Tokyo Regional Economic Investigation Agency

14 August 1950

TO: Mr Jones, Economic Section, Kanto Civil Affairs Region

FROM: Mr Otsu, Chief of Tokyo Regional Economic Investigation Agency

SUBJECT: Report on the Investigation of the Distribution of Staple Food in Tokobayashi-mura, Saitama Prefecture

1. Delayed distribution.

a. Content of the petition. The consumers of the Tokobayashi-mura, Kita-Saitama-Gun, is suffering from tremendous inconveniences because of the delay of distribution of staple food ranging more than ten days, while the distribution in the neighboring villages is smoothly made.

b. The result of the investigation. It is true that the distribution of staple foods in the village is conspicuously delayed as compared with other neighboring villages. But it was noticed in other towns and villages too that the distribution was delayed for two or three days. The delayed distribution is broken down as follows:

As of 16 January	5 days delay
" " 26 January	4 " "
" " 14 March	3 " "
" " 20 March	3 " "
" " 13 April	2 " "
" " 21 April	3 " "
" " 11 May	10 " "
" " 20 May	7 " "
" " 28 May	8 " "
" " 14 June	10 " "
" " 28 June	7 " "

The cause of delay. (Firstly, to prevent the refusal of distribution). The consumers of the village do not like the separate distribution of pressed barley or dried noodles. Therefore, the private distribution agency tried to decrease the refusal of distribution as much as possible by distributing them together with rice, though it caused the delay of distribution as a whole.

Secondly, the comparatively rich stock of staple foods other than rice and the poor stock of rice. The shipment of rice to the private distribution agencies is apt to be delayed. It usually is made just a day before or sometimes two or three days after the scheduled distribution date. It necessarily causes the delay of the distribution.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

The details of the distribution for May and June are as follows:

MAY

Items	Volume of Ration	Date Received	Date Distributed	No of Days of Delay
Non-glutinous rice	8 days	9 May	11 May	10 days delay as of 10 May
Pressed barley	3 days	11 May	11 May	10 days delay as of 10 May
Dried noodles	5 days	16 May	20 May	
Non-glutinous rice	9 days	24 May	28 May	8 days delay as of 23 May
Wheat flour	6 days	24 May	28 May	8 days delay as of 23 May
Dried noodles	3 days	27 May	28 May	8 days delay as of 23 May

The private distribution agency is not to blame for the ten days delay of distribution as of 10 May, because it requires three days to polish rice. The wheat flour received on 24 May could shorten the delay by four days by distributing it instantly after the receipt, but it was distributed together with rice in order to prevent the refusal.

JUNE

Items	Volume of Ration	Date Received	Date Distributed	No of Days of Delay
Non-glutinous rice	10 days	6 June	15 June	10 days delay as of 14 June
Wheat flour	3 days	2 June	15 June	10 days delay as of 14 June
Dried noodles	3½ days	17 June	17 June	
Non-glutinous rice	7 days	22 June	29 June	7 days delay as of 28 June
Pressed barley	1½ days	22 June	29 June	7 days delay as of 28 June

The same can be mentioned as May.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

c. Action taken. Much room is left for improvement, as for the management of the distribution agency and Foodstuff Public Corporation (Kodan), from the standpoint that several days were required to receive and distribute the rations. Thereupon, a stern warning was given to the Kodan, and at the same time a strict vigilance is kept on the private distribution agency to see to it that the responsible people of the agency will discontinue further delay.

2. The poor quality of pressed barley and wheat flour.

a. Content of the letter. The quality of the pressed barley and wheat flour is of tremendously coarse quality as compared with those of other villages.

b. Result of the investigation. It can not be concluded that the wheat flour and pressed barley in the village only are of poor quality as compared with those of other villages, because they are made by the same factory (Hanyu Seibaku Kojo).

c. Action taken. Result of the survey on the voice of consumers shows that a considerable part of them complain of the poor quality of the pressed barley. Thereupon, a request was made to the Food Agency in charge of the distribution of the item to conduct a more strict inspection on the distribution.

3. Embezzlement.

a. Content of the letter. The keeper of the flour mill of the village is colluding with the official of the village office in illegally disposing the surplus of processing and spending the money thus illegally made for entertainment.

b. Result of the investigation. No facts could be traced to prove the embezzlement. The distribution of staple food in the village is made through the private distribution agency for the Kodan (the person managing the agency is Mr Abe). Therefore, there is no direct connection between the village office and the flour mill, and no facts were acknowledged to verify the content of the letter. In addition to the said flour mill, the village has one more flour mill designated by the Central Government. But the products of the mill have never been distributed in the village since April this year.

4. Conclusion. The above mentioned investigation was conducted by a group of five economic investigators headed by Yanagisawa, Chief of the Food Section of Saitama Local E B with the cooperation of two policemen. As the result of the investigation shows, there is no evidence of illegal conduct except for some points needing improvement as above mentioned.

5 June 1950

To : KCAR

From: Consumers interested, Tekobayashi-mura, Kitasaitama-gun, Saitama Pref.

Subject: Delay in distribution of staple food. Anonymous letter

In our village, rationing of staple food is delayed by 5-10 days every month since the beginning of last year, while it is punctually carried out in the adjacent towns and villages. Whenever we complain of the delay the distribution center or the village office always will reply that no instructions for distribution are given yet by the prefectural authorities. Wheat refinery and village office clerks are embezzling on the average 16 bales of surplus wheat caused each time when the wheat for one distribution is refined. We request you to make your staff inspect strictly books and goods in the distribution center.

Non-glutinous rice	7	22	29	} 7 days delay as of June 28
Pressed barley	1 1/2	22	29	

The same can be mentioned as May.

c Action taken

Much room is left for improvement, as for the management of the ~~agency~~ distribution agency and Foodstuff Public Corporation (Kodan), from the standpoint that several days were required to receive and distribute the rations. Thereupon, a stern warning was given to the Kodan, and at the same time a strict vigilance is kept on the private distribution agency to see to

it that the responsible people of the agency will discontinue further delay.

2. The poor quality of pressed barley and wheat flour.

a. content of the letter.

The quality of the pressed barley and wheat flour is of tremendously coarse quality as compared with those of other villages.

b. Result of the investigation

It can not be concluded that the wheat flour and pressed barley in the village ~~—~~ only are of poor quality as compared with those of other villages, because they are made by the same factory (Nanyu Seibaku Kōjō)

c. action taken

Result of the survey on the voice of consumers shows that a considerable part of them complain of the poor quality of the pressed barley. Thereupon, a request was made to the Food agency in charge of the distribution of the item to conduct a more

quality as compared with those of other villages, because they are made by the same factory (Hanyu Seibaku Kōjō)

c. Action taken

Result of the survey on the voice of consumers shows that a considerable part of them complains of the poor quality of the pressed barley. Thereupon, a request was made to the Food agency in charge of the distribution of the item to conduct a more strict inspection on the distribution.

3. Embezzlement

a. Content of the letter.

The keeper of the flour mill of the village is colluding with the official of the village office in illegally disposing the surplus of processing and spending the money thus illegally made for entertainment.

b. Result of the investigation.

No facts could be traced to prove ~~that she~~ the embezzlement.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 77501/3

(5)

The distribution of staple food in the village is made through the private distribution agency for the Kodan (the person ~~who that~~ managing the agency is Mr. Abe). Therefore, there is no direct connection between the village office and the flour mill, and no facts were acknowledged to verify the content of the letter.

~~Incidentally, there is a~~ In addition to the said flour mill, the village has one more flour mill designated by the Central Government. But ~~the~~ ~~products~~ the products of the mill have never been distributed in the village since April this year

4. Conclusion

The above-mentioned ~~results of the~~ investigation was conducted by a group of 5 economic investigators headed by Yanagisawa, chief of the Food Section of Saitama Local E B. with the cooperation of two police-men. As the result of the investigation shows, there is

4 Conclusion

The above-mentioned ~~result of the~~ investigation was conducted by a group of 15 economic investigators headed by Yanagisawa, chief of the Food Section of Saitama Local E B. with the cooperation of two police-men. As the result of the investigation shows, there is no evidence of illegal conduct except for some points needing improvement as ~~as~~ above mentioned
