÆ**, *P. Thebæicæ*, *Opiate Pills*, *Common Night Pills*, *Anodyne Pills*, *Nepenthes opiatum.* (F.) *Pilules Opiales.* (*Opii*, p. 1; *ext. glycyrrh.* p. 7; *fruct. myrt. piment.* p. 2. *Mix. Ph. E.*) Five grains contain gr. ss of opium.

**PILULÆ OPII**, *P. saponis cum opio*—*p. de Extracto opii*, *P. de cynoglosso*—*p. ex Oxido stibii et hydrargyri sulphureto nigro compos'itæ*, *Pilulæ antiscrophulosæ*—*p. Resolventes cum mercurio*, *P. hydrargyri submuriatis compos.*—*p. de Rhabarbaro*, *Pilulæ rhei compos'itæ.*

**PILULÆ RHEI COMPOS'ITÆ**, *P. de Rhabarbaro*, *Compound Rhabarb Pills.* (*Pulv. rhei* ʒj, *aloes socot.* ʒvj, *myrrh.* ʒiv, *ol. menthe pip.* ʒss. Beat into a mass, with *syryp of orange peel.* *Ph. E.*) Laxative and stomachic. Dose, gr. x to xx.

The stomachic nostrum, sold under the name of *Moseley's Pills*, consists merely of *rhubarb* and *ginger.*

**PILULÆ RUFÆ**, *P. aloes et myrrhæ*—*p. Salutaris*, *Leake's*, see *Pilulæ hydrargyri submuriatis compos'itæ*—*p. Saponaccæ*, *P. saponis cum opio.*

**PILULÆ SAPONIS CUM OPIO**, *P. saponacæ*, *Pills of Soap and Opium*, *Pilulæ Opii.* (F.) *Pilules de Savon et d'Opium.* (*Opii duri contriti* ʒiv, *saponis duri* ʒij. *Ph. L.*) Five grains contain one of opium.

PILULÆ SCILLÆ, P. scillæ compositæ.

PILULÆ SCILLÆ COMPOSITÆ, P. Scillæ icæ, P. Scillæ cum Zingiberæ, P. e Scillâ, Compound Squill Pill. (Scillæ rad. recent. cæciat. et contus. ʒj, zingiberis rad. contritæ, saponis duri, aa ʒij, ammoniaci contriti ʒij. Form the mass into syrup. Ph. L.) Expectorant and diuretic. Dose, gr. x to xx.

PILULÆ SCILLÆ CUM ZINGIBERE, P. scillæ compositæ—p. Scilliticæ, P. scillæ compositæ—p. ex Stibio et hydrargyro, P. hydrargyri submur. compos.—p. Stomachicæ, P. aloes et kinæ kinæ.

PILULÆ STRYCHNINÆ, Pills of Strychnine. (Very pure strychnine, 2 gr.; conserve of roses, ʒss. Make into 24 pills.) One or two for a dose.

PILULÆ STYRACIS, Storax Pills. (Styracis pur. ʒij, opii purif., mellis, croci, sing. ʒj. P. D.) Six grains contain one of opium.

PILULE DE TEREBINTHINA, Turpentine Pills. Made of turpentine boiled in 3 times its weight of water, until, when thrown into cold water, it forms a soft paste. It has the properties of turpentine, and has been administered in gleet, &c.

PILULÆ THEBAICÆ, P. opiatæ—p. Tonicæ, P. ex Helleboro et myrrhâ.

PILULES, Pilulæ—p. Agrégatives, sec Aggrégate—p. d'Aloes ou alotiques, Pilulæ aloeticæ—p. d'Annoniare de cuirre, Pilulæ ammoniuretici cupri—p. Bénites de Fuller, Pilulæ de aloes et fœtidis—p. de fer composées, Pilulæ ferri composées—p. Ferrugineuses de Vallet, see Ferri protocarbonas—p. Gourmandes, Pilulæ aloes et kinæ kinæ—p. de Mercure, Pilulæ hydrargyri—p. de Mercure, &c., Pilulæ de hydrargyro, scammonio et aloce—p. Mercurielles, Pilulæ de hydrargyro, scammonio et aloce—p. Opiacées, Pilulæ opiatæ—p. de Saxon et d'Opium, Pilulæ saponis cum opio.

PILULIER, (F.) Pill machine. An instrument, invented by the Germans, for rolling and dividing pills. Also, the earthen pot in which pills are preserved.

PILUM, Pistillus, Pistillum, Hyperos, Cercis (F.) Pilon. A pestle. A wooden, iron, bell-metal, marble, agate, porcelain, or glass instrument for beating or dividing substances in a mortar.

PILUS, Capillus, Caul, Hair.

PIMELE, Pinguedo.

PIMELOORRHOËA, from πικελῆ, 'fat,' and ῥεοῖ, 'I flow.' A morbid discharge or disappearance of fat.

PIMELO'SIS, from πικελῆ, 'fat.' Conversion into fat, as *Pimelosis hepatica*, 'fatty degeneration of the liver.'

PIMENT, Capsicum annuum—p. Royal, Myrica gale.

PIMENTÆ BACCÆ. See Myrtus pimento.

PIMENTO. See Myrtus pimento.

PIMPERNEL, RED, Anagallis—p. Water, Veronica beccabunga.

PIMPILIM, Piper longum.

PIMPINEL, ITALIAN, Sanguisorba officinalis.

PIMPINEL'LA ANISUM. The Anise plant. *Anisum*, *Anisum vulgare*, *Soldanella intestinorum*, *Anisum*, (F.) Anis. Family, Umbelliferae. Sex. Syst. Pentandria Digynia. A native of Egypt. The seeds, *Scm'ina An'isi*, *An'iseed*,

have an aromatic odour; and sweetish, warm, grateful taste. They are carminative; and used in dyspepsia and the tormina of infants. Dose, gr. xv to ʒj, bruised.

The oil,—OLEUM ANISI, (F.) Huile d'anis—is officinal. Dose, gr. v to xv.

PIMPINELLA, GREATER, P. magna—p. Hircina, P. Saxifraga.

PIMPINELLA MAGNA, P. nigra; the Greater Pimpinella; *Tragoselinum majus*, *Daucus Cyathopus*, (F.) *Bougeage majeur*. The root has been extolled as diuretic and resolvent, as well as in erysipelatos ulcers, tinea capitis, rheumatism, &c.

PIMPINELLA NIGRA, P. magna.

PIMPINELLA SAXIFRAGA, *Burnet saxifraga*, *Poterium sanguisorbu*, *Sorbastrella*, *Tragoselinum*, *Pimpinella hircina*, P. umbellifera, (F.) *Bougeage mineur*, *Petit B.*, *Pimprenelle*. The root has an unpleasant smell, and hot, pungent, bitterish taste. It has been recommended as a stomachic; and as a stimulating gargle in paralysis of the tongue.

PIMPINELLA UMBELLIFERA, P. Saxifraga.

PIMPLE, Papula.

PIMPRENELLE, Pimpinella saxifraga—p. Noire, Sanguisorba officinalis.

PIN. Perhaps from *Pennum*, low Latin; or from *Spina*; *Spina ferrea*, *Acus capitata*, (F.) *Epingle*. An iron or brass instrument, generally of small size; pointed at one extremity, and having a head at the other. It is used, in Surgery, to fix rollers and dressings; and, occasionally, in sutures.

PIN A PIGNONS. See Pinus picea.

PINASTELLUM, Peucedanum.

PINASTER, Pinus sylvestris.

PINCÉ, Pinched.

PINCÉE, Pugillus.

PINCERS, Forceps.

PINCETTES, Forceps.

PINCHED, *Contractus*, (F.) *Pincé*, *Grippé*.

An epithet applied to the face, when the features are contracted; as in violent abdominal affections, or during intense pain.

PINCKNEYA PUBESCENS, *Georgia Bark*. This bark has been used in Georgia in the cure of intermittents, and successfully. It is a powerful bitter. Dose, of the powder, ʒj.

PINE APPLE, Bromelia ananas—p. Aphernousli, Pinus cembra—p. Ground, stinking, Camphorosma monspeliaca—p. Mountain, see Pinus mughos—p. Mugho, see Pinus Mughos—p. Stone, Pinus pinea.

PINEA, Pinus pinea.

PINEAL, *Pinealis*, from *pinus*, 'a pine.' That which resembles a pine-apple.

The PINEAL GLAND, *Glandula pinealis*, *Cerebral epiphysis*, *Condrum*, *Conoides corpus*, *Penis cerebri*, *Corpus turbindum*, is a small body, of a conical shape; pale red or grayish colour; and soft consistence; situate between the fornix and the tubercula quadrigemina. It almost always contains sabulous particles. When these are grouped together over the base of the gland, they form the *Acerculus Cerebri* of Sömmerring. From its anterior part arise two medullary striæ, which proceed over the posterior commissure; coast along the optic thalami, and unite at the anterior pillar of the fornix.

The uses of the pinal gland are unknown. Descartes supposed it to be the seat of the soul!

**PINEUS PURGANS**, *Jatropha curcas*.

**PINGUE'DO**, *Pin'clê*, *Piar*, *Piciron*, *Lipos*, *Stear*, *Adeps*, *Sevum*, *Sebum*, *Corpus adiposum*, *Acun'giu*, *Fat*, (F.) *Graisse*. A soft, white, animal substance; inodorous; insipid; oily; inflammable, easy to melt; spoiling in the air, and becoming rancid by union with oxygen: almost insoluble in alcohol; insoluble in water; soluble in the fixed oils. Fat is formed of two immediate principles, *stearine* and *elaine*, to which are, almost always, joined an odorous and a colouring principle. It is found in a number of animal tissues, and is very abundant in the neighbourhood of the kidneys and in the epiploon. It is generally fluid in the cetacea; soft, and of a strong smell in the carnivora; solid, and inodorous in the ruminating animal; white, and abundant in young animals; and yellowish in old. It forms about a 20th part of the weight of the human body.

The fat, considered physiologically, has, for its function, to protect the organs; maintain their temperature; and to serve for nutrition in case of need; as is observed in torpid animals.

**PINGUEDO RENALIS**, Nephridion.

**PINGUIC'ULA VULGARIS**, *Sanic'ula montana*, *S. Eboracen'sis*, *V'ola palus'tris*, *Dodecal'con Plin'ii*, *Butter-wort*, *Yorkshire Sall'ie*, *Family*, *Personnææ*. *Sex. Syst.* Diandria Monogynia. The unctuousity of this plant has caused it to be applied to chaps, and as a pomatum to the hair. Decoctions of the leaves, in broths, are used by the common people in Wales as a cathartic.

**PINGUIN**, *Bromelia pinguin*.

**PINHONES INDICI**, *Jatropha curcas*.

**PINK**, **CAROLINA**, *Spigelia Marilandica*.

**PINK DYE**, *Stripped safflower* 𐤆, *subcarb. of potass*, gr. xvij, *spirit of wine* 𐤆vij: digest for two hours; add *distilled water* 𐤆ij: digest for two hours more, and add *distilled vinegar* or *lemon juice* q. s., to reduce it to a fine rose-colour. Used as a cosmetic.

**PINK GROUND**, *Silene Virginica*—p. Indian, *Spigelia Marilandica*.

**PINNA**, Ala, Pavilion of the ear—p. Marina, see Bissus.

**PINNACULUM FORNICIS GUTTURALIS**, Uvula.

**PINNULA**, *Aileron*.

**PINUS ABIES**, *Abies rubra*, *El'atê thele'ia*, *Picea*, *Norway Spruce Fir*, *Yew-leaved Fir*. *Nut. Ord.* Coniferæ. *Sex. Syst.* Monœcia Monadelphia. The tops are used in making *Spruce Beer*, (q. v.)

The **ESSENCE OF SPRUCE** is a fluid extract, prepared by decoction from the twigs of this species of fir. From this is made the *Spruce Beer*, (q. v.)

This fir affords the Burgundy pitch and common frankincense.

1. **BURGUNDY PITCH**, *White pitch*, *Pix Burgundica*, *Pix alba*, *Res'na abiet'is hu'mida*, *Res'na alba humida*, *Pini abiet'is resina sponte concret'a*, *Pix ar'ida*, *Pix abiet'ina*, (F.) *Poix blanche*, *Poix grasse*, *P. jaune*, *P. de Bourgogne*. It is of a close consistence, rather soft, of a reddish brown colour, and not unpleasant smell. It is very adhesive to the skin; and, conse-

quently, forms excellent plasters for remaining upon the part, for some time;—as in cases of affections of the chest.

2. **ABIETIS RESINA**, (Ph. L. since 1809) *Thus*, *Common Fran'kincense*, *Perrosin*, *Thus fœmininum*, *T. vulg'arê*, *Olib'anum vulg'arê*, *Resina abietis sicca*, *Resin of the Spruce Fir*. It is solid, dry, brittle; externally, brownish-yellow; internally, whitish. Used in plasters like the last.

**PINUS BALSAMEA**, *Abies Canaden'sis*. The tree which affords the *Canada Balsam*, *Balsamum Canaden'se*, *Resina strobil'ina*, *Terebin'thinu Canaden'sis*, *Pini balsamea resina liquida*, *Resina flu'ida Canadensis*, *Terebin'thinu balsamea*. *Canada Balsam* is one of the purest turpentine. It has the common properties of those substances.

**PINUS CANADEN'SIS**, *Abies Canaden'sis*, *Hemlock spruce*. A tree, which is abundant in Canada, Nova Scotia, and the more northern parts of New England, and found in the elevated and mountainous regions of the Middle States. The pitch obtained from it is commonly known under the name *Hemlock gum*.

**PINUS CEMBRA**, *Aphernous'ti Pine*. It yields an agreeably scented turpentine:—the *Carpathian Balsam*, *Balsamum Carpath'icum*, *B. Lib'ani*, *Carpath'icum*, *Briançon Tur'pentine*. The nuts, *Cembro nuts*, have an eatable kernel, and yield oil. The shoots yield *Riga balsam* by distillation.

**PINUS LARIX**, *Larix*. The *Larch*, (F.) *Melèze*. From this tree exude *Or'enburg gum*, and *Briançon manna*. It also yields, by boring, *Common Venice Turpentine*, *Resina Laricis*, *Terebin'thina Ven'eta*, *Pini Lar'icis resina liquida*, (F.) *Térébenthine de Venise*, *T. de Melèze*. It is usually thinner than the other sorts of turpentine.

**PINUS MUGHOS**. The *Mountain* or *Mughos Pine*, *Pinus Pumil'io*. From the extremities of the branches exudes the *Resina strobil'ina* of the Germans, or *Hungarian balsam*. It is also obtained, by expression, from the cones. By distillation, the Hungarian balsam affords the *Krumholz Oil*, *Oleum Templinum*.

**PINUS PICEA**, *Silvert Fir Tree*, (F.) *Sapiu commun*, *El'atê*, *Abies*, *A. Gall'ica*. By piercing the tubercles of the bark of this fir, the *Strasburgh Turpentine* is obtained:—the *Resina Abietis* (Ph. L. before 1809,) *Oleum Abietis*, *Terebin'thina Argentorat'en'sis*.

**PINUS PINEA**, *Stone Pine*, *Pinca*, *Pinus*, *P. uber'ima*. The nuts, *Zirbelnuts*, *Pine nuts*, (F.) *Pin à pignons*, are eaten raw; or preserved like almonds. They are, also, used in emulsions.

**PINUS PUMILIO**. See *Pinus Mughos*—p. *Uberima*, *Pinus pinea*.

**PINUS SYLVESTRIS**, *Pinas'ter*, *Peuce*, *Scotch Fir*. This pine affords common turpentine and its oil, resin, tar, and pitch.

1. **COMMON TURPENTINE**, *Terebin'thina vulg'aris*, *T. commun'is*, *Resina Pini*, *Bijon*, *Horse Turpentine*, is obtained by wounding the tree in the hot weather. It is used, chiefly, as a dressing for wounds, &c. in horses, and for the distillation of the oil, (see *Oleum Terebinthinæ*.) When the oil is distilled with water, yellow resin or *Rosin*—*Resina flava*—is left, which is

only used in the formation of ointments and plasters: if without the addition of water, the residuum is common resin or Colophony, (q. v.)

2. When the cold begins to check the exudation of the common turpentine, part of it concretes in the wounds. This is called, in France, *Gallipot, Barras*; and *White Resin, Resina alba*, when hardened after long exposure to the air.

3. When the old trees are subjected to distillation, in a coarse manner, Tar is obtained, —*Hygropissos, Pissa, Pix cædria, Resina pini empyreumatica liquida, Terebinthina empyreumatica, Alchitram, Alchitralra, Cedria, Pix liquida, (F.) Goudron, Brai liquide.*

*Tar water, Aqua Picea, Infusum Picis liquidum seu Picis empyreumatica liquida, Potio picea, (F.) Eau de Goudron*, was, at one time, a fashionable remedy in numerous complaints, and of late its use has been revived, since its virtues have been presumed to be owing to Creasote. It is employed chiefly in pulmonary affections. (Writers. Bishop Berkeley, Lond. 1744, and Prior, Lond. 1746;) and the vapour has been recommended in phthisis and other diseases of the lungs. It is used, externally, as a detergent.

4. COMMON PITCH, *Pix nigra, Black Pitch, Burnea, Burnia, Stone Pitch, Pix sicca, P. atra, P. navalis, Palimpis'sa, P. arida* (Ph. L. before 1809,) (F.) *Poix navale, P. noire*, is obtained by inspissating tar. It is used only as a resolvent, in plasters.

PIOŃE, Pæonia.

PIOULQUES, (F.) A kind of sucking-pump, invented by Louis, for extracting water that had entered internal cavities, in cases of drowning. A useless instrument.

PIPER AROMATICUM, P. nigrum—p. Betel, Betel—p. Brazilianum, Capsicum annuum—p. Calecuticum, Capsicum annuum—p. Caryophyllatum, see *Myrtus pimenta*—p. Caudatum, P. cubeba—p. Chiapæ, see *Myrtus pimenta*.

PIPER CUBEBA, *Com'peper, Com'peba, Cubal sinî, Piper caudatum, Cubeb Pepper, Tailed Pepper, Cuma'mus, (F.) Poivre-à-queue, Quabebe*. A native of Java and Guinea. The odour of these berries is aromatic; taste at first cooling, afterwards pungent. The active principle is an essential oil. The properties of the cubeb are stimulant and purgative. It is used only in gonorrhœa. Dose, from ʒj to ʒj, in powder, three or four times a day.

The 'Turkey yellow berries,'—the dried fruit of the *Rhannus Catharticus*, are often substituted for the cubebs.

PIPER GUINEENSE, Capsicum annuum—p. Indicum, Capsicum annuum—p. Jamaicense, see *Myrtus pimenta*.

PIPER LONGUM, *Macropiper, Acapatli, Cututripali, Pimpilim, Long Pepper, (F.) Poivre long*. As we receive the berries, they consist of the unripe fruit, dried in the sun; and are small, round grains, disposed spirally on a cylindrical receptacle. They are stimulant, carminative and tonic, like the other peppers. Dose, gr. v to ʒj.

PIPER LUSITANICUM, Capsicum annuum—p. Murale, Sedum.

PIPER NIGRUM, *McJanopiper, Molagoco'di,*

*Lada, Piper aromaticum, Black Pepper, (F.) Poivre noir*. Black pepper is the unripe fruit, dried in the sun. *Virtues*, same as those of the other peppers.

PIPER ALBUM, *White Pepper* is the black, freed from its cuticle.

PIPER ODORATUM JAMAICENSE, see *Myrtus pimenta*—p. Tabascum, see *Myrtus pimenta*—p. Turcicum, Capsicum annuum.

PIPERINA, *Piperine*. A resinoid substance, obtained from the piper nigrum, by M. Cærstädt, in which the virtues of the pepper seem to reside. It has been employed, like the quinine, in intermittents, and successfully.

PIPPISEVA, *Pyrola umbellata*.

PIQURE, Puncture, Wound, punctured.

PISCIARELLI, MINERAL WATERS OF. A spring at Monte Secco, in Italy, between Lake Agnano and Solfatara. It is thermal (100° Fahr.) sulphureous and carbonated, and is chiefly used in old ulcers, leucorrhœa, chronic diarrhœa, and in cutaneous affections.

PISCIDIA ERYTHRINA, *Jamaica Dogwood*. A small branching tree common in most of the West India Islands. *Diadelphia Decandria* of Linnaeus. It is used in the West Indies to poison fish. It appears to be an acro-narcotic.

PISCINA, *Baignoire*.

PISIFORM, *Pisiformis*, from *pisum*, 'a pea,' and *forma*, 'shape.'

OS PISIFORME, *Os lenticularæ, Os orbicularæ, Os extra ordinem Carpi, (F.) Os hors de rang*, is the fourth bone of the first row of the carpus.

It is round, and gives attachment to the tendon of the cubitalis anterior, and to the anterior transverse ligament of the carpus. It is articulated, behind, with the os cuneiforme.

PISSO, Mortar.

PISSA. See *Pinus sylvestris*.

PISSASPHAL'TUS, *Pissasphaltum, Mineral pitch*, from *πισσα*, 'pitch,' and *ασφαλτος*, 'bitumen.' (F.) *Poix minérale*. A thicker kind of *Petroleum* or *Rock Oil*; formerly employed as a vulnerary. It is synonymous with *Glutinous bitumen, Malta bitumen, and Mineral tar*.

PISELÆUM, *Oleum Picinum*, from *πισσα*, 'pitch,' and *ελαιον*, 'oil.' An oily matter, obtained from boiling pitch, and used for the same purposes as tar.

PISELÆUM INDIICUM, *Petrolæum*.

PISSEMENT DE SANG, Hæmaturia.

PISENIT, *Leontodon taraxacum*.

PISSEROS, from *πισσα*, 'pitch.' Ancient name of a cerate, prepared of *olive oil, oil of roses, and dried pitch*. It was, also, called *Cera'tum picatum*, and *C. tetraphar'macum*.—Hippocr.

PISSITES, *Vinum picatum*. A wine, prepared from tar and the must of the grape. It was regarded to be stomachic.

PISSOSIS, Malacia.

PISTACHIO NUTS. See *Pistacia vera*.

PISTACIA LENTIS'CUS, *Terebinthus lentiscus, Lentiscus vulgaris*; the *Mastich Tree*. Family, *Terebinthaceæ*. The wood of this tree abounds with the resinous principle of mastich; and a tincture, made from it, has been used in the cure of dyspeptic affections, gout, and dysentery. It yields, by incision, the resin *Mastich, Resina Lentiscina, Men'frige, Mastichæ, Mastix, Pistacie Lentiscæ Resina*. This

resin has an agreeable smell, when heated: is almost insipid: in globular, irregular, yellowish, semi-transparent masses: soluble in ether; partially so in alcohol. It is stimulant, and has been used in old coughs, and gleet, and is chewed to sweeten the breath. It is sometimes, also, employed to stop the holes in carious teeth.

**PISTACIA TEREBINTHUS**, *Turpentine Tree*, *Hab-el-Kalimbat*, *Terebinthus vulgaris*, *Terminthos*. The tree, which affords the *Cyprus Turpentine*, *Chio Turpentine*, *Truc Venice Turpentine*, *Resina Terebinthi*, *Terebinthina vera*, *T. Chia*, *T. Cyprica*. This substance is classed amongst the resins. It is procured by wounding the bark of the trunk. The best Chio turpentine is of about the consistence of honey; very tenacious, clear, and almost transparent; of a white colour, inclining to yellow, and of a fragrant smell; moderately warm to the taste, but free from acrimony and bitterness. It resembles, in virtues, the other turpentine.

**PISTACIA VERA**. Name of the tree, which affords the *Nux Pistacia*. *Pista'chio nuts* have a sweetish, unctuous taste, resembling that of sweet almonds. Like these they afford an oil, and may be formed into an emulsion.

**PISTILLUS**, *Pilum*.

**PISTOLOCHIA**, *Aristolochia pistolochia*.

**PISTORIENSIS GLADIUS**, *Bistouri*.

**PIT OF THE STOMACH**, *Fossette du cœur*.

**PITAYA BARK**. This bark is preferred in Columbia to any other. It contains a new vegetable alkali, to which the name *Pitayine* has been given.

**PITAYINE**. See *Pitaya bark*.

**PITCH**, *Colophonia*—p. Black, see *Pinus sylvestris*—p. Burgundy, see *Pinus abies*—p. Common, see *Pinus sylvestris*—p. Hemlock, see *Pinus Canadensis*—p. Jew's, *Asphaltum*—p. Mineral, *Pissasphaltum*—p. Stone, see *Pinus sylvestris*—p. White, see *Pinus abies*.

**PITHYRINUS**, *Acerosus*, *Furfuraceus*.

**PITTA'CIUM**. A pitch plaster, from *πιττα*, 'pitch.'

**PITTOSIS**, *Malacia*.

**PITTO'TA**. Medicines in which pitch is the chief ingredient.

**PITTSBURG**, *MINERAL WATERS OF*. A chalybeate mineral spring, situate about four miles S. W. of Pittsburgh, in Pennsylvania. It contains muriate of soda, muriate of magnesia, oxide of iron, sulphate of lime, and carbonic acid.

**PITUITA**, *Phlegm*—p. *Narium*, *Nasal mucus*.

**PITUITARY**, *Pituitaris*, from *pituita*, 'phlegm.' A name given to several parts.

1. **FOSSA PITUITARIA**. A depression on the cerebral surface of the sphenoid bone, which lodges the pituitary gland. It is called, on account of its shape;—*Sella Turcica*, *Ephippium*. *Claussier* calls it *Fossa supra-sphenoidalis*, from its situation.

2. The **PITUITARY GLAND**, *Glandula Pituitosa* vel *pituitaria*, *Glandula basilaris*, *Lacrina vel Appendicula cerebri*, *Hypophysis* seu *Appendix Cerebri*, *Pituitary body*, *Corpus pituitarē*;—*Appendice sus-sphenoidale du cerveau*, (Ch.) A small, round body; the anterior portion of which is of a cineritious yellow hue, and the

posterior, which is smaller, is whitish and pulpy. Its functions are unknown.

3. The **PITUITARY MEMBRANE**, *Schneiderian Membrane*, *Membrana pituitaria*, *M. olfactoria*. The mucous membrane, which lines the nasal fossæ, and extends to the different cavities communicating with the nose. In the nasal fossæ, the membrane appears formed of two layers, intimately united:—the one, in contact with the bones, is fibrous;—the other is free at one surface. The latter is a mucous membrane, on which papillæ are not easily distinguishable, but which contains them, as well as a number of very small mucous follicles, that open into the cavity of the nares. On penetrating the maxillary, frontal, sphenoidal, and ethmoidal sinuses, the membrane becomes very thin, transparent, less vascular, and seems reduced to its mucous layer.

The pituitary membrane receives the impression of smells, by means of the expansions of the olfactory nerves upon it. It is the seat of smell.

**PITYRIASIS**, from *πιτυρον*, 'bran;' *Lepidosis Pityriasis*, *Dandriff*:—a very superficial affection; characterized by irregular patches of thin scales, which repeatedly exfoliate and recur; but which never form crusts, or are accompanied with excoriations. It is not contagious. It occurs under three or four varieties of form.

**PITYRIASIS**, *Porrigo*—p. *Nigra*, *Chloasma*—p. *Versicolor*, *Chloasma*.

**PITYRON**, *Furfur*.

**PIVOINE**, *Pœonia*.

**PIX ABIETINA**, see *Pinus abies*—p. *Alba*, see *Pinus abies*—p. *Anda*, see *Pinus abies*, and *Pinus sylvestris*—p. *Atra*, see *Pinus sylvestris*—p. *Brutia*, *Brutia*—p. *Burgundica*, see *Pinus abies*—p. *Cedria*, see *Pinus sylvestris*—p. *Græca*, *Colophonia*—p. *Liquida*, see *Pinus sylvestris*—p. *Navalis*, see *Pinus sylvestris*—p. *Nigra*, see *Pinus sylvestris*—p. *Sicca*, see *Pinus sylvestris*.

**PLACEBO**, 'I will please.' An epithet given to any medicine, intended rather to satisfy the patient than to cure a disease.

**PLACENTA**, *P. uteri* seu *uterina* seu *uteri carnea*. A Latin word, signifying a *Cake*. *Hepar uterinum*, *Jecur uterinum*, *Caro* seu *Affusio orbicula'ris*. A soft, spongy, vascular body, formed at the surface of the chorion, adherent to the uterus, and connected with the fœtus by the umbilical cord. It is not in existence during the first period of the embryo state, but its formation commences, perhaps, with the arrival of the embryo in the uterus. Its mode of attachment to the uterus is a topic of dispute; but it seems clear that the main circulation through it is of the blood of the fœtus. The placenta is formed of several *lobes* or *cotyledons*, which can be readily distinguished from each other on the uterine surface; but, towards the fœtal surface, are confounded into one mass. It is composed of the umbilical vessels, cellular tissue, and whitish, resisting filaments, which are vascular ramifications obliterated. Lymphatic vessels have also been presumed to exist in it; and nerves have been traced, proceeding from the great sympathetic of the fœtus.

The function of the placenta appears to be

like that of the lungs in the adult. It admits of the blood of the fœtus being shown to that of the mother, and of undergoing the requisite changes.

PLACENTA FERRILIS, Ague cake—*p.* Sanguinis, see Blood.

PLADAROSIS, *Pladarotes*, from *πλαδαρος*, 'soft.' A soft tumour on the eyelid, unaccompanied with redness or pain.

PLAFOND DES VENTRICULES DU CERVEAU, Corpus callosum.

PLAGA, letus, Wound.

PLAGUE, *Pestis*, *Pestilentia*, *Loimos*, *Febris adeno-nervosa*, *Lamos*, *Lamopyra*, *Chaos-da*, *Anthraxia Pestis*, *Febris pestilens*, *Typhus pestis*, *Exanthema pestis*, from *πληγη*, *Plaga*, 'a stroke,' the *Pest*, (F.) *Peste*, *Typhus d'Orient*. An eminently contagious disease; endemic in the Levant; frequently epidemic, and destroying at least two-thirds of those it attacks. It is a typhus of the most aggravated kind, with affection of the lymphatic glands of the groin, or axillæ, and carbuncles. Its contagious miasmata adhere to different organic textures, to woollen goods, clothing, and furniture; and may thus be transported to a considerable distance.

The mean duration of the disease is six or seven days; some die in twenty-four hours, others not till ten or twelve days. Pathological anatomy has afforded us no light with respect to it.

Various means have been used for arresting the disease, but none have seemed to be pre-eminently distinguished. The great point is, to watch the indications as they develop themselves; and to treat the case, in general, like one of typhus gravior. It is universally agreed that the suppuration of the buboes should be aided as far as practicable.

For preventing the importation and spread of the plague, the *Quarantine Lavs* have been instituted; and when the disease has actually appeared, a *cordon sanitaire* has been drawn round the infected district, so as to prevent all communication.

PLAGUE, COLD. A severe form of congestive fever, seen occasionally in the Southern States.

PLAGULA, Compress, Pledget, Splint.

PLAIE, Wound—*p.* *d'Arme a feu*, Wound, gunshot—*p.* *d'Arquebuse*, Wound, gunshot—*p.* *Coutuse*, Wound, contused—*p.* *Empoisonné*, Wound, poisoned—*p.* *par Arrachement*, Wound, lacerated.

PLANARIA LATIUSCULA, Distoma hepaticum.

PLANCHER DU CERVEAU, Tentorium.

PLANE, Plexus.

PLANE/TES, *πλανητες*, *Errabundus*, *erratic*. An epithet, given to some diseases, whose returns are irregular—especially to intermittent fevers.

PLANIPEDES, Steganopodes.

PLANTIES PEDIS, Sole.

PLANTA PEDIS, Sole—*p.* *Prima pedis*, Tarsus.

PLANTAGO, *P. Major*, *Centuncr'ia*, *Arnoglossum*, *Septiner'ia*, *Polyncl'ron*, *Plantago latifolia*, *P. major*, (F.) *Plantain commun*. Family, Plantaginæ. *Sex. Syst.* Tetrandria Mo-

nogynia. The leaves have been said to be refrigerant, attenuant, substyptic, and diuretic.

PLANTAGO CORONOPUS, *Coronopodium*, *Cornu cervinum*, *Stella terreæ*, *Plantago*, *Buckshorn Plantain*. Properties like the last.

PLANTAGO PSYLLIUM, *Psyllium*, *Pulicaris herba*, *Crystallion*, *Сиромоша*, *Branching Plantain*, *Fleacort*, (F.) *Herbe aux puces commune*. The seeds have a nauseous, mucilaginous taste, and no remarkable smell. The decoction of the seeds is recommended in hoarseness and roughness of the fauces.

PLANTAIN, BRANCHING, *Plantago psyllium*—*p.* *Buckshorn*, *Plantago coronopus*—*p.* *Commun*, *Plantago*—*p.* *d'Eau*, *Alisma plantago*—*p.* *Tree*, *Musa paradisiaca*—*p.* *Water*, *Alisma plantago*.

PLANTAIRE, *Plantar muscle*—*p.* *Grêle*, *Plantar muscle*.

PLANTAR, *Plantaris*, from *planta*, 'the sole of the foot.' That which relates or belongs to the sole of the foot. This name has been given to several parts.

The PLANTAR APONEUROSIS. A thick, dense, resisting aponeurosis; of a triangular shape, and superficially situate, which occupies the middle and sides of the sole of the foot, and furnishes insertions to several of the muscles of the region, either directly or through the medium of septa, which it sends between them.

The PLANTAR ARTERIES. These are two in number, and arise from the extremity of the posterior tibial artery. They are distinguished into:—

The *internal plantar artery*, situate above the abductor pollicis pedis. It extends from the termination of the posterior tibial to the trunk of one of the collaterals of that toe.

The *external plantar artery* is larger than the preceding, and ought to be considered as the termination of the posterior or tibial. Situate above the flexor communis digitorum pedis, it extends from beneath the calcaneum to the posterior extremity of the last metatarsal space. When it has reached this part, it turns from without inwards; advances towards the posterior extremity of the first metatarsal bone, and anastomoses with the perforating branch of the *dorsalis tarsi*. In the first part of its course, it furnishes calcaneal, articular, muscular, and adipous branches. The second portion of the artery is called the *Plantar Arch* or *Cross*. It gives branches in all directions. The inferior and posterior have received no name. The superior—three in number—are the *posterior perforating arteries*. The anterior branches are larger, and there are commonly four. They furnish the *anterior perforating*, and the *collaterals* of the four last toes.

The PLANTAR VEINS follow a similar arrangement.

PLANTAR LIGAMENTS. A name given to the inferior ligaments, which unite the bones of the tarsus and metatarsus, to distinguish them from the superior, called *dorsal*.

PLANTAR NERVES. These are two in number, and are furnished by the termination of the posterior tibial nerve. They are distinguished into;—

The *internal plantar nerve*. It extends from the inferior part of the tibial nerve to both sides

of the three first toes, and the inner side of the fourth. It furnishes, also, branches to the abductor of the great toe; to the short flexor of the toes; to the accessory; to the short flexor of the great toe, the lumbricales, &c.

The *external plantar nerve* proceeds from the termination of the posterior tibial to the posterior extremity of the 5th metatarsal bone, and gives branches to the flexor brevis digitorum pedis, the accessory and the abductor of the little toe. This trunk subsequently divides into two branches;—the one—*profunda*—is distributed to the short flexor of the great toe; the interosseus and abductor pollicis pedis: the other—*superficialis*—sends filaments to the short flexor of the little toe, the two sides of that toe, the outer side of the 4th, and the last lumbricalis.

The **PLANTAR MUSCLE**, *Plantaris*, *P. gracilis*, *Tibialis gracilis*, *Extensor tarsi minor*, *Plantaire*, *P. grêle*, *Jambier grêle*, *Petit fémoro-calcanien*, (Ch.) A muscle, situate at the posterior part of the leg. It is long, thin, and narrow. Above, it is attached to the posterior part of the external condyle of the femur: below, it terminates by a long tendon, which is attached to the posterior and inner part of the calcaneum. This muscle extends the leg on the foot, and *vice versâ*. It can, also, assist in the flexion of the leg on the thigh.

The **PLANTAR REGIONS** are different regions of the sole of the foot. Three are generally reckoned:—the *internal*, *middle*, and *external*.

**PLANTARIS SUPERFICIES PEDIS**, Sole—p. Verus, see Flexor longus digitorum pedis profundus perforans (accessorius.)

**PLANTE DU PIED**, Sole.

**PLANTI-SOUS-PHALANGIENS**, Lumbricales pedis—p. *Tendino-phalangiens*, Lumbricales pedis.

**PLANUM, OS**, from *planus*, 'soft, smooth.' The papyraceous or *orbital plate* of the ethmoid bone was, formerly, so called.

**PLANUM PEDIS**, Sole.

**PLAQUEMINIER D'EUROPE**, Diospyros lotus.

**PLASMA**, Liqueur Sanguinis.

**PLASTER**, Emplastrum—p. Adhesive, Emplastrum resinæ, Sparadrapum adhesivum—p. Adhesive, of Pitch and resins, Emplastrum de pic et resinis glutinans—p. Ammoniacum, Emplastrum ammoniaci—p. Ammoniacum with mercury, Emplastrum ammoniaci cum hydrargyro—p. Aromatic, Emplastrum aromaticum—p. Asafetida, Emplastrum asafetidæ—p. of Blistering fly, Emplastrum lyttæ—p. Calefacient, Emplastrum calefaciens—p. of Cantharides, compound, Emplastrum lyttæ compositum—p. Cephalic, Emplastrum picis comp.—p. Corn, Sparadrapum viride—p. Corn, Kennedy's, Sparadrapum viride—p. Court, English, see Ichthyocolla, Sparadrapum adhesivum—p. Cummin, Emplastrum Cumini—p. Defensive, Sparadrapum Galteri—p. Diachylon, Emplastrum plumbi—p. Frankincense, Emplastrum thuris—p. Galbanum, Emplastrum galbani—p. Galbanum, compound, Emplastrum galbani compositum—p. Gum, Emplastrum gummosum—p. of Gum resins, Emplastrum cum gummi resinis—p. Hemlock, Emplastrum cicutæ—p. Issue, Sparadrapum pro fonticulis—p. Lead, Emplastrum plumbi—p. Machine, *Sparadrapier*

—p. Mercurial, Emplastrum hydrargyri—p. of Mercury, compound, Emplastrum hydrargyri compositum—p. Nuremberg, Emplastrum Norimbergense—p. Opium, Emplastrum opii—p. Pitch, comp, Emplastrum picis compositum—p. Resin, Emplastrum resinæ—p. of Red oxide of iron, Emplastrum oxidi ferri rubri—p. Soap, Emplastrum saponis—p. of Spanish flies, compound, Emplastrum lyttæ compositum—p. Sticking, Emplastrum resinæ—p. Strengthening, Emplastrum oxidi ferri rubri—p. Warm, Emplastrum calefaciens—p. Wax, Emplastrum ceræ.

**PLASTIC**, *Plasticus*, from *πλασσω*, 'I form.' That which forms; which serves to form.

The **PLASTIC FORCE** is the generative power in organized bodies. It is also called *Nisus formativus*, *Vis plastica*, *Vis reproductiva*, *Force of Nutrition*, *F. of assimilation*, *Plasticismus*.

**PLASTICISMUS**, Plastic force.

**PLATA**, Scapula.

**PLATANUS**, *Musa paradisiaca*.

**PLATEA**, *Bothriocephalus latus*.

**PLATIASMUS**, from *πλατυς*, 'broad.' Excessive development of the lips, causing the articulation to be imperfect.

**PLATINA**, **MURIATE OF**, *Murias Platinae*, *Chloruretum Platinae*. This preparation, made by dissolving platina in oxymuriatic acid, has been advised in the treatment of syphilis. From a quarter of a grain to a grain to be rubbed upon the gums.

**PLATINÆ CHLORURETUM**, Platina, muriate of.

**PLATULA**. See *Pediculus*.

**PLATYBREGMATE**. See *Cranium*.

**PLATYCORIA**, Mydriasis.

**PLATYOPHTHALMON**, Antimonium.

**PLATYSMA**, from *πλατυς*, 'broad.' Any thing broadly extended. A spread plaster.

**PLATYSMA MYOIDES**, *P. myoides*, *Musculus cutaneus*, *M. subcutaneus*, (Winslow,) *Quadratus genæ vel latisimus colli*, *Tetragnus*, *Stomomandicon*, *Thoraco-maxillo-facial*, *Thoraco-facial*, (Ch.) (F.) *Peucier*. A muscle, situate superficially on the lateral parts of the neck. It is flat, broad, and quadrilateral. Its fibres, which are all parallel to each other, pass obliquely downwards, and from without inwards. They arise from the cellular tissue, which covers the anterior and superior part of the chest; pass before the clavicle, and proceed to attach themselves at the interior part of the symphysis menti, at the external oblique line of the jaw, and at the commissure of the lips. The fibres of this last insertion form a distinct fasciculus, called by some anatomists *Musculus Risorius Santorini*. The platysma myoides depresses the commissure of the lips, and carries it outwards. It contributes, also, to the depression of the lower jaw. When it contracts, it wrinkles the skin of the neck transversely.

**PLATYSTERNOS**, from *πλατυς*, 'broad,' and *στερνον*, 'the sternum.' One who has a well developed chest.—D. Pechlin.

**PLECHAS**, Perinæum.

**PLECTANÆ**, Cornua uteri.

**PLECTANÆ**, *Plica*, *Plegma*, *Plexus*, (q. v.) A fold, a plexus. Also, a cornu of the uterus.

**PLECTRUM**. The styloid process of the

temporal bone. Also, the uvula and the tongue.  
—Castelli.

**PLEDGET**, (D.) *Plagghe, Plumaccolus, Lin-tea'men, Plag'ula*, (F.) *Plumacau, Plumasseau*. A small compress or *gâteau* of lint—(the filaments arranged parallel to each other)—flattened between the hands after the extremities have been cut off or folded down. It is applied over wounds, ulcers, &c., to preserve them from the contact of the air, to retain dressings *in situ*, or to absorb the discharges.

**PLEGE**, Blow, Ictus.

**PLEGMA**, Plectane, Plexus.

**PLEIN**, (F.) 'Full.' The middle part of a roller.

**PLENITUDE**, Fulness.

**PLENITUDO**, Plethora.

**PLERO'SIS**, from *πληρης*, 'full'; also, *Reple'tio, Refec'tio, Repl'e'tion*. Restoration of flesh after sickness.

**PLEROTICUS**, Incarnans.

**PLES'MONE**, *Plenitudo, Sati'etas, Sati'ety*, (q. v.) Intemperance, (q. v.) Condition opposite to that of hunger.

**PLESSIMETER**, Pleximeter.

**PLETHORA**, from *πληθω*, 'I fill.' *Polyæ'mia, Polyhyperhæ'mia, Plenitudo, Multitudo, Redundantia, Reple'tio, En'chyma, Compl'e'tio, Fulness*, (q. v.) (F.) *Abondance*. The word *plethora*, which means repletion, expresses a superabundance of blood in the system, or in some part of it:—hence the division of plethora into *general and local*; the latter being called, according to its seat, *cerebral, pulmonary, uterine*, &c. The principal symptoms of plethora exist in the circulatory system; such as redness of the surface, swelling of the veins, increase in the fulness of the pulse, in the strength of the heart's pulsations, &c., with spontaneous hemorrhages occasionally. With these are usually united general heaviness, torpor, lassitude, vertigo, tinnitus aurium, flushes of heat, &c.

The tendency to plethora, or its actual existence, must be obviated by purgatives, proper diet, exercise, &c.; and, if the danger from it be pressing, by blood-letting. This is, however, a doubtful remedy for general plethora, as it increases hæmatisis.

**PLETHOS**, Satiety.

**PLEUMON**, Pulmo.

**PLEUMONIA**, Pneumonia.

**PLEURA**, *πλευρα*, 'the side.' *Membra'na pleurit'ica seu costas succin'gens seu succin'gens, Membra'na seu Tu'nica costalis seu subcostalis, Hypopleu'rios*, (F.) *Plevre ou Pleure*. The pleuræ are two thin, diaphanous, perspirable membranes, which line each side of the chest, and are reflected thence upon each lung. Like all serous membranes—to which class they belong—each represents a sac without aperture. From the junction of the pleura of each side the mediastina are formed.

That portion of the pleura which lines the parietes of the chest is called *Pleura Costalis*; the portion that covers the lungs, *Pleura Pulmonalis*.

The arteries of the pleuræ are from the intercostals, internal mammaries, phrenic, inferior thyroid, &c. The veins correspond with the arteries. They are, also, supplied with lymphatics, but nerves are not traceable in them.

*Pleura* is also used for *Cavity of the Pleura*.

**PLEURALGIA**, Pleurodyne.

**PLEURE**, Pleura.

**PLEURESIE**, Pleurisy.

**PLEURESIS**, Pleuritis.

**PLEURIS**, Pleuritis.

**PLEURISY**, Pleuritis.—p. False, Pleurodynia—p. Rheumatic, Pleurodynia—p. Root, *Asclepias tuberosa*.

**PLEURITIS**, from *πλευρα*, 'the pleura;' *Morbus lateralis, Empres'na Pleuritis, Pleuris, Pleur'esis, Pleuropneumonit'is, Pneumopleur'esis, Pleurit'ica Febris, Cauma Pleurit'is, Passio pleurit'ica, Pleurisy, Inflammation of the Pleura*, (F.) *Pleurésie, Fièvre pleurétique*, may be acute or chronic. Perhaps the most violent of all internal inflammations is the active form; known by acute, lancinating pain in one side of the chest, increased by inspiration, by coughing, and often by pressure; dyspnoea, the inspirations being short and frequent; cough dry, or with little expectoration; difficulty of lying on the affected side. Symptoms, attending the phlegmasiæ in general, strongly marked.

*Physical Signs*. There is seldom any perceptible alteration in the exterior of the chest. When effusion has taken place to a great extent, the signs will be similar to those of chronic pleurisy. The motion of the affected side is diminished, and the vibrations of the voice cannot be detected by the hand.

There is more or less dulness of sound on percussion, the dulness diminishing or disappearing by change of position.

On auscultation, the inspiration is feeble, distant, or inaudible; but change of position modifies it.

Egophony is usually present, when the effusion is in moderate quantity, and is best heard over a portion of the thoracic parietes, represented by a band of three inches, running from below the inferior margins of the scapula in the direction of the ribs to the sternum.

Simple pleurisy rarely attacks both sides at once: when such is the case, the presence of tubercles may be suspected.

Formerly, a *true pleurisy* meant one seated in the pleura; a *mediastinal pleurisy*, one situated in the anterior mediastinum; and *false pleurisy* or *rheumatismal pleurisy*, that which occupied the intercostal muscles. This last has received the name *Pleurodynia*; that of *pleurisy* being exclusively appropriated to inflammation of the pleura. Pleurisy has, also, been distinguished into *dry and humid*; according as it is accompanied or not by expectoration. *Humid or moist pleurisy* is, now, properly regarded as a complication of pleurisy with pulmonary catarrh. It is the *cata'rhal pleurisy* of some. The majority of the species of pleurisy, admitted by Sauvages, consist of complications.

The causes of pleurisy are like those of other internal inflammations. It may terminate by resolution, effusion, or suppuration.

**CHRONIC PLEURISY**, which has been particularly described by Bayle, Broussais, and Laënnec, most commonly terminates by a serous or purulent effusion, which sometimes simulates hydrothorax; at others, phthisis pulmonalis. It may form slowly, without evident symptoms; or it may succeed acute pleurisy. In the former

case, vague pains are felt in the chest, with small, dry cough, oppression at intervals, shivering, irregular febrile symptoms, and hardness of pulse.

*Physical Signs.* The affected side is smoother, more rounded and motionless; the intercostal spaces are dilated and filled up, or may even protrude slightly. In very chronic cases, however, the affected side may be smaller. The triangular space above the clavicle and the depression immediately above the sternum are often drawn downwards on the diseased side. No vibration is experienced by the hand when the patient speaks. The parietes of the thorax are sometimes œdematous, and fluctuation may be occasionally felt between the ribs. On percussion, the sound is dull, or if clear only so in the upper portions of the chest. On auscultation, there is an absence of the usual sounds over the affected parts, excepting occasionally transmitted sounds.

There are no physical signs that can enable us to know whether pus or serum is effused into the chest. The introduction of a grooved needle through the intercostal space, as recommended by Dr. Thomas Davies, would of course settle the question.

On dissection of those who have died of pleurisy, the pleura is found thickened, red, inflamed, and covered with membranous exudations or false membranes. Sometimes, it seems cartilaginous or ossified. Its cavity, frequently, contains serous or sero-purulent effusions.

The acute form of the disease requires the most active treatment. General blood-letting, to such an extent as to make a very decisive impression on the system, and repeated if necessary. This is the most important agent. After the violence of the disease has been got over, counter-irritants will be found highly beneficial; as well as when it has passed into the chronic state. The cough may be relieved by demulcents.

**BILIOUS PLEURISY**, *Pleuritis biliosa*, is pleurisy accompanied with bilious symptoms;—the effect of duodenitis or duodeno-hepatitis.

Sauvages has given the name *Pleuritis ventosa*, and Pringle that of *Pleurodyn'ia ventosa*, to a pain behind the false ribs, attributed to the presence of air in the intestines.

**PLEURITIS SPURIA SIMULATA**, *Pleurodynia*.

**PLEUROCE'LE**, from *πλευρα*, 'the pleura,' and *κίλη*, 'a tumour.' *Hernia of the pleura*. This name, employed by Sagar, is inaccurate, as the pleura never protrudes alone. It only forms a hernia, when it serves as an envelope to the lung, to tumours, or to purulent collections, which have protruded from the thoracic parietes.

**PLEURO COLLE'SIS**, from *πλευρα*, 'the pleura,' and *κολληω*, 'I glue.' An adhesion between the pleura costalis and pleura pulmonalis.

**PLEURODYN'IA**, *Pleural'gia*, *Pseudo-pleuritis*, *Pseudo-pleurisy*, *Pleurōd'yne*, *Aural'gia* *doboro'so*, *A stitch*, *Pain in the side*, *Paropleuritis*; *False Pleurisy*, *Rheumat'ic* or *rheumatis'mal pleurisy*, *Pleuritis spuria simulata*, *Pneumo'nia exter'na*, *Lagonop'onos*, *Thorocod'yne*, (F.) *Point de côté*, *Douleur de côté*; from *πλευρα*, 'the side

or pleura,' and *ὄδυνη*, 'pain.' A spasmodic or rheumatic affection, usually seated in the muscles of the chest, and, ordinarily, in the intercostals. It is usually augmented by outward pressure, inspiration, coughing, exertion, moving the thorax, and sometimes, even the corresponding arm. It is unaccompanied by fever, cough, or dyspnœa, except when under the form of a *stitch*, when dyspnœa exists.

It is, generally, by no means obstinate, and yields promptly to warm applications and to cupping or leeches. If it still resist, a blister will, almost always, remove it.

**PLEURODYNIA VENTOSA**, *Pleuritis ventosa*.

**PLEUROPATH'IA**, from *πλευρα*, 'the pleura,' and *πάθος*, 'disease.' A disease of the pleura.

**PLEUROPERIPNEUMONY**, *Pleuroperipneumonia*, *Pleuropneumonia*. Inflammation occupying the pleura and the lung at the same time. Pleurisy and peripneumony existing simultaneously.

*Physical Signs.* A dull sound is yielded by percussion for a variable extent over the more dependent portions of the affected side. The loss of sound is partially modified by change of position.

The respiratory murmur on auscultation is very feeble or absent inferiorly; higher up the crepitation or bronchial respiration of pneumonia may be detected: round the root of the lung and near the inferior angle of the scapula egophony is generally present. There is seldom much enlargement of the affected side, or displacement of the adjacent organs, as in the case of simple chronic pleurisy.

**PLEUROPNEMONIA**, *Pleuro-peripneumony*.

**PLEUROPNEMONITIS**, *Pleuritis*.

**PLEURORRHŒA CHYLOSA**, *Chyllothorax*—*p.* *Purulenta*, *Empyema*—*p.* *Sanguinea*, *Hæmatothorax*.

**PLEURORTHOPNŒ'IA**, from *πλευρα*, 'the side,' *ὄρθος*, 'straight,' and *πνεω*, 'I respire.' Pain of the side, which does not permit the patient to breathe, except when in the vertical position.

**PLEUROTHOT'ONOS**, *Pleurotonos*, *Tel'anus lateralis*, from *πλευροθεν*, 'laterally,' and *τονος*, 'tension.' Variety of tetanus, in which the body is curved laterally, by the stronger contraction of the muscles of one side of the body.

**PLEUROTONOS**, *Pleurothotonos*.

**PLÈVRE**, *Pleura*.

**PLEXIM'ETER**, *Plessim'eter*, *Plexim'etrum*, *Plessim'etrum*, from *πλίσσω*, 'I strike,' and *μετρον*, 'measure,' 'a measurer of percussion.' An ivory plate, of a circular or ovoid shape, from an inch and a half to two inches in diameter, and about one sixth of an inch in thickness. It has either a raised rim or edge, or projecting handles on its upper side, to permit its being held between the finger and thumb of the left hand, whilst it is struck with the right. It is used in percussion of the chest. A piece of metal, a coin, or the finger of the left hand may be used with equal advantage.—See *Percussion*, *Mediate*.

**PLEXUS**, *Plegmo*, *Plectane*, (q. v.) *Plane*, *Rele*, from *πλεκω*, 'I interlace,' 'I entwine,'

(F.) *Lacis*. A network of blood-vessels or of nerves.

The nervous plexuses belong,—some to the system of encephalic nerves—others to that of the great sympathetic; whilst some, as the pharyngeal, seem to be formed of the two sets. The plexuses represent complex networks, with more or less loose meshes, formed by the numerous and diversified anastomoses of the nervous filaments: and from which proceed other branches, that are distributed to organs or to other plexuses.

PLEXUS CHOROIDES, see Choroid—*p. Caliaque*, Cœliac plexus—*p. Coronarius ventriculi*, Gastric plexus—*p. Gangliiformis semilunaris*, Cœliac plexus—*p. Gangliiformes*, Ganglions, nervous—*p. Glandiformes*, Ganglions, nervous—*p. Glandulosi Peyeri*, Peyer's glandulæ—*p. Hederaceus*, Corpus pampiniforme—*p. Hepaticus*, Hepatic plexus—*p. Infra-thyroideale*, see Thyroideale veins—*p. Lombo-abdominal*, Lumbar plexus—*p. Median*, Cœliac plexus—*p. Mesenterii proprius et maximus*, Cœliac plexus—*p. Opistogastrique*, Cœliac plexus—*p. Rectiformis*, Corpus cavernosum vagina—*p. Solar*, Cœliac plexus—*p. Sous-mésentérique*, Hypogastric plexus—*p. Testiculair*, Spermatic plexus—*p. Trachelo-scutané*, Cervical plexus.

PLICA, *Trichosis plica*, *Tricho'ma*, *Plica Polonica*, Matted hair, Plaited hair, *Lues Sarmatica*, *Helot'is*, *Cir'vagra*, *Cir'rhagra*, *Morbus Cir'rorum*, *Tricha Incuborum*, *Plica caput medusæ*, *Plica longicauda lateralis*, *Coma casurca*, *Kolto*, *Rhopalosis*, *Plicatio*, *Plicatura*, (F.) *Plique*. A disease, endemic in Poland, Lithuania, and other parts of Northern Europe; so called on account of its being characterized by interlacing, twisting, and agglutination or matting of the hair. By some, it has been regarded as a disease; by others, as the result of a want of attention to cleanliness. However this may be, it generally appears upon the hair of the head, but, sometimes, in that of other parts, as the beard, the hair on the axilla, pubes, &c. Alibert admits three species of plica. 1. The *Plica multiformis* or *Plica caput Medusæ*, in which the hairs are mixed and agglutinated in greater or less masses; and this has been again subdivided into two varieties, according as the meshes are almost straight (*P. C. M. laciniata*, (F.) *Plique en lamieres*) or much twisted (*P. C. M. laciniata* (F.) *P. en vrilles*.) 2. *Plica longicauda* (F.) *Plique solitaire ou à queue*; when the hair is united into a single long mass, and 3. *Plica cespitosa*, (F.) *Plique en masse*, in which the hairs are matted into one large, shapeless mass. Pinel places this disease amongst the *Cutaneous phlegmasia*; but it is far from being demonstrated, that it is the result of inflammation of the skin. Certain it is, however, that the tangling of the hair is symptomatic of an affection of the dermoid system, *sui generis*. The idea that it is entirely owing to want of cleanliness, as has been conceived by some, is not tenable.

PLICA, Plectane—*p. Caput medusæ*, *Plica*—*p. Longicauda lateralis*, *Plica*—*p. Semilunaris*, *Valvula semilunaris*.

PLICATIO, *Plica*.

PLICATURA, *Plica*.

PLICHOS, *Perinæum*.

PLINTHIUM, *πλινθιον*. A machine, invented by one Nileus, which was formerly employed in the reduction of fractures and luxations. Scultetus describes it in his *Armatamentarium Chirurgicum*.

PLIQUE, *Plica*.

PLOMB, Plumbum—*p. Blanc*, Plumbi subcarbonas—*p. Blanc de*, Plumbi subcarbonas—*p. Oxide de, fondu*, Plumbi oxydum semivitreum—*p. Oxide de, rouge*, Plumbi oxydum rubrum—*p. Oxide de, semivitreux*, Plumbi oxydum semivitreum.

PLOMBAGINE, Graphites.

PLOMBIÈRES, MINERAL WATERS OF. P. is a town in the department of the Vosges, 17 leagues from Nancy, and 2 from Remiremont. Here are several sources of Thermal water. That, which is called *Saponaccous* (*Savonneuse*) is formed of the subcarbonate, sulphate, and muriate of soda, silica, carbonate of lime, and much vegeto-animal matter. This last component, when held in solution by means of the subcarbonate of soda, gives to the water an unctuous appearance. This is the origin of its name.

The waters of Plombières are employed as solvents in engorgements of the abdominal viscera, and as alteratives in chronic diseases of the skin.

PLUGGING, (Sw.) *Plugg*. (F.) *Tumpoucement*. The act of stopping a hole. The introduction of plugs of lint or rag into a wound or natural cavity—as the uterus or vagina—to arrest hemorrhage; or of some substance into a carious tooth to prevent toothache.

PLUM, Prunum, *Prunus domestica*—*p. Assyrian*, *Sebestina*.

PLUMACEAU, Pledget.

PLUMACEOLUS, Pad, Pledget.

PLUMASSEAU, Pledget.

PLUMBAGO, Graphites, Persicaria.

PLUMBA'GO EUROPEA, *Dentaria*, *Crepantella*, *Squamaria*, *Dentelaria*. (F.) *Dentelaire*. Family, Plumbagineæ, *Sez. Syst.* Pentandria Monogynia. The root was formerly much esteemed as a cure for the toothache; like the *Pellitory of Spain*, which is also called *Dentaria*.

PLUMBI ACETAS, Pl. superacetas—*p. Acetas dilutum alcoholicum*, *Liquor plumbi subacetatis dilutus*—*p. Acidulus siccus*, *Plumbi superacetas*—*p. Carbonas*, Pl. subcarbonas—*p. Deutoxydum rubrum*, Pl. oxydum rubrum—*p. Iodidum*, see Iodine—*p. Ioduretum*, see Iodine—*p. Oxydum album*, *Plumbi subcarbonas*—*p. Oxydum carbonatum per acidum acetosum*, *Plumbi subcarbonas*—*p. Oxydum fusum*, Pl. oxydum semivitreum.

PLUMBI OXYDUM SEMIVITREUM, *Lithar'gyrus*, *Lithargyrum*, *Lithargyrium*, *Oxydum plumbi fusum*, *Sputa argenti*, *Semi-vitrified oxyd of lead or litharge*, *Calciteosa*, *Cath'mia*, (F.) *Oxide de plomb fondu*, *Oxide de plomb semi-vitreux*, (a yellow protoxyd of lead, prepared by heat and combined with carbonic acid.) It occurs in scales of a whitish-red colour and semi-vitrified. It is employed for pharmaceutical purposes, as in the *Liquor plumbi acetatis*, *Emplastrum plumbi*, &c. Formerly, the *Litharge of gold* (*Chryssitis*), and *Litharge of silver*, *Almariab*, were distinguished in commerce. These

were merely ordinary litharge, resembling gold or silver in colour.

**PLUMBI OXYDUM RUBRUM**, *Min'ium*, *Deutoxydum plumbi rubrum*, *Superoxydum plumbosum*, *Plumbum oxydatum rubrum*, *Red lead*. (F.) *Oxide de plomb rouge*. It is, sometimes, used to kill vermin.

**PLUMBI SURCAR'ONAS**, *Car'bonas plumbi*, *Oxydum plumbi carbonatum per ac'idum acetosum*, *Cerussa alba Nor'ica* seu *Hollan'dica*, *Oxydum plumbi album*, *Cerussa Psimnythion*, *Psimnython*, *Simitium*, *Flake white*, *Blanca*, *Gersu*, *If'ides*, *subcarb'bonate of lead*, *Cerusse*, *White lead*, (F.) *Blanc de plomb*, *Plomb blanc*, (prepared by exposing spiral rolls of lead to the fumes of vinegar, in vessels placed in dung.) It is inodorous; has a sweet taste; is brittle; friable; snow white, and of a minute, sealy texture. It is astringent and sedative, and is sprinkled on parts affected with local inflammation, or to prevent chafing in children. It is, also, used in the formation of ointments and plasters.

**PLUMBI SUPERACE'TAS**, *Cerussa acetata*, *Plumbi acidulus siccus*, *Plumbi acet'as*, *Sal vel sac'charum satur'ni*, *Superc'etate of lead*, *Dulce'do satur'ni*, *Acet'as plum'bicum crystallisatum*, *Sal plumbi*, *Sugar of lead*, *Protoac'etate of lead*, (F.) *Sel ou sucre de Saturne*. (*Plumb. carb. l'ij. Acid acetic. cong. 1½*. Boil the lead with the acid till it is saturated; then strain through paper, and evaporate to a pellicle, that crystals may be formed. Wash the crystals and dry on blotting paper. *Ph. L.*) The acetate of lead has a sweet, styptic taste; a very white colour and silky lustre. It is astringent; and, in weak solutions, cooling and sedative; in strong, stimulant. It is given, internally, in visceral and other hemorrhages, combined with opium, and is used, externally, in solution, in inflammation, burns, bruises, gonorrhœa, &c. Dose, gr. ss to iss.

**PLUMBI TANNAS**, See Tannin.

**PLUMBICUM ACETAS CRYSTALLISATUM**, *Plumbi superacet'as*.

**PLUMBOSUM SUPEROXYDUM**, *Plumbi oxydum rubrum*.

**PLUMBUM**, *Molybdos*, *Saturn'us*, *Capricor'nus*. (F.) *Plomb*. Lead. A solid metal, of a bluish white colour; more malleable than ductile; soft enough to be scratched by the nail; very fusible and oxidizable, when heated in the air; and existing, in nature, under a number of different shapes; the principal of which are those of sulphuret and oxyd. s. p. 11.352.

Its use is to form oxyds and salts. In its metallic state, it has no action upon the body; but, when oxydized or united with an acid, it acts, in large doses, as a powerfully astringent poison.

**PLUMBUM ALBUM**, *Tin*—p. Candidum, *Tin*, —p. *Cinereum*, *Bismuth*, *subnitrate of*, —p. *Oxydatum rubrum*, *Plumbi oxydum rubrum*.

**PLUNKETT'S OINTMENT**. This empirical cancer remedy consists of *Arsenious acid*, *Sulphur*, and the powdered flowers of the *Ranunculus flammula*, and *Cotula fetida*;—levigated and made into a paste with the white of egg, and applied, on a piece of pig's bladder, to the surface of the cancer.

**PLUTEA**. Avicenna gives this name to

duplicatures of the dura mater, such as the *Fulx cerebri*.

**PNEUMATHORAX**, *Pneumothorax*.

**PNEUMATIC PHYSICIANS**. Name given to a sect of physicians, at the head of whom was Athenæus, who made health and disease to consist in the different proportions of an element—which they called *Pneuma*, *πνευμα*—to those of the other elementary principles. This *πνευμα* was a fancied spiritual principle, which the Stoics regarded as an element, different from water, air, earth and fire;—the sole elementary principles previously admitted.

**PNEUMATICA**, from *πνευμα*, 'air.' Appertaining to the breathing. Diseases of the respiratory function;—the second class in Good's system of nosology.

**PNEUMATOCELE**, *Physocele*.

**PNEUMATO'DES**, from *πνευμα*, 'wind,' and *ειδος*, 'resemblance.' One, distended with air, or who breathes with difficulty, owing to an accumulation of flatus in the digestive tube; or, according to others, owing to emphysema.

**PNEUMATOM'PHALUS**, from *πνευμα*, 'flatus,' and *ομφαλος*, 'the umbilicus.' Umbilical intestinal hernia, containing a considerable quantity of flatus.

**PNEUMATO'SIS**, from *πνευμα*, 'air,' *flatus*. (F.) *Maladies ventueuses*. Flatulent distention of the stomach. Sauvages uses the word synonymously with emphysema. Frank comprises under it all flatulent diseases.

**PNEUMATOSIS**, *Emphysema*—p. *Abdominis*, *Tympanites*.

**PNEUMOGAS'TRIC**, *Pneumogas'tricus*; and from *πνευμων*, 'the lung,' and *γαστρις*, 'the stomach.' Chaussier gives this name to the *Eighth pair of nerves*, *Par vagum*, *Pars vaga*, *Nervus vagus*, *Middle sympathet'ic*; because it is distributed especially to the organs contained in the chest and abdomen. This nerve arises from behind the eminentiæ olivariæ and near the corpora restiformia by one or two rows of filaments, regularly arranged. These filaments unite to form a flat cord, which issues from the cranium by the foramen lacerum posterius, behind the glosso-pharyngeal nerve. At its exit from the cranium, the pneumogastric nerve has the appearance of a very compact plexus. It then descends along the neck, deeply seated on the outside of the carotid artery and the internal jugular vein. When it has attained the lower part of the neck it enters the chest, gliding behind the subclavian vein, and passing on the right side, in front of the subclavian artery, and, on the left, before the arch of the aorta. It proceeds, at first, backwards, increasing in size. Afterwards, it passes from behind the bronchi to the œsophagus, which it accompanies through the diaphragm, and terminates on the stomach.

In the neck, the pneumogastric nerve anastomoses with the spinal, glosso-pharyngeal, great hypoglossal, and great sympathetic nerves; and furnishes, 1. a *pharyngeal branch*, 2. a *superior laryngeal*, 3. *cardiac branches*. In the chest, it gives off, 1. *The inferior laryngeal or recurrent*, 2. *The pulmonary plexus*, and 3. *The œsophageal branches*.

On entering the abdomen, the œsophageal branches, which terminate the pneumogastric,

are distributed upon the stomach; and give numerous filaments to that viscus, to the hepatic, celiac, gastro-epiploic, and solar plexuses. Some go, also, to the pancreas, liver, gall-bladder, duodenum, &c.

**PNEUMOGRAPHY**, *Pneunogra'phia*; from πνευμων, 'the lung,' and γραφη, 'a description.' The part of anatomy that describes the lungs.

**PNEUMOLOGŶ**, *Pneumolo'gia*; from πνευμων, 'the lung,' and λογος, 'a discourse.' An anatomical treatise of the lungs. Anatomical doctrine of the lungs.

**PNEUMON**, Pulmo.

**PNEUMONIA**, *Empres'ma Pneumonitis*, *Pneumonia*, *Peripneumonia*, *Pneumonia peripneumonia*, *Pneumonitis*, *Pulmonia*, *Pulmonaria*, *Inflammatio pneumonica*, *I. pectoris acuta*, *Inflammation of the lungs*, (F.) *Fievre peripneumonique*. The chief symptoms of pneumonia are:—pyrexia, accompanied by pain,—sometimes obtuse, at others pungent,—in some part of the thorax; pulse more or less quick and hard, according to the violence and extent of the local disorder; pain aggravated by the cough, which with dyspnoea exists throughout the disease. At first, the expectoration is difficult and painful; but in the course of a few days it becomes free, and the oppression of breathing is mitigated.

When the inflammation, instead of going off by resolution, passes on to suppuration, rigors are experienced; the respiration becomes more oppressed but less painful, and a sense of weight is felt in one of the pleurae.

Pneumonia may, also, terminate by gangrene (but this rarely happens;) by induration and by hepatization.

*Physical Signs.* First stage. Diminution of the sound is generally observed over the affected part on percussion; auscultation exhibits an equal, dry, crepitating *râle*, which is best heard at the close of a deep inspiration, and on coughing. The respiratory murmur is intermingled with the crepitant *râle*, or it may be absent. In the neighbourhood of the affected parts it is natural or puerile. The voice and cough are rather more resonant than usual.

2. When *Hepatization* has occurred, the motion of the affected side is impeded, and immediately above the sternum and in the corresponding triangular space on either side, there is often an evident depression. Percussion is dull over the affected part in every position of the patient. On auscultation, the crepitation is found to be replaced by bronchial respiration. The respiratory murmur is louder in the other portions of the lung, the voice and cough are more resonant, and the heart's action is more distinct.

3. When *Suppuration* supervenes, the same signs persist; but usually the voice and cough are less resonant, and a coarse mucous *râle* is heard. When gangrenous or suppurative cavities are formed, they present the ordinary signs. The prognosis, in pneumonia, must be guarded. It is not a disease, which we can always subdue.

Great extent of inflammation; very considerable oppression; orthopnoea, and difficult expectoration are unfavourable symptoms.

The most active treatment is of course neces-

sary. General bleeding forms the sheet anchor,—employed so as to make a decided impression on the system, and repeated, if necessary; local blood-letting; nauseating doses of antimonials; purgatives; and, when the violence of the inflammation has been got under,—counter-irritants, &c. Chronic pneumonia sometimes succeeds the acute, and, at others, occurs accidentally. It must be managed on general principles. Small bleedings, especially locally; and counter-irritants of all kinds are indicated.

**PNEUMONIA, BILIOUS.** Inflammation of the lungs, accompanied by gastric fever.

**PNEUMONICA.** Diseases affecting the lungs, their membranes or motive power; characterized by irregular, impeded, or painful respiration.

The second order of the class Pneumatica of Good.

**PNEUMONICULA**, from πνευμων, 'the lung.' Diminutive of pneumonia. A slight inflammation of the lung.

**PNEUMONICUS**, Pulmonic.

**PNEUMONIE DES AGONISANTS**, *Pneumonie hypostatique*. The hyperæmic engorgement, which often takes place in the lungs during the last moments of life, has been so termed.—*Laënnec*, *Piorry*. It would seem to be hyperæmia rather than inflammation.

**PNEUMONITIS**, Pneumonia.

**PNEUMONOSSES**, from πνευμων, 'the lung.' Diseases of the lungs.

**PNEUMO-PERICARDIUM**, from πνευμα, 'air,' and περικαρδιον, 'pericardium.' *Laënnec* designates, under this name, the effusion of air into the cavity of the pericardium.

**PNEUMOPLEURESIS**, Pleuritis.

**PNEUMOPHŒ**, Phthisis pulmonalis.

**PNEUMORRHAGIA**, Hæmoptysis—p. Interna, Hæmatothorax.

**PNEUMOSIS**, from πνευμων, 'the lung.' A term, under which Alibert comprises every affection of the lungs.

**PNEUMOTHORAX**, *Pneumathorax*, *Empres'ma pectoris*, *Asthma acutum*, *A. emphysematicum*, *Dyspnoea pneumatica*, *D. physiothoracica*, *Physiothorax*, from πνευμων, 'the lung,' and θωραξ, 'the thorax.' An accumulation of air in the cavity of the pleura. A complaint generally sudden in its invasion and fatal in its character. In many instances, along with the air a liquid is effused. The disease may be spontaneous and simple, but in a large proportion of cases it is complicated with pleurisy and pulmonary tubercles. The signs vary according as there is, or is not, a communication between the pleura and the bronchia. The affected side gives a hollow tympanitic sound, even where the thickness of the parietes of the thorax is great.

When the effusion is considerable, the affected side is dilated, but there is no *râle* of any kind. When a gaseous and a liquid effusion are present at the same time, the sound on percussion is found to be clear at the superior part of the thorax, but dull inferiorly; hence, by varying the position of the patient, and by consequence that of the contained fluids, the seats of the clear and the dull sound can be varied.

When the gaseous effusion is owing to a fistulous communication between the pleura and

bronchia, the metallic respiration and resonance are heard; and if there be both gaseous and liquid effusion with a fistulous communication, in addition to these signs there is the *Tintement métallique*.

The presence of liquid can always be ascertained by succussion. See Emphysema of the Lungs.

**PNEUMOT'OMY**, *Pneumoto'mia*, from πνευμον, 'the lung,' and τέμνω, 'I cut.' Dissection of the lungs.

**PNEUSIS**, Respiration—*p.* Tussis, Tussis.

**PNIGALION**, Incubus.

**PNIGMOS**, Orthopnœa, Strangulation.

**PNIGOPHOBIA**, Suffocation.

**PNIX**, Orthopnœa, Strangulation.

**PNOË**, Aura.

**POCIE DES EAUX**. See Parturition.

**POCK, KINE**, Vaccina.

**POCULUM AMATORIUM**, Philter—*p.* Emeticum, Goblet, emetic.

**POD'AGRA**, *Podorrhœu'ma*, from πους, 'the foot,' and ἀγρᾶ, 'seizure.' Pain which attacks the feet. Gout, (q. v.) situate in the articulations of the foot. It has, also, been used, in a more extensive signification, synonymously with *gout*.

**PODAGRA ABERRANS**, gout (wandering)—*p.* Arthritis, Gout—*p.* Retrograda, Gout, (retrograde.)

**PODALGIA**, Gout.

**PODALYRIA TINCTORIA**, Sophora tinctoria.

**PODARTHROC'ACĒ**, from πους, 'the foot,' ἀρθρον, 'an articulation,' and κακος, 'bad.' Caries of the articulation of the foot.

**PODENCEPH'ALUS**, from πους, 'the foot,' and κεφαλή, 'the head.' A monster whose brain is placed outside the skull, and seems to be supported on a pedicle, which traverses the summit of the skull.—*G.* St. Hilaire.

**PODEX**, Anus.

**PODOL'OGY**, *Podol'gia*, from πους, 'the foot,' and λόγος, 'a discourse,' a description of the foot; a treatise on the foot.

**PODOPHYLLUM PELTA'TUM**, *Podophyllum*, *May apple*, *Mandrake*. Family, Podophyllæ. *Sex. Syst.* Polyandria Monogynia. A common plant throughout North America. The fruit is eatable and esteemed by many. The leaves are said to be poisonous. The root is purgative, in the dose of 20 grains. It has, also, been used as an anthelmintic.

**PODORRHEUMA**, Podagra.

**PODOTHE'CA**, from πους, 'a foot,' and ἑλκη, 'a receptacle,' 'a sheath.' The cuticle of the foot, an anatomical preparation. *Chirothel'ca*, has been used for the cuticle of the hand.

**POELETTE**, Cup.

**POGON**, Beard.

**POGONIASIS**, *Pogonia*, from πωγων, 'the beard.' A female beard. Also, great strength or quantity of beard.

**POHON ANTIAR**, Upas.

**POIDS ET MÉSURES**, Weights and measures.

**POIGNÉE**, Manipulus.

**POIGNET**, Carpus.

**POIL**, Hair.

**POILETTE**, Cup.

**POINT, BLISTERING**. A name given, by Rush, to a particular period in the course of a continued fever, intermediate between its stage of high excitement and collapse, in which blisters will usually produce unequivocally good effects.

**POINT DE COTÉ**, Pleurodynia.

**POINTS LACRYMAUX**, Lachrymalia puncta.

**POIRE**. See *Pyrus communis*.

**POIREAU**, Allium porrum.

**POIRIER**, *Pyrus communis*.

**POIS À CAUTÈRE**, see *Fonticulus—p.*

*Chiche*, Cicer arietinum—*p.* à *Gratter*, Dolichos pruriens—*p.* *Patate*, Dolichos tuberosus.

**POISON**, *Tox'icum*, *Vene'num*, *Virus*, *Dele'terium*. A generic name for all substances, which, when introduced into the animal economy, either by cutaneous absorption, respiration, or the digestive canal, act in a noxious manner on the vital properties or the texture of an organ.—

Poisons exist in the three kingdoms of nature, but those which proceed from animals are often called *venoms*, as the venom of the viper, scorpion, tarantula, &c., whilst those, that are the products of disease have the name *virns*. In common parlance, therefore, *poison* is restricted to deleterious articles, furnished by the mineral and vegetable kingdoms. Orfila has divided poisons into four classes.

1. **ACRID, IR'RITATING, CORRO'SIVE, or ESCHAROT'IC**, such as the concentrated acids and alkalis; mercurial, arsenical, cupreous, and antimonial compounds, cantharides, &c.

2. **NARCOT'IC**;—those that act particularly upon the brain; as opium, hyoscyamus, &c., but without inflaming the organ with which they come in contact.

3. **NARCOT'ICO-ACRID or ACRONARCOT'IC**;—those that act on the brain, but, at the same time, inflame the parts to which they are applied; as aconite, belladonna, &c.

4. **SEPTIC or PUTRES'CENT**;—those furnished by the animal kingdom. See *Venom* and *Virus*.

Various classifications, of a similar character, have been recommended by different Toxicologists; but they are liable to the objection, that they throw substances together, whose physiological action on the system is very different. It is, indeed, difficult to avoid unnatural compression of matters into places not properly belonging to them, in all such arrangements.

The following Table, which exhibits a *coup d'œil* of the chief poisons, with every circumstance of importance connected with them, is not free from these objections:—The division of Mineral Poisons has been revised—rewritten, indeed—by the Author's friend, Professor W. R. Fisher, late of the University of Maryland, now of the College of Pharmacy of Philadelphia.

TABLE EXHIBITING THE SYMPTOMS, TREATMENT, AND MODES OF DETECTING THE VARIOUS POISONS, MINERAL VEGETABLE AND ANIMAL.

*N. B. In all cases the Stomach-Pump should be used as soon as possible.*

## I. INORGANIC POISONS.

| POISONS.   | SYMPTOMS.  | TREATMENT.   | TESTS.   |
|--|--|--|--|
| <b>ACIDS.</b>  |  |  |  |
| <i>Acetic Acid.</i>  | The acids, generally, are strong corrosive poisons. Sour, acid taste, burning in the throat, which is increased by pressure, swallowing or coughing; eructation, and excruciating pain in the stomach; more or less corrugation of the lining membranes of the mouth and <i>prima viæ</i> ; excoriation about the mouth or such other parts of the skin as the acid may have touched. The matter vomited effervesces with carbonate of lime. The countenance becomes glazed, extremities cold and clammy; convulsions and death. Nitric acid occasions yellow stains, and sulphuric acid, black. | The carbonates of soda, potassa, lime and magnesia, are all antidotes to the acids; calcined magnesia also. They are to be used with the following restrictions; for the acetic, citric, muriatic, sulphuric, and tartaric acids, they may be used indiscriminately. For the nitric and oxalic, carbonates of magnesia and lime can alone be employed with safety. In the case of sulphuric acid, water should not be drunk on account of the great heat, which is produced by their mixture. Subsequent inflammation to be treated by ordinary means. | <i>Sulphuric acid</i> is known by a white precipitate with any salt of baryta, insoluble in nitric acid.<br><i>Muriatic acid</i> is known by a white precipitate with nitrate of silver, insoluble in nitric acid, which turns black by the action of light.<br><i>Nitric acid</i> gives rise to orange-coloured fumes, when copper is placed in it, and an ability to dissolve gold when mixed with muriatic acid.<br><i>Acetic acid</i> exhales the odour of vinegar.<br><i>Citric acid</i> blackens when heated.<br><i>Tartaric acid</i> precipitates crystals, with a solution of potassa; and a white precipitate is thrown down by lime-water.<br><i>Oxalic acid</i> gives a white precipitate with lime water, which, when heated, is converted into carbonate of lime. |
| <i>Citric Acid.</i>  |  |  |  |
| <i>Muriatic Acid.</i>  |  |  |  |
| <i>Nitric Acid.</i>  |  |  |  |
| <i>Sulphuric Acid.</i>   |  |  |  |
| <i>Tartaric Acid.</i>  |  |  |  |
| <i>Oxalic Acid.</i>  |  |  |  |
| <i>Prussic Acid.</i>   | Is a sedative poison; nausea, giddiness, debility, hurried pulse, weight and pain in the head; eructations having the flavour of the acid; spasms, tetanus, contractile pupil; convulsions, death.   | The carbonates of the alkalis and of magnesia and lime have the inconvenience, that a large quantity of gas is extricated in the stomach.<br>Ammonia is an antidote; but it should not be employed in a very concentrated form. Liquid chlorine has also been found efficacious. The cold <i>douche</i> to the head has been recommended.  | <i>Prussic acid</i> exhales the odour of peach kernels; forms a white precipitate with nitrate of silver; neutralized with an alkali, gives a blue precipitate with the per-salts of iron.   |
| <i>Oil of Bitter Almonds.</i>  |  |  |  |
| <i>Laurel Water.</i>   |  |  |  |
| <b>ALKALIES and their SALTS.</b>                                     | Violent caustic, acid taste; great heat in the throat, with destruction of its lining membrane; difficult and painful deglutition; vomiting of bloody matter, which turns the yellow of turmeric brown; acute pain in the stomach; cold sweats, weakness, hic-cough; violent colic pains, with purging of bloody stools and membranous flakes; death.  | The vegetable acids, such as vinegar, lemon juice, citric and tartaric acid in solution are antidotes to the alkalis and their carbonates. The fixed oils, such as castor, linseed, almond and olive, form soaps with the free alkalis, and therefore destroy their caustic effects.   | The alkalis are known by their action on turmeric paper; restoring the colour of litmus, which has been reddened by an acid.<br><br>Carbonates are known by their effervescence with an acid; some of them affect the turmeric paper. Sal ammoniac gives out the pungent odour of ammonia, when mixed with quicklime.  |
| AMMONIA, <i>Strong Liquor,</i> or <i>Water of.</i>                   |  |  |  |
| <i>Muriate of Ammonia</i> or <i>Sal Ammoniac.</i>                    |  |  |  |
| <b>POTASSA.</b>  |  |  |  |
| <i>Caustic Potash,</i> and <i>Liquor Potassæ.</i>                    |  |  |  |
| <i>Carbonate of,</i> or <i>Pearl Ash,</i> and <i>Salt of Tartar.</i> |  |  |  |
| <i>Nitrate of Potassa,</i> or <i>Salt-petre.</i>                     | The nitrate of potassa will not manifest the effect with turmeric paper. The carbonates when vomited, will effervesce, with acids; and the liver of sulphur will give rise to eructations of sulphuretted hydrogen.  | Poisoning by nitrate of potassa to be treated on general antiphlogistic principles, mucilaginous drinks.<br>Liver of sulphur, is said to be decomposed and neutralized by common salt. The liquid chloride of soda will also decompose it.   | Nitrate of potassa decrepitates and deflagrates when thrown on hot coals.<br>Liver of sulphur emits the odour of sulphuretted hydrogen when dissolved, or when treated with an acid.   |
| <i>Sulphuret of,</i> or <i>Liver of Sulphur.</i>                     |  |  |  |
| <b>SODA.</b>   |  |  |  |
| <b>EARTHS and COMPOUNDS.</b>   |  |  |  |
| <b>BARYTA.</b>   |  |  |  |
| <i>Baryta.</i>   |  |  |  |
|  | Analogous with those of the corrosive metals. Violent burning in the stomach, vomiting, gripes, diarrhæa: excessive muscular debility, headache, convulsions, death. Lime differs from baryta in being a pure irritant.  | The sulphates of soda and magnesia are prompt and effective antidotes to all the poisonous salts of baryta. Phosphate of soda will also counteract their effects. Lime may be neutralized by dilute acids. Carbonic acid, in soda wa-  | Baryta and its salts invariably give a white precipitate insoluble in acid, with a soluble sulphate.<br><br>Lime, when dissolved, gives a white precipitate with oxalic acid. Also with carbonic acid, or a soluble carbonate. The same of baryta.   |
|  |  |  |  |

| POISONS.   | SYMPTOMS.  | TREATMENT.  | TESTS.   |
|--|--|---|--|
| <p><i>Muriate of Baryta.</i><br/> <i>Nitrate of Baryta.</i><br/>           LIME.</p>   |  | <p>ter, effervescing draught or yeast, it is supposed would answer a good purpose. The fixed oils may be employed either for baryta or lime, when not in a compound state.</p>  |  |
| <p><b>ALCOHOL.</b><br/> <i>Brandy, Wines, and all Spirituous Liquors.</i></p>  | <p>Intoxication, and when taken very freely, complete insensibility, with apoplexy or paralysis of one side; the countenance swollen and of a dark-red colour; the breathing difficult, and often stertorous, with a peculiar puffing out of the lips; the breath smells of liquor, which will distinguish the symptoms from those of spontaneous apoplexy.</p>                            | <p>A powerful emetic of white vitriol, or tartar emetic, should be got into the stomach as soon as possible; and if the person has lost the power of swallowing, a flexible catheter or tube should be the means of conveying it thither. The vomiting should be encouraged as much as possible with warm water, and large and active gylsters of salt and water should be thrown up. The patient should be placed erect, and if the countenance and other appearances are not improved after these means have been used, the jugular vein may be opened, and cold wet cloths applied to the head, particularly if the body is hotter than natural. If the extremities become cold, warmth and friction should be perseveringly used.</p> |  |
| <p><b>EMPYREUMATIC OILS.</b><br/> <i>Creasote.</i><br/> <i>Dippel's Animal Oil.</i><br/> <i>Oil of Tur.</i><br/> <i>Oil of Tobacco.</i><br/> <i>Oil of Turpentine.</i></p>               | <p>General action that of irritant poisons. Burning pain, vomiting, pungent taste, purging, &amp;c. The oils of turpentine and tobacco affect the nervous system; the peculiar odour of each oil will be manifested in the matter vomited.</p>   | <p>Creasote is immediately coagulated by albumen. Dippel's animal oil may be counteracted with dilute acids and the fixed oils. The other oils have no particular antidotes, and their effects must, therefore, be counteracted upon general principles.</p>  | <p>No better mode of recognising these substances exists, than that derived from their peculiar odour. Dippel's oil has the pungent odour of ammonia; creasote and oil of tar, a peculiar smell of smoke; the odour of tobacco and turpentine are well known.</p>                              |
| <p><b>GASES.</b><br/> <i>Carbonic Acid or Fixed Air.</i><br/> <i>Carbonic Oxide.</i><br/> <i>Fumes of Burning Charcoal.</i><br/> <i>Chlorine.</i><br/> <i>Sulphuretted Hydrogen.</i></p> | <p>Chlorine produces, when inhaled, violent irritation of the organs of respiration; cough, bloody expectoration, inflammation of the lungs, and permanent pulmonary disease. The other gases, although producing some effect on the respiratory organs, act as poisons in consequence of their sedative agency. The symptoms, therefore, are those of apoplexy or narcotic poisoning.</p> | <p>The antidotes to chlorine, are the cautious inhalation of ammonia, or sulphuretted hydrogen. The inflammatory symptoms from chlorine to be treated on general principles. For the other gases, cold effusions to the head, blood-letting, artificial respiration.</p>  | <p>Chlorine is recognised by its peculiar odour and bleaching properties. Sulphuretted hydrogen by its fetid smell, and the rapid blackening of lead. Carbonic acid by its occasioning turbidness in lime-water placed in its atmosphere. Carbonic oxide, by the blue colour of its flame.</p> |
| <p><b>IODINE.</b><br/> <i>Iodide of Potassium.</i></p>   | <p>Irritant symptoms: burning pain in the throat, lacerating pain in the stomach and fruitless efforts to vomit; suffusion of the eyes; excessive pain and tenderness of the epigastrium.</p>  | <p>Iodine combines with starch and forms an insoluble compound. The prompt administration of starch, wheat flour, or other vegetable matter containing fecula, beat up in water, is recommended. Iodide of potassium has no antidote. Vomiting should be promoted by draughts of warm water, and inflammation subdued by general treatment.</p>   | <p>Iodine is known by its odour, and the formation of a blue precipitate when brought in contact with a cold solution of starch. Iodide of potassium gives a crystalline precipitate, with tartaric acid in excess. The supernatant fluid will give the blue colour to starch.</p>             |

| POISONS.   | SYMPTOMS.   | TREATMENT.  | TESTS.   |
|--|---|---|--|
| <p><b>METALS.</b><br/>—<br/><b>ANTIMONY.</b><br/><i>Tartar Emetic.</i><br/>—<br/><i>Muriate,</i> or<br/><i>Butter of Anti-</i><br/><i>mony.</i><br/><i>Oxide of Anti-</i><br/><i>mony.</i><br/>—<br/><i>Glass of Anti-</i><br/><i>mony.</i></p>  | <p>Vomiting. If vomiting do not occur promptly, violent irritant effects are produced. Burning pain in the pit of the stomach; purging; colicky pains, sense of tightness in the throat, violent cramps; repeated recurrence of vomiting.</p>   | <p>If vomiting have not been produced, it should be brought about, by tickling the fauces, and administering copious draughts of warm water. Astringent infusions, such as of galls, oak bark, Peruvian bark, act as antidotes, and should be given promptly: powdered yellow bark may be used, until the infusion is prepared.</p>   | <p>Antimony in solution is best distinguished by the peculiar orange-red precipitate, which it forms with sulphuretted hydrogen or solutions of the hydrosulphates. Free alkalis produce white precipitates. The muriate is known by a white precipitate, when it is poured into water. In its solid forms, it may be known by the formation of white fumes, when heated, which reddens litmus. It may also be converted into muriate, and then precipitated by adding water.</p>  |
| <p><b>ARSENIC.</b><br/><i>Arsenious Acid,</i><br/><i>or White Arsenic.</i><br/>—<br/><i>Orpiment,</i> or<br/><i>Yellow Sulphuret of Arsenic.</i><br/>—<br/><i>King's Yellow.</i><br/>—<br/><i>Rcalgar, or Red Sulphuret of Arsenic.</i><br/>—<br/><i>Fly Powder.</i><br/>—<br/><i>Fowler's Solution.</i><br/>—<br/><i>Arsenical Paste.</i><br/>—<br/><i>Arsenical Soap.</i><br/>—<br/><i>Arsenite of Copper.</i><br/><i>Scheele's Green.</i></p> | <p>Violent burning pain in the region of the stomach and bowels; tenderness on pressure; retching, vomiting; sense of dryness and tightness in the throat; thirst; hoarseness and difficulty of speech; the matter vomited greenish or yellowish, sometimes streaked with blood; diarrhoea; tenesmus; sometimes excoriation of the anus; urinary organs occasionally affected with violent burning pains and suppression; convulsions and cramps; clammy sweats; lividity of the extremities; countenance collapsed; eyes red and sparkling; delirium; death.</p> | <p>The hydrated peroxide of iron diffused through water; or the precipitated carbonate; or the rubigo ferri, in very fine powder, to be administered every five or ten minutes, until relief is obtained. This is particularly efficacious when the <i>white arsenic</i> has been swallowed. If the arsenic have been taken in the form of Fowler's Solution, lime-water in copious draughts, may be given. For either of the other forms, emetics of sulphate of zinc; diluents; demulcents, such as flaxseed tea, infusion of slippery elm, &amp;c. Counter-irritants may be used to relieve the spasm, and violent pain in the stomach. Bleeding, as promoting absorption, should not be employed until the stomach is completely evacuated.</p> | <p>If the suspected substance can be obtained free from organic matter, the presence of arsenic may readily be shown by boiling it in distilled water, filtering, and testing with, 1st. Ammoniacal sulphate of copper. 2d. Ammoniacal nitrate of silver. 3d. Sulphuretted hydrogen gas. The first will produce a <i>green</i> precipitate; second, a <i>pale yellow</i> precipitate; third, a <i>bright yellow</i> precipitate, if arsenic be present. A portion of the powder, or one of these precipitates carefully and thoroughly dried, is then to be mixed with charcoal and exsiccated carbonate of soda, to be placed in a small glass tube closed at one end, and then to be heated to a red heat in the flame of a lamp. The arsenic will be reduced, and sublime in the upper part of the tube—forming a dark crust, having considerable lustre on its exterior surface, resembling polished steel. By gently heating this crust in a very small flame, crystals of white arsenic will be formed, having a high adamantine lustre.</p> |
| <p><b>BISMUTH.</b><br/><i>Nitrate of Bismuth.</i><br/>—<br/><i>Pearl Powder.</i><br/>—<br/><i>Oxide of Bismuth.</i></p>  | <p>Similar to those produced from other irritant poisons. General inflammation of the whole alimentary canal; suppression of urine; hiccup, disagreeable metallic taste; vomiting; cramps; delirium; death.</p>   | <p>Milk and sweet mucilaginous drinks are recommended. Lecches, general bleeding, glisters: fomentations to be employed on the general principles of treatment for inflammatory symptoms.</p>   | <p>Bismuth is known by the formation of a white precipitate when its solution in nitric acid is poured into water; and by the formation of a black precipitate with sulphuretted hydrogen gas, and hydrosulphates in solution.</p>   |
| <p><b>COPPER.</b><br/><i>Sulphate of Copper.</i><br/><i>Blue Vitriol.</i><br/><i>Acetate of Copper.</i><br/>—<br/><i>Verdigris.</i><br/><i>Carbonate of Copper.</i><br/>—<br/><i>Blue Verditer.</i><br/>—<br/><i>Arsenite of Copper.</i><br/><i>Scheele's Green.</i><br/>—<br/><i>Food cooked in dirty copper vessels, or Pickles made green by copper.</i></p>  | <p>Very similar to those produced by arsenic. Coppery eructations and taste. Fatal cases are generally terminated by convulsions, palsy, insensibility.</p>   | <p>Albumen to be administered in either of its forms, which can be most readily obtained, as milk or whites of eggs. Vinegar should not be given. The inflammatory symptoms are to be treated on general principles, and so of the nervous.</p>   | <p>The presence of copper is readily shown in solutions. By ammonia a beautiful bluish precipitate is thrown down, which dissolves in an excess of the precipitant, and the solution has a rich blue colour. A bright iron bar, introduced into solutions of copper, occasions the separation of the copper, in a metallic form, which deposits itself upon the iron.</p>  |

| POISONS.  | SYMPTOMS.   | TREATMENT.  | TESTS.   |
|---|---|---|--|
| <b>GOLD.</b>  |   |   |  |
| <i>Muriate of Gold.</i>   | Very analogous to those of other irritant poisons. This substance communicates a pink stain to the flesh, and patches of that colour may be found about the lips, and inside the mouth.   | The salts of gold are decomposed, by sulphate of iron; and this has, therefore, been recommended as an antidote. Inflammatory symptoms to be treated on general principles.   | Muriate of gold is very readily decomposed and the gold separated in a metallic state. Protosulphate of iron, nitrate of silver and protomuriate of tin, all answer this purpose. The precipitated powder will be found insoluble except in nitro-muriatic acid.   |
| <i>Fulminating Gold.</i>  |   |   |  |
| <b>IRON.</b>  |   |   |  |
| <i>Sulphate of Iron.</i>  | Symptoms of irritant poisoning; colic pains, constant vomiting and purging. Violent pain in the throat, tension of the epigastrium, coldness of the skin and feebleness of the pulse.   | Carbonate of soda would be a most excellent antidote to either of these substances. Mucilaginous drinks might also be employed; and particular symptoms relieved by general treatment.  | Iron is recognised by a bluish-black precipitate, with tincture of galls; rich blue, with prussiate of potassa; and a greenish or reddish precipitate, with the free alkalies or their carbonates.   |
| <i>Copperas.</i>  |   |   |  |
| <i>Green Vitriol.</i>   |   |   |  |
| <i>Muriate of Iron.</i>   |   |   |  |
| <b>LEAD.</b>  |   |   |  |
| <i>Acetate of Lead.</i>   | Irritation of the alimentary canal; spasm; nervous symptoms, paralysis either partial or complete. When taken for some time in small quantity, violent and obstinate colic; rigidity of abdominal muscles, cramps; remissions of pain; obstinate constipation, urine diminished, saliva increased; countenance anxious and gloomy. If relief is not promptly obtained, giddiness, debility, torpor, coma, convulsions and death. The paralysis affects generally the upper extremities. | Sulphate of magnesia and phosphate of soda, are both good antidotes for the soluble salts of lead. For the solid forms, dilute sulphuric acid may be drunk. These are applicable to the irritant forms of poisoning by lead. In the chronic form or colica pictonum, purgatives and anodynes are resorted to; venesection; and external applications to relieve the cramps. The use of strychnine is recommended for the paralysis. | Soluble salts of lead yield a white precipitate with sulphates and carbonates in solution. Salts of chromic acid and hydriodate of potassa occasion a yellow precipitate. Sulphuretted hydrogen, a black precipitate. If solid, the lead may be converted into a state of solution by nitric acid, and the dilute solution be tested as above.   |
| <i>Sugar of Lead.</i>   |   |   |  |
| <i>Carbonate of Lead.</i>   |   |   |  |
| <i>White Lead.</i>  |   |   |  |
| <i>Red Oxide, or Red Lead.</i>  |   |   |  |
| <i>Litharge.</i>  |   |   |  |
| <i>Wines sweetened by Lead.</i>   |   |   |  |
| <i>Water which has been kept in leaden vessels.</i>                     |   |   |  |
| <i>Acid food, cooked, or left standing in vessels glazed with lead.</i> |   |   |  |
| <b>MERCURY.</b>   |   |   |  |
| <i>Corrosive Sublimite.</i>   | Violent symptoms of irritant poisoning: harsh metallic, astringent taste; burning pain in the stomach; vomiting and purging frequently of bloody matter; often irritation of the urinary organs and sometimes suppression; tightness and burning in the throat, occasionally so great as to prevent speech; countenance not always pale, but sometimes flushed; tendency to doze, stupor, convulsions and death.  | Albumen in some form must be promptly administered; either white of eggs beaten up with water, milk, or wheat flour beaten up. The inflammatory symptoms to be counteracted by the usual means.   | The free alkalies differ in their precipitates from solutions of mercury. Potassa gives, with corrosive sublimate, a yellowish one; ammonia, a white; lime-water, an orange; and sulphuretted hydrogen, a black. A drop of the solution placed on a piece of gold, and touched with a knife or key, reduces the mercury which amalgamates with the gold, producing a white spot. The nitrate of mercury gives a black precipitate with the free alkalies. All the solid forms of mercury are volatile, and may be reduced by heating them in a glass tube with charcoal and carbonate of soda—when the metallic mercury will sublime, and may be collected in a globe. |
| <i>Cyanuret of Mercury.</i>   |   |   |  |
| <i>Nitrate of Mercury.</i>  |   |   |  |
| <i>White Precipitate.</i>   |   |   |  |
| <i>Red Oxide, or Red Precipitate.</i>                                   |   |   |  |
| <i>Sulphate, or Turbith Mineral.</i>                                    |   |   |  |
| <i>Vermilion, or Red Sulphuret.</i>                                     |   |   |  |
| <b>SILVER.</b>  |   |   |  |
| <i>Nitrate of Silver, or Lunar Caustic.</i>                             | Those of other irritant poisons.  | Muriate of soda or common salt immediately decomposes this substance and destroys its activity. Antiphlogistic treatment is to be employed for the inflammatory symptoms.   | Nitrate of silver is distinguished by the formation of a white precipitate insoluble in nitric acid, with muriate of soda; a gray precipitate with ammonia, which is redissolved in an excess of ammonia; yellow precipitate with phosphate of soda. The precipitate of chloride of silver, obtained by adding muriate of soda to the nitrate of silver, is readily reduced, and the metallic silver obtained, by mixing it with dilute sulphuric acid and granulated zinc.  |

| POISONS.   | SYMPTOMS.   | TREATMENT.  | TESTS.  |
|--|---|---|---|
| <p><b>TIN.</b></p> <p><i>Muriate of Tin.</i></p> <p><i>Solution of Tin, used by Dyers.</i></p> <p><i>Oxide of Tin, or Putty Powder.</i></p>  | <p>The same as those from other irritant poisons, and a peculiar tanned appearance of the villous coat of the stomach.</p>  | <p>Milk to be given copiously, and the subsequent treatment to be regulated by the symptoms.</p>  | <p>The muriatic precipitates vegetable colouring matter; also albumen and gelatine. The white oxide is precipitated from its solution by free alkalies; with sulphuretted hydrogen gas, a brown precipitate.</p>                      |
| <p><b>ZINC.</b></p> <p><i>Oxide of Zinc.</i></p> <p><i>Sulphate of Zinc.</i></p> <p><i>White Vitriol.</i></p> <p><i>Acetate of Zinc.</i></p> | <p>Violent vomiting; astringent taste, burning pain in the stomach; pale countenance; cold extremities; dull eyes; fluttering pulse. Death seldom ensues, in consequence of the emetic effects.</p> | <p>The vomiting may be relieved by copious draughts of warm water. Carbonate of soda, administered in solution, will decompose the sulphate of zinc. Milk and albumen also act as antidotes. General principles to be observed in the subsequent treatment.</p> | <p>A white precipitate is thrown down by the free alkalies from the soluble salts of zinc, which becomes yellow when strongly heated—recovering its white colour on cooling. Sulphuretted hydrogen occasions a white precipitate.</p> |
| <p><b>PHOSPHORUS.</b></p>  | <p>Symptoms of irritant poisoning: pain in the stomach and bowels; vomiting, diarrhoea, tenderness and tension in the abdomen.</p>  | <p>An emetic to be promptly administered; copious draughts containing magnesia in suspension; mucilaginous drinks; general treatment for inflammatory symptoms.</p>   | <p>Phosphorus is known by its ready inflammability, luminousness at ordinary temperatures, and alliacious odour.</p>  |
| <p><b>GLASS, or ENAMEL.</b></p>  | <p>If taken in very coarse powder, it produces irritation and inflammation of the bowels.</p>   | <p>Large quantities of crumb of bread should be eaten to envelop the particles. (?) An emetic of sulphate of zinc should then be given, and vomiting be promoted by demulcent drinks.</p>   |   |

## II. ORGANIC POISONS.

### 1. VEGETABLE POISONS.

| IRRITANT POISONS.   | SYMPTOMS.   | TREATMENT.  |
|---|---|---|
| <p><i>Anemone pulsatilla.</i> Wind Flower.</p> <p><i>Arun maculatum.</i> Wake Robin.</p> <p><i>Bronia dioica.</i> Bryony.</p> <p><i>Caladium seguinium.</i> Dumbcane.</p> <p><i>Calla palustris.</i> Water Arum.</p> <p><i>Caltha palustris.</i> Marsh Marigold.</p> <p><i>Chelidonium majus.</i> Celandine.</p> <p><i>Clematis vitalba.</i> Virgin Bower.</p> <p><i>Convolvulus jalapa.</i> Jalap.</p> <p><i>Convolvulus scammonia.</i> Scammony.</p> <p><i>Croton tiglium.</i> Purging Croton.</p> <p><i>Cucumis colocynthis.</i> Colocynth.</p> <p><i>Cyclamen Europæum.</i> Sow Bread.</p> <p><i>Daphne gnidium.</i> Spurge Flax.</p> <p><i>Daphne mezereum.</i> Mezercon.</p> <p><i>Delphinium staphysagria.</i> Stavesacre.</p> <p><i>Doica, palustris.</i> Swamp leather wood.</p> <p><i>Equisetum hyemale.</i> Scourgrass.</p> <p><i>Euphorbia officinarum.</i> Euphorbium.</p> <p><i>Spurge.</i></p> <p><i>Gnaphalium officinalis.</i> Hedge Hyssop.</p> <p><i>Hippomane mancinella.</i> Manchineel.</p> <p><i>Hura crepitans.</i> Sand Box.</p> <p><i>Hydrocotyle vulgaris.</i> Marsh Pennywort.</p> <p><i>Jatropha curcas.</i> Indian Nut.</p> <p><i>Jatropha manihot.</i> Cassada.</p> <p><i>Juniperus sabina.</i> Savin (oil of.)</p> <p><i>Juniperus Virginiana.</i> Red Cedar (oil of.)</p> <p><i>Momordica elaterium.</i> Squirting Cucumber.</p> <p><i>Narcissus pseudo-narcissus.</i> Daffodil.</p> <p><i>Pastinax sativa.</i> Common Parsnip.</p> <p><i>Pedicularis pntustris.</i> Marsh Lousewort.</p> <p><i>Phytolacca decandra.</i> Poke.</p> | <p>The general effects of this class of vegetable poisons are;—an acrid pungent taste, with more or less of bitterness, excessive heat, great dryness of the mouth and throat, with sense of tightness there; violent vomiting, the efforts being continued even after the stomach is emptied; purging, with great pain in the stomach and bowels; pulse strong, frequent, and regular; breathing often quick and difficult; appearances of intoxication; the pupil of the eye frequently dilated, insensibility resembling death, the pulse becomes slow and loses its force, and death closes the scene.</p> <p>If applied externally, many of them produce violent inflammations of the skin, with vesications or eruptions of pustules.</p> | <p>If vomiting has been occasioned by the poison, and the efforts are still continued, they may be rendered easier by large draughts of warm water, or thin gruel; but if symptoms of insensibility have come on without vomiting, it ought to be immediately excited by the sulphate of zinc, or some other active emetic substance, and after its operation a sharp purgative should be given. After as much as possible of the poison is got rid of, a very strong infusion of coffee, or vinegar diluted with water, may be given with advantage. Camphor mixture with ether may be taken frequently, and if insensibility be considerable, warmth, frictions, and blisters, may be employed. If inflammation or other dangerous consequences have been induced, they are to be treated upon general principles.</p> <p>The fruit of the <i>Fuillea Cordifolia</i> has been lately recommended as a powerful antidote against vegetable poisons: it is to be used in as recent a state as possible. (?)</p> <p>N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally.</p> |

Tree of Java.</p> | <p>The narcotic vegetable poisons, if taken into the stomach or applied to a wound, occasion the following effects:—stupor; numbness; heaviness in the head; desire to vomit, slight at first, but afterwards insupportable; a sort of intoxication, stupid air, pupil of the eye dilated; furious or lively delirium, sometimes pain; convulsions of different parts of the body, or palsy of the limbs. The pulse is variable, but at first generally strong and full; the breathing is quick and there is great anxiety and dejection, which, if not speedily relieved, soon ends in death.</p> | <p>The stomach to be effectually evacuated, by giving four or five grains of tartar emetic, or from ten to twenty of the sulphate of zinc, repeated every quarter of an hour, till the full effect is produced. These means may be assisted by tickling the throat with a feather or the finger. Large and strong glysters of soap dissolved in water, or of salt and gmel, should be speedily administered, to clear the bowels, and assist in getting rid of the poison, and active purgatives may be given after the vomiting has ceased. When as much as possible of the poison has been expelled, the patient may drink, alternately, a tea-cupful of strong hot infusion of coffee, and vinegar diluted with water. If the drowsiness, which is sometimes extreme, and the insensibility bordering on apoplexy, be not remedied by these means, blood may be taken from the jugular vein, blisters may be applied to the neck and legs, and the attention be roused by every means possible. If the heat declines, warmth and frictions must be perseveringly used. Vegetable acids are on no account to be given before the poison is expelled, and it is desirable that but little fluid of any kind should be administered.<br/>           N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally.</p> |

| ACRO-NARCOTICS.  | SYMPTOMS.  | TREATMENT.  |
|--|--|---|
| <p>Triticum <i>Hybernum</i>. Wheat (diseased.)<br/> <i>Upas antiar</i>. Tree in Java.<br/> <i>Veratrum album</i>. White Hellebore.<br/> <i>Veratrum viride</i>. American Hellebore.<br/> Woorara. Bulbous Agaric.<br/> <i>Agaricus chantarellus</i>. Champignon.</p>  | <p>Nausea, heat, and pain in the stomach and bowels, with vomiting and purging; thirst; convulsions, and faintings; pulse small and frequent; delirium; dilated pupil, and stupor; cold sweats, and death.</p> <p>Poisonous mushrooms may be distinguished from the edible by their botanical characters, and by the following criteria. The former grow in wet, shady places, have a nauseous odour; are softer, more open, and porous; have a dirty-looking surface, sometimes a gaudy colour or many very distinct hues, particularly if they have been covered with an envelope; they have soft, bulbous stalks, grow rapidly, and corrupt very quickly.</p> | <p>The stomach and bowels to be cleared by an emetic of tartarized antimony, followed by frequent doses of Glauber's or Epsom salt, and large, stimulating glisters. After the poison is evacuated, ether may be administered, with small quantities of brandy and water; but if inflammatory symptoms manifest themselves, such stimuli should be omitted, and other appropriate means be had recourse to.</p> |

## 2. ANIMAL POISONS.

|  | SYMPTOMS.   | TREATMENT.   |
|--|---|--|
| <p>POISONOUS FISH.</p> <p><i>Balistes monoceros</i>. Old Wife.<br/> <i>Cancer astaceus</i>. Crawfish.<br/> <i>Cancer ruricolus</i>. Land Crab.<br/> <i>Clupea thryssa</i>. Yellow-billed Sprat.<br/> <i>Coracinus Juscus major</i>. Gray Snapper.<br/> <i>Coracinus minor</i>. Hyne.<br/> <i>Coryphæna splendens</i>. Dolphin.<br/> Mormyra. Blue Parrot Fish.<br/> <i>Muraena major</i>. Conger Eel.<br/> <i>Mytilus edulis</i>. Mussel.<br/> <i>Ostracion globellum</i>. Smooth Bottle Fish.<br/> <i>Perca major</i>. Barracuda.<br/> <i>Perca venenosa</i>. Grooper.<br/> <i>Perca venenata</i>. Rock Fish.<br/> <i>Physalia</i>. Portuguese Man of War.<br/> <i>Scomber caruleus</i>. Spanish Mackerel.<br/> <i>Scomber maximus</i>. King Fish.<br/> <i>Scomber thynnus</i>. Bonetta.<br/> <i>Sparus chrysops</i>. Porgee.<br/> <i>Tetrodon sceleratus</i>. Tunny.<br/> <i>Tetrodon ocellatus</i>. Blower.</p> | <p>In an hour or two, or often in a much shorter time, after stale fish has been eaten, a weight at the stomach comes on, with slight vertigo and headache, sense of heat about the head and eyes, considerable thirst, and often an eruption of the skin (urticaria,) and in many cases death.</p> | <p>An emetic should be speedily administered, or, in the absence of it, vomiting may be excited, by tickling the throat with the finger, and taking large draughts of warm water. After full vomiting, an active purgative should be given, to remove any of the noxious matter that may have found its way into the intestines. Vinegar and water may be drunk after the above remedies have operated, and the body may be sponged with the same. Water, made very sweet with sugar, to which ether may be added, may be drunk freely as a corrective, and a very weak solution of alkali has been recommended to obviate the effects of the poison. If spasm ensue; after evacuations, laudanum, in considerable doses, is necessary. If inflammation should occur, the usual means of removing it must be employed.</p> |

|  | SYMPTOMS.  | TREATMENT.  |
|--|--|---|
| <p><b>POISONOUS SERPENTS.</b></p> <p><i>Boa crotaloides.</i> Copperhead.<br/> <i>Ceichus mockeson.</i> Mockeson.<br/> <i>Coluber berus.</i> Viper.<br/> <i>Coluber prester.</i> Black Viper.<br/> <i>Crotalus</i>, (5 species.) Rattle Snake.<br/> <i>Scytale piscivorus.</i> Water Viper.</p> | <p>A sharp pain in the wounded part, which soon extends over the limb or body; great swelling, at first hard and pale, then reddish, livid, and gangrenous in appearance; faintings, vomitings, convulsions, and sometimes jaundice; pulse small, frequent, and irregular; breathing difficult, cold sweats, the sight fails, and the intellectual faculties are deranged. Inflammation, and often extensive suppuration and gangrene, followed by death.</p>  | <p>A cupping glass to be applied over the wound or a moderately tight ligature above the bites, and the wound left to bleed after being well washed with warm water; the actual cautery, lunar caustic, or butter of antimony, to be then applied freely to it, and afterwards covered with lint, dipped in equal parts of olive oil and spirit of hartshorn. The ligature to be removed if the inflammation be considerable. Warm, diluting drinks, and small doses of ammonia or hartshorn to cause perspiration; the patient to be well covered in bed, and a little warm wine given occasionally. If gangrene be threatened, wine may be given more freely, and the bark should be had recourse to. Arsenic, the principal ingredient in the Tanjore Pill, has been strongly recommended.</p>   |
| <p><b>CANTHARIS VESICATORIA.</b></p> <p>Spanish, or Blistering Fly.<br/> <i>Lytta vittata.</i> Potato Fly.</p>   | <p>Nauseous odour of the breath; acrid taste; burning heat in the throat, stomach, and abdomen; frequent vomitings, often bloody with copious bloody stools; excruciating pain in the stomach; painful and obstinate priapism, with heat in the bladder, and strangury or retention of urine; frightful convulsions, delirium and death.</p>   | <p>Vomiting to be excited by drinking sweet oil, sugar and water, milk or linseed tea, very freely. Emollient glysters should be administered, and if symptoms of inflammation of the stomach, kidney, or bladder supervene, they must be subdued by appropriate treatment.</p> <p>Camphor dissolved in oil may be rubbed over the belly and on the thighs.</p>   |
| <p><b>VENOMOUS INSECTS.</b></p> <p>Tarantula.<br/> Scorpio. Scorpion.<br/> <i>Vespa crabro.</i> Hornet.<br/> <i>Vespa vulgaris.</i> Wasp.<br/> <i>Apis mellifica.</i> Bee.<br/> <i>Culex pipiens.</i> Gnat.<br/> <i>Cestrus bovis.</i> Gad-fly.</p>  | <p>In general, the sting of these insects occasions only a slight degree of pain and swelling; but occasionally the symptoms are more violent, and sickness and fever are produced by the intensity of the pain.</p>   | <p>Hartshorn and oil may be rubbed on the affected part, and a piece of rag moistened in the same, or in salt and water, may be kept upon it till the pain is removed. A few drops of hartshorn may be given frequently in a little water, and a glass or two of wine may be taken. The sting may, in general, be removed by making strong pressures around it with the barrel of a small watch key.</p>  |
| <p><b>SALIVA OF THE RABID DOG.</b></p>   | <p>At an uncertain interval after the bite, generally however, between the twentieth day and three or four months, pain or uneasiness occurs in the bitten part, though the wound may have been long healed. Anxiety, uneasiness, languor, spasms, horror, disturbed sleep, difficult respiration succeed, and are soon very much increased; violent convulsions affect the whole body, hideously distorting the muscles of the face; the eyes are red and protruded, the tongue swells and often hangs out, and viscid saliva flows from the mouth; there is pain in the stomach, with bilious vomitings, a horror of fluids, and impossibility of drinking them. All these symptoms are aggravated till the sufferer is relieved by death.</p> | <p>Hydrophobia is more easily prevented than cured, indeed it is doubted whether it ever has been cured. Mercury, arsenic, opium, musk, camphor, acids, wine, vegetable and mineral alkali, oil, various herbs, and many other remedies whose effects are quite opposite, have been employed, but none can be relied on. Large blood-lettings, the warm and cold bath, and almost every other remedial agent, have been tried without success.</p> <p>The bitten part should be completely cut out, even after it has healed, if the symptoms have not yet come on; the part should then be immersed in warm water, or washed with it as long as it will bleed, and after the most persevering ablution, caustic should be applied to every part of the surface, and then the wound covered with a poultice, and suffered to heal by granulations.</p> <p>No milder discipline can ensure safety.</p> |

The most energetic poisons are used therapeutically; and, often with considerable advantage. They have, of course, to be administered in extremely small doses; to avoid producing poisoning.

**POISONING**, *Veneficium*, *Toxicatio*, *Intoxicatoria*, *Pharmacæia*, (F.) *Empoisonnement*. The art of applying a poisonous substance to any of the textures, in a dose capable of occasioning more or less serious symptoms. Rigorously speaking, therefore, if a physician, in treating any case, employs a deleterious medicine in a small dose, which, owing to particular circumstances, produces unpleasant symptoms, he may be said to have poisoned. The term is, however, generally restricted to poisoning by design.

*Poisoning* has also been used, by a few, to denote the series of symptoms resembling those produced by certain poisons, which occasionally follows the use of substances that are generally innocuous. Overloading the stomach with indigestible food has, for example, given occasion to symptoms resembling those produced by a narcotic poison, and the effect has been termed *poisoning*.

*Secret poisoning* was, at one time, practised as an art. It consisted in administering medicines, which should act as *slow poisons*, and gradually undermine the strength and life. Its agency was far from being so extensive as was imagined.

**POISONOUS**, *Toxical*, *Noxius*, having the qualities of a poison.

**POISON BERRY TREE**, *Melia azedarach*—p. Italian, *Liquor arsenicalis*—p. Morbid, *Virus*—p. Oak, *Rhus toxicodendron*—p. Vegetable, *Upas*—p. Vine, *Rhus radicans*.

**POISONS, ACRO-NARCOTIC**, P. narcotico-acrid—p. Corrosive, P. acrid—p. Escharotic, P. acrid—p. Irritating, P. acrid—p. Putrescent, P. septic.

**POITRINAIRE**, Phthisicus.

**POITRINE**, Thorax.

**POIVRE D'EAU**, *Polygonum hydropiper*—p. *de Guinée*, *Capsicum annuum*—p. *d'Inde*, *Capsicum annuum*—p. *de Jamaïque*, see *Myrtus pimenta*—p. *Long*, *Piper longum*—p. *Noir*, *Piper nigrum*—p. *Petit*, *Vitex*—p. *à Queue*, *Piper cubeba*—p. *Sauvage*, *Vitex*.

**POIX BLANCHE**, see *Pinus abies*—p. *de Bourgogne*, see *Pinus abies*—p. *Grasse*, see *Pinus abies*—p. *Jaune*, see *Pinus abies*—p. *Minérale*, *Pissasphaltum*—p. *Navale*, see *Pinus sylvestris*—p. *Noire*, see *Pinus sylvestris*.

**POLIÁTER**, from *πολις*, 'the town,' and *ιατρος*, 'a physician.' A physician, exercising his profession in a town, by the appointment of the government.—Castelli.

**POKE, INDIAN**, *Veratrum viride*—p. Weed, *Phytolacca decandra*, *Veratrum viride*.

**POLENTA**, Alphonit.

**POLEY MOUNTAIN OF CANDY**, *Teucrium creticum*—p. Mountain of Montpellier, *Teucrium capitatum*.

**POLICE, MEDICAL**. Rules established, or which ought to be established by the medical practitioner, for the prevention of disease, to assist its cure, and to contribute to the progress of Medicine. The salubrity of districts, especially during the existence of spreading disease, is greatly ensured by an efficient medical police.

**POLIO'SIS**, *Trichosis poliosis*, *Spilosis poliosis*. Hair, prematurely gray or hoary.

**POLIUM CRETICUM**, *Teucrium creticum*—p. Montpellier, *Teucrium capitatum*.

**POLLEX**, *Antichoir*, *Promanus*, from *pollerē*, 'to have much strength.' (F.) *Pouce*. The first of the fingers in size and strength. It is asserted, that the term *polltroon* is derived from *Pollieē trunedo*;—the Romans, who were desirous of being exempted from military service, being accustomed to cut off the thumb, and thus render themselves unfit to handle arms.

**POLLEX**. See *Digitus*.

*Pollex pedis* is the great toe.

**POLLINCTORES**. They, who were employed in anointing bodies before they were placed on the funeral pile.

**POLLINCTURA**, Embalming.

**POLLUTION**, *Pollutio*, from *polluo*, 'I profane.' The excretion of the seminal liquor or sperm, at other times than during coition. When occasioned by a voluntary act it is called, simply, *Pollution* or *Masturbation*, (q. v. :) when excited during sleep, by lascivious dreams, it takes the name *Nocturnal pollution*, *Exoneiro'sis*, *Oncirog'mos*, *Oncirog'onos*, *Gonorrhæa dormientium*, *G. oneirog'onos*, *G. Vera*, *G. libidinosa*, *Profluvium Seminis*, *Spermatorrhæa*, *Purpuraria salax*, *Night pollution*. (F.) *Pollution involontaire*.

**POLLUTION INVOLONTAIRE**, *Pollution*—p. *Nocturnal*, *Pollution*—p. *Self*, *Masturbation*—p. *Voluntary Masturbation*.

**POLY**, *Polys*, *πολυς*, 'many, full.' Hence:

**POLYÆMIA**, *Plethora*.

**POLYANHÆMIA**, *Anæmia*.

**POLYCHOLIA**, from *πολυς*, 'much,' and *χολη*, 'bile.' Superabundance of bile; such as is supposed to exist in bilious fevers.

**POLYCHRESTUS**, from *πολυς*, 'much,' and *χρηστος*, 'useful.' Having many virtues. An ancient name for certain medicines, considered to be useful in many diseases.

**POLYCHRONIUS**, *Chronic*.

**POLYDACTYLUS**, from *πολυς*, 'many,' and *δακτυλος*, 'a finger.' One who has a supernumerary finger or fingers, or toes.

**POLYDIPSIA**, from *πολυς*, 'much,' and *διψη*, 'thirst;' *Sitis morbo'sa*, *Polydipsia*, *Excessive thirst*,—*Dipsosis avens*. (F.) *Soif excessive*. A constant desire for drinking, with a sense of dryness in the mouth and throat. It is mostly symptomatic of fever, inflammation, dropsy, excessive discharges, &c.

**POLY'GALA**, from *πολυς*, 'much,' and *γαλα*, 'milk;' *P. vulgaris*, *Common Milkwort*. *Family*, *Rhinanthoideæ*. *Sex. Syst.* *Diadelphia Octandria*. The leaves are bitter, and are used in the same cases as the *polygala amara*.

**POLYGALA AMARA**, *Bitter Milkwort*. A powerful bitter; and, consequently, tonic. Its reputed virtues are balsamic, demulcent, and corroborant.

**POLYGALA SENEGA**, *Sen'eka*, *Rattlesnake Milkwort*, *Senega* or *Rattlesnake root*, *Polygala Virginia'na*, (F.) *Polygala de Virginie* ou *de Seneka*. The bark is the active part of the root. Its taste is at first acrid, and afterwards very hot and pungent. It was once esteemed to be specific against the poison of the rattlesnake,

and in pleurisy, pneumonia, &c., after the inflammatory action had been got under. It has been given also in humoral asthma, chronic rheumatism, dropsy, croup, amenorrhœa, &c. According to Peschier, it contains three particular principles, *Polygaline* or *Sen'egin*, *Isol'usine*, and *Polygalic Acid*. Dose, gr. 30 to 40 of the powder.

POLYGALA VIRGINIANA, P. senega.

POLYGALINE. See Polygala senega.

POLYGONATUM, Convallaria polygonatum.

POLY'GONUM AVICULA'RĒ, from πολυς, 'much,' and γόνι, 'seed.' *Centinodia*, *Centinodia*, *Knot-grass*, *Sanguinalis Corrig'iola*, (F.) *Renouée*, *Trainasse*, *Centinode*. Family, Polygonæ, Ser. Syst. Octandria Trigynia. This grass is said to be a feeble astringent.

POLYGONUM BISTORTA, *Bistorta*, *Offic'inal Bistort*, *Great Bistort* or *Snakeweed*. The root is a powerful astringent and tonic; and, as such, has been used in internal hemorrhage, atonic diarrhœa, ague, &c. Dose, gr. xv to ʒj.

POLYGONUM DIVARICATUM;—the *Eastern Buckcheat plant*. The roots, reduced to a coarse meal, are said to be much used as an article of diet by the Siberians.

POLYGONUM FAGOP'YRUM,—*Fagopyrum*, *Buckcheat*, *Triticum Faginum*, (F.) *Sarrasin*, *Blé noir*. The grain of this plant constitutes a principal article of food with the inhabitants of Russia, Germany, and Switzerland. It is much used in the United States.

POLYGONUM HYDROPIPER, *Hydropiper*, *Persicaria urens*, *Mercurius terrestris*; the *Poor Man's Pepper*, *Biting Arise-smart*, *Lake-weed*, *Water-pepper*, (F.) *Poirer d'eau*. The leaves of this plant have an acrid, burning taste; and resemble those of the arum. They have been recommended as possessing antiseptic, aperient, and diuretic virtues. The fresh leaves have been applied externally, as a stimulating cataplasm.

POLYGONUM PERSICARIA, *Persicaria*, *Persicaria mitis*, *Plumbago*, *Arsc-smart*, (F.) *Persicaire douce*. This plant is said to possess vulnerary and antiseptic qualities. It has been given in wine to arrest gangrene.

POLYGROMA, Staphyloma.

POLYHYPERHÆMIA, Plethora.

POLYLYMPHIA, Anasarca.

POLYMERIA PROMISCUA TRANSLATIVA, Transposition of the viscera.

POLYMERIS'MUS, from πολυς, 'much,' and μέρος, 'a part.' A monstrosity, which consists in the existence of supernumerary organs; as a sixth finger of the hand.

POLYNEURON, Plantago.

POLYOP'SIA, from πολυς, 'much,' and οψις, 'sight.' Vision is so called, when multiple.

POLYPE'RIA, from πολυς, 'much,' and πληρος, 'mutilated.' Congenital misconstructions of various parts or organs.—Good.

POLYPHAG'IA, *Multivorantia*, from πολυς, 'much,' and φάγω, 'I eat.' Voracity. Faculty of digesting many kinds of food.

POLYPHARMAC'IA, from πολυς, 'much,' and φαρμακον, 'a medicine.' A prescription, consisting of a number of medicines; hence the name *Polyphar'macus* given to one who is in the habit of prescribing a number of medi-

cines, and whose prescriptions are loaded with ingredients. The term is taken in bad part.

POLYPHYSIA, Flatulence.

POLYPODITES. Wine, impregnated with polypody.

POLYPODIUM CALAGUALA, Calaguala radix.

POLYPODIUM FILIX MAS, *Aspidium Filix Mas*, *Pteris*, *Athyrium Filix Mas*, *Blechnon*, *Polyrrhizon*, *Blancnon* *Oribasii*, *Lonchi'tis*, *Filix'ula*, *Male Polypody* or *Fern*, *Filix mas*, *Nephrodium crenatum*, (F.) *Fougère mâle*. *Nut. Ord.* Filices. *Ser. Syst.* Cryptogamia Filices. The root of this plant has been much extolled as an anthelmintic, and in cases of tœnia. It was the basis of a once celebrated remedy—*Madame Nouffer's*—but, perhaps, more of the efficacy was to be attributed to the active purgatives by which it was followed than to the fern. Dose, ʒij to ʒiij of the powdered solid part of the root; followed, in the morning, by a strong cathartic of camboge or jalap. An ethereal extract has been proposed by Dr. Peschier, of Geneva.

POLYPODY, MALE, *Polypodium filix mas*.

POLYPOID, *Polypoïdes*; from *Polypus*, (q. v.), and εἶδος, 'form.' Having the shape of, or resembling a *Polypus*.

POLYPORUS OFFICINALIS, *Boletus laricis*.

POLYPO'SIA, πολυποσια, from πολυς, 'much,' and ποσις, 'drink.' Great thirst—great desire for drink.

POLYPOSIA, Polydipsia.

POLYPUS, *Pseudometamorphosis polyposa*, from πολυς, 'many,' and ποῦς, 'a foot.' A name given to tumours, which occur in mucous membranes especially; and which have been compared to certain zoophytes.

Polypi may form on every mucous membrane. They are most commonly observed in the nasal fosse, pharynx, and uterus; more rarely in the stomach, intestines, bronchial tubes, bladder, and meatus auditorius externus. They vary much in size, number, mode of adhesion, and intimate nature. Accordingly, they have received various appellations; *mucous*, *soft*, *vesicular*, when their substance has been soft, spongy, vesicular, and, as it were, gorged with fluid. Others have been called *hard*; and these have been distinguished into *fibrous* or *fleshy*, and into *scirrhous* or *cancerous*. *Fibrous* polypi are of a dense, compact texture, and whitish colour. They contain few vessels, and do not degenerate into cancer. The *scirrhous* or *carcinomatous* are true cancerous tumours, painful and bleeding. They present all the pathological changes which belong to cancerous affections, and the prognosis is of course unfavourable.

The mode of treating polypi must differ according to their character.

The means used to destroy them have been, 1. To subject them to the action of certain astringent powders or solutions, to obtain their resolution. 2. *Cauterization* or the application of the actual cautery or caustics. 3. *Excision* or ablation with a cutting instrument. 4. *Exstirpation* with the fingers or with the polypus forceps. 5. A *ligature*, put round them so as to prevent their nutrition. A seton has, also,

been sometimes used to gradually destroy the pedicle.

The term **POLYPI**, *Pseudopolyphi*, has likewise been applied to collections of blood—fibrinous concretions—found in the heart or great vessels after dissolution. These were once, erroneously, regarded as morbid.

The presence of these concretions may be suspected, when in the course of an acute or chronic affection of the heart, or at the close of chronic diseases in general—especially those of the lungs—the heart's action becomes suddenly tumultuous, obscure, and accompanied with a soft bellows' murmur, whilst the general symptoms indicate the effects of obstructed circulation. The right cavities are most frequently affected.

**ΠΟΛΥΡΡΗΙΖΟΝ** *Bronchlemmitis*. A membraniform secretion in the bronchial tubes, of a diphtheritic character, having the shape, when expectorated, of the bronchia. It is the result of inflammation of the lining membrane of those tubes.

**POLYRRHIZON**, *Polypodium filix mas*.

**POLYRRHŒA**, *Profluvium*.

**POLYSARCIA**, from *πολυς*, 'much,' and *σαρξ*, 'flesh.' *Carnositas*, *Polysomd'ia*, *Adip'ria*, *Obes'itas*, *Corpulencia*, (q. v.), *Steatites*. Excessive corpulency. Authors have distinguished two varieties of this:—*Polysarcia caruosa*, *Corpulency*, (q. v.), and *P. adiposa* or *Obes'ity*, *Hyperpim'elē*, *Lipar'ia*, *Adip'osis*, *Polysarc'ia jaginosa*. A severe regimen and exercise are the best preventives.

**POLYSOMATIA**, *Polysarcia*.

**POLYSPASTON**, from *πολυς*, 'much,' and *σπασω*, 'I draw.' A powerful instrument for reducing luxations.—*Gorræus*.

**POLYSTOMA PINGUICOLA**, see *Worms*—*p.* *Venarum*, see *Worms*.

**POLYTRIC**, *Asplenium trichomanoides*.

**POLYTRICHUM**, from *πολυς*, 'much,' and *τριχίς*, 'hair.' *Polytr'ion*, *Polytr'ichum vulgare*, *Adiantum aur'eum*, *Golden Maiden-hair*, (F.) *Perce-mousse*. It is possessed of astringent properties, and was formerly given in diseases of the lungs, and in calculous affections.

**POLYTRICUM COMMUNE**, *Asplenium trichomanoides*.

**POLYTROPHIA**, from *πολυς*, 'much,' and *τροφειν*, 'I nourish.' Abundant or excessive nutrition.

**POLYURIA**, *Diabetes*.

**POLYURICUS**, from *πολυς*, 'much,' and *ουρον*, 'urine.' *Sauvages* calls—*Ischuria polyurica*—a kind of ischuria, caused by accumulation of urine in the bladder.

**POMA CHINENSIS**, see *Citrus aurantium*.

**POMACEUM**, *Cider*.

**POMATUM**, *Pommatum*, (F.) *Pommade*, (F.) *Liparolé*. A pharmaceutical preparation, employed only externally; which differs but little from an ointment, except in having, generally, less consistence. It is, generally, made aromatic, and coloured to render it more agreeable.

**COMMON POMATUM** is made of *lard*, 12℔s; *suet*, 4℔s; *essence*, ℥viii.

**POMATUM AD LABIA DEMULCENDA**, *Cerate for the lips*—*p.* *Epispasticum flavum*, *Unguentum lyttæ medicatum aliud*—*p.* *Epispasticum viride*

&c., *Unguentum lyttæ medicatum*—*p.* for the *Lips*, *Cerate for the lips*—*p.* *Nitricum vel oxygenatum*, *Unguentum acidi nitrosi*—*p.* *Saturni*, *Unguentum plumbi superacetatis*.

**POMEGRANATE**, *Punica granatum*.

**POMMADE**, *Pomatum*—*p.* *d'Allyon*. *Unguentum acidi nitrosi*—*p.* *Antipsorique de Jasser*, *Unguentum sulphuris compositum*—*p.* *d'Auterrieth*, *Unguentum antimonii tartarizati*—*p.* *de Cyrillo*, *Unguentum muriatis hydrargyri oxygenato medicatum*—*p.* *Epispastique jaune*, *Unguentum lyttæ medicatum aliud*—*p.* *Epispastique verte*, *Unguentum lyttæ medicatum*—*p.* *de Garou*, *Unguentum epispasticum de daphne gnidio*—*p.* *pour les Lèvres*, *Cerate for the lips*—*p.* *Ophthalmique* (*Regent's*.) *Unguentum ophthalmicum*—*p.* *Oxygénée*, *Unguentum acidi nitrosi*—*p.* *Sibièle*, *Unguentum antimonii tartarizati*.

**POMME**, See *Pyrus malus*—*p.* *d'Amour*, *Solanum lycopersicum*—*p.* *Épineuse*, *Datura stramonium*—*p.* *de Mercille*, *Momordica balsamica*—*p.* *Moussucuse*, *Bedegar*—*p.* *de Terre*, *Solanum tuberosum*.

**POMMES HÉMORROIDALES**. See *Viscum album*.

**POMMETTE**. See *Malæ os*.

**POMMIER**, *Pyrus malus*.

**POMPHOLYX**, from *πομφος*, 'a bladder.' A small vesicle on the skin. An eruption of *bullæ* or *blébs*, appearing without any inflammation around them, and without fever. It is the *Ephlysia Pompholyx* of Good.

**POMPHOLYX**, *Tutia*, *Zinci oxydium*.

**POMPION**, *Cucurbita pepo*.

**POMUM ADA'MI**. The projection, formed by the thyroid cartilage in the neck,—of males particularly. It is so called from a notion, that it was caused by the apple sticking in the throat of our first parent.

**POMUM HIEROSOLYMITANUM**, *Momordica balsamina*—*p.* *Melongenæ*, see *Solanum melongena*.

**PONCTION**, *Puncturing*.

**PONDERA ET MENSURÆ**, *Weights and measures*.

**PONGITIF**, *Pungent*.

**PONS HEPATIS**. See *Lobulus anonymus*.

**PONS VAROLII**, *Corpus annul'væ*, *Procc's'sus annularis*, *Eminentia annularis*, *Varol'i's bridge*, *Nodus enceph'ali vel Cerebri*, *Cerebral protuberance*, *Mesceph'alum*, *Protuberantia annularis Willisii*, *Annular protuberance*. An eminence at the upper part of the medulla oblongata, first described by Varolius. It is formed by the union of the crura cerebri and crura cerebelli.

**POPLAR, AMERICAN**, *Liriodendron*—*p.* *Black*, *Populus*—*p.* *Tree*, *Liriodendron*—*p.* *Tulip-bearing*, *Liriodendron*.

**POPLES**, *Garr'um*, *Garrctum*, *Ignys*, *Igywē*, the *Ham*, (F.) *Jarret*. The posterior part of the knee joint. The ham forms, what is called, the popliteal region.

**POPLITE**, *Poplitæus*, muscle.

**POPLITEAL**, *Poplitæus*, from *Poples*, 'the ham.' That which relates to the ham. A name given to various parts.

1. The **POPLITEAL ARTERY**—*Popliteal portion of the crural* (Ch.)—is really a continuation of the femoral, which changes its name on

passing through the adductor magnus muscle. It descends a little obliquely outwards into the hollow of the ham, and extends from the commencement of the lower third of the thigh to the end of the upper quarter of the leg, where it terminates by dividing into the *posterior tibial* and *peroneal* arteries. In the ham, it gives off the three *superior articular arteries*; and, at the top of the leg, the arteries of the gemini muscles or *gemini branches*, (F.) *branches jumelles*, the two *inferior articular arteries*, and the *tibialis antica*.

2. The **POPLITEAL VEIN** has the same arrangement as the artery, behind which it is situated.

3. The **POPLITEAL NERVES**. They result from the bifurcation of the sciatic, and are two in number, viz. 1. The *external popliteal, Branche péronière*, (Ch.) It is smaller than the internal; turns to the outside of the fibula at the upper part of the leg, and divides into the *musculo-cutaneous branch*,—*nerf pré-tibio-digital*, (Ch.) and into the *anterior tibial*,—*nerf pré-tibio-sus-phalangéaire*, (Ch.) 2. The *internal popliteal nerve, Branche tibiale*, (Ch.) which is larger than the other, and seems to be the real continuation of the sciatic nerve. It descends vertically into the hollow of the ham; and passes beneath the aponeurotic arch of the solaris muscle, beyond which it takes the name of *tibial nerve*. It furnishes the *external saphena nerve*, and a number of branches, that are distributed to the posterior muscles of the leg. It then passes to the sole of the foot to be divided into two branches, called *Plantar nerves*.

4. The **POPLITEUS MUSCLE**, *Muscle Jarretier, Fémoro-popliti-tibial*, (Ch.) *Subpopliteus*, (F.) *Muscle poplité*, is seated in the popliteal region. It is triangular, long, flat; and is inserted, on the one hand, by means of a strong tendon, into the tuberosity at the outer condyle of the femur, terminating below at the upper part of the posterior surface of the tibia. This muscle bends the leg on the thigh, and, reciprocally, the thigh on the leg. When the leg is bent, it causes it to turn, in rotation, inwards.

**POPONAX**. See *Pastinaca opoponax*.

**POPPY, CORN, RED**, *Papaver rhœas*—p. Juice, Meconium—p. Spotting, Cucurbalus Behen—p. Thorn, Argemone Mexicana—p. White, Papaver—p. White, capsule, see Papaver.

**POPULA FERA**, *Herpes exedens*.

**POPULUS**, *Populus nigra, Jégéïros, Acheroï's, Bluck poplar*, (F.) *Peuplier noir*. The young buds, *oculi*, or rudiments of the leaves, which appear in the beginning of spring, were formerly used in an official ointment—the *unquen-tum populéum*. It was, also, recommended in chronic affections of the lungs.

**PORCELAINÉ**, Essera.

**PORCELLIO**, Oniscus.

**PORCUS**, Vulva.

**PORDE**, Crepitation.

**PORE**, *Porus, Interstice*. Anatomists have given this name to the openings at the extremities of vessels at the surface of different membranes.

*Exhalant Pores* are those which terminate the extremities of arteries, and transmit the fluids exhaled,—*Absorbent Pores* being the absorbent

mouths of vessels, employed in taking up parts that have to enter the circulation.

Pores exist in the cuticle; yet Humboldt, with a powerful magnifying-glass, was unable to observe them. The pores of the skin have also been called *spiracula*.

The **PORI BILIAÏRII** are ducts, which receive the bile from the penicilli of the liver, and convey it to the hepatic duct.

**POREIL'IGON**. The scales which fall from iron when forged.—Ruland.

**PORFIRET'ICUM**. A copper mortar; also a rasp.—Ruland.

**POROCE'LE**, from *πωρος*, 'a callus,' and *κηλη*, 'a tumour.' A hard tumour of the testicle or its envelopes.

**POROM'PHALON**, from *πωρος*, 'hard,' and *ομφαλος*, 'the navel.' Umbilical hernia with hard and thickened parietes.

**POROS**, Canal.

**POROSIS**, Chalazæ.

**POROT'IC, Porot'icus**, from *πωρος*, 'callus.' A remedy believed to be capable of assisting the formation of callus.

**PORPHURURIA**, Urine, purpuric.

**PORPHYRA**, Purpura—p. Græcorum, *Pettechiæ*—p. Hæmorrhagica, *Purpura hæmorrhagica*.

**PORPHYRIZATION**, Levigation.

**PORPHYRY, Porphyrites**, from *πορφύρα*, 'purple.' A species of very hard, compound rock, susceptible of considerable polish, and used in the fabrication of mortars and slabs for the apothecary.

**PORPHYRY, BLACK**, Ophites.

**PORRA'CEOUS, Porraceus, Prasinus**, from *porrum*, 'a leek.' Having the green colour of the leek. An epithet given to certain excreted matters; the sputa and fæces particularly.

**PORREAU**, Allium porrum.

**PORRECTUM, Lever**.

**PORRET**, Allium porrum.

**PORR'IGO, Tin'ea, Farfura'tio, Far'fures, Pityri'asis, Ecpyc'sis porrigo, Phlysis porrigo**, (F.) *Teigne, Kâche*. This is a contagious disease,—with the exception of the *Porrigo larvalis*,—and is principally characterized by an eruption of the pustules, called *favi* and *achores*, unaccompanied by fever.

1. **PORRIGO LARVALIS, Crusta lactea, Ecpyc'sis Porrigo crust'æa, Achor, Tinea lactea, T. Fucii, Milk'y scall or Tetter, Lactu'meu**, (F) *Croute de lait, Croute laiteuse, Fêux volages*. This is, almost exclusively, a disease of infancy. It commonly appears first on the forehead and cheeks, in an eruption of numerous, minute, whitish *achores* on a red surface. These break and discharge a viscid fluid, which becomes incrustated in thin, yellowish, or greenish scabs. The patches spread, until the whole face becomes, as it were, enveloped in a mask, (hence the epithet *larvalis*.) Sometimes the eruption appears on the neck and breast; and, occasionally, on the extremities. In general, the health of the child does not suffer, but the eruption is always attended with much itching and irritation.

The treatment consists in mild, tepid ablu-tion, and the application of gently stimulating ointments, as of the oxydum zinci. The bowels

must be kept in a soluble state by small doses of calomel, or by rhubarb and magnesia.

The PORRIGO FURFURANS, *Ecpyesis porrigo furfuracea*, *Tinea furfuracea*, *Tinea porriginosa*, *Teigne furfuracé* (Alibert) commences with an eruption of small achores, the fluid of which soon concretes and separates in innumerable, thin, laminated scabs, or scale-like exfoliations. It is attended with a good deal of itching and some soreness of the scalp, to which the disease is confined. It occurs chiefly in adults.

In the treatment, the scalp must be kept shaved. The part must be washed repeatedly with soap and water, and an oiled silk cap worn. The nature of the ointments used must vary according to the period of disease and the irritability of the part affected. The *Zinc ointment*;—one made with the *Cocculus indicus*;—the *Sulphur ointment*;—*Citrine ointment* and *Ung. hydrargyri nitrico-oxydi*; *Tar ointment* and *Nitric acid ointment* have all been found useful. Should inflammation or discharge arise, these applications must of course be intermitted.

The PORRIGO LUPINOSA, *Tinea lupina*, *Scabies capitis*, *Ecpyesis porrigo lupinosa*, consists of minute pustules in small patches, mostly commencing on the scalp; the patches terminating in dry, delving scabs, resembling lupine seeds; the interstices often covered with a thin, whitish, and exfoliating incrustation. It occurs chiefly in early life, and requires the same treatment as the last.

PORRIGO SCUTULATA, *Tinea granulata*, *Ecpyesis porrigo galeata*, *Tinea feda*, *Achores seu scabies capitis*, *Ringworm of the scalp*, *Scalped head*. It commences with clusters of small, light, yellow pustules, which soon scab off; and, if neglected, become hard by accumulation. If the scabs are removed, the surface is left red and shining, but studded with slightly elevated points. If not attended to, it involves the whole head.

It occurs in children 3 or 4 years of age, and is very unmanageable.

The rules laid down under the *Porrigo furfurans* must be, here, still more perseveringly enforced. The whole tribe of stimulating ointments may be used in succession. No one will always succeed, and hence the necessity of change, provided advantage should not seem to follow any particular application. The *Unguentum ad scabiem* of Banyer sometimes succeeds, when others fail.

The PORRIGO DECALVANS, *Trichosis areæ*, *Areæ*, *Alopecia areata*, consists of patches of baldness, without decay or change of colour in the surrounding hair, the exposed parts of the scalp being glabrous, white, and shining. The morbid condition sometimes spreads, so that the patches coalesce, rendering the baldness extensive.

The treatment consists in keeping the scalp cleared by constant shaving, and in the steady application of some stimulating liniment or ointment.

The PORRIGO FAVOSA, *Ccrion*, *Favus*, *Ecpyesis porrigo favosa*, *Tinea favosa*, *Scabies capitis favosa*, *Honey-comb Scall* or *Tetter*. (F.) *Teigne favuse*. This consists in an eruption of pustules common to the head, trunk, and extremi-

ties; pea-sized; flattened at the top; in clusters, often uniting; discharge, fetid; scabs, honey-combed; the cells filled with fluid. It occurs both in early and adult life.

The treatment, in this variety, must consist in the exhibition of laxatives and the mildest stimulating ointments, such as the *Ung. zinci*, *Ung. hydrargyri præcipit. alb.*, &c.

FORRUM, *Allium porrum*.

PORRUS, *Sarcoma*.

PORTA, *πύλη*, *Pyłe*, 'a gate.' The part of the liver, where its vessels enter as by a gate. Also, the Vulva, (q. v.)

PORTA JECORIS, *Porta vena*.

VENA PORTA, *Vena portæ*, *V. portarum*, *Ramalis vena*, *Janitrix*, *Vena magna seu que ad portas est seu stelechiæ* seu *lactea seu ostiaria*, *Porta Jecoris*, *Porta Vena arteriosa seu arterialis*, *Manus Jecoris seu hepatis*, *Vena ad portas*. The *System of the vena porta* or the *Abdominal venous system*, (F.) *Veine porte*, is a vascular apparatus of black blood, situate in the abdomen, and resulting from two distinct orders of vessels, united into one common trunk.

1. One of these trunks, much more extensive than the other, has received the name *Vena porta abdominalis*, because it arises from all the organs enclosed in the cavity of the abdomen, except the kidneys and bladder; and in the female, the uterus.

The *Abdominal vena porta* has two principal roots,—the *splenic vein* and the *superior mesenteric*, which have their ramifications in all the digestive organs.

2. The other trunk, destined solely to the liver, has been called the *Hepatic vena porta*. It appears to be a continuation of the abdominal vena porta, and proceeds towards the inferior surface of the liver. Opposite the transverse fissure of that organ, it divides, like an artery, into two branches, which, by their union, seem to form a canal or duct, called by some the *Sinus of the vena porta*. These branches are distributed in the substance of the liver, whither they are accompanied by a prolongation of the fibrous capsule of that organ,—the capsule of Glisson. The different branches of the vena porta are devoid of valves.

PORTE-AIGUILLE, *Acutenaculum*; *Needle carrier*, *Needle bearer*; from (F.) *porter*, 'to carry,' and *aiguille*, 'a needle.' An instrument for accurately laying hold of a needle, and giving it greater length, when it is so fine and small, that it cannot be held by the fingers. It is of steel or silver, about two inches long, and throughout the whole, almost, of its length, divided into two branches, so as to form a kind of forceps, capable of being closed by means of a sliding ring. A modification of this instrument has been devised by Dr. Physick, for taking up deep-seated arteries, beyond the reach of a tenaculum or common needle. It consists of a forceps, so constructed as to hold in its extremity a needle armed with a ligature. The handles of the forceps are fastened together, temporarily, by a spring or catch; and, when the needle is fairly deposited beneath the vessel, it is disengaged from the forceps and drawn out, leaving the ligature behind, which can be tied without difficulty.

PORTE-BOUGIE, (F.) A silver canula similar

to that of a trocar, except that it is longer. It is used for conducting bougies into the urethra.

**PORTE-FEUILLE**, Subscapularis.

**PORTE-MÈCHE**, (F.) from *porter*, 'to carry,' and *mèche*, 'a tent.' An instrument for carrying tents deeply into fistulous openings, or sinuses, to the bottom of ulcers, &c. It is a wire of silver or steel, four or five inches long, having a notch at one extremity, and a button at the other.

**PORTE-MOXA**. A small instrument for keeping the moxa applied to the part to be cauterized. It consists of a metallic ring—separated from the skin by three small supports of ebony—to which a long handle is adapted.

**PORTE-PIERRE**, *Caustic bearer*. An instrument similar to a *porte-crayon*, for carrying the lunar caustic.

**PORTE-SONDE**. An instrument, resembling a *porte-crayon*, employed for holding the style or *sonde*, and inserting it more readily into the nasal duct, during the operation for fistula lachrymalis.

**PORTER**, Cerevisia.

**PORTIO DURA**, Facial nerve.

**PORTIO MEDIA INTER PORTIO'NEM DURAM ET PORTIO'NEM MOLLEM**. A small nerve, which arises from the brain, between the origin of the portio dura and trunk of the portio mollis.—Wrisberg.

**PORTION COSTO-TRACHÉLIENNE DU SACRO-SPINAL**, Longissimus dorsi—*p. Ecailléux ou squameux du temporal*, Squamous portion of the temporal.

**PORTION LOMBAIRE DU PLEXUS CRURAL**, Lumbar plexus.

**PORTION GODRONNÉE DE LA CORNE D'AMMON**. A name given by Vicq d'Azyr to a small denticulated cord of a compact tissue and granular appearance, which unites the cornu ammonis to the paries of the lateral ventricle.

**PORTONARIUM**, Pylorus, Duodenum.

**PORTULA'CA**, *Andrach'nè*, *Allium Gallicum*, *Portula'ca olera'cea*, *Purslane*, (F.) *Pourpier cultivé*. This plant abounds with a watery and somewhat acid juice; and is often put into soups or pickled with spices. It is regarded as antiseptic and aperient.

**POSCA**, Oxycrate.

**POSE**, Coryza.

**POSIMOS**, Potable.

**POSITION, FALSE**, False position.

**POSOL'OGY**, *Posolo'gia*; from *ποσος*, 'quantity,' and *λογος*, 'a discourse.' Indication of the doses in which the different articles of the materia medica ought to be exhibited.

**POSSET**, *Posse'tum*; from *Posca*, (q. v.) Milk curdled with wine or any acid or treacle. A preparation of beer and milk. *Zythog'ala*.

**POSTBRACHIALE**, Metacarpus.

**POSTERIOR ANNULA'RIS**. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the ring, and little finger, and is inserted into the inside of the tendon on the back of the ring finger. Its *use* is to draw the ring finger inwards.

**POSTERIOR AURIS**, Retrahens auris.

**POSTERIOR INDICIS MANUS**. An internal, interosseous muscle, which arises from the inner or ulnar side of the metacarpal bone of the fore

finger, and is inserted into the inside of the tendon on the back of the fore finger. Its *use* is to draw the fore finger inwards.

**POSTERIOR INDICIS PEDIS**, *Abductor Indicis Pedis*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the fore toe, and second of the small toes, and is inserted into the outside of the root of the first bone of the fore toe. Its *use* is to pull the fore toe outwards.

**POSTERIOR MEDII DIG'ITI MANUS**. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the middle and ring fingers; and is inserted into the inside of the tendon on the back of the middle finger. Its *use* is to draw the middle finger inwards.

**POSTERIOR MEDII DIG'ITI PEDIS**, *Adductor medii digiti pedis*. An external, interosseous muscle, which originates from the contiguous sides of the metatarsal bones of the second and third of the small toes, and is inserted into the outside of the root of the first bone of the second of the small toes. Its *use* is to pull the toe outwards.

**POSTERIOR TERTII DIGITI**, *Adductor tertii digiti*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the 3d and 4th of the small toes, and is inserted into the outside of the root of the first bone of the third of the small toes. Its *use* is, to pull the toe outwards.

**POSTHE**, Penis, Prepuce.

**POSTHIOPLASTIC**, *Posthioplasticus*, from *πρόθιον*, 'the prepuce,' and *πλασσω*, 'I form.' An epithet applied to the operation for restoring the prepuce.

**POSTHITIS**, from *πρόθιον*, 'the prepuce,' and *itis*:—the termination for inflammation. Inflammation of the prepuce.

**POSTHONCUS**, from *πρόθιον*, 'the prepuce,' and *ωνκος*, 'a tumour.' Swelling of the prepuce.

**POSTPOSITIO**. Delay in the return of a paroxysm. It is opposed to *anticipatio*, which means the return of a paroxysm earlier than its accustomed hour.

In this sense we speak of an *anticipating* and *postponing* intermittent.

**PO'TABLE**, *Potab'ilis*, *Potimos*, *Potos*, *Posimos*, 'drinkable.' Water is said to be potable, when it contains atmospheric air; is not brackish; and has no mineral impregnation of consequence.

**POTASH**. So called from the pots or vessels in which it was made;—*Potas'sa*, *Kali*, *Vegetable alkali*, *Gastrinum*.

The **POTASH OF COMMERCE**, *Potassa imp'ra*, *Impure potass*, *Alu'men cat'ivum*, *Cin'eres Rus'sici*, *Subcar'bonas potas'sæ imp'rus*, *Potas'sæ car'bonas impurus*,—the *Pearlash* of commerce is prepared from the ashes of land plants by calcination, solution in water, filtration, and evaporation. It usually consists of subcarbonate of potass, sulphate of potass, muriate of potass, silex, oxide of iron, &c.

From the ashes of lees of wine, and from vine twigs a much purer alkali is obtained. It is called *Cinis infecto'rius*, *C. fæcum*, *Cin'eres clavellati*, *Alu'men fæcum*, *Cendres gravèlles*, *Cendres de sarment*, *Cineres gravellati*.

Another variety of the alkali is afforded by burning argol in a crucible; afterwards powdering and calcining it, till it is nearly white; then dissolving in water, filtering, and evaporating. It is called *Salt of tartar*, *Sal Tartari*, *Kali præparatum e tartaro*, *Kali e tartaro*, *Subcarbonas potassæ purissimus*, *Potassæ Subcarbonas e tartaro*.

Lastly, when wormwood is burnt to ashes, dissolved in water, filtered and evaporated to dryness, it affords another variety of vegetable alkali,—the *Sal absinthii* or *Salt of wormwood*.

Impure potass is used for preparing the subcarbonate for medical use.

**POTASS, ACETATE OF**, *Potassæ acetas*—p. Bisulphate of, *Potassæ supersulphas*—p. Bitartrate of, *Potassæ supertartas*—p. Carbonate of, *Potassæ carbonas*—p. Euchlorate of, *Potassæ murias hyperoxygenatus*—p. Fused, *Potassæ fusa*—p. Hydriodate of, *Potassæ hydriodas*—p. and Iron, tartrate of, *Ferrum tartarizatum*—p. with Lime, *Potassa cum calce*—p. Mephite of, *Potassæ subcarbonas*—p. Muriate of, *Potassæ murias*—p. Nitrate of, *Potassæ nitras*—p. Oxymuriate of, *Potassæ murias hyperoxygenatus*—p. Subcarbonate of, *Potassæ subcarbonas*—p. Sulphate of, *Potassæ sulphas*—p. Sulphate of, acid, *Potassæ supersulphas*—p. Sulphuret of, *Potassæ sulphuretum*—p. Supercarbonate of, *Potassæ carbonas*—p. Supersulphate of, *Potassæ supersulphas*—p. Supertartrate of, *Potassæ supertartas*—p. Tartrate of, *Potassæ tartas*.

**POTASSA**, *Potash*, *P. fusa*—p. Acidulus, *Potass*, oxalate of—p. Basicus, *Potass*, oxalate of—p. Bicarbonas, *P. carbonas*—p. Carbonas, *P. subcarbonas*—p. Carbonas impurus, *Potash of commerce*—p. Chloras, *P. Murias hyperoxygenatus*—p. Chloruretum oxydatum, *P. murias hyperoxygenatus*.

**POTASSA CUM CALCE**, *Potass with lime*, *Calx cum kali puro*, *Caus'ticum commu'nē for'tius*, *Lapis infernalis sive septicus*, *Kali caus'ticum cum calce*, *Potassæ opē calcis parata et ignē fusa*, *Lapis caus'ticus*, (*F.*) *Potasse præparée avec la chaux*, *P. à la chaux*, *Pierre à cautère*. (*Liquor. potassæ* ℥ij, *calcis recent.* ℥j. Boil the solution of potass to ℥j; then add the lime, slaked with water, and mix. *Ph. L.*) Used for the same purposes as the next, but more manageable; being less deliquescent.

**POTASSÆ ET FERRI TARTRAS**, *Ferrum tartarizatum*.

**POTASSA FUSA**, *Potassa*, *Kali causticum*, *Fused potass*, *Caus'ticum commu'nē occurrinum*, *Kali purum*, *Alkali vegetabile fixum causticum*, *Caus'ticum alkalinum*, *C. commu'nē*, *C. potentillæ*, *C. salinum*, *Hydros kalicum*, *Hydras potassæ pure fusa*, *Lapis causticus*, *Lapis causticus chirurgorum*, *Lapis infernalis alcalinus*, *L. Septicus*, *Ruptorium commu'nē* (*F.*) *Potasse caustique*. (Prepared by evaporating the solution of potass to dryness in an iron vessel.) This preparation is generally run into cylindrical moulds, covered with paper, and kept in well corked vessels. It is powerfully escharotic, and is used for forming issues, curing strictures, &c.

**POTASSA, HYDROBROMATE OF**, see Bromine—p. Hyperoxalas, *Potass*, oxalate of—p. Hypertartas, *P. Supertartas*—p. Impura, *Potash of commerce*—p. Liquida, *Liquor potassæ*—p. Ope-

calcis parata et igne fusa, *Potassa cum calce*—p. Oxalac acidulum, *Potass*, oxalate of—p. Oxymurias, *P. murias hyperoxygenatus*—p. Pure fusa hydras, *Potassa fusa*—p. et Sodæ tartas, *Soda*, tartrate of—p. Subcarbonas impurus, *Potash of commerce*.

**POTASSÆ ACETAS**, *Acetas kali*, *Oxytartas*, *Acetas lixivie seu kolicum*, *Alkali tartari aceto saturatum*, *Alkali vegetabile cum aceto*, *Magisterium tartari purgans*, *Terra foliata Tarturi*, *Kali acetatum*, *Sal diureticus*, *Sal Sennerii*, *Acetate of potass*, *Acetatum tartari*. (*Potassæ subcarb.* ℥j, *acid. acet.* fort. ℥ij, *aquæ* ℥ij. Mix and add, by degrees, enough acetic acid to saturate the alkali. Then evaporate till a pellicle is formed, which is to be dried upon bibulous paper; evaporate again in a water bath, and, removing the pellicles, dry them.)

It is generally cathartic and diuretic. Dose ʒj to ʒij or more.

**POTASSÆ CARBONAS**, *Kali æratum*, *Bicarbonas potassæ*, *Deutocarbonas potassæ sive Carbonate of potass*, *Supercarbonate of potass*. This is not caustic, like the subcarbonate of potass, and hence, has been preferred to relieve acidity. (*Solution. potass. subcarb.* cong. j. Pass carbonic acid through the solution until it is saturated, and filter. Evaporate at a heat, not exceeding 120°, and dry the crystals on bibulous paper. *Ph. L.*) Dose, gr. x to ʒss. It is used in forming the soda powders, as well as for its antacid properties.

**POTASSÆ HYDRIODAS**, *Potassii Protohydriodas*, *Potassii protoxidi hydriodas*, *Hydriodate of potass*. If a solution of potass be poured on iodine in its metallic state, an iodate and hydriodate are formed. These may be separated by means of alcohol, which only dissolves the latter of these salts. The hydriodate or rather the Iodide of Potassium, *Kalium Iodatum*, *Kali Hydriodidicum*, *K. Hydriodidum*, *Hydriodas Kalicus*, *Potassii Ioduretum*, may be obtained by evaporation. When the Iodide of Potassium is dissolved in water, it becomes the *Hydriodate of Potassa*. The hydriodate, of soda is made in the same way. Virtues,—those of iodine, (q. v.)

**POTASSÆ MURIAS**, *Sal Digestivus* vel *Sal Ferbrifugus Sylvii*, *Muriate of Potass*, *Spiritus salis marini coagulatus*. Bitter and refrigerant.

**POTASSÆ MURIAS HYPEROXYGENATUS**, *Potassæ Chloras*, *P. oxymurias*, *Oxymuriate of potass*, *Euchlorate of potass*, *Alkali vegetabile salito-dephlogisticatum*, *Chloruretum potassæ oxydatum*, *Haloidum oxygenatum*, *Oxigeno-chloruretum potassæ sive*, *Protochlorate of potassium*, *Kali chloricum*, *Chloras Kalicus depuratus*.

It has been regarded as antineuropathic, and as an alterative purifier of the blood and humours. It is of doubtful efficacy. Dose 3 to 6 grains or more.

**POTASSÆ NITRAS**, *Nitrate of Potass*, *Nitrum*, *Sal nitrum*, *Nitre*, *Saltpetre*, *Sal petra*, *Salsedo muerum*, *Sanguinea*, *Berenicium*, *Halinitrum*, *Protonitrate of Potassium*, *Nitrate of protoxide of Potassium*, *Kali nitricum*, *Nitras kalicum*. *Nitras lixivie*. Obtained from the putrefaction of animal matters, in contact with calcareous or alkaline earths, by elixivation; adding, if necessary, wood ashes to supply the alkaline bases. It is formed, in an impure state, by nature, in warm climates.

It is diuretic and refrigerant, and, in large doses, purgative; externally, cooling and detergent. Dose, gr. x to ℥ss. In large doses, it is an acrid poison.

**POTASSÆ NITRAS FUSUS SULPHATIS PAUCILO MIXTUS;** *Sal prunellæ, Crystal'lus mineral'is, Nitras potassæ cam sulphuræ fusus, Nitrum tubulatum, Lapis prunellæ, Sore throat salt, Mineral crystal, Anod'num mineral'e.* Nitrate of potass, mixed with a little sulphate of potass and run into moulds. Its properties are those of nitre.

**POTASSÆ OXALAS, Superoxalate of Protoxide of Potassium, Ox'ulas Acidulum Potassæ seu Potassæ acidulus seu basicus, Superox'ulas kcal'icua, S. Potassæ, Hyperoxalate Potassæ, Sal Actosellæ, Oxa'lum, Kali oxal'icuum acidulum, Ox'ulas subpotass'icus, Oxalate of Potass, Salt of sorrel.** Prepared from the juice of wood sorrel.

It is refrigerant and is used to make lemonade, &c.

**POTASSÆ SUBCARBONAS, Subcarbonas Kali, Car'bonas Potassæ, Kali præparatum, Sal Herbarum, Calcareous Tartar, Sal Plantarum, Subcarbonate of Potass, Sal Tartari, Sal Absinthii, Mephite of potass, &c.** (See Potash.) A filtered solution of the impure subcarbonate, evaporated to dryness. *Ph. L.*) This deliquescent salt is given in the same cases as the potassæ carbonas, than which it is more caustic and disagreeable.

The Parisian codex has a *Sabcarbonas Potassæ ex tartaro combusto, vulgo Sal Tartari*;—a *Sabcarbonas Potassæ ex deflagrantibus simul tartrate acidulo et Nitrate Potassæ paratus, vulgo Nitram ex tartaro fixum*,—and a *Sabcarbonas Potassæ ex deflagrante cum Carbonibus Nitrate Potassæ paratus, vulgo Nitrum fixum*. They are all used like the preceding.

**POTASSÆ SULPHAS, Kali vitriolatum, Salphas Kali, Kali sulphuricum, Lixiv'ia vitriol'ata, Nitrum vitriolatum Schroed'ri, Sal Sapient'ie, Sal Tartari Sulphuratum, Specificum Paracelsi, Spiritus vitrioli coagulatus Mynsichti, Protosulphate of Potassium, Alkali vegetabil'e vitriolatum, Sal de duobus, Arcanum duplicatum, Nitrum vitriolatum, Tartarum vitriolatum Panac'ea Duobus Holst'ie, Panac'ea duplicata, Sal Polychrestus, Sulphate of Potass.** (The salt, that remains after the distillation of nitric acid, dissolved; the excess of acid saturated with subcarbonate of potass and crystallized.) Purgative and diuretic. Dose ℥ss to ʒj as a laxative; ʒss to ʒij, as a purge.

**POTASSÆ SULPHAS CUM SULPHURE;** *Sal Polychrestus Glasc'ri, Lixiv'ia Vitriol'ata Sulphurea.* (Formed by deflagrating nitrate of potass with sublimed sulphur.) Same virtues as the last. Dose, gr. xv to xxx.

**POTASSÆ SULPHURETUM, Kali sulphuretum, Hepar Sulphuris salinum, H. sulphuris vulgare, Sulphuretum lixiv'ie, S. kal'icum, Hepar Sulphuris, Liver of Sulphur, Salpharet of Potass, (F.) Foie de Soufre.** (Sulphur. lot. ʒj, Potassæ Subcarb. ʒij. Rub them together and place the mixture in a covered crucible upon the fire until they unite.) It has been employed, in affections of the chest, as an expectorant, in the dose of from ʒss or ʒj, largely diluted; but it is chiefly used as a bath or wash in cases of

itch, tinea capitis, and other cutaneous affections.

**POTASSÆ SUPEROXALAS, Potass, oxalate of—p. Tartar acidulus purus, P. supertartar—p. Tartar stibialis seu stibiosus, Antimonium tartarizatum.**

**POTASSÆ SUPERSULPHAS, Supersulphate of Potass, Sal febrifugus of Lem'ery, Acid Sulphate of Potass, Bismulphate of Potass, Superprotosulphate of Potassium.** (The salt remaining after the distillation of nitric acid, dissolved, strained, and crystallized.) It is refrigerant and purgative. Dose ʒss to ʒij.

**POTASSÆ SUPERTARTARIS IMPURUS, Tartarus crudus, Tartarum, Lapis Vini Magnet'ius, Pedagra, (F.) Tartre cru, T. brut.** It is called, also, *Tartarum rubrum* when obtained from red wines, and *Red Argol*; *Tartarum album* or *White Argol*, when from white wines.

Tartar is the saline deposit from wines as they become aged; which attaches itself to the sides of the casks and bottles, in which they are kept. It consists of a considerable quantity of acidulous tartrate of potass, tartrate of lime, silica, alumen, oxyd of iron, maganese, and a red colouring matter, if the wine be red. It is chiefly used for the preparation of cream of tartar.

**POTASSÆ SUPERTARTARIS, Crystal'li Tartari, Tartar Acidulus Potassæ purus, Supertartrate of Protoxide of Potassium, Bitartrate of Potass, Hypertartar Potassæ, Tartar superpotass'icus, T. subpotass'icus, Crystals of Tartar, Cremor Tartari, Cream of Tartar (when in powder,) Supertartrate of Potass.** (F.) *Crème de Tartre.* (The tartar of wine purified.) It requires 120 parts of water at 60° to dissolve it. It is mildly purgative, refrigerant, and diuretic. Dissolved in water, with a small quantity of white wine, some sugar and lemon peel, it forms an agreeable beverage in febrile diseases, under the name of *imperial*. Dose, as a diuretic, ʒj to ʒij; as a purgative ʒss to ʒj.

**POTASSÆ TARTRAS, Kali tartarizatum, Alkali fixum tartarizatum, Tartarum sobriabile, Tartarus tartarizatus, Lixiv'ia Tartarizata, Sal Panchrestum, Tartar Kalinus, T. lixiv'ie, Sal vegetabil'is, Alkali vegetabil'e tartarizatum, Tartrate of Potass, Salt of Tartar.** A saline cathartic in the dose of ʒij to ʒj.

**POTASSÆ CAUSTIQUE, Potassa fusa—p. la Chaux, Potassa cum calce—p. Liquide, Liquor potassæ—p. Preparée avec la chaux, Potassa cum calce.**

**POTASSII DEUTO-CARBONAS, Potassæ carbonas—p. Ioduretum, see Potassæ hydriodas—p. Oxygeno-chloruretum, Potassæ murias hyperoxygenatus—p. Protohydriodas, Potassæ hydriodas—p. Protoxidi hydriodas, Potassæ hydriodas.**

**POTASSIUM, IODIDE of, see Iodine—p. Iodide of, see Potassæ hydriodas—p. Iodo-hydrargyrate of, see Iodine—p. Protoarsenite of, Arsenite of protoxide of potassium—p. Protochlorate of, Potassæ murias hyperoxygenatus—p. Protonitrate of, Potassæ nitras—p. Protoxide of, nitrate of, Potassæ nitras—p. Protoxide of, superoxalate of, Potass, oxalate of—p. Protoxide of, super-tartrate of, Potassæ supertartar—p. Protosulphate of, Potassæ sulphas—p. Superprotosulphate of, Potassæ supersulphas.**

**POTATO, Solanum tuberosum—p. Fly, Lytta vittata—p. Spanish, Convolvulus batatas—p.**

Sweet, *Convolvulus batatas*—*p.* Vine, wild, *Convolvulus panduratus*—*p.* Wild, *Convolvulus panduratus*.

**POTELÉE**, *Hyoscyamus*.

**POTENTIA**, *Forc.*

**POTENTIAL**, *Potentia*'s. An epithet for remedies, which, although energetic, do not act till some time after their application. The caustic alkalies, for instance, are called *Potential cauterics* in contradistinction to the hot iron, which is termed *actual*.

**POTENTILLA ANSERINA**, *Argentine*, *Chenoboscou*, *Argentaria*, *Anserina*, *Silver Weed*, *Wild Tansy*. (F.) *Argentine*, *Potentilla*. The leaves are mildly astringent and tonic.

**POTENTILLA REPTANS**, *Pentaphyllum*, *Quinquifolium*, *Common cinquefoil*. (F.) *Quintefeuille*. The roots are possessed of astringent properties.

**POTERIUM SANGUISORBA**, *Pimpinella saxifraga*.

**POTEX**, *Anus*.

**POTHOS FÆTIDA**, *Dracontium fœtidum*.

**POTIMOS**, *Potable*.

**POTIO CALCIS CARBONATIS**, *Mistura cretæ*—*p.* Effervescens anti-emetica, *Potion of Riverius*—*p.* Leniens, *Looch ex ovo*—*p.* Oleosa, *Looch ex ovo*—*p.* Picea, see *Pinus sylvestris*.

**POTION**, *Potio*; from *potō*, 'I drink.' A liquid medicine, from 4 to 8 ounces or more in quantity, the composition of which varies, and which is administered in divided doses. It corresponds to the English *mixture*. (q. v.)

**POTION PECTORALE**, *Looch ex ovo*.

**POTION OF RIVERIUS**. A mixture of *Lemon Juice* and *Subcarbonate of Potass*,—generally given in a state of effervescence. It is the *Potio effervesceens anti-emetica, dicta Riverii*, of the Parisian codex. The name, in the codex, indicates its use.

**POTIRON**, *Cucurbita pepo*.

**POTOS**, *Potable*.

**POTUS**, *Drink*—*p.* Hippocraticus, *Claret*.

**POU**, *Pediculus*.

**POUCE**, *Pollex*, see *Digitus*.

**POUDRE**, *Powder*, *Pulvis*—*p.* *Absorbante et anti-acide*, *p.* *Pulvis de magnesiâ compositus*—*p.* *d'Alun composée*, *Pulvis sulphatis aluminæ compositus*—*p.* *Antiarthritique amère*, *Pulvis de amaris compositus*—*p.* *Antiasthmatique*, *Pulvis de sulphure et scillâ*—*p.* *Antimonial composée ou de James*, *Antimonial powder*—*p.* *Aromatique*, *Pulvis cinnamomi compositus*—*p.* *d'Asarum composée dite sternutatoire*, *Pulvis asari compositus*—*p.* *Balsamique*, *Pulvis myrrhæ compositus*—*p.* *de Birekman*, *Pulvis de aro compositus*—*p.* *de Cannelle composée*, *Pulvis cinnamomi compositus*—*p.* *Cathartique*, *Pulvis scammonæ compositus*—*p.* *de Chypre*, see *Cladonia rangiferina*—*p.* *du Comte de Palme*, *Magnesiæ carbonas*—*p.* *Cornuachine*, *Pulvis cornuachini*—*p.* *de Corne brûlée avec l'Opium*, *Pulvis cornu usui cum opio*—*p.* *de Craie composée*, see *Pulvis cretæ compositus*—*p.* *de Craie composée avec opium*, *Pulvis cretæ compositus cum opio*—*p.* *de Dover*, *Pulvis ipecacuanhæ compositus*—*p.* *de Gomme adragant composée*, *Pulvis tragacanthæ compositus*—*p.* *de Gomme gutte*, *Pulvis e gummi guttâ*—*p.* *Hydragogue*, *Pulvis e gummi guttâ*—*p.* *Incisive*, *Pulvis de sulphure et scillâ*—*p.* *d'Ipecacuanha et opium*, *Pulvis*

**POULAIN**, *Bubo*.

**POULET (VIN DE)**, (F.) *Pullet Wine*. A disgusting preparation, made by infusing the excrement of the pullet in white wine. According to Nysten, it is employed by the vulgar in France in a number of diseases, and especially in falls, contusions, &c.

**POULIOT**, *Mentha pulegium*.

**POULS**, *Pulse*—*p.* *Abdominal*, *Pulsus inferior*—*p.* *des Adultes*, *Pulse*, natural—*p.* *Agité*, *Pulsus fortis*—*p.* *Bas*, *Pulse*, low—*p.* *Capital*, *Pulse*, nasal—*p.* *Combiné*, *Pulse*, complex—*p.* *Compliqué*, *Pulse*, complex—*p.* *Composé*, *Pulse*, complex—*p.* *Concentré*, *Pulse*, contracted—*p.* *défaillant*, *Pulsus*, deficient—*p.* *Déprimé*, *Pulse*, depressed—*p.* *de la Diarrhée*, *Pulse*, intestinal—*p.* *Dur*, *Pulse*, hard—*p.* *Élevé*, *Pulse*, ardent—*p.* *Embarrassé*, *Pulsus intricatus*—*p.* *de l'Estomac*, *Pulse*, stomachal—*p.* *Étroit*, *Pulsus strictus*—*p.* *de l'Expectoration*, *Pulse*, pectoral—*p.* *Faible*, *Pulse*, feeble—*p.* *du Foie*, *Pulse*, hepatic—*p.* *Grand*, *Pulse*, large—*p.* *Insensible*, *Pulsus deficientis*—*p.* *Intercalent*, *Pulse*, intermittent—*p.* *des Intestins*, *Pulse*, intestinal—*p.* *Languissant*, *Pulse*, languid—*p.* *Lent*, *Pulse*, slow—*p.* *de la Matrice*, *Pulsus uterinus*—*p.* *Modéré*, *Pulse* natural—*p.* *Mou*, *Pulse*, soft—*p.* *de Nez*, *Pulse*, nasal—*p.* *Ondoyant*, *Pulse*, undulating—*p.* *Ondulant*, *Pulse*, undulating—*p.* *Palpitant*, *Pulse*, tremulous—*p.* *Parfait*, *Pulse*, natural—*p.* *Petit*, *Pulse*, small—*p.* *Plein*, *Pulse*, full—*p.* *Precipité*, *Pulse*, frequent—*p.* *Profond*, *Pulse*, deep—*p.* *Prompt*, *Pulse*, sharp—*p.* *Rare*, *Pulse*, slow—*p.* *Rebondissant*, *Pulsus dicrotus*—*p.* *Redoublé*, *Pulsus dicrotus*—*p.* *des Regles*, *Pulsus uterinus*—*p.* *Roide*, *Pulse*, tense—*p.* *Serraté*, *Pulsus eririnus*—*p.* *Serré*, *Pulse*, contracted—*p.* *de la Sucr*, *Pulsus sudoralis*—*p.* *Tardif*, *Pulse*, slow—*p.* *Tendu*, *Pulse*, tense—*p.* *Tremblant*, *Pulse*, tremulous—*p.* *de l'Urine*, *Pulsus urinialis*—*p.* *Véhément*, *Pulsus fortis*—*p.* *Ventral*, *Pulsus inferior*—*p.* *Vide*, *Pulsus vacuum*—*p.* *Vif*, *Pulse*, sharp—*p.* *Vite*, *Pulse*, sharp.

**POUNCE**, *Sandarac*.

**POUND**, *Libra*, *Litra*,  $\lambda\iota\tau\rho\alpha$ , *Lat.* *Pondo*, *Bage'dia*, (of twelve oz.) *Barda'dia*, (F.) *Livre*, from *pon'derē*, 'to weigh.' A weight, consisting of twelve ounces troy, or sixteen ounces avoirdupois. See *Weights and Measures*.

**POURPIER CULTIVE**, *Portulaca*.

**POURPRE BLANC**, *Miliary fever*.

**POURRITURE D'HÔPITAL**, *Hospital gangrene*.

**POUS**, *Pes*.

POUSSE, Pursiness.

POWDER, (F.) *Poudre*. See Pulvis.

POWDER OF ALOES, compound, Pulvis aloes compositus—p. Alum, compound, Pulvis sulphatis aluminæ compositus—p. of Aloes with canella, Pulvis aloes cum canellâ—p. Antimonial, Chenevix's, Antimonial powder—p. of Arum, compound, Pulvis de arô compositus—p. of Asarabacca, compound, Pulvis asari compositus—p. of Bladder-wrack, yellow, Pulvis quercus marinæ—p. Bleaching, Calcis chloridum—p. Camboge, Pulvis e gummi guttâ—p. Cardinal del Lugo's, Cinchona—p. of Chalk, compound, Pulvis cretæ compositus—p. of Chalk with opium, compound, Pulvis cretæ compositus cum opio—p. of Cinnamon, compound, Pulvis cinnamomi compositus—p. of Contrayerva, compound, Pulvis contrayervæ compositus—p. Countess's, Cinchona—p. Countess of Kent's, Cantianus pulvis—p. Cyprus, Hibiscus abelmoschus—p. Dover's, Pulvis ipecacuanhæ compositus—p. Earl of Warwick's, Pulvis cornachini.

POWDER OF FAYNARD. A celebrated powder for arresting hemorrhage, said to be nothing more than the charcoal of beech wood finely pulverized.

POWDER FEVER, Schwanberg's, Antimonial powder—p. Ginger-beer, see Amonium zingiber—p. Gout, Duke of Portland's—p. Pulvis Duci, Portlandiæ—p. of Burnt hartshorn with opium, Pulvis cornu cervi cum opio—p. Ipecacuanha compound, Pulvis ipecacuanhæ compositus—p. of Jalap, compound, Pulvis jalapæ compositus—p. James's, factitious, Antimonial powder—p. Jesuits', Cinchona—p. of Kino, compound, Pulvis kino compositus—p. Lemonade, see Lemonade—p. of Magnesia, compound, Pulvis de magnesiâ compositus—p. of the Marquis, Marchionis pulvis—p. Mead's, against the bite of a Mad dog, Pulvis antilyssus—p. Myrrh, compound, Pulvis myrrhæ compositus—p. Scammony and aloes, Pulvis scammonii cum aloë—p. Scammony, compound, Pulvis scammonii compositus—p. of Senna, compound, Pulvis sennæ compositus—p. Sneezing, see Veratrum album—p. Spruce beer, see Spruce beer—p. Tennant's, Calcis chloridum—p. Tooth, Dentifricium—p. Tragacanth, compound, Pulvis tragacanthæ compositus.

POWDERS, SODA. *Sodæ carb.* ℥ss, in each blue paper; *tarturic acid*, gr. xxv, in each white paper; for half a pint of water. A pleasant, cooling drink; taken during the effervescence.

POWER, Faculty—p. Inherent, Irritability—p. Tonic, Irritability.

POX, Syphilis, Variola—p. Chicken, Variocella—p. French, Syphilis—p. Nodde, Syphilomania—p. Small, Variola—p. Swine, see Variocella—p. Water, see Variocella.

POZZUOLI, MINERAL WATERS OF. P. is in the neighbourhood of Naples. The springs are, 1. *Acqua della pietra*, Temp. 91° Fah. 2. *Acqua di Cavalcanti*, Temp. 100°, *A. di subveni homini*, Temp. 102°, *A. del cantarello*, Temp. 86 to 89; and that of the Temple of Serapis in Pozzuoli, Temp. 102 to 107. The last contains carbonic acid, carbonates of lime, magnesia, alumina, and iron, carbonate of soda, muriate of soda, sulphate of lime, and silica.

PRACTICE OF PHYSIC, Therapeutics.

PRACTITIONER, GENERAL, Surgeon apothecary.

PRÆBIUM, Dose.

PRÆCIPITANS MAGNUM, Sepia.

PRÆCIPITATUM ALBUM, Hydrargyrum præcipitatum.

PRÆCIPITATUS RUBER, Hydrargyri nitrico-oxydum.

PRÆCISIO, Circumcision.

PRÆCOCIA, Prunus Armeniaca.

PRÆCOCITY, Præotia.

PRÆCOGNITIO, Prognosis.

PRÆCORDIA, from *præ*, 'before,' and *cor*, 'the heart.' The diaphragm: (q. v.) also, the abdominal viscera, and the epigastrium.

The PRÆCORDIAL RE'GION is the epigastric region. Also, and more properly, the region of the heart.

PRÆCORDIUM, *Fossette du cœur*.

PRÆCOX MATURITAS, Præotia.

PRÆDICTIO, Prognosis.

PRÆFOCATIO, Orthopnœa, Suffocation—p. Faucium, Angone—p. Matricis, Hysteria.

PRÆFOCATION, Strangulatio uterina.

PRÆGNANS, Pregnant.

PRÆGNATIO, Pregnancy.

PRÆGUSTATIO, *Avant-gout*.

PRÆHENSIO, Pprehension.

PRÆLINGUA. The anterior part or tip of the tongue.

PRÆLUM, Press.

PRÆLUMBARIS, Prelumbar.

PRÆPARATIO, Preparation.

PRÆPARATUM, Preparation.

PRÆPOTIO, Propotismos.

PRÆPUTIUM, Prepuce.

PRÆSCRIPTIO, Prescription.

PRÆSEPIOLUM, Alveolus.

PRÆSEPIUM, Alveolus.

PRÆSERVATORIA INDICA'TIO. A preservative indication: one proper for preventing the development of disease.

PRÆSPINALIS, Prespinal.

PRÆTIBIALIS, Pretibial.

PRASINUM VIRIDE, Cupri subacetat.

PRASINUS, Porraceous.

PRASITES, from *præsium*, 'horehound.' Wine, in which the leaves of horehound have been infused.

PRASIUM, Marrubium.

PRASUM, Allium Prasum.

PRAXIS, Action.

PRÆCIPITATE, RED, Hydrargyri nitrico-oxydum—p. white, Hydrargyrum præcipitatum.

PRÆCIPITATION, *Præcipitatio*. (F.) *Præcipité*. The action by which a body abandons a liquid in which it is dissolved; and becomes deposited at the bottom of the vessel. The matter so thrown down, or precipitated, is called a *precipitate*.

PRÆCIPITATION DE LA MATRICE, Procidencia uteri.

PRÆCIPITÉ BLANC, Hydrargyrum præcipitatum.

PRECURSORY, *Præcurso'rius*; from *præ*, 'before,' and *curro*, 'I run.' That which precedes.

PRECURSORY OR PREMON'ITORY SIGNS OF SYMPTOMS, (F.) *Signes précurscurs*, *S. avant-coureurs*, are those which indicate an approaching disease.

**PREDISPOSITION**, *Prædispositio*, from *præ*, 'before,' and *disponere*, 'to dispose.' That constitution or condition of the body, which disposes it to the action of disease under the application of an exciting cause.

Thus, in hereditary diseases, the conformation is such, that but a slight exciting cause may be required to produce them.

When the disease arises, solely, from the predisposition, or under the additional influence of an extremely slight, exciting cause, it is, by some, termed a *disposition*.

**PREDORSAL**, *Prædorsalis*, from *præ*, 'before,' and *dorsum*, 'the back.'

The **PREDORSAL REGION** of the vertebral column is the anterior surface of the dorsal region.

**PRÆ-DORSO ATLOIDIEN**, *Longus colli*.

**PRÆ-DORSO CERVICAL**, *Longus colli*.

**PREGNANCY**, *Utero-gestatio*, *Prægnatio*, *Impregnatio*, *Graviditas*, *Enchymon*, *Cyesis*, *Eccyc'sis*, *Encymosis*, *Cyphoria*, *Gestation*, *Fætation*. (F.) *Grossesse*. The state of a female who has, within her ovary or womb, a fecundated germ, which gradually becomes developed in the latter receptacle. When placed in the cavity of the uterus,—by virtue of the vital principle which animates it, it becomes attached to the inner surface of that viscus, and obtains from it indirectly the nutriment, necessary for its gradual development, during the space of ten lunar months or 280 days,—the ordinary term of gestation, although the period may be protracted perhaps to 300 days,—at the expiration of which parturition occurs.

Pregnancy is commonly limited to a single fœtus; at times, the uterus contains two or three.—See Reproduction. Occasionally, one or two moles—the degenerated products of conception—alone occupy the uterus:—at other times, a fœtus likewise exists. In certain cases, and owing to accidental circumstances, the fecundated ovum remains in the ovarium, or is arrested in the Fallopian tube.

Pregnancy has, accordingly, been distinguished into, 1. *Natural* or *uterine*, when the fœtus is carried in the cavity of the womb: and, 2. *Preternatural* or *extra-uterine*, *Paracycl'sis* seu *Eccyc'sis*, *Dystocia*, *Dyscyc'sis extra-uterina*,—when it occurs in the ovarium, tube, or cavity of the abdomen.

During pregnancy, the female experiences remarkable changes in the condition of her organs and functions. The genital apparatus is, of course, most affected. The uterus changes its shape, situation, size, and texture.

The usual signs of pregnancy are,—suppression of the catamenia; the abdomen gradually enlarging and forming a hard tumour; the umbilicus prominent in the latter months; the breasts increasing in size; the areola round the nipple becoming darker and the follicles more developed; a bluish tint of the vagina after the 4th week; about the 5th month, the evidence by *Ballotement*, (q. v.) and the placental *souffle* and sound of the fœtal heart heard on auscultation; the motion of the fœtus perceptible, and the neck of the uterus diminishing in length at the advanced periods.

**PREGNANCY ABDOMINAL**, *Eccyc'sis abdominalis*. (F.) *Grossesse abdominale*. That in

which the ovum has escaped into the cavity of the abdomen.

**PREGNANCY, AFÆTAL**, *Pregnancy without a fatus*, (F.) *Grossesse afatale*, *G. sans fatus*. Pregnancy produced by a false or degenerate conception, or any other affection, which has given place to unusual development of the uterus. Madame Boivin includes in this class, *Sarco-hysterie*, *hydro-hysterie*, *gazo-hysterie*, and *hemato-hysterie prægnancie*, (q. v.)

**PREGNANCY, BIGEMINAL**, (F.) *Grossesse bigéminal*, *Double pregnancy*. Pregnancy, in which there are twins in utero.—Madame Boivin.

**PREGNANCY, COMPLEX**, (F.) *Grossesse complexe*, *G. inter-extra-utérine*, is when the womb, besides a fœtus, contains much water, hydaticids, a mole, &c.

**PREGNANCY, COMPOUND**, (F.) *Grossesse composée*, is when there are two or three fetuses in the cavity of the uterus.

**PREGNANCY, DOUBLE**, *Pregnancy, bigeminal*.

**PREGNANCY, FALSE**, *Graviditas spuria*, (F.) *Grossesse fausse ou apparente*, *Pseudocyc'sis*. Authors have called thus different affections of a more or less serious character, which resemble pregnancy; so as, at times, to impose upon the best informed practitioners. These diseases may be seated in the uterus or its dependencies; in the intestines or some other part of the abdomen. They may be:—a mole, hydaticids, water, blood, or polypus distending the parietes of the uterus:—chronic enlargement of the uterus; the development of tumours, &c., in its substance:—scirrhus; dropsy of the ovary; ascites; tympanitis, &c.

**PREGNANCY, FÆTAL**, (F.) *Grossesse fætale*. Pregnancy, in which there is a fœtus, or more than one, in the uterus or out of it. Madame Boivin puts in this class—the *solitary*, *bigeminal*, *trigeminal*, and *sarco-fatal* pregnancies, which form the first order; and the *tubal*, *ovarial*, and *abdominal*, which constitute the second.

**PREGNANCY, GAZO-HYSTERIC**, (F.) *Grossesse Gazo-hystérique*. A fœtal pregnancy, caused by development of air or gas in the cavity of the womb.—Madame Boivin.

**PREGNANCY, HEMATO-HYSTERIC**, (F.) *Grossesse hémato-hystérique*. A fœtal pregnancy, caused by accumulation of blood in the uterus.—Mad. Boivin.

**PREGNANCY, HYDRO-HYSTERIC**, (F.) *Grossesse hydro-hystérique*. A fœtal pregnancy, occasioned by the secretion and accumulation of serous fluid in the uterus.

**PREGNANCY, INTERSTITIAL**, *Graviditas in uteri substantiâ*, *Graviditas interstitialis*. The development of the embryo in the proper substance of the uterus. The case generally terminates fatally at an early period of gestation: the thin external paries of the uterus being ruptured, and the ovum passing into the abdominal cavity.

**PREGNANCY, MORBID**, *Paracycl'sis*, *Dystocia*, *Dyscyc'sis*. The progress of pregnancy disturbed or endangered by the supervention of general or local disorder.—Good.

**PREGNANCY, OVARIAL**, (F.) *Grossesse ovarienne* ou *de l'ovaire*, *Eccyc'sis ovaria*. Pregnancy in which the fœtus is developed in the interior of the ovary.

**PREGNANCY, PRETENDED.** The criminal act of a female, who, not having been delivered, presents an infant as having been born of her. (F.) *Supposition de part.* [This term, in French, likewise includes the case of a female, who, having been delivered of a dead child, substitutes for it a living child which is not hers.]

**PREGNANCY, SARCO-FÆTAL, (F.)** *Grossesse sarco-fœtale.* Pregnancy, in which there are one or more fœtuses, and one or more moles.—Mad. Boivin.

**PREGNANCY, SARCO-HYSTERIC, (F.)** *Grossesse Sarcô-hystérique.* A fœtal pregnancy formed by moles, hydatids, or a false conception.—Mad. Boivin.

**PREGNANCY, SOLITARY, (F.)** *Grossesse solitaire ou simple.* Pregnancy in which there is a single fœtus.—Mad. Boivin.

**PREGNANCY, TRIGEMINAL, (F.)** *Grossesse trigéminal ou triple.* Pregnancy in which there are three fœtuses in the cavity of the uterus.—Mad. Boivin.

**PREGNANCY, TUBAL, (F.)** *Grossesse tubaire, Ectyë'sis tubalis.* Pregnancy where the fœtus remains and is developed in the Fallopian tube.

**PREGNANCY, UTERO-ABDOMINAL, (F.)** *Grossesse utéro-abdominale.* Pregnancy consisting of two fœtuses; one in the uterus—the other in the abdominal cavity.—Mad. Boivin.

**PREGNANCY, UTERO-OVARIAL, (F.)** *Grossesse utéro-ovarienne.* Pregnancy with two fœtuses, one in the womb—the other in the ovary.

**PREGNANCY, UTERO-TUBAL, (F.)** *Grossesse utéro-tubaire.* Pregnancy in which there is, at the same time, a fœtus in the womb and another in the Fallopian tube.

**PREGNANT, Prægnans, Encarpos, (F.)** *Eueinte.* One in a state of pregnancy;—one with child.

**PREHENSIO, Catalepsy, Epilepsy.**

**PREHENSION, Præhensio,** from *prehendere*, 'to lay hold of.'

**PREHENSION OF FOOD** is the act of carrying it to the mouth, and introducing it into that cavity. It is, also, called *Assumptio, Proslëp'sis, Prosphora.*

**PRÊLE, Hippuris vulgaris.**

**PRÉLOMBAIRE, Prelumbar.**

**PRÉLOMBO-PUBIEN, Psoas parvus—p. Trochantin, Psoas magnus.**

**PRELUM, Press.**

**PRELUMBAR, Prælumbaris, (F.)** *Prélombaire,* from *præ*, 'before,' and *lumbi*, 'the loins.' That which is placed before the loins. The prelumbar surface of the spinal column is the anterior surface of the lumbar portion.

**PREMONITORY. See Precursory.**

**PREPARATION, Preparatio.** The act of making ready any substance whatever that has to be employed for any purpose.

Also, the product of any pharmaceutical operation;—*Præparatum.*

Any part of the human body, preserved for the uses of the anatomist, is so called.

**PREPUCE. Præputium, Epagógium, Posthë,** the *Foreskin.* The prolongation of the integuments of the penis, which covers the glans.

The prepuce is composed of two membranous layers: one external or cutaneous; the other internal or mucous, separated by cellular membrane. The mucous membrane lines the inner

surface of the cutaneous layer till beyond the glans, when it is reflected over the latter; forming, behind the corona, a small *cul-de-sac* above the corpora cavernosa, which is interrupted by a triangular duplicature of the mucous membrane, called the *frænum*, fixed in the furrow at the inferior part of the glans, and terminating at a little distance from the orifice of the urethra. The clitoris is covered by a semilunar fold formed by a continuation of the skin of the labia. It is called *Præputium clitoridis.*

**PRESBYOPIA, Presbytia.**

**PRESBY'TIA, Presby'opia, Ambly'opia proximo'rum, Visus senilis, (F.)** *Vue longue,* from *πρεσβυς*, 'an old person.' Condition of vision, common in old persons, and which consists in the circumstance of near objects being confusedly seen, whilst those at a greater distance are clearly distinguished. It is supposed to depend generally on diminution of the convexity of the cornea; whence results an alteration in the convergency of the rays, so that they form a focus behind the retina. This defect is remedied by the use of convex glasses, which augment the convergence of the luminous rays.

It is, also, called *Long-sightedness, Parop'sis longin'qua, Dys'opia proximo'rum.*

**PRESCRIPTION, Præscriptio, Anag'raphë,** from *præ*, 'before,' and *scrib'ere*, 'to write.' **For'mula, (F.)** *Formule, Ordonnance.* The formula which the physician writes for the composition of medicine, adapted to any case of disease. A prescription should be as simple as possible, and should bear, upon its face, the evidence of the objects to be fulfilled by it. No article should form part of it, unless adapted for serving some useful purpose.

A prescription has been divided into four parts:—the *basis* or principal ingredient of the prescription; the *adjuvans*, or that which is designed to promote the action of the former; the *corrigens*, or that intended to correct its operation or obviate any unpleasant symptom, which it may be apt to produce; and the *constit'uens, excipient*, or substance which gives to the other ingredients consistence or form. All these are seen in the following formula for cathartic pills:—

|   |                   |         |                     |
|---|-------------------|---------|---------------------|
| ℞ | Aloes,            | ʒj.     | <i>Basis.</i>       |
|   | Hyd. submur.      | ℞.x.    | <i>Adjuvans.</i>    |
|   | Olei Carui,       | gtt. v. | <i>Corrigens.</i>   |
|   | Syrupi,           | q. s.   | <i>Constituens.</i> |
|   | fiant Pilulæ, xx. |         |                     |

It is obvious, however, that most prescriptions are more simple than this. The basis, for example, may require neither adjuvant, corrigent, nor constituent.

Dr. Paris has given the following synopsis of the principles of medicinal combination, which may serve as an instructive guide to the prescriber:—

TABLE.

OBJECT I.

TO PROMOTE THE ACTION OF THE BASIS.

A. By combining the several different forms or preparations of the same substance.

*B.* By combining the basis with substances which are of the same nature; i. e. which are individually capable of producing the same effects, but with less energy than when in combination with each other.

*C.* By combining the basis with substances of a *different nature*, and which do not exert any chymical influence upon it, but are found by experience, or inferred by analogy, to be capable of rendering the stomach or system more susceptible of its action.

OBJECT II.

TO CORRECT THE OPERATION OF THE BASIS BY OBTAINING ANY UNPLEASANT EFFECTS IT MIGHT BE LIKELY TO OCCASION, AND WHICH WOULD PERVERT ITS INTENDED ACTION, AND DEFEAT THE OBJECT OF ITS EXHIBITION.

*A.* By *chymically* neutralizing or *mechanically* separating the offending ingredient.

*B.* By adding some substance calculated to guard the stomach or system against its deleterious effects.

OBJECT III.

TO OBTAIN THE JOINT OPERATION OF TWO OR MORE MEDICINES.

*A.* By uniting those medicines, which are calculated to produce the *same ultimate* results, but by modes of operation totally different.

*B.* By combining medicines, which have entirely different powers; and which are required to obviate different symptoms, or to answer different indications.

OBJECT IV.

TO OBTAIN A NEW AND ACTIVE REMEDY, NOT AFFORDED BY ANY SINGLE SUBSTANCE.

*A.* By combining medicines, which excite different actions in the stomach and system, in consequence of which *new* or *modified results* are produced.

*B.* By combining substances, which have the property of acting *chymically* upon each other: the results of which are:—

- a.* The formation of new compounds;
- b.* The decomposition of the original ingredients, and the development of the more active elements.

*C.* By combining substances, between which no other change is induced than a diminution or increase in the *solubility* of the principles in which their medicinal virtues reside.

*a.* By the intervention of substances that act *chymically*.

*b.* By the addition of ingredients, whose operation is entirely *mechanical*.

OBJECT V.

TO AFFORD AN ELIGIBLE FORM.

*a.* By which the *efficacy* of the remedy is enhanced.

*b.* By which its *aspect* or *flavour* is rendered more agreeable, or its mode of administration more convenient.

*C.* By which it is *preserved* from the spontaneous decomposition to which it is liable.

[The vocabulary in the Author's "Medical Student," p. 117, Philad. 1837, will aid the stu-

dent, not only in translating, but in writing his prescriptions *more solito*.]

PRESENTATION, from (Lat.) *prasens*. The part of a fœtus which is felt *presenting*, on an examination *per vaginam*.

When the head presents, and especially the vertex, or the feet, knees, or breech, the presentation is said to be *natural*: when any other part, *preternatural*: and the labour is styled *perverse*, or *preternatural*, *Parodynia perversa*, *Dystocia percer'sa*, *Cross-birth*, (F.) *Accouchement contre nature*.

When any other part, besides the head, feet, knees, or breech presents, the operation of *turning* (q. v.) becomes necessary. See Parturition.

PRESIS, Swelling.

PRESLE, *Hippuris vulgaris*.

PRESPI'NAL, *Praspinu'lis*, from *præ*, 'before,' and *spina*, 'the spine.' That which is situate before the spine. The prespinal surface of the vertebral column is the anterior surface.

PRESS, *Prælum*, *Prebum*, *Pressorium*, *Piester*, *Pieste'rión*, (F.) *Pressoir*, *Presse*. An instrument for subjecting matters to considerable pressure, for the purpose of separating their juices or oils.

PRESS OF HEROPHILUS, Torcular Herophili.

PRESSE-ARTÈRE. An instrument, invented by Deschamps, for the immediate compression of arteries. It is composed of a plate, 6 or 7 lines long, and 3 broad, and of a rod or stem, 2 inches long, placed perpendicularly above the plate and riveted. At each extremity of the plate is a hole, through which each of the ends of the ligature, to be placed upon the artery, is passed. The ligature is then to be tightened by drawing the ends, and fixing them to the perpendicular rod. This *presse artère* or *serre-artère*, surrounded with charpie, remains in the wound, until there is no longer danger of hemorrhage. The ligature is then cut, and the instrument withdrawn.

It is an unnecessary instrument.

PRESSE-URETHRE, *Jugum Penis*. A kind of forceps of elastic iron, the branches of which, padded, may be approximated or separated by means of a screw. The penis is introduced between the branches, one of them being applied to the urethra, and the screw is tightened so as to exercise a degree of pressure, sufficient to bring the parietes of the canal in contact.

This instrument is sometimes used in incontinence of urine, to prevent the constant discharge of that fluid.

PRESSIO, Pressure.

PRESSIO' ABDOMINALE, Pressure abdominal.

PRESSOIR, Press—*p. d' Hérophile*, Torcular Herophili.

PRESSORIUM, Press.

PRESSURE, *Pressio*, from *premo*, 'I press.' The action of pressing.

ABDOMINAL PRESSURE, (F.) *Pression abdominale*. A mode of examination, by means of which the sensibility, size, suppleness, or hardness of any morbid abdominal viscus may be compared, in these respects, with its healthy condition. Bichat proposed, with the view of exploring the state of the thoracic organs, to exert a

pressure from below upwards on the abdominal organs, so as to crowd them upon the diaphragm, and thus to diminish the dimensions of the cavity of the chest, noticing to what extent respiration was affected by this action. No great information can, of course, be derived from it.

**PRETIBIAL**, *Pratibialis*, from *pra*, 'before,' and *tibia*, 'the tibia.' That which is situate before the tibia; as the *ilio-pretibial* and *ischio-pretibial* muscles.

**PREVENTIVE, ROYAL**. An empirical preparation used as a prophylactic against the venereal virus. It is a solution of *acetate of lead*.—the *Liquor Plumbi Subacetatis dilutus*, (q. v.)

**PRIAPEA**, *Nicotiana rustica*.

**PRIAPIS'COS**. Same etymon as the next. Name of a piece of wood, which forms part of the *scamnum Hippocraticum*. Paulus of Ægina calls thus a tent of linen shaped like the penis.

**PRIAPISMUS**, *Tenti'go*, *T. Penis*, *Pr'apism*, *Horn-colic*, (*vulg.*) *Enta'sia Priapis'mus*, *Rhopal'is'mus*, *Satyriasis*, (q. v.) from *Πριαπος*, *Priapus*, 'the male organ.' Constant and distressing erection, without any voluptuous idea or desire for venery. It is often symptomatic; and sometimes the immediate result of morbid causes,—of the action of cantharides, for example. The application of cold liquids to the penis, and the internal use of opium and camphor are the means usually had recourse to for its removal.

**PRIAPUS**, Penis—p. Cervi, see Cervus—p. Ceti, Leviathan penis.

**PRICKING**. Sax. *prickean*, (D.) *pricken*, (F.) *Picotent*. A variety of pain, compared to that which pointed bodies would occasion.

**PRIDE OF CHINA**, *Melia azedarach*—p. of India, *Melia azedarach*.

**PRIMÆ VIÆ**. The *first passages*. The stomach and intestinal canal:—the lacteals being the *secun'da viæ*, or *second passages*.

**PRIMÆ VIÆ**, Ways, digestive.

**PRIMEVÈRE**, *Primula veris*.

**PRIMIP'ARA**, from *primus*, 'first,' and *parere*, 'to bring forth.' A name given to females, who bring forth for the first time.

**PRIMI-STERNAL**, *Primi-sternal'is*, from *primus*, 'the first, and *sternum*, 'the sternum.' M. Bèclard has called *os primi-sternal*, or *clavio-sternal*, the first bony portion of the sternum.

**PRIMI'TIÆ**. The *first waters*, or the *waters discharged before the extrusion of the fœtus*.

**PRIMROSE, EVENING**, *Oenothera biennis*.

**PRIM'ULA VERIS**, from *prim'ulus*, 'the beginning;' so called, because it flowers in the beginning of the spring. *Verbas'culum*, *Paral'ysis*; the *Cowslip*, *Paigil*, or *Peagle*, (F.) *Primevère*. Family, *Primulacæ*. *Sex. Syst.* Pentandria Monogynia. The flowers have been considered to be mildly tonic, antispasmodic, and anodyne.

**PRIMULA VULGARIS**. The leaves and roots of this plant have been used as sternutatories.

**PRINCEPS**, Rectum.

**PRINCIPE CRYSTALLIZABLE DE DEROSNE**, Narcotine.

**PRINCIPES IMMÉDIATS**, Principles immediate.

**PRINCIPIUM**, Arche, Element—p. Acidificans, Oxygen—p. Adstringens, Tannin—p.

Hydrogeneticum, Hydrogen—p. Hydroticum, Hydrogen—p. Oxygenans, Oxygen—p. Scytophobicum, Tannin.

**PRINCIPLE, COL'OURING, OF THE BLOOD**. A name, given to the immediate principle in animals, to which the blood owes its red colour. It is solid, inodorous, and insipid. When recently separated from blood, it has a purple-red colour. When distilled, it furnishes, amongst other products, a purple oil. It is insoluble in water; but, if diluted with that liquid, acquires a vinous red hue. It communicates a red colour to the albumen of the blood, and affords, on analysis, iron, to which the colour is perhaps owing.—See *Hæmatine*.

**PRINCIPLES, IMMEDIATE, (F.)** *Principes immédiats*, *Matériaux immédiats*. A name given to a considerable number of substances, composed at least of three elements, and which are obtained from animals and vegetables, without alteration, by simple processes, and, in some measure, immediately.

**IMMEDIATE PRINCIPLES OF ANIMALS**, *Proximate principles*, *Organic Elements*, *Compounds of Organization*. These are divided into acid principles, fatty principles, and principles which are neither fat nor acid. The first include the *uric*, *rosacic*, *purpuric*, *allantoic*, *caseic*, *butyric*, &c. The fatty principles are:—*stearine*, *elaine*, *cholesterine*, &c.; and the last division includes the most important compounds of organization:—*fibrine*, *gelatine*, *albumen*, *urea*, *picromel*, *osmazome*, &c.

**PRINCIPLES, PROXIMATE, Pr. immediate.**

**PRINOS**, *P. verticillatus*, *Black Alder*, *Virginia Winter Berry*, (F.) *Apulachine à feuilles de Prunier*. *Nat. Ord.* Rhamni. *Sex. Syst.* Hexandria Monogynia. The bark of this common shrub of the United States is astringent, bitter and pungent. The berries are, likewise, bitter. The bark has been used as a substitute for the cinchona, in intermittents, and as a tonic.

**PRION**, Saw.

**PRIONODES**, from *πριον*, 'a saw,' and *εἶδος*, 'shape.' *Serra'ted*. Applied to the sutures of the head.

**PRIOR ANNULARIS**, *Interos'seus quartus* of Winslow. An internal interosseous muscle, which arises from the outside of the metacarpal bone of the ring finger, and is inserted into the outside of the tendon on the back of the ring finger. Its use is to draw the ring finger outwards.

**PRIOR INDICIS**, *Extensor tertii internodii indicis*; *Sous-métacarpo-latéri-phalangien*. It arises from the outer or radial side of the metacarpal bone of the fore finger, and is inserted into the outside of the tendon on the back of the fore finger. *Action*:—to draw the finger outwards, towards the thumb.

**PRIOR VEL ABDUCTOR INDICIS PEDIS**. An external, interosseous muscle of the foot, which arises from the contiguous sides of the metatarsal bones of the great and fore toes, and is inserted into the inside of the root of the first bone of the fore toe. *Action*:—to pull the fore toe inwards.

**PRIOR MEDII**, *Pr. Medii digiti*.

**PRIOR MEDII DIGITII**, *Prior Medii*, *Second interos'seus* of Douglas. An external, inter-

osseous muscle of the hand, which arises from the corresponding sides of the metacarpal bones of the fore and middle fingers, and is inserted into the outside of the tendon on the back of the middle finger. *Action*:—to draw the middle finger outwards.

**PRIOR VEL ABDUCTOR MEDII DIGITI PEDIS.** An internal, interosseous muscle of the foot, which arises from the inside of the metatarsal bone of the middle toe, and is inserted into the inside of the root of the first bone of the middle toe. *Use*:—to pull the middle toe inwards, or towards the inner side of the foot.

**PRIOR VEL ABDUCTOR MINIMI DIGITI.** An internal, interosseous muscle of the foot, which originates from the inside of the metatarsal bone of the little toe; and is inserted into the inside of the root of the first bone of the little toe. *Action*:—to pull the little toe inwards.

**PRIOR VEL ABDUCTOR TERTII DIGITI PEDIS.** An internal interosseous muscle of the foot, which arises from the inner and under part of the metatarsal bone of the third of the small toes, and is inserted into the inside of the root of the first bone of the third of the small toes. *Action*:—to pull the third of the small toes inwards.

**PRISIS**, Stridor dentium.

**PRISMOS**, Stridor dentium.

**PRISMA**, Scobs.

**PRIVATE PARTS**, Genital organs.

**PRIVITIES**, Genital organs.

**PRIVY MEMBERS**, Genital organs—p. Parts, Genital organs.

**PRO**, προ, 'before.' A common prefix to words; as in *Procatartic*, *Prostate*, &c.

**PROBANG**, *Detrusorium ex balæna*. A long, slender rod of whalebone, with a piece of sponge at its extremity, intended to push down extraneous bodies, arrested in the œsophagus, into the stomach. A similar instrument is called by J. L. Petit, *Repoussoir d'urêtes*.

**PROCARDIUM**, Serobiculus cordis.

**PROCERUS NASI**, Pyramidalis nasi.

**PROCES CILIARES**, Ciliary processes.

**PROCESS**, Apophysis—p. Cuneiform, Basillary process—p. Vertical superior longitudinal, Falx cerebri.

**PROCES/SUS**. A *process*; from *proc'do*, 'I go before.' *Projectura*. An apophysis or eminence of a bone, (see Apophysis.) Also, any part, which seems prolonged beyond other organs with which it is in connexion; as the *Ciliary processes*.

**PROCESSUS ANCONEUS**, Olecranon—p. Annularis, Pons varolii—p. Caudatus, Lobulus caudatus—p. cerebri lateralis, Cornu ammonis—p. Cochleariformis, see Tympanum—p. Cuneiformis ossis occipitis, Basillary process—p. Falciformis cerebelli, Falx cerebelli—p. Falciformis duræ matris, Falx cerebri—p. Laterales uteri, Tubæ Fallopiæ—p. Mamillares, Papillæ of the kidney, Olfactory nerves—p. Orbiculares cerebri, Infundibulum of the brain—p. Papillares, Olfactory nerves—p. Rachidianus, Medulla spinalis—p. ad Testes, see Valvula Viesseni—p. Transversus duræ matris, Tentorium—p. Uvifer, Uvula—p. Ventriculi, Duodenum.

**PROCHEILA**, Antelabia.

**PROCHEILIDION**, Procheilon.

**PROCHEILON**, *Procheilidion*, *Prolebium*. The extreme projecting part of the lips.

**PROCHEUMA**, Parenchyma.

**PROCIDENCE DE L'ŒIL**, Exophthalmia.

**PROCIDENTIA**, Prolapsus—p. Ani, Proctocele—p. Intestini recti, Proctocele—p. Iridis, Staphyloma of the Iris—p. Sedis, Proctocele—p. Uteri, Prolapsus uteri.

**PROCNEME**, Tibia.

**PROCONDYLOS**, προκονδυλος, from προ, 'before,' and κοινδυλος, 'a knot.' The first joint of the fingers; the second being called κοινδυλος; and the third μετακοινδυλος.

**PROCTALGIA**, *Proctæ simplex*, *Proctægra*, from προκτος, 'the anus,' and αλγος, 'pain.' Pain in the anus. Generally symptomatic of disease, as of hemorrhoids, scirrhus, &c.

**PROCTALGIA**, Clunisia—p. Hæmorrhoidalis, Hæmorrhoidis.

**PROCTATRESIA**, from προκτος, 'the anus,' and τρησια, 'imperforation.' Imperforate state of the anus.

**PROCTICA**. Pain or derangement about the anus, without primary inflammation. A genus in the class *Caliaca*, order *Enterica*, of Good.

**PROCTICA EXANIA**, Proctocele—p. Marisca, Hæmorrhoidis—p. Simplex, Proctalgia—p. Tenesmus, Tenesmus.

**PROCTITIS**, *Clyndesia*, *Cyso'tis*, from προκτος, 'the anus.' Inflammation of the anus.

**PROCTOCELE**, from προκτος, 'the anus,' and κλη, 'hernia.' *Prolapsus Ani*, *Proctoptosis*, *Proctosis*, *Archeoptoma*, *Archeoptosis*, *Ecdania*, *Hæmorrhoidis procdens*, *Hæmorrhoidis ab exaniâ*, *Procidencia Ani*, *P. intestini recti*, *P. sedis*, *Ectopia Ani*, *Sedcs procid'na*, *Falling down of the Fundament*, *Coming down of the Body*, (F.) *Chute du rectum*, *C. du fondement*, *Reversement du Rectum*. Inversion and prolapse of the mucous coat of the rectum, from relaxation of the sphincter, with more or less swelling. In the treatment, the application of cold water and astringent lotions must be recommended; and, if other means fail, one of the radii of skin, which converge at the anus, may be snipped off. On cicatrizing, the verge of the anus will be contracted, and the cure probably complete. In the way of palliation, the parts may be retained by an appropriate bandage.

**PROCTOCYSTOTOMIA**. See Lithotomy.

**PROCTOPTOSIS**, Proctocele.

**PROCTORRHAGIA**, Hæmorrhoidal flux.

**PROCTORRHŒEA**, from προκτος, 'the anus,' and ρει, 'I flow.' A discharge of blood or slime from the anus.

**PROCTOS**, Anus.

**PROCTOSIS**, Proctocele.

**PRODROMUS**, from προ, 'before,' and δρομος, 'course.' The period immediately preceding an attack of disease; and in which the *precursory signs* occur.

**PRODÛCT**, from *produ'co*, 'I produce,' (F.) *Produit*. The result, sought to be attained by any pharmaceutical operation.

**PRODUCTION**, Prolapsus—p. Uvulæ a pituitâ, Staphylodema.

**PRODUCTION**, *Productio*; same etymon. This word is used, especially by the French synonymously with *prolongation*. The mesen-

tery is, in this sense, a production of the peri-toneum.

**PRODUIT**, Product.

**PROEMINENT**, *Proem'inens*, from *pro*, 'forwards,' and *eminc're*, 'to project.' Some anatomists call the 7th cervical vertebra, the *proeminent vertebra*, on account of the length of its spinous process, which passes the level of those of the neighbouring vertebrae.

**PRECOTIA**, *Proiotes*, *πρωιότης*, or *προιωτης*, 'Precocity,' *Præcox maturitas*, *Præcoëcius maturity*. Premature development of sexual organization or power.—Good.

**PROFLUVIUM**, *Discharge* (q. v.) *Fluxus*, *Polyrrhœa*, *Flux* (q. v.) from *profluo*, 'I run down.' A term, under which some Nosologists have comprised all morbid discharges or fluxes:—others, increased excretions, attended by fever.

**PROFLUVIUM GENITALE MULIEBRE**, *Menses*—*p. Muliebre*, *Leucorrhœa*, *Menses*—*p. Seminis*, *Pollution*—*p. Ventris*, *Diarrhœa*.

**PROFUNDUS**, *Altus*. A name given to different parts, which are seated profoundly as regards others.

1. **ARTERIA PROFUNDA FEMORIS**, *A. vasta posterior seu muscularis femoris*, *Artère grande musculaire de la cuisse*, (Ch.) This large branch arises commonly from the posterior part of the crural, between the pubis and lesser trochanter. It descends deeply, situate before the adductors; passes through the third adductor above the opening in it for the trunk of the femoral; and terminates in the short portion of the biceps. The *muscularis profunda* gives off, 1. The *external circumflex*; 2. The *internal circumflex*; and, 3. The three *perforans*.

2. The **ARTERIA PROFUNDA PENIS**. Chaussier has given this name to the *car'ernous artery*, which arises from the artery of the penis, furnished by the internal pudic.

**PROFUNDA HUMERI**, *P. superior*, *Artère spiralis*, (F.) *Artère humérale profonde*, *A. collatérale externe*, *Grand musculaire du bras*, (Ch.) Its origin is variable. When it arises from the brachial artery, it is given off opposite the groove of the humerus destined for the radial nerve, and descends backwards between the three portions of the triceps, accompanied by the nerve; giving branches to that muscle and to the humerus. When it reaches the posterior part of the bone, it divides into two branches, which are distributed to the triceps, supinator longus, &c.

The **PROFUNDA INFERIOR** vel **MINOR** is often a branch of the last; but, commonly, is given off from the brachial, near the middle of the arm. It gives off branches to the muscles, &c. about the inner side of the os humeri. It is, also, called *large communicating ulnar* or *profundo-ulnar*.

**PROFUNDA SUPERIOR**. *Profunda humeri*. Certain muscles are distinguished by the names *profundus* or *deep-seated* and *superficial*. Thus, we speak of the *superficial* and *deep-seated* muscles of the neck, &c.; the *Flexor profundus perforans*, &c.

**PROFUSIO SANGUINIS**, *Hæmorrhagia*—*p. Subcutanea*, *Purpura simplex*.

**PROGLOS'SIS**, from *προ*, 'before,' and

*γλῶσσα*, 'the tongue.' The extremity or tip of the tongue.

**PROGNO'SIS**, *Prorrhê'sis*, *Præcognitio*, *Prædictio*, (F.) *Prognostic*, *Pronostic*, from *προ*, 'before,' and *γινωσκω*, 'I know.' The judgment formed by the physician regarding the future progress and termination of any disease.

A **GENERAL PROGNOSIS** is the opinion formed of a disease in the abstract. Thus, we say, the *General prognosis* of *Cynanche tonsillarîs* is favourable;—of *Phthisis pulmonalis*, unfavourable, &c.

A **PARTICULAR PROGNOSIS** is the opinion formed of any particular case of a disease. The *particular prognosis* of one case of typhus, for example, may be favourable, whilst that of another may be unfavourable.

**PROGNOSIS EX LINGUA**, *Glossomania*.

**PROGNOSTIC**, *Prognosis*.

**PROJECTURA**, *Process*.

**PROLABIUM**, *Procheilon*.

**PROLAP'SUS**, from *pro labor*, 'I slip down.' *Procidencia*, *Delapsio*, *Proptoma*, *Proptosis*, *Productio*, *Propedentia*, *Prominentia*, *Ptosîs*, *Cusus*, (F.) *Chute*; a *protrusion*; a *falling down*. A genus of diseases in the class *Locales* and order *Ectopia* of Cullen, distinguished by the falling down of a part through the orifice, with which it is naturally connected.

**PROLAPSUS ANI**, *Proctocele*—*p. Iridis*, *Ptosîs iridis*—*p. Oesophagi*, *Pharyngocele*—*p. Palpebræ*, *Blepharoptosis*—*p. Pharyngis*, *Pharyngocele*.

**PROLAPSUS UTERI**, *Ezometra*, *Metroptosis*, *Falling down of the womb*, *Ædoptosis uteri*, *Hysteroptosis*, *Hysterocele nuda*, *Procidencia uteri*, (F.) *Abaissement de la matrice*, *Chute de la matrice*, *Descente de la matrice*, *Précipitation de la matrice*. Some use the term 'Procidencia Uteri' for a minor degree; some for a greater degree of the affection than prolapsus;—*Relaxatio uteri* expressing the slightest stage of all. A falling down of the uterus, owing to relaxation of the parts about the utero-vaginal region. In the treatment, the horizontal posture must be insisted upon; the injection of astringent substances *per vaginam* be advised; and if the affection be not remedial by these means, a pessary must be employed as a palliative; or, the operation of *Episioraphy* (q. v.) may be performed.

**PROLAPSUS UTERI**, *Hysteroptosis*—*p. Uvulæ*, *Staphylœdema*.

**PROLAPSUS VAGINÆ**, *Hysteroptosis Vaginæ* *Prolapsus*, *Ædoptosis Vaginæ*, *Coleoptosis*, *Colpop'tosis*, *Elythroptosis*—*Protrusion of the upper part of the vagina into the lower*. This, like the descent of the uterus, may be *relaxatio*, *procidencia*, *prolapsus*, or complete *inversion*.

**PROLAPSUS VESICÆ**, *Excyste*.

**PROLECTATIO**. Action of separating the finer parts of a body from the grosser.

**PROLEPTICUS**, *Anticipating*.

**PROLICIDE**, *Prolicid'ium*; from *proles*, 'offspring,' and *eadere*, 'to kill.' Destruction of offspring. A term, which includes fœtidæ as well as infanticidæ. *Prolicide*.—Gordon Smith.

**PROLIFIC**, *Prolificus*; from *proles*, 'offspring,' and *fucio*, 'I make.' That which has the faculty of engendering; applied to man, animals, and their sperm or seed; as well as to

remedies, which, by strengthening the genital organs, increase the secretion of sperm.

**PROLIG'EROUS**, *Proligerus*, from *proles*, 'offspring,' and *gero*, 'I carry.' That which is connected with carrying the offspring.

The **PROLIGEROUS DISC**, or **LAYER**, *Discus prolig'erus*, *Discus vitelli'nus*, *Stratum prolig'erum*. A granular layer, situate generally towards the most prominent part of the ovarian vesicle, on the centre of which the true ovum or ovule exists.—Von Baer.

**PROLONGEMENT RACHIDIEN**, *Medulla spinalis*—*p. Sous-occipital*, Basillary process.

**PROMALACTE'RIMUM**, from *προ*, 'before,' and *μαλασσω*, 'I soften.' The room, in the ancient gymnasium in which the body was softened and anointed. One of the operations in bathing.

**PROMANOS**. See *Digitos*.

**PROMANUS**, *Pollex*.

**PROMETOPIDIA**, Frontal bandages.

**PROMETO'PIS**, *Prometopid'ion*, from *προ*, 'before,' and *μετωπιον*, 'the forehead.' The skin of the forehead.

**PROMINENTIA**, *Prolapsus*, *Protuberance*.

**PROMONTORIUM FACIEI**, *Nasus*.

**PROMONTORY**, *Promontorium* seu *Tuber seu Tuberositas Tympani*. A small projection at the inner paries of the cavity of the tympanum, which corresponds to the external scala of the cochlea, and especially to the outer side of the vestibule.

**PRONATEUR CARRÉ**, *Pronator radii quadratus*—*p. Grand* ou *rond*, *Pronator radii teres*—*p. Petit*, *Pronator radii quadratus*.

**PRONATION**, *Prond'tio*, from *pronus*, 'inclined forwards.' Anatomists understand, by pronation, the motion by which the inferior extremity of the radius passes before the ulna, and thus causes the hand to execute a kind of rotation from without inwards.

**PRONA'TOR**. That which produces the motion of pronation. This name has been given to two of the muscles of the forearm.

**PRONATOR OBLIQUE**, *P. radii teres*—*p. Quadratus*, *P. radii quadratus*.

**PRONATOR RADII QUADRA'TUS**, *P. quadratus*, *Quadratus radii*, *P. quadratus* seu *transversus* (Winslow,) *Pronator radii brevis* seu *quadratus* (Cowper,) *Cubito-radial*, (Ch.) (F.) *Petit* ou *carré pronateur*. This muscle is situate at the anterior, inferior, and profound part of the forearm. It is flat and square, and is attached, within, to the inferior quarter of the anterior surface of the ulna; and, without, to the inferior quarter of the anterior surface of the radius. It produces the motion of pronation.

**PRONATOR RADII TERES**, *P. teres* sive *obliquus* (Winslow,) *Epitrochlo-radial* (Ch.) (F.) *Grand* ou *rond pronateur*. A muscle seated at the upper and anterior part of the forearm. It is long, flat, and larger above than below. It is attached, above, to the inner tuberosity of the humerus and to the coronoid process of the ulna. From thence it passes obliquely downwards and outwards, and terminates at the middle of the outer surface of the radius. It causes the radius to turn on the ulna, to produce the motion of pronation. It can, also, bend the forearm on the arm and *vice versa*.

**PRONATOR TERES**, *P. radii teres*.

**PRONERVATIO**, *Aponeurosis*, *Tendon*.

**PRONOSTIC**, *Prognosis*.

**PROPE'DENTIA**, *Prolapsus*.

**PROPERTIES, VITAL**. Those which depend upon organization, such as *sensibility* and *contractility*.

**PROPERTIES, PHYSICAL, OF THE TISSUES**. These are *flexibility*, *extensibility* and *elasticity*, *racorissement* and *imbibition*.

**PROPHYLACTIC**, *Prophylacticus*, *Diaphylactic*, *Diasostic*, *Syntereticus*, from *προ* and *φυλασσω*, 'I defend.' A preservative.

**PROPHYLAXIS**, *Prophylaxe*, *Prophylactice*. Same etymon. *Praservatio*. Preservative or preventive treatment.

**PROP'OLIS**, *προπολις*, from *προ*, 'before,' and *πολις*, 'city;' literally, 'that which is before the city.' *Ceranthemus*, *Commosis*, *Beebread*. A red, resinous matter, with which bees cover the bottom of the hive. Its fume has been esteemed antisthmatic.

**PROP'OMA**, from *προ*, 'before,' and *ποιμα*, 'a drink.' Ancient name of a medicine, composed of seven parts of *honey* and four of *wine*. It was drunk before a meal.—Paulus of Ægina.

**PROPOSITUM**, *Intention*.

**PROPOTIS'MOS**. Same etymon. *Præpotio*. An ancient name for medicines, which were given to patients, before purging them, and, in some sort, to prepare them.

**PROPRIUS AURIS EXTERNÆ**, *Retrahens auris*.

**PROPTOMA**, *Prolapsus*.

**PROPTOMA AURICULA'RUM**, *Parathésis auditus flacea*, *Flap Ear*. Lobe of the ear broad, loose, and pendent, from birth.—Good.

**PROPTOSIS**, *Prolapsus*—*p. Palpebræ*, *Blepharoptosis*.

**PRORA**, *Occiput*.

**PRORRHESIS**, *Prognosis*.

**PROS**, *προς*. In composition, this prefix generally signifies 'in addition to,' 'over and above,' 'besides.'

**PROSARTHROSIS**, *Diarthrosis*.

**PROSBOLE**, *Impression*.

**PROSCHYSIS**, *Affusion*.

**PROSCOLLESIS**, *Adherence*, *Agglutination*.

**PROSECTEUR**, *Dissector*.

**PROSLEPSIS**, *Prehension*.

**PROSODOS**, *Aditus*.

**PROSOPALGIA**, *Neuralgia facia*.

**PROSOPOMANTIA**, *Physiognomy*.

**PROSOPON**, *Face*.

**PROSOPOSIS**, *Physiognomy*.

**PROSPHORA**, *Prehension*.

**PROS'PHYSIS**, 'adhesion, adherence, connexion,' (q. v.) from *προς*, and *φω*, 'I grow.' In a more limited sense, this word means morbid adhesion of the eyelids, either between themselves, or with the globe of the eye. *Ankylablepharon*, (q. v.)

**PROSTASIS**, *προστασις*, 'superiority, preponderance,' same etymon as *Prostate*. A predominance or abundance of excrementitious humour.—Hippocr.

**PROSTATAL'GIA**, from *προστατα*, 'the prostate,' and *αλγος*, 'pain.' Pain in the prostate.

**PROSTATE**, *προστάτα*, from *προς*, 'before,' and *ἵστημι*, 'I stand.'—*Prostata glandula*, *Prostata*, *P. glandulosa*, *Parastota*, *P. glandula*, *Prostata adenoides*, *Testes minores*, *Corpus glandulosum*, *C. adeniforme*, *C. glandiforme*, *C. glandosum*, *C. adenoides*; the *Prostatic gland*, *Assistentes glandulae*, *Adstites glandulosi*. A glandular, cordiform body, of the size of a chestnut, situate before the neck of the bladder, behind the symphysis pubis, and surrounding the first portion of the urethra. Its excretory outlets, to the number of 10 or 12, open into the part of the urethra that traverses it, and pour into it a whitish, viscid humour, intended to lubricate the interior of the urethra, and to serve as a vehicle for the sperm in its ejaculation.

**PROSTATES INFÉRIEURES**, Cowper's glands—*p. Petites*, Cowper's glands.

**PROSTATIC**, *Prostaticus*. That which relates to the prostate. Winslow has named—*Superior Prostatic Muscles*—ligaments which pass from the pubis to the lateral parts of the prostate. He, also, calls—*Inferior Prostatic Muscles*—the fleshy fibres, which, from the lateral parts of the urethra, near its membranous portion, pass to be inserted into the pubis.

The **PROSTATIC PORTION OF THE URETHRA** is the part of the canal of the urethra included by the prostate. It is about 15 lines long.

The **PROSTATIC BISECTOR** is an instrument employed by Dr. Stevens, of New York, in the bilateral operation of lithotomy. In form it resembles a large olive, with a beak at the extremity, with cutting edges at the sides, parallel to its longest axis, and with a straight handle.

**PROSTATICUS SUPERIOR**, Compressor prostatae.

**PROSTATONCUS**, from *προστάτα*, 'the prostate,' and *ογκος*, 'a tumour.' Swelling of the prostate.

**PROSTHESIS**, Prothesis.

**PROSTHETA**, Subdita.

**PROSTRATION**, *Prostratio virium*, (F.) *Prostration des forces*. Great depression of strength. Almost total loss of power over the muscles of locomotion.

**PROTHESIS**, *Prosthesis*, *Adjunctio*, *Adjectio*, *Appositio*, 'addition, application;' from *προς*, 'in addition to,' and *τιθημι*, 'I put.' That part of surgery, whose object is to add, to the human body some artificial part, in place of one that may be wanting, as a wooden leg, an artificial eye, &c.

**PROTMESIS**, Umbilicus.

**PROTMESIS**, Kidney.

**PROTOGALA**, Colostrum.

**PROTOIATROS**, Archiater.

**PROTOMEDICUS**, Archiater.

**PROTOMUS**, Dissector.

**PROTOPATHIA**, Idiopathia.

**PROTOSPOROS**, Os uteri.

**PROTRUSION**, Prolapsus.

**PROTUBERANCE**, *Protuberantia*, *Extuberantia*; *Prominentia*, *Excrescentia*, *Extuberantia*, from *pro*, 'before,' and *tuber*, 'a projection.' (F.) *Bosse*. A name given to rough, unequal protuberances, seen at the surface of certain organs; the *parietal protuberances*, *occipital protuberances*, *annular protuberances*, &c.

**PROTUBERANCE**, **CEREBRAL**, *Medulla oblongata*, *Pons varolii*—*p. Cornu ammonis*.

**PROTUBERANTIA**, Eminence—*p. Annularis Willisii*, *Pons varolii*—*p. Cylindrica*, *Cornu ammonis*.

**PROULIMATE/SIS**. A word employed by Forestus, for hernia of the stomach.

**PRONE**, *Prunus domestica*.

**PROVERBS, MEDICAL**. A proverbial expression frequently contains sound sense in its directions. In medicine, the greatest collection is in the *Regimen of Health of the school of Salerno*, composed in the 11th century, by John of Milan. Yet, although good sense is often inculcated, we often meet with the reverse.

Most of the proverbs are hygienic. The following are a few.

1. *Qu'après la soupe un coup d'excellent vin Tire un écu de la poche du médecin.*
2. *Sarge quintà, grande nonà, cana quintà, dormi nonà, nec est morti vita prona.*
3. *Nunquam recte corpus exerceri sine animo, neque animum sine corpore posse.*
4. *Viande bien machée est à demi digérée.*
5. *Optimum condimentum fames.*  
Appetite is the best sauce.
6. *Plures occidit gula quam gladius.*
7. Early to bed and early to rise,  
Makes a man healthy, wealthy, and wise.
8. One man's meat's another man's poison.
9. An ounce of prevention is better than a pound of cure.

**PROVOCATORIUS**, Intercalary.

**PRUNA**, Anthrax.

**PRUNE**, *Prunum*.

**PRUNELLA**, *Cynanche*, *Pupil*.

**PRUNELLA**, *P. vulgaris*, *Consolida minor*, *Symphitum minus*, *Self-heal*, *Bugle*, *Brunel'la*, (F.) *Brunelle*. *Family*, *Labiata*. *Sex. Syst.* *Didynamia Gynnospermia*. This plant has been recommended, as an astringent, in hemorrhages and fluxes; and, also, in gargles against aphthæ and inflammation of the fauces.

**PRUNELLIER**, *Prunus spinosa*.

**PRUNELLOE**, *Prunum brignolense*.

**PRUNIER**, *Prunus domestica*—*p. Sauvage*, *Prunus spinosa*.

**PRUNUM**. A *Plum*, a *Prune*. Three sorts of plums have usually been ranked amongst the articles of the materia medica. 1. The *Prunum Brignolense*; the *Brignole plum* or *Prunel'loc*; from *Brignole* in Provence. It is of a reddish-yellow colour; and has a very grateful, sweet, subacid taste. 2. The *Prunum Gallicum*, the *French Prune*; and 3. The *Prunum Damascenum* or *Damson*, *Bral'ylon*. All these possess the same general qualities as the other summer fruits. They are emollient and laxative.

**PRUNUM STELLATUM**, *Averrhoa carambola*.

**PRUNUS ARMENIACA**. The *Apricot*, *Apricock*, *Bericocœ*, *βερικοκκη*, *Pracocia*, (F.) *Abricot*. *Family*, *Rosacæ*. *Sex. Syst.* *Icosandria Monogynia*.

The *Apricot*, when ripe, is easily digested, and considered as a great delicacy.

**PRUNUS AVIUM**—The *Black Cherry Tree*, *Cerasus Avium*. (F.) *Merisier*. The fruit is eaten; and a gum exudes from the tree; the properties of which are similar to those of gum Arabic.

**PRUNUS CERASUS**. The *Red Cherry Tree*,

(F.) *Cérisier*. The fruit *Cerasum*, *Cera'sion*, has a pleasant, acidulous, sweet flavour. It is wholesome.

**PRUNUS DOMESTICA.** The *Plum* or *Damson tree*, *Coccyne'lea*, *Proune*, (F.) *Prunier ordinaire*. The damson, when perfectly ripe, affords a wholesome fruit for pies, tarts, &c. It is gently laxative. See *Prunum*.

**PRUNUS INVITIA.** The *Bullace Plum tree*. The fruit of this tree is used like the damson.

**PRUNUS LAURO-CERASUS**, *Poison Laurel*, *Cherry Laurel*, *Common Laurel*, *Lauro-cerasus*, *Cer'asus Lauro-ce'asus*, (F.) *Laurier-cérise*, *L. amandier*. The leaves have a bitter, styptic taste, with the flavour of bitter almonds. The flowers have a similar flavour. The powdered leaves, applied to the nostrils, excite sneezing. The flavour of the leaves has given occasion to their being employed in tarts, custards, &c.; but in large quantities they are poisonous. The poisonous principle is the Prussic acid. The distilled water, called *Laurel-water*, is poisonous. (See *Poisons*, Table of.)

**PRUNUS PADUS**, *Padus*, *Cer'asus Padus*, *Cer'asus racemo'sus sylvestris*, *Wild cluster*, or *Bird Cherry Tree*, (F.) *Cérisier à grappes*, *Bois puant*. The bark of the tree has a fragrant smell, and a bitter, subastringent taste, somewhat similar to that of bitter almonds. It has been recommended in intermittents, &c. in the form of decoction. The berries have been used in dysentery.

**PRUNUS SEBESTINA**, *Sebestina*—p. *Sylvestris*, *P. spinosa*.

**PRUNUS SPINOSA.** The *Sloe Tree*, *P. sylvestris*, *Agriococime'lea*, *Agru'na*, *Agrune'la*, (F.) *Prunellier*, *Prunier sauvage*. The fruit—the *sloe*—is sometimes employed in gargles, and was formerly much used in hemorrhage, owing to its astringent properties. The *Aed'cia nostras*, *A. German'ica*, *Suceus acacia nostralis*, *S. German'ica inspissatus*, is obtained from this.

**PRUNUS VIRGINIANA**, *Wild Cherry Tree*, (F.) *Cérisier de Virginie*. The bark of this tree has been found useful in intermittents. The leaves are poisonous to certain animals, and the berries intoxicate different kinds of birds. The Indians use the bark in the cure of syphilis. It is bitter and astringent, and possesses some aromatic warmth, and, likewise, a narcotic quality. It is stimulant and tonic. The leaves contain Prussic acid. The distilled oil of the bark is very nearly identical with that of the bitter almonds. A strong decoction of the bark is anthelmintic.

**PRURIGO**, *Pruri'tus*, from *prurio*, 'I itch.' This word is often used synonymously with *itching*, (q. v.)

Willan and Bateman use the term for a genus of cutaneous diseases, the characteristic symptoms of which are a severe itching, accompanied by an eruption of papulæ of nearly the same colour as the adjoining cuticle. It affects the whole surface of the skin, under three varieties of form,—the *P. mitis*, *P. form'icans*, *P. scin'lis*, &c. as well as some parts of the body as the *P. pod'icis*, *P. puden'di mulie'bris*.

**PRURIT**, *Itching*.

**PRURITUS**, *Gargale*, *Itching*, *Prurigo*.

**PRUSSIAN BLUE**, *Fer'rum Zoët'icum*, *F. Borus'sicum*, *F. Cyanogenat'um*, *F. oxydula'tum*

*hydrocyan'icum*, *Ferri Ferrocy'anas*, *Borus'sias Ferri*, *Ceruleum Borus'sicum*, *C. Berolinen'se*, *Prussias Ferri*, *Hydrocy'anas Ferri*, *Cyanurc'tum Ferri*, *Trito-hydroferrocyanate of iron*. This salt is chiefly used for the preparation of the hydrocyanic acid and the cyanide of mercury. It has been advised in the treatment of intermittents, and in epilepsy and scrophulosis. Externally, it has been applied to ill-conditioned ulcers. (ʒj to ʒj of Cerate.) Dose, four to six grains.

**PSALIS**, *Fornix*, *Scissors*.

**PSALTERIUM**, *Lyra*.

**PSAMMIS'MOS**, from *ψαμμος*, 'sand.' The application of sand to any part of the body for the cure of disease.—Paulus.

**PSAMMODES**, *Sabulous*.

**PSELLIS'MUS**, *ψελλισμος*, from *ψελλισσειν*, 'I stutter.' Imperfect or depraved state of the articulation. A genus in the class *Pneumatica*; order, *Phonica*, of Good.

**PSELLOTES**, *Balbuties*.

**PSEUDAC'OË**, *Pseudacoi'a*, from *ψευδης*, 'false,' and *ακουη*, 'audition.' *Pseudacul'sis*. False hearing.

**PSEUDACORUS**, *Iris pseudacorus*.

**PSEUDÆSTHESIA**, from *ψευδης*, 'false,' and *αισθησασθαι*, 'I feel.' *Paraps'is illusoria*. Depraved feeling. Imaginary sense of touch or general feeling in organs that have no existence. Common to those who have suffered amputation; and in hypochondriacs and the insane.

**PSEUDARTHRO'SIS**, *Pseudarticulatio*, *Pseudarticulus*; from *ψευδης*, 'false,' and *αρθρον*, 'a joint.' A false joint or articulation. (q. v.)

**PSEUDARTICULATIO**, *Pseudarthrosis*.

**PSEUDO**, False—p. *Asthma*, *Dyspnœa*.

**PSEUDOBLEP'SIA**, from *ψευδης*, 'false,' and *βλεψις*, 'sight.' *Pseudopsia*, *Parops'is illusoria*, *Suffu'sio*, *Phantas'mu*, *Pseudoblepsis*, *False sight*. A generic name, used by Cullen for perversion of vision. See *Metamorphopsia*.

**PSEUDO-CYESIS**, *Pregnancy*, false—p. *Cyesis molaris*, *Mole*.

**PSEUDO-LIEN**, *Pseudosplen*. Glands situate in the neighbourhood of the spleen; probably, lymphatic glands.

**PSEUDO-MEDICUS**, *Charlatan*—p. *Meninx*, *Membrane*, false—p. *Metamorphosis polyposa*, *Polypus*.

**PSEUDO-PHTHISIS**. False phthisis. Emaciation, occasioned by other cause than organic lesion of the lungs.

**PSEUDO-PLÉURITIS**, *Pleurodynia*—p. *Polypi*, see *Polypi*—p. *Opsia Pseudoblepsia*—p. *Pyrethrum*, *Achillea ptarinica*—p. *Spleen*, *Pseudolien*.

**PSEUDOREXIA**, *Pseudorc'is*, from *ψευδης*, 'false,' and *ορεξις*, 'appetite.' False appetite.

**PSEUDO-SYPHILIS**, *Syphilis pseudo-syphilitis*.

**PSEUDYEMEN**, *Membrane*, false.

**PSIDIUM POMIFERUM**. The *Apple Guava*. This plant and the *P. pyriferum* bear fruits; those of the former like apples; of the latter like pears. The apple kind has an acid flavour, the other is sweet. Of the inner pulp of either, the natives of the Indies make jellies; and, of the outer rind, tarts, marmalades, &c. They are somewhat astringent; this quality,

indeed, exists in every part of the tree and abundantly in the leaf buds, which are occasionally boiled with barley and liquorice as an excellent drink in diarrhœa. A simple decoction of the leaves is said to be useful in the itch and most cutaneous eruptions.

**PSILOSIS**, Depilation.

**PSILOTHRUM**, *Bryonia alba*.

**PSILOTHRUM**, Depilatory.

**PSIMMYTHON**, *Plumbi subcarbonas*.

**PSOÆ**, ψοαι, *Lumbi*, (q. v.) 'the loins.' *Alopeces*, *Nephrome'tra*, *Neurome'tres*. The psoæ muscles.

**PSOÆ MAGNUS**, *P. seu lumb'ris inter'nis*, *Præ-lombo-trochantin*, *Præ-lombo-trochantiniën* (Ch.) *Femur morèntium sextus*. A muscle, seated on the lateral parts of the lumbar portion of the vertebral column; and passing down to the superior and anterior part of the thigh. It is long; fusiform; and attached, above, to the body and transverse processes of the four first lumbar vertebrae, and last dorsal. Below, it terminates, by a very thick tendon,—common to it and the iliacus muscle,—which is inserted into the top of the lesser trochanter. This muscle bends the thigh upon the pelvis and carries it in rotation outwards. It may, also, bend the pelvis on the thigh, and the loins on the pelvis. It acts considerably in station and progression.

**PSOÆ PARVUS**, *Præ-lombo-pubien*, (Ch.) A muscle, situate anterior to the last. It is long, thin, flat, and narrow; and is attached, above, to the body of the last dorsal vertebra, and below, to the linea ileo-pectinea, by means of a slender tendon, which furnishes two expansions—one to the *Iliac-aponeurosis*, and the other to the *pelvic*. This muscle bends the vertebral column on the pelvis; and, reciprocally, the pelvis on the vertebral column.

**PSOITIS**. Inflammation of the psoæ muscles and of the parts situate before the lumbar vertebrae; accompanied, from its commencement, by considerable fever, violent pains in the part affected and in the thigh of the same side, which remains commonly half bent. *Psotitis* may terminate by suppuration, and form Lumbar Abscess, (q. v.)

**PSOË**, ψωλη, 'the male organ,' also, the glans.

**PSOLONCUS**, from ψωλη, and ογκος, 'a tumour.' Swelling of the glans, or of the penis generally.

**PSOPHOS**, ψοφος, 'noise.' A loud noise; a hollow sound.

**PSORA**, ψορα, *Scabies*, *Ecpye'sis Scabies*, *Phlysis Scabies*, *Itch*, (F.) *Gale*, *Mal Saint-Main*, *Rogne*. A contagious eruption of very minute pimples—pustular, vesicular, papular, intermixed and alternating, itching intolerably and terminating in scabs. It seems to be caused by an insect, of the genus *Acarus*;—the *A'carus* or *Sarcoptes* or *Sarcoptes Scabiei*, *A'carus Ciro*, (F.) *Ciron*. The itch occupies, particularly, the spaces between the fingers, the backs of the hands, wrists, elbows, axillæ, groins, hams, &c. and rarely affects the face.

The best applications, for its cure, are,—the *Unguentum Sulphuris* or *Ung. Sulph. comp.*, night and morning; but the unpleasant smell of the sulphur has given occasion to the use of

other means;—as the *White Hellebore*, *Potass in deliquescente*, *Muriate of Ammonia*, *Sulphuric Acid*, &c. The repugnance of the smell of sulphur ought not, however, to be regarded; especially as, in the course of four or five days, it will, in almost all cases, produce a perfect cure.

**PSORA LEPROSA**, *Psoriasis*—p. *Squamosa*, *Psoriasis*.

**PSORA'LEA GLANDULO'SA**, *Alvaquill'a*. *Family*, *Leguminosæ*. *Sex. Syst.* *Diadelphia Decandria*. A shrub, used in Chili as a vulnery.

**PSORA'LEA PENTAPHYL'LA**, *Contrayer'ra nova*, *Mex'ican Contrayer'ra*. The root is little, if at all, inferior to the *Contrayerva* in its medicinal properties: which, by the by, are unimportant.

**PSORIASIS**, *Lepido'sis psori'asis*, *Impet'igo*, *Scab'ies sic'ca*, *Psora lepro'sa*, *P. squamo'sa*, *Scaly Tetter*, *Dry Scale*, *Dry Scall*, (F.) *Dartre squameuse lichenoidë*, *Gratelle*, *Gale militiaire*, *G. canine* ou *sèche*. A cutaneous affection, consisting of patches of rough, amorphous scales; continuous or of indeterminate outline: skin often chappy. *Psoriasis* occurs under a considerable variety of forms. The surface, under the scales, is more tender and irritable than in *lepra*, which *psoriasis*, in some respects, resembles. Dr. Willan has given names to eleven varieties of *psoriasis*: the chief of which are the *Psoriasis guttu'la*, *P. diffu'sa* (one form of which is the *Baker's Itch*), the *P. gry'd'la*, and *P. inveterat'la*.

The treatment of *psoriasis* must be antiphlogistic, with the internal use of the fixed alkalis, sulphur, &c. The irritable kinds do better without any local application.

The more local and less inflammatory are ameliorated by emollient and soothing applications: or by slightly stimulating means, sea-bathing, the *Ung. hydrarg. nitric oxyd.*, *Ung. oxydi zinci*, &c.

**PSORICUS**, ψωρικος. That which has the nature of itch. A medicine for curing the itch.

**PSOROPHTHALMIA**, *Ophthalmia tarsi*.

**PSYCHAGOG'ICA**, from ψυχη, 'life,' 'soul,' and αγω, 'I lead.' Medicines which resuscitate, when life seems extinct; as in syncope and apoplexy.

**PSYCHE**, *Anima*.

**PSYCHOL'OGY**, *Psycholo'gia*, from ψυχη, 'mind,' and λογος, 'discourse.' A treatise on the intellectual and moral faculties. Also, the mind or intellectual and moral qualifications.

**PSYCHOS**. Cold.

**PSYCHOTRIA EMETICA**, *Ipeacuanha*.

**PSYCHOTROPHUM**, *Betonica officinalis*.

**PSYCHROLU'SIA**, *Psychrolu'tron*, from ψυχρος, 'cold,' and λουω, 'I wash.' A cold bath.

**PSYCHTICA**, *Refrigerants*.

**PSYDRA'CIA**, ψυδρακια, quasi, ψυκτα 'υδρακια, 'cold drops.' The ancients used this term, sometimes, for *pimples*; at others, for *vesicles*. Willan and Bateman define *Psychracium* to be, a small pustule, often irregularly circumscribed, producing but a slight elevation of the cuticle, and terminating in a laminated scab. Many of the *psychracia* usually appear together, and become confluent; and, after the discharge

of pus, they pour out a thin, watery humour; which frequently forms an irregular incrustation. Frank limits the term to a psoriform eruption, which differs from the itch in not originating from an insect, and which is not contagious,—perhaps the lichen. Authors have differed regarding its acceptance.

PSYDRACIA ACNE, Acne.

PSYLLIUM, *Plantago psyllium*.

PTARMICA, *Achillea ptarmica*—p. Montana, *Arnica montana*.

PTARMICUM, Erhine, Sternutatory.

PTARMOS, Sneezing.

PTELEA, Ulmus.

PTERIGO-STAPHYLINUS INTERNUS, Levator palati—p. *Syudesmo-staphili-pharyngis*, Constrictor pharyngis.

PTERIS, *Polypodium filix mas*.

PTERIS AQUILINA, 'Eagles' Wings,' *Pteria, Thelypteris, Filix Nymphæa*, so called from its leaves. Common Brake or Female Fern; *Filix femina* (F.) *Fougère femelle, La grande Fougère. Nat. Ord. Filices*. The root is considered to be anthelmintic; and as efficacious as that of the male fern in cases of tape-worm.

PTERNA, Calcaneum.

PTERNOBATES, Calcigradus.

PTEROCARPUS ERINACEA, see Kino.

PTEROCARPUS SANTALINUS, *Santalum Rubrum, Red Sanders or Saunders Tree. Family, Leguminosæ. Sex. Syst. Diadelphia Decandria*. Red Saunders wood is used only as a colouring matter; giving to rectified spirit a fine deep red. The juice of this tree, like that of the *P. Draco*, affords a species of Dragon's blood.

PTERYGION, *Pterygium* or *Pterygium*, from πτερον, 'a wing,' 'a small wing,' &c.; *Oxyx, Pyosis, Unguis*, (F.) *Drapeau, Onglet*. A varicose excrescence of the conjunctiva, of a triangular shape; and commonly occurring at the inner angle of the eye; whence it extends over the cornea. Sometimes two or three pterygia occur on the same eye, and cover the whole cornea with a thick veil, which totally prevents vision. According to Scarpa, the ancients gave the name *Panniculus* to this last complication.

If the pterygion cannot be dispelled by means of discutient collyria, it must be removed by the scissors.

PTERYGO-ANGULI-MAXILLAIRE, *Pterygoideus internus*—p. *colli-maxillaire, Pterygoideus externus*—p. *Maxillaire, grand, Pterygoideus internus*—p. *Maxillaire, petit, Pterygoideus externus*—p. *Palatine canal, Pterygoid canal*—p. *Pharyngeus, Constrictor pharyngis*—p. *Staphylinus, Circumflexus*.

PTERYGO-PALATINE, *Pterygo-palati-nus*. That which belongs to the pterygoid process and palate.

The PTERYGO-PALATINE CANAL. A small canal, formed by the internal ala of the pterygoid process, and the palate bone. It gives passage to the vessels of the same name.

The PTERYGO-PALATINE ARTERY, or *superior pharyngeal*, is a very small artery, and is given off by the internal maxillary, at the bottom of the zygomatic fossa: after having passed through the pterygo-palatine canal, it is distributed to the superior part of the pharynx, the sphenoid bone, and the Eustachian tube.

PTERYGOIDES, Alatus.

PTERYGOID, *Pterygoides, Pterygoideus, Alifor'mis*, from πτερεῖς, 'a wing,' and εἶδος, 'form.' A name given to two processes at the inferior surface of the sphenoid bone; the two laminae, which form them, having been compared to wings. These *ala* or *wings* or *processes*,—*Processus aliformes*,—have been distinguished, according to their position, into *internal* and *external*.

The *Pterygoid Artery, Vidian Artery, Ramulus Ductus Pterygoidei, Arteria pharyngea suprema*, arises from the internal maxillary artery, at the bottom of the zygomatic fossa, and enters the pterygoid canal with the nerve of the same name, to proceed to be distributed on the Eustachian tube and velum palati.

The name, *pterygoid arteries*, is likewise given to the branches, which the internal maxillary and some of its divisions, as the meningeal media, and posterior temporalis profunda, furnish to the pterygoid muscles, behind the neck of the lower jaw.

PTERYGOID BONE, Sphenoid.

The PTERYGOID OF VIDIAN CANAL, *Ductus pterygoideus, Canalis vidianus*, (F.) *Conduit pterygoïdien ou Vidien, Pterygo-palatine canal*, is a narrow channel, which traverses, in a direction from before to behind, the base of the pterygoid process, and gives passage to the pterygoid nerve. The *foramina* of the sphenoid, which terminate the canals, are similarly called.

The FOSSA PTERYGOIDEA, (F.) *Fosse pterygoïdienne* or *ptérygoïde*, is the depression, which separates the two laminae or *ala* of the pterygoid process.

The PTERYGOID MUSCLES, *Alar muscles, Aliformes musculi*, are two in number.

1. The *Pterygoideus externus, P. minor, Pterygo-collis-maxillaire, Petit Pterygo-maxillaire* (Ch.) (F.) *Petit pterygoïdien, Pterygoïdien externe*, is a thick, short muscle, which arises, by short aponeuroses from the outer surface of the external ala of the pterygoid process, and from the outer surface of the great ala of the sphenoid bone; and is inserted in the anterior part of the neck of the lower jaw-bone, and the corresponding part of the inter-articular fibro-cartilage. This muscle draws the condyle of the lower jaw and the inter-articular ligament forwards. It carries the chin forwards, and to the opposite side. If the two external pterygoids act together, the jaw is carried directly forwards.

2. The *Pterygoideus internus, P. major, Pterygo-anguli maxillaire, Masse'ter internus, Latens in Ore, Grand Pterygo-maxillaire*, (F.) *Grand Pterygoïdien* or *Pterygoïdien interne*. A thick and quadrilateral muscle, which is attached by short and very strong aponeuroses; above, to the pterygoid fossa, whence it proceeds downwards, backwards, and outwards, to be inserted into the inner surface of the ramus of the lower jaw, near its angle. This muscle raises the lower jaw, and carries it a little forwards. It also performs the grinding motion.

PTERYGOID NERVES. These are two in number.

1. The *Pterygoid* or *Vidian Nerve*. It arises from the posterior part of the sphenopalatine

ganglion; traverses the Vidian canal of the sphenoid; and, beyond, divides into two filaments. 1. A superior or cranial, *Nervus superficialis sive petrosus*, which ascends into the cranium, and enters the hiatus of Fallopius to unite with the facial nerve. 2. An inferior or carotid, *Nervus profundus sive major*, which traverses the carotid canal, and unites with the ascending branches of the superior cervical ganglion of the trisplanchnic.

2. The *Pterygoid Nerve*, properly so called, *Nervus musculi pterygoidei*, is given off by the inferior maxillary branch of the 5th pair.

**PTERYGOIDIEN, GRAND** ou **INTERNE**, Pterygoideus internus—*p. Externe*, Pterygoideus externus—*p. Petit*, Pterygoideus externus.

**PTERYGOMA**. A wing; a projecting or pendulous body. A swelling of the vulva, which prevents coition.—M. A. Severinus.

**PTERYX**, Ala.

**PTILOSI**, Deplumatio, Madarosis.

**PTISANA**, Tisane—*p. Communis*, Decoctum hordei compositum—*p. Hippocratica*, Decoctum hordei.

**PTISSANA**, Tisane.

**PTOCHOCOMIUM**, from *πτωχος*, 'a poor person,' and *κομεω*, 'I take care of.' *Ptochodochium*. An almshouse.

**PTOCHODOCHIUM**, Ptochocomium.

**PTOMA**, Cadaver.

**PTOSIS**, Prolapsus—*p. Bulbi oculi*, Exophthalmia.

**PTOSIS IN'IDIS**, *Prolapsus Iridis*, from *πτωσις*, 'a falling.' A prolapsus of the iris through a wound of the cornea. It is known by a blackish tubercle, which projects a little from the cornea in various forms.

**PTOSIS PALPEBRÆ**, Blepharoptosis.

**PTYALISM**, Salivation.

**PTYALISMUS ACUTUS MELLITUS**, see Salivation—*p. Iners*, Slavering.

**PTYALOGOGUE**, Sialagogue.

**PTYALON**, Saliva.

**PTYASMAGOGUE**, Sialagogue.

**PTYELON**, Saliva, Sputum.

**PTYSIS**, Exspuition.

**PTYSMA**, Exspuition.

**PUANTEUR**, Dysodia.

**PUBERTAS**, Ephebia.

**PUBERTY**, *Pubertas*, *Hebē*, *Pubes*, *Aphrodisia*, *Ephebia*, *Ephebotes*, *Ephebo'synē*. The period of life at which young people, of both sexes, become nubile. According to the civil law, puberty occurs at 12 years in females, and 14 in boys. The period, however, varies considerably in different climates, and in different individuals of the same climate.

**PUBES**, *Pubis*, *Epis'ehion*, *Cteis*, *Pecten*; the *Pubic region*, from *pube're*, 'to begin to be covered with hair.' The middle part of the hypogastric region; so called, because it is covered with hair, in both sexes, at the period of puberty. The hair is called *Pubes*.

**PUBES**, Puberty.

**PUBLEUS**, Pubic.

**PUBIC**, *Pubian*, *Pubicus*, *Pubicus*, (F.) *Pubien*. That which belongs to or concerns the pubis.

The **PUBIC ARTICULATION** or *Symphysis*

*Pubis* results from the junction of the ossa pubis. The medium of union is cartilage.

The **PUBIC ARCH** or *Arch of the Pubis*, (F.) *Arcade pubienne*. The arch at the anterior part of the inferior circumference of the pelvis. It is more expanded in the female than in the male; to correspond with the additional functions, which she has to execute.

The **PUBIC LIGAMENTS** are two very solid, fibrous fasciæ, situate before and beneath the symphysis pubis, which they strengthen. The one is called the *anterior pubic ligament*, the other, the *inferior or subpubic*.

**PUBIEN**, Pubic.

**PUBIO-COCYGIEN-ANNULAIRE**, *Pubio-coecygeus annularis*. Dumas gave this name to the levator ani and ischio-coecygeus, which he considered a single muscle.

**PUBIO-COCYGIEN-ANNULAIRE**, *Levator Ani*—*p. Femoral*, *Pectinalis*—*p. Femoralis*, *Adductor longus femoris*—*p. Umbilical*, *Pyramidalis abdominis*—*p. Prostaticus*, *Compressor prostatae*—*p. Sous-umbilical*, *Pyramidalis abdominis*—*p. Sternal*, *Rectus abdominis*.

**PUBIS, OS**, *Epis'on*, *Epis'on*, *Share Bone*, *Os Pec'tinis*. The anterior part of the os innominatum, so called because it corresponds to the genital organs and pubic region. The angle of the *pubis* is formed by the union of the body and rami of the side.

**PUBLICÆ PARTES**. Those organs are so called, the object of whose functions is the nutrition of all the others. Such are the digestive and respiratory organs.

**PUCCOON**, *Sanguinaria Canadensis*.

**PUDDING-GRASS**, *Mentha pulegium*.

**PUDENDA**, Genital organs.

**PUDEND'AGRA**. A hybrid word; from *putenda*, 'the genital organs,' and the Greek *αγρα*, 'a seizure.' According to some, this term means pain in the genital parts: according to others, it is synonymous with syphilis.

**PUDENDAGRA**, Syphilis.

**PUDEND'AL HERNIA**. Hernia, which descends between the vagina and ramus ischii, and forms an oblong tumour in the labium; traceable in the pelvis, as far as the os uteri.

**PUDENDUM, FEMALE**, *Vulva*—*p. Muliebre*, *Vulva*.

**PUDENDUS**, *Pudic*.

**PUDIC**, *Pudicus*, *Puden'dus*, (F.) *Honteux*, from *pudor*, 'shame.' That which causes shame. A name given to the genital organs (q. v.) as well as to different other parts.

The **PUDIC ARTERIES** are distributed to the organs of generation. They are,—

1. The *internal Pudic*, *Sous-pubienne* (Ch.) *Arteria Pudica*, *A. pudenda communis*, (F.) *Artère honteuse interne*, *Genital Artery*. It is furnished by the hypogastric, and divides into two branches; the one—the *inferior or perineal*—which gives off the inferior hemorrhoidal and the artery of the septum; and the other—the *superior*, (F.) *Ishio-pénienne*—which furnishes the transverse perineal artery, and divides into two branches; the *artery of the corpus cavernosum*, and the *dorsalis penis*. This latter, in the female, has the name *Dorsalis Clitoridis*.

2. The *external Pudic Arteries*, *A. scrotales* ou *vulvaires* (Ch.), *A. honteuses externes*, which

are two in number. The one is *superficial* or *subcutaneous*; and the other *deep-seated* or *subaponeurotic*. They are given off from the femoral artery or some one of its branches; and are distributed to the external parts of generation.

The **PUDIC NERVE**, (F.) *Nerf honteux, Nerf Ischio-pénien* ou *Ischio-clitorien* (Ch.), is a branch furnished by the sacral plexus, which is distributed to the genital organs; and, especially, to the penis in man, and the clitoris in the female.

**PU'ERILE**, *Puerilis*, from *puer*, 'a child.' A term applied to the respiration when it becomes very sonorous by the stethoscope, as in healthy children.

**PUERPERA**, *Tokas, Lochos*; a *lying-in-woman*, (F.) *Femme en Couche, Accouchée*. A female in child-bed. One recently delivered.

**PUERPERAL FEVER**. Any fever occurring during the puerperal state—*Febris Puerperarum, Child-bed fever*. Most commonly restricted to a malignant variety of Peritonitis, (q. v.)

**PURPERIUM**, Parturition.

**PUFF-BALL**, Lycoperdon.

**PUFFINESS**, from (D.) *pöffen*, 'to blow;' *Inflatio, Tumefactio mollis*, (F.) *Bouffissure, Loursouffure*. A soft intumescence, without redness, which may be partial or general, and be produced by an accumulation of serous fluid, extravasation of blood, effusion of air into the subcutaneous cellular tissue, &c. Puffiness is most frequently seen in the face and legs; and, sometimes, appears around a wound.

**PUGIL'LUS**, *Drax, Drachion*, from *pugnus*, 'the fist;' *Dragma*, (F.) *Pincée*. The quantity of any substance, which may be taken with the end of two or three fingers. The eighth part of a handful.

**PULEGIUM**, *Mentha pulegium*—p. Cervinum. *Mentha cervina*.

**PULEX PENETRANS**, *Chique*.

**PULICARIS**, *Pulicula'ris*, from *pulex*, 'a gnat.' An epithet given to cutaneous eruptions resembling gnat-bites;—and, also, to the diseases in which such eruptions occur.

**PULICARIS HERBA**, *Plantago psyllium*.

**PULMO**, *Pulmōnes, Pneumon, Pleumon, Spiramentum animæ, Ergostērion spir'itus, Flabellum et ventid'brum cordis, the Lung*. The essential organ of respiration, which is double, and occupies the two sides of the chest. The lungs, which are of a spongy, soft, flexible, compressible, and dilatable structure, fill exactly the two cavities of the thorax, and are separated from each other by the mediastinum and the heart. The right lung, which is shorter and broader than the left, is divided, by two oblique fissures, into three unequal lobes. The left has only two lobes, and consequently only one fissure. At the internal surface of those organs, which is slightly concave, there is, about the middle, a pedicle, formed by the bronchia and pulmonary vessels, and called, by anatomists, the *root of the lungs*, (F.) *Racine des Ponnons*.

Essentially, the lungs are composed of prolongations and ramifications of the bronchia, and of the pulmonary arteries and veins,—the divisions of which are supported by a fine, cellular tissue.

When the surface of the lungs is examined in a clear light, we may see, even through the pleura, that their parenchyma is formed by the aggregation of a multitude of small vesicles, of an irregularly spheroid or ovoid shape, full of air, and separated by white and opaque septa. These vesicles are called *air-cells*. Along the partitions or septa is deposited, in greater or less quantity, the *black pulmonary matter*, (F.) *Matière pulmonaire noire*, as it has been called, which seems to be natural. Sometimes it is seen in points; at others, in spots.

The colour of the lungs varies according to age and other circumstances. In youth, it is more red; and, afterwards, grayish or bluish; often, as if marbled. The pleura pulmonalis is their investing membrane.

The air is carried to the lungs by means of the trachea and bronchi. The black venous blood, which requires oxygenation, is conveyed to them from the heart, by the pulmonary artery; and, when it has undergone this change, it is returned to the heart by the pulmonary veins. The blood-vessels, inservient to the nutrition of the lungs, are the *bronchial* arteries and veins. The pulmonary lymphatics are very numerous. Some are superficial; others, deep-seated. They pass, for the most part, into the *bronchial ganglions* or *glands*. The nerves are furnished by the pulmonary plexus.

**PULMONAIRE DES FRANÇAIS**, *Hieracium murorum*.

**PULMONARIA**, *P. officinalis, P. Maculata, P. Maculosa, Lungwort, Spotted Lungwort, Jeru'salem Cowslip, Jerusalem Sage, Spotted Comfrey*, (F.) *Sauge de Jerusalem*. Family, Boraginæ. *Sex. Syst.* Pentandria Monogynia. The leaves of this plant have been used as demulcents and pectorals; partly from their resemblance to lungs; and, partly, because they manifest a slightly mucilaginous taste. The plant is not worthy of notice.

**PULMONARIA**, *Pneumonia*—p. *Arborea, Lichen pulmonarius*—p. *Gallica, Hieracium murorum*.

**PULMONARY**, *Pulmonaris, Pulmonalis*. That which relates or belongs to the lungs. A name given to various parts.

1. The **PULMONARY ARTERY**, *Artēria pulmonaris*, arises from the upper and left part of the right ventricle of the heart; whence it passes obliquely upwards and to the left side; dividing into two trunks, opposite the second dorsal vertebra—one passing to each lung. At its origin, it is furnished with three sigmoid or semilunar valves. It carries the blood to the lungs for aeration.

2. The **PULMONARY VEINS**, *Venæ pulmonares, Artēria venosa*. These arise in the lungs from the final terminations of the arteries of the same name; collect in ramusculi and rami of greater and greater size, and ultimately unite in four trunks; two of which issue from each lung to open into the left auricle of the heart. The pulmonary veins have the same structure as the other veins of the body; from which they differ, in containing arterial blood, as the pulmonary artery differs from the others in conveying venous blood. They carry the blood back to the heart after aeration.

3. The **PULMONARY PLEXUS**, *Plexus pulmo-*

*naris*. A considerable nervous network, situated behind the bronchi; and which is formed by the filaments of the pneumogastric nerve or par vagum, and by other filaments from the inferior cervical ganglion and the first thoracic ganglia. This plexus forms a kind of areolar web, with numerous meshes of different sizes, in which vessels are lodged, surrounded by much cellular tissue. This plexus sends filaments to the bronchi, which they accompany to their extremities.

**PULMONARY MATTER, BLACK.** See Pulmo.  
**PULMONIA,** Phthisis pulmonalis, Pneumonia.

**PULMONIC,** *Pulmonicus, Pneumonius, Pulmonarius.* One attacked with pneumonia—one labouring under disease of the lungs. Any thing relating or belonging to the lungs. A medicine for the lungs.

**PULP,** *Pulpa, Pulpa'men, Sarx.* The soft and parenchymatous parts of vegetables, reduced to a paste by the operation of pulping.

**PULPA CASSIÆ.** See Cassia fistula.

**PULPA PRUNORUM SYLVESTRIMUM CONDITA,** Conserva pruni sylvestris.

**PULPAMEN,** Pulp.

**PULPE DENTAIRE,** Dental pulp.

**PULPEZIA,** Apoplexy.

**PULPING,** *Pulpa'tion, Pulpa'tio.* An operation—the object of which is to reduce certain vegetable substances to a pulp. For this pur-

pose, they are bruised in a mortar, and then passed through a hair sieve, by the aid of a wooden spatula, called a *Pulper*, (F.) *Pulpaire*.

**PULPOIRE.** See Pulping.

**PULSATILLA NIGRICANS,** Anemone pratensis—p. *Vulgaris, Anemone pulsatilla.*

**PULSATILLE NOIRE,** Anemone pratensis—p. *des Prés, Anemone pratensis.*

**PULSA'TION,** *Pulsa'tio, Sphygmus, Sphyxis, Pedes'is, Pedeth'mos,* (F.) *Battement.* The beating of the heart and arteries. Also, the beating felt in an inflamed part.

**PULSATIVUS,** Throbbing.

**PULSE,** from *pulso*, 'I beat;' *Pulsus, Pulsa'tio, Pulsus cordis et arteria'rum, Ictus cordis et arteria'rum, Incursus arteria'rum. Sphygmus, Diasphyxis,* (F.) *Pouls.* Beating of the arteries, produced by the afflux of the blood propelled by the heart in its contractions. For the sake of convenience, we choose the radial artery at the wrist to detect the precise character of the pulse. These characters relate to the number of pulsations in a given time; to their degrees of quickness; hardness, and strength; to the equality or inequality, either of the pulsations themselves or of their intervals; to the development or fulness of the artery, and to the different impressions it may produce on the finger.

The following estimates have been made of the pulse at various ages:

| Ages.                    | Number of beats per minute, according to |            |            |
|--------------------------|--|------------|------------|
|                          | HEBERDEN.                                | SÖMMERING. | MÜLLER.    |
| In the embryo, - - - - - | —  | —          | 150        |
| At the birth, - - - - -  | 130 to 140                               | Do.        | Do.        |
| One month, - - - - -     | 120                                      | —          | —          |
| One year, - - - - -      | 120 to 108                               | 120        | 115 to 130 |
| Two years, - - - - -     | 108 to 90                                | 110        | 100 to 115 |
| Three years, - - - - -   | 90 to 80                                 | 90         | 90 to 100  |
| Seven years, - - - - -   | 72                                       | —          | 85 to 90   |
| Twelve years, - - - - -  | 70                                       | —          | —          |
| Puberty, - - - - -       | —  | 80         | 80 to 85   |
| Adult, - - - - -         | —  | 70         | 70 to 75   |
| Old age, - - - - -       | —  | 60         | 50 to 65   |

It does not appear, from recent researches, that the pulse of the aged is less frequent, but the contrary.

In general, the pulse is more frequent in females and in irritable persons, than in males and those of an opposite temperament. In the healthy state, the pulse, besides having the proper number of pulsations, is neither hard nor unusually soft; it is moderately developed; of a medium strength; and perfectly equal, both as regards the pulsations and their intervals. In disease, it wanders, more or less, from these physiological conditions.

The different characters of the pulse, that have been enumerated, are remarkably great. In a Dictionary, it is necessary to detail them, although many of them are not now regarded; and some are ridiculous.

At times, when an impediment exists to the flow of blood along the pulmonary arteries, either owing to mechanical obstruction or to diminished force of the ventricle, a reflux takes

place, along the veins, giving rise to the '*venous pulse.*'

**PULSE, ARDENT,** *Pulsus ardens,* (F.) *Pouls ardent, Pouls élevé.* One which seems to raise itself to a point in order to strike the finger.

**PULSE, CAPRIZANS,** (F.) *Pouls caprisant.* One, which seems to leap, as it were.

**PULSE, COMPLEX,** (F.) *Pouls combiné ou composé, P. compliqué.* A pulse, which has the character of several critical pulses united.

**PULSE, CONTRACTED,** (F.) *Pouls serré, P. concentré.* One, whose pulsations are narrow, deep, and slightly hard.

**PULSE, CONVULSIVE,** *Pulsus convulsivus,* (F.) *Pouls convulsif.* That which is unequally frequent or unequally hard; in short, which resembles the irregular pulsation of a muscular fibre in a state of convulsion.

**PULSE, CRITICAL,** *Pulsus criticus.* A pulse which, after having possessed the characters of irritation, becomes free, open, soft, &c.

**PULSE, DEEP,** (F.) *Pouls profond.* One

which cannot be felt without difficulty, and without strong pressure by the finger.

**PULSUS DEFIC'IENTIS**, (F.) *Pouls défaillant*, *P. insensible*. One which seems, every instant, about to cease.

**PULSE, DEPRESSED**, *Pulsus depressus*, (F.) *Pouls déprimé*. That which is deep and weak.

**PULSE, DEVELOPED**, (F.) *Pouls développé*. That which is broad, full, strong, and frequent.

**PULSUS DICROTUS**, *P. biférens*, (F.) *P. dicrote*, *P. rebondissant*, *P. redoublé*. That in which the finger is struck twice at each pulsation: once lightly, the other time more strongly.

**PULSE, EQUAL**, *Pulsus aequalis*. That in which the pulsations resemble each other, and return at equal intervals.

**PULSE, FEBRILE**, *Pulsus febrilis*. One very frequent.

**PULSE, FEEBLE, WEAK**. *Pulsus debilis*, (F.) *Pouls faible*. One which strikes the finger feebly.

**PULSE, FILIFORM**, *P. thready*. One which resembles a thread slightly vibrating.

**PULSUS FORMICANS**, (F.) *Pouls formicant*. One which resembles, by being small and scarcely perceptible, the motion of an ant.

**PULSUS FORTIS**; *a strong pulse*; (F.) *Pouls fort*, *P. véhément*. One which strikes the finger strongly.

**PULSE, FREQUENT**, (F.) *P. agité*, *P. précipité*. One which strikes more frequently than usual in a given time.

**PULSE, FULL**, *Pulsus plenus*, (F.) *Pouls plein*. One which gives the notion of great repletion in the vessel.

**PULSE, GUT'TURAL**, *Pulsus gutturalis*, (F.) *Pouls guttural*. A pulse which has been supposed to indicate the termination of affections of the throat.

**PULSE, HARD**, *Pulsus durus*, (F.) *Pouls dur*. That in which the pulp of the finger seems to yield to the pulsation.

**PULSE HEMORRHOIDAL**, (F.) *Pouls des hémorrhoides*. A critical pulse, announcing the appearance of the hemorrhoidal flux. It is described as unequal;—the pulsations not being alike in force, and still less the intervals.

**PULSE, HEPATIC**, (F.) *Pouls du Foie*. A pulse imagined to indicate affections of the liver. It is not worthy of description.

**PULSUS INÆQUALIS**. *Unequal pulse*, (F.) *Pouls inégal*. One whose pulsations are not alike, or return at unequal intervals.

**PULSUS INFERIOR**, (F.) *Pouls inférieur*, *P. abdominal*, *P. ventral*. One supposed to announce evacuations below the diaphragm.

**PULSE, INTERCURRENT**. One in which a superfluous pulsation seems to occur from time to time.

**PULSE, INTERMITTENT**, (F.) *Pouls intercadent*. One in which the pulsations fail from time to time.

**PULSE, INTESTINAL**, (F.) *Pouls des Intestins*, *P. de la diarrhée*. A critical pulse, presumed to announce an evacuation by the intestines.

**PULSUS INTRICATUS**, (F.) *Pouls embarrassé*. That which is but little developed, and unequally slow.

**PULSE, IRREGULAR**, *Pulsus anormalis*. One

whose pulsations are unequal, and return at unequal intervals.

**PULSE OF IRRITATION**, *Pulsus ab irritatio'nē seu nervi'nis seu acrit'icus*. It is frequent, hard, and contracted.

**PULSE, JARRING**, *P. vibrating*—*p. Jerking*, *Pulse*, sharp.

**PULSE, LANGUID**, (F.) *Pouls languissant*. A slow and feeble pulse.

**PULSE, LARGE**, *Pulsus crassus*, *P. magnus*, (F.) *Pouls grand*, *P. large*. That which is large and full.

**PULSE, LONG**. One which strikes the finger to a great extent in length.

**PULSE, LOW**, *Pulsus humilis*, (F.) *Pouls bas*. One in which the pulsations are scarcely perceptible.

**PULSE, MYURUS**, (F.) *Pouls myure*. One which goes on diminishing. See Myurus.

**PULSE, NASAL**, (F.) *Pouls nasal*, *P. capital*, *P. du Nez*. One supposed to announce the end of an irritation in the nasal fossæ.

**PULSE, NATURAL**, (F.) *Pouls naturel des Adultes*, *P. parfait*, *P. des Adultes*, *P. modéré*. One that is equal and regular in strength and frequency; compressible, and devoid of hardness.

**PULSE, ORGANIC**, (F.) *Pouls organique*. One which indicates the affected organ, or the organ by which any evacuation will take place.

**PULSE, PECTORAL**, (F.) *Pouls de l'expectoration*. A critical pulse, announcing the termination of some pulmonary irritation.

**PULSE, QUICK**. One which strikes sharply, but not forcibly, against the finger.

**PULSE, REGULAR**, *Pulsus normalis aut regularis*. One whose pulsations are equal, and succeed each other at equal intervals.

**PULSE, RESISTING**, (F.) *Pouls résistant*. One a little tense, a little hard.

**PULSUS SERRINUS**, (F.) *Pouls serrin*, *P. serrutile*. One which strikes, sometimes strongly, at others feebly, and recalls the idea of a saw.

**PULSE, SHARP**, (F.) *Pouls prompt*, *P. vite*, *P. vif*. One which strikes the finger sharply, rapidly. When to a greater extent, it is called a *jerking pulse*.

**PULSUS STRICTUS**, (F.) *Pouls étroit*. One which strikes the finger to a small extent in breadth.

**PULSE, SLOW**, *Pulsus tardus*, (F.) *Pouls lent*, *P. tardif*, *P. rare*. One which strikes the finger slowly.

**PULSE, SMALL**, *Pulsus parvus*, (F.) *Pouls petit*. One whose pulsations are slender and weak.

**PULSE, SOFT**, *Pulsus mollis*, (F.) *Pouls mou*. One which yields under the finger.

**PULSE, SIMPLE**, *Pulsus simplex*. A critical pulse, indicating an evacuation by one organ only.

**PULSE, SUPPLE**, *Pulsus elasticus*, (F.) *Pouls souple*. One in which the pulsations have strength without hardness.

**PULSE STOMACHAL**, (F.) *Pouls stomacal*, *P. de l'estomac*. One supposed to announce an evacuation by the stomach.

**PULSUS SUDORALIS**, (F.) *Pouls Sudoral*, *P. de la sueur*. A critical pulse, indicating an approaching perspiration.

**PULSUS SUPERIOR**, (F.) *Pouls supérieur*. A

critical pulse, supervening on irritation of organs situate above the diaphragm.

**PULSE, TENSE, CORDY, Pulsus tensus, (F.) Pous tendu, P. roide.** One in which the artery resembles a cord fixed at its two extremities. When resembling a wire, it is called *wiry*.

**PULSE, TREADDY, P. filiform.**

**PULSE, TREMULOUS, Pulsus tremulens, (F.) Pous tremblant, P. palpitant.** One in which each pulsation oscillates.

**PULSE, UNDULATING, (F.) Pous ondulant, P. ondoyant.** One which resembles, in its movements, those of the waves.

**PULSE, UNEQUAL, Pulsus inæqualis.—p. venous, Pulsus venarum.**

**PULSUS URINALIS, (F.) Pous de l'urine.** A critical pulse, fancied to denote an approaching evacuation of urine.

**PULSUS UTERINUS, (F.) Pous Uterin, P. de la matrice, P. des Règles.** One which indicates the flow of the menses, or the occurrence of metrorrhagia.

**PULSE, VERMICULAR.** That which imitates the movement of a worm.

**PULSE, VIBRATING; a Jarring Pulse.** One in which the artery seems to vibrate like a musical string.

**PULSUS, see Pulse—p. Acriticus, Pulse of irritation—p. Æqualis, Pulse, equal—p. Anormalis, Pulse, irregular—p. Biferiens, P. dicrotus—p. Crassus, Pulse, large—p. Debilis, Pulse, feeble—p. Durus, Pulse, hard—p. Elasticus, Pulse, supple—p. Humilis, Pulse, low—p. Magnus, Pulse, large—p. Mollis, Pulse, soft—p. Nervinus, Pulse of irritation—p. Normalis, Pulse, regular—p. Parvus, Pulse, small—p. Plenus, Pulse, full—p. Tardus, Pulse, slow.**

**PULSUS VACUUS, (F.) Pous vide.** One which gives the idea of emptiness of the artery.

**PULSUS VENARUM, Venous Pulse, Phlebopœtia.** A pulsation occasionally noticed in the jugular veins. It is owing to some of the blood of the right ventricle reflowing into the right auricle, and communicating an impulse to the venous blood arriving in the auricle through the descending cava. It is often a sign of impediment to the flow of blood along the pulmonary artery.

**PULSILEGIUM, Pulsilogium, Pulsim'eter, from pulsus, 'the pulse,' and lego, 'I tell,' Sphygmom'eter.** Any instrument for measuring the quickness of the pulse.

**PULSIMANTYA;** from *pulsus* and *partea*, 'divination.' The art of predicting or prognosticating by the pulse.

**PULSIMETER, Pulsilegium.**

**PULTICULA, Bouillie.**

**PULVERIZATION, Pulverizatio, Pulveratio, Coniostosis.** The operation of dividing substances, so as to reduce them to powder.

**PULVILLUS, Pad.**

**PULVINAR PARVUM, Pad.**

**PULVIS, Conis, (F.) Poudre.** A substance, reduced into small particles by pulverization. *Simple powders* are those of a single substance; *compound*, those which result from a mixture of several different powders. An *impalpable powder* is one which is so fine, that it can scarcely be felt under the finger. A compound powder was, formerly, called *Species, (F.) Espèce.*

**PULVIS ABSORBENS, P. de magnesiâ compos.—**

**p. Alexiterius, P. contrayervæ comp—p. Alexiterius, P. ipecacuanhæ compositus—p. Algarothi, Algarothi.**

**PULVIS ALOES COMPOSITUS, Compound Powder of Aloes, Pulvis Aloës cum Guaiaco, P. aloëticus cum Guaiaco. (Aloës spicat. ext. ℥iiss, guaiac, gum. res. ℥j, pulv. cinuam. comp. ℥ss. Rub the aloes and guaiacum separately, then mix the whole. Ph. L.) Cathartic, stomachic, and sudorific. Dose, gr. x to ℥j.**

**PULVIS ALOES CUM CANELLA, Powder of Aloes with Canella, Species H'éræ picræ, Hiera picra, Pulvis Aloëticus. (Aloës hep. lbj, canelle albæ ℥iij. Rub separately into a powder, and mix. Ph. D.) A warm cathartic. Dose, gr. x to ℥j.**

**PULVIS ALOES CUM GUAIACO, P. A. compositus—p. Aloeticus, P. aloes cum canellâ—p. Aloeticus, Hiera picra—p. Aluminosus, P. sulphatis aluminæ compositus—p. Aluminis compositus, P. sulphatis aluminæ compositus—p. Aluminis kinosatus, P. sulphatis aluminæ compositus.**

**PULVIS DE AMARIS COMPOSITUS, Pulvis antiarthriticus amarus, (F.) Poudre antiarthritique amère. (Rad. gentian, aristoloch. rotund., aa p. 3, flor. centaur. min. p. 4, fol. chamædr. chamæpitil. manipul.—f. pulvis, Ph. P.) In gouty affections, dyspepsia, &c. Dose, gr. xx.**

**PULVIS CINNAMOMI COMPOSITUS, Compound Powder of Cinnamon, Pulvis seu Species Im-**

*perato'ris*. *P. vite Imperato'ris*, *P. Diarom'aton*, *Species diacinnamo'ni*, *S. latifican'tes Rhazis*, *Tra'gica aromati'ca*, *Species Diam'bræ sine odora'tis*, *Species aromati'ca*, *Pulvis aromaticus*. (F.) *Poudre de canelle composée ou aromatique*. (Cort. cinnam. ʒij, scm. cardam. ʒiiss, rad. zingib. ʒij, piperis long. fruct. ʒiiss. Rub to a fine powder. Ph. L.) Stimulant and carminative. Dose, gr. x to ʒj.

*PULVIS COBBI* seu *TUNQUINEN'SIS*. The famous Tonquin powder, introduced into England by a Mr. Cobb. It was composed of 16 grains of musk, and 48 grains of cinnabar mixed in a gill of arrack. It was formerly regarded as a specific in hydrophobia.

*PULVIS COMITIS WARVICENSIS*, *P. Cornachini*—*p. Comitisse*, *Cinchona*.

*PULVIS CONTRAYERVÆ COMPOSITUS*, *Lapis contrayervæ*, *Contrayerva balls*, *Compound Powder of Contrayerva*, *Pulvis cardiacus*, *P. alexit'erius*, *P. Mantuanus*. (*Contrayerv. rad. contrit. ʒv, test. præp. lbss. Mix. Ph. L.*) Stimulant and sudorific. Dose, gr. xv to ʒss.

*PULVIS CORNACHINI*, *Diacelat'son Paracelsi*, *Earl of Warwick's Powder*, *Pulvis Oz'ydi Stibii compos'it'as*, *Pulvis Com'itis Warwicen'sis*, *Pulvis de Tribus*, *Cerberus Triceps*, *Pulvis Scammonii antimoniat'is*. (F.) *Poudre Cornachine*. (*Scammon. Alep., potass. supertart., antim. diaph. aa p. æ f. pulvis Ph. P.*) Cathartic. Used chiefly in cutaneous diseases. Dose, ʒss to ʒj.

*PULVIS CORNU USTI CUM OPIO*, *Pulvis opiat'us*, *Powder of Burnt Hartshorn with opium*, (F.) *Poudre de corne brûlée avec l'opium*. (*Opii duri cont. ʒj, corn ust. et præp. ʒj, coccor. cont. ʒj. Mix. Ph. L.*) Ten grains contain one of opium. Anodyne.

*PULVIS CRETACEUS*, *P. cretæ compositus*.

*PULVIS CRETÆ COMPOSITUS*, *P. Carbonat'is Calcis compositus*, *Compound Powder of chalk*, *P. cretæceus*, *Species e Scordio sine opio*, *Diascordium*, 1720. *Pulvis antic'idus*, *P. terres'tris*, *Species Diacret'a*, (with Bole Armeniac in place of chalk—the *Puleis e Bolo compositus sine opio*, (F.) *Poudre de crat'e composée*. (*Cretæ ppt. lbss. cinnam. cort. ʒiv, tormentill. rad., acaciæ gum., sing. ʒiij, pip. long. fruct. ʒiv. Reduce separately to a fine powder and mix. Ph. L.*) Antacid, stomachic, absorbent. Dose, gr. xx to ʒij.

*PULVIS CRETÆ COMPOSITUS CUM OPIO*, *Compound Powder of Chalk with opium*, *Pulvis e Cretâ compositus cum opio* (with Bole Armeniac instead of chalk—*Puleis e Bolo compositus cum opio*, *Species e Scordio cum opio*, (F.) *Poudre de crat'e composée avec l'opium*. (*Pulv. cret. c. ʒvjss, opii duri cont. ʒiv. Mix. Ph. L.*) Contains one grain of opium in 40. Anodyne and absorbent. Dose, ʒj to ʒij.

*PULVIS DIAPHORETICUS*, *P. ipecacuanhæ comp.*—*p. Diapnoicus*, *P. ipecacuanhæ comp.*—*p. Diaromaton*, *P. cinnamomi compositus*—*p. Diasese*, *P. sennæ compos.*—*p. Diaturpethi compositus*, *P. jalapæ compositus*.

*PULVIS DUCIS PORTLANDIÆ*, *Duke of Portland's Gout Powder*. (*Rad. aristoloch., gentiana, smmit, chamædr., centaar. min. aa p. æ.*) Dose, ʒss to ʒj.

*PULVIS EMMENAGOGUS*, *P. myrrhæ compositus*—*p. Epilepticus marchionum*, *P. de inagne-*

*siâ compositus*—*p. Errlinus*, *P. asari compositus*—*p. Galactopæus*, *P. de magnesiâ compos.*

*PULVIS E GUMMI GUTTA*, *P. Cambog'ie compositus*, *P. hydrag'gus*, *Camboge Powder*, (F.) *Poudre hydragogue ou de gomme gutte*, *P. de Quercetanus*. (*Rad. jalap. 2ʒ p. rad. mechoacan, 12 p., cinnam. et rhei. aa 8 p., gum. cambog. 3 p., fol. soldanellæ sicc. 6 p. semin. anisi 12 p., fiat pulvis. Ph. P.*) A drastic cathartic. In anasarca and in worms. Dose, gr. xv to xxx.

*PULVIS GUMMI'SUS ALKALINUS*, *Sapo vegetabilis*, (F.) *Poudre de savon végétal*. (*Guaiac. pulv. ʒ2 p., potass. carb. 4 p.* Make into a powder. Ph. P.) Antacid.

*PULVIS EX HELMINTHOCORTO COMPOSITUS*, *P. vermifugus absque mercurio*, (F.) *Poudre vermifuge sans mercure*. (*Fuc. helminthocort., sem. contra., summit. absinth., tanacet., fol. scordii, semæ, rhai. aa p. æ, fiat pulvis. Ph. P.*) Dose, ʒj to ʒj.

*PULVIS HYDRAGOGUS*, *P. e. gummi guttâ*—*p. Hydrargyri cinereus*, see *Hydrargyri oxydum cinereum*—*p. Hypnoticus*, *Hydrargyri sulphuretum nigrum*—*p. Imperatoris*, *P. cinnamomi compositus*—*p. Incisivus*, *P. de sulphure et scillâ*—*p. Pro infantibus*, *P. de magnesiâ compos.*—*p. Infantum*, *P. de magnesiâ compos.*—*p. Infantum antacidus*, *P. de magnesiâ compositus*.

*PULVIS IPEACACUANHÆ COMPOSITUS*, *P. alexit'erius*, *P. anod'ynus*, *P. diaphoret'icus*, *P. diapno'icus*, *P. sudorificus*, *P. sudorificus*, *Dove'ri*, *Compound powder of Ipecacuanha*, *P. Ipecacuanhæ et Opii*, *Dover's Powder*, (F.) *Poudre de Dover* ou *d'ipeacacuanha et d'opium*, *P. de Dover*. (*Ipecacuanh. rad. cont., opii duri cont., sing. ʒj, potassæ sulphat. cont. ʒj.*) *Mix. Diaphoretic*. Dose, gr. v to gr. xij.

*PULVIS IPEACACUANHÆ ET OPII*, *P. ipecacuanhæ compos.*

*PULVIS JALAPÆ COMPOSITUS*, *P. Diatur'pethi compositus*, *Compound Powder of Jalap*, *Pulvis laxans*, *P. purgans*, *P. laxativus vegetabilis*, *P. laxans cum sale*, *P. jalapæ salinus*, (F.) *J. tartar'icus*, *Sp'ec'ies Diapjalapæ*, (F.) *Poudre de jalap composée*. (*Pulv. jalap. 1 p., potass. supertart. 2 p. Mix. Ph. E.*) Cathartic. Dose, ʒj to ʒij.

*PULVIS JALAPÆ SALINUS*, *P. jalapæ compositus*—*p. Jalapæ tartaricus*, *P. jalapæ compositus*—*p. de Jalapæ et scammonio compositus*, *P. scammonæ comp.*—*p. Jamesii*, *Antimonial powder*—*p. Jesuiticus*, *Cinchona*—*p. Joannis de Vigo*, *Hydrargyri nitrico-oxydum*.

*PULVIS KINO COMPOSITUS*, *Compound Powder of Kino*, (F.) *Poudre de kino composée*, (*Kino ʒxv, cort. cinnam. ʒiv, opii duri ʒj.* Rub each to powder and mix. Ph. L.) Astringent. Dose, gr. v to xx.

*PULVIS LAXANS*, *P. jalapæ compositus*—*p. Laxans cum sale*, *P. jalapæ compositus*—*p. Laxativus vegetabilis*, *P. jalapæ compositus*.

*PULVIS DE MAGNESIA COMPOSITUS*, *P. Galactopæus*, *P. Nutri'cum*, *P. Infantum*, *P. Infantum antic'idus*, *P. pro Infantibus*, *P. antic'idus*, *P. absorbens*, *P. epilep'ticus Marchionum*, *Compound Powder of Magnesiâ*, (F.) *Poudre absorbante et anti-acide*. (*Magnesiæ, sacchar. aa p. æ. Mix. Ph. P.*)

*PULVIS MANTUANUS*, *P. contrayervæ comp.*—*p. Marchionis*, *M. pulvis*—*p. Mercurialis cinereus*, *Hydrargyri oxydum cinereum*—*p. ad Mu-*

cum pulmonalem liberius ciendum, P. de sulphure et scilla.

PULVIS MYRRHÆ COMPOSITUS, P. e. Myrrhâ compositus, *Compound Myrrh Powder*, Pulvis ad ulcera tendinum, P. Emmenagogus, (F.) Poudre Balsamique. (Myrrhæ, sabinæ, rutæ, castor. russ. ãã ʒij.) A stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to xl.

PULVIS NUTRICUM, P. de magnesiâ compositus—p. Opiatus, P. cornu uesti cum opio—p. Oxydi stibii compositus, P. cornachini—p. Parturiens, Ergot—p. de Phosphate calcis et stibii compositus, Antimonial powder—p. Principis, Hydrargyri nitrico-oxydum—p. Purgans, P. jalapæ compositus—p. Quercetanus, Hydrargyri submurias.

PULVIS QUERCUS MARIÆ, Powder of Yellow Bladder-Wrack. (The wrack in fruit, dried, cleaned, exposed to a red heat in a crucible with a perforated lid, and then reduced to powder. Ph. D.) Virtues dependent on the iodine. Used, consequently, in bronchocele, &c. Dose, gr. x to xl.

PULVIS QUERCUS MARINÆ, see Fucus vesiculosus.

PULVIS SCAMMONEÆ COMPOSITUS, Compound Powder of Scammony, Pulvis e Scammonio compositus, Pulvis Scammonii, Pulvis de Jalapâ et Scammonio compositus, dictus Catharticus, (F.) Poudre cathartique ou Poudre de Scammonée composée. (Scammon., ext. jalap. dur., sing., ʒij, zingib. rad. ʒss. Rub separately to a powder and mix. Ph. L.) Cathartic. Dose, gr. viij to gr. xv.

PULVIS SCAMMONII CUM ALOE, P. e Scammonio cum Aloë, Scammony and Aloes Powder. (Scammon. ʒvj, ext. jalap. dur., aloës socotr. ãã ʒiss, zing. ʒss.) Cathartic. Dose, gr. x. to xv.

PULVIS SCAMMONII ANTIMONIALIS, P. cornachini.

PULVIS SENNÆ COMPOSITUS, Compound powder of Senna, Pulvis e Sennâ compositus, P. e Sennâ compositus, pulvis Diasennæ, (F.) Poudre de séné composée. (Sennæ folior., potass. supertart., sing. ʒij, scammon. ʒss, rad. zingib. ʒij. Ph. L.) Cathartic, hydragogue. Dose, ʒj to ʒj.

PULVIS DE SENNA, SCAMMONIO ET LIGNIS COMPOSITUS, dictus ANTIARTHRITICUS PURGANS, (F.) Poudre de Pêrad. (Gum. arab., potass. supertart., fol. sennæ, chinæ, ãã, 4 p., scammon., rad. sarsapar., chinæ, guaiac. lign. ãã 2 p., fiat pulvis. Ph. P.) Purgative. Used to obviate gout. Dose, ʒj.

PULVIS STANNI, see Tin—p. Sternutatorius, P. asari compositus—p. Stibiatus, Antimonial powder—p. Stypticus, P. sulphatis aluminæ compositus—p. Sudorificus, P. ipecacuanhæ comp.—p. Sudorificus Doveri, P. ipecacuanhæ compositus.

PULVIS SULPHATIS ALUMINE COMPOSITUS, P. aluminosus, P. aluminis kinosatus, Pulvis stypticus, Pulvis aluminis compositus, Alumen kinosatum, Compound Alum Powder, (F.) Poudre styptique ou d'alun composée. (Sulphatis aluminæ, p. iv. kino, p. i. Ph. E.) Astringent. In intestinal hemorrhage and diarrhœa. Dose, gr. x to xv.

PULVIS DE SULPHURE ET SCILLA, P. antiasthmaticus, P. incisivus, P. ad mucum pulmonalem liberius cien'dum, (F.) Poudre incisive

ou anti-asthmatique. (Sacchar. alb. p. 3, sulphur. lot. p. 2. scilla. siccata. p. j. Ph. P.) Dose, gr. v. to ʒss.

PULVIS DE SULPHATE POTASSÆ COMPOSITUS, P. ten'perans Stahl'ii, (F.) Poudre tempérante de Stahl. (Potass. sulph. et nitrat. ãã 9 p., hydrarg. sulph. rubr. 2 p. Mix. Ph. P.) As an antiphlogistic and in acidity of the first passages. Dose, ʒj to ʒij.

PULVIS DE SULPHURE TO HYDRARGYRI NIGRO ET SCAMMONIO, dictus VERMIFUGUS MERCURIALIS, (F.) Poudre vermifuge mercurielle. (Pulv. cornachin., hydrarg. sulphurct. nigr. recent, præp., ãã p. æ. Mix. Ph. P.) Dose, ʒj to ʒss.

PULVIS SYMPATHETICUS, Sympathetic powder—p. Temperans Stahl'ii, P. de sulphate potassæ compositus—p. Terrestris, P. cretæ compositus.

PULVIS TRAGACANTHÆ COMPOSITUS, Species Diatragacanthæ frigida, Pulvis e Tragacanthâ compositus, Compound Powder of Tragacanth, (F.) Poudre de gomme adragant composée. (Tragacanth. contus., acacia gummicant., amyli, sing. ʒiss, sacch. purif. ʒij. Ph. L.) Demulcent. In coughs, &c. Dose, ʒss to ʒij.

PULVIS DE TRIBUS, P. cornachini—p. Tunquinensis, P. Cobbii—p. ad Ulcera tendinum P. myrrhæ compositus—p. Vermifugus absque mercurio, Pulvis ex helminthocorto comp.—p. Vermifugus mercurialis, P. e sulphureto hydrargyri nigro et scammonio—p. Vitæ imperatoris, P. cinnamoni compositus.

PUMEX, Pumice, (F.) Pierre Ponce. This was formerly employed as a desiccative and dentifrice.

PUMICE, Pumex.

PUMILIO, Nanus.

PUMILUS, Nanus.

PUNA, Veta, Sorocco. A sickness common in the elevated districts of South America, which attacks those unaccustomed to breathe the rarefied atmosphere. It strongly resembles seasickness, with a most acute and depressing throbbing in the head. It does not often affect the respiration considerably.

PUNAISE, Cimex.

PUNCH, Rhizagra, oc'ayya, from pun'gere, 'to prick.' Repulsorium, (F.) Repoussoir. A surgical instrument, used for extracting the stumps of teeth.

PUNCTA OSSIFICATIONIS, Ossification, points of.

PUNCTÆ MUCOSÆ. See Acne.

PUNCTICULÆ, Petechiæ.

PUNCTIO, Paracentesis.

PUNCTUM AUREUM, Punctura aurea. Formerly, when an intestinal hernia was reduced—by an incision made through the integuments down to the upper part of the spermatic vessels, a golden wire was fixed and twisted, so as to prevent the descent of any thing down the tunica vaginalis.

PUNCTUM SA'LIENTS. The first point, which makes its appearance, after the fecundation of the germ. It is generally applied to the heart of the embryo.

PUNCTURA, Paracentesis—p. Aurea, Punctum aureum.

PUNCTURE, Punctura; from Pun'gere, 'to prick.' Tressis Punctura, (F.) Piqure. A

wound made by pointed instruments, such as swords, bayonets, needles, thorns, &c. A puncture, is, generally, of trifling consequence; but, sometimes, it becomes important from the part concerned or injury done to some nerve.

**PUNCTURING.** Same etymon. *Com-punctio*, *Paracentesis*, (F.) *Ponction*. The operation of opening, by means of a trocar, lancet, &c., any natural or accidental cavity; with the view of evacuating any fluid, effused or accumulated there. *Paracentesis* is a sort of puncturing.

**PUNGENT**, (F.) *Pongitif*. Pain is said to be pungent, when it seems as if a pointed instrument were forced into the suffering part.

**PUNICA GRANATUM.** The *Pomegranate*, *Rhoa*, *ροα*, *Rhæa*, *ροια*, *Grandatum*, *Malo-grandatum*, (F.) *Grenadier*, *Family*, *Myrtoideæ*. *Sex. Syst.* *Icosandria Monogynia*. The rind of the fruit, called *Malichorium*, *Malacorium*, or *Malicorium*; and the flowers—called *Balaustine flowers*—are the parts used in medicine. They have been employed both internally and externally as astringents. The seeds are called *Coccones*, *ροζωρες*.

**PUNK.** *Boletus ignarius*.

**PUOGENIA**, *Pyogenia*.

**PUPIL**, *Pupilla*, *Pupula*, *Pupilla*, *Visio*, *Coræ*, *Coræ*, *Rhor*, *Fœnestra* seu *Nigrum* seu *Foramen Oculi*, *Prunella*, *Lumen*, (F.) *Pupille*, *Prunelle*, *Sight of the eye*. The aperture of the iris, through which the rays of light pass, that have to impress the image of an object on the retina. This aperture can be dilated or contracted so as to allow a greater or smaller quantity of luminous rays to penetrate. The pupil, in man, is round, and by it the anterior and posterior chambers of the eye communicate with each other. In the fœtus, during the first six months of gestation, it is closed by the pupillary membrane.

**PUPIL CLOSURE OF THE**, *Synechisis*.

**PUPILLÆ VELUM**, Pupillary membrane.

**PUPILLARIS HERBA**, *Lapsana*.

**PUPILLARY**, *Pupilla'ris*. That which belongs to the pupil.

The **PUPILLARY MEMBRANE**, *Membrana Pupillarisis*, *Pupilla' velum*, *Membrana Wachendorfiana*. The central aperture of the iris is closed, in the fœtus, during a certain period of gestation, by a very thin membrane. It disappears in the seventh month.

**PUPULA**, *Pupila*.

**PUPULÆ.** The pulps or extremities of the fingers.

**PURBLINDNESS**, *Myopia*.

**PURGAMENTA**, Excrement—p. *Alba*, *Leucorrhœa*—p. *Infantis*, *Meconium*—p. *Puerperii*, *Lochia*.

**PURGATIO**, *Catharsis*—p. *Muliebris alba*, *Leucorrhœa*.

**PURGATIONES**, *Menses*—p. *Menstruæ*, *Menses*.

**PURGATIONES**, *Menses*.

**PURGATIVE.** *Purgati'vus*, *Purgans*, *Mochlicus*, *Catoret'icus*, *Catoret'icus*, *A. cathartica*, (q. v.) (F.) *Purgatif*. A medicine which operates more powerfully on the bowels than a laxative, stimulating the muscular coat, and exciting increased secretion from the mucous coat.

**PURIFORM**, *Puriformis*; from *pus*, and

*forma*. That which has the appearance of pus.

**PUR/PURA**, *Porphyra*. This word has been employed in many senses. It generally means, livid spots on the skin from extravasated blood, languor and loss of muscular strength, pains in the limbs.—(F.) *Pourpre*.

In the **PURPURA SIMPLEX**, *Porphyra simplex*, *Pete'chia sine febre*, *Phanig'mus Pete'chialis*, *Profusio subcutanea*, *Pete'chial Scurry*, the spots are numerous, but small and flea-bite-shaped; chiefly on the breast, arms, and legs; with paleness of countenance.

In the **PURPURA HÆMORRHAG'ICA**, *Porphyra hæmorrhagica*, *Stomac'acæ universalis*, *Hæmorrhag'ia universalis*, *Pete'chianosis*, *Morbus maculosus hæmorrhag'icus Werlhofii*, *Peliosis*, *Hæmorrh'ia' a pete'chialis* or *Land Scurry*, (F.) *Scorbut*—the spots are circular and of different sizes; often in stripes or patches, irregularly scattered over the thighs, arms, and trunk; with occasional hæmorrhage from the mouth, nostrils, or viscera, and great debility and depression of spirits.

In the **PURPURA NAU'TICA**, *Scorbutus*, *Pechlyr'bè*, *Gingibra'chium*, *Gingip'dium*, *Scelotyrbè*, *Stomac'acæ*, *Scorbutus nauticus* or *Sea scurry*, (F.) *Scorbut*, there are spots, of different hues, intermixed with the livid, principally at the roots of the hair; the teeth are loose; the gums are spongy and bleeding; the breath is fetid, and the debility universal and extreme.

This occurs chiefly at sea, after exposure to a moist, cold, foul atmosphere; with long use of salted food and stagnant water.

All these varieties of purpura resemble each other considerably. In the two first, however, there seems, at times, to be some excitement, which has led to the employment of purgatives, and even of bleeding, with advantage.

Generally speaking, the use of the mineral acids, will be indicated; and, in the sea scurry, vegetable food and vegetable acids must be regarded as the best antiscorbutics. Nitre is, also, a good antiscorbutic, and in cases of great prostration it may be mixed with Peruvian bark or the sulphate of quinine. Tamarinds and cream of tartar, made into drink, are also serviceable. But the great remedies are change from low to cheerful spirits; from filth to cleanliness; and from a cold and damp, to a temperate and dry, climate, with change of food.

The general principles of management are the same as in the land scurry.

**PURPURA**, *Scarlatina*—p. *Alba benigna et maligna*, *Miliary fever*—p. *Miliaris*, *Miliary fever*—p. *Puerperarum*, *Miliary fever*—p. *Urticata*, *Urticaria*.

**PURPURISSUM**, *Hydrargyri sulphuretum rubrum*.

**PURSE**, *Scrotum*.

**PURSELANE**, *Portulaca*.

**PURSINESS**, *Dyspnœa pinguino'sa*, (F.) *Pousse*. *Dyspnœa* accompanied with oppressive fatness.

**PURULENT**, *Purulentus*, *Empyos*, *Pyodes*. That which has the character of pus or consists of pus; as *purulent matter*, *a purulent collection*, &c.

**PURULENTIA**, *Suppuration*.

**PUS**, *Matter*, *Humor purulentus*, *Pyon*. A secretion from inflamed textures, and especially

from the cellular membrane. It is, almost always, of the same nature, whatever may be the part it proceeds from. Pus of a good quality,—*laudable pus*,—(F.) *Pus lauable*, is of a yellowish-white colour, opaque, inodorous, and of a creamy appearance. Heat, acids, and alcohol coagulate it. When analyzed by Schwilgué, it afforded albumen and water, a particular extractive substance, and a small quantity of soda, phosphate of lime, and other salts.

PUS CORROSIVUM, Sanies—p. Malignum, Ichor—p. Malignum, Sanies.

PUSILLATUM, *Pusula tum*, from *pusillus*, 'small.' A coarse powder.

PUSTULA ARDENS, Eczema.

PUSTULA ORIS, Aphthæ.

PUSTULE MALIGNÆ. See Anthrax.

PUSTULE, *Pustula*, *Epyd'asis*, *Ecthy'ma*, *Bee-nath*, *Bube*, *Epanus'tasis*. An elevation of the cuticle, with an inflamed base containing pus. Willan and Bateman reckon four varieties of pustules; the *Phlyza'cium*, *Psydra'cium*, *Achor* and *Farns*. The variolous pustule is often called, by the French, *Grain*; by us, *Pock*.

PUSULATUM, Pusillatum.

PUTREDO, Hospital gangrene, Putrefaction.

PUTREFACTION, *Putrefac'tio*, *Putrescen'tia*, *Putridity*, *Putre'do*, *Putrid'itas*. *Sepsis*, *Putrid fermenta'tion*, *Putrefac'tive fermenta'tion*. A decomposition, experienced by animal substances, when deprived of life and placed under particular circumstances. The presence of water is indispensable; of air, not; for putrefaction may occur in water, that has been boiled or in the earth. The temperature most favourable to it, is from 60° to 90° of Fahrenheit. The most common products of putrefaction are water, carbonic acid, acetic acid, ammonia, carburetted hydrogen, and a semi-putrid substance, which is volatilized and has an infected odour. It has been supposed that something like putrefaction may occur in the living body; as in case of putrid fever. To this condition, Piorry has given the name *Typhoha'mia*, conceiving it to be owing to alteration of the blood by putrid animal matters.

PUTRESCENTIA, Putrefaction—p. Uteri gravidi, Hystero-malacia.

PUTRID, *Putridus*, *Supros*. An epithet for some affections, in which the matters excreted and the transpiration itself exhale a smell of putridity. It is particularly applied to typhus.

PUTRIDITAS, Putrefaction.

PUTRIDITY, Putrefaction.

PUTRILA'GO, (F.) *Putrilage*. The pul-taceous matter or *slough*, which forms in certain gangrenous and other ulcers, and is thrown off.

PÛTZOCHILL. See Myroxylon Pe-riferum.

PYCNOTICA, Incrassantia.

PYELITIS, from *πυελος*, 'pelvis,' and *itis*, denoting inflammation. Inflammation of the pelvis and calices of the kidney.

PYELONEPHRITIS, from *πυελος*, 'pelvis,' *νεφρος*, 'kidney,' and *itis*, denoting inflammation. Inflammation of the kidney and of the pelvis and calices.

PYELOS, Pelvis.

PYESIS, Suppuration.

PYLE, Porta.

PYLEMPHRAXIS, from *πυλη*, 'porta,' 'a gate,' and *εμφραξις*, 'obstruction.' Obstruction of the vena porta.

PYLORIC, *Pyloricus*. That which relates to the pylorus. An epithet given to different parts.

1. The PYLORIC ARTERY or *Arteria Corona'ria dextra*, (F.) *Petite artère gastrique droite*, arises from the hepatic, and is distributed to the pylorus and to the lesser curvature of the stomach; anastomosing, particularly, with the A. coronaria ventriculi and A. gastro-epiploica dextra.

2. The PYLORIC VEIN follows the same distribution as the artery.

PYLORUS, *Janitor*, *Portonarium*; from *πυλη*, 'a gate,' and *ορηος*, 'a guardian.' *Ostium ventriculi duodenale seu pyloricum seu dextrum seu inferius*, *Orificium dextrum seu inferius seu Egres'sus seu Os inferius seu Annu'lus seu Sphincter ventriculi*, *Ostia'rius*, *Hostia'rius*, (F.) *Pylor*. The lower or right orifice of the stomach;—*Orifice intestinal*, (Ch.) Called *Pylorus*, because it closes the entrance into the intestinal canal, and is furnished with a circular, flattened, fibro-mucous ring, which occasions the total closure of the stomach during digestion in that organ. This ring has been called the *Valve of the Pylorus*, *Sphincter Pylori*, (F.) *Valvule de pylore*. It is a fold of the mucous and muscular membranes of the stomach; and is the *Pyloric muscle* of some authors.

PYODES, Purulent.

PYOGENIA, *Puogen'ia*; from *πυον*, 'pus,' and *γενεσις*, 'generation.' Generation of pus. The theory or mechanism of the formation of pus. Some have believed, that pus is formed in the arterial system, and is deposited, by way of excretion, in the inflamed part; others, that it is formed by the destruction of solid parts. These opinions are, however, inadmissible; and pus is now regarded as the product of a particular secretion in the diseased part.

PYOGENIC, *Puogen'icus*: same etymon. Having relation to the formation of pus.

PYOHÆMIA, from *πυον*, 'pus,' and *αιμα*, 'blood.' Alteration of the blood by pus.

PYON, Pus.

PYOPHTHALMUS, Hypopyon.

PYOPTYSIS, from *πυον*, 'pus,' and *πτωω*, 'I spit.' Spitting of pus.

PYORRHOËA, from *πυον*, 'pus,' and *ρρωω*, 'I flow.' A discharge of pus.

PYORRHOËA URINALIS, Pyuria.

PYOSIS, Hypopyon, Pterygion, Suppuration—p. Pectoris, Empyema.

PYOTHORAX VERUS, Empyema.

PYOTURIA, Pyuria.

PYR, Fevcr.

PYRA CRUSTUMINA, Crustuminatum—p. Crustumerina, Crustuminatum.

PYRAMID. *Pyramis*, *Eminentia pyramidalis tympani*. A small, bony projection in the cavity of the tympanum, which is excavated, to lodge the muscle of the stapes. Also, the *Centre-pin* of the trephine.

PYRAMIDAL DE L'ABDOMEN, Pyramidalis abdominis—p. *de la cuisse*, Pyramidalis—p. *du Nez*, Pyramidalis nasi—p. *Stapédien*, Stapedi-us.

PYRAMIDALE, (OS,) Cuneiform, (bone.)

**PYRAMIDA'LIS ABDOM'INIS**, *Musculus Fallo'pii* vel *succenturiatus* vel *auxiliarius*, *Pubio-ombilical*, *Pubio-sous-ombilical*, (Ch.,) (F.) *Pyramidal de l'abdomen*. A small, fleshy pyramidal fasciculus, whose existence is not constant; and which is inserted, by its base, into the upper part of the pubis, and terminates, by its summit, at the inferior part of the linea alba. When it contracts it stretches the linea alba.

**PYRAMIDA'LIS**, *P. Fem'oris*, *Sacro-trochanté-ricen*, (Ch.) *Iliacus exter'nus*, *Pyriform'is*, *Pyri-formis*, *Primus et superior quadrigem'inus*, (F.) *Pyramidal de la cuisse*. A flat, triangular muscle, situate at the posterior part of the pelvis. By its base, it is attached to the anterior surface of the sacrum; to the corresponding surface of the great sacro-sciatic ligament and to the posterior part of the ilium. It terminates by a tendon, which is attached to the inner surface of the great trochanter. This muscle is a rotator of the thigh outwards, or of the pelvis in an opposite direction.

**PYRAMIDALIS FEMORIS**, *Pyramidalis*.

**PYRAMIDA'LIS NASI**, *Proc'erus nasi*, *Nasum dilatans*, *Fronto-nasal*, (Ch.,) (F.) *Pyramidal du nez*. It is thin, triangular, and has its summit upwards. Above, it is continuous with the occipito-frontalis. It descends vertically before the root of the nose, on which it terminates; becoming confounded with the transversalis. This muscle wrinkles the skin of the root of the nose transversely, and stretches that which covers the tip.

**PYRAMIDES ANTÉRIEURES**, *Corpora pyramidalia*—*p. Malpighiana*, *Papillæ* of the kidney—*p. Postérieures du cercelet*, *Corpora restiformia*.

**PYRAMIDS OF WISTAR**, *Sphenoidal cornua*.

**PYRAMIS**, *Penis*—*p. Trigona*, see *Tem-poral bone*.

**PYRÆA**, *Incendium*.

**PYRECTICA**, febrile; from *πυρετος*, 'fe-ver.' Fevers: the first order in the class *Πα-ematica*, of Good.

**PYRENOIDES**, *Odontoid*.

**PYRÊTHRE**, *Anthemis pyrethrum*.

**PYRETOL'OGY**, *Pyretolo'gia*; from *πυρε-τος*, 'fever,' and *λογος*, 'a discourse.' *Pyrol'ogy*. A treatise on fevers. A title, sometimes given to a monograph on fever.

**PYRETHRUM**, *Anthemis pyrethrum*—*p. Sylvestre*, *Achillea ptarmica*.

**PYRETICUS**, *Febrifuge*.

**PYRETOS**, *Fever*.

**PYREX'IA**, from *πυρ*, 'fire.' *Febrile dis-eases*. The first class of Cullen's *Nosology*.

**PYRI MARTIALES**, *Ferrum tartarizatum*.

**PYRIA**, *Fomentation*.

**PYRIFORMIS**, *Pyramidalis*.

**PYRIPH'LEGES**, *πυριφλεγης*, from *πυρ*, 'fire,' and *φλεγω*, 'I burn.' One, who has a burning fever.

**PYRMONT, MINERAL WATERS OF**. A celebrated mineral spring, on the Weser, in Westphalia. The waters are tonic, and contain common salt, muriate of magnesia, sulphates of soda and magnesia, and carbonates of iron, lime, and magnesia dissolved in carbonic acid, with some resinous principles. It is a highly carbonated chalybeate.

**ARTIFIC'IAL PYRMONT WATER** may be formed of *Epsom salt*, gr. xv, *Common salt*. gr. v, *Magnes. alb.* gr. x, *Iron filings*, gr. v, *Water* liij. Impregnated with the gas from *Marble powder* and *Sulphuric acid*, ãã ʒvij.

**PYROLA**, *P. rotundifolia*, *Round-leaved wintergreen*. *Order*, *Pyrolaceæ*. This plant was once used as a gentle astringent and tonic.

**PYROLA UMBELLA'TA**, *Chimaph'ila* vel *Chimoph'ila umbellata*, *C. Corymb'osa*, *Ground-holly*, *Pippsis'æa*, *Wintergreen*. This common American plant is allied to the *uva ursi*, in botanical as well as medical qualities. It is tonic and diuretic. The bruised leaves irritate the skin.

**PYROLEUM OSSIUM RECTIFICATUM**, *Oleum animale Dippelii*.

**PYROLIG'NEOUS ACID**, *Acidum Pyro-aceticum*, *A. Ligni pyro-oleosum*, *A. Aceticum empyreumaticum*, *A. Ligneum*, *Pyrolignic Acid*, (F.) *Acide Pyroligneux*, *Vinâgre de bois*. An acid obtained by distillation, from wood, coal, &c., which was once believed to be of a peculiar character. It is now known to be formed of acetic acid and an empyreumatic oil, from which it may be freed; and, in this state, is sold in commerce for the *Acetum destillatum*. It is used for similar purposes as distilled vinegar, and for preserving animal substances. It has also been used as an antiseptic in gangrene and sphacelus, and to foul ulcers; wherever indeed *Creasote* is indicated.—The dose of the impure pyroligneous acid internally is from 5 to 30 drops, three or four times a day.

**PYROMA'NIA**; from *πυρ*, 'fire,' and *mania*. *Insanity*, with an irresistible desire to destroy by fire.

**PYROPH'AGUS**, *Igniv'orus*, from *πυρ*, 'fire,' and *φαγω*, 'I eat.' One who eats fire. A juggler, who eats bodies in a state of ignition.

**PYROS**, *Triticum*.

**PYROSIS**, *Limo'sis cardial'gia sputato'ria*, *Ardor stomachi*, *A. Ventric'uli*, *Cardial'gia sputatoria*, *Pyrosis Suet'icæ*, *Apoceno's vomitus pyrosus*, *Dyspeps'ia pyrosus*, *Waterbrash*, *Waterqueln*, *Blackwater*, (F.) *Fer chaud*, *Cremason*, *Soda*. This affection consists of a hot sensation in the stomach, with eructations of an acid, burning liquid, that causes a distressing sensation in the parts over which it passes. Attention to diet, and the use of bitter absorbents, will usually relieve, when the disease is functional. Occasionally, it occurs, symptomatic of organic disease of the stomach.

**PYROSIS SUECICA**, *Pyrosis*.

**PYROSOPHIA**, *Chymistry*.

**PYROTECHNIA**, *Chymistry*.

**PYROTECH'NY**, *Pyrotechnë*, from *πυρ*, 'fire,' and *τεχνη*, 'art.' *Art of making fire-works*, &c. Also, *chymistry*. M. Percy has used the term *Pyrotechnie Chirurgicale* for the art of applying fire or the actual cautery in Surgery.

**PYROTICUS**, *Caustic*.

**PYRUS CYDONIA**. The *Quince Tree*, (F.) *Coignassier*. *Family*, *Rosacææ*. *Sex. Syst.* *Icosandria Pentagynia*. The fruit is termed *Cydonium Malum*, *Malum Canum*, *Malum cotoneum*, *Quince* (F.) *Coign*. Quince seeds are, sometimes, used in decoction (q. v.) as a demulcent. The fruit makes a pleasant preserve.

**PYRUS MALUS**, *Malca*. The *Apple Tree*, (F.) *Pommier*. Apples are an agreeable fruit, when ripe. When unripe, they disagree, especially with those of weak digestive powers. The same may be said of the *pear*: the fruit of the *Pyrus comuud'nis*, *Apios*, *P. Sorbus*, *P. Sati-ra*, (F.) *Poirier*.—Apple, (F.) *Pomme*.—Pear, (F.) *Poire*.

**APPLE BRANDY** is a spirituous liquor obtained from the juice of the apple, and much used in the United States.

**PYUI/CON**, from *πυον*, 'pus,' and 'ελωω,' 'I extract,' (F.) *Tire-pus*. A surgical instrument for extracting pus from any cavity. Many

*pyulca* have been employed, all of which act as exhausting syringes.

**PYU'RIA**, *Pyoturia*, *Pyorrhœa urinal'is*, from *πυον*, 'pus,' and *ουρον*, 'urine.' Discharge of purulent urine. A symptom, which occurs in many diseases; particularly in cases of renal calculi, and in organic affections of the bladder.

**PYURIA CHYLOSA**, Chyluria—*p. Lactea*, Chyluria—*p. Mucosa*, Cystirrhœa—*p. Serosa*, Cystirrhœa—*p. Viscida*, Cystirrhœa.

**PYXIS**, *πυξίς*. A box; a pill-box. Also, an emollient ointment.—Aëtius and Paulus.

**PYXIS**, *Boîte*, see *Cotyloid*.

## Q.

Q. See Abbreviation.

**QUABEBE**, Piper cubeba.

**QUACK**, Charlatan.

**QUADRANS**, *Quarta pars librae*. A quarter of a pound. Three ounces (Troy.)

**QUADRANTAL**, Amphora.

**QUADRATUS**, Depressor labii inferioris—*q. Dorsi*, *Q. lumborum*.

**QUADRATUS FEMORIS**, *Quadratus*, from *quadra*, 'a square.' *Tuber-Ischio-trochantérien*, *Ischio-sous-trochantérien* (Ch.) *Quartus quadrigeminus quadratus*, (F.) *Carré de la Cuisse*. A muscle, situate at the posterior and upper part of the thigh. It is thin, flat, and quadrilateral, and is attached to the outer part of the tuberosity of the ischium; whence it proceeds transversely to the inferior part of the posterior margin of the great trochanter. It rotates the limb, turning the toe outwards.

**QUADRATUS GENÆ**, *Platysma myoides*—*q. Radii*, *Pronator radii quadratus*.

**QUADRATUS LUMBORUM**, *Quadratus seu Lumbaris externus*; '*Ilio-lumbi-costal*, *Flectens par lumborum*, *Quadratus dorsi*, *Ilio-costal* (Ch.,) (F.) *Carré des lombes*. A flat, somewhat thick, irregularly quadrilateral muscle, situate in the loins, at the sides of the vertebral column. It is attached, below, to the crista ilii and ilio-lumbar ligament; and, above, to the inferior margin of the last rib; and, besides, to the base of the transverse processes of the four last lumbar vertebrae. This muscle inclines the loins to its side; depresses the last rib, and is thus a muscle of expiration. It can, also, raise the hip.

**QUADRIGEMINA**, **TUBERCULA**, *Eminentia Quadrigemina*, *Optic Lobes*, *Cor'pora quadrigemina*, *Nates et Testes*, *Eminences bigeminés* (Ch.,) *Cor'pora bigemina*, (F.) *Tubercules quadrjumeaux*. Four medullary tubercles, situate at the posterior surface of the tuber annulare. They are white, externally; gray, internally; oblong; rounded; connected by pairs, and separated by two grooves, which divide them crucially. Of these tubercles—the superior, called *nates*, *Tubercula anteriora*, *Ghütia*, are larger and more prominent than the lower, called *testes*,—*Tubercula posteriora*. The pineal gland corresponds exactly to the point of intersection of the two furrows that separate them.

**QUADRIGEMINUS**, **PRIMUS ET SUPERIOR**, *Pyramidalis*—*q. Quadratus quartus*, *Quadratus femoris*—*q. Secundus et tertius*, *Ischio-trochanterianus*.

**QUAHOIL**, Cacao.

**QUAIL**, *Tetrao coturnix*.

**QUANDROS**. Ancient name for a precious stone, believed to exist in the brain of the vulture; and to which was attributed the property of augmenting the secretion of milk, and preserving from deadly accidents. No such stone exists.

**QUARANTINE**, from (I) *Quaranti'na*; itself from *quaran'ta*, 'forty,' (F.) *Quarantaine*. The time, during which travellers, returning from a country where the plague or any other pestilential disease exists, are compelled to remain on board ship or in a lazaretto. They, as well as the ship, are said 'to perform quarantine.'

Quarantine is, sometimes, extended beyond forty days, whilst its duration is frequently much less. It is sometimes enforced by land; for example, when contagious diseases require the establishment of *cordons sanitaires*, and when persons are desirous of leaving infected districts.

During quarantine, no communication is allowed between the travellers and the inhabitants of the country.

Quarantine is a great impediment to commerce; and is, doubtless, very frequently enforced where there is but little danger of contagion. The evils, however, that might arise from the introduction of a widely-spreading contagious disease, are so disastrous, as to induce legislators to maintain these laws in perhaps an unnecessary degree of strictness.

**QUARTAN**, *Quarta'na Febris*, *An'ticus Quartanus*, *Tetartus*, *Quartan Ague*, (F.) *Quarte*. An intermittent, the paroxysms of which recur every 4th day, leaving between them two days' interval. We speak, also, of the *Quartan Type*. A *Double Quartan* is one, in which one paroxysm occurs on the third and another on the second day, so that there is only one day of apyrexia and two of paroxysms in succession;—the paroxysms of every 4th day resembling each other. A *Triple Quartan* is one, in which there is a paroxysm every day; and on every three days the paroxysms correspond. A *rc-*

*doubling or repeating quartan*, (F.) *Fièvre quartre doublée*, is one, in which there are two paroxysms every 4th day. See Intermittent.

QUARTANUS REMITTENS, Tetartophia.

QUARTARIUS. An ancient measure, equal to one-fourth of the sextarius. See Weights and Measures.

QUARTE, Quartan.

QUARTI-STERNAL, *Quadristernalis*. The fourth osseous portion of the sternum, corresponding to the fourth intercostal space.—Béclard.

QUASSIA, *Quassia amara*. *Quassy*, *Quassia excelsa*, (F.) *Quassie*. A West India tree, from which is obtained the *Lignum Quassia*. It is an intensely durable bitter, without astringency; and has been employed as a tonic and stomachic. It is, generally, given in the form of infusion. The bitter principle is called *Quassinine*.

QUASSIA SIMAROU'BA, *Simarouba*, *Simaruba*, *Euonymus*. The bark of the Simarouba is bitter, and not unpleasant. Both water and alcohol extract its virtues. It is not astringent. It is exhibited, whenever a simple tonic is required.

QUASSINE. See Quassia.

QUATRE ÉPICES. See Myrtus pimenta.

QUATRIO, Astragalus.

QUEEN OF THE MEADOWS, *Spiræa ulmaria*.

QUERCULA MINOR, *Teucrium chamaedrys*.

QUERCUS ALBA, the *White Oak*; *Quercus Robur*, the *Common Oak*; *Q. Tinctoria*, the *Black Oak*; *Q. rubra Montana*, the *Red Oak* or *Spanish Oak*. Family, Amentaceæ. Sex. Syst. Monœcia Polyandria. (F.) *Chêne*. The bark of all these varieties is, probably, alike in medicinal properties. It is powerfully astringent and tonic, and has been used in intermittents, and likewise in decoction, as an astringent wash, where such is indicated.

*Acorns*, *Cecæ*, *Nuces Quercûs*, (F.) *Glands*, were, at one time, much used as food; and a decoction of them was once recommended in dysentery and diarrhœa, in glandular obstructions, &c.

A pessary, made of them, has been advised in immoderate flow of the menses. They are not now used.

QUERCUS CERRIS. A tree of Asia Minor, which affords the *Turkey Galls*, *Nut Galls*, *Gallæ Tar'cicæ*, *G. Quercina*, *G. Tinctoria*, *Nux Gallæ*, *Gallæ max'ima orbiculata*, *Cicis*, *Cassenoles*, *Gallæ Galls*, *Gallnut*, (F.) *Noix de Gallæ*. The *nut gall* is a protuberance, or tubercle, produced by the puncture of the *Diptolep'sis Gallæ Tinctoria*. It is powerfully astringent and tonic, and has been employed in diarrhœa, intestinal hemorrhage, and intermittents: but it is chiefly used, externally, in gargles and injections. The powder, made into an ointment with lard, is used in piles.

QUERCUS COCCIFERA, see *Kermes*—q. *Marina*, *Fucus vesiculosus*—q. *Suber*, see *Suber*.

QUEUE DE CHEVAL, *Cauda equina*, see *Medulla spinalis*—q. *de la Moelle épinière*, *Cauda equina*—q. *de Pourceau*, *Peucedanum*.

QUICKEN TREE, *Sorbus acuparia*.

QUICKENING. The period of gestation when the motion of the fœtus first becomes perceptible. This usually occurs about the 18th week, and was at one time erroneously believed to mark the time at which the fœtus becomes alive. It need scarcely be said, that it possesses the principle of life from the moment of the union of the materials furnished by the sexes at a fecundating copulation. When the motion is felt, the female is said to be 'quick with child.'

QUICKLIME, *Calx viva*.

QUICKSILVER, *Hydrargyrum*.

QUIES, *Acinia*.

QUINA QUINA, *Cinchona*.

QUINCE, see *Pyrus cydonia*—q. *Tree*, *Pyrus cydonia*.

QUINIA, *Quinina*.

QUINI'NA, *Qui'nia*, *Quina*, *Kini'num*, *Chini'num*, *Quinine*. An alkaline, uncrystallizable substance; under the form of a porous, whitish mass; almost insoluble in water, soluble in alcohol and ether. It forms, with acids, salts that are in general soluble. It is obtained from different cinchonas, but chiefly from the yellow, and is the active principle of those valuable drugs.

The *Sulphate of Quinine*—the salt usually employed in medicine—occurs in needles of a pearly and satiny appearance. It is employed, with great success, in the treatment of intermittents; and is available in many cases, where the bark in substance could not be retained, or would be injurious. Dose, from 3 to 10 grains in the 24 hours. It is obtained, by treating the yellow bark with sulphuric acid.

The *Acetate of Quinine* (*Quini'næ Acetas*, *Chinium Aceticum*, *Acetas chinii*, *A. chinii'ni*, *A. chinii'cus*, *A. Quiniæ*, *A. Quinæ*, *A. Quini'ni*, *A. Kini'ni*;) the *citrate* (*Quini'næ citras*, *citras chinicus*) the *Ferrocyanate* (*Quini'næ Ferrocyanas*, *Chinium Ferrocyanogenatum*, &c.) the *muriate* (*Quini'næ murias*, *Chinium muriat'icum*, *Ch. sal'tum* seu *Hydrochlor'icum*, &c.) the *Nitrate* (*Chinium nitricum*, &c. the *Phosphate*, (*Quini'næ Phosphas*, *Chinium phosphoricum*, &c.) and the *Tartrates of Quinine* and *Cinchonine* have been administered in the same cases as the sulphate.

QUININE, IODIDE OF. See *Iodine*.

QUINQUEFOLIUM, *Potentilla reptans*.

QUIN'QUINA, *Cinchona*—q. *Aromatique*, *Croton cascarilla*—q. *Bicolor*, *Cinchonæ caribææ cortex*—q. *Faux de Virginie*, *Cusparia ferbrifuga*—q. *Gris de Loza*, *Cinchonæ lancifolia cortex*—q. *Jaune*, *Cinchonæ cordifolia cortex*—q. *Orange*, *Cinchonæ lancifolia cortex*—q. *Piton*, *Cinchonæ caribææ cortex*—q. *Rouge*, *Cinchonæ oblongifolia cortex*.

QUINSEY, *Cynanche tonsillarlis*—q. *Nervous*, *Angone*—q. *Wolf*, *Lycanche*.

QUINTAN, *Febris quinta'na*, *F. pempt'a*, *F. quinta*, from *quintus*, 'a fifth.' A fever whose paroxysms return only every five days inclusively; and between which there are, consequently, three days of apyrexia.

QUINTE (F.) This word is used synonymously with *paroxysm* or *fit*, when speaking of cough,—as *une Quinte de Toux*,—'a fit of coughing.' Also, the *Influenza*, (q. v.)

QUINTEFEUILLE, *Potentilla reptans*.

QUINTES. See Pertussis.

QUINTESSENCE, *Quinta Essentia*. A name formerly given to alcohol, impregnated with the principles of some drug. It was, consequently, often synonymous with *Alcoholic tincture*. The most volatile principles of bodies were, also, called *Quintessences*.

QUINTISTERNAL. The fifth osseous portion of the sternum. It corresponds to the 5th and 6th intercostal spaces.

QUOTIDIAN, *Quotidianus*, *Ephemerus*,—

itself from *quotid'ie*, 'daily.' That which takes place every day.

The QUOTIDIAN FEVER, *Q. ague*, *An'etus quotidianus*, *Cathemerus*, *Methemerinos*, *Amphemerinos*, *Amphimerinos*, *Quotidianus*, (F.) *Fièvre quotidienne*, is an intermittent, the paroxysms of which recur every day.

A simple, double, or triple quotidian, is a quotidian, which has one, two, or three paroxysms in the 24 hours.

R.

R. is placed at the commencement of a prescription, as a contraction of *Rec'ipē*. (See Abbreviation.) Originally, it was the sign (♃) of Jupiter, and was placed at the top of a formula, to propitiate the king of the gods, that the compound might act favourably.

RABID, *Rab'idus*, (F.) *Rabique*, *Rabétique*, from *rabies*, 'canine madness.' That which belongs to hydrophobia; as *rabid virus*, &c.

RABIÉIQUE, Rabid.

RABIES CANINA, Hydrophobia.

RABIQUE, Rabid.

RACE, from *radicē*, abl. of *radix*, 'root.'

The union or aggregate of individuals, whose conformation or particular condition differs perceptibly from those of neighbouring varieties. In the human species, several races are designated. See Homo.

RACHAMEL'CA, from Hebr. רחם (*rechem*), 'the womb,' and מלך (*Molech*), 'a king'; *Rechamal'ca*. A peculiar formative principle, supposed, by Dolæus, to exist in the uterus.

RACHE, Porrigo.

RACHLÆI, *Rhachisæi*.

RACHIALGIA, Colic. metallic, Vertebral

disease—r. Mesenterica, *Tabes mesenterica*—r. *Pictoniensis*, Colic metallic—r. *Pictonum*, Colic, metallic.

RACHIDIAN ARTERIES, Spinal arteries—r. Bulb, see *Medulla oblongata*—r. Canal, Vertebral canal.

RACHIOPHYMA, *Rachiphyma*.

RACHIPHYMA, or *Rhachiphyma*, *Rachiphyma*, *Tumor Dorsi*, from 'ραχις, 'the spine,' and φυμα, 'a tumour.' A tumour on the spine or on the back.

RACHIS, Vertebral column.

RACHISAGRA, *Rhachisagra* from 'ραχις, 'the spine,' and ἀγρα, 'a seizure.' A gouty or rheumatic affection of the spine.

RACHITÆ, *Rhachitæ*.

RACHITIS, *Rhachitis*. Inflammation of the spine; also, *Cyrto'sis Ra'chia*, *Cyrton'osus*, *Morbus Ang'licus*, *Osteomalacia Infantum*, *Tabes pectora*; the *English disease*, the *Rickets*; from 'ραχις, 'the spine.' (F.) *Rachitisme*, *Nouveau*. A disease, characterized by crookedness of the long bones; swelling of their extremities; crooked spine; prominent abdomen; large head; and often precocity of intellect. It is accompanied by leanness, general debility, indiges-

tion; and, frequently, induces atrophy and hectic. Rickets occurs, particularly, during the first years of existence, in weakly children, born of rickety or scrofulous parents; brought up in damp or confined situations; who are badly nourished, and do not take sufficient exercise. The progress and termination of the disease are very variable. Some children gradually recover their health: others become more and more deformed, and ultimately die of consumption, dropsy, or other organic disease.

The treatment is almost wholly *hygienic*. Pure air; a healthy situation; nourishing diet; exercise; sea or common cold bathing; and tonics, afford the best prospect of success.

RACHITISME, *Rachitis*.

RACHOSIS, *Rhachosis*, from 'ραχω, 'I cleave.' A relaxation of the scrotum. —Dictionaries.

RACINE À BECQUET, *Geranium moschatum*—r. de Bengal, *Cassumuniar*—r. de Charcis, *Dorstenia contrayerva*—r. de Dracke, *Dorstenia contrayerva*—r. des Philippines, *Dorstenia contrayerva*—r. de Sufran, *Curcuma longa*—r. de Saint Esprit, *Angelic*—r. *Salivaire*, *Anthemis pyrethrum*—r. de Turbeth, *Convolvulus turpethum*.

RACINES DU CERVELET, *Corpora testiformia*.

RACORNISSEMENT (F.) from *se racornir*, 'to shrivel in the fire as leather does.' A physical property, possessed by animal substances, which consists in a kind of contractility, accompanied with sudden corrugation and curling. It is produced by heat, and by chemical agents, especially by the strong mineral acids.

RADEZYGE, *Radzyge*.

RADIAL, *Radialis*. That which relates to the radius.

1. The RADIAL ARTERY, *A. extern'a Cubiti*. It arises from the brachial, at the upper and anterior part of the forearm; descends on the outer side as far as the lower part of the radius, and proceeds downwards and backwards towards the superior extremity of the space, which separates the two first metacarpal bones. It then buries itself in the palm of the hand, where it forms the *profound* or *radial* palmar arch. The radial artery gives off the *recurrent radial*, several *radio-muscular* branches, the *transverse palmar rad'io-carpal artery*, the *ex-*

teral superficial artery of the palm of the hand, the external dorsal of the thumb, the *dorsalis carpi*, dorsal interosseous artery of the index, &c.

2. The DEEP-SEATED RADIAL VEINS follow the same course as the radial artery.

3. The RADIAL NERVE, *Radio-digital*, (Ch.) *Spiral Nerve*, *Spiral-muscular*, arises from the four inferior branches of the brachial plexus. It is, at first, situate behind the other nerves of the plexus. It then becomes engaged between the three portions of the triceps brachialis, passes behind the humerus, and descends between the supinator longus and brachialis internus, until opposite the upper extremity of the radius. In its course it gives numerous filaments to the triceps, supinator longus, extensor carpi radialis longior, and to the integuments of the hand. Opposite the upper extremity of the radius it divides into two branches;—the one posterior, which turns backwards into the substance of the supinator brevis, and, when it has reached the space between the two layers of muscles on the posterior surface of the forearm, divides into a great number of filaments, which are distributed to those muscles, and to the integuments of the hand. The other branch is anterior: it descends before the supinator brevis and the radius; until, near the inferior third of that bone, it engages itself between the tendons of the supinator longus and extensor carpi radialis longior; and, becoming afterwards subcutaneous, divides into two branches, whose filaments are distributed to the integuments of the thumb, index, middle finger, to the outer side of the ring finger, and to the first interosseous muscles of the back of the hand.

4. EXTENSOR CARPI RADIALIS BREVIOR, *Radialis externus brevior*, *Radialis secundus*, (F.) *Second radial externe*, *Petit radial*, *Épicondylo-sus-métacarpien*, (Ch.) An extensor muscle of the wrist, situate beneath the extensor carpi radialis longior. It is attached, above, to the external tuberosity of the humerus, and terminates, below, by a long tendon, inserted into the posterior part of the upper extremity of the third bone of the metacarpus. It has the same uses as the next muscle.

5. EXTENSOR CARPI RADIALIS LONGIOR, *Radialis externus longior*, *Radialis externus primus*, (F.) *Premier radial externe*, *Grand radial*, *Huméro-sus-métacarpien*, (Ch.) It is seated at the outer part of the forearm; is thin, but thicker on the outside than on the inside. It is attached, above, to the inferior part of the outer edge, and to the corresponding tuberosity, of the humerus; and terminates, below, by a long tendon, which is attached to the superior extremity of the second bone of the metacarpus. It extends the hand on the forearm.

RADIAL ANTERIEUR, *Palmaris magnus*—*r. Externe premier*, see *Radialis*—*r. Externe*, second, see *Radialis*—*r. Grand*, see *Radialis*—*r. Petit*, see *Radialis*.

RADIALIS EXTERNUS BREVIOR, see *Radialis*—*r. Externus primus*, see *Radialis*—*r. Externus longior*, see *Radialis*—*r. Internus*, *Palmaris magnus*—*r. Secundus*, see *Radialis*.

RAD'IATED, *Radialis*, (F.) *Rayonné*. That which is arranged in rays; in lines, diverging from a common centre. An epithet given to several ligaments, &c., as to those

which unite the ribs to the sternum; those which unite the tibia and fibula at their inferior extremity, &c.

RAD'ICAL, *Radiculis*, from *radix*, 'a root.' A radical cure is one in which the disease is destroyed, as it were, from the root. It is used in opposition to *palliative cure*.

RADICAL MOISTURE, *Humidum radicale*.

RADICIS'ECA. One employed in collecting and preparing plants was formerly so called.

RADICULA, *Raphanus hortensis*.

RADIO-CARPAL, *Radio-carpia'nus*. That which relates to the radius and carpus.

The RADIO-CARPAL ARTICULATION is the wrist joint, or articulation of the os scaphoides, os semilunare, and os cuneiforme of the carpus with the inferior surface of the radius, and the fibro-cartilage, situate below the ulna. It is strengthened by lateral, anterior, and posterior ligaments.

RADIO-CARPAL TRANSVERSE PALMAR ARTERY, (F.) *Artère Radio-carpienne-transversale-palmaire*. A transverse branch, given off by the radial artery, opposite the lower edge of the pronator quadratus, which sends several branches to the anterior or palmar surface of the carpus.

RADIO-CUTANÉ (NERF.) see *Cutaneous*—*r. Phalangettien du pouce*, *Flexor longus pollicis manus*.

RADIO-MUSCULAR, *Radio-muscularis*. A name given to the branches sent off from the radial artery to the muscles of the forearm, in the first part of its course; as well as to the nervous filaments, which the radial nerve sends to the same muscles.

RADIS, *Raphanus hortensis*.

RADISH, *Raphanus hortensis*.

RADIUS, 'a spoke:'—so called from its shape. *Cercis*, *Fœtîle minus* seu *superius*, *Canna minor*, *Os adcubitale*, *Additamentum ulnæ*, *Manubrium manus*, *Parapœchyon*, *Arun-do brachii minor*, (F.) *Os du Rayon*. A long, prismatic bone, the upper and lesser extremity of which is called the *head*. This is supported by a *cervix* or *neck*. At the part where the neck is confounded with the *body* of the bone, is the *tubercle* or *bicipital tuberosity* or eminence for the insertion of the biceps. The radius is articulated, above, with the os humeri and with the lesser sigmoid cavity of the ulna: below, with the scaphoides, semilunare, and the head of the ulna. Its inferior extremity, which is larger than the superior, is flattened before and behind; is irregularly quadrilateral; and has, below, a double facette to be articulated with the two first bones of the carpus. On the outer side is the styloid process; and, on the inner, a concave facette, which joins the ulna. Behind, are grooves for the passage of the extensor tendons. The radius is developed from three points of ossification; one for the body, and one for each extremity.

RADIUS, *COL DU*, *Collum radii*.

RA'DIX, *Rhizus*. A root.

The Root or *fang* of a tooth is the part contained in the alveolus. The *radix* or *root* of the nail is the portion hidden under the skin, &c. Surgeons give the name to the prolon-

gations, sent by scirrhus, cancerous, or other tumours into the neighbouring parts.

The FIVE APERIENT ROOTS, *Quinque radi'ces aperient'es*, were, of old,—asparagus, butchers' broom, fennel, parsley, and smallage.

The FIVE LESSER APERIENT ROOTS, *Quinque radi'ces aperient'es minor'es*,—were caper, dandelion, cryngo, madder, and rest-harrow.

RADIX BRAZILIENSIS, Ipecacuanha—*r. Indica Lopeziana*, Lopez radix—*r. Lopeziana*, Lopez radix—*r. Ninsi*, Sium ninsi—*r. Rubra*, Rubia—*r. Serpentum*, see *Ophiorrhiza mungos*—*r. Ventris*, Umbilicus.

RADULA, Raspatorium.

RADZYGE, *Radzygin*, *Radezyge*. A name given, in Norway, to a variety of syphilis, bearing considerable analogy to the yaws. Some have esteemed it a species of lepra or elephantiasis.

RAGE, *Ira*, *Furor brevis*, *Orgē*, *Thymos*, (F.) *Colère*. Violent passion, characterized by contraction of the muscles of the face, violence in every movement, extreme irritation of the nervous system, acceleration of the blood's motion, and by redness and swelling of the face.

RAGE, Hydrophobia.

RAGE, Rhage.

RAGWORT, *Senecio Jacobææ*.

RAIFORT, *Raphanus hortensis*—*r. Sauvage*, *Cochlearia armoracia*.

RAINBOW-WORM, *Herpes iris*.

RAIVURE, Groove—*r. Digastrique*. Mastoid groove.

RAISIN, see *Vitis vinifera*—*r. d'Amérique*, *Phytolacca decandra*—*r. de Bois*, *Americium myrtillus*—*r. d'Ours*, *Arbutus uva ursi*—*r. de Renard*, Paris.

RAISINS, *Uvæ passæ*, see *Vitis vinifera*—*r. de Corinthe*, see *Vitis Corinthiaca*.

RAISON, Reason.

RAKASIRA. An American balsam; of a brownish or brownish-red colour; semi-transparent; brittle; softening and becoming tenacious by heat; inodorous when cold, but exhaling a very agreeable smell when heated; and possessing a balsamic and slightly bitter taste. The precise vegetable that furnishes it is not known. It has been used chiefly as a balsam in gonorrhœa and urinary affections.

RAKIA. See Spirit.

RÂLE. See Rattle.

RÂLE, Rattle, (q. v.)—*r. Caverneux*, Gurgling—*r. Crépitant*, see Crepitation.

RAMENTUM, Fragment, Scobs.

RAMEX, Heruia—*r. Varicosus*, Varicocele.

RAMIFICATION, *Ramificatio*. A division of arteries, veins, and nerves into branches. Also, the branches themselves.

RAMILLE, Ramusculus.

RAMOLLISSEMENT, Mollities—*r. du Cervéau*, Mollities cerebri—*r. des Os*, Mollities ossium.

RAMPANT, *Repens*, *Reptans*. That, which creeps or drags on the earth.

The French *Bandage rampant* has the folds arranged spirally around the part, leaving intervals between them. It is a retentive bandage, but is easily displaced, and, therefore, not employed.

RAMPES DU LIMAÇON, *Scalæ* of the cochlea.

RAMPHOS, Rostrum.

RAMULUS, Ramusculus.

RAMUNCULUS, Ramusculus.

RAMUS, *Cladus*, a branch. (F.) *Rameau*. A division of an artery, vein, or nerve.

RAMUS DURIOR SEPTIMÆ CONJUGATIONIS, Facial nerve.

RAMUSCULUS, *Ram'ulus*, *Ramunculus*, *Cladis'cos*. A division of a ramus. (F.) *Ramuscule*, *Ramille*, (*Bot'y*.)

RANA ESCULENTA, (F.) *Grenouille*. This frog and the bull frog *Rana Tauri'na*—are eaten as a delicacy. They are nutritious and easily digested.

RANA, Rana.

RANCE, Rancid.

RANCID, *Ran'cidus*, *Sapros*, (F.) *Rance*.

An epithet given to fatty bodies, which have become acrid from age or the contact of air. Mild ointments may, thus, become very irritating, and unfit for the purposes for which they were originally intended.

RAN'CUA. An erratic pain in a wound, accompanied by swelling and pulsation.

RANINE, *Rani'na*; from *Rana*, 'a frog.' The termination of the lingual artery is so called; that is, the portion of the artery, which advances horizontally between the genio-glossus and lingualis muscles as far as the point of the tongue. The ranine vein follows the same course as the artery, and opens into the internal jugular or into the superior thyroid.

RANULA, from *Rana*, 'a frog,' so called from its resemblance; *Dysphagia Ranula*, *Empyrag'ma saliva'rē*, *Frog Tongue*, *Batrachos*, *Batra'chium*, *Hydroglos'sa*, *Hypoglossis*, *Hypoglossum*, *Rana*, (F.) *Grenouillette*. A small, soft, fluctuating and semi-transparent tumour, which forms under the tongue, owing to the accumulation of saliva in Wharton's duct. In order to give exit to the accumulated fluid, and to establish a permanent opening for the discharge of the saliva, the cyst must be punctured, and the opening maintained by a minute cylinder, with a button at each extremity, as has been recommended by Dupuytren; or a portion of the cyst may be removed by the scissors, and the mouth be frequently washed by any astringent lotion. Sometimes, the salivary duct is found plugged by a small calculus.

RANUNCULUS, (F.) *Renoncule*. Family, Ranunculaceæ. *Sex. Syst.* Polyandria Polygynia. A genus of plants, most of the species of which, when taken internally, act as acrid poisons. See Poison. They are, also, acrid and vesicant, when applied to the skin, and have, accordingly, been often used as counter-irritants.

The following species answer to this description.

RANUNCULUS ABORTIVUS.

RANUNCULUS ACRIS, *R. pratens'is*. Meadow Crowfoot, *Butter Cups*, (F.) *Bouton d'or*.

RANUNCULUS BULBOSUS, *R. pratens'is*, *Bulbous-rooted Crowfoot*, (F.) *Renoncule bulbeuse*, *Bassinct*.

RANUNCULUS FLAMMULA, *Surrecta alba*, *Smaller Water Crowfoot*, *Spearwort*, (F.) *Petite douce*.

RANUNCULUS ILLYRICUS.

## RANUNCULUS LINGUA.

RANUNCULUS SCELERATUS, *R. Palustris*, Marsh Crowfoot.

RANUNCULUS FICARIA, *Pilewort*, *Chelidonium minus*, *Scrophularia minor*, *Ficaria ranunculoïdes*, *Chelidonia rotundifolia minor*, *Cursumaiamorrhoidalis herba*, *Ranunculus vernus*, Lessercelandine. (F.) *Petite chéldoine*, *Petite Éclairé*, *Ficaire*. The leaves and root have been used medicinally:—the leaves as an antiscorbutic; the root as a cataplasma in piles.

RANUNCULUS ALBUS, *Anemone nemorosa*—*r. Palustris*, *R. sceleratus*—*r. Pratensis*, *R. bulbosus*—*r. Vernus*, *R. ficaria*—*r. Virginianus*, *Lobelia syphilitica*.

RAPA NAPUS, *Brassica rapa*—*r. Rotunda*, *Brassica rapa*.

RAPE, *Brassica napus*, *Stuprum*.

RAPHANE'DON, from *ραφανις*, 'a radish,' 'like a radish.' *Rhaphanedon*. A transverse fracture of a long bone, leaving no splinters. What has been called in France, *Fracture en rave*.

RAPHANIA, *Convulsio Raphanio*, *Rhaphanio*, *Morbus spasmodicus malignus seu popularis*, *M. Silsiacus*, *Eclampsia typhoides*, *Synclonus Raphanio*. Linnaeus gave this name to a convulsive disease, not uncommon in Germany and Sweden, and which has been attributed to the seeds of the *Raphanus Raphanistrum* being mixed with the corn. The convulsions are seated in the limbs, and are attended with acute pain. See *Convulsio cerealis*, and *Ergotism*.

RAPHANUS HORTENSIS, *Raphanus*, *R. sativus*, *R. niger*, *Radicula*. The *Radish*. (F.) *Rairort*, *Radis*. *Family*, Cruciferae. *Sex. Syst.* *Tetradynamia Siliquosa*. The root of this plant is a common esculent. It has, also, been given as a diuretic in calculous affections. The juice, made into a syrup, is exhibited to relieve hoarseness. Radishes have long been celebrated as anti-scorbutics.

RAPHANUS MARINUS, *Cochlearia armoracia*—*r. Raphanistrum*, see *Raphania*—*r. Rusticanus*, *Cochlearia armoracia*—*r. Sylvestris*, *Cochlearia armoracia*.

RAPHĒ, or RHAPHĒ, *ραφη*, 'a suture.' A name given to prominent lines resembling a raised stitch. Such is the *Raphe* or *Tramis* that divides the scrotum into two parts, and which extends from the anterior part of the anus to the extremity of the penis. The name *Raphe*, or *Linea media'na*, is, also, given to two prominent lines which are longitudinal and parallel, and are seen at the upper surface of the corpus callosum, extending from the anterior to the posterior extremity of that commissure.

RAPHEX, *Chenopodium vulvaria*.

RAPHIANKIS'TRON, from *ραφιον*, 'a needle,' and *αγκιστρον*, 'a hook.' An instrument employed in the formation of artificial pupil.

RAPHION, Needle.

RAPHIS, Needle.

RAPPORT, (F.) *Relatio*, *Renunciatio*. A deposition made by the physician or surgeon to prove the condition of a person, the nature of a disease, the existence or non-existence of pregnancy, a sudden or violent death, &c. Formerly, there were the *Rapports dénonciatifs*, made at the desire of the injured or their friends, and

intended to point out to the judges the details of the crime or misdemeanor,—the *Rapports provisoires*, the object of which was to obtain provisions for the injured individual, both as regarded food and medicine, and to defray the expenses of prosecution;—and *Rapports mixtes*, or those which were both *dénonciatifs* and *provisoires*. At present, reports or depositions are generally divided into *judiciary*, or those which serve to throw light on the subject matter of any civil or criminal cause; and *administrative*, which afford information on subjects relating to any branch of the public administration, as on the nuisance or otherwise of certain establishments, the character of any epidemic, &c.

RAPPORT, Erection.

RAPTUS POST-TERGANEUS, *Opisthotonos*.

RAPUM MAJUS, *Brassica rapa*.

RAPURE, *Rasura*.

RAQUETTE, *Cactus opuntia*.

RAREFA'CIENS, *Arcoticus*, (F.) *Raréfiant*, from *rarus*, 'rare,' and *facere*, 'to make.' Medicines were so termed, which were supposed to be possessed of the power of giving more bulk or extension to the blood or other humours.

RARÉFIANT, Rareficians.

RASCATIO, Excretion.

RASCETA, *Carpus*, *Malleolus*.

RASH FEVER, *Scarlatina*, nettle, *Urticaria*—*r. Rose*, *Roseola*—*r. Summer*, *Lichen tropicus*—*r. Tooth*, *Strophulus*.

RASORIUM, *Rasporium*.

RASPATO'RIUM, *Rasorium*, *Rat'ula*, *Scalprum rasorium*, *Xyst'ra*, *Rad'ula*, *Runcin'ula*, *Scalprum*, (F.) *Rugine*, *Grattoir*. An instrument used for rasping bones, to detach the periosteum,—either in certain surgical operations, or for anatomical purposes.

RASPBERRY, *Rubus idæus*.

RASSETA PEDIS, *Tarsus*.

RASTETA, *Carpus*, *Malleolus*.

RASU'RA, *Xysma*, *Xysmos*, (F.) *Rapure*. A rasure, or scratch, or erosion. Also, the rasping or shaving of any substance; as *Rasura Cornu Cervi*, *Hartshorn shavings*.

RASURA, Scobe.

RATAFYA. A liquor prepared by imparting to ardent spirits the flavour of various kinds of fruits, and adding sugar.

RATANHY, *Krameria ratanhia*—*r. of the Antilles*, *Krameria ixina*.

RATE, Spleen.

RATÉLEUX, Splenicus.

RATÉLIER, *Dentier*.

RATIO. A reason, cause, an explanation; as *Ratio symptom'atum*, an explanation of the symptoms.

RATIO, Reason.

RATIONAL, *Ration'alis*. That which is conformable to reason. This epithet is often opposed to *empirical*; as *rational treatment*. The French, also, say *Signes rationales*, in opposition to *Signes sensibles*.

RATSBANE, Arsenious acid.

RATTLE, *Rhynchus*, *Rhynchus*, *Rhenxis*, from (D.) *Rotcl*. *Rhonus*, *Cerchnus*, *Rhogmos*. (F.) *Râle*. Noise produced by the air in passing through mucus, of which the lungs are unable to free themselves. This condition is chiefly

observed at the approach of death; and is commonly called "the rattles."

The name *Râle* has been given to different sounds during respiration, caused by the air passing through fluid contained in the bronchi, or arcolæ of the pulmonary tissue; and which are perceived by the stethoscope.

**RALE CREPITANT**, *Rhynchus crepitanus*. See Crepitation.

**RALE MUQUEUX**, *Rhynchus mucosus*, 'Mucous Rattle.' The sound produced by the passage of air through mucus accumulated in the bronchi or trachea, or through softened tubercular matter.

This *râle* occurs in catarrh, and in softened tubercle. When carried to a very high degree it constitutes a *gurgling*, (F.) *Gargouillement*.

**RALE SIBILANT**, *Rhynchus sibilans*, *Sibilant Rattle*. A slight, though prolonged whistling sound, occurring either at the commencement of inspiration, or of expiration, owing to the presence of mucus, thin and viscid, but not abundant, which obstructs, more or less completely, the smaller bronchial ramifications. It is seated in the small tubes, and occurs in the first stage of bronchitis.

**RALE SONORE**, *Rhynchus sonorus*, *Sonorous Rattle*. A sound resembling at times the snoring of a person asleep, at others the sound of the bass string of an instrument when rubbed with the finger, and, not unfrequently the cooing (F.) (*Rucoulement*) of a dove. It seems to be caused by a contraction of the bronchial tubes, and is characteristic of chronic catarrh.

**RATTLESNAKE**, *Crotalus horridus*—r. Root, *Polygala senega*.

**RATULA**, *Raspatorium*.

**RAUCEDO**, *Rau'citas*, *Parapho'nia rauca*, *Asperitas Arter'ia aspera*, *Vox rauca*, *Branchus*, *Hoarseness*, (F.) *Enrouement*, *Raucité*. A change in the voice, which loses its smoothness and becomes low and obscure. It is a common symptom in diseases of the larynx and trachea.

**RAUCITAS**, *Raucedo*.

**RAUCITÉ**, *Raucedo*.

**RAVE**, *Brassica rapa*.

**RAYONNE**, *Radiated*.

**RAYONS SOUS-IRIENS**, *Ciliary processes*.

**REACTION**, *Reactio*. An action of resistance to a power applied. A species of vital movement or excitement, tending to prevent or destroy the effects of any noxious power applied to the animal economy, and which, by some, has been attributed to the *vis medicatrix natura*. It is certainly dependent on the organic instinctive actions of the frame.

**REALGAR**, *Realgal*, *Arlada*, *Arladar*, *Auripigmentum rubrum*, *Arsenicum rubrum factitium*, *Abessi*, *Sandara'cha Græcorum*, the *Red Sulphuret of Mercury*. A violent poison. See *Poison*.

**REASON**, *Ratio*, *Logos*, (F.) *Raison*. The faculty or property of the mind, by means of which man perceives the distinction between right and wrong, in physics as well as morals. *Reason* is a just conclusion resulting from the comparison of two ideas; by virtue of which we form a judgment.

**REBISOLA**. A name for medicines, for-

merly prepared from urine, and administered in jaundice.

**REBOLEA**, *Mummy*.

**REBONA**, *Mummy*.

**REBOUTEUR**, *Renoueur*.

**RECEPTACULA DURE MATRIS**, *Sinuses of the dura mater*.

**RECEPTACULUM CHYLI**, *R. Pecqueti* seu *Pecquetid'num*, *Diversorium Chyli*, *Sacculus chyli* seu *rorifer*, *Saccus lacteus*, *Alveus ampull'osus* seu *ampull'es'cens*, *Utriculus lacteus*, *Vesic'ula chyli*, *Ampulla chyli* seu *chyli*, *Cister'na lumbid'ris*, *Chylocystis*, *C. Chyli*, *Latices lactei*. (F.) *Reservoir du chyle*, *R. de Pecquet*, *Citerne lombaire*. A considerable dilatation of the thoracic duct, in front of the lumbar region of the vertebral column.

The *Receptaculum Coturnii* is a triangular space, formed by a separation of the two laminae of the dura mater in the internal ear, near the middle of the posterior surface of the pars petrosa of the temporal bone, where the aquæductus vestibuli terminates. It is always filled with the *Fluid of Cotugno*.

**RECEPTACULUM PECQUETI**, *R. chyli*.

**RECEPTIVITY**, (F.) *Réceptivité*. A word, used by Tissot to express the susceptibility of certain organs to receive morbid impressions.

**RECESSIO**, *Paroxysm*.

**RECESSUS**, *Abscess*.

**RECHAMELCO**, *Rachamelca*.

**RECHUTE**. See *Relapse*.

**RÉCIDIVE**. See *Relapse*.

**REC'IPE**, (L.) A Latin word, which signifies "take," (F.) *Prenez*, and with which prescriptions are commenced. It is, often, represented by R, &c, and was formerly by ℞. See *Abbreviation*.

**RECLINATION**, *Reclina'tio*; from *reclina're*, 'to bend back.' A mode of operating for the cataract, which consists in applying the needle, in a certain manner, to the anterior surface of the cataract and depressing it into the vitreous humour, in such a way, that the front surface of the cataract is the upper one and its back surface the lower one.

**RECOMPOSITION**, *Metasynchrisis*.

**RECORPORATIVUS**, *Metasynchritic*.

**RECREMENT**, *Recremen'tum*. A humour, which, after having been separated from the blood, is again returned to it; such as the saliva, the secretion of serous membranes, &c. Such fluid is said to be *recremental*.

**RECRUDESCEN'TIA**, *Palincot'sis*, *παλιγγ'ησις*, *Recrudescence*. An increase of a disease after a temporary remission.

**RECTIFICATION**, *Rectificatio*. An operation, by which certain liquids are purified by distilling them either singly, or after admixture with other substances.

**RECTO-VAGINAL**, *Recto-vagin'al'is*. That which relates or belongs to the rectum or vagina.

The **RECTO-VAGINAL SEPTUM**, (F.) *Cloison recto-vaginale* is formed by the junction—back to back—(or by what the French term *adossement*) of the rectum and vagina. It separates these two canals from each other.

**RECTO-VAGINAL FISTULA** is owing to a preternatural communication between the rectum and vagina, through the above septum.

RECTUM; so called from a notion that it is straight. It is not so. *Intestinum Rectum*, *Apcuthysmenos*, *Euthyenteron*, *Longaon*, *Longas*, *Longanon*, *Archos*, *Cys'saros*, *Princeps*, *Monocolon* (?) The third and last portion of the great intestine. It forms the continuation of the sigmoid flexure of the colon, occupies the posterior part of the pelvis and extends from the left side of the sacro-vertebral articulation to the coccyx, before which it opens outwards by the orifice called the *anus*. It is cylindrical, but *sacculated*, as it were, at its inferior portion, where it is consequently larger, and is attached to the sacrum by the mesorectum. Like the other portions of the canal it is formed of three membranes. Towards the lower extremity, some parallel and longitudinal wrinkles are observable on its inner surface; these are the *Columns of the Rectum* or of *Morgagni*, (F.) *Colonnes du rectum* ou de *Morgagni*. They are merely folds of the mucous membrane, between which are a number of *Lacunæ*.

The arteries of the rectum are numerous. They proceed from the inferior mesenteric, hypogastric, and internal pudic, and are called *hemorrhoidal* (q. v.) The veins open, partly into the hypogastric vein, partly into the inferior mesenteric. The nerves proceed from the sciatic and hypogastric plexuses. The rectum receives the fecal matters, as they are passed from the colon, which serves as a reservoir.

RECTUS ABDOMINIS, *Pubio-sternal*, *Sterno-pubicus* (Ch.) (F.) *Droit de l'abdomen*. A long, flat muscle, situate at the anterior part of the abdomen, and separated from that of the opposite side by the *linea alba*. It is attached, above, to the cartilages of the three last true ribs; and, below, to the pubis by a very strong tendon, the outer edge of which is continuous with the *fascia transversalis*. This muscle is enclosed in an aponeurotic sheath; and, in its course, has three or four transverse, aponeurotic intersections. It bends the chest on the pelvis and *vice versa*.

RECTUS ANTERIOR BREVIS, *Rectus capitis internus minor*—r. *Anterior longus*, *R. capitis internus major*—r. *Capitis anticus longus*, *R. C. internus major*.

RECTUS CAPITIS INTERNUS MAJOR, *R. internus major*, *R. anterior longus*, *Trachélo-basilaire*, *Rectus capitis anticus longus*, (F.) *Grand droit antérieur de la tête*. This muscle is long in proportion to its breadth; flat, and broader above than below. It is situate at the anterior and lateral part of the neck, and arises from the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebrae. It is inserted into the basilar process of the occipital bone.

RECTUS CAPITIS INTERNUS MINOR, *R. internus minor*, *Recl'ens*, *An'nuens*, *R. anterior brevis*, *Petit trachélo-basilaire*, (F.) *Petit droit antérieur de la tête*. This is situate deeper than the last. It is thin, flattened, irregularly quadrilateral, and passes from the anterior surface of the body of the first vertebra, near the origin of the transverse process, to be inserted into the basilar process.

RECTUS CAPITIS LATERALIS, *R. lateralis Fallopii*, *Transversalis anticus primus*, *Rectus lateralis*, *Trachélo-aloïdo-basilaire*, *Alloïdo-sous-occipital* (Ch.) (F.) *Droit latéral de la tête*.

There is a muscle of this name on each side of the head. It is flat, quadrilateral, and passes from the transverse process of the atlas to the occiput, behind the jugular fossa. It inclines the head to one side.

RECTUS CAPITIS POSTICUS MAJOR, *R. Major*, *R. Capitis posticus minor* (*Albinus*), *Spino-axoïdo-occipitalis*, *Axoïdo-occipitale* (Ch.) (F.) *Grand droit postérieur de la tête*. A flat, triangular muscle situate at the posterior and superior part of the neck. It extends from the spinous process of the second cervical vertebra to the external surface of the lower semicircular ridge of the occipital bone. This muscle extends the head; inclines it to one side; and causes it to experience a rotary motion, which directs the face to its side.

RECTUS CAPITIS POSTICUS MINOR, *R. Minor*, *Taber-aloïdo-occipital*, *Alloïdo-occipital* (Ch.) (F.) *Petit droit postérieur de la tête*. A flat, triangular muscle, situate beneath the last, and which passes from the posterior arch of the atlas to the occipital bone. It extends the head.

RECTUS CAPITIS POSTICUS MINOR, *R. C. P. major*—r. *Cruris*, *R. femoris*—r. *Interior femoris*, *Gracilis*—r. *Internus major*, *R. capitis internus major*—r. *Internus minor*, *R. capitis internus minor*—r. *Lateralis*, *R. capitis lateralis*—r. *Lateralis Fallopii*, *R. C. lateralis*—r. *Major*, *R. capitis posticus major*—r. *Minor*, *R. capitis posticus minor*.

RECTUS EXTERNUS OCULI, *Abductor oculi*, *Indignabundus*, *Indignatorius*, *Iracundus*, *Oculum movens secundus*, *Orbito-extus-scleroticien*. All the recti muscles of the eye, four in number, arise from the bottom of the orbit, and are inserted into the sclerotic coat of the eye. The *Rectus externus*, (F.) *Droit externe*, *Iracundus*, ou *Abducteur* is divided, at its posterior extremity, into two portions, one of which is attached to the outer part of the foramen opticum, and the other to the sphenoid bone.

The RECTUS INFERIOR OCULI, *Depressor oculi*, *Timidus*, *Deprimens*, *Humilis*, *Oculum movens quartus*, *Sous-optico-sphéno-scleroticien*, (F.) *Droit inférieur ou abaisseur de l'œil*, arises below the optic foramen, from the sphenoid bone. It depresses the eye.

The RECTUS INTERNUS OCULI, *Adducens oculi*, *Bibitorius*, *Oculi adductor*, *Oculum movens primus*, *Orbito-intus-scleroticien*, (F.) *Droit interne de l'œil* ou *adducteur* ou *baucur*. It arises from the sphenoid at the inferior part of the foramen opticum. It turns the eye towards the nose.

The RECTUS SUPERIOR OCULI, *Attollens oculi*, *Levator oculi*, *Superbus*, *Elevator oculi*, *Oculum movens tertius*, *Sus-optico-sphéno-scleroticien*, (F.) *Droit supérieur*, ou *élévateur de l'œil*, *Dédaigneur*, is attached to the circumference of the foramen opticum.

(All the recti muscles are concerned in the voluntary motions of the eye. The oblique muscles, have been supposed to execute the involuntary.—(Sir C. Bell.)

RECTUS FEMORIS, *Rectus sive gracilis anterior*, *Rectus cruris*, *Ilio-rotulien*, (F.) *Droit antérieur de la cuisse*. A straight muscle seated at the anterior part of the thigh. It extends from the anterior and inferior spine of the ilium

and the cotyloid cavity of the patella. This muscle extends the leg upon the thigh and conversely. It can, also, bend the thigh upon the pelvis or carry the pelvis forward.

RECUBITORIUM, Anaclinterium.

RECURRENT, *Recurrens*; from *recur'ere*, 'to run back.' A name given to several arterial and nervous branches, which seem to re-ascend towards the origin of the trunk whence they emanated.

RECURRENT ARTERIES. This name has been given to several arteries of the forearm, and to one of the leg.

In the forearm, there are, 1. The *Radial recurrent, Artère recurrennte de l'épicondyle*, (Ch.) which arises from the superior part of the radial, and ascends between the supinator longus, s. brevis, and the brachialis internus. 2. The *anterior cubital recurrent, A. recurrennte de l'épitrochlée*, (Ch.) which arises from the upper and inner part of the cubital, and ascends between the pronator teres and brachialis internus. 3. The *posterior cubital recurrent*, which arises from the preceding artery, or from the cubital itself, and ascends between the olecranon and internal tuberosity of the humerus. 4. The *posterior radial recurrent. A. recurrennte olécraniennne*, (Ch.) It arises from the posterior interosseous, and ascends between the posterior cubital and anconeus muscles.

In the leg,—the *Arteria recurrens tibialis, A. recurrennte du genou* (Ch.) is furnished by the anterior tibial, and ascends to the tibialis anticus muscle.

RECURVATIO. See Hump.

REDIMICULUM, Diadema.

REDINGOTES ANGLAISES, Condom.

REDOUBLEMENT, Exacerbation, Paroxysm.

REDUCTIO, Taxis.

REDUCTION, *Reductio, Repositio, Restitutio*. A surgical operation, the object of which is to restore displaced parts to their original situation. Thus, we say the reduction of a luxation, when the displaced parts are again brought to their proper relative situation. The reduction of a hernia is the restoration of the protruded parts to the cavity of the abdomen. This is, also, called *Taxis*.

REDUNDANTIA, Plethora.

REDUVIA, Paronychia.

REFECTIO, Restauratio.

REFLECTION, Duplicate.

REFLEX SYSTEM OF NERVES. See Nerves.

REFRACTION, *Photocomp'sis*, from *retro*, 'backwards,' and *frango*, 'I break.' The change of direction which rays of light experience when they pass obliquely from one medium into another of different density. If the light passes from a rarer to a denser medium it approaches the perpendicular raised at the point of immersion. The contrary occurs, when it goes from a denser to a rarer medium. The theory of lenses, telescopes, and of the eye rests entirely on this property of light.

RÉFRACHISSANTS, Refrigerants.

REFRIG'ERANTS, *Refrigerantia, Psychtica*, (F.) *Refrachissans, Réfrigeratifs*. Medicines, which depress the morbid temperature of the body. The chief reputed refrigerants, are the

Potassæ Nitras, (?) the Sodæ Boras, (?) but chiefly the abstraction of caloric by ice and iced drinks, cold water, cold lemonades, soda water, and effervescing draughts internally; and externally cool air, ice, cold water, evaporating lotions and frigorific mixtures.

RÉFRIGÉRATIFS, Refrigerants.

REGENERATIO, Reproduction.

REGENERATION, *Regeneratio, Palin-genesia*. Reproduction of a part of the body, which has been destroyed.

REG'IMEN, from *reg'ere*, 'to govern' The rational and methodical use of food, and of every thing essential to life; both in a state of health and disease. It is often restricted, in its meaning, to *Diet*.

REGINA PRATI, Spiræa ulmaria.

REGIO CARDIACA, Epigastric region—r. Hypochondriaca, Hypochondre—r. Stomachalis, Epigastric region—r. Stomachica, Epigastric region.

REGION, *Regio*. Anatomists have called *regions*, determinate spaces on the surface of the body or of different organs. Thus, the abdomen has been divided into several; to which different names have been given.—See Abdomen, Epigastrium, Hypochondrium, Hypogastrium, &c.

REGION OMBILICALE, Umbilical R.

RÉGLÉS, Menses.

RÉGLISSE, Glycyrrhiza.

REGLUTINATIO, *Decollement*.

RÈNE ANIMAL. See Animal.

REGULUS ANTIMONII, Antimonium.

REGURGITATION, *Regurgitatio*. The act by which a canal or reservoir frees itself, without effort, from substances accumulated in it. Usually, it is applied to the *pukeing* of infants; and to the *rising* of solids or fluids into the mouth in the adult.

The substances brought into the mouth by regurgitation, the French call *Renvois*.

REIN, Kidney.

REINE DES PRÈS, Spiræa ulmaria.

REINFORCEMENT, FASCICULUS OF, *F. Cuneatus*. A band of fibres from the *corpus innominatum* or lateral part of the antero-lateral column of the medulla, which is continued up behind and around the corpus olivare, is lined on its inner or central surface with cineritious substance, enlarges as it ascends, passes over the upper surface of the Pons Varolii, and is expanded into the optic thalamus. It thus forms, in its course, the anterior paries of the 4th ventricle, and is brought into view by brushing away the *tuberculum cinereum* or gray matter of the ventricle. The band has received these names owing to its constantly increasing as it ascends, and being mixed up with gray matter on its inner face, from which it seems to derive new fibres.

REJECTIO, *Anugo'ge*. Every excretion by the mouth; spitting, expectoration, regurgitation or vomiting.

REJECTIO SANGUINIS E PULMONIBUS, Hæmoptysis.

RELACHEMENT, Relaxation.

RELAPSE, *Hypot'ropè, Hypotropismus*, from *re*, 'again,' and *labor*, 'I fall down.' The return of a disease, during, or shortly after, convalescence. The French use *Rechute* in this

sense; and *Récidive* (*Morbus recidivus*) for the return of a complaint, at a greater or less period after the complete restoration of health.

RELATIO, *Rapport*.

RELAXANT, *Laxans, Malaet'icum*, (F.) *Relachant*. A medicine which diminishes the tension of organs. Mucilaginous and fatty substances are relaxants.

RELAXANTIA, Emollients.

RELAXATION, *Chal'd'sis, Chalus'mos*, (F.) *Relachement*. In *Physiology*, relaxation is opposed to contraction. In *Pathology*, it means great looseness of a part.

RELEVEUR DE L'ANUS, Levator ani—*r. de la Lèvre inférieure, Levator labii inferioris—r. du Menton, Levator labii inferioris—r. de l'Omoplate, Levator scapulae—r. de la Prostata, Levator prostatae—r. de l'Urèthre, Levator urethrae*.

RELIQUAT, (F.) The remnant or remains of a disease.

REMÈDE, Clyster—*r. du Capuchin, Liqueur hydrargyri nitrici—r. du Due d'Antin, Liqueur hydrargyri nitrici*.

REMEDIUM, Juvans, Medicament.

REMEDY, Medicament—*r. English, Cinchona*.

REMISSEO, Decline.

REMISSEION, *An'esis, Submis'sio, Apl'esis, En'dosis, Remis'sio*, from *remi'terè*, 'to relax.' In a more extensive signification, a temporary diminution of the symptoms of a disease, either acute or chronic. Diminution in the febrile symptoms, such as occurs in a remittent fever, between the exacerbations.

REMITTENT, *Remittens*, same etymon. Any disease, which presents *remissions*, (q. v.)

A REMITTENT FEVER, *Febris remittens, Epunctus*, is one which strikingly exacerbates and remits, but without intermission.

REMORA, from *remora'ri*, 'to arrest.' The name of two surgical instruments, intended to retain parts *in situ*. The one was used, formerly, in castration, to prevent the intestines from protruding at the inguinal ring: the other, called *Remora Hildani*, (F.) *Arrêt d'Hildan, Echené'is, εχενή'is*, was employed to maintain fractures and luxations reduced. It is not now used.

REMORA ARATRI, *Ononis spinosa*.

REN, Kidney.

RENAL, *Renal'is*, from *Ren*, 'the kidney.' That which relates to the kidney.

1. The RENAL or EMULGENT ARTERIES are very large and short, and commonly two in number,—one to each kidney. They arise from the sides of the abdominal aorta, forming with it a right angle. The left is commonly a little more anterior and elevated than the right. After a short course, they arrive at the fissure of the kidney, where they divide, before entering it, into three or four very considerable branches.

2. The RENAL or EMULGENT VEINS. These are very large. Their roots follow the same course as the arteries in the substance of the kidney. In the fissure or pelvic portion of the kidney, they unite into a single trunk, which passes transversely inwards, and opens at the side of the vena cava descendens.

3. The RENAL or EMULGENT PLEXUSES.

These are two:—one on each side. They proceed from fasciculi of the solar and cœliac plexuses; from the outer part of the semilunar ganglion and the final expansion of the small splanchnic nerves. These plexuses begin by three or four ganglions, situate at the commencement of the renal artery; and they give off from their circumference many fine, straight filaments, which do not anastomose, and which enter the kidney with the divisions of the renal artery. These divisions they accompany.

RENCHUS, Snoring, Stertor.

RENES SUCCENTURIATI, Capsules, renal.

RENNET, *Runnet*. When the fourth stomach or *Abomasus*, (q. v.) of the calf is salted and dried, it possesses the property of coagulating milk, when a portion of it is soaked in water, and the infusion is added to the milk.

RENONCULE, *Ranunculus—r. Bulbeuse, Ranunculus bulbosus*.

RENOUÉE, Polygonum aviculare.

RENOUEUR, (F.) *Rebouteur, Rhabilleur. A bone-doctor:—a bone-setter*. One who makes a trade of reducing fractures and dislocations.

RENUENS, Rectus capitis internus minor.

RENUNCIATIO, *Rapport*.

RENVERSEMENT DE LA LANGUE, Paraglossa—*r. de la Matrice, Uterus*, inversion of the—*r. des Puppières, Ectropion—r. du Rectum, Proctocele—r. de la Vessie, Exocyste, Extrophia* of the bladder.

REPANDATIO, Lordosis.

REPELLENTS, *Repellen'tia, Repercution'tia, Apocrus'tica*, (F.) *Répercussifs*. Medicines which, when applied to a tumefied part, cause the fluids, that render it tumid, to recede, as it were, from it. Astringents, cold water, ice, &c. are repellents.

RÉPERCUSSIONS, Repellents.

REPERCUSSIO, *Contra-fissura*.

REPERCUSSION, *Anae'lasis*. Disappearance of a tumour or cutaneous eruption, in consequence of the application of a repellent. The action of a repellent remedy. The French writers use the term *délitescence* for the sudden disappearance of a tumour, inflammation, eruptive disease, or purulent collection, without the disease occurring in any other part of the body: in this respect *délitescence* differs from *metastasis: Delitescence* of an inflammation or 'sudden disappearance,' is distinguished by certain French pathologists from *Resolution*, (q. v.) *Repercussion* also means *Ballotement*, (q. v.)

REPERCUTIONIA, Repellents.

REPLETIO, Fulness, Plethora.

REPLI LONGITUDINAL DE LA MÉNINGE, Falx cerebri.

REPOSITIO, Reduction, Taxis.

REPOUSSOIR, Punch—*r. d'Arêts, Probrang*.

REPRODUCTION, *Regenera'tio*. The function, by which living bodies produce bodies similar to themselves. See Generation. As a general remark, it will be found true, that the larger animals are uniparous; and the smaller, which are more exposed to destruction, multiparous. The mammalia being of the same natural class as man, it may be useful to compare them in this respect.

COMPARATIVE TABLE OF REPRODUCTION IN THE CLASS MAMMALIA.

| <i>Species.</i>                             | Age capable of en-<br>gendering. | Duration of gesta-<br>tion. | Number of young at<br>each birth.       | Period of cessation<br>of the functions. |
|---|----------------------------------|-----------------------------|---|--|
| <i>Primates.</i>                            |                                  |                             |   |  |
| Man, - - -                                  | 14 years                         | 9 months                    | 1 to 3                                  | At a somewhat ad-<br>vanced age.         |
| Monkeys (large,) - -                        | 3 years                          | 7 months                    | Do. }                                   |  |
| Do. (long-tailed,) -                        | 2 years                          | 6 months                    | Do. }                                   |  |
| <i>Carnivora.</i>                           |                                  |                             |   |  |
| Bear, - - -                                 | 2 years                          | 112 days                    | 1 to 4                                  | 25 to 30 years.                          |
| Badger, - - -                               | - - -                            | - - -                       | 3 to 4                                  | 20 to 25 years.                          |
| Hedgehog, - - -                             | 1 year                           | 1 month and 10 days         | 3 to 5                                  | Produces during life.                    |
| Ferret, - - -                               | 11 months                        | Do.                         | 5 to 9 twice a year                     |  |
| Otter, - - -                                | - - -                            | 3 months                    | 3 to 4                                  | 8 to 10 years.                           |
| Pole-cat, }<br>Marten, }<br>Weasel, and }   | before 1 year                    | 56 days                     | 3 to 6                                  |  |
| Ermine, }<br>Didelphus, }<br>Opossum, and } | - - -                            | - - -                       | 4 to 6                                  |  |
| Philander, }<br>Lion, - - -                 | 2 years                          | 3 to 4 months               | 3 to 4                                  |  |
| Tiger, }<br>Leopard, }                      | Do.                              | 3 months                    | 4 to 5                                  |  |

REPULSORIUM, Punch.

REPURGA'TIO, *Anacathar'sis*. According to Castelli—purgation by transpiration or by expectoration. Medicines producing this effect are called *Repurgantia*.

RES CONTRA'NATURAM, (F.) *Choses contre nature*, are those things which tend to destroy man;—as disease, and every thing connected with it.

RES CULINARIA, Culinary art.—r. *Medica*, *Medicina*.

RES NATURA'LES, (F.) *Choses naturelles*. Those things, which, by their union, were conceived to constitute the nature of man; such as the elements, temperaments, humours, spirits, &c.

RES NON NATURA'LES, (F.) *Choses non-naturelles*. Those things which, anciently, formed the matter of hygiene. See *Non-Naturals*.

RES VENEREA, Coition—r. *Vestiaría*, *Vestitus*.

RÉSEAU, Rete—r. *Admirable*, Rete mirabile—r. *Merveilleux*, Rete mirabile.

RESECTION, *Resectio*, from *reseda're*, 'to cut off.' A name, given, especially by the French surgeons, to operations, in which the carious extremities of long bones, or the unconsolidated extremities of fractured bones, forming irregular joints, are removed with the saw.

RESECTION. See *Amputation*.

RESERVOIR DE LA BILE, Gall-bladder—r. *du Chyle*, *Receptaculum chyli*—r. *des Larmes*, *Lachrymal sac*—r. of *Pequet*, *Cistern*, *lumbur*—r. *de Pequet*, *Receptaculum chyli*.

RESIMUS, *Camus*.

RESIN, *Resi'na*, *Rheti'ne*, ρητινη. A vegetable product, commonly dry and concrete, more or less brittle, inodorous or slightly odorous, insipid, or of an acrid, warm taste; of a smooth, glassy fracture, heavier than water, inflammable, insoluble in water, soluble in alcohol, ether, and yolk of egg, and negatively electrifiable by friction. Many resins are used in medicine: the greater part are purgative and irritating. Some act like acrid poisons.

RESIN, CAYENNE, Caoutchouc—r. of the *Spruce fir*, see *Pinus abies*.

RESINA ABIETIS, see *Pinus abies*—r. *Abietis*, see *Pinus picca*—r. *Abietis humida*, see *Pinus abies*—r. *Abietis sicca*, see *Pinus abies*—r. *Alba*, see *Pinus sylvestris*—r. *Alba humida*, see *Pinus abies*—r. *Copal*, *Copal*—r. *Elastica*, *Caoutchouc*—r. *Flava*, see *Pinus sylvestris*—r. *Fluida Canadensis*, see *Pinus balsamea*—r. *Juniperi*, *Sandarac*—r. *Laricis*, see *Pinus larix*—r. *Lentiscina*, see *Pistacia lentiscus*—r. *Liquida pini balsamea*, see *Pinus balsamea*—r. *Liquida pini laricis*, see *Pinus larix*—r. *Nigra*, *Colophonia*—r. *Pini*, see *Pinus sylvestris*—r. *Pini empyreumatica liquida*, see *Pinus sylvestris*—r. *Pini abietis sponte concreta*, see *Pinus abies*—r. *Strobilina*, see *Pinus balsamea*, and *Pinus mughos*—r. *Terebinthi*, see *Pistacia terebinthus*.

RESINA'TUM, *Rhetino'ton*, ρητινωτον. An epithet for wine impregnated with resin, and used by the ancients as a stomachic.

RESINE DE GOMART, see *Bursera gumifera*—r. *de Lierre*, see *Hedera helix*.

RESINOCE'RAM, *Rhétinoc'ron*, ρητινωτηρον. A mixture of resin and wax.—Galen.

RESOLUTIO MEMBRORUM, Paralysis.

RESOLU'TION, *Resolutio*, *Discuss'io*, from *resol'vere*, 'to loosen.' One of the terminations of inflammation, in which the inflamed part returns gradually, and without suppuration, to the healthy condition.

RESOLUTION DES MEMBRES, Paralysis.

RESOLVENTIA, *Discutients*.

RES'ONANCE, from *re*, 'again,' and *sono*, 'I sound.' 'A return of sound.' A thrilling of the voice more loud than natural, or its existence in a part where it is not heard in health; as detected by auscultation. A thickened and hardened state of the lung, caused either by a mass of crude tubercles, or by inflammation, produces this phenomenon, by rendering the lung a better conductor of the murmur of the voice in the bronchi. Hence the origin of the term *Bronchophony*, from βρογχος, 'bronchus,' and φωνη, 'the voice.' (F.) *Vox bronchique*.

RESONITUS, *Contra-fissura*.

RESORPTIO, *Absorption*.

RESORP'TION, *Resorptio*, from *resorb'ere*, 'to absorb again.' Absorption of a fluid, which has been previously deposited in a part by the exhalants:—as of pus, blood, serum, &c.

RESPIRABLE, *Respirabilis*. Any gas is so called, which can be breathed without positive danger.

RESPIRAMEN, *Respiration*.

RESPIRAMENTUM, *Respiration*.

RESPIRA'TION, *Anap'noë*, from *respi'ro*, 'I take breath.' *Anapne'usis*, *Pne'usis*, *Spira'tio*, *Respira'men*, *Respiramentum*, *Respira'tus*, *Respir'itus*, *Spir'itus*. A function, proper to animals, the object of which is, to place the materials of the blood—the mixture of the venous blood with lymph and chyle—in contact with atmospheric air, in order that it may acquire the vivifying qualities that belong to arterial blood.

The organs for executing this function, are,—in the mammalia, birds, and reptiles,—the *lungs*. In man, the respiration consists of mechanical and chymical phenomena. The mechanical are *Inspiration* (q. v.) and *Expiration*, (q. v.)

The evident chymical phenomena consist in the formation of a certain quantity of carbonic acid, in the absorption of a part of the oxygen of the air, and in the disengagement of a quantity of water in the state of vapour.

In the healthy condition, the respiration is easy, gentle, regular, and without noise. In man, the respirations are, generally, about 35 per minute in the first year of life; 25 during the second; 20 at puberty; and 18 in the adult age.

RESPIRATION OF THE CELLS, *Murmur respiratory*—r. *Metallic*, *Tintement métallique*—r. *Proof*, *Docimasia pulmonum*—r. *Soufflante*, *Murmur respiratory*.

RESPIRATOR, same etymon. Various instruments have been devised for the purpose of tempering the air before it reaches the lungs in winter. One of the best is that of Jeffrey, which is made of several layers of a fine wire tissue.

RESPIRATORY. An epithet applied to the murmur heard by auscultation in a healthy adult, during inspiration and expiration. It

marks the entrance of the air into the cells, and its passage out of them. See Murmur.

RESPIRATORY TRACT, *Tractus respiratorius*; the middle column of the spinal marrow, described by Sir Charles Bell as that whence the respiratory nerves originate. See Nerves.

RESPIRATUS, Respiration.

RESPIRITUS, Respiration.

RESTA BOVIS, *Ononis spinosa*.

RESTAURATIO. *Refectio, Analepsis, Anatrepsis, Anacomidē, Analepsis, Anactēsis, Apocatastasis*. Restoration of strength after disease or great fatigue.

REST-HARROW, *Ononis spinosa*.

RESTIFORMIS PROCESSUS, Coracoid.

RESTITUTIO, Reduction.—r. Organica, Morio-plastica—r. Partium dperditarum, Morio-plastica.

RESUSCITATION, *Resuscitatio*, from *resuscitare*, 'to stir up answ.' *Revivification*. The restoration of persons, apparently dead, to life. See Asphyxia and Suffocation.

RETCHING, Vomiturition.

RETE, Plexus—r. Malpighii, Corpus mucosum.

RETE, *Reticulum*; a net; *Dictyon*, (F.) *Réseau*. A name given to the interlacing and decussation of blood-vessels, lymphatics, fibres, and nerves, when they form a kind of network. RETE has, also, been applied to the *epiploon*.—Castelli.

RETE MIRABILE, (F.) *Rcseau admirable, R. merveilleux*. A name given to the ramifications and anastomoses of the internal carotid and vertebral arteries, at the base of the brain.

The RETE MIRABILE vel RETE VASCULOSUM MALPIGHII, is the plexus formed on the cells of the lungs by the minute ramifications of the pulmonary artery.

RETE MUCOSUM, Corpus mucosum.

RETE VASCULOSUM TESTIS. An irregular plexus or network, formed by the communication of the *Vasa recta* at the upper and back part of the testicle.

These *Vasa recta* are sent out at the back part of the testicle, from the convoluted seminal tubes.

The *Rete Vasculosum Testis* sends out from twelve to eighteen straight tubes, called *Vasa efferentia*, which convey the semen from the testes to the epididymis.

RETENTION, *Retentio*, from *retinere*, 'to hold back.' Accumulation of a solid or liquid substance, in canals intended for its excretion, or in a reservoir, intended to contain it only for a short period.

RETENTION OF URINE; *Paruria Retentio'nis vesicalis, Ischuria vesicalis, Retentio Urinæ*. (F.) *Rétention d'urine*. A disease in which the urine, accumulated in the bladder, cannot be evacuated; or, at least, cannot be passed without extreme difficulty. In the former case, the retention is said to be *complete*; in the latter, *incomplete*. Many writers have distinguished three degrees of this affection, to which they have given the names *Dysury*, (q. v.) *Strangury*, (q. v.) and *Ischury*, (q. v.) Retention of urine may depend upon loss of contractility, paralysis of the bladder, &c., or on some obstacle to the passing of the urine, as in cases of pressure of the womb on the bladder, of tu-

mours in its vicinity, foreign bodies in its cavity, inflammation of the urethra, swelling of the prostate, stricture, &c. The pain is extremely violent, and the bladder may be found distended above the pubis.

The treatment consists in introducing the catheter, or puncturing the bladder, and in combating the cause, which has produced the retention, by particular means adapted to each case.

RETICULAR, *Retiform, Reticularis, Amphiblestroides, Dytoides, Rctiformis*. That which resembles a net. An epithet applied to many structures in the body.

RETICULAR SUBSTANCE, Cellular tissue.

RETICULUM: diminutive of *Rete*, 'a net.' The *Bonnet* or *Honeycomb-bag*—the second stomach of the ruminant animal. Sec, also, Epiploon and Rete.

RETIFORM, Reticular.

RETINA, from *rete*, 'a net:' *Tunica retina* seu *reticularis* seu *retiformis* seu *in'tima oculi, Involutum rcti comparatum, Verricula'ris membrana, Amphiblestroides*. A soft, pulpy, grayish, semi-transparent, very thin membrane; extending from the optic nerve to the crystalline, embracing the vitreous humour, and lining the choroid; without, however, adhering to either of those parts. It is constituted, according to most anatomists, by the expansion of the optic nerve. The retina appears formed of two laminae; so joined together, that it is almost impossible to separate them. The one—the innermost—is medullary, pulpy; the other—the outer—is stronger, and fibro-vascular.

The retina is the essential organ of vision; on it the images of objects are impressed. Both it and the optic nerve are devoid of general sensibility. They may be punctured or lacerated without pain being experienced. The nerve of general sensibility, distributed to the eye, is the fifth pair.

RETINACULA MORGAGNII. See *Fræna* of the valve of Bauhin.

RETINACULUM. A surgical instrument, formerly used in the operation of castration; and in that of hernia, to prevent the intestines from falling into the scrotum.—Scultet.

RETINACULUM, *Bride*.

RETORTY, *Retorta, Botta, Cornu, Cornuta, Cornes'ta, Cornum'sa*. (F.) *Cornue*, from *retor'quo*, 'I bend back.' A vessel, commonly of glass or earthenware, employed in distillation. It may be *plain*, or have a *tubulure* for admitting substances, whilst the distillation is going on. In the latter case, it is said to be "tubulated."

RETRACTION, *Retractio*. State of a part, when drawn towards the centre of the body or backwards;—as retraction of the testicles. Sometimes it is used synonymously with *shortening* or *drawing up*; as in *retraction of the thigh*.

RETRACTION DE LA MATRICE, *Retroversio uteri*.

RETRACTOR ANGULI ORIS, *Buccinator*.

RETRAHENS AURIS, *Posterior Auris, Tricaudalis, Triceps Auris, Retrahens Auriculæ, R. Auriculam, Secundus proprium Auriculæ, Bicaudalis, Deprimens Auriculæ, Proprius Auris externa, Mastoïdo-conchivien, Mastoïdo-ori-*

*culaire*, (Ch.) (F.) *Auriculaire postérieur*. It consists of one or more small fasciculi of fleshy, thin, somewhat irregular fibres, situate behind the ear. These are attached to the mastoid process, and pass horizontally forwards, to terminate at the convexity formed by the concha of the ear. If this muscle had any use, it would carry the ear backwards.

**RÉTRECISSEMENT**, Stricture.

**RETROCES'SION**, *Retrocessio*. The act of going back. A disappearance or metastasis of a tumour, eruption, &c., from the outer part of the body to the inner.

**RETROFLEXIO UTERI**, *Retroversio uteri*.

**RÉTROPULSION DE LA MATRICE**, *Retroversio uteri*.

**RETROVER'SIO UTERI**, *Retroversion of the Uterus*, *Ædopto'sis Uteri retrover'sa*, *Retroflex'io Uteri*, (F.) *Rétroversion*, *Rétraction*, *Obliquité* ou *Rétropulsion de la Matrice*. A change in the position of the uterus, so that the fundus of the organ is turned towards the concavity of the sacrum, whilst the neck is directed towards the symphysis pubis. This displacement is commonly attended with constipation, tenesmus, and retention of urine. Its usual period of occurrence is between the third and fourth months of pregnancy; before the uterus has escaped above the superior aperture of the pelvis. In the treatment, the catheter must be regularly used, twice a day, until the uterus, by its growth, rises, above the pelvis. The catheter should be small, flat, and curved considerably more than common, in consequence of the distorted course of the urethra. The bowels must be kept open; and absolute rest, in a recumbent posture, be enjoined. Should it be impracticable to draw off the urine, attempts must be made to replace the uterus. The woman being on her hands and knees, the fore and middle fingers of the accoucheur's left hand are to be passed up the rectum to the fundus uteri; which they must elevate, whilst the cervix uteri is carefully depressed by two fingers of the right hand in the vagina. Should the fingers, employed to elevate the fundus, not be long enough to effect this object, a piece of whalebone may be substituted, having a small piece of sponge attached to one extremity as a pad.

**RÉTROVERSION DE LA MATRICE**, *Retroversio uteri*.

**REUNIO**, Synthesis.

**RÉVASSERIES**. See *Sonnum*.

**RÈVE**, *Sonnum*.

**RÉVEIL**. See *Sleep*—*r. en Sursaut*, see *Sleep*.

**REVELLENT**, Derivative.

**REVERY**, *Aphelxia*.

**REVIVIFICATION**, *Resuscitation*.

**REVUL'SION**, *Revul'sio*, *Antis'pasis*. The act of turning the principle of a disease from the organ in which it seems to have taken its seat. Rubefacients, vesicatories, bleeding in the foot, &c., are often used for this purpose.

**REVULSION**, Derivation.

**REVULSIVE**, Derivative.

**REYNOLD'S SPECIFIC**. See *Vinum colchici*.

**RHA**, *Rheum*.

**RHABBARUM**, *Rheum*—*r. Album*, *Con-*

*volvulus mechoacan*—*r. Antiquorum*, *Rheum rhaponticum*—*r. Dioscoridis*, *Rheum rhaponticum*—*r. Monachorum*, *Rumex patientia*—*r. Nigrum*, *Convolvulus jalapa*—*r. Pauperum*, *Thalietron*—*r. Sibericum*, *Rheum*—*r. Tartaricum*, *Rheum*—*r. Turcicum*, *Rheum*.

**RHABILLEUR**, *Renoueur*.

**RHACHILÆI**, *Rhachitæ*.

**RHACHIALGITIS**, *Spinal irritation*.

**RHACHIPARALYSIS**, *Paraplegia*.

**RHACHIPHYPMA**, *Rachiphyma*.

**RHACHIRRHEUMA**, *Lumbago*.

**RHACHIS**, *Vertebral column*.

**RHACHISAGRA**, *Rachisagra*.

**RHACHITÆ**, *Rhachitæ*, *Rachitæ* or *Rachitæ'i*. The muscles of the spine.

**RHACHITIS**, *Rachitis*.

**RHACHOSIS**, *Rachosis*.

**RHAG'ADES**, *ρυγάδες*, *Rhagadia*, *Scissuræ*, *Fissuræ*, *Rimæ*. Ruptures, chaps, or narrow and long ulcers, which form near the origin of mucous membranes; especially around the anus, and which are generally owing to the syphilitic virus.

**RHAGADES**. See *Fissure*.

**RHAGÉ** or **RAGÉ**, *ραγή*, a suffix denoting violent rupture or discharge, as in *Hemorrhage*, *Menorrhagia*, &c.

**RHAGÉ**, *Fissure*.

**RHAGOIDES**, *Uvea*.

**RHAMNUS**, *Rhamnus catharticus*, *Spina cervisina*, *Rhamnus solutivus*, *Spina infectoria*, *Cervispina*, *Buckthorn*, *Purging buckthorn*, (F.) *Nerprun purgatif*. Family, *Rhamnoidæ*. *Scr. Syst.* *Pentandria Monogynia*. The berries—*Rhamni Baccæ*—have a faint and disagreeable odour; and bitterish, nauseous taste. They are cathartic, and are apt to excite griping, which must be obviated by the use of diluents.

**RHAMNUS ALATER'NUS**, *Common alaternus*, (F.) *Alaternæ*. The leaves have been used as detergents and astringents, in the form of gargle especially.

**RHAMNUS FRAN'GULA**. The *Black Alder*, *Frangula Alnus*, *Alnus Nigra*, (F.) *Aune noir*, *Bourdaïne*, *Bourgène*. All the parts of this tree, as well as of the common alder, are astringent and bitter. The bark is most so. The inner, yellow bark of the trunk or root acts as a cathartic. It has also been employed as an anthelmintic.

**RHAMNUS ZIZIPHUS**. See *Jujube*.

**RHANTER**, *Canthus*, (greater.)

**RHAPHANEDON**, *Raphanodon*.

**RHAPHANIA**, *Raphania*.

**RHAPHE**, *Raphe*, *Suture*.

**RHAPONTICUM**, *Rheum rhaponticum*—*r. Vulgare*, *Centaurea centaurium*.

**RHAPONTIQUE**, *Rheum rhaponticum*.

**RHATANIA**, *Krameria ratanhia*.

**RHEGMA**, *Laceration*—*r. Ligamentare*, *Apospasma*.

**RHENCHUS**, *Rattle*.

**RHENXIS**, *Rattle*.

**RHEON**, *Rheum*.

**RHETINE**, *Resin*.

**RHETINOCERON**, *Resinatum*.

**RHETINOTON**, *Resinatum*

RHEUM, *R. palmatum*, *R. compactum*, *R. undulatum*, *Rhabarbarum*, *Rheon*, *Rha*, *Rheum*, *Lap'athum orientale*, *L. Chinen'se*, *Rhabarbarum ve'rum*, *R. Tartaricum*, *R. Sibericum*, *R. Turcicum*, *Rhubarb*, (F.) *Rhabarba*. Family, Polygonæ. *Sex. Syst.* Enneandria Trigynia. The root is the part used in medicine. Its odour is aromatic, peculiar, and rather nauseous; taste, somewhat aromatic, subacid, bitterish, and astringent. It colours the saliva and urine yellow. It is easily pulverized, and forms a powder of a bright buff yellow colour. Both water and spirit extract its virtues. The Chinese and Tartary rhubarbs are those generally used.

Rhubarb root is purgative, stomachic and astringent. (?) It is chiefly used for the properties first mentioned; externally, the powder is sometimes sprinkled over ulcers, to assist their granulation.

Dose, ℞j to ℥ss of the powder. In a smaller dose, it is stomachic.

RHEUM RHAPON'TICUM, *Rhapon'tic Rhubarb*; *Rhapon'ticum*, *Rhabarbarum Dioscoridis*, *R. Antiquorum*, (F.) *Rhapon'tique*, *Rhapon'tic*. The root of this seems to have been the rhubarb of the ancients. It is more astringent than that of the rheum palmatum, and less purgative; for the latter purpose, two or three drachms being required for a dose.

RHEUM COMPACTUM, Rheum—r. Palmatum, Rheum—r. Undulatum, Rheum.

RHEUMA, Catarrh, Rheumatism—r. Epidemicum, Catarrh, epidemic—r. Pectoris, Catarrh—r. Uteri, Leucorrhœa.

RHEUMATALGIA, Rheumatism, chronic.

RHEUMATISM, from *ῥευμα*, 'a defluxion, catarrh.' *Dolor Rheumaticus et arthriticus*, (Hoffmann), *Rheumato'sis*, *Myosotis*, *Rheuma*, *Myodynia*, (F.) *Rheumatism*. A kind of shifting phlegmasia, sometimes seated in the muscles, sometimes in the parts surrounding the joints; and at others, within them. Hence the name *Muscular*, *Articular*, and *Synovial*, which have been applied to it. The disease may be *acute*, or *chronic*.

ACUTE RHEUMATISM, *Arthro'sia acuta*, *Rheumatismus*, *Rh. inflammatorius seu hypersthenicus*, *Rheumatic Fe'cer*, *Rheumatopyra*, *Febris rheumatica inflammatoria*, *Sy'nocha rheumatica*, *Myositis*, *Myitis*, *Cauma rheumatismus*, *Arthritidis rheumatismus*, *Arthro-rheumatismus*, *Synovitis rheumatoidalis*, *Hæmo-artthritis*, (F.) *Rheumatisme aigu*, *Fièvre rhumatismale*, usually comes on with the ordinary symptoms of fever; soon after which or simultaneously, or even before the appearance of febrile signs, excruciating pains are felt in different parts of the body, particularly in the larger joints, which are more or less red and swollen; the pain shifting from one to the other, at times with greater rapidity. The disease rarely terminates in less than six weeks, during the greater part of which period the febrile symptoms remain severe; and what is peculiar to the disease, the skin may be covered daily with a profuse perspiration, although it feels extremely hot, and the pulse appears in no way modified by it. It is one of the essential symptoms of the affection, and consequently affords no relief. The only danger to be apprehended from acute rheumatism, notwith-

standing the apparent severity of the symptoms, is the translation or extension of the disease to some internal part, especially to the heart. This tendency must always be borne in mind. *Acute* rheumatism seldom terminates in the *chronic*; they who are liable to the former, are rarely so to the latter, and conversely.

The disease will generally run its course, in spite of treatment. The usual antiphlogistic plan had better be pursued, during the first days of the disease. Blood-letting may be employed, if the vigour of the patient and of the disease seems to require it; but, although the blood is generally buffy, bleeding does not usually seem to afford much relief.

The bowels must be kept open; effervescent draughts be administered, and opium be given in full doses to allay pain. This is, generally, all that is necessary during the first week; after which, advantage will usually be obtained from the exhibition of the sulphate of quinine with sulphuric acid. It does not augment the excitement; and will be found proper in almost all cases. Rheumatic inflammation is very different from other varieties, and this may account for the anomaly. After a few weeks, the disease usually goes off, but leaves the patient very liable to a recurrence on slight exposures or errors of diet: at times, acute rheumatism of the joints puts on the appearance of gout, and seems to be a complication of the two affections. It is then called *Gouty* or *Arthritic rheumatism* or *Rheumatic gout*.

RHEUMATISM, ARTHRITIC, see *Rh. acute*—r. *Gouty*, see *Rh. acute*.

RHEUMATISM, CHRONIC, *Arthrosia chronica*, *Rheumatismus chronicus*, *R. vulgaris* seu *inveteratus* seu *habitualis* seu *frig'idus*, *Rheumatologia*, *Arthrodynia*, *Arthritis arthrodynia*, (F.) *Rheumatisme chronique*, is attended with pains in the hips, shoulders, knees, and other large joints. These are, sometimes, confined to one joint; at others, shift from one to another, without occasioning inflammation, or fever. In this manner, the complaint often continues for a great length of time, and then goes off. There is no danger attendant upon it; but the patient may become lame, and is always liable to painful recurrences.

Neither variety terminates in suppuration; but effusion of coagulable lymph is apt to occur, so as to occasion permanent thickening of the parts. The great preventive of chronic rheumatism, and one of the most valuable curative agents, is flannel, worn next the skin. The whole class of rubefacients may, also, be used with advantage. The warm bath, especially the natural warm bath, the temperature of which does not vary, is perhaps the most successful remedy of all.

RHEUMATISMUS CANCROSUS, *Neuralgia faciei*—r. *Dorsalis*, *Lumbago*—r. *Inflammatorius* seu *hypersthenicus*, *Rheumatismus acutus*—r. *Intestinatorum cum ulcere*, *Dysentery*—r. *Larvatus*, *Neuralgia faciei*—r. *Spurius nervosus*, *Neuralgia*—r. *Vulgaris* seu *inveteratus* seu *habitualis* seu *frigidus*, *Rheumatism*, chronic.

RHEUMATOPYRA, *Rheumatism*, acute.

RHEUMATOSES, *Rheumatism*.

RHEX'IS, *ῥηξις*, *Ruptur*. *Rupture* of a vessel. Spontaneous opening of an abscess.

**RHICNOSIS**, *ριχνωσις*, *Cutis corruga'tio*. Wrinkling of the skin from extenuation of the body; opposed to *ετρασις*, or distention from repletion.

**RHIGOS**, Rigor.

**RHIN**, Nāsus.

**RHINALG'IA**, from *ριρ*, 'the nose,' and *αλγος*, 'pain.' Pain in the nose.

**RHINANCHONE**, Snuffles.

**RHINANGIA**, Snuffles.

**RHINENCEPHALIA**, Cyclopia.

**RHINENCHYSIS**, *Rhinenchy'sia*, from *ριρ*, 'the nose,' and *εγχεω*, 'I pour in.' An infusion or injection, made into the nostrils, with a syringe called *Rhinenchy'tes*.

**RHINES**, Nares.

**RHINOCNES'MUS**, from *ριρ*, 'the nose,' and *κνισμος*, 'itching.' Itching of the nose.

**RHINOPHON'IA**, from *ριρ*, 'the nose,' and *φωνη*, 'the voice.' A nasal voice, called, also, *Dyspho'nia immodula'ta nasa'lis*, *Parapho'nia nasalis*, *Paraphonia res'onans*, *Na'sitas*. Speaking through the nose.

**RHINOPLASTIC**, from *ριρ*, 'the nose,' and *πλασσω*, 'I form.' An epithet applied to the operation for forming a new nose. The *Talia-cotian operation*, so called, because described by Tagliacozzi. It consists in bringing down a portion of flesh from the forehead, and causing it to adhere to the anterior part of the remains of the nose.

**RHINOPT'IA**, from *ριρ*, 'the nose,' and *οπτωμα*, 'I see.' The act of seeing by the nose. A deformity, caused by a disease of the greater angle of the eye or of the root of the nose making an opening in the parietes of the nasal fossæ, through which the luminous rays can arrive at the eye.

**RHINORRHAGIA**, Epistaxis.

**RHIPTASMOS**, Jactation.

**RHIS**, Nasus.

**RHIZA**, Radix.

**RHIZAGRA**, Punch.

**RHIZOPH'AGUS**, from *ριζα*, 'a root,' and *φαγω*, 'I eat.' One who lives on roots.

**RHIZOTOMIST**. See Simples.

**RHIZOTOMUS**, Apothecary.

**RHOA**, *Punica granatum*.

**RHODELÆ'ON**. Oil of roses, or oil impregnated with roses.

**RHO'DIA**, *Rhodiola ro'sca*, *Rosca*, *Rosewort*, (F.) *Rhodiola*. *Sex. Syst.* Diœcia Octandria. The root, *Rose-root*, when dry, has a very pleasant smell, and is slightly astringent. It is not used.

**RHODIOLA ROSEA**, Rhodia.

**RHODIOLE**, Rhodia.

**RHODI'TES VINUM**. Wine in which roses have been macerated.

**RHODIUM LIGNUM**, *Rhodium* or *Rose-wood*. The wood or root of a tree, supposed to be the *Geni'sta Canarien'sis* of Linnæus. (F.) *Bois de rose*, *Bois de Chypre*. *Family*, Leguminosæ. *Sex. Syst.* Diadelphica Decandria.—The essential oil is a perfume, and possesses cordial and tonic virtues. Its smell is attractive to fish, rats, &c.

**RHODODAPHNIS**, Nerium oleander.

**RHODODEN'DRON CHRYSAN'THEMUM**, *R. Chrysan'thum*. The *Olean'der*, *Rose Bay*, *Yellow rhododendron*, (F.) *Rosage*, *R. Chrysanthe*.

*Nat. Ord.* Ericææ. *Sex. Syst.* Decandria Monogynia. This plant has been recommended in rheumatism, gout, and syphilis. In an overdose, it produces acro-narcotic symptoms.

**RHODOMELI**, Mel rosæ.

**RHODON**, *Rosa centifolia*.

**RHODOSACCHARUM**, *Confectio rosæ gallicæ*.

**RHODOSTACTON**, Mel rosæ.

**RHŒA**, *Punica granatum*.

**RHŒAS**, Papaver rhæas.

**RHŒUM**, Rheum.

**RHOGMOS**, Rattle.

**RHOI'TES**, *ροιτης*, a wine impregnated with the pomegranate; from *ροεις*, *Pomegranates*.—Dioscorides. A confection, made by boiling the juice of the pomegranate in honey.—Paulus of Ægina.

**RHOMBOIDEUS**, from *ρομβος*, 'a rhombus,' whose sides are equal, with two obtuse and two acute angles. *Rhomboideus major* and *minor*, *Rhomboï'des*, *Cervici-dorso-scapulaire*. A muscle, situate at the posterior inferior part of the neck, and at the posterior part of the back. It has a rhomboidal shape, and is attached, by its inner edge, to the posterior cervical ligament, and to the spinous processes of the last cervical vertebra, and of the first four or five dorsal. By its outer edge, it is attached to the spinal or posterior edge of the scapula. It is divided into two fasciculi, constituting the *Rhomboideus major* and *minor*, the latter being situate higher than the other. This muscle draws the scapula backwards and upwards, and impresses upon it a rotary motion, which brings its inferior angle nearer to the spine; and, consequently, depresses the anterior angle and the shoulder.

**RHOMBOS**, *ρομβος*. A bandage, mentioned by Galen, so called on account of its rhomboidal shape.

**RHONCHUS**, Rattle, Snoring, Stertor—r. *Crepitans*, *Râle crépissant*—r. *Mucous*, *Râle crépissant*—r. *Sibilans*, *Râle crépissant*—r. *Sonorus*, *Râle sonore*.

**RHOPALISMUS**, Priapismus.

**RHOPALOSIS**, Plica, Pupil, Uvea.

**RHUBARB**, Rheum—r. *Monk's*, *Rumex Alpinus*, *Rumex patientia*—r. *Poor man's*, *Thalictron*—r. *Rhapontic*, *Rheum rhaponticum*—r. *Wild*, *Convolvulus panduratus*.

**RHUBARBE FAUSSE**, *Thalictron*—r. *des Pauvres*, *Thalictron*.

**RHU**, *Ruta*.

**RHUMATISME**, Rheumatism—r. *Aigu*, Rheumatism, acute—r. *Chronique*, Rheumatism, chronic.

**RHUME DE CERVEAU**, Coryza—r. *de Poitrine*, Catarrh.

**RHUS CORIARIA**, *Sumach*, *Rhus Glabrum*, *Adu'ron*, *Elm-leaved Sumach*. (F.) *Sumac des Corroyeurs*. *Family*, Terebinthacææ. *Sex. Syst.* Pentandria Monogynia. This is the only species of the genus *rhus* that is innocent. Both the leaves and berries have been used as astringents and tonics.

**RHUS GLABRUM**, *Rh. coriaria*.

**RHUS RADICANS**, *Rhus vernix*, *Poison vine*, (*America*.) This plant is poisonous, (see Poisons, Table of,) and is extremely acrid, when applied to the skin, producing erysipelas and

vesications, and has been used, like the next variety, in paralysis and other nervous affections.

RHUS SYLVESTRIS, Myrica gale.

RHUS TOXICODENDRON, *Toxicodendron*, *Poison oak* (America.) (F.) *Sumac vénéneux*. This plant has been used in paralytic affections and cutaneous eruptions. It is poisonous, like the last. Dose, gr. ss to gr. iv.

RHUS VERNIX, Rh. radicans.

RHYPOS, Sordes.

RHYPTICA, Detergents.

RHYPTICUS, Abstergent.

RHYSIS, Flux.

RHYTHM, *ῥυθμός*, *Measure*. The order or proportion, which reigns between the different parts of a whole. Applied, in medicine, to the pulsations of the heart—to the pulse—to express the due proportion between one pulsation and those following it.

RHYTIDOSIS, Rutidosis.

RIB, Costa.

RIBS, NECK OF THE, Collum costarum.

RIBES NIGRUM, *Cassia*. The *Black currant*. (F.) *Groseille noir*. *Sex. Syst.* Pentandria Monogynia. The berries have been recommended in sore throat, as diuretics. The leaves have been advised for the same purpose. They are chiefly used as preserves.

RIBES RUBRUM, *Grossularia non spinosa*, the *red currant*. (F.) *Groseille rouge*; of which the *white* is only a variety. It is cultivated, and affords an agreeable fruit. It possesses the qualities of the subacid fruits in general, and makes an excellent preserve.

RICE, *Oryza*—r. Disease, Cholera.

RICHARDSONIA. See *Ipecacuanha*.

RICHWEED, *Actæa racemosa*.

RICIN, *Ricinus communis*.

RICINOIDES, *Jatropha curcas*.

RICINUS COMMUNIS. The *Castor-oil plant*, *Cataputia major*, *Ricinus vulgaris*, *Palma Christi*, *Faba purgatrix*, *Cerua* or *Kerua*, *Cici*. (F.) *Ricin*. *Fève purgatif*. Family, Euphorbiacæ. *Sex. Syst.* Monœcia Monadelphia. Castor-oil seeds, whence the oil is obtained, are inodorous; taste acrid and slightly sweetish. One or two seeds will act as a cathartic; but the oil *Oleum ricini*, (F.) *Huile de Ricin*, is, alone, used. It is obtained by bruising the castor seeds, previously decorticated, and then expressing the oil without the application of heat. Recently drawn castor oil, *Oleum de kerrâ*, *O. kerrâ nunn*, *Alker'va*, *Oleum Ric'ini*, *O. Cicinum*, *O. Palmæ liquidum*, is inodorous and nearly insipid. It is cathartic, operating speedily, and may be used in all cases, where powerfully stimulating purgatives would be injurious. Dose,  $\zeta\text{j}$  to  $\zeta\text{iss}$ .

Hufeland recommends that a drop of the castor oil, (q. v.) shall be added to an ounce of the Oil of Poppy, and that the mixture shall be called *Oleum Ricini officinale*.

A variety of *Ricinus* at Cape Verd is employed by the inhabitants to increase the secretion of milk. It is applied in the form of poultice, made with the green leaves, to the mammae, or of a strong decoction, with which the mammae and the external parts of generation are washed.

RICINUS MAJOR, *Jatropha curcas*—r. Minor, *Jatropha manihot*.

RICKETS, Rachitis.

RIDE, Wrinkle.

RIDING, (of Bones.) *Ossium superpositio*. (F.) *Chevauchement*. Displacement of the fragments of a bone, chiefly produced by the contraction of muscles, which occasions shortening of the limb; the fractured extremities *riding* over each other, instead of being end to end.

RIGIDITY, *Rigiditas*. Great stiffness of fibre, or want of suppleness. The stiffness of the dead body, (F.) *Roideur cadavérique*, is one of the most certain signs of the cessation of life.

RIGOR, *Rid'gos*, *Algor*, *Coldness*, *Cheim'ia*. (F.) *Frisson*. Sensation of cold, with involuntary shivering of the whole body:—a symptom of fever. A slighter degree, and at times full rigor, is occasionally termed a *chill*, *frigus tenuis*, *perfrigeratio*.

RIGOR NERVOSUS, Tetanus.

RIMA. A fissure, a cleft; as *Rima* or *Rimula Glottidis*, 'the opening of the glottis,' (q. v.) *Rima vulvæ*, 'the opening of the vulva,' (q. v.)

RIMÆ, Rhagades.

RINÆUS, Compressor naris.

RINCHOS, Rostrum.

RING, Sax. *hring*, *ring*, Germ. *Ring*, *Cricos*. (F.) *Anneau*. A name given to natural, circular, or roundish apertures, with muscular or aponeurotic parietes, which serve for the passage of some vessel or canal;—as the *umbilical ring*, *inguinal ring*, &c.

RINGWORM, *Herpes circinatus*—r. of the Scalp, *Porrigo scutulata*—r. Ulcerative, *Herpes exedens*.

RIRE OU RIS, *Risus*—r. *Canin*, Canine laugh—r. *Moqueur*, Canine laugh—r. *Sardonien*, *Risus sardonius*—r. *Sardonique*, Canine laugh.

RISAGON, Cassumuniar.

RISIGALLUM, Orpiment.

RISING OF THE LIGHTS, *Cynanche trachealis*.

RISING or ELEVATION OF THE PULSE. *Pulsus elevatio*. The pulse is said to rise, when it becomes more full and frequent, as occurs in the exacerbation of acute diseases.

RISO'RIOUS NOVUS. Santorini gives this name to a portion of the platysma myoides, which passes from the cheek towards the commissure of the lips.

RISUS. *Gelos*, *Laughing*. (F.) *Rire ou Ris*. An involuntary movement of the muscles of the face, and of the lips in particular, accompanied with a sonorous and interrupted respiration, and commonly indicating mirth and satisfaction.

RISUS CANINUS, Canine laugh.

RISUS SARDONICUS, *R. de Sardo'niâ*, *R. spas'ticus*, *Sardoniasis*, *Sardiasis*, *Tortura Oris*, *Distorsio Oris*, *Gelusmus*. (F.) *Ris Sardonien*, *R. Sardonique*. A convulsive affection of the lips and cheeks, which precedes and often accompanies general tetanus. It is said to have been so called from similar symptoms having been induced by a kind of ranunculus that grows in Sardinia.

RISUS SARDONICUS, Canine laugh—r. *Spasticus*, *R. sardonius*.

RIVER WEED, *Conferva rivalis*.  
 RIZ, Oryza.  
 ROAN TREE, *Sorbus acuparia*.  
 ROB, *Roob*, *Robub*, *Rohob*, (F.) *Extrait des fruits*. This word, of Arabic extraction, means the juice of any fruit thickened to the consistency of honey by evaporation, before it has fermented.  
 The juice of the grape, boiled to this consistency, was called *Sapa*; and, when not quite so thick, *Defrutum*.  
 ROB CYNOSBATUS, *Confectio rosæ caninæ*—r. ex *Moris*, *Diamotion*—r. *Nucum*, *Diacaryon*.  
 ROBINIA AMA'RA, *Family*, *Leguminosæ*. *Sex. Syst.* *Diadelphia Dcandria*. The roots of the *Robinia amara* of Cochinchina are bitter, and have been recommended, especially in that country, in diarrhœa and dyspepsia.  
 ROBINIA PSEUDO-ACACIA, *Locust Treec*, native of America. The flowers are said to possess antispasmodic properties.  
 ROBORANS, Corroborant.  
 ROBORANTIA, Tonics.  
 ROBUB, Rob.  
 ROCCO'LLA, *Lichen roccella*.  
 ROCHE'S EMBROCATION FOR THE HOOPING-COUGH. An empirical preparation, composed of *ol. oliv.* ʒxvj, *ol. succin.* ʒviiij, *ol. caryoph.* q. s. to scent it strongly.  
 ROCHER. See *Temporal bone*.  
 ROCHETTA ALEXANDRINA, Soda.  
 ROCKET, GARDEN, *Brassica eruca*—r. *Roman*, *Brassica eruca*.  
 ROCOU, *Terra Oleana*.  
 RODA'TIO, from *rodere*, 'to eat away.' Diminution of the hair in length.  
 ROGMĒ, ρωγμη, the same as ριγμα, 'a rupture.' A straight fracture of the skull.  
 ROGNE, Psora.  
 ROHENA, BARK, *Swietenia*.  
 ROHOB, Rob.  
 ROLLER, Bandage, Fascia.  
 ROMARIN, *Rosmarinus*—r. *Sauvage*, *Ledum sylvestre*.  
 ROMPEURE, *Hernia*.  
 RONCE, *Rubus idæus*—r. *Bleue*, *Rubus cæsius*—r. *de Montagne*, *Rubus chamæmorus*—r. *Noire*, *Rubus fruticosus*.  
 RONCHUS, Snoring, Stertor.  
 ROND, Round—r. *Grand*, *Teres major*—r. *Petit*, *Teres minor*.  
 RONFLEMENT, Snoring—r. *de Diable*, *Bruit de Diable*.  
 ROOB, Rob.  
 ROOF OF THE MOUTH, Palate.  
 ROOT, Radix—r. of Scarcity, *Beta hybrida*—r. *Yellow*, *Zanthoriza apiifolia*.  
 ROQUETTE, *Brassica eruca*, Soda.  
 RORELLA, *Drosera rotundifolia*.  
 RORIFERUS, Lymphatic.  
 ROS CALABRINUS, *Fraxinus ornus*—r. *Solis*, *Drosera rotundifolia*.  
 ROSA, *R. centifolia*.  
 ROSA ALBA, *The White Rose*, (F.) *Rosier blanc*, *Family*, *Rosacæ*. *Sex. Syst.* *Icosandria Polygynia*. The flowers of this species possess similar but inferior qualities to the damask.  
 ROSA CANINA; *R. Sylvestris*, *Cynor'rhodon*,

*Canira'bus*, *Caninus Sentis*, *Cynocytisus*, *Cynospas'tum*, *Cynos'batos*, the *Dog Rose*, *Wild Brier*, *Hip Tree*, (F.) *Rose du chien*, *Eglantier de chien*, *E. sauvage*. The fruit of this variety, called *Heps* or *Hips*, (q. v.) has a sourish taste, and is formed into a conserve. See *Confectio Cynosbati*. It is seldom employed, except to give form to more active remedies; as in pills, boluses, linctuses, &c.

ROSA CENTIFOLIA; the *Damask Rose*, *Rosa Damasc'na*, *R. Pallida*, (F.) *Rosier à cent feuilles*, *Rhodon*, *Rosa*. The petals of this rose have an extremely fragrant odour, and subacidulous taste. They are laxative; but are scarcely used for any purposes except for the distillation of rose-water, and the formation of a syrup.

ROSA DAMASCENA, *R. centifolia*.

ROSA GAL'LICA; the *Red Rose*, *Rosa rubra*, (F.) *Rosier de Provins*. The petals of this variety are astringent; and are used in infusion, conserve, &c.

ROSA PALLIDA, *R. centifolia*—r. *Rubra*, *R. Gallica*—r. *Saltans*, *Essera*—r. *Sylvestris*, *R. canina*.

ROSAGE, *Rhododendron chrysanthemum*.

ROSAGO, *Nerium oleander*.

ROSALIA, *Scarlatina*.

ROSE, *Erysipelas*—r. *Christmas*, *Helleborus niger*—r. *Damask*, *Rosa centifolia*—r. *Dog*, *Rosa canina*—r. *Dog*, *Conserve* or *confection* of, *Confectio rosæ caninæ*—r. *du chien*, *Rosa canina*—r. *Rash*, *Roseola*—r. *Red*, *Rosa Gallica*—r. *White*, *Rosa alba*.

ROSES, MILK OF. A cosmetic wash, formed, according to one method, of *subcarbonate of potass*, gr. vj; *oil of almonds*, ʒj; *essence of bergamot*, ʒij; *aquæ rosæ*, ʒiij; *orange flower water*, ʒij. Mix.

ROSEA, *Rhodia*.

ROSE DROP, *Gutta rosea*.

ROSEMARY, *Rosmarinus*—r. *Marsh*, *Statice limonium*.

ROSENHEIM, MINERAL WATERS OF. R. is 34 miles S. E. from Munich in Bavaria. The waters contain sulphuretted hydrogen, carbonic acid, carbonate of lime, muriates of lime and magnesia, carbonate of soda, and oxide of iron. They are used as tonics.

ROSE'OLA, *Exanth'esis Roseola*, *Rose Rash*. An efflorescence in blushing patches, gradually deepening to a rose-colour, mostly circular or oval; often alternately fading and reviving; sometimes, with a colourless nucleus; and chiefly on the cheeks, neck, or arms. It is frequently found, as a symptom, in dentition, dyspepsia, &c., and is of no consequence. See *Rubeola* and *Scarlatina*.

ROSOLE, *Rubeola*.

ROSEWOOD, *Rhodium lignum*.

ROSEWORT, *Rhodia*.

ROSIER BLANC, *Rosa alba*—r. à *Cent feuilles*, *R. centifolia*—r. *de Provins*, *Rosa Gallica*.

ROSIN, BLACK, *Colophonia*—r. *Brown*, *Colophonia*—r. *White*, see *Pinus sylvestris*—r. *Yellow*, see *Pinus sylvestris*.

ROSIO STOMACHI, *Cardialgia*.

ROSMARINUS, *R. officinalis*, *Alchachil*, *R. horten'sis*, *Libano'tis corona'ria*, *Dendrolib'anus*. *Rosemary*, (F.) *Romarin*. *Family*, *Labiatae*.

*Scz. Syst.* Diandria Monogynia. The leaves and tops of this plant have a fragrant, grateful smell; and an aromatic, warm, bitterish taste, which is dependent upon an essential oil, combined with camphor.

Rosemary has been recommended in nervous headaches, in the form of infusion. It is now rarely used, except for its odour. The flower is called *Anthos, ανθος*. Its oil—*Oleum Rosmarini*—is official. From two to six or ten drops are given in nervous complaints rubbed up with sugar.

ROSMARINUS SYLVESTRIS, *Ledum sylvestre*.

ROSSALIA, *Scarlatina*.

ROSSOLIO. See Spirit.

ROSTRUM, *Rinchos, Ramphos*, 'a beak,' (F.) *Bec.* (q. v.) A name given to several old forceps, on account of their resemblance to the beaks of different birds. The principal were the *Rostrum corvi'num, anati'num, psittaci'num, vulturinum, cygneum vel olori'num, gruinum, lacerti'num* &c.

ROSTRUM PORCINUM, *Aeromion*.

ROT, Eructation.

ROTACISM, *Rotacismus*, (F.) *Grasseyement*. A vicious pronunciation of the Greek  $\kappa$ , *Rau*, common in the northern parts of England; especially near Newcastle.

ROTACISMUS, *Grasseyement*.

ROTATOR, from *rota*, 'a wheel.' A name given to several muscles, which turn the parts to which they are attached upon their axis;—such as, the oblique muscles of the eye, the pronators and supinators, &c.

ROTATOR, *Trochanter*.

ROTULA, *Patella, Trochiscos*.

ROTULE, *Patella*.

ROTUNDUS, *Round*.

ROUCOU, *Terra Orleana*.

ROUEN, MINERAL WATERS OF. This water, known under the name, *Eau des fontaines de la Marguerite*, is cold, and contains carbonate of iron, carbonic acid, carbonate and muriate of lime, &c. It is tonic.

ROUGE, *Coleothar*.

ROUGE D'ANGLETERRE, *Colcothar*.

ROUGEOLE, *Rubeola*.

ROUILLÉ, *Rubiginous*.

ROUND, *Teres, Rotundus*, (F.) *Rond*. Anatomists have given this name to many organs, whose fibres are collected in round fasciuli. See *Teres*.

FORAMEN ROTUNDUM. A foramen of the sphenoid bone, a little behind the *foramen lacrarum superius*, which gives passage to the second branch of the 5th pair of nerves, called *superior maxillary*.

The ROUND LIGAMENTS OF THE UTERUS, *Ligamenta rotunda Uteri, Cordons sus-pubiens* (Ch.) *Cordons vasculaires*, (F.) *Ligaments ronds de l'utérus*. Two cords, which arise from the lateral and superior parts of the uterus, whence they proceed towards the abdominal rings, which they pass through, and terminate by vanishing in the cellular tissue of the groins, *mons veneris*, and *labia majora*. These cords are whitish, flattened, and narrower in the middle than at the extremities. Their fibres, which are longitudinal, are apparently albugineous.

RUBBER, INDIAN, *Caoutchouc*.

RUBE'DO. A redness. A diffused, but not

spotted, redness on any part of the skin; like that which arises from blushing.

RUBEFA'CIENT, *Erethisma, Rubef'diciens*, from *rubens*, 'red,' and *fa'cio*, 'I make.' (F.) *Rubéfiant*. That which produces redness. A medicine, which causes redness of the skin. The action is called *Rubefaction*.

RUBEFIANT, *Rubefacient*.

RUBEOLA, *Rubeola vulga'ris, Roseola, Exanth'esis Rubcola, Vetera'na, Bluc'cia, Bovil'ra*, from *rub'eo*, 'I become red:'—*Morbil'li; M. variolosi, Scarlatina pustulosa, S. Milia'ris*, the *Measles; Febris morbillosa, Typhus Morbillosus, Phanicis'mus*, (F.) *Rougeole, Fievre morbilleuse*. One of the major exanthemata; affecting individuals but once, and produced by specific contagion. The rash usually appears on the 4th, but sometimes on the 3d, 5th, or 6th day, of a febrile disorder; and, after a continuance of four days, gradually declines with the fever. The disease generally commences from 10 to 14 days after the contagion has been received.

The eruption first shows itself in distinct, red, and nearly circular spots; somewhat less than the ordinary areolæ of flea-bites. As these increase in number, they coalesce, forming small patches of an irregular figure, but approaching nearest to that of semicircles or crescents. These patches are intermixed with single, circular dots, and with interstices of the natural colour of the skin. On the face they are slightly raised, so as to give the sensation of inequality of surface to the finger passing over the cuticle. The disappearance of the eruption is followed by desquamation of the cuticle.

The measles is not dangerous of itself; but it is apt to induce pneumonia in winter, and dysentery in summer, which are at times, very fatal. These are apt to come on at the time of, or soon after the disappearance of the eruption. When they supervene, they must be treated as idiopathic affections.

Measles demands a general antiphlogistic treatment.

Willan has pointed out a kind of *Rubeola spuria*, which he calls *Rubeola sine Catarrho*. In this, the rash runs its regular course, with little fever or catarrhal affection; affording no certain security against the common or regular disease.

Willan gives the name, *Rubeola Nigra* or *Black Measles*, to an unusual appearance of the measles about the 7th or 8th day, when the rash becomes suddenly livid, with a mixture of yellow. It is devoid of inconvenience or danger; and is removed in a week or ten days by the mineral acids.

RUB'IA, *R. Tinctorum, Erythrod'anum, Rubia major, Radix rubra, Dyer's Madder, Madder*, (F.) *Garance. Family, Rubiaceæ. Sex. Syst. Tetrandria Monogynia*. The roots of this plant have a bitterish, somewhat austere, taste; and a slight, not agreeable, smell. They were formerly considered deobstruent, detergent, and diuretic.

RUBIG'INOUS, *Rubiginosus*, (F.) *Rouillé*. Having the colour of rust. An epithet given to the sputa in certain cases of Pneumonia.

RUBINUS VERUS, *Anthrax*.

RUBR'ICA FABRIL'IS. A red, heavy,

earthy matter, formerly employed for making drying plasters. *Hard Ruddle, Red Chalk.*

**RUBRICA SINOPICA.** A heavy, compact, reddish earth: formerly used in diarrhœa.

**RUBRINE,** Hæmatine.

**RUBUS ARCTICUS.** The *Shrubby Strawberry, Bacca Norlandica.* Family, Rosacœ. *Scz. Syst. Icosandria Polygynia.* The fruit is recommended by Linnæus, as possessing antiseptic, refrigerant, and antiscorbutic qualities.

**RUBUS CÆSIUS;** the *Dewberry plant,* (F.) *Ronce bleue.* The fruit resembles the blackberry in appearance and properties. The bark of the root of the *R. Trivialis* or *American Dewberry* is astringent.

**RUBUS CHAMÆMORUS;** the *Cloudberry Tree, Chamæmorus, Cloudberry, Knotberry,* (F.) *Ronce de Montagne.* The ripe fruit is sometimes prepared like a jam, and used in fevers, &c., to allay thirst. It has been much extolled as an antiscorbutic.

**RUBUS FRUTICOSUS;** the *Common Bramble,* which affords *Blackberries,* (F.) *Ronce noire.* The berries are eaten as a summer fruit, of which they form a poor variety. The bark of the root of the *Rubus villosus* or *American Blackberry* is astringent, and has been used in the last stages of dysentery, and in cholera infantum.

**RUBUS IDÆUS;** *Batos, βατος;* the *Raspberry,* (F.) *Françoise, Ronce.* The fruit of the best varieties is extremely agreeable; and is much used. It was, formerly, called *Batinon moron.*

**RUBUS TRIVIALIS,** see *Rubus cæsius*—*r. Villosus,* see *Rubus fruticosus.*

**RUCTATIO,** Eructation.

**RUCTUS,** Eructation—*r. Acidus, Oxyregmia.*

**RUDDLE, HARD,** *Rubrica fabrilis.*

**RUE, Ruta**—*r. Common, Ruta*—*r. de Chèvre, Galega officinalis*—*r. Goat's, Galega officinalis*—*r. Goat's, Virginia, Galega Virginiana*—*r. des Murailles, Asplenium ruta muraria*—*r. des Îrès, Thalictrum*—*r. Sauvage, Ruta.*

**RUM,** Eructation.

**RUGA,** Wrinkle.

**RUGINE,** Raspatorium.

**RUGISSEMENT,** Rugitus.

**RUGITUS,** *Brychthmos, βουχθησμος,* (F.) *Rugissement.* A Latin word, which ordinarily expresses the roaring of the lion: and which is used, by some medical writers, to designate a particular species of borborygmus compared to it.

**RUM, Tafia, Molas'ses Spirit.** A spirit, distilled from sugar, or molasses. See *Spirit.*

**RUMEN,** Hypogastrium.

**RUMEX ACETO'SA.** The *Common Sorrel, Ox'alis Acetosa, Acetosa vulgaris, A. pratensis, Anax'uris, A. arven'sis, Sorrel, Sour dock, Acetosa nostras,* (F.) *Oseille.* Family, Polygonœ. *Scz. Syst. Hexandria Trigynia.* The leaves are sour, and are used in cookery, and also as a refrigerant.

**RUMEX ACUTUS;** *Sharp-pointed Wild dock, Oxylap'athum, Lup'athum, Rumex, Lapathos,* (F.) *Patience sauvage.* The decoction of the root has been long used in cutaneous affections. It is, sometimes, employed for the cure of the itch.

**RUMEX ALPINUS.** The systematic name of the plant, that affords the *Monk's Rhubarb,* (F.) *Rhabarbe des Moines.* See *Rumex Patientia.*

**RUMEX AQUATICUS,** *R. hydrolapathum.*

**RUMEX HYDROLAPATHIUM,** *Water-Dock, Hydrolapathum, Rumex aquat'icus, Herba Britannica, Lapathum aquaticum,* (F.) *Pardelle, Patience d'eau.* The leaves of this plant are subacid, and said to be laxative. The root has been used as a tonic, astringent, and antiscorbutic. It has also been employed externally, in some cutaneous affections.

**RUMEX PATIEN'TIA;**—*Garden Patience, Rhabarbarum monacho'rum, Hippolap'athum, Patientia, Monk's Rhubarb,* (F.) *Patience.* This root, which is supposed to possess the virtues of rhubarb, but in an inferior degree, according to Linnæus, is obtained from the *Rumex patientia;* according to Murray, from the *Rumex Alpinus.*

**RUMEX SANGUINEUS.** The root of the *bloody dock* has an austere and astringent taste; and has been employed in dysentery. It is called, also, *Lapathum sanguineum,* (F.) *Oseille ou Patience rouge, Sangdragon.*

**RUMEX SCUTATUS,** *French Sorrel, Acetosa rotundifolia, A. Rom'na, A. Rotundifolia hortensis, Roman or Garden Sorrel, Green Sauce,* (F.) *Oseille boucher, Oseille rouge, Petite O.* Virtues the same as those of the common sorrel.

**RUMINATION,** *Ruminatio, Merycis'mus.* A function peculiar to ruminating animals, by which they chew the food they have swallowed a second time. An analogous phenomenon is sometimes seen in man.

**RUMP, Croupion**—*r. Bone, Coccyx.*

**RUNNET,** Rennet.

**RUNNING, Cursus,** (F.) *Course.* A succession of leaps, executed with rapidity, to transport the body quickly from one place to another.

**RUNUNCULA,** Raspatorium.

**RUPIA, Ulcus atonicum.** An eruption of large flatish blebs, which contain a fluid, at first serous, afterwards puriform, and often bloody, which rapidly concretes into crusts, at the base of which are ulcers of variable depths.

It requires the use of tonics internally, and of stimulating ointments externally.

**RUPTORIUM,** *Cauterium*—*r. Commune, Potassa fusa.*

**RUPTURA,** *Erexis, Hernia, Laceration*—*r. Uteri, Uterus, rupture of the.*

**RUPTURE, Hernia**—*r. of the Groin, Bubonocœle*—*r. de la Nutrice, Uterus, rupture of the*—*r. Wort, Herniaria glabra.*

**RUSCUS, R. aculeatus, Bruscus, Oxymyrhinæ, Oxymyrsinæ, Myrtocan'tha, Catan'gelos, Myacan'tha, Scop'a regia, Wild Myrtle, Centromyrinæ, Butcher's Broom, (F.) *Petit houx, Fragon* Family, Smilacœ. *Scz. Syst. Diœcia Monadelphia.* The root has been recommended as an aperient and diuretic.**

**RUSCUS ACULEATUS,** *Ruscus.*

**RUSCUS HYPOGLOS'SUM;** *Utrid'ria, Hypoglossum, Bisl'n'gua, Bonifa'cia, Laurus Alexandri'na angustifolia,* (F.) *Laurier Alexandrin.* Formerly used against relaxed uvula.

**RUSH, SWEET,** *Juncus odoratus.*

**RUSMA.** See *Orpiment.*

**RUSPINI'STINCTURE FOR THE TEETH.**

An empirical preparation, composed of *Florentine orris* ℥viij, *cloves,* ℥j, *rectified spirit* ℔ij, *ambergris* ℥j.

**RUTA,** *Ruta graveolens, R. hortensis, Com-*

*mon Rue, Peganiun, Bes'sa, (F.) Rue, Rhuc. Rue sawage. Family, Rutaceæ. Sez. Syst. Decandria Monogynia.* The plant has a strong, ungrateful odour, and bitter and pungent taste. It is acrid, so as to blister the skin. Its properties are reputed to be tonic, stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to ʒij.

The *Oleum Ruta* or distilled Oil of Rue is antispasmodic; and, externally, rubefacient. Dose, gr. ij to vj.

RUTA CAPRARIA, Galega officinalis—r. Muraria, Asplenium ruta muraria.

RUTA'CEUM, from *Ruta*, 'rue.' Vinegar of rue.

RUTIDO'SIS, *Rytido'sis, Rhytido'sis.* A de-

struction or atrophy of the eye. Corrugation and subsidence of the cornea.

RUYSCHIA'NA TU'NICA, (F.) *Lame ou Membrane Ruyschienne.* According to Ruysch and the greater part of his disciples, the choroid coat of the eye is formed of two laminae. His son gave to the inner the name *Tunica Ruyschiana* or *Membr'na Ruyschii'na* seu *Ruyschii.*

The TUNICA CELLULO'SA RUYSCHIA'NA is the cellular substance, under the peritoneal covering of the stomach. It is not numbered among the coats of that organ.

RYE, Secale—r. Horned, Ergot—r. Spurred, Ergot.

RYTIDOSIS, Rutidosis.

RYTIS, Wrinkle.

## S

S. S. A. &c. See Abbreviations.

SABADILLA, Veratrum sabadilla.

SABADILLIN. See Veratrina.

SABBATIA ANGULARIS, Chironia angularis.

SABINA, Juniperus sabina.

SABIYE, Juniperus sabina.

SAP'ULOUS, *Sabulo'sas, Arenosus, Psammodes.* The sandy deposit, often seen in urine.

SABURRA, *Sordes.* This word signifies, by derivation, coarse sand. In its common acceptation, it means *foulness of the stomach*, as it is sometimes called; or vitiated matters supposed to be retained and accumulated in the stomach—the result of imperfect digestion—and which have been sometimes considered as a morbid product of the mucous secretion of that organ or of the biliary secretion; at others, as a residuum from alimentary substances, badly digested. The *Saburral state, Collu'vies gastrica, Cradita'tes ventriculi, (F.) Embarras gastrique*, is an accumulation of saburrae in the stomach, which the Humourists considered to be the cause of a number of diseases.

SABURRA VERMINOSA, Helminthiasis.

SABURRATIO, Arenatio.

SAC, *Saccus, Seclusorium.*

HERNIAL SAC, *Succus herniosus, (F.) Sac herniaire.* An envelope or pouch, formed by the serous membrane of the cavity, whence a viscus has escaped. We distinguish, in a hernial sac, its *orifice* or the opening by which it communicates with the great cavity lined by the serous membrane: its *cervix* or *neck, (F.) Collet*, the narrow portion on the outside of the orifice, where strangulation sometimes occurs; the *body, (F.) Corps*, which is the round prominent part; and the *fundus* or *bottom*,—the part opposite to the orifice.

SAC HERNAIRE, Hernial sac.

SAC'CHARUM. From the Arabic, or rather Sanscrit, *Sa-kar*, 'white earth;' *Suchar, Suchar, Sutter, Zuchar, Zu'caro, As'sakur, Tigala, Zacc'harum, Zocar, Zu'charum, Zachra, Sugar, (F.) Sucre.* The product of the juice of the *Saccharum officinarum* vel *officinale* of Linnaeus, (*Cal'amus Indicus, Cal'amus Saccharinus, Sugar Cane, (F.) Canne à Sucre, Canna-*

*melle; the Arun'do saccharifera* of Sloane. *Family, Gramineæ. Sez. Syst. Triandria Digynia,)* and also of the beet, maple, &c.

*True sugars* are those with which alcoholic fermentation *may be effected*, by the addition of yeast and water. They are:—

| Species. | Varieties.   |
|----------|--|
| 1. . . . | { Hard sugar of the cane, maple, beet, chestnut, &c.                     |
| 2. . . . | { Liquid sugar, sugar of malt, of the sweet potato, molasses, honey, &c. |
| 3. . . . | { Hard sugar of the grape, ripe fruits, starch, diabetes, &c.            |
| 4. . . . | Hard sugar of the mushroom.  |

*Imperfect sugars* are those in which alcoholic fermentation *cannot be effected* by means of yeast and water.

| Species. | Varieties.                                  |
|----------|---|
| 1. . . . | Manna.                                      |
| 2. . . . | Sugar of milk.                              |
| 3. . . . | Sugar of jelly or glue ( <i>gelatine</i> .) |
| 4. . . . | Liquorice.                                  |
| 5. . . . | Picromel.                                   |

Sugar is prepared from the expressed juice of the sugar-cane, boiled with the addition of quicklime or common vegetable alkali. It is used, in pharmacy, for the preparation of syrups, conserves, lozenges, &c. It is very nutritious, and is employed as an aliment, and as a demulcent and antiseptic. Dissolved in small quantities in water, as in tea, it is apt to ferment with dyspeptics; an evil which does not always occur when the same substance is taken more largely.

*Muscovado, raw or brown or moist sugar*, is the *Saccharum non purificatum, S. rubrum, Mel canne, or coarse sugar.*

*Saccharum acerinum, S. Canaden'se, Maple Sugar*, is often used as a demulcent.

*Saccharum album, S. purificatum, White Sugar, Refined Sugar, Sal Indus*, is the *Loaf Sugar*. *Double-refined Sugar* has been called *Tabarzet*.

*Saccharum Cui'didum, Sugar Candy, (F.) Sucre Candi, Alphenic, Nabot*, is the crystallized sugar of the cane.

*Barley Sugar, Penides, Saccharum hordedum*, is a variety of sugar candy.

SACCHARUM OFFICINARUM, see Saccharum—*s. Saturni, Plumbi superacetas.*

SACCULUS, 'a little sac.' This name has been given to two sacs formed by the membranous vestibule, which open into each other, and contain the *otolithes*, and *otocories*; one of these is termed the *sacculus vestibuli*, the other *sacculus*. See Semicircular canals.

SACCULI ADIPOSI, Fatty vesicles—*s. Laryngæi, Ventricles of the larynx.*

SACCULI MEDICINALES are bags containing medicinal substances.

SACCULUS, Marsupium—*s. Cephalicus, Cucupha—s. Chylifer seu rorifer, Receptaculum chyli—s. Cordis, Pericardium—s. Ellipticus, see Semicircular canals—s. Sphericus, see Semicircular canals—s. Vestibuli, see Semicircular canals.*

SACCUS, Sac—*s. Coli, Cæcum—s. Herniosus, Hernial sac—s. Lachrymalis, Lachrymal sac—s. Lacrunalis, Lachrymal sac—s. Lacteus, Receptaculum chyli—s. Venarum cavarum, Sinus dexter cordis—s. Venarum pulmonalium, Sinus pulmonalis.*

SACER, Sacral—*s. Ignis, Herpes zoster—s. Musculus, Transversalis dorsi.*

SACK. A wine used by our ancestors. *Vin sec.* Probably *Sherry*.

SACRA FISTULA, Vertebral column.

SACRAL, *ſacer*, (F.) *Sacré*. That which belongs or relates to the sacrum. A name given to several parts.

The SACRAL NERVES, (F.) *Nerfs sacrés*, are generally six in number. They arise from the termination of the spinal marrow. The first, united with the great cord which descends from the lumbar plexus, concurs with the three others in the formation of the sacral or sciatic plexus. The 3d and 4th, with branches of the great sympathetic, form the hypogastric plexus. The fifth and 6th are distributed to the ischio-coccygeus muscle, and to the sphincter and levator ani.

The SACRAL OR SCIATIC PLEXUS,—the *sacral portion of the crural plexus* of Chaussier, constituted as just mentioned, is situate in front of the pyramidalis. It gives off, backwards, two branches, called the *puhic*, (F.) *honteux*, and the *lesser sciatic*. It terminates in the great sciatic nerve.

The SACRAL ARTERIES are distinguished into, I. The *anterior or middle sacral, Median Artery of the Sacrum* of Chaussier, which arises from the posterior part of the abdominal aorta, in front of the 4th lumbar vertebra. It descends, in a serpentine manner, upon the sacro-vertebral articulation, and on the anterior surface of the sacrum. It furnishes many lateral branches, which unite with the lateral sacral arteries, and enter the anterior sacral foramina, to be distributed to the membranes of the marrow, &c. 2. The *lateral sacral arteries*, which are two in number; one on each side. They arise from the hypogastric, from the ilio-lumbar, or from the gluteal; and descend before the anterior sacral foramina, anastomosing in an arched manner, towards the coccyx, with the middle sacral.

They give off *external and posterior branches*, which enter the sacral foramina; and *internal*

branches, which are distributed to the pyramidalis, sacrum, &c.

The SACRAL GROOVES, (F.) *Gouttières sacrées*. Two longitudinal excavations, but slightly marked, at the posterior surface of the sacrum; which appear to terminate the vertebral grooves or gutters.

SACRÉ, Sacral.

SACRO-COCCYGEUS. Relating to the sacrum and coccyx.

The SACRO-COCCYGEAL ARTICULATION is that of the lower extremity of the sacrum with the superior *facet* of the coccyx. It is closed by two ligaments;—an *anterior* and a *posterior sacro-coccygeal*.

SACRO-COSTALIS, Sacro-lumbalis—*s. Fé-moral, Gluteus major.*

SACRO-COXAL'GIA, from *sacrum*, 'the os sacrum,' *coxa*, 'the hip,' and *algos*, 'pain,' a hybrid term. Some authors have called thus, a rheumatic affection of the sacro-iliac symphysis.

SACRO-ILIAC, *Sacro-Iliacus*. That which relates to the sacrum and ilium.

The SACRO-ILIAC OR ILIO-SACRAL ARTICULATION, SYMPHYSIS OR SYNCHONDROSIS, is the union of two surfaces;—two inclined planes, broader above than below; one, formed by the sacrum;—the other, by the ilium. Both surfaces are incrustated by an articular cartilage. The bands, which strengthen them, are the two *sacro-sciatic ligaments*, the *sacro-spinal*, a *sacro-iliac* ligament, and some irregular fibres. The *sacro-iliac* ligament is a very thick assemblage of short, dense, irregular fibres, occupying the space which the sacrum and ilium leave between them, behind their articular surface. Some authors have termed some irregular fibres, situate in front of the sacro-iliac articulation, *anterior sacro-iliac ligaments*, in opposition to the preceding fasciæ, which they call *posterior sacro-iliac*.

SACRO-ISCHIATICUS, Sacro-sciatic—*s. Lom-baire, Sacro-lumbalis.*

SACRO-LUMBAR, *Sacro-lumbalis, Sacro-lom-baire*. That which belongs to the sacrum and loins.

The SACRO-LUMBALIS, or *Sacro-lumbalis Muscle, Lombo-costo-trachélien, Sacro-costa'lis, Dorso-trachélien portion of the Sacro-spinal* of Chaussier, (F.) *Sacro-lombaire*, is seated at the posterior part of the trunk: is thick and triangular below; flat and thin in the remainder, and terminates in a point at its upper extremity. It is attached to the posterior surface of the sacrum; to the corresponding portion of the crista ili; to the extremities of the transverse processes of the lumbar vertebræ; to the angles of the 11 inferior ribs; to the tuberosity of the first, and the posterior tubercle of the transverse processes of the last five cervical vertebræ.

The sacro-lumbalis straightens the vertebral column when bent forwards, and maintains it straight. By means of its insertion into the ribs, it can elevate or depress these bones, according as it contracts from above to below, or from below to above. It acts, consequently, sometimes as an inspiratory, at others, as an expiratory, muscle.

From six or eight of the lower ribs arises an

equal number of fleshy portions, which terminate at the inner side of this muscle, and are called *Mus'culi Accessorii* vel *Additamentum ad Sacro-lumbal'em*, (F.) *Accessoires du Sacro-lombaire*.

From the upper part of the sacro-lumbalis, a fleshy slip, called *Cervicalis descendens*, *Cervicalis descendens Diemerbroeckii*, *Transversalis collateralis colli*, *Accessorius ad Sacro-lumbal'em*, *Transversaire grêle*, runs up, to be fixed to the transverse processes of the 4th, 5th, and 6th cervical vertebrae, by three distinct tendons. These last parts, though separated by some anatomists, belong to the sacro-lumbalis.

**SACRO-SCIATIC**, *Sacro-ischiaticus*. That which belongs to the sacrum and ischium.

The **SACRO-SCIATIC LIGAMENTS** are two ligaments, which assist in securing the sacro-iliac articulation. The *great* or *posterior sacro-sciatic ligament* extends from the crista ilii and the sides of the sacrum and coccyx to the tuberosity of the ischium. The *less* or *anterior sacro-sciatic ligament* arises from the same point, and terminates in the spine of the ischium.

**SACRO-SPINAL**, Dorso-trachelian portion of the sacro-lumbalis.

**SACRO-SPINALIS**. That which relates to the sacrum and spine. Under this name, Chaussier describes the sacro-lumbalis, longissimus dorsi, transversalis, transverso-spinalis, and inter-transversalis. It divides it into three portions.

**SACRO-TROCHANTERIEN**, Pyramidalis.

**SACRO-VERTEBRAL**, *Sacro-vertebralis*. That which relates to the sacrum and the vertebrae.

The **SACRO-VERTEBRAL ARTICULATION** is the junction of the last vertebra of the loins with the sacrum. The angle which these two bones form at the anterior part has been called the *Promontory of the Sacrum*, or the *Sacro-vertebral Angle*.

The **SACRO-VERTEBRAL LIGAMENT** is a strong ligament, which passes from the anterior part of each of the transverse processes of the last lumbar vertebra to be attached to the base of the sacrum. Its use is to maintain the articulation of those two bones in situ.

**SACRUM**, *Os sacrum*, *Os basilarè*, *Os Alagas*, *Albagiazi*, *Hieron ostein*, from *sacer*, 'sacred,' because it contributes to protect the genital organs, which were considered sacred, or because it was offered in sacrifice. The bone, which forms the posterior part of the pelvis, and is a continuation of the vertebral column. The sacrum is symmetrical and triangular; situate at the posterior part of the pelvis, and concave anteriorly. It has,—

1. A *pelvic* or *anterior surface*, which corresponds to the pelvic cavity, and has four transverse furrows, that point out the parts where the primitive portions of the bone were separated from each other. On each side there are four foramina, called *anterior sacral*; these are oblique, and decrease in size, from above downwards. Through these pass the anterior branches of the sacral nerves.

2. A *spinal* or *posterior surface*, which is convex, rough, and covered by muscles. Upon the median line are four horizontal, tubercular, eminences, forming a continuation of the spi-

nous processes of the vertebrae; and, below, a triangular notch, where the *sacral canal* terminates. On each side of this surface are four foramina, called *posterior sacral*, which are smaller than the anterior, and give passage to the posterior branches of the sacral nerves.

3. The *vertebral surface* or *base*. Its greatest extent is transversely. It is articulated with the last lumbar vertebra. On it we see the orifice of the *sacral canal*, of a triangular shape, which decreases in width from above downwards; terminates the vertebral canal; is lined by a prolongation of the cerebral membranes; contains the fasciculi of the sacral nerves; communicates, externally, by the sacral foramina; and terminates at the triangular notch on the posterior surface of the bone. At the sides of the upper orifice of the sacral canal are two articular processes, which receive the articular processes of the last lumbar vertebra. The projection, formed by the union of the base of the sacrum with the last lumbar vertebra, is called the *Promontory* or *greater Angle of the Sacrum*, or *Sacro-vertebral Angle*.

4. A *coccygeal face* or *apex*, (F.) *Face coccygienne* ou *Sommet*, which is very narrow, and is articulated with the coccyx.

5. *Two lateral margins*, which have, above, a broad oblique surface, articulated with the ilium.

The sacrum is developed by 30 to 36 points of ossification.

**SADDLE**, TURKISH, *Sella Turcica*.

**SAFFLOWER**, *Carthamus tinctorius*.

**SAFFRON**, *Crocus*—s. *Bastard*, *Carthamus tinctorius*—s. *Flower*, *Carthamus tinctorius*—s. *Meadow*, *Colchicum autumnale*.

**SAFRAN BÂTARD**, *Carthamus tinctorius*, *Colchicum autumnale*—s. *des Indes*, *Curcuma longa*—s. *de Mars apéritif*, *Ferri subcarbonas*—s. *de Mars astringent*, *Colcothar*—s. *des Près*, *Colchicum autumnale*—s. *Racine de*, *Curcuma longa*.

**SAFRANUM**, *Carthamus tinctorius*.

**SAFRE**, Smalt.

**SAGA**, *Sago*.

**SAGAPENUM**, *Sag'apin*, *Serap'non*. (F.) *Gomme sérapique*. A gum-resin, supposed to be obtained from the *Fer'ula Persica*. *Family*, Umbelliferae. *Sez. Syst.* Pentandria Digynia. Its odour is fetid and alliaceous; taste pungent, bitterish, nauseous. It is in small, agglutinated masses of a yellow colour; tenacious; breaking with a horny fracture. It is a reputed antispasmodic and emmenagogue. Dose, gr. x to ʒss.

**SAGAPIN**, *Sagapenum*.

**SAGE**, *Salvia*—s. *Indian*, *Eupatorium perfoliatum*—s. *Jerusalem*, *Pulmonaria*.

**SAGE-FEMME**, Midwife

**SAGESSE DES CHIRURGIENS**, *Sisymbrium Sophia*.

**SAGIMEN VITRI**, *Soda*, subcarbonate of,

**SAGITTAL**, *Sagitta'lis*, from *sagit'ta*, 'an arrow.'

The **SAGITTAL SUTURE**, *Obel'da sutu'ra*, *O. Raphe*, *S. Virga'ta*, *Sutura jug'd'lis*, *S. Rhabdoides*. The suture which unites the two parietal bones, and which extends, from before to behind, on the median line, from the coronal suture to the lambdoidal. It is so called, from *sagitta*, 'an arrow,' because it seems to meet

the coronal suture as an arrow meets the string of a bow.

The **SAGITTAL FURROW** or **GROOVE**, (F.) *Gouttière sagittale*, is a channel on the median line of the inner surface of the skull-cap. It is excavated in the os frontis, in the two parietal and occipital bones, and extends from the crista galli to the internal occipital protuberance. It lodges the longitudinal sinus, which has been called the *sagittal sinus*.

**SAGITTARIUM ALEXIPHARMACUM**, *Malac'ca Radix*, *Canna Indica*, *Arundo Indica*. A root, cultivated in the West Indies, and supposed to be a remedy for wounds by poisoned arrows.

**SAGO**, *Sagus*, *Saga*. A fecula, obtained from the pith of many kinds of palms growing in the Moluccas, Philippine Isles, &c., and which is brought to us in small grains. The same substance is, also, obtained from the West Indies, but it is inferior to that from the East.

By boiling in water or milk, sago becomes soft and transparent, and forms an agreeable and nutritious food in febrile, calculous, and other disorders. It is made palatable by sugar, lemon-juice, or wine, where the last is not contra-indicated.

**SAGO**, FRENCH, see *Solanum tuberosum*—s. Portland Island, see *Arum maculatum*.

**SAGUE PETIT**. See *Solanum tuberosum*.

**SAGU**, Sago.

**SAHARA**, Insomnia.

**S.AIGNÉE**, Blood-letting—s. *Spoliative*, *Spoliativa phlebotomia*.

**S.AIGNEMENT DU NEZ**, Epistaxis.

**SAILORS**, *Discases*, &c. of. Sailors, by nature of their occupation, are liable to many diseases. Several of these may, however, be warded off by proper attention to cleanliness and ventilation.

**SALV BOIS**, *Daphne gnidium*—s. *doux*, *Adeps præparata*.

**ST. CHARLES'S ROOT**, *Carlo sancto* (*Radix*.)

**ST. JOHN'S WORT**, *Hypericum perforatum*.

**SAINT JAMES'S WORT**, *Senecio Jacobææ*.

**SAINT MYON**, MINERAL WATERS OF. Some cold, acidulous waters at Saint Myon, near Riom, in the department of Puy-de Dôme. They contain free carbonic acid, subcarbonate and muriate of soda, and carbonate and sulphate of lime.

**SAIRE**, *Essera*.

**SAL**, Salt—s. *Absinthii*, *Potassæ subcarbonas*, see *Potash*—s. *Acetosellæ*, *Potassæ oxalate*—s. *Acetosus ammoniacalis*, *Liquor ammoniæ acetatis*—s. *Acidum benzoës*, *Benjamin*—s. *Albus*, *Soda*, *muriate of*—s. *Alkali*, *Soda*, *subcarbonate of*—s. *Alkalinus fixus fossilis*, *Soda*—s. *Amarum*, *Magnesiæ sulphas*—s. *Ammoniac*, *volatile*, *Ammoniac carbonas*—s. *Ammoniacum*, *Ammoniac murias*—s. *Ammoniacum martiale*, *Ferrum ammoniatum*—s. *Ammoniacum secretum Glauberi*, *Ammoniac sulphas*—s. *Ammoniacum tartareum*, *Ammoniac tartaras*—s. *Ammoniacum vegetabile*, *Liquor ammoniæ acetatis*—s. *Ammoniacum nitrosus*, *Ammoniac nitras*—s. *Ammoniac*, *Ammoniac murias*—s. *Anglicanum*, *Magnesiæ sulphas*—s. *Antiepilepticus of Weissman*.

**SALACITAS**, *Satyriasis*—s. *Vulvæ*, *Nymphomania*.

**SALAD**, CORN, *Valeriana dentata*.

**SALER'NUM**, SCHOOL OF. An ancient school of Medicine at Salerno in Italy. It was established by Charlemagne, in 802; and was the first Christian university at which Medicine was taught. It was much celebrated, especially in the 12th century. The work on Hygiène, "*De Conservandâ Valetudine*," which bears its name, has passed through several editions in various languages. It is supposed to have been written by John of Milan, in 1100, and is in Leonine verses.

**SALICARIA**, *Lythrum salicaria*.

**SALICINE**. See *Salix*.

**SALICORNIA ARABIA**, &c. See *Soda*.

**SALINE**, *Salinus*, *Salinarius*, *Salinarius*.

That which contains a salt, or has the properties of a salt.

**SALINE DRAUGHT, or Mixture.** This may be made as follows:—*Potass. carbon.* ℥j, *acid. citric. vel tartar. gr.* xv, *vel succ. limon. recent.* ℥ss, *aque* ℥viii, *symp. cjujusvis* ℥j. M. Given in divided doses as a febrifuge.

The **SALINE EFFERVESCING DRAUGHT or Mixture** is made by adding a due proportion of either of the acids above-mentioned, or of lemon juice to the proper proportion of the carbonate of soda or potassa; about 25 grains of the acid saturate, 30 grains of the carbonate. See *Powders, Soda.*

**SALIS AMMONIACI FLORES, Ammoniac carbonas.**

**SALJUNCA, Valeriana Celtica.**

**SALIVA, S'alon, S'elon, Ptyalon, Ptyelon, Spittle.** An inodorous, insipid, transparent, slightly viscid fluid; secreted by the parotid, submaxillary, and sublingual glands, and poured into the mouth by the ducts of Steno, Wharton, and Rivinus; the use of which is to mix with the alimentary bolus, and to serve in the process of digestion. It is composed, according to Berzelius, of 992.2 parts of water, 2.9 of a particular animal matter, soluble in water, and insoluble in alcohol, of 1.4 of mucus, of 1.7 of muriates of potassa and soda, 0.9 of lactate of soda and animal matter, and 0.2 of soda.

**SALIVÆ FLUXUS CIBO VISO.** See *Salivation.*

**SALIVARE, Salivary.**

**SALIVANS, Sialogogue.**

**SALIVARY, Salivarius, from saliva.** That which belongs to the saliva.

The **SALIVARY GLANDS of secreting organs of the saliva, or salival glands,** are situate symmetrically, to the number of three, on each side of the face; and behind and under the lower jaw. Their form is very irregular, and their extent varies according to individuals. Their excretory ducts—*Ductus salivarii*, (F.) *Canaux ou Conduits salivaires*, carry the saliva directly into the mouth, without pouring it into any intermediate reservoir, as happens in the case of some of the other glands. The salivary glands have been distinguished into,—1. The parotid; 2. The submaxillary; 3. The sublingual.

**SALIVARY FISTULÆ, Sialosyringes,** are such as depend upon an accidental opening into the excretory ducts of the salivary glands. Such fistulæ are, most commonly, met with in the duct of Steno.

**SALIVATION.** *Salivatio, Salivatio calida, Epiph'ora ptyalis'mus, Sialisma, Sialis'mus, Sialachus, Sialismo, Ptyalism, Fluxus salivæ.* (F.) *Flux de bouche, Flux salivaire.* A superabundant secretion of saliva; occasioned either locally by the use of irritating masticatories, or under the influence of some cause which acts on the whole economy, and especially by mercurial preparations. In this last case, it is accompanied by a coppery taste in the mouth, by swelling of the gums, and, sometimes, by looseness of the teeth. Salivation may usually be diminished by the use of astringents, laxatives, &c.

The *Ptyalismus acutus sympatheticus, Salivæ fluxus cibo viso, or Mouth watering,* the increased

flow of saliva produced by the sight, smell, or thought of agreeable food, is a species of ptyalism, as well as the *Ptyalismus acutus mellitus, Apocenosism ptyalis'mus mellitus, or Sweet spittle.* In this, the saliva has a sweet or mucilaginous taste.

**SALIX.** The *Willow, Itea, (F.) Saule.* A genus of plants in the Linnæan system.

The *Salix frag'illis* or Crack willow; Ph. D. *Salix alba* or White willow; Ph. D. *Salix latifolia* or Broad-leaved willow. *Salix caprea* or Great round-leaved willow; Ph. L. *Salix pentandra.* *Salix vitulinna.* *Salix eryceph'ala,* (Ph. Americ.)

The bark of each of these has a slightly aromatic odour, and a bitter and astringent taste, which is nearly the same in all the species. It is tonic and astringent, and has been used in intermittents, and in cases of dyspepsia, worms, &c. The active principle has been separated, and called *Salicine.* It is like the quinine in medicinal efficacy. Dose, ℥j to ℥j of the powder. Dose of *Salicine* from 4 to 6 grains.

**SALIX ÆGYPTIACA, Calaf.**

**SALMIAC, Ammoniac murias.**

**SALPINGEMPHRAX'IS, from σαλπυγξ, 'the Eustachian tube,' and εμφραξις, 'obstruction.'** Obstruction of the Eustachian tube;—a cause of deafness.

**SALPINGO-CYE/SIS, Paracystis tubaria, Graniditis tubaria, from σαλπυγξ, 'a tube or trumpet,' and κυσις, 'pregnancy.'** Tubal pregnancy.—See *Pregnancy.*

**SALPINGO-MALLEEN, Tensor tympani—s. Staphylinus internus, Levator palati.**

**SALPINGO-PHARYNGÆ'US, from σαλπυγξ, 'a trumpet,' and φαρυγξ, 'the pharynx.'** Valsalva and Douglas have given this name to a bundle of fibres, which passes from the Eustachian tube to the pharynx.

**SALPINX, Tuba.**

**SALSALI, Tragopogon.**

**SALSAMENTUM CRUDUM, Omotarichos.**

**SALSAPARILLA GERMANICA, Sarsaparilla Germanica.**

**SALSEDO MUCRUM, Potassæ nitras.**

**SALSEPAREILLE, Smilax sarsaparilla—s. d'Allenagne, Sarsaparilla Germanica.**

**SALSILAGO, Muria.**

**SALSOLA KALI, Prickly Saltwort, Kali spinosum cochlear'tum, Tragus sive Tragum Mat'hai'oli.** This plant, as well as the *Salsola sativæ,* and the *Salsola soda,* produces the alkaline salt, commonly called *Barilla, Soda, or Kelp.*

**SALSOLA SATIVA, &c. See Soda.**

**SALSUGINOSUS, Halmyrodes.**

**SALT, Sal, Hal, Hals, (F.) Sel.** A name formerly given to a considerable number of substances of very different nature. At present, chymists apply the term, *Salts,* exclusively to the combinations of an acid with one or more bases. *Neutral salts* are those, in which the acid and base reciprocally saturate each other. *Acid salts or supersalts, (F.) Sur-sels,* are those, in which the acid predominates over the base. *Alkaline salts or subsalts, (F.) Sous-sels,* those in which the base is, on the contrary, predominant.

The different denominations of the salts are compounded, 1. Of the name of the acid; the termination of which is changed into *ite,* when

the name of the acid is in *ous*,—*ate*, when it is in *ic*. Thus the salts formed by the *sulphurous* acid are *sulphites*: those by the *sulphuric*, *sulphates*. 2. This name is followed up by that of the oxyd, that enters into the composition of the salt. Thus, the *sulphate of protoxyd of iron* is a combination of sulphuric acid with the protoxyd of that metal. Frequently, to shorten the name, the word *oxyd* is suppressed; and *proto*, *dcuto*, *trito*, &c. put before the acid:—as *protosulphate of iron*. *Simple salts* are those resulting from the combination of an acid with a single base: *double salts*, with two different bases: *triple*, with three, &c.

When *salt* is used in an abstract sense, it means the muriate of soda.

**SALT, APERIENT, OF FREDERICK**, Soda, sulphate of—s. Baker's, Ammonia carbonas—s. of Barilla, Soda, subcarbonate of—s. Bay, Soda, muriate of—s. Bitter purging, Magnesia sulphas—s. Common, Soda, muriate of—s. Epsom, Magnesia sulphas—s. Glauber's, Soda, sulphate of—s. Glauber's, Lymington, see Soda, sulphate of—s. Rochelle, Soda, tartrate of—s. Rock, Soda, muriate of—s. Sea, Soda, muriate of—s. Seignette's, Soda, tartrate of—s. Smelling, Ammonia carbonas—s. of Soda, Soda, subcarbonate of—s. Sorethroat, Potassa nitras fusus sulphatis paucillo mixtus—s. of Tartar, Potassa tartras, see Potash—s. Tasteless purging, Soda, phosphate of—s. of Urine, Ammonia carbonas—s. White, Soda, muriate of—s. of Woodsot, Ammonia carbonas—s. of Wormwood, see Potash—s. Secondary, Neutral salt.

**SALTANS ROSA**, Urticaria.

**SALTATIO**, Dancing—s. Sancti Viti, Chorea.

**SALTPETRE**, Potassa nitras.

**SALTWORT, PRICKLY**, Salsola kali.

**SALUBRIS**, Salutory.

**SALUBRITY**, *Salubritus*. Any thing which contributes to the health of individuals or of communities. Situations differ materially from each other in this respect; and the cause of the difference is often an interesting topic of inquiry.

**SALUTARY**, *Periesticos*, *Salutaris*, *Salubris*, *Hygie'nos*, from *salus*, 'health.' That which is favourable to health. Some diseases have been considered salutary, but this is doubtful.

**SALVATEL'LA**, from *serva're*, 'to preserve or save.'

The **VENA SALVATEL'LA** is situate on the back of the hand, near its inner margin. It begins on the posterior surface of the fingers and dorsal surface of the hand, by a plexus, formed of a number of radicles, frequently anastomosing with each other; it then ascends to the inner part of the forearm, where it takes the name—*posterior cubital*.

The ancients recommended this vein to be opened in certain diseases, as in melancholic and hypochondriacal affections; and they attributed to such abstraction of blood considerable efficacy in the cure of disease: hence its name.

**SALVE, BLISTERING**, Unguentum Lyttae—s. Eye, Unguentum oxidi zinci impuri—s. Eye, Singleton's, Unguentum hydrargyri nitrico-oxydi—s. Healing, Cerate of calamine.

**SALVIA**, *S. officinalis*, *S. horten'sis*, *Elelis'phacos*, (F.) *Sauge*, *Thé de France*. *Family*, Labiatæ. *Scz. Syst.* Diandria Monogynia. Sage has a peculiar, aromatic odour, and a warm, aromatic, bitterish taste. Its virtues depend upon an essential oil. It is tonic, stimulant, and carminative. In the form of a weak infusion, it is occasionally used as a diluent, and as a wash for sore mouth. Dose, gr. xv. to xxx or more.

**SALVIA HORTENSIS**, *Salvia*—s. *Officinalis*, *Salvia*.

**SALVIA SCLAREA**, *Sclarea*, *Gallitrichum*, *Ethiopsis*, *Biser'mas*, *Colus Jovis*, *Common Clury*, (F.) *Orvale* ou *Toute-bonne*. The leaves have been recommended as corroborants and antispasmodics.

The **SALVIA HORMINUM**, or *Horminum*, (F.) *Sauge hormin*, of the Pharmacopœias, is used in similar cases.

**SALVIA VITÆ**, *Asplenium ruta muraria*. **SAMBU'CUS**, *Sambucus nigra*, *S. vulg'ris*, *S. arborea*, *Actè*, *Infelix lignum*; the *Elder*, (F.) *Surcau commun*. *Family*, Caprifoliacæ. *Scz. Syst.* Pentandria Digynia. (The flower and bark were formerly called *Canop'pum*.) The flowers, berries, and bark of the elder have been used in medicine. The *flowers* have been reputed diaphoretic and discutient: the *berries*, aperient and sudorific: the *bark*, purgative, and, in small doses, deobstruent.

The flowers are sometimes used in fomentations, and to form a cooling ointment.

**SAMBUSCUS ARBOREA**, *Sambucus*—s. *Chamaeacte*, *S. ebulus*.

**SAMBUSCUS EBULUS**, *Ebulus*, *Chamaeactè*, *Od'ocos*, *Sambucus Chamaeactè* seu *Helion*, *Sambucus hu'milis*, *S. herba'dcca*, *Dicarf'elder*, *Dane-wort*, (F.) *Hièble*. The root, interior bark, leaves, flowers, berries, (*Baccæ* seu *Grana Actes*.) and seeds have all been given in moderate doses as resolvents and deobstruents; and in large doses, as hydragogues.

The berries of the *Sambucus Canadensis*, are made officinal in the American Pharmacopœia.

**SAMBUSCUS HELION**, *Sambucus ebulus*—s. *Herbacea*, *S. ebulus*—s. *Humilis*, *S. ebulus*—s. *Nigra*, *Sambucus*—s. *Vulgaris*, *Sambucus*.

**SAMI TERRA**, *Samian Earth*. An argillaceous earth, found in the island of Samos, and to which were ascribed virtues similar to those of the Terra Lemnii.—Galen, Dioscorides.

**SAMIUS LAPIS**. A stone found in the Isle of Samos, which the ancients believed to be astringent and refrigerant.

**SAMPHIRE**, *Critidum maritimum*.

**SAMPSUCHUS**, *Thymus mastichina*.

**SAMPSUCUS**, *Origanum majorana*.

**SAMPSUCH'INON**, *Sampsuchinum*. An ointment composed of the *σαμψυχον*; which was perhaps the marjoram.—Dioscorid.

**SANABILIS**, Curable.

**SANAMUNDA**, *Geum urbanum*.

**SANATIO**, Curation, Cure.

**SANATIVE**, Curative.

**SAN GIULIANO, MINERAL WATERS OF**. At the foot of the mountain San Giuliano, a league and a half from Pisa, are several mineral springs; temperature from 84° to 107° Fahr.

The spring *Pozzetto* contains carbonic acid, sulphate of soda, lime, and magnesia; muriates of soda and magnesia; carbonates of lime and magnesia; argil and silica.—Santi.

**SANDARAC**, *Sandara'cha*, Gum *Ju'niper*, Gum *Sandarach*, Pounce, Gummi *Juniperi*, *Sandara'ca*, *Vernix sicca*, *Resi'na Juniperi*. A name given, by the Arabs, to an odorous resin, that flows from the *Thuja aphylla*. Family, Coniferae. *Sex. Syst.* Monœcia Monadelphia. It is stimulant, like all the resins, but very little used.

**SANDARACHA GRÆCORUM**, Realgar.

**SANDASTROS**, *Garamati'tes*. Ancient name of a precious stone, spotted with yellow, which the ancients ranked amongst the cordials and antidotes.

**SANDERS, RED**, *Pterocarpus santalinus*.

**SANDIVER**, *Sec Vitrum*.

**SANG**, Blood—*s. Arteriel*, Arterial blood—*s. Dragon*, *Rumex sanguineus*—*s. Dragon*, see *Calamus rotang*—*s. Globules du*, Globules of the blood—*s. Perte de*, Hæmorrhagia.

**SANGLOT**, Sob.

**SANGSUE**, Hirudo.

**SANGUIDUCTUS DURÆ MATRIS**, Sinuses of the dura mater.

**SANGUIFICATIO**, Hæmatisis.

**SANGUIFLUXUS**, Hæmorrhagia—*s. Uterinus*, Metrorrhagia.

**SANGUINALIS CORRIGIOLA**, *Polygonum aviculare*.

**SANGUINARIA CANADENSIS**, *Blood-root*, *Puccoon*, *Indian Paint*, *Tur'meric*. *Nat. Ord.* Papaveraceae. *Sex. Syst.* Polyandria Monogynia, A North American plant, the root and seeds of which are used in medicine. They are emetic. Dose, of the powder, 8 to 20 grains. They are said to reduce the velocity of the pulse, like the digitalis.

**SANGUINEA**, *Potassæ nitras*.

**SANGUINIS MISSIO**, Blood-letting—*s. Profluvium copiosum*, Hæmorrhagia.

**SANGUIOLENT**, *Sanguinolentus*. That which is tinged with blood. An epithet applied, particularly, to the sputa when so tinged.

**SANGUIPURGIUM**, Purgation of the blood. A name, given by some authors to mild fevers; from an idea that they purged the blood of noxious matters.

**SANGUIS**, Blood—*s. Draconis*, see *Calamus rotang*—*s. Hirci siccatus*, see *Blood*.

**SANGUISORBA OFFICINALIS**. The *Italian Pin'pincl*, *Pimpinella Italica*. (F.) *Pimprenelle noire*. It was, formerly, used as an astringent and tonic, in hæmorrhages, dysentery, &c.

**SANGUISUGA**, Hirudo.

**SANGUISUGUM**. A barbarous term, to denote too great an accumulation of blood in the heart.—Bonetus.

**SANICLE**, *Sanicula*—*s. American*, *Heuchera Cortusa*—*s. Yorkshire*, *Pinguicula vulgaris*.

**SANICULA**, *S. Europæa*, *Cuculla'ta*, *Dodeca'theon*, *Syn'phytum petra'eum*, *Sanic'ula mas*, *Diapen'sia cortu'sa*, *San'iclc*. (F.) *Toutte-saine*. Family, Umbelliferae. *Sex. Syst.* Pentandria Digynia. This herb was, formerly, used as a mild astringent. It is bitterish, and somewhat austere.

**SANICULA**, *Saxifraga granula*—*s. Eboracensis*, *Pinguicula vulgaris*—*s. Europæa*, *Sanicula*—*s. Montana*, *Pinguicula vulgaris*.

**SANIDO'DES**, *Sanio'des*, 'resembling a board,' from *σανις*, gen. *σανιδος*, 'a board,' and *ειδος*, 'resemblance.' One whose thorax is narrow, and, as it were, contracted.

**SANIE**, Sanies.

**SANIES**, *Ichor*, (q. v.) *Tabun*, *Virus Pus malignum*, *P. corrosivum*. (F.) *Sanie*. A thin, serous fluid, presenting some of the qualities of pus and blood, and commonly exhaled at the surface of ulcers.

**SANIODES**, Sanidodes.

**SANITAIRE** (F.) That which relates to the health—as *Etablissement sanitaire*; *Police sanitaire*.

**SANITAS**, *Hygie'na*, *Valctu'do*, *Hygc'na*, Health. (F.) *Santé*. Health has been defined, —a state, in which all the functions are exerted with regularity and harmony. A person may, however, be in health, although certain functions are not performed. A blind man, for example, has health when all his functions, except sight, proceed with regularity.

**SANITAS**, Cure.

**SANKIRA**, *Smilax China*.

**SANTAL**, *Santalum album*.

**SANTALUM ALBUM**, *S. cit'rinum*, *S. pallidum*, *Yellow Saunders*, *Sir'ium myrtifolium*, (F.) *Santal*. *Sex. Syst.* Tetrandria Monogynia. The virtues of the wood of the white saunders reside in a volatile oil and resinous principle. The odour is fragrant, and resembles a mixture of ambergris and roses. It has been used as a stimulant and sudorific, but is not now employed. The Saunders woods are called (in F,) collectively, *Santaux*.

**SANTALUM RUBRUM**, *Pterocarpus santalinus*.

**SANTÉ**, Sanitas.

**SANTONICUM**, *Artemisia santonicum*.

**SANTORINI, FISSURES OF**, (F.) *Incisures ou Scissures de Santorini*. Some clefts at the upper and back part of the fibro-cartilaginous portion of the external ear.

**SANTORINI, TUBERCLES OF**. Small, cartilaginous projections at the top of the arytenoid cartilages, which support the ligaments of the glottis.

**SANVE**, *Sinapis*.

**SAPA**. See *Rob*.

**SAPHADA**. Paracelsus has given this name to reddish scales adherent to the hair in some eruptions of the hairy scalp.

**SAPHENA**, from *σαφης*, 'manifest,' 'evident.' A name given to two subcutaneous veins of the lower limb. These are:

1. The GREAT SAPHENA VEIN, or *Saphena interna*, *Tibio-malleolar*, (Ch.) Its radicles occupy the inner part of the great toe, and form a transverse arch on the back of the foot, which unites with the saphena externa, and receives at its convex part, which is turned forwards, a number of branches coming from the toes. These radicles, when united, ascend before the inner ankle, and form a trunk, the size of which is farther increased by several branches that proceed from the region of the tarsus and that of the metatarsus. This trunk ascends vertically at the inner part of the leg; passes behind the inner condyle of the femur; proceeds along the inner part of the thigh; receives other subcutaneous veins, such as the abdominal subcu-

taneous, the external pudic, &c., and passes through the inferior opening of the crural canal to empty itself into the femoral vein.

2. The LESSER VENA SAPHENA, or *Saphena externa*; the *Péronéo-malleolar Vein* of Chaussier commences by several roots, which are spread over the dorsum and outer side of the foot, and embrace the outer ankle. Behind this, they unite into a single trunk, which ascends obliquely, approaching the tendo Achillis, and proceeds vertically towards the ham to open into the popliteal vein.

SAPIDITY, *Sapor*. The quality of bodies that gives them taste.

SAPIN COMMUN, *Pinus picea*.

SAPINDUS SAPONARIA. (F.) *Savonnier commun*. The name of the plant that affords the Soap nuts, *Saponaria Nucula*, *Bacca Bermuden'ses*, *Soap-berries*. A spherical fruit about the size of a cherry, the cortical part of which is yellow, glossy, and so transparent as to show the spherical, black nut that rattles within, and includes a white kernel. The cortical part of this fruit, which has similar effects with soap in washing, has been recommended in chlorosis, and as a stomaclic and deobstruent.

SAPON, *Soap*, *Smegma*. (F.) *Savon*. A product obtained by treating fatty bodies with caustic alkalis dissolved in water.

SAPON AMMONIACALIS, *Linimentum ammoniæ fortius*—s. *Ammoniæ oleaceus*, *Linimentum ammoniæ fortius*—s. *Calcaris*, *Linimentum aquæ calcis*—s. *Kalicus*, *S. mollis*—s. *Niger*, *S. mollis*—s. *Vegetabilis*, *Pulvis gummosus alkalinus*—s. *Viridis*, *S. mollis*.

MEDICINAL SOAP, *Sapo amygdalinus*, (F.) *Savon médicinal*, is made with oil of sweet almonds and half its weight of caustic alkali.

COMMON or SOFT SOAP, *Sapo mollis*, *S. viridis*, *S. niger*, *S. kallicus*, (F.) *Savon mou*, *Savon noir*, is made of potass and oil or tallow.

SPANISH or CASTILE SOAP, *Sapo durus*, (F.) *Savon dur*, of olive oil and soda.

BLACK SOAP, *Melanosmegma*, is a composition of train-oil and an alkali: and GREEN SOAP, of hemp, linseed, or rape oil with an alkali.

YELLOW SOAP is formed of turpentine, oil, and alkali. The Castile soap, being made of fine olive oil, is generally used internally. The yellow and soft soaps are the most stimulating; and are, consequently, best adapted for particular cutaneous eruptions.

An ACID SOAP is a combination of a fixed oil with an acid.

Internally, soap is purgative and diuretic; externally, it is detergent and stimulant. Soapy water is used with the greatest success, in cases of poisoning by acids. It is mostly applied externally to bruises and sprains. In *Pharmacy*, it is used to favour the solution of resins.

SOAP OF THE COCOA NUT OIL, *Sapo coco'neus*, *S. cacoutinus*. (F.) *Savon de cacao*. It has been much used in Germany in herpetic affections.

LIQUID SOAP, *Lotio saponacea*, is a cosmetic which is composed of olive oil ℥iv, ol. tartari per deliquium ℥ss. Rub together, and add aquæ rosarum ℥xij.

SAPONAIRE, *Saponaria*.

SAPONARIA. *Soap-wort*, *Bruise-wort*,

*Struthium*, *Jana'ria*, *Lychnis syleestris*, *Ibiz'uma*. (F.) *Saponaire*. Family, Caryophyllæ. *Sex. Syst.* Decandria Digynia. A decoction of the leaves of this plant has been recommended in scrofula, cancer, old syphilis, cutaneous eruptions, jaundice, visceral obstructions, &c. It is hardly ever used.

SAPONARIÆ NUCULÆ, *Sapindus saponaria*.

SAPONÆA. A pectoral medicine, prepared with sweetened syrup of violets and oil of sweet almonds.

SAPONULES, *Sapon'ula*, (F.) *Saponules*. Combinations of volatile or essential oils with different bases.

ACID SAPONULES, are combinations of such oils with different acids.

SAPOR, *Sapidity*, *Savour*.

SAPOTA, *Aceris Sapota*, *Oral-fruited Sapota*, (F.) *Sapotier*, *Sapotillier*. *Sex. Syst.* Hexandria Digynia. A tree which grows in the Antilles, and particularly at Saint Domingo. Its fruit is much esteemed. It resembles the marmalade of quinces; and hence has been called *natural marmalade*. The seeds make an emulsion, which has been given in neplritic affections. The bark has been recommended as a febrifuge.

SAPOTIER, *Sapota*.

SAPOTILLIER, *Sapota*.

SAPROPYRA, *Typhus gravior*.

SAPROSUS, *Putrid*, *Rancid*.

SAPROS'TOMUS, from σαπρος, 'foul, of a bad odour,' and στομα, 'mouth.' One who has an offensive breath.

SAR'APUS, *Sarapous*. One who has a large foot; whose toes are largely separated, or whose feet are much asunder in walking; from σαρω, 'I grin,' and πους, 'the foot.' See *Kyllosis*.

SARATOGA, MINERAL WATERS OF. The Saratoga springs in New York are ten miles north-east from Ballston. They contain the same ingredients as those of the latter place; and are much frequented by visitors from every part of the United States. The following analysis has been given of the *congress spring*: In a wine gallon—*gaseous contents*: carbonic acid, 311 cubic inches; atmospheric air, 7—*solid contents*. Chloride of sodium, gr. 385; hydriodate of soda, gr. 3.5; bicarbonate of soda, gr. 8.982; bicarbonate of magnesia, 95.788; carbonate of lime, 98.098; carbonate of iron, 5.075; silica, 1.5; hydriobromate of potassa, a trace. Total gr. 597.943—*Steel*.

SARCION, *Caruncle*.

SARCITES, *Anasarca*—s. *Flatusus*, *Emphysema*.

SARCOCELĒ, *Hernia carno'sa*, *Scirrhus Testiculi*, from σαρκ, 'flesh,' and κηλη, 'a tumour;' *Sarco'ma scroti*, (F.) *Hernie charnue*. *Scirrhus* or cancer of the testicle. This disease affects the adults particularly; and appears, most commonly, after an inflammatory swelling of the testicle. Sometimes it is dependent upon a blow; at others, it makes its appearance without any appreciable cause.

It is well known by a hard, heavy, ovoid or spherical swelling of the testicle, which is, at first, slightly, or not at all, painful, and merely causes an unpleasant traction on the spermatic cord. There is no heat or change of colour of the skin: the spermatic cord is swollen, and

participates in the affection: very painful shootings occur: the lymphatic glands of the abdomen become swollen, and form a tumour, which may, at times, be felt through the abdomen; and the patient, at length, dies with every sign of the cancerous diathesis. The prognosis is very unfavourable. The only means, indeed, that can save life is the extirpation of the testicle.

SARCOCOLLA, (F.) *Colle-chair*, from σαρκός, 'flesh,' and κόλλα, 'glue.' A resinous matter, obtained from the *Penæa Sarcocolla*, an African shrub, which has been so called, from a belief that it facilitates the consolidation of flesh. It is in the form of small, oblong, semitransparent globules: of a yellowish or reddish blue, and smells like aniseed. It was once employed as an astringent and detergent.

SARCO-EPIPLOCELE, from σαρκός, 'flesh,' επιπλοον, 'the epiploon,' and κηλη, 'a tumour.' Epiplocele, complicated with sarcoma or sarcocele.

SARCO-EPIPLOM'PHALUS; from σαρκός, 'flesh,' επιπλοον, 'the epiploon,' and ομφαλος, 'the navel.' Umbilical hernia, formed by scirrhus epiploon or complicated with sarcoma.

SARCO-HYDROCELE, Hydro-sarcocele.

SARCODES, Carneous.

SARCOLOGIA, Myology.

SARCOLOGY, *Sarcologia*, from σαρκός, 'flesh,' and λογος, 'a discourse.' The part of anatomy which treats of the soft parts. It comprises myology, angiology, neurology, and splanchnology.

SARCOMA, *Emphy'ma Sarcoma*, *Sarcomatous tumour*, *Sarcosis*, *Porrus*, *Sarcophy'ia*, *Excrescentia*, *Exsarcoma*, *Tumor carneus*, *Excrescentia carnos'a*. Any species of excrescence having a fleshy consistence.

THE COMMON VASCULAR OR ORGANIZED SARCOMA of Abernethy, *Emphy'ma Sarcoma Vasculosum*, is vascular throughout: texture simple: when bulky, mapped on the surface with arborescent veins. Found over the body and limbs generally.

SARCOMA CERCOSIS, see Cercosis—s. Epulis, Epulis—s. Mastoid, Mammary sarcoma—s. Medullare, see Encephaloid—s. Medullary, Hæmatodes fungus—s. Pulpary, Hæmatodes fungus—s. Scroti, Sarcocele.

SARCOM'PHALUS, from σαρκός, 'flesh,' and ομφαλος, 'the navel.' A scirrhus or fleshy tumour, developed at the navel.

SARCOPHAGUS, Carnivorus, Cathartic.

SARCOPHYIA, Excrescence, Sarcoma.

SARCOPTA, Acarus.

SARCOPTES SCABIEL. See Psora.

SARCOPYODES, from σαρκός, 'flesh,' πύρον, 'pus,' and εἶδος, 'resemblance.' Having the appearance of pus mixed with flesh. An epithet, given to certain excreted matters, and particularly to the sputa of those labouring under consumption.

SARCO'SIS, σαρκωσις. The formation of flesh. Also, Sarcoma. (q. v.)

SARCOSTOSIS, Osteo-sarcoma.

SARCOTICUS, Incarnans.

SARDIASIS. Canine laugh, Risus sardonius.

SARDONIASIS, Canine laugh, Risus sardonius.

SARE, Essera.

SARRASIN, Polygonum fagopyrum.

SARRIÈTE, *Satureia Hortensis*—s. *de Crète*, *Satureia capitata*.

SARSA, *Smilax sarsaparilla*.

SARSAPARILLA, *Smilax S.*—s. *False*, *Aralia nudicaulis*.

SARSAPARILLA GERMANICA, *Gramen major*, *G. rubrum*, *Salsaparilla Germanica*, *Carex Arendria*, (F.) *Laiche*, *L. des Sables*, *Sulsepareille d'Allemagne*. Family, Cyperoidæ. *Sex. Syst.* Monœcia Triandria. A plant, which grows plentifully on the sea-coasts of Europe. It has been recommended in some mucous affections of the trachea, in rheumatism, gout, &c.

SARTORIUS, from *Sartor*, 'a tailor,' because used in crossing the legs. *Sutorius*, *Longisimus Femoris*, *Illo-cresti-tibial*, *Fascialis*, *Illo-prætibial*, (Ch.) A muscle, situate at the anterior part of the thigh. It is long, small, and flattened, and extends, obliquely, from the anterior and superior spine of the ilium to the superior and inner part of the tibia. This muscle can, also, bend the pelvis on the thigh, and conversely.

SARX, Flesh, Pulp.

SARZA, *Smilax sarsaparilla*.

SASSAFRAS, *Laurus sassafras*—s. *Swamp*, *Magnolia glauca*.

SATELLITE, *Satelles*. That which guards:—that which is placed near.

SATELLITE VEINS are those that accompany the arteries.

SATHE, Penis.

SATIETAS, Plesmone.

SATVETY, *Satietas*, *Saturitas*, *Plethos*, *Plesmone*. Disgust for food; commonly produced by repletion.

SATIN, Lunaria rediviva.

SATIRIASIS FURENS, Satyriasis.

SATURA'TION, *Satura'tio*, from *satis*, 'enough.' That state of a compound in which its elements are combined in such proportions that a fresh quantity of either cannot be added without producing excess.

SATUREIA HORTENSIS, *Satureia*, *S. sativa*, *Cuni'la sativa* *Plinii*, *Thymbra*, *Summer Savory*, (F.) *Sarrîète*. Family, Labiata. *Sex. Syst.* Didynamia Gymnospermia. An aromatic plant, cultivated for culinary purposes. It has been used, as an excitant, in anorexia, anaphrodisia, &c.

SATUREIA CAPITATA, *Ciliated Savory*, *Thymus*, *Thymus sylvestris*, *Thymus Cre'ticus*, *Cunila*, (F.) *Sarrîète de Crète*. Possesses similar properties to thyme.

SATUREIA SATIVA, *S. hortensis*.

SATURIFAS, Satiety.

SATURNI DULCEDO, *Plumbi superacetat*.

SATURNUS, Plumbum.

SATYRIASIS, from *Σατυρος*, 'a Satyr;' because the Satyrs are said to have been greatly addicted to venery. *Satyrius'mus*, *Priapismus*, *Salac'itas*, *Brach'na*, *Ara'scon*, *Satir'asis furcens*, *Lagne'sis Salac'itas*, *Lagnesis furor masculin'us*, *Tenti'go veretri*. An irresistible desire, in man, to have frequent connexion with females, accompanied with the power of doing so without exhaustion. The causes are commonly obscure. Sometimes, the abuse of aphrodisiacs has occasioned it.

The principal symptoms are:—almost constant erection; irresistible and almost insatiable

desire for venery; frequent nocturnal pollutions. Cold lotions; the cold bath; a mild diet; active exercise, &c., are the only means that can be adopted for its removal.

SATYRION, *Orchis mascula*.

SAUCE-ALONE, *Alliaria*.

SAUCE, GREEN, *Rumex scutatus*.

SAUER KRAUT, (G.) 'Sour Cabbage,' (F.) *Chou-croute*. A culinary preparation, made with chopped cabbage, left to attain an incipient state of acetous fermentation. It is reputed by the Germans to be salubrious, easy of digestion, and eminently antiscorbutic.

SAUGE, *Salvia*—*s. des Bois*, *Teucrium scorodium*—*s. Hormin*, *Salvia horminum*—*s. de Jerusalem*, *Pulmonaria*.

SAULE, *Salix*.

SAUMURE, *Muria*.

SAUNDERS TREE, *Pterocarpus santalinus*—*s. Yellow*, *Santalum album*.

SAURA, *Lizard*.

SAUVE-VIE, *Asplenium ruta muraria*.

SAVEUR, *Savour*.

SAVINE, *Juniperus sabina*.

SAVINIER, *Juniperus sabina*.

SAVON, *Sapo*—*s. Ammoniacal*, *Linimentum ammoniæ fortius*—*s. Cacao*, *Sapo coconeus*—*s. Calcaire*, *Linimentum aquæ calcis*—*s. Dur*, *Sapo durus*—*s. Médicinal*, *Sapo medicinalis*—*s. Mou*, *Sapo mollis*—*s. Noir*, *Sapo mollis*.

SAVONNIER COMMUN, *Sapindus saponaria*.

SAVONULUS, *Saponulus*.

SAVORY, CILIATED, *Satureia capitata*—*s. Summer*, *Satureia hortensis*.

SAVOUR, *Sapor*, *Taste*, (F.) *Saveur*. Quality of bodies, by which they act upon the sense of taste. The taste is not the same in all rapid bodies. It may be sweet, bitter, metallic, &c. Chymists, at times, avail themselves of this quality of bodies to analyze an unknown substance.

SAVOUREUX, *Savoury*.

SAVOURY, *Sap'idus*, (F.) *Savouroux*. An epithet given to bodies that have taste; and particularly to those that excite a very agreeable impression on the organ of taste.

SAW, *Prion*, *Serra*, (Dan.) *Sawe*, (Sax.) *rağa*, (F.) *Scie*. A surgical instrument, made like a common saw; and used for sawing the bones in amputations, or for removing exostoses, &c.

Saws, of different sizes and shapes, are used in surgery. The crown of the trepan is nothing more than a species of circular saw.

SAW, HEY'S. An instrument used by Mr. Hey, of Leeds, in fractures of the cranium. It consists of a long handle, to which a small saw with a convex, or straight edge is attached: and by which a piece of bone of any shape may be removed, whilst with the trephine it must always be circular.

SAXIFRAGA ANGLICA, *Peucedanum silaus*.

SAXIFRAGA CRASSIFOLIA. *Family*, Saxifragæ. *Sex. Syst.* Decandria Digynia. The root of this species of Saxifrage has been extolled by Pallas, as preeminently antiseptic.

SAXIFRAGA RUBRA, *Spiræa filipendula*—*s. Vulgaris*, *Peucedanum silaus*.

SAXIFRAGA GRANULATA, *S. alba*, *Saxifraga*, *Sedum*, *White Saxifrage*, (F.) *Saxifrage granu*

lée. Recommended as diuretic and lithontriptic; but not used.

SAXIFRAGE, BURNET, *Pimpinella saxifraga*—*s. Granulé*, *Saxifraga granulata*—*s. Meadow*, *Peucedanum silaus*—*s. White*, *Saxifraga granulata*.

SAXIFRAGUS, *Lithontriptic*.

SAXON'ICUS PULVIS. A powder, prepared with the roots of the wild and cultivated angelica; the *Asclepias vincetoxicum*, &c. It was considered, formerly, as an antidote. *Pharm. Aug.*

SCAB, from *Sca'bies*. An incrustation, which forms upon a sore, owing to the concretion of the fluid discharged from it. An eschar, (q. v.) SCABBY OR SCABBED; covered or diseased with scabs.

SCABIES, *Psora*—*s. Capitis*, *Porriigo lupinosa*, *Porriigo scutulata*—*s. Capitis favosa*, *Porriigo favosa*—*s. Sicca*, *Psoriasis*—*s. Venerea contagiosa*, *Scherlievo*.

SCABIEUSE ORDINAIRE, *Scabiosa*.

SCABIO'SA, *S. Arven'sis*, *Field Scabious*, (F.) *Scabieusc ordinaire*. *Family*, *Dipsacæ*. *Sex. Syst.* *Tetrandria Monogynia*. The plant is bitter and subastringent; and was formerly used in the cure of leprous affections and diseased lungs.

SCABIOSA ARVENSIS, *Scabiosa*—*s. Carduifolia*, *Echinops*.

THE SCABIOSA SUCCI'SA, *Succisa*, *Morsus Diab'oli*, (F.) *Mors du Diable*, has similar properties.

SCABIOUS, *Erigeron Philadelphicum*—*s. Field*, *Scabiosa*.

SCABISH, *Cenothera biennis*.

SCALA, 'A ladder.' A machine, formerly used for reducing dislocations of the humerus.

THE SCALE OF THE COCHLEA, (F.) *Rampes* ou *Echeltes du Limaçon*—called, also, *Canals* and *Gyri*—are the cavities in the cochlea, separated from each other by the spiral septum. The one—*Scala cæterna*, *S. Tympani*—would communicate with the *cavitas tympani* by the *fenestra rotunda*, were it not for the membrane that closes it. The other—*Scala inter'na*, *S. vestibuli*—opens into the cavity of the vestibule. The *scalæ* communicate with each other by an opening at the top of the partition.

SCALE TYMPANI, see *Cochlea*—*s. Vestibuli*, see *Cochlea*.

SCALE, *Squama*, *Lepis*, (F.) *Écaille*. An opaque and thickened lamina of cuticle; commonly produced by some degree of inflammation of the true skin, over which it is formed.

SQUAME OR SCALY DISEASES, *Lepido'scs*, form the second order in Willan and Bateman's system of cutaneous diseases.

SCALE, DRY, *Psoriasis*.

SCALÈNE ANTÉRIEUR, *Scalenus anticus*—*s. Postérieur*, *Scalenus posticus*.

SCALE'NUS; 'irregular or unequal.' Geometers employ this word to designate a triangle whose three sides are unequal. Anatomists have given the name to two muscles.

1. THE SCALENUS ANTI'CUS, *Portion of the Costo-trachelian* (Ch.) (F.) *Scalène antérieur*, is situate at the lateral and inferior parts of the neck. It is long and triangular; and is inserted, below, at the upper surface of the first rib;

and, above, at the anterior tubercle of the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebrae. This muscle bends the neck, and draws it to its side. It can, also, raise the first rib.

The *SCALENUS POSTICUS*, *Portion of the Costotrachealian* (Ch.,) is situate behind the last. (F.) *Sealène postérieur*. It is, also, long and triangular; but more bulky than the *S. anticus*. It is attached, below, to the outer surface of the two first ribs; and terminates, above, at the summit of the transverse processes of the six last vertebrae of the neck. This muscle bends the neck laterally, and can elevate the two first ribs. Some anatomists, as Albinus and Sömmerring, have described five scaleni muscles on each side, and have called them, *Scalenus prior*, *S. minimus*, *S. lateralis*, *S. medius*, *S. posticus*. Riolan and Chaussier only describe one scalenus muscle on each side. Cowper and Douglas, and the generality of English anatomists, admit three, *S. anticus*, *medius*, and *posticus*; or *Primus*, *secundus*, and *tertius*;—Winslow, Boyer, and many of the French anatomists,—two, as above described.

SCALL, DRY, Psoriasis—s. Milky, Porrigo larvalis—s. Honeycomb, Porrigo favosa—s. Running, Impetigo.

SCALLED HEAD, Porrigo scutulata.

SCALP. Teut. Schelpe, 'a shell.' The integuments covering the head. The *hairy scalp* is called, also, *Capillitium*, *Trichoton*.

SCALPEL, *Scalpel'lum*, *Cutter*, *Incisorium*, *Smileon*; from *scalpo*, 'I rasp, I cut.' A cutting instrument, formed of a blade of well-tempered steel, very sharp, of variable shape and size, and fixed solidly in a handle. Its use is to divide the soft parts in operations, dissection, &c.

SCALPELLUS, *Bistouri*.

SCALPRUM, *Raspatorium*—s. *Rasorium*, *Raspatorium*.

SCAMMA, *Fossa*.

SCAMMONÉE D'ALEP, *Convolvulus scammonia*.

SCAMMONIUM SYRIACUM, *Convolvulus scammonia*.

SCAMMONY, *Convolvulus scammonia*—s. of Montpellier, *Cynanchum Mospeliacum*.

SCAMNON HIPPOCRATIS, *Bathron*.

SCAMNUM HIPPOCRATIS, *Bathron Hippocraticum* of Galen, (F.) *Banc d'Hippocrate*. A machine invented by Hippocrates for reducing fractures. It was a sort of bed, six feet long; on which the patient was fixed. Straps were attached above and below the fracture or luxation, and the extension and counter-extension were effected by a winch. It is described in Galen, Orbasius, Scultetus, &c.

SCANDIX CEREFOLIUM, *Cerefolium*, *Daucus Scrinivius*, *Cherophyllum*, *Cherfolium*, *Cherril*. (F.) *Cerfeuil*. Family, Umbelliferae. *Sex. Syst.* Pentandria Digynia. A culinary herb, which is slightly aromatic and grateful. It is said to be gently aperient and diuretic.

SCANDIX ODORATA; the *Succet Cic'cly*. Properties the same as the other.

SCANDIX ODORATA, *Cherophyllum odoratum*.

SCAPHA, *σκαφη*, 'a skiff or cock-boat;' from *σκαπτο*, 'I make hollow.' The excava-

tion or cavity of the external ear, between the helix and anthelix. Also, the name of a bandage for the head, mentioned by Galen, and called, likewise, *Tholus Diocleus*.

SCAPHIA, *Nates*.

SCAPHION, *Cranium*, *Papaver* (capsule.)

SCAPHIUM OCULARÈ, *Peteis Ocularis*, *Eye-glass*. (F.) *Bassin oculaire*, *Gondole oculaire*. A small porcelain, glass, or metallic vessel, used for applying lotions to the eye.

SCAPHO-CARPO-SUPER-PHALANGEUS POLLICIS, *Abductor pollicis brevis*.

SCAPHOID, *Scaphoides*, from *σκαφη*, 'a skiff,' and *ειδος*, 'form.' A name given to several parts.

1. OS SCAPHOIDES MANUS, *Os naviculare*, *Boat-like bone*. (F.) *Scaphoïde de la main*. The first bone of the first row of the carpus. The upper surface is convex, and articulated with the radius. The under and outer surfaces are also convex,—to be articulated with the trapezium and trapezoids. Between the upper and under cartilaginous surfaces, there is a *rough fossa* for the insertion of the capsular ligament. The anterior and inner surface has an *oval cavity*, where it is articulated with the os magnum, which gives name to the bone. There is a *process*, on the outer end of the bone, for the attachment of part of the anterior transverse ligament of the wrist.

2. OS SCAPHOIDES PEDIS, *Os naviculare*, *Boat-like bone*. (F.) *Scaphoïde du Pied*. This bone is situate at the forepart of the astragalus and inner part of the foot. The *posterior surface* forms a cavity, somewhat like that of a boat, for receiving the head of the astragalus. There is a prominence at the inner side of the bone, for the insertion of tendons, muscles, and strong ligaments. The forepart of the bone is convex, and divided into three articular surfaces for articulation with the ossa cuneiformia. Between the os naviculare and astragalus, the foot has its principal lateral and rotary motions; although each of the other joints of the tarsus contributes a little. Part of the tibialis posticus is inserted into it.

FOSSA SCAPHOIDES, (F.) *Enfoncement Scaphoïde*. A small cavity at the upper part of the internal ala of the pterygoid process, in which the peristaphylinus internus is attached.

SCAPHOÏDE DE LA MAIN, *Os scaphoides manus*—s. *du Pied*, *Os scaphoides pedis*.

SCAPHOÏDO-ASTRAGALAN, *Scaphoïdo-astragala'nus*. That which relates to the scaphoid bone and astragalus. The articulation of these bones is so called; and the ligament, which strengthens it, is termed the *Scaphoïdo-astragalan ligament*.

SCAPHOÏDO-CUBOID, *Scaphoïdo cuboida'us*. That which relates to the scaphoid and cuboid bones. The articulation of those bones is so called.

SCAPHULA, *Navicularis fossa*.

SCAP'ULA, *Scap'ulum*, *Plata*, *Omopla'ta*, *Homopla'ta*, *Scap'tula*, *Epino'tion*; the *Blade-bone*, the *Shoulder-blade*, (F.) *Omoplate*. An irregular, broad, flat bone, of a triangular shape, situate at the posterior part of the shoulder. It has, 1. A *posterior or dorsal surface*, or *Dorsum*; divided transversely into two parts, by a triangular process, called *Spine of the Scapula*; which

terminates by a considerable eminence, called *Acromion*. Above the spine, is the *Fossa supra-spinata*; below it, the *F. infra-spinata*. 2. An anterior or costal surface, or *Venter*; forming the *Fossa subscapularis*. 3. A superior or cervical edge, which is thin, and terminates, anteriorly, by a strong, curved apophysis, called the *coracoid process*. 4. A posterior or vertebral edge, called, also, the *base*. 5. An outer or axillary or inferior edge, having a thick, truncated angle, in which is the *glenoid cavity*. With this is articulated the head of the humerus. The glenoid cavity is separated from the body of the bone by a narrower part, called the *cervix* or *neck*. The edges or margins are, also, called *Costa*.

The scapula has three angles—an inferior, superior, and anterior.

SCAPULA. Humerus.

SCAPULAR, *Scapularis*, from *scapula*, 'the shoulder-blade.' That which relates or belongs to the scapula: *Scapulary*.

1. SCAPULAR APONEUROSIS. A broad, thin, aponeurosis, with decussating fibres; which is attached, above, to the spine of the scapula; below, to a crest between the *teres major* and *infra-spinatus*; within, to the spinal edge of the scapula; and which, at its middle, unites with the thin aponeurosis, that covers a part of the external surface of the deltoid.

2. The SCAPULAR ARTERIES. These are several.

a. The *Superior scapular*, *Superficial scapular* of Sömmering, *Dorsalis scapula superior*, *Transversalis scapula*, *T. Humeri*. This arises from the subclavian; and often from the inferior thyroid, or from a trunk common to it and the *posterior scapular* or *transverse scapular* or *cervical*. It passes behind the clavicle, above the superior edge of the scapula, and buries itself between the dorsal surface of that bone and the muscles inserted into it.

b. The *inferior scapular* or *common scapular*, or *internal scapular* or *subscapular artery*, *A. Thoracica axillaris* vel *alaris*, is of considerable size. It arises from the inferior part of the axillary artery, behind the brachial plexus—gives off several branches to the armpit, and divides into two branches:—the one, *Scapularis interna*, and the smaller of the two, is distributed, almost entirely, to the *serratus major* anticus, and *latissimus dorsi*; the other, the larger of the two, the *Dorsalis Scapula inferior* vel *Circumflexa Scapularis*, which distributes its branches to the subscapular and supra-spinal, and infra-spinal regions.

3. The SCAPULAR VEINS follow the same course as the arteries,—which they accompany.

SCAPULARY, from *scapula*. A broad, linen bandage, divided into two tails for three quarters of its length, the undivided extremity of which is attached to the posterior and middle part of a bandage carried round the body; each of the tails passing over a shoulder; and being attached to the anterior part of the body bandage, to prevent it from slipping down.

SCAPULO-HUMERAL. An epithet given to the *shoulder-joint*. It is an orbicular articulation, resulting from the reception of the head of the humerus into the glenoid cavity of the scapula. To keep the bones in connexion,

there are: 1. A very strong, enoidal capsular ligament; passing from the circumference of the glenoid cavity around the neck of the humerus. 2. A *fibro-cartilaginous ring*, called the glenoid ligament, and a synovial capsule.

SCAPULO-HUMERAL, *Teres major*—*s. Inuéro-olceranica*, *Triceps extensor cubiti*—*s. Hypoidien*, *Omohyoideus*—*s. Radial*, *Biceps flexor cubiti*—*s. Trochitérien*, *grand. Infra-spinatus*.

SCAPUS, Penis.

SCARABÆOLUS HÆMISPHERICUS, Coccus caeti.

SCARBOROUGH, MINERAL WATERS OF. *Scarborough Spa*. A celebrated English chalybeate, at Scarborough, in Yorkshire. One of the springs is a simple, carbonated chalybeate, like that of Tunbridge: the other has an admixture of purging salt. Scarborough, having the additional advantage of sea-bathing, is much frequented by invalids.

SCARIFICATION, *Scarificatio*, *Am'ychē*, (Galen,) *Am'yg'nos*, *Am'yx'is*, *Schasis*, *Catachasmos*, *Catachasmus*, *Encharux'is*, from *καταχωρεω*, 'to cut.' A small incision made into the skin with a lancet, bistoury, or scarificator, for different therapeutical purposes: as to draw blood, or to discharge some effused fluid.

When the scarifications are very superficial, and do not go farther than the skin, they are termed, by the French, *Mouchetures*.

SCARIFICATION, *Scarificatorium*. An instrument for making scarifications. It consists of a small brass box, of a cubical shape; in which 10 or 12 lancet points turn upon a common pivot. By means of a spring, all these blades can be made to issue at once, and make as many scarifications.

SCARIOLA, *Cichorium endivia*, *Lactuca scariola*.

SCARIOLE, *Cichorium endivia*.

SCARLATINA, from *scarlatto*, (l.) 'a deep red.' *Enanthesis Rosalia*, *Rosalia*, *Rossalia*, *Morbilli ignei*, *Morbus scarlatinosus*, *Febris scarlatinosa*, *Gutturis morbus epidemicus Foresti*, *Pur'pura*, *Typhus scarlatinus*, *Febris rubra*, *Rash-fever*, (F.) *Fièvre rouge*. The characteristic symptoms of scarlatina are:—a scarlet flush, appearing about the second day of fever, on the face, neck, and fauces; and progressively spreading over the body; terminating about the 7th day. Two great varieties may be reckoned;—the *S. simplex*, *S. febris*, *S. benigna*, in which the fever is moderate and terminates with the efflorescence; and prostration of strength being trifling, and the contagious property slight;—and the *S. Anginosa*, *S. Paristhmitica*, *S. Cyananchica*, in which the fever is severe; the throat ulcerated; the eruption later in its appearance and less extensive; often changing to a livid hue; the fever being highly contagious.

The *Scarlatina maligna* has been reckoned a variety of this, in its worst degree. It agrees with the *Cyananche maligna* of Cullen.

Scarlatina belongs to the *Major exanthemata*, (q. v.) and is a disease, chiefly, of children. The eruption differs from measles, in being an efflorescence, not raised above the cuticle. Measles, too, is attended with catarrhal symp-

toms, whilst the complication, in scarlatina, is cyanache.

The treatment of simple scarlatina need not be much. It must be antiphlogistic. If the throat is very much ulcerated, acid gargles and counter-irritants must be employed; and if the affection becomes manifestly typhoid, and the sore throat of a malignant character, the case must be treated like typhus gravior; along with antiseptic gargles of bark, acid, &c.

Anasarca, sometimes, supervenes on scarlatina, and requires attention. Purgatives are here demanded as well as the use of sorbefeacients, such as mercury and squill, &c.

SCARLATINA MILLIARIS, Rubeola—s. Pustulosa, Rubeola—s. Urticata, Urticaria.

SCATACRASIA, Scoracrasia.

SCELETOLOGIA, Skeletology.

SCELETON, Skeleton.

SCELETUM, Skeleton.

SCELONCUS, Phlegmatia dolens.

SCELOS, Leg.

SCELOTYRBE, Chorea, Porphyra nautica—s. Febrilis, see Subsultus tendinum.

SCEPARNOS, Ascia.

SCEPTRUM, Penis.

SCHASIS, Scarification.

SCHASTERION, Fleam, Lancet.

SCHIBA ARABUM, Artemisia santonica.

SCHERBET', *Sherbet', Serbet'*. A drink prepared by the Turks, Persians, &c., with sugar and the juice of acid fruits.

SCHERLIEVO, *Mal di Scherlievo, Mal di Breno, Mal di Fiume, Margarettizza, Morbus Croatus, M. fluminensis, Fulcadina, Malo di Scarliero, Scabies venerea contagiosa*. A name given to a particular form of syphilis, observed in Illyria. It is said to be capable of being communicated without immediate contact; and, that its principal symptoms are:—pains in the bones, ulceration of the fauces, pustules, and fungi in different parts of the body.

SCHEROMA. A dryness of the eye from the want of lachrymal secretion.—Dictionaries.

SCHIAS, Neuralgia femoro-poplitea.

SCHIDAKE'DON, from *σχίζω*, 'I cleave.' A longitudinal fracture of a bone.—Galen.

SCHINDALESIS, Schindylesis.

SCHINDALMOS, Schindylesis.

SCHINDYLE'SIS, *σχινδύλησις, Schindale'sis, Schindal'mos*. An articulation of bones—by furrowing, as it were; as in that of the bones of the septum narium with each other. Also, the act of splitting into small pieces. Hippocr.; from *σχινδύλω*, 'I split into small pieces.'

SCHINELÆ'ON, from *σχίμος*, 'the mastic tree,' and *ἐλαίον*, 'oil.' *O'leum lentiscinum*. Oil of mastic.—Dioscorides.

SCHINOS, Scilla.

SCHIZATRICH'IA, *Trichoschi'sis, Schizotrich'ia*, from *σχίζα*, 'a cleft,' 'a split.' The splitting of the hairs at their extremities.—J. P. Frank.

SCHNEIDERIAN MEMBRANE, Pituitary membrane.

SCHENANTHUS, *Juncus odoratus*.

SCHOLA, School.

SCHOOL, *Schola*. A place of education, (F.) *École*. In Europe, the large Medical Schools are usually attached to the universities. In England, however, there has been no medical

school of celebrity at either of the universities of Oxford or Cambridge; owing greatly to their provincial situation. Of late, two schools have existed in London, attached to the London university—University college and King's college. Excellent private schools have, however, long existed in that metropolis. The medical schools of Europe which have been most celebrated are those of Edinburgh, Leyden, Berlin, Halle, Tubingen, Paris, Montpellier, Bologna, Padua, Pavia, and Pisa. In the United States, the medical schools are numerous; at this time, not fewer than 30 or 40. Those most numerous attended are the medical department of the University of Pennsylvania, Jefferson Medical College of Philadelphia, the medical department of Transylvania University, at Lexington, Kentucky, and the Louisville Medical Institute.

SCHOOLEY'S MOUNTAIN, MINERAL WATERS OF. The waters of this New Jersey Spring are chalybeate. According to Dr. McNeven, they contain, extractive, muriate of soda, muriate of lime, muriate of magnesia, carbonate of lime, sulphate of lime, carbonate of magnesia, silix, and carbonate, and oxide of iron.

SCHOUSBÆA COCCINEA, *Cacoucia coccinea*.

SCHWALBACH, MINERAL WATERS OF. S. is a town of Germany, seated on the Aa, 32 miles west of Frankfurt. The waters contain muriate of soda, carbonates of lime and magnesia, iron, sulphate of lime, carbonic acid, and oxygen, &c. Employed as a tonic.

SCHWENDECK, MINERAL WATERS OF. These waters are about 5 leagues from Munich in Bavaria. They contain carbonic acid; carbonate, sulphate, and muriate of lime; muriate of magnesia; carbonate of soda, and oxide of iron, and are much used for cutaneous affections.

SCIATIC, Ischiatic.

SCIAT'IC, *Ischiaticus*; from *ισχίον*, 'the haunch.' A word formed by contraction from *ischiatic*, which latter is still used. See Ischiatic.

The great SCIATIC NOTCH, or FORAMEN, (F.) *Grande échancrure sciatique, ou grand trou sciatique*, is a large notch, at the posterior edge of each os innominatum, below the posterior and inferior iliac spine, which is converted into a foramen by the sacrum and sacro-sciatic ligaments.

The SCIATIC SPINE or *Spine of the Ischium*, or *Spinous process of the Ischium*, is a short, flat, pyramidal eminence on the os innominatum, above the preceding foramen; which gives insertion to the lesser sacro-sciatic ligament.

The LESSER SCIATIC NERVE, *Inferior gluteal branch of the sacral plexus, lesser fem'oro-poplite'al nerve*, (Cl.) (F.) *Nerf petit sciatique*, which seems especially formed by the 2d and 3d sacral, is given off from the lower part of the plexus, and escapes from the pelvis beneath the pyramidalis muscle. It gives branches to the glutæus maximus,—a *sciatic branch* or *infra-pelvic cutaneous*; which passes under the tuberosity of the ischium, and furnishes filaments to the glutæus maximus, and to the muscles of the perinæum, urethra, penis, scrotum, &c.—and a *posterior femoral cutaneous branch*, the fila-

ments of which traverse the femoral aponeurosis to be distributed on the skin of the posterior part of the thigh. The principal branch of the lesser sciatic nerve divides, near the ham, into two or three filaments, which descend under the integuments almost as far as the inferior part of the leg.

The GREAT SCIATIC NERVE, *Great femoropopliteal* (Ch.) (F.) *Grand nerf sciatique*, ought to be esteemed a continuation of the sacral plexus. It issues from the pelvis between the pyramidalis and superior gemellus; descends along the posterior part of the thigh; and, after having given branches to the gemini, quadratus, obturator externus, glutæus maximus, semi-membranosus, semi-tendinosus, biceps and third adductor muscles, it divides, about the inferior third of the thigh, into two branches; the one, named the *external popliteal*; the other the *internal*.

SCIATICA, Neuralgia femoro-poplitea.

SCIE, Saw.

SCIENTIA HERMETICA, Alchymy.

SCILLA, *Scilla maritima*, *Aschil*, *Schinus*, *Oculus Typhonis*, *Ornithogalum maritimum*, *Squilla*—the *squill* or *sea onion*.—The *Eye of Typhon*, (F.) *Ognon marin*. Family, Liliaceæ. *Scz. Syst.* Hexandria Monogynia. Native of Spain, Austria, &c.

The bulb or root of the squill has a bitter, nauseous taste, and is extremely acrid; inflaming the skin when rubbed on it. Its acrimony, on which its virtues depend, is destroyed by heat, drying, and keeping. It is extracted by vinegar, spirit, and water.

In large doses, the squill is emetic and purgative; in small doses, diuretic and expectorant. Its active principle has been called *scillitine*.

Dose, gr. j to v of the dried root, united or not with mercury.

SCINCUS, *σκινκος*. A species of *Saurus* or *Lacerta*, common in Egypt, and much extolled, by the ancients, as alexipharmic and aphrodisiac.

SCINTILLA VENERIS. A name given, by Paracelsus, to the impotence and loss of power in the limbs produced by syphilis.

SCIRRHE, Scirrhus.

SCIRRHOBLEPHARONCUS, Scleriasis.

SCIRRHOCELE, Scirrhus.

SCIRRHOMA, Scirrhus.

SCIRRHOSIS, Scirrhus.

SCIRRHOS SARCOMA OF ABERNETHY. *Emphyma sarcoma scirrhosum*. Hard, rigid, vascular infraction of glandular follicles; indolent, insentient, glabrous; sometimes shrinking and becoming more indurated. Found in glandulous structures.

SCIRRHUS TESTICULI, Sarcocele.

SCIRRHUS, *Squirrhus*, *Scirrho'ma*, *Scirrhosis*, *Induratio maligna*, *Scirrhocelc*, *Schirrus*, *Sclerus*; from *σκινκος*, 'marble,' (F.) *Squirre*, *Scirrhc*, *Skirre*. A disease, so called from the hardness that characterizes it. It is a state of induration, of a peculiar kind, affecting glandular structures generally, but capable of occurring in other textures. It usually precedes carcinoma, of which it may, indeed, be considered as the first stage. Scirrhus must not be confounded with the induration which succeeds inflammation, although the two states are often

complicated, and may stand, occasionally, in the relation of cause and effect to each other.

Scirrhus is ordinarily accompanied by violent, shooting pains. It is, also, irregular on its surface; and, when cut into, has a bluish or grayish-white colour.

When the surgeon is satisfied of the existence of scirrhus, he had better remove it at once. No other treatment seems to possess much advantage. Galen uses the term *Scirrhosis* for a livid excrescence, caused by inflammation.

SCISSORS, *Forfex*, *Forpex*, *Psulis*, *Tomis*. (F.) *Ciseaux*. A well known instrument in common use, and often employed in surgery. Scissors are composed of two cutting blades, crossing each other and moving upon an axis. They are *straight* or *curved*. Sometimes the curve is on the flat side, when they are called in France *Ciseaux à cuiller*; at others, on their edges. The scissors, bent so that the blades make an obtuse angle with the handles, are also much used. They are called in France *Ciseaux coudés*.

Scissors are used for dividing soft, loose, isolated parts, which it would be difficult to stretch and to cut with the bistoury. They are employed, likewise, in the operation for harelip, and for removing warts, fungous excrescences, &c.

SCISSURÆ, Rhagades.

SCISSURE DE GLASER, Fissure glenoid—*s. de Santorini*, Santorini, fissure of.

SCLAREA, *Salvia sclarea*.

SCLEREMIA, Induration of the cellular tissue.

SCLEREMUS, Induration of the cellular tissue.

SCLERIA, Scleriasis.

SCLERIASIS, *Sclero'ma*, *Sclero'sis*, *Scleria*, *Sclerysmus*, from *σκληρος*, 'hard.' Any kind of hardness or induration. Sometimes hardness of the eyelids, *Callositas palpebrarum*, *Scirrhoblepharoncus*; at others, hardness of the genital organs of the female;—probably synonymous with scirrhus.—Galen. Paulus.

SCLERODES, Sclerotic.

SCLEROMA, Scleriasis.

SCLERONYXIS, Scleroticonyxis.

SCLEROPHTHALMIA, Hordeolum.

SCLEROS, Hard.

SCLEROSARCOMA, from *σκληρος*, 'hard,' and *σαρκωμα*, 'a fleshy tumour.' A hard, fleshy tumour, seated on the gums, and resembling a cock's comb.

SCLEROSIS, Scleriasis.

SCLEROTIC, *Sclero'tica*; from *σκληροω*, 'I harden.' *Cornica opa'ca*, *Sclero'des*, *Tunica dura* seu *albuginea* seu *duri'or et crass'ior* seu *cal'tima* seu *alba* seu *can'dida* seu *inomin'dta oculi*, *Sclero'tis*. (F.) *Sclérotique*, *Blanc de l'œil*. A hard, resisting, opaque membrane; of a pearly white colour and fibrous nature, which covers nearly the posterior four-fifths of the globe of the eye, and has the form of a sphere, truncated before. It is strengthened by the expansion of the muscles of the eye; to which expansion many anatomists have given the name *Tunica albuginea*.

The sclerotic is penetrated, posteriorly, by a round opening, for the passage of the optic

nerve; and, anteriorly, it has a much larger opening, into which the transparent cornea is received. There are, besides, many small oblong apertures in it for the passage of nerves and vessels, proceeding to the interior of the eye. In the fœtus, the sclerotic may be separated into two very distinct laminae.

SCLEROTICA CERATOIDES, Cornea.

SCLEROTICONYX'IS, *Scleronyx'is*, *Scleronyx'is*, from *σκληρος*, 'hard,' and *ρυξις*, 'puncturing.' Perforation of the sclerotica in the operation for cataract by depression.

SCLEROTICUS, Indurans.

SCLÉROTIQUE, Sclerotic.

SCLEROTIS, Sclerotic.

SCLEROTITIS, *Rheumat'ic ophthal'mia*, *Ophthalmia arthrit'ica*. Inflammation of the sclerotic coat of the eye.

SCLEROTIUM CLAVUS. See Ergot.

SCLERUS, Scirrhus.

SCLERY'SMA, *σκληρυσμα*. Induration; also, induration of the liver.

SCLERYSMUS, Scleriosis.

SCLIRUS, Scirrhus.

SCLOPETOPLAGÆ, Wounds, gunshot.

SCOB'S, *Prisma*, *Xysma*, a shaving, *Ramen'tum*, *Rasu'ra*. Also, an alkali; and the scoria of any metal.

SCODINEMA, Pandiculation.

SCOLECIASIS, Helminthiasis.

SCOLIO'SIS, *σκολιωσις*, from *σκολιος*, 'crooked.' A distortion of the spine. See Hump.

SCOLOPENDRIA, Asplenium ceterach.

SCOLOPENDRIUM OFFICINARUM, Asplenium scolopendrium.

SCOLOPOMACHÆRION, from *σκολοπαῖς*, 'the woodcock,' and *μαχαίρα*, 'a knife,' so called because it is bent a little at the extremity, like a woodcock's bill. A sort of blunt-pointed bistoury.—Scultetus.

SCOLYMUS SATIVUS, Cynara scolymus.

SCOOP. Teut. *Schoepe*. *Cochlea'ra*. (F.) *Curlette*. A surgical instrument of the shape of a spoon, which is used for the extraction of certain foreign bodies. The scoop is often employed to extract balls, impacted in the soft parts; to remove calculi from the urinary bladder in lithotomy, &c. A small scoop is, sometimes, used to extract foreign bodies from the meatus auditorius externus, nasal fossæ, &c.

SCOPE REGIA, Ruscus.

SCOPE, *σκοπη*, *Scopia*, *σκοπια*, *Scopus*, *σκοπος*, from *σκοπεω*, 'I look around.' A common suffix to words meaning 'view and inspection,' as *cranoscopy*, *stethoscopy*, &c.

SCOPTULA, Scopula.

SCOPULA, Brush.

SCOR, Excrement.

SCORACRA'SIA, *Scoracra'tia*, *Scatacr'd'sia*, *Scatacrati'a*, *Copracra'tia*; from *σχωρ*, 'the excrement,' and *ακρασιη*, 'debility.' Want of power to retain the fæces. Involuntary evacuation of the fæces.

SCORBUT, *Porphya nautica*, *Purpura hæmorrhagica*.

SCORBU'TIC, *Scorbu'ticus*. That which belongs to scurvy. One affected with scurvy.

SCORBUTUS, *Porphya nautica*—s. *Nauticus*, *Porphya nautica*.

SCORDINEMA, Carebaria, Pandiculation.

SCORDINISMOS, Pandiculation.

SCORDIUM, Teucrium scordium.

SCORITH, Sulphur.

SCORODON, Allium.

SCORPIO N, *Scorpio*, from *σκορπιου*, 'I puncture.' A genus of insects, having a sting at the extremity of the tail, with which they make dangerous wounds. An Oil of Scorpion was once made from them, which is not now used.

SCORTUM, Scrotum.

SCORZONE'RA, *S. hu'milis*, *Escorzone'ra*, *Viper'ria*, *Serpent'ria Hispan'ica*, *Offic'inal viper's grass*, *Viper's grass*, *Goat's grass*. Family, Cichoraceæ. *Sec. Syst.* Syngenesia Polygamia. The roots have been used as alexipharmics, and in hypochondriacal disorders and obstructions of the viscera. The root of the *Scorzoneria Hispanica* is esculent, but inefficacious as a drug.

SCOTASMA, Scotodynia.

SCOTODYN'IA, *Scotodinia*, *Scoto'mia*, *Dinus Scoto'ma*, *Scotoma*, *Scotodinē*, *Tenebrico'sa verti'go*, *Scotos*, *Scotas'ma*, *Scoto'sis*. Giddiness, with impaired sight, often succeeded by headache. See Vertigo.

SCOTOMIA, Scotodynia.

SCOTOS, Scotodynia.

SCOTOSIS, Scotodynia.

SCOTT'S ACID BATH, *Nitro-muriatic acid bath*. A bath of dilute Aqua Regia, employed by Dr. Scott, of India, as a remedy in hepatic diseases. Three pints by measure of muriatic acid, and two of nitric acid, are mixed to form the Aqua Regia. In preparing this for use, a pint of it is mixed with an equal quantity of water. The acid bath consists of three ounces of this dilute acid to every gallon of water.

SCROBICULUS, *Fossette*.

SCROBICULUS CORDIS, *Anticar'dium*, *Procar'dium*, (F.) *Fossette du cœur*, (q. v.) *Avant-cœur*, *Anticœur*. The pit of the stomach. The depression at the anterior part of the abdomen, below the xiphoid cartilage.

SCROFULA, *Scroph'ula*, *Scrophula*; from *scrofula*, 'a sow;' because swine were presumed to be subject to a similar complaint. *Scrophulo'sis*, *Morbus scrophulo'sus*, *Vitium scrophulo'sum*, *Cachex'ia seu Dyscr'asia scrophulo'sa*, *Paratroph'ia glandulo'sa*, *Struma*, *Chærus*, *Coiras*, *Chraas*, *King's evil*. (F.) *Scrophules*, *Écrouelles*, *Humeurs froides*, *Tubercules des glandes lymphatiques*. A state of the system, characterized by indolent, glandular tumours, chiefly in the neck; suppurating slowly and imperfectly, and healing with difficulty, the disease ordinarily occurring in those of a sanguine temperament, with thick upper lip, &c. The tumours, after suppuration, degenerate into ulcers; which, in process of time, cicatrize, leaving scars. The internal organs are apt to be attacked in those disposed to scrofula; hence they are often the subjects of phthisis and mesenteric affections. Scrofula is hereditary; and is, frequently, excited by insufficient or improper regimen, and by a close, confined air during the first years of existence.

The best treatment is:—to strengthen the

system by animal diet; pure air, and exercise, cold bathing, or sea-water bathing, &c.

**SCROFULAIRE**, *Scrophularia nodosa*—s. *Aquatique*. *Scrophularia aquatica*.

**SCROPHULA**, *Scrofula*—s. *Mesenterica*, *Tabes mesenterica*.

**SCROPHULARIA AQUATICA**, *Betonica aquatica*, *Ficaria*, *Ferraria*, *Castran'gula*, *Greater Water Figwort*, *Water Bel'ony*. (F.) *Scrofulaire aquatique*. The leaves are celebrated as correctors of the bad flavour of senna. They were, at one time, regarded as eminently antiscrofulous, stomachic, and carminative.

**SCROPHULARIA FÆTIDA**, *Scrophularia nodosa*.

**SCROPHULARIA MINOR**, *Ranunculus ficaria*.

**SCROPHULARIA NODOSA**, *Figwort*, *Kennelwort*, *Scrophularia fatida*, *Scrophularia vulgaris*, *Millemorbia Scrophularia*. (F.) *Scrofulaire*, *Herbe aux érouelles*. The root and leaves of this plant have been celebrated, both as an internal and external remedy, against inflammations, piles, scrofulous tumours, ulcers, &c.

**SCROPHULARIA VULGARIS**, *S. nodosa*.

**SCROPHULES**, *Scrofula*.

**SCROPHULOSIS**, *Scrofula*.

**SCROTOCELE**. A hybrid term; from (L.) *Scrotum*, and *κύλη*, 'a tumour.' *Hernia scrotalis*, *Scrotal hernia*. Inguinal hernia, descending into the scrotum—*Oscœocele*, (q. v.)

**SCROTUM**, *Scrotum*, (a leather purse,) *Oschon*, *Och'cus*, *Perin*, *Scortum*, *Mursupium*, *Bursula*, *Bursa testium seu virilis*, *Oschcus*, *O'chea*, the *Purse*, *O'scus*. (F.) *Les bourses*. The integuments which cover the testes. These are nothing more than a prolongation of the skin of the inner part of the thighs, perinæum, and penis. The skin is remarkable for its brown colour, for the numerous rugæ, especially when the scrotum is contracted; for the great number of sebaceous follicles it contains; and for the long and few hairs, which issue from it in the adult. The scrotum is divided into two equal parts by a raphe, which extends from the anus to the root of the penis. Its organization is similar to that of the skin of other parts of the body, except that the chorion is thinner.

**SCRUPLE**, *Diobolon*, *Scrupulus*; a weight of twenty grains, Troy; twenty-four grains, Poids de marc.

**SCURF**, Sax. *scuff*, Teut. *Schorft*. *Furfura*. Small exfoliations of the cuticle are so called.

**SCURFY**, *Furfuraceous*.

**SCURVY OF THE ALPS**, *Pellagra*—s. *Land Purpura hæmorrhagica*—s. *Petechial*, *Purpura simplex*—s. *Sea*, *Porphyra nautica*—s. *Grass*, common, *Cochlearia officinalis*—s. *Grass*, lemon, *Cochlearia officinalis*—s. *Grass*, wild, *Cochlearia coronopus*.

**SCUTELLA**, *Cup*.

**SCUTELLARIA GALERICULATA**. *Tertiana'ria*, *Skull-cap*. (F.) *Cassidebleue*. *Family*, *Personœ*. *Sex. Syst.* *Didynamia Angiosperma*. This plant has a bitter taste and a garlic smell. It has been esteemed especially serviceable in Tertian ague.

**SCUTICULA DIGITORUM MANUS**, Phalanges of the fingers.

**SCUTUM CORDIS**, *Sternum*.

**SCYBALA**, plural of *Scybalon*, *σκυβαλον*, 'dung.' *Enterolithus Scybalum*, *Excrementa Alvi siccid'ra*. Hard fecal matters, discharged in round lumps.

**SCYPHIOPHORUS PYXIDATUS**, *Lichen pyxidatus*.

**SCYPHUS AUDITORIUS**, *Infundibulum of the Cochlea*—s. *Cerebri*, *Infundibulum of the brain*—s. *Viussenii*, *Infundibulum of the Cochlea*.

**SCYROS**, *Callosity*.

**SCYTATIDES DIGITORUM MANUS**, Phalanges of the fingers.

**SCYTHICA**, (RADIX,) *Glycyrrhiza*.

**SCYTITIS**, *Cytitis*.

**SEA-AIR**. The air, in the neighbourhood of the sea, contains saline particles commingled with it, which render it a valuable change for scrofulous and debilitated individuals. The sea and sea-coast are usually, also, more equable in their temperature than places inland.

**SEA-SICKNESS**, *Nausea marina*.

**SEAL**, **SOLOMON'S**, *Couvallaria polygonatum*.

**SEARCHING**, *Sounding*; from (F.) *Chercher*. The operation of ascertaining whether a patient has a stone in the bladder, by the introduction of a metallic instrument.

**SEASONING**, *Acclimation*.

**SEAT BONE**, *Ischion*.

**SEBA'CEOUS**, *Sebaceous*; from *scbum*, 'suet.' That which has the nature of suet.

The **SEBA'CEOUS GLANDS**, **FOL'LICLES** OR **CRYPTS**, *Miliary glands*, are small hollow organs of a rounded or pyriform shape, seated in the substance of the skin, and opening on its surface by a small, excretory duct; furnishing a yellow, unctuous humour, having some analogy with suet, which is destined to lubricate the surface of the body.

Follicles of a similar nature exist around the corona glandis of the male, and under the skin of the labia majora and nymphæ of females. They secrete a sebaceous matter, which emits a peculiar odour; and, hence have been called *Glandule odorifera*.

**SEBESTIER MYXA**, *Sebestina*.

**SEBESTYNA**, *Cordia myxa*, *Sebes'ten*, *Sebsten*, *Myxa*, *Cornus sanguinea*, *Prunus sebestena*, *Smooth-leaved Cordia* or *Assyrian plum*. (F.) *Sebestier myxa*. The dark, black fruit of the *Sebestina* possesses glutinous and aperient qualities, and is exhibited in decoction, in various diseases of the chest.

**SEBSTEN**, *Sebestina*.

**SEBUM**, *Pinguedo*, *Sevum*.

**SECA'LE**. *S. cereal'è*. The *Rye plant*. (F.) *Sigtic*. Rye is chiefly used as an article of diet, particularly in the northern parts of Europe, where they, also, extract a spirit from it. The grain is disposed to aescency: and hence its internal use, at first, generally produces a laxative effect.

**SECALE CORNUTUM**, *Ergot*—s. *Luxurians*, *Ergot*.

**SECALIS MATER**, *Ergot*.

**SECESSIO FÆCUM**, *Defecation*.

**SÈCHE**, *Sepia*.

SECLUSORIUM, Sac.

SECONDARY, from *secundus*, 'the second.' Something that acts subordinately to another; as the *secondary symptoms* of a disease; i. e. those which supervene on the *primary*.

SÉCONDIVES, Secundines.

SECRETION. *Secretio*, *Apoc'risis*, from *secer'nerē*, 'to separate.' An organic function, which is chiefly executed in the glands, and consists in an elaboration or separation of the materials of the blood, at the very extremities of the arterial system, or rather of the vascular secretory system; and which differs, in each organ, according to its particular structure; hence the formation of different fluids;—bile, saliva, urine, milk, &c. The secretions are of three kinds:—*exhalant*, *follicular*, and *glandular* (q. v.)

SECT, METHODICAL, Methodists.

SECTIO ALTA, see Lithotomy—s. Cadaveris, Autopsia cadaverica—s. Franconiana, see Lithotomy—s. Hypogastrica, see Lithotomy—s. Lateralis, see Lithotomy—s. Mariana, see Lithotomy—s. Nympharum, Nymphotomy—s. Renalis, Nephrotomy—s. Vesicalis, Lithotomy.

SECUNDÆ, Secundines.

SECUNDINÆ, Secundines.

SECUNDINES. *Hystera*, *Dev'tera*, *Dev'ter'ia*, *After-birth*, *Secundæ*, *Secundina*. (F.) *Arrière-faix*, *Sécondines*, *Déliere*. All that remains in the uterus, after the birth of the child,—viz. the placenta, a portion of the umbilical cord, and the membranes of the ovum. These are, commonly, not expelled till some time after the birth of the fœtus; hence their name. See Deliverance.

SECUNDUS PROPRIORUM AURICULÆ, Retrahens auris.

SEDANTIA, Sedatives.

SEDATIVES. *Panonia*, *Sedan'tia*, *Adc'ta*, (F.) *Calmants*, *Temperants*, from *sedo*, 'I settle or assuage.' Medicines which directly depress the vital forces, and which are consequently employed whenever it is necessary to diminish preternaturally increased action. The chief reputed sedatives are: Acidum Hydrocyanicum, Acidum Hydro-sulphuricum, Tabacum, Missio Sanguinis, and certain gases by inhalation, as azote, carbonic acid, (?) carburetted and sulphuretted hydrogen.

SEDE ATTOLLENS, Levator ani.

SEDES, Anus, Excrement—s. Procidua, Proctocele.

SEDIMENT. *Sedimentum*. (F.) *Dépôt*. A deposit, formed by the precipitation of some one or more of the substances held in solution or suspension by a liquid. That which is formed in urine, at the time of cooling, has been called *Hypo'stasis*, *Hypost'ema*, *Resident'ia*, *Subsident'ia*. This sediment or deposit varies in different states of the system. In calculous affections, it is one of the most important objects of attention.

SEDLITZ, MINERAL WATERS OF. *Seidlitz* or *Sejdschütz water*. Springs in Bohemia, near Prague, which are simple salines. They contain a large quantity of sulphate of magnesia, a little sulphate of soda and sulphate of lime, carbonic acid, carbonates of lime and magnesia, and a resinous matter. (?) They are employed, as purgatives, in a multitude of diseases.

SEDLITZ POWDERS may be formed of *Soda tartarizata* ʒij, *Soda carbon*. ʒij, in one paper *Acid tartaric*. xxxv, in another. For half a pint of water.

SÉDON BRÛLANT, Sedum—s. *Reprise*, Sedum telephium.

SEDUM. *Sedum ac'rē*, *Illece'bra*, *Vermicul'd'ris*, *Piper miral'le*, *Sedum minus*, *Semperv'ivum ac'rē*, *Wall pepper*, *Stone crop*, *Ac'chryson*, *Jenion*. (F.) *Joubarbe âcre*, *Orpin brûlant*, *Vermiculaire brûlante*, *Sédon brûlant*. Family, Crassulacææ. *Sex. Syst.* Decandria Pentagynia. In its recent state, it is very acrid, and proves both emetic and cathartic. Externally, in the form of cataplasm, it produces vesications and erosions. It has been recommended in cancerous and malignant ulcers.

SEDUM, Saxifraga granulata—s. Majus, Sempervivum tectorum—s. Minus, Sedum.

SEDUM TELEPHIUM, *Faba crassa*, *Cras'sula*, *C. Major*, *Illece'bra major*, *Tele'phium*, *Fuba'ria cras'sula*, *Anacam'psos*, *Orpine*. (F.) *Sédon reprise*, *Grand orpin*, *Fève épaisse*, *Joubarbe des vignes*, &c. Formerly used as a cataplasm in cuts, hemorrhoids, corns, whitlows, &c.

SEED, Sperm.

SEGRAY, MINERAL WATERS OF. Near Pithiviers, in Gâtinais, in the French department of Loiret, there is a chalybeate spring, which has some reputation.

SEIGLE, Secale—s. *Ergot'e*, Ergot.

SELN, Uterus, see Mamma.

SEIRIASIS, *Coup de soleil*.

SEKISKAYAVODKA. See Spirit.

SEL, Sait—s. *Admirable de Lemery*, Magnesiæ sulphas—s. *Admirable perlé*, Soda, phosphate of—s. *de Cuisine*, Soda, muriate of—s. *de Derosne*, Narcotine—s. *d'Egra*, Magnesiæ sulphas—s. *d'Opium*, Narcotine—s. *de Saturne*, Plumbi superacetas—s. *de Verre*, see Vitrum—s. *Volatil d'Angleterre*, Ammonia carbonas.

SELAGO, Camphorosma monspeliaca.

SELENE, Moon.

SELENIASIS, Somnambulism.

SELENIASMUS, Somnambulism.

SELENOGAMIA, Somnambulism.

SELERY, Apium graveolens.

SELF-HEAL, Prunella.

SELV'BRA, *Sembella*, half a pound. Six ounces. Troy; eight, Avoirdupois.

SELINVTES, σελινιτης. Wine impregnated with the seeds of the *σελινον* or *small-age*.—Dioscorides.

SELLA, S. turcica—s. Equina, S. turcica—s. Sphenoidalis, S. turcica.

SELLA TURCICA, *Ephipp'ium*, *Fossa Pituit'ria*, *Turkish Saddle*, *Cella Turcica*, *Sella*, *S. equina* seu *sphenoida'lis*, (F.) *Selle Turcique* ou *du Turc*. A depression at the upper surface of the sphenoid bone, which is bounded, anteriorly and posteriorly, by the clinoid processes; and lodges the pituitary gland. It is so called from its resemblance to a *Turkish saddle*.

SELLA TURCICA, Pituitaria fossa.

SELLE TURCIQUE, Sella turcica—s. *du Turc*, Sella turcica.

SELS NEUTRES, Neutral salts.

SELTZ or SELTZER, MINERAL WATERS OF. Cold, acidulous springs, the source of which is at Seltz, nine leagues from Strasburg, and in the Department of the Bas-Rhin.

They contain carbonates of lime, magnesia, and soda, muriate of soda, and much carbonic acid. They are refrigerant, tonic, diuretic, and aperient.

**ARTIFICIAL SELTZER WATER** may be made from *murioi. acid.* gr. xxxv, *water* lbj, *white marble*, gr. iij. Stop up till dissolved. Add *carbonate of magnesia*, gr. v, and, after some time, *subcarbonate of soda*, gr. xxxij. Close it till used.

**SEMBELLA**, *Selibra*.

**SEMEICARPUS ANACARDIUM**, *Avicennia tomentosa*.

**SEMEIOL'OGY**, *Semeiol'ogē*; *Semeiology*, or *Semioticēz*, from *Semeio'sis*, σημειωσις, 'signification,' 'designation,' (F.) *Sēmeiotique*. The branch of pathology, whose object is an acquaintance with the signs of disease.

**SEMEION BOETHEMATICUM**, *Indication*.

**SEMEIOSIS**, *Semeiology*.

**SEMEIOTIQUE**, *Semeiology*.

**SEMEN**, *Sperm*—s. *Badian*, *Illicium anisatum*—s. *Cinā*, *Artemisia santonica*—s. *Contra*, *Artemisia santonica*—s. *Contra vermes*, *Artemisia santonica*—s. *Masculinum seu virile*, *Sperm*—s. *Sanctum*, *Artemisia santonica*—s. *Zedoaria*, *Artemisia santonica*.

**SEMENTINA**, *Artemisia santonica*.

**SEMI**, from *ἡμισ*, 'half.' *Semi* or *demi*, in composition, universally signifies 'half'; both in French and English.

**SEMI-CIRCULI OSSEI**, *Semicircular canals*.

**SEMICIRCULAR**, *Semicircula'ris*. That which represents the half of a circle.

The **SEMICIRCULAR CANALS**, *Canales semicircula'res* seu *tubiformes seu circula'res*, *Semicirculi ossei*, *Funes seu Canaliculi semi-annula'res*, (F.) *Canaux demi-circulaires*, are seated in the pars petrosa of the temporal bone, and open into the vestibule, behind which they are situate. They are three in number, of which one is *superior* or *vertical*; another *posterior* or *oblique*; and the third *exterior* or *horizontal*. Their parietes are formed of a bony, compact, hard plate. Their uses in audition are not known: at their termination they have the elliptical arrangements, called *ampullæ*; and by both extremities they open into the vestibule, in the sac at its superior part—the *Sacculus Ellipticus*, *Alveus communis*, *Utricula*, *Sinus* or *Alveus utriculo'sus*, *Sacculus vestibuli* or *Median sinus*. In front of the S. ellipticus, nearer the cochlea, and opposite the foramen ovale, is the *Sacculus spher'icus* or *sacculus*.

**SEMI-CON'GIUS**. Half a gallon, or four pints.

**SEMI-CU'PIUM**, *Inses'sio*, *Inces'sio*, *Eneathis'ma*, *ενηαθισμα*, *Èreathis'ma*, (F.) *Demi-bain*. A half-bath, or such as receives only the hips or extremities.

**SEMI-CUPIUM**, Bath, half—*semi-fibulæus*, *Peronæus brevis*—*semi-interosseus indicis*, *Abductor indicis*—*semi-interosseus pollicis*, *Opponens pollicis*.

**SEMILU'NAR**, *Semiluna'ris*, (F.) *Demi-lunaire* or *Sémi-lunaire*. Having the shape of a half-moon.

The **SEMILUNAR CARTILAGES**, or *Semilunar fibro-cartilages*, are two fibro-cartilages, which

exist between the condyles of the os femoris and the articular surfaces of the tibia. The innermost, which is longer from before to behind than transversely, is nearly semicircular. The outermost forms almost an entire circle; an arrangement, in both cases, corresponding to the different surfaces of the tibia. They are thicker at their outer circumference, which is convex, than at the inner, which is concave and very thin. Both arc inserted, before and behind, into the spine of the tibia, by means of fibrous fasciæ.

The **SEMILUNAR GANGLION**,—*Ganglion abdomina'le* seu *splanchnicium* seu *transversum* seu *solarē*, *G. surrenal*, (Ch.) belongs to the great sympathetic. These ganglia present considerable variety, and are deeply situate in the abdomen, above and behind the supra-renal capsules. They correspond, posteriorly, to the pillars of the diaphragm and the aorta. They have the shape of a crescent reversed, often surrounded by other ganglia of a smaller size.—From their periphery the numerous filaments proceed, which go to the formation of the solar plexus.

**SEMILUNAR VALVES**, *Sigmoid valves*—s. *Masculatus*, *Eunuch*.

**SEMI-MEMBRANO'SUS**, *Ischio-popliti-femorāl*, *Ischio-popliti-tibial*. (Ch.) (F.) *Demi-membraneux*. A muscle situate at the posterior part of the thigh. It is flat, thin, narrow, and aponeurotic in its upper third; broader and fleshy in the middle, and tendinous below. It is attached above to the tuberosity of the ischium; and below—by a tendon, which has three divisions—to the outer condyle of the femur, and to the posterior and inner part of the internal tuberosity of the tibia. This muscle is a rotator inwards, and a flexor of the leg. It can also bend the thigh upon the leg. In standing, it maintains the pelvis in position, and can even draw it downwards.

**SEMI-NERVOSUS**, *Semi-tendinosus*—*semi-orbicularis*, *Orbicularis oris*—*semi-pestis*, *Typhus*.

**SEMI-SICIL'ICUS**. A weight of one drachm or three scruples.—*Rhodium*.

**SEMI-SPEC'ULUM**. An instrument used for dilating the incision made into the neck of the bladder in the operation of lithotomy.—*Fabricius Hildanus*.

**SEMI-SPINALIS COLLI**, *Transvers' so-spinalis Colli*, *Spinalis cervicis*, *Spinalis Colli*, *Transvers' alis Colli*, *Transverso-spinal*. (F.) *Demi-épineux* ou *transversaire-épineux du cou*. This muscle arises from the transverse processes of the six uppermost dorsal vertebræ, by an equal number of distinct tendons, which run obliquely under the complexus, and is inserted into the spinous processes of all the cervical vertebræ, except the first and last. Its *action* is, to extend the neck obliquely backwards and to one side.

**SEMI-SPINALIS EXTERNUS**, *Semi-spinalis dorsi*.

**SEMI-SPINALIS DORSI**, *Semi-spinalis exte'rnus*, *Transvers' so-spinalis dorsi*, *Semi-spina'tus*, (Riolan.) *Transverso-spinal*, (F.) *Demi-épineux du dos*, *Transversaire-épineux du dos*. This muscle arises from the transverse processes of the seventh, eighth, ninth, and tenth dorsal vertebræ, by as many distinct tendons, which soon

grow fleshy; and then, again, become tendinous, and are inserted into the spinous processes of the sixth or seventh uppermost dorsal, and two lowest cervical vertebrae, by as many tendons. Its *action* is, to extend the spine obliquely backwards.

SEMI-SPINALIS INTERNUS, Transversalis dorsi —s. Spinatus, Longissimus dorsi, Semi-spinalis dorsi.

SEMI-TENDINOSUS, *Semi-nerveus*, *Ischia-crèti-tibial*, *Ischia-prètibial*, (Ch.) (F.) *Demi-tendineux*. This muscle is situate at the posterior part of the thigh. It extends obliquely downwards and inwards, from the tuberosity of the ischium—to which it is attached by a flat tendon, common to it and the biceps—as far as the posterior and inner part of the tibia, to which it is attached by means of another round tendon. Its fibres are commonly interrupted by an aponeurosis. Its *uses* are the same as those of the semi-membranosus.

SEMI-TERTIANA, Hemitritea—s. *tierce*, Hemitritea—s. *vir*, Eunuch.

SEMILLA DEL GUACHARO. Various kinds of hard and dry fruits, found in the stomachs of the young Guacharoes, a sort of nocturnal bird;—a celebrated South American remedy in ague.

SEMINA FRIGIDA MAJORA. The *greater cold seeds*. The ancients gave this name to the emulsive seeds of the cucumber, melon, gourd, and water-melon.

SEMINA FRIGIDA MINORA. The *lesser cold seeds*. The ancients gave this name to the seeds of the lettuce, purslane, endive, and chicory.

SEMINALIS, Spermatic.

SEMINIFEROUS, from *semen*, 'sperm,' and *fero*, 'I carry,' *Seminiferus*. An epithet given to the vessels which secrete and convey the seminal fluid.

SEMIOLGY, Semeiology.

SEMIOTICE FACIEI, Physiognomy, Semeiology.

SEMPERVIVUM ACRE, Sedum.

SEMPERVIVUM TECTORUM, *Hause-Leek*, *Sedum majus*, *Aizoön*, *Beialhalalen*, *Buphthalmus*, *Barba Javis*, *Sengreen*, *Agriocin'ara*, *Andrachara*, *Chrysoesper'mum*, (F.) *Joubarbe des toits*. The leaves have a mild, subacid austeriy, and are often applied to bruises and old ulcers.

SEMUNCIA, Hemiongion.

SENA, Cassia senna.

SENÉ, Cassia senna—s. *Faux*, *Colutea arborescens*.

SENECIO, *S. vulgaris*, *Erig'erum*, *Cor'talon*, *Erigeron*, *Groundsel*, (F.) *Senecan commun*. Family, Corymbifera. *Sex. Syst.* Syngenesia Polygamia Superflua. A common plant in Europe; frequently applied, bruised, to inflammations and ulcers, as refrigerant and antiscorbutic.

SENECIO JACOBÆA, *Jacobæa*, *St. James' Wort*, *Ragwort*, (F.) *Jacobée*. The leaves have a roughish, bitter, subacid, and extremely nauseous taste. A decoction has been used in dysentery. A poultice of the leaves has been recommended in rheumatic affections; and a decoction of the root has been often employed in cases of wounds and bruises.

SENEÇON COMMUN, Senecio.

SENECTA AN'GUIUM. The cast-skin of a serpent. A decoction of it is said to cure deafness!

SENECTUS, *Geras*, *Old age*, (F.) *Vicillesse*. The last period of life, commencing, according to some, at 60 years of age, but varying according to numerous circumstances. It is characterized by the progressive diminution of the physical and moral faculties.

SENECTUS ULTIMA, Decrepitude.

SENEGA ROOT, Polygala senega.

SENEGAL, GUM. The exudation from the *Mimosa Senegal*, Family, Leguminosæ. *Sex. Syst.* Polygamia Monœcia, which grows in the country of Africa, through which the river Senegal runs. It is in loose or single drops, much larger than Gum Arabic, or the gum which exudes from the cherry tree; and is much more difficult of solution than the former.

SENEGINE. See Polygala senega.

SENEKA, Polygala senega.

SÉNÉVÉ, Sinapis.

SENGREEN, Sempervivum tectorum.

SENNA, Cassia senna—s. Alexandrina, Cassia senna—s. American, Cassia marilandica—s. Bladder, *Colutea arborescens*—s. Essence of, prepared, Selway's, see Infusum sennæ compositum—s. Italica, Cassia senna.

SEMS, Sense.

SENSATION, *Sens'tio*, *Æsthéma*. An impression, caused by external bodies, on the organs of the senses, and transmitted to the brain, which appreciates it. It is not necessarily, however, confined to bodies external to us; for we can receive an impression by touching any part of our own body. The body which communicates the impressions, needs but to be external to the part impressed.

Sensations are divided into *external*, *internal* and *morbid*. The *external* are communicated by the five organs of the senses. The *internal* are such as occur within the body, and arise from some alteration in the function of the part, for the time being. Hunger and thirst are internal sensations, as well as all the natural wants.

Morbid sensations may be either internal or external.

SENSE, *Sensus*, *Æsthêsis*, (F.) *Sens*. A faculty, possessed by animals, of receiving impressions from external objects. (F.) *Sentiment*. The senses are five in number: sight, hearing, smell, taste, and touch. Of these, the two first and the last administer more to the intellect; and, hence, have been called, by some, the *intellectual senses*: the other two seem more destined for the nutrition of the body; and, hence, have been termed *corporal* or *nutritive senses*.

Other senses have been suggested—as the intense sensation experienced during the venereal act; a sense of heat and cold; a muscular sense, a common sense or Cœmæsthesis (q. v.) &c.

SENSES, NERVOUS SYSTEM OF THE, Medulla oblongata.

SENSIBILITAS ANOMALA, see Irritable —s. Aucta, see Irritable—s. Morbosa, see Irritable.

SENSIBILITY, *Sensibil'itus*, *Æsthéma*. The faculty of receiving impressions, and having the consciousness of them. Bichat defines it

as the property, possessed by living bodies, of receiving impressions, whether the individual be conscious of them or not. In the former case, where conscious, he calls the sensibility, *animal*: in the latter, where not, he terms it *organie*. This last is common to vegetables and animals, and presides over nutrition, absorption, exhalation, secretion, &c. The other does not exist in vegetables; it is the origin of the sensations—olfaction, vision, gustation, audition, thirst, hunger, pain, &c.

There are few parts of the animal body, but what are sensible,—if not in health—in disease. The free extremities of the hair, and nails, and the epidermis are not so. See Insensibility.

SENSORIUM, Sensorium.

SENSO'RIUM, *Sensorium commune*, *Organon sensorium internum*, *Sensitorium*, *Emporium spirituum*, *Æstheticon*. The common centre of sensations.

SENTIENT, *Sentiens*. Feeling.

The SENTIENT EXTREMITIES of nerves are their minute terminations in the organs.

SENTIMENT. See Sense.

SEPARATO'RIUM, from *separo*, 'I separate.' A surgical instrument, for separating the pericranium from the skull.

A *Separatory*—*Vitrum Hypoclepticum*,—is, also, a pharmaceutical vessel for separating fluids of different densities from each other.

SEPEDOGENESIS, Sepodonogenesis.

SEPEDOGENESIS, *Sepedogen'esis*, from *σπείδων*, 'putrescency,' and *γενεσις*, 'generation.' A septic disposition or tendency; such as is met with in typhus gravior.

SEPHIROS. A word used, by some writers, for the hardness that follows small abscesses, from which the pus has been absorbed; as in the case of furuncles.

SEPIA, *S. officinalis*, *Sepium*, *Præcipitans magnum*, *Cuttle-Fish*, (F.) *Seche*. The shell of the cuttle-fish has been used as an absorbent; and is often added to tooth-powders.

SEPLASIA'RIOUS. A name formerly given to those who sold perfumes, ointments, &c. It is derived from *Seplasia*, the name of a public place at Capua, where these kinds of preparations were frequently sold.

SEPSIS, Putrefaction.

SEP'TENARY. Consisting of seven. The septenary years, of the old believers in critical periods, were times at which, it was supposed, important changes might be expected to take place. The grand climacteric (q. v.) was fixed at 63, and it was considered, that if a person passed that age, he had well-founded expectations, that his life might be protracted to 90.

SEPTFOIL, UPRIGHT, Tormentilla.

SEPTIC, *Sep'ticus*. That which produces putrefaction. Any substance which corrodes and disorganizes the soft parts without causing much pain.

SEPTINERVIA, Plantago.

SEPTOPYRA, Typhus gravior.

SEPTUM, (F.) *Cloison*. A part intended to separate two cavities from each other, or to divide a principal cavity into several secondary cavities.

These septa are numerous in the human body. The chief are the following:—

SEPTUM CEREBELLI, Falx cerebelli—s. Cere-

bri, Falx cerebri—s. Cochleæ auditoriæ, Lamina spiralis.

SEPTUM CORDIS, *Septum medium cordis*. The partition which separates the two ventricles of the heart.

SEPTUM ENCEPHALI, Tentorium.

SEPTUM LUCIDUM seu *pellucidum* seu *tenue et pellucidum* seu *medium* seu *Speculum lucidum* seu *Lapis specularis* seu *Mediastinum* seu *Diaphragma ventriculorum lateraliū cerebri*, *Speculum*, *Septum medium*, (Ch.) (F.) *Cloison transparente*. The soft portion or medullary substance, which separates the two lateral ventricles of the brain from each other. This septum is composed of two lamina; between which a small cavity exists, filled by a serous fluid, and called the *Fossa of Sylvius*, *5th ventricle of Cuvier*, *Sinus of the median septum*, (Ch.) The brothers Wenzel are of opinion, that this cavity is lined by a peculiar membrane.

SEPTUM MEDIUM, S. lucidum—s. *Median du cervelet*, Falx cerebelli—s. *Medium cerebri*, S. lucidum.

SEPTUM NARIUM, *Intcrseptum* seu *Dissepimentum*, seu *Interfinium*, seu *Discrimen*, seu *Imbrex*, seu *Diaphragma narium*, (F.) *Cloison des Fosses nasales*, the partition between the nares. It is formed by the vomer, the perpendicular plate of the ethmoid bone, and a cartilage of a triangular shape. These parts are lined by the pituitary membrane, which receives a considerable number of nerves and vessels.

SEPTUM PARVUM OCCIPITALE, Falx cerebelli—s. *Pellucidum*, S. lucidum—s. *Scala*, *Lamina spiralis*—s. *Staphylin*, *Velum pendulum palati*—s. *Tenuè et pellucidum*, S. lucidum—s. *Thoracis*, *Mediastinum*—s. *Transverse*, *Tentorium*—s. *Transversum*, *Diaphragm*—s. *Vestibuli nervoso-membranaceum*, see *Labyrinth*.

SEQUESTRUM, from *sequestro*, 'I separate.' The portion of bone, in necrosis, which is dead, and separated from the living bone; acting, whilst retained, as an extraneous body. When the sequestrum is superficial and small, it is called *Exfoliation*, (q. v.)

SERAPINON, *Sagapenum*.

SERAPIUM, Syrup.

SERBET, Scherbet.

SERICUM, *Silk*, from *Seres*,—the Thibetans probably—from whom it was first obtained. (F.) *Soie*. The thread spun by the *Bombyx Mori* or *Silkworm*. Silk is used by surgeons for ligatures, &c.

SERICUM ANGLICUM. See *Sparadrapum adhasivum*.

SÉRIEUX, Serious.

SÉRIOUS, (F.) *Sérieux*, *Grave*. A term applied to disease and symptoms that are attended with danger.

SERIS, *Cichorium intybus*.

SERMOUNTAIN, *Laserpitium album*.

SEROSITY, Serum.

SEROUS MEMBRANES, *Membranes*, serous.

SERPENT, *Serpens*, *Anguis*, *Ophis*, from *serpo*, 'I creep.' A snake.

Snake Broth was, at one time, recommended as a restorative.

Many serpents are venomous: and the bites of some fatal. See *Poisons*, (Table of.)

SERPENTARIA, *Aristolochia serpentaria*—s. Minor, *Arum maculatum*—s. Gallorum, *Arum dracunculoides*—s. Hispanica, *Scorzonera*.

SERPENTARLÆ BRAZILIENSIS RADIX, *Caincæ radix*.

SERPENTINE, Ophites.

SERPENTINUS, Ophites.

SERPIGINOUS, from *serpere*, 'to creep.'

An epithet given to certain superficial ulcerations, which, as they cicatrize in one part, extend to another.

SERPIGO, *Herpes circinatus*, Lichen.

SERPOLET, *Thymus serpyllum*.

SERPYPILLUM, *Thymus serpyllum*—s. Citraturum, see *Thymus serpyllum*.

SERRA, Saw.

SERRATULA AMARA, *Family*, *Cynaroccephalæ*. *Sex. Syst.* Syngenesia *Polygamia æqualis*. A species of *Sawwort*, recommended in ague.

SERRATUS ANTICUS MINOR, *Pectoralis minor*—s. Major, *Serratus magnus*.

SERRATUS MAGNUS. So called from its serrated appearance. *Serratus major anticus*, *Serratus major*, *Costo-basi-scapulaire*, *Costo-scapulaire*, (Ch.) (F.) *Grand dentelé*. A very broad, (especially anteriorly) thin, flat, irregularly quadrilateral muscle, situate at the sides of the thorax. It is attached, before, to the external surface of the first 8 or 9 ribs, by as many distinct digitations; and, behind, to the spinal edge of the scapula. The superior fibres are almost horizontal; the lower become gradually more and more oblique upwards and backwards. This muscle carries the scapula forwards, and causes it to execute a movement of rotation, which directs its inferior angle forwards, and the anterior upwards. When the shoulder is fixed, it raises the ribs.

SERRATUS POSTICUS INFERIOR, *Dorso-lombocostal*, *Lombo-costal*, (Ch.) (F.) *Petit dentelé postérieur et inférieur*. A broader and thinner muscle than the following, but nearly of the same shape. It is situate obliquely, at the lower part of the back; and extends from the spinous processes of the two or three last dorsal vertebrae, and the two or three first lumbar, to the inferior margin of the four last false ribs. This muscle depresses the ribs, and thus concurs in expiration. It is an antagonist to the next.

SERRATUS POSTICUS SUPERIOR, *Cervi-cidorso-costal*, *Dorso-costal*, (Ch.) (F.) *Petit dentelé supérieur*. A flat, thin, quadrilateral muscle; situate obliquely at the posterior inferior part of the neck, and the superior part of the back. It passes from the posterior cervical ligament, the spinous process of the last cervical vertebra; from the spinous processes of the two or three first dorsal, to the second, third, fourth, and fifth ribs; into which it is inserted by as many digitations. It raises the ribs, and is, consequently, an inspiratory muscle.

SERTULA CAMPANA, *Trifolium melilotus*.

SERUM DU SANG, S. of the blood.

SERUM, *Orrhos*, *Serosity*. The most watery portion of animal fluids, exhaled by serous membranes. It is a constituent part of blood, milk, &c.

THE SERUM OF THE BLOOD, (F.) *Sérum du Sang*, is the liquid, which separates from the

blood, when coagulated at rest. It is of a greenish-yellow colour; viscid; slightly coagulable by heat, acids, and alcohol. It is composed of water; muriate of soda; certain phosphates; gelatine; and albumen, constantly united to soda, almost in a saponaceous combination.

SERUM LACTIS; the *Serum of Milk*, (F.) *Sérum du lait*, (q v.) *Petit lait*. That part of milk, from which the butter and caseous matter have been separated. It is a transparent, citrine-coloured liquid, containing sugar of milk, mucilage, acetic acid, phosphate of lime, and some other saline substances. It is used as a slightly nutritious diluent and refrigerant.

THE SERUM LACTIS HOFFMANNI, (F.) *Petit-lait d'Hoffmann*, is a name given to the liquid, resulting from treating with boiling water, milk which has been evaporated to an almost solid consistence. It is not much used.

RENNET WHEY is made thus: *milk* 2 pints; *rennet* ʒss, infused in a little hot water: mix and keep in a gentle heat for some hours, then strain.—Gray.

SERUM OF SEROUS MEMBRANES, *Serum membranarum serosarum*, *Water of Dropsy*, (F.) *Sérum des membranes séreuses*, *Eau des hydro-piques*. It resembles the serum of the blood, especially in cases of hydrocele. The water of hydrothorax and ascites contains much less albumen:—sometimes, enough to coagulate on the application of heat: at others, not.

SERVICE, MOUNTAIN, *Sorbus acuparia*—s. Tree, *Sorbus domestica*.

SERVLETTE EN CARRÉ, *Couvrechef*.

SESAMOID, *Sesamoïdes*, *Sesamodes*, *Sesamoides*, from *σησαμη*, 'a grain of sesamum,' and *ειδος*, 'resemblance.'

THE SESAMOID BONES are small bones, situate in the substance of tendons, near certain joints. Their number is various. They are commonly more in the male than female. Two are constantly met with beneath the metatarso-phalangeal articulations of the great toe. Sometimes, the articulations of other bones of the metatarsus with the phalanges of the toes have them likewise. In the hand, there are two before the metacarpophalangeal joint of the thumb. At times, they are met with in the other metacarpophalangeal articulations. Occasionally, two exist, behind the condyles of the femur, in the tendons of the gastrocnemii muscles. A considerable os sesamoideum is also met with in the tendon of the peronæus longus.

These bones are commonly round, and flattened only on one surface, which is incrustated with cartilage. Their size is very variable, according to the joints in which they exist.

Traces of sesamoid bones are not observed in infants: in them, they are replaced by small, cartilaginous concretions. They are developed by a single point of ossification; and are, like the patella (which is a true sesamoid bone,) composed of much cellular substance, covered by a thin layer of compact tissue.

The use of these bones is,—to allow the tendon to be inserted into the lever at a greater angle; and, thus, enable the power to act more advantageously.

Riolan has given the name *Ossa sesamoidea*, to two bony points sometimes met with;—the

one at the outer side of the carotid canal of the temporal bone; and the other at the edge of the cavernous sinus, at the side of the internal carotid artery.

**SESAMUM ORIENTALE.** *Bennē, Oily Grain.* The seeds of this African plant are cultivated in Georgia and South Carolina, where the negroes use them with Indian Corn as an article of food. They yield a larger proportion of oil than any other vegetable; one hundred weight producing ninety pounds of oil, which is, at least, equal to Florence oil.

The *Bennē Oil, Sesami Oleum*, is used in the Southern States as a laxative. The leaves afford, by infusion, an excellent mucilage.

**SESCUN'CIA, Sesquincia, Hemiohon.** An ounce and a half.

**SESELI, Laserpitium siler—s.** *Ægopodium, Ligusticum podagaria—s. Creticum, Tordylum officinale—s. des Près, Peucedanum silaus.*

**SESELI TORTUOSUM, Seseli Massilien'sē, Hartwort of Marscilles.** The seeds have a warm taste; and a greater degree of pungency than those of the *Laserpitium Siler*, which is the *Seseli* of the Pharmacopœias.

**SESQUIL.** This word, joined with any number, weight, measure, &c., signifies one and a half; as *sesquigranum*, 'a grain and a half.'

**SESEQUINCIA, Sescuncia.**

**SETA EQUINA, Hairworm, Helmin'thus Gordii.** A kind of worm, found in stagnant water, from 4 to 6 inches long, and twisted into various knots and contortions. Colour pale-brown, with dark extremities. It is common in the intestines of the Laplanders; causing the *Col'ica Lappon'ica*, in which the gripings are, at times, exceedingly severe.

**SETACEUM, Seto, Seton,** from *seta*, 'a bristle.' A long strip of fine linen or cotton twist, passed through the skin and cellular membrane, to keep up an issue; or through suppurating cavities, between the fragments of fractured bones, &c., to fulfil certain indications. The term is, also, applied to the issue so established.

The operation is simple. It consists in laying hold of a fold of skin, and passing a seton needle through it, with the thread attached. Every day a fresh portion of the thread is drawn through the sore.

Setons are established in many diseases;—in obstinate ophthalmiæ, cephalalgæ; epilepsy, thoracic and abdominal affections, &c.; but they are not as much used as formerly.

**SETO, Setaceum.**

**SETON, Setaceum.**

**SEVADILLA, Veratrum sabadilla.**

**SEVATIO, Steatoma.**

**SÉVRAGE, Weaning.**

**SEVUM, Pinguedo.**

**SEVUM, Sebum, Stear, Adeps ovilli.** Suet, mutton suet. Pinguedo, (q. v.)

The **SEVUM PRÆPARATUM, Ovilli Sevum Præparatum** or *prepared Suet*, (F.) *Graisse de Mouton, Suif*, is formed by cutting the suet in pieces; melting over a slow fire, and straining through linen. It is emollient, and is sometimes boiled in milk, (ξij to lbj.) and used in diarrhœa and dysentery. Its principal employment is in the formation of plasters.

**SEX, Sexus, Genos, Physis.** The physical

difference between male and female in animals and vegetables;—as the *male sex, Sexus potior, S. virilis*; the *female sex, Sexus se'quior, S. mulie'bris*. In France, "the sex" means the female sex.

**SEXTANS, Sexta pars libra.** The sixth part of a pound.—Galen.

**SEXTARIUS.** An ancient measure for liquid and solid substances. See *Weights and Measures*.

**SEXTULA.** The sixth part of an ounce.

**SEX'UAL.** That which relates to the sex; which characterizes the sex.

**SEXUAL INTERCOURSE, Coition—s.** Organs, Genital organs.

The **SEXUAL ORGANS** are the genital organs; and the **SEXUAL FUNCTIONS**, the genital functions.

**SEYDSCHÜTZ WATER, Sedlitz water.**

**SHALLOT, Echalotte.**

**SHAMPOING, (F.) Massage.** A Hindoo process, which consists in pressing the body of the bather in a peculiar manner; cracking the various joints, and employing blows and friction.

'Kneading' consists in pressing alternately upon a part of the body to arouse the muscles to more energetic action. It is employed at times in dyspepsia.

**SHEATH, Vagina.**

**SHELL LIQUID.** See *Calceis murias*.

**SHERBET, Scherbet—s.** Orange, see *Syrupus aurantii*.

**SHERRY, Sack, see Wine.**

**SHIN, O'chrea.** The spine or anterior part of the tibia or leg. It is, also, called *Anticn'euion*, and *Crea*.

**SHINGLES, Herpes zoster.**

**SHORT, Sax. rceopt, from rcipan,** 'to cut, to shear,' *shored, shor'd, short, (F.) Court.* A word used, by anatomists, in opposition to *long*; and to distinguish parts from each other that have otherwise the same name.

**SHORT BONES**, for example, are those in which the three dimensions—length, breadth, and thickness—are nearly alike; such are the vertebræ, bones of the carpus, tarsus, &c.

**SHOULDER-BLADE, Scapula.**

**SHOW.** See *Parturition*.

**SHOW-CHOO.** See *Spirit*.

**SHRUB.** Perhaps from Arabic, *sharab*, 'syrup.' A compound of spirits, lemon juice, and sugar.

**SHUDDERING.** *Frem'itus, Phryagma*, from (G.) *Schauer, Schauer, (F.) Frémissement, Tressaillement.* A peculiar sensation, felt either externally or internally; and which seems to be the result of a spasmodic movement of the parts, in which it occurs. A slight feeling of cold sometimes accompanies it. It is, at times, the result of a moral cause, and is often the precursor of shivering.

**SIAGON, Maxillary bone.**

**SIAGONAGRA, from σιαγων,** 'the jaw,' and *αγχα*, 'a seizure.' A gouty or rheumatic affection of the joint of the lower jaw.

**SIALACHUS, Salivation.**

**SIALAGOGUE, Sialago'gus, Sialogogue, Ptyalagogue, Ptyas'magogue, Salivans, Apoplegmatisans per os,** from *σάλια*, 'saliva,' and *αγω*, 'I expel.' That which provokes the se-

cretion of saliva. Pyrethrum and mercury are sialagogues.

Sialagogues may be of two kinds: those which act through the circulation, and those which act immediately on the salivary organs. Mercury belongs to the former—the pyrethrum to the latter class. The chief sialagogues are armoracia, calamus, mezereum, pyrethrum, tabacum, and zingiber.

SIALISMA, Salivation.

SIALOLO'GIA, from *σιαλον*, 'saliva,' and *λογος*, 'a discourse.' A treatise on the saliva.

SIALON, Saliva.

SIALOSYRINGES, Salivary fistulæ.

SIBARE, Phrenitis.

SIBBENS, *Sivens*. An infectious disease in the mountainous parts of Scotland, viewed to be of the venereal kind. *Sivvin*, in the Keltic, means raspberry; and it is said that, in this affection, fungi appear like raspberries. From *sivvin*, the inhabitants have made, *sievvin*, *sibbin*, *sibbens*, and *sivvens*. By some, this affection is regarded as a complication of the venereal and itch. In the Orkneys, *sibbens* means itch.—Jamieson.

SIBILUS, Tinnitus aurium.

SICCANTIA, *Xerant'ica*. (F.) *Siccatis*. Drying medicines.—Galen.

SICCANTIA, Desiccativa.

SICCATIFS, Siccantia.

SICCATIO, Drying.

SICCHA'SIA, *σιχχασια*, 'disgust.' (q. v.) A distressing disgust for food; such as is experienced by women with child.

SICL'ICUM, *Sic'lium*, *σιχλιον*. A weight of four drachms; and, according to some, of only two drachms.

SICK, Sax. *reoc*, *Æger*, *Ægro'tus*, *Nos'eros*, *Nos'ides*, (F.) *Malade*. Labouring under disease. Such is its acceptation in old English, and generally in the United States. In England, it most commonly means, disorder of the stomach,—nausea.

SICKLY, *Morb'us*, *Valetudina'rius*, *Adyn'atos*, (F.) *Maladif*. One who is subject to be sick.

SICKNESS, FALLING, Epilepsy—s. of the Stomach, Vomiting.

SICLIUM, Sicilicum.

SICUA, Cupping glass.

SICULA, Beta, Penis.

SICYEDON, Cauldon.

SIDE, PAIN IN THE, Pleurodynia.

SIDERA'TIO, *Sydera'tio*, from *Sidus*, 'a star,' because the condition was thought to be produced by the influence of the stars. The state of one struck suddenly, without apparent cause, and as if by the influence of the stars. The ancients comprised, under this name, different morbid conditions, such as paralysis, apoplexy, and gangrene.

SIDERATIO, Apoplexy, Phrenitis—s. Ossis, Spina ventosa.

SIDERATION, Astrobolismos.

SIDERION, Ferramentum.

SIDERITIS, Teucrium chamæpitys.

SIDEROS, Ferrum.

SIDEROXYLON, Chrysophyllum cainito.

SIELISMOS, Salivation.

SIELON, Saliva.

SIFFLEMENT (F.) from *siffler*, 'to whistle.' Whistling.

SIFFLEMENT MODULE, ou *chant des artères*, 'modulated whistling, or music of the arteries.' A kind of sound heard on auscultation, resembling, at times, the humming of certain insects.

The sound is chiefly met with in those labouring under chlorosis.

SIGE, Taciturnity.

SIGH, Suspirium.

SIGHT, Vision—s. Askew, Dysopia lateralis—s. False, Metamorphopsia, Pseudoblepsia—s. Feebleness of, Amblyopia.

SIGILLUM SALAMONIS, Convallaria polygonatum—s. Virginitatis, Hymen.

SIGMATOID, Sigmoid.

SIGMOID, *Sigmoïdal*, *Sig'matoid*. That which has the form of the Greek S or C; from sigma and *ειδος*, 'resemblance.'

The SIGMOID CAVITIES or FOSSÆ of the Ulna, (F.) *Cavités ou Fosses sigmoïdes*, are two notches at the upper part of that bone: one for the reception of the humerus; the other for that of the radius.

The SIGMOID or SEMILUNAR VALVES, *Valvule Sigmoïdeæ*, *Proces'sus Sigmoïdes*, (F.) *Valvules sigmoïdes* ou *semilunaires*, are three valvular folds, at the commencement of the pulmonary artery and aorta. These valves have the form of a crescent, when applied against the parietes of the vessel. When the blood is sent from the ventricles by their contraction, the valves are applied against the sides of the vessel; but, during the diastole of the ventricle, they are depressed, and prevent the blood from returning to the heart. At the middle of the convexity of each valve is a small, hard, triangular granulum, called *Corpusculum Arantii*, which completely closes up the passage. It is, also, called *Corpusculum Morgagni*, and *C. Sesamoideum*, (F.) *Globule d'Arantius*.

The SIGMOID FLEXURE OF THE COLON is the turn the colon takes immediately before its termination in the rectum.

SIGN, *Signum*, *Semi'on*, (F.) *Signe*. Any present or past circumstance, afforded by the examination of a patient, or of matters concerning him, whence a conclusion may be drawn, regarding the nature and seat of his disease.

The phenomena which precede the disease, are called *anamnes'tic* or *commem'orative signs*;—those which accompany it, are termed *diag'nos'tic*, if they reveal the nature or seat of the disease;—*prog'nos'tic*, when they indicate its probable duration and termination.

SIGNATURE, *Signat'ura*, *Sign'd'tio*, *Epis'phagismos*. This term was applied in the Eastern countries, in the middle ages, to mystic characters of good or bad augury, with which it was pretended, that every one was marked by the star under which he was born.

The SIGNATURES OF PLANTS meant certain peculiarities in their conformation or colour, by which they were judged proper for particular diseases:—as in the case of the *Lungwort*, *Liverwort*, &c.

SIGNES AVANT-COUREURS, Precursory signs—s. *Précurs'eurs*, Precursory signs.

SIGNUM. See Parturition.

SILACH, *Silac*. An Arabic word, used to designate thickening of the eyelids, *Crassities Palpebrarum*; and, also, *Alopecia*.—Forest., Stephanus.

SILENĒ VIRGINICA, *Ground Pink, Catch Fly*. The root has been employed in decoction, as an efficacious anthelmintic.

SILER MONTANUM, *Laserpitium siler*.

SILVUA, *Cerdation*; the carat. A weight of about four grains.

SILVUA ARABICA, *Tamarindus*—s. *Dulcis*, *Ceratonium siliqua*.

SILVUASTRUM PLINII, *Capsicum annum*.

SILK, *Sericum*—s. *Weed*, common, *Asclepias Syriaca*—s. *Worm*, see *Sericum*.

SILLON, *Sulcus*—s. *Horizontal de la veine ombilicale*, see *Liver*—s. *Transversale*, see *Liver*—s. *de la Veine cave inférieure*, see *Liver*—s. *de la Veine porte*, see *Liver*.

SILPHIUM, *Laserpitium*.

SILVER, *Argentum*—s. *Nitrate of, Argentum nitras*.

SILYBUM, *Carduus marianus*.

SIMAROUBA, *Quassia simarouba*—s. *Faux, Malpighia mourella*.

SIMITIUM, *Plumbi subcarbonas*.

SIMPLES. Medicinal herbs. One, skilled in simples, is called a *Simplist*, a *Rhizotomist*.

SIMPLISTS. See *Simples*.

SIMUS, *Camus*.

SINAPELĒ'ON, from *σινάπι*, 'mustard,' and *ελαϊον*, 'oil.' Oil impregnated with mustard.

SINAPIS, *Sinapis nigra, Napus, Eruca, Sinapi, Sinapi, Common Black Mustard*, (F.) *Moutarde noire, Sénévé, Saunve*. Family, *Cruciferae*. *Sex. Syst.* *Tetradynamia Siliquosa*. The seeds are inodorous, when entire; but, when bruised, the odour is very pungent; taste bitterish and acid. They yield their virtues to water, and afford a bland oil by expression.

The seeds are stimulant, diuretic, emetic, and rubefacient. They are, sometimes recommended to be swallowed whole, in dyspepsia, torpor of the bowels, &c. Externally, they are applied in the form of cataplasm. See *Sinapis*.

The *White Mustard, Sinapis Alba*, is also used medicinally. It is somewhat less pungent than the black. The distilled oil—*Oleum Sinapis*—is a powerful stimulant and rubefacient.

WHITEHEAD'S ESSENCE OF MUSTARD consists of oil of turpentine, camphor, and a portion of spirit of rosemary: to which is added a small quantity of flour of mustard. It is a celebrated embrocation for rheumatism, &c.

WHITEHEAD'S ESSENCE OF MUSTARD PILLS consists of yellow resin and balsam of tolu, enough to make into pills.

SINAPISIS, *Bole Armenian*.

SINAPIS'MUS, from *σινάπι*, 'mustard.' A cataplasm, of which mustard forms the basis; and which is used for exciting redness, and acting as a counter-irritant. It is prepared by mixing flour of mustard and vinegar together, to the due consistence. See *Cataplasma Sinapis*.

SINCIPIUT, *Sincipital Region, Bregma, Sinciput, Mesocranium*; the top of the head. The French use it synonymously with *vertex*. By some, it is applied to the frontal region or fore-

part of the cranium. The parietal bones have been called *sincipital bones, Ossa sincipitis*.

SINDON (F.) *Sindo, Linen*. Cloth made at Sidon in Phœnicia. A small piece of rag, or a round pledget, supported by a thread at its middle, and introduced into the opening in the cranium, made by the trephine.

SINEW, *Tendon*.

SINGULTUS, *Lynx, Lygmus, Clonus Singultus, Hiccough, Hiccup*, (F.) *Hoquet*. A noise made by the sudden and involuntary contraction of the diaphragm, and the simultaneous contraction of the glottis, which arrests the air in the trachea. It is a symptom of many morbid conditions, and especially of gangrene, but occurs, frequently, in persons otherwise in good health.

SINUEUX, *Sinuoux*.

SINUOSITAS, *Sinus*.

SINUOUS, *Sinu'us*, (F.) *Sinuoux*. An epithet given to certain ulcers, and especially to certain fistulae, which are tortuous.

SINUS, *Sinu'usitas, Colpos, Abscon'sio, Eurycho'ria*, (F.) *Clapier*. Any cavity, the interior of which is more expanded than the entrance. In this sense, anatomists have applied the term to cavities in certain bones of the head and face. It has been, also, applied to certain venous canals, into which a number of vessels empty themselves; such as the sinuses of the dura mater and of the spine; the sinus of the vena porta; uterine sinuses, &c.

In surgery, it means a long, narrow, hollow track, leading from some abscess, diseased bone, &c.

SINUS ARTERIOSUS, *S. pulmonalis*—s. *Caverneux, Cavernous sinus*—s. *Cavernosus, Cavernous sinus*—s. *Cerebri, Ventricles of the brain*—s. *Choroidien, S. quartus*—s. *Circularis, S. coronarius*—s. *Coronaire du cœur*, see *Cardiac veins*.

SINUSES OF BONES. All these form part of the nasal cavities. They are the frontal, sphenoidal, maxillary, &c. The name has also been given, occasionally, to the ethmoid and mastoid cells.

SINUS CORONA'RIUS, *Sinus circula'ris, S. circula'ris Ridley*. It surrounds, in a more or less regular manner, the pituitary fossa and gland, emptying itself into the corresponding cavernous sinus by each of its extremities.

SINUS COXÆ, see *Cotyloid*—s. *Droit, S. quartus*—s. *Falciformis inferior, S. longitudinal, inferior*—s. *Falciformis superior, S. longitudinal, superior*—s. *Fourth, Torcular Herophili*—s. *Genæ pituitarius, Antrum of Highmore*—s. *Lacrymalis, Lachrymal sac*—s. *Latéraux, Sinuses, lateral*—s. *Magni, Sinuses, lateral*—s. *Maxillary, Antrum of Highmore*—s. *Médian, S. Longitudinal superior*—s. *Median, see Semicircular canals*—s. *Muliebris, Vagina*—s. *Occipitalis anterior, Sinus transversus*—s. *Perpendicularis, S. Quartus*—s. *Pituitarii frontis, Frontal sinuses*—s. *Polymorphus, Cavernous sinus*—s. *Portarum, see Liver*—s. *Pudoris, Vagina*—s. of the *Pulmonary veins, Auricle, left*—s. *Renum, Pelvis of the kidney*—s. *Rhomboidal, Calamus scriptorius*—s. of the *Septum ladicum, Ventricle fifth*—s. *Sinister cordis, S. pulmonalis*—s. *Sphenoidalis, Cavernous sinus*—s. *Straight, S. quartus*—s. *Superciliares, Frontal sinuses*—s.

Transversi, Sinuses, lateral—s. *Triangularis*, *S. longitudinal superior*—s. *Utriculosus*, see *Semicircular canals*—s. *des Vaisseaux seminefères*, *Corpus Highinori*—s. of the *Vena cava*, *Auricles*, right—s. *Venarum cavarum*, *S. dexter cordis*—s. *Venarum pulmonalium*, *S. pulmonalis*—s. *Venosus*, *S. dexter cordis*.

*SINUS DEXTER CORDIS*, *Sinus vena'rum cavatum*, *S. vena'sus*, *Saccus vena'rum cavatum*. The right auricle of the heart:—*Atrium cordis dextrum*. See *Auricula*.

The *SINUSES OF THE DURA MATER*, *Sinus seu Fistula seu Cavitates seu Ventriculi seu Tubuli seu Sangueductus seu Receptacula Duræ matris* are formed by a separation of the layers of the dura mater, which act as a substitute for the outer membrane of veins. Bichat admits only four great sinuses, of which all the others seem to be dependencies;—the *two lateral sinuses*, the *straight sinus*, and the *longitudinal sinus*. To the lateral sinuses belong,—the *petrous sinuses*, superior and inferior; the *transverse sinus*; the *cavernous sinuses*; the *coronary sinus*, and the *occipital sinuses*. To the straight sinus belongs the *inferior longitudinal*. The longitudinal sinus, properly so called, has no sinus under its dependence.

*SINUSES OF THE LARYNX*, *Ventricles of the larynx*

*SINUSES, LATERAL*, *Sinus transvers'i*, *S. magni*, *S. laterales*, (F.) *Sinus latéraux*. Each of these sinuses, distinguished into right and left, begins at the torcular Herophili, or confluence of the sinuses; and terminates at the sinus of the jugular vein.

*SINUSES, LONGITUDINAL*, *S. longitudinales*. These are two in number.

1. The *SUPERIOR LONGITUDINAL SINUS*, *S. falci-formis superior*, *S. triangularis*, *Sinus median*, (Ch.) A long, triangular canal; convex above, concave below, which occupies the whole of the upper edge of the falx cerebri. It is broad behind, and much narrower before, where it commences by a *cul-de-sac*, at the crista galli of the ethmoid bone. It passes along the frontal or coronal crest, sagittal suture, and the vertical groove of the occipital bone. It receives several veins from the dura mater; and all those that are spread over the convex and plane surfaces of the two hemispheres of the brain. It discharges itself into the upper part of the torcular Herophili.

2. The *INFERIOR LONGITUDINAL SINUS*, *Sinus falci-formis inferior*, *Vena falcis cerebri*. This is much narrower than the last, and occupies the inferior edge of the falx cerebri, from its anterior third to the tentorium cerebelli, where it terminates, commonly by two branches, in the straight sinus.

*SINUS OCCIPITAL*, *Sinus occipitalis*. These sinuses commence at the sides of the foramen magnum ossis occipitis, and ascend—becoming broader and nearer each other—into the substance of the falx cerebelli, where they frequently unite. Each opens into the inferior part of the torcular Herophili. They receive the veins of the falx cerebelli, of the dura mater which lines the fossæ cerebelli, and of the posterior part of the cerebellum. Haller and Sömmerring have given them the name of *posterior occipital sinuses*, to distinguish them from

the transverse sinus, which they have called *anterior occipital sinus*.

*SINUS PULMONALIS*, *S. sinis'ter cordis*, *Atrium cordis sinis'trum*, *S. vena'rum pulmonalium*, *S. arterio'sus*, *Saccus vena'rum pulmonalium*. The left auricle of the heart. See *Auricula*.

*SINUS QUARTUS*, *S. perpendicularis*, *Sinus choroïdæen* (Ch.), *Straight Sinus*, (F.) *Sinus droit*. This sinus,—triangular throughout; wide posteriorly; narrower anteriorly; slightly oblique downwards and backwards—passes along the base of the falx cerebri, from the termination of the inferior longitudinal sinus to the torcular Herophili. It receives the inferior longitudinal sinus, the veins of the lateral ventricles or *vena Galeni*, the superior cerebellous veins, &c.

*SINUS TRANSVERSUS*, *S. occipitalis anterior*. This sinus lies transversely at the anterior part of the basilar process of the occipital bone. It forms a communication between the two petrous sinuses, and the cavernous sinus of one side and those of the other. Its breadth is commonly very great. It is situate between two layers of the dura mater, and presents, internally, a kind of cavernous tissue.

*SINUS UTERINI*, *Uterine sinuses*. A name given to cavities, formed by the uterine veins in the substance of the uterine parietes. They are very large during pregnancy.

The *SINUSES OF VALSALVA* are three depressions in the aorta and pulmonary artery, immediately opposite the semilunar valves. Their use is to leave the edges of the valves free, so that they can be caught by the reflux blood.

Where the aorta is about to send off the first of its large branches, at the top of the thorax, it is of great size, and has been called the *Large Sinus of Valsalva*.

*SINUSES, VERTEBRAL*, (F.) *Sinus vertebraux*. Two great venous sinuses, different from those of the dura mater, which extend the whole length of the vertebral canal, from the occipital foramen to the end of the sacrum, behind the bodies of the vertebræ, before the dura mater, and at the sides of the posterior vertebral ligament. At their inner side, they communicate with each other by means of branches, which form true *transverse sinuses*. They are situate at the middle of the body of each vertebra, passing under the posterior vertebral ligament. They receive, at their middle part, the veins that arise in the spongy tissue of the vertebræ. By their external side, the vertebral sinuses communicate with the posterior branches of the vertebral, intercostal, and lumbar veins. At their posterior side they receive the veins, which creep on the prolongation of the dura mater that envelops the marrow.

*SIPHILIS*, Syphilis.

*SIPHITA PARVA*, Chorea.

*SIPHON URINÆ*, Diabtes.

*SIRA*, Orpiment.

*SIRIASIS*, *Coup de Soleil*, Insolation, Phrenitis.

*SIRIASIS ÆGYPTIACA*, *Coup de Soleil*.

*SIRIUM MYRTIFOLIUM*, Santalum album.

*SIRIUS*, Canicula.

*SIRUP DE CAPILLAIRE*, See *Adiantum capillus veneris*—s. *de Coralline*, see *Corallina Corsicana*.

*SIRUP*, Syrup.

**SISON AMMI.** *Family, Umbelliferae. Sex. Syst. Pentandria Digynia.* The plant that affords the *Ammi verum* of the shops. (F.) *Ammi des Boutiques.* The seeds were once used as a carminative.

The **SISON AMOMUM**, (F.) *Amome faux*, is considered to be excitant and diuretic. It is the *field honeysort*.

**SISYMBRIUM NASTURTIUM**, *Nasturtium aquaticum, Laver odoratum, Cratævasium, Cressi, Cardaminæ fontana, Water Cress, (F.) Cresson de fontaine. Family, Cruciferae. Sex. Syst. Tetrandria Siliquosa.* Water cresses are commonly used in salad. They have obtained a place in the *Materia Medica* for their antiscorbutic qualities.

**SISYMERIUM MENTHRASTRUM**, *Mentha aquatica.*

**SISYMBRIUM SOPHIA**; the *Herb Sophia. Sophia Chirurgo'rum, Fliz or Flux weed, (F.) Sagesse des Chirurgiens.* It was once reputed to be anthelmintic, and valuable in hysterical affections. It is not used.

**SITICULOSUS.** See *Alterative.*

**SITOS**, Thirst—s. *Morbosa, Polydipsia.*

**SITOS**, Aliment.

**SIUM**, *Sium nodiflorum, Creeping Water-parsnep, (F.) Berle nodiflore. Family, Umbelliferae. Sex. Syst. Pentandria Digynia.* It is stimulant, and supposed to be diuretic and lithontripctic. It is, sometimes, employed in cutaneous eruptions.

**SIUM NINSI.** The plant, whose root is called *Radix Ninsi, Ninzin, Nindsin.* This root was long supposed to be the same as ginseng, and it possesses similar, though weaker properties.

**SIVVENS**, Sibbens.

**SKELETIA**, Emaciation.

**SKELETOL'OGY**, *Scelotologia*, (F.) *Squeletologie*, from *σκελετος*, 'a skeleton,' and *λογος*, 'a discourse.' A treatise on the solid parts of the body. This part of anatomy comprehends *Osteology* and *Syn-desmology*.

**SKELETON**, *Scel'etum*, from *σκελετος*, *εαδα'or exsiccatum*, (F.) *Squelette, Scelton*, a dried body; from *σκελλω*, 'I dry.' The aggregate of the hard parts of the body, or the bones. A skeleton is found in almost all animals, although it may not be always formed in the same manner. In some, as in the crustacea and testacea, it is wholly or partly *external*. In others, as in birds, the mammalia, &c., it is *internal*. It serves as a support for other organs. On it the general shape of the body and of its various parts is greatly dependent. When the bones are united by their natural ligaments, the skeleton is said to be *natural*; when articulated by means of wires, *artificial*.

**SKELETOPŒA**, *Sceltopœia*, from *σκελετος*, 'a skeleton,' and *ποιω*, 'I make.' The part of practical anatomy which treats of the preparation of bones, and the construction of skeletons. Bones are prepared to exhibit their conformation, structure, chymical composition, mode of development, and changes—the different cavities formed by their union; and to demonstrate their connexions, relations, modes of union, &c.

**SKEVISCH**, *Erigeron Philadelphicum.*

**SKIN**, *Cutis.*

**SKIRSE**, *Scirrhus*

**SKUE-SIGHT**, *Dysopia lateralis.*

**SKULL-CAP**, *Scutellaria galericulata.*

**SKUNK CABBAGE**, *Dracontium fœtidum.*

**SLATE**, *IRISH, Hibernicus lapis.*

**SLATERS**, *Onisci aselli.*

**SLATKAIA TRAVA.** See *Spirit.*

**SLAVERING**, from *Saliva, Ptyalis' mus iners, Driv'elling, (F.) Bave. Involuntary flow of saliva, from sluggishness of deglutition, without increased secretion. It is seen in the infant, the aged, and the idiot.*

**SLEEP, Somnus, Sompnus, Sopor, Dormitio, Hypnos, (F.) Sonneil.** Temporary interruption of our relations with external objects. A repose of the organs of sense, intellectual faculties, and voluntary motion.

The act of quitting this condition is called *awaking, (F.) Évigilation, Reveil.* Sometimes this is progressive and natural; at others, sudden and starting, (F.) *Reveil en sursaut*, as in nightmare, affections of the heart, hypochondriasis, &c.

**SLEEPLESSNESS**, *Insomnia.*

**SLEEP-WALKING**, *Sonnambulism.*

**SLING, (G.) Schlinge, Mitella.** A bandage, employed to keep the forearm bent on the arm, in cases of injury done to those parts, in fracture of the clavicle, injury of the hands, &c. A handkerchief is often sufficient for this purpose. It must be folded diagonally, and tied, by the extremities, round the neck. The French surgeons have used many varieties of *Echarpes* or *slings*; as the *Grande écharpe, Écharpe moyenne, Petite écharpe, Écharpe de J. L. Petit, &c.*

**SLOE TREE**, *Prunus spinosa.*

**SLOUGH**, *Eschar.*

**SLUG**, *Limax.*

**SLUMBER**, *Somnolency.*

**SMALLAGE**, *Apium graveolens.*

**SMALL-POX**, *Variola*—s. *Modified, Varioloid.*

**SMAIT**, *Protoxide of Cobalt, Smaltum, Safrè, Azur, Blue Starch.* This oxyd has been given in rheumatism, in the dose of ten to twenty grains. A larger quantity excites vomiting.

**SMARAG'DUS**, *σμαραγδος, (F.) Émeraude.* The emerald. It was formerly regarded as a tonic.

**SMECTICA**, *Detergents.*

**SMECTIS**, *Cimolia terra.*

**SMECTRIS**, *Cimolia terra.*

**SMEGMA**, *Sapo*—s. *Articulare, Synovia.*

**SMELL**, *SENSE OF, Olfaction.*

**SMELLING**, *Olfaction.*

**SMILAX**, *Taxus baccata*—s. *Aspera Chinen-sis, S. China*—s. *Aspera Peruviana, S. sarsaparilla.*

**SMILAX CHINA**, *China, China orientalis, Sankira, Gauquara, Smilax aspera Chinen'sis, China Root, (F.) Squine, Esquine. Family Smilacæe. Sex. Syst. Diœcia Hexandria.* Formerly much used in cutaneous and venereal affections.

**SMILAX INDICA SPINOSA**, *S. pseudo-China.*

**SMILAX PSEUDO-CHINA**, *Smilax Indica spinosa, China occidentalis, China spuria nodosa; American or West India China.* In scrofulous disorders, the root has been often preferred to the oriental kind. In other cases, it possesses similar virtues.

**SMILAX SARSAPARILL'Ā**, *Sarsaparilla*, *Smilax aspera Peruvia'na*, *Sarsa*, *Sarsa*, *Carivilan'di*, *Ira Pecan'ga*, *Macapalli*, *Zarsa*, *Zarzaparilla*, (*America*). (F.) *Salsepareille*. The root of the Sarsaparilla is inodorous; taste bitterish, feculaceous, and fibrous. It is of a dark colour externally; white within. It is possessed of diuretic and demulcent properties; and has been often employed in the sequelæ of syphilis; when, after a mercurial course, nocturnal pains, ulcerations, &c., continuë. It has also been advised in scrofula, chronic rheumatism, &c., but its efficacy is, to say the least of it, a matter of doubt. Dose, ℞j to ʒj of the powder.

**SMILĒ**, *σμίλη*. A curved, two-edged bistoury. A knife, (q. v.)

**SMILEON**, Scalpel.

**SMYRNA**, Myrrha.

**SMYRNISMOS**, Embalming.

**SMYRNIUM OLUSA'TRUM**, *Hipposelium*, *Smyrniam*, *Maccro'na*, *Macedonisium*, *Herba Alexandri'na*, *Gri'clum*, *Agrioseli'num*, *Alexanders*. A plant, formerly cultivated for culinary purposes. The seeds are bitter and aromatic, and the roots more powerfully bitter. They have been recommended as resolvents, diuretics, emmenagogues, &c.

**SNAIL**, *Limax*.

**SNAIL'S SHELL**, *Cochlea*.

**SNAKEROOT**, **BLACK**, *Actæa racemosa*—s. *Button*, *Eryngium aquaticum*—s. *Canada*, *Asarum Canadense*—s. *Virginiana*, *Aristolochia serpentaria*.

**SNAKEWEED**, *Polygonum bistorta*.

**SNEEZEWORD**, *Achillea ptarmica*.

**SNEEZING**, from (G.) *Niesen*, *Clonus Sternutatio*, *Sternutatio*, *Sternutamentum*, *Ptarinos*, (F.) *Éternuement*. A convulsive motion of the expiratory muscles, by which the air is driven rapidly, and rushes sonorously, through the nasal fossæ, carrying with it the mucus and foreign bodies, which adhere to the pituitary membrane, and which have occasioned the movement.

**SNORING**, *Ronchas*, *Rhonus*, *Stertor*, *Renchus*, (F.) *Ronflement*. Noise made in the posterior part of the mouth and nasal fossæ during the movements of inspiration, particularly in sleep, both when the person is in health and in disease, as in apoplexy. In certain affections of the chest—in some cases of pulmonary catarrh—a kind of snoring may be distinctly heard by applying the ear, or the stethoscope, to the chest.

**SNOW**, Sax. *rnaþ*, *Nix*, *Chion*, (F.) *Neige*. Water, in a solid state, which falls from the atmosphere in white flakes. It is used externally, as a tonic and discutient.

**SNUFF**, **CEPHALIC**, *Pulvis asari compositus*.

**SNUFFLES**, Teut. *Snuffeln*, *Gravido neonatorum*, *Rhinangia*, *Rhinanch'onæ*. Breathing hard through the nose. An affection to which infants are liable. It is relieved by oiling the interior of the nostrils.

**SOAP**, *Sapo*—s. *Berries*, *Sapindus saponaria*—s. *Castile*, *Sapo durus*—s. of the *Cocoa-nut oil*, *Sapo coconeus*—s. *Common or soft*, *Sapo molis*—s. *Medicinal*, *Sapo medicinalis*—s. *Spanish*, *Sapo durus*.

**SOAPWORT**, *Saponaria*.

**SOB**, from Sax. *reopian*, 'to grieve.' (F.) *Sanglot*. A spasmodic, sudden, and momentary contraction of the diaphragm, immediately followed by relaxation; by which the little air, that the contraction has caused to enter the chest, is driven out with noise. It is an evidence of corporeal or mental suffering.

**SOBRIETAS**, Temperance.

**SOCIA PAROTIDIS**. See *Parotid*.

**SOCIETY**, *Societas*, (F.) *Société*. An association for the promotion of some common object.

**MEDICAL SOCIETIES**, or associations of medical gentlemen for the promotion of science, have been numerous, and productive of valuable results.

In the United States, societies exist in many of the States, possessing the power of examining into the qualifications of every one who may be desirous of practising within their particular jurisdiction. In some of the States, however, the qualified and unqualified are permitted to exercise their profession with equal privileges and immunities.

Amongst the medical associations, that have published, from time to time, their useful transactions, are the following:

**IN AMERICA**.—The *Massachusetts Medical Society*; the *Physico-medical*, and *Medical Society of the State of New York*; the *College of Physicians of Philadelphia*.

**IN EUROPE**.—The *Association of Fellows and Licentiates of the King's and Queen's College of Physicians of Ireland*; the *Medico-Chirurgical*, and *Phrenological Societies of Edinburgh*; the *College of Physicians*, the *Medico-Chirurgical*, and *Medical Societies of London*; the *Associated Apothecaries and Surgeon-Apothecaries of England and Wales*, and the *Provincial Medical and Surgical Association*; the *Royal Academy of Surgery*, the *Royal Society of Medicine*, the *Société Médicale d'Émulation*, the *Société de Médecine*, the *Royal Academy of Medicine*, and the *Société Médicale d'Observation, of Paris*; the *Medico-Chirurgical Academy of Vienna*; the *Medical Societies of Berlin and Copenhagen*, &c., &c.

**IN ASIA**. The *Medical and Physical Society of Calcutta*.

Valuable medical essays are likewise contained in the published *Transactions of the American Philosophical Society*; of the *Royal Societies of London*, *Edinburgh*, *Göttingen*, &c.; of the *Royal Academy of Sciences of Paris*; the *Imperial Society of Sciences of St. Petersburg*; the *Royal Academy of Sciences of Turin*; the *Academia Imperialis Leopoldina Naturæ Curiosorum*, &c.

**SODA**. An Arabic word. *Soda impura*, *Barilla*, *Bariglia*, *Barillor*, *Soda Hispanica*, *And'ron*, *Natron*, *And'ton*, *Nitrum Antiquorum*, *Kelp*, *Aphronitrum*, *Sal alkalinus fixus fossilis*, *Carbonas Soda impuras*, *Subcarbonas Soda impura*, *Anachron*. The mineral alkali, as soda is termed, is obtained from several sources;—naturally, in Egypt; artificially, from the incineration of marine plants; and from the decomposition of sulphate of soda, &c. It is principally, however, derived from plants growing on the sea-coast;—as the *Salsola sativa*, *S. soda*, *S. tragus*, *Salicornia herba'cea*, *Salicor-*

*nia Arabica*, &c. The Barilla ashes are from the ashes of the *Salicornia Europæa*:—the *Kelp*, *Soade de Varecq*, from the *Fucus vesiculosus* and other varieties:—the *Turkey Barilla*, *Roquette*, *Cendre du Levant*, *Rochet's Alexandrina*, from the *Mesembryanthemum Copticum*:—the *Alicant Barilla*, *Soda Alicanti'na*, *S. Alonensis*, from the *Mesembryanthemum nodiflorum*:—and the *Carthagena Barilla*, from the *Salicornia* and *Salsola*.

The impure subcarbonate, (F.) *Soade du commerce*, consists of subcarbonate of soda, potash, chloride of sodium, clay, and other earthy substances. It is chiefly used for preparing the pure subcarbonate.

SODA, Cardialgia, Pyrosis.

SODA ACETATA, *Sodæ Acetas*, *Ac'etate of Soda*, *Terra foliata mineralis*. This salt is used in similar cases with the acetate of potass.

SODA AERATA, *Sodæ carbonas*—*s. Alonensis*, *Soda*—*s. Bicarbonate of Sodæ carbonas*—*s. Boraxata*, *Borax*.

SODA, CARBONATE OF, *Sodæ Carbonas*, *Carbonas Natricum*, *Soda Aërata*, *Bicarbonate of Soda*, *Carbonate of protoxide of Sodium*, (F.) *Carbonate de Soude*, *S. effervescente*, *S. aërée*, *S. crayeuse*. (*Sodæ subcarb. liq aqua destill. liij.*) Dissolve the subcarbonate of soda, and pass carbonic acid through the solution; set it aside to crystallize. Its use is the same as the subcarbonate, than which it is less caustic, and is better adapted for effervescing draughts.

SODA CAUSTICA, *Protoxide of Sodium*, *Caustic Soda*, (F.) *Soade caustique*, *S. à la Chaux*, *Soade pure*. The impure subcarbonate, treated by quicklime, and consequently deprived of its carbonic acid. It may be used as a caustic, like the *Potassa fusa*, and is even preferable to it, as it does not deliquesce, and run.

SODA, CHLORIDE OF, *Sodæ Chloridum*, *Sodæ Chloruretum*, *Oxy muriate of Soda*. This salt is used as a disinfecting agent; both to remove offensive smells in chambers, and to alter the condition of fetid ulcers.

SODA HISPANICA, *Soda*—*s. Hydrochlorate of Soda*, *muriate of*—*s. Mephite of*, *S. subcarbonate of*.

SODA, MURIATE OF, *Sodæ murias*, *Soda muriat'a*, *S. muriat'ica*, *Alkali mineral'le salinum*, *Sal commun'is*, *Sal culinar'is*, *Sal fontium*, *Sal gemmæ*, *Sal mari'nus*, *Natron muriat'um*, *Sal albus*, *Natrum muriat'icum*, *Common salt*, *Sea salt*, *Hydrochlorinas Natricus*, *Sal fos'silis*, *Sal la'cidum*, *Muria*, *Rock salt*, *Bay salt*, *White salt*, *Quadrichloruret of Sodium*, *Hydrochlorate of protoxide of Sodium*, *Hydrochlorate of Soda*, *Chloruretum Sodii*, *Chloride of Sodium*, (F.) *Sel de Cuisine*. In an impure state, this salt is one of the most abundant of natural productions. It is soluble in 3 parts of water, and is tonic, purgative, and antihelmintic. Externally, stimulant. It is a well known and useful culinary substance.

SODA, NITRATE OF, *Sodæ Nitras*, *Alkali mineral'le nitratum*, *Nitrum Cubicum*, *Nitrate of protoxide of Sodium*, *Protonitrate of Sodium*, *Nitrum Rhomboid'alè*, *Nitras Natricum*. Its virtues are similar to those of the nitrate of potass, for which it has been substituted.

SODA, OXYMURIATE OF, *Soda*, *chlorate of*.

SODA, PHOSPHATE OF, *S. phosphor'ata*, *Subphosphate of protoxide of Sodium*, *Phosphas Natricum*, *Natrum Oxiphosphor'ides*, *Subphosphate of Sodium*, *Alkali mineral'le phosphor'atum*, *Tasteless purging salt*, (F.) *Sel admirable perlè*. Cathartic, in the dose of from  $\overline{3}$ ss to  $\overline{3}$ j.

SODA, SUBCARBONATE OF, *Sodæ Subcarbonas*, *Subcarbonate of protoxide of Sodium*, *Mephite of Soda*, *Natron præparatum*, *Sal Soda*, *Salt of Soda*, *Flos Salis*, *Sag'imen Vitri*, *Salt of Barilla*, *Sal alkali*, *Carbonas Sodæ*, of some. (F.) *Sous-carbonate de Soude*. The impure subcarbonate, dissolved in water; the solution filtered and crystallized. Soluble in two parts of water at 60°. It is much used as an antacid; and, also, as a deobstruent in scrofulous and other affections. Dose, gr. x to  $\overline{3}$ ss.

The dried *Subcarbonate of Soda*, *Sodæ Subcarbonas casic'ata*, *Carbonas Sodæ siccat'um*, (F.) *Sous-carbonate de Soude desséché*, is employed as an antacid and lithontriptic. Dose, gr. x to xv.

SODA, SULPHATE OF, *Sodæ Sulphas*, *Natron vitriol'atum*, *Sal cathart'icus Glauber'i*; *Alkali mineral'le sulphur'icum*, *Natrum sulphur'icum*, *Soda vitriol'ata*, *Sulphus natricus*, *Sal miral'is Glauber'i*, *Ape'rient Salt of Frederick*, *Glauber's Salts*. Obtained from the salt that remains after the distillation of muriatic acid; the superabundant acid being saturated with subcarbonate of soda. It is soluble in three parts of water at 60°; is purgative, and, in small doses, diuretic. Dose,  $\overline{3}$ vj to  $\overline{3}$ x.

The LYMINGTON GLAUBER'S SALTS is a *Sulphate of Magnesia and Soda*, and is obtained from the mother liquor of sea-water, or by dissolving Epsom salt in a solution of Glauber's salt.

SODA, TARTRATE OF, *Soda Tartarizata*, *Tartarized Soda*, *Sal Rupellen'sis*, *Rochelle Salt*, *Sal Polychrest'um Seigneti*, *S. Seignetti*, *Seignette's Salt*, *Natron tartarizatum*, *Turtris Potas'sæ et Sodæ*, *Tartras Potas'sæ et Sodæ*. (*Sodæ subcarb.*, p. 1; *potass. supertart.*, p. 3; *aq. ferr.*, p. 15.) Dissolve the subcarbonate in water; and add, gradually, the supertartrate. Filter the solution, and crystallize. It is a gentle cathartic. Dose,  $\overline{3}$ ss to  $\overline{3}$ j.

SODA VITRIOLATA, *S. sulphate of*.

SODÆ BORAS, *Borax*—*s. Boras alealescens*, *Borax*—*s. Boras supersaturus*, *Borax*—*s. Carbonas*, *Soda*—*s. subcarbonate of*—*s. Carbonas impurus*, *Soda*—*s. Chloras*, *Soda*, *chlorate of*—*s. Murias*, *Soda*, *muriate of*—*s. Nitras*, *Soda*, *nitrate of*—*s. Subboras*, *Borax*—*s. Subcarbonas impura*, *Soda*.

SODII CHLORURETUM, *Soda*, *muriate of*.

SODIUM, *Carbonate of protoxide of Sodæ carbonas*—*s. chloride of*, *Soda*, *muriate of*—*s. Protonitrate of*, *Soda*, *nitrate of*—*s. Protoxide of*, *hydrochlorate of*, *Soda*, *muriate of*—*s. Protoxide of*, *Soda caustica*—*s. Protoxide of*, *nitrate of*, *Soda*, *nitrate of*—*s. Protoxide of*, *phosphate of*, *Soda*, *phosphate of*—*s. Protoxide of*, *subcarbonate of*, *Soda*, *subcarbonate of*—*s. Quadrichloruret of*, *Soda*, *muriate of*—*s. Subborate of* *protoxide of*, *Borax*—*s. Subprotoborate of*, *Borax*—*s. Subprotophosphate of*, *Soda*, *phosphate of*.

SOI-POUR-SOI, 'Self for self.' A law of

development, indicated by M. St. Hilaire; by which like parts unite to like parts, and which is occasionally seen in cases of monstrosity, when two fœtuses are united by the ischia, for example.

SOIE, Sericum.

SOLF, Thirst—s. *Excessive*, Polydipsia.

SOLAMEN INTESTINORUM, Pimpinella anisum—s. Scabiosorum, Fumaria.

SOLANUM, *S. nigrum*, *S. vulgare*, *Common Nightshade*; *Garden Nightshade*, (F.) *Morrelle à fruit noir*. Family, Solanæ. Scz. Syst. Pentandria Monogynia. A narcotic poison.—The *Huile de Morelle* is made, by macerating in oil, for several days, the leaves and fruit of this plant. The oil is anodyne and discutient.

SOLANUM DULCAMA'RA; the *Bittersweet*, *Dulcamara*, *Solanum Scandens*, *Glycypicros*, *Amara dulcis*, *Solanum lignosum*, *στρονχος*, of Theophrastus, *Woody Nightshade*, (F.) *Douce-amère*, *Morrelle grimpante*. The taste of the twigs is bitter, followed by sweetness; hence its name. It has been used in many diseases, as a diuretic and sudorific, especially in chronic rheumatism, humoral asthma, dropsy, various skin diseases, scrofula, and jaundice. Dose in powder, ℞j to ʒj.

SOLANUM ESCULENTUM, *S. tuberosum*—s. *Fœtidum*, *Datura stramonium*—s. *Furiosum*, *Atropa belladonna*—s. *Lethale*, *Atropa belladonna*—s. *Lignosum*, *S. dulcamara*.

SOLANUM LYCOPER'SICUM; the *Love-apple plant*. The fruit of this, called *Tomato* or *Love-apple*, (F.) *Pomme d'Amour*, is much eaten in the United States; and with the French, Spaniards, Portuguese, &c., forms an esteemed sauce.

SOLANUM MAGNUM VIRGINIANUM RUBRUM, *Phytolacca decandra*—s. *Maniacum*, *Atropa belladonna*—s. *Maniacum*, *Datura stramonium*—s. *Melanocerasus*, *Atropa belladonna*—s. *nigrum*, *Solanum*.

SOLANUM MELON'GENA, *Melongena*, *Egg plant*, (F.) *Subergine*. The *Mud Apple plant*; a native of Asia, Africa, and America. Its oblong, egg-shaped fruit, *Pomum Melon'gena*, *Malum insalanum*, is prepared in soups and sauces in those countries, like the tomato.

SOLANUM RACEMOSUM AMERICANUM, *Phytolacca decandra*—s. *Scandens*, *S. dulcamara*.

SOLANUM SANCTUM; the *Palestine Nightshade*. The fruit of this is globular, and is much eaten in the countries where it is a native.

SOLANUM TUBEROSUM, *Bata'bas*, *Solanum esculentum*, *Papas Americana*, *Pappus Americana*, *Americana Tuberosum*, *Bata'ta Virginia'na*; the *Potato*, (F.) *Pomme de Terre*. A native of Peru. A nutritious and wholesome vegetable; one of the most useful, indeed, that exists. One hundred pounds of potatos afford ten pounds of starch, which is equal to arrow-root, as a nutrient and demulcent. It is called *Potato Flour*, *P. Starch*, *French Sugo*, *Petit Sague*, *Common Arrow-root*, &c.

SOLANUM URENS, *Capsicum annuum*—s. *Vesicarium*, *Physalis*—s. *Vulgare*, *Solanum*.

SOLAR, *Sola'ris*. Having rays like the sun. The SOLAR PLEXUS, *Centrum commu'nè*, *Cerbrum abdominale*. A collection of ganglions and filaments, interweaving and anastomosing with each other repeatedly, and belonging to

the system of the great sympathetic. This vast plexus, lying on the vertebral column, the aorta, and the pillars of the diaphragm, has a very irregular shape. The ganglions and filaments, composing it, are soft, reddish, and almost all issue from the semilunar ganglions. It receives, also, branches from the pneumogastric. It seems to be chiefly intended for the aorta, and accompanies all its branches; furnishing many secondary plexuses, which are called the *infra-diaphragmatic*, *celiac*, *superior mesenteric*, *inferior mesenteric*, *renal* or *emulgent*, *spermatic*, &c.

SOLDANELLA, *Convolvulus soldanella*.

SOLE, *Solum*, *Pe'dion*, *Peza*, *Pelma*, *Plantaris superficies pedis*, *Facies concava* seu *inferior* seu *Planum seu Concavum* seu *Pars inferior* seu *Plantis* seu *Planta Pedis*, (F.) *Plante du Pied*. The sole of the foot; the under surface of the foot.

SOLEAIRE, Soleus.

SOLEN, Cradle.

SOLENA'RIUM, from *σωλην*, 'a canal.' An instrument of surgery, representing a kind of gutter, in the cavity of which the penis was placed, like a limb in a *cradle*, (q. v.)—Galen. The word *Solen* itself—*σωλην*, *Canalis*—was used, in antiquity, for a grooved channel, in which a fractured limb was placed.

SOLE'US, *Gastrocnemius inter'nus*, *Tibio-calcaneus*, (Ch. ;) (F.) *Solaire*, from *solea*, 'a sole of a shoe.' A muscle, situate at the posterior part of the leg. It is broad, flat, and almost oval; and is attached, above, to the posterior edge of the fibula, to the oblique line on the posterior surface, and to the inner edge of the tibia. It terminates, below, by a large tendon, which unites to that of the gastrocnemius externus, to form the tendo Achillis. This muscle extends the foot on the leg, and conversely.

SOLID, *Solidus*, *Stercos*. A body, whose integrant molecules are so united by the force of cohesion, that they will not separate by their own weight. The solids, in the human body, are the bones, cartilages, tendons, muscles, ligaments, arteries, veins, nerves, membranes, skin, &c. The anatomy, or rather study, of the solids, is called *Stereology*, from *στερεος*, 'solid,' and *λογος*, 'a discourse.'

SOLIDA'GO VIRGAU'REA, *Virga aurca*, *Herba dorca*, *Conyza coma aurca*, *Symphytum*, *Petra'rum*, *Elichrysium*, *Consolida Saracenicca*, *Golden Rod*. Nat. Ord. Compositæ Corymbiferae. Scz. Syst. Syngenesia superflua. (F.) *Verge d'or*. The leaves and flowers have been recommended as aperients and tonics, in urinary diseases, and in internal hemorrhage.

SOL'IDISM. The doctrine of those physicians, who refer all diseases to alterations of the solid parts of the body. To the believers in this doctrine, the appellation *Solidist* has been given.

The Solidists think, that the solids alone are endowed with vital properties; that they alone can receive the impression of morbid agents, and be the seat of pathological phenomena. Solidism is, perhaps, the prevalent doctrine of the present day. It is scarcely necessary to say, that, in all our investigations, the condition of both solids and fluids must be regarded.

SOLIUM, *Baignoire*.

SOLUBILITÛ, *Solubilitas*. That property

of a body, by virtue of which it can be dissolved in a menstruum.

TABLE OF THE SOLUBILITY OF SOME SUBSTANCES IN WATER.

| NAMES OF SALTS.                | Solubility in 100 parts water. |          |
|--------------------------------|--------------------------------|----------|
|                                | at 60°.                        | at 212°. |
| <i>Acids.</i>                  |                                |          |
| Benzoic, - - -                 | 0.208                          | 4.17     |
| Citric, - - -                  | 133                            | 200      |
| Oxalic, - - -                  | 50                             | 100      |
| Tartaric, - - -                | very soluble                   |          |
| <i>Salts.</i>                  |                                |          |
| Acetate of Potass, -           | 100                            |          |
| — Soda, - - -                  | 35                             |          |
| Carbonate of Ammonia, -        | 50                             |          |
| — Magnesia, -                  | 2                              |          |
| — Potass, - - -                | 25                             |          |
| — Soda, - - -                  | 50                             |          |
| Chlorate of Potass, -          | 6                              |          |
| — Soda, - - -                  | 35                             | 35       |
| Muriate of Ammonia, -          | 33                             | 100      |
| — Lime, - - -                  | 200                            |          |
| — Magnesia, -                  | 100                            |          |
| — Potass, - - -                | 33                             |          |
| — Soda, - - -                  | 35.42                          | 36.16    |
| Nitrate of Potass, -           | 14.25                          | 100      |
| — Soda, - - -                  | 33                             | 100      |
| Phosphate of Soda, -           | 25                             | 50       |
| Sulphate of Ammonia, -         | 50                             | 100      |
| — Copper, - - -                | 25                             | 50       |
| — Iron, - - -                  | 50                             | 100      |
| — Magnesia, -                  | 100                            | 133      |
| — Potass, - - -                | 6.25                           | 20       |
| — Soda, - - -                  | 37                             | 125      |
| Subborate of Soda, -           | 8.4                            | 16.8     |
| Supersulphate of Potass, -     | 5.0                            | 100      |
| Supertartrate of Potass, -     | 1.5                            | 3.3      |
| Tartrate of Potass, -          | 25                             |          |
| Tartrate of Potass and Soda, - | 20                             |          |
| — Antimony, }                  | 6.6                            | 33       |
| — Potass, }                    |                                |          |

### SOLUM, Sole.

**SOLUTIO ALEXITERIA GAUBIANA**, see Disinfection—s. Ammonia subcarbonatis, Liquor ammonia subcarbonatis—s. Arsenicalis, Liquor arsenicalis—s. Arsenicata, Liquor arsenicalis—s. Arsenitis kalica, Liquor arsenicalis—s. Calcis, Liquor calcis—s. Camphoræ æthereæ, Tinctura æthereæ camphoræ—s. Camphoræ oleosa, Linimentum camphoræ—s. Guaiaci gummosa, Mistura guaiaci—s. Muriatis baryta, Baryta, muriate of—s. Muriatis calcis, see Calcis murias—s. Muriatis Ferrici æthereæ, Tinctura seu alcohol sulfurico-æthereus ferri—s. Muriatis hydrargyri oxygenati, Liquor hydrargyri oxymuriatis—s. Resinæ Guaiaci aquosa, Mistura Guaiaci—s. Subcarbonatis ammoniaci spirituosæ, Spiritus ammonia.

**SOLUTIO SULPHATIS CUPRI COMPOSITA**, *Aqua vitriol'ica carulea*, *Sydenham's Styptic Water*. (Sulph. cupri, ℥ij, alumin., acid. sulph., āā ℥ij, aqua, ℥vij; dissolve, and filter.)

**SOLUTION, Solu'tio, Lysis**, (F.) *Dissolution*. An operation, which consists in dissolving a solid body in a menstruum. Likewise, the product of such operation.

It means, also, with many, the termination of a disease:—with others, a termination accompanied by critical signs;—and, with others, again, it is synonymous with crisis.

A **SOLUTION OF CONTINUITY** is any division of parts previously continuous;—as a wound, a fracture, &c.

**SOLUTION OF ACETATE OF AMMONIA**, Liquor

ammonia acetatis—s. of Acetate of morphia, Liquor morphina acetatis—s. of Alkaline iron, Liquor ferri alkalinii—s. of Alum, compound, Liquor aluminis compositus—s. of Ammoniated copper, Liquor cupri ammoniati—s. Arsenical, Liquor arsenicalis—s. of Charcoal, concentrated, see Tinctura catechu—s. of Corrosive sublimate, Tinctura hydrargyri oxymuriatis—s. Fowler's, Liquor arsenicalis—s. of Hydriodate of potass, Liquor potassæ hydriodatis—s. of Iron, nitrated, see Tinctura ferri muriatis—s. of Lime, Liquor calcis—s. of Monro, Liquor of Monro—s. of Oxymuriate of mercury, Liquor hydrargyri oxymuriatis—s. Plenck's, see Hydrargyri oxydum cinereum—s. *de Potasse*, Liquor Potassæ—s. of Potass, Liquor potassæ—s. of Subacetate of Lead, Liquor plumbi subacetatis—s. of Subacetate of lead, diluted, Liquor plumbi subacetatis dilutus—s. of Subcarbonate of potass, Liquor potassæ subcarbonatis—s. of Tartarized antimony, Vinum antimonii tartarizati—s. of Van Swieten, Liquor hydrargyri oxymuriatis.

### SOLUTIVUS, Laxative.

**SOLVENS MINERALE**, Liquor arsenicalis.

**SOLVENT**, (F.) *Fondant*, from *sol'vere*, 'to dissolve.' A medicine supposed to possess the property of dissolving or removing obstructions and extraneous substances. Thus we have *solvents* of the stone in the bladder, &c.

**SOLVENT, MINERAL**, Liquor arsenicalis.

**SOLVENTS, Dissolventia.**

**SOMA**, Body, Corpus.

**SOMACETICS**, Gymnastics.

**SOMATOL'OGY**, *Somatol'ogia*, from *σωμα*, 'the body,' and *λογος*, 'a discourse.' A treatise on the human body. Anatomy, (q. v.)

**SOMATOTOMY**, Anatomy.

**SOMMEIL**, Sleep.

**SOMNAMBULISM**, *Somnambula'tio*, *Hypnotab'esis*, *Hypnob'asis*, *Selenoga'mia*, *Nyctobate'sis*, *Seleniasis*, *Selenias'mus*, *Somnambulis'mus*, *Nyctob'asis*, *Noctambula'tio*, *Paroni'ria ambulan's*, *Sleep-walking*, *Noctisur'gium*, *Oncirodyn'ia acti'va*, *Somno-rigil*. A condition of the brain, which occasions the individual to execute, during sleep, some of those actions that commonly take place when awake. It has been imagined, that the somnambulist is guided solely by his internal senses; but there are many facts which induce the belief that the external senses are not always entirely suspended. The causes of somnambulism are very obscure; and the principal indication of treatment is,—so to arrange the bed-chamber of the somnambulist, that he cannot get out of it during sleep; and to avoid suppers, as well as all bodily and mental excitement.

**MAGNETIC OR ARTIFICIAL SOMNAMBULISM** is that peculiar nervous condition, into which individuals have been occasionally thrown by the *Animal Magnetizer*. It has occurred only in those of weak nervous temperament; in hysterical females, &c.

**SOMNAMBULIST**, *Somnambulus*, *Hypnotab'utes*; from *somnus*, 'sleep,' and *ambula're*, 'to walk,' *Noctambulus*. A sleep-walker.

**SOMNIFEROUS**, *Hypnot'icus*, *Soporif'ic*, *Soporif'erous*, *Soporati'vus*. A medicine, which causes sleep.

**SOMNIUM**, *Enyp'nion*, *Insomnium*, a *Dream*,

(F.) *Rêve, Songe*. A confused assemblage, or accidental and involuntary combination of ideas and images, which present themselves to the mind during sleep. Dr. S. Mitchell, of New York, used the word *Somnium* to signify the state between sleeping and waking, in which persons perform acts of which they are unconscious.

For 'waking dreams,' see Hallucination.

Those distressing dreams which occur during a state of half sleep, are called, by the French, *Rêvasseries*.

SOMNO-VIGIL, Somnambulism.

SOMNOLENCY, *Somnolentia, Heaviness, Carus Lethargus Cutaphora, Cutaphora, Coma Somnolentum, Caro'sis, Slumber, (F.) Assoupiement*. A state intermediate between sleeping and waking. It is often a symptom of disease.

SOMNUS, Sleep.

SOMPUS, Sleep.

SON, Furfur.

SONCHUS OLERA'CEUS, *Cicer'bita, Sow Thistle, (F.) Laiteron doux*. Family, Cichoraceæ. Most of the species of *Sonchus* abound with a milky juice, which is very bitter, and said to possess diuretic virtues.

SONDE, Sound, Specillum.

SONDE CANNÉE, Director.

SONDE D'ANEL. A very fine stylet of silver, awl-shaped at one end. It is used for probing the lachrymal passages through the punctum lachrymale.

SONDE DE BELLOC. An instrument, invented by Belloc for plugging the nasal fossæ in cases of hemorrhage. It consists of a curved, silver canula, open at both ends, and furnished with a button. The instrument is passed through the nares to the throat; and a plug is attached to the button, so that, when the instrument is drawn forwards through the nose, the posterior nostril is stopped.

SONDE BRISÉE (F.) *Eyed probe*. A long, straight stylet, composed of two parts, which may be screwed to each other; blunt at one end, and furnished at the other, with an eye: so that it may be used either as a probe for punctured wounds, or for a seton needle.

SONDE A CONDUCTEUR (F.) A modification of the ordinary catheter;—to facilitate the changing of catheters, without the fear of making false passages. It is a common catheter, open at its beak. The *Stylet* or *Mandrin* is one half longer than that of the ordinary catheter. To use the instrument, the stylet is pushed into the cavity of the bladder through the catheter. The latter is then withdrawn by slipping it over the stylet, which is kept in its place, and serves as a guide to a fresh catheter.

SONDE DE LAFOREST. A small, crooked canula, used for probing the nasal duct from below upwards, and for throwing up injections into it.

SONDE OU PINCE DE HUNTER. A cylindrical, silver canula; of the size of a common catheter; open at both extremities, and containing a wire of iron, one of the ends of which is split into two parts; each being terminated by a small scoop, and separating from each other by virtue of their elasticity, when pushed out of the canula, and again approximating when drawn

in. It has been used for laying hold of small calculi in the urethra.

SONDE DE VARECQ, Soda.

SONGE, Somnium.

SONUS VOCIS, Accent.

SOOJA. See *Dolichos*.

SOOT, Fuligo—s. Wart, Cancer, chimney-sweeper's.

SOPHIA, *Sisymbrium sophia*—s. *Chirurgorum, Sisymbrium sophia*.

SOPHISTICATION, Falsification.

SOPHORA HEPTAPHYL'LA, *Anticholeric'ica*. Family, Leguminosæ. *Sex. Syst.* Decandria Monogynia. The root and seeds of this shrub are intensely bitter, and are said to have been found useful in cholera, colic, dysentery, &c.

SOPHORA TINCTO'RIA; *Podalyria Tinctoria, Indigofera, Wild Indigo, Indigo Weed, Broom*. An American plant, the taste of whose root is unpleasant, subacid, and nauseous—very similar to *Ipecacuanha*. In a large dose, the bark of the root acts both as an emetic and cathartic. It has been considered antiseptic and febrifuge, and has been used, in the form of fomentation or cataplasm, in phagedenic and gangrenous ulcers. A liniment, prepared by simmering the cortical part of the root in cream, has been found an efficacious application to sore nipples and to ulcerated breasts.—Coxe.

SOPHROSYNE, Temperance.

SOPOR. A profound sleep, (q. v.) from which the person can be roused with difficulty. It is a symptom in many of the neuroses.

SOPOR CAROTICUS, Carus.

SOPORATIVUS, Somniferous.

SOPORIFIC, Somniferous.

SORA, Essera.

SORB TREE, *Sorbus domestica*.

SORBASTRELLA, *Pimpinella saxifraga*.

SORBIFA'CIENS, *Sorbefaciens*, from *sorbere* 'to suck in,' and *fa'cere*, 'to make.' A remedy that promotes absorption.

The following are the chief Sorbefaciens.

|                          |                          |
|--------------------------|--------------------------|
| Acida Vegetabilia,       | Spongia usta,            |
| Alkalia,                 |                          |
| Ammoniacum,              | Compression,             |
| Brominum,                | (Methodical,)            |
| Galbanum,                | Friction,                |
| Hydrargyri Præparata,    | Mental Sorbefaciens,     |
| Iodinum,                 | (Imagination, Emotions.) |
| Liquor Calcis Muriatiss, |                          |

SORBIER DES OISELEURS, *Sorbus acuparia*.

SORBUM. See *Sorbus domestica*.

SORBUS, *Cratægus aria, S. domestica*.

SORBUS ACUPA'RIA, *Mes'pilus, Mountain Service, Mountain Ash, Quicken Tree, Roan Tree, (F.) Sorbier des Oiseleurs*. The berries of this tree are employed for similar purposes as the last.

SORBUS DOMESTICA, *Sorbus, Oie, Service* or *Sorb Tree, (F.) Cormier*. Family, Rosaceæ. *Sex. Syst.* Icosandria Trigynia. The fruit of this tree, *Sorbum*, is astringent, and has been recommended in diarrhœa and dysentery. It is given in the form of rob. A kind of cider is made from it, and also brandy.

SORDES, *Rhypos*. A dirty-looking sanies, discharged from ulcers. The French call an

ulcer, exhibiting such an appearance, *sordid*. Also, dirt of any kind.

**SORDES**, Ichor, Saburra—s. Ventris, Excrement.

**SORE**, Ulcer.

**SORE, BAY**. A disease, which Mosely considers to be a true cancer. It is endemic in the Bay of Honduras.

**SORE THROAT**, Cynanche—s. Putrid, Cynanche maligna—s. Throat, ulcerous, Cynanche maligna.

**SORENESS**, from Teut. *seer*, (G.) *Sehr*, 'very,' Sax. *parap'sis acris teneritu'do*. Painful uneasiness or tenderness, local or general, on being touched with a pressure, that does not usually excite distressing feeling. Often, a febrile symptom. Also, the tenderness of a wound, ulcer, &c.

**SORGHUM**, Panicum Italicum.

**SORORIA'TIO**. The period at which the breasts of the female become developed. A young maiden, whose mammae begin to show was formerly called *sororians virgo*.—Plautus.

**SORREL**, COMMON, Rumex acetosa—s. French, Rumex scutatus—s. Garden, Rumex scutatus—s. Salt of, Potass, oxalate of—s. Roman, Rumex scutatus.

**SOTIRELLA**. Ancient name of a medicine, composed of *opium*, several *narcotics*, *nutmeg*, *saffron*, *camphor*, and *seal*. It was used in certain diseases of the teeth.

**SOUBRESAUT**, Subsultus tendinum.

**SOUCHERLOON**, Bit noben.

**SOUCHET DES INDES**, Curcuma longa—s. *Odorant*, Cyperus longus—s. *Rond*, Cyperus rotundus.

**SOUCI**, Calendula officinalis, Panophobia—s. *des Champs*, Calendula arvensis.

**SODE AÈRE**, Sodæ carbonas—s. *Borate sursaturé de*, Borax—s. *Carbonate de*, Sodæ carbonas—s. *Caustique*, Soda caustica—s. *à la Chaux*, Soda caustica—s. *du Commerce*, Soda—s. *Crayeuse*, Sodæ carbonas—s. *Effervescente*, Sodæ carbonas—s. *Pure*, Soda caustica—s. *Sousborate de*, Borax—s. *Souscarbonate de*, Soda, subcarbonate of.

**SOUFFLE**. See Murmur, respiratory.

**SOUFRE**, Sulphur—s. *Sublimé*, Sulphur sublimatum.

**SOUND**, *Specillum*, *Stylus*, *Exploratorium*. An instrument used, by surgeons, to discover whether there is a stone in the bladder. It is usually made of highly polished steel, and is shaped like the catheter.

(F.) *Sonde*. [This word has, however, a more extensive signification. It means, different instruments, introduced into cavities of certain organs, or into wounds, fistulas, &c. to investigate their condition; or to fulfil some therapeutic indication.] See *Sonde*.

**SOUND, Bruit**—s. Bellows, Rasp, Saw, &c. see *Bruit*—s. Auricular, Apyromele.

**SOUNDING**, Searching.

**SOUPIR**, Sigh.

**SOURCIL**, Supercilium.

**SOURCILIER**, Corrugator supercilii, Superciliary.

**SOURDS-MUETS**. See Mutitas surdorum.

**SOURIS**, Nictation.

**SOUS-ACROMIO-CLAVI-HUMÉRAL**, Deltoïd—s. *Atloïdien*, Subatloïdeus—s. *Azoidica*,

Subaxoïdeus—s. *Clavier*, Subclavius—s. *Costaux*, Intercostal—s. *Cutané*, Subcutaneus—s. *Épineux*, Infra-spinatus—s. *Lingual*, Sublingual—s. *Maxillaire*, Submaxillary—s. *Maxillo-labial*, Depressor anguli oris—s. *Mental*, Submental—s. *Métacarpo-latéri-phalangien*, Prior annularis—s. *Optico-sphéno-scléroticain*, Rectus inferior oculi—s. *Orbitaire*, Suborbitar—s. *Pubio-coccy-gien*, Levator ani—s. *Pubio-crété-tibial*, Gracilis—s. *Pubio-prétibial*, Gracilis—s. *Pubio-trochantérien-externe*, Obturator externus—s. *Pubio-trochantérien-interne*, Obturator internus—s. *Scapulaire*, Subscapularis—s. *Scapulo-trachinien*, Subscapularis—s. *Sels*, see Salt.

**SOUTHERNWOOD**, Artemisia abrotanum—s. Field, Artemisia campestris—s. Maritime, Artemisia maritima—s. Tartarian, Artemisia santonica.

**SOWBREAD**, Arthanita, Cyclamen.

**SOY**. See Dolichos soja.

**SPA, MINERAL WATERS OF**. A town 7 miles S. E. of Léige, where there are several springs, possessing a sharp, acidulous taste; containing much carbonic acid, carbonates of iron, lime, and magnesia; subcarbonate of soda, and muriate of soda. The water is much used as a tonic.

**ARTIFICIAL SPA WATER**. *Sodæ subcarb.*, gr. vij; *magnesie carbon.* ℥j; *limat. ferri*, gr. iij; *sodæ muriat.*, gr. j; *aque*, ℥iij. Impregnate with gas from *marble powder* and *sulph. acid.*, āā ℥x.

**SPADO**, Eunuch.

**SPADONES**. See Castrati.

**SPAG'IRISTS**, from *σπαω*, 'I separate,' and *αγειρω*, 'I assemble.' A sect of physicians, who pretended to account for the changes that occur in the human body in health and disease, in the same manner as the chymists, of their day, explained those of the inorganic kingdom.—*Médecina Spagirica* was, likewise, called *Hermetica*; because it was believed that the means of cure, adopted in it, had been found in the books of Hermes.

**SPAGYRIA**, Chymistry.

**SPANDARAPUM**, Sparadrapum.

**SPANISH FLY**, Cantharis.

**SPANOP'GON**, from *σπανος*, 'rare,' and *πρωγον*, 'beard.' Loss of beard, or thinness of beard.—Vogel.

The Greeks called those who had little beard, or who had lost it, *Spanopog'ones*, *σπανοπρωγονες*.

**SPARADRAPIER**, the name of a machine for spreading sparadrap. A *Plaster machine*. It consists of a table, with two raised pieces, movable, and furnished with points; by which the cloth can be stretched, and a lamina or blade of metal to extend the plaster over it.

**SPARADRA'PUM**, *Sparadrapus*, *Tela emplastica*, *Spandarapum*, (F.) *Sparadrap*. Any adhesive plaster spread upon linen or paper. The chief sparadrap are the following:

**SPARADRAPUM PRO FONTIC'ULIS**, *Issue Plaster*; which is sometimes made of *simple diachylon*, ℥ij; *Burgundy pitch*, and *sarcocolla*, each ℥iv; *common turpentine*, ℥j. Spread upon linen and polished with a moistened calendering glass rubber.

**SPARADRAPUM VIRIDE**, *Corn Plaster*. This may be made of *yellow wax*, ℥ij; *Burgundy*

*pitch*, ζ̄xij; *common turpentine*, ζ̄vj; *verdigris*, ζ̄iij, spread on cloth, and polished.

*Kennedy's Corn Plaster* is made of *yellow wax*, h̄j; *Venus Turpentine*, ζ̄ij; *verdigris*, ζ̄j.

SPARADRAPUM seu TELA GALTERI, *Defensive Plaster*, (F.) *Toile de Gautier*. This is made of *olive oil*, lbss; *suet*, ζ̄iv; *wax*, ζ̄xx; *litharge*, *common turpentine*, *thus*, and *mastic*, āā ζ̄ij; *bole armeniac*, *flour*, āā ζ̄j. Pour it, while liquid, upon cloth, and spread. To issues, and to keep on dressings.

SPARADRAPUM ADHÆSIVUM, *Adhesive Plaster*. A spread plaster of the *Emplastrum adhæsivum*, (q. v.) It is, also, called *Strapping*.

The ENGLISH COURT PLASTER is a Sparadrap, (F.) *Taffetas agglutinatif*, *T. gommé*, *Taffetas d'Angleterre*, *Sc'ixum Anglicum*, *Emplastrum Anglicum*, *E. Anglica'num*, *E. adhæsivum Woodstock'ii*, *E. Iethyocol'la telæ inductum*, *E. Glutinofum*, *Tela Iethyocol'la glutinans*. It is made by stretching black silk, and brushing it over with a solution of *isinglass* ζ̄j, in *proof spirit*, ζ̄xij, to which *tinct. benz.* ζ̄ij, are added. When dry, this is repeated five times; after this, two coats are given it of a solution of *tereb. chia* ζ̄iv, in *tinct. benz.* ζ̄vj, which renders it less liable to crack.

SPARAGMA, Laceration.

SPARAGMOS, Spasm.

SPARALIUM, *Clyster uteri'nus*. An injection into the vagina.—Ruland and Johnson.

SPAREDIA, a ligature, covered with the white of egg.—Paracelsus.

SPAR'GANON, *σπαργανον*, 'swathing clothes,' forming a kind of bandage, with which children were formerly surrounded.—Foesius. Also, *Fascia*. (q. v.)

SPARGANOSIS, *Intumescen'tialactea mammarum*, *Mastody'nia polygala*, *σπαργανωσις*, from *σπαργανω*, 'I swell.' Extreme distention of the breasts by milk.—Galen.

SPARGANOSIS PUPERERARUM, *Phlegmatia dolens*.

SPARROWGRASS, *Asparagus*.

SPARTIUMSCOPARIUM, *Genis'ta*, *Broom*, *Cytisogenista*, *G. Tinetoria*, (F.) *Genet. Family*, *Leguminosæ*. *Sex. Syst.* *Diadelphia Decandria*. *Broom Tops*—*Spartii Cacumina*—have a bitter taste, and are possessed of diuretic properties. They have been used in dropsies. Dose, of the powder, ℞j to ζ̄j. All the genistæ have similar virtues.

A decoction of the genista, along with cauterization of the pustules under the tongue, has been recommended in hydrophobia.

SPASM, *σπασμος*, *Sparag'mos*, from *σπασω*, 'I draw.' The Greeks gave this name to all kinds of convulsion. It is now usually applied to involuntary, muscular contractions; and these, again, have been divided into *tonic spasms* (see *Tetanus*), which consist in complete rigidity and immobility of the muscles, that are the seat of it; and into *clonic spasms*, which consist in alternate contractions and relaxations, (see *Convulsion*.)

Cullen has a class, *Spasmi*.

SPASM, CLONIC, *Convulsion*—s. *Cynic*, see *Canine laugh*—s. with *Rigidity*, *Tetanus*.

SPASMODES, *Convulsive*.

SPASMODIC, *Spasmodic*.

SPASMOL'OGY, *Spasmol'gia*, from *σπασμος*, 'spasm,' and *λογος*, 'a treatise.' A treatise on spasms.

SPASMOT'ICUS, *Spas'ticus*, *Spasmod'ic*. Any thing relating to spasm. Also, an anti-spasmodic. *Morbi constrictio'rii*, *M. spasmol'ici*, &c., are diseases accompanied with spasm.

SPASMUS, *Convulsion*—s. *Glottidis*, *Asthma thymicum*—s. *Maxillæ inferioris*, *Trisimus*.

SPAS'NIA. A term, used by Mercurialis to designate the lancinating pain, produced, at times, in the chest by violent fits of coughing.

SPASTICUS, *Spasmodic*, *Tonic spasm*.

SPATHA, *Hypaleiptron*.

SPATHES'TER, from *σπασω*, 'I draw.' (?) A surgical instrument, used for drawing the prepuce over the glans, when too short.—P. Anman.

SPATHOMELE, *Spatula*.

SPATHULA FCETIDA, *Iris foetidissima*.

SPATLĒ, *σπατλή*, 'human excrement.' A liquid fecal evacuation. Excrement, (q. v.)—Hippocr.

SPATULA, Diminutive of *Spatha*, *σπαθη*, 'a broad-sword.' *Spathome'le*, *σπαθομηλη*, *Specillum latum*. An instrument, used for spreading plasters, stirring ointments, &c.

SPEARWORT, *Ranunculus flammula*.

SPECIES, *Powders*, compound—s. *Aromaticæ*, *Pulvis cinnamomi compositus*—s. *Diacinnamomi*, *Pulvis cinnamomi compositus*—s. *Diacretæ*, *Pulvis cretæ compos.*—s. *Dialapæ*, *Pulvis jalapæ compositus*—s. *Diambæ sine odoratis*, *Pulvis cinnamomi compositus*—s. *Diatragacanthæ frigidæ*, *Pulvis tragacanthæ compositus*—s. *Hieræ picræ*, *Pulvis aloes cum canellâ*—s. *Lætificantes Rhazis*, *Pulvis cinnamomi compositus*—s. e. *Scordio cum opio*, *Pulvis cretæ compositus cum opio*—s. e. *Scordio sine opio*, *Pulvis cretæ compositus*.

SPECIFICUM PARACELSI, *Potassæ sulphas*.

SPECIFIC, *Specificus*. A substance to which is attributed the property of removing, directly, one disease rather than any other. It is doubtful whether any such remedy exists. *Mercury* in syphilis, and *sulphur* in the itch have been regarded as the strongest examples we possess.

SPECIL'LUM, *Melē*, *Stylus*, from *spe'cio*, 'I examine,'—*Specul'ron*, *Spicil'lum*: a probe, (F.) *Stylēt*, *Sondē*, (q. v.) A surgical instrument, employed for examining wounds, fistulas, and for passing setons, &c. It is usually formed of silver; and is terminated, at one end, by an olive-shaped button. The *eyed probe* has an aperture at the other extremity.

SPECILLUM, *Evericulum*, *Hypaleiptron*, *Sound*—s. *Auricularium*, *Apyromelē*—s. *Cereum*, *Bougie*—s. *Latum*, *Spatula*—s. *Minus*, *Melotis*.

SPECLARION, *Specillum*.

SPEC'TACLES, *Conspic'illa*, (F.) *Bscietes*, *Lunettes ordinaires*, *Conservés*. Glasses to assist the sight; arranged so as to be adapted to both eyes at the same time. These glasses are more or less *convex* or *convex*, according as the sight is more or less short (*Myopic*;) or long (*Presbyopic*.)

SPECUL'ARIS LAPIS. A transparent mi-

neral, but of what nature is not clear, which was formerly employed in epilepsy.

**SPECULUM**, *Catop'ter*, *Diop'tron*, *Diop'tron*. In Latin, 'a mirror.' In *surgery*, it means different instruments for dilating cavities, and facilitating their examination. See *Dilator*. There are various instruments of this kind,—the *S. Ani*, *S. Matricis*, *S. Oculi*, *S. Oris* (F.) *Baillon*, *S. Gutturis*, *S. Vesicæ*.

**SPECULUM CITRINUM**, Orpiment—s, *Indicum*, *Ferri limatura*—s. *Lucidum*, *S. lucidum*—s. *Oris*, *Glossocatochus*—s. *Veneris*, *Achillea millefolium*.

**SPEECH**, Voice, articulated.

**SPEECHLESSNESS**, *Mutitas*.

**SPEEDWELL**, *Brooklime*, *Veronica beccabunga*—s. *Female*, *Antirrhinum elatine*—s. *Officinal*, *Veronica*.

**SPELTRUM**, *Zincum*.

**SPERM**, *Spermat'ic fluid* or *liquor*, *Sem'inal fluid*, *Seed*, *Semen*, *S. viril'e* seu *masculi'num*, *Genita'l'e*, *Humor genita'lis* seu *seminal'is*, *Uri'na genita'lis*, *Genitura*, *Sperma*, *S. viril'e*, *Tho're*, *Tho'rus*, *Lac maris*, *Male's milk*, *Propagatory* or *genital liquor*, *Vital'e virus*, *Vital* or *quickening zennu*, from  $\sigma\pi\epsilon\iota\omega$ , 'I sow.' A whitish, viscid fluid, of a peculiar smell, secreted by the testicles, whence it is carried by the *vasa deferentia* to the *vesiculæ seminales*, to be thrown into the *vagina*, during coition, through the *ejaculatory ducts* and the *urethra*. It is the *fecundating fluid*, and must come into actual contact with the *germ* of the *female*. The *Aura sem'inis* is incapable of effecting *fecundation*. The *semen*, at the time of *emission*, is composed of two different fluids; the one *liquid* and *milky*, which is considered to be the *secretion* of the *prostate*;—the other, *white*, and as thick as *mucilage*, the *product* of the *testicular secretion*. The *sperm* contains, according to *Vauquelin*, 900 parts of *water*, 50 of *animal mucilage*, 10 of *soda*, and 30 of *calcareous phosphate*.

*Microscopic observations* seem to show, that, like many other *animal secretions*, it contains *animalcules*—*Spermatoz'oa*, (q. v.)

By *careful examination*, according to *Wagner*, other *minute*, *round*, *granulated bodies* may almost always be detected, which are in all cases much less *numerous* than the *spermatozoa*. These *bodies* he calls *seminal granules*, (q. v.) *Pure sperm*, he considers, in its most perfect state, consists principally of *seminal animalcules* and *seminal granules*. Both of which are enveloped in a *small quantity* of *fluid*.

**SPERMACETI**, *Cetaceum*—s. *Whale*, see *Cetaceum*.

**SPERMACRASIA**, *Spermatorrhœa*.

**SPERMATIC**, *Spermat'icus*, *Seminal'is*. That which relates to the *sperm*. A name given to different parts, connected with the *organs* of *generation*.

The **SPERMATIC ARTERIES**, *A. Spermaticæ*, *A. præparan'tes*, *Artères testiculaires*, *A. de l'ovaire* (Ch.) are two in number;—one on each side,—and arise from the *sides* of the *aorta*, sometimes from the *renal arteries*. They descend, almost *vertically*, at the *sides* of the *vertebral column*, and are distributed differently in the two sexes. In *man*, the *spermatic artery*, situate at the *side* of the *vas deferens*, issues by the *abdominal ring*; gives *numerous ramifica-*

*tions* to the *spermatic chord*, and divides into two *fasciculi* of *branches*, one of which goes to the *testicle*,—the other to the *epididymis*. In the *female*, the *spermatic artery* dips into the *pelvis*, and passes to the *ovarium*, *Fallopian tube*, and *round ligament*.

The **SPERMATIC VEINS** are two or three in number, on each side. They accompany the *spermatic artery*, and open:—those of the *right*, into the *vena cava inferior*:—those of the *left*, into the corresponding *renal vein*: These veins form, above the *testicle*, a kind of *venous network*, called, by some, the *Spermat'ic Plexus*; and another *plexus* before the *psaos muscle*, called the *Corpus pampiniforme*.

The **SPERMATIC PLEXUSES** of *nerves*, *Plexus testiculares*, are two in number, and are furnished by the *renal plexuses*. Their *filaments*, called *Spermat'ic nerves*, follow the *arteries* of the same name to the *testicle* in *man*; and to the *ovary* and *Fallopian tube* in the *female*. They cannot be traced into the *substance* of those *organs*.

The **SPERMATIC** or **TESTICULAR CHORD**, *Funiculus Spermaticus*, *Corpus varicosum*, (F.) *Cordon spermaticum* ou *testiculaire*. The *vascular* and *nervous chord*, by which the *testicle* is *suspended*. It is composed of the *spermatic artery* and *veins*; of other *small vessels*; of *lymphatics*; of *nervous filaments* from the *spermatic plexus*, and from the *genito-crural branch* of the *lumbo-abdominal plexus*; of the *vas deferens*; and, very often, of a *fibro-cellular chord*, which unites the *peritonæum* to the *upper part* of the *tunica vaginalis*, and in which, encysted *hydrocele* of the *spermatic chord* occurs. All these parts are united together by a *very lax*, *cellular tissue*, and surrounded by *coats*, which, reckoning from without, are;—1. The *skin* and *cellular membrane*. 2. A *fibro-cellular membrane*, formed by the *fascia superficialis*. 3. A *very thin layer*, formed by *fibres* of the *cremaster muscle*, united *archwise* before, and often, also, behind, the *chord*. 4. The *proper sheath* of the *spermatic vessels*, or the *tubular prolongation*, furnished by the *fascia transversalis* to the *chord*, on a level with the *superior orifice* of the *inguinal canal*. The *spermatic chord* is commonly shorter on the *right side* than on the *left*; and of a *different size* in different individuals. It ascends, almost *vertically*, from the *superior margin* of the *testicle*, as far as the *lower orifice* of the *inguinal canal*; passes through this canal, and enters the *abdomen*, crossing the *epigastric artery*. Here it forms an *evident elbow*, directing its *course* *backward*. At this part, also, the *organs*, composing it, separate from each other:—the *vas deferens* descending into the *pelvis* to pass behind the *bladder*;—the *blood-vessels* and *lymphatics* ascending towards the *lumbar region*, &c.

The **SPERMATIC PASSAGES** or **WAYS**, *Via Spermaticæ*, are the *canals* concerned in the *excretion* of *semen*.

**SPERMATOCELE**, *Her'nia seminal'is Scroti*, *Oscococ'le seminal'is*, *Gonococ'le*, from  $\sigma\pi\epsilon\rho\mu\alpha$ , 'sperm,' and  $\kappa\eta\lambda\eta$ , 'a tumour.' The ancients gave this name to certain *swellings* of the *testicle*, which were regarded as produced by an

accumulation of sperm in the organ. Also, varicocele (q. v.)

SPERMATOID, Gonoides.

SPERMATOL'OGY, *Spermatologia*, from *σπερμα*, 'sperm,' and *λογος*, 'a discourse.' A treatise on sperm.

SPERMATOPŒUS, *Spermatopœus*, from *σπερμα*, 'sperm,' and *ποιειν*, 'to make.' Food, to which has been attributed the property of augmenting the secretion of semen; and, consequently of exciting the venereal act. Very succulent and very nutritious substances have been so considered.

SPERMATORRHŒA, *Spermorrhœa*, *Spermorrhœa*, *Gonorrhœa*, *Gonorrhœa*, *Gonorrhœa*, (F.) *Flux de Sperme*. An involuntary emission of sperm, without copulation. See Gonorrhœa and Pollution (q. v.)

SPERMATORRHŒA ATONICA, Gonorrhœa laxorum.

SPERMATOZO'A, from *σπερμα*, 'sperm,' and *ζωον*, 'animal.' *Zoospermes*. Spermatic animalcules. Animalcules seen in the sperm, and by some supposed to be the formative agents in generation.

SPERMORRHŒA, Spermorrhœa.

SPHACELIA SEGETUM. See Ergot.

SPHACELISMUS, Sphacelus.

SPHAC'ELUS, *σφακελος*, *Gangræna Sphacelus*, *Sphacelis'mus*. This word is used, by some, synonymously with Gangrene (q. v.); by others, with gangrene when it occupies the whole substance of a limb. Commonly, it means the disorganized portion, in cases of mortification, which must be thrown off—is, in other words, totally dead. The foul, disorganized portion of an ulcer—called the *slough*—must be considered a kind of sphacelus.

SPHÆRA, Pila.

SPHÆRA MARINA, Pila marina.

SPHÆRA THALASSIA, Pila marina.

SPHERANTHUS INDICUS, Adaca.

SPHERIDION, Pilula.

SPHERION, Globule, Pilula.

SPHÆROCEPHALA ELATI'OR, Echinops.

SPHÆROCOCCUS CRISFUS, Fucus crispus.

SPHAGE, Throat.

SPHENDONE, Funda.

SPHËNI-SALPINGO-MALLIEN, Laxator tympani.

SPHENO-MAXILLARY, *Sphæno-maxilla'ris*. That which relates to the sphenoid and maxillary bones.

THE SPHENO-MAXILLARY OF INFERIOR ORBITAR FISSURE, (F.) *Fente sphéno-maxillaire ou orbitaire inférieure*, called, also, *Foramen lac'nerum inférius*, *F. spheno-maxillare*, is situate at the posterior part of the angle, formed by the union of the internal and inferior parietes of the orbit. It is constituted, above, by the sphenoid bone; below, by the superior maxillary and palate bones; and, before, by the malar bone. It is narrower at the middle than at the extremities, and forms a communication between the orbital cavity and the zygomatic fossa.

THE SPHENO-MAXILLARY FOSSA, is a name given, by some anatomists, to a depression at the union of the sphenoid-maxillary and pterygo-maxillary fissures.

SPHENO-ORBITAR. A name given, by Bécлар, to the anterior part of the body of the sphenoid bone, which is developed by a variable number of points of ossification.

SPHENO-PALATINE, *Sphenopalati'nus*. That which relates to the sphenoid and palate bones.

THE FORAMEN SPHENO-PALATINUM is a round aperture, formed by the vertical portion of the os palati and the sphenoid. It establishes a communication between the nasal fossæ and the zygomatic fossa.

THE SPHENO-PALATINE ARTERY, or *Large lateral nasal*, is the termination of the internal maxillary. It enters at the posterior part of the superior meatus of the nose, through the sphenopalatine foramen, and spreads its numerous branches on the pituitary membrane covering the septum, the cornua, and the meatus.

THE SPHENO-PALATINE GANGLION, or *Ganglion of Meckel*, *Spheno'dal G.* (Ch.) A small, nervous, cordiform, or triangular ganglion, of variable size, situate without the foramen sphenopalatinum, in the pterygo-maxillary fissure. It seems suspended, by several nervous filaments, to the trunk of the superior maxillary nerve, and gives off *internal or sphenopalatine filaments, inferior or palatine filaments, and a posterior filament*, which is the *Vidian or pterygoid nerve*.

THE SPHENO-PALATINE NERVES or *Lateral nasal*, arise from the ganglion—just described—at its inner part, and enter the nasal fossæ by the sphenopalatine foramen. They are 5 or 6 in number, and distribute their filaments to the outer and inner parietes of the nasal fossæ. One of the most remarkable branches is the *Nusopalatine*, (q. v.)

SPHENO-PALATINUS, Levator palati.

SPHENO-PARIETAL, *Spheno-parietal'is*. That which belongs or relates to the sphenoid and parietal bones.

THE SPHENO-PARIETAL SUTURE is formed by the articulation of the extremity of the greater ala of the sphenoid with the anterior and inferior angle of the parietal bone.

SPHENO-PTERYGO-PALATINUS, Circumflexus—*s. Salpingo-staphylinus*, Circumflex.

SPHENO-STAPHYLINUS, Levator palati.

SPHENO-TEMPORAL, *Spheno-temporal'is*. That which belongs to the sphenoid and temporal bones.

THE SPHENO-TEMPORAL SUTURE is the suture at the articulation of the great ala of the sphenoid bone with the squamous portion of the temporal. Bécлар gives the name—*spheno-temporal*—to the posterior part of the body of the sphenoid, which is developed by distinct points of ossification.

SPHENOID, *Sphenoïdes Os*, from *σφην*, 'a wedge,' and *ειδος*, 'resemblance.' *Os basila'rē seu euneifor'mē seu cu'neo compar'atum*, seu *sphenoïda'lē*, seu *multifor'mē*, seu *az'ygos*, seu *papilla'rē*, seu *polymor'phon*, seu *paxilla'rc*, seu *bazilla'rē*, seu *alafor'mē*, seu *sphenoïdes*, seu *respifor'mē*, seu *inconjuga'tum*, *Pter'ygoid Bone*. An azygous bone, situate on the median line, and at the base of the cranium. It articulates with all the other bones of that cavity; supports them, and strengthens their union. Its

form is singular, and resembles a bat with its wings extended. It has, 1. An *inferior or guttural surface*, on which is situate the crista, that joins the vomer; a channel, which concurs in forming the pterygo-palatine foramen; the pterygoid process; the pterygoid fossa; the scaphoid depression; the Vidian or pterygoid canal; the foramina—ovale, spinale, &c. 2. A *superior or cerebral surface*, on which are:—the clinoid processes; the pituitary fossa; the foramina (ovale, rotundum, and spinale); the *Apophysis of Ingrassias* or lesser wing; the foramen opticum, &c. 3. An *occipital or posterior surface*, which is articulated with the basilar process of the occipital bone. 4. An *anterior or orbito-nasal surface*; having, anteriorly, a crista to unite with the ethmoid bone; and, on each side, a round aperture, which leads into two cavities in the substance of the bone, separated by a middle septum, and called the *sphenoidal sinuses*. 5. Two *zygomatico-temporal or external surfaces*, which correspond to the temporal and zygomatic fossæ.

Some divide the sphenoid into *body or middle portion*; and *ala*, which are four in number, and are subdivided into *great (Temporal Plates or Wings)* and *little (Apophyses of Ingrassias.)* The *Sphenoid suture* surrounds the bone.

**SPHENOID, SPINOUS PROCESS OF THE, Sphenoidal spine.**

**SPHENOIDAL, Sphenoidalis.** That which belongs or relates to the sphenoid.

The **CORNIA SPHENOIDALIA, Cornets sphenoidaux, Cornets de Bertin, Ossa triangulæria, Pyramids of Wistar.** Two small, thin, and curved bones, situate between the sphenoid and ethmoid, with which they are confounded, in the adult. They have the shape of a hollow pyramid, with the base turned backwards; and are developed by a single point of ossification. They are articulated with the sphenoid, ethmoid, palate bone, and vomer.

The **SPHENOIDAL or SUPERIOR ORBITARY FISSURE, Foramen lac'cerum superius, (F.) Fente sphenoidale,** is a large fissure, situate between the great and little ala of the sphenoid. It is seen at the upper and back part of the orbit, between which and the cranium it is a means of communication.

The **SPHENOIDAL SPINE, (F.) Épine sphenoidale, Spinous Process of the Sphenoid;**—1. A projecting crista at the inferior surface of the sphenoid bone, for articulation with the vomer. 2. A triangular process, *Apophyse sous-temporale, (Ch.)* met with near the posterior margin of the same bone, behind the foramen spinale. At the point of the spinous process, a *styloid process* is frequently met with.

**SPHENOIDES, Cuneiform.**

**SPHENOSIS.** See Wedged.

**SPHEX, Wasp.**

**SPHINCTER, Constrictor;** from σφιγγω, 'I constrict.' A name given to several annular muscles, which constrict or close certain natural openings.

**SPHINCTER ANI, Annularis Ani.** Many anatomists have described two sphincter muscles of the anus;—viz. 1. The *S. extermus, Aspidiscos, S. anteanus, Coecygio-cutané-sphincter, Orbicularis Recti, Constrictor Ani, Coecygio-anal, (Ch.)* It is situate around the anus; is ellip-

tical from before to behind; flattened, and pierced at its middle. Its fibres describe concentric arcs, which are attached, behind, to the extremity of the coccyx, by a dense, cellular substance; and are confounded, anteriorly, with the bulbo-cavernosi and transversus perinei muscles. This muscle contracts and closes the anus.

2. The *inner or internal Sphincter Ani, Sphincter intestinalis* of Winslow, is, by many anatomists, considered as the termination of the circular fibres of the rectum. It is annular, and situate around the inferior extremity of the rectum, to the extent of about a finger's breadth. It has the same uses as the other.

**SPHINCTER GULÆ, Constrictores pharyngis**—s. Ilei, Bauhin, valve of—s. Intestinalis, Sphincter ani internus—s. Labiorum, Orbicularis oris—s. Oculi, Orbicularis palpebrarum—s. Palpebrarum, Orbicularis palpebrarum—s. Pylori, see Pylorus—s. Vagine, Constrictores cunni—s. Ventriculi, Pylorus.

**SPHINCTER VESICÆ, Sphincter of the bladder.** Some anatomists have given this name to whitish, elastic, and circular fibres, which surround the neck of the bladder, but do not constitute a particular muscle. Morgagni has given the name **PSEUDO-SPHINCTER** to the anterior fibres of the levator ani, which pass beneath the neck of the bladder, and, by their contraction, close that opening.

**SPHRAGIDONYCHARGOCOME'TA,** from σφραγις, 'a seal,' οὐρῆς, 'the nail,' αργός, 'white,' or perhaps αργυρός, 'silver,' and κομῆω, 'I adorn.' A charlatan who adorned his fingers to the very nails with rings.—Aristophanes. Hippocrates.

**SPHYGMICA ARS,** from σφυγμός, 'the pulse.' The art of judging by the pulse, in health or disease.

**SPHYGMOCEPHALUS, Crotaphe.**

**SPHYGMOLOGIA,** from σφυγμός, 'the pulse,' and λογός, 'a description.' The doctrine of the pulse.

**SPHYGMOMETER, Pulsilegium.**

**SPHYGMOS, Pulsation, Pulse.**

**SPHYRA, Malleolus.**

**SPHYXIS, Pulsation.**

**SPIC, Lavendula.**

**SPICA, Fascia Inguinalis;** the *Spica bandage, (F.) Épi.* A bandage, so called in consequence of its somewhat resembling a spike of barley. The turns of the bandage cross like the letter V;—each leaving a third of the roller uncovered. It is distinguished into *ascending* and *descending*. It may be applied over various parts of the body; and in a different manner in each case: thus, there is the *Spica inguinalis, Spica inguinalis duplex,* the spica for the shoulder, and another for the thumb.

**SPICA ALPINA, Valeriana Celtica**—s. Celtica, Valeriana Celtica—s. Indica, Nardus Indica—s. Nardi, Nardus Indica.

**SPICES, FOUR.** See Myrtus pimenta.

**SPICILLUM, Specillum.**

**SPIDERWORT, Liliago.**

**SPIGE'LIA MARILAN'DICA, Anthel'mia, Spigelia Lonie'era, Perennial Wormgrass or Indian Pink, Caroli'na Pink.** Nat. Order, Gentianeæ. Class, Pentandria. Order, Monogynia. Indigenous. The root is celebrated as an an-

thelminthic, particularly in cases of lumbrici. It is, also, asserted to have been found serviceable in remittent fever. It is a narcotico-acrid. Dose, gr. x to ʒss.

SPIGNEL, *Æthusa meum*.

SPIKENARD, *Conyza squarrosa*, Nardus Indica.

SPILANTHUS ACMELLA, *Acmella*, *Acmella*, *Balm-leaved Spilanthus*. Family, Corymbifera. *Sec. Syst.* Syngenesia Polygamia aqualis. This plant possesses a glutinous, bitter taste, and fragrant smell. The herb and seed are said to be diuretic and emmenagogue. They have been used in dropsies, jaundice, fluor albus, and calculous complaints;—given in infusion.

SPILANTHUS, BALM-LEAVED, *Spilanthus acmella*.

SPILANTHUS OLERA'CEUS, *Spear-leaved Spilanthus*, (F.) *Cresson de Para*. A tincture of the plant has been recommended in toothache.

SPILOSIS, *Epichrosis*—s. *Ephelis*, *Ephelides*—s. *Poliosis*, *Poliosis*.

SPILSBURY'S ANTISCORBU'TIC DROPS. An empirical preparation, formed of *hydrarg. oxymer.*, *rad. gentian.*, *cort. aurant. succ.*, *aa ʒij*, *antimon. crud.*, *santal. rubr.* *aa ʒj*, *spiritus vini rectific.*, *aquæ*, *aa ʒ viij*.

SPINA, *Spine*, (F.) *Épinc*. A process on the surface of a bone, which has been compared to the spines or thorns on certain vegetables. The chief processes of this name, are:—the *nasal spine*, the *spine of the scapula*, the *spine of the ischium*, the *four iliac spines*, the *palatine spine*, the *maxillary*, the *sphenoid*, &c. The *spine of the back* is the collection of vertebræ constituting the *vertebral column*, (q. v.)

SPINA, *Penis*—s. *Acida*, *Oxyacantha Galeni*—s. *Ægyptiaca*, see *Acaciæ gummi*—s. *Alba*, *Carduus marianus*, *Mespilus oxyacantha*—s. *Bifida*, *Hydrorachis*—s. *Cervina*, *Rhamnus*—s. *Dorsi*, *Vertebral column*—s. *Ferrea*, *Pin*—s. *Helmontii*, *Aiguillon*—s. *Hirci*, *Astragalus verus*—s. *Infectoria*, *Rhamnus*.

SPINA VENTOSA, *Spina ventositas*, *Tere'do*, *Fungus Articul.*, *Arthroacæ*, *Pædarthroacæ*, *White Swelling*, (of some,) *Sidera'tio Ossis*, *Cancer Ossis*, *Gangra'na Ossis*, *Exosto'sis*. A term of no definite meaning, as is obvious from these various words having been considered its synonymes. By some, it is defined to be—a disease of the osseous system, in which the texture of the bone dilates, seeming to be distended with air, and constituting a variety of osteo-sarcoma. By others, it is considered to be a tumour arising from an internal caries of a bone; occurring most frequently in the carpus or tarsus. The term itself is a translation from the Arabic of Rhazes.

SPINA VENTOSA, *Hydrarthrus*, *Mollities ossium*—s. *Vertebralis*, *Vertebral column*.

SPINACH, *Spinacia*.

SPINACIA, *Spinachia*, *Spinacia oleracea*, *Spin'age*, *Spinach*, (F.) *Épinard*. Family, *Atriplicæ*. *Sec. Syst.* *Diœcia Pentandria*. A plant which resembles the cabbage in its dietetic powers. The leaves boiled, with the addition of oil, form a good emollient cataplasm. It has been used in phthical complaints; but its medicinal properties, if it have any, are not now regarded.

SPINÆ VENTOSITAS, *Spina ventosa*.

SPINAGE, *Spinacia*.

SPINAL, *Spinalis*, from *spina*, 'the spine.' That which relates to the vertebral column.

The SPINAL ARTERIES are two in number, viz: 1. *The posterior spinal, Artère médiane postérieure du Rachis*, (Ch.) It arises from the vertebral, near the corpora pyramidalia, and descends on the posterior surface of the spinal marrow, distributing its ramifications to it. 2. *The anterior spinal artery, A. médiane antérieure*, (Ch.) is larger than the last, and arises, also, from the vertebral. It descends, in a serpentine manner, upon the anterior surface of the marrow; furnishes ramusculi to it, and unites with that of the opposite side, opposite the foramen magnum occipitis. A very tortuous branch arises from this union, which descends as far as the inferior extremity of the marrow, to which it sends numerous divisions.

The term *Spinal arteries* or *Rachidian arteries* is also given, in the abstract, to all the arteries of the spinal marrow and vertebral canal. The same may be said of the veins and nerves.

SPINAL CORD, *Medulla spinalis*—s. *Prolongation*, *Medulla spinalis*.

SPINAL IRRITATION, *Rhachialg'itis*. A modern pathological view, which refers most nervous diseases to irritation of the spinal cord. This irritation is presumed to be indicated by tenderness on pressure over the spinous process of one or more vertebræ, or over the nerves proceeding from the cord and distributed to the parts at the sides of the spine. Such tenderness, however, by no means indicates the pathological condition in question, as it is often met with in those enjoying perfect health.

The treatment advised is cupping and counter-irritation on each side of the spine, which may be beneficial in such diseases, no matter what part of the frame may be in a morbid state, by exciting a new and revellent impression on a very sensible portion of the cutaneous surface.

The SPINAL NERVE, *Accessory of the Par vagum* or *8th pair*, *Accessory nerve of Willis*, *Spinal Accessory*, *Spino-cranio-trapézien*, *Superior respiratory N.*, *Eleventh pair of encephalic nerves*, *Trachælo-dorsal*, (Ch.) arises from the medulla spinalis, within the vertebral canal, between the anterior and posterior roots of the cervical nerves, at a greater or less distance from the cranium. The roots unite to form the nerve, which ascends into the cranium through the foramen magnum of the occipital bone, and issues by the foramen lacerum posterius, crossing the sterno-cleido-mastoideus, to which it gives filaments, and losing itself entirely on the trapezius muscle.

The SPINAL FORAMINA, (F.) *Trous rachidiens*, in the abstract, are the foramina, formed by every two contiguous vertebræ, through which the spinal nerves issue. See *Vertebral*.

The term FORAMEN SPINALE is especially applied, however, to a small foramen, in front of the spinous process of the sphenoid bone, through which the middle artery of the dura mater enters the cranium. It is, likewise, called *Foramen sphenospinosum*, (F.) *Trou sphéno-épineux* ou *petit rond Trou épineux*.

SPINALES COLLI MINORES, *Interspinales colli*

—s. et Transversales lumborum, Transversalis dorsis.

SPINALIS CERVICIS, Semi-spinalis colli—s. Colli, Semi-spinalis colli.

SPINALIS DORSI, *Grand épineux du dos, Spinalis Dorsi major*. Winslow calls thus, some fleshy fasciculi, which are situate on the lateral surfaces of the spinous processes; from the third dorsal vertebra to the first or second lumbar; and which form part of the transverso-spinalis of most authors. The same anatomist calls—*Spinalis Dorsi minor, Petit épineux du dos*—some small, fleshy fibres, situate on each side of the interspinal ligament. They are short, flat, and pass from one spinous process to the other. Like the preceding, they form part of the transverso-spinalis. All these fleshy fasciculi strengthen the vertebral column.

SPINATI, Interspinales colli.

SPINE, Vertebral column—s. Curvature of the, Gibbositas.

SPINI-AXOIDO-OCCIPITALIS, Rectus capitis posticus major—s. *Axoido-trachéli-atloïdien, Obliquus inferior capitis*.

SPINITIS, Myelitis.

SPINO-DORSITIS, Myelitis.

SPINOLA, Hydrorachis.

SPINOUS, *Spinous*, (F.) *Épineux*. Having the shape of a spine or thorn.

The SPINOUS PROCESSES or APOPHYSES of the Vertebra, *Acunthæ, Cynolophoi*, (F.) *Apo-physes épineuses*, are situate at the posterior part of each vertebra, and afford attachment to the muscles, whose office it is to extend the spine. See Vertebra.

SPIRACULA, Pores of the skin.

SPIRÆA FILIPENDULA, *Filipendula, Saxifraga rubra, Dropwort*, (F.) *Filipendule*. Family, Rosacæ. *Sex. Syst.* Icosandria Pentagynia. The root of this plant is said to possess astringent and lithontriptic virtues.

SPIRÆA TRIFOLIATA, *Gillenia trifoliata*.

SPIRÆA ULMARIA, *Ulmaria, Regina Prati, Barba capræ, Meadow Sweet, Queen of the Meadows, Bar'bula capri'na*, (F.) *Ulmairé. Reine des Prés*. The leaves have been recommended as mild astringents:—the flowers as antispasmodics and diaphoretics.

SPIRAMENTUM ANIMÆ, Pulmo.

SPIRATIO, Respiration.

SPIRIT, *Spir'itus*, (F.) *Esprit*. A name given to every liquid product of distillation. These were formerly distinguished into—*inflammable, acid, and alkaline*; and consequently a number of substances were crowded together, which often resembled each other in no other property than in being volatile. The term is now confined to alcoholic liquors, of which the following are the chief.

AGUA ARDIENTE. Distilled from pulque, the fermented juice of the Agave, by the Mexicans.

ARRACK. Distilled from coarse palm sugar, named jaggery, fermented with the bark of the *Mimosa leucophlea*; also from rice and the fermented juice of the Palm; made in India. Its varieties are—

1. *Mahwah Arrack*. Made in India from the flowers of the Madhuca tree, *Bassia butyragæa*.

2. *Tuba*. Made from palm wine, in the Philippine Islands.

ARAKA. Distilled by the Tartars, from koumis, fermented mares' milk.

ARAKI. Distilled from dates, by the Egyptians.

ARIKA. A variety of koumis, distilled from fermented mares' milk, in Tartary and Iceland.

BRANDY. Distilled from wine, figs, peaches, Persimmon apple, mulberries, and sometimes other fruits, in Europe, Asia, N. and S. America, wherever wine is made. The best brandy is that of Cognac; the next, that of Bordeaux and Rochelle. The varieties are—

1. *Lau*. Made from rice, in Siam.

2. *Rakia*. Made in Dalmatia from the husks of grapes mixed with aromatics.

3. *Rossolio*. Made at Dantzic, from a compound of brandy, rossolis, and other plants.

4. *Troster*. Made on the Rhine, from the husks of grapes, fermented with barley and rye.

5. *Sekis-kayavodka*. Made from the lees of wine and fruit at Scio.

GENEVA HOLLANDS, (*genièvre*, French for juniper.) Distilled from malted barley and rye, rectified on juniper berries, in Holland. Its variety is—

*Gin*. Made in England, from malted barley, rye, potatoes; rectified with turpentine.

GOLDWASSER. Distilled at Dantzic, from wheat, barley, and rye, rectified with aniseed, cinnamon, and other spices.

KIRSCHWASSER. Distilled from the Malaché cherry, in Switzerland.

MARASCHINO. Distilled from the Macaracha cherry, at Zara, the capital of Dalmatia.

RUM, (supposed to be derived from the terminal syllable of the word *saccharum*: but the native Americans called this liquor Rum.) Distilled, in the West Indies and South America, from cane-sugar and molasses, and in North America from maple-sugar. Its variety is—

*Slatkaia trava*. Made at Kamtschatka, from a sweet grass.

SHOW-CHOO. Distilled, in China, from the lees of Mandarin, a wine made from boiled rice.

WHISKY, (supposed to be derived from *usque*, the two first syllables of *usquebaugh*, the original name in Ireland.) Distilled, in Scotland and Ireland, from malted and raw barley, rye, oats, and potatoes; and in the south of France, from sloes. In Ireland it was called *buil-ccuun*, or madness of the head. The best Scotch whisky is *Glenlivet*, the best Irish, *Ennishoven*.

Y-WER-A. Distilled, in the Sandwich Islands, from the root of the Tee-root, baked, pounded, and fermented.

To these may be added an intoxicating liquor, made by the Afghanists, from ewes' milk; and that made at Kamtschatka, from a species of mushroom, named *Muchumer*.

SPIRIT OF ANISEED, *Spiritus anisi*—s. Bathing, Freeman's, see Linimentum saponis compos.—s. Bathing, Jackson's, see Linimentum saponis compos.—s. Bezoardic of Bussius, see Bussii spiritus Bezoarticus—s. Bone, Liquor volatilis cornu cervi—s. of Burhus, Burhi spiritus matricalis—s. of Caraway, Spiritus carui—s. of Ether, aromatic, Spiritus ætheris aromaticus—s. Fuming, of Beguin, Ammonia sulphuretum—s. Fuming, of Boyle, Ammonia

sulphuretum—s. of Hartshorn, Liquor cornu cervi—s. of Horseradish, compound, Spiritus armoraciæ compositus—s. of Lavender, Spiritus lavandulæ—s. of Lavender, compound, Spiritus lavandulæ compositus—s. of Mindererus, Liquor ammoniæ acetatis—s. of Nitre, sweet, Spiritus ætheris nitrici—s. of Nitric ether, Spiritus ætheris nitrici—s. of Pennyroyal, Spiritus pullegii—s. of Peppermint, Spiritus menthæ pipéritæ—s. Proof, Spiritus tenuior—s. of Salt, Muriaticum acidum—s. of Scurvygrass, golden, see Spiritus armoraciæ compositus—s. of Spearmint, Spiritus menthæ viridis—s. of Sulphuric ether, Spiritus ætheris sulphurici—s. of Turpentine, Oleum terebinthinæ rectificatum—s. Verdigris, Aceticum acidum—s. of Wine and camphor, Spiritus camphoræ.

SPIRITS, ANIMAL, Nervous fluid.

SPIRITUS, Breath, Respiration—s. Æthereus nitrosus, Spiritus ætheris nitrici—s. Æthereus vitriolicus, Spiritus ætheris sulphurici.

SPIRITUS ÆTHERIS AROMATICUS, Æther Sulphuricus cum alcoholè aromaticus, Elix'ir vitrioli dulce, Sweet Elix'ir of Vitriol, Vign'is Elix'ir Vitriol, Aromatic Spirit of Ether. (Cinnam. cort. contus. ʒij, cardam. sem. contus. ʒiiss, piperis longi fruct. cont., zingib. rad. concis., sing. ʒj, spiritus ætheris sulphurici. lbj. Macerate, for 14 days, in a stopped glass vessel, and strain. Ph. L.) It is used as a stimulant in nervous affections. Dose, ʒss to ʒj.

SPIRITUS ÆTHERIS NITRICI, Sp. Ætheris nitrosi, Sp. nitri dulcis, Sp. Æthereus nitrosus, Sweet Spirit of Nitre, Nitre Drops, Æther nitricus alcoholisatus, Spirit of Nitric Ether. (Spirit. rect. lbj, acid nitric, pondere ʒij. Pour the acid gradually on the spirit; being careful that the heat does not exceed 120°: then distil, by a gentle heat ʒxxiv. Ph. L.) It is refrigerant, diuretic, antispasmodic, and diaphoretic. Dose, gtt. xxv. to f. ʒj.

SPIRITUS ÆTHERIS SULPHURICI, Æther Sulphuricus cum Alcoholè, Liqor Æthereus Sulphuricus, Spiritus Vitrioli dulcis, Spiritus Ætheris vitriolici, Liqor Sulphuricus alcoholisatus, Spirit of Sulphuric Ether. (Æther. sulphuric, lbss, sp. rect. lbj. Mix. Ph. L.) Stimulant, diaphoretic, diuretic, and antispasmodic. Dose, ʒss to ʒij.

SPIRITUS ÆTHERIS SULPHURICI COMPOSITUS, Sp. ætheris vitriolici compositus, Liqor anodynus Hoffmanni, Hoffmann's Anodyne Liqor. (Spirit. æther. sulph. lbj, olei atherei ʒij. Mix. Ph. L.) A stimulant and antispasmodic.

SPIRITUS ÆTHERIS VITRIOLICI COMPOSITUS, Spiritus ætheris sulphurici comp.

SPIRITUS AMMONIÆ, Alkali ammoniacum spirituosum, Alcohol ammoniacum, Sp. salis ammoniaci, Ammoniacum alcoholisatum, Liqor ammoniaci vinosus, L. ammoniæ spirituosus, Lixiv'ium ammoniacalè vinosum, Spiritus salis ammoniaci vinosus seu dulcis seu dulcificatus, Solutio subcarbonatis ammoniaci spirituosus, (F.) Esprit d'ammoniaque. (Sp. tenuior. lbij, ammoniaci muriat. ʒiv, potassæ subcarb. ʒvj. Mix, and distil lbss. Ph. L.) Stimulant and antispasmodic. Dose, ʒss to ʒj.

SPIRITUS AMMONIÆ AROMATICUS, Alcohol ammoniacum aromaticum, Aromatic ammoniacum Alcohol, Sal volat'ile Drops, Spiritus salis volat'ilis olcosus, Sp. volatilis aromaticus, Sal volatile

olcosus Syleii, Sp. ammoniæ compositus, Tinctura aromatica ammoniata, Liqor olcosus Syleii, Lixiv'ium ammoniacalè aromaticum. (Cinnam., cort. cont., Caryoph. cont., aa ʒij, limonum cort. ʒiv. potass. subcarb. lbss, ammon. mariat. ʒv, sp. rectific. lbv, aquæ, congiun. Mix, and distil lbvj. Ph. L.) Stimulant. Dose, ʒss to ʒj.

SPIRITUS AMMONIÆ COMPOSITUS, Spiritus aromaticus. SPIRITUS AMMONIÆ FETIDUS, Sp. volatilis fetidas, Fit Drops, Alcohol ammoniacum fetidum, Tinctura asafetida ammoniata, Fetid Spirit of Ammonia. (Sp. ammoniæ lbj, asafetida ʒij. Macerate for 12 hours, and distil lbss. Ph. L.) Stimulant and antispasmodic. Dose, ʒss to ʒj.

SPIRITUS AMMONIÆ SUCCINATUS, Succinat'ed Spirit of Ammonia, Common Eau de Luce, Ammoniacum succinatum, Aqua Lul'cia, Liqor ex Ammonia et Oleo Succini, Liqor ex citans, Spiritus Ammoniaci cum Succino, Sp. Salis Ammoniaci lactescens seu lactus. (Mastich. ʒij, sp. rect. ʒix, ol. lavand. gtt. xiv, saccin. ol. gtt. iv. liq. ammon. ʒx. Macerate the mastich in the alcohol, and pour off the clear tincture: add the rest, and shake. Ph. L.) Stimulant and antispasmodic. Dose, gtt. x to ʒss or ʒj.

SPIRITUS ANISI, Spiritus Anisi compositus, Aqua Anisi fortis, Aqua Semivinum Anisi composita, Spirit of Aniseed, (F.) Esprit d'anis. (Anisi sem. cont. lbss, spirit. tenuior. cong., aqua quod satis sit ad prohibendum empyreuma. Ph. L.) Carminative. Dose, ʒss to ʒss. In the compound spirit, angelica is usually an ingredient.

SPIRITUS ANTHOS, Spiritus rosmarini.

SPIRITUS ARMORACIÆ COMPOSITUS, Sp. Raphani compositus, Aqua Raphani composita, Compound Spirit of Horseradish, (F.) Esprit de raifort composé. (Armorac. rad. recent. concis., aurant. cort. essicc., sing. lbj, myrist. nuc. contus. ʒss, spirit. ten. cong. j, aquæ q. s. ad prohibendum empyreuma. Ph. L.) Stimulant and antiscorbutic. (?) Dose ʒj to ʒiv.

The Golden Spirit of Scurvy Grass—an empirical preparation—is formed by adding gamboge ʒviij, to one gallon of the sp. armoraciæ compositus.

Greenough's Tincture for the Teeth, is formed of amygd. amar. ʒij, lign. brasil., cassiæ bacc., aa ʒiv, irid. florent. ʒij, coccinell, sal. acetoselle, alum, aa ʒj, sp. vin. rect. lbj, sp. armoraciæ comp. ʒss.

SPIRITUS BEGUINIS, Ammoniacum sulphuretum.

SPIRITUS CAMPHORÆ, Sp. camphoratus, Sp. vinosus camphoratus, Tinctura Camphoræ, Spirit of Wine and Camphor, Spirit of Camphor, (F.) Esprit de Camphre, Alcohol camphré, Eau de Vie camphré. (Camphor. ʒiv, sp. rect. lbj. Ph. L.) Stimulant, anodyne and discutient. Used only externally.

SPIRITUS CARUI, Sp. Cari Carui, Spirit of Caraway, Aqua Semivinum Carui fortis, A. Semivinum Carui, Strong Carui Waters, (F.) Esprit de Carvi. (Carui sem. cont. lbss, sp. tenior. cong. j, aquæ q. s. Distil a gallon. Ph. L.) Carminative. Dose, ʒj to ʒss.

SPIRITUS CINNAMOMI, Sp. Lauri Cinnamomi, Spirit of Cinnamon, Aqua Cinnamomi fortis, Aqua Cinnam. spirituosus, Strong Cinnamon Water, (F.) Esprit de Cannelle. (Cort. cinnam.

Ῥv, *sp. rect. liivss.*) Stimulant and carminative. Dose, ʒj to ʒss.

**SPIRITUS COLCHICI AMMONIATVS**, *Ammoniated Spirit of Colchicum.* (*Scm. colchic. cont.* ʒij, *sp. ammon. aromat. lbj. Ph. L.*) Narcotic, cathartic, and diuretic. Used in gout, rheumatism, and dropsy. Dose, from gr̄. xxx to ʒj.

**SPIRITUS CORNU CERVI**, *Liquor C. C.*—s. *Fumans Beguini*, *Ammonia sulphuretum.*

**SPIRITUS JUNIPERI COMPOSITVS**, *Compound Spirit of Juniper, Aqua Juniperi composita.* (F.) *Esprit de genièvre composé.* (*Bacc. junip. cont. lbj, sem. carui cont., fœnicul. sem. cont., aa ʒiss, sp. tcn. cong. j, aq. q. s.* Distil a gallon. *Ph. L.*) Stimulant and diuretic. Dose, ʒj to ʒss.

**SPIRITUS LAURI CINNAMOMI**, *Spiritus cinnamomi.*

**SPIRITUS LAVANDULÆ**, *Sp. Lavandula spica, Spirit of Lavender, Sp. Lavand. simpl., Lavender Water.* (F.) *Esprit de Lavande.* (*Lavand. flor. recent. lbij, sp. rectific. cong., aqua q. s.* Distil a gallon. *Ph. L.*) Usually made by adding the oil to rectified spirit. Used as a perfume chiefly.

**SPIRITUS LAVANDULÆ COMPOSITVS**, *Tinctura Lavandula composita, Red Hartshorn, Lavender drops, Compound Spirit of Lavender.* (F.) *Esprit de Lavande composé.* (*Sp. lavand. lbij, sp. rosamarin. lbj, cinnam., cort. contus., myristic. nucleor. cont., sing. ʒss, pterocarp. ligni conc. ʒj.*) Stimulant. Dose, gr̄. xl to ʒij.

**SPIRITUS LUMERICORUM**, *Liquor volatilis cornu cervi.*

**SPIRITUS MENTHÆ PIPERITÆ**, *Spirit of Peppermint, Aqua Mentha piperitidis spirituosâ, Sp. Mentha piperitidis.* (F.) *Esprit de Menthe poivrée.* (*Olei menth. pip. ʒvjss, sp. rectific. liivss, aqua, q. s. distil a gallon. Ph. L.*) Carminative and stimulant. Dose, ʒss to ʒiij.

**SPIRITUS MENTHÆ SATIVÆ**, *Spiritus menthæ viridis.*

**SPIRITUS MENTHÆ VIRIDIS**, *Spearment, Spiritus Mentha sativæ, Aqua Mentha vulgaris spirituosâ, (F.) Esprit de Menthe verte.* (*Olei Menth. virid. ʒvjss, sp. rectific. liivss, aq. q. s.* Distil a gallon. *Ph. L.*) Like the last in properties and dose.

**SPIRITUS MILLEPEDARUM**, *Liquor cornu cervi.*

**SPIRITUS MYRISTICÆ**, *Spiritus Myristicæ Moschatæ, Sp. Nucis Moschatæ, Aqua Nucis Moschatæ, Nutmeg Water, Aqua Nephriticæ, (F.) Esprit de Mascade.* (*Myrist. nucl. cont. ʒij, spirit. tenuior. cong. j, aqua q. s.* Distil a gallon. *Ph. L.*) Cordial and carminative. Dose, ʒj to ʒiv.

**SPIRITUS MYRTI PIMENTÆ**, *Spiritus pimentæ*—s. *Nitri vulgaris*, see *Nitric acid*—s. *Nitric acid*, *Nitric acid*—s. *Nitri dulcis*, *Spiritus ætheris nitrici*—s. *Nitri duplex*, *Nitric acid*—s. *Nitri fumans*, *Nitric acid*—s. *Nitri Glauberi*, *Nitric acid*—s. *Nitri simplex*, see *Nitric acid*—s. *Nucis moschatæ*, *Spiritus myristicæ*—s. *Ophthalmicus Mindereri*, *Liquor ammonia acetatis.*

**SPIRITUS PIMENTÆ**, *Sp. Myrti Pimentæ, Spiritus Pimento, Spirit of Pimento, Aqua Mirabilis.* (*Piment. baccar. cont. ʒij, sp. tenuior. cong., aqua q. s.* Distil a gallon. *Ph. L.*) Cordial and carminative. Dose, ʒj to ʒiv.

**SPIRITUS PULEGII**, *Spirit of Pennyroyal, Aqua Pulegii spirituosâ, Spirituous Pennyroyal Water,*

(F.) *Esprit de Pouliot.* (*Olei pulegii ʒvij, sp. rect. liivss, aqua, q. s.* Distil a gallon. *Ph. L.*) Same as spirit of spearmint in properties and dose.

**SPIRITUS RECTIFICATVS**, *Sp. Vini rectificatus, Enostag'na, Sp. Vinosus rectificatus, Alcohol, Spirit of Wine.* (F.) *Esprit de Vin rectifié.* Rectified spirit is much used, in Pharmacy, to dissolve resinous and other substances. It is seldom exhibited internally; although it exists in the diluted state in all vinous and spirituous liquors. Externally, it is employed as a discutient.—S. G., according to the London Pharmacopœia, 0.833; according to that of Dublin, 0.840; of Edinburgh and United States, 0.835, and of Paris, 0.819 to 0.827.

**SPIRITUS RECTOR**, *Aroma*—s. *Rhaphani compositus, Spiritus armoraciæ compositus.*

**SPIRITUS ROSMARINI**, *Sp. Rosmarini officinalis, Spirit of Rosemary.* (q. v.) *Spiritus Anthis, Hungary Water.* (F.) *Esprit de Romarin.* (*Ol. rosmarini ʒj, sp. rect. cong. j, aqua q. s.* Distil a gallon. *Ph. L.*) Stimulant. Dose, ʒj to ʒiv.

**SPIRITUS SALIS ACIDUS SEU FUMANS**, *Muriaticum acidum*—s. *Salis ammoniaci, Spiritus ammoniac*—s. *Salis ammoniaci aquosus, Liquor ammoniac*—s. *Salis ammoniaci lactescens seu lacteus, Spiritus ammoniac succinatus*—s. *Salis ammoniaci sulphuratus, Ammoniac sulphuretum*—s. *Salis Glauberi, Muriaticum acidum*—s. *Salis marini coagulatus, Potassæ murias*—s. *Salis marini, Muriaticum acidum*—s. *Salis volatilis oleosus, Spiritus ammoniac aromaticus*—s. *Sulphurico-æthereus camphoratus, Tinctura ætherea composita*—s. *Sulphurico-æthereus martialis, Tinctura seu alcohol sulphurico-æthereus ferri*—s. *Sulphuris, Sulphurous acid*—s. *Sulphuris per campanain, Sulphurous acid*—s. *Sulphuris volatilis, Ammoniac sulphuretum*—s. *Sulphurous volatilis, Sulphurous acid.*

**SPIRITUS TENUIOR**, *Alcohol dilutum, Spiritus vinosus tenuior, Proof Spirit.* (F.) *Esprit de vin délayé.* Generally made, for pharmaceutical purposes, by mixing equal parts of rectified spirit and water. S. G. Lond. 0.920; Edinb. and United States, 0.935. It is employed in the same cases as those in which alcohol is used:—chiefly, as a solvent of vegetable matters, in the form of tinctures.

**SPIRITUS VENERIS**, *Aceticum acidum*—s. *Vini rectificatus, Spiritus rectificatus*—s. *Vinosus camphoratus, Spiritus camphoræ*—s. *Vinosus tenuior, Spiritus tenuior*—s. *Vitalis, Nervous fluid*—s. *Vitrioli, Sulphuric acid*—s. *Vitrioli acidus Vogleri, Sulphuric acid dilutum*—s. *Vitrioli coagulatus Mynsichti, Potassæ sulphas*—s. *Vitrioli dulcis, Spiritus ætheris sulphurici*—s. *Vitrioli phlogisticatus, Sulphurous acid*—s. *Volatilis aromaticus, Spiritus ammonia aromaticus*—s. *Volatilis fetidus, Spiritus ammonia fetidus.*

**SPIROPTERA HOMINIS.** See *Worms.*

**SPISSANTIA**, *Incrassantia.*

**SPIT**, *Sputum.*

**SPITH'AMA**, *Dorans.* A measure of twelve fingers' breadth.

**SPITTLE**, *Saliva*—s. *Sweet*, see *Salivation.*

**SPLANCHNA**, *Entrails.*

**SPLANCHNEURYSMA**, from *σπλῆγχνον*, 'an intestine,' and *ευρυον*, 'I dilate.' Morbid dilatation of the intestines.

**SPLANCHNIC**, *Splanchnicus*, *Visceral*, from *σπλαγχνον*, 'viscus.' That which relates to the viscera.

The **SPLANCHNIC CAVITIES** are the three great cavities of the body;—those of the cranium, chest, and abdomen.

The **SPLANCHNIC NERVES** belong to the great sympathetic, and are two in number on each side. They are distinguished into:—1. The *great splanchnic nerve*, *Grand splanchnique*, (Chaus.) Its roots—four or five in number, come from the 6th, 7th, 8th, 9th, and sometimes the 10th thoracic ganglion. They descend inwards, on the sides of the vertebral column, beneath the pleura, and unite into a single trunk, which enters the abdomen through a separation of the fleshy fibres of the pillars of the diaphragm; passes behind the stomach, and divides into several branches, which pass into the semilunar ganglion.

2. The *lesser splanchnic nerve*, *Splanchnique accessoire*, of Walther, *Petit splanchnique*, (Ch.) is composed of two distinct branches, proceeding from the 10th and 11th thoracic ganglion, which unite on the 12th dorsal vertebra into a cord, that pierces the diaphragm singly; enters the abdomen, and divides into two branches, one of which anastomoses with the greater splanchnic nerve, whilst the other sends its filaments to the renal and solar plexuses.

**SPLANCHNICA**. Medicines adapted to diseases of the bowels. Also, the 2d order of the class *Callica* of Good; defined,—diseases affecting the collatitious viscera, and characterized by,—disquiet or diseased action in the organs auxiliary to the digestive process, without primary inflammation.

**SPLANCHNO'DYNĒ**, from *σπλαγχνον*, 'an intestine,' and *δυνη*, 'pain.' Pain in the bowels.

**SPLANCHNOGRAPHY**, *Splanchnographia*, from *σπλαγχνον*, 'a viscus,' and *λογος*, 'a description.' The part of anatomy which treats of the viscera.

**SPLANCHNOLOGY**, *Splanchnologia*, from *σπλαγχνον*, 'a viscus,' and *λογος*, 'a discourse.' A treatise on the viscera:—also, *Splanchnography*.

**SPLANCHNOPATHIA**, from *σπλαγχνον*, 'an intestine,' and *παθος*, 'suffering.' A disease of the intestines.

**SPLANCHNOTOMY**, *Splanchnotomia*, from *σπλαγχνον*, 'a viscus,' and *τεμνω*, 'I cut.' Dissection of the viscera.

**SPLEEN**, *σπλην*, *Lien*, (F.) *Rate*. A soft, spongy, parenchymatous organ; of a more or less deep violet red, situate deeply in the left hypochondrium, below the diaphragm, above the colon, between the great tuberosity of the stomach and the cartilages of the false ribs, and above and anterior to the kidney. Its ordinary length is  $4\frac{1}{2}$  inches; its thickness,  $2\frac{1}{2}$ ; and its weight 8 ounces. Its parenchyma, which is bathed in blood, contains a multitude of grayish, soft, and semi-transparent granulations. It is covered by a serous membrane, furnished by the peritoneum; and by a proper coat, of a fibrous nature, which is intimately united with it, and transmits, into its interior, some delicate, solid, and very elastic prolongations. At its inner edge is a fissure, by which

the vessels and nerves enter the tissue. The functions of the spleen are unknown. One of the latest opinions is, that it belongs to the lymphatic system.

**SPLEEN**, *Hypochondriasis*.

**SPLEENWORT**, *Asplenium*, *Asplenium scolopendrium*.

**SPLENAL'GIA**, from *σπλην*, 'the spleen,' and *αλγος*, 'pain.' Pain in the spleen.

**SPLENECTO'MIA**, from *σπλην*, 'the spleen,' and *τεμνω*, 'I cut.' Extirpation of the spleen.

**SPLENEMPHRAX'IS**, from *σπλην*, 'the spleen,' and *εμφρασσω*, 'I obstruct.' Obstruction of the spleen.—Vogel.

**SPLENES**, *Hypochondriasis*.

**SPLENETICUS**, *Splēnicus*, (F.) *Ratéleux*. That which relates to the spleen: one labouring under diseased spleen. Medicines, adapted to diseases of the spleen.

**SPLENIC**, *Splēnicus*, from *σπλην*, 'the spleen.' That which relates to the spleen. A name given to several parts.

1. The **SPLENIC ARTERY**. It arises from the cœliac; and passes from right to left, forming many windings along the upper edge of the pancreas, which lodges it in a special groove. It reaches the fissure of the spleen, and divides into several branches, that enter the organ. In its course it furnishes the pancreatic, left gastro-epiploic, and the *vasa brevia*.

2. The **SPLENIC VEIN** arises from the spleen, and accompanies the splenic artery; proceeding from left to right, to unite with the superior mesenteric vein, and to form, with it, the abdominal vena porta. In its course, it receives veins corresponding to the *vasa brevia*, the right and left gastro-epiploic, the duodenal, pancreatic, coronaria ventriculi, and inferior mesenteric veins.

The **SPLENIC PLEXUS** is a nervous network, which proceeds from the cœliac plexus, and accompanies the splenic artery, sending secondary plexuses to each division.

**SPLENICUS**, *Spleneticus*.

**SPLENIS TUMOR**, *Ague cake*.

**SPLENITIS**, from *σπλην*, 'the spleen.' Inflammation of the spleen. *Empres'ma splenitis*, *Lienis inflammatio*. A rare disease characterized by local pain, swelling, and heat; and which, sometimes, terminates by suppuration. It must be treated like other inflammations.

**SPLENIUM**, *Compress*.

**SPLENIUS**, *S. Capitis*, *S. Colli*, *Cervico-dorso-mastoidien* et *dorso-trachélien*, *Posterior mastoid muscle*, *Cervico-mastoidien* (Ch.) So called from its resemblance to the spleen of certain animals. A muscle, situate at the posterior part of the neck, and upper part of the back. It is much broader above than below, where it terminates in a point. It is attached, by its inner edge, to the spinous processes of the five first dorsal vertebræ; to that of the 7th cervical, and to the inferior part of the posterior cervical ligament. By its upper extremity, it is attached to the transverse processes of the two first cervical vertebræ, to the mastoid process, and to the posterior surface of the occipital bone. Some have considered this muscle to be formed of two portions which they have called *Splenius colli*, and *Splenius capitis*. The

splenius extends the head, inclines it, and rotates it. If the splenii of each side act together, they extend the head.

**SPLENOCE/LĒ**, from *σπλήν*, 'the spleen,' and *κίλη*, 'a tumour.' Hernia formed by the spleen.

**SPLENOGRAPHY**, from *σπλήν*, 'the spleen,' and *γραφία*, 'a description.' A description of the spleen.

**SPLENOI/OGY**, from *σπλήν*, 'the spleen,' and *λόγος*, 'a discourse.' A treatise on the spleen.

**SPLENON/CUS**, *Megalosplēnia*, from *σπλήν*, 'the spleen,' and *ογκος*, 'a tumour.' Tumor-faction of the spleen.

**SPLENOPAREC/TAMA**, from *σπλήν*, 'the spleen,' and *παρεξίταμα*, 'excessive volume.' Excessive enlargement of the spleen.—Ploucquet.

**SPLENOTOMY**, *Splenotomia*, from *σπλήν*, 'the spleen,' and *τομή*, 'I cut.' Dissection of the spleen.

**SPLINT**, Teut. *Splinter*, from *splijten*, 'to split.' *Hastula*, *Assula*, *Asserculum*, *Plagula*, *Narthex*, *Ferula*. (F.) *Attelle*, *Éclisse*. A flexible and resisting lamina of wood, used in the treatment of fractures, to keep the fragments in apposition, and prevent their displacement. Splints are made of iron, wood, bark of trees, leather, pasteboard, &c. They are generally padded, and are fixed by a roller or by tapes, according to circumstances.

**SPLINTER**, (F.) *Esquille*. Same etymon. This term is, sometimes, applied to a small portion of wood, which occasionally enters the skin, and gives occasion to much irritation, until it is removed.—*Aculcus lig'neus*, (F.) *Écharde*.

It is, also, applied to fragments that separate from a fractured or diseased bone.

**SPODIUM GRÆCORUM**, *Album græcum*.

**SPOLIARIUM**, *Apodyterium*.

**SPOLIATI'VA**, from *spolio*, 'I take away.' *Phlebotomia spoliati'va*, (F.) *Saignée spoliative*. Blood-letting, used for the purpose of diminishing the mass of blood.

**SPOLIATORIUM**, *Apodyterium*.

**SPONDYLAI/GIA**, from *σπονδυλος*, 'a vertebra,' and *αλγος*, 'pain.' Pain in the vertebra. *Cacorrhachitis*, (q. v.)

**SPONDYLARTHROFACE**, *Vertebral disease*.

**SPONDYLI**, *Vertebrae*.

**SPONDYLIUM**, *Hærcleum spondylium*.

**SPONDYLOCACE**, *Vertebral disease*.

**SPOND'YLUS**, *σπονδυλος*. A vertebra; and, especially, the second cervical vertebra.

**SPONGE**, **BASTARD**, *Alcyonium*.

**SPONGIA**, *Spongus*, *Spongia officinalis*, *Spongia Marina*, *Sponge*, (F.) *Éponge*. An organized, marine substance, of the great class of Zoophytes, met with in many seas, but especially in the Mediterranean and Arabian. It is supple, elastic, porous, and capable of absorbing fluids in which it may be placed, and of thus increasing in size. It is employed, in surgery, for cleansing or washing; for absorbing acrid discharges from ulcers; suppressing hemorrhage, when the mouth of the vessel can be compressed by it, and for forming tents for dilating wounds; in which case, the sponge is immersed in melting wax, and cooled before

being used. It is then called *Prepared Sponge* or *Sponge Tent*.

**SPONGIA CYNOSBATI**, *Bedegar*.

The **SPONGIA USTA** or *Burnt Sponge*, contains carbonate and phosphate of lime, carbonate of soda, charcoal, and *iodine*. It is used in bronchocele, scrofulous affections, and herpetic eruptions; and its good effects seem to be dependent upon the iodine, (q. v.)

**SPONGIÆ LAPIS**. A name given to small friable stones found in sponge. They were formerly esteemed lithontriptic.

**SPONG'GION**, *σπογγιον*. Ancient name of an epithem made of goats' dung: and, also, of a malagma, which was considered capable of absorbing the serum in dropsies, like a sponge.—Paulus, *Gorraeus*.

**SPONGOID INFLAMMATION**, *Hæmatodes fungus*.

**SPONGOS**, *Tonsil*.

**SPONSA SOLIS**, *Calendula officinalis*.

**SPONTANEOUS**, *Spontaneus*. That which occurs of itself, or without any manifest external cause. Evacuations are termed *spontaneous*, which are not produced by medicine. *Spontaneous las'situde* is that, which is not the result of fatigue. Diseases are also *spontaneous* which supervene without apparent cause.

**SPORADIC**, *Spor'ades*, *Sporad'ici*, *Morbi disper'si*, *Morbi sporsi*. Diseases are so called, which supervene indifferently in every season and situation, from accidental causes, and independently of any epidemic or contagious influence.

**SPRAIN**, corrupted from *strain*:—*Subluxa'tio*, *Distor'sio*, *Dias'trophē*, *Diastrem'ma*, *Exarthre'ma*, *Exarthro'sis*, *Strenma*, *Thlasma Strenma*; a *wrench*, (F.) *Détorse*, *Entorse*, *Foulure*. A violent straining or twisting of the soft parts surrounding the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured. This affection, which has been regarded as an incomplete luxation, occurs, particularly, in the ginglymoid joints;—as in the foot, wrist, knee, &c. The violence causes an afflux of blood; the serum of the blood is poured out, and, often, the blood itself, owing to the rupture of vessels; and inflammation arises, which ends in resolution or induration.

Local, antiphlogistic applications are required, with perfect rest; and, when the inflammatory action has subsided, cold pumping and friction, with the application of a plaster and bandage will afford support, till the parts affected recover their due tone.

**SPRAT**, **YELLOW-BILLED**, *Clupea thryssa*.

**SPRUCE BEER**, *White Spruce Beer*. A beer, made as follows. To 10 gallons of water add 6 pounds of sugar, and 4 oz. of essence of spruce. Add yeast; and bottle, when ready. It is grateful and antiscorbutic.

**SPRUCE BEER POWDERS** may be formed of white sugar, ℥j and ℥ij; *sodæ subcarb.*, gr. xxvj; *essence of spruce*, gr. x, in each blue paper; and *acid of tartar*, ℥ss, in each white paper. For half a pint of water.

**SPUTIO**, *Exspuitio*.

**SPUMA ARGENTI**, *Plumbi oxydum semivitreum*—s. *Cerevisiæ*, *Yest*—s. *Trium draconum*, *Antimonium muriatum*.

SPUMEUX, Frothy.

SPUMOSUS, Frothy.

SPUNK, *Boletus igniarius*.

SPUR, Sax.  $\rho$ pup, (F.) *Éperon des Artères*. The angle at which the arteries leave a cavity or trunk.

SPUR, Ergot.

SPURGE, CAPER, *Euphorbia lathyris*—s. Cypress, *Euphorbia Cyparissias*—s. Flax, *Daphne gnidium*—s. Flowering, large, *Euphorbia corollata*—s. Garden, *Euphorbia lathyris*—s. Greater, *Euphorbia palustris*—s. Ipecacuanha, *Euphorbia ipecacuanha*—s. Laurel, *Daphne laureola*—s. Marsh, *Euphorbia palustris*—s. Olive, *Cneorum tricoccum*—s. Olive, *Daphne mezereum*—s. Sea, *Euphorbia paralias*.

SPUTAMEN, Sputum.

SPUTATIO, Exspuition.

SPUTUM, *Sputa'men*, *Pty'elou*, *Spit*, (F.) *Crachat*. The substance ejected from the mouth in the act of spitting. It is composed of saliva, and of the mucus secreted by the mucous membrane of the nasal fossæ and fauces, and by the membrane of the larynx and bronchi. The sputa are, sometimes, called *aruginous*, when of a greenish-yellow colour; *gummy*, when they resemble a thick solution of gum; *frothy*, (F.) *Mousseux*, when covered with froth; *rubiginous*, (F.) *Rubigineux* ou *rouillés*, when of a reddish-yellow; and *streaked*, (F.) *Striés*, when mixed with lines of blood.

SPUTUM CRUENTUM, Hæmoptysis—s. Sanguinis, Hæmoptysis.

SQUALLING, Vagitus.

SQUAMA, Scale, Table.

SQUAME, Scaly diseases.

SQUAMARIA, *Plumbago Europæa*.

SQUAMEUX, Squamous.

SQUAMOUS, *Squamo'sus*, from *squama*, 'a scale.' That which relates to a scale.

The SQUAMOUS PORTION of the temporal bone, (F.) *Portion squameuse ou écailleuse du Temporal*, is the upper part of the temporal, so called from a fancied resemblance to a scale.

The SQUAMOUS SUTURE, *Sutu'ra squamo'sa*, *S. mendo'sa* seu *lepidocœi'des* seu *lepid'o'des*, (F.) *Suture squameuse ou écailleuse*. The suture which unites the squamous portion of the temporal bone with the parietal.

Certain scaly cutaneous affections are also called *squamous*, (F.) *squameux*. See Scale.

SQUELETTE, Skeleton.

SQUELETOLOGIE, Skeletology.

SQUILL, *Scilla*—s. Vinegar of, *Acetum scille*.

SQUILLA, *Scilla*.

SQUINANÇIE, Cynanche, Cynanche tonsillar.

SQUINANCY, COMMON, Cynanche tonsillar.

SQUINANTHIA, Cynanche.

SQUINANTHUS, *Juncus odoratus*.

SQUINE, *Smilax China*.

SQUINSY, Cynanche tonsillar.

SQUINTING, Strabismus.

SQUIRRE, Scirrhus.

SQUIRRUS, Scirrhus.

STACHYS FETIDA, Galeopsis.

STACTE, Myrrha.

STADE, Stage.

STADIUM, Stage.

STAFF, (D.) *Staf*. An instrument of great importance in Lithotomy:—being the director for the gorget or knife. It is made of steel; and the handle is flat and rough, in order that it may be more securely held. The groove is on its convex surface.

STAG'S PIZZLE. See Cervus.

STAGE, (F.) *Estage, étage, Stadium; Stade*. The period or degree of a disease: especially the period of an intermittent:—as the *cold stage, hot stage, &c.*

STAGIUM. The sixth part of an ounce.

STAGMA, from  $\sigma\tau\alpha\omega$ , 'I distil.' *Stalag'ma*. Any distilled liquid or liquor.

STAGMA, Gutta.

STAGNATION, *Stagnatio*, from *stagnar'e*, 'to form a pond.' Accumulation and retardation of fluids in any part of the body.

STAHLIAN. One who follows the doctrine of *Stahl*.

STAHLIANISM. The doctrine of *Stahl*, which considered every vital action under the direction and presidency of the soul.

STALAGMA, Stagma.

STALAGMITIS CAMBOGIOIDES. See Cambogia.

STALAGMOS, Distillation.

STAMMERING, Balbuties.

STANGOS, Tin.

STANNI MURIAS, Tin, muriate of—s. Oxyduli murias, Tin, muriate of.

STANNIOLUM, Tinfoil.

STANNUM, Tin—s. *Foliatum, Tinfoil*—s. *Indicum, Zincum*.

STAPÉDIEN, Stapedius.

STAPÉDIUS, *Stapes, Pyramidal-stapédien*. A muscle of the middle ear, which draws the stapes obliquely upwards. (F.) *Stapédien*.

STAPES, (F.) *Étrier*. The innermost of the small bones of the ear, so called because it resembles a stirrup. It is situate horizontally in the cavity of the tympanum. Its head, which is directed outwards, is articulated with the os orbiculare. Its base faces inwards, and is applied to the fenestra ovalis, which it closes imperfectly, and to which it is united by a membrane. Its branches are one anterior, and the other posterior. They are curved; and the space between them is parabolic.

Surgeons have given the name *Stapes* to a bandage, used in bleeding from the foot; which forms a figure of 8 around the ankles.

STAPHIS, *Delphinium staphisagria*.

STAPHISAGRIA, *Delphinium staphisagria*.

STAPHYLAGRA, *Staphylepartes*.

STAPHYLE, *Uvula*, see *Vitis vinifera*.

STAPHYLEPARTES, from  $\sigma\tau\alpha\phi\upsilon\lambda\eta$ , 'the uvula,' and  $\epsilon\tau\alpha\iota\omega$ , 'I lift up.' *Staphylagra*.

An instrument for laying hold of, and removing, the uvula.—Paulus.

STAPHYLINO-PHARYNGEUS, Palatopharyngeus.

STAPHYLINUS EXTERNUS, Circumflexus.

STAPHYLITIS, Uvulitis.

STAPHYLODIALYSIS, Cionis.

STAPHYLOMA, from  $\sigma\tau\alpha\phi\upsilon\lambda\eta$ , 'a grape.' *Uvul'tio, Myoceph'alon, Parop'sis Staphylo'ma, Staphylo'sis, Polygro'ma*. A name given to different tumours of the anterior surface of the globe of the eye.

**STAPHYLOMA OF THE CORNEA** is an unequal, embossed, bluish or whitish, round or conical tumour; of variable size; formed by the projection of the transparent cornea, which is sometimes extenuated and distended, at others thickened.

**STAPHYLOMA OF THE SCLEROTIC** differs from the last, in the prominence existing on a part of the eye covered by the sclerotic, which is much thinner.

**STAPHYLOMA OF THE IRIS** is the disease, described by Scarpa under the name *Procidencia Iridis*. It is hernia of the iris, through an accidental opening into the cornea.

**STAPHYLONCUS**, *Staphylon'cia*, from *σταφυλη*, 'the uvula,' and *ογκος*, 'tumour.' Tumefaction of the uvula.

**STAPHYLOEDEMA**, *Ang'na uvula'ris*, *Dyspha'gia uvulo'sa*, *Hypostaphyl'e*, *Prolap'sus uvulae*, *Edema uvulae*, *Produc'tio uvulae à pituitâ*, *Craspedon*. Relaxation of the uvula, which, either from inflammation or infiltration, hangs down so as to occasion difficult deglutition, cough, &c. Scarification, astringent gargles, and, if necessary, excision, constitute the treatment.

**STAPHYLOPLASTIC**, *Staphyloplas'ticus*; from *σταφυλη*, 'the uvula,' and *πλασσω*, 'I form.' The operation for replacing the soft palate, where it has been lost.

**STAPHYLORAPHY**, *Velosynth'esis*, *Staphylorrhaphia*, *Kionorrhaphia*, *Uranorrhaphia*, *Uraniskorrhaphia*, from *σταφυλη*, 'the uvula,' and *ραφη*, 'a suture.' The operation for uniting a cleft palate. It consists in paring the edges of the cleft; passing ligatures through them, and bringing them together.

**STAPHYLOSIS**, *Staphyloma*.

**STARAPPLE**, **BROAD-LEAVED**, *Chrysophyllum canino*—Star Grass, *Aletris farinosa*—s. Knap-weed, *Centaurea calcitrapa*—star-stroke, *Coup-de-soleil*—s. Wort, *Aletris farinosa*—s. Wort, golden, *Bubonium*.

**STARCH**, *Anylum*—s. Blue, *Smalt*—s. Iodide of, see *Iodine*—s. Potato, see *Solanum tuberosum*.

**STASIS**, *στασις*, from *σταω*, 'I stop.' This word has nearly the same signification as stagnation. Stagnation, however, sometimes includes a morbid condition of the fluids,—Stasis never.

**STASIS**, Station.

**STATIC**. An epithet applied to the physical phenomena presented by organized bodies, in contradistinction to the organic or vital.

**STATICE LIMO'NIUM**, *Behen rubrum*, *Limonium*, *L. majus*, *Behen*, *Statice Carolina'na*, *Sea Lav'ender*, *Red Behen*, *Behmen Ackmar*, *Marsh Rosemary*, *Laxender Thrift*, (F.) *Behen rouge*. Family, *Plumbaginææ*. Sec. Syst. *Pentandria Pentagynia*. The roots have been esteemed astringent, tonic, and eminently antiseptic.

**STATION**, *Statio*, *Stasis*, *Status*, from *sto*, 'I stand.' The act of standing.

**STATIONARY**, *Stationarius*, from *stare*, 'to stand.' A name given by Sydenham and Stoll to certain diseases, which depend upon a particular state of the atmosphere; and which prevail in a district for a certain number of years; and then give way to others.

**STATISTICS, MEDICAL**. That part of Medicine which relates to the detail of facts connected with the mortality, salubrity, &c. of different countries and situations.

**STATURE**, *Statu'ra*, *Meg'ethos*. The height of the human figure. The following table exhibits the results of several admeasurements on the authority of Mr. Lawrence, with the heights of some of the monkey species.

|  | Stature.     |
|--|--------------|
|  | Feet. In.    |
| An Englishman - - - -                                    | 6 4½         |
|  | to           |
|  | 5 00         |
| An Englishwoman - - - -                                  | 5 4          |
|  | to           |
|  | 5 00         |
| European male skeleton - -                               | 5 8          |
| Do. - - - -  | 5 5          |
| A Negro at the Lunatic Hospital, Liverpool - - - -       | 5 10½        |
| Another from Virginia - - -                              | 5 5½         |
| Another from the Gold Coast - -                          | 5 8          |
| Another - - - -  | 5 00         |
| Negro skeleton - - - -                                   | 4 11         |
| Another - - - -  | 5 7½         |
| A Lascar - - - -   | 5 4          |
| Venus de' Medici - - - -                                 | 5 00         |
| Tyson's Chimpansee ( <i>Simia Troglodytes</i> ), - - - - | 2 2          |
| Mr. Abel's Ourang Outang - - -                           | 2 7          |
| Camper's Do. - - - -                                     | less than 30 |
| Mr. White's Monkey - - - -                               | 2 2          |

**STATUS**, *Acme*—s. *Erethicus*, *Nervous diathesis*—s. *Nervosus*, *Nervous diathesis*—s. *Sthenicus*, *Sthenia*—s. *Verminosus*, *Helminthiasis*.

**STAVESACRE**, *Delphinium staphisagria*.

**STAXIS**, *Apostax'is*. A slight epistaxis or nasal hemorrhage.—*Hippocrates*.

**STEAR**, *Pinguedo*, *Sævum*.

**STEATITES**, *Polysarcia*.

**STEATOCE'LE**, from *σταεω*, 'suet,' and *κηλη*, 'a tumour.' A tumour formed by a collection of steatomatous matter in the scrotum.

**STEATOMA**, *σταεωμα*, from *σταεω*, 'suet.' *Seva'tio*, *Steato'sis*, *Emphy'ma encys'tis steatoma*. An encysted tumour, whose contents are similar to fat.

**STEEL**, *Chalybs*.

**STEGANOP'ODES**, *στεγανοποδες*, *Planip'edes*. They who have flat feet, or are web-footed, from *στεγανος*, 'covered,' and *πους*, 'foot.'

**STEGNO'SIS**, *Constipa'tio*, *Stipa'tio*, *Condensa'tio*, *Obstruc'tio*, from *στεγνωω*, 'I constrict.' Constriction of the pores and vessels. Constipation. Suppression of the evacuations.

**STEGNOTICA**, *Astringents*.

**STEIROSIS**, *Sterilitas*.

**STELENGIS**, *Stridor dentium*.

**STELLA**, *Fascia stella'ta*, (F.) *Étoile*. A bandage, improperly compared to a star, because it is crossed like the letter X. This bandage is applied upon one or both shoulders. In the first case, it is called *simple*; in the second, *double*. It was employed in cases of fractures of the sternum, clavicle, scapula; in luxations of the humerus, &c.

**STELLA TERRÆ**, *Plantago coronopus*.

STELLATA RUPINA, *Centaurea calcitrapa*.

STELOCHITIS, *Osteocolla*.

STENAGMUS, *Suspirium*.

STENAXIS, *Suspirium*.

STENIA, *Sthenia*.

STENICUS, *Active*.

STENOBREGMATE. See *Cranium*.

STENOCARDIA, *Angina pectoris*.

STENOCHORIA, *Angustia*.

STENOTHORAC'ES, from *στενος*, 'narrow,' and *θώραξ*, 'the chest.' They who have narrow chests.

STENTOROPHONUS, *σεντοροφωνος*, from *σεντορ*, *Stentor*, a Greek in the army before Troy; and *φωνη*, 'voice.' One who has a strong voice.

STEPHANE, *Crown*.

STEPHENS, MRS., REMEDY FOR THE STONE. This consisted of lime, prepared by calcining the shells of eggs and snails, made into pills with soap. A decoction was, also, administered, consisting of chamomile, fennel, parsley, and burdock, with a portion of Alicant soap. Its virtues were dependent upon the lime and the tonic properties of the decoction. Hales, Hartley, Kirkpatrick, Lobb, and others wrote in favour of this nostrum; and it was ultimately bought by the British Parliament for £5000!

STERA, *Uterus*.

STERCORACEOUS, *Stercorarius*, from *stercus*, 'dung.' (F.) *Stercoraire*, *Stercoral*.

The French use the term *Fistules stercoraires* for those, which are kept up by the constant passage of fecal or *stercoraceous matter*.

The name *Stercoraires* is sometimes given, in derision, to those physicians, who are fond of purging their patients: *à posteriori* has been similarly used.

STERCORAIRE, *Stercoraceous*.

STERCUS, *Excrement*, *Fimus*—s. *Caninum album*, *Album Græcum*—s. *Diaboli*, *Asafætida*—s. *Equi non castrati*, *Fimus*—s. *Lacertæ*, *Crocodilia*.

STEREOS, *Solid*.

STEREOTICA, from *στερεος*, 'hard.' Fortuitous lesions or deformities affecting the hard parts. The 2d order, class *Typhica* of Good.

STERILITAS, *Agonia*, *Stierosis*, *Stirosis*, *Agennesia*, *Sterility*, *Aeyesis*, *Barrenness*, *Aphoria*, *Atechia*, *Aeidesis*. Quality of that which is barren. Sterility may be *absolute* or *relative*. The former depends upon some vitious conformation of the genital organs, apparent or concealed; and, occasionally, admits of cure. Sterility is *relative*, when a female does not conceive with one individual, but does with another. Sterility, in females, is often dependent upon a condition of the uterus, characterized by membranous menstruation.

STERNALGIA, *Angina pectoris*.

STERNO-CLAVICULAR, *Sterno-clavicularis*. That which relates to the sternum and clavicle.

The STERNO-CLAVICULAR ARTICULATION is the union of the inner extremity of the clavicle with a round facette at each side of the superior extremity of the sternum. In this articulation there are, besides the incrusting cartilages, two radiated *sterno-clavicular*, (F.) *Sterno-claviculaires rayonnées*; one anterior, and one posterior;

—an *inter-clavicular ligament*, extending between the two clavicles, and two synovial capsules, separated by an *inter-articular fibro-cartilage*. The *costo-clavicular ligament* may, also, be considered to belong to this articulation.

STERNO-CLAVIO-MASTOIDIEN, *Sterno-cleido-mastoideus*—s. *Cleido-hyoideus*, *Sterno-hyoideus*.

STERNO-CLEIDO-MASTOIDEUS, *Sterno-mastoideus*, *Cleido-mastoïdens*, *Mastoïdeus*, *Sterno-clavio-mastoïdien*, *Mastoïdeus anterior*; (F.) *Sterno-mastoidien*; from *στενον*, 'the sternum,' *κλεις*, 'the clavicle,' and *μαστος*, 'the mastoid process.' A muscle situate at the anterior and lateral part of the neck. It is long and flattened: simple, above; and divided into two portions below; where it is inserted into the anterior and superior part of the sternum, and the inner quarter of the clavicle. Above, it terminates at the mastoid process,—which it embraces,—at the neighbouring part of the temporal bone, and at the outer third of the upper curved line of the occipital bone. It carries the head forward; inclines, and rotates it to one side. When both contract, they bend the head directly forwards.

STERNO-COSTAL, *Triangularis sterni*—s. *Costo-clavio-humeral*, *Pectoralis major*—s. *Humeral*, *Pectoralis major*.

STERNO-HYOIDEUS, *Sterno-cleido-hyoideus*, *Sterno-hyoïdes*, *Hyoïdes primus*; from *στενον*, 'the sternum,' and *υοιδης*, 'the os hyoides.' A muscle, situate at the anterior part of the neck; inserted, above, at the inferior edge of the body of the hyoid bone; below, into the upper part of the posterior surface of the sternum:—at the posterior part of the sterno-clavicular articulation, and sometimes into the cartilage of the first rib. It depresses the os hyoides.

STERNO-MASTOIDIEN, *Sterno-cleido-mastoideus*—s. *Pubien*, *Rectus abdominis*.

STERNO-THYROIDEUS, *Sterno-thyroïdes*, *Bronchius*. A muscle, situate at the anterior part of the neck. It is attached, above, to the oblique line seen on the outer surface of the thyroid cartilage; and terminates, below, at the upper part of the posterior surface of the sternum, and the cartilage of the second rib. When it contracts, it depresses the thyroid cartilage and os hyoides, by the medium of the thyro-hyoid membrane.

STERNODYNIA SYNCOPTICA ET PALPITANS, *Angina pectoris*.

STERNUM, *Sternum*, from *στερος*, 'solid;' *Os asser* seu *pectoris* seu *ziphoides* seu *gladioli* seu *ensiforme*, *Scutum cordis*, *Breast Bone*. An azygous, symmetrical bone, situate at the forepart of the chest. It is flat; broad above, narrower in the middle; and terminates, below, by a pointed cartilage—the xiphoid, (q. v.) It has an anterior or cutaneous surface, a posterior or mediastinal;—a superior or clavicular extremity, and an inferior or abdominal. It is articulated with the clavicles and the seven upper ribs on each side, by means of their cartilages. According to Bôclard, it is formed of six principal bones, which he names, from their position, 1. *Primi-sternal* or *clavi-sternal*: 2. *Duo-sternal*: 3. *Tri-sternal*: 4. *Quarti-sternal*: 5. *Quinti-sternal*: 6. *Ultimi-sternal* or *ensisternal*.

STERNUTAMENTORIA, Achillea ptarmica.

STERNUTAMENTUM, Sneezing.

STERNUTATIO, Sneezing.

STERNUTATOIRE, Sternutatory.

STERNUTATORIUM, Errhine.

STERNUTATORY, *Sternutatorius*, from *Sternutamentum*, *Errhinum*, *Ptar'micum*, (F.) *Sternutatoire*; from *sternut'aire*, 'to sneeze.' A substance, which provokes sneezing;—as tobacco, &c.—See Errhine.

STERTEUR, Stertor.

STERTOR, *Ronchus* or *Rhynchus*, *Renchus*, *Rhenchus*, (F.) *Sterteur*. That deep snoring, (q. v.) which accompanies inspiration, in some diseases,—particularly in apoplexy. Such respiration is said to be *stertorous*.

STETHODESMIUM, Corsets.

STETHOSCOPE, from *στηθος*, 'the chest,' and *σκοπεω*, 'I examine.' An instrument, invented by Professor Laënnec, of Paris, for exploring the chest. The stethoscope, sometimes called *Pectoriloque*, is a cylinder of wood, from four inches to a foot long; pierced through and through by a longitudinal canal about a quarter of an inch in diameter. The longer are generally composed of two portions, that fit together by means of a screw; and one of which is hollowed at the extremity, in the shape of a funnel. These two portions being screwed to each other, the physician lays hold of the instrument, as he would of a pen, puts the funnel-shaped extremity on the chest of the patient, and applies his ear to the other end. To explore the pulsations of the heart, the funnel is plugged up by a piece of the same kind of wood accurately adapted to it, and pierced by a canal of the same width as that in the body of the instrument. Stethoscopes are sometimes flexible, like the flexible ear-trumpet.

This mode of examining affections of the chest, &c. is what Laënnec terms, *Auscultation mediate*.—*Mediate Auscultation*.

STETHOSCOPIA. See Auscultation.

STEW, Stove.

STHEN'IA, *Steni'a*, *Diathesis sthen'ica*, *Status sthen'icus*, from *σθενος*, 'strength,' 'power.' Excess of strength; excitement of the organic actions. A word used, especially by the Brunonians,—as well as *Asthenia*,—its antithesis. *Sthenic* or *dynamic diseases* are such as depend upon excessive excitement.

STHENOPYRA, Synochia.

STIBI, Antimonium.

STIBIALIS, Antimonial.

STIBIATUS TARTRIS LIXIVLÆ, Antimonium tartarizatum.

STIBII, Butyrum, Antimonium muriatum—s. Deuto-murias sublimatus, Antimonium muriatum—s. et potassæ deuto-tartras, Antimonium tartarizatum—s. Hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Oxidum acido muriatico oxygenato paratum, Algaroth—s. Oxidum album mediante nitro confectum, Antimonium diaphoreticum—s. Oxidum præcipitando paratum, Algaroth—s. Oxodes album, Antimonium diaphoreticum—s. Oxodes sulphuratum, Antimonii sulphuretum præcipitatum—s. Oxidisulphurati hydro-sulphuretum luteum, Antimonii sulphuretum præcipitatum—s. Oxidulati sulphuretum, Antimonii sulphure-

tum præcipitatum—s. Oxydulum vitreatum, Antimonii vitrum—s. Oxydum semivitreum, Antimonii vitrum—s. Oxydum sulphuratum, Oxydum stibii sulphuratum—s. Subhydrosulphas, Antimonii sulphuretum rubrum—s. Submurias præcipitando paratum, Algaroth—s. Sulphurati hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Sulphuretum nigrum, Antimonium—s. Vitrum, Antimonii vitrum.

STIBIOSUM HYDROSULPHURETUM CUM SULPHURE, Antimonii sulphuretum præcipitatum—s. Oxidum, Antimonium diaphoreticum.

STIBIUM, Antimonium.

STIFF JOINT, MUSCULAR, Contractura.

STIGMATA. See Nævus.

STILBOMA, Cosmetic.

STILLA, Gutta.

STILLICIDIUM, *Substiltum*. This term is often used synonymously with *Strungury*. It means the flow of any fluid—particularly of the urine—drop by drop. Also, a kind of embrocation effected by dropping the liquid upon the part.

STILLICIDIUM NARIUM, Coryza.

STIMATO'SIS, *Stymatosis*, *Hæmorrh'gia Penis*, *Stymatorrh'gia*, *Phallorrh'gia*, from *στυμα*, 'priapism.' Hæmorrhage from the male organ: accompanied, or not, with priapism.

STIMMI, Antimonium.

STIMULANT, *Stimulans*, *Excitans*, *Excitant*. A medicine, which has the power of exciting the organic action of the different systems of the economy. Some stimulants are *diffusible*; i. e. have a prompt but temporary action; others are *permanent* or *persistent*. The action of stimulants is called *Stimulation*.

The chief stimulants are the following:

|                      |                                   |
|----------------------|-----------------------------------|
| Æther Sulphuricus,   | Nux Vomica,                       |
| Ammonia,             | Olea Essentialia,                 |
| Asafoetida,          | Opium (in small dose,)            |
| Brucina,             | Piper,                            |
| Camphora,            | Sinapis,                          |
| Capsicum,            | Strychnina,                       |
| Castoreum,           | Zingiber,                         |
| Cinnamomum,          | _____                             |
| Copaiba,             | Alcohol,                          |
| Cubeba,              | Caloric,                          |
| Guaiaicum,           | Electricity,                      |
| Hydragryi Præparata, | Mental Emotions, (the Impetudium, |
| Iodinum,             | us.)                              |

STIMULUS, 'a goad.' *Incitamentum*, *Incitatio*. Any thing which excites the animal economy.

STIPATIO, Stegnosis.

STIROISIS, Sterilitas.

STITCH, Pleurodynia—s. Common, Suture, common—s. Royal, Suture, common.

STIZOLOBIUM, Dolichos pruriens.

STLENGIS, Stridor dentium.

STOCHEIQN. Element.

STOCKING (LACED,) (F.) *Bas lissé*. A bandage used by surgeons, which consists of a stocking made of firm cloth or dog-skin, admitting of being tightly laced anteriorly. It is employed in varices and ulcers of the legs.

STOMA, Mouth.

STOMAC'ACÆ, *Stomal'gia*, *Labrisul'cium*, *Cheloc'acæ*, *Noc'acæ*, *Cheilomala'cia*, *Stomatono'ma*, *Stomatonecro'sis*, from *στυμα*, 'the mouth,' and *κακος*, 'evil.' *Cancer Oris*, *Canker*. Factor of the mouth with a bloody discharge from the gums. (F.) *Cancer aquaticus*. See *Cancer Aquaticus*. Also, *Scurvy*.

STOMACACE, *Porphyra nautica*—s. *Gangrænosum*, *Cancer aquaticus*—s. *Universalis*, *Purpura hæmorrhagica*.

STOMACAL, Stomachal.

STOMACALGIA, Cardialgia.

STOMACH, *Stomachus*, *Ventriculus*, *Nedys*, *Anocælia*, *Gaster*, (F.) *Estomac*. One of the principal organs of digestion. It is a musculo-membranous reservoir; continuous, on the one side, with the œsophagus; on the other, with the duodenum. It is situate beneath the diaphragm, between the liver and the spleen; and occupies the epigastrium and a part of the left hypochondrium. In it the food is converted into chyme.

When viewed externally, the stomach has, 1. An *anterior face*, which looks a little upwards. 2. An *inferior face*, directed downwards. 3. An *inferior or colic margin*, which is convex and extensive, and is called the *greater curvature*, (F.) *Grand courbure*. It gives origin to the omentum majus. 4. A *superior or diaphragmatic margin*, which is shorter, concave, and is called the *lesser curvature*, (F.) *Petit courbure*. The lesser omentum is attached to this. 5. A *left or œsophageal orifice*, called, also, the *cardia*, *Os ventriculi* or *upper orifice*. 6. A *right or intestinal, or inferior orifice*, called the *pylorus*. 7. A considerable dilatation, situate to the left of the cardia and greater curvature—the *great tuberosity of the stomach*; and, 8. A less extensive dilatation, situate to the right of the greater curvature:—the *lesser tuberosity* or *lesser cul-de-sac*, *Antrum Pylori*.

The inner surface of the stomach is of a reddish-white colour, and has a marbled appearance. It is constantly covered by a thick mucus, and is lined by a mucous membrane, which presents numerous wrinkles.

The parietes of the stomach consist of three membranes in superposition. The outermost is serous; and is an extension of the peritoneum; the middle coat is *muscular*,—some of its fibres running longitudinally; others, transversely: the innermost membrane is of a mucous nature, but not exactly a continuation of the membrane that lines the œsophagus. The mucous and muscular membranes form, at the pylorus, a valve, called the *Pyloric valve*. These three coats are united by a dense, close, cellular membrane; and, between the mucous and muscular coats, along the two curvatures especially, is a quantity of muciparous glands, called *Glands of Brunner*.

The arteries of the stomach are very numerous, and proceed from the coronaria ventriculi, the pyloric, splenic, and right and left gastro-epiploic. The veins have the same name, and pursue the same course as the arteries. They pour their blood into the trunk of the vena porta. Its lymphatic vessels are very numerous, and pass into ganglia, situate along the two curvatures. The nerves of the stomach proceed from the pneumogastric, and three divisions of the celiac plexus.

STOMACH DISEASE, *Limosis*.

STOMACH-PUMP. A useful instrument for conveying fluids to the stomach, when deglutition is impracticable, and for pumping up the contents of the stomach.

It consists of a forcing syringe, to the bottom

and nozzle of which flexible tubes can be attached. When the object is to force fluids into the stomach, the stomach-tube must be attached to the nozzle, and passed down the throat,—the tube connected with the bottom of the syringe being placed in the fluid to be injected. To empty the stomach, the stomach tube must be attached to the bottom of the instrument.

This instrument has been of great service where poisons have been taken. The antidote, when any exists, and is at hand, should be administered immediately prior to its use.

The stomach-pump was first employed in America by Dr. Physick, in the year 1812.

STOMACHAL, *Stomachic*, *Cardiacus*, *Stomachicus*, *Stomachalis*, from *στομαχος*, 'the stomach,' (F.) *Stomacal*, *Stomachique*. That which belongs to the stomach; that which is good for the stomach; which strengthens the stomach. A medicine that gives tone to the stomach.

STOMACHIQUE, Stomachal.

STOMACHUS, *στομαχος*. This word has been used in several different acceptations; c. g. for the œsophagus, for the cardiac orifice of the stomach, (see *Cardia*), and for the stomach itself. Hippocrates calls the neck of the bladder *στομαχος κυστεως*; and the neck of the uterus, *της μητρας στομαχος*.

STOMALGIA, from *στομα*, 'mouth,' and *αλγος*, 'pain.' Pain in the mouth. *Stomacace*, (q. v.)

STOMAT'IC, *Stomaticus*, from *στομα*, 'mouth.' A medicine used in diseases, &c., of the mouth. Dentifrices, masticatories, &c., are stomatics.

STOMATITIS; from *στομα*, 'the mouth.' Inflammation of the mouth.

STOMATITIS, FOLLICULAR, Aphthæ.

STOMATITIS, GANGRENOUS, *Cancer aquaticus*.

STOMATONECROSIS, Stomacace.

STOMATONOMA, Stomacace.

STOMATOPAN'US, from *στομα*, 'the mouth,' and *πανος*, 'a glandular tumour.' *Stomatophyma glandulosum*, *Panus Fau'cium*. Tumefaction of the glands of the mouth.

STOMATOPHY'MA, from *στομα*, 'the mouth,' and *φυμα*, 'a swelling.' A swelling in the mouth.

STOMATOPHYMA GLANDULOSUM, Stomatopanus.

STOMATOPLAS'TIC, *Stomatoplasticus*; from *στομα*, 'the mouth,' and *πλασσω*, 'I form.' The operation of forming a mouth, where the aperture has been contracted from any cause.

STOMATORRHA'GIA, (F.) *Hæmorrhagie buccale*, from *στομα*, 'the mouth,' and *ρηγνυμι*, 'I break out.' Hemorrhage from the mouth. *Stomorrhagia*.

STOMATORRHAGIA GINGIVARUM, Ulorrhagia.

STOMOMANICON, *Platysma myoides*.

STOMORRHAGIA, Stomatorrhagia.

STONE IN THE BLADDER, *Calculi*, vesical—s. *Binder*, *Osteocola*—s. *Crop*, *Sedum*—s. *Pock*, *Acne*.

STORAX, *Styrax*—s. *Liquida*, *Liquidambar styraciflua*.

STOREY'S WORM CAKES. An empirical preparation, formed of *calomel* ℥j, *jalap.* ʒj, *zingib.* ℥ij, *sacch.* ʒj, *cinnub. antim.* q. s. to colour them; *syrup. simpl.* q. s. to make into cakes.

**STOVE.** Old French *Esture*, *Stupha*; a *Stew*, *Æstua'rium*, (F.) *Éture*. A limited space, warmed artificially, and in which the air is slowly renewed. It is used for drying various substances, as plants, extracts, conserves, &c., or for taking vapour baths. In this case, the *stew* or *stove* is said to be *wet* or *humid*; in the opposite case, it is said to be *dry*, (F.) *sèche*. The latter, which is used by the Turks, is the *Laconicum* or *Calidarium* of the Romans. The former is their *tepidarium* or *vaporarium*. These kinds of baths greatly excite the cutaneous transpiration; and are valuable agents in rheumatic and other affections.

**STRABI.** See Strabismus.

**STRABILISMOS**, Strabismus.

**STRABISMUS**, *Strabilismos*, *Paropsis Strabismus*, from *στραβίζω*, 'I squint.' *Strabos'itus*, *Distorsio*, *Luscitas*, *Ilo'sis*. *Squinting*, *Goggle Eye*, (F.) *Strabisme*, *Vue louche*, *Louchement*. Want of concordance of the optic axes. It may be dependent upon natural or acquired inequality in the action of the motory muscles of the eye; on a convulsive state of one of those muscles; a difference in the sensibility of the two eyes; or a cerebral affection.

In the treatment, if the disease seems to depend upon an excess of strength, in one of the motory muscles, we must endeavour to give tone to that which is too weak, by placing before the eye a mask having a small aperture on the side to which it is necessary to direct the pupil; or by wearing glasses, provided with a piece of looking-glass, on the side to which the eye is vitiously turned; so that the reflection may be inconvenient, and occasion the organ to be turned in an opposite direction; or by putting a black patch on the angle opposite to that to which the eye is turned. If owing to weakness, the organ must be strengthened by being exerted alone, and by leaving the other at rest. If the disease be symptomatic of cerebral affection, attention must, of course, be directed to the latter.

Those affected with Strabismus, are called *Strabi*, *Strebbi*; in French, *Louches*, *Bigles*.

**STRABOSITAS**, Strabismus.

To **STRAIN**, *Cola're*, (F.) *Couler*. To pass decoctions, infusions, &c., forcibly through linen; also, to exert an effort. This is accomplished by fixing firmly the parts where the muscles to be exerted originate, in order that their full power may be developed.

**STRAINING**, Nisus.

**STRAMOINE**, *Datura stramonium*—s. *Majus album*, *Datura stramonium*—s. *Spinosum*, *Datura stramonium*.

**STRANGALIDES**, from *στραγγεω*, 'I torment.' Small, hard tumours, which form in the breast, when the milk does not find issue.

**STRANGULATIO**, *Orthopneæa*—s. *Uterina*, *Hysteria*.

**STRANGULATION**, *Strangulatio*, *Præix*, *Præixmos*, (F.) *Étranglement*, *Strangulation*. State of a part too closely constricted. Thus we say that there is *strangulation* of an intestinal hernia, when the opening that gives passage to the portion of protruded intestine contracts, so as to intercept the continuity of the digestive canal.

In *Legal Medicine*, it means the forcible ob-

struction of the air-passages, by a ligature or by the hand for criminal purposes. See Suffocation.

**STRANGULATION, UTERINE**, *Strangulatio uterina*, *Suffocatio uterina*, *S. hysterica*, *Præfocatio*. The sense of suffocation which often accompanies attacks of hysteria.

**STRANGURIA**, Enuresis.

**STRANGURY**, *Stranguria*, *Paruria stillantia*, from *σραγγέ*, 'a drop,' and *ουρον*, 'urine.' *Dysuria* (q. v.); *Urina Stillicidii* vel *substillum*. Extreme difficulty in evacuating the urine, which issues only drop by drop, and is accompanied with heat, pain, tenesmus at the neck of the bladder, &c. See Ischuria, and Retention.

**STRATIOTES**, *Achillea millefolium*.

**STRATUM PROLIGERUM**, *Proligerous Disc*.

**STRAWBERRY**, *Fragaria*—s. *Shrubby*, *Rubus arcticus*.

**STREATHAM, MINERAL WATERS OF.** Streatham is a village near London. The waters are a saline cathartic.

**STREBILI.** See Strabismus.

**STREMA**, Luxation, Sprain.

**STREPITOSUS MORBUS.** A kind of flatulent disease, said by Sorbait to be not uncommon in the Austrian Alps, in which emphysematous tumours form on different parts of the body,—accompanied by sonorous excretions of gas by the mouth and anus.

**STREPITUS AURIUM**, *Tinnitus aurium*.

**STRETCHING**, *Pandiculation*.

**STRLE CORNEÆ**, *Tenia semicircularis*—s. *Semilunares*, *Tænia semicircularis*.

**STRIATUS**, *Cannelé*, Grooved.

**STRIBILIGO**, Efflorescence.

**STRUCTURE**, *Strictura*, from *stringere*, 'to tie hard.' *Coarctatio*, (F.) *Rétrécissement*. A diminution or contracted condition of some tube or duct, as the œsophagus, urethra, &c. This must be dilated by appropriate bougies. Strictures may, also, occur in the intestines, &c., when they are unmanageable;—with the exception of those of the rectum, which admit of topical applications.

**STRIDOR DENTIUM**, *Prisis*, *Prismos*, *Brygmus*, (q. v.) (F.) *Grincement des dents*. Grinding of the teeth. A common symptom, in children, of gastric and other derangement; and often present when there is no reason to suspect any.

**STRIGIL**, *Strig'ilis*, *Stlen'g'is*, *Steleng'is*. An instrument, anciently used in the baths, for scraping off the sweat.

**STRÖBILIT'ES**, from *στροβίλις*, 'a cone of the pine.' Wine impregnated with the cones of the pine.

**STROEMIA**, *Cadaba*.

**STROMBULCUS**, *Forpex* (bullet.)

**STRONGLE**, *Strongylus*.

**STRONGYLUS**, from *στρογγυλος*, 'round.' Hippocrates, Chabert, and others mean the *Ascaris lumbricoides* by this term. The *Strongylus Gigas*, (F.) *Strongle*, is, however, distinct. It has an obtuse, flat head: mouth surrounded with six flattish papillæ: the whole bursa of the male truncated: the tail of the female rounded. It is sometimes met with,—five inches, a foot, a foot and a half, and even three feet long,—and from two lines to half an inch in

diameter. It is occasionally found in the human kidney: rarely in other viscera; and, still more rarely in the intestinal tube.

**STRONGYLUS**, Teres.

**STROPHOS**, Tormina.

**STROPHULUS**, *Lichen'asis*, *Exanthe'na strophulus*, *Ecor'mia strophulus*, *Red Gum*, *Red Gown*, *Tooth Rash*, *White Gum*. It consists of an eruption of red, or sometimes whitish pimples; occurring in early infancy, chiefly about the face, neck, and arms, surrounded by a reddish halo; or interrupted by irregular patches of cutaneous blush. All the varieties, under this genus, arise in consequence of the extreme vascularity and irritability of the skin at this period of life, when the constitution is liable to be disturbed by irritation, either in the alimentary canal, gums or other parts.

None of the eruptions are of any importance; and no medical treatment is usually necessary. If the stomach seems at all disordered, a little rhubarb and magnesia may be occasionally administered.

Willan and Bateman reckon five species,—the *Strophulus intertinctus*, *Red gum* or *gown*; the *S. albidus* or *white gum*; the *S. confertus* or *rank red gum*, *Tooth rash*; the *S. volaticus* or *Erythéma volaticum*, and the *S. candidus*.

**STROPHULUS SYLVESTRIS**, *Ignis sylvaticus*—*s. Volaticus*, *Ignis sylvaticus*.

**STRUCTURE**, *Structur'ra*, *Catusce'u*, from *struo*, 'I build.' The arrangement of the different tissues or organic elements of which animals and vegetables are composed.

**STRUMA**, *Bronchocele*, *Scrofula*.

**STRUTHIOPHAGUS**, from *στροφιθος*, 'the ostrich,' and *φαγω*, 'I eat.' Struthiophagous tribes still exist in some parts of Africa.

**STRUTHIUM**, *Saponaria*.

**STRYCHNIA**, *Strychnina*.

**STRYCHNINA**, *Strych'nine*, *Strychnia*, *Vandueline*. An alkaline principle; solid, crystalline, inodorous, bitter, and excessively poisonous, which has been discovered in the *Strychnos nux vomica*.

The medical action of strychnine on man and animals is exactly like that of the alcoholic extract of *nux vomica*. It is, however, more active. An eighth of a grain is sufficient to kill a large dog; and a quarter of a grain produces marked effects on the human body, when in health. It has been given in paralysis and other cases like the *nux vomica*. Dose, gr. one-twelfth to one-eighth.

The **ACETATE OF STRYCHNINE** (*Strychni'ni Acetas*, *Strychnium aceticum*), the **Iodate** (*Strychnium iodatum*, *Strychnium Iod'icum*), in the dose of one-eighth of a grain; the **Nitrate** (*Strychnini nitras*, *Strychnium nitricum*) and the **Sulphate** (*Strychnini Sulphas*, *Strychnium Sulphur'icum*) have been given in the same cases as pure Strychnine.

**STRYCHNOS**, *Solanum dulcamara*.

**STRYCHNOS NUX VOMICA**, *Nux Vomica*, *Nux Metel'la*, *Caniram*, *Family*, *Strychnoides*. *Sex. Syst.* Pentandria Monogynia. (F.) *Vomiquier*. A tree of the family *Strychnoides*, which grows in India, and the seeds of which have been long sold in the shops, under the names, *Nux vomica*, *Vomic nut*, *Poison nut*, *Bachelor's buttons*, &c. (F.) *Noix vomique*. For a long time, these

seeds were used only for poisoning rats; but, of late years, an alcoholic extract has been prepared from them, which has been administered in paralytic affections, in small doses. Dose of the *alcoholic extract*, *Extractum nucis vomicae spirituosum*, *E. nucis vomicae resinosum*, *E. N. V. alcohol'icum*, (F.) *Extrait alcoolique de noix vomique*, one or two grains. It produces a kind of tetanic convulsion in the paralyzed parts, when given to the requisite extent. It has, also, been administered in chronic diarrhœa and dysentery.

The wood of the **STRYCHNOS COLUBER'NA**, an Indian tree, contains strychnine. It was formerly considered a specific against the bites of venomous animals; and was recommended by Boerhaave, in intermittents. It is the *Lignum Colubrinum*. (F.) *Bois de Couleuvre*.

**STRYPHOS**, *Acerb*.

**STUDIUM INANE**, *Aphelxia otiosa*.

**STUDY**, *BROWN*, *Aphelxia otiosa*.

**STUFFING**, *Cynanche trachealis*.

**STULTITIA**, *Fatuitas*.

**STUNNED**. Old French *Estonné*, 'astonished.' (F.) *Étonné*. An epithet, applied to one, who, in consequence of a fall or other accident, has received such a concussion of the brain as to deprive him, for a time, of his mental manifestations.

**STUPA**, *Stuppa*, *Stupeion*, *στυπιον*. Tow, used in certain surgical apparatus and dressings. Also, a *Stupe*, i. e. cloth or tow used in fomentations. A flannel, wrung out of hot water, and applied to a part, is a *stupe*.

**STUPE**, *Stupa*.

**STUPEFACIENTIA**, *Narcotics*.

**STUPEFACTIFS**, *Narcotics*.

**STUPEFACTIO**, *Narcosis*.

**STUPEFIANTS**, *Narcotics*.

**STUPELION**, *Stupa*.

**STUPEUR**, *Stupor*.

**STUPHA**, *Stove*.

**STUPIA**, *Tin*.

**STUPOR**, *Eplex'is*, *Consternd'tio*, (F.) *Stupeur*. Diminished activity of the intellectual faculties; often amounting to lethargy. It occurs in many affections, especially in the neuroses.

**STUPOR**, *Narcosis*—*s. Mentis*, *Fatuitas*.

**STUPPA**, *Stupa*.

**STUPRUM**, *Rape*, (F.) *Défloration*, *Viol*. Forcible and illicit enjoyment of a married or unmarried female. When committed upon the latter, which is most commonly the case, it is also called *Defloro'tion*, *Defloratio*, *Denirginat'io*, *Vitiat'io*, *Apanthis'mus*, &c. In judging whether rape has been committed, under such circumstances;—the state of the genital organs; the age of the individual; and the possibility of accidents and diseases of the parts—will have to be considered. It will be necessary, also, to be acquainted with the evidences of virginity; and to determine,—if signs of virginity no longer exist,—whether its loss is to be attributed to copulation, or to the introduction, into the vagina, of another body than the male organ, &c. *Recent deflowering* can be much more readily distinguished than that which has taken place for some time.

**STYAN**, *Hordeolum*.

**STYE**, *Hordeolum*.

**STYGMATES.** M. J. Cloquet has proposed this word or *Stigmates* to designate the marks, in form of cicatrices, which remain on the peritoneum after the obliteration of the neck of the hernial sac. They are, commonly, radiated folds, of a whitish appearance, more or less thick, and of a fibrous or fibro-cartilaginous nature.

**STYLET,** Specillum.

**STYLIFORM,** Styloid.

**STYLO-CERATOIDES,** Stylo-hyoideus—s. Cerato-hyoideus, Stylo-hyoideus.

**STYLO-CHONDRO-HYOIDEUS.** A name given, by Douglas and Albinus, to a fleshy fasciculus, which the stylo-hyoid muscle sometimes presents, and which is attached to the lesser cornu of the os hyoides. It is the same fasciculus which Santorini calls *Stylo-hyoides novus*, *Stylo-hyoideus alter*.

**STYLO-GLOSSUS.** A muscle, situate at the anterior and superior part of the neck. It is narrow behind; much broader before; and is attached to the styloid process of the temporal bone, and to the stylo-maxillary ligament; and is inserted into the side of the tongue. It raises the base of the tongue and carries it backwards.

**STYLO-HYOIDEUS,** *Stylo-hyoïdien*, *Stylocerato-hyoïdeus*, *Stylo-ceratoïdes*, *Stylo-hyoïdes major*. A muscle, situate at the superior, anterior, and lateral part of the neck. It is thin and narrow,—especially posteriorly: anteriorly, it opens to give passage to the tendon of the digastricus. It is attached to the styloid process of the temporal bone, and to the body of the os hyoides. It raises the os hyoides, and carries it backwards.

The **STYLO-HYOID LIGAMENT** is a fibrous, flattened cord, which passes from the styloid process to the lesser cornu of the os hyoides.

The **STYLO-HYOID NERVE** is the second branch given off by the facial nerve.

**STYLO-MASTOID,** *Stylo-mastoidæus*. That which relates to the styloid and mastoid processes.

The **FORAMEN STYLO-MASTOIDEUM** of *F. Aquæductus Fallopii*, (*F.*) *Trou anonyne*, is situate at the inferior surface of the petrous portion of the temporal bone, between the styloid and mastoid processes. It terminates the aqueduct of Fallopius, and gives passage to the facial nerve.

The **STYLO-MASTOID ARTERY** arises from the posterior auricular, and, in some subjects, from the occipital. It enters the stylo-mastoid foramen; passes along the aqueduct of Fallopius, and spreads its ramifications on the mucous membrane of the tympanum, and in the mastoid cells, and semicircular canals; and terminates by anastomosing with a branch of the *Arteria meningea media*, which enters by the *Hiatus Fallopii*. Murray has given the name—*Stylo-mastoid*—to the posterior auricular artery itself.

**STYLO-MAXILLARY,** *Stylo-maxilla'ris*. That which relates to the styloid process and jaw.

The **STYLO-MAXILLARY LIGAMENT** is a ligamentous, flat cord, extending between the styloid process and the angle of the jaw.

**STYLO-PHARYNGÆUS,** *Stylo-thyro-pharyngien*. A muscle, situate at the anterior and

lateral part of the neck. It is slender; thin, above; attached to the styloid process of the temporal bone, and terminates in the parietes of the pharynx, as well as at the posterior margin of the thyroid cartilage. It raises the pharynx, and carries it backwards. Prof. Chaussier has united, under the name *Stylo-pharyngien*, the three constrictor muscles of the pharynx, the stylo-pharyngæus, and palato-pharyngæus.

**STYLO-THYRO-PHARYNGIEN,** Stylo-pharyngæus.

**STYLOID,** *Styliform*, *Styloïdes*, *Graphioïdes*, *Belonoïdes*, from *στυλος*, 'a style,' 'a peg,' 'a pin,' and *ειδος*, 'shape,' shaped like a peg or pin.

The **STYLOID PROCESSES** or *pencil-like Processes*, *Processus Beloides* seu *Belcmnoïdes* seu *Belonoïdes* seu *Graphioïdes* seu *Graphoïdes*, are, 1. A long and slender process of the temporal bone, to which are attached the styloglossus, stylo-pharyngæus, and stylo-hyoideus muscles; and the stylo-hyoid and stylo-maxillary ligaments. 2. Two slender and pyramidal processes at the inferior extremities of the radius and ulna.

**STYMATOSIS,** Stimatosis.

**STYMMATA,** *στυμματα*, from *στυμμα*, 'that which constricts or thickens.' The most solid ointments. Also, the ingredients proper for increasing their consistence.

**STYPSIS,** Astriktion, Constipation.

**STYPTERIA,** Alumen.

**STYPTIC,** EATON'S, see *Ferrum tartarizatum*—s. *Helvetius's*, see *Ferrum tartarizatum*.

**STYPTICS,** *Contraheñtia*, *Constrictiva Medicamenta*, *Constringentia*, *Anastaltica*, from *στυγω*, 'I constringe.' Sometimes used synonymously with astringent, (q. v.): generally applied to a substance, employed to arrest hemorrhage;—*Ena'mon*.

A *mechanical styptic* is one that arrests the flow of blood, by being applied immediately to the mouth of the bleeding vessel, or by inducing a coagulum, *mechanically*, in the vessel.

A *chymical styptic* is one which coagulates, *chymically*, the blood around a bleeding orifice.

**EATON'S STYPTIC.** A name first given to *Helvetius's Styptic*, when introduced into Great Britain. It is now usually made of *calcined green vitriol*,  $\overline{3j}$ ; *proof spirit*, tinged with a little oak bark,  $\overline{℥ij}$ .

**STYRAC'INUM O'LEUM.** Oil, obtained by boiling storax in good olive oil.

**STYRAX,** from *στυραξ*, 'a reed,' in which it was preserved. A resin obtained from the *Styracis officinalis*, and *S. calamita*. It is the *solid storax*;—*officinal storax*. There are two kinds of storax met with: 1. The *Red Storax*, *Gum Storax*, *Thus Judæorum*, *Styrax rubra*, *Styracis balsamum*, *Balsamum styracis officinalis*, which is obtained by incision from the *Styrax officinalis*, and, perhaps, from the *Liquidambar orientalis*. The purest is in tears; but it has lost some of its smell in drying. 2. *Common Storax*, *Styrax calamita*. That which has been received in reeds or vessels, and has had saw-dust added immediately to thicken it.

The odour of storax is fragrant: the taste aromatic. It is considered, like the other bal-

sams, to be stimulant and expectorant, but is rarely used alone.

The PURIFIED STORAX, *S. colda*, *S. purificata*, is prepared by heating the storax, and pressing it in bags, between hot iron plates. Dose, gr. x. to xxx.

STYRAX ALBA, see *Myroxylon peruiferum*—s. Benzoin, see Benjamin—s. Liquida, Liquidambar styraciflua.

SUB. A common Latin prefix, signifying 'beneath.'

SUBACTIO, *Chiro'sis*, χειρῶσις. The operation of making plasters, extracts, &c. with the hand, or with the pestle and mortar.

SUB-ATLOIDÆUS, *Infra-atloïdaus*, (F.) *Sous-atloïdien*. That which is situate beneath the atlas or first cervical vertebra. Chaussier has given this name to the second pair of cervical nerves.

SUB-AXOIDEUS, *Infra-axoïdaus*, (F.) *Sous-axoïdien*. That which is below the *axis* or *vertebra dentata*. Chaussier has given this name to the third pair of cervical nerves.

SUBBORAS NÂTRICUM, Borax.

SUBCARTILAGINEUM, Hypochondre.

SUBCLAVIAN, *Subclavus*, from *sub*, 'under,' and *clavis*, 'the clavicle.' That which is under the clavicle.

The SUBCLAVIAN ARTERIES, (F.) *Artères sous-clavières*, are situate at the upper part of the chest, and the lateral and lower parts of the neck. The right arises at the corresponding side of the trachea, and comes off from the arteria innominata or brachio-cephalic trunk. The left leaves the aorta at the end of the arch. Both extend as far as the superior surface of the first rib, in the space between the scaleni muscles, beyond which they take the name *axillary arteries*. The subclavian arteries run, for some distance, without sending off any branch. In the neighbourhood of the first rib, however, they give off, 1. *Upwards*, the *vertebral* and *inferior thyroïdal*. 2. *Downwards*, the *internal mammary*, and *superior intercostal*. 3. *Outwards*, the *transverse cervical* or *posterior scapular*, the *superior scapular*, and the *posterior cervical* or *profunda*.

The SUBCLAVIAN VEINS, (F.) *Veines sous-clavières*, succeed the axillary, and extend from the inferior extremity of the scalenus anticus, in front of which they pass, to the vena cava superior, which they form by their union. The right subclavian vein is very short: the left, longer and broader. These veins receive the mouths of the internal and external jugulars, vertebral, and superior intercostal. The left subclavian receives two veins more than the right,—the left internal mammary and left inferior thyroid. The thoracic duct opens into the left subclavian:—the corresponding great lymphatic vessel into the right.

The SUBCLAVIAN or SUBCLAVIUS MUSCLE, *Subclavius*, *Costo-clavieulaire* (Ch.), (F.) *Sous-clavier*, is situate at the superior and anterior part of the chest. It is attached, by its inner extremity, to the superior surface of the cartilage of the first rib; and by its superior margin and outer extremity to the inferior surface of the clavicle. This muscle depresses the clavicle, and carries it forward. When the shoulder is fixed, it can raise the first rib.

SUBCLAVIUS, Subclavian muscle.

SUBCRUENTUS, *Hypocræmus*, 'υφαίμος. That which has the colour and nature of blood. An epithet given to certain excreted substances, which are mixed with blood, or have the appearance of blood.

SUBCRURÆL See *Cruræus*.

SUBCUTANÆOUS, *Subcutaneus*, *Intercutaneus*, (F.) *Sous-cutané*. That which is placed immediately under the skin.

SUBDELIRIUM, Typhomania.

SUBDITA, *Subditi'tia*, *Prostheta*. Medicines introduced into some one of the natural apertures;—as suppositories, pessaries, &c.

SUBDITI'TIA, Subdita.

SUBDUCTIO, Dejection.

SUBER, *Cork*:—the bark of the *Quercus* *Suber* or *Cork Tree*, (F.) *Liège*. Family *Amentaceæ*. *Sez. Syst. Monœcia Polyandria*. Cork, when burnt, is applied as a mechanical styptic to bleeding piles, &c. Surgeons use it for making tents; and it has been recommended to be worn as an amulet to suppress the secretion of milk.

SUBFRONTALIS SUTURA. A suture, resulting from the articulation of the os frontis with the nasal process of the superior maxillary bone, and the proper bones of the nose.

SUBGRONDATION, Depression.

SUBHUMERATIO, Catomismos.

SUBINFLAMMATION, *Subinflammatio*, *Inflammaticula*, *Hypoplegmasia*. A mild degree of inflammation, so slight as hardly to deserve the name *inflammation*.

Broussais understands by the term, an augmentation in the vital phenomena of the vessels that convey white blood. Lymphatic engorgements, scrofula, herpes, and cancer he considers subinflammations.

SUBINTRANTES FEBRES, *Communican'tes febres*. Fevers, primarily intermittent, whose paroxysms approximate, so that one paroxysm begins before that which preceded it has gone through its stages.—L. Bellini.

SUBLIMAMENTUM, Emœorema.

SUBLIMATE, CORROSIVE, Hydrargyri oxymurias.

SUBLIMATION, *Sublimatio*, *Meteorismus*, *Hypo'sis*, &c. from *sublimo*, 'I raise up.' An operation, by which dry and solid matters are volatilized and condensed at the upper part of a subliming apparatus. The oxymuriate of mercury, sal ammoniac, &c. are commonly obtained by sublimation. The product of sublimation is a *Sublimatum*, *Sublimatum*, *Sublimé*.

SUBLIMATUS CORROSIVUS, Hydrargyri oxymurias.

SUBLIMÉ, Sublimate—s. *Corrosif*, Hydrargyri oxymurias.

SUBLIMIS, 'high, elevated, superficial.' Anatomists have given the name *sublimis* to certain muscles, which are situate more superficially than their kindred muscles. These last they have called *profundi*. Of the former, the *flexor sublimis digitorum* is an example.

The French use the term '*respiration sublime*' for the respiration which is accompanied by considerable elevation of the ribs, with separation of the alæ nasi at the time of inspiration.

SUBLINGUAL, *Sublingualis*, (F. *Souslingual*, from *sub*, 'under,' and *lingua*, 'the

tongue.' That which is seated under the tongue.

The **SUBLINGUAL GLAND**, *Glandula sublingualis*, *G. Bartholiniana*, *G. Riviniana*, is seated in the substance of the inferior paries of the mouth, beneath the anterior part of the tongue. It is smaller than the submaxillary, of which it frequently seems to be only a prolongation. It is oblong, flattened, amygdaloid, and is covered by the mucous membrane of the mouth, beneath which it projects. This gland has 10 or 12 excretory ducts; *Ductus Riviniani* seu *Waltheridni*, some of which open beneath the frænum linguæ, joining Wharton's duct, whilst others pierce the mucous membrane of the mouth separately. It has the same structure as the parotid.

The **SUBLINGUAL ARTERY**, with some, is the *Lingual*, (q. v.) With others, it is a branch, given off by the lingual opposite the genioglossus muscle, which is distributed, particularly to the sublingual gland, to the mylohyoid, and genioglossus, muscles, &c.

**SUBLUXATIO**, Sprain.

**SUBMAXILLARY**, *Submaxillaris*, (F.) *Sous-maxillaire*. That which is seated beneath the jaw.

The **SUBMAXILLARY GLAND**, *Maxillary Gland*, is a salivary gland, less than the parotid, seated at the inner side of the ramus and body of the inferior maxillary bone, in the triangular space between the two bellies of the digastricus. Irregularly ovoid, and flattened on three surfaces, it has the same aspect and organization as the other salivary glands. Its excretory duct is called *Wharton's Duct*, and terminates at the side of the frænum linguæ, by a very small orifice. It is also called *Ductus inferior*.

The **SUBMAXILLARY GANGLION** is a small nervous ganglion, situate opposite the gland. It seems to be formed by the superior branch of the Vidian nerve, and communicates with the lingual nerve of the inferior maxillary. Its filaments form a plexus which penetrates the submaxillary gland.

**SUBMENTAL**, *Submentalis*, (F.) *Sous-mental*, from *sub*, 'under,' and *mentum*, 'the chin.'

The **SUBMENTAL ARTERY** is furnished by the facial, near the base of the jaw. It passes forwards along the attachment of the mylohyoides, to which it furnishes branches, that cross it, to anastomose with those of the sublingual. Near the median line it bifurcates, to be distributed to the chin and muscles of the infra-hyoid region.

The **SUBMENTAL VEIN**, which accompanies the artery, opens into the labial.

**SUBMERSION**, *Submersio*, from *sub*, 'under,' and *mergo*, 'I plunge.' The act of plunging, or being entirely plunged, in a liquid.

*Asphyxia* by *submersion* or *drowning*, *Asphyxia Immer sorum*, is not owing to a certain quantity of liquid being introduced into the alimentary or air-passages; but simply to the interception of air, and of the respiratory phenomena. It is a case of suffocation, the signs of which, on dissection, are equivocal, without circumstantial evidence.

**SUBMISSIO**, Remission.—s. *Cordis*, *Systole*.

**SUBMURIAS AMMONIACO-HYDRARGYRICUS**, *Hydrargyrum præcipitatum*.

**SUBORBITAR**, *Infra-orbitar*, *Infra-orbitalis*, *Infra-orbitarius*, (F.) *Sous-orbitaire*. That which is seated beneath the orbital cavity.

The **SUBORBITAR** or **INFRA-ORBITAR CANAL**, (F.) *Canal ou Conduit sous-orbitaire*, is a small canal, which runs obliquely through the substance of the inferior paries of the orbit. It begins, behind, by a simple gutter, and divides, anteriorly, into two branches;—one of which descends into the anterior paries of the Maxillary sinus, whilst the other passes out, in the canine fossa, by an orifice, called *Foramen infra-orbitarium*, (F.) *Trou sous-orbitaire*. The infra-orbitar artery and nerve pass along it.

The **INFRA-ORBITAR ARTERY** proceeds from the internal maxillary, from which it separates near the anterior and superior part of the zygomatic fossa. It enters the infra-orbitar canal, and passes through it, giving branches to the anterior and superior dental canal; issues by the foramen infra-orbitarium, and divides, in the fossa canina, into a number of branches, which lose themselves in the neighbouring parts. The infra-orbitar vein follows the same course.

The **INFRA-ORBITAR** or **SUBORBITAR NERVES** seem to terminate the superior maxillary. They issue from the infra-orbitar canal by the foramen of the same name, and spread out in a radiated manner in the fossa canina, to divide into *superior* or *palpebral filaments*, *inferior* or *labial*, *internal* or *nasal*, and *external* or *buccal*.

**SUBPOPLITEUS**, *Popliteus*, muscle.

**SUBPUBIO FEMORALIS**, *Adductor brevis*—s. *Prostaticus Compressor prostatae*.

**SUBSCAPULARIS**, (F.) *Sous-scapulaire*, from *sub*, 'under,' and *scap'ula*, 'the shoulder-blade,' *Sous-scapulo-trochinien*. That which is beneath the scapula.

**FOSSA SUBSCAPULARIS**. A considerable excavation at the anterior surface or venter of the scapula, in which the subscapularis is seated.

The **SUBSCAPULARIS MUSCLE**, *Inmersus*, *Infra-scapularis*, *Sous-scapulo-trochinien*. (Ch.) *Porte-feuille*, (F.) *Muscle sous-scapulaire*. A muscle, situate in the preceding fossa. It is flat, broad, and triangular; is attached, by its base, to the subscapular fossa, and to the anterior lip of the edge of the spine of the scapula, and is inserted into the lesser tuberosity of the humerus. It carries the arm in rotation inwards. It can, also, depress it, and bring it towards the body.

**SUBSTANTIVE**, *Substantivus*. An epithet applied by Dr. Paris to aliments which are nutritive, in contradistinction to *adjective* aliments, which are themselves not possessed of nutritive virtues, but impart to the digestive organs greater energy, so as to enable them to extract more nutriment from the substantive aliments. Meat for example, is a *substantive* aliment; the condiment, as mustard, eaten with it, an *adjective* aliment.

**SUBSTANTIA SPONGIOSA URETHRÆ**, *Corpus spongiosum urethræ*—s. *Vitrea dentium*, *Enamel of the teeth*.

**SUBSTANTIA OSTOIDEA**, See *Teeth*.

**SUBSTILLUM**, *Stillicidium*.

**SUBSULTIO**, *Palpitation*.

**SUBSULTUS TENDINUM**, *Cionus sub-*

*sultus*, *Subsultus*, *Carphologia spasmodica*, *Myopal'mus*, *Twitching of the Tendons*, (F.) *Soubresaut*. Twitching, communicated to the tendons by the involuntary and instantaneous contraction of the muscular fibres. It is more observable at the wrist than elsewhere; and is an evidence of great cerebral irritability, and debility, when it occurs at an advanced period of fever.

The muscular agitations or twitchings observed in febrile diseases, especially of children, have been termed *Convulsibilitas*, *Seclotyrbē febrilis*, and *Irritabilitas morbo'sa*.

SUBSURDITAS, Deafness.

SUBU'BERES, from *sub*, 'under,' and *ubera*, 'the breasts.' *Infantes sugentes*, *Sucking children*. Infants at the breast, in contradistinction to the *Exuberes*, *απογαλακτοι*, or those which have been weaned.

SUBVOLA, Hypothenar.

SUC GASTRIQUE, Gastric juice—*s. Medullaire*, Marrow.

SUCCA'GO. The inspissated juices of plants—robs, jellies, &c.

SUCCEDANEUM, *Substitutum*, *Antemballon'enos*, *Quid pro quo*. An epithet for medicines, that may be substituted for others possessing similar properties.

SUCCHAR, Saccharum.

SUCCIN, Succinum.

SUCCINI RESINA, Musk, artificial.

SUCCINUM, *Electrum*, *Ambrā*, *Ambram*, *Ampur*, *Bereni'ce*, *Amber*, *Yellow Amber*, (F.) *Succin*, *Ambre jaune*. This substance, which is found on the shores of the Baltic, is composed of a resinous matter, of essential oil, and an acid, *sui generis*. It is inodorous, except when heated or rubbed. It is insipid; in fragments of a pale golden yellow colour; transparent, and has a shining lustre. S. G. 1.08: insoluble in water, and slightly acted on by alcohol. It is used for affording its essential oil—the *Oleum* or *Balsamum Succini*. This oil possesses stimulant, antispasmodic, diuretic, and rubefacient properties, (F.) *Huile de Succin*.

The white amber, *Leucelectrum*, (F.) *Ambre blanc*, is a variety.

The SUCCINIC ACID, *Acidum Succini*, *A. Succinicum*, *Acor succineus*, *Sal Succini*, *Salvolal'ile Succini*, has been considered antispasmodic and diaphoretic, in the dose of from five to twenty grains.

SUCCINUM CINEREUM, Ambergris—*s. Gri-meur*, Ambergris.

SUCCION, Sucking.

SUCCISA, *Scabiosa succisa*.

SUCCOLATA, Chocolate.

SUCCORY, WILD, *Cichorium intybus*.

SUC'CUBUS, from *sub*, and *cub'arē*, 'to lie under.' Some authors have used this word synonymously with Nightmare. Others mean, by it, a female phantom, with which a man, in his sleep sometimes believes he has intercourse;—as *Incubus*, (q. v.) has been applied to the male phantom, with which a female may dream she is similarly situate.

SUCCUS, Juice. The fluid obtained by pressing plants, flesh, &c. It is, also, applied to certain animal fluids, as *S. gastricus*, &c.

SUCCUS ACACIÆ GERMANICÆ IN-SPISSATUS, see *Prunus spinosa*—*s. Acacia*

*nostratis*, see *Prunus spinosa*—*s. Cicuta spissatus*, *Extractum conii*—*s. Cyrenaicus*, *Laserpitium*—*s. Gastricus*, *Gastric juice*—*s. Japonicus*, *Catechu*—*s. Nervous*, *Nervous fluid*—*s. Nutritius*, *Chyle*—*s. Spissatus aconiti napelli*, *Extractum aconiti*—*s. Spissatus atropæ belladonnæ*, *Extractum belladonnæ*—*s. Spissatus conii maculati*, *Extractum cicutæ*—*s. Spissatus hyoscyami nigri*, *Extractum hyoscyami*—*s. Spissatus lactuæ sativæ*, *Extractum lactuæ*.

SUCCUSSIO, *Hippocratic Succussion*, *Succus'sio*. A mode of ascertaining the existence of a fluid in the thorax, by giving the body one or more slight shakes.

SUCCUSSOR, *Ballotement*.

SUCHOR, Saccharum.

SUCKING, *Suctio*, *Suctus*, *Athelx'is*, *Bdal'sis*, *Myd'sis*, (F.) *Succion*. The act of drawing liquid into the mouth, by forming a vacuum with the tongue acting as a piston, during inspiration.

To S U C K L E. *Lactare*, *γαλακτοροειν*, *τηθηγεειν*, (F.) *Allaiter* ou *Alaiter*. To give suck. To nurse.

SUCKLING, Lactation.

SUCRE, Saccharum—*s. Candi*, *Saccharum candidum*—*s. de Saturne*, *Plumbi superacetis*.

SUCTIO, Exsuctio, Sucking.

SUCTION POWER is the force exerted on the blood in the veins, by the active dilatation of the heart. See Derivation.

SUCTUS, Sucking.

SUDAM'INA, *Hydro'a*, or *Hidro'a*, from *sudor*, 'sweat;' *Boa*. Small vesicles, which appear upon the skin, especially in the summer time, and in hot countries, and in diseases attended with much sweating. It is a miliary, (q. v.) eruption.

SUDAMINA, *Desudatio*, *Echauboulores*, *Lichen tropicus*.

SUDARIUM, *Achiculum*, *Vaporarium*.

SUDATIO, *Ephidrosis*.

SUDATORIUM, *Achiculum*, *Vaporarium*.

SUDOR, *Hidros*, (F.) *Sueur*. The product of cutaneous transpiration, when visible on the surface of the body. It is colourless; of an odour more or less strong and variable; and of a saline taste. It is composed, according to Berzelius, of water, lactic acid, lactate of soda united with a little animal matter, muriate of soda, and a little muriate of potassa, an atom of earthy phosphate, and some oxyd of iron.

SUDOR AN'GLICUS, *Hidron'osus*, *Hidropyr'etos*, *Febris sudato'ria*, *Morbus sudatorius*, *Ephem'era maligna*, *E. sudatoria*, *E. Anglica pestilens*, *Sweating Sickness*, (F.) *Suette*, *Sueur Anglaise*. A very severe epidemic disease, characterized by profuse sweating, which appeared in England in 1486; and recurred, at different times, until about the middle of the 16th century. It was accompanied with coldness, excessive prostration of strength, palpitation, frequency and inequality of the pulse, &c., and terminated favourably or unfavourably in the course of 24 hours.

The French have given the name SUETTE DE PICARDIE, *Sudor Picard'icus*, to an epidemic disease, which has appeared several times in that province; the principal symptoms of which were, profuse sweats, and a miliary eruption. The disease recurred in 1821, and has been described, at length, by M. Rayer, who con-

siders it to consist of a simultaneous state of inflammation of various tissues; and proposes to class it with variola, scarlatina, and measles.

**SUDOR CRUENTUS**, *S. sanguineus*, *Hæmatidrosis*, *Ephedrosis cruenta*. Cutaneous perspiration intermixed with blood. A very uncommon affection.

**SUDOR SANGUINEUS**, *S. cruentus*.

**SUDORIFIC**, *Sudorificum*, *Sudoriferum*, *Hidroticum*, from *sudor*, 'sweat,' and *facio*, 'I make.' A medicine which provokes sweating. See Diaphoretic.

The **FOUR SUDORIFIC WOODS**, *Quatuor ligna sudorifica*, were, formerly, *guaiacum*, perfumed cherry, *sarsaparilla*, and *sassafras*.

**SUET**, *Sevum*.

**SUETTE**, *Sudor anglicus*—*s. de Picardie*, *Sudor Picardicus*.

**SUEUR**, *Sudor*—*s. Anglaise*, *Sudor Anglicus*—*s. d'Expression*, *Expression*, sweat of—*s. de Saug*, *Diapedesis*.

**SUFFIMENTUM**, *Hypocapnis'ma*, *Suffimen*, *Thymia'mu*, *Suffit'us*, *Suffaniga'tio*, (F.) *Parfum*. A perfume. A fumigation, (q. v.)

**SUFFITUS**, *Fumigation*, *Suffimentum*.

**SUFFOCATIO**, *Orthopnœa*—*s. Hysterica*, *Hysteria*, *Strangulation*, *uterine*—*s. Stridula*, *Cynanche trachealis*—*s. Uterina*, *Strangulation*, *uterine*.

**SUFFOCATION**, *Suffocatio*, *Præfocatio*, *Apopn'is*, *Asphyzio*, (q. v.) Death, or suspended animation from impeded respiration, whether caused by the *inhalation of noxious gases*, *drowning*, *hanging*, *strangling*, or *smothering*. The principal morbid appearances in such cases are:—the lungs of a deep-blue colour, with the blood extravasated in the air-cells; right auricle and ventricle filled with dark blood, as well as the neighbouring veins; lividity of the countenance, turgescence, and, perhaps, rupture of the vessels of the brain.

*Treatment of suspended animation by suffocation in general.* The patient must be conveyed into a room not too warm; and, if practicable, be immersed in a warm bath. Blood-letting must be used, if at all, with caution:—friction must be employed with salt or warm flannels:—stimulating fluids, in a dilute state, be poured into the stomach by means of a tube, and attempts be made to inflate the lungs. Laryngotomy, if necessary.

**SUFFOCATION**, *Pnigophobiu*, (F.) *Étouffement*, is used for threatened suffocation, as *strangling* is. It means the state of dyspœa and oppression experienced when a sufficient quantity of air does not enter the lungs, or when the chemical phenomena of respiration are imperfectly executed;—as in cases of asthma.

**SUFFUMIGATION**, *Suffimentum*.

**SUFFUSIO**, *Pseudoblepsia*—*s. Auriginosa*, *Icterus*—*s. Multiplicans*, see *Diplopia*—*s. Oculi*, *Cataract*—*s. Oculorum*, *Metamorphopsia*.

**SUGAR**, *Saccharum*—*s. Barley*, *Penidiuum*—*s. Candy*, *Saccharum candidum*—*s. Cane*, see *Saccharum*—*s. of Lead*, *Plumbi superacetat*.

**SUGARS**, *VARIOUS*, see *Saccharum*.

**SUGILLATION**. A *bruise*. By most authors used synonymously with *Echymosis* and *Echymoma*, (q. v.) It is, also, applied to the spots or *echymoses* which occur in consequence of intrinsic causes,—in disease and in

incipient putrefaction. It is common in dead bodies. To this last case it is, indeed, restricted by some medico-legal writers:—An interesting question sometimes arises:—Whether the appearance has been induced before death or afterwards? Whether it is a case of *echymosis* or of *sugillation*? In the former, the extravasated blood will usually be coagulated; not so in the latter. It is often, however, difficult to form a correct judgment without reference to the history of the case.

**SUICIDE**, *Suicidium*; from *sui cædes*, 'murder of one's self.' The act of killing one's self. *Autoch'ria*, *Melancho'lia Suicid'ium*, *Autocton'ia*, *Idiocton'ia*. Suicide is, very frequently, the result of disease of the mind; the individual seeming, at times, to be irresistibly impelled to self-destruction.

**SUIE**, *Fuligo*.

**SUIF**, *Sevum*.

**SUITES DE COUCHES**, *Lochia*.

**SULCATUS**, *Cannelé*, *Grooved*.

**SULCUS**. A furrow. (F.) *Sillon*. Anatomists have given this name to grooves on the surface of bones and other organs.

French writers on anatomy often use the term *Sillons* for the grooves which lodge the arteries and creep on the surface of bones; whilst those that receive veins are called *gouttières*, 'gutters.'

**SULCUS**, *Groove*—*s. Antero-posterior jecoris*, see *Liver*—*s. Transversalis*, see *Liver*—*s. Umbilicalis*, see *Liver*.

**SULFATE D'AMMONIAQUE**, *Ammoniacæ sulphas*.

**SULFURE DE CARBON**, *Carbonis sulphuretum*.

**SULPHAS AMMONIACÆ CUPRATUS**, *Cuprum ammoniatum*—*s. Cadmicus*, *Cadmii Sulphas*—*s. Kalico-aluminicum*, *Alumen*—*s. Natrius*, *Soda*, *sulphate of*—*s. Zincicum*, *Zinci sulphas*.

**SULPHUR**, *Sulfur*, *Scorith*, *Thci'on*, *Th'ion*, *Avcrich*, *Terru solid'a*, *Fumus cit'rinus*, *Aquila*, *Brimstone*, (F.) *Soufre*. The Native Sulphur is called *Rock Sulphur*, *Sulphur vivum*, &c. Sulphur, as we meet with it, is in rolls, *Sulphur in rot'ulis*, *S. rotundum*, *Roll Brimstone*. It is a volcanic production, and is obtained, in large quantities, from Solfatara in Italy. *Roll Sulphur* is impure sulphur, melted, and run into moulds. It is unpleasantly odorous, when heated or rubbed; insipid; solid, and brittle. S. G. 1.99. Fusible at 226°; volatilizable by heat, and condensing unchanged.

The **SULPHUR SUBLIMATUM**, *Sublimed Sulphur* or *Flores of Sulphur*, (F.) *Soufre subliné*, *Flores de Soufre*, is the sulphur of commerce, sublimed in close vessels.

The **SULPHUR LOTUM**, *Sulphur sublimatum lotum*, *Washed Sulphur*, *Magist'rium Sulphuris*, *Sulphuris Flores loti*, is prepared by pouring boiling water on sublimed sulphur, so as to wash away any acid it may contain, and then drying it.

The **SULPHUR PRÆCIPITATUM**, *Lac Sulphuris*, *Milk of Sulphur*, *Præcipitated Sulphur*, (F.) *Crème de Soufre*, is prepared by boiling sublimed sulphur and lime together, and adding muriatic acid to precipitate the sulphur.

Sulphur is possessed of stimulant, laxative,

and diaphoretic properties. As a laxative, it is used in hemorrhoidal and other affections. In the itch, applied externally and taken internally, it may be considered as a specific(?); and it is a valuable remedy in most cutaneous affections that are local. Dose, ℥ss to ʒij.

The fæces or dregs, left in the purification or sublimation of sulphur, are called *Horse Brimstone*, *Dregs of Sulphur vicum*, *Sulphur caballinum*, *S. vicum*, *Sulphuris vivi recremen'ta*. They are very impure, and are used only externally.

**SULPHUR ANTIMONIATUM**, *Antimonii sulphuretum precipitatum*—s. Carburet of, Carbonis sulphuretum—s. Iodatum, see Iodine—s. Iodide of, see Iodine—s. Liver of, Potassæ sulphuretum—s. Vegetable, *Lycopodium*—s. Wort, *Peucedanum*.

**SULPHURETUM AMMONIACÆ**, *Ammoniacæ sulphuretum*—s. *Ammoniacæ hydrogenatum*, *Liquor fumans Boylii*—s. *Kalicum*, *Potassæ sulphuretum*—s. *Lixivæ*, *Potassæ sulphuretum*.

**SULPHURIC ACID**, *Ac'idum Sulphuricum* vel *Sulphuricum*, *Oleum Vitrioli*, *Spir'itus Vitrioli*, *S. V. fortis*, *Acidum vitriolicum*, *Oil of Vitriol*, *Vitriolic Acid*, *Acidum Vitrioli dephlogistica'tum*, *Acor Sulphuris*. Sulphuric acid is odorless; has a strong acid taste, and is corrosive. S. G. 1.850. It is escharotic, stimulant, rubefacient. Mixed with lard, it is sometimes used in local pains, and certain cutaneous affections.

The **ACIDUM SULPHURICUM DILUTUM**, *Dilute Sulphuric Acid*, *Acidum vitriolicum dilutum*, *Elixir of Vitriol*, *Elixir vitrioli*, *Spir'itus vitrioli acidus Vogleri*, (F.) *Acide sulfurique délayé*, is formed, according to the London Pharmacopœia, by adding *aq. destillat.* ʒiixss to *acid. sulph.* ʒiiss. It is tonic, astringent, and refrigerant. Dose, gtt. x to xx, largely diluted. When used as a gargle, half a drachm may be added to ʒvj of water.

The **ACIDUM SULPHURICUM AROMATICUM**, *A. vitriolicum aromaticum*, *A. vitrioli cum alcohol'e aromaticum*, *Elixir vitrioli*, *E. V. aromaticum*, *E. vitrioli Mynsichtii*, *E. vitrioli Edinburgen'sium*, *E. vitrioli cum tinctu'ra aromaticâ*, *E. vitrioli dulcè seu acido-aromaticum*, *Alcohol cum aromati'bus sulphuricatis*, *Tinctu'ra acidi sulphurici*, is formed of rectified spirit ℔ij, sulphuric acid ʒxxvj, cinnamon ʒiiss, ginger ʒj. Dose, gtt. x to xxx. Ph. L.

**SULPHUROUS ACID**, *Acidum sulphurosum*, *A. sulphuris volat'ile*, *A. Sulphurosum* vel *Sulphurosum*, *Spir'itus sulphuris*, *Spiritus sulphuro'sus volat'ilis*, *Sp. sulphuris per camp'dnam*, *Sp. vitrioli phlogistica'tus*, *Gas sulphuris*, (F.) *Acide Sulfureux*, *Air Acide Vitriolique*. Obtained by treating mercury with concentrated sulphuric acid, or by burning sulphur. It is sometimes used in the gaseous, at others, in the liquid state. Sulphurous acid gas is used to disinfect cloths, confined air, letters coming from infected places, &c. It is also exhibited, with great success, in the form of fumigation, in the treatment of certain chronic cutaneous affections, and of sciatic and rheumatic pains, in general. If respired pure, it acts in the manner of violent irritants; and is not long in producing death.

**SULTZMALT**, **MINERAL WATERS OF**. S. is a village in the department of the Upper Rhine; where are several sources of cold, acidulous waters, which seem to contain carbonic acid, subcarbonate of soda, subcarbonate of lime, sulphate of lime, and a little bitumen. They are refrigerant, aperient, and alterative.

**SUMAC DES CORROYEURS**, *Rhus coriaria*—s. *Vénéneux*, *Rhus toxicodendron*.

**SUMACH**, *Rhus coriaria*.

**SUMEN**, *Hypogastrium*.

**SUMMER DISEASES**, see Estival—s. Rash, *Lichen tropicus*.

**SUNBURN**, *Ephelides*—s. Dew, *Drosera Rotundifolia*—s. Pain, see *Hemicrania*—s. Sun-rash, *Lichen*—s. Stroke, *Coup de soleil*.

**SUNSTROKE**, **EGYPTIAN**, *Coup de soleil*.

**SUPER**. A common Latin prefix; in composition, signifying 'above.'

**SUPERBUS**, *Rectus superior oculi*.

**SUPERCILIARIS**, *Corrugator supercilii*.

**SUPERCILIARY**, *Supercilia'ris*. That which relates to the supercilia or eyebrows. (F.) *Sourcilier* ou *Surcilier*.

The **SUPERCILIARY ARCHES** or **RIDGES**, (F.) *Arcades sourcilières*, are two, slightly projecting, apophyses, situate at the anterior surface of the os frontis, above the superior margin of the orbits. They are separated by the nasal *bosse*, and covered by the superciliaris muscle, to which they give attachment.

**SUPERCILIUM**, *Ophrys*, *Vallum*, (F.) *Sourcil*. The eyebrows are two arched eminences,

—convex above, and more or less prominent, according to the individual,—which lie on the superciliary arch of the os frontis, above the eyelids, and extend from the sides of the root of the nose to the temple. Their inner extremity or *head* is more prominent than the outer or *tail*. The eyebrows are covered with short and stiff hairs, which are directed, obliquely, from within outwards, and are, commonly, of the colour of the hair.

The skin in which these hairs are implanted, rests on the *orbicularis palpebrarum*, *frontalis*, and *superciliaris* muscles, which move the eyebrows in different directions.

The eyebrows serve as an ornament to the countenance; and by covering the eye, defend it from the impression of too strong a light. They direct the perspiration, also, from the eye.

**SUPERCILIUM ACETAB'ULI**. The edge of the cotyloid cavity of the os innominatum.

**SUPEREVACUATIO**, *Hypercrisis*.

**SUPERFECUNDATIO**, *Superfetatio*.

**SUPERFETATION**, *Superfetatio*, *Epicyc'sis*, *Superimpregnatio*, *Epic'non*, *Superfecundatio*, *Epicyc'na*, from *superfate're*, 'to conceive again.' Conception of a fetus in a uterus which already contains one. The impregnation of a female already pregnant. The possibility of this has been denied, but there is abundant evidence to show, that it is possible at a very early period of pregnancy.

**SUPERGEMINALIS**, *Epididymis*.

**SUPERGENUALIS**, *Patella*.

**SUPERHUMERALE**, *Eponis*.

**SUPERIMPRÆGNATIO**, *Superfetatio*.

**SUPERIOR AURIS**, *Attollens aurem*.

**SUPERIOR ROTUNDUS CLITORIDIS**, *Ischio-ca-veinosis*.

SUPERLABIA, Clitoris.

SUPEROXALAS KALICUM, Potass, oxalate of.

SUPERPURGATIO, Hypercatharsis.

SUPERSCAPULARIS, Supraspinatus—s. Inferior, Infra spinatus.

SUPINATEUR COURT ou PETIT, Supinator radii brevis—s. *Grand ou long*, Supinator radii longus.

SUPINATION, *Supinatio*, from *supinus*, 'lying on the back.' The movement in which the forearm and hand are carried outwards, so that the anterior surface of the latter becomes superior.

In Pathology, *Supination*, *Supinatio*, *Hypotiasma*, *Hypotiasmus*, means the horizontal position on the back, with the head thrown back, and the legs and arms extended. It is often a sign of great weakness in disease.

SUPINATOR. Same etymon. That which produces supination. A name given to two muscles of the forearm.

SUPINATOR BREVIS seu MINOR, Supinator radii brevis—s. *Longus seu major*, S. radii longus.

The SUPINATOR RADII LONGUS, *S. longus* sive *major*, *Bra'chio-radialis*, *Huméro-sus-radialis*, (Ch.) (F.) *Long* ou *grand supinateur*, is seated at the anterior and outer part of the forearm. It arises from the inferior part of the outer edge of the os humeri, and from the external intermuscular aponeurosis; and is inserted, by a long tendon, into the outer edge of the radius, near the base of the styloid process. It causes the supination of the forearm, which it can likewise bend on the arm.

SUPINATOR RADII BREVIS, *S. brevis* seu *minor*, *Epicandyloradialis*, (Ch.) (F.) *Supinateur court* ou *petit supinateur*. A muscle, seated at the outer and back part of the forearm. It is flattened, triangular, and curved upon itself, in such a manner, that it embraces the superior extremity of the radius. It is attached, on the one hand, to the external tuberosity of the humerus, and to a small portion of the posterior surface of the ulna, and is inserted into the upper third of the outer and upper surfaces of the radius. It produces, by contracting, the motion of supination.

SUPPOSITION DE PART, Pregnancy, pretended.

SUPPOSITORIUM UTERINUM, Pessary.

SUPPOSITORY, *Suppositorium*, *Hypotheton*, from *supponere*, 'to put under.' Any solid medicine, in the form of a long cone or cylinder, intended to be introduced into the rectum;—either for the purpose of favouring intestinal evacuations, or to act as an anodyne. Purgative suppositories are made of soap, aloes, or any other irritating substance.

SUPPRESSIO LOTII, Ischuria.

SUPPRESSION DE PART. See Parturition.

SUPPURANS, Suppurative.

SUPPURATION, *Epye'ma*, *Parulenta*, *Pyo'sis*, *Pye'sis*, *Diapye'ma*, *Diapye'sis* (F.) *Aboutissement*. Formation or secretion of pus, (q. v., and also *Pyogonia*.) It is a frequent termination of inflammation, and may occur in almost all the tissues. This termination is announced by slight chills; by remission of the

pain, which, from being lancinating, becomes heavy; by a sense of weight in the part, and, when the collection of pus can be easily felt, by fluctuation. When pus is thus formed in the cellular membrane, and is collected in one or more cavities, it constitutes an *abscess*. If it be formed from a surface exposed to the air, it is an *ulcer*; and such ulcers we are in the habit of establishing artificially in certain cases of disease.

SUPPURATIVE, *Suppurans*, *Suppurativus*, *Diapye'ticus*, *Epye'ticus*, *Epye'siontus*. That which facilitates suppuration. Suppuratives are, generally, vesicants mixed with lard.

SUPRA. A common Latin prefix: in composition, signifying 'above.'

SUPRA-COSTALES, *Levatores Costarum*, (F.) *Sur-costaux*. A name given to twelve small, fleshy fasciculi, which are flattened, triangular, and with radiating fibres. They pass from the transverse processes of the dorsal vertebræ to the superior margin of the rib beneath. Spigelius, Cowper, Boyer, Chaussier, and others consider them to form part of the intercostales externi.

SUPRA-ORBITAR, *Supra-orbitalis*, *Supra-orbitarius*. That which is situate above the orbit.

The FORAMEN SUPRA-ORBITARIUM, *F. orbitarium superius*, (F.) *Trou sus-orbitaire* ou *orbitaire superieur*, is a foramen or notch completed by a ligament at the inner third of the orbital arch. It gives passage to the *supra-orbital* or *superciliary artery*, a branch of the ophthalmic, which ascends the forehead, and is distributed thereto.

SUPRA-PUBIAN, *Supra-pubic*, *Supra-pubiana*. That which is situate above the pubis.

The SUPRA-PUBIAN NERVE, (F.) *Nerf suspubien*, is the internal ramus of the inguino-cutaneous branch of the first lumbar nerve. It is the *genito-crural* branch of Bichat. It descends almost vertically before the psoas muscle; and, near the crural arch, divides into two branches. One of these accompanies the spermatic cord, and is distributed to the cremaster, scrotum, and integuments on the inner part of the thigh. The other issues from the pelvis with the femoral filaments; traverses the aponeurosis of the thigh; and is distributed to the integuments of the upper and anterior part of the limb.

SUPRA-SCAPULARIS, Supra-spinatus.

SUPRA-SEMIORBICULARIS, Orbicularis oris.

SUPRA-SPINATUS, *Supra-spinosus*, (F.) *Sur-épineux*, *Sus-épineux*. That which is seated above the spine.

The FOSSA SUPRA-SPINATA, (F.) *Fosse Sus-épineuse*, is a triangular depression above the spine of the scapula.

The SUPRA-SPINATUS MUSCLE, *Super-scapularis*, *Sus-spinoscapulo-trochiterien*, *Supra-scapularis*, *Petit sus-scapulo-trochiterien*, (Ch.) is situate in the fossa supra-spinata. It is elongated, thick, and triangular, and is attached, on the one hand, to the two inner thirds of the fossa supra-spinata; and terminates, on the other, at the anterior part of the great tuberosity of the humerus. This muscle raises the arm.

The LIGAMENTA SUPRA-SPINOSA, *Supra-spi-*

*nul ligaments*, are two in number. 1. The *Dorso-lumbar-supra-spinal ligament*, (F.) *Ligament sur-épineux dorso-lombaire*, extending above the spinous processes of the dorsal and lumbar vertebrae, from the 7th cervical as far as the median crista of the sacrum. 2. *Cervical supra-spinal ligament*, (F.) *Ligament sur-épineux cervical*, which extends above all the cervical spinous processes, and is attached, above, to the outer occipital protuberance.

**SURA**. The *calf of the leg*, (F.) *Mollet, Gras de Jambe*. The projection, formed at the posterior part of the leg by the gastrocnemii muscles: the fibula, (q. v.)

**SURCILIER**, *Corrugator supercilii*, Superciliary.

**SURCOSTAUX**, Supracostalis.

**SURDENT**, (F.) *supra*, 'above,' and *dens*, 'a tooth.' When a milk tooth does not fall out at the period of the second dentition, but is merely forced to one side by the new tooth, it is called a *surdent*.

**SURDITAS**, Cophosis, Deafness.

**SURDITÉ**, Cophosis, Deafness.

**SUREAU COMMUN**, Sambucus.

**SURELLE**, Oxalis acetosella.

**SURÉPINEUX**, Supraspinatus.

**SURFET**, Colica crapulosa.

**SURGEON**, *Chirur'geon*; old French, *Sur-gien, Chiro'nax, Chirur'gus, Vul'nerum medicus, Chiraid'ter, Chiraid'ter*, (F.) *Chirur'gien*, from χειρ, 'the hand,' and εργον, 'work.' One who practises surgery. The surgeon, says Celsus, ought to be young, or, at all events, not advanced in life. His hand must be steady, expert, and never tremulous: he must use the right or left with equal facility: his sight must be clear and penetrating: his mind intrepid; and although unmoved when he proceeds to operate, he must not be in haste, or cut less than is necessary, but finish his operation, as if the cries of the patient made no impression upon him.

**SURGEON-APOTHECARY**. One who unites the practice of surgery with that of the apothecary. A *general practitioner*.

**SURGEON-DENTIST**, Dentist.

**SURGERY**, *Chirur'gia, Chiriatria, Cheirix'is, Metacheirix'is, Medici'na operati'va, Medici'na eff'icax*, (F.) *Chirurgie*. The part of the healing art which relates to external diseases; their treatment; and, especially, to the manual operations adapted for their cure.

**SURGERY**, ANAPLASTIC, Morioplastice—s. Autoplastic, Morioplastice—s. Dental, Dentistry.

**OPERATIVE SURGERY** is termed *Acur'gia*, and *Acidur'gia*.

**MILITARY SURGERY**, (F.) *Chirurgie militaire*, is that which relates to the operations to be performed on the field of battle, or subsequently;—with the attention to be paid to the wound-ed, &c.

**SURGICAL**, *Chirur'gieus*, (F.) *Chirurgical, Chirurgique*. That which relates to surgery; as *surgical anatomy, surgical operations, surgical instruments*, &c.

**SURGIEN**, Surgeon.

**SURINAMINE**. See Geoffræa Surinamensis.

**SUROXYGENESES**. A name given by Baumes to diseases attributed by that physician to superabundance of oxygen.

**SURPEAU**, Epidermis.

**SURRECTA ALBA**, Ranunculus flammula.

**SURSELS**. See Salt.

**SURTOUTS LIGAMENTEUX DE LA COLONNE VERTÉBRALE**, Vertebral ligaments.

**SURVIE**, Survivorship.

**SURVIVORSHIP**, from *surviv'ere*, (F.) *Survivre*, 'to live longer,' (F.) *Survie*. In *legal medicine*, this word means the probability that any individual has survived others in an accident, which has been fatal to all. This is often an important question, connected with the inheritance of property, and on which physiology can rarely afford more than presumptive grounds for conclusion.

**SUS-ACROMIO-HUMÉRAL**, Deltoid—s. *Epinéux*, Supraspinatus—s. *Maxillo-labial*, Levator anguli oris—s. *Maxillo-labial, grand*, Levator labii superioris alæque nasi—s. *Maxillo-labial, moyen*, Levator labii superioris proprius—s. *Maxillo-nasal*, Compressor naris—s. *Optico-sphéno-scléroticien*, Rectus superior oculi—s. *Phalangien du pouce*, Abductor pollicis brevis s. *Pubio-fémoral*, Pectinalis—s. *Scapulo-trochitérien, le plus petit*, Teres minor—s. *Scapulo-trochitérien, petit*, Supraspinatus—s. *Spino-scapulo-trochitérien*, Supraspinatus.

**SUSCEPTIBILITY**. Sensibility, in its most enlarged acceptation. Impressibility. This term, with the epithet *nervous*, is sometimes used for that increase in the moral sensibility which is particularly observed in nervous affections.

**SUSPENDICULUM**, Cremaster.

**SUSPENSOIRE**, Suspensory.

**SUSPENSORIUM TESTIS**, Cremaster.

**SUSPEN'SORY**, *Suspens'o'rius*, from *suspender'e*, 'to hang under,' (F.) *Suspensoire*. That which sustains or suspends.

The **SUSPENSORY LIGAMENT OF THE LIVER** is a triangular duplicature of the peritoneum, between the inferior surface of the diaphragm and the upper surface of the liver, which is continuous with the great falcx of the umbilical vein.

The **SUSPENSORY LIGAMENT OF THE PENIS** is a fibro-cellular fascia, of a triangular shape, which extends from the anterior part of the symphysis pubis to the corpus cavernosum, which it sustains. A similar ligament belongs to the clitoris.

The **SUSPENSORY BANDAGE**, *Suspens'o'rium*, is a bandage, intended to support the scrotum, in cases of disease of the testicles or of scrotal hernia. It consists of a kind of bag, fixed above to a cincture, and retained below by strings, passing between the thighs, and fixed to the cincture behind.

**SUSPENSUM**, Enæorema.

**SUSPIRIUM**, *Mygmus, Mych'mus, Myelthis'mus, Stenag'mus, Stenar'is*. A *sigh*, (F.) *Soupir*. A slow, voluntary contraction of the diaphragm and intercostal muscles; the effect of which is, to restore the due relation between the circulation and respiration, or to free ourselves from an inconvenient sense of weight felt in the chest, when we are much depressed—a weight, which appears to be chiefly dependent on the functions of the heart being disturbed through the moral influence. The sigh differs from the

*sob*:—the latter being involuntary and spasmodic.

Sighing, occurring in fevers to a great extent, indicates considerable depression. When accompanied with a vocal sound, it constitutes a *groan*.

SUSURRUS, *Bourdonnement*, Tinnitus aurium.

SUTELA, Suture.

SUTORIUS, Sartorius.

SUTTER, Saccharum.

SUTURA ABDOMINALIS, Gastroraphy—s. Arcualis, Coronal suture—s. Clavata, Suture quilled—s. Fronto-parietalis, Coronal suture—s. Jugalis, Sagittal suture—s. Lambdoidalis, Lambdoid suture—s. Lepidoides, Squamous suture—s. Mendosa, Squamous suture—s. Obelæa, Sagittal suture—s. Proræ, Lambdoid suture—s. Punctata, Suture common—s. Puppis, Coronal suture—s. Rhabdoides, Sagittal suture—s. Virgata, Sagittal suture.

SUTURE, *Sut'ra*, *Sutela*, *Armæ*, *Rhaphæ*, from *suo*, 'I stitch.' *Dovetail joint*, (F.) *Engrenure*. A kind of immovable articulation, in which the bones unite by means of serrated edges, which are, as it were, *dovetailed* into each other. The articulations of the greater part of the bones of the skull are of this kind. The coronal, lambdoidal, and sagittal sutures are called *true sutures*; the two temporal are called *false sutures*.

SUTURE, in *Surgery*, *Rhaphæ*, means an operation which consists in stitching the lips of a wound to procure their union. The suture was, at one time, largely employed; but, in modern times, its use has been wisely restricted. There are few wounds in which the edges may not be brought together by adhesive plaster appropriately applied. This kind of union, by adhesive plaster simply, has been absurdly termed *Sutura sicca* or *dry suture*, in opposition to the *Sutura cruenta* or suture, properly so called.

The suture is generally performed with waxed thread and straight or curved needles, according to the arrangement of parts.

The chief sutures are the *interrupted suture*, the *quilled suture*, the *glover's suture*, and the *twisted suture*.

1. The INTERRUPTED SUTURE, (F.) *Suture à points séparés*, *Suture entrecoupée*, is performed by passing a needle, armed with a ligature, through the lips of the wound, previously brought into contact, and then tying the extremities of the thread. The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used.

2. The QUIILLED SUTURE, *Sutura clavata*, (F.) *Suture enchevillée* or *emplumée* or *empennée*, *Compound Suture*, is merely the interrupted suture, with this difference, that the ligatures are not tied over the face of the wound, but over two quills or rolls of plaster, or bougies, which are laid along the sides of the wound. It is used by some surgeons, on account of there being less danger of the stitches tearing out. It is not much employed.

3. The GLOVER'S SUTURE, *Continued Suture*, *Uninterrupted Suture*, (F.) *Suture de Pelletier*, *Suture en surget*, is executed by introducing

the needle first into one lip of the wound from within outwards, then into the other in the same way; and, in this manner, sewing up the whole extent of the wound. It has been chiefly used in wounds of the intestinal canal. It is now rarely employed except for stitching up dead bodies. The common stitch or suture, *Sutura punctata*, (F.) *Suture à points passés*, has been used in similar cases.

4. The ROYAL STITCH or SUTURE is the name of an old operation for the cure of Bubonoele. It consisted in putting a ligature under the hernial sac, close to the abdominal ring, and then tying that part of the sac, so as to render it impervious, by the adhesive inflammation thus excited.

5. The TWISTED SUTURE, (F.) *Suture entortillée*, is employed, chiefly, to unite wounds of the cheeks and of the free edge of the lips. To perform it, a pin or needle is passed through the edges of the wound, so as to keep them accurately in contact. A piece of thread is then wound accurately round the pin, from one side of the division to the other, in the form of the figure *cc*. The number of pins and sutures must, of course, correspond with the extent of the wound. This is the suture used in cases of harelip, (q. v.)

6. The SUTURE À ANSE OF Le Dran has only been employed in cases of wounds of the intestines. For this purpose, the edges of the wound are brought together, and as many needles, with unwaxed threads, used as there are to be stitches. Each stitch is then made by passing a needle through the edges; and all the ligatures which belong to one side of the wound, are tied together, and twisted so as to form a thread, which is fixed externally.

SUTURE À POINTS PASSÉS, Suture, common—s. Compound, Suture, quilled—s. Continued, S. Glover's—s. *Écaillée*, Squamous suture—s. *Empennée*, Suture, quilled—s. *Emplumée*, Suture, quilled—s. *Enchevillée*, Suture, quilled—s. *Entortillée*, Suture, twisted—s. *Entrecoupée*, Suture, interrupted—s. False, Harmony—s. *Océipitale*, Lambdoid suture—s. Occipito-parietal, Lambdoid suture—s. *de Pelletier*, Suture, Glover's—s. *à Points séparés*, Suture, interrupted—s. *Squamuse*, Squamous suture—s. *en Surget*, Suture, Glover's—s. Superficial, Harmony—s. Uninterrupted, see Glover's.

SWADDLING CLOTHES, Swathing clothes.

SWALLOW, *Hirundo*—s. Wort, *Asclepias vincetoxicum*.

SWATHING OR SWADDLING CLOTHES, *Ineuabula*, *Fasciæ*, *Panni*, from Sax. *ƿeþan*, 'to bind,' (F.) *Maillet*. The kind of clothing or bandaging formerly applied to children during the first year of life. It is now, properly, laid aside, and every freedom allowed to muscular exertion.

SWEAT SCAB, *Crusta genu equina*.

SWEATING OF BLOOD, see *Diapedesis*—s. *Sickness*, *Sudor Anglicus*.

SWEETFLAG, *Acorus calamus*.

SWEETPOD, *Ceratium siliqua*.

SWELLING, *Exad'esis*, *Presis*, *Extumescutio*, *Tumor*, *Tumefactio*, (F.) *Enflure*, *Gonflement*. Morbid increase of bulk in the whole, or a part, of the body. See *Tumour*.

SWELLING, WHITE, Hydrarthrus, Spina ven-tosa.

SWERTIA CHIRAYITA, Gentiana chirayita.

SWIETE'NIA FEBRIFUGA, *Fel'rifuge Swiete'nia*, (F.) *Mahogon febrifuge*. Family, Meliaceæ. Sex. Syst. Decandria Monogynia. The bark of this tree, which is a native of the East Indies, and called there *Rohena Bark*, has an aromatic odour and bitter taste. It is tonic and stomachic, and has been used in intermittents, and in diseases where bitter tonics are indicated. Dose, ℞j to ℞ij of the powder.

SWIMMING, Natation—s. of the Head, Vertigo.

SWOON, Syncope.

SYCAMINOS, Morus nigra.

SYCAMINUM. See Morus nigra.

SYCE, Ficus carica.

SYCEPI'ALUS, from *συρ*, 'with,' and *κεφαλη*, 'head.' A monster having two heads united together.

SYCION, *συκιον*, from *συζον*, 'a fig.' A decoction of dried figs.

SYCITES, *συκιτης*. Wine, in which dried figs have been infused.

SYCITES, Catorchites.

SYCOMA, Ficus.

SYCO'SIS, *συζωσις*. Same etymon. A tumour of the shape of a fig. Also, a fungous ulcer. An excrescence about the eyelids.

Dr. Bateman defines it:—an eruption of inflamed but not very hard tubercles, occurring on the bearded portion of the face and on the scalp, in adults; and usually clustering together in irregular patches;—*Phyma Syeosis*. Of this he has given two species: 1. The *Sycosis Mentis*, *S. barbæ*, *Montagra*, *Chinchelk*, (F.) *Dartre pustulæuse mentagra*: and 2. The *Sycosis Capilli*, *S. Capilli'tu*. The treatment, in both cases, resembles that for Porrigo favosa.

Sycosis, Ficus.

SYDERATIO, Sideratio.

SYM, SYN, *συρ*, 'with, together,' like the *cum*, *col*, *con*, *cor*, &c., of the Latins. A common prefix. Before *b*, *p*, *ph*, *ps*, and *m*,—*syn*, or *yn* is changed into *sym* or *syn*, (com;) before *c*, *ch*, *g*, *k*, and *x*, into *syn* or *yn*, *συγ*, *ξυγ*, (con;) before *l* into *syl* or *yl*, (col;) before *r* into *syrr* or *yrr*, (cor;) and before *s* into *sy* or *yl*, *συ*, (co and eos.)

SYMBLEPHARON, Ankyloblepharon.

SYMBLEPHARO'SIS, from *συρ*, 'with,' and *βλεφαρον*, 'an eyelid.' A preternatural adhesion between the eyelids; and especially between the upper eyelid and globe of the eye.

SYMBLEPHAROSIS, Ankyloblepharon.

SYMBOLE, Commissure.

SYMBOLEUSIS, Consultation.

SYMBOLISMUS, Sympathy.

SYMBOLIZATIO, Sympathy.

SYMBOLOGICA, Symptomatology.

SYMELES; from *συρ*, 'with,' and *μελος*, an extremity, a genus of monsters whose extremities are joined together. I. G. St. Hilaire.

SYMMET'RICAL, *Symmet'ricus*. An epithet given to those parts of the body, which, if seated on the median line, may be divided into two equal, and perfectly like halves; or which, if situate—the one to the right, the other to the left of this line—have a similar

conformation, and a perfectly analogous arrangement.

SYMMETRY, from *συρ*, 'with,' and *μετρον*, 'measure.' The regularity in form, observed in many parts, situate on the median line; and, also, the resemblance which exists between many organs that are situate on each side the median line. Bichat first noticed that this symmetry was confined to the organs of animal life; as the head, brain, spine, organs of sense, of locomotion, &c.

SYMPARATERESIS, Observation.

SYMPASMA, Catapasma.

SYMPATHETIC, *Sympath'icus*, *Sympatheticus*, (F.) *Sympathique*, from *συρ*, 'with,' and *παθος*, 'suffering.' That which depends on sympathy.

SYMPATHETIC AFFECTIONS of an organ are those morbid phenomena that supervene, without any morbid cause acting directly on it, and by the reaction of another organ primarily affected. Thus, itching of the nose is a *sympathetic affection*, produced by irritation in the intestinal canal.

The epithet is, also, given to different nerves. See Trisplanchnic, Pneumogastric, and Facial.

The SYMPATHETIC POWDER, *Pulvis sympath'icus* of Sir Kenelm Digby, was composed of calcined sulphate of iron, prepared in a particular manner. It was long supposed to be able to cure a wound, if applied to the weapon that inflicted it; or, even to a portion of the bloody clothes. It is proper to remark, however, that the wound itself was carefully excluded from the air, and from all irritation.

SYMPATHETIC, GREAT, Trisplanchnic nerve—s. Middle, Pneumogastric.

SYMPATHETICUS MINOR, Facial nerve.

SYMPATHETISMUS, Sympathy.

SYMPATHIA, Consent of parts.

SYMPATHICUS, Sympathetic.

SYMPATHIQUE, Sympathetic.

SYMPATHY, *Sympathi'a*, *Compassio*, *Consensus*, *Sympathetis'mus*, *Conflux'io*, *Conspira'tio*, *Commerc'ium*, *Consort'ium*, *Homoiopathia*, *Homoethnia*, *Adelphi'cis*, *Symbolis'mus*, *Symboliz'io*, from *συρ*, 'with,' and *παθος*, 'suffering.' The connexion that exists between the action of two or more organs, more or less distant from each other; so that the affection of the first is transmitted, secondarily, to the others, or to one of the others, by means unknown to us. A knowledge of the particular sympathies between different organs throws light on the etiology of diseases, their seat, and the particular organ towards which our therapeutical means should be directed. See Irritation.

SYMPEXIS, Concretion.

SYMPHITUM MINUS, Prunella.

SYMPHOREMA, Congestion.

SYMPHYSEOT'OMY, *Symphysot'omy*, *Synchoudrot'omy*, *Symphysot'omia*, from *συμφυσις*, and *τεμνω*, 'I cut.' The operation or section of the *Symphysis*. This operation is performed with the view of augmenting the diameter of the pelvis, in order to facilitate delivery in certain cases of faulty conformation of that cavity, with wedging of the head of the child therein. To perform the operation, the female is placed on her back; the pubes is shaved; and, with a strong scalpel, the soft parts are divided on the

median line. The articulation is then cut. As soon as the fibrous parts, which hold the bones together, are divided, they separate to a certain distance from each other; and the delivery may be accomplished. The knife, with which the operation is performed, is called, by the French, *Couteau symphysien*.

**SYMPHYZIA**, from *συμφυσις*, 'a growing together.' A malformation consisting in the union of parts that are usually divided.—Bieschet.

**SYMPHYYSIS**, from *συν*, 'with,' and *φυσω*, 'I grow;' or from *συμφυσις*, 'I unite together.' A union of bones. The bond of such union. The aggregate of means used for retaining bones *in situ* in the articulations.

The name symphysis has, however, been more particularly appropriated to certain articulations; as to the *symphysis pubis*, *sacroiliac symphysis*, &c.

**SYMPHYYSIS**, Coalescence, Commissure, Insertion—s. *Ossium muscularis*, *Syssarcosis*—s. *Pubis*, *Pubic articulation*.

**SYMPHYOTOMY**, *Symphyseotomy*.

**SYMPHYTOS**, Hereditary.

**SYMPHYTUM**, from *συμφυω*, 'I unite.' *Symphytum officinale*, *Consolida major*, *Comfrey*, *Alum*, *Alus*, (F.) *Grand Consoudc*. Family, Boraginæ. See *Syst. Pentandria Monogynia*. The roots of this European plant are very mucilaginous, and are employed as emollients. They are used in decoction, in hæmoptysis, dysentery, and chronic diarrhœa, &c.

**SYMPHYTUM**, *Solidago virgaurea*—s. *Minimum*, *Bellis*—s. *Petræum*, *Sanicula*.

**SYMPHYTUM PETRÆUM**, *Coris Monspelien'sis*, *Montpelier Coris*. An intensely bitter and nauseous plant, which is said to have been useful in syphilis.

**SYMPOCARPUS FCETIDUS**, *Dracontium foetidum*.

**SYMPTOM**, *Symptomâ*, *Ac'cidens*, from *συν*, 'with,' and *πιπτω*, 'I fall.' Any change, perceptible to the senses, in any organ or function, which is connected with morbid influence. It is by the aggregate and succession of symptoms that a disease is detected.

The term—*symptoms of symptoms* has been used for the effects which result from the symptoms of a disease; but which effects are not essentially connected with the disease itself. Thus, the debility arising from the frequency of the evacuations in dysentery, is a symptom of symptoms. See *Sign*.

**SYMPTOMA TURPITUDINIS**, *Nymphomania*.

**SYMPTOMATIC**, *Symptomaticus*. That which is a symptom of some other affection. Thus, we speak of a symptomatic disease, in opposition to one that is idiopathic.

**SYMPTOMATOLOGY**, *Symptomotologia*, *Symbolog'ica*, from *συμπτώμα*, 'a symptom,' and *λογος*, 'a treatise.' The branch of pathology, the object of which is the knowledge of symptoms.

**SYMPTOSIS**, from *συν*, 'with,' and *πιπτω*, 'I fall.' Depression or rather emaciation or atrophy, either of the whole body or of a part.

**SYNÆTION**, *Concausa*.

**SYNANCHE**, *Cynanche*, *Cynanche tonsillar*.

**SYNANCIE**, *Cynanche*.

**SYNARTHRO'DIAL**, *Synarthrodial*, from *συν*, 'with,' and *αρθρωσις*, 'articulation.' That which belongs to synarthrosis; as *Synarthrodial articulation*.

**SYNARTHRO'SIS**, *Abarticulatio*, *Coarticulatio*. An immovable articulation. Synarthrosis includes three species:—*Sature*, *Harmony*, and *Gomphosis*.

**SYNATHROISMUS**, *Congestion*.

**SYNCHONDRO'SIS**, from *συν*, 'with,' and *χονδρος*, 'a cartilage.' Union or articulation of bones by means of cartilage;—as the articulations of the ribs with the sternum, by means of their cartilages of prolongation.

**SYNCHONDROTOMY**, *Symphyseotomy*.

**SYNCHRONOUS**, *Synchronus*, from *συν*, 'with,' and *χρονος*, 'time.' That which occurs at the same time. Thus, the pulsations of an artery may be synchronous with those of the heart.

**SYNCHYSIS**, *Confusio*.

**SYNCIPUT**, *Sinciput*.

**SYNCLONUS**, from *συνακλονειν*, 'I shake together.' *Clonici universales*, *Clonus* (Young). Tremulous, simultaneous, and chronic agitation of various muscles, especially when excited by the will. See *Tremor*, *Chorea*, &c.

**SYNCLONUS CHOREA**, *Chorea*—s. *Berberia*, *Berberis*—s. *Raphania*, *Raphania*—s. *Tremor*, *Tremor*.

**SYNCOMISTOS**, *συναγομιστος*, *Autophyros*, *Panis domesticus*, *secundarius*, *cibarius*, *confusus* *neus*. Bread of the whole wheat or of the unsifted meal. *Household bread*.

**SYNCOPE**, from *συνακτω*, 'I fall down.' *Animi defectio*, *Animi deliquium*, *Leipsycheia*, *Apsycheia*, *Aropsycheia*, *Lipothymia*, *Su'bitus animi casus*, *Swoon*, *Fainting fit*, (F.) *Evanouissement*, *Défaillance*, *Pamoison*. Complete, and commonly, sudden loss of sensation and motion, with considerable diminution, or entire suspension, of the pulsations of the heart and the respiratory movements.

*Syncope* is, commonly, an affection of no consequence; but, sometimes, it is an index of diseased heart.

Placing the patient in the horizontal posture: sprinkling cold water over the face, and the application of volatile substances to the nose, are all that will be required during the fit. See *Asphyxia* and *Suffocation*.

**SYNCOPE ANGINOSA**, *Angina pectoris*.

**SYNCRITICA**, *Astringents*.

**SYNDESMOGRAPHY**, *Syndesmographia*, from *συνδεσις*, 'a ligament,' and *γραφη*, 'a description.' A description of the ligaments. The part of anatomy which describes the ligaments.

**SYNDESMOL'OGY**, *Syndesmologia*, from *συνδεσις*, 'a ligament,' and *λογος*, 'a treatise, discourse.' A treatise on the ligaments.

**SYNDES'MO-PHARYNGÆ'US**. A fasciculus of the constrictor pharyngis superior (q v.)

**SYNDESMOS**, *Ligament*.

**SYNDESMO'SIS**, *Synscur'osis*, *Synymen'sis*, from *συνδεσις*, 'ligament.' The articulation of two or more bones by means of ligament;—as of the radius with the ulna.

**SYNDESMOT'OMY**, *Syudesmotomia*, from

συνδεσμος, 'ligament,' and τεμνω, 'I cut or dissect.' Dissection of the ligaments.

SYNDROME, συνδρομη, *Concur'sus*. (q. v.) *Concourse*. A name given, by the Empirical Sect, to the union of symptoms, which takes place in diseases. *Syndromē plethorica*, e. g. meant the union of symptoms produced by plethora.

SYNDYASMUS, Coition.

SYNECHIA, from συν, 'with,' and εχειν, 'to have.' Adhesion between the iris and transparent cornea, or between the iris and crystalline lens. The former case is called *Synechia antèrrior*: the latter *S. postèrior*.

SYNESIS, Intellect.

SYNEUROSIS, Syndesmosis.

SYNEZIZIS, *Synze'sis*, *Considen'tia*, from συν, 'with,' and ζευγνυειν, 'to join.' *Paropsis Synzesis*, *Caligo à Synzesi*, *Caligo Pupillæ*, *Closure or oclusion or obliteration of the Pupil*, *Phthisis Pupillæ*, *Amyosis*. This disease is sometimes a case of faulty conformation, depending upon the continued existence of the membrana pupillaris, or the absence of the pupil. It is, in other words, *congenital*. At other times, it is owing to accident, and supervenes on violent ophthalmia, or on the operation of the cataract.

Those who are affected with synezisis are completely blind;—the iris having no central aperture. In certain cases, a remedy may be obtained by making an opening in the iris, which may supply the place of the pupil, and through which the rays of light may reach the retina. This operation is called the *operation for artificial pupil*.

SYNGENES, Hereditary.

SYNIMENSIS, Synymensis.

SYNIZESIS, *Considentia*, *Synezisis*.

SYNOCHA, from συνεχω, 'I continue.' *Inflammatory Fever*, *Angiopy'ria*, *Febris causodes*, *Febris deurens*, *F. ardens*, *Febris continua sanguinea*, *Febris continua non putris*, *Synochus* (Vogel,) *Febris acma'stica*, *Synochus impu'tris* (Galen,) *Febris acuta*, *F. continens*, *F. continens non putrida*, *F. angioten'ica*, *F. sthenicu*, *F. sanguinea*, *Homol'onos*, *Sthenopy'ra*, *F. inflammator'ia*, *En'cia cauma*, *F. ton'ica*, *Phlogopy'rus*, *Cauma*, *General inflammation*, *Gastro-entèrite intense*. A species of continued fever, characterized by increased heat; and by quick, strong, and hard pulse; urine high-coloured; disturbance of mind slight. It requires, of course, the most active treatment.

SYNOCHA RHEUMATICA, Rheumatism, acute—s. Vaccina, Vaccina.

SYNOCHUS, *Febris lenta* (Linnæus,) *F. continens putrida*, *F. continua Putrida* (of some;) same etymon. Continued fever, compounded of synocha and typhus:—in its commencement often resembling the former; in its progress, the latter. *Mixed fever*, *Common continued fever*. See *Fever*, and *Typhus*.

SYNOCHUS, Synocha—s. Biliosa, *Fever*, gastric—s. Biliusos, *Fever*, bilious—s. Icterodes, *Fever*, yellow—s. Impu'tris, Synocha—s. Miliaria, *Miliary fever*—s. Varicella, *Varicella*.

SYNONIA, Synovia.

SYNSTEOGRAPHY, *Synstecogra'phia*, from συν, 'with,' οστεον, 'a bone,' and γραφω, 'I describe.' The part of anatomy which describes the joints.

SYNSTEOL'OGY, *Synosteol'gia*, from συν, 'with,' οστεον, 'a bone,' and λογος, 'a treatise.' A treatise of the joints.

SYNSTEOT'OMY, *Synosteot'omia*, from συν, 'with,' οστεον, 'a bone,' and τεμνειν, 'to cut.' Dissection of the joints.

SYNOVIA, from συν, 'with,' and ωον, 'an egg.' *Mucilago*, *Unguen articulæ're*, *Synovia*, *Accn'gia uticulæ'ris*, *Unguentum seu Smegma articulæ're*, *Mucilago articulo'rum seu junctura'rum*, *Humor articulæ'ris*, *Humor seu Humidum nat'urum seu Glutic articulo'rum*, (F.) *Synovic*. A fluid resembling the white of egg, which is exhaled by the synovial membranes surrounding the moveable articulations. The synovia of man, according to Hildenbrandt, consists of water, a little albumen, soda, muriate of soda, phosphate of lime, and—Fourcroy fancied—uric acid. Its use is to lubricate the joints, and the sheaths in which tendons play.

SYNOVIAL, *Synovi'alis*. That which relates to the synovia.

THE SYNOVIAL GLANDS, HAVERS'S GLANDS, *Glandulæ articuli'res*, *G. Synoviales*, *G. Haversianæ*, are the secretory fringes, which float in the interior of the synovial capsules (see *Capsule*.) They do not seem to be the glandular. They have been called *Synovial fun'bria*, (F.) *Fringes synoviales*.

SYNOVITIS; from *Synovic*, and *itis*, a termination denoting inflammation. A term, badly compounded, applied at times to inflammation of the synovial membrane.

SYNOVITIS RHEUMATISMALIS, Rheumatism, (acute.)

SYN'TASIS, συντασις, from συντενω, 'I strain.' Tension of parts: hence συντασικα are medicines, which render parts tense. *Syntex'is*, on the other hand, means *Colligulio*, or wasting of the body, from συντηνω, 'I melt together.'

SYNTAXIS, Articulation.

SYNTECOPYRA, Hectic fever.

SYNTECTOPYRA, Hectic fever.

SYNTENOSIS, from συν, 'with,' and τενω, 'a tendon.' A species of articulation, in which two bones are joined by means of tendon; as the sesamoid bones with the toes, the rotula with the tibia, &c.

SYNTERETICUS, Prophylactic.

SYNTEXIS, Colliquation, Consumption.

SYN'THENA. A term employed, by Paracelsus, to designate a species of epilepsy, accompanied by cardialgia and tormina.

SYN'THESIS, *Reu'nio*, from συν, 'with,' and τιθημι, 'I place.' A surgical operation, which consists in uniting parts that are divided; and approximating such as are separated or distant from each other. *Synthesis of continuity* means the union of the edges of a wound, or the approximation of the extremities of a fractured bone. *Synthesis of contiguity* is the reduction of displaced organs; as in cases of hernia and luxations.

SYN'THESIS, Composition.

SYN'THETISMUS, same etymon. The aggregate of operations and means for reducing a fracture, and maintaining it reduced:—comprising extension, counter-extension, coaptation, and bandaging.

SYNTRIMMA, Contritio.

SYNTRIPSIS, Contritio.

SYNTROPHOS, Connutritus.

SYNULOTICA, Cicatrisantia.

SYNYMENSIS, *Symer'sis*, from *ovr*, 'with,' and *μνρ*, 'a membrane.' Union of bones by membrane, as in the case of the bones of the head in the fœtus.

SYNYMENSIS, Syndesmosis.

SYPHILIDES, same etymon as Syphilis. The cutaneous eruptions that accompany constitutional syphilis are so denominated by the French writers.

SYPHILIDOMANIA, Syphilomania.

SYPHILIS, *Morbus Gallicus*, *Siphilis*, *Syphilis*, *Morbus*, *Cacoehyn'ia Ven'erea*, *Malum ven'ereum*, *Morbus Italicus*, *M. Hispanicus*, *Pudend'agra*, *Lues*, *M'rium*, *Lues ven'erea*, *Lues syphilitis*, *Morbus aphrodis'ius*, *Syphilis venerea*, *S. maligna*, *Morbus Neapolit'anus*, *Morbus Ind'icus*, *Patur'su*; the *Venereal Disease*, *Pox*, *French Pox*; the *Venereal*, (F.) *Vérole*, *Maladie vénérienne*, *Mal de Naples*, *Mal Français*, *Maladie de Vénus*. The etymology of syphilis is unknown. Some consider it to proceed from *συς*, 'a hog;' and others, from *σιφλοσ*,—formed, by contraction, from *σικαίος*, 'shameful,' 'dirty,' &c. It is an infectious disease, communicable by coition; or by the contact of parts that are only lined with a thin epidermis; as the lips, nipple, &c. It generally makes its first appearance by a chancre, (q. v.) followed sooner or later by a bubo. The chancre is a primary symptom or sore; but there are others, which are *secondary* or *constitutional*. These are:—ulcers in the throat; copper-coloured blotches on the skin; pains in the bones, nodes, &c.: the last are sometimes termed *tertiary* phenomena.

The origin of syphilis is not known. It is believed to have been introduced into Europe from America, at the end of the 15th century. Its progress is extremely variable, as well as its duration, which is often unlimited, if left to itself. Mercury may be esteemed the best remedy, but the disease admits of cure without it. Almost every antisyphilitic composition, whose use is attended with success, probably contains mercury united with diaphoretics or other medicines. It is generally sufficient to keep the mouth sore for a fortnight, for the cure of chancre: for venereal sore throat, and other recent constitutional symptoms, eight or ten weeks will be required; and, of course, a longer time, if these symptoms have persisted long. Sometimes, after mercury has been given for a time, the symptoms continue stationary; and do not yield until the mercury has been discontinued, and tonics and eutrophics have been administered.

The preparations of iodine have been much used, of late, in the revellent treatment of this disease.

SYPHILIS INDICA, Frambœsia.

SYPHILIS PSEUDO-SYPHILIS, *Lues Syphilo'des*, *Pseudo-syphilis*. A term given to ulcers or other affections, that resemble syphilis, but are indeterminate in their character,—the symptoms being irregular in their appearance, and usually yielding spontaneously, or under the use of tonics, change of air, &c. The condition has not been at all well defined. The *Siveus*, *Radesyge*, &c. have been referred to this head.

SYPHILISMUS, Syphilis.

SYPHILOM'ANIA, *Syphilidomania*, vulgarly, *Noddlc Pox*. A mania, with which some persons are affected, so that they subject themselves to antivenercal treatment, under the belief that they are affected with syphilis.

SYPHO AURICULARIS, Ottenchytes.

SYRIGMOPH'ONIA, from *σyrιγμος*, 'whistling,' and *φωνη*, 'voice.' A piping state of the voice.

SYRIGMUS, Tinnitus aurium.

SYRINGMOS, Tinnitus aurium.

SYRINGOT'OMUM, from *σyrιγξ*, 'a pipe,' 'a fistula,' and *τεμνειν*, 'to cut.' A surgical instrument, formerly used in the operation for *fistula in ano*. It is a bistouri, concave at its edge, and terminated by a long, flexible, probe-pointed stylet. This stylet or probe was first introduced by the external opening of the fistula into the rectum, whence it was drawn externally through the anus, carrying with it the cutting edge of the instrument, which divided the intermediate parts. The operation for fistula in ano has been called *Syringotomy*.

SYRINX, Fistula—s. *Hiera*, Vertebral column.

SYRMAISMOS, from *σyrμαιζω*, 'I evacuate.' A gentle evacuation by vomiting or stool.

SYROP, Syrup—s. *d'Al*, Syrupus allii—s. *d'Armoise composé*, Syrupus aromaticus—s. *de Chicorée composé*, Syrupus de cichorio compositus—s. *des Cinq racines*, Syrupus e quinque radicibus—s. *de Cuisinier*, Syrupus de sarsaparilla et sennâ compositus—s. *d'Ether*, Syrupus cum æthere sulphurico paratus—s. *de Gingembre*, Syrupus zingiberis—s. *de Guimauve*, Syrupus althææ—s. *de Longue vie*, Mellitum de mercuriali compositum—s. *de Mercure*, Syrupus de mercurio mediante gummi—s. *de Mûres*, Syrupus mori—s. *de Nerprun*, Syrupus rhamni—s. *de Pucots blancs*, Syrupus papaveris—s. *de Pommes composé*, see Syrupus sennæ—s. *de Quinquina avec le Vin*, Syrupus de kinâ kinâ cum vino—s. *de Roses pâles*, Syrupus rosæ—s. *de Roses rouges*, Syrupus rosæ—s. *de Vinaigre*, S. aceti.

SYRUP, *Syrupus*, *Sera'pium*, *Syrop*, *Syrup*; derived, according to some, from *σyrω*, 'I draw,' and *στος*, 'juice;' but, more probably, from the Arabic, *Siruph*, *Sirab* or *Scharab*, which signifies 'a potion.' A saturated solution of sugar in water, either simply, or united with some vegetable or other principle. Syrups, in general, require two pounds of sugar to the pint, and they are judged to be sufficiently boiled when a portion, taken up in a spoon, pours like oil. Syrups should be kept in small bottles in a cool place. They are chiefly used to render medicines palatable.

SYRUP, sec Syrupus—s. Antiscorbutic, Syrupus antiscorbuticus—s. of Buckthorn, Syrupus rhamni—s. of Capillaire, common, Syrupus simplex—s. of Cinchona with wine, Syrupus de kinâ kinâ cum vino—s. of Clove July flower, Syrupus caryophylli rubri—s. of Clove pinks, Syrupus caryophylli rubri—s. of Ether, Syrupus cum æthere sulphurico paratus—s. of Five roots, Syrupus e quinque radicibus—s. of Garlick, Syrupus allii—s. of Ginger, Syrupus zingiberis—s. of Honey, Mellitum simplex—s. of Lemon, Syrupus limonis—s. of Marshmal

lows, Syrupus althææ—s. of Meadow saffron, Syrupus colchici autumnalis—s. of Mugwort, compound, Syrupus aromaticus—s. of Mulberries, Syrupus mori—s. of Orange juice, see Syrupus aurantii—s. of Orange peel, Syrupus aromaticus—s. of Poppies, Syrupus papaveris—s. of Poppy, red, Syrupus rhæados—s. of Saffron, Syrupus croci—s. of Squills, Syrupus scillæ—s. of Succory, compound, Syrupus de cichorio compositus—s. of Tolu, Syrupus toluanus—s. of Vinegar, Syrupus acetii—s. of Violets, Syrupus viola.

SYRUPUS, S. simplex—s. Acidi acetosi, S. acetii.

SYRUPUS ACETII, S. Acidi Acetosi, Syrup of Vinegar, (F.) Syrop de Vinaigre. (Aceti liiiss, sacch. parif. liiiss. Boil to form a syrup. Ph. E.) It is refrigerant and antiseptic. Dose,  $\mathfrak{zj}$  to  $\mathfrak{zij}$ .

SYRUPUS CUM ÆTHERE SULPHURICO PARATUS, Syrup of Ether, (F.) Syrop d'ether. (Very pure sugar, 1000 p.; distilled water, 500 p.; dissolve in the cold, and strain; add sulphuric ether, 48 p. Shake for five or six days, and draw off the limpid syrup. Ph. L.) Properties like those of ether.

SYRUPUS ALLII, Syrup of Garlic, (F.) Syrop d'uil. (Rad. allii concis. lbj, aquæ fervent. lbj. Macerate for twelve hours: strain, and add sugar. Ph. D.) Use, same as that of garlic. Dose,  $\mathfrak{zj}$  to  $\mathfrak{ziv}$ .

SYRUPUS ALTHÆÆ, Syrup of Marshmallow, Syrupus ex Althæâ, S. de Althæâ, S. Althææ officinalis, (F.) Syrop de Guimauve. (Althææ rad. recent. cont. liiss, sacch. pur. lbj, aquæ lbiv. Boil the root in the water to one-half; and press out the liquor; when cold, defecate; add the sugar, and boil. Ph. L.) Emollient and demulcent. Dose,  $\mathfrak{zj}$  to  $\mathfrak{zij}$ .

SYRUPUS AMOMI ZINGIBERIS, S. zingiberis—s. Anticausoticus, see Anticausotic.

SYRUPUS ANTISCORBUTICUS, S. de Armoricâ compositus, Antiscorbutic Syrup. (Leaves of cochlearia, buckbean, water-creases, horseradish root and bitter oranges, each lbj; cinnamon  $\mathfrak{z}$ iss. Cut, and pour white wine lbiv. Macerate for two days: distil over lbj in a sand bath; add to this sugar lbj, and form a syrup. Again, take what remains in the cucurbit; pass it through cloth, let it rest; decant, and add sugar lbj; make into a syrup, and clarify with white of egg. Mix it with the first while yet warm. Ph. P.) Antiscorbutic, alterative, tonic, stomachic, &c. Dose,  $\mathfrak{zij}$  to  $\mathfrak{zij}$ .

SYRUPUS AROMATICUS, S. de Artemisiâ compositus, Compound Syrup of Mugwort, (F.) Syrop d'armoise composé. (Tops of artemisia vulgaris, in flower,  $\mathfrak{z}$ vj, inula root, ligusticum levisticum, and fennel, each  $\mathfrak{z}$ ss, pennyroyal, catmint, savine leaves, each  $\mathfrak{z}$ vj, marjoram, hyssop, pyrethrum, rue, basil, each  $\mathfrak{z}$ ij, uniseed and cinnamon, each  $\mathfrak{z}$ ix; bruise, and macerate, in hydromel lbviiij; distil over liiss; add to this a pound of sugar. Again, take the liquid that remains in the cucurbit, strain it gently; add sugar lbiv. Then mix the two. Ph. P.) Tonic, emmenagogue, &c.

SYRUPUS DE ARMORACIA COMPOSITUS, S. Antiscorbuticus—s. de Artemisiâ compositus, S. antiscorbuticus.

SYRUPUS ASPARAGI, see Asparagus—s. Balsamicus, S. toluanus.

SYRUPUS AURANTII, S. Aurantiorum, S. Citri Aurantii, S. Corticis Aurantii, S. e. Corticibus Aurantiorum, S. de Corticibus Aurantiorum, Syrup of Orange peel. (Aurant. cort. recent.  $\mathfrak{z}$ ij, aquæ ferv. lbj, sacch. pur. lbij. Macerate the peel in the water for 12 hours. Add the sugar. Ph. L.) Stomachic. Dose,  $\mathfrak{zj}$  to  $\mathfrak{zij}$ .

A Syrup of Orange Juice, Orange Sherbet, Syrupus e succo Aurantiorum, may be made by adding white sugar lbj to lbj of the juice of oranges, strained and clarified.

SYRUPUS CARYOPHYLLI RUBRI, S. Dianthi Caryophylli, Syrup of Clove July Flower, Syrup of Clove Pinks, Syrupus infusio'nis florum caryophyllorum. (Petalorum dianthi. caryoph. recent. unguibus resectis lbj, aquæ bull. lbiv, sacch. purif. lbvij. Ph. E.) Aromatic.

SYRUPUS CASSIÆ SENNÆ, S. sennæ.

SYRUPUS DE CICHORIO COMPOSITUS, S. de Rhco, Compound Syrup of Succory, (F.) Syrop de chicorée composé. (Root of succory  $\mathfrak{z}$ vj, leaves of succory  $\mathfrak{z}$ ix, leaves of fumitory and scolopendrium, each  $\mathfrak{z}$ ij, Alkchengi berries  $\mathfrak{z}$ ij. Boil in water lbxiv to lbxij; pass through cloth, and dissolve in it white sugar lbv. Boil till it has the consistence of syrup. Again, take water lbvij, rhubarb  $\mathfrak{z}$ vj, yellow sanders and cinnamon, each  $\mathfrak{z}$ ss. Infuse for twenty-four hours; pass through linen, and add the preceding syrup. Ph. P.) It is laxative and stomachic. Dose,  $\mathfrak{zj}$  to  $\mathfrak{z}$ ss.

SYRUPUS CINCHONÆ CUM VINO, S. de kinâ kinâ cum vino.

SYRUPUS CINCHONINÆ, Syrup of Cinchonine. (Simple syrup one pound; sulphate of cinchonine nine grains. Mix.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS CITRI AURANTII, S. aromaticus. SYRUPUS COLCHICI AUTUMNALIS, S. Colchici, Syrup of Meadow Saffron. (Rad. colch. autumn. recent.  $\mathfrak{z}$ j, acidi acetosi  $\mathfrak{z}$ xvi, sacch. pur.  $\mathfrak{z}$ xxvj. Macerate the root in the vinegar for two days, occasionally shaking the vessel; then strain, with gentle expression. To the strained fluid add the sugar, and boil to a syrup. Ph. E.) Diuretic, antiarthritic. Dose,  $\mathfrak{zj}$  to  $\mathfrak{z}$ ss, or more.

SYRUPUS CORTICIS AURANTII, S. aromaticus—s. Citri medicæ, S. limonium—s. e Succo citronum, S. limonium.

SYRUPUS CROCI, Syrup of Saffron. (Croci stigmat.  $\mathfrak{z}$ j, aquæ fervent. lbj, sacch. purif. liiiss. Ph. L.) Cardiac. Chiefly used for colour.

SYRUPUS DIANTHII CARYOPHYLLI, S. caryophylli rubri.

SYRUPUS EMETINÆ, Syrup of Emetine. (Simple syrup lbj, emetine 16 gr. M.) In small doses, expectorant; and in large, emetic.

SYRUPUS GENTIANINÆ, Syrup of Gentianine. (Syrup of sugar  $\mathfrak{z}$ xvj, gentianine 13 gr.) A pleasant bitter.

SYRUPUS HYDRARGYRI, S. de Mercurio mediante gummi—s. Infusionis florum caryophyllorum, S. caryophylli rubri.

SYRUPUS DE JALAP'PA, Syrup of Jalap. (Palo. jalape  $\mathfrak{z}$ x, sem. coriandr., fenicul. dulc., aa  $\mathfrak{z}$ ss, aquæ  $\mathfrak{z}$ xijss, sacch.  $\mathfrak{z}$ xxv, f. syrupus. Ph. P.) Cathartic. Dose,  $\mathfrak{zj}$  to  $\mathfrak{z}$ ss for children.

SYRUPUS DE KINA KINA CUM VINO, S. Cincho'næ cum vino, Syrup of Cinchona with wine,

(F.) *Syrup de quinquina avec le vin.* (Cort. cinchona officinalis ℥ij, ext. cinchona ℥vj, vini albi (v. de luncel, vel cuscusis ei similis), lbj, alcohol (S. G. .985 to .915) ℥j, sacchar. alb. lbiss. Bruise the cinchona; gradually add the alcohol, so as to form a soft mass; pour on the wine; macerate for two days, and strain. Dissolve the extract, add the sugar, and make a syrup. Ph. P.) Dose, ℥ss to ℥j.

SYRUPUS SUCCI LIMONIS, S. limonum.

SYRUPUS LIMO'NUM, S. citri med'ice, S. e succo citro'num, S. e succo limo'num, S. succi limonis, Syrup of Lemon, Lemon Syrup. (Limon. succ. colat. lbj, sacchar. pur. lbij. Ph. L.) Cooling, antiseptic.

SYRUPUS E MECONIO, S. papaveris—s. de Melle, Mellitum simplex—s. e Succo mororum, S. mori.

SYRUPUS DE MERCURIO MEDIAN'TE GUMMI. *Mercurius gummosus Plench'ii, Syrupus Hydrargyri*, (F.) *Syrup de mercure, ou Mercure gommeux de Plench.* (Hydrargyri pur. ℥j, p. gumm. acaciae, ℥ij, syrup. diacod. ℥ss. Rub together till the mercury is extinguished. Ph. P.) Possesses the properties of the blue pill. Dose, gr. ij to viij, or more.

SYRUPUS MORI, S. e succo moro'rum, S. succi mori, Syrup of Mul'berries, (F.) *Syrup de mûres.* (Mori succ. colat. lbj, sacchar. purif. lbij. Ph. L.) Gratefully refrigerant.

SYRUPUS MORPHINÆ ACETATIS, Syrup of acetate of morphine. (Syrup, one pound, acetate of morphine, gr. iv.) Dose, two tea-spoonfuls, as an opiate;—of about the strength of the same quantity of syrup of poppies.

The SYRUPUS MORPHINÆ SULPHATIS is made in the same way.

SYRUPUS PAPAVERIS, S. papaveris somniferi, S. papaveris albi, S. e meconio, S. de meconio, *Diacodion, Syrup of poppies*, (F.) *Syrup de pavots blancs, ou diacode.* (Papav. capsul. exsicc. et contus. exemptis seminibus, ℥xiv, sacch. pur. lbij. aq. fervent. cong. ijss. Macerate the capsules, in water, for 12 hours; boil to a gallon and express strongly. Boil the liquor to lbj; and strain while hot. Defecate by rest, and boil to lbj, adding the sugar so as to form a syrup. Ph. L.) One ounce contains about one grain of opium. Anodyne and demulcent.

The Dublin college has a SYRUPUS OPII, called *Common Syrup of Poppies*, which is made by dissolving 18 grains of the *Watery Extract of Opium* in 18 ounces of boiling water. Properties, those of opium and syrup.

SYRUPUS DE PAPAVERE ERRATICO, S. rhæados —s. de Pomis compositus, see S. sennæ.

SYRUPUS QUININÆ, Syrup of Quinine. (Simple syrup, 2 pounds, sulphate of quinine, 64 grains.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS E QUINQUE RADICIBUS, Syrup of five roots, (F.) *Syrup des cinq racines.* (Rad. apii, fœniculi, apii petroselinii, aa ℥v. Infuse for 24 hours in boiling water and strain. Rad. usparagu, rusci aculeati, aa ℥v. Boil and reduce to half; adding, towards the end, the residue of the preceding infusion. Boil again for some minutes; strain, and add white sugar lbvj. Ph. P.) Aperient and diuretic. Used in obstructions of the liver, spleen, and mesentery; and in dropsy, &c. Dose, ℥ss to ℥j, or more.

SYRUPUS RHAMNI, S. rhamni cathartici, S. de spinâ cervinâ, S. spinæ cervinæ, Syrup of Buckthorn, (F.) *Syrup de nerprun.* (Rhamn. buccur. succ. recent. lbvj, zingib. rad. concis., pimento bacc. contrit., aa ℥ss, sacch. purif. lbiiiss. Defecate the juice for 3 days, and strain. To a pint of this, add the ginger and pimento; macerate for 4 hours and strain; boil what remains to firm. Mix the liquors and add sugar, so as to form a syrup. Ph. L.) Cathartic, but apt to gripe. Dose, ℥iv to ℥ij.

SYRUPUS DE RHEO, Syrupus de Cichorio composito.

SYRUPUS RHÆADOS, S. de papav'ere errat'ico, S. papaveris erratici, Syrup of Red Poppy, (F.) *Syrup de coquelicot.* (Rhæad. petal. recent. lbj, aq. fervent. ℥xviij, sacch. purif. lbiiiss. To the water, heated in a water bath, add the petals. Remove the vessel; macerate for 12 hours; express; defecate and add sugar to form a syrup. Ph. L.) Chiefly used to give colour.

A factitious syrup is often made of aloes dissolved in simple syrup.

SYRUPUS ROSÆ, Syrupus rosarum soluti'vus, S. e rosâ siccis, S. rosæ centifoliae, S. rosaceus soluti'vus, Syrup of Roses, (F.) *Syrup de roses pâles.* (Rose centif. petal. exsicc. ℥vij, sacch. purif. lbvj, aq. fervent. lbvj. Macerate, the petals for 12 hours. Evaporate the strained liquor to lbiss. Add the sugar. Ph. L.) Gently laxative. Dose, ℥ij to ℥iss or more.

SYRUPUS ROSÆ GAL'LICÆ, Syrup of Red Roses. (F.) *Syrup de roses rouges.* (Rosæ gallic. petal. exsicc. ℥vij, aquæ bull. lbvj, sacch. purif. lbvj; prepared like the last. Ph. E.) Mildly astringent. Added to stomachic infusions.

SYRUPUS SARSAPARILLÆ, Syrup of Sarsaparilla. (Rad. Sarsap. cont. lbj, aquæ bullient. cong., sacch. purif. lbj. Macerate the root for 24 hours; boil to lbvj. Strain while hot; add the sugar, and boil. Ph. L.) Used in the same cases as the root. Dose, ℥j to ℥iv, and more.

SYRUPUS DE SARSAPARILLA ET SENNA COMPOSITUS, Compound Syrup of Sarsaparilla and Senna. (F.) *Syrup de cuisinier.* (Rad. Sarsap. concis. lbij. Infuse for 24 hours in warm water lbxij; boil for a quarter of an hour; pass with expression, and boil again the residuum in lbx of water. Reduce this to lbvj, and repeat the operation 2 or 3 times. Mix all the liquors and boil them together with flowers of borage, white roses, senna leaves, and aniseed, each ℥ij; reduce to half, pass, and add honey lbij. Boil to a syrup. Ph. P.) It is considered to be alterant, depurative, and sudorific. Dose, ℥ss to ℥ij.

SYRUPUS DE SCAMMONIO, Syrup of Scammony. (Pulv. Scammon. ℥ss, sacch. alb. ℥iv, alcohol (S. G. .985 to .915) ℥viij. Heat the mixture moderately; then set fire to the alcohol with a lighted taper; agitate constantly, until the flame is extinguished. Suffer it to cool; pass through cloth, and add Syrup of Violets, ℥iv. Ph. P.) ℥j contains 18 grains of scammony. Dose, ℥j to ℥ss.

SYRUPUS SCILLÆ, S. scilliticus, S. scillæ maritima, Syrup of Squills. (Act. scilla maritim. lbvj, sacch. pur. cont. lbvij. Ph. E.) Diuretic, expectorant, and emetic. Used in the same cases as the oxymel.

SYRUPUS SENNÆ, S. cassiæ senna, Syrup of Senna, (Senna folior. ℥ij, sem. fœnicul. cont. ℥j,

*mannæ*, ℥ij, *sacch. pur.* ℔j, *aquæ ferv.* ℔j. Macerate the senna leaves and fennel seeds for 12 hours. Strain, and add the manna and sugar.

*Ph. L.*) Cathartic. Dose, ℥ij to ℥iss or more. The Parisian Codex has a *Syrupus de Sennâ* of a compound character, called *Syrupus de pomis compos'itus*, *Syrop de pommes composé*. It contains, also, borage, bugloss, &c. Dose, ℥ss to ℥ij.

**SYRUPUS SIMPLEX**, *Simple syrup*, *Common syrup of capillaire*, *Syrupus*. (*Sacch. purif.* ℔i℔ss, *aquæ*, ℔j. Dissolve the sugar; set aside for 24 hours; remove the scum, and pour off the clear liquid. *Ph. L.*) Used to cover nauseous tastes, &c.

**SYRUPUS DE SPINA CERVINA**, *S. Rhamni*—*s. de Stœchade communis*, see *Lavendula*.

**SYRUPUS TOLUTANUS**, *S. toluif'era balsami*, *S. balsam'icus*, *Balsamic syrup*, *Syrup of tolu*. (*Balsam. tolu.* ℥j, *aque fervent.* ℔j, *sacchar. pur.* ℔j. Boil the balsams for half an hour, in a covered vessel, occasionally stirring. Strain, when cold, and add *sugar* so as to form a syrup. *Ph. L.*) Use. To give flavour.

**SYRUPUS VIOLÆ**, *S. violæ odora'tæ*, *S. viol'drum*, *S. e succo viol'drum*, *Syrup of Violets*. (*Flor. recent. viol. odorat.* ℔j, *aq. bull.* ℔viii, *sacch. pur.* ℔xv. Macerate, in a covered vessel, for 24 hours; pass, without expression, through linen; add the sugar so as to form a syrup. *Ph. E.*) Very gently laxative. Dose, ℥j to ℥ij.

**SYRUPUS E SUCCO VIOLARUM**, *S. Violæ*.

**SYRUPUS ZINGIBERIS**, *S. amo'mi zingiberis*, *Syrup of Ginger*. (*F.*) *Syrop de gingembre*. (*Zingib. rad. concis.* ℥ij, *aque fervent.* ℔j, *sacch. purif.* ℔j. To the strained liquor add the sugar, and form a syrup.

**N. B.** The Parisian Codex contains a few other compound syrups besides those enumerated, amongst these is a *Syrup of calf's lungs*, *Syrupus e pulmon'ibus vitul'nis*, *Syrop de mou de veau*, as an expectorant!

The simple syrups are made according to the usual rule, and possess the virtues of the substances after which they are named.

**SYSPA'SIA**, from *συσπαιω*, 'I contract.' Clonic spasm, with diminished sensibility and inability of utterances. A genus in Good's Nosology, which includes convulsion, epilepsy, and hysteria.

**SYSPASIA EPILEPSIA**, *Epilepsy*—*s. Hysteria*, *Hysteria*.

**SYSSARCO'SIS**, *συσσάρκωσις*, from *συσ*, 'with,' and *σάρξ*, 'flesh.' *Commissura ossium carnea*, *Symphysis ossium muscu'd'ris*, *Conner'io ossium cornu'su*, *Carna'tio*. Union of bones by means of muscles; such as the union of the os hyoides with the lower jaw, of the scapula with the ribs, &c.

**SYSTAL'TIC**, *Systal'ticus*; from *συστελλω*, 'I contract.' A *systal'ic motion* in a part is one in which there is alternate contraction and dilatation. See *Systole*.

**SYSTATICA**, from *συνιστημι*, 'I associate.' Diseases affecting several or all the sensorial powers simultaneously; irritation or inertness of mind, extending to the muscles, or external senses; or of the muscles, or external senses, extending to the mind:—the 4th order, class *Neuro'tica*, of Good.

**SYSTEM**, *Syste'ma*, from *συσ*, 'together,' and *ιστημι*, 'I place.' This word, taken in a good sense, means the collection and arrangement of different matters having an analogy to each other, or working towards the same end. In natural history, it means a methodical arrangement of beings, for the purpose of facilitating their study.

*System* is, however, sometimes used in an unfavourable sense in physical science, and often means,—a purely gratuitous supposition, by which the march of nature is attempted to be universally explained, and to which every thing is made to bend. In anatomy, *system* is an assemblage of organs, composed of the same tissues, and intended for similar functions; for instance the *nervous system*, *muscular system*, &c.

**SYSTEMATISM**. A method, according to which every fact of a science is collected around an opinion true or false. One, who reduces things to such a method is called a *Systemotist*.

**SYSTÈME VASCULAIRE À SANG NOIR**, see *Vascular*—*s. Vasculaire à sang rouge*, see *Vascular*.

**SYSTEMIC**; belonging to the general system—as 'systemic circulation' in contradistinction to the 'pulmonic.'

**SYSTOLE**, *Constric'tio*, *Contra'dtio* seu *Angusta'dtio* seu *Submissio* seu *Mica'dtio cordis*. The movement of constriction or contraction (q. v.) of the heart, to give impulse to the blood or to cause its progression. It is opposed to the *Diastole* of the organ.

## T

**T. BANDAGE**, *Fns'cia T. formis*. A bandage, shaped like the letter T. It consists of a strip of linen, of variable length and breadth, the middle of which is attached, at right angles, to the extremity of another strip, also of variable length and breadth. When two such strips are attached, at a distance from each other, the bandage is called a *double T*.

This bandage is used, principally, for supporting the dressings after the operation for fistula in ano, in diseases of the perinæum, groin, anus, &c.

**TABAC**, *Nicotiana tabacum*—*t. des Vosges*, *Arnica montana*.

**TABACUM**, *Nicotiana tabacum*.

**TABARZET**, *Saccharum album*.

**TABEL'LA**, *Tab'ula*, *Tabula'tum*, a *lozenge*; *Tessella*. (*F.*) *Tablette*. A solid medicine, composed of a powder, sugar, and mucilage; and generally shaped like a disk. See *Pastil* and *Trach*.

**TABELLA**, *Table*.

**TABELLÆ ABSORBENTES**, *T. de Magnesiâ*.

**TABELLÆ ACIDI OXAL'ICI**, *T. ad sitim*, *l.o.*

zenges of Oxalic Acid. (*Acid. oxalic.* ℥j, sacch. alb. ℥ss, ol. limonis. gut. xviii vel gut. xij. Make into lozenges with mucilage of gum tragacanth. *Ph. P.*) Lozenges are made in the same way with the citric and tartaric acids. They are refrigerant.

TABELLE DE ALTHÆA, Lozenges of Marshmallows. (*Rad. althææ pulv.* ℥ss, p. sacchar. alb. ℥ivss, f. massa. *Ph. P.*) Demulcent, expectorant.

TABELLE ANTIMONIALES KUNCKELII, *Tabella de stibii sulphureto*, Lozenges of Sulphuret of Antimony. *Mor'suli antimoniales, M. stibii, M. stibiati, Trochisci stibiati.* (*Amygdal. dulc.* ℥j, sacch. lss, *Sem. cardam., cinnam. pulv., sulph. antim. præpar.* aa. ℥j, fiant tabellæ. *Ph. P.* Each to weigh 10 grains.) Recommended in cutaneous diseases, blennorrhagia, arthritic pains, &c. Dose, 4 or more.

TABELLE AD ARDOREM VENTRICULI, Trochisci carbonatis calcis—t. Cardialgicæ, Trochisci carbonatis calcis.

TABELLE DE CATECHU ET MAGNESIA, *Lozenges of Catechu and Magnesia.* (*F.*) *Tablettes de catechu et de magnésie.* (*P. catech.* ℥vj, p. magnés. ℥iv, p. cinnam. ℥iij, sacch. alb. lss, q. tragac. gr. xij, oq. cinnam. q. s. ut f. massa. *Ph. P.* Each to weigh 12 gr.) Antacid, absorbent, and stomachic. Dose, 5 to 10 lozenges.

TABELLE CINCHONÆ, *T. de kinâ kinâ, Bark lozenges.* (*Ext. cinchon. sicc.* ℥ss, sacch. ℥iv, cinnam. ℥ss, mucilag. g. trag. f. massa. *Ph. P.*) Tonic.

TABELLE DE CITRO ET DIACARTHAMO, *T. de Scammonio et Senna.*

TABELLE DE FERRO, *Steel lozenges, Tabula martialis, T. instantanæ, T. antichlorotica.* (*Ferri linat. porphyriz.* ℥ss, p. cinnam. ℥j, p. sacch. ℥v, g. trag. et aq. cinnam. q. s. ut fiat massa. Each lozenge to weigh 12 gr. *Ph. P.*) Tonic, stomachic. Dose, v. to x.

*Aromatic lozenges of steel.* These consist of sulphate of iron, with a small proportion of the Tincture of Cantharides.

TABELLE DE KINA KINA, *T. cinchonæ.*

TABELLE DE MAGNESIA, *T. absorbentes, Magnesia lozenges.* (*Magnés. ℥j, sacchar. alb. ℥iv, mucil. g. tragac. q. s. Ph. P.*) Absorbent and antacid.

TABELLE DE RHEO, *Rhubarb lozenges.* (*P. rhej ℥ss, sacch. ℥v, mucilag. gum tragac. q. s.; f. massa.* Each to contain 12 grains. *Ph. P.*) Stomachic and laxative.

TABELLE DE SCAMMONIO ET SENNA COMPOSITÆ, *Compound lozenges of scammony and senna, T. de citro et diacarthamo.* (*Scammon. ℥iij, Sennæ ℥ivss, rhej ℥iss, caryoph. ℥j, corticis limon. confect. ℥j, sacch. ℥vj, f. massa. Ph. P.*) Purgative. Dose, ℥ij to ℥vj, or more.

TABELLE AD SITIM, *T. acidi oxalici—t. ad Sodam, Trochisci carbonatis calcis—t. de Stibii sulphureto, T. antimoniales Kunckelii.*

TABELLE DE SULPHURE SIMPLICIS, *Simple sulphur lozenges.* (*Sulphur. lot. ℥ss, sacch. ℥iv, muc. g. tragac. cum aquæ rosæ præpar. q. s. Ph. P.*) Expectorant, demulcent, &c. Used in diseases of the chest, and in cutaneous affections. Dose, 1 lozenge.

TABELLE DE SULPHURE COMPOSITÆ, *Compound sulphur lozenges.* (*Sulph. lot. ℥ij, acid*

*benzoic, gr. xij, rad. irid. p. ℥ss, ol. anisi. gr. viij, sacch. ℥vss, g. trag. q. s. Ph. P.*) Aperient, expectorant, and stimulant (?) Dose, 4 a day.

T A B E S , *Marasmus Tabes, Teledon, Atrophia, Declin.* Emaciation of the whole body, with general languor, hectic fever, and, for the most part, depressed spirits.

TABES, Atrophy, Phthisis.

TABES DORSALIS, *Marasmus tabes dorsalis, Phthisis notias, Phthisis dorsalis, Myelophthisis, Tabes ossis sacri.* By this term is meant a wasting of the body, attended at first with a pain in the back or loins, and afterwards in the neck or head,—caused, it has been conceived, by too early or too frequent adhesion to venery.

TABES LACTEA, see Galactia.

TABES MESENTERICA, *Atrophia mesenterica, Scrophula mesenterica, Rachialgia mesenterica, Phthisis mesaraica, Physconia mesenterica, Mesenteritis, (F.) Carreau, Chartre.* An engorgement and tubercular degeneration of the mesenteric glands, followed by emaciation and general disorder of the nutritive functions. The disease is often owing to inflammation or irritation of the lining membrane of the intestines, giving occasion to enlargement of the glands of the mesentery, as injury to the upper or lower extremities causes inflammation, and enlargement of the lymphatic glands of the axilla and groin. It occurs, particularly, in children of a scrofulous diathesis; and in those who are weaned too early, or fed on indigestible substances. Diarrhœa, emaciation, anorexia, or immoderate appetite; hardness and swelling of the abdomen; and, towards the end, hectic fever, are the chief symptoms of this affection; the prognosis of which is usually unfavourable. On opening the bodies of those who die of the disease, the mesenteric glands are found disorganized, tubercular, or in a more or less advanced state of suppuration.

The treatment is the same as in scrophulosis. Frictions may be added over the abdomen and spine; and mercury, in small doses, so as to excite a new action in the system. The food must be easy of digestion, and the bowels be kept soluble.

TABES NUTRICUM, see Galactia—t. Pectoræa, Rachitis—t. Pulmonalis, Phthisis pulmonalis—t. Ossis sacri, T. dorsalis.

TABIDUS, Phthisicus.

TABLE, *Tabula, Tabella, Tabulatium, Lamina, Paries, Squama.* A name given to the plates of compact tissue, which form the bones of the cranium. Of these one is external; the other internal, and called *Tabula vitrea* on account of its brittleness.

TABLES DE MORTALITÉ, Mortality, bills of.

TABLET, Trochisus.

TABLETTE, Tabella.

TABLETTES DE CACHOU ET DE MAGNESIE, *Tabellæ de catechu et magnesiâ.*

TABLIER, *Ventrale cæteum.*

TABULA, *Tabella, Table.*

TABULÆ ANTICHLOROTICÆ, *Tabellæ de ferro—t. Instantanæ, Tabellæ de ferro—t. Martiales, Tabellæ de ferro.*

TABULATUM, *Tabella, Table.*

TABUM, *Ichor, Sanies.*

TAC, Influenza.  
TACAMAHACA, *Fagara octandra*—t. Caragna, Caranna.

TACHE, Macula.

TACHES DE ROUSSURE, Ephelides.

TACITURNITY, *Taciturnitas*, *Sigē*, 'silence.' State of a person who does not speak. Morbid taciturnity sometimes exists as a symptom of the neuroses, especially of melancholy.

TACT, *Tactus*. Modification of the sense of touch. Passive judgment by the cutaneous organ regarding bodies exterior to it. Tact is passive: Touch, active.

TACTUS, Touch.

TÆDĒ, *Dæs, δαις*. A term used for a medicine employed under the form of fumigation, pessary, or troch.

TĒNĪA, *Tēnia*, from *ταῖνα*, 'a fillet, a riband.' See Bandage and Nymphomania. Also, a genus of intestinal worms, characterized by an elongated, flattened, and articulated body, with four suckorial oscula on the head. Of this genus, two only inhabit the human body—the *Tēnia lata*, (see *Bothriocephalus latus*), and *Tēnia solium*.

TĒNĪA ACĒPHALA, *Bothriocephalus latus*—t. *à Anneaux courts*, *Bothriocephalus latus*—t. *Articulos demittens*, *T. solium*—t. *Cucurbitina*, *T. solium*—t. *Dentata*, *Bothriocephalus latus*—t. *Grisea*, *Bothriocephalus latus*—t. *Hippocampi*, *Corpora fimbriata*—t. *Humana armata*, *T. solium*—t. *Humana inermis*, *Bothriocephalus latus*—t. *Hydatigena*, *Hydatid*—t. *Lata*, *Bothriocephalus latus*—t. *Membranacea*, *Bothriocephalus latus*—t. *Osculis lateralibus geminis*, *Bothriocephalus latus*—t. *Osculis lateralibus solitariis*, *Bothriocephalus latus*—t. *Osculis marginalibus solitariis*, *T. solium*—t. *Osculis superficialibus*, *Bothriocephalus latus*—t. *Prima*, *Bothriocephalus latus*—t. *Secunda*, *T. solium*.

TĒNĪA SEMICIRCULĀRIS, *Geminum centrum semicirculārē*, *Limbus posterior corporis striati*, *Striæ corneæ*, *Striæ semilunares*, *Frœnum novum*, *Fascia semicirculāris*, *Bandelette des éminences pyriformes*, (Ch.) (F.) *Bandelette*, *B. demicirculaire*, *Lame cornée*. A medullary, grayish, semitransparent layer, situate in the groove that separates the thalamus opticus from the corpus striatum in the lateral ventricle.

The TĒNĪA SOLĪUM, *T. osculis marginalibus solitariis*, *T. cucurbitina*, *T. humana armata*, *Halysis solium*, *Vermis cucurbitinus*, *Lumbricus latus*, *Tēnia sans épine*, *Ver cucurbitaire*, *Tania articulosa demittens*, *T. secunda*, *Tēnia à longues articulations*, *T. à anneaux longs*, *ver solitaire*, or *Long Tape Worm*, has an almost hemispherical, discrete head; an obtuse beak; the neck full anteriorly; all the joints slightly obtuse, the anterior very short; the next almost square, and the rest oblong: the marginal foramina vaguely alternated.

The *tēnia solium* is commonly a few feet long: sometimes its length is enormous. It is said to have been met with 600 feet long. It principally inhabits the small intestines, and is not common. The oil of turpentine, in some form, largely exhibited, is perhaps the best remedy.

TĒNĪA TENĒLLA, *Bothriocephalus latus*—t. *Vulgaris*, *Bothriocephalus latus*.

TĒNĪOLA, *Bandelette*.

TAFIA, Rum.

TAFFETAS AGGLUTINATIF, *Sparadrapum adhesivum*—t. *d'Angleterre*, see *Sparadrapum adhesivum*—t. *Gomné*, see *Sparadrapum adhesivum*.

TAILLĀDE, Incision, see *Entaille*.

TAILLE, Lithotomy—t. *Hypogastrique*, Hypogastric operation of lithotomy, see *Lithotomy*—t. *Par le rectum*, see *Lithotomy*—t. *Postérieure*, see *Lithotomy*—t. *Recto-vésicale*, see *Lithotomy*—t. *Sus-pubien*, see *Lithotomy*.

TAL. A word formerly employed for alkali. It also meant the dung of the peacock.

TALĒNTUM, *ταλντιον*. An ancient weight, equal to 54 pounds, 2 oz., 5 dr., and 24 grains *Poids de Marc*. See *Weights and Measures*.

TALIACOTIAN OPERĀTION, Rhinoplastic.

TALIPES, Kylosis (Clubfoot.)

TALPA, 'a mole.' *Topinardia*, (F.) *Taupe*. A tumour situate on the head, which has been supposed to burrow like a mole.

TALUS, *Astragalus*, *Malleolus*.

TAMARA CONGA, *Averrhoa carambola*.

TAMARĒA ZECLA, *Tamarindus*.

TAMARIN, *Tamarindus*.

TAMARINDUS, *T. Indica*, *Oziphænicon*, *Sil'iqua Arab'ica*, *Balampul'ia*, *Tamarā'a zecla*, *Oxyphar'icia*, *Acacia Indica*, *Tamarind tree*, (F.) *Tamarin*. Family, Leguminosæ. *Sex. Syst.* Triandria Digynia. The pulp of the tamarind, with the seeds, connected by numerous tough strings, is exported from the West Indies, preserved in syrup. It is refrigerant and laxative. *Tamarind whey* is made by boiling ʒij of the pulp with bliss of milk. When strained, it is used as a diluent in fever.

TAMARISCUS, *Tamarix gallica*.

TAMARIX GALLICA, *Tamariscus*. The *Tamarisk tree*. Family, *Portulacæ*. *Sex. Syst.* Pentandria Pentagynia. The bark, wood, and leaves were formerly employed medicinally;—the former for its aperient and corroborant virtues, in obstructions of the liver; the latter in icterus, hæmoptysis, and some cutaneous affections.

TAMBOUR, CAVITÉ DU, *Tympanum*.

TAMPONNEMENT, *Plugging*.

TANACĒTUM, *T. vulgārē*, *Tanā'sia*, *Athana'sia*, *Parthēnium mas*, *Tansy*, (F.) *Tanaisie vulgaire*. Family, *Corymbifere*. *Sex. Syst.* Syngenesia Polygamia. The leaves and flowers of tansy have a peculiar, strong odour, and warm, bitter taste. They are tonic, deobstruent, (?) and anthelmintic. Dose, ʒss to ʒj. The infusion is usually drunk as tea.

TANACĒTUM BALSAMĪTA, *Balsamita mas*, *B. suaveolens*, *B. major*, *Tanacetum hortensē*, *Costus hortorum*, *Mentha Romanā seu Saracēnica*, *Costmary*, *Alcost*, *Cock-mint*, (F.) *Menthe cog*, *Herbe au cog*, *Grand Baume*. A fragrant-smelling herb, somewhat resembling mint, and formerly much esteemed as a corroborant, carminative, and emmenagogue.

TANACĒTUM HORTENSE, *T. balsamita*.

TANĀSĪE VULGAIRE, *Tanacetum*.

TANĀSĪA, *Tanacetum*.

TANGE, *ταγγη*, 'rancidity.' A putrescent tainour.

TANNIC ACID, *Tannin*.

TANNICUM PURUM, *Tannin*.

**TANNIN**, from (F.) *Tanner*, 'to tan.' *Tanninum purum*, *Tanninum*, *Principium adstringens*, *P. Scytodephileum*. Tannic acid. A principle obtained from oak bark and other astringent vegetables, so called from its forming the principal agent in the process of *Tanning*.

Pure Tannin, obtained from galls has been lately introduced into medicine as an excellent and powerful astringent. Dose, two grains, repeated several times a day. The *Tannate of Lead*, *Plumbi Tannas*, has been applied, in the form of ointment, to excoriations, and sloughing sores from position, ( $\zeta\text{ij}$  of the tannate to  $\zeta\text{i}$  of cerate.)

**TANSY**, *Tanacetum*—t. Wild, *Potentilla anserina*.

**TAPER**, HIGH, *Verbascum nigrum*.

**TAPE'TUM**, *Ta'pestry*. A shining spot, on the outside of the optic nerve, in the eyes of certain animals, which is owing to the absence of the pigmentum nigrum occasioning the reflection of a portion of the rays from the membrana Ruyschiana. Its use appears to be, by reflecting the rays to cause a double impression on the retina, and thus add to the intensity of vision.

**TAPEWORM**, BROAD, *Bothriocephalus latus*—t. Long, *Tænia solium*.

**TAPIOCA**. See *Jatropha manihot*.

**TAPSARIA**, *Decoctum hordei*.

**TAR**, see *Pinus sylvestris*—t. Barbadoes, *Petrolæum*—t. Mineral, *Pissasphaltum*.

**TARACHÈ**, *ταραχη*, *Tarax'is*, *ταραξις*, 'disorder.' A disorder of sight, which arises from a blow, compression of the eye, or the action of dust, smoke or other external cause. By some, it is understood to signify mild or incipient ophthalmia.

**TARAGON**, *Artemisia dracunculus*.

**TARANTALISMUS**, *Tarantismus*.

**TARANTISMUS**, *Tarentis'mus*, *Tarantalismus*, *Tarentulism*. A feigned or imaginary disease in Apulia, characterized by excessive avidity for dancing at the sound of instruments, and which was ascribed, by the vulgar, to the bite of the tarantula. A sort of tarantismus, considered peculiar to Africa and believed to be spontaneous, has been called *Tarentismus Tangit'anus*. *Janon-tarentisme*.

**TARANTULA**, from *Tarentum* or *Tarento*, a town of Italy where they abound; *Tarentula*, (F.) *Tarentule*. A species of spider—the *Aranea Tarentula* of Linnæus, *Lycosa Tarentula* of Latreille, whose bite has been looked upon as dangerous. Music has been thought to cure it.

**TARAXIS**, *Tarache*, see *Ophthalmia*.

**TARCHON SYLVESTRIS**, *Achillea ptarmica*.

**TARENTISMUS**, *Tarantismus*—t. *Tangitanus*, *Tarantismus*.

**TARENTULA**, *Tarantula*.

**TARENTULISM**, *Tarantismus*.

**TARGAR**, *Juniperus communis*.

**TARI**. Palm or cocoa wine, from which sugar was obtained, called *Jagrec*. It was once used as a tonic.

**TARINI PONS**. A cineritious substance between the corpora albicantia, which assists in forming the bottom of the third ventricle.

**TARQUETTE**, *Herniaria glabra*.

**TARSAL**, *Tar'seus*. That which relates to the tarsus.

The **TARSAL ARTICULATIONS** result from the union of the bones of the tarsus with each other.

**TARSEUS**, *Tarsal*.

**TARSO-METATARSAL**, *Tarso-metatar'seus*. That which relates to tarsus and metatarsus.

The **TARSO-METATARSAL ARTICULATIONS** are those between the bones of the second row of the tarsus and the metatarsal bones. The term *Tarso-metatarsal* is, likewise, applied to ligaments, connected with these joints; some of which are *dorsal*, others *plantar*.

**TARSO-MÉTATARSI-PHALANGIEN DU POUCE**, *Adductor pollicis pedis*—t. *Phalangien du pouce*, *Flexor brevis pollicis pedis*—t. *Sous-phalangien du petit orteil*, *Flexor brevis minimi digiti pedis*—t. *Sous-phalangien du premier orteil*, *Flexor brevis pollicis pedis*.

**TARSUS**, *Planta prima pedis*, *Rass'eta pedis*, *Pedium*, *Cavic'ula pedis nodus*. 1. The posterior part of the foot. The tarsus consists of 7 bones, arranged transversely in two rows, between which amputation is sometimes performed.

The *first or Tibial row*, (F.) *Première rangée*, *R. jambière*, consists of the astragalus and os calcis; the *second or metatarsal*, (F.) *seconde rangée*, *R. métatarsienne*, of the scaphoides, cuboides, and three ossa cuneiformia. 2. The *Tarsi*, *Tarsal cartilages*, *Tarsal fibro-cartilages*, *Orchoi*, *Crepid'ines seu Cor'nae seu Chelæ seu Ungula Palpebrarum*, *Tharsi*, are two small, cartilaginous layers, seated in the substance of the free edge of each eyelid. The upper is larger and broader than the lower. Both commence at the bifurcated extremity of the tendon of the orbicularis palpebrarum, and pass to the opposite commissure of the eyelids. They are broader in the middle than at their extremities.

**TARTAR**, *Antimonium tartarizatum* (improperly)—t. *Calcereous*, *Potassæ subcarbonas*—t. *Crystals of*, *Potassæ supertartas*—t. *Emetic*, *Antimonium tartarizatum*—t. *Salt of*, *Potassæ tartras*, see *Potash*.

**TARTA'REI MORBI**. A term employed by Paracelsus to designate certain diseases which he attributed to tartar.

**TARTARI CRYSTALLI**, *Potassæ supertartas*.

**TARTAR'IC ACID**. *Acidum tartar'icum*, *A. tartar'osum*, *Acor tartaricus*, *Acidum tartari essentialè*. *Tartarous acid*, *Sal tartari essentialè*. (*Potassæ supertart. liiiss, aq. destillat. ferr., cong. iij, cretæ pptæ. lbj, acidî sulph. lbj*. Boil the supertartate with two gallons of the water, and gradually add the prepared chalk, until no more bubbles appear; let the tartrate of lime subside; then pour off the fluid and wash the tartrate of lime with distilled water, until it is tasteless. Pour upon it the sulphuric acid, diluted with a gallon of boiling distilled water; and set the mixture aside for 24 hours, occasionally stirring it. Filter and evaporate to crystallize. *Ph. L.*) It is refrigerant and antiseptic, but is chiefly used for making effervescent draughts with soda.

**TARTARÛM**, *Potassæ supertartas impurus*—t. *Vitriolatum*, *Potassæ sulphas*.

**TARTARUS AMMONIÆ**, *Ammonia tar-*

tras—t. Chalybeatus, Ferrum tartarizatum—t. Crudus, Potassæ supertartaras impurus—t. Dentium, Odontolithos—t. Emeticus, Antimonium tartarizatum—t. Kalicoferrius, Ferrum tartarizatum—t. Kalinus, Potassæ tartras—t. Lixiviæ, Potassæ tartras—t. Martialis, Ferrum tartarizatum—t. Potassæ ferruginosus, Ferrum tartarizatum—t. Subpotassicus, Potassæ supertartaras—t. Superpotassicus, Potassæ supertartaras—t. Tartarizatus, Potassæ tartras.

**TARTRATE D'AMMONIACQUE**, Ammoniacæ tartras.

**TARTE BRUT**, Potassæ supertartaras impurus—t. Cru, Potassæ supertartaras impurus—t. Émetique, Antimonium tartarizatum—t. Stibié, Antimonium tartarizatum.

**TARTRUM SOLUBILE**, Potassæ tartras.

**TASIS**, Extension, Tension.

**TASŪE**, Gustus, Geusis, Geuma, Gouthmos, (F.) Gout. One of the five external senses, which instructs us of the savours of bodies, and of which the tongue is the principal organ.

*Gustation, Gustatio*, is the exercise of this faculty. In disease, the taste frequently becomes variously vitiated.

**TASTE**, Savour.

**TAUPE**, Talpa.

**TAUROCOLLA**, ταυροκόλλα. Glue made of the ears and genitals of the bull. It was formerly much esteemed.

**TAUROS**, Penis, Perinæum.

**TAXIS**, from *τασσω*, 'I order,' 'I arrange,' *Repositio, Reductio*. A methodical pressure exerted by the hand on a hernial tumour, for the purpose of reducing it. This operation is generally easy in herniæ that are free from adhesions, of small size, and with a large opening to the sac; but it is very difficult and frequently impracticable in those that are adherent or strangulated. To perform the taxis, the patient should be put in the horizontal posture, and in one in which the parietes of the abdomen are relaxed.

The manual procedure varies in each species of hernia. In all cases, too strong pressure of the parts must be avoided; as inflammation and gangrene might be induced. The displaced organs must be pushed into the abdomen, exactly according to the direction of the axis of the hernial sac.

The reduction is sometimes favoured by blood-letting *ad deliquium*; the warm bath; warm fomentations; tobacco, emollient gylsters; and, at times, by cold applications, as ice, &c.

In a case of strangulated hernia, should the taxis fail, an operation becomes necessary.

**TAXUS BAC/CATA**. The *Yew tree, Smilax, Smilas, Thy'malos*, (F.) *If. Family*, Coniferæ. *Sez. Syst.* Diœcia Monadelphia. The ancients believed the yew to be poisonous; but the fruit may be eaten without inconvenience. The leaves have been often recommended in epilepsy. The resin, obtained from the bark, has been called *albir*.

**TAYE**, Caligo.

**TEA**, Thea—t. Berried, Gautheria—t. Blankenheimer, see *Galeopsis grandiflora*—t. Mexico, *Chenopodium ambrosioides*—t. Mountain, *Galtheria*—t. New Jersey, *Celastrus*—t. South sea, *Ilex vomitoria*—t. Spanish, *Chenopodium ambrosioides*.

**TEAR**, Sax. *teap, Lacryma, Lachryma, Lacryma, Da'cryon*, (F.) *Larme*. An excrementitious humour, secreted by the lachrymal gland, and poured between the globe of the eye and the eyelids, to facilitate the motions of those parts. The tears are saline, inodorous, and colourless. They turn the syrup of violets green; and contain muriate of soda, with excess of base, phosphates of lime and soda, and albumen.

**TEASEL**, CULTIVATED, *Dipsacus sylvestris*.

**TEAT**, Nipple.

**TECNOCTONIA**, Infanticide.

**TECOLITHOS**, Judæus (lapis.)

**TEETH**, EYE, Canine teeth—t. Jaw, Molar teeth—t. Milk, see *Dentition*—t. Neck of the, Collum dentium—t. Vitreous substance of the, Enamel of the teeth.

**TEETHING**, Dentition.

**TEGULA HIBERNICA**, Hibernicus lapis.

**TEGUMEN**, Integument.

**TEGUMENT**, Integument.

**TEGUMENTUM**, Integument.

**TEGUMENTUM VENTRICULORUM CEREBRI**, Centre, oval of the brain.

**TEIGNE**, Porrigo—t. *Favuse*, Porrigo favosa—t. *Furfuracé*, Porrigo furfurans.

**TEINSMOS**, Tenesmus.

**TEINTURE**, Tincture—t. *Ethérée*, Æthereal—t. *Rubéfiante*, Tinctura cantharidis.

**TEKEDON**, Tabes.

**TELA ACCIDENTALIS MEDULLARIS**, Encephaloid—t. *Galteri*, Sparadrapum *Galteri*—t. *Ichthyocollæ glutinans*, see *Sparadrapum adhesivum*.

**TELAMON**, Habena.

**TELA M'ONES**, *τελαμονες*, 'bandages,' Charpie, used for wounds; or linen, employed for bandages.

**TELANGIECTASIA**, OR **TELANGIECTASIS** (DILATATION OF VESSELS.) See *Hæmatodes fungus*.

**TELEPHIUM**, *Ulcus telephium*. The ancients gave this name to an ulcer of a very bad kind and difficult to cure, because the wound, which Achilles inflicted on Telephus, degenerated into a similar ulcer.

**TELEPHIUM**, *Sedum telephium*.

**TELLURISMUS**, Magnetism, animal.

**TELUM**, Penis—t. *Emplasticum*, *Sparadrapum*.

**TEMPE**, Temple.

**TEMPERAMENT**, *Temperamentum, Temperatúra, Temperatio, Tempéries, Complexio, Crasis, Eucrasia*. A name given to the remarkable differences that exist between different individuals, in consequence of the variety of relations and proportions between the constituent parts of the body. Thus, of old, it was supposed, that, according to the predominance of any one of the four humours then generally admitted—blood, lymph, bile, and atrablis or black bile—the manifestations of the functions were *tempered* or modified so as to give rise to a *sanguine, lymphatic, choleric, or atrablis* or *melancholic* predominance or temperament. The idea of the existence of certain of these humours has been banished, yet the influence of some, as of the blood, lymph, and bile, is still admitted by many.

Too much influence has, doubtless, been assigned to temperament in the sense in which it was formerly and still is generally understood, although there can be no question that difference of organization does occasion a difference in the activity of organs.

TEMPERAMENT, BILIOUS, Choleric temperament.

TEMPERANCE, *Sophrosynê*, *Nephalotes*, *Sobrietas*, *Sobriety*. Moderation, opposed to gluttony and drunkenness. The advantage of temperance, in a hygienic point of view, requires no comment.

TEMPERANTS, Sedatives.

TEMPERATIO, Temperament.

TEMPERATURA, Temperament.

TEMPERIES, Temperament.

TEMPLE, *Tempus*, *Crotaphus*, (F.) *Tempe*.

A depression, on each side of the head, between the forehead and eye anteriorly, and the ear posteriorly. The *temples*, distinguished into *right* and *left*, correspond to the temporal fossa on each side. The word is said to be from the Latin *tempus*, 'time,' because in this part the hair begins to turn white and to indicate age.

TEMPORAL, *Temporulis*. That which relates to the temples.

THE TEMPORAL BONE, *Os temporis seu temporale seu arcuale seu arnale seu lapideum seu lapidosum seu saxum seu petrosum seu lithoides seu lepidoides seu squamosum seu squamiforme seu durum seu mcondsum seu prarupta rupi assimildum seu nervele, Crotaphus*, is seated at the lateral and inferior part of the cranium, of which it forms part; and contains, within it, the special organs of audition. It is usually divided into three portions:—1. The *squamous*, *Pars squamosa*, (F.) *Portion écailleuse ou squameuse*. 2. The *mastoid portion*, and 3. The *Petrous portion*, *Pars petrosa*, *Pyramis trigona*, (F.) *Portion pierreuse, Rocher*. It has, first, an *auricular or external face*, on which is a surface that makes part of the temporal fossa; the *zygomatic process*; the *glenoid cavity*; the  *fissure of Glaserius*; the *meatus auditorius externus*; the *mastoid process*; the *digestive groove*; the *canalis caroticus*; the *jugular fossa*; the *styloid process*; the *stylo-mastoid foramen*, &c. 2. A *cerebral or internal surface*, which corresponds to the cavity of the cranium and on which is the *Pars petrosa*, the *hiatus Fallopii*, the *meatus auditorius internus*, the *fissure of the aqueductus vestibuli*, a *portion of the gutter for the lateral sinus*, &c. 3. A circumference, on which is observed the orifice of the *bony portion of the Eustachian tube* and the *Aqueductus cochleæ*, &c. The temporal bone is articulated with the sphenoid, occipital, parietal, malar, and inferior maxillary bones. It is developed from five points of ossification.

THE TEMPORAL FOSSA is an excavation, observed at each side of the head. It is filled by the muscle whose name it bears, and is formed by the temporal and sphenoid, below; by the parietal and frontal bones, above; is separated, by a transverse crista, from the zygomatic fossa, and completed, before, by the cheek bone.

THE TEMPORAL MUSCLE, *Temporalis*, *Arcadimporo-maxillaire*, *Crotaphites*, *Temporo-maxillaire*, (Ch.) is a broad, flattened, triangular muscle, which fills the temporal fossa. Its

fibres are attached to the temporal aponeurosis and fossa; and all converge into a strong tendon, which passes under the zygomatic arch, and is inserted into the coronoid process of the lower jaw. This muscle raises the lower jaw, and applies the teeth against each other.

THE TEMPORAL APONEUROSIS is a very strong aponeurosis, of a bluish, shining colour, which is attached to the whole of the curved line of the temporal bone; to the posterior edge of the malar bone; to the superior margin of the zygomatic arch, and forms an envelope for the temporal muscle.

THE TEMPORAL OR CROTAPHITE ARTERIES, are several.

I. The *Temporal Artery*, properly so called, arises from the outer side of the superior part of the external carotid. It ascends between the ramus of the jaw, the meatus auditorius externus, and the parotid gland, which covers it as far as the zygomatic arch. Above this, it becomes subcutaneous; and, when it has attained the middle of the temporal region, it divides into two branches: the one anterior—*A. temporalis frontalis seu interna seu anterior*; and the other posterior—the *A. temporalis occipitalis seu externa seu superior*. The temporal artery, before its division, gives off, 1. Branches to the parotid; to the joint of the lower jaw; to the meatus auditorius, and to the masseter. 2. The *transverse artery of the face*. 3. The *middle temporal*, which arises beneath the cheekbone, and traverses the temporal aponeurosis, immediately beneath that bone.

II. The *Deep-seated Temporals*, *A. temporales profundæ*. These are two in number. They arise from the internal maxillary, and have been distinguished, from their position, into *anterior* and *posterior*. They send their principal divisions into the temporal muscle.

THE TEMPORAL VEINS were formerly called *Ætoi* or *Ætoi Phlebes*, *Aquila Venæ*.

THE TEMPORAL NERVES. These are distinguished into the *superficial temporal*, furnished by the inferior maxillary branch of the 5th pair, behind the condyle of the jaw; and the *temporales profundæ*, *anterior* and *posterior*, furnished by the same nerve, at its exit from the cranium. Sömmering has given the name *temporal* to the divisions sent by the facial nerve to the temporal region.

TEMPORO-AURICULAIRE, Atollens aures—*t. Maxillaire*, Temporal muscle.

TEMPORO-MAXILLARY, *Temporo-maxillaris*. That which belongs to the temporal bone and lower jaw.

THE TEMPORO-MAXILLARY ARTICULATION or joint of the lower jaw, is articulated between the glenoid cavity and transverse process of the temporal bone on the one hand, and the condyle of the lower jaw on the other. Two thin cartilages cover the surfaces of these bones. The one is common to the transverse process and the portion of the glenoid cavity, anterior to the fissure of Glaserius; the other belongs to the condyle. This articulation is furnished with an inter-articular fibro-cartilage, two synovial capsules, and two lateral ligaments:—the one internal, and the other external.

THE TEMPORO-MAXILLARY NERVES of Bichat

are the divisions of the facial nerve, distributed to the temporal and maxillary regions.

TEMPUS, Temple.

TEMULEN'TIA, *Ebr'ietas*, *Drunck'eness*. Flater gave this name to delirium; Etmuller, to an apoplectic condition, depending upon drunkenness—the *Apoplexia temulentia* or dead drunkenness. Commonly, *Temulentia* is used synonymously with drunkenness, *Met'hē*, and is often employed in the description of diseases to indicate a state resembling drunkenness. *Muniv e temulentia* is the same as *Delirium tremens*, (q. v.)

TENACULA, Bone-nippers—t. Volsella, Forceps (lithotomy.)

TENACULUM, from *te'neo*, 'I hold.' A kind of fine hook attached to a handle which is thrust through the parietes of a blood-vessel, to draw it out and enable it to be tied.

TENACULUM, ASSALINI'S. An ingenious instrument, invented by Assalini. It consists of a forceps, or double tenaculum, the points of which are fine, sharp, and bifurcated, so as to be readily received into each other when the instrument is closed on the artery, which it is by a spring. It is of great use when the surgeon has no assistant at hand. The instrument is figured in S. Cooper's "First Lines."

TENILLE INCISIVE, Bone-nippers.

TENDON, *Tendo*, *Prouer'atio*, from *τενω*, 'I stretch.' *Tenon*, a *Sincov*. A fibrous cord, more or less round, long, or flattened; of a white, pearl colour, and composed of very close parallel fibres. The tendons are attached to the bones, by one extremity; by the other, they receive the insertions of the fleshy fibres: sometimes, they afford attachment to fleshy fibres at both ends;—as in the digastric muscle. The tendons must be considered as so many cords, for transmitting the motion of muscles to the bones or levers.

TENDON D'ACHILLE, Achillis tendo.

TENDONS, TWITCHING OF THE, Subtultus tendinum.

TENESMUS, *Tenismus*, *Tinismus*, from *τενω*, 'I stretch.' *Proctica Tenismus*, *Obstipulatio Tenismus*, (F.) *Épreintes*. Frequent, vain, and painful desire to go to stool;—one of the chief symptoms of inflammation of the lining membrane of the digestive tube, as of dysentery.

TENESMUS VESICÆ, Bradysuria.

TENETTES, Forceps (craniotomy.)

TENIA, *Tænia*—t. à *Anneauz longs*, *Tænia solium*—t. à *Longues articulations*, *Tænia solium*—t. *Saus épine*, *Tænia solium*.

TENNESSEE, MINERAL WATERS OF. On the waters of French Broad River, in this State, is a large, clear, thermal spring. The heat is so great that, on first going into the water, it is almost insupportable.

TENON, Tendon.

TENONT'AGRA, from *τενω*, 'tendon,' and *αγρα*, 'seizure.' A variety of gout; which affects the tendinous parts of muscles, or the tendinous ligaments, which strengthen certain articulations.

TENONTOTRO'TI, from *τενω*, 'tendon,' and *τιτροσω*, 'I wound.' They who are wounded in the tendons.—Galen.

TENOT'OMY, *Tenotomia*, from *τενω*, 'a ten-

don,' and *τομη*, 'incision.' The operation of dividing a tendon, often practised for the removal of *Loxarthrus* or deviations of the joints—as in club foot.

TENSEUR DE L'APONEVROSE FÉMORALE, Fascia lata muscle.

TENSION, *Tensio*, *Tasis*, *Diat'asis*, *Entonia*, (*Entonia* is also used for over-tension.) *Conte'sio*, *Disten'sio*, from *ten'dere*, 'to stretch.' State of a part, which is stretched, when its textures are distended by the afflux of fluids, or the accumulation of gas, or when its fibres are drawn, as it were, in an opposite direction, and are, consequently, more resisting than usual.

TENSOR TARSII. A small muscle, belonging to the inner commissure of the eyelids, well described by Prof. Horner, of Philadelphia. It is about three lines broad and six long; arises from the posterior flat surface of the os unguis, near its junction with the ethmoid bone, and passes forwards and outwards, lying on the posterior face of the lachrymal ducts. As it approaches the commissure of the lids, it splits into two nearly equal parts; each of which is appropriated to a duct, and inserted along its course, almost to the punctum lachrymale. Its chief office seems to be, to influence the position of the puncta lachrymalia, and to regulate the course of the tears through the lachrymal ducts.

TENSOR TYMPANI, *Inter'nus Auris*, *Internus Mallei*, *Salpingo-mulleen*. A small muscle, which arises from the petrous portion of the temporal bone, and the cartilage of the Eustachian tube, and terminates by a tendon, which is reflected over the processus cochleariformis, and is inserted into the apophysis of the handle of the malleus.

TENSOR PALATI, *Circumflexus musculus*.

TENSOR VAGINÆ FEMORIS, Fascia lata muscle.

TENT, *Tenta*, *Turn'da*, *Penic'ulus*, *Penicillus*, *Penicillium*, *Motos*, *Lenuis'cus*. (F.) *Tente*, *Bourdonnet*, *Mèche*. In Surgery, tents are small rolls of lint, of a cylindrical or pyramidal shape, which are introduced into wounds and deep ulcers, to prevent them from closing before they are filled up from the bottom. Tents are sometimes also made of prepared sponge, gentian root, &c. They are not so much used as they formerly were.

TENTACULUM CEREBELLI, Tentorium.

TENTE, Tent—t. *du Cervelet*, Tentorium.

TENTIGO VENEREA, Nymphomania—t. *Veretri*, *Satyriasis*.

TENTIPELLUM, from *tendo*, 'I stretch,' and *pellis*, 'the skin.' Ancient name of a cosmetic, with which, it was pretended, wrinkles could be effaced.

TENTORIUM, *T. cerebelli super-cxtcn'sum*, *T. cerebelli*, *Tentaculum cerebelli*, *Septum transverse*, (Ch.) *Transverse Septum*, *Septum encephali*, *Intercepta horizontalia Pacchioni*. *Processus transversus dura matris*, *Lateral Processes of the Dura Mater*, *Diaphragma cerebri*. (F.) *Tente du cervelet*, *Plancher du Cerveau*. A process of the dura mater, which separates the cerebrum from the cerebellum. It extends from the internal horizontal spine of the occipital bone, directly forwards to the sella turcica of the sphenoid.

TENTORIUM CEREBELLO, Tentorium.

TENTUM, Penis.

TENTWORT, *Asplenium ruta muraria*.

TENUIS MATER, Pia mater.

TERIDARIUM. See Stove.

TERAS, Monster.

TERATOL'OGY, *Teratologia*, from *τερας*, 'genitive, τερατος, 'a monster.' A description, or the doctrine, of monsters.

TEREBELLA, Trepan.

TEREBINTHINA, from *τεριβινθος*, or *τεριβινθος*, 'the turpentine tree.' *Turpentine*, *Botin*, *Albotin*, *Altilibat*, *Brutino*. (F.) *Terebinthine*. A substance, of the consistence of honey, which flows from many trees of the terebinthaceæ, and coniferæ families. It is viscid; shining; more or less transparent; inflammable; of a warm, pungent taste; strong smell, and is entirely composed of resin and essential oil, without benzoic acid. It is soluble in alcohol. See Turpentine.

All the turpentine are stimulant, diuretic, and cathartic.

TEREBINTHINA ARGENTORATENSIS, see *Pinus picea*—t. *Balsamea*, see *Pinus balsamea*—t. *Canadensis*, see *Pinus balsamea*—t. *Chia*, see *Pistacia terebinthus*—t. *Communis*, see *Pinus sylvestris*—t. *Cypria*, see *Pistacia terebinthus*—t. *Empyreumatica*, see *Pinus sylvestris*—t. *Veneta*, see *Pinus larix*—t. *Vera*, see *Pistacia terebinthus*—t. *Vulgaris*, see *Pinus sylvestris*.

TEREBINTHINE, *Terebinthina*—t. *de Copahu*, *Copaiba*—t. *d'Égypte*, see *Amyris opobalsamum*—t. *de Gilead*, see *Amyris opobalsamum*—t. *du Grand Caire*, see *Amyris opobalsamum*—t. *de Judée*, see *Amyris opobalsamum*—t. *de Melze*, see *Pinus larix*—t. *de Venise*, see *Pinus larix*.

TEREBINTHUS, *Terminthus*—t. *Gummi-fera*, *Bursera gummiifera*—t. *Lentiscus*, *Pistacia lentiscus*—t. *Vulgaris*, *Pistacia terebinthus*.

TEREBRA, Trepan.

TEREBRATIO, Trepanning.

TEREDO, Caries, *Spina ventosa*.

TERES, *Strongylus*, *Cylindroides*, 'long and round,' (q. v.) An epithet given to many organs, the fibres of which are collected into round fasciculi.

The TERES MINOR, *Margini-sus-scapulo-trochiterien*, *Nonus humeri Placentini*. *Le plus petit sus-scapulo-trochiterien*, (Ch.) (F.) *Petit rond*, is situate at the posterior and inferior part of the shoulder: it is narrow and flattened, from above to below, in its inner half; and, from before to behind, in the outer. It is attached, on the one part, to the outer surface of the scapula, near its inferior angle; and, on the other, to the inferior part of the great tuberosity of the humerus. It depresses the arm, and causes it to turn on its axis from within outwards. It also carries it backwards.

The TERES MAJOR, *Anguli-scapulo-humeral*, *Scapulo-humeral*, (Ch.) (F.) *Grand rond*, is situate at the inferior and posterior part of the shoulder. It is attached, on the one hand, to the outer surface of the inferior angle of the scapula; to the corresponding part of its axillary margin; and, on the other, to the posterior margin of the bicipital groove of the humerus. It carries the arm backwards and inwards, and carries it also inwards in rotation. When it acts with the lon-

gissimus dorsi and pectoralis major, it applies the arm against the lateral part of the chest, and keeps it forcibly there.

LIG'AMEN'TUM TERES, (F.) *Ligament rond*. This name is given to the round ligament in the cotyloid cavity, which is attached to the head of the bone, and to the bottom of the cavity. It is also given to a small fibrous fascia, which extends from the coronoid process of the ulna to below the bicipital tubercle of the radius.

TERESIS, Observation.

TERETRON, Trepan.

TERGUM, Dorsum, Vertebral column.

TERMIN'THUS, *Terebinthus*, from *τεριβινθος*, 'the turpentine tree.' *Phyma Anthrax* *Terminthus*, *Berry* or *Fungous carbuncle*. The ancients gave this name to a tumour, surmounted by a black pustule, and resembling the fruit of the turpentine tree.

TERMIN'THUS, *Pistacia terebinthus*.

TERMINUS SUPERIOR ASPERÆ ARTERIE, Larynx.

TERRA ABSORBENS MINERALIS, *Magnesiæ carbonas*—t. *Aluminis*, *Argilla pura*—t. *Amara*, *Magnesiæ carbonas*—t. *Amara sulphurica*, *Magnesiæ sulphas*—t. *Bolaris*, *Argilla pura*—t. *Foliata*, *Sulphur*—t. *Foliata mineralis*, *Soda acetata*—t. *Foliata tartari*, *Potassæ acetat*—t. *Fornacum*, see *Bricks*—t. *Fullonica*, *Cimolia purpurescens*—t. *Japonica*, *Catechu*.

TERRA LIVONICA, *A Terra sigillata* or *scaled earth* from *Livonia*, redder than that from *Silesia*, and very astringent.

TERRA MERITA, *Curcuma longa*.

TERRA NOCERIA'NA, *A* whitish, soft, and astringent earth, found in the environs of *Nocera*, in Italy.

TERRA ORLEA'NA, *Figmetum urucu*, *Urucu*. (F.) *Rocou*, *Roucou*, *Bichet*. A ceraceous mass, obtained from the seeds of the *Bixa Orleana*. In Jamaica, it is recommended in dysentery, and is considered to possess astringent and stomachic qualities. It is called, according to its shape, *Flag Annotto*, *Roll* or *Egg Annotto*.

The *Spanish Annotto*, *Bixa*, is in small, oblong cakes. It is chiefly employed as a colouring matter.

TERRA PONDEROSA, *Baryta*—t. *Ponderosa muriata*, *Baryta*, *muriate* of—t. *Ponderosa salita*, *Baryta*, *muriate* of—t. *Saponaria*, *Cimolia purpurescens*.

TERRA PORTUGAL'ICA, *Barros*, *Buearos*. A reddish, astringent, styptic earth, obtained from *Portugal*.

TERRA SIGILLA'TA, *Scaled Earth*. A bole or earthy matter, made into little cakes or flat masses, and stamped with certain impressions, as with the head of the Grand Seigneur. To these belong the *Terra Silesiaca*, *Terra Lemnia*, *T. Tar'ica*.

TERRA SIGILLATA, *Bolus alba*.

TERRA LEMNIA, *Lemnian Earth*, *Lempnias*. A name given by the ancients to a solid, reddish, astringent substance, prepared with the pulp of the fruit of the *Baobab*, an African tree, according to *Prosper Alpinus*. It seems, however, to be an argillaceous earth. It has been employed as an astringent.

TERRA SILESIACA, see *Terra sigillata*—t. *Talcosa oxyanthracodes*, *Magnesiæ carbonas*—t.

Turcica, see Terra sigillata—t. Vitrioli dulcis, Colcothar.

TERRE-NOIX, Bunion bulbocastanum—t. Pesante, Baryta—t. Sigillée, Bolus alba.

TERRETTE, Glecoma hederacea.

TERTIAN FEVER, Febris tertiana, Anctus tertianus, Tritæus, Tertian Ague, (F.) Fièvre tierce. An intermittent, whose paroxysms recur every third day, or every 48 hours. The mildest, and the most pernicious, intermittents belong to this head. As a general principle, it is the most manageable form of ague.

TERTIANARIA, Scutellaria galericulata.

TESSARA, Cuboid.

TESSELLA, Tabella.

TEST, DANIEL'S, see Docimasia pulmonum—t. Hydrostatic, see Docimasia pulmonum—t. Ploucquet's, see Docimasia pulmonum—t. Static, see Docimasia pulmonum.

TESTACEOUS, from testa, 'a shell.' A powder, consisting of burnt shells. These contain carbonate of lime, chiefly, and hence the term has been applied to cretaceous substances. See Creta.

TESTÆ FORNACEÆ, Bricks—t. Præparata, Creta præparata.

TESTES. The Testicles. A name given to the inferior tubercles of the corpora quadrigemina, (q. v.) to distinguish them from the superior, called Nates.

TESTES MINORES, Prostate.

TESTICLE, Testis, Testiculus, Orchis, Didymus, Gemini (pl.) (F.) Testicule, from testis, 'a witness,' because the testicles are evidences of virility. The name of two glandular organs, contained in the scrotum, whose office is to secrete sperm. They are formed of a gray and softish substance, composed of tortuous canals, called *Tubuli seminiferi* vel *Vasa seminalia*, folded on each other, and of extreme fineness; the number of which, according to the estimate of Monro, is 62,500, and the total length 5,208 feet. All these canals, uniting in their course, pass through the corpus Highmorianum, concur in forming the epididymis, and give origin to the vas deferens.

The testicles are covered, immediately, by a fibrous membrane, of an opaque white colour, and very tough, called *Tunica Albuginea*, or, simply, *Albuginea*, *Peritestis*, of which the corpus Highmorianum is only an enlargement. Over this, again, is the tunica vaginalis, the second envelope of the testis.

TESTICLE, SWELLED, Hernia humoralis.

TESTICONDUS, Crypsorchis.

TESTICULE, Testicle.

TESTICULUS ACCESSORIUS, Epididymis—t. Caninus, Orchis mascula.

TESTIS FEMINEUS, Ovary—t. Muliebris, Ovary.

TESTUDINATIO CRANII, Camarosis.

TESTUDO, *Chelone*, (F.) Tortue. A genus of reptiles, including the turtle, the flesh of which is much esteemed as an article of diet.

Also, an encysted tumour, which has been supposed to resemble the shell of a turtle. *Empyema encystis ganglion*. See Ganglion.

TESTUDO, Fornix.

TETANOMATA, Tetanothra.

TETANO'THRA, *Tetanom'ata*, *Ergato'*

ria. Medicines which remove wrinkles. *Goræus*.

TETANUS, from τεῖνον, 'I stretch;' *Spasm with rigidity, Convulsio Indicia, Holotonicos, Rigor nervosus, Ecten'sio seu Disten'sio, Enta'sia Tetanus, Calorhus cervinus, Catochus holoton'icus*. A disease which consists in a permanent contraction of all the muscles or merely of some, without alterations of relaxation. It is characterized by closure of the jaws; difficulty or impracticability of deglutition; rigidity and immobility of the limbs and trunk, which is sometimes curved forwards (*Emprosthotonos*, q. v.) sometimes backwards (*Opisthotonos*, q. v.) and sometimes to one side, (*Pleurothol'onus*, q. v.) When tetanus is confined to the muscles of the jaws, it is called *Trismus*. It is a most formidable affection. The means of treatment are:—copious and repeated blood-letting; bathing, cold and warm; powerful doses of opium, and other narcotics.

In TRAUMATIC TETANUS, or that which supervenes on a wound, every extraneous matter must, of course, be removed from the wound, and soothing applications be made to it.

TETANUS ANTICUS, Eniprosthotonos—t. Dolorificus, Cramp—t. Dorsalis, Opisthotonos—t. Lateralis, Pleurothotonos—t. Maxille inferioris, Trismus—t. Posterganeus, Opisthotonos—t. Posticus, Opisthotonos.

TETARTÆUS, Quartan.

TETARTOPHIA, from τεταρτος, 'the fourth,' and φημι, 'I arise.' *Quartanus remittens*. A quartan, in which the intermission is inordinately short or imperfect.

TÊTE, Caput. Head.

TETRADRACHMON, from τετρας, 'four,' and δραχμη, 'a drachm.' A weight of four drachms or half an ounce.

TETRAGONUS, Platysma myoides.

TETRAMYRON, from τετρας, 'four,' and μυρον, 'an ointment.' An ointment of four ingredients. Galen.

TETRANGURIA, Cucurbita citrullus.

TETRANTHÆRA PICHURIM, *Faba Pichurim*. The seeds of this Brazilian plant have been used in diarrhœa, dysentery, flatulent colic, &c. Dose, ℞ij.

TETRAO CŒTUR'NIX, *Coturnix*; the Quail, (F.) Caille. The quail is an esteemed article of diet. The Greek name is οορυζ; and the places, called *Ortygia*, are named after it. The excrements of the quail were, formerly, extolled in epilepsy: and the fat in specks of the eye.

TETRAPHAR'MACUM, from τετρας, 'four,' and φαρμακον, 'a medicine.' A medicine consisting of four ingredients.

TETROBOLŌN. The weight of four oboli, or two scruples.—Goræus.

TETROROS, Astragalus.

TETTER, Herpes—t. Honeycomb, Porrigo favosa—t. Milky, Porrigo larvalis—t. Running, Impetigo—t. Sealy, Psoriasis.

TETTERWORT, Chelidonium majus.

TEUCRIUM CHAM'EDRYS, *Chamædris*, *C. minor repens*, *C. vulg'aris*, *Quer'cula minor* seu *Calamandri'na*, *Trissa'go*, *Cham'drops*, *Triza'go*, *Common German'der*, *Creeping German'der*, *Small German'der*, *English Treacle*, (F.) *Petit chène*, *Germandrée officinale*. Family,

Labiatae. *Sex. Syst.* Didynamia Gymnospermia. This is possessed of aromatic and bitter properties. The dose of the dried powder is from  $\zeta_{ss}$  to  $\mathfrak{z}$ .

The *TEUCRIUM FLAVUM* has similar properties.

*TEUCRIUM CHAMÆPITYS*, *Chomapitys*, *Arthetica*, *Arthetica*, *Aju'ga*, *Abiga*, *Chanano'rum*, *Ira arthritica*, *Holod'yrion*, *Io'nia*, *Sideritis*, *Common Groundpine*. (F.) *Petite Ivette*. Properties like the last. The tops or leaves have been recommended as aperients and tonics; especially in female obstructions, and in paralytic disorders.

*TEUCRIUM CRETICUM*, *Poley-mountain of Candy*, *Polium Creticum*. The tops and whole herb enter into the old compounds—*Mithridate* and *Theriaca*. It has a moderately aromatic smell; and a nauseous, bitter taste, and is placed among the aperients and corroborants.

The *TEUCRIUM CAPITATUM* or *Poley-mountain of Montpellier*, *Polium Montanum*, is, generally, substituted for the last. The common *Poley mountain* is the *Teucrium Montanum*; and the *Golden Poley-mountain*, the *Teucrium Polium*, *Polion*.

The *TEUCRIUM IVA*, *Chamapitys moschata*, *Ira moschata Mouspelien'sium*, *Ira*, *Chamapitys anhyllus*, *French Groundpine*. (F.) *Ivette musquée*. It has similar virtues to the *Chamæpitys*, but weaker.

*TEUCRIUM MARUM*, *Marum Syriacum*, *Marum Creticum*, *Majoro'na Syriaca*, *Marum verum*, *M. Cortusi*, *Chama'drys incana maritima*, *Marum germander*, *Syriou herb mastich*, *Originum Syriacum*. (F.) *Marum ou Germandrée Maritime*, *Herbe aux chats*. A very aromatic plant; of a camphorated smell; and formerly much used in medicine as a tonic, anti-spasmodic, emmenagogue, &c.

*TEUCRIUM SCORDIUM*; the *Water Germander*, *Scordium*, *Trissago palustris*, *Chama'drys palustris*, *Allium redolens*. (F.) *Germandrée Scordone*, *Sauge des bois*, *Germandrée oquatique*. The leaves have a garlicky smell, and bitterish, and slightly pungent taste. It has the tonic properties of the other *Teucria*.

**TEXTURE**, *Textura*, from *tero*, 'I weave.' The particular arrangement of the tissues that constitute an organ.

**TEXTUS**, *Tissue*—t. *Desmosus*, *Desmoid tissue*—t. *Organicus*, *Cellular tissue*—t. *Parenchymalis*, *Cellular tissue*.

**THALAMUS**, *Θαλαμος*. (F.) *Couche*; 'a bed.' The place at which a nerve originates, or has been considered to originate.

**THALAMI NERVORUM OPTICORUM** seu **OPTICI**, *Eminentia magna cerebri*, *Ganglia cerebri postica*, *Crura medullæ oblongata*, (of some,) *Striata corpora superiora posteriora*, *Coliculi nervorum opticorum*, *Couches des nerfs oculaires*, (Ch.) (F.) *Couches des nerfs optiques*, *Couches optiques*. Two rounded and irregular surfaces, which are seen exposed in the lateral ventricles of the brain, and in the third ventricle, the inferior surface of which presents two projections, called *Corpora geniculata*, that furnish several filaments to the optic nerves. The name was given from a belief that the optic nerves originate from them. They, however, arise more posteriorly, and adhere merely to the inner margin of those bodies. Gall con-

siders that the thalami act as ganglions to the nerves; and, hence, he calls them *Grand ganglion cérébral inférieur*. They are also called *Posterior ganglion of the cerebrum*. From the thalami and corpora striata fibres proceed upwards to constitute the convolutions of the brain, and the various bands that connect the different parts of the brain together.

The upper and inner parts of the thalami are so closely connected as to form one continued surface, called *Commissura mollis*. The posterior parts turn downwards and outwards; after which they are elongated to form the two white cords, termed *Tractus optici*.

**THALICTRON**, *Thalictrum*, *T. magnum*, *T. flavum*, *T. flavescens*, *Poor Man's Rhubarb*, *Rhaborbarum pauperum*. (F.) *Pigamon jaunâtre*, *Rue des prés*, *Fausse-Rhubarbe*, *Rhubarbe des pauvres*. *Family*, *Ranunculacæe*. *Sex. Syst.* *Polyandria Polygynia*. The root resembles rhubarb in its properties.

**THANATODES**, *Mortal*.

**THANATOLOGY**, *Thanatolog'ia*, from *θανατος*, 'death.' A description, or the doctrine, of death.

**THANATOS**, *Death*.

**THAPSIA**, from the island *Thapsus*. The deadly carrot, *Thapsia asclepias*. *Family*, *Umbelliferae*. *Sex. Syst.* *Pentandria Digynia*. The root operates violently, both upwards and downwards. It is not used.

**THAPSUS BARBATUS**, *Verbascum ni-grum*.

**THARSI**. See *Tarsus*.

**THÉ**, *Thea*—t. *des Apalaches*, *Ilex vomitoria*—t. *de France*, *Salvia*—t. *d'Europe*, *Veronica*—t. *de la Mer du sud*, *Ilex vomitoria*—t. *du Mexique*, *Chenopodium ambrosioides*—t. *de Simon Pauli*, *Myrica gale*—t. *Suisse*, *Falltranck*.

**THEA**, *Chaa*, *Tea*, (F.) *Thé*. There are two principal species of tea-plants;—the *Thea Bohe'a* and *Thea viridis*; the black tea and the green. *Family*, *Hesperidæe*. *Sex. Syst.* *Polyandria Monogynia*. In commerce, many kinds of teas are met with. Several of the differences between these appear to result from the age at which the leaves have been collected, and the mode of their desiccation.

Tea-drinking was introduced into Europe about the year 1666; since which time its use has become universal; and, in spite of the assertions of medical terrorists, it is, except in particular idiosyncrasies, entirely harmless.

By an analogical transference, very common in language, the word *Teu* has been used almost synonymously with infusion, as *Beef tea*, *Mint tea*, &c.

**THEA GERMANICA**, *Veronica*.

**THEBÆSIUS**, **VEINS OF**. A name given to supposititious branches of the coronary veins, which Christopher Adam Thebesius, a German anatomist, described as opening into the heart by small depressions observable in the right auricle; and which have been called *Foramina Thebesii*. No such veins can be demonstrated. The valve, at the orifice of the coronary vein, in the right ventricle, is called *Valvula Thebesii*, *V. Guiffartiana*, *V. vena magna*.

**THECA**, *Case*, *Vagina* or sheath—t. *Cor-dis*, *Pericardium*—t. *Vertebralis*, see *Vertebral canal*.

THEION, Sulphur.

THEIOTHERMÆ, Waters, mineral, sulphureous.

THELASIS, Lactation.

THELASMUS, Lactation.

THELE, Nipple, Papilla.

THELITIS, from *θηλή*, 'the female nipple,' the female breast, and *Itis*, denoting inflammation. Inflammation of the nipple.

THELOS, Mamma.

THELYPTERIS, Pteris aquilina.

THENAR, *ἄναρ*. The palm of the hand, or sole of the foot.

The THENAR EMINENCE is the projection at the anterior and outer part of the hand, formed by the abductor brevis, opponens, and flexor brevis pollicis.

THENAR MUSCLE. Riolan and Winslow give this name to the fleshy mass, formed of the abductor brevis, opponens pollicis, and the anterior part of the flexor brevis pollicis. In the foot, Winslow gives the name *Thenar muscle* to the abductor, and flexor brevis pollicis pedis.

THENAR, Flexor brevis pollicis manus, Palm.

THEOPLEGIA, Apoplexy.

THEOPLEXIA, Apoplexy.

THEORETICAL, *Theoreticus*, *Theoricus*, from *θεωρεω*, 'I contemplate.' (F.) *Théorétique*, *Théorique*. That which is confined to theory, or is connected with it. An epithet also applied to a sect of physicians, who founded their doctrine chiefly on reasoning.

THÉORIQUE, Theoretical.

THEORY, *Theoria*, from *θεωρεω*, 'I contemplate.' The speculative part of a science. The connexion established in the mind between a general fact, or the least possible number of general facts, and all the particular facts dependent thereon: for example,—the motions of the heavenly bodies, and the most important natural phenomena are connected with a single fact, previously known by observation; viz. that the force of gravity acts inversely, according to the square of the distance. This constitutes the theory of universal gravitation. *Theory* must not be confounded with *system*. *Theory* regards nature as it is; and is a rigid deduction from facts. *System* is too often the creature of the imagination, to which nature is made to bend.

The THEORY OF MEDICINE, *Institutes of Medicine*, *Theoretical Medicine*, is that part of the science, which attempts, philosophically, to account for the various phenomena that present themselves during health as well as in disease. It is the philosophy of Medicine.

The *Institutes of Medicine* are generally considered to comprise Physiology and its applications to Pathology, Hygiène, and Therapeutics.

THERAPEIA, Curation, Therapeutics.

THERAPEUSIA, Therapeutics.

THERAPEUTICS, *Therapeutick*, *Therapeutia*, *Iatrotechnica*, *Præctice of Physic*, *Therapeutia*, *Curatoria* *Methodus*, *Methodus Medendi*, from *θεραπευω*, 'I remedy.' (F.) *Thérapeutique*. That part of medicine, the object of which is the treatment of disease. With others, the department which comprises an explanation of the *modus operandi* of medicines.

THÉRAPEUTIQUE, Therapeutics.

THERAPEUTIST. Same etymon. One who practises Therapeutics. A practitioner of medicine. To be a good therapist, he must be well versed in every department of medicine, and be capable of observing and of reasoning well. A man may be a good *observer*, and yet a bad *reasoner*. He cannot practise well unless he is both. Hence, the comparatively small number of good Theraputists.

THERIAC OF ANTIPATER, Antipatri theriaca.

THERIACA, *ἑρριακα*, from *θηρ*, 'a ferocious or venomous animal,' and *αἰετομα*, 'I cure.' *Treacle*, (q. v.) (F.) *Thériaque*. Also, a medicine, believed to be capable of curing, or preventing the effects of the bite of a venomous animal. In this sense, it is chiefly used by writers.

The THERIACA ANDROMACHI or *Venice Treacle* is an ancient *alexipharmic clectuary*; consisting of a farrago of 61 different ingredients, possessing the most opposite properties. It was invented by Andromachus of Crete, and prepared by order of Nero. It has received various modifications; and, to the discredit of the *Faculté de Médecine* of Paris, holds its place in their *Codex*, with even an additional number of ingredients. The *Electuarium Opiatum polypharmacum* of the *Codex* contains *acid ingredients*, 5; *astringent*, 5; *bitter*, 22; *indigenous aromatics*, 10; *umbelliferous aromatics*, 7; *balsams and resinous substances*, 8; *fetid ingredients*, 6; *narcotics*, 1; *earthy substances*, 1; *gunny or amylaceous*, 4; *saccharine*, 3; total, 72! and one of these is the *flesh of the viper!* A little more than a grain of opium is contained in each drachm of the compound.

THERIACA CELESTIS, *Tinctura opii*—t. *Communis*, *Melasses*—t. *Edinensis*, *Confectio opii*.

THERIACA GERMANORUM. An extract or rob, prepared from juniper berries. Used as a stomachic.

THERIACA LONDINENSIS, *Cataplasma Cymini*. A cataplasm of *cumin seed*, *bay berries*, *germander*, *snake-root*, *cloves*, *honey*, and sometimes *opium* or *syrup of poppies*.

THERIACA RUSTICORUM, *Allium*.

THÉRIAQUE, Theriaca.

THERIODES, Ferine.

THERIOMA, *Therion*, from *θηρ*, 'a venomous animal.' Any extremely malignant ulcer. Sometimes, confined to ulcers of the lungs.

THERION, Therioma.

THERIOTOMY, Zootomy.

THERMÆ, *θερμαι*. Warm baths or springs. See *Waters (mineral)*.

THERMASMA, Fomentation.

THERMATICA, Calefacients.

THERME, Heat.

THESIS, *Disputatio*, *Inaugural Dissertation*. The name usually given to the essay composed by a candidate for graduation in Medicine, which he is at times required to defend publicly. Often, however, it is a mere form giving useless labour and trouble to the student, inasmuch as it is executed as a task, and never afterwards regarded by the preceptor or

by others. Sandifort, Haller, Smellie, and Stoll, have published collections of these.

Also, a suffix denoting 'arrangement';—hence *Diothisis*.

THEVE'TIA A'HOUI, *Ahouai*. The kernels of the nut of this Brazilian tree are said to be a violent poison. At the Antilles, its nuts are called *Noix de Serpent*; and they are used against the bites of serpents.

THIGH, Sax. *deoh*, *Femur*, *Femen*, *Crus*, *Meros*, (F.) *Cuisse*. The part of the lower limb, which extends from the pelvis to the leg. The thigh is larger at its superior than inferior part, and has the form of an inverted and truncated cone, slightly depressed from within outwards. *Above*, it is bounded, *anteriorly*, by the groin; *externally*, by the hip; *behind*, by the fold of the nates; and *within*, by the perineal region. *Below*, it is bounded, *anteriorly*, by the prominence of the knee; *posteriorly*, by the ham. It is formed of a considerable number of muscles, blood-vessels, lymphatics, nerves, &c.; and is covered by a strong aponeurosis.

THIGHBONE, Femur—t. Neck of the, *Column femoris*.

THION, Sulphur.

THIRST, Sax. *syrt*, Dutch, *Dorst*, *Sitis*, *Dipsa*, (F.) *Soif*. A simple desire or an absolute want for liquids. Physiologists are not entirely agreed regarding the seat of thirst; some place it in the fauces; others in the stomach. Its immediate cause is not known. It has been attributed to a dry condition of the nervous papillæ of the pharynx, produced by suppression of the salivary and mucous secretions. This is probably true; but, again, it is owing to the wants of the system,—a supply of fluid being required to compensate the numerous losses, that are constantly taking place. Thirst is an *internal sensation*,—an *instinctive want*,—arising from organization, and inexplicable. It is an urgent symptom in many diseases, particularly in those of vascular excitement.

THIRST, EXCESSIVE, Polydipsia—t. Morbid, *Dipsosis*.

THISTLE, BLESSED, *Centaurea benedicta*—t. Cotton, *Onopordium acanthium*—t. Globe, *Echinops*—t. Holy, *Centaurea benedicta*—t. Ladies, *Carduus marianus*—t. Milk, common, *Carduus marianus*—t. Pine, *Atractylis gummifera*—t. Sow, *Sonchus oleraceus*—t. Star, *Centaurea calcitrapa*.

THLASIS, Contusion—t. *Depressio*, *Depressio*.

THLASMA, Contusion—t. *Concussio*, *Concussio*—t. *Stremma*, *Sprain*.

THLASPI, *Pennycress*. *Family*, Crucifera. *Sex. Syst.* Tetradymania Siliculosa. Two species of thlaspi are directed, in some pharmacopæias, for medical use:—the *Thlaspi arvense* or *Tracle mustard*, and the *Thlaspi campestræ* or *Mithridate mustard*. The pharmaceutical properties of both kinds resemble those of common mustard.

THLIP'SIS, *θλιψις*, *Compressio*. Compression, and especially constriction of vessels by an external cause. *Oppression*, (q. v.)

THOLUS, *Achiculum*—t. *Diocleus*, *Scapha*.

THORACENTE'SIS, from *θώραξ*, 'the chest,'

and *κείρω*, 'I pierce.' The same as paracentesis of the thorax.

THORACHIQUE, Thoracic.

THORAC'IC, *Thorac'icus*, from *thorax*, 'the chest,' (F.) *Thoracique* ou *Thorachique*. That which relates or belongs to the chest; as *Thoracic vis'cera*, &c.

THE THORACIC LIMBS are the upper limbs;—so called because they are articulated with the lateral and upper parts of the chest.

THE THORACIC REGIONS are the different regions of the chest. Thus we say *anterior*, *lateral*, and *superior thoracic*, &c.

THE ARTERIA THORACICA EXTERNA SUPERIOR, *A. thoracique supérieure*, *Première des Thoraciques* (Ch.), arises from the axillary artery or from the acromial; and descends forwards between the pectoralis major and P. minor, to which it distributes itself by a great number of branches. In some subjects, there are two or three *Arteriæ thoracicae externæ superiores*.

THE ARTERIA THORACICA EXTERNA INFERIOR VEL LONGA, *A. mamma'ria externa*, *A. Thoracica inferior*, *Deuxième des Thoraciques* (Ch.) arises from the axillary, a little below the preceding, and descends vertically over the lateral part of the thorax, and the serratus major anticus. It afterwards bends inwards; becomes subcutaneous, and divides into several branches, which embrace the breasts. It gives numerous ramifications to the pectoralis major, serratus major anticus, intercostals, ganglions of the axilla, mamma, &c.

THE THORACIC DUCT, *Ductus thorac'icus seu chyliiferus seu chyli seu lacteus seu rosifer seu Pecqueti seu Pecquetid'nus*, *Vena alba thorac'is*, *Alevis ampull'esens*, *Distribut'ria lactea thoracica*, *Ductus thoracicus post'erior seu vertebr'alis*, *Galax'ia*, *Duct*, of *Pecquet*, *Aliment'ary Duct*, (F.) *Canal ou Conduit Thoracique*, is the duct in which the lymphatics of the lower limbs, abdomen, left superior extremity, left side of the head, neck, and thorax terminate. It begins at the *receptaculum chyli* (q. v.,) which is formed by the union of five or six large lymphatic trunks,—themselves formed from the union of all the absorbent plexuses of the abdomen. The duct ascends into the chest through the pillars of the diaphragm, and by the side of the aorta and vena azygos. It contracts, in dimensions, as far as the 6th dorsal vertebra, when it inclines towards the left hand; ascends behind the arch of the aorta; passes behind the left internal jugular vein, and opens at the posterior part of the subclavian vein of the same side. Its embouchure is furnished with two valves, which prevent the blood from passing from the vein into the duct.

THORACIC, LONG or INFERIOR, Mammary inferior external artery—t. Superior external, Mammary superior external artery.

THORACICA, Pectorals.

THORACICS, FIRST OF THE, Mammary superior external artery—t. Second of the, Mammary inferior external artery.

THORACHIQUE, Thoracic.

THORACO-FACIAL, *Platysma myoides*—t. *Maxillo-facial*, *Platysma myoides*.

THORACODYNE, *Pleurodynia*.

THORACOCOPIA. See *Auscultation*.

THORACYSTIS, from *θώραξ*, 'the chest,'

and *κυστις*, 'a bladder.' Encysted dropsy of the chest. Hydatids in the chest.

THORAX, *Cith'arus*, *Medius venter*, *Pectus*, the *Breast*, the *Chest*, *Bir*, *Chelys*, *Cassa*, (F.) *Poirine*. One of the splanchnic cavities; bounded, posteriorly, by the vertebræ; laterally, by the ribs and scapula; anteriorly, by the sternum; above, by the clavicle; and, below, by the diaphragm. It is destined to lodge and protect the chief organs of respiration and circulation:—the lungs and the heart.

THORAX, Corsct.

THORE, Sperin.

THORNAPPLE, *Datura stramonium*.

THOROUGHSTEM, *Eupatorium perfoliatum*.

THOROUGHWAX, *Eupatorium perfoliatum*.

THOROUGHWORT, *Eupatorium perfoliatum*.

THOROW-WAX, *Bupleurum rotundifolium*.

THORULUS STRAMINEUS, *Fanon*.

THREADWORM, LONG, *Tricocephalus*.

THREPSIS, Assimilation, Nutrition.

THREPTICE, Assimilation.

THRIDACE, *Lactucarium*,

THRIDAX, Lettuce.

THRIFT LAVENDER, *Statice limonium*.

THRIX, Capillus, Hair.

THROAT, *Θροαε*, *Θροα*, *Jugulum*, *Guttur Sphagē*. The anterior part of the neck. (F.) *Gorge*. Also, the *Fauces*, (F.) *Gosier*.

THROATWORT, *Campanula trachelium*.

THROBBING, *Pulsati'vus*. *A throbbing pain*, (F.) *Douleur pulsative*, is a kind of pain, which is, or seems to be, augmented by the pulsations of arteries.

THROMBOSIS, *Thrombus*.

THROMBUS, *Thromb'osis*, *Trumbus*, *Hæmatoma*. A small, hard, round, bluish tumour; formed by an effusion of blood in the vicinity of a vein which has been opened in the operation of blood-letting. The thrombus is most commonly owing to the opening in the vein and that of the skin not corresponding; to excessive smallness of the cutaneous orifice; or to small, fatty granules, which prevent the discharge of the blood. Compresses, dipped in salt water; camphorated spirit, and slight compression usually disperse it.

THRUSH, *Aphthæ*.

THRYPSIS, *Comminution*.

THUREA, *Juniperus lycia*—t. *Virga*, *Juniperus lycia*.

THUS, see *Pinus abies*—t. *Fæmininum*, see *Pinus abies*—t. *Judæorum*, *Croton cascariilla*—t. *Judæorum*, *Styrax*—t. *Judæorum*, *Thymiama*—t. *Libanotos*, *Juniperus lycia*—t. *Masculum*, *Juniperus lycia*—t. *Verum*, *Juniperus lycia*—t. *Vulgare*, see *Pinus abies*.

THUYA APHYLLA. See *Sandarac*.

THUYA OCCIDENTA'LIS, *Arbor Vitæ*, *Tree of Life*. *Nat. Family*, *Conifera*. The leaves and wood were formerly in high repute as resolvents, sudorifics, and expectorants, and were given in phthisical affections, intermittent fevers, and dropsies. The expressed juice has been applied to condylo mata. The arrangement of the medullary matter of the cerebellum, termed *Arbor Vitæ*, is also called *Thuya*.

THYM, *Thymus*.

THYMALOS, *Taxus baccata*.

THYMBRA, *Satureia hortensis*—t. *Hispanica*, *Thymus mastichina*.

THYME, COMMON, *Thymus*—t. *Lemon*, see *Thyminum serpyllum*—t. *Mother of Thymus serpyllum*—t. *Wild*, *Thymus serpyllum*.

THYMELEÆA, *Daphne gnidium*.

THYMIAMA, *Muskwood*, *Thus Judæorum*, (F.) *Narcaphæ*. A bark from Syria, Cilicia, &c., supposed to be the product of the liquid storax tree. It has an agreeable, balsamic smell; approaching that of liquid storax.

THYMIAMA, *Fumigation*, *Suffimentum*.

THYMIATECH'NY, from *θυμιαμα*, 'an odour,' and *τεχνη*, 'art.' The art of employing perfumes in Medicine.

THYMION, *Verruca minor*, from *θυμος*, 'thyme.' A small wart on the skin, resembling the buds of thyme.

THYMIOSIS, *Frambæsia*.

THYMI'TES. Wine impregnated with thyme.

THYMOS, *Rage*.

THYMOXAL/MÈ, from *θυμος*, 'thyme,' *οξος*, 'acid,' and *αλς*, 'salt.' A compound of thyme, vinegar, and salt.

THYMUS, *Glandula Thymus*, *Corpus Thymid'mum* seu *Thymicum*, *Glandium*, *Thymus gland*. An organ, the uses of which are totally unknown, and which is seated in the upper separation of the anterior mediastinum. The thymus has the appearance of a glandular body. It is oblong; bilobate; soft, and very variable in size and colour. In the fœtus, it is very large, and contains a milky fluid: but it gradually disappears, and in old age is scarcely discernible.

The arteries, called *Thymicæ*, are from the inferior thyroid, internal mammary, bronchial, and mediastinal. The veins have the same arrangement. It receives some nervous filaments from the pneumogastric nerves, the phrenic, and from the inferior cervical ganglia.

THYMUS, *T. vulgaris*, *Common Thyme*, (F.) *Thym*, *T. Ordinaire*. *Family*, *Labiata*. *Sez. Syst.* *Didynamia Gymnospermia*. This herb has an agreeable, aromatic smell; and a warm, pungent taste. It is reputed to be resolvent, emmenagogue, tonic, and stomachic. It is not much used.

THYMUS, *Satureia capitata*—t. *Creticus*, *Satureia capitata*.

THYMUS MASTICHI'NA, *Common Herb Mastich*, *Marum vulgare*, *Samp'suchus*, *Clinopodia*, *Mastichi'na Gallo'rum*, *Thymbra Hispan'ica*, *Juca In'dica*. A low, shrubby, Spanish plant, used as an errhine. It has a smell like mastic. Its virtues resemble those of the *Ma'rum Syriacum*; but it is said to be less powerful.

THYMUS SERPYLL'UM, *Mother of Thyme*, *Wild Thyme*, *Herpylos*, *Herpyllus*, *Serpyll'um*, *Serpul'um*, *Serpil'um*, *Gild'um*, *Serpyll'um vulgare minus*, (F.) *Serpolot*. This plant has the same sensible properties as the garden thyme; but has a milder, and rather more grateful flavour. *Lemon Thyme*, the *Serpyllum citratum*, is merely a variety of the *Thymus Serpyll'um*. It is very pungent; and has a particularly grateful odour, approaching that of lemons.

THYMUS SYLVESTRIS, *Satureia capitata*.

THYRA, *θυρα*, 'a door,' *Thyreus*, *θυροος*, 'a

shield.' In composition, *Thyreo* and *Thyro*, mean the thyroid cartilage.

THYREMPHAXIS, Bronchocele.

THYREO-ARYTENOID, *Thyro-arytenoïdeus*, or *Thyro-arytenoïdes*. That which relates to the thyroid and arytenoid cartilages.

THE THYREO-ARYTENOID LIGAMENTS, *Inferior Ligaments of the Larynx*, *Lips of the Glottis*, *Vocal Cords*, are two ligaments about two lines broad, formed of elastic and parallel fibres, which are contained in a duplicature of the mucous membrane of the larynx. They extend horizontally from the anterior projection at the base of each arytenoid cartilage to the middle of the angle of union of the thyroid cartilage. They are the essential organs of voice. See Glottis.

THE THYREO-ARYTENOIDÆI MUSCLES are thin muscles, which arise from the middle and inferior part of the posterior surface of the thyroid cartilage: whence they proceed backwards and outwards, to be inserted into the outer part of the base of the arytenoid cartilage. They give the necessary tension to the ligaments of the glottis, in the production of the voice. Santorini has given the name *Thyr'co arytenoïdeus obliquus* to a portion of the *arytenoïdeus* muscle.

THYREO-EPIGLOTTIC, *Thyreo-epiglottideus*. Sabatier and Santorini have given this name to the outer portion of the thyro-arytenoid muscle; because it passes from the thyroid cartilage to the anterior part of the epiglottis.

THYREO-HYOID, *Thyro-hyoidæus*, *Thyro-hyoides*. That which belongs or relates to the thyroid cartilage and os hyoides.

THE THYREO-HYOIDÆUS or *Hyo-thyroidæus Muscle* is situate at the anterior and superior part of the neck. It is attached to the oblique line on the anterior surface of the thyroid cartilage; to the inferior edge of the body of the os hyoides; and to the anterior portion of its great cornu. It approximates the thyroid cartilage and os hyoides to each other, by raising the cartilage, and with it the whole larynx: or, it can depress the os hyoides.

THE THYREO-HYOID or HYO-THYROID MEMBRANE is a very broad, yellowish, fibrous membrane, thicker at the middle than at the extremities, which is attached, above, to the posterior surface of the body and great cornu of the os hyoides; and, below, to the whole superior edge of the thyroid cartilage.

THYREO-PHARYNGÆUS, *Thyro-pharyngæus*.

THYREOID, Thyroid.

THYREOIDEUS, Thyroideal.

THYREONCUS, Bronchocele.

THYREO-ARYTENOID, Thyreo-arytenoid—t. Crico-pharyngæus, see Crico-pharyngeal—t. Hyoides, Thyreo-hyoid.

THYRO-PHARYNGÆUS, *Thyreo-pharyngæus*, *Valsalva*, *Morgagni*, *Santorini*, and *Winslow* have given this name to the portion of the constrictor pharyngis inferior, which is attached to the thyroid cartilage.

THYRO-PHARYNGÆUS, Constrictor pharyngis—t. Pharyngæus, see Crico-pharyngeal—t. Pharyngo-staphylinus, Palato-pharyngæus.

THYROCELE, Bronchocele.

THYROID, *Thyreoid*, *Thyroïdes*, from *θυρεος*, 'a shield,' and *ειδος*, 'form.' That which has the shape of a shield.

THE THYROID CARTILAGE, *Cartilago Scutiformis*, *C. Scutal'is*, *C. Clypeal'is*, *Cœdoptorium*, *C. Pelta'lis*, *Adum' Morsus Os*, is the largest of the cartilages of the larynx, at the anterior part of which it is situate. It is larger transversely than vertically; broader above than below; and seems formed by the junction of the two quadrilateral plates, which produce, by their union, an angle that projects forwards. Its two posterior margins terminate above, and on each side, by an ensiform prolongation, called the *greater cornu of the thyroid cartilage*; and, below, by a less prominent eminence, the *lesser cornu*, which is articulated with the cricoid.

THE THYROID GLAND, *Corpus Thyroëdeum*, *Glandula Thyroëdea*, (F.) *Gland* ou *Corps Thyroïde*, is an organ, the uses of which are not known. It covers the anterior and inferior part of the larynx, as well as the first rings of the trachea, and seems to be composed of two lobes, flattened from before to behind, which are united by a transverse prolongation of the same nature as themselves, called the *Isthmus of the Thyroid Gland*.

The tissue of the thyroid is soft, spongy, and of a brownish colour; but its intimate structure is unknown. It is formed of several distinct lobules; collected in lobes of greater or less size. These are composed of granulations, some of which contain a yellowish or milky fluid. The thyroid gland receives four large arteries, called *Thyroideal*, as well as corresponding veins. Its nerves proceed from the pneumogastric, and from the cervical ganglia. No excretory duct has ever been found in it. Its uses are not known.

THYROIDEAL, *Thyroëdeus*, *Thyroïdeus*, (F.) *Thyroïdien*. That which concerns the thyroid gland or cartilage.

THE THYROIDEAL ARTERIES are two on each side.

1. The *superior Thyroideal*, *superior laryngeal* or *superior guttural*, arises from the anterior part of the external carotid, and proceeds to the upper part of the thyroid gland, after having given off a *laryngeal branch* and a *crico-thyroid*.

2. The *inferior Thyroideal*, or *inferior guttural*, much larger than the last, arises from the upper part of the subclavian. It passes, in a serpentine manner, to the inferior part of the thyroid gland, to which it is distributed, after having given a number of branches to the neighbouring parts, among which is the *cervicalis ascendens*.

THE THYROIDEAL VEINS are, 1. A *superior thyroideal*, and several *middle thyroideal*, which open into the internal jugular vein. 2. An *inferior thyroideal*, much larger than the preceding, whose branches form—by anastomosing with those of the opposite side, in front of the trachea—a very remarkable venous plexus, which J. Cloquet calls the *infra-thyroideal plexus*. The inferior thyroideal veins open,—the left, into the corresponding subclavian;—the right, into the vena cava superior.

THYROIDIEN, Thyroideal.

THYROPHRAXIA, Bronchocele.

TIBI-PERONÆO-TARSIEN, *Peronæus longus*.

TIBIA MINIMA, Fibula.

**TIBIA**, *Cnemē, Procnemē*. A Latin word, which signifies a *flute*. *Focilē majus, Arundo major, Canna major, Canna major seu domestica cruris*. The largest bone of the leg. A long, irregular, and triangular bone, situate on the inner side of the fibula. It has, 1. A *Superior or femoral extremity*, which is very large, rounded, and has two eminences at the sides, called *Tuberosities of the Tibia*, or *Tibial tuberosities*. The outermost is articulated with the fibula. On its head are two articular, oval, concave surfaces, separated by a process, called *Spine of the tibia*, which are articulated with the condyles of the *Os femoris*. 2. An *inferior or tarsal extremity*, having an articular surface beneath, which joins the astragalus; within, a triangular eminence, which forms the malleolus internus; and, on the outside, a triangular surface, which articulates with the fibula. 3. The body or shaft of the tibia has three faces, separated by three angles, the anterior of which is the most prominent, and is called the *spine* or *crista of the tibia* or *tibial spine*. It is the *shin*. The tibia is articulated with the femur, fibula, and astragalus. It is developed by three points of ossification, one for the body, and one for each extremity.

**TIBIÆUS**, Tibial.

**TIBIAL**, *Tibialis, Tibia'ns*. (F.) *Tibial, Jambier*. That which relates to the tibia or to the leg.

The **TIBIAL APONEUROSIS**, (F.) *Aponevrose jambière*, surrounds the muscles of the leg. It is continuous, above, with the femoral aponeurosis, and arises, also, from the head of the fibula, and from several fibrous expansions which detach themselves from the tendons of the triceps, sartorius, gracilis, and semitendinosus. Thence it descends around the leg, attaching itself to the whole extent of the anterior and inner edges of the tibia. It sends, below, an expansion, which passes before the tendo Achillis, and is continuous with the anterior annular ligament of the tarsus. It is attached, also, to the sheath of the peronei muscles.

**TIBIALIS ANTI'CUS**, *Catenæ musculus, Tibio-sus-métatarsien, Tibio-sustarsien*, (Ch.) (F.) *Jambier antérieur*. A muscle, situate at the anterior part of the leg. Above, it has the shape of a triangular prism; below, it is slender and tendinous. It is attached, above, to the anterior part of the external tuberosity of the tibia; to the superior half of the outer surface of that bone; and to the anterior surface of the interosseous ligament. Below, its tendon terminates at the base of the first cuneiform bone, and at the posterior extremity of the first metatarsal bone. This muscle bends the foot on the leg, and directs its point inwards, at the same time that it raises its inner edge. It can, also, bend the leg on the foot, and prevent it from falling backwards in standing.

**TIBIALIS GRACILIS**, Plantar muscle.

**TIBIALIS POSTI'CUS**, *Tibio-tarsien, Tibio-sus-tarsien*, (Ch.) (F.) *Jambier postérieur*. This muscle is situate at the posterior and deep part of the leg. It is thicker above than below; and is attached, above, to the posterior surface of the fibula; and to the posterior surface of the tibia, and to the interosseous ligament. Its tendon ter-

minates, below, at the tuberosity on the inferior extremity of the os scaphoides. This muscle extends the foot on the leg; at the same time raising its inner edge. It, likewise, extends the leg on the foot.

The **TIBIAL ARTERIES** are two in number.

1. The *Tibialis Anti'ca*, which arises from the popliteal artery, before its bifurcation; passes immediately through the opening in the upper part of the interosseous ligament, and reaches the anterior part of the leg; when it turns downwards, and descends, obliquely, between the extensor communis digitorum pedis and the tibialis anticus, anterior to the interosseous ligament; glides under the anterior annular ligament of the tarsus, and takes the name *Dorsalis tarsi*.

Amongst the numerous branches, given off by the tibialis antica, may be distinguished—the *Tibialis recurvens, A. malleolaris interna*, and *A. malleolaris externa*. 2. The *Tibialis post'ca*, arises from the bifurcation of the popliteal artery; and, slightly tortuous, descends between the two planes of the posterior muscles of the leg; until it arrives under the arch of the calcaneum, where it divides into two branches—the *Plantar arteries*.

The **ANTERIOR AND POSTERIOR TIBIAL VEINS** have the same arrangement as the arteries which they accompany.

The **TIBIAL NERVES** are two in number.

1. The *anterior tibial nerve, Prétibio-susplantaire*, (Ch.) One of the two branches in which the external popliteal terminates. It accompanies the arteria tibialis antica. 2. The *posterior tibial nerve, Branche tibiale du nerf fémoro-poplitée*, (Ch.) is the *internal popliteal*, (q. v.)

**TIBIO-CALCANIEN**, Soleus—*t. Phalangettien, Flexor longus digitorum pedis profundus perforans—t. Sous-tarsien, Tibialis posticus—t. Sus-métatarsien, Tibialis anticus—t. Sustarsien, Tibialis anticus*.

**TIBIO-TARSA L**, *Tibio-tarscus*, (F.) *Tibio-tarsienne*. What relates to the tibia and tarsus.

The **TIBIO-TARSAL ARTICULATION** is the articulation of the foot with the leg. It is formed by the tibia and the astragalus; and is strengthened by lateral, and by anterior, and posterior ligaments.

**TIBIO-TARSIEN**, Tibialis posticus.

**TIC**, *Twitching*. A local and habitual convulsive motion of certain muscles; and, especially, of some of those of the face. It is, sometimes, called in France *Tic convulsif*, to distinguish it from *Tic douloureux* or *neuralgia faciei*, (q. v.)

**TIC DOULEUREUX**, Neuralgia, facial.

**TICKLE WEED**, *Veratrum viride*.

**TICKLING**, (F.) *Chatouillement*. This word, sometimes, means the action of tickling (*titilla'tio*;) at others, the sensation produced by this action (*prur'itus*.) A vivid sensation, which commonly causes laughter, and a state of general spasm that may be dangerous if too long protracted.

There are some parts of the body, where we are easier tickled than others; e. g. the soles of the feet, and the hypochondriac regions.

**TIGE PITUITAIRE**, Infundibulum of the

brain—*t. Sus-sphénoidale*, Infundibulum of the brain.

TIGILLUM, Crucible.

TIGULA, Saccharum.

TIKIMMA, *Cacoucia coccinea*.

TILBURY, MINERAL WATERS OF.

A saline chalybeate at West Tilbury in Essex, England. It is not much frequented.

TILIA, *T. Europæa*, *Phillyra*. The Lime tree or Linden tree, (F.) Tilleul. Family, Tiliacæ. The flowers have been supposed to possess anodyne and antispasmodic virtues.

TILLEUL, Tilia.

TILMOS, Evulsion.

TILMUS, Carphologia.

TIMAC. The name of an East India root, but of what vegetable is not clear. It is said to possess diuretic properties; and hence has been given in dropsies.

TIMIDUS, Rectus inferior oculi.

TIN, (D.) *Tenn.* *Stannum*, *Cussit'eros*, *Cattit'eros*, *Stangos*, *Ju'piter*, *Stu'pia*, *Laos*, *Plumbum album*, *Plumbum can'didum*, (F.) *Étain*. A solid metal; of a peculiar odour when rubbed; insipid; colour, whitish; S. G. 7.291; giving a peculiar tinkling sound when struck. It is used, in medicine, only as a mechanical anthelmintic. Dose,  $\mathfrak{z}$  of the *Fulvis stanni* or *Granular tin*, in molasses.

TIN, BUTTER OF, Tin, muriate of—*t. Chloruret* of Tin, Muriate of—*t. Deutohydrochlorate* of Tin, Muriate of

TIN-FOIL, *Stannum foliatum*, *Stanniolum*, is used for plugging carious teeth, &c.

TIN-GLASS, Bismuth.

TIN, GRANULAR, see Tin—*t. Muriate* of, superoxygenated, *T. muriate* of.

TIN, MURIATE OF, Butter of Tin, *Fuming liquor* of *Libavrus*. *Murias Stanni*, *Murias Oxiduli Stanni*. *Chloruret* of Tin, *Deutro-hydrochlorate* of Tin, *Superoxygenated Muriate* of Tin. This is formed of Tin, one part; concentrated muriatic acid, three parts. To be crystallized by the aid of heat. A violent cathartic. Dose, gr. ij or iij.

TIN, SULPHURET OF, Aurum musivum.

TINASMUS, Tenesmus.

TINCTURA, from *Tingo*, 'I dye.' *Tincture*, *Essent'io*, (F) *Tincture*, *Alcoolat*, *Alcool*. The term tincture is generally restricted to spirituous solutions of vegetable, animal, and some saline substances. It corresponds, therefore, with the word *Quintessence*, in one of its old significations; and with the *Alcoholatum* of the *Codex* of Paris. It is not unusual, however, to speak of *aqueous tincture*, *etheral tincture*, &c. Tinctures are made, either with pure alcohol or proof spirit. The former are precipitated by water; and, therefore, are seldom used internally; the latter are common additions to infusions, decoctions, &c. They ought not, of course, to be united with any vehicle which can decompose them or separate any thing from them in a palpable form; unless such decomposition is desired by the prescriber.

In making tinctures, the ingredients should be reduced to a coarse powder; and the maceration be made in close vessels, exposed to a heat of about 80°, and frequently shaken. When completed, they must be filtered, and put away for use in close bottles.

TINCTURA ABSINTHII COMPOSITA, *Compound Tincture* of wormwood, *Essent'ia absinthii composita* seu *amad'ra*. (*Absinth*, *artem. pontic.*, *caryoph.*  $\mathfrak{aa}$   $\mathfrak{z}$ ss, *such.*  $\mathfrak{z}$ ij, *alcohol* lss. Macerate for fifteen days. *Ph. P.*) Tonic, stomachic, vermifuge, and carminative. Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ss.

TINCTURA ACACIÆ CATECHU, *T. catechu*—*t. Acetatis ferri* cum *alcohole*, see *T. ferri acetatis*—*t. Acidi sulphurici*, *Sulphuricum acidum aromaticum*.

TINCTURA ÆTHEREÆ CAMPHORATÆ, *Solutio camphoræ æthereæ*, *Liquor nerinus Bangii*, *Spiritus sulphurico-æthereus camphoratus*, *Nuphtha vitrioli camphordta*. (*Camphor.* p. i. *Æther. sulphuric.* p. ii.) Stimulant in atonic diseases, arthritic cardialgia and spasms. Dose, 20 to 30 drops in white wine.

TINCTURA ÆTHEREÆ FERRI, *Alcohol* (seu *Tinctura*) *sulphurico-æthereus ferri*—*t. Alcoholica Chinæ composita*, *T. cinchonæ composita*—*t. Alcoholica corticum aurantium Whyttii*, *Tinctura cinchonæ amara*—*t. Alexipharmaca Huxhami*, *Tinctura cinchonæ composita*.

TINCTURA AL'OE'S, *T. Aloes Socotori'na*, *Essent'ia Aloes*, *Alcohol cum Aloe perfoliatâ*, *Tincture of Aloes*. (*Aloes, socotr. cont.*  $\mathfrak{z}$ ss, *ext. glycyrrh.*  $\mathfrak{z}$ iss, *aqua* lbj, *sp. rect.*  $\mathfrak{z}$ iv. Macerate. *Ph. L.*) Properties, those of aloes. Dose,  $\mathfrak{z}$ ss to  $\mathfrak{z}$ iss.

TINCTURA AL'OE'S ÆTHEREÆ, *Æthereal Tincture of Aloes*, *Tinctura aloes vitriolatâ*. (*Aloes. socot.*, *g. myrrh.*  $\mathfrak{aa}$   $\mathfrak{z}$ iss, *croci*  $\mathfrak{z}$ ij, *sp. ætheris sulph.* lbj. Digest the myrrh in the ether for four days; then add the aloes and saffron. *Ph. E.*) Stimulant and cathartic. Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ij.

TINCTURA AL'OE'S COMPOSITA, *Eliz'ir Proprietatis*, *E. aperitivum*, *Eliz'ir Aloes*, *Tinctura Aloes cum Myrrhâ*, *T. Aloes et Myrrhæ crocatâ*, *Eliz'ir of long life*, *Compound Tincture of Aloes*. (F.) *Eliz'ir de longue vie*, *Baume de vie de Lelière*. (*Ext. aloes spicat.*, *croci*  $\mathfrak{aa}$   $\mathfrak{z}$ ij, *Tinct. Myrrhæ*, lbj. *Ph. L. & D.*) Purgative and stomachic. Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ij.

*Radcliffe's Eliz'ir* is formed of *Aloes socotr.*  $\mathfrak{z}$ vj, *cort. einnum*, *rad. zedoor*,  $\mathfrak{aa}$   $\mathfrak{z}$ ss, *rad. rhei*  $\mathfrak{z}$ ij, *coccinell.*  $\mathfrak{z}$ ss, *syryp. rhummi*  $\mathfrak{z}$ ij, *sp. tenuior*, lbj, *aqua pure*  $\mathfrak{z}$ v.

TINCTURA AL'OE'S ET MYRRHÆ CROCATÆ, *T. A. composita*—*t. Aloes vitriolata*, *T. A. ætherea*—*t. Anari*, *T. gentianæ composita*—*t. Amomi repentis*, *T. Cardamomi*—*t. Amomi zingiberis*, *T. zingiberis*.

TINCTURA ANGSTURÆ, *Tincture of Angustura*. (*Cort. cuspar. in pulv. crass. redact.*  $\mathfrak{z}$ ij, *sp. vin. ten.* lbj. Digest. *Ph. D.*) Dose,  $\mathfrak{z}$ ij to  $\mathfrak{z}$ ij.

TINCTURA ARISTOLOCHIÆ SERPENTARIÆ, *T. serpentariæ*—*t. Aromatica*, *T. cinnamomi composita*—*t. Aromatica ammoniata*, *Spiritus ammoniæ aromaticus*.

TINCTURA ASAFÆTIDÆ, *T. Ferulæ Asafætida*, *Tincture of Asafætida*, *T. fatida*, *T. asafætida*, (*Asafætid.*  $\mathfrak{z}$ iv, *sp. rect.* lbj. Digest.) Dose, gr. xv to  $\mathfrak{z}$ ij.

TINCTURA ASAFÆTIDÆ AMMONIATA, *Spiritus ammoniæ fœtidus*.

TINCTURA AURANTII, *T. Corticis Aurantii*, *Tincture of Orange Peel*. (*Aurant. cort. recent.*  $\mathfrak{z}$ ij, *sp. rect.* lbj. Digest for 14 days.) Stomachic. Used as an adjunct to stomachic draughts. Dose,  $\mathfrak{z}$ ss to  $\mathfrak{z}$ ij.

TINCTURA AUREA, Alcohol seu tinctura sulphurico-æthereus ferri.

TINCTURA BENZOÏNI COMPOSITA, Compound Tincture of Benzoin, *T. Benzoes composita*, *Friar's Balsam*, *Vervain's Balsam*, *Wade's Drops*, *Jesuit's draps*, the *Commander's Balsam*, *Wound Balsam*, *Balsam for cuts*, *Balsamum Catholicum*, *B. Perisicam*, *Balsamum traumaticum*, *Elizir traumaticum*. (*Benzoin*. ℥ij, *styrac. balsam*. ℥ij, *tolut*. ℥j, *aloes spic. extract*. ℥ss, *sp. rect*. lbj. Macerate for 14 days. *Ph. L.*) Stimulant. Used chiefly to wounds and ulcers.

The basis of TURLINGTON'S BALSAM OF LIFE, is the Compound Tincture of Benzoin. The following form is recommended by a committee of the Philadelphia College of Pharmacy:— (*Alcohol*. Oviiij, *Benzoin*. ℥xij, *Styrac. liquid*. ℥iv, *aloes socotrin*. ℥j, *Balsam Peruvian*. ℥ij, *Myrrha*. ℥j, *Rad. Angelic*. ℥ss, *Balsam Tolut*, *Ext. Glycyrrh*. āā ℥iv. Digest for ten days, and strain.)

The ESSENCE OF COLTSFOOT consists of equal parts of the *Compound Tincture of Benzoin* and *Balsam of Tolu*, to which is added double the quantity of *Rectified Spirit of Wine*. It is sold as a pectoral.

TINCTURA CALUMBÆ, *T. Colomba*, *T. Colombo*, *Tincture of Columba*, *Columbo Bitters*. (*Calumb. rad. concis*. ℥iiss, *sp. ten*. lbj. Macerate for 14 days. *Ph. L.*) Dose, ℥ss to ℥iv.

TINCTURA CAMPHORÆ, Spiritus camphoræ.

TINCTURA CAMPHORÆ COMPOSITA, *T. Opii Camphorata*, *Compound Tincture of Camphor*, *Elizir Paregoricum*, *Paregoric Elizir*. (*Camphor*. ℥ij, *opii duri cont.*, *acid. benz.* āā ℥j, *spirit ten*. lbj. *Ph. L.*) f. ℥j contains nearly gr. ij of opium. Anodyne. Dose, ℥j to ℥ij.

*Squire's Elizir*, an empirical carminative preparation, is thus made, according to one formula. (*Opii* ℥iv, *camphor*. ℥j, *coccolith*. ℥j, *fenicul. dulc*. ℥ij, *tinct. serpent*. lbj, *sp. unisi*, *cong. ij*, *aqua lbj*, *uri musivi* ℥vj.)

TINCTURA CANTHARIDIS, *T. C. Vesicatoria*, *T. Lytta*, *Tincture of Blistering Fly*, *T. of Spanish Fly*, *T. Meles vesicatorii*. (*F.*) *Tinture rubéfiante*. (*Cantharid. cont*. ℥iij, *sp. ten*. lbj. *Ph. L.*) Stimulant and diuretic, but not often used internally. Externally, stimulant. Dose, grt. x.

*Matthew's Injection*, a once celebrated nostrum for fistula in ano, consisted wholly of a dilute *Tincture of Cantharides*.

TINCTURA CAPSICI, *Tincture of Capsicum*, (*Capsic. bacc*. ℥j, *sp. ten*. lbj. *Ph. L.*) Stimulant. Dose, ℥ss to ℥j.

TINCTURA CARDAMOMI, *T. amomi repentis*, *Tincture of Cardamoms*. (*Cardam. sem. cont*. ℥iij, *spirit ten*. lbj. *Ph. L. D.*) Use, the same as the seeds. Dose, ℥j to ℥iv.

*Solomon's Balm of Gilead*, an empirical preparation, seems to be an aromatic tincture,—of which *Cardamoms* form a leading ingredient,—made with brandy. Some affirm that it contains *cantharides*.

TINCTURA CARDAMOMI COMPOSITA, *Compound Tincture of Cardamoms*, *Stomach Tincture*, *Tinctura Stomachica*. (*Card. sem.*, *carui sem.*, *cocci*, āā ℥ij, *cinnam. cort. cont*. ℥iv, *ur. ar. pass. demp. tis acinis* ℥iv, *spirit ten*. lbj. *Ph. L.*) Stomachic and carminative. Dose, ℥j to ℥iv.

TINCTURA CARMINATIVA SYLVII, *Alcool'd tum*

*Carminativum Sylvii*, *Carminative Elizir of Sylvius*. (*Rad. angelic*. 4 p., *rad. imperator*., *galang.* āā 6 p., *fol. rosmarin.*, *majoran.*, *ruta*, *basilic.* āā 48 p., *baccar. laur. nobil*, 12 p., *sem. angelic.*, *ligust. levist.*, *anis.* āā, 16 p., *zingib.*, *nuc. moschat.* āā, 6 p., *cinnam.* 12 p., *caryaph.*, *cort. limon.* āā, 4 p. Add alcohol, 1500 p. Macerate and distil 1000 p. *Ph. P.*) A warm stomachic, carminative, &c. Dose, ℥ss to ℥ss.

TINCTURA CASCARILLÆ, *T. Crotonis Eleutheriæ*, *Alcohol cum Crotono Cascarilla*, *Tincture of Cascarilla*. (*Cascarill. cort. cont*. ℥iv, *sp. ten*. lbj. *Ph. L.*) Dose, ℥j to ℥iv.

TINCTURA CASTOREI, *T. Castorei Rossici*, *Essentia Castorei*, *Alcohol castorid'tum*, *T. Castorei Canadensis*, *Tincture of Castor*. (*Castor. cont*. ℥ij, *sp. rect*. lbj. Macerate for 7 days.) Tonic and antispasmodic. Dose, grt. xx to ℥ij, or more.

TINCTURA CASTOREI COMPOSITA, *Compound Tincture of Castor*. (*Cast. ℥j*, *g. asafatid.* ℥ss, *alcohol ammoniat.* lbj. *Ph. E.*) Antispasmodic. Dose, ℥j to ℥iv. Called, also, *Elizir fatidum*, *Tinctura castorei fatida* seu *fatida ammoniata*.

TINCTURA CAT'EHU, *Tinctura Japonica*, *T. Mimosa Catechu*, *T. Aca'cie Catechu*, *Tincture of Catechu*. (*Catech. Extract* ℥iij, *cinnam. cort.* contus ℥ij, *sp. ten*. lbj. *Ph. L.*) Astringent. Dose, ℥j to ℥ij.

The CONCENTRATED SOLUTION OF CHARCOAL, sold for cleaning the teeth, seems to be little more than the tincture of catechu.

TINCTURA CICTULÆ, *T. conii maculati*.

TINCTURA CINCHONÆ, *Tincture of Cinchona*, *T. Corticis Peruvia'ni Simplex*, *T. Cort. Peruviana*, *Tincture of Bark*. (*Cinchon. lancifol. cort.* cont. ℥vij, *sp. ten*. lbj. *Ph. L. E. D.*) Dose, ℥j to ℥iv or more.

TINCTURA CINCHONÆ AMARA, *Elizir antihypochondriacum*, *E. rob'orans Whyttii*, *E. Whyttii*, *Essentia Corticis Peruvia'ni Composita*, *Tinctura alcoholica corticam anantiorum Whyttii*, *T. Kinkina amara*, *Elizir stomachicus spirituosus*. (*Cinch. p. viij*, *Gentian. Rad. Cort. Aurant.* 3 p. *Alcohol* (900) 96 p. *Digest.*) Dose, one or two teaspoonfuls.

TINCTURA CINCHONÆ AMMONIATA, *T. Corticis Peruvia'ni volutilis*, *Ammoniated Tincture of Bark*, *Volatile Tincture of Bark*. (*Cinchon. lancifol. cort. cont*. ℥iv, *sp. ammon. aromat.* lbj. *Ph. L.*) In dyspepsy, combined with acidity and languor.

TINCTURA CINCHONÆ ÆTHEREA COMPOSITA, *T. Kinæ Kinæ atherea composita*, *Elizirium Antisepticum Doct'oris Chaussier*, *Chaussier's Antiseptic Elizir*. (*Cinchon. officin.* ℥ij, *cascarill.* ℥ss, *cinnam.* ℥ij, *croci* ℥ss, *sacch.* alb. ℥xxxvij.) Put these bruised into a mattress, and add *vin. alb. Hispanic.* vel *vin. muscat.*, *alcohol.* āā lbj. Macerate for two days, and add *sulphuric ether* ℥iss. *Ph. P.*) Tonic, stimulant, and antiseptic. Dose, ℥ss to ℥j.

TINCTURA CINCHONÆ COMPOSITA, *Compound Tincture of Cinchona or Bark*, *Huxham's Tincture of Bark*, *T. Corticis Peruvia'ni Composita*, *T. febrifuga Doct'oris Huxhami*, *Essentia Chinae*, *E. Corticis Peruvia'ni Alexipharmaca Huxhami*, *Essentia antisepticu Huxhami*, *Tinctura Alexipharmaca Huxhami*, *Tinctura Alcoholica Chinae Composita*. (*Cinchon. lancif. cort.*

cont.  $\zeta$ ij, *aurant. cort. exsicc.*  $\zeta$ iss, *rad. serpent.* cont.  $\zeta$ ij, *croci stigmat.*  $\zeta$ ij, *cocci cont.*  $\mathfrak{D}$ ij, *sp. tenuior.*  $\zeta$ xx. *Ph. L.*) More grateful than the simple tincture. Dose,  $\zeta$ j to  $\zeta$ ij.

TINCTURA CINNAMOMI, *Tincture of Cinnamon.* *Essentia Cinnamomi, T. Lauri Cinnamomi.* (*Cinnam. cort. cont.*  $\zeta$ ij, *sp. tenuior.*  $\mathfrak{B}$ ij. *Ph. L. D.*) Stomachic. Dose,  $\zeta$ j to  $\zeta$ ij.

TINCTURA CINNAMOMI COMPOSITA, *Compound Tincture of Cinnamon, Tinctura Aromatica, Essentia Aromatica, Alcohol cum Aromatibus Compositus, Eau de Bonferme ou d'Armagnac.* (*Cinnam. cort. cont.*  $\zeta$ vj, *cardam. sem. cont.*  $\zeta$ ij, *peper. long. fruct. cont.*  $\zeta$ ij, *zingib. rad. cont.*  $\mathfrak{a}$   $\zeta$ ij, *sp. tenuior.*  $\mathfrak{B}$ ij. *Ph. L.*) Use, same as the last. Dose,  $\zeta$ j to  $\zeta$ ij.

TINCTURA DE COCHLEARIS, *Alcoholatum de Cochlearis, a. radiscorbaticum.* (*Fol. cochlear. recent.* 2500 p., *rad. armoraciae,* 230 p., *alcohol.* (22° to 32° Be.) 3000 p., *distil off* 2000 p. *Ph. P.*) Antiscorbatic. Dose,  $\zeta$ j to  $\zeta$ ij.

TINCTURA COLCHICI, *Vinum colchici*—t. *Colombæ, T. Calumbæ.*

TINCTURA CONII MACULATI, *T. Cicuta, Tincture of Hemlock.* (*Conii fol. sicc.*  $\zeta$ ij, *cardamom. sem. cont.*  $\zeta$ iv, *sp. ten.*  $\zeta$ xv. *Ph. E.*) Use;—the same as that of the leaves.

TINCTURA CONVULVULI JALAPÆ, *T. jalapii*—t. *Corticis aurantii, T. aurantii*—t. *Corticis Peruviani composita, T. cinchonæ comp.*—t. *Corticis Peruviani simplex, T. cinchonæ*—t. *Corticis Peruviani volatilis, T. cinchonæ ammoniata.*

TINCTURA CROCI SATIÏVA, *T. Croci, Tincture of Saffron.* (*Croci Angl. cont.*  $\zeta$ j, *alcohol. dilut.*  $\zeta$ xv. *Ph. E.*) Slightly stomachic (?) Dose,  $\zeta$ j to  $\zeta$ ij.

TINCTURA DE CROCO COMPOSITA, *Elixirium de Garus, Alcoholatum de Croco Compositum, Compound Tincture of Saffron, Elixir of Garus.* (*Aloes socotr.* 320 p., *myrrh.* 64 p., *croci* 32 p., *cinnam.* nuc. moschat., *caryoph.*  $\mathfrak{a}$  16 p., *alcohol.* 1000 p., *aq. flor. aurant.* 5000 p. Digest for two days; distil 4000 p. and add *syrup of capillaire,* 5000 p. *Ph. P.*) Aromatic, cordial, stomachic. It is, also, called *Elixir cordiale et stomachicum,* and *E. anticolicum crocatum.*

TINCTURA CROTONIS ELEUTHERIÆ, *T. cascariillæ.*

TINCTURA DIGITALIS, *Tincture of Digitalis, T. Digitalis purpurea.* (*Digital. fol. exsicc.*  $\zeta$ iv, *spirit. ten.*  $\mathfrak{B}$ ij. *Ph. L. D.*) Use, same as that of the leaves. Dose,  $\mathfrak{g}$ tt. x.

TINCTURA FEBRIFUGA DOCTORIS HUXHAMI, *T. cinchonæ composita.*

TINCTURA FERRI ACETATIS, *Tincture of Acetate of Iron.* (*Kali acetat.*  $\zeta$ ij, *sulph. ferri*  $\zeta$ j, *sp. rectific.*  $\mathfrak{B}$ ij. Rub the acetate and sulphate into a soft mass. Dry and rub with the spirit. Digest for 7 days, and pour off. *Ph. D.*) Tonic and astringent. Dose,  $\mathfrak{g}$ tt. xx. to  $\zeta$ j. The Dublin college directs a *Tinctura Acetatis Ferricum Alcoholæ,* which differs from the other, in having half the quantity, only, of the *Acetate of Potass.*

TINCTURA FERRI AMMONIATA, *Tincture of Ammoniated Iron, T. Ferri Ammoniatis, T. Florum martialis, T. Martis Mynsichti.* (*Ferri ammon.*  $\zeta$ iv, *sp. ten.*  $\mathfrak{B}$ ij. *Ph. L.*) Use—same as that of the ammoniated iron. Dose,  $\zeta$ ss to  $\zeta$ ij.

TINCTURA FERRI MURIATIS, *Tincture of Muriate of Iron, T. Martis in Spiritu Salis, T. M.*

*cum Spiritu Salis, T. Ferri Muriati, Tincture of Steel, Alcohol ferratus.* (*Ferri subcarb. liqss, acid muriat. liq, sp. rectific.*  $\mathfrak{B}$ ij. Add the acid to the subcarbonate in a glass vessel, and shake during three days. Pour off and add the spirit. *Ph. L.*) Tonic and styptic. Dose,  $\mathfrak{g}$ tt. x to xx.

A solution of *nitrate of iron* has been recently recommended in chronic diarrhœa and dysentery. Its virtues exactly resemble those of the muriate of iron.

The *Antivenereal Drops,* at one time so celebrated at Amsterdam, were examined by Scheele and found to be a tincture of muriate of iron and corrosive sublimate.

TINCTURA FERULÆ ASAFÆTIDÆ, *T. asafœtidæ*—t. *Fœtida martialium, T. ferri ammoniata*—t. *Fœtida,* *T. asafœtidæ*—t. *Fœtida ammoniata, T. castorei composita*—t. *Fulgiginis,* see *Fuligo.*

TINCTURA GALBANI, *Tincture of Galbanum.* (*Galb.  $\zeta$ ij, sp. tenuior.*  $\mathfrak{B}$ ij. *Ph. D.*) Stimulant and antispasmodic. Dose,  $\zeta$ j to  $\zeta$ ij.

TINCTURA GALLARUM, *Tincture of galls.* (*Gallar. in pulv. trit.*  $\zeta$ ij, *sp. ten.*  $\zeta$ vj. *Ph. E. & D.*) Astringent. Dose,  $\zeta$ j to  $\zeta$ ij.

TINCTURA GENTIANÆ COMPOSITA, *Compound Tincture of Gentian, Tinct. Amara, Spirit Bitters, Elixir Stomachicum.* (*Rad. gent. concis.*  $\zeta$ ij, *aurant. cort. exsicc.*  $\zeta$ j, *cardam. sem. cont.*  $\zeta$ ss, *spirit tenuior.*  $\mathfrak{B}$ ij. *Ph. L. E. & D.*) Tonic and stomachic. Dose,  $\zeta$ j to  $\zeta$ ij.

BRODUM NERVOUS CORDIAL consists of the *Tinctures of Gentian, Columba, Cardamom, and Bark,* with the *Compound Spirit of Lavender, and Wine of Iron.*

STROUGHTON'S ELIXIR is a compound tincture of gentian. The *Elixirium Docto'ris Stoughton* seu *Tinctura Amara* of the Parisian Codex is prepared as follows:—*Absinth. summit. exsicc.* *Teucri chamædrys,* *Rad. gentian., cort. aurant.*  $\mathfrak{a}$   $\zeta$ vj, *cascarilla*  $\zeta$ j, *rhei*  $\zeta$ ss, *aloes socotr.*  $\zeta$ j, *alcohol.*  $\mathfrak{B}$ ij. Digest.

TINCTURA GENTIANÆ, *Tincture of Gentiane.* (*Alcohol* (903)  $\zeta$ j, *gentianin.,* 5 gr.) Properties like those of the tincture of gentian.

TINCTURA GUAÏACI, *T. G. Officinæ, Tincture of Guaiacum.* (*Guaiac. res. liqss, sp. rect.*  $\mathfrak{B}$ ij. *Ph. L. & D.*) Stimulant and sudorific. Used especially in rheumatic and arthritic cases. Nearly the same as *Hill's Essence of Bardana.*

TINCTURA GUAÏACI AMMONIATA, *Ammoniated Tincture of Guaiacum, T. Guaiaci'na Volatilis, Elixir Guaiaci Volatilis, Alcohol cum Guaiaco officinali ammoniatum, Alcohol ammoniatum et Guaiaci, T. Guaiaci, P. L. 1788, Volatile Tincture of Guaiacum.* (*Guaiac. g. res. cont.*  $\zeta$ iv, *sp. ammon. arom. liqss.* *Ph. L. E. D.*) Properties same as the last. Dose,  $\zeta$ j to  $\zeta$ ij.

HATFIELD'S TINCTURE—a nostrum—consists of *Guaiacum and Soap*  $\mathfrak{a}$   $\zeta$ ij, *rectified spirit,*  $\mathfrak{B}$ iss.

TINCTURA HELLEBORI NIGRI, *Tincture of Black Hellebore, T. Hellebori, T. Melampodii.* (*Rad. helleb. nigr. concis.*  $\zeta$ iv, *sp. tenuior.*  $\mathfrak{B}$ ij, *Ph. L. E. D.*) Dose,  $\zeta$ ss to  $\zeta$ j.

TINCTURA HIERA, *Vinum aloes.*

TINCTURA HUMULI, *Tincture of Hops.* (*Humuli strobil.*  $\zeta$ v, *sp. tenuior.*  $\mathfrak{B}$ ij. *Ph. L.*) Tonic and sedative. Dose,  $\zeta$ ss to  $\zeta$ ij.

TINCTURA HYOSCYAMI, *T. Hyoscyami nigri, Tincture of Henbane.* (*Hyoscyam. fol. exsicc.*  $\zeta$ iv, *sp. ten.*  $\mathfrak{B}$ ij. *Ph. L.*) Narcotic, anodyne. Dose,  $\mathfrak{g}$ tt. xx to  $\zeta$ ij.

TINCTURA IODINÆ, *Alcohol Iodii, Tincture of Iodine.* (Alcohol. S. G. 842,  $\frac{3}{4}$  j, iodin., 48. gr.) The tincture spoils by keeping, or at least, deposits the iodine. It has been much used in goitre, &c. Dose, ten drops, three times a day.

TINCTURA JALAPINII, *T. Jalapæ, T. Convolvuli Jalapæ, Tincture of Jalap, Vol'ga.* (Jalap. rad. cont.  $\frac{3}{4}$  viij, sp. ten. lbij. Ph. L. & D.) Cathartic. Dose,  $\frac{3}{4}$  j to  $\frac{3}{4}$  iv.

TINCTURA JALAPINII COMPOSITA, *Elisir Jalap-pæ Compos'itum, Elisir purgans, Essentia catholica purgans Rothii, Elisir anthelminthicum Suecorum, Eau de vie Allmande, (Jalap. lbss, Scammon  $\frac{3}{4}$  j, Alcohol, (22°,) lbvj.* Macerate for eight days. Ph. P.) Dose, 60 to 100 drops.

TINCTURA JAPONICA, *T. catechu*—t. Kinæ kinæ ætherea composita—t. cinchonæ ætherea composita—t. Kinkinæ amara, T. cinchonæ amara.

TINCTURA KINO, *Tincture of Kino.* (Kino contrit.  $\frac{3}{4}$  ij, sp. ten. lbij. Ph. L. E. & D.) Astringent.) Dose,  $\frac{3}{4}$  j to  $\frac{3}{4}$  ij.

TINCTURA LAURI CINNAMOMI, *T. cinnamomi*—t. Lavandulæ composita, Spiritus lavand. comp.—t. Lyttæ, T. cantharidis—t. Martis Glauberi, see Ferrum tartarizatum—t. Martis in spiritu salis, Tinctura ferri Muriatii—t. Martis Mynsichtii, T. ferri ammoniata—t. Martis vinosa, Vinum ferri—t. Melampodii, T. hellebori nigri—t. Meles vesicatorii, T. cantharidis—t. Metallorum, Liliium Paracelsi—t. Mimosæ catechu, T. catechu.

TINCTURA MOSCHI, *Tincture of Musk, Essence of Musk.* (Mosch. in pulv. redact.  $\frac{3}{4}$  j, sp. vini rect. lbj.) Dose,  $\frac{3}{4}$  j to  $\frac{3}{4}$  iv.

TINCTURA MYRRHÆ, *Tincture of Myrrh, Simple Tincture of Myrrh.* (Myrrhæ contusæ,  $\frac{3}{4}$  iv, sp. rect. lbij. Ph. L. E. & D.) Tonic, deobstruent, antiseptic, and detergent. It is chiefly used in gargles, and applied to foul ulcers, spongy gums, &c.

HUDSON'S PRESERVATIVE FOR THE TEETH AND GUMS consists of Tinct. myrrh, tinct. cinch., aq. cinnam. aa  $\frac{3}{4}$  ijij, cau d'arquebuseude,  $\frac{3}{4}$  j, pulv. gum. Arab.  $\frac{3}{4}$  ss. M.

TINCTURA NERVINA BETHUCHEFFI, Tinctura seu alcohol sulphurico-æthereus ferri—t. Nervina Halensis, Tinctura seu alcohol sulphurico-æthereus ferri—t. Nervino-tonica Lamotte's, Alcohol seu tinctura sulphurico-æthereus ferri.

TINCTURA NUCIS VOMICÆ, *Tincture of Nux Vomica.* (Alcohol. S. G. 837,  $\frac{3}{4}$  j, Dry Extract of Nux Vomica, 3 gr.) Dose, gr. v to xxx in cases where the nux vomica is indicated.

TINCTURA OPII, *Tincture of Opium, Liquid Laudanum, Theriaca caelestis, Alcohol cum Opio, Tinctura Thebaïca, Tinctura Seditiva.* (Opii duri contritu  $\frac{3}{4}$  jss, spirit tenuior. lbij. Ph. L.) Nineteen minims contain about one grain of opium. Properties, those of opium. Dose, gr. xx to lx and more. By macerating the dregs remaining after making the Tinctura Opii in a solution of Tartaric Acid, a solution is obtained, which is devoid of the exciting and constipating properties of the tincture of opium. Gray calls it Haden's Liquor Opii Seditivus.

TINCTURA OPII AMMONIATA, *Ammoniated Tincture of Opium, Edinburgh Paregoric Elisir.* (Flor. benz., croci aa  $\frac{3}{4}$  ijij, opii  $\frac{3}{4}$  j, ol. anisi  $\frac{3}{4}$  ss, alcohol. ammoniat.  $\frac{3}{4}$  xvj. digest. Ph. E.)  $\frac{3}{4}$

contains one grain of opium. Used like the Tinctura Camphoræ Composita.

TINCTURA OPII CAMPHORATA, *T. camphoræ composita*—t. Plumbosa, Liquor plumbi subacetatis dilutus.

TINCTURA QUASSIÆ, *T. Quassie excel'sæ, Tincture of Quassia.* (Lign. quassie  $\frac{3}{4}$  j, sp. vini ten. lbij. Ph. E. & D.) Tonic. Dose,  $\frac{3}{4}$  j to  $\frac{3}{4}$  ij.

TINCTURA QUININÆ, *Tincture of Quinine.* (Sulphate of Quinine, gr. vj, alcohol, (.847)  $\frac{3}{4}$  j. M.) Dose,  $\frac{3}{4}$  j to  $\frac{3}{4}$  iv, in the day.

A TINCTURA CINCHONINÆ may be made in a similar manner.

TINCTURA RHABARBARI, *T. Rhej*—t. Rhabarbari composita, T. rhej—t. Rhabarbari vinosa, Vinum rhej palmati.

TINCTURA RHEI, *T. Rhabarbari, T. Rhabarbari spirituosæ, T. Rhei, Tincture of Rhabarb, T. Rhei palma'ti.* (Rhei. rad. concis.  $\frac{3}{4}$  ij, cardam. sem. cont.  $\frac{3}{4}$  ss, croci stigmat.  $\frac{3}{4}$  j, sp. ten. lbij. Ph. L.) Stomachic or purgative, according to the dose employed:— $\frac{3}{4}$  j to  $\frac{3}{4}$  ij as stomachic;  $\frac{3}{4}$  iv to  $\frac{3}{4}$  j as a purgative.

TINCTURA RHEI COMPOSITA, *T. Rhabarbari composita, Compound Tincture of Rhabarb.* (Rhei rad. concis.  $\frac{3}{4}$  ij, glycyrrhiz. rad. cont.  $\frac{3}{4}$  ss, zingib. rad. concis. croci stigmat. aa  $\frac{3}{4}$  j, aqua,  $\frac{3}{4}$  xij, sp. ten. lbij. Ph. L.) Properties same as the last.

WARNER'S CORDIAL—a nostrum—consists of Rhabarb,  $\frac{3}{4}$  j, fol. sennæ  $\frac{3}{4}$  ss, croci  $\frac{3}{4}$  j, rad. glycyrrh.  $\frac{3}{4}$  iv, urarum passarum lbj, sp. vini Gallici lbij.

TINCTURA RHEI ET ALOES, *Tincture of Rhabarb and Aloes, Elisir sacrum.* (Rad. rhei concis.  $\frac{3}{4}$  vij, aloes socot.  $\frac{3}{4}$  vj, sem. amom. repent. cont.  $\frac{3}{4}$  ss, alcohol dilut. lbijss. Ph. E.) Properties like the last.

RYMER'S CARDIAC TINCTURE, consists of an infusion of Capsicum, Camphor, Cardamom seeds, Rhabarb, Aloes and Castor in Proof Spirit, with a very small quantity of Sulphuric Acid.

TINCTURA RHEI ET GENTIANÆ, *Tincture of Rhabarb with Gentian, Tinctura Rhei Amara.* (Rad. rhei cont.  $\frac{3}{4}$  ij, gentian. luca cont.  $\frac{3}{4}$  ss, alcohol dilut. lbijss. Ph. E.) Properties same as the last.

TINCTURA RHEJ, *T. rhej*—t. Rhej amara, T. rhej et gentianæ—t. Sacra, Vinum aloes—t. Saponis camphorata, Linimentum saponis compositum—t. Saponis et opii, Linimentum saponis et opii—t. Seditiva, T. opii.

TINCTURA SCILLÆ, *Tincture of Squill.* (Scille rad. recent. exsiccat.  $\frac{3}{4}$  iv, spirit. tenuior. lbij. Ph. L. E. & D.) Properties, same as those of the bulb. Dose, gr. xv to lx.

TINCTURA SENNÆ, *T. Sennæ Composita, Elisir Salutis, Daffy's Elisir, Tincture of Senna.* (Senna fol.  $\frac{3}{4}$  ijij, Caroi sem. cont.  $\frac{3}{4}$  ij, cardam. sem. cont.  $\frac{3}{4}$  j, urarum passarum deimptis acinis,  $\frac{3}{4}$  iv, sp. ten. lbij. Ph. L. & D.) Stomachic, carminative, and cathartic. Dose,  $\frac{3}{4}$  j, to  $\frac{3}{4}$  j.

TINCTURA SERPENTARIÆ, *T. S. Virginianæ, T. Aristolochiæ Serpentaria, Tincture of Snake-root.* (Rad. Serpent.  $\frac{3}{4}$  ij, sp. ten. lbij. Ph. L. & D.) Tonic. Dose,  $\frac{3}{4}$  ss to  $\frac{3}{4}$  j.

TINCTURA STOMACHICA, *T. cardamomi composita.*

TINCTURA STRYCHNINÆ, *Tincture of Strychnine.* (Alcohol, S. G. 837 lbj, strychnine, gr.

ijj.) Dose 6 drops to 24. Properties, those of the strychnine.

TINCTURA SEU ALCOHOL SULPHURICO-ÆTHEREUS FERRI, *Gutta uerivina, Liquor Anodynus Martialis, Alcoholæthereus ferratus, Naphtha Vitrioli Martialis, Solutio Muriatis ferriæ athæra, Spiritus Sulphurico-athæreus Martialis, Tinctura nervina Halensis, T. touiconervi-na Halensis, Tinctura aurca, T. nervina Bestucheffii, T. nervino-tonica Lumotte's, T. athærea ferri, Æther Martialis, De La Motte's Golden Drops, Bestucheff's Nervous Tincture, Elixir d'or de M. le Général De La Motte.* An ethereal solution of muriate of iron. It is much used in gout, hypochondriasis, &c.

TINCTURA SULPHURIS VOLATILIS, *Liquor fumans Boylii*—t. Thebaica, T. opii—t. Thebaica, Vinum opii.

TINCTURA TOLUIFERÆ BAL'SAMI, *Tincture of Balsam of Tolu, T. Balsami Tolutani.* (Balsam. Toluif. ʒjss, alcohol. ℥j. Ph. E.) Reputed to be expectorant and corroborant. Dose, ʒss to ʒj or more.

TINCTURA TONICA NERVINA HALENSIS, Alcohol seu Tinctura sulphurico-æthereus ferri.

TINCTURA VALERIANÆ, *Tincture of Valerian, (Valerian. rad. ʒiv, sp. ten. ℥ij. Ph. L. & D.)* Stimulant and antispasmodic. Dose, ʒss to ʒij.

TINCTURA VALERIANÆ AMMONIATA, *Ammoniated or Volatile Tincture of Valerian, T. Valerianæ Volatilis.* (Valerianæ rad. ʒiv, sp. ammon. arom. ℥ij. Ph. L. & D.) Like the former. Dose, ʒss to ʒij.

TINCTURA VERATRĪ, *T. Veratri albi. Tincture of White Hellebore.* (Rad. veratri. alb. cont. ʒviiij, alcohol. dilut. ℥ijss. Ph. E.) Emetic and cathartic; but not very manageable. Dose, gr. v to x.

TINCTURA ZINGIBERIS, *T. Amomi Zingiberis, Tincture of Ginger.* (Zingib. rad. concis. ʒij, sp. tenuior. ℥ij. Ph. L. & D.) Stimulant and carminative. Dose, ʒj to ʒij.

TINCTURE OF ACETATE OF IRON, Tinctura ferri—t. of Balsam of Tolu, Tinctura toluiferæ balsami—t. of Bark, Tinctura cinchonæ—t. of Bark, ammoniated, Tinctura cinchonæ ammoniata—t. of Bark, compound, Tinctura cinchonæ composita—t. of Bark, Huxham's, Tinctura cinchonæ composita—t. of Bark, volatile, Tinctura cinchonæ ammoniata—t. of Blistering Fly, Tinctura cantharidis—t. Cardiac, Rymcr's, Tinctura rhej et aloes—t. of Galls, Tinctura gallarum—t. of Ginger, Tinctura zingiberis—t. for the Gout, Dr. Wilson's, see Colchicum autumnale—t. Hatfield's, see Tinctura guaiaci ammoniata—t. of Hellebore, white, Tinctura veratri—t. of Hemlock, Tinctura conii maculati—t. of Henbane, Tinctura hyoscyami—t. of Hops, Tinctura humuli—t. of Iron, ammoniated, Tinctura ferri ammoniata—t. of Iron, muriated, Tinctura ferri muriatis—t. of Ludwig, see Ferrum tartarizatum—t. of Musk, Tinctura moschi—t. Nervous, Bestucheff's, Tinctura seu alcohol sulphurico-æthereus ferri—t. of Orange peel, Tinctura aurantii—t. of Rhubarb, Tinctura rhej—t. of Rhubarb and aloes, Tinctura rhej et aloes—t. of Rhubarb and gentian, Tinctura rhej et gentianæ—t. of Saffron, Tinctura croci—t. of Saffron, compound, Tinctura de croco composita—t. of Snakeroot, Tinctura serpentariæ—t. of Spanish

fly, Tinctura cantharidis—t. of Squill, Tinctura scillæ—t. of Steel, Tinctura ferri muriatis—t. Stomach, Tinctura cardamomi composita—t. for the Teeth, Greenough's, see Spiritus armoraciæ compositus—t. of Wormwood, compound, Tinctura absinthii composita.

TINEA, Porriigo—t. Faciei, Porriigo larvalis—t. Favosa, Porriigo favosa—t. Ficosa, Porriigo scutulata—t. Furfuracea, Porriigo furfurans—t. Granulata, Porriigo scutulata—t. Lactea, Porriigo larvalis—t. Lupina, Porriigo lupinosa—t. Porriiginosa, Porriigo furfurans.

TINKLING, METALLIC, *Tintement métallique.*

TINNIMENTUM METALLICUM, *Tintement métallique.*

TINNITUS AURIUM, *Paracusis imaginaria, Susurrus, Syrigmus, Syringmos, Sibylus, S. clangosus, Strepitus aurium, Echos, Enchecha, Bonbus, (F.) Tintement, Tintouin.* An imaginary sound, like the ringing of a bell, the noise of wind, the murmur of water, &c., heard in health and in sickness. It is, often, an accompaniment of cerebral disorder.

TINTEMENT, Tinnitus aurium—t. Bullaire, T. métallique.

TINTEMENT MÉTALLIQUE (F.) *Tintement bulloire, Tinnimentum metallicum, Metallic Respiration, Metallic Voice, Metallic Tinkling.* A particular noise, heard by the stethoscope when applied to the chest, and which, according to Laennec resembles that, caused by striking metal, glass, or porcelain with a pin; but which is, perhaps, more like the sound of the keys of a musical snuff-box. The *tintement métallique* or *metallic tinkling* is heard on causing the patient to speak or breathe; but is more distinct when he coughs. When the phenomenon is not so strongly marked it produces only the *metallic resonance*.

The 'metallic tinkling' is a pathognomonic symptom of a communication between the bronchi and cavity of the chest; in other words, of *Pneumothorax*.

TINTINNABULUM, Uvula.

TINTOUIN, Tinnitus aurium.

TIPSARIA, Decoctum hordei.

TIRE-BALLE, Forceps (bullet.)

TIRE-FOND, (F.) A surgical instrument, formerly used to elevate the piece of bone sawn off by the trephine.

TIRE-PUS, Pylorum.

TIRE-TETE, (F.) A name given to different instruments used for extracting the head of the child when left in the uterus, and in certain cases of difficult labour. The crotchet (q. v.) is one of those, as well as the *Tire-tête à bascule* of Levret, &c.

TISANE, *Ptisana* or *Ptissana, Ptisane*, from πτισαν, 'barley.' A name given to aqueous medicines, containing but little, if any, medicinal agent. The ancients gave the name particularly to the decoction of barley.

TISANE COMMUNE, Decoctum hordei.

TISSU, Tissue—t. *Accidental*, see *Accidental*—t. *Cavernous*, Cavernous texture—t. *Celluleux des os*, Cancelli.

TISSUE, *Textus*, (F.) *Tissu*. By this term, in anatomy, is meant the various parts, which, by their union, form the organs; and are, as it were, their anatomical elements. General ana-

tomy is the anatomy of the tissues, and they are the seat of the investigations of the pathological anatomist. The best division, indeed, of diseases would be according to the tissues mainly implicated. For the elementary Tissues, see Fibre.

The compound tissues, which, by associating or combining variously, form every organ of the body, have been variously classed: but every division is imperfect and liable to objections. The following is one of the most recent.

## TABLE OF COMPOUND TISSUES.

|                   |   |
|-------------------|---|
| 1. Cellular.      |   |
| 2. Serous.        |   |
| 3. Cutaneous,     | { Dermoid,<br>Mucous.                             |
| 4. Vascular.      | { Arterial,<br>Venous,<br>Lymphatic,<br>Erectile. |
| 5. Glandular.     |   |
| 6. Cartilaginous. |   |
| 7. Fibrous,       | { Fibrous,<br>Fibro-cartilaginous.                |
| 8. Osseous.       |   |
| 9. Muscular,      | { Voluntary,<br>Involuntary.                      |
| 10. Nervous,      | { Cerebral,<br>Ganglionic.                        |
| 11. Epidermoid.   |   |

The ACCIDENTAL or ADVENTITIOUS TISSUES consist of every substance—foreign to the primitive organization of the economy, but yet organized and living—which may be developed in the interior or at the surface of organs. Laënnec divides the accidental tissues into two sections. 1. Those that resemble others in the animal economy, or *analogous accidental Tissues*; and, 2. Those that have nothing analogous in the body, and which are always the result of a morbid process—the *heterologous* or *heteroclite accidental tissues*.

To the first class belong;—ossifications; accidental fibrous, fibro-cartilaginous, cartilaginous, cellular, and corneous tissues; hairs; the serous membranes of certain encysted tumours; the mucous membranes of fistulous canals, and accidental synovial membranes. To the second, belong tubercles, scirrhi, melanoses, &c.

TISSUE, AREOLAR, Cellular tissue—t. Cribiform, Cellular tissue—t. Filamentous, Cellular tissue—t. Laminated, Cellular tissue—t. Ligamentous, Desmoid tissue—t. Mucous, Cellular tissue—t. Porous, Cellular tissue—t. Reticulated, Cellular tissue.

TITHENESIS, Lactation.

TITHYMALUS, Euphorbia palustris—t. Cyparissia, Euphorbia cyparissias—t. Latifolius, Euphorbia lathyris—t. Paralias, Euphorbia paralias.

TITILLATIO, Gargale.

TITTHE, Nipple.

TITTHION, Nipple.

TITTHIS, Nipple.

TITTHOS, Mamma, Nipple.

TITUBANTIA, *Bredouillement*.

TITUBATIO, Fidgets.

TOADFLAX, Antirrhinum linaria.

TOBACCO, Nicotiana tabacum—t. English, Nicotiana rustica—t. Indian, Lobelia inflata.

TOCETOS, Parturition.

TOCOLOGY, Obstetrics.

TOCOS, Parturition.

TODDY TREE, Mamei.

TOE, Digitus pedis.

TOEPLITZ, MINERAL WATERS OF.

T. is a town of Bohemia, celebrated for its numerous thermal springs. The water contains carbonate, muriate, and sulphate of soda; carbonates of lime and iron, &c.

TOFUS, Tophus.

TOILE D'ARAIGNÉE, Aranei tela—t. Choroidienne, see Choroid—t. de Gaultier, Spardrapum Galteri.

TOKAS, Puerpera.

TOKOLOGY, Obstetrics.

TOLES, Tonsil.

TOLLES, Tonsil.

TOLU, Tonsil.

TOLUIFERA BALSAMUM. Family, Te-rebinthaceæ. *Sex. Syst.* Decandria Monogynia. The name of the tree, which affords the *Balsam of Tolu*, *Balsamum Tolutanum*, *Toluifera Balsami Balsamum*, *Goa'onaz*, *Red Balsam of Peru*, (F.) *Baume de Tolu*, *B. de Carthagène*. It has a very fragrant odour, and warm, sweetish taste; is thick, and of a reddish-yellow colour. It is stimulant and expectorant, (?) and is used in coughs. It is chiefly, however, employed on account of its flavour.

TOMATA, *Solanum lycopersicum*.

TOME, *Ton'us*, *τομη*, *τομος*, 'incision.' A common suffix, as in *Lithotomy*, *Bronchotomy*, &c.

TOME, Cut, Incision.

TOMION, Knife.

TOMENTUM CEREBRI, from *tomen'tum*, 'a flock of wool.' The infinite number of small vessels, which pass between the pia mater and convolutions of the brain. They enter the substance of the brain at right angles.

TOMEUS, Knife.

TOMIS, Scissors.

TOMOTOCIA, Cæsarean section.

TONE, *Tonus*, from *τενω*, 'I stretch.' The state of tension or firmness, proper to each organic tissue. It is the effect of Tonicity, (q. v.)

TONE, Elasticity.

TONGUE, Sax. *zunz*, (D.) *Tong*, *Lingua*, *Glossa*, *Glotta*, (F.) *Langue*. The tongue is a muscular, symmetrical, and very mobile organ; situate in the mouth, from the os hyoides and epiglottis to the incisor teeth. Its use is, particularly, to procure for us the sensation of savours; and it aids in the acts of sucking, mastication, deglutition, pronunciation, and expuition. It has the shape of a pyramid, flattened above and below; rounded at its angles, and terminated, anteriorly, by a blunt point. Its *upper surface*, called the *Dorsum*, is free, flat, and divided into two portions by a median furrow, *Linea mediana*; at the posterior extremity of which is the *Foramen cæcum*. The *inferior surface* is free, and covered by the mucous membrane on its anterior third and sides: but behind and in the middle it is attached to the lower jaw, by means of the *genio-glossus*; and to the hyoides by the *hyoglossus*. Its *margins* are rounded; thick behind, thinner anteriorly. Its *tip or point* or *dental extremity* is rounded and free:—the *root, base, or hyoid ex-*

tremity is continuous with the epiglottis and velum palati. It is very thick at the foramen cæcum; but thinner as it approaches the hyoid bone.

The tongue is composed of muscles, and covered by a mucous membrane—*Periglottis, Involutærum lingua, Membrana seu Tunica vaginalis seu Cutis, Epidermis seu Tunica seu Involutærum mucosum seu Crusta villosa lingua*—which forms also the frenum beneath the tongue. On this membrane are seen the different *papilla*, (q. v.) The nerves of this organ proceed from the *inferior maxillary, glosso-pharyngeal, and hypoglossal*. The first is perhaps connected with taste; the two last with the motions of the organ. Some recent observers, however, consider the glosso-pharyngeal to be the special nerve of gustation. The arteries are the *lingual*, from the external carotid; and the *palatine and tonsillar*, from the labial. The veins are the *superficialis lingua, ranina, lingualis, and submental*. They open into those of the pharynx and larynx. Its lymphatic vessels pass into ganglia, situate at the edge of the hyoglossi muscles.

TONQUE, HERNIA OF THE, Glossocele.—t. Inflammation of the, Glossitis.—t. Scraper, *Cure-langue*—t. Tie, see Ankyloglossum.

TONIC, *Ton'icus*. Relating to tonic.

TONIC POWER, Irritability.

TONIC SPASM, *Spasmus tonicus, Convulsio tonica, Conductio, Spas'ticus, Tonos, Entonia, Entasia*. A rigid contraction of muscles without relaxation, as in trismus, tetanus, &c. See Tetanus and Spasm.

In Therapeutics, *Tonic, Ton'icus, Tonot'icus, (F.) Tonique, Fortifiant*, means a medicine, which has the power of exciting slowly and by insensible degrees the organic actions of the different systems of the animal economy, and of augmenting their strength in a durable manner. Bitter, vegetable substances, which are not associated with an acrid or narcotic principle; preparations of iron; cold water, &c., act as tonics. They are also called *Comfortantia, Corroborantia, Confirmantia, Roborantia, &c.*

The following are the chief Tonics.

|                         |                             |
|-------------------------|-----------------------------|
| Acidum Arseniosum,      | Gentiana,                   |
| —— Nitricum,            | Gentianina,                 |
| —— Sulphuricum,         | Liriodendron,               |
| Argentum Nitras,        | Lupulina,                   |
| Bismuthi Subnitras,     | Piperina,                   |
| Carbo Ligni,            | Piunus Virginiana,          |
| Cascarilla,             | Quassia,                    |
| Cinchona,               | Quinina,                    |
| Cinchonina,             | Salix,                      |
| Colomba,                | Salicina,                   |
| Cornus Florida,         | Serpentaria,                |
| Cupri Acetas,           | Zinci præparata,            |
| —— Sulphas,             |                             |
| Cuprum ammoniatum,      | Aquæ minerales acidulae     |
| Cusparia,               | et ferrugineæ.              |
| Eupatorium perfoliatum, | Mental Tonics, (Confidence, |
| Ferri Præparata,        | Hope, Amusement.)           |

TONICITY, *Tonicitas*, from *tonos*, 'tone,' 'tension.' The faculty that determines the general tone of the solids. Excessive tonicity causes *cr'thism or crispness*; deficient tonicity, *atony and weakness*. Tonicity has been used in the same sense as irritability.

TONICITY, Elasticity.

TONIQUE, Tonic.

TONOS, Tonic spasm.—t. Trismus, Trismus.

TONOTICUS. Tonic.

TONSIL, *Tonsil'la, Amygdala, Parist'h'mia,*

*Almond of the ear, Almond of the throat, Tolu, Tolles, Toles, Spongos, Pl. Anti'ades, (F.) Amygdale, Tonsille*. An ovoid follicle, about half an inch in length, similar in shape to an almond, and situate, on each side, between the pillars of the velum palati. Their inner surface, projecting into the isthmus of the throat, is covered by the mucous membrane, in which are the orifices of a dozen cells, whence a transparent, viscid mucus oozes on pressure. This mucus is destined to facilitate deglutition, by lubricating the isthmus faucium; and is forced out during the passage of the alimentary bolus.

TONSILLARUM GANGRÆNA, Cyanche maligna.

TONSILLE, Tonsil.

TONSILLITIS, Cyanche tonsillar.

TOOTH. Sax. *zod*. *Dens, Odous, (F.) Dent*.

The teeth are small, hard bones, fixed in the alveoli of each jaw, and serving to lay hold of, and to cut, tear, and triturate alimentary substances. True teeth are found only in man, the mammalia, reptiles, and fish. The teeth have, in general, the shape of an irregular cone, the base of which is towards the interior of the mouth; and the apex, single or divided, towards the bottom of the alveoli. Each tooth has a part situate out of the alveolus, and covered by a vitriform substance. This part is called the *crown or corona*. It is bounded by a narrower portion, called the *cervix, (F.) collet*, which separates it from the portion in the alveolus—the *fang or root, (F.) racine*. In the adult, the teeth are 32 in number; 16 to each jaw: these consist of 4 *incisors, 2 caninc, 4 bicuspидati, and 6 molares*. (See these various terms.)

The teeth enclose a vascular and nervous pulp, in a central cavity, *Cavitas Pulpa*. They are formed of a very hard, compact tissue; and the corona is covered by a vitreous substance called Enamel, (q. v.) The incisor and canine teeth are developed by a single point of ossification; the lesser molares, by two; and the larger, by four or five. See Dentition.

Recent researches by Retzius, Müller and others, have shown that the ivory or bone of the tooth consists of tubular fibres, which contain organic deposits of calcareous salts; and of intertubular substance, in which are observed corpuscles or osseous cells of the tooth, called by Professor Owen, *Calcigerous cells*, which also contain earthy salts.

At the part where the enamel terminates at the cervix of the tooth, the *crusta petrosa* or cortical substance commences in an extremely thin stratum, passes down and gradually increases in thickness towards the extremity of the root where it is generally the thickest. It is said to have been traced on the enamel, and Purkinje and Fränkel found it lining the cavities pulpæ. They gave it the name *Substantia ostoidca*.

In the compound teeth of the herbivorous animal, a deposition is found on the surface of the enamel, which has been called the *cementum* or cement. Müller, however, regards it to be a deposit from the salts and the saliva, and to be essentially the same as what is called tartar in the human subject.

TOOTHACHE, Odontalgia.—t. Tree, *Aralia spinosa, Xanthoxylum clava Herculis*.

**TOOTH EDGE**, *Agacement des Dents*, *Hæmodia*—t. Rash, *Strophulus*—t. Shell, dog-like, *Dentalium*.

**TOPHACEOUS CONCRETION**, *Tophus*.

**TOPHIUS**, *Tofus*, *Tophaceous Concretion*. A collection of hard, calcareous matter, which forms, particularly, at the surface of joints affected with gout; and, occasionally, in the interior of organs, around the teeth, &c. It likewise meant gravel.

**TOPIC**, *Topicus*. A local application. (F.)

*Topique*. See *Local*.

**TOPICUS**, *Local*.

**TOPINARIA**, *Talpa*.

**TOPIQUE**, *Topic*.

**TORCULAR**, *HEROPH'ILL*, *Lechenci'on*, *Lenos*. *The Press of Herophilus, Fourth Sinus*. (F.) *Confluent des Sinus*, *Pressoir d'Herophile*. A smooth and polished cavity, of irregular shape, in which several sinuses of the dura mater meet. It is situate before the internal occipital protuberance, at the union of the three great duplicatures of the dura mater. It has six openings into it:—one above, that of the superior longitudinal sinus:—two below, answering to the occipital sinuses: one anterior, belonging to the straight sinus: and two lateral, and very broad, which lead into the lateral sinuses; and convey, from the cavity, the blood that has been poured into it by the others.

**TORCULAR**, *Tourniquet*.

**TORDYL'IUM OFFICINA'LĒ**, *Scs'eli Crelicum*, (F.) *Séseli de Crète*. *Family*, *Umbelliferae*. *Sex. Syst.* *Pentandria Digynia*. The seeds and roots of this Southern European plant are considered carminative and diuretic. They enter into the *theriaca* (q. v.)

**TORĒNIA ASIAT'ICA**, *Cala-doto*. A small Malabar plant, the juice of whose leaves, sweetened with sugar, is said to cure gonorrhœa.

**TORMENTIL'LA**, *T. erecta*, *Common Tormentil*, *Upright Septfoil*, *Heptaphyll'um*, *Consolida rubra*, (F.) *Tormentille*. *Family*, *Rosaceæ*. *Sex. Syst.* *Icosandria Polygynia*. The root has a slightly aromatic odour; and austere, styptic taste. It is astringent. Dose, of the powder, gr. x. to ʒi.

**TORMENTUM**, *Ileus*.

**TORMINA**, *Strophos*, *Calial'gia*, *Gripes*, *Mulligrubs*. (F.) *Tranchées*. Acute colicky pains. Dysentery, (q. v.)

**TORMINA CELSI**, *Dysentery*.

**TORNACULUM**, *Tourniquet*.

**TOROS'ITAS**, *Corpulent'ia carnos'a*, *Habitus athleticus*. Muscular strength.

**TORPEDO**, *Narcosis*.

**TORPOR**, *Parapsis expers*, (F.) *Engourdissement*. State of a part which becomes numb, and almost incapable of motion. It is also applied to a debilitated, sluggish condition of a part or of the whole of the body. (F.) *Accablement*.

**TORPOR**, *Narcosis*.

**TORTELE**, *Erysimum*.

**TORTICOL'LIS**, *Obstip'itas*, *Caput obstipum*, *Obstipa cervix*, *Collum obstipum*, *Wry-neck*; from *tor'quo*, 'I twist,' and *collum*, 'the neck.' *Trachel'agra*, *Ent'asia Loxia*, *Loxias*, *Cephaloz'ia*. A variety of rheumatism, seated in the muscles of the neck, which prevents the motion of the head, and causes the patient

to hold it inclined to the side affected. It is, commonly, of short duration; usually disappearing in a few days. Rubefacients are the best topical applications.

**TORTUE**, *Testudo*.

**TORTURA ORIS**, *Risus sardonicus*, *Trismus*.

**TOTA BONA**, *Chenopodium bonus Henricus*.

**TOTUM CARNOSUM**, *Pancreas*.

**TOUCH**, *Tactus*, *Tactio*, *Ἠap'hē*, *Hapsis*, (F.) *Toucher*. One of the five senses, and that which makes known to us the palpable qualities of bodies, such as their consistence, quality, &c. It is seated, particularly, in the hands; and differs from tact (q. v.) in being active.

**TOUCH**, *ROYAL*. It was at one time universally believed, in England, that the Royal touch would remove the *Scrof'ula* or *King's Evil*, (as it was thence called.) This superstition is now entirely exploded. Edward, the Confessor, was the first English king who touched for the Evil.

**TOUCHWOOD BOLETUS**, *Boletus ignarius*.

**TOUCHER**, *Esaphe*, *Touch*.

**TOUR DE MAITRE**, *Coup de maitre*.

**TOURBILLON VASCULAIRE**, *Vasa vasorum*.

**TOURNESOL**, *Heliotropium Europæum*.

**TOURNIOLE**, *Paronychia*.

**TOURNIQUET**, *Tor'cular*, *Tornac'ulum*, *Fas'cia tor'tilis*. A surgical instrument for stopping the course of blood in the limbs, by exerting a strong compression upon the principal artery. It was invented by a French surgeon, Morel, in the middle of the 17th century; and was modified, subsequently, by Nuck, Verduc, Monro, Petit, and Louis. It is used to suspend, for a time, the circulation in a limb, during great operations; to arrest arterial hemorrhage in cases of wounds; to compress certain aneurismal and other tumours, &c.

**TOUTE BONNE**, *Salvia sclarea*.

**TOUTE EPICE**, see *Myrtus Pimenta*—t. *Saine*, *Sanicula*.

**TOUX**, *Tussis*—t. *Bronchique*, *Bronchial cough*—t. *Caverneuse*, see *Cavernous respiration*—t. *Tubaire*, *Bronchial cough*.

**TOXICAL**, *Poisonous*.

**TOXICATIO**, *Poisoning*.

**TOXICODENDRON**, *Rhus toxicodendron*.

**TOXICOHÆ'MIA**, from *τοξικον*, 'a poison,' and *αἷμα*, 'blood.' *Poisoning of the blood*—*Piorry*.

**TOXICOL'OGY**, *Toxicolo'gia*, from *τοξικον*, (itself from *τοξον*, 'a bow,') 'a poison,' and *λογος*, 'a description.' A treatise on poisons, (q. v.)

**TOXICUM**, *Poison*, *Venum*.

**TRABECULA**, *Corpus callosum*—t. *Willisii*, *Chordæ Willisii*.

**TRABES CORDIS**, *Columnæ carneæ*—t. *Medullaris*, *Corpus callosum*.

**TRABS**, *Penis*.

**TRACHE'A**, (generally, however, accented *Trachea*,) *Trach'ea art'eria*, *Bronchus*, *As'pera arteria*, *Fis'tula spirid'alis*, *T. pulmon'alis*, *Can'na*; the *Windpipe*, (F.) *Trachée artère*, from *τραχος*, 'rough,' and *αρτηρία*, 'artery,' composed of *αἶρ*, 'air,' and *τηρειν*, 'to keep.' The trachea is a cylindrical, fibro-cartilaginous and

membranous tube, flattened behind, and situate on the median line, before the vertebral column, from the inferior part of the larynx, as far as the third dorsal vertebra. There it divides into two branches, the *bronchi*, which separate to go to each lung, (q. v.)

The trachea, the function of which is to convey air to the lungs during respiration, is composed, 1. Of cartilaginous rings, incomplete behind, situate one above the other, and kept *in situ* by a fibrous membrane. 2. Of a mucous membrane, which lines it internally, and contains numerous mucous follicles. 3. Of transverse muscular fibres, not well marked, which occupy its posterior surface. 4. Of vessels, which proceed from the superior and inferior thyroideal; and, 5. Of nerves, that are given off by the pneumogastric and the cervical ganglia.

TRACHEA ARTERIA, Trachea.

TRACHEAL, *Trachealis*. An epithet applied to the respiration as heard through the stethoscope opposite the trachea, larynx, and root of the bronchi; the air appearing as if sucked in from the cylinder during inspiration, and expelled again during expiration.

TRACHÉE ARTÈRE, Trachea.

TRACHEITIS, Cynanche trachealis.

TRACHELAGRA, Torticollis.

TRACHELIAN, Cervical.

TRACHELITIS, Cynanche trachealis.

TRACHÉLO-ATLOÏDO-OC-CIPITAL, Obliquus superior capitis—*t. Atloïdo-basilaire*, Rectus capitis lateralis—*t. Basilaire*, Rectus capitis internus major—*t. Basilaire*, *petit*, Rectus capitis internus minor.

TRACHÉLO-DIAPHRAGMATIC, *Trachelo-diaphragmaticus*. The 4th pair of cervical nerves, whence the phrenic nerve chiefly arises.—Chaussier.

TRACHÉLO-MASTOÏDIEN, Complexus minor—*t. Occipital*, Complexus—*t. Phyma*, Bronchocele—*t. Scapulaire*, Levator scapulæ.

TRACHELOS, Collum.

TRACHITIS, Cynanche trachealis.

TRACHOMA, *Aspre'do*, from *τραχος*, 'rough.' (F.) *Asperité des Paupières*. A roughness of the inner surface of the eyelids. A variety of ophthalmia, of which three kinds have been designated:—*T. sabulo'sum*, from sand, &c. getting between the eyelids; *T. carunculo'sum*, from fleshy excrescences; and *T. herpet'icum*, from hard pustules on the inner surface of the eyelids. This last is also called *Ficosis* and *Palpebra ficosa*.

TRACHOMAT'ICON, *τραχωματι'ον*. A colyrium for removing roughness of the inner surface of the eyelids.—Galen.

TRACTORATION, Perkinism, see Tractors, metallic.

TRACTORS, METAL'IC. Metallic agents, introduced by Dr. Elisha Perkins, of Connecticut, about the end of the last century, to cure diseases. The parts were rubbed with these tractors, and hundreds of thousands of cases were reported to have been cured by the *tractoration*. The affections, in which they were chiefly used, were local inflammations, and pains in different parts. The good effects were, doubtless, owing to the influence exerted by the mind over the body. The bubble did not exist long. See Perkinism.

TRACTUS RESPIRATORIUS, Respiratory tract.

TRAGACAN'THA, *Gummi Tragacantha*, *G. Astrag'ali Tragacantha*, *Gum Tragacanth*, *Gum Dragon*; the gum of the *Astragalus Tragacantha* or *Astragalus verus*, a native of Persia, *Family*, Leguminosæ. *Scr. Syst.* Diadelphia Decandria. (F.) *Gomme Adragant*. This gum is inodorous; nearly insipid; of a whitish colour; semi-transparent, and striated. It is in thin, vermiform pieces; and does not form a smooth, uniform mucilage with water. It is demulcent, but is rarely used alone.

TRAG'EA, *Trag'ena*. 'Dessert.' An aromatic, powdered with sugar, and used as a carminative.—Galen.

TRAGEA AROMATICA, Pulvis cinnamomi compositus.

TRAGEMA, Tragea.

TRAG'ICUS, *Tragien*, (Ch.) A small, flat, triangular muscle, which almost wholly covers the outer surface of the tragus, arising from its base, and terminating at the top of the eminence.

TRAGIEN, Tragicus.

TRAGOPO'GON, from *τραγος*, 'a goat,' and *πωγων*, 'beard.' A genus of plants; *Family*, Cichoraceæ. *Scr. Syst.* Syngenesia Polygamia Æqualis. (F.) *Barbe de Bouc*; of which the roots of the *Tragopogon porrifolium* or *Salsif*, and the young shoots of the *T. pratens'is*, *Meadow Salsif*, or *Common Goat's Beard*, (F.) *Salsifis des prés*, are eaten as food. The root of the latter has been used as a diuretic.

TRAGOSELINUM, *Pimpinella saxifraga*—*t. Majus*, *Pimpinella magna*.

TRAGUS, *τραγος*; 'a goat;' *Antilobium*; *Hircus*. A small, flattened, triangular nipple, situate before the meatus auditorius externus, which it appears to conceal. It is covered with hair in old people, whence its name.

TRAGUS MATTHIOLI, *Salsola kali*.

TRAINASSE, Polygonum aviculare.

TRAMIS, Perinæum.

TRANCE, Catalepsy, Ecstasis.

TRANCHÉES, Tormina—*t. Utrines*, Pains, after.

TRANSFORMATIONS DE TISSU, (F.) The French pathologists designate thus the change that occurs in an organ, the tissue of which becomes similar to that of another organ. The chief transformations are cartilaginous, osseous, and adipous. See Tissue.

TRANSFU'SION, *Transfusio*, *Transfusio San'guinis*, *Cura Medc'na*, *Methemachym'ia*, *Transplantatio Medica nova*, *Chirur'gia transfusoria*, *Erotichæmato'sis*, from *transfundere*, 'to pour from one vessel into another.' The act of passing the blood of one animal into the veins of another; an operation, which was formerly used to fulfil various therapeutical intentions. It has been revived in cases of uterine hemorrhage; and, apparently, with some success.

The operation can only be performed safely on animals having like kinds of blood. See Globule.

TRANSLATION, Metastasis.

TRANSPLANTATIO, *Metaphyticia*. A pretended method of curing diseases, devised by

Paracelsus—by making them pass from one individual to another, either animal or vegetable.

TRANSPLANTATIO, Morioplastice—t. *Medicina nova*, Transfusion.

TRANSPIRATIO, Perspiration.

TRANSPORT, Delirium.

TRANSPOSITIO, Metathesis.

TRANSPOSITION, *Transpositio, Metall'osis*. Change of situation.

TRANSPOSITION OF THE VISCERA, *Polyp'eria promiss' cuo translati'va*, is a congenital vice of conformation, which consists in the viscera being found out of the situations they ordinarily occupy: the heart, for example, being on the right side; the liver on the left, &c.

TRANSUDATIO, Diapedesis.

TRANSUDATION, *Transudatio*, from *trans*, 'through,' and *sudo*, 'I sweat.' The passage of a fluid through the tissue of any organ, which may collect in small drops on the opposite surface, or evaporate from it.

TRANSUDATION, Exosmose.

TRANSVERSAIRE ÉPINEUX, *Transversalis dorsi*—t. *Épineux du cou*, *Semispinalis colli*—t. *Grêle*, see *Sacro-lumbalis*—t. *Épineux du dos*, *Semispinalis dorsi*.

TRANSVERSAL DE LA CONQUE, *Transversalis auris*—t. *du Nez*, *Compressor nasi*.

TRANSVERSALIS ABDOMINIS, *Lombo-abdominal*, (Ch.) (F.) *Transverse de l'Abdomen*. This muscle is seated, deeply, on the lateral parts of the abdomen. It is flat, thin, and broader before than behind. It is attached, above, to the cartilage of the last true rib, and to those of every false rib; and, below, to the inner lip of the crista of the ilium; to the two outer thirds of the crural arch, and to the upper part of the pubis. Its fibres, moreover, are inserted, behind, by means of broad aponeuroses, into the top of the transverse and spinous processes of the four first lumbar vertebræ; and, before, into the linea alba, and the ensiform cartilage. This muscle, all of whose fibres have a transverse direction, constricts the belly, and diminishes the base of the chest, by drawing inwards the ribs to which it is attached.

TRANSVERSALIS ANTICUS PRIMUS, *Rectus capitis lateralis*—t. *Collateralis colli*, see *Sacro-lumbalis*.

TRANSVERSALIS COLLI, *Transversalis major colli*, *Portion of the Sacro-spinal*, (Ch.) (F.) *Transversaire*. A muscle, seated at the posterior and lateral part of the neck and upper part of the back. It is attached to the transverse processes of the 5 or 6 lowest vertebræ of the neck; and to those of the 4 or 5 first dorsal. It extends the vertebræ of the neck, and inclines them to its side.

TRANSVERSALIS COLLI, *Semi-spinalis colli*.

TRANSVERSALIS DORSI, *Transverso-spinalis*, *Multifidus Spinae*, *Lumbo-cervical portion of the Spinal*, (Ch.) (*Transverso-spinalis Lumbo'rum*, *Transverso-spinalis Dorsi*, *Transverso-spinalis Colli*.) *Musculus saccr*, *Spinales et transversales lumborum*, *Semi-spinalis internus*, sive *transverso-spinalis colli pars interna*, (Winslow,) *Lombo-dorsi-spinal*, &c. (F.) *Transversaire épineux*. This muscle, usually called by English anatomists, *Multifidus spinee*, and including all the *transverso-spinales*, is situate in the vertebral gutters, and extends from the posterior

part of the sacrum to the second cervical vertebræ. It is thicker in the neck and loins than in the back and behind the sacrum. Its use is—to straighten the vertebral column, and to impress upon it a slight rotary motion.

TRANSVERSALIS NASI, *Compressor naris*.

TRANSVERSE, *Transversus, Transversa'lis*. That which runs across: also, that which relates to the transverse processes of the vertebræ.

THE TRANSVERSE PROCESSES OF THE VERTEBRE, (F.) *Apophyses transverses des vertèbres*, are the bony eminences that jut out transversely from the sides of the vertebræ.

THE TRANSVERSE SUTURE, *Sutura transversalis*, runs across the face, and sinks into the orbits; joining the bones of the skull to those of the face, but with so many irregularities and interruptions, that it can scarcely be recognised as a suture.

THE TRANSVERSE ARTERY OF THE FACE arises from the temporal; passes transversely across the face, in front of the condyle of the lower jaw, and gives its branches to the different muscles of the cheek.

THE TRANSVERSE PERINEAL ARTERY, *Urethro-bulbar* (Ch.) is given off from the upper branch of the internal pudic; and passes inwards and forwards above the *transversus perinæi* muscle, as far as the bulb of the urethra, into which it dips;—subdividing into numerous branches.

TRANSVERSE DE L'ABDOMEN, *Transversalis abdominis*—t. *de l'Oricule*, *Transversus auris*—t. *du Perinée*, *Transversus perinæi*.

TRANSVERSO-SPINAL, *Semi-spinalis colli*, *Semi-spinalis dorsi*—t. *Spinalis*, *Transversalis dorsi*—t. *Spinalis colli*, *Semi-spinalis colli*—t. *Spinalis dorsi*, *Semi-spinalis dorsi*.

THE TRANSVERSUS AURIS MUSCLE, *Transverse de l'Oricule* (Ch.) (F.) *Transversal de la Conque*, is often wanting. It is formed of some transverse fibres, situate transversely, behind the projection of the helix which divides the concha into two portions.

THE TRANSVERSUS PERINÆI, *Levator Ani parvus*, *Ischio-perineal* (Ch.) (F.) *Transverse du Perinée*, is placed at the posterior part of the perinæum. It is thin, triangular, and situate transversely. Its external extremity is attached to the ramus and tuberosity of the ischium: its inner extremity is confounded with its fellow of the opposite side, and with the anterior part of the sphincter ani and posterior part of the bulbo-cavernosus. The use of this muscle is,—to compress the urethra, and to support the rectum and bladder. To a fasciculus of this muscle Santorini has given the name, *Urethra Elevator seu Ejaculator*.

TRANSVERSUS PERINÆI ALTER, *Prostaticus inferior*. A small muscle which occasionally accompanies the last.

TRAPA NATANS, (F.) *Macro flottante*, *Noix d'Eau*, *Chataigne d'Eau*. *Sex. Syst.* *Tetrandria Monogynia*. The plant which affords the *Nuces Aquaticæ*, *Trib'ali aquaticæ*, *Caltrops*. The nut is considered nutrient and demulcent, and is said to be useful in diarrhœa from abrasion of the bowels, and in calculus. A poultice is sometimes made of it to discuss hard and indolent tumours.

TRAPEZE, Trapezius.

TRAPEZIUM, OS. So called from its shape. *Os multan'gulum majus*. The first bone of the second row of the carpus. It is articulated, above, with the scaphoides; below, with the first bone of the metacarpus; within, with the trapezoides, and second metacarpal bone. Anteriorly, posteriorly, and externally, it gives attachment to ligaments.

TRAPEZIUS, *Cucullaris, Dorso-susacromien* (Ch.) (F.) *Trapèze, Capuchon*. A muscle, seated at the posterior part of the neck and shoulder, and at the upper part of the back. It has the shape of a trapezium; is attached, on the one hand, to the inner third of the upper curved line of the occipital bone: to the posterior cervical ligament; to the spinous process of the 7th cervical vertebræ; and to those of all the dorsal vertebræ; and, on the other hand, to the spine of the scapula; the acromion and the outer third of the posterior margin of the clavicle. Its upper fibres are situate obliquely downwards and outwards; the transverse and inferior, obliquely outwards and inwards. This muscle elevates the shoulder; carries it backwards, or depresses it, according as its upper, middle, or lower fibres contract separately. It straightens the head, also, and inclines it to one side.

TRAPEZOID LIGAMENT. The anterior part of the coraco-clavicular ligament, (q. v.) It is a very strong, fibrous fasciculus, which has the shape of a trapezium, and is situate obliquely, between the acromion process and clavicle.

TRAPEZOIDES, OS. *Os multan'gulum minus, Os pyramida'le Carpi*. The second bone of the second row of the carpus, so called from its shape. It is smaller than the trapezium, on the inside of which it is situate. It is articulated, above, with the os naviculare; below, with the second metacarpal bone; on the outside, with the trapezium; and internally, with the magnum. Anteriorly and posteriorly, it affords attachment to ligaments.

TRAILISMUS, See Balbuties and Blæsitās.

TRAULOTES. See Blæsitās.

TRAUMA, Wound.

TRAUMATIC, *Traumaticus, Vulnerarius*; from *τραυμα*, 'a wound.' Any thing relating to a wound.

TRAUMATICUS, Abstergent.

TRAVAIL D'ENFANT, Parturition.

TRAVELLER'S JOY, *Clematis vitalba*.

TREACLE, Melasses, *Theriaca*—t. English,

*Teucrium chamædrydēs*—t. Venice, *Theriaca*.

TREAD, *Cicatricula*—t. of the Cock, *Moleculæ*.

TREE OF LIFE, *Thuja occidentalis*.

TRÉFLE D'EAU, *Menyanthes trifoliata*.

TREFOIL, BEAN, STINKING, *Anagyris*—t. Water, *Trifolium fibrinum*.

TREMA, Foramen.

TREMBLEMENT, Tremor—t. *Métallique*, see Tremor.

TREMBSLES, Milk-sickness.

TREMBLING, Tremor.

TREMOR, *Trepidatio, Synclonus Tremor, Tromus, Trembling*, (F.) *Tremblement*. Involuntary agitation of the body or of some part of it, without any obstacle to voluntary motion.

It depends, generally, upon debility of the muscular, or of the nervous system; and, hence, is observed in convalescence, and in typhoid affections. It occurs, also, in old people; in hard drinkers; workers in mercury, lead, &c.; in the last case, it is called by the French, *Tremblement métallique*. Tremor seems to resemble paralysis more than convulsion.

TREPAN, *Trep'anum, Terbel'la, Tripanon, Chan'icis, Chanicion, Ter'bra, Ter'cion, Trypanon*, from *τροπανω*, 'I perforate.' A surgical instrument resembling a wimble and worked in the same manner. It is used for removing portions of bone, and particularly of the bones of the skull. The term, *trep'an*, is given more particularly to the part of the instrument that makes the perforation. The handle is so constructed as to receive different bits, as the Crown, (q. v.) the *Trépan perforatif* or *Peric'cion*, the *T. ezfoliatif* or *Desquamato'rum trep'anum*, and the *T. abaptis'ta*.

In Great Britain and the United States, this instrument has been superseded by the trephine, which is more manageable.

TREPANATIO, Trepanning.

TRÉPANATION, Trepanning.

TREPAN'NING, *Tebra'tio, Anatre'sis, Cephalotryp'esis, Trepan'atio, Tryp'esis, Tressis*, (F.) *Trep'anation*. The methodical application of the trepan.

TREPANON, Trepan.

TREPANUM, Trepan.

TREPHINE. The instrument which has replaced the trepan in some countries. It consists of a simple, cylindrical saw; with a handle placed transversely like that of a gimlet, and from the centre of the circle, described by the teeth of the saw, a sharp little perforator projects called the *Centrepin*. This centrepin is capable of being removed, at the surgeon's option, by means of a key for the purpose. It is used to fix the instrument until the teeth of the saw have made a circular groove, sufficiently deep for it to work steadily. The pin must then be removed. Sometimes the pin is made to slide up and down, and to be fixed in any position, by means of a screw.

TREPHOUSA, Nurse.

TREPIDATIO, Tremor—t. *Cordis, Cardiotromus*.

TREPON'DO. A weight of three pounds.—*Scribonius*.

TRESSIS, *τρησις*. A wound. Forceful solution of continuity in a soft part, commencing externally. A genus in the nosology of Good.

TRESSIS, Trepanning, Wound—t. *Causis, Burn*—t. *Punctura, Puncture*—t. *Vulnus, Wound*—t. *Vulnus laceratum*, see *Laceration*—t. *Vulnus simplex, Cut*.

TRESSAILLEMENT, Shuddering.

TRESSOR'IA, *Epis'on*. A term formerly applied to the hair covering the mons veneris, the absence of which has, by the vulgar, been esteemed a matter of reproach.

TRI, *τρι*, in composition, 'three.' Hence:

TRIANGLE MÉDULLAIRE, Fornix.

TRIANGULAR, *Trigo'nos, Triangula'ris*. That which has three angles.

TRIANGULARIS, Depressor anguli oris—t. *Coccygis, Coccygeus*—t. *Nasi, Compressor naris*.

The INFRA-PUBIAN or TRIANGULAR LIGAMENT is a ligamentous fascia with short fibres, situate transversely beneath the symphysis pubis, which it strengthens.

The TRIANGULARIS STERNI muscle, *Sternocostal* (Ch.) *Pectoralis intercus*, is situate at the anterior and inner parts of the chest, behind the cartilages of the ribs. It has the shape of a lengthened triangle, the base of which is directed downwards. It is attached to the posterior, lateral, and inferior part of the sternum, whence its fibres pass upwards and outwards, and terminate by as many distinct digitations at the cartilages of the 3d, 4th, 5th, and 6th true ribs. This muscle depresses the ribs and contributes to expiration.

TRIBADE (F.) *τριβας*, from *τριβω*, 'I rub.' A female whose clitoris is so large as to cause her to be regarded as a hermaphrodite.

TRIBULI AQUATICI. See *Trapa natans*.

TRIBUTUM LUNARE, *Menses*.

TRICAGO, *Teucrium chamædryd.*

TRICAUDALIS, *Retrahens auris*.

TRICEPS, from *tris* for *tres*, 'three,' and *caput*, 'a head.' A name given to muscles that have three fleshy bundles at one of their extremities.

TRICEPS ADDUCTOR FEMORIS. Under this appellation are comprehended three distinct muscles:—*Adductor brevis*, *A. longus*, and *A. magnus*, (q. v.)

TRICEPS AURIS, *Retrahens auris*—t. *Brachialis*, T. *extensor cubiti*.

The TRICEPS CRURIS, *Trifémoro-rotulien* (Ch.) *Crural*, *Trifémoro-tibi-rotulien*, *Femoralis*, (F.) *Triceps crural*, T. *de la cuisse*, is situate at the anterior, inner, and outer part of the thigh. It is formed of three bundles at its superior extremity, viz. 1. A middle fasciculus (the *cruralis* of most anatomists.) 2. An external fasciculus (the *vastus externus*) and 3. An inner fasciculus (the *vastus internus*.) It is attached, above, to the anterior, inner, and outer surfaces of the femur, and to the two edges of the linea aspera, from the base of the trochanter to within four fingers' breadth of the knee. Below, it terminates by a large tendon, which is attached to the base and edges of the patella, as well as to the inner and outer tuberosities of the tibia. The triceps extends the leg on the thigh, and *vice versâ*.

TRICEPS DE LA CUISSE, T. *cruris*—t. *Crural*, T. *cruris*.

TRICEPS EXTENSOR CUBITI, *Triceps Brachialis*, *Scapulo-huméro-olecranien* (Ch.) (F.) *Triceps brachial*. This muscle, which occupies all the posterior part of the os humeri, is described as two muscles by Douglas, and as three by Winslow.

It arises by three heads. The first or long head,—long head of the *biceps externus* of Douglas, *Anconcus major* of Winslow—arises from the anterior extremity of the inferior costa of the scapula, near its neck, and below the origin of the *teres minor*. The second head, or short head of the *biceps externus* of Douglas, *Anconcus externus* of Winslow, arises from the upper and outer part of the os humeri, at the base of the great tuberosity; and the third head—*Brachialis externus* of Douglas, *Anconcus internus* of Winslow, the shortest of the three, arises from the back part of the os humeri, be-

hind the flat tendon of the *latissimus dorsi*. These three portions unite about the middle of the arm, so as to form one thick and powerful muscle, which is inserted at the upper part of the olecranon. It extends the forearm on the arm, and conversely.

TRICEPS MAGNUS, *Adductor magnus*—t. *Minor*, *Adductor longus femoris*—t. *Secundus*, *Adductor brevis*.

TRICHE INCUBORUM, *Plica*.

TRICHIA, *Entropion*.

TRICHIASIS, *Trichiosis*, *Trichosis*, from *τριχ*, 'hair,' *Morbus pilaris*. This name has been given to several affections. 1. To a disease of the kidneys or bladder, in which filamentous substances, resembling hairs, are passed in the urine. This is also called *Pilimitio*. It must be regarded as a variety of *Catarrhus vesicæ*, (q. v.) 2. To a painful swelling of the breasts, in childbed women, when the milk is excreted with difficulty:—a disease attributed, by Aristotle, to a hair swallowed by accident and carried to the breasts through the circulation; and 3dly, To inversion of the eyelashes. See *Entropion*.

TRICHINA SPIRALIS. Same etymon. A small species of entozoa discovered in the muscles of voluntary motion. They consist of very minute cysts, of an oblong figure having considerable resemblance in size and colour to young pediculi, and are somewhat allied to the eels found in paste and vinegar. No symptoms have as yet been observed to be pathognomonic of their presence.

TRICHIOSIS, *Trichiasis*.

TRICHOS'MUS. Same etymon. *Capilla'tio*, *Fissura pilaris*. A capillary fracture, fissure, or crack.

TRICHOLABIUM, *Madisterium*.

TRICHOLOGIA, *Carphologia*.

TRICHOMA, *Capillamentum*, *Plica*.

TRICHOMANES, *Asplenium trichomanoides*.

TRICHOMATION, *Capillamentum*.

TRICHOSCHISIS, *Schizatrachia*.

TRICHOS'IS, *Pila'rè malum*; same etymon. Morbid organization or deficiency of hair. A genus in the system of Good.

TRICHOSIS, *Entropion*, *Trichiasis*—t. *Area*, *Porrigo decalvans*—t. *Athrix*, *Alopecia*—t. *Distrix*, *Distrix*—t. *Hirsuties*, *Hirsuties*—t. *Plica*, *Plica*—t. *Poliosis*, *Poliosis*—t. *Setosa*, *Hystri-ciasis*.

TRICHOTON, *Scalp*.

TRICHURIS, *Tricocephalus*.

TRICOCEPH'ALUS, *Tricocephalus dispar*; from *τριχ*, 'a hair,' and *κεφαλή*, 'head.' *Trichuris*, *Trichuris vulgaris*, *Trichuris intestinalis*, *Ascaris trichuria*, *Tricocephalus hominis*, *Mustigodes hominis*, long thread worm. A worm, from an inch and a half to two inches long; the head acute; the body spirally involuted in the male, almost straight in the female. The *tricocephalus dispar* generally inhabits the cæcum and colon, and is rarely met with in the small intestines. It gives rise to no peculiar symptoms, and requires the usual anthelmintic treatment.

TRICUS'PID, *Tricus'pis*; from *tris*, for *tres*, 'three,' and *cuspis*, 'a point.' That which has three points.

The **TRICUSPID VALVES**, *Valvulae Tricuspidales* seu *triglochines* seu *trisinca*, are three triangular, valvular duplicatures, formed by the inner membrane of the right cavities of the heart, around the orifice by which the auricle communicates with the ventricle. The elongated and pointed top of each of these valves is continuous with the chordæ tendinæ, which set out from the columnæ carneæ of the heart. These valves are depressed to allow the blood to flow from the auricle into the ventricle; and are raised to prevent its reflux into the auricle.

**TRIENS**, *Un'cia quatuor*. The third part of a pound. Four ounces, Troy.—Galen.

**TRIFACIAL**, Trigemini.

**TRIFÉMORO ROTULIEN**, *Triceps cruris*.

**TRIFÉMORO-TIBI-ROTULIEN**, *Triceps cruris*.

**TRIFOLIUM ACETOSUM**, *Oxalis acetosella*—t. Aquaticum, *Menyanthes trifoliata*—t. Aureum, *Hepatica triloba*—t. Cervinum, *Eupatorium cannabinum*—t. Fibrinum, *Menyanthes trifoliata*—t. Hepaticum, *Anemone hepatica*.

**TRIFOLIUM MELILO'TUS OFFICIN'ALIS**, *Melilotus*, *Lotus sylvestris*, *Scutula Compa'na*, *Trifolium caballinum*, *Coro'na regia*, *Trifolium odoratum*, *Common melilot*, (F.) *Mcililot*. Family, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The infusion or distilled water of this plant has been employed in cases of ophthalmia. It has also been used in fomentations, gylsters, &c.

**TRIFOLIUM PALUDOSUM**, *Menyanthes trifoliata*—t. Palustre, *Menyanthes trifoliata*.

**TRIGAS'TRIC**, *Trigas'tricus*, *Triven'ter*; from *τρεις*, 'three,' and *γαστήρ*, 'belly.' That which has three bellies. An epithet for muscles so circumstanced.

**TRIGEMINI**, from *tris*, 'three,' and *gemini*, 'double;' 'threefold,' 'triplets.' The fifth pair of nerves, *Par trigeminum*, *Nervi d'ri'si*, *N. gustatorii*, *Nervus quintus*, *Par quintum nervorum cerebrulium*, *N. tre'mellus*, *N. mixtus*, *N. sympathicus medius*, *N. sympathicus medius*, *N. anony'mus*, *N. innominatus*, *Par trium funiculorum*, *Trifacial*, *Nerf gustatif*, *innominé*, *Nerf à trois cordes*, (F.) *Nerfs trizumeaux*. This nerve arises below the tuber annulare by one large posterior root from the corpora restiformia, and by two small anterior roots from the corpora olivaria, whence, proceeding forwards to the side of the sella turcica, the filaments composing the large root form a ganglion—the Gasserian. Emerging from this ganglion, the filaments, of which the large root consists, form, with those constituting the small roots, and which had not passed through the ganglion, two flattened trunks, each of which is soon divided into three branches, in such a manner, however, that the first, or *ophthalmic branch*, and the second or *upper maxillary*, are composed exclusively of the filaments that arose from the corpora restiformia and passed through the Gasserian ganglion; whilst the *third or lower maxillary branch* is composed in part of those filaments, and in part of those that arose from the corpora olivaria, and passed on one side of the ganglion without going through it.

The whole, therefore, of the first and second branches and a part of the third are sensiferous

nerves, whilst the remaining part of the third—the *manducatory or masticatory*—is wholly motiferous, and passes to the pterygoid and other muscles concerned in mastication.

**TRIGÔNE CÉRÉBRAL**, Fornix—t. *Vésical*, see Urinary Bladder.

**TRIGONELLA FENUM**, *Fa'nugreck*, *Fenum Græcum*, *Bu'ceras*, *Carphos*, *JEGoe'eras*. (F.) *Fénugrec*. Family, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of the south of France. The seeds have a strong, disagreeable smell, and an unctuous, farinaceous taste; accompanied by a slight bitterness. They are chiefly used in poultices.

**TRIGONOS**, Triangular.

**TRIGONUS LIEUTAUDI**. See Urinary bladder.

**TRIOR'CHIS**, *τριορχις*, from *τρεις*, 'three,' and *ορχις*, 'a testicle.' One who has three testicles.

**TRIOS'TEUM PERFOLIA'TUM**. *Bastard Ipecacuan'ha*, *Fever Root*. In very large doses, the bark of the root proves emetic. It is a good cathartic, in doses of twenty or thirty grains. It sometimes operates as a diuretic.

**TRIPHARMACUM**, *τριφάρμακον*. A medicine composed of three ingredients.

**TRIPSI**, Trituration.

**TRIQUETRUM**, (OS), Cuneiform, (bone.)

**TRISMUS**, from *τριζω*, 'I gnash.' *Ento'sia Trismus*, *Capis'trum*, *Tonos Trismus*, *Locked Jaw*, *Spasmus maxille inferio'ris*, *Tetanus maxillæ inferio'ris*, *Tortura Oris*, (F.) *Mal de Machoire*. Spastic closure of the under jaw; a partial tetanus. Cullen makes two varieties—*T. nascentium*, *Sarrete*, attacking infants during two weeks from birth; and *T. traumaticus*, originating from a wound.

**TRISMUS CAPISTRATUS**, *Brédissure*—t. *Catarhalis maxillaris*, *Neuralgia maxillaris*—t. *Clo-nicus*, *Neuralgia faciei*—t. *Dolorificus*, *Neuralgia faciei*—t. *Maxillaris*, *Neuralgia faciei*.

**TRISPERMUM**, *τρισπερμιον*, from *τρεις*, 'three,' and *σπερμα*, 'a grain or seed.' A cataplasm, consisting of three seeds,—*cumin*, *bay*, and *smallage*.—Gorræus.

**TRISPLANCHNIA**, Cholera.

**TRISPLANCH'NIC**, *Trisplanch'nicus*; from *τρεις*, 'three,' and *πλαγχνον*, 'viscus.' That which relates to three orders of viscera.

The **TRISPLANCHNIC NERVE**, *Great sympathet'ic*, *Intercos'tal*, *Ganglion'ic nerve*, *Nerve of organ'ic life*, *Vertebral nerve*:—named by Bichat the *organic nervous system*, in opposition to the other nervous parts, called the *animal nervous system*. Gall terms it, the *nervous system of the automa'tic functions*. It is called *Trisplanchnic*, because it distributes its branches to the organs in the three great splanchnic cavities—the head, chest, and abdomen. It is composed of a series of ganglia, united by intermediate branches, and passing along the side of the spine to the lowest part of the trunk; communicating, by a branch, with each of the thirty pairs of spinal nerves and several of the cerebral nerves; and detaching nerves from its several ganglia, which accompany the arteries, and are distributed, particularly, to the organs of involuntary functions. At its upper part it is concealed in the canalis caroticus and cavernous sinus, and is joined there by a branch of the 6th pair of

nerves and by a twig from the Vidian nerve of the 5th pair. In passing down by the side of the spine, it forms three ganglia in the neck:—the *superior*, *middle*, and *inferior*; 12 in the back,—the *thoracic*; 5 in the loins—the *lumbar*; and three or four *sacral*. When it reaches the coccyx it unites with its fellow from the opposite side, forming a small ganglion—the *coccygeal*. Meckel divides it into two portions—1. The *central ganglions* or *central part*, composed of the numerous ganglionic plexuses in the abdomen; the centre of which is the *semilunar* and *solar plexuses*. 2. The *external ganglions*, *Limitrophes* or *external part*, which comprise the series of ganglions, situate at the sides of the spine, from the base of the cranium to the sacrum.

The great sympathetic seems to form a distinct nervous system, destined for the organs of involuntary motion; for, although communicating with both brain and spinal marrow, it does not seem to be immediately under the influence of either.

TRISSAGO, *Teucrium chamædrys*.—*t. Palustris*, *Teucrium scordium*.

TRISTEMANIA, Melancholy.

TRISTERNAL. Béchard has given this name to the third bony portion of the sternum;—that which corresponds to the third intercostal space.

TRISTIA, Athymia.

TRITÆOPHYES, *Tritæophya*, from *τριταως*, 'tertian,' and *φυω*, 'I originate.' A fever, whose type approaches the tertian. Sauvages gave the name *Tritæophya Vratislaviensis* to an epidemic, which broke out in the Prussian army at Breslaw, in the middle of the last century.

TRITÆUS, Tertian fever.

TRITICUM ÆSTIVUM, TRITICUM HYBERNUM, *Wheat*, *Pyros*, *Frumentum*, (F.) *Froment*, *Family*, Gramineæ. *Sex. Syst.* Triandria Digynia. From these plants our wheat flour is obtained, by grinding the seeds; and to them we are indebted for our bread and pastry. The nutritive properties of wheat flour are so well known as not to need comment.

Bread, (F.) *Pain*, mixed with milk, constitutes the ordinary emollient poultice;—and the *crumbs of bread*, *Micæ panis*—are a common excipient for pills and boluses.

TRITICUM FAGINUM, *Polygonum fagopyrum*.

TRITICUM REPENS, *Gramen caninum*, *Gramen Dioscoridis*, *G. repens*, *Lolium radiçæ repens*, *Dog's grass*, *Couch grass*, (F.) *Chien-dent*. The roots are sweet and possess aperient properties. They are said, also, to be diuretic.

TRITIO, Contritio, Trituration.

TRITURA, Contritio.

TRITURATIO, *Trituratio*, *Tritura*, *Tri-tio*, *Tripsis*. The act of reducing a substance to powder.

TRITURATIO, Contritio.

TRITUS, Contritio.

TRIVENTER, Trigastic.

TROCAR, *Acus paracæntica*, *A. triquetra vulgæris*, *Paracæntion*, *ταρακεντιζιον*. Corrupted from the (F.) *Troisquarts* or *Trocart*, "three quarters;" so called from the triangular shape of the point, *Triquetrum*:—an instrument used for evacuating fluids from cavities, particularly in ascites, hydrocele, &c.

A trocar consists of a perforator or stilet and of a cannula, which is so adapted to the perforator, that, when the puncture is made, both enter the wound with facility; after which, the stilet being withdrawn, the cannula remains in the wound and affords the fluid a ready passage outwards.

TROCARD, Trocar.

TROCH, Trochiscos.

TROCHAN'TER, *Trochanter*, *Rota'tor*, from *τροχων*, 'I turn.' Anatomists have given the names—*great* and *little trochanter* to two processes at the upper extremity of the femur. The *great trochan'ter* is the one on the outside; the *less* is lower down and more internally. Both afford attachment to rotator muscles of the thigh, and hence their name. Chaussier, by the word *trochanter*, means the larger process; the smaller he calls *trochantin*.

TROCHANTE'RIAN, *Trochanteria'nus*, *Trochanteria'nus*. That which belongs or relates to the great trochanter.—Chaussier.

TROCHANTIN'IAN, *Trochantin'ian*, *Trochantinia'nus*. That which belongs or relates to the trochantin or lesser trochanter.

TROCHES OF CARBONATE OF LIME, *Trochisci carbonatis calcis*.—*t. Escharotic*, *Trochisci escharotici*.—*t. Gum*, *Trochisci gummosi*.—*t. Liquorice*, *Trochisci glycyrrhizæ*.—*t. Liquorice*, with opium, *Trochisci glycyrrhizæ cum opio*.—*t. Nitre*, *Trochisci nitratis potassæ*.

TROCHIA, Orbit.

TROCHILIA, Trochlea.

TROCHIN, from *τροχων*, 'to turn.' Chaussier has given this name to the smaller of the tuberosities, at the upper extremity of the os humeri; because it gives attachment to one of the rotator muscles of the arm,—the subscapularis.

TROCHIN'IAN, *Trochinia'nus*. That which belongs or relates to the trochin.

TROCHIS'CUS, *Phthois*, *Artis'cus*, *Collix*, *Colix*, *Phthois'cos*, *Rot'ula*, *Cyclis'mos*, diminutive of *τροχος*, 'a wheel.' A *troch* or *round tablet*, (F.) *Trochisque*. See *Pastil* and *Tabella*. A solid medicine, prepared of powders, incorporated by means of mucilage, crumb of bread, juices of plants, &c. In French nomenclature—the *trochisque* differs from the *tablette*,—the former containing no sugar. This form of preparation is adopted for the purpose of allowing the medicines, of which the troch is composed, to dissolve slowly in the mouth, and to pass gradually into the stomach.

TROCHISCI BECHICI NIGRI, *Tr. glycyrrhizæ glabræ*.

TROCHISCI CARBONATIS CALCIS, *Trochcs of Carbonate of lime*, *Tabella ad ardo'rem ventriculi*, *Lozenges for the heartburn*, *Tabellæ cardiagogicæ*, *T. ad sodam*, *Trochisci e cretâ*. (*Carb. calc. ppt. ℥iv, g. acaciæ ℥j, nuc. moschat. ℥j, sacch. pur. ℥vj*. M. Form into troches with water. *Ph. E.*) Antacid and absorbent.

TROCHISCI E CRETA, *Tr. carbonatis calcis*.

TROCHISCI VEL PASTILLI EMETICÆ PECTORALES, *Pectoral Lozenges of Emetine*. (*Sugar, ℥iv, emetine, 32 grains*. Form into lozenges of 9 grains each.) One is a dose.

TROCHISCI ESCHAROTICI, *Escharot'ic Trochcs*. (*Hydrarg. oxymur. p. 8, amyli. p. 16, mucilag. g. tragac. q. s.* Make into troches to which a

few drops of laudanum may be added.) Used in foul ulcers, to remove excrecences, &c.

TROCHISEI ESCHAROTICI DE MINIO. (*Oxyd. plumbi. rubr.* p. 16, *hydrarg. oxyzur.* p. 32, *mic. panis.* p. 128, *aq. rose.* q. s.) Used like the last.

TROCHISEI GLEYEYRRHIZÆ GLABRÆ, *Liquorice Troches*, Black pectoral lozenges, *Trochisci bechl'ici nigri.* (*Ext. glyc. glabr.*, *gum. acac.* āā, p. j, *sacch. purif.* p. ij.) Dissolve in warm water; strain; evaporate, and form into troches. *Ph. E.*) Demulcent. To allay cough.

TROCHISEI GLEYEYRRHIZÆ CUM OPIO, *Trochisci Theba'ici*, *T. sedati'vo-balsam'ici*, *T. pectorales regis Danor'um*, *Liquorice Troches with Opium.* (*Opii* ʒij, *tinct. bals. tolu.* ʒiv, *syryp. simpl.* ʒviij, *ext. glycyrrh. glabr.*, *g. acacia* āā ʒv. Make into troches. *Ph. E.*) Demulcent and anodyne.

TROCHISEI GUMMOSI, *Gum Troches.* (*G. acac.* p. v. *amyli*, p. i. *sacch. pur.* p. xij. Make up the troches with mucilage of tragacanth. *Ph. E.*) Demulcent.

TROCHISEI NITRATIS POTAS'Æ, *Nitre Troches.* (*Nitrat. potasse*, p. j, *sacch. pur.* p. iij. Make into troches with mucilage of tragacanth. *Ph. E.*) In slight inflammatory sore throat and fever.

The Parisian Codex has two formulæ for troches, for external use.

TROCHISCI PECTORALES REGIS DANORUM, *Tr. gleyeyrrhizæ cum opio*—*t. Sedativo-balsamica*, *Tr. gleyeyrrhizæ cum opio*—*t. Stibiati*, *Tabellæ antimonialia Kunckelii*—*t. Thebaici*, *Tr. glycyrrhizæ cum opio.*

TROCHISQUE, Trochiscos.

TROCHTER, from τροχῆιρ, 'to turn.' The larger of the two tuberosities at the upper extremity of the os humeri; so called because it affords insertion to rotator museles.—(Chaussier.)

TROCHITER'IAN, in the language of Chaussier, means any thing belonging or relating to the trochiter.

TROCHLEA, *Trochilia*, (F.) *Trochlée* ou *Trochlée*. A pulley; from τροχῶν, 'I turn.' The articular surface at the lower extremity of the os humeri; so called from its forming a kind of pulley on which the ulna moves, in flexion and extension of the forearm.

Also, the cartilaginous pulley, over which the tendon of the trochlearis musele passes, at the upper and inner part of the orbit.

TROCHLEARIS, *Obliquus superior oculi.*

TROCHLEATEUR, *GRAND*, *Obliquus superior oculi*—*t. Petit*, *Obliquus superior oculi.*

TROCHILÉE, Trochlea.

TRO'CHOID, τροχοειδης, from τροχος, 'a wheel,' and εἶδος, 'resemblance.' *Trocho'ides*, *Axa commissu'ra*. An articulation, in which one bone turns upon another, like a wheel upon its axle; such as the *Atlo'i-do-axoid articulation*.

TROCHOIDES, *Axa commissura.*

TROISQUARTS, Troear.

TROKANTER, Trochanter.

TROKANTERIAN, Trochanterian.

TROKANTINIAN, Trochantinian.

TROKLÉE, Trochlea.

TROMPE, Tuba—*t. d'Eustache*, *Eustachian tube*—*t. de Fallope*, *Tuba Fallopiana*—*t. Uérine*, *Tuba Fallopiana.*

TROMUS, Tremor.

TROYC, Trunk—*t. Brachial*, *Brachial artery*—*t. Basilaire*, *Basiliary artery.*

TROPÆOLUM MAJUS, *Indian Cress*, *Nasturtium Indicum*, *Acriv'ola*, *Flos sanguin'us monar'di*, *Nasturtium Peruvia'num*, *Cardamin'um minus*. *Family*, Geraniaceæ. *Sex. Syst.* Oetandria Monogynia, (F.) *Cresson des Indes*, *Cresson du Mexique*, *Capucine*. An antiseorbatic.

TROPHALIS, Colostrum.

TROPHE, Aliment, Cibatio, Pabulum.

TROPHIMOS, Nutritious.

TROPHODES, Nutritious.

TROPHON'OSI, *Trophon'osi*; from τροφη, 'nourishment,' and ροσος, 'a disease.' Diseases of nutrition.

TROSTER. See Spirit.

TROU, Foramen—*t. Anonyme*, *Foramen stylomastoideum*—*t. Arcugle* ou *Borgne*, *Cæcum foramen*—*t. de Botal*, *Botal foramen*, *Ovale foramen*—*t. Déchiré antérieur*, *Lacerum antérieur foramen*—*t. Déchiré postérieur*, *Lacerum posterius foramen*—*t. Épincuz*, *Spinale foramen*—*t. Mentonnier*, *Mental foramen*—*t. Optique*, *Foramen optieum*—*t. Orbitaire supérieur*, *Foramen supra-orbitarium*—*t. Orbitaire supérieur*, *Orbital foramen superior*—*t. Ovale*, *Ovale foramen*—*t. Rond*, *petit*, *Spinale foramen*—*t. Sous-orbitaire*, see *Suborbital canal*—*t. Sous-pubien*, *Obturatorium foramen*—*t. Sphéno-épineuz*, *Spinale foramen*—*t. Sus-orbitaire*, *Foramen supra-orbitarium.*

TROUS CAROTIDIENS, *Carotica foramina*—*t. Condyloldiens*, *Condyloldica Foramina*—*t. de Conjugaison*, *Conjugationis foramina*—*t. de Conjugaison*, see *Vertebrae*—*t. Olfactifs*, *Olfactory foramina*—*t. Rachidiens*, *Spinal foramina.*

TROUSSEAU, Faiseiulus.

TROUSSEAUX ARRIÈRE-MÉSENTÉRIQUES, (F.) A name given by Winslow to the nervous plexus situate between the two mesenteric plexuses, of which it is a dependence, and which descends into the pelvis to concur in the formation of the hypogastric plexus.

TRUBS, Lycoperdon tuber.

TRUELOVE, Paris.

TRUFFE, Lycoperdon tuber.

TRUFFLE, Lycoperdon tuber.

TRUMBUS, Thrombus.

TRUMPETWEED, Eupatorium purpureum.

TRUNK, *Truncus*, (F.) *Tronc*. The principal part of the body, to which the limbs are articulated. The trunk has been divided into three parts;—a *superior*, the *head*:—a *middle*, the *thorax*,—and an *inferior*, the *pelvis*. These three regions contain the great splanchnic cavities. They are united by a common *stalk*—the vertebral column. To the *middle*, are articulated the superior extremities; and, to the *inferior*, the lower extremities.

The *trunk* of an artery, vein, nerve, or lymphatic is its largest part, which has not yet given off branches. It is, also, applied to the parent vessel, after branches have been sent off.

TRUSS, from (F.) *Trousser*, 'to tie up,' *Brach'rium*, *Brachriolum*, *Amma*, (F.) *Brayer*. A hernial bandage, for keeping the hernia reduced. The ancient trusses were inelastic. They consisted simply of a pad and strap. At the present day, elastic bandages are alone employed. They possess the advantage of making

an equable and continuous pressure on the aperture of the sac; and of yielding to the changes of form in the abdominal parietes.

The most important part of these bandages is a piece of narrow steel, flat and adapted to the shape of the body. This is the *spring*, (F.) *Ressort*. It embraces the body on the side affected; extends from beyond the spine, and terminates opposite the ruptured part, by an iron plate to which it is riveted. The posterior surface of this plate is furnished with a convex *pad*, (F.) *Pelote*, adapted in shape and size to the aperture which it has to close. The spring is covered with leather, and its inner surface is padded; a strap extends from its posterior extremity; passes round the sound side, and is attached to the plate of the pad. This strap is pierced with numerous holes, which allow the patient to tighten or slacken it at pleasure.

Trusses have been variously constructed; and different patents obtained for the modifications. They all act upon the above principle. Sometimes they have a double pad.

TRYGODES, Feculent.

TRYPANON, Trepan.

TRYPESIS, Trepanning.

TRYPESIS, Friction.

TSIANA, Costus.

TSJAMPACA, *Michelia champaca*.

TUBA, *Tube*, *Trumpet*, *Salpinx*, (F.) *Trompe*. A name given to some parts, which are hollow and have the shape of a trumpet.

TUBA ARISTOTELICA, Eustachian tube—*t. Cæca*, *T. Fallopiana*.

The TUBA FALLOPIA'NA, *Oviductus mulie'bris*, *Vas deferens mulieris*, *Tuba uteri'na*, *T. cæca*, *Ductus varicosus*, seu *Proces'sus lateralis*, seu *Méatus seminalis*, seu *Méatus seminarius uteri*, (F.) *Trompe de Fallope*, *T. utérine*, is a canal, floating in the abdomen, and extending on each side from the superior angles of the uterus as far as the sides of the brim of the pelvis. They are 4 or 5 inches long. Near the uterus, they are straight and very narrow; but, in their course, they widen, become tortuous, and terminate by a free, expanded, and *fimbriated extremity*; called, also, *Folium ceum ornamentum*, *Morsus diab'oli*, (F.) *Morceau brangé*, *Pavillon de la trompe*, *Morceau du diable*. Within, the tubes are hollow and lined by a mucous membrane: the tissue, which it lines, is spongy and erectile.

The use of the Fallopian tubes is to conduct the sperm to the ovary, and the fecundated ovum back to the uterus. They establish a communication between the cavity of the peritoneum and that of the uterus.

TUBA UTERINA, *T. Fallopiana*.

TUBE, FALLOPIAN, *Tuba Fallopiana*.

TUBER, *Hump*, *Lycoperdon tuber*, *Tubercle*.

TUBERCINE'REUM. A grayish tubercle, seen at the base of the brain behind the commissure of the optic nerves, which is continuous with the infundibulum.

TUBER PELLAGRA, *Pellagra*—*t. Atloido-occipital*, *Rectus capitis posticus minor*—*t. Cibarium*, *Lycoperdon tuber*—*t. Gulosorum*, *Lycoperdon tuber*—*t. Ischio-trochanterien*, *Quadratus femoris*—*t. Ischii*, see *Ischiatic*—*t. Tympani*, *Promontory of the tympanum*.

TUBERA TERRÆ, *Lycoperdon tuber*.

TU'BERCLE, *Tuberculum*, *Tuber*. A tumour in the substance of organs, from the production of new matter:—sensation dull; growth sluggish. In *Pathological Anatomy*, the term is given to a species of degeneration which consists of an opaque matter, of a pale yellow colour; this, in its crude condition, has a consistence analogous to that of concrete albumen, but greater: it subsequently becomes soft and friable, and gradually acquires a consistence and appearance analogous to those of pus. Tubercles may be developed in different parts of the body; but they are most frequently observed in the lungs and mesentery. Pulmonary tubercles are the cause of *Tubercular Phthisis*. *Mesenteric tubercles* are often met with in the same affection, but particularly in *Tubes Mesenterica*, (q. v.) Laënnec classes the tubercles among the accidental tissues, which have no resemblance to the natural tissues, and which never exist except in consequence of morbid action. Others consider them as a scrofulous degeneration. Broussais conceives that they are produced exclusively by inflammation of the white vessels.

When tubercles in any organ are few in number, they may pass to the state of permanent induration without danger to the patient; but when they are very numerous, they usually cause serious mischief. Dr. Baron considers, that they are produced by hydatids.

The morbid condition, which gives rise to the development of tubercles, is termed *Tuberculo'sis*, *Morbus tuberculosus*, and *Dyscrasia Tuberculosa*.

TUBERCLES DES GLANDES LYMPHATIQUES, *Scrofula*—*t. Pisiformes*, Mamillary tubercles—*t. Quadrifurcaux*, *Quadrige'mina corpora*.

TUBERCUA ARANTII, *Corpora Arantii*, *Corpuscula Arantii*, *Tubercles of Arantius* or *Aranzi*. Small eminences at the middle part of the semilunar valves of the pulmonary artery and aorta.

TUBERCUA NERVORUM NODOSA, *Ganglions*, nervous—*t. Parva duræ matris*, *Glandulæ Pachioni*.

TUBERCULAR, *Tuberculous*, *Tuberculosus*, *Tuberculate*, (F.) *Tuberculeux*. That which relates to tubercles, or which is formed by tubercles.

TUBERCULAR CONSTITUTION or Diathesis, *Phthisio'sis*, is the habit of body which predisposes to tubercular phthisis; as *Tuberculous Cachexia* is the condition of one labouring under Tuberculosis.

TUBERCULAR PHTHISIS is that produced by the development of tubercles in the lungs.

TUBERCULAR MATTER is a morbid production, contained in cysts, or loose in the tissue of organs. It varies, in its consistence, at the different periods of the tubercular affection; being, at first, compact, and yellowish, and, at times, calcareous; afterwards pulraceous, semifluid, and curdy.

TUBERCULATE, *Tubercular*.

TUBERCULATE SARCO'MA of ABERNETHY, *Empy'ma Sarcoma tuberculosum*, *Tumor tuberculosus*. Tubercles, firm, round, and clustering; pea-sized or bean-sized; yellowish or brownish-

red; when large, disposed to ulcerate, and produce a painful, malignant, and often fatal sore. Found chiefly in the lymphatic glands of the neck; often, simultaneously, in other glands and organs.

**TUBERCULEUX**, Tubercular.

**TUBERCULOSIS**. See Tubercle.

**TUBERCULOSIS PULMONUM**, Phthisis Pulmonalis.

**TUBERCULOSUS**, Tubercular.

**TUBERCULOUS**, Tubercular.

**TUBERCULOUS DISEASE OF THE LUNGS**, Phthisis pulmonalis.

**TUBERCULUM CINEREUM**, *Fasciola cinerea*. A mass of cineritious substance at the top of the calamus scriptorius, which is continuous below with the posterior horn of cineritious substance in the cord, and upon the sides with the corpus testiforme.

**TUBERCULUM LOWERI**, Lower, tubercle of.

**TUBEROSITAS TYMPANI**, Promontory of the tympanum.

**TUBEROSITÉ BICIPITALE**, Bicipital tubercle—*t. Sciatique*, see Ischiatic.

**TUBEROSITY**. Anatomists have given this name to eminences or processes, the surface of which is unequal and rough; and which give attachment to muscles or ligaments.

**TUBI MEMBRANACEI**, see Villous membranes.

**TUBULI DURÆ MATRIS**, Sinuses of the dura mater—*t. Pelvis renum*, see Calix—*t. Uriniferi Bellini*, Uriniferous tubes.

**TUBULUS**, Canula.

**TUBUS ACUSTICUS**, Ear-trumpet—*t. Nervorum*, Neurilema.

**TUE-CHIEN**, Colchicum autumnale.

**TULIP TREE**, Liriodendron.

**TULIPIER**, Liriodendron.

**TUMEFACTIO**, Swelling—*t. Mollis*, Puffiness.

**TUMEUR**, Tumour—*t. Anomale*, see Hæmatodes fungus—*t. Blanche*, Hydrarthrus—*t. Courbeuse*, see Hæmatodes fungus—*t. Erectile*, see Hæmatodes fungus—*t. Lymphatique des articulations*, Hydrarthrus—*t. Variqueuse*, see Hæmatodes fungus.

**TUMOR**, Swelling—*t. Albus*, Hydrarthrus—*t. Carneus*, Sarcoma—*t. Cysticus*, Encystis—*t. Cysticus scroscus*, Hygroma—*t. Ficosus*, Ficus—*t. Flatulentus*, Emphysema—*t. Fungosus sanguineus*, Hæmatodes fungus—*t. Gangliiformis*, Ganglion, nervous—*t. Squamiformis carnosus*, Lepidosarcoma—*t. Tuberculosus*, Tuberculate sarcoma—*t. Tunicatus*, Eucystis.

**TUMOUR**, from *tumco*, 'I swell'; *Oncos*, *Oncosis*, *Epar' ma*, *Eparsis*, *Emphy' ma*, *Excrescent'ia* (Sauvages,) *Echphy' ma*, (F.) *Tumeur*. Risings or prominences, of greater or less size, developed by a morbid cause in some part of the body. Cullen defines a tumour to be "a partial swelling without inflammation." Sauvages restricts the term to risings formed by the congestion of a fluid; and he calls *excrescences* those which have a fleshy or osseous consistence. Boyer defines it "any preternatural eminence developed in any part of the body." Good uses it synonymously with tubercle. Boyer's is the best general definition.

Tumours differ greatly from each other; ac-

ording to their seat, the organs interested, their nature, &c.

The French use the term *Tumeur blanche* synonymously with *White swelling*;—see Hydrarthrus. The term is, however, applied by the generality of surgeons, to swellings of the greater joints, without change of colour of the skin, and of a more or less firm consistence, which are dependent upon disease of the osseous or of the soft parts about the joint.

Scrofula is the most common cause of these affections.

An **ERECTILE TUMOUR** is a tumour, produced by the development of a soft, vascular tissue, which is susceptible of dilatation and depression. See Erectile.

A **VARICOSE TUMOUR**, *Tumor varicosus*, is a circumscribed, bluish tumour, formed by the dilatation and turgescence of the capillary vessels of a part.

**TUNBRIDGE, MINERAL WATERS OF**. A celebrated acidulous chalybeate in Kent, England, which is much frequented.

**TUNIC**, *Tu'nicæ*, *Chi'ton*, a coat. An envelope. A name given to different membranes, which envelop organs; such are, the tunics or coats of the eye, stomach, bladder, &c.

**TUNICA ACINALIS**, Uvea—*t. Aciniformis*, Uvea—*t. Acinosa*, Uvea—*t. Adnata*, Conjunctiva—*t. Agnata*, Conjunctiva—*t. Alba oculi*, Sclerotic—*t. Albuginea*, Albuginea—*t. Albuginea oculi*, Sclerotic—*t. Arachnoides*, Arachnoid membrane—*t. Aranea*, Arachnoid membrane—*t. Caduca*, Decidua—*t. Candida oculi*, Sclerotic—*t. Carnosa*, Panniculus carnosus—*t. Conjunctiva*, Conjunctiva—*t. Costalis*, Pleura—*t. Crassa*, Decidua—*t. Dura oculi*, Sclerotic—*t. Durior et crassa*, Sclerotic—*t. Elytroides*, Vaginalis tunica—*t. Erythroides*, Cremaster—*t. Exterior ovi*, Decidua—*t. Extima oculi*, Sclerotic—*t. Filamentosa*, Decidua—*t. Hortensis*, Dianthus caryophyllus—*t. Innominata oculi*, Sclerotic—*t. Interna oculi*, Retina.

**TUNICA JACOBI**. A highly delicate serous membrane, interposed between the retina and the choroid coat, discovered by Dr. Jacobs, of Dublin.

**TUNICA MUSCULARIS**, Dartos—*t. Nervorum*, Neurilema—*t. Prætensa abdominis*, Peritonæum—*t. Reticularis*, Retina—*t. Retiformis*, Retina—*t. Rubicunda scroti*, Dartos—*t. Rubra*, Dianthus caryophyllus—*t. Subcostalis*, Pleura—*t. Thoracis*, Corset—*t. Uvalis*, Uvea—*t. Uviformis*, Uvea—*t. Vaginalis Linguae*, see Tongue—*t. Vitrea*, Hyaloid membrane.

**TUNIQUE ALBUGINEE**, Albuginea.

**TUNNYFISH, SALTED**, Omotarichos.

**TUPHLO-ENTERITIS**, Typhlo-enteritis.

**TUPHUS**, Typhus.

**TURBINATED BONES**, *Ossa turbinata*, *Ossa spongio'sa*, *Cornua*, *Conchæ na'rium*, *Conchylia*, *Bucci'næ*, *Lam'inæ spongio'sæ nasi*, *Ossa tertia maxill'æ superioris*. Very thin, bony plates, rolled up in the form of horns, and situate in the nasal fossæ.

1. The *Os spongiosum superius* or *Cornet de Morgagni*;—the highest.

2. The *Os spongiosum medium*, the middle cornu of French anatomists,—the *ethmoidal cornu* or *Os spongiosum superius*, *Os turbinatum*, of English anatomists,—*Os convolutum*,

*superius, Concha, (F.) Cornet Moyen.* This bone projects inwards and downwards into the cavity of the nose, from the ethmoid cells at the side of the nasal lamella, and serves to enlarge the organ of smell. It is convex towards the septum, and concave outwards.

3. The *Os spongiosum vel turbinatum inferius, Concha inferior, Convolutum inferius os, Os sous-ethmoidal, (Ch.)* projects at the under part of the side of the nose, is convex towards the septum, and concave outwards. It is connected to the *os maxillare, os palati, and os unguis.*

4. The *Sphenoid'al cornua, (q. v.)*

All the turbinated bones extend the sphere of smell.

**TURBITH BLANC,** *Globularia Alypum*—t. Mineral, *Hydrargyrus vitriolatus*—t. Montpellier, *Globularia alypum*—t. Plant, *Convolvulus turpethum.*

**TURGENTIA,** *Turgescence.*

**TURGES'CENCE,** *Turgescen'tia, Turgen'tia, Orgas'mus,* from *turges'cere,* 'to swell.' Superabundance of humours in a part. The term *Turgescence of Bile,* was formerly used to denote the passage of that fluid into the stomach, and its discharge by vomiting.

A vital action of *Turgescence*—*Turgor vitalis*—or expansibility has been presumed to exist in certain organs, as in the capillaries; but the generality of physiologists do not admit it.

**TURGESCENTIA VESICULÆ FELL'Æ,** *Asci'tes hepato-cysticus, Physco'nia bilio'sa, Hepatal'gia Pettit'na.* Distention of the gall-bladder by bile.

**TURGOR VITALIS.** See *Turgescence.*

**TURMERIC,** *Curcuma longa, Sanguinaria Canadensis.*

**TURNING, Versio,** from (F.) *turner,* 'to turn,' (F.) *Version.* The operation of bringing down the feet, or some part of the lower extremity, when the presentation of the child is such, that it cannot be delivered by the natural efforts.

**TURNIP,** *Brassica rapa*—t. Indian, *Arum triphyllum.*

**TURPENTINE, Terebinthina**—t. Briançon, see *Pinus cembra*—t. Chio, see *Pistacia terebinthus*—t. Common, see *Pinus sylvestris*—t. Cyprus, see *Pistacia terebinthus*—t. Horse, see *Pinus sylvestris*—t. Strasburg, see *Pinus picea*—t. Tree, *Pistacia terebinthus*—t. Venice, see *Pinus larix*—t. Venice, true, see *Pistacia terebinthus.*

**TURPETHUM,** *Convolvulus turpethum*—t. Minerale, *Hydrargyrus vitriolatus*—t. Nigrum, *Hydrargyri oxydum cinereum.*

**TURQUOISE.** This stone has been long imagined to change its colour as the wearer is at the time in good or bad health:—a superstitious notion.

**TURRE'IS.** Ancient name of a stone, to which was attributed the property of preventing fractures in cases of falls.—Johnson.

**TURUNDA,** Tent.

**TUSSEDO,** *Tussis.*

**TUSSILAGO, T. Far'fara, Be'chium, Be'chion, Cal'ceum equi'num, Chamæleu'cæ, Chamæge'ron, Fil'ius ante patrem, Farfarel'ta, Gallio-marchus, Farfara, Tussil'ago vulgari's, Farfara**

*Bechium, Ungula caball'ina, Coltsfoot, (F.) Pas d'ane. Family, Corymbifereæ. Sez. Syst. Syn-genesia Polygamia Superflua.* It is demulcent and expectorant, and has been used in coughs, and pulmonary affections in general, and in some cutaneous diseases.

**TUSSILAGO PETASITES, Butterbur, Petasites, Pestilent-wort, Petasites major, P. vulgaris, P. rubens.** The roots of this plant have been recommended as aperient and alexipharmic.—They have a strong smell; and a bitterish, acid taste, of the aromatic kind, but not agreeable.

**TUSSIS, Cough, Bez, Tussé'do, Bevis, Tussis nervo'sa, Catar'rhus, Pncusis Tussis, (F.) Touz.** Violent, sonorous, frequent, and short expirations; by means of which the air, in passing rapidly through the bronchia and trachea, carries along with it the mucus of the parts, which forms the sputa, (q. v.) The cough is said to be dry, when unaccompanied by expectoration. It is symptomatic of many diseases. See *Bronchitis.*

**TUSSIS CATARRHALIS SIMPLEX, Catarrh**—t. *Clamosa, Pertussis*—t. *Clangosa, Pertussis*—t. *Convulsiva, Pertussis*—t. *Ferina, Pertussis*—t. *Spasmodica, Pertussis*—t. *Suffocativa, Pertussis.*

**TUTAMINA, Tutam'en,** 'a defence,' 'a protection.' Parts are so called which defend or protect others.

The **TUTAMINA CEREBRI** are the scalp, pericranium, bones of the skull, and the meninges.

The **TUTAMINA OCULI** are the eyebrows, eyelids, and lachrymal apparatus.

**TUTENAG, Zincum.**

**TUTHIA, Tutia.**

**TUTIA, Pom'pholyz, Cadmia, Alfasa, Mesera, Capnitis, Tuthia, Oxydum zinci impurum.** The oxyd of zinc that attaches itself to the chimneys of furnaces, in which ores of zinc are smelted. It is in the form of gray incrustations; and is sometimes used for making an eye-salve. It is prepared, for this purpose, by levigation.

**TWINKLING OF THE EYE, Nictation.**

**TWITCHING, Tic.**

**TYCH'ICA,** from *τυχη,* 'accident.' Fortuitous lesions or deformities. The 7th class of Good's *Nosology.*

**TYLOMA, Callosity.**

**TYLOSIS, Callosity.**

**TYMMA, Wound.**

**TYMPAN, Tympanum.**

**TYMPANIA, Tympanites.**

**TYMPANIAS, Tympanites.**

**TYMPANITE, Tympanites.**

**TYMPANITES, Emphyse'ma Abdom'inis, Hydrops Tympanites, Affec'tio tympanit'ica, Pneumato'sis Abdom'inis, Hydrops abdominis aëreus, Physocœ'lia, Tympanosis, Physe'na, Physe'sis, Hydrops siccus et flatulentus, Tympania, Tympan'ias, Tympani'tu, Emphyse'ma Tympanites, Meteorismus, E. Tympanit'icum, Tympany, (F.) Ballonnement, from *τυπανον,* 'a drum;' so called because the abdomen is distended with wind, and sounds like a drum when struck. A swelling of the abdomen, caused by accumulation of air in the intestinal tube or in the peritoneum.**

*Tympanites* may be idiopathic or symptomatic. The former depends upon exhalation of

air from the inner surface of the intestine, or from the decomposition of substances contained in it; the latter is the result of some organic affection, and often depends upon obliteration of the digestive tube, which prevents the gas from escaping. Idiopathic tympanites may be more readily cured. The symptomatic is usually fatal. On dissection, in such cases, the stomach and intestines are found enormously distended; with strangulation or disorganization of some part of the mucous membrane of the intestine. Carminatives may be proper when tympanites depends upon atony of the digestive organs; but, in cases of the symptomatic kind, they cannot be productive of advantage, and may do harm.

Sometimes the air is contained in the cavity of the peritoneum—constituting the *Tympanites abdominalis* of some:—the accumulation in the intestines being called *Tympanites intestinalis*

TYMPANITES, UTERINE, Physometra.

TYMPANITIS, *Inflammatio tympani*; from *τυμπανον*, 'a drum;' and *itis*, denoting inflammation. Inflammation of the lining membrane of the middle ear.

TYMPANOSIS, Tympanites.

TYMPANUM, *τυμπανον*, 'a drum.' The *Drum or Barrel of the Ear*. The names *Cavity of the Tympanum* or *Cavity of the Drum*, *Cavitas Tympani*, *Antrum* seu *Cavitas antrorsa Auris*, *Cavum Tympani*, (F.) *Tympan*, *Cavité du tympan*, *Caisse du tambour*—have been given to a cavity of an irregular shape, which constitutes the middle ear, and has been compared to a drum. It is situate in the pars petrosa of the temporal bone, between the meatus auditorius externus and the labyrinth. This cavity is lined by a mucous membrane; and communicates, externally, by means of the Eustachian tube, which is situate between it and the pharynx. The tympanum has six parietes. 1. An *external*, which is almost entirely formed of the *Membrane of the Drum*, *Membrana tympani*, *Myringa*, *Myrinx*, (F.) *Membrane du tympan*—a species of thin, transparent, circular septum; convex within, and concave without, which closes the inner extremity of the meatus auditorius. 2. An *internal*, on which are the *Fenestra ovalis*, *Promontory*, and *Fornix rotundum*. 3. A *superior*. 4. An *inferior*, on which is the *glenoid fissure*. 5. A *posterior*, on which are, the opening of the mastoid cells, and the pyramid. 6. An *anterior* on which are, the *Processus cochleariformis* and the inner orifice of the *Eustachian tube*. The cavity of the tympanum is crossed by a series of four small bones, articulated with each other by diarthrosis, moved by certain muscles, and representing a kind of bent lever extending from the *membrana tympani* to the *fenestra ovalis*. They are called the *Bones or Ossicles of the Ear*, and are the malleus, incus, orbicular, and stapes.

For the nervous plexus of the tympanum, see *Petrosal Ganglion*, and *Otic Ganglion*.

TYMPANY, Tympanites—t. of the Womb, Physometra.

TYPE, *Typus*, from *τυπος*, 'a stamp,' itself from *τυπω*, 'I strike.' The *type* is the order in which the symptoms of a disease exhibit them-

selves, and succeed each other. It may be continued, intermittent, or remittent.

TYPHA AROMATICA, *Acorus calamus*.

TYPHIQUE, *Typhoid*.

TYPHLO-ENTERITIS, *Typhlo-enteritis*, from *τυφλος*, *cæcus*, and *Enteritis*, 'inflammation of the intestines.' Inflammation of the cæcum, occasionally leading to perforative ulceration.

TYPHLOSIS, *Cæcitis*.

TYPHLOTERON MONOCOLON, *Cæcum*.

TYPHLOTES, *Cæcitas*.

TYPHODES, *Typhoid*.

TYPHOHÆMIA, See *Putrefaction*.

TYPHOID, *Typhoides*, *Typhodes*, *Lactica*, (F.) *Typhique*, *Typhode*. Resembling typhus; as *Typhoid Fever*. Also, typhus, according to some.

TYPHOMANIA, *τυφομανια*, from *τυφος*, 'stupor,' and *μανια*, 'delirium.' *Delirium with stupor*, *Subdelirium*. The kind of delirium common in typhus.

TYPHOMANIA, *Coma vigil*, *Insomnia*.

TYPHONIA, *Coma vigil*.

TYPHOSEPTOSES: from *τυφος*, 'stupor,' and *σηψις*, 'putrefaction.' Typhous affections.

TYPHUS, *Semipestis*, *Typhus*, *Febris Typhodes*, (F.) *Fièvre adynamique*, *F. ataxique*, *Typhus d'Europe*, from *τυφος*, 'stupor.' A fever characterized by small, weak, and unequal, but usually frequent pulse, with great prostration of strength, and much cerebral disturbance; its duration being usually from a fortnight to three weeks or longer. It is continued fever, accompanied with great cerebral irritation and prostration. (See *Fever*.) By most writers, this disease has been divided into two varieties—the *Typhus mitior* and *Typhus gravior*.

1. TYPHUS MITIOR, *T. simplex*, *T. nervosus*, *T. comatosus*, *Febris lenta nervosa*, *Blechnopyrus*, *F. putrida nervosa*, *F. hecatica maligna nervosa*, *Nervous Fever*, *Neuropyra*, (F.) *Fièvre nerveuse*, is characterized by slight shiverings, heavy, vertiginous headache; great oppression, peculiar expression of anxiety, nausea, sighing, despondency, and coma or quiet delirium.

2. The TYPHUS GRAVIOR, *Typhus carcerum*, *T. castrensis*, *Febris pestilens maligna*, *Febris nautilica pestilentialis*, *Febris petechialis*, *Typhus petechialis*, *Pulicula'ris morbus*, *Febris punctularis*, *F. Sapro'pyra*, *F. carcerum et nosocomiorum*, *F. Putrida*, *Septopyra*, *Putrid Fever*, *Jail Fever*, *Hospital Fever*, *Camp Fever*, *Spotted Fever*, *Malignant Fever*, (F.) *Fièvre des Camps*, *F. navitique*, *F. d'Hôpital*, *F. nosocomiale*, *F. des Prisons*, *F. lenticulaire*, is attended with rigors and heat, alternating; little or no perspiration; pulse, tense and hard, usually quick, but fluttering; pain over the forehead and vertex; delirium, succeeded by stupor; signs of incipient putrescency; as petechiæ, vibices, hemorrhages, &c.

Typhus, under particular circumstances, seems to be communicable by contagion; but, if proper attention be paid to cleanliness and ventilation, there is not much danger of communication. The general principles of treatment, laid down under the head of *Fever*, are applicable here. All the varieties of continued fever resemble each other in the cardinal points: although they may differ in many of their

characters. Ventilation and cleanliness; warm or cold abluion or sponging; keeping the bowels free; and attending to symptoms as they may rise, with the avoiding of all irritation of every kind, are the main indications. When symptoms of great prostration occur, the strength must be supported by wine; and tonics be exhibited, with the mineral acids. Of the tonics, the sulphate of quinine is perhaps as good as any, whilst it is free from the objection which applies to most others,—of being too bulky. In the whole management of this affection, however, the physician has to discriminate carefully between oppression and prostration. The former may require evacuants: the latter cannot.

Of late, certain observers have endeavoured to show, that there is an essential difference between typhoid fever, and typhus: that the former is an abdominal affection, and dependent upon, or connected with, an inflamed or ulcerated condition of the mucous follicles of the intestines; hence, it has received the names *Fièvre mesentérique*, *Exanthème intestinale*, *Dochinentérite*, (q. v.) *Ileodiciidite*, *Entérite folliculeuse*, *Gastro-entérite* with nervous affection of the brain, *Follicular gastro-enteritis*, *Typhus abdominalis*, *T. ganglionaris abdominalis*, *Fébris intestinalis ulcerosa*, &c.

Accompanying this form of fever there is generally a typhoid eruption, consisting of rose-red papulæ, which appear mostly on the abdomen. They are distinct from true petechiæ, as

they can be removed by pressure, and distinct also from sudamina, which are perhaps the universal accompaniments of sweating, and are consequently a variety of miliaria.

The common continued fever, or Synochus (q. v.) of Great Britain, and of this country, has been presumed to be this variety: but further observations are needed to establish the distinctions which have been attempted, and there is some reason to believe, that the abdominal affection is a complication, existing in certain cases and epidemics, and not in others.

**TYPHUS ABDOMINALIS**, see Typhus—*t. d'Amérique*, Fever, yellow—*t. Aphthoideus*, Aphthæ—*t. Carcerum*, Typhus gravior—*t. Castrensis*, Typhus gravior—*t. Comatosus*, Typhus mitior—*t. d'Europe*, Typhus—*t. Ganglionaris abdominalis*, see Typhus—*t. Icteroles*, Fever, yellow—*t. Miasmatische ataxique putride jaune*, Fever, yellow—*t. Morbillosus*, Rubeola—*t. Nervosus*, Typhus mitior—*t. d'Orient*, Plague—*t. Pestis*, Plague—*t. Petechialis*, Typhus gravior—*t. Scarlatinus*, Scarlatina—*t. Simplex*, Typhus mitior—*t. Vesicularis*, Pemphigus.

**TYRANNUS**. See Critical days.

**TYREMESIS**, from τυρος, 'cheese,' and εμεσις, 'vomiting,' *Tyrosis*, *Tyreul'sis*. Vomiting of curdy matter, in infants especially.

**TYREUSIS**, Tyremesis.

**TYRIASIS**, Elephantiasis Arabica.

**TYRODES**, Cheesy.

**TYROS**, Cheese.

**TYROSIS**, Tyremesis.

U

**ULA**, Gingivæ.

**ULCER**, *Ulcus*, *Helcos*, *Elco'sis*, *Elco'ma*, *Helco'ma*, a Sore. (F.) *Ulçère*. A solution of continuity in the soft parts, of longer or shorter standing; accompanied by a purulent discharge, and kept up by some local disease or constitutional cause. Professor Richerand makes four great distinctions between the wound and ulcer. 1. A wound arises from the action of an extraneous body;—the cause of an ulcer is inherent in the economy. 2. A wound is always idiopathic;—an ulcer is always symptomatic. 3. A wound has essentially a tendency to heal, because the action of its cause has been momentary;—an ulcer, on the contrary, has a tendency to enlarge, because its cause persists. 4. The treatment of a wound is purely surgical; that of an ulcer is medical as well.

The immediate cause of an ulcer is an augmented action of the absorbents; and a specific action of the small vessels, which secrete pus from the blood.

Ulcers have been variously divided, according to their nature:—into *simple*, *sinuous*, *fistulous*, *fungous*, *gangrenous*, *scorbutic*, *syphilitic*, *cancerous*, *inveterate*, *scrofulous*, *phagedenic*, *virulent*, *cacoethic*, *sordid*, *curious*, *varicose*, &c.

The treatment consists in removing, by appropriate means, the internal or local cause which keeps up the ulceration, and in exciting the vessels of the part, where necessary, by appropriate bandaging.

**ULCER**, **MALIGNANT**, Hospital gangrene—*u.* Putrid, Hospital gangrene.

**ULCERA SERPENTIA ORIS**, Aphthæ.

**ULCERATION**, *Ulceratio*, *Exulceratio*. A superficial ulcer. The formation of an ulcer, —*Exulco'sis*, *εξελκωσις*.

**ULCERE**, Ulcer—*u. de Larynx*, Phthisis laryngea.

**ULCEROUS**, *Ulcerosus*, *Helcosdes*, *Helcoïdes*, *ελκωδης*, *ελκοειδης*. Having the character of an ulcer.

**ULCERS**, **EGYPTIAN**, *Ægyptia* ulcera.

**ULCUS**, Ulcer—*u.* Atonicum, *Rupia*—*u.* Cancrosum, Cancer, Chancre—*u.* Depascens, Phagedenic ulcer—*u.* Syriacum, *Cynanche maligna*—*u.* Telephium, *Telephium*—*u.* Tuberculosum, *Lupus*.

**ULCUSCULUM CANCROSUM**, Chancre.

**ULE**, Cicatrix.

**ULTIUS**, from ουλος, 'solid.' (*Σαφές ουλη*, 'solid flesh:' hence ουλον, 'the gum.') Inflammation of the gums.

**ULMAIRE**, *Spiræa ulmaria*.

**ULMARIA**, *Spiræa ulmaria*.

**ULMUS**, *U. campestris*, *Ptelea*, *Common Elm*. (F.) *Orme*. *Family*, *Amentaceæ*. *See*. *Syst.* *Pentandria Digynia*. The inner, rough bark of this tree is inodorous; and has a bitter, austere, and mucilaginous taste. It is considered tonic, alterative, and diuretic; and has been used, chiefly, in lepra and other cutaneous affections.

**ULMUS ALATA**, *Lynn* *Wahoo*. The bark of

the root has been used successfully as a cathartic in phlegmonous inflammation.

The **ULMUS AMERICANA**, *Rough-leaved Elm*, *Red Elm*, *Slippery Elm*. The inner bark is highly mucilaginous, and is used in coughs, diarrhæas, and dysenteries; also, as a poultice for tumours; lacerated and contused wounds, &c.

**ULMUS CAMPESTRIS**, *Ulmus*.

**ULNA**, *O'lenē*, *Foc'ilē inferius* seu *majus*, *Canna Brachii*, *Os cubiti inferius*, *Os procubitalē*, *Cu'bitus*, *Cubit*, *Arun'do bra'chii major*; the *Elbow*, (q. v.) Anatomists have given this name to the bone of the forearm, which forms the prominence of the elbow, during the flexion of that joint. It is the longer and larger of the two bones, and is inserted at the inner side. Its upper and larger extremity has, behind, a considerable process, called *olecranon*; and, before, a smaller one, called *coronoid*. These two eminences are separated from each other by the greater *sigmoid* or *semilunar fossa*, which receives the articular trochlea of the humerus. The tubercle of the ulna is a small, rough spot, under the root of the coronoid process, for the insertion of the *Brachialis internus*. On the outside of this extremity of the bone, is the *lesser sigmoid cavity*. It is articulated with the head of the radius. The inferior extremity of the cubitus, which is much smaller than the superior, and articulated with the radius, has a surface, that corresponds to the fibro-cartilage which separates it from the os cuneiforme; and a pointed process, called *styloid*. The body of the ulna is manifestly triangular. It is articulated with the os humeri and radius, and, mediately, with the os cuneiforme. It is developed by three points of ossification.

**ULNARIS EXTERNUS**, see *Cubital muscles*—u. *Gracilis*, *Palmaris longus*—u. *Internus*, see *Cubital muscles*.

**ULOCACE**, *Stomacace*.

**ULONCUS**, from *ουλον*, the gum, and *ογκος*, 'a tumour.' Swelling of the gums.

**ULORRHA'GIA**, *Stomatorrhœ'gia gingivo'rum*, from *ουλον*, 'the gum,' and *ρηγνυμι*, 'I break forth.' Bleeding from the gums.

**ULOTICA**, *Cicatrissantia*.

**ULTIMI-STERNAL**. Professor Béclard has given this appellation to the 6th or last bony portion of the sternum. He calls it also *Ensi-sternal*.

**ULTIMUM MORIENS**. A term given to the part of the economy which dies last.

**ULVA CRISPA**, *Fucus crispus*.

**UMBILICAL**, *Umbilicalis*, from *umbilicus*, 'the navel.' That which belongs or relates to the navel.

**UMBILICAL CORD**, *Funiculus umbilicalis*.

The **UMBILICAL REGION**, (F.) *Région ombilicale*, is the middle region of the abdomen, in which the umbilicus is placed. The sides of this are called the *flanks* or *lumbar regions*. In the umbilical region, are the omentum majus; the inferior extremity of the duodenum; the jejunum; and the greater part of the mesentery; the aorta; vena cava; the trunks of the renal arteries and veins; the origin of the spermatic arteries, &c.

The **UMBILICAL RING**, *An'nulus umbilicalis*, (F.) *Anneau ombilical*, is a fibrous ring which surrounds the aperture of the umbilicus, and through which umbilical hernia occurs in children.

The **UMBILICAL VESSELS**, (F.) *Vaisseaux ombilicaux*, include the two arteries, and umbilical vein. The umbilical vein arises from the placenta, and terminates at the fissure on the inferior surface of the liver of the fœtus; to which it conveys the blood necessary for its nutrition.

The **UMBILICAL ARTERIES**, which exist only in the fœtus, seem, as it were, continuations of the primitive iliacs. They clear the umbilical ring, and proceed to the placenta, to which they carry the residuum of the blood sent to the fœtus by the umbilical vein. As soon as respiration is established, the blood ceases to pass by the umbilical arteries, which become obliterated, as well as the vein, and are transformed into two very strong ligamentous cords; the vein forming the *Ligamentum rotundum* of the liver.

**UMBILICUS**, *Umbo*, *Om'phalos*, *Umbilic'um*, *Radix ventris*, *Mesomphalium*, *Protome'sis* (*navel of a new-born child*;) the *navel*, from *umbo*, 'the button or prominence in the midst of a buckler.' (F.) *Ombilic*, *Nombril*. A round cicatrix, about the median line of the abdomen. It is in the situation of an aperture, which, in the fœtus, affords passage to the vessels of the umbilical cord.

**UMBILICUS MARI'NUS**, *Cotyledon marina*, *Androsacē*, *Acetalulum marinum*, *Androsocē Matthi'oli*, *Fungus petraeus marinus*. A submarine production, found on rocks and the shells of fishes, in the south of France. It is reputed to be anthelmintic and diuretic.

**UMBO**, *Umbilicus*.

**UMBRELLA TREE**, *Magnolia tripetala*.

**UNCAS**, **INDIAN**, *Veratrum viride*.

**UNCIA**, *Ounce*.

**UNCIFORM**, *Unciformis*, from *uncus*, 'a hook.' That which has the shape of a hook.

**UNCIFORM EMINENCE**, *Hippocampus minor*.

**OS UNCIFORME**, *Os hamatum*, *Os uncinatum*, (F.) *Os crochu*. The fourth bone of the second row of the carpus. Its shape is very irregular. Inwards and forwards, it has a considerable eminence, which is curved upon itself, and gives attachment to the annular ligament of the carpus. It is articulated with the os semilunare, os magnum, os cuneiforme, and the 4th and 5th metacarpal bones. It is developed from a single point of ossification.

**UNCINUS**, *Hook*.

**UNCTIO**, *Inunction*.

**UNCTION**, *Unguentum hydrargyri*.

**UNCUS**, *Hook*.

**UNDIM'IA**. A name given, by Paracelsus, to a tumour, filled with a gelatinous matter, like the white of egg.

**UNDOSUS**, *Cymatodes*.

**UNDULATIO**, *Fluctuation*.

**UNEDO**, *Arbutus unedo*—u. *Papyracea*, *Arbutus unedo*.

**UNGUEN**, *Unguentum*—u. *Articulare*, *Synovia*.

**UNGUENT**, **ARMATORY**, *Hoplochrysa*.

UNGUENTARIA, *Boitier*, see *Myristica moschata*.

UNGUENTARIUS, *Myropo'us*, *Myrep'sus*, *Myropo'les*, *Pigmentarius*. One who sells ointments. A perfumer.

UNGUENTUM, *Unguen*, *Myron*, (F.) *Onguent*, from *un'gere*, 'to anoint.' Ointments are topical applications, of a consistence more or less analogous to that of lard. They are used, chiefly, as local applications to ulcers and wounds; but are sometimes rubbed upon a part, in cutaneous affections; and, especially, where it is desired that the constituents of the ointment should be absorbed. Ointments are of less consistence than cerates, although the terms are often used indiscriminately.

UNGUENTUM ADIPOCERÆ LINIMENTUM, *Ceratum cetacei*—u. *Ægyptiacum*, *Cinorum æruginis*—u. *Ægyptium album*, *Crinomyron*—u. *Album*, *U. cetacei*, *U. oxidi plumbi albi*, *U. plumbi subcarbonatis*.

UNGUENTUM DE ALTHÆA, *Marshmallow Ointment*, *U. de Terebinthinâ et cerâ*, *Ceratum de Althæâ*, *Emplastrum mucilaginosum*, *E. emolliens*, *E. citrinum*, *E. flavum*, *E. de Althæâ*, *Unguentum flavum*, *U. citrinum*, *U. resinæ pini sylvestris compositum seu resumptivum seu lenitivum*, (F.) *Onguent de guimauve*, *O. d'althæa*. (*Olei de mucilaginis*, 1000 p., *cerâ flavâ*, 250 p., *resinâ*, *terebinthinâ*, aa, 125 p. Liquefy; strain; and stir till cold. *Ph. P.*) *Common Olive oil* might be substituted for the *Oil of Mucilages*.

UNGUENTUM AC'IDI NITRO'SI, *Ointment of Nitrous Acid*, *Pom'datum vel Unguentum Nitricum vel Oxygenatum*, (F.) *Pommade oxygénée*, *Graisse oxygénée*, *Pommade d'Alyon*. (*Adip. sullæ*, lbj, *acid. nitros.* ʒvj. Melt the fat and rub in the acid, gradually, till cold. *Ph. E.*) Stimulant. Used in itch and other cutaneous eruptions, and in foul ulcers.

UNGUENTUM ALBUM RESOLVENS, *Linimentum ammoniæ fortius*—u. *Amlygdalinum*, *Ceratum Galeni*.

UNGUENTUM ANTIMONII TARTARIZATI, *Ointment of tartarized antimony*. (*Antimon. tartarizat* ʒj, *adipis sullæ* ʒviij.) If a drachm of this ointment be rubbed upon any part, night and morning, it will excite, in a few days, a painful pustular eruption. Hence, it is employed as a counter-irritant. This preparation is also called *Ung. Tartari stibiati seu emelici*, *Ung. e Tartaro stibiato*, *Adeps Tartaræ stibii medicatus*, *Ung. Tartratis Potassæ stibiati*, *Pommade d'Autenrich*, *Pommade stibiée*.

UNGUENTUM ARMARIUM, *Hoplochrysa*—u. *Arthanitæ*, see *Arthanita*—u. *Articulare*, *Synovia*—u. *Basilicon flavum*, *Ceratum resinæ*—u. *Basilicon nigrum*, *U. resinæ nigre*—u. *Basilicum viride*, *U. subacetatis cupri*—u. *Cantharidis*, *U. lyttæ*.

UNGUENTUM CERÆ (*albæ vel flavæ*) *Wax Ointment*. *Unguentum simplex*, *Linimentum simplex*, *Oil and Bees Wax*, (F.) *Onguent de cire*. (*Cerâ* lbj, *adipis sullæ* lbiv. *Ph. D.* or *cerâ* ʒij, *ol. oliv.* ʒv.) Emollient. A mild dressing. Also, the basis of most of the compound ointments.

UNGUENTUM CERATUM, *Ceratum Galeni*—u. *Cerussæ*, *U. oxidi plumbi albi*, *U. plumbi subcarbonatis*—u. *Cerussæ acetatæ*, *Ceratum*

*plumbi superacetatis*, *U. plumbi superacetatis*—u. *Citrinum*, *U. de althæâ*.

UNGUENTUM CETACEI, *Unguentum Spermatitis Ceti*, *U. album*, *Linimentum album*, *Spermaceti ointment*, (F.) *Onguent de blanc de baleine*. (*Cetacei* ʒvj, *ceræ albæ* ʒij, *ol. oliv.* ʒiij. *Ph. L.*) The ordinary dressing for blisters and excoriations.

UNGUENTUM DIGESTIVUM SIMPLEX, *U. Terebinthinæ et ovorum vitelli*, *Simple digestive ointment*, (F.) *Onguent digestif simple*. (*Terebinthin. pur.* 64 p. *Vitell. ovor.* No. 2, vel 32. p. Mix, for a long time, in a glass mortar, and add, gradually, enough of the *Oil of the Hypericum* (*Millepertuis*) to make a soft ointment. *Ph. P.*) Detergent. It may be rendered more so by the addition of a little of the *Acetate of copper*.

UNGUENTUM ELEMII, *Balsam of Arcæus*, *U. elemi compositum*.

UNGUENTUM ELEMII COMPOSITUM, *Linimentum Arcæi*, *Unguentum e gummi elemi*, *Ung. de Terebinthinâ et Adipibus*, *U. elemi*, *Ointment of Elemi*, (F.) *Baume d'Arcæus*. (*Elemi* lbj, *terebinthinæ vulgaris* ʒx. *sevi preparati* lbij, *olivæ olei* ʒij. Melt the elemi with the suet; remove it from the fire; and mix in the turpentine and oil. Strain the mixture through a linen cloth. *Ph. L.* Stimulant and digestive. To keep open issues, &c.

UNGUENTUM EPISPASTICUM DE DAPHNE GNIDIO, *Adeps Corticæ daphnes gnidii medicatus*, (F.) *Pommade de Garou*. (*Adip. prepar.* ʒ20 p., *cerâ*, ʒ2 p., *cort. daphn. gnid.* 12ʒ p. Melt the fat and wax; and add the bark softened in water. Boil until the moisture is evaporated: then pass through cloth. *Ph. P.*) To keep open blisters, issues, &c.

UNGUENTUM EPISPASTICUM FORTIUS, *Cerate of cantharides*—u. *Epispasticum mitius*, *U. lyttæ*—u. *Epispasticum viride*, *U. lyttæ medicatum*—u. *Flavum*, *U. de althæâ*—u. *E. Gummi elemi*, *U. compositum*—u. *Hellebori albi*, *U. veratri*.

UNGUENTUM HYDRARGYRI, *U. ceruleum*, *U. Neapolitanum*. *Blue ointment*, *Ceratum mercuriale*, *Adeps Hydrargyro medicatus*, *Mercurial Ointment*, *Uction*, (F.) *Onguent mercuriel* ou *Napolitain*.

The *Strong Mercurial Ointment*, *Unguentum Hydrargyri fortius* of the London Pharmacopœia is thus made—*Hydrarg. purif.* lbij, *adipis preparat.* ʒxxxij, *sevi præp.* ʒj. Rub till the globules entirely disappear.

The *Milder Mercurial Ointment*,—*Unguentum Hydrargyri Mitius*,—is made by adding, to one pound of the strong, two pounds of lard.

Mercurial ointment is antisyphilitic and discutient. It is rubbed on the inside of the thigh, in venereal affections; especially in those cases where mercury, given internally, runs off by the bowels. The *stronger* ointment is used for this purpose. The *weaker* is employed as a dressing, or as an application to cutaneous eruptions.

UNGUENTUM HYDRARGYRI CALCIS ALBÆ, *U. hydrargyri præcipitati albi*—u. *Hydrargyri compositum*, *U. hydrargyri nitratis*—u. *Hydrargyri deutoxydi nitrati*, *U. hydrargyri nitrico-oxydi*—u. *ex Hydrargyro mitius dictum cinereum*, *Unguentum Oxydi Hydrargyri cinereum*.

UNGUENTUM HYDRARGYRI NITRATIS, U. H nitrate, U. supernitrat'is hydrargyri, Ointment of Nitrate of Mercury, Citrine Ointment, Balsamum mercuriale, Ung. hydrargyri compos'itum, U. mercuriale citrinum, Adeps nitrat'is hydrargyri medicatus, Unguentum citrinum ad scabiem, (F.) Onguent de nitrate de mercure, O. citrin contre la gale. (Hydrarg. purif. ℥j, acid nitric. f. ʒxj, adipis præp. ℥vj, ol. olivæ, ℥iv. Dissolve the mercury in the acid; and, while hot, add the fat and melted lard. Ph. L. & E.)

A milder ointment—Ung. Nitrat'is Hydrargyri nitius—is made with triple the quantity of oil and lard. It is stimulant and detergent, and is much used as an application to herpes, porrigo, and cutaneous eruptions. The weaker ointment is, sometimes, used in ophthalmia tarsi, &c.

UNGUENTUM HYDRARGYRI NITRICO-OXYDI, Ung. subnitrat'is hydrargyri, Ung. Oxydi Hydrargyri rubri, Ointment of Nitric Oxid of Mercury, Balsamum ophthalmicum rubrum, Unguentum deutoxydi hydrarg. nitrat'is, Red Precipitate Ointment, Golden Ointment, Singleton's Eye Salve, U. Hydrargyri rubri, U. ex Hydrargyro oxydato rubro, U. mercurii rubrum, U. ophthalmicum rubrum, U. subnitrat'is hydrargyrici. (Hydrarg. nitrico-oxid. ℥j, ceræ albæ ℥ij, adipis preparatæ ℥vj. Add the oxid, reduced to a fine powder, to the melted fat and oil. Ph. L.) Stimulant and escharotic. Applied to foul ulcers, to inflammation of the tarsi, &c. &c.

UNGUENTUM EX HYDRARGYRO OXYDATO RUBRO, U. hydrargyri nitrico-oxydi—u. Hydrargyri oxydi rubri, U. hydrargyri nitrico-oxydi.

UNGUENTUM HYDRARGYRI PRÆCIPITATI ALBI, U. submuriat'is hydrargyri ammoniat'is, Unguentum ad scabiem Zelleri, U. mercuriale album, U. mundificans Zelleri, Ointment of white precipitate, Ung. e mercurio præcipitato, Ung. calcis hydrargyri albæ (Hyd. præcip. alb. ℥j, adipis suillæ ℥iiss. Melt the fat, and add the precipitate. Ph. L.) Detergent. Used in cutaneous eruptions, to destroy vermin, &c.

UNGUENTUM HYDRARGYRI RUBRI, U. hydrargyri nitrico-oxydi—u. Hydrargyri subnuriatis ammoniati, U. hydrargyri præcipitati albi—u. Hydrargyrici subnuriatis, U. hydrargyri nitrico-oxydi—u. Hydrargyri subnuriatis, U. hydrargyri nitrico-oxydi—u. Hydrargyri supernuriatis, U. hydrargyri nitrat'is—u. Infusi mloes vesicatorii, U. lyttæ—u. Irritans, U. lyttæ.

UNGUENTUM LAURINUM, O'leum laurinum, Adeps lauro-medica'tus, Bay Ointment, (F.) Onguent ou Huile de laurier. (Fol. lauri, 500 p., adip. suillæ, 1000 p. Bruise in a marble mortar; evaporate all humidity by boiling; and add Bay berries, in powder, 500 p. Digest and pass through lincn. Ph. P.) Reputed to be corroborant and nervine. It is simply emollient.

UNGUENTUM LENITIVUM, U. de althæâ—u. Liliaceum, Crinomyron.

UNGUENTUM LYTTÆ, Ung. cantharidis, U. vesicatorium, U. irritans, U. ad vesicatu, Blistering Salve, Ung. infusi mel'oes vesicatorii, Ointment of Spanish Flies, Ointment of Infusion of Spanish Flies, Unguentum epispasticum miltius, Milder blistering Ointment. (Meloës vesicat., resinæ pini, ceræ flavæ, sing. p. j, resinæ liquida pini laricis, adipis suillæ, conj. p. ij, aquæ bull. p. iv. Macerate the flies in the water for a

night; strain strongly; boil the fluid with the lard till the humidity is consumed. Add the resin and wax; and, when these are melted, take the ointment from the fire and add the turpentine. Ph. L.) It is stimulant and epispastic; and is chiefly used for keeping up the discharge from a blistered surface.

UNGUENTUM LYTTÆ MEDICA'TUM, Adeps cantharid'ibus medica'tus, Pomatum seu Unguentum epispasticum vir'idè stimulans ac'ribus, Green blistering Ointment, (F.) Pommade épispastique verte. (Ponati vel unguenti cantharid. 64 p., unguent. populei 168 p., ceræ albæ, 256 p., cupri acetat., ext. opii, aa 24 p. Melt the ung. populeum, and wax, and add, as they cool, the oxyd of copper, cantharides, and opium. Ph. P.) Use, same as the last.

UNGUENTUM LYTTÆ MEDICA'TUM ALIUD, Adeps cantharid'ibus medica'tus alius, Pomatum epispasticum flavum et mitius, Yellow Blistering Ointment, (F.) Pommade épispastique jaune. (Pulv. cantharid. 120 p., adip. præp. 1680 p., aquæ 250 p. Melt the lard; mix in the cantharides, and add the water at the same time; place the whole on a gentle fire; stir continually for two hours, and add a little water to replace that which has been evaporated. Pass through linen and strain. Keep it in a water bath, and add powdered turmeric, 8 p. Let it cool till the superfluous liquid separates; pour off and add yellow wax, 250 p., Oil of Lemon, 8 p. Ph. P. A complex preparation.) Use, same as the last.

An ointment, not very philosophically combined, was used by Dr. Physick, which is known by the name of "Dr. Physick's Issue Ointment." It is made by boiling half an ounce of powdered cantharides in two ounces of rose-water, and evaporating until one half the fluid is driven off, having previously added 15 grains of tartar emetic. The decoction is to be strained, and three ounces of olive oil, an ounce and a half of white wax, and one ounce of spermaceti added to it, and the mixture then boiled till all the water is evaporated.

UNGUENTUM MERCURIALE ALBUM, U. hydrargyri præcipitati albi—u. Mercuriale citrinum, U. hydrargyri nitrat'is—u. e Mercurio præcipitato, U. hydrargyri præcipitati albi—u. Mercurii rubrum, U. hydrargyri nitrico-oxydi—u. Mundificans Zelleri, U. hydrargyri præcipitati albi.

UNGUENTUM MURIA'TIS HYDRARGYRI OXYGENATO MEDICA'TUM, Adeps muriat'is hydrargyri oxygenato medicatus, Cyrillo's Ointment, (F.) Pommade de Cyrillo. (Hydrarg. oxyzur. 4 p. adipis suillæ præp. 32 p. Ph. P.) Antivenereal and alterative. Used in friction, ʒss at a time.

UNGUENTUM NARDINUM, see Nardus Indica—u. Neapolitanum, U. hydrargyri—u. Nervinum, U. Sambuci—u. Nitricum vel oxygenatum, U. acidi nitrosi.

UNGUENTUM OPHTHALMICUM, Adeps oxido hydrargyri rubro et plumbi aceta'tè medica'tus, Regen's Pommade ophthalmique, (F.) Pommade ophthalmique. (Bulyr. recent., ag. rosar. lavat. 4½ p., camphor., oxyd. hydrarg. rubr., acutatis plumbi aa 0.25 p. Mix intimately. Ph. P.) In chronic inflammation of the conjunctiva or tarsi.

UNGUENTUM OPHTHALMICUM, U. oxidi zinci

impuri—u. Ophthalmicum rubrum, U. hydrargyri nitrico-oxydi.

UNGUENTUM OX'IDI HYDRARGYRI CINE'REI. *Adeps seu Unguentum ex hydrargyro mitius dictum cinereum, Ointment of gray oxide of mercury, (F.) Onguent gris. (Oxyd. hydrarg. ciner. p. j, adipis suillæ, p. ij. Ph. E.)* Properties like the mercurial ointment. It is not much used.

UNGUENTUM OX'IDL PLUMBI ALBI, *Ung. cerusæ, Ung. album, Ung. subacetatis plumbi, Ointment of white oxide of lead, White ointment. (Ung. simplicis, p. v. oxyd. plumb. alb. p. j. Ph. E. & P.)* Cooling and desiccative. Applied to excoriated and burnt surfaces.

UNGUENTUM OX'IDI ZINCI IMPUR'I, *Unguentum tu'tiæ, Ung. ophthalmicum, Eye Salve, Adeps ox'idi zinei medicinalis, Tatty ointment, Ointment of impure oxide of zinc. (Linim. simpl. p. v. oxyd. zinc. impur. præp., p. j. Ph. E.)* Generally used in ophthalmia tarsi and atonic ophthalmia.

UNGUENTUM PICIS LIQ'UIDÆ, *Ung. Picis, Ung. e Piec, Tar Ointment. (Picis liquid., sevi præpar., sing. lbj. Melt and strain through linen. Ph. L. & D.)* Stimulant and detergent. Used in tinea capitis, and other cutaneous eruptions.

UNGUENTUM PICIS NIGRÆ, U. resinæ nigræ—u. Acetatis plumbi, Ceratum plumbi superacetatis—u. Plumbici carbonatis, U. plumbi subcarbonatis—u. Plumbi oxydi carbonati, U. plumbi subcarbonatis—u. Plumbi subacetatis, U. oxidi plumbi albi.

UNGUENTUM PLUMBI SUBCARBONA'TIS, *Ceratum de Cerus'sa, Ung. album, U. album simplex, U. Carbonatis Plumbici, U. Cerus'sæ, U. Ox'idi Plumbi Carbonati. (F.) Onguent blanc de Rhazes, O. de Cerusse, O. de Tornamira. (Ceruss. pulv. p. 1, adip. suillæ, p. 1½. Mix. Ph. P.)* Chiefly used as a dressing for burns.

UNGUENTUM PLUMBI SUPRACETA'TIS, U. acetatis plumbi, *Ointment of sugar of Lead, Unguentum Saturninum, U. cerus'sæ acetatis, Balsamum unicersalæ. (Olive oil, l'vss, white wax, ʒiiss, superacetate of lead, ʒij.)* Cooling, desiccative. Called, also, *Balsamum Saturninum, Butyrum Saturni, Linimentum plumbatum, Pomatum saturni, Ung. tripharmacum.*

UNGUENTUM POPEULEM, *Adeps papaver'æ, hyoscifano, et belladon'na medicinalis. (Fresh buds of the Populus nigra, 500 p., macerated in adeps suilla præp. melted, 1500 p. for 24 hours. Preserve this. Again, take black poppy leaves, belladonna, hyoscyamus, black nightshade, ãã 12ʒ p.; bruise in a mortar with the former preparation; boil until all the humidity is evaporated, and strain. Ph. P.)* Anodyne. Applied to local inflammations, hemorrhoids, sore nipples, cancer, &c. Green elder ointment is often sold for this.

UNGUENTUM POPEULEM, see Populus.

UNGUENTUM POTAS'SÆ HYDRIODATIS, *Ointment of Hydr'odate of Potass. (Hydr'iate of potass ʒss, hog's lard ʒiiss.)* Half a drachm of this ointment is rubbed on scrofulous glands, goitre, &c.

UNGUENTUM PULVIS MELOS VESICATORII, *Cerate of cantharides—u. Resinæ flavæ, Ceratum resinæ flavæ.*

UNGUENTUM RESINÆ NIGRÆ, *Ung. resinæ nigrum, Ung. basilicon nigrum, Ung. tetrapharmacum, Black Basilicon, Black resin ointment, Unguentum picis nigræ. (Resin. nigr. ceræ flavæ, resinæ flav. ãã, ʒix, olei olivæ lbj.*

*Ph. L.) Uses, the same as the Ceratum resinæ or Yellow basilicon, (q. v.)*

UNGUENTUM RESINÆ PINI SYLVESTRIS COMPOSITUM, U. de althæâ—u. Resinosum, Ceratum resinæ flavæ—u. Resumptivum, U. de althæâ.

UNGUENTUM SAMBU'CI, *Ung. sambuc'ium, Green ointment, Unguentum nervinum, Elder ointment, (F.) Onguent de sureau. (Sambuci flar. lbj, adipis præp. lbj. Boil. Ph. L. & D.)* Emollient.

UNGUENTUM SATURNINUM, U. plumbi superacetatis—u. Sabinæ, Ceratum sabinæ—u. ad Scabiem Zelleri, U. hydrargyri præcipitati albi—u. Simplex, Ceratum Galeni, U. ceræ—u. Solidum de cicuta, Einplastrum cicutæ—u. Spermatis ceti, U. cetacci.

UNGUENTUM SUBACETA'TIS CUPRI, *Ung. detergens, Ung. basilic'um vir'idè, Ung. ar'diginis, Balsamum vir'idè, Ointment of subacetate of copper, Ver'digris ointment. (Ung. resinæ, p. xv, subacet. cupri, p. j. Ph. E.)* Detergent and escharotic.

UNGUENTUM SULPHURIS, *Ung. e Sulph'urè, Sulphur ointment. (Sulph. sublim. ʒiij, adip. præp. l'vss. Ph. L. E. D.)* Used chiefly in itch and some herpetic affections.

UNGUENTUM SULPHURIS COMPOS'ITUM, *Compound Sulphur Ointment, Itch Ointment, Unguentum Antipsor'icum, Jaekson's Itch Ointment, Pommade antipsorique de Jasser. (Sulph. sublim. l'vss, ceratri rad. contus. ʒij, potassæ nitrat. ʒj, sapanis mollis l'vss. Ph. L.)* Use, the same as the last; but it is more stimulating.

UNGUENTUM SULPHURATUM AD SCABIEM, *Adeps sulphurè et ammo'niæ muriat'æ medicinalis. (Adipis, 120 p. sulph. lot. 60 p., ammoniæ muriat., alumina sulphat. ãã 4 p., fiat unguentum. Ph. P.)* Antipsoric.

BAILEY'S ITCH OINTMENT is composed of olive oil, lard, nitre, alum, sulphate of zinc, and cinnamon, scented with oil of aniseed, oil of origanum, and oil of spike, and coloured with alkanet root.

UNGUENTUM SULPHURATUM ALCALI'NUM AD SCABIEM, *Adeps sulphurè et carbonat'è Potassæ medicinalis, Hel'merick's Alcaline Sulphurated Itch Ointment. (Adip. præp. 800 p., sulphur. lot. 200 p., carbonat. potass. pur. 100 p., fiat. ung. Ph. P.)* Use, same as the last.

Bateman's Itch Ointment resembles this. It is coloured with cinnamon and scented with essence of bergamot.

UNGUENTUM SUSINUM, Crinomyron—u. Tartari emetici, U. antimonii tartarizati—u. Tartari stibiati, U. antimonii tartarizati—u. e Tartaro stibiato, U. antimonii tartarizati—u. Tartaris potassæ stibiati, U. antimonii tartarizati—u. de Terebinthinâ et adipibus, U. elemi compositum—u. de Terebinthinâ et cerâ, U. de althæâ—u. Tutæ, U. oxidi zinci impuri—u. ad vesicata, U. lyttæ—u. ad vesicatoria, cerate of cantharides—u. Vesicatorium, U. lyttæ—u. Oxidi zinci, U. zinci.

UNGUENTUM VERA'TRI, *Unguentum helleb'ori albi, White hellebore ointment. (Veratr. rad. cont. ʒij. odipis præp. ʒviiij, olei limon. gtt. xx. Ph. L.)* Used in cases of itch, where sulphur is objected to. It is not equally efficacious.

The principal ingredients in the EDINBURGH OINTMENT are *white hellebore* and *muriate of ammonia*.

UNGUENTUM ZINCI, *Ung. oz'idi zinci, Zinc Ointment.* (*Zinci oxyd.* ʒj, *adipis præparat.* ʒvj *Ph. L.*) *Use,* the same as that of the *Unguentum tutiæ*.

UNGUIS, Hippocampus minor, Nail, Pterygion—u. *Odonatus, Blatta Byzantia.*

UNGUIS, Os, *Os Lachrymæ*'le. A small, quadrilateral, very thin, and semi-transparent bone, which has been compared to a human nail, and is situate at the interior and inner part of the orbit. It aids in the formation of the lachrymal gutter and the nasal duct. It is articulated with the frontal, superior maxillary, ethmoid, and the inferior spongy bones, and is developed by a single *punctum ossificationis*.

UNITING BANDAGE, (F.) *Bandage unissant.* A bandage for bringing the edges of a wound into approximation. The arrangement of such a bandage differs according as the wound is transverse or longitudinal.

UNGULA CABALLINA, Tussilage.

UNGULÆ PALPEBRARUM. See Tarsus UNIO, Pearl.

UNILOCULUS, Cyclops.

UNOCULUS, Borgne, Cyclops.

UPAS. A word, used in the Archipelagos of Molucca and Sunda, and signifying *Vegetable Poison, Ipo, Bohon Upas, Bou Upas, and Pohon Antiar, Boon Upas.* A substance used by the natives of those places for poisoning their arrows. The smallest quantity is capable of destroying the largest animal. The tree, which produces it, is said to be the *Antiaris Toxicaria*. Another species of upas, the *U. Ticaté*, is the produce of a *Strychnos*. Many idle stories are told regarding the upas; most of which are fabulous.

URACHUS, *Uraeus, Urinaçulum*, from *ουρον*, 'urine,' and *εχω*, 'I contain.' (F.) *Ouraque.* The urachus, in certain animals, is a long membranous canal, which arises from the bladder, makes its exit from the abdomen by the umbilicus, and terminates in the pouch called *allantois*. According to Sabatier, this is the arrangement of the urachus in the human fœtus; but Bichat and other anatomists consider, that when the canal exists in the human fœtus, it is a malformation. They regard it as a kind of suspensory ligament of the bladder, extending from the top of that organ to the umbilicus; and, at the umbilicus, confounded with the abdominal aponeuroses.

URACUS, Urachus.

URANA, Ureter.

URANE, Urinal.

URANISCOPELASTICÆ, from *ουρανισκος*, 'the roof of the mouth,' and *πλαστικος*, 'forming.' The operation of engraving in cases of deficiencies of the soft palate.

URANISCOS, Palate.

URANISKORRHAPHIA, Staphyloraphy.

URANORRHAPHIA, Staphyloraphy.

URAS, Urate.

URATE, *Uras*; from *ουρον*, 'urine.' A generic name for salts, formed by the combination of uric acid with different bases.

URATE OF SODA is found in arthritic calculi:—*Urate of Ammonia* in some urinary calculi.

UREA, *Uren, Urenium, Uricum*, (F.) *Urée*. Same etymon. A white, pearly, brilliant substance, in transparent plates, inodorous, and of a cool taste; very soluble in water; deliquescent, and soluble in alcohol. It exists, in great quantity, in the urine; and is an essential part of it. It has been used as a diuretic. *Dose*, gr. xv to ʒj.

UREC'CHYSIS, *Urachysis*, from *ουρον*, 'urine,' and *εχωρισ*, 'effusion.' Effusion of urine into the cellular membrane.

UREDIO, Urticaria.

URÉE, Urea.

UREMA, Urine.

UREN, Urea.

URENIUM, Urea.

URE'SIS, *Uri'asis*, from *ουρειν*, 'to void the urine.' The act of passing the urine.

URE'TER. Same etymon. *U'raua, Vena alba renum, Canal'is ner'veus fistulosus renum, Ductus seu Ductor Urinae, Vas,urina'rium*, (F.) *Urètere*. A long, excretory canal—membranous and cylindrical—which conveys the urine from the kidney to the bladder. It extends, obliquely, between the pelvis of the kidney, with which it is continuous, and the *Bas fond* of the bladder, into which it opens. It enters at the posterior and inferior part, for some distance, between the coats, and opens into the cavity of the bladder, at the posterior angle of the *Trigone vesical*.

The ureter is formed of an exterior, white, opaque, and fibrous membrane; and of an inner, which is mucous.

URETERALG'IA, from *ουρητιρο*, 'the ureter,' and *αλγος*, 'pain.' Pain in the course of the ureter.

URETÈRE, Ureter.

URETERICUS. An epithet to ischury, &c. arising from an affection of the ureter.

URETERITIS. Inflammation of the ureter. Generally caused by calculus.

URETERO-LITH'ICUS, from *ουρητιρο*, 'the ureter,' and *λιθος*, 'a stone.' An epithet applied to ischury or other affection caused by a stone in the ureter.

URETERO-PHLEGMAT'ICUS, from *ουρητιρο*, 'the ureter,' and *φλεγμα*, 'phlegm or mucus.' Any affection caused by mucus accumulated in the ureter.

URETERO-PY'ICUS, from *ουρητιρο*, 'the ureter,' and *πυον*, 'pus.' An epithet applied to affections caused by the presence of pus in the ureter.

URETERO-STOMAT'ICUS, from *ουρητιρο*, 'the ureter,' and *στομα*, 'orifice.' That which is dependent upon obstruction of the orifice of the ureter.

URETERO-THROMBO'IDES, from *ουρητιρο*, 'the ureter,' *θρομβος*, 'grumous blood,' and *ειδος*, 'resemblance.' Ischury, from grumous blood in the ureter.

URETHRA, *ουρηθρα, Canal'is seu Meatus seu Ductus urina'rius, Urias, Urètra, Fistula urina'rria, Iter urina'rrium*; (F.) *Urèthre, Urètre*, from *ουρον*, 'urine.' The excretory duct for the urine, in both sexes; and for the sperm, in man. In the latter, it is 10 or 12 inches long; and extends from the neck of the bladder to the extremity of the penis, in which its external aperture is situate. In the male urethra, three portions are distinguished:—1. A *Prosta-*

tic portion, near the bladder, about an inch and a quarter in length, which traverses the prostate gland:—2. A *membranous portion*, from 8 to 10 lines long, which is separated from the rectum by the cellular tissue only:—3. A *spongy portion*, which expands, anteriorly, to form the glans, and which commences at the *bulb of the urethra*. Before opening externally, the canal has a dilatation, called the *Fossu* or *Fossicula navicularis*. On the interior of the urethra two white lines are perceptible—the one above, the other below. The latter commences at the *verumontanum*; and at the surface of this, the *ejaculatory ducts* and *prostatic ducts* open. The urethra is lined, in its whole extent, by a mucous membrane; on which are seen, particularly at the bulb, the orifices of a number of follicular ducts, called *Sinuses of Morgagni*.

The arteries of the urethra are numerous, and proceed from the internal pudic,—the largest branches entering the bulb. The veins follow the course of the arteries. The lymphatics pass into the inguinal and hypogastric plexuses. The nerves come from the pudic and gluteal.

In the *female*, the urethra is only about an inch long. It is wider than in man and susceptible of great dilatation. It is very wide at its commencement; and descends obliquely forwards, to terminate at the top of the external aperture of the vagina, by the *meatus urinarius*. In its course, it is slightly curved, the concavity being forwards.

URETHRA, BLIND DUCTS OF THE, see Cæcus —u. Mucous lacunæ of the, see Cæcus.

URETHRE, Urethra.

URETHRITIS, Gonorrhœa.

URETHROPHRAXIS, from *ουρηθρα*, 'the urethra,' and *φρασσαω*, 'I obstruct.' Obstruction of the urethra.

URETHROPLASTIC, *Urethroplasticus*; from *ουρηθρα*, 'the urethra,' and *πλασσω*, 'I form.' An epithet given to the operation which supplies defects in the canal of the urethra, through which the urethra escapes.

URETHRORRHAGIA, from *ουρηθρα*, 'the urethra,' and *ρηγνιμι*, 'I break out.' Hemorrhage from the urethra.—Frank.

URETHRORRHOEA, from *ουρηθρα*, 'the urethra,' and *ρωω*, 'I flow.' A discharge from the urethra.

URETHROTOME, from *ουρηθρα*, 'the urethra,' and *τεμνω*, 'I cut.' An instrument, so called by Le Cat, with which he divided the skin, and laid open the urethra, in the operation for lithotomy.

URETHRYMEMO'DES, from *ουρηθρα*, 'the urethra,' and *μνη*, 'a membrane.' That which is caused by a membrane, formed in the urethra.

URETICUS, Diuretic, Urinary.

URETRA, Urethra.

URETRE, Urethra.

URETRIS, Urinal.

URIAS, Urethra.

URIASIS, Lithia, Uresis.

URIC ACID, *Acidum Uricum*, *Lithic Acid*.

An acid which exists in human urine, and which constitutes the greater part of urinary

calculi. It is often deposited from the urine, in health. See Calculi, Urinary.

URICUM, Urea.

URICUS, Urinary.

URINA GENITALIS, Sperm—u. Mucosa, Cystirrhœa—u. Vaccæ, Urine, cow's.

URINACULUM, Urachus, Urinal.

URINÆ PROFUVIUM, Diabetes—u. Suppressio, Ischuria—u. Stillicidium, Strangury—u. Substillum, Strangury.

URINAL, *Urinatòrium*, *Chernilium*, *Uranæ*, *Urettris*, *Urinaculum*, *Urodochium*. A name given, 1. To certain vessels, used to pass the urine into. 2. To reservoirs, of different shapes and character, which are adapted to the penis, in cases of incontinence of urine, and which are intended to receive the urine as it flows off.

URINARIA, Antirrhinum linaria, Leontodon taraxacum.

URINARY, *Urinarius*, *Ureus*, *Ureticus*. That which relates to the urine.

The URINARY PASSAGES, (F.) *Voies urinaires*. The aggregate of canals and cavities, intended to contain the urine and convey it externally. These *ways* are composed of excretory ducts, which form the tubular portion of the kidney; of calices; pelvis; ureters; bladder; and urethra.

URINARY CALCULI. The calculi, which form in the urinary passages. See Calculi, Urinary.

The URINARY BLADDER, *Vesicula Urinaria*, *Cystis*, (F.) *Vessie*. A musculo-membranous reservoir, intended for the reception of the urine, until the accumulation of a certain quantity solicits its excretion. The bladder is situated in the hypogastric region, between the rectum and pubis, in man; and between the pubis and vagina, in the female. Its upper region is not covered, except by the peritoneum posteriorly. From its centre arises the *urachus*. Its lower region is bounded, anteriorly, by the prostate, in man; and rests on the vesiculæ seminales and rectum. In the female, it corresponds to the vagina. The lowest portion of this region bears the name *Bas-fond*. The anterior surface of the organ is not covered by peritoneum. It is attached to the symphysis pubis by a fibro-cellular expansion called the *anterior ligament*.

The posterior ligaments are duplicatures of the peritoneum on its posterior surface, which extend from this surface to the rectum, in the male, and to the uterus, in the female. The bladder is composed of a serous membrane, formed by the peritoneum;—of a muscular membrane; of a somewhat thick layer of cellular tissue; and is lined, on its inner surface by a mucous membrane, which is, sometimes, raised up, here and there, in long prominences or *columns* by the muscular fibres beneath. To this condition, the French anatomists give the term—*vessie à colonnes*. In the *Bas-fond* the two ureters open, and the urethra commences; and the triangular space, which the apertures of these three canals leave between them, is called, by the French, the *Trigone vésical* or *Vesical Triangle*, *Trigonus Lieutaudii*. In the orifice of the urethra, which is also called the neck of the bladder, there is, at its lower part, a more or less prominent tubercle, which is formed by the anterior angle of the *Trigone vésical*, and is called the *Vesical uvula*, (F.) *Lucette vésicale*.

The arteries of the bladder proceed from the hypogastric, umbilical, sciatic, middle hemorrhoidal, and internal pudic. Its veins, which are more numerous than the arteries, open into the hypogastric venous plexus. Its nerves emanate from the sciatic and hypogastric plexuses; and its lymphatic vessels pass into the hypogastric ganglia.

#### URINATORIUM, Urinal.

URINE, *Urinæ*, *Uron*, *Ure'ma*, *Lotium*, *Lot*, *Lapis au'reus*. An excremental fluid; secreted by the cortical part of the kidneys; filtered through their tubular portion; poured *guttatim* from the apices of the tubular papillæ into the pelvis of the kidney; and transmitted by it to the ureters; which convey it slowly, but in a continuous manner, into the bladder, where it remains deposited, until its accumulation excites a desire to void it. The excretion of the fluid takes place through the urethra; and is caused by the action of the abdominal muscles and diaphragm and the contraction of the fibrous coat of the bladder.

Urine is transparent; of a citron-yellow colour: of a peculiar odour, and of an acid, saline, and slightly bitter taste. That which is passed, a short time after taking fluid, is less coloured, and less odorous and dense than that which is voided 7 or 8 hours after eating. The first is called by the French, *Urine de la Boisson*, *Urine from drink*:—the latter *Urine de la digestion*, *Urine de la coction*, *Urine cuite*, *Cocted urine*, *Urine of digestion*. According to the analysis of Berzelius, urine contains, in 1000 parts, 933 of water, 30.10 of urea, 3.71 of sulphate of potass, 3.16 of sulphate of soda, 2.94 of phosphate of soda, 4.45 of muriate of soda, 1.65 of phosphate of ammonia, 1.50 of muriate of ammonia, 17.15 of free lactic acid, lactate of ammonia united with an animal matter soluble in alcohol and an animal matter insoluble in that agent:—1.00 of earthy phosphate, with an atom of lime, 1.00 of uric acid, 0.32 of mucus of the bladder, and 0.03 of silica. There are found in it, moreover, albumen, sulphur, &c. Its average specific gravity is about 1.015.

The quantity passed by the adult in the 24 hours varies. On the average it may amount to two pounds and a half.

Sometimes, the urine, in health and disease, exhibits appearances, that have received special names. Thus, that which is characterized by a deficiency of solid matters generally, has been called *Hydr'uria*, (*υδωρ*, 'water,') by a deficiency of urea, *Anazot'uria*, (*αζ*, privative, and *azote*), by a superabundance of urea, *Azot'uria*. Urine, in which the deposit consists of lithic acid, and the lithates, has been termed *Lithu'ria*; and that in which the deposit consists of the earthy and earthy-alkaline phosphates, *Ceramu'ria*, (*κεραμος*, 'potter's earth,' &c. &c. At times, a *pellicle* forms on the surface (*Cremor urinæ*) which consists of mucus and some salts: at others, there is a *cloud*, (*Nubecula*, *nubes*) towards its upper part, which is called *Enæore'ma* when it is suspended, as it were, about the middle of the liquid. Occasionally, there is a sediment, to which the names *Hypos'tasis*, *Sedimentum*, &c. have been given. (See these various words.)

The urine is often deserving of attention in

disease; but it has been considered a matter of more importance than it merits. Some empirics have presumed to pronounce on the nature of a disease by simply inspecting the urine. See Uroscopy.

HUMAN URINE was, at one time, considered aperient; and was given in jaundice, in the dose of one or two ounces.

Cow's URINE, *Urina vacca*, *Allflower water*, was once used, warm from the cow, as a purge, in the dose of ℥ss.

Urine has been variously designated by pathologists, according to its appearance, &c.; for example:—

CRUDE URINE, (F.) *Urine crue*. Urine that is thin, transparent, and but little coloured, affording neither cloud nor deposit.

CYSTINIC URINE, *Cystin'uria*. Urine containing cystine or cystic oxide in solution, or as a deposit.

DIABETIC URINE, *Melitu'ria*. Urine passed in *Diabetes mellitus*. It does not contain, apparently, either urea or uric acid, except in accidental cases; but has a large quantity of sugar, analogous to that of the *grape*, which may be separated in the form of crystals. In other respects, the urine is very abundant and very limpid in that affection.

DROPSICAL URINE is an ammoniacal urine, often containing much albumen and scarcely any urea.

DYSPEPTIC URINE has been found to precipitate tannin abundantly, and to soon putrefy.

FLOCCULENT URINE, (F.) *Urine floconneuse*, is when the fluid is troubled by flocculi, suspended in it.

GOUTY URINE, (F.) *Urine des gouteux*, contains much phosphate of lime, and, after severe attacks of gout, precipitates a mixture of the uric and rosacic acids.

HYSTERICAL URINE is clear, colourless, and similar to the *Urine de la Boisson*.

ICTERIC URINE contains bile.

URINE OF INFLAMMATORY DISEASES. This is, generally, small in quantity and very high-coloured.

URINE JUMENTEUSE, (F.), a term used, by the French, for ammoniacal urine, rendered turbid by a substance similar to small grains of dust, which causes it to resemble the urine of herbivorous animals.

MILKY URINE, (F.) *Urine lactescente ou laiteuse*. White and troubled urine.

MUCILAGINOUS URINE, (F.) *Urine épaisse*. Urine containing much mucus.

NERVOUS URINE. Thin and very liquid urine; such as is passed shortly after the attack of nervous diseases.

URINE OF NERVOUS FEVERS is generally very thin; and often deposits a mixture of uric and rosacic acids.

OILY URINE, (F.) *Urine huileuse*, is that which pours like oil, or which has an oily pellicle at its surface.

OXALIC URINE, *Oxalu'ria*. Urine containing a salt of the oxalic acid.

PHOSPHORESCENT URINE, *Phosphoru'ria*. Urine which is luminous or phosphorescent.

PURPURIC URINE, *Porphuru'ria*. Urine containing purpuric acid and its salts.

RICKETY URINE contains much phosphate of lime.

THIN URINE, (F.) *Urine ténue*. Urine that is transparent, slightly coloured, and but little dense.

URINE ARDENTE, Ardent urine—*u. de la Boisson*, Urine, hysterical, see Urine—*u. de la Coction*, see Urine—*u. Crue*, Urine, Crude—*u. Cuite*, see Urine—*u. de la Digestion*, see Urine—*u. Épaisse*, Urine, mucilaginous—*u. Floconneuse*, Urine, flocculent—*u. des Goutteux*, Urine, gouty—*u. Huileuse*, Urine, oily—*u. Incontenance* of, Enuresis—*u. Involuntary discharge* of the, Enuresis—*u. Lactescente*, U. milky—*u. Laitieuse*, Urine, milky—*u. sandy*, Arenosa urina—*u. Stoppage* of, Ischuria—*u. Ténue*, U. thin.

URINIFEROUS, *Uriniferus*, from *ουρον*, 'urine,' and *φερω*, 'I carry.' That which carries urine.

The URINIFEROUS TUBES or DUCTS of BELLENIA, *Tu'buli vel ductus uriniferi Bellini*, *Bellenia'ni Ductus*, *Bellenia'na Fis'tula*, are the collection of small tubes, converging from the cortical part of the kidney to the apices of the papille.

URINODES, Urinous.

URINOMETER, *Urinometrum*, from *ουρον*, 'urine,' and *μετρον*, 'measure.' A hydrometer for taking the specific gravity of urine.

URINOUS, *Urinosus*, *Urinod'us*. Having the character of urine. Similar to urine.

UROCRASIA, Enuresis.

UROCRIS'IA, *ουροκρισια*, from *ουρον*, 'urine,' and *κρινω*, 'I judge.' *Urocriterion*, *ουροκριτηριον*. A judgment formed either of the urine, or of disease after inspecting the urine.

UROCRITERION, Urocrisia.

URODIALYSIS, from *ουρον*, 'urine,' and *διαλυσις*, 'dissolution, loss of strength.' A partial and temporary suspension of the function of the kidney, such as occurs in the course of most acute diseases.

A condition of the function of the kidney and of the urine, similar to that observed in acute diseases, but without local mischief or preceding inflammatory fever, has been termed, when occurring in children, *Urodialysis Neonatorum*; in the aged, *Urodialysis Serum*.—Schönlein.

URODOCHIUM, Urinal.

URODYN'IA, from *ουρον*, 'urine,' and *ουνη*, 'pain.' Pain during the excretion of the urine.

UROLITHI, Calculi, urinary.

UROLITHIASIS, Lithia.

UROLITHOLOG'IA; from *ουρον*, 'urine,' *λιθος*, 'a stone,' and *λογος*, 'a description.' A description of urinary calculi.

UROLITHOTOMIA, Lithotomy.

UROMANT'IA, from *ουρον*, 'urine,' and *μαντεια*, 'divination.' *Uroscopia*. The art of divining diseases by simple inspection of the urine. One professing to be able to do this is called *Uromant'is*.

URON, Urine.

URONOL'OGY, *Uronolog'ia*, from *ουρον*, 'urine,' and *λογος*, 'a description.' The part of medicine which treats of the urine.

UROPYGION, Coccyx.

URORRHAGIA, Diabetes.

URORRHŒA, Enuresis.

UROSCOPIA, Uromantia.

URO'SES, from *ουρον*, 'urine.' Diseases of the urinary organs.—Alibert.

URTICA, *U. Dioica*; the Common stinging nettle, *Adic'z*, (F.) *Ortie*. Family, Urticeæ. *Sex. Syst.* Monœcia Tetrandria. This plant has been long used for medical and culinary purposes. The young shoots, in the spring, are considered to possess diuretic and antiscorbatic properties.

URTICA DIOICA, *Urtica*—*u. Iners magna fœtidissima*, Galeopsis—*u. Mortua*, *Lamium album*—*u. Pilulosa*, *U. Pilulifera*—*u. Roman*, *U. Pilulifera*.

URTICA PILULIF'ERA, *Pill-bearing Nettle*, *U. Pilulo'sa*, *U. Rom'd'na*, (F.) *Ortie Romaine*. The seed was formerly given in diseases of the chest. Nettles have been used as stimulants to paralytic limbs.

URTICA URENS, (F.) *Ortie brulante*. A lesser variety of the nettle, possessing similar virtues.

URTICA'RIA, from *urtica*, 'a nettle;' *Enanthe'sis urtica'ria*, *Ure'do*, *Scarlati'na urtica'ta*, *Feb'ris urtica'ria*, *Par'pura urtica'ta*, *Feb'ris rubra prurigin'o'sa*, *Saltans rosa*, *Nettle rash*; from *urti'ca*, 'a nettle,' because the eruption resembles that produced by the stings of a nettle. A disease, distinguished by those elevations of the cuticle called *wheals*. They have a white top, and are often surrounded by a diffuse redness. They excite intolerable itching, especially when the person is warm in bed. The eruption frequently goes and comes, once or more in the 24 hours, and is generally dependent upon gastric derangement. In some people, nettle-rash is induced by shell-fish, eggs, nuts, &c. It is not, usually, a disease of any consequence, and its treatment is limited to the use of absorbent laxatives, and some general means. Willan has described six varieties of the complaint;—the *Urtica'ria febrilis*, *U. exan'tida*, *U. perstans*, *U. confer'ta*, *U. subcut'nea*, and *U. tubero'sa*.

URTICARIA PORCELLANA, Essera.

URTICA'TIO, from *urtica*, 'a nettle.' A sort of flagellation, with nettles;—used with the intention of exciting the skin.

URUCU, Terra Orleana.

USNEA, Lichen saxatilis.

USTILAGO, Ergot.

USTIO, Burn.

USTION, *Ustio*, *Causis*, from *uro*, 'I burn.' The act of burning, or of applying the actual cautery. Also, the effect of cauterization;—a burn.

USTULA'TIO. An operation by which a substance is dried by warming.

USUS, Habit.

UTER, Uterus.

UTERI ANTEVER'SIO, Hysteroloxia anterior—*u. Convulsivus morbus*, *Lorind matricis*—*u. Coryza*, *Leucorrhœa*—*u. Flexio*, *Hysteroloxia*—*u. Inclination*, *Hysteroloxia*—*u. Obliquitas*, *Hysteroloxia*—*u. Pronatio*, *Hysteroloxia anterior*—*u. Pruritus*, *Nymphomania*—*u. Reflexio completa*, *Hysteroloxia posterior*—*u. Retroversio*, *Hysteroloxia posterior*—*u. Rheuma*, *Leucorrhœa*—*u. Versio incompleta*, *Hysteroloxia*.

UTERI ASCENSUS, Hysteria.

UTERINE, *Uteri'nus*, from *uterus*, 'the womb.' That which belongs or relates to the womb.

The UTERINE ARTERY, *Arteria uterina hypogastrica*, in size is always in a ratio with the greater or less state of development of the uterus. It arises from the hypogastric, either separately or with the umbilical, or from the internal pudic. It passes upon the lateral parts of the vagina, to which it gives branches; and afterwards ascends on the sides of the uterus, and divides into a considerable number of very tortuous branches, which enter the tissue of the organ.

The UTERINE MUSCLE OF RUYSH consists of some fleshy fibres at the fundus of the uterus, which he regarded as forming a particular muscle.

UTEROGESTATIO, Pregnancy.

UTEROMANIA, Nymphomania.

UTERUS, *Uter*, *Utriculus*, *Loci*, *Loci muliebres*, *Vulva*, *Venter*, *Aræna natu'rae*, *Conceptaculum*, *Matrix*, *Ager natu'rae*, *Hys'tera*, *Metra*, *Stera*, *An'gos*, *Delphys*, the *Womb*, (F.) *Matrice*, *Sien*. The uterus,—destined to lodge the fetus from the commencement of conception till birth,—is a hollow, symmetrical organ, having the shape of a truncated conoid: it is situate in the pelvis, between the bladder and the rectum, above the vagina, and below the convolutions of the small intestine. The uterus is flattened from before to behind, and is nearly an inch in thickness. It is two inches broad, in its highest part, and becomes narrower towards the vagina; terminating in a contracted portion, called the *cervix* or *neck*;—to distinguish it from the rest of the organ, called the *body*.

From its *fundus* or upper portion the Fallopian tubes pass off. The mouth is called *Os Uteri* or *Os Tinae*. The cavity is very small, and its parietes are thick. The portion of the cavity, corresponding with the body, is triangular and flattened. Its superior angles present the extremely fine orifices of the Fallopian tubes. The cavity of the neck is slightly dilated before opening into the vagina.

The uterus is composed, 1. Of a *serous membrane*. This is external, and furnished by the peritoneum; which is reflected upon the uterus from the posterior surface of the bladder and the anterior surface of the rectum. It forms, also, the *broad ligaments of the uterus*, *Ligamenta lata*, *Alæ vespertilionis*. These contain, above, the Fallopian tube; beneath and anteriorly, the round ligaments; and, behind, the ovary. They are two membranous productions or duplicatures of the peritoneum, sent from the edges of the uterus and posterior extremity of the vagina, in a transverse direction, to be fixed to, and to line, the side of the pelvis. 2. Of a *mucous membrane*, which is a prolongation of that of the vagina, and extends into the tubes. 3. Of a *proper tissue*, whose thickness is considerable. It is of a close texture; is grayish and elastic; and resists the instrument that divides it. Its intimate nature is but little known. During gestation it is truly muscular.

The arteries of the uterus proceed from the spermatic and hypogastric. Its veins follow the same course, and bear the same name as the arteries. They are very tortuous, and form large sinuses in the parietes of the organ,—

called *Uterine Sinuses*. Its nerves proceed from the sciatic and hypogastric plexuses. Its lymphatic vessels are very multiplied; and during pregnancy acquire enormous dimensions. The changes experienced by the uterus during gestation, and after delivery, are very numerous and important to be known. They regard its situation, direction, size, shape, texture, connexions, vital properties, &c.

UTERUS, Abdomen—u. Anteversion of the, *Hysteroloxia anterior*—u. Hourglass, contraction of the, *Chaton*—u. *Inclinatus*, *Hysteroloxia*.

UTERUS, IRRITABLE, *Neuralgia of the uterus*. A disease characterized by deep-seated pain in the lower part of the abdomen, and in the back and loins; generally diminished by lying down, and increased by exercise, and more severe for a few days preceding and during menstruation.

On examination *per vaginam*, the uterus is found to be tender on pressure; and the cervix and body slightly swollen, but not usually indurated.

It is an obstinate affection, but frequently ends of itself after years of suffering.

The treatment must be,—the horizontal posture; local blood-letting to the uterus; emollients; soothing injections; narcotics, warm bath, &c.

UTERUS, INVERSION OF THE, *Inversio Uteri*, *Metranastrophé*, *Ædoptosis Uteri inversa*, (F.) *Inversion de la Matrice*, *Renversement de la Matrice*. The uterus, displaced and turned inside out. This can only happen through want of caution on the part of the medical practitioner. It is a fatal accident, unless speedily reduced. This must be done by gradually returning the superior part, by grasping it with the hand, and making the rest follow.

UTERUS OBLIQUUS, *Hysteroloxia*—u. Retroversion of the, *Hysteroloxia posterior*.

UTERUS, RUPTURE OF THE, *Metrorrhæxis*, *Ruptura Uteri*, *Perforatio Uteri*, *Laceratio of the Womb*, (F.) *Rupture de la Matrice*. This dreadful accident occurs during labour, and is known to have taken place, when the child's head suddenly recedes during a pain, with vomiting, sinking of the pulse, cold sweats, &c. When it is evident that this has occurred, the hand must be passed into the uterus, and the feet of the child be brought down.

Cases are on record, in which partial lacerations of the uterus have healed, and the patient has done well. This is a rare event, and not to be anticipated.

UTRICLE. See Semicircular canals.

UTRICULUS, Uterus—u. *Lacteus*, *Receptaculum chyli*.

UVA, *Uvula*, see *Vitis vinifera*—u. *Ursi*, *Arbutus uva ursi*.

UVE CORINTHIACÆ, see *Vitis Corinthiaca*.

UVE PASSÆ, *Dried Grapes*, *Raisins*. See *Vitis Vinifera*.

UVE PASSÆ MAJORES, see *Vitis vinifera*—u. *Passæ minores*, see *Vitis Corinthiaca*—u. *Passæ solè siccata*, see *Vitis vinifera*.

UVATIO, *Ceratocèle*, *Staphyloma*.

UVEA, from *Ura*, 'an unripe grape.' *Tu'nica acino'sa*, seu *acinifor'mis*, seu *uva'lis*, seu *acinalis* seu *ucifor'mis*, *Rhago'ides*, *Rhox*, (F.) *Uvée*.

Some anatomists have given this name to the choroid coat of the eye; others, to the posterior surface of the iris, on account of the black and very thick varnish that covers it.

UVÉA, COMMISSURE OF THE, Ciliary ligament.

UVÉE, Uvea.

UVIGENA, Uvula.

UVIGERA, Uvula.

UVULA, *Pinnaculum fornicis gutturalis*, *Ura*, *Staph'yle*, *Tintinnabulum*, *Coluvcl'la*, *Cion*, *Ci'onis*, (q. v.) *Garga'reon*, *Coluv'na oris*, *Gurgul'io*, *Interseptum*, *Processus* seu *Cartilago Uvifer*, *Uv'igena*, *Uv'igera*, *Pap of the Throat*, (F.) *Luctte*. A fleshy appendix or prolongation, which hangs from the middle or free edge of

the velum palati. The uvula has a conical shape, and is of a greater or less size in individuals. It is formed, especially, by the mucous membrane of the velum palati; and contains, within it, the *azygos uvulæ* muscle. Its use is not clear.

UVULA, VESICAL, see Urinary bladder.

UVULAR, *Uvulæ*, from *u'vula*. That which belongs to the uvula.

The UVULAR GLANDS are small follicles, belonging to the mucous membrane covering the uvula.

UVULARIA, *Ruscus hypoglossum*.

UVULITIS, *Ang'na uvularis*, *Staphyl'itis*. Inflammation of the uvula.

## V.

VACCINA, *Vaccin'ia*, *Vari'ola vaccina*, *V. vaccinica*, *Eranth'ema vaccina*, *Syn'ocha vaccina*, *Vacc'ola vera*, *Vacc'ina antivariolosa*, *Vacciola scutellata*, *Vari'ola tut'oria*, *Cowpox*, *Kine Pock*, *Inoculated Cowpox*, *Em'physis vaccina inserta*, from *vacca*, 'the cow,' (F.) *Vaccine*. The cow-pox is a disease of the cow, arising spontaneously, which, if transmitted to man by means of inoculation, preserves him from small-pox contagion.

The promulgation of this valuable property of the vaccine virus is due to Dr. Jenner. When inoculating for the small-pox in Gloucestershire, in 1775, he was surprised to meet with a number of persons in the same district, in whom the insertion of the virus produced no effect; although they had never passed through the small-pox. On investigation, he found that all these persons had previously been affected by a pustular eruption of the cow, which they had taken, by milking the animal; and which eruption they called *Cow-pox*. This discovery induced him to institute experiments, and he found that such preservative effect actually existed.

The *Vaccine Virus*, or the fluid of the eruption, is not now usually taken immediately from the cow; experience having demonstrated, that it is nearly as efficacious when obtained from the human vesicle.

The characteristic of cow-pox eruption is:—a semi-transparent, pearl-coloured vesicle, with a circular or somewhat oval base; its upper surface, until the end of the 8th day, being more elevated at the margin than in the centre; and the margin itself being turgid, shining, and rounded, so as often to extend a little over the line of the base. This vesicle is filled with clear lymph, contained in numerous little cells, that communicate with each other. After the 8th or 9th day from the insertion of the virus, it is surrounded by a bright red, circumscribed aureola, which varies, in its diameter, in different cases, from a quarter of an inch to two inches; and is usually attended with a considerable tumour, and hardness of the adjoining cellular membrane. This aureola declines on the

11th or 12th day: the surface of the vesicle then becomes brown in the centre; and the fluid, in the cells, gradually concretes into a hard, rounded scab, or crust, of a reddish-brown colour, which at length becomes darker, contracted, and dry, but is not detached till three weeks after vaccination. It leaves a permanent, circular cicatrix, about five lines in diameter, and a little depressed; the surface being marked with very minute pits or indentations, denoting the number of cells, of which the vesicle had been composed.

This is the progress of the *genuine cow-pox*. At times, fever occurs about the 9th or 11th day; but, at others, not the slightest indisposition is felt. Aberrations from this progress occur, which must be attended to; as the same preservative influence is not exerted by *irregular* or *spurious cow-pox*. If the eruption runs speedily to a height; has an aureola too early; is irregular at its edges; and contains pus, instead of a limpid fluid,—it cannot at all be depended upon.

Small-pox occurs, at times, as an epidemic, after vaccination. For a time, the enthusiastic advocates of vaccination would not admit the affection to be small-pox; and, accordingly, they gave it the name *Varioloid*, (q. v.) It is unquestionably small-pox, but modified, and greatly divested of its terrors by previous vaccination; and it is said to happen less frequently after vaccination than after *small-pox inoculation*.

Vaccination is now practised every where, except amongst those in whom ignorance and prejudice exclude the lights of reason and philanthropy. There is ground, however, for the belief, that for full protection, revaccination may be occasionally necessary.

VACCINA ANTIVARIOLOSA, *Vaccina*.

VACCINATION, *Vaccinatio*, from *vacca*, 'a cow.' *Cow-pox inoculation*, *Jenne'riau Inoculation*. An operation, which consists in inserting the vaccine virus under the cuticle, so that it may come in contact with the absorbents. It is extremely simple, and requires

merely that the point of a lancet should be held under the cuticle for a short time.

The best time for taking the matter for vaccination is about the 7th or 8th day, before the appearance of the aureola, when it ought to be limpid and transparent. The most certain method is, to pass it from arm to arm; but this is not always convenient; and, hence, it is taken upon *points* or pieces of quill, or between glasses. It must, of course, be softened for use. This is done by means of a little water, which does not destroy its efficiency. The scab, too, which falls off about the end of three weeks—sooner or later—is capable of communicating the affection, if dissolved in water; and this is the most common method of transmitting the vaccine virus in some countries.

VACCINE, Vaccina.

VACCINELLA. A term employed by some to designate spurious cow-pox.

VACCINIA, Vaccina.

VACCINIA PALUSTRIS, *Vaccinium oxycoccos*.

VACCINIUM MYRTILLUS. The *Myrtle Berry*, *Vaccinia myrtillus*, *Bilberry*, *Black-berry*, *Whortle-berry*, *Black Whorts*, *Vaccinium nigrum*, (F.) *Airelle Anguleuse*, *Raisin de Bois*. Family, Vaccinæ. *Scz. Syst.* Octandria Monogynia. The berries—*Bacca Myrtillorum*—are esteemed to be antiscorbutic, when prepared with vinegar. They are also said to possess antiseptic and subastringent properties, when dried. They are not used in medicine; but are frequently eaten with milk and sugar.

VACCINIUM NIGRUM, *V. myrtillus*.

VACCINIUM OXYCOCOS, *Oxycoccos*, *Vaccinia palustris*, *Vitis Idaea palustris*, *Moorberry*, *Cranberry*, (F.) *Canneberge*. The berries are pleasantly acid and cooling. They make an agreeable preserve.

VACCINIUM VITIS IDÆA, *Red Bilberry*, *Am-pelos Idaea*, *Whortleberry*, *Cowberry*, (F.) *Airelle ou Canneberge ponctuée*. A decoction of the leaves has been used in calculous affections. They are astringent. The ripe berries are pleasantly acid, and refrigerant.

VACCIOLA SCUTELLATA, Vaccina.

VACCIOLA VERA, Vaccina.

VAGIN, Vagina.

VAGINA, 'a sheath.' *Vagina muliebri* seu *uteri* seu *Uteri*, *Sinus muliebris*, *S. Pudoris*, *Colpos*, *Vagina Penis*, *Vulvo-uterine canal*, (F.) *Vagin*. A cylindrical canal, five or six inches long; situate within the pelvis, between the bladder and rectum. It communicates by one extremity—*Aulos*—with the vulva; by the other, with the womb,—the neck of which it embraces. The vagina is lined, internally, by a mucous membrane; and is partly closed, in young females, by the hymen, and carunculae myrtiformes. Around the mucous membrane is a layer of spongy, erectile tissue; and a cellulose-vascular membrane. A constrictor muscle; numerous vessels furnished by the vaginal artery particularly; veins and nerves, proceeding from the sciatic plexus, also, enter into the composition of the organ.

The term, VAGINA or SHEATH, *Theca*, is extended to many parts, which serve as envelopes to others.

The *Vagina* or *Sheath* of the *Vena Porta*, (F.)

*Gaino da la Vcino-porta*, is the cellular membrane that accompanies the divisions of the *vena porta* into the substance of the liver.

*Sheath*, (F.) *Gainc*, is sometimes applied to the fascia enveloping the limbs; to cellular membrane, enveloping the muscles, and entering between their fibres; and to that which surrounds the blood-vessels; to the synovial membranes surrounding tendons, and lining the gutters of bones, &c.

VAGINA GLISSONII, Capsule of Glisson—v. *Muliebris*, *Vagina*—v. *Nervorum*, *Neurilema*—v. *Penis*, *Vagina*—v. *Portæ*, Capsule of Glisson—v. *Uterina*, *Vagina*.

VAG'INAL, *Vaginalis*, from *vagi'na*, 'a sheath.'

The VAGINAL ARTERY exists, as a matter of course, only in the female. It arises from the hypogastric or from the uterine, vesical, internal pudic, umbilical, &c, and sends its branches, first to the lateral parts of the vagina; and afterwards to the anterior and posterior surfaces.

The VAGINAL PROCESS of the temporal bone, (F.) *Apophyse vaginale ou engainante*, *Gaine de l'apophyse styloïde*, *Chaton*, is a bony crista, which embraces the base of the styloid process.

The TUNICA VAGINALIS, *T. Elytroïdes*, vel *Elytrodes*, is the serous membrane, which envelops the testicles. Before the descent of the testicle, the tunica vaginalis does not exist. It is formed by a prolongation—furnished by the peritoneum to the testicle, when it issues from the abdomen—which, subsequently, contracts; and, ultimately, is entirely separated from it, constituting a distinct coat. The tunica vaginalis forms a close sac, which is reflected over the testicle and epididymis, without containing them in its cavity. Its inner surface is smooth, and lubricated by a serous fluid. Its outer surface adheres to the fibrous coat, common to the spermatic cord and testicle. This reflected portion is the *Tunica vaginalis testis*.

VAGINITIS, Leucorrhœa (vaginal.)

VAGISSEMENT, Cry, Vagitus.

VAGITUS, (F.) *Vagissement*. The cry, (q. v.) of the new-born child. *Squalling*.

VAGUS NERVUS, Pneumogastric.

VAIRON, (F.), *Dispar oculis*. One who has eyes of different colours. It also means a *wall-eyed* animal; or one whose iris is surrounded by a whitish circle.

VAISSEAU, Vessel.

VASSEAUX CAPILLAIRES, Capillary vessels—v. *Chylifères*, Chyliferous vessels—v. *Lactés*, Chyliferous vessels—v. *Lactifères*, Lactiferous vessels—v. *Ombilicaux*, Umbilical vessels.

VALANIDA, *Fagus sylvatica*.

VALERIAN, GARDEN, *Valeriana plu*—v. *Wild, Valeriana*.

VALERIANA, *V. officinalis*, *Wild Valerian*, *Valeriana minor*, *Officinal Valerian*. Family, Dipsacæ. *Scz. Syst.* Triandria Monogynia. The root has been long extolled as an efficacious remedy in epilepsy, and in a variety of nervous complaints. It has been also advised as a tonic, antispasmodic, and emmenagogue. It has a strong, fetid odour; bitterish, subacid, and warm taste; and its virtues are extracted by water and alcohol.

VALERIANA CELTICA, *Celtic Nard*, *Spica Cel-*

*tica, S. Alpina, Nardus Celtica, Salvia*, *Nardum Gallicum, Spica Celtica Dioscoridis*, (F.) *Nard Celticus*. The roots of this Alpine plant have been recommended as stomachic, carminative and diuretic. It has a moderately strong smell; and a warm, bitterish, subacid taste.

VALERIANA MAJOR, *V. plu*—*v. Locusta, V. dentata*—*v. Minor, Valeriana*—*v. Officinalis, Valeriana*.

VALERIANA PHU, *V. major, Garden Valerian*, (F.) *Grand Valériane*. The root has been recommended in rheumatism; especially in sciatica, and in epilepsy, &c.

VALERIANA DENTATA, *V. locusta, Corn Salad*. A wholesome, succulent plant, cultivated in Europe as a salad. It is antiscorbutic and gently aperient.

VALÉRIANE GRANDE, *Valeriana phu*.

VALET À PATIN, (F.) *Volcel'la Patin*. The common ligature forceps is a modification of this instrument invented by one Patin. It consists of two branches, united at the middle by a hinge, which may be separated or approximated by means of a screw or running ring. It is used for seizing hold of vessels that are to be tied.

VALETUDINARIUS, Sickly.

VALETUDINARY, *Valtudinarian, Valetudinarius*, from *valetudo*, 'health.' One of delicate health. One subject to frequent diseases. An *Invalid*.

VALETUDO, Sanitas.

VALGUS. See *Kyllosis*.

VALLA, *Tinctura jalapii*.

VALLUM. The eyebrow or supercilium, (q. v.) Also, a species of bandage.—Galen.

VALS, MINERAL WATERS OF. A French acidulous chalybeate, at Vals, six leagues from Viviers, in the department of Ardèche. There are five springs, containing carbonic acid, sulphate of iron, and alum. They are employed in passive hemorrhages, leucorrhœa, &c.

VALVE, *Val'cula*, (F.) *Valvule*, from *volvo*, 'I fold up.' A small door. Any membrane or duplicature of a membrane, which prevents a reflux of humours or other matters in the vessels and canals of the animal body. There are some valves, whose functions appear to be,—to retard or to modify the course of substances along canals, &c. See *Mitral, sigmoid, tricuspid, ileo-cæcal valve*, &c.

VALVE OF FALLOPIUS, Bauhin, valve of—*v. Ileocæcal, Bauhin, valve of*—*v. of Tulpius, Bauhin, valve of*—*v. of Variolus, Bauhin, valve of*.

VALVES, SEMILUNAR, Sigmoid valves.

VALVULA, Valve—*v. Cæci, Bauhin, valve of*—*v. Cerebelli, V. Vieussenii*—*v. Coli, Bauhin, valve of*—*v. Foraminis ovalis, Ovalis fossa*—*v. Guifartiana*, see *Thebesius*, veins of—*v. Ilii, Bauhin, valve of*.

VALVULA VEL PLICA SEMILUNARIS. A small doubling of the tunica conjunctiva, which lies between the caruncula lacrymalis and the ball of the eye. In birds, this is large, and called *Membra'na nictitans vel Pal'pebra ter'tia*.

VALVULA THEBESII, see *Thebesius*, veins of—*v. Vaginae, Hymen*—*v. Venæ magnæ*, see *Thebesius*, valve of.

VALVULA VIEUSSENI, *Velum Vieussenii*,

*Val'cula cerebelli seu Willisiana, Velum interjectum cerebelli, V. apoph'ysi crumiformi obtentum, Lacunar ventriculi quarti superior, Velum medullare seu medullare anticum*. (F.) *Valvule de Vieussens, Voile medullaire supérieure*. A thin, medullary lamina, over the under end of the Aquæductus Sylvii, and upper part of the 4th ventricle. At the sides of the valves are two medullary tracts, called *Processus ad Testes, Columnæ Valvulæ Vieussenii*, or *Oblique inter-cerebral Commissure*.

VALVULA WILLISIANA, *V. Vieussenii*.

VALVULE CONNIVENTES; numerous circular folds in the intestinal canal from the pyloric orifice through the greater part of the small intestine. They are folds of the mucous membrane; and their chief use appears to be,—to retard the course of the alimentary mass, and to afford a larger surface for the origin of chyliferous vessels.

VALVULE EPISCOPALES, Mitral valves—*v. Triglochines, Tricuspid valves*—*v. Trisuleæ, Tricuspid valves*.

VALVULE, Valve—*v. d'Eustache, Eustachian valve*—*v. de Pyloro*, see *Pylorus*—*v. de Vieussens, Valvula Vieussenii*.

VALVULES SIGMOIDES ou SEMILUNAIRES, Sigmoid valves.

VANELLOE, Vanilla.

VANILLA, *Banilla, Banilas, Banilloës, Banilla, Benzô'ênil, Aracus aromaticus*, (F.) *Vanille, Baume de Vanille*. The *Vanilloe* is a long, flattish pod; containing, under a wrinkled, brittle shell, a reddish-brown pulp, with small, shining, black seeds. The parasitic plant, which affords this pod, is the *Epidendrum Vanilla*. Family, Orchidææ. See *Syst. Gynandria Dianthia*. Vanelloes have an unctuous, aromatic taste, and a fragrant smell, like that of some of the finer balsams, heightened with musk. Although chiefly used as perfumes, they are reputed to possess aphrodisiac virtues.

VAPORARIUM, *Amistérion, Laconicum, Suda'rium, Sudato'rium; a Vapourbath*. A useful remedy in rheumatic and cutaneous affections; and wherever it is important to relax the cutaneous capillaries.

VAPORARIUM, Hypocaustum. See *Stove*.

VAPORATIO, Evaporation.

VAPORES UTERINI, Hysteria.

VARA, Hypochondriasis, Hysteria.

VARA, Barre.

VAREC, Kelp—*v. Vésiculeux, Fucus vesiculosus*.

VARENI, Ambulo-flatulentus, Gout (wandering.)

VARICE, Varix.

VARICELLA, (diminutive of *Variola*, Small-Pox.) *Emphlysis varicella, Exanthema varicella, Syn'ochus varicella, Chicken pox, Variole lymphatica, V. spuria, Variole nothæ, V. illegitimæ, V. voluticæ, V. pacille, Éollion*, (F.) *Varicelle, Petite vérole volante, Vérolette*. A disease, characterized by vesicles scattered over the body, which are glabrous, transparent, and about the size of peas. They appear in successive crops; are covered by a thin pellicle; and, about the 3d, 4th, or 5th day from their appearance, burst at the tip, and concrete into small, puckered scabs, which rarely leave a pit in the skin.

Three varieties have, sometimes, been designated. 1. The *V. lentiformes*, or *lenticular chicken pox*, which are irregularly circular, and flattened at the top; the fluid being at first whitish, and afterwards straw-coloured. This is the *common chicken pox*. 2. The *Varicella coniformis*, or *Conoidal Chicken Pox*, *Pcmphigus varioloides*, *Variolulymphatica*, *Hydrachnisis*, *Swine Pox*, *Water Pox*, *Water Jags*, in which the vesicles are generally acuminated, and the fluid pellucid throughout; and 3dly, the *Varicella globularis* or *Illicis*, in which the vesicles are globular and larger; the fluid being, at first, whey-coloured, and afterwards yellowish.

These divisions are, however, very arbitrary, for they are generally confounded.

Variola has been, sometimes, mistaken for this disease, and conversely. A little attention to the history of the eruption in the two affections will prevent error. Varicella is not contagious. At times, it prevails epidemically. It cannot be propagated by inoculation. The treatment is extremely simple; rest, abstinence, and the antiphlogistic regimen being all that is, generally, required.

**VARICIFORMES PARASTATÆ.** A name given, by some authors, to the ducts of the epididymis, because they seem knotty and varicose.

**VARICOBLEPH'ARON**, from *Varix*, and *βλεφαρον*, 'eyelid.' A varicose tumour of the eyelid.

**VARICOSE/LE**, from *varix*, and *κληη*, 'a tumour,' *Oscitoccl'ē varico'sa*, *Her'nia varico'sa*, *Ramez varico'sus*, *Spermatocle*, (q. v.) *Cirsocle*. A varicose dilatation of the veins of the scrotum and spermatic cord. This latter variety of the disease is more common on the left side than the right. It appears under the form of a soft, doughy, unequal, knotty, compressible, and indolent tumour, situate in the course of the cord, and increasing from below upwards. It is less, when the individual is in the recumbent posture, and increases when he is erect. It is, ordinarily, an affection of no moment, and is very common, requiring merely the use of a proper suspensory bandage. It has been advised, in bad cases, to tie the enlarged vein, but the operation is not free from danger induced by phlebitis. Sir A. Cooper has proposed the removal of a portion of the scrotum, so as to render the remainder of the scrotum a natural bandage. This plan has been found effectual.

**VARICOMPH'ALUS**, from *varix*, and *ομφαλος*, 'the umbilicus.' Varicose tumour of the umbilicus; *cirsomphalus*, (q. v.)

**VARICOSE**, *Varico'sus*, (F.) *Variqueux*, affected with varix; or belonging to, or connected with, varix;—as a *varicose vein*, (q. v.) a *varicose ulcer*, i. e. one kept up by *varices*.

**VARICOSITAS CONJUNCTIVÆ**, *Cirsophthalmia*.

**VARICULA**, *Varix parva*. A diminutive of *varix*. Also, a varicose swelling of the veins of the tunica conjunctiva.—M. A. Severinus.

**VARIOLA**, *Variola*, *Varioli*, *Small-Pox*, *Empyē'sis Variola*, *Euphlogia*, *Chaspe*, *Æolec'thyma*, *Pox* (N. of England) *Pestis varioloid'sa*, *Febri's varioloid'sa*; from *varius*, 'spotted,' or

from *vari*, 'plumple.' (F.) *Varioli*, *Petite Vérole*, *Picote*. A disease now of somewhat less interest than before the discovery of vaccination. It is of a very contagious nature, and is supposed to have been introduced into Europe from Asia, at an early period of the middle ages. It is characterized by fever, with pustules, appearing from the 3d to the 5th day, and suppurating from the 8th to the 10th, and it possesses all the distinctive properties of the major exanthemata. It is capable of being produced by inoculation, (q. v.); but this *inoculated small-pox*—*Variola inserta*—communicates the disease as readily through the air as the *natural small-pox*, or that received without inoculation.

Small-pox is distinguished into two classes, according to the character of the eruption, the *discrete* or *distinct*, and the *confluent*.

1. In the **VARIOLA DISCRETA**, *Empyē'sis variola discreta*, *Variola discreta benigna*, *Variolæ regularis* seu *discreta*, *Distinct Small-Pox*, the pustules are usually of the size of peas; distinct, distended, and circular; the intervening spaces being red; the fever inflammatory throughout; and ceasing when the eruption is complete.

2. In the **VARIOLA CONFLUENS**, *Empyē'sis variola conflens*, *Variolæ regulares conflentes*, *Vesiculae Divee Barbare*, *Vésicules de Sainte-Barbe*, or *Confluent Small-Pox*, the pustules are confluent or run together; flaccid and irregularly circumscribed; the intervening spaces being pale and the accompanying fever typhoid. In children, diarrhœa, and, in adults, ptyalism, with swelling of the hands and feet generally appear towards the period of the *secondary fever*, which occurs from the tenth to the thirteenth day. The fever that precedes and accompanies the eruption is called the *Eruptive fever*. The prognosis is favourable in the distinct kind, if properly managed. The confluent is always dangerous,—the unfavourable symptoms being—flattening of the pustules, or subsidence of the eruption; the breathing becoming much obstructed or oppressed; or marks of inflammatory and congestive affections in the different viscera.

The treatment of the distinct kind is very simple; the antiphlogistic regimen, with cathartics, being all that is necessary.

The confluent kind requires the same management as typhus fever.

**VARIOLA AMBOINENSIS**, *Frambœsia*—v. *Inserta*, *Variola* (by inoculation)—v. *Lymphatica*, *Varicella*—v. *Spuria*, *Varicella*—v. *Vaccina*, *Vaccina*.

**VARIOLÆ**, *Variola*—v. *Illegitimæ*, *Varicella*—v. *Modificatæ*, *Varioloid*—v. *Nothæ*, *Varicella*—v. *Pucillæ*, *Varicella*—v. *Tutoriæ*, *Vaccina*—v. *Volaticæ*, *Varicella*.

**VARIOLÆ**, *Variola*.

**VARIOLI**, *Variola*.

**VARIOLI'S BRIDGE**, *Pons Varolii*.

**VARIOLOID**, *Varioloides*, *Variolæ modificatæ*, from *vari'ola*, small-pox, and *ειδος*, 'form,'—resembling small-pox. This is, really, small-pox, modified by previous inoculation or vaccination; and hence it has been properly called *modified small-pox*. That it is small-pox is proved by the fact, that matter, taken from a varioloid pustule, will communicate small-pox

to one who has never had it naturally or by inoculation, or who has never been vaccinated. It is, almost always, a milder disease than small-pox; and this circumstance, with its shorter duration, exhibits the salutary effects of previous vaccination. It has appeared epidemically.

**VARIQUEUX**, Varicose.

**VARIX**, *Phlebeurys'ma*, *Hernia seu Ectasia venarum*, *Angiecto'sia veno'sa*, *Itia*, *Cirsus*, *Varicose Vein*, (F.) *Varice*, is considered, by some, to come from the verb *variare*, 'to turn,' 'to twist';—on account of the sinuosities of varicose veins. Dilatation of a vein.

Varices are owing to the retardation of venous circulation; and in some cases, to relaxation of the parietes of the veins. They are very common in the superficial veins of the lower limbs, especially of pregnant females. The tumour or tumours, formed by varices, are soft, knotty, unequal, indolent, and livid; without pulsation, and yielding readily to the impression of the finger; but returning as soon as the compression is discontinued. Sometimes, the vein bursts and gives rise to hemorrhage. The treatment is usually palliative, and consists in exerting a uniform and constant pressure upon the part, by means of an appropriate bandage. The radical cure has, also, been obtained by extirpation, division of the vein, or ligature. The second course is apt to be followed by phlebitis.

**VARUS**, Ionthus. See *Kyllosis*.

**VAS**, Vessel—v. *Deferens mulieris*, *Tuba Fallopiana*—v. *Urinarius*, *Ureter*.

**VASA LACTEA**, Chyliferous vessels—v. *Sedalia*, *Hæmorrhoidal vessels*.

**VASA VASORUM**. Small vessels that supply larger. However minutely we trace a vessel, we always find its parietes supplied with blood for its nutrition by a smaller vessel.

**VASA VORTICO'SA**, (F.) *Tourbillon vasculaire*. The contorted vessels which creep on the choroid coat of the eye, ciliary veins, (q. v.)

**VASCULAR**, *Vascula'ris*, *Vasculo'sus*. That which belongs or relates to vessels;—arterial, venous, or lymphatic; but generally restricted to blood-vessels only. Bichat gave the name—*Vascular system*—to the blood-vessels, and of this he made two divisions.

1. The *Arterial System* or *System of red blood*, (F.) *Système vasculaire à sang rouge*, which commences with the radicles of the pulmonary veins; and includes the pulmonary veins, the left cavities of the heart and the aorta, with all its ramifications. The blood, in this system, is distributed to the general capillary system, where it loses its arterial quality and becomes venous.

2. The *Venous system* or *Vascular system of black blood*, (F.) *Système vasculaire à sang noir*, carries the venous blood from every part of the system to the lungs. It takes its origin in the general capillary system; continues in the veins, right auricle, and ventricle of the heart

and the pulmonary artery and its branches, and is finally lost in the capillary system of the lungs. See *Circulation*.

**VASE À SAIGNER**, Cup.

**VASTUS**. That which is *vast* or has a great extent.

The **VASTUS EXTERNUS** and **V. INTERNUS** are two considerable, fleshy masses, which form part of the *Triceps Cruris*, (q. v.)

**VAULT**, (old F. *Voulte*.) *Fornix*, *Cam'era*, (F.) *Voûte*. A name given by anatomists to several parts which are rounded superiorly; concave and arched inferiorly,—as the *Vault of the cranium*, or the upper part of the skull,—the *Palatine vault or roof of the mouth*, &c. &c.

**VAUQUELINE**, Strychnina.

**VECTIS**, Lever—v. *Elevatorius*, *Elevator*—v. *Triploides*, *Elevator*, *triploid*.

**VEGETATION**, *Vegeta'tio*. A morbid part, which rises as an excrescence in syphilis, &c.—as the *Cauliflower excrescence*, &c. The term is, also, applied to the fleshy granulations or *Hypersarcoses*, which sometimes arise at the surfaces of wounds or ulcers.

**VEHICLE**, *Vehic'ulum*, *Oche'ma*, (F.) *Vehicule*, from *ve'here*, 'to carry.' Any thing which serves to carry; thus, air is the *vehicle* of sound; the arteries are the *vehicles* of the blood. In *Pharmacy*, the name *vehicle* is given to any excipient; or to substances which serve as the media of administration for any medicine.

**VÉHICULE**, *Vehicle*.

**VEIN**, *Vena*, *Phlebs*, *Phleps*, (F.) *Veine*. The veins are vessels for the conveyance of black blood from every part of the body to the heart. They are found wherever there are arteries; and, altogether, form the *venous system*, which may be subdivided into two distinct secondary systems. 1. The *General venous system*, which commences in all the organs, by very minute radicles; and terminates in the heart by the vena cava and the coronary vein. 2. The *Abdominal venous system*, which is limited to the abdominal cavity; commences, also, by a great number of branches, and terminates in the liver by a single trunk, which subdivides in that organ. It is called, also, the *System of the Vena Porta*, or the *Portal System*. See *Porta*.

The veins form two sets, one *deep-seated*, *Vena satel'lites*, *V. concom'ites*, which accompany the arteries; the other *superficial* or *subcutaneous*. Their parietes, which are thinner than those of the arteries, are composed of two coats; the one, external, loose, extensible, and with parallel, longitudinal fibres—the *proper membrane*; the other, the *common* or *inner membrane*, which is thin, polished, and has numerous duplicatures or folds forming parabolic valves. These valves are most numerous in the veins of the lower extremities. The coats of the veins are supplied with small arteries or *vasa vasorum*, veins, and lymphatics. They have not as many nervous filaments as the arteries. These filaments are from the great sympathetic.

TABLE OF THE VEINS.

1. Right Bronchial.  
2. Intercostal Veins.  
3. Semi-azygos.

1. VEINS WHICH FORM THE SUPERIOR VENA CAVA.

- Receive the
  - 1. Axillary, which
    - 1. Basilic, formed of the
    - 2. Cephalic, forming the
    - 3. Circumflex veins.
    - 4. Inferior scapular.
    - 5. Long thoracic.
    - 6. Superior thoracic.
    - 7. Acromial veins.
  - 2. External Jugular.
    - 1. Internal maxillary, composed of the
    - 2. Superficial Temporal, composed of the
    - 3. Posterior Auricular. The trunk then takes the name of *External Jugular*, and, in its course along the neck, receives—
    - 4. Cervical Cutaneous.
    - 5. Trachelo-scapular, &c.
  - 3. Internal Jugular.
    - 1. Subclavians.
      - 1. Superior Cerebral Veins.
      - 2. Veins of the Corpus Striatum.
      - 3. Veins of the Choroid plexus.
      - 4. Superior Cerebellar Veins.
      - 5. Inferior Cerebellar Veins.
      - 6. Lateral and inferior Cerebral Veins.
    - 2. Common Iliacs.
      - 1. Lachrymal.
      - 2. Central of the retina.
      - 3. Infra-orbital.
      - 4. Ciliary.
      - 5. Ethmoidal.
      - 6. Palpebral, and
      - 7. Nasal, Veins.
    - 3. Internal Jugular.
      - 1. Palpebral, and
      - 2. Superciliary Veins.
      - 3. Dorsals of the nose.
    - 4. Facial Vein, called *angular*, near the eye, receiving the
      - 1. Superior.
      - 2. Inferior.
      - 3. Several Buccal and
      - 4. Masseteric Veins.
      - 5. Raric.
      - 6. Submental, and
      - 7. Inferior Palatine.
    - 5. Lingual and Pharyngeal Veins.
    - 6. Superior thyroid.
    - 7. Occipital, and
    - 8. Veins of the Diploë.
- 2. Right Internal Mammary Vein.
- 3. Inferior Thyroid Vein, opening into the Vena Cava, between the two Subclavians.

4. Vena Azygos, which receives the

2. VEINS WHICH FORM THE INFERIOR VENA CAVA.

- 1. Femoral or Crural, which is a continuation of the—
  - 2. Popliteal, commencing by 3 veins which accompany the fibular arteries, and receiving the—
    - 1. External Saphena, and
    - 2. Internal Saphena, which receives—
      - 1. Several abdominal veins.
      - 2. Circumflex Iliac, and
      - 3. External pudic vein.
  - 3. Vesical Veins, commencing with the
    - 1. Dorsal veins of the penis, in the male.
    - 2. Veins of the clitoris, in the female.
  - 4. Middle Sacral Vein.
  - 5. Lumbar Veins—four in number on each side, commencing by an—
    - 1. Abdominal branch.
    - 2. Dorsal branch.
  - 6. Spermatic Veins, commencing with the
    - 1. Spermatic plexus, in the male.
    - 2. Ovarium, Fallopian tube, &c. in the female.
  - 7. Renal Veins.
  - 8. Capsular and Adipose Veins.
  - 9. Hepatic Veins.
  - 10. Middle, { Hepatic Veins.
  - 11. Left, and {
  - 12. Inferior Diaphragmatic Veins, two in number.
3. VEINS OF THE HEART.
- 1. Great right Coronary.
  - 2. Small right Coronary.
  - 3. Left Coronary Veins.
4. VEINS WHICH FORM THE VENA PORTE.
- 1. Splenic Vein.
    - 1. Veins which correspond to the vasa brevia.
    - 2. Right and left gastro-epiploic.
    - 3. Duodenal, and
    - 4. Pancreatic veins.
    - 5. Coronary Vein of the Stomach, and
    - 6. Small mesenteric vein.
  - 2. Superior Mesenteric Vein.

 VEINSTONE, *Phlebolite*.  
 VELAMENTA BOMBYCINA, *Villous membranes*.  
 VELAMENTUM ABDOMINALE, *Peritonæum*—*v. Corporis commune*, *Integument*.  
 VELAR, *Erysimum*.  
 VELOSYNTHESIS, *Staphyloraphy*.

VELUM, V. pendulum palati—v. Apophysi vermiformi obtentum, Valvula Vieussenii—v. Interjectum cerebelli, Valvula Vieussenii—v. Medullare anticum, Valvula Vieussenii.

VELUM MEDULLA'Æ INFERIUS, (F.) *Voile médullaire inférieur*. A name given, by Reil, to the medullary band or strip, by which the cerebellum communicates with the medulla.

VELUM PALATI, V. pendulum palati—v. Palatinum, V. pendulum palati.

VELUM PENDULUM PALATI, *Velum, Velum Palatinum, Velum Palati, Velum Pendulum, Velum Staphyli'num, Claustrum Palati, Soft Palate, Palatum Mollè, Septum Staphylin, (Ch.,) (F.) Voile du Palais*. A movable, soft, and broad septum, attached to the posterior extremity of the palatine arch, and separating the mouth from the pharynx. Its form is nearly quadrilateral. Its anterior surface corresponds to the mouth; the posterior to the pharynx. Its superior edge is fixed to the palatine arch; the inferior is free, floating, and has an appendix at its middle—the *uvula*. The lateral margins of the velum are held down by two folds, separated from each other by a triangular space; these are called the *pillars*; the anterior passes to the base of the tongue, the posterior to the sides of the pharynx. The velum palati is formed of a mucous coat, which contains numerous follicles, and of a muscular stratum, in which are the peristaphylini interni and p. externi muscles, the glosso-staphylini, the pharyngo-staphylini and the palato-staphylini.

The arteries of the velum palati are furnished by the internal maxillary, the labial and the superior pharyngeal. Its veins open into the internal jugular. Its nerves are sent off from the ganglion of Meckel, and come from the palatine branches. The glosso-pharyngeal nerve, likewise, sends it some filaments.

VELUM STAPHYLINUM, V. pendulum palati—v. Vieussenii, Valvula Vieussenii.

VENA, Vein, Penis—v. Alba renum, Ureter—v. Alba thoracis, Thoracic duct—v. Apoplectica, Jugular vein, internal—v. Arteriosa, Porta vena—v. Capitis, Cephalic vein—v. Cubiti inferior, Basilic vein—v. Falcis cerebri, Sinus longitudinal inferior—v. Lactea, Porta vena—v. Magna, Porta vena—v. Medina Arabum, Dracunculus—v. Ostiaria, Porta vena—v. Pari carens, Azygos, (vena.)—v. ad Portas, Porta vena—v. quæ ad Portas est, Porta vena—v. Ramalis, Porta vena—v. sine pari, Azygos, (vena.)—v. Stelechiæ, Porta vena—v. Subalaris, V. axillaris.

VENÆ APOPLECTICÆ, Jugular veins—v. Concomites, see Vein—v. Galeni, Choroid, (veins.)—v. Lactææ, Chyliferous vessels—v. Lymphaticæ, Lymphatic vessels—v. Micantes, (arteries,) see Artery—v. Pulsatiles, (arteries,) see Artery—v. Satellites, see Vein—v. Soporales, Jugular veins—v. Sphagitides, Jugular veins.

VENEFICIUM, Poisoning.

VENENATUS, Venomous.

VENENUM, Poison, Venom.

VENE'REAL, *Vene'reus, Aphrodisiacus, Venærcan*, from *Venus*, 'the goddess of pleasure.' That which relates to the pleasures of love. In a more restricted sense, the word *Veneréal* is

synonymous with *syphilitic*, and also with *syphilis*. Some authors have proposed that those diseases should be called *veneréal*, which are produced by excess in venery; and that *syphilitic* should be limited to those which are the result of impure connexion.

VENEREAL DISEASE, Syphilis.

VÉNÉRIEN, Veneréal. This term, also, means one labouring under syphilis; as *Hôpital des vénériens*.

VENERY. Same etymon. The pleasures of love. Sexual communication. Coition, (q.v.)

VENIMEUX, Venomous.

VENIN, Venom.

VENOM, *Vene'num, Tox'icum, (F.) Venia*. A poisonous fluid, secreted by certain animals, as the viper, in a state of health, and which they preserve in a particular reservoir, to use as a means of attack or defence. It differs from *virus*, as the latter is always the result of a morbid process, may be produced by the individuals who receive it, in their turn, and be transmitted to others.

VENOM, QUICKENING, Sperm—v. Vital, Sperm.

VEN'OMOUS, *Vene'ntus, (F.) Venimeux*. An epithet applied to animals which have a secretion of venom, as the viper, rattlesnake, &c., and, also, to liquids, in the animal body, which have been so perverted by previous disease, that their contact occasions serious mischief in sound individuals; as happens in hydrophobia.

VENOUS SYSTEM, ABDOMINAL, Porta vena—v. System, see Vascular.

VENT, Wind.

VENTER, Uterus—v. Imus, Abdomen, Hypogastrium—v. Inferius, Abdomen—v. Medius, Thorax—v. Parvus, Hypogastrium—v. Pro-pendens, Hysteroloxia anterior—v. Renum, Pelvis of the kidney—v. Superius, Cavum cranii.

VENTEUX, Windy.

VENTILATION, *Ventilatio*; from *ventus*, 'wind.' The act of renewing the air of vessels, hospitals, and apartments, or of situations where many people are collected together. The utility of such renewal must be evident, when it is considered that atmospheric air loses its oxygen during respiration, and that carbonic acid supplies its place. Stagnant air, also, becomes loaded with numerous impurities; and hence one of the greatest hygienic improvements, of modern times, has been a proper attention to circulation of air. It is, moreover, one of the most valuable additions to our stock of therapeutical agents in many diseases.

Instruments, used for the purpose of renewing the air, in ships, apartments, &c., have been called *ventilators*.

VENTOSITÉ, Flatulence.

VENTOUSES SCARIFIÉES, Cupping with the scarificator.

VENTOUSES SÈCHES, Cupping, dry.

VENTRALE CUTANEUM, (F.) *Tublier*. An elongation of the nymphæ in the Bosjesman female, which hangs down before the vulva like an apron.

VENTRE, Abdomen—v. *Inferieur*, Abdomen—v. *Resserré*, Constipation.

VENTRICLE, *entriculus*; from *venter*, 'belly.' Literally, a little belly. A name given, in anatomy, to various parts.

The VENTRICLES OF THE LARYNX, *Sacculi laryngæi*, *Sinuses of the Larynx*, (F.) *Ventricules* ou *Sinus du larynx*, are two depressions in the larynx, comprised between the superior and inferior ligaments.

The VENTRICLES OF THE BRAIN, *Ventriculi seu Cavitates seu Sinus Cerebri*, (F.) *Ventricules du cerveau*, are five cavities in the interior of that organ, which are distinguished into the *lateral ventricles*, *middle ventricle*, *4th ventricle* or *ventricle of the cerebellum*, and *5th ventricle*.

The *middle ventricle*, or *3d ventricle*, (F.) *Ventricule moyen du cerveau*, is situate in front of the pineal gland. It is bounded, *above*, by the tela choroidea and the fornix; *below*, by a portion of cerebral substance, which separates it from the base of the cranium; *laterally*, by the thalami nervorum opticorum; *anteriorly*, by a medullary cord, called the *anterior commissure*; and, *posteriorly*, by another medullary cord, called the *posterior commissure*. It communicates with the lateral ventricles by two openings, situate behind the anterior pillar or crus of the fornix.

The LATERAL VENTRICLES, *Ventriculi majores*, *V. priores*, *N. superiores*, *V. tricornes*, (F.) *Ventricules latéraux*, are two in number. They are large, and owing to their considerable curvature, occupy a great part of the cerebral centre. They are bounded, *above*, by the inferior surface of the corpus callosum; *anteriorly*, by the curved portion of the same body; *posteriorly*, by a considerable mass of cerebral substance; and, *internally*, they are separated from each other by the septum of the ventricles,—a medullary plate, which is given off from the lower part of the corpus callosum. The lateral ventricles have, in their upper and anterior portion, the *Corpora striata*, *Thalami optici*, and *Tenia semicircularis*:—their inferior portion contains the *corpus fimbriatum*, *cornu Ammonis*, &c.

The FOURTH VENTRICLE, (F.) *Quatrième ventricle*, is situate beneath the *aqueduct of Sylvius*, by which it communicates with the third ventricle. It extends from this aqueduct to the upper part of the medulla; and is seated in the substance of the tuber annulare.

The FIFTH VENTRICLE, (F.) *Cinquième ventricle*, is the small serous cavity between the laminae of the septum lucidum;—called, also, *Fissure* or *Fossa of Sylvius* or *Sinus of the septum lucidum*.

The VENTRICLES OF THE HEART, *Ventriculi Cordis*, (F.) *Ventricules du cœur*, are two in number.

The RIGHT VENTRICLE, *Pulmonary ventricle*, *Ventriculus anterior*, *V. primus*, *V. pulmonalis*, (F.) *Ventricule droit* ou *pulmonaire*, is situate on the fore-part of the heart, the base and apex corresponding to those of the heart. In it are seen the *Columnæ carneæ* and *Cordæ tendineæ*. The right ventricle communicates with the right auricle by the *Ostium venosum*, and from it the *Pulmonary artery* issues. Around the auricular orifice is a tendinous margin or ring, from which the tricuspid valve is given off. The use of the ventricle is to send the blood, by its contraction, along the pulmonary artery to the lungs.

The LEFT VENTRICLE, *Ventriculus aorticus*, *V. posterior*, *V. secundus*, (F.) *Ventricule gauche*

ou *aortique*, is situate at the posterior and left part of the heart. Its parietes are much thicker and stronger than those of the right, owing to its having to send the blood over the whole system. The inner surface has the same general appearance as that of the right. The *Columnæ carneæ* and *Cordæ tendineæ* are, however, much stronger. It communicates with the left auricle by means of the *Mitral valve*; and from it proceeds the largest blood-vessel of the body,—the aorta.

VENTRICLE, PULMONARY, V. right.

VENTRICULE AORTIQUE, Ventricle, left—*v. Cinquième*, Ventricle, fifth—*v. Droit*, Ventricle, right—*v. Gauche*, Ventricle, left—*v. Moyen de Cerveau*, Ventricle, middle, of the brain—*v. Pulmonaire*, Ventricle, right—*v. Quatrième*, Ventricle, fourth.

VENTRICULES DU CERVEAU, Ventricles of the brain—*v. du Cœur*, Ventricles of the heart—*v. Latéraux*, Ventricles, lateral.

VENTRICULI CORDIS, Ventricles of the heart—*v. Duræ matris*, Sinuses of the dura mater—*v. Majores*, Ventricles, lateral—*v. Priores*, Ventricles, lateral—*v. Superiores*, Ventricles, lateral—*v. Tricornes*, Ventricles, lateral.

VENTRICULUS, Stomach, Ventricle—*v. Anterior*, Ventricle, right—*v. Aoticus*, Ventricle, left.

VENTRICULUS CALLOSUS. The gizzard or third stomach of the gallinaceous bird. It consists of a double-bellied or *digastric* muscle; is lined by a firm cuticle, and forms a kind of pouch depending from the alimentary tube, in which the second stomach terminates, and from which the duodenum or *Ventriculus succenturiatus* issues. In the interior of the gizzard, there are numerous pebbles, which seem to be destined to aid in the trituration of the food.

The gizzard is an organ of mastication, and is possessed of great muscular power.

VENTRICULUS POSTERIOR, Ventricle, left—*v. Pulmonalis*, Ventricle, right—*v. Primus*, Ventricle, right—*v. Secundus*, Ventricle, left—*v. Succenturiatus*, Duodenum.

VENTRILOQUE, Engastrimythos.

VENTRILOQUIST, Engastrimythos.

VENTROSITAS, Physconia.

VENTUS, Wind.

VENULA, *Phlebion*. A small vein. Hippocrates seems to use it in the same sense as *Arteria*.

VENUS, Coition, Cuprum—*v. Crystals of*, *Cupri subacetæ*—*v. Crystaux de*, *Cupri subacetæ*.

VER CUCURBITAIRE, *Tœnia solium*—*v. de Guinée*, *Dracunculus*—*v. Luisant*, *Cicindela*—*v. Solitaire*, *Bothriocephalus latus*, *Tœnia solium*.

VERATRIA, Veratrina.

VERATRINA, *Veratrina*, *Veratrine*. A vegetable alkali, found in the seeds of the *Veratrum Sabadilla* and in the *Veratrum album* and *Colchicum autumnale*. It is solid, white pulverulent, and inodorous; of a very acrid taste; decomposable by heat; very soluble in water, and soluble in alcohol. When prepared in the usual manner, it still contains other substances,—*Sabadillin*, *Veratrin*, gum resin of the *Sabadilla*, and a black greasy matter. It is extremely

poisonous, and is but little used internally in medicine. Magendie has given it as an emetic and drastic in very small doses. Of late, it has been recommended to be applied in the way of friction, or endernically, (from gr. v to xx, to  $\frac{5}{j}$  of lard or cerate,) in various neuralgic affections.

**VERATRINE.** See *Colchicum autumnale*.

**VERATRUM ALBUM,** *Helleborus albus*, *Elleborum album*, *Cherbachem*, *White hellbore*, (F.) *Hellébore blanc*. The root of this common European plant is indebted to the *Veratrine* for its properties. It is inodorous; has a bitterish, acid, and nauseous taste, and is violently emetic and purgative, even when applied to an ulcerated surface. It is, also, possessed of erine properties, and acts, externally, as a stimulant. It is rarely exhibited internally. Sometimes it is given as a *sneezing powder*; but it operates with great violence. It forms, also, an itch ointment. See *Ung. Veratri*.

The **VERATRUM SABADILLÆ**, or *Sabadilla*, *Canis Interfector*, *Causiticum Americanum*, *Cezadilla Hispanorum*, *Sczadilla*, *Hor'deum causiticum*, (F.) *Cezadille*. The seeds of this plant have been used, mostly, as anthelmintics. Dose, gr. ij to a child, four years old. It possesses the same general properties as the *veratrum album*.

The **VERATRUM VIRIDE**, *American hellebore*, *Swamp hellebore*, *Indian poke*, *Indian Uncas*, *Poke weed*, *Bear weed*, *Itch weed*, *Tickle weed*, is indigenous in the swampy districts of almost every part of the United States. Its properties are like those of the genus.

**VERBASCULUM**, *Primula veris*.

**VERBASCUM NIGRUM**, *Black Mullein*, *Candela regia*, *Thapsus barbatus*, *Candela'ria*, *Lana'ria*; and the *Verbas'cum Thapsus*, *great broad-leaved mullein*, *High Taper*, *Cow's Lungwort*, or *Yellow Mullein*, (F.) *Molène*, *Bouillon blanc*. *Family*, *Solanææ*. *Sex. Syst.* *Pentandria Monogynia*,—especially the latter,—have been used as emollients, applied externally, in the form of fomentation. The large leaves have been chosen for this purpose. Occasionally, the mucilage, which they contain, has been extracted by decoction or infusion, and administered in pectoral affections.

**VERBASCUM THAPSUS**, *V. nigrum*.

**VERBENA OFFICINÆLIS**, *Verbena*, *Dichromos*, *Verbena'ca*, *Perist'rium*, *Hierobotanè*, *Herba sacra*, *Verrain*, (F.) *Verveine*. *Family*, *Pyrenææ*. *Sex. Syst.* *Diandria Monogynia*. A plant, formerly held sacred; used in sacrifices, and suspended round the neck as an amulet. In the form of cataplasm, it is said to have relieved obstinate headaches, and to have been of service in scrofula. It is not used.

**VERBENACA**, *Verbena officinalis*.

**VERBUS**, *Penis*.

**VERCOQUIN**, *Phrenitis verminos'a*. A kind of phrenitis, attributed to the presence of a worm in the brain!

**VERDET**, *Cupri subacetat.*

**VERDIGRIS**, *Cupri subacetat.*

**VERETRUM**, *Penis*.

**VERGE**, *Penis*—*v. d'Or*, *Solidago virgaurea*.

**VERGETTE DE PHILADELPHIE**, *Erigeron Philadelphicum*.

**VERGETURES**, (F.) from (F.) *verge*, 'a rod.' Linear, reddish impressions, similar to those which would be produced by the strokes of a rod, and which are seen in some diseases.

**VERJUICE**, *Omphacium*, (F.) *Verjus*. A sour kind of grape. Also, an acid liquor prepared from very sour grapes or crab-apples. It is principally used in culinary preparations; although, occasionally, an ingredient in medicinal compounds. See *Vitis Vinifera*.

**VERJUS**, *Verjuice*.

**VERMES**, *Worms*.

**VERMICULAIRE BRULANTE**, *Sedum*.

**VERMICULAR**, *Vermiform*.

**VERMICULARIS**, *Lumbricalis*, *Sedum*.

**VERMICULUM**, *Vermiculatum*. An elixir; a tincture.—*Ruland and Johnson*.

**VERMICULUS CAPILLARIS**, *Dracunculus*.

**VERMIFORM**, *Vermicular*, *Vermicularis*, *Vermiformis*, from *vermiculus*, 'a small worm.' That which resembles a worm.

The **PROCESSUS VERMIFORMES**, *Protuberantia vermiformes*, *Appendices vermiformes*, (F.) *Éminences vermiformes du cervelet*, are two medullary projections, at the surface of the cerebellum.

The *superior vermiform process*, *Vermis superior cerebelli*, is an elongated projection, at the anterior and middle part of the superior surface of the cerebellum;—and the *inferior vermiform process*, *Vermis inferior cerebelli*, is a somewhat large projection, situate in the depression at the inferior surface of the same organ.

The anterior portion of the superior vermiform process is elevated, and termed *Monticulus*.

**VERMIFUGE**, *Anthelmintic*, *Helminthagogue*.

**VERMIFUGUS**, *Anthelmintic*.

**VERMILION**, *Hydrargyri sulphuretum rubrum*.

**VERMILLON DE PROVENCE**, *Antimonii sulphuretum rubrum*.

**VERMINATIO**, *Helminthiasis*.

**VERMINATION**, *CUTANEOUS*, *Malis*.

**VERMINEUX**, *Vermineous*.

**VERMINOUS**, *Verminosus*, (F.) *Vermineux*. That which is caused by worms; as a *verminous affection*.

**VERMIS BOMBYCINUS**, *Cornu ammonis*—*v. Cerebelli*, *Vermiform process*—*v. Cucurbitinus*, *Tania solium*.

**VERMITIO**, *Helminthiasis*.

**VERNIX SICCA**, *Sandarac*.

**VERNONIA ANTHELMINTICA**, *Ascaricida anthelmintica*, *Calagirah*, *Calageri*. A plant, which is indigenous in India. *Family*, *Compositæ*. *Sex. Syst.* *Syngenesia Polygamia superflua*. It has great celebrity in the East Indies, and is a bitter tonic; but the seeds are chiefly used as an anthelmintic, in cases of ascarides and lumbrici in children.

**VÉROLE**, *Syphilis*—*v. Petite*, *Variola*—*v. Petite volante*, *Varicella*.

**VÉROLETTE**, *Varicella*.

**VERONICA**, *Veronica officinalis*, *Veronica mas*, *Thea Germanica*, *Betonica Pauli*, *Chamaedrys*, *Male Veronica*, *Phellin*, *Official Speedwell*, (F.) *Véronique*, *Thé d'Europe*. *Family*,

Rhinanthodæ. *See Syst.* Diandria Monogynia. This plant was once used as a pectoral.

VERONICA AQUATICA, V. beccabunga.

VERONICA BECCABUNGA, *Beccabunga*, *Anagallis aquatica*, *Laver Germanicum*, *Veronica aquatica*, *Cepœa*, *Water Pimpernel*, *Brooklime*, *Brooklime Speedwell*, (F.) *Veronique crissouéc*. This plant was formerly used in a variety of diseases. It is, however, almost insipid and inodorous; and has been long banished from practice.

VERONICA MAS, *Veronica*—v. *Officinalis*, *Veronica*—v. *Purpurea*, *Betonica officinalis*.

VERONIQUE, *Veronica*—v. *Crissouéc*, *Veronica beccabunga*.

VERPA, *Penis*.

VERRE, *Vitrum*—v. *d'Antimoine*, *Antimonii vitrum*.

VERRUCA, *Echyma verruca*, *Phymatosis verrucosa*, a *Wart*, (F.) *Verrucæ*. A small, hard, mammillary tumour, which forms at the surface of the skin, and particularly on that of the hands and face. Warts are generally rugous at the surface, and broad at the base; their roots being implanted in the dermis by whitish filaments, which are dense, sensifibrous, and very numerous.

Warts may be destroyed by caustic, or removed by excision. Their vitality is, generally, not great.

VERRUCA MINOR, *Thymion*—v. *Palpebrarum*, *see Hydatid*.

VERRUCARIA, *Heliotropium Europæum*.

VERRUE, *Verruca*.

VERS, *Worms*.

VERSION, *Turning*.

VERT-DE-GRIS, *Cupri subacetat*.

VERTEBRA DENTATA, *Axis*.

VERTEBRÆ, *Spondyli*, (F.) *Vertèbres*; from *verte*, 'to turn.' This name has been given to the bones, which, by their union, form the vertebral or spinal column. The vertebræ are short, thick, very angular bones; twenty-four in number, and situate one above another. The body of the vertebra is the middle and anterior portion. Above and below, it is articulated, by means of a fibro-cartilage, with the contiguous vertebræ. The *Processes*, *Masses apophysaires*, of each vertebra are:—1. The *spinous process*, situate behind, and in the median line. 2. The two *transverse processes*, standing off from each side. 3. The *four articular processes*—two *superior*, and two *inferior*—which serve to unite the vertebræ with each other. These transverse and articulating processes are made continuous with the lateral and posterior parts of the body of the vertebra by narrow bony portions or pedicles, on each of which are notches. These, by their union with similar notches in the contiguous vertebra, form the lateral foramina, (F.) *Trous de conjugaison*, through which the spinal nerves leave the vertebral canal.

The different processes are united with each other, so as to form a kind of ring of the lateral and posterior parts of the vertebra; and the foramen, within this, i. e. between the body and processes, concurs in forming the vertebral canal.

The vertebræ have particular characters, according to the regions they occupy. They are

divided into seven *cervical*, twelve *dorsal*, and five *lumbar*.

The first cervical is called *atlas*; the second, *axis* or *vertebra dentata*; and the seventh, *vertebra prominens*.

The vertebræ are articulated with each other. Those of the back are joined, moreover, to the ribs. The first or atlas is articulated with the occipital bone; and the last lumbar vertebra with the sacrum.

The cervical vertebræ are developed by nine points of ossification; the dorsal and lumbar by eight.

VERTEBRAL, *Vertebra'lis*. That which relates or belongs to the vertebra.

THE VERTEBRAL COLUMN, *Rachis*, *Rhachis*, *Notos*; the *Spine*; the *back bone*, *Acantha*, *Carina*, *C. hominis*, *Spina dorsi seu vertebralis*, *Columna spinalis*, *C. vertebralis*, *C. dorsi*, *Spina*, *Dorsum*, *Tergum*, *Compages Vertebrarum*, *Acantha*, *Sacra fistula*, *Hiera Syrix*, (F.) *Colonne vertébrale*, *Épine du dos*, *Échine*. A kind of bony column, situate at the posterior and central part of the trunk; extending from the head to the sacrum; flexible in every direction, yet very solid; and hollowed by a canal called *vertebral*, which gives it lightness without diminishing its strength, and runs through its whole length.

The vertebral column is formed by the superposition of the vertebræ. It represents a pyramid, whose base is below. Anteriorly, it is convex in the neck; concave in the back, and convex, again, in the loins. Behind, the curvatures, are of course the reverse of these. There is also, in the dorsal region, a lateral curvature, the convexity of which is towards the left side.

Considered as a whole, the vertebral column has an *anterior* or *prespinal* surface; a *posterior* or *spinal*; two *lateral*; a *base*, and an *apex* or *top*. In the nomenclature of Chaussier, the anterior surface, in the neck, is called *trachealian*; in the back, *predorsal*; and, in the loins, *prelumbar*. The dorsal surface has, at its middle, the spinous processes; and, at its sides, the *vertebral gutters*, (F.) *Gouttières vertébrales*, formed by the succession of the vertebral plates, (F.) *Lames vertébrales*, which, by their junction, constitute the spinous processes. These are filled by the sacro-spinalis muscle. The sides or lateral surfaces present the foramina, resulting from the union of the vertebral notches, (F.) *Échancures vertébrales*. These are called *vertebral foramina*, (F.) *Trous de conjugaison*, and give passage to the vertebral nerves. The base of the vertebral column is oblique, to unite with the sacrum; and forms with it an angle, called *sacro-vertebral angle* or *promontory*. The apex or top of the vertebral column is articulated with the occipital bone. Sometimes, the term *vertebral column* includes the whole of the column from the occipital bone to the extremity of the coccyx.

THE VERTEBRAL OR SPINAL CANAL, *Rachid'ian Canal*, exists through the whole of the vertebral column, whose curvatures it follows. It is continuous, above, with the cranium; below, with the sacral canal, if we consider the vertebræ to terminate at the sacrum. It is lined by a prolongation of the meninges, forming the

*Theca vertebralis*, and lodges the spinal marrow.

The vertebral column, which unites lightness with solidity, serves to support the head and chest. It is the seat of all the movements of the trunk, the weight of which it transmits to the pelvis. It lodges and protects the spinal marrow, and gives passage to the vertebral nerves, and to numerous vessels.

The VERTEBRAL LIGAMENTS, (F.) *Ligamens vertébraux*, *Surtouts ligamenteux de la colonne vertébrale*, are distinguished into *anterior* and *posterior*. They consist of long, ligamentous coverings; the *anterior* occupying the anterior part of the vertebral column; and the *posterior* seeming to arise from the occipito-axoid ligament, and existing, behind the bodies of the vertebrae, from the axis to the sacrum.

The VERTEBRAL ARTERY, *Posterior cerebral artery* (Ch.) is the largest of the branches of the subclavian. It arises from the posterior part of that vessel; is lodged in a canal, (F.) *Petit canal vertébral*, formed by the foramina in the transverse processes; enters the cranium, and proceeds to anastomose with its fellow of the opposite side, and to form the *Basiliary artery*, (q. v.) Besides the branches sent to the neck, the vertebral artery gives off—the *anterior* and *posterior spinal arteries*, and the *inferior cerebellous*, in the cavity of the cranium.

The VERTEBRAL OR SPINAL NERVES spring successively from the spinal marrow; from its origin to its termination. These nerves—30 pairs in all—arise by two roots; one *anterior*, and the other *posterior*, and afterwards issue by the vertebral and sacral foramina. Each of these roots seems to have a distinct function; the *posterior* being destined to convey sensation to parts; the *anterior*, motion. On the posterior root, before its junction with the anterior, there is a ganglion.

Of the 30 pairs, 7 are *cervical nerves*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*. See Nerves.

VERTEBRAL DISEASE, *Rachial'gia* (of some,) *Caries of the Vertebrae*, *Spondylarthroacæ*, *Spondyloc'acæ*. The spinal column is liable to distortion, (see Hump) at times, without the vertebrae being much, if at all, diseased. At other times, a more formidable affection is induced; the vertebrae becoming carious, and the intervertebral cartilages ulcerated; followed by a more or less complete loss of power over the lower extremities. In such case, on examining the spine, one or more of the spinous processes is found to project beyond the rest. The disease was first well described by Mr. Percival Pott; and, hence, it has been called, by the French, *Maladie de Pott*. It usually occurs in scrofulous subjects, and the treatment consists in establishing a counter-irritation by blisters, issues, or the moxa, opposite the transverse processes of the diseased vertebra. The sore must be suffered to remain open, and the patient kept in the horizontal posture until the use of the limbs is recovered; employing tonics—the free admission of fresh air, &c. at the same time.

VERTEBRAL NERVE, Trisplanchnic.

VERTÈBRES, Vertebrae.

VERTEBRO-ILIAC LIGAMENT, Ileo-lumbar L.

VERTEX, *Cor'ophæ*. The top or highest part of the head. See Sinciput.

VERTEX CUBITI, Olecranon—v. Palpitans, Fontanella.

VERTIGE, Vertigo.

VERTIGO, from *Ver'tere*, 'to turn;' *Dinos*, *Hin'gos*, *Giddiness*, *Dizziness*, *Dinos vertigo*, *Hallucinatio vertigo*, *Autal'gia vertigo*, *Swimming of the head*, (F) *Vertige*, *Étourdissement*. A state in which it seems that all objects are turning round; or that the individual himself is performing a movement of gyration. Two varieties have been designated;—*simple vertigo*, where the objects are seen; and *scotodynia*, in which the sight is obscured, and the individual often falls. Vertigo is dependent upon the condition of the brain; and often announces an attack of apoplexy or epilepsy.

VERTIGO TENEBRICOZA, Scotodynia.

VERUMONTANUM, Caput gallinaginis, Gallinaginis caput.

VERVAIN, Verberna officinalis.

VERVEINE, Verberna officinalis.

VESANIA, *Ves'nia*. Derangement of the intellectual and moral faculties, without coma or fever. Many nosologists have used this as a generic term; under which they have included the different species of mental alienation, hypochondriasis, somnambulism, and even hydrophobia. See Nosology.

VESANIA MANIA, Mania.

VESANIE, Insanity.

VESICA BILIARIA, Gall-bladder—v. Fellea, Gall-bladder—v. Intestinalis, Vesicula umbilicalis—v. Urinaria, Urinary bladder.

VESICÆ IRRITABILITAS, Cysterethismus.

VESICAL, *Vesic'dlis*. That which belongs or relates to the bladder.

The VESICAL ARTERIES vary in number and origin. The umbilical artery always sends off two or three; the middle hemorhoidal, internal pudic, and obturator furnish others, which ramify and anastomose in the parietes of the bladder; the hypogastric furnishes one which is somewhat larger, the *Vesico-prostatic*, (Ch.) and proceeds to the *bas fond* of the bladder, sending numerous ramifications to it as well as to the surrounding parts.

The VESICAL VEINS, much more numerous than the arteries, open into the hypogastric plexus.

VESICANT, Blister.

VESICATOIRE, Blister.

VESICATORIUM, Blister.

VESICLE, ALLANTOID, Allantois—v. Germinal, see Molecule—v. Purkinjean, see Molecule.

VESICLES OF DE GRAAF, Folliculi Graafiani. VESICO-VAG'INAL, *Ves'co-vagina'lis*. Relating to the bladder and the vagina; as *vesico-vaginal fistula*.

VESIC'ULA, *Cystinx*, a diminutive of *vesica*, 'a bladder.' A small bladder.

VESICULA ÆNIGMATOSA, V. umbilicalis—v. Alba, V. umbilicalis—v. Bilis, Gall-bladder—v. Chyli, Receptaculum chyli—v. Erythroidea, Erythroid vesicle—v. Fellis, Gall bladder—v. Omphalo-mesenterica, V. umbilicalis—v. Ovarialis, V. umbilicalis.

The VESICULÆ SEMINA'LES, V. *Semina'ria*

seu *spermat'ica*, *Cap'sulæ semin'al'es*, *Conceptacula semin'aria*, (F.) *Vésicules séminales*, *Gardouches*, *Greniers*, are two small membranous sacs, which serve as reservoirs for the sperm, and probably secrete a fluid to be mixed with the sperm. They are situate beneath the bladder, and above the rectum, behind the prostate and to the outer side of the vasa deferentia. They are of an irregular conoidal shape; flattened from above to below; embossed on their surface, and of a grayish tint. Their *posterior extremity*, or *fundus*, terminates by a round cul-de-sac. Their *anterior extremity* or *neck* is narrow and elongated, and is continuous with the excretory duct of the vesicula. This duct joins the vas deferens, and forms with it the ejaculatory duct. The interior of the vesiculæ exhibits several cells, which communicate with each other, and are lined by a very thin, mucous membrane.

*VESICULA UMBILICALIS*, *Umbilical Vesicle*, *Vesicula alba* seu *om'phalo-mesenter'ica* seu *æni-gmato'sa* seu *ova'lis*, *Vesi'ca intestinal'is*, *Intestinal Vesicle*, *Vitelline Pouch*. A small, pyriform, round, or spheroidal sac, which, about the fifteenth or twentieth day after fecundation, is of the size of a common pea, and probably acquires its greatest dimensions in the course of the third or fourth week. After the seventh week, it becomes shrivelled and disappears insensibly. It seems to be situate between the chorion and amnion, and is commonly adherent either to the outer surface of the amnion, or to the inner surface of the chorion, but at times is loose between them.

The *vitelline pedicle*, which attaches the vesicle to the embryo, is continuous with the intestinal canal; and, up to twenty or thirty days of embryonic life, is hollow. Its arteries are the omphalo-mesenteric, (q. v.)

The *vitelline fluid*, contained in the vesicle, has been compared, from analogy, to the *vitellus* or yolk of birds; and, like it, is an oleaginous substance, and presumed to be inservient to the nutrition of the embryo.

In Pathology, *Vesic'ula*, *Ves'icle*, *Echphyl'is*, *Cystinæ*, means a small orbicular elevation of the cuticle, containing lymph, which is sometimes clear and colourless, but often opaque and whitish or pearl-coloured. It is succeeded, either by a scurf, or by a laminated scab.

*VESICULÆ* constitute the 6th order of Bateman's classification of *Cutaneous Diseases*.

*VESICULÆ*, see Villous membranes—v. *Divæ Barbaræ*, *Variola confluens*—v. *Gingivarum*, *Aphthæ*—v. *Pulmonales*, see *Cellulæ*—v. *Rotundæ cervicis uteri*, *Nabothi glandulæ*—v. *Sanguinis*, *Globules of the blood*—v. *Seminales mulierum*, *Nabothi glandulæ*—v. *Spermaticæ*, *V. seminales*.

*VESICULE BILIALE*, Gall-bladder.

*VESICULE DU FIEL*, Gall-bladder.

*VESICULES DE SAINTE BARBE*, *Variola confluens*—v. *Seminales*, *Vesiculæ seminales*.

*VESPA*, Wasp.

*VESSEL*, *Vas*, *Angel'on*, *Angos*, (F.) *Vaisseau*. A canal, more or less elastic, formed by the superposition of several membranes, and distinguished, according to its uses and general arrangement, into *Artery*, *Vein*, and *Lymphatic*, (q. v.) See, also, *Vascular*.

*VESSELOUP*, *Lycoperdon*.

*VESSIE*, Urinary bladder—v. à *Colones*, see Urinary bladder—v. *Col de la*, *Collum vesicæ*.

*VES'TIBULE*, *Vestibulum*, (F.) *Vestibule*. A cavity of an irregular shape, which forms part of the labyrinth or internal ear. The vestibule is situate on the inner side of the tympanum; on the outer side of the meatus auditorius internus; before the semicircular canals, and behind the cochlea. It is lined by a particular membrane, and contains the liquor of Cotunnus and branches of the auditory nerve. There is also another membrane, constituting the *membranous vestibule*, but it is not an exact imitation of the ossous cavity. It is composed of two distinct sacs, which open into each other—the *sacculus vestibuli*, and the *sacculus* (q. v.) There are three contiguous cavities in the vestibule, one of which, the *semi-oval*, is situate above; another, the *hemispherical*, below; and the third, or *sulciform*, which is the orifice of the aqueductus vestibuli, behind.

*VES'TIBULUM* is, also, a smooth cavity between the perinæum and nymphæ in the female, which leads to two passages—to the urethra above, and to the vagina below.

*VESTIGE*, (F.) *Vestigium*, 'a vestige,' 'a trace.' A kind of fracture of flat bones, consisting of a simple incision having the mark of the instrument that caused it.

The term is, also, applied to a part of the body, which may have no evident use in man, and yet may be greatly employed in animals. For example, the muscles of the external ear in man are almost devoid of use, or are *vestiges* of what they are in certain animals.

*VESTIGIUM FORAMINIS OVALIS*, *Ovalis fossa*.

*VESTITUS*, *Esthe'ma*, *Esthe'sis*, *Clothing*, *Res vestia'ria*, *Dress*, *Vesture*, (F.) *Vêtement*. Any substance used for the purpose of covering our nakedness, or preserving us from atmospheric temperature, by being worn on the body. The best clothing in winter is composed of articles that are bad conductors of caloric, and do not admit of ready evaporation of the matter of perspiration. In this respect, woollen vestments deserve the first place, and cotton the second. Colour has likewise to be regarded—the darkest hues transmitting the heat most readily through them. It has been found that the same rule applies to odours—the darker colours retaining a greater amount of odorous particles than the lighter. Hence, the necessity of white walls, white bed-clothes, &c., in the wards of hospitals, for it is probable the like law applies to contagious miasms.

*VESTURE*, *Vestitus*.

*VETA*, Puna.

*VÊTEMENT*, *Vestitus*.

*VETERANA*, *Rubeola*.

*VETERNUS*, *Coma vigil*.

*VETONICA CORDI*, *Betonica officinalis*.

*VEXILLUM*, *Drapeau*.

*VIA*, *Way*—v. *Stomachi et ventris*, *Œsophagus*.

*VIABILITY*. See *Viable*.

*VIABLE*, *Viabilis*, from *via*, 'way,' or from *vie* (F.) 'life,' (Orfila.) A word, which may be introduced, with great advantage, from the

French into our language. It is an epithet, applied to a fœtus, whose organs are properly formed, and so developed as to permit its continued existence. Every fœtus is not *viable*. Anencephali have lived ten or twelve days, yet they are not viable;—a part or the whole of the brain being wanting. The older the fœtus, the more viable is it. It is an idle prejudice that a child, born at the end of eight months, is less likely to live than one born at the end of seven. The signs of *viability* are drawn from the weight, length, external conformation, &c. of the fœtus. It may be laid down as a general rule that no fœtus, born before the end of the seventh month, is viable.

VIAL, Phiala.

VIE LACHRYMALES, Lachrymal passages—*v. Primæ*, Ways, digestive—*v. Secundæ*, Ways, second.

VIBICES, *Molops*. Large purple spots, like the marks produced by the strokes of a whip, which appear under the skin in certain malignant fevers. They are unfavourable indications, as they denote great prostration.

VIBRANS, Vibratory.

VIBRATILE, Vibratory.

VIBRATORY, *Vibratoire*, *Vibrans*, (F.) *Vibratile*, from *vibrare*, 'to quiver.' An epithet applied to the pain that accompanies some neuralgic; and which seems to the patient to vibrate along the nerves.

VIBRATORY MOTION, see Cilia.

VIBRIS'SÆ. The hairs which grow at the entrance of the nostrils.

VIC-LE-COMPTE, MINERAL WATERS OF. Vic-Le-Compte is a small village in the department of Puy-de-Dôme, three leagues from Issoire; where there is an acidulous chalybeate, which is aperient.

VICHY, MINERAL WATERS OF. Carbonated chalybeates, the sources of which are at Vichy, six leagues from Moulins, in the department of Allier. The springs are seven in number. Almost all are thermal; give off bubbles of carbonic acid gas, and have a slightly sulphureous odour. They deposit carbonates of lime and magnesia, and a little oxide of iron; and afford, on analysis, carbonates of lime, soda, iron, and magnesia, carbonic acid, sulphate and muriate of soda. They are employed as tonics, particularly in chronic affections of the abdominal viscera, in old catarrhs, diseases of the joints, &c.

The FACTITIOUS VICHY WATER, *Aqua Vicien-sis*, (F.) *Eau de Vichy*, is made of simple *acidulous water*, impregnated with twice its bulk of *carbonic acid*,  $\bar{z}$ xxxss; *subcarbonate of soda*, gr. xxxij; *sulphate of soda*, gr. xvj; *muriate of soda*, gr. iv; *subcarbonate of magnesia*, gr. ss; *muriate of iron*, gr.  $\frac{1}{2}$ . Mix. *Ph. P.*

VIC'IA FABÆ. The *Common Garden Bean*, (F.) *Fève* ou *fève des marais*. Family, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of Egypt, of which there are many varieties. Beans are not easy of digestion. They are proverbially flatulent, especially when old. When young, they are more digestible and wholesome. Bean meal was one of the four resolvent meals of the ancients.

VICINI TRACTUS, Erysipelas.

VICINITRAHA, Erysipelas.

VICTORIALIS FEMINEA, *Gladiolus vulgaris*—*v. Longa*, *Allium victoriale*—*v. Rotunda*, *Gladiolus vulgaris*.

VICTŪS RATIO, Diet.

VIDANGES, Lochia.

VIDIAN CANAL, Pterygoid C.

VIE, Life.

VIELLIESSE, Senectus.

VIF ARGENT, Hydrargyrum.

VIGILANCE, Insomnia.

VIGILIA, Egregorsis.

VIGILLE NIMÆ, Coma vigi.

VIGNE, *Vitis vinifera*—*v. Blanche*, *Bryonia alba*—*v. du Nord*, *Humulus lupulus*—*v. Vierge*, *Bryonia alba*.

VIGOR, Acme.

VILLI See Villous membranes.

VILLOUS, *Villo'sus*, from *villus*, 'a hair.'

VILLOUS MEMBRANES or COATS, *Velamenta Bombyc'ina*, (F.) *Membranes villosæ*, *Membranes veloutés*, are such as are covered with soft papillæ or Villi, *Flocçi*, *Floc'culi*, *Vesiculæ*, *Cylindri*, *Tubi Membrana'eci*,—constituted of blood-vessels, nerves, and absorbents; or such as are covered with fine down, so as to cause them to feel soft and velvety. The term is, however, chiefly restricted to the former. Chaussier gives the name *simple villous membranes* to the serous membranes; and that of *complicated or follicular villous membranes* to the mucous membranes.

These villi are endowed with *ciliary motions*, (q. v.)

VIN, Wine—*v. de Bordeaux*. Claret—*v. de Quinquina composé*, Vinum de kinâ kinâ compositum—*v. Sec*, Sack.

VINAIGRE, Acetum, see Aceticum acidum—*v. Scillitiquæ*, Acetum scillæ.

VINAIGRE DE BOIS, Pyrolygneous acid.

VINAIGRES MEDICINAUX, Acetica.

VINCA MINOR, *Vinca peruv'ica*, *Clematis daphnol'des major*, *Lesser periwinkle*, (F.) *Pervache*, *Violette des Sorciers*. It has bitter and astringent properties, and has been used in gargles, and diseases of the chest.

VINCULA, Fascia.

VINCULUM, Bandage, Lien.

VINE, *Vitis vinifera*—*v. Grapæ*, *Vitis vinifera*—*v. Poison*, *Rhus radicans*.

VINEGAR, AROMATIC SPIRIT OF, see Aceticum acidum—*v. Common*, Acetum—*v. Distilled*, see Aceticum acidum—*v. Marseilles*, Acetum aromaticum—*v. of Meadow saffron*, Acetum colechici—*v. Radical*, Aceticum acidum—*v. of Squills*, Acetum scillæ—*v. of the four Thieves*, Acetum aromaticum—*v. Thieves*, Acetum aromaticum—*v. of Wood*, see Aceticum acidum.

VINETTIER, *Oxycantha Galeni*.

VINUM, Wine.

VINUM MEDICIN'ALE. A *Medicated Wine*. Wine, holding in solution one or more medicines. Medicinal wines are obtained by macerating or digesting medicinal substances in wine. They differ, of course, according to the nature of the medicine employed, the strength of the wine, &c.

In a late Pharmacopœia of the London College, all the wines were changed into weak tinctures; but the old names were left unaltered. Sherry is the wine usually employed

VINUM ALBUM HISPANICUM, see Wine—v. Album Montanum, see Wine.

VINUM ALOES, *V. aloës socotori'na*, *Vinum aloëticum*, *V. aro'mo-aloëticum*, *Wine of Aloes*, *Tinctura hiera*, *Tinctura sacra*. (*Aloës spicat. extract.* ℥viiij, *canella corticis* ℥ij, *vini lbvj*, *sp. tenuioris lbij*. Macerate for 14 days, and strain. *Ph. L.*) Purgative and stomachic, according to the dose. Dose, ℥j to ℥ij.

VINUM ABSINTHITES, *Wine of Wormwood*. (*Fol. absinth. exsicc.*, *absinth. Pontic.*, āā ℥vj, *vini albi lbvj*. Macerate for 24 hours, and strain. *Ph. P.*) Stimulant, tonic, febrifuge, vermifuge, &c.

VINUM AMARUM, *V. Gentianæ comp.*—v. *Amarum scilliticum*, &c. *V. diureticum amarum*—v. *Amarum cum spiritû vini*, *V. gentianæ compositum*.

VINUM ANTIMONII TARTARIZATI, *V. tartritis antimonii*, *Solution of tartarized antimony*, *Essentia antimonii seu stil'ii*, *Antimonial wine*, *Vinum benedictum*, *Vinum antimoniale Huxhami*, *V. antimonialē*, *Aqua benedicta Rulandii*, *Vinum emeticum*. (*Ant. tart.* ℥j, *aq. destillat. ferv.* ℥viiij, *sp. rectific.* ℥ij. Dissolve the tartarized antimony in the water, and add the spirit.)

The ordinary *Antimonial wine* is made with glass of antimony ℥j, sherry lbiss.

WARD'S RED DROP consists of a strong vinous solution of tartarized antimony.

VINUM ANTISCORBU'TICUM, *Antiscorbutic wine*, (*Rad. armoracia recent.* ℥j, *fol. cochlearia recent.*, *nasturtii aquat.*, *trifol. aquatic.*, *semin. sinap.*, āā ℥ss, *ammonia muriat.* ℥j, *vini albi lbij*. Macerate for 36 hours; filter, and add tincture cochlear. ℥ss. *Ph. P.*) Stimulant and tonic. Dose, ℥ss to ℥ij.

VINUM AROMAT'ICUM, *Aromatic wine*. (*Species aromatic.* ℥iv, *vini rubri lbij*. Macerate for 6 days, and filter. *Ph. P.*) Stimulant, and tonic. Used, externally, in fomentations, embrocations, &c.

VINUM AROM-ALOETICUM, *V. Aloes*—v. *Antimoniatum Huxhami*, *V. antimonii tartarizati*—v. *Benedictum*, *V. antimonii tartarizati*—v. *Canarinum*, see Wine—v. *Chalybeatum*, *V. ferri*—v. *Cinchonæ compositum*, *V. de kinâ kinâ comp.*

VINUM COL'CHICI, *Wine of Colchicum*, *Tinctura colchici*, *Went's Eau d'Husson*. (*Colchic. rad. recent.* lbj, *sp. tenuior*, ℥iv, *aquâ destillat.* ℥viii. *Ph. L.*) Diuretic, sedative, and purgative. Chiefly used in gout. Dose, grt. 40 to ℥j.

Reynolds's Specific for gout and rheumatism consisted of the fresh bulb of *Colchicum* ℥viiij, *Sherry wine* ℥xvj. The colchicum was macerated for eight or ten days in the wine, at a gentle heat; coloured with syrup of poppies and flavoured with rum. Reynolds is said to have killed himself by taking an over dose of it.

VINUM DIURET'ICUM AMARUM, *Vinum amarum scilliticum compositum in Charit'itis Nosocomio usurpatum*, *Bitter diuretic wine*. (*Cort. cinchon.*, *winteran.*, *linon.*, āā ℥ij, *rhus toxicodendr.*, *scilla*, *cacumina angelice*, āā ℥ss, *fol. absinth.*, *melissa*, āā ℥j, *buccar. junip.*, *maccis*, āā ℥ss, *vini alb.* lbviiij. Macerate and filter. *Ph. P.*) Stimulant, tonic, and diuretic. Dose, ℥ss to ℥jss.

VINUM EMETICUM, *V. antimonii tartarizati*.

VINUM FERRATUM, *V. ferri*.

VINUM FERRI, *V. chalybeatum*, *Steel wine*, *Wine of iron*, *Vinum ferriatum*, *V. martiatum*, *V. Martis*, *Tinctura Martis vino'sa*, *Tinctura Martis cum vino*. (*Iron* ℥j, *supertartrate of potass*, in powder, ℥vj, *distilled water lbij* or q. s. *proof spirit* ℥xx. Rub the iron and supertartrate of potass together, and expose them to the air in a flat vessel, moistened with a fluid ounce of water for a fortnight; agitating every day with a spatula, and sprinkling them with water, to keep them moist. Then dry with a gentle heat, and mix with ℥xxx of distilled water. Filter the fluid and add the spirit. *Ph. L.*) Tonic. Dose, ℥j to ℥iv.

It is sometimes made by adding two pints of wine to two ounces of iron filings:—macerating and filtering.

VINUM GENTIANÆ COMPOSITUM, *V. amarum*, *Compound wine of Gentian*, *Infusum amarum vino'sum*, *Vinum amarum cum spiritû vini*, *Wine bitters*. (*Rad. gentian lutea* ℥ss, *cort. cinchon. offic.* ℥j, *cort. aurant.* ℥j, *canella alb.* ℥j, *alcohol dilut.* ℥iv, *vini alb. Hispanic.* lbjss. *Ph. E.*) Dose, ℥j to ℥vj.

VINUM HYPPOCRATICUM, *Claret*—v. *Hordeaceum*, *Cerevisia*.

VINUM IPECACUANHÆ, *Ipecacuanha wine*. (*Rad. ipecacuan.* cont. ℥ij, *vini lbij*. *Ph. L.*) Emetic, and diaphoretic. Dose, as an emetic, ℥iv to ℥x.

VINUM DE KINA KINA COMPOSITUM, *V. cincho'næ compositum*, *Compound bark wine*, (*F.*) *Vin de quinquina composé*. (*Cort. cinchon.* pulv. lbss, *quassia*, *cort. winteran.*, *cort. aurant. sicc.*, āā ℥ss, *alcohol* (120° to 220° Beaumé) lbj. Macerate for 24 hours; and add *vini albi lbvj*. Macerate for four days, and filter, *Ph. P.*) Tonic, febrifuge, and stomachic. Dose, ℥ss to ℥ij.

VINUM MARTIATUM, *V. ferri*—v. *Martis*, *V. ferri*—v. *Nicotianæ tabaci*, *V. tabaci*—v. *Opiatum fermentatione paratum*, *Laudanum abbatii Rousseau*.

VINUM OPII, *Wine of Opium*, *Vinum de opio compositum*, *Laudanum liquidum Sydenhami*, *Laudanum liquidum Hoffman'ni*, *Tinctura Thebaica*, &c., *Ford's laudanum*. (*Ext. opii* ℥j, *cort. cinnam. cont.*, *caryoph.* cont. sing. ℥j, *vini lbj*. *Ph. L.*) Narcotic. Dose, grt. xv to ℥j.

VINUM DE OPIO COMPOSITUM, *V. opii*—v. *Picatum*, *Pissites*.

VINUM QUINI'NÆ, *Wine of Quinine*. (*Wine lbij*, *sulphate of quinine gr. x. Mix*) Dose, ℥iss or more; according as it is used for a stomachic, or to arrest ague. A *Vinum Cinchoninæ* may be made in the same way.

VINUM RHEI PALMATI, *Rhubarb Wine*, *Tinctura Rhubarbari Vino'sa*, *Vinum Rhubarbari*, *Elixir Rhei dulcē*, *E. R. Compositum*. (*Rad. rhei concis.* ℥ij, *cort. canella cont.* ℥j, *alcohol dilut.* ℥ij, *vini alb. Hispan.* ℥xv. *Ph. E.*) Laxative and stimulant. Dose, ℥iv to ℥jss.

VINUM RHENANUM, see Wine—v. *Rhabarbari*, *V. rhei palmati*—v. *Rubrum Portugallicum*, see Wine.

VINUM TABACI, *Vinum Nicotianæ Tabaci*, *Tobacco Wine*. (*Folior. nicotian. tabac.* ℥j, *vini alb. Hispanic.* lbj. *Ph. E.*) Narcotic, diuretic, and antispasmodic. In dropical cases, colica

pictonum, and ileus. Not used. Dose, gr. xx to xxxv].

VINUM VERA'TRI, *Wine of White Hel'lebor.* (*Rad. veratr. concis.* ℥viii, *sp. ten.* lbj. *aqua destillat.* Biss. Macerate for 14 days. *Ph. L.*) In cutaneous affections, and in gout. Dose, ℥ss to ℥ij.

VIOL, Stuprum.

VIOLA, *Viola adora'ta*, *Ion*, *Matrona'lis*, *Violaria*, the *Sweet Violet*, (*F.*) *Violette à bouquets*, *V. odorante*. The flowers of the sweet violet have a pleasant, peculiar odour, and scarcely any taste. They are slightly laxative.

VIOLA CANINA. The *Dog Violet*. The root of this plant is emetic and cathartic. Dose, ℥j.

VIOLA IPECACUANHA, see *Ipecacuanha*—*v. Lutea*, *Cheiranthus cheiri*—*v. Odorata*, *Viola*—*v. Palustris*, *Pinguicola vulgaris*.

VIOLA TRICOLOR, *Heart's ease*, *Pansies*, *Jal'cea*, *Herba Trinita'tis*, (*F.*) *Pensée*, *P. saurage*. The decoction of this beautiful little plant has been recommended in diseases of the skin, &c. Its roots are, also, emetic and cathartic.

VIOLARIA, *Viola*.

VIOLET, DOG, *Viola canina*—*v. Sweet*, *Viola*.

VIOLETTE À BOUQUETS, *Viola*—*v. Odorante*, *Viola*—*v. des Sorciers*, *Vinea minor*.

VIOLETT JAUNE, *Cheiranthus cheiri*.

VIORNA, *Clematis vitalba*.

VIPER, EGYPTIAN, *Aspis*.

VIPER'S GRASS, *Scorzonera*.

VIPERA, *Coluber berus*.

VIPERARIA, *Aristolochia serpentaria*, *Scorzonera*.

VIPERINA VIRGINIANA, *Aristolochia serpentaria*.

VIRGA, *Penis*—*v. Cereæ*, *Bougie*.

VIRGINIA, MINERAL WATERS OF. There are several celebrated mineral springs in Virginia, on the Western side of the Blue Ridge. Two *Thermal* springs exist in Bath county. The *Warm Spring*, as it is called, issues with a bold stream, sufficient to turn a mill, and to keep the water of its basin at the temperature of 97°. The *Hot Spring* is a few miles from the Warm. Its temperature is 107°. They are both slightly sulphureous.

The *Sweet Springs* are at the Eastern foot of the Alleghany, in Botetourt county; and 42 miles from the Warm Springs. The water has a temperature of 70° and is highly impregnated with carbonic acid. The *White Sulphur*, as well as the *Red Sulphur*, and *Salt Sulphur Springs*, are also much celebrated. The Red Spring is affirmed to exert a sedative influence on the pulse, diminishing the number of its beats. About 15 miles from Staunton is *Stribling's Springs*—a sulphuretted water; and near Warrenton, in Fauquier county, there is a sulphureous water, called *Lee's Springs*, which is much frequented.

VIRGIN'S BOWER, COMMON, *Clematis vitalba*—*v. Bower*, upright, *Clematis recta*.

VIRGIN'S MILK, *Lac Vir'ginis*, *Lac Virginal'le*. (*F.*) *Lait virginal*. A tincture of Benjamin or of any other balsam, precipitated by the addition of water, which gives it a milky appearance. Also, subacetate of lead precipitated by

water. It has been used as a cosmetic to remove freckles, &c.

VIRGO, *Girl*—*v. Aurea*, *Solidago virgaurea*.

VIRIDE ÆRIS, *Cupri subacetas*.

VIRILE, *Penis*.

VIRILITY, *Adult age*.

VIROSUS, *Virulent*.

VIRTUE, *Faculty*.

VIRULENT, *Virulentus*, *Viro'sus*. That which is of the nature of a virus or which is caused by a virus.

VIRUS. A Latin word, which signifies poison; but which, in medicine, has a somewhat different acceptation.

By it is understood—a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *vaccinolic*, *vaccine*, and *sypilitic virus*. *Virus* differs from *venom*, in the latter being a secretion natural to certain animals, whilst the former is always the result of a morbid process;—a *morbid poison*.

VIRUS, *Ichor*, *Poison*, *Sanies*—*v. Vaccine*, see *Vaccina*—*v. Vitale*, *Sperm*.

VIS, *Force*—*v. Adhæsiōnis*, *Cohesion* (*force of*)—*v. Attractionis*, *Cohesion* (*force of*)—*v. Cohæsiōnis*, *Cohesion* (*force of*)—*v. Conservatrix*, *V. mediatrix nature*—*v. Elastica*, *Elasticity*—*v. Insita*, *Irritability*—*v. Irritabilitatis*, *Irritability*.

VIS MEDICATRIX NATURÆ, *Vis conservatrix*, *Autocrati'a*, (*q. v.*) *Autonom'ia*, *Autocrat'oria* *Physi'al'ricæ*, *Physi'ocrat'ia*. A term, employed, by some, to express that instinctive, healing power in an animal or vegetable, by virtue of which it can repair injuries inflicted upon it, or remove disease.

VIS MORTUA. Under this name, Haller included the mechanical properties of membrane,—flexibility, extensibility, elasticity, &c., which are totally independent of the vital properties. They remain some time after the complete extinction of life in all its functions; seem to be connected with the mechanical arrangement of particles and the chymical composition of the substance in which they reside, and not to be affected until the progress of decomposition has become sensible.

VIS PLASTICA, *Plastic force*—*v. Reproductiva*, *Plastic force*—*v. Vitæ*, *Irritability*—*v. Vitalis*, *Irritability*.

VISCERA, *Entrails*.

VISCERAL, *Splanchnic*.

VISCERES, *Entrails*.

VISCONIA, *Physœonia*.

VISCUM ALBUM, *Misc'letœe*, *Icos*, *U'ia*, *Dabach*, (*F.*) *Gui*. A parasitic plant, which grows on a number of trees. *Family*, *Caprifoliacæ*. *Sex. Syst.* *Dicœia Tetrandria*. That of the oak—*Viscum quercinum*—has been most celebrated, but it does not differ from the others. It was, at one time, much used in epilepsy and other neuroses;—the wood or leaves being given in powder, in the dose of ℥ss or ℥j. The berries, also, called *Pommes hemorrhoidales*, from their supposed virtues, are drastic; and, when applied externally, maturative.

VISIO, *Pupil*.

VISION, *Vis'io*, *Visus*, *Opsis*, (*F.*) *Vue*. The action of seeing. The *sight*. The sight is one

of the five senses; and the eye is its organ. By it we distinguish colours and appreciate most of the physical qualities of external objects. The eye is composed of different transparent media, whose curvatures and refractive powers are so combined as to render insensible the aberrations of sphericity and refrangibility, and to concentrate the luminous rays proceeding from more or less distant objects. These rays traverse, successively, the transparent cornea, the aqueous humour, the crystalline, the vitreous humour, and strike upon the retina, on which they impress the figure of the object whence they have emanated; and, in order that no obscurity may arise from the reflections, that might otherwise occur, the interior of the eye is lined by a membrane—the choroid—which is, itself, covered internally by a dark pigment. This absorbs the light, like the dark pigment in the interior of telescopes, and thus obviates confusion. As the rays, proceeding from an object, must cross each other in their course to the retina, it follows, that those, proceeding from the upper part of an object, must fall upon the lower part of the retina and conversely. So that the object must be impressed upon the retina, in an inverted position, yet experience teaches us to appreciate the position accurately.

**VISION, DOUBLE, Diplopia.**

**VISUAL, Visualis.** That which concerns the sight or belongs to vision.

The **VISUAL ANGLE** is the angle, formed by the crossing of two rays,—proceeding from opposite points of any body,—in their passage through the pupil. It is by the size of this angle, that we judge, to a certain extent, of the size of objects.

**VISUS, Vision**—*v. Acrior, Nyctalopia*—*v. Coloratus, Chromopsia*—*v. Dimidiatus, Hemipopia*—*v. Diurnus, Hemeralopia*—*v. Duplicatus, Diplopia*—*v. Juvenum, Myopia*—*v. Nocturnus, Nyctalopia*—*v. Senilis, Presbytia.*

**VITA, Life.**

**VITAL PROPERTIES.** See Properties, vital.

**VITAL PRINCIPLE.** The principle which, when allied to matter, as in organized bodies, controls its manifestations and properties, and distinguishes organized matter from the inorganic. We know nothing of this principle, except in its connexion with organization.

**VITALBA, Clematis vitalba.**

**VITELLINE, Vitellinus,** from *vitellus*, 'the yolk of an egg.'

**VITELLINE DISC, Proligerous Disc**—*v. Fluid,* see *Vesicula umbilicalis*—*v. Pedicle,* see *Vesicula umbilicalis*—*v. Pouch, Vesicula umbilicalis*—*v. Vessels, Omphalo-mesenteric.*

The **VITELLINE PEDICLE** is the pedicle, which attaches the umbilical vesicle to the embryo. See *Vesicula Umbilicalis.*

**VITELLO-MESENTERIC, Omphalo-mesenteric.**

**VITELUM OVI.** See *Ovum.*

**VITEX, V. Agnus Castus, Agnus Castus,** (F.) *Gatilier, Petit Poivre, Poivre sauvage.* Family, *Pyrenaceæ.* *Sex. Syst. Didynamia Angiospermia.* The *Chaste Tree.* The seeds, when fresh, have a fragrant smell and an acrid,

aromatic taste. Formerly, they were celebrated as antaphrodisiacs.

**VITI SALTUS, Chorea.**

**VITIATIO, Stuprum.**

**VITILIGO, Lepra**—*v. Alphus, Lepra alphonides*—*v. Melas, Lepra nigricans*—*v. Nigra, Lepra nigricans.*

**VITIS ALBA SYLVESTRIS, Bryonia alba**—*v. Apyrena,* see *V. corinthiaca.*

**VITIS CORINTHIACA.** Family of the Vines. *Sex. Syst. Pentandria Monogynia.* This plant affords the *Uva pas'sæ minor'es, Passæ Corinthiaca, Pas'sula minor'es, Uva Corinthiaca,* or *Currants,* (F.) *Raisins de Corinthe.* They are the dried fruit of the *Vitis Corinthiaca* or *Vitis apyrena;* and are similar, in their properties, to the raisin.

**VITIS IDÆA PALUSTRIS, Vaccinium oxycoccos.**

**VITIS VINIFERA, An'pelos, A. Cœnoph'oros.** The *Grape vine, the Vine.* (F.) *Vigne.* Vine leaves and the tendrils have an astringent taste, and were formerly used in diarrhœa, hemorrhage, &c. The juice or sap, called *Lachryma,* has been recommended in calculous disorders and in cases of chronic ophthalmia. The juice of the unripe fruit is called *Verjuice,* (q. v.) The *Grape, Uva, Botrys, Staph'yle,* (F.) *Ruisin,* when ripe, is a wholesome, delicious fruit; and, when dried, it forms the *Uva passæ majores, Passula majores, Uva passæ solè sicca'tæ, Raisins.* These are inodorous; and, to the taste, sub-acidulous, sweet, and mucilaginous. They are demulcent and nutritive.

**VITIUM SCROPHULOSUM, Scrofula.**

**VITRARIA, Parietaria.**

**VITREUS, Hyaloid.**

**VITRINE AUDITIVE,** (F.) from *vitrum,* 'glass,' *Endolymph.* The fluid contained in the membranous labyrinth of the ear, so called from its resemblance to the vitreous humour of the eye.

**VITRIOL, Ferri sulphas**—*v. Blue, Cupri sulphas*—*v. Cœruleum, Cupri sulphas*—*v. Green, Ferri sulphas*—*v. Roman, Cupri sulphas*—*v. White, Zinci sulphas.*

**VITRIOLUM ALBUM, Zinci sulphas**—*v. Ammoniacale, Ammonia sulphas*—*v. Cupri, Cupri sulphas*—*v. Cyprium, Cupri sulphas*—*v. Ferri, Ferri sulphas*—*v. Goslariense, Zinci sulphas*—*v. Viride, Ferri sulphas*—*v. Martis, Ferri sulphas*—*v. Romanum, Cupri sulphas*—*v. Veneris, Cupri sulphas*—*v. Zinci, Zinci sulphas.*

**VITRUM, Hy'alos, Glass, Brancia,** (F.) *Verre.* Glass, coarsely powdered, has been sometimes used to remove specks of the cornea.

Powdered glass has been regarded, but erroneously, as a poison. It acts only mechanically.

The saline scum, which swims on glass when first made, has been used in tooth-powders. It is called *Sandiver, Sel de verre, Glass Gall, Fel vitri,* &c.

**VITRUM HYPOCLEPTICUM, Separatorium**—*v. Sublimatorium, Aludel.*

**VITFA, Baudette, a Caul.**

**VIVERRA CIVETTA.** See *Civetta.*

**VIVIPAROUS,** from *Vivus,* 'alive,' and *pario,* 'I bring forth.' An epithet applied to animals whose young are brought forth de-

tached, without requiring to be hatched, as in the *Oviparous*.

**VIVISECTION**, *Vivisectio*, from *vivus*, 'alive,' and *secare*, 'to cut.' The act of opening or dissecting living animals.

**VOICE**, *Vox, Audē, Phonē*, (F.) *Voiz*. An appreciable sound, produced by the air, when driven from the lungs, throwing the inferior ligaments of the glottis into vibration. The function, by which this is effected, has been called *Phonatio*. It is a function of animal life; and, in animals, is limited to the production of the *simple* or *instinctive voice*, as well as in the idiot; but, in intellectual man, becomes much more complicated and articulated—an evidence of his intellectual superiority.

The **ARTICULATED VOICE of Speech**, *Loquēla, Lalia, Phrasis*, (F.) *Parole, Voiz articulēe*, is the voice, as produced by the glottis, modified by the motions of the tongue, lip, and other parts of the mouth. Most physiologists agree in regarding the glottis or the space between the thyro-arytenoid ligaments plus the ligaments themselves, as the part where vocal sounds are formed, but the mechanism of this formation is a matter of dispute. The greater part of individuals regard the glottis and its ligaments, with the *vocal tube*—or the space which the sound has to traverse after it is produced in the glottis—as a reed instrument, like the clarinet;—the inferior ligaments of the glottis constituting the reed.

In speech, as ordinarily effected, the tongue, lips, teeth, &c. are concerned; but there are some authentic cases on record, where it has been accomplished after the tongue has been removed. In such cases, the articulated voice must have been produced in the glottis, alone or aided by an obscure action of the parts above it.

**VOICE, BLEATING**, Egophony.

**VOICE, CONVULSIVE**, *Voiz Convulsive*, (F.) *Vox Convulsiva*. A neurosis of the voice, consisting in the production of discordant sounds—acute and grave—which cannot be brought to the natural tones by any effort of volition. It seems to be caused by disordered contraction of the muscles of the larynx.

**VOICE, GOAT'S**, Egophony.

**VOIE**, Way.

**VOIES DIGESTIVES**, Ways, digestive—*v. Lacrymales*. Lachrymal passages—*v. Premières*. Ways, digestive—*v. Secondes*, Ways, second—*v. Urinaires*. Urinary passages.

**VOILE DU PALAIS**, Velum pendulum palati—*v. Médullaire inférieure*, Velum medullare inferius—*v. Médullaire supérieure*, Valvula Vienssenii.

**VOIX**, Voice—*v. Articulēe*, Voice, articulated—*v. Bronchique*, Resonance.

**VOLA**, Palm.

**VOLATICA**, Lichen.

**VOLATILIZATION**, *Volatilizatio*. The operation of reducing volatilizable substances into gas or vapour.

**VOLSELLA**, *Acanthobolos*, Forceps, Madisterium—*v. Patini*, *Palet à Patin*.

**VOLVULUS**, Ileus.

**VOMENDI CONAMEN INANE**, Vomiturition.

**VOMER**, in Lat. 'a ploughshare,' *Os Vo-*

*meris, Aratrum, Os maxilla superioris undecimum*. One of the bones of the face, so called from its resemblance. It is an azygous bone, forming the posterior part of the septum narium. It is thin, flat, and quadrilateral; and is articulated, below, to the superior maxillary and palatine bones; and above, to the sphenoid, ethmoid, and cornets of Bertin. It is developed by a single point of ossification.

**VOMICA**, from *Vomerc*, 'to vomit,' 'to spit up.' (F.) *Vomique, Crachement de pus*. A term, used by some authors for any encysted collection of purulent matter in the interior of a viscus. The acceptance is commonly, however, restricted to purulent collections in the lungs, encysted or not, which may be discharged by the mouth, by breaking into the bronchial tubes. Two kinds of vomicæ are distinguished; the one, caused by the softening or breaking down of pulmonary tubercles; the other, of much more rare occurrence, formed by a circumscribed abscess of the lungs. Instead of opening into the bronchi, the abscess is sometimes discharged into the cavity of the pleura, causing empyema.

**VOMIQUE**, Vomica.

**VOMQUIER**, *Strychnos nux vomica*.

**VOMISSEMENT**, Vomiting—*v. de Sang*, Hæmatemesis.

**VOMIT, BLACK**, Fever, yellow—*v. Black*, *Melæna*.

**VOMITIF**, Emetic.

**VOMITINE**, Emetine.

**VOMITING**, *Vomitus, Evomi'tio, Anãtropē, Em'esis, Vomi'tio, Palmus vom'itus, Ægritudo ventriculi*. Sickness of the Stomach, (F.) *Vomisement*. The act by which solids and liquids, contained in the stomach, are ejected by the mouth. Vomiting is the effect of some special irritation of the nerves of the stomach. It is not accomplished solely by the contraction of the stomach, as was, for a long time believed. That organ, indeed, assists in the process;—the main cause is the compression exerted upon the parietes of the viscus by the diaphragm and abdominal muscles.

Vomiting is a symptom, common to numerous diseases. At times, it is sympathetic, as in affections of the kidney, uterus, brain, &c. At others, it is symptomatic, as in gastritis, peritonitis, &c.

When very troublesome, it may often be palliated by effervescent draughts, aromatics, sinapisms or blisters to the epigastric region, &c.

**VOMITING OF BLOOD**, Hæmatemesis.

**VOMITO NEGRO**, Fever, yellow—*v. Prieto*, Fever, yellow.

**VOMITORIUM**, Emetic.

**VOMITURITION**, *Vomituri'tio, Emesia, Dysent'ia, Vomerc'di canu'men ina'nē, Retching*. Ineffectual efforts to vomit. Some authors mean, by this term, the vomiting of but little matter, or that which occurs almost without effort. The first acceptance is the most general.

**VOMITUS**, Vomiting—*v. Cruentus*, Hæmatemesis—*v. Pituitosus*, Blennemesis—*v. Sanguinis*, Hæmatemesis.

**VOÛTE**, Vault—*v. Médullaire*, *Corpus callosum—v. à Trois piliers*, Fornix.

VOX, Voice—v. *Convulsiva*, *Voix convulsive*—v. *Rauca*, *Raucedo*.

VUE, Vision—v. *Courte*, Myopia—v. *Diurne*, Hemeralopia—v. *Faible*, Amblyopia—v. *Longue*, Presbytia—v. *Louche*, Strabismus—v. *Nocturne*, Nyctalopia.

VULNÉRAIRE, Vulnerary—v. *Suisse*, see Falltranck.

VULNERARIUS, Traumatic.

VULNERARY, *Vulnerarius*; from *vulnus*, 'a wound.' (F.) *Vulnéraire*. A name applied by the ancients, to medicines, which they considered capable of favouring the consolidation of wounds. The property has been ascribed to various plants.

VULNUS, Wound—v. *Laceratum*, see Laceration—v. *Simplex*, Cut.

VULTUEUX, (F.) *Vultuosus*. Corvisart has used the expression, *Face vultueuse*,—*Facies vultuosa*,—for the face, when it is more florid and swollen than in the natural state. This appearance, which is observed in active aneurism of the heart, according to Corvisart, is owing to the afflux of blood into the arterial capillaries, and hence differs from the livid and swollen appearance caused by the accumulation of blood in the venous capillaries, constituting the *Face injectée*.

VULTUS, Face.

VULVA, Uterus. See Vulva.

VULVA, from *valva*, 'a door,' *Hortus*, *Cunnius*,

*Pudendum mulie'brē*, *Choiros*, *Amphicaustis*, *Concha*, *Porcus*, *Porta*, *Interfemineum*, *Muliebria*, *Fossa magna mulie'bris*, *Episcion*, *Eschara*, *Hortulus cupidinis*, the female pudendum, *Boubaltios*, *Byssos*, *Cava*, *Caver'na*, *Delphys*, *D.lta*, *Forca*, *Gymacc'um*. The female organs of Generation. (F.) *Vulve*. A longitudinal opening between the projecting parts of the external organs of generation in the female, extending from the mons veneris to the perineum, and which is called, also, *Fossa magna*. Some anatomists mean, by this term, the whole of the external genital organs of the female;—mons veneris; labia majora, and the cleft or vestibule, separating them; the clitoris; nymphæ; meatus urinarius; entrance of the vagina; with the hymen or the carunculæ myrtiformes, fossa navicularis and fourchette.

VULVA, *Foramen communē antérieur*, *Iter ad infundibulum*, *Iter ad tertium ventric'ulum*. An opening, situate at the junction of the optic thalami, and immediately beneath the anterior crus of the fornx.

VULVAIRE, Chenopodium vulvaria.

VULVAR, *Vulvaris*. That which relates to the vulva. Chaussier gives this name to the external pudic arteries, because they are distributed to the vulva.

VULVARIA, Chenopodium vulvaria.

VULVE, Vulva.

VULVO-UTERINE CANAL, Vagina.

## W.

WAD, Graphites.

WAISTCOAT, STRAIT, *Inducula*, (F.) *Camisole*, *Gilet de force*. A dress, used for restraining maniacs, or those labouring under violent delirium. It has long sleeves, which are tied behind the body, so that the arms cannot be extricated from them. It ought, of course, to be made of very resisting materials.

WAKE-ROBIN, *Arum maculatum*.

WALKING, *Gressus*, *Inces'sus*, *Dambulatio*, *Ambulatio*, *Badisis*, (F.) *La marche*. The action by which we change place, by means of a succession of steps in the same direction. In walking forwards, the centre of gravity is constantly altered; and a series of small, parabolic curves is described on the heads of the thigh bones, the extent of which is regulated by volition, under the guidance of vision.

WALLACHIA, MINERAL WATERS OF. There are many excellent sulphureous springs in this country, especially those at Bobotsch, Fineschti, Sibitschiudi Suz, Bräsa, Otschin, Serboneschte, Kimpalungi, Kosia, and Olo-neschti. Chalybeate and saline springs have also been found at Sibitschiudi Suz.—Siller.

WALLFLOWER, *Cheiranthus cheiri*.

WALNUT, *Juglans regia*—w. White, *Juglans cinerea*.

WALLRUE, *Asplenium ruta muraria*.

WALTON, MINERAL WATERS OF. A mineral spring near Tewkesbury, in Gloucestershire, England. It is an acidulous chalybeate.

WANT, from past participle of Sax. *þanian*, 'to wane;' 'to fall away.' 'Need of that which is necessary.' (F.) *Besoin*. This word is sometimes used to express the imperious necessity which compels us to take food, drink, &c. (See Hunger and Thirst.) In a more general sense, it means the impressions transmitted, by the organs to the brain, when it is necessary that they should act; these wants are called *instinctive desires* and *internal sensations* or *stimuli*. Such are the desires to eat, drink, void the urine, &c. &c.

WANT in the sense of *Indigence*, (L.) *Egctas*, *Indigentia*, is the cause of a number of diseases.

WARD'S ESSENCE FOR THE HEAD-ACHE, *Linentinum camphoræ compositum*.

WART, *Verruca*—w. Corneous, *Cornu*.

WASH, BLACK, see *Hydrargyri submuriatis*—w. Preventive, *Lotion*, *Hannay's*—w. White, *Liquor plumbi subacetatis dilutus*.

WASP, *Vespa*, *Sphex*, (F.) *Guêpe*. A genus of gregarious insects, like the bee and the ant. They are armed with a sting, which pours a poisonous fluid into the puncture made by it. (See Poisons, *Table of*.) The best application is the Sp. ammoniac aromaticus, or some preparation of ammonia.

WASSERBURG, MINERAL WATERS OF. W. is a town of Bavaria, seated on the Inn, 23 miles east of Munich. The water, called also *Aqua Agatii*, contains carbonic acid; carbonates of lime and magnesia; sulphates of lime and magnesia; muriate of soda, carbonate of soda and oxide of iron.

**WATER**, *Aqua*, *Hydor*, ὕδωρ, ἄνω, (F.) *Eau*. Water was, at one time, regarded as a simple element. It is now known to consist of eight parts by weight of oxygen, and one of hydrogen. It freezes at 32°, and boils at 212°, of Fahrenheit; and is taken as the unit in all tables of the specific gravity of solid and liquid substances.—Water, as we meet with it, is very different in its state of purity; generally, it contains small quantities of saline matter; at other times, as in sea water and mineral waters, it is largely impregnated.

The characters of water, as met with under ordinary circumstances, are well compared by Celsus, "*Aqua levisissima plurimalis est; deinde fontana, tum ex flumine, tum ex puteo: post hæc ex nive, aut glaciæ: gravior his ex lucu, gravissima ex palude.*" Pure water is one of the best diluents that can be used. When cold, and especially when iced, it is one of the most useful refrigerants; and, in the form of the cold, tepid, and warm bath, it is serviceable in numerous diseases.

**Water, Rain**, *Aqua pluvialis*, (F.) *Eau de pluie*, when collected at a distance from houses or other elevated objects, is the purest natural water, and has the least specific gravity. The only bodies which it usually holds in solution, are carbonic acid, and minute traces of carbonate and muriate of lime.

**Water, Spring**, *Aqua fontana*, *Hydropegæ*, (F.) *Eau de fontaine*, contains, in addition to the substances detected in rain water, more or less sulphate of lime. When this is to such an extent as to curdle soap, the water is said to be *hard*; if not, *soft*. Hard water is, of course, inferior to soft, for domestic and medicinal purposes.

**Water, River**, *Aqua fluvialis*, is derived from the conflux of numerous springs and rain water. It is, generally, pretty pure.

**Water, Well**, *Aqua putealis*, (F.) *Eau de puit*, *Eau de source*, is the same as spring water, but liable to impregnation, owing to the land springs filtering into the wells, and conveying impurities into them.

**Water, Snow**, *Aqua nivæta*, (F.) *Eau de neige*, has usually been deemed unwholesome. It exactly resembles rain water, in composition, and is equally salubrious.

**Water, Lake**, *Aqua ex lacu*, (F.) *Eau de lac*, is apt to be impure, from decayed animal and vegetable matter. A great deal will, however, depend upon the magnitude of the collection, and the degree of stagnation.

**Water, Marsh**, *Aqua paludosa*, (F.) *Eau de Marais*, is the most impure of all. It is generally more stagnant, and of course more loaded with decomposing animal and vegetable matters.

**Water, Distilled**, *Aqua distillata*, (F.) *Eau distillée*, *Holy Water*, is generally ordered in extemporaneous prescriptions, but is rarely used. In some cases, however, it is absolutely necessary, as water, containing any saline impregnation—hard water, for example—decomposes certain substances. (See Incompatibles, Table of.) Distilled water has been recommended as a diet-drink in cancerous affections; and it is used in the religious ceremonies of the Catholic church.

**Water, Mineral**, *Aqua mineralis*, *A. salubris*, *A. medicata*, *Fons salutaris*, *Aqua soté-*

*ria*, (F.) *Eau minérale*. Water, holding in solution different saline and gaseous substances, in sufficient quantity to be possessed of medicinal properties.

Mineral waters may be divided into four classes:—1. *Gaseous* or *Acidulous*. 2. *Chalybeate*. 3. *Saline*. 4. *Sulphureous*. These may be *thermal* or *cold*, *natural* or *artificial*. Many of these divisions, however, run into each other; some of the substances, which they hold dissolved, belonging to one class as well as to another.

1. *Gaseous, Acidulous* or *Carbonated Mineral Waters*, *Aqua minerales acidule*, (F.) *Eaux minérales gazeuses* ou *acidules*. The waters, referred to this class, are those that contain carbonic acid gas in such quantity as to communicate to it certain sensible qualities. Waters, impregnated with free carbonic acid, sparkle when drawn from the spring, or when poured into a glass. They have a sharp, acidulous taste; but become vapid from exposure to the air. Along with the carbonic acid, there are generally present portions of saline, earthy or metallic matter, chiefly carbonates of lime, magnesia, and iron. Waters, highly impregnated with carbonic acid gas, are grateful to the stomach; increase the appetite, and are diuretic; hence, their utility in dyspepsia, hypochondriasis, and gout. Their properties are, of course, modified by the saline matter that may be also contained in them.

The most celebrated amongst the acidulous waters are those of Bar, Chateldon, Saint Myon, Mont d'Or, Langeac, Seltzer, Sultzmat, Pyrmont, Spa, Carlsbad, Cheltenham, Scarborough, Saratoga, Ballston, and the Sweet Springs of Virginia.

2. *Chalybeate* or *Ferruginous Mineral Waters*, *Aqua minerales ferrugineæ*, (F.) *Eaux minérales ferrugineuses*, contain iron—sulphate, muriate or carbonate, generally the latter—held in solution by an excess of acid. Chalybeate waters have a peculiar styptic taste. They are transparent, when taken from the spring; but, when exposed for some time to the air, a pellicle forms on the surface, and a deposit takes place of the iron. Chalybeate waters are used as tonics in debility of all kinds; in all cases, in fact, where iron is considered to be indicated. They are the most numerous of all the classes of mineral waters. In the present Dictionary, those only are specified which have some celebrity; yet there are nearly ninety; whilst there are about sixty of the saline, and thirty-five of the sulphureous.

The most celebrated chalybeates are those of Tunbridge, Scarborough, Spa, Bussang, Forges; Vichy, Pyrmont, Passy, Provins, and Vals.

3. *Saline Mineral Waters*, *Aqua minerales salinæ*, *Anna alexand'ra* (Paracelsus.) (F.) *Eaux minérales salines*. Waters, holding in solution different saline substances, in greater quantity than the acidulous waters. They differ in properties, according to the salts contained in them. The salts usually present, are sulphates, muriates, and carbonates; and the bases, with which the acids forming these are combined, are soda, magnesia, and lime.

Saline mineral waters are usually aperient; and the most noted are those of Seltzer, Sedlitz,

Balaruc, Bourbonne-les-Bains, Baden, Epsom, Cheltenham, &c.

To this class may also be added *Sea water*.

4. *Sulphureous Mineral Waters*, *Aqua minerales sulphuræ*; when warm, termed *Theiotherma*, *Fontes sulphurei calidi*, (F.) *Eaux minerales sulfureuses*, *Eaux sulfurées*, *E. sulfureuses*, *E. hépatiques*, &c. These waters owe their distinguishing character to an impregnation of sulphuretted hydrogen; and are at once recognised by their peculiar, fetid smell, resembling that of rotten eggs. They usually contain saline substances, which modify their powers. From the action of the sulphuretted hydrogen, they are employed in cutaneous affections; and, from the combined action of this and the saline matter, they are valuable agents in diseases of the digestive organs. They are also employed in cutaneous eruptions; and the

warm sulphur baths have been especially celebrated in such cases, as well as in rheumatic affections.

The most renowned sulphureous waters are those of Barèges, Bagnères-de-Luchon, Cauterets, Bonnes, Aix in Savoy, Aix-la-Chapelle, Enghien, Harrowgate, Moffat, Virginia Springs, &c.

Some springs, as those of Bath, Buxton, Dax, Matlock, Warm and Hot Springs of Virginia, &c., are almost pure *Thermal Mineral Waters*. They are valuable agents in rheumatic affections; the warmth being equable during the whole period the individual is immersed in them; which cannot be the case in the artificial thermal bath.

The following Table, by Dr. Ure, exhibits the composition of some of the principal mineral waters, as well as of that of the sea:

TABLE  
OF THE COMPOSITION OF THE MOST CELEBRATED MINERAL WATERS.

| NAMES OF THE SPRINGS.       | Grains of water.              | CUBIC INCHES OF GASES. |                          |                          | CARBONATES OF |       |       |                | SULPHATES OF |       |       |                | MURIATES OF |       |       |                | Silica. | Alumina. | Resins. | Tempera-<br>ture. |
|-----------------------------|-------------------------------|------------------------|--------------------------|--------------------------|---------------|-------|-------|----------------|--------------|-------|-------|----------------|-------------|-------|-------|----------------|---------|----------|---------|-------------------|
|                             |                               | Oxy-<br>gen.           | Carb-<br>on-<br>ic acid. | Sulph-<br>hydro-<br>gen. | Azote.        | Soda. | Lime. | Magne-<br>sia. | Iron.        | Soda. | Lime. | Magne-<br>sia. | Iron.       | Soda. | Lime. | Magne-<br>sia. |         |          |         |                   |
| Acidulous.                  | Seltzer (1) - - - -           | 43.5                   | 13.068                   |                          |               | 5.22  | 78.3  | 6.32           |              | gr.   | gr.   | gr.            | gr.         | gr.   | gr.   | gr.            | gr.     | gr.      | cold    |                   |

*Artificial Mineral Waters*, (F.) *Eaux minérales artificielles* ou *factices*. These are imitations of the natural; and some of them—as the factitious Cheltenham water, and Sedlitz water—answer the purposes of the natural water tolerably well. The acidulous and chalybeate waters are, however, most easily imitated.

**WATER, SEA**, *Aqua Mari'na*, *Humor Dor'idis*, (F.) *Eau de Mer*. This contains common salts and sulphate of magnesia, in large quantity. It is cathartic and forms the usual glyster at sea. It makes an excellent tonic bath; superior in most cases—especially in scrofula—to the fresh water bath.

**WATERS, DISTILLED**, *Aquæ destillatæ*—w. First, Primitivæ.

**WATTWEILER, MINERAL WATERS OF**. W. is a small town in the department of Haut-Rhin, at the foot of the Vosges. The waters are acidulous chalybeates, and contain carbonates of iron, lime, and soda; muriate of soda, and free carbonic acid.

**WAX, YELLOW AND WHITE**, *Cera flava et alba*.

**WAXING KERNELS**, *Crescentiæ*, (F.) *Croissances*, *Croissants*, *Glandes de croissance*. A popular term for small tumours, formed by an enlargement of the lymphatic glands—in the groins of children, particularly. They have been looked upon as connected with the growth of the body, hence their name.

**WAY**, *Via*, *Passage*, *Odos*, (F.) *Voie*. A name given to different canals.

The **DIGESTIVE WAYS** or **PASSAGES**, *Prima via*, (F.) *Voies digestives*, *Premières voies*, are the series of hollow organs of digestion, composed of mouth, œsophagus, stomach, small and large intestines. The term is often restricted to the three first of these.

The **SECOND WAYS** or **PASSAGES**, *Secundæ via*, (F.) *Sécondes voies*, comprise the chyliferous, lymphatic, and blood-vessels.

**WEANING**, Sax. *penan*. *Ab lactation*, *Ab lactatio*, *Apogalactismus*, (F.) *Sévrage*. The act of depriving the infant, permanently, of the breast, in order to feed it on other and more solid nourishment.

**WEB, MUSCULAR**, *Panniculus carnosus*. **WEB-EYE**, *Caligo*.

**WEDGED**, (D.) *wegge*, *Inclusus*, *Inhærens*, (F.) *Enclavé*. The head of the fetus is said

to be wedged in the pelvis, when it remains fixed notwithstanding the uterine efforts.

The condition is called *Incunatio*, *Spheno'sis*, (F.) *Enclavement*. See Paragomphosis.

**WEED, SILVER**, *Potentilla anserina*.

**WEIGHT**, from Sax. *wægan*, 'to weigh,' (F.) *Pésanteur*. A sensation of heaviness or pressure over the whole body, or over a part—the stomach or head for example.

**WEIGHTS AND MEASURES**, *Pondera et Mensuræ*, (F.) *Poids et Mesures*. The importance of possessing a uniform system of weights and measures has impressed the scientific of all countries; and numerous endeavours have been made to accomplish the object. It is, however, a matter of considerable difficulty, and one not likely to be attained. The new French measures are upon decidedly the best footing, but they are not adopted out of France. The greatest diversity prevails over Europe in the measures both of weight and capacity. Some of the following tables will show that every subdivision of the pound, as well as the pound itself, differs in England and in France.

**TROY WEIGHT**, as used by the British Apothecaries.

|             |     |            |   |             |
|-------------|-----|------------|---|-------------|
| The pound   | lb  | } contains | { | 12 ounces.  |
| The ounce   | ʒ   |            |   | 8 drachms.  |
| The drachm  | ʒ   |            |   | 3 scruples. |
| The scruple | ʒ   |            |   | 20 grains.  |
| The grain   | gr. |            |   |             |

These, and the signs by which they are denoted, are the same in all the British Pharmacopœias, as well as in the American.

|     |      |        |        |        |
|-----|------|--------|--------|--------|
| lb. | Oz.  | Dr'ms. | Scrup. | Grs.   |
| 1 = | 12 = | 96 =   | 288 =  | 5760 = |
|     | 1 =  | 8 =    | 24 =   | 480 =  |
|     |      | 1 =    | 3 =    | 60 =   |
|     |      |        | 1 =    | 20 =   |

*Poids de Marc.*

|             |            |   |             |
|-------------|------------|---|-------------|
| The pound   | } contains | { | 16 ounces.  |
| The ounce   |            |   | 8 drachms.  |
| The drachm  |            |   | 3 scruples. |
| The scruple |            |   | 24 grains.  |
| The grain   |            |   |             |

*Avoirdupois.*

|         |         |          |              |
|---------|---------|----------|--------------|
| Pound.  | Ounces. | Drachms. | Troy grains. |
| lb. 1 = | 16 =    | 256 =    | 7000 =       |
|         | oz. 1 = | 16 =     | 437,5 =      |
|         |         | dr. 1 =  | 27,34375 =   |

The *avoirdupois* drachm is sometimes divided into three scruples, and the scruple into ten grains. The pound or 7680 grains *avoirdupois* = 7000 grains troy, and hence 1 grain troy = 1,097 grain *avoirdupois*.

The *Poids de Marc* is that employed by the French Pharmaciciens, when the new weights are not.

The following Tables exhibit the relative value of the old French and English weights.

|                          |                 |                |                  |

VALUES OF THE GRECIAN, ROMAN, AND ARABIAN WEIGHTS AND MEASURES IN POIDS DE MARC.

1. *Weights of the Ancient Greeks.*

|             | lbs. | oz. | dr. | gr.           |
|-------------|------|-----|-----|---------------|
| The talent  | ==   | 54  | 2   | 5 24          |
| The mina    | ==   | 14  | 3   | 40            |
| The drachm  | ==   |     | 1   | 11            |
| The obolus  | ==   |     |     | 13            |
| The eration | ==   |     |     | 4             |
| The chalcus | ==   |     |     | 2             |
| The septon  | ==   |     |     | $\frac{1}{2}$ |

2. *Weights of the Ancient Romans.*

|  | oz. | dr. | gr.  |
|--|-----|-----|------|
| The pound (libra)                      |     | 10  | 6 48 |
| The ounce (uncia)                      |     |     | 7 16 |
| The duella                             |     |     | 2 29 |
| The sicilicus                          |     |     | 1 58 |
| The sextula                            |     |     | 1 14 |
| The cosular denier, denarius           |     |     | 1 2  |
| The imperial denier or drachm, drachma |     |     | 65   |
| The victoriatus                        |     |     | 37   |
| The scriptulum or scruple              |     |     | 21   |
| The obolus                             |     |     | 11   |
| The siliqua                            |     |     | 4    |

The Greeks divided their obolus into *chalcæ* and *lepta*: some divided it into 6 *chalcæ*, and each *chalcus* into 7 *lepta*: others into 8 *chalcæ*, and every *chalcus* into 8 *lepta* or *minuta*.

| The hassul, aessuse, or aucsime                           |      |     | 2   | 4 20 |
| The conos or coatus, alcantus or almunesi, brialde enabus |      | 1   | 5   | 34   |
| The lesser bucklets                                       |      |     |     | 5 56 |
| The larger spoonful                                       |      |     |     | 4 44 |
| A spoonful  |      |     |     | 1 52 |
| The colanos or reelanarium                                |      |     |     | 1 28 |
| A small spoonful or flagerina, or eyanes                  |      |     |     | 1 14 |
| The smallest spoonful or fahaliel                         |      |     |     | 42   |

Besides the weights and measures, employed by the moderns, already mentioned, there are some modes of estimating the quantities of substances by approximation. For example:—

A *glassful* or *cupful*, ((F.) *Verre*) is reckoned to contain 4 or 5 fluidounces.

A *wine glassful*, 1½ ounce or 2 ounces.

A *table spoonful*, ((F.) *Cuiller à bouche*) about half an ounce.

A *coffee or dessert spoonful*, about 3 drachms.

A *tea spoonful*, a fluidrachm.

A *handful, manipulus*. ((F.) *Poignée*.)

The *Pugillus* is as much as can be held by the three fingers. ((F.) *Pincee*.)

These last quantities are occasionally prescribed by the French practitioners. Their weights must, of course, vary, according to the article. The authors of the Parisian codex have valued them, as regards certain substances.

|  | oz. | dr.          |
|--|-----|--------------|
| A <i>Manipulus</i> of barley weights         |     | 3 2½         |
| “ linseed                                    |     | 1 4          |
| “ linseed meal                               |     | 3 3          |
| “ dried mallow leaves                        |     | 1 3          |
| “ dried chicory leaves                       |     | 1 0          |
| “ flowers of the tilia                       |     | 1 2½         |
|  |     | dr. scr. gr. |
| A <i>Pugillus</i> of camomile flower weights |     | 2            |
| “ arnica                                     |     | 1 2          |
| “ marsh-mallow                               |     | 1 1          |
| “ mallow                                     |     |              |
| “ fennel seeds                               |     | 1 60         |
| “ anised                                     |     | 2 ½          |

A *hen's egg*, newly laid, weighs about 2 ounces and 2 drachms:—when deprived of its shell 2 ounces. The *white* weighs 1 ounce, 2 drachms, and 57 grains: the *yolk*, 5 drachms and 15 grains.

WELK, Gutta rosea.

WEMDING, MINERAL WATERS OF.

These waters are situate about four leagues from Donawert in Bavaria. They contain sulphuretted hydrogen; carbonates of lime, magnesia, and soda; sulphates of lime and magnesia; a little muriate of lime, and oxide of iron; and are much used in asthenic diseases.

WEN, Sax. pen, *Lu'pia, Tumour* (q. v.) (F.)

*Loupe*. A name given to circumscribed, indolent tumours, without inflammation or change of colour of the skin. They may be met with in almost every part of the body. Their magnitude, as well as nature, is very variable. The term is sometimes confined to an encysted tumour.

WHEAT, Triticum—w. Indian, Zea mays—w. Turkey, Zea mays.

WHELK, Acne.

WHELK, CHIN, Sycois.

WHEY, Serum lactis—w. Rennet, see Serum lactis—w. Tamarind, see Tamarindus.

WHISKEY. See Spirit.

WHISKEY; a spirituous liquor obtained from oats, potatoes, &c. by distillation. See Spirit.

WHISTLING, *Sigflement*.

WHITE, FLAKE. *Plumbi subcarbonas*—w. Leg, *Phlegmatia dolens*—w. Root, *Asclepias tuberosa*—w. Spanish, *Bismuth, subnitrate of*—w. Swelling, *Hydrarthrus*—w. Swelling of lying-in women, *Phlegmatia dolens*—w. Wood, *Liriodendron*.

WHITES, THE, *Leucorrhœa*.

WHITLOW, *Paronychia*.

WHOOPIINGCOUGH, *Pertussis*.

WHORTLEBERRY, *Vaccinium myrtillus*, *Vaccinium vitis Idæa*—w. Bears', *Arbutus uva ursi*.

WHORTS, BLACK, *Vaccinium myrtillus*.

WIDOW WAIL, *Cncorum tricoceuin*, *Daphne alpina*.

WIESSAU, MINERAL WATERS OF.

These waters are situate about four leagues from the Convent of Waldsassen in Bavaria. They contain carbonic acid; carbonates of lime and magnesia; muriates of lime, magnesia, and alumine; carbonate of soda, and much oxide of iron. The Bavarians consider them to resemble the waters of Pymont.

WILD, Sax. *pilb*, (D.) *Wild*. An epithet given to the countenance, when not in harmony with the situation of the individual, and indicating strong, mental emotion. A *wild look*, (F.) *Physionomie égarée*.

WILDUNGEN, MINERAL WATERS OF.

W. is situate a few miles from Cassel in Germany. In its neighbourhood are several mineral springs; the chief of which, according to Stucke, contain a bituminous matter; muriate and sulphate of soda; carbonate and sulphate of lime, &c. They are used, chiefly, as refrigerants.

WILLOW, *Salix*—w. Herb, common, *Lythrum salicaria*—w. Herb, purple, *Lythrum salicaria*—w. Red, *Cornus sericea*—w. Rose, *Cornus sericea*—w. Sweet, *Myrica gale*.

WIND, *Ventus*, *Aemos*, (F.) *Vent*. Winds exert considerable influence on the animal economy; acting by their temperature, which necessarily modifies that of the circumambient air, as well as by their moisture or dryness; and by the emanations of different kinds, which they transport to greater or less distances. The winds, which blow over a considerable extent of country, are dry and serene; those which come from the ocean, are moist and chilly.

WIND DROPS, *Emphysema*—w. Flower, *Anemone*—w. Pipe, *Trachea*—w. Root, *Asclepias tuberosa*.

WINDY, *Flatulentus*, *Flatulent*, (F.) *Ventoux*. That which causes wind or flatulence; also, that which is caused by wind or flatulence;—as *windy food*, *windy colic*, &c.

WINE, *Vinum*, *Œnos*, (F.) *Vin*. A name, given by chymists to all liquors that have become spirituous by fermentation. The term is generally, however, restricted to the fermented juice of the grape; or of fruits, the product of whose fermentation resembles, in most respects, that of the juice of the grape.

Wine is composed of alcohol; saccharine matter; malic acid; tartaric acid; supertartrate of potass; acetic acid; an extractive colouring matter, more or less bitter, and partly resinous;

and sometimes of an aromatic substance. The extractive colouring matter is chiefly met with in red wines. All these constituents, except the alcohol, are found ready formed in the grape. The alcohol proceeds from the decomposition of the saccharine matter. A part of the acetic acid is, also, formed during fermentation.

The following Table, drawn up by Mr. Brande, exhibits the quantity of spirit in different kinds of wine and liquors. It is proper, however, to remark, that many of these wines are prepared for the London market, and are more brandied or reinforced, than the same varieties sold in the United States. This is strikingly the case with port. Dr. Henderson, too, has remarked, that some of the wines analyzed by Mr. Brande, were mixed with a considerable quantity of adventitious alcohol. Dr. Henderson's additions and corrections have the letter H. affixed.

PROPORTION OF ALCOHOL, s. g. 0.825, IN ONE HUNDRED PARTS BY MEASURE OF THE FOLLOWING WINES, AND MALT AND SPIRITUOUS LIQUORS.

—(d) 12.91 H.

The only wine recommended in some pharmacopæias, is the *Sherry, Vinum, Vinum album Hispanicum*. It is a *dry wine*; the least variable in its properties, and agrees best with the dyspeptic. Other wines, used officially are,—the *Canary or Sack wine, Vinum Cavarinum; Mountain wine, Vinum album montanum; Tent wine; Rhenish wine, Vinum Rhenanum; and Port wine, the Vinum rubrum Portugalicum*.

The wines, habitually drunk, are almost innumerable. Those that are sweet, or contain a large portion of free, saccharine matter, are decidedly the least wholesome to the dyspeptic.

When wine is good, and of a proper age, it is tonic and nutritive; when new, flatulent and cathartic;—disagreeing with the stomach and bowels. In Medicine, it is a valuable tonic in the last stages of typhus, when the skin is not too hot and dry. Its use, however, requires great caution; and when once commenced under proper circumstances, it cannot be suddenly dropped without mischief. It is, perhaps, the best permanent stimulus in the catalogue of the *materia medica*.

WINE, AMINÆAN, *Aminæum vinum*—w. of Aloes, *Vinum aloes*—w. Antimonial, *Vinum antimonii tartarizati*—w. Antiscorbutic, *Vinum antiscorbuticum*—w. Aromatic, *Vinum aromaticum*—w. Bark, compound, *Vinum de kinâ kinâ compositum*—w. Barley, *Cerevisia*—w. Bitter, diuretic, *Vinum diureticum amarum*.

WINE BITTERS, *Vinum gentianæ comp.* The formulæ for these may be various. The following is as good and agreeable as any. (*Rad. gentian. lbj, cort. aurant. ʒx, sem. cardam. cort. ʒiv, cinnamon. cort. ʒiv*, foreign or domestic, three gallons and a half. Tonic and stomachic.

WINE, CEDAR, *Cedrinum vinum*—w. Chian, *Chium vinum*—w. of Colchicum, *Vinum colchici*—w. of Gentian, compound *Vinum gentianæ compositum*—w. of Hellebore, white, *Vinum veratri*—w. Ipecacuanha, *Vinum ipecacuanhæ*—w. of Iron, *Vinum ferri*—w. Medicated, *Vinum medicinale*—w. of Opium, *Vinum opii*—w. Pullet, *Poulet, vin de*—w. of Quinine, *Vinum quininæ*—w. Rhubarb, *Vinum rhej palmati*—w. Steel, *Vinum ferri*—w. Tobacco, *Vinum tabaci*—w. of Wormwood, *Vinum absinthites*.

WINTER BARK TREE, *Wintera aromatica*—w. Berry, Virginia, *Prinos*—w. Green, round-leaved, *Pyrola*.

WINTERA AROMATICA. The *Winter Bark Tree*. The Bark, *Cortex Winteranus, Cortex Winteranus Magellanicus, Cortex Magellanicus*, (F.) *Écorce de Winter, Cannelle poivrée*, is very much allied in its properties to the *Canella alba*, (q. v.)

WISBADEN, MINERAL WATERS OF. W. is a town of Germany, about 6 miles north of Mainz, and 22 west of Frankfurt. The waters appear to be simple sulphureous, and much frequented.

WISMUTHUM, Bismuth.

WOLFSBANE, *Aconitum*—w. Claw, *Lycopodium*.

WOMB, Uterus—w. Falling down of the, *Prolapsus uteri*—w. Grain, *Ergot*—w. Laceration of the, Uterus, rupture of the—w. Tympany of the, *Physometra*.

WOODBINE, COMMON, *Lonicera periclymenum*.

WOODLICE, *Onisci aselli*.

WOODROOF, SWEET-SCENTED, *Asperula odorata*.

WOODS, SUDORIFIC, (F.) *Bois sudorifiques*. This term is applied, collectively, to the guaiacum, sassafras, china, and sarsaparilla; which are often used together to form the sudorific decoction.

WOODSORREL, *Oxalis acetosella*.

WORM BARK TREE, *Geoffræa inermis*—w. Goosefoot, *Chenopodium anthelminticum*—w. Grass, perennial, *Spigelia Marilandica*—w. Guinea, *Dracunculus*.

WORM LOZ'ENGES, CHING'S. Empirical preparations, which consist of yellow and brown lozenges. The former are directed to be taken in the evening; the latter on the following morning.

The YELLOW LOZENGES. (*Saffron*,  $\frac{3}{4}$ ss, water ℥j; boil, and strain: and add of *white panacea of mercury* (calomel washed in spirit of wine) ℥j, *white sugar* 28 lbs, *mucilage of gum tragacanth*, q. s., to make a mass. Divide; so that each lozenge contains a grain of the panacea.)

The BROWN LOZENGES. (*Panacea*  $\frac{3}{4}$ vij, *resin of jalap* ℥iijss, *white sugar* ℥ix, *mucilage of gum tragac.* q. s. Each lozenge to contain gr. ss of the panacea.)

WORM, SEED, *Artemisia santonica*, *Chenopodium anthelminticum*—w. Weed, Corsican, *Corallina Corsicana*—w. Weed, white, *Corallina*—w. Wood, common, *Artemisia absinthium*—w. Wood, creeping, *Artemisia rupestris*—w. Wood, Lesser, *Artemisia pontica*—w. Wood, Roman, *Artemisia pontica*—w. Wood, sea, *Artemisia maritima*—w. Wood, silky, *Artemisia glacialis*.

WORMI'ANA OSSA, *Ossa epactul'ia*, *Ossa triquetra*, *Ossa triangularia Blasii*, *Claves calvaria*, (F.) *Os Wormiens*, *Clefs du crâne*, *Os épactaux*, *Os surnuméraires*, (Ch.) *Os intercalés*, *Os triangulaires*. Small bones, which are sometimes observable in the sutures of the bones of the cranium, of which they form a part. They were called *Wormiana*, from Olaus Wormius, who is said to have first described them. They had been previously, however, mentioned by Guinterus Andernachus, a physician at Strasburg. The ossa wormiana exist more commonly in the sutures of the vault of the skull; especially in the lambdoidal, sagittal, and squamous. They are uncommon at the base of the skull. Their size is very variable, and shape irregular. Their structure and development are similar to those of the other bones of the cranium; and, like them, they are bounded by sutures.

WORMS, *Vermes*, *Intestinal Worms*, *Entozoa*, *Entozod'ria*, *Enterozo'a*. *Vermes intesti'ni*, *Entelmin'thes*, *Helmin'thi*, *Helminthia Alvi*, and *H. Pod'icis*, (F.) *Vers*, *Vers intestinaux*, *Entozoaivcs*. Animals which, according to Cuvier, form the medium between the class of worms and that of zoöphytes. They appear to have neither cartilages nor blood-vessels. Some species seem to have a nervous system formed of ganglions, but the majority are devoid of it. Their common character is that of existing only in

animals, and hence their name *entozoa*, from *εντος*, 'within,' and *ζωον*, 'animal.' They are met with, not only in the natural cavities, but even in the tissue of the organs. Cuvier, Rudolphi, Brera, Bremser, Laënnec, and others, have endeavoured to class them,—some according to their shape; others, according to their anatomical characters.

The following table exhibits the entozoa, which have been met with in the human body, and their usual habitat.

| <i>Entozoa.</i>  | <i>Where Found.</i>        |
|--|----------------------------|
| <i>Tricocephalus dispar</i> ,<br><i>Oxyuris vermicularis</i> ,<br><i>Ascaris lumbricoides</i> ,<br><i>Bothriocephalus latus</i> ,<br><i>Tenia solium</i> ,<br><i>Diplosoma crenata</i> ,<br><i>Spiroptera hominis</i> ,<br><i>Dactylus aculeatus</i> , | } Intestines.              |
| <i>Distoma hepaticum</i> ,<br><i>Strongylus gigas</i> ,<br><i>Filaria oculi</i> ,  |                            |
| <i>Acephalocystis endogena</i> ,<br><i>Echinococcus hominis</i> ,<br><i>Polystoma pinguicola</i> ,<br><i>Filaria bronchialis</i> ,<br><i>Trichina spiralis</i> ,   | } Urinary Bladder.         |
| <i>Cysticercus cellulosæ</i> ,<br><i>Acephalocystis multifida</i> ,<br><i>Filaria medinensis</i> ,   |                            |
|  | Gall Bladder.              |
|  | Kidney.                    |
|  | Eye.                       |
|  | Liver.                     |
|  | Liver, Spleen and Omentum. |
|  | Ovary.                     |
|  | Bronchial glands.          |
|  | Muscles.                   |
|  | Brain.                     |
|  | Cellular texture.          |

The most common of these are;—the *Oxyures vermicularis*, *Ascarides lumbricoides*, and *Tenia*, which are found in the intestines. The origin of these worms is extremely singular and more favourable than any other fact to the hypothesis of spontaneous generation, in the lowest tribes of animated nature. They certainly do not resemble any worms out of the body. They are most commonly met with in children improperly fed; but their presence cannot be positively detected by any symptom, except that of the discharge of the worms themselves, in the evacuations. They may, of course, give rise to every kind of irritation in the intestinal tube, and to sympathetic disturbance in most of the other functions; but all these signs may be produced by intestinal irritation resulting from other causes.

*Anthelmintics* or *vermifuges*, employed, as the name imports, for their removal, may be of two kinds—*mechanical*, and *true*. To the first class—the *mechanical*—belong *Emetics*, *Purgatives*, the *Dolichos pruriens*, *powdered Tin*, &c. To the latter—the *true anthelmintics*—*Asafatida*, *Petroleum*, *Turpentine*, the *Chenopodium Anthelminticum*, *Pink-root*, *Semina Santonici*, &c. Of these the best is the turpentine. See *Oleum Terebinthinae*.

The great object, however, is to prevent their generation. This must be done by generous diet, fresh air, and tonics where necessary.

WORMS, Helminthiasis.

WORT, (F.) *Moût de la Bière*. An infusion of malt. This has been recommended in scurvy. One measure of ground malt is added to three equal measures of boiling water. The mixture must be well stirred, and left to stand covered three or four hours. Dose, one to four pints, daily. It has, also, been recommended in other cases, where a strong putrescent disposition appeared to prevail in the fluids, as in cancerous and phagedenic ulcers. It is not now employed.

WOUND, Sax. *Wund*, *Vulnus*, *Plaga*, *Trauma*, *Tresis*, *Tresis Vulnus*, *Blabē*, *Tymma*, (F.) *Plaie*, *Blessure*. A solution of continuity in the soft parts, produced by some mechanical agent. Wounds present innumerable differences, as regards their situation; the parts interested; their direction; size; shape; the nature of the instrument or agent by which they are produced; their more or less simple or complex character, duration, &c. A wound is called *incised*, (F.) *Coupure*, *Incision*, when made by a cutting instrument;—*punctured*, (F.) *Piqure*, when made by a pointed instrument;—*lacerated*, (F.) *Déchirure*, *Plaie par arrachement*, when the parts are lacerated or torn by the wounding

body; *poisoned* (F.) *Plaie envenimée*, when some virulent or venomous substance has been introduced;—and *contused*, (F.) *Plaie contuse*, when produced by a blunt body. *Gunshot wounds*, *Scloptoplagæ*, (F.) *Plaies d'armes à feu* ou *d'arquebuse*, *Coup de feu*, belong to the last division.

WRACK, BLADDER, YELLOW, *Fucus vesiculosus*—w. Sea, *Fucus vesiculosus*.

WRENCH, Sprain.

WRINKLE, *Ruga*, *Rytis*, (F.) *Ride*. A furrow or fold in the skin of the face, forehead, vagina, &c.

WRIST, *Carpus*.

WRONG HEIR, *Cancellus*.

## X.

XALAPPA, *Convolvulus jalapa*.

XANTHIUM, X. *strumarium*, *Barda'na minor*, *Lappa minor*. The lesser *Burdock*. (F.) *Lampourde*, *Petit Glouteron*, *Petite Bardane*. This herb, as its name imports, was once esteemed in the cure of scrofula. The seeds have been administered in cutaneous affections.

XANTHOP'SIA, from *ξανθος*, 'yellow,' and *οφθίς*, 'vision.' Yellow vision,—as sometimes occurs in jaundice.

XANTHORIZA, *Zanthoriza apiifolia*.

XANTHOS, Yellow.

XANTHOXYLUM FRAXINEUM, *Xanthoxylum clava Herculis*.

XANTICA, *Carminatives*.

XANTOLINA, *Artemisia santonica*.

XERANSIS, *Arefaction*, *Drying*.

XERANTIA, *Siccantia*.

XERAPH'IUM, from *ξηρος*, 'dry.' A drying application, used in eruptions of the head and chin.—Paulus of Ægina.

XERAS'IA. Same etymon. A disease of the hairs, which become dry, cease to grow, and resemble down covered with dust.—Galen.

XERION, *Catapasma*.

XEROCOLLYR'IUM, *Collyrium siccum*. A dry collyrium.

XEROMYCTE'RIA, from *ξηρος*, 'dry,' and *μυκτηρ*, 'the nose.' Dryness of the nose.

XEROMYRON, *Unguentum siccum*; from *ξηρος*, 'dry,' and *μυρον*, 'an ointment.' A dry ointment.—Gorræus.

XEROPHA'GIA, from *ξηρος*, 'dry,' and *φαγω*, 'I eat.' Excessive use of dry aliment.

A kind of regimen to which the ancient athletes subjected themselves, with the view of increasing their strength.

XEROPHTHAL'MIA, *Ophthalmia sicca*; from *ξηρος*, 'dry,' and *οφθαλμία*, 'inflammation of the eye.' A dry inflammation of the eye, without discharge. Also, *Lippitudo*, (q. v.)

XEROTRIBIA. See *Friction*.

XIPHOID, *Xiphoides*, *Ensiformis*, from *ξίφος*, 'a sword,' and *εἶδος*, 'shape.' The *Cartilago Xiphoides*, *C. Xiphoidæa*, *C. Ensiformis*, *Ensiform cartilage*, *l'arcet'la inférieure*, *Mueronatum os*, *Mueronata Cartilago*, *Chondros*, (F.) *Appendice ou cartilage xiphoidæ*, *Appendice sous-sternale*, *Palctte*. The name of the appendix which terminates the sternum beneath; and which is so called from some resemblance to a sword.

The XIPHOID LIG'AMENT, *Costo-xiphoid L.* (F.) *Ligament xiphoidicum* ou *costo-xiphoidien*, is a small, very thin, ligamentous fasciculus, which passes from the cartilage of prolongation of the 7th rib to the anterior surface of the xiphoid cartilage, into which it is inserted by its fibres decussating with those of the opposite ligament.

XYLO-ALOES, *Agallochum*—x. *Balsamum*, see *Amyris opobalsamum*—x. *Cassia*, *Laurus cassia*—x. *Cinnamomum*, *Laurus cinnamomum*.

XYRIS, *Iris fœtidissima*.

XYSMA, *Rasura*, *Scobs*.

XYSMOS, *Rasura*.

XYSTERA, *Raspatorium*.

XYSTOS, *Linteum*.

## Y.

YAM. This esculent root is principally obtained from three species of *Dioscorea*—the *alata*, *bulbifera*, and *sativa*. They grow spontaneously in both the Indies, and their roots are eaten, promiscuously, as the potato is with us. Their taste is somewhat like the potato.

YARD, *Penis*.

YARROW, COMMON, *Achillea millefolium*.

YAUPON, *Ilex vomitoria*.

YAWNING, Sax. *zeonan*, *Chasmē*, *Chasmos*, *Hiatus*, *Oscitatio*, *Clonus pandicula'tio*

*maxilla'drum*, *Gaping*, (F.) *Baillement*. Yawning consists of a deep inspiration, with considerable separation of the jaws; executed slowly and in an involuntary manner, and followed by a prolonged and more or less sonorous expiration. This respiratory movement is preceded by a feeling of oppression in the epigastric region, and in the muscles of respiration and mastication. Yawning has been conceived to be owing to torpor in the pulmonary circulation; the causes producing it being commonly *ennui*, fatigue, sleepiness, monotonous sounds, hunger, sympathy, &c. Yawning often precedes the invasion of certain intermittents, attacks of hysteria, &c., and it may, by its frequency, and obstinacy, become a true disease.

YAWWS, *Frambœsia*.

YELLOW, *Flavus*, *Luteus*, *Xanthos*, from past participle of Sax. *zælan*, 'to burn.' One of the seven primitive colours.

The YELLOW LIGAMENTS, (F.) *Ligaments jaunes*, occupy the spaces between the vertebral plates (q. v.) from the interval, which separates the second vertebra from the third, to that which separates the last vertebra from the sacrum. They are so called, in consequence of their colour.

YEST, *Yeast*, Sax. *zert*, *Cerevisiæ Fermentum*, *Spuma Cerevisiæ*, *Barm*, (F.) *Levure*, *Levure de la Bière*. The scum, which collects on the surface of beer whilst fermenting. Yest is antiseptic and tonic. It has been much extolled in putrid fevers,—a table spoonful being given as a dose in porter, wine, &c. It is, also, applied, in the form of cataplasm, to foul ulcers. In all these cases, it acts by virtue of the generation of carbonic acid gas.

YEUX ARDENS, Ardent eyes—*y. d'Écrevissè*, *Cancrorum chelæ*.

YEW TREE, *Taxus baccata*.

YLECH, *Ilech*.

YLIATER, *Ilech*.

YOLK OF EGG. See *Ovum*.

YOUTH, *Adolescence*.

YOPON, *Ilex vomitoria*.

YPSELOGLOSSUS, *Basioglossus*.

YRIDES, *Orpiment*.

YSAMBRA, *Pedigambra*. An ancient Spanish poison, of which hellebore formed the greatest part.

YUCCA, *Jatropha manihot*.

Y-WER-A. See *Spirit*.

## Z

ZACCHARUM, *Saccharum*.

ZAEL, *Borosail*.

ZAFFRAN, *Crocus*.

ZANNA. A kind of Armenian bole, used by the ancients as a desiccative. It is also called *Zarnac'ha*.

ZANTHORI'ZA APIFO'LIA, *Xanthoriza*, *Z. simplicis'sima*, *Z. marbois'ca*, *Xanthoriza Tinctoria*, *Yellow Root*, *Parsley-leaved Yellow Root*. The root of this American plant is a strong and pleasant bitter; and, in the dose of two scruples, sits easy upon the stomach.

ZANTHOXYLUM CLAVA HERCULIS, *Prickly Ash*, *Toothache Tree*, (F.) *Clavahier à feuilles de frêne*, *Frêne épineux*. The bark is a very strong stimulant and powerful sialogogue. It has been given, internally, in rheumatism. Another species—the *Zanthoxylum fraxinifolium*, *Xanthoxylum fraxin'cum*,—possesses active powers. A spirituous infusion of the bark has been highly recommended in cases of violent colic. The fresh juice, expressed from the roots of the zanthoxylum, is said to afford relief in the dry-bellyache of the West Indies. A decoction of the bark is, sometimes, used as a wash to foul ulcers.

ZAPANIA NODIFLORA, *Anacoluppa*.

ZARATHAN. A hard, irregular tumour of the breast, resembling cancer.

ZARNACHA, *Zanna*.

ZARSA, *Smilax sarsaparilla*.

ZARZAPARILLA, *Smilax sarsaparilla*.

ZEA MAYS, *Indian Corn*, *Corn*, *Turkey Wheat*, *Maize*, *Ador*, *Indian Wheat*, (F.) *Graine de Turquie*, *Blé d'Inde*, *Blé d'Espagne*, *Blé d'Italie*, *Blé de Turquie*. A native of America, and much used over the whole of the conti-

nent, as an article of diet. It is ground for the same purposes as wheat, and forms an excellent bread.

ZEDOARIA, *Kæmpferia rotunda*.

ZEDOIRE ROND, *Kæmpferia rotunda*.

ZEDOARY, *Kæmpferia rotunda*.

ZELOSIS, *Zelotypia*.

ZELOTYPIA, from *ζηλος*, 'love,' and *τυπος*, 'form,' 'model;' *Zelosis*. It has been proposed to apply this name to the violent mental affection, produced by the acknowledged or presumed infidelity of a beloved object; and to the consequences of such affection;—melancholy; mania, &c.

ZEMA, *Decoction*.

ZEN'ICON, *ζενικον*. Ancient name of a Keltic poison, used for poisoning arrows.

ZEPHACH, *Peritonæum*.

ZERMA, *Zerna*.

ZERNA, *Zerna*, *Impcti'go ulcera'ta*. Ulcerated impetigo.

ZESIS, *Effervescens*.

ZEST. See *Citrus medica*.

ZIBETHUM, *Civetta*.

ZIGNITES, *Zingritis*.

ZINC, *Zincum*, *Zinkum*, *Speltrum*, *Tutenag*, *Zinchum*, *Zint*, *Stannum Indicum*. A metal, obtained from calamine and blende. Its colour is bluish-white; lustre of the fresh surface considerable, but soon dulled, from the facility with which it oxidizes; hard; texture striated. S. G. 7.190. Melts at 700° Fah.; burns with a bright flame in a higher temperature, and is volatilized in the form of a white, flocculent oxyd. Its use, in medicine, is in the formation of the following preparations.

ZINC, BUTTER OF, *Zinci chloridum*—*z. Chlo-*

ride of, Zinci chloridum—z. Ferrohydrocyanate of, Zinci cyanuretum—z. Flowers of, Zinci oxydum—z. Iodide of, see Iodine—z. Hydrocyanate of, Zinci cyanuretum—z. Oxyd of, Zinci oxydum—z. Sulphate of, Zinci sulphas.

ZINCHUM, Zincum.

ZINCI CARBONAS IMPURUS, Calamina.

ZINCI CHLORIDUM, *Z. chloruratum*, *Zincum chloratum*, *Z. muriaticum (oxydatum)*, *Chloride* or *Chloruret of Zinc*. Formed by adding oxide of zinc to pure muriatic acid by the aid of gentle heat until no more is dissolved. The solution is then evaporated to dryness, rubbed to powder, and kept in a closely stopped vessel. It is very deliquescent in the air, forming the *Butter of Zinc*, *Butyrum Zinci*.

Chloride of Zinc is a powerful escharotic.

ZINCI CHLORURETUM, *Z. chloridum*.

ZINCI CYANURETUM, *Hydrocyanas Zinci*, *Zincum Cyanogenatum*, *Z. Borussicum*, *Z. Zooticum*, *Hydrocyanate of Zinc*. This salt is formed by adding sulphate of zinc to hydrocyanate of potassa so long as any precipitate is thrown down. When dried and calcined at a low heat, the product is a mixture of cyanuret of zinc and of potassium. It has been recommended in nervous cardialgia. Dose, from one-sixteenth to one-twelfth of a grain.

It is chiefly used as a caustic; one part of the chloride being mixed with 4, 3 or 2 parts of flour, according to the desired strength, and a few drops of water being added to form a paste.

ZINCI FERROHYDROCYANAS, *Cyanuretum Ferrozincicum*, *Zincum Ferrohydrocyanicum*, *Ferrohydrocyanate of Zinc*. Made by the mutual decomposition of boiling hot solutions of sulphate of zinc and ferrocyanate of potassa. It has been recommended in the same cases as the last preparation.

ZINCI HYDROCYANAS, *Zinci cyanuretum*.

ZINCI OXYDUM, *Zincum calcinatum*, *Oxyd of Zinc*, *Flowers of Zinc*, *Nihil album*, *Lana Philosophorum*, *Nihil griseum*, *Pompholyx*. Procured by burning zinc in a long, deep crucible, placed so as to collect the sublimate. It is tonic; antispasmodic; externally, detergent and desiccative. Employed in epilepsy, chorea, &c. For its external use, see Ung. Zinci.

ZINCI OXYDUM IMPURUM, Tutia.

ZINCI SULPHAS, *Sulphate of Zinc*, *Zincum Vitriolatum*, *Vitriolum album*, *White Vitriol*, *V. Goslarieus*, *V. Zinci*, *Sulphas Zincicum*, *Gilla Vitrioli*, *Gilla Theophrasti*, *Sal vomitorium vitrioli*, *Chalcantum album*, *White Copperas*, *Sal Vitrioli*. The sulphate of zinc,—formed by the direct combination of zinc with sulphuric acid,—is inodorous; taste, styptic; it is in white, semi-transparent, efflorescent crystals; soluble in three parts of water at 60°. It is emetic, tonic, antispasmodic, and externally astringent. A nostrum, sold under the name—*Antipertussis*—and, as its title imports, given in whooping-cough, contains this salt as its chief ingredient. It is emetic. Dose, as an emetic, gr. x to ʒss; as a tonic, gr. j to ij. Used externally as a collyrium, gr. j to water ʒj.

ZINCUM BORUSSICUM, *Zinci cyanuretum—z. Calcinatum*, *Zinci oxydum—z. Chloratum*, *Zinci chloridum—z. Cyanogenatum*, *Zinci cyanuretum—z. Ferrohydrocyanicum*, *Zinci*

*ferrohydrocyanas—z. Iodatum*, see Iodine—*z. Muriaticum*, *Zinci chloridum—z. Vitriolatum*. *Zinci sulphas—z. Zooticum*, *Zinci cyanuretum*.

ZINGIBER GERMANICUM, *Arum maculatum—z. Officinale*, *Amomum zingiber*. *ZINCUM*, *Zincum*.

ZINT, *Zincum*.

ZINZIBER, *Amomum zingiber*.

ZIPHAC, *Peritonæum*.

ZIZIPHUM, *Jujube*.

ZINGRYTES, *Zingytes*. A stone, resembling glass, to which the ancients attributed marvellous properties.

ZOANTHROPIA, from ζῷον, 'an animal,' and ἀνθρωπος, 'a man.' A species of monomania, in which the patient believes himself transformed into an animal. Lycanthropia and cynanthropia belong to this species of monomania.

ZOARA, *Insomnia*.

ZOE, *Life*.

ZOMOS, *Consummè*, *Jus*.

ZONA, *Herpes zoster—z. Castitatis*, *Hymen—z. Ignea*, *Herpes zoster*.

ZONA TENDINOUSA, The whitish circle around the auriculo-ventricular orifice of the right side of the heart.

ZONA VIRGINITATIS, *Hymen*.

ZONE, *Cingulum*.

ZONULA HILDANI, *Cingulum Hildani*.

ZOOCHYMY, *Hierology*.

ZOOGENIUM, *Azote*.

ZOOHEMATINE, *Hæmatine*.

ZOOMAGNETISMUS, *Magnetism*, *animal*.

ZOONO'MIA, from ζῷον, 'animal,' and νόμος, 'law.' The laws which govern the organic actions of animals in general. *Animal Physiology*, *Zoophysiology*.

ZOOPHYSIOLOGIA, *Zoonomia*.

ZOOSIS, *Animation*.

ZOOSPERMES, *Spermatozoa*.

ZOOTOMY, from ζῷον, 'an animal,' and τέμνω, 'I cut.' *Theriology*, *Anatomia comparata*, *Comparative Anatomy*. The anatomy of animals.

ZOPYRON, *Fomites*.

ZOSTER, *Herpes zoster*.

ZOSTERA MARINA, *Pila marina*.

ZOZAR, *Saccharum*.

ZUCARO, *Saccharum*.

ZUCHAR, *Saccharum*.

ZUCHARUM, *Saccharum*.

ZUCHRA, *Saccharum*.

ZULAPIUM, *Julep*.

ZYGOMA, *Malæ os*.

ZYGOMATIC, *Zygomaticus*. That which relates to the zygoza or cheek bone.

The ZYGOMATIC PROCESS, *Malar process*, *Jugal process*, arises from the outer surface of the temporal bone, by two roots; one of which is transverse, (*Coudyle du temporal*, Ch.) and the other longitudinal: between them is the glenoid cavity. The process passes forwards, and is articulated with the posterior angle of the os malæ, with which it forms a bony bridge, called the *Zygomatic arch*, (*F. Arcade Zygomaticque*). The cavity, beneath this bridge, is sometimes called *Zygoza*.

The ZYGOMATIC FOSSA is the space, included between the posterior margin of the outer ala of the pterygoid process and the crista, which

descends from the malar tuberosity to the superior alveolar margin.

The ZYGOMATIC MUSCLES are two in number.

1. The *Zygomat'icus major*, *Zygomato-labial*, (Ch.,) *Distort'or Oris*, (F.) *Muscle grand zygomatique*, which is situate obliquely at the fore part and sides of the face. It is a small, rounded muscle; arises from the outer surface of the os malæ, and is inserted at the commissure of the lips, which it raises and draws outwards. It acts principally in laughing.

2. The *Zygomat'icus minor*, *Petit Zygomato-labial*, (Ch.,) (F.) *Petit Zygomatique*, does not always exist. It is situate on the inner side of the last; arises from the outer surface of the os malæ, and is inserted at the corner of the mouth, or rather into the upper lip, which it raises and draws outwards.

The ZYGOMATIC SUTURE is placed between the zygomatic parts of the temporal and cheek

bones; and slants obliquely downwards and backwards.

ZYGOMATIQUE GRAND, *Zygomat'icus major*—z. *Petit*, *Zygomat'icus minor*.

ZYGOMAT'ÏO-LABIAL, *Zygomat'icus major*—z. *Labial*, *petit*, *Zygomat'icus major*—z. *Maxillaire*, *Masseter*—z. *Oriculaire*, *Anterior auris*.

ZYGOPHYLLUM FAGABO, (F.) *Fabagelle*. A Syrian and Mauritanic plant, possessed of an acrid and bitter taste. It has vermifuge properties.

The Arabs believe that the recently expressed juice of the *V. Zygothillum simplex* is capable of removing specks from the cornea.

ZYME, Ferment.

ZYMOMA, Ferment.

ZYMOSIS, Fermentation.

ZYTHOGALA, Posset.

ZYTHOS, *Cerevisia*.

THE END.

# LEA AND BLANCHARD

HAVE PUBLISHED THE THIRD EDITION, BROUGHT UP TO 1841.

## OF NEW REMEDIES.

THE METHOD OF PREPARING AND ADMINISTERING THEM;  
THEIR EFFECTS

UPON THE  
HEALTHY AND DISEASED ECONOMY, &c. &c.

BY ROBLEY DUNGLISON, M. D.

*Professor of the Institutes of Medicine and Materia Medica in Jefferson Medical College of Philadelphia; Attending Physician to the Philadelphia Hospital, &c.*

IN ONE VOLUME OCTAVO.

[Extract from the Preface to the Third Edition.]

"This edition has been subjected to an entire revision, and the author has modified in certain respects the arrangement, and altered the nomenclature so as to cause it to correspond more nearly to that adopted in the Pharmacopœia of the United States."

Dr. Dunglison's work, like that of Mr. Phillips, has gone through several editions within a very short period, which shows the high estimation in which it is held by the profession. His pharmaceutical, toxicological and therapeutic researches are very elaborate and extensive, and prove that he is familiar with all the modern discoveries; whilst his own practical deductions are in general cautious and very judicious. The work contains a complete account of almost every substance that has been recently introduced into practice, some of the articles being very fully described, such as iodine, creosote, &c; it is well adapted for the guidance of those who wish to prescribe agents that they are imperfectly acquainted with; his formulæ are numerous and various, being chiefly derived from those authors who have written respecting the agents described; some very useful remarks are also made upon subjects not generally included in pharmacological works; such as acupuncture, electro-puncture, compression, counter-irritation moxa, Galvanism, catheterism, of the Eustachian tube, &c. The present edition, besides some other improvements, contains an account of several entirely new agents, as iodide of ammonia, iodide of arsenic and mercury, cimicifuga, lactate of iron, protocarbonate of iron, monesia, &c.

We regret that our limits forbid our making any extracts from this work, but we cordially recommend it to the notice of our readers.—*British and Foreign Medical Review for January 1842.*

FOURTH EDITION, IMPROVED WITH ADDITIONS, UP TO 1842,

## OF DUNGLISON'S HUMAN PHYSIOLOGY:

ILLUSTRATED WITH NUMEROUS ENGRAVINGS.  
IN TWO VOLUMES, OCTAVO.

"We are happy to believe that the rapid sale of the last edition of this valuable work may be regarded as an indication of the extended taste for sound physiological knowledge in the American schools; and what we then said of its merits will show that we regarded it as deserving the reception it has experienced. Dr. Dunglison has, we are glad to perceive, anticipated the commendations which we gave in regard to the addition of references, and has thereby not only added very considerably to the value of his work, but has shown an extent of reading which, we confess, we were not prepared by his former number to expect. He has also availed himself of the additional materials supplied by the works that have been published in the interval, especially, those of Müller and others. So that as a collection of details on human physiology alone we do not think that it is surpassed by any work in our language; and we can recommend it to students in this country (England) as containing much with which they will not be likely to meet with elsewhere."—*British and Foreign Medical Review.*

## THE MEDICAL STUDENT;

OR, AIDS TO THE STUDY OF MEDICINE:

Including a Glossary of the Terms of the Science, and of the Mode of Prescribing; Bibliographical Notices of Medical Works; the Regulations of the Different Medical Colleges of the Union, &c.

BY ROBLEY DUNGLISON, M. D. &c. &c.

*In one volume, octavo.*

## ELEMENTS OF HYGIENE:

OR THE INFLUENCE OF ATMOSPHERE AND LOCALITY,

Change of Air and Climate, Seasons, Food, Clothing, Bathing, Sleep, Corporeal and Intellectual Pursuits, &c. on Human Health, Constituting Elements of Hygiene.

BY ROBLEY DUNGLISON, M. D. &c. &c.

*In one volume, octavo.*

JUST PUBLISHED.

# THE PRACTICE OF MEDICINE,

OR

A TREATISE ON SPECIAL PATHOLOGY AND THERAPEUTICS,

BY PROFESSOR DUNGLISON.

IN TWO VOLUMES OCTAVO.

CONTENTS OF BOOK I. FORMING A PART OF VOL. I.

## BOOK I.—DISEASES OF THE ALIMENTARY CANAL.

### CHAPTER I.—DISEASES OF THE MOUTH.

1. *Inflammation of the Mouth.*
- a. Simple Inflammation of the Mouth.
- b. Diphtheritic Inflammation of the Mouth.
  1. Pultaceous Inflammation of the Mouth.
  2. Pseudomembranous Inflammation of the Mouth.
- c. Follicular Inflammation of the Mouth.
- d. Gangrenous Inflammation of the Mouth.
  - SECT. I.—DISEASES OF THE TONGUE.
    - I. *Inflammation of the Tongue.*
    - II. *Cancer of the tongue.*
  - SECT. II.—DISEASES OF THE TEETH.
    - I. *Dentition.*—II. *Toothache.*
- a. Inflammation of the Alveolo-Dental Membrane.
- b. Inflammation of the Dental Membrane.
- c. Caries of the Teeth.
- d. Nervous Toothache.
- e. Exostosis of the Teeth.
- f. Tartar of the Teeth.
- SECT. III.—DISEASES OF THE GUMS.
  - I. *Inflammation of the Gums.*
  - II. *Excrescence of the Gums.*
  - III. *Shrinking of the Gums.*
- SECT. IV.—DISEASES OF THE VELUM PALATI AND UVULA.

### CHAPTER II.—DISEASES OF THE PHARYNX AND ŒSOPHAGUS.

- I. *Inflammation of the Fauces.*
- II. *Inflammation of the Tonsils.*
- III. *Inflammation of the Pharynx.*
- a. Follicular Inflammation of the Pharynx.
- b. Diphtheritic Inflammation of the Pharynx.
- c. Gangrenous Inflammation of the Pharynx.
- IV. *Inflammation of the Œsophagus.*
- V. *Stricture of the Pharynx and Œsophagus.*
- VI. *Cancer of the Pharynx and Œsophagus.*
- VII. *Spasm of the Pharynx and Œsophagus.*
- VIII. *Paralysis of the Pharynx and Œsophagus.*

### CHAPTER III.—DISEASES OF THE STOMACH.

- I. *Inflammation of the Stomach.*
- a. Acute Inflammation of the Stomach.
- b. Chronic Inflammation of the Stomach.
  - II. *Gastorrhœa.*
  - III. *Softening of the Stomach.*
  - IV. *Perforation of the Stomach.*
  - V. *Cancer of the Stomach.*
  - VI. *Hæmorrhage from the Stomach.*
- VII. *Dyspepsia.*
- a. Transient Dyspepsia.
- b. Chronic Dyspepsia.
  - VIII. *Pain in the Stomach.*
- a. Heartburn.
- b. Gastrodynia.
- IX. *Vomiting.*

### CHAPTER IV.—DISEASES OF THE INTESTINES.

- I. *Inflammation of the Intestines.*
- I. Inflammation of the Small Intestines.
  - a. Inflammation of the Peritoneal Coat of the Small Intestines.
  - b. Inflammation of the Mucous Coat of the Small Intestines.
  - c. Exanthematous Inflammation of the Mucous Coat of the Small Intestines.
- II. Inflammation of the Large Intestines.
  - a. Inflammation of the Cæcum.
  - b. Inflammation of the Appendix Vermiformis Cæci.
  - c. Inflammation of the Colon.
    1. Inflammation of the Peritoneal Coat of the Colon.
    2. Inflammation of the Mucous Coat of the Colon.
  - II. *Perforation of the Intestines.*
- III. *Diarrhœa.*
- Adipous Diarrhœa.
  - IV. *Cholera.*
- a. Cholera Morbus.
- b. Cholera Asiatica.
- c. Cholera Infantum.
  - V. *Constipation.*
  - VI. *Obstruction of the Intestines.*
  - VII. *Enteralgia.*
- a. Common colic.
- b. Bilious colic.
- c. Painter's colic.
- VIII. *Tympanites.*
- IX. *Cancer of the Intestines.*
- a. Cancer of the Small Intestine.
- b. Cancer of the Large Intestine.
  - X. *Hæmorrhage into the Intestines.*
  - XI. *Hæmorrhoids.*

WORKS ON  
MEDICINE, SURGERY,  
ANATOMY, MIDWIFERY,  
AND THE COLLATERAL SCIENCES,

PUBLISHED BY  
LEA & BLANCHARD,  
PHILADELPHIA,  
AND FOR SALE BY ALL BOOKSELLERS.

~~~~~  
MIDWIFERY ILLUSTRATED.

THE PRINCIPLES AND PRACTICE OF OBSTETRIC MEDICINE AND SURGERY, IN REFERENCE TO THE PROCESS OF PARTURITION; ILLUSTRATED BY ONE HUNDRED AND FORTY-TWO FIGURES. BY FRANCIS H. RAMSBOTHAM, M.D., Physician to the Royal Maternity Charity, and Lecturer on Midwifery at the London Hospital, &c. Second American edition, revised, in one large octavo volume.

"Among the many literary undertakings with which the Medical press at present teems, there are few that deserve a warmer recommendation at our hands than the work—we might almost say the *obstetrical library*, comprised in a single volume—which is now before us. Few works surpass Dr. Ramsbotham's in beauty and elegance of getting up, and in the abundant and excellent Engravings with which it is illustrated. We heartily wish the Volume the success which it merits, and we have no doubt that before long it will occupy a place in every Medical Library in the kingdom. The Illustrations are admirable; they are the joint production of Bagg and Adlard; and comprise, within the series, the best Obstetrical Plates of our best obstetrical authors, ancient and modern. Many of the Engravings are calculated to fix the eye as much by their excellence of execution and their beauty as works of art, as by their fidelity to nature and anatomical accuracy."—*The Lancet*.

"It is a good and thoroughly Practical Treatise; the different subjects are laid down in a clear and perspicuous form, and whatever is of importance is illustrated by first-rate Engravings. As a work conveying good, sound, practical precepts, and clearly demonstrating the doctrines of Obstetrical Science, we can confidently recommend it either to the Student or Practitioner."—*Edinburgh Journal of Medical Science*.

~~~~~  
DUNGLISON'S PRACTICE OF MEDICINE.

THE PRACTICE OF MEDICINE; OR A TREATISE ON SPECIAL PATHOLOGY AND THERAPEUTICS; BY ROBLEY DUNGLISON, M.D., Professor of the Institutes of Medicine, &c., in the Jefferson Medical College, Philadelphia; Lecturer on Clinical Medicine, and attending Physician at the Philadelphia Hospital, &c.; containing, the Diseases of the Alimentary Canal—the Diseases of the Circulatory Apparatus—Diseases of the Glandular Organs—Diseases of the Organs of the Senses—Diseases of the Respiratory Organs—Diseases of the Glandiform Ganglions—Diseases of the Nervous System—Diseases of the Organs of Reproduction—Diseases involving various Organs, &c., &c. In two volumes, octavo.

The object of this work is to place before the Practitioner and Student a Treatise on the various Diseases of the Human Organism, which shall comprise the Symptoms, Causes, Prognostics and Treatment, in such form as to be easy of reference, and a trustworthy guide in practice. It contains not only the Views of the Author, on all those points, derived from extensive opportunities for observation, but those of the distinguished observers of the day in every part of the world; and treats of a greater number of Diseases than perhaps any other "Practice of Medicine."

~~~~~  
ANATOMY—SPECIAL AND GENERAL.

A TREATISE ON SPECIAL AND GENERAL ANATOMY, BY W. E. HORNER, M. D., Professor of Anatomy in the University of Pennsylvania, &c. &c. Fifth edition, revised and much improved. In two volumes octavo. This work is extensively used as a text-book throughout the Union.

A MEDICAL LIBRARY  
FOR THE PRACTITIONER AND STUDENT.

A SYSTEM OF PRACTICAL MEDICINE, Comprised in a Series of Original Dissertations, arranged and edited by ALEXANDER TWEEDIE, M.D., F.R.S., &c., &c. The whole revised, with Notes and Additions, by W. W. GERHARD, M.D., Lecturer on Clinical Medicine to the University of Pennsylvania. The second American Edition, now complete in Three large Volumes.

The design of this work is to supply the want, generally admitted to exist in the Medical Literature of Great Britain, of a comprehensive System of Medicine, embodying a condensed, yet ample view of the Present State of the Science. The desideratum is more especially felt by the Medical Student, and by many Members of the Profession, who, from their avocations and other circumstances, have not the opportunity of keeping pace with the more recent improvements in the most interesting and useful branch of human knowledge. To supply this deficiency is the object of the LIBRARY OF MEDICINE; and the Editor expresses the hope, that with the assistance with which he has been favoured by contributors, (many of great eminence, and all favourably known to the Public), he has been able to produce a work, which will form a Library of General Reference on Theoretical and Practical Medicine, as well as a Series of Text-books for the Medical Student.

*Advertisement of the American Publishers to their New Edition in Three Volumes.*

The matter embraced in the Three Volumes now presented, was published in London in Five separate volumes, and at intervals republished in this country. The rapid sale of these volumes, embracing as they do, a History of Practical Medicine, is the best evidence of the favour with which it has been received by the Physicians of the United States. Embodying as it does the most recent information on nearly every Disease, and written by men who have specially devoted themselves to the study of the Disorders which form the subject of their Articles, the work is the most valuable for Reference within the reach of a Practitioner. The arrangement of the LIBRARY into Classes of Diseases, grouped according to the cavities of the body, is much more agreeable to the reader than the alphabetical order, and nearly as convenient for reference.

~~~~~  
DISEASES OF CHILDREN.

A TREATISE ON THE PHYSICAL AND MEDICAL TREATMENT OF CHILDREN, BY WILLIAM P. DEWEES, M.D., late Professor of Midwifery in the University of Pennsylvania, &c. &c. The Eighth Edition, brought up to 1843, in 1 vol. 8vo.

This edition embodies the notes and additions prepared by Dr. Dewees before his death, and will be found much improved.

The objects of this work are, 1st, to teach those who have the charge of children, either as parent or guardian, the most approved methods of securing and improving their physical powers. This is attempted by pointing out the duties which the parent or the guardian owes for this purpose, to this interesting but helpless class of beings, and the manner by which their duties shall be fulfilled. And 2d, to render available a long experience to those objects of our affection when they become diseased. In attempting this, the author has avoided as much as possible, "technicality;" and has given, if he does not flatter himself too much, to each disease of which he treats, its appropriate and designating characters, with a fidelity that will prevent any two being confounded together, with the best mode of treating them, that either his own experience or that of others has suggested. Physicians cannot too strongly recommend the use of this book in all families.

~~~~~  
A NEW WORK, — DUNGLISON'S  
THERAPEUTICS AND MATERIA MEDICA.

GENERAL THERAPEUTICS AND MATERIA MEDICA, ADAPTED FOR A MEDICAL TEXT-BOOK, BY ROBLEY DUNGLISON, M.D., Professor of Institutes of Medicine, &c., in 2 vols. 8vo.—*Just ready.*

A second edition of the work on General Therapeutics, being called for by the publishers, the author has deemed it advisable to incorporate with it an account of the different articles of the Materia Medica. To this he has been led by the circumstance, that the departments of General Therapeutics and Materia Medica are always associated in the Medical Schools. The author's great object has been to prepare a work which may aid the Medical Student in acquiring the main results of modern observation and reflection; and, at the same time, be to the Medical Practitioner a trustworthy book of reference.

Throughout, he has adopted the Nomenclature of the last edition of the Pharmacopœia of the United States, a work which ought to be in the hands of every practitioner as a guide in the preparation of medicines; and he has endeavoured to arrange the articles in each division, as nearly as he could, in the order of their efficacy as Therapeutical agents.

~~~~~  
DEWEES' MIDWIFERY.

A COMPENDIOUS SYSTEM OF MIDWIFERY, chiefly designed to facilitate the inquiries of those who may be pursuing this branch of study. Illustrated by occasional cases, with many plates. The tenth edition, with additions and improvements, by W. P. DEWEES, M.D., late Professor of Midwifery in the University of Pennsylvania, in one volume 8vo.

A NEW WORK ON ANATOMY,

WITH ONE HUNDRED AND SEVENTY ILLUSTRATIONS.

A SYSTEM OF HUMAN ANATOMY, GENERAL AND SPECIAL, BY ERASMUS WILSON, M.D., Lecturer on Anatomy, London. The American edition, edited by PAUL B. GODDARD, A.M., M.D., Demonstrator of Anatomy in the University of Pennsylvania, &c.; with one hundred and seventy illustrations on wood, by Gilbert, from designs prepared expressly for this work, by Bagg, printed from the second London edition, in 1 vol. 8vo.—*Just ready.*

"An elegant edition of one of the most useful and accurate Systems of Anatomical Science, which has been issued from the press. The illustrations are really beautiful, and their execution reflects the highest credit on the able American artist who copied them for this edition of the work. In its style the work is extremely concise and intelligible. Dr. Goddard has added a number of valuable notes, and has made some judicious alterations of names. No one can possibly take up this volume without being struck with the great beauty of its mechanical execution, and the clearness of the descriptions which it contains is equally evident. Let Students, by all means, examine the claims of this work on their notice, before they purchase a text-book of the vitally important science which this volume so fully and easily unfolds."—*Lancet.*

HOPE ON THE HEART—WITH PLATES.

A TREATISE ON THE DISEASES OF THE HEART AND GREAT VESSELS, AND ON THE AFFECTIONS WHICH MAY BE MISTAKEN FOR THEM, COMPRISING THE AUTHOR'S VIEW OF THE PHYSIOLOGY OF THE HEART'S ACTION AND SOUNDS, AS DEMONSTRATED BY HIS EXPERIMENTS ON THE MOTIONS AND SOUNDS IN 1830, AND ON THE SOUNDS IN 1834-5, BY J. HOPE, M.D., F.R.S., of St. George's Hospital; formerly Senior Physician to the Marylebone Infirmary; Extraordinary Member, and formerly President, of the Royal Medical Society of Edinburgh, &c. First American from the Third London Edition, with Notes and a detail of recent Experiments, by C. W. PENNOCK, M.D., Attending Physician to the Philadelphia Hospital, Blockley. In 1 vol. 8vo.

"The addition of one-third of new matter to the present volume, and the care with which the whole has been revised and corrected, will, I trust, sufficiently prove my respect for the favourable opinion of my professional brethren, as evinced, not in this country only, but also on the European and American continents, by the sale of no less than six or seven editions and translations in as many years."—*Extract from Preface.*

MEDICAL REMEDIES.

NEW REMEDIES, THE METHOD OF PREPARING AND ADMINISTERING THEM; THEIR EFFECTS UPON THE HEALTH AND DISEASED ECONOMY, &c. &c., BY PROFESSOR ROBLEY DUNGLISON. Fourth edition, brought up to 1843. In one volume octavo.

This work contains articles that have been recently introduced into the *Materia Medica*; or old articles that have received new applications, some of these are in the general works on *Materia Medica*, but their properties are only briefly referred to. In this work, the experience of individuals is extensively given, with reference to the original papers. Under Iodine, for example, all the information—pharmaceutical and therapeutical—up to the time of the publication of the work, is afforded, with the prescriptions that have been proposed by various observers; each successive edition has incorporated with it the result of recent experience, and is therefore "new."

MIDWIFERY WITH CUTS, A LATE WORK.

A SYSTEM OF MIDWIFERY, WITH NUMEROUS WOOD CUTS, BY EDWARD RIGBY, M.D., Physician to the General Lying-in Hospital, Lecturer on Midwifery at St. Bartholomew's Hospital, &c., with notes and additional Illustrations, by an American Practitioner. In one volume.

The late Professor Dewees, into whose hands this volume was placed a few weeks before his death, in returning it, expressed the most favourable opinion of its merits. The judgment of such high authority should commend it to general favour.

DISEASES OF FEMALES.

A TREATISE ON THE DISEASES OF FEMALES, WITH NUMEROUS ENGRAVINGS, BY THE LATE PROFESSOR W. P. DEWEES, in one volume 8vo—the Seventh Edition, revised and corrected.

**DISEASES OF FEMALES, PREGNANCY AND CHILDBED.**

THE PRINCIPAL DISEASES OF FEMALES, TOGETHER WITH THE DISEASES INCIDENT TO PREGNANCY AND CHILDBED, CHIEFLY FOR THE USE OF STUDENTS, BY FLEETWOOD CHURCHILL, M.D., Lecturer on Midwifery and Diseases of Women and Children, in the Richmond Hospital, School of Medicine, &c. &c., with Notes and Additions by R. M. HUSRON, M.D., Professor, &c. in the Jefferson Medical College. Second American Edition, in 1 vol. 8vo.—*Just ready.*

**DUNGLISON'S PHYSIOLOGY—WITH ILLUSTRATIONS.**

HUMAN PHYSIOLOGY, ILLUSTRATED WITH OVER TWO HUNDRED ENGRAVINGS ON WOOD; BY PROFESSOR ROBLEY DUNGLISON; the fourth edition with numerous additions and modifications, in 2 vols. 8vo.

This work is occupied with the functions executed by healthy man. It embraces a general exposition of the functions; the new views entertained in regard to the formation of the tissues; but is especially intended to give an accurate view of the actions of the different organs, as an introduction to the study of pathology, hygiene and therapeutics. It treats moreover, of the anatomy of the organs so far as is necessary for a full understanding of the functions; and is largely illustrated by appropriate engravings. The last edition contains several additional illustrations to elucidate either topics that have been already touched upon in the work, or such as are new. Every effort has been made to place the work, in all respects, on a level with the existing state of the science.

**THE DISEASES OF THE EYE.**

A TREATISE ON THE DISEASES OF THE EYE, BY W. LAWRENCE, Surgeon Extraordinary to the Queen, &c., from the last London Edition, with numerous additions, and sixty-seven Illustrations, many of which are from original drawings. By ISAAC HAYS, M.D., Surgeon to the Wills Hospital, &c., &c., in 1 vol. 8vo.—*Just ready.*

The character of this work is too well established to require a word of commendation—it is justly considered the best on the subject. The present is a reprint of the last London Edition, which appeared in 1841, completely revised and greatly enlarged by the author—and to it considerable additions have been made by the editor. Several subjects omitted in the original are treated of in this edition, on which occasion free use has been made of the work of Mackenzie, to which is added the editor's own experience, derived from many years' attention to the subject.

**THE URINARY ORGANS, &c.**

LECTURES ON THE DISEASES OF THE URINARY ORGANS, BY SIR B. C. BRODIE, BART. F.R.S. From the Third London Edition, with alterations and additions, a small 8vo. volume.—*Now ready.*

The work has throughout been entirely revised, some of the author's views have been modified, and a considerable proportion of new matter has been added, among which is a Lecture on the Operation of Lithotomy.

**RICORD ON VENEREAL.**

A PRACTICAL TREATISE ON VENEREAL DISEASES; OR, CRITICAL AND EXPERIMENTAL RESEARCHES ON INOCULATION, APPLIED TO THE STUDY OF THESE AFFECTIONS; WITH A THERAPEUTICAL SUMMARY AND SPECIAL FORMULARY, BY PH. RICORD, M.D., Surgeon of the Venereal Hospital of Paris, Clinical Professor of Special Pathology, &c. Translated from the French, by Henry Pilkington Drummond, M.D., in one volume.—*Now ready.*

**LAWRENCE ON RUPTURES.**

A TREATISE ON RUPTURES, BY W. LAWRENCE, F.R.S., Author of a Treatise on the Diseases of the Eye, &c. &c., from the Fifth London Edition, considerably enlarged. In 1 vol. 8vo.—*Now ready.*

The peculiar advantage of the treatise of Mr. Lawrence is, that he explains his views on the anatomy of hernia, and the different varieties of the disease, in a manner which renders his book peculiarly useful to the student. It must be superfluous to express our opinion of its value to the surgical practitioner. As a treatise on hernia, presenting a complete view of the literature of the subject, it stands in the first rank.—*Edinburgh Medical and Surgical Journal.*

MEDICAL LEXICON, BROUGHT UP TO 1842.

A NEW DICTIONARY OF MEDICAL SCIENCE; Containing a concise account of the various Subjects and Terms, with the French and other Synonymes, and Formulæ for various Official and Empirical Preparations, &c. Third Edition, brought up to 1842. BY ROBLEY DUNGLISON, M.D., Professor in the Jefferson Medical College, &c. In One Volume, royal 8vo.

"The present undertaking was suggested by the frequent complaints, made by the author's pupils, that they were unable to meet with information on numerous topics of Professional Inquiry,—especially of recent introduction,—in the medical dictionaries accessible to them.

"It may, indeed, be correctly affirmed, that we have no dictionary of medical subjects and terms which can be looked upon as adapted to the state of the science. In proof of this the author need but to remark, that he has found occasion to add several thousand Medical Terms, which are not to be met with in the only medical lexicon at this time in circulation in this country.

"The present edition will be found to contain many hundred Terms more than the first, and to have experienced numerous Additions and Modifications.

"The author's object has not been to make the work a mere lexicon or dictionary of terms, but to afford, under each, a condensed view of its various medical relations, and thus to render the work an epitome of the existing condition of Medical Science."

"This New Edition includes, in the body of the work, the Index or Vocabulary of Synonymes that was in the former Editions printed at the end of the Volume, and embraces many Corrections, with the addition of many New Words.

PEREIRA'S MATERIA MEDICA,

EDITED BY DR. CARSON, WITH NEAR THREE HUNDRED ENGRAVINGS ON WOOD.

ELEMENTS OF MATERIA MEDICA AND THERAPEUTICS; COMPREHENDING THE NATURAL HISTORY, PREPARATION, PROPERTIES, COMPOSITION, EFFECTS, AND USES OF MEDICINES, BY JONATHAN PEREIRA, M.D., F.R.S., Assistant Physician to the London Hospital, &c.

Part I, contains the General Action and Classification of Medicines, and the Mineral Materia Medica. Part II, the Vegetable and Animal Kingdoms, and including diagrams explanatory of the Processes of the Pharmacopœias, a Tabular view of the History of the Materia Medica, from the earliest times to the present day, and a very copious index. From the Second London Edition, which has been thoroughly revised, with the Introduction of the Processes of the New Edinburgh Pharmacopœia, and containing additional articles on Mental Remedies, Light, Heat, Cold, Electricity, Magnetism, Exercise, Dietetics, and Climate, and many additional Wood Cuts, illustrative of Pharmaceutical Operations, Crystallography, Shape and Organization of the Fœculus of Commerce, and the Natural History of the Materia Medica. The object of the author has been to supply the Medical Student with a Class Book on Materia Medica, containing a faithful outline of this Department of Medicine, which should embrace a concise account of the most important modern discoveries in Natural History, Chemistry, Physiology, and Therapeutics in so far as they pertain to Pharmacology, and treat the subjects in the order of their natural historical relations.

"This great *Library or Cyclopaedia of Materia Medica* has been fully revised, the errors corrected, and numerous additions made, by DR. JOSEPH CARSON, Professor of Materia Medica and Pharmacy in the "College of Pharmacy," and forms Two Volumes, octavo, of near 1600 large and closely-printed pages; and it may be fully relied upon as a permanent and standard work for the country,—embodying, as it does, full references to the U. S. Pharmacopœia and an account of the Medicinal Plants indigenous to the United States.

PRINCIPLES AND PRACTICE OF SURGERY, WITH CUTS.

THE PRINCIPLES AND PRACTICE OF MODERN SURGERY, BY ROBERT DRUITT. From the Second London Edition, illustrated with fifty wood engravings, with notes and comments by JOSHUA B. FLINT, M.D., in one volume 8vo., at a low price.

EXTRACT FROM THE AUTHOR'S PREFACE.

"The arrangement of a work of this kind ought not, as I conceive, to be regarded as a matter of mere indifference, or at most of convenience, but it ought to embody in it something of a principle; and I believe that the arrangement of this work may be useful to the student, by showing him in what order he may best prosecute his researches into the principles of his profession.

"Of the five parts into which it is divided, the first two are more especially devoted to the principles, and the three others to the practice of surgery. The first part treats of the disturbances of the constitution at large, that may be produced by injury or disease of a part; beginning with the simple faintness or collapse that follows a blow, and proceeding to consider the varieties of fever and tetanus.

"The second part describes what may be called the elements of local disease; that is to say, those morbid changes of structure or function, which are produced either immediately by external causes, or secondarily, through some deviation from health, &c.

"The third part treats of the various kinds of injuries, beginning with the simplest mechanical injuries; then proceeding to the effects of chemical agents, and lastly, considering the effects of animal poisons, &c.

"The fourth part considers the various tissues, organs, and regions of the body in order, and describes the various accidents they are liable to, &c.

"The fifth part describes such of the operations as were not included in the former parts, &c.

"To the whole is appended a collection of formulæ, the number of which is very much increased in this edition."

FEVERS OF THE UNITED STATES.

THE HISTORY, DIAGNOSIS AND TREATMENT OF TYPHOID AND TYPHUS FEVER, WITH AN ESSAY ON THE DIAGNOSIS OF BILIOUS REMITTENT AND OF YELLOW FEVER, BY ELISHA BARTLETT, M.D., Professor of the Theory and Practice of Medicine in the Transylvania University. In one volume 8vo; a new work.

Notice has already been given of the appearance of this work: we have become satisfied of its sterling value, and, therefore, without hesitation, feel justified in again recommending it to the immediate notice of practitioners.—*Boston Medical and Surgical Journal.*

MÜLLER'S PHYSIOLOGY.

ELEMENTS OF PHYSIOLOGY; BY J. MÜLLER, M.D., Professor of Anatomy and Physiology in the University of Berlin, &c. Translated from the German by WILLIAM BALY, M.D., Graduate in Medicine of the University of Berlin. Arranged from the Second London Edition by JOHN BELL, M.D., Lecturer on Materia Medica and Therapeutics, &c., &c. In One Volume, 8vo.—*Just ready.*

In arranging the Volume now offered to American readers, from the materials furnished in MÜLLER'S ELEMENTS OF PHYSIOLOGY, the Editor has endeavoured to procure reduction in size, of this latter, without any abstraction of its vitality and mind. With this view he has omitted, for the most part, mere disquisitions, many details of experiments, matters of physics and natural philosophy, including mechanics under the head of locomotion, acoustics and the theories of music under voice and hearing, and of optics under vision,—much of the minutiae of comparative physiology, and metaphysics or metaphysico-physiology. But, while excluding details on collateral topics, the Editor has been particularly careful to preserve Physiology Proper, which, resting on the basis of Histogeny and General Anatomy, derives important aid from Organic Chemistry and Microscopical Observations, and in its turn serves to illustrate Hygiene, Pathology and Therapeutics. Thus aided and thus applied, in the manner exhibited by Müller himself, Physiology will invite the attention of the Student in these pages.

It will soon be discovered that, although this volume is an abridgement of the large work of Müller, it may rightfully claim to be considered a complete system of Physiology, exceeding in copiousness and comprehensive details, any other work on the same subject which has yet emanated from the London press.

ELEMENTS OF PHYSICS—WITH WOOD-CUTS.

ELEMENTS OF PHYSICS, OR NATURAL PHILOSOPHY, GENERAL AND MEDICAL. A New Edition, complete in One Volume, written for universal use, in plain and non-technical language, and containing New Disquisitions and Practical Suggestions; comprised in Five Parts: 1. Somatology, Statics and Dynamics. 2. Mechanics. 3. Pneumatics, Hydraulics and Acoustics. 4. Heat and Light. 5. Animal and Medical Physics. By NEIL ARNOTT, M.D., of the Royal College of Physicians. A New Edition, revised and corrected from the last English Edition; with additions by ISAAC HAYS, M.D., and numerous Wood-cuts.

PRACTICAL MINERALOGY AND GEOLOGY—WITH CUTS.

A TEXT-BOOK OF GEOLOGY AND MINERALOGY, WITH INSTRUCTIONS FOR THE QUALITATIVE ANALYSIS OF MINERALS. BY JOSHUA TRIMMER, F.G.S., with Two Hundred and Twelve Wood-cuts. A handsome Octavo Volume, bound in embossed cloth.

This is a Systematic Introduction to Mineralogy and Geology, admirably calculated to instruct the Student in those sciences. The Organic Remains of the various Formations are well illustrated by numerous Figures, which are drawn with great accuracy.

ELLIS'S MEDICAL FORMULARY IMPROVED.

THE MEDICAL FORMULARY OF DR. ELLIS; being a COLLECTION OF PRESCRIPTIONS, derived from the Writings and Practice of many of the most eminent Physicians in America and Europe. To which is added an Appendix, containing the usual Dietetic Preparations and Antidotes for Poisons; the whole accompanied with a few brief Pharmaceutical and Medical Observations. By BENJAMIN ELLIS, M.D. The Sixth Edition, completely revised, with many Additions and Modifications, and brought up to the present improved state of the Science; by SAMUEL GEORGE MORTON, M.D., Professor in the Pennsylvania College of Medicine, &c., &c. In One Octavo Volume.

PRINCIPLES OF MEDICINE.

THE FIRST PRINCIPLES OF MEDICINE, BY ARCHIBALD BILLING, M.D., A.M., Member of the Senate of the University of London, Fellow of the Royal College of Physicians, &c., &c. In One Volume, 8vo. First American from the Fourth London Edition.

"We know of no book which contains within the same space so much valuable information, the result not of fanciful theory, nor of idle hypothesis, but of close, persevering Clinical Observation, accompanied with much soundness of judgment, and extraordinary clinical tact."—*Medico-Chirurgical Review*.

A TREATISE ON FEVER. By Southwood Smith, M.D., Physician to the London Fever Hospital, fourth American edition. In one volume octavo.

COATES'S POPULAR MEDICINE, OR FAMILY ADVISER, consisting of Outlines of Anatomy, Physiology, and Hygiene, with such Hints on the Practice of Physic, Surgery, and the Diseases of Women and Children, as may prove useful in families when regular Physicians cannot be procured: being a Companion and Guide for intelligent Principals of Manufactories, Plantations, and Boarding Schools; Heads of Families, Masters of Vessels, Missionaries, or Travellers; and a useful Sketch for Young men about commencing the Study of Medicine. By Reynell Coates, M.D.

This work is designed to supply the place of Ewells' Medical Companion, which is now entirely out of print.

OUTLINES OF A COURSE OF LECTURES ON MEDICAL JURISPRUDENCE. By Thomas Stewart Traill, M.D., with notes and additions. A small volume.

A PRACTICAL TREATISE ON MEDICAL JURISPRUDENCE, with so much of Anatomy, Physiology, Pathology, and the Practice of Medicine and Surgery, as are Essential to be known by Members of the Bar and Private Gentlemen; and all the Laws relating to Medical Practitioners; with Explanatory Plates. By J. Chitty, Esq., second American edition, with notes and additions adapted to American Works and Judicial Decisions. In One Volume Octavo.

A TREATISE ON PULMONARY CONSUMPTION, comprehending an Inquiry into the Nature, Causes, Prevention and Treatment of Tuberculous and Scrofulous Diseases in General. By James Clark, M.D., F.R.S.

A PRACTICAL TREATISE ON THE HUMAN TEETH, showing the causes of their destruction and the means of their preservation, by William Robertson. With plates. First American from the second London Edition. In one volume octavo.

ANATOMY, PHYSIOLOGY, AND DISEASES OF THE TEETH. By Thomas Bell, F.R.S., F.L.S., &c. Third American edition. In one volume octavo, with numerous plates.

DISSERTATIONS ON NERVOUS DISEASES. By Drs. James Hope, J. C. Prichard, John Hughes Bennett, Robert H. Taylor and Theophilus Thomson. In one volume octavo.

DISSERTATIONS ON DISEASES OF THE ORGANS OF RESPIRATION. By Drs. Williams, Theophilus Thomson, W. B. Carpenter, and W. Bruce Joy. In one volume octavo.

DISSERTATIONS ON FEVERS, GENERAL PATHOLOGY, INFLAMMATION, AND DISEASES OF THE SKIN. By Drs. Symonds, Allison, Christison, &c. &c. In one volume octavo.

DISSERTATIONS ON DISEASES OF THE DIGESTIVE, URINARY AND UTERINE ORGANS. By Drs. Joy, Symonds, Thomson, Ferguson, &c. &c. In one volume octavo.

DISSERTATIONS ON HÆMORRHAGES, DROPSY, RHEUMATISM, GOUT, SCROFULA, &c. &c. By Drs. Burrows, Watson, Shapter, Joy, &c. &c. In one volume octavo.

The above five volumes are from the Library of Practical Medicine, edited by Dr. Tweedie, with notes by Dr. Gerhard. Each volume is complete within itself, and is for sale separately.

THE MEDICAL STUDENT; OR AIDS TO THE STUDY OF MEDICINE. Including a Glossary of the Terms of the Science, and of the Mode of Prescribing; Bibliographical Notices of Medical Works; the Regulations of the different Medical Colleges of the Union, &c. By Robley Dunglison, M.D., &c. &c. In one vol. 8vo.

LEA & BLANCHARD'S PUBLICATIONS.

ESSAYS ON ASTHMA, APHTHÆ, ASPHYXIA, APOPLEXY, ARSENIC, ATROPA, AIR, ABORTION, ANGINA PECTORIS, and other subjects, embraced in the Articles from A to Azote, prepared for the Cyclopædia of Practical Medicine by Dr. Chapman and others. Each article is complete within itself, and embraces the practical experience of its author, and as they are only to be had in this collection, will be found of great value to the profession. The two volumes are now offered at a price so low, as to place them within the reach of every practitioner and student.

OUTLINES OF PHYSIOLOGY; with an Appendix on Phrenology. By P. M. Roget, M.D., Professor of Physiology in the Royal Institute of Great Britain, &c. First American edition revised, with numerous Notes. In one volume octavo.

GEOLOGY AND MINERALOGY, considered with reference to Natural Theology. By the Rev. William Buckland, D.D., Canon of Christ Church, and Reader in Geology and Mineralogy in the University of Oxford. With nearly one hundred copper-plates and large coloured maps. A new edition from the late London edition, with supplementary notes and additional plates.

THE BRIDGEWATER TREATISES, complete in seven volumes octavo, embracing:

- I. The Adaptation of External Nature to the Moral and Intellectual Constitution of Man. By the Rev. Thomas Chalmers.
  - II. The Adaptation of External Nature to the Physical Condition of Man. By John Kidd, M.D.F.R.S.
  - III. Astronomy and General Physics, considered with reference to Natural Theology. By the Rev. William Whewell.
  - IV. The Hand; its Mechanism and vital Endowments as evincing Design. By Sir Charles Bell, K.H., F.R.S. With numerous wood-cuts.
  - V. Chemistry, Meteorology, and the Function of Digestion. By William Prout, M.D.F.R.S.
  - VI. The History, Habits, and Instincts of Animals. By the Rev. William Kirby, M.A.F.R.S. Illustrated by numerous engravings on copper.
  - VII. Animal and Vegetable Physiology, considered with reference to Natural Theology. By Peter Mark Roget, M.D. Illustrated with nearly five hundred wood-cuts.
  - VIII. Geology and Mineralogy, considered with reference to Natural Theology. By the Rev. William Buckland, D.D. With numerous engravings on copper, and a large coloured map.
- The works of Buckland, Kirby and Roget, may be had separate.

A POPULAR TREATISE ON VEGETABLE PHYSIOLOGY, by W. P. Carpenter, Author of Principles of Human Physiology, &c., published under the auspices of the Society for the Promotion of Popular Instruction. With numerous wood-cuts, in one volume 12mo.

A POPULAR TREATISE ON AGRICULTURAL CHEMISTRY; intended for the use of the practical farmer, by Charles Squarry, Chemist. In one vol. 12mo.

ROGET'S ANIMAL AND VEGETABLE PHYSIOLOGY, with nearly five hundred wood-cuts, in two volumes, second American edition.

THE HISTORY, HABITS, AND INSTINCTS OF ANIMALS, by the Rev. William Kirby, M.A.F.R.S. Illustrated by numerous copperplate engravings.

The Ninth Bridgewater Treatise. A FRAGMENT, by Charles Babbage, Esq. From the second London edition. In one volume octavo.

A PRACTICE OF PHYSIC. Comprising most of the diseases not treated of in Diseases of Females and Diseases of Children, second edition. By W. P. Dewees, M.D., formerly Adjunct Professor in the University of Pennsylvania. In one vol. 8vo.

ELEMENTS OF HYGIENE; on the Influence of Atmosphere and Locality; Change of Air and Climate, Seasons, Food, Clothing, Bathing, Sleep, Corporeal and Intellectual Pursuits, &c., on Human Health, constituting Elements of Hygiene. By Robley Dunglison, M.D. In one volume 8vo.

ABERCROMBIE ON THE STOMACH. Pathological and Practical Researches on Diseases of the Stomach, the Intestinal Canal, the Liver, and other Viscera of the Abdomen. By John Abercrombie, M.D. Third American, from the second London edition, enlarged. In one volume 8vo.

~~~~~  
DISEASES OF THE SKIN.

A NEW WORK.

A PRACTICAL AND THEORETICAL TREATISE ON THE DIAGNOSIS, PATHOLOGY, AND TREATMENT OF DISEASES OF THE SKIN, arranged according to a Natural System of Classification, and preceded by an Outline of the Anatomy and Physiology of the Skin. By Erasmus Wilson, M.D., author of a System of Human Anatomy, &c., in 1 vol. 8vo.
