MEMORANDUM FOR: Executive, Advisory and Control Group

SUBJECT: Study of Camp Capacities

1. The enclosed study on camp capacities and available space for possible expansion of the NPRJ is based on the following:

a. The authorized strength, current strength, camp capacity and spaces presently available in all camps currently occupied by NPRJ.

b. The capacity and time of completion of all camps currently under construction for occupancy by NPRJ.

c. The maximum capacity, estimated time to rehabilitate and estimated cost of possible camp facilities submitted by the Civil Affairs Regions as possible facilities for occupancy by NPRJ.

d. A recapitulation of the above showing maximum capacity at present, maximum capacity as of 1 November 1951 and the estimated maximum capacity 60 and 90 days from the time instructions may be received to acquire additional camps.

2. The maximum capacity possible at present and as of 1 November 1951 are based on current capacities and camp facilities available by 1 November 1951.

3. The forecasts of possible maximum capacity within 60 and 90 days after notification to acquire new camps are based on estimates submitted by the Civil Affairs Regions in the past and therefore are subject to changes in capacity or estimated cost.

4. The maximum capacities of camps currently occupied by NPRJ are based on maximum strength assigned the camp in the past, or a capacity developed by Operations Division, GGHQ, and do not take into consideration the present Logistics Division, or Medical Division planned construction standard to provide barracks space of 2.2 tsubos per individual.

5. A study on the basis of Par 4 above will be completed as of 15 September 1951.
