NOTE: We cannot ship seed flats. They are sold only for pick-up.

## READ BEFORE ORDERING

TELEPHONE: Pittsville, Md. 301-835-2101 day or night.
BUSINESS HOURS. We are open from 7:30 a.m. to to 4:00 p.m. Monday through Friday, except during the spring digging season when we are open from 7:00 a.m. to $5: 30$ p.m. Orders already dug may be picked up Saturday morning. Also open on Saturday by appointment. Not open on Sunday.
ORDER IN ADVANCE. To be sure of getting your plants at the desired time, please place your order well in advance.

ZIP. When ordering, please give us your ZIP code No.
"LINING-OUT stock" explained. Many plants in this price list are marked with an asterisk (*) and classed as lining out stock. This means that the plants, of the size so marked, are not generally considered large enough for landscaping. Rather, they should be lined out in rows, or grown in beds or cold frames where they can be protected, until they are large enough for landscaping.
"POTTED plants" explained. When we list potted plants, the size listed is the size of the pot, not the size of the plant. Hence, "4 inch pot plants" means the plant is growing in a 4 inch pot. Note: when we sell the plant, we remove the pot and wrap the plant as dictated by its size and root development.
PRICES. Prices quoted here are f. o. b. this nursery and are for "field average" plants. If the customer selects extra specimen material, an additional charge will be made.
PACKING. There is no charge for packing orders that are picked up at the nursery. When an order is to be shipped, please add $10 \%$ of the cost of the plants for packing. Minimum packing charge 50 cents.
SHIPPING. We can ship by parcel post, parcel post special handling, air freight, United Parcel Service, motor freight, and bus (Trailways and Greyhound). Due to the varied weights and sizes of our plants, it is impractical to state a fixed percentage as a shipping charge. So we will ship "charges collect." If you prefer to send an estimated amount, with your order, for postage or UPS, and if it is sufficient, such order will be sent postpaid. Any overpayment that you send us will be refunded. NOTE: REA will not accept a collect shipment. If you desire REA shipment, we will help you determine shipping costs.

TERMS. Orders that are to be shipped must be accompanied by remittance in full. Orders to be picked up here must be accompanied by $25 \%$ deposit with the understanding that if you cancel your order after we have dug the plants, the deposit is forfeited as payment to us for digging and replanting.

## READ BEFORE ORDERING (cont.)

PICK-UP ORDERS. If you want to pick up your plants here, please place your order in advance so that we can have it ready for you.

MAXIMUM SHIPPING SIZE. Due to the costs of packing and shipping, we do not ordinarily ship plants that are more than 6 feet tall. If the customer specifically authorizes it, we will in appropriate cases, prune a large plant back to proper shipping size.

CLAIMS AND GUARANTEE. Claims for shortages, errors, or any cause, must be made within 5 days after receipt of shipment. In no case are we liable for more than the invoice price of the plant. We guarantee to ship good, healthy stock but we do not assume any risk or responsibility for transportation, growth, or life of the plants after they leave this nursery. If your plants are damaged or excessively delayed in transit, make this notation on the carrier's delivery receipt and file a claim against the carrier immediately. Please note that our responsibility for delivery of your plants ends upon our delivering them to the carrier.

## PRICE SCHEDULE FOR BALLING AND BUR-

 LAPPING. In case of those plants specifically listed $B \& B$, the prices in this catalog include the cost of balling and burlapping. Others are shown at bare root prices. A general guide for the additional charge of balling and burlapping follows:| Height of Plant |  | Charge |
| :--- | :--- | :---: |
| $21 / 2$ | to 3 ft. | $\$ 2.00$ |
| 3 | to $4 \mathrm{ft}$. | 2.50 |
| 4 | to 5 ft. | 3.50 |
| 5 | to $6 \mathrm{ft}$. | 4.50 |

These charges may vary depending upon the variety of plant involved.

PLANTS NOT LISTED HERE. We have many plants which are not listed in the catalog because they are too large to ship, or because we have them in too small quantity. The large ones, in many cases, would be of particular value to landscapers. We welcome your inquiry for materials to meet your specific needs.

TIME OF SHIPMENT. We can ship throughout the year except during extreme winter weather.

CONDITIONS OF SALE. All orders are accepted on the condition that they shall be void if our plants are subjected to conditions beyond our control.

TINGLE NURSERY, PITTSVILLE, MD. 21850

## CATALOG ARRANGEMENT

This catalog is arranged in three sections. The first is azaleas by family grouping. The second section is our ornamental stock which is listed alphabetically by botanical name. The third section is devoted to strawberry plants and miscellaneous items. For the benefit of customers who know plants by their common names, a cross reference from common to botanical name follows:

## COMMON NAME

## EXPLANATION OF PLANT

## DESCRIPTION TERMS

Immediately following the names of many of our plants we have entered descriptive terms in abbreviated form. An explanation of those abbreviations follows:
$\mathrm{D}=$ deciduous
$\mathrm{E}=$ evergreen
$\mathrm{GC}=$ ground cover
$\mathrm{S}=$ shrub
$\mathrm{S} / \mathrm{T}=$ large shrub or small tree
$\mathrm{SE}=$ semi evergreen
trans $=$ transplant
Hence D T = deciduous tree
S E S = semi-evergreen shrub
$\mathrm{B} \& \mathrm{~B}=$ balled and burlapped

## Hardiness Data

The zone number, given in the description of many of our ornamental plants, refers to the zones depicted on U. S. Dept. of Agriculture Plant Hardiness Zone Map on page 7.

## HARDINESS ZONE MAP

The zone number which we give is the northernmost zone in which we believe the plant to be hardy under average winter conditions. It should be noted that a plant's ability to survive the winter is not determinded solely by the minimum temperature to which the plant is exposed but is also affected by the plant's general health, the soil moisture content, and the exposure to scalding sun and wind. Our assignment of a particular zone number to a plant should not be construed as a guarantee that the plant will survive in that zone. We can make no warranty, expressed or implied, as to the ability of any plant to survive after it has left this nursery.

## AZALEAS

Sizes of azaleas are as follows: 3 in. pot plants are rooted cuttings that have been potted and grown in the pot one season; two year size are grown in the pot one year and in field beds one year; three year size in the pot one year and field beds two years: four year size in pots one year and in field beds three years.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

If a variety is listed at 10 rate and not each rate, there will be an additional charge of 20 cents per plant if less than 5 are ordered.

Items marked by an asterisk (*) are classed as Lining-Out stock.
S. following size signifies Seedling.

## KURUME AZALEAS

The Kurume Azaleas are one of the most showy of all flowers for the garden. They are also well adapted to forcing - thousands of them being sold for Easter, Mother's Day, and Decoration Day. They are comparatively easy to grow and make a wonderful display. Many of the varieties are hardy out-of-doors as far north as Long Island. The colors are almost every hue and shade except yellow.

| 3 yr . | 1.60 | 14.00 | 130.00 |

## GABLE'S HARDIER AZALEAS

Mr. Joseph B. Gable of Pennsylvania spent almost a lifetime working with Azaleas and Rhododendrons. Many years ago he started breeding azaleas with the hopes of producing a hardier type of evergreen azalea in a good color range. He had wonderful success and is now recognized as a leader in the field.

These varieties will average hardier than Hinodegiri and Amoena and much hardier than the other Kurumes.

CAMPFIRE. Blood-red, hose-in-hose.

|  | Each | 10 | 100 |
| :--- | ---: | ---: | :--- |
| $* 3$ | in. pot plants ----------- | .80 | 7.00 |

## KAEMPFERI HYBRID AZALEAS

In the Kaempferi Hybrids-the result of crossing Kaempferi and Malvatica-there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers. Several year's tests have demonstrated that these Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts.

BETTY. Brilliant rose-pink with a trace of orange.

## SATSUKI HYBRID AZALEAS

A group of dwarfs from the Chugai Nursery Co. near Osaka, Japan. These are late flowering. Flowers are usually variegated, white or pink ground with red, lilac or purple stripes, white base with colored margin, or purple with white variegation and edge.

Many of the variegated sorts will vary in color on the same plant.
CUMPO, Pure white, 4 to 5 in. across, frilled edges, late. Prostrate.

| GUMMPO PINK. Similar to above but flowers pink. |  |  |  |

GYOKUSHIN. Snow white with reddish purple or rose variegation, and white margin.

BACK ACRE AZALEAS By Morrison

These azaleas are the first of the seedlings grown on personally, with a breeding program that is an extension of one phase of the original Glenn Dale work. They are not Glenn Dales, but are more closely related to the Satsuki group from Japan.

The breeding program centered on the production of double flowers that will be hardy for outside work, and in as wide a range of kinds that have white or nearly white centers and colored margins. The doubles are represented in this offering but only a few of those to come. The white or light centered kinds are a mere sample of the range to be available shortly.

These kinds are from parents that are cold hardy in Washington, D. C. and plants have been tested safely in that area, in Memphis, Tenn., and in the general Atlanta area. In extremely cold winters there was some loss of flowers buds.

The usual variation in degree of doubling may be expected on newly set plants, and the variations in light centers will vary considerably until the plants are old enough to have many, small, blooming shoots.

$$

## MISCELLANEOUS AZALEAS

The following azaleas are deciduous except where noted evergreen or semi-evergreen. In the case of those grown from seed, we can give the color of the flowers on the parent plants but cannot guarantee retention of any characteristics in our seedlings. With regard to those grown from cuttings, we can guarantee flower color.

## GLENN DALE AZALEAS

Since we began growing Glenn Dale Azaleas, in 1941, they have become rather widely known and the demand for them has increased rapidly. Their ability to survive in areas where evergreen azaleas have been previously winter-killed has made them very popular.

Sometimes, when their flowers are described as striped or flaked, there will be scattered branches of solid colored flowers. Those branches should be cut out. This characteristic is inherent to the variety, not a fault of the nurseryman.

We will furnish 1 through 4 of a variety at the each rate; 5 through 24 at the 10 rate; and 25 or more at the 100 rate. If a variety is listed at the 10 rate and not at the each rate, there will be an additional charge of 20 cents per plant if less than 5 are ordered.
Each $10 \quad 100$

## HEATHER

For convenience we have listed both the Callunas (Heathers) and the Ericas (Heaths) under one heading. Typically the Ericas bloom in the spring and the Callunas bloom in the fall. However, some varieties, particularly among the Callunas, are erratic. We have seen the Callunas bloom in June and then again in the fall. Calluna vulgaris Tib has bloomed in June, Oct., Nov., and Dec. at this nursery. Colors following variety name indicate the color of bloom. Ages indicate the age plant we have for sale.

ILEX (Holly)
We offer many varieties of holly, some common, some rare. To simplify printing, general descriptions follow:

Ilex aquifolia (English holly) has spiny leaves and red fruit.
Ilex cornuta (Chinese holly) has spiny leaves and red fruit.
Ilex crenata (Japanese holly) has no spines and has black fruit except in rare varieties.
Ilex opaca (American holly) has spiny leaves and red fruit.
Male hollies do not bear fruit; are typically used to pollinate female varieties.
ILEX AQUIFOLIA Dr. Kassab. Zone 6, ET.

* 3 in. pot, 2 yr. -- $10.00 \quad 80.00$

Aquifolia Male (English male holly) Zone 6. ET. Use to pollinate the female aquifolia.

* 4 in. pot _------- \$ $1.50 \quad 12.50 \quad 100.00$

Aquifolia Silver Edge (Zone 6) ES. Leaves green with creamy white variegation. Very attractive. In short supply.

## MALUS - FLOWERING CRAB

The Flowering Crabs are among the most charming of spring trees. They are not only beauitful when in blossom but many carry ornamental and richlycolored fruit in the autumn. They require no particular cultivation, thriving best in a good loam and full sunshine.

They are deciduous trees and are hardy to Zone 4 except in cases noted below. We cannot ship those that are over six feet tall. These plants are field grown unless shown as bed grown.
Each 101001000

Ionensis. A native for budding or grafting. Pink flowering.

5 to 6 ft . F. G. - $\quad \$ 4.50 \quad \$ 40.00$
Purple Wave. Foliage a dark purplish green slightly darker than Crimson Brilliant. Carmine buds and flowers, purplish red fruits.

## EDCO IRON

For experimental use in the control of chlorosis (lack of chlorophyl) in azaleas, gardenias, roses, citrus crops, etc.

Results to date have shown Edco Iron to be very effective in correcting chlorosis in the above crops. Chlorosis may be caused by the excess or deficiency of several major or minor nutrient elements in the plant besides iron, and it may be caused by an excess of water or its lack, but Edco Iron commonly seems to help correct the effect if not the cause of these several conditions.

Full directions for using with each lot.
Prices: 1 lb . $\$ 2.90 ; 10$ or more lbs. at $\$ 2.70$ per lb.

## ALUMINUM PLANT TAGS

Very convenient to use. Lasts years. $3 / 4$ inch wide, $31 / 2$ inches long.
